Company Risk Disclosure

In addition to the risks involved in investing in common stocks generally, we also highlight the following risks that pertain to this company. Operations are subject to complex regulation by a variety of provincial, state and federal (Canada, Cayman Islands & Belize) agencies. Changes in regulation may adversely affect performance.

Financial performance depends on the availability of installed generation and the production of electric power by third parties. Fortis Properties' cash flow is dependent on hotel room vacancy rates and commercial building occupancy levels. The company's operations in Belize may be disrupted and assets may be damaged by hurricanes and/or tropical storms.

Ratings Key

We use the following ratings system definitions:

OP = Outperform - Forecast to outperform the market;

Mkt = Market Perform - Forecast to perform roughly in line with the market;

Und = Underperform - Forecast to underperform the market;

(S) = speculative investment;

NR = No rating at this time;

R = Restricted – Dissemination of research is currently restricted.

Market performance is measured by a benchmark index such as the S&P/TSX Composite Index, S&P 500, Nasdaq Composite, as appropriate for each company. Prior to September 1, 2003, a fourth rating tier—Top Pick—was used to designate those stocks we felt would be the best performers relative to the market. Our six Top 15 lists which guide investors to our best ideas according to six different objectives (large, small, growth, value, income and quantitative) have replaced the Top Pick rating.

Dissemination of Research

Our research publications are available via our web site <http://bmocapitalmarkets.com>. Institutional clients may also receive our research via FIRST CALL Research Direct and Reuters. All of our research is made widely available at the same time to all BMO NB, BMO Capital Markets Ltd., BMO Capital Markets Corp. and BMO Nesbitt Burns Securities Ltd. client groups entitled to our research. Please contact your investment advisor or institutional salesperson for more information.

Conflict Statement

A general description of how BMO Financial Group identifies and manages conflicts of interest is contained in our public facing policy for managing conflicts of interest in connection with investment research which is available at http://equityresearch.bmogc.net/conflict_statement.asp

Additional Matters

TO U.S. RESIDENTS: BMO Capital Markets Corp. and/or BMO Nesbitt Burns Securities Ltd., affiliates of BMO NB, furnish this report to U.S. residents and accept responsibility for the contents herein, except to the extent that it refers to securities of Bank of Montreal. Any U.S. person wishing to effect transactions in any security discussed herein should do so through BMO Capital Markets Corp. and/or BMO Nesbitt Burns Securities Ltd.

TO U.K. RESIDENTS: In the UK this document is published by BMO Capital Markets Limited which is authorised and regulated by the Financial Services Authority. The contents hereof are intended solely for the use of, and may only be issued or passed on to, (I) persons who have professional experience in matters relating to investments falling within Article 19(5) of the Financial Services and Markets Act 2000 (Financial Promotion) Order 2005 (the "Order") or (II) high net worth entities falling within Article 49(2)(a) to (d) of the Order (all such persons together referred to as "relevant persons"). The contents hereof are not intended for the use of and may not be issued or passed on to, retail clients.

BMO Nesbitt Burns Inc. and BMO Nesbitt Burns Ltée/Ltd. are Members of CIPF. BMO Capital Markets Corp. and BMO Nesbitt Burns Securities Ltd. are Members of SIPC.

Fortis Inc.

(FTS-TSX)

Stock Rating: Outperform
Industry Rating: Market Perform

Member of: Top 15 Value Stock Selections
 Top 15 Income Stock Selections

Coverage Resumed After Equity Issuance; Maintaining Outperform Rating

Event

We are resuming coverage of Fortis Inc. following completion of the issuance of 11,700,000 common shares, priced at \$25.65/share, for gross proceeds of \$300.1 million. Approximately \$200 million from the issuance will be used to repay debt incurred to temporarily finance the acquisition of Terasen Gas. Since the company's Q3/08 results were reported, regulated ROE have been released in most jurisdictions in Canada, Fortis increased its dividend by 4% to an annualized rate of \$1.04/share, and a number of regulatory decisions have been issued.

Impact

Mixed. The size of the equity issuance was consistent with our estimates; however, our model had assumed that Fortis would not issue additional common equity until 2009 and at a higher share price. A greater number of shares issued, combined with lower regulated ROE, have reduced our diluted EPS estimates by approximately \$0.03 in each of 2009 and 2010.

Forecasts

We have updated our model to reflect (1) the equity issuance; (2) regulated ROE for 2009; and (3) recent regulatory decisions and filings. Our diluted EPS estimates decline to \$1.53 from \$1.54 in 2008; to \$1.54 from \$1.57 in 2009; and to \$1.60 from \$1.63 in 2010.

Valuation

Our target price of \$28 is based on a weighted valuation approach: 17x diluted 2009E EPS of \$1.54 (12.5%), 1.70x 2009E BVPS of \$18.13 (12.5%) and a target yield of 3.75% (75%), assuming 2009E dividends per share of \$1.04.

Recommendation

We believe that Fortis' shares are attractively valued, considering its relatively low-risk, diversified business model. Our rating is Outperform.

Details & Analysis

We are resuming coverage of Fortis Inc. following the completion of the issuance of 11,700,000 common shares, priced at \$25.65/share, for gross proceeds of \$300.1 million. Approximately \$200 million from the issuance will be used to repay debt incurred to temporarily finance the acquisition of Terasen Gas.

The size of the equity issuance was consistent with our estimates; however, our model had assumed that Fortis would not issue additional common equity until 2009 and at a higher share price. Absent an acquisition, we believe the company is unlikely to require additional equity during our forecast period.

We continue to believe that Fortis' shares are attractively valued, considering its relatively low-risk business model. Our target price of \$28 is based on a weighted valuation approach: 17x diluted 2009E EPS of \$1.54 (12.5%), 1.70x 2009E BVPS of \$18.13 (12.5%) and a target yield of 3.75% (75%), assuming 2009E dividends per share of \$1.04.

A discussion of the events that have occurred since we have been on research restriction is set out below.

Quarterly Dividend Increase; DRIP Amended

On December 10, 2008, Fortis Inc. announced that its board of directors approved a 4% increase in the quarterly dividend to \$0.26 per share from the current rate of \$0.25 per share. The dividend increase is consistent with our expectations and the revised dividend will be payable on March 1, 2009, to common shareholders of record at the close of business on February 6, 2009.

Concurrently, the board of directors amended and restated the company's dividend reinvestment and share purchase plan ("DRIP"). Pursuant to the DRIP, shareholders may elect to receive their dividends in shares issued by treasury at a 2% discount to the market price.

2009 Regulated ROE Released

Regulated rates of return on equity have now been released in most Canadian jurisdictions. Divisions with significant exposure to changes in regulated rates of return include Newfoundland Power, FortisAlberta, FortisBC, Terasen Gas, and Terasen Gas Vancouver Island.

The benchmark regulated rate of return for a low-risk utility operating in British Columbia will fall by 15 basis points in 2009 to 8.47% from 8.62% in 2008. Terasen Gas Inc. is the benchmark utility in British Columbia, and therefore its allowed ROE in 2009 will be set at 8.47%. Terasen Gas (Vancouver Island) is allowed to earn a 70-basis-point risk premium over the benchmark return; therefore its allowed ROE for 2009 will be set at 9.17%. FortisBC is allowed to earn a 40-basis point premium over the benchmark return; therefore its allowed ROE for 2009 will be set at 8.87%.

Surprisingly, the Alberta Utilities Commission (AUC) has decided not to adjust regulated rates of return at this time. The AUC will be holding a generic cost of capital hearing in 2009 and has decided that the 2008 generic ROE of 8.75% will be maintained on a placeholder basis until the cost of capital review has been completed. Accordingly, there will be no immediate change to FortisAlberta's allowed ROE of 8.75%.

On November 28, 2008, Newfoundland Power (100% Fortis Inc.) made its annual cost of capital application to the Board of Commissioners of Public Utilities. In 2007, the Board approved the use of an automatic adjustment mechanism for a three-year period ending 2011. Pursuant to the decision, Newfoundland Power is allowed to earn a return on rate base within a range of 8.19–8.55%. Although the company must calculate its deemed return on rate base annually and present its findings to the regulator, customer rates will not be adjusted unless the calculation yields a figure that is outside of the aforementioned range. Application of the automatic adjustment mechanism resulted in a deemed return on rate base of 8.25% for 2009, which is within the allowed range. Accordingly, application of the automatic adjustment mechanism at Newfoundland Power will not trigger a reduction in rates in 2009.

Terasen Gas – 2009 Rate Applications Approved

On December 11, 2008, the British Columbia Utilities Commission (BCUC) approved Terasen Gas Inc.'s (TGI) application for 2009 revenue requirement and customer rates. The company's existing performance-based rate plan was also extended for the years 2008 and 2009. The key financial terms of the application, which was originally filed on October 8, 2008, are set out in Table 1.

The BCUC also approved Terasen Gas (Vancouver Island) Inc.'s (TGVI) application for 2009 revenue requirement and customer rates on December 11. The key financial terms of TGVI's application are set out in Table 2.

Table 1: TGI 2009 Revenue Requirement and Financial Accounts

	2008E	2009E
Revenue Requirement	\$1,512.8	\$1,689.4
Mid-year rate base	\$2,504.9	\$2,541.4
Net Capital Additions	\$129.6	\$134.9

Net Capital Additions	\$29.6	\$29.7
Mid-Year Contributions	\$61.1	\$56.2
Depreciation	\$18.3	\$19.2

Source: Regulatory Filings

FortisBC – 2009 Rate Application Approved

On December 12, 2008, FortisBC announced that the BCUC had approved a negotiated settlement respecting the company's 2009 rate application. Key terms of the settlement, which was filed on December 2, 2008, include: (i) an average rate increase of 4.6%; (ii) an allowed ROE of 8.87%, consistent with the 2009 return on equity determined by the BCUC; and (iii) an extension of the current performance-based regulation settlement until 2011. Approval of the negotiated settlement by the Commission is in line with expectations and our outlook fully reflects the key financial terms of the agreement.

Key financial details of the company's 2009 rate requirement as set out in the settlement agreement are provided in Table 3:

Table 3: Fortis BC Revenue Requirement and Financial Accounts

	2008E	2009E
Revenue Requirement	\$220.9	\$233.1

Capital Expenditure Update

- On December 2, 2008, Terasen Energy Services (100% - Fortis Inc.) announced that it had signed an agreement with The Beedie Group to design, build and manage a \$25 million alternative district energy system for the developer's mixed-use construction project, located in Coquitlam, BC. The real estate development, which is called The Village at Fraser Mills, is expected to include 3,700 residential units, 275,000 sf of commercial and retail space, and 600,000 sf of business park/light industrial space. Electricity generated by Fortis BC's district energy system would be provided to the Village at Fraser Mills through a long-term contract, which is expected to begin in 2011.
- On November 12, 2008, the BCUC issued an order, in which it denied an application filed by FortisBC's on December 19, 2007, for a certificate of public convenience and necessity related to a project called the "Advanced Metering Initiative." The project contemplated replacing 108,000 conventional meters with new automated meters. The project was expected to begin in 2008 and be completed by the end of 2010, at an estimated cost of \$31.3 million.
- On November 7, 2008, the BCUC issued an order, in which it denied FortisBC's application for a certificate of public convenience and necessity for a project (originally filed on June 27, 2008) called the "Copper Conductor Replacement Project." The project involved replacing 85 percent of the copper distribution conductors in FortisBC's service area with aluminum-based steel reinforced conductors. The project was expected to begin in the first quarter of 2009 and be completed by the fourth quarter of 2018. Capital expenditures of \$103 million were expected over the 10-year life of the project, with \$11.7 million spent during the first two years.

Estimates

We have updated our model to reflect (1) the equity issuance; (2) regulated ROE for 2009; and (3) recent regulatory decisions and filings. Our diluted EPS estimates decline to \$1.53 from \$1.54 in 2008; to \$1.54 from \$1.57 in 2009; and to \$1.60 from \$1.63 in 2010.

Company Risk Disclosure

In addition to the risks involved in investing in common stocks generally, we also highlight the following risks that pertain to this company. Operations are subject to complex regulation by a variety of provincial, state and federal (Canada, Cayman Islands & Belize) agencies. Changes in regulation may adversely affect performance.

Financial performance depends on the availability of installed generation and the production of electric power by third parties. Fortis Properties' cash flow is dependent on hotel room vacancy rates and commercial building occupancy levels. The company's operations in Belize may be disrupted and assets may be damaged by hurricanes and/or tropical storms.

Analyst's Certification

I, Michael McGowan, CA, CFA, hereby certify that the views expressed in this report accurately reflect my personal views about the subject securities or issuers. I also certify that no part of my compensation was, is, or will be, directly or indirectly, related to the specific recommendations or views expressed in this report.

General Disclosure

The information and opinions in this report were prepared by BMO Nesbitt Burns Inc. and BMO Nesbitt Burns Ltée./Ltd., collectively ("BMO NB"). BMO NB is not subject to U.S. rules with regard to the preparation of research reports and the independence of analysts. "BMO Capital Markets" is a trade name used by the BMO Investment Banking Group, which includes the wholesale arm of Bank of Montreal and its subsidiaries BMO NB in Canada, BMO Capital Markets Ltd. in the U.K. and BMO Capital Markets Corp. in the U.S. BMO Capital Markets Ltd. and BMO Capital Markets Corp. are affiliates of BMO NB. Bank of Montreal or its subsidiaries ("BMO Financial Group") has lending arrangements with, or provide other remunerated services to, many issuers covered by BMO NB research. A significant lending relationship may exist between BMO Financial Group and certain of the issuers mentioned herein. The opinions, estimates and projections contained in this report are those of BMO NB as of the date of this report and are subject to change without notice. BMO NB endeavours to ensure that the contents have been compiled or derived from sources that we believe are reliable and contain information and opinions that are accurate and complete. However, BMO NB makes no representation or warranty, express or implied, in respect thereof, takes no responsibility for any errors and omissions contained herein and accepts no liability whatsoever for any loss arising from any use of, or reliance on, this report or its contents. Information may be available to BMO NB or its affiliates that is not reflected in this report. The information in this report is not intended to be used as the primary basis of investment decisions, and because of individual client objectives, should not be construed as advice designed to meet the particular investment needs of any investor. This material is for information purposes only and is not an offer to sell or the solicitation of an offer to buy any security. The research analyst and/or associates who prepared this report are compensated based upon (among other factors) the overall profitability of BMO NB and its affiliates, which includes the overall profitability of investment banking services. BMO NB, or its affiliates expect to receive or will seek compensation for investment banking services within the next 3 months from all issuers covered by BMO NB. BMO NB or its affiliates will buy from or sell to customers the securities of issuers mentioned in this report on a principal basis. BMO NB or its affiliates, officers, directors or employees may have a long or short position in the securities discussed herein, related securities or in options, futures or other derivative instruments based thereon. The reader should assume that BMO NB, BMO Capital Markets Ltd., BMO Capital Markets Corp., Bank of Montreal or their affiliates may have a conflict of interest and should not rely solely on this report in evaluating whether or not to buy or sell securities of issuers discussed herein.

Company Specific Disclosure

Disclosure 2: BMO NB has undertaken an underwriting liability with respect to this issuer within the past 12 months.

Disclosure 3: BMO NB has provided investment banking services with respect to this issuer within the past 12 months.

Disclosure 7: BMO Capital Markets Corp. or an affiliate has received compensation for investment banking services from this issuer within the past 12 months.

Disclosure 9: BMO Capital Markets Corp. or an affiliate received compensation for products or services other than investment banking services within the past 12 months.

Disclosure 10: This issuer is a client (or was a client) of BMO NB, BMO Capital Markets Corp., BMO CM Ltd. or an affiliate within the past 12 months: Investment Banking Services & Non-Securities Related Services.

Rating Category	BMO Rating	BMO Universe	BMO I.B. Clients*	Starmine Universe**
Buy	Outperform	37%	40%	50%
Hold	Market Perform	54%	55%	43%
Sell	Underperform	9%	5%	7%

* Reflects rating distribution of all companies where BMO Capital Markets has received compensation for Investment Banking services.

** Reflects rating distribution of all North American equity research analysts.

Ratings Key

We use the following ratings system definitions:

OP = Outperform - Forecast to outperform the market;

Mkt = Market Perform - Forecast to perform roughly in line with the market;

Und = Underperform - Forecast to underperform the market;

(S) = speculative investment;

NR = No rating at this time;

R = Restricted – Dissemination of research is currently restricted.

Market performance is measured by a benchmark index such as the S&P/TSX Composite Index, S&P 500, Nasdaq Composite, as appropriate for each company. Prior to September 1, 2003, a fourth rating tier—Top Pick—was used to designate those stocks we felt would be the best performers relative to the market. Our six Top 15 lists which guide investors to our best ideas according to six different objectives (large, small, growth, value, income and quantitative) have replaced the Top Pick rating.

Dissemination of Research

Our research publications are available via our web site <http://bmocapitalmarkets.com>. Institutional clients may also receive our research via FIRST CALL Research Direct and Reuters. All of our research is made widely available at the same time to all BMO NB, BMO Capital Markets Ltd., BMO Capital Markets Corp. and BMO Nesbitt Burns Securities Ltd. client groups entitled to our research. Please contact your investment advisor or institutional salesperson for more information.

Conflict Statement

A general description of how BMO Financial Group identifies and manages conflicts of interest is contained in our public facing policy for managing conflicts of interest in connection with investment research which is available at http://equityresearch.bmogc.net/conflict_statement.asp

Q4/08 Results Exceed Expectations

Impact

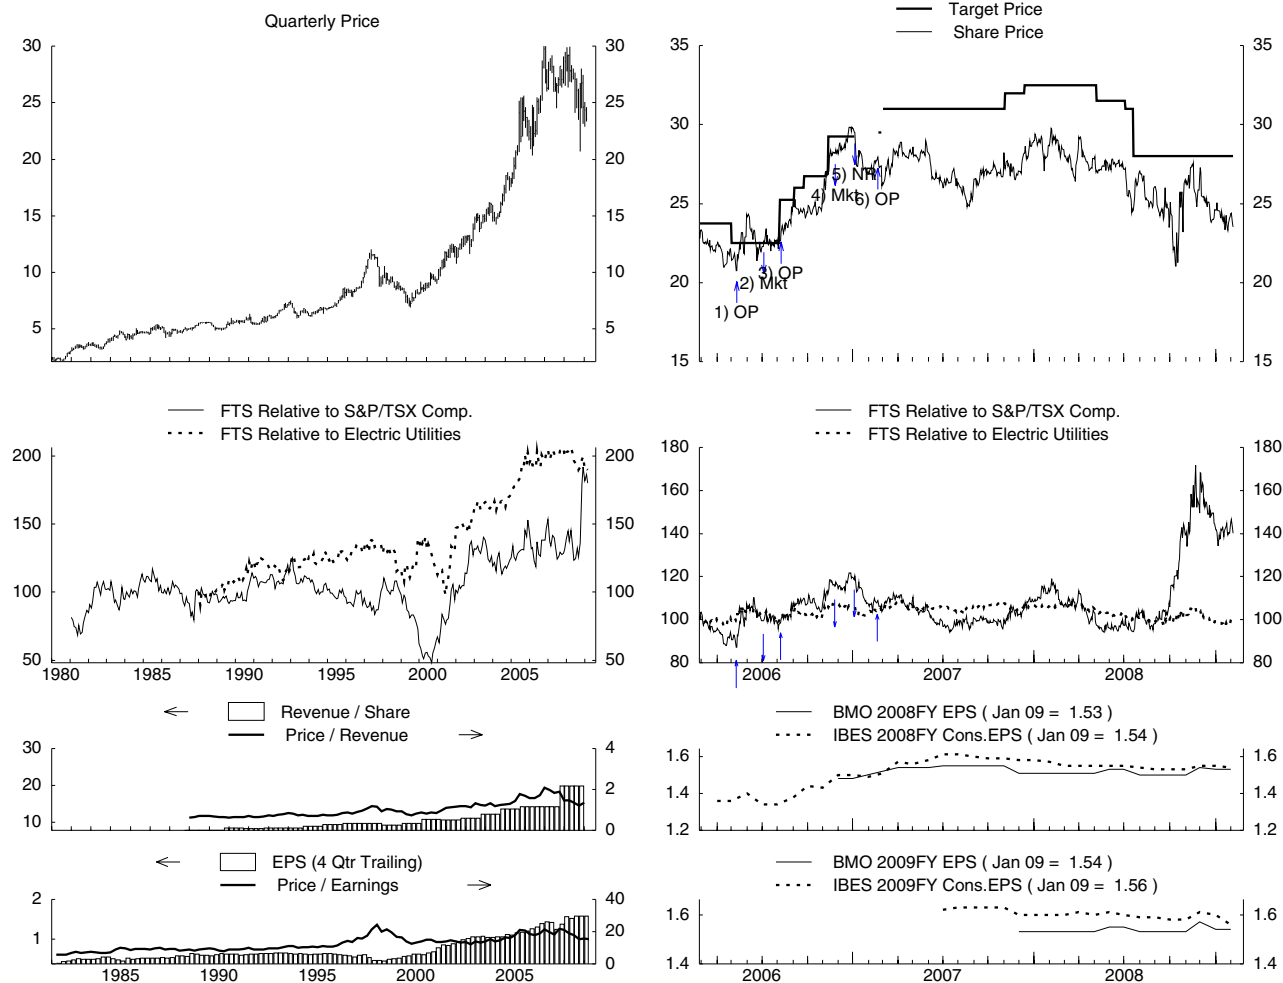

Neutral

Details & Analysis

Fortis reported Q4/08 EPS of \$0.48, higher than our estimate of \$0.43 and the First Call Mean of \$0.46. The variance between actual and expected results appears to largely be due to the contribution from Fortis Alberta, which benefitted from lower future income tax expenses and was \$0.04/share greater than expected. The majority of Fortis' other business segments appear to be performing well, and earnings contributions were generally consistent with our estimates. We believe the following points from the earnings release are relevant: (1) In November 2008, Fortis acquired the Fairmont Newfoundland hotel for \$22 million. The property has since been re-branded the Sheraton Hotel Newfoundland; (2) The dispute between Belize Electricity Limited (BEL, 70.1% Fortis) and the Belize Public Utilities Commission (PUC) regarding the PUC's final decision of BEL's 2008-2009 rate application remains ongoing as BEL continues to challenge the PUC's final decision through the Supreme Court of Belize; and (3) The company's capital budget appears to be consistent with past guidance. Fortis anticipates \$4.5 billion of capital expenditures over the next five years, with \$1 billion being deployed in 2009.

This report was prepared by an Analyst employed by a Canadian affiliate, BMO Nesbitt Burns Inc., and who is not registered as a research analyst under FINRA rules. For disclosure statements, including the Analyst's Certification, please refer to pages 2 to 4.

Q4/08 Results Exceed Expectations; Outperform Rating Maintained

Event

Fortis reported Q4/08 GAAP EPS of \$0.48 (basic), higher than our estimate of \$0.43 and the First Call Mean of \$0.46. The variance between actual and expected results appears to be due largely to the contribution from Fortis Alberta, which was \$0.04 per share greater than expected and benefitted from a reduction in future income tax expenses. The majority of Fortis' other business segments appear to be performing well and earnings contributions were generally consistent with our estimates.

Impact

Neutral.

Forecasts

We have updated our model to reflect actual results through the end of 2008. Our estimates for 2009 and 2010 are unchanged.

Valuation

Our target price of \$29 is based on weighted valuation approach: 16x diluted 2010E EPS of \$1.60 (12.5%); 1.7x 2010E BVPS of \$19.14; and a target yield of 3.75% (75%), assuming 2010E dividends per share of \$1.08. We have reduced our P/E multiple to 16 from 17 to reflect lower observed market valuations.

Recommendation

We are maintaining our Outperform rating, as we continue to believe that Fortis' shares are attractively valued, considering the company's relatively low-risk, diversified business model. We believe Fortis' shares offer an appealing dividend yield (4.4% at current price levels) and should act as a store of value during a difficult economic period.

Price (5-Feb) \$23.64 **52-Week High** \$29.94

Changes

Quarterly EPS
 Q2/09E \$0.28 to \$0.27
 Q4/09E \$0.47 to \$0.48

Q4/08 Results Exceed Expectations; Valuation Appears Compelling

Fortis reported Q4/08 GAAP EPS of \$0.48 (basic), higher than our estimate of \$0.43 and the First Call Mean of \$0.46. The variance between actual and expected results appears to largely be due to the contribution from Fortis Alberta, which was \$0.04 per share greater than expected and benefitted from a reduction in future income tax expenses. The majority of Fortis' other business segments appear to be performing well and earnings contributions were generally consistent with our estimates.

During 2009, we believe that Fortis will focus on pursuing profitable rate-base growth through advancing its capital expenditure program and optimizing the operations of its various business segments. Absent a large acquisition, we do not believe that Fortis will require additional equity during our forecast period, which runs through 2010.

EPS growth may temporarily pause in 2009, as water rights at the Rankine Generating Station, which contributed approximately \$15 million/year of earnings, expire on April 30, 2009. Incremental earnings from rate base growth are expected to partially offset the shortfall. We expect EPS growth to resume in 2010 as additional capital expenditures are transferred to rate base and the Vaca Hydroelectric facility comes online in Belize.

The main risk to our earnings outlook centres on the possibility of lower regulated rates of return in 2010. We estimate that our 2010E EPS estimates could fall by approximately \$0.04 per share if interest rates remain at current levels through Q4/09, during the period when regulated ROE for 2010 are established. Although we would not view a reduction in regulated ROE favourably, we note that the corresponding EPS decrease is relatively small compared to the EPS declines that may be experienced by companies operating in unregulated industries with exposure to weak sectors of the economy.

We are maintaining our Outperform rating, as we continue to believe that Fortis' shares are attractively valued, considering the company's relatively low-risk, diversified business model. We believe that Fortis' shares offer an appealing dividend yield (4.4% at current price levels) and should act as a store of value during a difficult economic period.

Our target price of \$29 is based on weighted valuation approach: 16x diluted 2010E EPS of \$1.60 (12.5%); 1.7x 2010E BVPS of \$19.14; and a target yield of 3.75% (75%), assuming 2010E dividends per share of \$1.08. We have reduced our P/E multiple to 16 from 17 to reflect lower observed market valuations.

Q4/08 Results

As set out in Table 1, on a comparable basis, net income increased by 6% in Q4/08 versus Q4/07. A discussion of the operating performance of each segment follows.

Source: BMO Capital Markets, Company Reports

Regulated Gas Utilities – Terasen Gas Companies

The earnings contribution from Terasen Gas Inc. was \$47 million in Q4/08, a \$2 million increase from adjusted Q4/07 earnings of \$45 million. Reported earnings in Q4/07 were \$52 million and included a \$7 million gain related to the sale of surplus land. The increase in earnings during Q4/08 was primarily caused by higher gas distribution rates in 2008 compared to 2007.

Regulated Electric Utilities – FortisAlberta

Net earnings at FortisAlberta were in Q4/08 were \$11 million compared to \$6 million in Q4/07. Included in Q4/07 reported results was a \$3 million future income tax expense related to deferral account balances associated with charges levied by the Alberta Electric System Operator that are either refundable or recoverable in customer rates. The remaining variance between Q4/08 and Q4/07 results appears to be due to incremental income associated with rate base growth.

Regulated Electric Utilities – Fortis BC

Net earnings at Fortis BC were \$7 million in Q4/08, consistent with the \$7 million earned during Q4/07. Higher revenues, caused by increased rates, were offset by an increase in energy supply costs and increased amortization resulting from the company's capital expenditure program.

Regulated Electric Utilities – Newfoundland Power

Net earnings from Newfoundland Power were \$8 million in Q4/08, slightly lower than \$9 million in Q4/07. The quarter-over-quarter variance was primarily due to a regulatory decision that modified the way purchased power expenses are allocated between quarters. Previously, monthly purchased power expenses were recognized based on an estimate of actual costs, with variances between actual and estimated purchased power expenses accrued to a deferral account

that was discontinued, effective January 1, 2008. Newfoundland Power now recognizes the actual cost of purchased power each month. Although this change in regulatory accounting is not expected to impact annual earnings, the change in regulatory accounting decreased earnings at Newfoundland Power by \$2 million in Q4/08 compared to Q4/07.

Regulated Electric Utilities – Caribbean

Net earnings at the Caribbean business segment fell to \$8 million in Q4/08 compared to \$9 million in Q4/07. Incremental earnings include:

- \$1 million resulting from the inclusion of an extra two months of income from Caribbean Utilities (57% Fortis Inc.; CUP/U-T, rated Market Perform) caused by a change in Caribbean Utilities' fiscal year-end to December 31 from April 30 and
- a further \$1 million resulting from foreign exchange gains.

These were partially offset by \$2 million in lost revenue at Fortis Turks and Caicos caused by Hurricane Ike. The remainder of the decrease was caused by lower earnings at Belize Electricity Limited (BEL, 70.1% Fortis) and Caribbean Utilities.

Unregulated – Fortis Generation

Strong hydrology increased earnings at Fortis Generation to \$8 million in Q4/08 compared to \$7 million in Q4/07.

Unregulated – Fortis Properties

Net earnings at Fortis properties were \$4 million in Q4/08, consistent with adjusted earnings of \$4 million in Q4/07. Fortis Properties reported GAAP earnings of \$8 million in Q4/07, inclusive of a \$4 million favourable tax adjustment that we have normalized.

Revenue per available room (REVPAR) fell slightly during Q4/08 to \$72.86 versus \$73.84 in Q4/07. For 2008, annual REVPAR was \$80.39 versus \$79.31 during 2007. At the end of 2008, occupancy was 96.8% consistent with the occupancy level at the end of 2007.

During November 2008, Fortis Properties acquired the Fairmont Newfoundland hotel, a 301-room property for \$22 million (\$73,089/door). In January 2009, the property was re-branded the Sheraton Hotel Newfoundland. Fortis expects to spend approximately \$9 million over the next three years upgrading this property.

Capital Expenditure Update

Consistent with guidance contained in prior earnings releases, Fortis' five-year capital budget remains at \$4.5 billion. Approximately \$3.1 billion of this total is expected to be deployed by the company's electric utilities and capital spending of \$1.2 billion is expected at the gas utilities. Non-regulated capital expenditures are expected to total \$0.2 billion over the next five years. Capital spending of approximately \$1 billion is expected in 2009.

A summary of capital expenditures by business segment is set out in Table 2.

Table 2: Historical and Forecast Capital Expenditures

Segment	Q1/08	Q2/08	Q3/08	Q4/08	2008	2009E
Terasen Gas Companies	\$40.0	\$56.0	\$56.0	\$68.0	\$220.0	\$287.0
FortisAlberta	\$63.0	\$81.0	\$78.0	\$80.0	\$302.0	\$292.0
FortisBC	\$24.0	\$26.0	\$31.0	\$36.0	\$117.0	\$160.0
Newfoundland Power	\$13.0	\$17.0	\$17.0	\$20.0	\$67.0	\$65.0

Other Items

- The dispute between Belize Electricity Limited (BEL, 70.1% Fortis) and the Belize Public Utilities Commission (PUC) regarding the PUC's final decision of BEL's 2008–2009 rate application remains ongoing. BEL continues to challenge the PUC's final decision through the Supreme Court of Belize.
- Weather and labour-related delays have pushed back the in-service date for the Vaca facility to early 2010 from late 2009.
- The Exploits Partnership (51% Fortis Inc.; 49% AbitibiBowater, ABH-T, rated Underperform by Stephen Atkinson), which was established to develop additional capacity at Abitibi Bowater's hydroelectric plant at Grand Falls, Newfoundland, and redevelop AbitibiBowater's hydro facility located in Bishop's Falls, Newfoundland, was included in expropriation legislation passed by the Government of Newfoundland and Labrador on December 16, 2008. We do not expect the expropriation of these assets (should it occur) to adversely affect Fortis, as the legislation appears to have been directed at AbitibiBowater. The Government of Newfoundland and Labrador has indicated that it is not its intention to adversely affect the independent partners of AbitibiBowater and lenders to the Exploits Partnership. Nonetheless, a \$61 million term loan related to Exploits has been reclassified as a current liability on Fortis' balance sheet. It remains possible that the Government of Newfoundland and Labrador purchases Fortis' interest in Exploits, should it proceed with the expropriation of AbitibiBowaters' hydro and timber resources.
- Material upcoming regulatory decisions are set out in Table 3.

Table 3: Material Upcoming Regulatory Decisions

Regulated Utility	Regulatory Filing	Application Submission	Decision Date	Comment
FortisBC	2009 and 2010 Capital Plan Application	Jun-08	Q1 2009	Requesting approval of \$193 million of capital expenditures in 2009 and \$196 million in 2010.
Maritime Electric	2009 Basic Rate Application	Oct-08	Q1/09	Requesting a maximum allowed ROE of 9.75% for 2009.
Caribbean Utilities	Five-Year Capital Investment Plan	Dec-08	Q1 2009	Requesting approval for US\$255 million of capital expenditures over a five year period. Approximately US\$72 million is related to new generation that is expected to be solicited from third parties.
Belize Electricity	Judicial review and appeal of the Final Decision on 2008/2009 Rate Application	Jul-08	TBD	Filed with the Supreme Court of Belize.

Company Risk Disclosure

In addition to the risks involved in investing in common stocks generally, we also highlight the following risks that pertain to this company. Operations are subject to complex regulation by a variety of provincial, state and federal (Canada, Cayman Islands & Belize) agencies. Changes in regulation may adversely affect performance.

Financial performance depends on the availability of installed generation and the production of electric power by third parties. Fortis Properties' cash flow is dependent on hotel room vacancy rates and commercial building occupancy levels. The company's operations in Belize may be disrupted and assets may be damaged by hurricanes and/or tropical storms.

Analyst's Certification

I, Michael McGowan, CA, CFA, hereby certify that the views expressed in this report accurately reflect my personal views about the subject securities or issuers. I also certify that no part of my compensation was, is, or will be, directly or indirectly, related to the specific recommendations or views expressed in this report.

General Disclosure

The information and opinions in this report were prepared by BMO Nesbitt Burns Inc. and BMO Nesbitt Burns Ltée./Ltd., collectively ("BMO NB"). BMO NB is not subject to U.S. rules with regard to the preparation of research reports and the independence of analysts. "BMO Capital Markets" is a trade name used by the BMO Investment Banking Group, which includes the wholesale arm of Bank of Montreal and its subsidiaries BMO NB in Canada, BMO Capital Markets Ltd. in the U.K. and BMO Capital Markets Corp. in the U.S. BMO Capital Markets Ltd. and BMO Capital Markets Corp. are affiliates of BMO NB. Bank of Montreal or its subsidiaries ("BMO Financial Group") has lending arrangements with, or provide other remunerated services to, many issuers covered by BMO NB research. A significant lending relationship may exist between BMO Financial Group and certain of the issuers mentioned herein. The opinions, estimates and projections contained in this report are those of BMO NB as of the date of this report and are subject to change without notice. BMO NB endeavours to ensure that the contents have been compiled or derived from sources that we believe are reliable and contain information and opinions that are accurate and complete. However, BMO NB makes no representation or warranty, express or implied, in respect thereof, takes no responsibility for any errors and omissions contained herein and accepts no liability whatsoever for any loss arising from any use of, or reliance on, this report or its contents. Information may be available to BMO NB or its affiliates that is not reflected in this report. The information in this report is not intended to be used as the primary basis of investment decisions, and because of individual client objectives, should not be construed as advice designed to meet the particular investment needs of any investor. This material is for information purposes only and is not an offer to sell or the solicitation of an offer to buy any security. The research analyst and/or associates who prepared this report are compensated based upon (among other factors) the overall profitability of BMO NB and its affiliates, which includes the overall profitability of investment banking services. BMO NB, or its affiliates expect to receive or will seek compensation for investment banking services within the next 3 months from all issuers covered by BMO NB. BMO NB or its affiliates will buy from or sell to customers the securities of issuers mentioned in this report on a principal basis. BMO NB or its affiliates, officers, directors or employees may have a long or short position in the securities discussed herein, related securities or in options, futures or other derivative instruments based thereon. The reader should assume that BMO NB, BMO Capital Markets Ltd., BMO Capital Markets Corp., Bank of Montreal or their affiliates may have a conflict of interest and should not rely solely on this report in evaluating whether or not to buy or sell securities of issuers discussed herein.

Company Specific Disclosure

Disclosure 2: BMO NB has undertaken an underwriting liability with respect to this issuer within the past 12 months.

Disclosure 3: BMO NB has provided investment banking services with respect to this issuer within the past 12 months.

Disclosure 7: BMO Capital Markets Corp. or an affiliate has received compensation for investment banking services from this issuer within the past 12 months.

Disclosure 9: BMO Capital Markets Corp. or an affiliate received compensation for products or services other than investment banking services within the past 12 months.

Disclosure 10: This issuer is a client (or was a client) of BMO NB, BMO Capital Markets Corp., BMO CM Ltd. or an affiliate within the past 12 months: Investment Banking Services & Non-Securities Related Services.

Distribution of Ratings (Dec. 5, 2008)

Rating Category	BMO Rating	BMO Universe	BMO I.B. Clients*	Starline Universe**
Buy	Outperform	37%	40%	50%
Hold	Market Perform	54%	55%	43%
Sell	Underperform	9%	5%	7%

* Reflects rating distribution of all companies where BMO Capital Markets has received compensation for Investment Banking services.

** Reflects rating distribution of all North American equity research analysts.

Ratings Key

We use the following ratings system definitions:

OP = Outperform - Forecast to outperform the market;

Mkt = Market Perform - Forecast to perform roughly in line with the market;

Und = Underperform - Forecast to underperform the market;

(S) = speculative investment;

NR = No rating at this time;

R = Restricted – Dissemination of research is currently restricted.

Market performance is measured by a benchmark index such as the S&P/TSX Composite Index, S&P 500, Nasdaq Composite, as appropriate for each company. Prior to September 1, 2003, a fourth rating tier—Top Pick—was used to designate those stocks we felt would be the best performers relative to the market. Our six Top 15 lists which guide investors to our best ideas according to six different objectives (large, small, growth, value, income and quantitative) have replaced the Top Pick rating.

Dissemination of Research

Our research publications are available via our web site <http://bmocapitalmarkets.com>. Institutional clients may also receive our research via FIRST CALL Research Direct and Reuters. All of our research is made widely available at the same time to all BMO NB, BMO Capital Markets Ltd., BMO Capital Markets Corp. and BMO Nesbitt Burns Securities Ltd. client groups entitled to our research. Please contact your investment advisor or institutional salesperson for more information.

Conflict Statement

A general description of how BMO Financial Group identifies and manages conflicts of interest is contained in our public facing policy for managing conflicts of interest in connection with investment research which is available at http://equityresearch.bmogc.net/conflict_statement.asp

Additional Matters

TO U.S. RESIDENTS: BMO Capital Markets Corp. and/or BMO Nesbitt Burns Securities Ltd., affiliates of BMO NB, furnish this report to U.S. residents and accept responsibility for the contents herein, except to the extent that it refers to securities of Bank of Montreal. Any U.S. person wishing to effect transactions in any security discussed herein should do so through BMO Capital Markets Corp. and/or BMO Nesbitt Burns Securities Ltd.

TO U.K. RESIDENTS: In the UK this document is published by BMO Capital Markets Limited which is authorised and regulated by the Financial Services Authority. The contents hereof are intended solely for the use of, and may only be issued or passed on to, (I) persons who have professional experience in matters relating to investments falling within Article 19(5) of the Financial Services and Markets Act 2000 (Financial Promotion) Order 2005 (the "Order") or (II) high net worth entities falling within Article 49(2)(a) to (d) of the Order (all such persons together referred to as "relevant persons"). The contents hereof are not intended for the use of and may not be issued or passed on to, retail clients.

BMO Nesbitt Burns Inc. and BMO Nesbitt Burns Ltée/Ltd. are Members of CIPF. BMO Capital Markets Corp. and BMO Nesbitt Burns Securities Ltd. are Members of SIPC.

"BMO Capital Markets" is a trade-mark of Bank of Montreal, used under licence.

"BMO (M-Bar roundel symbol)" is a registered trade-mark of Bank of Montreal, used under licence.

Company Description – Fortis is a publicly listed holding company with four key businesses: electric utility operations, regulated natural gas distribution, non-regulated electric power generation and non-utility property activities. Electric power operations include Newfoundland Power (100%, Newfoundland), Maritime Electric (100%, PEI), Fortis Ontario (100%, Fort Erie, Ontario), Belize Electricity (70.1%, Belize), Caribbean Utilities (56%, Grand Cayman

Island), Turks and Caicos (100%, Turks and Caicos), FortisAlberta (100%, Alberta) and FortisBC (100%, British Columbia). *Website: fortisinc.com*

Recent Results – Fortis reported Q4/08 GAAP EPS of \$0.48 (basic), higher than our estimate of \$0.43 and the First Call Mean of \$0.46. The variance between actual and expected results was largely due to the contribution from FortisAlberta, which was \$0.04 per share greater than

This report was prepared by an Analyst employed by a Canadian affiliate, BMO Nesbitt Burns Inc., and who is not registered as a research analyst under FINRA rules. For disclosure statements, including the Analyst's Certification, please refer to pages 3 to 5.

expected and benefitted from a reduction in future income tax expenses. The majority of Fortis' other business segments appear to be performing well and earnings contributions were generally consistent with our estimates.

Corporate Developments – On December 19, 2008, Fortis announced that it had completed the issuance of 11,700,000 common shares, priced at \$25.65/share, for gross proceeds of \$300.1 million. Approximately \$200 million from the issuance will be used to repay debt incurred to temporarily finance the acquisition of Terasen Gas, which was completed in May 2007. The remaining proceeds will be used for general corporate purposes.

On December 10, 2008, Fortis Inc. announced that its board of directors approved a 4% increase in the quarterly dividend to \$0.26 per share from \$0.25 per share. The dividend increase is consistent with our expectations and the revised dividend will be payable on March 1, 2009, to

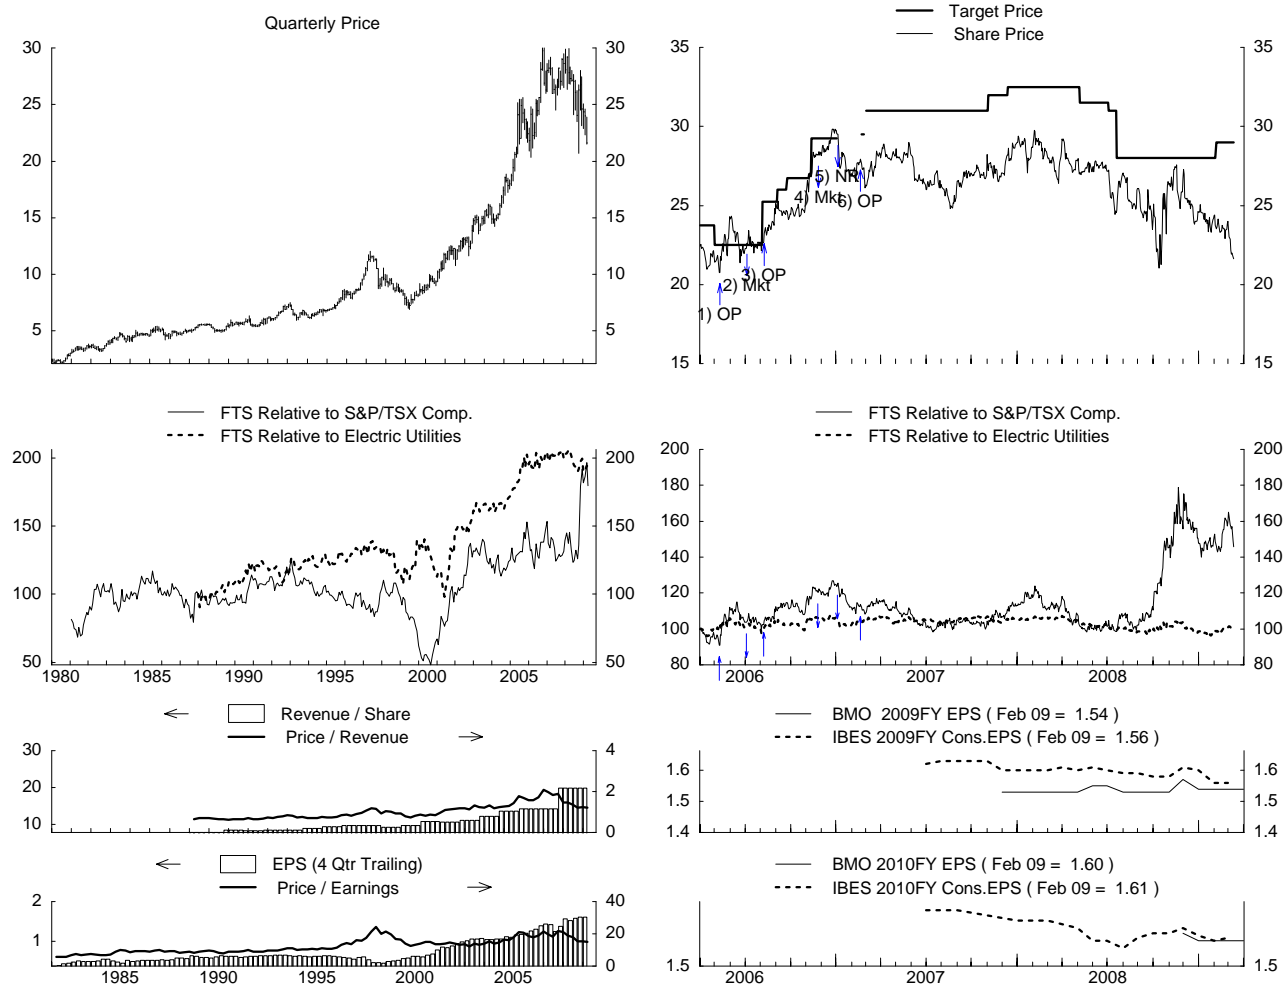

common shareholders of record at the close of business on February 6, 2009.

Forecasts – Our diluted EPS estimates are \$1.54 in 2009 and \$1.60 in 2010.

Valuation – Our target price of \$29 is based on a weighted valuation approach: 16x diluted 2010E EPS of \$1.60 (12.5%); 1.7x 2010E BVPS of \$19.14; and a target yield of 3.75% (75%), assuming 2010E dividends per share of \$1.08.

Recommendation – We continue to believe that Fortis' shares are attractively valued, considering the company's relatively low-risk, diversified business model. We believe Fortis' shares offer an appealing dividend yield and should act as a store of value during a difficult economic period. Our rating is Outperform. Member of Top 15 Income and Value stock selections.

Company Risk Disclosure

In addition to the risks involved in investing in common stocks generally, we also highlight the following risks that pertain to this company. Operations are subject to complex regulation by a variety of provincial, state and federal (Canada, Cayman Islands & Belize) agencies. Changes in regulation may adversely affect performance.

Financial performance depends on the availability of installed generation and the production of electric power by third parties. Fortis Properties' cash flow is dependent on hotel room vacancy rates and commercial building occupancy levels. The company's operations in Belize may be disrupted and assets may be damaged by hurricanes and/or tropical storms.

Analyst's Certification

Q1/09 Results Slightly Below Expectations

Impact

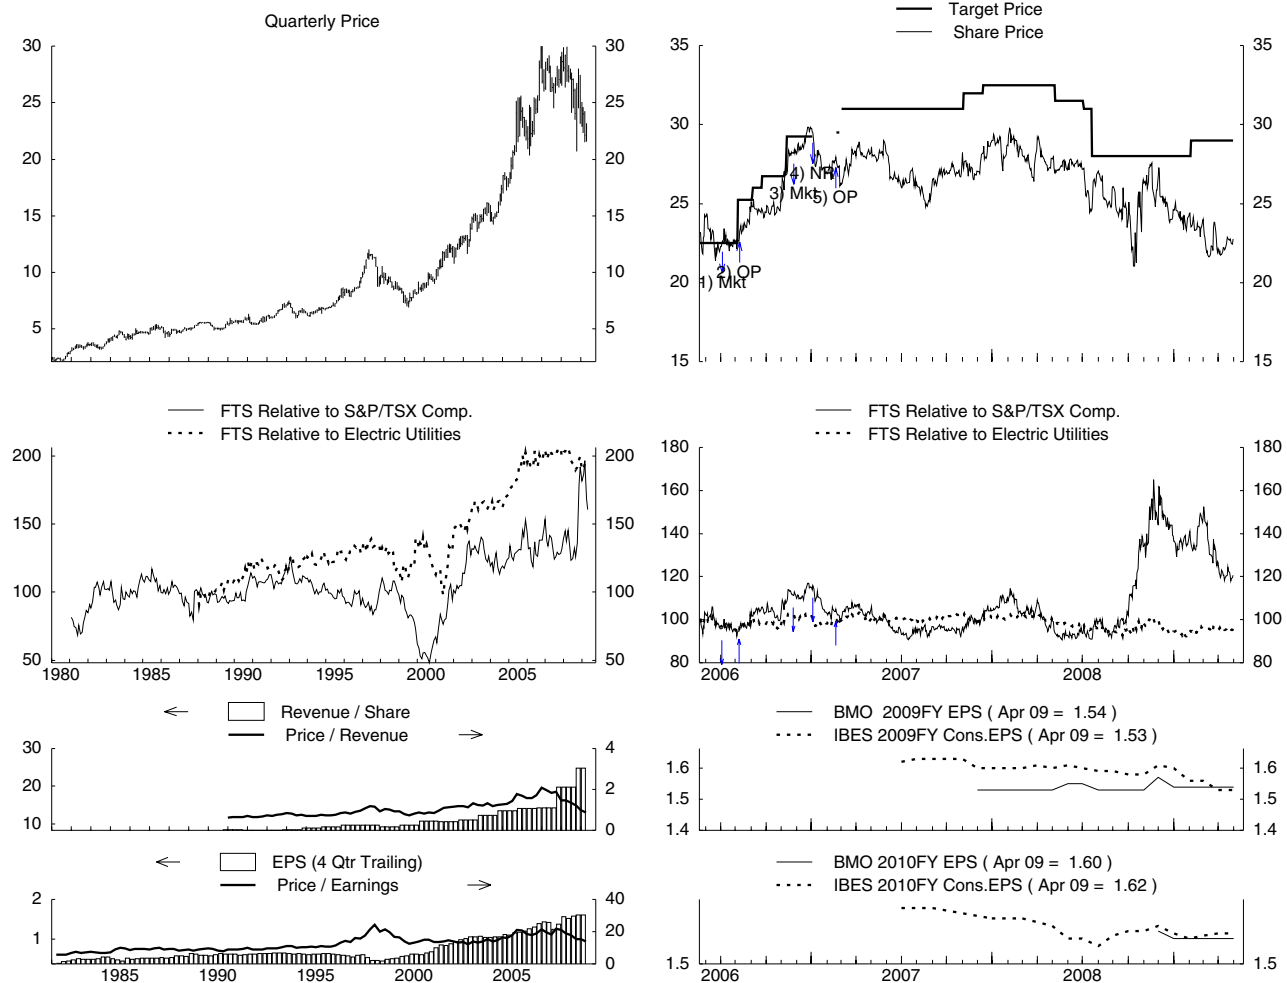

Slightly Negative

Details & Analysis

Fortis Inc. reported Q1/09 EPS of \$0.54 (basic), slightly lower than our estimate of \$0.58 and the First Call Mean of \$0.57 (range of \$0.59-0.55). The difference between expected and actual results appears to be due to lower-than-expected income from Fortis Properties (\$0.01/share); Terasen Inc. (\$0.01/share); Fortis Generation (\$0.01/share); and corporate costs that were (\$0.01/share) above our estimates. We believe the following points from the earnings release are relevant: (1) Q1/09 net income of \$92 million exceeded Q1/08 net income of \$91 million, but the issuance of 11.7 million common shares on December 19, 2008, appears to have resulted in some short-term dilution; (2) Although occupancy at Fortis properties remained relatively strong at 96% vs. 96.6% in Q1/08, transition costs associated with the acquisition of the Sheraton Hotel Newfoundland reduced earnings from the segment; and (3) a number of Fortis' regulated utilities (Terasen Gas, Terasen Gas Vancouver Island, Fortis Alberta, and Newfoundland Power) are expected to file rate applications in H1/09.

This report was prepared by an Analyst employed by a Canadian affiliate, BMO Nesbitt Burns Inc., and who is not registered as a research analyst under FINRA rules. For disclosure statements, including the Analyst's Certification, please refer to pages 2 to 4.

Company Risk Disclosure

In addition to the risks involved in investing in common stocks generally, we also highlight the following risks that pertain to this company. Operations are subject to complex regulation by a variety of provincial, state and federal (Canada, Cayman Islands & Belize) agencies. Changes in regulation may adversely affect performance.

Financial performance depends on the availability of installed generation and the production of electric power by third parties. Fortis Properties' cash flow is dependent on hotel room vacancy rates and commercial building occupancy levels. The company's operations in Belize may be disrupted and assets may be damaged by hurricanes and/or tropical storms.

Analyst's Certification

I, Michael McGowan, CA, CFA, hereby certify that the views expressed in this report accurately reflect my personal views about the subject securities or issuers. I also certify that no part of my compensation was, is, or will be, directly or indirectly, related to the specific recommendations or views expressed in this report.

General Disclosure

The information and opinions in this report were prepared by both BMO Nesbitt Burns Inc. and BMO Nesbitt Burns Ltée./Ltd., collectively ("BMO NB") and BMO Capital Markets Limited (U.K.), ("BMO CM Ltd"). BMO NB and BMO CM Ltd. are not subject to U.S. rules with regard to the preparation of research reports and the independence of analysts. "BMO Capital Markets" is a trade name used by the BMO Investment Banking Group, which includes the wholesale arm of Bank of Montreal and its subsidiaries BMO NB in Canada, BMO Capital Markets Ltd. in the U.K. and BMO Capital Markets Corp. in the U.S. BMO Capital Markets Ltd. and BMO Capital Markets Corp. are affiliates of BMO NB. Bank of Montreal or its subsidiaries ("BMO Financial Group") has lending arrangements with, or provide other remunerated services to, many issuers covered by BMO NB research. A significant lending relationship may exist between BMO Financial Group and certain of the issuers mentioned herein. The opinions, estimates and projections contained in this report are those of BMO NB and BMO CM Ltd. as of the date of this report and are subject to change without notice. BMO NB and BMO CM Ltd. endeavour to ensure that the contents have been compiled or derived from sources that we believe are reliable and contain information and opinions that are accurate and complete. However, BMO NB and BMO CM Ltd. make no representation or warranty, express or implied, in respect thereof, takes no responsibility for any errors and omissions contained herein and accepts no liability whatsoever for any loss arising from any use of, or reliance on, this report or its contents. Information may be available to BMO NB, BMO CM Ltd or its affiliates that is not reflected in this report. Ratings Key

We use the following ratings system definitions:

OP = Outperform - Forecast to outperform the market;

Mkt = Market Perform - Forecast to perform roughly in line with the market;

Und = Underperform - Forecast to underperform the market;

(S) = speculative investment;

NR = No rating at this time;

R = Restricted – Dissemination of research is currently restricted.

Market performance is measured by a benchmark index such as the S&P/TSX Composite Index, S&P 500, Nasdaq Composite, as appropriate for each company. Prior to September 1, 2003, a fourth rating tier—Top Pick—was used to designate those stocks we felt would be the best performers relative to the market. Our six Top 15 lists which guide investors to our best ideas according to six different objectives (large, small, growth, value, income and quantitative) have replaced the Top Pick rating.

Dissemination of Research

Our research publications are available via our web site <http://bmocapitalmarkets.com>. Institutional clients may also receive our research via FIRST CALL Research Direct and Reuters. All of our research is made widely available at the same time to all BMO NB, BMO Capital Markets Ltd., BMO Capital Markets Corp. and BMO Nesbitt Burns Securities Ltd. client groups entitled to our research. Please contact your investment advisor or institutional salesperson for more information.

Conflict Statement

A general description of how BMO Financial Group identifies and manages conflicts of interest is contained in our public facing policy for managing conflicts of interest in connection with investment research which is available at: http://research-ca.bmocapitalmarkets.com/conflict_statement_public.asp

Additional Matters

TO U.S. RESIDENTS: BMO Capital Markets Corp. and/or BMO Nesbitt Burns Securities Ltd., affiliates of BMO NB, furnish this report to U.S. residents and accept responsibility for the contents herein, except to the extent that it refers to securities of Bank of Montreal. Any U.S. person wishing to effect transactions in any security discussed herein should do so through BMO Capital Markets Corp. and/or BMO Nesbitt Burns Securities Ltd.

TO U.K. RESIDENTS: In the UK this document is published by BMO Capital Markets Limited which is authorised and regulated by the Financial Services Authority. The contents hereof are intended solely for the use of, and may only be issued or passed on to, (I) persons who have professional experience in matters relating to investments falling within Article 19(5) of the Financial Services and Markets Act 2000 (Financial Promotion) Order 2005 (the "Order") or (II) high net worth entities falling within Article 49(2)(a) to (d) of the Order (all such persons together referred to as "relevant persons"). The contents hereof are not intended for the use of and may not be issued or passed on to, retail clients.

BMO Nesbitt Burns Inc. and BMO Nesbitt Burns Ltée/Ltd. are Members of CIPF. BMO Capital Markets Corp. and BMO Nesbitt Burns Securities Ltd. are Members of SIPC.

Q1/09 Earnings Below Expectations; Maintaining Outperform Rating

Event

Fortis Inc. reported Q1/09 EPS of \$0.54 (basic). After adjusting for \$2 million of non-recurring income from Fortis Turks and Caicos, comparable EPS of \$0.53 were lower than our estimate of \$0.58 and the First Call Mean of \$0.57 (range of \$0.59-0.55). The difference between expected and actual results appears to be due to lower-than-expected income from the Caribbean utility companies (\$0.01/share); Fortis Properties (\$0.01/share); Terasen Inc. (\$0.01/share); Fortis Generation (\$0.01/share); and corporate costs that were (\$0.01/share) above our estimates.

Impact

Slightly Negative.

Forecasts

We have adjusted our forecasts to reflect Q1/09 results and increased our operating cost assumptions to be consistent with those reported this quarter. Our 2009E diluted EPS estimate declines to \$1.47 from \$1.54. Our 2010E EPS estimates are unchanged.

Valuation

Our revised target price of \$27 is based on a weighted valuation approach: 14x diluted 2010E EPS of \$1.60 (12.5%); 1.5x 2010E BVPS of \$19.05 (12.5%); and a target yield of 4.00%, assuming 2010E dividends per share of \$1.08.

Recommendation

We believe that Fortis' shares are attractively valued, considering the company's relatively low-risk, diversified business model. We believe Fortis' shares offer an appealing dividend yield (4.7% at current price levels) and should act as a store of value during a difficult economic period.

2009 Likely a Transition Year; Expect Growth to Resume in 2010

Fortis Inc. reported Q1/09 EPS of \$0.54 (basic). After adjusting for \$2 million of non-recurring income from Fortis Turks and Caicos, comparable EPS of \$0.53 were lower than our estimate of \$0.58 and the First Call Mean of \$0.57 (range of \$0.59–0.55). The difference between expected and actual results appears to be due to lower-than-expected income from the Caribbean utility companies (\$0.01/share); Fortis Properties (\$0.01/share); Terasen Inc. (\$0.01/share); Fortis Generation (\$0.01/share); and corporate costs that were (\$0.01/share) above our estimates.

Comparable net income of \$90 million was generally consistent with Q1/08 net income of \$91 million, suggesting that the issuance of 11.7 million common shares on December 19, 2008, may result in some near-term dilution (Q1/09 recurring EPS were \$0.53 (basic) versus recurring EPS of \$0.58 (basic) in Q1/08). We expect some weakness in earnings during 2009, as the expiry of water rights associated with the Rankine Generating Station will occur on April 30, 2009 (Rankine contributed approximately \$15 million/year of earnings), and note that the weak economy could affect occupancy and margins at Fortis Properties. We expect EPS growth to resume in 2010 as additional capital expenditures are transferred to rate base and the Vaca Hydroelectric facility comes online in Belize.

2009 will be an important year for regulatory applications. Rate applications are expected to be filed by Terasen Gas, Terasen Gas Vancouver Island, FortisAlberta and Newfoundland Power. We expect cost of capital reviews in British Columbia and possibly in Newfoundland in conjunction with these applications. Provincial regulators in Alberta and Ontario are expected to conduct generic cost of capital proceedings.

Many believe that the National Energy Board set a precedent when it issued its decision on the TransQuebec and Maritime Pipeline (TQM) cost of capital application (relating to the years 2007 and 2008) on March 19, 2009. Therein, the NEB departed from the Multi-Pipeline Cost of Capital decision (RH-2-94) by: (1) shifting to an ATWAAC approach that does not specifically outline a capital structure; and, (2) granting TQM a total return on capital of 6.4%, a level that is 90 basis points higher than would otherwise be calculated using the formula set out in Decision RH-2-94. Although we do not know whether provincial regulators will grant utilities higher deemed ROE, and do not incorporate a change in the methodology used to set regulated ROE in our outlook for Fortis, we believe that the prospect of higher regulated rates of return is positive for Fortis.

We are maintaining our Outperform rating, as we continue to believe that Fortis' shares are attractively valued, considering the company's low-risk, diversified business model. We believe that Fortis' shares offer an appealing dividend yield (4.7% at current price levels) and should act as a store of value during a difficult economic period.

We are revising our target price to \$27 from \$29. Our revised target price of \$27 is based on a weighted valuation approach: 14x diluted 2010E EPS of \$1.60 (12.5%); 1.5x 2010E BVPS of \$19.05 (12.5%); and a target yield of 4.00%, assuming 2010E dividends per share of \$1.08.

We have modified our valuation multiples to reflect higher market risk premiums. Our previous target price assumed the following valuation multiples: P/E of 16x, BVPS of 1.7x and a target dividend yield of 3.75%.

Q1/09 Results

As set out in Table 1, comparable income of \$90 million reported during Q1/09 was slightly below income of \$91 million reported during Q1/08.

Source: BMO Capital Markets, Company Reports

Regulated Gas Utilities – Terasen Gas Companies

Q1/09 net income of \$58 million from Terasen Gas was consistent with Q1/08 net income of \$58 million, but slightly lower than our estimate of \$60 million. Although Terasen Gas reported an increase in revenue, rising labour and benefit costs increased operating expenses. A lower regulated return on equity (8.47% during Q1/09 vs. 8.62% in Q1/08 at Terasen Gas Inc. and 9.17% during Q1/09 vs. 9.32% in Q1/08 at Terasen Gas Vancouver Island) also affected net income.

Regulated Electric Utilities – FortisAlberta

Q1/09 net income of \$12 million was consistent with our estimate of \$12.2 million and \$1 million higher than Q1/08 net income of \$11 million.

Regulated Electric Utilities – FortisBC

Q1/09 net income of \$14 million exceeded our estimate of \$12.9 million and Q1/08 net income of \$12 million. The variance between Q1/09 and Q1/08 results was largely due to a combination of increased revenue from higher customer rates and customer growth.

Regulated Electric Utilities – Newfoundland Power

Q1/09 net income of \$6 million was consistent with our estimate of \$6.3 million and Q1/08 net income of \$6 million.

Regulated Electric Utilities – Caribbean

The Caribbean Utility companies reported net income of \$6 million. After adjusting for non-recurring items of (1) \$1 million at Fortis Turks and Caicos related to a favourable court of appeal ruling regarding rates charged to certain industrial customers and (2) \$1 million related to a change in the method of accruing unbilled fuel factor revenue at Fortis Turks and Caicos, comparable net income of \$4 million was lower than Q1/08 net income of \$7 million and our \$6 million estimate. The difference between actual and expected results appears to be due to a combination of a reduction in sales volume (Q1/09 sales were 247 GWh vs. 258 GWh in Q1/08) and higher-than-expected operating and amortization expenses.

Unregulated – Fortis Generation

Fortis Generation reported Q1/09 net income of \$6 million, consistent with Q1/08 net income of \$6 million but lower than our estimate of \$7 million. The difference between actual and expected results was due to a combination of decreased energy sales of 257 GWh, which was lower than our forecast production of 270 GWh.

Unregulated – Fortis Properties

Fortis Properties reported net income of \$2 million, which was below our estimate of \$3.4 million and Q1/08 net income of \$3 million. Although Q1/09 occupancy of 96% was relatively consistent with 96.6% in Q1/08, revenue per available room fell to \$64.40 in Q1/09 versus \$67.82 in Q1/08. Earnings were also affected by incremental transitional operating costs associated with the acquisition of the Fairmont Newfoundland, which has been rebranded as the Sheraton Hotel Newfoundland.

During April, Fortis acquired the Holiday Inn Select in Windsor, Ontario, for \$7 million (\$32,710/door). Although the economy in Windsor is contracting due to exposure to the automobile industry, Fortis believes that on a per-unit basis, the price of this property was very compelling.

Capital Expenditure Update

Consistent with guidance contained in prior earnings releases, Fortis' five-year capital budget remains at \$4.5 billion. Approximately \$3.1 billion of this total is expected to be deployed by the company's electric utilities, and \$1.2 billion by the gas utilities. The company continues to forecast capital expenditures of \$1 billion in 2009.

FortisAlberta recently revised the capital cost of its Automated Meter Infrastructure initiative to \$161 million from \$124 million, as disclosed in the Q4/08 earnings release. The increase arises

from direction from the Alberta Department of Energy, which mandated the installation of “smart meters” with more advanced capabilities than those the company was originally planning to install. We understand that the total cost of \$161 million should be eligible for rate base inclusion and recoverable in customer rates over time.

Regulatory Update

We expect 2009 to be a busy year from a regulatory perspective. FortisAlberta, Terasen Gas Inc., Terasen Gas Vancouver Island, and Newfoundland Power are all expected to file rate applications by this summer.

We understand that as part of its application, Terasen Gas will request a review of its regulated ROE, the automatic adjustment mechanisms used to set ROE and the deemed equity component of its capital structure. Newfoundland Power may also request a cost of capital review in its rate application.

On May 19, the Alberta Utilities Commission will commence a generic cost of capital hearing. The outcome of this hearing will affect the regulated rate of return at FortisAlberta.

A summary of recent regulatory decisions is set out in Table 2.

Table 2: Recent Regulatory Decisions

Regulated Utility	Type of Decision	Outcome	Date Approved	Comment
Maritime Electric	2009 Rate Application	Approval of maximum allowed ROE of 9.75% for 2009; Residential rate increase of 5.3%, based on average consumption of 650 kWh per month.	Mar-09	25 bps decrease in allowed ROE from prior allowed return on equity of 10%.
FortisBC	2009 and 2010 Capital Expenditure Plan	Gross capital expenditures approved of \$165 million in 2009 and \$156 million in 2010	Feb-09	An additional \$16 million of capital expenditures is subject to further regulatory processes.
FortisBC	2009 Revenue Requirements	4.6% increase in rates, effective January 1, 2009	Dec-08	Rates reflect ROE of 8.87%. Performance-based rate setting mechanism has been extended to 2011 from 2009.
FortisAlberta	2009 Rate Application	Distribution rate increase of 8.6%, effective January 1, 2009	Dec-08	2007 ROE of 8.51% will be used for 2009, pending the outcome of the AUC's 2009 Generic Cost of Capital Proceeding.
Newfoundland Power	2009 Capital Budget	Approval of approximately \$62 million	Nov-08	Half of the proposed capital expenditures relate to replacing aged and deteriorated components of the electricity system.

Source: BMO Capital Markets, Company Reports

A summary of pending material regulatory decisions is set out in Table 3.

Table 3: Pending Material Regulatory Decisions

Regulated Utility	Regulatory Filing	Application Submission	Decision Date	Comment
Caribbean Utilities	Five-Year Capital Investment Plan	Dec-08	Q2 2009	Requesting approval for US\$246 million of capital expenditures over a five year period. Approximately US\$72 million is related to new generation that is expected to be solicited from third parties. In March 2009, the ERA approved 2009 capital expenditures of US\$48 million. Capital investment relating to 2010-2013 is still under review by the ERA.
Belize Electricity	Judicial review and appeal of the Final Decision on 2008/2009 Rate Application	Jul-08	TBD	Filed with the Supreme Court of Belize. Judicial process is ongoing with interim rulings, judgements, and appeals. Timing of the outcome of the proceedings is uncertain.

Source: BMO Capital Markets, Company Reports

Other Items

- The dispute between Belize Electricity Limited (BEL, 70.1% Fortis) and the Belize Public Utilities Commission regarding the PUC's final decision on BEL's 2008–2009 rate application is ongoing. BEL continues to challenge the PUC's final decision through the Supreme Court of Belize. We understand that a hearing regarding this matter is expected to occur in July 2009. We also understand that Fortis continues to collect rates consistent with the PUC's final decision.
- Following the Government of Newfoundland and Labrador's decision to expropriate the Newfoundland-based assets owned by AbitibiBowater, Fortis has de-consolidated its interest in the Exploits Partnership (51% Fortis Inc.; 49% AbitibiBowater) and now accounts for its interest in Exploits by using the equity method. Nalcor (100% Government of Newfoundland and Labrador) is now operating the facilities owned by Exploits (Grand Falls and Bishop's Falls); however, Fortis has not received payments for energy produced by the facility since February 13, 2009, the date at which the expropriation occurred. Fortis continues to accrue equity earnings that are equivalent to the amount which would have been earned prior to expropriation since the Government of Newfoundland and Labrador has publicly stated that it is not its intention to adversely affect the business interests of lenders or independent business partners of AbitibiBowater.

Estimates

We have adjusted our forecasts to reflect Q1/09 results and increased our operating cost assumptions to be consistent with those reported this quarter. Our 2009E diluted EPS estimate declines to \$1.47 from \$1.54. Our 2010E EPS estimates are unchanged.

Company Risk Disclosure

In addition to the risks involved in investing in common stocks generally, we also highlight the following risks that pertain to this company. Operations are subject to complex regulation by a variety of provincial, state and federal (Canada, Cayman Islands & Belize) agencies. Changes in regulation may adversely affect performance.

Financial performance depends on the availability of installed generation and the production of electric power by third parties. Fortis Properties' cash flow is dependent on hotel room vacancy rates and commercial building occupancy levels. The company's operations in Belize may be disrupted and assets may be damaged by hurricanes and/or tropical storms.

Analyst's Certification

I, Michael McGowan, CA, CFA, hereby certify that the views expressed in this report accurately reflect my personal views about the subject securities or issuers. I also certify that no part of my compensation was, is, or will be, directly or indirectly, related to the specific recommendations or views expressed in this report.

General Disclosure

The information and opinions in this report were prepared by both BMO Nesbitt Burns Inc. and BMO Nesbitt Burns Ltée./Ltd., collectively ("BMO NB") and BMO Capital Markets Limited (U.K.), ("BMO CM Ltd"). BMO NB and BMO CM Ltd. are not subject to U.S. rules with regard to the preparation of research reports and the independence of analysts. "BMO Capital Markets" is a trade name used by the BMO Investment Banking Group, which includes the wholesale arm of Bank of Montreal and its subsidiaries BMO NB in Canada, BMO Capital Markets Ltd. in the U.K. and BMO Capital Markets Corp. in the U.S. BMO Capital Markets Ltd. and BMO Capital Markets Corp. are affiliates of BMO NB. Bank of Montreal or its subsidiaries ("BMO Financial Group") has lending arrangements with, or provide other remunerated services to, many issuers covered by BMO NB research. A significant lending relationship may exist between BMO Financial Group and certain of the issuers mentioned herein. The opinions, estimates and projections contained in this report are those of BMO NB and BMO CM Ltd. as of the date of this report and are subject to change without notice. BMO NB and BMO CM Ltd. endeavour to ensure that the contents have been compiled or derived from sources that we believe are reliable and contain information and opinions that are accurate and complete. However, BMO NB and BMO CM Ltd. make no representation or warranty, express or implied, in respect thereof, takes no responsibility for any errors and omissions contained herein and accepts no liability whatsoever for any loss arising from any use of, or reliance on, this report or its contents. Information may be available to BMO NB, BMO CM Ltd or its affiliates that is not reflected in this report. The information in this report is not intended to be used as the primary basis of investment decisions, and because of individual client objectives, should not be construed as advice designed to meet the particular investment needs of any investor. This material is for information purposes only and is not an offer to sell or the solicitation of an offer to buy any security. The research analyst and/or associates who prepared this report are compensated based upon (among other factors) the overall profitability of BMO NB, BMO CM Ltd. and its affiliates, which includes the overall profitability of investment banking services. BMO NB, BMO CM Ltd., or its affiliates expect to receive or will seek compensation for investment banking services within the next 3 months from all issuers covered by BMO NB. BMO NB, BMO CM Ltd. or its affiliates will buy from or sell to customers the securities of issuers mentioned in this report on a principal basis. BMO NB, BMO CM Ltd. or its affiliates, officers, directors or employees may have a long or short position in the securities discussed herein, related securities or in options, futures or other derivative instruments based thereon. The reader should assume that BMO NB, BMO Capital Markets Ltd., BMO Capital Markets Corp., Bank of Montreal or their affiliates may have a conflict of interest and should not rely solely on this report in evaluating whether or not to buy or sell securities of issuers discussed herein.

Company Specific Disclosure

Disclosure 2: BMO NB has undertaken an underwriting liability with respect to this issuer within the past 12 months.

Disclosure 3: BMO NB has provided investment banking services with respect to this issuer within the past 12 months.

Disclosure 7: BMO Capital Markets Corp. or an affiliate has received compensation for investment banking services from this issuer within the past 12 months.

Disclosure 9: BMO Capital Markets Corp. or an affiliate received compensation for products or services other than investment banking services within the past 12 months.

Disclosure 10: This issuer is a client (or was a client) of BMO NB, BMO Capital Markets Corp., BMO CM Ltd. or an affiliate within the past 12 months: Investment Banking Services & Non-Securities Related Services.

Distribution of Ratings (Mar. 5, 2009)

Rating Category	BMO Rating	BMO Universe	BMO I.B. Clients*	Starmine Universe**
Buy	Outperform	29%	44%	47%
Hold	Market Perform	59%	51%	45%
Sell	Underperform	12%	5%	8%

* Reflects rating distribution of all companies where BMO Capital Markets has received compensation for Investment Banking services.

** Reflects rating distribution of all North American equity research analysts.

Ratings Key

We use the following ratings system definitions:

OP = Outperform - Forecast to outperform the market;

Mkt = Market Perform - Forecast to perform roughly in line with the market;

Und = Underperform - Forecast to underperform the market;

(S) = speculative investment;

NR = No rating at this time;

R = Restricted – Dissemination of research is currently restricted.

Market performance is measured by a benchmark index such as the S&P/TSX Composite Index, S&P 500, Nasdaq Composite, as appropriate for each company. Prior to September 1, 2003, a fourth rating tier—Top Pick—was used to designate those stocks we felt would be the best performers relative to the market. Our six Top 15 lists which guide investors to our best ideas according to six different objectives (large, small, growth, value, income and quantitative) have replaced the Top Pick rating.

Dissemination of Research

Our research publications are available via our web site <http://bmocapitalmarkets.com>. Institutional clients may also receive our research via FIRST CALL Research Direct and Reuters. All of our research is made widely available at the same time to all BMO NB, BMO Capital Markets Ltd., BMO Capital Markets Corp. and BMO Nesbitt Burns Securities Ltd. client groups entitled to our research. Please contact your investment advisor or institutional salesperson for more information.

Conflict Statement

A general description of how BMO Financial Group identifies and manages conflicts of interest is contained in our public facing policy for managing conflicts of interest in connection with investment research which is available at:

http://research-ca.bmocapitalmarkets.com/conflict_statement_public.asp

Acquisition of Great Lakes Power Distribution

Impact

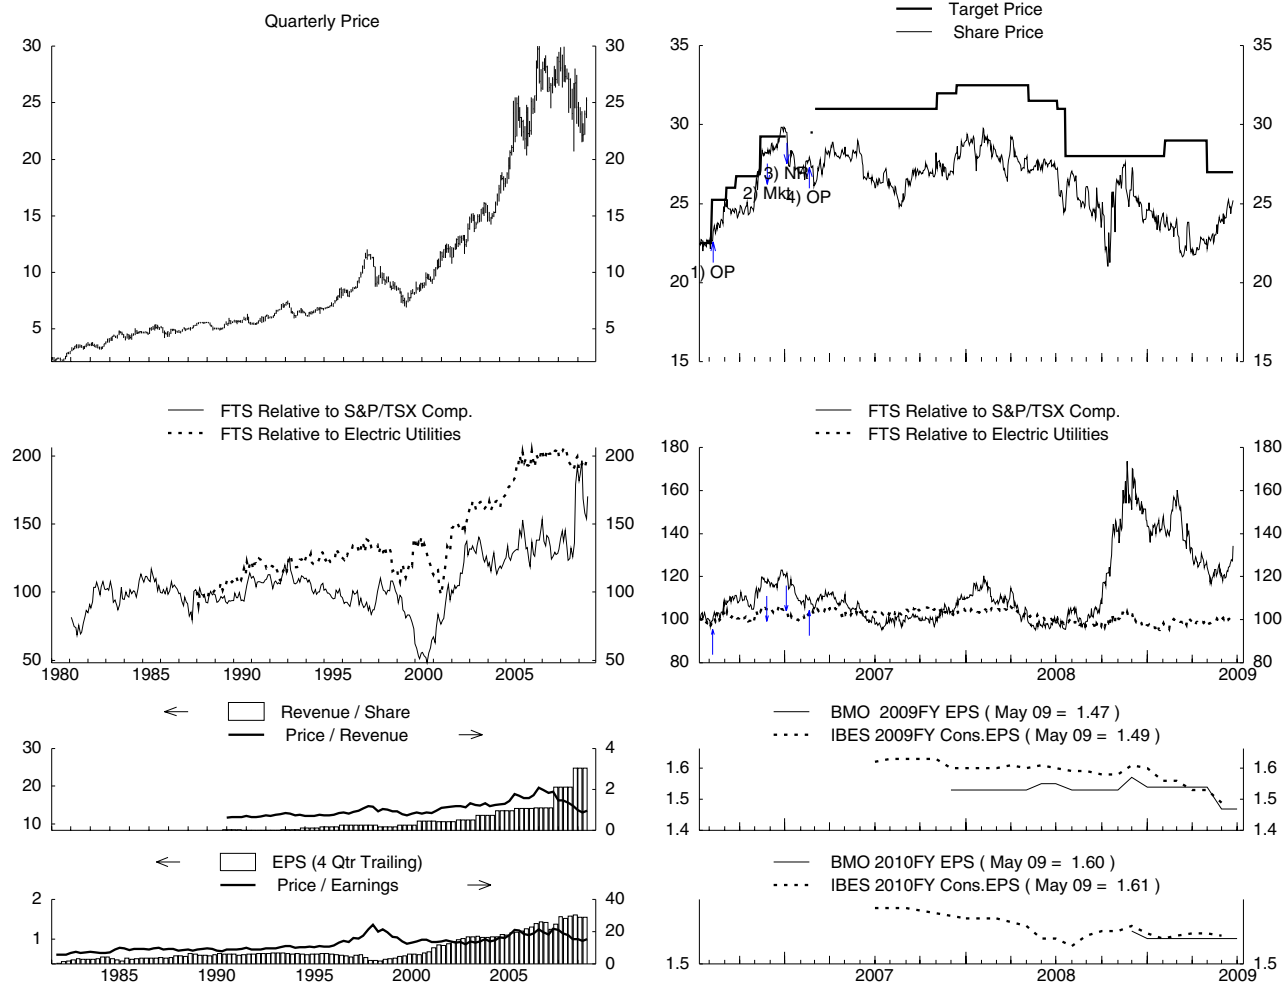

Slightly Positive

Details & Analysis

Fortis has announced that it has entered into an agreement to acquire Great Lakes Power Distribution Inc. from Brookfield Renewable Power Inc. for approximately \$68 million. We understand that the acquisition was priced at approximately 1.07x rate base or 98% of book value, and we estimate that the transaction could add \$0.01–0.02/share in earnings accretion. The acquisition is expected to close by the end of 2009 and is subject to regulatory approval (Competition Act and Ontario Energy Board).

This report was prepared by an Analyst employed by a Canadian affiliate, BMO Nesbitt Burns Inc., and who is not registered as a research analyst under FINRA rules. For disclosure statements, including the Analyst's Certification, please refer to pages 2 to 4.

Company Description – Fortis is a publicly listed holding company with four key businesses: electric utility operations, regulated natural gas distribution, non-regulated electric power generation and non-utility property activities. Electric power operations include Newfoundland Power (100%, Newfoundland), Maritime Electric (100%, PEI), Fortis Ontario (100%, Ontario), Belize Electricity (70.1%, Belize), Caribbean Utilities (56%, Grand Cayman Island),

Turks and Caicos (100%, Turks and Caicos), FortisAlberta (100%, Alberta) and FortisBC (100%, British Columbia).
Website: fortisinc.com

Recent Results – Fortis Inc. reported Q1/09 EPS of \$0.54 (basic). After adjusting for \$2 million of non-recurring income from Fortis Turks and Caicos, comparable EPS of \$0.53 were lower than our estimate of \$0.58 and the First Call Mean of \$0.57. The difference between expected and

This report was prepared by an Analyst employed by a Canadian affiliate, BMO Nesbitt Burns Inc., and who is not registered as a research analyst under FINRA rules. For disclosure statements, including the Analyst's Certification, please refer to pages 3 to 5.

actual results appears to be due to lower-than-expected income from the Caribbean utility companies (\$0.01/share); Fortis Properties (\$0.01/share); Terasen Inc. (\$0.01/share); Fortis Generation (\$0.01/share); and corporate costs that were (\$0.01/share) above our estimates.

Corporate Developments – 2009 will be an important year for regulatory applications. Rate applications are expected to be filed by Terasen Gas, Terasen Gas Vancouver Island, FortisAlberta and Newfoundland Power. We expect cost of capital reviews in British Columbia and possibly in Newfoundland in conjunction with these applications. In addition, provincial regulators in Alberta and Ontario are expected to conduct generic cost of capital proceedings.

On December 19, 2008, Fortis announced that it had completed the issuance of 11,700,000 common shares, priced at \$25.65/share, for gross proceeds of \$300.1 million. Approximately \$200 million from the issuance will be used

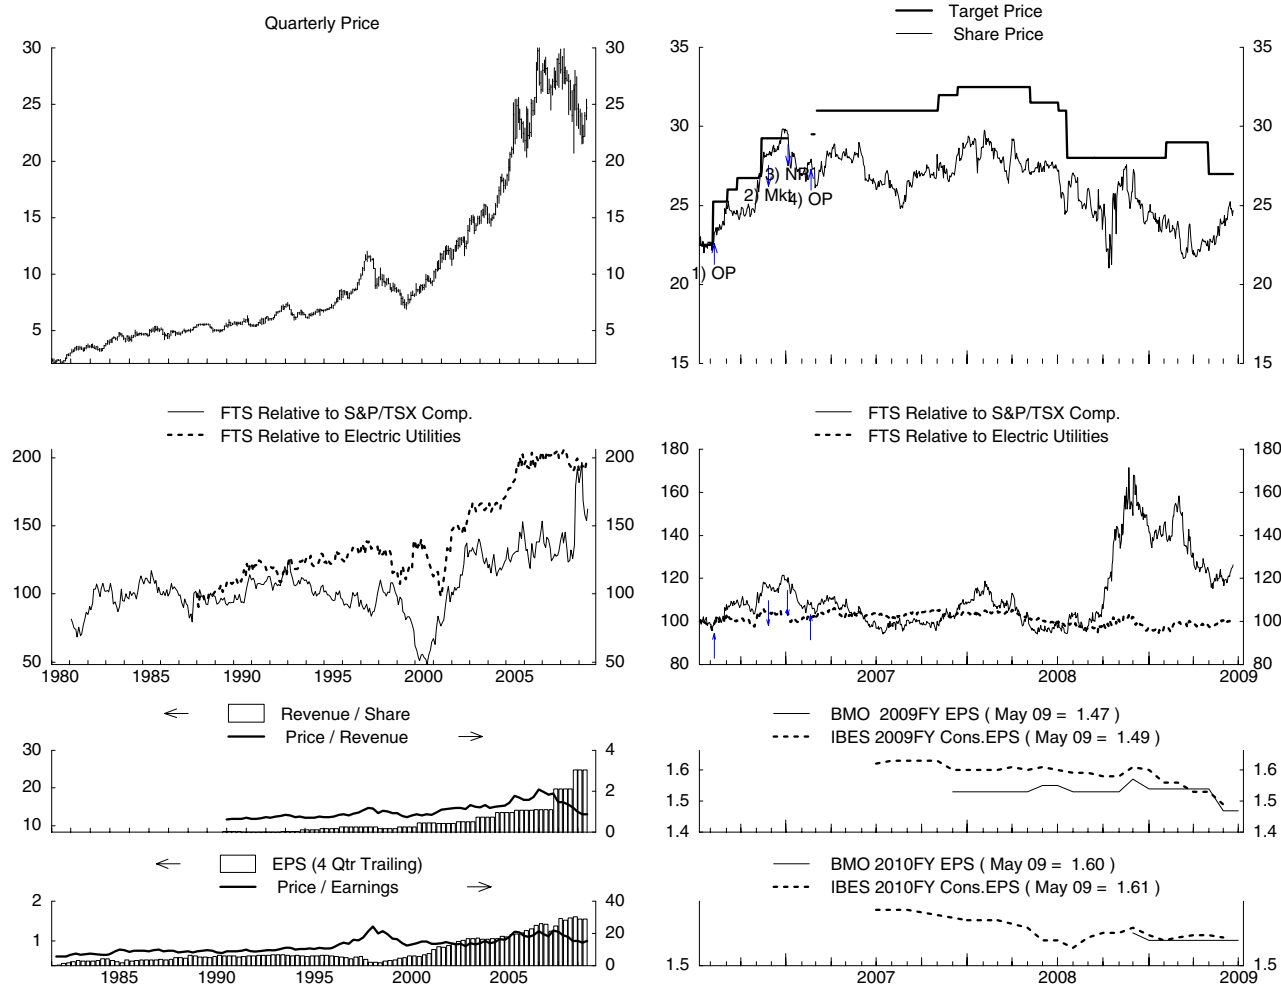

to repay debt incurred to temporarily finance the acquisition of Terasen Gas, which was completed in May 2007. The remaining proceeds will be used for general corporate purposes.

Forecasts – Our diluted EPS estimates are \$1.47 in 2009 and \$1.60 in 2010.

Valuation – Our target price of \$27 is based on a weighted valuation approach: 14x diluted 2010E EPS of \$1.60 (12.5%); 1.5x 2010E BVPS of \$19.05 (12.5%); and a target yield of 4.00%, assuming 2010E dividends per share of \$1.08.

Recommendation – We believe that Fortis' shares are attractively valued, considering the company's relatively low-risk, diversified business model. Our rating is Outperform. Member of Top 15 Income and Value stock selections.

Company Risk Disclosure

In addition to the risks involved in investing in common stocks generally, we also highlight the following risks that pertain to this company. Operations are subject to complex regulation by a variety of provincial, state and federal (Canada, Cayman Islands & Belize) agencies. Changes in regulation may adversely affect performance.

Financial performance depends on the availability of installed generation and the production of electric power by third parties. Fortis Properties' cash flow is dependent on hotel room vacancy rates and commercial building occupancy levels. The company's operations in Belize may be disrupted and assets may be damaged by hurricanes and/or tropical storms.

Analyst's Certification

I, Michael McGowan, CA, CFA, hereby certify that the views expressed in this report accurately reflect my personal views about the subject securities or issuers. I also certify that no part of my compensation was, is, or will be, directly or indirectly, related to the specific recommendations or views expressed in this report.

General Disclosure

The information and opinions in this report were prepared by both BMO Nesbitt Burns Inc. and BMO Nesbitt Burns Ltée./Ltd., collectively ("BMO NB") and BMO Capital Markets Limited (U.K.), ("BMO CM Ltd"). BMO NB and BMO CM Ltd. are not subject to U.S. rules with regard to the preparation of research reports and the independence of analysts. "BMO Capital Markets" is a trade name used by the BMO Investment Banking Group, which includes the wholesale arm of Bank of Montreal and its subsidiaries BMO NB in Canada, BMO Capital Markets Ltd. in the U.K. and BMO Capital Markets Corp. in the U.S. BMO Capital Markets Ltd. and BMO Capital Markets Corp. are affiliates of BMO NB. Bank of Montreal or its subsidiaries ("BMO Financial Group") has lending arrangements with, or provide other remunerated services to, many issuers covered by BMO NB research. A significant lending relationship may exist between BMO Financial Group and certain of the issuers mentioned herein. The opinions, estimates and projections contained in this report are those of BMO NB and BMO CM Ltd. as of the date of this report and are subject to change without notice. BMO NB and BMO CM Ltd. endeavour to ensure that the contents have been compiled or derived from sources that we believe are reliable and contain information and opinions that are accurate and complete. However, BMO NB and BMO CM Ltd. make no representation or warranty, express or implied, in respect thereof, takes no responsibility for any errors and omissions contained herein and accepts no liability whatsoever for any loss arising from any use of, or reliance on, this report or its contents. Information may be available to BMO NB, BMO CM Ltd or its affiliates that is not reflected in this report. The information in this report is not intended to be used as the primary basis of investment decisions, and because of individual client objectives, should not be construed as advice designed to meet the particular investment needs of any investor. This material is for information purposes only and is not an offer to sell or the solicitation of an offer to buy any security. The research analyst and/or associates who prepared this report are compensated based upon (among other factors) the overall profitability of BMO NB, BMO CM Ltd. and its affiliates, which includes the overall profitability of investment banking services. BMO NB, BMO CM Ltd., or its affiliates expect to receive or will seek compensation for investment banking services within the next 3 months from all issuers covered by BMO NB. BMO NB, BMO CM Ltd. or its affiliates will buy from or sell to customers the securities of issuers mentioned in this report on a principal basis. BMO NB, BMO CM Ltd. or its affiliates, officers, directors or employees may have a long or short position in the securities discussed herein, related securities or in options, futures or other derivative instruments based thereon. The reader should assume that BMO NB, BMO Capital Markets Ltd., BMO Capital Markets Corp., Bank of Montreal or their affiliates may have a conflict of interest and should not rely solely on this report in evaluating whether or not to buy or sell securities of issuers discussed herein.

Company Specific Disclosure

Disclosure 2: BMO NB has undertaken an underwriting liability with respect to this issuer within the past 12 months.

Disclosure 3: BMO NB has provided investment banking services with respect to this issuer within the past 12 months.

Disclosure 7: BMO Capital Markets Corp. or an affiliate has received compensation for investment banking services from this issuer within the past 12 months.

Disclosure 9: BMO Capital Markets Corp. or an affiliate received compensation for products or services other than investment banking services within the past 12 months.

Disclosure 10: This issuer is a client (or was a client) of BMO NB, BMO Capital Markets Corp., BMO CM Ltd. or an affiliate within the past 12 months: Investment Banking Services & Non-Securities Related Services.

Sell	Underperform	12%	7%	8%

* Reflects rating distribution of all companies where BMO Capital Markets has received compensation for Investment Banking services.

** Reflects rating distribution of all North American equity research analysts.

Ratings Key

We use the following ratings system definitions:

OP = Outperform - Forecast to outperform the market;

Mkt = Market Perform - Forecast to perform roughly in line with the market;

Und = Underperform - Forecast to underperform the market;

(S) = speculative investment;

NR = No rating at this time;

R = Restricted – Dissemination of research is currently restricted.

Market performance is measured by a benchmark index such as the S&P/TSX Composite Index, S&P 500, Nasdaq Composite, as appropriate for each company. Prior to September 1, 2003, a fourth rating tier—Top Pick—was used to designate those stocks we felt would be the best performers relative to the market. Our six Top 15 lists which guide investors to our best ideas according to six different objectives (large, small, growth, value, income and quantitative) have replaced the Top Pick rating.

Dissemination of Research

Our research publications are available via our web site <http://bmocapitalmarkets.com>. Institutional clients may also receive our research via FIRST CALL Research Direct and Reuters. All of our research is made widely available at the same time to all BMO NB, BMO Capital Markets Ltd., BMO Capital Markets Corp. and BMO Nesbitt Burns Securities Ltd. client groups entitled to our research. Please contact your investment advisor or institutional salesperson for more information.

Conflict Statement

A general description of how BMO Financial Group identifies and manages conflicts of interest is contained in our public facing policy for managing conflicts of interest in connection with investment research which is available at:

Details & Analysis

Fortis announced that it has acquired an additional 768,200 Class A Ordinary Shares of Caribbean Utilities Co. Ltd. at a price of \$8.78/share, pursuant to a private agreement dated July 22, 2009. As a result of this acquisition, Fortis has increased its interest in Caribbean Utilities to approximately 59.5% from approximately 57%. Given the small size of Caribbean Utilities relative to Fortis' consolidated business, we do not expect that this transaction will have a material impact on Fortis' financial results.

This report was prepared by an Analyst employed by a Canadian affiliate, BMO Nesbitt Burns Inc., and who is not registered as a research analyst under FINRA rules. For disclosure statements, including the Analyst's Certification, please refer to pages 2 to 6.

Company Risk Disclosures**(FTS-TSX)**

In addition to the risks involved in investing in common stocks generally, we also highlight the following risks that pertain to this company. Operations are subject to complex regulation by a variety of provincial, state and federal (Canada, Cayman Islands & Belize) agencies. Changes in regulation may adversely affect performance.

Financial performance depends on the availability of installed generation and the production of electric power by third parties. Fortis Properties' cash flow is dependent on hotel room vacancy rates and commercial building occupancy levels. The company's operations in Belize may be disrupted and assets may be damaged by hurricanes and/or tropical storms.

(CUP.U-TSX)

In addition to the risks involved in investing in common stocks generally, we also highlight the following risks that pertain to this company. The company's operations may be disrupted and assets may be damaged by hurricanes and/or tropical storms. Caribbean Utilities' cash flow is sensitive to commercial development and tourism on Grand Cayman Island and the U.S. economy.

Distribution of Ratings (June 11, 2009)

Rating Category	BMO Rating	BMO Universe	BMO I.B. Clients*	Starline Universe**
Buy	Outperform	31%	46%	46%
Hold	Market Perform	57%	47%	46%
Sell	Underperform	12%	7%	8%

* Reflects rating distribution of all companies where BMO Capital Markets has received compensation for Investment Banking services.

** Reflects rating distribution of all North American equity research analysts.

Ratings Key

We use the following ratings system definitions:

OP = Outperform - Forecast to outperform the market;

Mkt = Market Perform - Forecast to perform roughly in line with the market;

Und = Underperform - Forecast to underperform the market;

(S) = speculative investment;

NR = No rating at this time;

R = Restricted – Dissemination of research is currently restricted.

Market performance is measured by a benchmark index such as the S&P/TSX Composite Index, S&P 500, Nasdaq Composite, as appropriate for each company. Prior to September 1, 2003, a fourth rating tier—Top Pick—was used to designate those stocks we felt would be the best performers relative to the market. Our six Top 15 lists which guide investors to our best ideas according to six different objectives (large, small, growth, value, income and quantitative) have replaced the Top Pick rating.

Dissemination of Research

Our research publications are available via our web site <http://bmocapitalmarkets.com>. Institutional clients may also receive our research via FIRST CALL Research Direct and Reuters. All of our research is made widely available at the same time to all BMO NB, BMO Capital Markets Ltd., BMO Capital Markets Corp. and BMO Nesbitt Burns Securities Ltd. client groups entitled to our research. Please contact your investment advisor or institutional salesperson for more information.

Conflict Statement

A general description of how BMO Financial Group identifies and manages conflicts of interest is contained in our public facing policy for managing conflicts of interest in connection with investment research which is available at: http://research-ca.bmocapitalmarkets.com/conflict_statement_public.asp

Q2/09 Results Exceed Expectations

Impact

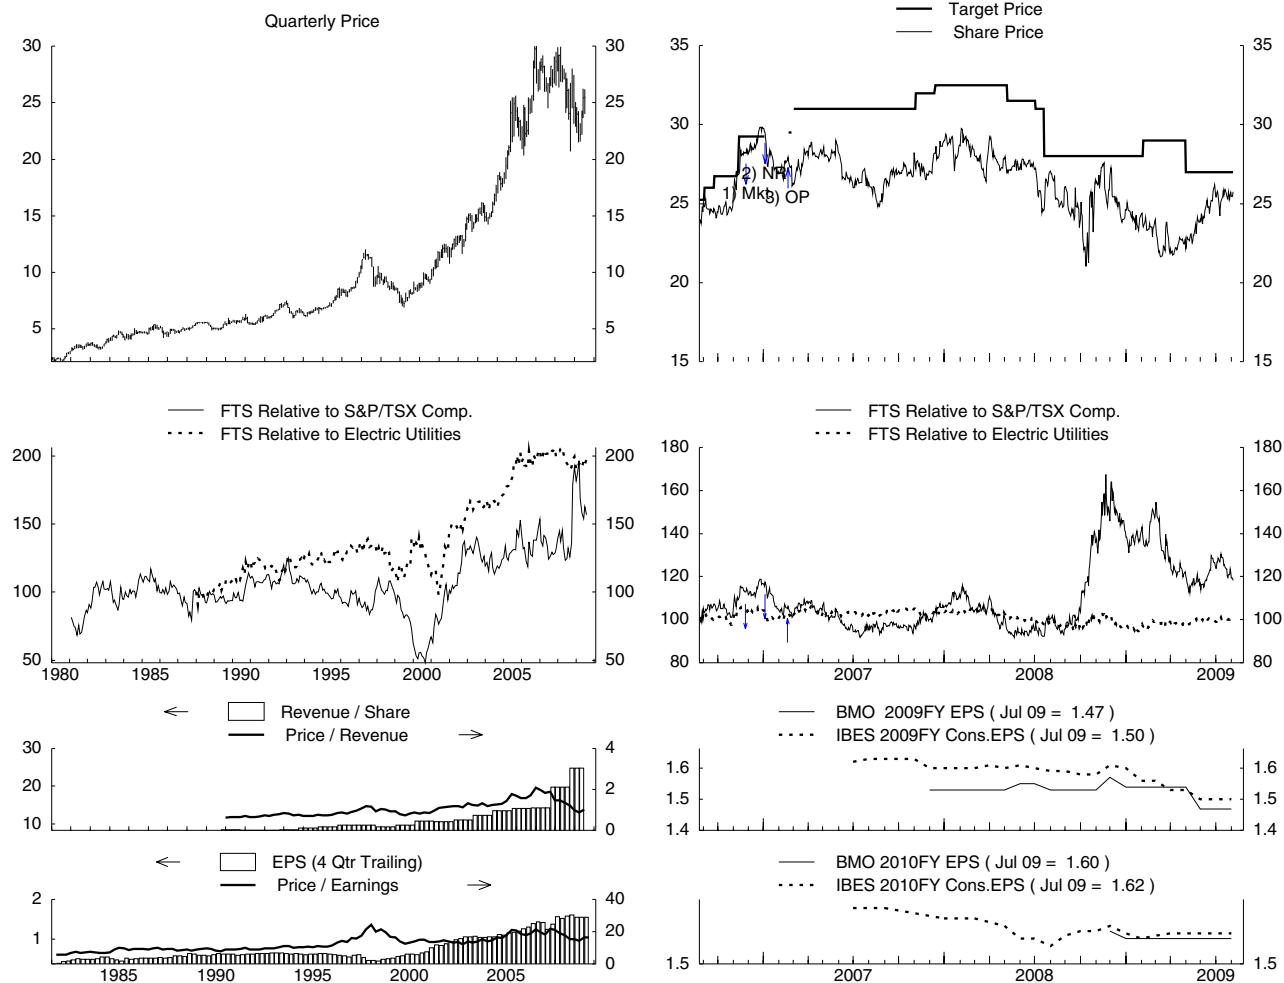

Slightly Positive

Details & Analysis

Fortis reported Q2/09 EPS of \$0.31 vs. our estimate of \$0.26 and the First Call Mean of \$0.27. The difference between actual and expected results was due to strong performance at Terasen Gas (\$0.03/share greater than expected) and FortisAlberta (\$0.03/share greater than expected), although earnings at FortisAlberta may have benefitted from a reduction in corporate income taxes. Earnings from the remainder of the company's business segments were generally in line with expectations. 2009 will be a busy year from a regulatory perspective. During Q2/09 FortisAlberta, the Terasen Companies, and Newfoundland Power all filed rate applications with their respective regulators. In addition, all of these utilities are engaged in cost of capital reviews. For example, Terasen Gas is requesting an increase in its allowed ROE to 11% from 8.47% and an increase in its equity thickness to 40% from 35% currently. Newfoundland Power is requesting an increase in its allowed ROE to 11% from 8.95%, and FortisAlberta is participating in the generic cost of capital proceeding being administered by the Alberta Utilities Commission. Decisions on these applications and cost of capital proceedings are expected in late 2009 or early 2010.

This report was prepared by an Analyst employed by a Canadian affiliate, BMO Nesbitt Burns Inc., and who is not registered as a research analyst under FINRA rules. For disclosure statements, including the Analyst's Certification, please refer to pages 2 to 4.

Company Risk Disclosure

In addition to the risks involved in investing in common stocks generally, we also highlight the following risks that pertain to this company. Operations are subject to complex regulation by a variety of provincial, state and federal (Canada, Cayman Islands & Belize) agencies. Changes in regulation may adversely affect performance.

Financial performance depends on the availability of installed generation and the production of electric power by third parties. Fortis Properties' cash flow is dependent on hotel room vacancy rates and commercial building occupancy levels. The company's operations in Belize may be disrupted and assets may be damaged by hurricanes and/or tropical storms.

Analyst's Certification

I, Michael McGowan, CA, CFA, hereby certify that the views expressed in this report accurately reflect my personal views about the subject securities or issuers. I also certify that no part of my compensation was, is, or will be, directly or indirectly, related to the specific recommendations or views expressed in this report.

OP = Outperform - Forecast to outperform the market;

Mkt = Market Perform - Forecast to perform roughly in line with the market;

Und = Underperform - Forecast to underperform the market;

(S) = speculative investment;

NR = No rating at this time;

R = Restricted – Dissemination of research is currently restricted.

Market performance is measured by a benchmark index such as the S&P/TSX Composite Index, S&P 500, Nasdaq Composite, as appropriate for each company. Prior to September 1, 2003, a fourth rating tier—Top Pick—was used to designate those stocks we felt would be the best performers relative to the market. Our six Top 15 lists which guide investors to our best ideas according to six different objectives (large, small, growth, value, income and quantitative) have replaced the Top Pick rating.

Dissemination of Research

Our research publications are available via our web site <http://bmocapitalmarkets.com>. Institutional clients may also receive our research via FIRST CALL Research Direct and Reuters. All of our research is made widely available at the same time to all BMO NB, BMO Capital Markets Ltd., BMO Capital Markets Corp. and BMO Nesbitt Burns Securities Ltd. client groups entitled to our research. Please contact your investment advisor or institutional salesperson for more information.

Conflict Statement

A general description of how BMO Financial Group identifies and manages conflicts of interest is contained in our public facing policy for managing conflicts of interest in connection with investment research which is available at: http://research-ca.bmocapitalmarkets.com/conflict_statement_public.asp

Additional Matters

Q2/09 Earnings Exceed Expectations; Maintaining Outperform Rating

Event

Fortis reported Q2/09 EPS of \$0.31 versus our estimate of \$0.26 and the First Call Mean of \$0.27. The difference between actual and expected results was due to strong earnings at Terasen Gas (\$0.03/share greater than our estimate) and FortisAlberta (\$0.03/share greater than our estimate), both of which benefitted from lower-than-expected income tax expenses. Earnings from the remainder of the company's business segments were generally in line with expectations.

Impact

Neutral.

Forecasts

We have updated our estimates to reflect Q2/09 results and forecast 2010 and 2011 rate base balances as set out in the rate applications filed by the Terasen Gas companies, FortisAlberta and Newfoundland Power. We have not adjusted our estimates to reflect requested changes to capital structure or allowed rates or return on equity. Our diluted EPS estimates increase to \$1.51 in 2009E from \$1.47 and to \$1.63 in 2010E from \$1.60.

Valuation

Our revised target price of \$29 is based on a weighted valuation approach: 15x diluted 2010E EPS of \$1.63 (12.5%); 1.75x 2010E BVPS of \$19.13 (12.5%) and a target yield of 3.75%, assuming 2010E dividends per share of \$1.08 (75%). We increased our valuation multiples to reflect lower market risk premiums.

Recommendation

We believe Fortis' shares are attractively valued, considering the company's relatively low-risk, diversified business model. Our rating is Outperform.

Q2/09 Results Exceed Expectations; Many Important Regulatory Proceedings to Conclude in H2/09

Fortis reported Q2/09 EPS of \$0.31 versus our estimate of \$0.26 and the First Call Mean of \$0.27. The difference between actual and expected results was due to strong earnings at Terasen Gas (\$0.03/share greater than our estimate) and FortisAlberta (\$0.03/share greater than our estimate), both of which benefitted from lower-than-expected income tax expenses. Earnings from the remainder of the company's business segments were generally in line with expectations.

As previously noted, 2009 will be an important year from a regulatory perspective. During Q2/09, FortisAlberta, the Terasen Companies and Newfoundland Power all filed rate applications with their respective regulators. In addition, all of these utilities are engaged in cost of capital reviews. For example, Terasen Gas is requesting an increase in its allowed ROE to 11% from 8.47% and an increase in its equity thickness to 40% from 35% currently. Newfoundland Power is requesting an increase in its allowed ROE to 11% from 8.95%, and FortisAlberta is participating in the generic cost of capital proceeding being administered by the Alberta Utilities Commission. Decisions on these applications and cost of capital proceedings are expected in late 2009 or early 2010.

Our estimates do not assume that provincial regulators grant the requested changes to capital structure and deemed return on equity. We believe, however, that the capital structure/deemed ROE proceedings are positive for regulated utilities in Canada, as they signify that regulators are willing to address the possibility that the current method of setting regulated rates of return may not adequately compensate investors for the risks they are incurring.

We are maintaining our Outperform rating, as we continue to believe that Fortis' shares are attractively valued, considering the company's low-risk, diversified business model.

We are increasing our price target to \$29 from \$27. Our \$29 target is based on a weighted valuation approach: 15x diluted 2010E EPS of \$1.63 (12.5%); 1.75x 2010E BVPS of \$19.13 (12.5%) and a target yield of 3.75%, assuming 2010E dividends per share of \$1.08 (75%).

We have increased our valuation multiples to reflect lower market risk premiums. Our previous target price assumed the following valuation multiples: P/E of 14x, BVPS of 1.5x, and a target dividend yield of 4.00%.

Q2/09 Results

As set out in Table 1, Q2/09 GAAP net income of \$53 million was \$9 million greater than comparable income of \$44 million reported in Q2/08. In order to present Q2/08 results on a comparable basis, Q2/08 GAAP income was adjusted for the following non-recurring expenses: 1) \$13 million of regulatory disallowances at Belize Electricity Limited (BEL); and 2) a charge of \$2 million at Fortis Ontario related to the Q2/08 repayment of amounts received in 2007 related to cross-border interconnection agreements.

A discussion of the operating performance of each business segment follows below.

Source: BMO Capital Markets, Company Reports

Regulated Gas Utilities – Terasen Gas Companies

Q2/09 net income of \$14 million from Terasen Gas exceeded our estimate of \$9.5 million and Q2/08 net income of \$12 million. Increased earnings in Q2/09 were primarily the result of a \$3 million reduction in income taxes, which declined to \$2 million in Q2/09 versus \$5 million in Q2/08. Per our discussion with management, the decrease in the Q2/09 income tax provision resulted from an increase in capital cost allowance rates for compressor equipment that was enacted during the quarter.

Regulated Electric Utilities – FortisAlberta

Q2/09 net income of \$17 million exceeded our estimate of \$11.6 million and Q2/08 net income of \$7 million. The variance between actual and expected results was largely related to a \$3 million income tax recovery recorded during Q2/09. We understand that approximately \$2 million of the recovery relates to a reversal of income tax provisions expensed during prior quarters, while the remaining \$1 million resulted from a future income tax benefit that was triggered by the collection of amounts held in a deferral account related to 2007 transmission tariffs paid to the Alberta Electric System Operator.

Regulated Electric Utilities – FortisBC

Q2/09 net income of \$7 million was consistent with our estimate of \$7 million and Q2/08 net income of \$7 million.

Regulated Electric Utilities – Newfoundland Power

Q2/09 net income of \$11 million was slightly greater than Q2/08 net income of \$10 million and our estimate of \$9.9 million.

Regulated Electric Utilities – Caribbean

The earnings contribution from the Caribbean business segment was \$7 million in Q2/09 versus our estimate of approximately \$8 million and adjusted Q2/08 earnings of \$8 million. The decrease in Q2/09 earnings was primarily caused by a lower allowed return on assets resulting from the Belize Public Utilities Commission's final decision on Belize Electricity Limited's 2008/2009 rate application.

Unregulated – Fortis Generation

Fortis Generation reported Q2/09 net income of \$3 million, which was consistent with our estimate of \$3 million and \$4 million lower than Q2/08 net income of \$7 million. The variance between Q2/09 and Q2/08 results was largely due to the expiration of the power-for-water exchange agreement at Rankine hydroelectric generating facility on April 30, 2009.

Unregulated – Fortis Properties

Fortis Properties reported net income of \$8 million, which was generally consistent with our estimate of \$7.4 million and Q2/08 net income of \$7 million. Occupancy decreased slightly during Q2/09 to 95.9% at the end of the quarter versus 96.7% at the end of Q2/08. Revenue per available room fell to \$83.15 during Q2/09 versus \$87.54 during Q2/08.

Regulatory Update

During Q2/09 FortisAlberta, the Terasen Companies and Newfoundland Power all filed rate applications with their respective regulators. In addition, all of these utilities are engaged in cost of capital reviews. Summaries of key applications filed during the quarter follow below:

Terasen Gas Inc. (TGI) / Terasen Gas Vancouver Island (TGVl)

- In May 2009, TGI filed a Return on Equity and Capital Structure Application with the British Columbia Utilities Commission (BCUC) requesting an increase in allowed ROE to 11% from 8.47%, effective July 1, 2009, and an increase in its allowed common equity

thickness to 40% from 35%, effective January 1, 2010. TGVI did not request a change to the 70-basis-point risk premium used to determine its regulated ROE.

- In June 2009, TGI and TGVI filed revenue requirement applications for the years 2010 and 2011 with the BCUC. The rate applications will be updated to reflect any changes to TGI or TGVI's financial profile, pursuant to the outcome of the Return on Equity and Capital Structure Application. The revenue requirement applications assume that TGI has average rate bases of approximately \$2,536 million and \$2,620 million in 2010 and 2011, respectively, while TGVI's application assumes forecast average rate bases of approximately \$555 million and \$730 million for 2010 and 2011, respectively.
- In June 2009, TGI prepared an application to internalize customer care services, effective January 2012 for an estimated capital cost of approximately \$145 million. TGI currently outsources customer care services to a third party. TGI has requested a decision on this application by the end of 2009.

Fortis Alberta

- In June 2009, FortisAlberta filed a revenue requirement application for the years 2010–2011 with the Alberta Utilities Commission (AUC). The application utilizes an interim allowed ROE of 8.75 percent with a deemed equity thickness of 37 percent, pending the outcome of the current Generic Cost of Capital proceeding, which is under way. Fortis Alberta's rate application assumes average rate bases of \$1,538 million and \$1,724 million for 2010 and 2011, respectively. The rate hearing is expected to begin in late 2009, and a regulatory decision by the AUC is expected to be finalized by the spring of 2010, with any changes to customer rates effective by the summer of 2010.

Newfoundland Power

- In May 2009, Newfoundland Power filed its 2010 General Rate Application, which seeks a 6.1% average increase in basic customer electricity rates, effective January 1, 2010. The application also requests the company's allowed ROE be increased to 11% from 8.95% and that the current equity thickness of 45% is maintained. The application assumes an average 2010 rate base of approximately \$867 million. The rate hearing is expected to commence during the fall of 2009.
- In June 2009, Newfoundland Power filed its 2010 Capital Budget Application, which requested the approval of \$65 million of capital expenditures.

Other Items

- Fortis increased its capital expenditure estimate by \$500 million and the company is now planning to invest approximately \$5 billion during the next five years. Approximately 70% of the total relates to planned capital expenditures at the regulated electric utilities, while 25% relates to the Terasen Companies, and 5% relates to Fortis' non-regulated businesses.

- The dispute between Belize Electricity Limited (BEL, 70.1% Fortis) and the Belize Public Utilities Commission (PUC) regarding the PUC's final decision on BEL's 2008/2009 rate application continues. A court date to hear BEL's appeal of the PUC's final decision is now scheduled for October 2009. The Supreme Court of Belize was originally expected to hear the appeal during July 2009.
- In a related matter, the Minister of Public Utilities of Belize recently issued a statutory instrument purporting to declare providers of electricity generation and water services, including the Belize Electric Company Limited ("BECOL", 100% Fortis), as public utility providers within the meaning of the Public Utilities Commission Act as of May 1, 2009. Fortis is currently assessing the impact of this proposal. We believe that the Supreme Court of Belize's ruling on the appeal of the PUC's final decision regarding BEL's 2008/2009 rate application may provide guidance about the eventual outcome of this ministerial initiative.

Estimates

We have updated our estimates to reflect Q2/09 results and the forecast 2010 and 2011 rate base balances as set out in the rate applications filed by the Terasen Gas companies, FortisAlberta and Newfoundland Power. We have not increased our estimates to reflect requested changes to capital structure or allowed rates or return on equity. Our diluted EPS estimates increase to \$1.51 in 2009E from \$1.47 and to \$1.63 in 2010E from \$1.60.

Company Risk Disclosure

In addition to the risks involved in investing in common stocks generally, we also highlight the following risks that pertain to this company. Operations are subject to complex regulation by a variety of provincial, state and federal (Canada, Cayman Islands & Belize) agencies. Changes in regulation may adversely affect performance.

Financial performance depends on the availability of installed generation and the production of electric power by third parties. Fortis Properties' cash flow is dependent on hotel room vacancy rates and commercial building occupancy levels. The company's operations in Belize may be disrupted and assets may be damaged by hurricanes and/or tropical storms.

Analyst's Certification

I, Michael McGowan, CA, CFA, hereby certify that the views expressed in this report accurately reflect my personal views about the subject securities or issuers. I also certify that no part of my compensation was, is, or will be, directly or indirectly, related to the specific recommendations or views expressed in this report.

General Disclosure

The information and opinions in this report were prepared by both BMO Nesbitt Burns Inc. and BMO Nesbitt Burns Ltée./Ltd., collectively ("BMO NB") and BMO Capital Markets Limited (U.K.), ("BMO CM Ltd"). BMO NB and BMO CM Ltd. are not subject to U.S. rules with regard to the preparation of research reports and the independence of analysts. "BMO Capital Markets" is a trade name used by the BMO Investment Banking Group, which includes the wholesale arm of Bank of Montreal and its subsidiaries BMO NB in Canada, BMO Capital Markets Ltd. in the U.K. and BMO Capital Markets Corp. in the U.S. BMO Capital Markets Ltd. and BMO Capital Markets Corp. are affiliates of BMO NB. Bank of Montreal or its subsidiaries ("BMO Financial Group") has lending arrangements with, or provide other remunerated services to, many issuers covered by BMO NB research. A significant lending relationship may exist between BMO Financial Group and certain of the issuers mentioned herein. The opinions, estimates and projections contained in this report are those of BMO NB and BMO CM Ltd. as of the date of this report and are subject to change without notice. Ratings Key

We use the following ratings system definitions:

OP = Outperform - Forecast to outperform the market;

Mkt = Market Perform - Forecast to perform roughly in line with the market;

Und = Underperform - Forecast to underperform the market;

(S) = speculative investment;

NR = No rating at this time;

R = Restricted – Dissemination of research is currently restricted.

Market performance is measured by a benchmark index such as the S&P/TSX Composite Index, S&P 500, Nasdaq Composite, as appropriate for each company. Prior to September 1, 2003, a fourth rating tier—Top Pick—was used to designate those stocks we felt would be the best performers relative to the market. Our six Top 15 lists which guide investors to our best ideas according to six different objectives (large, small, growth, value, income and quantitative) have replaced the Top Pick rating.

Dissemination of Research

Our research publications are available via our web site <http://bmocapitalmarkets.com>. Institutional clients may also receive our research via FIRST CALL Research Direct and Reuters. All of our research is made widely available at the same time to all BMO NB, BMO Capital Markets Ltd., BMO Capital Markets Corp. and BMO Nesbitt Burns Securities Ltd. client groups entitled to our research. Please contact your investment advisor or institutional salesperson for more information.

Conflict Statement

A general description of how BMO Financial Group identifies and manages conflicts of interest is contained in our public facing policy for managing conflicts of interest in connection with investment research which is available at:

http://research-ca.bmocapitalmarkets.com/conflict_statement_public.asp

Additional Matters

TO U.S. RESIDENTS: BMO Capital Markets Corp. and/or BMO Nesbitt Burns Securities Ltd., affiliates of BMO NB, furnish this report to U.S. residents and accept responsibility for the contents herein, except to the extent that it refers to securities of Bank of Montreal. Any U.S. person wishing to effect transactions in any security discussed herein should do so through BMO Capital Markets Corp. and/or BMO Nesbitt Burns Securities Ltd.

TO U.K. RESIDENTS: In the UK this document is published by BMO Capital Markets Limited which is authorised and regulated by the Financial Services Authority. The contents hereof are intended solely for the use of, and may only be issued or passed on to, (I) persons who have professional experience in matters relating to investments falling within Article 19(5) of the Financial Services and Markets Act 2000 (Financial Promotion) Order 2005 (the "Order") or (II) high net worth entities falling within Article 49(2)(a) to (d) of the Order (all such persons together referred to as "relevant persons"). The contents hereof are not intended for the use of and may not be issued or passed on to, retail clients.

Q2/09 Earnings Exceed Expectations; Maintaining Outperform Rating

Event

Fortis reported Q2/09 EPS of \$0.31 versus our estimate of \$0.26 and the First Call Mean of \$0.27. The difference between actual and expected results was due to strong earnings at Terasen Gas (\$0.03/share greater than our estimate) and FortisAlberta (\$0.03/share greater than our estimate), both of which benefitted from lower-than-expected income tax expenses. Earnings from the remainder of the company's business segments were generally in line with expectations.

Impact

Neutral.

Forecasts

We have updated our estimates to reflect Q2/09 results and forecast 2010 and 2011 rate base balances as set out in the rate applications filed by the Terasen Gas companies, FortisAlberta and Newfoundland Power. We have not adjusted our estimates to reflect requested changes to capital structure or allowed rates or return on equity. Our diluted EPS estimates increase to \$1.51 in 2009E from \$1.47 and to \$1.63 in 2010E from \$1.60.

Valuation

Our revised target price of \$29 is based on a weighted valuation approach: 15x diluted 2010E EPS of \$1.63 (12.5%); 1.75x 2010E BVPS of \$19.13 (12.5%) and a target yield of 3.75%, assuming 2010E dividends per share of \$1.08 (75%). We increased our valuation multiples to reflect lower market risk premiums.

Recommendation

We believe Fortis' shares are attractively valued, considering the company's relatively low-risk, diversified business model. Our rating is Outperform.

Q2/09 Results Exceed Expectations; Many Important Regulatory Proceedings to Conclude in H2/09

Fortis reported Q2/09 EPS of \$0.31 versus our estimate of \$0.26 and the First Call Mean of \$0.27. The difference between actual and expected results was due to strong earnings at Terasen Gas (\$0.03/share greater than our estimate) and FortisAlberta (\$0.03/share greater than our estimate), both of which benefitted from lower-than-expected income tax expenses. Earnings from the remainder of the company's business segments were generally in line with expectations.

As previously noted, 2009 will be an important year from a regulatory perspective. During Q2/09, FortisAlberta, the Terasen Companies and Newfoundland Power all filed rate applications with their respective regulators. In addition, all of these utilities are engaged in cost of capital reviews. For example, Terasen Gas is requesting an increase in its allowed ROE to 11% from 8.47% and an increase in its equity thickness to 40% from 35% currently. Newfoundland Power is requesting an increase in its allowed ROE to 11% from 8.95%, and FortisAlberta is participating in the generic cost of capital proceeding being administered by the Alberta Utilities Commission. Decisions on these applications and cost of capital proceedings are expected in late 2009 or early 2010.

Our estimates do not assume that provincial regulators grant the requested changes to capital structure and deemed return on equity. We believe, however, that the capital structure/deemed ROE proceedings are positive for regulated utilities in Canada, as they signify that regulators are willing to address the possibility that the current method of setting regulated rates of return may not adequately compensate investors for the risks they are incurring.

We are maintaining our Outperform rating, as we continue to believe that Fortis' shares are attractively valued, considering the company's low-risk, diversified business model.

We are increasing our price target to \$29 from \$27. Our \$29 target is based on a weighted valuation approach: 15x diluted 2010E EPS of \$1.63 (12.5%); 1.75x 2010E BVPS of \$19.13 (12.5%) and a target yield of 3.75%, assuming 2010E dividends per share of \$1.08 (75%).

We have increased our valuation multiples to reflect lower market risk premiums. Our previous target price assumed the following valuation multiples: P/E of 14x, BVPS of 1.5x, and a target dividend yield of 4.00%.

Q2/09 Results

As set out in Table 1, Q2/09 GAAP net income of \$53 million was \$9 million greater than comparable income of \$44 million reported in Q2/08. In order to present Q2/08 results on a comparable basis, Q2/08 GAAP income was adjusted for the following non-recurring expenses: 1) \$13 million of regulatory disallowances at Belize Electricity Limited (BEL); and 2) a charge of \$2 million at Fortis Ontario related to the Q2/08 repayment of amounts received in 2007 related to cross-border interconnection agreements.

A discussion of the operating performance of each business segment follows below.

Source: BMO Capital Markets, Company Reports

Regulated Gas Utilities – Terasen Gas Companies

Q2/09 net income of \$14 million from Terasen Gas exceeded our estimate of \$9.5 million and Q2/08 net income of \$12 million. Increased earnings in Q2/09 were primarily the result of a \$3 million reduction in income taxes, which declined to \$2 million in Q2/09 versus \$5 million in Q2/08. Per our discussion with management, the decrease in the Q2/09 income tax provision resulted from an increase in capital cost allowance rates for compressor equipment that was enacted during the quarter.

Regulated Electric Utilities – FortisAlberta

Q2/09 net income of \$17 million exceeded our estimate of \$11.6 million and Q2/08 net income of \$7 million. The variance between actual and expected results was largely related to a \$3 million income tax recovery recorded during Q2/09. We understand that approximately \$2 million of the recovery relates to a reversal of income tax provisions expensed during prior quarters, while the remaining \$1 million resulted from a future income tax benefit that was triggered by the collection of amounts held in a deferral account related to 2007 transmission tariffs paid to the Alberta Electric System Operator.

Regulated Electric Utilities – FortisBC

Q2/09 net income of \$7 million was consistent with our estimate of \$7 million and Q2/08 net income of \$7 million.

Regulated Electric Utilities – Newfoundland Power

Q2/09 net income of \$11 million was slightly greater than Q2/08 net income of \$10 million and our estimate of \$9.9 million.

Regulated Electric Utilities – Caribbean

The earnings contribution from the Caribbean business segment was \$7 million in Q2/09 versus our estimate of approximately \$8 million and adjusted Q2/08 earnings of \$8 million. The decrease in Q2/09 earnings was primarily caused by a lower allowed return on assets resulting from the Belize Public Utilities Commission's final decision on Belize Electricity Limited's 2008/2009 rate application.

Unregulated – Fortis Generation

Fortis Generation reported Q2/09 net income of \$3 million, which was consistent with our estimate of \$3 million and \$4 million lower than Q2/08 net income of \$7 million. The variance between Q2/09 and Q2/08 results was largely due to the expiration of the power-for-water exchange agreement at Rankine hydroelectric generating facility on April 30, 2009.

Unregulated – Fortis Properties

Fortis Properties reported net income of \$8 million, which was generally consistent with our estimate of \$7.4 million and Q2/08 net income of \$7 million. Occupancy decreased slightly during Q2/09 to 95.9% at the end of the quarter versus 96.7% at the end of Q2/08. Revenue per available room fell to \$83.15 during Q2/09 versus \$87.54 during Q2/08.

Regulatory Update

During Q2/09 FortisAlberta, the Terasen Companies and Newfoundland Power all filed rate applications with their respective regulators. In addition, all of these utilities are engaged in cost of capital reviews. Summaries of key applications filed during the quarter follow below:

Terasen Gas Inc. (TGI) / Terasen Gas Vancouver Island (TGVI)

- In May 2009, TGI filed a Return on Equity and Capital Structure Application with the British Columbia Utilities Commission (BCUC) requesting an increase in allowed ROE to 11% from 8.47%, effective July 1, 2009, and an increase in its allowed common equity

thickness to 40% from 35%, effective January 1, 2010. TGVI did not request a change to the 70-basis-point risk premium used to determine its regulated ROE.

- In June 2009, TGI and TGVI filed revenue requirement applications for the years 2010 and 2011 with the BCUC. The rate applications will be updated to reflect any changes to TGI or TGVI's financial profile, pursuant to the outcome of the Return on Equity and Capital Structure Application. The revenue requirement applications assume that TGI has average rate bases of approximately \$2,536 million and \$2,620 million in 2010 and 2011, respectively, while TGVI's application assumes forecast average rate bases of approximately \$555 million and \$730 million for 2010 and 2011, respectively.
- In June 2009, TGI prepared an application to internalize customer care services, effective January 2012 for an estimated capital cost of approximately \$145 million. TGI currently outsources customer care services to a third party. TGI has requested a decision on this application by the end of 2009.

Fortis Alberta

- In June 2009, FortisAlberta filed a revenue requirement application for the years 2010–2011 with the Alberta Utilities Commission (AUC). The application utilizes an interim allowed ROE of 8.75 percent with a deemed equity thickness of 37 percent, pending the outcome of the current Generic Cost of Capital proceeding, which is under way. Fortis Alberta's rate application assumes average rate bases of \$1,538 million and \$1,724 million for 2010 and 2011, respectively. The rate hearing is expected to begin in late 2009, and a regulatory decision by the AUC is expected to be finalized by the spring of 2010, with any changes to customer rates effective by the summer of 2010.

Newfoundland Power

- In May 2009, Newfoundland Power filed its 2010 General Rate Application, which seeks a 6.1% average increase in basic customer electricity rates, effective January 1, 2010. The application also requests the company's allowed ROE be increased to 11% from 8.95% and that the current equity thickness of 45% is maintained. The application assumes an average 2010 rate base of approximately \$867 million. The rate hearing is expected to commence during the fall of 2009.
- In June 2009, Newfoundland Power filed its 2010 Capital Budget Application, which requested the approval of \$65 million of capital expenditures.

Other Items

- Fortis increased its capital expenditure estimate by \$500 million and the company is now planning to invest approximately \$5 billion during the next five years. Approximately 70% of the total relates to planned capital expenditures at the regulated electric utilities, while 25% relates to the Terasen Companies, and 5% relates to Fortis' non-regulated businesses.

- The dispute between Belize Electricity Limited (BEL, 70.1% Fortis) and the Belize Public Utilities Commission (PUC) regarding the PUC's final decision on BEL's 2008/2009 rate application continues. A court date to hear BEL's appeal of the PUC's final decision is now scheduled for October 2009. The Supreme Court of Belize was originally expected to hear the appeal during July 2009.
- In a related matter, the Minister of Public Utilities of Belize recently issued a statutory instrument purporting to declare providers of electricity generation and water services, including the Belize Electric Company Limited ("BECOL", 100% Fortis), as public utility providers within the meaning of the Public Utilities Commission Act as of May 1, 2009. Fortis is currently assessing the impact of this proposal. We believe that the Supreme Court of Belize's ruling on the appeal of the PUC's final decision regarding BEL's 2008/2009 rate application may provide guidance about the eventual outcome of this ministerial initiative.

Estimates

We have updated our estimates to reflect Q2/09 results and the forecast 2010 and 2011 rate base balances as set out in the rate applications filed by the Terasen Gas companies, FortisAlberta and Newfoundland Power. We have not increased our estimates to reflect requested changes to capital structure or allowed rates or return on equity. Our diluted EPS estimates increase to \$1.51 in 2009E from \$1.47 and to \$1.63 in 2010E from \$1.60.

Company Risk Disclosure

In addition to the risks involved in investing in common stocks generally, we also highlight the following risks that pertain to this company. Operations are subject to complex regulation by a variety of provincial, state and federal (Canada, Cayman Islands & Belize) agencies. Changes in regulation may adversely affect performance.

Financial performance depends on the availability of installed generation and the production of electric power by third parties. Fortis Properties' cash flow is dependent on hotel room vacancy rates and commercial building occupancy levels. The company's operations in Belize may be disrupted and assets may be damaged by hurricanes and/or tropical storms.

Analyst's Certification

I, Michael McGowan, CA, CFA, hereby certify that the views expressed in this report accurately reflect my personal views about the subject securities or issuers. I also certify that no part of my compensation was, is, or will be, directly or indirectly, related to the specific recommendations or views expressed in this report.

General Disclosure

The information and opinions in this report were prepared by both BMO Nesbitt Burns Inc. and BMO Nesbitt Burns Ltée./Ltd., collectively ("BMO NB") and BMO Capital Markets Limited (U.K.), ("BMO CM Ltd"). BMO NB and BMO CM Ltd. are not subject to U.S. rules with regard to the preparation of research reports and the independence of analysts. "BMO Capital Markets" is a trade name used by the BMO Investment Banking Group, which includes the wholesale arm of Bank of Montreal and its subsidiaries BMO NB in Canada, BMO Capital Markets Ltd. in the U.K. and BMO Capital Markets Corp. in the U.S. BMO Capital Markets Ltd. and BMO Capital Markets Corp. are affiliates of BMO NB. Bank of Montreal or its subsidiaries ("BMO Financial Group") has lending arrangements with, or provide other remunerated services to, many issuers covered by BMO NB research. A significant lending relationship may exist between BMO Financial Group and certain of the issuers mentioned herein. The opinions, estimates and projections contained in this report are those of BMO NB and BMO CM Ltd. as of the date of this report and are subject to change without notice. BMO NB and BMO CM Ltd. endeavour to ensure that the contents have been compiled or derived from sources that we believe are reliable and contain information and opinions that are accurate and complete. However, BMO NB and BMO CM Ltd. make no representation or warranty, express or implied, in respect thereof, takes no responsibility for any errors and omissions contained herein and accepts no liability whatsoever for any loss arising from any use of, or reliance on, this report or its contents. Information may be available to BMO NB, BMO CM Ltd or its affiliates that is not reflected in this report. The information in this report is not intended to be used as the primary basis of investment decisions, and because of individual client objectives, should not be construed as advice designed to meet the particular investment needs of any investor. This material is for information purposes only and is not an offer to sell or the solicitation of an offer to buy any security. The research analyst and/or associates who prepared this report are compensated based upon (among other factors) the overall profitability of BMO NB, BMO CM Ltd. and its affiliates, which includes the overall profitability of investment banking services. BMO NB, BMO CM Ltd., or its affiliates expect to receive or will seek compensation for investment banking services within the next 3 months from all issuers covered by BMO NB. BMO NB, BMO CM Ltd. or its affiliates will buy from or sell to customers the securities of issuers mentioned in this report on a principal basis. BMO NB, BMO CM Ltd. or its affiliates, officers, directors or employees may have a long or short position in the securities discussed herein, related securities or in options, futures or other derivative instruments based thereon. The reader should assume that BMO NB, BMO Capital Markets Ltd., BMO Capital Markets Corp., Bank of Montreal or their affiliates may have a conflict of interest and should not rely solely on this report in evaluating whether or not to buy or sell securities of issuers discussed herein.

Company Specific Disclosure

Disclosure 2: BMO NB has undertaken an underwriting liability with respect to this issuer within the past 12 months.

Disclosure 3: BMO NB has provided investment banking services with respect to this issuer within the past 12 months.

Disclosure 7: BMO Capital Markets Corp. or an affiliate has received compensation for investment banking services from this issuer within the past 12 months.

Disclosure 9: BMO Capital Markets Corp. or an affiliate received compensation for products or services other than investment banking services within the past 12 months.

Disclosure 10: This issuer is a client (or was a client) of BMO NB, BMO Capital Markets Corp., BMO CM Ltd. or an affiliate within the past 12 months: Investment Banking Services & Non-Securities Related Services.

Distribution of Ratings (June 11, 2009)

Rating Category	BMO Rating	BMO Universe	BMO I.B. Clients*	Starmine Universe**
Buy	Outperform	31%	46%	46%
Hold	Market Perform	57%	47%	46%
Sell	Underperform	12%	7%	8%

* Reflects rating distribution of all companies where BMO Capital Markets has received compensation for Investment Banking services.

** Reflects rating distribution of all North American equity research analysts.

Ratings Key

We use the following ratings system definitions:

OP = Outperform - Forecast to outperform the market;

Mkt = Market Perform - Forecast to perform roughly in line with the market;

Und = Underperform - Forecast to underperform the market;

(S) = speculative investment;

NR = No rating at this time;

R = Restricted – Dissemination of research is currently restricted.

Market performance is measured by a benchmark index such as the S&P/TSX Composite Index, S&P 500, Nasdaq Composite, as appropriate for each company. Prior to September 1, 2003, a fourth rating tier—Top Pick—was used to designate those stocks we felt would be the best performers relative to the market. Our six Top 15 lists which guide investors to our best ideas according to six different objectives (large, small, growth, value, income and quantitative) have replaced the Top Pick rating.

Dissemination of Research

Our research publications are available via our web site <http://bmocapitalmarkets.com>. Institutional clients may also receive our research via FIRST CALL Research Direct and Reuters. All of our research is made widely available at the same time to all BMO NB, BMO Capital Markets Ltd., BMO Capital Markets Corp. and BMO Nesbitt Burns Securities Ltd. client groups entitled to our research. Please contact your investment advisor or institutional salesperson for more information.

Conflict Statement

A general description of how BMO Financial Group identifies and manages conflicts of interest is contained in our public facing policy for managing conflicts of interest in connection with investment research which is available at:

http://research-ca.bmocapitalmarkets.com/conflict_statement_public.asp

Additional Matters

TO U.S. RESIDENTS: BMO Capital Markets Corp. and/or BMO Nesbitt Burns Securities Ltd., affiliates of BMO NB, furnish this report to U.S. residents and accept responsibility for the contents herein, except to the extent that it refers to securities of Bank of Montreal. Any U.S. person wishing to effect transactions in any security discussed herein should do so through BMO Capital Markets Corp. and/or BMO Nesbitt Burns Securities Ltd.

TO U.K. RESIDENTS: In the UK this document is published by BMO Capital Markets Limited which is authorised and regulated by the Financial Services Authority. The contents hereof are intended solely for the use of, and may only be issued or passed on to, (I) persons who have professional experience in matters relating to investments falling within Article 19(5) of the Financial Services and Markets Act 2000 (Financial Promotion) Order 2005 (the "Order") or (II) high net worth entities falling within Article 49(2)(a) to (d) of the Order (all such persons together referred to as "relevant persons"). The contents hereof are not intended for the use of and may not be issued or passed on to, retail clients.

BMO Nesbitt Burns Inc. and BMO Nesbitt Burns Ltée/Ltd. are Members of CIPF. BMO Capital Markets Corp. and BMO Nesbitt Burns Securities Ltd. are Members of SIPC.

"BMO Capital Markets" is a trade-mark of Bank of Montreal, used under licence.

"BMO (M-Bar roundel symbol)" is a registered trade-mark of Bank of Montreal, used under licence.

Company Description – Fortis is a publicly listed holding company with four key businesses: electric utility operations, regulated natural gas distribution, non-regulated electric power generation and non-utility property activities. Electric power operations include Newfoundland Power (100%, Newfoundland), Maritime Electric (100%, PEI), Fortis Ontario (100%, Ontario), Belize Electricity (70.1%, Belize), Caribbean Utilities (56%, Grand Cayman Island),

Turks and Caicos (100%, Turks and Caicos), FortisAlberta (100%, Alberta) and FortisBC (100%, British Columbia).
Website: fortisinc.com

Recent Results – Fortis Inc. reported Q2/09 EPS of \$0.31 versus our estimate of \$0.26 and the First Call Mean of \$0.27. The difference between actual and expected results was due to strong earnings at Terasen Gas (\$0.03/share greater than our estimate) and FortisAlberta (\$0.03/share

This report was prepared by an Analyst employed by a Canadian affiliate, BMO Nesbitt Burns Inc., and who is not registered as a research analyst under FINRA rules. For disclosure statements, including the Analyst's Certification, please refer to pages 3 to 5.

greater than our estimate), both of which benefitted from lower-than-expected income tax expenses. Earnings from the remainder of the company's business segments were generally in line with expectations.

Corporate Developments – During Q2/09, FortisAlberta, the Terasen Companies and Newfoundland Power all filed rate applications with their respective regulators. In addition, all of these utilities are currently engaged in cost of capital reviews. Decisions on these applications and cost of capital proceedings are expected in late 2009 or early 2010.

Fortis has increased its capital expenditure estimate by \$500 million and the company is now planning to invest approximately \$5 billion during the next five years. Approximately 70% of the total relates to planned capital expenditures at the regulated electric utilities, 25% relates to

the Terasen Companies, and 5% relates to Forts' non-regulated businesses.

Forecasts – Our diluted EPS estimates are \$1.51 in 2009 and \$1.63 in 2010.

Valuation – Our target price of \$29 is based on a weighted valuation approach: 15x diluted 2010E EPS of \$1.63 (12.5%); 1.75x 2010E BVPS of \$19.13 (12.5%); and a target yield of 3.75%, assuming 2010E dividends per share of \$1.08.

Recommendation – We believe that Fortis's shares are attractively valued, considering the company's relatively low-risk, diversified business model. Our rating is Outperform. Member of Top 15 Income and Value stock selections.

Company Risk Disclosure

In addition to the risks involved in investing in common stocks generally, we also highlight the following risks that pertain to this company. Operations are subject to complex regulation by a variety of provincial, state and federal (Canada, Cayman Islands & Belize) agencies. Changes in regulation may adversely affect performance.

Financial performance depends on the availability of installed generation and the production of electric power by third parties. Fortis Properties' cash flow is dependent on hotel room vacancy rates and commercial building occupancy levels. The company's operations in Belize may be disrupted and assets may be damaged by hurricanes and/or tropical storms.

Analyst's Certification

I, Michael McGowan, CA, CFA, hereby certify that the views expressed in this report accurately reflect my personal views about the subject securities or issuers. I also certify that no part of my compensation was, is, or will be, directly or indirectly, related to the specific recommendations or views expressed in this report.

General Disclosure

The information and opinions in this report were prepared by both BMO Nesbitt Burns Inc. and BMO Nesbitt Burns Ltée./Ltd., collectively ("BMO NB") and BMO Capital Markets Limited (U.K.), ("BMO CM Ltd"). BMO NB and BMO CM Ltd. are not subject to U.S. rules with regard to the preparation of research reports and the independence of analysts. "BMO Capital Markets" is a trade name used by the BMO Investment Banking Group, which includes the wholesale arm of Bank of Montreal and its subsidiaries BMO NB in Canada, BMO Capital Markets Ltd. in the U.K. and BMO Capital Markets Corp. in the U.S. BMO Capital Markets Ltd. and BMO Capital Markets Corp. are affiliates of BMO NB. Bank of Montreal or its subsidiaries ("BMO Financial Group") has lending arrangements with, or provide other remunerated services to, many issuers covered by BMO NB research. A significant lending relationship may exist between BMO Financial Group and certain of the issuers mentioned herein. The opinions, estimates and projections contained in this report are those of BMO NB and BMO CM Ltd. as of the date of this report and are subject to change without notice. BMO NB and BMO CM Ltd. endeavour to ensure that the contents have been compiled or derived from sources that we believe are reliable and contain information and opinions that are accurate and complete. However, BMO NB and BMO CM Ltd. make no representation or warranty, express or implied, in respect thereof, takes no responsibility for any errors and omissions contained herein and accepts no liability whatsoever for any loss arising from any use of, or reliance on, this report or its contents. Information may be available to BMO NB, BMO CM Ltd or its affiliates that is not reflected in this report. The information in this report is not intended to be used as the primary basis of investment decisions, and because of individual client objectives, should not be construed as advice designed to meet the particular investment needs of any investor. This material is for information purposes only and is not an offer to sell or the solicitation of an offer to buy any security. The research analyst and/or associates who prepared this report are compensated based upon (among other factors) the overall profitability of BMO NB, BMO CM Ltd. and its affiliates, which includes the overall profitability of investment banking services. BMO NB, BMO CM Ltd., or its affiliates expect to receive or will seek compensation for investment banking services within the next 3 months from all issuers covered by BMO NB. BMO NB, BMO CM Ltd. or its affiliates will buy from or sell to customers the securities of issuers mentioned in this report on a principal basis. BMO NB, BMO CM Ltd. or its affiliates, officers, directors or employees may have a long or short position in the securities discussed herein, related securities or in options, futures or other derivative instruments based thereon. The reader should assume that BMO NB, BMO Capital Markets Ltd., BMO Capital Markets Corp., Bank of Montreal or their affiliates may have a conflict of interest and should not rely solely on this report in evaluating whether or not to buy or sell securities of issuers discussed herein.

Company Specific Disclosure

Disclosure 2: BMO NB has undertaken an underwriting liability with respect to this issuer within the past 12 months.

Disclosure 3: BMO NB has provided investment banking services with respect to this issuer within the past 12 months.

Disclosure 7: BMO Capital Markets Corp. or an affiliate has received compensation for investment banking services from this issuer within the past 12 months.

Disclosure 9: BMO Capital Markets Corp. or an affiliate received compensation for products or services other than investment banking services within the past 12 months.

Disclosure 10: This issuer is a client (or was a client) of BMO NB, BMO Capital Markets Corp., BMO CM Ltd. or an affiliate within the past 12 months: Investment Banking Services & Non-Securities Related Services.

Distribution of Ratings (June 11, 2009)

Rating Category	BMO Rating	BMO Universe	BMO I.B. Clients *	Starmine Universe **
--------------------	---------------	-----------------	-----------------------	-------------------------

Buy	Outperform	31%	46%	46%
Hold	Market Perform	57%	47%	46%
Sell	Underperform	12%	7%	8%

* Reflects rating distribution of all companies where BMO Capital Markets has received compensation for Investment Banking services.

** Reflects rating distribution of all North American equity research analysts.

Ratings Key

We use the following ratings system definitions:

OP = Outperform - Forecast to outperform the market;

Mkt = Market Perform - Forecast to perform roughly in line with the market;

Und = Underperform - Forecast to underperform the market;

(S) = speculative investment;

NR = No rating at this time;

R = Restricted – Dissemination of research is currently restricted.

Market performance is measured by a benchmark index such as the S&P/TSX Composite Index, S&P 500, Nasdaq Composite, as appropriate for each company. Prior to September 1, 2003, a fourth rating tier—Top Pick—was used to designate those stocks we felt would be the best performers relative to the market. Our six Top 15 lists which guide investors to our best ideas according to six different objectives (large, small, growth, value, income and quantitative) have replaced the Top Pick rating.

Dissemination of Research

Our research publications are available via our web site <http://bmocapitalmarkets.com>. Institutional clients may also receive our research via FIRST CALL Research Direct and Reuters. All of our research is made widely available at the same time to all BMO NB, BMO Capital Markets Ltd., BMO Capital Markets Corp. and BMO Nesbitt Burns Securities Ltd. client groups entitled to our research. Please contact your investment advisor or institutional salesperson for more information.

Conflict Statement

A general description of how BMO Financial Group identifies and manages conflicts of interest is contained in our public facing policy for managing conflicts of interest in connection with investment research which is available at:
http://research-ca.bmocapitalmarkets.com/conflict_statement_public.asp

Additional Matters

TO U.S. RESIDENTS: BMO Capital Markets Corp. and/or BMO Nesbitt Burns Securities Ltd., affiliates of BMO NB, furnish this report to U.S. residents and accept responsibility for the contents herein, except to the extent that it refers to securities of Bank of Montreal. Any U.S. person wishing to effect transactions in any security discussed herein should do so through BMO Capital Markets Corp. and/or BMO Nesbitt Burns Securities Ltd.

TO U.K. RESIDENTS: In the UK this document is published by BMO Capital Markets Limited which is authorised and regulated by the Financial Services Authority. The contents hereof are intended solely for the use of, and may only be issued or passed on to, (I) persons who have professional experience in matters relating to investments falling within Article 19(5) of the Financial Services and Markets Act 2000 (Financial Promotion) Order 2005 (the "Order") or (II) high net worth entities falling within Article 49(2)(a) to (d) of the Order (all such persons together referred to as "relevant persons"). The contents hereof are not intended for the use of and may not be issued or passed on to, retail clients.

BMO Nesbitt Burns Inc. and BMO Nesbitt Burns Ltée/Ltd. are Members of CIPF. BMO Capital Markets Corp. and BMO Nesbitt Burns Securities Ltd. are Members of SIPC.

"BMO Capital Markets" is a trade-mark of Bank of Montreal, used under licence.

"BMO (M-Bar roundel symbol)" is a registered trade-mark of Bank of Montreal, used under licence.

Company Description – Fortis is a publicly listed holding company with four key businesses: electric utility operations, regulated natural gas distribution, non-regulated electric power generation and non-utility property activities. Electric power operations include Newfoundland Power (100%, Newfoundland), Maritime Electric (100%, PEI), Fortis Ontario (100%, Ontario), Belize Electricity (70.1%, Belize), Caribbean Utilities (56%, Grand Cayman Island),

Turks and Caicos (100%, Turks and Caicos), FortisAlberta (100%, Alberta) and FortisBC (100%, British Columbia).
Website: fortisinc.com

Recent Results – Fortis Inc. reported Q2/09 EPS of \$0.31 versus our estimate of \$0.26 and the First Call Mean of \$0.27. The difference between actual and expected results was due to strong earnings at Terasen Gas (\$0.03/share greater than our estimate) and FortisAlberta (\$0.03/share

This report was prepared by an Analyst employed by a Canadian affiliate, BMO Nesbitt Burns Inc., and who is not registered as a research analyst under FINRA rules. For disclosure statements, including the Analyst's Certification, please refer to pages 3 to 5.

greater than our estimate), both of which benefitted from lower-than-expected income tax expenses. Earnings from the remainder of the company's business segments were generally in line with expectations.

Corporate Developments – During Q2/09, FortisAlberta, the Terasen Companies and Newfoundland Power all filed rate applications with their respective regulators. In addition, all of these utilities are currently engaged in cost of capital reviews. Decisions on these applications and cost of capital proceedings are expected in late 2009 or early 2010.

Fortis has increased its capital expenditure estimate by \$500 million and the company is now planning to invest approximately \$5 billion during the next five years. Approximately 70% of the total relates to planned capital expenditures at the regulated electric utilities, 25% relates to

the Terasen Companies, and 5% relates to Forts' non-regulated businesses.

Forecasts – Our diluted EPS estimates are \$1.51 in 2009 and \$1.63 in 2010.

Valuation – Our target price of \$29 is based on a weighted valuation approach: 15x diluted 2010E EPS of \$1.63 (12.5%); 1.75x 2010E BVPS of \$19.13 (12.5%); and a target yield of 3.75%, assuming 2010E dividends per share of \$1.08.

Recommendation – We believe that Fortis's shares are attractively valued, considering the company's relatively low-risk, diversified business model. Our rating is Outperform. Member of Top 15 Income and Value stock selections.

Details & Analysis

Fortis reported Q3/09 EPS of \$0.21, consistent with our estimate of \$0.22 and the First Call Mean of \$0.21 (range \$0.19-0.23). The company's regulated utilities in Canada appear to be performing well and better-than-expected results at Fortis Alberta and the Terasen Gas Companies were offset by slightly lower-than-expected results at Caribbean Utilities, Fortis Generation and Fortis Properties. Broad capital expenditure forecasts were maintained: Fortis continues to expect capital expenditures of over \$1 billion in 2009 and approximately \$5 billion over the five-year period of 2009-2013.

This report was prepared by an Analyst employed by a Canadian affiliate, BMO Nesbitt Burns Inc., and who is not registered as a research analyst under FINRA rules. For disclosure statements, including the Analyst's Certification, please refer to pages 2 to 4.

Company Risk Disclosure

In addition to the risks involved in investing in common stocks generally, we also highlight the following risks that pertain to this company. Operations are subject to complex regulation by a variety of provincial, state and federal (Canada, Cayman Islands & Belize) agencies. Changes in regulation may adversely affect performance.

Financial performance depends on the availability of installed generation and the production of electric power by third parties. Fortis Properties' cash flow is dependent on hotel room vacancy rates and commercial building occupancy levels. The company's operations in Belize may be disrupted and assets may be damaged by hurricanes and/or tropical storms.

Analyst's Certification

I, Michael McGowan, CA, CFA, hereby certify that the views expressed in this report accurately reflect my personal views about the subject securities or issuers. I also certify that no part of my compensation was, is, or will be, directly or indirectly, related to the specific recommendations or views expressed in this report.

General Disclosure

The information and opinions in this report were prepared by both BMO Nesbitt Burns Inc. and BMO Nesbitt Burns Ltée./Ltd., collectively ("BMO NB") and BMO Capital Markets Limited (U.K.), ("BMO CM Ltd"). BMO NB and BMO CM Ltd. are not subject to U.S. rules with regard to the preparation of research reports and the independence of analysts. "BMO Capital Markets" is a trade name used by the BMO Investment Banking Group, which includes the wholesale arm of Bank of Montreal and its subsidiaries BMO NB in Canada, BMO Capital Markets Ltd. in the U.K. and BMO Capital Markets Corp. in the U.S. BMO Capital Markets Ltd. and BMO Capital Markets Corp. are affiliates of BMO NB. Bank of Montreal or its subsidiaries ("BMO Financial Group") has lending arrangements with, or provide other remunerated services to, many issuers covered by BMO NB research. A significant lending relationship may exist between BMO Financial Group and certain of the issuers mentioned herein. The opinions, estimates and projections contained in this report are those of BMO NB and BMO CM Ltd. as of the date of this report and are subject to change without notice. BMO NB and BMO CM Ltd. endeavour to ensure that the contents have been compiled or derived from sources that we believe are reliable and contain information and opinions that are accurate and complete. However, BMO NB and BMO CM Ltd. make no representation or warranty, express or implied, in respect thereof, takes no responsibility for any errors and omissions contained herein and accepts no liability whatsoever for any loss arising from any use of, or reliance on, this report or its contents. Information may be available to BMO NB, BMO CM Ltd or its affiliates that is not reflected in this report. The information in this report is not intended to be used as the primary basis of investment decisions, and because of individual client objectives, should not be construed as advice designed to meet the particular investment needs of any investor. This material is for information purposes only and is not an offer to sell or the solicitation of an offer to buy any security. The research analyst and/or associates who prepared this report are compensated based upon (among other factors) the overall profitability of BMO NB, BMO CM Ltd. and its affiliates, which includes the overall profitability of investment banking services. BMO NB, BMO CM Ltd., or its affiliates expect to receive or will seek compensation for investment banking services within the next 3 months from all issuers covered by BMO NB. BMO NB, BMO CM Ltd. or its affiliates will buy from or sell to customers the securities of issuers mentioned in this report on a principal basis. BMO NB, BMO CM Ltd. or its affiliates, officers, directors or employees may have a long or short position in the securities discussed herein, related securities or in options, futures or other derivative instruments based thereon. The reader should assume that BMO NB, BMO Capital Markets Ltd., BMO Capital Markets Corp., Bank of Montreal or their affiliates may have a conflict of interest and should not rely solely on this report in evaluating whether or not to buy or sell securities of issuers discussed herein.

Company Specific Disclosure

Disclosure 2: BMO NB has undertaken an underwriting liability with respect to this issuer within the past 12 months.

Disclosure 3: BMO NB has provided investment banking services with respect to this issuer within the past 12 months.

Disclosure 7: BMO Capital Markets Corp. or an affiliate has received compensation for investment banking services from this issuer within the past 12 months.

Disclosure 9: BMO Capital Markets Corp. or an affiliate received compensation for products or services other than investment banking services within the past 12 months.

Disclosure 10: This issuer is a client (or was a client) of BMO NB, BMO Capital Markets Corp., BMO CM Ltd. or an affiliate within the past 12 months: Investment Banking Services & Non-Securities Related Services.

Distribution of Ratings (Sept. 10, 2009)

Rating	BMO	BMO	BMO	Starmine
Category	Rating	Universe	I.B. Clients*	Universe**
Buy	Outperform	36%	48%	48%
Hold	Market Perform	55%	48%	44%
Sell	Underperform	9%	4%	8%

* Reflects rating distribution of all companies where BMO Capital Markets has received compensation for Investment Banking services.

** Reflects rating distribution of all North American equity research analysts.

Ratings Key

We use the following ratings system definitions:

OP = Outperform - Forecast to outperform the market;

Mkt = Market Perform - Forecast to perform roughly in line with the market;

Und = Underperform - Forecast to underperform the market;

(S) = speculative investment;

NR = No rating at this time;

R = Restricted – Dissemination of research is currently restricted.

Market performance is measured by a benchmark index such as the S&P/TSX Composite Index, S&P 500, Nasdaq Composite, as appropriate for each company. Prior to September 1, 2003, a fourth rating tier—Top Pick—was used to designate those stocks we felt would be the best performers relative to the market. Our six Top 15 lists which guide investors to our best ideas according to six different objectives (large, small, growth, value, income and quantitative) have replaced the Top Pick rating.

Dissemination of Research

Our research publications are available via our web site <http://bmocapitalmarkets.com>. Institutional clients may also receive our research via FIRST CALL Research Direct and Reuters. All of our research is made widely available at the same time to all BMO NB, BMO Capital Markets Ltd., BMO Capital Markets Corp. and BMO Nesbitt Burns Securities Ltd. client groups entitled to our research. Please contact your investment advisor or institutional salesperson for more information.

Conflict Statement

A general description of how BMO Financial Group identifies and manages conflicts of interest is contained in our public facing policy for managing conflicts of interest in connection with investment research which is available at: http://research-ca.bmocapitalmarkets.com/conflict_statement_public.asp

Additional Matters

TO U.S. RESIDENTS: BMO Capital Markets Corp. and/or BMO Nesbitt Burns Securities Ltd., affiliates of BMO NB, furnish this report to U.S. residents and accept responsibility for the contents herein, except to the extent that it refers to securities of Bank of Montreal. Any U.S. person wishing to effect transactions in any security discussed herein should do so through BMO Capital Markets Corp. and/or BMO Nesbitt Burns Securities Ltd.

TO U.K. RESIDENTS: In the UK this document is published by BMO Capital Markets Limited which is authorised and regulated by the Financial Services Authority. The contents hereof are intended solely for the use of, and may only be issued or passed on to, (I) persons who have professional experience in matters relating to investments falling within Article 19(5) of the Financial Services and Markets Act 2000 (Financial Promotion) Order 2005 (the "Order") or (II) high net worth entities falling within Article 49(2)(a) to (d) of the Order (all such persons together referred to as "relevant persons"). The contents hereof are not intended for the use of and may not be issued or passed on to, retail clients.

Details & Analysis

Fortis reported Q3/09 EPS of \$0.21, consistent with our estimate of \$0.22 and the First Call Mean of \$0.21 (range \$0.19-0.23). The company's regulated utilities in Canada appear to be performing well and better-than-expected results at Fortis Alberta and the Terasen Gas Companies were offset by slightly lower-than-expected results at Caribbean Utilities, Fortis Generation and Fortis Properties. Broad capital expenditure forecasts were maintained: Fortis continues to expect capital expenditures of over \$1 billion in 2009 and approximately \$5 billion over the five-year period of 2009-2013.

This report was prepared by an Analyst employed by a Canadian affiliate, BMO Nesbitt Burns Inc., and who is not registered as a research analyst under FINRA rules. For disclosure statements, including the Analyst's Certification, please refer to pages 2 to 4.

Q3/09 Results in Line; Maintaining Outperform Rating

Event

Fortis reported Q3/09 EPS of \$0.21, consistent with our estimate of \$0.22 and the First Call Mean of \$0.21 (range \$0.19–0.23). The company's regulated utilities in Canada appear to be performing well and better-than-expected results at Fortis Alberta and the Terasen Gas Companies were offset by slightly lower-than-expected results at the Caribbean utility companies (primarily Belize Electricity Limited and Fortis Turks and Caicos), Fortis Generation and Fortis Properties.

Impact

Neutral.

Forecasts

There are no changes to our estimates. We are introducing 2011E diluted EPS of \$1.75.

Valuation

Our revised target price of \$30 is based on a weighted valuation approach: 15x diluted 2011E EPS of \$1.75 (12.5%); 1.75x 2011E BVPS of \$19.68 (12.5%) and a target yield of 3.75%, assuming 2011E dividends per share of \$1.08 (75%). The increase in our target price to \$30 from \$29 results from applying current valuation multiples to our 2011E estimates.

Recommendation

We believe Fortis' shares are attractively valued, considering the company's relatively low-risk, diversified business model. Our rating is Outperform.

Q3/09 Results in Line; Receipt of Regulatory Decisions Expected to Commence During Q4

Fortis reported Q3/09 EPS of \$0.21, consistent with our estimate of \$0.22 and the First Call Mean of \$0.21 (range \$0.19-0.23). The company's regulated utilities in Canada appear to be performing well and better-than-expected results at Fortis Alberta and the Terasen Gas Companies were offset by slightly lower-than-expected results at the Caribbean utility companies (primarily Belize Electricity Limited and Fortis Turks and Caicos), Fortis Generation and Fortis Properties.

We anticipate that Q4/09 will be active from a regulatory perspective. A decision on the Alberta Utilities Commission's Generic Cost of Capital proceeding is expected in mid-November, and a decision on Newfoundland Power's 2010 rate application is expected by the end of the year. It is also possible that the British Columbia Utilities Commission issues a decision on the Terasen Gas ROE and capital structure application by December 31.

Our estimates do not assume that provincial regulators grant the requested changes to capital structure and deemed return on equity. We believe, however, that the capital structure/deemed ROE proceedings are positive for regulated utilities in Canada, as they signify that regulators are willing to address the possibility that the current method of setting regulated rates of return may not adequately compensate investors for the risks they are incurring.

We are maintaining our Outperform rating as we continue to believe that Fortis' shares are attractively valued, considering the company's low-risk, diversified business model.

Our revised target price of \$30 is based on a weighted valuation approach: 15x diluted 2011E EPS of \$1.75 (12.5%); 1.75x 2011E BVPS of \$19.68 (12.5%) and a target yield of 3.75%, assuming 2011E dividends per share of \$1.08 (75%). The increase in our target price to \$30 from \$29 results from applying current valuation multiples to our 2011E estimates.

Q3/09 Results

As set out in Table 1, Q3/09 GAAP net income of \$36 million was \$5.5 million less than comparable income of \$41.5 million reported in Q3/08. In order to present Q3/08 results on a comparable basis, Q3/08 GAAP income was adjusted for a \$7.5 million tax recovery regarding a settlement related to interprovincial tax legislation. Approximately \$5.5 million of this amount related to the Terasen Gas companies while \$2 million was allocated to the corporate segment.

A discussion of the operating performance of each business segment follows below.

Table 1: Historical Q3 Income by Business Segment

	Q3/09 GAAP Earnings (\$mm)	Adj. (\$mm)	Q3/09 Adjusted Earnings (\$mm)	Q3/08 GAAP	Adj. (\$mm)	Q3/08 Adjusted Earnings (\$mm)	Variance Q3/09 Adj. vs. Q3/08 Adj.	Variance %

Source: BMO Capital Markets, Company Reports

Regulated Gas Utilities – Terasen Gas Companies

The Q3/09 net loss of \$3 million from Terasen Gas was lower than our estimate of a \$4.7 million loss and a comparable net loss of \$5.5 million in Q3/08. The reduced loss in Q3/09 was primarily the result of a lower effective tax rate and higher customer delivery rates.

Regulated Electric Utilities – FortisAlberta

Q3/09 net income of \$16 million exceeded our estimate of \$13 million but was slightly lower than Q3/08 net income of \$17 million. The reduction in net income in Q3/09 compared to Q3/08 was caused by lower corporate income tax recoveries. Q3/08 results included a \$3.5 million income tax recovery related to H1/08.

Regulated Electric Utilities – FortisBC

Q3/09 net income of \$8 million was consistent with our estimate of \$8.7 million and Q3/08 net income of \$8 million.

Regulated Electric Utilities – Newfoundland Power

Q3/09 net income of \$7 million was slightly lower than Q3/08 net income of \$8 million but generally consistent with our estimate of \$7.6 million.

Regulated Electric Utilities – Caribbean

The earnings contribution from the Caribbean business segment was \$7 million in Q3/09 vs. our estimate of approximately \$9 million and Q3/08 earnings of \$7 million. Increased operating expenses and amortization costs offset increased electricity sales (due to higher-than-normal temperatures) at the Caribbean utility companies.

Unregulated – Fortis Generation

Fortis Generation reported Q3/09 net income of \$4 million, lower than our estimate of \$5 million and \$5 million lower than Q3/08 net income of \$9 million. Approximately \$4 million of the \$5 million variance between Q3/09 and Q3/08 results was largely due to the expiration of the power-for-water exchange agreement at Rankine hydroelectric generating facility on April 30, 2009. Lower wholesale electricity prices in New York State and reduced production in Belize also reduced earnings during Q3/09.

Unregulated – Fortis Properties

Fortis Properties reported net income of \$9 million which was slightly lower than our estimate of \$9.9 million but consistent with Q3/08 net income of \$9 million. Occupancy decreased slightly to 96.2% at the end of the quarter vs. 96.6% at the end of Q3/08. Revenue per available room fell to \$89.02 during Q3/09 vs. \$93.64 during Q3/08.

Other Items

- There was no change to Fortis' capital expenditure forecast. The company continues to target capital expenditures of approximately \$1 billion in 2009 and total capital expenditures of approximately \$5 billion over the five year period from 2009–2013.
- In October, FortisBC filed a preliminary 2010 revenue requirement application. The company is requesting a rate increase of 4.6% and the application specifies estimated mid-year rate bases of \$872.4 million in 2009E and \$975.8 million in 2010E. Please see our research comment dated August 6, 2009, for a summary of the other regulatory initiatives currently underway.

Company Risk Disclosure

In addition to the risks involved in investing in common stocks generally, we also highlight the following risks that pertain to this company. Operations are subject to complex regulation by a variety of provincial, state and federal (Canada, Cayman Islands & Belize) agencies. Changes in regulation may adversely affect performance.

Financial performance depends on the availability of installed generation and the production of electric power by third parties. Fortis Properties' cash flow is dependent on hotel room vacancy rates and commercial building occupancy levels. The company's operations in Belize may be disrupted and assets may be damaged by hurricanes and/or tropical storms.

Analyst's Certification

I, Michael McGowan, CA, CFA, hereby certify that the views expressed in this report accurately reflect my personal views about the subject securities or issuers. I also certify that no part of my compensation was, is, or will be, directly or indirectly, related to the specific recommendations or views expressed in this report.

General Disclosure

The information and opinions in this report were prepared by both BMO Nesbitt Burns Inc. and BMO Nesbitt Burns Ltée./Ltd., collectively ("BMO NB") and BMO Capital Markets Limited (U.K.), ("BMO CM Ltd"). BMO NB and BMO CM Ltd. are not subject to U.S. rules with regard to the preparation of research reports and the independence of analysts. "BMO Capital Markets" is a trade name used by the BMO Investment Banking Group, which includes the wholesale arm of Bank of Montreal and its subsidiaries BMO NB in Canada, BMO Capital Markets Ltd. in the U.K. and BMO Capital Markets Corp. in the U.S. BMO Capital Markets Ltd. and BMO Capital Markets Corp. are affiliates of BMO NB. Bank of Montreal or its subsidiaries ("BMO Financial Group") has lending arrangements with, or provide other remunerated services to, many issuers covered by BMO NB research. A significant lending relationship may exist between BMO Financial Group and certain of the issuers mentioned herein. The opinions, estimates and projections contained in this report are those of BMO NB and BMO CM Ltd. as of the date of this report and are subject to change without notice. BMO NB and BMO CM Ltd. endeavour to ensure that the contents have been compiled or derived from sources that we believe are reliable and contain information and opinions that are accurate and complete. However, BMO NB and BMO CM Ltd. make no representation or warranty, express or implied, in respect thereof, takes no responsibility for any errors and omissions contained herein and accepts no liability whatsoever for any loss arising from any use of, or reliance on, this report or its contents. Information may be available to BMO NB, BMO CM Ltd or its affiliates that is not reflected in this report. The information in this report is not intended to be used as the primary basis of investment decisions, and because of individual client objectives, should not be construed as advice designed to meet the particular investment needs of any investor. This material is for information purposes only and is not an offer to sell or the solicitation of an offer to buy any security. The research analyst and/or associates who prepared this report are compensated based upon (among other factors) the overall profitability of BMO NB, BMO CM Ltd. and its affiliates, which includes the overall profitability of investment banking services. BMO NB, BMO CM Ltd., or its affiliates expect to receive or will seek compensation for investment banking services within the next 3 months from all issuers covered by BMO NB. BMO NB, BMO CM Ltd. or its affiliates will buy from or sell to customers the securities of issuers mentioned in this report on a principal basis. BMO NB, BMO CM Ltd. or its affiliates, officers, directors or employees may have a long or short position in the securities discussed herein, related securities or in options, futures or other derivative instruments based thereon. The reader should assume that BMO NB, BMO Capital Markets Ltd., BMO Capital Markets Corp., Bank of Montreal or their affiliates may have a conflict of interest and should not rely solely on this report in evaluating whether or not to buy or sell securities of issuers discussed herein.

Company Specific Disclosure

Disclosure 2: BMO NB has undertaken an underwriting liability with respect to this issuer within the past 12 months.

Disclosure 3: BMO NB has provided investment banking services with respect to this issuer within the past 12 months.

Disclosure 7: BMO Capital Markets Corp. or an affiliate has received compensation for investment banking services from this issuer within the past 12 months.

Disclosure 9: BMO Capital Markets Corp. or an affiliate received compensation for products or services other than investment banking services within the past 12 months.

Disclosure 10: This issuer is a client (or was a client) of BMO NB, BMO Capital Markets Corp., BMO CM Ltd. or an affiliate within the past 12 months: Investment Banking Services & Non-Securities Related Services.

Ratings Key

We use the following ratings system definitions:

OP = Outperform - Forecast to outperform the market;

Mkt = Market Perform - Forecast to perform roughly in line with the market;

Und = Underperform - Forecast to underperform the market;

(S) = speculative investment;

NR = No rating at this time;

R = Restricted – Dissemination of research is currently restricted.

Market performance is measured by a benchmark index such as the S&P/TSX Composite Index, S&P 500, Nasdaq Composite, as appropriate for each company. Prior to September 1, 2003, a fourth rating tier—Top Pick—was used to designate those stocks we felt would be the best performers relative to the market. Our six Top 15 lists which guide investors to our best ideas according to six different objectives (large, small, growth, value, income and quantitative) have replaced the Top Pick rating.

Dissemination of Research

Our research publications are available via our web site <http://bmocapitalmarkets.com>. Institutional clients may also receive our research via FIRST CALL Research Direct and Reuters. All of our research is made widely available at the same time to all BMO NB, BMO Capital Markets Ltd., BMO Capital Markets Corp. and BMO Nesbitt Burns Securities Ltd. client groups entitled to our research. Please contact your investment advisor or institutional salesperson for more information.

Conflict Statement

A general description of how BMO Financial Group identifies and manages conflicts of interest is contained in our public facing policy for managing conflicts of interest in connection with investment research which is available at:

http://research-ca.bmocapitalmarkets.com/conflict_statement_public.asp

Additional Matters

TO U.S. RESIDENTS: BMO Capital Markets Corp. and/or BMO Nesbitt Burns Securities Ltd., affiliates of BMO NB, furnish this report to U.S. residents and accept responsibility for the contents herein, except to the extent that it refers to securities of Bank of Montreal. Any U.S. person wishing to effect transactions in any security discussed herein should do so through BMO Capital Markets Corp. and/or BMO Nesbitt Burns Securities Ltd.

TO U.K. RESIDENTS: In the UK this document is published by BMO Capital Markets Limited which is authorised and regulated by the Financial Services Authority. The contents hereof are intended solely for the use of, and may only be issued or passed on to, (I) persons who have professional experience in matters relating to investments falling within Article 19(5) of the Financial Services and Markets Act 2000 (Financial Promotion) Order 2005 (the "Order") or (II) high net worth entities falling within Article 49(2)(a) to (d) of the Order (all such persons together referred to as "relevant persons"). The contents hereof are not intended for the use of and may not be issued or passed on to, retail clients.

BMO Nesbitt Burns Inc. and BMO Nesbitt Burns Ltée/Ltd. are Members of CIPF. BMO Capital Markets Corp. and BMO Nesbitt Burns Securities Ltd. are Members of SIPC.

Q3/09 Results in Line; Maintaining Outperform Rating

Event

Fortis reported Q3/09 EPS of \$0.21, consistent with our estimate of \$0.22 and the First Call Mean of \$0.21 (range \$0.19–0.23). The company's regulated utilities in Canada appear to be performing well and better-than-expected results at Fortis Alberta and the Terasen Gas Companies were offset by slightly lower-than-expected results at the Caribbean utility companies (primarily Belize Electricity Limited and Fortis Turks and Caicos), Fortis Generation and Fortis Properties.

Impact

Neutral.

Forecasts

There are no changes to our estimates. We are introducing 2011E diluted EPS of \$1.75.

Valuation

Our revised target price of \$30 is based on a weighted valuation approach: 15x diluted 2011E EPS of \$1.75 (12.5%); 1.75x 2011E BVPS of \$19.68 (12.5%) and a target yield of 3.75%, assuming 2011E dividends per share of \$1.08 (75%). The increase in our target price to \$30 from \$29 results from applying current valuation multiples to our 2011E estimates.

Recommendation

We believe Fortis' shares are attractively valued, considering the company's relatively low-risk, diversified business model. Our rating is Outperform.

Q3/09 Results in Line; Receipt of Regulatory Decisions Expected to Commence During Q4

Fortis reported Q3/09 EPS of \$0.21, consistent with our estimate of \$0.22 and the First Call Mean of \$0.21 (range \$0.19-0.23). The company's regulated utilities in Canada appear to be performing well and better-than-expected results at Fortis Alberta and the Terasen Gas Companies were offset by slightly lower-than-expected results at the Caribbean utility companies (primarily Belize Electricity Limited and Fortis Turks and Caicos), Fortis Generation and Fortis Properties.

We anticipate that Q4/09 will be active from a regulatory perspective. A decision on the Alberta Utilities Commission's Generic Cost of Capital proceeding is expected in mid-November, and a decision on Newfoundland Power's 2010 rate application is expected by the end of the year. It is also possible that the British Columbia Utilities Commission issues a decision on the Terasen Gas ROE and capital structure application by December 31.

Our estimates do not assume that provincial regulators grant the requested changes to capital structure and deemed return on equity. We believe, however, that the capital structure/deemed ROE proceedings are positive for regulated utilities in Canada, as they signify that regulators are willing to address the possibility that the current method of setting regulated rates of return may not adequately compensate investors for the risks they are incurring.

We are maintaining our Outperform rating as we continue to believe that Fortis' shares are attractively valued, considering the company's low-risk, diversified business model.

Our revised target price of \$30 is based on a weighted valuation approach: 15x diluted 2011E EPS of \$1.75 (12.5%); 1.75x 2011E BVPS of \$19.68 (12.5%) and a target yield of 3.75%, assuming 2011E dividends per share of \$1.08 (75%). The increase in our target price to \$30 from \$29 results from applying current valuation multiples to our 2011E estimates.

Q3/09 Results

As set out in Table 1, Q3/09 GAAP net income of \$36 million was \$5.5 million less than comparable income of \$41.5 million reported in Q3/08. In order to present Q3/08 results on a comparable basis, Q3/08 GAAP income was adjusted for a \$7.5 million tax recovery regarding a settlement related to interprovincial tax legislation. Approximately \$5.5 million of this amount related to the Terasen Gas companies while \$2 million was allocated to the corporate segment.

A discussion of the operating performance of each business segment follows below.

Table 1: Historical Q3 Income by Business Segment

Source: BMO Capital Markets, Company Reports

Regulated Gas Utilities – Terasen Gas Companies

The Q3/09 net loss of \$3 million from Terasen Gas was lower than our estimate of a \$4.7 million loss and a comparable net loss of \$5.5 million in Q3/08. The reduced loss in Q3/09 was primarily the result of a lower effective tax rate and higher customer delivery rates.

Regulated Electric Utilities – FortisAlberta

Q3/09 net income of \$16 million exceeded our estimate of \$13 million but was slightly lower than Q3/08 net income of \$17 million. The reduction in net income in Q3/09 compared to Q3/08 was caused by lower corporate income tax recoveries. Q3/08 results included a \$3.5 million income tax recovery related to H1/08.

Regulated Electric Utilities – FortisBC

Q3/09 net income of \$8 million was consistent with our estimate of \$8.7 million and Q3/08 net income of \$8 million.

Regulated Electric Utilities – Newfoundland Power

Q3/09 net income of \$7 million was slightly lower than Q3/08 net income of \$8 million but generally consistent with our estimate of \$7.6 million.

Regulated Electric Utilities – Caribbean

The earnings contribution from the Caribbean business segment was \$7 million in Q3/09 vs. our estimate of approximately \$9 million and Q3/08 earnings of \$7 million. Increased operating expenses and amortization costs offset increased electricity sales (due to higher-than-normal temperatures) at the Caribbean utility companies.

Unregulated – Fortis Generation

Fortis Generation reported Q3/09 net income of \$4 million, lower than our estimate of \$5 million and \$5 million lower than Q3/08 net income of \$9 million. Approximately \$4 million of the \$5 million variance between Q3/09 and Q3/08 results was largely due to the expiration of the power-for-water exchange agreement at Rankine hydroelectric generating facility on April 30, 2009. Lower wholesale electricity prices in New York State and reduced production in Belize also reduced earnings during Q3/09.

Unregulated – Fortis Properties

Fortis Properties reported net income of \$9 million which was slightly lower than our estimate of \$9.9 million but consistent with Q3/08 net income of \$9 million. Occupancy decreased slightly to 96.2% at the end of the quarter vs. 96.6% at the end of Q3/08. Revenue per available room fell to \$89.02 during Q3/09 vs. \$93.64 during Q3/08.

Other Items

- There was no change to Fortis' capital expenditure forecast. The company continues to target capital expenditures of approximately \$1 billion in 2009 and total capital expenditures of approximately \$5 billion over the five year period from 2009–2013.
- In October, FortisBC filed a preliminary 2010 revenue requirement application. The company is requesting a rate increase of 4.6% and the application specifies estimated mid-year rate bases of \$872.4 million in 2009E and \$975.8 million in 2010E. Please see our research comment dated August 6, 2009, for a summary of the other regulatory initiatives currently underway.

Company Risk Disclosure

In addition to the risks involved in investing in common stocks generally, we also highlight the following risks that pertain to this company. Operations are subject to complex regulation by a variety of provincial, state and federal (Canada, Cayman Islands & Belize) agencies. Changes in regulation may adversely affect performance.

Financial performance depends on the availability of installed generation and the production of electric power by third parties. Fortis Properties' cash flow is dependent on hotel room vacancy rates and commercial building occupancy levels. The company's operations in Belize may be disrupted and assets may be damaged by hurricanes and/or tropical storms.

Analyst's Certification

I, Michael McGowan, CA, CFA, hereby certify that the views expressed in this report accurately reflect my personal views about the subject securities or issuers. I also certify that no part of my compensation was, is, or will be, directly or indirectly, related to the specific recommendations or views expressed in this report.

General Disclosure

The information and opinions in this report were prepared by both BMO Nesbitt Burns Inc. and BMO Nesbitt Burns Ltée./Ltd., collectively ("BMO NB") and BMO Capital Markets Limited (U.K.), ("BMO CM Ltd"). BMO NB and BMO CM Ltd. are not subject to U.S. rules with regard to the preparation of research reports and the independence of analysts. "BMO Capital Markets" is a trade name used by the BMO Investment Banking Group, which includes the wholesale arm of Bank of Montreal and its subsidiaries BMO NB in Canada, BMO Capital Markets Ltd. in the U.K. and BMO Capital Markets Corp. in the U.S. BMO Capital Markets Ltd. and BMO Capital Markets Corp. are affiliates of BMO NB. Bank of Montreal or its subsidiaries ("BMO Financial Group") has lending arrangements with, or provide other remunerated services to, many issuers covered by BMO NB research. Ratings Key

We use the following ratings system definitions:

OP = Outperform - Forecast to outperform the market;

Mkt = Market Perform - Forecast to perform roughly in line with the market;

Und = Underperform - Forecast to underperform the market;

(S) = speculative investment;

NR = No rating at this time;

R = Restricted – Dissemination of research is currently restricted.

Market performance is measured by a benchmark index such as the S&P/TSX Composite Index, S&P 500, Nasdaq Composite, as appropriate for each company. Prior to September 1, 2003, a fourth rating tier—Top Pick—was used to designate those stocks we felt would be the best performers relative to the market. Our six Top 15 lists which guide investors to our best ideas according to six different objectives (large, small, growth, value, income and quantitative) have replaced the Top Pick rating.

Dissemination of Research

Our research publications are available via our web site <http://bmocapitalmarkets.com>. Institutional clients may also receive our research via FIRST CALL Research Direct and Reuters. All of our research is made widely available at the same time to all BMO NB, BMO Capital Markets Ltd., BMO Capital Markets Corp. and BMO Nesbitt Burns Securities Ltd. client groups entitled to our research. Please contact your investment advisor or institutional salesperson for more information.

Conflict Statement

A general description of how BMO Financial Group identifies and manages conflicts of interest is contained in our public facing policy for managing conflicts of interest in connection with investment research which is available at:

http://research-ca.bmocapitalmarkets.com/conflict_statement_public.asp

Additional Matters

TO U.S. RESIDENTS: BMO Capital Markets Corp. and/or BMO Nesbitt Burns Securities Ltd., affiliates of BMO NB, furnish this report to U.S. residents and accept responsibility for the contents herein, except to the extent that it refers to securities of Bank of Montreal. Any U.S. person wishing to effect transactions in any security discussed herein should do so through BMO Capital Markets Corp. and/or BMO Nesbitt Burns Securities Ltd.

TO U.K. RESIDENTS: In the UK this document is published by BMO Capital Markets Limited which is authorised and regulated by the Financial Services Authority. The contents hereof are intended solely for the use of, and may only be issued or passed on to, (I) persons who have professional experience in matters relating to investments falling within Article 19(5) of the Financial Services and Markets Act 2000 (Financial Promotion) Order 2005 (the "Order") or (II) high net worth entities falling within Article 49(2)(a) to (d) of the Order (all such persons together referred to as "relevant persons"). The contents hereof are not intended for the use of and may not be issued or passed on to, retail clients.

BMO Nesbitt Burns Inc. and BMO Nesbitt Burns Ltée/Ltd. are Members of CIPF. BMO Capital Markets Corp. and BMO Nesbitt Burns Securities Ltd. are Members of SIPC.

Increasing Estimates to Reflect Alberta Cost of Capital Decision

Event

On November 12, the Alberta Utilities Commission (AUC) released its decision on the 2009 Generic Cost of Capital Hearing. Pursuant to the decision, the AUC increased the generic cost of capital to 9.00% from 8.75% for the years 2009-2010 and on an interim basis for 2011. The AUC also increased FortisAlberta's deemed equity thickness to 41% from 37%. For additional details, please see our research comment titled, "Alberta Cost of Capital Decision Results in Increases to ROE and Deemed Equity" published on November 16, 2009.

Impact

Slightly Positive.

Forecasts

We have updated our estimates to reflect the AUC decision. Our 2009E EPS increases to \$1.54 from \$1.51, our 2010E EPS increases to \$1.67 from \$1.63 and our 2011E EPS increases to \$1.79 from \$1.75.

Valuation

Our target price of \$30 is based on a weighted valuation approach: 15x diluted 2011E EPS of \$1.79 (12.5%); 1.75x 2011E BVPS of \$19.80 (12.5%) and a target yield of 3.75%, assuming 2011E dividends per share of \$1.12 (75%).

Recommendation

We believe Fortis's shares are attractively valued, considering the company's relatively low-risk, diversified business model. Our rating is Outperform.

Company Risk Disclosure

In addition to the risks involved in investing in common stocks generally, we also highlight the following risks that pertain to this company. Operations are subject to complex regulation by a variety of provincial, state and federal (Canada, Cayman Islands & Belize) agencies. Changes in regulation may adversely affect performance.

Financial performance depends on the availability of installed generation and the production of electric power by third parties. Fortis Properties' cash flow is dependent on hotel room vacancy rates and commercial building occupancy levels. The company's operations in Belize may be disrupted and assets may be damaged by hurricanes and/or tropical storms.

Analyst's Certification

I, Michael McGowan, CA, CFA, hereby certify that the views expressed in this report accurately reflect my personal views about the subject securities or issuers. I also certify that no part of my compensation was, is, or will be, directly or indirectly, related to the specific recommendations or views expressed in this report.

General Disclosure

The information and opinions in this report were prepared by both BMO Nesbitt Burns Inc. and BMO Nesbitt Burns Ltée./Ltd., collectively ("BMO NB") and BMO Capital Markets Limited (U.K.), ("BMO CM Ltd"). BMO NB and BMO CM Ltd. are not subject to U.S. rules with regard to the preparation of research reports and the independence of analysts. "BMO Capital Markets" is a trade name used by the BMO Investment Banking Group, which includes the wholesale arm of Bank of Montreal and its subsidiaries BMO NB in Canada, BMO Capital Markets Ltd. in the U.K. and BMO Capital Markets Corp. in the U.S. BMO Capital Markets Ltd. and BMO Capital Markets Corp. are affiliates of BMO NB. Bank of Montreal or its subsidiaries ("BMO Financial Group") has lending arrangements with, or provide other remunerated services to, many issuers covered by BMO NB research. A significant lending relationship may exist between BMO Financial Group and certain of the issuers mentioned herein. The opinions, estimates and projections contained in this report are those of BMO NB and BMO CM Ltd. as of the date of this report and are subject to change without notice. BMO NB and BMO CM Ltd. endeavour to ensure that the contents have been compiled or derived from sources that we believe are reliable and contain information and opinions that are accurate and complete. However, BMO NB and BMO CM Ltd. make no representation or warranty, express or implied, in respect thereof, takes no responsibility for any errors and omissions contained herein and accepts no liability whatsoever for any loss arising from any use of, or reliance on, this report or its contents. Information may be available to BMO NB, BMO CM Ltd or its affiliates that is not reflected in this report. The information in this report is not intended to be used as the primary basis of investment decisions, and because of individual client objectives, should not be construed as advice designed to meet the particular investment needs of any investor. This material is for information purposes only and is not an offer to sell or the solicitation of an offer to buy any security. The research analyst and/or associates who prepared this report are compensated based upon (among other factors) the overall profitability of BMO NB, BMO CM Ltd. and its affiliates, which includes the overall profitability of investment banking services. BMO NB, BMO CM Ltd., or its affiliates expect to receive or will seek compensation for investment banking services within the next 3 months from all issuers covered by BMO NB. BMO NB, BMO CM Ltd. or its affiliates will buy from or sell to customers the securities of issuers mentioned in this report on a principal basis. BMO NB, BMO CM Ltd. or its affiliates, officers, directors or employees may have a long or short position in the securities discussed herein, related securities or in options, futures or other derivative instruments based thereon. The reader should assume that BMO NB, BMO Capital Markets Ltd., BMO Capital Markets Corp., Bank of Montreal or their affiliates may have a conflict of interest and should not rely solely on this report in evaluating whether or not to buy or sell securities of issuers discussed herein.

Company Specific Disclosure

Disclosure 2: BMO NB has undertaken an underwriting liability with respect to this issuer within the past 12 months.

Disclosure 3: BMO NB has provided investment banking services with respect to this issuer within the past 12 months.

Disclosure 7: BMO Capital Markets Corp. or an affiliate has received compensation for investment banking services from this issuer within the past 12 months.

Disclosure 9: BMO Capital Markets Corp. or an affiliate received compensation for products or services other than investment banking services within the past 12 months.

Disclosure 10: This issuer is a client (or was a client) of BMO NB, BMO Capital Markets Corp., BMO CM Ltd. or an affiliate within the past 12 months: Investment Banking Services & Non-Securities Related Services.

Distribution of Ratings (Sept. 10, 2009)

Rating Category	BMO Rating	BMO Universe	BMO I.B. Clients*	Starmine Universe**
Buy	Outperform	36%	48%	48%
Hold	Market Perform	55%	48%	44%
Sell	Underperform	9%	4%	8%

* Reflects rating distribution of all companies where BMO Capital Markets has received compensation for Investment Banking services.

** Reflects rating distribution of all North American equity research analysts.

Ratings Key

We use the following ratings system definitions:

OP = Outperform - Forecast to outperform the market;

Mkt = Market Perform - Forecast to perform roughly in line with the market;

Und = Underperform - Forecast to underperform the market;

(S) = speculative investment;

NR = No rating at this time;

R = Restricted – Dissemination of research is currently restricted.

Market performance is measured by a benchmark index such as the S&P/TSX Composite Index, S&P 500, Nasdaq Composite, as appropriate for each company. Prior to September 1, 2003, a fourth rating tier—Top Pick—was used to designate those stocks we felt would be the best performers relative to the market. Our six Top 15 lists which guide investors to our best ideas according to six different objectives (large, small, growth, value, income and quantitative) have replaced the Top Pick rating.

Dissemination of Research

Our research publications are available via our web site <http://bmocapitalmarkets.com>. Institutional clients may also receive our research via FIRST CALL Research Direct and Reuters. All of our research is made widely available at the same time to all BMO NB, BMO Capital Markets Ltd., BMO Capital Markets Corp. and BMO Nesbitt Burns Securities Ltd. client groups entitled to our research. Please contact your investment advisor or institutional salesperson for more information.

Conflict Statement

A general description of how BMO Financial Group identifies and manages conflicts of interest is contained in our public facing policy for managing conflicts of interest in connection with investment research which is available at:

Ruling Received on Newfoundland Power 2010 Rate Application

Impact

Neutral

Details & Analysis

On December 11, 2009, the Newfoundland Board of Commissioners of Public Utilities ("PUB") issued a ruling on Newfoundland Power's (100% Fortis Inc.) 2010 rate application. Pursuant to the decision, Newfoundland Power's existing regulated equity thickness has been maintained at 45% and the company will be allowed to earn a regulated return on common equity of 9.0%. The automatic adjustment formula used to annually reset regulated ROE will be maintained during 2011 and 2012. Although the 9% ROE allowed by the PUB is below the 11% ROE originally requested when Newfoundland Power filed its 2010 rate application, it is consistent with both the regulated ROE of 9% that FortisAlberta was recently granted during the Alberta Utility Commission's 2009 Generic Cost of Capital Hearing and the 8.95% ROE that Newfoundland Power was allowed to earn in 2008 and 2009.

This report was prepared by an Analyst employed by a Canadian affiliate, BMO Nesbitt Burns Inc., and who is not registered as a research analyst under FINRA rules. For disclosure statements, including the Analyst's Certification, please refer to pages 2 to 4.

Company Description – Fortis is a publicly listed holding company with four key businesses: electric utility operations, regulated natural gas distribution, non-regulated electric power generation and non-utility property activities. Gas and electric utility operations include Newfoundland Power (100%, Newfoundland), Maritime Electric (100%, PEI), Fortis Ontario (100%, Ontario), Belize Electricity (70.1%, Belize), Caribbean Utilities (59.5%, Grand Cayman

Island), Turks and Caicos (100%, Turks and Caicos), FortisAlberta (100%, Alberta), FortisBC (100%, British Columbia) and the Terasen Gas Companies (100%, British Columbia). *Website: fortisinc.com*

Recent Results – Fortis Inc. reported Q3/09 EPS of \$0.21, consistent with our estimate of \$0.22 and the First Call Mean of \$0.21 (range \$0.19–0.23). The company's regulated utilities in Canada appear to be performing well

This report was prepared by an Analyst employed by a Canadian affiliate, BMO Nesbitt Burns Inc., and who is not registered as a research analyst under FINRA rules. For disclosure statements, including the Analyst's Certification, please refer to pages 3 to 5.

and better-than-expected results at Fortis Alberta and the Terasen Gas Companies were offset by slightly lower-than-expected results at the Caribbean utility companies (primarily Belize Electricity Limited and Fortis Turks and Caicos), Fortis Generation and Fortis Properties.

Corporate Developments – In October, FortisBC filed a preliminary 2010 revenue requirement application. The company is requesting a rate increase of 4.6% and the application specifies estimated mid-year rate bases of \$872.4 million in 2009E and \$975.8 million in 2010E.

On November 12, the Alberta Utilities Commission (AUC) released its decision on the 2009 Generic Cost of Capital Hearing. Pursuant to the decision, the AUC increased the generic cost of capital to 9.00% from 8.75% for the years 2009–2010 and on an interim basis for 2011. The AUC also

increased FortisAlberta's deemed equity thickness to 41% from 37%.

Forecasts – Our diluted EPS estimates are \$1.54 in 2009, \$1.67 in 2010 and \$1.79 in 2011.

Valuation – Our target price of \$30 is based on a weighted valuation approach: 15x diluted 2011E EPS of \$1.79 (12.5%); 1.75x 2011E BVPS of \$19.80 (12.5%); and a target yield of 3.75%, assuming 2011E dividends per share of \$1.12.

Recommendation – We believe that Fortis shares are attractively valued, considering the company's relatively low-risk, diversified business model. Our rating is Outperform. Member of Top 15 Income, Large Cap and Value stock selections.

Company Risk Disclosure

In addition to the risks involved in investing in common stocks generally, we also highlight the following risks that pertain to this company. Operations are subject to complex regulation by a variety of provincial, state and federal (Canada, Cayman Islands & Belize) agencies. Changes in regulation may adversely affect performance.

Financial performance depends on the availability of installed generation and the production of electric power by third parties. Fortis Properties' cash flow is dependent on hotel room vacancy rates and commercial building occupancy levels. The company's operations in Belize may be disrupted and assets may be damaged by hurricanes and/or tropical storms.

Analyst's Certification

I, Michael McGowan, CA, CFA, hereby certify that the views expressed in this report accurately reflect my personal views about the subject securities or issuers. I also certify that no part of my compensation was, is, or will be, directly or indirectly, related to the specific recommendations or views expressed in this report.

General Disclosure

The information and opinions in this report were prepared by both BMO Nesbitt Burns Inc. and BMO Nesbitt Burns Ltée./Ltd., collectively ("BMO NB") and BMO Capital Markets Limited (U.K.), ("BMO CM Ltd"). BMO NB and BMO CM Ltd. are not subject to U.S. rules with regard to the preparation of research reports and the independence of analysts. "BMO Capital Markets" is a trade name used by the BMO Investment Banking Group, which includes the wholesale arm of Bank of Montreal and its subsidiaries BMO NB in Canada, BMO Capital Markets Ltd. in the U.K. and BMO Capital Markets Corp. in the U.S. BMO Capital Markets Ltd. and BMO Capital Markets Corp. are affiliates of BMO NB. Bank of Montreal or its subsidiaries ("BMO Financial Group") has lending arrangements with, or provide other remunerated services to, many issuers covered by BMO NB research. A significant lending relationship may exist between BMO Financial Group and certain of the issuers mentioned herein. The opinions, estimates and projections contained in this report are those of BMO NB and BMO CM Ltd. as of the date of this report and are subject to change without notice. BMO NB and BMO CM Ltd. endeavour to ensure that the contents have been compiled or derived from sources that we believe are reliable and contain information and opinions that are accurate and complete. However, BMO NB and BMO CM Ltd. make no representation or warranty, express or implied, in respect thereof, takes no responsibility for any errors and omissions contained herein and accepts no liability whatsoever for any loss arising from any use of, or reliance on, this report or its contents. Information may be available to BMO NB, BMO CM Ltd or its affiliates that is not reflected in this report. The information in this report is not intended to be used as the primary basis of investment decisions, and because of individual client objectives, should not be construed as advice designed to meet the particular investment needs of any investor. This material is for information purposes only and is not an offer to sell or the solicitation of an offer to buy any security. The research analyst and/or associates who prepared this report are compensated based upon (among other factors) the overall profitability of BMO NB, BMO CM Ltd. and its affiliates, which includes the overall profitability of investment banking services. BMO NB, BMO CM Ltd., or its affiliates expect to receive or will seek compensation for investment banking services within the next 3 months from all issuers covered by BMO NB. BMO NB, BMO CM Ltd. or its affiliates will buy from or sell to customers the securities of issuers mentioned in this report on a principal basis. BMO NB, BMO CM Ltd. or its affiliates, officers, directors or employees may have a long or short position in the securities discussed herein, related securities or in options, futures or other derivative instruments based thereon. The reader should assume that BMO NB, BMO Capital Markets Ltd., BMO Capital Markets Corp., Bank of Montreal or their affiliates may have a conflict of interest and should not rely solely on this report in evaluating whether or not to buy or sell securities of issuers discussed herein.

Company Specific Disclosure

Disclosure 2: BMO NB has undertaken an underwriting liability with respect to this issuer within the past 12 months.

--------------------	---------------	-----------------	-----------------------	-------------------------

Buy	Outperform	40%	50%	50%
Hold	Market Perform	51%	46%	43%
Sell	Underperform	9%	4%	7%

* Reflects rating distribution of all companies where BMO Capital Markets has received compensation for Investment Banking services.

** Reflects rating distribution of all North American equity research analysts.

Ratings Key

We use the following ratings system definitions:

OP = Outperform - Forecast to outperform the market;

Mkt = Market Perform - Forecast to perform roughly in line with the market;

Und = Underperform - Forecast to underperform the market;

(S) = speculative investment;

NR = No rating at this time;

R = Restricted - Dissemination of research is currently restricted.

Market performance is measured by a benchmark index such as the S&P/TSX Composite Index, S&P 500, Nasdaq Composite, as appropriate for each company. Prior to September 1, 2003, a fourth rating tier—Top Pick—was used to designate those stocks we felt would be the best performers relative to the market. Our six Top 15 lists which guide investors to our best ideas according to six different objectives (large, small, growth, value, income and quantitative) have replaced the Top Pick rating.

Dissemination of Research

Our research publications are available via our web site <http://bmocapitalmarkets.com>. Institutional clients may also receive our research via FIRST CALL Research Direct and Reuters. All of our research is made widely available at the same time to all BMO NB, BMO Capital Markets Ltd., BMO Capital Markets Corp. and BMO Nesbitt Burns Securities Ltd. client groups entitled to our research. Please contact your investment advisor or institutional salesperson for more information.

Conflict Statement

A general description of how BMO Financial Group identifies and manages conflicts of interest is contained in our public facing policy for managing conflicts of interest in connection with investment research which is available at: http://research-ca.bmocapitalmarkets.com/conflict_statement_public.asp

Terasen Return on Equity and Capital Structure Decision Released

Impact

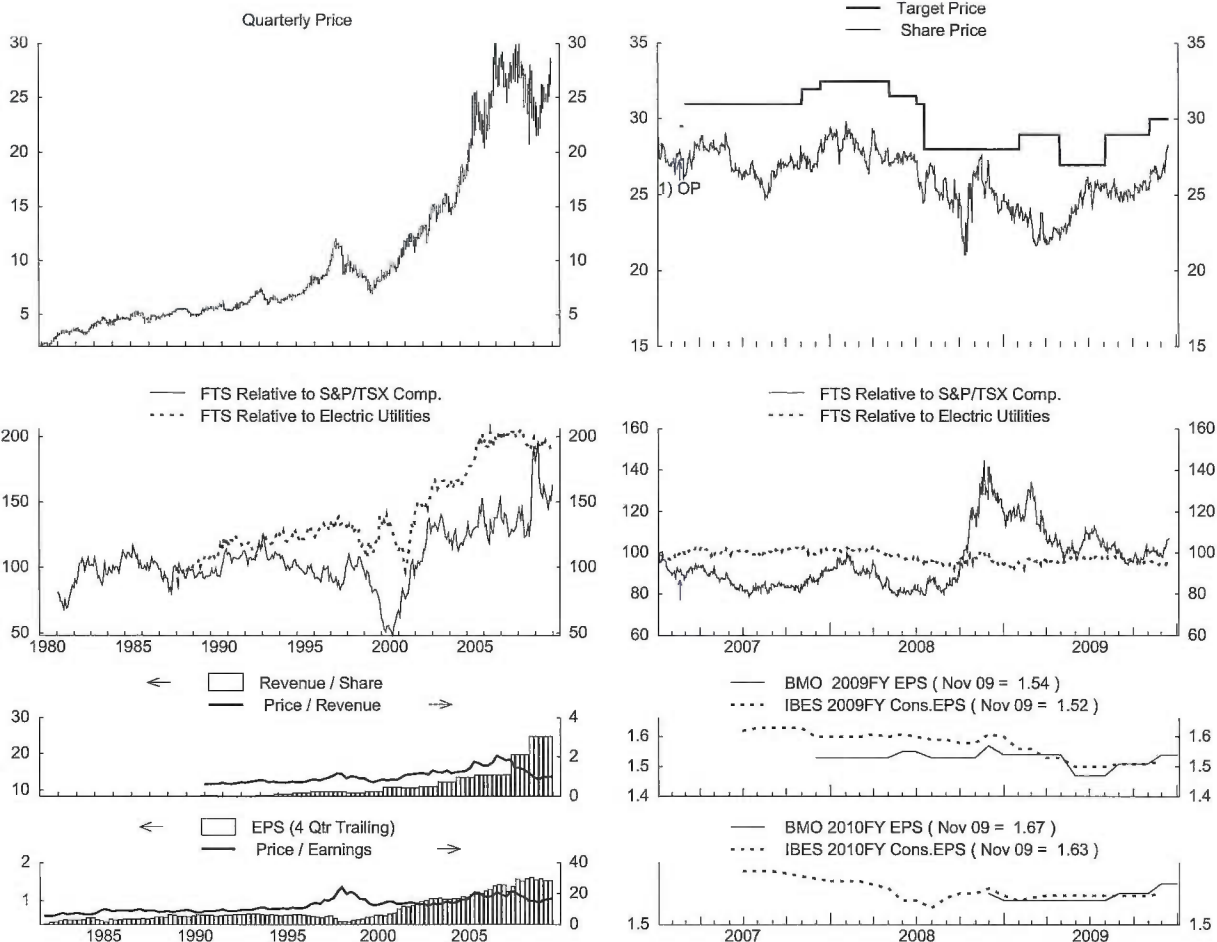

Positive

Details & Analysis

The British Columbia Utilities Commission (BCUC) has released its decision on the Return on Equity and Capital Structure application filed by the Terasen Companies (100% Fortis Inc.). Pursuant to the decision, the BCUC has: 1) increased Terasen Gas's allowed ROE to 9.5% from the existing 8.47%; 2) increased Terasen Gas's equity thickness to 40% from 35%; and 3) discontinued the use of the formula that has historically been used to adjust regulated ROE in B.C. Although the allowed ROE of 9.5% is lower than the ROE of 11% requested by Terasen, we believe the BCUC's decision is positive as it has specified a return on equity that exceeds the deemed ROE recently granted by the Alberta Utilities Commission (9%) and the Newfoundland Board of Commissioners of Public Utilities (also 9%). Moreover we believe the combination of increased equity thickness and higher allowed ROE should more than offset the reduction of earnings associated with the discontinuation of Performance-Based Rate Setting Agreements that are set to expire on December 31, 2009.

Estimates Raised to Reflect Cost of Capital Decisions

Event

A number of Fortis subsidiaries have recently received regulatory decisions related to cost of capital and capital structure. The most important of these (from a financial standpoint) was the December 16, 2009, decision released by the British Columbia Utilities Commission (BCUC) regarding return on equity and capital structure for the Terasen Companies (100% Fortis Inc.). Pursuant to the BCUC's decision, Terasen Gas Inc.'s allowed ROE has been increased to 9.5% from 8.47% and the deemed equity component of its capital structure has been increased to 40% from 35%.

Impact

Positive.

Forecasts

We have updated our estimates to reflect recent cost of capital decisions released by the BCUC, OEB and Newfoundland PUB.

Valuation

We are decreasing our target yield assumption to 3.50% from 3.75% to reflect the positive cost of capital decision from the BCUC and the elimination of uncertainty with respect to regulated ROE now that provincial regulators have completed their cost of capital reviews. Our revised target price of \$32 (previously \$30) is based on a weighted valuation approach: 15x 2011E diluted EPS of \$1.83 (12.5%); 1.75x 2011E BVPS of \$19.89 (12.5%); and a target yield of 3.50%, assuming 2011E dividends per share of \$1.12 (75%).

Recommendation

We believe Fortis's shares are attractively valued, considering the company's relatively low-risk, diversified business model. Our rating is Outperform.

Cost of Capital Reviews Completed

A number of Fortis subsidiaries have recently received regulatory decisions related to cost of capital and capital structure. Since our last full comment regarding the Alberta Utilities Commission's decision on its 2009 cost of capital hearing, a number of other provincial regulators have released decisions for their respective cost of capital proceedings. Positive decisions were received from the British Columbia Utilities Commission ("BCUC") and the Ontario Energy Board ("OEB"), whereas we believe that the impact of the recent decision from the Newfoundland Board of Commissioners of Public Utilities ("PUB") was neutral.

We are decreasing our target yield assumption to 3.50% from 3.75% to reflect the positive cost of capital decision from the BCUC and the elimination of uncertainty with respect to regulated ROE now that provincial regulators have completed their cost of capital reviews. Our revised target price of \$32 (previously \$30) is based on a weighted valuation approach: 15x 2011E diluted EPS of \$1.83 (12.5%); 1.75x 2011E BVPS of \$19.89 (12.5%); and a target yield of 3.50%, assuming 2011E dividends per share of \$1.12 (75%).

We believe Fortis's shares are attractively valued, considering the company's relatively low-risk, diversified business model. Our rating is Outperform.

BCUC Releases a Positive Decision Regarding Terasen's Return on Equity and Capital Structure Application

On December 16, 2009, the BCUC released its decision on the Return on Equity and Capital Structure application filed by the Terasen Companies (100% Fortis Inc.). Key aspects of the decision are set out below:

- Terasen Gas Inc. (TGI) was granted an allowed ROE of 9.5%, up from the existing ROE of 8.47% and a deemed equity thickness of 40%, up from the 35% that is currently in place.
- Deemed equity thickness for Terasen Gas Vancouver Island (TGVI) and Terasen Gas Whistler (TGW) is unchanged at 40%.
- Both TGVI and TGW will be allowed to collect a risk premium of 50 basis points over the allowed ROE for Terasen Gas Inc. Previously, TGVI was allowed a risk premium of 70 basis points, over TGI's allowed ROE.
- Changes to ROE will be effective July 1, 2009. Changes to TGI's deemed equity thickness will become effective on January 1, 2010.
- The BCUC has discontinued the use of the formula that has been used to automatically adjust ROE each year since its inception in 1994. TGI has been directed to complete a study of alternative formulae and submit its findings to the BCUC by December 31, 2010.

Although the ROE of 9.5% granted by the BCUC is lower than the ROE of 11% requested by Terasen, we believe the BCUC's decision is positive as it has specified a return on equity that exceeds the deemed ROE recently granted by the Alberta Utilities Commission (9%) and the Newfoundland Board of Commissioners of Public Utilities (also 9%). Moreover, we believe the combination of increased equity thickness and higher allowed ROE should more than offset

the reduction of earnings associated with the discontinuation of Performance-Based Rate Setting Agreements that are set to expire on December 31, 2009.

OEB's Cost of Capital Review Should Be Positive for FortisOntario

On December 11, 2009, the OEB released report #EB-2009-0084, titled "Report of the Board on the Cost of Capital for Ontario's Regulated Utilities." The report set the 2010 ROE for regulated utilities in Ontario at 9.75%, up significantly from the 8.01% that was in place during 2009 and maintained the deemed equity thickness for electricity distributors (such as FortisOntario) at 40%.

The OEB will annually modify regulated ROE pursuant to an automatic adjustment mechanism that takes into account forecast long-term Government of Canada bond yields and the spread between "A"-rated utility bond yields and long-term Government of Canada bond yields.

We believe the increase to regulated rates of return will be positive for FortisOntario; however, due to the relatively small size of Fortis's Ontario-based utilities, we estimate that the earnings contribution from the increase in regulated ROE will likely be no greater than \$0.01/share.

We View Decision Released by the Newfoundland PUB as Neutral

On December 11, 2009, the Newfoundland Board of Commissioners of Public Utilities ("PUB") issued a ruling on Newfoundland Power's (100% Fortis Inc.) 2010 rate application. Pursuant to the decision, Newfoundland Power's existing regulated equity thickness has been maintained at 45% and the company will be allowed to earn a regulated return on common equity of 9.0%, virtually unchanged from the allowed ROE of 8.95% that was in place during 2009. The automatic adjustment formula used to annually reset regulated ROE will be maintained during 2011 and 2012.

Estimates

We have updated our estimates to reflect recent cost of capital decisions released by the BCUC, OEB and Newfoundland PUB. Our diluted EPS estimates, increase to \$1.55 from \$1.54 in 2009E, to \$1.71 from \$1.67 in 2010E and to \$1.83 from \$1.79 in 2011E.

Company Risk Disclosure

In addition to the risks involved in investing in common stocks generally, we also highlight the following risks that pertain to this company. Operations are subject to complex regulation by a variety of provincial, state and federal (Canada, Cayman Islands & Belize) agencies. Changes in regulation may adversely affect performance.

Financial performance depends on the availability of installed generation and the production of electric power by third parties. Fortis Properties' cash flow is dependent on hotel room vacancy rates and commercial building occupancy levels. The company's operations in Belize may be disrupted and assets may be damaged by hurricanes and/or tropical storms.

Analyst's Certification

Ratings Key

We use the following ratings system definitions:

OP = Outperform - Forecast to outperform the market;

Mkt = Market Perform - Forecast to perform roughly in line with the market;

Und = Underperform - Forecast to underperform the market;

(S) = speculative investment;

NR = No rating at this time;

R = Restricted – Dissemination of research is currently restricted.

Market performance is measured by a benchmark index such as the S&P/TSX Composite Index, S&P 500, Nasdaq Composite, as appropriate for each company. Prior to September 1, 2003, a fourth rating tier—Top Pick—was used to designate those stocks we felt would be the best performers relative to the market. Our six Top 15 lists which guide investors to our best ideas according to six different objectives (large, small, growth, value, income and quantitative) have replaced the Top Pick rating.

Dissemination of Research

Our research publications are available via our web site <http://bmocapitalmarkets.com>. Institutional clients may also receive our research via FIRST CALL Research Direct and Reuters. All of our research is made widely available at the same time to all BMO NB, BMO Capital Markets Ltd., BMO Capital Markets Corp. and BMO Nesbitt Burns Securities Ltd. client groups entitled to our research. Please contact your investment advisor or institutional salesperson for more information.

Updating Estimates to Reflect 7.7% Dividend Increase and \$250 Million Preferred Share Issuance

Event

On January 11, 2010 Fortis announced a 7.7% increase to its annual dividend to \$1.12/share from \$1.04/share previously. The revised quarterly dividend of \$0.28/share will be payable on March 1 to shareholders of record as of February 5. Fortis also announced the issuance of \$250 million of Series H preferred shares that pay a dividend of 4.25% per annum until June 1, 2015. Thereafter, the dividend will reset every five years at a level of 1.45% over the 5-year Government of Canada bond. Proceeds will be used to repay borrowings under Fortis' credit facility and to inject additional equity into a regulated subsidiary.

Impact

Slightly positive. The 7.7% dividend increase was greater than expected (we were anticipating a dividend increase of ~3.8%). Although issuance of preferred shares will allow Fortis to finance the injection of additional equity into the regulated subsidiaries that have been granted increased equity thickness with long-term capital, we expect some dilution from the financing.

Forecasts

We are updating our estimates to reflect the dividend increase and the preferred share issuance. Our diluted EPS estimates decline to \$1.68 from \$1.71 in 2010E and to \$1.80 from \$1.83 in 2011E. Our DPS estimates increase to \$1.12 from \$1.08 in 2010E and to \$1.16 from \$1.12 in 2011E.

Valuation

Our target price of \$32 is based on a weighted valuation approach: 15x 2011E diluted EPS of \$1.80 (12.5%); 1.75x 2011E BVPS of \$19.76 (12.5%); and a target yield of 3.50%, assuming 2011E dividends per share of \$1.16 (75%).

Recommendation

We believe Fortis's shares are attractively valued, considering the company's relatively low-risk, diversified business model. Our rating is Outperform.

IMPORTANT DISCLOSURES**Analyst's Certification**

I, Michael McGowan, CA, CFA, hereby certify that the views expressed in this report accurately reflect my personal views about the subject securities or issuers. I also certify that no part of my compensation was, is, or will be, directly or indirectly, related to the specific recommendations or views expressed in this report.

Analysts who prepared this report are compensated based upon (among other factors) the overall profitability of BMO Capital Markets and their affiliates, which includes the overall profitability of investment banking services. Compensation for research is based on effectiveness in generating new ideas and in communication of ideas to clients, performance of recommendations, accuracy of earnings estimates, and service to clients.

Company Specific Disclosure

Disclosure 1: BMO Capital Markets has undertaken an underwriting liability with respect to this issuer within the past 12 months.

Disclosure 2: BMO Capital Markets has provided investment banking services with respect to this issuer within the past 12 months.

Disclosure 4: BMO Capital Markets or an affiliate has received compensation for investment banking services from this issuer within the past 12 months.

Disclosure 5: BMO Capital Markets or an affiliate received compensation for products or services other than investment banking services within the past 12 months.

Disclosure 6: This issuer is a client (or was a client) of BMO NB, BMO Capital Markets Corp., BMO CM Ltd. or an affiliate within the past 12 months: Investment Banking Services & Non-Securities Related Services.

Methodology and Risks to Price Target

Methodology: Our target price is based on a weighted valuation approach: 15x diluted 2011E EPS (12.5%); 1.75x 2011E BVPS (12.5%) and a target yield of 3.50% based on 2011E dividends per share (75%).

Risks: Operations are subject to complex regulation by a variety of provincial, state and federal (Canada, Cayman Islands & Belize) agencies. Changes in regulation may adversely affect performance.

Ratings and Sector Key

We use the following ratings system definitions:

OP = Outperform - Forecast to outperform the market;

Mkt = Market Perform - Forecast to perform roughly in line with the market;

Und = Underperform - Forecast to underperform the market;

(S) = speculative investment;

NR = No rating at this time;

R = Restricted – Dissemination of research is currently restricted.

Market performance is measured by a benchmark index such as the S&P/TSX Composite Index, S&P 500, Nasdaq Composite, as appropriate for each company. BMO Capital Markets eight Top 15 lists guide investors to our best ideas according to different objectives (Canadian large, small, growth, value, income, quantitative; and US large, US small) have replaced the Top Pick rating.

Q4/09 Results Slightly Below Expectations

Impact

Neutral

Details & Analysis

Fortis reported Q4/09 GAAP EPS of \$0.48 (basic). After adjusting for a \$3 million tax recovery at FortisOntario and \$5 million in non-recurring expenses associated with converting portions of the distribution system at Terasen Gas Whistler to utilize natural gas instead of propane, comparable Q4/09 EPS were \$0.49 (basic). This is slightly lower than our Q4/09 EPS estimate of \$0.53 (basic) and the FirstCall Mean estimate of \$0.52 (range \$0.46-0.55). The difference between actual and expected results appears to be due to: (1) slightly lower-than-expected earnings at the Caribbean Utility Companies (\$0.01/share); (2) lower-than-expected earnings at FortisGeneration (\$0.02/share); and (3) corporate costs that were \$0.01/share higher than expected. The company continues to target capital spending of \$5 billion over the next five years. Capital expenditures for 2010 have been estimated at approximately \$1.1 billion, with \$974 million of this total allocated to the company's Canadian regulated utility businesses.

This report was prepared by an analyst(s) employed by BMO Nesbitt Burns Inc., and who is (are) not registered as a research analyst(s) under FINRA rules. For disclosure statements, including the Analyst's Certification, please refer to pages 2 to 5.

Ratings and Sector Key

We use the following ratings system definitions:

OP = Outperform - Forecast to outperform the market;

Mkt = Market Perform - Forecast to perform roughly in line with the market;

Und = Underperform - Forecast to underperform the market;

(S) = speculative investment;

NR = No rating at this time;

R = Restricted – Dissemination of research is currently restricted.

Market performance is measured by a benchmark index such as the S&P/TSX Composite Index, S&P 500, Nasdaq Composite, as appropriate for each company. BMO Capital Markets eight Top 15 lists guide investors to our best ideas according to different objectives (Canadian large, small, growth, value, income, quantitative; and US large, US small) have replaced the Top Pick rating.

Q4/09 Results Slightly Below Expectations; Expect Rate Base Growth to Drive Earnings in 2010

Event

Fortis reported Q4/09 GAAP EPS of \$0.48 (basic). After adjusting for a \$3 million tax recovery at FortisOntario and \$5 million in non-recurring expenses associated with converting portions of the distribution system at Terasen Gas Whistler to utilize natural gas instead of propane, comparable Q4/09 EPS were \$0.49 (basic). This is slightly lower than our Q4/09 EPS estimate of \$0.53 (basic) and the First Call Mean estimate of \$0.52 (range \$0.46–0.55). The difference between actual and expected results appears to be due to: (1) slightly lower-than-expected earnings at the Caribbean Utility Companies (\$0.01/share); (2) lower-than-expected earnings at Fortis Generation (\$0.02/share); and (3) corporate costs that were \$0.01/share higher than expected.

Impact

Neutral.

Forecasts

We have updated our outlook for Fortis Properties to be more conservative. Our model now assumes 2010E earnings from Fortis Properties are consistent with earnings in 2009, while earnings in 2011E grow by approximately 3%. We have also reduced our merchant power price assumptions at Fortis Generation. Our 2010E diluted EPS estimates decline to \$1.65 from \$1.68 and our 2011E diluted EPS declines to \$1.77 from \$1.80.

Valuation

Our target price of \$32 is based on a weighted valuation approach: 15x 2011E diluted EPS of \$1.77 (12.5%); 1.75x 2011E BVPS of \$19.66 (12.5%); and a target yield of 3.50%, assuming 2011E dividends per share of \$1.16 (75%).

Recommendation

We believe that Fortis' shares are attractively valued considering the company's relatively low-risk, diversified business model. Our rating is Outperform.

Q4/09 Results Slightly Below Expectations; Expect Rate Base Growth to Drive Earnings in 2010

Fortis reported Q4/09 GAAP EPS of \$0.48 (basic). After adjusting for a \$3 million tax recovery at FortisOntario and \$5 million in non-recurring expenses associated with converting portions of the distribution system at Terasen Gas Whistler to utilize natural gas instead of propane, comparable Q4/09 EPS were \$0.49 (basic). This is slightly lower than our Q4/09 EPS estimate of \$0.53 (basic) and the First Call Mean estimate of \$0.52 (range \$0.46–0.55). The difference between actual and expected results appears to be due to: (1) slightly lower-than-expected earnings at the Caribbean Utility Companies (\$0.01/share); (2) lower-than-expected earnings at FortisGeneration (\$0.02/share); and (3) corporate costs that were \$0.01/share higher than expected.

With the completion of cost of capital reviews during Q4/09, we believe that EPS growth in 2010 will be largely driven by rate base investment. The company continues to target capital spending of \$5 billion over the next five years and capital expenditures for 2010 have been estimated at approximately \$1.1 billion, with \$974 million of this total allocated to the company's Canadian regulated utility businesses.

Fortis has historically grown through acquisition and its last major transaction was the acquisition of the Terasen Gas utilities, which was completed in May 2007. Now that financial markets have stabilized (both credit and equity), we would expect Fortis to continue to review potential acquisition candidates, with the most likely targets being regulated utility companies operating in the U.S.

On January 11, 2010, Fortis increased its common dividend by 7.7% to \$1.12 from \$1.04. The size of the dividend increase suggested that Fortis decided to pay out some of the incremental earnings associated with the completed cost of capital reviews to its shareholders, and as such, the dividend increase was greater than expected (we were anticipating a dividend increase of ~3.8%). Unless Fortis completes an acquisition during 2010, we expect relatively stable performance from the company this year. Investors should expect moderate EPS and dividend growth commensurate with rate base additions.

Our target price of \$32 is based on a weighted valuation approach: 15x 2011E diluted EPS of \$1.77 (12.5%); 1.75x 2011E BVPS of \$19.66 (12.5%); and a target yield of 3.50%, assuming 2011E dividends per share of \$1.16 (75%).

We believe that Fortis' shares are attractively valued considering the company's relatively low-risk, diversified business model. Our rating is Outperform.

Q4/09 Results

As set out in Table 1, on a comparable basis, net income increased by 9.2% in Q4/09 versus Q4/08. In order to present results on a comparable basis, Q4/09 GAAP income was adjusted for a \$3 million tax recovery at FortisOntario and \$5 million in non-recurring expenses associated with converting portions of the distribution system at Terasen Gas Whistler to utilize natural gas instead of propane. Fortis has applied to the British Columbia Utilities Commission (BCUC) to include the incremental conversion costs in rate base. Should the BCUC allow the rate base inclusion, Fortis would likely book a recovery to earnings in a future period. In this instance, we would normalize future results to exclude the non-recurring item.

A discussion of the operating performance of each segment follows.

Source: BMO Capital Markets, Company Reports

Regulated Gas Utilities – Terasen Gas Companies

Adjusted Q4/09 net earnings of \$53 million from Terasen Gas Inc. were consistent with our estimate of \$53 million and \$6 million greater than comparable Q4/08 earnings of \$47 million. The increase in earnings in Q4/09 vs. Q4/08 was primarily due to the impact of a regulatory decision by the British Columbia Utilities Commission, which increased the allowed ROE for Terasen Gas to 9.5% from 8.47% and the allowed ROE at Terasen Gas Vancouver Island to 10% from 9.12%. Increases to deemed ROE were retroactively effective to July 1, 2009 and as a result of the decision, Fortis recorded incremental earnings of \$6 million.

Regulated Electric Utilities – FortisAlberta

Q4/09 net income of \$15 million was consistent with our estimate of \$15 million and greater than Q4/08 earnings of \$11 million. The increase in earnings in Q4/09 vs. Q4/08 was primarily due to an increase in customer distribution rates and the results of the Alberta Utilities Commission (AUC) Generic Cost of Capital Hearing, which increased FortisAlberta's allowed ROE to 9% from 8.51% and increased the company's deemed equity thickness to 41% from 37%. Incremental earnings from the AUC decision were \$4 million.

Regulated Electric Utilities – FortisBC

Net earnings at FortisBC were \$8 million in Q4/09, which was slightly greater than our estimate of \$7 million and the \$7 million earned during Q4/08. Higher revenues due to the increase in customer electricity rates and customer growth were partially offset by increased operating costs and higher financing charges due to increased debt levels.

Regulated Electric Utilities – Newfoundland Power

Q4/09 net income of \$8 million was consistent with our estimate of \$8 million and Q4/08 net income of \$8 million.

Regulated Electric Utilities - Caribbean

The earnings contribution from the Caribbean business segment was \$7 million in Q4/09 vs. our estimate of \$8 million and Q4/08 earnings of \$8 million.

Unregulated – Fortis Generation

Fortis Generation reported Q4/09 net income of \$3 million, which was lower than our estimate of \$6 million and Q4/08 net income of \$8 million. The variance between Q4/09 and Q4/08 results was largely due to the expiration of the power-for-water exchange agreement at the Rankine hydroelectric generating facility on April 30, 2009. Lower wholesale electricity prices in New York State reduced earnings, as did lower production in Upper New York State and Belize.

Unregulated – Fortis Properties

Fortis Properties reported net income of \$5 million, which was consistent with our estimate and \$1 million greater than Q4/08 net income of \$4 million. The year-over-year increase is due to the contributions from the recently acquired Sheraton Hotel Newfoundland (November 2008) and the Holiday Inn Select Windsor (April 2009). Occupancy decreased slightly to 96.2% at the end of the quarter vs. 96.8% at the end of Q4/08. Revenue per available room fell to \$68.87 during Q4/09 vs. \$72.86 during Q4/08.

Estimates

We have updated our outlook for Fortis Properties to be more conservative. Our model now assumes 2010E earnings from Fortis Properties are consistent with earnings in 2009, while earnings in 2011E grow by approximately 3%. We have also reduced our merchant power price assumptions at Fortis Generation. Our 2010E diluted EPS estimates decline to \$1.65 from \$1.68 and our 2011E diluted EPS declines to \$1.77 from \$1.80.

IMPORTANT DISCLOSURES

Analyst's Certification

I, Michael McGowan, CA, CFA, hereby certify that the views expressed in this report accurately reflect my personal views about the subject securities or issuers. I also certify that no part of my compensation was, is, or will be, directly or indirectly, related to the specific recommendations or views expressed in this report.

Analysts who prepared this report are compensated based upon (among other factors) the overall profitability of BMO Capital Markets and their affiliates, which includes the overall profitability of investment banking services. Compensation for research is based on effectiveness in generating new ideas and in communication of ideas to clients, performance of recommendations, accuracy of earnings estimates, and service to clients.

Company Specific Disclosure

Disclosure 1: BMO Capital Markets has undertaken an underwriting liability with respect to this issuer within the past 12 months.

Disclosure 2: BMO Capital Markets has provided investment banking services with respect to this issuer within the past 12 months.

Disclosure 3: BMO Capital Markets has managed or co-managed a public offering of securities with respect to this issuer within the past 12 months.

Disclosure 4: BMO Capital Markets or an affiliate has received compensation for investment banking services from this issuer within the past 12 months.

Disclosure 5: BMO Capital Markets or an affiliate received compensation for products or services other than investment banking services within the past 12 months.

Disclosure 6: This issuer is a client (or was a client) of BMO NB, BMO Capital Markets Corp., BMO CM Ltd. or an affiliate within the past 12 months: Investment Banking Services & Non-Securities Related Services.

Methodology and Risks to Price Target/Valuation

Methodology: Our target price is based on a weighted valuation approach: 15x diluted 2011E EPS (12.5%); 1.75x 2011E BVPS (12.5%) and a target yield of 3.50% based on 2011E dividends per share (75%).

Risks: Operations are subject to complex regulation by a variety of provincial, state and federal (Canada, Cayman Islands & Belize) agencies. Changes in regulation may adversely affect performance.

Ratings and Sector Key

We use the following ratings system definitions:

OP = Outperform - Forecast to outperform the market;

Mkt = Market Perform - Forecast to perform roughly in line with the market;

Und = Underperform - Forecast to underperform the market;

(S) = speculative investment;

NR = No rating at this time;

R = Restricted – Dissemination of research is currently restricted.

Market performance is measured by a benchmark index such as the S&P/TSX Composite Index, S&P 500, Nasdaq Composite, as appropriate for each company. BMO Capital Markets eight Top 15 lists guide investors to our best ideas according to different objectives (Canadian large, small, growth, value, income, quantitative; and US large, US small) have replaced the Top Pick rating.

Company Description – Fortis is a publicly listed holding company with four key businesses: electric utility operations, regulated natural gas distribution, non-regulated electric power generation and non-utility property activities. Gas and electric utility operations include Newfoundland Power (100%, Newfoundland), Maritime Electric (100%, PEI), Fortis Ontario (100%, Ontario), Belize Electricity (70.1%, Belize), Caribbean Utilities (59.5%, Grand Cayman

Island), Turks and Caicos (100%, Turks and Caicos), FortisAlberta (100%, Alberta), FortisBC (100%, British Columbia) and the Terasen Gas Companies (100%, British Columbia). *Website: fortisinc.com*

Recent Results – Fortis Inc. reported Q4/09 GAAP EPS of \$0.48 (basic). After adjusting for a \$3 million tax recovery at FortisOntario and \$5 million in non-recurring expenses associated with converting portions of the distribution

This report was prepared by an analyst(s) employed by BMO Nesbitt Burns Inc., and who is (are) not registered as a research analyst(s) under FINRA rules. For disclosure statements, including the Analyst's Certification, please refer to pages 3 to 5.

system at Terasen Gas Whistler to utilize natural gas instead of propane, comparable Q4/09 EPS were \$0.49 (basic). This is slightly lower than our Q4/09 EPS estimate of \$0.53 (basic) and the First Call Mean estimate of \$0.52 (range \$0.46–0.55). The difference between actual and expected results appears to be due to: (1) slightly lower-than-expected earnings at the Caribbean Utilities Companies (\$0.01/share); (2) lower-than-expected earnings at Fortis Generation (\$0.02/share); and (3) corporate costs that were \$0.01/share higher than expected.

Corporate Developments – On January 11, 2010, Fortis announced a 7.7% increase to its annual dividends. Fortis also announced the issuance of \$250 million of Series H preferred shares. Proceeds will be used to repay borrowings under Fortis' credit facility and to inject additional equity into a regulated subsidiary.

On December 16, 2009, the British Columbia Utilities Commission (BCUC) released a decision regarding the return on equity and capital structure for the Terasen

Companies (100% Fortis). Pursuant to the BCUC's decision, Terasen Gas Inc.'s allowed ROE has been increased to 9.5% from 8.47% and the deemed equity component of its capital structure has been increased to 40% from 35%.

Forecasts – Our diluted EPS estimates are \$1.65 in 2010 and \$1.77 in 2011.

Valuation – Our target price of \$32 is based on a weighted valuation approach: 15x diluted 2011E EPS of \$1.77 (12.5%); 1.75x 2011E BVPS of \$19.66 (12.5%); and a target yield of 3.50%, assuming 2011E dividends per share of \$1.16 (75%).

Recommendation – We believe that Fortis shares are attractively valued, considering the company's relatively low-risk, diversified business model. Our rating is Outperform. Member of Top 15 Income and Large Cap stock selections.

Impact

Neutral

Details & Analysis

Fortis reported Q1/10 EPS of \$0.58, in line with our estimate of \$0.58 and the First Call Mean estimate of \$0.58 (range \$0.57-0.60). Many of the positive decisions received during 2009's regulated cost of capital proceeding are now showing up in Fortis's 2010 results. Earnings at Terasen Gas were particularly strong, and were able to offset slightly weaker-than-expected results at the non-regulated generation segment and Fortis Caribbean. There are no changes to the company's capital expenditure program. Fortis expects to invest \$1.1 billion of capital in 2010 and approximately \$5 billion during 2010–2014.

This report was prepared by an analyst(s) employed by BMO Nesbitt Burns Inc., and who is (are) not registered as a research analyst(s) under FINRA rules. For disclosure statements, including the Analyst's Certification, please refer to pages 2 to 5.

Q1/10 Results in Line; Positive Regulatory Decisions Now Reflected in Results

Event

Fortis reported Q1/10 EPS of \$0.58, in line with our estimate of \$0.58 and the First Call Mean estimate of \$0.58 (range \$0.57–0.60). Many of the positive decisions received during 2009's regulated cost of capital proceedings are now showing up in Fortis's 2010 results. Earnings at Terasen Gas were particularly strong and were able to offset slightly weaker-than-expected results at the non-regulated generation segment and Fortis Caribbean.

Impact

Neutral.

Forecasts

There are no changes to our estimates.

Valuation

Our target price of \$32 is based on a weighted valuation approach: 15x 2011E diluted EPS of \$1.77 (12.5%); 1.75x 2011E BVPS of \$19.66 (12.5%); and a target yield of 3.50%, assuming 2011E dividends per share of \$1.16 (75%).

Recommendation

We believe that Fortis's shares are attractively valued considering the company's relatively low-risk, diversified business model. Our rating is Outperform.

Q1/10 Earnings in Line; Positive Regulatory Decisions Now Reflected in Results

Fortis reported Q1/10 EPS of \$0.58, in line with our estimate of \$0.58 and the First Call Mean estimate of \$0.58 (range \$0.57–0.60). Many of the positive decisions received during 2009's regulated cost of capital proceedings are now showing up in Fortis's 2010 results. Earnings at Terasen Gas were particularly strong, and were able to offset slightly weaker-than-expected results at the non-regulated generation segment and Fortis Caribbean.

Fortis has historically grown through acquisition and its last major transaction was the acquisition of the Terasen Gas utilities, which was completed in May 2007. Now that financial markets have stabilized, we would expect Fortis to continue to review potential acquisition candidates, with the most likely targets being regulated utility companies operating in the U.S. Media reports on Tuesday, April 27 speculated that Fortis was one of the bidders for E.ON's U.S.-based utility assets, which include Louisville Gas & Electric Co and Kentucky Utilities Co. U.S.-based PPL Corp. was ultimately successful in the auction and acquired the businesses for U.S. \$6.7 billion.

Although Fortis does not comment on unannounced corporate development activities, we did discuss the company's acquisition parameters with management. Given the company's current profile, Fortis believes that it could complete an acquisition with an enterprise value of approximately \$4 billion on a stand-alone basis. Any potential acquisition larger in scope would likely require the support of a financial partner. Fortis's preference remains to acquire regulated transmission businesses; however, the company will consider acquiring vertically-integrated utilities as long as the utilities are located in jurisdictions with supportive regulatory environments.

There were no changes to the company's expenditure program. Fortis expects to invest \$1.1 billion of capital in 2010 and approximately \$5 billion during 2010–2014. Unless Fortis completes an acquisition during 2010, we expect relatively stable performance from the company this year. Investors should expect moderate EPS and dividend growth commensurate with rate base additions.

Our target price of \$32 is based on a weighted valuation approach: 15x 2011E diluted EPS of \$1.77 (12.5%); 1.75x 2011E BVPS of \$19.66 (12.5%); and a target yield of 3.50%, assuming 2011E dividends per share of \$1.16 (75%).

We believe that Fortis's shares are attractively valued considering the company's relatively low-risk, diversified business model. Our rating is Outperform.

Q1/10 Results

As set out in Table 1, Q1/10 GAAP net income of \$100 million was \$10 million greater than comparable income of \$90 million reported in Q1/09. In order to present Q1/09 results on a comparable basis, Q1/09 GAAP income was adjusted for non-recurring items of: (1) \$1 million at Fortis Turks and Caicos related to a favourable court of appeal ruling regarding rates charged to certain industrial customers; and (2) \$1 million related to a change in the method of accruing unbilled fuel factor revenue at Fortis Turks and Caicos.

A discussion of the operating performance of each segment follows:

Source: BMO Capital Markets, Company Reports

Regulated Gas Utilities – Terasen Gas Companies

Q1/10 net income of \$73 million from Terasen Gas exceeded our estimate of \$64.8 million and Q1/09 net income of \$58 million. The improvement in earnings during Q1/10 was mainly due to an increase in regulated ROE and an increase in the deemed equity thickness at Terasen Gas Inc (TGI) to 40.0% from 35%. Effective July 1, 2009, the allowed ROE increased to 9.5% from 8.47% for TGI and to 10.0% from 9.17% for Terasen Gas (Vancouver Island) Inc. and Terasen Gas Whistler Inc.

Regulated Electric Utilities – FortisAlberta

Q1/10 net income of \$14 million was slightly lower than our estimate of \$14.9 million and greater than Q1/09 net income of \$12 million. The increase in earnings in Q1/10 vs. Q1/09 was primarily due to an increase in customer distribution rates as a result of the Alberta Utilities Commission Generic Cost of Capital Hearing, which increased FortisAlberta's allowed ROE to 9% from 8.51% and increased the company's deemed equity thickness to 41% from 37%. In addition, final approval of FortisAlberta's 2010–2011 Revenue Requirements Application is expected to occur in the second quarter of 2010.

Regulated Electric Utilities – FortisBC

Q1/10 net income of \$14 million was consistent with our estimate of \$14.3 million and Q1/09 net income of \$14 million.

Regulated Electric Utilities – Newfoundland Power

Q1/10 net income of \$7 million was slightly greater than Q1/09 net income of \$6 million and our estimate of \$6.4 million.

Regulated Electric Utilities – Caribbean

The earnings contribution from the Caribbean business segment was \$4 million in Q1/10 vs. our estimate of \$5.3 million and Q1/09 adjusted earnings of \$4 million. Unfavourable foreign currency translation during the quarter was partially offset by increased electricity sales (due to higher-than-normal temperatures) at Caribbean Utilities.

Unregulated – Fortis Generation

Fortis Generation reported Q1/10 net income of \$2 million, which was lower than our estimate of \$5.1 million and Q1/09 net income of \$6 million. The variance between Q1/10 and Q1/09 results was largely due to the expiration of the power-for-water exchange agreement at the Rankine hydroelectric generating facility on April 30, 2009 and lower power production at the Belize facilities.

Unregulated – Fortis Properties

Fortis Properties reported net income of \$2 million, which was generally consistent with our estimate of \$2.4 million and Q1/09 net income of \$2 million. Occupancy decreased slightly to 95.8% at the end of the quarter vs. 96.0% at the end of Q1/09. Revenue per available room fell to \$62.93 during Q1/10 vs. \$64.40 during Q1/09.

Other Items

- In March, the 19-MW hydroelectric generating facility at Vaca in Belize was commissioned resulting in the delivery of 4 GWh of energy during the quarter.
- The Alberta Utilities Commission is considering a proposal for regulatory reform, which would provide a transition from traditional “return on rate base” regulation to a form of performance based regulation (PBR). Under PBR, prevailing rates are generally adjusted annually by a predetermined formula that usually takes into account inflation and productivity improvements. Incremental earnings arising from productivity improvements are often shared with customers. Under the current proposal, PBR would apply to regulated natural gas and electricity business, while electricity and natural gas transmission would be excluded from PBR. The AUC has advised that the target date for the implementation of PBR is July 1, 2012, based on applications filed by the end of Q1/2011. This proposal could potentially affect FortisAlberta.

Estimates

There are no changes to our estimates.

IMPORTANT DISCLOSURES

Analyst's Certification

I, Michael McGowan, CA, CFA, hereby certify that the views expressed in this report accurately reflect my personal views about the subject securities or issuers. I also certify that no part of my compensation was, is, or will be, directly or indirectly, related to the specific recommendations or views expressed in this report.

Analysts who prepared this report are compensated based upon (among other factors) the overall profitability of BMO Capital Markets and their affiliates, which includes the overall profitability of investment banking services. Compensation for research is based on effectiveness in generating new ideas and in communication of ideas to clients, performance of recommendations, accuracy of earnings estimates, and service to clients.

Company Specific Disclosure

Disclosure 1: BMO Capital Markets has undertaken an underwriting liability with respect to this issuer within the past 12 months.

Disclosure 2: BMO Capital Markets has provided investment banking services with respect to this issuer within the past 12 months.

Disclosure 3: BMO Capital Markets has managed or co-managed a public offering of securities with respect to this issuer within the past 12 months.

Disclosure 4: BMO Capital Markets or an affiliate has received compensation for investment banking services from this issuer within the past 12 months.

Disclosure 5: BMO Capital Markets or an affiliate received compensation for products or services other than investment banking services within the past 12 months.

Disclosure 6: This issuer is a client (or was a client) of BMO NB, BMO Capital Markets Corp., BMO CM Ltd. or an affiliate within the past 12 months: Investment Banking Services & Non-Securities Related Services.

Methodology and Risks to Price Target/Valuation

Methodology: Our target price is based on a weighted valuation approach: 15x diluted 2011E EPS (12.5%); 1.75x 2011E BVPS (12.5%) and a target yield of 3.50% based on 2011E dividends per share (75%).

Risks: Operations are subject to complex regulation by a variety of provincial, state and federal (Canada, Cayman Islands & Belize) agencies. Changes in regulation may adversely affect performance.

Ratings and Sector Key

We use the following ratings system definitions:

OP = Outperform - Forecast to outperform the market;

Mkt = Market Perform - Forecast to perform roughly in line with the market;

Und = Underperform - Forecast to underperform the market;

(S) = speculative investment;

NR = No rating at this time;

R = Restricted – Dissemination of research is currently restricted.

Market performance is measured by a benchmark index such as the S&P/TSX Composite Index, S&P 500, Nasdaq Composite, as appropriate for each company. BMO Capital Markets eight Top 15 lists guide investors to our best ideas according to different objectives (Canadian large, small, growth, value, income, quantitative; and US large, US small) have replaced the Top Pick rating.

Company Description – Fortis Inc. (Fortis) is a publicly listed holding company with four key businesses: electric utility operations, regulated natural gas distribution, non-regulated electric power generation and non-utility property activities. Gas and electric utility operations include Newfoundland Power (100%, Newfoundland), Maritime Electric (100%, PEI), Fortis Ontario (100%, Ontario), Belize Electricity (70.1%, Belize), Caribbean Utilities

(59.5%, Grand Cayman Island), Turks and Caicos (100%, Turks and Caicos), FortisAlberta (100%, Alberta), FortisBC (100%, British Columbia) and the Terasen Gas Companies (100%, British Columbia). *Website: fortisinc.com*

Recent Results – Fortis reported Q1/10 EPS of \$0.58, in line with our estimate of \$0.58 and the First Call Mean estimate of \$0.58 (range \$0.57–0.60). Many of the positive decisions received during 2009’s regulated cost of capital

This report was prepared by an analyst(s) employed by BMO Nesbitt Burns Inc., and who is (are) not registered as a research analyst(s) under FINRA rules. For disclosure statements, including the Analyst’s Certification, please refer to pages 3 to 5.

proceedings are now showing up in Fortis' 2010 results. Earnings at Terasen Gas were particularly strong and were able to offset slightly weaker-than-expected results at the non-regulated generation segment and FortisCaribbean.

Corporate Developments – There have been no changes to the company's capital expenditure program. Fortis expects to invest \$1.1 billion of capital in 2010 and approximately \$5 billion during 2010–2014.

On December 16, 2009, the British Columbia Utilities Commission (BCUC) released a decision regarding the return on equity and capital structure for the Terasen Companies (100% Fortis). Pursuant to the BCUC's decision, Terasen Gas Inc.'s allowed ROE has been increased to 9.5% from 8.47% and the deemed equity

component of its capital structure has been increased to 40% from 35%.

Forecasts – Our diluted EPS estimates are \$1.65 in 2010 and \$1.77 in 2011.

Valuation – Our target price of \$32 is based on a weighted valuation approach: 15x diluted 2011E EPS of \$1.77 (12.5%); 1.75x 2011E BVPS of \$19.88 (12.5%); and a target yield of 3.50%, assuming 2011E dividends per share of \$1.16 (75%).

Recommendation – We believe that Fortis shares are attractively valued, considering the company's relatively low-risk, diversified business model. Our rating is Outperform. Member of Top 15 Income and Large Cap stock selections.

Q2/10 Results in Line

Impact

Neutral

Details & Analysis

Fortis Inc. reported Q2/10 EPS of \$0.32, which was in line with our estimate of \$0.33 and the First Call Mean estimate of \$0.32 (range \$0.30-0.33). Results from Fortis's individual business segments were generally consistent with our estimates, but corporate costs were slightly higher than anticipated. There were no material changes to Fortis's capital expenditure program. The company expects to invest \$1.1 billion of capital in 2010 (year-to-date spending was \$432 million) and approximately \$5 billion during 2010-2014. Overall, this appeared to be a strong quarter with no surprises. We continue to believe that Fortis's shares are attractively valued considering the company's relatively low-risk business model.

This report was prepared by an analyst(s) employed by BMO Nesbitt Burns Inc., and who is (are) not registered as a research analyst(s) under FINRA rules. For disclosure statements, including the Analyst's Certification, please refer to pages 2 to 5.

IMPORTANT DISCLOSURES**Analyst's Certification**

I, Michael McGowan, CA, CFA, hereby certify that the views expressed in this report accurately reflect my personal views about the subject securities or issuers. I also certify that no part of my compensation was, is, or will be, directly or indirectly, related to the specific recommendations or views expressed in this report.

Analysts who prepared this report are compensated based upon (among other factors) the overall profitability of BMO Capital Markets and their affiliates, which includes the overall profitability of investment banking services. Compensation for research is based on effectiveness in generating new ideas and in communication of ideas to clients, performance of recommendations, accuracy of earnings estimates, and service to clients.

Company Specific Disclosure

Disclosure 1: BMO Capital Markets has undertaken an underwriting liability with respect to this issuer within the past 12 months.

Disclosure 2: BMO Capital Markets has provided investment banking services with respect to this issuer within the past 12 months.

Disclosure 4: BMO Capital Markets or an affiliate has received compensation for investment banking services from this issuer within the past 12 months.

Disclosure 5: BMO Capital Markets or an affiliate received compensation for products or services other than investment banking services within the past 12 months.

Disclosure 6: This issuer is a client (or was a client) of BMO NB, BMO Capital Markets Corp., BMO CM Ltd. or an affiliate within the past 12 months: Investment Banking Services & Non-Securities Related Services.

Methodology and Risks to Price Target/Valuation

Methodology: Our target price is based on a weighted valuation approach: 15x diluted 2011E EPS (12.5%); 1.75x 2011E BVPS (12.5%) and a target yield of 3.50% based on 2011E dividends per share (75%).

Risks: Operations are subject to complex regulation by a variety of provincial, state and federal (Canada, Cayman Islands & Belize) agencies. Changes in regulation may adversely affect performance.

Ratings and Sector Key

We use the following ratings system definitions:

OP = Outperform - Forecast to outperform the market;

Mkt = Market Perform - Forecast to perform roughly in line with the market;

Und = Underperform - Forecast to underperform the market;

(S) = speculative investment;

NR = No rating at this time;

R = Restricted – Dissemination of research is currently restricted.

Market performance is measured by a benchmark index such as the S&P/TSX Composite Index, S&P 500, Nasdaq Composite, as appropriate for each company. BMO Capital Markets eight Top 15 lists guide investors to our best ideas according to different objectives (Canadian large, small, growth, value, income, quantitative; and US large, US small) have replaced the Top Pick rating.

Q2/10 Results in Line; Outperform Rating Maintained

Event

Fortis Inc. reported Q2/10 EPS of \$0.32, which was in line with our estimate of \$0.33 and the First Call Mean estimate of \$0.32 (range \$0.30–0.33). Results from Fortis's individual business segments were generally consistent with our estimates, but corporate costs were slightly higher than anticipated.

Impact

Neutral.

Forecasts

We have updated our forecasts to reflect Q2/10 results. There are no changes to our EPS estimates.

Valuation

Our target price of \$32 is based on a weighted valuation approach: 15x 2011E diluted EPS of \$1.77 (12.5%); 1.75x 2011E BVPS of \$19.74 (12.5%); and a target yield of 3.50%, assuming 2011E dividends per share of \$1.16 (75%).

Recommendation

We believe that Fortis's shares are attractively valued considering the company's relatively low-risk, diversified business model. Our rating is Outperform.

Q2/10 Earnings in Line; Expect Rate Base Growth to Drive Earnings and Dividend Growth

Fortis Inc. reported Q2/10 EPS of \$0.32, which was in line with our estimate of \$0.33 and the First Call Mean estimate of \$0.32 (range \$0.30–0.33). Results from Fortis's individual business segments were generally consistent with our estimates, but corporate costs were slightly higher than anticipated.

Fortis has historically grown through acquisition and its last major transaction was the acquisition of the Terasen Gas utilities, which was completed in May 2007. Now that financial markets have stabilized, we would expect Fortis to continue to review potential acquisition candidates, with the most likely targets being regulated utility companies operating in the U.S. We note, however, that Fortis does have some medium-term brownfield development opportunities that have not been included in the company's capital expenditure budget. These opportunities include a possible involvement with a proposed expansion of the Waneta hydro facility owned by Teck Cominco and BC Hydro and a possible expansion of the Southern Crossing pipeline owned by Terasen Gas.

There were no changes to the company's expenditure program. Fortis expects to invest \$1.1 billion of capital in 2010 and approximately \$5 billion during 2010–2014. Absent an acquisition during 2010, we expect relatively stable performance from the company this year. Investors should expect moderate EPS and dividend growth commensurate with rate base additions.

Our target price of \$32 is based on a weighted valuation approach: 15x 2011E diluted EPS of \$1.77 (12.5%); 1.75x 2011E BVPS of \$19.74 (12.5%); and a target yield of 3.50%, assuming 2011E dividends per share of \$1.16 (75%).

We believe that Fortis's shares are attractively valued considering the company's relatively low-risk, diversified business model. Our rating is Outperform.

Q2 Results

Fortis reported Q2/10 GAAP net income of \$55 million, which was consistent with our estimate of \$55.8 million, and \$2 million greater than comparable income of \$53 million reported in Q2/09. A comparison of Q2/10 and Q2/09 results by business segment is set out in Table 1.

Source: BMO Capital Markets, Company Reports

A discussion of the operating performance of each business segment follows below.

Regulated Gas Utilities – Terasen Gas Companies

Q2/10 net income of \$17 million from Terasen Gas exceeded our estimate of \$13 million and Q2/09 net income of \$14 million. The improvement in earnings during Q2/10 vs. Q2/09 was primarily due to an increase in regulated ROE and an increase in the deemed equity thickness at Terasen Gas Inc. (TGI) to 40.0% from 35.0%. Effective July 1, 2009, the allowed ROE increased to 9.5% from 8.47% for TGI and to 10.0% from 9.17% for Terasen Gas (Vancouver Island) Inc. and Terasen Gas Whistler Inc. We also believe that Q2/10 earnings exhibited some seasonality, as cooler-than-normal weather increased gas consumption during the quarter.

Regulated Electric Utilities – FortisAlberta

Q2/10 net income of \$17 million was consistent with Q2/09 net income of \$17 million and \$0.9 million lower than our estimate of \$17.9 million.

Earnings in Q2/09 benefitted from a \$3 million income tax recovery. We understand that approximately \$2 million of the recovery relates to a reversal of income tax provisions expensed during prior quarters, while the remaining \$1 million resulted from a future income tax benefit that was triggered by the collection of amounts held in a deferral account related to 2007 transmission tariffs paid to the Alberta Electric System Operator.

Although Q2/10 results at FortisAlberta did not benefit from a tax recovery, earnings were assisted from an increase in customer distribution rates arising from the 2009 Alberta Utilities Commission (AUC) Generic Cost of Capital Hearing, which increased FortisAlberta's allowed ROE to 9% from 8.51% and increased the company's deemed equity thickness to 41% from 37%. Excluding the tax benefit recorded last year, earnings at FortisAlberta would have increased by \$3 million in Q2/10 vs. Q2/09.

Regulated Electric Utilities – FortisBC

Q2/10 net income of \$8 million was slightly greater than Q2/09 net income of \$7 million and consistent with our estimate of \$8.3 million.

Regulated Electric Utilities – Newfoundland Power

Q2/10 net income of \$11 million was consistent with our estimate of \$11.2 million and Q2/09 net income of \$11 million.

Regulated Electric Utilities – Caribbean

The earnings contribution from the Caribbean business segment was \$7 million in Q2/10 vs. our estimate of \$7.7 million and Q2/09 net income of \$7 million. Unfavourable foreign currency translation during the quarter was partially offset by increased electricity sales (due to higher-than-normal temperatures) at Caribbean Utilities.

Unregulated – Fortis Generation

Fortis Generation reported net income of \$3 million, consistent with Q2/09 net income of \$3 million but lower than our estimate of \$4.1 million. The difference between actual and expected results was due unfavourable foreign currency translation during the quarter which resulted in a decrease in revenue of approximately \$1 million.

Unregulated – Fortis Properties

Fortis properties reported net income of \$8 million, which was consistent with our estimate of \$7.7 million and Q2/09 net income of \$8 million. Occupancy decreased slightly to 94.8% at the end of the quarter vs. 95.9% at the end of Q2/09. Revenue per available room increased to \$83.77 during Q2/10 vs. \$83.15 during Q2/09.

Regulated Entities Appear to Receive a Temporary Reprieve from IFRS

On July 28, 2010, the Accounting Standards Board (AcSB) issued an exposure draft proposing that qualifying entities with rate-regulated operations may elect to defer the adoption of International Financial Reporting Standards (IFRS) until reporting periods beginning on or after January 1, 2013. We view this announcement positively considering that the International Accounting Standards Board has not finalized deliberations on the recognition, measurement and disclosure of regulatory assets and liabilities. As the IASB is unlikely to finalize these deliberations before the deadline requiring Canadian companies to adopt IFRS (January 1, 2011), the Canadian AcSB is of the view that it is prudent for rate-regulated entities to be given the opportunity to delay the adoption of IFRS until these deliberations are completed. Failing to grant this option could require entities to make multiple changes to the accounting treatment of regulatory assets and liabilities over a very short period of time (for example, the accounting treatment of regulatory assets and liabilities by Canadian companies could change upon the initial adoption of IFRS, and once again when the IASB completes its deliberations). This would create considerable uncertainty and likely reduce the comparability of financial statements between periods.

If the exposure draft is ratified, Fortis will elect to defer the adoption of IFRS until 2013.

Estimates

We have updated our forecasts to reflect Q2/10 results. There are no changes to our EPS estimates.

IMPORTANT DISCLOSURES

Analyst's Certification

I, Michael McGowan, CA, CFA, hereby certify that the views expressed in this report accurately reflect my personal views about the subject securities or issuers. I also certify that no part of my compensation was, is, or will be, directly or indirectly, related to the specific recommendations or views expressed in this report.

Analysts who prepared this report are compensated based upon (among other factors) the overall profitability of BMO Capital Markets and their affiliates, which includes the overall profitability of investment banking services. Compensation for research is based on effectiveness in generating new ideas and in communication of ideas to clients, performance of recommendations, accuracy of earnings estimates, and service to clients.

Company Specific Disclosure

Disclosure 1: BMO Capital Markets has undertaken an underwriting liability with respect to this issuer within the past 12 months.

Disclosure 2: BMO Capital Markets has provided investment banking services with respect to this issuer within the past 12 months.

Disclosure 4: BMO Capital Markets or an affiliate has received compensation for investment banking services from this issuer within the past 12 months.

Disclosure 5: BMO Capital Markets or an affiliate received compensation for products or services other than investment banking services within the past 12 months.

Disclosure 6: This issuer is a client (or was a client) of BMO NB, BMO Capital Markets Corp., BMO CM Ltd. or an affiliate within the past 12 months: Investment Banking Services & Non-Securities Related Services.

Methodology and Risks to Price Target/Valuation

Methodology: Our target price is based on a weighted valuation approach: 15x diluted 2011E EPS (12.5%); 1.75x 2011E BVPS (12.5%) and a target yield of 3.50% based on 2011E dividends per share (75%).

Risks: Operations are subject to complex regulation by a variety of provincial, state and federal (Canada, Cayman Islands & Belize) agencies. Changes in regulation may adversely affect performance.

Ratings and Sector Key

We use the following ratings system definitions:

OP = Outperform - Forecast to outperform the market;

Mkt = Market Perform - Forecast to perform roughly in line with the market;

Und = Underperform - Forecast to underperform the market;

(S) = speculative investment;

NR = No rating at this time;

R = Restricted – Dissemination of research is currently restricted.

Market performance is measured by a benchmark index such as the S&P/TSX Composite Index, S&P 500, Nasdaq Composite, as appropriate for each company. BMO Capital Markets eight Top 15 lists guide investors to our best ideas according to different objectives (Canadian large, small, growth, value, income, quantitative; and US large, US small) have replaced the Top Pick rating.

Investment in Waneta Dam Expansion Announced; Maintaining Outperform Rating

Event

Fortis has announced that it is part of a partnership that is proposing to construct a 335 MW expansion of the Waneta Dam, located near Trail, BC. The other two project proponents include the Columbia Power Corporation and the Columbia Basin Trust, both of which are owned by the Government of British Columbia. The capital cost of the project is estimated at \$900 million, and the facility is expected to be placed in service during the spring of 2015. Fortis owns a 51% interest in the partnership and will be responsible for operating and maintaining the facility once it is placed into service. Revenues from the facility are expected to be largely capacity-based, which should reduce hydrological risk associated with the facility. Additional details of the project are set out herein.

Impact

Positive. Fortis expects earnings from this project to slightly exceed returns from its regulated utilities. Given the relatively low-risk nature of this project (limited hydrological risk, government counterparties), we believe this is a positive investment for Fortis.

Forecasts

There are no changes to our estimates.

Valuation

Our target price of \$32 is based on a weighted valuation approach: 15x 2011E diluted EPS of \$1.77 (12.5%); 1.75x 2011E BVPS of \$19.74 (12.5%); and a target yield of 3.50%, assuming 2011E dividends per share of \$1.16 (75%).

Recommendation

We believe that Fortis's shares are attractively valued considering the company's relatively low-risk, diversified business model. Our rating is Outperform.

Project Details

Fortis has announced that it is part of a partnership that is proposing to construct a 335 MW expansion of the Waneta Dam, located near Trail, BC. Details of the project are set out below:

- The other two project proponents include the Columbia Power Corporation and the Columbia Basin Trust, both of which are owned by the Government of British Columbia.
- Fortis is expected to hold a 51% interest in the project and will maintain and operate the facility once it is placed into service in the spring of 2015.
- The capital cost of the project is expected to be \$900 million, and costs are expected to be incurred from 2011 to 2016, with approximately \$70 million incurred in 2010 and \$180 million in 2011. Fortis's share of total project costs is approximately \$459 million. Fortis intends to initially finance its contribution using credit facilities, but will permanently finance its investment with a combination of debt and equity.
- The project has received federal and provincial environmental approvals. Construction is expected to commence this fall.
- Revenue from the facility will be derived from two sources.
 - Approximately 630 GWh of production will be sold to BC Hydro, pursuant to the Canal Plant Agreement, whereby the facility will receive fixed energy and capacity entitlements based on long-term average water flows. Pricing for this energy will be consistent with prices awarded to projects pursuant to the BC Clean Power Call.
 - Surplus capacity of approximately 234 MW will be sold to Fortis BC, subject to approval from the British Columbia Utilities Commission. This capacity will receive a price ranging from \$11,000 to 17,500 per MW per month.
 - Given that both revenue streams consist of capacity payments, hydrological risk associated with this asset should be minimized.
- Fortis expects earnings from this project to slightly exceed returns from its regulated utilities, which are generally subject to deemed ROE of 9.5–10.0%. Assuming that this project is financed with 35% equity and is capable of generating a 10.5% ROE, it could contribute up to \$16.9 million in incremental earnings when it is commissioned.

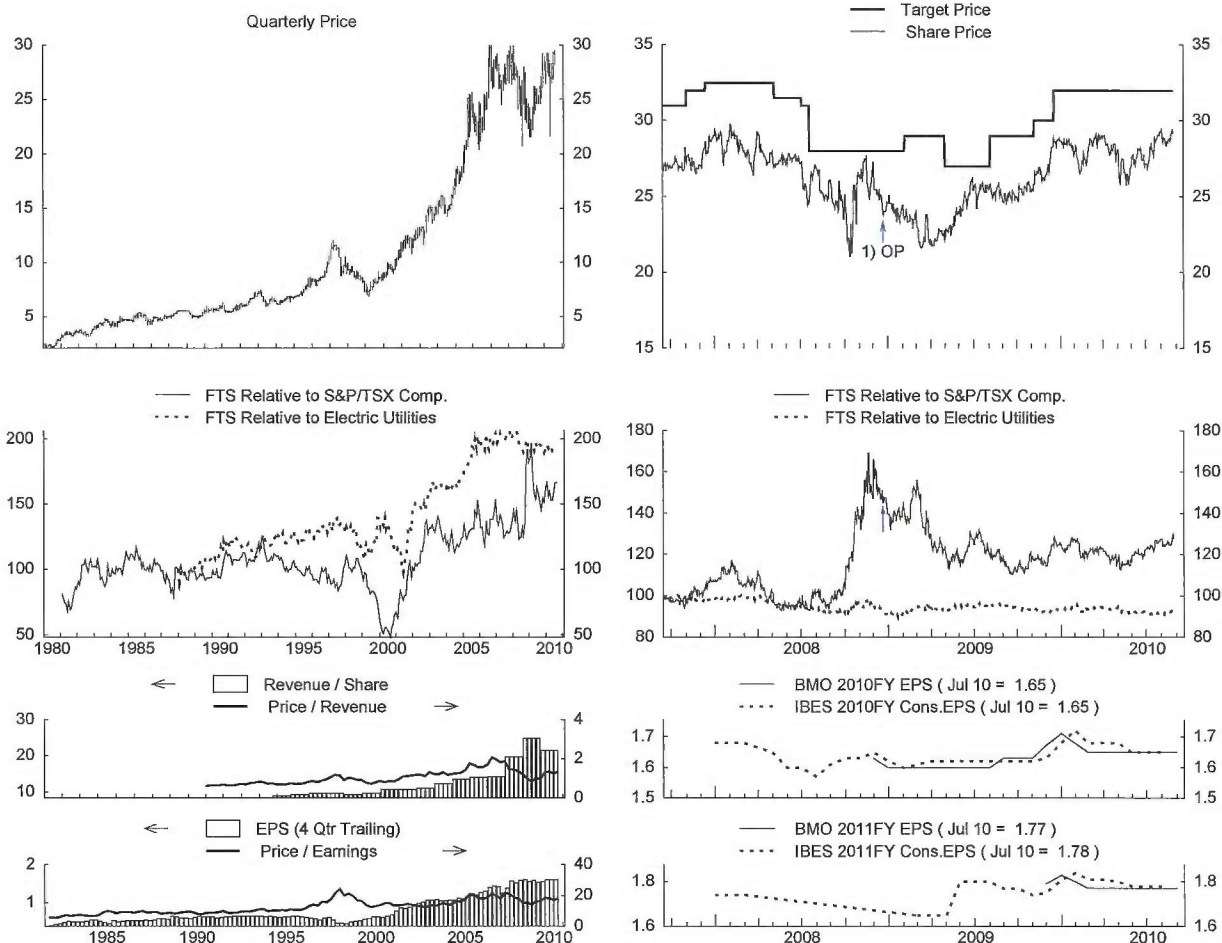

Will This Project Accelerate Fortis's Equity Requirements?

Although this project isn't expected to contribute to earnings until early 2015, all construction costs, including interest, are expected to be capitalized until that time. Construction of the project should not directly impact earnings; however, it is possible that capital spending associated with the Waneta Dam expansion may cause Fortis to re-evaluate the timing of its next equity issuance. Our model currently assumes that Fortis raises \$260 million of common equity in 2012E; however, it is possible that Fortis may now seek to raise additional equity financing in 2011E.

IMPORTANT DISCLOSURES**Analyst's Certification**

I, Michael McGowan, CA, CFA, hereby certify that the views expressed in this report accurately reflect my personal views about the subject securities or issuers. I also certify that no part of my compensation was, is, or will be, directly or indirectly, related to the specific recommendations or views expressed in this report.

Analysts who prepared this report are compensated based upon (among other factors) the overall profitability of BMO Capital Markets and their affiliates, which includes the overall profitability of investment banking services. Compensation for research is based on effectiveness in generating new ideas and in communication of ideas to clients, performance of recommendations, accuracy of earnings estimates, and service to clients.

Company Specific Disclosure

Disclosure 1: BMO Capital Markets has undertaken an underwriting liability with respect to this issuer within the past 12 months.

Disclosure 2: BMO Capital Markets has provided investment banking services with respect to this issuer within the past 12 months.

Disclosure 4: BMO Capital Markets or an affiliate has received compensation for investment banking services from this issuer within the past 12 months.

Disclosure 5: BMO Capital Markets or an affiliate received compensation for products or services other than investment banking services within the past 12 months.

Disclosure 6: This issuer is a client (or was a client) of BMO NB, BMO Capital Markets Corp., BMO CM Ltd. or an affiliate within the past 12 months: Investment Banking Services & Non-Securities Related Services.

Methodology and Risks to Price Target/Valuation

Methodology: Our target price is based on a weighted valuation approach: 15x diluted 2011E EPS (12.5%); 1.75x 2011E BVPS (12.5%) and a target yield of 3.50% based on 2011E dividends per share (75%).

Risks: Operations are subject to complex regulation by a variety of provincial, state and federal (Canada, Cayman Islands & Belize) agencies. Changes in regulation may adversely affect performance.

Ratings and Sector Key

We use the following ratings system definitions:

OP = Outperform - Forecast to outperform the market;

Mkt = Market Perform - Forecast to perform roughly in line with the market;

Und = Underperform - Forecast to underperform the market;

(S) = speculative investment;

NR = No rating at this time;

R = Restricted – Dissemination of research is currently restricted.

Market performance is measured by a benchmark index such as the S&P/TSX Composite Index, S&P 500, Nasdaq Composite, as appropriate for each company. BMO Capital Markets eight Top 15 lists guide investors to our best ideas according to different objectives (Canadian large, small, growth, value, income, quantitative; and US large, US small) have replaced the Top Pick rating.

Analyst's Perspective 10 Feb 2012

As we expected, BG's annual strategy update held several positive announcements. BG upwardly revised its 2020 Brazilian production forecast by 50 mboe/d. We previously thought an upward revision was likely given the positive news flow concerning its operations there over the past year, and were encouraged as a result. At the same time, BG lowered its 2015 U.S. production guidance by 110 mboe/d in light of low gas prices. As a result, total 2015 production guidance is slightly above 1 mmboe/d, compared with almost 1.2 mmboe/d previously. While the reduction will lower BG's growth rate over the next few years, we view the decision positively given the likelihood of uneconomical drilling that would have occurred otherwise. As for its LNG segment, BG raised its 2012 profit guidance for the second year in a row as it plans to take advantage of strong market conditions thanks to its flexible supply and global network.

Key Investment Considerations

- We value BG Group at GBX 2,000 (\$31) per share, which implies a EV/EBITDA multiple of 9.3 times our 2012 EBITDA forecast of \$12.7 billion. We believe BG earns a premium multiple because of its production growth potential.
- Though 70% of BG's production is natural gas, 50% of sales are oil indexed, thanks to LNG. The addition of Australian LNG and Brazilian volumes should result in 70% of sales linked to oil prices by 2015.
- BG decided to lock in slightly lower LNG profits for 2011-12 because of expectations for a soft market. However, beginning in 2013, supplies are expected to tighten, which should lead to greater profits.

Profile

BG Group is an integrated energy company primarily engaged in the exploration for and production of natural gas in Egypt, the United Kingdom, Trinidad and Tobago, and Kazakhstan. It specializes in using liquefied natural gas to monetize its stranded gas resources for delivery to high-value markets in the United States, Europe, and Asia. In 2011, BG produced an average of 646,000 barrels of oil equivalent a day, 74% of which was natural gas, and reported proven reserves of 3.3 billion barrels of oil equivalent.

Morningstar Analysis

Of BG's growth opportunities, we believe the most transformative could be its stake in Brazil's presalt offshore fields.

Cost Revision Damps an Otherwise Good Earnings Report for BG Group 04 May 2012

On Thursday, BG Group BG. reported strong first-quarter results. However, those results were largely overshadowed by upward revisions to the cost estimate for its QCLNG project.

First on the bad news: BG now estimates the cost for its QCLNG project in Australia will be \$20.4 billion, compared to \$15 billion previously. Half of the increase is related to inflation in the local market for goods and services, increased costs of compliance processes, and some changes to the scope of the project. Appreciation of the Australian dollar is responsible for the remainder of the cost increase.

Of the total increase, two thirds is related to the upstream development, and one third to the downstream/midstream development, where BG was somewhat able to mitigate costs through early entry, and by the locking in of labor rates on the LNG plant. The upstream segment also was responsible for the bulk of the increase in compliance costs, which were primarily related to greater-than-expected complexity in dealing with waste water issues (permitting, treatment, disposal, etc.) However, measured against the increase in discovered resources since the first cost estimate, upstream development cost remain at levels that should preserve project returns, only increasing to \$9/boe from \$8/boe previously. Also, given the cost increases relate to market impacts and not execution (start-up remains on track for 2014), we believe our long-term thesis on BG remains intact, and that the current heavy investment cycle will lead to higher returns and a return of free cash flow in 2014.

The increase in costs led BG to revise its capital expenditure forecast for 2012 to \$11.5 billion from \$10.6 billion, and for 2013 to \$12.0 billion from \$11.4 billion. Previous guidance already included the negative currency effects. We have

incorporated the new guidance into our model and our fair value remains unchanged. We also expect BG will be able to fund the existing capital program with its current funding plan and proceeds from asset sales.

Now, the better news: Earnings held few surprises. Operating income of \$2.4 billion is up 21% from the year before. E&P operating profit rose 15%, thanks to higher realized prices and increased production volumes. First-quarter production only grew 4.6% from the year before. However, we previously expected growth to be in the back part of the year. Additionally, the start-up four major projects (West Delta Deep in Egypt, Gaupe in Norway, Greater Bongkot South in Thailand and Margarita in Bolivia) with plateau production volumes of 50 mboe/d should lead to greater volume growth in coming quarters. BG also reiterated its previous guidance of an exit rate of 750 mboe/d despite the delayed start-up of Jasmine (non-operated), and the loss of Elgin volumes (non-operated). Depreciation costs per barrel are tracking ahead of our forecasts.

LNG operating profit jumped 42% to \$812 million, thanks to favorable market conditions, particularly in Asia, where spot LNG averaged \$16/mmbtu. Despite the strong quarter, management left its full-year operating profit guidance unchanged at \$2.6 billion to \$2.8 billion. However, guidance could be revised later in the year if the Asian market remains strong due to offline nuclear capacity. BG delivered the bulk of its cargos (91%) to locations outside the U.S., but still landed five, though down from eight last year. BG is continuing to work on connecting stranded markets in the U.S. to pipeline gas that would allow it to reduce U.S. bound cargos further, and redirect them to higher value markets.

BG continues to proceed with its asset divestment program. On Thursday, it announced it will sell its 60.1% interest in Comgas for \$1.8 billion. We value the deal at about 6 times 2012 Comgas EBITDA, which is in line with typical valuations for gas transmission assets. With the deal, BG

BG Group PLC BG. (XLON) | ★★★★★

Last Price	Fair Value	Consider Buy	Consider Sell	Uncertainty	Economic Moat™	Moat Trend™	Stewardship	Morningstar Credit Rating	Industry Group
1,364.00 GBX	2,000.00 GBX	1,400.00 GBX	2,700.00 GBX	Medium	Narrow	Stable	—	—	Oil & Gas - Integrated

will also remove consolidated debt from its balance sheet of \$1.1 billion, resulting in an overall reduction in net debt of \$2.9 billion.

With the Comgas sale, BG has reached agreements to divest \$3.3 billion worth of a targeted \$5 billion in assets, including its 40% stake in a Chilean regasification terminal for \$352 million. Additional sales will likely include its stake in Gujarat Gas in India and interests in gas-fired power plants in the Philippines. The sale of these assets will likely end BG's fully integrated model.

While we think Comgas will likely benefit from increased Brazilian natural gas production and greater adoption of natural gas domestically, BG is best focusing on its core E&P and LNG businesses, and redeploying capital to those higher-returning segments. BG is also looking for a buyer for TGGT, its pipeline joint-venture with Exco Resources XCO.

BG also announced continued exploration success. In Tanzania, it drilled its fourth consecutive successful exploration well, bringing its gross estimated recoverable

resources to 7 trillion cubic feet. BG plans to drill two to three more wells in the same exploration block. In April, an appraisal well drilled in Brazil confirmed the westerly extension of the Iara field. Also in Brazil, FPSO 2 and 3 continue to progress with construction, with both slated for startup in 2013.

Thesis 10 Feb 2012

BG Group's early entry into liquefied natural gas made the firm a leading global integrated natural gas player, positioning it to capitalize on growing global demand for natural gas. The next decade will see BG expand its LNG activities by developing its extensive gas resource in Australia. Meanwhile, a pre-eminent position in offshore Brazil should lead to high-quality oil production growth.

We think BG will continue to deliver attractive returns by executing its strategy of connecting its low-cost resource base to high-value markets. By using its own LNG infrastructure, BG gains flexibility and directs otherwise worthless gas to markets that generate maximum profitability. Full integration of the process, from reserve to burner tip, affords the company the ability to drive efficiencies, control costs, and capture value along the entire chain.

BG should also drive value by developing its attractive set of growth opportunities secured through many years of exploration success. We believe the most transformative could be its stake in Brazil's presalt offshore fields, where it is partnered with Petrobras PBR. In the last year, the company increased its reserve and production estimates for its Brazilian assets multiple times. Originally, BG expected its position in some of the most promising of the presalt discoveries could deliver about 3 billion barrels of reserves for the company. However, BG recently increased its estimated recoverable resources to 6 billion barrels of oil equivalent. More important, the company believes it can

recover these additional barrels with little incremental capital, thanks to the quality of the resource, therefore dramatically increasing their value.

BG's latest plans called for net production from Brazil of 600,000 barrels of oil equivalent per day by 2020. This marks the second guidance increase. Previously, plans called for 550,000 boe/d, an increase from initial guidance of 400,000 boe/d. Also, BG believes those plateau production levels should be achieved sooner and maintained longer, further enhancing its returns. Also, recent exploratory success and data from well tests have significantly reduced the risk of the play. Initial information from well tests revealed outstanding reservoir characteristics and higher-than-anticipated recovery rates, implying that a lower well count will be needed than initially planned. It is because of the reduced well count and anticipated debottlenecking of FPSOs that BG will not need to expend extra capital to recover the additional barrels. Also, new Brazilian oil and gas laws do not affect current concessions, leaving BG Group's current stakes unaffected by the new production sharing contract regime.

While production from Brazil ramps up, BG should see growth from operations in Australia, where it is tapping low-cost coal seam gas to add production and increase LNG volume. The result of the acquisition of Queensland Gas Company and Pure Energy, BG's entry into Australia marks the company's first significant investment in unconventional gas. The project initially calls for two LNG trains to start production in 2014 with likely expansion to a third in later years. Net plateau production of 210,000 boe/d should come toward the middle of the decade. Despite the competition from several LNG projects in Australia, BG has already secured customers for almost 10 million tons per year, more than the two LNG trains' 8.5 million ton annual output. Given the size of the resources in place, the demand underpins the likelihood of a third train. Though official sanctioning

may wait until cost inflation subsides.

As an international natural gas-focused company, BG is also investing in U.S. natural gas unconventional resources through a joint venture with EXCO Resources XCO. Through its agreement with EXCO, BG gains access to acreage in the prolific Haynesville and Marcellus shales and adds midstream assets that complement its current U.S. marketing operations. However, in light of recent low natural gas prices, BG decided to cut back drilling. As a result, it lowered its 2015 U.S. production guidance to 80,000 boe/d from 190,000 boe/d by 2015 previously. While the reduction will lower BG's growth rate over the next few years, we view the decision positively given the likelihood of uneconomical drilling that would have occurred otherwise. Additionally, BG maintains the flexibility to ramp-up drilling in the event of a price recovery.

Despite the reduced production volumes, BG is set to benefit from lower natural gas prices. Through recent supply agreements and its own plans to convert its Lake Charles regas facility into a liquefaction export terminal, BG has secured another source of low-cost gas for export to high-value markets via LNG. As a result, BG could be a net beneficiary of extended low gas prices in the U.S.

Valuation, Growth and Profitability 10 Feb 2012

We are maintaining our fair value estimate of to GBX 2,000 (assuming an exchange rate of \$1.58/GBP 1 as of Feb. 9) after updating our model with fourth-quarter results and guidance from the recent strategic update. Our fair value estimate implies an EV/EBITDA multiple of 9.3 times using our 2012 EBITDA forecast of \$12.7 billion.

We have lowered our five-year (2010-15) compound annual production growth rate to 11% from almost 14% because of the reduction in U.S. natural gas production. However, the key drivers of production remain the addition of volumes

Morningstar Analysis

from Australia and Brazil in the later years of our forecast. In 2011, production declined by almost 1% as a result of events in Egypt, Tunisia, and Australia, as well as numerous issues in the North Sea. However, long-term growth trends remain in place, in our opinion, and growth should accelerate in 2012 with the addition of six major projects. We assume higher profits from the LNG segment over our forecast period, thanks to the additional Australian volumes and anticipation of higher spot prices in a tighter market.

In our discounted cash flow model, our benchmark oil and gas prices are based on Henry Hub and Brent futures contracts for 2011-13. For natural gas, we use \$4.04 per thousand cubic feet in 2011, \$2.89 in 2012, and \$3.70 in 2013. For oil, we use \$110 per barrel in 2011, \$114 in 2012, and \$106 in 2013. We assume long-run oil prices for 2014 and 2015 of \$99 and \$102 per barrel and natural gas prices of \$6.50 and \$6.70 per mcf.

Scenario Analysis

In contrast to other large oil and gas firms, BG has slightly different exposure to oil and natural gas price movements. Its oil volumes are exposed directly to international oil price movements. However, some of the volumes, particularly in Kazakhstan, are not priced in line with international benchmarks because of lack of takeaway capacity and discounted sales into local markets. Its natural gas prices are not linked to Henry Hub pricing because they are sourced internationally and experience much less volatility. Also, much of BG's natural gas is sold as LNG, which typically is indexed to higher oil prices. The profits from these higher prices accrue to both the E&P segment and shipping and marketing segment. Despite this more complicated structure, we still use our price scenarios for oil and natural gas as we do with our other oil and gas firms.

In our high-case scenario, we assume 20% higher short-term oil and gas prices. Our 2012 EBITDA forecast in

this scenario is \$14.8 billion. Using the same EV/EBITDA multiple of about 9 times implied by our DCF valuation, we estimate BG should trade at around GBX 2,250 per share in this price scenario. Operating cash flow will still be insufficient in this scenario to cover spending, but should reduce necessary debt financing. While our EBITDA estimate does not reflect changes in any other segments in this analysis, the LNG segment should realize greater profits as well.

In our low-case scenario, we assume 20% lower short-term oil and gas prices. Our 2012 EBITDA forecast in this scenario is \$10.5 billion. Assuming BG garners the same multiple of about 9 times in this scenario, its shares could be worth GBX 1,550. In this scenario, we expect LNG profits would also fall, though given the bulk of profits are already locked in, the decline would be minimal.

Economic Moat

BG's strategy of connecting low-cost natural gas resources to high-value markets via LNG has resulted in the company delivering returns in excess of its cost of capital. As a result, we assign the company a narrow moat. BG's full integration along the gas chain from production to distribution affords the company the ability to drive efficiencies, control costs, and capture value at each phase. A central component of BG's strategy is flexibility. By participating in the global LNG trade, BG can identify the highest-value market at any time and divert its own production or contracted cargo to that location. The incremental value BG achieves accrues to both its E&P and LNG operations, supporting returns for both segments. At the same time, BG owns capacity at key LNG import terminals in the U.S., the U.K., and Chile, where it can land cargo at its own discretion, depending on current pricing. Also, LNG pricing is linked to crude oil prices, resulting in higher returns. BG participates further down the gas chain with ownership of natural gas distribution networks in Brazil and India through its transmission and

Morningstar Analysis

distribution segment. Given their difficulty to replicate, distribution assets and pipelines qualify for an economic moat. Most of BG's investment in the segment is tied to its majority interest in Comgas, Brazil's largest gas distribution company.

Moat Trend

Considering BG's current assets and its resource potential, we assign the company a stable moat trend and anticipate returns will continue to exceed the cost of capital. The nature of LNG operations ensures plateau production levels can be maintained for decades, delivering returns well into the future. Additionally, demand is expected to exceed planned LNG supply, which should lead to higher spot prices and allow BG to benefit from its global production and marketing operations. Also, concerns regarding carbon emissions favor natural gas for future energy generation, underpinning future demand.

BG plans to expand its production and LNG operations significantly with the addition of two LNG trains in Australia that use low-cost coal seam gas, which has little domestic demand. Compared with other operators in the region, BG is well ahead with development of its project, having already secured long-term supply contracts with energy companies in Japan and China. Given demand and resource potential, BG has additional opportunities to enhance returns by building a third LNG train, which should cost less, given the infrastructure already in place.

Perhaps the most compelling factor is BG's position in Brazil. We expect BG ultimately could realize more than 6 billion boe of reserves from its current concessions, the bulk of which should be oil volumes linked to Brent pricing. Thanks to early entry into the region, BG secured leases and terms that are no longer available to competitors because of recent changes in Brazilian oil laws. Production from offshore Brazil should also result in increased volumes of natural gas

available to Comgas. The availability of an uninterrupted supply of gas should allow Comgas to increase the industrial customer base as well as volumes.

Bulls Say/Bears Say

Bulls Say

- ▶ BG's partnership with Petrobras in Brazil's Santos Basin presalt fields could result in the recovery of more than 6 billion barrels of oil equivalent.
- ▶ BG's resources in Australia should allow for the eventual addition of a third LNG train.
- ▶ BG's stakes in Brazil's presalt fields are exempt from new legislation the government recently implemented.
- ▶ Natural gas is likely to be a preferred energy source as governments enact legislation to curb carbon levels.
- ▶ Past tumult with Russian gas supplies to Europe has caused concern and increased the value of providers of LNG, such as BG, to the continent.

Bears Say

- ▶ A glut of gas from new LNG projects and unconventional sources should depress prices and crimp margins in the near term.
- ▶ BG's low-cost resources could be compromised if host countries attempt to renegotiate contracts or change tax terms on producing companies.
- ▶ BG does not operate its prolific concessions in Brazil and is dependent on Petrobras for development. Petrobras could prioritize development of other fields, resulting in BG not realizing its production forecast.
- ▶ Discovery of unconventional gas resources in Europe or China could pose a threat to LNG viability and potentially result in a break with oil index pricing.

Financial Health

BG finished 2011 with a net debt/capital ratio of 26%, comparable with other large international oil and gas companies. However, debt issuance has increased in the last few years as capital spending outpaced operating cash flow. We expect this trend to continue until 2014-15, when project startups should increase cash flow.

Capital Structure

At the end of 2011, BG's debt balance stood at \$15.1 billion, up from \$9.7 billion a year earlier. However, BG still maintains more than comfortable interest coverage ratios, in our opinion. During the last two years, capital spending has exceeded operating cash flow, resulting in greater debt. We anticipate this trend to continue over the the next several years as spending in Brazil ramps up and the two-train LNG project in Australia is completed. BG expects capital spending of \$10.6 billion in 2012 and a little more than \$11 billion in 2013. Spending in Australia alone will total \$15 billion through 2014. We anticipate capital spending to remain around \$10 billion beyond 2014 as increased spending in Brazil is likely to offset reduced spending in Australia. As a result, net debt/capital has exceeded 25%, the level that management has stated as ideal. However, the higher debt probably will be temporary as BG realizes additional cash flow from its Australia LNG projects beginning in 2014. The cash contribution from the project should result in operating cash flow exceeding spending in 2015. Given the pending cash flow from Australia, it is unlikely BG will seek a partner to develop its Brazilian assets.

In 2010, the company sold assets, including the bulk of its power generation business, netting proceeds of about \$1.8 billion. Asset sales slowed in 2011, but BG expects to resume divestitures targeting \$5 billion worth over the next two years. Asset sales will primarily come from the transmission and distribution segment. Proceeds of any

Credit Analysis

future sales probably will go toward supporting capital spending. Addition of other concessions in Brazil is unlikely, given that the financial terms have changed and the play is largely derisked. Previously, BG planned to spend about \$2 billion for follow-on acquisitions in the U.S. through 2012. Despite the low prices, the company will still likely add acreage if attractive opportunities are available. A decision to proceed with a third train in Australia would probably result in higher capital spending, but that is unlikely to occur for several years.

Enterprise Risk

As an oil and gas producer, BG's main risks include falling prices. Although oil prices are somewhat protected by OPEC, there is no similar influence in the regional gas markets on which BG relies more. Weakening global economies and a glut of gas from domestic resources or other LNG providers could destroy margins. Integrated oil supermajors are undertaking projects that will add to global LNG supply, while cheap Russian gas could displace LNG volumes in Europe and China. Also, if the link between LNG and oil prices is broken, BG could see realizations and profits fall. BG also faces the geopolitical risk normally associated with operating in politically unstable countries, where damage to assets or renegotiation of contract terms may harm profitability.

Stewardship: — 15 Dec 2011

BG is led by chairman Robert Wilson and chief executive Frank Chapman. As is common corporate-governance practice in the U.K., the chairman and chief executive roles are separate. Wilson joined BG in 2002 as a non-executive director and ascended to chairman in 2004. Previously he was with Rio Tinto RIO, where he served as chairman and chief executive. However, Wilson plans on retiring in May 2012 and will be succeeded by former Schlumberger SLB CEO Andrew Gould. We like the appointment as it adds an experienced and successful oil and gas executive to BG's board. Chapman rose to CEO in 2000, having been with the company since 1996. He previously held roles at BP BP and Shell RDS.A. We like that the CEO and other senior managers have extensive oil and gas or resources-related experience with other firms. BG recently bolstered the management team with the addition of Fabio Barbosa as CFO. Barbosa previously was CFO at Vale VALE and served in the Brazilian Ministry of Finance. His experience in Brazil should serve BG well as the firm's activity in the country increases.

The company gets credit for an emphasis on variable compensation and performance-related incentives based on both short- and long-term performance. Performance measures for last year consisted of return on average capital employed, earnings per share, and a health, safety, and environment scorecard. Long-term performance rewards come in the form of performance share awards that vest over time based on total shareholder return versus a group of peers. We like this last part of compensation, as it clearly aligns management and shareholders and keeps the focus on return beyond the current year. Several years ago, BG delisted from the NYSE because of the onerous cost of U.S. disclosure policy. While the company no longer files a 20-F, its financial disclosures are extensive. It also still publishes oil and gas operating and reserve metrics based on Securities and Exchange Commission requirements.

Analyst Notes

BG Confirms Long-Term Potential With Strategic Update

09 Feb 2012

BG Group BG. reported fourth-quarter results and held its annual strategic update on Thursday. While the quarterly results were largely uneventful, the strategic update contained several developments that reinforce our long-term thesis on BG as the integrated with the most attractive growth prospects. Foremost, BG upwardly revised its long-term Brazilian production forecast by 50 mboe/d to 600 mboe/d by 2020. We previously thought an upward revision was likely given the positive news flow from BG concerning its operations there over the past year, most notably the doubling of its recoverable reserve estimate, and were encouraged as a result. Despite increasing its estimated Brazilian production, BG maintained its previous total 2020 midpoint production forecast of 1.4 mmboe/d as a result of lowering its forecast for U.S. production in light of low gas prices. Specifically, BG lowered its estimated 2015 U.S. production by 110 mboe/d to 80 mboe/d as it plans to reduce its U.S. rig count to eight rigs from 35 running in 2011. As a result, anticipated total 2015 production will be slightly above 1.0 mmboe/d, compared with almost 1.2 mmboe/d previously. While the reduction will lower BG's growth rate over the next few years, we view the decision positively given the likelihood of uneconomical drilling that would have occurred otherwise. Additionally, BG maintains the flexibility to ramp up drilling in the event of a price recovery. In the event gas prices remain low, BG should benefit nonetheless as it then would have a low-cost source of supply for its LNG segment thanks to recent agreements locking in future export volumes.

As for its LNG segment, BG raised its 2012 profit guidance to between \$2.6 billion and \$2.8 billion from \$1.9 billion to \$2.2 billion previously. This is the second year BG raised guidance after previously locking in profits in anticipation of a soft market. While BG's original forecast of a soft market through 2012 has proved inaccurate, its ability to flex

supplies to capture additional profits beyond its hedged volumes demonstrates the flexibility of its portfolio, which should serve it well in the future. With the tight market expected to continue for the next few years, BG should benefit from its substantially unhedged volumes in 2013 and beyond. At the same time, BG will see its LNG contracted volumes rise. During the strategy update, BG reiterated its confidence in achieving contract volumes of 20 mtpa by 2015 and 30 mtpa by 2020 from about 13 mtpa in 2011.

Other positive news included BG's plans to high grade its portfolio by divesting \$5 billion worth of assets, primarily from its transmission and distribution segment. Also, for 2012, BG reported a reserve replacement ratio of 251% (245% organic) and finding and development costs of \$13/boe.

Fourth-quarter and full-year results were in line with expectations, with the exception of a few key times. LNG operating profit of \$2.6 billion exceeded management's full-year revised forecast of \$2.4 billion. Meanwhile transmission and distribution operating profit of \$507 million fell short of our forecasts because of the timing of cost recovery. Also total production declined almost 1% for the full year versus our expectation of slight increase as difficulties on the North Sea persisted into the fourth quarter. However, those issues are largely resolved or were temporary (weather related). Also, outside the North Sea, volumes increased 5% in 2011. BG exited 2011 producing 650 mboe/d and expects to exit 2012 producing 750 mboe/d with six major project startups scheduled during the year. The exit rate implies a slightly lower growth rate in 2012 than we previously forecast due to the timing of the project additions and reduction in U.S. natural gas production. Capital spending is expected to remain flat at \$10.6 billion as a result of asset divestitures. We plan to incorporate the new 2012 and long-term guidance into our model, but do not expect any revisions to our fair value estimate given that

our long-term expectations remain intact.

Agreement on Karachaganak Among the Positive Recent Developments for BG 21 Dec 2011

BG Group BRGY, BG. announced this week that it and the partners in the Karachaganak gas condensate field had reached a \$3 billion agreement with the Republic of Kazakhstan that resolves long-standing ownership and tax issues. While the agreement dilutes BG's stake in the project somewhat (32.5% to 29.25%), we think the agreement is a net positive as it eliminates a major roadblock that has prevented future development plans from proceeding and alleviates investor uncertainty about one of the company's major production assets. Karachaganak is a key asset for BG, contributing about 16% of total 2010 production (37% of total liquids, 8% of total natural gas). The agreement follows other recent developments that we think are positive for BG.

Management raised LNG profit guidance: As we expected, third-quarter LNG earnings exceeded management forecast thanks to strong market conditions and a record number of cargo diversions to Asia. As a result, management raised its full-year LNG operating profit guidance to \$2.4 billion from \$1.9 billion-\$2.2 billion. While the same guidance remains intact for 2012, we think BG could once again outperform thanks to its flexible portfolio and if market conditions hold.

Reduction in Haynesville drilling is a net positive: BG's joint venture partner Exco Resources XCO recently announced its 2012 capital budget, which included plans to reduce drilling in the Haynesville. While this likely will reduce some of BG's volume growth in 2012, we think it is a net positive given the depressed gas prices has likely led to uneconomical drilling.

We expect fourth-quarter production to rebound: BG's third-quarter production numbers were a bit weak because of the slow startup of North Sea production after extensive maintenance, but volumes have since returned to normal levels. We expect fourth quarter production to be more representative of BG's long-term growth. We continue to forecast double-digit production growth in 2013.

The February strategy meeting could act as the next catalyst: BG likely will hold a strategic update in February. This meeting is typically newsworthy (positively), and we expect the same in 2012. The update could include additional details on Brazil, plans for the next phases of Karachaganak, or an announcement of a third train in Australia.

BG Group and Partners Reach Agreement on Karachaganak, Clearing Way for Expansion 14 Dec 2011

BG Group BRGY announced on Wednesday that it and the partners in the Karachaganak gas condensate field had reached an agreement with the Republic of Kazakhstan that resolves long-standing ownership and tax issues and should clear the way for future development of the field. As part of the agreement, Kazakhstan's KazMunaiGas will acquire a 10% interest in the project. Each partner will transfer 10% of its interest in the project to KMG for a total pretax consideration of \$3 billion, of which \$2 billion will be paid in cash. The remaining \$1 billion is a noncash consideration and consists of final and irrevocable settlement of cost recovery and other claims and an allocation of an additional 2 million tonnes per annum in capacity for the Karachaganak project in the Caspian Pipeline Consortium export pipeline. The partners will be responsible for paying tax of \$1 billion on the total consideration. Also, the partners will make a \$1 billion loan to KMG that will be repaid over a three-year period.

As a result of the agreement, BG Group will see its interest

Analyst Notes

in the project fall to 29.25% from 32.5%, but it will remain joint operator with Eni E . Other partners' interest will be reduced as well: Eni 29.25% (previously 32.5%), Chevron CVX 18% (20%), and Lukoil 13.5% (15%). An agreement was also reached on all tax affairs through the end of 2009. Karachaganak is a key asset for BG, contributing about 16% of total 2010 production (37% of total liquids, 8% of total natural gas). We view the agreement favorably, given that it not only eliminates a major roadblock that has prevented development plans from proceeding, but also should alleviate the uncertainty investors may have had about the risks of one of BG's major production assets. We expect additional updates and details on future expansion will come next year as BG presents its annual strategic update.

Research Methodology for Valuing Companies

Components of Our Methodology

- ▶ Economic Moat™ Rating
- ▶ Moat Trend™ Rating
- ▶ Moat Valuation
- ▶ Three-Stage Discounted Cash Flow
- ▶ Weighted Average Cost of Capital
- ▶ Fair Value Estimate
- ▶ Scenario Analysis
- ▶ Uncertainty Ratings
- ▶ Margin of Safety
- ▶ Consider Buying/Selling
- ▶ Stewardship Rating

The Morningstar Rating for stocks identifies companies trading at a discount or premium to our analysts' assessment of their fair value. A number of components drive this rating: (1) our assessment of the firm's economic moat, (2) our estimate of the stock's intrinsic value based on a discounted cash-flow model, (3) the margin of safety bands we apply to our Fair Value Estimate, and (4) the current stock price relative to our fair value estimate.

The concept of the Morningstar Economic Moat™ Rating plays a vital role not only in our qualitative assessment of a firm's investment potential, but also in our valuation process. We assign three moat ratings—none, narrow, or wide—as well as the Morningstar Moat Trend™ Rating—positive, stable, or negative—to each company we cover. There are two major requirements for firms to earn either a narrow or wide moat rating: (1) the prospect of earning above-average returns on capital; and (2) some competitive edge that prevents these returns from quickly eroding. The assumptions we make about a firm's moat determine the length of “economic outperformance” that we assume in the latter stages

of our valuation model. We also quantify the value of each firm's moat, which represents the difference between a firm's enterprise value and the value of the firm if no future net investment were to occur. Said differently, moat value identifies the value generated by the firm as a result of any future net new investment. Our Moat Trend Rating reflects our assessment of whether each firm's competitive advantage is either getting stronger or weaker, since we think of moats as dynamic, rather than static.

At the heart of our valuation system is a detailed projection of a company's future cash flows. The first stage of our three-stage discounted cash flow model can last from 5 to 10 years and contains numerous detailed assumptions about various financial and operating items. The second stage of our model—where a firm's return on new invested capital (RONIC) and earnings growth rate implicitly fade until the perpetuity year—can last anywhere from 0 years (for no-moat firms) to 20 years (for wide-moat companies). In our third stage, we assume the firm's RONIC equals its weighted average cost of capital, and we calculate a continuing value using a standard

perpetuity formula. In deciding on the rate at which to discount future cash flows, we ignore stock-price volatility. Instead, we rely on a system that measures the estimated volatility of a firm's underlying future free cash flows, taking into account fundamental factors such as the diversity of revenue sources and the firm's fixed cost structure.

We also employ a number of other tools to augment our valuation process, including scenario analysis, where we assess the likelihood and performance of a business under different economic and firm-specific conditions. Our analysts typically model three to five scenarios for each company we cover, stress-testing the model and examining the distribution of resulting fair values.

The Morningstar Uncertainty Rating captures the range of these potential fair values, based on an assessment of a company's future sales range, the firm's operating and financial leverage, and any other contingent events that may impact the business. Our analysts use this range to assign an appropriate margin of safety—or the discount/premium

to a fair value we apply in setting our consider buying/consider selling prices. Firms trading below our consider-buying prices receive our highest rating of five stars, whereas firms trading above our consider-selling prices receive our lowest rating of one star.

Our corporate Stewardship Rating represents our assessment of management's stewardship of shareholder capital, with particular emphasis on capital allocation decisions. Analysts consider companies' investment strategy and valuation, financial leverage, dividend and share buyback policies, execution, compensation, related party transactions, and accounting practices. Corporate governance practices are only considered if they've had a demonstrated impact on shareholder value. Analysts assign one of three ratings: "Exemplary," "Standard," and "Poor." Analysts judge stewardship from an equity holder's perspective. Ratings are determined on an absolute basis. Most companies will receive a Standard rating, and this is the default rating in the absence of evidence that managers have made exceptionally strong or poor capital allocation decisions.

Morningstar Margin of Safety and Star Rating Bands

* Occasionally a stock's uncertainty will be too high for us to estimate, in which case we label it Extreme.

Morningstar's Approach to Rating Corporate Credit

- Offers a proprietary measure of the credit quality of companies on our coverage list.
- Encapsulates our in-depth modeling and quantitative work in one letter grade.
- Allows investors to rank companies by each of the four underlying components of our credit ratings, including both analyst-driven and quantitative measures.
- Provides access to all the underlying forecasts that go into the rating, available through our institutional service.

Purpose

The Morningstar Corporate Credit Rating measures the ability of a firm to satisfy its debt and debt-like obligations. The higher the rating, the less likely we think the company is to default on these obligations.

The Morningstar Corporate Credit Rating builds on the modeling expertise of our securities research team. For each company, we publish:

- Five years of detailed pro-forma financial statements
- Annual estimates of free cash flow
- Annual forecasts of return on invested capital
- Scenario analyses, including upside and downside cases
- Forecasts of leverage, coverage, and liquidity ratios for five years
- Estimates of off balance sheet liabilities

These forecasts are key inputs into the Morningstar Corporate Credit Rating and are available to subscribers at select.morningstar.com.

Methodology

We feel it's important to perform credit analysis through different lenses—qualitative and quantitative, as well as fundamental and market-driven. We therefore evaluate each company in four broad categories.

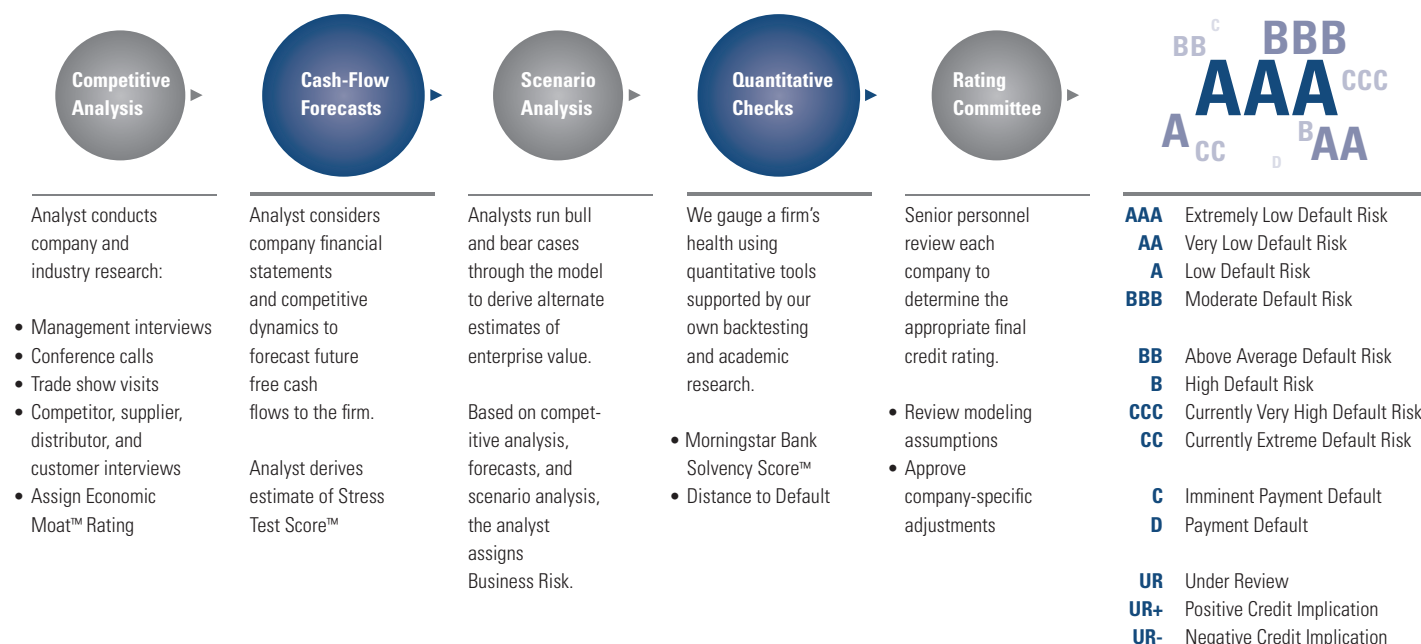

Business Risk

Business Risk captures the fundamental uncertainty around a firm's business operations and the cash flow generated by those operations. Key components of the Business Risk rating include the Morningstar Economic Moat™ Rating and the Morningstar Uncertainty Rating.

Cash Flow Cushion™

Morningstar's proprietary Cash Flow Cushion™ ratio is a fundamental indicator of a firm's future financial health. The measure reveals how many times a company's internal cash generation plus total excess liquid cash will cover its debt-like contractual commitments over the next five years. The Cash Flow Cushion acts as a predictor of financial distress, bringing to light potential refinancing, operational, and liquidity risks inherent to the firm.

Morningstar Research Methodology for Determining Corporate Credit Ratings

Morningstar's Approach to Rating Corporate Credit

The advantage of the Cash Flow Cushion ratio relative to other fundamental indicators of credit health is that the measure focuses on the future cash-generating performance of the firm derived from Morningstar's proprietary discounted cash flow model. By making standardized adjustments for certain expenses to reflect their debt-like characteristics, we can compare future projected free cash flows with debt-like cash commitments coming due in any particular year. The forward-looking nature of this metric allows us to anticipate changes in a firm's financial health and pinpoint periods where cash shortfalls are likely to occur.

Morningstar Solvency Score™

The Morningstar Solvency Score™ is a quantitative score derived from both historical and forecasted financial ratios. It includes ratios that focus on liquidity (a company's ability to meet short term cash outflows), profitability (a company's ability to generate profit per unit of input), capital structure (how does the company finance its operations), and interest coverage (how much of profit is used up by interest payments).

Distance to Default

The Distance to Default rating is a quantitative, market-based measure of a company's current financial health. (Distance to Default serves as the basis for Morningstar's Financial Health Grade.) The underlying model treats the equity of a firm as a call option on that firm's assets. Based on estimates of asset volatility and the Black-Scholes option-pricing model, we can estimate the likelihood that the value of the company's assets falls below the value of its liabilities, implying likely default.

For each of these four categories, we assign a score, which we then translate into a descriptive rating along the scale of Very Good / Good / Fair / Poor / Very Poor.

Overall Credit Rating

The four component ratings roll up into a single preliminary credit rating. To determine the final credit rating, a credit committee of at least five senior research personnel reviews each preliminary rating.

We review credit ratings on a regular basis and as events warrant. Any change in rating must be approved by the Credit Rating Committee.

Investor Access

Morningstar Corporate Credit Ratings are available on Morningstar.com. Our credit research, including detailed cash-flow models that contain all of the components of the Morningstar Corporate Credit Rating, is available to subscribers at select.morningstar.com.

Research Fact Sheet
Gas & Electric Utilities

Michael McGowan, CA, CFA
(416) 359-5807
Michael.McGowan@bmo.com
Assoc: Mark Laing, CA, CFA

Company Description – Fortis Inc. (Fortis) is a publicly listed holding company with four key businesses: electric utility operations, regulated natural gas distribution, non-regulated electric power generation and non-utility property activities. Gas and electric utility operations include Newfoundland Power (100%), Maritime Electric (100%, PEI), Fortis Ontario (100%), Belize Electricity (70.1%), Caribbean Utilities (59.5%, Grand Cayman Island), Turks

and Caicos (100%), FortisAlberta (100%), FortisBC (100%) and the Terasen Gas Companies (100%, British Columbia).
Website: fortisinc.com

Recent Results – Fortis reported Q2/10 EPS of \$0.32, which was in line with our estimate of \$0.33 and the First Call Mean of \$0.32 (range \$0.30–0.33). Results from Fortis' individual business segments were generally consistent with

This report was prepared by an analyst(s) employed by BMO Nesbitt Burns Inc., and who is (are) not registered as a research analyst(s) under FINRA rules. For disclosure statements, including the Analyst's Certification, please refer to pages 3 to 5.

our estimates, but corporate costs were slightly higher than anticipated.

Corporate Developments – On August 26, 2010, Fortis announced that it is part of a partnership that is proposing to construct a 335 MW expansion of the Waneta Dam, located near Trail, B.C. The capital cost of the project is estimated at \$900 million, and the facility is expected to be placed in service during the spring of 2015. Fortis owns a 51% interest in the partnership and will be responsible for operating and maintaining the facility once it is placed into service. Revenues from the facility are expected to be largely capacity-based, which should reduce hydrological risk associated with the facility.

On July 28, 2010, the Accounting Standards Board (AcSB) issued an exposure draft proposing that qualifying entities with rate-regulated operations may elect to defer the adoption of International Financial Reporting Standards (IFRS) until reporting periods beginning on or after January 1, 2013. The Canadian AcSB is of the view that it is prudent for rate-regulated entities to be given the

opportunity to delay the adoption of IFRS in light of the fact that the International Accounting Standards Board has not finalized deliberations on the recognition, measurement and disclosure of regulatory assets and liabilities. If the exposure draft is ratified, Fortis will elect to defer the adoption of IFRS until 2013.

Forecasts – Our diluted EPS estimates are \$1.65 in 2010, \$1.77 in 2011 and \$1.84 in 2012.

Valuation – Our target price of \$34 is based on a weighted valuation approach: 15x diluted 2012E EPS of \$1.84 (12.5%); 1.75x 2012E BVPS of \$20.92 (12.5%); and a target yield of 3.50%, assuming 2012E dividends per share of \$1.20 (75%).

Recommendation – We believe that Fortis' shares are attractively valued, considering the company's relatively low-risk, diversified business model. Our rating is Outperform. Member of Top 15 Income and Large Cap stock selections.

Ratings and Sector Key

We use the following ratings system definitions:

OP = Outperform - Forecast to outperform the market;

Mkt = Market Perform - Forecast to perform roughly in line with the market;

Und = Underperform - Forecast to underperform the market;

(S) = speculative investment;

NR = No rating at this time;

R = Restricted – Dissemination of research is currently restricted.

Market performance is measured by a benchmark index such as the S&P/TSX Composite Index, S&P 500, Nasdaq Composite, as appropriate for each company. BMO Capital Markets eight Top 15 lists guide investors to our best ideas according to different objectives (Canadian large, small, growth, value, income, quantitative; and US large, US small) have replaced the Top Pick rating.

Updating Valuation Multiples; Outperform Rating Maintained

Event

On October 19, we revised our earnings estimates and P/E and P/BV valuation multiples for Emera Inc. following a meeting with management. In order to be consistent with our sector valuations, we are also revising our P/E valuation multiples for Fortis Inc.

Impact

Positive.

Forecasts

There are no changes to our forecasts.

Valuation

Our revised \$35 target price (previously \$34) is based on a weighted valuation approach: 18x (previously 15x) 2012E EPS of \$1.84 (12.5%), 1.75x 2012E BVPS of \$20.92 (12.5%) and a target yield of 3.50%, assuming 2012E dividends per share of \$1.20 (75%). We have revised our target P/E valuation multiple to be consistent with the average P/E multiple at which Fortis traded during 2005–2007 (range 17–20x P/E).

Recommendation

At current levels, we believe that Fortis's shares are attractively valued considering the company's low-risk, diversified business model. Our rating is Outperform.

IMPORTANT DISCLOSURES

Analyst's Certification

I, Michael McGowan, CA, CFA, hereby certify that the views expressed in this report accurately reflect my personal views about the subject securities or issuers. I also certify that no part of my compensation was, is, or will be, directly or indirectly, related to the specific recommendations or views expressed in this report.

Analysts who prepared this report are compensated based upon (among other factors) the overall profitability of BMO Capital Markets and their affiliates, which includes the overall profitability of investment banking services. Compensation for research is based on effectiveness in generating new ideas and in communication of ideas to clients, performance of recommendations, accuracy of earnings estimates, and service to clients.

Company Specific Disclosure

Disclosure 1: BMO Capital Markets has undertaken an underwriting liability with respect to this issuer within the past 12 months.

Disclosure 2: BMO Capital Markets has provided investment banking services with respect to this issuer within the past 12 months.

Disclosure 4: BMO Capital Markets or an affiliate has received compensation for investment banking services from this issuer within the past 12 months.

Disclosure 5: BMO Capital Markets or an affiliate received compensation for products or services other than investment banking services within the past 12 months.

Disclosure 6: This issuer is a client (or was a client) of BMO NB, BMO Capital Markets Corp., BMO CM Ltd. or an affiliate within the past 12 months: Investment Banking Services & Non-Securities Related Services.

Methodology and Risks to Price Target/Valuation

Methodology: Our target price is based on a weighted valuation approach: 18x diluted 2012E EPS (12.5%); 1.75x 2012E BVPS (12.5%) and a target yield of 3.50% based on 2012E dividends per share (75%).

Risks: Operations are subject to complex regulation by a variety of provincial, state and federal (Canada, Cayman Islands & Belize) agencies. Changes in regulation may adversely affect performance.

Ratings and Sector Key

We use the following ratings system definitions:

OP = Outperform - Forecast to outperform the market;

Mkt = Market Perform - Forecast to perform roughly in line with the market;

Und = Underperform - Forecast to underperform the market;

(S) = speculative investment;

NR = No rating at this time;

R = Restricted – Dissemination of research is currently restricted.

Market performance is measured by a benchmark index such as the S&P/TSX Composite Index, S&P 500, Nasdaq Composite, as appropriate for each company. BMO Capital Markets eight Top 15 lists guide investors to our best ideas according to different objectives (Canadian large, small, growth, value, income, quantitative; and US large, US small) have replaced the Top Pick rating.

Q3 Comparable Earnings in Line

Impact

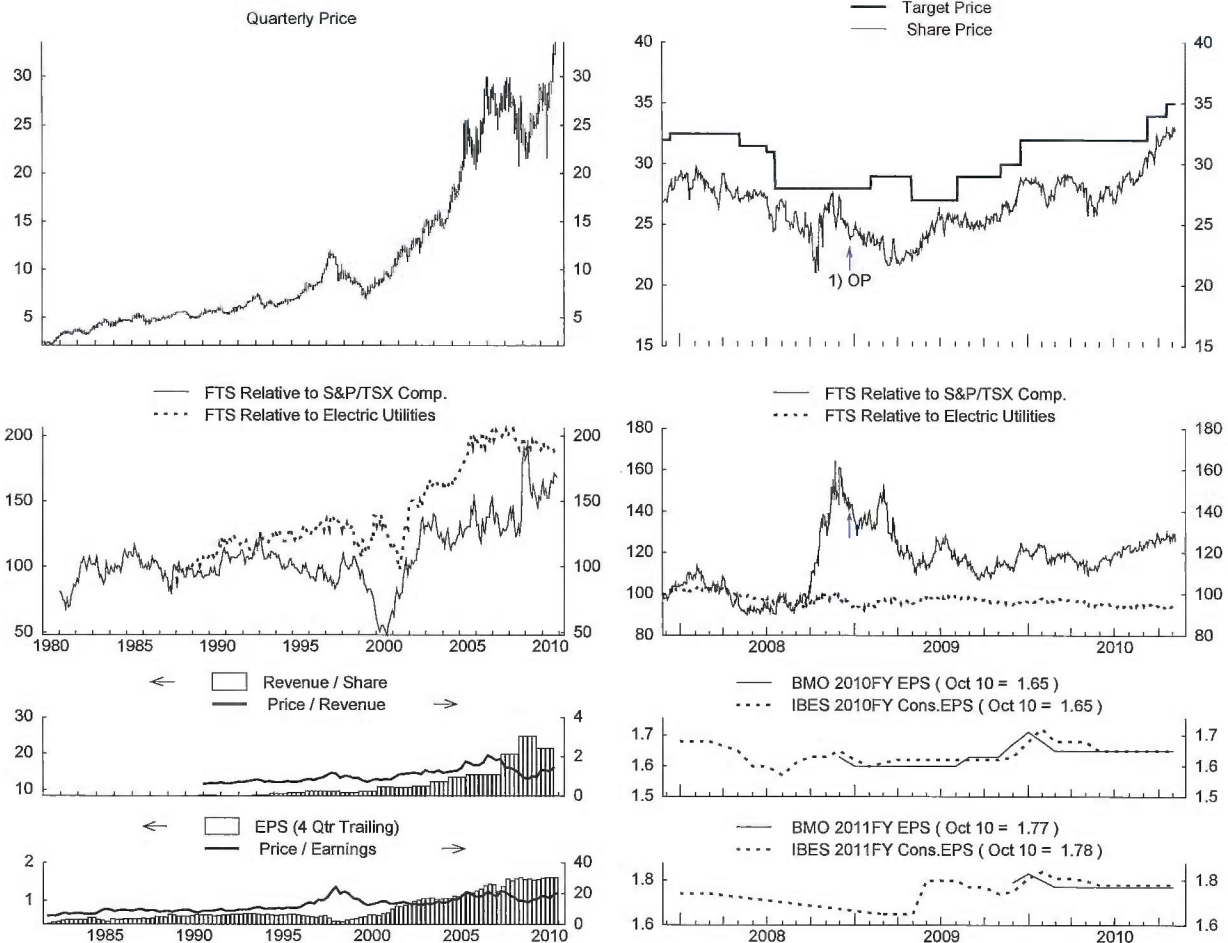

Neutral

Details & Analysis

Fortis reported Q3/10 GAAP EPS of \$0.26. After adjusting for the recovery of a \$4 million expense recorded in Q4/09 regarding the cost of converting portions of the distribution system at Terasen Gas Whistler to utilize natural gas instead of propane, comparable EPS were \$0.24. This is consistent with our estimate of \$0.23 and the First Call Mean of \$0.24 (range \$0.23–0.26). The majority of the company's business segments appear to be performing well. Earnings from most of the business segments either met or exceeded our estimates, with earnings at FortisAlberta and FortisGeneration being particularly strong. There were no material changes to Fortis's capital expenditure program. The company expects to invest \$1.1 billion of capital in 2010 (year-to-date spending was \$703 million) and approximately \$5.5 billion during 2010-2014. Overall, this appeared to be a steady quarter. We continue to believe that Fortis's shares are attractively valued considering the company's relatively low-risk business model.

This report was prepared by an analyst(s) employed by BMO Nesbitt Burns Inc., and who is (are) not registered as a research analyst(s) under FINRA rules. For disclosure statements, including the Analyst's Certification, please refer to pages 2 to 5.

IMPORTANT DISCLOSURES**Analyst's Certification**

I, Michael McGowan, CA, CFA, hereby certify that the views expressed in this report accurately reflect my personal views about the subject securities or issuers. I also certify that no part of my compensation was, is, or will be, directly or indirectly, related to the specific recommendations or views expressed in this report.

Analysts who prepared this report are compensated based upon (among other factors) the overall profitability of BMO Capital Markets and their affiliates, which includes the overall profitability of investment banking services. Compensation for research is based on effectiveness in generating new ideas and in communication of ideas to clients, performance of recommendations, accuracy of earnings estimates, and service to clients.

Company Specific Disclosure

Disclosure 1: BMO Capital Markets has undertaken an underwriting liability with respect to this issuer within the past 12 months.

Disclosure 2: BMO Capital Markets has provided investment banking services with respect to this issuer within the past 12 months.

Disclosure 4: BMO Capital Markets or an affiliate has received compensation for investment banking services from this issuer within the past 12 months.

Disclosure 5: BMO Capital Markets or an affiliate received compensation for products or services other than investment banking services within the past 12 months.

Disclosure 6: This issuer is a client (or was a client) of BMO NB, BMO Capital Markets Corp., BMO CM Ltd. or an affiliate within the past 12 months: Investment Banking Services & Non-Securities Related Services.

Methodology and Risks to Price Target/Valuation

Methodology: Our target price is based on a weighted valuation approach: 18x diluted 2012E EPS (12.5%); 1.75x 2012E BVPS (12.5%) and a target yield of 3.50% based on 2012E dividends per share (75%).

Risks: Operations are subject to complex regulation by a variety of provincial, state and federal (Canada, Cayman Islands & Belize) agencies. Changes in regulation may adversely affect performance.

Ratings and Sector Key

We use the following ratings system definitions:

OP = Outperform - Forecast to outperform the market;

Mkt = Market Perform - Forecast to perform roughly in line with the market;

Und = Underperform - Forecast to underperform the market;

(S) = speculative investment;

NR = No rating at this time;

R = Restricted – Dissemination of research is currently restricted.

Market performance is measured by a benchmark index such as the S&P/TSX Composite Index, S&P 500, Nasdaq Composite, as appropriate for each company. BMO Capital Markets eight Top 15 lists guide investors to our best ideas according to different objectives (Canadian large, small, growth, value, income, quantitative; and US large, US small) have replaced the Top Pick rating.

Another Steady Quarter: Q3/10 Results in Line

Event

Fortis reported Q3/10 GAAP EPS of \$0.26. After adjusting for the recovery of a \$4 million expense recorded in Q4/09 regarding the cost of converting portions of the distribution system at Terasen Gas Whistler to utilize natural gas instead of propane, comparable EPS were \$0.24. This is consistent with our estimate of \$0.23 and the First Call Mean of \$0.24 (range \$0.23–0.26). Earnings from most of the business segments either met or exceeded our estimates, with earnings at FortisAlberta, FortisBC and FortisGeneration being particularly strong and offsetting slightly higher-than-expected corporate expenses.

Impact

Neutral.

Forecasts

There are no changes to our EPS estimates; however, we are increasing our dividend estimates slightly in order to better align our forecast payout ratios for 2011 and 2012 with payout ratios experienced in 2009-2010E. Our 2011 DPS increases to \$1.18 from \$1.16 and our 2012E DPS estimate increases to \$1.24 from \$1.20.

Valuation

Our \$35.50 (previously \$35.00) target price is based on a weighted valuation approach: 18x (previously 15x) 2012E diluted EPS of \$1.84 (12.5%), 1.75x 2012E BVPS of \$20.78 (12.5%) and a target yield of 3.50%, assuming 2012E dividends per share of \$1.24 (75%).

Recommendation

At current levels, we believe that Fortis's shares are attractively valued considering the company's low-risk, diversified business model. Our rating is Outperform.

Changes

Quarterly EPS
 Q4/10E \$0.54 to \$0.53
Target
 \$35.00 to \$35.50

Another Steady Quarter – Q3/10 Results in Line

Fortis reported Q3/10 GAAP EPS of \$0.26. After adjusting for the recovery of a \$4 million expense recorded in Q4/09 regarding the cost of converting portions of the distribution system at Terasen Gas Whistler to utilize natural gas instead of propane, comparable EPS were \$0.24. This is consistent with our estimate of \$0.23 and the First Call Mean of \$0.24 (range \$0.23–0.26). Earnings from most of the business segments either met or exceeded our estimates, with earnings at FortisAlberta, FortisBC and FortisGeneration being particularly strong and offsetting slightly higher than expected corporate expenses.

Fortis has historically grown through acquisition and its last major transaction was the acquisition of the Terasen Gas utilities, which was completed in May 2007. Now that financial markets have stabilized, we would expect Fortis to continue to review potential acquisition candidates, with the most likely targets regulated utility companies operating in the U.S. Absent an acquisition, we believe that Fortis will continue to advance its capital expenditure program and seek out accretive greenfield/brownfield development opportunities. The company's announcement in late August that it had acquired a 51% interest in the partnership responsible for constructing the 335 MW Wanteta Dam expansion in Trail, BC, is a good example of Fortis developing projects that complement its regulated utility operations.

There are no changes to the company's expenditure program. Fortis expects to invest \$1.1 billion of capital in 2010 and approximately \$5 billion during 2010–2014. Although the company has not finalized its capital expenditure budgets for 2011, we expect 2011E capital expenditures to be consistent with 2010 levels.

Our \$35.50 (previously \$35.00) target price is based on a weighted valuation approach: 18x (previously 15x) 2012E diluted EPS of \$1.84 (12.5%), 1.75x 2012E BVPS of \$20.78 (12.5%) and a target yield of 3.50%, assuming 2012E dividends per share of \$1.24 (75%). The slight increase to our target price was driven by revisions to our dividend outlook.

We believe that Fortis's shares are attractively valued considering the company's relatively low-risk, diversified business model. Our rating is Outperform.

Q3 Results

As set out in Table 1, on a comparable basis, net income increased by 13.9% in Q3/10 versus Q3/09. In order to present results on a comparable basis, Q3/10 GAAP income was adjusted for the recovery of a \$4 million expense recorded in Q4/09 regarding the cost of converting portions of the distribution system at Terasen Gas Whistler to utilize natural gas instead of propane. Since we normalized earnings for this expense in Q4/09, in order to be consistent we have adjusted Q3/10 earnings to exclude the recovery.

Source: BMO Capital Markets, Company Reports

A discussion of the operating performance of each business segment follows below.

Regulated Gas Utilities – Terasen Gas Companies

The adjusted Q3/10 net loss of \$9 million from Terasen Gas was greater than our estimate of a \$5.9 million loss and a net loss of \$3 million in Q3/09. The increased loss in Q3/10 was primarily the result of lower gas volumes during the quarter and increased operating and maintenance expenses at Terasen Gas Inc.

Regulated Electric Utilities – FortisAlberta

Q3/10 net income of \$19 million was greater than our estimate of \$17.4 million and Q3/09 net income of \$15 million.

Earnings in Q3/10 benefitted from an increase in customer distribution rates arising from the 2009 Alberta Utilities Commission (AUC) Generic Cost of Capital Hearing, which increased FortisAlberta's allowed ROE to 9% from 8.51% and increased the company's deemed equity thickness to 41% from 37%.

During the quarter, FortisAlberta recorded a revenue accrual of \$22 million (with \$14 million of the total relating to H1/10) to reflect higher approved rates associated with a regulatory decision issued for its 2010–2011 rate filing. The revenue increase will offset rising costs associated with rate base growth (amortization, operating expense and financing charges) and is not expected to significantly increase earnings. The rate increase, however, will improve cash flow at FortisAlberta.

Regulated Electric Utilities – FortisBC

Q3/10 net income of \$11 million was greater than Q3/09 net income of \$9 million and our estimate of \$8.6 million. Higher revenues due to the increase in customer electricity rates were partially offset by increased operating costs and lower electricity sales due to unfavourable weather conditions.

Regulated Electric Utilities – Newfoundland Power

Q3/10 net income of \$8 million was consistent with our estimate of \$8 million and slightly greater than Q3/09 net income of \$7 million. Newfoundland Power appears to be having a strong year. Reported net income was consistent with our estimate, despite additional operating costs of approximately \$2 million, which were incurred to repair damage caused by Hurricane Igor in September.

Regulated Electric Utilities – Caribbean

The earnings contribution from the Caribbean business segment was \$8 million in Q3/10 versus our estimate of \$8.6 million and Q3/09 net income of \$7 million. The increase in Q3/10 earnings was largely driven by a \$1 million deferral of previously expensed business taxes at Belize Electricity, which are expected to be collected in future rates.

Unregulated – Fortis Generation

Fortis Generation reported net income of \$9 million, which was greater than our estimate of \$5.7 million and Q3/09 net income of \$4 million. The difference between actual and expected results was due to a combination of increased production in Belize as a result of higher rainfall.

Unregulated – Fortis Properties

Fortis properties reported net income of \$9 million, which was consistent with our estimate of \$9.3 million and Q3/09 net income of \$9 million. Occupancy decreased to 93.7% at the end of the quarter versus 96.2% at the end of Q3/09. Revenue per available room increased to \$89.54 during Q3/10 versus \$89.02 during Q3/09.

Estimates

There are no changes to our EPS estimates; however, we are increasing our dividend estimates slightly in order to better align our forecast payout ratios for 2011 and 2012 with payout ratios experienced in 2009–2010E. Our 2011 DPS increases to \$1.18 from \$1.16 and our 2012E DPS estimate increases to \$1.24 from \$1.20.

IMPORTANT DISCLOSURES**Analyst's Certification**

I, Michael McGowan, CA, CFA, hereby certify that the views expressed in this report accurately reflect my personal views about the subject securities or issuers. I also certify that no part of my compensation was, is, or will be, directly or indirectly, related to the specific recommendations or views expressed in this report.

Analysts who prepared this report are compensated based upon (among other factors) the overall profitability of BMO Capital Markets and their affiliates, which includes the overall profitability of investment banking services. Compensation for research is based on effectiveness in generating new ideas and in communication of ideas to clients, performance of recommendations, accuracy of earnings estimates, and service to clients.

Company Specific Disclosure

Disclosure 1: BMO Capital Markets has undertaken an underwriting liability with respect to this issuer within the past 12 months.

Disclosure 2: BMO Capital Markets has provided investment banking services with respect to this issuer within the past 12 months.

Disclosure 4: BMO Capital Markets or an affiliate has received compensation for investment banking services from this issuer within the past 12 months.

Disclosure 5: BMO Capital Markets or an affiliate received compensation for products or services other than investment banking services within the past 12 months.

Disclosure 6: This issuer is a client (or was a client) of BMO NB, BMO Capital Markets Corp., BMO CM Ltd. or an affiliate within the past 12 months: Investment Banking Services & Non-Securities Related Services.

Methodology and Risks to Price Target/Valuation

Methodology: Our target price is based on a weighted valuation approach: 18x diluted 2012E EPS (12.5%); 1.75x 2012E BVPS (12.5%) and a target yield of 3.50% based on 2012E dividends per share (75%).

Risks: Operations are subject to complex regulation by a variety of provincial, state and federal (Canada, Cayman Islands & Belize) agencies. Changes in regulation may adversely affect performance.

Ratings and Sector Key

We use the following ratings system definitions:

OP = Outperform - Forecast to outperform the market;

Mkt = Market Perform - Forecast to perform roughly in line with the market;

Und = Underperform - Forecast to underperform the market;

(S) = speculative investment;

NR = No rating at this time;

R = Restricted – Dissemination of research is currently restricted.

Market performance is measured by a benchmark index such as the S&P/TSX Composite Index, S&P 500, Nasdaq Composite, as appropriate for each company. BMO Capital Markets eight Top 15 lists guide investors to our best ideas according to different objectives (Canadian large, small, growth, value, income, quantitative; and US large, US small) have replaced the Top Pick rating.

Michael McGowan, CA, CFA

BMO Nesbitt Burns Inc.

(416) 359-5807

Michael.McGowan@bmo.com

Assoc: Mark Laing, CA, CFA

Annual Dividend Increased by 3.6%; Outperform Rating Maintained

Event

On December 14, 2010, Fortis announced that it is increasing its annual dividend by 3.6% to \$1.16/share from \$1.12/share. The revised quarterly dividend of \$0.29/share will be payable on March 1 to shareholders of record as of February 11, 2011.

Impact

Neutral. The revised annual dividend of \$1.16/share is slightly lower than the FY 2011E DPS forecast of \$1.18/share that we published in our research comment regarding Q3/2010 earnings.

Forecasts

We have updated our estimates to reflect FY 2011E dividends of \$1.16. We have also trimmed our FY 2012E dividend estimate to \$1.22 from \$1.24.

Valuation

Our \$35.50 target price is based on a weighted valuation approach: 18x 2012E diluted EPS of \$1.84 (12.5%), 1.75x 2012E BVPS of \$20.82 (12.5%) and a target yield of 3.50%, assuming 2012E dividends per share of \$1.22 (75%).

Recommendation

We believe Fortis's shares are attractively valued, considering the company's relatively low-risk, diversified business model. Our rating is Outperform.

IMPORTANT DISCLOSURES

Analyst's Certification

I, Michael McGowan, CA, CFA, hereby certify that the views expressed in this report accurately reflect my personal views about the subject securities or issuers. I also certify that no part of my compensation was, is, or will be, directly or indirectly, related to the specific recommendations or views expressed in this report.

Analysts who prepared this report are compensated based upon (among other factors) the overall profitability of BMO Capital Markets and their affiliates, which includes the overall profitability of investment banking services. Compensation for research is based on effectiveness in generating new ideas and in communication of ideas to clients, performance of recommendations, accuracy of earnings estimates, and service to clients.

Company Specific Disclosure

Disclosure 1: BMO Capital Markets has undertaken an underwriting liability with respect to this issuer within the past 12 months.

Disclosure 2: BMO Capital Markets has provided investment banking services with respect to this issuer within the past 12 months.

Disclosure 4: BMO Capital Markets or an affiliate has received compensation for investment banking services from this issuer within the past 12 months.

Disclosure 5: BMO Capital Markets or an affiliate received compensation for products or services other than investment banking services within the past 12 months.

Disclosure 6: This issuer is a client (or was a client) of BMO NB, BMO Capital Markets Corp., BMO CM Ltd. or an affiliate within the past 12 months: Investment Banking Services & Non-Securities Related Services.

Disclosure 8: BMO Capital Markets or an affiliate has a financial interest in 1% or more of any class of the equity securities of this issuer.

Methodology and Risks to Price Target/Valuation

Methodology: Our target price is based on a weighted valuation approach: 18x diluted 2012E EPS (12.5%); 1.75x 2012E BVPS (12.5%) and a target yield of 3.50% based on 2012E dividends per share (75%).

Risks: Operations are subject to complex regulation by a variety of provincial, state and federal (Canada, Cayman Islands & Belize) agencies. Changes in regulation may adversely affect performance.

Ratings and Sector Key

We use the following ratings system definitions:

OP = Outperform - Forecast to outperform the market;

Mkt = Market Perform - Forecast to perform roughly in line with the market;

Und = Underperform - Forecast to underperform the market;

(S) = speculative investment;

NR = No rating at this time;

R = Restricted – Dissemination of research is currently restricted.

Market performance is measured by a benchmark index such as the S&P/TSX Composite Index, S&P 500, Nasdaq Composite, as appropriate for each company. BMO Capital Markets eight Top 15 lists guide investors to our best ideas according to different objectives (Canadian large, small, growth, value, income, quantitative; and US large, US small) have replaced the Top Pick rating.

Q4/10 Results Slightly Below Expectations

Impact

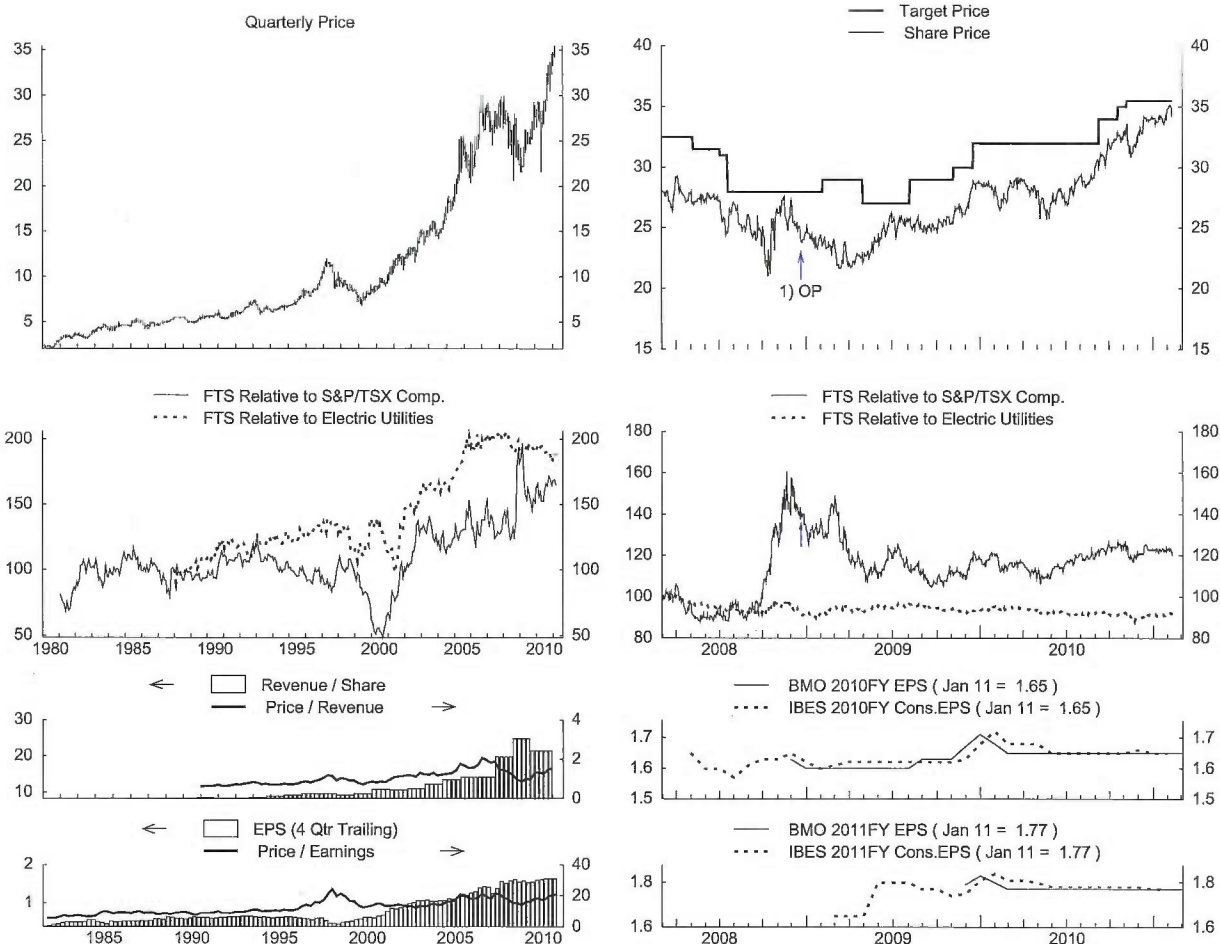

Neutral

Details & Analysis

Fortis reported Q4/10 EPS of \$0.49, which was slightly below our estimate of \$0.53 and the First Call Mean estimate of \$0.51. The difference between actual and expected results largely stemmed from lower-than-expected earnings at Fortis Alberta, Terasen Gas, and FortisCaribbean, partially offset by lower-than-expected corporate costs. Capital spending for 2010 of \$1.1 billion was in line with our forecast. For 2011, Fortis is forecasting capital expenditures of \$1.2 billion and the company expects to invest \$5.5 billion in capital projects over the next five years. Disclosure in the release stated that due to the uncertainty surrounding the treatment of regulatory assets and liabilities under IFRS, Fortis is planning to adopt U.S. GAAP in 2012. Overall, this appeared to be a very clean quarter. Although Q4/10 results were slightly lower than expected, full-year adjusted 2010 earnings of \$281 million increased by 7.3% compared to adjusted earnings of \$262 million in 2009. This represents fairly significant earnings growth for a company whose primary business is the ownership and operation of regulated utilities.

This report was prepared by an analyst(s) employed by BMO Nesbitt Burns Inc., and who is (are) not registered as a research analyst(s) under FINRA rules. For disclosure statements, including the Analyst's Certification, please refer to pages 2 to 5.

Q4/10 Below Slightly Below Expectations; Long-Term Growth Profile Remains Intact

Event

Fortis reported Q4/10 EPS of \$0.49, which was slightly below our estimate of \$0.53 and the First Call Mean estimate of \$0.51. The difference between actual and expected results largely stemmed from lower-than-expected earnings at FortisAlberta, Terasen Gas and FortisCaribbean, partially offset by lower-than-expected corporate costs. Capital spending for 2010 of \$1.1 billion was in line with our forecast. For 2011, Fortis is forecasting capital expenditures of \$1.2 billion and expects to invest \$5.5 billion in capital projects over the next five years.

Impact

Neutral. Overall, this appeared to be a very clean quarter. Although Q4/10 results were slightly lower than expected, full-year adjusted 2010 earnings of \$281 million increased by 7.3% compared to adjusted earnings of \$262 million in 2009. This represents fairly significant earnings growth for a company whose primary business is the ownership and operation of regulated utilities.

Forecasts

We have updated our model to reflect Q4/10 results. Our diluted EPS estimates of \$1.77 in 2011E and \$1.84 in 2012E are unchanged.

Valuation

Our \$35.50 target price is based on a weighted valuation approach: 18x 2012E diluted EPS of \$1.84 (12.5%), 1.75x 2012E BVPS of \$20.86 (12.5%) and a target yield of 3.50%, assuming 2012E dividends per share of \$1.22 (75%).

Recommendation

We believe Fortis's shares are attractively valued, considering the company's relatively low-risk, diversified business model. Our rating is Outperform.

Price (10-Feb) \$33.81 **52-Week High** \$35.45

Q4/10 Results Below Expectations; Long-Term Growth Profile Remains Intact

Fortis reported Q4/10 EPS of \$0.49, which was slightly below our estimate of \$0.53 and the First Call Mean estimate of \$0.51. The difference between actual and expected results largely stemmed from lower-than-expected earnings at FortisAlberta, Terasen Gas and FortisCaribbean, partially offset by lower-than-expected corporate costs. Capital spending for 2010 of \$1.1 billion was in line with our forecast. For 2011, Fortis is forecasting capital expenditures of \$1.2 billion and the company expects to invest \$5.5 billion in capital projects over the next five years.

Although Q4/10 results were slightly lower than expected, full-year adjusted 2010 earnings of \$281 million increased by 7.3% compared to adjusted earnings of \$262 million in 2009. This represents fairly significant earnings growth for a company whose primary business is the ownership and operation of regulated utilities.

Our \$35.50 target price is based on a weighted valuation approach: 18x 2012E diluted EPS of \$1.84 (12.5%), 1.75x 2012E BVPS of \$20.82 (12.5%) and a target yield of 3.50%, assuming 2012E dividends per share of \$1.22 (75%).

Although Fortis' shares have appreciated recently, we believe that the company remains a compelling long-term investment. Fortis has shown an ability to consistently deliver relatively low-risk earnings and dividend growth. While the company's organic growth prospects are relatively well known, there are a number of potential catalysts that could positively impact Fortis' shares, including: (1) the potential acquisition of additional regulated utilities, either in the U.S. or Canada; and (2) the prospect of developing regulated transmission assets in Ontario. Accordingly, we are maintaining our Outperform rating.

Where Do We Go From Here?

Fortis historically has grown through acquisition and its last major transaction was the acquisition of the Terasen Gas utilities, which was completed in May 2007. We expect Fortis to continue to review potential acquisition candidates, with the most likely targets regulated utilities operating in the U.S. Absent an acquisition, we believe that Fortis will continue to advance its capital expenditure program and seek out accretive greenfield/brownfield development opportunities. The company's announcement in late August that it had acquired a 51% interest in the partnership responsible for constructing the 335 MW Wanteta Dam expansion in Trail, B.C., is a good example of Fortis developing projects that complement its regulated utility operations.

Another potential area of growth is transmission investment in Ontario. In coming years, the transmission grid in Ontario will likely need reinforcement and require additional capacity in certain areas as additional renewable energy facilities are added to the grid. At the present time most transmission capacity in Ontario is owned by Hydro One (100% Government of Ontario); however, in August, the Ontario Energy Board issued the Framework for Transmission Project Development Plans (EB-2010-059), which sought to establish a competitive process for developing new transmission assets in Ontario. In advance of the possibility of large-scale

transmission development in Ontario being put out for tender, Fortis has entered into a joint venture with the First Nations' Lake Huron Anishinabek Transmission Company Inc. ("LHATC") to pursue the development of transmission assets in Ontario. Fortis will hold a minimum 51% interest in the joint venture and LHATC will have the opportunity to acquire up to a 49% interest in the joint venture. We expect the joint venture will bid on the following projects, should tenders be solicited: (1) a new 500 kV line that would run from Algoma/Sault Ste. Marie to Sudbury; and (2) reinforcement of the 500 kV line that runs from Sudbury to Barrie. While it remains to be seen whether Fortis will be successful in its quest to build out transmission in Ontario, we believe that the announcement of the joint venture is a positive development for the company.

Revised Capital Expenditure Budget

Consistent with prior years, Fortis' fourth-quarter results contained a capital expenditure forecast. In 2011, Fortis expects to invest \$1.2 billion, with the majority of spending occurring at its regulated electric utilities. A comparison of forecast capital expenditures in 2011 and historical capital spending is set out in Table 1.

Table 1: Capital Expenditure Forecast (\$mm)

	2009A	2010A	2011E
Regulated Gas Utilities - Canadian			
Terasen Gas Companies	246	253	281
Regulated Electric Utilities - Canadian			
FortisAlberta	407	379	420
FortisBC	115	139	99
Newfoundland Power	74	78	73
Other Canadian	46	48	46
Regulated Electric Utilities - Caribbean	92	72	83
Non-Regulated - Fortis Generation & Corporate	18	85	183
Non-Regulated - Fortis Properties	26	19	27
Total	1,024	1,073	1,212

Source: Company Reports

Fortis maintained capital expenditure guidance of \$5.5 billion over the next five years. The breakdown of this anticipated spending is as follows: 63% is expected to be spent at the regulated electric utilities, driven by FortisAlberta and Fortis BC; approximately 20% is expected to be spent by the Terasen entities; and 17% is expected to be incurred at the non-regulated entities.

Regulatory Update

After a lull in 2010, we expect regulatory activity to increase in 2011. The Alberta Utilities Commission will hold two separate proceedings: (1) a generic cost of capital proceeding, including a full review of cost of capital and deemed capital structure; and (2) a review process designed to determine whether Alberta will adopt performance-based regulation. The 2011

Generic Cost of Capital Hearing is scheduled to begin on May 30, 2011. Utilities have been asked to file submissions regarding the potential implementation of Performance Based Regulation by March 31, 2011. A review process related to PBR is expected to begin after the submissions have been received by individual utilities.

In addition to the formal regulatory proceedings outlined above, a number of Fortis' utilities are expected to make rate or other filings in 2011:

- The Terasen entities are expected to pursue an amalgamation
- The Terasen entities may file a rate application for the years 2012–2013
- FortisAlberta is expected to submit a cost of service application for the years 2012–2013 by the end of Q1/2011
- Newfoundland Power may file an application to increase customer rates, effective for 2012.

Q4/10 Results

As set out in Table 2, on a comparable basis, net income increased by 2.4% in Q4/10 versus Q4/09. In order to present results on a comparable basis, Q4/09 GAAP income was adjusted to reverse a \$5 million expense recorded regarding the cost of converting portions of the distribution system at Terasen Gas Whistler to utilize natural gas instead of propane. Terasen subsequently recovered \$4 million of this amount in Q3/10. Q4/09 GAAP earnings were also adjusted for a \$3 million non-recurring tax benefit recorded at the Other Canadian segment related to a future income tax recovery at FortisOntario.

Source: BMO Capital Markets, Company Reports

A discussion of the operating performance of each business segment follows.

Regulated Gas Utilities – Terasen Gas Companies

Q4/10 net income of \$45 million was less than our estimate of \$50.9 million and Q4/09 adjusted net income of \$53 million. We attribute the majority of the variance to seasonality, as timing differences resulted in a higher proportion of expenses recorded in Q4/10 compared to

Q4/09. On an annual basis, adjusted net income increased by 3.3% to \$126 million in 2010 from \$122 million in 2009.

Regulated Electric Utilities – FortisAlberta

Q4/10 net income of \$17 million was lower than our estimate of \$19.3 million but greater than Q4/09 net income of \$15 million.

Earnings in Q4/10 benefitted from an increase in customer distribution rates arising from the 2009 Alberta Utilities Commission (AUC) Generic Cost of Capital Hearing, which increased FortisAlberta's allowed ROE to 9% from 8.51% and increased the company's deemed equity thickness to 41% from 37%.

On an annual basis, net income increased by 13.3% to \$68 million in 2010 from \$60 million in 2009.

Regulated Electric Utilities – FortisBC

Q4/10 net income of \$10 million was greater than Q4/09 net income of \$8 million but consistent with our estimate of \$9.9 million. The increase in earnings was largely driven by an increase in FortisBC's allowed ROE to 9.9% in 2010 from 8.87% in 2009 and additional performance-based rate setting adjustments recorded in 2010 compared to 2009.

On an annual basis, net income increased by 13.5% in 2010 to \$42 million from \$37 million in 2009.

Regulated Electric Utilities – Newfoundland Power

Q4/10 net income of \$9 million was consistent with our estimate of \$8.8 million and slightly greater than Q4/09 net income of \$8 million. The increase in earnings was largely the result of a 3.5% increase in electricity rates and lower effective corporate tax rates.

On an annual basis, net income increased by 9.4% to \$35 million in 2010 from \$32 million in 2009.

Regulated Electric Utilities – Other Canadian

Q4/10 net income of \$5 million was consistent with our estimate of \$4.5 million and greater than Q4/09 adjusted net income of net income of \$3 million. The increase in earnings was partially driven by lower financing charges at Maritime Electric, and a 3.8% rate increase at Algoma Power that became effective on December 1, 2010.

On an annual basis, adjusted net income increased by 11.8% to \$19 million in 2010 from \$17 million in 2009.

Regulated Electric Utilities – Caribbean

The earnings contribution from the Caribbean business segment was \$5 million in Q4/10 versus our estimate of \$8.5 million and Q4/09 net income of \$7 million. The decrease in Q4/10 earnings reflects higher administrative expenses regarding the ongoing legal dispute between Belize Electricity and its regulator. Q4/09 results also benefitted from a change in amortization estimates, which increased earnings at Fortis Turks and Caicos by \$1.5 million.

On an annual basis, adjusted net income decreased by 8% to \$23 million in 2010 from \$25 million in 2009. During 2010, Belize Electricity contributed only \$1.5 million to consolidated earnings. Fortis believes that in the normal course of business, Belize Electricity's annual earnings contribution should be closer to \$10 million.

Unregulated – Fortis Generation

Fortis Generation reported net income of \$5 million, which was consistent with our estimate of \$5.1 million and greater than Q4/09 net income of \$3 million. The difference between actual and expected results was due to a combination of increased production and higher average realized power prices during the quarter.

On an annual basis, adjusted net income increased by 25% to \$20 million in 2010 from \$16 million in 2009.

Unregulated – Fortis Properties

Fortis properties reported net income of \$7 million, which exceeded both our estimate of \$5.2 million and Q4/09 net income of \$5 million. Rent increases and lower effective corporate income taxes drove the increase. Occupancy decreased to 94.5% at the end of the quarter versus 96.2% at the end of Q4/09. Revenue per available room increased to \$70.76 during Q4/10 versus \$68.87 during Q4/09.

On an annual basis, adjusted net income increased by 8.3% to \$26 million in 2010 from \$24 million in 2009.

Other Items

Fortis Now Likely to Adopt U.S. GAAP in 2012 Instead of IFRS

Disclosure in the release stated that due to the uncertainty surrounding the treatment of regulatory assets and liabilities under IFRS, Fortis is planning to adopt U.S. GAAP, effective January 1, 2012. Fortis will continue to report under Canadian GAAP in 2011, pursuant to an exception granted by the Accounting and Standards Board, which allowed qualifying entities with rate regulated operations to defer the adoption of IFRS until reporting periods beginning on or after January 1, 2012.

Support Structure Agreement Between Bell Aliant and Newfoundland Power

In December 2010, Newfoundland Power and Bell Aliant announced a new Support Structure Agreement. Pursuant to this agreement, Bell Aliant will acquire 40% of all shared-use poles and related infrastructure for approximately \$46 million. The acquisition will reduce Newfoundland Power's rate base by approximately 5%, and Newfoundland Power is expected to use a portion of the proceeds to repay debt. As a result of the reduction in rate base, recurring earnings from Newfoundland Power are expected to decline by approximately \$1 million.

Estimates

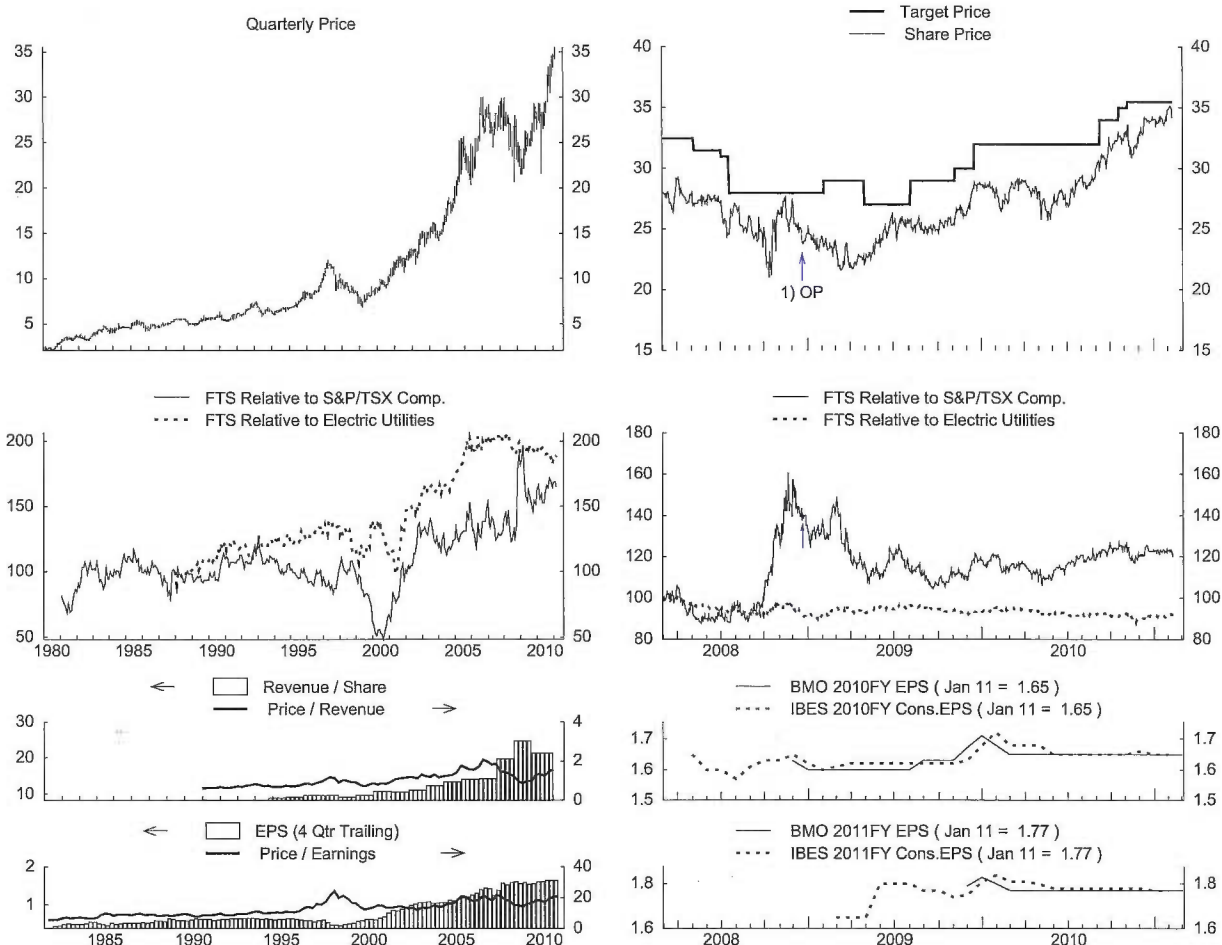

We have updated our model to reflect Q4/10 results. Our diluted EPS estimates of \$1.77 in 2011E and \$1.84 in 2012E are unchanged.

IMPORTANT DISCLOSURES

Analyst's Certification

I, Michael McGowan, CA, CFA, hereby certify that the views expressed in this report accurately reflect my personal views about the subject securities or issuers. I also certify that no part of my compensation was, is, or will be, directly or indirectly, related to the specific recommendations or views expressed in this report.

Analysts who prepared this report are compensated based upon (among other factors) the overall profitability of BMO Capital Markets and their affiliates, which includes the overall profitability of investment banking services. Compensation for research is based on effectiveness in generating new ideas and in communication of ideas to clients, performance of recommendations, accuracy of earnings estimates, and service to clients.

Company Specific Disclosure

Disclosure 1: BMO Capital Markets has undertaken an underwriting liability with respect to this issuer within the past 12 months.

Disclosure 2: BMO Capital Markets has provided investment banking services with respect to this issuer within the past 12 months.

Disclosure 4: BMO Capital Markets or an affiliate has received compensation for investment banking services from this issuer within the past 12 months.

Disclosure 5: BMO Capital Markets or an affiliate received compensation for products or services other than investment banking services within the past 12 months.

Disclosure 6: This issuer is a client (or was a client) of BMO NB, BMO Capital Markets Corp., BMO CM Ltd. or an affiliate within the past 12 months: Investment Banking Services & Non-Securities Related Services.

Methodology and Risks to Price Target/Valuation

Methodology: Our target price is based on a weighted valuation approach: 18x diluted 2012E EPS (12.5%); 1.75x 2012E BVPS (12.5%) and a target yield of 3.50% based on 2012E dividends per share (75%).

Risks: Operations are subject to complex regulation by a variety of provincial, state and federal (Canada, Cayman Islands & Belize) agencies. Changes in regulation may adversely affect performance.

Ratings and Sector Key

We use the following ratings system definitions:

OP = Outperform - Forecast to outperform the market;

Mkt = Market Perform - Forecast to perform roughly in line with the market;

Und = Underperform - Forecast to underperform the market;

(S) = speculative investment;

NR = No rating at this time;

R = Restricted – Dissemination of research is currently restricted.

Market performance is measured by a benchmark index such as the S&P/TSX Composite Index, S&P 500, Nasdaq Composite, as appropriate for each company. BMO Capital Markets eight Top 15 lists guide investors to our best ideas according to different objectives (Canadian large, small, growth, value, income, quantitative; and US large, US small) have replaced the Top Pick rating.

Company Description – Fortis Inc. (Fortis) is a publicly listed holding company with four key businesses: electric utility operations, regulated natural gas distribution, non-regulated electric power generation and non-utility property activities. Gas and electric utility operations include Newfoundland Power (100%), Maritime Electric (100%, PEI), Fortis Ontario (100%), Belize Electricity (70.1%), Caribbean Utilities (59.5%, Grand Cayman Island), Turks

and Caicos (100%), FortisAlberta (100%), FortisBC (100%) and the Terasen Gas Companies (100%, British Columbia).
Website: fortisinc.com

Recent Results – Fortis reported Q4/10 GAAP EPS of \$0.49, slightly below our estimate of \$0.53 and the First Call Mean of \$0.51. The difference between actual and expected results largely stemmed from lower-than-expected earnings at FortisAlberta, Terasen Gas and FortisCaribbean,

This report was prepared by an analyst(s) employed by BMO Nesbitt Burns Inc., and who is (are) not registered as a research analyst(s) under FINRA rules. For disclosure statements, including the Analyst's Certification, please refer to pages 3 to 5.

partially offset by lower-than-expected corporate costs. Capital spending for 2010 of \$1.1 billion was in line with our forecast. For 2011, Fortis forecasts capital expenditures of \$1.2 billion and expects to invest \$5.5 billion in capital projects over the next five years.

Corporate Developments – Disclosure in the Q4/10 release stated that due to the uncertainty surrounding the treatment of regulatory assets and liabilities under IFRS, Fortis is planning to adopt U.S. GAAP, effective January 1, 2012. Fortis will continue to report under Canadian GAAP in 2011, pursuant to an exception granted by the Accounting Standards Board, which allowed qualifying entities with rate regulated operations to defer the adoption of IFRS until reporting periods beginning on or after January 1, 2012.

On February 2, 2011, FortisOntario (100% Fortis Inc.) announced that it and the First Nations' Lake Huron Anishinabek Transmission Company Inc. ("LHATC") have entered into a memorandum of understanding to create a joint venture to pursue the development of regulated

transmission projects in Ontario. FortisOntario will hold a minimum 51% interest in the joint venture and LHATC will have the opportunity to acquire up to a 49% interest in the joint venture.

On December 14, 2010, Fortis announced a 3.6% increase in its annual dividend to \$1.16/share from \$1.12/share.

Forecasts – Our diluted EPS estimates are \$1.77 in 2011 and \$1.84 in 2012.

Valuation – Our target price of \$35.50 is based on a weighted valuation approach: 18x diluted 2012E EPS of \$1.84 (12.5%); 1.75x 2012E BVPS of \$20.86 (12.5%); and a target yield of 3.50%, assuming 2012E dividends per share of \$1.22 (75%).

Recommendation – We believe that Fortis' shares are attractively valued, considering the company's relatively low-risk, diversified business model. Our rating is Outperform. Member of Top 15 Income and Large Cap stock selections.

Ratings and Sector Key

We use the following ratings system definitions:

OP = Outperform - Forecast to outperform the market;

Mkt = Market Perform - Forecast to perform roughly in line with the market;

Und = Underperform - Forecast to underperform the market;

(S) = speculative investment;

NR = No rating at this time;

R = Restricted – Dissemination of research is currently restricted.

Market performance is measured by a benchmark index such as the S&P/TSX Composite Index, S&P 500, Nasdaq Composite, as appropriate for each company. BMO Capital Markets eight Top 15 lists guide investors to our best ideas according to different objectives (Canadian large, small, growth, value, income, quantitative; and US large, US small) have replaced the Top Pick rating.

Brief Research Note
Gas & Electric Utilities

Michael McGowan, CA, CFA
(416) 359-5807
Michael.McGowan@bmo.com
Assoc. Mark Laing, CA, CFA

Q1/11 Results: A Strong Start to the Year

Impact

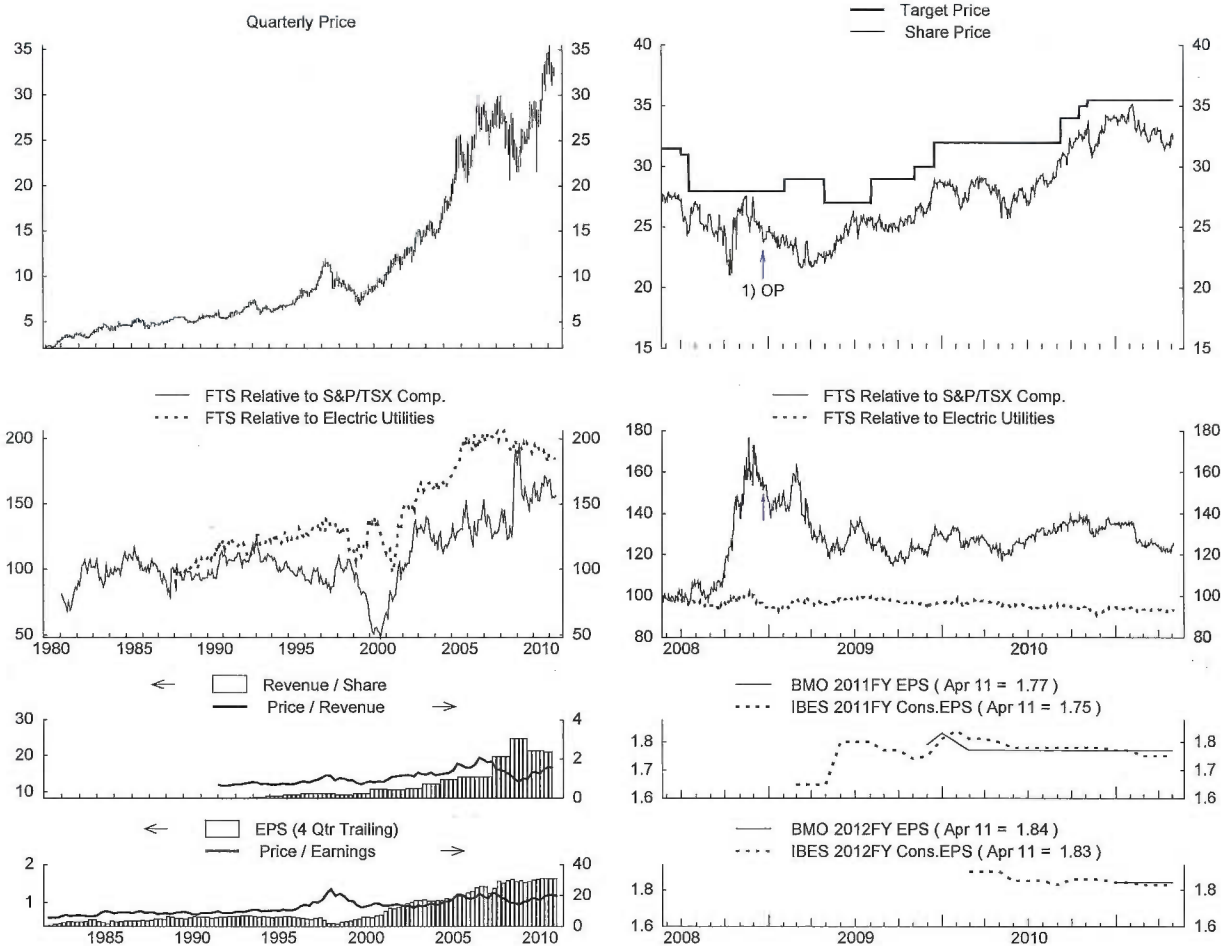

Slightly Positive

Details & Analysis

Fortis reported Q1/11 EPS of \$0.67 vs. our estimate of \$0.62 and the First Call Mean of \$0.62 (range \$0.61-0.63). The difference between actual and expected earnings was primarily the result of strong earnings at the western utilities: FortisAlberta, FortisBC, and FortisBC Energy Inc. (formerly Terasen Gas). As energy sales at the western utilities (both electricity and natural gas) appear to have increased significantly during Q1/11 vs. Q1/10, we attribute the majority of the earnings increase to seasonality. There was no change to the company's capital budget guidance. Fortis continues to expect to invest \$5.5 billion in its business segments over the next five years. Overall, this appeared to be fairly clean quarter and we would characterize it as a strong start to the year.

This report was prepared by an analyst(s) employed by BMO Nesbitt Burns Inc., and who is (are) not registered as a research analyst(s) under FINRA rules. For disclosure statements, including the Analyst's Certification, please refer to pages 2 to 5.

Michael McGowan, CA, CFA
 BMO Nesbitt Burns Inc.
 (416) 359-5807
 Michael.McGowan@bmo.com
 Assoc: Mark Laing, CA, CFA

A Strong Start to the Year: Q1/11 Results Exceed Expectations

Event

Fortis reported Q1/11 EPS of \$0.67 versus our estimate of \$0.62 and the First Call Mean estimate of \$0.62 (range \$0.61-0.63). The difference between actual and estimated earnings was primarily the result of strong results at the western utilities: FortisAlberta, FortisBC and FortisBC Energy Inc. (formerly Terasen Gas).

Impact

Slightly Positive. While we attribute the majority of the variance between actual and estimated results to seasonality (energy sales at the western utilities increased anywhere from 8% to 25%), we nonetheless believe that Q1/11 earnings represent a strong start to 2011.

Forecasts

There are no changes to our annual EPS estimates; however, we have adjusted our quarterly estimates to reflect Q1/11 results.

Valuation

Our \$35.50 target price is based on a weighted valuation approach: 18x 2012E diluted EPS of \$1.84 (12.5%), 1.75x 2012E BVPS of \$20.85 (12.5%) and a target yield of 3.50%, assuming 2012E dividends per share of \$1.22 (75%).

Recommendation

At current levels, we believe the shares are attractively valued. Our rating is Outperform.

Changes

Quarterly EPS
 Q3/11E \$0.25 to \$0.26
 Q4/11E \$0.58 to \$0.52

A Strong Start to the Year: Q1/11 Results Exceed Expectations

Fortis reported Q1/11 EPS of \$0.67 versus our estimate of \$0.62 and the First Call Mean estimate of \$0.62 (range \$0.61–0.63). The difference between actual and estimated earnings was primarily the result of strong earnings at the western utilities: FortisAlberta, FortisBC and FortisBC Energy Inc. (formerly Terasen Gas).

While we attribute the majority of the variance between actual and estimated results to seasonality (energy sales at the western utilities increased anywhere from 8% to 25%), we nonetheless believe that Q1/11 results represent a strong start to 2011.

With respect to growth, we expect Fortis to continue to evaluate the potential acquisition of regulated natural gas or electric utilities in the U.S. Regardless of whether an acquisition occurs, Fortis will continue to advance its capital expenditure program (which calls for investment of \$5.5 billion over the next five years) in order to drive organic growth. Fortis also continues to evaluate a number of other opportunities to grow rate base, such as investments in new natural gas infrastructure. For example, the company is considering seeking regulatory approval to invest in fuelling stations that would be used by large industrial/commercial vehicles that rely on natural gas as fuel, as opposed to more traditional fuels such as diesel or gasoline. We understand that Fortis also continues to pursue the development of large-scale transmission infrastructure in Ontario, although the company acknowledges that this may be a longer-term initiative.

Our \$35.50 target price is based on a weighted valuation approach: 18x 2012E diluted EPS of \$1.84 (12.5%), 1.75x 2012E BVPS of \$20.85 (12.5%) and a target yield of 3.50%, assuming 2012E dividends per share of \$1.22 (75%).

We are maintaining our Outperform rating, as we believe the company's shares are attractively valued, especially in light of its relatively low-risk business model.

Regulatory Update

After a lull in 2010, we expect 2011 to be relatively busy from a regulatory perspective. The Alberta Utilities Commission (AUC) is currently moving forward with a Generic Cost of Capital proceeding. The formal hearing is scheduled to begin on May 30, 2011, and the AUC is expected to issue a cost of capital decision by the end of the year. The AUC is also exploring the implementation of Performance Based Regulation; however, we understand that a final decision on PBR is not expected until mid-2012.

In addition to the broad regulatory initiatives outlined above, a number of Fortis' utilities are expected to make rate or other filings in 2011:

- The FortisBC Energy utilities (formerly the Terasen companies) are expected to pursue an amalgamation;
- The FortisBC Energy utilities may file a rate application for the years 2012–2013;

- FortisAlberta has filed cost-of-service application for the years 2012–2013, in which it is seeking a return on estimated mid-year net rate bases of \$1,760 million in 2011E, \$2,013 million in 2012E and \$2,224 million in 2013E; and
- Newfoundland Power may file an application to increase customer rates, effective for 2012.

Q1/11 Results

Fortis reported Q1/11 GAAP net income of \$117 million, which was \$10.1 million greater than our estimate of \$106.9 million and \$17 million greater than Q1/10 GAAP net income of \$100 million. A comparison of Q1/11 and Q1/10 results by business segment is set out in Table 1.

Source: BMO Capital Markets, Company Reports

A discussion of the operating performance of each business segment follows.

Regulated Gas Utilities – Fortis BC Energy Companies

Q1/11 net income of \$76 million from FortisBC Energy exceeded our estimate of \$72.2 million and Q1/10 net income of \$73 million. We attribute the majority of the variance to seasonality, as cooler weather during the quarter and improved economic conditions in the forest sector led to much higher sales volumes (52,336 GJ in Q1/11 vs. 42,106 GJ in Q1/10).

Regulated Electric Utilities – FortisAlberta

Q1/11 net income of \$21 million was significantly greater than our estimate of \$14.8 million and Q1/10 net income of \$14 million. The increase in earnings in Q1/11 versus Q1/10 was primarily due to higher energy deliveries (4,402 GWh in Q1/11 vs. 4,109 GWh in Q1/10) and timing with respect to the recording in 2010 of the cumulative impact of the 2010–2011 regulatory rate decision. During Q3/10, Fortis recorded a revenue accrual of \$22 million (with \$14 million of the total relating to H1/10) to reflect higher approved rates. In addition, Q1/11 results benefitted from a \$1 million gain on the sale of property.

Regulated Electric Utilities – FortisBC

Q1/11 net income of \$19 million was greater than Q1/10 net income of \$14 million and our estimate of \$16.2 million. The increase in earnings was largely driven by higher electricity sales during the quarter (905 GWh in Q1/11 vs. 820 GWh in Q1/10) and rate base growth, due to infrastructure investments.

Regulated Electric Utilities – Newfoundland Power

Q1/11 net income of \$7 million was generally consistent with our estimate of \$6.6 million and Q1/10 net income of \$7 million.

Regulated Electric Utilities – Caribbean

The earnings contribution from the Caribbean business segment was \$4 million in Q1/11 versus our estimate of \$4.2 million and Q1/10 net income of \$4 million.

Unregulated – Fortis Generation

Fortis Generation reported Q1/11 net income of \$3 million, lower than our estimate of \$5 million and \$1 million greater than Q1/10 net income of \$2 million. The variance between Q1/11 and Q1/10 results was largely due to a combination of increased production and higher average realized power prices.

Unregulated – Fortis Properties

Fortis Properties reported net income of \$1 million, which was lower than our estimate of \$2.3 million and Q1/10 net income of \$2 million. Lower performance at the hotel operations, primarily due to the continued unfavourable impact of the economic downturn, caused the decrease. Occupancy at the real estate division decreased to 94.3% at the end of the quarter versus 95.8% at the end of Q1/10. At the hospitality division, revenue per available room increased slightly to \$63.29 during Q1/11 versus \$62.93 during Q1/10.

Estimates

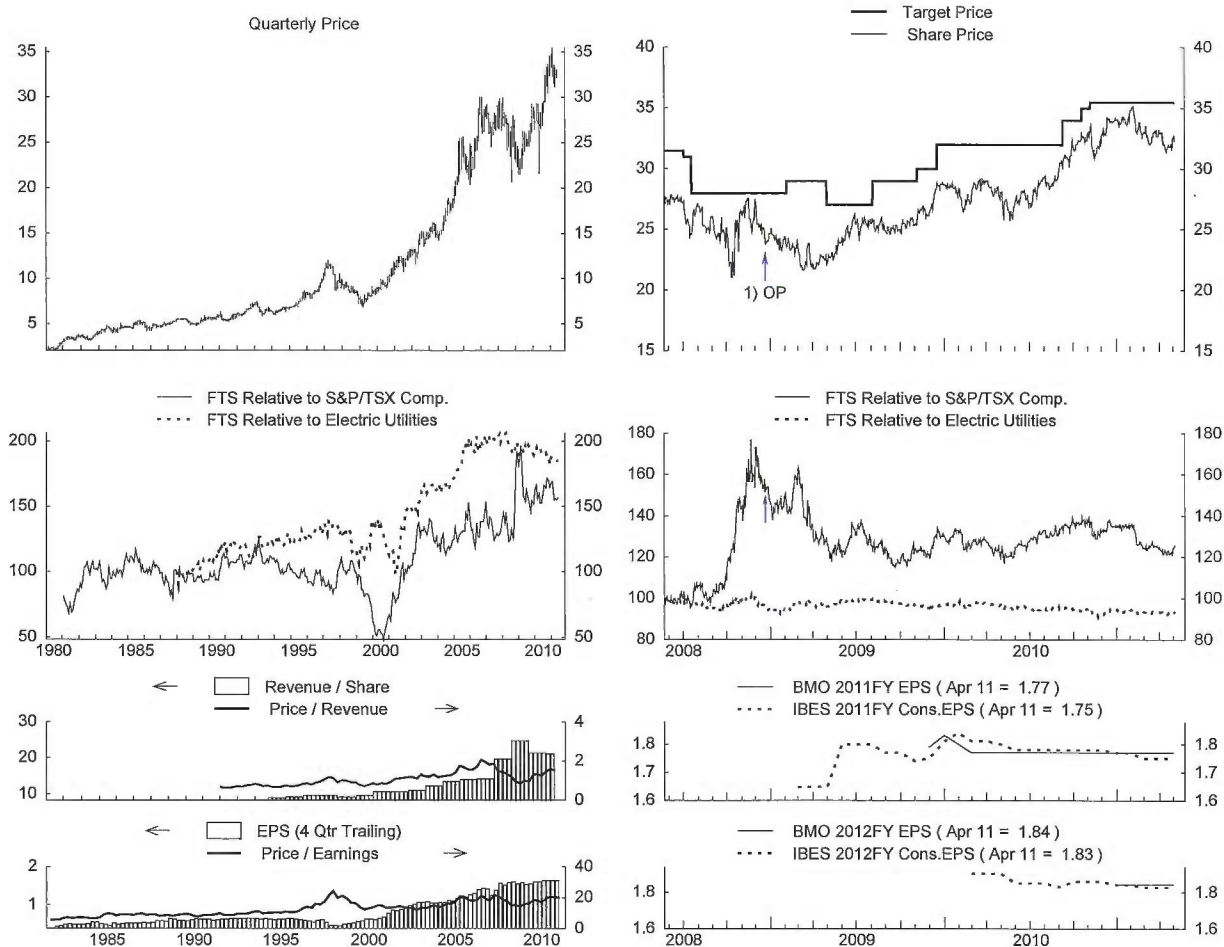

There are no changes to our annual EPS estimates; however, we have adjusted our quarterly estimates to reflect Q1/11 results.

IMPORTANT DISCLOSURES

Analyst's Certification

I, Michael McGowan, CA, CFA, hereby certify that the views expressed in this report accurately reflect my personal views about the subject securities or issuers. I also certify that no part of my compensation was, is, or will be, directly or indirectly, related to the specific recommendations or views expressed in this report.

Analysts who prepared this report are compensated based upon (among other factors) the overall profitability of BMO Capital Markets and their affiliates, which includes the overall profitability of investment banking services. Compensation for research is based on effectiveness in generating new ideas and in communication of ideas to clients, performance of recommendations, accuracy of earnings estimates, and service to clients.

Company Specific Disclosure

Disclosure 5: BMO Capital Markets or an affiliate received compensation for products or services other than investment banking services within the past 12 months.

Disclosure 6: This issuer is a client (or was a client) of BMO NB, BMO Capital Markets Corp., BMO CM Ltd. or an affiliate within the past 12 months: Non-Securities Related Services.

Methodology and Risks to Price Target/Valuation

Methodology: Our target price is based on a weighted valuation approach: 18x diluted 2012E EPS (12.5%); 1.75x 2012E BVPS (12.5%) and a target yield of 3.50% based on 2012E dividends per share (75%).

Risks: Operations are subject to complex regulation by a variety of provincial, state and federal (Canada, Cayman Islands & Belize) agencies. Changes in regulation may adversely affect performance.

Ratings and Sector Key

We use the following ratings system definitions:

OP = Outperform - Forecast to outperform the market;

Mkt = Market Perform - Forecast to perform roughly in line with the market;

Und = Underperform - Forecast to underperform the market;

(S) = speculative investment;

NR = No rating at this time;

R = Restricted – Dissemination of research is currently restricted.

Market performance is measured by a benchmark index such as the S&P/TSX Composite Index, S&P 500, Nasdaq Composite, as appropriate for each company. BMO Capital Markets eight Top 15 lists guide investors to our best ideas according to different objectives (Canadian large, small, growth, value, income, quantitative; and US large, US small) have replaced the Top Pick rating.

Resuming Coverage After \$300 Million Equity Issuance; Proposed CVPS Acquisition

Event

We are resuming coverage of Fortis following the completion of an offering of 9.1 million common shares for gross proceeds of \$300 million that was announced on May 30, 2011. Concurrently, Fortis announced that it had agreed to acquire Central Vermont Public Service Corporation (CVPS) for US\$700 million, including the assumption of US\$230 million of debt.

Impact

Slightly Positive. We had expected Fortis to issue equity by late 2011 in order to finance its ongoing capital expenditure program, although the amount of the issuance (\$300 million) was slightly greater than what we had forecast (\$260 million) and occurred earlier than expected. With respect to the acquisition of CVPS, Fortis has long stated that it intended to expand through the acquisition of a U.S.-based utility. At a multiple of approximately 1.49x anticipated regulatory rate base, the acquisition is not cheap; however, CVPS's rate base is expected to grow by an annual CAGR of 9% during the next five years.

Forecasts

We have updated our estimates to reflect: (1) the \$300 million equity issuance; (2) the CVPS acquisition; and (3) a reduction in earnings from the Caribbean business segment to be consistent with net income reported in 2010.

Valuation

Our \$35.50 target price is based on a weighted valuation approach: 18x 2012E diluted EPS of \$1.86 (12.5%), 1.75x 2012E BVPS of \$20.92 (12.5%) and a target yield of 3.50%, assuming 2012E dividends per share of \$1.22 (75%).

Recommendation

At current levels, we believe that Fortis's shares are attractively valued. Our rating is Outperform.

Resuming Coverage After \$300 Million Equity Issuance; Proposed Acquisition of Central Vermont Public Service Co.

We are resuming coverage of Fortis following the completion of an offering of 9.1 million common shares for gross proceeds of \$300 million that was announced on May 30, 2011. Concurrently, Fortis announced that it had agreed to acquire Central Vermont Public Service Corporation (CVPS) for US\$700 million, including the assumption of US\$230 million of debt.

With respect to the equity issuance, we expected Fortis to issue common shares by late 2011 in order to finance its ongoing capital expenditure program, although the amount of the issuance (\$300 million) was slightly greater than what we had forecast (\$260 million) and occurred earlier than expected.

With respect to the acquisition of CVPS, Fortis has long stated that it intended to expand into the U.S. through the acquisition of a U.S.-based utility. At a multiple of approximately 1.49x anticipated regulatory rate base, the acquisition is not cheap, and we estimate that CVPS will only be approximately \$0.05/share accretive to EPS in the first full year of ownership. The acquisition is, however, consistent with a strategy that Fortis has successfully employed in the past. CVPS is expected to grow its rate base by a CAGR of 9% per year, and this growth rate should translate into additional earnings accretion over time.

CVPS may also present Fortis with incidental acquisition opportunities. CVPS holds a 41% ownership interest in Vermont Transco, LLC, the entity that owns and operates the high-voltage transmission system in Vermont. It is possible that as the demand for green energy in the U.S. increases, the capacity of the transmission line owned by Vermont Transco could be expanded in order to accommodate additional imports of electricity from Quebec.

Although we view the acquisition positively, we are maintaining our \$35.50 price target, based on the relatively limited amount of accretion initially expected from the acquisition.

Our \$35.50 target price is based on a weighted valuation approach: 18x 2012E diluted EPS of \$1.86 (12.5%), 1.75x 2012E BVPS of \$20.92 (12.5%) and a target yield of 3.50%, assuming 2012E dividends per share of \$1.22 (75%).

About Central Vermont Public Service Corp.

Fortis has agreed to acquire all of the issued and outstanding common shares of Central Vermont Public Service Corp. ("CVPS"), a regulated integrated electric utility located in Vermont, for US\$35.10/share, resulting in aggregate purchase price of US\$700 million, including the assumption of US\$230 million of debt.

CVPS is the largest electric utility in Vermont, and is principally engaged in the purchase, production, transmission, distribution and sale of electricity.

CVPS serves nearly 160,000 customers in about two-thirds of the cities and towns throughout the state of Vermont. Its electric system consists of approximately 9,000 miles of distribution lines and more than 600 miles of sub-transmission lines. In addition, CVPS holds a 41% ownership interest in Vermont Transco, LLC, the entity that owns and operates the high-voltage transmission system in Vermont. Additional details about CVPS are set out below:

- The \$35.10/share offer represented a premium of 44.3% to CVPS's closing price of \$24.32, the day before the transaction was announced. The implied acquisition P/E multiplies based on 2011E guidance provided by CVPS are 21.9–20.0x 2011E earnings.
- Fortis has stated that in 2010, total assets and rate base assets of CVPS were approximately US\$711 million and US\$426 million, respectively.
- 2011E rate base has been forecast at US\$471 million. CVPS expects rate base to reach approximately US\$650 million by 2015, representing a compound average annual growth rate of approximately 9% from 2010 to 2015. A breakdown of historical and projected rate base for CVPS is provided in Table 1.

Table 1: Historical and Projected Rate Base (US\$mm)

	2005	2006	2007	2008	2009	2010	2011E	2012E	2013E	2014E	2015E
Rate Base	236	236	302	344	385	426	471	518	574	602	646

Source: Company Reports, BMO Capital Markets

- CVPS's allowed rate of return on common equity for 2011 has been set at 9.45% with a deemed equity thickness of 57%. Although CVPS's deemed ROE is similar to that earned by Canadian-domiciled utilities, the equity thickness of 57% is very high by Canadian standards (most regulated utilities in Canada do not have equity thicknesses that exceed 40%).

We believe that the discrepancy between CVPS's capital structure (57% equity) and Fortis's capital structure (approximately 32% common equity, 9% preferred equity) is one of the reasons why the CVPS acquisition is accretive.

- CVPS operates principally under cost-of-service regulation. The regulatory framework at CVPS enables the company to recover fuel, purchased power and transmission costs, along with capital program costs with minimal lag.
- Consistent with Fortis's other subsidiaries, CVPS will continue to operate as a separate company with its own board of directors and local management team. In addition, Fortis

will provide approximately \$21 million for the benefit of CVPS customers, in a manner to be determined through the regulatory approval process.

- If the acquisition does not proceed, Fortis is entitled to a termination fee of US\$17.5 million, along with the reimbursement of up to US\$2 million for prudently incurred expenses.
- Regulatory approvals are expected within 6–12 months.

An Update on Belize Electricity Limited

On June 13, Fortis issued a press release to communicate that the Government of Belize issued a media release on Friday, June 10, announcing that the government desired to purchase a majority interest in Belize Electricity Limited (“BEL”; 70% Fortis) in order to assume control of the company. Fortis has indicated that it has not yet received a proposal from the Government of Belize.

The government’s announcement is the latest development in the acrimonious relationship between BEL and the Government of Belize, which began in May 2008, when the Belize Public Utilities Commission (“PUC”) issued a preliminary decision on BEL’s 2008 rate application. At that time, the PUC denied BEL’s request to increase rates in response to rising commodity prices. Fortis subsequently commenced a legal challenge against the PUC’s decision. On March 15, 2011 the Supreme Court of Belize upheld the PUC’s jurisdiction to set rates, and noted in its ruling that “Good Utility Practice as defined by [the Independent Expert appointed by the Court] in his Report is not applicable to Belize.”

Unsurprisingly, Fortis has not been able to earn a fair return from its investment in BEL in over three years. In 2010, the earnings contribution from BEL was only \$1.5 million, whereas in previous years, it had been as high as \$10 million.

During follow-up conversations, Fortis management stated that while it would be willing to divest its investment in BEL, any sale would have to be completed at a reasonable price and Fortis would not be willing to sell anything less than its entire investment in BEL. At the time of writing, BEL had a book value of \$125 million (\$0.68/share). Fortis is also exposed to Belize through its investment in BECOL (a company that owns unregulated power generation in Belize), which has a current book value of approximately \$160 million (\$0.88/share).

We expect continued uncertainty with respect to Fortis’s Belizean investments in the coming months. In our view, we believe a best-case scenario would involve Fortis divesting both BEL and BECOL for cash proceeds at prices that exceed book value. A worst-case scenario would involve some sort of expropriation of these assets by the Government of Belize.

Although we believe the uncertainty with respect to Fortis’s Belizean operations is negative, we note that these assets represent a relatively small proportion of the company’s consolidated operations. We estimate that income from both BEL and BECOL represent approximately 6% of our 2012E EPS estimate.

Estimates

We have updated our estimates to reflect: (1) the \$300 million equity issuance; (2) the CVPS acquisition; and (3) a reduction in earnings from the Caribbean business segment to be consistent with net income reported in 2010.

Our 2011E diluted EPS estimate declines to \$1.71 from \$1.77 due to a combination of dilution from the \$300 million common share issuance, and reduced net income expectations from Fortis's Caribbean investments.

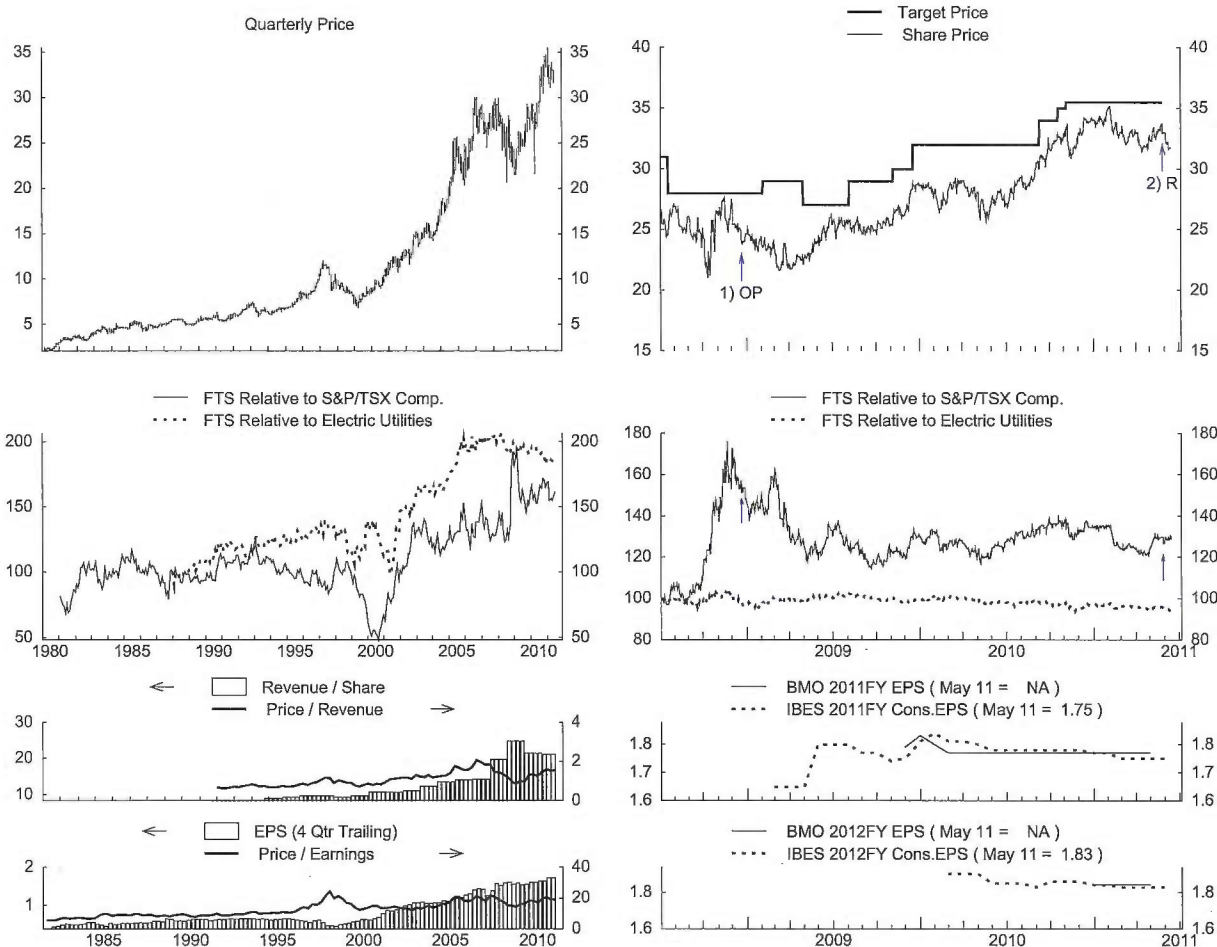

Our 2012E diluted EPS estimate increases slightly to \$1.86 from \$1.84, as expected accretion from the CVPS estimate is partially offset by a reduction in earnings from the Caribbean segment.

Disclosure 4: BMO Capital Markets or an affiliate has received compensation for investment banking services from this issuer within the past 12 months.

Disclosure 5: BMO Capital Markets or an affiliate received compensation for products or services other than investment banking services within the past 12 months.

Disclosure 6: This issuer is a client (or was a client) of BMO NB, BMO Capital Markets Corp., BMO CM Ltd. or an affiliate within the past 12 months: Investment Banking Services & Non-Securities Related Services.

Methodology and Risks to Price Target/Valuation

Methodology: Our target price is based on a weighted valuation approach: 18x diluted 2012E EPS (12.5%); 1.75x 2012E BVPS (12.5%) and a target yield of 3.50% based on 2012E dividends per share (75%).

Risks: Operations are subject to complex regulation by a variety of provincial, state and federal (Canada, Cayman Islands & Belize) agencies. Changes in regulation may adversely affect performance.

Ratings and Sector Key

We use the following ratings system definitions:

OP = Outperform - Forecast to outperform the market;

Mkt = Market Perform - Forecast to perform roughly in line with the market;

Und = Underperform - Forecast to underperform the market;

(S) = speculative investment;

NR = No rating at this time;

R = Restricted – Dissemination of research is currently restricted.

Market performance is measured by a benchmark index such as the S&P/TSX Composite Index, S&P 500, Nasdaq Composite, as appropriate for each company. BMO Capital Markets eight Top 15 lists guide investors to our best ideas according to different objectives (Canadian large, small, growth, value, income, quantitative; and US large, US small) have replaced the Top Pick rating.

Government of Belize Expropriates Fortis's 70% Ownership Interest in Belize Electricity Ltd.

Event

Fortis has announced that on Monday, June 20, the Government of Belize passed legislation and issued an order to expropriate Fortis's 70% interest in Belize Electricity Limited ("BEL") and dismiss BEL's board of directors.

Impact

Negative. In our research comment dated June 15 ([link](#)), we provided an update regarding BEL, specifically concerning comments made by the Government of Belize regarding its desire to acquire a majority interest in BEL and highlighted the possibility of government expropriation. Fortis is also exposed to Belize through its investment in BECOL, which owns unregulated power generation in the country. Although the government has not passed legislation to expropriate BECOL, BECOL may now experience difficulty collecting amounts billed to BEL for energy sales. We understand that BEL has a book value of \$125 million (\$0.68/share) and BECOL has a book value of \$160 million (\$0.88/share). Given this development, we believe Fortis may be required to record an impairment charge against its Belizean investments; however, its exposure to the country is relatively limited as BEL and BECOL represent less than 3% of total assets.

Forecasts

We removed the earnings contribution from BEL from our model on June 15. In order to be conservative, for periods after Q1/11 we have now eliminated all earnings contributions from BECOL.

Valuation

Our \$35 price target is based on a weighted valuation approach: 18x 2012E diluted EPS of \$1.86 (12.5%), 1.75x 2012E BVPS of \$20.92 (12.5%) and a target yield of 3.50%, assuming 2012E dividends per share of \$1.22 (75%).

Recommendation

While this development is unfortunate, we continue to believe that Fortis represents a compelling long-term investment. Our rating is Outperform.

Ratings and Sector Key

We use the following ratings system definitions:

OP = Outperform - Forecast to outperform the market;

Mkt = Market Perform - Forecast to perform roughly in line with the market;

Und = Underperform - Forecast to underperform the market;

(S) = speculative investment;

NR = No rating at this time;

R = Restricted – Dissemination of research is currently restricted.

Market performance is measured by a benchmark index such as the S&P/TSX Composite Index, S&P 500, Nasdaq Composite, as appropriate for each company. BMO Capital Markets eight Top 15 lists guide investors to our best ideas according to different objectives (Canadian large, small, growth, value, income, quantitative; and US large, US small) have replaced the Top Pick rating.

Updating Model to Reflect Termination of CVPS Merger Agreement and Overallotment Option

Event

We are updating our estimates to reflect: (1) Fortis's decision to terminate the Central Vermont Public Service Corp. (CVPS) merger agreement; and (2) the issuance of an additional 1.24 million common shares priced at \$33/share pursuant to the exercise of an overallotment option that was granted to underwriters on May 30, when the company announced it was issuing \$300.3 million of equity.

Impact

Slightly negative. The additional share issuance and decision to terminate the CVPS merger agreement has led to a reduction in our 2011E and 2012E EPS estimates. Somewhat positively, Fortis will receive a termination fee of US\$17.5 million from CVPS and a reimbursement of US\$2 million for expenses related to the proposed transaction.

Forecasts

Our EPS estimates decline to \$1.63 from \$1.64 in 2011E and to \$1.70 from \$1.78 in 2012E. We have not included the merger termination fee in our 2011E estimates as it represents a non-recurring gain.

Valuation

Our \$35 price target is based on a weighted valuation approach: 18x 2012E diluted EPS of \$1.70 (12.5%); 1.75x 2012E BVPS of \$20.66 (12.5%); and a target yield of 3.50%, assuming 2012E dividends per share of \$1.22 (75%).

Recommendation

At current levels, we believe the shares are attractively valued. Our rating is Outperform.

Disclosure 1: BMO Capital Markets has undertaken an underwriting liability with respect to this issuer within the past 12 months.

Disclosure 2: BMO Capital Markets has provided investment banking services with respect to this issuer within the past 12 months.

Disclosure 3: BMO Capital Markets has managed or co-managed a public offering of securities with respect to this issuer within the past 12 months.

Disclosure 4: BMO Capital Markets or an affiliate has received compensation for investment banking services from this issuer within the past 12 months.

Disclosure 5: BMO Capital Markets or an affiliate received compensation for products or services other than investment banking services within the past 12 months.

Disclosure 6: This issuer is a client (or was a client) of BMO NB, BMO Capital Markets Corp., BMO CM Ltd. or an affiliate within the past 12 months: Investment Banking Services & Non-Securities Related Services.

Methodology and Risks to Price Target/Valuation

Methodology: Our target price is based on a weighted valuation approach: 18x diluted 2012E EPS (12.5%); 1.75x 2012E BVPS (12.5%) and a target yield of 3.50% based on 2012E dividends per share (75%).

Risks: Operations are subject to complex regulation by a variety of provincial, state and federal (Canada, Cayman Islands & Belize) agencies. Changes in regulation may adversely affect performance.

Ratings and Sector Key

We use the following ratings system definitions:

OP = Outperform - Forecast to outperform the market;

Mkt = Market Perform - Forecast to perform roughly in line with the market;

Und = Underperform - Forecast to underperform the market;

(S) = speculative investment;

NR = No rating at this time;

R = Restricted – Dissemination of research is currently restricted.

Market performance is measured by a benchmark index such as the S&P/TSX Composite Index, S&P 500, Nasdaq Composite, as appropriate for each company. BMO Capital Markets eight Top 15 lists guide investors to our best ideas according to different objectives (Canadian large, small, growth, value, income, quantitative; and US large, US small) have replaced the Top Pick rating.

Q2/11 Earnings in Line

Impact

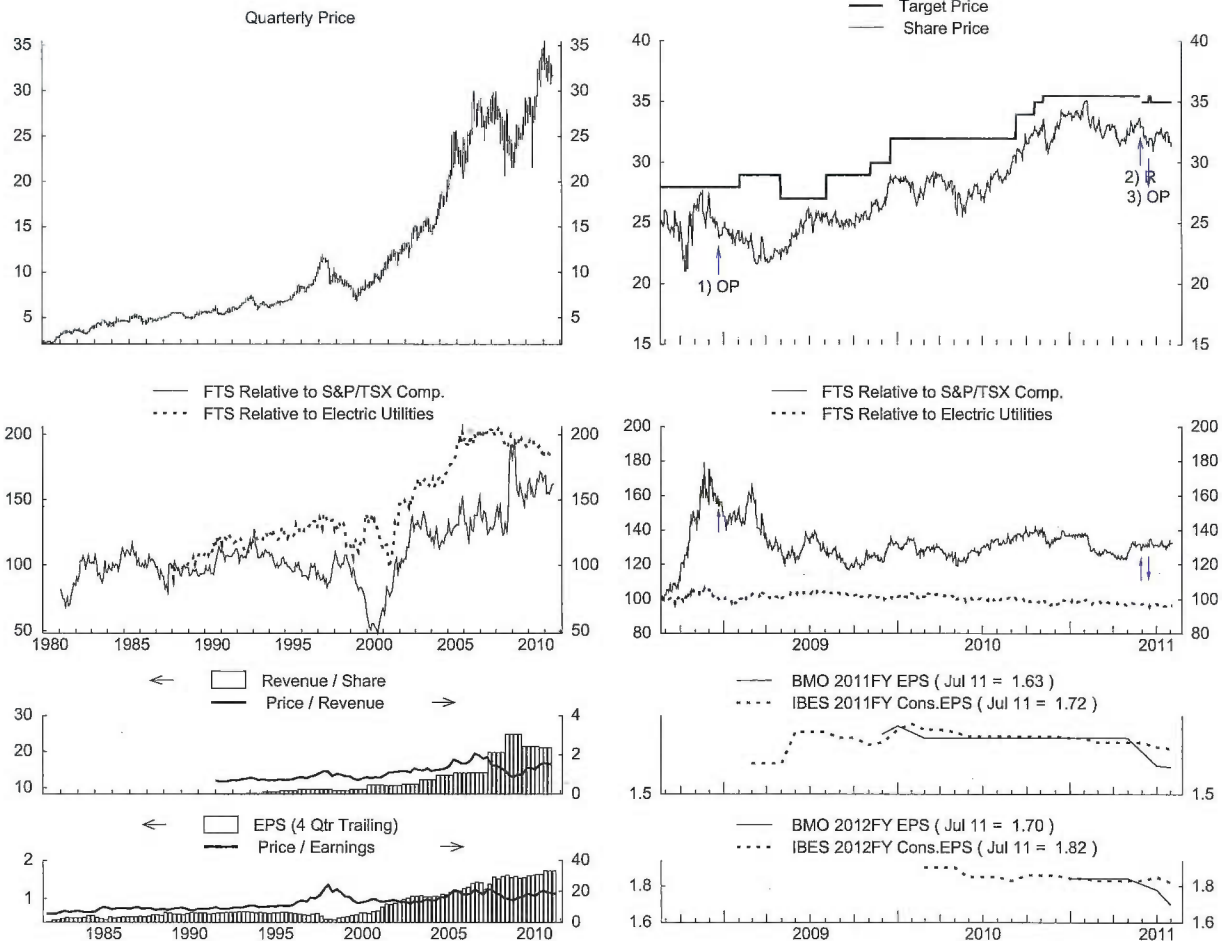

Neutral

Details & Analysis

Fortis reported Q2/11 EPS of \$0.33, which was consistent with our estimate of \$0.34 and the First Call Mean estimate of \$0.35 (range \$0.34–0.36). Earnings from the majority of the company's business segments were generally in line with our estimates, with slightly stronger-than-expected results at the "Other Canadian" utilities (FortisOntario and Maritime Electric) offsetting slightly weaker-than-expected results at the FortisBC Energy companies (formerly the Terasen Companies). Disclosure in the earnings release noted that Fortis's investment in BECOL, the non-regulated entity that sells electricity to Belize Electricity Limited, has not been affected by the Government of Belize's decision to expropriate the assets of Belize Electricity Limited at this time. There was no change to the company's 2011E capital expenditure estimate of \$1.2 billion; however, the company has increased its five-year capital expenditure estimate to \$5.7 billion from \$5.5 billion previously.

This report was prepared by an analyst(s) employed by BMO Nesbitt Burns Inc., and who is (are) not registered as a research analyst(s) under FINRA rules. For disclosure statements, including the Analyst's Certification, please refer to pages 2 to 5.

 Michael.McGowan@bmo.com
 Assoc: Mark Laing, CA, CFA

Q2/11 Slightly Below Expectations; Outperform Rating Maintained

Event

Fortis reported Q2/11 EPS of \$0.33. After adjusting for \$2 million in revenue related to the implementation of a smart meter program at FortisAlberta in 2010, we believe recurring EPS were \$0.32 or slightly lower than our estimate of \$0.34 and the First Call Mean estimate of \$0.35 (range \$0.34–0.36).

Impact

Neutral. We view the Q2/11 results as neutral to our outlook. Although reported EPS was slightly below our estimate and consensus, due to the nature of Fortis's business we attribute the majority of the variance to seasonality. For example, Q1/11 results exceeded consensus by \$0.05/share, while Q2/11 earnings were approximately \$0.02/share below consensus.

Forecasts

We have updated our model to reflect Q2/11 results and the estimated rate base balances set out in the revenue requirement applications for the FortisBC Energy and FortisBC Electricity companies. There is no change to our 2011E EPS estimate and our 2012E EPS estimate increases to \$1.71 from \$1.70.

Valuation

Our \$35 target price is based on a weighted valuation approach: 18x 2012E diluted EPS of \$1.71 (12.5%), 1.75x 2012E BVPS of \$20.61 (12.5%) and a target yield of 3.50%, assuming 2012E dividends per share of \$1.22 (75%).

Recommendation

Due to its track record of earnings and dividend growth, combined with the company's large capital expenditure plan, we continue to believe that Fortis represents a good long-term investment, especially at current valuation levels. Our rating is Outperform.

Q2/11 Slightly Below Expectations; Likely Due to Seasonality

Fortis reported Q2/11 EPS of \$0.33. After adjusting for \$2 million in revenue related to the implementation of a smart meter program at FortisAlberta in 2010, we believe recurring EPS were \$0.32 or slightly lower than our estimate of \$0.34 and the First Call Mean estimate of \$0.35 (range \$0.34–0.36).

We view the Q2/11 results as neutral to our outlook. Although reported EPS was slightly below our estimate and consensus, due to the nature of Fortis's businesses, we attribute the majority of the variance to seasonality. For example, Q1/11 results exceeded consensus by \$0.05/share, while Q2/11 earnings were approximately \$0.02/share below consensus.

With respect to growth, we expect Fortis to continue to evaluate the potential acquisition of regulated natural gas or electric utilities in the U.S. Although Fortis was not successful in its attempt to acquire Central Vermont Public Service Corp. ("CVPS"), Fortis management believes that the proposed acquisition has raised the company's profile among U.S. utilities contemplating a transaction.

Notwithstanding acquisitions, Fortis will continue to advance its capital expenditure program in order to drive organic growth. The company has maintained 2011E capital expenditure guidance of \$1.2 billion; however, it has increased its five-year capital expenditure guidance to \$5.7 billion from \$5.5 billion. The majority of this spending is expected to occur at the company's regulated utilities. Fortis also continues to evaluate a number of other opportunities to grow rate base, such as investments in new natural gas infrastructure. For example, the company is considering seeking regulatory approval to invest in fuelling stations that would be used by large industrial/commercial vehicles that rely on natural gas as fuel, as opposed to more traditional fuels such as diesel or gasoline. We understand that Fortis also continues to pursue the development of large-scale transmission infrastructure in Ontario, although the company acknowledges that this may be a longer-term initiative.

Although the company has experienced two significant developments recently (the termination of the CVPS merger agreement, and the decision by the Government of Belize to expropriate Fortis's investment in Belize Electricity Limited), we believe that Fortis is ready to move forward. With respect to CVPS, pursuant to the terms of the merger agreement, Fortis received a break fee of \$17.5 million and will be reimbursed for \$2 million of expenses. In addition, when the expropriation of BEL was announced, we removed all contributions from Belize Electricity Limited and BECOL from our estimates. In our view, any incremental earnings combined with subsequent collection of accounts receivable related to unregulated generation at BECOL should be viewed positively.

Due to its track record of earnings and dividend growth, combined with the company's large capital expenditure plan, we continue to believe that Fortis represents a good long-term investment, especially at current valuation levels. Our \$35 price target is based on a weighted valuation approach: 18x 2012E diluted EPS of \$1.71 (12.5%), 1.75x 2012E BVPS of \$20.61 (12.5%) and a target yield of 3.50%, assuming 2012E dividends per share of \$1.22 (75%).

At current levels, we believe the company's shares are attractively valued. Our rating is Outperform.

Q2/11 Results

As set out in Table 1, on a comparable basis, net income increased by 1.8% in Q2/11 versus Q2/10. In order to present results on a comparable basis, Q2/11 GAAP income was adjusted for the recognition of \$2 million of accrued revenue, which relates to the implementation of a smart metering program at FortisAlberta in 2010.

A discussion of the operating performance of each business segment follows.

Regulated Gas Utilities – FortisBC Energy Companies

Q2/11 net income of \$15 million from FortisBC Energy was less than our estimate of \$17 million and Q2/10 net income of \$17 million. We attribute the majority of the variance to seasonality, as timing differences resulted in a higher proportion of expenses recorded in Q2/11 compared to Q2/10.

Regulated Electric Utilities – FortisAlberta

Adjusted Q2/11 net income of \$17 million was less than our estimate of \$18.6 million and consistent with Q2/10 net income of \$17 million.

Regulated Electric Utilities – FortisBC

Q2/11 net income of \$9 million was consistent with our estimate of \$9 million and slightly greater than Q2/10 net income of \$8 million. The increase in earnings was largely driven by higher electricity sales during the quarter (682 GWh in Q2/11 vs. 671 GWh in Q2/10) and rate base growth, due to infrastructure investments.

Regulated Electric Utilities – Newfoundland Power

Q2/11 net income of \$11 million was consistent with our estimate of \$10.9 million and Q2/10 net income of \$11 million.

Regulated Electric Utilities – Other Canadian

Q2/11 net income of \$6 million was greater than our estimate of \$4.5 million and Q2/10 net income of \$4 million. The increase in earnings was primarily due to electricity sales growth (562 GWh in Q2/11 vs. 535 GWh in Q2/10), and a 3.8% rate increase at Algoma Power that became effective on December 1, 2010.

Regulated Utilities – Caribbean

The earnings contribution from the Caribbean business segment was \$7 million in Q2/11 versus our estimate of \$6.8 million and Q2/10 net income of \$7 million.

Unregulated – Fortis Generation

Fortis Generation reported Q2/11 net income of \$2 million, which was greater than our estimate of \$1.4 million and Q2/10 net income of \$3 million. The difference between Q2/11 and Q2/10 results was largely due to decreased production in Belize. In order to be conservative, we removed all earnings contribution from BECOL from our estimates after Q1/11, following the announcement on June 20 that the Government of Belize had expropriated Fortis's 70% interest in Belize Electricity Limited ("BEL"). As at July 31, BEL owed BECOL US\$6.5 million for overdue energy purchases. The last payment that BECOL received for overdue energy purchases was for US\$0.5 million on July 11. Disclosure in the earnings release suggests that the Government of Belize does not intend to expropriate BECOL, and that BECOL continues to deliver electricity to BEL and invoice BEL for deliveries. Due to our conservative outlook, our model does not anticipate earnings future earnings from BECOL; however, we believe that any incremental earnings, combined with subsequent collection of accounts receivable related to unregulated generation at BECOL should be viewed positively.

Unregulated – Fortis Properties

Fortis Properties reported net income of \$7 million, which was lower than our estimate of \$9 million and Q2/10 net income of \$8 million. Decreased occupancy at hospitality properties in Western Canada was responsible for the decline. Occupancy at the real estate division decreased to 93.4% at the end of the quarter versus 94.8% at the end of Q2/10. At the hospitality division, revenue per available room decreased slightly to \$83.57 during Q2/11 versus \$83.77 during Q2/10.

Revised Capital Expenditure Forecast

There was no change to the company's 2011E capital expenditure of \$1.2 billion; however, the company has increased its five-year capital expenditure estimate to \$5.7 billion from \$5.5 billion previously. Approximately 61% of the total relates to the regulated electric utilities, 23% relates to the regulated gas utilities and 16% relates to Fortis's non-regulated businesses.

Regulatory Update

After a lull in 2010, we expect 2011 to be relatively busy from a regulatory perspective. The Alberta Utilities Commission (AUC) is currently moving forward with a Generic Cost of Capital proceeding. The formal hearing began on June 20, 2011 and the AUC is expected to issue a cost of capital decision by the end of the year. The AUC is also exploring the implementation of Performance Based Regulation; however, we understand that a final decision on PBR is not expected until mid-2012.

In addition to the broad regulatory initiatives outlined above, a number of Fortis's utilities are expected to make rate or other filings in 2011:

- The FortisBC Energy utilities (formerly the Terasen companies) are expected to pursue an amalgamation during Q3/11;
- In May 2011, the FortisBC Energy utilities filed revenue requirements applications for 2012–2013. FortisBC Energy Inc. is seeking a return on estimated mid-year rate bases of \$2,737 million in 2012E and \$2,788 million in 2013E, and FortisBC Energy Inc. Vancouver Island is seeking a return on estimated mid-year rate bases of \$788 million in 2012E and \$814 million in 2013E;
- In June 2011, FortisBC Electric filed a Revenue Requirement Application and Integrated System Plan for 2012 – 2013, in which it is seeking a return on estimated mid-year net rate bases of \$1,145 million in 2012E, and \$1,212 million in 2013E;
- Effective September 2011, the interim Government of the Turks and Caicos Islands plans to implement a carbon tax, which will be applicable to Fortis Turks and Caicos. In the event that this tax is not permitted to be passed onto Fortis Turks and Caicos' customers, the potential impact to earnings would be approximately \$1 million in 2011 and \$2–3 million on an annual basis.

Estimates

We have updated our model to reflect Q2/11 results and the estimated rate base balances set out in the revenue requirement applications for the FortisBC Energy and FortisBC Electricity companies. There is no change to our 2011E EPS estimate and our 2012E EPS estimate increases to \$1.71 from \$1.70.

IMPORTANT DISCLOSURES

Analyst's Certification

I, Michael McGowan, CA, CFA, hereby certify that the views expressed in this report accurately reflect my personal views about the subject securities or issuers. I also certify that no part of my compensation was, is, or will be, directly or indirectly, related to the specific recommendations or views expressed in this report.

Analysts who prepared this report are compensated based upon (among other factors) the overall profitability of BMO Capital Markets and their affiliates, which includes the overall profitability of investment banking services. Compensation for research is based on effectiveness in generating new ideas and in communication of ideas to clients, performance of recommendations, accuracy of earnings estimates, and service to clients.

Company Specific Disclosure

Disclosure 1: BMO Capital Markets has undertaken an underwriting liability with respect to this issuer within the past 12 months.

Disclosure 2: BMO Capital Markets has provided investment banking services with respect to this issuer within the past 12 months.

Disclosure 3: BMO Capital Markets has managed or co-managed a public offering of securities with respect to this issuer within the past 12 months.

Disclosure 4: BMO Capital Markets or an affiliate has received compensation for investment banking services from this issuer within the past 12 months.

Disclosure 5: BMO Capital Markets or an affiliate received compensation for products or services other than investment banking services within the past 12 months.

Disclosure 6: This issuer is a client (or was a client) of BMO NB, BMO Capital Markets Corp., BMO CM Ltd. or an affiliate within the past 12 months: Investment Banking Services & Non-Securities Related Services.

Methodology and Risks to Price Target/Valuation

Methodology: Our target price is based on a weighted valuation approach: 18x diluted 2012E EPS (12.5%); 1.75x 2012E BVPS (12.5%) and a target yield of 3.50% based on 2012E dividends per share (75%).

Risks: Operations are subject to complex regulation by a variety of provincial, state and federal (Canada, Cayman Islands & Belize) agencies. Changes in regulation may adversely affect performance.

Ratings and Sector Key

We use the following ratings system definitions:

OP = Outperform - Forecast to outperform the market;

Mkt = Market Perform - Forecast to perform roughly in line with the market;

Und = Underperform - Forecast to underperform the market;

(S) = speculative investment;

NR = No rating at this time;

R = Restricted – Dissemination of research is currently restricted.

Market performance is measured by a benchmark index such as the S&P/TSX Composite Index, S&P 500, Nasdaq Composite, as appropriate for each company. BMO Capital Markets eight Top 15 lists guide investors to our best ideas according to different objectives (Canadian large, small, growth, value, income, quantitative; and US large, US small) have replaced the Top Pick rating.

Introducing 2013E Estimates; Outperform Rating Maintained

Event

We are introducing our 2013E estimates.

Impact

Slightly Positive.

Forecasts

We are introducing 2013E diluted EPS and DPS of \$1.78 and \$1.26 respectively. EPS and DPS growth is largely driven by Fortis's capital expenditure program, through which the company plans to invest \$5.7 billion in its business during the next five years. Our 2011E and 2012E diluted EPS and DPS estimates remain unchanged.

Valuation

Our revised \$35.50 target price (previously \$35) is based on a weighted valuation approach: 18x 2013E EPS of \$1.78 (12.5%); 1.75x 2013E BVPS of \$21.59 (12.5%); and a target yield of 3.50%, assuming 2013E dividends per share of \$1.26.

Recommendation

Due to its track record of earnings and dividend growth, combined with the company's large capital expenditure program, we continue to believe Fortis represents a good long-term investment, especially at current valuation levels. Our rating is Outperform.

IMPORTANT DISCLOSURES

Analyst's Certification

I, Michael McGowan, CA, CFA, hereby certify that the views expressed in this report accurately reflect my personal views about the subject securities or issuers. I also certify that no part of my compensation was, is, or will be, directly or indirectly, related to the specific recommendations or views expressed in this report.

Analysts who prepared this report are compensated based upon (among other factors) the overall profitability of BMO Capital Markets and their affiliates, which includes the overall profitability of investment banking services. Compensation for research is based on effectiveness in generating new ideas and in communication of ideas to clients, performance of recommendations, accuracy of earnings estimates, and service to clients.

Company Specific Disclosure

Disclosure 1: BMO Capital Markets has undertaken an underwriting liability with respect to this issuer within the past 12 months.

Disclosure 2: BMO Capital Markets has provided investment banking services with respect to this issuer within the past 12 months.

Disclosure 3: BMO Capital Markets has managed or co-managed a public offering of securities with respect to this issuer within the past 12 months.

Disclosure 4: BMO Capital Markets or an affiliate has received compensation for investment banking services from this issuer within the past 12 months.

Disclosure 5: BMO Capital Markets or an affiliate received compensation for products or services other than investment banking services within the past 12 months.

Disclosure 6: This issuer is a client (or was a client) of BMO NB, BMO Capital Markets Corp., BMO CM Ltd. or an affiliate within the past 12 months: Investment Banking Services & Non-Securities Related Services.

Methodology and Risks to Price Target/Valuation

Methodology: Our target price is based on a weighted valuation approach: 18x diluted 2012E EPS (12.5%); 1.75x 2012E BVPS (12.5%) and a target yield of 3.50% based on 2012E dividends per share (75%).

Risks: Operations are subject to complex regulation by a variety of provincial, state and federal (Canada, Cayman Islands & Belize) agencies. Changes in regulation may adversely affect performance.

Ratings and Sector Key

We use the following ratings system definitions:

OP = Outperform - Forecast to outperform the market;

Mkt = Market Perform - Forecast to perform roughly in line with the market;

Und = Underperform - Forecast to underperform the market;

(S) = speculative investment;

NR = No rating at this time;

R = Restricted – Dissemination of research is currently restricted.

Market performance is measured by a benchmark index such as the S&P/TSX Composite Index, S&P 500, Nasdaq Composite, as appropriate for each company. BMO Capital Markets eight Top 15 lists guide investors to our best ideas according to different objectives (Canadian large, small, growth, value, income, quantitative; and US large, US small) have replaced the Top Pick rating.

Company Description – Fortis Inc. (Fortis) is a publicly listed holding company with four key businesses: electric utility operations, regulated natural gas distribution, non-regulated electric power generation and non-utility property activities. Gas and electric utility operations include Newfoundland Power (100%), Maritime Electric (100%, PEI), Fortis Ontario (100%), Belize Electricity (70.1%), Caribbean Utilities (59.5%, Grand Cayman Island), Turks

and Caicos (100%), FortisAlberta (100%), FortisBC (100%) and the Terasen Gas Companies (100%, British Columbia).
 Website: fortisinc.com

Recent Results – Fortis reported Q2/11 EPS of \$0.33. After adjusting for \$2 million in revenue related to the implementation of a smart meter program at FortisAlberta in 2010, we believe recurring EPS were \$0.32 or slightly lower

This report was prepared by an analyst(s) employed by BMO Nesbitt Burns Inc., and who is (are) not registered as a research analyst(s) under FINRA rules. For disclosure statements, including the Analyst's Certification, please refer to pages 3 to 5.

than our estimate of \$0.34 and the First Call Mean estimate of \$0.35 (range \$0.34–0.36).

Corporate Developments – The company has maintained 2011E capital expenditure guidance of \$1.2 billion; however, it has increased its five-year capital expenditure guidance to \$5.7 billion from \$5.5 billion. Approximately 61% of the total relates to the regulated electric utilities, 23% relates to the regulated gas utilities and 16% relates to Fortis' non-regulated businesses.

On July 12, 2011, Fortis announced its decision to terminate the Central Vermont Public Service Corp. (CVPS) merger following the determination by the board of directors that the unsolicited proposal received from Gaz Metro Limited Partnership was a "superior proposal." Fortis received a termination fee of US\$17.5 million from CVPS and a reimbursement of US\$2 million for expenses.

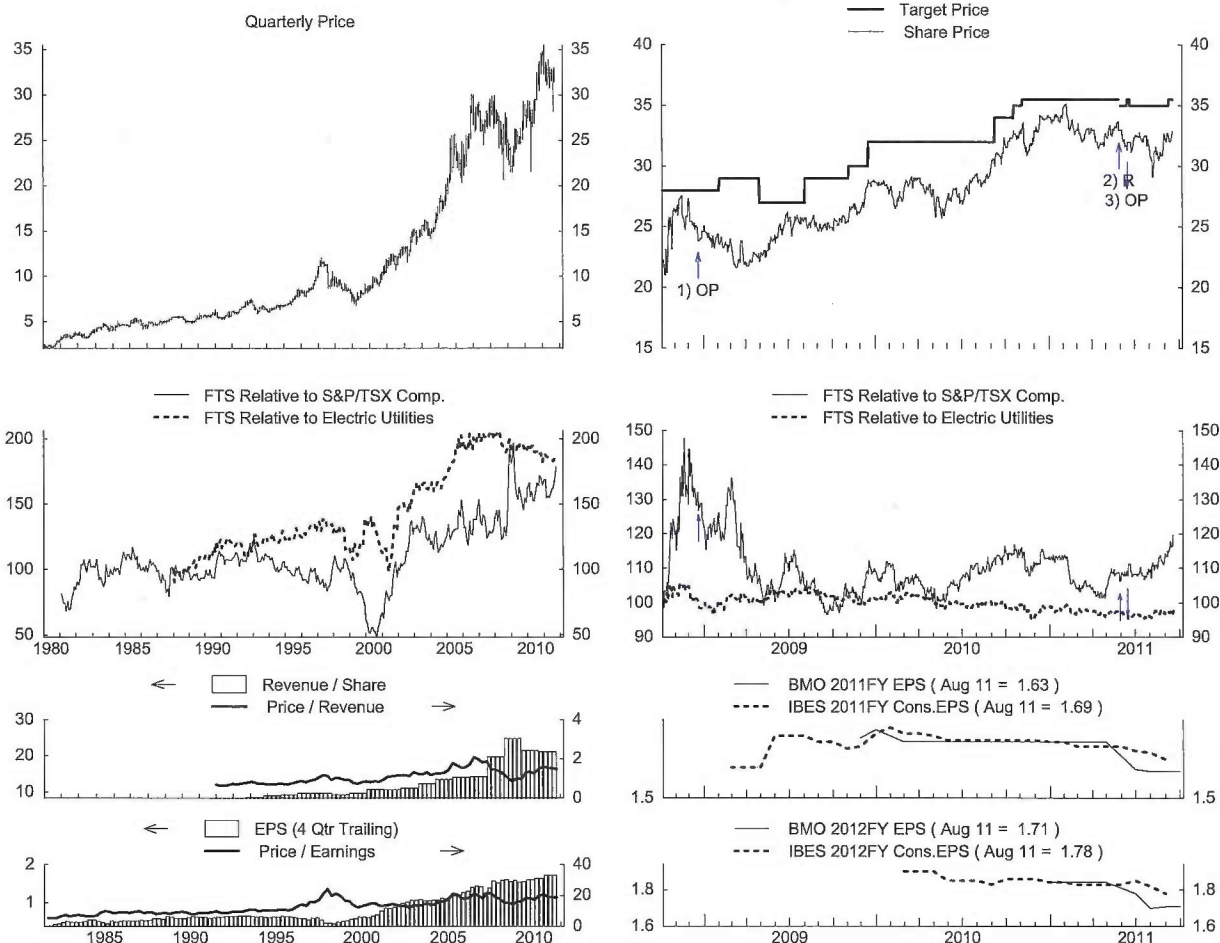

On June 20, 2011, the Government of Belize passed legislation and issued an order to expropriate Fortis's 70% interest in Belize Electricity Limited ("BEL") and dismiss BEL's board of directors.

Forecasts – Our diluted EPS estimates are \$1.63 in 2011, \$1.71 in 2012 and \$1.78 in 2013.

Valuation – Our \$35.50 target price is based on a weighted valuation approach: 18x 2013E diluted EPS of \$1.78 (12.5%), 1.75x 2013E BVPS of \$21.59 (12.5%) and a target yield of 3.50%, assuming 2013E dividends per share of \$1.26 (75%).

Recommendation – Due to its track record of earnings and dividend growth, combined with the company's large capital expenditure plan, we continue to believe that Fortis represents a good long-term investment, especially at current valuation levels. Our rating is Outperform. Member of Top 15 Large Cap and Income stock selections.

IMPORTANT DISCLOSURES**Analyst's Certification**

I, Michael McGowan, CA, CFA, hereby certify that the views expressed in this report accurately reflect my personal views about the subject securities or issuers. I also certify that no part of my compensation was, is, or will be, directly or indirectly, related to the specific recommendations or views expressed in this report.

Analysts who prepared this report are compensated based upon (among other factors) the overall profitability of BMO Capital Markets and their affiliates, which includes the overall profitability of investment banking services. Compensation for research is based on effectiveness in generating new ideas and in communication of ideas to clients, performance of recommendations, accuracy of earnings estimates, and service to clients.

Methodology and Risks to Price Target/Valuation

Methodology: Our target price is based on a weighted valuation approach: 18x diluted 2012E EPS (12.5%); 1.75x 2012E BVPS (12.5%) and a target yield of 3.50% based on 2012E dividends per share (75%).

Risks: Operations are subject to complex regulation by a variety of provincial, state and federal (Canada, Cayman Islands & Belize) agencies. Changes in regulation may adversely affect performance.

Company Specific Disclosure

Disclosure 1: BMO Capital Markets has undertaken an underwriting liability with respect to this issuer within the past 12 months.

Disclosure 2: BMO Capital Markets has provided investment banking services with respect to this issuer within the past 12 months.

Disclosure 3: BMO Capital Markets has managed or co-managed a public offering of securities with respect to this issuer within the past 12 months.

Disclosure 4: BMO Capital Markets or an affiliate has received compensation for investment banking services from this issuer within the past 12 months.

Disclosure 5: BMO Capital Markets or an affiliate received compensation for products or services other than investment banking services within the past 12 months.

Disclosure 6: This issuer is a client (or was a client) of BMO NB, BMO Capital Markets Corp., BMO CM Ltd. or an affiliate within the past 12 months: Investment Banking Services & Non-Securities Related Services.

Q3/11 Results Slightly Greater Than Expected

Impact

Neutral

Details & Analysis

Fortis reported Q3/11 GAAP EPS of \$0.30. After adjusting for the receipt of an \$11 million (after-tax) break fee related to the termination of the CVPS merger agreement, and a \$2.5 million (after-tax) net foreign exchange gain associated with the company's investment in Belize Electricity Limited, which was expropriated by the Government of Belize on June 20, 2011, we believe that recurring EPS were \$0.24. Recurring EPS were slightly greater than our estimate of \$0.22 and the First Call Mean estimate of \$0.23 (range \$0.22–0.24). The difference between actual and expected EPS was largely due to stronger-than-anticipated earnings at Fortis Generation. Earnings from the company's other business segments were generally consistent with our estimates. There were no changes to the company's long-term capital expenditure program. Fortis continues to forecast 2011E capital expenditures of \$1.2 billion and capital expenditures of \$5.7 billion during the next five years. Overall, this appears to have been a steady quarter.

This report was prepared by an analyst(s) employed by BMO Nesbitt Burns Inc., and who is (are) not registered as a research analyst(s) under FINRA rules. For disclosure statements, including the Analyst's Certification, please refer to pages 2 to 5.

IMPORTANT DISCLOSURES**Analyst's Certification**

I, Michael McGowan, CA, CFA, hereby certify that the views expressed in this report accurately reflect my personal views about the subject securities or issuers. I also certify that no part of my compensation was, is, or will be, directly or indirectly, related to the specific recommendations or views expressed in this report.

Analysts who prepared this report are compensated based upon (among other factors) the overall profitability of BMO Capital Markets and their affiliates, which includes the overall profitability of investment banking services. Compensation for research is based on effectiveness in generating new ideas and in communication of ideas to clients, performance of recommendations, accuracy of earnings estimates, and service to clients.

Company Specific Disclosure

Disclosure 1: BMO Capital Markets has undertaken an underwriting liability with respect to this issuer within the past 12 months.

Disclosure 2: BMO Capital Markets has provided investment banking services with respect to this issuer within the past 12 months.

Disclosure 3: BMO Capital Markets has managed or co-managed a public offering of securities with respect to this issuer within the past 12 months.

Disclosure 4: BMO Capital Markets or an affiliate has received compensation for investment banking services from this issuer within the past 12 months.

Disclosure 5: BMO Capital Markets or an affiliate received compensation for products or services other than investment banking services within the past 12 months.

Disclosure 6: This issuer is a client (or was a client) of BMO NB, BMO Capital Markets Corp., BMO CM Ltd. or an affiliate within the past 12 months: Investment Banking Services & Non-Securities Related Services.

Methodology and Risks to Price Target/Valuation

Methodology: Our target price is based on a weighted valuation approach: 18x diluted 2012E EPS (12.5%); 1.75x 2012E BVPS (12.5%) and a target yield of 3.50% based on 2012E dividends per share (75%).

Risks: Operations are subject to complex regulation by a variety of provincial, state and federal (Canada, Cayman Islands & Belize) agencies. Changes in regulation may adversely affect performance.

Ratings and Sector Key

We use the following ratings system definitions:

OP = Outperform - Forecast to outperform the market;

Mkt = Market Perform - Forecast to perform roughly in line with the market;

Und = Underperform - Forecast to underperform the market;

(S) = speculative investment;

NR = No rating at this time;

R = Restricted – Dissemination of research is currently restricted.

Market performance is measured by a benchmark index such as the S&P/TSX Composite Index, S&P 500, Nasdaq Composite, as appropriate for each company. BMO Capital Markets eight Top 15 lists guide investors to our best ideas according to different objectives (Canadian large, small, growth, value, income, quantitative; and US large, US small) have replaced the Top Pick rating.

COMPANY DESCRIPTION:

Fortis Inc. is a diversified, international electric utility holding company with assets over \$12.5 billion. Regulated holdings include electric distribution utilities in Alberta, BC, Ontario, Newfoundland, PEI and three Caribbean countries and a natural gas utility in BC. Fortis owns non-regulated generation assets across Canada and in Belize and New York State. It also owns and operates hotels and commercial real estate in Canada.

All amounts in C\$ unless otherwise noted.

Our C\$33.00 target price is derived from a combination of valuation metrics that include earnings and dividend yields relative to long-term interest rates, dividend discount models and earnings and cash flow multiples relative to both historical valuation and Fortis' utility and pipeline peers.

Infrastructure -- Utilities**STEADY AND STABLE -- Q3 RESULTS IN-LINE****Investment recommendation**

Fortis Inc. reported third quarter earnings of \$0.24 per share versus \$0.23 reported in Q3/10, in line with expectations. The company's earnings have benefited from ~\$600 million of capital expenditures in the utility businesses this year, which has mainly been invested in western Canadian utility operations. In total, capex is forecast to reach \$1.2 billion for 2011 across all segments (\$806 million spent to date), and \$5.7 billion budgeted for the five-year period, 2011 through 2015. With approximately 90% of the company's earnings generated from utility operations, rate base additions within the utility segments are expected to be the primary drivers of earnings growth. As a result, we expect to see consistent and stable growth in earnings and dividends going forward. However, we note that the company continues to pursue acquisitions of U.S.-based utility assets which could potentially have an impact on future earnings growth. We are maintaining our HOLD rating and 12-month C\$33.00 target price.

Investment highlights

- Reported Q3 recurring EPS of \$0.24, in line with consensus
- Maintaining HOLD rating and C\$33.00 target price
- No changes to 2011 and 2012 EPS estimates
 - 2011 EPS estimate: \$1.70
 - 2012 EPS estimate: \$1.75
- Received a C\$18.8 million (\$11 million after-tax) termination fee for the unsuccessful Central Vermont Public Service (CVPS) acquisition bid
- Belize Electricity expropriation compensation proceedings are ongoing with the Belize government
 - \$112 million book value
 - No earnings recorded this quarter; \$2 million contribution in Q3 last year

Canaccord Genuity is the global capital markets group of Canaccord Financial Inc. (CF : TSX | CF. : AIM)

The recommendations and opinions expressed in this Investment Research accurately reflect the Investment Analyst's personal, independent and objective views about any and all the Designated Investments and Relevant Issuers discussed herein. For important information, please see the Important Disclosures section in the appendix of this document or visit Canaccord Genuity's [Online Disclosure Database](#).

Valuation

We are maintaining our 12-month target price for Fortis at C\$33.00. Our target price is derived from a combination of valuation metrics that include earnings and dividend yields relative to long-term interest rates, dividend discount models and earnings and cash flow multiples relative to both historical valuation and Fortis' utility and pipeline peers.

Outlook

We are making no changes to our 2011 and 2012 earnings per share estimates of \$1.70 and \$1.75, respectively. The company's capex program in the utilities segment, primarily in western Canada, has been the driving force of earnings growth this year, and should continue to do so through 2015. Fortis' capital expenditure budget remains unchanged with the company planning to spend \$5.7 billion from 2011 through 2015, of which \$4.8 billion is toward its electric and gas utilities (mainly in BC and Alberta). This should help provide relatively steady growth in earnings throughout the period. The company's Caribbean operations continue to face challenges which have limited the segment's contribution in recent years. Fortis has not received compensation for the Belize Electric assets expropriated in June this year. Proceedings to determine a value are ongoing and we note that the potential loss is limited to its book value (\$112 million net asset value or \$0.60 per share). While we believe the company will receive some compensation for Belize Electric, we do not expect a resolution in the near-term.

In addition to organic growth projects, the company continues to seek potential acquisitions. Although the company's recent offer for Central Vermont Public Service was not consummated, earnings and cash flow benefited from the \$18.8 million (US\$17.5 million) termination fee. More important, we were pleased to see management remain focused and disciplined and withdraw from the process when the transaction price was bid higher. Management continues to look for regulated natural gas and electric operations in the United States and believes it has the capability to finance up to a \$5 billion acquisition (enterprise value) on its balance sheet, but would consider a financial partner for larger acquisitions.

Third quarter earnings summary

Fortis reported third quarter recurring earnings per share of \$0.24, in line with both our and the consensus estimate of \$0.23. Regulated earnings were \$5 million (\$0.03 per share) higher compared to the same period last year. A bulk of the improvement was driven by rate base capital expenditures at FortisBC Energy (formerly Terasen) and Fortis Alberta. The increases were partially offset by the loss of ~\$2 million (\$0.01 per share) of earnings from the expropriation of Belize Electric. The company's non-regulated operations performed in line with last year during the same period. Note that we removed the one-time \$18.8 million (\$11 million after-tax) payment received from the termination of the CVPS Merger Agreement and \$2.5 million on unrealized non-cash foreign exchange gains. For the third quarter, the company reported net earnings per share of \$0.31 versus \$0.26 last year. For the first nine months of the year, the recurring earnings per share was \$1.30, ahead of the \$1.16 recorded last year. For additional details on third quarter results, please refer to Figure 1.

Noteworthy items

- CVPS termination fee CAD\$18.8 million
 - US\$17.5 million
 - Also received US\$2 million for transaction expenses
 - Acquired 160-room full-service Hilton Suites Winnipeg Airport hotel for \$25 million
 - Received municipal approval to construct \$50 million office building
 - 12-storeys in downtown St. John
 - Construction expected to be complete in 2H/13
 - Regulatory
 - Fortis BC Energy gas companies
 - Filed updated 2012-2013 rate applications in September 2011
 - Decision expected in late Q1/12
 - Filed application to amalgamate the three FortisBC Energy gas companies
 - Newfoundland Power completed the sale of joint-use poles back to Bell Aliant (BA : TSX | HOLD)
 - Will use funds to pay down debt
 - Caribbean Utilities
 - Expects to file 2012-2016 capital investment plan in Q4/11
 - Will sign PPAs to accept up to 13 MW of renewable power from IPPs
 - Fortis Turks and Caicos
 - Filed a request for a change in the rate structure and a 6% increase in base rates
 - Carbon tax expected to be implemented September 2011
 - Has not yet been implemented
-

- 14 Other specific disclosures as described above.

Canaccord Genuity is the business name used by certain subsidiaries of Canaccord Financial Inc., including Canaccord Genuity Inc., Canaccord Genuity Limited, and Canaccord Genuity Corp.

The authoring analysts who are responsible for the preparation of this investment research are employed by Canaccord Genuity Corp. a Canadian broker-dealer with principal offices located in Vancouver, Calgary, Toronto, Montreal, or Canaccord Genuity Inc., a US broker-dealer with principal offices located in Boston, New York, San Francisco and Houston or Canaccord Genuity Limited., a UK broker-dealer with principal offices located in London and Edinburgh (UK).

In the event that this is compendium investment research (covering six or more relevant issuers), Canaccord Genuity and its affiliated companies may choose to provide specific disclosures of the subject companies by reference, as well as its policies and procedures regarding the dissemination of investment research. To access this material or for more information, please send a request to Canaccord Genuity Research, Attn: Disclosures, P.O. Box 10337 Pacific Centre, 2200-609 Granville Street, Vancouver, BC, Canada V7Y 1H2 or disclosures@canaccordgenuity.com.

The authoring analysts who are responsible for the preparation of this investment research have received (or will receive) compensation based upon (among other factors) the Corporate Finance/Investment Banking

revenues and general profits of Canaccord Genuity. However, such authoring analysts have not received, and will not receive, compensation that is directly based upon or linked to one or more specific Corporate Finance/Investment Banking activities, or to recommendations contained in the investment research. Canaccord Genuity and its affiliated companies may have a Corporate Finance/Investment Banking or other relationship with the company that is the subject of this investment research and may trade in any of the designated investments mentioned herein either for their own account or the accounts of their customers, in good faith or in the normal course of market making. Accordingly, Canaccord Genuity or their affiliated companies, principals or employees (other than the authoring analyst(s) who prepared this investment research) may at any time have a long or short position in any such designated investments, related designated investments or in options, futures or other derivative instruments based thereon.

Some regulators require that a firm must establish, implement and make available a policy for managing conflicts of interest arising as a result of publication or distribution of investment research. This investment research has been prepared in accordance with Canaccord Genuity's policy on managing conflicts of interest, and information barriers or firewalls have been used where appropriate. Canaccord Genuity's policy is available upon request.

The information contained in this investment research has been compiled by Canaccord Genuity from sources believed to be reliable, but (with the exception of the information about Canaccord Genuity) no representation or warranty, express or implied, is made by Canaccord Genuity, its affiliated companies or any other person as to its fairness, accuracy, completeness or correctness. Canaccord Genuity has not independently verified the facts, assumptions, and estimates contained herein. All estimates, opinions and other information contained in this investment research constitute Canaccord Genuity's judgement as of the date of this investment research, are subject to change without notice and are provided in good faith but without legal responsibility or liability.

Canaccord Genuity's salespeople, traders, and other professionals may provide oral or written market commentary or trading strategies to our clients and our proprietary trading desk that reflect opinions that are contrary to the opinions expressed in this investment research. Canaccord Genuity's affiliates, principal trading desk, and investing businesses may make investment decisions that are inconsistent with the recommendations or views expressed in this investment research.

This investment research is provided for information purposes only and does not constitute an offer or solicitation to buy or sell any designated investments discussed herein in any jurisdiction where such offer or solicitation would be prohibited. As a result, the designated investments discussed in this investment research may not be eligible for sale in some jurisdictions. This investment research is not, and under no circumstances should be construed as, a solicitation to act as a securities broker or dealer in any jurisdiction by any person or company that is not legally permitted to carry on the business of a securities broker or dealer in that jurisdiction. This material is prepared for general circulation to clients and does not have regard to the investment objectives, financial situation or particular needs of any particular person. Investors should obtain advice based on their own individual circumstances before making an investment decision. To the fullest extent permitted by law, none of Canaccord Genuity, its affiliated companies or any other person accepts any liability whatsoever for any direct or consequential loss arising from or relating to any use of the information contained in this investment research.

For Canadian Residents: This Investment Research has been approved by Canaccord Genuity Corp., which accepts sole responsibility for this Investment Research and its dissemination in Canada. Canadian clients wishing to effect transactions in any Designated Investment discussed should do so through a qualified salesperson of Canaccord Genuity Corp. in their particular jurisdiction.

For United Kingdom Residents: This investment research is distributed in the United Kingdom, as third party research by Canaccord Genuity Limited, which is authorized and regulated by the Financial Services Authority. This research is for distribution only to persons who are Eligible Counterparties or Professional Clients only and is exempt from the general restrictions in section 21 of the Financial Services and Markets Act 2000 on the communication of invitations or inducements to engage in investment activity on the grounds that it is being distributed in the United Kingdom only to persons of a kind described in Article 19(5) (Investment Professionals) and 49(2) (High Net Worth companies, unincorporated associations etc) of the Financial Services and Markets Act 2000 (Financial Promotion) Order 2005 (as amended). It is not intended to be distributed or passed on, directly or indirectly, to any other class of persons. This material is not for distribution in the United Kingdom to retail clients, as defined under the rules of the Financial Services Authority.

For United States Residents: Canaccord Genuity Inc., a US registered broker-dealer, accepts responsibility for this Investment Research and its dissemination in the United States. This Investment Research is intended for distribution in the United States only to certain US institutional investors. US clients wishing to effect transactions in any Designated Investment discussed should do so through a qualified salesperson of Canaccord Genuity Inc. Analyst(s) preparing this report that are not employed by Canaccord Genuity Inc are resident outside the United States and are not associated persons or employees of any US regulated broker-dealer. Such analyst(s) may not be subject to Rule 2711 restrictions on communications with a subject company, public appearances and trading

securities held by a research analyst account.

For European Residents: If this Investment Research is intended for disclosure in any jurisdiction other than the United Kingdom, the US or Canada, then the relevant rules and regulatory requirements of that jurisdiction will apply.

Q3/11 Results Slightly Greater Than Expected; Outperform Rating Maintained

Event

Fortis reported Q3/11 EPS of \$0.30. After adjusting for the receipt of an \$11 million (after-tax) break fee related to the termination of the CVPS merger agreement and a \$2.5 million (after-tax) net foreign exchange gain associated with the company's investment in Belize Electricity Limited, which was expropriated by the Government of Belize on June 20, 2011, we believe that recurring EPS were \$0.24. Recurring EPS were slightly greater than our estimate of \$0.22 and the First Call Mean estimate of \$0.23 (range \$0.22–0.24). The difference between actual and expected EPS was largely due to stronger-than-anticipated earnings at Fortis Generation. Earnings from the company's other business segments were generally consistent with our estimates.

Impact

Neutral.

Forecasts

We have updated our estimates to reflect Q3 results. Our 2011E EPS increases to \$1.65. There are no changes to our 2012E and 2013E EPS estimates.

Valuation

Our \$35.50 target price is based on a weighted valuation approach: 18x 2013E EPS of \$1.78 (12.5%); 1.75x 2013E BVPS of \$21.53 (12.5%); and a target yield of 3.50%, assuming 2013E dividends per share of \$1.26 (75%).

Recommendation

Due to its track record of earnings and dividend growth, combined with the company's large capital expenditure program, we continue to believe Fortis represents a good long-term investment. Our rating is Outperform.

	2011E \$1.63 to \$1.65

Q3/11 Results Slightly Greater Than Expected

Fortis reported Q3/11 EPS of \$0.30. After adjusting for the receipt of an \$11 million (after-tax) break fee related to the termination of the CVPS merger agreement and a \$2.5 million (after-tax) net foreign exchange gain associated with the company's investment in Belize Electricity Limited, which was expropriated by the Government of Belize on June 20, 2011, we believe that recurring EPS were \$0.24. Recurring EPS were slightly greater than our estimate of \$0.22 and the First Call Mean estimate of \$0.23 (range \$0.22–0.24). The difference between actual and expected EPS was largely due to stronger-than-anticipated earnings at Fortis Generation. Earnings from the company's other business segments were generally consistent with our estimates.

With respect to growth, we expect Fortis to continue to evaluate the potential acquisition of regulated natural gas or electric utilities in the U.S. Notwithstanding an acquisition, Fortis will continue to advance its capital expenditure program in order to drive organic growth. The company has maintained 2011E capital expenditure guidance of \$1.2 billion and five-year capital expenditure guidance of \$5.7 billion. The majority of this spending is expected to occur at the company's regulated utilities.

Our \$35.50 target price is based on a weighted valuation approach: 18x 2013E EPS of \$1.78 (12.5%); 1.75x 2013E BVPS of \$21.53 (12.5%); and a target yield of 3.50%, assuming 2013E dividends per share of \$1.26 (75%).

At current levels, we believe the company's shares are attractively valued. Our rating is Outperform.

Q3/11 Results

As set out in Table 1, on a comparable basis, net income increased by 8.5% in Q3/11 versus Q3/10. In order to present results on a comparable basis, Q3/11 GAAP income was adjusted to reverse an \$11 million (after-tax) break fee related to the termination of the CVPS merger agreement and a \$2.5 million (after-tax) net foreign exchange gain associated with the company's previous investment in Belize Electricity Limited. Q3/10 earnings were also adjusted for the reversal of a \$4 million expense originally recorded in Q4/09 related to the cost of converting portions of the distribution system at Terasen Gas Whistler to utilize natural gas instead of propane.

Source: BMO Capital Markets, Company Reports

A discussion of the operating performance of each business segment follows.

Regulated Gas Utilities – FortisBC Energy Companies

Q3/11 net loss of \$3 million was lower than our estimate of a \$7.5 million loss and an adjusted net loss of \$9 million in Q3/10. We attribute the majority of the variance to seasonality, as timing differences resulted in a lower proportion of expenses recorded in Q3/11 compared to Q3/10.

Regulated Electric Utilities – FortisAlberta

Q3/11 net income of \$19 million was lower than our estimate of \$20.2 million and consistent with Q3/10 earnings of \$19 million.

Regulated Electric Utilities – FortisBC

Q3/11 net income of \$10 million was consistent with our estimate of \$10 million and slightly less than Q3/10 net income of \$11 million. The decrease in earnings was largely driven by lower capitalized AFUDC, due to fewer assets under construction during 2011, and higher effective corporate income taxes.

Regulated Electric Utilities – Newfoundland Power

Q3/11 net income \$8 million was consistent with our estimate of \$7.8 million and Q3/10 net income of \$8 million.

Regulated Electric Utilities – Other Canadian

Q3/11 net income of \$6 million was greater than our estimate of \$5.4 million and Q3/10 net income of \$5 million. The increase in earning was primarily due to a 3.8% rate increase at Algoma Power that became effective on December 1, 2010.

Regulated Utilities – Caribbean

The earnings contribution from the Caribbean business segment was \$6 million in Q3/11 versus our estimate of \$7.1 million and Q3/10 net income of \$8 million. The decrease in Q3/11 earnings reflects the lost contribution from Belize Electricity, which contributed approximately \$2 million to earnings during Q3/10.

Unregulated – Fortis Generation

Fortis Generation reported Q3/11 net income of \$8 million, which was greater than our estimate of \$4.6 million and slightly lower than Q3/10 net income of \$9 million. The difference between actual and expected results was due to the exclusion of earnings from BECOL in our estimates. In order to be conservative, we removed all earnings contributions from BECOL from our estimates after Q1/11, following the announcement on June 20 that the Government of Belize had expropriated Fortis's 70% interest in Belize Electricity Limited ("BEL"). As at October 31, BEL owed BECOL US\$8 million for overdue energy purchases, which represents about one-third of BECOL's annual sales to Belize electricity. Disclosure in the release suggests that the Government of Belize does not intend to expropriate BECOL, and that BECOL continues to deliver electricity to BEL and invoice BEL for deliveries.

Unregulated – Fortis Properties

Fortis Properties reported Q3/11 net income of \$9 million, which was lower than our estimate of \$10.2 million and consistent with Q3/10 net income of \$9 million. Occupancy at the real estate division increased to 94.2% at the end of the quarter versus 93.7% at the end of Q3/10. At the hospitality division, revenue per available room increased to \$94.83 during Q3/11 versus \$89.54 during Q3/10.

Regulatory Update

After a lull in 2010, we expect the end of 2011 to be relatively busy from a regulatory perspective. The Alberta Utilities Commission (AUC) is currently moving forward with a Generic Cost of Capital proceeding. The formal hearing began on June 20, 2011 and the AUC is expected to issue a cost of capital decision by the end of the year. The AUC is also exploring the implementation of Performance Based Regulation ("PBR"); however, we understand that a final decision on PBR is not expected until mid-2012. In addition to the broad regulatory initiatives outlined above, a number of Fortis's utilities have submitted rate or other filings in 2011:

- In November 2011, the FortisBC Energy utilities (formerly the Terasen companies) filed an application with the BCUC to amalgamate into one legal entity, effective January 1, 2013. In addition to BCUC approval, the amalgamation requires the consent of the Government of British Columbia;
- In May 2011, the FortisBC Energy utilities filed revenue requirements applications for 2012–2013. FortisBC Energy Inc. is seeking a return on estimated mid-year rate bases of

\$2,754 million in 2012E and \$2,811 million in 2013E, and FortisBC Energy Inc. Vancouver Island is seeking a return on estimated mid-year rate bases of \$788 million in 2012E and \$816 million in 2013E. A decision on the rate application is expected in late Q1/12;

- In June 2011, FortisBC Electric filed a Revenue Requirement Application and Integrated System Plan for 2012–2013, in which it is seeking a return on estimated mid-year net rate bases of \$1,145 million in 2012E, and \$1,212 million in 2013E. A decision on the rate application is expected in late 2011 or early 2012;
- In March 2011, FortisAlberta filed its 2012 and 2013 Distribution Tariff Application (“DTA”). The company requested approval of revenue requirements of \$410 million for 2012 and \$447 million for 2013, for rate increases of 8.2% and 6.9%, respectively. The DTA also proposes approximately \$776 million in gross capital expenditures over the two-year period. We understand that the AUC is only allowing FortisAlberta to settle the DTA through negotiation for 2012 rates in light of the ongoing discussions regarding PBR;
- Earlier in 2011, the interim Government of the Turks and Caicos Islands stated its intention to implement a carbon tax, which would have been applicable to Fortis Turks and Caicos, effective September 2011. To date, no carbon tax has been implemented. In the event that this tax is implemented and is not permitted to be passed onto Fortis Turks and Caicos’ customers, the potential impact to earnings would be approximately \$2–3 million on an annual basis.

Belize Electricity Update

Fortis has commissioned an independent valuation of its previous investment in Belize Electricity Limited and expects to submit for compensation to the Government of Belize during the fourth quarter of 2011. We also understand that the Government of Belize has commissioned a similar independent valuation of its own. In addition, on October 21, Fortis commenced an action in the Belize Supreme Court to challenge the legality of the expropriation of its investment in Belize Electricity and on October 25, the Government of Belize amended the constitution of Belize to require majority government ownership of three public utility providers, including Belize Electricity, but excluding BECOL.

At this time, it is unclear as to when this situation will be resolved. As at September 30, the Belize Electricity assets (recorded as a long-term other assets), including foreign exchange impacts, totalled \$120 million.

Estimates

We have updated our model to reflect Q3/11 results.

IMPORTANT DISCLOSURES

Analyst's Certification

I, Michael McGowan, CA, CFA, hereby certify that the views expressed in this report accurately reflect my personal views about the subject securities or issuers. I also certify that no part of my compensation was, is, or will be, directly or indirectly, related to the specific recommendations or views expressed in this report.

Analysts who prepared this report are compensated based upon (among other factors) the overall profitability of BMO Capital Markets and their affiliates, which includes the overall profitability of investment banking services. Compensation for research is based on effectiveness in generating new ideas and in communication of ideas to clients, performance of recommendations, accuracy of earnings estimates, and service to clients.

Company Specific Disclosure

Disclosure 1: BMO Capital Markets has undertaken an underwriting liability with respect to this issuer within the past 12 months.

Disclosure 2: BMO Capital Markets has provided investment banking services with respect to this issuer within the past 12 months.

Disclosure 3: BMO Capital Markets has managed or co-managed a public offering of securities with respect to this issuer within the past 12 months.

Disclosure 4: BMO Capital Markets or an affiliate has received compensation for investment banking services from this issuer within the past 12 months.

Disclosure 5: BMO Capital Markets or an affiliate received compensation for products or services other than investment banking services within the past 12 months.

Disclosure 6: This issuer is a client (or was a client) of BMO NB, BMO Capital Markets Corp., BMO CM Ltd. or an affiliate within the past 12 months: Investment Banking Services & Non-Securities Related Services.

Methodology and Risks to Price Target/Valuation

Methodology: Our target price is based on a weighted valuation approach: 18x diluted 2013E EPS (12.5%); 1.75x 2013E BVPS (12.5%) and a target yield of 3.50% based on 2013E dividends per share (75%).

Risks: Operations are subject to complex regulation by a variety of provincial, state and federal (Canada, Cayman Islands & Belize) agencies. Changes in regulation may adversely affect performance.

Ratings and Sector Key

We use the following ratings system definitions:

OP = Outperform - Forecast to outperform the market;

Mkt = Market Perform - Forecast to perform roughly in line with the market;

Und = Underperform - Forecast to underperform the market;

(S) = speculative investment;

NR = No rating at this time;

R = Restricted – Dissemination of research is currently restricted.

Market performance is measured by a benchmark index such as the S&P/TSX Composite Index, S&P 500, Nasdaq Composite, as appropriate for each company. BMO Capital Markets eight Top 15 lists guide investors to our best ideas according to different objectives (Canadian large, small, growth, value, income, quantitative; and US large, US small) have replaced the Top Pick rating.

Updating Model to Reflect 3.4% Dividend Increase; Outperform Rating Maintained

Event

On December 14, 2010, Fortis announced that it is increasing its annual dividend by 3.4% to \$1.20/share from \$1.16/share. The revised quarterly dividend of \$0.30/share will be payable on March 1 to shareholders of record as of February 15, 2012.

Impact

Neutral. The annual dividend of \$1.20/share is slightly lower than the FY2012E DPS forecast of \$1.22/share that we had set out in our model.

Forecasts

We have updated our estimates to reflect FY 2012E dividends of \$1.20. We have also trimmed our FY 2013E dividend estimate to \$1.24 from \$1.26.

Valuation

Our \$35.50 target price is based on a weighted valuation approach: 18x 2012E diluted EPS of \$1.78 (12.5%), 1.75x 2012E BVPS of \$21.57 (12.5%) and a target yield of 3.50%, assuming 2012E dividends per share of \$1.24 (75%).

Recommendation

We believe Fortis's shares are attractively valued, considering the company's relatively low-risk, diversified business model. Our rating is Outperform.

IMPORTANT DISCLOSURES**Analyst's Certification**

I, Michael McGowan, CA, CFA, hereby certify that the views expressed in this report accurately reflect my personal views about the subject securities or issuers. I also certify that no part of my compensation was, is, or will be, directly or indirectly, related to the specific recommendations or views expressed in this report.

Analysts who prepared this report are compensated based upon (among other factors) the overall profitability of BMO Capital Markets and their affiliates, which includes the overall profitability of investment banking services. Compensation for research is based on effectiveness in generating new ideas and in communication of ideas to clients, performance of recommendations, accuracy of earnings estimates, and service to clients.

Company Specific Disclosure

Disclosure 1: BMO Capital Markets has undertaken an underwriting liability with respect to this issuer within the past 12 months.

Disclosure 2: BMO Capital Markets has provided investment banking services with respect to this issuer within the past 12 months.

Disclosure 3: BMO Capital Markets has managed or co-managed a public offering of securities with respect to this issuer within the past 12 months.

Disclosure 4: BMO Capital Markets or an affiliate has received compensation for investment banking services from this issuer within the past 12 months.

Disclosure 5: BMO Capital Markets or an affiliate received compensation for products or services other than investment banking services within the past 12 months.

Disclosure 6: This issuer is a client (or was a client) of BMO NB, BMO Capital Markets Corp., BMO CM Ltd. or an affiliate within the past 12 months: Investment Banking Services & Non-Securities Related Services.

Methodology and Risks to Price Target/Valuation

Methodology: Our target price is based on a weighted valuation approach: 18x diluted 2012E EPS (12.5%); 1.75x 2012E BVPS (12.5%) and a target yield of 3.50% based on 2012E dividends per share (75%).

Risks: Operations are subject to complex regulation by a variety of provincial, state and federal (Canada, Cayman Islands & Belize) agencies. Changes in regulation may adversely affect performance.

Ratings and Sector Key

We use the following ratings system definitions:

OP = Outperform - Forecast to outperform the market;

Mkt = Market Perform - Forecast to perform roughly in line with the market;

Und = Underperform - Forecast to underperform the market;

(S) = speculative investment;

NR = No rating at this time;

R = Restricted – Dissemination of research is currently restricted.

Market performance is measured by a benchmark index such as the S&P/TSX Composite Index, S&P 500, Nasdaq Composite, as appropriate for each company. BMO Capital Markets eight Top 15 lists guide investors to our best ideas according to different objectives (Canadian large, small, growth, value, income, quantitative; and US large, US small) have replaced the Top Pick rating.

Q4/11 Results in Line; Outperform Rating Maintained

Event

Fortis reported Q4/11 EPS of \$0.46 vs. our estimate of \$0.45 and the First Call Mean estimate of \$0.47 (range \$0.45-0.50). In general, the majority of the company's business segments appeared to perform well and earnings from the individual segments were generally consistent with our estimates.

Impact

Neutral. We expect that earnings and dividend growth will continue to be driven by rate base investment. Fortis's capital expenditure budget is \$1.3 billion in 2012 (up from \$1.2 billion in 2011) and \$5.5 billion during the next five years. The company also continues to evaluate the acquisition of U.S. gas or electric utilities. Overall, we believe that Q4 results represented a solid end to 2011.

Forecasts

There are no changes to our estimates.

Valuation

Our \$35.50 target price is based on a weighted valuation approach: 18x 2012E diluted EPS of \$1.78 (12.5%), 1.75x 2012E BVPS of \$22.23 (12.5%) and a target yield of 3.50%, assuming 2012E dividends per share of \$1.24 (75%).

Recommendation

We believe Fortis's shares are attractively valued, considering the company's relatively low-risk, diversified business model. Our rating is Outperform.

Q4 Results in Line; Expect Continued Investment in Rate Base to Drive Earnings Growth

Fortis reported Q4/11 EPS of \$0.46 vs. our estimate of \$0.45 and the First Call Mean estimate of \$0.47 (range \$0.45-0.50). In general, the majority of the company's business segments appeared to perform well and earnings from the individual segments were generally consistent with our estimates.

With respect to growth initiatives, although the company was unsuccessful last year with its offer to acquire Central Vermont Public Service, Fortis will continue to evaluate the acquisition of gas and electric utilities in the U.S. Until the company is able to acquire a U.S.-based utility, it will focus on growing through additions to rate base. The company's 2012 capital budget has been set at \$1.3 billion (up from \$1.2 billion in 2011) and it continues to target total investment of \$5.5 billion during the next five years.

Overall, we viewed the Q4 results as a solid end to 2011. We are maintaining our \$35.50 price target, which is based on a weighted valuation approach: 18x 2012E diluted EPS of \$1.78 (12.5%), 1.75x 2012E BVPS of \$222.23 (12.5%) and a target yield of 3.50%, assuming 2012E dividends per share of \$1.24 (75%).

We believe Fortis's shares are attractively valued, considering the company's relatively low-risk, diversified business model. Our rating is Outperform.

Q4/11 Results

Fortis reported Q4/11 GAAP net income of \$86 million, which was \$1.4 million greater than our estimate of \$84.6 million and \$1 million greater than Q4/10 GAAP net income of \$85 million. A comparison of Q4/11 and Q4/10 results by business segment is set out in Table 1.

Source: BMO Capital Markets, Company Reports

A discussion of the operating performance of each business segment follows.

Regulated Gas Utilities – FortisBC Energy Companies

Q4/11 net income of \$51 million was greater than our estimate of \$48.1 million and Q4/10 net income of \$45 million. We attribute the majority of the variance to seasonality, improved economic conditions in the forestry and mining sectors and increased residential consumption, which led to much higher sales volumes (43,809 GJ in Q4/11 vs. 38,586 GJ in Q4/10).

On an annual basis, adjusted net income increased by 10.3% to \$139 million in 2011 from \$126 million in 2010.

Regulated Electric Utilities – FortisAlberta

Q4/11 net income of \$17 million was slightly lower than our estimate of \$17.9 million and consistent with Q4/10 earnings of \$17 million.

On an annual basis, adjusted net income increased by 7.4% to \$73 million in 2011 from \$68 million in 2010. The increase to adjusted net income was primarily driven by rate base growth.

Regulated Electric Utilities – Newfoundland Power

Q4/11 net income of \$8 million was consistent with our estimate of \$7.9 million and slightly lower than Q4/10 net income of \$9 million.

On an annual basis, net income decreased by 2.9% to \$34 million in 2011 from \$35 million in 2010.

Regulated Electric Utilities – Other Canadian

Q4/11 net income of \$4 million was slightly less than our estimate of \$4.5 million and Q4/10 net income of \$5 million. The decrease in earnings was primarily due to a rate of return adjustment at Maritime Electric, which reduced Q4/11 revenue by approximately \$2 million as a result of higher-than-expected electricity sales during 2011.

On an annual basis, net income increased by 15.8% to \$22 million in 2011 from \$19 million in 2010.

Regulated Utilities – Caribbean

The earnings contribution from the Caribbean business segment was \$3 million in Q4/11 versus our estimate of \$4.2 million and Q4/10 net income of \$4 million. The decrease in earnings reflects higher operating expenses at Fortis Turks and Caicos, which were largely due to consulting fees associated with ongoing regulatory matters and inflationary cost increases.

On an annual basis, net income decreased by 13.0% to \$20 million in 2011 from \$23 million in 2010.

Unregulated – Fortis Generation

Fortis Generation reported net income of \$5 million, which was greater than our estimate of \$2.1 million and less than Q4/10 net income of \$6 million. The difference between actual and expected results was due to the exclusion of earnings from BECOL in our estimates. In order to be conservative, we removed all earnings contributions from BECOL from our estimates after Q1/11, following the announcement on June 20, 2011, that the Government of Belize had expropriated Fortis's 70% interest in Belize Electricity Limited ("BEL"). Disclosure in the release suggests that the Government of Belize does not intend to expropriate BECOL, and that BECOL continues to deliver electricity to BEL and invoice BEL for deliveries.

On an annual basis, net income decreased by 10.0% to \$18 million in 2011 from \$20 million in 2010.

Unregulated – Fortis Properties

Fortis Properties reported Q4/11 net income of \$5 million, which was lower than our estimate of \$7.9 million and Q4/10 net income of \$7 million. Decreased occupancy at the hospitality properties in Western Canada and higher corporate income taxes were responsible for the decline. Occupancy at the real estate division decreased to 93.2% at the end of the quarter versus 94.5% at the end of Q4/10. Revenue per available room increased to \$72.39 during Q4/11 versus \$70.76 during Q4/10.

On an annual basis, net income decreased by 11.5% to \$23 million in 2011 from \$26 million in 2010.

Other Items

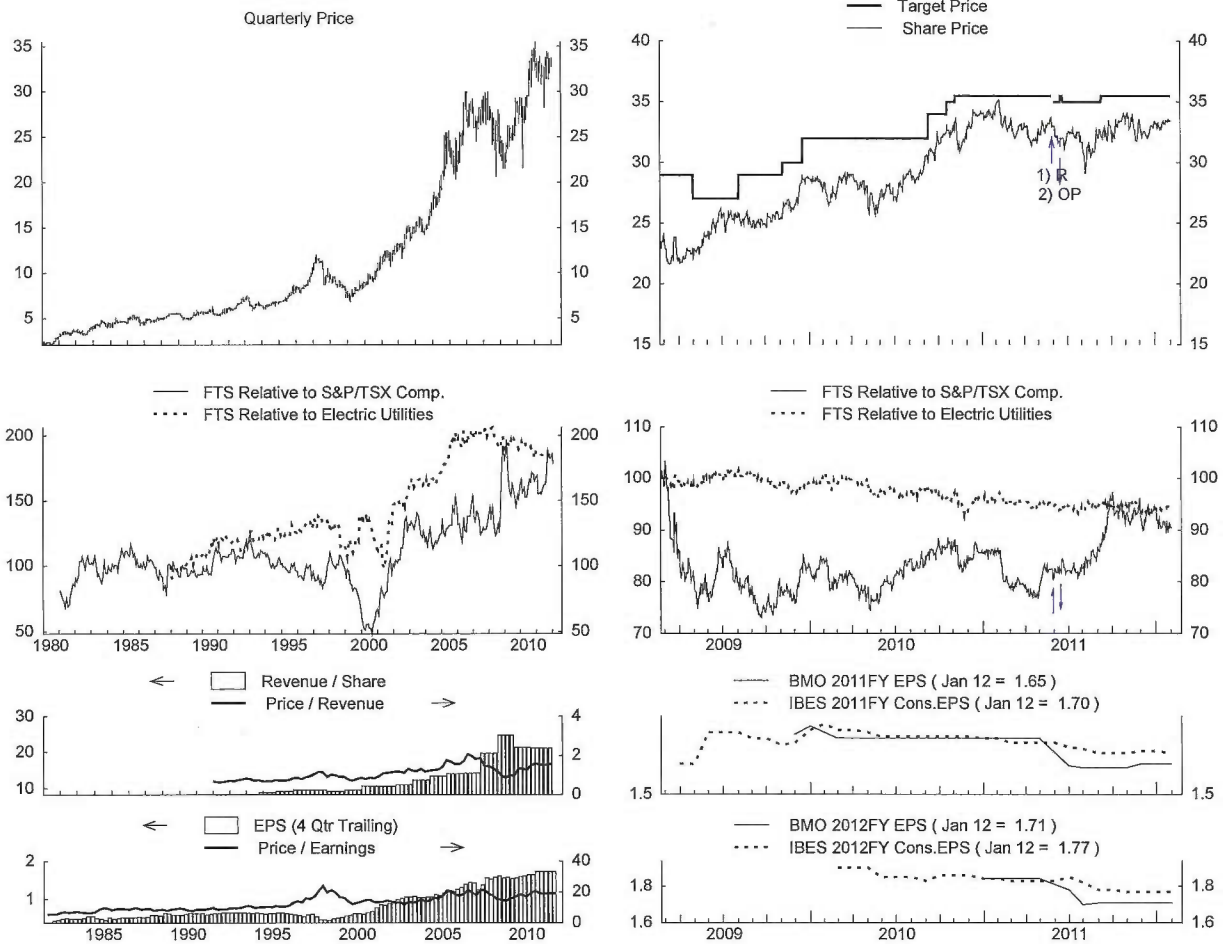

- Fortis continues to receive payments for electricity sales made by BECOL to BEL. As at December 31, 2011, BEL had an accounts receivable balance of US\$7.4 million, which is consistent with a receivable of US\$8 million that was outstanding at September 30, 2011.
- Little update was provided about the cost of capital review requested by the British Columbia Utilities Commission. The review is expected to occur in 2012, and will affect the FortisBC gas and electric utilities.

IMPORTANT DISCLOSURES**Analyst's Certification**

I, Michael McGowan, CA, CFA, hereby certify that the views expressed in this report accurately reflect my personal views about the subject securities or issuers. I also certify that no part of my compensation was, is, or will be, directly or indirectly, related to the specific recommendations or views expressed in this report.

Analysts who prepared this report are compensated based upon (among other factors) the overall profitability of BMO Capital Markets and their affiliates, which includes the overall profitability of investment banking services. Compensation for research is based on effectiveness in generating new ideas and in communication of ideas to clients, performance of recommendations, accuracy of earnings estimates, and service to clients.

Company Specific Disclosure

Disclosure 1: BMO Capital Markets has undertaken an underwriting liability with respect to this issuer within the past 12 months.

Disclosure 2: BMO Capital Markets has provided investment banking services with respect to this issuer within the past 12 months.

Disclosure 3: BMO Capital Markets has managed or co-managed a public offering of securities with respect to this issuer within the past 12 months.

Disclosure 4: BMO Capital Markets or an affiliate has received compensation for investment banking services from this issuer within the past 12 months.

Disclosure 5: BMO Capital Markets or an affiliate received compensation for products or services other than investment banking services within the past 12 months.

Disclosure 6: This issuer is a client (or was a client) of BMO NB, BMO Capital Markets Corp., BMO CM Ltd. or an affiliate within the past 12 months: Investment Banking Services & Non-Securities Related Services.

Methodology and Risks to Price Target/Valuation

Methodology: Our target price is based on a weighted valuation approach: 18x diluted 2012E EPS (12.5%); 1.75x 2012E BVPS (12.5%) and a target yield of 3.50% based on 2012E dividends per share (75%).

Risks: Operations are subject to complex regulation by a variety of provincial, state and federal (Canada, Cayman Islands, and Belize) agencies. Changes in regulation may adversely affect performance.

Ratings and Sector Key

We use the following ratings system definitions:

OP = Outperform - Forecast to outperform the market;

Mkt = Market Perform - Forecast to perform roughly in line with the market;

Und = Underperform - Forecast to underperform the market;

(S) = speculative investment;

NR = No rating at this time;

R = Restricted – Dissemination of research is currently restricted.

Market performance is measured by a benchmark index such as the S&P/TSX Composite Index, S&P 500, Nasdaq Composite, as appropriate for each company. BMO Capital Markets eight Top 15 lists guide investors to our best ideas according to different objectives (Canadian large, small, growth, value, income, quantitative; and US large, US small) have replaced the Top Pick rating.

Q4/11 Results in Line

Impact

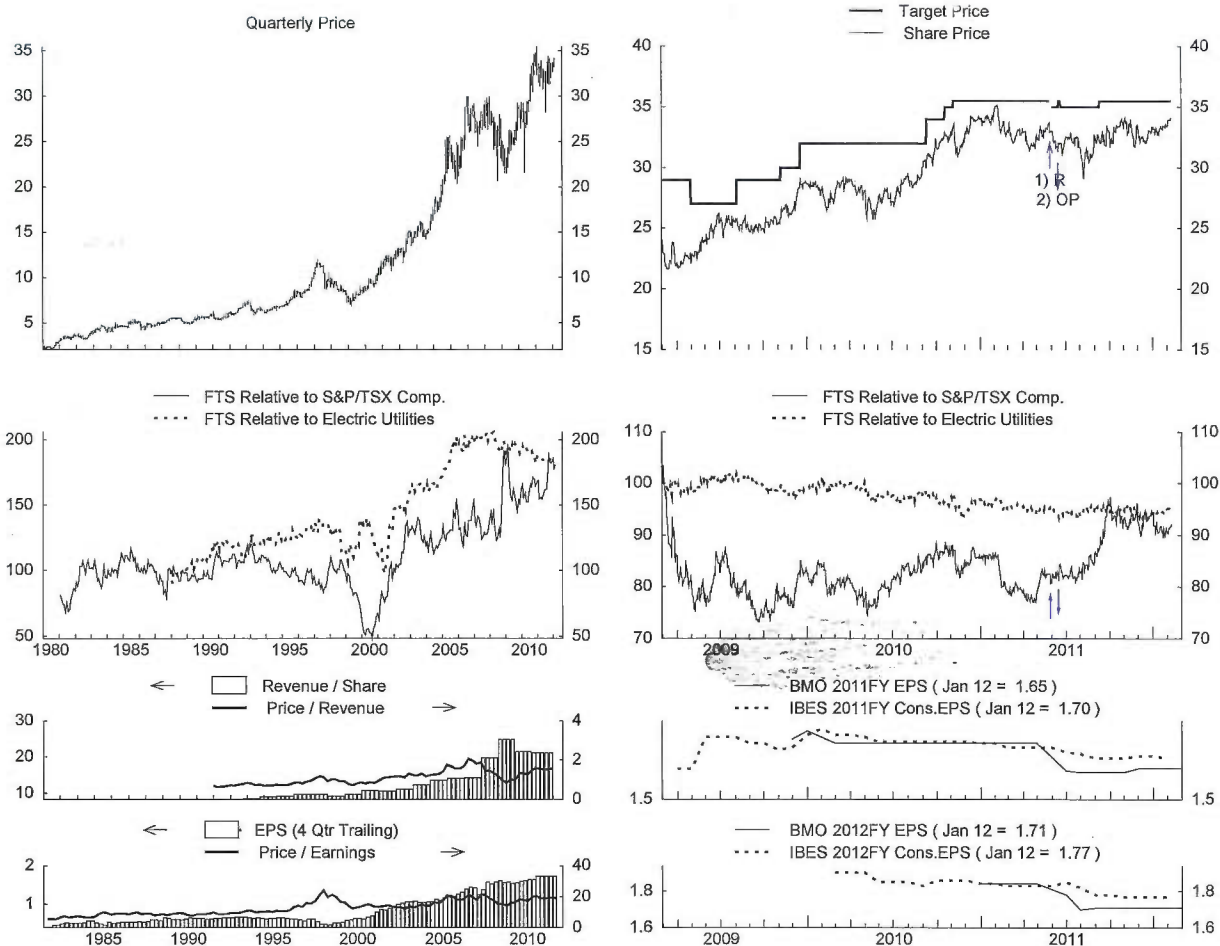

Neutral

Details & Analysis

Fortis reported Q4/11 EPS of \$0.46 vs. our estimate of \$0.45 and the First Call Mean estimate of \$0.47 (range \$0.45–0.50). In general, the majority of the company's business segments appeared to perform well and earnings from the individual segments were generally consistent with our estimates. Earnings and dividend growth in 2012 should be driven by the company's capital program. Fortis's capital expenditure budget is \$1.3 billion in 2012 (up from \$1.2 billion in 2011) and \$5.5 billion during the next five years. The company continues to evaluate expanding in the United States through the potential acquisition of a regulated gas or electric utility. In summary, the Q4/11 results appear to represent a solid end to 2011.

This report was prepared by an analyst(s) employed by BMO Nesbitt Burns Inc., and who is (are) not registered as a research analyst(s) under FINRA rules. For disclosure statements, including the Analyst's Certification, please refer to pages 2 to 5.

IMPORTANT DISCLOSURES**Analyst's Certification**

I, Michael McGowan, CA, CFA, hereby certify that the views expressed in this report accurately reflect my personal views about the subject securities or issuers. I also certify that no part of my compensation was, is, or will be, directly or indirectly, related to the specific recommendations or views expressed in this report.

Analysts who prepared this report are compensated based upon (among other factors) the overall profitability of BMO Capital Markets and their affiliates, which includes the overall profitability of investment banking services. Compensation for research is based on effectiveness in generating new ideas and in communication of ideas to clients, performance of recommendations, accuracy of earnings estimates, and service to clients.

Company Specific Disclosure

Disclosure 1: BMO Capital Markets has undertaken an underwriting liability with respect to this issuer within the past 12 months.

Disclosure 2: BMO Capital Markets has provided investment banking services with respect to this issuer within the past 12 months.

Disclosure 3: BMO Capital Markets has managed or co-managed a public offering of securities with respect to this issuer within the past 12 months.

Disclosure 4: BMO Capital Markets or an affiliate has received compensation for investment banking services from this issuer within the past 12 months.

Disclosure 5: BMO Capital Markets or an affiliate received compensation for products or services other than investment banking services within the past 12 months.

Disclosure 6: This issuer is a client (or was a client) of BMO NB, BMO Capital Markets Corp., BMO CM Ltd. or an affiliate within the past 12 months: Investment Banking Services & Non-Securities Related Services.

Methodology and Risks to Price Target/Valuation

Methodology: Our target price is based on a weighted valuation approach: 18x diluted 2012E EPS (12.5%); 1.75x 2012E BVPS (12.5%) and a target yield of 3.50% based on 2012E dividends per share (75%).

Risks: Operations are subject to complex regulation by a variety of provincial, state and federal (Canada, Cayman Islands & Belize) agencies. Changes in regulation may adversely affect performance.

Ratings and Sector Key

We use the following ratings system definitions:

OP = Outperform - Forecast to outperform the market;

Mkt = Market Perform - Forecast to perform roughly in line with the market;

Und = Underperform - Forecast to underperform the market;

(S) = speculative investment;

NR = No rating at this time;

R = Restricted – Dissemination of research is currently restricted.

Market performance is measured by a benchmark index such as the S&P/TSX Composite Index, S&P 500, Nasdaq Composite, as appropriate for each company. BMO Capital Markets eight Top 15 lists guide investors to our best ideas according to different objectives (Canadian large, small, growth, value, income, quantitative; and US large, US small) have replaced the Top Pick rating.

Acquisition of CH Energy Group Proposed

Impact

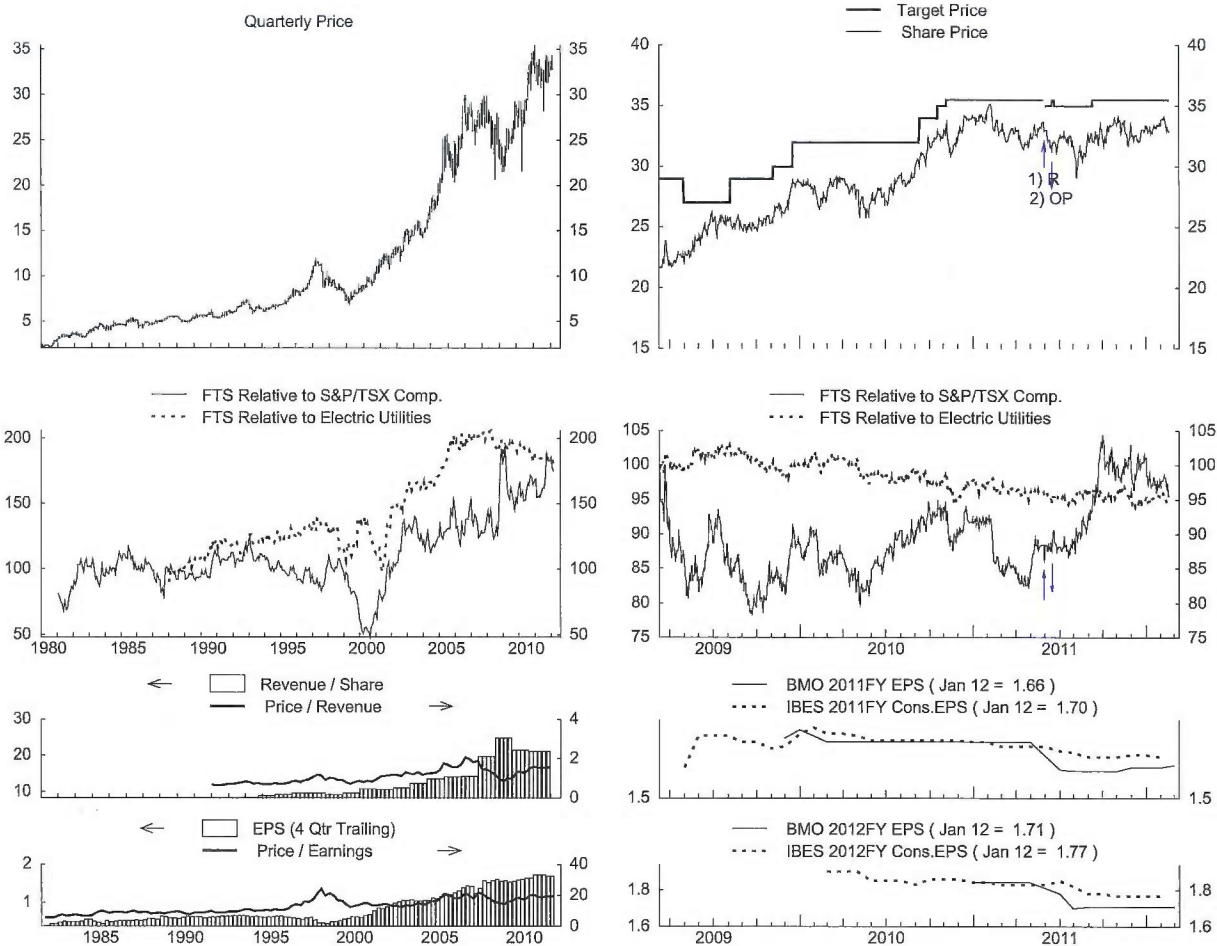

Potentially Positive

Details & Analysis

Fortis announced that it has entered into an agreement to acquire CH Energy Group Inc. for US\$65/share, which translates into a total purchase price of approximately US\$1.5 billion, including the assumption of approximately US\$500 million of debt. The purchase price represents a premium of approximately 10.5% over the most recent closing price of CH Energy Group's common shares, and values CH at approximately 20.2x 2012E EPS, based on estimates provided by Bloomberg. We believe the following points regarding the proposed acquisition are relevant: (1) Approximately 97% of CH Energy Group's earnings are derived from CH Hudson Gas and Electric Corporation, which is a regulated natural gas and electric utility located in New York State; (2) For the three-year period beginning on July 1, 2010, CH Hudson's rates have been established using a 10% ROE and a capital structure of 48% common equity; (3) We estimate that the acquisition could be approximately \$0.05/share accretive to Fortis' EPS once it closes; and (4) The transaction will initially be funded through the use of credit lines; however, we expect that Fortis could issue approximately C\$400 million of equity to permanently finance the transaction. Closing of the transaction is expected to occur within 12 months, and is subject to customary regulatory and shareholder approvals.

This report was prepared by an analyst(s) employed by BMO Nesbitt Burns Inc., and who is (are) not registered as a research analyst(s) under FINRA rules. For disclosure statements, including the Analyst's Certification, please refer to pages 2 to 5.

Ratings and Sector Key

We use the following ratings system definitions:

OP = Outperform - Forecast to outperform the market;

Mkt = Market Perform - Forecast to perform roughly in line with the market;

Und = Underperform - Forecast to underperform the market;

(S) = speculative investment;

NR = No rating at this time;

R = Restricted – Dissemination of research is currently restricted.

Market performance is measured by a benchmark index such as the S&P/TSX Composite Index, S&P 500, Nasdaq Composite, as appropriate for each company. BMO Capital Markets eight Top 15 lists guide investors to our best ideas according to different objectives (Canadian large, small, growth, value, income, quantitative; and US large, US small) have replaced the Top Pick rating.

March 1, 2012
 Research Fact Sheet
 Gas & Electric Utilities

BMO CM Research
 (416) 359-4002
 Equity.Research@bmo.com
 Assoc: Mark Laing, CA, CFA

Company Description – Fortis Inc. (Fortis) is a publicly listed holding company with four key businesses: electric utility operations, regulated natural gas distribution, non-regulated electric power generation and non-utility property activities. Gas and electric utility operations include Newfoundland Power (100%), Maritime Electric (100%, PEI), Fortis Ontario (100%), Caribbean Utilities (59.5%, Grand Cayman Island), Turks and Caicos (100%),

FortisAlberta (100%), FortisBC (100%) and the FortisBC Energy Companies (100%, British Columbia). *Website:* fortisinc.com

Recent Results – Fortis reported Q4/11 EPS of \$0.46 versus the First Call Mean estimate of \$0.47 (range \$0.45–0.50) and Q4/10 EPS of \$0.49.

This report was prepared by an analyst(s) employed by BMO Nesbitt Burns Inc., and who is (are) not registered as a research analyst(s) under FINRA rules. For disclosure statements, including the Analyst's Certification, please refer to the back pages.

Corporate Developments – On February 21, 2012, Fortis announced that it had entered into an agreement to acquire CH Energy Group Inc. for US\$65/share, which translates into a total purchase price of approximately US\$1.5 billion, including the assumption of approximately US\$500 million of debt. The purchase price represents a premium of approximately 10.5% over the most recent closing price of CH Energy Group's common shares, and values CH at approximately 20.2x 2012E EPS, based on estimates provided by Bloomberg.

The company's 2012 capital budget has been set at \$1.3 billion and it continues to target total investment of \$5.5

billion during the next five years. Approximately 64% of the total relates to the regulated electric utilities, 23% relates to the regulated gas utilities and 13% relates to Fortis' non-regulated businesses.

Fortis continues to receive payments for electricity sales made by Belize Electricity Company Limited ("BECOL") to Belize Electricity Limited ("BEL"). As at December 31, 2011, BECOL had an accounts receivable balance of US\$7.4 million, which is consistent with a receivable of US\$8 million that was outstanding at September 30, 2011.

Recommendation – Fortis is not rated. Member of Top 15 Income stock selections.

IMPORTANT DISCLOSURES**Analyst's Certification**

I, BMO CM Research, hereby certify that the views expressed in this report accurately reflect my personal views about the subject securities or issuers. I also certify that no part of my compensation was, is, or will be, directly or indirectly, related to the specific recommendations or views expressed in this report.

Analysts who prepared this report are compensated based upon (among other factors) the overall profitability of BMO Capital Markets and their affiliates, which includes the overall profitability of investment banking services. Compensation for research is based on effectiveness in generating new ideas and in communication of ideas to clients, performance of recommendations, accuracy of earnings estimates, and service to clients.

Methodology and Risks to Price Target/Valuation

Methodology: Our target price is based on a weighted valuation approach: 18x diluted 2012E EPS (12.5%); 1.75x 2012E BVPS (12.5%) and a target yield of 3.50% based on 2012E dividends per share (75%).

Risks: Operations are subject to complex regulation by a variety of provincial, state and federal (Canada, Cayman Islands & Belize) agencies. Changes in regulation may adversely affect performance.

Company Specific Disclosure

Disclosure 1: BMO Capital Markets has undertaken an underwriting liability with respect to this issuer within the past 12 months.

Disclosure 2: BMO Capital Markets has provided investment banking services with respect to this issuer within the past 12 months.

Disclosure 3: BMO Capital Markets has managed or co-managed a public offering of securities with respect to this issuer within the past 12 months.

Disclosure 4: BMO Capital Markets or an affiliate has received compensation for investment banking services from this issuer within the past 12 months.

Disclosure 5: BMO Capital Markets or an affiliate received compensation for products or services other than investment banking services within the past 12 months.

Disclosure 6: This issuer is a client (or was a client) of BMO NB, BMO Capital Markets Corp., BMO CM Ltd. or an affiliate within the past 12 months: Investment Banking Services & Non-Securities Related Services.

The opinions, estimates and projections contained in this report are those of BMO Capital Markets as of the date of this report and are subject to change without notice. BMO Capital Markets endeavours to ensure that the contents have been compiled or derived from sources that we believe are reliable and contain information and opinions that are accurate and complete. However, BMO Capital Markets makes no representation or warranty, express or implied, in respect thereof, takes no responsibility for any errors and omissions contained herein and accepts no liability whatsoever for any loss arising from any use of, or reliance on, this report or its contents. Information may be available to BMO Capital Markets or its affiliates that is not reflected in this report. The information in this report is not intended to be used as the primary basis of investment decisions, and because of individual client objectives, should not be construed as advice designed to meet the particular investment needs of any investor. This material is for information purposes only and is not an offer to sell or the solicitation of an offer to buy any security. BMO Capital Markets or its affiliates will buy from or sell to customers the securities of issuers mentioned in this report on a principal basis. BMO Capital Markets or its affiliates, officers, directors or employees have a long or short position in many of the securities discussed herein, related securities or in options, futures or other derivative instruments based thereon. The reader should assume that BMO Capital Markets or its affiliates may have a conflict of interest and should not rely solely on this report in evaluating whether or not to buy or sell securities of issuers discussed herein.

Additional Matters

To Canadian Residents: BMO Nesbitt Burns Inc. and BMO Nesbitt Burns Ltée/Ltd., affiliates of BMO Capital Markets Corp., furnish this report to Canadian residents and accept responsibility for the contents herein subject to the terms set out above. Any Canadian person wishing to effect transactions in any of the securities included in this report should do so through BMO Nesbitt Burns Inc. and/or BMO Nesbitt Burns Ltée/Ltd.

To U.S. Residents: BMO Capital Markets Corp. and/or BMO Nesbitt Burns Securities Ltd., affiliates of BMO NB, furnish this report to U.S. residents and accept responsibility for the contents herein, except to the extent that it refers to securities of Bank of Montreal. Any U.S. person wishing to effect transactions in any security discussed herein should do so through BMO Capital Markets Corp. and/or BMO Nesbitt Burns Securities Ltd.

To U.K. Residents: In the UK this document is published by BMO Capital Markets Limited which is authorised and regulated by the Financial Services Authority. The contents hereof are intended solely for the use of, and may only be issued or passed on to, (I) persons who have professional experience in matters relating to investments falling within Article 19(5) of the Financial Services and Markets Act 2000 (Financial Promotion) Order 2005 (the "Order") or (II) high net worth entities falling within Article 49(2)(a) to (d) of the Order (all such persons together referred to as "relevant persons"). The contents hereof are not intended for the use of and may not be issued or passed on to, retail clients.

ADDITIONAL INFORMATION IS AVAILABLE UPON REQUEST

BMO Financial Group (NYSE, TSX: BMO) is an integrated financial services provider offering a range of retail banking, wealth management, and investment and corporate banking products. BMO serves Canadian retail clients through BMO Bank of Montreal and BMO Nesbitt Burns. In the United States, personal and commercial banking clients are served by BMO Harris Bank N.A., (Member FDIC). Investment and corporate banking services are provided in Canada and the US through BMO Capital Markets.

BMO Capital Markets is a trade name used by BMO Financial Group for the wholesale banking businesses of Bank of Montreal, BMO Harris Bank N.A (Member FDIC), BMO Ireland Plc, and Bank of Montreal (China) Co. Ltd. and the institutional broker dealer businesses of BMO Capital Markets Corp. (Member SIPC), BMO Nesbitt Burns Trading Corp. S.A., BMO Nesbitt Burns Securities Limited (Member SIPC) and BMO Capital Markets GKST Inc. (Member SIPC) in the U.S., BMO Nesbitt Burns Inc. (Member Canadian Investor Protection Fund) in Canada, Europe and Asia, BMO Nesbitt Burns Ltée/Ltd. (Member Canadian Investor Protection Fund) in Canada, BMO Capital Markets Limited in Europe, Asia and Australia and BMO Advisors Private Limited in India.

"Nesbitt Burns" is a registered trademark of BMO Nesbitt Burns Corporation Limited, used under license. "BMO Capital Markets" is a trademark of Bank of Montreal, used under license. "BMO (M-Bar roundel symbol)" is a registered trademark of Bank of Montreal, used under license.

Initiating Coverage at Outperform; Your All-Weather Stock

The Company

Fortis is Canada's largest and most diversified regulated distribution utility company, with over 2,000,000 natural gas and electricity customers across the country. The company also has a small portfolio of real estate holdings and interests in two Caribbean regulated electricity distribution companies. In addition, the company is developing the 335 MW Waneta Dam expansion, a \$900 million contracted hydro project (51% owned) that is expected to be commissioned by spring 2015.

Forecasts

We are introducing EPS (f.d) forecasts of \$1.74 in 2012 and \$1.81 in 2013.

Valuation

Our target price of \$34.50 represents a 19x 2013E EPS, which is a premium to its peer group and toward the upper end of its five-year historical trading range. We believe the premium is justified given its superior earnings visibility (~90% of earnings are derived from regulated operations)

Recommendation

We are initiating coverage of Fortis with an Outperform rating. Fortis is hardly a market darling these days amid less robust earnings growth and uncertainty regarding its unregulated hydro assets in Belize. We have heard this song before, and while we recognize the market is waiting anxiously for a full resolution of these issues, we would argue that these issues are already priced in. In the meantime, we believe the market should return its attention to the company's sizable \$5.5 billion relatively low-risk organic growth initiatives through 2016, which should ultimately bear fruit. Aside from its organic growth execution scorecard, another key driver for Fortis' share price in the near term is the successful consummation of NY-based utility CH Energy, which still requires approval from CH Energy shareholders (likely summer 2012) and regulators (Q1/13). Please refer to our [report](#) for further details.

Ratings and Sector Key

We use the following ratings system definitions:

OP = Outperform - Forecast to outperform the market;

Mkt = Market Perform - Forecast to perform roughly in line with the market;

Und = Underperform - Forecast to underperform the market;

(S) = speculative investment;

NR = No rating at this time;

R = Restricted – Dissemination of research is currently restricted.

Market performance is measured by a benchmark index such as the S&P/TSX Composite Index, S&P 500, Nasdaq Composite, as appropriate for each company. BMO Capital Markets eight Top 15 lists guide investors to our best ideas according to different objectives (Canadian large, small, growth, value, income, quantitative; and US large, US small) have replaced the Top Pick rating.

Q1/12 Results Slightly Lower Than Expected

Impact

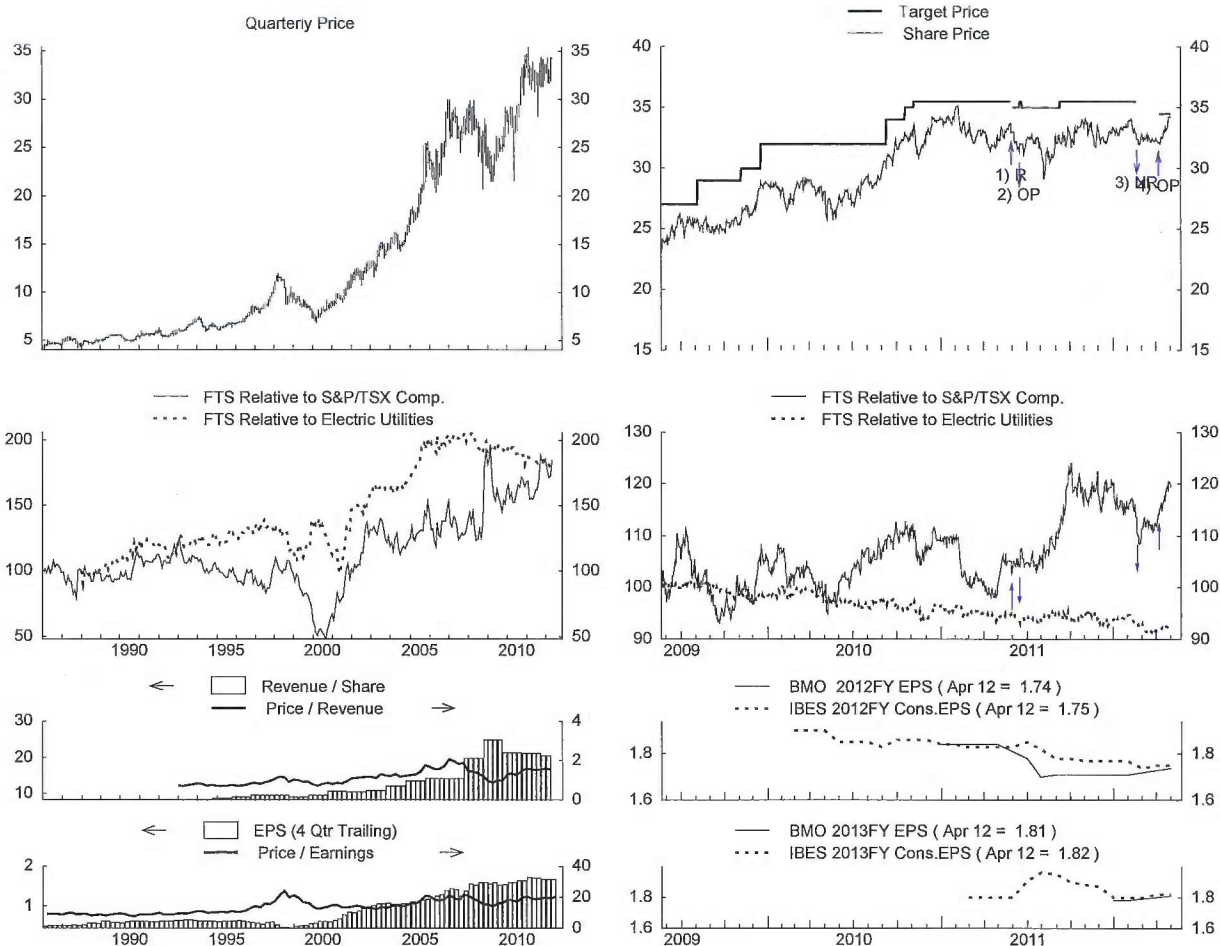

Neutral

Details & Analysis

Fortis reported Q1/12 results that were slightly lower than our estimates but in line with consensus. The company reported headline earnings of \$0.64 and comparable earnings of \$0.66 after adjusting for one-time acquisition costs associated with the proposed CH Energy transaction. The variance vs. our estimate was largely due to lower-than expected earnings contribution from FortisAlberta and FortisBC. Key highlights: (1) the company reaffirmed capital expenditures of \$1.3 billion in 2012 and ~\$5.5 billion over the five-year period of 2012-2016. Notably, its 335 MW expansion of the Waneta Dam (50% Fortis) is on track for an expected in-service date of spring 2015; (2) regulatory filings were made recently with the New York State Public Service Commission (April 20) and the Federal Energy Regulatory Commission (April 23) in connection with its proposed acquisition of CH Energy Group. A CH Energy shareholder vote is expected in mid-2012, with closing expected at the end of Q1/13; and (3) the British Columbia Utilities Commission is currently moving forward with a Cost of Capital proceeding regarding the appropriate allowed ROE and deemed capital structure for utilities subject to its review, effective January 1, 2013. A return to an ROE automatic adjustment (effective for 2014) will also be examined. We estimate that a 50 bps change in allowed ROE at Fortis' B.C.-based utilities will impact its consolidated EPS by ~\$0.05.

This report was prepared by an analyst(s) employed by BMO Nesbitt Burns Inc., and who is (are) not registered as a research analyst(s) under FINRA rules. For disclosure statements, including the Analyst's Certification, please refer to pages 2 to 5.

Ratings and Sector Key

We use the following ratings system definitions:

OP = Outperform - Forecast to outperform the market;

Mkt = Market Perform - Forecast to perform roughly in line with the market;

Und = Underperform - Forecast to underperform the market;

(S) = speculative investment;

NR = No rating at this time;

R = Restricted – Dissemination of research is currently restricted.

Market performance is measured by a benchmark index such as the S&P/TSX Composite Index, S&P 500, Nasdaq Composite, as appropriate for each company. BMO Capital Markets eight Top 15 lists guide investors to our best ideas according to different objectives (Canadian large, small, growth, value, income, quantitative; and US large, US small) have replaced the Top Pick rating.

Ben.Pham@bmo.com

Q1 – Onward and Upward

Event

Fortis reported Q1/12 results that were slightly lower than our estimates but in line with consensus. The company reported headline earnings of \$0.64 and comparable earnings of \$0.66 after adjusting for one-time acquisition costs associated with the proposed CH Energy transaction. Comparable EPS were slightly lower than our estimate of \$0.69, but generally consistent with Street consensus of \$0.67 per share. The variance vs. our estimate was largely due to lower-than-expected earnings contribution from FortisAlberta, FortisBC Electric and Fortis Properties, partially offset by higher-than-expected results from Other Canadian and its gas utility.

Impact

Neutral.

Forecasts

We have updated our financial model to reflect Q1/12 results and revised assumptions. We are lowering our 2012 EPS estimate (f.d.) to \$1.71 from \$1.74 but increasing our 2013 estimate (f.d.) to \$1.84 from \$1.81.

Valuation

We have raised our 12-month target price by \$1 to \$35.50. Our target price of \$35.50 represents 19.2x 2013E EPS (from 19.0x previously) our revised 2013 EPS forecast, which is a premium to its peer group and towards the upper end of its five-year historical trading range. We believe the premium is justified given its superior earnings visibility and the secular reduction observed in 10-year government of Canada bond yields.

Recommendation

We continue to rate the shares of Fortis Outperform.

Q1 – Onward and Upward

- **We are maintaining an Outperform rating on Fortis shares and increasing our 12-month target price by \$1 (~3%) to \$35.50 in connection with our revised estimate and target multiple.** Despite bottom-line results that fell shy of our expectations, Fortis' first-quarter results reinforced the positive earnings momentum that the company has put in place via ownership of several utility distribution businesses across Canada that possess strong growth prospects. In our view, Fortis is well positioned to grow its EPS to ~\$2.00 by 2015 while its significant exposure to low-risk utility operations should afford it shelter from ongoing global macroeconomic headwinds. We are maintaining our Outperform rating and increasing our 12-month target price by \$1 to \$35.50. Our target price of \$35.50 represents 19.2x 2013E EPS (from 19.0x previously) our revised 2013 EPS forecast, which is a premium to its peer group and towards the upper end of its five-year historical trading range. We believe the premium is justified given its superior earnings visibility (~90% of Fortis' earnings arise from utility operations, the highest among its peers) and the secular reduction observed in 10-year government of Canada bond yields.
- **Reaffirming capital spending guidance.** Against the backdrop of \$229 million of capital spending for the first quarter of 2012, the company reaffirmed its \$1.3 billion capital budget for 2012. The company's 2012–2016 capital spending outlook of \$5.5 billion is also unchanged with 64% expected to be incurred at the regulated electric utilities, 23% at regulated gas utilities and 13% at its non-regulated operations.
- **CH Energy:** Regulatory filings were made recently with the New York State Public Service Commission (April 20) and the Federal Energy Regulatory Commission (April 23) in connection with its proposed acquisition of CH Energy Group. A CH Energy shareholder vote is planned in mid-2012, with closing expected at the end of Q1/13. Our outlook continues to assume a \$500 million common equity issue in early 2013.
- **Waneta – on track:** Fortis's \$900 million Waneta dam expansion (51% interest) remains on track for start-up in spring 2015. The company has completed the excavation of the intake, powerhouse and power tunnels and has spent \$290 million since construction began in late 2010. Assuming that this project is financed with 35% equity and is capable of generating a 10.5% ROE, it could contribute up to \$16.9 million in incremental earnings when it is commissioned.
- **Regulatory update:** We expect 2012 to be relatively busy from a regulatory perspective. The British Columbia Utilities Commission (BCUC) is currently moving forward with a Cost of Capital proceeding regarding: (i) the appropriate allowed ROE and deemed capital structure for a benchmark low-risk utility, effective January 1, 2013; (ii) the determination of whether a return to an ROE automatic adjustment (effective for 2014) is warranted; (iii) a generic methodology on how to establish each utility's cost of capital in reference to the cost of capital for a benchmark low-risk utility; and (iv) a methodology to establish a deemed capital structure and deemed cost of capital. The BCUC also issued in April its decision on FortisBC Energy's 2012–2013 rate application. In addition to the above regulatory initiatives, a number of Fortis' utilities have submitted rate filings or are expecting rate decisions this year:

- In April 2012, the FortisBC Energy utilities re-filed their application with the BCUC to amalgamate into one legal entity. In late 2011, the utilities suspended their application in order to provide additional information to the BCUC, as requested. In addition to BCUC approval, the amalgamation requires the consent of the Government of British Columbia.
- In November 2011, FortisBC Electric filed an updated 2012–2013 Revenue Requirement Application, reflecting a return on estimated mid-year net rate base of \$1,146 million in 2012 and \$1,215 million in 2013. An oral hearing occurred in March 2012 and a decision on the rate application is expected in mid-2012.
- In April 2012, the Alberta Utilities Commission (AUC) approved FortisAlberta's negotiated settlement for 2012 distribution revenue requirements, reflecting a forecast mid-year rate base of \$2,025 million. The AUC continues to explore the implementation of Performance Based Regulation. A hearing commenced in April 2012 and a decision is expected in 2012.
- In March 2012, Newfoundland Power filed a Cost of Capital Application with the PUB to discontinue the use of the current ROE adjustment mechanism and to approve a reasonable rate of return on average rate base for 2012. A public hearing on the application is currently scheduled for June 2012.
- Maritime Electric plans to file an application with the Regulatory & Appeals Commission in fall 2012 for 2013 rates and allowed ROE.
- **Liquidity and resources:** At quarter-end, the company had \$110 million of cash and consolidated credit facilities of roughly \$2.2 billion, of which \$2.0 billion was available, including \$769 million unused under its \$800 million corporate committed revolving credit facility. Moreover, Fortis has requested an increase in the amount available for borrowing under its corporate credit facility to \$1 billion from \$800 million, which will enhance its liquidity position. Fortis expects the increase to be available in May 2012.
- **Revised estimates:** We have updated our financial model to reflect Q1/12 results and revised assumptions. We are lowering our 2012 EPS estimate (f.d.) to \$1.71 from \$1.74 but increasing our 2013 estimate (f.d.) to \$1.84 from \$1.81 (reflecting a lower run-rate for corporate costs).
- **Valuation:** We are maintaining an Outperform rating on Fortis shares and increasing our target price by \$1 (~3%) to \$35.50. At current prices, we believe that Fortis shares are reasonably valued, trading at a P/E multiple of 18.7x our 2013 estimate, which is a premium to its peer group and towards the upper end of its five-year historical trading range. We believe the premium is justified given its superior earnings visibility (~90% of Fortis' earnings arise from utility operations, the highest among its peers) and the secular reduction observed in 10-year government of Canada bond yields.

Exhibit 1: FTS – P/E, Share Price and Target P/E

Source: Thomson One, Bloomberg

- First-quarter results:** Fortis reported Q1/12 results that were slightly lower than our estimates but in line with consensus. The company reported headline earnings of \$0.64 and comparable earnings of \$0.66 after adjusting for one-time acquisition costs associated with the proposed CH Energy transaction. Comparable EPS were slightly lower than our estimate of \$0.69, but generally consistent with Street consensus of \$0.67 per share. The variance vs. our estimate was largely due to lower-than expected earnings contribution from FortisAlberta, FortisBC Electric and Fortis Properties, partially offset by higher-than-expected results from Other Canadian and its gas utility. (Table 1). Our annual estimates are set out in Table 2.

Table 1: Earnings by Business Segment

	Q1/12 (\$mm)	Q1/12E (\$mm)	Q1/11 (\$mm)

Ratings and Sector Key

We use the following ratings system definitions:

OP = Outperform - Forecast to outperform the market;

Mkt = Market Perform - Forecast to perform roughly in line with the market;

Und = Underperform - Forecast to underperform the market;

(S) = speculative investment;

NR = No rating at this time;

R = Restricted – Dissemination of research is currently restricted.

Market performance is measured by a benchmark index such as the S&P/TSX Composite Index, S&P 500, Nasdaq Composite, as appropriate for each company. BMO Capital Markets eight Top 15 lists guide investors to our best ideas according to different objectives (Canadian large, small, growth, value, income, quantitative; and US large, US small) have replaced the Top Pick rating.

Company Description – Fortis Inc. (Fortis) is a publicly listed holding company with four key businesses: electric utility operations, regulated natural gas distribution, non-regulated electric power generation and non-utility property activities. Gas and electric utility operations include Newfoundland Power (100%), Maritime Electric (100%, PEI), Fortis Ontario (100%), Caribbean Utilities (59.5%, Grand Cayman Island), Turks and Caicos (100%),

FortisAlberta (100%), FortisBC (100%) and the FortisBC Energy Companies (100%, British Columbia). *Website:* fortisinc.com

Recent Results – Fortis reported Q1/12 results that were slightly lower than our estimates but in line with consensus (adjusted EPS of \$0.66 vs. our estimate of \$0.69 and consensus of \$0.67).

This report was prepared by an analyst(s) employed by BMO Nesbitt Burns Inc., and who is (are) not registered as a research analyst(s) under FINRA rules. For disclosure statements, including the Analyst's Certification, please refer to the back pages.

Corporate Developments – Regulatory filings were made with the New York State Public Service Commission (April 20) and the Federal Energy Regulatory Commission (April 23) regarding the company's previously announced proposed acquisition of CH Energy Group, an energy delivery company whose main business is an electric and natural gas transmission and distribution utility in New York's Mid-Hudson Valley region. Pending regulatory approval and a shareholder vote in June 2012, the transaction is expected to close in Q1/13.

On May 23, S&P affirmed Fortis's A- credit rating and revised its outlook on the company to Stable from CreditWatch with negative implications. S&P's outlook assumes that Fortis will finance the CH Energy Group acquisition with at least \$600 million in common shares and \$250 million in preferred shares. Management has confirmed that it will finance the transaction in conformance with S&P's assumptions in order to keep its A- credit rating

intact, but noted that a portion of the proceeds will also be used to finance the company's 51% interest in the Waneta Dam hydro project, which is currently under development and is expected to be commissioned in spring 2015.

The company reaffirmed its 2012 capital budget at \$1.3 billion and it continues to target total investment of \$5.5 billion during the next five years. Approximately 64% of the total relates to the regulated electric utilities, 23% relates to the regulated gas utilities and 13% relates to Fortis' non-regulated businesses.

Forecasts – We are forecasting EPS (f.d.) of \$1.71 and \$1.82 for 2012 and 2013, respectively.

Valuation – Our target price of \$35 is based 19.2x 2013E EPS.

Recommendation – At current levels, we believe the shares of Fortis are attractively valued. Our rating is Outperform.

CH Energy Shareholders Approve Acquisition

Impact

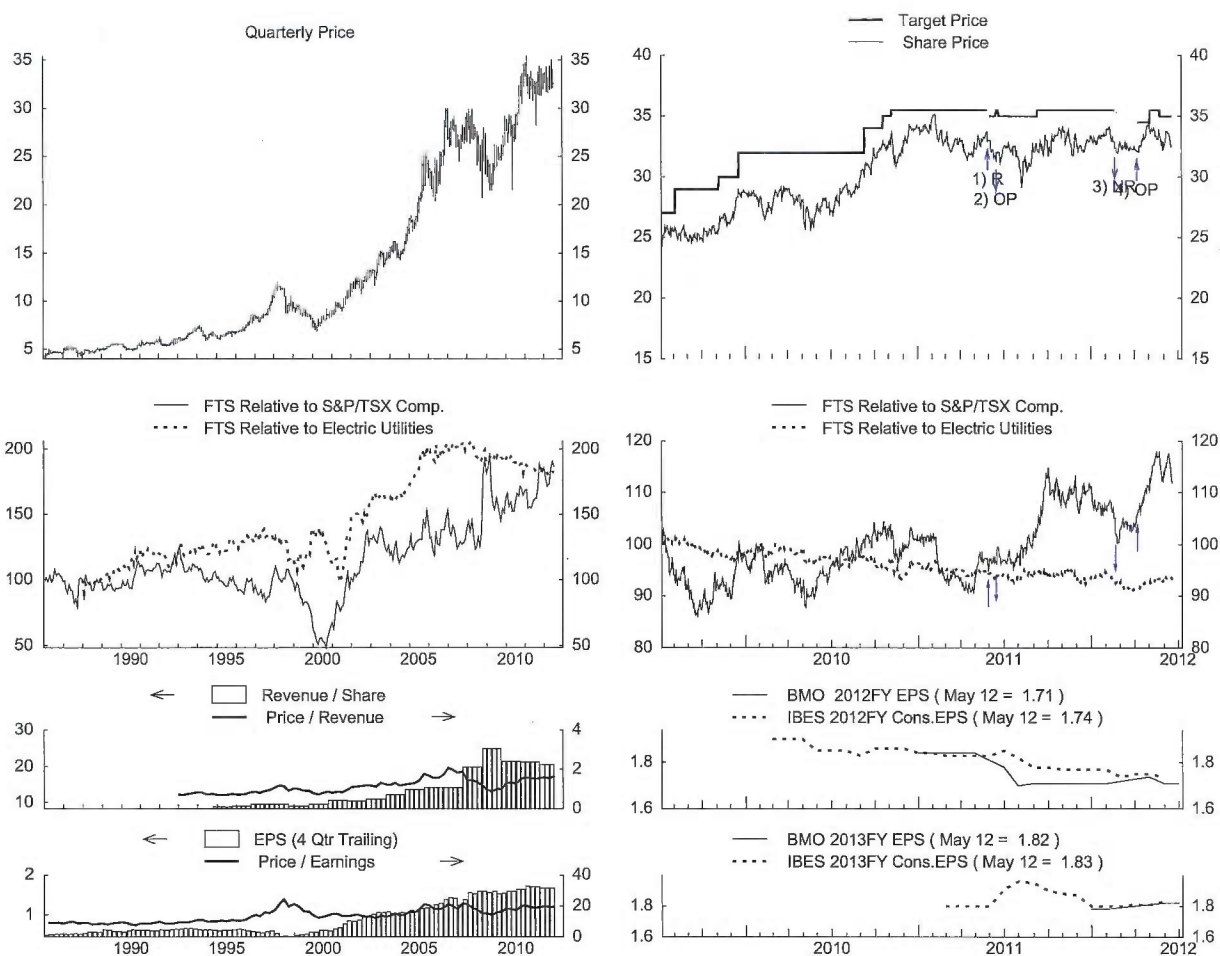

Neutral

Details & Analysis

Fortis has announced that the shareholders of CH Energy Group have voted in favour of the merger agreement under which Fortis will acquire 100% of CH Energy for US\$65.00 per share, for an aggregate purchase consideration of ~US\$1.5 billion (including assumed debt of US\$500 million). The transaction remains subject to regulatory approvals from the New York State Public Service Commission and the Federal Energy Regulatory Commission. (Fortis previously submitted filings to launch the regulatory review process with these bodies in April.) Shareholder approval was in line with expectations and we continue to assume new common equity in the amount of \$600 million in order to complete the transaction, which, pending approvals and closing conditions, is expected to close by the end of Q1/13.

This report was prepared by an analyst(s) employed by BMO Nesbitt Burns Inc., and who is (are) not registered as a research analyst(s) under FINRA rules. For disclosure statements, including the Analyst's Certification, please refer to pages 2 to 5.

Conflict Statement

A general description of how BMO Financial Group identifies and manages conflicts of interest is contained in our public facing policy for managing conflicts of interest in connection with investment research which is available at http://researchglobal.bmocapitalmarkets.com/Public/Conflict_Statement_Public.aspx

General Disclaimer

“BMO Capital Markets” is a trade name used by the BMO Investment Banking Group, which includes the wholesale arm of Bank of Montreal and its subsidiaries BMO Nesbitt Burns Inc. and BMO Nesbitt Burns Ltée./Ltd., BMO Capital Markets Ltd. in the U.K. and BMO Capital Markets Corp. in the U.S. BMO Nesbitt Burns Inc., BMO Capital Markets Ltd. and BMO Capital Markets Corp. are affiliates. Bank of Montreal or its subsidiaries (“BMO Financial Group”) has lending arrangements with, or provide other remunerated services to, many issuers covered by BMO Capital Markets. The opinions, estimates and projections contained in this report are those of BMO Capital Markets as of the date of this report and are subject to change without notice. BMO Capital Markets endeavours to ensure that the contents have been compiled or derived from sources that we believe are reliable and contain information and opinions that are accurate and complete. However, BMO Capital Markets makes no representation or warranty, express or implied, in respect thereof, takes no responsibility for any errors and omissions contained herein and accepts no liability whatsoever for any loss arising from any use of, or reliance on, this report or its contents. Information may be available to BMO Capital Markets or its affiliates that is not reflected in this report. The information in this report is not intended to be used as the primary basis of investment decisions, and because of individual client objectives, should not be construed as advice designed to meet the particular investment needs of any investor. This material is for information purposes only and is not an offer to sell or the solicitation of an offer to buy any security. BMO Capital Markets or its affiliates will buy from or sell to customers the securities of issuers mentioned in this report on a principal basis. BMO Capital Markets or its affiliates, officers, directors or employees have a long or short position in many of the securities discussed herein, related securities or in options, futures or

other derivative instruments based thereon. The reader should assume that BMO Capital Markets or its affiliates may have a conflict of interest and should not rely solely on this report in evaluating whether or not to buy or sell securities of issuers discussed herein.

Additional Matters

To Canadian Residents: BMO Nesbitt Burns Inc. and BMO Nesbitt Burns Ltee/Ltd., affiliates of BMO Capital Markets Corp., furnish this report to Canadian residents and accept responsibility for the contents herein subject to the terms set out above. Any Canadian person wishing to effect transactions in any of the securities included in this report should do so through BMO Nesbitt Burns Inc. and/or BMO Nesbitt Burns Ltee/Ltd.

To U.S. Residents: BMO Capital Markets Corp. and/or BMO Nesbitt Burns Securities Ltd., affiliates of BMO NB, furnish this report to U.S. residents and accept responsibility for the contents herein, except to the extent that it refers to securities of Bank of Montreal. Any U.S. person wishing to effect transactions in any security discussed herein should do so through BMO Capital Markets Corp. and/or BMO Nesbitt Burns Securities Ltd.

To U.K. Residents: In the UK this document is published by BMO Capital Markets Limited which is authorised and regulated by the Financial Services Authority. The contents hereof are intended solely for the use of, and may only be issued or passed on to, (I) persons who have professional experience in matters relating to investments falling within Article 19(5) of the Financial Services and Markets Act 2000 (Financial Promotion) Order 2005 (the "Order") or (II) high net worth entities falling within Article 49(2)(a) to (d) of the Order (all such persons together referred to as "relevant persons"). The contents hereof are not intended for the use of and may not be issued or passed on to, retail clients.

ADDITIONAL INFORMATION IS AVAILABLE UPON REQUEST

Coverage Resumed With Outperform Rating

Event

We are resuming coverage of FTS with an Outperform rating after coming off restriction after closing of its \$601 million subscription receipts offering. The offering of 18.5 million subscription receipts (9.8% to share count) will be used, subsequent to receipt of all required approvals (expected by the end of Q1/13), to finance a portion of the previously announced acquisition of CH Energy Group for US\$1.5 billion. The offering was largely expected, although we had assumed a Q1/13 time frame. While the offering is a bit sooner than expected, and thus leading to dilution to our 2012 outlook, this removes the equity overhang that we believe has largely placed a damper on recent stock price performance, and has returned FTS closer to breakeven YTD. We believe FTS remains well positioned to grow its EPS to \$2.00 by 2015 while its ~90% exposure to low-risk utility operations should afford it shelter from ongoing global macroeconomic headwinds.

Impact

Neutral.

Forecasts

Our 2012 EPS (fd) is tweaked down two pennies owing to differences in expected timing, while our 2013E EPS (fd) increases to \$1.83 from \$1.82.

Valuation

Our target price of \$35 is unchanged and represents 19.2x our 2013E EPS.

Recommendation

With the recent stock price weakness coupled with a sizable unchanged \$5.5 billion organic growth program through 2016, our bias on the stock remains positive. We are maintaining our Outperform rating with over 12% total return potential.

Ratings and Sector Key

We use the following ratings system definitions:

OP = Outperform - Forecast to outperform the market;

Mkt = Market Perform - Forecast to perform roughly in line with the market;

Und = Underperform - Forecast to underperform the market;

(S) = speculative investment;

NR = No rating at this time;

R = Restricted – Dissemination of research is currently restricted.

Market performance is measured by a benchmark index such as the S&P/TSX Composite Index, S&P 500, Nasdaq Composite, as appropriate for each company. BMO Capital Markets' seven Top 15 lists guide investors to our best ideas according to different objectives (CDN Large Cap, CDN Small Cap, US Large Cap, US Small cap, Income, CDN Quant, and US Quant) have replaced the Top Pick rating.

Q2 – It's Business as Usual at FTS

Event

Fortis' second-quarter performance was solid as usual (Q2/12 EPS of \$0.33 vs. BMO Research at \$0.34 and consensus of \$0.33), reflective of stronger-than-expected results at FortisAlberta, which offset higher-than-expected corporate costs. Earnings from the majority of the company's other business segments were generally in line with our estimates. One of the things we like the most about FTS is its longer-term earnings visibility. Indeed, the company reaffirmed its capex guidance of \$1.3 billion for 2012 and \$5.5 billion spending from 2012–2016. Against that backdrop, Fortis is well positioned to grow its EPS to ~\$2.00 by 2015E while its significant exposure to low-risk utility operations should afford it shelter from ongoing global macroeconomic headwinds.

Impact

Neutral.

Forecasts

We have updated our financial model to reflect Q2/12 results. Our 2012E EPS estimate (f.d.) of \$1.69 and 2013E EPS estimate (f.d.) of \$1.83 is unchanged.

Valuation

We are maintaining our target price of \$35.50, which represents 19.4x our 2013E EPS forecast.

Recommendation

We continue to rate the shares of Fortis Outperform.

Price (31-Jul) \$33.54 **52-Week High** \$34.98

Q2 – It's Business As Usual at FTS

- **We are maintaining an Outperform rating and 12-month target price of \$35.50 on Fortis shares.** Fortis' second-quarter performance was solid as usual, reflective of stronger-than-expected results at FortisAlberta, which offset higher-than-expected corporate costs. Earnings from the majority of the company's other business segments were generally in line with our estimates. One of the things we like the most about FTS is its longer-term earnings visibility. Indeed, the company reaffirmed its capex guidance of \$1.3 billion for 2012 and \$5.5 billion spending from 2012–2016. Against that backdrop, Fortis is well positioned to grow its EPS to ~\$2.00 by 2015E while its significant exposure to low-risk utility operations should afford it shelter from ongoing global macroeconomic headwinds. We are maintaining our Outperform rating and \$35.50 target price. Our target price of \$35.50 represents 19.4x our 2013E EPS forecast.
- **No changes to \$5.5 billion capital expenditure program.** Consolidated capital expenditures totalled ~\$282 million in Q2/12 (~\$511 million for the first half of 2012). The company's full-year outlook for capital spending remains unchanged (\$1.3 billion) as is its estimate of ~\$5.5 billion in total capital spending between 2012 and 2016. Over this five-year period, Fortis plans to deploy ~65% of the total capital spending to regulated activities (driven by FortisAlberta and FortisBC Electric), ~21% to regulated gas utilities and ~14% to non-regulated operations.
- **CH Energy acquisition on track for end of Q1/13 close:** Several key advancements in the proposed CH Energy acquisition took place during the quarter. The transaction received approval from CH Energy's shareholders (June 19) and regulatory approval from both the Federal Energy Regulatory Commission and the Committee on Foreign Investment in the United States in July. Fortis issued ~\$600 million in subscription receipts at the end of June in order to finance the required equity component of the transaction price; the completion of this offering alleviates any concern related to an equity overhang and should ensure the preservation of the company's A-rated balance sheet. Approval for the CH Energy acquisition still needs to be obtained from the New York State Public Service Commission, which is currently reviewing the application filed on April 23. The company maintains its expectation that the transaction will close by the end of Q1/13.
- **Waneta expansion:** Construction activities continued for the \$900 million Waneta dam expansion, a project in which Fortis holds a 51% interest. A total of \$345 million has been spent to date since construction began in late 2010. The company has reported that the project is still on track for completion on budget and on time, with a target in-service date of spring 2015.
- **Key regulatory updates:**
 - The company expects that the British Columbia Utilities Commission (BCUC) will reach a decision on the 2012/2013 Revenue Requirements Application (RRA) filed by FortisBC Electric during Q3/12. The RRA, updated in November 2011, calls for rate increases of 1.5% and 6.5% in 2012 and 2013, respectively.

- The preliminary timetable for the Generic Cost of Capital review by the BCUC calls for evidence proceedings through to early December 2012; if necessary, an oral hearing will commence on December 12, 2012. As set out the final scoping document released by the BCUC in April, the commission will review several issues with respect to the determination of an appropriate cost of capital for regulated utilities. The outcome of these proceedings remains uncertain and could have a material impact on the future earnings of the FortisBC Energy Companies as well as FortisBC Electric.
- The AUC continued its assessment of the potential implementation of performance-based regulation (PBR) for Alberta-based distribution utilities beginning in 2013. A hearing took place during April and May 2012, and in July 2012 FortisAlberta submitted its final argument with respect to how PBR should be implemented. A final decision from the AUC is expected in Q4/12.
- In July 2012, the AUC issued a decision that reaffirmed FortisAlberta as the primary electricity distributor within its service territory, in response to an application from the Central Alberta Rural Electrification Association (CAREA) requesting service rights to new customers in certain areas where FortisAlberta and CAREA territories overlap.
- After filing a Cost of Capital Application with the Board of Commissioners of Public Utilities of Newfoundland (PUB) in March 2012, Newfoundland Power was awarded an increase in its allowed ROE from 8.38% (2011) to 8.80% (2012). Effective July 1, the PUB approved an overall average increase in electricity rates for Newfoundland Power's customers of 6.6%. Newfoundland Power will be filing a general rate application for 2013 with the PUB during Q3/12.
- Maritime Electric intends to file an application for 2013 customer rates and allowed return with the Island Regulatory and Appeals Commission in fall 2012.
- **Possible small tuck-in acquisition in B.C.:** FortisBC Electric has entered into preliminary discussions with the City of Kelowna, British Columbia to purchase its electricity distribution assets (15,000 customers), to which FortisBC has provided electricity and has operated and maintained since 2000. Subject to negotiation of definitive agreements and municipal and regulatory approvals, the transaction is expected to close by the end of Q1/13. For more details, please see a [press release](#) issued by the City of Kelowna on July 19.
- **Liquidity and resources:** Available liquidity improved from the first quarter after Fortis secured a limit increase on its corporate credit facility from \$800 million to \$1 billion in May 2012. As of June 30, the company had \$231 million of cash and consolidated credit facilities of roughly \$2.5 billion, of which ~\$2.0 billion was available.
- **No change to our estimates:** We have updated our financial model to reflect Q2/12 results. Our 2012 EPS estimate (f.d.) of \$1.69 and 2013 EPS estimate (f.d.) of \$1.83 is unchanged.
- **Valuation:** We are maintaining an Outperform rating and 12-month target price of \$35.50 on Fortis shares. At current prices, we believe that Fortis shares are reasonably valued,

trading at a P/E multiple of 18.4x our 2013 estimate, which is towards the upper end of its five-year historical trading range. We believe the premium is justified given its superior earnings visibility (~90% of Fortis' earnings arise from utility operations, the highest among its peers) and the secular reduction observed in 10-year government of Canada bond yields.

- **Second-quarter results:** Fortis reported Q2/12 EPS of \$0.33, generally in line with our estimate of \$0.34 and square on with Street consensus of \$0.33. Earnings from the majority of the company's business segments were generally in line with our estimates, with stronger-than-expected results at FortisAlberta offsetting higher-than-expected corporate costs. Quarterly earnings variances for each business segment are set out in Exhibit 3, while our annual estimates are set out in Exhibit 4.

Ratings and Sector Key

We use the following ratings system definitions:

OP = Outperform - Forecast to outperform the market;

Mkt = Market Perform - Forecast to perform roughly in line with the market;

Und = Underperform - Forecast to underperform the market;

(S) = speculative investment;

NR = No rating at this time;

R = Restricted – Dissemination of research is currently restricted.

Market performance is measured by a benchmark index such as the S&P/TSX Composite Index, S&P 500, Nasdaq Composite, as appropriate for each company. BMO Capital Markets' seven Top 15 lists guide investors to our best ideas according to different objectives (CDN Large Cap, CDN Small Cap, US Large Cap, US Small cap, Income, CDN Quant, and US Quant) have replaced the Top Pick rating.

Conflict Statement

A general description of how BMO Financial Group identifies and manages conflicts of interest is contained in our public facing policy for managing conflicts of interest in connection with investment research which is available at http://researchglobal.bmocapitalmarkets.com/Public/Conflict_Statement_Public.aspx.

General Disclaimer

"BMO Capital Markets" is a trade name used by the BMO Investment Banking Group, which includes the wholesale arm of Bank of Montreal and its subsidiaries BMO Nesbitt Burns Inc. and BMO Nesbitt Burns Ltée./Ltd., BMO Capital Markets Ltd. in the U.K. and BMO Capital Markets Corp. in the U.S. BMO Nesbitt Burns Inc., BMO Capital Markets Ltd. and BMO Capital Markets Corp are affiliates. Bank of Montreal or its subsidiaries ("BMO Financial Group") has lending arrangements with, or provide other remunerated services to, many issuers covered by BMO Capital Markets. The opinions, estimates and projections contained in this report are those of BMO Capital Markets as of the date of this report and are subject to change without notice. BMO Capital Markets endeavours to ensure that the contents have been compiled or derived from sources that we believe are reliable and contain information and opinions that are accurate and complete. However, BMO Capital Markets makes no representation or warranty, express or implied, in respect thereof, takes no responsibility for any errors and omissions contained herein and accepts no liability whatsoever for any loss arising from any use of, or reliance on, this report or its contents. Information may be available to BMO Capital Markets or its affiliates that is not reflected in this report. The information in this report is not intended to be used as the primary basis of investment decisions, and because of individual client objectives, should not be construed as advice designed to meet the particular investment needs of any investor. This material is for information purposes only and is not an offer to sell or the solicitation of an offer to buy any security. BMO Capital Markets or its affiliates will buy from or sell to customers the securities of issuers mentioned in this report on a principal basis. BMO Capital Markets or its affiliates, officers, directors or employees have a long or short position in many of the securities discussed herein, related securities or in options, futures or other derivative instruments based thereon. The reader should assume that BMO Capital Markets or its affiliates may have a conflict of interest and should not rely solely on this report in evaluating whether or not to buy or sell securities of issuers discussed herein.

Additional Matters

To Canadian Residents: BMO Nesbitt Burns Inc. and BMO Nesbitt Burns Ltée./Ltd., affiliates of BMO Capital Markets Corp., furnish this report to Canadian residents and accept responsibility for the contents herein subject to the terms set out above. Any Canadian person wishing to effect transactions in any of the securities included in this report should do so through BMO Nesbitt Burns Inc. and/or BMO Nesbitt Burns Ltée./Ltd.

The following applies if this research was prepared in whole or in part by Andrew Breichmanas, Tony Robson, or Edward Sterck: This research is not prepared subject to Canadian disclosure requirements. This research is prepared by BMO Capital Markets Limited and subject to the regulations of the Financial Services Authority (FSA) in the United Kingdom. FSA regulations require that a firm providing research disclose its ownership interest in the issuer that is the subject of the research if it and its affiliates own 5% or more of the equity of the issuer. Canadian regulations require that a firm providing research disclose its ownership interest in the issuer that is the subject of the research if it and its affiliates own 1% or more of the equity of the issuer that is the subject of the research. Therefore BMO Capital Markets Limited will only disclose its and its' affiliates ownership interest in the subject issuer if such ownership exceeds 5% of the equity of the issuer.

To U.S. Residents: BMO Capital Markets Corp. and/or BMO Nesbitt Burns Securities Ltd., affiliates of BMO NB, furnish this report to U.S. residents and accept responsibility for the contents herein, except to the extent that it refers to securities of Bank of Montreal. Any U.S. person wishing to effect transactions in any security discussed herein should do so through BMO Capital Markets Corp. and/or BMO Nesbitt Burns Securities Ltd.

To U.K. Residents: In the UK this document is published by BMO Capital Markets Limited which is authorised and regulated by the Financial Services Authority. The contents hereof are intended solely for the use of, and may only be issued or passed on to, (I) persons who have professional experience in matters relating to investments falling within Article 19(5) of the Financial Services and Markets Act 2000 (Financial Promotion) Order 2005 (the "Order") or (II) high net worth entities falling within Article 49(2)(a) to (d) of the Order (all such persons together referred to as "relevant persons"). The contents hereof are not intended for the use of and may not be issued or passed on to, retail clients.

SHARE PRICE PERFORMANCE:

COMPANY SUMMARY:

Fortis Inc. is a diversified electric utility holding company with assets of \$2 billion and annual revenue of over \$715 million. The company has holdings in 7 electric distribution utilities located in Newfoundland and Labrador, PEI, Ontario, Alberta, BC, Belize and the Cayman Islands. It also owns two subsidiaries engaged solely in electricity generation in NY and Belize. Fortis also has real estate and hotel operations in Atlantic Canada.

All amounts in C\$ unless otherwise noted.

Energy – Pipeline and Power Utilities

CONTINUES TO MEET EXPECTATIONS

Event

Fortis reported fourth quarter earnings in line with expectations.

Impact

Neutral.

Valuation

We rate the stock a HOLD with a target price of C\$26.00. Our target price is derived from a combination of valuation metrics, which include earnings and dividend yields relative to long-term interest rates, dividend discount models, and earnings and cash flow multiples relative to both historical valuation and its utility and pipeline peers. Our target price partially incorporates the impact of a previously announced increased dividend tax credit.

Summary

Fortis reported fourth quarter recurring earnings of \$0.26 versus \$0.26 last year and in line with the \$0.27 consensus estimate. For the full year, recurring earnings were \$1.16 versus \$1.09. Final reported earnings were \$0.22 versus \$0.22 in the fourth quarter and \$1.33 versus \$1.07 for the full year. Non-recurring items in the fourth quarter include: a \$3 million negative adjustment at FortisAlberta due to the May 24 implementation of a Negotiated Rate Settlement; \$1.1 million writedown of the Rankine assets at Fortis Generation; a \$0.4 million insurance gain associated with the Dolgeville plant at Fortis Generation; and a \$0.8 million restructuring charge related to the purchase of FortisAlberta and FortisBC. We note that the \$3 million adjustment at FortisAlberta stems from the second quarter and is not non-recurring on a full-year basis. Earnings benefited from increased electricity prices in Ontario and Upper New York but were offset by reduced earnings at FortisBC due to higher operating, depreciation and interest expenses. For a more detailed breakout of the fourth quarter and full year results, please refer to Figures 1 and 2.

Outlook

Generally, all of the business divisions continue to operate well. The addition of FortisAlberta and FortisBC utility assets last year continue to contribute strongly to earnings. With about \$315 million of capital additions to rate base in 2006 and expected continued growth for the next several years, these operations should help provide stable and low-risk earnings growth. Other projects that add to earnings growth potential in 2006 include the 50 MW generating station on Prince Edward Island (February 2006 in-service date), the acquisition of three western Canadian hotels (purchased in February 2005) and new generation from the Chalillo dam in Belize (commissioned late 2005). In the shorter-term, the positive impact of this growth will be partly offset by lower allowed returns in some of the regulated operations due to the approximate 65 basis point decline in long-term interest rates over the past year. We are maintaining our 2006 EPS estimate of \$1.20.

Noteworthy

Electricity prices

- Ontario
 - Q4: \$71.46/MWh versus \$50.80/MWh
 - Full year: \$68.49/MWh versus \$49.95/MWh
- Upper New York
 - Q4: US\$70.94/MWh versus US\$46.75/MWh

2006 Capital Budget

- Total of \$450 million
 - \$420 million for regulated utilities
 - ~\$315 million on FortisAlberta and FortisBC
 - ~\$105 million on other regulated assets
 - \$30 million capex for non-regulated assets

Regulatory

- Newfoundland Power
 - 2006 allowed ROE unchanged from 2005 at 9.24%
 - Maritime Electric
 - Filed for 1.6% rate increase effective July 1, 2006
 - FortisAlberta
 - 2006 allowed ROE of 8.93% versus 9.5% in 2005
 - FortisBC 2006 Rate Case
 - Filed for 5.9% increase to 2006 rates on November 24, 2005
 - BCUC will review in Feb 2006, negotiations or hearing scheduled after
 - Includes a PBR mechanism for revenue requirements in 2007-2009
 - 8.69% ROE in 2006 versus 9.43% in 2005 on deemed equity of 40% equity
-

Investment risks

Some of the specific risk factors that pertain to the projected six to 12-month stock price target for Fortis Inc. are as follows: 1) Price movement in electricity rates and commodities used for electricity generation could impact profitability; 2) International operations have currency rate exposure and liquidity risks associated with those currencies; 3) Credit risk of contract counterparties; 4) Debt refinancing at higher interest rates could impact the income of the company; 5) Equipment failure or extreme weather conditions could adversely affect operating facilities; 6) Change in public policy on environmental health and safety risk could impose unexpected costs on Fortis; 7) Change in regulatory or political climate could impinge on the profitability and the future growth and development of Fortis; 8) The inability to maintain, or to renew, the collective bargaining agreements with unionized workers on acceptable terms could result in increased labour costs or service interruptions arising from labour disputes; 9) Challenging economic condition which may impact demand for products and services, peer-group valuation, access to capital and share trading liquidity; 10) Fortis holds investments in commercial real estate and hotel properties which are subject to operating risks associated with the industry; 11) If the announced increase to the dividend tax credit is not passed into law, it would have a material impact on our target price.

An analyst has visited with the issuer's management and some of the issuer's material operations. No payment or reimbursement was received from the issuer for related travel costs.

APPENDIX: IMPORTANT DISCLOSURES**Analyst Certification:**

Each Investment Analyst of Canaccord Adams whose name appears on the front page of this Investment Research hereby certifies that (i) the recommendations and opinions expressed in the Investment Research accurately reflect the Investment Analyst's personal, independent and objective views about any and all of the Designated Investments or Relevant Issuers discussed herein that are within such Investment Analyst's coverage universe and (ii) no part of the Investment Analyst's compensation was, is, or will be, directly or indirectly, related to the specific recommendations or views expressed by the Investment Analyst in the Investment Research.

Distribution of Ratings:

- In the past 12 months, Canaccord Adams, its partners, affiliated companies, officers or directors, or any authoring analyst involved in the preparation of this investment research has provided services to the relevant issuer for remuneration, other than normal course investment advisory or trade execution services.
- Canaccord Adams intends to seek or expects to receive compensation for Corporate Finance/Investment Banking services from the relevant issuer in the next six months.
- The authoring analyst, a member of the authoring analyst's household, or any individual directly involved in the preparation of this investment research, has a long position in the shares or derivatives, or has any other financial interest in the relevant issuer, the value of which increases as the value of the underlying equity increases.
- The authoring analyst, a member of the authoring analyst's household, or any individual directly involved in the preparation of this investment research, has a short position in the shares or derivatives, or has any other financial interest in the relevant issuer, the value of which decreases as the value of the underlying equity decreases.

10	Those persons identified as the author(s) of this investment research, or any individual involved in the preparation of this investment research, have purchased/received shares in the relevant issuer prior to a public offering of those shares, and such person's name and details are disclosed above.
11	A partner, director, officer, employee or agent of Canaccord Adams and its affiliated companies, or a member of his/her household, is an officer, director or employee, or serves as an advisor or board member of the relevant issuer and/or one of its subsidiaries, and such person's name is disclosed above.
12	As of the month end immediately preceding the date of publication of this investment research, or the prior month end if publication is within 10 days following a month end, Canaccord Adams or its affiliate companies, in the aggregate, beneficially owned 1% or more of any class of the total issued share capital or other common equity securities of the relevant issuer or held any other financial interests in the relevant issuer which are significant in relation to the investment research (as disclosed above).
13	As of the month end immediately preceding the date of publication of this investment research, or the prior month end if publication is within 10 days following a month end, the relevant issuer owned 1% or more of any class of the total issued share capital in Canaccord Adams or any of its affiliated companies.
14	Other specific disclosures as described above.

Canaccord Adams is the business name used by certain subsidiaries of Canaccord Capital Inc., including Canaccord Adams Inc., Canaccord Adams Limited, and Canaccord Adams, a division of Canaccord Capital Corporation. Clients of Canaccord Adams, in the past 12 months, may have been clients of Canaccord Capital Corporation, Canaccord Capital (Europe) Limited, Canaccord Capital Corporation USA Inc., and/or Adams Harkness Financial Group Ltd.

The authoring analysts who are responsible for the preparation of this investment research are employed by Canaccord Adams, a securities broker-dealer with principal offices located in Vancouver, Calgary, Toronto, Montreal (all Canada), Boston, New York, San Francisco (all US) and London (UK).

In the event that this is compendium investment research (covering six or more relevant issuers), Canaccord Adams and its affiliated companies may choose to provide specific disclosures of the subject companies by reference, as well as its policies and procedures regarding the dissemination of investment research. To access this material or for more information, please send a request to Canaccord Adams Research, Attn: Disclosures, P.O. Box 10337 Pacific Centre, 2200-609 Granville Street, Vancouver, BC, Canada V7Y 1H2 or disclosures@canaccordadams.com.

The authoring analysts who are responsible for the preparation of this investment research have received (or will receive) compensation based upon (among other factors) the Corporate Finance/Investment Banking revenues and general profits of Canaccord Adams. However, such authoring analysts have not received, and will not receive, compensation that is directly based upon or linked to one or more specific Corporate Finance/Investment Banking activities, or to recommendations contained in the investment research.

Canaccord Adams and its affiliated companies may have a Corporate Finance/Investment Banking or other relationship with the company that is the subject of this investment research and may trade in any of the designated investments mentioned herein either for their own account or the accounts of their customers, in good faith and in the normal course of market making. Accordingly, Canaccord Adams or their affiliated companies, principals or employees (other than the authoring analyst(s) who prepared this investment research) may at any time have a long or short position in any such designated investments, Related designated investments or in options, futures or other derivative instruments based thereon.

Some regulators require that a firm must establish, implement and make available a policy for managing conflicts of interest arising as a result of publication or distribution of investment research. This investment research has been prepared in accordance with Canaccord Adams' policy on managing conflicts of interest, and information barriers or firewalls have been used where appropriate. Canaccord Adams' policy is available upon request.

The information contained in this investment research has been compiled by Canaccord Adams from sources believed to be reliable, but (with the exception of the information about Canaccord Adams) no representation or warranty, express or implied, is made by Canaccord Adams, its affiliated companies or any other person as to its fairness, accuracy, completeness or correctness. Canaccord Adams has not independently verified the facts, assumptions, and estimates contained herein. All estimates, opinions and other information contained in this investment research constitute Canaccord Adams' judgement as of the date of this investment research, are subject to change without notice and are provided in good faith but without legal responsibility or liability.

Canaccord Adams salespeople, traders, and other professionals may provide oral or written market commentary or trading strategies to our clients and our proprietary trading desk that reflect opinions that are contrary to the opinions expressed in this investment research. Canaccord Adams' affiliates, proprietary trading desk, and investing businesses may make investment decisions that are inconsistent with the recommendations or views expressed in this investment research.

This investment research is provided for information purposes only and does not constitute an offer or solicitation to buy or sell any designated investments discussed herein in any jurisdiction where such offer or solicitation would be prohibited. As a result, the designated investments discussed in this investment

research may not be eligible for sale in some jurisdictions. This investment research is not, and under no circumstances should be construed as, a solicitation to act as a securities broker or dealer in any jurisdiction by any person or company that is not legally permitted to carry on the business of a securities broker or dealer in that jurisdiction. This material is prepared for general circulation to clients and does not have regard to the investment objectives, financial situation or particular needs of any particular person. Investors should obtain advice based on their own individual circumstances before making an investment decision. To the fullest extent permitted by law, none of Canaccord Adams, its affiliated companies or any other person accepts any liability whatsoever for any direct or consequential loss arising from or relating to any use of the information contained in this investment research.

- For Canadian Residents:** This Investment Research has been approved by Canaccord Adams, a division of Canaccord Capital Corporation, which accepts responsibility for this Investment Research and its dissemination in Canada. Canadian clients wishing to effect transactions in any Designated Investment discussed should do so through a qualified salesperson of Canaccord Adams, a division of Canaccord Capital Corporation in their particular jurisdiction.
- For United Kingdom Residents:** This Investment Research complies with of the Financial Services Authority's Handbook's chapter on Conduct of Business and is approved by Canaccord Adams Limited, which is regulated and authorized by the Financial Services Authority, in connection with its distribution in the United Kingdom. This material is not for distribution in the United Kingdom to private customers, as defined under the rules of the Financial Services Authority. Canaccord Adams Limited accepts responsibility for this Investment Research and its dissemination in the United Kingdom. The information contained in this Investment Research is only intended for distribution in the UK to persons who qualify as intermediate customers or market counterparties, as defined under the rules of the Financial Services Authority.

SHARE PRICE PERFORMANCE:

COMPANY SUMMARY:

Fortis Inc. is a diversified electric utility holding company with assets of \$2 billion and annual revenue of over \$715 million. The company has holdings in 7 electric distribution utilities located in Newfoundland and Labrador, PEI, Ontario, Alberta, BC, Belize and the Cayman Islands. It also owns two subsidiaries engaged solely in electricity generation in NY and Belize. Fortis also has real estate and hotel operations in Atlantic Canada.

All amounts in C\$ unless otherwise noted.

Energy -- Pipeline and Power Utilities

FIRST QUARTER MEETS EXPECTATIONS

Event

Fortis reported first quarter earnings that were in line with expectations.

Impact

Neutral.

Valuation

We are maintaining our C\$26.00 target on the shares of Fortis but raising our rating from Hold to BUY due to recent share price weakness. Our target price is derived from a combination of valuation metrics which include earnings and dividend yields relative to long term interest rates, dividend discount models, and earnings and cash flow multiples relative to both historical valuation and its utility and pipeline peers.

Summary

Fortis reported first quarter recurring earnings of \$0.35 versus \$0.32 last year, in line with the \$0.36 consensus estimate. Final reported earnings were \$0.35 versus \$0.40 as last year's first quarter included a \$7.9 million (\$0.08 per share) settlement from Ontario Power Generation. All the regulated utility operations delivered results that were consistent with our estimates. We note that the \$2.3 million reduced contribution from Newfoundland Power is mostly due to an accounting change in revenue recognition to an accrual basis and will reverse in the second half of the year. In the non-regulated division, higher production from improved rainfall in upper New York and in Belize and the operation of the 50 MW Chalillo dam and hydro plant in Belize was partly offset by lower realized spot prices in Ontario. For a more detailed breakout of the first quarter results, please refer to Figure 1.

Canaccord Adams is the global capital markets group of Canaccord Capital Inc. (CCI : TSX|AIM)

The recommendations and opinions expressed in this Investment Research accurately reflect the Investment Analyst's personal, independent and objective views about any and all the Designated Investments and Relevant Issuers discussed herein. For important information, please see the Important Disclosures section in the appendix of this document.

Outlook

Fortis is off to a good start to meet our EPS estimate of \$1.25 for 2006. All of its business divisions appear to be operating well. The recently added utility operations of FortisAlberta and FortisBC continue to deliver strong earnings with capital additions increasing rate base and fuelling growth. In 2006, capital additions to these two utilities are expected to be about \$315 million, with over \$450 million of total company capital expenditures in to be spent in 2006. Fortis expects total utility assets to grow at 6% annually over the next five years. Earnings improvements in 2006 should also be helped by the 50 MW generating station on Prince Edward Island that went into service in February 2006 and new generation from the Chalillo dam in Belize that was commissioned in late 2005. Growth in these areas should more than offset reductions in allowed regulated returns due to declines in long-term interest rates over the past year. We are increasing our rating from Hold to BUY due to recent share price weakness.

Noteworthy

- Newfoundland Power changed revenue recognition policy to accrual basis
 - Reduces Q1 and Q2 earnings and increases Q3 and Q4 earnings
 - No impact on full year basis
 - Regulatory
 - Maritime Electric
 - Filed for 1.6% rate increase effective July 1, 2006
 - Filed for approval of Wind Power Purchase Arrangement with the Government of PEI
 - FortisAlberta
 - Filed 2006/2007 Application
 - Decision expected in Fall 2006
 - FortisBC
 - Current ROE mechanism adjusted by BCUC
 - 2006 ROE increased to 9.2% from 8.69% after regulatory review
 - Company currently negotiating settlement for 2006 rates
-

Investment risks

Some of the specific risk factors that pertain to the projected six to 12 month stock price target for Fortis Inc. are as follows: 1) Price movement in electricity rates and commodities used for electricity generation could impact profitability; 2) International operations have currency rate exposure and liquidity risks associated with those currencies; 3) Credit risk of contract counterparties; 4) Debt refinancing at higher interest rates could impact the income of the company; 5) Equipment failure or extreme weather conditions could adversely affect operating facilities; 6) Change in public policy on environmental health and safety risk could impose unexpected costs on Fortis; 7) Change in regulatory or political climate could impinge on the profitability and the future growth and development of Fortis; 8) The inability to maintain, or to renew, the collective bargaining agreements with unionized workers on acceptable terms could result in increased labour costs or service interruptions arising from labour disputes; 9) Challenging economic condition which may impact demand for products and services, peer-group valuation, access to capital and share trading liquidity; 10) Fortis holds investments in commercial real estate and hotel properties which are subject to operating risks associated with the industry; 11) If the announced increase to the dividend tax credit is not passed into law, it would have a material impact on our target price.

Modestly positive

Valuation

We are maintaining our \$26.00 target and BUY rating on the shares of Fortis. Our target price is derived from a combination of valuation metrics that include earnings and dividend yields relative to long term interest rates, dividend discount models, and earnings and cash flow multiples relative to both historical valuation and its utility and pipeline peers.

Summary

Fortis reported second quarter recurring earnings of \$0.34 versus \$0.29 last year, in line with our \$0.35 estimate and the \$0.33 consensus estimate. Net reported earnings were \$0.37 versus \$0.37. For the first half of the year, recurring EPS was \$0.70 versus \$0.61 for the same period last year. The regulated utility operations continue to deliver earnings consistent with our expectations and similar to last year. Note that a change in accounting for revenue recognition reduced the contribution from Newfoundland Power by \$3.2 million in the quarter, which will reverse in the second half of the year. In the non-regulated division, drastically increased rainfall and the operation of the Chalillo dam in Belize as well as improved hydrology in Upper New York State boosted earnings by 2.5 million (up 78% from Q2/05). Earnings were

For important information, please see the Important Disclosures section in the appendix of this document.

partly offset by lower realized spot prices in Ontario. For a more detailed breakout of the second quarter results, please refer to Figure 1.

Outlook

We are increasing our 2006 and 2007 estimates to \$1.30 and \$1.40 from \$1.25 and \$1.30, respectively. The company's business divisions appear to be operating well as FortisAlberta and FortisBC utility operations continue to deliver strong earnings, with significant capital additions adding to rate base and driving earnings growth. In 2006 and 2007 capital expenditures at Fortis BC and FortisAlberta are expected to be about \$400 million. Total capital additions for the company in 2006 are expected to be \$450 million with \$425 million to be invested in utility operations. Earnings growth in 2006 and 2007 will also be driven by the addition of a 50 MW generating station on Prince Edward Island (February 2006 in-service date), new generation from the Chalillo dam in Belize (commissioned late 2005) and the addition of expanded operations at Fortis Properties.

Noteworthy Items

- FortisBC is doing so well that it had to adjust earnings \$1.5 million downwards as it appears it would exceed its maximum allowed return
 - Increased interest in Belize Electricity through the purchase of share rights from other investors
 - Now owns 70.1% versus 68.5%
 - Newfoundland Power changed revenue recognition policy to accrual basis
 - As anticipated, reduces 1H earnings and increases 2H earnings
 - No impact on full year basis
 - Earnings positively impacted by non-cash gain on unrealized foreign exchange
 - \$1.6 million after-tax or 1.5¢ per share
 - Second quarter earnings growth mainly due to non-regulated side and reduced corporate expense.
-

Figure 1: Fortis Inc. second quarter financial details

	Second Quarter Earnings			
Millions of dollars (except per share data)	2005	2006	Change	
				Favourable (Unfavourable)
Regulated Utilities - Canadian				
Newfoundland Power	\$10.1	\$8.0	(20.8%)	Accounting change for revenue recognition reduces earnings by \$3.2 mln; will be recovered in 2H.
Maritime Electric	\$2.3	\$2.2	(4.3%)	
FortisOntario	\$0.9	\$0.5	(44.4%)	Electricity sales growth of 4% and lower tax rate.
FortisAlberta	\$7.7	\$12.0	55.2%	
FortisBC	\$5.4	\$4.2	(23.1%)	Higher energy supply costs, amortization and financing costs partly offset by 5.9% rate increase.
Total Canadian Earnings	\$26.4	\$26.8	1.5%	
Regulated Utilities - Caribbean				
Belize Electricity	\$1.9	\$2.3	21.1%	11% increase in rates partly offset by \$0.2 mln impact of strong C\$.
Caribbean Utilities - equity income	\$2.0	\$2.1	5.0%	Generating capacity now at 2% below pre-Hurricane Ivan levels.
Total Caribbean Earnings	\$3.9	\$4.4	12.8%	
Non-Regulated				
Fortis Generation	\$3.2	\$5.7	78.1%	Higher hydro production in Belize partly offset by lower Ontario price (\$45.32/MWh vs \$60.24/MWh)
Fortis Properties	\$4.8	\$5.0	4.2%	Expanded operations, slightly higher occupancy rates and lower REVPAR.
Total Non-Regulated Earnings	\$8.0	\$10.7		Includes \$1.6 mln non-realized FX gain.
Corporate and Consolidated Adjustments	(\$8.2)	(\$6.9)	15.9%	Includes \$1.6 mln gain on sale of property, \$2 mln positive tax adjustment, \$0.7 mln insurance recovery and \$1.4 mln negative charge at utility operations.

Investment Risk

Some of the specific risk factors that pertain to the projected six to 12-month stock price target for Fortis Inc. are as follows: 1) Price movement in electricity rates and commodities used for electricity generation could impact profitability; 2) International operations have currency rate exposure and liquidity risks associated with those currencies; 3) Credit risk of contract counterparties; 4) Debt refinancing at higher interest rates could impact the income of the company; 5) Equipment failure or extreme weather conditions could adversely affect operating facilities; 6) Change in public policy on environmental health and safety risk could impose unexpected costs on Fortis; 7) Change in regulatory or political climate could impinge on the profitability and the future growth and development of Fortis; 8) The inability to maintain, or to renew, the collective bargaining agreements with unionized workers on acceptable terms could result in increased labour costs or service interruptions arising from labour disputes; 9) Challenging economic condition which may impact demand for products and services, peer-group valuation, access to capital and share trading liquidity; 10) Fortis holds investments in commercial real estate and hotel properties which are subject to operating risks associated with the industry; 11) If the announced increase to the dividend tax credit is not passed into law, it would have a material impact on our target price.

SHARE PRICE PERFORMANCE:

COMPANY SUMMARY:

Fortis Inc. is a diversified electric utility holding company with assets of \$2 billion and annual revenue of over \$715 million. The company has holdings in 7 electric distribution utilities located in Newfoundland and Labrador, PEI, Ontario, Alberta, BC, Belize and the Cayman Islands. It also owns two subsidiaries engaged solely in electricity generation in NY and Belize. Fortis also has real estate and hotel operations in Atlantic Canada.

All amounts in C\$ unless otherwise noted.

Energy -- Pipeline and Power Utilities

BUYS TURKS AND CAICOS UTILITIES

Event

Fortis announced that it has purchased two electric utilities in Turks and Caicos for US\$90 million.

Impact

Positive.

Valuation

We are maintaining our \$26.00 target and BUY rating on the shares of Fortis. Our target price is derived from a combination of valuation metrics that include earnings and dividend yields relative to long term interest rates, dividend discount models, and earnings and cash flow multiples relative to both historical valuation and its utility and pipeline peers.

Summary

Fortis announced that it has purchased all the outstanding shares of P.P.C. Limited and Atlantic Equipment and Power (Turks and Caicos) Limited from T.C. Energy Holdings Inc., which serve about 80% of the electricity customers on the islands. The price of the purchase was US\$90 million which includes about \$20 million of assumed debt and Fortis expects to finance the acquisition longer-term with about 60% debt. The acquired utilities hold an exclusive 50-year license (expires 2037) that earn a return of 17.5% on their regulated asset base which currently stands at US\$50 million. This accretive acquisition is in a geographic area where Fortis has significant expertise and an area that has posted around 15% annual demand growth. We believe the acquisition will add around \$0.05 per share on an annual basis and we are raising our 2006 EPS estimate by \$0.02 to \$1.32 and 2007 EPS estimate to \$1.45 to reflect the expected earnings contribution.

The authoring analysts who are responsible for the preparation of this investment research have received (or will receive) compensation based upon (among other factors) the Corporate Finance/Investment Banking revenues and general profits of Canaccord Adams. However, such authoring analysts have not received, and will not receive, compensation that is directly based upon or linked to one or more specific Corporate Finance/Investment Banking activities, or to recommendations contained in the investment research.

Canaccord Adams and its affiliated companies may have a Corporate Finance/Investment Banking or other relationship with the company that is the subject of this investment research and may trade in any of the designated investments mentioned herein either for their own account or the accounts of their customers, in good faith and in the normal course of market making. Accordingly, Canaccord Adams or their affiliated companies, principals or employees (other than the authoring analyst(s) who prepared this investment research) may at any time have a long or short position in any such designated investments, Related designated investments or in options, futures or other derivative instruments based thereon.

Some regulators require that a firm must establish, implement and make available a policy for managing conflicts of interest arising as a result of publication or distribution of investment research. This investment research has been prepared in accordance with Canaccord Adams' policy on managing conflicts of interest, and information barriers or firewalls have been used where appropriate. Canaccord Adams' policy is available upon request.

The information contained in this investment research has been compiled by Canaccord Adams from sources believed to be reliable, but (with the exception of the information about Canaccord Adams) no representation or warranty, express or implied, is made by Canaccord Adams, its affiliated companies or any other person as to its fairness, accuracy, completeness or correctness. Canaccord Adams has not independently verified the facts, assumptions, and estimates contained herein. All estimates, opinions and other information contained in this investment research constitute Canaccord Adams' judgement as of the date of this investment research, are subject to change without notice and are provided in good faith but without legal responsibility or liability.

Canaccord Adams salespeople, traders, and other professionals may provide oral or written market commentary or trading strategies to our clients and our proprietary trading desk that reflect opinions that are contrary to the opinions expressed in this investment research. Canaccord Adams' affiliates, proprietary trading desk, and investing businesses may make investment decisions that are inconsistent with the recommendations or views expressed in this investment research.

This investment research is provided for information purposes only and does not constitute an offer or solicitation to buy or sell any designated investments discussed herein in any jurisdiction where such offer or solicitation would be prohibited. As a result, the designated investments discussed in this investment research may not be eligible for sale in some jurisdictions. This investment research is not, and under no circumstances should be construed as, a solicitation to act as a securities broker or dealer in any jurisdiction by any person or company that is not legally permitted to carry on the business of a securities broker or dealer in that jurisdiction. This material is prepared for general circulation to clients and does not have regard to the investment objectives, financial situation or particular needs of any particular person. Investors should obtain advice based on their own individual circumstances before making an investment decision. To the fullest extent permitted by law, none of Canaccord Adams, its affiliated companies or any other person accepts any liability whatsoever for any direct or consequential loss arising from or relating to any use of the information contained in this investment research.

- For Canadian Residents:** This Investment Research has been approved by Canaccord Adams, a division of Canaccord Capital Corporation, which accepts responsibility for this Investment Research and its dissemination in Canada. Canadian clients wishing to effect transactions in any Designated Investment discussed should do so through a qualified salesperson of Canaccord Adams, a division of Canaccord Capital Corporation in their particular jurisdiction.
- For United Kingdom Residents:** This Investment Research complies with of the Financial Services Authority's Handbook's chapter on Conduct of Business and is approved by Canaccord Adams Limited, which is regulated and authorized by the Financial Services Authority, in connection with its distribution in the United Kingdom. This material is not for distribution in the United Kingdom to private customers, as defined under the rules of the Financial Services Authority. Canaccord Adams Limited accepts responsibility for this Investment Research and its dissemination in the United Kingdom. The information contained in this Investment Research is only intended for distribution in the UK to persons who qualify as intermediate customers or market counterparties, as defined under the rules of the Financial Services Authority.

SHARE PRICE PERFORMANCE:**COMPANY SUMMARY:**

Fortis Inc. is a diversified electric utility holding company with assets of \$2 billion and annual revenue of over \$715 million. The company has holdings in 7 electric distribution utilities located in Newfoundland and Labrador, PEI, Ontario, Alberta, BC, Belize and the Cayman Islands. It also owns two subsidiaries engaged solely in electricity generation in NY and Belize. Fortis also has real estate and hotel operations in Atlantic Canada.

All amounts in C\$ unless otherwise noted.

Energy -- Pipeline and Power Utilities**19% DIVIDEND INCREASE****Event**

Fortis announced a 19% increase to its dividend.

Impact

Positive

Valuation

We are maintaining our BUY rating on the shares of Fortis but raising our target to C\$28.00 from C\$26.00. Our target price is derived from a combination of valuation metrics that include earnings and dividend yields relative to long-term interest rates, dividend discount models, and earnings and cash flow multiples relative to both historical valuation and its utility and pipeline peers.

Summary

Fortis announced that it has raised its annual dividend to \$0.76 per share, up 18.75% from \$0.64 per share to provide a yield of 3.1% and a payout ratio of 58%. Fortis has a history of raising its dividend annually and while the market was likely anticipating an increase, the magnitude is a pleasant surprise. We had expected the company to raise its payout ratio more gradually over the next five years but this dividend increase accelerates the payout ratio profile and adds to the value of the stock. In addition, with recent federal and provincial promises of dividend taxation reductions, dividends are becoming more attractive relative to interest income.

The company continues to grow its asset base and earnings while maintaining its low risk, conservative growth profile. Fortis derives about 75% of its earnings from regulated utility assets and the stock offers investors an 18% total return over the next year. The dividend is payable on December 1, 2006 and the record date is November 3, 2006.

Investment risks

Some of the specific risk factors that pertain to the projected 6-12 month stock price target for Fortis Inc. are as follows: 1) Price movement in electricity rates and commodities used for electricity generation could impact profitability; 2) International operations have currency rate exposure and liquidity risks associated with those currencies; 3) Credit risk of contract counterparties; 4) Debt refinancing at higher interest rates could impact the income of the company; 5) Equipment failure or extreme weather conditions could adversely affect operating facilities; 6) Change in public policy on environmental health and safety risk could impose unexpected costs on Fortis; 7) Change in regulatory or political climate could impinge on the profitability and the future growth and development of Fortis; 8) The inability to maintain, or to renew, the collective bargaining agreements with unionized workers on acceptable terms could result in increased labour costs or service interruptions arising from labour disputes; 9) Challenging economic condition which may impact demand for products and services, peer-group valuation, access to capital and share trading liquidity; 10) Fortis holds investments in commercial real estate and hotel properties which are subject to operating risks associated with the industry; 11) If the announced increase to the dividend tax credit is not passed into law, it would have a material impact on our target price.

COMPANY SUMMARY:

Fortis Inc. is a diversified electric utility holding company with assets of \$2 billion and annual revenue of over \$715 million. The company has holdings in 7 electric distribution utilities located in Newfoundland and Labrador, PEI, Ontario, Alberta, BC, Belize and the Cayman Islands. It also owns two subsidiaries engaged solely in electricity generation in NY and Belize. Fortis also has real estate and hotel operations in Atlantic Canada.

All amounts in C\$ unless otherwise noted.

Energy – Pipeline and Power Utilities

EXPANDS HOTEL OPERATIONS

Event

Fortis announced that it has expanded its hotel operations in Western Canada with the acquisition of four hotels in Alberta and British Columbia.

Impact

Neutral to modestly positive.

Valuation

We are maintaining our BUY rating and target price of US\$28.00. Our target price is derived from a combination of valuation metrics that include earnings and dividend yields relative to long-term interest rates, dividend discount models, and earnings and cash flow multiples relative to both historical valuation and its utility and pipeline peers.

Summary

Fortis announced that it has purchased four branded hotels in Alberta and British Columbia from Lodge Motel Ltd. for a total purchase price of \$51.6 million including \$16 million of assumed debt. The purchase strengthens the company's properties division, adding 454 rooms to the 650 rooms owned in western Canada and brings the number of hotel properties owned and operated by Fortis to 18. Two of the four hotels (one in Kelowna and one in Lethbridge) purchased have expansion opportunities which could be developed at a later date. The company expects to originally finance the purchase with short-term debt and will eventually refinance with about 65% longer-term debt and 35% equity. While only a bite-sized acquisition for the company, it is expected to generate about \$5 million of EBIT and slightly more than a penny to annual earnings. The transaction is expected to close at the end of the month.

Canaccord Adams is the global capital markets group of Canaccord Capital Inc. (CCI : TSX|AIM)

- 11 A partner, director, officer, employee or agent of Canaccord Adams and its affiliated companies, or a member of his/her household, is an officer, director or employee, or serves as an advisor or board member of the relevant issuer and/or one of its subsidiaries, and such person's name is disclosed above.
- 12 As of the month end immediately preceding the date of publication of this investment research, or the prior month end if publication is within 10 days following a month end, Canaccord Adams or its affiliate companies, in the aggregate, beneficially owned 1% or more of any class of the total issued share capital or other common equity securities of the relevant issuer or held any other financial interests in the relevant issuer which are significant in relation to the investment research (as disclosed above).
- 13 As of the month end immediately preceding the date of publication of this investment research, or the prior month end if publication is within 10 days following a month end, the relevant issuer owned 1% or more of any class of the total issued share capital in Canaccord Adams or any of its affiliated companies.
- 14 Other specific disclosures as described above.

Canaccord Adams is the business name used by certain subsidiaries of Canaccord Capital Inc., including Canaccord Adams Inc., Canaccord Adams Limited, and Canaccord Adams, a division of Canaccord Capital Corporation. Clients of Canaccord Adams, in the past 12 months, may have been clients of Canaccord Capital Corporation, Canaccord Capital (Europe) Limited, Canaccord Capital Corporation USA Inc., and/or Adams Harkness Financial Group Ltd.

The authoring analysts who are responsible for the preparation of this investment research are employed by Canaccord Adams, a securities broker-dealer with principal offices located in Vancouver, Calgary, Toronto, Montreal (all Canada), Boston, New York, San Francisco (all US) and London (UK).

In the event that this is compendium investment research (covering six or more relevant issuers), Canaccord Adams and its affiliated companies may choose to provide specific disclosures of the subject companies by reference, as well as its policies and procedures regarding the dissemination of investment research. To access this material or for more information, please send a request to Canaccord Adams Research, Attn:

Disclosures, P.O. Box 10337 Pacific Centre, 2200-609 Granville Street, Vancouver, BC, Canada V7Y 1H2 or disclosures@canaccordadams.com.

The authoring analysts who are responsible for the preparation of this investment research have received (or will receive) compensation based upon (among other factors) the Corporate Finance/Investment Banking revenues and general profits of Canaccord Adams. However, such authoring analysts have not received, and will not receive, compensation that is directly based upon or linked to one or more specific Corporate Finance/Investment Banking activities, or to recommendations contained in the investment research.

Canaccord Adams and its affiliated companies may have a Corporate Finance/Investment Banking or other relationship with the company that is the subject of this investment research and may trade in any of the designated investments mentioned herein either for their own account or the accounts of their customers, in good faith and in the normal course of market making. Accordingly, Canaccord Adams or their affiliated companies, principals or employees (other than the authoring analyst(s) who prepared this investment research) may at any time have a long or short position in any such designated investments, Related designated investments or in options, futures or other derivative instruments based thereon.

Some regulators require that a firm must establish, implement and make available a policy for managing conflicts of interest arising as a result of publication or distribution of investment research. This investment research has been prepared in accordance with Canaccord Adams' policy on managing conflicts of interest, and information barriers or firewalls have been used where appropriate. Canaccord Adams' policy is available upon request.

The information contained in this investment research has been compiled by Canaccord Adams from sources believed to be reliable, but (with the exception of the information about Canaccord Adams) no representation or warranty, express or implied, is made by Canaccord Adams, its affiliated companies or any other person as to its fairness, accuracy, completeness or correctness. Canaccord Adams has not independently verified the facts, assumptions, and estimates contained herein. All estimates, opinions and other information contained in this investment research constitute Canaccord Adams' judgement as of the date of this investment research, are subject to change without notice and are provided in good faith but without legal responsibility or liability.

Canaccord Adams salespeople, traders, and other professionals may provide oral or written market commentary or trading strategies to our clients and our proprietary trading desk that reflect opinions that are contrary to the opinions expressed in this investment research. Canaccord Adams' affiliates, proprietary trading desk, and investing businesses may make investment decisions that are inconsistent with the recommendations or views expressed in this investment research.

This investment research is provided for information purposes only and does not constitute an offer or solicitation to buy or sell any designated investments discussed herein in any jurisdiction where such offer or solicitation would be prohibited. As a result, the designated investments discussed in this investment research may not be eligible for sale in some jurisdictions. This investment research is not, and under no circumstances should be construed as, a solicitation to act as a securities broker or dealer in any jurisdiction by any person or company that is not legally permitted to carry on the business of a securities broker or dealer in that jurisdiction. This material is prepared for general circulation to clients and does not have regard to the investment objectives, financial situation or particular needs of any particular person. Investors should obtain advice based on their own individual circumstances before making an investment decision. To the fullest extent permitted by law, none of Canaccord Adams, its affiliated companies or any other person accepts any liability whatsoever for any direct or consequential loss arising from or relating to any use of the information contained in this investment research.

For Canadian Residents: This Investment Research has been approved by Canaccord Adams, a division of Canaccord Capital Corporation, which accepts responsibility for this Investment Research and its dissemination in Canada. Canadian clients wishing to effect transactions in any Designated Investment discussed should do so through a qualified salesperson of Canaccord Adams, a division of Canaccord Capital Corporation in their particular jurisdiction.

For United Kingdom Residents: This Investment Research complies with of the Financial Services Authority's Handbook's chapter on Conduct of Business and is approved by Canaccord Adams Limited, which is regulated and authorized by the Financial Services Authority, in connection with its distribution in the United Kingdom. This material is not for distribution in the United Kingdom to private customers, as defined under the rules of the Financial Services Authority. Canaccord Adams Limited accepts responsibility for this Investment Research and its dissemination in the United Kingdom. The information contained in this Investment Research is only intended for distribution in the UK to persons who qualify as intermediate customers or market counterparties, as defined under the rules of the Financial Services Authority.

For United States Residents: Canaccord Adams Inc., a US registered broker-dealer, accepts responsibility for this Investment Research and its dissemination in the United States. This Investment Research is intended for distribution in the United States only to certain US institutional investors. US clients wishing to effect transactions in any Designated Investment discussed should do so through a qualified salesperson of Canaccord Adams Inc..

For European Residents: If this Investment Research is intended for disclosure in any jurisdiction other than the United Kingdom, the US or Canada, then the relevant rules and regulatory requirements of that jurisdiction will apply.

Energy -- Pipeline and Power Utilities**GREAT QUARTER****EARNINGS SUMMARY:**

FYE Dec	2005A	2006E	2007E
EPS:	\$1.16	\$1.35	\$1.50
P/E:	22.0x	18.9x	17.0x
CFPS:	\$2.87	\$3.00	\$3.20
P/CF:	8.9x	8.5x	8.0x

Outlook

Fortis's quarterly results have outpaced our earnings expectations, compelling us to once again raise our earnings estimates for 2006 and 2007. Specifically, we are increasing our 2006 EPS estimate to \$1.35 from \$1.32 and our 2007 EPS estimate to \$1.50 from \$1.45. Fortis's business segments continue to operate well and are well positioned to deliver solid earnings growth. For 2006, the company expects to invest \$475 million (up from \$450 million from previous guidance) in its regulated operations with about \$340 million to be spent in FortisBC and FortisAlberta. Over the next five years, growth will be fuelled by more than \$2 billion of capital projects expected to be spent in the company's regulated utilities. Earnings growth in 2007 will also be driven by smaller-sized acquisitions (such as the recent \$97 million purchase of two Turks and Caicos utilities for \$75.4 million excluding debt assumption and the \$52 million purchase of four hotels in Alberta and BC).

Valuation

We are maintaining our BUY rating and target price of US\$28.00. Our target price is derived from a combination of valuation metrics that include earnings and dividend yields relative to long-term interest rates, dividend discount models, and earnings and cash flow multiples relative to both historical valuation and its utility and pipeline peers.

Earnings summary

Fortis reported third quarter recurring earnings of \$0.37 versus \$0.32 last year, significantly above our \$0.32 expectation and the \$0.31 consensus estimate. With the exception of Newfoundland Power, all the regulated operations delivered increased earnings, delivering \$6.5 million (\$0.06 per share) more than the same period last year. This was mainly due to improved performance at FortisAlberta, which benefited from increased deductions for tax purposes, with improved normalized earnings by \$5 million (about \$0.05 per share). In addition, the inclusion of one month's contribution from the Turks and Caicos utilities contributed modestly to earnings (less than \$0.01 per share). Earnings from Newfoundland Power were \$0.8 million lower than in 2005 as energy-supply costs climbed. The non-regulated generation assets also delivered superior results with incremental electricity sales contribution from the Chalillo Dam (in service late 2005), lower financing costs and a lower effective tax rate. Fortis Properties posted strong results (\$6.3 million versus \$4.9 million) mainly as a result of the contribution from property expansions and a lower effective tax rate. For the first nine months of the year, Fortis

Canaccord Adams is the global capital markets group of Canaccord Capital Inc. (CCI : TSX|AIM)

The recommendations and opinions expressed in this Investment Research accurately reflect the Investment Analyst's personal, independent and objective views about any and all the Designated Investments and Relevant Issuers discussed herein. For important information, please see the Important Disclosures section in the appendix of this document.

posted recurring EPS of \$1.05 versus \$0.93 for the same period last year. For more details on the third quarter results, please refer to Figure 1.

Noteworthy items

- June 2006 share offering of Belize Electricity raises \$37 million and lowers financing costs.
 - Effective tax rate drops to 14.2% from 33.4%;
 - Mainly due to increased capitalized interest.
 - Dolgeville facility (included in non-regulated generation operations) flooded again and was down for most of the third quarter;
 - Returned to service in late Q3, minor impact.
 - New properties at Fortis Properties
 - Expansion of Holiday Inn, Sarnia;
 - Expansion of Holiday Inn, Kitchener-Waterloo;
 - Expansion of Blue Cross Centre, New Brunswick;
 - October 19, 2006 purchase of four branded hotels in Alberta and BC.
 - Earnings positively impacted by non-cash gain on unrealized foreign exchange;
 - About \$2.3 million after-tax or 2¢ per share.
-

Investment risks

Some of the specific risk factors that pertain to the projected six to 12-month stock price target for Fortis Inc. are as follows: 1) Price movement in electricity rates and commodities used for electricity generation could impact profitability; 2) International operations have currency rate exposure and liquidity risks associated with those currencies; 3) Credit risk

of contract counterparties; 4) Debt refinancing at higher interest rates could impact the income of the company; 5) Equipment failure or extreme weather conditions could adversely affect operating facilities; 6) Change in public policy on environmental health and safety risk could impose unexpected costs on Fortis; 7) Change in regulatory or political climate could impinge on the profitability and the future growth and development of Fortis; 8) The inability to maintain, or to renew, the collective bargaining agreements with unionized workers on acceptable terms could result in increased labour costs or service interruptions arising from labour disputes; 9) Challenging economic condition which may impact demand for products and services, peer-group valuation, access to capital, and share trading liquidity; 10) Fortis holds investments in commercial real estate and hotel properties which are subject to operating risks associated with the industry; 11) If the announced increase to the dividend tax credit is not passed into law, it would have a material impact on our target price.

Energy -- Pipeline and Power Utilities**RAISES STAKE IN CARIBBEAN UTILITIES****Event**

Fortis announced that it has purchased an additional 16% of Caribbean Utilities Company Ltd. for US\$49 million, giving it a controlling interest at 54%.

Impact

Modestly positive.

Valuation

We are maintaining our BUY rating and target price of C\$28.00. Our target price is derived from a combination of valuation metrics that include earnings and dividend yields relative to long-term interest rates, dividend discount models, and earnings and cash flow multiples relative to both historical valuation and its utility and pipeline peers.

Summary

Fortis announced that it has acquired another 4.1 million shares or 16% of Caribbean Utilities Company Ltd. for US\$11.89 per share for an aggregate price of \$49 million. The shares were purchased from International Power Holdings Ltd. and four other parties associated with International Power Holdings. We expect the purchase to be accretive and add about \$0.02-0.03 to annual earnings per share. With a majority ownership of Caribbean Utilities, Fortis will now consolidate the earnings into its financial statements. The company will finance the acquisition mainly with today's announcement of a 5.5%, US\$40 million debenture issue. With the recent investments in the Caribbean and its property division combined with the rapid growth of its western utility operations, we expect the company will require an equity issue sometime in 2007.

The company continues to invest in geographic and operational areas where it has extensive knowledge and experience, allowing it to provide stable and lower risk growth for investors. In addition, Fortis could look for investments in regulated Canadian gas distribution assets, particularly if existing owners wanted to sell.

Investment risks

Some of the specific risk factors that pertain to the projected 6-12 month stock price target for Fortis Inc. are as follows: 1) Price movement in electricity rates and commodities used for electricity generation could impact profitability; 2) International operations have currency rate exposure and liquidity risks associated with those currencies; 3) Credit risk of contract counterparties; 4) Debt refinancing at higher interest rates could impact the income of the company; 5) Equipment failure or extreme weather conditions could

adversely affect operating facilities; 6) Change in public policy on environmental health and safety risk could impose unexpected costs on Fortis; 7) Change in regulatory or political climate could impinge on the profitability and the future growth and development of Fortis; 8) The inability to maintain, or to renew, the collective bargaining agreements with unionized workers on acceptable terms could result in increased labour costs or service interruptions arising from labour disputes; 9) Challenging economic condition which may impact demand for products and services, peer-group valuation, access to capital and share trading liquidity; 10) Fortis holds investments in commercial real estate and hotel properties which are subject to operating risks associated with the industry; 11) If the announced increase to the dividend tax credit is not passed into law, it would have a material impact on our target price.

An analyst has visited with the issuer's management and some of the issuer's material operations. No payment or reimbursement was received from the issuer for related travel costs.

**Canaccord Adams
Ratings System:**

BUY: The stock is expected to generate risk-adjusted returns of over 10% during the next 12 months.
HOLD: The stock is expected to generate risk-adjusted returns of 0-10% during the next 12 months.
SELL: The stock is expected to generate negative risk-adjusted returns during the next 12 months.

"Risk-adjusted return" refers to the expected return in relation to the amount of risk associated with the designated investment or the relevant issuer.

Risk Qualifier:

SPECULATIVE: Stocks bear significantly higher risk that typically cannot be valued by normal fundamental criteria. Investments in the stock may result in material loss.

Canaccord Adams Research Disclosures as of 7 November 2006

Company	Disclosure
Fortis Inc.	1A, 2, 7

- 1 The relevant issuer currently is, or in the past 12 months was, a client of Canaccord Adams or its affiliated companies. During this period, Canaccord Adams or its affiliated companies provided the following services to the relevant issuer:
A. investment banking services.
B. non-investment banking securities-related services.
C. non-securities related services.
- 2 In the past 12 months, Canaccord Adams or its affiliated companies have received compensation for Corporate Finance/Investment Banking services from the relevant issuer.
- 3 In the past 12 months, Canaccord Adams or any of its affiliated companies have been lead manager, co-lead manager or co-manager of a public offering of securities of the relevant issuer or any publicly disclosed offer of securities of the relevant issuer or in any related derivatives.
- 4 Canaccord Adams acts as corporate broker for the relevant issuer and/or Canaccord Adams or any of its affiliated companies may have an agreement with the relevant issuer relating to the provision of Corporate Finance/Investment Banking services.
- 5 Canaccord Adams or any of its affiliated companies is a market maker or liquidity provider in the securities of the relevant issuer or in any related derivatives.
- 6 In the past 12 months, Canaccord Adams, its partners, affiliated companies, officers or directors, or any authoring analyst involved in the preparation of this investment research has provided services to the relevant issuer for remuneration, other than normal course investment advisory or trade execution services.
- 7 Canaccord Adams intends to seek or expects to receive compensation for Corporate Finance/Investment Banking services from the relevant issuer in the next six months.
- 8 The authoring analyst, a member of the authoring analyst's household, or any individual directly involved in the preparation of this investment research, has a long position in the shares or derivatives, or has any other financial interest in the relevant issuer, the value of which increases as the value of the underlying equity increases.
- 9 The authoring analyst, a member of the authoring analyst's household, or any individual directly involved in the preparation of this investment research, has a short position in the shares or derivatives, or has any other financial interest in the relevant issuer, the value of which increases as the value of the underlying equity decreases.
- 10 Those persons identified as the author(s) of this investment research, or any individual involved in the preparation of this investment research, have purchased/received shares in the relevant issuer prior to a public offering of those shares, and such person's name and details are disclosed above.
- 11 A partner, director, officer, employee or agent of Canaccord Adams and its affiliated companies, or a member of his/her household, is an officer, director or employee, or serves as an advisor or board member of the relevant issuer and/or one of its subsidiaries, and such person's name is disclosed above.
- 12 As of the month end immediately preceding the date of publication of this investment research, or the prior month end if publication is within 10 days following a month end, Canaccord Adams or its affiliate companies, in the aggregate, beneficially owned 1% or more of any class of the total issued share capital or other common equity securities of the relevant issuer or held any other financial interests in the relevant issuer which are significant in relation to the investment research (as disclosed above).
- 13 As of the month end immediately preceding the date of publication of this investment research, or the prior month end if publication is within 10 days following a month end, the relevant issuer owned 1% or more of any class of the total issued share capital in Canaccord Adams or any of its affiliated companies.
- 14 Other specific disclosures as described above.

Canaccord Adams is the business name used by certain subsidiaries of Canaccord Capital Inc., including Canaccord Adams Inc., Canaccord Adams Limited, and Canaccord Adams, a division of Canaccord Capital Corporation. Clients of Canaccord Adams, in the past 12 months, may have been clients of Canaccord Capital Corporation, Canaccord Capital (Europe) Limited, Canaccord Capital Corporation USA Inc., and/or Adams Harkness Financial Group Ltd.

The authoring analysts who are responsible for the preparation of this investment research are employed by Canaccord Adams, a securities broker-dealer with principal offices located in Vancouver, Calgary, Toronto, Montreal (all Canada), Boston, New York, San Francisco (all US) and London (UK).

In the event that this is compendium investment research (covering six or more relevant issuers), Canaccord Adams and its affiliated companies may choose to provide specific disclosures of the subject companies by reference, as well as its policies and procedures regarding the dissemination of investment research. To access this material or for more information, please send a request to Canaccord Adams Research, Attn: Disclosures, P.O. Box 10337 Pacific Centre, 2200-609 Granville Street, Vancouver, BC, Canada V7Y 1H2 or disclosures@canaccordadams.com.

The authoring analysts who are responsible for the preparation of this investment research have received (or

will receive) compensation based upon (among other factors) the Corporate Finance/Investment Banking revenues and general profits of Canaccord Adams. However, such authoring analysts have not received, and will not receive, compensation that is directly based upon or linked to one or more specific Corporate Finance/Investment Banking activities, or to recommendations contained in the investment research.

Canaccord Adams and its affiliated companies may have a Corporate Finance/Investment Banking or other relationship with the company that is the subject of this investment research and may trade in any of the designated investments mentioned herein either for their own account or the accounts of their customers, in good faith and in the normal course of market making. Accordingly, Canaccord Adams or their affiliated companies, principals or employees (other than the authoring analyst(s) who prepared this investment research) may at any time have a long or short position in any such designated investments, Related designated investments or in options, futures or other derivative instruments based thereon.

Some regulators require that a firm must establish, implement and make available a policy for managing conflicts of interest arising as a result of publication or distribution of investment research. This investment research has been prepared in accordance with Canaccord Adams' policy on managing conflicts of interest, and information barriers or firewalls have been used where appropriate. Canaccord Adams' policy is available upon request.

The information contained in this investment research has been compiled by Canaccord Adams from sources believed to be reliable, but (with the exception of the information about Canaccord Adams) no representation or warranty, express or implied, is made by Canaccord Adams, its affiliated companies or any other person as to its fairness, accuracy, completeness or correctness. Canaccord Adams has not independently verified the facts, assumptions, and estimates contained herein. All estimates, opinions and other information contained in this investment research constitute Canaccord Adams' judgement as of the date of this investment research, are subject to change without notice and are provided in good faith but without legal responsibility or liability.

Canaccord Adams salespeople, traders, and other professionals may provide oral or written market commentary or trading strategies to our clients and our proprietary trading desk that reflect opinions that are contrary to the opinions expressed in this investment research. Canaccord Adams' affiliates, proprietary trading desk, and investing businesses may make investment decisions that are inconsistent with the recommendations or views expressed in this investment research.

This investment research is provided for information purposes only and does not constitute an offer or solicitation to buy or sell any designated investments discussed herein in any jurisdiction where such offer or solicitation would be prohibited. As a result, the designated investments discussed in this investment research may not be eligible for sale in some jurisdictions. This investment research is not, and under no circumstances should be construed as, a solicitation to act as a securities broker or dealer in any jurisdiction by any person or company that is not legally permitted to carry on the business of a securities broker or dealer in that jurisdiction. This material is prepared for general circulation to clients and does not have regard to the investment objectives, financial situation or particular needs of any particular person. Investors should obtain advice based on their own individual circumstances before making an investment decision. To the fullest extent permitted by law, none of Canaccord Adams, its affiliated companies or any other person accepts any liability whatsoever for any direct or consequential loss arising from or relating to any use of the information contained in this investment research.

For Canadian Residents: This investment research has been approved by Canaccord Adams, a division of Canaccord Capital Corporation, which accepts responsibility for this investment research and its dissemination in Canada. Canadian clients wishing to effect transactions in any Designated Investment discussed should do so through a qualified salesperson of Canaccord Adams, a division of Canaccord Capital Corporation in their particular jurisdiction.

For United Kingdom Residents: This investment research complies with the Financial Services Authority's Conduct of Business Sourcebook and is approved by Canaccord Adams Limited, which is authorized and regulated by the Financial Services Authority, in connection with its distribution in the United Kingdom. This material is not for distribution in the United Kingdom to private customers, as defined under the rules of the Financial Services Authority. Canaccord Adams Limited accepts responsibility for this investment research and its dissemination in the United Kingdom. The information contained in this investment research is only intended for distribution in the UK to persons who qualify as intermediate customers or market counterparties, as defined under the rules of the Financial Services Authority.

For European Residents: If this investment research is intended for disclosure in any jurisdiction other than the United Kingdom, the US or Canada, then the relevant rules and regulatory requirements of that jurisdiction will apply.

SHARE PRICE PERFORMANCE:

COMPANY SUMMARY:

Fortis Inc. is a diversified, international electric utility holding company with assets approaching \$4.5 billion and annual revenues of more than \$1.4 billion. Fortis has holdings in regulated and non-regulated electric distribution utilities in Alberta, BC, Newfoundland, PEI, Ontario, Upper New York State, Belize, Turks and Caicos Islands, Grand Cayman, and Cayman Islands. Fortis also owns and operates hotels and real estate in Canada. All amounts in C\$ unless otherwise noted.

Energy -- Pipeline and Power Utilities

NEWFOUNDLAND POWER'S 2007 ROE DECLINES – NO SURPRISE

Event

Fortis's 100%-owned Newfoundland Power announced that its return on equity will decline in 2007, reducing its earnings contribution by \$2.5 million or \$0.02 per share.

Impact

Neutral.

Valuation

We are maintaining our BUY rating and target price of \$28.00. Our target price is derived from a combination of valuation metrics that include earnings and dividend yields relative to long-term interest rates, dividend discount models, and earnings and cash flow multiples relative to both historical valuation and its utility and pipeline peers.

Summary

Fortis announced that Newfoundland Power (100%-owned by Fortis) will have its rate of return on common equity decline to 8.60% in 2007 from 9.24% in 2006 and result in an approximate \$2.5 million reduction in profit. The reduction in ROE is the result of an automatic adjustment mechanism, established in 1998, which determines a return for the utility based on changes in long-term bond yields. Given the significant decline in long-term bond yields over the past year, we had previously incorporated a lower allowed ROE for Newfoundland Power into our analysis. Consequently, this announcement comes as no surprise and does not change our 2007 EPS estimate of \$1.50. With the significant growth the company has experienced over the past few years, the proportion of income generated from Newfoundland Power has declined to about 20% in 2007 from 40% in 2003 so changes to Newfoundland Power's rates are not as significant.

Investment risks

Some of the specific risk factors that pertain to the projected six to 12 month stock price target for Fortis Inc. are as follows: 1) Price movement in electricity rates and commodities used for electricity generation could impact profitability; 2) International operations have currency rate exposure and liquidity risks associated with those currencies; 3) Credit risk of contract counterparties; 4) Debt refinancing at higher interest rates could impact the income of the company; 5) Equipment failure or extreme weather conditions could adversely affect operating facilities; 6) Change in public policy on environmental health and safety risk could impose unexpected costs on Fortis; 7) Change in regulatory or political climate could impinge on the profitability and the future growth and development of Fortis; 8) The inability to maintain, or to renew, the collective bargaining agreements with unionized workers on acceptable terms could result in increased labour costs or service interruptions arising from labour disputes; 9) Challenging economic condition which may impact demand for products and services, peer-group valuation, access to capital and share trading liquidity; 10) Fortis holds investments in commercial real estate and hotel properties which are subject to operating risks associated with the industry; 11) If the announced increase to the dividend tax credit is not passed into law, it would have a material impact on our target price.

Energy -- Pipeline and Power Utilities

RAISING TARGET PRICE

Event

We are revising our target prices upwards for utility and pipeline companies to reflect continuing low interest rates, higher fund flows into dividend paying stocks (as opposed to trusts), and higher expected earnings and net asset values as new projects get closer to completion. Specifically, we are raising our target price on the shares of Fortis Inc. to C\$32.00 from C\$28.00.

Valuation

We are maintaining our BUY rating on the shares of Fortis Inc. Our target price is derived from a combination of valuation metrics that include earnings and dividend yields relative to long-term interest rates, dividend discount models, and earnings and cash flow multiples relative to both historical valuation and its utility and pipeline peers.

Investment risks

Some of the specific risk factors that pertain to the projected 6-12 month stock price target for Fortis Inc. are as follows: 1) Price movement in electricity rates and commodities used for electricity generation could impact profitability; 2) International operations have currency rate exposure and liquidity risks associated with those currencies; 3) Credit risk of contract counterparties; 4) Debt refinancing at higher interest rates could impact the income of the company; 5) Equipment failure or extreme weather conditions could adversely affect operating facilities; 6) Change in public policy on environmental health and safety risk could impose unexpected costs on Fortis; 7) Change in regulatory or political climate could impinge on the profitability and the future growth and development of Fortis; 8) The inability to maintain, or to renew, the collective bargaining agreements with unionized workers on acceptable terms could result in increased labour costs or service interruptions arising from labour disputes; 9) Challenging economic condition which may impact demand for products and services, peer-group valuation, access to capital and share trading liquidity; 10) Fortis holds

**Canaccord Adams
Ratings System:**

BUY: The stock is expected to generate risk-adjusted returns of over 10% during the next 12 months.

HOLD: The stock is expected to generate risk-adjusted returns of 0-10% during the next 12 months.

SELL: The stock is expected to generate negative risk-adjusted returns during the next 12 months.

"Risk-adjusted return" refers to the expected return in relation to the amount of risk associated with the designated investment or the relevant issuer.

Risk Qualifier:

SPECULATIVE: Stocks bear significantly higher risk that typically cannot be valued by normal fundamental criteria. Investments in the stock may result in material loss.

Canaccord Adams Research Disclosures as of 20 November 2006

Company	Disclosure
---------	------------

Fortis Inc.	1A, 2, 7
1	The relevant issuer currently is, or in the past 12 months was, a client of Canaccord Adams or its affiliated companies. During this period, Canaccord Adams or its affiliated companies provided the following services to the relevant issuer: A. investment banking services. B. non-investment banking securities-related services. C. non-securities related services.
2	In the past 12 months, Canaccord Adams or its affiliated companies have received compensation for Corporate Finance/Investment Banking services from the relevant issuer.
3	In the past 12 months, Canaccord Adams or any of its affiliated companies have been lead manager, co-lead manager or co-manager of a public offering of securities of the relevant issuer or any publicly disclosed offer of securities of the relevant issuer or in any related derivatives.
4	Canaccord Adams acts as corporate broker for the relevant issuer and/or Canaccord Adams or any of its affiliated companies may have an agreement with the relevant issuer relating to the provision of Corporate Finance/Investment Banking services.
5	Canaccord Adams or any of its affiliated companies is a market maker or liquidity provider in the securities of the relevant issuer or in any related derivatives.
6	In the past 12 months, Canaccord Adams, its partners, affiliated companies, officers or directors, or any authoring analyst involved in the preparation of this investment research has provided services to the relevant issuer for remuneration, other than normal course investment advisory or trade execution services.
7	Canaccord Adams intends to seek or expects to receive compensation for Corporate Finance/Investment Banking services from the relevant issuer in the next six months.
8	The authoring analyst, a member of the authoring analyst's household, or any individual directly involved in the preparation of this investment research, has a long position in the shares or derivatives, or has any other financial interest in the relevant issuer, the value of which increases as the value of the underlying equity increases.
9	The authoring analyst, a member of the authoring analyst's household, or any individual directly involved in the preparation of this investment research, has a short position in the shares or derivatives, or has any other financial interest in the relevant issuer, the value of which increases as the value of the underlying equity decreases.
10	Those persons identified as the author(s) of this investment research, or any individual involved in the preparation of this investment research, have purchased/received shares in the relevant issuer prior to a public offering of those shares, and such person's name and details are disclosed above.
11	A partner, director, officer, employee or agent of Canaccord Adams and its affiliated companies, or a member of his/her household, is an officer, or director, or serves as an advisor or board member of the relevant issuer and/or one of its subsidiaries, and such person's name is disclosed above.
12	As of the month end immediately preceding the date of publication of this investment research, or the prior month end if publication is within 10 days following a month end, Canaccord Adams or its affiliate companies, in the aggregate, beneficially owned 1% or more of any class of the total issued share capital or other common equity securities of the relevant issuer or held any other financial interests in the relevant issuer which are significant in relation to the investment research (as disclosed above).
13	As of the month end immediately preceding the date of publication of this investment research, or the prior month end if publication is within 10 days following a month end, the relevant issuer owned 1% or more of any class of the total issued share capital in Canaccord Adams or any of its affiliated companies.
14	Other specific disclosures as described above.

Canaccord Adams is the business name used by certain subsidiaries of Canaccord Capital Inc., including Canaccord Adams Inc., Canaccord Adams Limited, and Canaccord Adams, a division of Canaccord Capital Corporation. Clients of Canaccord Adams, in the past 12 months, may have been clients of Canaccord Capital Corporation, Canaccord Capital (Europe) Limited, Canaccord Capital Corporation USA Inc., and/or Adams Harkness Financial Group Ltd.

The authoring analysts who are responsible for the preparation of this investment research are employed by Canaccord Adams, a securities broker-dealer with principal offices located in Vancouver, Calgary, Toronto, Montreal (all Canada), Boston, New York, San Francisco (all US) and London (UK).

In the event that this is compendium investment research (covering six or more relevant issuers), Canaccord Adams and its affiliated companies may choose to provide specific disclosures of the subject companies by reference, as well as its policies and procedures regarding the dissemination of investment research. To access this material or for more information, please send a request to Canaccord Adams Research, Attn: Disclosures, P.O. Box 10337 Pacific Centre, 2200-609 Granville Street, Vancouver, BC, Canada V7Y 1H2 or disclosures@canaccordadams.com.

The authoring analysts who are responsible for the preparation of this investment research have received (or will receive) compensation based upon (among other factors) the Corporate Finance/Investment Banking revenues and general profits of Canaccord Adams. However, such authoring analysts have not received, and will not receive, compensation that is directly based upon or linked to one or more specific Corporate Finance/Investment Banking activities, or to recommendations contained in the investment research. Canaccord Adams and its affiliated companies may have a Corporate Finance/Investment Banking or other relationship with the company that is the subject of this investment research and may trade in any of the designated investments mentioned herein either for their own account or the accounts of their customers, in good faith and in the normal course of market making. Accordingly, Canaccord Adams or their affiliated companies, principals or employees (other than the authoring analyst(s) who prepared this investment research) may at any time have a long or short position in any such designated investments. Related designated investments or in options, futures or other derivative instruments based thereon.

Some regulators require that a firm must establish, implement and make available a policy for managing conflicts of interest arising as a result of publication or distribution of investment research. This investment research has been prepared in accordance with Canaccord Adams' policy on managing conflicts of interest, and information barriers or firewalls have been used where appropriate. Canaccord Adams' policy is available upon request.

The information contained in this investment research has been compiled by Canaccord Adams from sources believed to be reliable, but (with the exception of the information about Canaccord Adams) no representation or warranty, express or implied, is made by Canaccord Adams, its affiliated companies or any other person as to its fairness, accuracy, completeness or correctness. Canaccord Adams has not independently verified the facts, assumptions, and estimates contained herein. All estimates, opinions and other information contained in this investment research constitute Canaccord Adams' judgement as of the date of this investment research, are subject to change without notice and are provided in good faith but without legal responsibility or liability.

Canaccord Adams salespeople, traders, and other professionals may provide oral or written market commentary or trading strategies to our clients and our proprietary trading desk that reflect opinions that are contrary to the opinions expressed in this investment research. Canaccord Adams' affiliates, proprietary trading desk, and investing businesses may make investment decisions that are inconsistent with the recommendations or views expressed in this investment research.

This investment research is provided for information purposes only and does not constitute an offer or solicitation to buy or sell any designated investments discussed herein in any jurisdiction where such offer or solicitation would be prohibited. As a result, the designated investments discussed in this investment research may not be eligible for sale in some jurisdictions. This investment research is not, and under no circumstances should be construed as, a solicitation to act as a securities broker or dealer in any jurisdiction by any person or company that is not legally permitted to carry on the business of a securities broker or dealer in that jurisdiction. This material is prepared for general circulation to clients and does not have regard to the investment objectives, financial situation or particular needs of any particular person. Investors should obtain advice based on their own individual circumstances before making an investment decision. To the fullest extent permitted by law, none of Canaccord Adams, its affiliated companies or any other person accepts any liability whatsoever for any direct or consequential loss arising from or relating to any use of the information contained in this investment research.

- For Canadian Residents:** This Investment Research has been approved by Canaccord Adams, a division of Canaccord Capital Corporation, which accepts responsibility for this Investment Research and its dissemination in Canada. Canadian clients wishing to effect transactions in any Designated Investment discussed should do so through a qualified salesperson of Canaccord Adams, a division of Canaccord Capital Corporation in their particular jurisdiction.
- For United Kingdom Residents:** This Investment Research complies with of the Financial Services Authority's Handbook's chapter on Conduct of Business and is approved by Canaccord Adams Limited, which is regulated and authorized by the Financial Services Authority, in connection with its distribution in the United Kingdom. This material is not for distribution in the United Kingdom to private customers, as defined under the rules of the Financial Services Authority. Canaccord Adams Limited accepts responsibility for this Investment Research and its dissemination in the United Kingdom. SHARE PRICE PERFORMANCE:

COMPANY SUMMARY:

Fortis Inc. is a diversified, international electric utility holding company with assets approaching \$4.5 billion and annual revenues of more than \$1.4 billion. Fortis has holdings in regulated and non-regulated electric distribution utilities in Alberta, BC, Newfoundland, PEI, Ontario, Upper New York State, Belize, Turks and Caicos Islands, Grand Cayman, and Cayman Islands. Fortis also owns and operates hotels and real estate in Canada.

All amounts in C\$ unless otherwise noted.

Energy -- Pipeline and Power Utilities

ANOTHER QUARTER ABOVE EXPECTATIONS

Event

Fortis released fourth quarter recurring EPS of \$0.32 per share, once again beating expectations. In addition, the company announced a 10.5% increase to its quarterly dividend.

Impact

Neutral.

Valuation

We are maintaining our BUY rating on the shares of Fortis Inc. Our target price is derived from a combination of valuation metrics that include earnings and dividend yields relative to long-term interest rates, dividend discount models, and earnings and cash flow multiples relative to both historical valuation and its utility and pipeline peers.

Summary

Fortis reported fourth quarter recurring earnings of \$0.32 versus \$0.26 last year, a few cents above our \$0.29 estimate and the \$0.27 consensus estimate. The company raised its quarterly dividend by 10.5% to \$0.21 from \$0.19. The increased dividend is payable on June 1, 2007 to shareholders of record on May 4, 2007. We are re-iterating our BUY rating and \$32.00 target price on the shares of Fortis. We are maintaining our 2007 EPS estimate of \$1.50 and are introducing our 2008 EPS estimate of \$1.65. Fortis's continues to deliver quarterly results in excess of expectations.

The Quarter

Generally, the regulated operations were as expected, with the improvement coming from Fortis Generation. The company's regulated utilities delivered earnings 53% above the same period last year, due primarily to a change in accounting at Newfoundland Power that effectively re-allocates earnings between quarters (up \$0.06 per share)

Canaccord Adams is the global capital markets group of Canaccord Capital Inc. (CCI : TSX|AIM)

The recommendations and opinions expressed in this Investment Research accurately reflect the Investment Analyst's personal, independent and objective views about any and all the Designated Investments and Relevant Issuers discussed herein. For important information, please see the Important Disclosures section in the appendix of this document or visit or visit <http://www.canaccordadams.com/research/Disclosure.htm>.

and from the August 28 addition of utilities in Turks and Caicos (adding 0.03 per share). With the exception of FortisBC (down \$0.1 million) and Caribbean Utilities (flat), all utility operations posted improved quarter over quarter earnings.

Earnings from the non-regulated generation assets were down from Q4/05 as lower wholesale prices in Ontario muted performance. This was partly mitigated with incremental electricity sales contribution from the Chalillo Dam (in service late 2005), lower financing costs and a lower effective tax rate. The contribution from Fortis Properties was also lower (down \$0.1 million) as the addition and expansion of properties were offset by increased financing and amortization expenses. For the full year, Fortis posted recurring EPS of \$1.39 versus \$1.16 for the same period last year. For more details on the fourth quarter and full year results, please refer to Figures 1 and 2.

Outlook

Fortis's business segments continue to operate well and are well positioned to deliver solid earnings growth. For 2007, the company expects to invest \$610 million into its regulated operations of which about \$400 million is expected to be spent in FortisBC and FortisAlberta: over the next two years, the rate base for FortisBC and FortisAlberta is expected to grow by about 30%. Over the next five years, earnings growth will be helped by more than \$2.6 billion of capital projects expected to be spent in the company's regulated utilities. Earnings growth in 2007 will also be driven by smaller-sized acquisitions including the \$97 million purchase of two Turks and Caicos utilities in late August 2006, the \$52 million purchase of four hotels in Alberta and BC in November 2006 and the \$56 million purchase of an additional 16% interest in Caribbean Utilities in November 2006.

Noteworthy Items

- Raises dividend by 10.5%
 - Now \$0.84 annually versus \$0.76
 - Future capex plans
 - \$610 million for regulated operations
 - 33% for continued and enhanced performance, reliability and safety of generation, transmission and distribution assets
 - 46% to meet customer growth
 - 21% related to facilities, equipment, vehicles and IT systems
 - ~65% of 2007 capex for Fortis BC and Fortis Alberta
 - Over \$2.6 billion expected to be spent in 2007 - 2011
 - Accounting for Caribbean Utilities' earnings will change to the consolidation method from the equity method
 - Due to ownership increasing above 50% in November 2006
 - Turks and Caicos acquisition adds \$0.03 to 2006 EPS
-

Investment risks

Some of the specific risk factors that pertain to the projected 6-12 month stock price target for Fortis Inc. are as follows: 1) Price movement in electricity rates and commodities used for electricity generation could impact profitability; 2) International operations have currency rate exposure and liquidity risks associated with those currencies; 3) Credit risk of contract counterparties; 4) Debt refinancing at higher interest rates could impact the income of the company; 5) Equipment failure or extreme weather conditions could adversely affect operating facilities; 6) Change in public policy on environmental health and safety risk could impose unexpected costs on Fortis; 7) Change in regulatory or political climate could impinge on the profitability and the future growth and development of Fortis; 8) The inability to maintain, or to renew, the collective bargaining agreements with unionized workers on acceptable terms could result in increased labour costs or service interruptions arising from labour disputes; 9) Challenging economic condition which may impact demand for products and services, peer-group valuation, access to capital and share trading liquidity; 10) Fortis holds investments in commercial real estate and hotel properties which are subject to operating risks associated with the industry; 11) If the announced increase to the dividend tax credit is not passed into law, it would have a material impact on our target price.

APPENDIX: IMPORTANT DISCLOSURES

Analyst Certification: Each authoring analyst of Canaccord Adams whose name appears on the front page of this investment research hereby certifies that (i) the recommendations and opinions expressed in this investment research accurately reflect the authoring analyst's personal, independent and objective views about any and all of the designated investments or relevant issuers discussed herein that are within such authoring analyst's coverage universe and (ii) no part of the authoring analyst's compensation was, is, or will be, directly or indirectly, related to the specific recommendations or views expressed by the authoring analyst in the investment research.

Site Visit: An analyst has visited with the issuer's management and some of the issuer's material operations. No payment or reimbursement was received from the issuer for related travel costs.

SHARE PRICE PERFORMANCE:

COMPANY SUMMARY:

Fortis Inc. is a diversified, international electric utility holding company with assets approaching \$4.5 billion and annual revenues of more than \$1.4 billion. Fortis has holdings in regulated and non-regulated electric distribution utilities in Alberta, BC, Newfoundland, PEI, Ontario, Upper New York State, Belize, Turks and Caicos Islands, Grand Cayman, and Cayman Islands. Fortis also owns and operates hotels and real estate in Canada.

All amounts in C\$ unless otherwise noted.

Energy -- Pipeline and Power Utilities

GENERATES STRONG RESULTS FROM ALL DIVISIONS

Event

Fortis announced normalized first quarter earnings per share of \$0.40, a few cents above the consensus estimate and in line with our expectations.

Impact

Neutral.

Valuation

We are maintaining our BUY rating on the shares of Fortis. Our target price is derived from a combination of valuation metrics that include earnings and dividend yields relative to long-term interest rates, dividend discount models, and earnings and cash flow multiples relative to both historical valuation and its utility and pipeline peers.

Outlook

On February 26, Fortis announced the purchase of the regulated natural gas distribution franchise assets of Terasen Gas and Terasen Gas (Vancouver Island) from Kinder Morgan Inc. The \$3.7 billion purchase included approximately \$2.3 billion of assumed debt. Also on February 26, Fortis announced the \$1.15 billion offering of subscription receipts to finance the acquisition. While the purchase has not yet closed, it is expected to be completed this quarter. We expect the addition of Terasen Gas to add about \$0.05-0.10 to Fortis's annual EPS once completed. However, we expect that the seasonality or timing of the earnings contribution will negatively impact 2007 earnings. Terasen Gas has the majority of earnings occurring in the first quarter, with losses in the second and third quarter, and followed by an earnings contribution in the fourth quarter. Consequently, given that Fortis will miss the strongest earnings quarter and has non-seasonal acquisition financing costs, 2007 earnings will be negatively impacted but 2008 will be positively impacted. Until the acquisition is completed, we are not revising our 2007 or 2008 EPS estimates.

Canaccord Adams is the global capital markets group of Canaccord Capital Inc. (CCI : TSX|AIM)

The recommendations and opinions expressed in this Investment Research accurately reflect the Investment Analyst's personal, independent and objective views about any and all the Designated Investments and Relevant Issuers discussed herein. For important information, please see the Important Disclosures section in the appendix of this document or visit <http://www.canaccordadams.com/research/Disclosure.htm>.

Fortis's earnings growth will be driven primarily from regulated assets: through utility acquisitions and significant capital spending that increases rate bases and returns. For 2007, the company expects to invest \$631 million into its regulated operations, of which \$134 million was spent in the first quarter. Over the next five years, the company expects to invest an impressive \$2.8 billion of capital projects on existing regulated electric utilities and a further \$1.0 billion on Terasen's regulated gas distribution assets. Earnings growth in 2007 will also be helped by the contribution from smaller acquisitions, such as: the \$97 million purchase of two Turks and Caicos utilities in late August 2006; the \$56 million purchase of an additional 16% interest in Caribbean Utilities in November 2006; and the \$52 million purchase of four hotels in Alberta and BC in November 2006.

Earnings summary

Fortis reported first quarter recurring earnings of \$0.40 versus \$0.35 last year, a few cents above the \$0.37 consensus estimate. Fortis's regulated operations appear to be running well, with earnings up 16% to \$44.5 million versus \$38.2 million last year. Significant improvements came from (1) Belize Electricity as greater electricity sales and reduced financial expenses boosted earnings by \$1.2 million; and (2) FortisAlberta, from strong customer growth. In addition, the purchase of utilities in Turks and Caicos in August 2006 contributed \$1.8 million and the increased ownership in Caribbean Utilities from 38% to 54% produced a modest \$0.4 million improvement. Earnings from non-regulated operations were also higher, generating \$9.1 million versus \$6.9 million in the first quarter of 2006. The increase stemmed primarily from improved hydrology in Belize and higher spot electricity pricing in Ontario and New York (\$1.9 million) and a \$0.4 million increase at Fortis Properties from the November 2006 addition of four Western Canada hotels. Offsetting part of the improved performance was the dilutive effect of a 5.17 million share issue in January 2007 and higher corporate interest expenses from debt incurred to partly fund growth. For more details on the first quarter results, please refer to Figure 1.

Noteworthy Items

- Terasen Gas
 - Acquisition expected to close in the second quarter
 - Expect acquisition to be accretive to full-year EPS
 - But modestly negative to 2007 EPS due to seasonality of earnings
 - Capital expenditure program
 - Electric utilities
 - 2007E capex now at \$631 million, up from \$610 million
 - About \$420 million at FortisAlberta and FortisBC
 - 2007-2011E capex now at \$2.8 billion, up from \$2.6 billion
 - Gas distribution utility
 - 2007-2011E capex expected to be about \$1.0 billion
 - Common equity issues
 - 5.17 million shares issued for \$150 million on January 18, 2006
 - 44.275 million subscription receipts issued for 1.15 billion
 - Included in fully diluted shares outstanding even though they are not issued unless the Terasen purchase is closed and even though Terasen's earnings are not included
-

Investment risks

Some of the specific risk factors that pertain to the projected 6-12 month stock price target for Fortis are as follows: (1) price movement in electricity rates and commodities used for electricity generation could impact profitability; (2) international operations have currency rate exposure and liquidity risks associated with those currencies; (3) credit risk of contract counterparties; (4) debt refinancing at higher interest rates could impact the income of the company; (5) equipment failure or extreme weather conditions could adversely affect operating facilities; (6) change in public policy on environmental health and safety risk could impose unexpected costs on Fortis; (7) change in regulatory or political climate could impinge on the profitability and the future growth and development of Fortis; (8) the inability to maintain, or to renew, the collective bargaining agreements with unionized workers on acceptable terms could result in increased labour costs or service interruptions arising from labour disputes; (9) challenging economic conditions which may impact demand for products and services, peer group valuation, access to capital and share trading liquidity; (10) Fortis holds investments in commercial real estate and hotel properties which are subject to operating risks associated with the industry; and (11) if the announced increase to the dividend tax credit is not passed into law, it would likely have a material impact on our target price.

APPENDIX: IMPORTANT DISCLOSURES**Analyst Certification:**

Each authoring analyst of Canaccord Adams whose name appears on the front page of this investment research hereby certifies that (i) the recommendations and opinions expressed in this investment research accurately reflect the authoring analyst's personal, independent and objective views about any and all of the designated investments or relevant issuers discussed herein that are within such authoring analyst's coverage universe and (ii) no part of the authoring analyst's compensation was, is, or will be, directly or indirectly, related to the specific recommendations or views expressed by the authoring analyst in the investment research.

COMPANY SUMMARY:

Fortis Inc. is a diversified, international electric utility holding company with assets approaching \$4.5 billion and annual revenues of more than \$1.4 billion. Fortis has holdings in regulated and non-regulated natural gas and electric distribution utilities in Alberta, BC, Newfoundland, PEI, Ontario, New York State, Belize, Turks and Caicos Islands, and Cayman Islands. Fortis also owns and operates hotels and real estate in Canada.

All amounts in C\$ unless otherwise noted.

Energy -- Pipeline and Power Utilities

Q3 EARNINGS IN LINE; EXPECT BIG JUMP IN 2008 AS TERASEN SWINGS UP >\$0.15 PER SHARE

Event

Third quarter earnings per share of \$0.20, in line with the consensus estimate.

Impact

Neutral.

Valuation

We are maintaining our C\$32.00 target and BUY rating. Our target price is derived from a combination of valuation metrics that include earnings and dividend yields relative to long-term interest rates, dividend discount models, and earnings and cash flow multiples relative to both historical valuation and its utility and pipeline peers.

Outlook

We are raising our 2007 EPS estimate to \$1.40 as Fortis is well positioned to exceed our previous \$1.35 EPS estimate with Terasen's fourth quarter earnings contribution swinging positive for the first time since its May 17th acquisition. As a gas utility, Terasen has highly seasonal earnings, with around 55% of annual earnings occurring in the first quarter of the year, small profit or losses in the second and third quarters and around 45% of earnings in the fourth quarter. While Terasen is expected to add about \$100 million in the first year of operation before financing costs, it will record well less than half that in 2007 due to the May 17 acquisition date. And after equity dilution and debt financing costs, Terasen could prove to be an \$0.08 per share drag on earnings. Fortunately, this situation should reverse itself in 2008, with Terasen adding up to \$0.10 per share. This more than \$0.15

Canaccord Adams is the global capital markets group of Canaccord Capital Inc. (CCI : TSX|AIM)

The recommendations and opinions expressed in this Investment Research accurately reflect the Investment Analyst's personal, independent and objective views about any and all the Designated Investments and Relevant Issuers discussed herein. For important information, please see the Important Disclosures section in the appendix of this document or visit <http://www.canaccordadams.com/research/Disclosure.htm>.

swing, along with growth from other operations, should push earnings to around \$1.70, well above the \$1.58 consensus estimate. Our 2008 EPS estimate remains unchanged at \$1.70.

The company continues to have a solid organic long-term growth profile from lower-risk utility operations. Total capital spending could be as much as \$4 billion over the next five years, with most of its ~\$3 billion gross electric utility capital expenditure to be driven by FortisAlberta, FortisBC and its Caribbean utilities. In addition, the company is always on the lookout for other good utility operations that fit with existing operations. The company has an impressive track record of profitable acquisitions and, looking ahead, similar growth is possible. In fact, dividend growth is set to achieve a higher growth rate as the company has a lower than normal payout ratio (49% based on 2008 projections) that can expand to the 65% industry average over time. We note that the company's balance sheet is comprised of 35.8% equity, below its long-term target of 40%. Given its ongoing significant capital spending requirement and its 40% targeted equity/total capital ratio, we expect the company may issue some type of equity (possibly preferred shares) over the next 6-12 months to rebalance its capital structure.

The company's investments in the Caribbean have shown strong growth and promise to continue that well into the future. Year-to-date earnings were up 57%. Looking forward, a new US\$52.5 million, 18.5 MW hydroelectric generating facility in Belize has been approved, a new 16 MW unit was commissioned in June 2007 in the Grand Cayman, and an additional 7 MW of power was added in Turks and Caicos during the third quarter. Fortis has successfully doubled its investment in Turks and Caicos since the August 2006 purchase and could triple the investment by 2012, possibly making it more profitable than its investment in the Cayman Islands. While Belize Electricity has had difficulty with the Public Utilities Commission on tariffs, it is appealing the latest decision (potential impact of about \$1 million) and earnings have grown over the years none the less. License renewal negotiations continue between Caribbean Utilities and the Government of Cayman Islands, where the company is looking to establish a 20-year regulatory agreement. After performing well during and after Hurricane Ivan several years ago, with the company agreeing to swallow certain costs and avoiding certain legitimate and allowable rate increases, we would expect a new agreement to be fair and reasonable to the company and its shareholders. We expect Fortis to continue to leverage its experience in the region and to successfully pursue new opportunities.

Earnings Summary

Fortis reported third quarter earnings of \$0.20 per share versus \$0.37 last year and \$0.92 year-to-date versus \$1.07 last year. Earnings improved in all Canadian regulated business operations except Maritime Electric and Fortis Ontario, where earnings were hampered by depressed electricity sales (down 2.5%) due to moderate weather conditions, the loss of a major customer and the temporary shut down of another customer. FortisAlberta had the strongest growth this quarter, increasing 19.5% over Q3/06 as a result of a 3.4% rise in energy deliveries and a \$2.7 million higher corporate tax recovery. Offsetting the improved results was a negative contribution (\$3.7 million) from Terasen due to its seasonal earnings. The Caribbean regulated utilities had strong earnings growth this quarter, up 27% or \$2.1 million, primarily driven by higher contributions (\$2.0 million) from Fortis Turks and Caicos. On the non-regulated side, Fortis Generation's earnings declined considerably (\$2.8 million) as a result of an 11.8% reduction in energy sales caused by

lower rainfall. Upper New York State hydroelectric generating stations had the most significant quarterly percentage decline in energy sales, falling to 1 GWh from 10 GWh in Q3/06. However, contributions from Fortis Properties were able to partially offset the non-regulated decline, thanks to strong growth in the western Canadian hospitality industry. Corporate and other overhead was a drag on earnings this quarter due to the inclusion of \$10.4 million of Terasen acquisition-related financing charges. Overall results were significantly impacted by the 44 million share issue on May 17th to partly finance the acquisition of Terasen. For more details on the second quarter results, please refer to Figure 1.

Noteworthy Items

- Capital Budget
 - 2007 capital budget forecast to be \$770 million; \$539 million spent YTD
 - \$4.0 billion of utility capex anticipated over next 5 years; \$3 billion on electric utilities and \$1 billion on gas utilities
 - Terasen plans a natural gas storage facility
 - \$175-\$200 million if approved
 - Late 2011 expected startup
 - Newfoundland Power
 - Return on Equity locked-in at 8.95% for the up-coming rate application
 - S&P raised long-term corporate credit rating to A- from BBB+ as of June 19/07
 - Financings:
 - Fortis: US\$200 million of senior secured notes at 6.60% due September 2037; private placement
 - FortisBC: \$105 million of 5.90% senior unsecured debentures due July 2047
 - Newfoundland Power: \$70 million of 5.904% first mortgage sinking fund bonds due August 2037
-

Investment risks

Some of the specific risk factors that pertain to the projected 6-12 month stock price target for Fortis are as follows: (1) price movement in electricity rates and commodities used for electricity generation could impact profitability; (2) international operations have currency rate exposure and liquidity risks associated with those currencies; (3) credit risk of contract counterparties; (4) debt refinancing at higher interest rates could impact the income of the company; (5) equipment failure or extreme weather conditions could adversely affect operating facilities; (6) change in public policy on environmental health and safety risk could impose unexpected costs on Fortis; (7) change in regulatory or political climate could

impinge on the profitability and the future growth and development of Fortis; (8) the inability to maintain, or to renew, the collective bargaining agreements with unionized workers on acceptable terms could result in increased labour costs or service interruptions arising from labour disputes; (9) challenging economic conditions which may impact demand for products and services, peer group valuation, access to capital and share trading liquidity; (10) Fortis holds investments in commercial real estate and hotel properties which are subject to operating risks associated with the industry; and (11) if the announced increase to the dividend tax credit is not passed into law, it would likely have a material impact on our target price.

SHARE PRICE PERFORMANCE:**COMPANY SUMMARY:**

Fortis Inc. is a diversified, international electric utility holding company with assets approaching \$4.5 billion and annual revenues of more than \$1.4 billion. Fortis has holdings in regulated and non-regulated natural gas and electric distribution utilities in Alberta, BC, Newfoundland, PEI, Ontario, New York State, Belize, Turks and Caicos Islands, and Cayman Islands. Fortis also owns and operates hotels and real estate in Canada.

All amounts in C\$ unless otherwise noted.

Energy -- Pipeline and Power Utilities**DIVIDEND INCREASE****Event**

Fortis announced a 19% increase to its dividend.

Impact

Positive.

Valuation

We are maintaining our C\$32.00 target and BUY rating. Our target price is derived from a combination of valuation metrics that include earnings and dividend yields relative to long-term interest rates, dividend discount models, and earnings and cash flow multiples relative to both historical valuation and its utility and pipeline peers.

Summary

Fortis announced that it has raised its annual dividend to \$1.00 per share, up 19% from \$0.84 per share to provide a yield of 3.5% and a payout ratio of 59% of 2008 estimated earnings. The dividend is payable on March 1, 2008 and the record date is February 8, 2008. Fortis has a history of raising its dividend annually; this increase marks the 35th consecutive year. While the market was likely anticipating an increase given the company's track record and an expected positive earnings contribution from Terasen Gas in 2008, the magnitude may be a pleasant surprise and may signal confidence of a strong earnings performance in 2008. Note our \$1.70 estimate is \$0.12 higher than the consensus. In addition, favourable federal and provincial dividend taxation will make dividends even more attractive relative to interest income in 2008.

The company continues to grow its asset base and earnings while maintaining its low risk, conservative growth profile. Fortis derives about 84% of its earnings from regulated utility assets and we believe the stock offers investors a 17% total return over the next year.

Canaccord Adams is the global capital markets group of Canaccord Capital Inc. (CCI : TSX|AIM)

The recommendations and opinions expressed in this Investment Research accurately reflect the Investment Analyst's personal, independent and objective views about any and all the Designated Investments and Relevant Issuers discussed herein. Canaccord Ratings System:

BUY: The stock is expected to generate risk-adjusted returns of over 10% during the next 12 months.

HOLD: The stock is expected to generate risk-adjusted returns of 0-10% during the next 12 months.

SELL: The stock is expected to generate negative risk-adjusted returns during the next 12 months.

NOT RATED: Canaccord Adams does not provide research coverage of the relevant issuer.

"Risk-adjusted return" refers to the expected return in relation to the amount of risk associated with the designated investment or the relevant issuer.

Risk Qualifier:

SPECULATIVE: Stocks bear significantly higher risk that typically cannot be valued by normal fundamental criteria. Investments in the stock may result in material loss.

Canaccord Adams Research Disclosures as of 12 December 2007

Company	Disclosure
Fortis Inc.	1A, 2, 7

- 1 The relevant issuer currently is, or in the past 12 months was, a client of Canaccord Adams or its affiliated companies. During this period, Canaccord Adams or its affiliated companies provided the following services to the relevant issuer:
A. investment banking services.
B. non-investment banking securities-related services.
C. non-securities related services.
- 2 In the past 12 months, Canaccord Adams or its affiliated companies have received compensation for Corporate Finance/Investment Banking services from the relevant issuer.
- 3 In the past 12 months, Canaccord Adams or any of its affiliated companies have been lead manager, co-lead manager or co-manager of a public offering of securities of the relevant issuer or any publicly disclosed offer of securities of the relevant issuer or in any related derivatives.
- 4 Canaccord Adams acts as corporate broker for the relevant issuer and/or Canaccord Adams or any of its affiliated companies may have an agreement with the relevant issuer relating to the provision of Corporate Finance/Investment Banking services.
- 5 Canaccord Adams or any of its affiliated companies is a market maker or liquidity provider in the securities of the relevant issuer or in any related derivatives.
- 6 In the past 12 months, Canaccord Adams, its partners, affiliated companies, officers or directors, or any authoring analyst involved in the preparation of this investment research has provided services to the relevant issuer for remuneration, other than normal course investment advisory or trade execution services.
- 7 Canaccord Adams intends to seek or expects to receive compensation for Corporate Finance/Investment Banking services from the relevant issuer in the next six months.
- 8 The authoring analyst, a member of the authoring analyst's household, or any individual directly involved in the preparation of this investment research, has a long position in the shares or derivatives, or has any other financial interest in the relevant issuer, the value of which increases as the value of the underlying equity increases.
- 9 The authoring analyst, a member of the authoring analyst's household, or any individual directly involved in the preparation of this investment research, has a short position in the shares or derivatives, or has any other financial interest in the relevant issuer, the value of which increases as the value of the underlying equity decreases.
- 10 Those persons identified as the author(s) of this investment research, or any individual involved in the preparation of this investment research, have purchased/received shares in the relevant issuer prior to a public offering of those shares, and such person's name and details are disclosed above.
- 11 A partner, director, officer, employee or agent of Canaccord Adams and its affiliated companies, or a member of his/her household, is an officer, or director, or serves as an advisor or board member of the relevant issuer and/or one of its subsidiaries, and such person's name is disclosed above.
- 12 As of the month end immediately preceding the date of publication of this investment research, or the prior month end if publication is within 10 days following a month end, Canaccord Adams or its affiliate companies, in the aggregate, beneficially owned 1% or more of any class of the total issued share capital or other common equity securities of the relevant issuer or held any other financial interests in the relevant issuer which are significant in relation to the investment research (as disclosed above).
- 13 As of the month end immediately preceding the date of publication of this investment research, or the prior month end if publication is within 10 days following a month end, the relevant issuer owned 1% or more of any class of the total issued share capital in Canaccord Adams or any of its affiliated companies.
- 14 Other specific disclosures as described above.

Canaccord Adams is the business name used by certain subsidiaries of Canaccord Capital Inc., including Canaccord Adams Inc., Canaccord Adams Limited, and Canaccord Adams, a division of Canaccord Capital Corporation. Clients of Canaccord Adams, in the past 12 months, may have been clients of Canaccord Capital Corporation, Canaccord Capital (Europe) Limited, Canaccord Capital Corporation USA Inc., and/or Adams Harkness Financial Group Ltd.

The authoring analysts who are responsible for the preparation of this investment research are employed by Canaccord Adams, a securities broker-dealer with principal offices located in Vancouver, Calgary, Toronto, Montreal (all Canada), Boston, New York, San Francisco (all US) and London (UK).

In the event that this is compendium investment research (covering six or more relevant issuers), Canaccord Adams and its affiliated companies may choose to provide specific disclosures of the subject companies by reference, as well as its policies and procedures regarding the dissemination of investment research. To access this material or for more information, please send a request to Canaccord Adams Research, Attn: Disclosures, P.O. Box 10337 Pacific Centre, 2200-609 Granville Street, Vancouver, BC, Canada V7Y 1H2 or disclosures@canaccordadams.com.

The authoring analysts who are responsible for the preparation of this investment research have received (or will receive) compensation based upon (among other factors) the Corporate Finance/Investment Banking

revenues and general profits of Canaccord Adams. However, such authoring analysts have not received, and will not receive, compensation that is directly based upon or linked to one or more specific Corporate Finance/Investment Banking activities, or to recommendations contained in the investment research. Canaccord Adams and its affiliated companies may have a Corporate Finance/Investment Banking or other relationship with the company that is the subject of this investment research and may trade in any of the designated investments mentioned herein either for their own account or the accounts of their customers, in good faith or in the normal course of market making. Accordingly, Canaccord Adams or their affiliated companies, principals or employees (other than the authoring analyst(s) who prepared this investment research) may at any time have a long or short position in any such designated investments, Related designated investments or in options, futures or other derivative instruments based thereon.

Some regulators require that a firm must establish, implement and make available a policy for managing conflicts of interest arising as a result of publication or distribution of investment research. This investment research has been prepared in accordance with Canaccord Adams' policy on managing conflicts of interest, and information barriers or firewalls have been used where appropriate. Canaccord Adams' policy is available upon request.

The information contained in this investment research has been compiled by Canaccord Adams from sources believed to be reliable, but (with the exception of the information about Canaccord Adams) no representation or warranty, express or implied, is made by Canaccord Adams, its affiliated companies or any other person as to its fairness, accuracy, completeness or correctness. Canaccord Adams has not independently verified the facts, assumptions, and estimates contained herein. All estimates, opinions and other information contained in this investment research constitute Canaccord Adams' judgement as of the date of this investment research, are subject to change without notice and are provided in good faith but without legal responsibility or liability.

Canaccord Adams salespeople, traders, and other professionals may provide oral or written market commentary or trading strategies to our clients and our proprietary trading desk that reflect opinions that are contrary to the opinions expressed in this investment research. Canaccord Adams' affiliates, proprietary trading desk, and investing businesses may make investment decisions that are inconsistent with the recommendations or views expressed in this investment research.

This investment research is provided for information purposes only and does not constitute an offer or solicitation to buy or sell any designated investments discussed herein in any jurisdiction where such offer or solicitation would be prohibited. As a result, the designated investments discussed in this investment research may not be eligible for sale in some jurisdictions. This investment research is not, and under no circumstances should be construed as, a solicitation to act as a securities broker or dealer in any jurisdiction by any person or company that is not legally permitted to carry on the business of a securities broker or dealer in that jurisdiction. This material is prepared for general circulation to clients and does not have regard to the investment objectives, financial situation or particular needs of any particular person. Investors should obtain advice based on their own individual circumstances before making an investment decision. To the fullest extent permitted by law, none of Canaccord Adams, its affiliated companies or any other person accepts any liability whatsoever for any direct or consequential loss arising from or relating to any use of the information contained in this investment research.

For Canadian Residents: This Investment Research has been approved by Canaccord Adams, a division of Canaccord Capital Corporation, which accepts responsibility for this Investment Research and its dissemination in Canada. Canadian clients wishing to effect transactions in any Designated Investment discussed should do so through a qualified salesperson of Canaccord Adams, a division of Canaccord Capital Corporation in their particular jurisdiction.

For United Kingdom Residents: This Investment Research complies with of the Financial Services Authority's Handbook's chapter on Conduct of Business and is approved by Canaccord Adams Limited, which is regulated and authorized by the Financial Services Authority, in connection with its distribution in the United Kingdom. This material is not for distribution in the United Kingdom to private customers, as defined under the rules of the Financial Services Authority. Canaccord Adams Limited accepts responsibility for this Investment Research and its dissemination in the United Kingdom. The information contained in this Investment Research is only intended for distribution in the UK to persons who qualify as intermediate customers or market counterparties, as defined under the rules of the Financial Services Authority.

For United States Residents: Canaccord Adams Inc., a US registered broker-dealer, accepts responsibility for this Investment Research and its dissemination in the United States. This Investment Research is intended for distribution in the United States only to certain US institutional investors. US clients wishing to effect transactions in any Designated Investment discussed should do so through a qualified salesperson of Canaccord Adams Inc.

SHARE PRICE PERFORMANCE:

COMPANY SUMMARY:

Fortis Inc. is a diversified, international electric utility holding company with assets approaching \$4.5 billion and annual revenues of more than \$1.4 billion. Fortis has holdings in regulated and non-regulated natural gas and electric distribution utilities in Alberta, BC, Newfoundland, PEI, Ontario, New York State, Belize, Turks and Caicos Islands, and Cayman Islands. Fortis also owns and operates hotels and real estate in Canada.

All amounts in C\$ unless otherwise noted.

Energy -- Pipeline and Power Utilities

NO SURPRISES IN Q4 RESULTS

Event

Fortis released fourth quarter recurring earnings per share of \$0.44 versus \$0.33 last year and essentially in line with the \$0.45 consensus estimate.

Impact

Neutral.

Valuation

We are maintaining our C\$32.00 target and BUY rating. Our target price is derived from a combination of valuation metrics that include earnings and dividend yields relative to long-term interest rates, dividend discount models, and earnings and cash flow multiples relative to both historical valuation and its utility and pipeline peers.

Outlook

We are lowering our 2008 EPS estimate modestly to \$1.65 from \$1.70. In 2008, Terasen should add about \$0.15 per share or more after being a \$0.07 drag in 2007. In addition, increased allowed returns on most of the Canadian regulated operations plus the significant capital spend at Terasen (\$120 million spent in 2007 and \$250 million of expected capex in 2008), FortisAlberta (\$285 million spent in 2007 and \$264 million budgeted for 2008), and FortisBC (\$147 million spent in 2007 and \$136 million expected in 2008) should help boost the contribution from Canadian regulated operations. Capital spending of \$4 billion over the next 5 years should help drive longer-term earnings growth. The company continues to be on the lookout for profitable acquisitions of regulated natural gas and electric utilities in Canada, the United States and the Caribbean that fit well with existing utility operations.

Earnings Summary

Fortis reported fourth quarter recurring earnings of \$0.44 per share versus \$0.33 last year, slightly below the \$0.45 consensus estimate. Net reported earnings were \$0.51 versus \$0.33 for the quarter.

For the full year, recurring earnings per share were \$1.34 versus \$1.38 and net reported earnings were \$1.40 versus \$1.42. For the year, the company estimates that the acquisition of Terasen was about \$0.07 dilutive to full year earnings due to the seasonality of earnings and timing and funding of the acquisition.

In the fourth quarter, earnings generated from the Canadian regulated business operations improved over last year, mainly as a result of the contribution from the May 17, 2007 purchase of Terasen Gas. The contribution from FortisAlberta was lower due mainly to higher costs and lower at Maritime Electric due to the loss of a large industrial customer. A modest improvement came from FortisBC, which benefited from increased rates and higher sales volumes. The Caribbean regulated utilities' earnings improved modestly due to the impact of an additional 16% interest in Caribbean Utilities in November 2006, partly offset by a weaker US\$/C\$ exchange rate. On the non-regulated side, Fortis Generation's earnings were flat while the contribution from Fortis Properties was up modestly as a result of new properties acquired in November of 2006. Corporate and other overhead increased (as expected) due to the inclusion of Terasen acquisition related financing charges. The impact of the May 17th share issue of 44 million to partly finance the acquisition of Terasen was more than offset by the large seasonal earnings contribution from Terasen. For more details on the fourth quarter and full year results, please refer to Figures 1 and 2.

Noteworthy Items

- 2008 Capex budget of \$890 million
 - \$741 million at Canadian regulated utility operations
 - \$250 million at Terasen Gas
 - \$264 million at FortisAlberta
 - \$136 million at FortisBC
 - \$53 million at Newfoundland Power
 - \$38 million at other Canadian regulated utilities
 - \$101 million at Caribbean regulated utility operations
 - \$48 million at non-regulated operations
 - 2008 return on equity up at many utility operations
 - Terasen Gas: 8.62% in 2008 vs 8.37% in 2007
 - FortisBC: 9.02% in 2008 vs 8.77% in 2007
 - FortisAlberta: 8.75% in 2008 vs 8.51% in 2007
 - Newfoundland Power: 8.95% ± 50bps in 2008 vs 8.60% ± 50bps in 2007
 - FortisOntario: unchanged at 9.00%
 - Belize Electric: unchanged at 10-15%
 - Fortis Turks & Caicos: unchanged at 17.5%
 - Maritime Electric: 10.00% in 2008 vs 10.25% in 2007
 - Caribbean Utilities: 9-11% in 2008 vs 15% in 2007
-

- Fourth quarter financings:
 - Terasen Gas: \$250 million of unsecured notes at 6.60% due October 2037
 - Caribbean Utilities: US\$10 million of 5.65% senior unsecured notes due June 2022

Investment risks

Some of the specific risk factors that pertain to the projected 6-12 month stock price target for Fortis are as follows: (1) price movement in electricity rates and commodities used for electricity generation could impact profitability; (2) international operations have currency rate exposure and liquidity risks associated with those currencies; (3) credit risk of contract counterparties; (4) debt refinancing at higher interest rates could

impact the income of the company; (5) equipment failure or extreme weather conditions could adversely affect operating facilities; (6) change in public policy on environmental health and safety risk could impose unexpected costs on Fortis; (7) change in regulatory or political climate could impinge on the profitability and the future growth and development of Fortis; (8) the inability to maintain, or to renew, the collective bargaining agreements with unionized workers on acceptable terms could result in increased labour costs or service interruptions arising from labour disputes; (9) challenging economic conditions which may impact demand for products and services, peer group valuation, access to capital and share trading liquidity; (10) Fortis holds investments in commercial real estate and hotel properties which are subject to operating risks associated with the industry; and (11) if the announced increase to the dividend tax credit is not passed into law, it would likely have a material impact on our target price.

APPENDIX: IMPORTANT DISCLOSURES**Analyst Certification:**

Each authoring analyst of Canaccord Adams whose name appears on the front page of this investment research hereby certifies that (i) the recommendations and opinions expressed in this investment research accurately reflect the authoring analyst's personal, independent and objective views about any and all of the designated investments or relevant issuers discussed herein that are within such authoring analyst's coverage universe and (ii) no part of the authoring analyst's compensation was, is, or will be, directly or indirectly, related to the specific recommendations or views expressed by the authoring analyst in the investment research.

- 11 A partner, director, officer, employee or agent of Canaccord Adams and its affiliated companies, or a member of his/her household, is an officer, or director, or serves as an advisor or board member of the relevant issuer and/or one of its subsidiaries, and such person's name is disclosed above.
- 12 As of the month end immediately preceding the date of publication of this investment research, or the prior month end if publication is within 10 days following a month end, Canaccord Adams or its affiliate companies, in the aggregate, beneficially owned 1% or more of any class of the total issued share capital or other common equity securities of the relevant issuer or held any other financial interests in the relevant issuer which are significant in relation to the investment research (as disclosed above).
- 13 As of the month end immediately preceding the date of publication of this investment research, or the prior month end if publication is within 10 days following a month end, the relevant issuer owned 1% or more of any class of the total issued share capital in Canaccord Adams or any of its affiliated companies.
- 14 Other specific disclosures as described above.

Canaccord Adams is the business name used by certain subsidiaries of Canaccord Capital Inc., including Canaccord Adams Inc., Canaccord Adams Limited, and Canaccord Adams, a division of Canaccord Capital Corporation. Clients of Canaccord Adams, in the past 12 months, may have been clients of Canaccord Capital Corporation, Canaccord Capital (Europe) Limited, Canaccord Capital Corporation USA Inc., and/or Adams Harkness Financial Group Ltd.

The authoring analysts who are responsible for the preparation of this investment research are employed by Canaccord Adams, a securities broker-dealer with principal offices located in Vancouver, Calgary, Toronto, Montreal (all Canada), Boston, New York, San Francisco (all US) and London (UK).

In the event that this is compendium investment research (covering six or more relevant issuers), Canaccord Adams and its affiliated companies may choose to provide specific disclosures of the subject companies by reference, as well as its policies and procedures regarding the dissemination of investment research. To access this material or for more information, please send a request to Canaccord Adams Research, Attn: Disclosures, P.O. Box 10337 Pacific Centre, 2200-609 Granville Street, Vancouver, BC, Canada V7Y 1H2 or disclosures@canaccordadams.com.

The authoring analysts who are responsible for the preparation of this investment research have received (or will receive) compensation based upon (among other factors) the Corporate Finance/Investment Banking

revenues and general profits of Canaccord Adams. However, such authoring analysts have not received, and will not receive, compensation that is directly based upon or linked to one or more specific Corporate Finance/Investment Banking activities, or to recommendations contained in the investment research. Canaccord Adams and its affiliated companies may have a Corporate Finance/Investment Banking or other relationship with the company that is the subject of this investment research and may trade in any of the designated investments mentioned herein either for their own account or the accounts of their customers, in good faith or in the normal course of market making. Accordingly, Canaccord Adams or their affiliated companies, principals or employees (other than the authoring analyst(s) who prepared this investment research) may at any time have a long or short position in any such designated investments, Related designated investments or in options, futures or other derivative instruments based thereon.

Some regulators require that a firm must establish, implement and make available a policy for managing conflicts of interest arising as a result of publication or distribution of investment research. This investment research has been prepared in accordance with Canaccord Adams' policy on managing conflicts of interest, and information barriers or firewalls have been used where appropriate. Canaccord Adams' policy is available upon request.

The information contained in this investment research has been compiled by Canaccord Adams from sources believed to be reliable, but (with the exception of the information about Canaccord Adams) no representation or warranty, express or implied, is made by Canaccord Adams, its affiliated companies or any other person as to its fairness, accuracy, completeness or correctness. Canaccord Adams has not independently verified the facts, assumptions, and estimates contained herein. All estimates, opinions and other information contained in this investment research constitute Canaccord Adams' judgement as of the date of this investment research, are subject to change without notice and are provided in good faith but without legal responsibility or liability.

Canaccord Adams salespeople, traders, and other professionals may provide oral or written market commentary or trading strategies to our clients and our proprietary trading desk that reflect opinions that are contrary to the opinions expressed in this investment research. Canaccord Adams' affiliates, proprietary trading desk, and investing businesses may make investment decisions that are inconsistent with the recommendations or views expressed in this investment research.

This investment research is provided for information purposes only and does not constitute an offer or solicitation to buy or sell any designated investments discussed herein in any jurisdiction where such offer or solicitation would be prohibited. As a result, the designated investments discussed in this investment research may not be eligible for sale in some jurisdictions. This investment research is not, and under no circumstances should be construed as, a solicitation to act as a securities broker or dealer in any jurisdiction by any person or company that is not legally permitted to carry on the business of a securities broker or dealer in that jurisdiction. This material is prepared for general circulation to clients and does not have regard to the investment objectives, financial situation or particular needs of any particular person. Investors should obtain advice based on their own individual circumstances before making an investment decision. To the fullest extent permitted by law, none of Canaccord Adams, its affiliated companies or any other person accepts any liability whatsoever for any direct or consequential loss arising from or relating to any use of the information contained in this investment research.

For Canadian Residents: This Investment Research has been approved by Canaccord Adams, a division of Canaccord Capital Corporation, which accepts responsibility for this Investment Research and its dissemination in Canada. Canadian clients wishing to effect transactions in any Designated Investment discussed should do so through a qualified salesperson of Canaccord Adams, a division of Canaccord Capital Corporation in their particular jurisdiction.

For United Kingdom Residents: This Investment Research complies with of the Financial Services Authority's Handbook's chapter on Conduct of Business and is approved by Canaccord Adams Limited, which is regulated and authorized by the Financial Services Authority, in connection with its distribution in the United Kingdom. This material is not for distribution in the United Kingdom to private customers, as defined under the rules of the Financial Services Authority. Canaccord Adams Limited accepts responsibility for this Investment Research and its dissemination in the United Kingdom. The information contained in this Investment Research is only intended for distribution in the UK to persons who qualify as intermediate customers or market counterparties, as defined under the rules of the Financial Services Authority.

For United States Residents: Canaccord Adams Inc., a US registered broker-dealer, accepts responsibility for this Investment Research and its dissemination in the United States. This Investment Research is intended for distribution in the United States only to certain US institutional investors. US clients wishing to effect transactions in any Designated Investment discussed should do so through a qualified salesperson of Canaccord Adams Inc.

For European Residents: If this Investment Research is intended for disclosure in any jurisdiction other than the United Kingdom, the US or Canada, then the relevant rules and regulatory requirements of that jurisdiction will apply.

SHARE PRICE PERFORMANCE:

COMPANY SUMMARY:

Fortis Inc. is a diversified, international electric utility holding company with assets approaching \$4.5 billion and annual revenues of more than \$1.4 billion. Fortis has holdings in regulated and non-regulated natural gas and electric distribution utilities in Alberta, BC, Newfoundland, PEI, Ontario, New York State, Belize, Turks and Caicos Islands, and Cayman Islands. Fortis also owns and operates hotels and real estate in Canada.

All amounts in C\$ unless otherwise noted.

Energy – Pipeline and Power Utilities

ANOTHER SOLID QUARTER

Event

Fortis released first quarter recurring earnings per share of \$0.58 versus \$0.40 last year and slightly above the \$0.55 consensus estimate.

Impact

Neutral.

Valuation

We are reducing our target by \$1.00 to C\$31.00 but are maintaining our BUY rating. Our target price is derived from a combination of valuation metrics that include earnings and dividend yields relative to long-term interest rates, dividend discount models, and earnings and cash flow multiples relative to both historical valuation and its utility and pipeline peers. Consequently, a slightly lower earnings estimate and growth profile has impacted our target price.

Outlook

We are reducing our 2008 and 2009 EPS estimates by \$0.05 for both years to \$1.60 and \$1.70, respectively to reflect slower than expected earnings growth at FortisAlberta and a slower earnings growth from its Caribbean operations with the absorption of a new regulatory licence at Caribbean Utilities. While capital spending continues and is adding to its Alberta rate base, prior years' earnings were positively impacted by tax recoveries that are not repeatable, keeping earnings relatively flat in 2008 before growing again in 2009.

The biggest contributor to the expected \$0.26 per share earnings gain in 2008 is the \$0.15 estimated contribution from a full year of Terasen (after being a \$0.07 drain in 2007). Increased allowed returns and higher rate bases at many of its Canadian regulated operations will also improve results in 2008. Longer-term earnings growth should be helped

Canaccord Adams is the global capital markets group of Canaccord Capital Inc. (CCI : TSX|AIM)

The recommendations and opinions expressed in this Investment Research accurately reflect the Investment Analyst's personal, independent and objective views about any and all the Designated Investments and Relevant Issuers discussed herein. For important information, please see the Important Disclosures section in the appendix of this document or visit <http://www.canaccordadams.com/research/Disclosure.htm>.

by planned capital spending of about \$900 million in 2008 and \$4 billion over the next five years. The company is still on the hunt for profitable acquisitions of regulated natural gas and electric utilities in Canada, the US and the Caribbean that fit well with existing utility operations. Fortis will also consider acquisitions in its non-regulated businesses (mainly at Fortis Properties) that tax-effectively support its utility growth and acquisitions.

First quarter earnings

First quarter recurring earnings were \$0.58 versus \$0.40 last year, slightly above the \$0.55 consensus estimate. Note that the results would have been \$0.04 higher at \$0.62, but an accounting change at Newfoundland Power shifted more power purchase expenses into the first and fourth quarters from the middle two quarters (there is no impact on annual earnings). The earnings improvement was primarily due to Terasen Gas purchased last May, which has a seasonally strong first quarter. Caribbean-regulated utilities improved modestly due to higher production and a favourable accounting change for deferred fuel costs under the new Transmission and Distribution licence at Caribbean Utilities. FortisAlberta, FortisBC and other Canadian regulated utilities were generally flat over last year. As has been the case for some time now, foreign earnings improvements were partly offset by the stronger Canadian dollar. For more details on the first quarter results, please refer to Figure 1.

Noteworthy

- A new government repealed recent tariff amendment at Belize Electricity
 - Currently working to resolve the issue
 - Could negatively impact earnings by \$0.7 million annually
 - Belize Electricity filed application to recover rising costs of power
 - Application was disallowed
 - Annual Tariff Review recently filed requesting 13.5% rate increase
 - Decision expected in Q2/08
 - FERC issued an order repealing its original order of a \$2 million refund to FortisOntario
 - Could reverse a one-time \$2 million gain to Fortis
 - Not material
 - 2008 return on equity up at many Canadian utility operations
 - ROEs up 25 bps at Terasen Gas, Terasen Gas Vancouver Island, FortisBC, FortisAlberta and Newfoundland Power
-

Investment risks

Some of the specific risk factors that pertain to the projected 6-12 month stock price target for Fortis are as follows: (1) price movement in electricity rates and commodities used for electricity generation could impact profitability; (2) international operations have currency rate exposure and liquidity risks associated with those currencies; (3) credit risk of contract counterparties; (4) debt refinancing at higher interest rates could impact the income of the company; (5) equipment failure or extreme weather conditions could adversely affect operating facilities; (6) change in public policy on environmental health and safety risk

could impose unexpected costs on Fortis; (7) change in regulatory or political climate could impinge on the profitability and the future growth and development of Fortis; (8) the inability to maintain, or to renew, the collective bargaining agreements with unionized workers on acceptable terms could result in increased labour costs or service interruptions arising from labour disputes; (9) challenging economic conditions which may impact demand for products and services, peer group valuation, access to capital and share trading liquidity; (10) Fortis holds investments in commercial real estate and hotel properties which are subject to operating risks associated with the industry; and (11) if the announced increase to the dividend tax credit is not passed into law, it would likely have a material impact on our target price.

APPENDIX: IMPORTANT DISCLOSURES**Analyst Certification:**

Each authoring analyst of Canaccord Adams whose name appears on the front page of this investment research hereby certifies that (i) the recommendations and opinions expressed in this investment research accurately reflect the authoring analyst's personal, independent and objective views about any and all of the designated investments or relevant issuers discussed herein that are within such authoring analyst's coverage universe and (ii) no part of the authoring analyst's compensation was, is, or will be, directly or indirectly, related to the specific recommendations or views expressed by the authoring analyst in the investment research.

Consequently, a slightly lower earnings estimate and growth profile has impacted our target price.

Outlook

We are reducing our 2008 and 2009 EPS estimates by \$0.05 for both years to \$1.60 and \$1.70, respectively to reflect slower than expected earnings growth at FortisAlberta and a slower earnings growth from its Caribbean operations with the absorption of a new regulatory licence at Caribbean Utilities. While capital spending continues and is adding to its Alberta rate base, prior years' earnings were positively impacted by tax recoveries that are not repeatable, keeping earnings relatively flat in 2008 before growing again in 2009.

The biggest contributor to the expected \$0.26 per share earnings gain in 2008 is the \$0.15 estimated contribution from a full year of Terasen (after being a \$0.07 drain in 2007). Increased allowed returns and higher rate bases at many of its Canadian regulated operations will also improve results in 2008. Longer-term earnings growth should be helped

Canaccord Adams is the global capital markets group of Canaccord Capital Inc. (CCI : TSX|AIM)

The recommendations and opinions expressed in this Investment Research accurately reflect the Investment Analyst's personal, independent and objective views about any and all the Designated Investments and Relevant Issuers discussed herein. For important information, please see the Important Disclosures section in the appendix of this document or visit <http://www.canaccordadams.com/research/Disclosure.htm>.

by planned capital spending of about \$900 million in 2008 and \$4 billion over the next five years. The company is still on the hunt for profitable acquisitions of regulated natural gas and electric utilities in Canada, the US and the Caribbean that fit well with existing utility operations. Fortis will also consider acquisitions in its non-regulated businesses (mainly at Fortis Properties) that tax-effectively support its utility growth and acquisitions.

First quarter earnings

First quarter recurring earnings were \$0.58 versus \$0.40 last year, slightly above the \$0.55 consensus estimate. Note that the results would have been \$0.04 higher at \$0.62, but an accounting change at Newfoundland Power shifted more power purchase expenses into the first and fourth quarters from the middle two quarters (there is no impact on annual earnings). The earnings improvement was primarily due to Terasen Gas purchased last May, which has a seasonally strong first quarter. Caribbean-regulated utilities improved modestly due to higher production and a favourable accounting change for deferred fuel costs under the new Transmission and Distribution licence at Caribbean Utilities. FortisAlberta, FortisBC and other Canadian regulated utilities were generally flat over last year. As has been the case for some time now, foreign earnings improvements were partly offset by the stronger Canadian dollar. For more details on the first quarter results, please refer to Figure 1.

Noteworthy

- A new government repealed recent tariff amendment at Belize Electricity
 - Currently working to resolve the issue
 - Could negatively impact earnings by \$0.7 million annually
 - Belize Electricity filed application to recover rising costs of power
 - Application was disallowed
 - Annual Tariff Review recently filed requesting 13.5% rate increase
 - Decision expected in Q2/08
 - FERC issued an order repealing its original order of a \$2 million refund to FortisOntario
 - Could reverse a one-time \$2 million gain to Fortis
 - Not material
 - 2008 return on equity up at many Canadian utility operations
 - ROEs up 25 bps at Terasen Gas, Terasen Gas Vancouver Island, FortisBC, FortisAlberta and Newfoundland Power
-

Investment risks

Some of the specific risk factors that pertain to the projected 6-12 month stock price target for Fortis are as follows: (1) price movement in electricity rates and commodities used for electricity generation could impact profitability; (2) international operations have currency rate exposure and liquidity risks associated with those currencies; (3) credit risk of contract counterparties; (4) debt refinancing at higher interest rates could impact the income of the company; (5) equipment failure or extreme weather conditions could adversely affect operating facilities; (6) change in public policy on environmental health and safety risk

could impose unexpected costs on Fortis; (7) change in regulatory or political climate could impinge on the profitability and the future growth and development of Fortis; (8) the inability to maintain, or to renew, the collective bargaining agreements with unionized workers on acceptable terms could result in increased labour costs or service interruptions arising from labour disputes; (9) challenging economic conditions which may impact demand for products and services, peer group valuation, access to capital and share trading liquidity; (10) Fortis holds investments in commercial real estate and hotel properties which are subject to operating risks associated with the industry; and (11) if the announced increase to the dividend tax credit is not passed into law, it would likely have a material impact on our target price.

APPENDIX: IMPORTANT DISCLOSURES**Analyst Certification:**

Each authoring analyst of Canaccord Adams whose name appears on the front page of this investment research hereby certifies that (i) the recommendations and opinions expressed in this investment research accurately reflect the authoring analyst's personal, independent and objective views about any and all of the designated investments or relevant issuers discussed herein that are within such authoring analyst's coverage universe and (ii) no part of the authoring analyst's compensation was, is, or will be, directly or indirectly, related to the specific recommendations or views expressed by the authoring analyst in the investment research.

Canaccord Ratings System:

BUY: The stock is expected to generate risk-adjusted returns of over 10% during the next 12 months.
HOLD: The stock is expected to generate risk-adjusted returns of 0-10% during the next 12 months.
SELL: The stock is expected to generate negative risk-adjusted returns during the next 12 months.
NOT RATED: Canaccord Adams does not provide research coverage of the relevant issuer.

"Risk-adjusted return" refers to the expected return in relation to the amount of risk associated with the designated investment or the relevant issuer.

Risk Qualifier:

SPECULATIVE: Stocks bear significantly higher risk that typically cannot be valued by normal fundamental criteria. Investments in the stock may result in material loss.

Canaccord Adams Research Disclosures as of 2 May 2008

Company	Disclosure
Fortis Inc.	1A, 2, 7

- 1 The relevant issuer currently is, or in the past 12 months was, a client of Canaccord Adams or its affiliated companies. During this period, Canaccord Adams or its affiliated companies provided the following services to the relevant issuer:
A. investment banking services.
B. non-investment banking securities-related services.
C. non-securities related services.
- 2 In the past 12 months, Canaccord Adams or its affiliated companies have received compensation for Corporate Finance/Investment Banking services from the relevant issuer.
- 3 In the past 12 months, Canaccord Adams or any of its affiliated companies have been lead manager, co-lead manager or co-manager of a public offering of securities of the relevant issuer or any publicly disclosed offer of securities of the relevant issuer or in any related derivatives.
- 4 Canaccord Adams acts as corporate broker for the relevant issuer and/or Canaccord Adams or any of its affiliated companies may have an agreement with the relevant issuer relating to the provision of Corporate Finance/Investment Banking services.
- 5 Canaccord Adams or any of its affiliated companies is a market maker or liquidity provider in the securities of the relevant issuer or in any related derivatives.
- 6 In the past 12 months, Canaccord Adams, its partners, affiliated companies, officers or directors, or any authoring analyst involved in the preparation of this investment research has provided services to the relevant issuer for remuneration, other than normal course investment advisory or trade execution services.
- 7 Canaccord Adams intends to seek or expects to receive compensation for Corporate Finance/Investment Banking services from the relevant issuer in the next six months.
- 8 The authoring analyst, a member of the authoring analyst's household, or any individual directly involved in the preparation of this investment research, has a long position in the shares or derivatives, or has any other financial interest in the relevant issuer, the value of which increases as the value of the underlying equity increases.
- 9 The authoring analyst, a member of the authoring analyst's household, or any individual directly involved in the preparation of this investment research, has a short position in the shares or derivatives, or has any other financial interest in the relevant issuer, the value of which increases as the value of the underlying equity decreases.
- 10 Those persons identified as the author(s) of this investment research, or any individual involved in the preparation of this investment research, have purchased/received shares in the relevant issuer prior to a public offering of those shares, and such person's name and details are disclosed above.
- 11 A partner, director, officer, employee or agent of Canaccord Adams and its affiliated companies, or a member of his/her household, is an officer, or director, or serves as an advisor or board member of the relevant issuer and/or one of its subsidiaries, and such person's name is disclosed above.
- 12 As of the month end immediately preceding the date of publication of this investment research, or the prior month end if publication is within 10 days following a month end, Canaccord Adams or its affiliate companies, in the aggregate, beneficially owned 1% or more of any class of the total issued share capital or other common equity securities of the relevant issuer or held any other financial interests in the relevant issuer which are significant in relation to the investment research (as disclosed above).
- 13 As of the month end immediately preceding the date of publication of this investment research, or the prior month end if publication is within 10 days following a month end, the relevant issuer owned 1% or more of any class of the total issued share capital in Canaccord Adams or any of its affiliated companies.
- 14 Other specific disclosures as described above.

Canaccord Adams is the business name used by certain subsidiaries of Canaccord Capital Inc., including Canaccord Adams Inc., Canaccord Adams Limited, and Canaccord Adams, a division of Canaccord Capital Corporation. Clients of Canaccord Adams, in the past 12 months, may have been clients of Canaccord Capital Corporation, Canaccord Capital (Europe) Limited, Canaccord Capital Corporation USA Inc., and/or Adams Harkness Financial Group Ltd.

The authoring analysts who are responsible for the preparation of this investment research are employed by Canaccord Adams, a securities broker-dealer with principal offices located in Vancouver, Calgary, Toronto, Montreal (all Canada), Boston, New York, San Francisco (all US) and London (UK).

In the event that this is compendium investment research (covering six or more relevant issuers), Canaccord Adams and its affiliated companies may choose to provide specific disclosures of the subject companies by reference, as well as its policies and procedures regarding the dissemination of investment research. SHARE PRICE PERFORMANCE:

COMPANY SUMMARY:

Fortis Inc. is a diversified, international electric utility holding company with assets approaching \$4.5 billion and annual revenues of more than \$1.4 billion. Fortis has holdings in regulated and non-regulated natural gas and electric distribution utilities in Alberta, BC, Newfoundland, PEI, Ontario, New York State, Belize, Turks and Caicos Islands, and Cayman Islands. Fortis also owns and operates hotels and real estate in Canada.

All amounts in C\$ unless otherwise noted.

Energy -- Pipeline and Power Utilities

PUC DECISION ELIMINATES A YEAR OF BELIZE EARNINGS

Event

Belize Electricity Limited (BEL; 70.1% owned by Fortis) received a regulatory decision that retroactively disallowed C\$18 million (\$12.6 million to Fortis) of previously incurred costs and reduced Belize Electricity's rate of return on assets to 10% from 12%.

Impact

Negative, as it wipes out over one year's worth of Belize earnings. However, the Initial Decision was released on May 2 and the shares of Fortis appear to have already discounted the impact. Fortis' total Belize investment is about \$200 million (\$1.28 per share) and this decision applies to just the regulated half of its operations. Since May 1, Fortis has trailed its Canadian peers by 3% or about \$0.80 per share or \$125 million in total. Consequently, it appears that investors have already eliminated more than the full value of its regulated investment, despite the possibility of successful appeals by the companies. If the stock overreacts to this news, we would BUY on the weakness.

Valuation

We are reducing our target price to \$30 from \$31 to reflect the uncertainty of the value of the Belize investment but maintaining our BUY rating. Our target price is derived from a combination of valuation metrics that include earnings and dividend yields relative to long-term interest rates, dividend discount models, and earnings and cash flow multiples relative to both historical valuation and its utility and pipeline peers.

Summary

The Public Utilities Commission (PUC) in Belize issued a Final Decision on the Annual Rate Review Proceeding for BEL (70.1% Fortis Inc.

Canaccord Adams is the global capital markets group of Canaccord Capital Inc. (CCI : TSX|AIM)

The recommendations and opinions expressed in this Investment Research accurately reflect the Investment Analyst's personal, independent and objective views about any and all the Designated Investments and Relevant Issuers discussed herein. For important information, please see the Important Disclosures section in the appendix of this document or visit <http://www.canaccordadams.com/research/Disclosure.htm>.

owned). The Decision retroactively disallowed previously incurred costs by BZ\$36 million (C\$18 million; C\$12.6 million). Following the Initial Decision, BEL filed a number of objections which were addressed by an Independent Expert hired by the Commission. However, the PUC failed to incorporate a majority of the recommendations and decided to maintain the 2007 mean electricity rate. BEL will likely appeal this decision and Fortis itself may take its case to court as the decision violates the agreement reached when it originally purchased its assets.

Fortis said in its news release: "The Final Decision violates both established regulatory practice and contractual obligations made by the Government of Belize at the time Fortis made its initial investment in Belize Electricity. Fortis is considering its options and legal remedies." Fortis is not prepared to walk from its investment without appropriate compensation. Possibly if the Government of Belize was interested in buying it from Fortis at a FAIR price... Though this is unlikely to happen any time soon.

Significant changes to BEL's Cost of Power Rate Stabilization Account:

1. 80% BEL's actual cost of power was reduced for January and February 2008 due to claims that BEL did not dispatch sufficient hydro resources
2. Depreciation rates were lowered for 2005 through 2007
3. Actual versus projected total return
4. Eliminated all previous balances in the Hurricane Cost Rate Stabilization Account

PUC's Initial Decision reduced BEL's rate of return to 8.5%, below the company's 10% average cost of debt and below the risk-free debt rate for the Government of Belize (estimated by the International Monetary Fund to be over 9%). The decision also requires BEL, from its own funds, re-establish the BZ\$5,000,000 deposit for the Insurance Reserve Fund (about \$1.7 million value to Fortis).

As required under the appeal, the decision was put before an Independent Expert. The Expert did have some questions regarding BEL's Hurricane account and other disclosure practices. However, for the most part, the Expert did not agree with the PUC's adjustments to the Cost of Power Rate Stabilization Account or the rate of return decision, and instead recommended: the 2008 rate be set to 12% given current market conditions; no disallowances of power costs for the first two months of the year as the PUC agreed with BEL's rule curve for dispatching hydro; and the balance of the Hurricane account should not be eliminated (though further investigation was warranted). Despite believing the depreciation and return adjustments were inconsistent with *Good Utility Practices*, he did include the PUC's adjustments in his recommendations. Regardless of his recommendations, the Commission ignored the Expert and maintained its original stance on a majority of issues.

Investment risks

Some of the specific risk factors that pertain to the projected 6-12 month stock price target for Fortis are as follows: (1) price movement in electricity rates and commodities used for electricity generation could impact profitability; (2) international operations have currency rate exposure and liquidity risks associated with those currencies; (3) credit risk of contract counterparties; (4) debt refinancing at higher interest rates could impact the income of the company; (5) equipment failure or extreme weather conditions could adversely affect operating facilities; (6) change in public policy on environmental health and safety risk

could impose unexpected costs on Fortis; (7) change in regulatory or political climate could impinge on the profitability and the future growth and development of Fortis; (8) the inability to maintain, or to renew, the collective bargaining agreements with unionized workers on acceptable terms could result in increased labour costs or service interruptions arising from labour disputes; (9) challenging economic conditions which may impact demand for products and services, peer group valuation, access to capital and share trading liquidity; (10) Fortis holds investments in commercial real estate and hotel properties which are subject to operating risks associated with the industry; and (11) if the announced increase to the dividend tax credit is not passed into law, it would likely have a material impact on our target price.

APPENDIX: IMPORTANT DISCLOSURES**Analyst Certification:**

Each authoring analyst of Canaccord Adams whose name appears on the front page of this investment research hereby certifies that (i) the recommendations and opinions expressed in this investment research accurately reflect the authoring analyst's personal, independent and objective views about any and all of the designated investments or relevant issuers discussed herein that are within such authoring analyst's coverage universe and (ii) no part of the authoring analyst's compensation was, is, or will be, directly or indirectly, related to the specific recommendations or views expressed by the authoring analyst in the investment research.

Canaccord Adams Research Disclosures as of 30 June 2008

Company	Disclosure
Fortis Inc.	1A, 2, 7

- 1 The relevant issuer currently is, or in the past 12 months was, a client of Canaccord Adams or its affiliated companies. During this period, Canaccord Adams or its affiliated companies provided the following services to the relevant issuer:
 - A. investment banking services.
 - B. non-investment banking securities-related services.
 - C. non-securities related services.
- 2 In the past 12 months, Canaccord Adams or its affiliated companies have received compensation for Corporate Finance/Investment Banking services from the relevant issuer.
- 3 In the past 12 months, Canaccord Adams or any of its affiliated companies have been lead manager, co-lead manager or co-manager of a public offering of securities of the relevant issuer or any publicly disclosed offer of securities of the relevant issuer or in any related derivatives.
- 4 Canaccord Adams acts as corporate broker for the relevant issuer and/or Canaccord Adams or any of its affiliated companies may have an agreement with the relevant issuer relating to the provision of Corporate Finance/Investment Banking services.
- 5 Canaccord Adams or any of its affiliated companies is a market maker or liquidity provider in the securities of the relevant issuer or in any related derivatives.
- 6 In the past 12 months, Canaccord Adams, its partners, affiliated companies, officers or directors, or any authoring analyst involved in the preparation of this investment research has provided services to the relevant issuer for remuneration, other than normal course investment advisory or trade execution services.
- 7 Canaccord Adams intends to seek or expects to receive compensation for Corporate Finance/Investment Banking services from the relevant issuer in the next six months.
- 8 The authoring analyst, a member of the authoring analyst's household, or any individual directly involved in the preparation of this investment research, has a long position in the shares or derivatives, or has any other financial interest in the relevant issuer, the value of which increases as the value of the underlying equity increases.
- 9 The authoring analyst, a member of the authoring analyst's household, or any individual directly involved in the preparation of this investment research, has a short position in the shares or derivatives, or has any other financial interest in the relevant issuer, the value of which increases as the value of the underlying equity decreases.
- 10 Those persons identified as the author(s) of this investment research, or any individual involved in the preparation of this investment research, have purchased/received shares in the relevant issuer prior to a public offering of those shares, and such person's name and details are disclosed above.
- 11 A partner, director, officer, employee or agent of Canaccord Adams and its affiliated companies, or a member of his/her household, is an officer, or director, or serves as an advisor or board member of the relevant issuer and/or one of its subsidiaries, and such person's name is disclosed above.
- 12 As of the month end immediately preceding the date of publication of this investment research, or the prior month end if publication is within 10 days following a month end, Canaccord Adams or its affiliate companies, in the aggregate, beneficially owned 1% or more of any class of the total issued share capital or other common equity securities of the relevant issuer or held any other financial interests in the relevant issuer which are significant in relation to the investment research (as disclosed above).
- 13 As of the month end immediately preceding the date of publication of this investment research, or the prior month end if publication is within 10 days following a month end, the relevant issuer owned 1% or more of any class of the total issued share capital in Canaccord Adams or any of its affiliated companies.
- 14 Other specific disclosures as described above.

Canaccord Adams is the business name used by certain subsidiaries of Canaccord Capital Inc., including Canaccord Adams Inc., Canaccord Adams Limited, and Canaccord Adams, a division of Canaccord Capital Corporation. Clients of Canaccord Adams, in the past 12 months, may have been clients of Canaccord Capital Corporation, Canaccord Capital (Europe) Limited, Canaccord Capital Corporation USA Inc., and/or Adams Harkness Financial Group Ltd.

The authoring analysts who are responsible for the preparation of this investment research are employed by Canaccord Adams, a securities broker-dealer with principal offices located in Vancouver, Calgary, Toronto, Montreal (all Canada), Boston, New York, San Francisco (all US) and London (UK).

In the event that this is compendium investment research (covering six or more relevant issuers), Canaccord Adams and its affiliated companies may choose to provide specific disclosures of the subject companies by reference, as well as its policies and procedures regarding the dissemination of investment research. To access this material or for more information, please send a request to Canaccord Adams Research, Attn: Disclosures, P.O. Box 10337 Pacific Centre, 2200-609 Granville Street, Vancouver, BC, Canada V7Y 1H2 or disclosures@canaccordadams.com.

The authoring analysts who are responsible for the preparation of this investment research have received (or

will receive) compensation based upon (among other factors) the Corporate Finance/Investment Banking revenues and general profits of Canaccord Adams. However, such authoring analysts have not received, and will not receive, compensation that is directly based upon or linked to one or more specific Corporate Finance/Investment Banking activities, or to recommendations contained in the investment research.

Canaccord Adams and its affiliated companies may have a Corporate Finance/Investment Banking or other relationship with the company that is the subject of this investment research and may trade in any of the designated investments mentioned herein either for their own account or the accounts of their customers, in good faith or in the normal course of market making. Accordingly, Canaccord Adams or their affiliated companies, principals or employees (other than the authoring analyst(s) who prepared this investment research) may at any time have a long or short position in any such designated investments. Related designated investments or in options, futures or other derivative instruments based thereon.

Some regulators require that a firm must establish, implement and make available a policy for managing conflicts of interest arising as a result of publication or distribution of investment research. This investment research has been prepared in accordance with Canaccord Adams' policy on managing conflicts of interest, and information barriers or firewalls have been used where appropriate. Canaccord Adams' policy is available upon request.

The information contained in this investment research has been compiled by Canaccord Adams from sources believed to be reliable, but (with the exception of the information about Canaccord Adams) no representation or warranty, express or implied, is made by Canaccord Adams, its affiliated companies or any other person as to its fairness, accuracy, completeness or correctness. Canaccord Adams has not independently verified the facts, assumptions, and estimates contained herein. All estimates, opinions and other information contained in this investment research constitute Canaccord Adams' judgement as of the date of this investment research, are subject to change without notice and are provided in good faith but without legal responsibility or liability.

Canaccord Adams salespeople, traders, and other professionals may provide oral or written market commentary or trading strategies to our clients and our proprietary trading desk that reflect opinions that are contrary to the opinions expressed in this investment research. Canaccord Adams' affiliates, proprietary trading desk, and investing businesses may make investment decisions that are inconsistent with the recommendations or views expressed in this investment research.

This investment research is provided for information purposes only and does not constitute an offer or solicitation to buy or sell any designated investments discussed herein in any jurisdiction where such offer or solicitation would be prohibited. As a result, the designated investments discussed in this investment research may not be eligible for sale in some jurisdictions. This investment research is not, and under no circumstances should be construed as, a solicitation to act as a securities broker or dealer in any jurisdiction by any person or company that is not legally permitted to carry on the business of a securities broker or dealer in that jurisdiction. This material is prepared for general circulation to clients and does not have regard to the investment objectives, financial situation or particular needs of any particular person. Investors should obtain advice based on their own individual circumstances before making an investment decision. To the fullest extent permitted by law, none of Canaccord Adams, its affiliated companies or any other person accepts any liability whatsoever for any direct or consequential loss arising from or relating to any use of the information contained in this investment research.

For Canadian Residents: This Investment Research has been approved by Canaccord Adams, a division of Canaccord Capital Corporation, which accepts responsibility for this Investment Research and its dissemination in Canada. Canadian clients wishing to effect transactions in any Designated Investment discussed should do so through a qualified salesperson of Canaccord Adams, a division of Canaccord Capital Corporation in their particular jurisdiction.

For United Kingdom Residents: This investment research complies with the Financial Services Authority's Handbook chapter on Conduct of Business and is approved by Canaccord Adams Limited, which is authorized and regulated by the Financial Services Authority, in connection with its distribution in the United Kingdom. This material is not for distribution in the United Kingdom to retail clients, as defined under the rules of the Financial Services Authority. Canaccord Adams Limited accepts responsibility for this investment research and its dissemination in the United Kingdom. The information contained in this investment research is only intended for distribution in the UK to persons who qualify as professional clients or eligible counterparties, as defined under the rules of the Financial Services Authority.

For United States Residents: Canaccord Adams Inc., a US registered broker-dealer, accepts responsibility for this Investment Research and its dissemination in the United States. This Investment Research is intended for distribution in the United States only to certain US institutional investors. US clients wishing to effect transactions in any Designated Investment discussed should do so through a qualified salesperson of Canaccord Adams Inc.

For European Residents: If this Investment Research is intended for disclosure in any jurisdiction other than the United Kingdom, the US or Canada, then the relevant rules and regulatory requirements of that jurisdiction will apply.

SHARE PRICE PERFORMANCE:

COMPANY SUMMARY:

Fortis Inc. is a diversified, international electric utility holding company with assets approaching \$4.5 billion and annual revenues of more than \$1.4 billion. Fortis has holdings in regulated and non-regulated natural gas and electric distribution utilities in Alberta, BC, Newfoundland, PEI, Ontario, New York State, Belize, Turks and Caicos Islands, and Cayman Islands. Fortis also owns and operates hotels and real estate in Canada.

All amounts in C\$ unless otherwise noted.

Energy – Pipeline and Power Utilities

DELAYED GROWTH, LOWERED EARNINGS, TARGET AND RATING

Event

Fortis released second quarter recurring earnings per share of \$0.28 versus \$0.32 last year, in line with the consensus estimate. However, gains at Terasen and Newfoundland Power that will not improve our annual earnings estimate offset a negative impact from Alberta taxes and corporate expenses.

Impact

Negative. We are reducing our outlook for 2008 and 2009 earnings.

Valuation

We are reducing our 12-month target price to C\$29.00 from C\$30.00 due to modestly lower earnings estimates and lowering our rating to HOLD from Buy. Our target price is derived from a combination of valuation metrics that include earnings and dividend yields relative to long-term interest rates, dividend discount models, and earnings and cash flow multiples relative to both Fortis's historical valuation and its utility and pipeline peers.

Outlook

We are lowering our 2008 estimate to \$1.50 (excluding the one-time \$0.08 from a retroactive fuel cost issue in Belize) from \$1.60 per share and our 2009 estimate to \$1.55 from \$1.70. While Fortis continues to perform on track in most of its operations, earnings will be hurt by elevated Alberta taxes and corporate expenses. Corporate taxes at FortisAlberta have dampened earnings by about \$9 million so far this year due to the timing of the collection of Alberta Electric System Operator (AESO) deferral account charges. This deferral account captures variances from customer transmission charges and their actual cost with a two-year regulatory lag between when they are collected or refunded

Canaccord Adams is the global capital markets group of Canaccord Capital Inc. (CCI : TSX|AIM)

The recommendations and opinions expressed in this Investment Research accurately reflect the Investment Analyst's personal, independent and objective views about any and all the Designated Investments and Relevant Issuers discussed herein. For important information, please see the Important Disclosures section in the appendix of this document or visit <http://www.canaccordadams.com/research/Disclosure.htm>.

in customer rates. This issue was mitigated in the past by selling the receivable balance to a bank, allowing FortisAlberta to record the proceeds in the year they were incurred. Due to widening credit spreads Fortis elected not to pursue this option for 2008. Outside of this segment, Terasen continues to perform as expected and should be biggest source of earnings improvement this year. Increased allowed returns and higher rate bases at many of its Canadian regulated operations will also improve results in 2008. Longer-term earnings growth should be helped by planned capital spending of over \$900 million in 2008 and \$4.5 billion over the next five years (up from the \$4 billion estimate last quarter).

Second quarter earnings

Second quarter recurring earnings were \$0.28 per share versus \$0.32 last year, in line with the \$0.27 consensus estimate. A stronger earnings performance versus the same quarter last year was muted by a 20% increase in shares outstanding to fund last year's Terasen purchase. As expected, earnings growth largely stemmed from Terasen Gas (\$12 million versus \$1.6 million in Q2/07), which contributed for the full second quarter this year (acquired on May 17 last year). Fortis Generation also improved due to increased production at the Central Newfoundland hydroelectric facility and increased average wholesale energy prices in both Ontario and upper New York State. Fortis Properties' earnings grew by \$1 million due to the contribution from Delta Regina (purchased August 1, 2007), improved performance at its Atlantic Canada hospitality operations and higher average room rates. While Newfoundland Power's contribution rose 25%, the increase was due to an accounting change that shifted power purchase expenses into the first and fourth quarters from the middle two quarters (there is no impact on annual earnings). Earnings growth was offset by an \$8 million (\$0.05 per share) decline at FortisAlberta mainly due to higher corporate taxes associated with AESO approval of its charges deferral account and timing of its collection. Note that reported earnings were \$0.18 per share versus \$0.32 last year due to the inclusion of a one-time \$8 million charge at Belize Electricity from disallowed previously incurred fuel and purchase power costs, a \$2 million charge at FortisOntario as a result of the FERC reversing its stance on transmission charges with Niagara Mohawk Power Corp (\$2 million gain reported in Q4/07 was essentially reversed) and a \$0.6 million gain at FortisBC from insurance proceeds associated with a turbine generator failure in 2006. For more details on the second quarter results, please refer to Figure 1.

Noteworthy

- FortisOntario and Grimsby Power just entered into a non-binding letter of intent
 - FortisOntario to acquire a 10% minority interest in Grimsby Power's electricity distribution business for ~\$1.1 million and the cost to integrate Grimsby Power's customer information system service to FortisOntario's SAP-based system
 - Caribbean Utilities and Government of Cayman Islands signed an exclusive 20-year transmission and distribution license and 21.5-year generation license
 - Under the T&D licence, customer rates set using initial target rate of return on asset base of 10%; down from 15% in previous licence
 - Caribbean Utilities announced a US\$28 million rights offering in June 2008
 - To repay credit facility and finance capex
-

- Closes August 15
- Fortis to buy its share, plus any unsubscribed rights
- Fortis Generation
 - Average Q2 wholesale energy prices: \$46.86/MWh vs. \$42.93/MWh in Ontario and \$80.89/MWh vs. \$56.97/MWh in upper New York State
 - Reservoirs in central Newfoundland hydro facility at ~two-thirds of maximum; Chalillo reservoir in Belize full

Investment risks

Some of the specific risk factors that pertain to the projected 6- to 12-month stock price target for Fortis are as follows: (1) price movement in electricity rates and commodities used for electricity generation could impact profitability; (2) international operations have currency rate exposure and liquidity risks associated with those currencies; (3) credit risk of contract counterparties; (4) debt refinancing at higher interest rates could impact the income of the company; (5) equipment failure or extreme weather conditions could adversely affect operating facilities; (6) change in public policy on environmental health and safety risk could impose unexpected costs on Fortis; (7) change in regulatory or political climate could impinge on the profitability and the future growth and development of Fortis; (8) the inability to maintain, or to renew, the collective bargaining agreements with unionized workers on acceptable terms could result in increased labour costs or service interruptions arising from labour disputes; (9) challenging economic conditions which may impact demand for products and services, peer group valuation, access to capital and share trading liquidity; (10) Fortis holds investments in commercial real estate and hotel properties which are subject to operating risks associated with the industry; and (11) if the announced increase to the dividend tax credit is not passed into law, it would likely have a material impact on our target price.

Canaccord Ratings System:

BUY: The stock is expected to generate risk-adjusted returns of over 10% during the next 12 months.
HOLD: The stock is expected to generate risk-adjusted returns of 0-10% during the next 12 months.
SELL: The stock is expected to generate negative risk-adjusted returns during the next 12 months.
NOT RATED: Canaccord Adams does not provide research coverage of the relevant issuer.

"Risk-adjusted return" refers to the expected return in relation to the amount of risk associated with the designated investment or the relevant issuer.

Risk Qualifier:

SPECULATIVE: Stocks bear significantly higher risk that typically cannot be valued by normal fundamental criteria. Investments in the stock may result in material loss.

Canaccord Adams Research Disclosures as of 11 August 2008

Company	Disclosure
Fortis Inc.	1A, 2, 7

- 1** The relevant issuer currently is, or in the past 12 months was, a client of Canaccord Adams or its affiliated companies. During this period, Canaccord Adams or its affiliated companies provided the following services to the relevant issuer:
A. investment banking services.
B. non-investment banking securities-related services.
C. non-securities related services.
- 2** In the past 12 months, Canaccord Adams or its affiliated companies have received compensation for Corporate Finance/Investment Banking services from the relevant issuer.
- 3** In the past 12 months, Canaccord Adams or any of its affiliated companies have been lead manager, co-lead manager or co-manager of a public offering of securities of the relevant issuer or any publicly disclosed offer of securities of the relevant issuer or in any related derivatives.
- 4** Canaccord Adams acts as corporate broker for the relevant issuer and/or Canaccord Adams or any of its affiliated companies may have an agreement with the relevant issuer relating to the provision of Corporate Finance/Investment Banking services.
- 5** Canaccord Adams or any of its affiliated companies is a market maker or liquidity provider in the securities of the relevant issuer or in any related derivatives.
- 6** In the past 12 months, Canaccord Adams, its partners, affiliated companies, officers or directors, or any authoring analyst involved in the preparation of this investment research has provided services to the relevant issuer for remuneration, other than normal course investment advisory or trade execution services.
- 7** Canaccord Adams intends to seek or expects to receive compensation for Corporate Finance/Investment Banking services from the relevant issuer in the next six months.
- 8** The authoring analyst, a member of the authoring analyst's household, or any individual directly involved in the preparation of this investment research, has a long position in the shares or derivatives, or has any other financial interest in the relevant issuer, the value of which increases as the value of the underlying equity increases.
- 9** The authoring analyst, a member of the authoring analyst's household, or any individual directly involved in the preparation of this investment research, has a short position in the shares or derivatives, or has any other financial interest in the relevant issuer, the value of which increases as the value of the underlying equity decreases.
- 10** Those persons identified as the author(s) of this investment research, or any individual involved in the preparation of this investment research, have purchased/received shares in the relevant issuer prior to a public offering of those shares, and such person's name and details are disclosed above.
- 11** A partner, director, officer, employee or agent of Canaccord Adams and its affiliated companies, or a member of his/her household, is an officer, or director, or serves as an advisor or board member of the relevant issuer and/or one of its subsidiaries, and such person's name is disclosed above.
- 12** As of the month end immediately preceding the date of publication of this investment research, or the prior month end if publication is within 10 days following a month end, Canaccord Adams or its affiliate companies, in the aggregate, beneficially owned 1% or more of any class of the total issued share capital or other common equity securities of the relevant issuer or held any other financial interests in the relevant issuer which are significant in relation to the investment research (as disclosed above).
- 13** As of the month end immediately preceding the date of publication of this investment research, or the prior month end if publication is within 10 days following a month end, the relevant issuer owned 1% or more of any class of the total issued share capital in Canaccord Adams or any of its affiliated companies.
- 14** Other specific disclosures as described above.

Canaccord Adams is the business name used by certain subsidiaries of Canaccord Capital Inc., including Canaccord Adams Inc., Canaccord Adams Limited, and Canaccord Adams, a division of Canaccord Capital Corporation. Clients of Canaccord Adams, in the past 12 months, may have been clients of Canaccord Capital Corporation, Canaccord Capital (Europe) Limited, Canaccord Capital Corporation USA Inc., and/or Adams Harkness Financial Group Ltd.

The authoring analysts who are responsible for the preparation of this investment research are employed by Canaccord Adams, a securities broker-dealer with principal offices located in Vancouver, Calgary, Toronto, Montreal (all Canada), Boston, New York, San Francisco (all US) and London (UK).

In the event that this is compendium investment research (covering six or more relevant issuers), Canaccord Adams and its affiliated companies may choose to provide specific disclosures of the subject companies by reference, as well as its policies and procedures regarding the dissemination of investment research. To access this material or for more information, please send a request to Canaccord Adams Research, Attn:

Disclosures, P.O. Box 10337 Pacific Centre, 2200-609 Granville Street, Vancouver, BC, Canada V7Y 1H2 or disclosures@canaccordadams.com.

The authoring analysts who are responsible for the preparation of this investment research have received (or will receive) compensation based upon (among other factors) the Corporate Finance/Investment Banking revenues and general profits of Canaccord Adams. However, such authoring analysts have not received, and will not receive, compensation that is directly based upon or linked to one or more specific Corporate Finance/Investment Banking activities, or to recommendations contained in the investment research.

Canaccord Adams and its affiliated companies may have a Corporate Finance/Investment Banking or other relationship with the company that is the subject of this investment research and may trade in any of the designated investments mentioned herein either for their own account or the accounts of their customers, in good faith or in the normal course of market making. Accordingly, Canaccord Adams or their affiliated companies, principals or employees (other than the authoring analyst(s) who prepared this investment research) may at any time have a long or short position in any such designated investments, Related designated investments or in options, futures or other derivative instruments based thereon.

Some regulators require that a firm must establish, implement and make available a policy for managing conflicts of interest arising as a result of publication or distribution of investment research. This investment research has been prepared in accordance with Canaccord Adams' policy on managing conflicts of interest, and information barriers or firewalls have been used where appropriate. Canaccord Adams' policy is available upon request.

The information contained in this investment research has been compiled by Canaccord Adams from sources believed to be reliable, but (with the exception of the information about Canaccord Adams) no representation or warranty, express or implied, is made by Canaccord Adams, its affiliated companies or any other person as to its fairness, accuracy, completeness or correctness. Canaccord Adams has not independently verified the facts, assumptions, and estimates contained herein. All estimates, opinions and other information contained in this investment research constitute Canaccord Adams' judgement as of the date of this investment research, are subject to change without notice and are provided in good faith but without legal responsibility or liability.

Canaccord Adams salespeople, traders, and other professionals may provide oral or written market commentary or trading strategies to our clients and our proprietary trading desk that reflect opinions that are contrary to the opinions expressed in this investment research. Canaccord Adams' affiliates, proprietary trading desk, and investing businesses may make investment decisions that are inconsistent with the recommendations or views expressed in this investment research.

This investment research is provided for information purposes only and does not constitute an offer or solicitation to buy or sell any designated investments discussed herein in any jurisdiction where such offer or solicitation would be prohibited. As a result, the designated investments discussed in this investment research may not be eligible for sale in some jurisdictions. This investment research is not, and under no circumstances should be construed as, a solicitation to act as a securities broker or dealer in any jurisdiction by any person or company that is not legally permitted to carry on the business of a securities broker or dealer in that jurisdiction. This material is prepared for general circulation to clients and does not have regard to the investment objectives, financial situation or particular needs of any particular person. Investors should obtain advice based on their own individual circumstances before making an investment decision. To the fullest extent permitted by law, none of Canaccord Adams, its affiliated companies or any other person accepts any liability whatsoever for any direct or consequential loss arising from or relating to any use of the information contained in this investment research.

For Canadian Residents: This Investment Research has been approved by Canaccord Adams, a division of Canaccord Capital Corporation, which accepts responsibility for this Investment Research and its dissemination in Canada. Canadian clients wishing to effect transactions in any Designated Investment discussed should do so through a qualified salesperson of Canaccord Adams, a division of Canaccord Capital Corporation in their particular jurisdiction.

For United Kingdom Residents: This investment research complies with the Financial Services Authority's Handbook chapter on Conduct of Business and is approved by Canaccord Adams Limited, which is authorized and regulated by the Financial Services Authority, in connection with its distribution in the United Kingdom. This material is not for distribution in the United Kingdom to retail clients, as defined under the rules of the Financial Services Authority. Canaccord Adams Limited accepts responsibility for this investment research and its dissemination in the United Kingdom. The information contained in this investment research is only intended for distribution in the UK to persons who qualify as professional clients or eligible counterparties, as defined under the rules of the Financial Services Authority.

For United States Residents: Canaccord Adams Inc., a US registered broker-dealer, accepts responsibility for this Investment Research and its dissemination in the United States. This Investment Research is intended for distribution in the United States only to certain US institutional investors. US clients wishing to effect transactions in any Designated Investment discussed should do so through a qualified salesperson of Canaccord Adams Inc.

For European Residents: If this Investment Research is intended for disclosure in any jurisdiction other than the United Kingdom, the US or Canada, then the relevant rules and regulatory requirements of that jurisdiction will apply.

SHARE PRICE PERFORMANCE:**COMPANY SUMMARY:**

Fortis Inc. is a diversified, international electric utility holding company with assets approaching \$4.5 billion and annual revenues of more than \$1.4 billion. Fortis has holdings in regulated and non-regulated natural gas and electric distribution utilities in Alberta, BC, Newfoundland, PEI, Ontario, New York State, Belize, Turks and Caicos Islands, and Cayman Islands. Fortis also owns and operates hotels and real estate in Canada.

All amounts in C\$ unless otherwise noted.

Energy -- Pipeline and Power Utilities**RATING RAISED TO BUY ON SHARE PRICE WEAKNESS****Event**

We are raising our rating on the shares of Fortis to BUY from Hold due to recent share price weakness but we are making no change to our C\$29.00 target price.

Valuation

We are raising our target price to BUY from Hold and maintaining our target price of C\$29.00. Our target price is derived from a combination of valuation metrics that include earnings and dividend yields relative to long-term interest rates, dividend discount models, and earnings and cash flow multiples relative to both historical valuation and its utility and pipeline peers.

Investment risks

Some of the specific risk factors that pertain to the projected 6- to 12-month stock price target for Fortis are as follows: (1) price movement in electricity rates and commodities used for electricity generation could impact profitability; (2) international operations have currency rate exposure and liquidity risks associated with those currencies; (3) credit risk of contract counterparties; (4) debt refinancing at higher interest rates could impact the income of the company; (5) equipment failure or extreme weather conditions could adversely affect operating facilities; (6) change in public policy on environmental health and safety risk could impose unexpected costs on Fortis; (7) change in regulatory or political climate could impinge on the profitability and the future growth and development of Fortis; (8) the inability to maintain, or to renew, the collective bargaining agreements with unionized workers on acceptable terms could result in increased labour costs or service interruptions

SHARE PRICE PERFORMANCE:**COMPANY SUMMARY:**

Fortis Inc. is a diversified, international electric utility holding company with assets approaching \$4.5 billion and annual revenues of more than \$1.4 billion. Fortis has holdings in regulated and non-regulated natural gas and electric distribution utilities in Alberta, BC, Newfoundland, PEI, Ontario, New York State, Belize, Turks and Caicos Islands, and Cayman Islands. Fortis also owns and operates hotels and real estate in Canada.

All amounts in C\$ unless otherwise noted.

Energy -- Pipeline and Power Utilities**OUTLOOK IMPROVES ON AESO CHARGES BEING OFFSET AND GOOD HYDROLOGY****Event**

Fortis released third quarter recurring earnings per share of \$0.24, modestly above the consensus estimate.

Impact

Modestly positive.

Valuation

We are maintaining our C\$29.00 target price and BUY rating. Our target price is derived from a combination of valuation metrics that include earnings and dividend yields relative to long-term interest rates, dividend discount models, and earnings and cash flow multiples relative to both historical valuation and its utility and pipeline peers.

Outlook

We are raising our 2008 EPS estimate to \$1.55 from \$1.50 to reflect strong hydrology and the company's ability to now recover previous transmission charges in Alberta from the Alberta Electric System Operator (AESO) via an income tax mechanism. We are also moving our 2009 EPS estimate up by \$0.05 to \$1.60 from \$1.55 for the same reason. The company is now applying tax deductions on AESO transmission tariffs that will improve annual earnings by ~\$0.05 per share in both 2008 and 2009. These charges were to be recovered from customers after a two-year lag, so while the cash flow impact is still delayed, the accounting change better matches the expense with its recovery and removes the negative earnings impact.

The company's operations are performing largely in line with expectations, with better-than-expected results from non-regulated generation due to strong hydrology. The company stated that with Terasen now substantially integrated into its operations, it is well positioned to pursue additional growth in its core areas. While Fortis has an adequate balance sheet, we believe potential acquisitions would have to be extremely attractive and immediately accretive in order for it to pursue them, given the current market environment. Regardless, the planned \$4.5 billion of capital spending in regulated operations over the next five years should help generate longer-term earnings growth even without a new acquisition.

Earnings Summary

Fortis generated \$0.24 per share of recurring earnings in the third quarter, versus \$0.20 last year, slightly above the \$0.21 consensus estimate. The year-over-year improvement was mainly due to higher rainfall and power prices Belize and an accounting change at Newfoundland Power which redistributes quarterly income (with no change in annual earnings). The improvement over consensus was due to the company being able to now offset the AESO transmission charge and the better hydrology. These improvements were partly offset by lower rates and hurricane related costs at the regulated Caribbean operations. For the first nine months of the year, recurring earnings were \$1.09 per share versus \$0.91 for the same period last year. For more details on the third quarter results, please refer to Figure 1.

Noteworthy Items

- Non-recurring items
 - Tax settlement of \$5.5 million recorded at Terasen Gas
 - \$2 million tax reduction stemming from prior periods
 - FortisAlberta Q3 earnings includes \$4.5 million recovery of future taxes
 - Applies to Q2/08
 - FortisOntario to acquire 10% interest in Grimsby Power Inc. for \$1.1 million
 - Caribbean Utilities (CUC)
 - Now owns 57%, up from 54%
 - 2.1 mln shares purchased in August Rights Offering
 - 267,669 shares purchased in October through a private arrangement
 - Fortis Q4/08 results to benefit from five months of CUC financial results
 - Change in CUC's fiscal year-end
-

Investment risks

Some of the specific risk factors that pertain to the projected 6- to 12-month stock price target for Fortis are as follows: (1) price movement in electricity rates and commodities used for electricity generation could impact profitability; (2) international operations have currency rate exposure and liquidity risks associated with those currencies; (3) credit risk of contract counterparties; (4) debt refinancing at higher interest rates could impact the income of the company; (5) equipment failure or extreme weather conditions could adversely affect operating facilities; (6) change in public policy on environmental health and safety risk could impose unexpected costs on Fortis; (7) change in regulatory or

political climate could impinge on the profitability and the future growth and development of Fortis; (8) the inability to maintain, or to renew, the collective bargaining agreements with unionized workers on acceptable terms could result in increased labour costs or service interruptions arising from labour disputes; (9) challenging economic conditions which may impact demand for products and services, peer group valuation, access to capital and share trading liquidity; (10) Fortis holds investments in commercial real estate and hotel properties which are subject to operating risks associated with the industry; and (11) if the announced increase to the dividend tax credit is not passed into law, it would likely have a material impact on our target price.

- 11 A partner, director, officer, employee or agent of Canaccord Adams and its affiliated companies, or a member of his/her household, is an officer, or director, or serves as an advisor or board member of the relevant issuer and/or one of its subsidiaries, and such person's name is disclosed above.
- 12 As of the month end immediately preceding the date of publication of this investment research, or the prior month end if publication is within 10 days following a month end, Canaccord Adams or its affiliate companies, in the aggregate, beneficially owned 1% or more of any class of the total issued share capital or other common equity securities of the relevant issuer or held any other financial interests in the relevant issuer which are significant in relation to the investment research (as disclosed above).
- 13 As of the month end immediately preceding the date of publication of this investment research, or the prior month end if publication is within 10 days following a month end, the relevant issuer owned 1% or more of any class of the total issued share capital in Canaccord Adams or any of its affiliated companies.
- 14 Other specific disclosures as described above.

Canaccord Adams is the business name used by certain subsidiaries of Canaccord Capital Inc., including Canaccord Adams Inc., Canaccord Adams Limited, and Canaccord Adams, a division of Canaccord Capital Corporation. Clients of Canaccord Adams, in the past 12 months, may have been clients of Canaccord Capital Corporation, Canaccord Capital (Europe) Limited, Canaccord Capital Corporation USA Inc., and/or Adams Harkness Financial Group Ltd.

The authoring analysts who are responsible for the preparation of this investment research are employed by Canaccord Adams, a securities broker-dealer with principal offices located in Vancouver, Calgary, Toronto, Montreal (all Canada), Boston, New York, San Francisco (all US) and London (UK).

In the event that this is compendium investment research (covering six or more relevant issuers), Canaccord Adams and its affiliated companies may choose to provide specific disclosures of the subject companies by reference, as well as its policies and procedures regarding the dissemination of investment research. To

access this material or for more information, please send a request to Canaccord Adams Research, Attn: Disclosures, P.O. Box 10337 Pacific Centre, 2200-609 Granville Street, Vancouver, BC, Canada V7Y 1H2 or disclosures@canaccordadams.com.

The authoring analysts who are responsible for the preparation of this investment research have received (or will receive) compensation based upon (among other factors) the Corporate Finance/Investment Banking revenues and general profits of Canaccord Adams. However, such authoring analysts have not received, and will not receive, compensation that is directly based upon or linked to one or more specific Corporate Finance/Investment Banking activities, or to recommendations contained in the investment research.

Canaccord Adams and its affiliated companies may have a Corporate Finance/Investment Banking or other relationship with the company that is the subject of this investment research and may trade in any of the designated investments mentioned herein either for their own account or the accounts of their customers, in good faith or in the normal course of market making. Accordingly, Canaccord Adams or their affiliated companies, principals or employees (other than the authoring analyst(s) who prepared this investment research) may at any time have a long or short position in any such designated investments, Related designated investments or in options, futures or other derivative instruments based thereon.

Some regulators require that a firm must establish, implement and make available a policy for managing conflicts of interest arising as a result of publication or distribution of investment research. This investment research has been prepared in accordance with Canaccord Adams' policy on managing conflicts of interest, and information barriers or firewalls have been used where appropriate. Canaccord Adams' policy is available upon request.

The information contained in this investment research has been compiled by Canaccord Adams from sources believed to be reliable, but (with the exception of the information about Canaccord Adams) no representation or warranty, express or implied, is made by Canaccord Adams, its affiliated companies or any other person as to its fairness, accuracy, completeness or correctness. Canaccord Adams has not independently verified the facts, assumptions, and estimates contained herein. All estimates, opinions and other information contained in this investment research constitute Canaccord Adams' judgement as of the date of this investment research, are subject to change without notice and are provided in good faith but without legal responsibility or liability.

Canaccord Adams salespeople, traders, and other professionals may provide oral or written market commentary or trading strategies to our clients and our proprietary trading desk that reflect opinions that are contrary to the opinions expressed in this investment research. Canaccord Adams' affiliates, proprietary trading desk, and investing businesses may make investment decisions that are inconsistent with the recommendations or views expressed in this investment research.

This investment research is provided for information purposes only and does not constitute an offer or solicitation to buy or sell any designated investments discussed herein in any jurisdiction where such offer or solicitation would be prohibited. As a result, the designated investments discussed in this investment research may not be eligible for sale in some jurisdictions. This investment research is not, and under no circumstances should be construed as, a solicitation to act as a securities broker or dealer in any jurisdiction by any person or company that is not legally permitted to carry on the business of a securities broker or dealer in that jurisdiction. This material is prepared for general circulation to clients and does not have regard to the investment objectives, financial situation or particular needs of any particular person. Investors should obtain advice based on their own individual circumstances before making an investment decision. To the fullest extent permitted by law, none of Canaccord Adams, its affiliated companies or any other person accepts any liability whatsoever for any direct or consequential loss arising from or relating to any use of the information contained in this investment research.

For Canadian Residents: This Investment Research has been approved by Canaccord Adams, a division of Canaccord Capital Corporation, which accepts responsibility for this Investment Research and its dissemination in Canada. Canadian clients wishing to effect transactions in any Designated Investment discussed should do so through a qualified salesperson of Canaccord Adams, a division of Canaccord Capital Corporation in their particular jurisdiction.

For United Kingdom Residents: This investment research complies with the Financial Services Authority's Handbook chapter on Conduct of Business and is approved by Canaccord Adams Limited, which is authorized and regulated by the Financial Services Authority, in connection with its distribution in the United Kingdom. This material is not for distribution in the United Kingdom to retail clients, as defined under the rules of the Financial Services Authority. Canaccord Adams Limited accepts responsibility for this investment research and its dissemination in the United Kingdom. The information contained in this investment research is only intended for distribution in the UK to persons who qualify as professional clients or eligible counterparties, as defined under the rules of the Financial Services Authority.

For United States Residents: Canaccord Adams Inc., a US registered broker-dealer, accepts responsibility for this Investment Research and its dissemination in the United States. This Investment Research is intended for distribution in the United States only to certain US institutional investors. US clients wishing to effect transactions in any Designated Investment discussed should do so through a qualified salesperson of Canaccord Adams Inc.

For European Residents: If this Investment Research is intended for disclosure in any jurisdiction other than the United Kingdom, the US or Canada, then the relevant rules and regulatory requirements of that jurisdiction will apply.

SHARE PRICE PERFORMANCE:**COMPANY SUMMARY:**

Fortis Inc. is a diversified, international electric utility holding company with assets approaching \$4.5 billion and annual revenues of more than \$1.4 billion. Fortis has holdings in regulated and non-regulated natural gas and electric distribution utilities in Alberta, BC, Newfoundland, PEI, Ontario, New York State, Belize, Turks and Caicos Islands, and Cayman Islands. Fortis also owns and operates hotels and real estate in Canada.

All amounts in C\$ unless otherwise noted.

Energy -- Pipeline and Power Utilities

STEADY Q4 EARNINGS; MAINTAINING BUY RATING AND C\$29.00 TARGET

Event

Fortis released fourth quarter recurring earnings per share of \$0.47, slightly above the \$0.46 consensus estimate.

Impact

Neutral

Valuation

We are maintaining our C\$29.00 target price and BUY rating. Our target price is derived from a combination of valuation metrics that include earnings and dividend yields relative to long-term interest rates, dividend discount models, and earnings and cash flow multiples relative to both historical valuation and its utility and pipeline peers.

Outlook

We are maintaining our 2009 EPS estimate of \$1.50 and introducing a 2010 estimate of \$1.60. We expect growth to be driven mainly driven from regulated utilities, and we point to the company's 2008 capital program of \$900 million and 2009 program of \$1.0 billion.

The company's operations continue to perform well, with the positive exception of better than expected results at FortisAlberta and in its non-regulated generation. However, while 2009 earnings will grow from the capital expansion program, the benefit may well be completely offset by: loss of its non-regulated Ontario generation at the end of the first quarter that could remove about \$10 million of earnings; challenges at its Hospitality Division at Fortis Properties due to the economy; lower

growth at its Caribbean operations as tourism slows; modestly lower allowed ROEs at many of the company's utility operations; and dilution from the 11.7 million share issue in December. Longer term, the company will continue to pursue acquisitions in regulated natural gas and electric utilities in Canada, the US and the Caribbean, now that the Terasen acquisition has been fully integrated into its operations. We believe any potential acquisitions would need to be extremely attractive given the current economic and credit market environment. Regardless, the \$4.5 billion of capital spending at the company's regulated operations over the next five years should help generate longer-term earnings growth.

Fourth quarter earnings summary

Fortis generated \$0.47 per share of recurring earnings in the fourth quarter, versus \$0.44 last year, just above the \$0.46 consensus estimate. The improvement was mainly generated from lower future income taxes at FortisAlberta and higher earnings at Terasen Gas. These improvements were partly offset by hurricane-related costs at the regulated Caribbean operations and a \$2 million impact at Newfoundland Power from the quarterly shift in purchased power expense (although neutral for the full year). For the full year, recurring earnings were \$1.51 per share versus \$1.34 for the same period last year, due primarily to the full year-inclusion of Terasen. For more details on the fourth quarter and full year results, please refer to Figures 1 and 2.

Noteworthy items

- Some projects completion dates delayed
 - Terasen's 50 km pipeline lateral from Squamish to Whistler
 - Completion slipped from summer 2008 to April 2009
 - No impact on cost
 - \$53 million Vaca generating facility in Belize
 - Start-up early 2010 versus late 2009
 - 2009 capital expenditure program of \$1.045 billion
 - Terasen – \$287 million
 - FortisAlberta – \$292 million
 - FortisBC – \$160 million
 - Newfoundland Power – \$65 million
 - Other Canadian regulated utilities – \$34 million
 - Regulated Caribbean utilities – \$118 million
 - Non-regulated utility operations – \$56 million
 - Fortis Properties – \$33 million
 - Belize Electricity now in violation of debt covenants
 - BZ\$11 million with the Caribbean Development Bank and the International Bank for Reconstruction and Development
 - First Caribbean Bank withdrew credit facility in November
-

- Repaid BZ\$4 million out of cash flow
 - Scotiabank may not renew BZ\$5.1 million credit facility, but not yet used
 - Lower energy prices provides some near-term liquidity relief
- Impact of global economic downturn
 - Growth at Fortis Properties Hospitality Division may be challenging
 - Caribbean growth may decline with lower tourism
- Pension plan assets declined by \$95 million, or 14% from previous year
 - Fortis expects no material increase in pension expense in 2009
 - Actuarial valuations scheduled for completion in 2009 and 2010
 - Longer-term pension funding obligations could increase

Investment risks

Some of the specific risk factors that pertain to the projected 6- to 12-month stock price target for Fortis are as follows: (1) price movement in electricity rates and commodities used for electricity generation could impact profitability; (2) international operations have currency rate exposure and liquidity risks associated with those currencies; (3) credit risk of contract counterparties; (4) debt refinancing at higher interest rates could impact the income of the company; (5) equipment failure or extreme weather conditions could adversely affect operating facilities; (6) change in public policy on environmental health and safety risk could impose unexpected costs on Fortis; (7) change in regulatory or political climate could impinge on the profitability and the future growth and development of Fortis; (8) the inability to maintain, or to renew, the collective bargaining agreements with unionized workers on acceptable terms could result in increased labour costs or service interruptions arising from labour disputes; (9) challenging economic conditions which may impact demand for products and services, peer group valuation, access to capital and share trading liquidity; (10) Fortis holds investments in commercial real estate and hotel properties which are subject to operating risks associated with the industry; and (11) if the announced increase to the dividend tax credit is not passed into law, it would likely have a material impact on our target price.

SHARE PRICE PERFORMANCE:**COMPANY SUMMARY:**

Fortis Inc. is a diversified, international electric utility holding company with assets approaching \$4.5 billion and annual revenues of more than \$1.4 billion. Fortis has holdings in regulated and non-regulated natural gas and electric distribution utilities in Alberta, BC, Newfoundland, PEI, Ontario, New York State, Belize, Turks and Caicos Islands, and Cayman Islands. Fortis also owns and operates hotels and real estate in Canada.

All amounts in C\$ unless otherwise noted.

Infrastructure -- Utilities

NO SURPRISES IN Q1 RESULTS; MAINTAINING BUY RATING AND C\$29.00 TARGET PRICE

Event

Fortis released first-quarter recurring earnings per share of \$0.53, modestly below the \$0.57 consensus estimate.

Impact

Neutral.

Valuation

We are maintaining our C\$29.00 target price and BUY rating. Our target price is derived from a combination of valuation metrics that include earnings and dividend yields relative to long-term interest rates, dividend discount models, and earnings and cash flow multiples relative to both historical valuation and its utility and pipeline peers.

Outlook

We are maintaining our 2009 and 2010 EPS estimates of \$1.50 and \$1.60, respectively. Growth will be driven mainly driven from \$900 million of capital expenditures invested in regulated operations and planned capital expenditures of \$1.0 billion in 2010. Our outlook for Fortis's various operations remain unchanged. Regulated utilities should continue to benefit from higher-rate bases as the strong capital spending program continues over the next five years. In addition, we could see some improvements in allowed ROEs beginning in 2010 if Canadian regulators mirror the National Energy Board's (NEB) recent approach to rate-making. Last month, the NEB abandoned its ROE formula approach in favour of an after-tax weighted average cost of capital approach on its recent decision regarding TQM Pipeline that also better recognized risk issues and raised its allowed equity return.

Canaccord Adams is the global capital markets group of Canaccord Capital Inc. (CCI : TSX|AIM)

The recommendations and opinions expressed in this Investment Research accurately reflect the Investment Analyst's personal, independent and objective views about any and all the Designated Investments and Relevant Issuers discussed herein. For important information, please see the Important Disclosures section in the appendix of this document or visit

<http://www.canaccordadams.com/research/Disclosure.htm>.

As the NEB was the originator of the formula ROE approach, the well laid out reasoning for the change should positively impact the regulatory methodologies at other regulatory jurisdictions that had previously adopted the NEB formula approach.

While 2009 earnings will benefit from the planned capital expenditures, the benefit will be mitigated by the loss of its non-regulated Ontario generation at the end of the first quarter; potentially lower earnings at Fortis Properties due to the poor economy; slower growth at its Caribbean operations as tourism moderates in the current economic climate; modestly lower allowed ROEs at many of the company's utility operations; and dilution from the 11.7 million share issue in December.

First-quarter earnings summary

Fortis reported first-quarter recurring income of \$0.53 per share, versus \$0.58 last year, modestly below the \$0.57 consensus estimate. Total earnings were flat over last year, but earnings per share were down because of an 8% increase in shares outstanding. Improved earnings at FortisBC and FortisAlberta from increased rate bases were partly offset by lower rates at the regulated Caribbean operations and a decline in earnings generated from the Fortis Properties division. Net reported earnings per share for the first quarter were \$0.54 which included \$2 million on non-recurring items at Fortis Turks and Caicos. For more details on the first-quarter results, please refer to Figure 1.

Noteworthy items

- Completed Terasen's 50-kilometre pipeline lateral from Squamish to Whistler
 - \$4.5 billion of capital spending over the next five years
 - \$3.1 billion at regulated electric utilities
 - \$1.2 billion at regulated gas utilities
 - \$0.2 billion at non-regulated operations
 - 2009 capital expenditure program of \$1 billion
 - Impact of global economic downturn
 - Fortis Properties Hospitality Division impacted modestly
 - Caribbean growth may decline with lower tourism (unless everyone switches from Mexico to the Caribbean!)
 - Pension expenses are almost exclusively related to regulated operations and are recoverable in rates
 - Actuarial valuations scheduled for completion in 2009 and 2010
-

Investment risks

Some of the specific risk factors that pertain to the projected 6- to 12-month stock price target for Fortis are as follows: (1) price movement in electricity rates and commodities used for electricity generation could impact profitability; (2) international operations have currency rate exposure and liquidity risks associated with those currencies; (3) credit risk of contract counterparties; (4) debt refinancing at higher interest rates could impact the income of the company; (5) equipment failure or extreme weather conditions could

adversely affect operating facilities; (6) change in public policy on environmental health and safety risk could impose unexpected costs on Fortis; (7) change in regulatory or political climate could impinge on the profitability and the future growth and development of Fortis; (8) the inability to maintain, or to renew, the collective bargaining agreements with unionized workers on acceptable terms could result in increased labour costs or service interruptions arising from labour disputes; (9) challenging economic conditions which may impact demand for products and services, peer group valuation, access to capital and share trading liquidity; (10) Fortis holds investments in commercial real estate and hotel properties which are subject to operating risks associated with the industry; and (11) if the announced increase to the dividend tax credit is not passed into law, it would likely have a material impact on our target price.

Infrastructure -- Utilities**SMALL ONTARIO ACQUISITION AND DEBT ISSUES COMING****Event**

Fortis has agreed to purchase Great Lakes Power Distribution Inc. from Brookfield Renewable Power for \$68 million. The company also announced that it will issue senior unsecured debentures, although terms are not yet known.

Impact

Minimally positive.

Valuation

We are maintaining our C\$29.00 target price and BUY rating. Our target price is derived from a combination of valuation metrics that include earnings and dividend yields relative to long-term interest rates, dividend discount models, and earnings and cash flow multiples relative to both historical valuation and its utility and pipeline peers.

Summary

Fortis announced that its wholly owned subsidiary, FortisOntario, has entered into an agreement to purchase the shares of Great Lakes Power Distribution Inc. from Brookfield Renewable Power Inc. for \$68 million subject to normal closing adjustments. The purchase price is about book value or rate base, and will be under \$30 million once debt is issued to finance approximately 60% of rate base. Consequently, the investment represents only \$0.16 per Fortis share, or <0.7% of market cap, and will contribute around \$0.01 per share. Why make such a small investment? It enhances and expands the company's existing electricity distribution operations in Ontario and makes the company the only investor-held power utility in the province. This may also place it in a stronger position if the government ever eliminates the onerous

municipal electricity utilities transfer tax that has stifled municipal utility sales. Fortis also announced that it has filed a preliminary prospectus in connection with the offering and sale of senior unsecured debentures. The terms and size of the offering are not yet known. The debentures will likely be longer term in nature (10 to 30 years) and the proceeds will be used to repay short-term or maturing debt. Expect another debt issue of around \$40 million to inject debt into the capital structure of Great Lakes Power Distribution after the deal closes. The acquisition is subject to regulatory approval by the Ontario Energy Board and *Competition Act* approval.

Great Lakes Distribution Inc.

- Serves approximately 12,000 customers
- Located in the district of Algoma in northern Ontario
- 1,800 kilometres of distribution lines that cover 14,200 square kilometres
- Meets a peak load of ≈ 40 MW and an annual energy requirement of 198 GWh

Investment risks

Some of the specific risk factors that pertain to the projected 6- to 12-month stock price target for Fortis are as follows: (1) price movement in electricity rates and commodities used for electricity generation could impact profitability; (2) international operations have currency rate exposure and liquidity risks associated with those currencies; (3) credit risk of contract counterparties; (4) debt refinancing at higher interest rates could impact the income of the company; (5) equipment failure or extreme weather conditions could adversely affect operating facilities; (6) change in public policy on environmental health and safety risk could impose unexpected costs on Fortis; (7) change in regulatory or political climate could impinge on the profitability and the future growth and development of Fortis; (8) the inability to maintain, or to renew, the collective bargaining agreements with unionized workers on acceptable terms could result in increased labour costs or service interruptions arising from labour disputes; (9) challenging economic conditions which may impact demand for products and services, peer group valuation, access to capital and share trading liquidity; (10) Fortis holds investments in commercial real estate and hotel properties which are subject to operating risks associated with the industry; and (11) if the announced increase to the dividend tax credit is not passed into law, it would likely have a material impact on our target price.

23 June 2009

- 11 A partner, director, officer, employee or agent of Canaccord Adams and its affiliated companies, or a member of his/her household, is an officer, or director, or serves as an advisor or board member of the relevant issuer and/or one of its subsidiaries, and such person's name is disclosed above.
- 12 As of the month end immediately preceding the date of publication of this investment research, or the prior month end if publication is within 10 days following a month end, Canaccord Adams or its affiliate companies, in the aggregate, beneficially owned 1% or more of any class of the total issued share capital or other common equity securities of the relevant issuer or held any other financial interests in the relevant issuer which are significant in relation to the investment research (as disclosed above).
- 13 As of the month end immediately preceding the date of publication of this investment research, or the prior month end if publication is within 10 days following a month end, the relevant issuer owned 1% or more of any class of the total issued share capital in Canaccord Adams or any of its affiliated companies.
- 14 Other specific disclosures as described above.

Canaccord Adams is the business name used by certain subsidiaries of Canaccord Capital Inc., including Canaccord Adams Inc., Canaccord Adams Limited, and Canaccord Adams, a division of Canaccord Capital Corporation.

The authoring analysts who are responsible for the preparation of this investment research are employed by Canaccord Adams, a securities broker-dealer with principal offices located in Vancouver, Calgary, Toronto, Montreal (all Canada), Boston, New York, San Francisco (all US) and London (UK).

In the event that this is compendium investment research (covering six or more relevant issuers), Canaccord Adams and its affiliated companies may choose to provide specific disclosures of the subject companies by reference, as well as its policies and procedures regarding the dissemination of investment research. To access this material or for more information, please send a request to Canaccord Adams Research, Attn: Disclosures, P.O. Box 10337 Pacific Centre, 2200-609 Granville Street, Vancouver, BC, Canada V7Y 1H2 or disclosures@canaccordadams.com.

The authoring analysts who are responsible for the preparation of this investment research have received (or will receive) compensation based upon (among other factors) the Corporate Finance/Investment Banking revenues and general profits of Canaccord Adams. However, such authoring analysts have not received, and will not receive, compensation that is directly based upon or linked to one or more specific Corporate Finance/Investment Banking activities, or to recommendations contained in the investment research. Canaccord Adams and its affiliated companies may have a Corporate Finance/Investment Banking or other relationship with the company that is the subject of this investment research and may trade in any of the designated investments mentioned herein either for their own account or the accounts of their customers, in good faith or in the normal course of market making. Accordingly, Canaccord Adams or their affiliated companies, principals or employees (other than the authoring analyst(s) who prepared this investment research) may at any time have a long or short position in any such designated investments. Related designated investments or in options, futures or other derivative instruments based thereon. Some regulators require that a firm must establish, implement and make available a policy for managing conflicts of interest arising as a result of publication or distribution of investment research. This investment research has been prepared in accordance with Canaccord Adams' policy on managing conflicts of interest, and information barriers or firewalls have been used where appropriate. Canaccord Adams' policy is available upon request.

The information contained in this investment research has been compiled by Canaccord Adams from sources believed to be reliable, but (with the exception of the information about Canaccord Adams) no representation or warranty, express or implied, is made by Canaccord Adams, its affiliated companies or any other person as to its fairness, accuracy, completeness or correctness. Canaccord Adams has not independently verified the facts, assumptions, and estimates contained herein. All estimates, opinions and other information contained in this investment research constitute Canaccord Adams' judgement as of the date of this investment research, are subject to change without notice and are provided in good faith but without legal responsibility or liability.

Canaccord Adams salespeople, traders, and other professionals may provide oral or written market commentary or trading strategies to our clients and our proprietary trading desk that reflect opinions that are contrary to the opinions expressed in this investment research. Canaccord Adams' affiliates, proprietary trading desk, and investing businesses may make investment decisions that are inconsistent with the recommendations or views expressed in this investment research.

This investment research is provided for information purposes only and does not constitute an offer or solicitation to buy or sell any designated investments discussed herein in any jurisdiction where such offer or solicitation would be prohibited. As a result, the designated investments discussed in this investment research may not be eligible for sale in some jurisdictions. This investment research is not, and under no circumstances should be construed as, a solicitation to act as a securities broker or dealer in any jurisdiction by any person or company that is not legally permitted to carry on the business of a securities broker or dealer in that jurisdiction. This material is prepared for general circulation to clients and does not have regard to the investment objectives, financial situation or particular needs of any particular person. Investors should obtain advice based on their own individual circumstances before making an investment decision. To the fullest extent permitted by law, none of Canaccord Adams, its affiliated companies or any other person accepts any liability whatsoever for any direct or consequential loss arising from or relating to any use of the information contained in this investment research.

- For Canadian Residents:** This Investment Research has been approved by Canaccord Adams, a division of Canaccord Capital Corporation, which accepts responsibility for this Investment Research and its dissemination in Canada. Canadian clients wishing to effect transactions in any Designated Investment discussed should do so through a qualified salesperson of Canaccord Adams, a division of Canaccord Capital Corporation in their particular jurisdiction.
- For United Kingdom Residents:** This investment research complies with the Financial Services Authority's Handbook chapter on Conduct of Business and is approved by Canaccord Adams Limited, which is authorized and regulated by the Financial Services Authority, in connection with its distribution in the United Kingdom. This material is not for distribution in the United Kingdom to retail clients, as defined under the rules of the Financial Services Authority. Canaccord Adams Limited accepts responsibility for this investment research and its dissemination in the United Kingdom. The information contained in this investment research is only intended for distribution in the UK to persons who qualify as professional clients or eligible counterparties, as defined under the rules of the Financial Services Authority.
- For United States Residents:** Canaccord Adams Inc., a US registered broker-dealer, accepts responsibility for this Investment Research and its dissemination in the United States. This Investment Research is intended for distribution in the United States only to certain US institutional investors. US clients wishing to effect transactions in any Designated Investment discussed should do so through a qualified salesperson of Canaccord Adams Inc.
- For European Residents:** If this Investment Research is intended for disclosure in any jurisdiction other than the United Kingdom, the US or Canada, then the relevant rules and regulatory requirements of that jurisdiction will apply.

SHARE PRICE PERFORMANCE:**COMPANY SUMMARY:**

Fortis Inc. is a diversified, international electric utility holding company with assets approaching \$4.5 billion and annual revenues of more than \$1.4 billion. Fortis has holdings in regulated and non-regulated natural gas and electric distribution utilities in Alberta, BC, Newfoundland, PEI, Ontario, New York State, Belize, Turks and Caicos Islands, and Cayman Islands. Fortis also owns and operates hotels and real estate in Canada.

All amounts in C\$ unless otherwise noted.

Infrastructure -- Utilities**ANOTHER GOOD QUARTER****Event**

Fortis released second-quarter recurring earnings per share of \$0.31, modestly ahead of the \$0.27 consensus estimate.

Impact

Neutral.

Valuation

We are maintaining our C\$29.00 target price and BUY rating. Our target price is derived from a combination of valuation metrics that include earnings and dividend yields relative to long-term interest rates, dividend discount models, and earnings and cash flow multiples relative to both historical valuation and its utility and pipeline peers.

Outlook

We are maintaining our 2009 and 2010 EPS estimates of \$1.50 and \$1.60, respectively. Growth will come from about \$1.0 billion/year of capital expenditures over the next five years, with \$4.75 billion of the expected \$5 billion total spending in regulated operations, generating about 7% annual rate base growth. In addition, regulated utilities should benefit from higher regulated returns beginning in 2010, as many provincial regulators are considering changes to their rate making approach. In the first quarter, the National Energy Board set precedence when it issued a decision on TQM Pipeline that moved away from its traditional ROE formula approach based on Government of Canada bond yields to an after-tax weighted average cost of capital approach that recognized higher equity premiums. This is expected to positively impact regulatory methodologies and ROEs at various provincial utilities, though we have added little to our 2010 forecast for improved returns given timing and economic uncertainty.

Canaccord Adams is the global capital markets group of Canaccord Capital Inc. (CCI : TSX|AIM)

The recommendations and opinions expressed in this Investment Research accurately reflect the Investment Analyst's personal, independent and objective views about any and all the Designated Investments and Relevant Issuers discussed herein. For important information, please see the Important Disclosures section in the appendix of this document or visit <http://www.canaccordadams.com/research/Disclosure.htm>.

On the down side, earnings are impacted by the expiry of its non-regulated Ontario generation contract in April and a poor economy that could produce lower earnings at Fortis Properties and slow the growth at its tourism-driven Caribbean operations.

Second-quarter results

Fortis reported second quarter recurring income of \$0.31 per share, versus \$0.22 last year, above the \$0.27 consensus estimate. Generally, we believe the differential is one of quarterly timing and does not impact our 2009 full year estimate. The improvement in earnings over last year was driven mainly by the non-recurrence of a \$13 million regulatory charge in Q2/08 (~\$0.08 per share) and \$5.5 million increase (~\$0.03 per share) in FortisAlberta earnings due mainly to a change in tax strategy. In addition, incremental earnings were delivered at most of the other Canadian regulated operations due to lower interest and tax rates and rate base additions from last year's capital spending. These improvements were partly offset by the expiry of the power-for-water agreement at the Rankine hydro facility which lowered earnings by \$3.4 million. Recurring earnings in the first half of the year was \$0.84 per share versus \$0.80 for the same period last year. For more details on the second quarter results, please refer to Figure 1.

Noteworthy items

- Economy and housing impacts new customer additions at Terasen
 - Net customer losses of 1,200 in Q2/09
- Capital Program
 - Spent \$496 million in H1/09
 - ~\$500 million to be spent in H2/09
 - \$5 billion capital expected to be spent in 2009-2013
 - ~\$3.5 billion at regulated electric utilities
 - ~\$1.25 billion at regulated gas utilities
 - ~\$0.25 billion at non-regulated operations
- Construction costs coming down
 - Okanagan Transmission Reinforcement Project to cost \$110 million versus \$141 million original estimate; 22% lower – labour, equipment, and commodity costs
- Debt issues in Q2 and Q3
 - Fortis Inc. – \$200 million, 6.51%, 30-year debentures in July/09
 - FortisBC - \$105 million, 6.1%, 30-year unsecured debentures in June/09
 - Newfoundland Power – \$65 million, 6.606%, 30-year first mortgage sinking bonds in May/09
 - Caribbean Utilities – US\$30 million 7.5%, 15-year unsecured notes in May/09
- Acquisitions
 - Closed purchase of 10% interest in Grimsby Power in Ontario for \$1 million
 - Agreement to purchase Great Lakes Power Distribution Inc. for \$68 million
- Pension funding costs based on Q1/09 completed actuarial valuations
 - \$22 million in '09, \$18 million in '10, \$6 million in '11, \$2 million in '12

5 August 2009

- Obligations may increase from Dec/09 and Dec/10 actuarial valuations
- Fortis Turks and Caicos
 - Commissioned two diesel generating units, increasing supply by 6 MW or 12.5%
 - Purchase 17.5 MW diesel engines for US\$12 million – April/10 and Jan/11
- Purchased additional 768,200 shares of Caribbean Utilities at a price of US\$8/share
 - Increased ownership to 59.5% from 56.8%

Investment risks

Some of the specific risk factors that pertain to the projected 6- to 12-month stock price target for Fortis are as follows: (1) price movement in electricity rates and commodities used for electricity generation could impact profitability; (2) international operations have currency rate exposure and liquidity risks associated with those currencies; (3) credit risk of contract counterparties; (4) debt refinancing at higher interest rates could impact the income of the company; (5) equipment failure or extreme weather conditions could adversely affect operating facilities; (6) change in public policy on environmental health and safety risk could impose unexpected costs on Fortis; (7) change in regulatory or political climate could impinge on the profitability and the future growth and development of Fortis; (8) the inability to maintain, or to renew, the collective bargaining agreements with unionized workers on acceptable terms could result in increased labour costs or service interruptions arising from labour disputes; (9) challenging economic conditions which may impact demand for products and services, peer group valuation, access to capital and share trading liquidity; (10) Fortis holds investments in commercial real estate and hotel properties which are subject to operating risks associated with the industry; and (11) if the announced increase to the dividend tax credit is not passed into law, it would likely have a material impact on our target price.

APPENDIX: IMPORTANT DISCLOSURES**Analyst Certification:**

Each authoring analyst of Canaccord Adams whose name appears on the front page of this investment research hereby certifies that (i) the recommendations and opinions expressed in this investment research accurately reflect the authoring analyst's personal, independent and objective views about any and all of the designated investments or relevant issuers discussed herein that are within such authoring analyst's coverage universe and (ii) no part of the authoring analyst's compensation was, is, or will be, directly or indirectly, related to the specific recommendations or views expressed by the authoring analyst in the investment research.

- 14 Other specific disclosures as described above.

Canaccord Adams is the business name used by certain subsidiaries of Canaccord Capital Inc., including Canaccord Adams Inc., Canaccord Adams Limited, and Canaccord Adams, a division of Canaccord Capital Corporation.

The authoring analysts who are responsible for the preparation of this investment research are employed by Canaccord Adams, a securities broker-dealer with principal offices located in Vancouver, Calgary, Toronto, Montreal (all Canada), Boston, New York, San Francisco (all US) and London (UK).

In the event that this is compendium investment research (covering six or more relevant issuers), Canaccord Adams and its affiliated companies may choose to provide specific disclosures of the subject companies by reference, as well as its policies and procedures regarding the dissemination of investment research. To access this material or for more information, please send a request to Canaccord Adams Research, Attn: Disclosures, P.O. Box 10337 Pacific Centre, 2200-609 Granville Street, Vancouver, BC, Canada V7Y 1H2 or disclosures@canaccordadams.com.

The authoring analysts who are responsible for the preparation of this investment research have received (or will receive) compensation based upon (among other factors) the Corporate Finance/Investment Banking revenues and general profits of Canaccord Adams. However, such authoring analysts have not received, and

will not receive, compensation that is directly based upon or linked to one or more specific Corporate Finance/Investment Banking activities, or to recommendations contained in the investment research. Canaccord Adams and its affiliated companies may have a Corporate Finance/Investment Banking or other relationship with the company that is the subject of this investment research and may trade in any of the designated investments mentioned herein either for their own account or the accounts of their customers, in good faith or in the normal course of market making. Accordingly, Canaccord Adams or their affiliated companies, principals or employees (other than the authoring analyst(s) who prepared this investment research) may at any time have a long or short position in any such designated investments, Related designated investments or in options, futures or other derivative instruments based thereon.

Some regulators require that a firm must establish, implement and make available a policy for managing conflicts of interest arising as a result of publication or distribution of investment research. This investment research has been prepared in accordance with Canaccord Adams' policy on managing conflicts of interest, and information barriers or firewalls have been used where appropriate. Canaccord Adams' policy is available upon request.

The information contained in this investment research has been compiled by Canaccord Adams from sources believed to be reliable, but (with the exception of the information about Canaccord Adams) no representation or warranty, express or implied, is made by Canaccord Adams, its affiliated companies or any other person as to its fairness, accuracy, completeness or correctness. Canaccord Adams has not independently verified the facts, assumptions, and estimates contained herein. All estimates, opinions and other information contained in this investment research constitute Canaccord Adams' judgement as of the date of this investment research, are subject to change without notice and are provided in good faith but without legal responsibility or liability.

Canaccord Adams salespeople, traders, and other professionals may provide oral or written market commentary or trading strategies to our clients and our proprietary trading desk that reflect opinions that are contrary to the opinions expressed in this investment research. Canaccord Adams' affiliates, proprietary trading desk, and investing businesses may make investment decisions that are inconsistent with the recommendations or views expressed in this investment research.

This investment research is provided for information purposes only and does not constitute an offer or solicitation to buy or sell any designated investments discussed herein in any jurisdiction where such offer or solicitation would be prohibited. As a result, the designated investments discussed in this investment research may not be eligible for sale in some jurisdictions. This investment research is not, and under no circumstances should be construed as, a solicitation to act as a securities broker or dealer in any jurisdiction by any person or company that is not legally permitted to carry on the business of a securities broker or dealer in that jurisdiction. SHARE PRICE PERFORMANCE:**COMPANY SUMMARY:**

Fortis Inc. is a diversified, international electric utility holding company with assets approaching \$4.5 billion and annual revenues of more than \$1.4 billion. Fortis has holdings in regulated and non-regulated natural gas and electric distribution utilities in Alberta, BC, Newfoundland, PEI, Ontario, New York State, Belize, Turks and Caicos Islands, and Cayman Islands. Fortis also owns and operates hotels and real estate in Canada.

All amounts in C\$ unless otherwise noted.

Infrastructure -- Utilities**Q3 IN LINE****Event**

Fortis released third-quarter recurring earnings per share of \$0.21, in line with the consensus estimate.

Impact

Neutral.

Valuation

We are maintaining our C\$29.00 target price and BUY rating. Our target price is derived from a combination of valuation metrics that include earnings and dividend yields relative to long-term interest rates, dividend discount models, and earnings and cash flow multiples relative to both historical valuation and its utility and pipeline peers.

Outlook

We are maintaining our 2009 and 2010 EPS estimates of \$1.50 and \$1.60, respectively. Modest growth largely stems from regulated operations – fuelled by roughly \$1.0 billion/year of planned capital expenditures through 2013 (about 6%-7% annual rate base growth) and higher regulated returns as many regulators consider changes following the National Energy Board's move away from traditional ROE formula approach. While higher returns are expected to flow through to Fortis's earnings, we have not factored this into our 2010 forecast given the uncertainty of the outcome of regulatory decisions and the timing. We expect a less-than-robust economy to impact Fortis Properties on a lag basis and continue to limit growth in the Caribbean, which is impacted by both weak tourism and banking-related businesses.

Canaccord Adams is the global capital markets group of Canaccord Capital Inc. (CCI : TSX|AIM)

The recommendations and opinions expressed in this Investment Research accurately reflect the Investment Analyst's personal, independent and objective views about any and all the Designated Investments and Relevant Issuers discussed herein. For important information, please see the Important Disclosures section in the appendix of this document or visit <http://www.canaccordadams.com/research/Disclosure.htm>.

Third-quarter results

Fortis reported third-quarter recurring income of \$0.21 per share, versus \$0.24 last year, in line with the \$0.21 consensus estimate. Recurring earnings came in \$2 million less than in Q2/08 due mainly to the expiration of an agreement related to the Rankine hydro facility in Ontario. The modest reduction in earnings was exacerbated by an 8% increase in the shares outstanding from the December 2008 common equity issue. Earnings in the Canadian-regulated utility businesses improved modestly due to higher rate bases at Terasen Gas and FortisAlberta. Regulated Caribbean operations were flat over Q3/08, with higher operating expenses and amortization offset by favourable changes in the foreign exchange rate. Fortis Properties delivered flat results as the contribution from the November 2008 addition of Sheraton Hotel Newfoundland and the April 2009 acquisition of the Holiday Inn Select in Ontario was offset by low occupancy in the Hotel division. Recurring earnings for the first nine months of the year was \$1.05 per share versus \$1.04 for the same period last year. For more details on the third-quarter results, please refer to Figure 1.

Noteworthy Items

- Economy and housing continues to impact new customer additions at Terasen
 - Net customer losses of 300 in Q3/09
 - Year-to-date customer additions were 800 versus 5,600 last year
 - Capital Program
 - Spent \$763 million in first nine months of 2009
 - ~\$250 million to be spent in Q4
 - \$5 billion capital expected to be spent in 2009-2013
 - Debt issues in Q3 and Q4
 - FortisAlberta - \$125 million, 5.37%, 30-year unsecured debentures in Oct/09
 - Caribbean Utilities – US\$10 million, 7.5%, 15-year unsecured notes in July/09
 - Fortis Inc. - \$200 million, 6.51%, 30-year debentures in July/09
 - Non-regulated generation
 - 1.5 month maintenance outage at Chalillo hydro facility in Belize in Q3
 - Lower power prices in Q3/09 versus Q3/08
 - Upper New York State: US\$37.52/MWh vs \$77.82
 - No resolution to Newfoundland nationalizing AbitibiBowater's hydro facilities (partially owned by Fortis)
 - Regulatory highlights
 - Review of generic ROE adjustment and deemed equity at Terasen Gas
 - Applying for 11% (now 8.47%) and 40% deemed equity (now 35%)
 - Decision expected late 2009/early 2010
-

5 November 2009

- Review of generic cost of capital by Alberta Utilities Commission
 - Applies to all gas, electric and pipeline utilities (i.e. FortisAlberta)
 - Order expected late 2009
- Newfoundland Power applying for ROE of 11.0% from current 8.95%
- Terasen's estimate to move customer care operation in-house dropped from \$145 million to \$120 million

Investment risks

Some of the specific risk factors that pertain to the projected 6- to 12-month stock price target for Fortis are as follows: (1) price movement in electricity rates and commodities used for electricity generation could impact profitability; (2) international operations have currency rate exposure and liquidity risks associated with those currencies; (3) credit risk of contract counterparties; (4) debt refinancing at higher interest rates could impact the income of the company; (5) equipment failure or extreme weather conditions could adversely affect operating facilities; (6) change in public policy on environmental health and safety risk could impose unexpected costs on Fortis; (7) change in regulatory or political climate could impinge on the profitability and the future growth and development of Fortis; (8) the inability to maintain, or to renew, the collective bargaining agreements with unionized workers on acceptable terms could result in increased labour costs or service interruptions arising from labour disputes; (9) challenging economic conditions which may impact demand for products and services, peer group valuation, access to capital and share trading liquidity; (10) Fortis holds investments in commercial real estate and hotel properties which are subject to operating risks associated with the industry; and (11) if the announced increase to the dividend tax credit is not passed into law, it would likely have a material impact on our target price.

APPENDIX: IMPORTANT DISCLOSURES**Analyst Certification:**

Each authoring analyst of Canaccord Adams whose name appears on the front page of this investment research hereby certifies that (i) the recommendations and opinions expressed in this investment research accurately reflect the authoring analyst's personal, independent and objective views about any and all of the designated investments or relevant issuers discussed herein that are within such authoring analyst's coverage universe and (ii) no part of the authoring analyst's compensation was, is, or will be, directly or indirectly, related to the specific recommendations or views expressed by the authoring analyst in the investment research.

SHARE PRICE PERFORMANCE:**COMPANY SUMMARY:**

Fortis Inc. is a diversified, international electric utility holding company with assets approaching \$4.5 billion and annual revenues of more than \$1.4 billion. Fortis has holdings in regulated and non-regulated natural gas and electric distribution utilities in Alberta, BC, Newfoundland, PEI, Ontario, New York State, Belize, Turks and Caicos Islands, and Cayman Islands. Fortis also owns and operates hotels and real estate in Canada.

All amounts in C\$ unless otherwise noted.

Infrastructure -- Utilities**INTRODUCING 2011 ESTIMATES AND FINE-TUNING TARGET PRICE****Event**

We are introducing our 2011 earnings and cash flow estimates for Fortis Inc. and adjusting our target price to reflect modest adjustments to our outlook for interest rates. In addition, we are moving our 2009 EPS estimate up \$0.03 and our 2010 and 2011 EPS estimates up by \$0.05 to \$1.65 and \$1.75, respectively, to reflect the impact of the recent Alberta Utilities Commission decision to discontinue its annual formula to determine ROEs and increase the deemed equity portion of FortisAlberta to 41% from 37%.

Valuation

We are lowering our target price to \$28.00 from \$29.00 and lowering our rating to HOLD from Buy. Our target price is derived from a combination of valuation metrics that include earnings and dividend yields relative to long-term interest rates, dividend discount models, and earnings and cash flow multiples relative to both historical valuation and its utility and pipeline peers.

Summary

We are introducing our 2011 earnings and cash flow forecasts for the companies and trusts in our coverage area. In addition, we are fine-tuning several of our target prices. In a nutshell, we believe the group is attractive for income-oriented investors, with superior returns possibly available in the less liquid and often overlooked power trust area. It should be noted that a major assumption in our forecasts is that the group will have some of its upside limited by rising interest rates, with rates on Government of Canada bonds with a duration of 10 years and over estimated to rise by over 10%, from about 4.0% now to 4.5%. If rates remain at current levels, targeted total rates of return would be around 10% higher and even more attractive than we are currently forecasting. Improvements in allowed rates of return from the dreadfully low allowed returns currently in place is a distinct possibility, and would improve earnings and returns for investors longer term.

Finance/Investment Banking activities, or to recommendations contained in the investment research. Canaccord Adams and its affiliated companies may have a Corporate Finance/Investment Banking or other relationship with the company that is the subject of this investment research and may trade in any of the designated investments mentioned herein either for their own account or the accounts of their customers, in good faith or in the normal course of market making. Accordingly, Canaccord Adams or their affiliated companies, principals or employees (other than the authoring analyst(s) who prepared this investment research) may at any time have a long or short position in any such designated investments, Related designated investments or in options, futures or other derivative instruments based thereon.

Some regulators require that a firm must establish, implement and make available a policy for managing conflicts of interest arising as a result of publication or distribution of investment research. This investment research has been prepared in accordance with Canaccord Adams' policy on managing conflicts of interest, and information barriers or firewalls have been used where appropriate. Canaccord Adams' policy is available upon request.

The information contained in this investment research has been compiled by Canaccord Adams from sources believed to be reliable, but (with the exception of the information about Canaccord Adams) no representation or warranty, express or implied, is made by Canaccord Adams, its affiliated companies or any other person as to its fairness, accuracy, completeness or correctness. Canaccord Adams has not independently verified the facts, assumptions, and estimates contained herein. All estimates, opinions and other information contained in this investment research constitute Canaccord Adams' judgement as of the date of this investment research, are subject to change without notice and are provided in good faith but without legal responsibility or liability.

Canaccord Adams salespeople, traders, and other professionals may provide oral or written market commentary or trading strategies to our clients and our proprietary trading desk that reflect opinions that are contrary to the opinions expressed in this investment research. Canaccord Adams' affiliates, proprietary trading desk, and investing businesses may make investment decisions that are inconsistent with the recommendations or views expressed in this investment research.

This investment research is provided for information purposes only and does not constitute an offer or solicitation to buy or sell any designated investments discussed herein in any jurisdiction where such offer or solicitation would be prohibited. As a result, the designated investments discussed in this investment research may not be eligible for sale in some jurisdictions. This investment research is not, and under no circumstances should be construed as, a solicitation to act as a securities broker or dealer in any jurisdiction by any person or company that is not legally permitted to carry on the business of a securities broker or dealer in that jurisdiction. This material is prepared for general circulation to clients and does not have regard to the investment objectives, financial situation or particular needs of any particular person. Investors should obtain advice based on their own individual circumstances before making an investment decision. To the fullest extent permitted by law, none of Canaccord Adams, its affiliated companies or any other person accepts any liability whatsoever for any direct or consequential loss arising from or relating to any use of the information contained in this investment research.

For Canadian Residents: This Investment Research has been approved by Canaccord Adams, a division of Canaccord Capital Corporation, which accepts responsibility for this Investment Research and its dissemination in Canada. Canadian clients wishing to effect transactions in any Designated Investment discussed should do so through a qualified salesperson of Canaccord Adams, a division of Canaccord Capital Corporation in their particular jurisdiction.

For United Kingdom Residents: This investment research complies with the Financial Services Authority's Handbook chapter on Conduct of Business and is approved by Canaccord Adams Limited, which is authorized and regulated by the Financial Services Authority, in connection with its distribution in the United Kingdom. This material is not for distribution in the United Kingdom to retail clients, as defined under the rules of the Financial Services Authority. Canaccord Adams Limited accepts responsibility for this investment research and its dissemination in the United Kingdom. The information contained in this investment research is only intended for distribution in the UK to persons who qualify as professional clients or eligible counterparties, as defined under the rules of the Financial Services Authority.

For United States Residents: Canaccord Adams Inc., a US registered broker-dealer, accepts responsibility for this Investment Research and its dissemination in the United States. This Investment Research is intended for distribution in the United States only to certain US institutional investors. US clients wishing to effect transactions in any Designated Investment discussed should do so through a qualified salesperson of Canaccord Adams Inc.

For European Residents: If this Investment Research is intended for disclosure in any jurisdiction other than the United Kingdom, the US or Canada, then the relevant rules and regulatory requirements of that jurisdiction will apply.

SHARE PRICE PERFORMANCE:**COMPANY SUMMARY:**

Fortis Inc. is a diversified, international electric utility holding company with assets approaching \$4.5 billion and annual revenues of more than \$1.4 billion. Fortis has holdings in regulated and non-regulated natural gas and electric distribution utilities in Alberta, BC, Newfoundland, PEI, Ontario, New York State, Belize, Turks and Caicos Islands, and Cayman Islands. Fortis also owns and operates hotels and real estate in Canada.

All amounts in C\$ unless otherwise noted.

Infrastructure -- Utilities**TERASEN RATE SETTLEMENT NOT AS GOOD AS HOPED****Event**

Fortis's Terasen Gas operations received regulatory approval of its settlement rate application for 2010 and 2011.

Impact

Modestly negative. Rates are expected to remain flat in 2010 with a very minor increase in 2011.

Valuation

We are maintaining our \$28.00 target price and HOLD rating. Our target price is derived from a combination of valuation metrics that include earnings and dividend yields relative to long-term interest rates, dividend discount models, and earnings and cash flow multiples relative to both historical valuation and its utility and pipeline peers.

Summary

The British Columbia Utilities Commission (BCUC) issued a decision, approving Terasen Gas Inc. (TGI) and Terasen Gas Vancouver Island's (TGVI's) 2010 and 2011 Negotiated Settlement. The Negotiated Settlement calls for no customer rate increases in 2010 and a 0.8% increase in 2011. The Negotiated Settlement is somewhat disappointing and reflects lower rates than we had assumed. Consequently, we are lowering our 2010 and 2011 EPS estimates by \$0.05 in each year to \$1.60 and \$1.70, respectively. Given the recent settlement and assuming current allowed equity returns and capital structure, we anticipate Fortis could earn around \$1.55 per share in 2010. However, TGI and TGVI have filed cost of capital applications with the BCUC and decisions are expected within the next month. We expect the decisions will be positive

for both deemed equity thickness and allowed ROE, which should help earnings get to \$1.60 or more in 2010 and \$1.70 in 2011. While both TGI and TGVI deserve an allowed return in excess of 9% and 9.5% respectively and higher equity underpinning, the regulator may be reluctant to award higher rates given the current economic climate.

Investment risks

Some of the specific risk factors that pertain to the projected 6- to 12-month stock price target for Fortis are as follows: (1) price movement in electricity rates and commodities used for electricity generation could impact profitability; (2) international operations have currency rate exposure and liquidity risks associated with those currencies; (3) credit risk of contract counterparties could improve or deteriorate; (4) debt refinancing at different interest rates could impact the income of the company; (5) equipment failure or extreme weather conditions could adversely affect operating facilities; (6) change in public policy on environmental health and safety risk could impose unexpected costs on Fortis; (7) change in regulatory or political climate could impact profitability and future growth and development of Fortis; (8) the inability to maintain, or to renew, the collective bargaining agreements with unionized workers on acceptable terms could result in increased labour costs or service interruptions arising from labour disputes; (9) economic conditions which may impact demand for products and services, peer group valuation, access to capital and share trading liquidity; (10) Fortis holds investments in commercial real estate and hotel properties which are subject to operating risks associated with the industry.

APPENDIX: IMPORTANT DISCLOSURES**Analyst Certification:**

Each authoring analyst of Canaccord Adams whose name appears on the front page of this investment research hereby certifies that (i) the recommendations and opinions expressed in this investment research accurately reflect the authoring analyst's personal, independent and objective views about any and all of the designated investments or relevant issuers discussed herein that are within such authoring analyst's coverage universe and (ii) no part of the authoring analyst's compensation was, is, or will be, directly or indirectly, related to the specific recommendations or views expressed by the authoring analyst in the investment research.

Site Visit:

An analyst has visited Fortis's material operations in BC, Alberta, Manitoba, Newfoundland and Grand Cayman. No payment or reimbursement was received from the issuer for related travel costs.
