British Columbia Utilities Commission Sixth Floor, 900 Howe Street Vancouver, B.C. V6Z 2N3

Attention: Ms. Erica M. Hamilton, Commission Secretary

Dear Ms. Hamilton:

Re: Terasen Gas Inc. ("Terasen Gas")

2010 and 2011 Revenue Requirements and Delivery Rates Application

Response to the British Columbia Utilities Commission ("BCUC" or the "Commission") Supplemental Information Request ("IR") No. 2

On June 15, 2009, Terasen Gas filed the Application as referenced above. In accordance with Commission Order No. G-89-09 setting out the Regulatory Timetable for the Application, Terasen Gas respectfully submits the attached response to BCUC Supplemental IR No. 2.

If there are any questions regarding the attached, please contact the undersigned.

Yours very truly,

TERASEN GAS INC.

Original signed:

Tom A. Loski

137.0 Reference: Head Count History

Exhibit B-4-2, BCUC 1.81.0

Exhibit B-1, Part III, Appendix F-2

Exhibit B-1, Part III. Section C, Table 3, p. 247

Headcount Growth

The following was prepared by Commission staff to show the change in TGI's employee headcount from 2003, based on responses provided in BCUC 1.81.1 and 1.81.2.

| | 2003 | 2004 | 2005 | 2006 | 2007 | 2008 | P2009 | F2010 | F2011 |
|-----------------|-------|-------|-------|-------|-------|-------|-------|-------|-------|
| Total Headcount | 1,197 | 1,121 | 1,104 | 1,083 | 1,114 | 1,155 | 1,271 | 1,326 | 1,342 |
| % change | | -6.3% | -1.5% | -1.9% | 2.9% | 3.7% | 10.0% | 4.3% | 1.2% |

On page 147 of the Application, TGI states that "the total number of FTE employees was relatively flat ...(2004-2007)...the upward trend from 2007-2008 recognizes actions taken to manage the demographic risks and the nature of the changing business environment."

137.1 Please explain why the average change in total headcount between 2003-2008 is -0.6 percent while a significant increase is noted in 2009 of 10 percent? Please explain why TGI's "actions to manage the demographic risks and the nature of the changing business environment" could not be duplicated in 2009?

Response:

Actions taken to manage the changing nature of the business environment in 2009 are explained in detail in the responses to BCUC IRs 1.86.1 – 1.86.4 with reference to increases in the number of FTE employees for the same period. These changes could not be effectively managed with 2008 staffing levels.

The increase in TGI projected headcount for 2009 can be attributed in large part to the following departments: Marketing & Business Development, Business & IT Services, and Human Resources & Operational Governance.

Increased headcount in Marketing & Business Development was addressed in TGI's response to BCUC 1.86.3. Additional positions were added in 2009 as a result of BCUC Order No. G-36-09 for approved EEC programs (note that all EEC staff costs are capitalized as per Order No. G-36-09).

Increased headcount in Business & IT Services was addressed in TGI's response to BCUC 1.86.2. The overall increase in headcount can be attributed to the need to address past vacancy

| Terasen Gas Inc. ("TGI", "Terasen Gas" or the "Company") 2010-2011 Revenue Requirements Application | Submission Date: September 11, 2009 |
|---|--|
| Response to British Columbia Utilities Commission ("BCUC" or the "Commission") Supplemental Information Request ("IR") No. 2 | Page 2 |

challenges and to hire net new staff to meet existing and future strategic business objectives in the areas of Business Intelligence, and Operations Engineering.

The increased headcount in the Human Resources & Operational Governance can be attributed to an increase in temporary employees. Human Resources manages a group of temporary employees (typically called Relief Clerks) who are placed on assignments within the company for temporary periods due to vacations, leaves of absence, workload and seasonal projects.

| Headcount for temporary Employees | |
|-----------------------------------|----|
| 2008 (as at December 31, 2008) | 38 |
| 2009 (as at July 15, 2009) | 78 |

Relief clerk wages and FTE are accounted for within the receiving departments, but their headcount is captured in HR. This is also explained in the response to BCUC IR 2.107.1 and is similarly reflected in Appendix F2, page 2 of the Application where total FTE for HROG between 2008-2009 (not including Relief Clerks) is shown to have decreased by 11 or 13%.

Another explanation for the general increase in headcount for 2009 can be explained by how the headcount data has been collected. For example, the headcount figures reported as at December 31, 2008 reflect all active employees on that date. In calculating the proposed headcount for 2009, we have captured all active employees as of July 15, 2009, and then added the number of vacancies expected to be filled by year-end. A position that was vacant on December 31, 2008 would not have been included in the reported figures for 2008, but if filled in the first half of 2009 would add incremental headcount for 2009. For reference, 82 employees were hired externally in the first half of 2009.

138.0 Reference: Organizational Chart by Department

Exhibit B-4-2, BCUC 1.82.0

Human Resources & Operations Governance

138.1 Under the Human Resources & Operations Governance organizational chart, please describe the difference in job duties for the "Training Manager", "the Learning and Development Specialist", and the "Competency Manager." Please be specific in describing how each position is necessary, adds value, and is not a duplication of responsibilities.

Response:

The positions identified above serve distinct functions. They are critical to maintaining the quality of our field training, the need to link training to specific competencies, and our commitment to providing enhanced management and leadership training.

Training Manager:

- The Training Manager is responsible for the development and delivery of training, with a primary focus on field related training. The Training Manager supervises the Instructors, Training Coordinator, Training Assistant and Instructional Designers. This position is also responsible for maintaining the training shops (PE fusion, welding and customer service). The Training Manager works closely with Distribution and Transmission operating departments to develop annual training plans and ensures that training is delivered to meet code and regulatory requirements, provide safe delivery of service to customers, and meet the needs of the business.
- The Training Manager is necessary for managing the various processes and resources required for the development and delivery of internal training. Training required for our field workforce is specific to our industry, and the Training Manager leads a department that develops and delivers this specialized training utilizing primarily internal resources.

Learning and Development Specialist:

 The Learning and Development Specialist is responsible for working with various client groups to determine the training requirements related to management and other nonfield related mandatory training (Preventing Violence in the Workplace, Manager Boot Camp, Gas Industry Awareness). The Learning and Development Specialist

Terasen Gas Inc. ("TGI", "Terasen Gas" or the "Company") 2010-2011 Revenue Requirements Application

Submission Date: September 11, 2009

Response to British Columbia Utilities Commission ("BCUC" or the "Commission")

Supplemental Information Request ("IR") No. 2

Page 4

coordinates external resources to deliver training based on the requirements of various departments to meet the needs of customers and respond to changing needs of the business, including compliance with new policies. This position also coordinates the Manager in Training (MIT) program and Engineer in Training (EIT) program.

• The Learning and Development Specialist continues to be necessary for coordinating our formal management development programs (EIT and MIT) and ensuring that we identify the development requirements for our Management and Exempt employees and implement plans for meeting these requirements. Much of the training for this group of employees is developed and delivered externally and this position coordinates the necessary external resources. Investment in employee development is a key component of our strategy to retain, attract and motivate employees. The EIT and MIT programs are an essential part of our recruitment strategy. These programs provide an excellent development opportunity for new employees, which in turn results in qualified and engaged employees to meet the future needs of our company.

Competency Manager:

• This new position is required to oversee the competency management process to ensure that we demonstrate compliance with the new regulatory requirements in CSA Z662 related to our Asset Integrity Management Program. The focus for this position is developing assessment criteria for the required competencies, managing the employee assessment process, and ensuring the integrity of all competency related data. This position also manages the implementation, upgrades and enhancements for any IT tools (including SAP and FileNet) supporting competency management. For example, an output of the competency management process could be the requirement to provide training to an employee that has not met all the competency requirements for a specific task. In this example, the Competency Manager is responsible for identifying the specific need for training to fill a competency deficiency, while the Training Manager is responsible for the development and delivery of the required training to fill the competency deficiency.

Our investment in Training and Development will assist in mitigating knowledge loss related to our significant retirement risk and is a key element of the Human Resources strategic focus on retaining, attracting, and motivating employees.

139.0 Reference: Organizational Chart by Department

Exhibit B-4-2, BCUC 1.82.0

Exhibit B-4, BCUC 1.33.2

Marketing & Business Development

139.1 The detailed organizational charts filed by TGI indicate that there has been a significant structural change in the Marketing and Business Development department, particularity in the area of Resource Planning and Energy Efficiency. Please identify how many of these positions are designed specifically for the Alternative Energy Solutions (AES) business segment. Will these employees be cross trained in TGI's core business of gas delivery? If so, how does TGI plan to distinguish the cost of service for gas delivery and for AES given that "each customer or group of customers for a particular alternative energy project will have as separate cost of service, rate and...rate category" as indicated in BCUC 1.33.2.

Response:

No positions are designed solely for the Alternative Energy Solutions business segment. As noted in the responses to BCUC IR 1.72.2 and 1.94.2.3, these staff will work with customers from an account management, sales and market development standpoint. They will be providing energy solutions which primarily involve natural gas, but will also provide alternative energy solutions where that solution is the right energy use for the proposed project. As TGI develops more of these projects and tracks costs associated with the developing alternative energy projects, as opposed to natural gas projects, it will be in a position to allocate sales and development costs for future revenue requirements and alternative energy projects.

While marketing and sales costs are pooled, and as noted in the response to BCUC IR 1.21.1, once a customer has signed an agreement all costs from that point forward would be allocated directly and would be capitalized as per IFRS and accounted for within the rate the customers will pay for service. This is also noted in response to BCUC IR 1.72.2 TGI as follows:

"However, as noted in response to BCUC IR 1.19.1, and on page 267 of the Application, TGI believes it is important to allocate a portion of overhead costs, including Marketing related costs, to the customers who would receive alternative energy solutions. As part of the economic tests for the alternative energy solutions including biogas, DES, solar and geo, customers will be allocated a fair portion of these costs and as the alternative energy business grows and more customers are added, the overall share of these costs allocated to AES customers will grow accordingly. As discussed in BCUC IR 1.20.1 the costs

Supplemental Information Request ("IR") No. 2

Page 6

included in the economic tests for AES customer will include an overhead allowance, similar to the overhead allowance included in TGI's main extension test, so that AES rates will recover more than the direct costs of the particular project only."

The following table was prepared by Commission staff based on data supplied by TGI in BCUC 1.82.1 and 1.82.2. (for comparative purposes, the President and Executive Assistant was exempt from the total headcount as was done in the past).

| Dept. | <u>2006</u> | 2007 | % | 2008 | % | <u>2010</u> | % change from 2006 | <u>2011</u> | Incremental % change |
|-------------------------------------|-------------|-------|--------|-------|-------|-------------|-----------------------|-------------|----------------------|
| HR&OG | 97 | 86 | -11.3% | 100 | 16.3% | 137 | 37.0% | 138 | 0.7% |
| BS&IT | 260 | 307 | 18.1% | 317 | 3.3% | 373 | 17.7% | 381 | 2.1% |
| Distribution | 463 | 492 | 6.3% | 510 | 3.7% | 514 | 0.8% | 517 | 0.6% |
| Reg Affairs & Finance | 55 | 64 | 16.4% | 66 | 3.1% | 75 | 13.6% | 75 | 0.0% |
| Mktg & Bus Development Gas Supply & | 77 | 84 | 9.1% | 80 | -4.8% | 134 | 67.5% | 138 | 3.0% |
| Transmission | 131 | 81 | -38.2% | 82 | 1.2% | 91 | 11.0% | 91 | 0.0% |
| TOTAL | 1,083 | 1,114 | 2.9% | 1,155 | 3.7% | 1,324 | 14.6% | 1,340 | 1.2% |

139.2 In the proposed 2010 organizational chart, the majority of the increase in headcount appears to be the Marketing and Business Development and Human Resource & Operations Governance departments. Would the increase in these departments likely be as high if the Alternative Energy Solutions proposal in the Application was not approved or partially approved?

Response:

No. TGI believes that, while the majority of the headcount for the Marketing department are required in order to meet customer needs regardless of whether or not the customer seeks natural gas or alternative energy, there may be some staff that are not required if TGI does not provide any alternative solutions. However, as noted in response to BCUC IR 1.94.2.3, customers still expect additional contact time to learn and understand various energy options. Even if TGI were not in a position to offer alternative energy solutions, the Company believes that it will still require additional time with customers to convince them of the benefits of natural gas without any option for alternative energy or in combination with alternative energy solutions.

| Terasen Gas Inc. ("TGI", "Terasen Gas" or the "Company") 2010-2011 Revenue Requirements Application | Submission Date: September 11, 2009 |
|---|--|
| Response to British Columbia Utilities Commission ("BCUC" or the "Commission") Supplemental Information Request ("IR") No. 2 | Page 7 |

For Human Resources & Operational Governance the increase in headcount can be attributed to the increase in temporary employees. Human Resources manages temporary employees that are placed on assignments within the company for temporary coverage due to vacations, leave of absences, workload and seasonal projects. The staffing numbers in this area are not impacted by TGI's proposals with respect to alternative energy solutions.

139.3 There appears to be fluctuating number of employees in the Gas Supply and Transmission department. Please discuss this trend including the changes in the business environment over the last 4 years.

Response:

In the table presented in TGI's response to BCUC IR 1.81.1 the total headcount given for the Gas Supply and Transmission department ("GS&T") is 131. This headcount included the Measurement department, which in 2006 was part of GS&T. After removing Measurement's 50 employees, the total for GS&T for 2006 becomes 81, making the headcount between 2006 and 2008 essentially flat.

Please see TGI's response to BCUC IR 1.86.4 for an explanation of the increase in headcount from 2008 to 2009.

Headcount and FTE Location

140.1 Provide a breakdown of the number of FTEs by location (Lower Mainland, Interior) for each of the functional areas (Distribution, Finance & Regulatory Affairs) in BCUC 1.74.1.

Response:

The table below provides a breakdown of FTEs by location (Lower Mainland, Interior, Vancouver Island) and functional area for the years 2006-2011. It is important to note that these calculations include dependent contractors and are based on average actual FTE for the years 2006-2008, forecast FTE for 2009, and average budgeted FTE for 2010-2011. FTE totals for each year match the response to BCUC IR1.74.1.
