SHARE PRICE PERFORMANCE:**COMPANY SUMMARY:**

Fortis Inc. is a diversified, international electric utility holding company with assets approaching \$4.5 billion and annual revenues of more than \$1.4 billion. Fortis has holdings in regulated and non-regulated natural gas and electric distribution utilities in Alberta, BC, Newfoundland, PEI, Ontario, New York State, Belize, Turks and Caicos Islands, and Cayman Islands. Fortis also owns and operates hotels and real estate in Canada.

All amounts in C\$ unless otherwise noted.

Infrastructure -- Utilities**TERASEN RECEIVES POSITIVE DECISION; RAISING TARGET PRICE TO C\$30.00****Event**

Fortis's Terasen Gas operations received a regulatory decision regarding its allowed return on common equity (ROE) and capital structure for 2010.

Impact

Positive. The decision raises the allowed ROEs for Terasen Gas, Terasen Gas (Vancouver Island), Terasen Gas (Whistler) and FortisBC. In addition, the deemed equity component for Terasen Gas was raised. Consequently, expected annual earnings will improve by about \$0.10 per share.

Valuation

We are raising our target price to C\$30.00 from C\$28.00 to reflect the favourable earnings impact from the regulatory decision but our HOLD rating remains unchanged. Our target price is derived from a combination of valuation metrics that include earnings and dividend yields relative to long-term interest rates, dividend discount models, and earnings and cash flow multiples relative to both historical valuation and its utility and pipeline peers.

Summary

We are raising our 2010 and 2011 EPS estimates to \$1.70 and \$1.85, up from \$1.60 and \$1.70, respectively. This is due to a more favourable than anticipated cost of capital decision from the BCUC. While we believe the decision is fair, we had modeled in a lesser outcome to be conservative. The improved outlook also boosts our target price for the stock to C\$30.00 from C\$28.00.

Canaccord Adams is the global capital markets group of Canaccord Financial Inc. (CF : TSX | CF : AIM)

The recommendations and opinions expressed in this Investment Research accurately reflect the Investment Analyst's personal, independent and objective views about any and all the Designated Investments and Relevant Issuers discussed herein. For important information, please see the Important Disclosures section in the appendix of this document or visit <http://www.canaccordadams.com/research/Disclosure.htm>.

The British Columbia Utilities Commission (BCUC) issued its cost of capital decision for the Fortis group of companies in BC, namely: Terasen Gas Inc. (TGI); Terasen Gas (Vancouver Island) Inc. (TGVI); Terasen Gas (Whistler) Inc.; and Fortis BC. The decision is applicable for the last half of 2009 (ROE increase only – not increased equity component) and all of 2010, and notably the BCUC has rejected an annual adjustment formula going forward. The decision raises TGI's allowed ROE to 9.5% (previously 8.47%) and increases its deemed equity thickness to 40% (previously 35.01%). For TGVI, the decision raises its allowed ROE to 10.0% (previously 9.17%), which slightly lowers its ROE premium over TGI's allowed ROE to 50 bps from 70 bps. In addition, Fortis BC's allowed ROE moves to 9.9%, up from 8.87% previously. There was no change to TGVI's or Fortis BC's equity thickness.

While the higher allowed ROE is retroactive to July 1, 2009, the higher equity thickness at Terasen Gas only comes into effect on January 1, 2010. Therefore, the decision will have a more modest impact on 2009 earnings and we are leaving our 2009 EPS estimate at \$1.53.

We note that the increase to 40% of TGI's deemed equity component will require about \$125 million of additional common equity, likely through Fortis using its internally generated cash flow and issuing preferred and/or common shares. We assume Fortis issues about \$100 million of common equity and that earnings per share will rise by about \$0.10 per share in 2010 and by as much as \$0.15 per share in 2011.

Decision Highlights

We believe the BCUC delivered a thorough, balanced and well thought out decision that resulted in a fair outcome. We highlight some of the key points in the regulator's decision.

- Endorsed the National Energy Board's (NEB's) fair return standard in the TQM Decision (see our March 23, 2009 *Daily Letter* note).
- In agreement with the NEB and the Alberta Utilities Commission that utilities in Canada need to compete for capital in the global market and therefore the decision included US data in determining Terasen Gas Inc.'s capital structure, ROE and credit metrics.
- Determined that the use of deferral accounts impacts short-term risk and is better addressed in the ROE calculation than in capital structure.
- Concluded business risk has increased
 - Lack of certainty around the nature and extent of aboriginal rights and title in BC together with the lack of treaties, which combine to create operational and regulatory complexity and a risk of litigation
 - Climate change legislation has also created a level of uncertainty
- To determine ROE, the most weight was given to a discounted cash flow approach, lesser weight to the equity risk premium and Capital Asset Pricing Model approaches, and a very small amount of weight to the comparable earnings approach.
- Directed that the Automatic Adjustment Mechanism be eliminated.
 - TGI must complete its study of alternative formulae and report to the Commission by December 31, 2010.

- TGV's premium over TGI's ROE reduced from 70 basis points to 50 basis points due to declining risk in the operations.
- Determined the ROE for TGI should continue to serve as the Benchmark ROE for FortisBC and any other utility in BC that uses the Benchmark ROE to set rates.
- The allowed ROE is retroactive to July 1, 2009.

Investment risks

Some of the specific risk factors that pertain to the projected 6- to 12-month stock price target for Fortis are as follows: (1) price movement in electricity rates and commodities used for electricity generation could impact profitability; (2) international operations have currency rate exposure and liquidity risks associated with those currencies; (3) credit risk of contract counterparties could improve or deteriorate; (4) debt refinancing at different interest rates could impact the income of the company; (5) equipment failure or extreme weather conditions could adversely affect operating facilities; (6) change in public policy on environmental health and safety risk could impose unexpected costs on Fortis; (7) change in regulatory or political climate could impact profitability and future growth and development of Fortis; (8) the inability to maintain, or to renew, the collective bargaining agreements with unionized workers on acceptable terms could result in increased labour costs or service interruptions arising from labour disputes; (9) economic conditions which may impact demand for products and services, peer group valuation, access to capital and share trading liquidity; (10) Fortis holds investments in commercial real estate and hotel properties which are subject to operating risks associated with the industry.

APPENDIX: IMPORTANT DISCLOSURES**Analyst Certification:**

Each authoring analyst of Canaccord Adams whose name appears on the front page of this investment research hereby certifies that (i) the recommendations and opinions expressed in this investment research accurately reflect the authoring analyst's personal, independent and objective views about any and all of the designated investments or relevant issuers discussed herein that are within such authoring analyst's coverage universe and (ii) no part of the authoring analyst's compensation was, is, or will be, directly or indirectly, related to the specific recommendations or views expressed by the authoring analyst in the investment research.

Site Visit:

An analyst has visited Fortis's material operations in BC, Alberta, Manitoba, Newfoundland and Grand Cayman. No payment or reimbursement was received from the issuer for related travel costs.

Price Chart:***Distribution of Ratings:**

Canaccord Ratings System:

BUY: The stock is expected to generate risk-adjusted returns of over 10% during the next 12 months.

HOLD: The stock is expected to generate risk-adjusted returns of 0-10% during the next 12 months.

SELL: The stock is expected to generate negative risk-adjusted returns during the next 12 months.

NOT RATED: Canaccord Adams does not provide research coverage of the relevant issuer.

"Risk-adjusted return" refers to the expected return in relation to the amount of risk associated with the designated investment or the relevant issuer.

Risk Qualifier:

SPECULATIVE: Stocks bear significantly higher risk that typically cannot be valued by normal fundamental criteria. Investments in the stock may result in material loss.

Canaccord Adams Research Disclosures as of 17 December 2009

Company	Disclosure
Fortis Inc.	1A, 2, 7

- 1 The relevant issuer currently is, or in the past 12 months was, a client of Canaccord Adams or its affiliated companies. During this period, Canaccord Adams or its affiliated companies provided the following services to the relevant issuer:
 - A. investment banking services.
 - B. non-investment banking securities-related services.
 - C. non-securities related services.
- 2 In the past 12 months, Canaccord Adams or its affiliated companies have received compensation for Corporate Finance/Investment Banking services from the relevant issuer.
- 3 In the past 12 months, Canaccord Adams or any of its affiliated companies have been lead manager, co-lead manager or co-manager of a public offering of securities of the relevant issuer or any publicly disclosed offer of securities of the relevant issuer or in any related derivatives.
- 4 Canaccord Adams acts as corporate broker for the relevant issuer and/or Canaccord Adams or any of its affiliated companies may have an agreement with the relevant issuer relating to the provision of Corporate Finance/Investment Banking services.
- 5 Canaccord Adams or any of its affiliated companies is a market maker or liquidity provider in the securities of the relevant issuer or in any related derivatives.
- 6 In the past 12 months, Canaccord Adams, its partners, affiliated companies, officers or directors, or any authoring analyst involved in the preparation of this investment research has provided services to the relevant issuer for remuneration, other than normal course investment advisory or trade execution services.
- 7 Canaccord Adams intends to seek or expects to receive compensation for Corporate Finance/Investment Banking services from the relevant issuer in the next six months.
- 8 The authoring analyst, a member of the authoring analyst's household, or any individual directly involved in the preparation of this investment research, has a long position in the shares or derivatives, or has any other financial interest in the relevant issuer, the value of which increases as the value of the underlying equity increases.
- 9 The authoring analyst, a member of the authoring analyst's household, or any individual directly involved in the preparation of this investment research, has a short position in the shares or derivatives, or has any other financial interest in the relevant issuer, the value of which increases as the value of the underlying equity decreases.
- 10 Those persons identified as the author(s) of this investment research, or any individual involved in the preparation of this investment research, have purchased/received shares in the relevant issuer prior to a public offering of those shares, and such person's name and details are disclosed above.
- 11 A partner, director, officer, employee or agent of Canaccord Adams and its affiliated companies, or a member of his/her household, is an officer, or director, or serves as an advisor or board member of the relevant issuer and/or one of its subsidiaries, and such person's name is disclosed above.
- 12 As of the month end immediately preceding the date of publication of this investment research, or the prior month end if publication is within 10 days following a month end, Canaccord Adams or its affiliate companies, in the aggregate, beneficially owned 1% or more of any class of the total issued share capital or other common equity securities of the relevant issuer or held any other financial interests in the relevant issuer which are significant in relation to the investment research (as disclosed above).
- 13 As of the month end immediately preceding the date of publication of this investment research, or the prior month end if publication is within 10 days following a month end, the relevant issuer owned 1% or more of any class of the total issued share capital in Canaccord Adams or any of its affiliated companies.
- 14 Other specific disclosures as described above.

Canaccord Adams is the business name used by certain subsidiaries of Canaccord Financial Inc., including Canaccord Adams Inc., Canaccord Adams Limited, and Canaccord Adams, a division of Canaccord Financial Ltd.

The authoring analysts who are responsible for the preparation of this investment research are employed by Canaccord Adams, a securities broker-dealer with principal offices located in Vancouver, Calgary, Toronto, Montreal (all Canada), Boston, New York, San Francisco (all US) and London (UK).

In the event that this is compendium investment research (covering six or more relevant issuers), Canaccord Adams and its affiliated companies may choose to provide specific disclosures of the subject companies by reference, as well as its policies and procedures regarding the dissemination of investment research. SHARE PRICE PERFORMANCE:**COMPANY SUMMARY:**

Fortis Inc. is a diversified, international electric utility holding company with assets approaching \$4.5 billion and annual revenues of more than \$1.4 billion. Fortis has holdings in regulated and non-regulated natural gas and electric distribution utilities in Alberta, BC, Newfoundland, PEI, Ontario, New York State, Belize, Turks and Caicos Islands, and Cayman Islands. Fortis also owns and operates hotels and real estate in Canada.

All amounts in C\$ unless otherwise noted.

Infrastructure -- Utilities**2010 OUTLOOK MORE MODEST; TARGET REDUCED C\$1.00 TO C\$29.00****Event**

Fortis released fourth-quarter results that were slightly lower than the consensus estimate. Looking ahead, we are revising our estimates downward \$0.10 per share to reflect a slow economic rebound, no regulatory resolution in Belize and weaker power prices.

Impact

Modestly negative.

Valuation

We are maintaining our HOLD rating but reducing our target price C\$1.00 to C\$29.00. Our target price is derived from a combination of valuation metrics that include earnings and dividend yields relative to long-term interest rates, dividend discount models, and earnings and cash flow multiples relative to both historical valuation and its utility and pipeline peers.

Outlook

Earnings were roughly in line for the quarter and year. However, we are reducing out 2010 and 2011 EPS estimates by \$0.10 to \$1.60 and \$1.75 respectively, largely to account for the lack of resolution to the poor regulatory treatment in Belize and to be conservative in the timing of an improvement in the economy. Current Canadian operations are solid and offer reasonable low-risk growth, meaning the 4.0% dividend is very well protected and should grow over time.

Generally, the Caribbean investments have taken too much management time and effort relative to the returns being achieved. This is particularly true in Belize, where future court decisions are required to get to appropriate returns. While no impairment charge has been taken, that

Canaccord Adams is the global capital markets group of Canaccord Financial Inc. (CF : TSX | CF : AIM)

The recommendations and opinions expressed in this Investment Research accurately reflect the Investment Analyst's personal, independent and objective views about any and all the Designated Investments and Relevant Issuers discussed herein. For important information, please see the Important Disclosures section in the appendix of this document or visit <http://www.canaccordadams.com/research/Disclosure.htm>.

remains a possibility down the road. The company first entered the Caribbean in search of growth before opportunities for growth surfaced in Canada. As a result of very successful acquisitions in Alberta and BC, along with continuing growth in those investments, the Caribbean holdings have become less important to the overall company. Consequently, it would not be surprising to see Fortis exit the area if there was a reasonable opportunity to do so down the road. A catalyst could be if the company required financing for new, and more stable, utility opportunities in North America. Fortis is always watchful for good opportunities, but their timing is always uncertain.

Earnings summary

Fortis reported fourth-quarter recurring income of \$0.43 per share versus \$0.47 last year. Note for comparability purposes, we excluded \$0.02 of earnings from the Q4 rate decisions applicable to earlier in the year. As the rate decisions were known before year end, the appropriate comparison would be to add back in the \$0.02 to get to \$0.46 (does not add due to rounding), but it is still \$0.05 below the \$0.51 consensus estimate. We note that recurring earnings include a one-time negative \$0.03 after-tax impact at Terasen Gas from cost over-runs converting customer appliances from propane to natural gas. This expense may well be recovered through the regulatory process, though that is not yet known.

At Fortis Generation, the expiration of an agreement related to the Rankine hydro facility in Ontario reduced earnings by around \$4 million in the quarter. Other regulated Canadian operations were flat with the exception of FortisBC, which was up \$1 million. Regulated Caribbean operations were up slightly over Q4/08, due primarily to a change in depreciation estimates at Fortis Turks and Caicos. Fortis Properties delivered modestly higher results despite low occupancy in the Hotel division, due to the contribution from the November 2008 addition of the Sheraton Hotel Newfoundland, the April 2009 acquisition of the Holiday Inn Select in Ontario and a higher contribution from the Real Estate Division. Recurring earnings for the full year was \$1.50 versus \$1.59 the prior year. For more details on the fourth quarter and full year results, please refer to Figures 1 and 2.

Noteworthy Items

- New customer additions at Terasen returning
 - 7,400 net customer adds in Q4/09 versus a loss of 300 in Q3/09
 - Year to date customer additions were 8,200 versus 12,800 last year
- Capital Program
 - Spent \$1,024 million in 2009
 - \$888 million Canadian Regulated Utilities; \$92 million on Caribbean Regulated Utilities; \$44 million on non-regulated assets
 - ~1.1 billion budgeted for 2010
 - \$5 billion capital expected to be spent in 2010-2014
- Debt issues in Q4/09 and Q1/10
 - Fortis Inc. - \$250 million, 4.25%, 5-year rate reset preferred in Jan/10
 - FortisAlberta - \$125 million, 5.37%, 30-year unsecured debentures in Oct/09
- Regulatory highlights
 - Terasen Gas ROE 9.5% from 8.47%, effective July/09
 - Equity component 40% from 35%, effective Jan/10
 - Terasen Gas Vancouver Island ROE 10.0% from 9.17%
 - FortisBC ROE 9.90% from 8.87%, effective Jan/10
 - FortisAlberta ROE 9.0% from 8.61%, effective January 1, 2009
 - Equity component 41% from 37%
 - Newfoundland Power ROE 9.00% from 8.95%, effective Jan/10

Investment risks

Some of the specific risk factors that pertain to the projected 6- to 12-month stock price target for Fortis are as follows: (1) price movement in electricity rates and commodities used for electricity generation could impact profitability; (2) international operations have currency rate exposure and liquidity risks associated with those currencies; (3) credit risk of contract counterparties could improve or deteriorate; (4) debt refinancing at different interest rates could impact the income of the company; (5) equipment failure or extreme weather conditions could adversely affect operating facilities; (6) change in public policy on environmental health and safety risk could impose unexpected costs on Fortis; (7) change in regulatory or political climate could impact profitability and future growth and development of Fortis; (8) the inability to maintain, or to renew, the collective bargaining agreements with unionized workers on acceptable terms could result in increased labour costs or service interruptions arising from labour disputes; (9) economic conditions which may impact demand for products and services, peer group valuation, access to capital and share trading liquidity; (10) Fortis holds investments in commercial real estate and hotel properties which are subject to operating risks associated with the industry.

APPENDIX: IMPORTANT DISCLOSURES**Analyst Certification:**

Each authoring analyst of Canaccord Adams whose name appears on the front page of this investment research hereby certifies that (i) the recommendations and opinions expressed in this investment research accurately reflect the authoring analyst's personal, independent and objective views about any and all of the designated investments or relevant issuers discussed herein that are within such authoring analyst's coverage universe and (ii) no part of the authoring analyst's compensation was, is, or will be, directly or indirectly, related to the specific recommendations or views expressed by the authoring analyst in the investment research.

Site Visit:

An analyst has visited Fortis's material operations in BC, Alberta, Manitoba, Newfoundland and Grand Cayman. No payment or reimbursement was received from the issuer for related travel costs.

Canaccord Ratings System:

BUY: The stock is expected to generate risk-adjusted returns of over 10% during the next 12 months.

HOLD: The stock is expected to generate risk-adjusted returns of 0-10% during the next 12 months.

SELL: The stock is expected to generate negative risk-adjusted returns during the next 12 months.

NOT RATED: Canaccord Adams does not provide research coverage of the relevant issuer.

"Risk-adjusted return" refers to the expected return in relation to the amount of risk associated with the designated investment or the relevant issuer.

Risk Qualifier:

SPECULATIVE: Stocks bear significantly higher risk that typically cannot be valued by normal fundamental criteria. Investments in the stock may result in material loss.

Canaccord Adams Research Disclosures as of 4 February 2010

Company	Disclosure
---------	------------

Fortis Inc.	1A, 2, 7
1	The relevant issuer currently is, or in the past 12 months was, a client of Canaccord Adams or its affiliated companies. During this period, Canaccord Adams or its affiliated companies provided the following services to the relevant issuer: A. investment banking services. B. non-investment banking securities-related services. C. non-securities related services.
2	In the past 12 months, Canaccord Adams or its affiliated companies have received compensation for Corporate Finance/Investment Banking services from the relevant issuer.
3	In the past 12 months, Canaccord Adams or any of its affiliated companies have been lead manager, co-lead manager or co-manager of a public offering of securities of the relevant issuer or any publicly disclosed offer of securities of the relevant issuer or in any related derivatives.
4	Canaccord Adams acts as corporate broker for the relevant issuer and/or Canaccord Adams or any of its affiliated companies may have an agreement with the relevant issuer relating to the provision of Corporate Finance/Investment Banking services.
5	Canaccord Adams or any of its affiliated companies is a market maker or liquidity provider in the securities of the relevant issuer or in any related derivatives.
6	In the past 12 months, Canaccord Adams, its partners, affiliated companies, officers or directors, or any authoring analyst involved in the preparation of this investment research has provided services to the relevant issuer for remuneration, other than normal course investment advisory or trade execution services.
7	Canaccord Adams intends to seek or expects to receive compensation for Corporate Finance/Investment Banking services from the relevant issuer in the next six months.
8	The authoring analyst, a member of the authoring analyst's household, or any individual directly involved in the preparation of this investment research, has a long position in the shares or derivatives, or has any other financial interest in the relevant issuer, the value of which increases as the value of the underlying equity increases.
9	The authoring analyst, a member of the authoring analyst's household, or any individual directly involved in the preparation of this investment research, has a short position in the shares or derivatives, or has any other financial interest in the relevant issuer, the value of which increases as the value of the underlying equity decreases.
10	Those persons identified as the author(s) of this investment research, or any individual involved in the preparation of this investment research, have purchased/received shares in the relevant issuer prior to a public offering of those shares, and such person's name and details are disclosed above.
11	A partner, director, officer, employee or agent of Canaccord Adams and its affiliated companies, or a member of his/her household, is an officer, or director, or serves as an advisor or board member of the relevant issuer and/or one of its subsidiaries, and such person's name is disclosed above.
12	As of the month end immediately preceding the date of publication of this investment research, or the prior month end if publication is within 10 days following a month end, Canaccord Adams or its affiliate companies, in the aggregate, beneficially owned 1% or more of any class of the total issued share capital or other common equity securities of the relevant issuer or held any other financial interests in the relevant issuer which are significant in relation to the investment research (as disclosed above).
13	As of the month end immediately preceding the date of publication of this investment research, or the prior month end if publication is within 10 days following a month end, the relevant issuer owned 1% or more of any class of the total issued share capital in Canaccord Adams or any of its affiliated companies.
14	Other specific disclosures as described above.

Canaccord Adams is the business name used by certain subsidiaries of Canaccord Financial Inc., including Canaccord Adams Inc., Canaccord Adams Limited, and Canaccord Adams, a division of Canaccord Financial Ltd.

The authoring analysts who are responsible for the preparation of this investment research are employed by Canaccord Adams, a securities broker-dealer with principal offices located in Vancouver, Calgary, Toronto, Montreal (all Canada), Boston, New York, San Francisco (all US) and London (UK).

In the event that this is compendium investment research (covering six or more relevant issuers), Canaccord Adams and its affiliated companies may choose to provide specific disclosures of the subject companies by reference, as well as its policies and procedures regarding the dissemination of investment research. To access this material or for more information, please send a request to Canaccord Adams Research, Attn: Disclosures, P.O. Box 10337 Pacific Centre, 2200-609 Granville Street, Vancouver, BC, Canada V7Y 1H2 or disclosures@canaccord.com.

The authoring analysts who are responsible for the preparation of this investment research have received (or will receive) compensation based upon (among other factors) the Corporate Finance/Investment Banking

revenues and general profits of Canaccord Adams. However, such authoring analysts have not received, and will not receive, compensation that is directly based upon or linked to one or more specific Corporate Finance/Investment Banking activities, or to recommendations contained in the investment research. Canaccord Adams and its affiliated companies may have a Corporate Finance/Investment Banking or other relationship with the company that is the subject of this investment research and may trade in any of the designated investments mentioned herein either for their own account or the accounts of their customers, in good faith or in the normal course of market making. Accordingly, Canaccord Adams or their affiliated companies, principals or employees (other than the authoring analyst(s) who prepared this investment research) may at any time have a long or short position in any such designated investments, Related designated investments or in options, futures or other derivative instruments based thereon.

Some regulators require that a firm must establish, implement and make available a policy for managing conflicts of interest arising as a result of publication or distribution of investment research. This investment research has been prepared in accordance with Canaccord Adams' policy on managing conflicts of interest, and information barriers or firewalls have been used where appropriate. Canaccord Adams' policy is available upon request.

The information contained in this investment research has been compiled by Canaccord Adams from sources believed to be reliable, but (with the exception of the information about Canaccord Adams) no representation or warranty, express or implied, is made by Canaccord Adams, its affiliated companies or any other person as to its fairness, accuracy, completeness or correctness. Canaccord Adams has not independently verified the facts, assumptions, and estimates contained herein. All estimates, opinions and other information contained in this investment research constitute Canaccord Adams' judgement as of the date of this investment research, are subject to change without notice and are provided in good faith but without legal responsibility or liability.

Canaccord Adams salespeople, traders, and other professionals may provide oral or written market commentary or trading strategies to our clients and our proprietary trading desk that reflect opinions that are contrary to the opinions expressed in this investment research. Canaccord Adams' affiliates, proprietary trading desk, and investing businesses may make investment decisions that are inconsistent with the recommendations or views expressed in this investment research.

This investment research is provided for information purposes only and does not constitute an offer or solicitation to buy or sell any designated investments discussed herein in any jurisdiction where such offer or solicitation would be prohibited. As a result, the designated investments discussed in this investment research may not be eligible for sale in some jurisdictions. This investment research is not, and under no circumstances should be construed as, a solicitation to act as a securities broker or dealer in any jurisdiction by any person or company that is not legally permitted to carry on the business of a securities broker or dealer in that jurisdiction. This material is prepared for general circulation to clients and does not have regard to the investment objectives, financial situation or particular needs of any particular person. Investors should obtain advice based on their own individual circumstances before making an investment decision. To the fullest extent permitted by law, none of Canaccord Adams, its affiliated companies or any other person accepts any liability whatsoever for any direct or consequential loss arising from or relating to any use of the information contained in this investment research.

- For Canadian Residents:** This Investment Research has been approved by Canaccord Adams, a division of Canaccord Financial Ltd., which accepts responsibility for this Investment Research and its dissemination in Canada. Canadian clients wishing to effect transactions in any Designated Investment discussed should do so through a qualified salesperson of Canaccord Adams, a division of Canaccord Financial Ltd. in their particular jurisdiction.
- For United Kingdom Residents:** This investment research complies with the Financial Services Authority's Handbook chapter on Conduct of Business and is approved by Canaccord Adams Limited, which is authorized and regulated by the Financial Services Authority, in connection with its distribution in the United Kingdom. This material is not for distribution in the United Kingdom to retail clients, as defined under the rules of the Financial Services Authority. Canaccord Adams Limited accepts responsibility for this investment research and its dissemination in the United Kingdom. The information contained in this investment research is only intended for distribution in the UK to persons who qualify as professional clients or eligible counterparties, as defined under the rules of the Financial Services Authority.
- For United States Residents:** Canaccord Adams Inc., a US registered broker-dealer, accepts responsibility for this Investment Research and its dissemination in the United States. This Investment Research is intended for distribution in the United States only to certain US institutional investors. US clients wishing to effect transactions in any Designated Investment discussed should do so through a qualified salesperson of Canaccord Adams Inc.
- For European Residents:** If this Investment Research is intended for disclosure in any jurisdiction other than the United Kingdom, the US or Canada, then the relevant rules and regulatory requirements of that jurisdiction will apply.

SHARE PRICE PERFORMANCE:**COMPANY SUMMARY:**

Fortis Inc. is a diversified, international electric utility holding company with assets over \$12 billion. Fortis has holdings in regulated and non-regulated natural gas and electric distribution utilities in Alberta, BC, Newfoundland, PEI, Ontario, New York State, Belize, Turks and Caicos Islands, and Cayman Islands. Fortis also owns and operates hotels and real estate in Canada.

All amounts in C\$ unless otherwise noted.

Infrastructure -- Utilities**SOLID START TO THE YEAR****Event**

Fortis first quarter results hit our estimate but were \$0.02 above consensus.

Impact

Neutral.

Valuation

We are maintaining our HOLD rating and C\$29.00 target price. Our target price is derived from a combination of valuation metrics that include earnings and dividend yields relative to long-term interest rates, dividend discount models, and earnings and cash flow multiples relative to both historical valuation and its utility and pipeline peers.

Outlook

We are making no change to our 2010 and 2011 EPS estimates of \$1.60 and \$1.75 respectively. Our estimates reflect the impact of a slow economy and current low electricity prices at the non-regulated generation operations. While we expect the eventual resolution to the poor regulatory treatment in Belize, our estimates do not include a near term resolution. Higher allowed returns on the Canadian regulated assets coupled with about \$5 billion of planned capital spending over the next five years provide a stable and low risk source of income and growth. The company has a strong track record of successful electric and natural gas utility acquisitions and continues to be on the lookout for further strategic acquisition opportunities in the United States. Fortis's management would be comfortable acquiring assets with an enterprise value up to \$4 billion and would consider financial partners (i.e. private equity) for purchases with a higher price tag.

Canaccord Adams is the global capital markets group of Canaccord Financial Inc. (CF : TSX | CF. : AIM)

The recommendations and opinions expressed in this Investment Research accurately reflect the Investment Analyst's personal, independent and objective views about any and all the Designated Investments and Relevant Issuers discussed herein. For important information, please see the Important Disclosures section in the appendix of this document or visit <http://www.canaccordadams.com/research/Disclosure.htm>.

First Quarter Summary

Fortis reported first-quarter recurring income of \$0.58 per share versus \$0.53 last year, in line with our \$0.58 estimate and a couple of cents above consensus. The earnings improvement was driven mainly by a \$15 million (\$0.09 per share) earnings improvement at Terasen Gas. This was partly offset by the expiration of an agreement related to the Rankine hydro facility in Ontario in Q2/09 (\$3 million reduction Q1/Q1) and increased interest expense from higher interest rates on long-term debt. In addition, low rainfall in Belize reduced earnings from the non-regulated Belize operations by \$1-\$2 million. Both Newfoundland Power and FortisAlberta delivered earnings ~\$1 million higher than last year. For more details on the first quarter results, please refer to Figure 1.

Noteworthy Items

- Allowed returns and equity components rising for regulated operations
 - FortisAlberta
 - 2010 ROE of 9.0% versus 8.51% in 2009
 - 2010 equity component of 41% versus 37% in 2009
 - Terasen Gas
 - 2010 ROE of 9.5% versus 8.47% in 2009
 - 2010 equity component of 40% versus 35% in 2009
 - FortisBC
 - 2010 ROE of 9.9% versus 8.87% in 2009
 - Newfoundland Power
 - 2010 ROE of 9.0% versus 8.95% in 2009
 - 19 MW Vaca Belize hydroelectric facility commissioned in March 2010
 - US\$53 million capital investment
 - 4 GWh produced during Q1
 - Could add \$6-7 million of earnings annually (assuming normal weather)
 - Algoma Power contributed \$0.4 million to earnings
 - Purchased October 2009
 - 2010 capital budget still at \$1.1 billion
 - \$188 million spent in Q1
 - 5-year capital budget of ~\$5 billion
 - 70% - for Regulated Electric Utilities (mainly FortisAlberta and FortisBC)
 - 27% - Regulated Gas Utilities (Terasen)
 - 3% - non-regulated operations
-

Investment risks

Some of the specific risk factors that pertain to the projected 6- to 12-month stock price target for Fortis are as follows: (1) price movement in electricity rates and commodities used for electricity generation could impact profitability; (2) international operations have currency rate exposure and liquidity risks associated with those currencies; (3) credit risk

of contract counterparties could improve or deteriorate; (4) debt refinancing at different interest rates could impact the income of the company; (5) equipment failure or extreme weather conditions could adversely affect operating facilities; (6) change in public policy on environmental health and safety risk could impose unexpected costs on Fortis; (7) change in regulatory or political climate could impact profitability and future growth and development of Fortis; (8) the inability to maintain, or to renew, the collective bargaining agreements with unionized workers on acceptable terms could result in increased labour costs or service interruptions arising from labour disputes; (9) economic conditions which may impact demand for products and services, peer group valuation, access to capital and share trading liquidity; (10) Fortis holds investments in commercial real estate and hotel properties which are subject to operating risks associated with the industry.

However, such authoring analysts have not received, and will not receive, compensation that is directly based upon or linked to one or more specific Corporate Finance/Investment Banking activities, or to recommendations contained in the investment research.

Canaccord Adams and its affiliated companies may have a Corporate Finance/Investment Banking or other relationship with the company that is the subject of this investment research and may trade in any of the designated investments mentioned herein either for their own account or the accounts of their customers, in good faith or in the normal course of market making. Accordingly, Canaccord Adams or their affiliated companies, principals or employees (other than the authoring analyst(s) who prepared this investment research) may at any time have a long or short position in any such designated investments, Related designated investments or in options, futures or other derivative instruments based thereon.

Some regulators require that a firm must establish, implement and make available a policy for managing conflicts of interest arising as a result of publication or distribution of investment research. This investment research has been prepared in accordance with Canaccord Adams' policy on managing conflicts of interest, and information barriers or firewalls have been used where appropriate. Canaccord Adams' policy is available upon request.

The information contained in this investment research has been compiled by Canaccord Adams from sources believed to be reliable, but (with the exception of the information about Canaccord Adams) no representation or warranty, express or implied, is made by Canaccord Adams, its affiliated companies or any other person as to its fairness, accuracy, completeness or correctness. Canaccord Adams has not independently verified the facts, assumptions, and estimates contained herein. All estimates, opinions and other information contained in this investment research constitute Canaccord Adams' judgement as of the date of this investment research, are subject to change without notice and are provided in good faith but without legal responsibility or liability.

Canaccord Adams salespeople, traders, and other professionals may provide oral or written market commentary or trading strategies to our clients and our proprietary trading desk that reflect opinions that are contrary to the opinions expressed in this investment research. Canaccord Adams' affiliates, proprietary trading desk, and investing businesses may make investment decisions that are inconsistent with the recommendations or views expressed in this investment research.

This investment research is provided for information purposes only and does not constitute an offer or solicitation to buy or sell any designated investments discussed herein in any jurisdiction where such offer or solicitation would be prohibited. As a result, the designated investments discussed in this investment research may not be eligible for sale in some jurisdictions. This investment research is not, and under no circumstances should be construed as, a solicitation to act as a securities broker or dealer in any jurisdiction by any person or company that is not legally permitted to carry on the business of a securities broker or dealer in that jurisdiction. This material is prepared for general circulation to clients and does not have regard to the investment objectives, financial situation or particular needs of any particular person. Investors should obtain advice based on their own individual circumstances before making an investment decision. To the fullest extent permitted by law, none of Canaccord Adams, its affiliated companies or any other person accepts any liability whatsoever for any direct or consequential loss arising from or relating to any use of the information contained in this investment research.

For Canadian Residents: This Investment Research has been approved by Canaccord Adams, a division of Canaccord Financial Ltd., which accepts sole responsibility for this Investment Research and its dissemination in Canada. Canadian clients wishing to effect transactions in any Designated Investment discussed should do so through a qualified salesperson of Canaccord Adams, a division of Canaccord Financial Ltd. in their particular jurisdiction.

For United Kingdom Residents: This investment research is distributed in the United Kingdom, as third party research by Canaccord Adams Limited, which is authorized and regulated by the Financial Services Authority. This research is for distribution only to persons who are Eligible Counterparties or Professional Clients only and is exempt from the general restrictions in section 21 of the Financial Services and Markets Act 2000 on the communication of invitations or inducements to engage in investment activity on the grounds that it is being distributed in the United Kingdom only to persons of a kind described in Article 19(5) (Investment Professionals) and 49(2) (High Net Worth companies, unincorporated associations etc) of the Financial Services and Markets Act 2000 (Financial Promotion) Order 2005 (as amended). It is not intended to be distributed or passed on, directly or indirectly, to any other class of persons. This material is not for distribution in the United Kingdom to retail clients, as defined under the rules of the Financial Services Authority.

For United States Residents: Canaccord Adams Inc., a US registered broker-dealer, accepts responsibility for this Investment Research and its dissemination in the United States. This Investment Research is intended for distribution in the United States only to certain US institutional investors. US clients wishing to effect transactions in any Designated Investment discussed should do so through a qualified salesperson of Canaccord Adams Inc. Analyst(s) preparing this report that are not employed by Canaccord Adams Inc are resident outside the United States and are not associated persons or employees of any US regulated broker-dealer. Such analyst(s) may not be subject to Rule 2711 restrictions on communications with a subject company, public appearances and trading securities held by a research analyst account.

For European Residents: If this Investment Research is intended for disclosure in any jurisdiction other than the United Kingdom, the US or Canada, then the relevant rules and regulatory requirements of that jurisdiction will apply.

SHARE PRICE PERFORMANCE:**COMPANY SUMMARY:**

Fortis Inc. is a diversified, international electric utility holding company with assets over \$12 billion. Fortis has holdings in regulated and non-regulated natural gas and electric distribution utilities in Alberta, BC, Newfoundland, PEI, Ontario, New York State, Belize, Turks and Caicos Islands, and Cayman Islands. Fortis also owns and operates hotels and real estate in Canada.

All amounts in C\$ unless otherwise noted.

Infrastructure -- Utilities**STABLE AND STEADY: NO SURPRISES IN Q2 RESULTS****Event**

Fortis reported second-quarter earnings spot on ours and consensus estimates.

Impact

Neutral.

Points of interest

- No change to C\$29.00 target, HOLD rating, and EPS estimates
- Q2 met ours and consensus estimates
 - Includes unsuccessful acquisition bid costs of \$0.014 PS in Q2 and \$0.024 in H1/10
- \$5 billion of planned capex in 2010-2014, mainly regulated
- New project potential – over \$500 million if Terasen pipeline expansion, and interior gas peaker power plant and its associated LNG storage facilities go ahead

Valuation

Our target price is derived from a combination of valuation metrics that include earnings and dividend yields relative to long-term interest rates, dividend discount models, and earnings and cash flow multiples relative to both historical valuation and its utility and pipeline peers.

Outlook

We are maintaining our 2010 and 2011 EPS estimates of \$1.60 and \$1.75, respectively. Our estimates reflect both the impact of a gradual

economic recovery and the low electricity price environment currently existing in the markets where Fortis owns non-regulated generation operations. Growth in 2011 will come about from continued capital investment in the regulated operations; \$1.1 billion of capex is planned for 2010 and ~\$5 billion is planned for the 2010-2014 period. We believe there is potential upside to the five-year capital budget with the possibility of a major pipeline expansion on the Southern Crossing pipeline (at Terasen) to provide transportation service to allow gas from northeast British Columbia to access the Kingsgate market hub. This service is currently operating jointly with Spectra Energy on a trial basis. In addition, there may be the need for FortisBC to build a gas peaker power plant to meet peak demand for its operations in the interior of the province and to develop an associated LNG storage facility. If these two initiatives were to be developed, the cost would likely be well in excess of \$500 million, with the in-service dates in 2014 at the earliest.

Management continues to seek regulated electric and natural gas utility acquisition opportunities, focusing on strategic assets in the United States, Canada, and the Caribbean. We believe Fortis could manage a sizeable acquisition with an enterprise value up to \$4 billion and would consider financial partners for purchases in excess of \$4 billion.

Second-quarter earnings summary

Fortis reported second-quarter recurring earnings of \$0.32 per share versus \$0.31 last year, in line with the consensus estimate. The modest year-over-year improvement stemmed from higher earnings at Terasen gas due to a 103 bps increase in allowed ROE combined with an increase in allowed equity thickness to 40% from 35%. This was partly offset by higher net corporate interest expenses and business development expenses for an acquisition that it did not win (~\$0.015 per share after tax). For the first half of the year, Fortis recorded \$0.90 of recurring income versus \$0.84 last year. For more details on the second-quarter results, please see Figure 1.

Noteworthy items

- Allowed ROE and equity components increasing
 - FortisAlberta
 - ROE 9.0% versus 8.51% in 2009; Equity 41% versus 37%
 - Terasen Gas
 - ROE 9.5% versus 8.47% in 2009; Equity 40% versus 35%
 - Newfoundland Power
 - ROE of 9.0% versus 8.95% in 2009
 - 19 MW Vaca Belize hydroelectric facility commissioned in March 2010
 - US\$53 million investment; ~\$6-7 million of normalized earnings/year
 - 1H 2010 lower than average hydrology; reservoirs now full after great July
 - 2010 capital budget still \$1.1 billion
 - \$432 million spent in H1/10; \$244 spend in Q2
 - 5-year capital budget ~\$5 billion
 - 71% Electric (mainly FortisAlberta, FortisBC); 27% Terasen; 2% non-regulated
 - \$1.36 billion of unused credit facilities
 - FX swing ~\$0.01 per share drag on earnings

Canaccord Ratings System:

BUY: The stock is expected to generate risk-adjusted returns of over 10% during the next 12 months.

HOLD: The stock is expected to generate risk-adjusted returns of 0-10% during the next 12 months.

SELL: The stock is expected to generate negative risk-adjusted returns during the next 12 months.

NOT RATED: Canaccord Genuity does not provide research coverage of the relevant issuer.

"Risk-adjusted return" refers to the expected return in relation to the amount of risk associated with the designated investment or the relevant issuer.

Risk Qualifier:

SPECULATIVE: Stocks bear significantly higher risk that typically cannot be valued by normal fundamental criteria. Investments in the stock may result in material loss.

Canaccord Research Disclosures as of 4 August 2010

Company	Disclosure
Fortis Inc.	1A, 2, 7
1	The relevant issuer currently is, or in the past 12 months was, a client of Canaccord Genuity or its affiliated companies. During this period, Canaccord Genuity or its affiliated companies provided the following services to the relevant issuer: A. investment banking services. B. non-investment banking securities-related services. C. non-securities related services.
2	In the past 12 months, Canaccord Genuity or its affiliated companies have received compensation for Corporate Finance/Investment Banking services from the relevant issuer.
3	In the past 12 months, Canaccord Genuity or any of its affiliated companies have been lead manager, co-lead manager or co-manager of a public offering of securities of the relevant issuer or any publicly disclosed offer of securities of the relevant issuer or in any related derivatives.
4	Canaccord Genuity acts as corporate broker for the relevant issuer and/or Canaccord Genuity or any of its affiliated companies may have an agreement with the relevant issuer relating to the provision of Corporate Finance/Investment Banking services.
5	Canaccord Genuity or any of its affiliated companies is a market maker or liquidity provider in the securities of the relevant issuer or in any related derivatives.
6	In the past 12 months, Canaccord Genuity, its partners, affiliated companies, officers or directors, or any authoring analyst involved in the preparation of this investment research has provided services to the relevant issuer for remuneration, other than normal course investment advisory or trade execution services.
7	Canaccord Genuity intends to seek or expects to receive compensation for Corporate Finance/Investment Banking services from the relevant issuer in the next six months.
8	The authoring analyst, a member of the authoring analyst's household, or any individual directly involved in the preparation of this investment research, has a long position in the shares or derivatives, or has any other financial interest in the relevant issuer, the value of which increases as the value of the underlying equity increases.
9	The authoring analyst, a member of the authoring analyst's household, or any individual directly involved in the preparation of this investment research, has a short position in the shares or derivatives, or has any other financial interest in the relevant issuer, the value of which increases as the value of the underlying equity decreases.
10	Those persons identified as the author(s) of this investment research, or any individual involved in the preparation of this investment research, have purchased/received shares in the relevant issuer prior to a public offering of those shares, and such person's name and details are disclosed above.
11	A partner, director, officer, employee or agent of Canaccord Genuity and its affiliated companies, or a member of his/her household, is an officer, or director, or serves as an advisor or board member of the relevant issuer and/or one of its subsidiaries, and such person's name is disclosed above.
12	As of the month end immediately preceding the date of publication of this investment research, or the prior month end if publication is within 10 days following a month end, Canaccord Genuity or its affiliate companies, in the aggregate, beneficially owned 1% or more of any class of the total issued share capital or other common equity securities of the relevant issuer or held any other financial interests in the relevant issuer which are significant in relation to the investment research (as disclosed above).
13	As of the month end immediately preceding the date of publication of this investment research, or the prior month end if publication is within 10 days following a month end, the relevant issuer owned 1% or more of any class of the total issued share capital in Canaccord Genuity or any of its affiliated companies.
14	Other specific disclosures as described above.

Canaccord Genuity is the business name used by certain subsidiaries of Canaccord Financial Inc., including Canaccord Genuity Inc., Canaccord Genuity Limited, and Canaccord Genuity Corp.

The authoring analysts who are responsible for the preparation of this investment research are employed by Canaccord Genuity Corp. a Canadian broker-dealer with principal offices located in Vancouver, Calgary, Toronto, Montreal, or Canaccord Genuity Inc., a US broker-dealer with principal offices located in Boston, New York, San Francisco and Houston or Canaccord Genuity Limited., a UK broker-dealer with principal offices located in London and Edinburgh (UK).

In the event that this is compendium investment research (covering six or more relevant issuers), Canaccord Genuity and its affiliated companies may choose to provide specific disclosures of the subject companies by reference, as well as its policies and procedures regarding the dissemination of investment research. To access this material or for more information, please send a request to Canaccord Genuity Research, Attn:

Disclosures, P.O. Box 10337 Pacific Centre, 2200-609 Granville Street, Vancouver, BC, Canada V7Y 1H2 or disclosures@canaccordgenuity.com.

The authoring analysts who are responsible for the preparation of this investment research have received (or will receive) compensation based upon (among other factors) the Corporate Finance/Investment Banking revenues and general profits of Canaccord Genuity. However, such authoring analysts have not received, and will not receive, compensation that is directly based upon or linked to one or more specific Corporate Finance/Investment Banking activities, or to recommendations contained in the investment research.

Canaccord Genuity and its affiliated companies may have a Corporate Finance/Investment Banking or other relationship with the company that is the subject of this investment research and may trade in any of the designated investments mentioned herein either for their own account or the accounts of their customers, in good faith or in the normal course of market making. Accordingly, Canaccord Genuity or their affiliated companies, principals or employees (other than the authoring analyst(s) who prepared this investment research) may at any time have a long or short position in any such designated investments, related designated investments or in options, futures or other derivative instruments based thereon.

Some regulators require that a firm must establish, implement and make available a policy for managing conflicts of interest arising as a result of publication or distribution of investment research. This investment research has been prepared in accordance with Canaccord Genuity's policy on managing conflicts of interest, and information barriers or firewalls have been used where appropriate. SHARE PRICE PERFORMANCE:**COMPANY DESCRIPTION:**

Fortis Inc. is a diversified, international electric utility holding company with assets over \$12 billion. Fortis has holdings in regulated and non-regulated natural gas and electric distribution utilities in Alberta, BC, Newfoundland, PEI, Ontario, New York State, Belize, Turks and Caicos Islands, and Cayman Islands. Fortis also owns and operates hotels and real estate in Canada.

All amounts in C\$ unless otherwise noted.

Infrastructure -- Utilities**INNOVATIVE STRUCTURE GETS PROJECT OVER THE FINISH LINE****Investment recommendation**

We continue to rate the shares of Fortis a HOLD with a \$29.00 target price. Fortis announced a new 51% interest in the \$900 million Waneta hydroelectric expansion in British Columbia proposed by two provincial crown corporations. While we expect the investment to deliver incremental earnings and contribute to the company's longer-term growth, the announcement is unlikely to influence the shares in the near term given that it is still almost five years away. We continue to believe the shares are appropriately valued in the current market environment.

Investment highlights

- \$29 target price and HOLD rating maintained
- 51% interest in \$900 million project
 - 49%-owned by two provincial crown corporations
 - five years from delivering ~\$0.05 EPS annually
- Still firmly focused on growth in areas of expertise
 - \$5.5 billion of capex planned from 2010-14
 - Mostly regulated assets or power

Valuation

Our target price is derived from a combination of valuation metrics that include earnings and dividend yields relative to long-term interest rates, dividend discount models, and earnings and

cash flow multiples relative to both historical valuation and its utility and pipeline peers.

Summary

Fortis announced that it will pursue the development of the 335 MW hydroelectric facility in British Columbia jointly with crown entities Columbia Power Corporation and Columbia Basin Trust (CPC/CBT). Fortis will own 51% of the approximately \$900 million project, which is to have an in-service date of spring 2015. We estimate that once operating, the project could contribute ~\$0.05 to annual EPS, depending on financing. The project is backed by 40-year agreements with both BC Hydro and Fortis BC, and should provide Fortis a steady level of EBITDA and enhance longer-term returns as debt is repaid and interest costs decline. It is important to note that the project could not be owned by Fortis BC due to its relatively large size and volatility of earnings due to vagaries of the weather/precipitation. While this will impact Fortis as well, weather-related earnings impacts will be less significant and average out over time.

The Waneta expansion project

- 335 MW unregulated hydro project south of Trail, BC
- Expected in-service spring 2015
- Fortis (51%), Columbia Power Corporation, and Columbia Basin Trust (49%)
 - Fortis to operate and maintain facility
- \$900 million capital cost
 - Each party provides its own financing for both debt and equity
 - Fortis to use 65% debt (through existing credit facilities) for its portion
- 40-year EPA with BC Hydro under its 2008 Clean Power Call
 - Pays for all available power at firm and non-firm prices
- 40-year capacity purchase agreement with Fortis BC for 234 MW
 - Fee for first right to purchase, plus power price for any power taken
 - Subject to BCUC approval
- Includes a 10 km transmission line

Investment risks

Some of the specific risk factors that pertain to the projected 6- to 12-month stock price target for Fortis are as follows: (1) price movement in electricity rates and commodities used for electricity generation could impact profitability; (2) international operations have currency rate exposure and liquidity risks associated with those currencies; (3) credit risk of contract counterparties could improve or deteriorate; (4) debt refinancing at different interest rates could impact the income of the company; (5) equipment failure or extreme weather conditions could adversely affect operating facilities; (6) change in public policy on environmental health and safety risk could impose unexpected costs on Fortis;

(7) change in regulatory or political climate could impact profitability and future growth and development of Fortis; (8) the inability to maintain, or to renew, the collective bargaining agreements with unionized workers on acceptable terms could result in increased labour costs or service interruptions arising from labour disputes; (9) economic conditions which may impact demand for products and services, peer group valuation, access to capital, and share trading liquidity; and (10) Fortis holds investments in commercial real estate and hotel properties which are subject to operating risks associated with the industry.

The authoring analysts who are responsible for the preparation of this investment research have received (or will receive) compensation based upon (among other factors) the Corporate Finance/Investment Banking revenues and general profits of Canaccord Genuity. However, such authoring analysts have not received, and will not receive, compensation that is directly based upon or linked to one or more specific Corporate Finance/Investment Banking activities, or to recommendations contained in the investment research.

Canaccord Genuity and its affiliated companies may have a Corporate Finance/Investment Banking or other relationship with the company that is the subject of this investment research and may trade in any of the designated investments mentioned herein either for their own account or the accounts of their customers, in good faith or in the normal course of market making. Accordingly, Canaccord Genuity or their affiliated companies, principals or employees (other than the authoring analyst(s) who prepared this investment research) may at any time have a long or short position in any such designated investments, related designated investments or in options, futures or other derivative instruments based thereon.

Some regulators require that a firm must establish, implement and make available a policy for managing conflicts of interest arising as a result of publication or distribution of investment research. This investment research has been prepared in accordance with Canaccord Genuity's policy on managing conflicts of interest, and information barriers or firewalls have been used where appropriate. Canaccord Genuity's policy is available upon request.

The information contained in this investment research has been compiled by Canaccord Genuity from sources believed to be reliable, but (with the exception of the information about Canaccord Genuity) no representation or warranty, express or implied, is made by Canaccord Genuity, its affiliated companies or any other person as to its fairness, accuracy, completeness or correctness. Canaccord Genuity has not independently verified the facts, assumptions, and estimates contained herein. All estimates, opinions and other information contained in this investment research constitute Canaccord Genuity's judgement as of the date of this investment research, are subject to change without notice and are provided in good faith but without legal responsibility or liability.

Canaccord Genuity's salespeople, traders, and other professionals may provide oral or written market commentary or trading strategies to our clients and our proprietary trading desk that reflect opinions that are contrary to the opinions expressed in this investment research. Canaccord Genuity's affiliates, principal trading desk, and investing businesses may make investment decisions that are inconsistent with the recommendations or views expressed in this investment research.

This investment research is provided for information purposes only and does not constitute an offer or solicitation to buy or sell any designated investments discussed herein in any jurisdiction where such offer or solicitation would be prohibited. As a result, the designated investments discussed in this investment research may not be eligible for sale in some jurisdictions. This investment research is not, and under no circumstances should be construed as, a solicitation to act as a securities broker or dealer in any jurisdiction by any person or company that is not legally permitted to carry on the business of a securities broker or dealer in that jurisdiction. This material is prepared for general circulation to clients and does not have regard to the investment objectives, financial situation or particular needs of any particular person. Investors should obtain advice based on their own individual circumstances before making an investment decision. To the fullest extent permitted by law, none of Canaccord Genuity, its affiliated companies or any other person accepts any liability whatsoever for any direct or consequential loss arising from or relating to any use of the information contained in this investment research.

For Canadian Residents: This Investment Research has been approved by Canaccord Genuity Corp., which accepts sole responsibility for this Investment Research and its dissemination in Canada. Canadian clients wishing to effect transactions in any Designated Investment discussed should do so through a qualified salesperson of Canaccord Genuity Corp. in their particular jurisdiction.

For United Kingdom Residents: This investment research is distributed in the United Kingdom, as third party research by Canaccord Genuity Limited, which is authorized and regulated by the Financial Services Authority. This research is for distribution only to persons who are Eligible Counterparties or Professional Clients only and is exempt from the general restrictions in section 21 of the Financial Services and Markets Act 2000 on the communication of invitations or inducements to engage in investment activity on the grounds that it is being distributed in the United Kingdom only to persons of a kind described in Article 19(5) (Investment Professionals) and 49(2) (High Net Worth companies, unincorporated associations etc) of the Financial Services and Markets Act 2000 (Financial Promotion) Order 2005 (as amended). It is not intended to be distributed or passed on, directly or indirectly, to any other class of persons. This material is not for distribution in the United Kingdom to retail clients, as defined under the rules of the Financial Services Authority.

For United States Residents: Canaccord Genuity Inc., a US registered broker-dealer, accepts responsibility for this Investment Research and its dissemination in the United States. This Investment Research is intended for distribution in the United States only to certain US institutional investors. US clients wishing to effect transactions in any Designated

Investment discussed should do so through a qualified salesperson of Canaccord Genuity Inc. Analyst(s) preparing this report that are not employed by Canaccord Genuity Inc are resident outside the United States and are not associated persons or employees of any US regulated broker-dealer. Such analyst(s) may not be subject to Rule 2711 restrictions on communications with a subject company, public appearances and trading securities held by a research analyst account.

For European Residents: If this Investment Research is intended for disclosure in any jurisdiction other than the United Kingdom, the US or Canada, then the relevant rules and regulatory requirements of that jurisdiction will apply.

SHARE PRICE PERFORMANCE:**COMPANY DESCRIPTION:**

Fortis Inc. is a diversified, international electric utility holding company with assets over \$12 billion. Fortis has holdings in regulated and non-regulated natural gas and electric distribution utilities in Alberta, BC, Newfoundland, PEI, Ontario, New York State, Belize, Turks and Caicos Islands, and Cayman Islands. Fortis also owns and operates hotels and real estate in Canada.

All amounts in C\$ unless otherwise noted.

Infrastructure -- Utilities**SOLID Q3, AS EXPECTED; HOLD RATING AND C\$32.00 TARGET UNCHANGED****Investment recommendation**

Fortis reported third-quarter results in line with expectations. The company is a well-managed utility with reasonable growth stemming from Western Canada. While it has more modest operations in the Caribbean, they have been viewed by investors negatively due to being harder hit by the economic slowdown and poor regulatory treatment in Belize. Fortunately, those issues may be coming to an end, though we remain cautious. Regardless, the stock is trading at the top end of its peer group valuation range and we rate it a HOLD.

Investment highlights

- Q3 recurring EPS of \$0.24, in line with our \$0.23 estimate and \$0.24 consensus
 - \$0.25 ex Hurricane Igor costs, \$0.26 after all non-recurring items
- Regulated earnings on track
- ~\$1 billion/year of regulated capex driving growth
- Belize could swing – Vaca dam to add ~\$0.04/year; good regulation could add another ~\$0.04
- DBRS upgraded debt rating to A(low) from BBB(high)

Valuation

Our target price is derived from a combination of valuation metrics that include earnings and dividend yields relative to long-term interest rates, dividend discount models, and earnings and cash flow multiples relative to both historical valuation and its utility and pipeline peers.

Outlook

We are maintaining our 2010 and 2011 EPS estimates of \$1.60 and \$1.75, respectively. While we note the 2010 consensus estimate is \$1.65, we prefer to remain conservative. We continue to assume a gradual economic recovery with growth largely stemming from continued capital investment in regulated operations. The company forecasts a record \$1.1 billion of capex for 2010 and ~\$5 billion for 2011-2015.

Management would like to acquire regulated electric and natural gas utilities, and is focusing on the United States, Canada, and the Caribbean. While Fortis could manage a sizeable acquisition of up to \$4 billion (and would consider financial partners for anything larger), the timing of such a purchase depends on availability and price. Fortunately, Fortis remains disciplined.

Third-Quarter Earnings

Third-quarter recurring earnings were \$0.24 versus \$0.21, in line with our \$0.23 estimate and the \$0.24 consensus. The results included \$0.01 of costs for Hurricane Igor. Final reported earnings were \$0.26 after including \$4 million reversal of costs incurred in 2009 from the Whistler conversion from propane to gas (the regulator allowed cost overruns to be recovered). Nine month recurring earnings were \$1.13 versus \$1.05, with final reported earnings of \$1.16 versus \$1.06. A full breakout of third quarter and nine month earnings can be found in Figures 1 and 2.

Noteworthy Items

- Most regulated utilities are on track to achieve allowed rates of return
 - Belize is the exception
 - Belize court case wrapped up
 - Final submission early December, decision in Q1/11
 - If successful, could boost annual EPS by \$0.04-\$0.05 plus \$0.25 retroactively
 - Delaying IFRS by a year; if regulatory accounting is NOT recognized, the company is likely to move to US GAAP in 2012
-

5 November 2010

Figure 1: Fortis Inc. third-quarter earnings summary

Millions of dollars (except per share data)	Third Quarter Earnings			
	2009	2010	Change	
				Favourable (Unfavourable)
Regulated Utilities - Canadian				
Terasen Gas	(\$3)	(\$9)	(200.0%)	Removed \$4 M non-recurring operating expense reversal related to 2009.
Newfoundland Power	\$7	\$8	14.3%	Higher ROE and equity component as part of 2010-2011 regulatory rate decision.
FortisAlberta	\$16	\$19	18.8%	
FortisBC	\$8	\$11	37.5%	Higher allowed ROE, larger rate base and increased performance incentives.
Other Canadian Regulated Utilities	\$5	\$5	0.0%	
Total Canadian Earnings	\$33	\$34	3.0%	
Regulated Utilities - Caribbean	\$7	\$8	14.3%	Turks and Caicos and Belize offset by lower demand at Grand Cayman. \$1M tax expense deferred to match collection in future period.
Non-Regulated				
Fortis Generation	\$4	\$9	125.0%	
Fortis Properties	\$9	\$9	0.0%	Higher generation in Belize due to higher rainfall and commissioning of Vaca; offset partly by \$1 M of FX.
Total Non-Regulated Earnings	\$13	\$18	38.5%	
Corporate and Consolidated Adjustments	(\$18)	(\$19)	5.6%	
Recurring Earnings	\$35	\$41	17.1%	
Non-recurring items	\$1	\$4		\$4 M reversal of previously expensed costs as part of Terasen operations in 2009.
Reported Net Earnings	\$36.0	\$45.0	25.0%	
EPS:				
Recurring	\$0.21	\$0.24	15.0%	In-line with our 23¢ estimate and 24¢ consensus.
Non-recurring items	\$0.01	\$0.02		
Reported	\$0.21	\$0.26		Higher amortization costs driven by Terasen Gas and decrease in corporate taxes paid at Terasen Gas and Newfoundland Power.

Disclosures, P.O. Box 10337 Pacific Centre, 2200-609 Granville Street, Vancouver, BC, Canada V7Y 1H2 or disclosures@canaccordgenuity.com.

The authoring analysts who are responsible for the preparation of this investment research have received (or will receive) compensation based upon (among other factors) the Corporate Finance/Investment Banking revenues and general profits of Canaccord Genuity. However, such authoring analysts have not received, and will not receive, compensation that is directly based upon or linked to one or more specific Corporate Finance/Investment Banking activities, or to recommendations contained in the investment research.

Canaccord Genuity and its affiliated companies may have a Corporate Finance/Investment Banking or other relationship with the company that is the subject of this investment research and may trade in any of the designated investments mentioned herein either for their own account or the accounts of their customers, in good faith or in the normal course of market making. Accordingly, Canaccord Genuity or their affiliated companies, principals or employees (other than the authoring analyst(s) who prepared this investment research) may at any time have a long or short position in any such designated investments, related designated investments or in options, futures or other derivative instruments based thereon.

Some regulators require that a firm must establish, implement and make available a policy for managing conflicts of interest arising as a result of publication or distribution of investment research. This investment research has been prepared in accordance with Canaccord Genuity's policy on managing conflicts of interest, and information barriers or firewalls have been used where appropriate. Canaccord Genuity's policy is available upon request.

The information contained in this investment research has been compiled by Canaccord Genuity from sources believed to be reliable, but (with the exception of the information about Canaccord Genuity) no representation or warranty, express or implied, is made by Canaccord Genuity, its affiliated companies or any other person as to its fairness, accuracy, completeness or correctness. Canaccord Genuity has not independently verified the facts, assumptions, and estimates contained herein. All estimates, opinions and other information contained in this investment research constitute Canaccord Genuity's judgement as of the date of this investment research, are subject to change without notice and are provided in good faith but without legal responsibility or liability.

Canaccord Genuity's salespeople, traders, and other professionals may provide oral or written market commentary or trading strategies to our clients and our proprietary trading desk that reflect opinions that are contrary to the opinions expressed in this investment research. Canaccord Genuity's affiliates, principal trading desk, and investing businesses may make investment decisions that are inconsistent with the recommendations or views expressed in this investment research.

This investment research is provided for information purposes only and does not constitute an offer or solicitation to buy or sell any designated investments discussed herein in any jurisdiction where such offer or solicitation would be prohibited. As a result, the designated investments discussed in this investment research may not be eligible for sale in some jurisdictions. This investment research is not, and under no circumstances should be construed as, a solicitation to act as a securities broker or dealer in any jurisdiction by any person or company that is not legally permitted to carry on the business of a securities broker or dealer in that jurisdiction. This material is prepared for general circulation to clients and does not have regard to the investment objectives, financial situation or particular needs of any particular person. Investors should obtain advice based on their own individual circumstances before making an investment decision. To the fullest extent permitted by law, none of Canaccord Genuity, its affiliated companies or any other person accepts any liability whatsoever for any direct or consequential loss arising from or relating to any use of the information contained in this investment research.

For Canadian Residents: This Investment Research has been approved by Canaccord Genuity Corp., which accepts sole responsibility for this Investment Research and its dissemination in Canada. Canadian clients wishing to effect transactions in any Designated Investment discussed should do so through a qualified salesperson of Canaccord Genuity Corp. in their particular jurisdiction.

For United Kingdom Residents: This investment research is distributed in the United Kingdom, as third party research by Canaccord Genuity Limited, which is authorized and regulated by the Financial Services Authority. This research is for distribution only to persons who are Eligible Counterparties or Professional Clients only and is exempt from the general restrictions in section 21 of the Financial Services and Markets Act 2000 on the communication of invitations or inducements to engage in investment activity on the grounds that it is being distributed in the United Kingdom only to persons of a kind described in Article 19(5) (Investment Professionals) and 49(2) (High Net Worth companies, unincorporated associations etc) of the Financial Services and Markets Act 2000 (Financial Promotion) Order 2005 (as amended). It is not intended to be distributed or passed on, directly or indirectly, to any other class of persons. This material is not for distribution in the United Kingdom to retail clients, as defined under the rules of the Financial Services Authority.

For United States Residents: Canaccord Genuity Inc., a US registered broker-dealer, accepts responsibility for this Investment Research and its dissemination in the United States. This Investment Research is intended for distribution in the United States only to certain US institutional investors. US clients wishing to effect transactions in any Designated

Investment discussed should do so through a qualified salesperson of Canaccord Genuity Inc. Analyst(s) preparing this report that are not employed by Canaccord Genuity Inc are resident outside the United States and are not associated persons or employees of any US regulated broker-dealer. Such analyst(s) may not be subject to Rule 2711 restrictions on communications with a subject company, public appearances and trading securities held by a research analyst account.

For European Residents: If this Investment Research is intended for disclosure in any jurisdiction other than the United Kingdom, the US or Canada, then the relevant rules and regulatory requirements of that jurisdiction will apply.

SHARE PRICE PERFORMANCE:**COMPANY DESCRIPTION:**

Fortis Inc. is a diversified, international electric utility holding company with assets over \$12.5 billion. Regulated holdings include electric distribution utilities in Alberta, BC, Ontario, Newfoundland, PEI and three Caribbean countries and a natural gas utility in BC. Fortis owns non-regulated generation assets across Canada and in Belize and New York State. It also owns and operates hotels and commercial real estate in Canada.

All amounts in C\$ unless otherwise noted.

Infrastructure -- Utilities**NO SURPRISES IN Q4; STEADY GROWTH AHEAD****Investment recommendation**

Fortis reported fourth-quarter recurring earnings generally in line with expectations. The company continues to deliver stable earnings growth stemming mainly from its regulated utility operations in Canada. With \$5.5 billion of planned capital expenditures over the next five years (83% in regulated operations) we expect the company to deliver measured earnings growth. We maintain our HOLD rating and C\$32.00 target price.

Investment highlights

- Maintain HOLD rating and C\$32.00 target
- Q4 recurring earnings \$0.49, below \$0.51 consensus
- 2010 recurring earnings \$1.61, in line with our \$1.60 estimate
- Steady growth - \$5.5 billion capex program over next five years
- Continues to actively seek utility acquisitions

Valuation

Our target price is derived from a combination of valuation metrics that include earnings and dividend yields relative to long-term interest rates, dividend discount models, and earnings and cash flow multiples relative to both historical valuation and its utility and pipeline peers.

Outlook

We are maintaining our 2011 and 2012 EPS estimates of \$1.75 and \$1.80, respectively. The company is well positioned to achieve stable earnings growth through its planned \$5.5 billion capital expenditure program. Approximately ~\$4.6 billion of spending is targeted within Fortis' regulated operations, driven mainly by investments in FortisAlberta and FortisBC and about \$1.1 billion at Terasen Gas.

Canaccord Genuity is the global capital markets group of Canaccord Financial Inc. (CF : TSX | CF. : AIM)

The recommendations and opinions expressed in this Investment Research accurately reflect the Investment Analyst's personal, independent and objective views about any and all the Designated Investments and Relevant Issuers discussed herein. For important information, please see the Important Disclosures section in the appendix of this document or visit Canaccord Genuity's [Online Disclosure Database](#).

In addition, the company has begun construction on the 335 MW Waneta Expansion hydro project where it holds a 51% interest (~\$460 million Fortis portion of the estimated capital cost). The company continues to seek acquisitions and is focused primarily on electric and gas utilities in the United States or Canada. We believe the company has the financial capability to integrate an acquisition of up to \$4 billion in enterprise value but would consider larger acquisitions with the assistance of a financial partner. However, we expect management will remain prudent and wait for the right opportunity.

Fortis' Caribbean operations have been earning a lower-than-expected return on its investments and we expect earnings to gradually improve. A decision on its regulated return in Belize is expected in the first quarter this year and the electricity rate review filing at Fortis Turks and Caicos is advancing.

Earnings summary

Fortis reported fourth-quarter and full-year earnings that were essentially in line with our expectations but slightly below the consensus. Recurring earnings for the company's fourth quarter was \$0.49 per share versus \$0.46 last year. The increase was due mainly to higher earnings from regulated operations in Canada due to the company's significant capital expenditure program coupled with higher allowed ROE. In addition, higher non-regulated electric generation (mainly in Belize from above average hydrology) and lower effective corporate taxes also helped add incremental earnings. This was partly offset by higher operating expenses at Terasen Gas related to quarterly timing issues.

For the full year, Fortis reported recurring earnings per share of \$1.61 versus \$1.53 last year, below the \$1.66 consensus estimate. Higher allowed ROEs and increased rate bases within the Canadian regulated business in addition to above average hydrology in Belize more than offset reduced earnings at the regulated Caribbean operations and the expiration of the Rankine water rights in Ontario.

Noteworthy

- Construction on \$900 M, 335 MW, Waneta Expansion project began Fall/10
 - Fortis owns 51%
 - 40-year PPA with BC Hydro and FortisBC
 - Commissioning targeted for Spring 2015
 - 2011 ROE (vs. 2010):
 - Terasen Gas – 9.5% (unchanged)
 - FortisBC – 9.9% (unchanged)
 - FortisAlberta – 9.0% (interim rate; unchanged)
 - Newfoundland Power 8.38% (down from 9.0%)
 - Credit ratings
 - S&P A-
 - DBRS raised rating to A(low) from BBB(high)
 - Raised \$525 M in long-term debt in 2010 at lower rates
 - Capital program
 - Spent \$1.1 B in 2010, \$25 M lower than forecast in 2009 MD&A
 - \$5.5 B budgeted over next five years
 - 2011: \$1.2 B
 - 2012: \$1.1 B
 - 2013: \$1.2 B
 - 2014: \$1.0 B
 - 2015: \$1.0 B
 - Expects decision on Belize Electricity appeal in Q1/11

Canaccord Ratings System:

BUY: The stock is expected to generate risk-adjusted returns of over 10% during the next 12 months.

HOLD: The stock is expected to generate risk-adjusted returns of 0-10% during the next 12 months.

SELL: The stock is expected to generate negative risk-adjusted returns during the next 12 months.

NOT RATED: Canaccord Genuity does not provide research coverage of the relevant issuer.

"Risk-adjusted return" refers to the expected return in relation to the amount of risk associated with the designated investment or the relevant issuer.

Risk Qualifier:

SPECULATIVE: Stocks bear significantly higher risk that typically cannot be valued by normal fundamental criteria. Investments in the stock may result in material loss.

Canaccord Research Disclosures as of 10 February 2011

Company	Disclosure
Fortis Inc.	7
1	The relevant issuer currently is, or in the past 12 months was, a client of Canaccord Genuity or its affiliated companies. During this period, Canaccord Genuity or its affiliated companies provided the following services to the relevant issuer: A. investment banking services. B. non-investment banking securities-related services. C. non-securities related services.
2	In the past 12 months, Canaccord Genuity or its affiliated companies have received compensation for Corporate Finance/Investment Banking services from the relevant issuer.
3	In the past 12 months, Canaccord Genuity or any of its affiliated companies have been lead manager, co-lead manager or co-manager of a public offering of securities of the relevant issuer or any publicly disclosed offer of securities of the relevant issuer or in any related derivatives.
4	Canaccord Genuity acts as corporate broker for the relevant issuer and/or Canaccord Genuity or any of its affiliated companies may have an agreement with the relevant issuer relating to the provision of Corporate Finance/Investment Banking services.
5	Canaccord Genuity or any of its affiliated companies is a market maker or liquidity provider in the securities of the relevant issuer or in any related derivatives.
6	In the past 12 months, Canaccord Genuity, its partners, affiliated companies, officers or directors, or any authoring analyst involved in the preparation of this investment research has provided services to the relevant issuer for remuneration, other than normal course investment advisory or trade execution services.
7	Canaccord Genuity intends to seek or expects to receive compensation for Corporate Finance/Investment Banking services from the relevant issuer in the next six months.
8	The authoring analyst, a member of the authoring analyst's household, or any individual directly involved in the preparation of this investment research, has a long position in the shares or derivatives, or has any other financial interest in the relevant issuer, the value of which increases as the value of the underlying equity increases.
9	The authoring analyst, a member of the authoring analyst's household, or any individual directly involved in the preparation of this investment research, has a short position in the shares or derivatives, or has any other financial interest in the relevant issuer, the value of which increases as the value of the underlying equity decreases.
10	Those persons identified as the author(s) of this investment research, or any individual involved in the preparation of this investment research, have purchased/received shares in the relevant issuer prior to a public offering of those shares, and such person's name and details are disclosed above.
11	A partner, director, officer, employee or agent of Canaccord Genuity and its affiliated companies, or a member of his/her household, is an officer, or director, or serves as an advisor or board member of the relevant issuer and/or one of its subsidiaries, and such person's name is disclosed above.
12	As of the month end immediately preceding the date of publication of this investment research, or the prior month end if publication is within 10 days following a month end, Canaccord Genuity or its affiliate companies, in the aggregate, beneficially owned 1% or more of any class of the total issued share capital or other common equity securities of the relevant issuer or held any other financial interests in the relevant issuer which are significant in relation to the investment research (as disclosed above).
13	As of the month end immediately preceding the date of publication of this investment research, or the prior month end if publication is within 10 days following a month end, the relevant issuer owned 1% or more of any class of the total issued share capital in Canaccord Genuity or any of its affiliated companies.
14	Other specific disclosures as described above.

Canaccord Genuity is the business name used by certain subsidiaries of Canaccord Financial Inc., including Canaccord Genuity Inc., Canaccord Genuity Limited, and Canaccord Genuity Corp.

The authoring analysts who are responsible for the preparation of this investment research are employed by Canaccord Genuity Corp. a Canadian broker-dealer with principal offices located in Vancouver, Calgary, Toronto, Montreal, or Canaccord Genuity Inc., a US broker-dealer with principal offices located in Boston, New York, San Francisco and Houston or Canaccord Genuity Limited., a UK broker-dealer with principal offices located in London and Edinburgh (UK).

In the event that this is compendium investment research (covering six or more relevant issuers), Canaccord Genuity and its affiliated companies may choose to provide specific disclosures of the subject companies by reference, as well as its policies and procedures regarding the dissemination of investment research. To access this material or for more information, please send a request to Canaccord Genuity Research, Attn:

Disclosures, P.O. Box 10337 Pacific Centre, 2200-609 Granville Street, Vancouver, BC, Canada V7Y 1H2 or disclosures@canaccordgenuity.com.

The authoring analysts who are responsible for the preparation of this investment research have received (or will receive) compensation based upon (among other factors) the Corporate Finance/Investment Banking revenues and general profits of Canaccord Genuity. However, such authoring analysts have not received, and will not receive, compensation that is directly based upon or linked to one or more specific Corporate Finance/Investment Banking activities, or to recommendations contained in the investment research.

Canaccord Genuity and its affiliated companies may have a Corporate Finance/Investment Banking or other relationship with the company that is the subject of this investment research and may trade in any of the designated investments mentioned herein either for their own account or the accounts of their customers, in good faith or in the normal course of market making. Accordingly, Canaccord Genuity or their affiliated companies, principals or employees (other than the authoring analyst(s) who prepared this investment research) may at any time have a long or short position in any such designated investments, related designated investments or in options, futures or other derivative instruments based thereon.

Some regulators require that a firm must establish, implement and make available a policy for managing conflicts of interest arising as a result of publication or distribution of investment research. This investment research has been prepared in accordance with Canaccord Genuity's policy on managing conflicts of interest, and information barriers or firewalls have been used where appropriate. Canaccord Genuity's policy is available upon request.

The information contained in this investment research has been compiled by Canaccord Genuity from sources believed to be reliable, but (with the exception of the information about Canaccord Genuity) no representation or warranty, express or implied, is made by Canaccord Genuity, its affiliated companies or any other person as to its fairness, accuracy, completeness or correctness. Canaccord Genuity has not independently verified the facts, assumptions, and estimates contained herein. All estimates, opinions and other information contained in this investment research constitute Canaccord Genuity's judgement as of the date of this investment research, are subject to change without notice and are provided in good faith but without legal responsibility or liability.

Canaccord Genuity's salespeople, traders, and other professionals may provide oral or written market commentary or trading strategies to our clients and our proprietary trading desk that reflect opinions that are contrary to the opinions expressed in this investment research. Canaccord Genuity's affiliates, principal trading desk, and investing businesses may make investment decisions that are inconsistent with the recommendations or views expressed in this investment research.

This investment research is provided for information purposes only and does not constitute an offer or solicitation to buy or sell any designated investments discussed herein in any jurisdiction where such offer or solicitation would be prohibited. As a result, the designated investments discussed in this investment research may not be eligible for sale in some jurisdictions. This investment research is not, and under no circumstances should be construed as, a solicitation to act as a securities broker or dealer in any jurisdiction by any person or company that is not legally permitted to carry on the business of a securities broker or dealer in that jurisdiction. This material is prepared for general circulation to clients and does not have regard to the investment objectives, financial situation or particular needs of any particular person. Investors should obtain advice based on their own individual circumstances before making an investment decision. To the fullest extent permitted by law, none of Canaccord Genuity, its affiliated companies or any other person accepts any liability whatsoever for any direct or consequential loss arising from or relating to any use of the information contained in this investment research.

For Canadian Residents: This Investment Research has been approved by Canaccord Genuity Corp., which accepts sole responsibility for this Investment Research and its dissemination in Canada. Canadian clients wishing to effect transactions in any Designated Investment discussed should do so through a qualified salesperson of Canaccord Genuity Corp. in their particular jurisdiction.

For United Kingdom Residents: This investment research is distributed in the United Kingdom, as third party research by Canaccord Genuity Limited, which is authorized and regulated by the Financial Services Authority. This research is for distribution only to persons who are Eligible Counterparties or Professional Clients only and is exempt from the general restrictions in section 21 of the Financial Services and Markets Act 2000 on the communication of invitations or inducements to engage in investment activity on the grounds that it is being distributed in the United Kingdom only to persons of a kind described in Article 19(5) (Investment Professionals) and 49(2) (High Net Worth companies, unincorporated associations etc) of the Financial Services and Markets Act 2000 (Financial Promotion) Order 2005 (as amended). It is not intended to be distributed or passed on, directly or indirectly, to any other class of persons. This material is not for distribution in the United Kingdom to retail clients, as defined under the rules of the Financial Services Authority.

For United States Residents: Canaccord Genuity Inc., a US registered broker-dealer, accepts responsibility for this Investment Research and its dissemination in the United States. This Investment Research is intended for distribution in the United States only to certain US institutional investors. US clients wishing to effect transactions in any Designated

Investment discussed should do so through a qualified salesperson of Canaccord Genuity Inc. Analyst(s) preparing this report that are not employed by Canaccord Genuity Inc are resident outside the United States and are not associated persons or employees of any US regulated broker-dealer. Such analyst(s) may not be subject to Rule 2711 restrictions on communications with a subject company, public appearances and trading securities held by a research analyst account.

For European Residents: If this Investment Research is intended for disclosure in any jurisdiction other than the United Kingdom, the US or Canada, then the relevant rules and regulatory requirements of that jurisdiction will apply.

SHARE PRICE PERFORMANCE:**COMPANY DESCRIPTION:**

Fortis Inc. is a diversified, international electric utility holding company with assets over \$12.5 billion. Regulated holdings include electric distribution utilities in Alberta, BC, Ontario, Newfoundland, PEI and three Caribbean countries and a natural gas utility in BC. Fortis owns non-regulated generation assets across Canada and in Belize and New York State. It also owns and operates hotels and commercial real estate in Canada.

All amounts in C\$ unless otherwise noted.

Infrastructure -- Utilities**NEGATIVE BELIZE DECISION NOT MATERIAL****Investment recommendation**

Fortis received unfavourable determinations from the Belize Supreme Court regarding its 70%-owned Belize Electricity Limited for appeals made against certain regulatory decisions related to a 2008 rate case with the Belize regulator. The regulatory decisions in dispute have resulted in the company not earning a sufficient return on the assets since 2008 and, while they are disappointing, we do not expect the recent findings to have a material impact on future earnings. However, the company may be required to incur a writedown on the assets at some point in the future. The Belize regulatory assets represent only around \$100-125 million (~\$0.57-0.72 per share) and we believe that if a writedown is incurred, it would be for a portion of these assets and would not be material to the stock. Fortis is the epitome of a utility, achieving stable earnings growth stemming mainly from its regulated operations in Canada. The company has \$5.5 billion of planned capital expenditures over the next five years and we continue to expect delivery of measured earnings growth.

Investment highlights

- No changes to 2011 and 2012 earnings estimates
 - Belize assets under-earning for past two and a half years
 - No assumptions for positive decision going forward
- Maintain HOLD rating and \$32 target price
- Supreme Court determination immaterial to company
 - Total Belize assets represent \$0.57-0.72 in value per share

Valuation

Our target price is derived from a combination of valuation metrics that include earnings and dividend yields relative to long-term interest rates, dividend discount models, and earnings and cash flow multiples relative to both historical valuation and its utility and pipeline peers.

Summary

In 2008, the Public Utilities Commission (PUC) in Belize issued a Final Decision on Belize Electric Limited's (70 % Fortis-owned) Annual Review Proceedings that resulted in a reduced rate of return by way of disallowing previously approved expenses and lowering the value of the rate base. Belize Electric then appealed the decisions to the Belize Supreme Court on the basis that the PUC decisions were unlawful and did not follow Good Utility Practice. In its determination, the Supreme Court sided with the PUC on all regulatory decisions in dispute and found the PUC to have acted in the interest of consumers and the utility.

Fortis has not been earning a positive return on its Belize operations since 2008. Although it is disappointing, we believe the outcome is not significantly meaningful to Fortis's earnings going forward. In total, the Belize regulatory assets are estimated at \$100-125 million (\$0.57-0.72 per share), and are not substantial relative to the total value of the company. We suspect the company may have to write down the assets at some point in the future if it is not able to derive additional value from the assets but believe any potential writedown would be a portion of the total value of the assets and would not be a significant to the stock.

Investment risks

Some of the specific risk factors that pertain to the projected 6- to 12-month stock price target for Fortis are as follows: (1) price movement in electricity rates and commodities used for electricity generation could impact profitability; (2) international operations have currency rate exposure and liquidity risks associated with those currencies; (3) credit risk of contract counterparties could improve or deteriorate; (4) debt refinancing at different interest rates could impact the income of the company; (5) equipment failure or extreme weather conditions could adversely affect operating facilities; (6) change in public policy on environmental health and safety risk could impose unexpected costs on Fortis; (7) change in regulatory or political climate could impact profitability and future growth and development of Fortis; (8) the inability to maintain, or to renew, the collective bargaining agreements with unionized workers on acceptable terms could result in increased labour costs or service interruptions arising from labour disputes; (9) economic conditions which may impact demand for products and services, peer group valuation, access to capital and share trading liquidity; (10) Fortis holds investments in commercial real estate and hotel properties which are subject to operating risks associated with the industry.

Canaccord Ratings System:

BUY: The stock is expected to generate risk-adjusted returns of over 10% during the next 12 months.

HOLD: The stock is expected to generate risk-adjusted returns of 0-10% during the next 12 months.

SELL: The stock is expected to generate negative risk-adjusted returns during the next 12 months.

NOT RATED: Canaccord Genuity does not provide research coverage of the relevant issuer.

"Risk-adjusted return" refers to the expected return in relation to the amount of risk associated with the designated investment or the relevant issuer.

Risk Qualifier:

SPECULATIVE: Stocks bear significantly higher risk that typically cannot be valued by normal fundamental criteria. Investments in the stock may result in material loss.

Canaccord Research Disclosures as of 16 March 2011

Company	Disclosure
Fortis Inc.	7
1	The relevant issuer currently is, or in the past 12 months was, a client of Canaccord Genuity or its affiliated companies. During this period, Canaccord Genuity or its affiliated companies provided the following services to the relevant issuer: A. investment banking services. B. non-investment banking securities-related services. C. non-securities related services.
2	In the past 12 months, Canaccord Genuity or its affiliated companies have received compensation for Corporate Finance/Investment Banking services from the relevant issuer.
3	In the past 12 months, Canaccord Genuity or any of its affiliated companies have been lead manager, co-lead manager or co-manager of a public offering of securities of the relevant issuer or any publicly disclosed offer of securities of the relevant issuer or in any related derivatives.
4	Canaccord Genuity acts as corporate broker for the relevant issuer and/or Canaccord Genuity or any of its affiliated companies may have an agreement with the relevant issuer relating to the provision of Corporate Finance/Investment Banking services.
5	Canaccord Genuity or any of its affiliated companies is a market maker or liquidity provider in the securities of the relevant issuer or in any related derivatives.
6	In the past 12 months, Canaccord Genuity, its partners, affiliated companies, officers or directors, or any authoring analyst involved in the preparation of this investment research has provided services to the relevant issuer for remuneration, other than normal course investment advisory or trade execution services.
7	Canaccord Genuity intends to seek or expects to receive compensation for Corporate Finance/Investment Banking services from the relevant issuer in the next six months.
8	The authoring analyst, a member of the authoring analyst's household, or any individual directly involved in the preparation of this investment research, has a long position in the shares or derivatives, or has any other financial interest in the relevant issuer, the value of which increases as the value of the underlying equity increases.
9	The authoring analyst, a member of the authoring analyst's household, or any individual directly involved in the preparation of this investment research, has a short position in the shares or derivatives, or has any other financial interest in the relevant issuer, the value of which increases as the value of the underlying equity decreases.
10	Those persons identified as the author(s) of this investment research, or any individual involved in the preparation of this investment research, have purchased/received shares in the relevant issuer prior to a public offering of those shares, and such person's name and details are disclosed above.
11	A partner, director, officer, employee or agent of Canaccord Genuity and its affiliated companies, or a member of his/her household, is an officer, or director, or serves as an advisor or board member of the relevant issuer and/or one of its subsidiaries, and such person's name is disclosed above.
12	As of the month end immediately preceding the date of publication of this investment research, or the prior month end if publication is within 10 days following a month end, Canaccord Genuity or its affiliate companies, in the aggregate, beneficially owned 1% or more of any class of the total issued share capital or other common equity securities of the relevant issuer or held any other financial interests in the relevant issuer which are significant in relation to the investment research (as disclosed above).
13	As of the month end immediately preceding the date of publication of this investment research, or the prior month end if publication is within 10 days following a month end, the relevant issuer owned 1% or more of any class of the total issued share capital in Canaccord Genuity or any of its affiliated companies.
14	Other specific disclosures as described above.

Canaccord Genuity is the business name used by certain subsidiaries of Canaccord Financial Inc., including Canaccord Genuity Inc., Canaccord Genuity Limited, and Canaccord Genuity Corp.

The authoring analysts who are responsible for the preparation of this investment research are employed by Canaccord Genuity Corp. a Canadian broker-dealer with principal offices located in Vancouver, Calgary, Toronto, Montreal, or Canaccord Genuity Inc., a US broker-dealer with principal offices located in Boston, New York, San Francisco and Houston or Canaccord Genuity Limited., a UK broker-dealer with principal offices located in London and Edinburgh (UK).

In the event that this is compendium investment research (covering six or more relevant issuers), Canaccord Genuity and its affiliated companies may choose to provide specific disclosures of the subject companies by reference, as well as its policies and procedures regarding the dissemination of investment research. SHARE PRICE PERFORMANCE:**COMPANY DESCRIPTION:**

Fortis Inc. is a diversified, international electric utility holding company with assets over \$12.5 billion. Regulated holdings include electric distribution utilities in Alberta, BC, Ontario, Newfoundland, PEI and three Caribbean countries and a natural gas utility in BC. Fortis owns non-regulated generation assets across Canada and in Belize and New York State. It also owns and operates hotels and commercial real estate in Canada.

All amounts in C\$ unless otherwise noted.

Infrastructure -- Utilities**RATE BASE GROWTH FUELS STRONG Q1****Investment recommendation**

Fortis reported first quarter recurring earnings of \$0.66 per share, above the consensus estimate. The company consistently delivers stable results, as earnings are almost entirely generated from rate regulated utility operations. Over the next five years, earnings are set for stable and consistent growth. The company plans to spend approximately \$5.5 billion in capital expenditures, 83% of which will be applied to its utility operations in western Canada. We continue to rate the stock a HOLD and maintain our C\$32.00 target price.

Investment highlights

- Q1 recurring EPS of \$0.66, above consensus
 - Growth from capital additions in western Canadian utility operations
- \$5.5 billion capital program to fuel future growth
- Maintain HOLD rating and C\$32.00 target price
 - 2011 and 2012 EPS estimates unchanged

Valuation

Our target price is derived from a combination of valuation metrics that include earnings and dividend yields relative to long-term interest rates, dividend discount models, and earnings and cash flow multiples relative to both historical valuation and its utility and pipeline peers.

Outlook

We are making no changes to our 2011 and 2012 earnings estimates of \$1.75 and \$1.80, respectively. The nature of Fortis' business, energy delivery, usually leads to strong results in the first and fourth quarters when energy demand is at its peak and temperatures are the coldest. We expect to see a strong start to the year offset by comparatively weaker second and third quarters. Earnings, however, continue to grow year-over-year, mainly due to capital additions in the company's regulated operations in western Canada. Fortis is seeking to spend an additional \$5.5 billion of growth capex from 2011 through 2015. Approximately \$4.6 billion of that will be towards regulated operations, mainly FortisBC and FortisAlberta.

Growth can be further enhanced if Fortis were to acquire additional utility assets. The company has a successful track record of acquisitions in the past and is always on the lookout for assets that fit its strategy and meet its investment criteria. Management has indicated that it will consider acquiring assets with up to \$4 billion in enterprise value, and will consider partnering with another investor for larger purchases.

The company is still facing headwinds at its Caribbean operations with an unfavourable decision at Belize Electricity and a rate application that was not accepted by the Governor of Turks and Caicos. The company is working hard to resolve these issues, which could result in improved earnings in the future. However, we remain conservative on our expectations for earnings from this business division.

First quarter earnings summary

Fortis reported first quarter recurring earnings of \$0.66 per share, above the \$0.62 consensus estimate and \$0.59 in the first quarter last year. Strong rate base growth at the company's regulated utilities in western Canada contributed to the bulk of the increased earnings in the quarter. Earnings improved in its non-regulated generation segment as a result of increased power generation in Belize and higher average power prices in Ontario. Fortis Properties' earnings decreased modestly year-over-year due to higher amortization costs and lower performance as a result of continued effects of the economic downturn. However, the first quarter is typically the seasonally low quarter of the year, and we expect the Properties division to deliver a contribution in 2011 similar to last year. For additional details on the first quarter results, please see Figure 1.

Noteworthy items

- Rate applications
 - FortisAlberta 2012-2013 rate application filed in March 2011
 - Effective rate increases of 8.2% in 2012 and 6.9% in 2013
 - Hearing expected late October 2011 and final decision in Q1/12
-

- FortisBC Energy (formerly known as Terasen) expects to file 2012-2013 rate application in May 2011
 - FortisBC Electric expects to file 2012-2013 rate application in summer 2011
 - Newfoundland Power expects to file rate application in May 2011
 - 8% rate increase effective July 1, 2011
 - Considering amalgamation of three FortisBC Energy companies (formerly Terasen Gas companies)
 - FortisBC Inc., FortisBC Vancouver Island, and FortisBC Whistler
 - Application expected sometime in 2011
 - FortisBC natural gas storage facility expected to be complete in next several weeks
 - Estimated cost of \$214 million; \$80 million equity portion
 - Facility to be filled in Q2/11
 - Fortis Properties' application to construct 12-storey office building in St. John's, Newfoundland
 - Subject to municipal government approval
 - Estimated cost of \$50 million and expected completion in 2013
-

Investment risks

Some of the specific risk factors that pertain to the projected 6- to 12-month stock price target for Fortis are as follows: (1) price movement in electricity rates and commodities used for electricity generation could impact profitability; (2) international operations have currency rate exposure and liquidity risks

associated with those currencies; (3) credit risk of contract counterparties could improve or deteriorate; (4) debt refinancing at different interest rates could impact the income of the company; (5) equipment failure or extreme weather conditions could adversely affect operating facilities; (6) change in public policy on environmental health and safety risk could impose unexpected costs on Fortis; (7) change in regulatory or political climate could impact profitability and future growth and development of Fortis; (8) the inability to maintain, or to renew, the collective bargaining agreements with unionized workers on acceptable terms could result in increased labour costs or service interruptions arising from labour disputes; (9) economic conditions which may impact demand for products and services, peer group valuation, access to capital, and share trading liquidity; and (10) Fortis holds investments in commercial real estate and hotel properties, which are subject to operating risks associated with the industry.

Canaccord Ratings System:

BUY: The stock is expected to generate risk-adjusted returns of over 10% during the next 12 months.

HOLD: The stock is expected to generate risk-adjusted returns of 0-10% during the next 12 months.

SELL: The stock is expected to generate negative risk-adjusted returns during the next 12 months.

NOT RATED: Canaccord Genuity does not provide research coverage of the relevant issuer.

"Risk-adjusted return" refers to the expected return in relation to the amount of risk associated with the designated investment or the relevant issuer.

Risk Qualifier:

SPECULATIVE: Stocks bear significantly higher risk that typically cannot be valued by normal fundamental criteria. Investments in the stock may result in material loss.

Canaccord Research Disclosures as of 4 May 2011

Company	Disclosure
Fortis Inc.	7
1	The relevant issuer currently is, or in the past 12 months was, a client of Canaccord Genuity or its affiliated companies. During this period, Canaccord Genuity or its affiliated companies provided the following services to the relevant issuer: A. investment banking services. B. non-investment banking securities-related services. C. non-securities related services.
2	In the past 12 months, Canaccord Genuity or its affiliated companies have received compensation for Corporate Finance/Investment Banking services from the relevant issuer.
3	In the past 12 months, Canaccord Genuity or any of its affiliated companies have been lead manager, co-lead manager or co-manager of a public offering of securities of the relevant issuer or any publicly disclosed offer of securities of the relevant issuer or in any related derivatives.
4	Canaccord Genuity acts as corporate broker for the relevant issuer and/or Canaccord Genuity or any of its affiliated companies may have an agreement with the relevant issuer relating to the provision of Corporate Finance/Investment Banking services.
5	Canaccord Genuity or any of its affiliated companies is a market maker or liquidity provider in the securities of the relevant issuer or in any related derivatives.
6	In the past 12 months, Canaccord Genuity, its partners, affiliated companies, officers or directors, or any authoring analyst involved in the preparation of this investment research has provided services to the relevant issuer for remuneration, other than normal course investment advisory or trade execution services.
7	Canaccord Genuity intends to seek or expects to receive compensation for Corporate Finance/Investment Banking services from the relevant issuer in the next six months.
8	The authoring analyst, a member of the authoring analyst's household, or any individual directly involved in the preparation of this investment research, has a long position in the shares or derivatives, or has any other financial interest in the relevant issuer, the value of which increases as the value of the underlying equity increases.
9	The authoring analyst, a member of the authoring analyst's household, or any individual directly involved in the preparation of this investment research, has a short position in the shares or derivatives, or has any other financial interest in the relevant issuer, the value of which increases as the value of the underlying equity decreases.
10	Those persons identified as the author(s) of this investment research, or any individual involved in the preparation of this investment research, have purchased/received shares in the relevant issuer prior to a public offering of those shares, and such person's name and details are disclosed above.
11	A partner, director, officer, employee or agent of Canaccord Genuity and its affiliated companies, or a member of his/her household, is an officer, or director, or serves as an advisor or board member of the relevant issuer and/or one of its subsidiaries, and such person's name is disclosed above.
12	As of the month end immediately preceding the date of publication of this investment research, or the prior month end if publication is within 10 days following a month end, Canaccord Genuity or its affiliate companies, in the aggregate, beneficially owned 1% or more of any class of the total issued share capital or other common equity securities of the relevant issuer or held any other financial interests in the relevant issuer which are significant in relation to the investment research (as disclosed above).
13	As of the month end immediately preceding the date of publication of this investment research, or the prior month end if publication is within 10 days following a month end, the relevant issuer owned 1% or more of any class of the total issued share capital in Canaccord Genuity or any of its affiliated companies.
14	Other specific disclosures as described above.

Canaccord Genuity is the business name used by certain subsidiaries of Canaccord Financial Inc., including Canaccord Genuity Inc., Canaccord Genuity Limited, and Canaccord Genuity Corp.

The authoring analysts who are responsible for the preparation of this investment research are employed by Canaccord Genuity Corp. a Canadian broker-dealer with principal offices located in Vancouver, Calgary, Toronto, Montreal, or Canaccord Genuity Inc., a US broker-dealer with principal offices located in Boston, New York, San Francisco and Houston or Canaccord Genuity Limited., a UK broker-dealer with principal offices located in London and Edinburgh (UK).

In the event that this is compendium investment research (covering six or more relevant issuers), Canaccord Genuity and its affiliated companies may choose to provide specific disclosures of the subject companies by reference, as well as its policies and procedures regarding the dissemination of investment research. To access this material or for more information, please send a request to Canaccord Genuity Research, Attn:

Disclosures, P.O. Box 10337 Pacific Centre, 2200-609 Granville Street, Vancouver, BC, Canada V7Y 1H2 or disclosures@canaccordgenuity.com.

The authoring analysts who are responsible for the preparation of this investment research have received (or will receive) compensation based upon (among other factors) the Corporate Finance/Investment Banking revenues and general profits of Canaccord Genuity. However, such authoring analysts have not received, and will not receive, compensation that is directly based upon or linked to one or more specific Corporate Finance/Investment Banking activities, or to recommendations contained in the investment research.

Canaccord Genuity and its affiliated companies may have a Corporate Finance/Investment Banking or other relationship with the company that is the subject of this investment research and may trade in any of the designated investments mentioned herein either for their own account or the accounts of their customers, in good faith or in the normal course of market making. Accordingly, Canaccord Genuity or their affiliated companies, principals or employees (other than the authoring analyst(s) who prepared this investment research) may at any time have a long or short position in any such designated investments, related designated investments or in options, futures or other derivative instruments based thereon.

Some regulators require that a firm must establish, implement and make available a policy for managing conflicts of interest arising as a result of publication or distribution of investment research. This investment research has been prepared in accordance with Canaccord Genuity's policy on managing conflicts of interest, and information barriers or firewalls have been used where appropriate. Canaccord Genuity's policy is available upon request.

The information contained in this investment research has been compiled by Canaccord Genuity from sources believed to be reliable, but (with the exception of the information about Canaccord Genuity) no representation or warranty, express or implied, is made by Canaccord Genuity, its affiliated companies or any other person as to its fairness, accuracy, completeness or correctness. Canaccord Genuity has not independently verified the facts, assumptions, and estimates contained herein. All estimates, opinions and other information contained in this investment research constitute Canaccord Genuity's judgement as of the date of this investment research, are subject to change without notice and are provided in good faith but without legal responsibility or liability.

Canaccord Genuity's salespeople, traders, and other professionals may provide oral or written market commentary or trading strategies to our clients and our proprietary trading desk that reflect opinions that are contrary to the opinions expressed in this investment research. Canaccord Genuity's affiliates, principal trading desk, and investing businesses may make investment decisions that are inconsistent with the recommendations or views expressed in this investment research.

This investment research is provided for information purposes only and does not constitute an offer or solicitation to buy or sell any designated investments discussed herein in any jurisdiction where such offer or solicitation would be prohibited. As a result, the designated investments discussed in this investment research may not be eligible for sale in some jurisdictions. This investment research is not, and under no circumstances should be construed as, a solicitation to act as a securities broker or dealer in any jurisdiction by any person or company that is not legally permitted to carry on the business of a securities broker or dealer in that jurisdiction. This material is prepared for general circulation to clients and does not have regard to the investment objectives, financial situation or particular needs of any particular person. Investors should obtain advice based on their own individual circumstances before making an investment decision. To the fullest extent permitted by law, none of Canaccord Genuity, its affiliated companies or any other person accepts any liability whatsoever for any direct or consequential loss arising from or relating to any use of the information contained in this investment research.

For Canadian Residents: This Investment Research has been approved by Canaccord Genuity Corp., which accepts sole responsibility for this Investment Research and its dissemination in Canada. Canadian clients wishing to effect transactions in any Designated Investment discussed should do so through a qualified salesperson of Canaccord Genuity Corp. in their particular jurisdiction.

For United Kingdom Residents: This investment research is distributed in the United Kingdom, as third party research by Canaccord Genuity Limited, which is authorized and regulated by the Financial Services Authority. This research is for distribution only to persons who are Eligible Counterparties or Professional Clients only and is exempt from the general restrictions in section 21 of the Financial Services and Markets Act 2000 on the communication of invitations or inducements to engage in investment activity on the grounds that it is being distributed in the United Kingdom only to persons of a kind described in Article 19(5) (Investment Professionals) and 49(2) (High Net Worth companies, unincorporated associations etc) of the Financial Services and Markets Act 2000 (Financial Promotion) Order 2005 (as amended). It is not intended to be distributed or passed on, directly or indirectly, to any other class of persons. This material is not for distribution in the United Kingdom to retail clients, as defined under the rules of the Financial Services Authority.

For United States Residents: Canaccord Genuity Inc., a US registered broker-dealer, accepts responsibility for this Investment Research and its dissemination in the United States. This Investment Research is intended for distribution in the United States only to certain US institutional investors. US clients wishing to effect transactions in any Designated

Investment discussed should do so through a qualified salesperson of Canaccord Genuity Inc. Analyst(s) preparing this report that are not employed by Canaccord Genuity Inc are resident outside the United States and are not associated persons or employees of any US regulated broker-dealer. Such analyst(s) may not be subject to Rule 2711 restrictions on communications with a subject company, public appearances and trading securities held by a research analyst account.

For European Residents: If this Investment Research is intended for disclosure in any jurisdiction other than the United Kingdom, the US or Canada, then the relevant rules and regulatory requirements of that jurisdiction will apply.

SHARE PRICE PERFORMANCE:**COMPANY DESCRIPTION:**

Fortis Inc. is a diversified, international electric utility holding company with assets over \$12.5 billion. Regulated holdings include electric distribution utilities in Alberta, BC, Ontario, Newfoundland, PEI and three Caribbean countries and a natural gas utility in BC. Fortis owns non-regulated generation assets across Canada and in Belize and New York State. It also owns and operates hotels and commercial real estate in Canada.

All amounts in C\$ unless otherwise noted.

Infrastructure -- Utilities**ACQUIRES U.S. UTILITY AND ISSUES COMMON EQUITY****Investment recommendation**

Fortis announced the acquisition of Central Vermont Public Service (CV : NYSE : US\$24.32 | Not rated) for US\$35.10/share or US\$700 million including the assumption of US\$230 million of associated debt. We believe the acquisition will contribute up to \$0.05 to full-year EPS once it closes and we are raising our target price modestly to C\$33.00 from C\$32.00 to reflect the positive impact of the purchase. The company also announced an equity financing of up to \$345 million to finance the equity portion of rate base growth in its western Canadian utility operations and for its share in the development of the Waneta Dam. While we had modelled an equity financing into our 2011 earnings estimate, we had assumed a smaller financing. As a result, the larger equity issue dilutes our 2011 EPS by a few cents per share and we are lowering our 2011 EPS estimate to \$1.70 from \$1.75.

Investment highlights

- Acquiring Central Vermont Public Service for US\$700 million
 - 1.41x rate base (including interest in VELCO debt)
 - Expected to close in 6-12 months
 - Accretive to EPS by as much as \$0.05 per share after close
- Raising target price by C\$1.00 to C\$33.00
 - Maintain HOLD rating

Canaccord Genuity is the global capital markets group of Canaccord Financial Inc. (CF : TSX | CF. : AIM)

The recommendations and opinions expressed in this Investment Research accurately reflect the Investment Analyst's personal, independent and objective views about any and all the Designated Investments and Relevant Issuers discussed herein. For important information, please see the Important Disclosures section in the appendix of this document or visit Canaccord Genuity's [Online Disclosure Database](#).

- Announced \$300 - \$345 million common equity issue (larger than anticipated)
 - 9.1 – 10.465 million shares @ \$33/share
- Lowering 2011 EPS estimate to \$1.70 from \$1.75; 2012 EPS estimate unchanged at \$1.80

Valuation

Our target price is derived from a combination of valuation metrics that include earnings and dividend yields relative to long-term interest rates, dividend discount models, and earnings and cash flow multiples relative to both historical valuation and its utility and pipeline peers.

Summary

Fortis announced the US\$700 million acquisition of Central Vermont Public Service (CVPS). The regulatory assets of CVPS were US\$426 million in 2010 which represents a 64% premium to regulatory assets. On the surface, the price appears rich; however, we note several factors. First, the rate base on the balance sheet does not take into consideration an additional US\$155 million of debt from a minority holding of Vermont Electric Power Company (VELCO). Considering this proportional interest in the debt of VELCO, the acquisition cost including assumed debt is about US\$855 million, representing a 40% premium to rate base. Second, while still somewhat higher than recent transactions (Algonquin Power & Utilities paid a 15%, 13% and 11% premium, respectively for its recent Granite State, Energy North and Midwest utilities acquisitions) we point out that CVPS generates a 9.45% return on an attractive 57% equity component on a rate base of US\$426 million (around ~43% equity component inclusive of VELCO debt). Third, CVPS is a growing utility with rate base expected to reach over US\$800 million by 2015 (including debt of VELCO), representing around ~8.5% average annual growth rate from 2010. We expect the acquisition to contribute up to ~\$0.05 per share to full year earnings per share depending on financing terms. The acquisition is expected to close within the next 6-12 months, subject to approval by CVPS shareholders, FERC and the Vermont Public Service Board.

While Fortis is very familiar with regulated assets, with almost 90% of its earnings generated from regulated operations in Canada and the Caribbean, the acquisition of CVPS is Fortis' first foray into the U.S. utility arena. Fortis' management has long indicated that it was seeking to expand into the United States and we suspect that the purchase of CVPS establishes a beachhead for additional U.S. utility purchases in the future.

The company also announced that it will issue 9.1 million common shares at \$33 per share for gross proceeds of \$300 million. If the overallotment of 1.365 million shares is exercised, total proceeds will rise to \$345 million. We had expected the company to issue equity in 2011 and in 2012 to fund the growth of its western Canadian utility operations and the development of its interest in the non-

regulated Waneta Dam; however, the announced equity issue is larger than we had anticipated. Consequently, the larger-than-expected common share issue will dilute our anticipated earnings and we are lowering our 2011 EPS estimate by \$0.05 to \$1.70. Our 2012 EPS estimate remains unchanged at \$1.80.

Acquisition details

- Purchasing CVPS for US\$700 million; US\$855 million including US\$155 million of VELCO debt
 - Purchasing CV:NYSE shares for US\$35.10/share
 - Represents 44% premium to last closing price
 - Assuming US\$385 million debt
- Rate base of ~US\$600 million
 - Includes debt attributed to VELCO investment
 - 57% equity component on rate base of US\$426 million
 - ~43% inclusive of VELCO debt
 - 9.45% ROE
 - Based on automatic adjustment formula approach using 10-year treasury yield
- CVPS purchases, produces, distributes, transmits and sells power
 - Serves 160,000 customers
 - Owns 9,000 miles of distribution lines
 - Owns 600 miles of transmission lines
 - Holds a 41% interest in Vermont Transco LLC, an electric transmission business
 - Holds a 47% interest in Vermont Electric Power Company (VELCO), an electric transmission business
 - Holds a 59% interest in Vermont Yankee Nuclear Power Corp, which holds a PPA for nuclear power from the Vermont Yankee Nuclear Power Plant
- Closing of the acquisition to occur within the next 6-12 months, subject to approval of:
 - CVPS shareholders
 - U.S. Federal Energy Regulatory Commission (FERC)
 - Vermont Public Service Board
 - Other customary closing conditions

Financing details

- Issuing 9.1 million shares at \$33/share for gross proceeds of \$300 million
 - 1.365 million share overallotment for \$45 million
 - To fund:
 - Growing rate base in western Canadian utility operations
 - Development of Waneta Dam
 - Outstanding debt on credit facilities
 - General corporate purposes
-

- Expected to close on or about June 15, 2011

Investment risks

Some of the specific risk factors that pertain to the projected 6- to 12-month stock price target for Fortis are as follows: (1) price movement in electricity rates and commodities used for electricity generation could impact profitability; (2) international operations have currency rate exposure and liquidity risks associated with those currencies; (3) credit risk of contract counterparties could improve or deteriorate; (4) debt refinancing at different interest rates could impact the income of the company; (5) equipment failure or extreme weather conditions could adversely affect operating facilities; (6) change in public policy on environmental health and safety risk could impose unexpected costs on Fortis; (7) change in regulatory or political climate could impact profitability and future growth and development of Fortis; (8) the inability to maintain, or to renew, the collective bargaining agreements with unionized workers on acceptable terms could result in increased labour costs or service interruptions arising from labour disputes; (9) economic conditions which may impact demand for products and services, peer group valuation, access to capital and share trading liquidity; (10) Fortis holds investments in commercial real estate and hotel properties which are subject to operating risks associated with the industry.

APPENDIX: IMPORTANT DISCLOSURES**Analyst Certification:**

Each authoring analyst of Canaccord Genuity whose name appears on the front page of this investment research hereby certifies that (i) the recommendations and opinions expressed in this investment research accurately reflect the authoring analyst's personal, independent and objective views about any and all of the designated investments or relevant issuers discussed herein that are within such authoring analyst's coverage universe and (ii) no part of the authoring analyst's compensation was, is, or will be, directly or indirectly, related to the specific recommendations or views expressed by the authoring analyst in the investment research.

SHARE PRICE PERFORMANCE:**COMPANY DESCRIPTION:**

Fortis Inc. is a diversified, international electric utility holding company with assets over \$12.5 billion. Regulated holdings include electric distribution utilities in Alberta, BC, Ontario, Newfoundland, PEI and three Caribbean countries and a natural gas utility in BC. Fortis owns non-regulated generation assets across Canada and in Belize and New York State. It also owns and operates hotels and commercial real estate in Canada.

All amounts in C\$ unless otherwise noted.

Infrastructure -- Utilities**BELIZE GOVERNMENT EXPRESSES INTEREST TO CONTROL BEL; NOT MATERIAL TO VALUE****Investment recommendation**

The Government of Belize publicly expressed its interest in purchasing majority shares in Belize Electricity Company (BEL) to assume control of the company. BEL is 70%-owned by Fortis and 25%-owned by the Government of Belize. As at this time, no purchase offer has been made to Fortis for shares of BEL. Fortis has stated in the past that it is not interested in holding a minority position in assets controlled by any government entity; this would also apply in this case. While we remain concerned that the Government may not offer a fair price for the assets, or may not purchase the entirety of Fortis' shares in BEL, we note that the Belize regulatory assets represent only around \$100-125 million or \$0.54-0.67 per share. Given the uncertainties stemming from a negative 2008 regulatory decision, we believe the market has already placed a significant discount on the BEL assets, which has been reflected in the stock. Consequently, we do not expect this issue to have a material impact on Fortis' stock price.

Investment highlights

- Maintain HOLD rating and C\$33.00 target price
- Total Belize Electricity Limited assets represent ~\$0.60 in value per share
 - Belize assets under-earning for past three years
 - No assumptions for positive decision going forward
 - Much of BEL value likely already discounted in current share price
- Potential Government control of BEL not very significant to value

Valuation

Our target price is derived from a combination of valuation metrics that include earnings and dividend yields relative to long-term interest rates, dividend discount models, and earnings and cash flow multiples relative to both historical valuation and its utility and pipeline peers.

Summary

The Government of Belize has stated its desire to own a controlling interest in BEL, a regulated utility 70%-owned by Fortis. As yet, Fortis has not received a proposal by the Government. While the Government has publicly announced its intention to 'purchase' majority shares in BEL, we remain concerned that Fortis may not receive a fair price. On previous occasions, Fortis has stated that it does not participate in minority holding of government-controlled assets, which further complicates the issue. We understand that the Belizean Government has already taken ownership of the telecommunications and water utility operations within the country, and has now set its sights on BEL. That said, we point out that Fortis' investment in BEL is ~\$100-125 million (\$0.54-0.67 per share). We also believe the market has placed a significant discount on the value of Fortis' investment in BEL. In 2008, the Belize Public Utilities Commission (PUC) issued a regulatory decision that resulted in a reduced rate of return by disallowing previously approved expenses and lowering the value of the rate base. BEL filed appeals, but the Belize Supreme Court has sided with the PUC. Since 2008, BEL has not been earning an appropriate return on its regulated Belizean assets.

We expect that the issues surrounding BEL will not be resolved in the near term, and an ultimate resolution may still be years away. The impact on the change in ownership at BEL should not be material to Fortis' stock. We note that Fortis has an additional ~\$160 million investment in non-regulated power assets in Belize. These assets are not in question, and to our knowledge the Government has been satisfied with Fortis' ownership and has never made an expression of interest regarding these assets. However, should these assets become a target of Government interest, it could potentially have a modestly negative impact on the value of the stock.

Investment risks

Some of the specific risk factors that pertain to the projected 6- to 12-month stock price target for Fortis are as follows: (1) price movement in electricity rates and commodities used for electricity generation could impact profitability; (2) international operations have currency rate exposure and liquidity risks associated with those currencies; (3) credit risk of contract counterparties could improve or deteriorate; (4) debt refinancing at different interest rates could impact the income of the company; (5) equipment failure or extreme weather conditions could adversely affect operating facilities; (6) change in public policy on

environmental health and safety risk could impose unexpected costs on Fortis; (7) change in regulatory or political climate could impact profitability and future growth and development of Fortis; (8) the inability to maintain, or to renew, the collective bargaining agreements with unionized workers on acceptable terms could result in increased labour costs or service interruptions arising from labour disputes; (9) economic conditions, which may impact demand for products and services, peer group valuation, access to capital, and share trading liquidity; and (10) Fortis holds investments in commercial real estate and hotel properties that are subject to operating risks associated with the industry.

Canaccord Research Disclosures as of 13 June 2011

Company	Disclosure
Fortis Inc.	7
1	The relevant issuer currently is, or in the past 12 months was, a client of Canaccord Genuity or its affiliated companies. During this period, Canaccord Genuity or its affiliated companies provided the following services to the relevant issuer: A. investment banking services. B. non-investment banking securities-related services. C. non-securities related services.
2	In the past 12 months, Canaccord Genuity or its affiliated companies have received compensation for Corporate Finance/Investment Banking services from the relevant issuer.
3	In the past 12 months, Canaccord Genuity or any of its affiliated companies have been lead manager, co-lead manager or co-manager of a public offering of securities of the relevant issuer or any publicly disclosed offer of securities of the relevant issuer or in any related derivatives.
4	Canaccord Genuity acts as corporate broker for the relevant issuer and/or Canaccord Genuity or any of its affiliated companies may have an agreement with the relevant issuer relating to the provision of Corporate Finance/Investment Banking services.
5	Canaccord Genuity or any of its affiliated companies is a market maker or liquidity provider in the securities of the relevant issuer or in any related derivatives.
6	In the past 12 months, Canaccord Genuity, its partners, affiliated companies, officers or directors, or any authoring analyst involved in the preparation of this investment research has provided services to the relevant issuer for remuneration, other than normal course investment advisory or trade execution services.
7	Canaccord Genuity intends to seek or expects to receive compensation for Corporate Finance/Investment Banking services from the relevant issuer in the next six months.
8	The authoring analyst, a member of the authoring analyst's household, or any individual directly involved in the preparation of this investment research, has a long position in the shares or derivatives, or has any other financial interest in the relevant issuer, the value of which increases as the value of the underlying equity increases.
9	The authoring analyst, a member of the authoring analyst's household, or any individual directly involved in the preparation of this investment research, has a short position in the shares or derivatives, or has any other financial interest in the relevant issuer, the value of which increases as the value of the underlying equity decreases.
10	Those persons identified as the author(s) of this investment research, or any individual involved in the preparation of this investment research, have purchased/received shares in the relevant issuer prior to a public offering of those shares, and such person's name and details are disclosed above.
11	A partner, director, officer, employee or agent of Canaccord Genuity and its affiliated companies, or a member of his/her household, is an officer, or director, or serves as an advisor or board member of the relevant issuer and/or one of its subsidiaries, and such person's name is disclosed above.
12	As of the month end immediately preceding the date of publication of this investment research, or the prior month end if publication is within 10 days following a month end, Canaccord Genuity or its affiliate companies, in the aggregate, beneficially owned 1% or more of any class of the total issued share capital or other common equity securities of the relevant issuer or held any other financial interests in the relevant issuer which are significant in relation to the investment research (as disclosed above).
13	As of the month end immediately preceding the date of publication of this investment research, or the prior month end if publication is within 10 days following a month end, the relevant issuer owned 1% or more of any class of the total issued share capital in Canaccord Genuity or any of its affiliated companies.
14	Other specific disclosures as described above.

Canaccord Genuity is the business name used by certain subsidiaries of Canaccord Financial Inc., including Canaccord Genuity Inc., Canaccord Genuity Limited, and Canaccord Genuity Corp.

The authoring analysts who are responsible for the preparation of this investment research are employed by Canaccord Genuity Corp. a Canadian broker-dealer with principal offices located in Vancouver, Calgary, Toronto, Montreal, or Canaccord Genuity Inc., a US broker-dealer with principal offices located in Boston, New York, San Francisco and Houston or Canaccord Genuity Limited., a UK broker-dealer with principal offices located in London and Edinburgh (UK).

In the event that this is compendium investment research (covering six or more relevant issuers), Canaccord Genuity and its affiliated companies may choose to provide specific disclosures of the subject companies by reference, as well as its policies and procedures regarding the dissemination of investment research. GAZ METRO OFFER FOR CVPS PUTS KINK IN FORTIS' ACQUISITION PLANS

Investment recommendation

Gaz Métro LP made an unsolicited bid of US\$35.25 per share for Central Vermont Public Service Corporation (CV : NYSE : US\$35.62 | Not rated), just above Fortis' recent offer of US\$35.10 per share. Despite Fortis' offer being more attractive for shareholders after accounting for the \$17.5-19.5 million break fee (~\$1.30-1.45 per CVPS share), stakeholders including the Vermont regulator may view the Gaz Métro bid more favourably as the company has existing operations in Vermont and has stated it can realize \$144 million in savings for ratepayers through the transaction. Fortis will await a decision from CVPS before indicating any further actions.

Separately, Fortis has received an order of expropriation from the Government of Belize for its 70% ownership in Belize Electric Ltd (BEL). The government has not yet presented Fortis with a price. Fortis' investment in BEL is ~\$125 million or \$0.67 per share. We note there is a possibility the company incurs a loss by not receiving full value for its investment. Given the uncertainty surrounding the outcomes of the BEL expropriation and the proposed acquisition of CVPS, we are taking a more conservative view. Consequently, we are lowering our target price modestly to \$32.00 from \$33.00 until we see more clarity on the current issues. We are maintaining our HOLD rating.

Canaccord Genuity is the global capital markets group of Canaccord Financial Inc. (CF : TSX | CF. : AIM)

The recommendations and opinions expressed in this Investment Research accurately reflect the Investment Analyst's personal, independent and objective views about any and all the Designated Investments and Relevant Issuers discussed herein. For important information, please see the Important Disclosures section in the appendix of this document or visit Canaccord Genuity's [Online Disclosure Database](#).

Investment highlights

- Gaz Métro made unsolicited bid for CVPS
 - Less attractive to CVPS shareholders
 - After accounting for \$1.30-1.45/share break fee and dividend considerations
 - But more attractive to ratepayers and regulators
 - Gaz Métro providing \$144 million of benefits over ten years to ratepayers vs. Fortis' US\$21 million
- Fortis awaiting decision from CVPS before any further action
- Government of Belize to expropriate BEL
 - Uncertainty over compensation to be received
 - Fortis' investment in BEL represents ~\$0.67 per share value
- Lowering target price \$1 to \$32 due to uncertainty revolving issues

Valuation

Our target price is derived from a combination of valuation metrics that include earnings and dividend yields relative to long-term interest rates, dividend discount models, and earnings and cash flow multiples relative to both historical valuation and Fortis' utility and pipeline peers.

A tale of two offers and a lot of uncertainty

Gaz Métro's hostile bid (the unsolicited offer) of \$35.25 per CVPS share is a slight increase to Fortis' original \$35.10 offer price on May 30, 2011 of which the CVPS Board supported. We note the \$0.15 premium is less than a 0.5% increase to Fortis' per share offer and does not compensate for the \$17.5 - \$19.5 million break fee CVPS shareholders would be required to pay (~\$1.30-1.45 per share). In its conference call, Gaz Métro's management stated that the company would not pay the break fee as part of their offer. Gaz Métro's bid includes the payment of the \$0.23 CVPS quarterly dividend through the close of the offer compared to the Fortis bid which would include dividend payments for two quarters plus an additional \$0.01 per share for each subsequent quarter until close. Both companies have indicated they expect the transaction to close within 6-12 months. In order for the higher dividends proposed by Gaz Métro to offset the break fee, the approval process would have to take approximately 21 months or more. We believe this is unlikely. Consequently, we believe the Fortis bid to be a better option for the CVPS shareholders.

That being said, Gaz Métro's unsolicited offer includes some sweeteners which may be attractive to other stakeholders. Gaz Métro is already invested in Vermont through its wholly-owned Green Mountain Power (Vermont's second largest utility). It intends to provide savings for rate payers through investment and synergies of US\$144 million over a ten year period after the acquisition. A majority of those savings will likely be passed on to ratepayers, although a

sharing mechanism may be negotiated through the regulator. Fortis has not provided matching concessions. Even if the Fortis offer is accepted by shareholders, there exists a risk that the regulator could deny the approval of the transaction, or may limit the recovery of some costs to mimic the synergies the Gaz Métro accomplishes and could potentially cause CVPS to generate a lower return for Fortis.

What the final outcome will be is uncertain. The Board of CVPS is now reviewing the Gaz Métro offer and Fortis has indicated it will monitor the situation and respond in due course to decisions made after the CVPS review.

The Belize Electric expropriation

Not surprisingly, on June 20, 2011 the Government of Belize issued an order to expropriate Fortis' 70% interest in BEL. Note, that a week earlier the government had expressed interest in acquiring control of the assets (see *Daily Letter*, June 13, 2011). As of yet, compensation for the assets remain in question as no offer or agreement has been announced. We remain concerned that Fortis may not receive a fair price on the assets. We highlight however, the company's total equity investment in BEL is approximately \$100-125 million and that BEL's debt is non-recourse to Fortis. This represents a small portion of the enterprise and at worst case the company stands to lose ~\$0.67 per share.

In addition, Fortis owns the non-regulated Belize Electric Company which consists of three hydroelectric generating facilities. The company's total investment in these assets is approximately ~\$160 million. There has been no indication from the government on the expropriation of these assets. However, we note there may be an additional overhang on the stock due to the uncertainty regarding the situation.

Investment risks

Some of the specific risk factors that pertain to the projected 6- to 12-month stock price target for Fortis are as follows: (1) price movement in electricity rates and commodities used for electricity generation could impact profitability; (2) international operations have currency rate exposure and liquidity risks associated with those currencies; (3) credit risk of contract counterparties could improve or deteriorate; (4) debt refinancing at different interest rates could impact the income of the company; (5) equipment failure or extreme weather conditions could adversely affect operating facilities; (6) change in public policy on environmental health and safety risk could impose unexpected costs on Fortis; (7) change in regulatory or political climate could impact profitability and future growth and development of Fortis; (8) the inability to maintain, or to renew, the collective bargaining agreements with unionized workers on acceptable terms could result in increased labour costs or service interruptions arising from labour disputes; (9) economic conditions which may impact demand for products and

services, peer group valuation, access to capital and share trading liquidity; (10) Fortis holds investments in commercial real estate and hotel properties which are subject to operating risks associated with the industry.

12	As of the month end immediately preceding the date of publication of this investment research, or the prior month end if publication is within 10 days following a month end, Canaccord Genuity or its affiliate companies, in the aggregate, beneficially owned 1% or more of any class of the total issued share capital or other common equity securities of the relevant issuer or held any other financial interests in the relevant issuer which are significant in relation to the investment research (as disclosed above).
13	As of the month end immediately preceding the date of publication of this investment research, or the prior month end if publication is within 10 days following a month end, the relevant issuer owned 1% or more of any class of the total issued share capital in Canaccord Genuity or any of its affiliated companies.
14	Other specific disclosures as described above.

Canaccord Genuity is the business name used by certain subsidiaries of Canaccord Financial Inc., including Canaccord Genuity Inc., Canaccord Genuity Limited, and Canaccord Genuity Corp.

The authoring analysts who are responsible for the preparation of this investment research are employed by Canaccord Genuity Corp. a Canadian broker-dealer with principal offices located in Vancouver, Calgary, Toronto, Montreal, or Canaccord Genuity Inc., a US broker-dealer with principal offices located in Boston, New York, San Francisco and Houston or Canaccord Genuity Limited., a UK broker-dealer with principal offices located in London and Edinburgh (UK).

In the event that this is compendium investment research (covering six or more relevant issuers), Canaccord Genuity and its affiliated companies may choose to provide specific disclosures of the subject companies by reference, as well as its policies and procedures regarding the dissemination of investment research. To access this material or for more information, please send a request to Canaccord Genuity Research, Attn:

Disclosures, P.O. Box 10337 Pacific Centre, 2200-609 Granville Street, Vancouver, BC, Canada V7Y 1H2 or disclosures@canaccordgenuity.com.

The authoring analysts who are responsible for the preparation of this investment research have received (or will receive) compensation based upon (among other factors) the Corporate Finance/Investment Banking revenues and general profits of Canaccord Genuity. However, such authoring analysts have not received, and will not receive, compensation that is directly based upon or linked to one or more specific Corporate Finance/Investment Banking activities, or to recommendations contained in the investment research.

Canaccord Genuity and its affiliated companies may have a Corporate Finance/Investment Banking or other relationship with the company that is the subject of this investment research and may trade in any of the designated investments mentioned herein either for their own account or the accounts of their customers, in good faith or in the normal course of market making. Accordingly, Canaccord Genuity or their affiliated companies, principals or employees (other than the authoring analyst(s) who prepared this investment research) may at any time have a long or short position in any such designated investments, related designated investments or in options, futures or other derivative instruments based thereon.

Some regulators require that a firm must establish, implement and make available a policy for managing conflicts of interest arising as a result of publication or distribution of investment research. This investment research has been prepared in accordance with Canaccord Genuity's policy on managing conflicts of interest, and information barriers or firewalls have been used where appropriate. Canaccord Genuity's policy is available upon request.

The information contained in this investment research has been compiled by Canaccord Genuity from sources believed to be reliable, but (with the exception of the information about Canaccord Genuity) no representation or warranty, express or implied, is made by Canaccord Genuity, its affiliated companies or any other person as to its fairness, accuracy, completeness or correctness. Canaccord Genuity has not independently verified the facts, assumptions, and estimates contained herein. All estimates, opinions and other information contained in this investment research constitute Canaccord Genuity's judgement as of the date of this investment research, are subject to change without notice and are provided in good faith but without legal responsibility or liability.

Canaccord Genuity's salespeople, traders, and other professionals may provide oral or written market commentary or trading strategies to our clients and our proprietary trading desk that reflect opinions that are contrary to the opinions expressed in this investment research. Canaccord Genuity's affiliates, principal trading desk, and investing businesses may make investment decisions that are inconsistent with the recommendations or views expressed in this investment research.

This investment research is provided for information purposes only and does not constitute an offer or solicitation to buy or sell any designated investments discussed herein in any jurisdiction where such offer or solicitation would be prohibited. As a result, the designated investments discussed in this investment research may not be eligible for sale in some jurisdictions. This investment research is not, and under no circumstances should be construed as, a solicitation to act as a securities broker or dealer in any jurisdiction by any person or company that is not legally permitted to carry on the business of a securities broker or dealer in that jurisdiction. This material is prepared for general circulation to clients and does not have regard to the investment objectives, financial situation or particular needs of any particular person. Investors should obtain advice based on their own individual circumstances before making an investment decision. To the fullest extent permitted by law, none of Canaccord Genuity, its affiliated companies or any other person accepts any liability whatsoever for any direct or consequential loss arising from or relating to any use of the information contained in this investment research.

For Canadian Residents: This Investment Research has been approved by Canaccord Genuity Corp., which accepts sole responsibility for this Investment Research and its dissemination in Canada. Canadian clients wishing to effect transactions in any Designated Investment discussed should do so through a qualified salesperson of Canaccord Genuity Corp. in their particular jurisdiction.

For United Kingdom Residents: This investment research is distributed in the United Kingdom, as third party research by Canaccord Genuity Limited, which is authorized and regulated by the Financial Services Authority. This research is for distribution only to persons who are Eligible Counterparties or Professional Clients only and is exempt from the general restrictions in section 21 of the Financial Services and Markets Act 2000 on the communication of invitations or inducements to engage in investment activity on the grounds that it is being distributed in the United Kingdom only to persons of a kind described in Article 19(5) (Investment Professionals) and 49(2) (High Net Worth companies, unincorporated associations etc) of the Financial Services and Markets Act 2000 (Financial Promotion) Order 2005 (as amended). It is not intended to be distributed or passed on, directly or indirectly, to any other class of persons. This material is not for distribution in the United Kingdom to retail clients, as defined under the rules of the Financial Services Authority.

For United States Residents: Canaccord Genuity Inc., a US registered broker-dealer, accepts responsibility for this Investment Research and its dissemination in the United States. This Investment Research is intended for distribution in the United States only to certain US institutional investors. US clients wishing to effect transactions in any Designated

Investment discussed should do so through a qualified salesperson of Canaccord Genuity Inc. Analyst(s) preparing this report that are not employed by Canaccord Genuity Inc are resident outside the United States and are not associated persons or employees of any US regulated broker-dealer. Such analyst(s) may not be subject to Rule 2711 restrictions on communications with a subject company, public appearances and trading securities held by a research analyst account.

For European Residents: If this Investment Research is intended for disclosure in any jurisdiction other than the United Kingdom, the US or Canada, then the relevant rules and regulatory requirements of that jurisdiction will apply.

SHARE PRICE PERFORMANCE:**COMPANY DESCRIPTION:**

Fortis Inc. is a diversified, international electric utility holding company with assets over \$12.5 billion. Regulated holdings include electric distribution utilities in Alberta, BC, Ontario, Newfoundland, PEI and three Caribbean countries and a natural gas utility in BC. Fortis owns non-regulated generation assets across Canada and in Belize and New York State. It also owns and operates hotels and commercial real estate in Canada.

All amounts in C\$ unless otherwise noted.

Infrastructure -- Utilities**CVPS ACQUISITION TERMINATED****Investment recommendation**

Fortis announced that its merger agreement with Central Vermont Public Service (CVPS) has been terminated. The Board of CVPS has deemed that the unsolicited bid by Gaz Métro LP is a superior proposal and has terminated the merger agreement between Fortis and CVPS. Fortis has opted not to increase its offer and has instead elected to receive the \$17.5 million termination fee and \$2 million of associated expenses.

Investment highlights

- Merger agreement between Fortis and CVPS has been terminated
 - Fortis will not improve its offer for CVPS
 - Fortis will receive \$19.5 million in fees and expenses (\$0.11 per share)
- No change to C\$32.00 target or HOLD rating

Valuation

Our target price is derived from a combination of valuation metrics that include earnings and dividend yields relative to long-term interest rates, dividend discount models, and earnings and cash flow multiples relative to both historical valuation and Fortis' utility and pipeline peers.

Summary

Fortis announced that it will not sweeten its bid for Central Vermont Public Service (CVPS) following the Gaz Métro LP offer, and the merger agreement between Fortis and CVPS will be terminated. The Board of CVPS has determined that the proposal from Gaz Metro was a superior proposal. Originally, Fortis had five business days to change its offer before the

agreement was terminated under the terms of the merger agreement, but instead, decided to waive the five-day period and to immediately receive its \$17.5 million termination fee and \$2 million of associated expenses.

We commend the management of Fortis for its disciplined acquisition approach. The initial bid of \$700 million represented about a 40% premium to rate base, which we viewed as a significant premium. However, this was partly offset by the high rate base growth profile of CVPS for the next several years, which could shrink the premium over time. We did not believe a sweetened bid would make sense for Fortis. While we did not believe Gaz Métro's offer was superior from a shareholder perspective, it provides savings for rate payers through investment and synergies of US\$144 million over a 10- year period following the acquisition. A majority of those savings will likely be passed on to ratepayers, although a sharing mechanism may be negotiated through the regulator. We suspect that the Gaz Métro bid would have been favoured by the regulator, which raised the regulatory risk had Fortis won. Consequently, we believe Fortis's decision to withdraw from the process was the right thing to do. We previously reduced our target by \$1.00 to \$32.00, in part due to the uncertainty surrounding the acquisition, and at this point are making no further change to our target price.

Investment risks

Some of the specific risk factors that pertain to the projected 6- to 12-month stock price target for Fortis are as follows: (1) price movement in electricity rates and commodities used for electricity generation could impact profitability; (2) international operations have currency rate exposure and liquidity risks associated with those currencies; (3) credit risk of contract counterparties could improve or deteriorate; (4) debt refinancing at different interest rates could impact the income of the company; (5) equipment failure or extreme weather conditions could adversely affect operating facilities; (6) change in public policy on environmental health and safety risk could impose unexpected costs on Fortis; (7) change in regulatory or political climate could impact profitability and future growth and development of Fortis; (8) the inability to maintain, or to renew, the collective bargaining agreements with unionized workers on acceptable terms could result in increased labour costs or service interruptions arising from labour disputes; (9) economic conditions, which may impact demand for products and services, peer group valuation, access to capital, and share trading liquidity; (10) Fortis holds investments in commercial real estate and hotel properties, which are subject to operating risks associated with the industry.

APPENDIX: IMPORTANT DISCLOSURES**Analyst Certification:**

Each authoring analyst of Canaccord Genuity whose name appears on the front page of this investment research hereby certifies that (i) the recommendations and opinions expressed in this investment research accurately reflect the authoring analyst's personal, independent and objective views about any and all of the designated investments or relevant issuers discussed herein that are within such authoring analyst's coverage universe and (ii) no part of the authoring analyst's compensation was, is, or will be, directly or indirectly, related to the specific recommendations or views expressed by the authoring analyst in the investment research.

SHARE PRICE PERFORMANCE:

COMPANY DESCRIPTION:

Fortis Inc. is a diversified, international electric utility holding company with assets over \$12.5 billion. Regulated holdings include electric distribution utilities in Alberta, BC, Ontario, Newfoundland, PEI and three Caribbean countries and a natural gas utility in BC. Fortis owns non-regulated generation assets across Canada and in Belize and New York State. It also owns and operates hotels and commercial real estate in Canada.

All amounts in C\$ unless otherwise noted.

Infrastructure -- Utilities

Q2 A BIT LIGHT; CARIBBEAN OPERATIONS REMAIN AN OVERHANG

Investment recommendation

Fortis reported second-quarter recurring earnings of \$0.32 per share, a few cents below the consensus estimate. For the first half of the year, recurring earnings per share were \$0.98 and are on track to meet our \$1.70 EPS estimate. The company has a \$5.7 billion capital spending program for the 2011-2015 timeframe, which should provide earnings growth in its Canadian regulated utility operations. However, due to anticipated lower Caribbean earnings contributions and issues surrounding the company's Belizean assets, we are lowering our target price by \$1 to C\$31.00. We continue to rate the stock a HOLD.

Investment highlights

- Lowering target to C\$31.00 from C\$32.00, but maintain HOLD rating
- 2012 EPS estimate lowered by \$0.05 to \$1.75
- Q2 recurring EPS of \$0.32, modestly below expectations
 - Lower contribution from Caribbean regulated and Properties divisions; low hydrology at Belize non-regulated, offset by growth from capital additions in western Canadian utility operations
- Five year capital program up \$200 million to \$5.7 billion

Canaccord Genuity is the global capital markets group of Canaccord Financial Inc. (CF : TSX | CF. : AIM)

The recommendations and opinions expressed in this Investment Research accurately reflect the Investment Analyst's personal, independent and objective views about any and all the Designated Investments and Relevant Issuers discussed herein. For important information, please see the Important Disclosures section in the appendix of this document or visit Canaccord Genuity's [Online Disclosure Database](#).

Valuation

We are lowering our target price on the shares of Fortis to C\$31.00 from C\$32.00. Our target price is derived from a combination of valuation metrics that include earnings and dividend yields relative to long-term interest rates, dividend discount models, and earnings and cash flow multiples relative to both historical valuation and Fortis' utility and pipeline peers.

Outlook

We are maintaining our 2011 EPS estimate of \$1.70 but are lowering our 2012 EPS estimate modestly to \$1.75 from \$1.80. While earnings in the second quarter were slightly lower than our expectations, earnings in the first half of the year are on track to meet our \$1.70 per share estimate. However, the company continues to face some pushback at its Caribbean operations. The Government of Belize recently expropriated the company's investment in Belize Electricity (net assets of \$112 million, or \$0.60 per share) Fortis has initiated proceedings to receive compensation from the Government of Belize for its investment and the associated loss is likely well less than its \$0.60 investment. The recent move by the Government of Belize raises the possibility of further expropriation of the company's Belize Electric Company Limited (BECOL). However, we note that the Government of Belize has publicly indicated that it does not intend to expropriate BECOL and that Fortis is limited to its \$150 million (or \$0.80 per share) investment in BECOL. Also in the Caribbean, the Government of the Turks & Caicos plans to implement a carbon tax which is not recoverable in rates. The impact on Fortis's earnings is estimated at \$1 million in 2011 and \$2-3 million in 2012 if the carbon tax is implemented.

While we expect the company's earnings to benefit from the \$1.2 billion of capital expenditures in 2011 (mostly spent on western Canada regulated operations) and \$4.5 billion expected to be spent in the 2012-2015 period, 2012 earnings may experience a slightly lower contribution from regulated Caribbean operations (due to no earnings in 2012 from Belize Electricity versus a half year in 2011) and the dilutive impact of the 10.3 million common share issuance that closed in June.

We believe earnings growth could be further enhanced if Fortis were to acquire additional utility assets. The company continues to look for electric and gas utility acquisitions in Canada and the United States, and as evidenced by its refusal to increase its offer for Central Vermont Public Services last month, has a track record of remaining disciplined in achieving its required investment criteria.

Second-quarter earnings summary

Fortis reported second-quarter recurring earnings per share of \$0.32 compared to \$0.32 the year before, a couple of cents shy of our \$0.34 estimate and the \$0.35 consensus estimate. The slight miss was mainly attributed to lower contributions from the company's non-regulated operations. Non-regulated power generation provided lower earnings as a result of decreased production in Belize owing to less rainfall compared to the previous year. In addition, Fortis Properties experienced lower occupancy rates at its hotels combined with higher operating expenses. On the regulated side, earnings from the company's gas operations in BC declined year over year due to the timing of expenses, likely to be recovered in the second half of the year. This was offset by additional earnings at FortisAlberta driven by a growing rate base and a higher allowable return at Algoma Power in the 'Other Canadian Regulated Utilities' segment. Year-to-date recurring earnings

per share is \$0.98, above the \$0.91 reported in the first half of 2010. For additional details on the second quarter results please refer to Figure 1.

Noteworthy items

- BEL expropriation
 - Assets represent \$112 million (\$0.60 per share)
 - No indication from Government of Belize to expropriate non-regulated BECOL
 - Wholly owned by Fortis
 - \$150 million of assets (\$0.80 per share)
 - Turks and Caicos government plans to implement carbon tax in Sept 2011
 - Not a flow through cost to rate payers
 - ~\$1 M unfavourable earnings impact for 2011; ~\$2-3 M annually
 - Received US\$19.5 M (\$18.8 M) for termination of Merger Agreement between Central Vermont Public Service.
 - \$17.5 M break fee - to be recognized in Q3
 - \$2 M recovery of associated expenses
 - Expected capex of \$5.7 B over five-year period (2011-2015)
 - Previously \$5.5 B
 - Change reflects increase at Fortis BC Energy companies and exclusion of previously planned BEL capex
 - \$3.5 B (61%) for regulated electric utilities
 - \$1.3 B (23%) for regulated gas utilities
 - \$0.9 B (16%) for non-regulated operations
 - Will report according to US GAAP beginning January 2012
-

Investment risks

Some of the specific risk factors that pertain to the projected 6- to 12-month stock price target for Fortis are as follows: (1) price movement in electricity rates and commodities used for electricity generation could impact profitability; (2) international operations have currency rate exposure and liquidity risks associated with those currencies; (3) credit risk

of contract counterparties could improve or deteriorate; (4) debt refinancing at different interest rates could impact the income of the company; (5) equipment failure or extreme weather conditions could adversely affect operating facilities; (6) change in public policy on environmental health and safety risk could impose unexpected costs on Fortis; (7) change in regulatory or political climate could impact profitability and future growth and development of Fortis; (8) the inability to maintain, or to renew, the collective bargaining agreements with unionized workers on acceptable terms could result in increased labour costs or service interruptions arising from labour disputes; (9) economic conditions which may impact demand for products and services, peer group valuation, access to capital and share trading liquidity; (10) Fortis holds investments in commercial real estate and hotel properties which are subject to operating risks associated with the industry.

APPENDIX: IMPORTANT DISCLOSURES**Analyst Certification:**

Each authoring analyst of Canaccord Genuity whose name appears on the front page of this investment research hereby certifies that (i) the recommendations and opinions expressed in this investment research accurately reflect the authoring analyst's personal, independent and objective views about any and all of the designated investments or relevant issuers discussed herein that are within such authoring analyst's coverage universe and (ii) no part of the authoring analyst's compensation was, is, or will be, directly or indirectly, related to the specific recommendations or views expressed by the authoring analyst in the investment research.

Canaccord Ratings System:

BUY: The stock is expected to generate risk-adjusted returns of over 10% during the next 12 months.

HOLD: The stock is expected to generate risk-adjusted returns of 0-10% during the next 12 months.

SELL: The stock is expected to generate negative risk-adjusted returns during the next 12 months.

NOT RATED: Canaccord Genuity does not provide research coverage of the relevant issuer.

"Risk-adjusted return" refers to the expected return in relation to the amount of risk associated with the designated investment or the relevant issuer.

Risk Qualifier:

SPECULATIVE: Stocks bear significantly higher risk that typically cannot be valued by normal fundamental criteria. Investments in the stock may result in material loss.

Canaccord Research Disclosures as of 3 August 2011

Company	Disclosure
Fortis Inc.	7
1	The relevant issuer currently is, or in the past 12 months was, a client of Canaccord Genuity or its affiliated companies. During this period, Canaccord Genuity or its affiliated companies provided the following services to the relevant issuer: A. investment banking services. B. non-investment banking securities-related services. C. non-securities related services.
2	In the past 12 months, Canaccord Genuity or its affiliated companies have received compensation for Corporate Finance/Investment Banking services from the relevant issuer.
3	In the past 12 months, Canaccord Genuity or any of its affiliated companies have been lead manager, co-lead manager or co-manager of a public offering of securities of the relevant issuer or any publicly disclosed offer of securities of the relevant issuer or in any related derivatives.
4	Canaccord Genuity acts as corporate broker for the relevant issuer and/or Canaccord Genuity or any of its affiliated companies may have an agreement with the relevant issuer relating to the provision of Corporate Finance/Investment Banking services.
5	Canaccord Genuity or any of its affiliated companies is a market maker or liquidity provider in the securities of the relevant issuer or in any related derivatives.
6	In the past 12 months, Canaccord Genuity, its partners, affiliated companies, officers or directors, or any authoring analyst involved in the preparation of this investment research has provided services to the relevant issuer for remuneration, other than normal course investment advisory or trade execution services.
7	Canaccord Genuity intends to seek or expects to receive compensation for Corporate Finance/Investment Banking services from the relevant issuer in the next six months.
8	The authoring analyst, a member of the authoring analyst's household, or any individual directly involved in the preparation of this investment research, has a long position in the shares or derivatives, or has any other financial interest in the relevant issuer, the value of which increases as the value of the underlying equity increases.
9	The authoring analyst, a member of the authoring analyst's household, or any individual directly involved in the preparation of this investment research, has a short position in the shares or derivatives, or has any other financial interest in the relevant issuer, the value of which increases as the value of the underlying equity decreases.
10	Those persons identified as the author(s) of this investment research, or any individual involved in the preparation of this investment research, have purchased/received shares in the relevant issuer prior to a public offering of those shares, and such person's name and details are disclosed above.
11	A partner, director, officer, employee or agent of Canaccord Genuity and its affiliated companies, or a member of his/her household, is an officer, or director, or serves as an advisor or board member of the relevant issuer and/or one of its subsidiaries, and such person's name is disclosed above.
12	As of the month end immediately preceding the date of publication of this investment research, or the prior month end if publication is within 10 days following a month end, Canaccord Genuity or its affiliate companies, in the aggregate, beneficially owned 1% or more of any class of the total issued share capital or other common equity securities of the relevant issuer or held any other financial interests in the relevant issuer which are significant in relation to the investment research (as disclosed above).
13	As of the month end immediately preceding the date of publication of this investment research, or the prior month end if publication is within 10 days following a month end, the relevant issuer owned 1% or more of any class of the total issued share capital in Canaccord Genuity or any of its affiliated companies.
14	Other specific disclosures as described above.

Canaccord Genuity is the business name used by certain subsidiaries of Canaccord Financial Inc., including Canaccord Genuity Inc., Canaccord Genuity Limited, and Canaccord Genuity Corp.

The authoring analysts who are responsible for the preparation of this investment research are employed by Canaccord Genuity Corp. a Canadian broker-dealer with principal offices located in Vancouver, Calgary, Toronto, Montreal, or Canaccord Genuity Inc., a US broker-dealer with principal offices located in Boston, New York, San Francisco and Houston or Canaccord Genuity Limited., a UK broker-dealer with principal offices located in London and Edinburgh (UK).

In the event that this is compendium investment research (covering six or more relevant issuers), Canaccord Genuity and its affiliated companies may choose to provide specific disclosures of the subject companies by reference, as well as its policies and procedures regarding the dissemination of investment research. COMPANY DESCRIPTION:

Fortis Inc. is a diversified, international electric utility holding company with assets over \$12.5 billion. Regulated holdings include electric distribution utilities in Alberta, BC, Ontario, Newfoundland, PEI and three Caribbean countries and a natural gas utility in BC. Fortis owns non-regulated generation assets across Canada and in Belize and New York State. It also owns and operates hotels and commercial real estate in Canada.

All amounts in C\$ unless otherwise noted.

Our C\$33.00 target price is derived from a combination of valuation metrics that include earnings and dividend yields relative to long-term interest rates, dividend discount models and earnings and cash flow multiples relative to both historical valuation and Fortis' utility and pipeline peers.

Infrastructure -- Utilities**STEADY AND STABLE -- Q3 RESULTS IN-LINE****Investment recommendation**

Fortis Inc. reported third quarter earnings of \$0.24 per share versus \$0.23 reported in Q3/10, in line with expectations. The company's earnings have benefited from ~\$600 million of capital expenditures in the utility businesses this year, which has mainly been invested in western Canadian utility operations. In total, capex is forecast to reach \$1.2 billion for 2011 across all segments (\$806 million spent to date), and \$5.7 billion budgeted for the five-year period, 2011 through 2015. With approximately 90% of the company's earnings generated from utility operations, rate base additions within the utility segments are expected to be the primary drivers of earnings growth. As a result, we expect to see consistent and stable growth in earnings and dividends going forward. However, we note that the company continues to pursue acquisitions of U.S.-based utility assets which could potentially have an impact on future earnings growth. We are maintaining our HOLD rating and 12-month C\$33.00 target price.

Investment highlights

- Reported Q3 recurring EPS of \$0.24, in line with consensus
- Maintaining HOLD rating and C\$33.00 target price
- No changes to 2011 and 2012 EPS estimates
 - 2011 EPS estimate: \$1.70
 - 2012 EPS estimate: \$1.75
- Received a C\$18.8 million (\$11 million after-tax) termination fee for the unsuccessful Central Vermont Public Service (CVPS) acquisition bid
- Belize Electricity expropriation compensation proceedings are ongoing with the Belize government
 - \$112 million book value
 - No earnings recorded this quarter; \$2 million contribution in Q3 last year

Canaccord Genuity is the global capital markets group of Canaccord Financial Inc. (CF : TSX | CF. : AIM)

The recommendations and opinions expressed in this Investment Research accurately reflect the Investment Analyst's personal, independent and objective views about any and all the Designated Investments and Relevant Issuers discussed herein. For important information, please see the Important Disclosures section in the appendix of this document or visit Canaccord Genuity's [Online Disclosure Database](#).

Valuation

We are maintaining our 12-month target price for Fortis at C\$33.00. Our target price is derived from a combination of valuation metrics that include earnings and dividend yields relative to long-term interest rates, dividend discount models and earnings and cash flow multiples relative to both historical valuation and Fortis' utility and pipeline peers.

Outlook

We are making no changes to our 2011 and 2012 earnings per share estimates of \$1.70 and \$1.75, respectively. The company's capex program in the utilities segment, primarily in western Canada, has been the driving force of earnings growth this year, and should continue to do so through 2015. Fortis' capital expenditure budget remains unchanged with the company planning to spend \$5.7 billion from 2011 through 2015, of which \$4.8 billion is toward its electric and gas utilities (mainly in BC and Alberta). This should help provide relatively steady growth in earnings throughout the period. The company's Caribbean operations continue to face challenges which have limited the segment's contribution in recent years. Fortis has not received compensation for the Belize Electric assets expropriated in June this year. Proceedings to determine a value are ongoing and we note that the potential loss is limited to its book value (\$112 million net asset value or \$0.60 per share). While we believe the company will receive some compensation for Belize Electric, we do not expect a resolution in the near-term.

In addition to organic growth projects, the company continues to seek potential acquisitions. Although the company's recent offer for Central Vermont Public Service was not consummated, earnings and cash flow benefited from the \$18.8 million (US\$17.5 million) termination fee. More important, we were pleased to see management remain focused and disciplined and withdraw from the process when the transaction price was bid higher. Management continues to look for regulated natural gas and electric operations in the United States and believes it has the capability to finance up to a \$5 billion acquisition (enterprise value) on its balance sheet, but would consider a financial partner for larger acquisitions.

Third quarter earnings summary

Fortis reported third quarter recurring earnings per share of \$0.24, in line with both our and the consensus estimate of \$0.23. Regulated earnings were \$5 million (\$0.03 per share) higher compared to the same period last year. A bulk of the improvement was driven by rate base capital expenditures at FortisBC Energy (formerly Terasen) and Fortis Alberta. The increases were partially offset by the loss of ~\$2 million (\$0.01 per share) of earnings from the expropriation of Belize Electric. The company's non-regulated operations performed in line with last year during the same period. Note that we removed the one-time \$18.8 million (\$11 million after-tax) payment received from the termination of the CVPS Merger Agreement and \$2.5 million on unrealized non-cash foreign exchange gains. For the third quarter, the company reported net earnings per share of \$0.31 versus \$0.26 last year. For the first nine months of the year, the recurring earnings per share was \$1.30, ahead of the \$1.16 recorded last year. For additional details on third quarter results, please refer to Figure 1.

Noteworthy items

- CVPS termination fee CAD\$18.8 million
 - US\$17.5 million
 - Also received US\$2 million for transaction expenses
 - Acquired 160-room full-service Hilton Suites Winnipeg Airport hotel for \$25 million
 - Received municipal approval to construct \$50 million office building
 - 12-storeys in downtown St. John
 - Construction expected to be complete in 2H/13
 - Regulatory
 - Fortis BC Energy gas companies
 - Filed updated 2012-2013 rate applications in September 2011
 - Decision expected in late Q1/12
 - Filed application to amalgamate the three FortisBC Energy gas companies
 - Newfoundland Power completed the sale of joint-use poles back to Bell Aliant (BA : TSX | HOLD)
 - Will use funds to pay down debt
 - Caribbean Utilities
 - Expects to file 2012-2016 capital investment plan in Q4/11
 - Will sign PPAs to accept up to 13 MW of renewable power from IPPs
 - Fortis Turks and Caicos
 - Filed a request for a change in the rate structure and a 6% increase in base rates
 - Carbon tax expected to be implemented September 2011
 - Has not yet been implemented
-

SPECULATIVE: Stocks bear significantly higher risk that typically cannot be valued by normal fundamental criteria. Investments in the stock may result in material loss.

Canaccord Research Disclosures as of 3 November 2011

Company	Disclosure
Fortis Inc.	7
Bell Aliant Inc.	1A, 2, 7

- 1 The relevant issuer currently is, or in the past 12 months was, a client of Canaccord Genuity or its affiliated companies. During this period, Canaccord Genuity or its affiliated companies provided the following services to the relevant issuer:
 - A. investment banking services.
 - B. non-investment banking securities-related services.
 - C. non-securities related services.
- 2 In the past 12 months, Canaccord Genuity or its affiliated companies have received compensation for Corporate Finance/Investment Banking services from the relevant issuer.
- 3 In the past 12 months, Canaccord Genuity or any of its affiliated companies have been lead manager, co-lead manager or co-manager of a public offering of securities of the relevant issuer or any publicly disclosed offer of securities of the relevant issuer or in any related derivatives.
- 4 Canaccord Genuity acts as corporate broker for the relevant issuer and/or Canaccord Genuity or any of its affiliated companies may have an agreement with the relevant issuer relating to the provision of Corporate Finance/Investment Banking services.
- 5 Canaccord Genuity or any of its affiliated companies is a market maker or liquidity provider in the securities of the relevant issuer or in any related derivatives.
- 6 In the past 12 months, Canaccord Genuity, its partners, affiliated companies, officers or directors, or any authoring analyst involved in the preparation of this investment research has provided services to the relevant issuer for remuneration, other than normal course investment advisory or trade execution services.
- 7 Canaccord Genuity intends to seek or expects to receive compensation for Corporate Finance/Investment Banking services from the relevant issuer in the next six months.
- 8 The authoring analyst, a member of the authoring analyst's household, or any individual directly involved in the preparation of this investment research, has a long position in the shares or derivatives, or has any other financial interest in the relevant issuer, the value of which increases as the value of the underlying equity increases.
- 9 The authoring analyst, a member of the authoring analyst's household, or any individual directly involved in the preparation of this investment research, has a short position in the shares or derivatives, or has any other financial interest in the relevant issuer, the value of which increases as the value of the underlying equity decreases.
- 10 Those persons identified as the author(s) of this investment research, or any individual involved in the preparation of this investment research, have purchased/received shares in the relevant issuer prior to a public offering of those shares, and such person's name and details are disclosed above.
- 11 A partner, director, officer, employee or agent of Canaccord Genuity and its affiliated companies, or a member of his/her household, is an officer, or director, or serves as an advisor or board member of the relevant issuer and/or one of its subsidiaries, and such person's name is disclosed above.
- 12 As of the month end immediately preceding the date of publication of this investment research, or the prior month end if publication is within 10 days following a month end, Canaccord Genuity or its affiliate companies, in the aggregate, beneficially owned 1% or more of any class of the total issued share capital or other common equity securities of the relevant issuer or held any other financial interests in the relevant issuer which are significant in relation to the investment research (as disclosed above).
- 13 As of the month end immediately preceding the date of publication of this investment research, or the prior month end if publication is within 10 days following a month end, the relevant issuer owned 1% or more of any class of the total issued share capital in Canaccord Genuity or any of its affiliated companies.
- 14 Other specific disclosures as described above.

Canaccord Genuity is the business name used by certain subsidiaries of Canaccord Financial Inc., including Canaccord Genuity Inc., Canaccord Genuity Limited, and Canaccord Genuity Corp.

The authoring analysts who are responsible for the preparation of this investment research are employed by Canaccord Genuity Corp. a Canadian broker-dealer with principal offices located in Vancouver, Calgary, Toronto, Montreal, or Canaccord Genuity Inc., a US broker-dealer with principal offices located in Boston, New York, San Francisco and Houston or Canaccord Genuity Limited., a UK broker-dealer with principal offices located in London and Edinburgh (UK).

In the event that this is compendium investment research (covering six or more relevant issuers), Canaccord Genuity and its affiliated companies may choose to provide specific disclosures of the subject companies by reference, as well as its policies and procedures regarding the dissemination of investment research. To access this material or for more information, please send a request to Canaccord Genuity Research, Attn: Disclosures, P.O. COMPANY DESCRIPTION:

Fortis Inc. is a diversified, international utility company with assets over \$13.6 billion. Regulated holdings include electric distribution utilities in Alberta, BC, Ontario, Newfoundland, PEI and two Caribbean countries and a natural gas utility in BC. Fortis owns non-regulated generation assets across Canada and in Belize and Upper New York State. It also owns and operates hotels and commercial real estate in Canada.

All amounts in C\$ unless otherwise noted.

Infrastructure -- Utilities**Q4 RESULTS IN LINE; 2012 GROWTH POTENTIALLY HAMPERED BY COST OF CAPITAL REVIEW IN BC****Investment recommendation**

Fortis Inc. reported fourth quarter earnings per share of \$0.46, in line with the consensus estimate. The company's earnings continue to benefit from a high level of capital spending (about \$1 billion) at its utility operations in 2011, particularly at its Western Canadian utilities. While continued capital spending in 2012 should help improve earnings, the growth profile may be muted in the near term by the dilutive impact of its June 2011 10.3-million-share issuance and the November 2011 debenture conversion for 1.3 million shares. In addition, the British Columbia Utilities Commission (BCUC) is initiating a Generic Cost of Capital review that could potentially negatively impact the allowed return at its natural gas utility. Our \$1.75 EPS estimate for 2012 does not reflect a lower return that could arise from the BCUC's review. With its five-year capital budget of \$5.5 billion (most of which is anticipated to be spent at the company's electric utility operations), we expect to see consistent and stable growth in earnings and dividends over the medium term. The company continues to seek out acquisitions of US-based electric utility assets which could have an impact on future earnings growth. We are maintaining our HOLD rating and C\$33.00 target price.

Investment highlights

- HOLD rating and C\$33.00 target price maintained
- No change to 2012 and 2013 earnings estimates of \$1.75 and \$1.80, respectively
 - But possibility of lower returns on BC utilities could reduce 2012 EPS expectation
- Reported Q4/11 EPS of \$0.46 and full-year 2011 of \$1.67

Canaccord Genuity is the global capital markets group of Canaccord Financial Inc. (CF : TSX | CF. : AIM)

The recommendations and opinions expressed in this Investment Research accurately reflect the Investment Analyst's personal, independent and objective views about any and all the Designated Investments and Relevant Issuers discussed herein. For important information, please see the Important Disclosures section in the appendix of this document or visit Canaccord Genuity's [Online Disclosure Database](#).

Valuation

Our target price is derived from a combination of valuation metrics that include earnings and dividend yields relative to long-term interest rates, dividend discount models, and earnings and cash flow multiples relative to both historical valuation and Fortis' utility and pipeline peers.

Outlook

We are maintaining our 2012 and 2013 earnings estimates of \$1.75 and \$1.80 per share, respectively. A majority of the company's growth over the next few years will likely come from its regulated utility businesses, where the company plans to spend \$3.5 billion towards its electric utilities and \$1.3 billion towards its gas utilities through 2016. The remaining \$0.7 billion of its \$5.5 billion capital program is scheduled to be invested in non-regulated businesses (including the 335 MW, \$900 million Waneta Expansion Project – 51%-owned by Fortis). In addition, the company continues to look for US-based regulated electric acquisition opportunities. Fortis believes that it could manage an acquisition with an enterprise value up to \$5 billion, and would consider financial partners for larger acquisitions. While more recent transactions have occurred at higher valuations, we note that management maintains a disciplined approach, as evidenced by its refusal to enter a bidding war to acquire Central Vermont Public Service. With approximately 90% of its earnings generated from utility operations, Fortis holds a stable asset portfolio with modest earnings and dividend growth.

Earnings summary

Fortis reported fourth quarter earnings of \$0.46 per share, versus \$0.49 last year and in line with the consensus estimate. Regulated earnings were \$5 million (\$0.03 per share) higher compared to the same period last year. Most of the regulated earnings improvement was due to rate base additions at FortisBC Energy and Fortis Alberta. The increases were partially offset by unfavourable foreign exchange movements, as well as higher amortization expense at the company's Caribbean operations, which reduced earnings by \$2 million in the quarter. The company's non-regulated operations were lower due to higher taxes in the Properties division. While recurring earnings were slightly better than last year, the impact of a share issue in the second quarter of 2011 had a dilutive impact on the per-share results. For the full year, recurring earnings per share was \$1.67, ahead of \$1.61 recorded for the previous year. For additional details on the fourth quarter and full-year results, please refer to Figures 1 and 2.

Noteworthy items

- Capital expenditures
 - \$1.2 billion capex in 2011
 - \$1.3 billion to be spent in 2012
 - ~\$1 billion in regulated operations
 - \$5.5 billion expected from 2012 through 2016
 - Regulatory
 - Fortis Alberta
 - Lower allowed ROE for 2011 – 8.75%, down from 9% in 2010
 - Retroactive adjustment made in Q4/11 for \$2 million
-

- 2012 rate decision expected in first half of 2012
 - “Performance-base regulation” decision expected in 2012
 - Newfoundland Power
 - Suspended use of formula approach to calculate ROE
 - 2012 interim rate of 8.38%; pending review of actual cost of capital and risk profile
 - Could provide modest improvement in returns
 - FortisBC
 - Regulator announced a Generic Cost of Capital proceeding in November 2011
 - Gas and electric utility ROEs maintained pending outcome of the proceeding
 - Process expected to be outlined in the coming months
 - Potential for lower returns
 - Converted US\$40 million of convertible debentures into 1.4 million shares
 - Submitted compensation claim to Belize Government for expropriated Belize Electricity assets.
 - Received appraisal from government that was materially lower than Fortis’ independent valuation
 - No current plans to expropriate BECOL
 - Book value of \$154 million (\$0.82 per share)
-

% of total	(21.2%)	(21.8%)	

Result of continued rate base growth and lower than expected tax, financing and amortization expenses.

Unfavourable FX impact and higher amortization expense. No contribution from Belize Electricity - (its contribution in Q4/10 was a loss of \$0.5 M).

Higher corporate income tax partly offset by incremental earnings contribution from Winnipeg hotel acquisition in October 2011.

\$2 M accrual recognized in Q4 related to lower allowed return for 2011 at FortisAlbertra.

In line with 46¢ consensus estimate and slightly below our 49¢ estimate.

% of total	(28.0%)	(24.9%)	

Increased earnings from rate base growth including assets under construction; offset slightly from lower allowed ROE retroactively enacted for the full year in Q4 2011.

Increased rate base and increased contribution from non-regulated operations. Also includes favourable quarterly timing issues.

Does not include contribution from Belize Electricity which was expropriated in Q2 2011.

Includes, \$11 M after tax break-up fee for CVPS acquisition attempt; \$1.5 M earnings recognized in 2011 related to 2010 period; \$1.5 M of gain on sales.

Slightly below the consensus estimate and our estimate of \$1.70 per share.

Investment risks

Some of the specific risk factors that pertain to the projected 6- to 12-month stock price target for Fortis are as follows: (1) price movement in electricity rates and commodities used for electricity generation could impact profitability; (2) international operations have

currency rate exposure and liquidity risks associated with those currencies; (3) credit risk of contract counterparties could improve or deteriorate; (4) debt refinancing at different interest rates could impact the income of the company; (5) equipment failure or extreme weather conditions could adversely affect operating facilities; (6) change in public policy on environmental health and safety risk could impose unexpected costs on Fortis; (7) change in regulatory or political climate could impact profitability and future growth and development of Fortis; (8) the inability to maintain, or to renew, the collective bargaining agreements with unionized workers on acceptable terms could result in increased labour costs or service interruptions arising from labour disputes; (9) economic conditions, which may impact demand for products and services, peer group valuation, access to capital, and share trading liquidity; and (10) Fortis holds investments in commercial real estate and hotel properties which are subject to operating risks associated with the industry.

APPENDIX: IMPORTANT DISCLOSURES**Analyst Certification:**

Each authoring analyst of Canaccord Genuity whose name appears on the front page of this investment research hereby certifies that (i) the recommendations and opinions expressed in this investment research accurately reflect the authoring analyst's personal, independent and objective views about any and all of the designated investments or relevant issuers discussed herein that are within such authoring analyst's coverage universe and (ii) no part of the authoring analyst's compensation was, is, or will be, directly or indirectly, related to the specific recommendations or views expressed by the authoring analyst in the investment research.

6	In the past 12 months, Canaccord Genuity, its partners, affiliated companies, officers or directors, or any authoring analyst involved in the preparation of this investment research has provided services to the relevant issuer for remuneration, other than normal course investment advisory or trade execution services.
7	Canaccord Genuity intends to seek or expects to receive compensation for Corporate Finance/Investment Banking services from the relevant issuer in the next six months.
8	The authoring analyst, a member of the authoring analyst's household, or any individual directly involved in the preparation of this investment research, has a long position in the shares or derivatives, or has any other financial interest in the relevant issuer, the value of which increases as the value of the underlying equity increases.
9	The authoring analyst, a member of the authoring analyst's household, or any individual directly involved in the preparation of this investment research, has a short position in the shares or derivatives, or has any other financial interest in the relevant issuer, the value of which increases as the value of the underlying equity decreases.
10	Those persons identified as the author(s) of this investment research, or any individual involved in the preparation of this investment research, have purchased/received shares in the relevant issuer prior to a public offering of those shares, and such person's name and details are disclosed above.
11	A partner, director, officer, employee or agent of Canaccord Genuity and its affiliated companies, or a member of his/her household, is an officer, or director, or serves as an advisor or board member of the relevant issuer and/or one of its subsidiaries, and such person's name is disclosed above.
12	As of the month end immediately preceding the date of publication of this investment research, or the prior month end if publication is within 10 days following a month end, Canaccord Genuity or its affiliate companies, in the aggregate, beneficially owned 1% or more of any class of the total issued share capital or other common equity securities of the relevant issuer or held any other financial interests in the relevant issuer which are significant in relation to the investment research (as disclosed above).
13	As of the month end immediately preceding the date of publication of this investment research, or the prior month end if publication is within 10 days following a month end, the relevant issuer owned 1% or more of any class of the total issued share capital in Canaccord Genuity or any of its affiliated companies.
14	Other specific disclosures as described above.

Canaccord Genuity is the business name used by certain subsidiaries of Canaccord Financial Inc., including Canaccord Genuity Inc., Canaccord Genuity Limited, and Canaccord Genuity Corp.

The authoring analysts who are responsible for the preparation of this investment research are employed by Canaccord Genuity Corp. a Canadian broker-dealer with principal offices located in Vancouver, Calgary, Toronto, Montreal, or Canaccord Genuity Inc., a US broker-dealer with principal offices located in Boston, New York, San Francisco and Houston or Canaccord Genuity Limited., a UK broker-dealer with principal offices located in London and Edinburgh (UK).

In the event that this is compendium investment research (covering six or more relevant issuers), Canaccord Genuity and its affiliated companies may choose to provide specific disclosures of the subject companies by reference, as well as its policies and procedures regarding the dissemination of investment research. To access this material or for more information, please send a request to Canaccord Genuity Research, Attn:

Disclosures, P.O. Box 10337 Pacific Centre, 2200-609 Granville Street, Vancouver, BC, Canada V7Y 1H2 or disclosures@canaccordgenuity.com.

The authoring analysts who are responsible for the preparation of this investment research have received (or will receive) compensation based upon (among other factors) the Corporate Finance/Investment Banking revenues and general profits of Canaccord Genuity. However, such authoring analysts have not received, and will not receive, compensation that is directly based upon or linked to one or more specific Corporate Finance/Investment Banking activities, or to recommendations contained in the investment research.

Canaccord Genuity and its affiliated companies may have a Corporate Finance/Investment Banking or other relationship with the company that is the subject of this investment research and may trade in any of the designated investments mentioned herein either for their own account or the accounts of their customers, in good faith or in the normal course of market making. Accordingly, Canaccord Genuity or their affiliated companies, principals or employees (other than the authoring analyst(s) who prepared this investment research) may at any time have a long or short position in any such designated investments, related designated investments or in options, futures or other derivative instruments based thereon.

Some regulators require that a firm must establish, implement and make available a policy for managing conflicts of interest arising as a result of publication or distribution of investment research. This investment research has been prepared in accordance with Canaccord Genuity's policy on managing conflicts of interest, and information barriers or firewalls have been used where appropriate. Canaccord Genuity's policy is available upon request.

The information contained in this investment research has been compiled by Canaccord Genuity from sources believed to be reliable, but (with the exception of the information about Canaccord Genuity) no representation or warranty, express or implied, is made by Canaccord Genuity, its affiliated companies or any other person as to its fairness, accuracy, completeness or correctness. Canaccord Genuity has not independently verified the facts, assumptions, and estimates contained herein. All estimates, opinions and other information contained in this investment research constitute Canaccord Genuity's judgement as of the date of this investment research, are subject to change without notice and are provided in good faith but without legal responsibility or liability.

Canaccord Genuity's salespeople, traders, and other professionals may provide oral or written market commentary or trading strategies to our clients and our proprietary trading desk that reflect opinions that are contrary to the opinions expressed in this investment research. Canaccord Genuity's affiliates, principal trading desk, and investing businesses may make investment decisions that are inconsistent with the recommendations or views expressed in this investment research.

This investment research is provided for information purposes only and does not constitute an offer or solicitation to buy or sell any designated investments discussed herein in any jurisdiction where such offer or solicitation would be prohibited. As a result, the designated investments discussed in this investment research may not be eligible for sale in some jurisdictions. This investment research is not, and under no circumstances should be construed as, a solicitation to act as a securities broker or dealer in any jurisdiction by any person or company that is not legally permitted to carry on the business of a securities broker or dealer in that jurisdiction. This material is prepared for general circulation to clients and does not have regard to the investment objectives, financial situation or particular needs of any particular person. Investors should obtain advice based on their own individual circumstances before making an investment decision. To the fullest extent permitted by law, none of Canaccord Genuity, its affiliated companies or any other person accepts any liability whatsoever for any direct or consequential loss arising from or relating to any use of the information contained in this investment research.

For Canadian Residents: This Investment Research has been approved by Canaccord Genuity Corp., which accepts sole responsibility for this Investment Research and its dissemination in Canada. Canadian clients wishing to effect transactions in any Designated Investment discussed should do so through a qualified salesperson of Canaccord Genuity Corp. in their particular jurisdiction.

For United Kingdom Residents: This investment research is distributed in the United Kingdom, as third party research by Canaccord Genuity Limited, which is authorized and regulated by the Financial Services Authority. This research is for distribution only to persons who are Eligible Counterparties or Professional Clients only and is exempt from the general restrictions in section 21 of the Financial Services and Markets Act 2000 on the communication of invitations or inducements to engage in investment activity on the grounds that it is being distributed in the United Kingdom only to persons of a kind described in Article 19(5) (Investment Professionals) and 49(2) (High Net Worth companies, unincorporated associations etc) of the Financial Services and Markets Act 2000 (Financial Promotion) Order 2005 (as amended). It is not intended to be distributed or passed on, directly or indirectly, to any other class of persons. This material is not for distribution in the United Kingdom to retail clients, as defined under the rules of the Financial Services Authority.

For United States Residents: Canaccord Genuity Inc., a US registered broker-dealer, accepts responsibility for this Investment Research and its dissemination in the United States. This Investment Research is intended for distribution in the United States only to certain US institutional investors. US clients wishing to effect transactions in any Designated

Investment discussed should do so through a qualified salesperson of Canaccord Genuity Inc. Analyst(s) preparing this report that are not employed by Canaccord Genuity Inc are resident outside the United States and are not associated persons or employees of any US regulated broker-dealer. Such analyst(s) may not be subject to Rule 2711 restrictions on communications with a subject company, public appearances and trading securities held by a research analyst account.

For European Residents: If this Investment Research is intended for disclosure in any jurisdiction other than the United Kingdom, the US or Canada, then the relevant rules and regulatory requirements of that jurisdiction will apply.

COMPANY DESCRIPTION:

Fortis Inc. is a diversified, international utility company with assets over \$13.6 billion. Regulated holdings include electric distribution utilities in Alberta, BC, Ontario, Newfoundland, PEI and two Caribbean countries and a natural gas utility in BC. Fortis owns non-regulated generation assets across Canada and in Belize and Upper New York State. It also owns and operates hotels and commercial real estate in Canada.

All amounts in C\$ unless otherwise noted.

Infrastructure -- Utilities**SECOND TIME'S A CHARM? TO ACQUIRE NEW YORK-BASED UTILITY****Investment recommendation**

Fortis announced the acquisition of CH Energy Group (CHG : NYSE | Not Rated) for US\$1.5 billion, including the assumption of about US\$500 million of debt. The purchase price of US\$65/share in cash represents a 10.5% premium to the closing price of CH Energy's common shares on Friday, February 17, 2012. We believe that the acquisition could contribute \$0.02 or more per share to full-year earnings, depending on the final financing structure. The acquisition does not come as a major surprise since management has long indicated that it is seeking to expand into the US, where regulatory returns have generally been more attractive. We are maintaining our C\$33.00 target price and EPS estimates of \$1.75 and \$1.80 per share for 2012 and 2013, respectively, until further details are provided on permanent financing. Our HOLD rating is maintained.

Investment highlights

- Maintaining HOLD rating and C\$33.00 target price
- Acquiring CH Energy Group for US\$ 1.5 billion
 - Includes US\$500 million of debt
 - Represents ~1.45x regulated rate base; ~2x deemed equity
 - Expected to close in Q1/13
- 2012 and 2013 estimates unchanged
 - Depending on permanent financing, expected to be accretive by \$0.02 or more to annual EPS.

Canaccord Genuity is the global capital markets group of Canaccord Financial Inc. (CF : TSX | CF. : AIM)

The recommendations and opinions expressed in this Investment Research accurately reflect the Investment Analyst's personal, independent and objective views about any and all the Designated Investments and Relevant Issuers discussed herein. For important information, please see the Important Disclosures section in the appendix of this document or visit Canaccord Genuity's [Online Disclosure Database](#).

Valuation

Our target price is derived from a combination of valuation metrics that include earnings and dividend yields relative to long-term interest rates, dividend discount models, and earnings and cash flow multiples relative to both historical valuation and its utility and pipeline peers.

Summary

CH Energy Group is an electric and gas utility based in New York State with a regulated rate base of approximately \$1 billion, as well as non-regulated assets of approximately \$90 million. The \$1.5 billion consideration paid by Fortis represents a ~45% premium to the 2013 regulated rate base. We note that the premium to rate base, although rich, is in line with recent utility transactions in the United States. In addition, equity returns afforded in the US are relatively higher than those in Canada. CH Energy's current three-year rate plan ending 2013 provides for a 10% return on a 48% equity base. Depending on the permanent financing structure, we believe that the acquisition will be modestly accretive by \$0.02 or more to annual EPS. We note that, with the \$340 million common equity issue in 2011 (which was partly to be used to finance the failed Central Vermont Public Service acquisition), Fortis can take on a bit more leverage to finance the CH Energy purchase. However, we expect that Fortis would need to raise about \$500 million of equity to fund the acquisition, which could overhang the stock in the near term.

CH Energy's regulated utility has planned capital expenditures in excess of US\$100 million on average per year through 2016, although management expects capital expenditures could be modestly higher on average, which would represent an average annual 7.5% growth to rate base. Depending on interest rates used to finance a portion of the acquisition, we estimate that the returns could initially be around 6.5%, rising with rate base growth. The non-regulated assets represent a small portion of the business, and its earnings contributions are expected to be a couple of million dollars annually.

Fortis is very familiar with regulated assets, with almost 90% of its earnings generated from regulated operations in Canada and the Caribbean. The acquisition of CH Energy does not come as a surprise and is in line with the company's stated strategy to enter the US regulated utility arena (recall its interest in acquiring Central Vermont Public Service last year). If successful, this acquisition will be Fortis' first foray into the US, and may be a beachhead for additional US utility purchases in the future. Given the company previously indicated that it could complete US acquisitions with an enterprise value of up to \$5 billion on its own (and larger acquisitions with a financial partner), we do not rule out the possibility that Fortis could make further acquisitions of US-based utilities.

Acquisition details

- Acquiring CH Energy Group for US\$1.5 billion
 - Includes the assumption of US\$500 million debt
 - Purchasing CH Energy common shares at US\$65/share in cash
 - 10.5% premium to last close
 - ~\$20 million break fee
 - Regulated rate base ~US\$1 billion expected in 2013
 - Three-year rate settlement ending June 2013
 - 48% equity portion
 - 10% ROE through 2013
 - The assets:
 - Central Hudson Gas & Electric Corp.
 - Regulated electric and gas transmission and distribution utility
 - Operates in eight counties in the Mid-Hudson River Valley, NY
 - Regulated by the New York Public Service Commission
 - Debt rating/outlook
 - S&P: A/stable
 - Fitch: A/stable
 - Moody's: A3/stable
 - Electric business
 - 300,000 electric customers
 - 9,600 miles of distribution lines
 - 600 miles of transmission lines
 - 1,225 MW peak demand in 2011
 - 77% of regulated assets
 - Gas business
 - 75,000 natural gas customers
 - 1,900 miles of distribution pipelines
 - 160 miles of transmission pipelines
 - 115,807 Mcf peak demand in 2011
 - 23% of regulated assets
 - Griffith Energy Services
 - Fuel distribution company
 - Operates in 10 Mid-Atlantic states
 - US\$90 million assets
 - Closing subject to:
 - CH Energy shareholder approval
 - Regulatory approval
 - New York Public Service
 - Federal Energy Regulatory Commission
 - Hart-Scott Rodino Act waiting period
 - Customary closing conditions
-

Investment risks

Some of the specific risk factors that pertain to the projected 6- to 12-month stock price target for Fortis are as follows: (1) price movement in electricity rates and commodities used for electricity generation could impact profitability; (2) international operations have currency rate exposure and liquidity risks associated with those currencies; (3) credit risk of contract counterparties could improve or deteriorate; (4) debt refinancing at different interest rates could impact the income of the company; (5) equipment failure or extreme weather conditions could adversely affect operating facilities; (6) change in public policy on environmental health and safety risk could impose unexpected costs on Fortis; (7) change in regulatory or political climate could impact profitability and future growth and development of Fortis; (8) the inability to maintain, or to renew, the collective bargaining agreements with unionized workers on acceptable terms could result in increased labour costs or service interruptions arising from labour disputes; (9) economic conditions, which may impact demand for products and services, peer group valuation, access to capital, and share trading liquidity; and (10) Fortis holds investments in commercial real estate and hotel properties that are subject to operating risks associated with the industry.

APPENDIX: IMPORTANT DISCLOSURES**Analyst Certification:**

Each authoring analyst of Canaccord Genuity whose name appears on the front page of this investment research hereby certifies that (i) the recommendations and opinions expressed in this investment research accurately reflect the authoring analyst's personal, independent and objective views about any and all of the designated investments or relevant issuers discussed herein that are within such authoring analyst's coverage universe and (ii) no part of the authoring analyst's compensation was, is, or will be, directly or indirectly, related to the specific recommendations or views expressed by the authoring analyst in the investment research.

COMPANY DESCRIPTION:

Fortis Inc. is a diversified, international utility company with assets over \$13.6 billion. Regulated holdings include electric distribution utilities in Alberta, BC, Ontario, Newfoundland, PEI and two Caribbean countries and a natural gas utility in BC. Fortis owns non-regulated generation assets across Canada and in Belize and Upper New York State. It also owns and operates hotels and commercial real estate in Canada.

All amounts in C\$ unless otherwise noted.

Infrastructure -- Utilities**OPERATIONS PERFORMING WELL, BUT SOME EARNINGS UNCERTAINTY EXISTS****Investment recommendation**

We are maintaining our HOLD rating and C\$33.00 target price on the shares of Fortis. The company reported first quarter recurring earnings of \$0.66 per share, in line with our expectations and the consensus estimate. Overall, Fortis's businesses continue to perform well, with minor give and takes within the various operating segments during the quarter. We are lowering our 2012 earnings estimate by \$0.05 per share to \$1.70 to reflect lower expected earnings at FortisBC Electric due to the elimination of incentive earnings from the discontinuation of the performance-based, rate-setting (PBR) mechanism. We note that, although still achievable, EPS of \$1.75 this year would be at the high range of expectations. Our 2013 EPS estimate is unchanged at \$1.80. Beyond 2013, earnings should continue to benefit from the company's planned \$5.5 billion capital expenditure program (2012-2016), primarily in utility operations.

Valuation

Our target price is derived from a combination of valuation metrics that include earnings and dividend yields relative to long-term interest rates, dividend discount models, and earnings and cash flow multiples relative to both historical valuation and its utility and pipeline peers.

Investment highlights

- Q1 EPS of \$0.66, in line with \$0.67 consensus estimate
 - Higher rate base and strong hydrology at non-regulated Belize assets helped results
 - Absence of incentive earnings at FortisBC Electric and higher shares outstanding weighed on earnings
- Maintain HOLD rating and C\$33.00 target price
 - 2012 EPS estimate lowered to \$1.70 from \$1.75 due to the impact of elimination of PBR at FortisBC
 - 2013 EPS estimate unchanged at \$1.80
- BCUC Generic Cost of Capital Proceeding introduces 2013 EPS risk

Outlook

We are lowering our 2012 estimate to \$1.70 from \$1.75 to reflect slightly lower earnings expectations from the discontinuation of the PBR mechanism at FortisBC Electric. The PBR mechanism had allowed Fortis to share with ratepayers any cost savings the company achieved to allow it to earn above its regulated return. Note that we do not include any acquisition-related costs related to the pending \$1.5 billion purchase of CH Energy in our 2012 and 2013 EPS estimates.

Overall, Fortis's operations continue to perform in line with expectations. The company derives the majority of its earnings from regulated operations that can be influenced by changes in deemed returns and capital structure from regulatory decisions. While we are maintaining our 2013 EPS estimate of \$1.80, we note that there remains some uncertainty surrounding the British Columbia Utilities Commission's (BCUC) Generic Cost of Capital Proceeding. A decision from the BCUC is expected late in the year and could result in a lower allowed ROE at Fortis's BC operations beginning in 2013 (not retroactively). We estimate that the impact of a 100 bps decline at Fortis' BC utilities could reduce earnings by up to \$0.10 per share.

Fortis has a \$5.5 billion capital expenditure program through 2016, which should continue to drive earnings and dividend growth. In addition, the acquisition of CH Energy Group Inc. is expected to be immediately (albeit likely modestly) accretive once it closes (expected by the end of Q1/13). Although the company's balance sheet is strong with debt to total capital at ~55% (below its 60% target), the company will need to issue common equity to partially fund the purchase. We expect the company to access the equity market in late 2012 or early 2013, when the close of its acquisition of CH Energy becomes more certain.

First quarter earnings summary

Fortis reported first quarter recurring earnings of \$0.66, in line with our estimate and the consensus estimate. Note that our recurring earnings calculation does not include \$4 million of pre-tax costs related to the company's proposed acquisition

of CH Energy, or \$1.5 million of non-cash foreign exchange translation losses associated with the company's expropriated Belizean assets. Compared to Q1/11, earnings were flat. Rate-based growth in the western utility operations, and the timing of certain expenses at FortisBC Energy Companies, improved earnings; a return to normal hydrology in Belize also boosted the contribution from Fortis' non-regulated power generation segment. These factors were offset by lower earnings from FortisBC Electric due to the discontinuation of the PBR, the Caribbean utility operations that no longer receive contributions from Belize Electricity, which was expropriated by the Belize government in the second quarter of last year, and the dilutive impact of an 8% increase in the shares outstanding. For additional details on first quarter results, please refer to Figure 1.

Noteworthy items*Regulatory*

- BCUC Generic Cost of Capital decision expected in late 2012
 - Will not be retroactive
- Applications filed with state and federal regulators seeking approval of CH Energy acquisition
 - Expected close end of Q1/13
- FortisBC Electric – written hearing process to review prudence of ~\$29 million of capex
- Caribbean Utilities - US\$122 million of non-generation capex approved

Financing

- \$2 billion of unused credit facilities available for consolidated entity
- Newfoundland Power extended term of \$100 million credit facility by two years to August 2017
- FortisBC Electric extended term of \$150 million credit facility
 - \$100 million maturing in May 2015
 - \$50 million maturing in May 2013
- Requested increase for Corporate credit facility to \$1 billion from \$800 million, as per credit facility agreement
 - Increase expected in May 2012

Other

- No new developments in matters related to expropriated Belize assets
-

Investment risks

Some of the specific risk factors that pertain to the projected stock price target for Fortis are as follows: (1) price movement in electricity rates and commodities used for electricity generation could impact profitability; (2) international operations have currency rate exposure and liquidity risks associated with those currencies; (3) credit risk of contract counterparties could improve or deteriorate; (4) debt refinancing at different interest rates could impact the income of the company; (5) equipment failure or extreme weather conditions could adversely affect operating facilities; (6) change in public policy on environmental health and safety risk could impose unexpected costs on Fortis; (7) change in regulatory or political climate could impact profitability and future growth and development of Fortis; (8) the inability to maintain, or to renew, the collective bargaining agreements with unionized workers on acceptable terms could result in increased labour costs or service interruptions arising from labour disputes; (9) economic conditions, which may impact demand for products and services, peer group valuation, access to capital, and share trading liquidity; and (10) Fortis holds investments in commercial real estate and hotel properties that are subject to operating risks associated with the industry.

APPENDIX: IMPORTANT DISCLOSURES**Analyst Certification:**

Each authoring analyst of Canaccord Genuity whose name appears on the front page of this investment research hereby certifies that (i) the recommendations and opinions expressed in this investment research accurately reflect the authoring analyst's personal, independent and objective views about any and all of the designated investments or relevant issuers discussed herein that are within such authoring analyst's coverage universe and (ii) no part of the authoring analyst's compensation was, is, or will be, directly or indirectly, related to the specific recommendations or views expressed by the authoring analyst in the investment research.

Canaccord Genuity Ratings System:

BUY: The stock is expected to generate risk-adjusted returns of over 10% during the next 12 months.
HOLD: The stock is expected to generate risk-adjusted returns of 0-10% during the next 12 months.
SELL: The stock is expected to generate negative risk-adjusted returns during the next 12 months.
NOT RATED: Canaccord Genuity does not provide research coverage of the relevant issuer.

"Risk-adjusted return" refers to the expected return in relation to the amount of risk associated with the designated investment or the relevant issuer.

Risk Qualifier:

SPECULATIVE: Stocks bear significantly higher risk that typically cannot be valued by normal fundamental criteria. Investments in the stock may result in material loss.

Canaccord Genuity Research Disclosures as of 2 May 2012

Company	Disclosure
Fortis Inc.	7
1	The relevant issuer currently is, or in the past 12 months was, a client of Canaccord Genuity or its affiliated companies. During this period, Canaccord Genuity or its affiliated companies provided the following services to the relevant issuer: A. investment banking services. B. non-investment banking securities-related services. C. non-securities related services.
2	In the past 12 months, Canaccord Genuity or its affiliated companies have received compensation for Corporate Finance/Investment Banking services from the relevant issuer.
3	In the past 12 months, Canaccord Genuity or any of its affiliated companies have been lead manager, co-lead manager or co-manager of a public offering of securities of the relevant issuer or any publicly disclosed offer of securities of the relevant issuer or in any related derivatives.
4	Canaccord Genuity acts as corporate broker for the relevant issuer and/or Canaccord Genuity or any of its affiliated companies may have an agreement with the relevant issuer relating to the provision of Corporate Finance/Investment Banking services.
5	Canaccord Genuity or any of its affiliated companies is a market maker or liquidity provider in the securities of the relevant issuer or in any related derivatives.
6	In the past 12 months, Canaccord Genuity, its partners, affiliated companies, officers or directors, or any authoring analyst involved in the preparation of this investment research has provided services to the relevant issuer for remuneration, other than normal course investment advisory or trade execution services.
7	Canaccord Genuity intends to seek or expects to receive compensation for Corporate Finance/Investment Banking services from the relevant issuer in the next six months.
8	The authoring analyst, a member of the authoring analyst's household, or any individual directly involved in the preparation of this investment research, has a long position in the shares or derivatives, or has any other financial interest in the relevant issuer, the value of which increases as the value of the underlying equity increases.
9	The authoring analyst, a member of the authoring analyst's household, or any individual directly involved in the preparation of this investment research, has a short position in the shares or derivatives, or has any other financial interest in the relevant issuer, the value of which increases as the value of the underlying equity decreases.
10	Those persons identified as the author(s) of this investment research, or any individual involved in the preparation of this investment research, have purchased/received shares in the relevant issuer prior to a public offering of those shares, and such person's name and details are disclosed above.
11	A partner, director, officer, employee or agent of Canaccord Genuity and its affiliated companies, or a member of his/her household, is an officer, or director, or serves as an advisor or board member of the relevant issuer and/or one of its subsidiaries, and such person's name is disclosed above.
12	As of the month end immediately preceding the date of publication of this investment research, or the prior month end if publication is within 10 days following a month end, Canaccord Genuity or its affiliate companies, in the aggregate, beneficially owned 1% or more of any class of the total issued share capital or other common equity securities of the relevant issuer or held any other financial interests in the relevant issuer which are significant in relation to the investment research (as disclosed above).
13	As of the month end immediately preceding the date of publication of this investment research, or the prior month end if publication is within 10 days following a month end, the relevant issuer owned 1% or more of any class of the total issued share capital in Canaccord Genuity or any of its affiliated companies.
14	Other specific disclosures as described above.

Canaccord Genuity is the business name used by certain subsidiaries of Canaccord Financial Inc., including Canaccord Genuity Inc., Canaccord Genuity Limited, Canaccord Genuity Securities LLC, and Canaccord Genuity Corp.

The authoring analysts who are responsible for the preparation of this investment research are employed by Canaccord Genuity Corp. a Canadian broker-dealer with principal offices located in Vancouver, Calgary, Toronto, Montreal, or Canaccord Genuity Inc., a US broker-dealer with principal offices located in Boston, New York, San Francisco and Houston or Canaccord Genuity Securities LLC, a US broker-dealer with principal offices located in New York or Canaccord Genuity Limited., a UK broker-dealer with principal offices located in London and Edinburgh (UK).

In the event that this is compendium investment research (covering six or more relevant issuers), Canaccord Genuity and its affiliated companies may choose to provide specific disclosures of the subject companies by

reference, as well as its policies and procedures regarding the dissemination of investment research. COMPANY DESCRIPTION:

Fortis Inc. is a diversified, international utility company with assets over \$13.6 billion. Regulated holdings include electric distribution utilities in Alberta, BC, Ontario, Newfoundland, PEI and two Caribbean countries and a natural gas utility in BC. Fortis owns non-regulated generation assets across Canada and in Belize and Upper New York State. It also owns and operates hotels and commercial real estate in Canada.

All amounts in C\$ unless otherwise noted.
 Refer to page 2 for target price valuation methodology.

Infrastructure -- Utilities**RAISES EQUITY FOLLOWING CH ENERGY SHAREHOLDER APPROVAL OF ACQUISITION****Investment recommendation**

The shareholders of CH Energy voted 92% in favour of Fortis' acquisition of the New York natural gas and electric transmission and distribution utility at US\$65 per share. Also, Fortis announced a \$601 million bought deal offering of subscription receipts (\$691 million if the over-allotment is exercised) to fund a portion of the acquisition. Both announcements were expected and were previously factored into our financial analysis. The acquisition is expected to close in Q1/13 and is subject to approval by the Federal Energy Regulatory Commission, the Federal Trade Commission, and the Public Service Commission, along with other normal closing conditions. As announced in February, Fortis is paying \$1.5 billion (including the assumption of ~US\$500 million of debt), which we calculate to be about a 45% premium to rate base and 96% premium to equity. While we expect the acquisition to be accretive to annual earnings per share beginning in 2013, given the full price being paid for CH Energy, we estimate the accretion to be only a few cents per share on an annual basis (depending on the cost of permanent debt financing). With planned capital investments of \$100 million annually through 2016 into CH Energy's rate base, we expect the forecast return to improve over time.

Investment highlights

- Receives CH Energy shareholder approval for acquisition
 - US\$1.5 billion, includes US\$500 million debt assumption
 - Expected to close in Q1/13
- Acquisition expected to be slightly accretive to full year earnings
- \$601 million subscription receipt offering to partially fund the acquisition
- HOLD rating and C\$33.00 target price unchanged

Canaccord Genuity is the global capital markets group of Canaccord Financial Inc. (CF : TSX | CF. : AIM)

The recommendations and opinions expressed in this Investment Research accurately reflect the Investment Analyst's personal, independent and objective views about any and all the Designated Investments and Relevant Issuers discussed herein. Valuation

Our 12-month target price is derived from a combination of valuation metrics that include earnings and dividend yields relative to long-term interest rates, dividend discount models, and earnings and cash flow multiples relative to both historical valuation and its utility and pipeline peers.

Investment risks

Some of the specific risk factors that pertain to our projected 12-month stock price target for Fortis include, but are not limited to: (1) price movements in electricity rates and commodities used for electricity generation could impact profitability; (2) international operations have currency rate exposure and liquidity risks associated with those currencies; (3) credit risk of contract counterparties could improve or deteriorate; (4) debt refinancing at different interest rates could impact the income of the company; (5) equipment failure or extreme weather conditions could adversely affect operating facilities; (6) change in public policy on environmental health and safety risk could impose unexpected costs on Fortis; (7) change in regulatory or political climate could impact profitability and future growth and development of Fortis; (8) the inability to maintain, or to renew, the collective bargaining agreements with unionized workers on acceptable terms could result in increased labour costs or service interruptions arising from labour disputes; (9) economic conditions which may impact demand for products and services, peer group valuation, access to capital and share trading liquidity; (10) Fortis holds investments in commercial real estate and hotel properties which are subject to operating risks associated with the industry.

APPENDIX: IMPORTANT DISCLOSURES**Analyst Certification:**

Each authoring analyst of Canaccord Genuity whose name appears on the front page of this investment research hereby certifies that (i) the recommendations and opinions expressed in this investment research accurately reflect the authoring analyst's personal, independent and objective views about any and all of the designated investments or relevant issuers discussed herein that are within such authoring analyst's coverage universe and (ii) no part of the authoring analyst's compensation was, is, or will be, directly or indirectly, related to the specific recommendations or views expressed by the authoring analyst in the investment research.

Canaccord Genuity Ratings System:

BUY: The stock is expected to generate risk-adjusted returns of over 10% during the next 12 months.

HOLD: The stock is expected to generate risk-adjusted returns of 0-10% during the next 12 months.

SELL: The stock is expected to generate negative risk-adjusted returns during the next 12 months.

NOT RATED: Canaccord Genuity does not provide research coverage of the relevant issuer.

"Risk-adjusted return" refers to the expected return in relation to the amount of risk associated with the designated investment or the relevant issuer.

Risk Qualifier:

SPECULATIVE: Stocks bear significantly higher risk that typically cannot be valued by normal fundamental criteria. Investments in the stock may result in material loss.

Canaccord Genuity Research Disclosures as of 19 June 2012

Company	Disclosure
Fortis Inc.	7
1	The relevant issuer currently is, or in the past 12 months was, a client of Canaccord Genuity or its affiliated companies. During this period, Canaccord Genuity or its affiliated companies provided the following services to the relevant issuer: A. investment banking services. B. non-investment banking securities-related services. C. non-securities related services.
2	In the past 12 months, Canaccord Genuity or its affiliated companies have received compensation for Corporate Finance/Investment Banking services from the relevant issuer.
3	In the past 12 months, Canaccord Genuity or any of its affiliated companies have been lead manager, co-lead manager or co-manager of a public offering of securities of the relevant issuer or any publicly disclosed offer of securities of the relevant issuer or in any related derivatives.
4	Canaccord Genuity acts as corporate broker for the relevant issuer and/or Canaccord Genuity or any of its affiliated companies may have an agreement with the relevant issuer relating to the provision of Corporate Finance/Investment Banking services.
5	Canaccord Genuity or any of its affiliated companies is a market maker or liquidity provider in the securities of the relevant issuer or in any related derivatives.
6	In the past 12 months, Canaccord Genuity, its partners, affiliated companies, officers or directors, or any authoring analyst involved in the preparation of this investment research has provided services to the relevant issuer for remuneration, other than normal course investment advisory or trade execution services.
7	Canaccord Genuity intends to seek or expects to receive compensation for Corporate Finance/Investment Banking services from the relevant issuer in the next six months.
8	The authoring analyst, a member of the authoring analyst's household, or any individual directly involved in the preparation of this investment research, has a long position in the shares or derivatives, or has any other financial interest in the relevant issuer, the value of which increases as the value of the underlying equity increases.
9	The authoring analyst, a member of the authoring analyst's household, or any individual directly involved in the preparation of this investment research, has a short position in the shares or derivatives, or has any other financial interest in the relevant issuer, the value of which increases as the value of the underlying equity decreases.
10	Those persons identified as the author(s) of this investment research, or any individual involved in the preparation of this investment research, have purchased/received shares in the relevant issuer prior to a public offering of those shares, and such person's name and details are disclosed above.
11	A partner, director, officer, employee or agent of Canaccord Genuity and its affiliated companies, or a member of his/her household, is an officer, or director, or serves as an advisor or board member of the relevant issuer and/or one of its subsidiaries, and such person's name is disclosed above.
12	As of the month end immediately preceding the date of publication of this investment research, or the prior month end if publication is within 10 days following a month end, Canaccord Genuity or its affiliate companies, in the aggregate, beneficially owned 1% or more of any class of the total issued share capital or other common equity securities of the relevant issuer or held any other financial interests in the relevant issuer which are significant in relation to the investment research (as disclosed above).
13	As of the month end immediately preceding the date of publication of this investment research, or the prior month end if publication is within 10 days following a month end, the relevant issuer owned 1% or more of any class of the total issued share capital in Canaccord Genuity or any of its affiliated companies.
14	Other specific disclosures as described above.

Canaccord Genuity is the business name used by certain subsidiaries of Canaccord Financial Inc., including Canaccord Genuity Inc., Canaccord Genuity Limited, Canaccord Genuity Securities LLC, and Canaccord Genuity Corp.

The authoring analysts who are responsible for the preparation of this investment research are employed by Canaccord Genuity Corp. a Canadian broker-dealer with principal offices located in Vancouver, Calgary, Toronto, Montreal, or Canaccord Genuity Inc., a US broker-dealer with principal offices located in Boston, New York, San Francisco and Houston or Canaccord Genuity Securities LLC, a US broker-dealer with principal offices located in New York or Canaccord Genuity Limited., a UK broker-dealer with principal offices located in London and Edinburgh (UK).

In the event that this is compendium investment research (covering six or more relevant issuers), Canaccord Genuity and its affiliated companies may choose to provide specific disclosures of the subject companies by

reference, as well as its policies and procedures regarding the dissemination of investment research. To access this material or for more information, please send a request to Canaccord Genuity Research, Attn: Disclosures, P.O. Box 10337 Pacific Centre, 2200-609 Granville Street, Vancouver, BC, Canada V7Y 1H2 or disclosures@canaccordgenuity.com.

The authoring analysts who are responsible for the preparation of this investment research have received (or will receive) compensation based upon (among other factors) the Corporate Finance/Investment Banking revenues and general profits of Canaccord Genuity. However, such authoring analysts have not received, and will not receive, compensation that is directly based upon or linked to one or more specific Corporate Finance/Investment Banking activities, or to recommendations contained in the investment research.

Canaccord Genuity and its affiliated companies may have a Corporate Finance/Investment Banking or other relationship with the company that is the subject of this investment research and may trade in any of the designated investments mentioned herein either for their own account or the accounts of their customers, in good faith or in the normal course of market making. Accordingly, Canaccord Genuity or their affiliated companies, principals or employees (other than the authoring analyst(s) who prepared this investment research) may at any time have a long or short position in any such designated investments, related designated investments or in options, futures or other derivative instruments based thereon.

Some regulators require that a firm must establish, implement and make available a policy for managing conflicts of interest arising as a result of publication or distribution of investment research. This investment research has been prepared in accordance with Canaccord Genuity's policy on managing conflicts of interest, and information barriers or firewalls have been used where appropriate. Canaccord Genuity's policy is available upon request.

The information contained in this investment research has been compiled by Canaccord Genuity from sources believed to be reliable, but (with the exception of the information about Canaccord Genuity) no representation or warranty, express or implied, is made by Canaccord Genuity, its affiliated companies or any other person as to its fairness, accuracy, completeness or correctness. Canaccord Genuity has not independently verified the facts, assumptions, and estimates contained herein. All estimates, opinions and other information contained in this investment research constitute Canaccord Genuity's judgement as of the date of this investment research, are subject to change without notice and are provided in good faith but without legal responsibility or liability.

Canaccord Genuity's salespeople, traders, and other professionals may provide oral or written market commentary or trading strategies to our clients and our proprietary trading desk that reflect opinions that are contrary to the opinions expressed in this investment research. Canaccord Genuity's affiliates, principal trading desk, and investing businesses may make investment decisions that are inconsistent with the recommendations or views expressed in this investment research.

This investment research is provided for information purposes only and does not constitute an offer or solicitation to buy or sell any designated investments discussed herein in any jurisdiction where such offer or solicitation would be prohibited. As a result, the designated investments discussed in this investment research may not be eligible for sale in some jurisdictions. This investment research is not, and under no circumstances should be construed as, a solicitation to act as a securities broker or dealer in any jurisdiction by any person or company that is not legally permitted to carry on the business of a securities broker or dealer in that jurisdiction. This material is prepared for general circulation to clients and does not have regard to the investment objectives, financial situation or particular needs of any particular person. Investors should obtain advice based on their own individual circumstances before making an investment decision. To the fullest extent permitted by law, none of Canaccord Genuity, its affiliated companies or any other person accepts any liability whatsoever for any direct or consequential loss arising from or relating to any use of the information contained in this investment research.

For Canadian Residents: This Investment Research has been approved by Canaccord Genuity Corp., which accepts sole responsibility for this Investment Research and its dissemination in Canada. Canadian clients wishing to effect transactions in any Designated Investment discussed should do so through a qualified salesperson of Canaccord Genuity Corp. in their particular jurisdiction.

For United States Residents: Canaccord Genuity Inc. and Canaccord Genuity Securities LLC, US registered broker-dealers, accept responsibility for this Investment Research and its dissemination in the United States. This Investment Research is intended for distribution in the United States only to certain US institutional investors. US clients wishing to effect transactions in any Designated Investment discussed should do so through a qualified salesperson of Canaccord Genuity Inc. or Canaccord Genuity Securities LLC. Analyst(s) preparing this report that are not employed by Canaccord Genuity Inc. or Canaccord Genuity Securities LLC are resident outside the United States and are not associated persons or employees of any US regulated broker-dealer. Such analyst(s) may not be subject to Rule 2711 restrictions on communications with a subject company, public appearances and trading securities held by a research analyst account.

For United Kingdom and European Residents:

This investment research is distributed in the United Kingdom and elsewhere Europe, as third party research by Canaccord Genuity Limited, which is authorized and regulated by the Financial Services Authority. This research is for distribution only to persons who are Eligible Counterparties or Professional Clients only and is exempt from the general restrictions in section 21 of the Financial Services and Markets Act 2000 on the communication of invitations or inducements to engage in investment activity on the grounds that it is being distributed in the United Kingdom only to persons of a kind described in Article 19(5) (Investment Professionals) and 49(2) (High Net Worth companies, unincorporated associations etc) of the Financial Services and Markets Act 2000 (Financial Promotion) Order 2005 (as amended). It is not intended to be distributed or passed on, directly or indirectly, to any other class of persons. This material is not for distribution in the United Kingdom or elsewhere in Europe to retail clients, as defined under the rules of the Financial Services Authority.

For Jersey, Guernsey and Isle of Man Residents:

This research is sent to you by Collins Stewart (CI) Limited ("CSCI") for information purposes and is not to be construed as a solicitation or an offer to purchase or sell investments or related financial instruments. This research has been produced by a group company for circulation to its institutional clients and also CSCI. Its contents have been approved by CSCI and we are providing it to you on the basis that we believe it to be of interest to you. This statement should be read in conjunction with your client agreement, CSCI's current terms of business and the other disclosures and disclaimers contained within this research. If you are in any doubt, you should consult your financial adviser. CSCI is licensed and regulated by the Guernsey Financial Services Commission, the Jersey Financial Services Commission and the Isle of Man Financial Supervision Commission. CSCI is registered in Guernsey and is a wholly owned subsidiary of Canaccord Financial Inc.

COMPANY DESCRIPTION:

Fortis Inc. is a diversified, international utility company with assets over \$13.6 billion. Regulated holdings include electric distribution utilities in Alberta, BC, Ontario, Newfoundland, PEI and two Caribbean countries and a natural gas utility in BC. Fortis owns non-regulated generation assets across Canada and in Belize and Upper New York State. It also owns and operates hotels and commercial real estate in Canada.

All amounts in C\$ unless otherwise noted.

Infrastructure -- Utilities**STEADFAST OPERATIONS DELIVER ANOTHER STABLE QUARTER****Investment recommendation**

Fortis reported second quarter recurring earnings of \$0.32 per share, in line with our estimate as well as the consensus estimate of \$0.33. The company's operations are performing in line with no material surprises in the quarter. Approximately 90% of Fortis' earnings are provided by stable utility operations. Currently, the company is in the midst of a regulatory approval process for its acquisition of New York based utility, CH Energy. The \$1.5 billion acquisition is expected to close in the first quarter of 2013 and should be immediately accretive to earnings per share, excluding acquisition-related costs. Going forward, Fortis' earnings are expected to continue to grow through its utility businesses, mainly in western Canada where the bulk of its \$5.5 billion capital expenditure program is to be implemented through 2016. Note that the program increases to \$6 billion with the addition of CH Energy's capital expenditures if the acquisition is approved. We believe the shares are currently fairly valued and are maintaining our C\$34.00 target price and HOLD rating.

Investment highlights

- Q2 recurring earnings per share of \$0.32
 - In-line with expectations
- Operations in line
 - No change to 2012 and 2013 EPS estimates
- \$5.5 billion capital expenditure program expected to drive earnings growth through 2016
 - Integration of CH Energy could potentially add another \$500 million
- No change to C\$34.00 target price and HOLD rating

Valuation

Our 12-month target price is derived from a combination of valuation metrics that include earnings and dividend yields relative to long-term interest rates, dividend discount models, and earnings and cash flow multiples relative to both historical valuation and the company's utility and pipeline peers.

Canaccord Genuity is the global capital markets group of Canaccord Financial Inc. (CF : TSX | CF. : LSE)

The recommendations and opinions expressed in this research report accurately reflect the Investment Analyst's personal, independent and objective views about any and all the Designated Investments and Relevant Issuers discussed herein. For important information, please see the Important Disclosures section in the appendix of this document or visit Canaccord Genuity's [Online Disclosure Database](#).

Outlook

We are making no changes to our 2012 and 2013 earnings estimates of \$1.70 and \$1.80 per share, respectively. The company continues to progress with its \$5.5 billion capital expenditure program (for the 2012-2016 period) with \$511 million spent to date. Note that a majority (~85%) of the capital program will be invested in the company's Canadian utility operations, primarily in western Canada. This large capital spending program is expected to provide the bulk of EPS and dividend growth for the medium term.

On the regulatory front, Fortis currently faces a Generic Cost of Capital hearing at its BC utilities. Although the final outcome is uncertain, we suspect that the company's allowed return on equity may be adjusted downwards beginning in January 2013. A decision from the British Columbia Utilities Commission on the generic cost of capital is expected early next year, but the impact of the decision would likely be retroactive to January 1, 2013. Our estimates do not factor in lower allowed returns at Fortis' BC utilities, but we estimate that a 100 bps decline in the allowed ROE may impact 2013 earnings by up to \$0.07 per share.

The \$1.5 billion acquisition of CH Energy is currently under review by the Federal Energy Regulatory Commission, the Federal Trade Commission and the New York Public Service Commission, and is expected to close in Q1/13. We estimate the acquisition to be accretive by a few cents per share to annual earnings, excluding acquisition-related costs. If approved, the unit could potentially add another \$500 million of growth capex to Fortis' current \$5.5 billion capital expenditure program over the next five years.

Second quarter earnings summary

Fortis reported second quarter recurring earnings of \$0.32 per share, in line with both our estimate and the consensus estimate. Our calculation of recurring earnings adjusts for \$3 million of after tax acquisition costs as well as \$4.5 million of earnings from regulatory decisions related to Q1/12, but accrued in the second quarter. EPS in Q2/11 was \$0.31. The improvement was largely due to a \$6 million (\$0.03 per share) increase in earnings at FortisAlberta driven by rate base growth. In addition, the company's non-regulated hydro generation business in Belize benefitted from improved hydrology, increasing the segment's contribution by \$3 million compared to last year (although only modestly above the long term average). These increases were offset by mildly lower contributions from FortisBC energy companies, as well as the dilutive effect of the 10.3 million share issue in June 2011. All other operations were comparable y/y. YTD, the company has reported recurring earnings per share of \$1.00 compared to \$0.97 for the first half of 2011. For additional details on second quarter results, please refer to Figure 1.

Noteworthy items

- Capital expenditure plan
 - \$5.5 billion of capex from 2012 through 2016
 - Potential for \$500 million more if CH Energy acquisition is closed
 - 65% to be spent at regulated electricity operations
 - Mainly FortisAlberta and FortisBC Electric
 - 21% to be spent at regulated natural gas companies
 - 14% towards non-regulated operations
 - Utility acquisitions
 - In discussions with City of Kelowna to purchase the city's electricity distribution utility for >\$50 million
 - Fortis has been operating and maintaining the assets since 2000 and sells wholesale electricity to the utility already
 - Approximately 15,000 customers
 - Expected to close in Q1/13
 - Close subject to negotiation of definitive agreements and regulatory as well as municipal approvals
 - Exercised its option to acquire City of Port Colborne's electricity distribution assets for \$7 million in April 2012
 - Regulatory
 - FortisAlberta received a positive decision from the AUC denying the Central Alberta Rural Electrification Association's request to be entitled to service customers in overlapping service areas
-

Investment risks

Some of the specific risk factors that pertain to our projected 12-month stock price target for Fortis include, but are not limited to: (1) price movement in electricity rates and commodities used for electricity generation could impact profitability; (2) international operations have currency rate exposure and liquidity risks associated with those currencies; (3) credit risk of contract counterparties could improve or deteriorate; (4) debt refinancing at different interest rates could impact the income of the company; (5) equipment failure or extreme weather conditions could adversely affect operating facilities; (6) change in public policy on environmental health and safety risk could impose unexpected costs on Fortis; (7) change in regulatory or political climate could impact profitability and future growth and development of Fortis; (8) the inability to maintain, or to renew, the collective bargaining agreements with unionized workers on acceptable terms could result in increased labour costs or service interruptions arising from labour disputes; (9) economic conditions which may impact demand for products and services, peer group valuation, access to capital and share trading liquidity; (10) Fortis holds investments in commercial real estate and hotel properties which are subject to operating risks associated with the industry.

APPENDIX: IMPORTANT DISCLOSURES

This Research Report was prepared by the affiliate company in the Canaccord Group named on the cover page.

Analyst Certification:

Each authoring analyst of Canaccord Genuity whose name appears on the front page of this research hereby certifies that (i) the recommendations and opinions expressed in this research accurately reflect the authoring analyst's personal, independent and objective views about any and all of the designated investments or relevant issuers discussed herein that are within such authoring analyst's coverage universe and (ii) no part of the authoring analyst's compensation was, is, or will be, directly or indirectly, related to the specific recommendations or views expressed by the authoring analyst in the research.

Site Visit:

An analyst has visited Fortis's material operations in BC. No payment or reimbursement was received from the issuer for related travel costs.

Price Chart:***Distribution of Ratings:**

Global Stock Ratings
(as of 3 July 2012)

Rating	Coverage Universe		IB Clients
	#	%	%
Buy	590	60.9%	30.5%
Speculative Buy	88	9.1%	51.1%
Hold	263	27.1%	11.8%
Sell	28	2.9%	3.6%

Pipelines, Utilities, & Power

Fortis Inc.

Q4 Result Shows Growth Slowing Near-Term

- Fortis reported Q4'05 EPS of \$0.22 vs. our estimate of \$0.24 and \$0.22 in Q4'04. Growth is slowing in the near-term due to lower allowed returns and power prices. We are maintaining our Sector Performer rating and \$25 target price.
- The year 2005 was solid overall with normalized earnings up about 8% from the prior year. This year, Fortis faces headwinds as regulated ROEs fall by about 60 basis points. We are forecasting 2006 earnings in line with 2005.
- Growth should resume in 2007 due to major capital investments in regulated electrical utilities in Western Canada. Fortis will invest about \$450 million again in 2006.
- In our view, Fortis shares are now mostly reflecting the near-term pause in earnings growth. The P/E multiple has backed off to sector average. We recommend buying the stock on any further share price weakness.

CIBC World Markets does and seeks to do business with companies covered in its research reports. As a result, investors should be aware that the firm may have a conflict of interest that could affect the objectivity of this report.

Investors should consider this report as only a single factor in making their investment decision.

See "Important Disclosures" section at the end of this report for important required disclosures, including potential conflicts of interest.

See "Price Target Calculation" and "Key Risks to Price Target" sections at the end of this report, where applicable.

Investment Summary

Fortis reported Q4'05 EPS of \$0.22 vs. our estimate of \$0.24 and \$0.22 in Q4'04. Growth is slowing in the near term due to lower allowed returns and power prices. We are maintaining our Sector Performer rating and \$25 target price.

For a full breakdown and analysis of earnings by segment, please see the following appendix to this comment.

In summary, the Q4 result was slightly weak primarily due to the timing of expenses and revenue recognition in the Alberta electrical utility. The company was tracking to an achieved ROE far above the allowed ROE. As we anticipated, this run-rate was unsustainable and Q4 results came in below most expectations.

On the other hand, the year 2005 was solid overall with normalized earnings up about 8% from the prior year. We estimate Fortis earned attractive returns on equity of about 11% on the Alberta and British Columbia utilities. Also, abnormally high Ontario power prices drove earnings up in the generation segment.

This year Fortis faces headwinds as regulated ROEs and power prices will fall:

- Allowed returns on equity in Alberta and B.C. have fallen by about 60 basis points to 8.93% and 8.69%. Rate base growth will offset much of the reduction in return, but we are forecasting earnings flat for the Western utilities in 2006.
- Allowed returns on equity will also fall in the Maritimes. This will impact Newfoundland Power and Maritime Electric. Earnings in these divisions may remain flat in 2006 at best.
- Ontario power prices have fallen due to unusually warm weather. Fortis does not break out its Ontario power operations but we estimate the hydroelectric assets contributed \$45 million in revenue or \$0.28 in EPS in 2005. The contribution may decline by as much as \$0.05 this year.

Growth should resume in 2007 primarily due to major capital investments in regulated electrical utilities in Western Canada:

- Fortis will invest about \$450 million again in 2006, mostly on rate base additions in regulated utilities. Capital budgets in Alberta and B.C. are about \$190 million and \$110 million. On this basis, Western Utility rate base should grow by more than 14% in each of the next two years. Unless returns fall further, rate base growth will drive earnings growth.
- Belize is showing promise for growth in the generation and distribution segments. In generation, Fortis has completed a 7 MW dam that should double production. In distribution, we see annual sales growth of about 6%. The guaranteed rate reductions that offset this growth in the past have now ceased.

Fortis shares have weakened in recent months slightly more than the rest of the utility sector. In our view, Fortis shares are now mostly reflecting the near-term pause in earnings growth. The P/E multiple has backed off to sector average. Yet, we believe the medium and long-term earnings and dividend growth outlook is superior to most of the comparable stocks. We are maintaining our \$25 target price and recommend buying the stock on any further share price weakness.

Appendix: Summary of Q4'05 Results

Exhibit 1. Segmented Earnings for Fortis (financials in C\$ millions)

	Q4/05	Q4/04	2005	2004
Newfoundland Power	\$2.9	\$3.3	\$29.4	\$31.1
Maritime Electric	\$1.7	\$1.8	\$9.1	\$8.2

Fortis Properties	\$2.9	\$2.8	\$14.1	\$11.8
Corporate	(\$8.6)	(\$7.2)	(\$32.4)	(\$21.6)
Operating Earnings for Common	\$22.3	\$21.2	\$117.6	\$90.8
Unusual Items	\$0.0	\$0.0	\$19.4	\$0.0
Reported Earnings	\$22.3	\$21.2	\$137.0	\$90.8
Average Shares Outstanding (mln)	103.1	95.5	101.8	84.7
Operating EPS	\$0.22	\$0.22	\$1.16	\$1.07
Reported EPS	\$0.22	\$0.22	\$1.35	\$1.07

Note:

1. Unusual items in 2005 include \$8.6 million positive adjustment for tax-related matters at Fortis Alberta, and Cornwall Electric, \$1.4 million interest recovery from Newfoundland Power's tax settlement, \$2 million non-cash foreign exchange gain, and \$0.5 million restructuring charge in Corporate costs.

Source: Company reports and CIBC World Markets Inc.

Newfoundland Power

Newfoundland Power's Q4 earnings came in lower than last year, largely as a result of the change in the purchased power rate structure and 0.5% decrease in customer rates.

Maritime Electric

Maritime Electric's Q4 earnings were essentially flat compared to last year but full-year results increased by almost \$1 million. The improved results were primarily attributable to higher electricity rates (2% increase effective July 1, 2005) and lower interest costs (capitalized financed costs associated with 50 MW generating facility). The utility has filed a rates application, asking for 1.6% average increase effective July for rate base additions. This could offset any reduction in allowed ROE.

FortisOntario (Canadian Niagara Power, Cornwall Electric and Granite)

Higher operating costs (reallocated shared service costs from the non-regulated generation operations) were the main contributing factor behind FortisOntario's lower earnings in Q4 and full-year 2005. In September 2005, FortisOntario filed a rates application to increase T&D rates starting May 2006. The new rates are based on a 50%/50% debt/equity split with an allowed ROE of 9.0%. We believe the core utility has about \$40 million rate base.

FortisAlberta

The Alberta electric distribution utility's Q4 earnings were down by \$3.3 million y/y due to higher operating and amortization costs. The higher 2005 earnings primarily reflect a full year contribution. In mid-December 2005, FortisAlberta filed its 2006/7 rates application with forecasted capital expenditures of \$193 million.

FortisBC

Q4 earnings from the B.C. utility were down year-over-year due to lower accrued unbilled revenue and higher operating costs. On November 24, 2005,

FortisBC filed its 2006 rates application seeking a 5.9% rate increase. The application will be reviewed with the BCUC in February.

Regulated Utilities - Caribbean

Full-year earnings from Belize Electricity were up as a result of higher electricity rates (11% increase, effective July 1) and load sales (up 6% y/y). Foreign exchange rate impacts were also slightly favourable during the year.

Caribbean Utilities' (CUP.U-TSX, Not Rated) Q4 equity earnings were significantly up to operational and financial recovery from Hurricane Ivan (including \$8.2 million BI insurance claim).

The Cayman Islands Government and CUP have agreed to implement a surcharge of US\$0.89/KW-hr, (or a 4.68% base rates increase) to recover hurricane-related costs over a 3-year period (effective August). In addition, CUP has agreed to absorb about US\$3.6 million (including US\$0.5 million not covered by insurance).

License renewal discussions between the Government, Electrical Regulatory Authority and CUP resumed in November 2005 with the objective of obtaining a new license by the summer of 2006.

Fortis Generation

Earnings from Fortis' non-regulated generation segment were up by \$3.8 million in Q4 primarily as a result of higher wholesale power prices in Ontario and Upstate NY. The full-year results benefited from higher rainfall levels positively impacting production.

Fortis Properties

Earnings from Fortis' real estate operations in 2005 benefited from acquisitions (Western Canada hotels acquired in February) and organic expansion of the Delta Hotel St. John's (completed June 1).

Corporate

Full-year corporate costs were up over \$9 million year-over-year, mainly from higher financing charges and operating expenses.

Price Target Calculation

Our \$25 target price is based on a 19.2x multiple of our 2007 EPS forecast of \$1.30. It also implies a 2.6% dividend yield. The target P/E multiple is found at the higher end of the stock's historical trading range (10x-20x) but all of the pipelines and utilities are trading through peak historical multiples due to the low interest rate environment. Fortis has tended to trade at a 1-2x earnings multiple point discount to the Canadian utilities group but is now trading at a premium to the Canadian utility group.

Key Risks to Price Target

Fortis could fall short of our 2006 and 2007 earnings forecasts (and fail to meet our target price) for various reasons, including (but not limited to) the impact of negative regulatory decisions in Alberta and B.C., weak power prices in Ontario, low hydro flows, and tourism conditions (real estate division). In addition, the utility stocks are sensitive to changes in Canadian bond yields. If bond yields rise significantly, valuation in the sector will likely fall. Fortis can offset a potential rise in bond yields to some or a full extent through dividend growth.

Our EPS estimates are shown below:

	1 Qtr.	2 Qtr.	3 Qtr.	4 Qtr.	Yearly
2005 Prior	\$0.32A	\$0.30A	\$0.32A	\$0.24E	\$1.18E
2005 Current	\$0.32A	\$0.30A	\$0.03A	\$0.22A	\$1.16A
2006 Current	\$0.32E	\$0.32E	\$0.29E	\$0.26E	\$1.20E
2007 Current	--	--	--	--	\$1.30E

IMPORTANT DISCLOSURES:

Analyst Certification: Each CIBC World Markets research analyst named on the front page of this research report, or at the beginning of any subsection hereof, hereby certifies that (i) the recommendations and opinions expressed herein accurately reflect such research analyst's personal views about the company and securities that are the subject of this report and all other companies and securities mentioned in this report that are covered by such research analyst and (ii) no part of the research analyst's compensation was, is, or will be, directly or indirectly, related to the specific recommendations or views expressed by such research analyst in this report.

Potential Conflicts of Interest: Equity research analysts employed by CIBC World Markets are compensated from revenues generated by various CIBC World Markets businesses, including the CIBC World Markets Investment Banking Department within the Corporate and Leveraged Finance Division. Research analysts do not receive compensation based upon revenues from specific investment banking transactions. CIBC World Markets generally prohibits any research analyst and any member of his or her household from executing trades in the securities of a company that such research analyst covers. Additionally, CIBC World Markets generally prohibits any research analyst from serving as an officer, director or advisory board member of a company that such analyst covers.

In addition to 1% ownership positions in covered companies that are required to be specifically disclosed in this report, CIBC World Markets may have a long position of less than 1% or a short position or deal as principal in the securities discussed herein, related securities or in options, futures or other derivative instruments based thereon.

Recipients of this report are advised that any or all of the foregoing arrangements, as well as more specific disclosures set forth below, may at times give rise to potential conflicts of interest.

Important Disclosure Footnotes for Fortis Inc. (FTS)

- 2a Fortis Inc. is a client for which a CIBC World Markets company has performed investment banking services in the past 12 months.

Fortis Inc.

Raising Estimates On Belize Hydro Strength

- Fortis reported Q1'06 EPS of \$0.35 vs. our estimate of \$0.32 and \$0.32 in Q1'05. Earnings from a new hydro dam in Belize are higher than expected. We are raising our 2006/7 estimates by \$0.05 and maintaining our \$25 price target.
- Our view was that Fortis earnings would be relatively flat this year due to declining allowed returns and lower Ontario power prices. However, strong electricity sales growth in Alberta and a return to normal hydro levels in Belize are offsetting lower regulated returns.
- Looking forward to 2007 similar trends should drive more upside. Western utility rate base is rising by about 15% and Belize sales are still growing by about 6% annually.
- The consistent EPS growth means dividends will likely rise by 8% - 10% in the coming years. Dividend growth should slightly exceed earnings growth until the payout reaches about 60% in 2010. On this basis Fortis is one of the more attractive investments in our coverage universe.

CIBC World Markets does and seeks to do business with companies covered in its research reports. As a result, investors should be aware that the firm may have a conflict of interest that could affect the objectivity of this report.

Investors should consider this report as only a single factor in making their investment decision.

See "Important Disclosures" section at the end of this report for important required disclosures, including potential conflicts of interest.

See "Price Target Calculation" and "Key Risks to Price Target" sections at the end of this report, where applicable.

Investment Summary

Fortis reported Q1'06 EPS of \$0.35 vs. our estimate of \$0.32 and \$0.32 in Q1'05. Earnings from a new hydro dam in Belize are higher than expected. We are raising our 2006/7 estimates by \$0.05 and maintaining our \$25 target price.

For a full breakdown and analysis of earnings by segment, please see the appendix to this comment.

Alberta Sales; Belize Hydro Driving Small '06 Growth

Our view was that Fortis earnings would be relatively flat this year due to declining allowed returns and lower Ontario power prices. Two key factors are now pointing to modest growth this year:

- **Strong Alberta electricity sales** – Last week FortisAlberta reported earnings of \$9.5 million vs. only \$7.8 million in Q1'05. Under circumstances where sales growth continues to track above expectations, the company can earn a return that is higher than the regulated ROE.
- **Return to normal hydro in Belize** – Belize has experienced a few dry years but a return to normal hydro flows combined with the new Chalillo dam have driven sales from 7 GW-hrs in Q1'05 to 27 GW-hrs in Q1'06. Management expects the higher sales level to sustain going forward.

These factors cause us to raise our 2006 EPS estimate from \$1.20 to \$1.25. Weather is the only significant risk we see to these numbers. The Caribbean Utilities (CUP.U – TSX) and Belize Electricity earnings could be impacted by hurricane activity this summer/fall.

2007/8 Growth on Track Across the Board

Looking forward to 2007 and beyond, similar trends should drive more upside. We see improved earnings across most of the Fortis divisions starting next year:

- **Rate base growth in Alberta and B.C.** – We are forecasting annual rate base growth of about 15% in Alberta and B.C. Regulatory risks to achieving returns on this rate base appear manageable. Fortis is negotiating an operating cost incentive for British Columbia but capital investments and returns on those investments have largely been approved. Returns are formula-driven in Alberta and generally not controversial.
- **Sales growth in Belize** – Rates have stabilized in Belize but sales continue to grow. Our models show that with 5% - 6% sales growth, Belize Electricity should deliver annual earnings growth of almost \$2 million.
- **Improved returns in Ontario** – Fortis has applied for a 9.0% ROE on its regulated Ontario electricity utility (Canadian Niagara Power). We understand the achieved ROE has only been 5% - 6%. We believe the Ontario Energy Board will approve a higher return in the coming weeks. The increase could add \$1 - \$2 million in earnings starting in 2007.
- **Maritime Electric expanded rate base** – Maritime Electric constructed a \$50 million power plant that has been approved for rate base but not yet reflected in earnings. The utility's earnings should move up later this year with the plant making a full year contribution of almost \$2 million in 2007.

The consistent EPS growth we are forecasting at Fortis means dividends will likely rise by 8% - 10% later this year and in the coming years. Dividend growth should slightly exceed earnings growth until the payout reaches about 60% in 2010. On this basis Fortis is one of the more attractive investments in our coverage universe.

Appendix: Summary of Q1'06 Results

Exhibit 1. Segmented Earnings for Fortis (financials in C\$ millions)

	Q1/06A	Q1/05A	2006E	2005A
Newfoundland Power	\$10.7	\$13.0	\$29.6	\$29.4
Maritime Electric	\$2.1	\$2.1	\$9.5	\$9.1
FortisAlberta & FortisBC	\$21.3	\$16.7	\$58.8	\$53.7
FortisOntario	\$1.0	\$1.1	\$3.5	\$2.7
Belize Electricity	\$1.5	\$1.0	\$10.9	\$7.9
Caribbean Utilities	\$1.6	\$2.5	\$11.0	\$11.4
Fortis Generation	\$5.4	\$2.1	\$24.4	\$21.6
Fortis Properties	\$1.5	\$1.5	\$15.0	\$14.1
Corporate	(\$8.5)	(\$8.7)	(\$34.0)	(\$32.4)
Operating Earnings for Common	\$36.6	\$31.2	\$128.7	\$117.6
Unusual Items	\$0.0	\$7.9	\$0.0	\$19.4
Reported Earnings	\$36.6	\$39.1	\$128.7	\$137.0
Average Shares Outstanding (mln)	103.3	98.0	103.3	101.6
Operating EPS	\$0.35	\$0.32	\$1.25	\$1.16
Reported EPS	\$0.35	\$0.40	\$1.25	\$1.35

Note:

1. Unusual items in 2005 include \$8.6 million positive adjustment for tax-related matters at Fortis Alberta, and Cornwall Electric, \$1.4 million interest recovery from Newfoundland Power's tax settlement, \$2 million non-cash foreign exchange gain, and \$0.5 million restructuring charge in Corporate costs.

Source: Company reports and CIBC World Markets Inc.

Newfoundland Power

Newfoundland Power reported earnings of \$10.7 million, down \$2.3 million from the same period in 2005. The company changed to its revenue recognition policy to an accrual basis, and this reduced earnings by \$2 million compared to Q1/05. However, full year earnings should be comparable on a year-over-year basis.

Maritime Electric

Earnings for Maritime Electric were flat compared to Q1/05 at \$2.1 million. Electricity sales were down slightly, but were mainly offset by revenue increases due to a 2 percent basic electricity rate increase (effective July 1, 2005).

FortisOntario (Canadian Niagara Power, Cornwall Electric and Granite)

Earnings for FortisOntario were slightly lower than Q1/05 (\$1.0 million versus \$1.1 million last year). This was mainly the result of lower energy sales (due to milder temperatures) and higher reallocation of shared service costs from non-regulated generation operations. This was partially offset by savings from an early retirement program completed in Q4/05.

FortisAlberta

FortisAlberta reported earnings of \$9.5 million for the quarter, an increase of \$1.7 million compared to Q1/05. Sales were higher from consumption growth in the residential, commercial and industrial customer base as a result of the strong Alberta economy. This was partially offset by increasing expenses due to inflationary pressures on labour rates in the province.

FortisBC

First quarter earnings for FortisBC were \$2.9 million higher compared to the same period last year. The increase came primarily from a 5.9% interim refundable rate increase and customer growth. Lower operating costs came primarily from increased capitalized overhead of \$2.4 million, resulting from a change in estimating capitalized overhead (effective January 1, 2006).

Regulated Utilities – Caribbean

First quarter earnings for Belize Electricity increased by \$0.5 million quarter-over-quarter, primarily due to an 11 per cent increase in electricity rates (effective July 1, 2005) and higher electricity sales. Rates will now stabilize going forward.

Equity income from Caribbean Utilities fell by \$0.9 million, primarily due to an increase in fuel expense associated with the timing of previously deferred fuel costs.

Caribbean Utilities is currently meeting pre-Hurricane Ivan generation and sales levels, and expects to maintain or exceed these levels along with pre-Ivan customer base numbers by the end of 2006.

Fortis Generation

Earnings from Fortis' non-regulated generation segment were down \$4.6 million in Q1/06 as first quarter 2005 earnings included a \$7.9 million gain from the OPG settlement. Excluding this gain, earnings were \$3.3 million higher over Q1/05 as a result of increase production (largely in Belize) and lower finance charges and operating costs.

Fortis Properties

Earnings from Fortis' real estate division were flat compared to last year. Higher real estate and hospitality revenues were offset with higher operating, amortization and finance charges

Corporate

First quarter corporate expenses were slightly lower (\$0.2 million) compared to Q1/05. The reduction primarily came from lower finance charges (due to a repayment in March 2005) and reduced net unrealized foreign exchange losses. Fortis has minimal exposure to short-term interest rates.

Price Target Calculation

Our \$25 price target is based on a 18.5x multiple of our 2007 EPS forecast of \$1.35. It also implies a 2.9% dividend yield. The target P/E multiple is found at the higher end of the stock's historical trading range (10x-20x) but all of the pipelines and utilities are trading through peak historical multiples due to the low interest rate environment. Fortis has tended to trade at a 1-2x earnings multiple point discount to the Canadian utilities group but is now trading at a premium to the Canadian utility group.

Key Risks To Price Target

Fortis could fall short of our 2006 and 2007 earnings forecasts (and fail to meet our target price) for various reasons, including (but not limited to) the impact of negative regulatory decisions in Alberta and B.C., weak power prices in Ontario, low hydro flows, and tourism conditions (real estate division). In addition, the utility stocks are sensitive to changes in Canadian bond yields. If bond yields rise significantly, valuation in the sector will likely fall. Fortis can offset a potential rise in bond yields to some or a full extent through dividend growth.

Our EPS estimates are shown below:

	1 Qtr.	2 Qtr.	3 Qtr.	4 Qtr.	Yearly
2005 Current	\$0.32A	\$0.30A	\$0.32A	\$0.22A	\$1.16A
2006 Prior	\$0.32E	\$0.32E	\$0.29E	\$0.26E	\$1.20E
2006 Current	\$0.35A	\$0.32E	\$0.31E	\$0.27E	\$1.25E
2007 Prior	--	--	--	--	\$1.30E
2007 Current	--	--	--	--	\$1.35E

IMPORTANT DISCLOSURES:

Analyst Certification: Each CIBC World Markets research analyst named on the front page of this research report, or at the beginning of any subsection hereof, hereby certifies that (i) the recommendations and opinions expressed herein accurately reflect such research analyst's personal views about the company and securities that are the subject of this report and all other companies and securities mentioned in this report that are covered by such research analyst and (ii) no part of the research analyst's compensation was, is, or will be, directly or indirectly, related to the specific recommendations or views expressed by such research analyst in this report.

Potential Conflicts of Interest: Equity research analysts employed by CIBC World Markets are compensated from revenues generated by various CIBC World Markets businesses, including the CIBC World Markets Investment Banking Department within the Corporate and Leveraged Finance Division. Research analysts do not receive compensation based upon revenues from specific investment banking transactions. Pipelines, Utilities, & Power

Fortis Inc.

Normalized Q2 Results In Line

- Fortis reported normalized Q2/06 EPS of \$0.33 vs. our estimate of \$0.32 and \$0.30 in Q2/05. Hydro assets in Belize and Properties drove the improvement over last year. We are maintaining our estimates and Sector Performer rating.
- The Q2 results were somewhat tempered by the seasonality of earnings at Newfoundland Power. But the unregulated power generation (Belize hydro) and real estate (hotel expansions) businesses are driving modest earnings growth this year.
- Our normalized result could have been slightly lower (\$0.01 - \$0.02) had we excluded benefits in Properties from the reduction of future income tax liabilities. However, more normal Ontario power prices could have added the same amount back to earnings.
- This solid organic growth in earnings and dividends at Fortis should continue in to 2007. Trading at an 18.1x P/E multiple, however, the stock is fairly valued. Our \$25 target price and Sector Performer rating are unchanged.

Investment Summary

Fortis reported normalized Q2/06 EPS of \$0.33 vs. our estimate of \$0.32 and \$0.30 in Q2/05. Hydro generation assets in Belize and Properties segment results drove the improvement over last year. We are maintaining our estimates and Sector Performer rating.

For a full breakdown and analysis of earnings by segment, please see the appendix to this comment.

Belize Hydro and Real Estate Driving Modest '06 Growth

The Q2 results were somewhat tempered by new seasonality of earnings at Newfoundland Power that should balance out on a full-year basis. The unregulated power generation and real estate businesses more than offset the change in regulated utility reporting:

- **Fortis Generation** made a strong contribution, with normalized earnings of \$6 million, up from only \$3.2 million last year. Higher output in Belize is driving most of this year's earnings improvement due to a return to normal hydro flows and the operation of the Chalillo dam. With the Chalillo reservoir currently full, the higher sales level in Belize appears sustainable and should be able to offset near-term weakness from NY State production and lower Ontario power prices in 2H/06.
- We normalized the **Properties earnings** to \$6.5 million vs. \$4.8 million in Q2/06. Much of the upside in Q2 comes from lower future taxes. But we should see Hospitality revenues move up in the second half with recently completed hotel expansions.
- **Western utilities'** normalized earnings were slightly weak primarily due to the timing of rates adjustments and operating expenses associated with the approved settlements in Alberta and BC. However, sales continue to be strong (up 3% - 4% y/y), demonstrating the premium growth of the Western utility assets.

In summary, Fortis appears to be on track to deliver solid earnings growth in 2006. The Caribbean operations are recovering well in both Grand Cayman and Belize, although these earnings are still susceptible to hurricane risk in late Q3. So, weather may be a small risk to achieving our \$1.25 EPS estimate for 2006.

Outlook Intact for 2007 with Regulatory Certainty

Looking forward to 2007, we see improved earnings from most of Fortis' regulated utilities, as rate base growth and potentially higher returns deliver modest growth:

- **Alberta/B.C. Settlements Improve Earnings Visibility**– Recent rate settlements approved for 2006/7 should largely solidify earnings growth into 2007. Capital spending in Alberta (about \$200 million annually) over the next 2 years has been approved, with returns on those investments formula driven. The B.C. utility may boost its achieved returns with PBR cost-sharing beginning in 2007.
- **Higher Returns from FortisOntario** – Canadian Niagara Power earnings should rise with a higher allowed ROE (9%). We believe that the approved rates increase could add \$1- \$2 million in annual earnings for 2007.
- **Rate Base Growth in Maritime Electric** – The utility's earnings should move up next year, as rate-base growth (\$50 mln plant addition) should more than offset flat 10% allowed returns.

Slowing growth in Belize is the only area of new concern for 2007. With the economy moderating, regulated electric utility Belize Electricity saw only 1% sales growth in Q2 vs. about 5% growth in recent years. We are hopeful that improved sales and cost savings in the western Canadian utilities can offset any downside to our 2007 Belize Electricity forecast.

Stock Fairly Valued Given Visible Growth and Risks

We see steady earnings growth from Fortis, as capital re-investment, particularly in the western utilities, translates into additional earnings. This visible earnings growth profile should support annual dividend growth of about 10% until Fortis' payout ratio reaches the 60% level in 2009 or 2010 at the latest. We believe that the dividend growth will result in steady share price appreciation.

On the other hand, Fortis stock is not cheap given its asset base. The stock trades in line with the Canadian utility group at a P/E multiple of about 18.1x. Given organic growth, Fortis could ultimately trade at a premium to the group. However, this premium may already be reflected in the company's sustainable earnings. In April 2009 FortisOntario loses water rights to 75MW of capacity at the Rankine generating station. Excluding the \$0.10 - \$0.20 in EPS we believe Rankine contributes now, the stock trades at more like 20x earnings.

Meanwhile, aggressive growth plans continue to challenge the Fortis balance sheet. Including preference shares, the balance sheet stands at about 67% debt compared to most utilities at about 60%. We believe rating agencies will tolerate a relatively high debt level while the company expands its western asset base. However, in our opinion a common equity issuance in 2007 is likely.

Following the Q2 earnings report, our \$25 target price is unchanged. It is based on an 18.5x multiple of our 2007 EPS estimate of \$1.35. This valuation metric is in line with a Canadian utility group that is mostly in good financial condition and with visible growth in the coming years.

Appendix: Summary of Q2'06 Results

Exhibit 1. Segmented Earnings for Fortis (financials in C\$ millions)

	Q2/06A	Q2/05A	2006E	2005A
Newfoundland Power	\$8.0	\$10.1	\$29.4	\$29.4
Maritime Electric	\$2.2	\$2.3	\$9.5	\$9.1
FortisAlberta & FortisBC	\$14.7	\$13.2	\$59.2	\$53.7
FortisOntario	\$0.5	\$0.9	\$3.5	\$2.7
Belize Electricity	\$2.3	\$1.9	\$9.2	\$7.9
Caribbean Utilities	\$2.1	\$3.1	\$8.5	\$11.4
Fortis Generation	\$6.0	\$3.2	\$25.3	\$21.6
Fortis Properties	\$6.5	\$4.8	\$18.5	\$14.1
Corporate	(\$8.3)	(\$8.1)	(\$33.6)	(\$32.4)
Operating Earnings for Common	\$34.0	\$31.4	\$129.5	\$117.6
Unusual Items	\$3.9	\$6.8	\$3.9	\$19.4
Reported Earnings	\$37.9	\$38.2	\$133.4	\$137.0
Average Shares Outstanding (mln)	103.4	103.2	103.5	101.6
Operating EPS	\$0.33	\$0.30	\$1.25	\$1.16
Reported EPS	\$0.37	\$0.37	\$1.29	\$1.35

Note:

1. Unusual items in Q2/06 include a \$1.6 million after-tax gain on the sale of Days Inn Sydney, a \$1.6 million unrealized FX gain and a \$0.7 million after-tax gain on insurance.
2. Unusual items in 2005 include \$8.6 million positive adjustment for tax-related matters at Fortis Alberta, and Cornwall Electric, \$1.4 million interest recovery from Newfoundland Power's tax settlement, \$2 million non-cash foreign exchange gain, and \$0.5 million restructuring charge in Corporate costs.

Source: Company reports and CIBC World Markets Inc.

Newfoundland Power

Newfoundland Power reported earnings of \$8 million in Q2/06, down \$2.1 million from the same period in 2005. This decrease was mainly due to a change in revenue recognition policy from a billed basis to an accrual basis (initiated in January 2006). The impact of this change was \$3.2 million in Q2. While first half earnings have been reduced by the policy change, second half earnings are expected to increase by a similar amount.

Maritime Electric

Earnings for Maritime Electric in Q2/06 were essentially flat compared to the same period in 2005. Higher revenues from a basic electricity rate increase were offset by higher finance charges in the quarter.

FortisOntario

Earnings for FortisOntario were \$0.5 million, a decrease of \$0.4 million compared to Q2/05. Improved revenues from higher electricity rates were offset by higher operating costs (reallocation costs) and corporate taxes.

FortisAlberta

Second quarter normalized earnings were down \$4.8 million compared to Q2/05, primarily due to a 1.9 percent decrease in electricity rates (2006/07 Negotiated Settlement Agreement) and higher finance costs to fund the capital-expenditure program. We expect the utility will resume growth in 2007.

FortisBC

Normalized earnings at FortisBC for the second quarter were \$3.6 million, down from the same period in 2005, mainly due to higher energy supply costs, amortization and finance charges.

Regulated Utilities – Caribbean

Q2/06 earnings for Belize Electricity were up \$0.4 million from the same period in 2005, primarily due to an 11 per cent increase in electricity rates (effective July 1, 2005) and modestly higher electricity sales, partially offset by higher energy supply costs and foreign currency impacts.

Equity income from Caribbean Utilities were \$2.1 million in Q2/06, down \$1 million from Q2/05 due to a positive adjustment in 2005 related to a change in revenue recognition policy. Excluding this item, earnings were essentially flat year over year.

Fortis Generation

Second quarter normalized earnings from Fortis' non-regulated generation segment were up \$2.8 million from the same period in 2005. Higher energy sales (Belize and Upper New York State hydro flows) and lower finance costs more than offset the impact of lower average wholesale energy prices in Ontario.

Fortis Properties

Excluding the gain on the sale of Days Inn Sydney, earnings for Q2/06 were \$1.7 million higher than Q2/05, primarily due to lower corporate taxes (from a reduction of future income tax liability balances). Higher hospitality revenues were offset by acquisition/expansion costs.

Corporate

Normalizing for foreign exchange impacts, corporate expenses were essentially flat year over year (\$8.3 million in Q2/06 versus \$8.1 million in Q2/05). For the quarter, lower inter-company interest revenue was partially offset by higher corporate income tax recovery.

Pipelines, Utilities, & Power

Fortis Inc.

Caribbean Acquisition Should Be Slightly Positive For the Stock

- Fortis announced it has acquired electric utilities in the Turks and Caicos Islands. We see the deal as a positive development adding modest incremental growth. However, the deal does not add sufficient value to justify a change in our \$25 target price.
- The company's expertise in operating electrical utilities in the Caribbean positions it as the logical owner of these assets. We see further opportunities for consolidation in the region as Mirant has announced the sale of its utility assets on several islands.
- The earnings accretion from the deal is modest (\$0.02 - \$0.03) if financed with an appropriate long-term equity mix. However, the company has financed it for now 100% with debt. Therefore, we estimate it will add about \$0.05 to our 2007 EPS forecast.
- Some new equity will likely be required during 2007, though our estimate excludes any for now. Moreover, we think the Turks asset modestly increases the company risk profile. Therefore, despite the strategic fit and upward earnings revision, we are not changing our price target.

CIBC World Markets does and seeks to do business with companies covered in its research reports. As a result, investors should be aware that the firm may have a conflict of interest that could affect the objectivity of this report.

Investors should consider this report as only a single factor in making their investment decision.

See "Important Disclosures" section at the end of this report for important required disclosures, including potential conflicts of interest.

See "Price Target Calculation" and "Key Risks to Price Target" sections at the end of this report, where applicable.

Investment Summary

Fortis announced it has acquired electric utilities in the Turks and Caicos Islands. The acquisition price is US\$90 million including US\$20 million of assumed debt. The utility has 35 MW of diesel-fired generation and serves 7,500 customers mostly on Providenciales. Fortis used its credit facilities to complete the transaction.

Good Strategic Fit

The company's expertise in operating electrical utilities in the Caribbean positions it as the logical owner of these assets. Fortis already owns the electrical transmission and distribution utility in Belize. It also owns a 38% interest in Caribbean Utilities on Grand Cayman Island.

From a strategic standpoint, therefore, the acquisition makes sense – scale in the region can help improve operations, contain customer rates and reduce the duration and magnitude of any hurricane impacts. In fact, we see further opportunities for consolidation in the region as Mirant (MIR – NYSE, Not Rated) has announced it plans to sell its utility assets on several islands including Jamaica, Bahamas and Trinidad.

We have reviewed the Mirant assets and think the Bahamian assets may be a good fit for Fortis. The Jamaican assets are by far the largest in the package, but available financial information suggests earnings have been depressed and inconsistent. We have no financial information on the Bahamian assets but Mirant's disclosure suggests that its 55% of the utility might be slightly larger than the Turks assets. The Grand Bahama Power Company has 151 MW of generation and serves 19,000 customers.

The Turks asset fits the Fortis growth profile as well as its geographic footprint. We understand electricity sales on the island have increased at an annual average rate of 15% over the past five years. Changes in the development pattern on the island – from small accommodations to large luxury hotels – should continue driving growth in the future.

Modest But Positive Earnings Accretion

The deal parameters and key facts driving earnings impacts can be summarized as follows:

- The Turks and Caicos utility operates under a 17.5% allowed return on assets (pre and post tax).
- The regulated asset base is about US\$50 million.
- Therefore, the total return on capital is about $17.5\% \times \text{US\$50m} = \text{US\$8.75m}$. Subtracting interest on the US\$20 mln debt derives earnings of about US\$7.0 million.
- Fortis paid US\$70 million for the equity or about 2.0x book value and 10x earnings.

The earnings accretion from the deal is modest (\$0.02 - \$0.03) if financed with an appropriate long-term equity mix. However, the company has financed it for now 100% with debt. Therefore, we estimate it will add about \$0.05 to our 2007 EPS forecast.

Offsetting Considerations – Hurricane Risk and Equity Issuance

The Turks assets, like all Caribbean assets, could be impacted for extended periods by hurricanes. The company has business interruption insurance, but we believe that a significant hurricane could nevertheless depress earnings and

result in cash costs for rebuilding transmission and distribution networks. We understand the poles are mostly constructed of wood – like they are in Belize – and are therefore more vulnerable to damage than the concrete polls used on Grand Cayman.

For valuation purposes, the increased risk profile offsets incremental earnings to some extent. The high allowed return on assets drives earnings accretion. But at the same time, we believe it is important to bear in mind that the high return is there to compensate for a real risk. If there were less weather risk associated with the assets, the return and earnings accretion would be lower.

We also consider the appropriate long-term financing mix for the acquisition in our valuation. The Turks utility assets should probably be financed with at least 50% equity. In fact, our models show that Fortis Corporation as a whole will be pushing its maximum 70% debt+pref ratio with this deal. Therefore, some new equity will likely be required during 2007, though our estimate excludes any for now.

In summary, we see the acquisition as modestly positive for the stock, largely for strategic reasons with the potential for added growth and other acquisition announcements in the Caribbean near-term. However, since we think the Turks asset modestly increases the company risk profile, we are not changing our \$25 target price.

Price Target Calculation

Our \$25 target price is based on a 17.9x multiple of our 2007 EPS forecast of \$1.40. It also implies a 2.9% dividend yield. The target P/E multiple is found at the higher end of the stock's historical trading range (10x-20x) but all of the pipelines and utilities are trading through peak historical multiples due to the low interest rate environment. Fortis has tended to trade at a 1-2x earnings multiple point discount to the Canadian utilities group but is now trading at a premium to the Canadian utility group and may continue to do so given its superior near-term growth profile.

Key Risks to Price Target

Fortis could fall short of our 2006 and 2007 earnings forecasts (and fail to meet our target price) for various reasons, including (but not limited to) the impact of negative regulatory decisions in Alberta and B.C., weak power prices in Ontario, low hydro flows, and tourism conditions (real estate division). In addition, the utility stocks are sensitive to changes in Canadian bond yields. If bond yields rise significantly, valuation in the sector will likely fall. Fortis can offset a potential rise in bond yields to some or a full extent through dividend growth.

IMPORTANT DISCLOSURES:

Analyst Certification: Each CIBC World Markets research analyst named on the front page of this research report, or at the beginning of any subsection hereof, hereby certifies that (i) the recommendations and opinions expressed herein accurately reflect such research analyst's personal views about the company and securities that are the subject of this report and all other companies and securities mentioned in this report that are covered by such research analyst and (ii) no part of the research analyst's compensation was, is, or will be, directly or indirectly, related to the specific recommendations or views expressed by such research analyst in this report.

Potential Conflicts of Interest: Equity research analysts employed by CIBC World Markets are compensated from revenues generated by various CIBC World Markets businesses, including the CIBC World Markets Investment Banking Department within the Corporate and Leveraged Finance Division. Research analysts do not receive compensation based upon revenues from specific investment banking transactions. CIBC World Markets generally prohibits any research analyst and any member of his or her household from executing trades in the securities of a company that such research analyst covers. Additionally, CIBC World Markets generally prohibits any research analyst from serving as an officer, director or advisory board member of a company that such analyst covers.

In addition to 1% ownership positions in covered companies that are required to be specifically disclosed in this report, CIBC World Markets may have a long position of less than 1% or a short position or deal as principal in the securities discussed herein, related securities or in options, futures or other derivative instruments based thereon.

Recipients of this report are advised that any or all of the foregoing arrangements, as well as more specific disclosures set forth below, may at times give rise to potential conflicts of interest.

Fortis Inc.

Cost Cutting Paces Strong Q3 Results

- Fortis reported normalized Q3/06 EPS of \$0.37 vs. our estimate of \$0.31 and \$0.32 in Q3/05. Operating cost reductions and lower income tax rates drove most of the upside surprise. Cost savings appear sustainable, so we are raising our 2006 and 2007 EPS estimates.
- The company's tax rate in Q3 was about 14% vs. 30% previously. Most of the reduction relates to a change to the taxes payable method of accounting in Alberta. Essentially, the company converted cash future income taxes to earnings.
- Operating cost reductions at the regulated Western Canadian and Ontario utilities compounded the positive tax benefits. We believe that the company will continue earning a premium to allowed ROEs at least through 2007.
- We are raising our 2007 EPS forecast from \$1.40 to \$1.45. Our price target of \$26 (previously \$25) is based on a sector-average 18x multiple. This valuation balances premium growth against the company's relatively low balance-sheet equity ratio.

CIBC World Markets does and seeks to do business with companies covered in its research reports. As a result, investors should be aware that the firm may have a conflict of interest that could affect the objectivity of this report.

Investors should consider this report as only a single factor in making their investment decision.

See "Important Disclosures" section at the end of this report for important required disclosures, including potential conflicts of interest.

See "Price Target Calculation" and "Key Risks to Price Target" sections at the end of this report, where applicable.

Investment Summary

Fortis reported normalized Q3/06 EPS of \$0.37 vs. our estimate of \$0.31 and \$0.32 in Q3/05. Operating cost reductions and lower income tax rates drove most of the upside surprise. Cost savings appear sustainable, so we are raising our 2006 and 2007 EPS estimates.

For a full breakdown and analysis of earnings by segment, please see the appendix to this comment.

Lower Tax Rate May Overstate Growth This Year

Fortis booked a 14% tax rate for accounting purposes in the quarter, but it is running at a 33% rate for the full year so far. Earnings would have been in line with our estimate had the company booked a more historically normal tax rate. This development begs the question of whether earnings are improved due to fundamental business growth or just due to tax planning.

The answer to this question requires a closer examination of the Fortis Alberta earnings, where income taxes were actually negative in the quarter despite reporting strong pre-tax profits. The reduction at Alberta relates to a switch to the taxes payable method of accounting in Alberta. Last year in the first nine months, Fortis Alberta reported about \$8.7 million in future income taxes that did not show up in earnings but did boost cash flow. This year, the company essentially converted that cash future income taxes to earnings.

In the sense that Fortis Alberta has merely converted cash flow to earnings, nothing has changed in the business relative to last year. In fact, revenues are down at Fortis Alberta on a year-over-year basis (up slightly after adjusting for some unusual items).

Other evidence on the Fortis consolidated cash-flow statement also suggests that improvements in business fundamentals are limited this year. Cash flow for the first nine months of the year is actually down, even before non-cash operating working capital. We believe that this situation is somewhat temporary, in that cash flows should begin growing again soon with new, regulated investments. We are merely pointing out that the earnings growth in 2006 probably overstates the extent of improved business fundamentals this year.

Capital Investments and Cost Cuts Paying Off

There is little doubt that growth is still present in the company, though, even absent the lower tax rates. Investments in Alberta and British Columbia regulated utilities are paying off with a high degree of certainty. Also, hydroelectric revenues in Belize have risen with added capacity.

The company's cost-cutting efforts are even more impressive. Operating cost reductions at the regulated Western Canadian and Ontario utilities compounded the positive tax benefits and were achieved in an environment of significant labour cost escalation. As a result, we believe that the company will continue earning a premium to allowed ROEs at least through 2007.

The growth from both lower taxes and improved operations drives our upward EPS revisions. We are raising our 2006 EPS forecast from \$1.25 to \$1.35 and our 2007 EPS forecast from \$1.40 to \$1.45. Fortis has continued achieving premium growth despite relatively low Ontario power prices that probably dampened earnings by about \$0.05.

Valuation – Premium Growth vs. Relatively High Debt

Our price target on Fortis considers not only the premium growth and strong management team, but also the relatively high level of debt and debt equivalents and potential loss of earnings from Ontario power assets. The growth rates are impressive and are a testament to the company's deep and accomplished team. We believe that the company is positioned for success in future growth through organic means and acquisitions.

On the other hand, the company has about 31% common equity on the balance sheet while most of the other Canadian pipeline and utility companies now carry at least 40% common equity. It will also lose about \$0.10 in EPS in 2009, when a lease on Ontario hydroelectric assets (Ranking Dam) runs out.

Therefore, our target price of \$26 (previously \$25) is based on a sector-average 18x multiple. This valuation balances premium growth against the company's relatively low balance sheet equity ratio. The target justifies our Sector Performer rating on the stock.

Appendix: Summary of Q3'06 Results

Exhibit 1. Segmented Earnings for Fortis (financials in C\$ millions)

	Q3/06A	Q3/05A	2006E	2005A

Operating EPS	\$0.37	\$0.32	\$1.35	\$1.16
Reported EPS	\$0.38	\$0.36	\$1.40	\$1.35

Note:

1. Unusual item in Q3/06 includes a \$0.7 million gain from insurance proceeds on NY Hydro asset. Other unusual items in 2006 include a \$1.6 million after-tax gain on the sale of Days Inn Sydney, a \$1.6 million unrealized FX gain and a \$0.7 million after-tax gain on insurance.
2. Unusual items in 2005 include \$8.6 million positive adjustment for tax-related matters at Fortis Alberta, and Cornwall Electric, \$1.4 million interest recovery from Newfoundland Power's tax settlement, \$2 million non-cash foreign exchange gain, and \$0.5 million restructuring charge in Corporate costs.

Source: Company reports and CIBC World Markets Inc.

Newfoundland Power

Newfoundland Power reported earnings of \$2.6 million in Q3/06 versus \$3.4 million in Q3/05. This decrease was mainly due to higher energy supply costs, partially offset by increased earnings from the change to an accrual basis of revenue recognition (initiated in January 2006). The impact of this change was \$0.2 million in the quarter.

Maritime Electric

Earnings for Maritime Electric in the third quarter of 2006 were essentially flat compared to Q3/05. Revenues were higher from a basic electricity rate increase, offset by increased amortization costs and higher finance charges associated with the company's capital expenditure program.

FortisOntario

Normalized earnings for FortisOntario in the third quarter were \$1.1 million higher than Q3/05. Earnings improved mainly due to higher electricity rates, which came into effect May 2006 and lower operating expenses.

FortisAlberta

Third-quarter results were \$3.0 million higher than for the same period in 2005. Lower effective corporate income taxes and an increase in energy deliveries were partially offset by a 1.9 percent decrease in distribution rates, higher operating expenses, amortization costs and finance charges.

FortisBC

FortisBC reported third quarter earnings of \$5.7 million, \$1.1 million higher than in Q3/05. Improved earnings primarily came from an increase in electricity rates, higher electricity sales and lower operating expenses. This was partially offset by higher energy supply costs (due to new PBR mechanism), increased amortization and finance costs.

Regulated Utilities – Caribbean

Q3/06 earnings for Belize Electricity were up \$0.6 million from the same period in 2005, mainly due to higher electricity sales and lower finance charges.

Fortis Generation

Third quarter normalized earnings from Fortis Generation were essentially flat compared to Q3/05. Higher energy sales in Belize and lower effective corporate income taxes were offset by lower realized energy prices in Ontario.

Fortis Properties

Earnings were \$1.4 million higher versus Q3/05 mainly due to the contribution of expansions in Holiday Inn Sarnia, Kitchener-Waterloo and Blue Cross Centre as well as lower effective corporate income taxes.

Turks and Caicos Utilities

Fortis acquired the utilities on August 28, 2006 and earnings from the utilities were immediately accretive to earnings.

Corporate

Corporate expenses were higher year-over-year mainly due to decreased unrealized foreign exchange gains, increased finance charges and higher operating expenses, partially offset by higher corporate income tax recovery.

Price Target Calculation

Our \$26 target price is based on a 17.9x multiple of our 2007 EPS forecast of \$1.45. It also implies a 2.9% dividend yield. The target P/E multiple is found at the higher end of the stock's historical trading range (10x-20x) but all of the pipelines and utilities are trading through peak historical multiples due to the low interest rate environment. Fortis has tended to trade at a 1-2x earnings multiple point discount to the Canadian utilities group but is now trading at a premium to the Canadian utility group and may continue to do so given its superior near-term growth profile.

Key Risks to Price Target

Fortis could fall short of our 2006 and 2007 earnings forecasts (and fail to meet our target price) for various reasons, including (but not limited to) the impact of negative regulatory decisions in Alberta and B.C., weak power prices in Ontario, low hydro flows, and tourism conditions (real estate division). In addition, the utility stocks are sensitive to changes in Canadian bond yields. If bond yields rise significantly, valuation in the sector will likely fall. Fortis can offset a potential rise in bond yields to some or a full extent through dividend growth.

Our EPS estimates are shown below:

	1 Qtr.	2 Qtr.	3 Qtr.	4 Qtr.	Yearly
2005 Current	\$0.32A	\$0.30A	\$0.32A	\$0.22A	\$1.16A

2006 Current	\$0.35A	\$0.33A	\$0.37A	\$0.31E	\$1.35E
2007 Prior	--	--	--	--	\$1.40E
2007 Current	--	--	--	--	\$1.45E

IMPORTANT DISCLOSURES:

Analyst Certification: Each CIBC World Markets research analyst named on the front page of this research report, or at the beginning of any subsection hereof, hereby certifies that (i) the recommendations and opinions expressed herein accurately reflect such research analyst's personal views about the company and securities that are the subject of this report and all other companies and securities mentioned in this report that are covered by such research analyst and (ii) no part of the research analyst's compensation was, is, or will be, directly or indirectly, related to the specific recommendations or views expressed by such research analyst in this report.

Potential Conflicts of Interest: Equity research analysts employed by CIBC World Markets are compensated from revenues generated by various CIBC World Markets businesses, including the CIBC World Markets Investment Banking Department within the Corporate and Leveraged Finance Division. Research analysts do not receive compensation based upon revenues from specific investment banking transactions. CIBC World Markets generally prohibits any research analyst and any member of his or her household from executing trades in the securities of a company that such research analyst covers. Additionally, CIBC World Markets generally prohibits any research analyst from serving as an officer, director or advisory board member of a company that such analyst covers.

In addition to 1% ownership positions in covered companies that are required to be specifically disclosed in this report, CIBC World Markets may have a long position of less than 1% or a short position or deal as principal in the securities discussed herein, related securities or in options, futures or other derivative instruments based thereon.

Recipients of this report are advised that any or all of the foregoing arrangements, as well as more specific disclosures set forth below, may at times give rise to potential conflicts of interest.

Important Disclosure Footnotes for Fortis Inc. (FTS)

- 2a Fortis Inc. is a client for which a CIBC World Markets company has performed investment banking services in the past 12 months.
- 2c CIBC World Markets Inc. has managed or co-managed a public offering of securities for Fortis Inc. in the past 12 months.
- 2e CIBC World Markets Inc. has received compensation for investment banking services from Fortis Inc. in the past 12 months.
- 2g CIBC World Markets Inc. expects to receive or intends to seek compensation for investment banking services from Fortis Inc. in the next 3 months.
- 7 CIBC World Markets Corp., CIBC World Markets Inc., and their affiliates, in the aggregate, beneficially own 1% or more of a class of equity securities issued by Fortis Inc.

Pipelines, Utilities, & Power

Fortis Inc.

Pace Of Earnings Growth Unsustainable

- Fortis shares have achieved premium valuation as EPS growth has recently exceeded expectations. We see growth and valuation at current levels as unsustainable so are downgrading our rating to Sector Underperformer from Sector Performer, effective November 27.
- Actions that have caused upside earnings surprises this year have driven the stock but may not create long-term value. EPS growth has come from utilities earning in excess of allowed ROEs, financing acquisitions with debt equivalents, and reducing reliance on Canadian regulated assets.
- With Fortis shares trading at all-time highs, we see major acquisition activity as a near-term risk to the stock. Given the company's relatively thin balance sheet equity ratio, a significant acquisition would likely require large equity issuance and could pressure credit ratings.
- Fortis used to trade at a discount to the pipeline and utilities group due to Caribbean and unregulated exposure. This discount could re-emerge as the business mix is again moving away from regulated Canadian utilities.

Investment Conclusion

Good things happen to good companies so with Fortis (FTS-SU) shares outperforming the market and peer group this year, the temptation is to call business as usual and leave it at that. As in anything that seems too good to be true though, a reality check sometimes turns up surprises. Fortis is still a good company, but a more in-depth analysis of its financial position indicates recent earnings may overstate the sustainable growth rate. Or, sustaining current growth may require taking on more risky assets and making large acquisitions that could create an oversupply of equity, sending the shares lower near term. Given these views, we are maintaining our \$26.00 price target but downgrading our rating to Sector Underperformer from Sector Performer, effective November 27.

Composition Of 2006 Growth Reveals Concerns

Actions that have caused upside earnings surprises this year have driven the stock but may not create long-term value. Growth is coming primarily from three different areas:

1. **EPS growth has come from utilities earning in excess of allowed returns on equity (ROE).** In particular, Fortis Alberta appears to be generating earnings well above the regulated return. For the first nine months of the year, the subsidiary reported earnings of \$33 million. Yet, in a rates filing from December 12, 2005, the company showed that the 8.93% allowed ROE on a normal 37% equity ratio would only generate \$25.2 million for the full year. Our model suggests the company is tracking toward a 13% achieved ROE this year. The difference between the allowed ROE and achieved ROE is worth about \$0.11 in EPS this year. While some part of the improved ROE likely comes from the company's outstanding efforts in containing costs, we believe that much of it comes from tax planning outside the regulated utility construct. Either way, we do not believe achieving such premiums to the allowed return is sustainable. In 2007 or 2008 at the latest, we believe the Alberta customers and regulator will seek to adjust rates reflecting actual costs and causing downward pressure on the achieved returns. It is harder to know when corporate tax planning measures will expire, but difficult to imagine such initiatives could add several hundred basis points to achieved ROEs on an ongoing basis.

Exhibit 1. Allowed And Achieved ROEs At Fortis Alberta

Source: Company reports and CIBC World Markets Inc.

2. **Acquisitions have been financed with debt equivalents, causing EPS accretion at the expense of the company's balance sheet equity ratio.** In recent months, Fortis has made three acquisitions. It acquired a 100% interest in the Turks and Caicos electric utility for US\$90 million, a 100% interest in four Western Canadian hotels for \$51.6 million, and an additional 16% of Caribbean Utilities (CUP.U-TSX) for about \$56 million. In financing these acquisitions, the company issued \$125 million of preference shares and US\$40 million of subordinated convertible debentures. Our modeling shows the company's equity ratio having moved down this year by about 200 basis points to below 31% — the thinnest equity ratio in the peer group by a significant margin. With allowed equity ratios in the Western Canadian utilities of 36% in Alberta and 40% in B.C., we had anticipated the balance sheet would continue the strengthening trend it began last year. However, events of this year have reversed course.

Exhibit 2. Equity Ratio Of Fortis From 2001–2006

Source: Company reports and CIBC World Markets Inc.

3. **The proportion of Canadian regulated assets in the business mix is declining again.** Having spent two years building up its reliance on relatively low-risk Canadian regulated utility assets, Fortis is now moving back away from this business mix. Between 2002 and 2004, Fortis managed to boost its proportion of Canadian regulated utility earnings from 52% to 71%. This year, regulated returns on Canadian assets are declining while the company has acquired additional stakes in Caribbean and unregulated assets. As a result, we forecast that Canadian regulated utilities will make up only 54% of total earnings by 2007.

Premium Valuation May Be At Risk

Fortis used to trade at a discount and now trades at a premium to its peer group. The management performance at Fortis justifies a premium, having achieved superior growth over time in earnings and dividends. The valuation is at risk, in our view, not because of management but because of relative balance sheet weakness and recent deterioration in the quality of its asset mix.

Earnings multiple comparisons, particularly those based on basic earnings per share, do not fully highlight the extent of premium on Fortis shares. The stock is trading at about 19.5x our 2007 EPS estimate versus a group average of about 19.0x. But the common equity ratio at Fortis is only about 30% versus a group average of about 45%. The gap in balance sheet strength has two important implications:

1. **The company trades at a significant EV/EBITDA premium to its comparable peers.** We calculate the multiple on Fortis at around 10.8x versus around 9.0x for most of the other Canadian pipelines and utilities (Enbridge (ENB-SP) is the notable exception trading over 11.0x EBITDA).
2. **With significant debt equivalents on its balance sheet, Fortis has a material gap between basic and diluted earnings per share.** For the first nine months of 2006, the difference was \$0.04 in EPS when the preference shares and convertible debentures were included in the fully diluted calculation. The gap between basic and fully diluted earnings will likely grow next year as the company issued additional convertible debentures during the fourth quarter. Since we do not believe the preference shares or convertible debentures will be converted, we use a basic EPS calculation in deriving our estimates. However, we acknowledge that when using basic EPS estimates, the P/E multiple on the stock should be discounted somewhat due to a relatively weak balance sheet.

While valuation metrics are expanding, a trend is emerging back to a more heavy reliance on earnings from Caribbean utility assets and unregulated businesses. In late 2003, when Fortis acquired regulated electrical utility in Western Canada, we argued the stock would probably see expansion in valuation metrics due to an improvement in its asset mix. Indeed, the company used this argument as a rationale for the acquisition, despite its anticipated near-term earnings dilution.

The company delivered on its promise to reduce its risk profile, and in 2004, Canadian regulated assets delivered over 70% of total company earnings. Recent acquisitions of Caribbean assets and real estate assets, combined with new investments in Caribbean hydroelectric generation, have again altered the company's profile but this time in the reverse. We now anticipate Canadian regulated assets will only deliver 54% of total earnings in 2007 (see Exhibit 3 for model details).

Fortis shares used to trade at a discount to the pipeline and utilities group due to Caribbean and unregulated exposure. From the late 1990s until the acquisition of Western Canadian assets in late 2003, the stock tended to trade at a 2.0-point P/E multiple discount. It now trades at a slight P/E premium. The P/E multiple discount could re-emerge as the business mix is again moving away from relatively low-risk assets.

Exhibit 4. Fortis P/E Multiple Compared To Canadian Utility Group

Source: Company reports and CIBC World Markets Inc.

Acquisition Targets Back In Focus

Fortis has grown successfully through acquisition as much or more than any other Canadian utility company. It has succeeded more than most in creating value through acquisitions as well. Now that the Western Canadian utility assets have been fully integrated, we believe management will be actively seeking targets.

With a presence now in Western Canada, a move into the Pacific Northwest of the U.S. is logical for Fortis. There are several publicly traded electrical and gas utilities in the region, many of which have performed poorly over the years and could ultimately benefit from the proven Fortis utility operating model.

Most of the companies trade at a P/E discount to Fortis (around 16x–17x 2007 consensus EPS) so it may be possible for Fortis to pay a premium and still achieve modest accretion. None of the transactions would be small for Fortis, however, as most electrical utilities in the Pacific Northwest sit at about two-thirds of Fortis' \$3.0 billion market capitalization.

Figures for Fortis are in C\$, all others are in US\$.

Estimates for Fortis are CIBC World Markets. All other companies are based on estimates from First Call and Bloomberg.

Source: Company reports and CIBC World Markets Inc.

BC Gas is the only sizable utility we know of in Canada that may be for sale. Owner Kinder Morgan (KMI-NYSE) may not see the utility as a fit with its business mix or growth and return profile. BC Gas has one of the lowest allowed ROEs in the country (likely heading down to about 8.3% next year) and a thin 35% equity ratio. The two B.C. gas utilities would form a sizable acquisition for any company including Fortis. On a combined basis, the Vancouver mainland and Island facilities have about \$1.0 billion in regulated equity.

While Fortis has an outstanding track record of integrating acquired assets, we still see the potential for a major acquisition as a near-term risk to the stock. Given the company's relatively thin balance sheet equity ratio, a significant acquisition would likely require large equity issuance and could pressure credit ratings.

Back Off Shares For Now

Questionable earnings sustainability, relative balance sheet weakness and a deteriorating risk profile are all good reasons to back off of Fortis shares. Not to overstate the issues — we see no crisis at the company — just valuation that doesn't make much sense any more. In simple terms, if regulated Canadian electrical utility assets are the best part of Fortis and make up only 54% of total earnings, how can its stock sustain a 2-point EBITDA multiple premium to other more pure play regulated Canadian pipelines and utilities?

Management and track record should and do count for something, but in the end, adding more value often involves taking more risk. Fortis rolled the dice and won in 2003 on the Western utility assets. Now it is betting on Caribbean acquisitions. From current levels, there is probably more downside than upside in that bet. An acquisition of other regulated utility assets may again alter course, but with the need for significant new equity to finance utility acquisitions, the tide may again turn from a seller's to a buyer's market in Fortis shares.

Price Target Calculation

Our \$26.00 price target is based on a 17.9x multiple of our 2007 EPS estimate of \$1.45. It also implies a 2.9% dividend yield. The target P/E multiple is found at the higher end of the stock's historical trading range (10x–20x) but all of the pipelines and utilities are trading through peak historical multiples due to the low interest rate environment. Fortis has tended to trade at a 1x–2x earnings multiple-point discount to the Canadian utilities group but is now trading at a premium to the Canadian utility group.

Key Risks To Price Target

Fortis could fall short of our 2006 and 2007 earnings forecasts (and fail to meet our price target) for various reasons, including (but not limited to) the impact of negative regulatory decisions in Alberta and B.C., weak power prices in Ontario, low hydro flows, and tourism conditions (real estate division). In addition, the utility stocks are sensitive to changes in Canadian bond yields. If bond yields rise significantly, valuation in the sector will likely fall. Fortis can offset a potential rise in bond yields to some or a full extent through dividend growth.

IMPORTANT DISCLOSURES:

Analyst Certification: Each CIBC World Markets research analyst named on the front page of this research report, or at the beginning of any subsection hereof, hereby certifies that (i) the recommendations and opinions expressed herein accurately reflect such research analyst's personal views about the company and securities that are the subject of this report and all other companies and securities mentioned in this report that are covered by such research analyst and (ii) no part of the research analyst's compensation was, is, or will be, directly or indirectly, related to the specific recommendations or views expressed by such research analyst in this report.

Potential Conflicts of Interest: Equity research analysts employed by CIBC World Markets are compensated from revenues generated by various CIBC World Markets businesses, including the CIBC World Markets Investment Banking Department within the Corporate and Leveraged Finance Division. Research analysts do not receive compensation based upon revenues from specific investment banking transactions. CIBC World Markets generally prohibits any research analyst and any member of his or her household from executing trades in the securities of a company that such research analyst covers. Additionally, CIBC World Markets generally prohibits any research analyst from serving as an officer, director or advisory board member of a company that such analyst covers.

In addition to 1% ownership positions in covered companies that are required to be specifically disclosed in this report, CIBC World Markets may have a long position of less than 1% or a short position or deal as principal in the securities discussed herein, related securities or in options, futures or other derivative instruments based thereon.

Recipients of this report are advised that any or all of the foregoing arrangements, as well as more specific disclosures set forth below, may at times give rise to potential conflicts of interest.

Important Disclosure Footnotes for Fortis Inc. (FTS)

- 2a Fortis Inc. is a client for which a CIBC World Markets company has performed investment banking services in the past 12 months.
- 2c CIBC World Markets Inc. has managed or co-managed a public offering of securities for Fortis Inc. in the past 12 months.
- 2e CIBC World Markets Inc. has received compensation for investment banking services from Fortis Inc. in the past 12 months.
- 7 CIBC World Markets Corp., CIBC World Markets Inc., and their affiliates, in the aggregate, beneficially own 1% or more of a class of equity securities issued by Fortis Inc.

Legal Disclaimer

This report is issued and approved for distribution by (i) in Canada, CIBC World Markets Inc., a member of the Investment Dealers Association ("IDA"), the Toronto Stock Exchange, the TSX Venture Exchange and CIPF, (ii) in the United Kingdom, CIBC World Markets plc, which is regulated by the Financial Services Authority ("FSA"), and (iii) in Australia, CIBC World Markets Australia Limited, a member of the Australian Stock Exchange and regulated by the ASIC (collectively, "CIBC World Markets"). This report is distributed in the United States by CIBC World Markets Inc. and has not been reviewed or approved by CIBC World Markets Corp., a member of the New York Stock Exchange ("NYSE"), NASD and SIPC. This report is intended for distribution in the United States only to Major Institutional Investors (as such term is defined in SEC 15a-6 and Section 15 of the Securities Exchange Act of 1934, as amended) and is not intended for the use of any person or entity that is not a major institutional investor. Major Institutional Investors receiving this report should effect transactions in securities discussed in the report through CIBC World Markets Corp. This report is provided, for informational purposes only, to institutional investor and retail clients of CIBC World Markets in Canada, and does not constitute an offer or solicitation to buy or sell any securities discussed herein in any jurisdiction where such offer or solicitation would be prohibited. This document and any of the products and information contained herein are not intended for the use of private investors in the United Kingdom. Such investors will not be able to enter into agreements or purchase products mentioned herein from CIBC World Markets plc. The comments and views expressed in this document are meant for the general interests of clients of CIBC World Markets Australia Limited.

The securities mentioned in this report may not be suitable for all types of investors. This report does not take into account the investment objectives, financial situation or specific needs of any particular client of CIBC World Markets. Recipients should consider this report as only a single factor in making an investment decision and should not rely solely on investment recommendations contained herein, if any, as a substitution for the exercise of independent judgment of the merits and risks of investments. The analyst writing the report is not a person or company with actual, implied or apparent authority to act on behalf of any issuer mentioned in the report. Before making an investment decision with respect to any security recommended in this report, the recipient should consider whether such recommendation is appropriate given the recipient's particular investment needs, objectives and financial circumstances. CIBC World Markets suggests that, prior to acting on any of the recommendations herein, Canadian retail clients of CIBC World Markets contact one of our client advisers in your jurisdiction to discuss your particular circumstances. Non-client recipients of this report who are not institutional investor clients of CIBC World Markets should consult with an independent financial advisor prior to making any investment decision based on this report or for any necessary explanation of its contents. CIBC World Markets will not treat non-client recipients as its clients by virtue of their receiving this report.

Past performance is not a guarantee of future results, and no representation or warranty, express or implied, is made regarding future performance of any security mentioned in this report. The price of the securities mentioned in this report and the income they produce may fluctuate and/or be adversely affected by exchange rates, and investors may realize losses on investments in such securities, including the loss of investment principal. CIBC World Markets accepts no liability for any loss arising from the use of information contained in this report, except to the extent that liability may arise under specific statutes or regulations applicable to CIBC World Markets.

Information, opinions and statistical data contained in this report were obtained or derived from sources believed to be reliable, but CIBC World Markets does not represent that any such information, opinion or statistical data is accurate or complete (with the exception of information contained in the Important Disclosures section of this report provided by CIBC World Markets or individual research analysts), and they should not be relied upon as such. All estimates, opinions and recommendations expressed herein constitute judgments as of the date of this report and are subject to change without notice.

Nothing in this report constitutes legal, accounting or tax advice. Since the levels and bases of taxation can change, any reference in this report to the impact of taxation should not be construed as offering tax advice on the tax consequences of investments. As with any investment having potential tax implications, clients should consult with their own independent tax adviser. This report may provide addresses of, or contain hyperlinks to, Internet web sites. CIBC World Markets has not reviewed the linked Internet web site of any third party and takes no responsibility for the contents thereof. Each such address or hyperlink is provided solely for the recipient's convenience and information, and the content of linked third-party web sites is not in any way incorporated into this document. Recipients who choose to access such third-party web sites or follow such hyperlinks do so at their own risk. Although each company issuing this report is a wholly owned subsidiary of Canadian Imperial Bank of Commerce ("CIBC"), each is solely responsible for its contractual obligations and commitments, and any securities products offered or recommended to or purchased or sold in any client accounts (i) will not be insured by the Federal Deposit Insurance Corporation ("FDIC"), the Canada Deposit Insurance Corporation or other similar deposit insurance, (ii) will not be deposits or other obligations of CIBC, (iii) will not be endorsed or guaranteed by CIBC, and (iv) will be subject to investment risks, including possible loss of the principal invested. The CIBC trademark is used under license.

Pipelines, Utilities, & Power

Fortis Inc.

Reinstating Coverage Following Research Restriction

- We are reinstating our Sector Underperformer rating on Fortis following a research restriction. The company recently issued \$150 million of common equity to finance recent acquisitions and organic growth in its Western Canadian electrical utilities.
- The equity issue will likely dilute 2007E EPS by about \$0.04 assuming the company uses proceeds to pay down debt. We are reducing our 2007E EPS from \$1.45 to \$1.40.
- However, we are increasing our price target from \$26.00 to \$27.00 as we now base our price targets on 2008 estimates for all of the stocks under our coverage universe. Our 2008E EPS is \$1.50.
- Our rating on Fortis is partially based on our company view (see full report dated November 27, 2006) but mostly based on our sector view that the Canadian utility stocks are now overvalued. For more details on our valuation analysis, please see our full report dated January 8, 2007.

Stock Price Performance

CIBC World Markets does and seeks to do business with companies covered in its research reports. As a result, investors should be aware that the firm may have a conflict of interest that could affect the objectivity of this report.

Investors should consider this report as only a single factor in making their investment decision.

See "Important Disclosures" section at the end of this report for important required disclosures, including potential conflicts of interest.

See "Price Target Calculation" and "Key Risks to Price Target" sections at the end of this report, where applicable.

Price Target Calculation

Our \$27.00 price target is primarily based on our detailed dividend discount valuation models with consideration for EV/EBITDA multiples and P/E multiples. The price target implies an EV/EBITDA multiple of about 10.4x and an 18.0x multiple of our 2008E EPS. The target multiples are found at the higher end of the stock's historical trading range but all of the pipelines and utilities are trading through peak historical multiples due to the low interest rate environment. Fortis has tended to trade at a 1x–2x earnings multiple point discount to the Canadian utilities group but now trades at a premium to the Canadian utility group.

Key Risks To Price Target

Fortis could fall short of our earnings forecasts (and fail to meet our price target) for various reasons, including (but not limited to) the impact of negative regulatory decisions in Alberta and B.C., weak power prices in Ontario, low hydro flows, and tourism conditions (real estate division). In addition, the utility stocks are sensitive to changes in Canadian bond yields. If bond yields rise significantly, valuation levels in the sector will likely fall. Fortis can offset a potential rise in bond yields to some or a full extent through dividend growth.

Our EPS estimates are shown below:

	1 Qtr.	2 Qtr.	3 Qtr.	4 Qtr.	Yearly
2006 Current	\$0.35A	\$0.33A	\$0.37A	\$0.31E	\$1.35E
2007 Prior	--	--	--	--	\$1.45E
2007 Current	--	--	--	--	\$1.40E
2008 Current	--	--	--	--	\$1.50E

IMPORTANT DISCLOSURES:

Analyst Certification: Each CIBC World Markets research analyst named on the front page of this research report, or at the beginning of any subsection hereof, hereby certifies that (i) the recommendations and opinions expressed herein accurately reflect such research analyst's personal views about the company and securities that are the subject of this report and all other companies and securities mentioned in this report that are covered by such research analyst and (ii) no part of the research analyst's compensation was, is, or will be, directly or indirectly, related to the specific recommendations or views expressed by such research analyst in this report.

Potential Conflicts of Interest: Equity research analysts employed by CIBC World Markets are compensated from revenues generated by various CIBC World Markets businesses, including the CIBC World Markets Investment Banking Department within the Corporate and Leveraged Finance Division. Research analysts do not receive compensation based upon revenues from specific investment banking transactions. CIBC World Markets generally prohibits any research analyst and any member of his or her household from executing trades in the securities of a company that such research analyst covers. Additionally, CIBC World Markets generally prohibits any research analyst from serving as an officer, director or advisory board member of a company that such analyst covers.

In addition to 1% ownership positions in covered companies that are required to be specifically disclosed in this report, CIBC World Markets may have a long position of less than 1% or a short position or deal as principal in the securities discussed herein, related securities or in options, futures or other derivative instruments based thereon.

Recipients of this report are advised that any or all of the foregoing arrangements, as well as more specific disclosures set forth below, may at times give rise to potential conflicts of interest.

Fortis Inc.

Another Solid Year But Earnings Growth May Not Be Sustainable

- Fortis reported normalized Q4'06 EPS of \$0.33 vs. our estimate of \$0.31 and \$0.22 in Q4'05. Full-year results were ahead of expectations but Alberta returns are likely unsustainable and cash flows were down. We are maintaining our estimates, rating, and target price.
- Earnings growth was driven by supernormal achieved returns in the Alberta utility. We estimate the company achieved a mid-double-digit ROE compared to an allowed of less than 9.0%. Tax benefits driving the wedge should continue in 2007 but likely not thereafter.
- Cash flows were down y-o-y due primarily to timing differences in the payment of transmission charges and income taxes. We are hopeful cash flows will begin rising again in 2007.
- As usual, Fortis has done a remarkable job of efficiently operating its regulated utility assets. However, our analysis suggests a premium for management is reflected in the stock. Meanwhile, with allowed returns falling, we believe the pace of earnings growth is unsustainable.

Stock Price Performance

CIBC World Markets does and seeks to do business with companies covered in its research reports. As a result, investors should be aware that the firm may have a conflict of interest that could affect the objectivity of this report.

Investors should consider this report as only a single factor in making their investment decision.

See "Important Disclosures" section at the end of this report for important required disclosures, including potential conflicts of interest.

See "Price Target Calculation" and "Key Risks to Price Target" sections at the end of this report, where applicable.

Investment Summary

Fortis reported normalized Q4'06 EPS of \$0.33 vs. our estimate of \$0.31 and \$0.22 in Q4'05. Full-year results were ahead of expectations but Alberta returns are likely unsustainable and cash flows were down. We are maintaining our estimates, rating, and target price.

For a full breakdown and analysis of earnings by segment, please see the appendix to this comment.

Earnings growth was driven primarily by supernormal achieved returns in the Alberta utility. Utility rate base grew by about 10% but earnings were up by about 30%. We estimate the company achieved a mid-double-digit ROE compared to an allowed of less than 9.0%.

We understand that some of the earnings improvement has been achieved in the corporate Alberta entity, not the regulated utility. Tax benefits are driving the wedge between actual and allowed returns. Some of these benefits are likely contained in the corporate entity and some in the regulated entity. In either case, we believe they can continue through 2007 but not materially longer. Insofar as benefits are in the regulated entity, they will likely be eliminated through rate adjustments for the 2008/9 years.

The rest of the Fortis businesses ran well but not above expectations for the most part. The British Columbia utility earnings are growing with rate base. Regulated utility earnings in Eastern Canada have been flat. New acquisitions in the Caribbean and in real estate are adding nicely to earnings, but these contributions are mostly offset by financing costs as reflected in higher Corporate expense.

Cash flows were down y-o-y due primarily to timing differences in the payment of transmission charges and income taxes. Management believes that a \$30 million cash outflow for transmission charges (booked as change in regulatory assets and liabilities) will reverse in the 2007/8 period. A \$36-million cash working capital outflow relates in some part to taxes payable from 2005. Therefore, we are hopeful cash flows will begin rising again in 2007.

Going forward into 2007 and 2008, we see modest growth as the Alberta utility rate base expansion will likely be offset by declining achieved returns. To the extent there is organic earnings growth in 2007/8, we see it coming from British Columbia and Belize. Rate base growth in British Columbia should offset declining returns on equity. In Belize, electricity sales are accelerating again and there are opportunities for expanded hydroelectric generation capacity. Our EPS estimates reflect this modest growth, going from \$1.38 in 2006 to almost \$1.50 in 2008.

As usual, Fortis has done a remarkable job of efficiently operating its regulated utility assets. However, our analysis suggests a premium for management is reflected in the stock. The company currently carries high EV/EBITDA and cash flow valuation multiples. It trades at about 9.0x price to 2007E cash flow, and 11.5x '07E EBITDA. Similar Canadian utilities are trading at more like 8.0x cash flow and 9.0x-10.0x EBITDA.

On November 27, 2006 we downgraded Fortis to Sector Underperformer and wrote a full report demonstrating our view at the time that the shares were overvalued. Since that time, the stock has underperformed to some extent, so it may perform more in line with the group now. Yet, our stance on the Canadian utilities as a whole is mostly negative due to valuation, slowing '07 growth, and a healthy supply of new equity. Therefore, we are maintaining our rating on the stock at this time.

Appendix: Summary Of Q4'06 Results

Exhibit 1. Segmented Earnings for Fortis (C\$ mlns.)

	Q4/06A	Q4/05A	2006A	2005A
Newfoundland Power	\$8.8	\$2.9	\$30.1	\$29.4

Caribbean Utilities	\$2.8	\$2.8	\$9.7	\$11.4
Turks & Caicos	\$2.8	-	\$3.5	-
Fortis Generation	\$6.8	\$8.5	\$26.0	\$21.6
Fortis Properties	\$2.8	\$2.9	\$17.1	\$14.1
Corporate	(\$11.0)	(\$8.6)	(\$36.1)	(\$32.4)
Operating Earnings for Common	\$33.9	\$22.3	\$143.2	\$117.6
Unusual Items	\$0.0	\$0.0	\$4.6	\$19.4
Reported Earnings	\$33.9	\$22.3	\$147.8	\$137.0
Average Shares Outstanding (mln)	103.5	103.2	103.6	101.6
Operating EPS	\$0.33	\$0.22	\$1.38	\$1.16
Reported EPS	\$0.33	\$0.22	\$1.43	\$1.35

Note:

1. Unusual items in 2006 include a \$0.7 million gain from insurance proceeds on NY Hydro asset, a \$1.6 million after-tax gain on the sale of Days Inn Sydney, a \$1.6 million unrealized FX gain and a \$0.7 million after-tax gain on insurance.
2. Unusual items in 2005 include \$8.6 million positive adjustment for tax-related matters at Fortis Alberta, and Cornwall Electric, \$1.4 million interest recovery from Newfoundland Power's tax settlement, \$2 million non-cash foreign exchange gain, and \$0.5 million restructuring charge in Corporate costs.

Source: Company reports and CIBC World Markets Inc.

Newfoundland Power

Newfoundland Power reported earnings of \$8.8 million in Q4/06 versus \$2.9 million in the fourth quarter last year. The increase in earnings was mainly due to the change to an accrual basis of revenue recognition (initiated in January 2006). Electricity sales were 162 GWh higher, also attributable to the accrual method adoption. Full-year earnings were comparable to last year.

Maritime Electric

Earnings for Maritime Electric in the fourth quarter of 2006 were \$0.7 million higher than Q4/05. The earnings increase was primarily due to a 3.35 per cent increase in basic electricity rates (effective July 1, 2006) and higher electricity sales from customer growth in the residential sector.

FortisOntario

FortisOntario reported fourth quarter earnings of \$1.0 million, \$0.8 million higher than Q4/05 due to higher electricity rates, which came into effect May 2006 and lower operating expenses.

FortisAlberta

Fourth quarter results were \$4.1 million higher than the same period in 2005. Lower effective corporate income taxes, increased energy deliveries and reduced revenue deferrals were partially offset by a 1.9 percent decrease in distribution rates, higher operating expenses, amortization costs, and finance charges.

FortisBC

FortisBC reported fourth quarter earnings of \$6.4 million, \$0.7 million higher than in Q4/05. Improved earnings primarily came from an increase in electricity rates (effective January 1, 2006) and higher electricity sales. This was partially offset by higher energy supply costs (due to new PBR mechanism), increased amortization and finance costs.

Regulated Utilities – Caribbean

Q4/06 earnings for Belize Electricity were up \$0.8 million from the same period in 2005, mainly due to higher electricity sales and lower finance charges, partially offset by increased operating expenses.

Fortis Generation

Fortis Generation reported fourth quarter earnings of \$6.8 million, down \$1.7 million compared to Q4/05. The decrease was primarily due to lower average wholesale prices in Ontario and lower contracted prices in Belize. This was partially offset by increased production, lower operating expenses, and lower corporate taxes.

Fortis Properties

Earnings were essentially flat in Q4/06 compared to Q4/05. Growth in western properties and contribution from acquisitions were offset by higher operating expenses, amortization and finance charges.

Turks and Caicos Utilities

Fortis acquired the utilities on August 28, 2006 and the seasonally strong contribution showed up in the fourth quarter.

Corporate

Corporate expenses were \$2.4 million higher than in Q4/05 due to higher dividends from issuance of preference shares, increased finance charges (high drawings on corporate credit facilities and interest on convertible debentures issued November 2006) and lower corporate income tax recovery.

Price Target Calculation

Our \$27 target price is primarily based on our detailed dividend discount valuation models with consideration for EV/EBITDA multiples and P/E multiples. The target price implies an EV/'08 EBITDA multiple of about 10.5x and an 18.0x multiple of our 2008 EPS forecast. The target multiples are found at the higher end of the stock's historical trading range but all of the pipelines and utilities are trading through peak historical multiples due to the low interest rate environment. Fortis has tended to trade at a 1x-2x earnings multiple point discount to the Canadian utilities group but is now trading parallel with the group.

Key Risks To Price Target

Fortis could fall short of our earnings forecasts (and fail to meet our target price) for various reasons, including (but not limited to) the impact of negative regulatory decisions in Alberta and B.C., weak power prices in Ontario, low hydro flows, and tourism conditions (real estate division). In addition, the utility stocks are sensitive to changes in Canadian bond yields. If bond yields rise significantly, valuation levels in the sector will likely fall. Fortis can offset a potential rise in bond yields to some or a full extent through dividend growth.

Our EPS estimates are shown below:

	1 Qtr.	2 Qtr.	3 Qtr.	4 Qtr.	Yearly
2006 Prior	\$0.35A	\$0.33A	\$0.37A	\$0.31E	\$1.35E
2006 Current	\$0.35A	\$0.33A	\$0.37A	\$0.33A	\$1.38A
2007 Current	--	--	--	--	\$1.40E
2008 Current	--	--	--	--	\$1.50E

IMPORTANT DISCLOSURES:

Analyst Certification: Each CIBC World Markets research analyst named on the front page of this research report, or at the beginning of any subsection hereof, hereby certifies that (i) the recommendations and opinions expressed herein accurately reflect such research analyst's personal views about the company and securities that are the subject of this report and all other companies and securities mentioned in this report that are covered by such research analyst and (ii) no part of the research analyst's compensation was, is, or will be, directly or indirectly, related to the specific recommendations or views expressed by such research analyst in this report.

Potential Conflicts of Interest: Equity research analysts employed by CIBC World Markets are compensated from revenues generated by various CIBC World Markets businesses, including the CIBC World Markets Investment Banking Department within the Corporate and Leveraged Finance Division. Research analysts do not receive compensation based upon revenues from specific investment banking transactions. Pipelines, Utilities, & Power

Fortis Inc.

Reinstating Coverage; Upgrading Stock To Sector Performer

- Effective May 18, we are reinstating coverage of Fortis with a Sector Performer rating and \$30 price target. The acquisition of BC Gas may slow growth near term, but is modestly accretive to EPS and adds another platform for future accretive acquisitions.
- Prior to the deal, we had rated Fortis shares at Sector Underperformer. We believed a material acquisition could require large amounts of new equity and pressure the stock -- and it did, down to \$26. Now that the overhang of a large acquisition has cleared up, we foresee a continued bright future.
- We have extended our Fortis model out to 2009 in this report and see solid but slightly slower growth than in the past. The western electrical utility assets have strong growth but BC Gas has little organic growth. We also foresee the potential for a reduction in Generation revenues in 2009.
- Our new \$30 price target (up from \$27 previously) and Sector Performer rating balance this slower growth rate against earnings accretion, a reduced risk profile, and management's outstanding track record of efficient operations and accretive acquisitions.

Investment Summary

We are reinstating coverage of Fortis (FTS-TSX) with a Sector Performer rating and \$30 price target. The acquisition of BC Gas may slow growth near term, but is modestly accretive to EPS and adds another platform for future accretive acquisitions.

Prior to the deal, we had rated Fortis shares at Sector Underperformer. We believed a material acquisition could require large amounts of new equity and pressure the stock – and it did, down to \$26. Now that the overhang of a large acquisition has cleared up, we foresee a continued bright future.

On May 17 Fortis closed the \$3.7 billion acquisition of Terasen's regulated gas distribution utilities in British Columbia. The acquisition was financed by assuming \$2.34 billion of Terasen debt, issuing about 44.3 million new subscription receipts that converted into common shares (gross proceeds \$1.15 billion) and drawing down \$200 million–\$300 million on a credit facility.

The BC Gas assets will comprise a large component of Fortis' total assets and earnings. We estimate gas distribution at about 50% of the company's total assets now. The assets should contribute 35%–40% of total EBITDA and about a third of earnings in 2008.

Our models suggest transaction parameters on BC Gas of about 9.7x EV/EBITDA and about 17x P/E. These transaction multiples are not out of line with other recent utility acquisition parameters. Using more debt and debt equivalents than the regulated debt ratios, we believe the transaction will be immediately accretive to earnings by \$0.05–\$0.10 on an annualized basis. As a result, we have revised our 2007 EPS estimate from \$1.40 to \$1.45 and our 2008 estimate from \$1.50 to \$1.60.

We have extended our Fortis model out to 2009 in this report and foresee solid but slightly slower growth than in the past. The western electrical utility assets have strong organic growth but BC Gas has little. We see no meaningful earnings growth over the next few years from the BC Gas assets. Part of this view relates to our modest customer addition forecast and part relates to the likelihood of a reduction in ROE at the end of 2009 when an incentive rates structure expires.

We also foresee the potential for a reduction in Generation revenues in 2009. The company's contract for 75 MW at the Rankin Generating Station runs out in April of that year and will likely cause a material reduction in earnings. Therefore, while we forecast a continuation of historically strong EPS growth at Fortis for 2008, we see lower growth in the following years.

On the other hand, management at Fortis has a tendency to deliver on outstanding operations and accretive acquisitions. Between now and the 2009–2010 timeframe, it is highly conceivable that the company will find other ways to grow earnings. We think the stock will trade at a premium to the other utilities due to trust and confidence in management.

Our new \$30 price target (up from \$27 previously) is based on a premium 11x EV/2008E EBITDA multiple versus a sector average of about 9.0x. It also implies a forward target P/E of 18.8x. The target supports our new Sector Performer rating and balances our forecast for slower growth against the potential for management to add further value and the company's now less risky business mix.

BC Gas Assets Are Jumping-off Point For Further Acquisitions

The BC Gas and Vancouver Island gas distribution assets are low growth but low risk and well operated. They have grown at a compound annual rate of only about 2.0% over the past five years. On the other hand, there is little earnings volatility because most of the typical utility risks, such as weather, are factored out through variance accounts. As a result, earned returns have consistently been slightly above the allowed return each year, whereas for most utilities, achieved returns tend to fluctuate above and below the allowed.

Exhibit 1. Allowed And Achieved Returns On Equity For BC Gas

Source: Company reports and CIBC World Markets Inc.

The consistent achieved returns are also a testament to the BC Gas management team's abilities. Achieving solid returns year in and year out involves a sharp focus on details and a superior understanding of the regulatory environment. In this sense, the BC Gas team fits the Fortis mold and could be valuable in integrating future gas utility acquisitions.

With a stronger presence in Western Canada, a move into the U.S. Pacific Northwest is logical for Fortis. There are several publicly traded electrical and gas utilities in the region, many of which have performed poorly over the years and could ultimately benefit from the proven Fortis utility operating model.

Most of the companies trade at a P/E discount to Fortis (around 16x–18x 2007 consensus EPS estimates) so it may be possible for Fortis to pay a premium and still achieve modest accretion. The acquisitions would also now fall within the size limit that Fortis could tolerate, as most electrical utilities in the Pacific Northwest sit at only about a half of Fortis' C\$4.4 billion market capitalization.

Other opportunities for gas distribution acquisitions may present themselves in Canada. In particular, we think Enbridge (ENB-SP) and Spectra Energy (SE-SP) would both part with their gas utilities in Ontario at the right price (possibly keeping storage as a strategic asset). Both companies tend to achieve ROEs of about 12% on their long-haul pipeline investments compared to 8.0%–9.0% ROEs on gas distribution. For both companies, therefore, growth rates could improve if they were to sell gas distribution assets and redeploy the capital to pipeline construction. The rate base of Enbridge Gas Distribution is about \$3.7 billion and of Union Gas is about \$3.4 billion.

Absent acquisitions, however, we believe three- to five-year growth at BC Gas utility is limited. Customer additions are nominal and we foresee no upside for now in the achieved return. The utility is under an incentive regulatory framework with a motivation to contain and reduce costs. This rate structure was recently extended until the end of 2009. Between now and 2009 there might be modest additional cost savings available and, as a result, slightly higher returns.

However, by 2010 we believe returns will be reset to the allowed rate of only 8.37% (assuming no changes in bond yields). Interveners in the regulatory proceeding that extended the incentive rate mechanism were clear that they would only support an extension on condition that there was a full rates hearing at that time and that no further extensions be allowed. Furthermore, interveners noted that the utility would be “overdue for a thorough review of its revenue requirement” (BC Public Interest Advocacy) and that “a comprehensive rebasing of both revenue requirement and rate design” (BC Hydro) should take place at that time.

Regardless of achieved returns, the BC Gas acquisition marks a material shift back to a regulated utility business mix for Fortis. In a downgrade report on November 27, 2006, we argued that the mix was deteriorating, with regulated Canadian utility assets falling from over 70% in 2004 to 54% by 2007. Now with BC Gas in the asset base, we see Canadian utility assets again contributing over 70% of total earnings next year.

Exhibit 3. Percentage Of Total Earnings Contribution From Canadian Regulated Utilities

Source: Company reports and CIBC World Markets Inc.

As Canadian regulated utilities carry very little risk, Fortis can afford to carry more debt on its balance sheet now without taking undue financial risk. In addition, volatility in earnings from unregulated generation and utilities located in the Caribbean will have a smaller relative impact on total earnings going forward. We see both factors as allowing for higher company valuation.

The BC Gas acquisition has its pros and cons for Fortis. On the one hand, it adds modestly to EPS and reduces the company's risk profile. On the other hand, it likely reduces its three to five-year organic growth profile. We tend to see the deal overall as a positive development for the company, mostly because we believe management will maximize the value and potentially add back to growth through future accretive acquisitions.

Financial Forecasts Show Slower Earnings, More Cash Flow

Our financial forecasts, extended out to 2009, suggest Fortis will have slightly lower EPS growth but higher cash flow and EBITDA growth than before. On earnings, we have the company growing at a compound annual rate of about 5.0% between 2006 and 2009. We believe cash flow per share will grow more rapidly at just over 10%. Part of the cash flow growth is due to timing issues and relatively depressed cash flow in 2006 that picks up in 2007. However, the addition of gas distribution assets (about \$400 million/year EBITDA) supports improved cash flow generation at Fortis.

Exhibit 4. EPS And CFPS Growth

Source: Company reports and CIBC World Markets Inc.

The reasons for limited earnings growth are primarily twofold:

1. **Loss of hydro capacity** – The loss of a contract for the sale of 75 MW of hydroelectricity power at Ontario spot prices in April 2009 will impact Generation earnings. We estimate that the contract at the Rankin dam has been yielding about \$35 million in annual revenues and about \$15 million in after-tax earnings. Our Generation segment earnings estimate declines by \$10 million for a part-year impact in 2009.
2. **Gradual return to allowed ROE at Fortis Alberta** – Rate base growth at Fortis Alberta should continue at a rapid pace (5%–6%) but returns will likely drop. Fortis has been earning double-digit ROEs – much higher than the 8%–9% allowed ROE. As tax benefits and operating cost savings accrue back to customers, we see a reduction in achieved returns offsetting, to some extent, the rate base growth.

The good news is that cash flow growth should accelerate while earnings growth slows slightly. In past research we expressed concerns that cash flows were not keeping pace with earnings growth. We see that trend reversing as working capital is recaptured and depreciation rises. Cash flow per share, after falling from \$3.08 in 2005 to \$2.89 in 2006, should rise dramatically to \$3.90 in 2008 (see Exhibit 5 for summary Fortis model).

With cash flow growth, less business risk and the potential for more acquisitions, Fortis shares will likely continue trading at a premium to the Canadian utility group. We primarily rely on our dividend discount model and on EV/EBITDA multiples in establishing our price target. Our new \$30 target is based on an 11x EV/EBITDA multiple versus a target multiple of about 9.0x for the Canadian group. It also implies a P/E multiple of 18.8x based on our 2008 earnings forecast. The target offers limited upside but still solid total return potential and justifies our Sector Performer rating.

Price Target Calculation

Our \$30 price target is based primarily on our detailed dividend discount valuation models with consideration for EV/EBITDA multiples and P/E multiples. The price target implies an EV/2008E EBITDA multiple of about 11x and an 18.8x multiple of our 2008 EPS forecast. The target multiples are found at the higher end of the stock's historical trading range but all of the pipelines and utilities are trading through peak historical multiples due to the low interest rate environment.

Key Risks To Price Target

Fortis could fall short of our earnings forecasts (and fail to meet our price target) for various reasons, including (but not limited to) the impact of negative regulatory decisions in Alberta and BC, weak power prices in Ontario, low hydro flows, and tourism conditions (real estate division). In addition, the utility stocks are sensitive to changes in Canadian bond yields. If bond yields rise significantly, valuation levels in the sector will likely fall. Fortis can offset a potential rise in bond yields, to some or a full extent, through dividend growth.

IMPORTANT DISCLOSURES:

Analyst Certification: Each CIBC World Markets research analyst named on the front page of this research report, or at the beginning of any subsection hereof, hereby certifies that (i) the recommendations and opinions expressed herein accurately reflect such research analyst's personal views about the company and securities that are the subject of this report and all other companies and securities mentioned in this report that are covered by such research analyst and (ii) no part of the research analyst's compensation was, is, or will be, directly or indirectly, related to the specific recommendations or views expressed by such research analyst in this report.

Potential Conflicts of Interest: Equity research analysts employed by CIBC World Markets are compensated from revenues generated by various CIBC World Markets businesses, including the CIBC World Markets Investment Banking Department within the Corporate and Leveraged Finance Division. Research analysts do not receive compensation based upon revenues from specific investment banking transactions. CIBC World Markets generally prohibits any research analyst and any member of his or her household from executing trades in the securities of a company that such research analyst covers. Additionally, CIBC World Markets generally prohibits any research analyst from serving as an officer, director or advisory board member of a company that such analyst covers.

In addition to 1% ownership positions in covered companies that are required to be specifically disclosed in this report, CIBC World Markets may have a long position of less than 1% or a short position or deal as principal in the securities discussed herein, related securities or in options, futures or other derivative instruments based thereon.

Recipients of this report are advised that any or all of the foregoing arrangements, as well as more specific disclosures set forth below, may at times give rise to potential conflicts of interest.

Important Disclosure Footnotes for Fortis Inc. (FTS)

- 2a Fortis Inc. is a client for which a CIBC World Markets company has performed investment banking services in the past 12 months.
- 2c CIBC World Markets Inc. has managed or co-managed a public offering of securities for Fortis Inc. in the past 12 months.
- 2e CIBC World Markets Inc. has received compensation for investment banking services from Fortis Inc. in the past 12 months.
- 2g CIBC World Markets Inc. expects to receive or intends to seek compensation for investment banking services from Fortis Inc. in the next 3 months.
- 7 CIBC World Markets Corp., CIBC World Markets Inc., and their affiliates, in the aggregate, beneficially own 1% or more of a class of equity securities issued by Fortis Inc.

Pipelines, Utilities, & Power

Fortis Inc.

Executive Summary: Reinstating Coverage; Upgrading Stock To Sector Performer

- Effective May 18, we reinstated coverage of Fortis with a Sector Performer rating and \$30 price target. The acquisition of BC Gas may slow growth near term, but is modestly accretive to EPS and adds another platform for future accretive acquisitions.
- Prior to the deal, we had rated Fortis shares at Sector Underperformer. We believed a material acquisition could require large amounts of new equity and pressure the stock -- and it did, down to \$26. Now that the overhang of a large acquisition has cleared up, we foresee a continued bright future.
- We have extended our Fortis model out to 2009 in this report and see solid but slightly slower growth than in the past. The western electrical utility assets have strong growth but BC Gas has little organic growth. We also foresee the potential for a reduction in Generation revenues in 2009.
- Our new \$30 price target (up from \$27 previously) and Sector Performer rating balance this slower growth rate against earnings accretion, a reduced risk profile, and management's outstanding track record of efficient operations and accretive acquisitions.

Investment Summary

We reinstated coverage of Fortis (FTS-TSX) with a Sector Performer rating and \$30 price target. The acquisition of BC Gas may slow growth near term, but is modestly accretive to EPS and adds another platform for future accretive acquisitions.

Prior to the deal, we had rated Fortis shares at Sector Underperformer. We believed a material acquisition could require large amounts of new equity and pressure the stock – and it did, down to \$26. Now that the overhang of a large acquisition has cleared up, we foresee a continued bright future.

On May 17 Fortis closed the \$3.7 billion acquisition of Terasen's regulated gas distribution utilities in British Columbia. The acquisition was financed by assuming \$2.34 billion of Terasen debt, issuing about 44.3 million new subscription receipts that converted into common shares (gross proceeds \$1.15 billion) and drawing down \$200 million–\$300 million on a credit facility.

The BC Gas assets will comprise a large component of Fortis' total assets and earnings. We estimate gas distribution at about 50% of the company's total assets now. The assets should contribute 35%–40% of total EBITDA and about a third of earnings in 2008.

Our models suggest transaction parameters on BC Gas of about 9.7x EV/EBITDA and about 17x P/E. These transaction multiples are not out of line with other recent utility acquisition parameters. Using more debt and debt equivalents than the regulated debt ratios, we believe the transaction will be immediately accretive to earnings by \$0.05–\$0.10 on an annualized basis. As a result, we have revised our 2007 EPS estimate from \$1.40 to \$1.45 and our 2008 estimate from \$1.50 to \$1.60.

We have extended our Fortis model out to 2009 and foresee solid but slightly slower growth than in the past. The western electrical utility assets have strong organic growth but BC Gas has little. We see no meaningful earnings growth over the next few years from the BC Gas assets. Part of this view relates to our modest customer addition forecast and part relates to the likelihood of a reduction in ROE at the end of 2009 when an incentive rates structure expires.

We also foresee the potential for a reduction in Generation revenues in 2009. The company's contract for 75 MW at the Rankin Generating Station runs out in April of that year and will likely cause a material reduction in earnings. Therefore, while we forecast a continuation of historically strong EPS growth at Fortis for 2008, we see lower growth in the following years.

On the other hand, management at Fortis has a tendency to deliver on outstanding operations and accretive acquisitions. Between now and the 2009–2010 timeframe, it is highly conceivable that the company will find other ways to grow earnings. We think the stock will trade at a premium to the other utilities due to trust and confidence in management.

Our new \$30 price target (up from \$27 previously) is based on a premium 11x EV/2008E EBITDA multiple versus a sector average of about 9.0x. It also implies a forward target P/E of 18.8x. The target supports our new Sector Performer rating and balances our forecast for slower growth against the potential for management to add further value and the company's now less risky business mix.

Please see our full report dated May 18, 2007, for more details.

Price Target Calculation

Our \$30 price target is based primarily on our detailed dividend discount valuation models with consideration for EV/EBITDA multiples and P/E multiples. The price target implies an EV/2008E EBITDA multiple of about 11x and an 18.8x multiple of our 2008 EPS forecast. The target multiples are found at the higher end of the stock's historical trading range but all of the pipelines and utilities are trading through peak historical multiples due to the low interest rate environment.

Key Risks To Price Target

Fortis could fall short of our earnings forecasts (and fail to meet our price target) for various reasons, including (but not limited to) the impact of negative regulatory decisions in Alberta and BC, weak power prices in Ontario, low hydro flows, and tourism conditions (real estate division). In addition, the utility stocks are sensitive to changes in Canadian bond yields. If bond yields rise significantly, valuation levels in the sector will likely fall. Fortis can offset a potential rise in bond yields, to some or a full extent, through dividend growth.

Our EPS estimates are shown below:

Pipelines, Utilities, & Power

Fortis Inc.

Good Results; Full-Year On Target

- Fortis reported normalized Q2'07 EPS of \$0.31 vs. \$0.33 in Q2'06 and our estimate of \$0.25. We anticipate seasonality in corporate costs and Western utilities will dampen results in H2'07. We are maintaining our '07 estimate and price target but slightly reducing our '08 estimate.
- Alberta and B.C. continued driving growth in the company. However, we believe tax benefits in Alberta will soon taper off, lowering the achieved ROE toward a more normal range. This change, combined with slightly higher Corporate costs drive our small '08 EPS reduction.
- Unfortunately, the Terasen Gas acquisition will likely be dilutive to EPS this year but only due to timing. The acquisition closed in Q2 but gas distribution makes all of its money in Q1 and Q4. We anticipate soft Q3 results but then a strong fourth quarter and a good year in 2008.
- While we see EPS growth at lower than historical levels, we also see reduced risk. Earnings volatility should decrease with gas distribution and no major external financing requirements on the horizon. Our \$30 PT is based on a premium 11.0x EV/EBITDA multiple.

Investment Summary

Fortis (FTS-SP) reported normalized Q2'07 EPS of \$0.31 vs. \$0.33 in Q2'06 and our estimate of \$0.25. The variance between our estimate and actual results was caused by seasonality in corporate costs and Western utilities that we expect will dampen results in H2'07. We are maintaining our '07 estimate and price target but slightly reducing our '08 estimate.

For a full breakdown and analysis of earnings by segment, please see the appendix to this comment.

The second quarter results highlight a company in transition integrating a large new acquisition. Looking through acquisition impacts, unregulated businesses underperformed slightly due to lower than normal hydrology and power prices. On the other hand, core regulated operations delivered solid utility growth again and performed above expectations.

The company's Alberta and B.C. utilities continued driving earnings. We see the strong trend continuing, albeit with a slight pause in 2008/9. Tax benefits in Alberta will probably soon taper off, lowering the achieved ROE toward a more normal range. Our forecasts now carry an achieved ROE of about 13% in Alberta this year compared to a nameplate allowed ROE of only 8.51%. Rate base growth is still well into double-digits so earnings will likely flatten out but not decline with the lower return in 2008.

The Terasen acquisition impacted results in two ways: seasonality and higher corporate costs. We still anticipate that the Terasen Gas acquisition will be accretive to EPS by \$0.05 - \$0.10 in its first full-year. Unfortunately, however, it will likely be dilutive to EPS this year due to timing. The acquisition closed in Q2 but gas distribution tends to lose money in Q3 and makes all of its money in Q1 and Q4. We anticipate soft Q3 results for the company as a whole but then a strong fourth quarter and a good year in 2008.

Corporate costs were only marginally higher than the prior year but will create an even more negative drag going forward. Fortis has taken on about \$700 million in total unallocated debt for the Terasen acquisition and other projects this year. Using a 6.0% interest rate, this debt will likely add about \$25 million in after-tax corporate costs on an annual basis. The costs were not covered by earnings from gas distribution in Q2, nor will they be in Q3. But they should be more than covered in Q4 and Q1.

Despite higher financing costs, the good news is that Fortis has completed its financing requirements for the acquisition. Also, with growing cash flows (we see cash flow from operations at \$600 million by next year vs. only \$300 million in 2006) external financing requirements, absent further acquisitions, should be minimal in the coming 12- to 24-months. This financial position, combined with its now less volatile asset base, in our opinion, reduces the overall investing risk in Fortis stock.

In summary, while we see EPS growth in the coming years at lower than historical levels, we also see reduced risk that justifies premium valuation. Our \$30 price target is based on premium multiples of about 11.0x '08 EV/EBITDA and just over 19x P/E. It is hard to know whether any of the utility stocks can sustain quite these multiples unless financial markets stabilize, but in general Fortis should perform relatively well in the current environment as a reliable and defensive investment.

Appendix: Summary Of Q2'07 Earnings

Note:

1. Unusual item in Q2'07 includes \$0.2 million in after-tax insurance proceeds received.
2. Unusual items in 2006 include a \$0.7 million gain from insurance proceeds on NY Hydro asset, a \$1.6 million after-tax gain on the sale of Days Inn Sydney, a \$1.6 million unrealized FX gain and a \$0.7 million after-tax gain on insurance.

Source: Company reports and CIBC World Markets Inc.

Newfoundland Power

Newfoundland Power reported earnings of \$8.0 million in Q2'07, in-line with the \$8.0 million reported in Q2'06. Electricity sales growth was offset by lower allowed ROE for 2007 and higher amortization costs. Electricity sales were up 35 GWhs mainly due to customer growth. In May, Newfoundland Power filed a request to increase customer rates, with a public hearing expected in the fall of '07.

Other Canadian Electric Utilities

Earnings for the segment were \$1.3 million higher than Q2'06 mainly due to higher electricity sales and a 3.35% rates increase at Maritime Electric, effective July 2006. Electricity sales at Maritime Electric were up 14 GWh and sales at FortisOntario were up 2 GWh.

FortisAlberta

Second quarter results were up \$4.2 million mainly due to customer growth, increased energy deliveries and a 0.7% increase in distribution rates, effective January 2007. In June, FortisAlberta filed its 2008/2009 Distribution Access Tariff, requesting an increase in base distribution rates of 8.5% effective January 2008. The application forecasted gross capital expenditures of \$283 million in 2008 and \$312 million in 2009 to improve system reliability and meet customer growth.

FortisBC

FortisBC reported second quarter earnings of \$6.5 million, \$3.1 million higher than in Q2'06. Improved earnings primarily came from an increase in electricity rates, higher electricity sales and lower energy supply costs. This was partially offset by an increase in operating expenses, amortization and finance costs.

Terasen Gas

Terasen Gas, acquired on May 17 2007, contributed \$1.6 million in earnings during Q2. The operation tends to report its strongest earnings in Q1 and Q4. Going forward, we expect Terasen Gas to provide strong full-year results in 2008.

Regulated Utilities – Caribbean (Belize, Caribbean Utilities, Turks & Caicos)

Q2'07 earnings for the Caribbean utilities segment were up \$3.2 million from Q2'06, mainly due to the earnings contribution from Fortis Turks and Caicos (acquired August 2006) and an increased investment in Caribbean Utilities, partially offset by lower reported earnings at Caribbean Utilities.

Fortis Generation

Normalized earnings at Fortis Generation were down \$1.3 million from Q2'06. The decrease was mainly attributable to decreased production from lower rainfall in Belize, central Newfoundland and Upper New York State.

Fortis Properties

Excluding the sale of Days Inn Sydney last year, Fortis Properties earnings were slightly lower in Q2'07 mainly due to a favorable tax adjustment in Q2'06, slightly offset by contribution from four hotels in western Canada (acquired November 2006).

Corporate

Normalized Q2'07 corporate expenses were \$4.3 million higher from Q2'06 mainly due to higher finance charges related to the Terasen acquisition.

Price Target Calculation

Our \$30 price target is based primarily on our detailed dividend discount valuation models with consideration for EV/EBITDA multiples and P/E multiples. The price target implies an EV/2008E EBITDA multiple of about 11x and a 19.3x multiple of our 2008 EPS forecast. The target multiples are found at the higher end of the stock's historical trading range but all of the pipelines and utilities are trading through peak historical multiples due to the low interest rate environment.

Key Risks To Price Target

Fortis could fall short of our earnings forecasts (and fail to meet our price target) for various reasons, including (but not limited to) the impact of negative regulatory decisions in Alberta and BC, weak power prices in Ontario, low hydro flows, and tourism conditions (real estate division). In addition, the utility stocks are sensitive to changes in Canadian bond yields. If bond yields rise significantly, valuation levels in the sector will likely fall. Fortis can offset a potential rise in bond yields, to some or a full extent, through dividend growth.

Our EPS estimates are shown below:

	1 Qtr.	2 Qtr.	3 Qtr.	4 Qtr.	Yearly
2006 Current	\$0.35A	\$0.33A	\$0.37A	\$0.33A	\$1.38A

IMPORTANT DISCLOSURES:

Analyst Certification: Each CIBC World Markets research analyst named on the front page of this research report, or at the beginning of any subsection hereof, hereby certifies that (i) the recommendations and opinions expressed herein accurately reflect such research analyst's personal views about the company and securities that are the subject of this report and all other companies and securities mentioned in this report that are covered by such research analyst and (ii) no part of the research analyst's compensation was, is, or will be, directly or indirectly, related to the specific recommendations or views expressed by such research analyst in this report.

Potential Conflicts of Interest: Equity research analysts employed by CIBC World Markets are compensated from revenues generated by various CIBC World Markets businesses, including the CIBC World Markets Investment Banking Department within the Corporate and Leveraged Finance Division. Research analysts do not receive compensation based upon revenues from specific investment banking transactions. CIBC World Markets generally prohibits any research analyst and any member of his or her household from executing trades in the securities of a company that such research analyst covers. Additionally, CIBC World Markets generally prohibits any research analyst from serving as an officer, director or advisory board member of a company that such analyst covers.

In addition to 1% ownership positions in covered companies that are required to be specifically disclosed in this report, CIBC World Markets may have a long position of less than 1% or a short position or deal as principal in the securities discussed herein, related securities or in options, futures or other derivative instruments based thereon.

Recipients of this report are advised that any or all of the foregoing arrangements, as well as more specific disclosures set forth below, may at times give rise to potential conflicts of interest.

Important Disclosure Footnotes for Fortis Inc. (FTS)

- 2a Fortis Inc. is a client for which a CIBC World Markets company has performed investment banking services in the past 12 months.
- 2c CIBC World Markets Inc. has managed or co-managed a public offering of securities for Fortis Inc. in the past 12 months.
- 2e CIBC World Markets Inc. has received compensation for investment banking services from Fortis Inc. in the past 12 months.
- 2g CIBC World Markets Inc. expects to receive or intends to seek compensation for investment banking services from Fortis Inc. in the next 3 months.
- 7 CIBC World Markets Corp., CIBC World Markets Inc., and their affiliates, in the aggregate, beneficially own 1% or more of a class of equity securities issued by Fortis Inc.

Pipelines, Utilities, & Power

Fortis Inc.

Outlook Better With Q3 Out Of The Way

- Fortis reported Q3'07 EPS of \$0.20 vs. our estimate of \$0.17 and \$0.37 in Q3'06. Normal seasonal earnings patterns at BC Gas drove the y-o-y decline, but should reverse in Q4. We are maintaining our estimates, Sector Performer rating and \$30 price target.
- In a full report on Fortis dated May 18 2007, we estimated that the BC Gas acquisition would be accretive to EPS by \$0.05 - \$0.10 in its first full year. Now that the financing for that acquisition is in place, the analysis still holds. Our Q4'07 estimate is \$0.45 vs. only \$0.33 in Q4'06.
- Organic growth at Fortis will be lower than it used to be but still solid relative to other utility companies. The Alberta and Caribbean regulated electric utilities together should drive about 5% compound growth in the coming years.
- Growth by acquisition is probably on the backburner for now, while the company digests BC Gas and as financial buyers push valuations higher (Puget Energy a recent example). But with an improved risk profile, we still use a premium 19.4x P/E and 10.5x EV/EBITDA to derive our price target.

Stock Price Performance

CIBC World Markets does and seeks to do business with companies covered in its research reports. As a result, investors should be aware that the firm may have a conflict of interest that could affect the objectivity of this report.

Investors should consider this report as only a single factor in making their investment decision.

See "Important Disclosures" section at the end of this report for important required disclosures, including potential conflicts of interest.

See "Price Target Calculation" and "Key Risks to Price Target" sections at the end of this report, where applicable.

Investment Summary

Fortis reported Q3'07 EPS of \$0.20 vs. our estimate of \$0.17 and \$0.37 in Q3'06. Normal seasonal earnings patterns at BC Gas drove the y-o-y decline, but should reverse in Q4. We are maintaining our estimates, Sector Performer rating and \$30 price target.

Please see the Appendix to this comment for a full breakdown and analysis of earnings by segment.

In a full report on Fortis dated May 18 2007 we estimated the BC Gas acquisition would be accretive to EPS by \$0.05 - \$0.10 in its first full year. Now that the financing for that acquisition is in place, the analysis still holds. BC Gas earns all of its profit in Q1 and Q4. Therefore, we anticipate favorable year-over-year comparisons in the next two quarters. Our Q4'07 estimate is \$0.45 vs. only \$0.33 in Q4'06.

Organic growth at Fortis will be lower than it used to be but still solid relative to other utility companies. The Alberta electric utility is growing rate base at 15% - 20% in the coming years. As tax benefits expire, we see achieved returns on equity falling but rate base growth slightly more than offsetting the impact. Utilities in the Caribbean region including Belize, Grand Cayman and Turks are experiencing sales growth of anywhere from 5% - 20% and increased revenue should largely fall to the bottom line.

Earnings from the Caribbean come in US\$ but the company has now largely hedged its exposure. On the balance sheet, management noted it is fully hedged with US\$ denominated debt. On the income statement, even a \$0.10 move in the C\$/US\$ exchange rate will not likely have a material impact on EPS.

Growth by acquisition is probably on the backburner for now while the company digests BC Gas. It makes little sense to do another acquisition until the gas utility assets are fully integrated. The integration process will probably take about a year.

Financial buyers and industry players have added new challenges in the Fortis acquisition strategy. Consolidating utilities in the Pacific Northwest will be difficult as two have recently been acquired. A small gas utility, Cascades, was acquired by MDU (MDU-NYSE) this summer and more recently Macquarie has announced the acquisition of integrated and regulated gas/electric utility Puget Energy (PSD-NYSE).

The acquisition activity has pushed valuation on Pacific Northwest utilities up. Early in the year, several were trading at only 15x earnings and 7.0 - 8.0x EV/EBITDA. We calculated the Puget acquisition multiples at more than 18.0x earnings and 9.0x EV/EBITDA. At these valuation levels Fortis may not be able to make an accretive acquisition in the region for now.

In the absence of a serious acquisition theme at this time, Fortis is perhaps a less exciting investment at the moment but also a lower risk investment. Our valuation targets consider this risk profile and the management track record of delivering solid organic growth. We still use premium valuation multiples of 19.4x P/E and 10.5x EV/EBITDA to derive our \$30 price target. This target justifies our Sector Performer rating.

Appendix: Summary of Q3'07 Earnings

Exhibit 1. Fortis Earnings Summary and Forecast (\$mln unless per share data)

	CIBC WM			2006A	Previous 2007E	Current 2007E	Previous 2008E	Current 2008E

Reported EPS	\$0.17	\$0.20	\$0.38	\$1.43	\$1.34	\$1.34	\$1.55	\$1.55

Note:

1. Unusual items in 2006 include a \$0.7 million gain from insurance proceeds on NY Hydro asset, a \$1.6 million after-tax gain on the sale of Days Inn Sydney, a \$1.6 million unrealized FX gain and a \$0.7 million after-tax gain on insurance.

Source: Company reports and CIBC World Markets Inc.

Newfoundland Power

Newfoundland Power reported earnings of \$2.7 million in Q3'07, in-line with the \$2.6 million reported in Q3'06. In October, Newfoundland Power filed a revised 2008 General Rate application with the Newfoundland and Labrador Board of Commissioners of Public Utilities, a result of recent negotiations with the Consumer Advocate, and determined that the 2008 allowed ROE should be 8.95%.

Other Canadian Electric Utilities

Earnings for the segment were \$4.4 million, slightly lower than the \$4.7 million in Q3'06 due to increased operating expenses and higher amortization costs, partially offset by lower corporate tax expense. Electricity sales were down 14 GWh mainly due to FortisOntario, a result of lower consumption.

FortisAlberta

Third-quarter results were up \$2.4 million mainly due to customer growth, a 0.7% increase in distribution rates effective January 2007 and increased corporate tax recoveries, partially offset by higher operating expenses, amortization and finance charges. Going forward, corporate income tax recoveries are expected to be minimal.

FortisBC

FortisBC reported third-quarter earnings of \$6.2 million, \$0.5 million higher than in Q3'06 mainly due to increased electricity rates and sales, partially offset by higher operating expenses, amortization and finance charges.

Terasen Gas

Terasen Gas, acquired on May 17 2007, reported a loss of \$3.7 million in Q3. The operation tends to report its strongest earnings in Q1 and Q4. Going forward, we expect Terasen Gas to provide strong full-year results in 2008.

Regulated Utilities – Caribbean (Belize, Caribbean Utilities, Turks & Caicos)

Q3'07 earnings for the Caribbean utilities segment were up \$2.1 million from Q3'06. High earnings were mainly due to the increased investment in Caribbean Utilities and the earnings contribution from Fortis Turks and Caicos (acquired August 2006), partially offset by increased operating, amortization and finance charges.

Fortis Generation

Normalized earnings at Fortis Generation were down \$2.1 million from Q3'06, a result of lower rainfall which led to decreased production in Belize and New York.

Fortis Properties

Fortis Properties earnings were \$1.7 million higher than Q3'06 mainly due contribution growth from Fortis' western Canada hospitality operations, partially offset by higher operating expenses and finance charges.

Corporate

Corporate expenses were \$8 million higher from Q3'06 mainly due to higher finance charges and preference share dividends associated with the Terasen acquisition.

Price Target Calculation

Our \$30 price target is based primarily on our detailed dividend discount valuation models with consideration for EV/EBITDA multiples and P/E multiples. The price target implies an EV/2008E EBITDA multiple of about 10.5x and a 19.4x multiple of our 2008 EPS forecast. The target multiples are found at the higher end of the stock's historical trading range but all of the pipelines and utilities are trading through peak historical multiples due to the low interest rate environment.

Key Risks To Price Target

Fortis could fall short of our earnings forecasts (and fail to meet our price target) for various reasons, including (but not limited to) the impact of negative regulatory decisions in Alberta and BC, weak power prices in Ontario, low hydro flows, and tourism conditions (real estate division). In addition, the utility stocks are sensitive to changes in Canadian bond yields. If bond yields rise significantly, valuation levels in the sector will likely fall. Fortis can offset a potential rise in bond yields, to some or a full extent, through dividend growth.

Our EPS estimates are shown below:

	1 Qtr.	2 Qtr.	3 Qtr.	4 Qtr.	Yearly
2006 Current	\$0.35A	\$0.33A	\$0.37A	\$0.33A	\$1.38A
2007 Prior	\$0.40A	\$0.31A	\$0.17E	\$0.48E	\$1.35E
2007 Current	\$0.40A	\$0.31A	\$0.20A	\$0.45E	\$1.35E
2008 Current	--	--	--	--	\$1.55E

IMPORTANT DISCLOSURES:

Analyst Certification: Each CIBC World Markets research analyst named on the front page of this research report, or at the beginning of any subsection hereof, hereby certifies that (i) the recommendations and opinions expressed herein accurately reflect such research analyst's personal views about the company and securities that are the subject of this report and all other companies and securities mentioned in this report that are covered by such research analyst and (ii) no part of the research analyst's compensation was, is, or will be, directly or indirectly, related to the specific recommendations or views expressed by such research analyst in this report.

Potential Conflicts of Interest: Equity research analysts employed by CIBC World Markets are compensated from revenues generated by various CIBC World Markets businesses, including the CIBC World Markets Investment Banking Department within the Corporate and Leveraged Finance Division. Research analysts do not receive compensation based upon revenues from specific investment banking transactions. CIBC World Markets generally prohibits any research analyst and any member of his or her household from executing trades in the securities of a company that such research analyst covers. Additionally, CIBC World Markets generally prohibits any research analyst from serving as an officer, director or advisory board member of a company that such analyst covers.

In addition to 1% ownership positions in covered companies that are required to be specifically disclosed in this report, CIBC World Markets may have a long position of less than 1% or a short position or deal as principal in the securities discussed herein, related securities or in options, futures or other derivative instruments based thereon.

Recipients of this report are advised that any or all of the foregoing arrangements, as well as more specific disclosures set forth below, may at times give rise to potential conflicts of interest.

Pipelines, Utilities, & Power

Fortis Inc.

Solid End To 2007

- Fortis reported normalized Q4'07 EPS of \$0.46 vs. our estimate of \$0.45 and \$0.33 in Q4'06. Normal seasonal earnings patterns at BC Gas drove the strong y-o-y increase. We are maintaining our estimates, Sector Performer rating and \$30 price target.
- The full year 2007 results highlight a company in transition integrating a large new acquisition. With the Terasen Gas operations delivering seasonally strong Q4 results, the acquisition appears on track to be EPS accretive by \$0.05 - \$0.10 in its first full year.
- Looking forward to 2008 and beyond, organic growth at Fortis will be lower than it used to be but still solid relative to other Canadian utility companies. Cash flow growth should accelerate, as depreciation rises with rate base additions.
- While we see EPS growth in the coming years slowing, we also see reduced risk that justifies premium valuation. In general Fortis should perform relatively well in the current volatile capital market environment as a reliable and defensive dividend-yielding investment.

Stock Price Performance

CIBC World Markets does and seeks to do business with companies covered in its research reports. As a result, investors should be aware that the firm may have a conflict of interest that could affect the objectivity of this report.

Investors should consider this report as only a single factor in making their investment decision.

See "Important Disclosures" section at the end of this report for important required disclosures, including potential conflicts of interest.

See "Price Target Calculation" and "Key Risks to Price Target" sections at the end of this report, where applicable.

Investment Summary

Fortis (FTS-SP) reported normalized Q4'07 EPS of \$0.46 vs. our estimate of \$0.45 and \$0.33 in Q4'06. Normal seasonal earnings patterns at BC Gas drove the strong y-o-y increase. We are maintaining our estimates, Sector Performer rating and \$30 price target.

Please see the Appendix to this comment for a full breakdown and analysis of earnings by segment.

The full year 2007 results highlight a company in transition integrating a large new acquisition. But with the Terasen Gas operations delivering seasonally strong Q4 results (normalized \$45 million in earnings), the acquisition appears on track to be EPS accretive by \$0.05 - \$0.10 in its first full year (mid-2008).

While the core regulated operations delivered solid utility growth, the Q4 results were somewhat tempered by high corporate costs. Higher debt levels and associated financing charges are the culprit, as the company has taken on over \$600 million in unallocated debt for acquisitions (Terasen Gas, hotel properties) and capital expenditure projects. The incremental debt will create a negative drag going forward, but earnings growth should more-than-cover the impact on corporate costs.

Looking forward to 2008 and beyond, organic growth at Fortis will be lower than it used to be, but still solid relative to other Canadian utility companies. The Alberta electric utility is growing rate base at 15%-20% in the coming years. With tax benefits in Alberta expected to taper off this year, we see achieved returns on equity falling towards a more normal range. But the strong rate base growth in Alberta (\$250-\$350 million in annual capex spend over the next few years) should offset most of the ROE drop.

Furthermore, the utilities in the Caribbean region (including Belize, Grand Cayman and Turks) are experiencing strong electricity growth (from 5%-20% per annum). This also creates opportunities for expanded generation capacity, particularly hydro power in Belize. The company has largely hedged its Caribbean investments with US\$ denominated debt, such that increased sales should largely fall directly to earnings for solid growth profile.

The company's capex spending requirements are increasing this year (around \$900 million, up from \$790 million in 2007), but Fortis' cash flow growth is also accelerating. Our modeling shows cash flow from operations rising to over \$600 million this year (vs. only \$300 million in 2006 and \$490 million in 2007), such that Fortis' debt to capital ratio should sustain around 65%. This solid financial position, combined with its now less volatile asset base (over 70% of 2008 earnings from Canadian regulated utilities), reduces the overall investing risk in Fortis stock, in our view.

In summary, while we see EPS growth in the coming years at lower than historical levels, we also see reduced risk that justifies premium valuation. Our \$30 price target is based on premium multiples of 19.4x P/E and 10.5x EV/EBITDA. In general Fortis should perform relatively well in the current volatile capital market environment as a reliable and defensive investment. The total 6% return to our \$30 price target justifies our Sector Performer rating.

Price Target Calculation

Our \$30 price target is based primarily on our detailed dividend discount valuation models with consideration for EV/EBITDA multiples and P/E multiples. The price target implies an EV/2008E EBITDA multiple of about 10.5x and a 19.4x multiple of our 2008 EPS forecast. The target multiples are found at the higher end of the stock's historical trading range but all of the pipelines and utilities are trading through peak historical multiples due to the low interest rate environment.

Key Risks To Price Target

Fortis could fall short of our earnings forecasts (and fail to meet our price target) for various reasons, including (but not limited to) the impact of negative regulatory decisions in Alberta and BC, weak power prices in Ontario, low hydro flows, and tourism conditions (real estate division). In addition, the utility stocks are sensitive to changes in Canadian bond yields. If bond yields rise significantly, valuation levels in the sector will likely fall. Fortis can offset a potential rise in bond yields, to some or a full extent, through dividend growth.

Note:

1. Unusual items in 2007 include a \$2.3 million loss on disposal of steam turbine, \$0.2 million gain from insurance proceeds received at FTS Generation and a \$7 million after-tax gain on the sale of surplus land.
2. Unusual items in 2006 include a \$0.7 million gain from insurance proceeds on NY Hydro asset, a \$1.6 million after-tax gain on the sale of Days Inn Sydney, a \$1.6 million unrealized FX gain and a \$0.7 million after-tax gain on insurance.

Source: Company reports and CIBC World Markets Inc.

Newfoundland Power

Newfoundland Power reported earnings of \$9 million in Q4'07, in line with the \$9 million reported in Q4'06. In October, Newfoundland Power filed a revised 2008 General Rate application with the Newfoundland and Labrador Board of Commissioners of Public Utilities, a result of recent negotiations with the Consumer Advocate, and determined that the 2008 allowed ROE should be 8.95%.

Other Canadian Electric Utilities

Earnings for the segment were \$3 million, in line with the \$3 million reported in Q4'06. A \$2 million after-tax gain at FortisOntario related to a refund received as ordered by a regulator was offset by higher amortization costs and finance charges. Electricity sales were up 10 GWh, mainly due to higher consumption as a result of cooler-than-normal weather in Ontario and PEI and an increase in the number of customers at Maritime Electric.

FortisAlberta

Fourth quarter results were down \$3 million mainly due to higher operating expenses, amortization costs and finance charges. The amortization costs were a result of an increase in capital assets driven by load growth, upgrades and replacement of assets.

FortisBC

FortisBC reported fourth quarter earnings of \$7 million, \$1 million higher than in Q4'06 mainly due to increased electricity rates and sales, partially offset by higher operating expenses, amortization and finance charges.

Terasen Gas

Terasen Gas, acquired on May 17 2007, reported \$52 million in earnings for the fourth quarter. Due to a one-time gain of \$7 million on the sale of surplus land the fourth quarter result was normalized to \$45 million. Terasen tends to report its strongest earnings in Q1 and Q4.

Regulated Utilities – Caribbean (Belize, Caribbean Utilities, Turks & Caicos)

Q4'07 earnings for the Caribbean utilities segment were up \$1 million from Q4'06. Higher earnings were mainly due to the additional 16% stake in Caribbean Utilities, partially offset by lower earnings at Caribbean Utilities as a result of higher operating expenses and the negative impact of foreign currency translation.

Fortis Generation

Reported earnings at Fortis Generation of \$7 million were in line with Q4'06. Lower rainfall was offset by higher average wholesale prices in Ontario and lower operating expenses.

Fortis Properties

Fortis Properties earnings were \$5 million higher than Q4'06 due to a \$4 million favorable corporate tax adjustment and contribution growth from Fortis' western Canada hospitality operations.

Corporate

Corporate expenses were \$11 million higher from Q4'06 mainly due to higher finance charges related to the Terasen acquisition.

Our EPS estimates are shown below:

	1 Qtr.	2 Qtr.	3 Qtr.	4 Qtr.	Yearly
2006 Current	\$0.35A	\$0.33A	\$0.37A	\$0.33A	\$1.38A

Pipelines, Utilities, & Power

Fortis Inc.

Q1 Results Modestly Better Than Expected

- Q1/08 EPS came in at \$0.58, up from \$0.40 in Q1/07 and ahead of our \$0.55 estimate. The main driver of the outperformance in the quarter was Terasen Gas, the B.C. natural gas distribution utility acquired in May 2007, which saw gas volumes increase as a result of cooler weather.
- Newfoundland Power results were down \$5 million y/y, as a result of a shift in the quarterly distribution of purchased power expenses that reduced earnings by \$6 million (\$0.04/share). This shift should result in Q2 and Q3 y/y comparables improving with annual earnings remaining unaffected.
- We have made minor adjustments to our model, with our 2008E EPS rising from \$1.55 to \$1.57. Our 2009 EPS is flat at \$1.57, reflecting the expiry of the contractual contributions to Fortis from the Rankine power facility, mitigated by growth in Fortis' other businesses.
- Our price target rises from \$30.00 to \$31.50, based on a target multiple of 20x 2009E EBITDA. Our Sector Performer rating balances a superior track record and long-term potential against a high valuation and an EPS pause anticipated in 2009.

Stock Price Performance

CIBC World Markets does and seeks to do business with companies covered in its research reports. As a result, investors should be aware that the firm may have a conflict of interest that could affect the objectivity of this report.

Investors should consider this report as only a single factor in making their investment decision.

See "Important Disclosures" section at the end of this report for important required disclosures, including potential conflicts of interest.

See "Price Target Calculation" and "Key Risks to Price Target" sections at the end of this report, where applicable.

Q1 Results

Q1 Earnings Performance

Fortis (FTS-SP) reported Q1 results that were slightly ahead of expectations. Q1/08 operating EPS came in at \$0.58, up from \$0.40 in Q1/07 and ahead of our \$0.55 estimate. Results at Terasen Gas, the B.C. natural gas distribution utility acquired in May 2007, was the main source of the higher-than-expected earnings.

Q1 Highlights And Recent Developments

- **Terasen Gas:** Terasen Gas contributed \$58 million in operating earnings in Q1/08, above of our \$52 million estimate, with no prior comparable quarter given the May 2007 acquisition date. Gas volumes at the utility were up 2.9% y/y, driven by higher consumption due to cooler weather in B.C. Terasen's business is highly seasonal, with virtually all of its earnings generated in Q1 and Q4.
- **Alberta & B.C. Utilities:** Operating earnings from FortisAlberta and FortisBC were \$23 million in Q1/08, down from \$24 million in Q1/07, and in line with our \$23 million forecast. FortisBC results were level versus last year, while FortisAlberta's contribution declined slightly, as customer growth and an increased distribution rate was offset by lower corporate tax recoveries and higher operating expenses.
- **Newfoundland Power:** Newfoundland Power operating earnings were \$6 million in the quarter, down from \$11 million in Q1/07, and below our \$9 million estimate. The decline is the result of a shift in the quarterly distribution of purchased power expenses, thus reducing Q2/08 earnings by \$6 million (\$0.04/share). In 2007, Newfoundland Power estimated and recognized monthly purchased power expenses based on forecast annual average cost per kWh, with the difference between the estimated and actual monthly expense being adjusted to a regulatory reserve. This regulatory reserve was discontinued in 2008, and as a result, purchased power expenses are now recorded at actual cost per kWh. This shift has the effect of reducing earnings in Q1 and Q4, when power prices are higher, and improving earnings in Q2 and Q3, with annual earnings remaining unaffected.
- **Non-regulated Operations:** Non-regulated operations contributed \$9 million in earnings in Q1/07, in line with \$9 million in Q1/07, and below our \$10 million estimate. Fortis Generation earnings were \$6 million in Q1/08, down from \$7 million in the same quarter last year, as a result of lower production in Belize due to decreased rainfall, reduced average wholesale energy prices in Ontario, and the negative impact of foreign exchange. Fortis Properties contributed \$3 million to earnings, up from \$2 million in Q1/07, due to the impact of the Delta Regina acquisition in August 2007.
- **Mt. Hayes Natural Gas Storage Facility:** On April 1, Terasen received final regulatory approval for the construction of the Mt. Hayes natural gas storage facility on Vancouver Island. The facility will be able to hold 1.5 Bcf of liquefied natural gas, is expected to be in-service by late 2011, and has an estimated cost of \$200 million.

Reported EPS	0.58	0.55	0.38	1.57	1.57

Source: Company reports and CIBC World Markets Inc.

Revising Estimates

We have made minor modifications to our model, raising our expected contribution from Terasen and Fortis Properties slightly. As a result, our 2008E EPS increases from \$1.55 to \$1.57. Our 2009E EPS is set at \$1.57, reflecting the expiry of contractual contributions to Fortis from the Rankine power facility, mitigated by growth in Fortis' other businesses.

Price Target Determination

Our price target is raised from \$30.00 to \$31.50, and is based on a target multiple of 20x 2009E EPS, at the high end of Canadian utilities comparables. Our fulsome target reflects both Fortis' impressive track record and longer-term growth outlook.

Outlook And Investment Summary

Longer-term, a \$4 billion capital program over the next five years underlies solid EPS growth potential. We currently anticipate Fortis' combined \$6 billion rate base to grow at a CAGR of 6% through 2012. Fortis currently trades at 17.9x 2009E EPS, deservedly at the higher end of the Canadian utilities group given its strong track record and long-term growth potential. We maintain our Sector Performer rating, balancing strong historical performance and long-term growth

opportunities against high valuations and a pause in EPS growth expected in 2009.

Key Risks To Price Target

Fortis could fall short of our earnings forecasts (and fail to meet our price target) for various reasons, including (but not limited to) the impact of negative regulatory decisions in Alberta and BC, weak power prices in Ontario, low hydro flows, and tourism conditions (real estate division). In addition, the utility stocks are sensitive to changes in interest rates.

Our EPS estimates are shown below:

	1 Qtr.	2 Qtr.	3 Qtr.	4 Qtr.	Yearly
2007 Current	\$0.40A	\$0.31A	\$0.20A	\$0.46A	\$1.36A
2008 Prior	--	--	--	--	\$1.55E
2008 Current	\$0.58A	\$0.29E	\$0.23E	\$0.47E	\$1.57E
2009 Current	--	--	--	--	\$1.57E

IMPORTANT DISCLOSURES:

Analyst Certification: Each CIBC World Markets research analyst named on the front page of this research report, or at the beginning of any subsection hereof, hereby certifies that (i) the recommendations and opinions expressed herein accurately reflect such research analyst's personal views about the company and securities that are the subject of this report and all other companies and securities mentioned in this report that are covered by such research analyst and (ii) no part of the research analyst's compensation was, is, or will be, directly or indirectly, related to the specific recommendations or views expressed by such research analyst in this report.

Potential Conflicts of Interest: Equity research analysts employed by CIBC World Markets are compensated from revenues generated by various CIBC World Markets businesses, including the CIBC World Markets Investment Banking Department within the Corporate and Leveraged Finance Division. Research analysts do not receive compensation based upon revenues from specific investment banking transactions. CIBC World Markets generally prohibits any research analyst and any member of his or her household from executing trades in the securities of a company that such research analyst covers. Additionally, CIBC World Markets generally prohibits any research analyst from serving as an officer, director or advisory board member of a company that such analyst covers.

In addition to 1% ownership positions in covered companies that are required to be specifically disclosed in this report, CIBC World Markets may have a long position of less than 1% or a short position or deal as principal in the securities discussed herein, related securities or in options, futures or other derivative instruments based thereon.

Recipients of this report are advised that any or all of the foregoing arrangements, as well as more specific disclosures set forth below, may at times give rise to potential conflicts of interest.

Important Disclosure Footnotes for Fortis Inc. (FTS)

Pipelines, Utilities, & Power

Fortis Inc.

Exceptional Growth Through Acquisition

- Fortis has established an impressive long-term track record of EPS and dividend growth, driven by aggressive and timely acquisitions of regulated utilities in Canada and the Caribbean. Assets have grown from a little over \$2 billion in 2004 to \$10 billion at the end of 2007.
- We look for EPS to grow from \$1.36 in 2007 to \$1.57 in 2008, followed by a temporary leveling out in 2009 at \$1.57. A capital program amounting to some \$4 billion over the next five years underlies strong growth in core earnings, while the pause in 2009 reflects the expiry of a contract with OPG.
- Look for the combined \$6 billion rate base to grow at a CAGR of 6% through 2012. Particularly impressive is FortisAlberta, whose \$1.1 billion rate base will see more than \$275 million in annual investment over the next five years. Strong growth is also expected for FortisBC and Caribbean assets.
- Our target multiple of 20x 2009E EPS reflects both track record and long-term opportunity, while our SP rating balances this against a temporary pause in earnings growth expected in 2009. Accretive acquisitions remain a strong possibility. As of 5/19, we are assuming coverage of Fortis.

Investment Summary

Fortis (FTS-SP) has established an impressive long-term track record of EPS and dividend growth, driven by aggressive and timely acquisitions of regulated utilities in Canada and the Caribbean. We anticipate further EPS growth in 2008, followed by a pause in 2009, while investment opportunities amounting to some \$4 billion between 2008 and 2012 bode well for growth in the longer term. Fortis currently trades at 17.3x 2008E and 2009E EPS of \$1.57, above the Canadian utilities average 16.0x. Our \$31.50 price target is based upon a multiple of 20x 2009E EPS, while our Sector Performer rating adequately balances Fortis' exceptional track record and long-term growth opportunities against temporarily moderated EPS growth anticipated in 2009.

Regulated Utilities Represent The Core Of Fortis' Earnings

Regulated utility operations in both Canada and the Caribbean together comprise roughly 85% of Fortis' total operating earnings contributions for 2008 and represent over \$6 billion in collective rate base, which is anticipated to grow at a compound annual growth rate of 6% over the next five years. These operations provide a highly stable core to Fortis' earnings, in addition to contributing growth to the bottom line, as both western Canadian and Caribbean electrical utility operations are experiencing strong growth in electricity demand, resulting in infrastructure investment opportunity.

An Active Acquirer

Fortis has proven to be a capable and aggressive acquirer of regulated utilities, having grown its assets from a little over \$2 billion in 2004 to roughly \$10 billion by the end of 2007. Major acquisitions over the past four years include FortisAlberta and FortisBC, which virtually doubled the size of the company in 2004, and the more recent acquisition of Terasen Gas, which doubled the company's size yet again in 2007. Timing has also been particularly adept in light of significant rate base growth in the western utilities' rate bases since the acquisition. Accretive earnings growth through acquisition has supported what is perhaps the most impressive dividend growth profiles in Canada, with per share payouts rising for 34 consecutive years.

EPS Growth Profile

We look for operating EPS to grow to \$1.57 in 2008 from \$1.36 in 2007 and then level out at \$1.57 in 2009. Growth expectations in the current year reflect a full-year contribution from Terasen, while a leveling in 2009 is the product of the April 29, 2009, expiry of contractual contributions to Fortis from the Rankine Power Facility, mitigated by growth in Fortis' other businesses. A capital program that will see roughly \$890 million spent in 2008 (roughly half of which is designated as growth expenditures) and another \$3.1 billion anticipated between 2009 and 2012 underlies strong EPS growth in the long term; Fortis' regulated rate base is expected to grow from \$6.3 billion in mid-2007 to \$8.6 billion in 2012, representing a compound annual growth rate of roughly 6%.

Consolidated Outlook

Operating EPS for Fortis came in at \$1.36 in 2007 versus \$1.39 in 2006. Fortis acquired Terasen in May 2007 for \$3.7 billion and, coinciding with the purchase, completed a \$1.15 billion common share issue, which along with drawings of credit facilities and assumed debt for the balance funded the acquisition. The common share issue, combined with the earnings seasonality of Terasen, diluted EPS by approximately \$0.07. This was mitigated by the first full-year contribution from Fortis Turks and Caicos, significant investment in electrical infrastructure at FortisAlberta and FortisBC, stronger performance at Fortis Properties and lower effective corporate taxes. We would note that generally lower allowed ROEs in 2007 were more than offset by rate base growth in Fortis' regulated operations.

We are currently forecasting EPS to grow to \$1.57 in both 2008 and 2009, reflecting the first full year of contribution from Terasen, generally higher allowed ROEs for 2008, and ongoing growth in rate bases, particularly for FortisAlberta, FortisBC and Fortis' Caribbean operations. The relative pause in growth for 2009 reflects the April 29, 2009, expiry of an agreement between FortisOntario and the Ontario Power Generation Inc. that since 2005 has provided for the exchange of power from the Rankine Power Facility to FortisOntario in return for transfer of FortisOntario's water rights on the Niagara River.

Regulated Operations Outlook

Terasen Gas

In a landmark transaction for the company, Fortis acquired Terasen in May 2007, the principal natural gas distribution utility in BC serving 900,000 customers, or 95% of the natural gas users in the province. The total purchase price was \$3.7 billion, funded by the combination of a \$1.15 billion equity issue completed coincident with the closing of the acquisition in May, assumed debt and incremental drawings on credit facilities. Operating earnings in 2007 contributed from the May 17 closing of the acquisition amounted to \$43 million. We would note that the acquisition, combined with the share issue, diluted Fortis' 2007 earnings by approximately \$0.07/share in 2007, reflecting the fact that Terasen's seasonally strongest quarter (Q1) was not a part of the 2007 contribution to Fortis' results. For 2008 and 2009, we anticipate earnings contributions of \$105 million and \$107 million, respectively, from Terasen, reflecting rate base growth of 1.5%-2%. Terasen's anticipated rate base at mid-year 2008 is approximately \$2.9 billion with allowed ROEs for 2008 of 8.62%-9.32%, up from 8.37%-9.07% in 2007.

In April 2008, Terasen received final regulatory approval to construct and operate a 1.5 billion-cubic-foot liquid natural gas storage facility on Vancouver Island. The project is estimated to cost \$200 million and is expected to be in service by late 2011.

FortisAlberta And FortisBC

On a combined basis, electrical utilities FortisAlberta and Fortis BC contributed operating earnings of \$79 million in 2007, up from \$69 million in 2006. The increase reflected strong growth in both utilities' customer bases and associated significant investment in electricity infrastructure, higher corporate income tax recoveries at FortisAlberta, and rate increases at FortisBC. For 2008, we anticipate a relatively flat combined earnings contribution of \$79 million, reflecting a reversal of FortisAlberta's 2007 tax recovery, mitigated by strong customer growth and related investment, the latter expected to take earnings

up to \$86 million in 2009. We anticipate a combined rate base of \$1.9 billion in mid-2008 (versus \$1.7 billion currently), which is up 200% from when both utilities were purchased in 2004. We expect the combined rate bases to grow to in excess of \$3 billion by 2012.

With an expected rate base of \$1.1 billion in mid-2008, FortisAlberta will see more than \$275 million in annual investment over the next five years to increase the reliability of its system and to meet load growth. FortisAlberta's negotiated settlement agreement relating to its 2008 and 2009 electricity rates were approved recently, resulting in rate increases of 6.8% and 7.3% for 2009, and based upon plans for \$264 million in capital spending in 2008 and \$296 million in 2009. Allowed ROE for FortisAlberta is set at 8.75% for 2008, up from 8.51% in 2007.

For FortisBC, the mid-year 2008 rate base is forecast to be roughly \$820 million, while average annual capital expenditures of \$130 million are expected over the next five years. In December 2007, FortisBC received regulatory approval in respect of a negotiated settlement agreement resulting in a rate increase of 2.9% for 2008, based upon capital expenditures of \$132 million in 2008. Allowed ROE for FortisBC is 9.02% for 2008, up from 8.77% in 2007.

Newfoundland Power

Newfoundland Power contributed \$30 million in operating earnings in 2007, unchanged from \$30 million in 2006. Newfoundland Power's rate base is expected to grow at a comparatively lower rate of 1%-2% annually for the foreseeable future, while for 2008, its average customer rate has been approved and anticipated to grow by an average of 2.8% over 2007 and reflect an allowed ROE of 8.95% versus 8.6% in 2007. Capital spending of \$51 million is budgeted for 2008, while Newfoundland Power's rate base is forecast at \$817 million by mid-year. We expect reasonably level earnings from Newfoundland Power in 2008 and 2009, at \$30 million and \$31 million, respectively.

Caribbean Power Assets

Fortis' regulated electricity utilities in the Caribbean are experiencing strong growth in electricity sales. On a combined basis, Belize Electricity (70.1% interest), Caribbean Utilities (CUP.U-TSX) (54% interest) and Fortis Turks and Caicos (100% interest) contributed \$33 million to consolidated operating earnings in 2007 versus \$24 million in 2006. The growth reflected a full year of contributions from Fortis Turks and Caicos, which was acquired in August 2006, an additional 16% interest in Caribbean Utilities acquired in November 2006, and respective year-over-year growth rates in electricity sales growth of 6%, 8% and 16% for Belize, Caribbean and Turks and Caicos. Robust growth rates going forward, along with associated investment in infrastructure, underpin our forecast for combined earnings of \$37 million in both 2008 and 2009.

Other Canadian Electric Utilities

Other Canadian electric utilities, including Maritime Electric and FortisOntario contributed earnings of \$16 million in 2007, compared to \$14 million in 2006, primarily reflecting higher electricity sales and basic electricity rates. We are forecasting relatively stable earnings of \$15 million and \$16 million for 2008 and 2009, respectively.

Non-regulated Operations Outlook

Fortis Generation

Fortis' non-regulated generation assets include the operations of non-regulated generating assets across Canada, in Belize and upper New York State, with a combined generating capacity of 195 MW, 190 MW of which are hydro assets. Fortis Generation contributed \$24 million in earnings in 2007, compared to \$27 million in 2006. The small decline reflects, in general, lower hydroelectric power production during 2007 due to less rainfall. Currently we are forecasting Fortis Generation earnings of \$26 million in 2008, declining to \$17 million in 2009. The decline reflects the April 2009 expiry of the agreement between FortisOntario and Ontario Power Generation Inc. that was reached in 2005, which saw the exchange of 75 MW of power supply from the Rankine Power Facility to FortisOntario until April 30, 2009, in exchange for the transfer of FortisOntario's water rights on the Niagara River.

In 2007, Fortis received approvals for the construction of a \$53-million, 18-MW hydroelectric generating facility at Vaca on the Macal River in Belize. The facility will increase average annual energy production by 80 GWh in late 2009 when it comes on stream. Currently we have earnings contributions from Vaca starting in 2010, at an annual rate of roughly \$6 million, partially mitigating the lost production from Rankine.

Fortis Properties

Fortis Properties, which represents Fortis' ownership and operation of 19 Canadian hotels and approximately 2.8 million square feet of commercial real estate primarily in Atlantic Canada, contributed \$24 million in operating earnings in 2007, up from \$17 million in 2006. The earnings growth reflected expanded operations in Western Canada, with the acquisition of the Delta Regina in August 2007 for roughly \$50 million and a positive corporate tax adjustment in 2007. Currently we are forecasting earnings of \$26 million and \$27 million for 2008 and 2009, respectively.

Summary Of Fortis' Capital Expenditure Program And Allowable Returns

Exhibit 1 summarizes Fortis' expected capital program. For 2008, the company is forecasting total capital expenditures of \$890 million, 50% of which is designated as growth expenditures and 50% as sustaining and other. For 2009-2012, the company is guiding to an average capital investment of roughly \$780 million per year (or a total of \$4 billion between 2008 and 2012). In terms of regulated rate base, the company is forecasting that to grow from \$6.3 billion in mid-2007 to \$8.6 billion by 2012, representing a compound annual growth rate of roughly 6%.

<i>Sustaining And Other</i>	<i>427</i>	<i>445</i>	<i>445</i>

Source: Company reports and CIBC World Markets Inc.

Over the near term, the company is well situated with consolidated unused credit facilities exceeding \$1.1 billion (of \$2.2 billion total), which are available to be used for capital expenditures. Moreover, Fortis has had a considerable degree of success accessing the credit market within the recent turmoil, with Terasen having, as recently as February 2008, raised 30-year debt at a rate of 6.05% in February. Beyond that, over the next five years, in the context of a \$4-billion capital program (assuming no acquisitions), Fortis does expect to return to the debt markets at the utility level, in addition to periodically accessing the equity markets for comparatively small amounts when conditions warrant. Of course, given Fortis' track record of significant acquisition activity, future acquisitions would require incremental funding considerations, which would likely include more considerable equity funding.

Returns on Fortis' regulated Canadian assets range from allowed 2008 ROEs of 8.62% to 10% (on equity thicknesses ranging from 35% to 50%), while regulated returns on Fortis' Caribbean assets are ROA based and generally range between 10% and 17.5%.

Financial Forecasts

Valuation

Fortis currently trades at 17.3x 2008E and 2009E EPS of \$1.57, at the higher end of Canadian utilities valuations in consideration of Fortis' track record of EPS and dividend growth, its stability, and its attractive long-term organic growth opportunities. Fortis' acquisition currency, along with its defensive character, could very well spell additional accretive acquisitions in its future, given a financing environment that remains otherwise difficult.

Price Target Calculation

Our \$31.50 price target is based upon a sector-leading target multiple of 20x 2009E EPS, while our Sector Performer rating adequately balances Fortis' exceptional track record and long-term growth opportunities against temporarily moderated EPS growth anticipated in 2009.

Key Risks To Price Target

Fortis could fall short of our earnings forecasts (and fail to meet our price target) for various reasons, including (but not limited to) the impact of negative regulatory decisions in Alberta and B.C., weak power prices in Ontario, low hydro flows, environmental costs that cannot be adequately recovered through higher rates, and tourism conditions (real estate division). In addition, the utility stocks are sensitive to changes in interest rates.

Our EPS estimates are shown below:

	1 Qtr.	2 Qtr.	3 Qtr.	4 Qtr.	Yearly
2007 Current	\$0.40A	\$0.31A	\$0.20A	\$0.46A	\$1.36A
2008 Current	\$0.58A	\$0.29E	\$0.23E	\$0.47E	\$1.57E
2009 Current	--	--	--	--	\$1.57E

IMPORTANT DISCLOSURES:

Analyst Certification: Each CIBC World Markets research analyst named on the front page of this research report, or at the beginning of any subsection hereof, hereby certifies that (i) the recommendations and opinions expressed herein accurately reflect such research analyst's personal views about the company and securities that are the subject of this report and all other companies and securities mentioned in this report that are covered by such research analyst and (ii) no part of the research analyst's compensation was, is, or will be, directly or indirectly, related to the specific recommendations or views expressed by such research analyst in this report.

Potential Conflicts of Interest: Equity research analysts employed by CIBC World Markets are compensated from revenues generated by various CIBC World Markets businesses, including the CIBC World Markets Investment Banking Department within the Corporate and Leveraged Finance Division. Research analysts do not receive compensation based upon revenues from specific investment banking transactions. CIBC World Markets generally prohibits any research analyst and any member of his or her household from executing trades in the securities of a company that such research analyst covers. Additionally, CIBC World Markets generally prohibits any research analyst from serving as an officer, director or advisory board member of a company that such analyst covers.

In addition to 1% ownership positions in covered companies that are required to be specifically disclosed in this report, CIBC World Markets may have a long position of less than 1% or a short position or deal as principal in the securities discussed herein, related securities or in options, futures or other derivative instruments based thereon.

Recipients of this report are advised that any or all of the foregoing arrangements, as well as more specific disclosures set forth below, may at times give rise to potential conflicts of interest.

Important Disclosure Footnotes for Fortis Inc. (FTS)

- 2a Fortis Inc. is a client for which a CIBC World Markets company has performed investment banking services in the past 12 months.

Pipelines, Utilities, & Power

Fortis Inc.

In-line Q2; Belize Concerns Overdone

- Q2/08 EPS came in at \$0.28, down from \$0.31 in Q2/07, and in line with our \$0.29 estimate. Higher-than-expected earnings in Terasen Gas offset lower earnings at FortisAlberta, which had an increase in future tax expenses in the quarter that is expected to reverse in the future.
- Fortis took a \$13 million (\$0.08/share) one-time charge related to disallowed previously incurred fuel and purchase price costs at Belize Electricity. The decision, which is being appealed, also reduces the utility's allowed return on assets from 12% to 10%.
- We have reduced our contribution from the Caribbean Utilities segment in light of the decision in Belize. As a result, our 2008 EPS estimate declines from \$1.57 to \$1.54, while our 2009 EPS estimate declines from \$1.57 to \$1.52.
- We are lowering our price target from \$31.50 to \$30.50 reflecting reduced 2009 earnings estimates, and a fulsome 20x 2009E EPS target multiple (unchanged). Our Sector Performer rating balances strong long-term growth potential with a pause in EPS growth anticipated in 2009.

Q2 Results

Q2 Earnings Performance

Fortis (FTS-SP) reported Q2 results that, overall, were in line with expectations. Q2/08 operating EPS came in at \$0.28, down from \$0.31 in Q2/07 but in line with our \$0.29 forecast. Higher-than-expected earnings from Terasen Gas offset lower earnings in Alberta & B.C. Utilities.

Q2 Highlights

- **Terasen Gas:** Terasen Gas contributed \$12 million in operating earnings in Q2/08, up from \$1 million in Q2/07, which was a partial quarter in light of the May 17, 2007, acquisition closing date. Results were ahead of our estimate of \$8 million. Gas volumes were up 1.9% in Q2/08 compared to the full quarter in 2007. Terasen's business is highly seasonal, with virtually all of its earnings generated in the first and last quarter of the year.
- **Alberta & B.C. Utilities:** Operating earnings from FortisAlberta and FortisBC totaled \$14 million in the quarter, down from \$22 million in Q2/07, and below our \$22 million estimate. The reduction in earnings is the result of a \$7.5 million increase in future income tax expenses at FortisAlberta associated with regulated-approved deferral accounts and the timing of their collection. The company expects to record a future income tax recovery when the deferral accounts are collected.
- **Newfoundland Power:** Newfoundland Power operating earnings were \$10 million, up from \$8 million in Q2/08, and in line with our \$10 million estimate. Higher earnings reflected a quarterly shift in the distribution of purchased power expenses, increasing earnings by \$2.5 million in the quarter. This shift has the effect of reducing earnings in Q1 and Q4, when power prices are higher, and improving earnings in Q2 and Q3, leaving annual earnings unaffected.
- **Caribbean Utilities:** Earnings from the Caribbean Utilities totaled \$8 million, unchanged from Q2/07, and in line with our \$8 million estimate. Adjusted Q2/08 results exclude a \$13 million (\$0.08) charge related to previously incurred fuel and purchase price costs at Belize Electricity that have been disallowed by the Belize's Public Utility Commission (PUC). The decision also had the effect of reducing Belize Electricity's allowed return on assets from 12% to 10% going forward. Belize Electricity has filed an application for judicial review and appeal of the decision with the Supreme Court of Belize.
- **Non-Regulated Operations:** Non-regulated operations contributed \$14 million to earnings in the quarter, up from \$11 million in Q2/07, and above our \$12 million estimate. Fortis Generation earnings totaled \$7 million, up from \$5 million in Q2/07 reflecting higher production in Newfoundland due to higher rainfall, and increased average wholesale energy prices in Ontario and New York. Fortis Properties earnings totaled \$7 million, up from \$6 million in Q2/07 due to the impact of the Delta Regina acquisition in August 2007, and the improved performance from the company's hospitality operations in Atlantic Canada.

Minor Model Adjustments

We are reducing our forecasted contribution from the Caribbean Utilities segment in light of the PUC decision in Belize. As a result, our 2008E EPS declines from \$1.57 to \$1.54, while our 2009E EPS declines from \$1.57 to \$1.52.

Outlook and Investment Summary

The situation in Belize has likely received too much of the market's attention of late, particularly considering the relative size of the business (less than 5% of earnings). A \$4.5 billion capital program over the next five years underlies solid long-term growth potential, beyond a shorter-term slowing in growth anticipated in 2009 and related to the expiry of the Rankine contract with Ontario Power Generation. Fortis has been an active acquirer in the past, and with the integration of Terasen Gas complete, further accretive acquisitions remain a strong possibility. Our Sector Performer rating balances long-term growth potential against a high valuation and a near-term pause in EPS growth anticipated in 2009.

Price Target Calculation

Our price target is reduced from \$31.50 to \$30.50 as a result of lower 2009 earnings estimates. Our target remains based on a high-end P/2009E EPS of 20x, which reflects both Fortis' impressive track record and longer-term growth potential.

Key Risks To Price Target

Fortis could fall short of our earnings forecasts (and fail to meet our price target) for various reasons, including (but not limited to) the impact of negative regulatory decisions in Alberta and BC, weak power prices in Ontario, low hydro flows, environmental costs that cannot be adequately recovered through higher rates, and tourism conditions (real estate division). In addition, the utility stocks are sensitive to changes in interest rates.

Our EPS estimates are shown below:

	1 Qtr.	2 Qtr.	3 Qtr.	4 Qtr.	Yearly
2007 Current	\$0.40A	\$0.31A	\$0.20A	\$0.46A	\$1.36A
2008 Prior	\$0.58A	\$0.29E	\$0.23E	\$0.47E	\$1.57E
2008 Current	\$0.58A	\$0.28A	\$0.22E	\$0.46E	\$1.54E
2009 Prior	--	--	--	--	\$1.57E
2009 Current	--	--	--	--	\$1.52E

IMPORTANT DISCLOSURES:

Analyst Certification: Each CIBC World Markets research analyst named on the front page of this research report, or at the beginning of any subsection hereof, hereby certifies that (i) the recommendations and opinions expressed herein accurately reflect such research analyst's personal views about the company and securities that are the subject of this report and all other companies and securities mentioned in this report that are covered by such research analyst and (ii) no part of the research analyst's compensation was, is, or will be, directly or indirectly, related to the specific recommendations or views expressed by such research analyst in this report.

Potential Conflicts of Interest: Equity research analysts employed by CIBC World Markets are compensated from revenues generated by various CIBC World Markets businesses, including the CIBC World Markets Investment Banking Department. Research analysts do not receive compensation based upon revenues from specific investment banking transactions. CIBC World Markets generally prohibits any research analyst and any member of his or her household from executing trades in the securities of a company that such research analyst covers. Additionally, CIBC World Markets generally prohibits any research analyst from serving as an officer, director or advisory board member of a company that such analyst covers.

In addition to 1% ownership positions in covered companies that are required to be specifically disclosed in this report, CIBC World Markets may have a long position of less than 1% or a short position or deal as principal in the securities discussed herein, related securities or in options, futures or other derivative instruments based thereon.

Recipients of this report are advised that any or all of the foregoing arrangements, as well as more specific disclosures set forth below, may at times give rise to potential conflicts of interest.

Pipelines, Utilities, & Power

Fortis Inc.

Strong Q3 Results Driven By The Generation Segment

- Q3/08 operating EPS came in at \$0.26, up from \$0.20 in Q3/07 and above our \$0.22 estimate. Results reflected a stronger-than-expected contribution from Fortis Generation, while the other segments reporting results were in line with expectations.
- Fortis Generation contributed \$9 million to earnings in the quarter, up from \$5 million in Q3/07 and above our \$6 million estimate, due to increased energy sales (up 20.1%) from higher production in Belize and upper New York State, and higher energy prices in Ontario and New York.
- We have made minor adjustments to reflect a higher contribution from Fortis Generation and Terasen Gas, partially offset by the impact of Hurricane Ike on the Caribbean Utilities segment. Our 2008E and 2009E EPS increases from \$1.54 and \$1.52 to \$1.60 and \$1.57, respectively.
- Our price target is reduced from \$30.50 to \$28.50, based on an 18x 2009E EPS multiple, down from 20x previously reflecting a general decline in valuations. Our SP rating balances strong long-term core rate base growth against a near-term pause in EPS growth and a premium valuation.

Q3 Results

Q3 Earnings Performance

Fortis (FTS-SP) reported Q3/08 adjusted EPS of \$0.26, up from \$0.20 in Q3/07, and above our \$0.22 estimate. The outperformance in the quarter was due to strong-than-expected results at Fortis Generation.

Q3 Highlights

- **Alberta & B.C. Utilities:** Operating earnings from FortisAlberta and FortisBC totaled \$25 million, up from \$21 million in Q3/07, and in line with our \$25 million estimate. The y/y increase is the result of increased future income tax recoveries associated with regulator-approved deferral accounts at FortisAlberta, and decreased energy costs due to a higher proportion of energy from company-owned plants compared to purchased power at FortisBC.
- **Newfoundland Power:** Newfoundland Power operating earnings totaled \$8 million, up from \$3 million in Q3/07, and in line with our \$7 million estimate. The y/y increase reflects a quarterly shift in the distribution of purchased power expenses, which increased earnings by \$5.5 million in Q3/08. This shift has the effect of reducing earnings in Q1 and Q4, and improving earnings in Q2 and Q3, leaving annual earnings unaffected.
- **Caribbean Utilities:** Earnings from the Caribbean Utilities totaled \$7 million, down from \$10 million in Q3/07 and in line with our \$8 million estimate. The y/y decline is due to lower allowed ROA at Belize Electricity, lower basic electricity rates at Caribbean Utilities, and revenue lost at Fortis Turks and Caicos due to the impact of Hurricane Ike (earnings impact of \$1 million). Revenue losses as a result of Hurricane Ike are also expected to be \$1 million in Q4.
- **Terasen Gas:** Terasen Gas lost \$5 million in the quarter, in line with the \$4 million loss in Q3/07 and our estimate of a \$5 million loss. Terasen's business is highly seasonal with virtually all of its earnings generated in the first and last quarter of the year.
- **Fortis Generation:** Fortis Generation contributed \$9 million to earnings in the quarter, up from \$5 million in Q3/07 and above our \$6 million forecast. Energy sales increased 51 GWh (20.1%) in Q3/08 as a result of higher production in Belize and upper New York State due to higher rainfall. This combined with increased average wholesale energy prices in Ontario and upper New York State led to the increased y/y earnings.
- **Fortis Properties:** Fortis Properties earnings totaled \$9 million, compared to \$8 million in Q3/07 and our \$8 million estimate, as result of improved performance in the hospitality and real estate divisions, as well as the contribution of the Delta Regina which was acquired on August 1, 2007.

Minor Model Adjustments

We have made some minor adjustments to our model including increasing our Fortis Generation and Terasen Gas contribution, partially offset by a lower contribution in Caribbean Utilities due to the impact of Hurricane Ike. Our 2008E EPS increases from \$1.54 to \$1.60, while our 2009E EPS increases from \$1.52 to \$1.57.

Outlook And Investment Summary

Outlook and investment considerations include the following:

- **Strong Rate Base Growth:** Fortis' collective rate base is expected to grow from roughly \$7 billion currently at a CAGR of 7% through 2013, contributing to steady underlying growth to core earnings.
- **Flat 2009E EPS:** The flattish forecast for 2009 EPS reflects the April 2009 expiry of the agreement between Fortis Ontario and OPG under which Fortis received 75 MW of power supply from the Rankine Power Facility in exchange for Fortis' water rights on the Niagara River.
- **Valuation:** Fortis currently trades at 16.8x 2009E EPS compared with 14.5x for Emera (EMA-SP) and 14.4x for Canadian Utilities (CU-SP), a premium

that reflects Fortis' comparative stability (92% of total assets represent regulated utility operations) and superior core rate base growth.

- **Capital Program and Liquidity:** On an annual basis, roughly \$470 million in cash flow after dividend payment is available in the context of a \$900 million per annum capital program (annual average over the next five years). In that context, Fortis does expect to return to the debt markets at the utility level, in addition to periodically accessing the equity markets for comparatively small amounts when conditions warrant. Fortis has roughly \$1.5 billion in undrawn credit facilities available at the end of the third quarter.

While the growth-through-acquisition play has likely receded for the time being given the state of capital markets, Fortis can fall back on underlying regulated rate base growth, although investors may require patience as Rankine power supply ceases next year. At this stage, given the flattish EPS outlook over the next year and premium valuation, we maintain our SP rating.

Price Target Calculation

We are reducing our price target from \$30.50 to \$28.50, based on an 18x 2009E EPS target multiple, down from 20x previously, reflecting a general decline in valuations. Our target remains at the high end of anticipated utility valuations, reflecting Fortis core rate base growth potential, along with its track record of well-timed acquisitions.

Key Risks To Price Target

Fortis could fall short of our earnings forecasts (and fail to meet our price target) for various reasons, including (but not limited to) the impact of negative regulatory decisions in Alberta and BC, weak power prices in Ontario, low hydro flows, environmental costs that cannot be adequately recovered through higher rates, and tourism conditions (real estate division). In addition, the utility stocks are sensitive to changes in interest rates.

Our EPS estimates are shown below:

	1 Qtr.	2 Qtr.	3 Qtr.	4 Qtr.	Yearly

Pipelines, Utilities, & Power

Fortis Inc.

Updating Estimates On Share Issuance

- Fortis recently completed a common share offering of 11.7 million common shares at a price of \$25.65 per share, resulting in gross proceeds to Fortis of \$300.1 million. The underwriters also have an over-allotment option to purchase up to an additional 1.755 million shares.
- Given Fortis generates roughly \$470 million in cash flow after dividends annually, and has average annual capex and LT debt maturities of \$900 million and \$180 million, respectively, over the next five years, we expect it to continue to access the debt and, to a lesser extent, equity markets.
- Fortis will be using the proceeds to repay debt and for corporate purposes. Our 2009 EPS estimate is reduced from \$1.57 to \$1.49, while our 2010 EPS estimate is set at \$1.56.
- Our price target is reduced from \$28.50 to \$28.00, reflecting the share issuance and an 18x 2010E EPS multiple (vs. 18x 2009E EPS previously). We maintain our SP rating, balancing strong long-term rate base growth against an interim pause in EPS growth and a premium valuation.

See "Price Target Calculation" and "Key Risks to Price Target" sections at the end of this report, where applicable.

CIBC World Markets Inc., P.O. Box 500, 161 Bay Street, Brookfield Place, Toronto, Canada M5J 2S8 (416) 594-7000

\$300 Million Equity Financing

Recently, Fortis (FTS-SP) completed a common share offering of 11.7 million common shares at a price of \$25.65 per share, resulting in gross proceeds to Fortis of \$300.1 million. The underwriters also have an over-allotment option to purchase up to an additional 1.755 million shares, which would bring total gross proceeds to \$345.1 million. Fortis will use the proceeds to repay indebtedness under the company's credit facility and for general corporate purposes.

Funding Profile

On an annual basis, Fortis generates roughly \$470 million in cash flow after dividends. Given a capital program which calls for an average of approximately \$900 million per annum in spending over the next five years, along with long-term debt maturities averaging \$180 million over the same timeframe, we would expect Fortis to continue to access the debt and, to a lesser extent, equity markets. As at September 30, 2008, Fortis and its subsidiaries had consolidated authorized lines of credit of \$2.2 billion, of which \$1.5 billion was undrawn.

Revising Estimates

Our 2009E EPS declines from \$1.57 to \$1.49, reflecting the higher share count offset by the corresponding lower financing costs. Our 2010 EPS estimate is set at \$1.56, and reflects a rebound in Fortis Generation earnings as a result of an 18 MW generating facility in Belize scheduled to come onstream at the beginning of 2010, as well as continued rate base growth in the company's regulated utilities.

Outlook And Investment Summary

Fortis is expected to experience a strong 7% CAGR in its \$7 billion rate base through 2013. In the interim, however, 2009 earnings will be down slightly reflecting the recent share issue as well as the expiry of the Rankine power agreement in April 2009. Fortis' long-term outlook is balanced by its flattish near-term EPS profile and premium valuation. As a result, we maintain our Sector Performer rating.

Price Target Calculation

We are reducing our price target slightly from \$28.50 to \$28.00, reflecting the share issuance. Our price target is based on a target multiple of 18x 2010E EPS (versus 18x 2009E EPS previously), at the high end of utility valuations in consideration of Fortis' core rate base growth potential.

Key Risks To Price Target

Fortis could fall short of our earnings forecasts (and fail to meet our price target) for various reasons, including (but not limited to) the impact of negative regulatory decisions in Alberta and BC, weak power prices in Ontario, low hydro flows, environmental costs that cannot be adequately recovered through higher rates, and tourism conditions (real estate division). In addition, the utility stocks are sensitive to changes in interest rates.

Our EPS estimates are shown below:

	1 Qtr.	2 Qtr.	3 Qtr.	4 Qtr.	Yearly
2008 Prior	\$0.58A	\$0.28A	\$0.26A	\$0.49E	\$1.60E
2008 Current	\$0.58A	\$0.28A	\$0.26A	\$0.48E	\$1.60E
2009 Prior	--	--	--	--	\$1.57E
2009 Current	--	--	--	--	\$1.49E
2010 Current	--	--	--	--	\$1.56E

IMPORTANT DISCLOSURES:

Analyst Certification: Each CIBC World Markets research analyst named on the front page of this research report, or at the beginning of any subsection hereof, hereby certifies that (i) the recommendations and opinions expressed herein accurately reflect such research analyst's personal views about the company and securities that are the subject of this report and all other companies and securities mentioned in this report that are covered by such research analyst and (ii) no part of the research analyst's compensation was, is, or will be, directly or indirectly, related to the specific recommendations or views expressed by such research analyst in this report.

Potential Conflicts of Interest: Equity research analysts employed by CIBC World Markets are compensated from revenues generated by various CIBC World Markets businesses, including the CIBC World Markets Investment Banking Department. Research analysts do not receive compensation based upon revenues from specific investment banking transactions. CIBC World Markets generally prohibits any research analyst and any member of his or her household from executing trades in the securities of a company that such research analyst covers. Additionally, CIBC World Markets generally prohibits any research analyst from serving as an officer, director or advisory board member of a company that such analyst covers.

In addition to 1% ownership positions in covered companies that are required to be specifically disclosed in this report, CIBC World Markets may have a long position of less than 1% or a short position or deal as principal in the securities discussed herein, related securities or in options, futures or other derivative instruments based thereon.

Recipients of this report are advised that any or all of the foregoing arrangements, as well as more specific disclosures set forth below, may at times give rise to potential conflicts of interest.

Pipelines, Utilities, & Power

Fortis Inc.

Reports In-line Results

- Fortis reported Q4/08 adjusted earnings of \$0.48/share compared with \$0.46/share last year and was right in line with our estimate. Segmented results were also, for the most part, in line with expectations.
- Terasen Gas and FortisAlberta/FortisBC earnings both grew over the prior year, generally reflecting both higher allowed ROEs and rate base growth. Newfoundland Power and Caribbean Utilities, by contrast, declined modestly y/y reflecting minor and temporary issues.
- On the non-regulated side, Fortis Generation earnings grew y/y reflecting higher production and lower financing costs. Fortis Properties earnings, on the other hand, declined over last year, reflecting a higher-than-anticipated tax rate in Q4/08 versus an unusually low tax rate in the prior year.
- Fortis continues to offer strong rate base growth through 2013, although 2009E EPS is expected to dip reflecting the long-anticipated April 2009 contractual end to power supply from OPG from the Rankine Power facility. Premium valuation is deserved. We maintain our SP rating.

Q4 Results

Q4 Earnings Performance

Fortis (FTS-SP) reported Q4/08 adjusted EPS of \$0.48/share compared with \$0.46/share in Q4/07, and in line with our \$0.48/share estimate.

Q4 Highlights

Regulated Utilities:

- **Terasen Gas Companies:** Terasen Gas contributed comparable earnings of \$47 million for the quarter, up from \$45 million in Q4/07, reflecting an increase in gas distribution rates effective January 1, 2008 consistent with a higher allowed ROE, partially offset by higher operating expenses driven by increased labour costs. Our current estimate for the full-year 2009 stands at \$115 million (up from \$113 million in 2008), reflecting a slight decline in allowed ROEs for 2009 (under the application of automatic ROE adjustment mechanisms) at both Terasen Gas Inc. (TGI) and Terasen Gas (Vancouver Island) (TGVI), more than offset by anticipated growth in the rate base. Both TGI and TGVI are currently preparing rate applications related to 2010, which will require BCUC approval given that current settlement agreements expire at the end of 2009. As part of the filings, TGI and TGVI will seek a review of the current generic ROE adjustment mechanism and of the deemed equity components of the capital structure.
- **Alberta & B.C. Utilities:** Comparable earnings from FortisAlberta and FortisBC amounted to \$18 million for Q4/08, up from \$13 million in Q4/07 and in line with our \$18 million estimate. Y/Y growth in earnings primarily reflects an increase in FortisAlberta earnings due to a higher allowed ROE, growth in the rate base and a lower tax rate. For 2009, we are anticipating combined earnings contribution from FortisAlberta and FortisBC to total \$85 million, up from \$79 million in 2008, reflecting strong rate base growth mitigated slightly by a small decline in allowed ROEs. A decision from the BCUC on remaining elements of FortisBC's 2009/2010 capital expenditure plan is expected during Q1. In FortisAlberta's case, the generic ROE for 2009 has not yet been confirmed in light of the 2009 Generic Cost of Capital Proceeding scheduled for the second quarter of 2009 which will include a review of the allowed ROE level, the adjustment mechanism and utility capital structures for all gas, electric and pipeline utilities in Alberta that are regulated by the AUC.
- **Newfoundland Power:** Newfoundland Power earnings of \$8 million were lower than \$9 million reported last year, but higher than our \$6 million estimate. The y/y decline reflects a shift in the quarterly distribution of annual purchased power expense, which decreased earnings in Q4 by approximately \$2 million (we had been anticipating more). Excluding this, earnings were higher over last year reflecting higher customer rates and lower expenses.
- **Carribean Utilities:** Carribean Utilities earnings totaled \$8 million, below \$9 million last year and our \$10 million expectation. Results reflected a revenue loss related to Hurricane Ike and related lower sales from Fortis Turks and Caicos.

Non-Regulated Businesses

- **Fortis Generation:** Fortis Generation earnings came in at \$8 million, basically in line with our \$9 million estimate, and higher than Q4/07 earnings of \$7 million, reflecting higher production and lower financing costs.
- **Fortis Properties:** Earnings of \$4 million were down over last year's \$8 million level, and our estimate of \$7 million. The decline reflected a higher than anticipated tax rate during Q4/08, compared with an unusually low tax rate last year.

Other Issues

- **Belize Electricity:** Fortis informed that as at December 31, 2008, Belize Electricity did not meet certain debt covenant financial ratios related to \$11 million of bank loans, which will result in Belize Electricity being prohibited from incurring new indebtedness or declaring dividends. Fortis has asked its lenders for the appropriate waivers, and expects that an ease in energy supply costs will provide Belize Electricity with liquidity relief in the near term. Whatever the case, the issue is a negligible one from Fortis' perspective given an annual earnings contribution from Belize electricity that only amounts to an estimated \$8 million per year (compared with over \$250 million for the entire company). This issue is part of an ongoing dispute between Belize Electricity and the PUC regarding certain fuel costs that the regulator disallowed (both

retroactively and on a forward basis) certain fuel and purchased power costs.

Forecasts

We have made minor changes to our forecasts that offset, leading to no change to our 2009 and 2010 EPS estimates of \$1.49 and \$1.56, respectively.

Source: Company reports and CIBC World Markets Inc.

Funding Profile

On December 19, 2008, Fortis closed a common share offering of 11.7 million shares at a price of \$25.65 per share, resulting in gross proceeds of just over \$300 million.

On an annual basis, Fortis generates roughly \$470 million in cash flow after dividends. Given a capital program that amounts to approximately \$900 million per annum in spending over the next five years, along with long term debt maturities averaging \$180 million over the same timeframe, we would expect Fortis to continue to access the debt and, to a lesser extent, equity markets. As of December 31, 2008, Fortis and its subsidiaries had consolidated authorized lines of credit of \$2.2 billion of which approximately \$1.5 billion was unused.

Price Target Calculation

Our target of \$28 remains based upon an 18x multiple on 2010E EPS, at the high end of our regulated utility targets, which in turn reflect an anticipated improvement in the current credit environment (and hence an improvement in the general equity valuation level within the group). Fortis deserves a higher end multiple given strong anticipated rate base growth over the longer term.

Outlook and Investment Summary

Outlook and investment considerations include the following:

- **Strong Rate Base Growth:** Fortis' collective rate base is expected to grow from roughly \$7 billion currently at a CAGR of 7% through 2013.
- **A Dip in 2009E EPS:** The dip in forecast 2009E EPS reflects the April 2009 expiry of the agreement between Fortis Ontario and OPG under which Fortis received 75 MW of power supply from the Rankine Power Facility in exchange for Fortis' water rights on the Niagara River.
- **Valuation:** Fortis currently trades at 15.2x 2010E EPS compared with roughly 13.5x for its Canadian regulated utility comparables, a premium that reflects Fortis' superior core rate base growth.

A dip in EPS this year in the context of the premium valuation (deserved from a long-term perspective) prompts us to maintain our Sector Performer rating.

Key Risks To Price Target

Fortis could fall short of our earnings forecasts (and fail to meet our price target) for various reasons, including (but not limited to) the impact of negative regulatory decisions in Alberta and BC, weak power prices in Ontario, low hydro flows, environmental costs that cannot be adequately recovered through higher rates, and tourism conditions (real estate division). In addition, the utility stocks are sensitive to changes in interest rates.

Our EPS estimates are shown below:

	1 Qtr.	2 Qtr.	3 Qtr.	4 Qtr.	Yearly
2008 Prior	\$0.58A	\$0.28A	\$0.26A	\$0.48E	\$1.60E

Pipelines, Utilities, & Power

Fortis Inc.

Q1 A Bit Light, But 2009E EPS Unchanged And 2010E EPS Moves Higher.

- Q2/09 adjusted EPS of \$0.53 was \$0.05 below both last year's level and our forecast, the variance reflecting higher-than-expected operating costs at FortisAlberta/FortisBC (largely timing), along with lower sales (due to cooler weather) in the Caribbean.
- We have actually raised our FortisAlberta/FortisBC forecast earnings contributions for both 2009 and 2010, reflecting strong rate base investment. For 2009, we are also reducing our earnings contribution from the Caribbean assets reflecting Q1 results.
- Offsetting changes in 2009 result in no change to estimated EPS. For 2010, our EPS rises from \$1.56/share to \$1.60/share. We have left our \$28 price target intact (slight decline in target multiple from 18x 2010E to 17.5x).
- The Fortis situation is highly attractive long-term, given strong rate base growth anticipated, and upside potential related to regulatory changes to allowed ROEs. We would prefer to wait until after Q2/09 results, which will reflect the end of the Rankine power agreement with OPG. SP rated.

Stock Price Performance

CIBC World Markets does and seeks to do business with companies covered in its research reports. As a result, investors should be aware that the firm may have a conflict of interest that could affect the objectivity of this report.

Investors should consider this report as only a single factor in making their investment decision.

See "Important Disclosures" section at the end of this report for important required disclosures, including potential conflicts of interest.

See "Price Target Calculation" and "Key Risks to Price Target" sections at the end of this report, where applicable.

Q1 Results

Q1 Earnings Performance

Fortis (FTS-SP) reported Q1/09 adjusted EPS of \$0.53/share, compared with \$0.58/share in Q1/08, and our \$0.58/share estimate. The variance from our expectation was largely due to timing issues surrounding certain operating costs at both FortisAlberta and FortisBC that will largely resolve over the course of the year, along with cooler weather resulting in lower electricity sales at Fortis' Caribbean utilities.

Q1 Highlights

Regulated Utilities:

- **Terasen Gas Companies:** The Terasen Gas Companies reported segment earnings of \$58 million compared with \$58 million last year, and virtually in line with our \$59 million estimate. Higher rates during the quarter (reflecting rate base growth partly offset by a slightly lower y/y allowed ROEs) were offset by higher labour and employee benefit costs. We have left our forecasts for 2009 and 2010 unchanged at \$115 million and \$116 million, respectively, reflecting model assumptions that call for modest rate base growth and level allowed ROEs at both Terasen Gas Inc. and Terasen Gas (Vancouver Island).
- **Alberta & B.C. Utilities:** Combined earnings from FortisAlberta and FortisBC amounted to \$26 million in Q1/09, up from \$22 million in Q1/08, but below our \$29 million forecast. Higher rates in both utilities (reflecting rate base growth offset partly by slightly lower y/y allowed ROEs) were offset by higher operating expenses in the quarter, which in large part reflect timing issues related to maintenance activities and certain employee costs, which should resolve itself over the remainder of the year. We have actually increased our combined earnings contribution anticipated for 2009, from \$85 million to \$89 million, reflecting higher anticipated capital now budgeted for FortisBC. For 2010, we have increase our earnings estimate from \$88 million to \$96 million, reflecting stronger growth anticipated in both the FortisAlberta and FortisBC rate bases, combined with a flat allowed ROE assumption.
- **Newfoundland Power/Other Canadian Utilities:** Newfoundland Power earnings amounted to \$6 million compared with \$6 million in the prior year, and roughly in line with our \$7 million estimate. We are leaving our \$34 million and \$35 million forecasts for 2009 and 2010, respectively, unchanged. Other Canadian Utilities contributed \$5 million for the quarter, up slightly over last year (Q1/08 \$4 million) and roughly in line with our \$4 million estimate. Earnings forecasts for Other Canadian Utilities remain at \$17 million for both 2009 and 2010.
- **Caribbean Utilities:** The Caribbean segment contributed earnings of \$4 million in Q1/09 compared with \$7 million last year, and below our \$8 million expectation. The variance from expectations was due primarily to cooler than normal weather in the region and a resulting decline in electricity sales. We have lowered our full year 2009 forecast for the Caribbean segment from \$35 million to \$31 million, but left our 2010 forecast unchanged at \$37 million.

Non-Regulated Businesses

Non-regulated business consisting of Fortis Properties and Fortis Generation reported earnings that were in line with expectations, at \$2 million and \$6 million, respectively, compared with \$3 million and \$6 million last year. We are leaving our 2009 and 2010 forecasts unchanged for both segments.

Forthcoming Rate Hearings

In March 2009, the NEB released a decision granting a positive variance to allowed returns for the TQM pipeline for 2007 and 2008. In addition, the NEB's reasoning surrounding the decision suggests changes in the generic formula may be in order, resulting in higher allowed returns. This has resulted in attention being drawn to the considerable upside potential to Fortis' earnings in the event that provincial regulators eventually change their formulas as well (for more information refer to our March 23 sector comment entitled *NEB Issues Decision On TQM Cost of Capital For 2007 and 2008: Potentially Significant Implications For Canadian Regulated Returns*). We have estimated upside potential to Fortis' earnings of roughly \$0.19/share to the extent that changes in all relevant provincial allowed formula ROEs reflected similar magnitude as that implicit in the TQM decision. Forthcoming provincial regulatory hearings that are pertinent to the matter include the following:

- **Alberta Utilities Commission:** A Generic Cost of Capital Proceeding hearing has been scheduled for Q2/09. The Proceeding will review ROE levels, adjustment mechanisms and utility capital structures, and is pertinent for all regulated gas electricity and pipeline utilities in Alberta that are regulated by the AUC. In respect of this hearing, FortisAlberta submitted

evidence back in November. A decision from the regulator on the issue would likely be forthcoming in the September/October timeframe.

- **BCUC:** The Terasen Companies will be applying for a review of the current generic ROE adjustment mechanisms and the deemed equity component of their capital structures. The timing of any possible decision is likely to come after the AUC's ruling related to its Proceeding.

Forecasts

The forecast changes discussed in the highlights section, including an increase in forecast 2009 and 2010 earnings from FortisAlberta/FortisBC, along with the reduction in forecast 2009 earnings from the Caribbean segment (and other minor adjustments) are summarized in Exhibit 2.

Exhibit 2. Earnings Summary (\$ mlns., except per share)

Reported EPS	1.52	1.49	1.50	1.56	1.60

Source: Company reports and CIBC World Markets Inc.

Price Target Calculation

At this stage we are going to leave our \$28 price target intact, now reflecting a 17.5x 2010E multiple (versus 18x previously), which continues to reflect an ongoing improvement in the credit environment, and also a well-deserved premium valuation for Fortis relative to its peers, given the strong organic growth in regulated rate base anticipated.

Outlook and Investment Summary

Fortis is a situation we find highly attractive for the long term. The company is expected to post strong rate base growth over the next five years that will continue to drive organic earnings growth. The only remaining issue for us is one of timing; Q2/09 results will reflect the end of the Rankine power agreement, thus permanently removing this component of earnings. The most opportune timing for purchase may come following the release of Q2/09 results, and ahead of an AUC autumn decision on cost of capital. For now, we maintain our SP rating.

Key Risks To Price Target

Fortis could fall short of our earnings forecasts (and fail to meet our price target) for various reasons, including (but not limited to) the impact of negative regulatory decisions in Alberta and BC, weak power prices in Ontario, low hydro flows, environmental costs that cannot be adequately recovered through higher rates, and tourism conditions (real estate division). In addition, the utility stocks are sensitive to changes in interest rates.

Our EPS estimates are shown below:

	1 Qtr.	2 Qtr.	3 Qtr.	4 Qtr.	Yearly
2008 Current	\$0.58A	\$0.28A	\$0.26A	\$0.48A	\$1.56A
2009 Prior	\$0.58E	\$0.28E	\$0.16E	\$0.46E	\$1.49E
2009 Current	\$0.53A	\$0.29E	\$0.19E	\$0.47E	\$1.49E
2010 Prior	--	--	--	--	\$1.56E
2010 Current	--	--	--	--	\$1.60E

IMPORTANT DISCLOSURES:

Analyst Certification: Each CIBC World Markets research analyst named on the front page of this research report, or at the beginning of any subsection hereof, hereby certifies that (i) the recommendations and opinions expressed herein accurately reflect such research analyst's personal views about the company and securities that are the subject of this report and all other companies and securities mentioned in this report that are covered by such research analyst and (ii) no part of the research analyst's compensation was, is, or will be, directly or indirectly, related to the specific recommendations or views expressed by such research analyst in this report.

Potential Conflicts of Interest: Equity research analysts employed by CIBC World Markets are compensated from revenues generated by various CIBC World Markets businesses, including the CIBC World Markets Investment Banking Department. Research analysts do not receive compensation based upon revenues from specific investment banking transactions. CIBC World Markets generally prohibits any research analyst and any member of his or her household from executing trades in the securities of a company that such research analyst covers. Additionally, CIBC World Markets generally prohibits any research analyst from serving as an officer, director or advisory board member of a company that such analyst covers.

In addition to 1% ownership positions in covered companies that are required to be specifically disclosed in this report, CIBC World Markets may have a long position of less than 1% or a short position or deal as principal in the securities discussed herein, related securities or in options, futures or other derivative instruments based thereon.

Recipients of this report are advised that any or all of the foregoing arrangements, as well as more specific disclosures set forth below, may at times give rise to potential conflicts of interest.

Important Disclosure Footnotes for Fortis Inc. (FTS)

- 2a Fortis Inc. is a client for which a CIBC World Markets company has performed investment banking services in the past 12 months.
- 2c CIBC World Markets Inc. has managed or co-managed a public offering of securities for Fortis Inc. in the past 12 months.
- 2e CIBC World Markets Inc. has received compensation for investment banking services from Fortis Inc. in the past 12 months.
- 2g CIBC World Markets Inc. expects to receive or intends to seek compensation for investment banking services from Fortis Inc. in the next 3 months.
- 7 CIBC World Markets Corp., CIBC World Markets Inc., and their affiliates, in the aggregate, beneficially own 1% or more of a class of equity securities issued by Fortis Inc.

Pipelines, Utilities, & Power

Fortis Inc.

Q2 Slightly Above Forecast; Steady Growth Profile With Regulatory Upside

- Fortis reported adjusted EPS of \$0.31 in Q2/09, up from \$0.28 in Q2/08 and above our \$0.29 forecast. Results were in line with expectations in most segments, with a moderately better-than-expected performance at FortisAlberta.
- Currently, the NEB as well as provincial regulators are reviewing their cost of capital formulas following the NEB decision in March to grant TQM a positive variance to allowed returns. Upside exists with respect to our estimates if provincial regulators' reviews yield positive results.
- Fortis is expected to spend \$5 billion in capital between 2009 and 2013, the bulk of which will be in its regulated utilities. Substantially all of the expenditures will be funded at the subsidiary level, with minimal equity requirements, especially in the near term (2009-2010).
- Our estimates and price target remain unchanged. The large capital investment over the next five years should drive organic earnings growth, while upside exists with regards to the regulatory reviews. Valuations are deservedly at the high end of the peer group range. SP maintained.

Q2 Results

Q2 Earnings Performance

Fortis (FTS-SP) reported Q2/09 adjusted EPS of \$0.31, up from \$0.28 in Q2/08 and modestly above our \$0.29 forecast. Results were in line with expectations in most segments, with moderately better-than-expected performance at FortisAlberta.

Q2 Highlights

Regulated Utilities:

- **Terasen Gas Companies:** Terasen reported earnings of \$14 million in Q2/09, compared to \$12 million in Q2/08 and our \$12 million estimate. The y/y increase in earnings was the result of a lower effective corporate income tax rate, lower finance charges related to decreased borrowing rates and lower borrowings under credit facilities, and higher customer delivery rates.
- **Alberta & B.C. Utilities:** Combined earnings from FortisAlberta and FortisBC amounted to \$24 million in Q2/09, up from \$14 million in Q2/08 and modestly above our \$21 million estimate. The y/y increase was the result of lower corporate income taxes and the impact of increased customer distribution rates and overall load and customer growth at FortisAlberta.
- **Newfoundland Power:** Newfoundland Power contributed earnings of \$11 million in the quarter, up from \$10 million in Q2/08 and in line with our \$11 million estimate. The y/y increase reflects a change in the quarterly allocation costs (resulting in lower amortization costs in Q2/09), the impact of a lower effective income tax rate and a gain on the sale of property.
- **Other Canadian Utilities:** Earnings from Other Canadian Utilities totaled \$4 million in Q2/09, unchanged from \$4 million in Q2/08 and in line with our \$4 million estimate. During the quarter, FortisOntario entered into an agreement to acquire Great Lakes Power Distribution Inc., an electric distribution utility serving 12,000 customers in northern Ontario, for approximately \$68 million. FortisOntario also purchased a 10% interest in Grimsby Power Inc. for approximately \$1 million. Grimsby Power is an electric distribution utility serving 10,000 customers in a service territory that is close to FortisOntario's operations in Fort Erie.
- **Caribbean Utilities:** The Caribbean segment contributed earnings of \$7 million in the quarter, versus \$8 million in Q2/08 and our \$9 million estimate, with the y/y decline reflecting lower allowed ROA at Belize Electricity and increased amortization costs.

Non-Regulated Businesses:

Non-regulated operations earnings totaled \$11 million in Q2/09, down from \$14 million in Q2/08 and in line with our \$10 million estimate. The y/y decline reflects lower earnings at Fortis Generation as a result of the April 30, 2009, expiration of the power-for-water exchange agreement at the Rankine hydroelectric generating facility in Ontario and lower wholesale market energy prices in Upper New York State and Ontario.

Regulatory Update

In March 2009, the National Energy Board (NEB) released a decision granting a positive variance to allowed returns for the TQM pipeline for 2007 and 2008. The NEB's reasoning surrounding the decision has opened the door to possible future changes in the NEB's generic formula, and also to provincial generic formulas, that would result in higher allowed returns for regulated utilities. For more information on this topic refer to our March 23 sector comment entitled *NEB Issues Decision On TQM Cost of Capital For 2007 and 2008: Potentially Significant Implications For Canadian Regulated Returns*. We have estimated upside potential to Fortis' earnings of roughly \$0.19/share to the extent that changes in all relevant provincial allowed formula ROEs reflected similar magnitude as that implicit in the TQM decision.

Proceedings on this front related Fortis' companies are listed below:

- **Terasen Gas Companies:** In May 2009, the Terasen Gas companies filed an application with the British Columbia Utilities Commission (BCUC) requesting a review of the current generic allowed ROE adjustment mechanism and the deemed equity component for Terasen Gas Inc. (TGI). Terasen is requesting an increase in TGI's allowed ROE from 8.47% to 11% effective July 1, 2009, and an increase in TGI's allowed common equity from 35% to 40% effective January 1, 2010. Terasen has not requested a change in the risk-premium spread over TGI's allowed ROE used to calculate Terasen Gas (Vancouver Island) Inc. (TGVI), implying a requested allowed

ROE of 11.7% for TGV. The company expects a decision will be rendered in late 2009/early 2010.

- **FortisAlberta:** The Alberta Utilities Commission (AUC) Generic Cost of Capital Proceeding took place in Q2/09, and an AUC order is expected before the end of 2009. The AUC is reviewing ROE levels, adjustment mechanisms and utility capital structures, applicable to all pipelines and utilities that are regulated by the AUC.
- **Newfoundland Power:** In May 2009, Newfoundland Power filed a 2010 general rate application, seeking an increase in the allowed ROE from 8.95% to 11% on a deemed common equity of 45% (unchanged). A hearing on the application is expected in fall 2009.

Estimates Unchanged

We have made minor adjustments to our model, but overall our estimates remain unchanged.

Price Target Calculation

Our price target remains unchanged at \$28, reflecting a 17.5x 2010E EPS target multiple, deservedly at the high end of utilities valuations in light of its consistently solid performance and strong growth profile.

Outlook and Investment Summary

Fortis is expected to spend \$5 billion in capital between 2009 and 2013, which will drive organic earnings growth. Substantially all expenditures will be financed at the subsidiary level, with minimal equity requirements, particularly in the near term (2009-2010). Upside potential exists to the extent that provincial generic cost of capital reviews produce positive results. At 16.1x 2010E EPS versus the utilities average of 12.7x, valuations are deservedly at the high end of the Utilities group range. We maintain our Sector Performer rating.

Key Risks To Price Target

Fortis could fall short of our earnings forecasts (and fail to meet our price target) for various reasons, including (but not limited to) the impact of negative regulatory decisions in Alberta and BC, weak power prices in Ontario, low hydro flows, environmental costs that cannot be adequately recovered through higher rates, and tourism conditions (real estate division). In addition, the utility stocks are sensitive to changes in interest rates.

Our EPS estimates are shown below:

	1 Qtr.	2 Qtr.	3 Qtr.	4 Qtr.	Yearly
2008 Current	\$0.58A	\$0.28A	\$0.26A	\$0.48A	\$1.56A

Pipelines, Utilities, & Power

Fortis Inc.

Reports Slightly Higher-than-expected Q3 Results,

- Q3/09 EPS of \$0.21 compared with \$0.26 last year, and was slightly above our \$0.19 expectation. Earnings declined y/y reflecting the April 2009 expiration of the Rankine contract. Q3/09 results from Fortis' Canadian regulated utilities were slightly higher-than-expected.
- Fortis continues to offer considerable EPS upside related to potential regulatory changes. The recent NEB decision sets the stage for possible changes at the provincial level, the latter which is relevant for Fortis. We estimate \$0.19 in related EPS upside.
- A \$5 billion capital program between 2009 and 2013, largely in regulated utilities will drive organic growth. Funding will likely occur at the subsidiary level, with minimal equity requirements.
- We have made only minor changes to our forecasts, and no change to our \$28 price target or recommendation. Valuations are justifiably at the higher end of the peer group range. SP rated.

Company Profile

- Fortis is the the largest investor-owned distribution utility in Canada with total assets approaching \$12 billion.

- The company's growth has been driven by two major acquisitions: FortisAlberta and FortisBC in 2004 (\$1.5 billion) and Terasen Gas Companies in 2007 (\$3.7 billion).

- Fortis operates electric distribution utilities in 5 Canadian provinces (B.C., Alberta, Ontario, Prince Edward Island and Newfoundland) and three Caribbean countries (Belize, Cayman Islands, Turks and Caicos), and a natural gas utility in (Terasen).

- Fortis owns and operates non-regulated generation assets across Canada, in Belize and in Upper New York State.

- Fortis also owns hotels and commercial real estate across Canada.

Investment Thesis

- Fortis is expected to spend \$5 billion in capital between 2009 and 2013 which will drive organic EPS growth. We expect that this will be funded at the subsidiary level, with minimal equity requirements.

- In addition, we estimate roughly \$0.19/share in EPS upside to the extent that provincial regulators follow suit with recent NEB decisions and allowed ROEs are increased.

- Fortis deservedly trades at the high end of Canadian utilities valuations as a result of its consistently solid performance and strong growth profile.

2010E Regulated vs. Non-regulated Earnings (excl. Corporate)

2010E Regulated Earnings

Q3 Results

Q3 Earnings Performance

Fortis (FTS-SP) reported Q3/09 EPS of \$0.21, down from \$0.26 in Q3/08, and slightly above our \$0.19 estimate. Earnings declined y/y as anticipated, reflecting the April 30, 2009 expiration of the power-for-water exchange agreement with Ontario Power Generation (OPG). Earnings were modestly higher-than-anticipated as a result of slightly stronger-than-expected results from Fortis' regulated Canadian Utilities.

Q3 Highlights

Regulated Utilities:

- **Terasen Gas Companies:** Terasen Gas loss totaled \$3 million in Q3/09, versus a loss of \$5 million in Q3/08, slightly lower than our expected loss of \$5 million. The variance over both last year and our estimates was due to a lower than expected tax rate during the quarter. Management states that year-to-date customer growth at 800 is considerably below the same period last year at 5,400 due to slowing economic growth and growth in multi-family housing, where natural gas use is less prevalent compared to single-family housing.
- **Alberta & B.C. Utilities:** Alberta and BC regulated utilities contributed \$24 million to earnings in Q3/09, versus \$26 million in Q3/08, slightly above our forecast of \$21 million. The variance from our estimate reflects stronger-than-expected earnings at FortisAlberta due to rate base growth, mitigating a decline in the allowed ROE from 8.75% in 2008 to 8.51% in 2009. FortisBC earnings were comparable y/y.
- **Newfoundland Power:** Newfoundland Power earnings were \$7 million in Q3/09, compared with \$8 million in Q3/08, and below our \$9 million estimate. The y/y variance and the variance from our expectations was due to a change in the quarterly allocation of amortization costs resulting in higher amortization in Q3/09.
- **Caribbean Utilities:** Caribbean Utilities earnings contribution totaled \$7 million in Q3/08 versus \$7 million last year, and basically in-line with our \$8 million estimate.

Non-Regulated Businesses:

Non-regulated operations earnings totaled \$13 million in Q3/09, down from \$18 million in Q3/08, roughly in line with our \$12 million estimate. The y/y decline reflected lower earnings at Fortis Generation as a result of the April 30, 2009 expiration of the agreement with OPG, which involved the exchange of water rights on the Niagara River in return for a regular power payment from the Rankine Power Station.

Regulatory Update

In October 2009, the NEB released a decision to drop the generic multi-pipeline formula, without replacement, electing instead to allow for returns to be fully determined through negotiated settlement. While Fortis does not have NEB-regulated assets, the decision nevertheless appears to open the door for further positive regulatory developments on the same issue in provincial jurisdictions.

Important proceedings on this front related Fortis' companies are listed below:

- Terasen Gas Companies:** In May 2009, the Terasen Gas Companies filed an application with the British Columbia Utilities Commission (BCUC) requesting a review of the current generic allowed ROE adjustment mechanism and the deemed equity component for Terasen Gas Inc. (TGI). Terasen is requesting an increase in TGI's allowed ROE from 8.47% to 11% effective July 1, 2009, and an increase in TGI's allowed common equity from 35% to 40% effective January 1, 2010. Terasen has not requested a change in the risk-premium spread of TGI's allowed ROE used to calculate Terasen Gas (Vancouver Island) Inc. (TGVI), implying a requested allowed ROE of 11.7% for TGVI. The company expects a decision will be rendered in late 2009/early 2010.
- FortisAlberta:** The Alberta Utilities Commission (AUC) Generic Cost of Capital Proceeding took place in Q2/09, and an AUC order is expected before the end of 2009. The AUC is reviewing ROE levels, adjustment mechanisms

and utility capital structures, applicable to all pipelines and utilities that are regulated by the AUC.

- **Newfoundland Power:** In May 2009, Newfoundland Power filed a 2010 general rate application, seeking an increase in the allowed ROE from 8.95% to 11% on a deemed common equity of 45% (unchanged). A hearing on the application occurred in October, with a decision pending.

Estimates Unchanged

We have made only minor adjustments to our model, essentially building in Q3/09 results. As a result, 2009E EPS rises from \$1.49 to \$1.51, while 2010E EPS remains at \$1.60.

Price Target Calculation

Our price target remains unchanged at \$28, reflecting a 17.5x 2010E EPS target multiple, deservedly at the high end of utilities valuations in light of Fortis' consistently solid performance and strong growth profile.

Outlook and Investment Summary

Fortis is expected to spend \$5 billion in capital between 2009 and 2013, which will drive organic EPS growth. We expect that expenditures will be funded at the subsidiary level, with minimal equity requirements, particularly in the shorter term through 2010. On top of that, we estimate roughly \$0.19/share in regulatory upside potential, to the extent provincial regulators follow suit with recent NEB decisions. Valuations remain deservedly at the high end of the Utilities group range. We maintain our SP rating.

Key Risks To Price Target

Fortis could fall short of our earnings forecasts (and fail to meet our price target) for various reasons, including (but not limited to) the impact of negative regulatory decisions in Alberta and BC, weak power prices in Ontario, low hydro flows, environmental costs that cannot be adequately recovered through higher rates, and tourism conditions (real estate division). In addition, the utility stocks are sensitive to changes in interest rates.

Our EPS estimates are shown below:

	1 Qtr.	2 Qtr.	3 Qtr.	4 Qtr.	Yearly
2008 Current	\$0.58A	\$0.28A	\$0.26A	\$0.48A	\$1.56A
2009 Prior	\$0.53A	\$0.31A	\$0.19E	\$0.46E	\$1.49E
2009 Current	\$0.53A	\$0.31A	\$0.21A	\$0.46E	\$1.51E
2010 Current	--	--	--	--	\$1.60E

IMPORTANT DISCLOSURES:

Analyst Certification: Each CIBC World Markets research analyst named on the front page of this research report, or at the beginning of any subsection hereof, hereby certifies that (i) the recommendations and opinions expressed herein accurately reflect such research analyst's personal views about the company and securities that are the subject of this report and all other companies and securities mentioned in this report that are covered by such research analyst and (ii) no part of the research analyst's compensation was, is, or will be, directly or indirectly, related to the specific recommendations or views expressed by such research analyst in this report.

Potential Conflicts of Interest: Equity research analysts employed by CIBC World Markets are compensated from revenues generated by various CIBC World Markets businesses, including the CIBC World Markets Investment Banking Department. Research analysts do not receive compensation based upon revenues from specific investment banking transactions. CIBC World Markets generally prohibits any research analyst and any member of his or her household from executing trades in the securities of a company that such research analyst covers. Additionally, CIBC World Markets generally prohibits any research analyst from serving as an officer, director or advisory board member of a company that such analyst covers.

In addition to 1% ownership positions in covered companies that are required to be specifically disclosed in this report, CIBC World Markets may have a long position of less than 1% or a short position or deal as principal in the securities discussed herein, related securities or in options, futures or other derivative instruments based thereon.

Recipients of this report are advised that any or all of the foregoing arrangements, as well as more specific disclosures set forth below, may at times give rise to potential conflicts of interest.

Important Disclosure Footnotes for Fortis Inc. (FTS)

- 2a Fortis Inc. is a client for which a CIBC World Markets company has performed investment banking services in the past 12 months.
- 2c CIBC World Markets Inc. has managed or co-managed a public offering of securities for Fortis Inc. in the past 12 months.
- 2e CIBC World Markets Inc. has received compensation for investment banking services from Fortis Inc. in the past 12 months.
- 2g CIBC World Markets Inc. expects to receive or intends to seek compensation for investment banking services from Fortis Inc. in the next 3 months.
- 7 CIBC World Markets Corp., CIBC World Markets Inc., and their affiliates, in the aggregate, beneficially own 1% or more of a class of equity securities issued by Fortis Inc.

Fortis Inc.

Positive BCUC Decision; Raising EPS Estimates, Price Target And Rating

- Terasen Gas announced that it has received the BCUC decision on its Return on Equity and Capital Structure Application. The BCUC set its allowed ROE for Terasen Gas Inc. (TGI) at 9.5% (versus 8.47% currently) and increased its deemed common equity to 40% (versus 35% currently).
- Allowed ROEs for Terasen Gas (Vancouver Island) Inc. (TGVI) and FortisBC increase to 10.00% (from 9.17%) and 9.90% (from 8.87%), respectively. The new allowed ROEs for TGI and TGVI are effective July 1, 2009, while the new rate for FortisBC is effective January 1, 2010.
- We have made changes to our Terasen Gas and FortisBC estimates, reflecting the BCUC decision. As a result, our 2009E EPS increases from \$1.55 to \$1.57, our 2010E EPS increases from \$1.64 to \$1.72, and our 2011E EPS increases from \$1.75 to \$1.85.
- We are increasing our price target from \$30.50 to \$32.50, based on a target multiple of 17.5x 2011E EPS (unchanged). Positive regulatory decisions combined with a \$5 billion capital program set the stage for strong growth through 2013. We raise our rating to SO from SP, as of December 17.

Source: Company reports, Bloomberg and CIBC World Markets Inc.

Company Profile

- Fortis is the the largest investor-owned distribution utility in Canada with total assets approaching \$12 billion.

- The company's growth has been driven by two major acquisitions: FortisAlberta and FortisBC in 2004 (\$1.5 billion) and Terasen Gas Companies in 2007 (\$3.7 billion).

- Fortis operates electric distribution utilities in 5 Canadian provinces (B.C., Alberta, Ontario, Prince Edward Island and Newfoundland) and three Caribbean countries (Belize, Cayman Islands, Turks and Caicos), and a natural gas utility in (Terasen).

- Fortis owns and operates non-regulated generation assets across Canada, in Belize and in Upper New York State.

- Fortis also owns hotels and commercial real estate across Canada.

Investment Thesis

- Fortis is expected to spend \$5 billion in capital between 2009 and 2013 which will drive organic EPS growth. We expect that this will be funded at the subsidiary level, with minimal equity requirements.

- Fortis deservedly trades at the high end of Canadian utilities valuations as a result of its consistently solid performance and strong growth profile.

2010E Regulated vs. Non-regulated Earnings (excl. Corporate)**2010E Regulated Earnings**

BCUC Return On Equity And Capital Structure Decision

Terasen Gas, Fortis' (FTS-SP) wholly owned gas utility in British Columbia, announced today that it has received the British Columbia Utilities Commission's (BCUC) decision on its Return on Equity and Capital Structure Application. The BCUC set its allowed ROE for Terasen Gas Inc. (TGI) at 9.5%, up from the current level of 8.47%. The BCUC also maintained TGI as a benchmark for calculating the Terasen Gas (Vancouver Island) Inc. (TGVI) ROE, which now reflects a 50-basis-point (bps) premium (down from 70 bps previously) to TGI's ROE. As a result, the TGVI allowed ROE rises to 10.00% from 9.17% previously. The new allowed ROEs for TGI and TGVI are effective July 1, 2009. Therefore, the average 2009 allowed ROEs for TGI and TGVI are 8.98% and 9.58%, respectively. Fortis' electric utility, FortisBC, is also impacted by the decision. FortisBC's allowed ROE increases to 9.90% from 8.87% effective January 1, 2010.

In addition, for TGI, the deemed common equity component increased to 40% from 35%, effective January 1, 2010. The equity components for TGVI and FortisBC remain at 40%. Late in November 2009 the BCUC approved the Negotiated Settlement Agreements for TGI and TGVI, which reflect a rebasing of incentive earnings and do not include provisions for a performance-based rate-setting incentive mechanism going forward, suggesting that the allowed ROE and achieved ROE will be closer going forward.

Revising Estimates

We have made changes to our Terasen Gas and FortisBC estimates to reflect the BCUC decision. As a result, our 2009E EPS increases from \$1.55 to \$1.57, our 2010E EPS rises from \$1.64 to \$1.72, and our 2011E EPS rises from \$1.75 to \$1.85. Our changes are outlined in Exhibit 2.

Price Target Calculation

We are increasing our price target from \$30.50 to \$32.50, based on a target multiple of 17.5x 2011E EPS (unchanged), deservedly at the high end of utilities valuations in light of Fortis' comparatively strong utilities-based growth profile.

Outlook And Investment Summary

The BCUC decision is another positive regulatory ruling for Fortis, following the AUC's decision in November regarding a new ROE level of 9% for all AUC-regulated utilities and varying increases in equity thickness. All of these changes, which collectively have added roughly \$0.14/share to Fortis' forward EPS estimates, along with a \$5 billion capital program between 2009 and 2013, set the stage, we believe, for strong EPS growth over the next several years. Valuations deservedly remain at the higher end of the utilities group. We prefer Fortis to Emera (EMA-SP), given Fortis' comparatively strong EPS growth profile at relatively similar valuations (approximately 15x 2011E EPS for both Fortis and Emera). Our new target, including dividend, implies a roughly 18% return over the next year. As a result, we are raising our rating from Sector Performer to Sector Outperformer, as of December 17.

Key Risks To Price Target

Fortis could fall short of our earnings forecasts (and fail to meet our price target) for various reasons, including (but not limited to) the impact of negative regulatory decisions in Alberta and BC, weak power prices in Ontario, low hydro flows, environmental costs that cannot be adequately recovered through higher rates, and tourism conditions (real estate division). In addition, the utility stocks are sensitive to changes in interest rates.

Our EPS estimates are shown below:

	1 Qtr.	2 Qtr.	3 Qtr.	4 Qtr.	Yearly
2009 Prior	\$0.53A	\$0.31A	\$0.21A	\$0.50E	\$1.55E
2009 Current	\$0.53A	\$0.31A	\$0.21A	\$0.52E	\$1.57E
2010 Prior	--	--	--	--	\$1.64E

IMPORTANT DISCLOSURES:

Analyst Certification: Each CIBC World Markets research analyst named on the front page of this research report, or at the beginning of any subsection hereof, hereby certifies that (i) the recommendations and opinions expressed herein accurately reflect such research analyst's personal views about the company and securities that are the subject of this report and all other companies and securities mentioned in this report that are covered by such research analyst and (ii) no part of the research analyst's compensation was, is, or will be, directly or indirectly, related to the specific recommendations or views expressed by such research analyst in this report.

Potential Conflicts of Interest: Equity research analysts employed by CIBC World Markets are compensated from revenues generated by various CIBC World Markets businesses, including the CIBC World Markets Investment Banking Department. Research analysts do not receive compensation based upon revenues from specific investment banking transactions. CIBC World Markets generally prohibits any research analyst and any member of his or her household from executing trades in the securities of a company that such research analyst covers. Additionally, CIBC World Markets generally prohibits any research analyst from serving as an officer, director or advisory board member of a company that such analyst covers.

In addition to 1% ownership positions in covered companies that are required to be specifically disclosed in this report, CIBC World Markets may have a long position of less than 1% or a short position or deal as principal in the securities discussed herein, related securities or in options, futures or other derivative instruments based thereon.

Recipients of this report are advised that any or all of the foregoing arrangements, as well as more specific disclosures set forth below, may at times give rise to potential conflicts of interest.

Important Disclosure Footnotes for Fortis Inc. (FTS)

Pipelines, Utilities, & Power

Fortis Inc.

Q4 A Tad Light, But Mostly One-Time. Outlook Intact.

- Fortis reported Q4/09 adjusted EPS of \$0.47, down from \$0.48 in Q4/08 and below our \$0.52 estimate. The variance from our estimate was mainly the result of \$5 million (\$0.03/share) in one-time costs at Terasen as well as lower-than-expected results at Fortis Properties.
- The costs relate to customer appliance conversions due to Terasen Gas Whistler Inc.'s switch from propane to natural gas distribution completed in August 2009. Terasen is seeking regulatory approval to include the conversion costs in the rate base, which would lead to a reversal.
- We have made minor revisions to our estimates, mainly reflecting lower expected earnings in Caribbean Utilities and non-regulated operations (Fortis Generation and Fortis Properties). As a result, our 2010E and 2011E EPS decline from \$1.72 and \$1.85 to \$1.70 and \$1.84, respectively.
- Our price target remains at \$32.50, based on a 17.5x 2011E multiple (unchanged). We expect earnings growth to ramp up in 2010, reflecting several positive regulatory decisions and the impact of the large capex program. We maintain our Sector Outperformer rating.

Valuation	2009A	2010E	2011E	Company Profile		
P/E Ratio (x)				- Fortis is the the largest investor-owned distribution utility in Canada with total assets approaching \$12 billion.		
Fortis	18.5	16.4	15.1	- The company's growth has been driven by two major acquisitions: FortisAlberta and FortisBC in 2004 (\$1.5 billion) and Terasen Gas Companies in 2007 (\$3.7 billion).		
Utilities Average	15.7	14.0	12.8	- Fortis operates electric distribution utilities in 5 Canadian provinces (B.C., Alberta, Ontario, Prince Edward Island and Newfoundland) and three Caribbean countries (Belize, Cayman Islands, Turks and Caicos), and a natural gas utility in (Terasen).		
EV/EBITDA (x)				- Fortis owns and operates non-regulated generation assets across Canada, in Belize and in Upper New York State.		
Fortis	10.3	9.8	9.7	- Fortis also owns hotels and commercial real estate across Canada.		
Utilities Average	8.6	8.3	8.0	Investment Thesis		
Other Data	2009A	2010E	2011E	- Fortis is expected to spend \$5 billion in capital between 2010 and 2014 which will drive organic EPS growth. We expect that this will be funded at the subsidiary level, with minimal equity requirements.		
Dividend	1.04	1.12	1.20	- Fortis deservedly trades at the high end of Canadian utilities valuations as a result of its consistently solid performance and strong growth profile.

Q4 Results

Q4 Earnings Performance

Fortis (FTS-SO) reported Q4/09 EPS of \$0.47, down from \$0.48 in Q4/08 and below our \$0.52 estimate. The variance from our estimate was mainly the result of \$5 million (\$0.03/share) in one-time costs at Terasen, as well as lower-than-expected results at Fortis Properties.

Q4 Highlights

Regulated Utilities:

- **Terasen Gas Companies:** Terasen Gas earnings totaled \$48 million in Q4/09, up from \$47 million in Q4/08, but below our \$51 million estimate. The variance from our estimate is the result of higher than anticipated operating expenses as a result of \$5 million in costs associated with the conversion of customer's appliances, in association with Terasen Gas Whistler Inc.'s (TGW1) conversion from propane to a natural gas distribution completed in August 2009. Terasen is seeking regulatory approval (BCUC) to include the additional conversion costs in the rate base, in which case there would be a reversal to earnings. Excluding this impact, earnings increased as a result of the retroactive impact of the BCUC decision to increase allowed ROEs, effective July 1, 2009. The allowed ROE was increased from 8.47% to 9.5% for Terasen Gas Inc. (TGI), and increased from 9.17% to 10% for Terasen Gas (Vancouver Island) Inc. (TGVI) and TGWI.
- **FortisAlberta:** FortisAlberta contributed \$15 million to earnings in Q4/09, compared to \$11 million in Q4/08 and our \$18 million estimate. Revenues increased as a result of the retroactive impact of the AUC cost of capital decision which increased the allowed ROE at FortisAlberta to 9% from an interim allowed ROE of 8.51% and increased the deemed equity component from 37% to 41% effective January 1, 2009. This was partially offset by increased amortization costs and finance charges related to the company's investment in capital assets and resulting higher debt levels.
- **FortisBC:** FortisBC earnings totaled \$8 million in Q4/09, compared to \$7 million in Q4/08 and our \$7 million estimate. The y/y increase reflects higher customer electricity rates and customer growth offsetting increased labour and financing costs.
- **Newfoundland Power:** Newfoundland Power earnings were \$8 million in the quarter, unchanged from \$8 million in Q4/08 and in line with our estimate. Higher electricity sales were offset by higher demand charges from Newfoundland Hydro associated with meeting peak load requirements during the winter season.
- **Other Canadian Electric Utilities:** Earnings from Other Canadian Electric Utilities totaled \$3 million in Q4/09, unchanged from Q4/08 and in line with our estimate. In October 2009, FortisOntario acquired Great Lakes Power Distribution Inc. (subsequently renamed Algoma Power) for an aggregate purchase price of \$75 million. Algoma Power is a regulated distribution utility serving 12,000 customers in the District of Algoma in northern Ontario.

- **Caribbean Utilities:** Earnings from the Caribbean Utilities came in at \$7 million, compared to \$8 million in Q4/08 and our \$8 million estimate. The y/y decline in earnings was the result of two additional months of contribution from the Caribbean Utilities Company in Q4/08, which changed its fiscal year end from April 30 to December 31 in 2009. The impact of the additional two months was approximately \$2 million in earnings. The company expects that, as a result of the impact of the economic downturn on the tourism industry in the Caribbean, electricity demand growth in 2010 will be modest.

Non-Regulated Businesses:

- **Fortis Generation:** Fortis Generation earnings totaled \$3 million in the quarter, down from \$8 million in Q4/08 and in line with our \$4 million estimate. The y/y decline reflects the April 30, 2009 expiration of the Rankine power-for-water exchange agreement with Ontario Power Generation (OPG), as well as lower power prices in upper New York State, and decreased production in upper New York State and Belize. The new Vaca hydroelectric generating facility will be commissioned in Q1/10, and is expected to add approximately 80 GWh of production out of Belize.
- **Fortis Properties:** Fortis Properties earnings totaled \$5 million, up from \$4 million in Q4/08 but below our \$8 million estimate. The variance from our estimate was the result of lower-than-expected hospitality revenue due to lower hotel occupancy, particularly in western Canada and Ontario. Fortis expects that hospitality revenue growth will continue to be challenged in 2010 as a result of the impact of the economic slowdown on leisure and business travel hotel stays.

Recap of Recent Provincial Regulatory Decisions

- Terasen Gas Companies:** As discussed above, in December 2009, the British Columbia Utilities Commission (BCUC) increased TGI's allowed ROE from 8.47% to effective July 1, 2009. In addition, TGI's deemed common equity component increased from 35% to 40% effective January 1, 2010. The BCUC also maintained TGI as a benchmark for calculating the TGVI and TGWI ROE, which now reflects a 50 bps premium (down from 70 bps previously), implying a TGVI and TGWI allowed ROE of 10%. The equity component for TGVI and TGWI remain at 40%. The BCUC also determined that the automatic adjustment mechanism that was used to determine the ROE on an annual basis will no longer apply, and the ROE as determined in the decision will apply until further reviewed by the BCUC.
- FortisAlberta:** In November 2009, the Alberta Utilities Commission (AUC) issued its decision related to the 2009 Generic Cost of Capital proceeding. The AUC established an allowed ROE of 9% for all Alberta utilities for 2009 and 2010, compared to the 8.61% that the now-discontinued adjustment formula would have produced for 2009. In addition, the AUC ordered that the generic allowed ROE be established on an interim basis at 9% for 2011. The AUC intends to re-examine the generic ROE and consider whether an adjustment formula should be re-imposed.

- **FortisBC:** The BCUC decision outlined above also impacted FortisBC, with its allowed ROE increasing from 8.87% to 9.9% effective January 1, 2010.
- **Newfoundland Power:** In December 2009, the Newfoundland and Labrador Board of Commissioners of Public Utilities (PUB) issued a decision increasing the allowed ROE from 8.95% in 2009 to 9% in 2010. The PUB also ordered that Newfoundland Power's allowed ROE for each of 2011 and 2012 be determined using the ROE automatic adjustment formula, although the formula is subject to a review in Q1/10.

Revising Estimates

We are making minor revisions to our estimates mainly reflecting lower expected earnings in Caribbean Utilities and non-regulated operations (Fortis Generation and Fortis Properties). As a result of these changes, our 2010E EPS declines from \$1.72 to \$1.70, and our 2011E EPS declines from \$1.85 to \$1.84.

Price Target Calculation

We are maintaining our price target at \$32.50, based on a target multiple of 17.5x 2011E EPS (unchanged), deservedly at the high end of utilities valuations in light of Fortis' comparatively strong utilities-based growth profile.

Outlook and Investment Summary

Lighter-than-expected EPS in Q4/09 in large part reflected one-time costs that might ultimately be included in the rate base resulting in a reversal. Beyond that, the outlook remains largely intact. Earnings growth is expected to ramp up beginning in 2010, reflecting several positive regulatory decisions as well as the impact of strong rate base growth. Fortis expects to spend approximately \$1.1 billion in capex in 2010, and approximately \$5 billion between 2010 and 2014, with 97% of the capital spend in regulated utilities. We would be buyers ahead of strong earnings growth ahead. We maintain our Sector Outperformer rating.

Key Risks To Price Target

Fortis could fall short of our earnings forecasts (and fail to meet our price target) for various reasons, including (but not limited to) the impact of negative regulatory decisions in Alberta and BC, weak power prices in Ontario, low hydro flows, environmental costs that cannot be adequately recovered through higher rates, and tourism conditions (real estate division). In addition, the utility stocks are sensitive to changes in interest rates.

Our EPS estimates are shown below:

	1 Qtr.	2 Qtr.	3 Qtr.	4 Qtr.	Yearly
2009 Prior	\$0.53A	\$0.31A	\$0.21A	\$0.52E	\$1.57E

Pipelines, Utilities, & Power

Fortis Inc.

Strong Q1 Results

- Fortis reported Q1/10 EPS of \$0.58, up from \$0.53 in Q1/09, and in line with our \$0.58 estimate. Y/Y growth was mainly driven by higher allowed ROEs at Terasen Gas, offset by the impact of the April 2009 expiration of the Rankine power-for-water exchange agreement at Fortis Generation.
- Terasen Gas earnings totaled \$73 million in the quarter, up from \$58 million in Q1/09, mainly reflecting increased allowed ROEs (8.47% to 9.50% for TGI and 9.17% to 10.00% for TGVI and TGWI), which took effect July 1, 2009, as well as lower finance charges due to lower interest rates.
- We have made minor revisions to our estimates, reflecting modestly higher expected earnings at Terasen and lower expectations from Caribbean Utilities and Fortis Generation. These changes are offsetting, and as a result our 2010E and 2011E EPS remain at \$1.70 and \$1.84, respectively.
- Our price target remains at \$32.50, based on a 17.5x 2011E EPS multiple (unchanged). As demonstrated in Q1, earnings growth is expected to be strong in 2010 due to several positive regulatory decisions. A \$5 billion capex program bodes well for EPS growth through 2014. Maintain SO.

Q1 Results

Q1 Earnings Performance

Fortis (FTS-SO) reported Q1/10 EPS was \$0.58, up from \$0.53 in Q1/09 and in line with our \$0.58 estimate.

Q1 Highlights

Regulated Utilities:

- **Terasen Gas Companies:** Terasen Gas earnings totaled \$73 million in Q1/10, up from \$58 million in Q1/09 and above our \$61 million estimate. Strong earnings in the quarter reflect increased customer delivery rates as a result of the increased allowed ROEs that took effect July 1, 2009, as well as lower finance charges due to lower interest rates and lower average credit facility borrowings. Allowed ROEs increased from 8.47% to 9.50% for Terasen Gas Inc. (TGI), and from 9.17% to 10.00% for Terasen Gas (Vancouver Island) Inc. (TGVI) and Terasen Gas Whistler Inc. (TGW).
- **FortisAlberta:** FortisAlberta contributed \$14 million to earnings in Q1/10, versus \$12 million in Q1/09, and our \$14 million estimate. The y/y increase reflects an interim 7.5% increase in electricity distribution rates, in advance of FortisAlberta's 2010-2011 Revenue Requirements Application, which is expected to get final approval in Q2/10. The rate increase is driven by FortisAlberta's ongoing investment infrastructure to support customer growth and maintain and upgrade the electricity system.
- **FortisBC:** FortisBC earnings totaled \$14 million in Q1/10, compared to \$14 million in Q1/09, and our \$16 million estimate. Higher customer electricity rates as a result of an increase in allowed ROE effective January 1, 2010 (from 8.87% to 9.90%) were offset by higher finance charges due to higher debt levels and lower electricity sales due to warmer weather.
- **Newfoundland Power:** Newfoundland Power earnings were \$7 million in the quarter, compared to \$6 million in Q1/09 and our \$6 million estimate. The y/y increase reflects increased customer electricity rates due to a slightly higher allowed ROE (from 8.95% to 9.00% effective January 1, 2010) and lower-than-expected operating costs due to the timing of capital projects.
- **Other Canadian Electric Utilities:** Earnings from Other Canadian Electric Utilities totaled \$5 million in the quarter, unchanged from \$5 million in Q1/09, and in line with our \$5 million estimate. Algoma Power, acquired in October 2009, contributed \$0.4 million in earnings during the quarter.
- **Caribbean Utilities:** Caribbean Utilities earnings contribution totaled \$4 million, versus \$4 million in Q1/09 and our \$7 million estimate. The variance from our estimate reflects the weaker U.S. dollar as well as higher finance charges.

Non-Regulated Businesses:

- **Fortis Generation:** Fortis Generation earnings totaled \$2 million in Q1/10, down from \$6 million in Q1/09 and below our \$4 million estimate. Results were negatively impacted by lower production in Belize as a result of lower rainfall. The y/y decline mainly reflected the expiration of the Rankine power-for-water exchange agreement with Ontario Power Generation (OPG), which contributed \$3 million to earnings in Q1/09. The new Vaca

hydroelectric generating facility in Belize was commissioned in March 2010, and is expected to increase average annual production by 80 GWh.

- **Fortis Properties:** Fortis Properties earnings totaled \$2 million in Q1/10, compared to \$2 million in Q1/09 and our \$3 million estimate. Improved performance from the real estate division and hotel operations in Atlantic Canada were offset by lower occupancies at hotels in western Canada.

Estimates Unchanged

We have made minor revisions to our model, reflecting modestly higher expected earnings from Terasen and lower expected earnings from Caribbean Utilities and Fortis Generation. These changes are offsetting, leaving our 2010 and 2011 EPS estimates unchanged at \$1.70 and \$1.84, respectively.

Price Target Calculation

We are maintaining our \$32.50 price target, based on a target multiple of 17.5x 2011E EPS (unchanged), deservedly at the high end of utilities valuations in light of Fortis' comparatively strong utilities-based growth profile.

Outlook And Investment Summary

Q1/10 exhibited strong earnings growth as a result of several positive regulatory decisions, something we should continue to see in future quarters. Positive regulatory impacts are underpinned by strong rate base growth, with \$1.1 billion in capital expenditures expected in 2010, and \$5 billion expected between 2010 and 2014. We maintain our Sector Outperformer rating.

Key Risks To Price Target

Fortis could fall short of our earnings forecasts (and fail to meet our price target) for various reasons, including (but not limited to) the impact of negative regulatory decisions in Alberta and BC, weak power prices in Ontario, low hydro flows, environmental costs that cannot be adequately recovered through higher rates, and tourism conditions (real estate division). In addition, the utility stocks are sensitive to changes in interest rates.

Our EPS estimates are shown below:

	1 Qtr.	2 Qtr.	3 Qtr.	4 Qtr.	Yearly
2009 Current	\$0.53A	\$0.31A	\$0.21A	\$0.47A	\$1.51A
2010 Prior	\$0.58E	\$0.34E	\$0.24E	\$0.53E	\$1.70E
2010 Current	\$0.58A	\$0.34E	\$0.23E	\$0.54E	\$1.70E
2011 Prior	--	--	--	--	\$1.84E
2011 Current	--	--	--	--	\$1.84E

IMPORTANT DISCLOSURES:

Analyst Certification: Each CIBC World Markets research analyst named on the front page of this research report, or at the beginning of any subsection hereof, hereby certifies that (i) the recommendations and opinions expressed herein accurately reflect such research analyst's personal views about the company and securities that are the subject of this report and all other companies and securities mentioned in this report that are covered by such research analyst and (ii) no part of the research analyst's compensation was, is, or will be, directly or indirectly, related to the specific recommendations or views expressed by such research analyst in this report.

Potential Conflicts of Interest: Equity research analysts employed by CIBC World Markets are compensated from revenues generated by various CIBC World Markets businesses, including the CIBC World Markets Investment Banking Department. Research analysts do not receive compensation based upon revenues from specific investment banking transactions. CIBC World Markets generally prohibits any research analyst and any member of his or her household from executing trades in the securities of a company that such research analyst covers. Additionally, CIBC World Markets generally prohibits any research analyst from serving as an officer, director or advisory board member of a company that such analyst covers.

In addition to 1% ownership positions in covered companies that are required to be specifically disclosed in this report, CIBC World Markets may have a long position of less than 1% or a short position or deal as principal in the securities discussed herein, related securities or in options, futures or other derivative instruments based thereon.

Recipients of this report are advised that any or all of the foregoing arrangements, as well as more specific disclosures set forth below, may at times give rise to potential conflicts of interest.

Important Disclosure Footnotes for Fortis Inc. (FTS)

Pipelines, Utilities, & Power

Fortis Inc.

Q2 Slightly Below Expectations; Outlook Unchanged

- Fortis reported Q2/10 EPS of \$0.32, up from \$0.31 in Q2/09, and slightly below our \$0.34 expectation. The variance from our estimate reflects higher corporate costs and slightly lower-than-expected performance from regulated utilities.
- Earnings from regulated utilities totaled \$64 million in the quarter, compared to \$60 million in Q2/09, and our \$66 million estimate. Marginally lower-than-expected results at FortisAlberta, FortisBC and Newfoundland Power were partially offset by higher earnings from Terasen Gas.
- We have made minor changes reflecting Q2 results, along with slightly higher anticipated earnings from Terasen offset by higher corporate costs. As a result, our 2010 EPS estimate declines from \$1.70 to \$1.68, while our 2011 EPS estimate declines from \$1.84 to \$1.82.
- We are reducing our price target from \$32.50 to \$32.00, based on a target multiple of 17.5x 2011E EPS (unchanged). Strong rate base growth as a result of a \$5 billion capex program through 2014 and positive regulatory developments should continue to drive growth. We maintain our SO rating.

Valuation	2009A	2010E	2011E	Company Profile		
P/E Ratio (x)				- Fortis is the the largest investor-owned distribution utility in Canada with total assets approaching \$12 billion.		
Fortis	19.2	17.2	15.8	- The company's growth has been driven by two major acquisitions: FortisAlberta and FortisBC in 2004 (\$1.5 billion) and Terasen Gas Companies in 2007 (\$3.7 billion).		
Utilities Average	17.2	15.3	14.2			
EV/EBITDA (x)				- Fortis operates electric distribution utilities in 5 Canadian provinces (B.C., Alberta, Ontario, Prince Edward Island and Newfoundland) and three Caribbean countries (Belize, Cayman Islands, Turks and Caicos), and a natural gas utility in (Terasen).		
Fortis	10.8	9.8	9.8	- Fortis owns and operates non-regulated generation assets across Canada, in Belize and in Upper New York State.		
Utilities Average	9.5	8.9	8.8			
Other Data	2009A	2010E	2011E	- Fortis also owns hotels and commercial real estate across Canada.		
Dividend	1.04	1.12	1.20	Investment Thesis		
Dividend Yield	3.6%	3.9%	4.2%	- Fortis is expected to spend \$5 billion in capital between 2010 and 2014 which will drive organic EPS growth. We expect that this will be funded at the subsidiary level, with minimal equity requirements.		
Payout Ratio	69.1%	66.8%	66.0%	- Fortis deservedly trades at the high end of Canadian utilities valuations as a result of its consistently solid performance and strong growth profile.		
Book Value per Share	18.64	19.25	19.93

Q2 Results

Q2 Earnings Performance

Fortis (FTS-SO) reported Q2/10 EPS of \$0.32, up from \$0.31 in Q2/09, and slightly below our \$0.34 expectation. The variance from our estimate reflects higher corporate costs and slightly lower-than-expected performance in regulated utilities.

Q2 Highlights

Regulated Utilities:

- **Terasen Gas Companies:** Terasen Gas earnings totaled \$17 million in Q2/10, up from \$14 million in Q2/09 and above our \$15 million estimate. The y/y increase reflects higher customer delivery rates as a result of the increase in allowed ROE and equity component at Terasen.
- **FortisAlberta:** FortisAlberta contributed \$17 million to earnings in Q2/10, versus \$17 million in Q2/09, and our \$18 million estimate. FortisAlberta's higher allowed ROE and equity component, along with increased infrastructure investment and customers, was offset by lower corporate income tax recoveries and lower net transmission revenue.
- **FortisBC:** FortisBC earnings totaled \$8 million in Q2/10, compared to \$7 million in Q2/09, and our \$9 million estimate. Higher allowed ROE and infrastructure investment was partially offset by lower electricity sales due to cooler weather in June 2010.
- **Newfoundland Power:** Newfoundland Power earnings were \$11 million in the quarter, compared to \$11 million in Q2/09 and our \$12 million estimate. Slightly higher electricity rates and higher sales were offset by higher operating expenses.
- **Caribbean Utilities:** Caribbean Utilities earnings contribution totaled \$7 million, versus \$7 million in Q2/09 and our \$7 million estimate. Higher electricity sales due to warmer weather was offset by the weaker US\$ and higher business taxes at Belize Electricity.

Non-Regulated Businesses:

- **Fortis Generation:** Fortis Generation earnings totaled \$3 million, compared to \$3 million in Q2/09 and our \$5 million estimate. Earnings from the Vaca generating facility, which was commissioned in March 2010, were offset by the impact of the weaker US\$ on earnings.
- **Fortis Properties:** Fortis Properties earnings totaled \$8 million, compared to \$8 million in Q2/09 and our \$6 million estimate. Improved performance in Real Estate and Atlantic and central Canadian hotel operations were offset by lower occupancies in western Canada.
- **Corporate Costs:** Corporate costs totaled \$20 million in Q2/10, compared to \$18 million in Q2/09 and our \$18 million estimate. Costs increased as a result of dividends associated with preferred shares issued in January 2010 and higher business development costs.

Estimate Revisions

We have made minor changes reflecting Q2 results, along with slightly higher anticipated earnings from Terasen offset by higher corporate costs. As a result, our 2010 EPS estimate declines from \$1.70 to \$1.68, while our 2011 EPS estimate declines from \$1.84 to \$1.82.

Price Target Calculation

We are reducing our price target from \$32.50 to \$32.00, based on a target multiple of 17.5x 2011E EPS (unchanged), deservedly at the high end of utilities valuations in light of Fortis' comparatively strong utilities-based growth profile.

Outlook and Investment Summary

While Q2/10 was slightly below expectations, the quarter, along with Q3, tends to be the seasonally weak quarters with Q1 and Q4 making up roughly two-thirds of annual earnings. Strong rate base growth as a result of a \$5 billion capex program through 2014 and positive regulatory developments should continue to drive growth, with particularly strong comparisons anticipated in Q4. We maintain our Sector Outperformer rating.

Key Risks To Price Target

Fortis could fall short of our earnings forecasts (and fail to meet our price target) for various reasons, including (but not limited to) the impact of negative regulatory decisions in Alberta and BC, weak power prices in Ontario, low hydro flows, environmental costs that cannot be adequately recovered through higher rates, and tourism conditions (real estate division). In addition, the utility stocks are sensitive to changes in interest rates.

Our EPS estimates are shown below:

	1 Qtr.	2 Qtr.	3 Qtr.	4 Qtr.	Yearly
2009 Current	\$0.53A	\$0.31A	\$0.21A	\$0.47A	\$1.51A

2010 Current	\$0.58A	\$0.32A	\$0.24E	\$0.53E	\$1.68E
2011 Prior	--	--	--	--	\$1.84E
2011 Current	--	--	--	--	\$1.82E

IMPORTANT DISCLOSURES:

Analyst Certification: Each CIBC World Markets research analyst named on the front page of this research report, or at the beginning of any subsection hereof, hereby certifies that (i) the recommendations and opinions expressed herein accurately reflect such research analyst's personal views about the company and securities that are the subject of this report and all other companies and securities mentioned in this report that are covered by such research analyst and (ii) no part of the research analyst's compensation was, is, or will be, directly or indirectly, related to the specific recommendations or views expressed by such research analyst in this report.

Potential Conflicts of Interest: Equity research analysts employed by CIBC World Markets are compensated from revenues generated by various CIBC World Markets businesses, including the CIBC World Markets Investment Banking Department. Research analysts do not receive compensation based upon revenues from specific investment banking transactions. CIBC World Markets generally prohibits any research analyst and any member of his or her household from executing trades in the securities of a company that such research analyst covers. Additionally, CIBC World Markets generally prohibits any research analyst from serving as an officer, director or advisory board member of a company that such analyst covers.

In addition to 1% ownership positions in covered companies that are required to be specifically disclosed in this report, CIBC World Markets may have a long position of less than 1% or a short position or deal as principal in the securities discussed herein, related securities or in options, futures or other derivative instruments based thereon.

Recipients of this report are advised that any or all of the foregoing arrangements, as well as more specific disclosures set forth below, may at times give rise to potential conflicts of interest.

Important Disclosure Footnotes for Fortis Inc. (FTS)

Pipelines, Utilities, & Power

Fortis Inc.

Strong Q3 Results; Strong Growth Outlook

- Fortis reported Q3/10 EPS of \$0.26, up from \$0.21 in Q3/09 and above our \$0.24 expectation. The variance from our estimate reflects stronger-than-expected earnings from Fortis Generation, due to higher rainfall in Belize and the impact of the recently commissioned Vaca generating facility.
- Fortis is taking a 51% interest in the Waneta Expansion, which is a 335 MW hydro generating facility in B.C. Fortis' investment will total roughly \$460 million, and it will operate and maintain the non-regulated investment when the facility comes into service, which is expected in spring 2015.
- We have made minor changes to our forecasts, reflecting Q3 results and modestly stronger expectations for Fortis Generation. Our 2010E and 2011E EPS increase from \$1.68 and \$1.82 to \$1.69 and \$1.84, respectively. Our 2012E EPS goes from \$1.91 to \$1.94.
- We are increasing our price target from \$34.50 to \$35.00, based on a target multiple of 18x 2012E EPS (unchanged). Fortis' \$5.5 billion capital program from 2011-2015 will drive stable, strong long-term growth. We maintain our Sector Outperformer rating.

Company Profile

- Fortis is the the largest investor-owned distribution utility in Canada with total assets approaching \$12 billion.

- The company's growth has been driven by two major acquisitions: FortisAlberta and FortisBC in 2004 (\$1.5 billion) and Terasen Gas Companies in 2007 (\$3.7 billion).

- Fortis operates electric distribution utilities in 5 Canadian provinces (B.C., Alberta, Ontario, Prince Edward Island and Newfoundland) and three Caribbean countries (Belize, Cayman Islands, Turks and Caicos), and a natural gas utility in (Terasen).

- Fortis owns and operates non-regulated generation assets across Canada, in Belize and in Upper New York State.

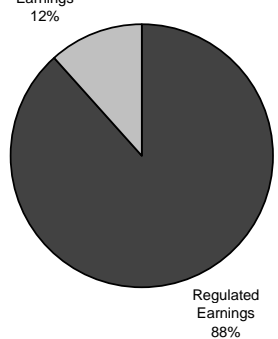

- Fortis also owns hotels and commercial real estate across Canada.

Investment Thesis

- Fortis is expected to spend \$5.5 billion in capital between 2011 and 2015 which will drive organic EPS growth. We expect that this will be funded at the subsidiary level, with minimal equity requirements.

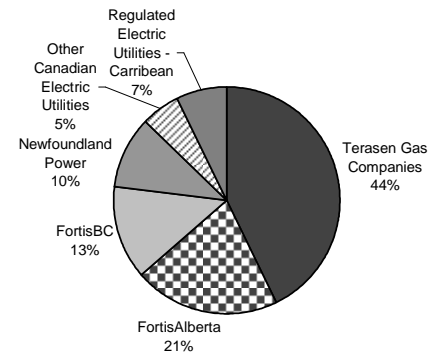

- Fortis deservedly trades at the high end of Canadian utilities valuations as a result of its consistently solid performance and strong growth profile.

Q3 Results

Q3 Earnings Performance

Fortis (FTS-SO) reported Q3/10 EPS of \$0.26, up from \$0.21 in Q3/09 and above our \$0.24 estimate. The variance from our estimate reflects stronger-than-expected earnings from Fortis Generation.

Q3 Highlights

Regulated Utilities:

- **Terasen Gas Companies:** Terasen Gas recorded a \$5 million loss in Q3/10, compared to a \$3 million loss in Q3/09 and our estimate for a \$1 million loss. The higher y/y loss reflects increased operating and maintenance expenses related to activities approved as part of the Negotiated Settlement Agreement. Q3 is Terasen's seasonally weakest quarter, with most of its earnings coming in Q1 and Q4.
- **FortisAlberta:** FortisAlberta contributed \$19 million to earnings in Q3/10, versus \$16 million in Q3/09, and our \$17 million estimate. Increased earnings were the result of FortisAlberta's higher allowed ROE and equity component, along with increased infrastructure investment and customer growth.
- **FortisBC:** FortisBC earnings totaled \$8 million in Q3/10, compared to \$7 million in Q3/09, and our \$7 million estimate. Higher allowed ROE and infrastructure investment was partially offset by a weather-related decrease in electricity sales.
- **Newfoundland Power:** Newfoundland Power earnings were \$8 million in the quarter, compared to \$7 million in Q3/09 and our \$7 million estimate. Higher electricity rates and higher sales were partially offset by \$2 million in additional operating costs related to repairing damage from Hurricane Igor.
- **Caribbean Utilities:** Caribbean Utilities earnings contribution totaled \$8 million, versus \$7 million in Q3/09 and our \$7 million estimate. The increase reflects the deferral, for future collection in customer rates, of previously expensed business taxes at Belize Electricity.

Non-Regulated Businesses:

- **Fortis Generation:** Fortis Generation earnings totaled \$9 million, up from \$4 million in Q3/09, and above our \$4 million estimate. The outperformance was the result of increased hydroelectric production in Belize due to higher rainfall and the commissioning of the Vaca generating facility in March 2010.
- **Fortis Properties:** Fortis Properties earnings totaled \$9 million, in line with \$9 million in Q3/09 and our estimate of \$9 million. Lower income taxes were offset by lower occupancies at hotel operations in western Canada.

Waneta Expansion

On October 4, Fortis and Columbia Power (a Crown corporation wholly owned by the Province of B.C.) announced an agreement to construct 335 MW hydroelectric generating facility, at an estimated cost of approximately \$900 million. The facility is sited near the Waneta Dam and powerhouse facilities on the Pend d'Oreille River, south of Trail, B.C. Fortis owns a 51% interest in the Waneta Expansion, implying an investment of roughly \$460 million. Fortis will operate and maintain the non-regulated investment when the facility comes into service, which is expected in spring 2015.

Estimate Revisions

We have made minor revisions to our model, mainly reflecting Q3 results and modestly stronger expectations for Fortis Generation going forward. As a result, our 2010E EPS increases from \$1.68 to \$1.69, while our 2011E EPS increases from \$1.82 to \$1.84. Our 2012E EPS also moves up from \$1.91 to \$1.94.

Price Target Calculation

We are increasing our price target from \$34.50 to \$35.00, based on a target multiple of 18x 2012E EPS (unchanged). Our target multiple is deservedly at the

high end of utilities valuations in light of Fortis' comparatively strong utilities-based growth profile.

Outlook and Investment Summary

With the Waneta Expansion, Fortis now has a \$5.5 billion capital program in place from 2011-2015. The vast majority of these investments will be in the company's utilities, producing stable, strong long-term growth. We maintain our Sector Outperformer rating.

Key Risks To Price Target

Fortis could fall short of our earnings forecasts (and fail to meet our price target) for various reasons, including (but not limited to) the impact of negative regulatory decisions in Alberta and BC, weak power prices in Ontario, low hydro flows, environmental costs that cannot be adequately recovered through higher rates, and tourism conditions (real estate division). In addition, the utility stocks are sensitive to changes in interest rates.

Our EPS estimates are shown below:

	1 Qtr.	2 Qtr.	3 Qtr.	4 Qtr.	Yearly
2009 Current	\$0.53A	\$0.31A	\$0.21A	\$0.47A	\$1.51A

Pipelines, Utilities, & Power

Fortis Inc.

Solid Low-risk Growth, Already Priced In

- Fortis has expanded from its Atlantic Canada roots through a series of acquisitions to now own a strong western Canadian franchise and operations in the Caribbean. Acquired businesses have grown rapidly post-acquisition given ongoing investments and customer growth.
- The pace of growth is unlikely to slow in the short term, as Fortis is in the early stages of a five-year, \$5.5 billion capital program, which is expected to increase the regulated rate base by a CAGR of 6% and includes 51% of the non-regulated \$900 million Waneta expansion project.
- Fortis provides the benefits (stability) of its regulated utility business, but is in a period of solid organic investment and growth. Risks from non-regulated assets (Waneta) and international operations (Belize) appear containable, with little variability expected from overall operations.
- Our main concern is valuation. Despite solid low-risk growth, we believe the stock already reflects this outlook and expect a modest TSR of 8.3% to our price target. We are, therefore, initiating coverage with a Sector Performer rating and \$34.50 price target, as of May 24.

Investment Summary

Fortis Inc. (FTS-SP) has expanded from its Atlantic Canada roots through a series of acquisitions to now own a strong western Canadian franchise and operations in the Caribbean. Western Canadian operations have continued to grow post-acquisition, with, for instance, FortisAlberta and FortisBC, both acquired in May 2004, growing their combined rate base at a compound average annual growth rate (CAGR) of over 12% since acquisition. Terasen Gas (now FortisBC Energy) has grown its rate base on average by 3.2% annually since its acquisition in May 2007. Fortis' Caribbean operations have grown through a series of acquisitions and development initiatives.

The pace of growth is unlikely to slow in the short term, as Fortis is in the early stages of a five-year, \$5.5 billion capital program expected to grow the overall rate base on average by 6% annually from 2010 through 2015. In addition, the company is a 51% owner in the non-regulated \$900 million Waneta Hydroelectric Expansion Project, currently under construction with a spring 2015 in-service date.

For the most part, Fortis has remained focused on its distribution utility roots, an area in which the company has proficiency: managing its distribution assets, dealing with large numbers of customers, and operating within a highly regulated environment. As such, Fortis offers the benefits of a stable, regulated utility business with the upside provided by significant growth investments (at least, significant growth in context of a regulated utility). While the company already owns a number of non-regulated hydroelectric generation facilities, the Waneta Expansion stands out given its size (\$900 million), but major risks (construction, financing, hydrology) appear well contained. Adverse regulatory rulings in Belize reveal the heightened risks of operating in Central America. However, we expect little variability in overall company results given the heavy weighting to Canadian regulated businesses.

Our main concern is one of valuation: trading at 18.4x estimated 2011 and 17.5x estimated 2012 earnings and with a 3.5% yield, the stock is reflecting both the solid growth outlook as well as the current low interest rate environment. We acknowledge Fortis' solid, low-risk, growth forecast, and believe it justifies Fortis' premium current-year earnings multiple versus the Canadian utilities group average of 16.4x and the broader pipelines and utilities group average of 18.2x. Our fundamental discounted cash flow (DCF) valuation supports a price target of \$34.50/share, for a target multiple of 18.3x estimated 2012 earnings. This represents a 12-month total shareholder return (including dividends) of 8.3%, in line with our group average of 8.5%. As such, we believe the stock fairly represents the company's outlook and we are initiating coverage, as of May 24, with a Sector Performer rating and \$34.50 price target.

Asset Overview

Fortis owns a number of regulated utilities (eight electric, one gas) with total assets of \$11.9 billion, non-regulated hydro generation facilities (\$0.4 billion) and non-regulated real estate assets (\$0.6 billion) held for tax optimization purposes. The western Canadian operations represent over 70% of rate base assets, including: FortisBC gas (40%) and electric (13%), and FortisAlberta (20%). The remainder of regulated operations are in Ontario, Atlantic Canada, Central America (Belize) and the Caribbean.

Exhibit 1. Regulated Operations (2010)

Company	Customers	Peak Demand	Rate Base (\$ blns.)	Earnings (\$ mlns.)	Allowed ROE (2011)
FortisBC Energy (Terasen)	949,000	1,421 TJ	\$3.4	\$130	9.50%
FortisAlberta	491,000	2,555 MW	1.7	68	9.00%
FortisBC	161,000	707 MW	1.1	42	9.90%
Newfoundland Power	243,000	1,206 MW	0.9	35	8.38%
Maritime Electric	74,000	207 MW	0.3	12	9.75%
FortisOntario	64,000	273 MW	0.2	7	8.01%–9.85%
Belize Electricity	77,000	81 MW	0.2	2	To be resolved
Caribbean Utilities	26,000	102 MW	0.4	11	7.75%–9.75%
Fortis Turks and Caicos	9,000	31 MW	0.2	10	17.50%

Source: Company reports and CIBC World Markets Inc.

FortisBC Energy (Formerly Terasen)

FortisBC Energy is the largest distributor of natural gas in British Columbia, serving virtually all the province's gas users. FortisBC Energy also owns a natural gas pipeline from the mainland across the Georgia Strait to service customers on Vancouver Island. Gas is sourced from northeastern BC, and from Alberta via FortisBC Energy's Southern Crossing Pipeline.

FortisBC Energy comprises three separate entities, formerly known as Terasen Gas, Terasen Gas (Vancouver Island) and Terasen Gas (Whistler). In March 2011, FortisBC Energy (and its separate Vancouver Island and Whistler entities) was rebranded from Terasen Gas to share the FortisBC name used by the company's electric utility in the province, although it will remain a separate legal entity from the FortisBC electric utility. The three separate Terasen entities are also proposing an amalgamation into one, with a regulatory application for this expected in 2011.

FortisBC Energy's allowed rate of return on equity is 9.5% [10% for FortisBC Energy (Vancouver Island) and for FortisBC Energy (Whistler)] with a 40% equity component on a total rate base of \$3.4 billion. These rates were increased by roughly 100 basis points (bps) in mid-2009. Commodity costs of natural gas (and propane gas for customers in the Revelstoke area) and mid-stream costs are flowed through to customers without mark-up.

Growth in the gas operations comes from customer additions (currently running around 1% of the installed base), as well as capital improvement projects such as: replacing suspended pipelines over the Columbia and Fraser Rivers with pipelines buried underneath the rivers; constructing a new natural gas storage facility on Vancouver Island; and, converting Whistler from propane to natural gas. FortisBC Energy had capital expenditures of \$253 million in 2010 with a further \$281 million planned for 2011 to be spent on completion of the above-noted projects, ongoing implementation of a new customer information system and related call centers, and normal course capital expenditures.

Regulated Electric Utilities – Canadian

- **FortisBC:** FortisBC is an integrated electric utility serving 161,000 customers in the southern interior of BC. The company owns ~7,000 km of transmission and distribution lines as well as four hydro projects on the Kootenay River with combined capacity of 223 MW, which generate about 45% of the utility's energy requirements, with the balance met through Power Purchase Agreements (PPAs) with third parties. FortisBC also manages a further 947 MW of hydro generation facilities in the region. Allowed ROE is 9.9% on a rate base of \$1.1 billion. Capital expenditures of \$139 million in 2010 and planned \$99 million in 2011 are directed at various system upgrades and the substantial completion of the major \$106 million Okanagan Transmission Reinforcement Project.
- **FortisAlberta:** FortisAlberta is an electric utility serving about half a million customers in southern Alberta. The company owns 112,000 km of distribution lines, representing 45% of Alberta's low voltage distribution system. Allowed ROE is 9.0% on a rate base of \$1.7 billion, although FortisAlberta is seeking a higher allowed ROE (e.g., more in line with that of FortisBC, which is at 9.9%). Growth stems from new customer additions (about 2% annually) and capital projects, including: a \$126 million project to install automated meters, the connection of multiple renewable power generation projects, and capacity expansions. Total capital expenditures were \$379 million in 2010 and Fortis is forecasting a rise to \$420 million in 2011, directed to the capital programs noted above as well as to payments to the Alberta Electric System Operator (AESO) for major transmission system upgrades.
- **FortisOntario:** FortisOntario is a small electric utility servicing regions in northern, southwestern and eastern Ontario, with a total customer base of 64,000 customers. Allowed ROE ranges from 8.01% (Canadian Niagara Power) to 9.85% (for the Algoma Power assets acquired in 2009), with a 40% equity component on a rate base of \$0.2 billion.
- **Newfoundland Power:** Newfoundland Power is the main electricity distribution utility in Newfoundland with about a quarter of a million customers – about 85% of electricity consumers in the province. The utility purchases over 90% of its electricity from Newfoundland and Labrador Hydro (a division of Nalcor Energy), but generates the remainder from its own (primarily hydro) facilities. The business has 11,000 km of transmission and distribution lines and has installed generating capacity of 139 MW. Allowed ROE is a (comparatively low) 8.38% for 2011, but on a higher-than-average equity component of 45%. Rate base assets total \$0.9 billion. Fortis made capital investments totaling \$78 million in 2010, and expects to invest a further \$73 million in 2011 towards customer additions, and system upgrades and maintenance.
- **Maritime Electric:** Maritime Electric is the main electricity utility on Prince Edward Island, serving about 74,000 customers (90% of electricity consumers). The utility has ~5,300 km of transmission and distribution lines, and has an in-house generating capacity of 150 MW from thermal-powered units although it purchases the majority (86%) of electricity needs from New Brunswick Power. Allowed ROE is 9.75%, with a 40% equity component on rate base assets of \$0.3 billion. Capital spending is being directed to improved system reliability, and connections to new renewable power projects as the business works towards a target of 30% of power sourced from renewable energy by 2013.

Regulated Electric Utilities – Caribbean

- **Belize Electricity:** Although located in Central America, Belize Electricity (BEL) is grouped in with Fortis' Caribbean businesses. Belize Electricity is the primary distributor of electricity in the country, serving 77,000 customers. Fortis owns 70% of Belize Electricity. Historically, BEL purchased about half its power from CFE, the Mexican state-owned electricity company, but recent investments in non-regulated hydro projects by Belize Electric Company (BECOL), part of Fortis Generation, as well as a new (third-party-owned) cogeneration facility, make the country self-sufficient. Unfortunately for Fortis, Belize is proving an unfriendly regulatory regime. BEL continues to battle the Belize Public Utilities Commission, which, in a reversal of prior rulings, has effectively forced BEL to absorb the cost of high oil prices in 2008 and further ordered BEL to lower electricity rates. In March 2011, BEL's appeal of these rulings to the Supreme Court of Belize was denied, and the company continues to evaluate its options to appeal the ruling.
- **Caribbean Utilities:** Caribbean Utilities serves 26,000 customers on Grand Cayman Island, with ~500 km of transmission and distribution lines and a 24 km subsea cable, and 17 generating units with a combined capacity of ~150 MW, sufficient to satisfy domestic requirements. The division's capital spending decreased 50% in 2010 to \$21 million from \$43 million in 2009, which included \$19 million related to a new 16 MW diesel generating unit.
- **Fortis Turks & Caicos:** Fortis Turks and Caicos serves 9,000 customers, approximately 88% of electricity consumers on the islands, owning and operating 325 km of transmission and distribution lines and 57 MW of diesel generation capacity, sufficient to meet demand.

Fortis Generation – Non-regulated

Fortis Generation is comprised primarily of a number of small non-regulated power generation projects with combined capacity of 139 MW, 134 MW of which is hydro. Power is sold through a mix of long-term contracts or into the market. The generation facilities are located near, and for the most part are complementary to, Fortis' utility operations in Belize, eastern Ontario, Newfoundland, and BC, although Fortis also owns four small hydro facilities in Upper New York State.

Fortis has also announced a major investment in the Waneta Expansion Hydro Project in south central BC. Fortis own 51% of the project and will also purchase some of the power from the project through its FortisBC subsidiary (more on this below).

Fortis Properties – Non-regulated

Fortis Properties includes approximately 2.7 million square feet of office and retail space primarily in Atlantic Canada and 21 hotels across the country. These properties have been acquired through a series of property-specific acquisitions through the years. The company's intent in owning these properties is to generate income sufficient to fully offset corporate costs that otherwise would not be utilized (for tax purposes), as profits in the regulated subsidiaries are not transferable. The subsidiary earned \$26 million in 2010 on assets of \$0.6 billion.

Growth Initiatives

Fortis has a projected five-year average annual growth rate for its rate base of 6% from \$7.7 billion in 2010 to \$10.1 billion by 2015. In addition to the regular course-of-business growth projects noted above, we specifically note the following:

Waneta Hydroelectric Expansion Project

Fortis announced in August 2010 that it will invest in a major hydro generation project to expand the existing Waneta Dam in south central BC. The existing 493 MW Waneta hydro project is owned by Teck Resources (TCK-SO) (2/3) and BC Hydro (1/3). The \$900 million, 335 MW Waneta Expansion Project will be 51%-owned by Fortis and the remainder by Columbia Power Corporation and Columbia Basin Trust, Crown corporations of the province of BC. Fortis will fund its 51% share of the construction costs, and will operate and maintain the facility once in service, expected by spring 2015. Fortis expects the project ROE to be about 200 bps higher than that on the company's regulated assets (i.e., about 11.5%–12.5% over the life of the project).

This project meets FortisBC's requirement for extra capacity to meet periods of peak demand, although actual energy usage is expected to be relatively modest, with BC Hydro purchasing the bulk of the generated power. As such, the Waneta Expansion will receive fixed energy and capacity payments, with 630 GWh (energy and related capacity) sold to BC Hydro under a long-term (40 year) agreement, and surplus capacity (on an average annual basis of 234 MW) sold to FortisBC (also under a 40-year agreement). Energy and capacity sales to BC Hydro are at prices "comparable" to those under BC Hydro's 2008 Clean Power Call (around \$100/MWh). Capacity payments from FortisBC will be in the range of \$11–\$17.50/kW-month.

While the project is not a regulated asset, Fortis is exposed to limited risk given: the long-term capacity and energy sales agreements, a fixed-price design-build construction contract with SNC-Lavalin (SNC-SO), and well-understood hydrology given that FortisBC already owns and/or operates several hydro facilities in the region. The expansion also falls under the Canal Plant Agreement under which BC Hydro manages the overall water resources (i.e., hydro facilities and related water usage) on the Kootenay, Columbia and Pend d'Oreille Rivers (on which the Waneta Dam and Expansion are located), thereby further reducing hydrology risk to the project.

Acquisitions

Fortis has built the business over time through a series of acquisitions, with the most significant being those of FortisAlberta and FortisBC in May 2004 for \$1.5 billion and of Terasen Gas in May 2007 for \$3.7 billion. The company has also made numerous tuck-in acquisitions to build out its operations (e.g., the October 2009 purchase of Algoma Power in Ontario for \$75 million) or properties [e.g., acquiring a Holiday Inn (IHG-NYSE) in Windsor, Ontario in April 2009 for \$7 million and a Sheraton Hotel (HOT-NYSE) in Newfoundland for \$22 million in November 2008].

Exhibit 2. Select Acquisition History

Company	Date	Vendor	Amount
Algoma Power	October 2009	Great Lakes Power	\$75 million
Terasen	May 2007	Kinder Morgan	\$3.7 billion
Fortis Turks and Caicos	August 2006	T.C. Energy Holdings	\$98 million
FortisAlberta and FortisBC	May 2004	Aquila	\$1.5 billion
Belize Electric Company	May 2004 and January 2001	Duke Energy	US\$65 million
Caribbean Utilities	Various	International Power Holdings	US\$155+ million

Source: Company reports and CIBC World Markets Inc.

Fortis continues to look for acquisitions to build out its platform. However, it does not regard Canada as fertile ground: most of the private sector electric [e.g., Emera (EMA-SO), AltaLink, ATCO (ACO.X-TSX), etc.] and gas [e.g., Enbridge Gas Distribution (ENB-SP), Union Gas (owned by Spectra Energy (SE-NYSE)), PNG (PNG-TSX)] utilities do not appear to be for sale, and the likelihood of government-owned utilities being privatized also appears low.

The company, therefore, is increasingly turning its attention south of the border, looking for regulated transmission and distribution utilities with enterprise values in the low to mid-billions of dollars. Several recent transactions have been announced/completed, with valuations in the range of 1.0x–1.2x rate base. With these valuation metrics, Fortis could acquire similar-sized companies as FortisBC Energy or FortisAlberta/FortisBC, which both currently have rate bases of around \$3 billion.

Exhibit 3. Recent U.S. Utility Acquisitions

Acquirer	Target	Date	Purchase Price (EV)	Est. Valuation (Multiple Of Rate Base)
PPL Corp.	E.ON US	Nov. 2010	US\$7.6 billion	1.1x
AGL Resources	Nicor Inc.	Dec. 2010 (announced)	3.1 billion	1.0x
Northeast Utilities	NSTAR	Oct. 2010 (announced)	4.2 billion	1.2x
FirstEnergy	Allegheny Energy	Feb. 2011	8.5 billion	NA

Source: Company reports and CIBC World Markets Inc.

The company would prefer companies in the U.S. northeast or northwest, close to its existing Canadian operations, but would not rule out other regions.

Risks/Sensitivities

- Market Risks:** Under regulator-approved mechanisms, Fortis flows through the commodity cost of natural gas, fuel or purchased power to its customers. The company's non-regulated hydro generation assets are sensitive to localized rainfall levels, but are geographically dispersed and individually not meaningful to overall results. The Waneta Expansion will be more material, but hydrology risk is managed as part of the overall regional river system by BC Hydro, effectively reducing the risk to the project. Foreign exchange risk is relatively low: a 5% change in the Canadian/U.S. dollar exchange rate would impact earnings by \$0.01/share.

- Regulatory Issues:** Given that the majority of Fortis' business is regulated (over 90% as measured by revenues and assets), the company's results are highly sensitive to regulatory decisions. In recent years, Fortis has benefited from increasing ROEs for most of its Canadian operations (e.g., Terasen Gas' allowed ROE rising in mid-2009 to 9.50% from 8.47%, FortisAlberta's allowed ROE rising in 2009 to 9.00% from 8.51%, and FortisBC's allowed ROE rising in 2010 to 9.90% from 8.87% in 2009).

Exhibit 4. Regulator Approved Allowed ROEs

	2007	2008	2009	2010	2011
Terasen	8.37%	8.62%	9.50% ¹	9.50%	9.50%
FortisAlberta	8.51	8.75	9.00	9.00	9.00 ²
FortisBC	8.77	9.02	8.87	9.90	9.90
Newfoundland Power	8.60	8.95	8.95	9.00	8.38 ³

Notes: 1) Effective July 1, 2009; 2) Interim basis; 3) Automatic adjustment formula.

Source: Company reports and CIBC World Markets Inc.

However, the company is also at risk of adverse regulatory decisions, with the potential that allowed ROEs could be reduced over time, as regulators that moved away from automatic ROE adjustment formulas might look to re-examine their generic ROE rates.

Fortis could also be impacted by operation-specific regulatory rulings. For instance, its regulated operation in Belize (i.e., Belize Electricity) has been denied an appeal on a Public Utilities Commission decision, which effectively forced Belize Electricity to absorb \$38 million of "excess costs" resulting from high oil prices in 2008. In Newfoundland, Fortis jointly owned 51% of a hydro facility with AbitibiBowater (ABH-TSX) through the Exploits Partnership. A dispute between AbitibiBowater and the Newfoundland and Labrador government resulted in expropriation of the Partnership's assets in 2009. The government has stated it is not its intent to adversely affect the business interests of AbitibiBowater's business partners, and although Fortis no longer controls the assets, the company continues to receive associated cash flows.

- Construction Risk:** Fortis primarily faces construction risk for its non-regulated generation assets where the company assumes the risk of cost overruns. Clearly, the Waneta Expansion project is the largest construction project that the company is undertaking (with the company funding 51% of the total \$900 million cost). Fortis and its partners have signed a fixed-price design-build contract with SNC-Lavalin in order to mitigate construction risk, but ultimate construction and financing risks lie with the Waneta Expansion consortium (i.e., Fortis and partners).

Source And Uses Of Cash

Fortis has identified a five-year, \$5.5 billion capital program, including the Waneta Expansion Project, which would increase its rate base from \$7.7 billion in 2010 to \$10.1 billion by 2015, a 6% CAGR. For 2011 the company has broken out spending by operation, as noted in Exhibit 5.

Exhibit 5. Capital Spending (\$ mlns.)

	2010	2011E
FortisBC Energy	\$253	\$281
FortisAlberta	379	420
FortisBC	139	99
Newfoundland Power	78	73
Other Canadian Electric Utilities (FortisOntario/Maritime Electric)	48	46
Total Regulated Utilities –Canada	897	919
Regulated Utilities – Caribbean	72	83
Non-regulated (Generation/Properties)	104	210
Total	1,073	1,212

Source: Company reports and CIBC World Markets Inc.

We calculate that this capital spending program will contribute to estimated annual cash needs of up to \$1.9 billion over the next several years (through 2014), a little under half of which is expected to be funded from operating cash flow. Our forecast highlights the need for substantial debt issuances or utilization of credit facilities (\$1.5 billion available on total \$2.1 billion credit facilities) over the next few years to fund the growth program as well as fund scheduled debt repayments. Nevertheless, based on this outlook, we foresee the debt/capitalization ratio remaining stable at around 58% from 2010 through 2014, declining thereafter if funding requirements drop. We have, therefore, modeled only modest equity issuance (\$200 million in 2011), with some further amounts coming from various dividend reinvestment and employee share purchase and option programs.

We expect total dividends to amount to \$249 million in 2011 (up from \$230 million in 2010), with dividends expected to increase commensurately with any further equity and/or preferred share issuances and earnings growth (and based on a mid-point of the targeted 60%–70% payout range). We have also included in our outlook funds received from the company's dividend reinvestment, employee share purchase and options programs, which in 2010 resulted in the issuance of 3.1 million shares and generated a combined \$80 million, almost double the level in 2009.

Earnings Profile

Our earnings profile captures the following factors:

- Ongoing underlying growth of the rate base across the company's operations due to customer/market growth (especially FortisAlberta) and system improvements.
- Within a framework of a five-year, \$5.5 billion capital spending program, major project activities such as: (for FortisBC Energy) a \$210 million LNG storage facility on Vancouver Island and a \$110 million customer care enhancement program; (for FortisBC) the \$106 million Okanagan Transmission Reinforcement Project; (for FortisAlberta) a \$126 million program to install automated meters and a \$283 million program to replace 80,000 aging utility poles; and, (non regulated) the \$900 million (\$459 million to Fortis) Waneta Expansion Project.
- A generally favorable regulatory environment in Canada, where allowed rates of return on equity have increased over the past couple of years, generally to the 9%+ range. Unfavorable rulings in Belize have impacted, and will likely continue to impact, those operations.

We do not include any potential upside from acquisitions, although note that Fortis has a history of such activity – both for tuck-ins (Caribbean, Ontario, properties) and major build-outs (Terasen, FortisBC/FortisAlberta).

Source: CIBC World Markets Inc.

Our discounted cash flow analysis (Exhibit 8) captures this outlook and the expected returns from the capital spending program. We calculate that FortisBC Energy (Terasen) comprises about 41% of total company value at present, the Canadian electric utilities about 45% and the Caribbean, non-regulated operations and other the remaining 14%. Our analysis suggests a total company value of about \$34.50 per share.

Recommendation

Fortis presents an appealing investment proposition: stable regulated returns plus solid growth from investments in regulated and non-regulated businesses. In addition, the company has a track record of successful acquisitions, and continues to evaluate tuck-in opportunities and larger step-out targets, likely in the U.S.

Our primary concern at present is one of valuation: the company is trading at 18.4x current-year (2011) and 17.5x next-year (2012) estimated earnings, above the Canadian utility group average of 16.4x current-year earnings and the broader pipelines and utilities group at 18.2x. We view the premium earnings multiple vs. the utilities group as supportable given Fortis' low-risk profile and growth outlook. Our fundamental discounted cash flow valuation analysis suggests a price target of \$34.50, for an implied P/E multiple of 18.3x our 2012 estimate, and representing a 12-month total shareholder return of 8.3% vs. a group average of 8.5%. While acquisitions might provide upside to our forecast, we do not model these given uncertainty as to timing, magnitude and/or financial impact. While we, therefore, view Fortis as a company offering solid, low-risk growth, we believe the stock is at present fairly valued and we initiate coverage with a Sector Performer rating and \$34.50 price target.

Price Target Calculation

Our price target is based on a discounted cash flow analysis, which captures the expected cash flow growth from Fortis' five-year, \$5.5 billion capital spending program. The price target of \$34.50 equates to a P/E multiple of 18.3x our 2012 estimate, a premium to the group average given, in our view, Fortis' solid, low-risk, growth outlook.

Key Risks To Price Target

- **Market Risks:** Under regulator-approved mechanisms, Fortis flows through the commodity cost of natural gas, fuel or purchased power to its customers. The company's non-regulated hydro generation assets are sensitive to localized rainfall levels, but are geographically dispersed and individually not meaningful to overall results. The Waneta Expansion will be more material, but hydrology risk is managed as part of the overall regional river system by BC Hydro, effectively reducing the risk to the project. Foreign exchange risk is relatively low: a 5% change in the Canadian/U.S. dollar exchange rate would impact earnings by \$0.01/share.
- **Regulatory Issues:** Given that the majority of Fortis' business is regulated (over 90% as measured by revenues and assets), the company's results are highly sensitive to regulatory decisions – both positive (such as increasing allowed ROEs in Canada over the past few years) and negative (such as an adverse ruling in Belize).
- **Construction Risk:** Fortis primarily faces construction risk for its non-regulated generation assets where the company assumes the risk of cost overruns. Clearly, the Waneta Expansion project is the largest construction project that the company is undertaking (with the company funding 51% of the total \$900 million cost). Fortis and its partners have signed a fixed-price design-build contract with SNC-Lavalin in order to mitigate construction risk, but ultimate construction and financing risks lie with the Waneta Expansion consortium (i.e., Fortis and partners).

Our EPS estimates are shown below:

	1 Qtr.	2 Qtr.	3 Qtr.	4 Qtr.	Yearly
2010 Current	\$0.58A	\$0.32A	\$0.26A	\$0.49A	\$1.65A
2011 Current	\$0.67A	\$0.35E	\$0.27E	\$0.50E	\$1.79E
2012 Current	--	--	--	--	\$1.88E

IMPORTANT DISCLOSURES:

Analyst Certification: Each CIBC World Markets research analyst named on the front page of this research report, or at the beginning of any subsection hereof, hereby certifies that (i) the recommendations and opinions expressed herein accurately reflect such research analyst's personal views about the company and securities that are the subject of this report and all other companies and securities mentioned in this report that are covered by such research analyst and (ii) no part of the research analyst's compensation was, is, or will be, directly or indirectly, related to the specific recommendations or views expressed by such research analyst in this report.

Potential Conflicts of Interest: Equity research analysts employed by CIBC World Markets are compensated from revenues generated by various CIBC World Markets businesses, including the CIBC World Markets Investment Banking Department. Research analysts do not receive compensation based upon revenues from specific investment banking transactions. CIBC World Markets generally prohibits any research analyst and any member of his or her household from executing trades in the securities of a company that such research analyst covers. Additionally, CIBC World Markets generally prohibits any research analyst from serving as an officer, director or advisory board member of a company that such analyst covers.

In addition to 1% ownership positions in covered companies that are required to be specifically disclosed in this report, CIBC World Markets may have a long position of less than 1% or a short position or deal as principal in the securities discussed herein, related securities or in options, futures or other derivative instruments based thereon.

Recipients of this report are advised that any or all of the foregoing arrangements, as well as more specific disclosures set forth below, may at times give rise to potential conflicts of interest.

Pipelines, Utilities, & Power

Fortis Inc.

Acquisition Of New England Utility; Update On Belize

- On May 30, Fortis announced that it has entered into an agreement to acquire Central Vermont Public Service (CVPS) for approximately US\$700 million including assumed debt. CVPS is the largest electric utility in Vermont, and has a stake in the state's transmission system.
- Fortis paid full price for CVPS, although it has a strong growth profile, with its rate base expected to grow from US\$426 million in 2010 to ~US\$650 million in 2015 (9% CAGR) through the acquisition of Vermont Marble, investments in transmission, and capex in its base distribution business.
- Fortis also announced a bought deal, issuing 9.1 million shares at \$33/share, resulting in net proceeds of \$288 million. As a result, our 2011E EPS decreases from \$1.79 to \$1.75. Our 2012E and 2013E EPS increase from \$1.88 and \$2.00 to \$1.89 and \$2.03, reflecting the acquisition impact.
- We view the acquisition as modestly positive, with upside to the extent Fortis can become a consolidator in the region. In Belize, the government is looking to nationalize Fortis' operations, although financial implications are still unclear. Maintain SP rating; PT to \$35.00 vs. prior \$34.50.

Company Profile

Fortis owns a natural gas utility in British Columbia, electric distribution utilities in five Canadian provinces, Central America and the Caribbean, and non-regulated power generation and real estate assets.

Investment Thesis

Fortis provides the benefits (stability) of a regulated utility, and is in a period of solid organic investment and growth as the company delivers on its 5 year, \$5.5 billion capital program which is expected to grow the regulated rate base by a CAGR of 6% through 2015. The company is also a 51% owner of the non-regulated \$900 million Waneta Expansion project.

Acquiring New England Utility

On May 30, Fortis (FTS-SP) announced that it has entered into an agreement to acquire all of the outstanding common shares of Central Vermont Public Service (CVPS) (CV-NYSE) for \$35.10/share in cash, representing a 44% premium over the CVPS closing price on the prior trading day. The total purchase price, including the assumption of approximately US\$230 million in debt, amounts to roughly US\$700 million. The closing of the acquisition is subject to a variety of approvals, including CVPS shareholders, the Vermont Public Service Board, and the U.S. Federal Energy Regulatory Commission (FERC). Fortis expects the transaction to close within six to 12 months.

CVPS is the largest electric utility in Vermont, serving nearly 160,000 customers. Its electric system consists of approximately 9,000 miles of distribution lines and more than 600 miles of sub-transmission lines. CVPS also holds a 41% ownership interest in Vermont Transco LLC [managed by Vermont Electric Power Company (Velco)], which owns and operates the high-voltage transmission system in Vermont.

CVPS expects its rate base to grow from US\$426 million in 2010 to approximately US\$650 million by 2015, representing a compound annual growth rate of 9% (Exhibit 1). The rate base growth is expected to be driven by Vermont Marble (a US\$33 million acquisition of primarily transmission and distribution assets), additional investments in transmission (through its equity interest in Velco), and capital expenditures in its base distribution business. The allowed rate of return on common equity for 2011 is set at 9.45%, and equity level is set at 57%.

Exhibit 1. CVPS Rate Base Projections

Source: Company reports.

Fortis has been looking for acquisitions for some time, and targeted the U.S. northeast as a potential entry point. At US\$700 million, the CVPS acquisition is smaller than our expectation for a low- to mid-billion-dollar transaction. In addition, at a 1.4x rate base (when factoring in CVPS' proportional ownership in Velco), the acquisition is moderately more expensive than recent U.S. utility acquisitions in the 1.0x–1.2x rate base range. However, CVPS has a strong growth profile, with a 9% CAGR in its rate base expected through 2015.

In addition, while Fortis will operate CVPS in its normal decentralized fashion, there may be further opportunities to add assets in the region. Vermont has a population of roughly 600,000 people, but is home to 20 electric distributors. The second-largest utility in Vermont is Green Mountain Power, which has approximately 90,000 customers covering a territory encompassing approximately 25% of the state's population, and is owned by Gaz Metro Inc.

Equity Issuance

In conjunction with the acquisition announcement, Fortis announced a bought deal for 9.1 million shares at \$33.00/share. Net proceeds of approximately \$288 million (\$300 million in gross proceeds less underwriting fees) will be used to repay outstanding debt under the company's committed credit facility, finance additional equity injections into Fortis' western Canadian regulated utilities and the Waneta Expansion, and for general corporate purposes. While Fortis is not using the proceeds from the equity issue directly to purchase CVPS, it is using a portion of the proceeds to repay the debt on its committed credit facility, and it will ultimately use that same credit facility to fund its purchase of CVPS. There is also an overallotment option whereby the underwriters will be able to purchase an additional 1.365 million shares, which would bring an additional \$43 million in net proceeds to Fortis if fully exercised. We have not incorporated the over-allotment proceeds in our forecasts. We do not expect Fortis to issue any additional common equity over the forecast horizon, unless it makes further acquisitions.

Estimate Revisions

Fortis expects the acquisition to be accretive to EPS in its first full year of ownership. In the interim, however, we expect the impact of the equity issue to reduce EPS in 2011 from \$1.79 to \$1.75. We have assumed that the transaction will close at the end of Q1/12. Our 2012 EPS forecast increases from \$1.88 to \$1.89, reflecting the partial-year contribution from CVPS. Our 2013 EPS estimate increases from \$2.00 to \$2.03, reflecting the first full year of CVPS.

Belize Saga Continues

Fortis' regulated electricity distribution operations in Belize (Belize Electricity Limited, or BEL) have been under pressure since a June 2008 decision by the Belize Public Utilities Commission reversed previous rate-setting agreements, lowered BEL's allowable rates of return, and forced BEL to assume the cost of surging energy prices in 2008. BEL's legal appeals, including to the Belize Supreme Court, have been dismissed. The left-leaning government of Prime Minister Dean Barrow "was always ideologically opposed to the privatization of essential resources" and has resisted allowing any rate increases.

With oil prices again on the rise, and unable to increase rates accordingly, BEL has been facing mounting financial pressures. Furthermore, BEL has been unable to qualify for bank credit given the unsettled regulatory regime. Fortis is understandably unwilling to further invest in the operation. Given BEL's financial distress, the operation is facing mounting debts to Mexico's Comisión Federal de Electricidad (CFE), from which BEL purchases a substantial portion (in 2010, 33%) of its power. Year-end 2010 financial statements show BEL also owed BZ\$9 million (US\$4.5 million) to Fortis and BECOL (a hydro generation facility in Belize which Fortis also owns). BEL has asked the Belize government to prepay its energy bills of roughly \$2 million/month to help cover power purchases.

The government has now announced its intent “in purchasing majority shares in BEL so as to assume control of the company,” although no formal purchase proposal has been received by Fortis. Fortis currently owns 70% of BEL, the Belize government indirectly holds 27% (through the Social Security Board of Belize), and the remainder is held by smaller shareholders in Belize. It is unclear at present:

1. How much of BEL the government intends to buy: The government would need a further 24% to reach a majority position, but Fortis is unwilling to become a minority shareholder and would likely seek to sell its entire stake.
2. What price the government will pay: Prime Minister Barrow has stated “you trade off the fact that there is an asset value against the fact that the company virtually is insolvent” – ignoring the fact that his government’s actions have placed BEL in this situation, and that at the end of 2010 BEL had net PP&E of BZ\$445 million (approximately US\$222 million). The purchase would represent an enormous sum for the government of Belize – the country’s total GDP in 2009 was US\$1.354 billion (World Bank data), and certainly begs the question of how the government could afford to pay anything approaching fair value.
3. Whether the government will expropriate the business: The Belize government has set a precedent with the expropriation in 2009 of the country’s main telephone company, Belize Telemedia, with legal proceedings still ongoing.

The assets of BEL represent less than 2% of Fortis’ total assets; the combined assets of BEL and BECOL represent less than 3% of Fortis’ total assets. Nevertheless, a worst-case scenario could be a partial or total writedown of Fortis’ investment in BEL, with its net book investment in BEL currently at ~US\$125 million (~\$0.70/share). We are making no changes to our financial outlook at present until there is further clarity on the situation.

Price Target Calculation

We are raising our price target from \$34.50 to \$35.00, reflecting the contribution of the CVPS acquisition to our discounted cash flow (DCF) forecast. The \$35.00 price target equates to a P/E multiple of 18.5x our 2012 estimate, a premium to the group average given Fortis’ solid, and for the most part low-risk, growth outlook.

Outlook And Investment Summary

Overall, we view the CVPS acquisition as modestly positive to Fortis. As a standalone investment, the acquisition was on the expensive end, although CVPS has a strong growth profile through 2015. Upside may exist to the extent that Fortis can become a consolidator in the region. As noted above, we have not adjusted our financial estimates for Belize given the uncertainty as to the government’s intentions, although a nationalization of the business at a price below Fortis’ net book investment could result in an (at least partial) writedown. We maintain our Sector Performer rating.

Key Risks To Price Target

- **Market Risks:** Under regulator-approved mechanisms, Fortis flows through the commodity cost of natural gas, fuel or purchased power to its customers. The company's non-regulated hydro generation assets are sensitive to localized rainfall levels, but are geographically dispersed and individually not meaningful to overall results. The Waneta Expansion will be more material, but hydrology risk is managed as part of the overall regional river system by BC Hydro, effectively reducing the risk to the project. Foreign exchange risk is relatively low: a 5% change in the Canadian/U.S. dollar exchange rate would impact earnings by \$0.01/share.
- **Regulatory Issues:** Given that the majority of Fortis' business is regulated (over 90% as measured by revenues and assets), the company's results are highly sensitive to regulatory decisions – both positive (such as increasing allowed ROEs in Canada over the past few years) and negative (such as adverse rulings/actions in Belize).
- **Construction Risk:** Fortis primarily faces construction risk for its non-regulated generation assets where the company assumes the risk of cost overruns. Clearly, the Waneta Expansion project is the largest construction project that the company is undertaking (with the company funding 51% of the total \$900 million cost). Fortis and its partners have signed a fixed-price design-build contract with SNC-Lavalin (SNC-SO) in order to mitigate construction risk, but ultimate construction and financing risks lie with the Waneta Expansion consortium (i.e., Fortis and partners).

Pipelines, Utilities, & Power

Fortis Inc.

Not A Good Week: Belize Operations Expropriated, Rival Bid Emerges For CVPS

- On Monday, the government of Belize passed legislation to nationalize Fortis' 70%-owned regulated utility, Belize Electricity Limited (BEL), which is under financial duress due to adverse regulatory rulings, which provide insufficient returns and force BEL to absorb high energy costs.
- Compensation for BEL is unknown and any agreement is likely to take some time. Fortis' net book investment in BEL is ~US\$125 million (~\$0.70/share). Currently, Fortis' unregulated hydro facilities in Belize (BECOL) have not been expropriated.
- On Thursday, Gaz Metro announced a rival bid for CVPS, a Vermont utility that Fortis announced it was acquiring on May 30. Gaz Metro's bid (US\$35.25/share) is at only a US\$0.15/share premium to Fortis' bid (US\$35.10/share); CVPS must determine if this represents a superior bid.
- Given a \$17.5 million break fee + \$2 million in expense reimbursement (totaling ~US\$1.50/CVPS share), it is unclear whether Gaz Metro's bid is "superior." If it is deemed so, Fortis could match the bid, but we foresee little appetite for further increases given its existing bid is already pricey.

Company Profile

Fortis owns a natural gas utility in British Columbia, electric distribution utilities in five Canadian provinces, Central America and the Caribbean, and non-regulated power generation and real estate assets.

Investment Thesis

Fortis provides the benefits (stability) of a regulated utility, and is in a period of solid organic investment and growth as the company delivers on its 5 year, \$5.5 billion capital program which is expected to grow the regulated rate base by a CAGR of 6% through 2015. The company is also a 51% owner of the non-regulated \$900 million Waneta Expansion project.

Assets - Excl Corporate / Eliminations (As At Mar 31, 2011)

Segmented Earnings (Exc. Corporate)

Major Sources, Uses Of Cash

Source: Company reports and CIBC World Markets Inc.

Fortis (FTS-SP) has had a rough week.

Belize Operations Expropriated, As Expected

On Monday, the Belize government announced it is expropriating Fortis' 70%-owned regulated utility, Belize Electricity Ltd. (BEL). This is not unexpected given recent government pronouncements. BEL has been under financial duress given adverse regulatory rulings that have not allowed BEL to collect appropriate returns, and, furthermore, have forced BEL to absorb high energy prices (rather than, as is typically the case, pass through energy costs to the consumers). As a result, BEL has amassed debt to major electricity suppliers, including Mexican utility CFE, which has now demanded upfront payment before making further electricity sales to BEL. Rather than rectifying the regulatory issues, the Belize government has chosen to expropriate BEL's operations.

Fortis' net book investment in BEL is ~US\$125 million, or roughly \$0.70/share. The government of Belize has not provided any compensation nor has it announced whether any (or how much) would be forthcoming. Fortis is evaluating its legal options. Fortis' unregulated hydro generation operation, BECOL, has not (yet) been similarly affected, although is at risk given amounts owed by BEL (approximately \$5 million) and its ownership by Fortis. We would not expect a speedy outcome; the Belize government expropriated telephone company Belize Telemedia in 2009 and legal proceedings are still ongoing, with no compensation paid to date.

Rival Bid For CVPS

On Thursday, Gaz Metro announced it was making an unsolicited bid for Central Vermont Public Service (CVPS) (CV-NYSE), the Vermont utility that Fortis announced an agreement to acquire on May 30. Gaz Metro's bid is at US\$35.25 per CVPS share, a slim US\$0.15/share premium to Fortis' own bid of US\$35.10/share. Gaz Metro also notes that it intends to continue making CVPS quarterly dividend payments of US\$0.23/share through closing vs. Fortis' intent to make only two regular quarterly dividend payments (and only \$0.01/share/quarter thereafter, until closing); with Gaz Metro expecting closing to take up to 12 months, this could imply further upside for CVPS shareholders.

Gaz Metro currently owns Green Mountain Power, the second-largest electric utility in Vermont (after CVPS), and believes there are synergies from owning both operations. The Gaz Metro bid also includes provisions for: CVPS employees (no layoffs), customers (cost savings from joint synergies with Green Mountain Power and the creation of a trust to subsidize low income customers), and the state of Vermont (investments in new headquarters and a solar development). The trust for low income customers will be created through the donation of a 30% economic interest in VELCO, the manager and part owner of the Vermont transmission system.

CVPS' board of directors must now determine that Gaz Metro's bid represents a "superior proposal" to the shareholders. Whether it meets this criterion is unclear given that CVPS, if it accepted Gaz Metro's bid, would be required to pay to Fortis a break fee of US\$17.5 million plus up to US\$2 million reimbursement of related fees and expenses. The US\$0.15/share premium amounts to only US\$2 million, and even factoring in additional dividend payments received under the Gaz Metro bid (if the closing takes up to a year), the total premium amounts to less than half the break fee.

If CVPS does decide that Gaz Metro's bid is superior, then Fortis must choose whether to match the relevant terms (e.g., US\$35.25/share + full dividend payments through closing) or to walk away. The small incremental costs might suggest that Fortis should be prepared to match the (initial) Gaz Metro bid, but we would not expect Fortis to get into a prolonged bidding war, as we believe its existing bid already represented full value (around 1.4x rate base). Any meaningful increase in the purchase price would bring the economics of the transaction into question.

Gaz Metro might be able to justify a higher price given the potential synergies to be realized from its existing ownership of Green Mountain Power, the second-largest Vermont electric utility (after CVPS). However, it is unclear whether any such synergies are truly sustainable, as any savings are typically required to be passed on to customers over time.

Downward Bias To Price Target, But No Change For Now

We believe that these two issues – expropriation of BEL and rival bid for CVPS – represent a downward bias on Fortis' value. The loss of BEL (with no compensation) would represent ~\$0.70/share impact; the potential loss of CVPS to Gaz Metro would represent about a further \$0.50/share. Furthermore, if Fortis were not to acquire CVPS, we note that the recent \$300 million (net \$288 million) equity offering would be dilutive until an alternate (and accretive) use of funds were found. We believe Fortis management is sufficiently disciplined to avoid acting precipitously, but nonetheless we note that there will be additional pressure for Fortis to find and close a suitable acquisition.

Despite the downward bias in valuation, we are not updating our price target (\$35) for now given the uncertainty surrounding these issues. We maintain our Sector Performer rating.

Price Target Calculation

Our \$35.00 price target equates to a P/E multiple of 18.5x our 2012 estimate, a premium to the group average given Fortis' solid, and for the most part low-risk, growth outlook. We note, however, that failure to close the CVPS acquisition represents a potential downside of ~\$0.50/share and a total write-off of BEL would represent ~\$0.70/share. We have not yet included either of these impacts to the stock price, given current uncertainties as to outcome.

Key Risks To Price Target

- **Regulatory Issues:** Given that the majority of Fortis' business is regulated (over 90% as measured by revenues and assets), the company's results are highly sensitive to regulatory decisions – both positive (such as increasing allowed ROEs in Canada over the past few years) and negative (such as adverse rulings/actions in Belize).
- **Acquisition Risks:** Fortis has an announced intention to acquire distribution utilities. Acquisition risks include: deal risk (failure to close a transaction), operation and regulatory risks of the acquired organization.

- **Market Risks:** Under regulator-approved mechanisms, Fortis flows through the commodity cost of natural gas, fuel or purchased power to its customers. The company's non-regulated hydro generation assets are sensitive to localized rainfall levels, but are geographically dispersed and individually not meaningful to overall results. The Waneta Expansion will be more material, but hydrology risk is managed as part of the overall regional river system by BC Hydro, effectively reducing the risk to the project. Foreign exchange risk is relatively low: a 5% change in the Canadian/U.S. dollar exchange rate would impact earnings by \$0.01/share.
- **Construction Risk:** Fortis primarily faces construction risk for its non-regulated generation assets where the company assumes the risk of cost overruns. Clearly, the Waneta Expansion project is the largest construction project that the company is undertaking (with the company funding 51% of the total \$900 million cost). Fortis and its partners have signed a fixed-price design-build contract with SNC-Lavalin (SNC-SO) in order to mitigate construction risk, but ultimate construction and financing risks lie with the Waneta Expansion consortium (i.e., Fortis and partners).

Pipelines, Utilities, & Power

Fortis Inc.

Q2 Slightly Below Expectations On Lower Gas, Generation Earnings

- Fortis reported Q2/11 EPS of \$0.33 vs. our estimate of \$0.35 (consensus \$0.35). The variance was largely due to lower earnings from FortisBC Energy (higher regulator-approved expenses), Fortis Generation (lower production in Belize), and Fortis Properties (decrease in occupancy).
- Earnings were still up Y/Y (\$0.33 vs. \$0.32 in Q2/10), largely reflecting a higher rate base (especially at company's regulated utilities in Western Canada). Fortis is on track for its \$1.2 bln. capex program in 2011, and has raised its 5-year (2011-2015) capex budget to \$5.7 bln. (up \$0.2 bln.).
- In Q2/11, Fortis suffered setbacks: 70% owned Belize Electricity was expropriated on June 20; BECOL (its Belize hydro generation facility) is owed US\$6.5 mln.; and Fortis walked away from its acquisition of CVPS after a superior bid from Gaz Metro.
- Fortis' capex program is expected to grow rate base at 6% CAGR. Fortis continues to seek a U.S. acquisition, and has a strong financial position. However, given Q2 setbacks, a slightly soft Q2, and high acquisition multiples, we maintain our SP rating. PT revised to \$33.50 (prior \$34).

Company Profile

Fortis owns a natural gas utility in British Columbia, electric distribution utilities in five Canadian provinces, the Caribbean, and non-regulated power generation and real estate assets.

Investment Thesis

Fortis provides the benefits (stability) of a regulated utility, and is in a period of solid organic investment and growth as the company delivers on its 5 year, \$5.5 billion capital program which is expected to grow the regulated rate base by a CAGR of 6% through 2015. The company is also a 51% owner of the non-regulated \$900 million Waneta Expansion project.

Assets - Excl Corporate / Eliminations (As At Mar 31, 2011)

Segmented Earnings (Exc. Corporate)

Major Sources, Uses Of Cash

Source: Company reports and CIBC World Markets Inc.

Q2/11 – Slightly Below Consensus

Fortis (FTS-SP) reported Q2/11 results, with EPS of \$0.33, slightly below our estimate of \$0.35 (consensus \$0.35). The main variances to expectations were lower earnings from:

- (1) FortisBC Energy (formerly Terasen Gas), due to timing of regulator approved increases in operating expenses.
- (2) Non-regulated Fortis Generation, given decreased production in Belize due to lower rainfall.
- (3) Non-regulated Fortis Properties, given a 2.2% decrease in hotel occupancy and a 1.4% decrease in occupancy in commercial/retail real estate.

Capital Spending On Track

Earnings were still up Y/Y (\$0.33 versus \$0.32 in Q2/10), largely driven by rate base growth, especially in the Western Canadian regulated utilities. The company is on track for its \$1.2 billion capital program in 2011, with \$519 million spent through H1/11. The company also slightly raised its 5-year (2011-2015) capital plan to \$5.7 billion from \$5.5 billion, reflecting higher planned spending at FortisBC Energy.

The company has substantially completed work on many major projects, including its \$214 million LNG storage facility on Vancouver Island and \$126 million Automated Metering Project in Alberta, and expects to reach substantial completion later in the year on the \$105 million Okanagan Transmission Reinforcement Project. The Waneta Dam Expansion project is on budget/schedule.

Q2/11 Setbacks

As has been previously noted, Fortis suffered setbacks in Q2/11:

- (1) On June 20, the government of Belize expropriated Fortis' 70% interest in Belize Electricity (BEL). Fortis is starting to pursue legal avenues to seek compensation, although this will likely be a lengthy process. The book value of BEL was \$112 million; the company does not anticipate writing this value down until there is further clarity on the situation. The company's BECOL hydro generation facility remains, for now, unaffected (and management does not believe the government has any current intent to expropriate the facility), although it is currently owed US\$6.5 million from BEL (after receiving a US\$0.5 million payment in July). BECOL's book value is \$150 million.
- (2) On May 30, Fortis announced an agreement to acquire CVPS (CV-NYSE) at a total value of US\$700 million, including acquired debt. On June 23, CVPS received an unsolicited offer from Gaz Metro, which was subsequently deemed a superior offer to Fortis. Subsequently, on July 12, Fortis terminated the acquisition agreement, collecting a US\$17.5 million termination fee plus US\$2 million in expenses.

Maintain Sector Performer

Fortis continues to progress its capital spending program, which is expected to result in 6% rate base CAGR. Furthermore, the company has a strong financial position, with (at quarter end) \$1.5 billion of unused credit facilities and \$298 million in cash due to a \$300 million equity offering in June. The company continues to seek U.S. acquisition targets.

Nevertheless, given the above-noted setbacks in the quarter and the slightly lower-than-expected Q2/11 results, we believe short-term upside is more limited and continue to rate Fortis as Sector Performer, with a \$33.50 price target (down slightly from prior \$34 to reflect Q2/11 results and updated outlook).

Q2/11 Results

Fortis reported adjusted Q2/11 EPS of \$0.33, up from \$0.32 in Q2/10, and modestly below our \$0.35 expectation (consensus \$0.35). The main variance from our estimates was lower-than-expected earnings from FortisBC Energy, and a lower-than-expected contribution from its non-regulated businesses (Fortis Generation and Fortis Properties).

Source: CIBC World Markets Inc.

Regulated Utilities:

- **FortisBC Energy:** FortisBC Energy earnings totaled \$15 million in Q2/11, compared to \$17 million in Q2/10 and our estimate of \$19 million. The variance from our estimate is the result of the timing of an increase in regulator-approved operating expenses, driven by labor and benefit costs and consulting expenses. Q2 and Q3 are FortisBC Energy's seasonally weakest quarters, with most of its earnings coming in Q1 and Q4.
- **FortisAlberta:** FortisAlberta contributed \$19 million to earnings in Q2/11, versus \$17 million in Q2/10, and our \$18 million estimate. The Y/Y increase is mainly due to \$2.5 million of accrued revenue recognized in Q2/11 associated with the cumulative return and amortization on the additional capex included in rate base associated with the Automated Metering Project.
- **FortisBC Electric:** FortisBC Electric earnings totaled \$9 million in Q2/11, compared to \$8 million in Q2/10, and our \$9 million estimate. The Y/Y increase reflects rate base growth, as well as lower-than-expected average market-priced purchased power costs.
- **Newfoundland Power:** Newfoundland Power earnings were \$11 million in the quarter, compared to \$11 million in Q2/10 and our \$10 million estimate. Y/Y results were flat as electricity sales growth and lower effective corporate income taxes were offset by lower customer rates due to a lower allowed ROE in 2011.
- **Other Canadian Electric Utilities:** Other Canadian Electric Utilities contributed earnings of \$6 million in the quarter, up from \$4 million in Q2/10 and above our \$4 million estimate. The variance from our estimate was due to lower effective corporate income taxes.
- **Caribbean Utilities:** Caribbean Utilities earnings contribution totaled \$7 million, versus \$7 million in Q2/10 and our \$7 million estimate. The reduction of costs and improving efficiencies and a positive commercial customer billing adjustment at Caribbean Utilities were offset by lower electricity sales on Grand Cayman and removal of Belize Electricity from consolidated results effective June 20, 2011, the day the Government of Belize expropriated Fortis' 70% interest in Belize Electricity.

Non-Regulated Businesses:

- **Fortis Generation:** Fortis Generation earnings totaled \$2 million, down from \$3 million in Q2/10 and below our \$6 million estimate. Lower-than-expected results reflected lower production in Belize due to lower rainfall and higher finance charges.
- **Fortis Properties:** Fortis Properties earnings came in at \$7 million in Q2/11, compared to \$8 million in Q2/10 and our \$9 million estimate. The variance from our estimate reflects higher operating costs due to inflationary pressures, and the lower performance of hotel operations due to decreased occupancies in western Canada.

Revising Estimates

We have made minor changes to our estimates to reflect slightly lower expected earnings in Fortis' non-regulated operations (Fortis Generation and Fortis Properties). We have also updated our forecasts for the regulated businesses, mainly to reflect recently filed rate applications. As a result of these changes, our 2011 EPS estimate declines from \$1.74 to \$1.72, while our 2012 EPS estimate declines from \$1.83 to \$1.81.

Price Target Calculation

We are reducing our price target from \$34.00 to \$33.50 as a result of our reduced estimates. Our \$33.50 price target equates to a P/E multiple of 18.5x our 2012 estimate, a premium to the group average given Fortis' solid, and for the most part low-risk, growth outlook.

Key Risks To Price Target

- **Regulatory Issues:** Given that the majority of Fortis' business is regulated (over 90% as measured by revenues and assets), the company's results are highly sensitive to regulatory decisions – both positive (such as increasing allowed ROEs in Canada over the past few years) and negative (such as adverse rulings/actions in Belize).
- **Acquisition Risks:** Fortis has an announced intention to acquire distribution utilities. Acquisition risks include: deal risk (failure to close a transaction), and operation and regulatory risks of the acquired organization.

- **Market Risks:** Under regulator-approved mechanisms, Fortis flows through the commodity cost of natural gas, fuel or purchased power to its customers. The company's non-regulated hydro generation assets are sensitive to localized rainfall levels, but are geographically dispersed and individually not meaningful to overall results. The Waneta Expansion will be more material, but hydrology risk is managed as part of the overall regional river system by BC Hydro, effectively reducing the risk to the project. Foreign exchange risk is relatively low: a 5% change in the Canadian/U.S. dollar exchange rate would impact earnings by \$0.01/share.
- **Construction Risk:** Fortis primarily faces construction risk for its non-regulated generation assets where the company assumes the risk of cost overruns. Clearly, the Waneta Expansion project is the largest construction project that the company is undertaking (with the company funding 51% of the total \$900 million cost). Fortis and its partners have signed a fixed-price design-build contract with SNC-Lavalin (SNC-SO) in order to mitigate construction risk, but ultimate construction and financing risks lie with the Waneta Expansion consortium (i.e., Fortis and partners).

Pipelines, Utilities, & Power

Fortis Inc.

In-line Q3, No Change To Outlook

- Fortis reported Q3/11 adjusted EPS of \$0.25 vs. our \$0.24 estimate (consensus \$0.23). Our adjusted EPS figure excludes the \$11 million after-tax fee (\$0.06/share) paid to Fortis in July 2011 from the termination of the merger agreement between Fortis and Central Vermont Public Service.
- Regulated utility results were in line with expectations, while slightly lower non-regulated results were offset by lower corporate costs. Results declined y/y from \$0.26 in EPS in Q3/10 due to the issuance of 10.3 million shares in June 2011 associated with the unsuccessful attempt to acquire CVPS.
- On November 2, FortisBC filed an application to amalgamate its three natural gas utilities into one legal entity, and implement common rates and services for these customers across the province, starting January 1, 2013. This proposal is revenue neutral to FortisBC.
- There has been no change to Fortis' outlook. The company is still in the early stages of its 5-year, \$5.7 billion capital expenditure program, and continues to evaluate acquisition opportunities. Fortis offers strong, stable growth, and its multiple reflects that. We maintain SP rating and \$33.50 PT.

Company Profile

Fortis owns a natural gas utility in British Columbia, electric distribution utilities in five Canadian provinces, the Caribbean, and non-regulated power generation and real estate assets.

Investment Thesis

Fortis provides the benefits (stability) of a regulated utility, and is in a period of solid organic investment and growth as the company delivers on its 5 year, \$5.5 billion capital program which is expected to grow the regulated rate base by a CAGR of 6% through 2015. The company is also a 51% owner of the non-regulated \$900 million Waneta Expansion project.

Assets - Excl Corporate / Eliminations (As At Mar 31, 2011)

Segmented Earnings (Exc. Corporate)

Major Sources, Uses Of Cash

Source: Company reports and CIBC World Markets Inc..

In-line Q3

Fortis (FTS-SP) reported adjusted Q3/11 EPS of \$0.25 versus consensus of \$0.23, and our \$0.24 estimate. Total reported EPS of \$0.31 included a US\$19.5 million payment (\$11 million after tax, or \$0.06 EPS) related to the break fee and costs payable to Fortis on termination of the acquisition of Central Vermont Public Service (CVPS) due to a superior offer from Gaz Metro.

Regulated utility results were generally in line with expectations across all segments. Results from non-regulated operations were slightly lower-than-expected due to decreased generation resulting from lower rainfall in Belize (Fortis Generation) and higher administrative expenses (Fortis Properties). This was offset by lower corporate costs due to FX gains. Results declined y/y (\$0.26 in Q3/10) as a result of the issuance of 10.3 million shares in June 2011 associated with the unsuccessful attempt to acquire CVPS. Q3 is Fortis' seasonally weakest quarter, with the majority of earnings growth taking place in Q1 and Q4.

Proposal To Merge FortisBC Gas Utilities

FortisBC has filed an application with the British Columbia Utilities Commission (BCUC) to amalgamate its three natural gas utilities into one legal entity, and implement common rates and services for these customers across the province, starting January 1, 2013. This application is revenue neutral to FortisBC, and is expected to provide lower rates to some customers (specifically Vancouver Island, Sunshine Coast, and Whistler customers), along with greater rate stability, consistency in programs and services, and greater reporting and operating efficiencies.

Currently, FortisBC provides natural gas to customers under three separate legal entities [FortisBC Energy Inc., FortisBC Energy (Vancouver Island) Inc., and FortisBC Energy (Whistler) Inc.] with entity-specific rate structures. These separate entities were formed as various natural gas utilities were acquired across the province. Each entity provides different service offerings by region, such as energy efficiency and conservation initiatives or renewable natural gas.

The company's electric operations will remain a separate utility with a separate legal name, Fortis BC Inc., with separate rates and service offerings for electricity customers.

Outlook Unchanged

Fortis' outlook remains unchanged. There have been no significant ROE changes at the various regulated utilities, although Fortis has generally applied for customer rate increases reflecting recent and ongoing investments to grow rate base. The company is still in the early stages of a five-year, \$5.7 billion capital expenditure program (through 2015), expecting to spend \$1.2 billion in 2011 and a comparable amount in 2012. The failed CVPS acquisition leaves Fortis with a strong balance sheet to fund future transactions, with the company continuing to evaluate prospects for acquiring electric and gas utilities in the U.S. and Canada. We are maintaining our Sector Performer rating and \$33.50 price target.

Q3/11 Results

Fortis reported adjusted Q3/11 EPS of \$0.25, versus \$0.26 in Q3/10, and in line with our \$0.24 expectation (consensus \$0.23). Our \$0.25 adjusted EPS figure excludes the \$11 million after-tax fee (\$0.06/share) paid to Fortis in July 2011 from the termination of the merger agreement between Fortis and Central Vermont Public Service (CVPS).

Source: CIBC World Markets Inc.

Regulated Utilities:

- **FortisBC Energy:** FortisBC Energy losses totaled \$3 million in Q3/11, compared to \$5 million in losses in Q3/10 and our estimate of \$4 million in losses. Q3 is FortisBC Energy's seasonally weakest quarter, with most of its earnings coming in Q1 and Q4. The y/y improvement reflects rate base growth and the timing of operating expenses.
- **FortisAlberta:** FortisAlberta contributed \$19 million to earnings in Q3/11, versus \$19 million in Q3/10, and our \$19 million estimate. Y/Y results were flat reflecting rate base growth in 2011 offset by the recording of the cumulative impact of a positive revenue requirement regulatory decision in Q3/10.

- **FortisBC Electric:** FortisBC Electric earnings totaled \$10 million in Q3/11, compared to \$11 million in Q3/10, and our \$11 million estimate. The modest y/y decline reflects higher effective corporate income taxes and lower capitalized allowance for funds used during construction (AFUDC) due to fewer assets under construction in 2011, partially offset by rate base growth.
- **Newfoundland Power:** Newfoundland Power earnings were \$8 million in the quarter, compared to \$8 million in Q3/10 and our \$8 million estimate. Y/Y results were flat as electricity sales growth and lower effective corporate income taxes were offset by lower customer rates due to a lower allowed ROE in 2011.
- **Other Canadian Electric Utilities:** Other Canadian Electric Utilities contributed earnings of \$6 million in the quarter, up from \$5 million in Q3/10 and above our \$5 million estimate. The modest outperformance reflects a higher allowed ROE at Algoma Power and lower effective corporate income taxes at FortisOntario.
- **Caribbean Utilities:** Caribbean Utilities earnings contribution totaled \$6 million, versus \$8 million in Q3/10 and our \$7 million estimate. The y/y decline reflects the removal of Belize Electricity from consolidated results (expropriated by the Government of Belize in June 2011) which contributed \$2 million to earnings in Q3/10. An independent valuation is underway in preparation for Fortis to seek compensation from the Government of Belize, and Fortis expects to submit its claim to the government in Q4/11. We do not expect a quick resolution to this situation.

Non-Regulated Businesses:

- **Fortis Generation:** Fortis Generation earnings totaled \$8 million, from \$9 million in Q3/10 and below our \$9 million estimate. Results were moderately lower-than-expected due to decreased production in Belize resulting from lower rainfall associated with a longer dry season in 2011.
- **Fortis Properties:** Fortis Properties earnings came in at \$9 million in Q3/11, compared to \$9 million in Q3/10 and our \$10 million estimate. Results were slightly below expectations as a result of higher administrative expenses.
- **Corporate:** Corporate expenses totaled \$16 million in the quarter, down from \$19 million in Q3/10 and below our \$20 million estimate, reflecting foreign exchange gains in Q3/11.

EPS Estimates Unchanged

We have made minor modifications to our estimates (modestly lower non-regulated earnings offset by lower corporate expenses) mainly to reflect year-to-date results. Our 2011 and 2012 EPS estimates remain unchanged at \$1.72 and \$1.81, respectively.

Price Target Calculation

Our price target is based on a discounted cash flow analysis, which captures the expected cash flow growth from Fortis' five-year, \$5.7 billion capital spending program. The price target of \$33.50 equates to a P/E multiple of 18.5x our 2012 estimate, a premium to the group average given, in our view, Fortis' solid, low-risk, growth outlook.

Key Risks To Price Target

- **Regulatory Issues:** Given that the majority of Fortis' business is regulated (over 90% as measured by revenues and assets), the company's results are highly sensitive to regulatory decisions – both positive (such as increasing allowed ROEs in Canada over the past few years) and negative (such as adverse rulings/actions in Belize).
- **Acquisition Risks:** Fortis has an announced intention to acquire distribution utilities. Acquisition risks include: deal risk (failure to close a transaction), operation and regulatory risks of the acquired organization.

- **Market Risks:** Under regulator-approved mechanisms, Fortis flows through the commodity cost of natural gas, fuel or purchased power to its customers. The company's non-regulated hydro generation assets are sensitive to localized rainfall levels, but are geographically dispersed and individually not meaningful to overall results. The Waneta Expansion will be more material, but hydrology risk is managed as part of the overall regional river system by BC Hydro, effectively reducing the risk to the project. Foreign exchange risk is relatively low: a 5% change in the Canadian/U.S. dollar exchange rate would impact earnings by \$0.01/share.
- **Construction Risk:** Fortis primarily faces construction risk for its non-regulated generation assets where the company assumes the risk of cost overruns. Clearly, the Waneta Expansion project is the largest construction project that the company is undertaking (with the company funding 51% of the total \$900 million cost). Fortis and its partners have signed a fixed-price design-build contract with SNC-Lavalin (SNC-SO) in order to mitigate construction risk, but ultimate construction and financing risks lie with the Waneta Expansion consortium (i.e., Fortis and partners).

Our EPS estimates are shown below:

	1 Qtr.	2 Qtr.	3 Qtr.	4 Qtr.	Yearly
2010 Current	\$0.58A	\$0.32A	\$0.26A	\$0.49A	\$1.65A

IMPORTANT DISCLOSURES:

Analyst Certification: Each CIBC World Markets research analyst named on the front page of this research report, or at the beginning of any subsection hereof, hereby certifies that (i) the recommendations and opinions expressed herein accurately reflect such research analyst's personal views about the company and securities that are the subject of this report and all other companies and securities mentioned in this report that are covered by such research analyst and (ii) no part of the research analyst's compensation was, is, or will be, directly or indirectly, related to the specific recommendations or views expressed by such research analyst in this report.

Potential Conflicts of Interest: Equity research analysts employed by CIBC World Markets are compensated from revenues generated by various CIBC World Markets businesses, including the CIBC World Markets Investment Banking Department. Research analysts do not receive compensation based upon revenues from specific investment banking transactions. CIBC World Markets generally prohibits any research analyst and any member of his or her household from executing trades in the securities of a company that such research analyst covers. Additionally, CIBC World Markets generally prohibits any research analyst from serving as an officer, director or advisory board member of a company that such analyst covers.

In addition to 1% ownership positions in covered companies that are required to be specifically disclosed in this report, CIBC World Markets may have a long position of less than 1% or a short position or deal as principal in the securities discussed herein, related securities or in options, futures or other derivative instruments based thereon.

Recipients of this report are advised that any or all of the foregoing arrangements, as well as more specific disclosures set forth below, may at times give rise to potential conflicts of interest.

Important Disclosure Footnotes for Fortis Inc. (FTS)

- 2a Fortis Inc. is a client for which a CIBC World Markets company has performed investment banking services in the past 12 months.
- 2c CIBC World Markets Inc. has managed or co-managed a public offering of securities for Fortis Inc. in the past 12 months.
- 2e CIBC World Markets Inc. has received compensation for investment banking services from Fortis Inc. in the past 12 months.
- 2g CIBC World Markets Inc. expects to receive or intends to seek compensation for investment banking services from Fortis Inc. in the next 3 months.
- 7 CIBC World Markets Corp., CIBC World Markets Inc., and their affiliates, in the aggregate, beneficially own 1% or more of a class of equity securities issued by Fortis Inc.

Pipelines, Utilities, & Power

Fortis Inc.

Q4 In Line. 2012: Strong Capex, Potential Pressure On Rates Of Return

- Fortis reported Q4/11 EPS of \$0.46 versus our estimate of \$0.47 (consensus \$0.47). EPS was down Y/Y versus \$0.49, reflecting the issuance of 10.3 mln. shares and the conversion of 1.4 mln. convertible debentures in 2011. Fortis will increase its dividend to \$0.30/share/quarter in Q1/12.
- Key items of note for Q4: increased earnings for FortisBC Energy due to rate base growth; a decrease in allowed ROE for FortisAlberta; lower Caribbean Utility earnings (expropriation of BEL and higher costs in Turks & Caicos); and lower corporate costs (debt refinancing and repayment).
- The company had capital expenditures of \$1.2 billion in 2011, with planned spending of \$1.3 billion in 2012 (\$5.5 billion through 2016), expected to deliver 7% rate base growth in 2012, and 5% CAGR through 2016.
- Fortis provides a stable distribution utility platform with organic growth driven by a significant capex program, but faces pressures on allowed ROE (recently reduced in Alberta, under review in B.C.). We believe the stock is fairly valued, trading at 18.1x 2013 P/E. Maintain SP rating, \$35 PT.

Company Profile

Fortis owns a natural gas utility in British Columbia, electric distribution utilities in five Canadian provinces, the Caribbean, and non-regulated power generation and real estate assets.

Investment Thesis

Fortis provides the benefits (stability) of a regulated utility, and is in a period of solid organic investment and growth as the company delivers on its 5 year, \$5.5 billion capital program which is expected to grow the regulated rate base by a CAGR of 6% through 2015. The company is also a 51% owner of the non-regulated \$900 million Waneta Expansion project.

Major Sources, Uses Of Cash

Source: Company reports and CIBC World Markets Inc..

In-line Q4

Fortis (FTS-SP) reported Q4/11 EPS of \$0.46, roughly in line with our \$0.47 estimate (consensus \$0.47). Net income of \$86 million was up modestly (1%) compared to \$85 million in Q4/10; however, EPS declined Y/Y versus \$0.49, reflecting the dilution from issuance of 10.3 million shares (gross proceeds of \$341 million) in June and July 2011, and the conversion of 1.4 million convertible debentures into common shares in November 2011.

Q4/11 results generally reflected growth in Fortis' western Canadian operations driven by strong customer and rate base growth in the region. FortisAlberta earnings in Q4 were flat Y/Y as the company recorded a \$2 million rate revenue reduction as a result of the Q4/11 ruling (retroactive for the full-year 2011) of a reduction in allowed ROE from 9.00% to 8.75%.

The company's Caribbean operations reported weaker results both for the quarter (earnings of \$3 million versus \$4 million Y/Y) and the year (\$20 million versus \$23 million) given the mid-year 2011 expropriation of Belize Electricity by the government, and due to higher costs at Fortis Turks and Caicos. The non-regulated Fortis Properties' earnings were down Y/Y due to a benefit in 2010 on the future income tax liability from the reduction in corporate taxes. Corporate and other costs were lower than expected, reflecting lower finance charges due to refinancing maturing debt at lower rates, and the repayment of credit facility borrowings during Q3/11.

2012: Strong Rate Base Growth, Some Risk To Rates Of Return

Fortis invested \$1.2 billion in capital spending in 2011, with plans for investing \$1.3 billion in 2012. The largest capital projects planned for 2012 include: the ongoing construction of the \$900 million Waneta Expansion Project (\$254 million in 2012); a 12-storey office building in St. John's, Newfoundland (\$32 million); and ongoing replacement of utility poles in Alberta (\$27 million). The remainder of the investment is directed to a large number of sustaining capital or smaller growth capital projects. This capex is expected to drive total rate base by 7% in 2012, and an average of 5% CAGR through to 2016.

A potential offset to this is downward pressure on regulated rates of return. In December 2011, the Alberta Utilities Commission (AUC) reduced FortisAlberta's allowed ROE for 2011 from 9.00% to 8.75% (applied retroactively for the year). In B.C., Fortis' gas and electric utilities are both starting a regulator-initiated cost of capital review, with decisions expected by October 2012. The B.C. utilities are currently at higher allowed ROEs than Alberta – 9.90% for FortisBC Electric, 9.50% for FortisBC Energy – suggesting that there exists downside risk. We are reducing our ROE assumptions for both B.C. utilities by 50 bps for 2012 onward. We note that the B.C. utilities collectively account for forecast 2012 rate base of \$4.7 billion – over half of the company's total forecast rate base of \$8.7 billion – and thus have a meaningful impact on overall company results.

On a positive note, Newfoundland Power has received regulatory approval to suspend use of the automatic ROE adjustment formula which has resulted in ever lower allowed ROEs as interest rates decline (2011 ROE was 8.38%; 2012 was calculated at 7.85% under the formula). We view the 2011 allowed ROE of 8.38% as a floor, and even see the potential for modest upward movement in this rate.

Solid Business, But Fully Valued

Fortis is a well-managed utility, with solid mid-single-digit organic growth driven by a sizable capital spending program. Possible downward revisions in allowed ROE for the B.C. utilities represent a modest short-term headwind. The company continues to evaluate acquisition opportunities which could provide upside mid- to longer term. The company announced in December that it will increase its quarterly dividend to \$0.30/share (up from \$0.29/share), effective for Q1/2012.

Nevertheless, with the stock trading at 18.1x our estimated 2013 earnings, we believe that Fortis' outlook is already fairly reflected in its valuation, and we are maintaining our Sector Performer rating and \$35 price target.

Q4/11 Results

Fortis reported adjusted Q4/11 EPS of \$0.46, versus \$0.49 in Q4/10, and basically in line with our \$0.47 expectation (consensus \$0.47). The Y/Y decline reflects the impact of the issuance of 10.3 million shares in June and July 2011 and the conversion of 1.4 million convertible debentures to common shares in November 2011. The main differences versus our expectations were from modestly lower FortisBC Energy earnings (highly seasonal business which is difficult to accurately pinpoint on a quarterly basis), lower Caribbean Utilities earnings (higher operating costs and amortization than expected in Turks and Caicos), partially offset by lower corporate and other costs (lower finance charges).

In December, Fortis announced that it is increasing its dividend from \$1.16/share annually (\$0.29/share quarterly) to \$1.20/share annually (\$0.30/share quarterly) beginning with the Q1/12 dividend payable on March 1, 2012.

Source: CIBC World Markets Inc.

Regulated Utilities:

- **FortisBC Energy:** FortisBC Energy earnings totaled \$51 million in Q4/11, up from \$45 million in Q4/10, but slightly below our estimate of \$53 million. The Y/Y increase reflects rate base growth due to continued investment in energy infrastructure.
- **FortisAlberta:** FortisAlberta contributed \$17 million to earnings in Q4/11, versus \$17 million in Q4/10, and our \$17 million estimate. Rate base growth was offset by the cumulative impact of the AUC's December 2011 decision to set the allowed ROE at 8.75% (versus 9.00% assumed previously) realized in Q4/11.
- **FortisBC Electric:** FortisBC Electric earnings totaled \$11 million in Q4/11, compared to \$10 million in Q4/10, and our \$11 million estimate. Growth in the rate base was partially offset in the quarter by higher-than-expected operating expenses and lower electricity sales due to warmer-than-normal weather.
- **Newfoundland Power:** Newfoundland Power earnings were \$8 million in the quarter, compared to \$9 million in Q4/10 and our \$7 million estimate. The Y/Y decline reflects lower allowed ROE in 2011 and higher operating expenses in Q4/11, partially offset by a reduction in energy supply costs associated with its hydroelectric generating facilities.

- **Other Canadian Electric Utilities:** Other Canadian Electric Utilities contributed earnings of \$4 million in the quarter, versus \$5 million in Q4/10 and our \$3 million estimate. The Y/Y decline reflects lower electricity sales at FortisOntario, a negative rate of return adjustment at Maritime Electric and higher operating expenses.
- **Caribbean Utilities:** Caribbean Utilities earnings contribution totaled \$3 million, versus \$5 million in Q4/10 and our \$8 million estimate. Lower-than-expected earnings reflect higher amortization and operating expenses at Fortis Turks and Caicos.

Non-Regulated Businesses:

- **Fortis Generation:** Fortis Generation earnings totaled \$5 million, compared to \$5 million in Q4/10 and our \$5 million estimate. Increased production in Belize was offset by lower average energy sale prices in Upper New York State and higher business development costs in Ontario.
- **Fortis Properties:** Fortis Properties earnings came in at \$5 million in Q4/11, compared to \$7 million in Q4/10 and our \$6 million estimate. The Y/Y decline reflects higher corporate income taxes relative to Q4/10, as lower statutory tax rates reduced future income tax liability balances in Q4/10, which in turn, reduced corporate income taxes in Q4/10.
- **Corporate:** Corporate costs totaled \$18 million, unchanged from \$18 million in Q4/10, and below our \$22 million estimate, as a result of refinancing maturing debt at lower interest rates, and the repayment of credit facility borrowings during Q3/11.

Revising Estimates

We have made the following changes to our forecasts:

- **FortisBC Energy:** We are reducing our allowed ROE assumption for FortisBC Energy Inc. from 9.50% to 9.00% for 2012 and beyond as we anticipate that the cost of capital hearings in B.C. will result in lower allowed ROEs. We are maintaining the 50 bps spread between FortisBC Energy Inc. and the other FortisBC Energy utilities [FortisBC Energy (Vancouver Island) Inc., FortisBC Energy (Whistler) Inc., and FortisBC Energy (Fort Nelson) Inc.], implying a reduction in the allowed ROEs for these entities from 10.00% to 9.50%. As a result, our 2012 and 2013 FortisBC earnings estimates decline from \$155 million and \$164 million to \$148 million and \$156 million, respectively.
- **FortisBC Electric:** We are reducing our allowed ROE assumption for FortisBC Electric Inc. from 9.90% to 9.40% for 2012 and beyond, resulting in a decline in our FortisBC Electric earnings estimates for 2012 and 2013 from \$52 million and \$55 million to \$49 million and \$52 million, respectively.
- **Caribbean Utilities:** We are reducing our Caribbean Utilities forecasts from \$25 million to \$21 million for 2012 and 2013, reflecting more modest growth expectations from the segment.
- **Corporate:** We are reducing our 2012 and 2013 corporate costs estimates from \$79 million to \$68 million, reflecting lower financing charges due to the refinancing of debt at lower interest rates, and lower debt levels due to the repayment of credit facility borrowings during Q3/11.

Price Target Calculation

We are maintaining our \$35 price target, which is based on a discounted cash flow analysis, which captures the expected cash flow growth from Fortis' five-year, \$5.5 billion capital spending program. The price target of \$35 equates to a P/E multiple of 18.7x our 2013 estimate (versus 18.5x previously), a modest premium to the group average given, in our view, Fortis' solid, low-risk, growth outlook.

Key Risks To Price Target

- **Regulatory Issues:** Given that the majority of Fortis' business is regulated (over 90% as measured by revenues and assets), the company's results are highly sensitive to regulatory decisions – both positive (such as increasing allowed ROEs in Canada over the past few years) and negative (such as adverse rulings/actions in Belize).
- **Acquisition Risks:** Fortis has an announced intention to acquire distribution utilities. Acquisition risks include: deal risk (failure to close a transaction), operation and regulatory risks of the acquired organization.

- **Market Risks:** Under regulator-approved mechanisms, Fortis flows through the commodity cost of natural gas, fuel or purchased power to its customers. The company's non-regulated hydro generation assets are sensitive to localized rainfall levels, but are geographically dispersed and individually not meaningful to overall results. The Waneta Expansion will be more material, but hydrology risk is managed as part of the overall regional river system by BC Hydro, effectively reducing the risk to the project. Foreign exchange risk is relatively low: a 5% change in the Canadian/U.S. dollar exchange rate would impact earnings by \$0.01/share.
- **Construction Risk:** Fortis primarily faces construction risk for its non-regulated generation assets where the company assumes the risk of cost overruns. Clearly, the Waneta Expansion project is the largest construction project that the company is undertaking (with the company funding 51% of the total \$900 million cost). Fortis and its partners have signed a fixed-price design-build contract with SNC-Lavalin (SNC-SO) in order to mitigate construction risk, but ultimate construction and financing risks lie with the Waneta Expansion consortium (i.e., Fortis and partners).

Our EPS estimates are shown below:

	1 Qtr.	2 Qtr.	3 Qtr.	4 Qtr.	Yearly

Pipelines, Utilities, & Power

Fortis Inc.

Announces Agreement To Acquire CH Energy Group

- Fortis announced an agreement to acquire CH Energy Group for ~US\$1.5 billion. CH Energy is the parent of Central Hudson Gas & Electric Corp., a regulated transmission and distribution utility serving 300,000 electric and 75,000 gas customers in New York State's Mid-Hudson River Valley.
- Fortis is purchasing CH Energy for US\$65/share, a 10.5% premium over the prior day's close. The purchase price includes the assumption of US\$500 million in debt, and implies an EV/rate base of 1.5x. The valuation equates to 2011 EPS and EBITDA multiples of 20.6x/10.4x vs. FTS at 19.2x/10.7x.
- Fortis intends to finance the transaction through its lines of credit, and will look to issue permanent financing (equity) once the deal closes (expected in Q1/13). While this acquisition is fully priced, Fortis expects it to be immediately accretive, driven by 6%-7% rate base growth.
- We are assuming the acquisition will be completed at US\$65/share and that Fortis will issue \$400 million in common equity (in Q1/13). While Fortis paid full value for this acquisition, we view it as a positive given CH Energy's significant growth profile. Our PT goes from \$35 to \$35.50. Maintain SP.

Company Profile

Fortis owns a natural gas utility in British Columbia, electric distribution utilities in five Canadian provinces, the Caribbean, and non-regulated power generation and real estate assets.

Investment Thesis

Fortis provides the benefits (stability) of a regulated utility, and is in a period of solid organic investment and growth as the company delivers on its 5 year, \$5.5 billion capital program which is expected to grow the regulated rate base by a CAGR of 6% through 2015. The company is also a 51% owner of the non-regulated \$900 million Waneta Expansion project.

Major Sources, Uses Of Cash

Source: Company reports and CIBC World Markets Inc..

Announces Agreement To Acquire CH Energy Group

Fortis (FTS-SP) announced an agreement to acquire CH Energy Group (CHG-NYSE) for approximately US\$1.5 billion. CH Energy is the parent of Central Hudson Gas & Electric Corp. (Central Hudson), a regulated transmission and distribution utility serving approximately 300,000 electric and 75,000 gas customers in eight counties of New York State's Mid-Hudson River Valley (service region from suburbs of metropolitan New York City to Albany). CH Energy Group also owns Central Hudson Enterprises Corp. (CHEC), a non-regulated subsidiary comprised primarily of a fuel delivery business (Griffith Energy Services) serving approximately 56,000 customers in the Mid-Atlantic region. CHEC is a much smaller contributor to earnings relative to the utility, with Central Hudson accounting for approximately 97% of net income in 2011.

Exhibit 1. CH Energy Service Areas

Source: Company reports.

Transaction Details

Fortis is purchasing CH Energy for US\$65/share, a 10.5% premium to the closing price on February 17, the last business day before the transaction was announced. The total purchase price of US\$1.5 billion includes the assumption of approximately US\$500 million of debt, and implies a 1.5x EV/rate base multiple (estimated rate base of ~US\$1 billion at closing). The valuation equates to 20.6x 2011 EPS and 10.4x 2011 EV/EBITDA versus 19.2x and 10.7x for Fortis, respectively. The valuation appears 'fully priced', but Fortis expects the deal to

be immediately accretive (we estimate full-year accretion of \$0.03-\$0.05/share, representing ~2% accretion on 2011 EPS totaled \$1.69) once it closes (expected in Q1/13). The accretion mainly reflects strong expected growth over the coming years with Central Hudson expected to invest an average of over US\$100 million in capital expenditures annually through 2016.

Fortis intends to finance the transaction through its lines of credit, with \$1.9 billion of a total of \$2.2 billion currently available. Fortis will look to issue permanent financing (i.e. equity) once the deal is closed, expected within 12 months, pending approvals. CH Energy shareholder vote is expected in June 2012, with FERC and New York State Public Service Commission (PSC) decisions expected to follow in Q3/12 and Q1/13, respectively. As part of the PSC review, Fortis must show how this transaction is a net benefit to customers in the service territory. Fortis will look to maintain its capital structure at ~35% common equity, the remainder debt/preferred shares. Recall that Fortis issued ~\$341 million in equity in mid-2011 to finance the Central Vermont Public Service (CVPS) acquisition which ultimately fell through, so the equity requirement for this acquisition might be partially met through that financing.

CH Energy is up 21% over the past year, as the company has sold off its renewables assets in order to focus on its core transmission and distribution utilities business. Fortis has been looking to expand into the U.S., but has failed to date as it has been outbid. Other companies with utility companies in the region include Consolidated Edison (ED-NYSE), National Grid (NGG-NYSE), and Iberdrola (IBE-MC). While this transaction comes at a steep price, we do not completely rule out the potential for other bidders to join the fray given the other large companies that operate in the region, and Fortis' experience with CVPS. The break fee associated with this transaction is set at US\$19.7 million.

Acquisition Is A Modest Positive To Outlook

While Fortis paid full value for this acquisition, we view it as a positive to the extent that there is significant growth expected at Central Hudson over the next several years (rate base growth of 6%-7% annually), and the allowed ROE and equity thickness (10% ROE and 48% common equity) are strong relative to the rest of its Canadian portfolio of utilities (allowed ROEs of ~9% and equity thickness of ~40%). We are assuming that Fortis completes this acquisition (at US\$65/share) in Q1/13. We are increasing our price target from \$35 to \$35.50, and maintaining our Sector Performer rating.

Revising Estimates

We have built in the CH Energy acquisition, and assumed a closing date at the end of Q1/13. In conjunction with the acquisition, we assume that: a) Fortis issues \$500 million of debt at the corporate level, and b) Fortis issues \$400 million in common equity at the end of Q1/13. As a result of these changes, our 2013 EPS estimate increases from \$1.87 to \$1.89. For 2014, we assume a full-year's contribution from CH Energy, combined with additional rate base growth, resulting in a \$0.04 increase in EPS.

Source: CIBC World Markets Inc.

Price Target Calculation

We are raising our price target from \$35 to \$35.50. Our price target is based on a discounted cash flow analysis, which captures the expected cash flow growth from Fortis' five-year, \$5.5 billion capital spending program. Our price target equates to a P/E multiple of 18.8x our 2013 estimate, a modest premium to the group average given, in our view, Fortis' solid, low-risk, growth outlook.

Key Risks To Price Target

- **Regulatory Issues:** Given that the majority of Fortis' business is regulated (over 90% as measured by revenues and assets), the company's results are highly sensitive to regulatory decisions – both positive (such as increasing allowed ROEs in Canada over the past few years) and negative (such as adverse rulings/actions in Belize).
- **Acquisition Risks:** Fortis has an announced intention to acquire distribution utilities. Acquisition risks include: deal risk (failure to close a transaction), and operation and regulatory risks of the acquired organization.

- **Market Risks:** Under regulator-approved mechanisms, Fortis flows through the commodity cost of natural gas, fuel or purchased power to its customers. The company's non-regulated hydro generation assets are sensitive to localized rainfall levels, but are geographically dispersed and individually not meaningful to overall results. The Waneta Expansion will be more material, but hydrology risk is managed as part of the overall regional river system by BC Hydro, effectively reducing the risk to the project. Foreign exchange risk is relatively low: a 5% change in the Canadian/U.S. dollar exchange rate would impact earnings by \$0.01/share.
- **Construction Risk:** Fortis primarily faces construction risk for its non-regulated generation assets where the company assumes the risk of cost overruns. Clearly, the Waneta Expansion project is the largest construction project that the company is undertaking (with the company funding 51% of the total \$900 million cost). Fortis and its partners have signed a fixed-price design-build contract with SNC-Lavalin (SNC-SO) in order to mitigate construction risk, but ultimate construction and financing risks lie with the Waneta Expansion consortium (i.e., Fortis and partners).

CIBC World Markets Inc. Stock Rating System

Abbreviation	Rating	Description
Stock Ratings		
SO	Sector Outperformer	Stock is expected to outperform the sector during the next 12-18 months.
SP	Sector Performer	Stock is expected to perform in line with the sector during the next 12-18 months.
SU	Sector Underperformer	Stock is expected to underperform the sector during the next 12-18 months.
NR	Not Rated	CIBC World Markets does not maintain an investment recommendation on the stock.
R	Restricted	CIBC World Markets is restricted*** from rating the stock.
Sector Weightings**		
O	Overweight	Sector is expected to outperform the broader market averages.
M	Market Weight	Sector is expected to equal the performance of the broader market averages.
U	Underweight	Sector is expected to underperform the broader market averages.
NA	None	Sector rating is not applicable.

**Broader market averages refer to the S&P 500 in the U.S. and the S&P/TSX Composite in Canada.

"Speculative" indicates that an investment in this security involves a high amount of risk due to volatility and/or liquidity issues.

***Restricted due to a potential conflict of interest.

Pipelines, Utilities, & Power

Fortis Inc.

Q1 In Line, Ex-Acquisition Charges

- Fortis reported Q1/12 adjusted EPS of \$0.66 versus our estimate of \$0.66 (consensus \$0.67). Our adjusted EPS excludes ~\$4 million in one-time costs related to the pending CH Energy acquisition which impacted earnings by \$0.02/share.
- Operationally, the quarter benefited from ongoing strong rate base growth in its western Canadian utilities, offset by: warmer than normal weather, a lower allowed ROE for FortisAlberta, and the discontinuance of the PBR mechanism for FortisBC Electric.
- Looking forward, we see the benefits of ongoing rate base growth in the western Canadian utilities and (in 2013) the expected inclusion of the CH Energy acquisition. However, we also see modest downside risk to allowed ROEs in the B.C. utilities.
- We have updated our earnings outlook to reflect these factors, with modest changes to our ROE assumptions resulting in no change to our 2012 forecast and a minor (\$0.02) annual EPS impact thereafter. We maintain our SP rating and \$35.50 price target.

Q1 In Line, Ex-Acquisition Charges

Fortis (FTS-SP) reported adjusted Q1/12 EPS of \$0.66 versus our estimate of \$0.66 (consensus \$0.67). Our adjusted EPS excludes the impact of one-time expenses of ~\$4 million (a \$0.02 EPS impact) related to the pending acquisition of CH Energy Group, Inc. (CHG-NYSE). EPS was also down versus \$0.67 (CGAAP) last Q1, reflecting the dilutive impact from the issuance of 10.34 million shares in mid-2011.

Operationally, the quarter was roughly in line with expectations. While ongoing rate base and customer growth (especially at FortisAlberta) benefited results, there were a number of minor headwinds in the quarter, including: (1) the impact of a warmer-than-normal winter on energy consumption; (2) a lower allowed ROE at FortisAlberta, stemming from a late 2011 regulatory decision; (3) the discontinuance as of the end of 2011 of the performance-based rate-setting (PBR) mechanism at FortisBC Electric, which allowed for sharing of cost savings between the utility and its rate payers.

No Material Change To Outlook

We continue to view the key drivers to Fortis' outlook as follows:

- **Rate base/customer growth:** Fortis' western Canadian regulated utilities continue to experience strong rate base growth, driven by customer additions and ongoing capex (i.e., forecast 2012 capex of \$774 million for FortisBC Energy, FortisBC Electric and FortisAlberta – roughly 60% of total forecast 2012 capex of \$1.29 billion). This investment contributes to forecast mid-year rate base growth of: ~10% for FortisBC Energy, ~7% for FortisBC Electric, and ~15% for FortisAlberta.
- **Regulatory proceedings:** Partially offsetting this rate base growth, Fortis is seeing modest downward pressure on its allowed ROEs. FortisAlberta received a decision in late 2011 to lower its 2011 and 2012 allowed ROE from 9.00% to 8.75%; FortisBC Energy will face a Generic Cost of Capital proceeding in 2012 to determine an appropriate allowed ROE, and we see downside risk in 2013 to the current 9.50% (10.00% for Vancouver Island/Whistler/Fort Nelson) rates; FortisBC Electric is maintaining a 9.90% allowed ROE in 2012, but the PBR mechanism – which helped generate an overall achieved ROE of ~11.20% for 2011 – has been discontinued for 2012.
- **Acquisitions:** Fortis announced an agreement to acquire CH Energy Group on February 21. Numerous approvals are required, including shareholders, regulators and others. In April, applications were filed with the New York State Public Service Commission (NYPSC) and the U.S. Federal Energy Regulatory Commission (FERC), and the CH Energy shareholder vote is expected in June. If all required approvals are received, closing is expected by the end of Q1/2013.

Overall, we see no material change to our outlook, with adjustments to our ROE assumptions having no impact to our 2012 EPS forecast, and a modest (\$0.02) impact on 2013 and beyond (although we have not built in any potential positives, like the potential reinstatement of a PBR mechanism in B.C.). Accordingly, we maintain our Sector Performer rating and \$35.50 price target.

Q1/12 Results

Fortis reported adjusted Q1/12 EPS of \$0.66, versus \$0.67 (CGAAP) in Q1/11, and our \$0.66 expectation (consensus \$0.67). Results were in-line with expectations across most segments, with modestly lower-than-expected FortisBC Electric earnings offset by slightly stronger results in FortisBC Energy and Fortis Generation. The \$0.66 in adjusted EPS excludes \$4 million (\$0.02 in EPS) in one-time acquisition-related expenses associated with the CH Energy transaction. The Y/Y decline reflects the impact of the issuance of 10.34 million shares in June and July 2011.

Source: CIBC World Markets Inc.

Regulated Utilities:

- FortisBC Energy:** FortisBC Energy earnings totaled \$82 million in Q1/12, compared to \$76 million (CGAAP) in Q1/11 and our estimate of \$80 million. The strong performance reflects the seasonality of gas consumption and the timing of certain expenses (revenue recognized on consumption while certain expenses are incurred evenly throughout the year), rate base growth due to continued investment, and higher gas transportation volumes to the forestry and mining sector.

- **FortisAlberta:** FortisAlberta contributed \$21 million to earnings in Q1/12, versus \$21 million (CGAAP) in Q1/11, and our \$22 million estimate. Results were flat Y/Y reflecting rate base growth offset by a \$1 million gain on sale of property during Q1/11, lower-than-expected number of customers and lower energy consumption by residential customers in Q1/12, and a lower allowed ROE (8.75% in Q1/12 versus 9.00% in Q1/11).
- **FortisBC Electric:** FortisBC Electric earnings totaled \$16 million in Q1/12, compared to \$19 million (CGAAP) in Q1/11, and our \$20 million estimate. The underperformance reflects the discontinuance of the performance-based rate-setting (PBR) mechanism (the benefit of lower-than-expected costs were shared equally between FortisBC Electric and customers under PBR in Q1/11), and increased operating expenses in Q1/12.
- **Newfoundland Power:** Newfoundland Power earnings were \$7 million in the quarter, compared to \$7 million (CGAAP) in Q1/11 and our \$7 million estimate. Lower corporate income taxes in the quarter (due to a lower statutory rate), were offset by lower revenue associated with the joint-use poles with Bell Aliant (BA-SP) that were sold in October 2011.
- **Other Canadian Electric Utilities:** Other Canadian Electric Utilities contributed earnings of \$7 million in the quarter, versus \$6 million (CGAAP) in Q1/11 and our \$6 million estimate. Higher earnings reflected lower corporate income taxes and increased electricity sales at Maritime Electric.
- **Caribbean Utilities:** Caribbean Utilities earnings contribution totaled \$3 million, versus \$4 million (CGAAP) in Q1/11 and our \$4 million estimate. Lower earnings reflected higher depreciation and finance charges due to increased investments in capital assets, and increased operating expenses associated with insurance and employee-related costs.

Non-Regulated Businesses:

- **Fortis Generation:** Fortis Generation earnings totaled \$5 million, compared to \$3 million (CGAAP) in Q1/11 and our \$3 million estimate. Stronger-than expected results reflect increased production in Belize due to higher rainfall.
- **Fortis Properties:** Fortis Properties earnings came in at \$1 million in Q1/12, compared to \$1 million (CGAAP) in Q1/11 and our \$2 million estimate. The contribution from a Winnipeg hotel acquired in October 2011 was offset by the gain on sale of the Viking Mall during Q1/11.
- **Corporate:** Corporate costs totaled \$17 million (excluding \$4 million of one-time acquisition related expenses) in Q1/12, down from \$20 million (CGAAP) in Q1/11, as a result of lower finance charges due to higher capitalized interest (financing Waneta Expansion), and lower borrowings.

Revising Estimates

For 2012, we have increased our allowed ROE assumptions back to the 2011 levels for FortisBC Energy and FortisBC Electric, as the results of cost of capital hearings in the province will impact allowed ROEs beginning in 2013.

- **FortisBC Energy:** The 2012 allowed ROE for FortisBC Energy Inc. is 9.50%, versus our previous assumption of 9.00%, and 10.00% for the other FortisBC Energy utilities (Vancouver Island, Whistler, and Fort Nelson), versus our previous assumption of 9.50%. For 2013, we maintain our 50 bps decline assumption for all of the FortisBC Energy utilities (9.00% for FortisBC Energy Inc., and 9.50% for the other FortisBC Energy utilities).

- FortisBC Electric:** The 2012 allowed ROE for FortisBC Electric is 9.90%, versus our previous assumption of 9.40%. With the discontinuation of the performance-based rate (PBR) mechanism, we expect achieved ROE in 2012 (and beyond) to decline. For 2013, we maintain our 50 bps decline assumption for FortisBC Electric to 9.40%.

In 2012, the impact of higher assumed allowed ROEs in B.C. offsets the discontinuation of the PBR at FortisBC Electric, and as result, our 2012 EPS estimate of \$1.78 remains unchanged. For 2013, we have maintained our assumption of a 50 bps decline in allowed ROEs for Fortis B.C. utilities, and combined with the impact of the PBR discontinuation, results in our 2013 EPS estimate declining from \$1.89 to \$1.87.

Price Target Calculation

Our \$35.50 price target is based on a discounted cash flow analysis, which captures the expected cash flow growth from Fortis' five-year, \$5.5 billion capital spending program. Our price target equates to a P/E multiple of 19.0x our 2013 estimate, a modest premium to the group average (18.4x) given, in our view, Fortis' solid, low-risk, growth outlook.

Key Risks To Price Target

- **Regulatory Issues:** Given that the majority of Fortis' business is regulated (over 90% as measured by revenues and assets), the company's results are highly sensitive to regulatory decisions – both positive (such as increasing allowed ROEs in Canada over the past few years) and negative (such as adverse rulings/actions in Belize).
- **Acquisition Risks:** Fortis has an announced intention to acquire distribution utilities. Acquisition risks include: deal risk (failure to close a transaction), operation and regulatory risks of the acquired organization.
- **Market Risks:** Under regulator-approved mechanisms, Fortis flows through the commodity cost of natural gas, fuel or purchased power to its customers. The company's non-regulated hydro generation assets are sensitive to localized rainfall levels, but are geographically dispersed and individually not meaningful to overall results. The Waneta Expansion will be more material, but hydrology risk is managed as part of the overall regional river system by BC Hydro, effectively reducing the risk to the project. Foreign exchange risk is relatively low: a 5% change in the Canadian/U.S. dollar exchange rate would impact earnings by \$0.01/share.
- **Construction Risk:** Fortis primarily faces construction risk for its non-regulated generation assets where the company assumes the risk of cost overruns. Clearly, the Waneta Expansion project is the largest construction project that the company is undertaking (with the company funding 51% of the total \$900 million cost). Fortis and its partners have signed a fixed-price design-build contract with SNC-Lavalin (SNC-SO) in order to mitigate construction risk, but ultimate construction and financing risks lie with the Waneta Expansion consortium (i.e., Fortis and partners).

Our EPS estimates are shown below:

	1 Qtr.	2 Qtr.	3 Qtr.	4 Qtr.	Yearly

IMPORTANT DISCLOSURES:

Analyst Certification: Each CIBC World Markets research analyst named on the front page of this research report, or at the beginning of any subsection hereof, hereby certifies that (i) the recommendations and opinions expressed herein accurately reflect such research analyst's personal views about the company and securities that are the subject of this report and all other companies and securities mentioned in this report that are covered by such research analyst and (ii) no part of the research analyst's compensation was, is, or will be, directly or indirectly, related to the specific recommendations or views expressed by such research analyst in this report.

Potential Conflicts of Interest: Equity research analysts employed by CIBC World Markets are compensated from revenues generated by various CIBC World Markets businesses, including the CIBC World Markets Investment Banking Department. Research analysts do not receive compensation based upon revenues from specific investment banking transactions. CIBC World Markets generally prohibits any research analyst and any member of his or her household from executing trades in the securities of a company that such research analyst covers. Additionally, CIBC World Markets generally prohibits any research analyst from serving as an officer, director or advisory board member of a company that such analyst covers.

In addition to 1% ownership positions in covered companies that are required to be specifically disclosed in this report, CIBC World Markets may have a long position of less than 1% or a short position or deal as principal in the securities discussed herein, related securities or in options, futures or other derivative instruments based thereon.

Recipients of this report are advised that any or all of the foregoing arrangements, as well as more specific disclosures set forth below, may at times give rise to potential conflicts of interest.

Important Disclosure Footnotes for Fortis Inc. (FTS)

- 2a Fortis Inc. is a client for which a CIBC World Markets company has performed investment banking services in the past 12 months.
- 2c CIBC World Markets Inc. has managed or co-managed a public offering of securities for Fortis Inc. in the past 12 months.
- 2e CIBC World Markets Inc. has received compensation for investment banking services from Fortis Inc. in the past 12 months.
- 2g CIBC World Markets Inc. expects to receive or intends to seek compensation for investment banking services from Fortis Inc. in the next 3 months.
- 7 CIBC World Markets Corp., CIBC World Markets Inc., and their affiliates, in the aggregate, beneficially own 1% or more of a class of equity securities issued by Fortis Inc.

Pipelines, Utilities, & Power

Fortis Inc.

CH Energy Shareholder Approval; Closes \$601 Million In Subscription Receipts

- On June 27 Fortis announced the completion of its bought deal for 18.5 million subscription receipts at a purchase price of \$32.50 per subscription receipt. The gross proceeds of \$601 million will be held in an escrow pending the closing of the CH Energy acquisition.
- On June 19 Fortis announced that CH Energy shareholders approved the merger agreement whereby Fortis will acquire CH Energy for an aggregate purchase price of approximately US\$1.5 billion, including the assumption of approximately US\$500 million in debt.
- We had previously assumed that Fortis would issue \$400 million in common equity in conjunction with the closing of the transaction, expected in Q1/13. The larger and earlier equity issue results in our 2012E and 2013E EPS declining from \$1.78 and \$1.87 to \$1.71 and \$1.82, respectively.
- The larger-than-expected equity issue also brings the expected accretion from this transaction in the first full year (2014) to the lower end of our original estimate of \$0.03-\$0.05. We are reducing our price target from \$35.50 to \$34.50. We maintain our SP rating.

Price Target Calculation

We are reducing our price target from \$35.50 to \$34.50, based on a discounted cash flow analysis, which captures the expected cash flow growth from Fortis' (FTS-SP) five-year, \$5.5 billion capital spending program. Our price target equates to a P/E multiple of 19.0x our 2013 estimate, a premium to the group average (17.7x) given, in our view, Fortis' solid, low-risk, growth outlook.

Key Risks To Price Target

- **Regulatory Issues:** Given that the majority of Fortis' business is regulated (over 90% as measured by revenues and assets), the company's results are highly sensitive to regulatory decisions – both positive (such as increasing allowed ROEs in Canada over the past few years) and negative (such as adverse rulings/actions in Belize).
- **Acquisition Risks:** Fortis has an announced intention to acquire distribution utilities. Acquisition risks include: deal risk (failure to close a transaction), operation and regulatory risks of the acquired organization.
- **Market Risks:** Under regulator-approved mechanisms, Fortis flows through the commodity cost of natural gas, fuel or purchased power to its customers. The company's non-regulated hydro generation assets are sensitive to localized rainfall levels, but are geographically dispersed and individually not meaningful to overall results. The Waneta Expansion will be more material, but hydrology risk is managed as part of the overall regional river system by BC Hydro, effectively reducing the risk to the project. Foreign exchange risk is relatively low: a 5% change in the Canadian/U.S. dollar exchange rate would impact earnings by \$0.01/share.
- **Construction Risk:** Fortis primarily faces construction risk for its non-regulated generation assets where the company assumes the risk of cost overruns. Clearly, the Waneta Expansion project is the largest construction project that the company is undertaking (with the company funding 51% of the total \$900 million cost). Fortis and its partners have signed a fixed-price design-build contract with SNC-Lavalin Group (SNC-SO) in order to mitigate construction risk, but ultimate construction and financing risks lie with the Waneta Expansion consortium (i.e., Fortis and partners).

IMPORTANT DISCLOSURES:

Analyst Certification: Each CIBC World Markets research analyst named on the front page of this research report, or at the beginning of any subsection hereof, hereby certifies that (i) the recommendations and opinions expressed herein accurately reflect such research analyst's personal views about the company and securities that are the subject of this report and all other companies and securities mentioned in this report that are covered by such research analyst and (ii) no part of the research analyst's compensation was, is, or will be, directly or indirectly, related to the specific recommendations or views expressed by such research analyst in this report.

Potential Conflicts of Interest: Equity research analysts employed by CIBC World Markets are compensated from revenues generated by various CIBC World Markets businesses, including the CIBC World Markets Investment Banking Department. Research analysts do not receive compensation based upon revenues from specific investment banking transactions. CIBC World Markets generally prohibits any research analyst and any member of his or her household from executing trades in the securities of a company that such research analyst covers. Additionally, CIBC World Markets generally prohibits any research analyst from serving as an officer, director or advisory board member of a company that such analyst covers.

In addition to 1% ownership positions in covered companies that are required to be specifically disclosed in this report, CIBC World Markets may have a long position of less than 1% or a short position or deal as principal in the securities discussed herein, related securities or in options, futures or other derivative instruments based thereon.

Recipients of this report are advised that any or all of the foregoing arrangements, as well as more specific disclosures set forth below, may at times give rise to potential conflicts of interest.

Important Disclosure Footnotes for Fortis Inc. (FTS)

- 2a Fortis Inc. is a client for which a CIBC World Markets company has performed investment banking services in the past 12 months.

Fortis Inc.

Solid Q2 Benefits From Ongoing Growth At FortisAlberta

- Fortis reported headline EPS of \$0.33. Excluding costs related to the pending CH Energy acquisition, EPS were \$0.34 versus our estimate (and consensus) of \$0.33. The company incurred a further \$3 million in one-time costs related to CH Energy (on top of \$4 million in Q1).
- Operationally, Q2 benefited from strength at FortisAlberta (earnings up 37% y/y), driven by ongoing customer additions and rate base growth, and further helped by ~\$4 million (~\$0.02 EPS) in additional revenues/reduced costs related to Q1, but recognized in Q2 due to recent regulatory decisions.
- Fortis continues to work towards closing the US\$1.5 billion CH Energy acquisition by the end of Q1/13. Fortis received CH Energy shareholder approval in June and U.S. FERC/CFIUS regulatory approvals in July. NY State Public Service Commission approvals remain outstanding.
- In Q1/13, we expect the close of the CH Energy acquisition and key regulatory decisions in Alberta and B.C. However, we see little change to the outlook for the balance of 2012 and maintain our Sector Performer rating and \$34.50 price target.

Company Profile

Fortis owns a natural gas utility in British Columbia, electric distribution utilities in five Canadian provinces, the Caribbean, and non-regulated power generation and real estate assets.

Investment Thesis

Fortis provides the benefits (stability) of a regulated utility, and is in a period of solid organic investment and growth as the company delivers on its 5 year, \$5.5 billion capital program which is expected to grow the regulated rate base by a CAGR of 6% through 2015. The company is also a 51% owner of the non-regulated \$900 million Waneta Expansion project.

Solid Q2 Benefits From Ongoing Growth At FortisAlberta

Fortis (FTS-SP) reported Q2/12 EPS of \$0.33, in line with CIBC and consensus estimates of \$0.33. Excluding one-time costs related to the pending acquisition of CH Energy, Fortis recorded adjusted EPS of \$0.34, although one-time benefits in the quarter at FortisAlberta from recent regulatory decisions are the main contributor to this upside versus consensus.

Operationally, FortisAlberta remains the key growth driver, with customer growth continuing at ~2%/year and annual capex (budget of \$419 million in 2012) roughly one-third of the company total (of \$1.29 billion). In Q2/12, earnings of \$26 million were up 37% y/y versus \$19 million. We note that this growth is overstated versus a normalized level, as FortisAlberta benefited from recent regulatory rulings which increased quarterly revenues by ~\$1 million and reduced depreciation expense by ~\$3 million; both these amounts were recorded in Q2/12 but were applied retroactively and were related to Q1/12.

Other segments were roughly in line with expectations, with a couple of exceptions: FortisBC Energy (earnings of \$13 million) was below our expectations (\$17 million) and down y/y (versus \$15 million) in a seasonally slow quarter of the year (gas demand peaks in the winter months); and, Newfoundland Power (earnings of \$12 million) modestly beat our estimate (\$11 million) and increased y/y (versus \$10 million) due to the cumulative year to date benefit (recognized in Q2/12) of a higher allowed ROE (8.80% for 2012 versus 8.38% in 2011).

Investment Summary

Looking forward, we expect little change for the balance of 2012. The company continues to progress on its \$1.3 billion capital program, with no material changes to overall schedule or budget including the major Waneta Expansion.

The company is working towards closing the US\$1.5 billion CH Energy (CHG-NYSE) acquisition, a regulated gas and electric utility serving 375,000 customers in New York State. Fortis received CH Energy shareholder approval for the transaction in June, and U.S. Federal Energy Regulatory Commission (FERC) and Committee on Foreign Investment in the United States (CFIUS) approvals in July. The company also closed a \$601 million equity offering (subscription receipts) on June 27 to finance the transaction. The key (although not the only) outstanding regulatory hurdle is receiving New York State Public Service Commission approval. We expect Fortis to receive all required approvals. Fortis continues to expect the transaction to close by the end of Q1/13, and for the acquisition to be immediately accretive to EPS, excluding acquisition-related expenses.

Also by Q1/13 Fortis expects to receive a couple of regulatory decisions. In Alberta the Alberta Utilities Commission (AUC) intends to introduce a performance-based regulation (PBR) formula for 2013 which provides an incentive mechanism for utilities to introduce cost savings and share resulting increased profits with rate payers. Fortis has submitted its comments as to how it would like PBR to be implemented. A decision from the AUC is expected in late 2012 to be introduced for Q1/13. Fortis sees the potential for PBR to increase returns by up to 100 basis points above the current allowed rate of return (8.75% ROE). In BC, FortisBC Energy is involved in a generic cost of capital proceeding to determine an appropriate rate of return for 2013. The BC Utilities Commission (BCUC) is undertaking a more widespread process to determine an

appropriate rate of return benchmark; up to this point, FortisBC Energy has been the benchmark utility and expects to remain so. Fortis sees the potential for some downside risk to the current 9.50% to 10.00% ROE received at FortisBC Energy (the higher level for Whistler and Vancouver Island), although is seeking to maintain the current levels.

Overall, we see little risk to the short-term outlook. Upside in 2013 is expected to be driven by the CH Energy acquisition, although we expect accretion from the transaction initially to be quite modest given the sizable equity offering (\$601 million) to finance the acquisition and a transaction multiple roughly in line with that of Fortis (~1.5x rate base). The company also continues to execute its five year, \$5.5 billion capex program (to which CH Energy is expected to add a further \$0.5 billion). Overall, we are forecasting mid-single digit EPS growth. With Fortis trading at 19.1x 2012E EPS and 18.1x 2013, we see only modest upside at present, and maintain our Sector Performer rating and \$34.50 price target.

Q2/12 Results

Fortis reported Q2/12 adjusted EPS (excluding CH Energy acquisition costs) of \$0.34, versus \$0.33 (Canadian GAAP) in Q2/11, and our \$0.33 expectation (consensus \$0.33). Slightly higher-than-expected earnings were due to strong results at FortisAlberta and in non-regulated operations partially offset by lower-than-expected results in FortisBC Energy.

FortisAlberta reported earnings of \$26 million, up 37% y/y as it benefited from \$1 million in additional net transmission revenues and \$3 million in reduced depreciation expense related to Q1/12 but included in Q2/12 due to recent regulatory decisions. We estimate these amounts generated ~\$0.02 EPS in Q2.

Source: CIBC World Markets Inc.

Regulated Utilities:

- **FortisBC Energy:** FortisBC Energy earnings totaled \$13 million in Q2/12, compared to \$15 million in Q2/11 (CGAAP) and our estimate of \$17 million. The decline in earnings was mainly due to lower-than-expected customer additions and lower capitalized AFUDC due to a lower asset base under construction in 2012.
- **FortisAlberta:** FortisAlberta contributed \$26 million to earnings in Q2/12, versus \$19 million in Q2/11 (CGAAP), and our \$22 million estimate. Stronger-than-expected earnings reflected the cumulative impact of the Alberta Utilities Commission's (AUC) April 2012 distribution revenue requirements decision, which added \$3 million to net transmission revenue (\$1 million related to Q1/12) and reduced depreciation expense (\$3 million related to Q1/12), as well as rate base growth.
- **FortisBC Electric:** FortisBC Electric earnings totaled \$9 million in Q2/12, compared to \$9 million in Q2/11 (CGAAP), and our \$9 million estimate. The impact of rate base growth was offset by lower capitalized AFUDC in 2012, and the discontinuance of the performance-based rate-setting (PBR) mechanism (the benefit of lower-than-expected costs were shared equally between FortisBC Electric and customers under PBR in Q2/11).

- **Newfoundland Power:** Newfoundland Power earnings were \$12 million in the quarter, compared to \$11 million in Q2/11 (CGAAP) and our \$11 million estimate. Increased earnings reflect the cumulative impact of a higher 2012 allowed ROE (8.80% versus 8.38% previously) which was recognized in Q2/12.
- **Other Canadian Electric Utilities:** Other Canadian Electric Utilities contributed earnings of \$5 million in the quarter, versus \$6 million in Q2/11 (CGAAP) and our \$6 million estimate. Slightly lower-than-expected earnings reflects higher operating costs at FortisOntario due to an increase in employee related costs and the timing of expenses.
- **Caribbean Utilities:** Caribbean Utilities earnings contribution totaled \$6 million, versus \$7 million in Q2/11 (CGAAP) and our \$6 million estimate. Lower energy supply costs and higher electricity sales at Fortis Turks and Caicos, were offset by higher depreciation and finance charges (due to increased investment in utility assets) and decreased electricity sales at Caribbean Utilities.

Non-Regulated Businesses:

- **Fortis Generation:** Fortis Generation earnings totaled \$5 million, compared to \$2 million in Q2/11 (CGAAP) and our \$3 million estimate. Stronger-than-expected results reflect increased production in Belize due to higher rainfall, as well as insurance proceeds related to the loss of earnings during the quarter from repairs to a facility in Upstate New York which sustained electrical damage in May 2011.
- **Fortis Properties:** Fortis Properties earnings came in at \$8 million in Q2/12, compared to \$7 million in Q2/11 (CGAAP) and our \$7 million estimate. The y/y increase reflects the contribution of a Winnipeg hotel acquired in October 2011.
- **Corporate:** Corporate costs totaled \$17 million (excluding \$4 million of one-time acquisition related expenses) in Q1/12, down from \$20 million (CGAAP) in Q1/11, as a result of lower finance charges due to higher capitalized interest (financing Waneta Expansion), and lower borrowings.

Revising Estimates

We have revised our estimates mainly to reflect Q2 results, as well as accounting for the impact to outstanding shares from Fortis' \$601 million issuance of subscription receipts at the end of Q1/13 (when the CH Energy acquisition is expected to close) as opposed to when the subscription receipts were issued (in June 2012), in line with how the company is treating the issuance. As a result of these changes, our 2012 EPS estimate increases from \$1.71 to \$1.76 and our 2013 EPS estimate increases from \$1.82 to \$1.85.

Price Target Calculation

We are maintaining our \$34.50 price target, based on a discounted cash flow analysis, which captures the expected cash flow growth from Fortis' five-year, \$5.5 billion capital spending program. Our price target equates to a P/E multiple of 18.6x our 2013 estimate, in line with the group average (18.5x) given Fortis' modest low-risk growth outlook.

Key Risks To Price Target

- **Regulatory Issues:** Given that the majority of Fortis' business is regulated (over 90% as measured by revenues and assets), the company's results are highly sensitive to regulatory decisions – both positive (such as increasing allowed ROEs in Canada over the past few years) and negative (such as adverse rulings/actions in Belize).
- **Acquisition Risks:** Fortis has an announced intention to acquire distribution utilities. Acquisition risks include: deal risk (failure to close a transaction), operation and regulatory risks of the acquired organization.

- **Market Risks:** Under regulator-approved mechanisms, Fortis flows through the commodity cost of natural gas, fuel or purchased power to its customers. The company's non-regulated hydro generation assets are sensitive to localized rainfall levels, but are geographically dispersed and individually not meaningful to overall results. The Waneta Expansion will be more material, but hydrology risk is managed as part of the overall regional river system by BC Hydro, effectively reducing the risk to the project. Foreign exchange risk is relatively low: a 5% change in the Canadian/U.S. dollar exchange rate would impact earnings by \$0.01/share.
- **Construction Risk:** Fortis primarily faces construction risk for its non-regulated generation assets where the company assumes the risk of cost overruns. Clearly, the Waneta Expansion project is the largest construction project that the company is undertaking (with the company funding 51% of the total \$900 million cost). Fortis and its partners have signed a fixed-price design-build contract with SNC-Lavalin (SNC-SO) in order to mitigate construction risk, but ultimate construction and financing risks lie with the Waneta Expansion consortium (i.e., Fortis and partners).

IMPORTANT DISCLOSURES:

Analyst Certification: Each CIBC World Markets research analyst named on the front page of this research report, or at the beginning of any subsection hereof, hereby certifies that (i) the recommendations and opinions expressed herein accurately reflect such research analyst's personal views about the company and securities that are the subject of this report and all other companies and securities mentioned in this report that are covered by such research analyst and (ii) no part of the research analyst's compensation was, is, or will be, directly or indirectly, related to the specific recommendations or views expressed by such research analyst in this report.

Potential Conflicts of Interest: Equity research analysts employed by CIBC World Markets are compensated from revenues generated by various CIBC World Markets businesses, including the CIBC World Markets Investment Banking Department. Research analysts do not receive compensation based upon revenues from specific investment banking transactions. CIBC World Markets generally prohibits any research analyst and any member of his or her household from executing trades in the securities of a company that such research analyst covers. Additionally, CIBC World Markets generally prohibits any research analyst from serving as an officer, director or advisory board member of a company that such analyst covers.

In addition to 1% ownership positions in covered companies that are required to be specifically disclosed in this report, CIBC World Markets may have a long position of less than 1% or a short position or deal as principal in the securities discussed herein, related securities or in options, futures or other derivative instruments based thereon.

Recipients of this report are advised that any or all of the foregoing arrangements, as well as more specific disclosures set forth below, may at times give rise to potential conflicts of interest.

Citadel Securities Estimates

Fortis Inc. is the largest investor-owned distribution utility in Canada, serving almost 2,000,000 gas and electric customers. Its regulated holdings include a natural gas utility in British Columbia and electric utilities in 5 Canadian provinces and 3 Caribbean countries. It owns non-regulated hydroelectric generation assets across Canada and in Belize and upper New York State. It also owns hotels & commercial real estate in Canada.

February 25, 2008
Highlights

At this time in the economic cycle, investors are looking for a safe haven in defensive stocks. Fortis is one of them.

The management team of Fortis has a proven track record in growing the Company. Terasen acquisition completed in May 2007 was the major factor to almost double the Company's assets in a year.

The company is tapping into the economic growth in Western Canada and the Caribbean especially in recent years. Important additions to the Company's asset size include FortisAlberta and FortisBC in 2004, Caribbean expansion and acquisition of hospitality operations in 2006 & 2007 and finally the Terasen acquisition in 2007.

As the largest investor-owned distribution utility in Canada, Fortis serves almost two million gas and electricity customers. In addition to its regulated holdings, which include a natural gas utility in British Columbia and electric utilities in five Canadian provinces and three Caribbean countries, Fortis also owns non-regulated generation assets (primarily hyrdoelectric) across Canada, in Belize and in upper New York State. Additional diversification to Fortis' portfolio comes with hotels and commercial real estate.

Growth in asset size is combined with a commitment to shareholders. Dividends of Fortis have been increasing for the last 35 years consecutively.

As a blue-chip, dividend-paying company in a defensive industry with a good valuation, Fortis is one of our top picks this year. We are initiating coverage on Fortis with \$33.00 target price and "Outperform" recommendation.

Executive Summary

At this time in the economic cycle, investors are looking for a safe haven in defensive stocks. Fortis Inc. is one of them. The utility business is a highly regulated, capital-intensive and stable-growth industry. As the largest investor-owned distribution utility in Canada, Fortis is strategically positioned in this sector. Recent acquisitions and investments in Western Canada and the Caribbean have helped to solidify this strategic positioning even further.

Today Fortis serves almost two million gas and electricity customers. Its regulated holdings include a natural gas utility in British Columbia and electric utilities in five Canadian provinces and three Caribbean countries. Fortis also owns non-regulated generation assets (primarily hydroelectric) across Canada, in Belize and in upper New York State. Hotels and commercial real estate help to diversify the company's portfolio.

The management team of Fortis has a proven track record in growing the company by ensuring compliance with existing regulations and keeping their eyes on emerging ones. With their strategy of keeping the profitability and risk of the business at comparable level with the Company's peers while growing it at above average rate, the Company has almost doubled in asset size in a year and is now seven times larger than it was in 2000 and 10 times larger than a decade ago.

This growth is both organic and also fueled by strategic acquisitions. Especially in recent years, the Company has started to tap into the economic boom in Western Canada and the Caribbean. Significant additions include FortisAlberta and FortisBC in 2004, a Caribbean expansion and acquisition of hospitality operations in 2006 & 2007, and the Terasen Gas acquisition in 2007. Terasen acquisition was the biggest acquisition in the Company's history.

Growth in asset size is one strength; commitment to shareholders is another. Fortis' Dividends have been increasing consecutively for the last 35 years. Although past performance does not guarantee future results, it is a strong indication of management's growth strategy.

As a blue-chip, dividend-paying company in a defensive industry with a good valuation, Fortis is one of our top picks this year. However, while evaluating investment alternatives, investors should be aware of certain risks. The Company's operations, for one, are dependent on regulations. Also, the Company has been using debt as a preferred financing source. And Fortis has international exposure. Therefore, any adverse changes in the regulatory arena, interest rates, currency fluctuations, or natural disasters may affect its performance negatively.

We are initiating coverage on Fortis with \$33.00 target price and our recommendation is "Outperform".

Fortis

Fortis is a diversified, international utility holding company that owns subsidiaries principally engaged in the regulated distribution of electricity and gas. Regulated utility assets comprise approximately 92 per cent of the Corporation's total assets with the balance comprised primarily of non-regulated generation operations and commercial real estate and hotel investments owned and operated through its non-utility subsidiary. Fortis segments its utility operations by franchise area and, depending on regulatory requirements, by the nature of the assets.

Explanations of Regulatory Terms

Cost of Service - Rate orders issued by the regulatory authority establish the Company's revenue requirements. That revenue is required to recover approved costs with the distribution business and also provide a rate of return on a deemed capital structure applied to rate-based assets. It is not possible to recover the variance if it occurs. But certain prescribed costs are eligible for deferral account treatment.

Performance-Based Rate (PBR) Setting (for Fortis BC) - The PBR framework allows for the equal sharing between customers and the Company of variances above or below the allowed return on equity (ROE) within a prescribed band.

PBR (TGV) - 100 per cent retention of earnings from lower-than-forecasted operating and maintenance costs but no relief from increased operating and maintenance costs

Terasen Gas Companies

Fortis Inc. Ownership (%)	100%
Segment	Regulated Utilities - Canadian
Operation	Gas and propane distribution and transmission
Location	Populous lower mainland, Vancouver Island and the interior of British Columbia.
Regulations	<p>Cost of Service/Return on Equity</p> <p>Terasen Gas Inc (TGI) and Terasen Gas Vancouver Island (TGVI) operate under cost-of-service regulation and performance-based rate setting methodologies as described by BCUC. ROE automatic-adjustment formula tied to long-term Canada bond yields</p> <p>For TGI:</p> <p>2006 allowed ROE: 8.80%</p> <p>2007 allowed ROE: 8.37%</p> <p>2008 allowed ROE: 8.62%</p> <p>For TGVI:</p> <p>2006 allowed ROE: 9.50%</p> <p>2007 allowed ROE: 9.07%</p> <p>2008 allowed ROE: 9.32%</p> <p>Allowed Common Equity: 35% and 40% for TGI and TGVI, respectively.</p> <p>Regulatory Commission: British Columbia Utilities Commission (BCUC)</p>
Capacity/Service	Terasen Gas serves over 918,000 customers or 96% of natural gas users in British Columbia.

As the latest acquisition of Fortis Inc., Terasen is comprised of three wholly owned subsidiaries (TGI, TGVI and Terasen Gas Whistler Inc (TGWI)). TGI provides gas distribution services to an area that extends from Vancouver to the Fraser Valley and the interior of British Columbia. TGVI owns a combined gas distribution and transmission system servicing customers along the Sunshine Coast and in various communities from the Greater Vancouver area across the Georgia Strait to Vancouver Island and the distribution system on Vancouver Island and along the Sunshine Coast of British Columbia. TGWI provides propane distribution services to approximately 2,400 customers in the Whistler area.

On June 19, 2007, Standard & Poor's raised Terasen's unsolicited long-term corporate credit and senior unsecured debt credit ratings on TGI to "A" from "BBB." This upgrade brought S&P back in line with the solicited credit ratings of Terasen by DBRS and Moody's Investors Service.

FortisAlberta

Fortis Inc. Ownership (%)	100%
Segment	Regulated Utilities - Canadian
Operation	Distribution of electricity
Location	Southern and Central Alberta
Regulations	<p>Cost of Service/Return on Equity -ROE automatic-adjustment formula tied to long-term Canada bond yields</p> <p>2006 allowed ROE: 8.93%</p> <p>2007 allowed ROE: 8.51%</p> <p>2008 allowed ROE: 8.75%</p> <p>Allowed Common Equity: 37%</p> <p>Regulatory Commission: Alberta Utilities Commission (AUC)</p>
Capacity/Service	FortisAlberta distributes electricity to over 448,000 customers.

FortisAlberta's business is the ownership and operation of regulated facilities that distribute electricity generated by other market participants from high-voltage transmission substations to end-use customers. FortisAlberta is not involved in generation, transmission or the direct sale of electricity.

FortisAlberta is one of the companies that Fortis acquired from Aquila, Inc., along with FortisBC, for \$1.5 billion in May 2004.

FortisBC

Fortis Inc. Ownership (%)	100%
Segment	Regulated Utilities - Canadian
Operation	Integrated electric utility operation
Location	Southern interior of British Columbia
Regulations	<p>Cost of Service/Return on Equity</p> <p>Both cost-of-service and performance-based rating regulation. PBR mechanism through 2008, with option to continue in 2009 -50/50 sharing of earnings above or below the allowed ROE up to an achieved ROE that is 200 basis points above or below the allowed ROE.</p>

FortisBC (Cont'd)

Regulations (cont'd)	<p>ROE automatic-adjustment formula tied to long-term Canada bond yields</p> <p>2006 allowed ROE: 9.20%</p> <p>2007 allowed ROE: 8.77%</p> <p>2008 allowed ROE: 9.02%</p> <p>Allowed Common Equity: 40%</p> <p>Regulatory Commission: British Columbia Utilities Commission (BCUC)</p>
Capacity/Service	<p>The Company serves approximately 154,000 customers directly and indirectly in the southern interior of British Columbia. FortisBC owns four regulated hydroelectric generating plants with a combined capacity of 223 MW. During 2007, energy output was increased by 11,000 MW hours as a result of negotiated adjustments to the Canal Plant Agreement with BC Hydro.</p>

FortisBC also operates the 450-MW Waneta hydroelectric generating facility owned by Teck Cominco Metals Ltd.; the 149-MW Brilliant hydroelectric plant; the 185-MW Arrow Lakes hydroelectric plant owned by Columbia Power Corporation and the Columbia Basin Trust; and the distribution system owned by the City of Kelowna. The former Princeton Light and Power Company, Limited was purchased in 2005 and wound up by FortisBC on January 1, 2007. Princeton's assets and liabilities were assumed by FortisBC then.

The transmission and distribution assets consist of approximately 6,900 kilometers of transmission and distribution power lines and 64 distribution substations.

FortisBC intends to file its 2009 and 2010 Capital Plan and 2009 revenue requirements with BCUC in the third quarter of 2008.

Newfoundland Power

Fortis Inc. Ownership (%)	100% of common shares
Segment	Regulated Utilities - Canadian
Operation	Integrated electric generation, transmission and distribution
Location	Newfoundland
Regulations	Cost of Service/Return on Equity -ROE automatic-adjustment formula tied to long-term Canada bond yields

Newfoundland Power (Cont'd)

Regulations (cont'd)	2006 allowed ROE: 9.24% +/- 50bps 2007 allowed ROE: 8.60% +/- 50bps 2008 allowed ROE: 8.95% +/- 50bps Allowed Common Equity: 45% Regulatory Commission: Newfoundland and Labrador Board of Commissioners of Public Utilities (PUB)
Capacity/Service	As the principal distributor of electricity in Newfoundland, the company serves approximately 232,000 customers in the Province, and has an installed generating capacity of 139 MW, of which 96 megawatts is hydroelectric generation.

Newfoundland Power is the principal distributor of electricity on the island portion of Newfoundland and Labrador. It owns and operates 29 small generating stations and approximately 11,000 kilometers of transmission and distribution lines. Approximately 90 per cent of the electricity that Newfoundland Power sells to its customers is purchased from Newfoundland and Labrador Hydro, a provincial Crown Corporation. The remainder of its energy requirements is generated by the Company itself.

Newfoundland Power received approval of a Negotiated Settlement Agreement (NSA) by the PUB in December 2007 for its 2008 rates. The 2.8% rate increase is largely driven by higher amortization costs.

Maritime Electric

Fortis Inc. Ownership (%)	100%
Segment	Regulated Utilities - Canadian
Operation	Integrated electric generation, transmission and distribution
Location	Prince Edward Island
Regulations	Cost of Service/Return on Equity 2006 allowed ROE: 10.25% 2007 allowed ROE: 10.25% 2008 allowed ROE: 10.00% Allowed Common Equity: 40%

Maritime Electric (Cont'd)

Regulations (cont'd)	Regulatory Commission: Island Regulatory and Appeals Commission (IRAC)
Capacity/Service	Maritime Electric is the principal distributor of electricity on Prince Edward Island, serving approximately 72,000 customers. The Company also maintains on-Island generating facilities with a combined capacity of 150MW.

Maritime Electric purchases most of its energy from New Brunswick Power, a provincial Crown corporation. Maritime Electric's system is connected to the mainland power grid via two submarine cables under the Northumberland Strait, which are leased from the provincial government.

The PEI government expects to see an increased reliance by Maritime Electric on renewable energy sources, such as wind-powered energy, located on the Island. By 2010, Maritime Electric will be required to obtain at least 15 per cent of its annual energy requirements from renewable sources.

FortisOntario

Fortis Inc. Ownership (%)	100%
Segment	Regulated Utilities - Canadian
Operation	Integrated electric generation, transmission and distribution (Canadian Niagara Power, including the operations of Port Colborne Hydro and Cornwall Electric.)
Location	Ontario
Regulations	<p>Canadian Niagara Power – Cost of Service/ROE Cornwall Electric – Price cap with commodity cost flow-through</p> <p>2006 allowed ROE: 9.00% 2007 allowed ROE: 9.00% 2008 allowed ROE: 9.00%</p> <p>Allowed Common Equity: 50%</p> <p>Regulatory Commission: Ontario Energy Board (OEB) for Canadian Niagara Power. The Company has a franchise agreement for Cornwall Electric.</p>

FortisOntario (Cont'd)

Capacity/Service	In total, FortisOntario's distribution operations serve approximately 52,000 customers in the Fort Erie, Port Colborne, Cornwall, and Gananoque areas of Ontario. Canadian Niagara Power owns international transmission facilities at Fort Erie as well as a 10 per cent interest in each of Westario Power and Rideau St. Lawrence, two regional electric-distribution companies that together serve over 27,000 customers.
------------------	---

Canadian Niagara Power purchases its power requirements for Fort Erie and Port Colborne from the Independent Electricity System operator in Ontario. In Gananoque, Canadian Niagara Power's distribution system is embedded within Hydro One Networks. Approximately 83 per cent of energy requirements for Gananoque are met through monthly energy purchases from Hydro One Networks and the remaining 17 per cent is purchased from six hydroelectric generating plants owned by Fortis Properties.

Cornwall Electric purchases 98 per cent of its power requirements from Hydro-Québec Energy Marketing Inc. under two fixed-term contracts. The first contract, which represents approximately 37 per cent of the power supply, expires in 2019. The second contract, which supplies the remainder of the power from Hydro-Québec Energy Marketing, is a 24-month rolling contract expiring in 2008. FortisOntario's 5-MW gas-fired cogeneration plant generates the remaining two per cent of the power requirement in Cornwall.

Cornwall Electric is subject to a 35-year franchise agreement with the City of Cornwall, dated July 31, 1998. Rates under the agreement are subject to a price cap with commodity cost flow-through. The base revenue requirement is adjusted annually for inflation, load growth and customer growth. In November 2004, the OEB granted Cornwall Electric a distribution licence valid until December 2019. The licence acknowledges the existing service territory and franchise agreements. Prior to this date, Cornwall Electric had been granted an interim distribution licence.

Belize Electricity

Fortis Inc. Ownership (%)	70.1%
Segment	Regulated Electric Utilities - Caribbean
Operation	Generation, transmission and distribution of electricity
Location	Belize, Central America
Regulations	<p>Four-year cost-of-service/return-on-assets agreements with market-based returns</p> <p>2006 allowed ROA: 10.00 - 15.00%</p> <p>2007 allowed ROA: 10.00 - 15.00%</p> <p>2008 allowed ROA: 10.00 - 15.00%</p> <p>Regulatory Commission: Public Utilities Commission (PUC).</p>
Capacity/Service	Belize Electricity is the principal distributor of electricity in Belize serving approximately 73,000 customers. The Company has an installed generating capacity of 36 MW.

Belize Electricity meets its energy demand from multiple sources, which include power purchases from:

- (i) CFE, the Mexican state-owned power company;
- (ii) the Mollejon and Chalillo hydroelectric facilities owned and operated by BECOL;
- (iii) Its own diesel-fired and gas turbine generation.

All major load centers are connected to Belize's national electricity system, which is connected to the Mexican electricity system, allowing Belize Electricity to optimize its power-supply options.

Fortis Turks & Caicos

Fortis Inc. Ownership (%)	100%
Segment	Regulated Electric Utilities - Caribbean
Operation	Generation, transmission and distribution of electricity
Location	Turks and Caicos Islands
Regulations	<p>Cost of Service/Return on Assets</p> <p>2006 allowed ROA: 17.50%</p> <p>2007 allowed ROA: 17.50%</p> <p>2008 allowed ROA: 17.50%</p> <p>Regulatory Authority: Energy Commission</p>

Fortis Turks & Caicos (Cont'd)

Capacity/Service	The Company is the principal distributor of electricity on the Turks and Caicos islands, serving more than 8,700 customers. The company has a combined diesel-fired generating capacity of 48 MW.
------------------	---

Caribbean Utilities

Fortis Inc. Ownership (%)	54%
Segment	Regulated Electric Utilities - Caribbean
Operation	Generation, transmission and distribution of electricity
Location	Grand Cayman, Cayman Islands
Regulations	<p>Cost of Service/Return on Assets</p> <p>Price-cap adjustment mechanism tied to consumer price indices (effective 2008 under proposed new licence)</p> <p>2006 allowed ROA: 15.00%</p> <p>2007 allowed ROA: 15.00%</p> <p>2008 allowed ROA: 9.00 - 11.00% (proposed)</p> <p>Regulatory Commission: Electricity Regulatory Authority (effective 2008 under proposed new licence)</p>
Capacity/Service	Caribbean Utilities is the sole provider of electricity on Grand Cayman serving more than 23,000 customers. The company has installed generating capacity of 137 MW.

On November 7, 2006, Fortis acquired an additional 16 per cent ownership interest in Caribbean Utilities and now owns approximately 54 per cent of this company. Caribbean Utilities is a public company traded on the Toronto Stock Exchange (TSX: CUP.U) and has an April 30th fiscal year end.

Non-Regulated - Fortis Generation

Location	Plants	Fuel	Capacity (MW)
Ontario	8	Hydro, thermal	88
Belize	2	Hydro	32
Central Newfoundland	2	Hydro	36
Upper New York State	4	Hydro	23
British Columbia	1	Hydro	16
Total	17		195

Annual energy sales from non-regulated generation assets decreased to 1,122 GWh in 2007 from 1,203 GWh in 2006.

Non-regulated generation operations in Ontario include those of FortisOntario and the former FortisOntario Generation. On December 14, 2005, FortisOntario Generation was transferred from FortisOntario to Fortis Properties and was amalgamated with CNE Energy on January 1, 2006. One year later, CNE Energy amalgamated with Fortis Properties. FortisOntario includes 75 MW of water-right entitlement associated with the Niagara Exchange Agreement and the operation of a 5-MW gas-fired cogeneration plant in Cornwall. Fortis Properties' generating operations in Ontario consist of six small hydroelectric generating stations with a combined capacity of approximately 8 MW.

During 2005, the assets related to the 75 MW of water-right entitlement were written down as a result of the implementation of the Niagara Exchange Agreement. The Niagara Exchange Agreement assigns FortisOntario's water rights on the Niagara River to OPGI and facilitates the irrevocable exchange of 75 MW of wholesale electric power supply to FortisOntario from OPGI until April 30, 2009 in exchange for FortisOntario's agreement not to seek renewal of the water entitlement at that time.

Non-regulated generation operations in Belize consist of the operations of BECOL. BECOL operates both the 25-MW Mollejon hydroelectric generating facility and the 7-MW Chalillo hydroelectric generating facility and sells the entire output to Belize Electricity under a 50-year power purchase agreement and a franchise agreement.

Non-regulated generation operations in central Newfoundland are conducted through the Corporation's indirect 51 per cent interest in the Exploits Partnership, a venture with Abitibi-Consolidated that constructed, installed and now operates additional capacity at Abitibi-Consolidated's hydroelectric generating plant at Grand Falls-Windsor and redeveloped the forestry company's hydroelectric generating plant at Bishop Falls.

The Exploits Partnership project was completed in November 2003. Abitibi-Consolidated continues to utilize the historical annual generation of approximately 450 GWh while the additional energy, approximately 140 GWh, produced from the new facilities is sold to Newfoundland Hydro under a 30-year take-or-pay power purchase agreement, which is exempt from regulation and expires in 2033.

Non-regulated generation operations in British Columbia consist of the 16-MW run-of-river Walden hydroelectric power plant near Lillooet, British Columbia. This plant sells its entire output to BC Hydro under a power purchase agreement expiring in 2013. Generation operations in British Columbia were acquired as part of FortisBC in May 2004.

Non-regulated generation operations in Upper New York State include four hydroelectric generating stations with a combined generating capacity of 23 MW under licenses from FERC. These generating stations operate as FortisUS Energy, which became a direct subsidiary of Fortis Properties on January 1, 2005, by way of a transfer from its subsidiary Maritime Electric. Effective January 1, 2007, two of the power purchase agreements were renewed and all four plants are now selling energy to National Grid at market rates.

Non-regulated - Fortis Properties

Fortis Properties owns and operates 19 hotels with more than 3,500 rooms in eight Canadian provinces and approximately 2.8 million square feet of commercial real estate primarily in Atlantic Canada.

In 2007, Fortis Properties derived approximately 31% of its revenue from real estate operations and 69% of its revenue from hotel operations.

Strategy and Outlook

The Corporation's principal business – regulated utilities – is capital intensive, and Fortis expects that most of its capital expenditures for the next five years will relate primarily to Terasen, FortisAlberta and FortisBC. Consolidated utility capital expenditures for this period are expected to be over \$4 billion.

Fortis also expects to focus its capital on funding further acquisitions of utility assets. The Corporation will continue to pursue acquisition opportunities both in and outside of Canada.

As well, Fortis will pursue growth in its non-regulated businesses including hydroelectric generation, hotels, and real estate. Fortis will maintain approximately 15-20% of its assets in non-utility businesses since these businesses are providing flexibility in financing and tax planning.

The primary objectives of the Company are that:

- Earnings should continue at a rate commensurate with that of a well-run North American utility
- Risks should not be substantially greater than associated with the operations of a similar-size North American utility
- Growth in assets and market cap should be greater than the average of other North American public gas and electric corporations of similar size.

Management

The management team at Fortis is lean but has a very successful track record: it has grown significantly in a highly regulated industry through strategic acquisitions and very skillful digestion of these acquisitions. Shareholders have benefited as a result.

H. Stanley Marshall – President, Chief Executive Officer. Mr. Marshall joined Newfoundland Power Inc. in 1979 and was appointed President and Chief Executive Officer of Fortis Inc. in 1996. A native of Carbonear, Newfoundland, Mr. Marshall earned a Bachelor of Applied Science Degree in Chemical Engineering from the University of Waterloo and Bachelor of Laws at Dalhousie University. He is a member of the Law Society of Newfoundland and Labrador and a registered professional Engineer. Mr. Marshall serves on the Boards of all Fortis utilities in Western Canada and the Caribbean and the Board of Fortis Properties Corporation and is a Director of Toromont Industries Ltd.

Barry V. Perry – Vice President, Chief Financial Officer. Most recently, Mr. Perry held the position of Vice President, Finance and Chief Financial Officer of Newfoundland Power. Previously he held the position of Vice President Treasurer with a global forest products company and Corporate Controller with a large crude oil refinery.

Active in the business community, Mr. Perry is a member of the Finance and Taxation Committee of the Canadian Electrical Association and a member of the By-laws Advisory Committee for the Institute of Chartered Accountants of Newfoundland.

Ronald W. McCabe - General Counsel and Corporate Secretary and Donna G. Hynes - Assistant Secretary and Manager, Investor and Public Relations.

*estimates

Source: Statistics Canada, National Energy Board

Canada is not only self sufficient in terms of electricity generation and distribution, it is a net exporter thanks to the abundance of natural resources such as water and coal. However, there is always a need for sustainability of supply in the long term. Following is a list of factors affecting the supply-demand balance of Canada's electricity market across provinces:

Sources of generation – In 2006, hydro generation accounted for 59% of electric power in Canada while nuclear energy provided about 16% of the country's total electricity production.

Depending on proximity to natural sources of generation, some provinces such as Quebec, Manitoba, British Columbia, and Newfoundland and Labrador, are known as hydro-based provinces. On the other hand, thermal-based jurisdictions such as Nova Scotia, Saskatchewan and Alberta rely primarily on coal while other provinces like New Brunswick and PEI use mostly oil. In Ontario, nuclear power accounts for more than half of total electricity generation (and New Brunswick has also nuclear power plants). Cost is the differentiating factor. Changes in the price of oil, coal and natural gas price, especially for thermal resources, create significant volatility with respect to the cost of electricity. Provinces are looking for ways to keep costs down. Recent increases in the price of fossil fuels, for example, have adversely affected the cost structure of electricity generation. In 2006, the proportion of electricity generated in Canada using fossil fuels declined by 7.0%.

Aging infrastructure – Although hydro generation seems less affected by volatility in commodity markets, their aging transmission and distribution lines are a significant issue. In addition, the cost of building new generation facilities is an important factor in determining where new sources of generation will be located. Currently most alternative and renewable energy sources are more costly than thermal-based generation. The good news is that technological advances are helping to reduce the cost for many alternative and renewable resources. The bad news is that combined generation from wind, solar and tidal sources in 2006 represented less than 0.5% of total generation.

But there is hope for renewable energy sources. Wind generation has been growing significantly in Canada according to the Statistics Canada. Wind generation capacity in Canada more than doubled in 2006 and continued to grow in 2007. The largest increase was posted in Ontario. According to the Canadian Wind Energy Association, Canada's current installed capacity is 1,856 MW – enough to power 560,000 Canadian homes or the equivalent of 0.8 % of the total electricity demand. There are provincial wind policies in place, mostly setting targets for generation coming from renewable energy sources. Although these targets are not necessarily mandatory, factoring the volatile energy prices into the picture, there is good business sense in reaching them. The estimated total economic impact of the wind industry in Canada was approximately \$1.5 billion in 2006.

Market structures – Canada is a net electricity exporter. The trade between certain Canadian provinces and the U.S. (north-south grid) is better than inter-provincial trade among Canadian provinces (east-west grid) because, historically, inter-provincial trade was not considered economically attractive. Hydro-based provinces, in particular, prefer to export some of their production. The revenue generated by this export trade returns to taxpayers in the form of lower prices or as a contribution to government revenues.

Regulatory environment – A traditional vertically integrated market structure has been abandoned in many provinces. Alberta and Ontario opened their markets to wholesale and retail competition; other provinces partially restructured their markets or have maintained existing models. British Columbia, Saskatchewan, Québec, and New Brunswick have wholesale access and retail access to large industrial users while Manitoba allows wholesale access only. Although the objective is to encourage competition and, thereby obtain efficiencies, in many provinces, there is a debate over the success of restructuring in terms of reaching intended objectives. Except for Alberta and Ontario, pricing structure is a regulated cost-of-service rate.

Financial Analysis

Revenues (million \$)

Revenue Breakdown - 2007

Segmented Net Earnings - 2007*

* Before corporate and other net expenses

The five-year average revenue growth of Fortis is approximately 33% (CAGR is 173%), which is significantly above the industry average. Most of this growth is generated by acquisitions. The Company's revenues were considerably boosted by the acquisition of FortisAlberta and FortisBC in 2004 and Terasen in 2007. Recently announced year-end results have shown that Fortis increased its revenues by 85% in 2007, thanks primarily to the acquisition of Terasen, which is responsible for 62% of the growth over three quarters. According to our calculations, acquisition of Fortis Turks and Caicos in August 2006 and inclusion of its full-year financials in the consolidated revenues of 2007 as well as that of the Caribbean Utilities had an impact of approximately 15 -25% in overall revenue growth. Therefore, we have determined that the organic growth rate of the Company was approximately 5% for the year 2007.

In 2007, 79% of the Company's total revenue was derived from the Canadian regulated segment — including Terasen (34%). The largest share in the regulated electricity group belongs to Newfoundland Power, which contributed 18% of the total revenue of Fortis Inc. Fortis Properties revenue contributed 7% and the Caribbean 11%.

During 2007, FortisAlberta added 18,000 customers bringing the total number of customers to over 448,000. An increase in the number of customers, an increase in the distribution rates, franchise fee revenue, net transmission revenue, and other increases resulted in an almost 8% growth in this subsidiary's revenue. Although the operating expenses were higher in 2007, FortisAlberta managed to boost its earnings by 14%.

In 2007, Fortis BC's electricity sales were negatively affected by warmer temperatures and reduced industrial loads associated with plant optimization by a significant industrial customer. Yet this subsidiary achieved sales and revenue growth during the year. Higher electricity rates, lower energy supply costs and corporate taxes helped FortisBC increase its earnings for the year by 15%.

Fortis' flagship company, Newfoundland Power, had a mediocre year in 2007 with 16% revenue growth due to flow-through of high energy supply costs and no earnings growth. Although Newfoundland Power had increased electricity sales, this was partially offset by a decrease in electricity rates due to a lower allowed ROE.

Higher average consumption due to cooler-than-normal weather conditions experienced on PEI and Ontario resulted in higher electricity sales for Maritime Electric and FortisOntario. However, in Ontario, the subsidiary lost a major industrial customer and another industrial customer temporarily shut down its operations. Therefore, this segment's revenues grew a modest 4% in 2007. Thanks to the one-time gain at FortisOntario and increased electricity sales and rates, this segment increased its earnings by 14%.

There are a few changes on the Caribbean operations of Fortis. In November 2006, Fortis acquired an additional 16% interest in Caribbean Utilities, bringing its total interest to 54%. Also, Fortis acquired two companies in the Turks and Caicos, and 2007 was the first year of ownership of Fortis Turks & Caicos and therefore a full year of consolidation of its financial results in the Company's 2007 year-end statements. The impacts of consolidating aside, higher electricity sales and lower finance charges at Belize Electricity were partially offset by the impact of stronger Canadian dollar and lower earnings in Caribbean Utilities.

On the generation front, revenues were lower due to decreased production (lower rainfall), partially offset by higher average wholesale energy prices in Ontario and the flow-through of increased energy supply-related costs in central Newfoundland. Earnings were lower primarily due to lower production.

Fortis Properties, on the other hand, had a very good year with 17% revenue growth and 26% earnings growth. The growth of the Company's hospitality operations in western Canada and favorable corporate tax adjustment contributed to the bright performance of this subsidiary.

Constituents of "the Corporation and Other" segment have changed this year. On top of the usual expense and revenue items not specifically related to any other reportable segment, interest on debt incurred directly by Terasen Inc. and the financial results of CWLP are also added. CWLP is a non-regulated shared-service business in which Terasen holds a 30% interest. Although the revenues for this group increased by 144%, it posted a loss of \$61 million mainly due to \$70 million in finance charges for the year.

Although the Company's EBITDA margin declined to 30% in 2007, its five-year average of this ratio (33%) is still comparable with its peers. Operating income in 2007 grew 52%, of which Terasen's growth accounted for 39%. This is an important ratio considering that one of Terasen's most profitable quarters (the first quarter) is not included in this figure. Seasonality is a factor in Terasen's earnings since the first and fourth quarters are the company's best quarters in terms of profitability.

In terms of its asset size, Fortis has almost doubled in the last years. Today the Company is seven times bigger than it was in 2000 and ten times bigger than it was a decade ago. Important additions to the Company's asset size include the Terasen acquisition in 2007, FortisAlberta and FortisBC in 2004, Caribbean expansion and acquisition of hospitality operations in 2006, and an hotel acquisition in 2007. Regulated assets constitute the majority of the Company's total assets.

In addition to strategic acquisitions, Fortis continuously invests in subsidiaries. The Company's capex budget averaged approximately 30% of its sales in the last five years. As the Company's strategy suggests, Fortis will continue to grow its principal business: ownership and operation of regulated utilities. The Company also keeps 15% - 25% of its assets in non-utility businesses. These businesses not only support its utility enterprises but also provide the Company flexibility in financial and tax planning that is not generally possible for utilities because of regulatory and public policy constraints.

As the Company forecasted in its 2008 capex budget, \$890 million will be spent for the subsidiaries as shown in the table below. Fortis expects to use approximately 50% of this budget for growth and 35% for ensuring continued and enhanced performance, reliability and safety of generation and transmission/distribution assets. The remaining 15% will be spent on the facilities and for equipment, vehicles, information systems, and other assets.

Gross Capex - 2007 and 2008 (Forecasted)								
(\$ million)	Terasen	FortisAlberta	FortisBC	NF Power	Other Reg (Canadian)	Regulated Caribbean	Non-Regulated	Total
2007	120	285	147	72	38	106	22	790
2008	250	264	136	53	38	101	48	890

Among the significant capital projects planned, TGI's liquefied natural gas (LNG) storage facility on Vancouver Island is expected to be completed by 2011 at a cost of \$175 - \$200 million. It will allow more efficient use of TGI's existing pipeline system and result in improved reliability and security of supply during system interruptions or in times of high demand. Construction is expected to begin in April 2008 based on conditional approval from BCUC in November 2007. Additionally, FortisAlberta, FortisBC and Fortis Generation have ongoing capital projects that are expected to be completed between 2009 and 2011.

Debt has always been a preferred form of financing for the Company, and accounts for almost 54% of total assets (preference shares excluded). The Company borrowed \$603 million under committed credit facilities and issued \$797 million of long-term debt in 2007. Fortis also assumed Terasen's consolidated debt, \$2.4 billion, as part of the acquisition. The debt-to-equity ratio has increased steadily to 2.03 from 1.59 over the last five years mainly due to the Company's financing strategy. Along with the increasing indebtedness, the interest coverage ratio of Fortis has been declining (1.81 for 2007), though it is still within an acceptable range.

Well-recognized debt rating agencies also agree on the Company's financial strength. DBRS rated Fortis at BBB (high) and S&P Rating Services confirmed it with A- (raised after the acquisition of Terasen).

The Company has a reputation for increasing dividends, which it has done for 35 consecutive years. The payout ratio for 2007 was 58.6%, which is above its peers. The average payout ratio for the last five years is 50%. In 2007, the Company issued 44.3 million common shares for gross proceeds of \$1.15 billion to finance part of the acquisition of Terasen. With this dilution, the EPS of the Company declined although the net income rose 31%.

Valuation

We have used three methods to value Fortis. The first is the Discounted Cash Flow (DCF) method. In order to estimate and discount the future cash flows of the Company, certain assumptions had to be made:

- 2008 will be another year of high growth for Fortis mainly due to the full-year consideration of Terasen's financials. Considering that one of Terasen's best quarters was not accounted for in the Fortis 2007 financials, most of the new growth will come from Terasen. Keeping other segments relatively conservative, we assumed that FortisAlberta and FortisBC would continue to take advantage of the economic growth and investments made previously. The Caribbean will be another growing segment of the Company. Overall, we assumed that total revenue will grow approximately 37% in 2008. From 2008 on, we assumed that the Company would grow by 6% over the long term. The loss of revenue from Ontario generation in 2009 is the only expected hiccup in the Company's estimated revenue stream, which is not expected to have a significant affect. This loss (of revenue and earnings) is expected to be partially offset by Vaca Hydroelectric generating facility being online in late 2009.
- We assumed that the operating margin of Fortis would gradually increase over the next five years. For 2008, our estimate is 21%.
- Our DCF scenario is based on the current status of the Company with an assumption of "no acquisition." Although this is highly unlikely, with no specific data on prospective acquisitions, this is the most conservative scenario.
- Our capex assumption is based on the Company's plan of \$4 billion in five years. Also, Fortis forecasts a budget of \$890 million for 2008 capital expenditures. We assume that Fortis would finance this budget 60% by debt.
- We calculated the weighted average cost of capital as 7% for the Company using its current borrowing rate and cost of equity derived from the CAPM run for Fortis.

We also used a Dividend Discount Model to determine a target value for Fortis. In this method, we used the same cost of equity that we derived for the DCF method. We assumed that the Company would keep its payout ratio unchanged for the next five years and after five years, the stable growth rate would settle at 3%.

The last method that we applied for the Company's valuation is Market Multiples. Selected multiples are P/E, P/S, P/BV and EBITDA Margin. The peer group consists of Canadian Utilities, Atco Ltd, Emera Inc., Epcor Power, Algonquin Power, Northland Power, and Transalta Corporation.

According to weighted average of these methods, we reached a target price of \$33.00.

Citadel Securities Estimates

Fortis Inc. is the largest investor-owned distribution utility in Canada, serving almost 2,000,000 gas and electric customers. Its regulated holdings include a natural gas utility in British Columbia and electric utilities in 5 Canadian provinces and 3 Caribbean countries. It owns non-regulated hydroelectric generation assets across Canada and in Belize and upper New York State. It also owns hotels & commercial real estate in Canada.

May 2, 2008
Good quarter boosted by Terasen

Fortis announced its Q1 financials for 2008. Revenue growth (y-o-y) was 137% mainly due to the contribution from Terasen (Terasen Gas Companies). The organic revenue growth was approximately 5% thanks to Fortis Alberta and Newfoundland Power.

Operating income of the Company increased 118% overall and 4% excluding the contribution of Terasen. Due to the nature of its business, Terasen's annual earnings is virtually created in the fourth and first quarter of the year. Fortis Alberta and Caribbean Utilities enjoyed growth in their earnings y-o-y. Due to quarterly shift in the distribution of annual purchased power expense, earnings of Newfoundland Power will be lower in the first and fourth quarters and higher in the second and third quarters of 2008 as compared to the same periods in 2007. Annual earnings of Newfoundland Power will not be affected from this shift.

The table below presents the quarterly highlights of the segments:

(\$ million)	Operating Revenues		Operating Income	
	Q1/2008	Q1/2007	Q1/2008	Q1/2007
Terasen	635	na	113	na
Fortis Alberta	73	64	20	17
Fortis BC	66	64	20	20
NF Power	164	154	18	24
Other Canadian	70	70	10	11
Electric Caribbean	75	77	17	9
Fortis Generation	19	21	11	12
Fortis Properties	45	40	10	9
Corporate & Other	7	3	1	-
Intersegment Elimination	(8)	(10)	(4)	(3)
Consolidated	1,146	483	216	99

Announced Q1 EPS of \$0.58 is in line with our annual estimates. Our target price for the Company is \$33.00 (unchanged) and recommendation is "Outperform" (unchanged).

Terasen

As the largest investor-owned distribution utility in Canada, Fortis has been increasing its presence and its revenue by mostly acquisitions. The Company acquired Terasen Gas Companies (Terasen) for \$3.7 million on May 17, 2007. The acquisition has been accretive to the Company as expected. Due to the nature of its business, Terasen's earnings are created in the fourth and first quarters of the year. Therefore Q1/2008 was a supergrowth quarter for the overall financials of Fortis.

Recent Developments

As for the 2008 allowed rates of return on common shareholders' equity for Terasen, Fortis Alberta, Fortis BC and Newfoundland Power, they have been set at 8.62 per cent, 8.75 per cent, 9.02 per cent and 8.95 per cent, respectively. Also in February 2008, Fortis Alberta received regulatory approval of a Negotiated Settlement Agreement for its 2008 and 2009 electricity rates. Caribbean Utilities was granted a new exclusive 20-year transmission and distribution licence and a new non-exclusive 21.5 year generation licence by the Government of Cayman Islands in April 2008.

Cash Flow and capex

The Company's operating cash flow was also more than doubled by the increase in its earnings. Fortis is planning to spend \$4 billion for capital expenditures in five years including 2008. Also, Fortis forecasts a budget of \$890 million for 2008 capital expenditures. The Company spent \$162 million for utility capital expenditures in Q1/2008.

Segments

Fortis Alberta continued to be one of the high performers in this quarter. Energy deliveries increased by 4.9% q-o-q and the company enjoyed both customer growth and increase in distribution rate. Although these are offset by lower tax recoveries (driven by a decline in deductions taken for a tax purposes compared to accounting purposes), higher labour and employee benefit costs and increased amortization costs, Fortis Alberta managed to increase its operating earnings while having slightly less net earnings.

Newfoundland Power also enjoyed the increase in electricity sales as well as the average increase in customer rates. However, due to the quarterly shift in distribution, the company's earnings were lower. Under the regulated rate structure, annual purchased power expense per kilowatt hour is higher in the winter months and lower in the summer months. Although annual earnings will not be impacted by this shift, Newfoundland Power will post lower earnings in the first and fourth quarters and higher in the second and third quarters of 2008 as compared to the same period in 2007.

Other Canadian Electric Utilities, which include Maritime Electric and FortisOntario, had lower revenues mainly due to the lower average consumption as a result of warmer-than-normal weather conditions in Ontario. The comparison also shows the impacts of the loss of a major industrial customer and a temporary shutdown of operations of another industrial customer in Ontario.

Caribbean Utilities had 7.1% increase in electricity sales; however, the revenues were affected by foreign exchange associated with the translation of foreign-currency dominated revenue - by \$12 million. Excluding this unfavorable impact, revenues increased by \$10 million quarter over quarter. Caribbean Utilities also enjoyed higher earnings partially offset by increased finance charges, amortization costs and unfavorable foreign exchange impact.

Fortis Generation experienced a decline in its revenues and earnings mainly due to the lower production, reduced average wholesale energy prices per MWh in Ontario and unfavorable impact of foreign exchange. On the other hand, Fortis Properties had a good quarter with increased revenues and earnings boosted by the acquisition of Delta Regina.

Valuation

We have initiated coverage on Fortis on Feb 25, 2008. Here are the assumptions we presented in our initial report:

2008 will be another year of high growth for Fortis mainly due to the full-year consideration of Terasen's financials. Considering that one of Terasen's best quarters was not accounted for in the Fortis 2007 financials, most of the new growth will come from Terasen. Keeping other segments relatively conservative, we assumed that FortisAlberta and FortisBC would continue to take advantage of the economic growth and investments made previously. The Caribbean will be another growing segment of the Company. Overall, we assumed that total revenue will grow approximately 37% in 2008. From 2008 on, we assumed that the Company would grow by 6% over the long term. The loss of revenue from Ontario generation in 2009 is the only expected hiccup in the Company's estimated revenue stream, which is not expected to have a significant affect. This loss (of revenue and earnings) is expected to be partially offset by Vaca Hydroelectric generating facility being online in late 2009.

- We assumed that the operating margin of Fortis would gradually increase over the next five years. For 2008, our estimate is 21%.
- Our DCF scenario is based on the current status of the Company with an assumption of "no acquisition." Although this is highly unlikely, with no specific data on prospective acquisitions, this is the most conservative scenario.
- Our capex assumption is based on the Company's plan of \$4 billion in five years. Also, Fortis forecasts a budget of \$890 million for 2008 capital expenditures. We assume that Fortis would finance this budget 60% by debt.
- We calculated the weighted average cost of capital as 7% for the Company using its current borrowing rate and cost of equity derived from the CAPM run for Fortis.

We do not see any reasons to change our assumptions that provided the base for our DCF valuation. We also used a Dividend Discount Model to determine the target value of Fortis. In this method, we used the same cost of equity that we derived for the DCF method. We assumed that the Company would keep its payout ratio unchanged for the next five years and after five years, the stable growth rate would settle at 3%.

The last method that we applied for the Company's valuation is Market Multiples. Selected multiples are P/E, P/S, P/BV and EBITDA Margin. The peer group consists of Canadian Utilities, Atco Ltd, Emera Inc., Epcor Power, Algonquin Power, Northland Power, and Transalta Corporation.

According to weighted average of these methods, we keep our target price of \$33.00 for the Company. We think that Fortis is a well-managed, dynamic utility company with significant upside growth potential as well as attractive income-portfolio staple with its increased dividends.

August 12, 2008
Solid and growing

Fortis announced its 1H financials for 2008. Revenue growth (y-o-y) was 90% mainly due to the contribution from Terasen (Terasen Gas Companies). Since the acquisition of Terasen was completed on May 17, 2007, its revenues are only partially included in the half year financials of 2007. Like in the first quarter, revenue growth excluding Terasen was 5% for the first half of this year.

Operating Income of the Company increased 19% q-o-q and 63% y-o-y. EPS for the first half is \$0.77 as compared to \$0.69 of the same period last year. This result includes \$13 million (\$0.08 per common share) charge for the 70% share of the previously incurred fuel and purchase power costs being disallowed at Belize Electricity and a one-time charge of approximately \$2 million at FortisOntario associated with the repayment of interconnection agreement amounts received in the fourth quarter of 2007.

The table below presents the quarterly highlights of the segments:

(\$ million)	Operating Revenues		Operating Income	
	Q2/2008	Q2/2007	Q2/2008	Q2/2007
Terasen*	1,025	130	160	17
Fortis Alberta	148	132	42	36
Fortis BC	119	115	36	33
NF Power	284	269	43	43
Other Canadian	131	135	19	22
Electric Caribbean	153	151	11	24
Fortis Generation	41	39	24	22
Fortis Properties	99	87	26	24
Corporate & Other	12	8	2	3
Intersegment Elimination	(18)	(17)	(6)	(5)
Consolidated	1,994	1,049	357	219

* The Terasen Gas companies were acquired on May 17, 2007.

Announced 1H EPS of \$0.77 is in line with our annual estimates. Our target price for the Company and recommendation remain same as previous.

Recent Developments

The Public Utilities Commission (PUC) of Belize denied any average rate increase and ordered a BZ36 million retroactive adjustment associated with the disallowance of previously incurred fuel and purchased power costs. The PUC also reduced Belize Electricity's target allowed ROA to 10% from 12%. As a result of the Final Decision, Belize Electricity recorded an \$18 million charge (\$13 million of which is the share of Fortis) to energy supply costs during the Q2/2008. Belize Electricity filed an application for judicial review and appeal of the Final Decision with the Supreme Court of Belize on July 25, 2008.

In May, the Company completed a public offering of 8,000,000 Series G First Preference Shares at a price of \$25.00 per share for gross proceeds of \$200 million. The Company will use this funds to repay \$170 million of debt, which was incurred to fund a portion of the acquisition of Terasen and the acquisition of the Delta Regina Hotel in 2007.

Segments

Fortis Alberta continued to be one of the high performers in this quarter as well. Energy deliveries increased by 4.1% y-o-y and the company enjoyed increased energy demand attributable to customer growth. However this revenue growth was offset by lower tax recoveries, higher labour and employee benefit costs and increased amortization costs. Therefore earnings were \$9 million lower ytd compared to the same period last year.

Newfoundland Power also enjoyed the increase in electricity sales as well as the average increase in customer rates. However, due to the quarterly shift in distribution, the company's earnings were \$3 million lower ytd compared to the same period last year. Excluding this impact, the earnings of Newfoundland Power is slightly higher comparatively to 1H/2007

The revenues were lower in Other Canadian Electric Utilities, which include Maritime Electric and FortisOntario mainly due to the lower average consumption as a result of warmer-than-normal weather conditions in Ontario and an unscheduled maintenance outage by a large customer at Maritime Electric.

Fortis Generation experienced an increase in its revenues by 5% and earnings by 8% mainly due to the higher production in central Newfoundland during the second quarter of 2008 as a result of higher rainfall.

Fortis Properties increased its revenues by 14% ytd comparatively to 1H/2007 both through the acquisitions of 2007 and growth in rates and business. Revenue per available room for Q2/2008 was \$87.54 compared to \$82.11 for Q2/2007.

Valuation and Recommendation

Fortis remains to be a one of our picks due to its strategy and its execution. In addition to the fact that Fortis operates in a defensive industry, it also positions itself for more growth through possible acquisitions and organically to increase the shareholder value. The announced results are in line with our annual estimates. Therefore we keep our target price and recommendation unchanged.

It owns non-regulated hydroelectric generation assets across Canada and in Belize and upper New York State. It also owns hotels & commercial real estate in Canada.

November 3, 2008
Q3 Earnings Update

Fortis announced its Q3 financials for 2008. Revenue growth (y-o-y) was 60% partially due to the contribution from Terasen (Terasen Gas Companies). Quarter-over-quarter increase in revenue for the third quarter was 12% as compared to Q3 2007. Highest percentage revenue increase in the group belonged to Fortis Generation (24%). Caribbean segment followed it with 21% and Terasen's increase was right behind them as 19%.

Operating Income of the Company increased 44% y-o-y and 12% y-o-y. EPS for the first three quarters is \$1.08 as compared to \$0.86 of the same period last year. These results include a tax reduction of approximately \$7.5 million associated with the settlement of historical tax matters at Terasen. This effect added \$0.05 to the Basic EPS of the Company.

The table below presents the highlights of the segments:

(\$ million)	Operating Revenues		Operating Income

* The Terasen Gas companies were acquired on May 17, 2007.

Announced Q3 EPS of \$1.08 is in line with our annual estimates. Our target price for the Company and recommendation remain same as previous.

Recent Developments

In early September, Hurricane Ike struck the Turks and Caicos Islands. Although the Company's distribution system was damaged, there was not a significant damage to the utility's generating facilities. The hurricane's damage caused a reduction of \$1 million in the Q3 earnings due to a loss of revenue at Fortis Turks and Caicos. Since the large portion of the costs associated with re-connecting customers and restoring electricity service were capital in nature, these did not affect earnings. The company has business interruption insurance with a 30-day deductible period and is in the preliminary stage of determining its business interruption insurance claim.

The British Columbia Utilities Commission (BCUC) approved FortisBC's Okanagan Transmission Reinforcement project application in early October. FortisBC anticipates that construction activity for the \$141 million project will begin in the spring of 2009 and anticipates project completion in 2011. With this project, the company plans to upgrade the existing overhead transmission lines from 161kV to 230kV from Vaseux Lake south to Oliver, and Vaseux Lake north to Penticton, and the addition of a 230kV from Vaseux Lake north to Penticton. The plan also includes the construction of a new electrical substation in Oliver east of the current station, and modifications to the current Oliver substation as well as the Vaseux and RG Anderson substations.

Segments

Terasen, contributing the highest share (48%) in the revenues of Fortis, increased its revenues by 19% q-o-q mainly due to increased consumption, higher gas commodity costs charged to customers and increase in gas distribution rates. On the earnings side, the settlement between Terasen and Revenu Quebec and Canada Revenue Agency was reached. As a result, Terasen Gas Companies recorded an approximate \$5.5 million tax reduction in the third quarter of 2008. Excluding the tax reduction, the Terasen Gas Companies incurred a loss of approximately \$4.5 million in the third quarter, as a normal course of its seasonal business.

FortisAlberta increased its revenues by 6% mainly due to a 6.8% increase in customer distribution rates. Bottomline earnings of the company is lower due to lower future income tax recoveries, higher operating expenses and increased amortization costs and finance charges - stemming from the company's significant capital expenditure program and related borrowing facilities.

FortisBC's revenues slightly declined by a percentage point due to the impact of reduced industrial customer loads. This was partially offset by residential, general service and wholesale customer growth primarily in the Okanagan region. The company enjoyed lower energy supply costs although this was partially offset by higher amortization resulting from the company's capital expenditure program.

Newfoundland Power and Other Canadian Electric Utilities had also enjoyed moderate growths in their revenues, 6% and 5% respectively. although it was tempered by the loss of electricity sales at Fortis Turks and Caicos as a result of Hurricane Ike in early September, Caribbean segment recorded 21% growth in its revenue for the quarter. The increases were mainly due to customer growth, higher average usage associated with increased air conditioning load, and the impact of general economic growth.

Due to the higher production, increased average wholesale energy prices per MWh in Ontario and in upper New York State, Fortis Generation increased its revenues by 24% as compared to the same period in 2007. Fortis Properties enjoyed a slight revenue growth (4%) reflecting revenue contribution from the Delta Regina, acquired on August 1, 2007 and improved performance at Fortis Properties' hospitality operations in Atlantic Canada.

Valuation and Recommendation

Fortis remains to be a one of our picks due to its strategy and its execution. In addition to the fact that Fortis operates in a defensive industry, it also positions itself for more growth through possible acquisitions and organically to increase the shareholder value. The announced results are in line with our annual estimates. Therefore we keep our target price and recommendation unchanged.

Citadel Securities Estimates

Fortis Inc. is the largest investor-owned distribution utility in Canada, serving almost 2,000,000 gas and electric customers. Its regulated holdings include a natural gas utility in British Columbia and electric utilities in 5 Canadian provinces and 3 Caribbean countries. It owns non-regulated hydroelectric generation assets across Canada and in Belize and upper New York State. It also owns hotels & commercial real estate in Canada.

May 5, 2009
2009 Q1 Earnings Update

Fortis announced its first quarter financials for 2009. Revenue growth (q-o-q) was 4.8%. Highest percentage revenue increase in the group belonged to the Caribbean segment (11%) followed by Fortis BC (9%) and Fortis Alberta (8%). Favorable result in the Caribbean segment is mainly due to the foreign exchange impact (of the strengthening US dollar against the Canadian dollar) and the one-time recording of \$1 million of favorable appeal judgment at Fortis Turks and Caicos related to a customer rate classification matter. The revenue increase in Fortis BC was driven by the increase in electricity sales and electricity sales growth. Fortis Alberta also benefited from the customer distribution rates and the favorable impact of load and customer growth.

Operating Income of the Company declined 2.3% q-o-q. EPS for the quarter is \$0.54 as compared to \$0.58 of the same quarter of 2008.

The table below presents the highlights of the segments:

(\$ million)	Operating Revenues		Operating Income	
	Q1/2009	Q1/2008	Q1/2009	Q1/2008
Terasen	669	635	109	113
Fortis Alberta	79	73	23	20
Fortis BC	72	66	23	20
NF Power	169	164	17	18
Other Canadian	70	70	12	10
Electric Caribbean	83	75	12	17
Fortis Generation	16	19	9	11
Fortis Properties	47	45	9	10
Corporate & Other	7	7	2	1
Intersegment Elimination	(11)	(8)	(5)	(4)
Consolidated	1,201	1,146	211	216

We kept our target price (\$28.00) and our recommendation unchanged.

Recent Developments

In December 2008, Fortis issued 11,700,000 Common Shares at a price of \$25.65 per share for gross proceeds to the Corporation of \$300,105,000. The net proceeds of the offering is used mainly to repay \$200 million of debt of Terasen and for general corporate purposes.

In April 2009, Fortis Properties acquired a hotel in Ontario. Fortis paid \$7 million for the 214-room Holiday Inn Select in Windsor. With that acquisition, Fortis Properties owns 21 hotels with more than 4,000 rooms in eight Canadian provinces in addition to approximately 2.8 million square feet of commercial real estate primarily in Atlantic Canada.

Segments

Terasen, contributing the highest share (56%) in the revenues of Fortis in the first quarter of 2009, increased its revenues by 5% q-o-q mainly due to increased residential consumption and higher basic customer delivery rates compared to the same quarter in 2008. Earnings of Terasen were comparable q-o-q.

FortisAlberta increased its revenues by 8% q-o-q mainly due to an 8.6% increase in customer distribution rates, effective January 1, 2009, and the impact of customer and load growth. The earnings of Fortis Alberta were slightly higher q-o-q due to the increase in customer distribution rates and load and customer growth, although these were partially offset by the increased operating expenses, amortization costs and finance charges.

FortisBC's revenues increased by 9% q-o-q. The increase was driven by a 4.6% increase in electricity rates, effective January 1, 2009, and the electricity sales growth. The Company's earnings were \$2 million higher q-o-q due to the impact of the increase in electricity rates and customer growth. These, however, were partially offset by higher energy supply costs, operating expenses and amortization costs.

Newfoundland Power's revenues were 3% higher q-o-q driven by electricity sales growth. The Company's earnings were comparable q-o-q. The impact of electricity sales growth was offset largely by the impact of higher demand charges from Newfoundland and Labrador Hydro Corporation, associated with meeting peak load requirements during the winter season, and increased amortization costs associated with continued capital investment in capital assets.

Although the highest percentage revenue growth in the group came from the Caribbean Utilities, it was mainly the favorable impact of the foreign exchange and one-time recording of a rate classification matter. Otherwise, the electricity sales declined due to cooler-than-normal weather conditions combined with the unfavorable impacts of global economic conditions in tourism, oil, construction and related industries.

Fortis Generation's revenue for the quarter declined by 16% q-o-q. This is mainly due to the inclusion of energy sales associated with the generation operations in Central Newfoundland for only 1 1/2 months as compared to a full quarter in 2008. The Company changed to the equity method of accounting for these operations in February 2009. This decision was as a result of the expropriation of Newfoundland base assets of AbitibiBowater Inc. by the government of Newfoundland and Labrador.

Valuation and Recommendation

Fortis remains to be a one of our picks due to its strategy and its execution. In addition to the fact that Fortis operates in a defensive industry, it also positions itself for more growth through possible acquisitions and organically to increase the shareholder value. The announced results are in line with our annual estimates. Our recommendation and target price remain unchanged.

It owns non-regulated hydroelectric generation assets across Canada and in Belize and upper New York State. It also owns hotels & commercial real estate in Canada.

August 7, 2009
2009 Q2 Earnings Update

Fortis announced its second quarter financials for 2009. Revenues declined 11% as compared to Q2/2008. Being the largest contributor to the Company's total revenues, Terasen recorded \$101 million lower revenue than Q2/2008. The decline was driven by lower gas volume consumption and lower commodity costs charged to customers. In addition, Fortis Generation experienced a decline in revenues of approximately \$13 million as compared to the same period last year. This is mainly due to the expiry of the power-for-water exchange agreement related to the Rankine hydroelectric generating facility in Ontario and a change in the accounting method for central Newfoundland operations in 2009.

Despite the decline in revenues, the Company managed to increase its Net income from \$29 million (Q2/2008) to \$53 million in Q2/2009. The EPS of the Company for the quarter is recorded as \$0.31 per share as compared to \$0.19 of the same period last year. The improvement has also reflected on the year-to-date EPS of \$0.85 (\$0.77 in the first half of 2008) This improvement in the earnings is mainly due to the lower corporate taxes and financing charges in the Company's various subsidiaries.

The table below presents the highlights of the segments:

(\$ million)	Operating Revenues		Operating Income	
	Q2/2009	Q2/2008	Q2/2009	Q2/2008
Terasen	289	390	45	47
Fortis Alberta	81	75	27	21
Fortis BC	55	53	16	16

Intersegment Elimination	(9)	(10)	(3)	(2)
Consolidated	754	848	156	141

We increased our target price from \$28.00 to \$30.00 and kept our recommendation unchanged.

Recent Developments

In December 2008, Fortis issued 11,700,000 Common Shares at a price of \$25.65 per share for gross proceeds to the Corporation of \$300,105,000. The net proceeds of the offering is used mainly to repay \$200 million of debt of Terasen and for general corporate purposes.

In April 2009, Fortis Properties acquired a hotel in Ontario. Fortis paid \$7 million for the 214-room Holiday Inn Select in Windsor. With that acquisition, Fortis Properties owns 21 hotels with more than 4,000 rooms in eight Canadian provinces in addition to approximately 2.8 million square feet of commercial real estate primarily in Atlantic Canada.

In June 2009, FortisOntario acquired a 10% interest in Grimsby Power Inc. (Grimsby) for approximately \$1 million. Grimsby is an electric distribution utility serving approximately 10,000 customers in a service territory in close proximity to FortisOntario's operations in Fort Eerie. Also in June 2009, FortisOntario entered into an agreement to acquire Great Lakes Power Distribution Inc., an electric distribution utility serving approximately 12,000 customers in the district of Algoma in northern Ontario, for approximately \$68 million, subject to adjustment and customary regulatory approvals.

Segments

Terasen, contributing the highest share (38%) in the revenues of Fortis in the first quarter of 2009, had a decline in its revenues by 26% y-o-y mainly due to lower gas volumes sold and lower commodity costs charged. Earnings of Terasen, on the other hand, were \$2 million higher y-o-y due to a lower effective corporate income tax rate, lower finance charges related to decreased borrowing and higher basic customer delivery rates, partially offset by increased amortization costs associated with continued investment in capital assets. In February 2009, Terasen issued 30-year \$100 million 6.55% unsecured debentures.

FortisAlberta increased its revenues by 8% y-o-y mainly due to an 8.6% increase in customer distribution rates, effective January 1, 2009, and the impact of customer and load growth. The earnings of Fortis Alberta were \$10 million higher y-o-y due to lower corporate income taxes and the impact of the increase in customer distribution rates and load and customer growth, although these were partially offset by the increased operating expenses, amortization costs and finance charges. In February 2009, FortisAlberta issued 30-year \$100 million 7.06% unsecured debentures.

FortisBC's revenues increased by 4% as compared to the same quarter in 2008. The increase was driven by a 4.6% increase in electricity rates, effective January 1, 2009, and the electricity sales growth. The Company's earnings were comparable with Q2/2008. In June 2009, FortisBC issued 30-year \$105 million 6.10% unsecured debentures, under a short-form base shelf prospectus filed in May 2009 for the issuance of up to \$300 million in debentures from time to time during the 25-month life of the shelf prospectus.

Newfoundland Power's revenues were \$1 million lower y-o-y driven by lower average consumption in the quarter and lower amortization to revenue of certain regulatory liabilities. Earnings, on the other hand, were \$1 million higher due to lower amortization costs, driven by a change in the quarterly allocation of these costs, the impact of a lower corporate income tax rate and a gain on the sale of property, partially offset by the impact of decreased electricity sales for the quarter. In May 2009, Newfoundland Power privately placed 30-year \$65 million 6.606% first mortgage sinking fund bonds.

For the **Other Canadian Electric Utilities**, revenues for the quarter increased \$2 million y-o-y. This is mainly due to the impact of an approximate \$3 million (\$2 million after tax) one-time charge at FortisOntario. The impact of lower electricity sales and the flow through to customers of low energy supply costs at FortisOntario was partially offset by the impact of an average 5.3% increase in customer electricity rates at Maritime Electric, effective April 1, 2009. Earnings were \$2 million higher y-o-y and comparable excluding the one-time charge at FortisOntario.

Revenues of the **Caribbean Regulated Electric Utilities** for Q2/2009 increased \$4 million y-o-y. This is mainly due to the favorable impact of the translation of foreign-currency denominated revenue. Excluding this impact, revenues decreased approximately \$5 million y-o-y. Although the electricity sales increased, cost of power component of the average electricity rate at Belize Electricity increased and basic electricity rates at Caribbean Utilities increased by 2.4% effective June 1, 2009, this segment suffered from declines due to the flow through to customers of lower energy supply costs at Caribbean Utilities, a decrease in value-added delivery component of the average electricity rate at Belize Electricity and a change in methodology at Belize Electricity for recording customer installation fees. Earnings of this segment increased by \$12 million y-o-y, mainly due to the one-time charge in the second quarter of 2008. Caribbean Utilities privately placed 15-year US\$40 million 7.50% senior unsecured notes with US\$30 million placed in May 2009 and US\$10 million placed in July 2009.

Revenues of **Fortis Generation** for Q2/2009 were \$13 million lower as compared to the same period in 2008. The main factors of this decline were the loss of revenue subsequent to the expiry of the power-for-water exchange agreement related to the Rankine hydroelectric generating facility, the impact of changing to the equity method of accounting for the financial results of the hydroelectric generation operations in central Newfoundland during the first quarter of 2009, lower average wholesale market energy prices per megawatt hour in Ontario and Upper New York State, partially offset by the impact of increased production in Belize. Earnings for the quarter were also \$4 million lower y-o-y.

Fortis Properties enjoyed higher revenues (\$3 million) as compared to the same period last year mainly driven by revenue contribution from Sheraton Hotel Newfoundland, which was acquired in November 2008, and the 214-room Holiday Inn Select in Windsor, Ontario, which was acquired in April 2009. Earnings of this segment were \$1 million higher y-o-y, driven by increased contribution from the Real Estate Division combined with lower corporate operating expenses, partially offset by lower contribution from the Hospitality Division mainly caused by lower hotel occupancies.

Valuation and Recommendation

Fortis remains to be a one of our picks due to its strategy and its execution. In addition to the fact that Fortis operates in a defensive industry, it also positions itself for more growth through possible acquisitions and organically to increase the shareholder value. The announced results are in line with our annual estimates. Due to the change in market multiples, we revised our target price to \$30.00 (previously \$28.00) while keeping our recommendation unchanged.

Fortis Inc.

FTS.TO

Revising Estimates and Introducing 2007

- Fortis reported normalized EPS of \$0.26 and \$1.21 for the quarter and for full year 2005. This compares to our estimates of \$0.32 and \$1.28.
- Operating expenses at FortisAlberta, FortisBC and at the corporate level were greater than we had anticipated. As a result we have brought our 2006E earnings estimates down from \$1.42 to \$1.25 to reflect greater anticipated operating costs.
- We are also introducing our 2007E EPS estimate of \$1.33.
- We contend that growth at Fortis will resume in 2007 driven in part by rate base additions at FortisAlberta and FortisBC of approximately \$590 million in 2006 and 2007.
- We are also expecting continued strong performance from Forts Generation and FTS Properties.
- Our target price of \$27.00 and 2006E earnings estimate of \$1.25 imply a 21.6x P/E multiple. Given that Canadian pipeline and utilities trade at an average of 20x 2006E earnings, we don't believe it would be a stretch for Fortis to trade in this range.
- We reiterate our Outperform rating on Fortis and maintain our target price of \$27.00

Fortis's core strength is distribution and transmission of electricity. Fortis operates in 7 regulated jurisdictions across Canada and the Caribbean. Approximately 83% of Fortis's \$2.2 billion in assets (pre-Aquila acquisition of \$1.3 billion) is regulated

Important Global Disclosures

I, Dominique Barker, CA, CFA, certify that (1) the views expressed in this report accurately reflect my personal views about all of the subject companies and securities and (2) no part of my compensation was, is or will be directly or indirectly related to the specific recommendations or views expressed in this report.

See the Companies Mentioned section for full company names.

3-Year Price, Target Price and Rating Change History Chart for FTS.TO

FTS.TO Date	Closing Price Price (CAD)	Target Price Price (CAD)	Rating	Initiation/ Assumption
6/2/04	15	17.5	OUTPERFORM	X
2/9/05	18.653	19.25		
8/5/05	20.85	21		
9/28/05	23.688	23.75		
11/14/05	23.4	27		

The analyst(s) responsible for preparing this research report received compensation that is based upon various factors including Credit Suisse's total revenues, a portion of which are generated by Credit Suisse's investment banking activities.

Analysts' stock ratings are defined as follows***:

Outperform: The stock's total return is expected to exceed the industry average* by at least 10-15% (or more, depending on perceived risk) over the next 12 months.

Neutral: The stock's total return is expected to be in line with the industry average* (range of $\pm 10\%$) over the next 12 months.

Underperform:** The stock's total return is expected to underperform the industry average* by 10-15% or more over the next 12 months.

**The industry average refers to the average total return of the analyst's industry coverage universe (except with respect to Asia/Pacific, Latin America and Emerging Markets, where stock ratings are relative to the relevant country index, and Credit Suisse Small and Mid-Cap Advisor stocks, where stock ratings are relative to the regional Credit Suisse Small and Mid-Cap Advisor investment universe.*

***In an effort to achieve a more balanced distribution of stock ratings, the Firm has requested that analysts maintain at least 15% of their rated coverage universe as Underperform. This guideline is subject to change depending on several factors, including general market conditions.*

****For Australian and New Zealand stocks a 7.5% threshold replaces the 10% level in all three rating definitions.*

Restricted: In certain circumstances, Credit Suisse policy and/or applicable law and regulations preclude certain types of communications, including an investment recommendation, during the course of Credit Suisse's engagement in an investment banking transaction and in certain other circumstances.

Volatility Indicator [V]: A stock is defined as volatile if the stock price has moved up or down by 20% or more in a month in at least 8 of the past 24 months or the analyst expects significant volatility going forward. All Credit Suisse Small and Mid-Cap Advisor stocks are automatically rated volatile. All IPO stocks are automatically rated volatile within the first 12 months of trading.

Analysts' coverage universe weightings* are distinct from analysts' stock ratings and are based on the expected performance of an analyst's coverage universe versus the relevant broad market benchmark***:**

Overweight: Industry expected to outperform the relevant broad market benchmark over the next 12 months.

Market Weight: Industry expected to perform in-line with the relevant broad market benchmark over the next 12 months.

Underweight: Industry expected to underperform the relevant broad market benchmark over the next 12 months.

**Credit Suisse Small and Mid-Cap Advisor stocks do not have coverage universe weightings.*

***An analyst's coverage universe consists of all companies covered by the analyst within the relevant sector.*

****The broad market benchmark is based on the expected return of the local market index (e.g., the S&P 500 in the U.S.) over the next 12 months.*

Credit Suisse's distribution of stock ratings (and banking clients) is:

Global Ratings Distribution		
Outperform/Buy*	39%	(65% banking clients)
Neutral/Hold*	45%	(61% banking clients)
Underperform/Sell*	14%	(48% banking clients)
Restricted	2%	

**For purposes of the NYSE and NASD ratings distribution disclosure requirements, our stock ratings of Outperform, Neutral, and Underperform most closely correspond to Buy, Hold, and Sell, respectively; however, the meanings are not the same, as our stock ratings are determined on a relative basis. (Please refer to definitions above.) An investor's decision to buy or sell a security should be based on investment objectives, current holdings, and other individual factors.*

Credit Suisse's policy is to update research reports as it deems appropriate, based on developments with the subject company, the sector or the market that may have a material impact on the research views or opinions stated herein.

Credit Suisse's policy is only to publish investment research that is impartial, independent, clear, fair and not misleading. For more detail please refer to Credit Suisse's Policies for Managing Conflicts of Interest in connection with Investment Research:

Credit Suisse does not provide any tax advice. Any statement herein regarding any US federal tax is not intended or written to be used, and cannot be used, by any taxpayer for the purposes of avoiding any penalties.

See the Companies Mentioned section for full company names.

Price Target: (12 months) for (FTS.TO)

Method: Primarily dividend yield versus the 10-year government of Canada forecast bond yield, where we divide the expected dividend of \$0.64 by 70% of the 10-Year Government of Canada Bond Yield of 4.21%. We also look at valuation multiples including (i) Enterprise Value to EBITDA (EV/EBITDA) of 9.4x, (ii) Price to Earnings (P/E) of 22.0x and (iii) Price to Cash Flow (P/CF) of 8.0x. We base our \$27.00 target price for Fortis represents an average of these methodologies.

Risks: Risks to our \$27 price target for Fortis include Aquila integration risk, financing risk and risk of equity issues, regulatory risk, international risk, outstanding lawsuit with EPCOR

See the Companies Mentioned section for full company names.

The subject company (FTS.TO) currently is, or was during the 12-month period preceding the date of distribution of this report, a client of Credit Suisse.

Credit Suisse provided non-investment banking services, which may include Sales and Trading services, to the subject company (FTS.TO) within the past 12 months.

Credit Suisse expects to receive or intends to seek investment banking related compensation from the subject company (FTS.TO) within the next 3 months.

Credit Suisse has received compensation for products and services other than investment banking services from the subject company (FTS.TO) within the past 12 months.

Important Regional Disclosures

The analyst(s) involved in the preparation of this report have not visited the material operations of the subject company (FTS.TO) within the past 12 months.

Restrictions on certain Canadian securities are indicated by the following abbreviations: NVS--Non-Voting shares; RVS--Restricted Voting Shares; SVS--Subordinate Voting Shares.

Individuals receiving this report from a Canadian investment dealer that is not affiliated with Credit Suisse should be advised that this report may not contain regulatory disclosures the non-affiliated Canadian investment dealer would be required to make if this were its own report.

For Credit Suisse Securities (Canada), Inc.'s policies and procedures regarding the dissemination of equity research, please visit http://www.csfb.com/legal_terms/canada_research_policy.shtml.

As of the date of this report, Credit Suisse acts as a market maker or liquidity provider in the equities securities that are the subject of this report.

Disclaimers continue on next page.

Disclaimers

References in this report to Credit Suisse or CS include all of the subsidiaries and affiliates of Credit Suisse, a Swiss bank, operating under its investment banking division. For more information on our structure, please follow the below link: http://www.creditsuisse.com/en/who_we_are/ourstructure.html.

This report is not directed to, or intended for distribution to or use by, any person or entity who is a citizen or resident of or located in any locality, state, country or other jurisdiction where such distribution, publication, availability or use would be contrary to law or regulation or which would subject Credit Suisse, the Swiss bank, or its subsidiaries or its affiliates ("CS") to any registration or licensing requirement within such jurisdiction. All material presented in this report, unless specifically indicated otherwise, is under copyright to CS. None of the material, nor its content, nor any copy of it, may be altered in any way, transmitted to, copied or distributed to any other party, without the prior express written permission of CS. All trademarks, service marks and logos used in this report are trademarks or service marks or registered trademarks or service marks of CS or its affiliates.

The information, tools and material presented in this report are provided to you for information purposes only and are not to be used or considered as an offer or the solicitation of an offer to sell or to buy or subscribe for securities or other financial instruments. CS may not have taken any steps to ensure that the securities referred to in this report are suitable for any particular investor. CS will not treat recipients as its customers by virtue of their receiving the report. The investments or services contained or referred to in this report may not be suitable for you and it is recommended that you consult an independent investment advisor if you are in doubt about such investments or investment services. Nothing in this report constitutes investment, legal, accounting or tax advice or a representation that any investment or strategy is suitable or appropriate to your individual circumstances or otherwise constitutes a personal recommendation to you. CS does not offer advice on the tax consequences of investment and you are advised to contact an independent tax adviser. Please note in particular that the bases and levels of taxation may change.

CS believes the information and opinions in the Disclosure Appendix of this report are accurate and complete. Information and opinions presented in the other sections of the report were obtained or derived from sources CS believes are reliable, but CS makes no representations as to their accuracy or completeness. Additional information is available upon request. CS accepts no liability for loss arising from the use of the material presented in this report, except that this exclusion of liability does not apply to the extent that liability arises under specific statutes or regulations applicable to CS. This report is not to be relied upon in substitution for the exercise of independent judgment. CS may have issued, and may in the future issue, a trading call regarding this security. Trading calls are short term trading opportunities based on market events and catalysts, while stock ratings reflect investment recommendations based on expected total return over a 12-month period relative to the relevant coverage universe. Because trading calls and stock ratings reflect different assumptions and analytical methods, trading calls may differ directionally from the stock rating. In addition, CS may have issued, and may in the future issue, other reports that are inconsistent with, and reach different conclusions from, the information presented in this report. Those reports reflect the different assumptions, views and analytical methods of the analysts who prepared them and CS is under no obligation to ensure that such other reports are brought to the attention of any recipient of this report. CS is involved in many businesses that relate to companies mentioned in this report. These businesses include specialized trading, risk arbitrage, market making, and other proprietary trading.

Past performance should not be taken as an indication or guarantee of future performance, and no representation or warranty, express or implied, is made regarding future performance. Information, opinions and estimates contained in this report reflect a judgement at its original date of publication by CS and are subject to change without notice. The price, value of and income from any of the securities or financial instruments mentioned in this report can fall as well as rise. The value of securities and financial instruments is subject to exchange rate fluctuation that may have a positive or adverse effect on the price or income of such securities or financial instruments. Investors in securities such as ADR's, the values of which are influenced by currency volatility, effectively assume this risk.

Structured securities are complex instruments, typically involve a high degree of risk and are intended for sale only to sophisticated investors who are capable of understanding and assuming the risks involved. The market value of any structured security may be affected by changes in economic, financial and political factors (including, but not limited to, spot and forward interest and exchange rates), time to maturity, market conditions and volatility, and the credit quality of any issuer or reference issuer. Any investor interested in purchasing a structured product should conduct their own investigation and analysis of the product and consult with their own professional advisers as to the risks involved in making such a purchase.

Some investments discussed in this report have a high level of volatility. High volatility investments may experience sudden and large falls in their value causing losses when that investment is realised. Those losses may equal your original investment. Indeed, in the case of some investments the potential losses may exceed the amount of initial investment, in such circumstances you may be required to pay more money to support those losses. Income yields from investments may fluctuate and, in consequence, initial capital paid to make the investment may be used as part of that income yield. Some investments may not be readily realisable and it may be difficult to sell or realise those investments; similarly it may prove difficult for you to obtain reliable information about the value, or risks, to which such an investment is exposed. This report may provide the addresses of, or contain hyperlinks to, websites. Except to the extent to which the report refers to website material of CS, CS has not reviewed the linked site and takes no responsibility for the content contained therein. Such address or hyperlink (including addresses or hyperlinks to CS's own website material) is provided solely for your convenience and information and the content of the linked site does not in any way form part of this document. Accessing such website or following such link through this report or CS's website shall be at your own risk.

This report is issued and distributed in Europe (except Switzerland) by Credit Suisse Securities (Europe) Limited, One Cabot Square, London E14 4QJ, England, which is regulated in the United Kingdom by The Financial Services Authority ("FSA"). This report is being distributed in the United States by Credit Suisse Securities (USA) LLC; in Switzerland by Credit Suisse; in Canada by Credit Suisse Securities (Canada), Inc.; in Brazil by Banco de Investimentos Credit Suisse (Brasil) S.A.; in Japan by Credit Suisse First Boston Securities (Japan) Limited; elsewhere in Asia/Pacific by whichever of the following is the appropriately authorised entity in the relevant jurisdiction: Credit Suisse (Hong Kong) Limited, Credit Suisse Equities (Australia) Limited, Credit Suisse Securities (Thailand) Limited, Credit Suisse Securities (Malaysia) Sdn Bhd, Credit Suisse Singapore Branch and elsewhere in the world by the relevant authorised affiliate of the above. Research on Taiwanese securities produced by Credit Suisse Taipei Branch has been prepared by a registered Senior Business Person. Research provided to residents of Malaysia is authorised by the Head of Research for Credit Suisse Securities (Malaysia) Sdn. Bhd., to whom they should direct any queries on +603 2723 2020.

In jurisdictions where CS is not already registered or licensed to trade in securities, transactions will only be effected in accordance with applicable securities legislation, which will vary from jurisdiction to jurisdiction and may require that the trade be made in accordance with applicable exemptions from registration or licensing requirements. Non-U.S. customers wishing to effect a transaction should contact a CS entity in their local jurisdiction unless governing law permits otherwise. U.S. customers wishing to effect a transaction should do so only by contacting a representative at Credit Suisse Securities (USA) LLC in the U.S.

Please note that this report was originally prepared and issued by CS for distribution to their market professional and institutional investor customers. Recipients who are not market professional or institutional investor customers of CS should seek the advice of their independent financial advisor prior to taking any investment decision based on this report or for any necessary explanation of its contents. This research may relate to investments or services of a person outside of the UK or to other matters which are not regulated by the FSA or in respect of which the protections of the FSA for private customers and/or the UK compensation scheme may not be available, and further details as to where this may be the case are available upon request in respect of this report.

Q1 EPS Less than Expected

- Fortis reported Q1 EPS of \$0.36 per share, below our expectation of \$0.44 per share this quarter. Exhibit 1 details a brief reconciliation of our forecast to Fortis' first quarter results.
- The differences can be summarized as follows:
 - Tax Rate:** The effective tax rate of 27.8% this quarter relative to our assumption of 34% accounted for \$0.02 of the difference;
 - Accounting Change:** As of January 1, 2006, Newfoundland Power changed its revenue recognition policy from a billed basis to an accrual basis. This had the impact of reducing first quarter earnings by approximately \$0.02. It is important to note that the revenue recognition policy has the effect of shifting earnings from the first and second quarter to the third and fourth quarters of 2006.
 - Newfoundland Power – Power sales declined 4% over the quarter relative to our estimate of a 1% increase. This combined with lower amortization due to different quarterly allocation, led to a \$.02 overstatement in earnings.**
 - Regulated Caribbean and Non-Regulated Generation:** Lower than expected sales volumes and prices at Fortis' regulated Caribbean operations and within the non-regulated generation segment led to a \$0.03 overstatement in earnings.
- We have revised our model and have reduced our 2006E earnings estimate to \$1.23 from \$1.25. Our 2007E estimate remains unchanged.
- Our Outperform rating and \$27.00 target price are currently under review.

Fortis's core strength is distribution and transmission of electricity. Fortis operates in 7 regulated jurisdictions across Canada and the Caribbean. Approximately 83% of Fortis's \$2.2 billion in assets (pre-Aquila acquisition of \$1.3 billion) is regulated.

9/28/05	23.688	23.75		
11/14/05	23.4	27		

The analyst(s) responsible for preparing this research report received compensation that is based upon various factors including Credit Suisse's total revenues, a portion of which are generated by Credit Suisse's investment banking activities.

Analysts' stock ratings are defined as follows***:

Outperform: The stock's total return is expected to exceed the industry average* by at least 10-15% (or more, depending on perceived risk) over the next 12 months.

Neutral: The stock's total return is expected to be in line with the industry average* (range of $\pm 10\%$) over the next 12 months.

Underperform:** The stock's total return is expected to underperform the industry average* by 10-15% or more over the next 12 months.

*The industry average refers to the average total return of the analyst's industry coverage universe (except with respect to Asia/Pacific, Latin America and Emerging Markets, where stock ratings are relative to the relevant country index, and Credit Suisse Small and Mid-Cap Advisor stocks, where stock ratings are relative to the regional Credit Suisse Small and Mid-Cap Advisor investment universe.

**In an effort to achieve a more balanced distribution of stock ratings, the Firm has requested that analysts maintain at least 15% of their rated coverage universe as Underperform. This guideline is subject to change depending on several factors, including general market conditions.

***For Australian and New Zealand stocks a 7.5% threshold replaces the 10% level in all three rating definitions.

Restricted: In certain circumstances, Credit Suisse policy and/or applicable law and regulations preclude certain types of communications, including an investment recommendation, during the course of Credit Suisse's engagement in an investment banking transaction and in certain other circumstances.

Volatility Indicator [V]: A stock is defined as volatile if the stock price has moved up or down by 20% or more in a month in at least 8 of the past 24 months or the analyst expects significant volatility going forward. All Credit Suisse Small and Mid-Cap Advisor stocks are automatically rated volatile. All IPO stocks are automatically rated volatile within the first 12 months of trading.

Analysts' coverage universe weightings* are distinct from analysts' stock ratings and are based on the expected performance of an analyst's coverage universe versus the relevant broad market benchmark***:**

Overweight: Industry expected to outperform the relevant broad market benchmark over the next 12 months.

Market Weight: Industry expected to perform in-line with the relevant broad market benchmark over the next 12 months.

Underweight: Industry expected to underperform the relevant broad market benchmark over the next 12 months.

**Credit Suisse Small and Mid-Cap Advisor stocks do not have coverage universe weightings.*

***An analyst's coverage universe consists of all companies covered by the analyst within the relevant sector.*

****The broad market benchmark is based on the expected return of the local market index (e.g., the S&P 500 in the U.S.) over the next 12 months.*

Credit Suisse's distribution of stock ratings (and banking clients) is:

Global Ratings Distribution		
Outperform/Buy*	38%	(63% banking clients)
Neutral/Hold*	44%	(58% banking clients)
Underperform/Sell*	15%	(52% banking clients)
Restricted	3%	

**For purposes of the NYSE and NASD ratings distribution disclosure requirements, our stock ratings of Outperform, Neutral, and Underperform most closely correspond to Buy, Hold, and Sell, respectively; however, the meanings are not the same, as our stock ratings are determined on a relative basis. (Please refer to definitions above.) An investor's decision to buy or sell a security should be based on investment objectives, current holdings, and other individual factors.*

All trademarks, service marks and logos used in this report are trademarks or service marks or registered trademarks or service marks of CS or its affiliates.

The information, tools and material presented in this report are provided to you for information purposes only and are not to be used or considered as an offer or the solicitation of an offer to sell or to buy or subscribe for securities or other financial instruments. CS may not have taken any steps to ensure that the securities referred to in this report are suitable for any particular investor. CS will not treat recipients as its customers by virtue of their receiving the report. The investments or services contained or referred to in this report may not be suitable for you and it is recommended that you consult an independent investment advisor if you are in doubt about such investments or investment services. Nothing in this report constitutes investment, legal, accounting or tax advice or a representation that any investment or strategy is suitable or appropriate to your individual circumstances or otherwise constitutes a personal recommendation to you. CS does not offer advice on the tax consequences of investment and you are advised to contact an independent tax adviser. Please note in particular that the bases and levels of taxation may change.

CS believes the information and opinions in the Disclosure Appendix of this report are accurate and complete. Information and opinions presented in the other sections of the report were obtained or derived from sources CS believes are reliable, but CS makes no representations as to their accuracy or completeness. Additional information is available upon request. CS accepts no liability for loss arising from the use of the material presented in this report, except that this exclusion of liability does not apply to the extent that liability arises under specific statutes or regulations applicable to CS. This report is not to be relied upon in substitution for the exercise of independent judgment. CS may have issued, and may in the future issue, a trading call regarding this security. Trading calls are short term trading opportunities based on market events and catalysts, while stock ratings reflect investment recommendations based on expected total return over a 12-month period relative to the relevant coverage universe. Because trading calls and stock ratings reflect different assumptions and analytical methods, trading calls may differ directionally from the stock rating. In addition, CS may have issued, and may in the future issue, other reports that are inconsistent with, and reach different conclusions from, the information presented in this report. Those reports reflect the different assumptions, views and analytical methods of the analysts who prepared them and CS is under no obligation to ensure that such other reports are brought to the attention of any recipient of this report. CS is involved in many businesses that relate to companies mentioned in this report. These businesses include specialized trading, risk arbitrage, market making, and other proprietary trading.

Past performance should not be taken as an indication or guarantee of future performance, and no representation or warranty, express or implied, is made regarding future performance. Information, opinions and estimates contained in this report reflect a judgement at its original date of publication by CS and are subject to change without notice. The price, value of and income from any of the securities or financial instruments mentioned in this report can fall as well as rise. The value of securities and financial instruments is subject to exchange rate fluctuation that may have a positive or adverse effect on the price or income of such securities or financial instruments. Investors in securities such as ADR's, the values of which are influenced by currency volatility, effectively assume this risk.

Structured securities are complex instruments, typically involve a high degree of risk and are intended for sale only to sophisticated investors who are capable of understanding and assuming the risks involved. The market value of any structured security may be affected by changes in economic, financial and political factors (including, but not limited to, spot and forward interest and exchange rates), time to maturity, market conditions and volatility, and the credit quality of any issuer or reference issuer. Any investor interested in purchasing a structured product should conduct their own investigation and analysis of the product and consult with their own professional advisers as to the risks involved in making such a purchase.

Some investments discussed in this report have a high level of volatility. High volatility investments may experience sudden and large falls in their value causing losses when that investment is realised. Those losses may equal your original investment. Indeed, in the case of some investments the potential losses may exceed the amount of initial investment, in such circumstances you may be required to pay more money to support those losses. Income yields from investments may fluctuate and, in consequence, initial capital paid to make the investment may be used as part of that income yield. Some investments may not be readily realisable and it may be difficult to sell or realise those investments, similarly it may prove difficult for you to obtain reliable information about the value, or risks, to which such an investment is exposed.

This report may provide the addresses of, or contain hyperlinks to, websites. Except to the extent to which the report refers to website material of CS, CS has not reviewed the linked site and takes no responsibility for the content contained therein. Such address or hyperlink (including addresses or hyperlinks to CS's own website material) is provided solely for your convenience and information and the content of the linked site does not in any way form part of this document. Accessing such website or following such link through this report or CS's website shall be at your own risk.

This report is issued and distributed in Europe (except Switzerland) by Credit Suisse Securities (Europe) Limited, One Cabot Square, London E14 4QJ, England, which is regulated in the United Kingdom by The Financial Services Authority ("FSA"). This report is being distributed in Germany by Credit Suisse Securities (Europe) Limited Niederlassung Frankfurt am Main regulated by the Bundesanstalt fuer Finanzdienstleistungsaufsicht ("BaFin"). This report is being distributed in the United States by Credit Suisse Securities (USA) LLC; in Switzerland by Credit Suisse; in Canada by Credit Suisse Securities (Canada), Inc.; in Brazil by Banco de Investimentos Credit Suisse (Brasil) S.A.; in Japan by Credit Suisse Securities (Japan) Limited; elsewhere in Asia/Pacific by whichever of the following is the appropriately authorised entity in the relevant jurisdiction: Credit Suisse (Hong Kong) Limited, Credit Suisse Equities (Australia) Limited, Credit Suisse Securities (Thailand) Limited, Credit Suisse Securities (Malaysia) Sdn Bhd, Credit Suisse Singapore Branch and elsewhere in the world by the relevant authorised affiliate of the above. Research on Taiwanese securities produced by Credit Suisse Taipei Branch has been prepared by a registered Senior Business Person. Research provided to residents of Malaysia is authorised by the Head of Research for Credit Suisse Securities (Malaysia) Sdn. Bhd., to whom they should direct any queries on +603 2723 2020.

In jurisdictions where CS is not already registered or licensed to trade in securities, transactions will only be effected in accordance with applicable securities legislation, which will vary from jurisdiction to jurisdiction and may require that the trade be made in accordance with applicable exemptions from registration or licensing requirements. Non-U.S.

customers wishing to effect a transaction should contact a CS entity in their local jurisdiction unless governing law permits otherwise. U.S. customers wishing to effect a transaction should do so only by contacting a representative at Credit Suisse Securities (USA) LLC in the U.S.

Please note that this report was originally prepared and issued by CS for distribution to their market professional and institutional investor customers. Recipients who are not market professional or institutional investor customers of CS should seek the advice of their independent financial advisor prior to taking any investment decision based on this report or for any necessary explanation of its contents. This research may relate to investments or services of a person outside of the UK or to other matters which are not regulated by the FSA or in respect of which the protections of the FSA for private customers and/or the UK compensation scheme may not be available, and further details as to where this may be the case are available upon request in respect of this report.

Q1 EPS Less than Expected

- Fortis reported Q1 EPS of \$0.36 per share, below our expectation of \$0.44 per share this quarter. Exhibit 1 details a brief reconciliation of our forecast to Fortis' first quarter results.
- The differences can be summarized as follows:
 - Tax Rate:** The effective tax rate of 27.8% this quarter relative to our assumption of 34% accounted for \$0.02 of the difference;
 - Accounting Change:** As of January 1, 2006, Newfoundland Power changed its revenue recognition policy from a billed basis to an accrual basis. This had the impact of reducing first quarter earnings by approximately \$0.02. It is important to note that the revenue recognition policy has the effect of shifting earnings from the first and second quarter to the third and fourth quarters of 2006.
 - Newfoundland Power – Power sales declined 4% over the quarter relative to our estimate of a 1% increase. This combined with lower amortization due to different quarterly allocation, led to a \$.02 overstatement in earnings.**
 - Regulated Caribbean and Non-Regulated Generation:** Lower than expected sales volumes and prices at Fortis' regulated Caribbean operations and within the non-regulated generation segment led to a \$0.03 overstatement in earnings.
- We have revised our model and have reduced our 2006E earnings estimate to \$1.23 from \$1.25. Our 2007E estimate remains unchanged.
- Our Outperform rating and \$27.00 target price are currently under review.

Fortis's core strength is distribution and transmission of electricity. Fortis operates in 7 regulated jurisdictions across Canada and the Caribbean. Approximately 83% of Fortis's \$2.2 billion in assets (pre-Aquila acquisition of \$1.3 billion) is regulat

Important Global Disclosures

I, Dominique Barker, CA, CFA, certify that (1) the views expressed in this report accurately reflect my personal views about all of the subject companies and securities and (2) no part of my compensation was, is or will be directly or indirectly related to the specific recommendations or views expressed in this report.

See the Companies Mentioned section for full company names.

3-Year Price, Target Price and Rating Change History Chart for FTS.TO

FTS.TO Date	Closing Price Price (CAD)	Target Price Price (CAD)	Rating	Initiation/ Assumption
6/2/04	15	17.5	OUTPERFORM	X
2/9/05	18.653	19.25		
8/5/05	20.85	21		
9/28/05	23.688	23.75		
11/14/05	23.4	27		

The analyst(s) responsible for preparing this research report received compensation that is based upon various factors including Credit Suisse's total revenues, a portion of which are generated by Credit Suisse's investment banking activities.

Analysts' stock ratings are defined as follows***:

Outperform: The stock's total return is expected to exceed the industry average* by at least 10-15% (or more, depending on perceived risk) over the next 12 months.

Neutral: The stock's total return is expected to be in line with the industry average* (range of $\pm 10\%$) over the next 12 months.

Underperform:** The stock's total return is expected to underperform the industry average* by 10-15% or more over the next 12 months.

**The industry average refers to the average total return of the analyst's industry coverage universe (except with respect to Asia/Pacific, Latin America and Emerging Markets, where stock ratings are relative to the relevant country index, and Credit Suisse Small and Mid-Cap Advisor stocks, where stock ratings are relative to the regional Credit Suisse Small and Mid-Cap Advisor investment universe.*

***In an effort to achieve a more balanced distribution of stock ratings, the Firm has requested that analysts maintain at least 15% of their rated coverage universe as Underperform. This guideline is subject to change depending on several factors, including general market conditions.*

****For Australian and New Zealand stocks a 7.5% threshold replaces the 10% level in all three rating definitions.*

Restricted: In certain circumstances, Credit Suisse policy and/or applicable law and regulations preclude certain types of communications, including an investment recommendation, during the course of Credit Suisse's engagement in an investment banking transaction and in certain other circumstances.

Volatility Indicator [V]: A stock is defined as volatile if the stock price has moved up or down by 20% or more in a month in at least 8 of the past 24 months or the analyst expects significant volatility going forward. All Credit Suisse Small and Mid-Cap Advisor stocks are automatically rated volatile. All IPO stocks are automatically rated volatile within the first 12 months of trading.

Analysts' coverage universe weightings* are distinct from analysts' stock ratings and are based on the expected performance of an analyst's coverage universe versus the relevant broad market benchmark***:**

Overweight: Industry expected to outperform the relevant broad market benchmark over the next 12 months.

Market Weight: Industry expected to perform in-line with the relevant broad market benchmark over the next 12 months.

Underweight: Industry expected to underperform the relevant broad market benchmark over the next 12 months.

**Credit Suisse Small and Mid-Cap Advisor stocks do not have coverage universe weightings.*

***An analyst's coverage universe consists of all companies covered by the analyst within the relevant sector.*

****The broad market benchmark is based on the expected return of the local market index (e.g., the S&P 500 in the U.S.) over the next 12 months.*

Credit Suisse's distribution of stock ratings (and banking clients) is:

Global Ratings Distribution		
Outperform/Buy*	38%	(63% banking clients)
Neutral/Hold*	44%	(58% banking clients)
Underperform/Sell*	15%	(52% banking clients)
Restricted	3%	

**For purposes of the NYSE and NASD ratings distribution disclosure requirements, our stock ratings of Outperform, Neutral, and Underperform most closely correspond to Buy, Hold, and Sell, respectively; however, the meanings are not the same, as our stock ratings are determined on a relative basis. (Please refer to definitions above.) An investor's decision to buy or sell a security should be based on investment objectives, current holdings, and other individual factors.*

Credit Suisse's policy is to update research reports as it deems appropriate, based on developments with the subject company, the sector or the market that may have a material impact on the research views or opinions stated herein.

Credit Suisse's policy is only to publish investment research that is impartial, independent, clear, fair and not misleading. Credit Suisse does not provide any tax advice. Any statement herein regarding any US federal tax is not intended or written to be used, and cannot be used, by any taxpayer for the purposes of avoiding any penalties.

See the Companies Mentioned section for full company names.

Price Target: (12 months) for (FTS.TO)

Method: Primarily dividend yield versus the 10-year government of Canada forecast bond yield, where we divide the expected dividend of \$0.64 by 70% of the 10-Year Government of Canada Bond Yield of 4.21%. We also look at valuation multiples including (i) Enterprise Value to EBITDA (EV/EBITDA) of 9.4x, (ii) Price to Earnings (P/E) of 22.0x and (iii) Price to Cash Flow (P/CF) of 8.0x. Our \$27.00 target price for Fortis represents an average of these methodologies.

Risks: Risks to our \$27 price target for Fortis include Aquila integration risk, financing risk and risk of equity issues, regulatory risk, international risk, outstanding lawsuit with EPCOR

See the Companies Mentioned section for full company names.

The subject company (FTS.TO) currently is, or was during the 12-month period preceding the date of distribution of this report, a client of Credit Suisse.

Credit Suisse provided non-investment banking services, which may include Sales and Trading services, to the subject company (FTS.TO) within the past 12 months.

Credit Suisse expects to receive or intends to seek investment banking related compensation from the subject company (FTS.TO) within the next 3 months.

Credit Suisse has received compensation for products and services other than investment banking services from the subject company (FTS.TO) within the past 12 months.

Important Regional Disclosures

The analyst(s) involved in the preparation of this report have not visited the material operations of the subject company (FTS.TO) within the past 12 months.

Restrictions on certain Canadian securities are indicated by the following abbreviations: NVS--Non-Voting shares; RVS--Restricted Voting Shares; SVS--Subordinate Voting Shares.

Individuals receiving this report from a Canadian investment dealer that is not affiliated with Credit Suisse should be advised that this report may not contain regulatory disclosures the non-affiliated Canadian investment dealer would be required to make if this were its own report.

For Credit Suisse Securities (Canada), Inc.'s policies and procedures regarding the dissemination of equity research, please visit http://www.csfb.com/legal_terms/canada_research_policy.shtml.

As of the date of this report, Credit Suisse acts as a market maker or liquidity provider in the equities securities that are the subject of this report.

Disclaimers continue on next page.

Disclaimers

References in this report to Credit Suisse or CS include all of the subsidiaries and affiliates of Credit Suisse, a Swiss bank, operating under its investment banking division. For more information on our structure, please follow the below link: http://www.credit-suisse.com/who_we_are/en/structure.html.

This report is not directed to, or intended for distribution to or use by, any person or entity who is a citizen or resident of or located in any locality, state, country or other jurisdiction where such distribution, publication, availability or use would be contrary to law or regulation or which would subject Credit Suisse, the Swiss bank, or its subsidiaries or its affiliates ("CS") to any registration or licensing requirement within such jurisdiction. All material presented in this report, unless specifically indicated otherwise, is under copyright to CS. None of the material, nor its content, nor any copy of it, may be altered in any way, transmitted to, copied or distributed to any other party, without the prior express written permission of CS. All trademarks, service marks and logos used in this report are trademarks or service marks or registered trademarks or service marks of CS or its affiliates.

The information, tools and material presented in this report are provided to you for information purposes only and are not to be used or considered as an offer or the solicitation of an offer to sell or to buy or subscribe for securities or other financial instruments. CS may not have taken any steps to ensure that the securities referred to in this report are suitable for any particular investor. CS will not treat recipients as its customers by virtue of their receiving the report. The investments or services contained or referred to in this report may not be suitable for you and it is recommended that you consult an independent investment advisor if you are in doubt about such investments or investment services. Nothing in this report constitutes investment, legal, accounting or tax advice or a representation that any investment or strategy is suitable or appropriate to your individual circumstances or otherwise constitutes a personal recommendation to you. CS does not offer advice on the tax consequences of investment and you are advised to contact an independent tax adviser. Please note in particular that the bases and levels of taxation may change.

CS believes the information and opinions in the Disclosure Appendix of this report are accurate and complete. Information and opinions presented in the other sections of the report were obtained or derived from sources CS believes are reliable, but CS makes no representations as to their accuracy or completeness. Additional information is available upon request. CS accepts no liability for loss arising from the use of the material presented in this report, except that this exclusion of liability does not apply to the extent that liability arises under specific statutes or regulations applicable to CS. This report is not to be relied upon in substitution for the exercise of independent judgment. CS may have issued, and may in the future issue, a trading call regarding this security. Trading calls are short term trading opportunities based on market events and catalysts, while stock ratings reflect investment recommendations based on expected total return over a 12-month period relative to the relevant coverage universe. Because trading calls and stock ratings reflect different assumptions and analytical methods, trading calls may differ directionally from the stock rating. In addition, CS may have issued, and may in the future issue, other reports that are inconsistent with, and reach different conclusions from, the information presented in this report. Those reports reflect the different assumptions, views and analytical methods of the analysts who prepared them and CS is under no obligation to ensure that such other reports are brought to the attention of any recipient of this report. CS is involved in many businesses that relate to companies mentioned in this report. These businesses include specialized trading, risk arbitrage, market making, and other proprietary trading.

Past performance should not be taken as an indication or guarantee of future performance, and no representation or warranty, express or implied, is made regarding future performance. Information, opinions and estimates contained in this report reflect a judgement at its original date of publication by CS and are subject to change without notice. The price, value of and income from any of the securities or financial instruments mentioned in this report can fall as well as rise. The value of securities and financial instruments is subject to exchange rate fluctuation that may have a positive or adverse effect on the price or income of such securities or financial instruments. Investors in securities such as ADR's, the values of which are influenced by currency volatility, effectively assume this risk.

Structured securities are complex instruments, typically involve a high degree of risk and are intended for sale only to sophisticated investors who are capable of understanding and assuming the risks involved. The market value of any structured security may be affected by changes in economic, financial and political factors (including, but not limited to, spot and forward interest and exchange rates), time to maturity, market conditions and volatility, and the credit quality of any issuer or reference issuer. Any investor interested in purchasing a structured product should conduct their own investigation and analysis of the product and consult with their own professional advisers as to the risks involved in making such a purchase.

Some investments discussed in this report have a high level of volatility. High volatility investments may experience sudden and large falls in their value causing losses when that investment is realised. Those losses may equal your original investment. Indeed, in the case of some investments the potential losses may exceed the amount of initial investment, in such circumstances you may be required to pay more money to support those losses. Income yields from investments may fluctuate and, in consequence, initial capital paid to make the investment may be used as part of that income yield. Some investments may not be readily realisable and it may be difficult to sell or realise those investments, similarly it may prove difficult for you to obtain reliable information about the value, or risks, to which such an investment is exposed.

IMPORTANT DISCLOSURES, ANALYST CERTIFICATIONS AND INFORMATION ON TRADE ALERTS AND ANALYST MODEL PORTFOLIOS ARE IN THE DISCLOSURE APPENDIX. U.S. Disclosure: Credit Suisse does and seeks to do business with companies covered in its research reports. As a result, investors should be aware that the Firm may have a conflict of interest that could affect the objectivity of this report. Investors should consider this report as only a single factor in making their investment decision.

Investment Summary

Fortis Inc. (FTS.TO, C\$22.06, OUTPERFORM, TP C\$25.50, MARKET WEIGHT)

Disclosure Appendix

Important Global Disclosures

I, Dominique Barker, CA, CFA, certify that (1) the views expressed in this report accurately reflect my personal views about all of the subject companies and securities and (2) no part of my compensation was, is or will be directly or indirectly related to the specific recommendations or views expressed in this report.

See the Companies Mentioned section for full company names.

3-Year Price, Target Price and Rating Change History Chart for FTS.TO

FTS.TO Date	Closing Price Price (CAD)	Target Price Price (CAD)	Rating	Initiation/ Assumption
6/2/04	15	17.5	OUTPERFORM	X
2/9/05	18.653	19.25		
8/5/05	20.85	21		
9/28/05	23.688	23.75		
11/14/05	23.4	27		

The analyst(s) responsible for preparing this research report received compensation that is based upon various factors including Credit Suisse's total revenues, a portion of which are generated by Credit Suisse's investment banking activities.

Analysts' stock ratings are defined as follows***:

Outperform: The stock's total return is expected to exceed the industry average* by at least 10-15% (or more, depending on perceived risk) over the next 12 months.

Neutral: The stock's total return is expected to be in line with the industry average* (range of $\pm 10\%$) over the next 12 months.

Underperform:** The stock's total return is expected to underperform the industry average* by 10-15% or more over the next 12 months.

**The industry average refers to the average total return of the analyst's industry coverage universe (except with respect to Asia/Pacific, Latin America and Emerging Markets, where stock ratings are relative to the relevant country index, and Credit Suisse Small and Mid-Cap Advisor stocks, where stock ratings are relative to the regional Credit Suisse Small and Mid-Cap Advisor investment universe.*

***In an effort to achieve a more balanced distribution of stock ratings, the Firm has requested that analysts maintain at least 15% of their rated coverage universe as Underperform. This guideline is subject to change depending on several factors, including general market conditions.*

****For Australian and New Zealand stocks a 7.5% threshold replaces the 10% level in all three rating definitions.*

Restricted: In certain circumstances, Credit Suisse policy and/or applicable law and regulations preclude certain types of communications, including an investment recommendation, during the course of Credit Suisse's engagement in an investment banking transaction and in certain other circumstances.

Volatility Indicator [V]: A stock is defined as volatile if the stock price has moved up or down by 20% or more in a month in at least 8 of the past 24 months or the analyst expects significant volatility going forward. All Credit Suisse Small and Mid-Cap Advisor stocks are automatically rated volatile. All IPO stocks are automatically rated volatile within the first 12 months of trading.

Analysts' coverage universe weightings* are distinct from analysts' stock ratings and are based on the expected performance of an analyst's coverage universe versus the relevant broad market benchmark***:**

Overweight: Industry expected to outperform the relevant broad market benchmark over the next 12 months.

Market Weight: Industry expected to perform in-line with the relevant broad market benchmark over the next 12 months.

Underweight: Industry expected to underperform the relevant broad market benchmark over the next 12 months.

**Credit Suisse Small and Mid-Cap Advisor stocks do not have coverage universe weightings.*

***An analyst's coverage universe consists of all companies covered by the analyst within the relevant sector.*

****The broad market benchmark is based on the expected return of the local market index (e.g., the S&P 500 in the U.S.) over the next 12 months.*

Credit Suisse's distribution of stock ratings (and banking clients) is:

Global Ratings Distribution		
Outperform/Buy*	41%	(60% banking clients)
Neutral/Hold*	42%	(58% banking clients)
Underperform/Sell*	15%	(51% banking clients)
Restricted	3%	

**For purposes of the NYSE and NASD ratings distribution disclosure requirements, our stock ratings of Outperform, Neutral, and Underperform most closely correspond to Buy, Hold, and Sell, respectively; however, the meanings are not the same, as our stock ratings are determined on a relative basis. (Please refer to definitions above.) An investor's decision to buy or sell a security should be based on investment objectives, current holdings, and other individual factors.*

Credit Suisse's policy is to update research reports as it deems appropriate, based on developments with the subject company, the sector or the market that may have a material impact on the research views or opinions stated herein.

Credit Suisse's policy is only to publish investment research that is impartial, independent, clear, fair and not misleading. For more detail please refer to Credit Suisse's Policies for Managing Conflicts of Interest in connection with Investment Research: http://www.csfb.com/research-and-analytics/disclaimer/managing_conflicts_disclaimer.html

Credit Suisse does not provide any tax advice. Any statement herein regarding any US federal tax is not intended or written to be used, and cannot be used, by any taxpayer for the purposes of avoiding any penalties.

See the Companies Mentioned section for full company names.

Price Target: (12 months) for (FTS.TO)

Method: Primarily dividend yield versus the 10-year government of Canada forecast bond yield. We also look at valuation multiples including (i) Enterprise Value to EBITDA (EV/EBITDA) of 9.0x, (ii) Price to Earnings (P/E) of 19.0x and (iii) Price to Cash Flow (P/CF) of 8.0x. Our \$25.50 target price for Fortis represents an average of these methodologies.

Risks: Risks to our \$25.50 price target for Fortis include Aquila integration risk, financing risk and risk of equity issues, regulatory risk, international risk, outstanding lawsuit with EPCOR

See the Companies Mentioned section for full company names.

The subject company (FTS.TO) currently is, or was during the 12-month period preceding the date of distribution of this report, a client of Credit Suisse.

Credit Suisse provided non-investment banking services, which may include Sales and Trading services, to the subject company (FTS.TO) within the past 12 months.

Credit Suisse expects to receive or intends to seek investment banking related compensation from the subject company (FTS.TO) within the next 3 months.

Credit Suisse has received compensation for products and services other than investment banking services from the subject company (FTS.TO) within the past 12 months.

Important Regional Disclosures

The analyst(s) involved in the preparation of this report have not visited the material operations of the subject company (FTS.TO) within the past 12 months.

Restrictions on certain Canadian securities are indicated by the following abbreviations: NVS--Non-Voting shares; RVS--Restricted Voting Shares; SVS--Subordinate Voting Shares.

Individuals receiving this report from a Canadian investment dealer that is not affiliated with Credit Suisse should be advised that this report may not contain regulatory disclosures the non-affiliated Canadian investment dealer would be required to make if this were its own report.

For Credit Suisse Securities (Canada), Inc.'s policies and procedures regarding the dissemination of equity research, please visit http://www.csfb.com/legal_terms/canada_research_policy.shtml.

As of the date of this report, Credit Suisse acts as a market maker or liquidity provider in the equities securities that are the subject of this report.

CS may have issued a Trade Alert regarding this security. Trade Alerts are short term trading opportunities identified by an analyst on the basis of market events and catalysts, while stock ratings reflect an analyst's investment recommendations based on expected total return over a 12-month period relative to the relevant coverage universe. Because Trade Alerts and stock ratings reflect different assumptions and analytical methods, Trade Alerts may differ directionally from the analyst's stock rating.

The author(s) of this report maintains a CS Model Portfolio that he/she regularly adjusts. The security or securities discussed in this report may be a component of the CS Model Portfolio and subject to such adjustments (which, given the composition of the CS Model Portfolio as a whole, may differ from the recommendation in this report, as well as opportunities or strategies identified in Trading Alerts concerning the same security). The CS Model Portfolio and important disclosures about it are available at www.credit-suisse.com/ti.

For disclosure information on other companies mentioned in this report, please visit the website at www.credit-suisse.com/researchdisclosures or call +1 (877) 291-2683.

Disclaimers continue on next page.

Disclosure Appendix

Important Global Disclosures

Disclaimers

References in this report to Credit Suisse or CS include all of the subsidiaries and affiliates of Credit Suisse, a Swiss bank, operating under its investment banking division. For more information on our structure, please follow the below link: http://www.credit-suisse.com/who_we_are/en/structure.html.

This report is not directed to, or intended for distribution to or use by, any person or entity who is a citizen or resident of or located in any locality, state, country or other jurisdiction where such distribution, publication, availability or use would be contrary to law or regulation or which would subject Credit Suisse, the Swiss bank, or its subsidiaries or its affiliates ("CS") to any registration or licensing requirement within such jurisdiction. All material presented in this report, unless specifically indicated otherwise, is under copyright to CS. None of the material, nor its content, nor any copy of it, may be altered in any way, transmitted to, copied or distributed to any other party, without the prior express written permission of CS. All trademarks, service marks and logos used in this report are trademarks or service marks or registered trademarks or service marks of CS or its affiliates.

The information, tools and material presented in this report are provided to you for information purposes only and are not to be used or considered as an offer or the solicitation of an offer to sell or to buy or subscribe for securities or other financial instruments. CS may not have taken any steps to ensure that the securities referred to in this report are suitable for any particular investor. CS will not treat recipients as its customers by virtue of their receiving the report. The investments or services contained or referred to in this report may not be suitable for you and it is recommended that you consult an independent investment advisor if you are in doubt about such investments or investment services. Nothing in this report constitutes investment, legal, accounting or tax advice or a representation that any investment or strategy is suitable or appropriate to your individual circumstances or otherwise constitutes a personal recommendation to you. CS does not offer advice on the tax consequences of investment and you are advised to contact an independent tax adviser. Please note in particular that the bases and levels of taxation may change.

CS believes the information and opinions in the Disclosure Appendix of this report are accurate and complete. Information and opinions presented in the other sections of the report were obtained or derived from sources CS believes are reliable, but CS makes no representations as to their accuracy or completeness. Additional information is available upon request. CS accepts no liability for loss arising from the use of the material presented in this report, except that this exclusion of liability does not apply to the extent that liability arises under specific statutes or regulations applicable to CS. This report is not to be relied upon in substitution for the exercise of independent judgment. CS may have issued, and may in the future issue, a trading call regarding this security. Trading calls are short term trading opportunities based on market events and catalysts, while stock ratings reflect investment recommendations based on expected total return over a 12-month period relative to the relevant coverage universe. Because trading calls and stock ratings reflect different assumptions and analytical methods, trading calls may differ directionally from the stock rating. In addition, CS may have issued, and may in the future issue, other reports that are inconsistent with, and reach different conclusions from, the information presented in this report. Those reports reflect the different assumptions, views and analytical methods of the analysts who prepared them and CS is under no obligation to ensure that such other reports are brought to the attention of any recipient of this report. CS is involved in many businesses that relate to companies mentioned in this report. These businesses include specialized trading, risk arbitrage, market making, and other proprietary trading.

Past performance should not be taken as an indication or guarantee of future performance, and no representation or warranty, express or implied, is made regarding future performance. Information, opinions and estimates contained in this report reflect a judgement at its original date of publication by CS and are subject to change without notice. The price, value of and income from any of the securities or financial instruments mentioned in this report can fall as well as rise. The value of securities and financial instruments is subject to exchange rate fluctuation that may have a positive or adverse effect on the price or income of such securities or financial instruments. Investors in securities such as ADR's, the values of which are influenced by currency volatility, effectively assume this risk.

Structured securities are complex instruments, typically involve a high degree of risk and are intended for sale only to sophisticated investors who are capable of understanding and assuming the risks involved. The market value of any structured security may be affected by changes in economic, financial and political factors (including, but not limited to, spot and forward interest and exchange rates), time to maturity, market conditions and volatility, and the credit quality of any issuer or reference issuer. Any investor interested in purchasing a structured product should conduct their own investigation and analysis of the product and consult with their own professional advisers as to the risks involved in making such a purchase.

Some investments discussed in this report have a high level of volatility. High volatility investments may experience sudden and large falls in their value causing losses when that investment is realised. Those losses may equal your original investment. Indeed, in the case of some investments the potential losses may exceed the amount of initial investment, in such circumstances you may be required to pay more money to support those losses. Income yields from investments may fluctuate and, in consequence, initial capital paid to make the investment may be used as part of that income yield. Some investments may not be readily realisable and it may be difficult to sell or realise those investments, similarly it may prove difficult for you to obtain reliable information about the value, or risks, to which such an investment is exposed.

This report may provide the addresses of, or contain hyperlinks to, websites. Except to the extent to which the report refers to website material of CS, CS has not reviewed the linked site and takes no responsibility for the content contained therein. Such address or hyperlink (including addresses or hyperlinks to CS's own website material) is provided solely for your convenience and information and the content of the linked site does not in any way form part of this document. Accessing such website or following such link through this report or CS's website shall be at your own risk.

This report is issued and distributed in Europe (except Switzerland) by Credit Suisse Securities (Europe) Limited, One Cabot Square, London E14 4QJ, England, which is regulated in the United Kingdom by The Financial Services Authority ("FSA"). This report is being distributed in Germany by Credit Suisse Securities (Europe) Limited Niederlassung Frankfurt am Main regulated by the Bundesanstalt fuer Finanzdienstleistungsaufsicht ("BaFin"). This report is being distributed in the United States by Credit Suisse Securities (USA) LLC; in Switzerland by Credit Suisse; in Canada by Credit Suisse Securities (Canada), Inc.; in Brazil by Banco de Investimentos Credit Suisse (Brasil) S.A.; in Japan by Credit Suisse Securities (Japan) Limited; elsewhere in Asia/Pacific by whichever of the following is the appropriately authorised entity in the relevant jurisdiction: Credit Suisse (Hong Kong) Limited, Credit Suisse Equities (Australia) Limited, Credit Suisse Securities (Thailand) Limited, Credit Suisse Securities (Malaysia) Sdn Bhd, Credit Suisse Singapore Branch and elsewhere in the world by the relevant authorised affiliate of the above. Research on Taiwanese securities produced by Credit Suisse Taipei Branch has been prepared by a registered Senior Business Person. Research provided to residents of Malaysia is authorised by the Head of Research for Credit Suisse Securities (Malaysia) Sdn. Bhd., to whom they should direct any queries on +603 2723 2020.

In jurisdictions where CS is not already registered or licensed to trade in securities, transactions will only be effected in accordance with applicable securities legislation, which will vary from jurisdiction to jurisdiction and may require that the trade be made in accordance with applicable exemptions from registration or licensing requirements. Non-U.S.

customers wishing to effect a transaction should contact a CS entity in their local jurisdiction unless governing law permits otherwise. U.S. customers wishing to effect a transaction should do so only by contacting a representative at Credit Suisse Securities (USA) LLC in the U.S.

Please note that this report was originally prepared and issued by CS for distribution to their market professional and institutional investor customers. Recipients who are not market professional or institutional investor customers of CS should seek the advice of their independent financial advisor prior to taking any investment decision based on this report or for any necessary explanation of its contents. This research may relate to investments or services of a person outside of the UK or to other matters which are not regulated by the FSA or in respect of which the protections of the FSA for private customers and/or the UK compensation scheme may not be available, and further details as to where this may be the case are available upon request in respect of this report.

After the close today, Fortis announced it had accepted a bought deal to issue 5.2 million shares at \$29.

We have input the following into our model: equity injection of \$150 million and share increase of 5.2 million shares. Our debt/cap at year end 2007 goes from 68% to 66%. Our EPS for 2007 is reduced from \$1.33 to \$1.28.

Valuation: we believe the stock is expensive, currently trading at 23x 2007 earnings. We are maintaining our Neutral rating and \$25.50 target price.

9/28/05	23.688	23.75		
11/14/05	23.4	27		
9/18/06	24.5	25.5	NEUTRAL	

The analyst(s) responsible for preparing this research report received compensation that is based upon various factors including Credit Suisse's total revenues, a portion of which are generated by Credit Suisse's investment banking activities.

Analysts' stock ratings are defined as follows*:**

Outperform: The stock's total return is expected to exceed the industry average* by at least 10-15% (or more, depending on perceived risk) over the next 12 months.

Neutral: The stock's total return is expected to be in line with the industry average* (range of $\pm 10\%$) over the next 12 months.

Underperform:** The stock's total return is expected to underperform the industry average* by 10-15% or more over the next 12 months.

*The industry average refers to the average total return of the analyst's industry coverage universe (except with respect to Asia/Pacific, Latin America and Emerging Markets, where stock ratings are relative to the relevant country index, and Credit Suisse Small and Mid-Cap Advisor stocks, where stock ratings are relative to the regional Credit Suisse Small and Mid-Cap Advisor investment universe.

**In an effort to achieve a more balanced distribution of stock ratings, the Firm has requested that analysts maintain at least 15% of their rated coverage universe as Underperform. This guideline is subject to change depending on several factors, including general market conditions.

***For Australian and New Zealand stocks a 7.5% threshold replaces the 10% level in all three rating definitions, with a required equity return overlay applied.

Restricted: In certain circumstances, Credit Suisse policy and/or applicable law and regulations preclude certain types of communications, including an investment recommendation, during the course of Credit Suisse's engagement in an investment banking transaction and in certain other circumstances.

Volatility Indicator [V]: A stock is defined as volatile if the stock price has moved up or down by 20% or more in a month in at least 8 of the past 24 months or the analyst expects significant volatility going forward. All Credit Suisse Small and Mid-Cap Advisor stocks are automatically rated volatile. All IPO stocks are automatically rated volatile within the first 12 months of trading.

Analysts' coverage universe weightings* are distinct from analysts' stock ratings and are based on the expected performance of an analyst's coverage universe versus the relevant broad market benchmark***:**

Overweight: Industry expected to outperform the relevant broad market benchmark over the next 12 months.

Market Weight: Industry expected to perform in-line with the relevant broad market benchmark over the next 12 months.

Underweight: Industry expected to underperform the relevant broad market benchmark over the next 12 months.

*Credit Suisse Small and Mid-Cap Advisor stocks do not have coverage universe weightings.

**An analyst's coverage universe consists of all companies covered by the analyst within the relevant sector.

***The broad market benchmark is based on the expected return of the local market index (e.g., the S&P 500 in the U.S.) over the next 12 months.

Credit Suisse's distribution of stock ratings (and banking clients) is:

Global Ratings Distribution		
Outperform/Buy*	39%	(60% banking clients)
Neutral/Hold*	44%	(55% banking clients)
Underperform/Sell*	15%	(51% banking clients)
Restricted	3%	

*For purposes of the NYSE and NASD ratings distribution disclosure requirements, our stock ratings of Outperform, Neutral, and Underperform most closely correspond to Buy, Hold, and Sell, respectively; however, the meanings are not the same, as our stock ratings are determined on a relative basis. (Please refer to definitions above.) An investor's decision to buy or sell a security should be based on investment objectives, current holdings, and other individual factors.

Credit Suisse's policy is to update research reports as it deems appropriate, based on developments with the subject company, the sector or the market that may have a material impact on the research views or opinions stated herein.

See the Companies Mentioned section for full company names.

Price Target: (12 months) for (FTS.TO)

Method: Primarily dividend yield versus the 10-year government of Canada forecast bond yield. We also look at valuation multiples including (i) Enterprise Value to EBITDA (EV/EBITDA) of 9.0x, (ii) Price to Earnings (P/E) of 19.0x and (iii) Price to Cash Flow (P/CF) of 8.0x. Our \$25.50 target price for Fortis represents an average of these methodologies.

Risks: Risks to our \$25.50 price target for Fortis include Aquila integration risk, financing risk and risk of equity issues, regulatory risk, international risk, outstanding lawsuit with EPCOR

See the Companies Mentioned section for full company names.

The subject company (FTS.TO) currently is, or was during the 12-month period preceding the date of distribution of this report, a client of Credit Suisse.

Credit Suisse provided non-investment banking services, which may include Sales and Trading services, to the subject company (FTS.TO) within the past 12 months.

Credit Suisse expects to receive or intends to seek investment banking related compensation from the subject company (FTS.TO) within the next 3 months.

Credit Suisse has received compensation for products and services other than investment banking services from the subject company (FTS.TO) within the past 12 months.

Important Regional Disclosures

The analyst(s) involved in the preparation of this report have not visited the material operations of the subject company (FTS.TO) within the past 12 months.

Restrictions on certain Canadian securities are indicated by the following abbreviations: NVS--Non-Voting shares; RVS--Restricted Voting Shares; SVS--Subordinate Voting Shares.

Individuals receiving this report from a Canadian investment dealer that is not affiliated with Credit Suisse should be advised that this report may not contain regulatory disclosures the non-affiliated Canadian investment dealer would be required to make if this were its own report.

For Credit Suisse Securities (Canada), Inc.'s policies and procedures regarding the dissemination of equity research, please visit http://www.csfb.com/legal_terms/canada_research_policy.shtml.

As of the date of this report, Credit Suisse acts as a market maker or liquidity provider in the equities securities that are the subject of this report.

CS may have issued a Trade Alert regarding this security. Trade Alerts are short term trading opportunities identified by an analyst on the basis of market events and catalysts, while stock ratings reflect an analyst's investment recommendations based on expected total return over a 12-month period relative to the relevant coverage universe. Because Trade Alerts and stock ratings reflect different assumptions and analytical methods, Trade Alerts may differ directionally from the analyst's stock rating. The author(s) of this report maintains a CS Model Portfolio that he/she regularly adjusts. The security or securities discussed in this report may be a component of the CS Model Portfolio and subject to such adjustments (which, given the composition of the CS Model Portfolio as a whole, may differ from the recommendation in this report, as well as opportunities or strategies identified in Trading Alerts concerning the same security). The CS Model Portfolio and important disclosures about it are available at www.credit-suisse.com/ti.

For disclosure information on other companies mentioned in this report, please visit the website at www.credit-suisse.com/researchdisclosures or call +1 (877) 291-2683.

Disclaimers continue on next page.

This report is not directed to, or intended for distribution to or use by, any person or entity who is a citizen or resident of or located in any locality, state, country or other jurisdiction where such distribution, publication, availability or use would be contrary to law or regulation or which would subject Credit Suisse, the Swiss bank, or its subsidiaries or its affiliates ("CS") to any registration or licensing requirement within such jurisdiction. All material presented in this report, unless specifically indicated otherwise, is under copyright to CS. None of the material, nor its content, nor any copy of it, may be altered in any way, transmitted to, copied or distributed to any other party, without the prior express written permission of CS. All trademarks, service marks and logos used in this report are trademarks or service marks or registered trademarks or service marks of CS or its affiliates.

The information, tools and material presented in this report are provided to you for information purposes only and are not to be used or considered as an offer or the solicitation of an offer to sell or to buy or subscribe for securities or other financial instruments. CS may not have taken any steps to ensure that the securities referred to in this report are suitable for any particular investor. CS will not treat recipients as its customers by virtue of their receiving the report. The investments or services contained or referred to in this report may not be suitable for you and it is recommended that you consult an independent investment advisor if you are in doubt about such investments or investment services. Nothing in this report constitutes investment, legal, accounting or tax advice or a representation that any investment or strategy is suitable or appropriate to your individual circumstances or otherwise constitutes a personal recommendation to you. CS does not offer advice on the tax consequences of investment and you are advised to contact an independent tax adviser. Please note in particular that the bases and levels of taxation may change.

CS believes the information and opinions in the Disclosure Appendix of this report are accurate and complete. Information and opinions presented in the other sections of the report were obtained or derived from sources CS believes are reliable, but CS makes no representations as to their accuracy or completeness. Additional information is available upon request. CS accepts no liability for loss arising from the use of the material presented in this report, except that this exclusion of liability does not apply to the extent that liability arises under specific statutes or regulations applicable to CS. This report is not to be relied upon in substitution for the exercise of independent judgment. CS may have issued, and may in the future issue, a trading call regarding this security. Trading calls are short term trading opportunities based on market events and catalysts, while stock ratings reflect investment recommendations based on expected total return over a 12-month period relative to the relevant coverage universe. Because trading calls and stock ratings reflect different assumptions and analytical methods, trading calls may differ directionally from the stock rating. In addition, CS may have issued, and may in the future issue, other reports that are inconsistent with, and reach different conclusions from, the information presented in this report. Those reports reflect the different assumptions, views and analytical methods of the analysts who prepared them and CS is under no obligation to ensure that such other reports are brought to the attention of any recipient of this report. CS is involved in many businesses that relate to companies mentioned in this report. These businesses include specialized trading, risk arbitrage, market making, and other proprietary trading.

Past performance should not be taken as an indication or guarantee of future performance, and no representation or warranty, express or implied, is made regarding future performance. Information, opinions and estimates contained in this report reflect a judgement at its original date of publication by CS and are subject to change without notice. The price, value of and income from any of the securities or financial instruments mentioned in this report can fall as well as rise. The value of securities and financial instruments is subject to exchange rate fluctuation that may have a positive or adverse effect on the price or income of such securities or financial instruments. Investors in securities such as ADR's, the values of which are influenced by currency volatility, effectively assume this risk.

Structured securities are complex instruments, typically involve a high degree of risk and are intended for sale only to sophisticated investors who are capable of understanding and assuming the risks involved. The market value of any structured security may be affected by changes in economic, financial and political factors (including, but not limited to, spot and forward interest and exchange rates), time to maturity, market conditions and volatility, and the credit quality of any issuer or reference issuer. Any investor interested in purchasing a structured product should conduct their own investigation and analysis of the product and consult with their own professional advisers as to the risks involved in making such a purchase.

Some investments discussed in this report have a high level of volatility. High volatility investments may experience sudden and large falls in their value causing losses when that investment is realised. Those losses may equal your original investment. Indeed, in the case of some investments the potential losses may exceed the amount of initial investment, in such circumstances you may be required to pay more money to support those losses. Income yields from investments may fluctuate and, in consequence, initial capital paid to make the investment may be used as part of that income yield. Some investments may not be readily realisable and it may be difficult to sell or realise those investments, similarly it may prove difficult for you to obtain reliable information about the value, or risks, to which such an investment is exposed.

This report may provide the addresses of, or contain hyperlinks to, websites. Except to the extent to which the report refers to website material of CS, CS has not reviewed the linked site and takes no responsibility for the content contained therein. Such address or hyperlink (including addresses or hyperlinks to CS's own website material) is provided solely for your convenience and information and the content of the linked site does not in any way form part of this document. Accessing such website or following such link through this report or CS's website shall be at your own risk.

This report is issued and distributed in Europe (except Switzerland) by Credit Suisse Securities (Europe) Limited, One Cabot Square, London E14 4QJ, England, which is regulated in the United Kingdom by The Financial Services Authority ("FSA"). This report is being distributed in Germany by Credit Suisse Securities (Europe) Limited Niederlassung Frankfurt am Main regulated by the Bundesanstalt fuer Finanzdienstleistungsaufsicht ("BaFin"). This report is being distributed in the United States by Credit Suisse Securities (USA) LLC ; in Switzerland by Credit Suisse; in Canada by Credit Suisse Securities (Canada), Inc.; in Brazil by Banco de Investimentos Credit Suisse (Brasil) S.A.; in Japan by Credit Suisse First Boston Securities (Japan) Limited; elsewhere in Asia/Pacific by whichever of the following is the appropriately authorised entity in the relevant jurisdiction: Credit Suisse (Hong Kong) Limited, Credit Suisse Equities (Australia) Limited, Credit Suisse Securities (Thailand) Limited, Credit Suisse Securities (Malaysia) Sdn Bhd, Credit Suisse Singapore Branch and elsewhere in the world by the relevant authorised affiliate of the above. Research on Taiwanese securities produced by Credit Suisse Taipei Branch has been prepared by a registered Senior Business Person. Research provided to residents of Malaysia is authorised by the Head of Research for Credit Suisse Securities (Malaysia) Sdn. Bhd., to whom they should direct any queries on +603 2723 2020.

In jurisdictions where CS is not already registered or licensed to trade in securities, transactions will only be effected in accordance with applicable securities legislation, which will vary from jurisdiction to jurisdiction and may require that the trade be made in accordance with applicable exemptions from registration or licensing requirements. Non-U.S. customers wishing to effect a transaction should contact a CS entity in their local jurisdiction unless governing law permits otherwise. U.S. customers wishing to effect a transaction should do so only by contacting a representative at Credit Suisse Securities (USA) LLC in the U.S.

Please note that this report was originally prepared and issued by CS for distribution to their market professional and institutional investor customers. Recipients who are not market professional or institutional investor customers of CS should seek the advice of their independent financial advisor prior to taking any investment decision based on this report or for any necessary explanation of its contents. This research may relate to investments or services of a person outside of the UK or to other matters which are not regulated by the FSA or in respect of which the protections of the FSA for private customers and/or the UK compensation scheme may not be available, and further details as to where this may be the case are available upon request in respect of this report.

EARNINGS

Fourth Quarter Strength Illusory

- **Event:** Fortis reported normalized diluted EPS of \$0.32 and \$1.36 for the fourth quarter and full year 2006, respectively. This compares to our estimate of \$0.19 and \$1.23 for same periods, and consensus of \$0.27 and \$1.31.
- **View:** While at first glance, reported earnings appear strong, much of the difference between actual performance and our estimate is due to (1) differential actual versus estimated tax rates at Fortis Alberta and (2) an accounting change from the billings method to the accrual method at Newfoundland Power that caused a \$10.7 MM increase in revenues from the inclusion of the final two weeks of earnings in December of 2006. Exhibit 1 on the next page details a reconciliation of our earnings.
- **Earnings Revision:** After adjusting our model for the accounting change at Newfoundland Power, and updating our estimates for Caribbean Utilities (Fortis is consolidating the company in 2007 after acquiring an additional 16% on November 7, 2007 to take its position to 54%) we are revising our 2007 earnings upwards from \$1.28 to \$1.36.
- **Dividend Increase:** Fortis also surprised the market with a 10.5% dividend increase to \$0.21 per share from \$0.19 (payable at the end of the second quarter to shareholders of record on May 4th 2007).
- **Valuation:** Our \$25.50 target price and Neutral rating remain unchanged at this time.

9/18/06	24.5	25.5	NEUTRAL	

The analyst(s) responsible for preparing this research report received compensation that is based upon various factors including Credit Suisse's total revenues, a portion of which are generated by Credit Suisse's investment banking activities.

Analysts' stock ratings are defined as follows***:

Outperform: The stock's total return is expected to exceed the industry average* by at least 10-15% (or more, depending on perceived risk) over the next 12 months.

Neutral: The stock's total return is expected to be in line with the industry average* (range of $\pm 10\%$) over the next 12 months.

Underperform:** The stock's total return is expected to underperform the industry average* by 10-15% or more over the next 12 months.

**The industry average refers to the average total return of the analyst's industry coverage universe (except with respect to Asia/Pacific, Latin America and Emerging Markets, where stock ratings are relative to the relevant country index, and Credit Suisse Small and Mid-Cap Advisor stocks, where stock ratings are relative to the regional Credit Suisse Small and Mid-Cap Advisor investment universe.*

***In an effort to achieve a more balanced distribution of stock ratings, the Firm has requested that analysts maintain at least 15% of their rated coverage universe as Underperform. This guideline is subject to change depending on several factors, including general market conditions.*

****For Australian and New Zealand stocks a 7.5% threshold replaces the 10% level in all three rating definitions, with a required equity return overlay applied.*

Restricted: In certain circumstances, Credit Suisse policy and/or applicable law and regulations preclude certain types of communications, including an investment recommendation, during the course of Credit Suisse's engagement in an investment banking transaction and in certain other circumstances.

Volatility Indicator [V]: A stock is defined as volatile if the stock price has moved up or down by 20% or more in a month in at least 8 of the past 24 months or the analyst expects significant volatility going forward. All Credit Suisse Small and Mid-Cap Advisor stocks are automatically rated volatile. All IPO stocks are automatically rated volatile within the first 12 months of trading.

Analysts' coverage universe weightings* are distinct from analysts' stock ratings and are based on the expected performance of an analyst's coverage universe versus the relevant broad market benchmark***:**

Overweight: Industry expected to outperform the relevant broad market benchmark over the next 12 months.

Market Weight: Industry expected to perform in-line with the relevant broad market benchmark over the next 12 months.

Underweight: Industry expected to underperform the relevant broad market benchmark over the next 12 months.

*Credit Suisse Small and Mid-Cap Advisor stocks do not have coverage universe weightings.

**An analyst's coverage universe consists of all companies covered by the analyst within the relevant sector.

***The broad market benchmark is based on the expected return of the local market index (e.g., the S&P 500 in the U.S.) over the next 12 months.

Credit Suisse's distribution of stock ratings (and banking clients) is:

Global Ratings Distribution		
Outperform/Buy*	39%	(62% banking clients)
Neutral/Hold*	43%	(57% banking clients)
Underperform/Sell*	16%	(50% banking clients)
Restricted	3%	

*For purposes of the NYSE and NASD ratings distribution disclosure requirements, our stock ratings of Outperform, Neutral, and Underperform most closely correspond to Buy, Hold, and Sell, respectively; however, the meanings are not the same, as our stock ratings are determined on a relative basis. (Please refer to definitions above.) An investor's decision to buy or sell a security should be based on investment objectives, current holdings, and other individual factors.

Credit Suisse's policy is to update research reports as it deems appropriate, based on developments with the subject company, the sector or the market that may have a material impact on the research views or opinions stated herein.

Credit Suisse's policy is only to publish investment research that is impartial, independent, clear, fair and not misleading. For more detail please refer to Credit Suisse's Policies for Managing Conflicts of Interest in connection with

Disclaimers continue on next page.

This report is not directed to, or intended for distribution to or use by, any person or entity who is a citizen or resident of or located in any locality, state, country or other jurisdiction where such distribution, publication, availability or use would be contrary to law or regulation or which would subject Credit Suisse, the Swiss bank, or its subsidiaries or its affiliates ("CS") to any registration or licensing requirement within such jurisdiction. All material presented in this report, unless specifically indicated otherwise, is under copyright to CS. None of the material, nor its content, nor any copy of it, may be altered in any way, transmitted to, copied or distributed to any other party, without the prior express written permission of CS. All trademarks, service marks and logos used in this report are trademarks or service marks or registered trademarks or service marks of CS or its affiliates.

The information, tools and material presented in this report are provided to you for information purposes only and are not to be used or considered as an offer or the solicitation of an offer to sell or to buy or subscribe for securities or other financial instruments. CS may not have taken any steps to ensure that the securities referred to in this report are suitable for any particular investor. CS will not treat recipients as its customers by virtue of their receiving the report. The investments or services contained or referred to in this report may not be suitable for you and it is recommended that you consult an independent investment advisor if you are in doubt about such investments or investment services. Nothing in this report constitutes investment, legal, accounting or tax advice or a representation that any investment or strategy is suitable or appropriate to your individual circumstances or otherwise constitutes a personal recommendation to you. CS does not offer advice on the tax consequences of investment and you are advised to contact an independent tax adviser. Please note in particular that the bases and levels of taxation may change.

CS believes the information and opinions in the Disclosure Appendix of this report are accurate and complete. Information and opinions presented in the other sections of the report were obtained or derived from sources CS believes are reliable, but CS makes no representations as to their accuracy or completeness. Additional information is available upon request. CS accepts no liability for loss arising from the use of the material presented in this report, except that this exclusion of liability does not apply to the extent that liability arises under specific statutes or regulations applicable to CS. This report is not to be relied upon in substitution for the exercise of independent judgment. CS may have issued, and may in the future issue, a trading call regarding this security. Trading calls are short term trading opportunities based on market events and catalysts, while stock ratings reflect investment recommendations based on expected total return over a 12-month period relative to the relevant coverage universe. Because trading calls and stock ratings reflect different assumptions and analytical methods, trading calls may differ directionally from the stock rating. In addition, CS may have issued, and may in the future issue, other reports that are inconsistent with, and reach different conclusions from, the information presented in this report. Those reports reflect the different assumptions, views and analytical methods of the analysts who prepared them and CS is under no obligation to ensure that such other reports are brought to the attention of any recipient of this report. CS is involved in many businesses that relate to companies mentioned in this report. These businesses include specialized trading, risk arbitrage, market making, and other proprietary trading.

Past performance should not be taken as an indication or guarantee of future performance, and no representation or warranty, express or implied, is made regarding future performance. Information, opinions and estimates contained in this report reflect a judgement at its original date of publication by CS and are subject to change without notice. The price, value of and income from any of the securities or financial instruments mentioned in this report can fall as well as rise. The value of securities and financial instruments is subject to exchange rate fluctuation that may have a positive or adverse effect on the price or income of such securities or financial instruments. Investors in securities such as ADR's, the values of which are influenced by currency volatility, effectively assume this risk.

Structured securities are complex instruments, typically involve a high degree of risk and are intended for sale only to sophisticated investors who are capable of understanding and assuming the risks involved. The market value of any structured security may be affected by changes in economic, financial and political factors (including, but not limited to, spot and forward interest and exchange rates), time to maturity, market conditions and volatility, and the credit quality of any issuer or reference issuer. Any investor interested in purchasing a structured product should conduct their own investigation and analysis of the product and consult with their own professional advisers as to the risks involved in making such a purchase.

Some investments discussed in this report have a high level of volatility. High volatility investments may experience sudden and large falls in their value causing losses when that investment is realised. Those losses may equal your original investment. Indeed, in the case of some investments the potential losses may exceed the amount of initial investment, in such circumstances you may be required to pay more money to support those losses. Income yields from investments may fluctuate and, in consequence, initial capital paid to make the investment may be used as part of that income yield. Some investments may not be readily realisable and it may be difficult to sell or realise those investments, similarly it may prove difficult for you to obtain reliable information about the value, or risks, to which such an investment is exposed.

This report may provide the addresses of, or contain hyperlinks to, websites. Except to the extent to which the report refers to website material of CS, CS has not reviewed the linked site and takes no responsibility for the content contained therein. Such address or hyperlink (including addresses or hyperlinks to CS's own website material) is provided solely for your convenience and information and the content of the linked site does not in any way form part of this document. Accessing such website or following such link through this report or CS's website shall be at your own risk.

This report is issued and distributed in Europe (except Switzerland) by Credit Suisse Securities (Europe) Limited, One Cabot Square, London E14 4QJ, England, which is regulated in the United Kingdom by The Financial Services Authority ("FSA"). This report is being distributed in Germany by Credit Suisse Securities (Europe) Limited Niederlassung Frankfurt am Main regulated by the Bundesanstalt fuer Finanzdienstleistungsaufsicht ("BaFin"). This report is being distributed in the United States by Credit Suisse Securities (USA) LLC ; in Switzerland by Credit Suisse; in Canada by Credit Suisse Securities (Canada), Inc.; in Brazil by Banco de Investimentos Credit Suisse (Brasil) S.A.; in Japan by Credit Suisse First Boston Securities (Japan) Limited; elsewhere in Asia/Pacific by whichever of the following is the appropriately authorised entity in the relevant jurisdiction: Credit Suisse (Hong Kong) Limited, Credit Suisse Equities (Australia) Limited, Credit Suisse Securities (Thailand) Limited, Credit Suisse Securities (Malaysia) Sdn Bhd, Credit Suisse Singapore Branch and elsewhere in the world by the relevant authorised affiliate of the above. Research on Taiwanese securities produced by Credit Suisse Taipei Branch has been prepared by a registered Senior Business Person. Research provided to residents of Malaysia is authorised by the Head of Research for Credit Suisse Securities (Malaysia) Sdn. Bhd., to whom they should direct any queries on +603 2723 2020.

In jurisdictions where CS is not already registered or licensed to trade in securities, transactions will only be effected in accordance with applicable securities legislation, which will vary from jurisdiction to jurisdiction and may require that the trade be made in accordance with applicable exemptions from registration or licensing requirements. Non-U.S. customers wishing to effect a transaction should contact a CS entity in their local jurisdiction unless governing law permits otherwise. U.S. customers wishing to effect a transaction should do so only by contacting a representative at Credit Suisse Securities (USA) LLC in the U.S.

Please note that this report was originally prepared and issued by CS for distribution to their market professional and institutional investor customers. Recipients who are not market professional or institutional investor customers of CS should seek the advice of their independent financial advisor prior to taking any investment decision based on this report or for any necessary explanation of its contents. This research may relate to investments or services of a person outside of the UK or to other matters which are not regulated by the FSA or in respect of which the protections of the FSA for private customers and/or the UK compensation scheme may not be available, and further details as to where this may be the case are available upon request in respect of this report.

Any Nielsen Media Research material contained in this report represents Nielsen Media Research's estimates and does not represent facts. NMR has neither reviewed nor approved this report and/or any of the statements made herein.

9/18/06	24.5	25.5	NEUTRAL	

The analyst(s) responsible for preparing this research report received compensation that is based upon various factors including Credit Suisse's total revenues, a portion of which are generated by Credit Suisse's investment banking activities.

Analysts' stock ratings are defined as follows***:

Outperform: The stock's total return is expected to exceed the industry average* by at least 10-15% (or more, depending on perceived risk) over the next 12 months.

Neutral: The stock's total return is expected to be in line with the industry average* (range of $\pm 10\%$) over the next 12 months.

Underperform:** The stock's total return is expected to underperform the industry average* by 10-15% or more over the next 12 months.

**The industry average refers to the average total return of the analyst's industry coverage universe (except with respect to Asia/Pacific, Latin America and Emerging Markets, where stock ratings are relative to the relevant country index, and Credit Suisse Small and Mid-Cap Advisor stocks, where stock ratings are relative to the regional Credit Suisse Small and Mid-Cap Advisor investment universe.*

***In an effort to achieve a more balanced distribution of stock ratings, the Firm has requested that analysts maintain at least 15% of their rated coverage universe as Underperform. This guideline is subject to change depending on several factors, including general market conditions.*

***For Australian and New Zealand stocks a 7.5% threshold replaces the 10% level in all three rating definitions, with a required equity return overlay applied.

Restricted: In certain circumstances, Credit Suisse policy and/or applicable law and regulations preclude certain types of communications, including an investment recommendation, during the course of Credit Suisse's engagement in an investment banking transaction and in certain other circumstances.

Volatility Indicator [V]: A stock is defined as volatile if the stock price has moved up or down by 20% or more in a month in at least 8 of the past 24 months or the analyst expects significant volatility going forward. All Credit Suisse Small and Mid-Cap Advisor stocks are automatically rated volatile. All IPO stocks are automatically rated volatile within the first 12 months of trading.

Analysts' coverage universe weightings* are distinct from analysts' stock ratings and are based on the expected performance of an analyst's coverage universe versus the relevant broad market benchmark***:**

Overweight: Industry expected to outperform the relevant broad market benchmark over the next 12 months.

Market Weight: Industry expected to perform in-line with the relevant broad market benchmark over the next 12 months.

Underweight: Industry expected to underperform the relevant broad market benchmark over the next 12 months.

*Credit Suisse Small and Mid-Cap Advisor stocks do not have coverage universe weightings.

**An analyst's coverage universe consists of all companies covered by the analyst within the relevant sector.

***The broad market benchmark is based on the expected return of the local market index (e.g., the S&P 500 in the U.S.) over the next 12 months.

Credit Suisse's distribution of stock ratings (and banking clients) is:

Global Ratings Distribution		
Outperform/Buy*	40%	(61% banking clients)
Neutral/Hold*	42%	(57% banking clients)
Underperform/Sell*	15%	(48% banking clients)
Restricted	4%	

*For purposes of the NYSE and NASD ratings distribution disclosure requirements, our stock ratings of Outperform, Neutral, and Underperform most closely correspond to Buy, Hold, and Sell, respectively; however, the meanings are not the same, as our stock ratings are determined on a relative basis. (Please refer to definitions above.) An investor's decision to buy or sell a security should be based on investment objectives, current holdings, and other individual factors.

As of the date of this report, Credit Suisse acts as a market maker or liquidity provider in the equities securities that are the subject of this report.

CS may have issued a Trade Alert regarding this security. Trade Alerts are short term trading opportunities identified by an analyst on the basis of market events and catalysts, while stock ratings reflect an analyst's investment recommendations based on expected total return over a 12-month period relative to the relevant coverage universe. Because Trade Alerts and stock ratings reflect different assumptions and analytical methods, Trade Alerts may differ directionally from the analyst's stock rating. The author(s) of this report maintains a CS Model Portfolio that he/she regularly adjusts. The security or securities discussed in this report may be a component of the CS Model Portfolio and subject to such adjustments (which, given the composition of the CS Model Portfolio as a whole, may differ from the recommendation in this report, as well as opportunities or strategies identified in Trading Alerts concerning the same security). The CS Model Portfolio and important disclosures about it are available at www.credit-suisse.com/ti.

For disclosure information on other companies mentioned in this report, please visit the website at www.credit-suisse.com/researchdisclosures or call +1 (877) 291-2683.

Disclaimers continue on next page.

This report is not directed to, or intended for distribution to or use by, any person or entity who is a citizen or resident of or located in any locality, state, country or other jurisdiction where such distribution, publication, availability or use would be contrary to law or regulation or which would subject Credit Suisse, the Swiss bank, or its subsidiaries or its affiliates ("CS") to any registration or licensing requirement within such jurisdiction. All material presented in this report, unless specifically indicated otherwise, is under copyright to CS. None of the material, nor its content, nor any copy of it, may be altered in any way, transmitted in any way, copied or distributed to any other party, without the prior express written permission of CS. All trademarks, service marks and logos used in this report are trademarks or service marks or registered trademarks or service marks of CS or its affiliates.

The information, tools and material presented in this report are provided to you for information purposes only and are not to be used or considered as an offer or the solicitation of an offer to sell or to buy or subscribe for securities or other financial instruments. CS may not have taken any steps to ensure that the securities referred to in this report are suitable for any particular investor. CS will not treat recipients as its customers by virtue of their receiving the report. The investments or services contained or referred to in this report may not be suitable for you and it is recommended that you consult an independent investment advisor if you are in doubt about such investments or investment services. Nothing in this report constitutes investment, legal, accounting or tax advice or a representation that any investment or strategy is suitable or appropriate to your individual circumstances or otherwise constitutes a personal recommendation to you. CS does not offer advice on the tax consequences of investment and you are advised to contact an independent tax adviser. Please note in particular that the bases and levels of taxation may change.

CS believes the information and opinions in the Disclosure Appendix of this report are accurate and complete. Information and opinions presented in the other sections of the report were obtained or derived from sources CS believes are reliable, but CS makes no representations as to their accuracy or completeness. Additional information is available upon request. CS accepts no liability for loss arising from the use of the material presented in this report, except that this exclusion of liability does not apply to the extent that liability arises under specific statutes or regulations applicable to CS. This report is not to be relied upon in substitution for the exercise of independent judgment. CS may have issued, and may in the future issue, a trading call regarding this security. Trading calls are short term trading opportunities based on market events and catalysts, while stock ratings reflect investment recommendations based on expected total return over a 12-month period relative to the relevant coverage universe. Because trading calls and stock ratings reflect different assumptions and analytical methods, trading calls may differ directionally from the stock rating. In addition, CS may have issued, and may in the future issue, other reports that are inconsistent with, and reach different conclusions from, the information presented in this report. Those reports reflect the different assumptions, views and analytical methods of the analysts who prepared them and CS is under no obligation to ensure that such other reports are brought to the attention of any recipient of this report. CS is involved in many businesses that relate to companies mentioned in this report. These businesses include specialized trading, risk arbitrage, market making, and other proprietary trading.

Past performance should not be taken as an indication or guarantee of future performance, and no representation or warranty, express or implied, is made regarding future performance. Information, opinions and estimates contained in this report reflect a judgement at its original date of publication by CS and are subject to change without notice. The price, value of and income from any of the securities or financial instruments mentioned in this report can fall as well as rise. The value of securities and financial instruments is subject to exchange rate fluctuation that may have a positive or adverse effect on the price or income of such securities or financial instruments. Investors in securities such as ADR's, the values of which are influenced by currency volatility, effectively assume this risk.

Structured securities are complex instruments, typically involve a high degree of risk and are intended for sale only to sophisticated investors who are capable of understanding and assuming the risks involved. The market value of any structured security may be affected by changes in economic, financial and political factors (including, but not limited to, spot and forward interest and exchange rates), time to maturity, market conditions and volatility, and the credit quality of any issuer or reference issuer. Any investor interested in purchasing a structured product should conduct their own investigation and analysis of the product and consult with their own professional advisers as to the risks involved in making such a purchase.

Some investments discussed in this report have a high level of volatility. High volatility investments may experience sudden and large falls in their value causing losses when that investment is realised. Those losses may equal your original investment. Indeed, in the case of some investments the potential losses may exceed the amount of initial investment, in such circumstances you may be required to pay more money to support those losses. Income yields from investments may fluctuate and, in consequence, initial capital paid to make the investment may be used as part of that income yield. Some investments may not be readily realisable and it may be difficult to sell or realise those investments, similarly it may prove difficult for you to obtain reliable information about the value, or risks, to which such an investment is exposed.

- **Initiating coverage:** We are initiating coverage of Fortis Inc. with a Neutral rating and a C\$32.00 target price. Presently, Fortis possesses a compelling amount of organic growth from selected utility assets with adequate returns. To a certain extent, that utility based growth requires some ongoing funding from external sources. Over the long-term we view that growth positively. Yet, the funding requirements can often result in rather constrained share price movements.
- **Acquisitions a mainstay:** Within our coverage universe, Fortis continues to be the most acquisitive company. Moreover, the company tends to be one of the more acquisition focused utility related names in North America. Clearly, Fortis has an enviable track record with acquiring a diverse set of assets. In our view, the largely acquisition based strategy has translated into significant shareholder value over the last few years.
- **Improved capital efficiency:** From our perspective, Fortis possesses ample opportunities to become much more capital efficient. One strategy involves divesting certain non-utility assets and redeploying capital into utility assets or funding the capital program. Another option would entail divesting partial interests in selected utility assets in an asset management model approach and receiving a management fee. Regardless of approach, we believe there are some rather simple ways for Fortis to increase existing returns.
- **Valuation:** We utilize multiple valuation methodologies to obtain our C\$32.00 target price, including: a 19.5x P/E multiple of 2008 earnings; a 165 bps yield spread; and, a DCF based valuation. We initiate coverage of Fortis with a Neutral rating.

Summary and investment case

We are initiating coverage of Fortis Inc. with a Neutral rating and a C\$32.00 target price. Presently, Fortis possesses a compelling amount of organic growth from selected utility assets with adequate returns.

Rating: Neutral

Target: C\$32.00

According to recent company filings, Fortis expects 2007 gross consolidated utility capital expenditures to be roughly C\$770m. Moreover, "Fortis expects gross electric utility capital expenditures of over \$3 billion over the next 5 years which will be driven by FortisAlberta, FortisBC and the Corporation's regulated and non-regulated electric utilities in the Caribbean. Fortis expects gross gas utility capital expenditures over the next 5 years to exceed \$1 billion."

To a certain extent, that utility based growth requires some ongoing funding from external sources. Over the long-term we view that growth positively. Yet, the funding requirements can often result in rather constrained share price movements.

In addition to this significant organic growth plan, Fortis continues to be the most acquisitive within our coverage universe. Clearly, Fortis has an enviable track record with acquiring a diverse set of assets. In our view, the largely acquisition based strategy has translated into significant shareholder value over the last few years. Given the broader asset knowledge and the relative condition of the Terasen assets, we believe there is a considerable likelihood that Fortis will seek another large scale acquisition.

Notably, in our view, Fortis possesses ample opportunities to become much more capital efficient. One strategy involves divesting certain non-utility assets and redeploying capital into utility assets or funding the capital program. Another option would entail divesting partial interests in selected utility assets in an asset management model approach and receiving a management fee. Regardless of approach, we believe there are some rather simple ways for Fortis to increase existing returns. Employing such a strategy could translate into a much more compelling investment theme.

Introduction

We are initiating coverage of Fortis Inc. with a Neutral rating and a C\$32.00 target price. The Fortis investment thesis is a blend of significant organic utility growth with reasonable probability for acquisitions. Given the current risk-reward relationship and the lack of visible catalysts, we initiate coverage of Fortis with a Neutral rating and a C\$32.00 target price.

Our report is divided into three parts: (1) the growth engine; (2) financial statements; and, (3) valuation. Each of these areas is addressed in further detail below.

The growth engine

In our view, Fortis faces a growth dichotomy divided between acquisitions and incremental organic capital additions at its various utilities. Additionally, we believe the company has potential to become more capital efficient via selected asset monetisations and also via a funds management model. Given the array of topics, we have divided this section into three areas:

1. The acquisition trail;
2. Ongoing organic growth; and,
3. Capital efficiency.

These topics are addressed below.

The acquisition trail

In our view, Fortis continues to demonstrate a rather impressive ability to successfully integrate acquisitions. Additionally, we view acquisitions as somewhat central to the company's growth strategy. For instance, the company's most recent Management Discussion and Analysis stated "[t]he Corporation will continue to pursue acquisition growth opportunities in regulated gas and electric utility businesses in Canada, the Caribbean and the United States. Fortis will also pursue growth in its non-regulated businesses in support of its regulated utility growth strategy." Given the success of Fortis in past transactions, as measured in terms of financials, share price and operationally, we believe the company's current valuation and skill set may lead to some potentially value creating acquisition activity (see Exhibit 1 below).

Acquisitions are central to strategy

Exhibit 1: Selected Fortis M&A transactions

\$ in millions, unless otherwise stated

Announced Date	Asset/Company	Deal value (\$m)	Comment
7/23/2007	Delta Regina	CAD 49.95	Delta hotel located in Regina, Saskatchewan.
2/26/2007	Terasen Inc.	CAD 3,700.00	Gas distribution in British Columbia.
11/7/2006	Caribbean Utilities Co.	CAD 55.70	Acquired an additional 16% of Caribbean Utilities Co.
10/19/2006	4 hotels in western Canada	CAD 51.60	4 hotels (Holiday Inn, Best Western and Ramada) located in BC and Alberta.
8/28/2006	PPC Ltd & Atlantic Equipment & Power (Turks & Caicos) Ltd.	CAD 97.70	Electric utility that services ~80% of the Turks and Caicos Islands.
1/25/2005	3 hotels in western Canada	CAD 62.60	3 hotels in Western Canada from Greenwood Inns (Calgary, Edmonton and Winnipeg).
12/15/2004	Princeton Light & Power	CAD 3.70	PLP is an electric utility that services Princeton, BC.
5/21/2004	Belize Electric Company Ltd.	USD 3.50	Acquired the remaining 5% interest of the company.
9/17/2003	4 hotels in Ontario	CAD 43.20	4 hotels located in Ontario (Cambridge, Kitchener, Sarnia and Peterborough).
9/15/2003	Alberta Utility & British Columbia Utility (from Aquila)	CAD 1,500.00	BC and Alberta units of Aquila Inc.
2/26/2003	Granite Power Corp	CAD 8.80	Company consist of Granite Power Distribution & Granite Power Generation.
1/30/2003	Caribbean Utilities Co.	CAD 71.00	Acquired additional 3,863,695 Class A Ordinary Shares, representing approximately 15.9 per cent of the outstanding shares of the company and increased Fortis' holding to roughly 38%.
12/1/2002	Delta St John's Hotel and conference centre	CAD 25.90	Hotel in downtown St. John's, Newfoundland
5/9/2002	Cornwall Street Railway Light	CAD 67.70	City of Cornwall electric transmission & distribution utility.
4/16/2002	Kings Place	CAD 27.70	Commercial property in Fredericton, NB.
3/13/2002	Caribbean Utilities Co.	CAD 12.90	Acquired additional ~2% of the company.
3/20/2002	Niagara Power Co.	CAD 49.00	Purchase remaining 50% of Niagara Power Co.
2/1/2002	Cabot palace I	CAD 14.30	133,327 Square feet premium office tower in St. John's, Newfoundland
9/18/2001	Portfolio of properties in St. John's	CAD 8.30	Purchased TD Place commercial bldg and 6 parcels of land.
9/14/2001	Aliant Poles	CAD 46.00	Purchased 102,000 poles and related infrastructure from Aliant Telecom.
1/26/2001	Belize Electric Company Ltd.	USD 62.00	Acquired 95% of company from Duke Energy.
12/19/2000	2 Hydro generating stations	CAD 6.90	2 generating stations (6.88MW) in upper New York state.
12/14/2000	Brunswick Square Ltd.	CAD 6.20	Acquired 50% of the company Fortis doesn't own.
12/1/2000	Fort William Building and Blue cross centre	CAD 52.70	Fort William building in St. John's, Newfoundland and Blue cross centre in Moncton, New Brunswick.
2/23/2000	Caribbean Utilities Co.	CAD 79.90	Acquired 20% of the company.
12/30/1999	2 Hydro generating stations	CAD 19.77	2 generating stations (16MW) in upper New York state (Moose River & Philadelphia)
10/28/1999	Belize Electricity Ltd.	CAD 36.80	Acquired 67% interest in the main commercial generator, transmitter & distributor of electricity in Belize.
8/31/1999	Brunswick Square Ltd.	CAD 10.12	Acquired 50% of the company by Fortis Properties.
1/31/1999	Mount Peyton	CAD 2.20	Acquired all common shares and notes payable.
	Total USD	USD 65.50	
	Total CAD	CAD 6,110.64

For a number of reasons we believe there is a significant possibility of accelerated utility mergers and acquisitions activity. One reason is the repeal of the Public Utility Holding Company Act that does make selected acquisition activities less challenging. Additionally,

we believe the increased interest of pension funds and private equity in regulated utility assets is just at the beginning of a more meaningful trend. Exhibit 2 below highlights selected mergers and acquisition activity in the last few years.

Source: Edison Electric Institute, Bloomberg and Credit Suisse

Clearly, there is a very competitive market for utility acquisitions given the sheer size of the utility market, we do not foresee increased M&A activity significantly impacting the company's acquisition strategy, however, robust competition might result in returns compression.

Increased M&A activity
might compress returns

In terms of acquisitions, we believe Fortis has a few advantages over others, including:

- With the recent Terasen acquisition, Fortis has growing expertise with both electric and gas utilities;
- Larger size will allow it to look at a larger spectrum of potential target companies;
- A proven ability to effectively integrate acquisitions;
- A rather strong appetite for yield oriented securities in Canada;
- Canada's rather benign interest rate environment;
- Bought deal financing commonly employed in Canada; and,
- Canadian dollar strength versus US players.

Fortis possesses a number of absolute and relative advantages over some other competitors

A notable aspect of the company's penchant for acquisitions and its rather robust organic growth (discussed in greater detail below) is the need for external equity. Quite obviously, external sources of funding are typically required for larger scale acquisitions. Yet, organic growth at some of the Fortis utilities has also required external equity funding. Exhibit 3 below highlights external equity raised in the last few years.

Exhibit 3: Selected equity type financing

Considering the company's acquisition track record, we do not believe the rather frequent forays into the equity market are overly problematic. Yet, investors should be aware that part of the company's existing embedded growth profile is based upon an ability to effectively access capital markets. Thus, the need for capital market access can cast a significant overhang on the stock.

Organic growth

In our view, capital market access is critical to Fortis, in part, because of the significant amount of growth within its core utility assets. Exhibit 4 below highlights the substantial amount of capital additions over the last ten years to selected Fortis assets.

Exhibit 4: Selected Fortis historical yearly capital expenditures

C\$ in millions, unless otherwise stated

Capital Expenditure	1997	1998	1999	2000	2001	2002	2003	2004	2005	2006

Source: Company data and Credit Suisse

As evidenced by Exhibit 5 below, the capital program has been significant in relation to the total assets for each business segment.

Exhibit 5: Capital expenditure as a percentage of total assets

Significant capital expenditure over the last ten years

Source: Company data and Credit Suisse

Asset additions are important for a regulated utility's growth prospects. Increases in assets often reflect rate base growth that, all things being equal, translates into earnings growth. The combination of acquisitions and asset growth has translated into substantial market cap growth as in Exhibit 6 below.

Exhibit 6: Fortis Inc. market capitalization and stock price growth

C\$ in millions, unless otherwise stated

Source: Reuters and Credit Suisse

The market cap growth and share price performance is partially attributable to significant asset growth for the company's acquisition strategy and embedded organic growth.

Exhibit 7: Fortis Inc. asset growth

C\$ in millions, unless otherwise stated

Source: Company data and Credit Suisse

According to recent company filings, Fortis expects 2007 gross consolidated utility capital expenditures to be roughly C\$770m. Moreover, "Fortis expects gross electric utility capital expenditures of over \$3 billion over the next 5 years which will be driven by FortisAlberta, FortisBC and the Corporation's regulated and non-regulated electric utilities in the Caribbean. Fortis expects gross gas utility capital expenditures over the next 5 years to exceed \$1 billion." Clearly, this level of utility capital expenditures is likely to translate into an ongoing source of somewhat predictable and steady earnings growth.

Steady and predictable utility growth in the next five years

Capital efficiency

From our perspective, Fortis possesses ample opportunities to become much more capital efficient. One strategy involves divesting certain non-utility assets and redeploying capital into utility assets or funding the capital program. Another option would entail divesting partial interests in selected utility assets in an asset management model approach and receiving a management fee. Regardless of approach, we believe there are some rather simple ways for Fortis to increase existing returns.

Generally, we continue to prefer pure-play utility companies without an undue amount of non-core asset exposure. Historically, non-core assets (especially real estate) have been somewhat commonplace for many utilities. Fortis has been no exception to that approach. Notably, the mix of commercial and hospitality real estate assets held by Fortis have been positive contributors and also provide the company a bit of financial flexibility for a selection of reasons. Given the valuation of selected real estate assets, we believe any such monetisation of these assets would likely be favourable for the stock. Additionally, given the recent acquisitions, Fortis Properties continues to increase in scale and scope, which may make it much more attractive for acquisition or monetisation. Yet, for a number of reasons, we continue to believe there is a rather low probability of either of those events occurring.

Opportunities for improved capital efficiency

Even discounting the potential monetization of assets that we would consider to be non-core, we believe Fortis possesses considerable potential to become much more capital efficient. Given the significant interest in infrastructure assets by many investors seeking long-dated types of return, Fortis could easily divest portions of its existing asset base to pension fund investors and charge a management fee for their operational and management expertise. This type of approach could significantly improve capital efficiency and returns on capital. In addition, this asset management approach could also free-up capital that could be used for future acquisitions.

Exhibit 8 highlights an asset management approach as an illustrative example only.

Exhibit 8: Asset management example

C\$ in millions, unless otherwise stated

Regulated Asset	3,000.0
Deemed equity rate	33.3%
Allowed rate of return	10.0%
Wholly owned earnings	100.0
Wholly owned returns	10.0%
Capital efficient model	
Ownership	20.0%
Management fee on remaining 80%	1.0%
Earnings on 20%	20.0
Earnings on 80% (mgmt fee)	0.8
Total earnings	20.8
Return (capital efficient model)	10.4%

Source: Credit Suisse estimates

Obviously, the above example is subject to a multitude of variables. Yet, we believe this type of approach could create value for equity holders with higher returns and enhanced capital efficiency. Conceptually, the above approach is somewhat similar to that of many private and public infrastructure specific funds. Considering the management approach and style often employed at Fortis, we believe the company may be poised to employ this asset management type of approach.

Asset management approach could enhance returns

Financial Statements

Naturally, one major area of focus for investors should be the rather extensive capital program that continues at Fortis. In 2006, Fortis invested nearly C\$500m in capital expenditures across various businesses. With the most recent financial results, Fortis had expectations that it would have gross consolidated utility capital expenditures of roughly C\$770m. Moreover, Fortis expects gross utility capital expenditures to total more than C\$4 billion over the next five years. A substantial amount of the Fortis capital program continues to be allocated to the company's western Canadian based utilities: FortisAlberta, FortisBC. For the next few years, we expect this capital program to be funded by a combination of internally generated operating cash flows, debt, preferred securities, and common equity.

As with all the companies within our coverage universe, we model Fortis over an extended time period. Our explicit financial model extends to 2025; however, we only have significant visibility with most of Fortis businesses for the next five years. Therefore, our financial commentary below focuses on the period from 2007-2011. As a summary, we provide the Exhibit 9 below.

Exhibit 9: Fortis summary statistics

Source: Company data and Credit Suisse estimates

Selected highlights of our cash flow forecast include:

- Roughly, C\$300 million of external equity required from 2008 to 2011; and,
- During our forecast period of 2008 to 2011, an average of C\$836 million of growth capital expenditures per year.

A fairly robust capital program in the near term

A critical part of any long-cycle, capital intensive business is maintaining a healthy balance sheet. Our summary balance sheet appears below.

Exhibit 12: Summary balance sheet statement

C\$ in millions, unless otherwise stated

Balance Sheet	2006A	2007E	2008E	2009E	2010E	2011E

Source: Company data and Credit Suisse estimates

Selected balance sheet highlights, include:

- From 2007-2011 an average return on equity of 8.2%;
- An 19.9% increase in assets from 2007-2011; and,
- An average unadjusted debt/total capitalization of 63% over the next 19 years peaking at 68% in 2007.

Valuation

Consistent with our past practice, we utilize multiple valuation methodologies to obtain our Fortis target price and rating. Our Neutral rating and C\$32.00 target price are largely the result of three distinct types of analysis, including:

- (1) multiple analyses;
- (2) yield analyses;
- (3) discounted cash flow.

Rating: Neutral

Target: C\$32.00

Each of these areas will be addressed in the sections below.

For comparative purposes, we used FactSet historical datasets for Canadian Utilities Ltd., Emera Inc., Enbridge Inc., TransAlta Corp., and TransCanada Corp. that appear in many tables throughout this section. Comparisons of companies within the energy infrastructure sector have been challenging for many reasons, including: business mix; asset quality; regulatory regime; the nature and extent of commodity exposure; and, business risks. For many investors, these companies are reasonably contrasted investment vehicles. Thus, our relative valuation section will focus upon these companies. A brief discussion of the comparative companies is included in Appendix I, and a comparative valuation table in Appendix II.

As a caveat, investors should be aware that much of the valuation data was obtained from FactSet. Therefore, the data should be internally consistent with FactSet's approach, but it may not be entirely consistent with other methods of financial reporting or analysis. From our perspective, the potential utility and internal consistency of the FactSet data outweighs any apparent inconsistency between calculation methods. Yet, investors should be aware of the above caveat.

Multiple analyses

We considered three types of multiple based analysis in this section: (a) price-to-earnings; (b) price-to-book; and, (c) EV/EBITDA.

Price-to-earnings

According to FactSet data, over the last ten years, Fortis has traded at an average trailing P/E multiple of 16.0x within a range of 12.4x-22.8x. Specifically for Fortis, we provide a statistical 10-year summary in Exhibit 14.

Exhibit 13: Historical trailing price to earnings ratio

Source: FactSet and Credit Suisse

Exhibit 14: 10 yr P/E

Mean	16.0x
Median	15.7x
Standard Deviation	2.1
Range	10.4
Minimum	12.4x
Maximum	22.8x

Source: FactSet and Credit Suisse

Our comparative trailing earnings multiple analysis appears in the Exhibit 15 below.

Exhibit 15: Comparable company historical trailing P/E multiples

	Canadian Utilities Ltd	Emera Inc.	Enbridge Inc.	Fortis Inc. (Canada)	TransAlta Corp.	TransCanada Corp.
Avg. all available yrs	14.4x	14.9x	17.0x	13.2x	65.3x	19.6x
1 year average	17.1x	18.3x	20.5x	19.9x	306.4x	17.1x
2 year average	17.9x	18.1x	21.3x	18.8x	167.1x	15.8x
3 year average	16.7x	17.2x	20.1x	18.1x	120.1x	15.7x
4 year average	16.0x	17.0x	18.6x	17.3x	95.0x	15.6x
5 year average	15.3x	17.0x	18.8x	16.6x	83.3x	15.5x
10 year average	14.9x	16.1x	18.4x	16.0x	65.3x	15.9x

Source: FactSet and Credit Suisse

Given the magnitude of Fortis' capital program in the near term, we believe the company faces potentially fairly meaningful earnings contributions in the coming years. As a result we believe Fortis will likely trade at slightly higher earnings multiples than the historical two year average for the next several years. However, our longer-term earnings outlook is less robust primarily due to lack of visible growth. In Exhibit 16, we have discounted future earnings streams at a rate of 5%.

Exhibit 16: Share price based on future earnings discounted at 5% at various multiples

	2008	2009	2010	2011
12.0x	19.15	18.05	17.60	17.35
14.0x	22.34	21.06	20.54	20.25
16.0x	25.54	24.07	23.47	23.14
18.0x	28.73	27.08	26.41	26.03
20.0x	31.92	30.09	29.34	28.92
22.0x	35.11	33.09	32.27	31.81
24.0x	38.30	36.10	35.21	34.71

Source: Credit Suisse estimates

Obviously, companies with long duration assets like Fortis are somewhat sensitive and susceptible to changes in interest rates (as will be address in several sections below).

Given the potential for a slightly upward moving yield curve, we have applied a multiple slightly higher than the 2-year average multiple. On a price-earnings basis, we utilize a 19.5x multiple to obtain our C\$32.00 target price.

Price-to-book

On an historic basis, Fortis has traded at a 10-year average price-to-book multiple of 1.6x and within a range of 1.1x-2.4x. A statistical summary of the company's price-to-book ratio appears below in tabular form and as a chart.

Exhibit 17: Historical price to book ratio

Source: FactSet and Credit Suisse

Exhibit 18: 10 yr P/B

Mean	1.6x
Median	1.6x
Standard Deviation	0.3
Range	1.3
Minimum	1.1x
Maximum	2.4x

Source: FactSet and Credit Suisse

As evidenced by the table below, Fortis consistently trades at a lower price-to-book multiple than many of its peers.

Exhibit 19: Comparable company historical P/B multiples

	Canadian Utilities Ltd.	Emera Inc.	Enbridge Inc.	Fortis Inc. (Canada)	TransAlta Corp.	TransCanada Corp.
Avg. all available yrs	1.8x	1.5x	2.5x	1.4x	1.8x	1.8x
1 year average	2.5x	1.7x	2.9x	2.0x	2.4x	2.3x
2 year average	2.4x	1.6x	2.9x	2.0x	2.1x	2.3x
3 year average	2.3x	1.6x	2.9x	1.9x	1.9x	2.3x
4 year average	2.2x	1.6x	2.8x	1.9x	1.8x	2.3x
5 year average	2.1x	1.5x	2.7x	1.8x	1.7x	2.2x
10 year average	2.1x	1.5x	2.7x	1.6x	1.8x	1.9x

Source: FactSet and Credit Suisse

Similar to our price-to-earnings analysis, we have considered our forecast book value over multiple time frames in the matrix below

Exhibit 20: Share value based on future book value per share at different multiples

	2007	2008	2009	2010	2011
1.0x	16.09	16.18	17.02	17.37	18.20
1.2x	19.31	19.42	20.42	20.85	21.84
1.4x	22.53	22.65	23.82	24.32	25.47
1.6x	25.75	25.89	27.23	27.80	29.11
1.8x	28.97	29.12	30.63	31.27	32.75
2.0x	32.19	32.36	34.03	34.75	36.39
2.2x	35.41	35.60	37.44	38.22	40.03
2.4x	38.63	38.83	40.84	41.70	43.67

Source: Credit Suisse estimates

Our C\$32.00 target price equates to a 2.0x price-to-book multiple applied to our year end 2008 book value per share estimate. This multiple represents the one and two year historical average price-to-book multiple of the company.

EV/EBITDA

Our analysis of 10-years of FactSet data concluded that Fortis' average EV/EBITDA multiple has been 8.8x and within a range of 6.4x to 13.9x. A statistical summary and a chart appear below.

Exhibit 21: Historical EV/EBITDA multiple

Source: FactSet and Credit Suisse

Exhibit 22: 10 yr EV/EBITDA

Mean	8.8x
Median	8.5x
Standard Deviation	1.7
Range	7.6
Minimum	6.4x
Maximum	13.9x

Source: FactSet and Credit Suisse

Given the lack of longer-term visible growth prospects, we believe this multiple is likely to remain somewhat constant over time. A valuation matrix appears below

Exhibit 23: Comparable company historical EV/EBITDA multiples

	Canadian Utilities Ltd	Emera Inc.	Enbridge Inc.	Fortis Inc. (Canada)	TransAlta Corp.	TransCanada Corp.
Avg. all available yrs	6.7x	8.6x	9.8x	7.5x	7.9x	8.3x
1 year average	8.2x	8.9x	12.3x	11.2x	13.4x	9.2x
2 year average	8.1x	9.1x	12.1x	10.9x	11.4x	8.9x
3 year average	7.8x	8.8x	11.5x	10.9x	10.5x	8.9x
4 year average	7.7x	8.9x	11.3x	10.4x	10.2x	8.7x
5 year average	7.5x	9.1x	11.5x	10.1x	10.5x	8.5x
10 year average	7.2x	9.0x	10.9x	8.8x	9.3x	8.8x

Source: FactSet and Credit Suisse

As a result of the company's large capital program in the near-term, but limited longer-term visibility, we believe EV/EBITDA multiples to remain in line with the two-year historical average.

Exhibit 24: Share value based on forecasted future EBITDA at different multiples

	2007	2008	2009	2010	2011
9.0x	10.65	20.62	20.72	21.76	22.55
9.5x	13.04	23.62	23.77	24.97	25.84
10.0x	15.42	26.62	26.83	28.18	29.13
10.5x	17.81	29.62	29.89	31.38	32.42
11.0x	20.20	32.62	32.95	34.59	35.71
11.5x	22.58	35.62	36.01	37.80	39.00
12.0x	24.97	38.63	39.07	41.01	42.29
12.5x	27.36	41.63	42.13	44.21	45.58
13.0x	29.75	44.63	45.19	47.42	48.87

Source: Credit Suisse estimates

Our C\$32.00 target price is obtained by applying a 10.8x multiple which is slightly below the 2-year average.

Yield analyses

We believe yield related analysis must address three specific areas: (a) dividend yield; (b) the dividend yield spread; and, (c) the dividend discount model.

Dividend yield

According to Bloomberg data, Fortis has traded at an average dividend yield of 4.0% over the last 10 years and within a range of 2.5% to 6.6% (See Exhibit 25 and Exhibit 26).

Exhibit 25: Historical Fortis dividend yield

Source: Bloomberg and Credit Suisse

Exhibit 26: 10 yr dividend yield

Mean	4.0%
Median	3.9%
Standard Deviation	0.0097
Range	4.1%
Minimum	2.5%
Maximum	6.6%

Source: Bloomberg and Credit Suisse

For several reasons, we believe these metrics should be compared to movements in the Canadian 10-year bond yield (Exhibit 27).

Exhibit 27: Canadian 10 year bond yield

Source: Bloomberg and Credit Suisse

The sensitivity of dividend yield valuation is clearly evidence in the matrix below for current and estimated future dividend streams at various targeted yields.

Exhibit 28: Share value based on future dividends at various dividend yields

	2007	2008	2009	2010	2011
2.4%	34.17	38.33	41.67	43.33	45.00
2.6%	31.54	35.38	38.46	40.00	41.54
2.8%	29.29	32.86	35.71	37.14	38.57
3.0%	27.33	30.67	33.33	34.67	36.00
3.2%	25.63	28.75	31.25	32.50	33.75
3.4%	24.12	27.06	29.41	30.59	31.76
3.6%	22.78	25.56	27.78	28.89	30.00
3.8%	21.58	24.21	26.32	27.37	28.42
4.0%	20.50	23.00	25.00	26.00	27.00
4.2%	19.52	21.90	23.81	24.76	25.71
4.4%	18.64	20.91	22.73	23.64	24.55

Source: Credit Suisse estimates

In addition, we have discounted our projected future dividend payments at 5% and provided the valuation sensitivity in the table below.

Exhibit 29: Share value based on future dividend discounted at 5% at various multiples

	2008	2009	2010	2011
2.40%	37.41	38.73	38.36	37.94
2.60%	34.53	35.75	35.41	35.02
2.80%	32.07	33.19	32.88	32.52
3.00%	29.93	30.98	30.69	30.35
3.20%	28.06	29.04	28.77	28.45
3.40%	26.41	27.34	27.08	26.78
3.60%	24.94	25.82	25.57	25.29
3.80%	23.63	24.46	24.23	23.96
4.00%	22.45	23.24	23.01	22.76
4.20%	21.38	22.13	21.92	21.68
4.40%	20.41	21.12	20.92	20.69

Source: Credit Suisse estimates

Our C\$32.00 target price is based upon a 2.85% dividend yield. That figure also equates to our 2011 projected dividend being discounted at 5% and applying a 2.9% dividend yield. The 2.85% dividend yield is slightly lower than the company's recent yield levels; and is closer to the lower end of the 10-year range.

Dividend yield spread

We believe that one should not solely rely upon dividend yield based metrics. In our view, many yield based metrics should be considered in the context of comparable nominal interest rates available in the marketplace. For a number of reasons, we have considered the company's historic dividend yield against the Government of Canada 10-year bond yield on a spread basis. Exhibit 30 and Exhibit 31 highlight this relationship.

Exhibit 30: Dividend yield spread versus the Canadian 10 year (bps)

Source: Bloomberg and Credit Suisse

Exhibit 31: 10 yr yield spread

Mean	-94.84
Median	-103.85
Standard Deviation	46.24
Range	239.97
Minimum	-186.41
Maximum	53.56

Source: Bloomberg and Credit Suisse

Naturally, the yield spread relationship highlights the potential for meaningful sensitivity to interest rate movements. Many fundamental reasons exist for this relationship, however, we must note that interest rate sensitive investments like Fortis usually do not exhibit perfect correlations. Clearly, some near-term uncertainty has impacted the valuation of many interest rate sensitive investment vehicles. Yet, in historic terms, the interest rate environment continues to be extremely accommodative which underpins often robust valuations for companies like Fortis. Thus, we apply a 165 bps spread to a moderate outlook on 10-year Canadian bond yield to obtain our C\$32.00 target price.

The dividend discount model

Many energy infrastructure investors often focus on dividends as the cash returned to shareholders is an easily comparable metric across companies and regions. Accounting impacts are less meaningful when considering the actual cash received by a shareholder, however, income taxes may play a significant role across regions. Regardless of these factors, the dividend discount model essentially provides a very simplified discounted cash flow based valuation tool. A simplified dividend discount model is based on the following formulae:

$$P_0 = D_1 / K_S \quad P_0 = D_1 / (K_S - g)$$

Where:

P_0 = Share price today

D_1 = Dividend one period from now

G = Expected growth rate in cash dividends

K_S = Required rate of return

As one would expect, there is a significant amount of valuation sensitivity with a dividend discount model analysis. We capture part of that sensitivity in the table below.

Exhibit 32: Share value under different dividend discount model assumptions

		Cost of equity				
		7.5%	8.5%	9.5%	10.5%	11.5%
Dividend Growth	3.0%	20.44	16.73	14.15	12.27	10.82
	4.0%	26.29	20.44	16.73	14.15	12.27
	5.0%	36.80	26.29	20.44	16.73	14.15
	6.0%	61.33	36.80	26.29	20.44	16.73
	7.0%	184.00	61.33	36.80	26.29	20.44
	8.0%	(184.00)	184.00	61.33	36.80	26.29
	9.0%	(61.33)	(184.00)	184.00	61.33	36.80

Source: Company data, Credit Suisse estimates

Our financial model forecasts roughly a compound annual dividend growth rate of 7% from 2007 to 2011 which would equate to a value significantly above our current target price using a reasonable cost-of-equity. Obviously, many limitations exist with valuing only dividend streams. Therefore, we now address our discounted cash flow analysis.

Discounted cash flow

Given the long asset life associated with many infrastructure assets, we do not believe that simple multiples effectively convey all of the potential value within these types of companies. Therefore, we place a significant amount of emphasis upon longer-term explicit financial models which then utilize discounted cash flows to ascertain corporate value. Admittedly, there is a considerable amount of valuation variability arising from using a DCF valuation methodology when one considers the tremendous sensitivity of the cost of capital and asset turns on valuation.

Longer-term cash flow driven valuations are preferred, however, many limitations exist

In our view, that valuation variability is outweighed by the benefits of long-term forecasts that attempt to comprehend the real economic value of long duration assets. For instance, there is an inherent mismatch between the economic value of many infrastructure assets and the accounting life of an asset. Quite often the economic value of an asset can extend beyond 50 years and, sometimes, well beyond 100 years with a relatively small amount of sustaining capital. Yet, the accounting life of these assets does not usually exceed 40 years and is often 25 years. As a result of this inherent mismatch, we believe longer-term valuations are necessary to properly ascertain corporate value.

Obviously, a tremendous number of limitations exist for any discounted cash flow analysis and method of valuation. Most importantly, any DCF approach largely consists of assumptions being built upon assumptions. These assumptions are perhaps even more challenging given the capital intensity of the utilities business which can make the precise timing of cash flows and capital projects very problematic. Even with these limitations, we believe it necessary and worthwhile to focus on our Fortis valuation with our explicit 5 year forecast period.

Our DCF valuation approach consists of three steps:

1. Generation of free cash flow forecast;
2. Estimation of a discount rate; and,
3. Discounting the free cash flows to the present.

Considering the above, the DCF analysis starting point is our free cash flow forecast. A summary version of our financial model appears in Exhibit 33 below. Our summary is based upon our explicit financial forecast until 2011 that was outlined in a previous section of this report.

Exhibit 33: Free cash flow summary

C\$ in millions, unless otherwise stated

Free cash flow to the firm	2007E	2008E	2009E	2010E	2011E
Operating Cash Flow	373.3	582.4	607.5	638.8	672.9
After tax interest cost	207.7	255.8	270.5	284.6	298.2
Capex	(772.3)	(836.5)	(836.5)	(836.5)	(836.5)
Dispositions	2.8	-	-	-	-
Free cash flow to firm	(188.5)	1.7	41.5	86.9	134.6

Source: Credit Suisse estimates

As expected with Fortis' significant capital program, negative free cash flow occurs in 2007 and very little positive free cash is generated in 2008 and 2009 of our forecast periods.

In the second step of our DCF analysis, we employ two methods of calculation to obtain our cost of equity: (a) the capital asset pricing model (CAPM); and, (b) a bond yield plus risk premium approach.

CAPM: Cost of equity = Risk free rate + (Beta x Market risk premium)

Therefore, using a risk free rate of 4.5%, a beta of 0.613 (obtained from Bloomberg) and a equity risk premium of 3.5%, we obtain a cost of equity of roughly 7.4%. A corporate bond yield approach (corporate bond + equity risk premium) generated a slightly higher cost of equity based upon a corporate bond yield of 5.65% and an equity risk premium of 350 bps.

With these assumptions and using the free cash flow to the firm methodology, we generated the following range of valuations highlighted in Exhibit 34.

Exhibit 34: Share value under different DCF assumptions

		WACC				
		4.5%	5.0%	5.5%	6.0%	6.5%
Long-term growth rate	1.00%	32.15	24.44	18.32	13.32	9.14
	1.25%	34.62	26.18	19.58	14.26	9.86
	1.50%	37.51	28.17	21.00	15.31	10.65
	1.75%	40.92	30.46	22.61	16.48	11.52
	2.00%	45.01	33.13	24.46	17.80	12.50

Source: Credit Suisse estimates

Upon considering the relatively benign Canadian interest rate environment, a weighted average cost of capital of roughly 5.12% is reasonably supported. As evidenced by the matrix appearing in Exhibit 34 and a modest long-term growth rate of 2.0%, our DCF value falls within a range of C\$30.00 to C\$35.00.

Valuation summary

We are initiating coverage of Fortis Inc. with a Neutral rating and a C\$32.00 target price. A significant portion of our analysis is based upon a very large capital program in the near to medium term, with a lack of visible growth in the longer term. A summary of our various valuation approaches appears in Exhibit 35 below.

Rating: Neutral

Target price: C\$32.00

Exhibit 35: Valuation summary

Valuation summary	Metric	Value	Comment
Price to earnings	19.5x	~C\$31.90	A slightly higher than the 2 year historic P/E multiple is reflective of the significant capital program over the next few years.
Price to book	2.0x	~C\$32.40	Applying the one and two year average price-to-book multiple on our forecast year end 2008.
EV/EBITDA	10.8x	~C\$32.00	Applying a slightly lower multiple than the two year EV/EBITDA multiple on our 2008 forecast year.
Dividend yield	2.85%	~C\$32.30	Slightly lower than the current dividend yield as a result of the current low-interest rate environment and ongoing yield affection.
Yield spread	165 bps	~C\$32.30	Represents a 165 basis point spread to the forecast 10 year Canadian government bond yield.
Discounted cash flow	-	~C\$30.00 to C\$35.00	We utilise our explicit forecast up to year 2025 combined with a 2% long-term growth rate and a 5.12% weighted average cost of capital to obtain our discounted cash flow valuation driven target price.

Source: Company data and Credit Suisse estimates

We continue to believe that Fortis has strong organic growth in key areas such as British Columbia, Alberta and Caribbean. However, the company does not have any visible growth in the longer term. This combination of factors leads to our initiation of coverage with a Neutral rating and a C\$32.00 target price.

Risks

We believe Fortis faces a number of business and financial risks, including:

- **Increasing competition:** We believe Fortis will face a tremendous amount of competition for transactions; that may decrease prospective returns.
- **Commodity prices:** Fortis has some direct and indirect commodity exposure that could meaningfully impact our investment thesis.
- **Interest rate movements:** A number of sources of interest rate risk exist, including: refinancing; regulatory related earnings streams and associated formulae; and, relative investment value.
- **Regulation:** Some of the company's assets are subject to various forms of regulation and, therefore, investors should not underestimate the potential impact of changes to the regulatory environment.
- **Energy market dynamics:** Fortis faces a multitude of factors related to broader energy markets that it cannot control, including: fossil fuel commodity prices; electricity prices; weather; demand management activities; substitution activities; fuel availability; and, water levels. These factors, among others, may ultimately affect our investment thesis.
- **Access to capital markets:** Given the company's capital program and balance sheet objectives, we believe that access to capital markets on reasonable terms is critical.
- **Environmental rules:** Emissions regimes are still in development in Canada and certain forms of regulation may meaningfully impact the company's utility and non-regulated generation businesses.

Appendix I: Comparable company descriptions

Exhibit 36: Comparable company descriptions

Company	Ticker	Description
Canadian Utilities Ltd.	CU.TO	Canadian Utilities Limited is a diversified, Canadian based, international group of companies engaged in Power Generation, Utilities (natural gas and electricity transmission and distribution) and Global Enterprises, with companies active in technology, logistics and energy services.
Emera Inc	EMA.TO	Emera Inc. is an energy and services company with 570,000 customers, \$4.0 billion in assets. The company operates two regulated utility subsidiaries in northeast North America - Nova Scotia Power and Bangor Hydro-Electric - that together account for over 90% of revenues. In addition, Emera owns a 12.9% equity interest in the Maritimes & Northeast Pipeline, which delivers Nova Scotia's offshore natural gas to markets in Maritime Canada and New England.
Enbridge Inc.	ENB.TO	Enbridge operates, in Canada and the U.S., the world's longest crude oil and liquids pipeline system. Its pipeline systems have operated for over 55 years and now comprise approximately 13,500 kilometres (8,500 miles) of pipeline, delivering more than 2 million barrels per day of crude oil and liquids.
TransAlta Corp.	TA.TO	TransAlta is a power generation and energy marketing company with approximately 8,500 MW of generating capacity. TransAlta has generating facilities in Canada, United States, Australia and Mexico. The company has a diverse fuel mix in (coal, natural gas, hydro electric and renewables).
TransCanada Corp.	TRP.TO	TransCanada is a leader in the responsible development and reliable operation of North American energy infrastructure. Our network of more than 59,000 kilometres (36,500 miles) of pipeline taps into virtually all major gas supply basins in North America. TransCanada is one of the continent's largest providers of gas storage and related services with approximately 360 billion cubic feet of storage capacity. A growing independent power producer, TransCanada also owns, or has interests in, approximately 7,700 megawatts of power generation.

Appendix V: Corporate governance highlights

For greater details on Fortis' corporate governance practices we believe investors should consult various securities filings. Yet, we highlight selected corporate governance practices below, including:

- A majority of Directors are independent.
- The company "has adopted a written code for the directors, officers and employees."
- The Governance and Nominating Committee shall "carry out procedures specified by the Board for assessing the effectiveness of the Board, the directors, and each Board committee".

Appendix VI: Selected company assets

Exhibit 41: Selected company assets

Regulated Utilities - Canada	
Terasen	Principal natural gas distributor in British Columbia, serving over 900,000 customers, or 95% of natural gas users in the province. It also provides propane distribution to approximately 2,400 customers in the Whistler area.
FortisAlberta	FortisAlberta owns and/or operates about 105,000 kilometers of distribution lines, and distributes electricity generated by other market participants to end-use customers in southern and central Alberta. The company serves more than 440,000 customers.
FortisBC	FortisBC's assets include about 6,750 kilometers of distribution lines and four hydroelectric power plants with a combined capacity of 235 MW. The company generates approximately 45 percent of its electricity requirements and the balance is met through power purchase agreements. FortisBC operates in the southern interior of British Columbia and serves approximately 152,000 customers.
Newfoundland Power	Newfoundland Power operates an integrated generation, transmission, and distribution system in Newfoundland. It has an installed generating capacity of approximately 136 MW, of which 92 MW is hydroelectric in nature. The company serves approximately 230,000 customers.
Maritime Electric	Maritime Electric generates, transmits, and distributes electricity in the Prince Edward Island. It maintains on-island generating facilities at Charlottetown and Bord.
FortisOntario	FortisOntario is composed of Canadian Niagara Power and Cornwall Electric. It serves approximately 52,000 customers in Fort Erie, Port Colborne and Gananoque in the province of Ontario. It also own an interest in Westario Power and Rideau St. Lawrence.
Regulated Utilities - Caribbean	
Belize Electric	Belize Electricity is the primary distributor of electricity in Belize, Central America. It caters to more than 71,000 customers. Fortis holds a 70.1 percent interest in Belize Electricity.
Caribbean Utilities	Caribbean Utilities generates, transmits, and distributes electricity in Grand Cayman, Cayman Islands. The company has installed generating capacity of 120 MW. Fortis holds an approximate 54% controlling interest.
Fortis Turks and Caicos	Fortis Turks and Caicos distributes electricity in the Turks and Caicos Islands as per 50-year licenses that will expire in 2036 and 2037. It has an installed diesel-fired generating capacity of approximately 37 MW. Fortis Inc. acquired Fortis Turks and Caicos in August 2006.
Non-Regulated	
Fortis Generation	Fortis Generation operates non-regulated generating assets in Belize, Ontario, central Newfoundland, British Columbia, and Upper New York State. It has a generating capacity of 195 MW, of which 190 MW is hydroelectric generation.
Fortis Properties	Fortis Properties owns and operates 19 hotels (more than 3,500 rooms) in eight Canadian provinces and 2.8 million square feet of commercial real estate primarily in Atlantic Canada.

9/18/06	24.5	25.5	NEUTRAL	
3/16/07	27.15		NOT COVERED	

The analyst(s) responsible for preparing this research report received compensation that is based upon various factors including Credit Suisse's total revenues, a portion of which are generated by Credit Suisse's investment banking activities.

Analysts' stock ratings are defined as follows*:**

Outperform: The stock's total return is expected to exceed the industry average* by at least 10-15% (or more, depending on perceived risk) over the next 12 months.

Neutral: The stock's total return is expected to be in line with the industry average* (range of $\pm 10\%$) over the next 12 months.

Underperform:** The stock's total return is expected to underperform the industry average* by 10-15% or more over the next 12 months.

**The industry average refers to the average total return of the analyst's industry coverage universe (except with respect to Asia/Pacific, Latin America and Emerging Markets, where stock ratings are relative to the relevant country index.*

***In an effort to achieve a more balanced distribution of stock ratings, the Firm has requested that analysts maintain at least 15% of their rated coverage universe as Underperform. This guideline is subject to change depending on several factors, including general market conditions.*

****For Australian and New Zealand stocks a 7.5% threshold replaces the 10% level in all three rating definitions, with a required equity return overlay applied.*

Restricted: In certain circumstances, Credit Suisse policy and/or applicable law and regulations preclude certain types of communications, including an investment recommendation, during the course of Credit Suisse's engagement in an investment banking transaction and in certain other circumstances.

Volatility Indicator [V]: A stock is defined as volatile if the stock price has moved up or down by 20% or more in a month in at least 8 of the past 24 months or the analyst expects significant volatility going forward.

Analysts' coverage universe weightings are distinct from analysts' stock ratings and are based on the expected performance of an analyst's coverage universe* versus the relevant broad market benchmark:**

Overweight: Industry expected to outperform the relevant broad market benchmark over the next 12 months.

Market Weight: Industry expected to perform in-line with the relevant broad market benchmark over the next 12 months.

Underweight: Industry expected to underperform the relevant broad market benchmark over the next 12 months.

**An analyst's coverage universe consists of all companies covered by the analyst within the relevant sector.*

***The broad market benchmark is based on the expected return of the local market index (e.g., the S&P 500 in the U.S.) over the next 12 months.*

Credit Suisse's distribution of stock ratings (and banking clients) is:

	Global Ratings Distribution	
Outperform/Buy*	46%	(58% banking clients)
Neutral/Hold*	40%	(58% banking clients)
Underperform/Sell*	12%	(54% banking clients)
Restricted	2%	

**For purposes of the NYSE and NASD ratings distribution disclosure requirements, our stock ratings of Outperform, Neutral, and Underperform most closely correspond to Buy, Hold, and Sell, respectively; however, the meanings are not the same, as our stock ratings are determined on a relative basis. (Please refer to definitions above.) An investor's decision to buy or sell a security should be based on investment objectives, current holdings, and other individual factors.*

Credit Suisse's policy is to update research reports as it deems appropriate, based on developments with the subject company, the sector or the market that may have a material impact on the research views or opinions stated herein.

Credit Suisse's policy is only to publish investment research that is impartial, independent, clear, fair and not misleading. Credit Suisse does not provide any tax advice. Any statement herein regarding any US federal tax is not intended or written to be used, and cannot be used, by any taxpayer for the purposes of avoiding any penalties.

See the Companies Mentioned section for full company names.

Price Target: (12 months) for (FTS.TO)

Method: We obtain our C\$32 target price for Fortis Inc. by using multiple valuation methodologies, yield base analysis, and discounted cash flow. We use a P/E (price/earnings) multiples of 19.5x our 2008 EPS (earnings per share) estimate of C\$1.64; we use an EV/EBITDA (enterprise value/earnings before interest, taxes, depreciation, and amortization) of 10.8x and a 165 bps yield spread.

Risks: There are a number of risk to Fortis' achievement of our C\$32.00 target price: commodity prices; weather; environmental; regulatory; access to capital markets; and, interest rates. Moreover, one should never underestimate the power of the regulator in any regulated business.

See the Companies Mentioned section for full company names.

The subject company (FTS.TO) currently is, or was during the 12-month period preceding the date of distribution of this report, a client of Credit Suisse.

Credit Suisse provided non-investment banking services, which may include Sales and Trading services, to the subject company (FTS.TO) within the past 12 months.

Credit Suisse has received compensation for products and services other than investment banking services from the subject company (FTS.TO) within the past 12 months.

Important Regional Disclosures

An analyst involved in the preparation of this report has visited certain material operations of the subject company (FTS.TO) within the past 12 months. The analyst may not have visited all material operations of the subject company. The travel expenses of the analyst in connection with such visits were not paid or reimbursed by the subject company, other than de minimus local travel expenses.

Restrictions on certain Canadian securities are indicated by the following abbreviations: NVS--Non-Voting shares; RVS--Restricted Voting Shares; SVS--Subordinate Voting Shares.

Individuals receiving this report from a Canadian investment dealer that is not affiliated with Credit Suisse should be advised that this report may not contain regulatory disclosures the non-affiliated Canadian investment dealer would be required to make if this were its own report. For Credit Suisse Securities (Canada), Inc.'s policies and procedures regarding the dissemination of equity research, please visit http://www.csfb.com/legal_terms/canada_research_policy.shtml.

The following disclosed European company/ies have estimates that comply with IFRS: IBE.MC, NG.L.

As of the date of this report, Credit Suisse acts as a market maker or liquidity provider in the equities securities that are the subject of this report.

Principal is not guaranteed in the case of equities because equity prices are variable.

Commission is the commission rate or the amount agreed with a customer when setting up an account or at anytime after that.

CS may have issued a Trade Alert regarding this security. Trade Alerts are short term trading opportunities identified by an analyst on the basis of market events and catalysts, while stock ratings reflect an analyst's investment recommendations based on expected total return over a 12-month period relative to the relevant coverage universe. Because Trade Alerts and stock ratings reflect different assumptions and analytical methods, Trade Alerts may differ directionally from the analyst's stock rating.

The author(s) of this report maintains a CS Model Portfolio that he/she regularly adjusts. The security or securities discussed in this report may be a component of the CS Model Portfolio and subject to such adjustments (which, given the composition of the CS Model Portfolio as a whole, may differ from the recommendation in this report, as well as opportunities or strategies identified in Trading Alerts concerning the same security). The CS Model Portfolio and important disclosures about it are available at www.credit-suisse.com/ti.

For Credit Suisse disclosure information on other companies mentioned in this report, please visit the website at www.credit-suisse.com/researchdisclosures or call +1 (877) 291-2683.

Disclaimers continue on next page.

This report is not directed to, or intended for distribution to or use by, any person or entity who is a citizen or resident of or located in any locality, state, country or other jurisdiction where such distribution, publication, availability or use would be contrary to law or regulation or which would subject Credit Suisse, the Swiss bank, or its subsidiaries or its affiliates ("CS") to any registration or licensing requirement within such jurisdiction. All material presented in this report, unless specifically indicated otherwise, is under copyright to CS. None of the material, nor its content, nor any copy of it, may be altered in any way, transmitted in any way, copied or distributed to any other party, without the prior express written permission of CS. All trademarks, service marks and logos used in this report are trademarks or service marks or registered trademarks or service marks of CS or its affiliates.

The information, tools and material presented in this report are provided to you for information purposes only and are not to be used or considered as an offer or the solicitation of an offer to sell or to buy or subscribe for securities or other financial instruments. CS may not have taken any steps to ensure that the securities referred to in this report are suitable for any particular investor. CS will not treat recipients as its customers by virtue of their receiving the report. The investments or services contained or referred to in this report may not be suitable for you and it is recommended that you consult an independent investment advisor if you are in doubt about such investments or investment services. Nothing in this report constitutes investment, legal, accounting or tax advice or a representation that any investment or strategy is suitable or appropriate to your individual circumstances or otherwise constitutes a personal recommendation to you. CS does not offer advice on the tax consequences of investment and you are advised to contact an independent tax adviser. Please note in particular that the bases and levels of taxation may change.

CS believes the information and opinions in the Disclosure Appendix of this report are accurate and complete. Information and opinions presented in the other sections of the report were obtained or derived from sources CS believes are reliable, but CS makes no representations as to their accuracy or completeness. Additional information is available upon request. CS accepts no liability for loss arising from the use of the material presented in this report, except that this exclusion of liability does not apply to the extent that liability arises under specific statutes or regulations applicable to CS. This report is not to be relied upon in substitution for the exercise of independent judgment. CS may have issued, and may in the future issue, a trading call regarding this security. Trading calls are short term trading opportunities based on market events and catalysts, while stock ratings reflect investment recommendations based on expected total return over a 12-month period relative to the relevant coverage universe. Because trading calls and stock ratings reflect different assumptions and analytical methods, trading calls may differ directionally from the stock rating. In addition, CS may have issued, and may in the future issue, other reports that are inconsistent with, and reach different conclusions from, the information presented in this report. Those reports reflect the different assumptions, views and analytical methods of the analysts who prepared them and CS is under no obligation to ensure that such other reports are brought to the attention of any recipient of this report. CS is involved in many businesses that relate to companies mentioned in this report. These businesses include specialized trading, risk arbitrage, market making, and other proprietary trading.

Past performance should not be taken as an indication or guarantee of future performance, and no representation or warranty, express or implied, is made regarding future performance. Information, opinions and estimates contained in this report reflect a judgement at its original date of publication by CS and are subject to change without notice. The price, value of and income from any of the securities or financial instruments mentioned in this report can fall as well as rise. The value of securities and financial instruments is subject to exchange rate fluctuation that may have a positive or adverse effect on the price or income of such securities or financial instruments. Investors in securities such as ADR's, the values of which are influenced by currency volatility, effectively assume this risk.

Structured securities are complex instruments, typically involve a high degree of risk and are intended for sale only to sophisticated investors who are capable of understanding and assuming the risks involved. The market value of any structured security may be affected by changes in economic, financial and political factors (including, but not limited to, spot and forward interest and exchange rates), time to maturity, market conditions and volatility, and the credit quality of any issuer or reference issuer. Any investor interested in purchasing a structured product should conduct their own investigation and analysis of the product and consult with their own professional advisers as to the risks involved in making such a purchase.

Some investments discussed in this report have a high level of volatility. High volatility investments may experience sudden and large falls in their value causing losses when that investment is realised. Those losses may equal your original investment. Indeed, in the case of some investments the potential losses may exceed the amount of initial investment, in such circumstances you may be required to pay more money to support those losses. Income yields from investments may fluctuate and, in consequence, initial capital paid to make the investment may be used as part of that income yield. Some investments may not be readily realisable and it may be difficult to sell or realise those investments, similarly it may prove difficult for you to obtain reliable information about the value, or risks, to which such an investment is exposed.

This report may provide the addresses of, or contain hyperlinks to, websites. Except to the extent to which the report refers to website material of CS, CS has not reviewed the linked site and takes no responsibility for the content contained therein. Such address or hyperlink (including addresses or hyperlinks to CS's own website material) is provided solely for your convenience and information and the content of the linked site does not in any way form part of this document. Accessing such website or following such link through this report or CS's website shall be at your own risk.

This report is issued and distributed in Europe (except Switzerland) by Credit Suisse Securities (Europe) Limited, One Cabot Square, London E14 4QJ, England, which is regulated in the United Kingdom by The Financial Services Authority ("FSA"). This report is being distributed in Germany by Credit Suisse Securities (Europe) Limited Niederlassung Frankfurt am Main regulated by the Bundesanstalt fuer Finanzdienstleistungsaufsicht ("BaFin"). This report is being distributed in the United States by Credit Suisse Securities (USA) LLC ; in Switzerland by Credit Suisse; in Canada by Credit Suisse Securities (Canada), Inc.; in Brazil by Banco de Investimentos Credit Suisse (Brasil) S.A.; in Japan by Credit Suisse Securities (Japan) Limited, Financial Instrument Dealers, Director of Kanto Local Finance Bureau (Financial Instruments) Number 66, a member of Japan Securities Dealers Association, The Financial Futures Association of Japan; elsewhere in Asia/Pacific by whichever of the following is the appropriately authorised entity in the relevant jurisdiction: Credit Suisse (Hong Kong) Limited, Credit Suisse Equities (Australia) Limited, Credit Suisse Securities (Thailand) Limited, Credit Suisse Securities (Malaysia) Sdn Bhd, Credit Suisse Singapore Branch and elsewhere in the world by the relevant authorised affiliate of the above. Research on Taiwanese securities produced by Credit Suisse Taipei Branch has been prepared by a registered Senior Business Person. Research provided to residents of Malaysia is authorised by the Head of Research for Credit Suisse Securities (Malaysia) Sdn. Bhd., to whom they should direct any queries on +603 2723 2020.

In jurisdictions where CS is not already registered or licensed to trade in securities, transactions will only be effected in accordance with applicable securities legislation, which will vary from jurisdiction to jurisdiction and may require that the trade be made in accordance with applicable exemptions from registration or licensing requirements. Non-U.S. customers wishing to effect a transaction should contact a CS entity in their local jurisdiction unless governing law permits otherwise. U.S. customers wishing to effect a transaction should do so only by contacting a representative at Credit Suisse Securities (USA) LLC in the U.S.

Please note that this report was originally prepared and issued by CS for distribution to their market professional and institutional investor customers. Recipients who are not market professional or institutional investor customers of CS should seek the advice of their independent financial advisor prior to taking any investment decision based on this report or for any necessary explanation of its contents. This research may relate to investments or services of a person outside of the UK or to other matters which are not regulated by the FSA or in respect of which the protections of the FSA for private customers and/or the UK compensation scheme may not be available, and further details as to where this may be the case are available upon request in respect of this report.

PRE RESULTS COMMENT

Quarterly earnings preview

- **Earnings preview:** Fortis is scheduled to report Q4 2007 earnings on or about the 7th of February. We are forecasting Q4 2007 earnings per share of C\$0.48 which is slightly higher than the Street's C\$0.45 consensus estimate and at the top end of the C\$0.42-C\$0.48 range. Given the long-cycle nature of most of our coverage universe, we do not place undue emphasis on quarterly results. Yet, we do believe certain issues will be pertinent in the quarter. Finally, in light of the company's declaration of dividend increase on the 11th of December, we do not foresee any further increase to the dividend at this time.
- **Selected issues:** With the company's results, we focus our analytical efforts on both the financial and strategic issues. From a financial perspective, we focus on three areas: (a) capital expenditure guidance and actual spend in the last quarter; (b) financing costs; and, (c) balance sheet strength. In terms of strategic issues, we consider the following to be pertinent: (a) an acquisition outlook; (b) potential for capital efficiency initiatives; and, (c) future financing plans.
- **Conference call details:** Fortis does not typically conduct conference calls associated with earnings releases.
- **Valuation:** We utilize multiple valuation methodologies to obtain our C\$32.00 target price, including: a 19.5x P/E multiple of 2008 earnings; a 165 bps yield spread; and, a DCF based valuation. We reiterate our Neutral rating.

12/4/07	27.04	32	NEUTRAL	X

The analyst(s) responsible for preparing this research report received compensation that is based upon various factors including Credit Suisse's total revenues, a portion of which are generated by Credit Suisse's investment banking activities.

Analysts' stock ratings are defined as follows***:

Outperform: The stock's total return is expected to exceed the industry average* by at least 10-15% (or more, depending on perceived risk) over the next 12 months.

Neutral: The stock's total return is expected to be in line with the industry average* (range of $\pm 10\%$) over the next 12 months.

Underperform:** The stock's total return is expected to underperform the industry average* by 10-15% or more over the next 12 months.

*The industry average refers to the average total return of the relevant country or regional index (except with respect to Europe, where stock ratings are relative to the analyst's industry coverage universe).

**In an effort to achieve a more balanced distribution of stock ratings, the Firm has requested that analysts maintain at least 15% of their rated coverage universe as Underperform. This guideline is subject to change depending on several factors, including general market conditions.

***For Australian and New Zealand stocks a 7.5% threshold replaces the 10% level in all three rating definitions, with a required equity return overlay applied.

Restricted: In certain circumstances, Credit Suisse policy and/or applicable law and regulations preclude certain types of communications, including an investment recommendation, during the course of Credit Suisse's engagement in an investment banking transaction and in certain other circumstances.

Volatility Indicator [V]: A stock is defined as volatile if the stock price has moved up or down by 20% or more in a month in at least 8 of the past 24 months or the analyst expects significant volatility going forward.

Analysts' coverage universe weightings are distinct from analysts' stock ratings and are based on the expected performance of an analyst's coverage universe* versus the relevant broad market benchmark:**

Overweight: Industry expected to outperform the relevant broad market benchmark over the next 12 months.

Market Weight: Industry expected to perform in-line with the relevant broad market benchmark over the next 12 months.

Underweight: Industry expected to underperform the relevant broad market benchmark over the next 12 months.

*An analyst's coverage universe consists of all companies covered by the analyst within the relevant sector.

**The broad market benchmark is based on the expected return of the local market index (e.g., the S&P 500 in the U.S.) over the next 12 months.

Credit Suisse's distribution of stock ratings (and banking clients) is:

Global Ratings Distribution		
Outperform/Buy*	47%	(58% banking clients)
Neutral/Hold*	38%	(57% banking clients)
Underperform/Sell*	12%	(51% banking clients)
Restricted	2%	

*For purposes of the NYSE and NASD ratings distribution disclosure requirements, our stock ratings of Outperform, Neutral, and Underperform most closely correspond to Buy, Hold, and Sell, respectively; however, the meanings are not the same, as our stock ratings are determined on a relative basis. (Please refer to definitions above.) An investor's decision to buy or sell a security should be based on investment objectives, current holdings, and other individual factors.

Credit Suisse's policy is to update research reports as it deems appropriate, based on developments with the subject company, the sector or the market that may have a material impact on the research views or opinions stated herein.

Credit Suisse's policy is only to publish investment research that is impartial, independent, clear, fair and not misleading. For more detail please refer to Credit Suisse's Policies for Managing Conflicts of Interest in connection with Investment Research: http://www.csfb.com/research-and-analytics/disclaimer/managing_conflicts_disclaimer.html

Credit Suisse does not provide any tax advice. Any statement herein regarding any US federal tax is not intended or written to be used, and cannot be used, by any taxpayer for the purposes of avoiding any penalties.

See the Companies Mentioned section for full company names.

Price Target: (12 months) for (FTS.TO)

Method: We obtain our C\$32 target price for Fortis Inc. by using multiple valuation methodologies, yield base analysis, and discounted cash flow. We use a P/E (price/earnings) multiples of 19.5x our 2008 EPS (earnings per share) estimate of C\$1.64; we use an EV/EBITDA (enterprise value/earnings before interest, taxes, depreciation, and amortization) of 10.8x and a 165 bps yield spread.

Risks: There are a number of risk to Fortis' achievement of our C\$32.00 target price: commodity prices; weather; environmental; regulatory; access to capital markets; and, interest rates. Moreover, one should never underestimate the power of the regulator in any regulated business.

See the Companies Mentioned section for full company names.

The subject company (FTS.TO) currently is, or was during the 12-month period preceding the date of distribution of this report, a client of Credit Suisse.

Credit Suisse provided non-investment banking services, which may include Sales and Trading services, to the subject company (FTS.TO) within the past 12 months.

Credit Suisse has received compensation for products and services other than investment banking services from the subject company (FTS.TO) within the past 12 months.

Important Regional Disclosures

An analyst involved in the preparation of this report has visited certain material operations of the subject company (FTS.TO) within the past 12 months. The analyst may not have visited all material operations of the subject company. The travel expenses of the analyst in connection with such visits were not paid or reimbursed by the subject company, other than de minimus local travel expenses.

Restrictions on certain Canadian securities are indicated by the following abbreviations: NVS--Non-Voting shares; RVS--Restricted Voting Shares; SVS--Subordinate Voting Shares.

Individuals receiving this report from a Canadian investment dealer that is not affiliated with Credit Suisse should be advised that this report may not contain regulatory disclosures the non-affiliated Canadian investment dealer would be required to make if this were its own report.

For Credit Suisse Securities (Canada), Inc.'s policies and procedures regarding the dissemination of equity research, please visit http://www.csfb.com/legal_terms/canada_research_policy.shtml.

As of the date of this report, Credit Suisse acts as a market maker or liquidity provider in the equities securities that are the subject of this report.

Principal is not guaranteed in the case of equities because equity prices are variable.

Commission is the commission rate or the amount agreed with a customer when setting up an account or at anytime after that.

CS may have issued a Trade Alert regarding this security. Trade Alerts are short term trading opportunities identified by an analyst on the basis of market events and catalysts, while stock ratings reflect an analyst's investment recommendations based on expected total return over a 12-month period relative to the relevant coverage universe. Because Trade Alerts and stock ratings reflect different assumptions and analytical methods, Trade Alerts may differ directionally from the analyst's stock rating.

The author(s) of this report maintains a CS Model Portfolio that he/she regularly adjusts. The security or securities discussed in this report may be a component of the CS Model Portfolio and subject to such adjustments (which, given the composition of the CS Model Portfolio as a whole, may differ

from the recommendation in this report, as well as opportunities or strategies identified in Trading Alerts concerning the same security). The CS Model Portfolio and important disclosures about it are available at www.credit-suisse.com/ti.

For Credit Suisse disclosure information on other companies mentioned in this report, please visit the website at www.credit-suisse.com/researchdisclosures or call +1 (877) 291-2683.

Disclaimers continue on next page.

This report is not directed to, or intended for distribution to or use by, any person or entity who is a citizen or resident of or located in any locality, state, country or other jurisdiction where such distribution, publication, availability or use would be contrary to law or regulation or which would subject Credit Suisse, the Swiss bank, or its subsidiaries or its affiliates ("CS") to any registration or licensing requirement within such jurisdiction. All material presented in this report, unless specifically indicated otherwise, is under copyright to CS. None of the material, nor its content, nor any copy of it, may be altered in any way, transmitted in any way, copied or distributed to any other party, without the prior express written permission of CS. All trademarks, service marks and logos used in this report are trademarks or service marks or registered trademarks or service marks of CS or its affiliates.

The information, tools and material presented in this report are provided to you for information purposes only and are not to be used or considered as an offer or the solicitation of an offer to sell or to buy or subscribe for securities or other financial instruments. CS may not have taken any steps to ensure that the securities referred to in this report are suitable for any particular investor. CS will not treat recipients as its customers by virtue of their receiving the report. The investments or services contained or referred to in this report may not be suitable for you and it is recommended that you consult an independent investment advisor if you are in doubt about such investments or investment services. Nothing in this report constitutes investment, legal, accounting or tax advice or a representation that any investment or strategy is suitable or appropriate to your individual circumstances or otherwise constitutes a personal recommendation to you. CS does not offer advice on the tax consequences of investment and you are advised to contact an independent tax adviser. Please note in particular that the bases and levels of taxation may change.

CS believes the information and opinions in the Disclosure Appendix of this report are accurate and complete. Information and opinions presented in the other sections of the report were obtained or derived from sources CS believes are reliable, but CS makes no representations as to their accuracy or completeness. Additional information is available upon request. CS accepts no liability for loss arising from the use of the material presented in this report, except that this exclusion of liability does not apply to the extent that liability arises under specific statutes or regulations applicable to CS. This report is not to be relied upon in substitution for the exercise of independent judgment. CS may have issued, and may in the future issue, a trading call regarding this security. Trading calls are short term trading opportunities based on market events and catalysts, while stock ratings reflect investment recommendations based on expected total return over a 12-month period as defined in the disclosure section. Because trading calls and stock ratings reflect different assumptions and analytical methods, trading calls may differ directionally from the stock rating. In addition, CS may have issued, and may in the future issue, other reports that are inconsistent with, and reach different conclusions from, the information presented in this report. Those reports reflect the different assumptions, views and analytical methods of the analysts who prepared them and CS is under no obligation to ensure that such other reports are brought to the attention of any recipient of this report. CS is involved in many businesses that relate to companies mentioned in this report. These businesses include specialized trading, risk arbitrage, market making, and other proprietary trading.

Past performance should not be taken as an indication or guarantee of future performance, and no representation or warranty, express or implied, is made regarding future performance. Information, opinions and estimates contained in this report reflect a judgement at its original date of publication by CS and are subject to change without notice. The price, value of and income from any of the securities or financial instruments mentioned in this report can fall as well as rise. The value of securities and financial instruments is subject to exchange rate fluctuation that may have a positive or adverse effect on the price or income of such securities or financial instruments. Investors in securities such as ADR's, the values of which are influenced by currency volatility, effectively assume this risk.

Structured securities are complex instruments, typically involve a high degree of risk and are intended for sale only to sophisticated investors who are capable of understanding and assuming the risks involved. The market value of any structured security may be affected by changes in economic, financial and political factors (including, but not limited to, spot and forward interest and exchange rates), time to maturity, market conditions and volatility, and the credit quality of any issuer or reference issuer. Any investor interested in purchasing a structured product should conduct their own investigation and analysis of the product and consult with their own professional advisers as to the risks involved in making such a purchase.

Some investments discussed in this report have a high level of volatility. High volatility investments may experience sudden and large falls in their value causing losses when that investment is realised. Those losses may equal your original investment. Indeed, in the case of some investments the potential losses may exceed the amount of initial investment, in such circumstances you may be required to pay more money to support those losses. Income yields from investments may fluctuate and, in consequence, initial capital paid to make the investment may be used as part of that income yield. Some investments may not be readily realisable and it may be difficult to sell or realise those investments, similarly it may prove difficult for you to obtain reliable information about the value, or risks, to which such an investment is exposed.

Ongoing organic opportunity

- **Missed the mark:** Fortis reported Q4 2007 EPS (FD) of C\$0.49 above our estimate of C\$0.48 and the Street's estimate of C\$0.45 within the C\$0.42-C\$0.48 range. We believe the headline number required adjustments for a few items, including: a gain on sale of surplus land and one of several tax related matters. From our perspective, a clean earnings number is roughly C\$0.41 which missed the mark against our estimate or that of the Street. After a very surprising December dividend increase announcement, as expected, the dividend was held in line with that earlier new release (ie. the increase from C\$0.21 to C\$0.25 payable in equal quarterly installments).
- **Significant organic growth continues:** As expected, Fortis continued to provide a rather robust outlook for its utility capital program. The company expects consolidated utility capital expenditures to exceed C\$4 billion. More than three-quarters of that amount is expected to come from electric utilities which are largely centered on the growth of FortisAlberta, FortisBC and the Caribbean operations.
- **Improved capital efficiency:** From our perspective, Fortis possesses ample opportunities to become much more capital efficient. One strategy involves divesting certain non-utility assets and redeploying capital into utility assets or funding the capital program. Another option would entail divesting partial interests in selected utility assets in an asset management model approach and receiving a management fee. Regardless of approach, we believe there are some rather simple ways for Fortis to increase existing returns.
- **Valuation:** We utilize multiple valuation methodologies to obtain our C\$32.00 target price, including: a 19.9x P/E multiple of 2009 earnings; an 88 bps yield spread; and, a DCF based valuation. We reiterate our Neutral rating.

IMPORTANT DISCLOSURES, ANALYST CERTIFICATIONS AND INFORMATION ON TRADE ALERTS AND ANALYST MODEL PORTFOLIOS ARE IN THE DISCLOSURE APPENDIX. U.S. Disclosure: Credit Suisse does and seeks to do business with companies covered in its research reports. As a result, investors should be aware that the Firm may have a conflict of interest that could affect the objectivity of this report. Investors should consider this report as only a single factor in making their investment decision.

The adjusted earnings of C\$0.41 came in under the Street's view on our earnings estimate. Yet, in long-cycle industries, we do not place undue emphasis on quarterly results. We believe the company is well positioned for meaningful organic growth, however, we believe Fortis will likely continue its acquisition focus in due course. This research note is divided into three parts: (a) results; (b) outlook; and, (c) valuation. Each of these areas will be addressed in greater detail below.

Results

Exhibit 1 highlights the segmented unadjusted earnings contributions for the most recent quarter and for the comparable period one year ago. Our commentary for each segment appears under the various headings below.

Exhibit 1: Segmented unadjusted earnings contribution

C\$ in millions, unless otherwise stated

	Q4 2007	Q4 2006	chg y/y
Regulated Gas Utilities - Canadian	52	-	n/a
Regulated Electric Utilities - Canadian	25	27	-7%
Regulated Electric Utilities - Caribbean	9	8	13%
Non-regulated - Fortis Generation	7	7	0%

Corporate and other	(22)	(11)	100%
Net earnings applicable to common shares	79	34	132%

Source: Company data and Credit Suisse

Regulated Gas Utilities - Canadian

This segment consists of Terasen Gas which was acquired on 17 May 2007. Those that have followed the Terasen assets for an extended time frame would likely generally agree with the company's assessment that "[p]erformance was consistent with that expected to be achieved". Worth noting as an adjustment was the C\$7 million after-tax gain for the sale of surplus land that was included in the company's numbers.

Other Canadian Electric Utilities

Segmented earnings for the quarter stayed flat compared to the same quarter last year. The results did include a one-time C\$2 million after-tax gain at FortisOntario relating to a refund ordered by the regulator. The segment's earnings also contained a C\$0.5 million charge to future tax expenses relating to Federal income tax rate reductions. See the table below for selected highlights.

Exhibit 7: Selected Other Canadian Electric Utilities performance highlights

	Q4 2007	Q4 2006	chg y/y

Operating expenses (C\$/MWh)	9.90	11.76	-16%
Gross margin (C\$/MWh)	42.90	44.12	-3%
Earnings (C\$millions)	7	7	0%

Source: Company data and Credit Suisse

Non-regulated – Fortis Properties

Fortis Properties' net unadjusted earning contribution during the quarter was C\$8 million which is nearly a 166% increase over last year's quarterly earnings. REVPAR increased to C\$73.84 from C\$67.84 for the comparable period last year. Additionally, the occupancy rate of the Real Estate Division was 96.8%, up from 94.9% last year.

Corporate

Corporate expenses significantly increased to C\$22 million from C\$11 million in Q4 2006. The increase was primarily related to acquisition financing for Terasen.

Outlook

We continue to believe investor, whether existing or prospective, should consider several major issues, including (a) organic growth; (b) capital efficiency; and, (c) acquisition trail. Each of these issues is addressed below.

Organic growth

Fortis has a large capital program underway. In 2007 the company invested approximately C\$790 million of which C\$768 million was allocated to its regulated utility capital program. Fortis is projecting that capital expenditures for the upcoming 2008 year would amount to roughly C\$890 million, a 12.6% increase from last year. The bulk of this amount will be invested in the company's regulated utility segments. A majority of the total will be spent on Western Canadian assets (Terasen Gas, FortisAlberta, and FortisBC). The company is forecasting to spend over C\$4 billion over the next five years. Due to this large capital requirement, we continue to believe that capital market access is critical to Fortis. Yet, we do not forecast a specific common equity funding requirement until 2010.

Capital efficiency

From our perspective, Fortis possesses ample opportunities to become much more capital efficient. One strategy involves divesting certain non-utility assets and redeploying capital into utility assets or funding the capital program. Another option would entail divesting partial interests in selected utility assets in an asset management model approach and receiving a management fee. Regardless of approach, we believe there are some rather simple ways for Fortis to increase existing returns.

Generally, we continue to prefer pure-play utility companies without an undue amount of non-core asset exposure. Historically, non-core assets (especially real estate) have been somewhat commonplace for many utilities. Fortis has been no exception to that approach. Notably, the mix of commercial and hospitality real estate assets held by Fortis have been positive contributors and also provide the company a bit of financial flexibility for a selection of reasons. Given the valuation of selected real estate assets, we believe any such monetisation of these assets would likely be favourable for the stock. Additionally, given the recent acquisitions, Fortis Properties continues to increase in scale and scope, which may make it much more attractive for acquisition or monetisation. Yet, for a number of reasons, we continue to believe there is a rather low probability of either of those events occurring.

Opportunities for improved capital efficiency

Even discounting the potential monetization of assets that we would consider to be non-core, we believe Fortis possesses considerable potential to become much more capital efficient. Given the significant interest in infrastructure assets by many investors seeking long-dated types of return, Fortis could easily divest portions of its existing asset base to pension fund investors and charge a management fee for their operational and management expertise. This type of approach could significantly improve capital efficiency and returns on capital. In addition, this asset management approach could also free-up capital that could be used for future acquisitions.

Acquisition trail

In our view, Fortis continues to demonstrate a rather impressive ability to successfully integrate acquisitions. Additionally, we view acquisitions as somewhat central to the company's growth strategy. For instance, the company's most recent Management Discussion and Analysis stated "The Corporation is pursuing acquisitions for profitable growth, focusing on opportunities to acquire regulated natural gas and electric utilities in Canada, the United States and the Caribbean. Fortis will also pursue growth in its non-regulated businesses in support of its regulated utility growth strategy." Given the success of Fortis in past transactions, as measured in terms of financials, share price and operationally, we believe the company's current valuation and skill set may lead to some

potentially value creating acquisition activity (see Exhibit 11 below for select Fortis M&A transactions).

Exhibit 11: Selected Fortis M&A transactions

	Total USD	USD 65.50	
	Total CAD	CAD 6,110.64	

Source: Bloomberg, Company data and Credit Suisse

In terms of acquisitions, we believe Fortis has a few advantages over others, including:

- With the recent Terasen acquisition, Fortis has growing expertise with both electric and gas utilities;
- Larger size will allow it to look at a larger spectrum of potential target companies;
- A proven ability to effectively integrate acquisitions;
- A rather strong appetite for yield oriented securities in Canada;
- Canada's rather benign interest rate environment;
- Bought deal financing commonly employed in Canada; and,
- Canadian dollar strength versus US players.

Fortis possesses a number of absolute and relative advantages over some other competitors

Valuation

We continue to believe that Fortis has strong organic growth in key areas such as British Columbia, Alberta and the Caribbean. Yet, the company does not have visibly sustainable growth over the longer-term. From our perspective, the next big catalysts for the stock will likely revolve around capital efficiency initiatives or a large scale acquisition. Our 2008 earnings estimate decreased slightly from C\$1.64 to C\$1.63. We are also formally introducing our 2009 earnings estimate to be C\$1.61. We retain our C\$32.00 target price which is obtained utilizing multiple valuation methodologies, including: a 19.9x P/E multiple of 2009 earnings; an 88 bps yield spread; and, a DCF based valuation. We reiterate our Neutral rating.

Maintain Neutral rating and C\$32.00 target price

The analyst(s) responsible for preparing this research report received compensation that is based upon various factors including Credit Suisse's total revenues, a portion of which are generated by Credit Suisse's investment banking activities.

Analysts' stock ratings are defined as follows***:

Outperform: The stock's total return is expected to exceed the industry average* by at least 10-15% (or more, depending on perceived risk) over the next 12 months.

Neutral: The stock's total return is expected to be in line with the industry average* (range of $\pm 10\%$) over the next 12 months.

Underperform:** The stock's total return is expected to underperform the industry average* by 10-15% or more over the next 12 months.

*The industry average refers to the average total return of the relevant country or regional index (except with respect to Europe, where stock ratings are relative to the analyst's industry coverage universe).

**In an effort to achieve a more balanced distribution of stock ratings, the Firm has requested that analysts maintain at least 15% of their rated coverage universe as Underperform. This guideline is subject to change depending on several factors, including general market conditions.

***For Australian and New Zealand stocks a 7.5% threshold replaces the 10% level in all three rating definitions, with a required equity return overlay applied.

Restricted: In certain circumstances, Credit Suisse policy and/or applicable law and regulations preclude certain types of communications, including an investment recommendation, during the course of Credit Suisse's engagement in an investment banking transaction and in certain other circumstances.

Volatility Indicator [V]: A stock is defined as volatile if the stock price has moved up or down by 20% or more in a month in at least 8 of the past 24 months or the analyst expects significant volatility going forward.

Analysts' coverage universe weightings are distinct from analysts' stock ratings and are based on the expected performance of an analyst's coverage universe* versus the relevant broad market benchmark:**

Overweight: Industry expected to outperform the relevant broad market benchmark over the next 12 months.

Market Weight: Industry expected to perform in-line with the relevant broad market benchmark over the next 12 months.

Underweight: Industry expected to underperform the relevant broad market benchmark over the next 12 months.

**An analyst's coverage universe consists of all companies covered by the analyst within the relevant sector.*

***The broad market benchmark is based on the expected return of the local market index (e.g., the S&P 500 in the U.S.) over the next 12 months.*

Credit Suisse's distribution of stock ratings (and banking clients) is:

Global Ratings Distribution		
Outperform/Buy*	47%	(58% banking clients)
Neutral/Hold*	39%	(56% banking clients)
Underperform/Sell*	12%	(50% banking clients)
Restricted	3%	

**For purposes of the NYSE and NASD ratings distribution disclosure requirements, our stock ratings of Outperform, Neutral, and Underperform most closely correspond to Buy, Hold, and Sell, respectively; however, the meanings are not the same, as our stock ratings are determined on a relative basis. (Please refer to definitions above.) An investor's decision to buy or sell a security should be based on investment objectives, current holdings, and other individual factors.*

Price Target: (12 months) for (FTS.TO)

Method: We obtain our C\$32 target price for Fortis Inc. by using multiple valuation methodologies, yield base analysis, and discounted cash flow. We use a P/E (price/earnings) multiples of 19.9x our 2009 EPS (earnings per share) estimate of C\$1.61; we use an EV/EBITDA (enterprise value/earnings before interest, taxes, depreciation, and amortization) of 10.8x and a 88 bps yield spread.

Risks: There are a number of risk to Fortis' achievement of our C\$32.00 target price: commodity prices; weather; environmental; regulatory; access to capital markets; and, interest rates. Moreover, one should never underestimate the power of the regulator in any regulated business.

See the Companies Mentioned section for full company names.

The subject company (FTS.TO) currently is, or was during the 12-month period preceding the date of distribution of this report, a client of Credit Suisse.

Credit Suisse provided investment banking services to the subject company (FTS.TO) within the past 12 months.

Credit Suisse provided non-investment banking services, which may include Sales and Trading services, to the subject company (FTS.TO) within the past 12 months.

Credit Suisse expects to receive or intends to seek investment banking related compensation from the subject company (FTS.TO) within the next 3 months.

Credit Suisse has received compensation for products and services other than investment banking services from the subject company (FTS.TO) within the past 12 months.

CS may have issued a Trade Alert regarding this security. Trade Alerts are short term trading opportunities identified by an analyst on the basis of market events and catalysts, while stock ratings reflect an analyst's investment recommendations based on expected total return over a 12-month period relative to the relevant coverage universe. Because Trade Alerts and stock ratings reflect different assumptions and analytical methods, Trade Alerts may differ directionally from the analyst's stock rating.

The author(s) of this report maintains a CS Model Portfolio that he/she regularly adjusts. The security or securities discussed in this report may be a component of the CS Model Portfolio and subject to such adjustments (which, given the composition of the CS Model Portfolio as a whole, may differ from the recommendation in this report, as well as opportunities or strategies identified in Trading Alerts concerning the same security). The CS Model Portfolio and important disclosures about it are available at www.credit-suisse.com/ti.

For Credit Suisse disclosure information on other companies mentioned in this report, please visit the website at www.credit-suisse.com/researchdisclosures or call +1 (877) 291-2683.

Disclaimers continue on next page.

This report is not directed to, or intended for distribution to or use by, any person or entity who is a citizen or resident of or located in any locality, state, country or other jurisdiction where such distribution, publication, availability or use would be contrary to law or regulation or which would subject Credit Suisse, the Swiss bank, or its subsidiaries or its affiliates ("CS") to any registration or licensing requirement within such jurisdiction. All material presented in this report, unless specifically indicated otherwise, is under copyright to CS. None of the material, nor its content, nor any copy of it, may be altered in any way, transmitted in any way, copied or distributed to any other party, without the prior express written permission of CS. All trademarks, service marks and logos used in this report are trademarks or service marks or registered trademarks or service marks of CS or its affiliates.

The information, tools and material presented in this report are provided to you for information purposes only and are not to be used or considered as an offer or the solicitation of an offer to sell or to buy or subscribe for securities or other financial instruments. CS may not have taken any steps to ensure that the securities referred to in this report are suitable for any particular investor. CS will not treat recipients as its customers by virtue of their receiving the report. The investments or services contained or referred to in this report may not be suitable for you and it is recommended that you consult an independent investment advisor if you are in doubt about such investments or investment services. Nothing in this report constitutes investment, legal, accounting or tax advice or a representation that any investment or strategy is suitable or appropriate to your individual circumstances or otherwise constitutes a personal recommendation to you. CS does not offer advice on the tax consequences of investment and you are advised to contact an independent tax adviser. Please note in particular that the bases and levels of taxation may change.

CS believes the information and opinions in the Disclosure Appendix of this report are accurate and complete. Information and opinions presented in the other sections of the report were obtained or derived from sources CS believes are reliable, but CS makes no representations as to their accuracy or completeness. Additional information is available upon request. CS accepts no liability for loss arising from the use of the material presented in this report, except that this exclusion of liability does not apply to the extent that liability arises under specific statutes or regulations applicable to CS. This report is not to be relied upon in substitution for the exercise of independent judgment. CS may have issued, and may in the future issue, a trading call regarding this security. Trading calls are short term trading opportunities based on market events and catalysts, while stock ratings reflect investment recommendations based on expected total return over a 12-month period as defined in the disclosure section. Because trading calls and stock ratings reflect different assumptions and analytical methods, trading calls may differ directionally from the stock rating. In addition, CS may have issued, and may in the future issue, other reports that are inconsistent with, and reach different conclusions from, the information presented in this report. Those reports reflect the different assumptions, views and analytical methods of the analysts who prepared them and CS is under no obligation to ensure that such other reports are brought to the attention of any recipient of this report. CS is involved in many businesses that relate to companies mentioned in this report. These businesses include specialized trading, risk arbitrage, market making, and other proprietary trading.

Past performance should not be taken as an indication or guarantee of future performance, and no representation or warranty, express or implied, is made regarding future performance. Information, opinions and estimates contained in this report reflect a judgement at its original date of publication by CS and are subject to change without notice. The price, value of and income from any of the securities or financial instruments mentioned in this report can fall as well as rise. The value of securities and financial instruments is subject to exchange rate fluctuation that may have a positive or adverse effect on the price or income of such securities or financial instruments. Investors in securities such as ADR's, the values of which are influenced by currency volatility, effectively assume this risk.

Structured securities are complex instruments, typically involve a high degree of risk and are intended for sale only to sophisticated investors who are capable of understanding and assuming the risks involved. The market value of any structured security may be affected by changes in economic, financial and political factors (including, but not limited to, spot and forward interest and exchange rates), time to maturity, market conditions and volatility, and the credit quality of any issuer or reference issuer. Any investor interested in purchasing a structured product should conduct their own investigation and analysis of the product and consult with their own professional advisers as to the risks involved in making such a purchase.

Some investments discussed in this report have a high level of volatility. High volatility investments may experience sudden and large falls in their value causing losses when that investment is realised. Those losses may equal your original investment. Indeed, in the case of some investments the potential losses may exceed the amount of initial investment, in such circumstances you may be required to pay more money to support those losses. Income yields from investments may fluctuate and, in consequence, initial capital paid to make the investment may be used as part of that income yield. Some investments may not be readily realisable and it may be difficult to sell or realise those investments, similarly it may prove difficult for you to obtain reliable information about the value, or risks, to which such an investment is exposed.
