P/E on 08 EPS	16.2
12-mth return (E)	4.9%

Event

Fortis released its Q4 and '05 earnings on February 7th. EPS for the quarter were \$0.22, comparable to earnings during Q4 '04 of \$0.22.

Quarterly results were slightly better than our expectation of \$0.19, based on a number of small variances in both the regulated and unregulated businesses.

Basic EPS for '05 were \$1.35, up from \$1.07 in '04. The increase during the year is primarily attributable to a full year of contribution from FortisBC and FortisAlberta, higher wholesale energy prices in Ontario, higher equity from Caribbean Utilities and a \$7.9M (after tax) gain in Q2 relating to the Ontario Power Generation Inc. (OPGI) settlement.

Quarterly Highlights

Decreased Earnings from Regulated Canadian Utilities

Earnings from Fortis's regulated Canadian utilities were \$14.7M in the quarter, down \$10.4M from Q4 '04, due primarily to reduced earnings in FortisAlberta and FortisBC.

The decrease in FortisAlberta of \$3.3M, to quarterly earnings of \$4.2M, was due primarily to a one-time adjustment of approximately \$3.0M related to the implementation of the negotiated rate settlement reached in May, and higher operating costs.

FortisBC earned \$5.7M in the quarter, compared to \$11.6M in Q4 '04. The variance is due primarily to a \$3.7M (after-tax) adjustment in '04 relating to unbilled revenue. A \$1.4M increase in operating costs, due to increased customer service and system maintenance, also impacted earnings, as did interest on increased debt to fund capital expansion.

Quarterly earnings in FortisOntario decreased \$0.7M, to \$0.2M, due to an early retirement program and an increase in shared service costs from non-regulated Ontario generation operations.

Significant Earnings Growth from Caribbean Utilities

Equity earnings from Fortis's 39.6% interest in Caribbean Utilities were \$2.8M in the quarter, compared to a loss of \$5.8M in Q4 '04. Hurricane Ivan had a significant impact on earnings in Q4 '04. The loss in the period included uninsured hurricane related costs.

Unregulated Generation Up 81%

Fortis's unregulated generation assets had a strong quarter, with earnings increasing to \$8.5M, compared to \$4.7M in Q4 '04. The majority of the increase was due to higher average wholesale energy prices in Ontario and Upper New York State. The average wholesale energy price in Ontario for the quarter was \$71.46, a 41% increase above the average price in the same period last year. Prices in New York were up 52% in the same period.

Capital Structure at 59% Debt

At the end of Q4 total debt, net of cash, as a percentage of total capital was 58.7%, up from 57.9% at the end of Q3, and improved from 61.4% at the end of Q4 '04. Net debt was increased by approximately \$89M in the period as Fortis continued to invest significant capital in BC and Alberta.

Stable Cash from Operations

Cash generated from operating activities in the quarter, not including changes in non-cash working capital, were relatively stable quarter over quarter, at \$71.4M. Including change in non-cash working capital cash from operations was down \$17.2 in the quarter. The variance was due to higher accounts payable balances at year end '04, due to construction of the Chalillo project and purchased power payments at Belize Electric.

Capital Investment Continues

As noted, Fortis continues to make significant capital expenditures in Alberta and BC. In the quarter \$133.9M was spent on utility capital assets. For the year, Fortis has invested

* Includes operating cash flow before non-cash working capital

\$424.7M on utility capital assets, and another \$83.9M on its income producing properties.

Changes to our Forecast

We have adjusted our annual forecast for '06 and introduced our forecast for '07. Our projected EPS for '06 has decreased slightly to \$1.28 from \$1.32. Overall we expect to see Canadian Utilities to deliver higher earnings in '06, based on expected improvements in Ontario, and increased rate base and GWh sales in BC and Alberta. Modest increases are expected from the Caribbean utilities, as well as through Fortis Properties. The biggest negative variance expected in '06 is through the Company's non-regulated generation. Earnings in '05 were extraordinary, with very high prices for wholesale power in Ontario and an after-tax gain of \$7.3M relating to the settlement with OPGI.

Our targeted EPS in '07 is 1.37, with the most growth expected to come from FortisBC and FortisAlberta, with significant capital spending continuing. FortisOntario is also expected to show improved earnings.

Target Price maintained at \$22.60

We have maintained our 12-month target price of \$22.60. Our valuation is based on an average of four approaches, applied against '06 and '07 projections.

- 1) A dividend yield of 3%, based on a 30% discount to an anticipated 10-year bond rate of 4.30%,
- 2) A P/E ratio of 17 against our EPS forecast of \$1.28 in '06 and 1.37 in '07.
- 3) A P/B multiple of 1.8 on an anticipated book value of equity of \$1.3B and \$1.4B at year end '06 and '07 respectively.
- 4) A dividend discount model using a long term growth rate of 5%.

Conclusion

Fortis's operating earnings are expected to continue to grow in '06 and '07, driven primarily by FortisAlberta and FortisBC. Even with this growth, earnings are expected to decrease in '06 due to some non-operational gains experienced in '05.

Based on the current price of \$22.16, dividends expected over the next year of \$0.65 and our target price of \$22.60 we expect a total return over the next 12 months of approximately 5%. We are maintaining our rating of market perform.

Disclaimer**Analyst Certification**

The Beacon Securities Analyst named on the report hereby certifies that the recommendations and/or opinions expressed herein accurately reflect such research analyst's personal views about the company and securities that are the subject of the report; or any other companies mentioned in the report that are also covered by the named analyst. In addition, no part of the research analyst's compensation is, or will be, directly or indirectly, related to the specific recommendations or views expressed by such research analyst in this report.

The head of Beacon Securities' research department and the CEO of Beacon Securities provide an annual certification that states that analysts are familiar with and complied with AIMR code of ethics and standards of Professional Conduct.

Conflicts of Interest

Beacon Securities' research analysts are compensated from revenues generated by various segments of its business, including Beacon Securities Investment Banking Department. Beacon Securities will disclose if any research analyst involved in the preparation of the research report has received remuneration for any services provided to the securities issuer during the 12 months preceding the date of the publication of the research report.

Beacon will not provide favourable research, a specific rating or a specific price target or delay in changing a rating or price target or threaten to change a rating or price target or threaten to change research, a rating or a price target of an issuer as consideration or inducement for the receipt of business or compensation from an issuer.

Legal Disclosure

All information contained herein has been collected and compiled by Beacon Securities Limited, an independently owned and operated member of the IDA. All facts and statistical data have been obtained or ascertained from sources, which we believe to be reliable, but are not warranted as accurate or complete. Beacon Securities analyst's have visited the head office of this issuer and viewed its operations in a limited context. The issuer did not pay for or reimburse the analysts for the travel expenses associated with the visit.

All projections and estimates are the expressed opinion of Beacon Securities Limited, and are subject to change without notice. Beacon Securities Limited takes no responsibility for any errors or omissions contained herein, and accepts no legal responsibility from any losses resulting from investment decisions based on the content of this report. From time to time, Beacon Securities Limited and/or their directors or employees may hold positions in the securities mentioned, or provide advisory or underwriting services to the companies mentioned herein. Directors or employees of Beacon Securities Limited may serve as directors of any company mentioned herein, or any of their affiliates and subsidiaries.

This report is provided for informational purposes only and does not constitute an offer or solicitation to buy or sell securities discussed herein. Based on their volatility, income structure, or eligibility for sale, the securities mentioned herein may not be suitable or available for all investors in all countries. Any questions and concerns can be directed to Dale Noseworthy, at (902) 422-8138, (888) 565-1981, or dnoseworthy@beaconsecurities.ns.ca.

Rating System

Market Outperform - Total return is expected to be 15% or higher during the next 12 months.

Speculative Buy - Total return is expected to exceed 25% over the next 12 months, however there is some significant risk associated with the assumptions that we are using. May mean some volatility in the shorter term. May also apply to longer term potential (greater than 12-months) for significant increases.

Market Perform - Total 12-month return is expected to be between 0% and 15%.

Market Underperform - Total return is expected to be negative over the next 12 months.

The percentage of its recommendations that fall into each category of their recommended terminology is compiled quarterly, and is also available upon request.

Dissemination

Beacon Securities' policies and procedures regarding the dissemination of research are available upon request.

Valuation Techniques

A combination of valuation methods are used by Beacon Securities' analysts to determine the 12-month target price for issuers; including but not limited to discounted cash flow techniques, historical trading multiples and capitalization rates, and peer average trading multiples and capitalization rates.

Event

Fortis released its Q4 and '05 earnings on February 7th. EPS for the quarter were \$0.22, comparable to earnings during Q4 '04 of \$0.22.

Quarterly results were slightly better than our expectation of \$0.19, based on a number of small variances in both the regulated and unregulated businesses.

Basic EPS for '05 were \$1.35, up from \$1.07 in '04. The increase during the year is primarily attributable to a full year of contribution from FortisBC and FortisAlberta, higher wholesale energy prices in Ontario, higher equity from Caribbean Utilities and a \$7.9M (after tax) gain in Q2 relating to the Ontario Power Generation Inc. (OPGI) settlement.

Quarterly Highlights

Decreased Earnings from Regulated Canadian Utilities

Earnings from Fortis's regulated Canadian utilities were \$14.7M in the quarter, down \$10.4M from Q4 '04, due primarily to reduced earnings in FortisAlberta and FortisBC.

The decrease in FortisAlberta of \$3.3M, to quarterly earnings of \$4.2M, was due primarily to a one-time adjustment of approximately \$3.0M related to the implementation of the negotiated rate settlement reached in May, and higher operating costs.

FortisBC earned \$5.7M in the quarter, compared to \$11.6M in Q4 '04. The variance is due primarily to a \$3.7M (after-tax) adjustment in '04 relating to unbilled revenue. A \$1.4M increase in operating costs, due to increased customer service and system maintenance, also impacted earnings, as did interest on increased debt to fund capital expansion.

Quarterly earnings in FortisOntario decreased \$0.7M, to \$0.2M, due to an early retirement program and an increase in shared service costs from non-regulated Ontario generation operations.

Significant Earnings Growth from Caribbean Utilities

Equity earnings from Fortis's 39.6% interest in Caribbean Utilities were \$2.8M in the quarter, compared to a loss of \$5.8M in Q4 '04. Hurricane Ivan had a significant impact on earnings in Q4 '04. The loss in the period included uninsured hurricane related costs.

Unregulated Generation Up 81%

Fortis's unregulated generation assets had a strong quarter, with earnings increasing to \$8.5M, compared to \$4.7M in Q4 '04. The majority of the increase was due to higher average wholesale energy prices in Ontario and Upper New York State. The average wholesale energy price in Ontario for the quarter was \$71.46, a 41% increase above the average price in the same period last year. Prices in New York were up 52% in the same period.

Capital Structure at 59% Debt

At the end of Q4 total debt, net of cash, as a percentage of total capital was 58.7%, up from 57.9% at the end of Q3, and improved from 61.4% at the end of Q4 '04. Net debt was increased by approximately \$89M in the period as Fortis continued to invest significant capital in BC and Alberta.

Stable Cash from Operations

Cash generated from operating activities in the quarter, not including changes in non-cash working capital, were relatively stable quarter over quarter, at \$71.4M. Including change in non-cash working capital cash from operations was down \$17.2 in the quarter. The variance was due to higher accounts payable balances at year end '04, due to construction of the Chalillo project and purchased power payments at Belize Electric.

Capital Investment Continues

As noted, Fortis continues to make significant capital expenditures in Alberta and BC. In the quarter \$133.9M was spent on utility capital assets. For the year, Fortis has invested

* Includes operating cash flow before non-cash working capital

\$424.7M on utility capital assets, and another \$83.9M on its income producing properties.

Changes to our Forecast

We have adjusted our annual forecast for '06 and introduced our forecast for '07. Our projected EPS for '06 has decreased slightly to \$1.28 from \$1.32. Overall we expect to see Canadian Utilities to deliver higher earnings in '06, based on expected improvements in Ontario, and increased rate base and GWh sales in BC and Alberta. Modest increases are expected from the Caribbean utilities, as well as through Fortis Properties. The biggest negative variance expected in '06 is through the Company's non-regulated generation. Earnings in '05 were extraordinary, with very high prices for wholesale power in Ontario and an after-tax gain of \$7.3M relating to the settlement with OPGI.

Our targeted EPS in '07 is 1.37, with the most growth expected to come from FortisBC and FortisAlberta, with significant capital spending continuing. FortisOntario is also expected to show improved earnings.

Target Price maintained at \$22.60

We have maintained our 12-month target price of \$22.60. Our valuation is based on an average of four approaches, applied against '06 and '07 projections.

- 1) A dividend yield of 3%, based on a 30% discount to an anticipated 10-year bond rate of 4.30%,
- 2) A P/E ratio of 17 against our EPS forecast of \$1.28 in '06 and 1.37 in '07.
- 3) A P/B multiple of 1.8 on an anticipated book value of equity of \$1.3B and \$1.4B at year end '06 and '07 respectively.
- 4) A dividend discount model using a long term growth rate of 5%.

Conclusion

Fortis's operating earnings are expected to continue to grow in '06 and '07, driven primarily by FortisAlberta and FortisBC. Even with this growth, earnings are expected to decrease in '06 due to some non-operational gains experienced in '05.

Based on the current price of \$22.16, dividends expected over the next year of \$0.65 and our target price of \$22.60 we expect a total return over the next 12 months of approximately 5%. We are maintaining our rating of market perform.

CFPS* 07 (E)	\$3.19
P/E on 07 EPS	16.8
P/E on 08 EPS	16.3
12-mth return (E)	8.2%

Event

Fortis released its Q1 earnings on May 1st. EPS for the quarter were \$0.35, comparable to earnings during Q1 '05 of \$0.40.

Earnings in Q1, '05 included an after tax settlement gain of \$7.9M relating to Fortis Ontario. Excluding this gain EPS in Q1 '05 would have been approximately \$0.32.

Results were in line with our expectations.

Quarterly Highlights

Increased Earnings from Regulated Canadian Utilities

Earnings from Fortis's regulated Canadian utilities were \$35.0M in the quarter, up \$2.1M from Q1 '05. The growth was due primarily to increased earnings in FortisAlberta and FortisBC, partially offset by decreased earnings in Newfoundland Power.

FortisAlberta's earnings increased \$1.6M due primarily to increased revenue. Revenue growth came from higher electricity sales and the impact of a 2.1% rate increase in 2005, which did not impact Q1 earnings.

FortisBC earned \$11.3M in the quarter, compared to \$8.5M in Q1 '05. The increase is due primarily to a 5.9% interim rate increase and customer growth.

Newfoundland Power recorded decreased earnings of \$2.3M, or 17.7%, in the first quarter, relating primarily to a change in its revenue recognition policy. Revenue is now recorded on the accrual basis, rather than billed. This change is not expected to have an impact on the Company's annual earnings, but will result in a timing difference on a quarterly basis.

Earnings down Slightly in Caribbean Utilities
Equity earnings from Fortis's 39.6% interest in Caribbean Utilities were \$1.6M in the quarter, compared to \$2.5M in Q1 '05. This decrease was due primarily to timing of previously de-

ferred fuel costs.

Normalized Unregulated Generation Up 157%
Fortis's unregulated generation assets had a strong quarter, with earnings increasing to \$5.4M, compared to \$2.1M in Q1 '05, when adjusted for the one time \$7.9M after-tax Ontario Settlement. The majority of the growth was due to increased production in Belize and New York, and lower operating and financing costs. These improvements were partially offset by lower average wholesale energy prices in Ontario, which were 10% lower than the average price in the same period last year

Decrease in Cash from Operations

Cash generated from operating activities in the quarter, not including changes in non-cash working capital, were stable quarter over quarter, at \$79.6M. Including change in non-cash working capital, cash from operations was down \$30M in the quarter. The variance was due to the timing of income tax installments and general timing of receipt and payment of other working capital items.

Capital Investment Continues

Fortis continues to make significant capital expenditures in Alberta and BC, with \$104.3M spent on utility capital assets in the quarter. Approximately \$80M of this investment was in the West. A total of \$450M is expected to be invested in capital projects this year. This compares with a total of \$424.7M spent in '05.

Forecast for 2006 and 2007

Our projected EPS for '06 and '07 are \$1.28 and \$1.32. Overall we continue to expect to see the Canadian utilities deliver increased earnings in '06, based on expected improvements in Ontario, as well as increased rate base and GWh sales in BC and Alberta. Modest increases are expected from the Caribbean utilities, as well as through Fortis Properties. The biggest negative variance expected in '06 is through the Company's non-regulated generation, due to the \$7.9M after tax settlement in 2005.

* Includes operating cash flow before non-cash working capital

Target Price maintained at \$22.60

We have maintained our 12-month target price of \$22.60. Our valuation is based on an average of four approaches, applied against '06 and '07 projections.

- A dividend yield of 3%, based on a 30% discount to an anticipated 10-year bond rate of 4.30%,
- A P/E ratio of 17 against our EPS forecast of \$1.28 in '06 and 1.32 in '07.
- A P/B multiple of 1.8 on an anticipated book value of equity of \$1.3B and \$1.4B at year end '06 and '07 respectively.
- A dividend discount model using a long term growth rate of 5%.

Conclusion

Fortis's operating earnings are expected to continue to grow in '06 and '07, driven primarily by FortisAlberta and FortisBC.

Even with this growth, earnings are expected to decrease in '06 due to non-operational gains experienced in '05.

Based on the current price of \$21.49, dividends expected over the next year of \$0.65 and our target price of \$22.60 we expect a total return over the next 12 months of approximately 8%. We are maintaining our rating of market perform.

Rating System

Market Outperform - Total return is expected to be 15% or higher during the next 12 months.

Speculative Buy - Total return is expected to exceed 25% over the next 12 months, however there is some significant risk associated with the assumptions that we are using. May mean some volatility in the shorter term. May also apply to longer term potential (greater than 12-months) for significant increases.

Market Perform - Total 12-month return is expected to be between 0% and 15%.

Market Underperform - Total return is expected to be negative over the next 12 months.

The percentage of its recommendations that fall into each category of their recommended terminology is compiled quarterly, and is also available upon request.

Dissemination

Beacon Securities' policies and procedures regarding the dissemination of research are available upon request.

Valuation Techniques

A combination of valuation methods are used by Beacon Securities' analysts to determine the 12-month target price for issuers; including but not limited to discounted cash flow techniques, historical trading multiples and capitalization rates, and peer average trading multiples and capitalization rates.

12-mth return (E)	8.2%

Event

Fortis released its Q1 earnings on May 1st. EPS for the quarter were \$0.35, comparable to earnings during Q1 '05 of \$0.40.

Earnings in Q1, '05 included an after tax settlement gain of \$7.9M relating to Fortis Ontario. Excluding this gain EPS in Q1 '05 would have been approximately \$0.32.

Results were in line with our expectations.

Quarterly Highlights

Increased Earnings from Regulated Canadian Utilities

Earnings from Fortis's regulated Canadian utilities were \$35.0M in the quarter, up \$2.1M from Q1 '05. The growth was due primarily to increased earnings in FortisAlberta and FortisBC, partially offset by decreased earnings in Newfoundland Power.

FortisAlberta's earnings increased \$1.6M due primarily to increased revenue. Revenue growth came from higher electricity sales and the impact of a 2.1% rate increase in 2005, which did not impact Q1 earnings.

FortisBC earned \$11.3M in the quarter, compared to \$8.5M in Q1 '05. The increase is due primarily to a 5.9% interim rate increase and customer growth.

Newfoundland Power recorded decreased earnings of \$2.3M, or 17.7%, in the first quarter, relating primarily to a change in its revenue recognition policy. Revenue is now recorded on the accrual basis, rather than billed. This change is not expected to have an impact on the Company's annual earnings, but will result in a timing difference on a quarterly basis.

Earnings down Slightly in Caribbean Utilities
Equity earnings from Fortis's 39.6% interest in Caribbean Utilities were \$1.6M in the quarter, compared to \$2.5M in Q1 '05. This decrease was due primarily to timing of previously de-

ferred fuel costs.

Normalized Unregulated Generation Up 157%
Fortis's unregulated generation assets had a strong quarter, with earnings increasing to \$5.4M, compared to \$2.1M in Q1 '05, when adjusted for the one time \$7.9M after-tax Ontario Settlement. The majority of the growth was due to increased production in Belize and New York, and lower operating and financing costs. These improvements were partially offset by lower average wholesale energy prices in Ontario, which were 10% lower than the average price in the same period last year

Decrease in Cash from Operations

Cash generated from operating activities in the quarter, not including changes in non-cash working capital, were stable quarter over quarter, at \$79.6M. Including change in non-cash working capital, cash from operations was down \$30M in the quarter. The variance was due to the timing of income tax installments and general timing of receipt and payment of other working capital items.

Capital Investment Continues

Fortis continues to make significant capital expenditures in Alberta and BC, with \$104.3M spent on utility capital assets in the quarter. Approximately \$80M of this investment was in the West. A total of \$450M is expected to be invested in capital projects this year. This compares with a total of \$424.7M spent in '05.

Forecast for 2006 and 2007

Our projected EPS for '06 and '07 are \$1.28 and \$1.32. Overall we continue to expect to see the Canadian utilities deliver increased earnings in '06, based on expected improvements in Ontario, as well as increased rate base and GWh sales in BC and Alberta. Modest increases are expected from the Caribbean utilities, as well as through Fortis Properties. The biggest negative variance expected in '06 is through the Company's non-regulated generation, due to the \$7.9M after tax settlement in 2005.

* Includes operating cash flow before non-cash working capital

Target Price maintained at \$22.60

We have maintained our 12-month target price of \$22.60. Our valuation is based on an average of four approaches, applied against '06 and '07 projections.

- A dividend yield of 3%, based on a 30% discount to an anticipated 10-year bond rate of 4.30%,
- A P/E ratio of 17 against our EPS forecast of \$1.28 in '06 and 1.32 in '07.
- A P/B multiple of 1.8 on an anticipated book value of equity of \$1.3B and \$1.4B at year end '06 and '07 respectively.
- A dividend discount model using a long term growth rate of 5%.

Conclusion

Fortis's operating earnings are expected to continue to grow in '06 and '07, driven primarily by FortisAlberta and FortisBC.

Even with this growth, earnings are expected to decrease in '06 due to non-operational gains experienced in '05.

Based on the current price of \$21.49, dividends expected over the next year of \$0.65 and our target price of \$22.60 we expect a total return over the next 12 months of approximately 8%. We are maintaining our rating of market perform.

FORTIS INC.

Initiating Coverage: Well Positioned for Continued Growth

Summary

- We are initiating coverage on Fortis with a **BUY** rating and a **12-month target price of \$32.00**. Our target price is based on a blend of a 21.0x earnings multiple on our fiscal 2008 EPS estimate of \$1.60, and a 2.9% dividend yield.
- The acquisition of Terasen Gas is unique for Fortis on two fronts: (1) it is the first time Fortis purchased a non-electricity utility, and (2) it is the first time where there is overlap in service territories between two of Fortis' utilities. We believe that these factors have many positive implications for the Company's future growth in both top and bottom lines.
- Fortis' exposure to high growth markets coupled with the acquisition of Terasen Gas will result in continued earnings and dividend growth. Fortis is a very compelling investment at current levels.
- We believe that earnings growth can be driven by the Company's anticipated capex over the next five years of approximately \$2.8 billion. **We contend that capex of this magnitude will fuel its earnings growth even in the absence of additional acquisitions.** Furthermore, given the nature of the industry, this capex provides the potential for growth for the Company even in the event of economic downturns.

Investment Thesis

We are initiating coverage on Fortis with a **BUY rating and a 12-month target price of \$32.00**. Our target price is based on a blend of a 21.0x earnings multiple on our fiscal 2008 EPS estimate of \$1.60, and a 2.9% dividend yield.

Fortis' successful track record of acquiring utility distribution assets across Canada, as well as a select few in the Caribbean, has driven the Company's top and bottom line, which has boosted its stock performance. In addition to yielding a steady and predictable stream of earnings and cash flow, as a utility should, Fortis also affords investors considerable future growth in both stock price and dividends. In fact, over the past five years, Fortis' stock price has appreciated by 135.9%. This represents a CAGR in stock price of 19.0%. During this period, Fortis has increased its quarterly dividend by 62%, which has helped drive its five-year total return of 178.0%, or 23.0% CAGR. In fact, on a total relative return basis, Fortis has outperformed the S&P/TSX Utility index by 42%. What is even more impressive is that Fortis' shares have outperformed the S&P/TSX Composite, which has been driven by the Canadian resources sector, on a total relative return basis by 28.0% over the same time period.

Fortis' impressive growth has been on the back of its acquisition strategy, and has been further fuelled by its expansion into high growth markets in Western Canada, as well as its investments in the Caribbean. With the recent acquisition of Terasen Gas, we expect to see this trend to continue in years to come.

We expect the acquisition of Terasen Gas to be accretive to earnings in the first full year. However, aside from potential synergies with FortisBC, we do not believe that Terasen will be one of the Company's primary catalysts for earnings growth. We do not believe that Terasen Gas will afford growth rates similar to those experienced by FortisAlberta and FortisBC. We contend that higher, as well as more volatile, natural gas prices will dampen new customer growth, as natural gas is losing, and will continue to lose, its competitive pricing relative to other sources of energy. In addition, the trend of multi-family unit contractors installing electricity, as opposed to natural gas, in an effort to reduce building related costs will also act to reduce natural gas penetration in British Columbia.

So, why are we so bullish on this stock and the recent acquisition? **Our enthusiasm is primarily fuelled by the opportunities that the Terasen transaction affords Fortis to expand into a new territory: natural gas distribution. Fortis did not just purchase a prime natural gas distributor; it bought key expertise in natural gas distribution. This expertise will enable Fortis to expand in this industry in the same successful manner it has with its acquired electricity distribution utilities.**

This acquisition has also opened the door to the U.S., and Fortis' management has made it very clear that they are interested in expanding into natural gas distribution in this market. What is especially interesting about the U.S. is that it has several utilities that operate both natural gas and electricity distribution. Acquiring such utilities would enable Fortis to capitalize on its expertise in both areas, as well as benefit from synergies.

Natural Gas distribution aside, Fortis has considerable potential for growth with its electricity distribution utilities. In fact, Fortis anticipates its electric utility capital expenditures over the next five years to equal approximately \$2.8 billion. The majority of these expenditures are to be related to FortisAlberta, FortisBC, and Fortis' regulated and non-regulated electric utilities in the Caribbean. This is significant given that FortisAlberta and FortisBC accounted for 46.8% of the fiscal 2006 consolidated net earnings.

In summary, Fortis is now in a position to expand its regulated utility assets on two fronts: electric distribution and now natural gas distribution. Clearly, Fortis has been very successful with its past acquisitions. Given the similarities between natural gas and electricity distribution, we see no reason to doubt the Company's ability to successfully integrate Terasen, and use it as a platform for future acquisitions. **We feel that Fortis' exposure to high growth markets coupled with the acquisition of Terasen Gas will result in continued earnings and dividend growth. Fortis is a very compelling investment at current levels.**

Company Overview

Fortis Inc. is a diversified, international distribution utility holding company headquartered in St. John's, Newfoundland. It primarily holds regulated distribution utilities in Canada, as well as some regulated utilities in the Caribbean. Fortis also owns and operates non-regulated hydroelectric generation assets and commercial real estate and hotel assets.

Fortis' regulated utilities are domiciled in both Canada and the Caribbean. The Canadian regulated utilities include Terasen Gas, FortisAlberta, FortisBC, Newfoundland Power, Maritime Electric, and FortisOntario. The Company's Caribbean regulated utilities include Belize Electricity (70.1% ownership), Caribbean Utilities, (54% ownership), and Fortis Turks and Caicos (100% ownership).

Table 1: Summary of Fortis Regulated Assets

Company	# of Customers	2006 Gas Volumes(PJ) / Electric Sales(GWh) 2006	2006 Total Assets (Millions)	2006 Capex Program (Millions)	Mid-2007 Rate Base (Millions)	Allowed 2006 ROE ⁴	Allowed 2007 ROE ⁴	2006 Earnings (Millions)

³ Includes Belize Electricity, Caribbean Utilities, and Fortis Turks and Caicos.

⁴ Caribbean regulated utilities' return on assets.

Source: Company reports and Beacon Securities

Fortis' non-regulated assets consist of Fortis Generation and Fortis Properties. Fortis Generation includes generating assets in Belize, Ontario, central Newfoundland, British Columbia, and upper New York State. In aggregate, these assets have a generating capacity of 195 MW, of which 190 MW is hydroelectric generation. Fortis Properties owns and operates 18 hotels with more than 3,200 rooms in seven Canadian provinces, and 2.7 million square feet of commercial real estate in Atlantic Canada.

Strategy

Fortis set out in 1987 with a stated goal of pursuing growth through diversification in regulated utilities by utilizing its financial strength and operational experience in electric utilities. In summary, Fortis' strategy to achieve this goal is to buy regulated utilities, and run them independently. What is interesting about Fortis' approach to acquisitions is that they do not seek to capitalize on operational synergies between its subsidiaries. Each of its regulated assets is run independently. However, in some instances, like in the event where scale results in more favourable procurement, Fortis subsidiaries will work together in order to obtain more beneficial prices.

While running each segment independently may be contrary to intuition, the potential cost savings that could be achieved through a more integrated structure is far outweighed by the advantages of running each of its utilities independently. For one, Fortis subsidiaries are able to maintain their

existing relationships with the respective regulators. We believe that relationships would become more complicated if some of these utilities were to attempt to achieve cost synergies through shared services as it would, in all likelihood, complicate regulatory review processes. In addition, by running the utilities as independent entities, there is no integration risk.

The key to Fortis' success has been its ability to capitalize on its most important resources – operational experience. Senior management are continually rotated throughout the organization in order to share their experience in such areas as dealing with regulatory authorities and cost control, which creates organization-wide best practices. That being said, Fortis never loses sight that some situations require custom solutions. The table below lists some of the current and previous positions held by Fortis senior management as an example of how management is rotated throughout the organization.

Table 2: Management Current and Previous Positions

	Current Position	Previous Position
Stanley Marshall	CEO, Fortis Inc.	VP, Newfoundland Power
Barry Perry	CFO, Fortis Inc.	CFO, Newfoundland Power
Karl Smith	CEO, FortisAlberta	CEO, Newfoundland Power
John Walker	CEO, FortisBC	CEO, Fortis Properties
Earl Ludlow	CEO, Newfoundland Power	CEO, Fortis Properties
Fred O'Brien	CEO, Maritime Electric	VP, FortisOntario
Bill Daley	CEO, FortisOntario	VP, FortisOntario
Nora Duke	CEO, Fortis Properties	VP, Fortis Properties

Source: Company reports and website

In addition to Fortis' practice of rotating management, Fortis benefits from raising equity capital more cost efficiently for its smaller subsidiaries than they would individually.

Company History

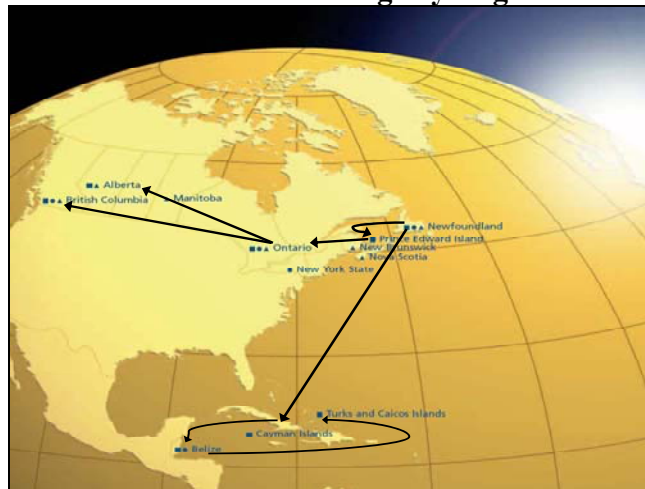

Fortis was derived from Newfoundland Power and formed in 1987. Newfoundland Power, and its predecessor companies, have distributed electricity in Newfoundland since 1885. Newfoundland Power was its sole holding in 1987, and it served as a both a strong financial foundation, and equally important, had strong managerial expertise in operating electric utilities.

Chart 2: Fortis Inc. Holdings by Region

Source: Company reports and Beacon Securities

Fortis' more significant acquisitions include FortisAlberta and FortisBC from Aquila Inc. in 2004, and the most-recent acquisition of Terasen Gas in 2007. The investment in Western Canada permits Fortis to participate in the unprecedented growth in these regions. At the time of the acquisition of FortisAlberta and FortisBC, Fortis saw great potential to improve the operating performance of these assets, but did not expect to see growth of this magnitude. Fortis was able to leverage its expertise in operational efficiency with these assets and improve their profitability.

In addition, Fortis' investment in Belize Electricity in 1999 was a vehicle by which Fortis could test utility waters in the Caribbean region. Although utilities in this region do afford higher allowed return-on-assets than their Canadian counterparts, they also present greater risks than North American based utilities in the form of hurricanes and political risk. Although Fortis has done well with its investments in the Caribbean, the investment in the region is expected to remain a small but valuable part of Fortis' overall business. Fortis remains focused on North America as a vehicle for future growth.

Company Structure and Operating Subsidiaries

The Company operates under two operating segments: (1) Regulated Utility operations, and (2) Non-Regulated Businesses. Regulated utilities account for 86% of total assets as at December 31, 2006. Although non-regulated assets do not generate a significant proportion of the Company's revenues, they do have a meaningful impact on net earnings.

Chart 3: Fortis Operating Segments

Source: Company reports and Beacon Securities

REGULATED UTILITIES

The Regulated Utility segment accounted for approximately 85% of Fortis' 2006 total revenues of \$1.5 billion, and approximately 75% of its earnings from operating segments in 2006. Fortis' Regulated Utility operations are governed by their respective regulators, which set target customer service levels, approve capital expenditure programs, and set bands for allowable rates of returns. In the sections below, we discuss the more relevant regulatory requirements for each subsidiary. In Canada, Fortis operates both gas and electric distribution regulated utilities.

Canadian Regulated Gas Utility

1. Terasen Gas

Fortis' most recent acquisition was Terasen Gas. Fortis paid \$3.7 billion, including the assumption of \$2.3 billion in debt, to Kinder Morgan (KMI-NYSE; Not Rated) for the natural gas distribution assets of Terasen Inc. This transaction, which closed on May 17, 2007, increased Fortis' asset base from approximately \$5.5 billion to \$10 billion, and its regulated assets from \$3.4 billion to \$6.4 billion. This is the largest transaction in Fortis' operating history, and the first time it has invested in a regulated utility other than electricity transmission/distribution.

Fortis paid approximately 1.2x Terasen Gas's estimated mid-2007 rate base of approximately \$2,973 million. The transaction has resulted in regulated utility assets accounting for 92% of the Fortis' total assets, and Regulated utility assets in Canada now account for 84% of total assets. Furthermore, the acquisition of Terasen Gas has resulted in approximately 57% of Fortis' total assets being located in British Columbia.

Terasen Gas is the principal distributor of natural gas in British Columbia, serving 125 communities consisting of 900,000 customers, or 95% of all natural gas users in British Columbia. Terasen Gas owns and operates approximately 44,100 km of natural gas distribution pipeline and 4,300 km of natural gas transmission pipeline.

Chart 4: Terasen Gas Service Territory

Source: Company reports

The operations of Terasen Gas are carried out under three wholly-owned subsidiaries: Terasen Gas Inc., Terasen Gas (Vancouver Island) Inc., and Terasen Gas (Whistler) Inc. In addition, Terasen Gas has a 30% stake in CustomerWorks Ltd, which is a non-regulated service business jointly owned with Enbridge Inc. (ENB-TSX; Not Rated). In the sections below, we provide an overview for each of these gas distribution segments.

Terasen Gas Inc.

Terasen Gas Inc. (TGI) is the largest of the three operating companies within the Terasen Gas segment, with a service area extending from Vancouver to the Fraser Valley. It accounts for approximately 83% of Terasen Gas' assets, and has a rate base of approximately \$2.5 billion. This area has a population base of approximately 4 million people. TGI transports and distributes natural gas to 100 communities consisting of 735,000 residential and 82,000 industrial customers.

TGI typically provides natural gas distribution to residential, small businesses, and industrial heating customers on a non-contract basis, where customers are charged for general services. In contrast, the majority of TGI's larger commercial and industrial customers are serviced under a contractual basis. Under these agreements, customers are able to purchase natural gas from third-parties and TGI charges a service fee for the transportation of gas, a practise known as unbundling. Since TGI virtually passes the cost of natural gas to customers when they purchase natural gas directly, the Company's margins are unaffected. In fact, having a proportion of its customers buying from third-party suppliers as opposed to buying directly from TGI acts to reduce the Companies overall credit risk exposure. Approximately 79,000 of TGI's customers are eligible for unbundling, and approximately 18,700 customers had arranged for their gas from third-parties as at December 31, 2006. This is up considerably from 2,200 at the end of 2005.

Approximately 150 of TGI's industrial customers are on interruptible services, meaning that they can switch from natural gas to an alternative fuel. TGI also holds transmission and distribution agreements for natural gas distribution under statutes and franchise agreements, which grant TGI the right to operate in municipalities and other areas it serves.

Chart 5: Terasen Gas Rate Base

Source: Company reports

TGI is regulated by the British Columbia Utilities Commission (BCUC). TGI's rates are based on a cost-of-service basis, where TGI is allowed to recover the costs associated with providing service, meet its financial obligations, and earn a reasonable return on common equity (ROE).

The allowable ROE for 2007 has been set at 8.37%, and the deemed equity component has been set at 35%. The average rate base for fiscal 2007 is approximately \$2.5 billion, and its approved capex budget for 2007 is \$129.7 million. Approximately 22% of this amount will be spent to support customer growth, and the balance will be used for asset betterment and upgrades. The allowable rate of return is based on a formula that applies a risk premium to an estimate of the Canadian long-term bond yield. The allowable rate of return is reviewed and, if necessary, adjusted annually.

Similar to FortisBC, TGI operates under a performance-based rate (PBR) setting methodology, where it shares improved cost efficiencies with its customers. In 2004, 2005, and 2006, Terasen Gas generated ROEs of 9.34%, 10.78%, and 10.10%, respectively, while the allowable ROEs for these years were 9.15%, 9.03%, and 8.80%, respectively.

Terasen Gas (Vancouver Island) Inc.

Terasen Gas (Vancouver Island) Inc. (TGVI) owns and operates a transmission pipeline from greater Vancouver area across the Georgia Strait to Vancouver Island, and a distribution network on Vancouver Island and along the Sunshine Coast of B.C. These systems have a combined through-put capacity of 144 million cubic feet of natural gas per day, and serves approximately 88,000 customers.

TGVI is a franchise under development, where it is financially supported by the Vancouver Island Natural Gas Pipeline Agreement. Under the agreement, the province of British Columbia provides TGVI with royalty revenues, which covers approximately 20% of the current cost of

service. These payments are intended to assist with competitive rates during franchise development, as TGVI's customer base and revenues are insufficient to cover its cost of service, as well as recover revenue deficiencies from prior years. This support is due to expire at the end of 2011. At that time, TGVI's customers will have to pay the full cost of gas, as well as the recovery of remaining accumulated deficit. Given that industrial gas usage accounts for approximately 65% of the TGVI's throughput, and two-thirds of this is contracted on a year-to-year basis, TGVI is at even greater risk of being unable to recover its costs post-2011. Although the BCUC's rate-setting mechanism sets rates at sufficient levels for TGVI to recover cost of service, rates will be limited by the price of competitive fuels.

Chart 6: Terasen Gas (Vancouver Island) Inc. Rate Base

Source: Company reports

TGVI's approved rate base for 2007 is approximately \$482 million, and its allowable equity component is 40%. Its allowable ROE is currently set at 9.07%.

Terasen Gas (Whistler) Inc.

Terasen Gas (Whistler) Inc. (TGWI) owns and operates two propane distribution centres that services approximately 2,370 residential and commercial customers in Whistler B.C. In addition, TGWI owns and operates two propane storage and vaporization plants, as well as approximately 130 kilometres of pipeline, with annual deliveries of approximately 750,000 gigajoules (GJ) of propane.

In June 2006, TGWI, in conjunction with TGVI, received approval from the BCUC to extend natural gas service to Whistler via a proposed 50 km pipeline lateral from Squamish to Whistler. TGWI will convert its propane distribution system to natural gas. TGWI's average rate base in 2006 was \$16.5 million, and has an allowable equity component of 40%, and has an allowable ROE of 10.0%.

The Merits of the Acquisition

The acquisition of Terasen Gas is unique for Fortis on two fronts: (1) it is the first time Fortis purchased a non-electricity utility, and (2) it is the first time where there is overlap in service territories between two of Fortis' utilities. These factors have many positive implications for the Company's future growth in both top and bottom lines. For top-line growth, gaining expertise in gas distribution opens a new door for future expansion into new markets, like the U.S.

The geographical overlap between Terasen and FortisBC will also enable Fortis to realize synergies in addition to the ones it typically seeks. Synergies will be more attainable because these utilities are both regulated by the BCUC. This will enable Fortis to consolidate some functions, and therefore reduce costs. Consolidation of functions for two or more utilities regulated by different agencies is not an easy task, as each utility typically argues that the other should absorb more costs.

British Columbia Natural Gas Distribution Overview

British Columbia is the third-largest natural gas market in Canada. Industry accounts for the largest proportion of natural gas consumption in British Columbia. In 2003, industry and power generation accounted for 58% of total natural gas consumption. The majority of industrial customers use natural gas for heat and power in the manufacturing process, as well as in manufacturing raw material. The majority of residential and commercial natural gas customers use natural gas for space heating and appliances.

Demand for natural gas typically peaks when the West Coast experiences lower-than-average precipitation, and corresponding low water levels, and when Arctic cold fronts arrive. Lower water levels result in a reduction in hydro generation and a corresponding increase in gas-fired electrical generation.

Higher than historical averages in natural gas prices has resulted in a reduction in residential and commercial gas consumption. These consumers have reduced expenditures in natural gas by conservation or by substituting gas-fired heating furnaces with portable baseboard electrical heaters. The result has been a reduction in demand per household. Furthermore, property developers are installing electric space heaters in new construction in an effort to reduce building costs. This, coupled with consumers' perception that natural gas price volatility poses greater risk of unexpected higher costs, has impeded the penetration of natural gas.

Chart 7: British Columbia Single Detached Residential and Multiple Dwelling Construction

Source: Canadian Mortgage and Housing Corporation

That being said, population growth is a key driver for residential natural gas penetration, and as we discussed in the section above on FortisBC, British Columbia's growth in population is surpassing that of the country. Currently, natural gas accounts for only one-quarter of the British Columbia industrial sector's demand, which leaves potential for growth. The largest users of natural gas in

the province are the pulp and paper, wood product, petroleum refinery and petrochemical industries. Natural gas demand for the industrial sector in the province is correlated with growth in the province's GDP. However, the industrial sector is the most price sensitive market for gas, and therefore, there is potential for future growth to be offset by the continued trend of industrial users of natural gas to seek ways to reduce consumption, as well as looking for alternatives fuels, such as wood waste, hog fuel, coal, and petroleum products.

Canadian Regulated Electric Utilities

Canadian regulated electric utilities accounted for 92% of the Regulated Utility segment's fiscal 2006 revenues of \$1.2 billion, and 87.5% of Regulated Utility operating income. The Canadian Regulated Electric Utilities consist of FortisAlberta, FortisBC, Newfoundland Power, Maritime Electric, and FortisOntario.

Chart 8: Fortis Canadian Regulated Utility 2006 Revenue and Operating Income

Source: Company reports and Beacon Securities

2. FortisAlberta

Fortis Inc. indirectly owns 100% of FortisAlberta's outstanding common shares. Fortis acquired FortisAlberta and FortisBC from Aquila Inc. (ILA-NYSE; Not Rated) in 2004 for total consideration of approximately \$1.5 billion. FortisAlberta operates primarily in rural central and southern Alberta, with a customer base of approximately 430,000 comprised of residential, commercial, farm and industrial customers. Electricity is disseminated via 104,000 km of low-voltage distribution network. As the table below illustrates, Fortis has not only been successful with its integration of FortisAlberta, but has improved its operational efficiency as well.

Chart 9: FortisAlberta's Operating Performance Before and After Fortis Acquisition

Note: Fiscal 2003 excludes \$80 million goodwill write-down

Source: Company reports

FortisAlberta is involved solely in the distribution of electricity and does not own any electrical transmission or generating assets. Therefore, FortisAlberta's entire asset base is regulated. FortisAlberta receives electricity from Alberta's transmission system, or from smaller third-party electricity producers. FortisAlberta distributes this electricity to residential, commercial, and industrial customers. The majority of these customers are located within municipality boundaries, and are serviced directly by the respective municipality, who have franchise agreements with FortisAlberta.

In 2006, the Company invested approximately \$243 million (before customer contributions) to improve service reliability and to meet new load growth. It is interesting to note that FortisAlberta invested approximately \$116 million in projects related to customer growth resulting from oil and gas industry activity, as well as the residential housing boom. In aggregate, FortisAlberta has increased its rate base by approximately from \$611 million from the time it was acquired by Fortis in 2004 to approximately \$939 million today.

Chart 10: FortisAlberta Capex

Source: Company reports

FortisAlberta is regulated by the Alberta Energy and Utilities` Board, with its distribution assets regulated on a cost-of-service basis. Rates are set to cover FortisAlberta's distribution costs and to allow for an approved rate of return on a deemed specified capital structure. This results in FortisAlberta being effectively insulated from volatility in electricity prices. FortisAlberta's regulated capital structure is set at 37% equity, and its allowed ROE for 2006 was 8.93%; however, due to the impact of lower long-term Canadian bond yields on the automatic adjustment formula, the Company's allowed ROE for 2007 has been reduced to 8.51%.

3. FortisBC

FortisBC is an integrated electric utility, which owns and operates hydroelectric generating plants, high voltage transmission lines, and distribution assets located in the southern interior of British Columbia. FortisBC also owns both regulated and non-regulated assets. As we discussed above, Fortis acquired FortisBC, as well as FortisAlberta, from Aquila Inc. in 2004.

Similar to FortisAlberta, Fortis has successfully integrated FortisBC into its portfolio of utilities and improved its operational efficiency.

Chart 11: FortisBC's Operating Performance Before and After Fortis Acquisition

Source: Company reports and Beacon Securities Ltd

In contrast to FortisAlberta, whose customer base is primarily in rural areas, the majority of FortisBC's customer base is primarily located in urban centres. FortisBC serves, both directly and indirectly, 152,000 residential, commercial, wholesale, and industrial customers. Residential Service is the Company's largest customer base, accounting for 41.6% of revenues and 36.8% of electrical sales in 2006. This customer category represents the lower risk of the four categories.

FortisBC serves approximately 102,000 customers in Kelowna, Oliver, Osoyoos, Trail, Castlegar, Creston and Rossland. It serves another 50,000 customers through the wholesale supply of power to municipal distributors in Summerland, Penticton, Kelowna, Grand Forks, and Nelson. As the table below illustrates, these areas have experienced an aggregate population growth level in excess of British Columbia and the Country as a whole.

Table 3: Communities Served by FortisBC

	2006	2001	Change	Private Dwellings
Kelowna ¹	162,276	147,739	9.8%	71,889
Osoyoos	4,752	4,295	10.6%	2,717
Trail	7,237	7,575	-4.5%	3,764
Castlegar	7,259	7,585	-4.3%	3,225
Princeton	2,677	2,610	2.6%	1,366
Rossland	3,278	3,646	-10.1%	1,656
Summerland	10,828	10,723	1.0%	4,726
Penticton	31,909	30,985	3.0%	15,271
Grand Forks	4,036	4,054	-0.4%	1,862
Nelson	9,258	9,318	-0.6%	4,427
Group Total	243,510	228,530	7.1%	110,903
British Columbia	4,113,487	3,907,738	5.3%	1,788,474
Canada	31,612,897	30,007,094	5.4%	

¹ Population for the metropolitan area

Source: Statistics Canada

Implications of British Columbia's population growth are greater for FortisBC than the above table implies, as the Kelowna area accounts for approximately 66% of private dwellings in this area (see Chart below), and has experienced an impressive 9.8% growth in population since 2001.

Chart 12: FortisBC Population Breakdown by Operating Region

Source: Statistics Canada

In addition to FortisBC's contribution to Fortis' overall future organic growth from an increasing population base, the subsidiary is also in the process of investing to improve the reliability of the utility. In aggregate, FortisBC expects to spend approximately \$500 million in capex over the next five years. FortisBC has an approved capital expenditure program for 2007 of \$135.8 million, before customer contributions of \$7.2 million, and \$119.6 million, before customer contributions of \$8.0 million, for 2008

FortisBC's generating assets are comprised of four hydroelectric generating plants with an aggregate capacity of 235 megawatts (MW). This provides approximately 45% of the energy and 30% of FortisBC's capacity requirements. The balance of its requirements is satisfied through long-term power purchase agreements, and requirement short-falls, when they occur, are fulfilled through short-term power purchases. Such short-falls typically occur in the winter and summer peak demand periods, when energy prices hit cyclical highs. These costs are recovered through

customer rates, and FortisBC typically hedges potential exposure to volatility in hydro prices by power purchase contracts prior to the winter months.

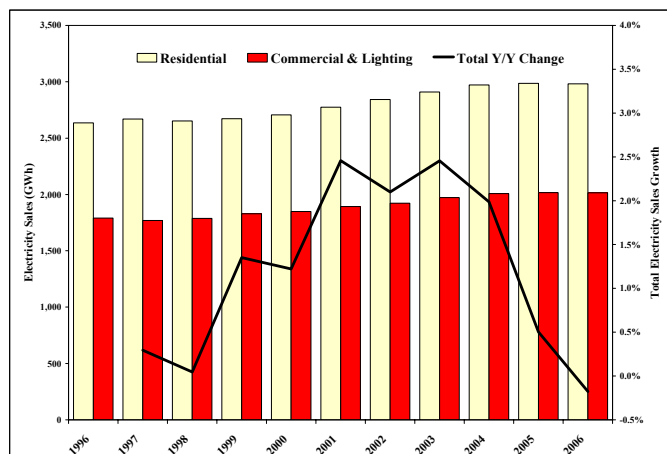

FortisBC is regulated by the BCUC under a performance-based framework (PBR). Under this structure, FortisBC's cost efficiencies/inefficiencies are shared equally between FortisBC and its customers. This is executed by way of a 2% collar around the pre-determined ROE, and any amounts equal to or less than the 2% are split. Therefore, in the event there is a positive variance between the actual financial performance and the allowable rate, both FortisBC and its customers benefit. However, the same scenario holds if there is a negative variance. In the event that the variance exceeds the 2% collar, the excess is placed into a deferral account for review and disposition during the next rate-setting period.

4. Newfoundland Power

Fortis owns 100% of Newfoundland Power's common shares, and 93.7% of the Company's voting rights. Newfoundland Power owns and operates an integrated generation, transmission, and distribution system throughout Newfoundland and Labrador. The Company has approximately 230,000 customers in more than 600 communities, which represents 85% of Province's electricity consumers.

Approximately 85% of Newfoundland Power's customer base is residential, with the balance being commercial. Residential customers account for approximately 58% of revenues. Newfoundland Power is not a significant catalyst for Fortis' future growth. In fact, Newfoundland's population has experienced a 0.47% CAGR over the last four years. In spite of this, electricity sales have experienced a modest CAGR of 1.2% for the past four years, which has been driven equally by both commercial and residential customers.

Chart 13: Newfoundland Power Annual Electricity Sales

Source: Company reports and Beacon Securities

Over the past five years, residential electricity sales have slightly outpaced those of commercial, with an average annual growth rate of 1.4% versus commercial with 1.3%. During this period, residential electricity sales, as a percentage of total electricity sales, have remained consistent at 54.7%. The moderate growth in residential electricity sales has been attributed to many factors, including relatively weak growth in personal disposable income and higher electricity prices which have caused the customer base to conserve electricity usage. These factors have been partially

offset by a strong housing market and higher oil prices. Commercial electricity sales growth has lagged that of residential electricity sales, and has generated growth from the ongoing development of Newfoundland's oil industry.

Newfoundland Power purchases approximately 90% of its electricity requirements from Newfoundland and Labrador Hydro (Crown Corporation). The remaining 10% is generated by 30 small generating stations which are owned by Newfoundland Power.

Newfoundland Power, as well as Newfoundland and Labrador Hydro, is regulated by Newfoundland and Labrador Board of Commissioners of Public Utilities (PUB). Newfoundland Power operates under a cost of service regulation, which allows the Company to set rates that permit it to recover all reasonable and prudent costs associated with providing service and earn a reasonable rate of return on its rate base. The regulated return on equity for 2007 is 8.60% (down from 9.24% in 2006), which equates to a rate of return on rate base of 8.47%, with a range of 8.29% to 8.65%. The Company's equity component of its capital structure must not exceed 45%. The rate of return is adjusted annually, and based on an automatically adjusted formula that is based on Canadian 30-year bond yields. Although the use of this formula stream-lines the rate-setting process, the exposure to interest rates makes the Company's earnings susceptible to greater volatility.

5. Maritime Electric

Maritime Electric is located on Prince Edward Island and serves 71,000 customers, which represents 90% of the Province's electricity consumers. Maritime Electric is involved in electricity generation, transmission, and distribution, although it purchases more than 95% of its energy requirement from New Brunswick Power. The remaining electricity requirement is met by the Company's generation facilities and the purchase of wind energy. Revenues are evenly split between residential and commercial customers, although commercial and industrial customers account for almost 60% of electricity sales.

Maritime Electric is regulated on a cost of service basis, where the utility's basic electricity rates are based on estimated cost of service and allow for a predetermined rate of return on an approved rate base. Maritime Electric's maximum allowed ROE for 2007 is 10.25%, and common equity must be at least 40% of the utility's capital structure.

6. FortisOntario

FortisOntario consists of both regulated and non-regulated assets. Regulated assets are comprised of Canadian Niagara Power and Cornwall Electric.

Table 4: FortisOntario Regulated Utilities

Subsidiary	Service Area	# of Customers	2006 Revenue (%)	2006 GWh Sales (%)
Canadian Niagara Power	Fort Erie	15,400	24.0%	24.7%
	Port Colborne	9,200	15.0%	16.9%
	Gananoque	3,600	6.3%	6.5%
	Sub-Total	28,200	45.3%	48.1%
Cornwall Electric	Cornwall	23,400	54.7%	51.9%
	Total	51,600	100%	100%

Source: Company reports

FortisOntario participates in electricity transmission and distribution through its wholly-owned subsidiaries, Canadian Niagara Power and Cornwall Electric.

- **Canadian Niagara Power Inc.:** Transmits and distributes electricity to customers in Fort Erie, Port Colborne, and Gananoque. It also owns and operates a transmission network that extends from Niagara Falls, Ontario through to Fort Erie connecting with National Grid's transmission system in Buffalo, New York through an international inter-tie running between Fort Erie and Buffalo.
- **Cornwall Electric:** Provides utility services to Cornwall, South Glengarry, South Stormont, and the Ontario portion of the Mohawk Territory of Akwesasne.

Caribbean Regulated Utilities

Fortis first entered the Caribbean in 1999 when it purchased 67% of Belize Electricity. Fortis now has ownership in three utilities in the Caribbean: Belize Electricity (70.1% ownership), Caribbean Utilities (54% ownership), and Fortis Turks and Caicos (100% ownership). Although these assets have yielded strong returns, Fortis' primary focus for future growth is on North America.

7. Belize Electricity

Belize Electric is the primary distributor of electricity in Belize, Central America and serves more than 71,000 customers. Fortis has a 70.1% controlling interest in Belize Electricity. It acquires its electricity from multiple sources, including Fortis wholly-owned subsidiary, Belize Electric Company Limited ("BECOL"), Comisión Federal de Electricidad, as well as from its own diesel-fired and gas-turbine generation. Belize Electricity has experienced annual energy demand growth of approximately 3% to 7% over the past three years.

Belize Electricity is regulated by the Public Utilities Commission. The basic electricity rates are determined by value-added delivery ("VAD"), and cost of fuel and purchased power ("COP"). The VAD component permits the Company to recover operating expenses, transmission and distribution expenses, taxes, amortization and earn a rate of return on regulated asset base in the range of 10.0% to 15.0%. The COP includes the variable cost of generation, which is a flow-through in customer rates.

8. Caribbean Utilities

Caribbean Utilities (CUP.U-TSX; Not Rated) is a publicly traded utility located on Grand Cayman, Cayman Islands. It generates, transmits, and distributes electricity to more than 22,000 customers. Fortis recently became the controlling shareholder of Caribbean Utilities after increasing its ownership to approximately 54%. As a result, Fortis is consolidating Caribbean Utilities' financial statements on a two two-month lag basis. Caribbean Utilities anticipates capital expenditures of approximately US\$33 million in fiscal 2008, and US\$190 million over the next five years, which is expected to be fuelled by customer growth.

Caribbean Utilities operates under a 25-year exclusive licence with the Government of the Cayman Islands, which expires in 2011, or until replaced with a new license by mutual agreement. The utility is entitled to earn a 15% rate of return on its rate base.

9. Fortis Turks and Caicos

Fortis Turks and Caicos consists of two electric utilities acquired in 2006: (1) P.P.C. Limited, and (2) Atlantic Equipment & Power (Turks and Caicos) Ltd. for aggregate consideration of approximately US\$90 million. Fortis Turks and Caicos is the primary electricity distributor in the Turks and Caicos Islands pursuant to 50-year licences that expire in 2036 and 2037. The utility serves approximately 7,700 customers, which represents approximately 80% of the electricity customers in the Turks and Caicos Islands.

During 2006, residential customers accounted for 36.6% of revenues and 33.6% of electricity sales, while commercial customers account for 62.2% of revenues and 65.2% of electricity sales. This utility has experienced considerable growth, which has been on the back of tourism and condominium and hotel development. In fact, energy sales on Providenciales, where the majority

(approximately 75%) of customers reside, have increased, on average, 15% annually for the last 12 years. In addition to growth resulting from tourism, utility sales in 2006 increased because of a high level of government-funded public works initiatives. The Company has a combined diesel-fired generating capacity of approximately 37 MW and met a combined peak demand of 25 MW in 2006. The Government of Turks and Caicos is the regulator for Fortis Turks and Caicos, and rates are set to yield a 17.5% return on a calculated rate base.

NON-REGULATED BUSINESSES

Fortis' non-regulated assets, which primarily consist of non-core properties and electric hydro generation facilities, accounted for approximately 14% of the Company's total assets as at December 31, 2006, and approximately 25% of total operating earnings during 2006. As the table below illustrates, the non-regulated segments do not account for a significant proportion of total assets, but did generate approximately 16% of total revenues in 2006.

Table 5: Fortis Non-Regulated Assets as a Percentage of Company Total

(Excluding Corporate and including Inter-segment)		
Generation	<u>2005</u>	<u>2006</u>
Total Revenue	5%	5%
Operating Earnings	18%	15%
Total Assets	6%	5%
Properties		
Total Revenue	11%	11%
Operating Earnings	8%	10%
Total Assets	9%	9%

Source: Company reports

10. Fortis Generation

Fortis Generation consists of non-regulated generation assets in Belize, Ontario, central Newfoundland, British Columbia, and upper New York state. In aggregate, these assets have a generating capacity of 195 MW. Approximately 190 MW, or 97.4%, of this capacity is hydroelectric generation.

Belize: BECOL owns and operates the 25 MW Mollejon and 7 MW Chalillo hydroelectric facilities, located on the Macal River in Belize. BECOL sells its entire output to Belize Electricity under a 50-year power purchase agreement.

Ontario: Non-regulated operations in Ontario include 75 MW of water-right entitlement associated with the Niagara Exchange Agreement, a 5 MW gas-fired cogeneration plant in Cornwall and six small hydroelectric generating stations in eastern Ontario with a combined capacity of 8 MW. With the exception of the cogeneration plant in Cornwall, the electricity produced from these facilities is sold in the Ontario market.

Central Newfoundland: Fortis indirectly holds a 51% interest in the Exploits River Hydro Partnership with Abitibi-Consolidated Company of Canada (A-TSX; Not Rated). The Exploits River Hydro Partnership achieved record annual energy sales of 168 GWh in 2006. Abitibi-

Consolidated uses generation, and additional produced energy is sold to Newfoundland Hydro under a 30-year power purchase agreement.

British Columbia: Fortis' non-regulated generating asset in British Columbia is a 16-MW run-of-river Walden hydroelectric generating plant near Lillooet, which was acquired in May 2004 as part of the assets of FortisBC. The plant sells its entire output to BC Hydro under a long-term contract.

Upper New York State: Fortis owns four non-regulated hydroelectric generating stations located in upper New York State. These plants have an aggregate capacity of approximately 23 MW, with an average annual energy output of 85 GWh that is sold at wholesale through contracts.

11. Fortis Properties

Fortis Properties owns and operates 18 hotels, consisting of approximately 3,200 rooms, in seven Canadian provinces. In addition, Fortis Properties owns 2.7 million square feet of commercial real estate in Atlantic Canada. Revenue per Available Room in 2006 increased from \$70.95 in 2005 to \$72.67, which was on the back of increases in both average occupancy and average daily room rates.

The 2006 occupancy rate in the real estate division of 94.9% at December 31, 2006 declined 100 basis points from December 31, 2005, but still outpaced the national rate of 92.3%.

Source: Company reports

The investment in non-core properties was originally made in order to capitalize on tax credits that arose from acquisition. For the most part, a utility can only recover interest expenses from debt used to finance an acquisition equal-to or less-than the allowable proportion of the book value of the purchased assets. **However, this interest provides a tax shield if it can be applied to revenues. Investing in properties has provided such a revenue stream.**

Financials and Past Performance

Fortis has exhibited outstanding growth in its assets, revenues, and net earnings over its operating history, which has supported its significant dividend growth over the same period. Since 1999, Fortis has increased its utility capital assets and income producing properties by a CAGR of 50.7%, while increasing its revenue and net income by a CAGR of 16.5% and 26.0%, respectively, over the same period.

Chart 14: Fortis Sales, Net Income, and Fixed Assets Growth

Source: Company reports

Over this period, Fortis has increased its dividends (declared) by 48.0%, with a CAGR of 5.8%. The growth in dividends has been on the back of higher earnings fuelled by acquisition. In fact, during this period, Fortis' dividend payout ratio has declined by 41.6 percentage points to 47.2%. The decline in dividends as a percentage of earnings has, as one would expect, been the result of using a proportion of internally generated funds to finance its aggressive acquisition strategy. Obviously, from the Company's past performance, this was a good use of these funds.

Chart 15: Fortis Dividends Paid per Common Share Growth

Source: Company reports

Chart 16: Fortis Inc. Dividend Pay-out Ratio

Source: Company reports

Although investors seeking exposure to utilities typically prefer relatively higher dividend payout ratios, it is interesting to note that even though Fortis has retained a higher percentage of its earnings, it has still been able to increase dividends on the back of higher dollar earnings, which has been driven by accretive acquisitions and an improving profit margin.

Chart 17: Earnings Growth and Profit Margin

Source: Company reports

In addition, Fortis' ownership of non-regulated utilities and income producing properties, has also benefited the Company's earning profile.

Outlook and Financial Forecast

We are expecting Fortis to generate fiscal 2007 and 2008 EPS of \$1.47 and \$1.60, respectively. For regulated utilities, our fiscal 2007 and 2008 estimates are based on respective allowed ROEs, approved capital expenditures.

With bond yields on the decline, there is potential for Fortis' earnings growth to stall over the next year. This is because Fortis' regulated utilities are governed under cost recovery regulations, where they are permitted to earn a pre-determined ROE on a specified equity proportion. The majority of Fortis' regulated utilities, which include FortisAlberta, FortisBC, and Newfoundland Power, allowable ROEs are tied to the Canadian long-term bond yield, and the recent decline in bond yields has resulted in a reduction in the ROEs for these utilities. In fact, the allowable ROE for FortisAlberta, FortisBC, and Newfoundland Power have decreased by an average 50 basis points, as illustrated in the table below.

Table 8: Change in Allowed Return on Common Equity

	FortisAlberta	FortisBC	Newfoundland Power	Average	Change
Previous	8.93%	9.20%	9.24%	9.12%	
Current	8.51%	8.77%	8.60%	8.63%	49.7 bps

Source: Company reports

The average 50 basis point decline in allowed ROEs has considerable potential to adversely impact Fortis' trend in growing earnings, as these three utilities accounted for 78% of the Canadian Regulated Utilities 2006 revenues and 88% of net earnings. That being said, the decline in allowable ROEs will likely be offset by the planned capex for 2007 which will increase the rate base.

Chart 18: Fiscal 2007 Forecasted Capital Expenditures (Millions)

Source: Company reports

While Newfoundland Power does have a modest 2007 capex budget of \$66.0 million, it will be primarily allocated towards equipment replacement and electricity system betterment. In contrast, FortisAlberta and FortisBC have considerable capital expenditure budgets for customer growth, in addition to capital expenditures pertaining to asset replacement/upgrade. This is the result of exceptional growth in both population and GDP, which have outpaced the national rates. In fact, Alberta and British Columbia in aggregate, account for approximately 81% Canadian Regulated Utilities forecasted capital expenditures for 2007.

Fortis' exposure to these two high growth markets is compounded with the acquisition of Terasen Gas. As discussed in the sections above, natural gas distribution is likely to experience healthy penetration rates in British Columbia, as it is largely driven by British Columbia's GDP and population growth rates. However, the trend of contractors installing electricity as opposed to natural gas in multi-family units does present a hindrance. But more importantly, the Terasen acquisition opens two unique opportunities for Fortis. The first being a strong and established foothold in natural gas distribution, which is a new catalyst for growth. The second is the opportunity to capitalize on cost-sharing that result from operating two utilities that are governed by the same regulatory body.

Over the next five years, we believe that earnings growth can be driven by the Company's anticipated capex of approximately \$2.8 billion. We contend that capex of this magnitude is equal to purchasing a \$2.8 billion utility, and that even if Fortis does not pursue another acquisition over this period, its rate base will expand as if it had. Furthermore, given the nature of the industry, this capex provides the potential for growth for the Company even in the event of economic downturns.

Valuation and Recommendation

Fortis shares are currently trading at 19.2x on our fiscal 2007 EPS estimate of \$1.44, and 17.9x on fiscal 2008 estimate of \$1.55. Since the Terasen transaction closed on May 17, 2007, the fiscal 2008 EPS estimate is more relevant from an earnings multiple perspective, as it includes Terasen's contribution for a full year. As illustrated in the chart below, Fortis' shares have consistently commanded a higher multiple since 2002.

Chart 19: Fortis Inc. Historical CFY P/E Multiple

Source: Bloomberg, Thomson One Analytic, and Beacon Securities

Since Fortis announced the Terasen acquisition on February 26, 2007, its shares have traded at an average of 19.5x on fiscal 2007 EPS, and 18.2x on fiscal 2008 EPS. Before the announcement, Fortis stock traded at an average multiple of 19.0x on fiscal 2007 EPS, and 18.3x on fiscal 2008 EPS. Surprisingly, the Terasen acquisition has not managed to expand Fortis' current fiscal year earnings multiple. Although the stock has recovered nicely following the issue of 38.5 million subscription receipts (plus approximately 5.8 million in over-allotment) at \$26.00 (each receipt equalling one common share), its earning multiple has remained virtually flat.

This is despite the fact that, through the acquisition of Terasen, Fortis has purchased a shiny new vehicle for future growth. What's more is that this acquisition is very appealing from a risk perspective. Terasen is a high quality, well run asset. It is regulated by the BCUC, the same regulatory agency that governs FortisBC, and natural gas distribution is probably the most similar utility to electricity distribution. Furthermore, with Terasen, 92% of Fortis' total assets will be regulated utilities versus 86% pre-Terasen. This reduces the Company's overall risk profile significantly.

We must also keep in mind that Fortis' operational history and strong relationships with regulators amplifies the Company's potential for expansion into the U.S. in natural gas distribution. We believe that these factors give Fortis a competitive advantage over potential competing bidders for these assets. With these factors in mind, we believe that Fortis' shares should trade at a premium multiple relative to their historic and current levels.

We are assigning a 21.0x target multiple, which, when applied to our fiscal 2008 EPS estimate of \$1.60, yields a 12-month target price of \$32.00. We are expecting Fortis to increase its dividend

by 10% to \$0.77 later this year. Our target indicated dividend yield is 2.9%, which is consistent with the average for the past three years.

Chart 20: Fortis Inc. Historical Dividend Yield

Source: Bloomberg and Beacon Securities

Although there is potential for the yield to decline from price appreciation due to the flow of capital into non-cyclical stocks in the event that the Canadian markets, eventually, experience a decline, we have not built any such assumptions into our valuation. Our target yield of 2.9% coupled with of fiscal 2007 dividend estimate of \$0.75 generates a target price of \$27.00.

We believe that the target price based on earnings multiple should carry greater weight, given the reduction in volatility that we expect Fortis' earnings to display resulting from a higher proportion of regulated utilities within its portfolio. Our 12-month target price is \$32.00. Including the Company's annualized dividend of \$0.77, we are looking for a total return of 14%. **We are initiating coverage on Fortis with a BUY rating.**

Beacon Securities Analysts may beneficially own the Company's securities.

FORTIS INC.

Initiating Coverage: Well Positioned for Continued Growth

Summary

- We are initiating coverage on Fortis with a **BUY** rating and a **12-month target price of \$32.00**. Our target price is based on a blend of a 21.0x earnings multiple on our fiscal 2008 EPS estimate of \$1.60, and a 2.9% dividend yield.
- The acquisition of Terasen Gas is unique for Fortis on two fronts: (1) it is the first time Fortis purchased a non-electricity utility, and (2) it is the first time where there is overlap in service territories between two of Fortis' utilities. We believe that these factors have many positive implications for the Company's future growth in both top and bottom lines.
- Fortis' exposure to high growth markets coupled with the acquisition of Terasen Gas will result in continued earnings and dividend growth. Fortis is a very compelling investment at current levels.
- We believe that earnings growth can be driven by the Company's anticipated capex over the next five years of approximately \$2.8 billion. **We contend that capex of this magnitude will fuel its earnings growth even in the absence of additional acquisitions.** Furthermore, given the nature of the industry, this capex provides the potential for growth for the Company even in the event of economic downturns.

Investment Thesis

We are initiating coverage on Fortis with a **BUY rating and a 12-month target price of \$32.00**. Our target price is based on a blend of a 21.0x earnings multiple on our fiscal 2008 EPS estimate of \$1.60, and a 2.9% dividend yield.

Fortis' successful track record of acquiring utility distribution assets across Canada, as well as a select few in the Caribbean, has driven the Company's top and bottom line, which has boosted its stock performance. In addition to yielding a steady and predictable stream of earnings and cash flow, as a utility should, Fortis also affords investors considerable future growth in both stock price and dividends. In fact, over the past five years, Fortis' stock price has appreciated by 135.9%. This represents a CAGR in stock price of 19.0%. During this period, Fortis has increased its quarterly dividend by 62%, which has helped drive its five-year total return of 178.0%, or 23.0% CAGR. In fact, on a total relative return basis, Fortis has outperformed the S&P/TSX Utility index by 42%. What is even more impressive is that Fortis' shares have outperformed the S&P/TSX Composite, which has been driven by the Canadian resources sector, on a total relative return basis by 28.0% over the same time period.

Fortis' impressive growth has been on the back of its acquisition strategy, and has been further fuelled by its expansion into high growth markets in Western Canada, as well as its investments in the Caribbean. With the recent acquisition of Terasen Gas, we expect to see this trend to continue in years to come.

We expect the acquisition of Terasen Gas to be accretive to earnings in the first full year. However, aside from potential synergies with FortisBC, we do not believe that Terasen will be one of the Company's primary catalysts for earnings growth. We do not believe that Terasen Gas will afford growth rates similar to those experienced by FortisAlberta and FortisBC. We contend that higher, as well as more volatile, natural gas prices will dampen new customer growth, as natural gas is losing, and will continue to lose, its competitive pricing relative to other sources of energy. In addition, the trend of multi-family unit contractors installing electricity, as opposed to natural gas, in an effort to reduce building related costs will also act to reduce natural gas penetration in British Columbia.

So, why are we so bullish on this stock and the recent acquisition? **Our enthusiasm is primarily fuelled by the opportunities that the Terasen transaction affords Fortis to expand into a new territory: natural gas distribution. Fortis did not just purchase a prime natural gas distributor; it bought key expertise in natural gas distribution. This expertise will enable Fortis to expand in this industry in the same successful manner it has with its acquired electricity distribution utilities.**

This acquisition has also opened the door to the U.S., and Fortis' management has made it very clear that they are interested in expanding into natural gas distribution in this market. What is especially interesting about the U.S. is that it has several utilities that operate both natural gas and electricity distribution. Acquiring such utilities would enable Fortis to capitalize on its expertise in both areas, as well as benefit from synergies.

Natural Gas distribution aside, Fortis has considerable potential for growth with its electricity distribution utilities. In fact, Fortis anticipates its electric utility capital expenditures over the next five years to equal approximately \$2.8 billion. The majority of these expenditures are to be related to FortisAlberta, FortisBC, and Fortis' regulated and non-regulated electric utilities in the Caribbean. This is significant given that FortisAlberta and FortisBC accounted for 46.8% of the fiscal 2006 consolidated net earnings.

In summary, Fortis is now in a position to expand its regulated utility assets on two fronts: electric distribution and now natural gas distribution. Clearly, Fortis has been very successful with its past acquisitions. Given the similarities between natural gas and electricity distribution, we see no reason to doubt the Company's ability to successfully integrate Terasen, and use it as a platform for future acquisitions. **We feel that Fortis' exposure to high growth markets coupled with the acquisition of Terasen Gas will result in continued earnings and dividend growth. Fortis is a very compelling investment at current levels.**

Company Overview

Fortis Inc. is a diversified, international distribution utility holding company headquartered in St. John's, Newfoundland. It primarily holds regulated distribution utilities in Canada, as well as some regulated utilities in the Caribbean. Fortis also owns and operates non-regulated hydroelectric generation assets and commercial real estate and hotel assets.

Fortis' regulated utilities are domiciled in both Canada and the Caribbean. The Canadian regulated utilities include Terasen Gas, FortisAlberta, FortisBC, Newfoundland Power, Maritime Electric, and FortisOntario. The Company's Caribbean regulated utilities include Belize Electricity (70.1% ownership), Caribbean Utilities, (54% ownership), and Fortis Turks and Caicos (100% ownership).

Table 1: Summary of Fortis Regulated Assets

Source: Company reports and Beacon Securities

Fortis' non-regulated assets consist of Fortis Generation and Fortis Properties. Fortis Generation includes generating assets in Belize, Ontario, central Newfoundland, British Columbia, and upper New York State. In aggregate, these assets have a generating capacity of 195 MW, of which 190 MW is hydroelectric generation. Fortis Properties owns and operates 18 hotels with more than 3,200 rooms in seven Canadian provinces, and 2.7 million square feet of commercial real estate in Atlantic Canada.

Strategy

Fortis set out in 1987 with a stated goal of pursuing growth through diversification in regulated utilities by utilizing its financial strength and operational experience in electric utilities. In summary, Fortis' strategy to achieve this goal is to buy regulated utilities, and run them independently. What is interesting about Fortis' approach to acquisitions is that they do not seek to capitalize on operational synergies between its subsidiaries. Each of its regulated assets is run independently. However, in some instances, like in the event where scale results in more favourable procurement, Fortis subsidiaries will work together in order to obtain more beneficial prices.

While running each segment independently may be contrary to intuition, the potential cost savings that could be achieved through a more integrated structure is far outweighed by the advantages of running each of its utilities independently. For one, Fortis subsidiaries are able to maintain their

existing relationships with the respective regulators. We believe that relationships would become more complicated if some of these utilities were to attempt to achieve cost synergies through shared services as it would, in all likelihood, complicate regulatory review processes. In addition, by running the utilities as independent entities, there is no integration risk.

The key to Fortis' success has been its ability to capitalize on its most important resources – operational experience. Senior management are continually rotated throughout the organization in order to share their experience in such areas as dealing with regulatory authorities and cost control, which creates organization-wide best practices. That being said, Fortis never loses sight that some situations require custom solutions. The table below lists some of the current and previous positions held by Fortis senior management as an example of how management is rotated throughout the organization.

Table 2: Management Current and Previous Positions

	Current Position	Previous Position
Stanley Marshall	CEO, Fortis Inc.	VP, Newfoundland Power
Barry Perry	CFO, Fortis Inc.	CFO, Newfoundland Power
Karl Smith	CEO, FortisAlberta	CEO, Newfoundland Power
John Walker	CEO, FortisBC	CEO, Fortis Properties
Earl Ludlow	CEO, Newfoundland Power	CEO, Fortis Properties
Fred O'Brien	CEO, Maritime Electric	VP, FortisOntario
Bill Daley	CEO, FortisOntario	VP, FortisOntario
Nora Duke	CEO, Fortis Properties	VP, Fortis Properties

Source: Company reports and website

In addition to Fortis' practice of rotating management, Fortis benefits from raising equity capital more cost efficiently for its smaller subsidiaries than they would individually.

Company History

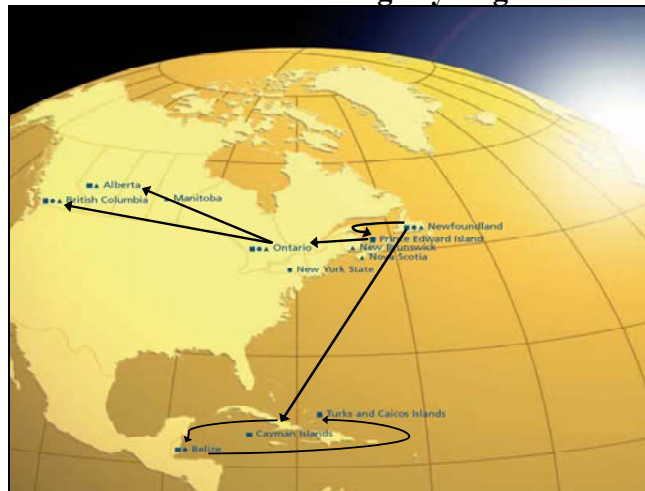

Fortis was derived from Newfoundland Power and formed in 1987. Newfoundland Power, and its predecessor companies, have distributed electricity in Newfoundland since 1885. Newfoundland Power was its sole holding in 1987, and it served as a both a strong financial foundation, and equally important, had strong managerial expertise in operating electric utilities.

Source: Company reports and Beacon Securities

Chart 2: Fortis Inc. Holdings by Region

Source: Company reports and Beacon Securities

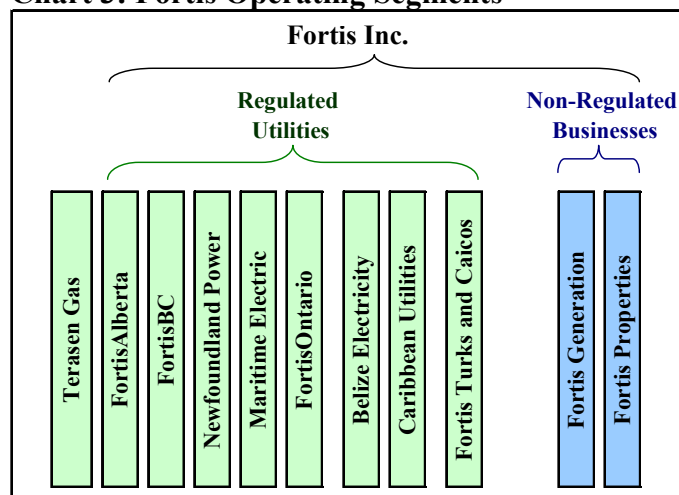

Fortis' more significant acquisitions include FortisAlberta and FortisBC from Aquila Inc. in 2004, and the most-recent acquisition of Terasen Gas in 2007. The investment in Western Canada permits Fortis to participate in the unprecedented growth in these regions. At the time of the acquisition of FortisAlberta and FortisBC, Fortis saw great potential to improve the operating performance of these assets, but did not expect to see growth of this magnitude. Fortis was able to leverage its expertise in operational efficiency with these assets and improve their profitability.

In addition, Fortis' investment in Belize Electricity in 1999 was a vehicle by which Fortis could test utility waters in the Caribbean region. Although utilities in this region do afford higher allowed return-on-assets than their Canadian counterparts, they also present greater risks than North American based utilities in the form of hurricanes and political risk. Although Fortis has done well with its investments in the Caribbean, the investment in the region is expected to remain a small but valuable part of Fortis' overall business. Fortis remains focused on North America as a vehicle for future growth.

Company Structure and Operating Subsidiaries

The Company operates under two operating segments: (1) Regulated Utility operations, and (2) Non-Regulated Businesses. Regulated utilities account for 86% of total assets as at December 31, 2006. Although non-regulated assets do not generate a significant proportion of the Company's revenues, they do have a meaningful impact on net earnings.

Chart 3: Fortis Operating Segments

Source: Company reports and Beacon Securities

REGULATED UTILITIES

The Regulated Utility segment accounted for approximately 85% of Fortis' 2006 total revenues of \$1.5 billion, and approximately 75% of its earnings from operating segments in 2006. Fortis' Regulated Utility operations are governed by their respective regulators, which set target customer service levels, approve capital expenditure programs, and set bands for allowable rates of returns. In the sections below, we discuss the more relevant regulatory requirements for each subsidiary. In Canada, Fortis operates both gas and electric distribution regulated utilities.

Canadian Regulated Gas Utility

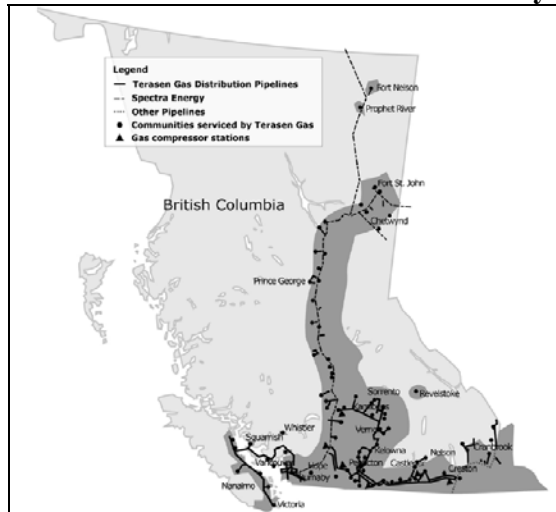

1. Terasen Gas

Fortis' most recent acquisition was Terasen Gas. Fortis paid \$3.7 billion, including the assumption of \$2.3 billion in debt, to Kinder Morgan (KMI-NYSE; Not Rated) for the natural gas distribution assets of Terasen Inc. This transaction, which closed on May 17, 2007, increased Fortis' asset base from approximately \$5.5 billion to \$10 billion, and its regulated assets from \$3.4 billion to \$6.4 billion. This is the largest transaction in Fortis' operating history, and the first time it has invested in a regulated utility other than electricity transmission/distribution.

Fortis paid approximately 1.2x Terasen Gas's estimated mid-2007 rate base of approximately \$2,973 million. The transaction has resulted in regulated utility assets accounting for 92% of the Fortis' total assets, and Regulated utility assets in Canada now account for 84% of total assets. Furthermore, the acquisition of Terasen Gas has resulted in approximately 57% of Fortis' total assets being located in British Columbia.

Terasen Gas is the principal distributor of natural gas in British Columbia, serving 125 communities consisting of 900,000 customers, or 95% of all natural gas users in British Columbia. Terasen Gas owns and operates approximately 44,100 km of natural gas distribution pipeline and 4,300 km of natural gas transmission pipeline.

Chart 4: Terasen Gas Service Territory

Source: Company reports

The operations of Terasen Gas are carried out under three wholly-owned subsidiaries: Terasen Gas Inc., Terasen Gas (Vancouver Island) Inc., and Terasen Gas (Whistler) Inc. In addition, Terasen Gas has a 30% stake in CustomerWorks Ltd, which is a non-regulated service business jointly owned with Enbridge Inc. (ENB-TSX; Not Rated). In the sections below, we provide an overview for each of these gas distribution segments.

Terasen Gas Inc.

Terasen Gas Inc. (TGI) is the largest of the three operating companies within the Terasen Gas segment, with a service area extending from Vancouver to the Fraser Valley. It accounts for approximately 83% of Terasen Gas' assets, and has a rate base of approximately \$2.5 billion. This area has a population base of approximately 4 million people. TGI transports and distributes natural gas to 100 communities consisting of 735,000 residential and 82,000 industrial customers.

TGI typically provides natural gas distribution to residential, small businesses, and industrial heating customers on a non-contract basis, where customers are charged for general services. In contrast, the majority of TGI's larger commercial and industrial customers are serviced under a contractual basis. Under these agreements, customers are able to purchase natural gas from third-parties and TGI charges a service fee for the transportation of gas, a practise known as unbundling. Since TGI virtually passes the cost of natural gas to customers when they purchase natural gas directly, the Company's margins are unaffected. In fact, having a proportion of its customers buying from third-party suppliers as opposed to buying directly from TGI acts to reduce the Companies overall credit risk exposure. Approximately 79,000 of TGI's customers are eligible for unbundling, and approximately 18,700 customers had arranged for their gas from third-parties as at December 31, 2006. This is up considerably from 2,200 at the end of 2005.

Approximately 150 of TGI's industrial customers are on interruptible services, meaning that they can switch from natural gas to an alternative fuel. TGI also holds transmission and distribution agreements for natural gas distribution under statutes and franchise agreements, which grant TGI the right to operate in municipalities and other areas it serves.

Chart 5: Terasen Gas Rate Base

Source: Company reports

TGI is regulated by the British Columbia Utilities Commission (BCUC). TGI's rates are based on a cost-of-service basis, where TGI is allowed to recover the costs associated with providing service, meet its financial obligations, and earn a reasonable return on common equity (ROE).

The allowable ROE for 2007 has been set at 8.37%, and the deemed equity component has been set at 35%. The average rate base for fiscal 2007 is approximately \$2.5 billion, and its approved capex budget for 2007 is \$129.7 million. Approximately 22% of this amount will be spent to support customer growth, and the balance will be used for asset betterment and upgrades. The allowable rate of return is based on a formula that applies a risk premium to an estimate of the Canadian long-term bond yield. The allowable rate of return is reviewed and, if necessary, adjusted annually.

Similar to FortisBC, TGI operates under a performance-based rate (PBR) setting methodology, where it shares improved cost efficiencies with its customers. In 2004, 2005, and 2006, Terasen Gas generated ROEs of 9.34%, 10.78%, and 10.10%, respectively, while the allowable ROEs for these years were 9.15%, 9.03%, and 8.80%, respectively.

Terasen Gas (Vancouver Island) Inc.

Terasen Gas (Vancouver Island) Inc. (TGVI) owns and operates a transmission pipeline from greater Vancouver area across the Georgia Strait to Vancouver Island, and a distribution network on Vancouver Island and along the Sunshine Coast of B.C. These systems have a combined through-put capacity of 144 million cubic feet of natural gas per day, and serves approximately 88,000 customers.

TGVI is a franchise under development, where it is financially supported by the Vancouver Island Natural Gas Pipeline Agreement. Under the agreement, the province of British Columbia provides TGVI with royalty revenues, which covers approximately 20% of the current cost of

service. These payments are intended to assist with competitive rates during franchise development, as TGVI's customer base and revenues are insufficient to cover its cost of service, as well as recover revenue deficiencies from prior years. This support is due to expire at the end of 2011. At that time, TGVI's customers will have to pay the full cost of gas, as well as the recovery of remaining accumulated deficit. Given that industrial gas usage accounts for approximately 65% of the TGVI's throughput, and two-thirds of this is contracted on a year-to-year basis, TGVI is at even greater risk of being unable to recover its costs post-2011. Although the BCUC's rate-setting mechanism sets rates at sufficient levels for TGVI to recover cost of service, rates will be limited by the price of competitive fuels.

Chart 6: Terasen Gas (Vancouver Island) Inc. Rate Base

Source: Company reports

TGVI's approved rate base for 2007 is approximately \$482 million, and its allowable equity component is 40%. Its allowable ROE is currently set at 9.07%.

Terasen Gas (Whistler) Inc.

Terasen Gas (Whistler) Inc. (TGWI) owns and operates two propane distribution centres that services approximately 2,370 residential and commercial customers in Whistler B.C. In addition, TGWI owns and operates two propane storage and vaporization plants, as well as approximately 130 kilometres of pipeline, with annual deliveries of approximately 750,000 gigajoules (GJ) of propane.

In June 2006, TGWI, in conjunction with TGVI, received approval from the BCUC to extend natural gas service to Whistler via a proposed 50 km pipeline lateral from Squamish to Whistler. TGWI will convert its propane distribution system to natural gas. TGWI's average rate base in 2006 was \$16.5 million, and has an allowable equity component of 40%, and has an allowable ROE of 10.0%.

The Merits of the Acquisition

The acquisition of Terasen Gas is unique for Fortis on two fronts: (1) it is the first time Fortis purchased a non-electricity utility, and (2) it is the first time where there is overlap in service territories between two of Fortis' utilities. These factors have many positive implications for the Company's future growth in both top and bottom lines. For top-line growth, gaining expertise in gas distribution opens a new door for future expansion into new markets, like the U.S.

The geographical overlap between Terasen and FortisBC will also enable Fortis to realize synergies in addition to the ones it typically seeks. Synergies will be more attainable because these utilities are both regulated by the BCUC. This will enable Fortis to consolidate some functions, and therefore reduce costs. Consolidation of functions for two or more utilities regulated by different agencies is not an easy task, as each utility typically argues that the other should absorb more costs.

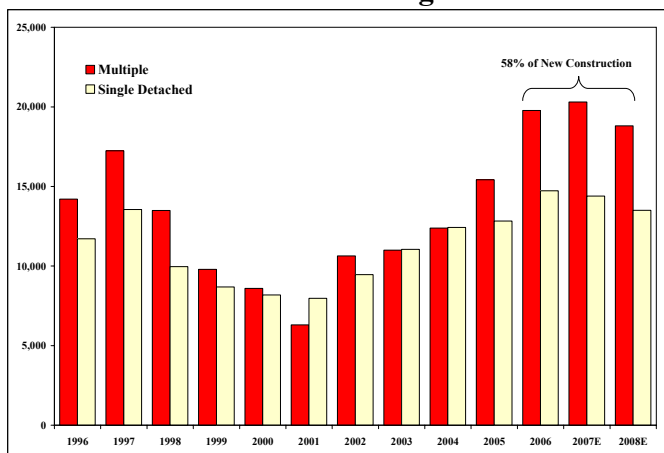

British Columbia Natural Gas Distribution Overview

British Columbia is the third-largest natural gas market in Canada. Industry accounts for the largest proportion of natural gas consumption in British Columbia. In 2003, industry and power generation accounted for 58% of total natural gas consumption. The majority of industrial customers use natural gas for heat and power in the manufacturing process, as well as in manufacturing raw material. The majority of residential and commercial natural gas customers use natural gas for space heating and appliances.

Demand for natural gas typically peaks when the West Coast experiences lower-than-average precipitation, and corresponding low water levels, and when Arctic cold fronts arrive. Lower water levels result in a reduction in hydro generation and a corresponding increase in gas-fired electrical generation.

Higher than historical averages in natural gas prices has resulted in a reduction in residential and commercial gas consumption. These consumers have reduced expenditures in natural gas by conservation or by substituting gas-fired heating furnaces with portable baseboard electrical heaters. The result has been a reduction in demand per household. Furthermore, property developers are installing electric space heaters in new construction in an effort to reduce building costs. This, coupled with consumers' perception that natural gas price volatility poses greater risk of unexpected higher costs, has impeded the penetration of natural gas.

Chart 7: British Columbia Single Detached Residential and Multiple Dwelling Construction

Source: Canadian Mortgage and Housing Corporation

That being said, population growth is a key driver for residential natural gas penetration, and as we discussed in the section above on FortisBC, British Columbia's growth in population is surpassing that of the country. Currently, natural gas accounts for only one-quarter of the British Columbia industrial sector's demand, which leaves potential for growth. The largest users of natural gas in

the province are the pulp and paper, wood product, petroleum refinery and petrochemical industries. Natural gas demand for the industrial sector in the province is correlated with growth in the province's GDP. However, the industrial sector is the most price sensitive market for gas, and therefore, there is potential for future growth to be offset by the continued trend of industrial users of natural gas to seek ways to reduce consumption, as well as looking for alternatives fuels, such as wood waste, hog fuel, coal, and petroleum products.

Canadian Regulated Electric Utilities

Canadian regulated electric utilities accounted for 92% of the Regulated Utility segment's fiscal 2006 revenues of \$1.2 billion, and 87.5% of Regulated Utility operating income. The Canadian Regulated Electric Utilities consist of FortisAlberta, FortisBC, Newfoundland Power, Maritime Electric, and FortisOntario.

Chart 8: Fortis Canadian Regulated Utility 2006 Revenue and Operating Income

Source: Company reports and Beacon Securities

2. FortisAlberta

Fortis Inc. indirectly owns 100% of FortisAlberta's outstanding common shares. Fortis acquired FortisAlberta and FortisBC from Aquila Inc. (ILA-NYSE; Not Rated) in 2004 for total consideration of approximately \$1.5 billion. FortisAlberta operates primarily in rural central and southern Alberta, with a customer base of approximately 430,000 comprised of residential, commercial, farm and industrial customers. Electricity is disseminated via 104,000 km of low-voltage distribution network. As the table below illustrates, Fortis has not only been successful with its integration of FortisAlberta, but has improved its operational efficiency as well.

Chart 9: FortisAlberta's Operating Performance Before and After Fortis Acquisition

Note: Fiscal 2003 excludes \$80 million goodwill write-down

Source: Company reports

FortisAlberta is involved solely in the distribution of electricity and does not own any electrical transmission or generating assets. Therefore, FortisAlberta's entire asset base is regulated. FortisAlberta receives electricity from Alberta's transmission system, or from smaller third-party electricity producers. FortisAlberta distributes this electricity to residential, commercial, and industrial customers. The majority of these customers are located within municipality boundaries, and are serviced directly by the respective municipality, who have franchise agreements with FortisAlberta.

In 2006, the Company invested approximately \$243 million (before customer contributions) to improve service reliability and to meet new load growth. It is interesting to note that FortisAlberta invested approximately \$116 million in projects related to customer growth resulting from oil and gas industry activity, as well as the residential housing boom. In aggregate, FortisAlberta has increased its rate base by approximately from \$611 million from the time it was acquired by Fortis in 2004 to approximately \$939 million today.

Chart 10: FortisAlberta Capex

Source: Company reports

FortisAlberta is regulated by the Alberta Energy and Utilities` Board, with its distribution assets regulated on a cost-of-service basis. Rates are set to cover FortisAlberta's distribution costs and to allow for an approved rate of return on a deemed specified capital structure. This results in FortisAlberta being effectively insulated from volatility in electricity prices. FortisAlberta's regulated capital structure is set at 37% equity, and its allowed ROE for 2006 was 8.93%; however, due to the impact of lower long-term Canadian bond yields on the automatic adjustment formula, the Company's allowed ROE for 2007 has been reduced to 8.51%.

3. FortisBC

FortisBC is an integrated electric utility, which owns and operates hydroelectric generating plants, high voltage transmission lines, and distribution assets located in the southern interior of British Columbia. FortisBC also owns both regulated and non-regulated assets. As we discussed above, Fortis acquired FortisBC, as well as FortisAlberta, from Aquila Inc. in 2004.

Similar to FortisAlberta, Fortis has successfully integrated FortisBC into its portfolio of utilities and improved its operational efficiency.

Chart 11: FortisBC's Operating Performance Before and After Fortis Acquisition

Source: Company reports and Beacon Securities Ltd

In contrast to FortisAlberta, whose customer base is primarily in rural areas, the majority of FortisBC's customer base is primarily located in urban centres. FortisBC serves, both directly and indirectly, 152,000 residential, commercial, wholesale, and industrial customers. Residential Service is the Company's largest customer base, accounting for 41.6% of revenues and 36.8% of electrical sales in 2006. This customer category represents the lower risk of the four categories.

FortisBC serves approximately 102,000 customers in Kelowna, Oliver, Osoyoos, Trail, Castlegar, Creston and Rossland. It serves another 50,000 customers through the wholesale supply of power to municipal distributors in Summerland, Penticton, Kelowna, Grand Forks, and Nelson. As the table below illustrates, these areas have experienced an aggregate population growth level in excess of British Columbia and the Country as a whole.

Table 3: Communities Served by FortisBC

	2006	2001	Change	Private Dwellings
Kelowna ¹	162,276	147,739	9.8%	71,889
Osoyoos	4,752	4,295	10.6%	2,717
Trail	7,237	7,575	-4.5%	3,764
Castlegar	7,259	7,585	-4.3%	3,225
Princeton	2,677	2,610	2.6%	1,366
Rossland	3,278	3,646	-10.1%	1,656
Summerland	10,828	10,723	1.0%	4,726
Penticton	31,909	30,985	3.0%	15,271
Grand Forks	4,036	4,054	-0.4%	1,862
Nelson	9,258	9,318	-0.6%	4,427
Group Total	243,510	228,530	7.1%	110,903
British Columbia	4,113,487	3,907,738	5.3%	1,788,474
Canada	31,612,897	30,007,094	5.4%	

¹ Population for the metropolitan area

Source: Statistics Canada

Implications of British Columbia's population growth are greater for FortisBC than the above table implies, as the Kelowna area accounts for approximately 66% of private dwellings in this area (see Chart below), and has experienced an impressive 9.8% growth in population since 2001.

Chart 12: FortisBC Population Breakdown by Operating Region

Source: Statistics Canada

In addition to FortisBC's contribution to Fortis' overall future organic growth from an increasing population base, the subsidiary is also in the process of investing to improve the reliability of the utility. In aggregate, FortisBC expects to spend approximately \$500 million in capex over the next five years. FortisBC has an approved capital expenditure program for 2007 of \$135.8 million, before customer contributions of \$7.2 million, and \$119.6 million, before customer contributions of \$8.0 million, for 2008

FortisBC's generating assets are comprised of four hydroelectric generating plants with an aggregate capacity of 235 megawatts (MW). This provides approximately 45% of the energy and 30% of FortisBC's capacity requirements. The balance of its requirements is satisfied through long-term power purchase agreements, and requirement short-falls, when they occur, are fulfilled through short-term power purchases. Such short-falls typically occur in the winter and summer peak demand periods, when energy prices hit cyclical highs. These costs are recovered through

customer rates, and FortisBC typically hedges potential exposure to volatility in hydro prices by power purchase contracts prior to the winter months.

FortisBC is regulated by the BCUC under a performance-based framework (PBR). Under this structure, FortisBC's cost efficiencies/inefficiencies are shared equally between FortisBC and its customers. This is executed by way of a 2% collar around the pre-determined ROE, and any amounts equal to or less than the 2% are split. Therefore, in the event there is a positive variance between the actual financial performance and the allowable rate, both FortisBC and its customers benefit. However, the same scenario holds if there is a negative variance. In the event that the variance exceeds the 2% collar, the excess is placed into a deferral account for review and disposition during the next rate-setting period.

4. Newfoundland Power

Fortis owns 100% of Newfoundland Power's common shares, and 93.7% of the Company's voting rights. Newfoundland Power owns and operates an integrated generation, transmission, and distribution system throughout Newfoundland and Labrador. The Company has approximately 230,000 customers in more than 600 communities, which represents 85% of Province's electricity consumers.

Approximately 85% of Newfoundland Power's customer base is residential, with the balance being commercial. Residential customers account for approximately 58% of revenues. Newfoundland Power is not a significant catalyst for Fortis' future growth. In fact, Newfoundland's population has experienced a 0.47% CAGR over the last four years. In spite of this, electricity sales have experienced a modest CAGR of 1.2% for the past four years, which has been driven equally by both commercial and residential customers.

Chart 13: Newfoundland Power Annual Electricity Sales

Source: Company reports and Beacon Securities

Over the past five years, residential electricity sales have slightly outpaced those of commercial, with an average annual growth rate of 1.4% versus commercial with 1.3%. During this period, residential electricity sales, as a percentage of total electricity sales, have remained consistent at 54.7%. The moderate growth in residential electricity sales has been attributed to many factors, including relatively weak growth in personal disposable income and higher electricity prices which have caused the customer base to conserve electricity usage. These factors have been partially

offset by a strong housing market and higher oil prices. Commercial electricity sales growth has lagged that of residential electricity sales, and has generated growth from the ongoing development of Newfoundland's oil industry.

Newfoundland Power purchases approximately 90% of its electricity requirements from Newfoundland and Labrador Hydro (Crown Corporation). The remaining 10% is generated by 30 small generating stations which are owned by Newfoundland Power.

Newfoundland Power, as well as Newfoundland and Labrador Hydro, is regulated by Newfoundland and Labrador Board of Commissioners of Public Utilities (PUB). Newfoundland Power operates under a cost of service regulation, which allows the Company to set rates that permit it to recover all reasonable and prudent costs associated with providing service and earn a reasonable rate of return on its rate base. The regulated return on equity for 2007 is 8.60% (down from 9.24% in 2006), which equates to a rate of return on rate base of 8.47%, with a range of 8.29% to 8.65%. The Company's equity component of its capital structure must not exceed 45%. The rate of return is adjusted annually, and based on an automatically adjusted formula that is based on Canadian 30-year bond yields. Although the use of this formula stream-lines the rate-setting process, the exposure to interest rates makes the Company's earnings susceptible to greater volatility.

5. Maritime Electric

Maritime Electric is located on Prince Edward Island and serves 71,000 customers, which represents 90% of the Province's electricity consumers. Maritime Electric is involved in electricity generation, transmission, and distribution, although it purchases more than 95% of its energy requirement from New Brunswick Power. The remaining electricity requirement is met by the Company's generation facilities and the purchase of wind energy. Revenues are evenly split between residential and commercial customers, although commercial and industrial customers account for almost 60% of electricity sales.

Maritime Electric is regulated on a cost of service basis, where the utility's basic electricity rates are based on estimated cost of service and allow for a predetermined rate of return on an approved rate base. Maritime Electric's maximum allowed ROE for 2007 is 10.25%, and common equity must be at least 40% of the utility's capital structure.

6. FortisOntario

FortisOntario consists of both regulated and non-regulated assets. Regulated assets are comprised of Canadian Niagara Power and Cornwall Electric.

Table 4: FortisOntario Regulated Utilities

Subsidiary	Service Area	# of Customers	2006 Revenue (%)	2006 GWh Sales (%)
Canadian Niagara Power	Fort Erie	15,400	24.0%	24.7%
	Port Colborne	9,200	15.0%	16.9%
	Gananoque	3,600	6.3%	6.5%
	Sub-Total	28,200	45.3%	48.1%
Cornwall Electric	Cornwall	23,400	54.7%	51.9%
	Total	51,600	100%	100%

Source: Company reports

FortisOntario participates in electricity transmission and distribution through its wholly-owned subsidiaries, Canadian Niagara Power and Cornwall Electric.

- **Canadian Niagara Power Inc.:** Transmits and distributes electricity to customers in Fort Erie, Port Colborne, and Gananoque. It also owns and operates a transmission network that extends from Niagara Falls, Ontario through to Fort Erie connecting with National Grid's transmission system in Buffalo, New York through an international inter-tie running between Fort Erie and Buffalo.
- **Cornwall Electric:** Provides utility services to Cornwall, South Glengarry, South Stormont, and the Ontario portion of the Mohawk Territory of Akwesasne.

Caribbean Regulated Utilities

Fortis first entered the Caribbean in 1999 when it purchased 67% of Belize Electricity. Fortis now has ownership in three utilities in the Caribbean: Belize Electricity (70.1% ownership), Caribbean Utilities (54% ownership), and Fortis Turks and Caicos (100% ownership). Although these assets have yielded strong returns, Fortis' primary focus for future growth is on North America.

7. Belize Electricity

Belize Electric is the primary distributor of electricity in Belize, Central America and serves more than 71,000 customers. Fortis has a 70.1% controlling interest in Belize Electricity. It acquires its electricity from multiple sources, including Fortis wholly-owned subsidiary, Belize Electric Company Limited ("BECOL"), Comisión Federal de Electricidad, as well as from its own diesel-fired and gas-turbine generation. Belize Electricity has experienced annual energy demand growth of approximately 3% to 7% over the past three years.

Belize Electricity is regulated by the Public Utilities Commission. The basic electricity rates are determined by value-added delivery ("VAD"), and cost of fuel and purchased power ("COP"). The VAD component permits the Company to recover operating expenses, transmission and distribution expenses, taxes, amortization and earn a rate of return on regulated asset base in the range of 10.0% to 15.0%. The COP includes the variable cost of generation, which is a flow-through in customer rates.

8. Caribbean Utilities

Caribbean Utilities (CUP.U-TSX; Not Rated) is a publicly traded utility located on Grand Cayman, Cayman Islands. It generates, transmits, and distributes electricity to more than 22,000 customers. Fortis recently became the controlling shareholder of Caribbean Utilities after increasing its ownership to approximately 54%. As a result, Fortis is consolidating Caribbean Utilities' financial statements on a two two-month lag basis. Caribbean Utilities anticipates capital expenditures of approximately US\$33 million in fiscal 2008, and US\$190 million over the next five years, which is expected to be fuelled by customer growth.

Caribbean Utilities operates under a 25-year exclusive licence with the Government of the Cayman Islands, which expires in 2011, or until replaced with a new license by mutual agreement. The utility is entitled to earn a 15% rate of return on its rate base.

9. Fortis Turks and Caicos

Fortis Turks and Caicos consists of two electric utilities acquired in 2006: (1) P.P.C. Limited, and (2) Atlantic Equipment & Power (Turks and Caicos) Ltd. for aggregate consideration of approximately US\$90 million. Fortis Turks and Caicos is the primary electricity distributor in the Turks and Caicos Islands pursuant to 50-year licences that expire in 2036 and 2037. The utility serves approximately 7,700 customers, which represents approximately 80% of the electricity customers in the Turks and Caicos Islands.

During 2006, residential customers accounted for 36.6% of revenues and 33.6% of electricity sales, while commercial customers account for 62.2% of revenues and 65.2% of electricity sales. This utility has experienced considerable growth, which has been on the back of tourism and condominium and hotel development. In fact, energy sales on Providenciales, where the majority

(approximately 75%) of customers reside, have increased, on average, 15% annually for the last 12 years. In addition to growth resulting from tourism, utility sales in 2006 increased because of a high level of government-funded public works initiatives. The Company has a combined diesel-fired generating capacity of approximately 37 MW and met a combined peak demand of 25 MW in 2006. The Government of Turks and Caicos is the regulator for Fortis Turks and Caicos, and rates are set to yield a 17.5% return on a calculated rate base.

NON-REGULATED BUSINESSES

Fortis' non-regulated assets, which primarily consist of non-core properties and electric hydro generation facilities, accounted for approximately 14% of the Company's total assets as at December 31, 2006, and approximately 25% of total operating earnings during 2006. As the table below illustrates, the non-regulated segments do not account for a significant proportion of total assets, but did generate approximately 16% of total revenues in 2006.

Table 5: Fortis Non-Regulated Assets as a Percentage of Company Total

(Excluding Corporate and including Inter-segment)		
Generation	<u>2005</u>	<u>2006</u>
Total Revenue	5%	5%
Operating Earnings	18%	15%
Total Assets	6%	5%
Properties		
Total Revenue	11%	11%
Operating Earnings	8%	10%
Total Assets	9%	9%

Source: Company reports

10. Fortis Generation

Fortis Generation consists of non-regulated generation assets in Belize, Ontario, central Newfoundland, British Columbia, and upper New York state. In aggregate, these assets have a generating capacity of 195 MW. Approximately 190 MW, or 97.4%, of this capacity is hydroelectric generation.

Belize: BECOL owns and operates the 25 MW Mollejon and 7 MW Chalillo hydroelectric facilities, located on the Macal River in Belize. BECOL sells its entire output to Belize Electricity under a 50-year power purchase agreement.

Ontario: Non-regulated operations in Ontario include 75 MW of water-right entitlement associated with the Niagara Exchange Agreement, a 5 MW gas-fired cogeneration plant in Cornwall and six small hydroelectric generating stations in eastern Ontario with a combined capacity of 8 MW. With the exception of the cogeneration plant in Cornwall, the electricity produced from these facilities is sold in the Ontario market.

Central Newfoundland: Fortis indirectly holds a 51% interest in the Exploits River Hydro Partnership with Abitibi-Consolidated Company of Canada (A-TSX; Not Rated). The Exploits River Hydro Partnership achieved record annual energy sales of 168 GWh in 2006. Abitibi-

Consolidated uses generation, and additional produced energy is sold to Newfoundland Hydro under a 30-year power purchase agreement.

British Columbia: Fortis' non-regulated generating asset in British Columbia is a 16-MW run-of-river Walden hydroelectric generating plant near Lillooet, which was acquired in May 2004 as part of the assets of FortisBC. The plant sells its entire output to BC Hydro under a long-term contract.

Upper New York State: Fortis owns four non-regulated hydroelectric generating stations located in upper New York State. These plants have an aggregate capacity of approximately 23 MW, with an average annual energy output of 85 GWh that is sold at wholesale through contracts.

11. Fortis Properties

Fortis Properties owns and operates 18 hotels, consisting of approximately 3,200 rooms, in seven Canadian provinces. In addition, Fortis Properties owns 2.7 million square feet of commercial real estate in Atlantic Canada. Revenue per Available Room in 2006 increased from \$70.95 in 2005 to \$72.67, which was on the back of increases in both average occupancy and average daily room rates.

The 2006 occupancy rate in the real estate division of 94.9% at December 31, 2006 declined 100 basis points from December 31, 2005, but still outpaced the national rate of 92.3%.

The investment in non-core properties was originally made in order to capitalize on tax credits that arose from acquisition. For the most part, a utility can only recover interest expenses from debt used to finance an acquisition equal-to or less-than the allowable proportion of the book value of the purchased assets. **However, this interest provides a tax shield if it can be applied to revenues. Investing in properties has provided such a revenue stream.**

Financials and Past Performance

Fortis has exhibited outstanding growth in its assets, revenues, and net earnings over its operating history, which has supported its significant dividend growth over the same period. Since 1999, Fortis has increased its utility capital assets and income producing properties by a CAGR of 50.7%, while increasing its revenue and net income by a CAGR of 16.5% and 26.0%, respectively, over the same period.

Chart 14: Fortis Sales, Net Income, and Fixed Assets Growth

Source: Company reports

Over this period, Fortis has increased its dividends (declared) by 48.0%, with a CAGR of 5.8%. The growth in dividends has been on the back of higher earnings fuelled by acquisition. In fact, during this period, Fortis' dividend payout ratio has declined by 41.6 percentage points to 47.2%. The decline in dividends as a percentage of earnings has, as one would expect, been the result of using a proportion of internally generated funds to finance its aggressive acquisition strategy. Obviously, from the Company's past performance, this was a good use of these funds.

Chart 15: Fortis Dividends Paid per Common Share Growth

Source: Company reports

Chart 16: Fortis Inc. Dividend Pay-out Ratio

Source: Company reports

Although investors seeking exposure to utilities typically prefer relatively higher dividend payout ratios, it is interesting to note that even though Fortis has retained a higher percentage of its earnings, it has still been able to increase dividends on the back of higher dollar earnings, which has been driven by accretive acquisitions and an improving profit margin.

Chart 17: Earnings Growth and Profit Margin

Source: Company reports

In addition, Fortis' ownership of non-regulated utilities and income producing properties, has also benefited the Company's earning profile.

Outlook and Financial Forecast

We are expecting Fortis to generate fiscal 2007 and 2008 EPS of \$1.47 and \$1.60, respectively. For regulated utilities, our fiscal 2007 and 2008 estimates are based on respective allowed ROEs, approved capital expenditures.

With bond yields on the decline, there is potential for Fortis' earnings growth to stall over the next year. This is because Fortis' regulated utilities are governed under cost recovery regulations, where they are permitted to earn a pre-determined ROE on a specified equity proportion. The majority of Fortis' regulated utilities, which include FortisAlberta, FortisBC, and Newfoundland Power, allowable ROEs are tied to the Canadian long-term bond yield, and the recent decline in bond yields has resulted in a reduction in the ROEs for these utilities. In fact, the allowable ROE for FortisAlberta, FortisBC, and Newfoundland Power have decreased by an average 50 basis points, as illustrated in the table below.

Table 8: Change in Allowed Return on Common Equity

	FortisAlberta	FortisBC	Newfoundland Power	Average	Change
Previous	8.93%	9.20%	9.24%	9.12%	
Current	8.51%	8.77%	8.60%	8.63%	49.7 bps

Source: Company reports

The average 50 basis point decline in allowed ROEs has considerable potential to adversely impact Fortis' trend in growing earnings, as these three utilities accounted for 78% of the Canadian Regulated Utilities 2006 revenues and 88% of net earnings. That being said, the decline in allowable ROEs will likely be offset by the planned capex for 2007 which will increase the rate base.

Chart 18: Fiscal 2007 Forecasted Capital Expenditures (Millions)

Source: Company reports

While Newfoundland Power does have a modest 2007 capex budget of \$66.0 million, it will be primarily allocated towards equipment replacement and electricity system betterment. In contrast, FortisAlberta and FortisBC have considerable capital expenditure budgets for customer growth, in addition to capital expenditures pertaining to asset replacement/upgrade. This is the result of exceptional growth in both population and GDP, which have outpaced the national rates. In fact, Alberta and British Columbia in aggregate, account for approximately 81% Canadian Regulated Utilities forecasted capital expenditures for 2007.

Fortis' exposure to these two high growth markets is compounded with the acquisition of Terasen Gas. As discussed in the sections above, natural gas distribution is likely to experience healthy penetration rates in British Columbia, as it is largely driven by British Columbia's GDP and population growth rates. However, the trend of contractors installing electricity as opposed to natural gas in multi-family units does present a hindrance. But more importantly, the Terasen acquisition opens two unique opportunities for Fortis. The first being a strong and established foothold in natural gas distribution, which is a new catalyst for growth. The second is the opportunity to capitalize on cost-sharing that result from operating two utilities that are governed by the same regulatory body.

Over the next five years, we believe that earnings growth can be driven by the Company's anticipated capex of approximately \$2.8 billion. We contend that capex of this magnitude is equal to purchasing a \$2.8 billion utility, and that even if Fortis does not pursue another acquisition over this period, its rate base will expand as if it had. Furthermore, given the nature of the industry, this capex provides the potential for growth for the Company even in the event of economic downturns.

Valuation and Recommendation

Fortis shares are currently trading at 19.2x on our fiscal 2007 EPS estimate of \$1.44, and 17.9x on fiscal 2008 estimate of \$1.55. Since the Terasen transaction closed on May 17, 2007, the fiscal 2008 EPS estimate is more relevant from an earnings multiple perspective, as it includes Terasen's contribution for a full year. As illustrated in the chart below, Fortis' shares have consistently commanded a higher multiple since 2002.

Chart 19: Fortis Inc. Historical CFY P/E Multiple

Source: Bloomberg, Thomson One Analytic, and Beacon Securities

Since Fortis announced the Terasen acquisition on February 26, 2007, its shares have traded at an average of 19.5x on fiscal 2007 EPS, and 18.2x on fiscal 2008 EPS. Before the announcement, Fortis stock traded at an average multiple of 19.0x on fiscal 2007 EPS, and 18.3x on fiscal 2008 EPS. Surprisingly, the Terasen acquisition has not managed to expand Fortis' current fiscal year earnings multiple. Although the stock has recovered nicely following the issue of 38.5 million subscription receipts (plus approximately 5.8 million in over-allotment) at \$26.00 (each receipt equalling one common share), its earning multiple has remained virtually flat.

This is despite the fact that, through the acquisition of Terasen, Fortis has purchased a shiny new vehicle for future growth. What's more is that this acquisition is very appealing from a risk perspective. Terasen is a high quality, well run asset. It is regulated by the BCUC, the same regulatory agency that governs FortisBC, and natural gas distribution is probably the most similar utility to electricity distribution. Furthermore, with Terasen, 92% of Fortis' total assets will be regulated utilities versus 86% pre-Terasen. This reduces the Company's overall risk profile significantly.

We must also keep in mind that Fortis' operational history and strong relationships with regulators amplifies the Company's potential for expansion into the U.S. in natural gas distribution. We believe that these factors give Fortis a competitive advantage over potential competing bidders for these assets. With these factors in mind, we believe that Fortis' shares should trade at a premium multiple relative to their historic and current levels.

We are assigning a 21.0x target multiple, which, when applied to our fiscal 2008 EPS estimate of \$1.60, yields a 12-month target price of \$32.00. We are expecting Fortis to increase its dividend

by 10% to \$0.77 later this year. Our target indicated dividend yield is 2.9%, which is consistent with the average for the past three years.

Chart 20: Fortis Inc. Historical Dividend Yield

Source: Bloomberg and Beacon Securities

Although there is potential for the yield to decline from price appreciation due to the flow of capital into non-cyclical stocks in the event that the Canadian markets, eventually, experience a decline, we have not built any such assumptions into our valuation. Our target yield of 2.9% coupled with of fiscal 2007 dividend estimate of \$0.75 generates a target price of \$27.00.

We believe that the target price based on earnings multiple should carry greater weight, given the reduction in volatility that we expect Fortis' earnings to display resulting from a higher proportion of regulated utilities within its portfolio. Our 12-month target price is \$32.00. Including the Company's annualized dividend of \$0.77, we are looking for a total return of 14%. **We are initiating coverage on Fortis with a BUY rating.**

FORTIS INC.

Re-Initiating Coverage: A Charged Up Dividend Growth Story

Summary

- We are re-initiating coverage of Fortis with a **BUY** rating and **12-month target price of \$31.00**. Our target equates to 19.7x 2009E earnings and 10.5x 2009E EV/ EBITDA.
- Fortis is Canada's largest investor-owned distribution utility, with almost two million gas and electricity customers. The Company's Regulated Utilities segment contributes to achieving a low risk organization, with Regulated Utilities' assets representing 92% of total assets.
- **The Fortis assets are well positioned for future growth opportunities, both organically and through acquisitions.** The Company's previous acquisitions in Western Canada and the Caribbean have provided the opportunity for strong growth rates in those regions. We expect organic growth to occur largely through the Company's electrical infrastructure, particularly from FortisBC and FortisAlberta. The Terasen Gas acquisition provides Fortis with the experience and expertise necessary to further grow in the regulated natural gas utility business. We expect future regulated gas utility acquisitions from Fortis.
- Fortis is the only public company in Canada that has increased its annual dividend for 35 consecutive years. **With sustainable dividend growth, continuous investment in rate base, and stable earnings, we view this blue-chip company as a lower risk investment for investors looking for a defensive stock during this time of economic uncertainty.**

New Estimates

Company Description

Fortis Inc. is Canada's largest investor-owned distribution utility, with almost two million gas and electricity customers. The Company is headquartered in St. John's, NL. Its main focus is the ownership and operation of regulated utilities, with operations in five provinces and three Caribbean countries. Fortis also owns and operates non-regulated generation assets and commercial real estate and hotel assets.

Fortis Inc.

*Please view the disclaimer at the end of this report

Investment Thesis

We are re-initiating coverage of Fortis with a BUY rating and 12-month target price of \$31.00. Our valuation is based on analysis of P/E and EV/EBITDA multiples and our dividend discount model. Our target equates to 19.7x 2009E earnings and 10.5x 2009E EV/ EBITDA.

After the acquisition of Terasen, Fortis is Canada's largest investor-owned distribution utility, with almost two million gas and electricity customers. The Company is highly diversified in terms of its franchise area and nature of its assets. The Company's Regulated Utilities segment contributes to lowering the overall risk of Fortis, with 92% of total assets in Regulated Utilities. The Non-Regulated segment is structured so that it covers the holding company costs of Fortis, which cannot be flowed through to the customer.

The Fortis assets are well positioned for future growth opportunities, both organically and through acquisitions. The Company's previous acquisitions in Western Canada and the Caribbean have provided the opportunity for strong growth rates in those regions. We expect organic growth to occur largely through the Company's electrical infrastructure, particularly FortisBC and FortisAlberta. Significant growth plans are expected over the next five years, with a capital budget of \$3 billion allocated towards Regulated Electric Utilities and \$1 billion allocated towards Regulated Gas Utilities. Growth in the Non-Regulated operations will likely be proportionate to the increase in corporate financing costs involved in the expansion of the Regulated operations.

The Terasen Gas acquisition is expected to be accretive to earnings per common share of Fortis in the first full year of ownership. The acquisition has nearly doubled Fortis' assets. Terasen experiences seasonality with its earnings, with Q1 and Q4 contributing the most to annual earnings. **The Terasen acquisition further lowers the Company's risk profile and is a good fit geographically with Fortis' electric utilities in Western Canada. The acquisition provides Fortis with the experience and expertise necessary to grow in the regulated natural gas utility business, and we expect future regulated gas utility acquisitions from the Company.**

Fortis is not without its risks, and can be impacted by lower long-term bond yields which could result in lower allowed ROEs. **Lower bond yields may result in Fortis having to lower the rates for certain subsidiaries, thereby hampering earnings.**

However, Fortis benefits from an experienced management team, with expertise in growing Fortis both organically and through acquisitions. Management has a profound knowledge of all facets of the organization. This has been achieved by rotating management through several Fortis subsidiaries. Each subsidiary operates as a stand-alone unit, thereby facilitating the relationship with each subsidiary and its respective regulator.

Fortis is the only public company in Canada with 35 consecutive years of dividend increases. With sustainable dividend growth, continuous investment in rate base, and stable earnings, we view this blue-chip company as a lower risk investment for investors looking for a defensive stock during this time of economic and market uncertainty. Including dividends, there is a potential return of approximately 20% over the next year, which justifies our BUY rating.

Company Profile

Fortis Inc. is a diversified holding company based out of St. John's, NL. Fortis is the largest investor-owned distribution utility in Canada, with almost two million gas and electricity customers. Its main business is the ownership and operation of regulated utilities, with these assets representing 92% of total assets. The Regulated Utilities assets are segmented according to the nature of the asset, depending on the regulatory requirements, and also according to the assets' franchise area. The Company's regulated holdings include a natural gas utility in British Columbia, where Fortis met a peak day demand of 1,360 TJ in 2007. The electric utilities are located in Alberta, British Columbia, Newfoundland, Prince Edward Island, Ontario, Belize, Turks and Caicos, and Grand Cayman, and met a peak electricity demand of approximately 5,700 MW in 2007. In addition, Fortis has Non-Regulated Generation operations in Canada, Upper New York State and Belize. Finally, Fortis also owns hotels and commercial real estate across Canada.

Regulated Gas Utilities

Fortis entered into the regulated natural gas business with the acquisition of Terasen Inc. in Q2 2007. Terasen is one of the largest regulated gas utilities in Canada. As this recent acquisition has almost doubled the assets of Fortis, we have included a detailed description of Terasen in this report.

Terasen Gas

The Regulated Gas Utilities segment of Fortis is comprised of the natural gas distribution companies of British Columbia-based Terasen Inc: Terasen Gas Inc. (TGI), Terasen Gas (Vancouver Island) Inc. (TGVI), and Terasen Gas (Whistler) Inc. (TGWI). These businesses are collectively known as the Terasen Gas Companies. TGI provides gas distribution services in the region spanning from Vancouver to the Fraser Valley, and also interior British Columbia. TGVI has a gas distribution and transmission system, which services customers along the Sunshine Coast, Victoria, and various other communities on Vancouver Island. TGWI provides propane distribution services to the Whistler region. **Terasen is the principle natural gas distributor in British Columbia, with over 918,000 customers, or 96% gas users in the province.**

On May 17, 2007, Fortis acquired Terasen for \$3.7 billion, including the assumption of \$2.4 billion in debt. Terasen was formerly a subsidiary of Kinder Morgan Inc. (KMP-NYSE; not rated). After the acquisition, 100% of the Terasen management team has been retained. The net cash purchase price was largely financed with net proceeds of the public offering of subscription receipts, which was completed on March 15, 2007. The Company issued 44,275,000 subscription receipts for gross proceeds of approximately \$1.15 billion. The remaining portion of the purchase price was financed on an interim basis with \$125 million from Fortis' existing credit facility.

An allowed ROE of 8.62% has been approved for TGI for 2008, and a 9.32% rate for TGVI for the same period. On March 18, 2008, BC Utilities Commission (BCUC) approved Terasen's requested rate increases for natural gas, but not for propane. With the approval, customers' natural gas rates will increase within a range of 3.5% to 17% effective April 1, 2008, depending on the service area. Customers' propane rates will remain the same. The price of natural gas has increased over the winter months on supply pressure, resulting from a colder than normal winter in the East, and lower than expected volumes of LNG imports to North America.

Terasen purchases natural gas and propane, and then passes on the cost of the commodity to its customers without a mark-up. Terasen then generates earnings by charging for the delivery of gas. The utility implements several strategies in order to offer the best possible price to its customers. Such strategies include purchasing the commodities through several sources, firming a price through futures contracts, purchasing gas for storage when the price is low, and purchasing a portion of the gas from the spot market.

Both TGI and TGVI operate according to a cost of service regulation. This allows Terasen to charge rates formulated to allow for the collection of revenues equivalent to the cost of service. The cost of service includes the total amount of money required to perform a service, such as operating and maintenance costs, in addition to a return on invested capital. Terasen also operates according to a performance based rate setting (PBR) mechanism, where Terasen's performance is compared against an allowed ROE. When the earned ROE is greater than 200 basis points above the allowed ROE for two consecutive years, the PBR mechanism may be reviewed. TGI and its

customers share equally in earnings above or below the allowed ROE. TGV I may retain 100% of earnings from lower-than-forecasted controllable operating and maintenance expenses, but will not be granted any relief from increased operating and maintenance expenses. The BCUC permitted TGI and TGV I to extend their PBR mechanisms to 2009.

Earnings from the Terasen Gas Companies are not significantly impacted by changes in consumption levels or commodity prices, due to approved regulatory deferral mechanisms from the BCUC. These mechanisms accumulate the differences between actual-versus-forecast consumption levels and commodity prices, which are then recovered in base rates. Therefore, the majority of the changes are flowed through to the customer, providing little or no shareholder risk. The presence of fixed price contracts also helps to alleviate the impact of decreases in consumption levels. Terasen also has an interest-rate deferral account to protect from interest rate fluctuations, which essentially produces the effect of a fixed rate.

On November 15, 2007, TGV I received conditional approval from the BCUC to construct and operate a liquefied natural gas storage facility on Vancouver Island. The proposed facility would store 1.5 Bcf of LNG. The project is estimated to cost between \$175 million and \$200 million. Construction is expected to begin in April 2008, with the facility expected to come into service in late 2011. This facility will be financed at the TGV I level, and will likely require a debt issue. Fortis Inc. will put in equity of up to \$80 million to finance the project.

Terasen experiences seasonality with its earnings, with Q1 and Q4 contributing to the majority of annual earnings, as a substantial portion of the gas distributed is required for space heating. Management expects the acquisition to be accretive to earnings per common share in its first full year of ownership. We believe the Terasen acquisition is an excellent geographic complement with Fortis' electric utilities in Western Canada. The acquisition provides Fortis with the experience and expertise necessary to further grow in the regulated natural gas utility business.

Regulated Electric Utilities-Canadian

The Canadian Regulated Electric Utilities are comprised of the wholly own subsidiaries: FortisAlberta, FortisBC, FortisOntario, Maritime Electric in Prince Edward Island, and Newfoundland Power. This division serves approximately one million customers. Earnings are generally determined under traditional cost of service and rate of return methodologies, resulting in earnings from certain subsidiaries being exposed to interest rates changes. Allowed ROE is determined for FortisAlberta, FortisBC, and Newfoundland Power using an automatic adjustment formula. **Lower long-term bond yields could result in lower allowed ROE, due to the impact of the lower yields on the Company's automatic adjustment formula.**

FortisAlberta is an electric distribution utility which owns and/or operates 106,000km of distribution lines and serves over 448,000 customers. FortisAlberta distributes electricity generated by other market participants to customers in the southern and central regions of Alberta. On February 13, 2008, FortisAlberta received approval to increase its rates by 6.8% in 2008 and 7.3% in 2009. An allowed ROE of 8.75% has been approved for FortisAlberta for 2008, an increase from 8.51% in 2007. Capital expenditures of \$264 million are forecast for 2008, and spending of \$296 million is expected in 2009, in order to meet the growth in this market and improve the reliability of the system. Capital expenditures are expected to average \$275 million over the next five years.

FortisBC generates and distributes electricity to approximately 154,000 customers in south central British Columbia. The Company owns four hydroelectric generating plants with a combined capacity of 223 MW and maintains 6,900 km of transmission and distribution lines. FortisBC received approval for a 2.9% increase in its 2008 rates and an allowed ROE of 9.02%, an increase from 8.77% in 2007. Capital expenditures of \$136 million are expected for 2008, with on average \$130 million expected to be invested annually over the next five years.

Significant rate base growth is planned for Western Canada over the coming years, with a rate base of more than \$3 billion expected for FortisAlberta and FortisBC combined in 2012. This is a 58% increase from the 2008 mid-year rate base of \$1.9 billion. We expect favourable customer growth rates for 2008 and 2009, however, FortisBC's customer growth rate will also depend somewhat on the state of the British Columbia forestry industry. We also expect Alberta's earnings for the next two years to be hindered slightly, as FortisAlberta's tax benefits begin to decrease. However, we expect this will be more than offset by the growth levels expected from the region, driven mainly by the oil and gas industry.

Newfoundland Power operates an integrated generation, transmission and distribution system throughout Newfoundland, serving 85% of electricity customers in the province. Newfoundland Power purchases approximately 90% of its electricity is approximately from the Crown corporation, Newfoundland and Labrador Hydro, and generates much of the remaining electricity necessary from its 23 smaller hydroelectric generating stations. Newfoundland Power also owns three diesel plants and three gas turbine facilities. Total generation capacity is 139 MW, of which 96 MW is hydroelectric generation. The Company also maintains approximately 11,000 km of transmission and distribution lines and serves approximately 232,000 customers.

Newfoundland Power has been approved for an average 2.8% increase in rates for 2008 and an allowed ROE of 8.95% +/- 50 basis points, up from 8.60% +/- 50 basis points in 2007. The utility does not expect to file its next general rate application until 2010 to set rates for 2011. A capital budget of \$53 million has been approved for 2008, which will be used toward replacing older and deteriorated equipment in the system. Newfoundland is not a growing market for Fortis, with rate base growth expected at 1% to 2% per year. This business has a purchased power rate structure which results in Newfoundland Power paying more on average for each KWh of power in the winter months, and less during the summer. Variances from the forecast unit cost of power are accumulated in a regulator-approved deferral account.

The **Other Canadian** segment is composed of FortisOntario and Maritime Electric. FortisOntario is focused on electricity distribution, transmission and generation, serving approximately 52,000 customers in Ontario. Allowed ROE at FortisOntario has been 9.0% for the past three years. Maritime Electric is the principal electric utility in Prince Edward Island, serving approximately 72,000 customers. The Company purchased more than 87% of its required amount of electricity from New Brunswick Power in 2007. Maritime Electric has an allowed ROE of 10% for 2008, down from 10.25% in 2007. Capital expenditures for FortisOntario and Maritime Electric for 2008 are \$38 million combined, demonstrating the low growth potential from these regions.

Regulated Electric Utilities-Caribbean

The **Caribbean Regulated Electric Utilities** are comprised of Fortis Turks and Caicos; Belize Electricity, in which Fortis holds a 70.1% interest; and Caribbean Utilities, in which Fortis holds approximately 54% controlling interest and is the sole provider of electricity on Grand Cayman, Cayman Islands. Fortis Turks and Caicos is the principal distributor of electricity on the Turks and Caicos Islands, and serves over 8,700 customers. Fortis Turks and Caicos has a diesel-fired generating capacity of 48 MW. Belize Electricity, the principal distributor in Belize, serves approximately 73,000 customers and has an installed generating capacity of 36 MW. Caribbean Utilities serves over 23,000 customers and has an installed generating capacity of approximately 137 MW. Capital expenditures of \$101 million have been allocated to the Caribbean Regulated Electric Utilities for 2008. The ROA approved for the utilities for 2008 ranges from 9% to 17.5%, depending on the country. Significant growth is expected from this region with annual sales growth from Belize Electricity, Caribbean Utilities, and Fortis Turks and Caicos expected at 6%, 8%, and 16%, respectively.

Non-Regulated

Currently, the Non-Regulated assets account for 8% of the total assets of Fortis; this is a lower percentage than has occurred in the past due to the Terasen acquisition. We expect Fortis will grow its Non-Regulated operations in order to increase this percentage. The Non-Regulated businesses generate a source of stable income to cover Fortis holding company expenses, which cannot be passed to the customer. **This division is expected to continue growing proportionally to the increase in corporate financing costs going forward.**

Non-Regulated Fortis Generation assets operate in three countries, with a combined capacity of 195 MW, and are primarily hydroelectric. Generating assets total \$235 million.

Table 1. Fortis Generation Capacity

	Plants	Fuel	Capacity (MW)
Belize	2	hydro	32
Ontario	8	hydro, thermal	88
Central Newfoundland	2	hydro	36
British Columbia	1	hydro	16
Upper New York State	4	hydro	23
Total	17		195

Source: Company Reports

Fortis plans to continue to pursue opportunities in the area of non-regulated hydroelectric generation. The Company has commenced construction of an 18 MW hydroelectric generating facility at Vaca on the Macal River in Belize. This facility is expected to begin operations in late 2009. This new facility will help to alleviate the impact of the expiration of the 75 MW Rankine rights in Ontario, which are expected to expire in April 2009.

According to the National Energy Board of Canada, small hydro has been the largest contributor to green power for quite a while. Small hydro facilities can generate electricity efficiently, do not depend on fuel prices, and have low operating and maintenance costs.

Non-Regulated Fortis Properties owns and operates 19 hotels with more than 3,500 rooms in eight Canadian provinces. Some hotel banners of Fortis Properties include: Delta, Holiday Inn, and Greenwood Inn. The business division has approximately 2.8 million square feet of commercial real estate property, primarily in Atlantic Canada.

Financials

2007 Results Summary

Fortis reported year-end results on February 7, 2008, with earnings for 2007 of \$193 million, a 31% increase over 2006, primarily due to the acquisition of Terasen in May. Earnings per common share were \$1.40 in 2007, down from \$1.42 in 2006, in part due to seasonality of earnings and common share dilution of approximately \$0.07 from the Terasen acquisition.

Canadian Regulated Utilities earned \$125 million in 2007, an 11% increase over 2006, due to customer growth in Alberta and British Columbia, higher corporate income tax recoveries at FortisAlberta, increased rates at FortisBC, and an after tax gain at FortisOntario.

Caribbean Regulated Utilities increased earnings 35% year-over-year to \$31 million in 2007, benefiting from the first full year of contributions from Fortis Turks and Caicos, and electricity sales growth and lower finance charges at Belize Electricity. Gains were somewhat hampered by the impact of unfavorable foreign exchange rates due to the strengthening Canadian dollar. Performance from Caribbean Utilities was hindered by a charge associated with the disposal of steam turbine assets.

Earnings from Non-Regulated Fortis Generation slipped 11% to \$24 million in 2007, hampered by lower hydroelectric production due to lower rainfall amounts. Fortis Properties' earnings were lifted 26% to \$24 million, benefiting from expanded hospitality operations in Western Canada, and a \$4 million corporate tax adjustment in regards to lower future corporate income tax rates.

Gross utility capital expenditures were \$790 million in 2007, which included \$120 million related to Terasen Gas from the date of acquisition. A large portion of the capital spending was related to FortisAlberta, as capital spending from the subsidiary was driven by load growth and inflation. Of that budget, 46% was spent associated with growth, primarily in the areas of Western Canada and the Caribbean.

The Terasen acquisition resulted in Standard & Poor's raising Fortis' unsecured debt credit rating to A- from BBB. This upgrade reflects the diversity achieved by the move into natural gas distribution. Fortis' credit rating also benefits from the Company running each subsidiary as a stand alone operation, maintaining low levels of debt at the company level, and continued growth from the regulated utility operations.

Record Breaking Dividend Growth

Dividends increased to \$0.82 per share in 2007, up from \$0.67 per share in 2006. Dividends will increase further in 2008, with a quarterly dividend of \$0.25 per share beginning in Q1 2008. **The 19% increase in quarterly dividends represents Fortis's 35th consecutive year of dividend growth, a record in Canada.** We expect Fortis to continue its dividend growth as the Company

continues to grow through acquisitions and organically. With a dividend payout of 58.6% for 2007, dividend growth is quite sustainable, in our opinion.

Chart 3. Dividend Increases for 35 Consecutive Years.

Source: Beacon Securities, Company Reports

As demonstrated in Chart 4, Fortis' share price has been inversely related to the Government of Canada's 10-year bond yield. Bond rates have shown an overall decline since Q2 2007, on concerns of a global economic slowdown. Fortis' share price has shown an overall inverse reaction during this period. Bloomberg consensus estimates forecast a further decline in the 10-year bond yield over 2008, before rebounding to expected levels of approximately 4.23% in Q1 2009.

Chart 4. Inverse Relationship between the Share Price for Fortis and 10-Year Government of Canada Bond Yields for 2000-March 19, 2008.

Source: Beacon Securities, Bank of Canada, Bloomberg

As demonstrated in Chart 5 below, Fortis' dividend yield is at a discount to the Government of Canada 10-year bond yield. Assuming bond yields do show further declines in 2008, before rebounding in the beginning of 2009, we would expect Fortis' dividend yields to exhibit similar movements going forward.

Chart 5. Relationship between the Dividend Yield for Fortis and 10-Year Government of Canada Bond Yields for 2000-2007.

Source: Beacon Securities, Bank of Canada, Bloomberg, Company Reports

As Fortis uses rate of return methodologies for several subsidiaries, lower long-term bond yields could impact the automatic adjustment formula used to calculate the allowed ROE for a subsidiary. **Lower bond yields may result in Fortis having to lower the rates for certain subsidiaries, due to a lower allowed ROE, thereby hampering earnings.**

Utility Capital Expenditures

Gross utility capital expenditures for 2008 are forecast at approximately \$890 million, with a large focus on Western Canada due to the three utilities' significant growth potential. Increased customer demand has resulted in the need for an expansion of infrastructure in those Western Canadian segments. Of this budget, approximately 50% is allocated towards growth driven by the three Western Canadian subsidiaries, Terasen, FortisAlberta, and FortisBC, and also in the Caribbean. The portion of the budget allocated to Newfoundland Power, FortisOntario, and Maritime Electric will primarily focus on the maintenance of these companies. We have forecast low growth rates for these Eastern Canadian subsidiaries for 2008 and 2009.

Chart 6. Comparison of Actual 2007 Gross Utility Capital Expenditures for 2007 to Forecast Gross Utility Capital Expenditures for 2008.

Gross Utility Capital Expenditures of \$790 Million for the Year Ended December 31, 2007

Forecast Gross Utility Capital Expenditures of \$890 Million for Year Ended December 31, 2008

Source: Beacon Securities, Company Reports

This budget will be financed through equity injections from the corporate level, cash from operations, drawdown on credit facilities, and some debt financing. We expect Fortis will require additional financing for its future growth projects over the next five years. Significant capital investment will be required over this time, with \$3 billion expected to be invested towards its electric business and approximately \$1 billion allocated towards gas distribution. These expected capital expenditures will be largely allocated towards the growth of the Western Canadian subsidiaries and the Caribbean.

Financial Outlook

Earnings Forecast

Continuing with the growth theme discussed above, we expect the majority of earnings to be generated from the Western Canadian subsidiaries and the Caribbean. We have forecast diluted EPS of \$1.53 for 2008 and \$1.57 for 2009, as demonstrated in Table 2 below.

Table 2. Beacon Estimates for 2008 and 2009

(\$C Millions except per share data)	2008E	2009E
EBITDA	\$999	\$1,039
Net Income	\$245	\$252
EPS (basic)	\$1.57	\$1.61
EPS (diluted)	\$1.53	\$1.57
Cash Flow	\$574	\$596
CFPS (basic)	\$3.66	\$3.80

Source: Beacon Securities

We expect earnings to be somewhat hampered going forward, due to the increased amount of debt acquired by Fortis, largely due to the Terasen acquisition. However, we expect growth in Western Canada and the Caribbean will help to alleviate the impact of the higher finance charges.

Table 3. Actual 2007 and Expected 2008 Segmented Earnings

(\$C Millions)	Segmented Earnings	
	2007A	2008E
Terasen Gas Companies	\$50	\$104
Western Canada	\$79	\$80
Newfoundland Power	\$30	\$31
Other Canadian	\$16	\$15
Caribbean	\$31	\$39
Fortis Generation	\$24	\$26
Fortis Properties	\$24	\$21
Corporate	-\$61	-\$70

Valuation and Recommendation

We are re-initiating coverage of Fortis with a BUY rating and 12-month target price of \$31.00. Our valuation is based on analysis of P/E and EV/EBITDA multiples and our dividend discount model. Our target equates to 19.7x 2009E earnings and 10.5x 2009E EV/ EBITDA. As demonstrated in the Appendix of this report, Fortis trades at higher P/E and EV/EBITDA ratios than that of its peer group. We believe this is justified considering the stability and lower risk profile of this Company.

The Fortis assets are well positioned for future growth opportunities through organic growth and acquisitions. We largely expect organic growth to occur through the Company's electrical infrastructure. We expect that Western Canada and the Caribbean will represent the main growth areas, and we have forecast regions such as Newfoundland, Prince Edward Island, and Ontario to show little to no growth. The Company's commitment to growth is demonstrated through the capital budget of \$4 billion over the next five years. This is a significant investment, which will allow the Company to meet the growing demand, which largely exists in the Alberta and British Columbia markets.

With earnings from Terasen of \$52 million in Q4 2007, we expect the Terasen acquisition to be accretive to earnings per share of Fortis in its first full year of ownership. Strong Q4 earnings from Terasen convey the integration of the acquisition is proceeding well thus far. We expect Fortis to acquire additional regulated gas utilities in Canada, in addition to electric utilities. We also expect the Company to use acquisitions as means to expand its footprint in the Caribbean, as well as the United States.

Fortis' risk is minimized through its focus on regulated utilities and diversification. **With sustainable dividend growth, continuous investment in rate base, and stable earnings, we**

view this blue-chip company as a lower risk investment for investors looking for a defensive stock during this time of economic uncertainty.

Management Team

Fortis is led by Stanley Marshall, President and CEO of Fortis since 1995. Mr. Marshall joined Newfoundland Power in 1979. Mr. Marshall serves on the Boards of the Fortis Utilities in Western Canada, and the Caribbean and on the Board of Fortis Properties. He is also a Director of Toromont Industries. Barry Perry is Vice President, Finance and CFO, and has served in this position since 2004. Mr. Perry serves on the Boards of Terasen, Maritime Electric, Newfoundland Power and FortisOntario.

Source: SEDI, Company Reports

Key Risks

- **Integration Risk** – The acquisition of Terasen has resulted in Fortis nearly doubling its asset size. Difficultly with the integration of Terasen could hinder future earnings.
- **Interest Rate Risk** – The capital requirements outlined by the Company will likely require additional debt financing.
- **International Risk** – With operations in Belize, the Cayman Islands and the Turks and Caicos, Fortis is subject to currency risk, sovereign risk, and the risk of hurricanes.
- **Regulatory Risk** – Regulated assets consist of 92% of Fortis' total assets, with each of the regulated utilities subject to some form of regulation which can impact future revenue and earnings. Each operating utility must ensure compliance with current regulations and proactive measures towards regulatory issues.
- **Risk of Fluctuating Bond Yields** – The share price of Fortis is inversely related to bond yields. Furthermore, lower bond yields may result in Fortis having to lower the rates for certain subsidiaries, thereby hampering earnings.

FORTIS INC.

Positive Q1 Results Fuelled By Terasen Acquisition

Summary

- Fortis Inc. reported Q1 2008 earnings of \$91 million, an increase over earnings of \$42 million in Q1 2007. Diluted EPS was \$0.55, up 57% from \$0.35 reported during Q1 2007. Fortis largely benefited from contributions from the Terasen acquisition. Earnings growth was partially offset by higher corporate costs associated with the Terasen acquisition and decreased quarterly earnings from Newfoundland Power, due to a shift in the quarterly distribution of annual purchased power expense.
- We have lowered our EPS estimates slightly to account for increased financing and amortization expense going forward. This decrease is partially offset by increased expected earnings from Fortis Properties. We have forecast diluted EPS of \$1.51 for 2008 and \$1.56 for 2009.
- We view the Q1 2008 results as positive and continue to rate Fortis a BUY with a 12-month target price of \$31.00.** Our target equates to 19.9x 2009E earnings and 10.3x 2009E EV/ EBITDA. Results from Q1 2008 continued to demonstrate the benefit of the Terasen acquisition, as the acquisition became accretive to EPS.
- Significant organic growth is expected from the Western Canadian utilities, and the Caribbean. The Company's commitment to growth is demonstrated through the capital budget of \$4 billion planned for the next five years. **We expect such significant rate base growth will fuel future earnings growth from Fortis.**

Company Description

Fortis Inc. is Canada's largest investor-owned distribution utility, with almost two million gas and electricity customers. The Company is headquartered in St. John's, NL. Its main focus is the ownership and operation of regulated utilities, with operations in five provinces and three Caribbean countries. Fortis also owns and operates non-regulated generation assets and commercial real estate and hotel assets.

Q1 2008 results

Fortis Inc. reported Q1 2008 earnings of \$91 million, in line with our estimate, and an increase over earnings of \$42 million in Q1 2007. Diluted EPS was \$0.55, in-line with our estimate of \$0.57, and up 57% from an EPS of \$0.35 reported during the same period last year. Fortis largely benefited from contributions from the Terasen acquisition. Earnings growth was partially offset by higher corporate costs associated with the Terasen acquisition and decreased quarterly earnings from Newfoundland Power, due to a shift in the quarterly distribution of annual purchased power expense.

Table 1. Results Summary

	Q1 2008	Q1 2007
Net earnings applicable to common shares	\$91 million	\$42 million
Basic EPS	\$0.58	\$0.38
Diluted EPS	\$0.55	\$0.35
Cash Flow from Operating Activities	\$188 million	\$94 million

Source: Company Reports

Segmented Results

Regulated Gas Utilities, composed of the **Terasen Gas** companies, reported earnings of \$58 million during the quarter, in line with our estimate of \$59 million. Terasen experiences seasonality with its earnings, with Q1 and Q4 contributing to the majority of annual earnings, as a substantial portion of the gas distributed is required for space heating.

Regulated Electric Utilities-Canadian reported quarterly earnings of \$33 million, a 15% decrease from earnings of \$39 million in Q1 2007, primarily due to the shift in the quarterly distribution of annual purchased power expense incurred by Newfoundland Power (this shift is discussed in more detail below).

FortisAlberta reported earnings of \$11 million, an 8% drop from \$12 million in earnings reported in Q1 2007. While FortisAlberta experienced a 4.9% increase in sales and a 6.8% increase in distribution rates compared to Q1 2007, this was offset by lower corporate tax recoveries, increased labour and employee-benefit costs, and higher amortization expenses. We expect these factors to continue to impact earnings going forward; however this will be offset by the growth levels expected from the region, which are driven mainly by the oil and gas industry.

FortisBC reported Q1 2008 annual earnings of \$12 million, comparable to Q1 2007. FortisBC benefited from increased electricity revenue, due to two rate increase which resulted in a combined 5% increase in rates compared to Q1 2007. This was partially offset by augmented power purchases, operating, amortization and interest expenses, and also reduced electricity sales. Electricity sales were down slightly by 4GWh to 875GWh, compared to the same quarter last year, reflecting a general slowdown in the forestry industry.

Newfoundland Power reported Q1 2008 earnings of \$6 million, a 45% drop from \$11 million reported in Q1 2007. Earnings were lower due to the shift in the quarterly distribution of annual

purchased power expense, which reduced quarterly earnings by \$6 million. Effective January 1, 2007, Newfoundland Power had a purchased power rate structure which resulted in Newfoundland Power paying more on average for each kWh of power in the winter months, and less during the summer. However in 2007, monthly revenue remained based on customer rates that reflected the average annual cost per kWh, and Newfoundland Power recognized monthly power purchase expense based on the forecast annual cost per kWh. Variances from the forecast unit cost of power were adjusted to the Purchased Power Unit Cost Variance Reserve (PPUCVR). In regards to the 2008 general rate application, the PUB ordered that, effective January 1, 2008, the PPUCVR be discontinued. The monthly purchased power expense now reflects the actual cost per kWh, which resulted in the seasonal shift in earnings experienced in Q1 2008. The Company will now incur lower earnings in the winter and higher earnings in the summer. However, annual earnings will not be impacted by this shift. Excluding the impact of the shift, quarterly earnings would have increased by \$1 million in Q1 2008.

Quarterly earnings from **Other Canadian Electric Utilities** were flat at \$4 million year-over-year. Subsequent to the quarter in April 2008, FERC issued an order stating it did not have jurisdiction to award FortisOntario a refund of \$3 million, in December 2007, from Niagara Mohawk Power Corp (NIMO), regarding a cross-border transmission interconnection agreement. FERC expects NIMO will be able to recover the funds. FortisOntario has until May 17, 2008 to request a rehearing. We expect Fortis will be required to repay this refund, which will negatively impact 2008 earnings from the Other Canadian Electric Utilities segment.

Regulated Electric Utilities-Caribbean earnings increased 75% from \$4 million in Q1 2007, to \$7 million in Q1 2008. Excluding the one-time loss of approximately \$2 million, associated with disposal of steam-turbine assets at Caribbean Utilities in Q1 2007, Regulated Electric Utilities-Caribbean earnings increased by \$1 million. The Caribbean earnings benefited from increased sales, but were hindered by the stronger Canadian dollar.

Earnings from **Fortis Generation** decreased 14%, from \$7 million in Q1 2007, to \$6 million in Q1 2008, hampered by lower hydroelectric production due to lower rainfall in Belize, and were also impacted by a stronger Canadian dollar.

Fortis Properties earnings increased year-over-year from \$2 million in Q1 2007 to \$3 million in Q1 2008. Earnings benefited from contributions from the acquisition of the Delta Regina.

Quarterly **Corporate** expenses were \$16 million, a 60% increase over expenses of \$10 million in Q1 2007. This was largely the result of finance changes associated with the Terasen acquisition.

Table 2. Segmented Results Summary

Source: Company Reports

Capital expenditures were approximately \$162 million in Q1 2008, with capital expenditures expected to total approximately \$900 million in 2008. This capital budget is primarily focused on growth in the Western Canadian operations (Terasen, FortisAlberta, and FortisBC) and the Caribbean operations.

Forecast

We have lowered our EPS estimates slightly to account for increased financing and amortization expenses. This decrease is partially offset by our increased earnings estimates for Fortis Properties, due to higher than expected earnings growth. This is largely a result of contributions from the Delta Regina acquisition. We have forecast diluted EPS of \$1.51 for 2008 and \$1.56 for 2009, as demonstrated in Table 3 below.

Table 3. Beacon Securities' Forecast

(C\$ Millions except per share data)	<u>2008E</u>		<u>2009E</u>	
	<u>New</u>	<u>Previous</u>	<u>New</u>	<u>Previous</u>

EPS (basic)	\$1.55	\$1.57	\$1.61	\$1.61
EPS (diluted)	\$1.51	\$1.53	\$1.56	\$1.57
Cash Flow	\$591	\$574	\$605	\$596
CFPS (basic)	\$3.77	\$3.66	\$3.86	\$3.80

Source: Beacon Securities

We expect earnings to continue to be impacted by increased finance charges, the result of an increased amount of debt acquired by Fortis, largely due to the Terasen acquisition. Furthermore, we expect additional financing and drawdown on existing credit facilities will be required to finance the 2008 capital budget of approximately \$900 million. This budget is also expected to be financed through equity injections from the corporate level and cash from operations.

We expect Fortis will require additional financing for its future growth projects over the next five years. Significant capital investment will be required over this time, with \$3 billion expected to be invested towards its electric business and approximately \$1 billion allocated towards gas distribution. These expected capital expenditures will be largely allocated towards the growth of the Western Canadian subsidiaries and the Caribbean.

Valuation and Recommendation

We view the Q1 2008 results as positive and continue to rate Fortis a BUY with a 12-month target price of \$31.00. Our valuation is based on analysis of P/E and EV/EBITDA multiples and our dividend discount model. Our target equates to 19.9x 2009E earnings and 10.3x 2009E EV/EBITDA.

Results from Q1 2008 continued to demonstrate the benefit of the Terasen acquisition, as the acquisition became accretive to EPS. We believe the Terasen acquisition is an excellent geographic complement with Fortis' electric utilities in Western Canada. The acquisition provides Fortis with the experience and expertise necessary to further grow in the regulated natural gas utility business, and we expect future regulated gas utility acquisitions from the Company.

Significant rate base growth is planned for Western Canada over the coming years, with a rate base of more than \$3 billion expected for FortisAlberta and FortisBC combined in 2012. **We expect organic growth to occur largely through the Company's electrical infrastructure in Western Canada and the Caribbean.** We have forecast regions such as Newfoundland, Prince Edward Island, and Ontario to show little to no growth. The Company's commitment to growth is demonstrated through the capital budget of \$4 billion over the next five years. **We expect such significant rate base growth will fuel future earnings growth from Fortis.**

Key Risks

- **Integration Risk** – The acquisition of Terasen has resulted in Fortis nearly doubling its asset size. Difficulty with the integration of Terasen could hinder future earnings.
- **Interest Rate Risk** – The capital requirements outlined by the Company will likely require additional debt financing.
- **International Risk** – With operations in Belize, the Cayman Islands and the Turks and Caicos, Fortis is subject to currency risk, sovereign risk, and the risk of hurricanes.
- **Regulatory Risk** – Regulated assets consist of 92% of Fortis' total assets, with each of the regulated utilities subject to some form of regulation which can impact future revenue and earnings. Each operating utility must ensure compliance with current regulations and proactive measures towards regulatory issues.
- **Risk of Fluctuating Bond Yields** – The share price of Fortis is inversely related to bond yields. Furthermore, lower bond yields may result in Fortis having to lower the rates for certain subsidiaries, thereby hampering earnings.

FORTIS INC.

Reports Neutral Q2 After One-Time Charges

Summary

- Fortis reported Q2'08 earnings of \$29 million, down from \$41 million in Q2'07. Diluted EPS was \$0.18, lower than our estimate of \$0.28 and EPS of \$0.27 reported in Q2'07. Q2 results were impacted by a \$13 million charge at BEL and a one-time charge of \$2 million at FortisOntario. **Without these one-time charges, EPS would have been \$0.28.**
- We have lowered our estimates to account for the decision in Belize and the one-time charges. Our estimates have also been lowered due to an increase in forecasted amortization and financing costs and a stronger Canadian dollar. **We have forecast diluted EPS of \$1.43 for 2008 and \$1.51 for 2009.**
- We are lowering our 12-month target price from \$31.00 to \$30.00. We maintain our BUY recommendation.** Our target equates to 19.9x 2009E earnings and 9.6x 2009E EV/EBITDA. We view the recent decline in Fortis' share price as an overreaction to the PUC's decision on BEL's 2008/2009 rate application.
- We remain encouraged by Fortis' growth potential, with a capital budget of over \$4.5 billion planned for the next five years.** We expect organic growth to occur largely through the electric operations in Western Canada and the Caribbean. With Fortis' expertise in both electrical and gas regulated utilities, **we expect Fortis to look to the U.S. for future acquisitions, where many utilities are both gas and electric.**

Q2 2008 results

Fortis Inc. reported Q2 2008 earnings of \$29 million, a 29% decrease over earnings of \$41 million in Q2 2007. Diluted EPS was \$0.18, lower than our estimate of \$0.28, and down 33% from a diluted EPS of \$0.27 reported during the same period last year. Q2 results were impacted by a \$13 million (\$0.08 per share) charge that represented disallowed previously incurred fuel and purchased power costs at Belize Electricity. This charge was the result of a decision by the Public Utilities Commission of Belize (PUC) on BEL's rate 2008/2009 application.

FortisOntario incurred a one-time charge of \$2 million associated with the repayment of interconnection agreement amounts received in Q4 2007. **Without these one-time charges, EPS would have been \$0.28.** Earnings were also hampered by higher corporate costs associated with the Terasen acquisition and higher corporate income taxes at FortisAlberta. Fortis' earnings were given support by contributions from the Terasen acquisition and increased quarterly earnings from Newfoundland Power, due to a shift in the quarterly distribution of annual purchased power expense.

Table 1. Results Summary (in Canadian dollars)

	<i>Q2 2008</i>	<i>Q2 2007</i>

Segmented Results

Regulated Gas Utilities, composed of the **Terasen Gas** companies, reported earnings of \$12 million during the quarter, up from \$1 million in Q2 2007. However, last year's contributions from Terasen commenced from May 17, 2007. On a full quarter basis, earnings are comparable. Gains attributed to an increase in allowed ROEs, effective January 1, 2008, were offset by increased amortization costs and higher finance costs. Terasen experiences seasonality with its earnings, with Q1 and Q4 contributing to the majority of annual earnings, as a substantial portion of the gas distributed is required for space heating. In Q3, Terasen is expected to incur an earnings benefit of \$7.5 million, after settling historical tax matters.

Construction began on the \$200 million liquefied natural gas storage facility on Vancouver Island in Q2. Construction is expected to take three years, with the facility expected to come into service in late 2011.

Regulated Electric Utilities-Canadian reported quarterly earnings of \$28 million, a 15% decrease from earnings of \$33 million in Q2 2007, excluding the one-time charge from FortisOntario. The decrease was largely the result of higher future income tax expense at FortisAlberta. This expense was partially offset by increased quarterly earnings from Newfoundland Power.

FortisAlberta reported earnings of \$7 million, a 53% drop from \$15 million in earnings reported in Q2 2007. While FortisAlberta experienced a 3.2% increase in energy deliveries year-over-year in Q2 and incurred higher rates than the same period last year, this was more than offset by higher future income tax expense. FortisAlberta incurred a \$4 million future income tax expense associated with the AESO charges deferral account and the timing of the accounts' collection. This account captures the difference between the amounts charged to FortisAlberta by AESO for transmission tariffs and the amount collected from FortisAlberta's customers for the transmission tariff component of rates. If the amounts charged by AESO are greater than that collected from customers, then the difference is deferred as a regulatory asset for future recovery from customers, subject to regulatory approval. **When the deferral accounts are collected, FortisAlberta is expected to incur a future income tax recovery. The expected period until recovery is approximately two years.**

Increased contracted manpower costs, labour and employee-benefit costs, in addition to higher amortization costs and financing charges, also hindered earnings. We expect these factors to continue to impact earnings going forward; however this will be more than offset by the growth levels expected from the region, which are driven mainly by the oil and gas industry. We are modeling a customer growth rate of 2.5% for the remainder of 2008 and 2009.

FortisBC reported Q2 2008 earnings of \$7 million, a 17% rise over \$6 million in Q2 2007. The benefits of higher rates were partially offset by higher finance charges. FortisBC expects to file a 2009 Revenue Requirements application with the BCUC in Q4 2008.

Newfoundland Power reported Q2 2008 earnings of \$10 million, a 25% increase from \$8.0 million reported in Q2 2007. This increase in earnings was largely due to the shift in the quarterly distribution of annual purchased power expense, which increased quarterly earnings by \$2.5 million. Higher rates also supported earnings during the quarter. This increase was partially offset by a decrease of \$0.5 million related to the timing differences of operating expenses. As of 2008, the Company will now incur lower earnings in the winter and higher earnings in the summer. However, annual earnings will not be impacted by this shift. A more detailed explanation of the shift in quarterly earnings can be viewed in *Fortis Inc: Positive Q1 Fuelled by Terasen Acquisition – May 2, 2008*.

Quarterly earnings from **Other Canadian Electric Utilities** tumbled 50% year-over-year to \$2 million, due to a one-time repayment of a \$3 million (\$2 million after-tax) refund to Niagara Mohawk Power Corp (NIMO). In April 2008, FERC issued an order stating it did not have jurisdiction to award FortisOntario a refund of \$3 million, in December 2007, from NIMO regarding a cross-border transmission interconnection agreement. Without the one-time charge, quarterly earnings would have been comparable year-over year.

Regulated Electric Utilities-Caribbean earnings plunged from \$8 million in Q2 2007, to a loss of \$5 million in Q2 2008. This loss was the result of a \$13 million charge (Fortis' 70% share of \$18 million) associated with the PUC's decision on BEL's 2008/2009 rate application. The PUC ordered a BZ\$36 million (C\$13 million) retroactive adjustment associated with BEL prior year's results. This adjustment disallowed previously incurred fuel and power purchase costs. Furthermore, the PUC reduced BEL's target allowed ROA to 10% from 12%. Without this charge, earnings would have been comparable year-over-year. Earnings from the Caribbean were

also impacted by a stronger Canadian dollar, higher operating and amortization expenses, and a 3.25% reduction in Caribbean Utilities' rates, effective January 1, 2008. This rate reduction is expected to reduce annual revenue by US\$2.1 million. The Caribbean earnings did benefit from increased sales and a change in the method of calculating fuel costs under Caribbean Utilities' new transmission and distribution license, which resulted in a movement of deferred fuel costs. As of June 1, 2009, Caribbean Utilities will be permitted to adjust basic electricity rates with a formula based on published consumer price indices, thereby adjusting for inflation.

On July 25, 2008, BEL filed an application for judicial review and appeal of the PUC's decision with the Supreme Court of Belize. Fortis knows it has a strong case in Belize, as the PUC's decision is not good regulatory practice. The decision violates both the established regulatory practice and contractual obligations made by the government of Belize, when Fortis made its initial investment into the country. Fortis is optimistic it will see some changes, but it will take at least a year for a decision to be reached. This decision has the potential to hinder Fortis' share of BEL's earnings by approximately \$5 million over the next year. A recent salary increase at BEL is not expected to further hinder BEL's earnings to a great extent. BEL currently represents approximately 2% of the total assets of Fortis.

Earnings from **Fortis Generation** rose 40%, from \$5 million in Q2 2007, to \$7 million in Q2 2008, benefiting from augmented hydroelectric production in Newfoundland due to higher rainfall and increased average wholesale prices. A stronger Canadian dollar hampered gains slightly.

Fortis Properties earnings increased 17% year-over-year from \$6 million in Q2 2007 to \$7 million in Q2 2008. Earnings benefited from contributions from the acquisition of the Delta Regina and improved performance from Atlantic Canada's hospitality operations.

Quarterly **Corporate** expenses were \$18 million, a 50% increase over expenses of \$12 million in Q2 2007. This was largely the result of finance charges associated with the Terasen acquisition.

Corporate	-18	-12

Source: Company Reports

Capital expenditures were approximately \$381 million in H1 2008, and \$219 million in Q2 2008, with capital expenditures expected to total approximately \$900 million in 2008. Much of the H1 capital expenditures were allocated towards Terasen Gas companies. Capital expenditures over

the next five years are expected to exceed \$4.5 billion, with over \$1 billion allocated towards gas distribution and the remaining \$3.5 billion mostly towards electric distribution at FortisAlberta, FortisBC, and the Caribbean. There is not a significant amount expected to be invested in the Non-Regulated operations during this time period, with \$175 million estimated to be spent from 2009 to 2013. The rate base is expected to grow over this time from a current \$6.8 billion to \$9.4 billion in mid-2013.

Forecast & Outlook

We have lowered our 2008 estimates to account for the one-time charges and FortisAlberta's income tax expense that occurred during the quarter. We have also forecast increased amortization and financing expenses going forward for the Western operations and the Caribbean, due to the significant amount of capital investment planned for the areas. We have lowered our earnings estimates from the Caribbean operations for 2008 and 2009, to account for the PUC's decision on BEL's rate application and changes in forecasted exchange rate from Bloomberg consensus estimates. We have forecast higher earnings from Terasen for 2008, due to the \$7.5 million earnings benefit expected in Q3. We increased our earnings forecast for Fortis Properties, reflecting an increase in forecasted hospitality revenue. **We have forecast diluted EPS of \$1.43 for 2008 and \$1.51 for 2009**, as demonstrated in Table 3 below.

Source: Beacon Securities

We expect earnings to begin to reflect the Company's growth efforts in 2009. However, we also expect 2009 earnings to be hampered by lower contributions from Fortis Generation, due to the expiration of the 75 MW Rankine rights in Ontario, which are expected to expire in April 2009. This will be partially offset by the 18 MW hydroelectric generating facility at Vaca on the Macal River in Belize when it begins its operations in late 2009.

We expect earnings to continue to be impacted by increased finance charges, the result of an increased amount of debt acquired by Fortis, largely due to the Terasen acquisition. Furthermore, we expect additional financing and drawdown on existing credit facilities will be required to finance the 2008 capital budget of approximately \$900 million. This budget is also expected to be financed through equity injections from the corporate level and cash from operations. We anticipate Fortis will require additional financing for its future growth projects over the next five years.

Valuation and Recommendation

We view the Q2 2008 results as neutral; when the one-time charges are removed, earnings are relatively flat year-over-year. **Due to the decrease in our 2009 estimates, we are lowering our 12-month target price from \$31.00 to \$30.00. We maintain our BUY recommendation.** Our valuation is based on analysis of P/E and EV/EBITDA multiples and our dividend discount model. Our target equates to 19.9x 2009E earnings and 9.6x 2009E EV/ EBITDA. We view the recent decline in Fortis' share price as an overreaction to the PUC's decision of BEL's 2008/2009 rate application, particularly where Belize accounts for approximately 2% of Fortis' total assets. Including dividends, there is a potential return of approximately 16% over the next year, which justifies our BUY rating.

We remain encouraged by Fortis' growth potential, with significant rate base growth planned for Western Canada over the next five years. **We expect organic growth to occur largely through the Company's electrical infrastructure in Western Canada and the Caribbean.** We have forecast regions such as Newfoundland, Prince Edward Island, and Ontario to show little to no growth. The Company's commitment to growth is demonstrated through the capital budget of over \$4.5 billion planned for the next five years. **We expect such significant rate base growth will fuel future earnings growth from Fortis.** We also expect further growth through acquisitions. With its expertise both in electrical and gas regulated utilities, **we expect Fortis to look to the U.S. for future acquisitions, where many utilities are both gas and electric.**

Key Risks

- **Integration Risk** – The acquisition of Terasen has resulted in Fortis nearly doubling its asset size. Difficulty with the integration of Terasen could hinder future earnings.
- **Interest Rate Risk** – The capital requirements outlined by the Company will likely require additional debt financing.
- **International Risk** – With operations in Belize, the Cayman Islands, and the Turks and Caicos, Fortis is subject to currency risk, sovereign risk, and the risk of hurricanes.
- **Regulatory Risk** – Regulated assets consist of 92% of Fortis' total assets, with each of the regulated utilities subject to some form of regulation which can impact future revenue and earnings. Each operating utility must ensure compliance with current regulations and proactive measures towards regulatory issues.
- **Risk of Fluctuating Bond Yields** – The share price of Fortis is inversely related to bond yields. Furthermore, lower bond yields may result in Fortis having to lower the rates for certain subsidiaries, thereby hampering earnings.

FORTIS INC.

Reports Neutral Q1 Results - Continues to Demonstrate Stability

Highlights

- Fortis Inc. reported neutral Q1 results, with earnings of \$92 million, or \$0.54 per share, compared to \$91 million, or \$0.58 per share, reported in Q1 2008. Q1 2009 EPS was slightly lower than our estimate of \$0.55, and lower than consensus of \$0.57. Increases in earnings from FortisBC and FortisAlberta were offset by lower earnings at the Caribbean Regulated Utilities and Fortis Properties.
- FortisAlberta and FortisBC benefited from investment in electrical infrastructure and higher rates. Caribbean earnings were hampered by reduced demand (due to cooler weather and the economic downturn) and decreases in CUC's and BEL's allowed rate of return. Fortis Properties was hindered by one-time operating costs associated with the Sheraton Hotel Newfoundland and lower hotel occupancies.
- We have decreased our estimates from the Caribbean operations and Fortis Properties. We believe growth from the Regulated Caribbean operations will continue to be hampered by decreased demand and lower levels of tourism due to the global economic slowdown. We expect hotel occupancies at Fortis Properties will be lower for 2009 and 2010. **We are decreasing our 2009 EPS estimate from \$1.50 to \$1.47, and our 2010 EPS from \$1.57 to 1.53.**
- With the reduction of our 2009 and 2010 estimates, **we are lowering our 12-month target price from \$28.25 to \$27.00. We maintain our BUY recommendation.** Our target equates to 17.7x 2010E EPS and 9.6x 2010E EV/EBITDA. In addition to providing sustainable dividend growth and stable earnings through its Regulated Utilities, Fortis offers strong rate base growth.

2010E: was \$1.57

Company Description

Fortis Inc. is Canada's largest investor-owned distribution utility, with more than two million gas and electricity customers. The Company is headquartered in St. John's, NL. Its main focus is the ownership and operation of regulated utilities, with operations in five provinces and three Caribbean countries. Fortis also owns and operates non-regulated generation assets and commercial real estate and hotel assets.

*Please view the disclaimer at the end of this report

Q1 2009 Results

Fortis Inc. reported neutral Q1 results. Q1 2009 earnings were \$92 million, or \$0.54 per share, compared to \$91 million, or \$0.58 per share, reported in Q1 2008. Q1 2009 EPS was slightly lower than our estimate of \$0.55 per share, and lower than consensus of \$0.57. Increases in earnings from FortisBC and FortisAlberta were offset by lower earnings at the Caribbean Regulated Utilities and Fortis Properties.

Exhibit 1. Results Summary (in Canadian dollars)

	Q1 2009	Q1 2008
Net Earnings Applicable to Common Shares	\$92 million	\$91 million
Reported Basic EPS	\$0.54	\$0.58
Reported Diluted EPS	\$0.52	\$0.55
Cash Flow from Operations	\$229 million	\$193 million

Source: Company Reports, Beacon Securities

Segmented Results

The **Terasen Gas** companies reported Q1 earnings of \$58 million, in line with earnings of \$58 million reported in Q1 2008. Benefits from increased customer delivery rates and a lower effective corporate income tax rate, were offset by higher labour and employee-benefit costs.

Rate applications for 2010 are expected to be filed with the BCUC by both Terasen Gas Inc. (TGI) and Terasen Gas (Vancouver Island) Inc. (TGVI) in the summer of 2009. Approval of rates from the BCUC is required, as the current performance-based settlement agreements expire at the end of 2009. As part of this rate filing, TGI and TGVI plan to seek a review of the current generic ROE adjustment mechanism and of the deemed equity component of the capital structure.

FortisAlberta reported earnings of \$12 million, a 9% lift from \$11 million in earnings reported in Q1 2008, benefiting from growth in electrical infrastructure investment and an increase in customer distribution rates. These contributions to earnings were partially offset by increased labour and employee-benefit costs, in addition to higher amortization costs and finance charges. We expect amortization and finance expenses to continue to increase, as much investment is expected in the area over the next five years.

FortisAlberta is currently involved in a Generic Cost of Capital Proceeding with the AUC, which will include reviewing 2009 ROE calculations and capital structures for regulated gas, electric, and pipeline utilities in Alberta. The results of this proceeding are expected in the fall of 2009. FortisAlberta expects to file its 2010/2011 Revenue Requirements Application in Q2 2009.

FortisBC reported Q1 2009 earnings of \$14 million, a 17% increase over \$12 million reported in Q1 2008. FortisBC earnings benefited from growth in electrical infrastructure investment and increased electricity rates. This was partially offset by increases in energy supply costs, higher operating costs, and higher amortization expense associated with a significant investment in capital expenditures.

Newfoundland Power reported Q1 2009 earnings of \$6 million, in line with Q1 2008. Electricity sales growth was offset by the impact of higher demand charges from Newfoundland and Labrador Hydro and increased amortization costs.

Quarterly earnings from **Other Canadian Electric Utilities** were \$5 million, up from \$4 million in Q1 2008. High rates more than offset higher finance charges. Approval by the Ontario Ministry of Finance, for the acquisition of a 10% ownership interest in Grimsby Power, is expected in Q2 2009.

Regulated Electric Utilities-Caribbean earnings fell from \$7 million in Q1 2008, to \$6 million in Q1 2009. **Excluding one-time gains of approximately \$2 million at Fortis Turks and Caicos, Q1 2009 earnings would be \$4 million (a \$3 million decrease).** Earnings were hampered by cooler weather, and the global economic downturn, both of which reduced energy demand. Earnings from the Caribbean were also impacted by the decrease in Caribbean Utilities' and Belize Electricity's allowed rate of return. Increased amortization costs also weighed down earnings. These factors were partially offset by a weaker Canadian dollar. The favourable impact from the stronger U.S. dollar contributed approximately \$1 million to earnings.

We expect sales growth to be hampered by the impact of the slowdown in the U.S. economy on the Caribbean tourism industry. However, a weaker Canadian dollar should help to alleviate the impact of the weaker economy. We believe additional growth opportunities from BEL will be minimal, as approximately \$9 million of Belize Electricity's indebtedness (at the end of Q1) did not meet certain debt covenant ratios. The lenders have been informed as to the situation and the necessary waivers have been requested. This default was the result of the PUC's decision on BEL's 2008/2009 rate application. This is the third quarter in a row that BEL has been unable to meet these debt covenant ratios.

Earnings from **Fortis Generation** were \$6 million in Q1 2009, comparable to the same period last year. Gains attributed to a stronger U.S. dollar, and increased hydroelectric production in Belize, were offset by lower production and decreased wholesale market energy prices in both Upper New York State and Ontario.

Fortis Properties earnings dropped 33% year-over-year from \$3 million in Q1 2008 to \$2 million in Q1 2009. Earnings were hindered by one-time operating costs associated with Sheraton Hotel Newfoundland and lower hotel occupancies. In April 2009, Fortis Properties purchased a Holiday Inn Select (214 room) in Windsor, Ontario for \$7 million.

Exhibit 2. Segmented Results Summary

	Q1 2009 Earnings (C\$ Millions)	Q1 2008 Earnings (C\$ Millions)
Terasen Gas Companies	58	58
FortisAlberta	12	11
FortisBC	14	12
Newfoundland Power	6	6
Other Canadian	5	4
Caribbean	6	7
Fortis Generation	6	6
Fortis Properties	2	3
Corporate	-17	-16

Source: Company Reports

Capital expenditures amounted to \$219 million in Q1 2009 alone. Gross capital expenditures for 2009 are forecast at \$1 billion. Future organic growth will come from major projects such as the

\$200 million LNG storage facility at Terasen Gas, the \$161 million Automated Meter Infrastructure Project at FortisAlberta, FortisBC's \$139 million Okanagan Transmission Reinforcement Project, and the US\$53 million 19 MW hydroelectric generating facility in Belize.

Forecast & Outlook

We have decreased our estimates from the Regulated Caribbean operations and Fortis Properties. We believe growth from the Regulated Caribbean operations will continue to be hampered by decreased demand and lower levels of tourism due to the global economic slowdown. We expect hotel occupancies at Fortis Properties will be lower for 2009 and 2010. As demonstrated in Exhibit 3, **we are decreasing our 2009 EPS estimate from \$1.50 to \$1.47, and our 2010 EPS from \$1.57 to 1.53.** Earnings from Fortis Generation will be lower in Q2, due to the expiration of the 75 MW Rankine rights in Ontario, which expired in April 2009. This had previously been factored into our estimates.

Exhibit 3. Beacon Securities' Forecast

(\$C Millions except per share data)	<u>2009E</u>		<u>2010E</u>	
	<u>New</u>	<u>Previous</u>	<u>New</u>	<u>Previous</u>

Source: Beacon Securities, Bloomberg

Fortis is confident in its ability to renew debt upon maturity over the coming years. Terasen and FortisAlberta each raised \$100 million of 30-year unsecured debentures at 6.55% and 7.06%, respectively. Long-term debt totalled \$5.1 billion, as of the end of Q1 2009. Long-term debt maturities and repayments total approximately \$234 million for the next year. Management expect long-term debt maturities and repayments to average approximately \$170 million over the next five years. The Company had consolidated credit facilities of \$2.2 billion, with \$1.6 billion unused as of March 31, 2009, which will provide necessary flexibility. Approximately \$2 billion of the total credit facilities are committed facilities, with many having maturities between 2011 and 2013.

Valuation and Recommendation

With the reduction of our 2009 and 2010 estimates, **we are lowering our 12-month target price from \$28.25 to \$27.00. We maintain our BUY recommendation.** Our valuation is based on analysis of P/E and EV/EBITDA multiples and our dividend discount model. Our target equates to 17.7x 2010E EPS and 9.6x 2010E EV/EBITDA. Including dividends, there is a potential return of approximately 26% over the next year, which justifies our BUY rating. The dividend currently yields 4.7%.

In addition to providing sustainable dividend growth and stable earnings through its Regulated Utilities, Fortis offers strong rate base growth, with rate base growth expected to average 7% over the next 5 years. Capital expenditures over the next five years are expected to exceed \$4.5 billion, with approximately \$1.2 billion allocated towards gas distribution, \$3.1 billion towards the regulated electric utilities (primarily FortisAlberta, FortisBC, and the Caribbean), and \$200 million towards the Non-Regulated operations. **We expect Fortis' five-year capital program should drive growth in earnings, with the majority of organic growth coming from the Regulated Electric Utilities in Western Canada and the Caribbean.**

Key Risks

- **Interest Rate Risk** – The capital requirements outlined by the Company will likely require additional debt financing.
- **International Risk** – With operations in Belize, the Cayman Islands, and the Turks and Caicos, Fortis is subject to currency risk, sovereign risk, and the risk of hurricanes.
- **Regulatory Risk** – Regulated assets consist of 92% of Fortis' total assets, with each of the regulated utilities subject to some form of regulation which can impact future revenue and earnings. Each operating utility must ensure compliance with current regulations and proactive measures towards regulatory issues.
- **Risk of Fluctuating Bond Yields** – The share price of Fortis is inversely related to bond yields. Furthermore, lower bond yields may result in Fortis having to lower the rates for certain subsidiaries, thereby hampering earnings.

FORTIS INC.

Positive Q1 - Increasing Target Price

Highlights

- Fortis Inc. reported Q1 earnings that were slightly lower than we expected. However, Q1 was still a positive quarter, in our opinion. Q1 2010 earnings were \$100 million, or \$0.58 per share, compared to \$92 million, or \$0.54 per share, reported in Q1 2009. Q1 2010 EPS was 3% weaker than our estimate of \$0.60 per share, but in line with consensus. Q1 2010 results benefited from strong earnings from Terasen and FortisAlberta, partially offset by weaker results from the Caribbean operations and Fortis Generation. Earnings gained on the increase in allowed ROE and equity component at FortisAlberta and Terasen Gas.
- We have lowered our estimates due to weakness from Fortis Generation. We have also factored in higher financing charges from FortisAlberta and the Corporate segment. This has been partially offset by an increase in our Terasen estimates to reflect stronger than expected Q1 results. **We are decreasing our 2010 basic EPS estimate from \$1.71 to \$1.65, and our 2011 EPS is dropping from \$1.82 to \$1.76.**
- Despite the decrease to our estimates, **we are increasing our 12-month target price to \$31.25 from \$30.50, but maintaining our HOLD recommendation.** We are adjusting our price target to now reflect F2011 estimates. Our target equates to 17.8x 2011E EPS and 9.8x 2011E EV/EBITDA. The dividend currently yields 4.0%. Fortis' focus on organic growth and capital investment will continue to drive earnings growth, in our opinion. We are encouraged by Fortis' ability to continually grow its rate base, while maintaining its stability.

Q1 2010 Results

Fortis Inc. reported Q1 earnings that were slightly lower than we expected. Q1 2010 earnings were \$100 million, or \$0.58 per share, compared to \$92 million, or \$0.54 per share, reported in Q1 2009. Q1 2010 EPS was 3% weaker than our estimate of \$0.60 per share, and in line with the consensus estimate of \$0.58. Q1 2010 results benefited from strong earnings from Terasen and FortisAlberta, partially offset by weaker results from the Caribbean operations and Fortis Generation.

Exhibit 1. Results Summary (in Canadian dollars)

	Q1 2010	Q1 2009
Net Earnings Applicable to Common Shares	\$100 million	\$92 million
Reported Basic EPS	\$0.58	\$0.54
Reported Diluted EPS	\$0.56	\$0.52

Source: Company Reports, Beacon Securities

Segmented Results

The **Terasen Gas** companies reported strong earnings of \$73 million, up from earnings of \$58 million reported in Q1 2009. Earnings benefited from the increase in allowed ROEs, effective July 1, 2009. TGI's ROE was set at 9.5%, up from 8.47%. The BCUC decided the premium should be 50bp for both TGI and TGV (ROE of 10%). Earnings were also boosted by an increase in the equity component for TGI from 35% to 40%, effective January 1, 2010. Lower finance charges also lifted earnings. Terasen earnings were higher than we expected as we underestimated the impact of the ROE decision on Q1 earnings, and overestimated finance charges. This was partially offset by higher operating expenses and increased amortization costs.

FortisAlberta reported earnings of \$14 million, an increase of 17% from the \$12 million in Q1 2009. FortisAlberta gained on higher rates, a positive ROE decision, and customer growth. Earnings were boosted by an increase in allowed ROE to 9.0% from the interim rate of 8.51%, and an increase in equity thickness from 37% to 41%. FortisAlberta also benefited from customer growth. These contributions to earnings were partially offset by higher operating expenses, amortization costs, and finance charges. While FortisAlberta showed positive earnings growth, results were lower than we had forecast partially due to financing charges coming in higher than we expected.

FortisBC reported Q1 earnings of \$14 million, in line with the same period last year. The impact of increased electricity rates was offset by higher financing expenses associated with a significant investment in capital expenditures and lower energy sales. Effective January 1, 2010, the allowed ROE increased to 9.90% from 8.87%.

Newfoundland Power reported Q1 2010 earnings of \$7 million, up 17% from \$6 million in Q1 2009. Higher rates and increased sales were offset by higher costs associated with pensions, wages, and severance, in addition to increased financing costs.

Q1 earnings from **Other Canadian Electric Utilities** were flat at \$5 million, compared to Q1 2009.

Regulated Electric Utilities-Caribbean earnings decreased 33% year-over-year to \$4 million. This was in line with our expectations. An unfavourable foreign currency translation hampered earnings in Q1 2010, plus Fortis Turks and Caicos incurred a one-time gain of \$1 million in Q1 2009. Excluding these impacts, earnings were flat year-over-year. Earnings were supported by higher sales and a rate increase at CUC, which was offset by increased financing charges.

Q1 earnings from **Fortis Generation** were \$2 million, down from \$6 million in the same period last year, weaker than we had expected. Earnings from Fortis Generation were lower, due to the expiration of the 75 MW Rankine rights in Ontario, which expired in April 2009 (we had factored into our estimates). Earnings were also hampered by lower production in Belize, due to lower rainfall, which we had not forecast. The 19-MW Vaca hydroelectric generating facility was commissioned in March 2010.

Fortis Properties earnings were flat year-over-year at \$2 million. Contributions from the Real Estate division, the Holiday Inn Select Windsor, and hotel operations in Atlantic Canada were offset by lower hotel occupancies at the western Canadian hotels. We continue to expect hotel occupancies at Fortis Properties will be lower for the remainder of 2010.

Corporate expenses were higher year-over-year at \$21 million in Q1 2010, up from \$17 million in Q1 2009, largely due to higher preference share dividends from the issuance of First Preference Shares, Series H in January 2010. Higher than expected finance charges also increased Corporate expenses.

Forecast & Outlook

We have lowered our estimates due to weakness in the Fortis Generation earnings. We are forecasting the low production levels from Belize will persist into Q2. The Vaca facility is now operational, which should help support Fortis Generation in H2 2010. We have also factored in higher financing charges from FortisAlberta and the Corporate segment. This has been partially offset by an increase in our Terasen estimates to reflect stronger than expected Q1 results. As demonstrated in Exhibit 3, **we are decreasing our 2010 basic EPS estimate from \$1.71 to \$1.65 per share. Our 2011 EPS is dropping from \$1.82 to \$1.76 per share.**

Exhibit 3. Beacon Securities' Forecast

Total debt was \$5.7 billion at the end of Q1 2010. Management expect long-term debt maturities and repayments to average approximately \$280 million annually over the next five years. The Company had consolidated credit facilities of \$2.2 billion, with \$1.6 billion unused as of March 31, 2010. The FortisBC and Maritime Electric credit facilities that were due to mature in May 2010 and March 2010, respectively, were extended for another year (combined equal \$150 million).

Valuation and Recommendation

Despite the decrease to our estimates, **we are increasing our 12-month target price to \$31.25 from \$30.50 per share, but maintaining our HOLD recommendation.** We are adjusting our price target to now reflect F2011 estimates. Our valuation is based on analysis of P/E and EV/EBITDA multiples and our dividend discount model. Our target equates to 17.8x 2011E EPS and 9.8x 2011E EV/EBITDA. The dividend currently yields 4.0%.

Fortis' focus on organic growth and capital investment will continue to drive earnings growth, in our opinion. Capital expenditures of \$5 billion are planned over the next five years. Approximately 27% of that spending is allocated toward growing the Regulated Gas operations, 70% toward the Regulated Electric utilities (primarily FortisAlberta and FortisBC), and 3% toward the Non-Regulated operations. Gross capital expenditures for 2010 are forecast at \$1.1 billion (with \$188 million incurred in Q1). In the long-term, we also expect further growth to also come from acquisitions. Acquisition opportunities exist, in both gas and electric utilities, particularly in the U.S. We are encouraged by Fortis' ability to continually grow its rate base, while maintaining its stability.

Key Risks

- **Interest Rate Risk** – The capital requirements outlined by the Company will likely require additional debt financing.
- **International Risk** – With operations in Belize, the Cayman Islands, and the Turks and Caicos, Fortis is subject to currency risk, sovereign risk, and the risk of hurricanes.
- **Regulatory Risk** – Regulated assets consist of 92% of Fortis' total assets, with each of the regulated utilities subject to some form of regulation which can impact future revenue and earnings. Each operating utility must ensure compliance with current regulations and proactive measures towards regulatory issues.
- **Risk of Fluctuating Bond Yields** – The share price of Fortis is inversely related to bond yields. Furthermore, lower bond yields may result in Fortis having to lower the rates for certain subsidiaries, thereby hampering earnings.

FORTIS INC.

Neutral Q4 - 2010 to Benefit from ROE Decisions

Highlights

- Fortis reported Q4 results that were slightly weaker than expected. Q4 2009 earnings were \$81 million, or \$0.48 per share, compared to \$76 million, or \$0.48 per share, reported in Q4 2008. Q4 2009 EPS was 4% lower than our estimate of \$0.50. Results benefited from an approximate \$10 million cumulative retroactive impact from the increase in allowed ROEs for 2009 at FortisAlberta and Terasen Gas, in addition to the increased equity component at FortisAlberta. This was partially offset by costs of approximately \$5 million (after-tax) associated with the conversion of Whistler customer appliances from propane to natural gas.
- We have lowered our Caribbean forecasts to reflect a weaker U.S. dollar for 2010. We have also lowered our estimates for FortisBC and Fortis Generation, as we believe we overestimated the impact of the ROE decision and Vaca generating facility, respectively, on 2010 earnings. **Our 2010 EPS estimate is decreasing slightly (2%) from \$1.75 to \$1.71.** We are introducing our 2011 estimates.
- We are maintaining our 12-month target price of \$30.50 and our HOLD recommendation.** Our target equates to 17.8x 2010E EPS and 10.2x 2010E EV/EBITDA. Including dividends, there is a potential return of approximately 14% over the next year, which justifies our HOLD rating. As a whole, we view the outcomes of the recent ROE decisions as positive. Contributions from the combined ROE decisions fortified Fortis' ability to increase its annual dividend 7.7%, and will contribute to further earnings growth. We are encouraged by Fortis' focus on organic growth, the increased returns from the ROE decisions, and its ability to select and integrate accretive acquisition opportunities.

Company Description

Fortis Inc. is Canada's largest investor-owned distribution utility, with more than two million gas and electricity customers. The Company is headquartered in St. John's, NL. Its main focus is the ownership and operation of regulated utilities, with operations in five provinces and three Caribbean countries. Fortis also owns and operates non-regulated generation assets and commercial real estate and hotel assets.

*Please view the disclaimer at the end of this report

Q4 2009 Results

Fortis Inc. reported Q4 earnings that were slightly weaker than we expected. Q4 2009 earnings were \$81 million, or \$0.48 per share, compared to \$76 million, or \$0.48 per share, reported in Q4 2008. Q4 2009 EPS was 4% lower than our estimate of \$0.50 per share, and 8% lower than the consensus estimate of \$0.52. Q4 2009 results benefited from an approximate \$10 million cumulative retroactive impact from the increase in allowed ROEs for 2009 at FortisAlberta and Terasen Gas, in addition to the increased equity component at FortisAlberta. This was partially offset by costs of approximately \$5 million (after-tax) associated with the conversion of Whistler customer appliances from propane to natural gas. The Company is seeking regulatory approval to have the additional conversion costs included in rate base. Excluding the costs of the Whistler Conversion Project, Q4 2009 earnings were \$86 million, or \$0.50 per share, inline with our estimates.

Earnings for 2009 were \$262 million, up from \$245 million in 2008. EPS for 2009 was \$1.54, compared to \$1.56 in 2008. Excluding the costs of the Whistler Conversion Project, 2009 earnings were \$267 million, or \$1.56.

Exhibit 1. Results Summary (in Canadian dollars)

	Q4 2009	Q4 2008	2009
Net Earnings Applicable to Common Shares	\$81 million	\$76 million	\$262 million
Reported Basic EPS	\$0.48	\$0.48	\$1.54
Reported Diluted EPS	\$0.46	\$0.46	\$1.51

Source: Company Reports, Beacon Securities

Segmented Results

The **Terasen Gas** companies reported earnings of \$48 million, slightly lower than our estimates, but up from earnings of \$47 million reported in Q4 2008. The lower than expected earnings are the result of costs related to the Whistler Pipeline Conversion Project, partially offset by lower than expected energy supply costs. Earnings benefited from the increase in allowed ROEs, effective July 1, 2009. TGI's ROE was set at 9.5%, up from the current 8.47%. The BCUC decided the premium should be 50bp for both TGV1 and TGV2 (ROE of 10%). Earnings would have been \$53 million in Q4 2009, excluding the costs of the conversion of Whistler appliances from propane to natural gas.

FortisAlberta reported earnings of \$15 million, an increase of 36% from the \$11 million reported in Q4 2008. Earnings were supported by increased rates, in addition to customer and load growth. Earnings were also boosted by an increase in allowed ROE for 2009 to 9.0% from the interim rate of 8.51%, and an increase in equity thickness from 37% to 41%. These contributions to earnings were partially offset by higher amortization costs and finance charges.

FortisBC reported Q4 2009 earnings of \$8 million, up 14% from \$7 million in Q4 2008. The impact of customer growth and increased electricity rates was offset by higher operating costs, in addition to increased financing expenses associated with a significant investment in capital expenditures.

Newfoundland Power reported Q4 2009 earnings of \$8 million, in line with Q4 2008. Increased electricity sales were offset by higher demand charges from Newfoundland and Labrador Hydro, increased operating expenses, and higher financing costs.

Quarterly earnings from **Other Canadian Electric Utilities** were \$6 million, in an increase from \$3 million in Q4 2008. FortisOntario benefited from a one-time \$3 million corporate tax adjustment.

Regulated Electric Utilities-Caribbean earnings decreased 13% year-over-year to \$7 million. The drop is the result of two additional months of contributions from Caribbean Utilities in 2008 (when CUC changed its year-end). An unfavourable foreign currency translation also decreased earnings. Excluding these impacts, earnings were \$2 million higher year-over-year. Earnings were supported by lower depreciation expense at Fortis Turks and Caicos, in addition to higher sales and a rate increase at CUC. We are expecting relatively flat sales growth from the Caribbean in 2010, due to the impact of economic weakness on tourism.

Earnings from **Fortis Generation** were \$3 million in Q4 2009, down from \$8 million the same period last year. Earnings from Fortis Generation were lower in Q4, due to the expiration of the 75 MW Rankine rights in Ontario, which expired in April 2009. This had previously been factored into our estimates. Earnings were once again hampered by lower wholesale market energy prices in Upper New York State. Lower production in Belize and Upper New York State also hindered earnings.

The 19-MW Vaca hydroelectric generating facility is expected to be completed by the end of February 2010. Fortis is not planning any further investment in Belize at this time, due the changes in electricity legislation by the Public Utilities Commission in Belize. An update on the court appeal is expected in H1 2010.

Fortis Properties earnings rose 25% year-over-year to \$5 million. Contributions from the Real Estate division and newly acquired hotels were offset by lower hotel occupancies at the remaining hotels. We continue to expect hotel occupancies at Fortis Properties will be lower for the remainder of 2010.

Exhibit 2. Segmented Results Summary

	Q4 2009 Earnings (C\$ Millions)	Q4 2008 Earnings (C\$ Millions)
Terasen Gas Companies	48	47
FortisAlberta	15	11
FortisBC	8	7
Newfoundland Power	8	8
Other Canadian	6	3
Caribbean	7	8
Fortis Generation	3	8
Fortis Properties	5	4
Corporate	-19	-20
Total	81	76

Source: Company Reports

Gross capital expenditures were approximately \$1 billion for 2009, of which 75% was directed towards the Western Canadian utilities. Gross capital expenditures for 2010 are forecast at \$1.1 billion. Future organic growth will come from major projects such as the \$200 million LNG storage facility at Terasen Gas, the \$155 million Automated Meter Infrastructure Project at FortisAlberta, and FortisBC's \$110 million Okanagan Transmission Reinforcement Project.

Forecast & Outlook

We have further lowered our Caribbean forecasts to reflect a weaker U.S. dollar for 2010 (based on Bloomberg consensus). We have also lowered our 2010 estimates for FortisBC and Fortis Generation, as we believe we overestimated the impact of the ROE decision and Vaca generating facility, respectively, on 2010 earnings. As demonstrated in Exhibit 3, **we are decreasing our 2010 EPS estimate slightly (2%) from \$1.75 to \$1.71.**

We are now introducing our 2011 estimates. The outcomes of the ROE decisions should continue to benefit earnings in 2011; however, there is some uncertainty as we await further regulatory decisions. Earnings from FortisAlberta are uncertain, as the AUC plans to re-examine the ROE in 2011 and determine whether an ROE-adjustment formula should be adopted. FortisAlberta's ROE of 9.0% will be in place on an interim basis for 2011. In regards to Terasen, the BCUC decided that the automatic adjustment mechanism that was used to determine ROE would be eliminated. It directed TGI to complete its study of alternative formulae and report to the Commission by December 31, 2010. TGI's 9.5% ROE will apply until further review. Furthermore, where Newfoundland Power received such a small boost in ROE (from 8.95% to 9.0%), we expect the utility to look for a further increase.

Source: Beacon Securities, Bloomberg

Total debt equalled \$5.9 billion at the end of Q4 2009. Management expect long-term debt maturities and repayments to average approximately \$230 million annually over the next five years. The Company had consolidated credit facilities of \$2.2 billion, with \$1.4 billion unused as of December 31, 2009. A FortisBC and a Maritime Electric credit facility are due to mature in May 2010 and March 2010, respectively. Combined, these facilities total \$150 million. Fortis expects these facilities will be extended for another year. Fortis continues to have strong access to capital markets, having raised approximately \$1.3 billion since December 2008.

Source: Beacon Securities, Bloomberg, Company Reports

Valuation and Recommendation

We are maintaining our 12-month target price of \$30.50 and our HOLD recommendation. Our valuation is based on analysis of P/E and EV/EBITDA multiples and our dividend discount model. Our target equates to 17.8x 2010E EPS and 10.2x 2010E EV/EBITDA. Including dividends, there is a potential return of approximately 14% over the next year, which justifies our HOLD rating. The dividend currently yields 4.0%.

As a whole, we view the outcomes of the recent ROE decisions as positive. Contributions from the combined ROE decisions fortified Fortis' ability to increase its quarterly dividend 7.7% to \$0.28 per share, or \$1.12 annually. This is the 37th consecutive annual dividend increase.

Fortis continues to demonstrate strong organic growth. Capital expenditures of \$5 billion are planned over the next five years, which is expected to drive rate base growth at an average annual rate of 6-7%. Approximately \$3.5 billion is expected to be invested in the Regulated Electric Utilities (mostly in Western Canada), approximately \$1.35 billion is planned for Terasen Gas, and the remaining \$0.15 billion has been allocated to Non-Regulated activities.

We are encouraged by Fortis' focus on organic growth, the increased returns from the ROE decisions, and its ability to select and integrate accretive acquisition opportunities. Acquisition opportunities exist, in both gas and electric utilities, particularly in the U.S.

Key Risks

- **Interest Rate Risk** – The capital requirements outlined by the Company will likely require additional debt financing.
- **International Risk** – With operations in Belize, the Cayman Islands, and the Turks and Caicos, Fortis is subject to currency risk, sovereign risk, and the risk of hurricanes.
- **Regulatory Risk** – Regulated assets consist of 92% of Fortis' total assets, with each of the regulated utilities subject to some form of regulation which can impact future revenue and earnings. Each operating utility must ensure compliance with current regulations and proactive measures towards regulatory issues.
- **Risk of Fluctuating Bond Yields** – The share price of Fortis is inversely related to bond yields. Furthermore, lower bond yields may result in Fortis having to lower the rates for certain subsidiaries, thereby hampering earnings.

FORTIS INC.

Updating Estimates for BCUC Decision - Boosting Target

- Fortis subsidiary, Terasen Gas Inc., announced yesterday that it had received the BCUC's decision on its ROE and Capital Structure Application. TGI's ROE was set at 9.5%, effective July 1, 2009, up from the current 8.47%. While an increase in ROE is positive, it is not the 11% TGI had requested. The common equity component in capital structure increased to 40% (the equity thickness Terasen Gas had requested), from 35%, effective from January 1, 2010.
- The BCUC decided that the automatic adjustment mechanism that was used to determine ROE would be eliminated. It directed TGI to complete its study of alternative formulae and report to the Commission by December 31, 2010. The 9.5% ROE will apply until further review.
- TGI had requested the new ROE be used in establishing the ROE for TGVI and TGW, at a premium of 70bp and 50bp, respectively, over TGI's ROE. The BCUC decided the premium should be 50bp for both TGVI and TGW (ROE of 10%), due to a reduction in TGVI's risk since 2005.
- FortisBC is also impacted by the decision, as TGI will continue to serve as the benchmark ROE for FortisBC. The ROE for FortisBC increased to 9.90% from 8.87%.
- We have adjusted our estimates to reflect the BCUC's decision. **We are increasing our 2009 EPS estimate from \$1.54 to \$1.56, and our 2010 EPS from \$1.61 to \$1.75.**
- With the increase to our estimates, we are boosting our 12-month target to \$30.50 from \$28.50. We are maintaining our HOLD rating.** Including dividends, there is a potential return of approximately 9% over the next year, which justifies our HOLD rating. Our target equates to 17.4x 2010E EPS and 9.7x 2010E EV/EBITDA.

FORTIS INC.

Stable Structure Produces Solid Q3

Highlights

- **Fortis reported stronger than expected Q3 results.** Q3 2009 earnings were \$36 million, or \$0.21 per share, compared to \$49 million, or \$0.31 per share, in Q3 2008. However, Q3 2008 benefited from one-time tax reductions of \$12 million. Excluding this impact, Q3 earnings were \$1 million lower year-over-year. The lower earnings were largely the result of the expiration of the 75 MW Rankine rights in Ontario, which expired in April 2009 and was factored into our estimates. Q3 2009 EPS was higher than our estimate of \$0.19, and inline with the consensus estimate of \$0.21. Results from FortisAlberta were better than our forecasts.
- A decision on FortisAlberta's Generic Cost of Capital Proceeding is expected next week (mid-November). Decisions on both the Terasen and Newfoundland Power ROE applications are anticipated by the end of 2009.
- We have adjusted our estimates to reflect stronger than forecast results from FortisAlberta. We have lowered our Caribbean forecasts to reflect a weaker U.S. dollar for the remainder of 2009 and 2010. **We are increasing our 2009 EPS estimate from \$1.50 to \$1.51, and dropping our 2010 EPS from \$1.60 to \$1.59.**
- **We are maintaining our 12-month target price of \$28.50 and our BUY rating.** Our target equates to 17.9x 2010E EPS and 9.7x 2010E EV/EBITDA. Including dividends, there is a potential return of approximately 15% over the next year, which justifies our BUY rating. Fortis' planned capital expenditures of \$5 billion over the next five years is expected to drive rate base growth at a forecasted average annual rate of 6-7%.

Q3 2009 Results

Fortis Inc. reported stronger than expected Q3 results. Q3 2009 earnings were \$36 million, or \$0.21 per share, compared to \$49 million, or \$0.31 per share, reported in Q3 2008. Q3 2009 EPS was higher than our estimate of \$0.19 per share, and inline with the consensus estimate of \$0.21. Q3 2008 benefited from one-time tax reductions of \$12 million at Terasen and FortisAlberta. Excluding the impact of the tax reductions, Q3 2009 earnings were only \$1 million lower year-over-year. The lower earnings were largely the result of the expiration of Fortis Generation's 75 MW Rankine rights in Ontario, which expired in April 2009 and was factored into our estimates. Performance from FortisAlberta was better than expected, due to higher load and customer growth and increased net transmission revenue.

Exhibit 1. Results Summary (in Canadian dollars)

	Q3 2009	Q3 2008
Net Earnings Applicable to Common Shares	\$36 million	\$49 million
Reported Basic EPS	\$0.21	\$0.31
Reported Diluted EPS	\$0.21	\$0.31

Source: Company Reports, Beacon Securities

Segmented Results

The **Terasen Gas** companies reported a loss of \$3 million, inline with our estimates, and down from earnings of \$1 million reported in Q3 2008 due to a \$5.5 million tax reduction last year. Excluding the impact of the tax reduction, earnings were \$1.5 million higher year-over-year, supported by lower income taxes and higher delivery rates.

A hearing regarding the rate applications for 2010 and 2011 (for both Terasen Gas Inc. and Terasen Gas (Vancouver Island) Inc.) was held in September 2009. As part of this rate filing, TGI and TGVl were seeking a review of the current generic ROE adjustment mechanism and of the deemed equity component of the capital structure. A decision is expected by the end of Q4 2009. Terasen is requesting allowed ROE be set at 11% effective July 1, 2009 (from 8.47%). TGI requests that the deemed common equity component in its capital structure allowed for rate making purposes be increased to 40%, as compared to the current 35%, effective from January 1, 2010.

FortisAlberta reported earnings of \$16 million, which was higher than we had expected, but down 6% from the \$17 million reported in Q3 2008. Earnings from the same period last year benefited from a future income tax recovery of \$4.5 million. Excluding this tax recovery, earnings were \$3.5 million higher, compared to Q3 last year. Earnings were supported by increased rates, customer and load growth, and higher net transmission revenue. These contributions to earnings were partially offset by higher operating costs, amortization costs, and finance charges.

FortisAlberta is currently involved in a Generic Cost of Capital Proceeding with the AUC, which includes reviewing 2009 ROE calculations and capital structures for regulated gas, electric, and pipeline utilities in Alberta. A decision on this proceeding is expected next week (mid-November).

FortisBC reported Q3 2009 earnings of \$8 million, in line with Q3 2008. The impact of customer growth and increased electricity rates was offset by higher energy supply costs and operating costs, in addition to increased amortization and financing expenses associated with a significant

investment in capital expenditures.

Newfoundland Power reported Q3 2009 earnings of \$7 million, dropping 13% from \$8 million in Q3 2008, on higher operating and amortization charges. A hearing regarding Newfoundland Power's application with the PUB to set 2010 rates, and review cost of capital, occurred in October. A decision is expected by the end of this year. Newfoundland Power is looking to increase its allowed ROE from 8.95% to 11%.

Quarterly earnings from **Other Canadian Electric Utilities** were \$5 million, in line with Q3 2008. On October 8, 2009, Fortis Ontario announced it had closed the acquisition of Great Lakes Power Distribution from Brookfield Renewable Power for approximately \$75 million, subject to adjustment. Great Lakes Power Distribution has been renamed Algoma Power. Algoma Power serves approximately 12,000 customers in the district of Algoma in northern Ontario, and has over 1,800km of distribution lines.

We do not expect the purchase of NB Power's assets by Hydro-Québec will have a significant impact on Maritime Electric. Most of Maritime Electric's power is purchased from NB Power, and Fortis expects these contracts will remain honoured. We do not foresee the sale of Maritime Electric to Hydro-Quebec at this time, and Fortis has not had any recent discussions with the Québec utility.

Regulated Electric Utilities-Caribbean earnings were flat year-over-year at \$7 million. The favourable foreign currency translation, higher sales, and the rate increase at CUC, were offset by higher operating expenses and amortization costs.

Belize Electricity's energy supply from CFE of Mexico continued to be reduced in Q3, due to repairs on some of CFE's generating plants. As a result, Belize has increased its purchases from emergency sources, which comes at a higher cost. BEL also increased its use of in-house generation, with little reserve capacity remaining available. Any energy supply cost increases incurred as a result should be flowed through rates. The 19-MW Vaca hydroelectric generating facility is expected to be completed the beginning of 2010, which will assist in meeting demand.

Earnings from **Fortis Generation** were \$4 million in Q3 2009, down from \$9 million the same period last year. Earnings from Fortis Generation were lower in Q3, due to the expiration of the 75 MW Rankine rights in Ontario, which expired in April 2009. This had previously been factored into our estimates. For the third quarter in a row, earnings were hampered by lower wholesale market energy prices in Upper New York State.

Fortis Properties earnings were flat year-over-year at \$9 million. Contributions from the Real Estate division and newly acquired hotels were offset by lower hotel occupancies at the remaining hotels. We expect hotel occupancies at Fortis Properties will be lower for the remainder of 2009 and 2010.

Exhibit 2. Segmented Results Summary

	Q3 2009 Earnings (C\$ Millions)	Q3 2008 Earnings (C\$ Millions)
Terasen Gas Companies	-3	1
FortisAlberta	16	17
FortisBC	8	8
Newfoundland Power	7	8
Other Canadian	5	5
Caribbean	7	7
Fortis Generation	4	9
Fortis Properties	9	9
Corporate	-17	-15
Total	36	49

Source: Company Reports

Gross capital expenditures were \$763 million for the first nine months of 2009. Gross capital expenditures for 2009 are forecast at over \$1 billion. Future organic growth will come from major projects such as the \$200 million LNG storage facility at Terasen Gas, the \$168 million Automated Meter Infrastructure Project at FortisAlberta, and FortisBC's \$110 million Okanagan Transmission Reinforcement Project.

Forecast & Outlook

We have adjusted our estimates to reflect stronger than forecast results from FortisAlberta. We have lowered our Caribbean forecasts to reflect a weaker U.S. dollar for the remainder of 2009 and 2010 (based on Bloomberg consensus). As demonstrated in Exhibit 3, **we are increasing our 2009 EPS estimate from \$1.50 to \$1.51, and dropping our 2010 EPS from \$1.60 to \$1.59.**

Exhibit 3. Beacon Securities' Forecast

(C\$ Millions except per share data)	<u>2009E</u>		<u>2010E</u>	
	<u>New</u>	<u>Previous</u>	<u>New</u>	<u>Previous</u>
EBITDA	\$1,087	\$1,086	\$1,159	\$1,161

EPS (basic)	\$1.51	\$1.50	\$1.59	\$1.60
EPS (diluted)	\$1.49	\$1.47	\$1.54	\$1.55
Cash Flow	\$678	\$670	\$690	\$701
CFPS (basic)	\$3.98	\$3.94	\$4.04	\$4.12

Source: Beacon Securities, Bloomberg

Long-term debt totalled \$5.4 billion, as of the end of Q3 2009. Management expect long-term debt maturities and repayments to average approximately \$157 million annually over the next five years. The Company had consolidated credit facilities of \$2.2 billion, with \$1.6 billion unused as of September 30, 2009, which will provide necessary flexibility. Fortis continues to have strong access to capital markets, having raised more than \$700 million of long-term debt year-to-date.

Valuation and Recommendation

We are maintaining our 12-month target price of \$28.50 and our BUY recommendation.

Our valuation is based on analysis of P/E and EV/EBITDA multiples and our dividend discount model. Our target equates to 17.9x 2010E EPS and 9.7x 2010E EV/EBITDA. Including dividends, there is a potential return of approximately 15% over the next year, which justifies our BUY rating. The dividend currently yields 4.0%. Fortis has 36 years of consecutive dividend increases, and we expect another dividend increase to be announced next month.

Fortis remains a quality company with sustainable dividend growth, continuous investment in rate base, and stable earnings through its Regulated Utilities. We view this blue-chip company as a lower risk investment for investors looking for a defensive stock during periods of market volatility. In addition to stability, Fortis continues to grow organically, with planned capital expenditures of \$5 billion expected over the next five years, which is expected to drive rate base growth at an average annual rate of 6-7%. Furthermore, acquisition opportunities exist, in both gas and electric utilities, particularly in the U.S.

Key Risks

- **Interest Rate Risk** – The capital requirements outlined by the Company will likely require additional debt financing.
- **International Risk** – With operations in Belize, the Cayman Islands, and the Turks and Caicos, Fortis is subject to currency risk, sovereign risk, and the risk of hurricanes.
- **Regulatory Risk** – Regulated assets consist of 92% of Fortis' total assets, with each of the regulated utilities subject to some form of regulation which can impact future revenue and earnings. Each operating utility must ensure compliance with current regulations and proactive measures towards regulatory issues.
- **Risk of Fluctuating Bond Yields** – The share price of Fortis is inversely related to bond yields. Furthermore, lower bond yields may result in Fortis having to lower the rates for certain subsidiaries, thereby hampering earnings.

FORTIS INC.

Updating Estimates for AUC Decision - Downgrading to HOLD

Highlights

- FortisAlberta, a subsidiary of Fortis Inc., has received the AUC's decision on the 2009 Generic Cost of Capital proceeding. The AUC has discontinued its annual adjustment formula for establishing generic ROE. The AUC set the 2009 and 2010 generic ROE at 9.0% for all Alberta utilities. This is higher than the 8.61% the former adjustment formula would have provided and FortisAlberta's 2009 interim rate of 8.51%. For FortisAlberta, the deemed common equity level of rate base was set at 41%, up from 37%. The AUC stated this was a "fair return", and was warranted to address the impact of the credit crunch. On its own, the increase in ROE would not have a significant impact. However, **we view the increases to ROE and equity thickness, combined, as positive.**
- The ROE of 9.0% will be in place on an interim basis for 2011. The AUC plans to re-examine the ROE in 2011 and determine whether an ROE-adjustment formula should be adopted. Therefore, there is uncertainty in the ROE level for post 2010.
- We have adjusted our estimates to reflect the AUC's decision. We are expecting a boost in earnings of \$4 million in 2009. **We are increasing our 2009 EPS estimate from \$1.51 to \$1.54, and our 2010 EPS from \$1.59 to \$1.61.**
- We are maintaining our 12-month target price of \$28.50. Given the recent rise in share price, we are lowering our recommendation to HOLD from BUY.** Including dividends, there is a potential return of approximately 11% over the next year, which justifies our HOLD rating. Our target equates to 17.7x 2010E EPS and 9.7x 2010E EV/EBITDA.

FORTIS INC.

Strong Q2 - Demonstrates Stability During Economic Uncertainty

Highlights

- **Fortis reported stronger than expected Q2 results**, with earnings of \$53 million, or \$0.31 per share, compared to \$29 million, or \$0.19 per share, reported in Q2 2008. Q2 2009 EPS was higher than our estimate of \$0.26 per share, and consensus of \$0.27. (Note: The results from Q2 2008 were hindered by one-time charges from BEL and FortisOntario.) Excluding these one-time charges, earnings were up \$9 million year-over-year. Q2 2009 earnings benefited from strong results from FortisAlberta and Terasen. This was partially offset by lower earnings from Fortis Generation.
- **We are increasing our 2009 EPS estimate from \$1.47 to \$1.50, and our 2010 EPS from \$1.53 to \$1.60.** The favourable impact from the strong Q2 results has been partially offset by a reduction in our forecasts for the Caribbean operations. We have lowered this forecast to reflect a weaker U.S. dollar for the remainder of 2009 and 2010 (based on Bloomberg consensus estimates). We have updated our 2010 estimates for Terasen, FortisAlberta, and Newfoundland Power to reflect information from the rate applications.
- **With an increase in our estimates, we are raising our 12-month target price from \$27.00 to \$28.50, and maintaining our BUY rating.** Our target equates to 17.8x 2010E EPS and 9.6x 2010E EV/EBITDA. Including dividends, there is a potential return of approximately 15% over the next year, which justifies our BUY rating.
- The solid Q2 results demonstrate Fortis' stability, even in times of economic uncertainty. We believe Fortis is a low risk and stable investment. In addition to providing sustainable dividend growth and stable earnings through its Regulated Utilities, Fortis offers strong rate base growth.

Company Description

Fortis Inc. is Canada's largest investor-owned distribution utility, with more than two million gas and electricity customers. The Company is headquartered in St. John's, NL. Its main focus is the ownership and operation of regulated utilities, with operations in five provinces and three Caribbean countries. Fortis also owns and operates non-regulated generation assets and commercial real estate and hotel assets.

Q2 2009 Results

Fortis Inc. reported stronger than expected Q2 results. Q2 2009 earnings were \$53 million, or \$0.31 per share, compared to \$29 million, or \$0.19 per share, reported in Q2 2008. Q2 2009 EPS was higher than our estimate of \$0.26 per share, and consensus of \$0.27. **The results for the same period last year were hindered by one-time charges of \$15 million from Belize Electricity and FortisOntario. Excluding these one-time charges, earnings were up \$9 million year-over-year.** Q2 2009 earnings benefited from increased contributions from FortisAlberta and the Terasen Gas companies. This was partially offset by lower earnings from Fortis Generation.

Exhibit 1. Results Summary (in Canadian dollars)

	Q2 2009	Q2 2008
Net Earnings Applicable to Common Shares	\$53 million	\$29 million
Reported Basic EPS	\$0.31	\$0.19
Reported Diluted EPS	\$0.31	\$0.18
Cash Flow from Operations	\$275 million	\$232 million

Source: Company Reports, Beacon Securities

Segmented Results

The **Terasen Gas** companies reported Q2 earnings of \$14 million, up 17% from earnings of \$12 million reported in Q2 2008. Earnings were boosted by lower income taxes and finance charges. This was partially offset by higher amortization charges.

Rate applications for 2010 and 2011 were filed with the BCUC by both Terasen Gas Inc. (TGI) and Terasen Gas (Vancouver Island) Inc. (TGVI) in Q2. As part of this rate filing, TGI and TGVI are seeking a review of the current generic ROE adjustment mechanism and of the deemed equity component of the capital structure. A hearing is set for the end of September, 2009, and a decision is expected by Q4 2009 or Q1 2010. Terasen is requesting an ROE be set at 11% effective July 1, 2009 (from 8.47%). TGI requests that the deemed common equity component in its capital structure allowed for rate making purposes be increased to 40%, as compared to the current 35%, effective from January 1, 2010. In regards to TGVI and TGW, it is asking for elimination of the ROE formula and continuation of the utility specific risk premium of TGVI (70bp) and TGW (50bp) be applied to the new benchmark ROE, effective July 1, 2009.

FortisAlberta reported earnings of \$17 million, a jump from \$7 million in earnings reported in Q2 2008, and significantly higher than we had expected. Earnings benefited from a corporate tax recovery and growth in electrical infrastructure investment. These contributions to earnings were partially offset by higher amortization costs and finance charges, which we had expected and continue to forecast going forward.

FortisAlberta is currently involved in a Generic Cost of Capital Proceeding with the AUC, which will include reviewing 2009 ROE calculations and capital structures for regulated gas, electric, and pipeline utilities in Alberta. The oral hearing occurred in May and June, and a decision on this proceeding is expected by the end of 2009. FortisAlberta filed its 2010/2011 Revenue Requirements Application in Q2 2009.

FortisBC reported Q2 2009 earnings of \$7 million, in line with Q2 2008. FortisBC earnings benefited from customer growth and increased electricity rates. This was offset by increases in

energy supply costs, and higher amortization and financing expenses associated with a significant investment in capital expenditures.

British Columbia has been experiencing an incredibly hot summer. In response to the increased demand due to this heat wave, FortisBC has been asking customers to conserve energy when possible, and has been reviewing the loading on the system and making adjustments where necessary. FortisBC has been accelerating the final phase of the Black Mountain substation project to bring it online as quickly as possible. Furthermore, a mobile substation was moved to assist in strengthening the Kelowna system.

Newfoundland Power reported Q2 2009 earnings of \$11 million, up 10% from \$10 million in Q2 2008, on lower amortization charges and income tax. Newfoundland Power filed an application with the PUB to set 2010 rates, and has also requested a cost of capital review. Newfoundland Power is looking to increase its allowed ROE from 8.95% to 11%. The hearing is expected to occur this fall.

Quarterly earnings from **Other Canadian Electric Utilities** were \$4 million, up from \$2 million in Q2 2008. Earnings were comparable year-over-year after deducting a \$2 million after-tax one-time charge at FortisOntario, due to a one-time repayment of a \$3 million (\$2 million after-tax) refund to Niagara Mohawk Power Corp (NIMO).

On June 23, 2009, FortisOntario entered into an agreement with Brookfield Renewable Power Inc. to purchase Great Lakes Power Distribution Inc. for \$68 million (subject to adjustment). Great Lakes Power Distribution serves approximately 12,000 customers in the district of Algoma in northern Ontario, and has over 1,800km of distribution lines. The transaction is expected to close by the end of the year.

Regulated Electric Utilities-Caribbean earnings rose from a loss of \$5 million in Q2 2008, to a gain of \$7 million in Q2 2009. However, earnings from Q2 2008 included a \$13 million one-time charge related to the June 2008 regulatory rate decision at BEL. Excluding this one-time charge and approximately \$1 million related to favourable foreign currency translation, earnings were \$2 million lower year-over-year, impacted by the decrease in Belize Electricity's allowed rate of return and increased amortization costs.

On July 22, 2009, Fortis increased its ownership in Caribbean Utilities by approximately 2.7%, bringing total ownership to approximately 59.5%. Fortis purchased 768,200 CUC Shares at a price of approximately C\$8.78 per share.

Belize Electricity's energy supply from CFE of Mexico has been reduced in the last few months, due to repairs on some of CFE's generating plants. As a result, Belize has increased its purchases from emergency sources, which comes at a higher cost. This should be resolved by the end of August, and any energy supply cost increases incurred in Q3 as a result should be flowed through rates.

Earnings from **Fortis Generation** were \$3 million in Q2 2009, down from \$7 million the same period last year. Earnings from Fortis Generation were lower in Q2, due to the expiration of the 75 MW Rankine rights in Ontario, which expired in April 2009. This had previously been factored into our estimates. For the second quarter in a row, earnings were hampered by lower wholesale market energy prices in both Upper New York State and Ontario.

Fortis Properties earnings increased 14% year-over-year from \$7 million in Q2 2008 to \$8 million in Q2 2009, due to increased contributions from the Real Estate operations (largely due to one-time lease termination fees) and lower operating expenses. This was partially offset by lower contributions from the Hospitality segment, due to lower hotel occupancies. We expect hotel occupancies at Fortis Properties will be lower for 2009 and 2010.

Exhibit 2. Segmented Results Summary

	Q2 2009 Earnings (C\$ Millions)	Q2 2008 Earnings (C\$ Millions)
Terasen Gas Companies	14	12
FortisAlberta	17	7
FortisBC	7	7
Newfoundland Power	11	10
Other Canadian	4	2
Caribbean	7	-5
Fortis Generation	3	7
Fortis Properties	8	7
Corporate	-18	-18

Source: Company Reports

Gross capital expenditures were \$496 million in H1 2009. Gross capital expenditures for 2009 are forecast at over \$1 billion. Future organic growth will come from major projects such as the \$200 million LNG storage facility at Terasen Gas, the \$168 million Automated Meter Infrastructure Project at FortisAlberta, and FortisBC's \$110 million Okanagan Transmission Reinforcement Project.

Forecast & Outlook

The favourable impact from the strong Q2 results has been partially offset by a reduction in our forecasts for the Caribbean operations. We have lowered our Caribbean forecasts to reflect a weaker U.S. dollar for the remainder of 2009 and 2010 (based on Bloomberg consensus). We updated our 2010 estimates for Terasen, FortisAlberta, and Newfoundland Power to incorporate information from the rate applications. As demonstrated in Exhibit 3, **we are increasing our 2009 EPS estimate from \$1.47 to \$1.50, and our 2010 EPS from \$1.53 to \$1.60.**

Exhibit 3. Beacon Securities' Forecast

(\$C Millions except per share data)	2009E		2010E	
	New	Previous	New	Previous

Net Income	\$255	\$250	\$272	\$260
EPS (basic)	\$1.50	\$1.47	\$1.60	\$1.53
EPS (diluted)	\$1.47	\$1.45	\$1.55	\$1.51
Cash Flow	\$670	\$645	\$701	\$662
CFPS (basic)	\$3.94	\$3.80	\$4.12	\$3.90

Source: Beacon Securities, Bloomberg

Long-term debt totalled \$5.4 billion, as of the end of Q2 2009. Management expect long-term debt maturities and repayments to average approximately \$170 million annually over the next

five years. The Company had consolidated credit facilities of \$2.2 billion, with \$1.6 billion unused as of June 30, 2009, which will provide necessary flexibility. Fortis and its utilities have raised over \$600 million in debt in H1 2009. On July 2, 2009, Fortis closed its offering of \$200 million of 6.51% senior unsecured debentures due 2039. The net proceeds are allocated to pay down the indebtedness on the credit facility and for general corporate purposes. The funds from this debenture offering would bring the total amount unused on the credit facility to \$1.8 billion, subsequent to Q2.

Valuation and Recommendation

With an increase in our estimates, we are raising our 12-month target price from \$27.00 to \$28.50, and maintaining our BUY recommendation. Our valuation is based on analysis of P/E and EV/EBITDA multiples and our dividend discount model. Our target equates to 17.8x 2010E EPS and 9.6x 2010E EV/EBITDA. Including dividends, there is a potential return of approximately 15% over the next year, which justifies our BUY rating. The dividend currently yields 4.1%.

The solid Q2 results demonstrate Fortis' stability, even in times of economic uncertainty. We believe Fortis is a low risk and stable investment. In addition to providing sustainable dividend growth and stable earnings through its Regulated Utilities, Fortis offers strong rate base growth. Its capital expenditures over the next five years are expected to exceed \$4.5 billion. This capital program is mainly allocated towards the Western Canadian operations and the Caribbean, and should continue to drive earnings growth from these areas.

Key Risks

- **Interest Rate Risk** – The capital requirements outlined by the Company will likely require additional debt financing.
- **International Risk** – With operations in Belize, the Cayman Islands, and the Turks and Caicos, Fortis is subject to currency risk, sovereign risk, and the risk of hurricanes.
- **Regulatory Risk** – Regulated assets consist of 92% of Fortis' total assets, with each of the regulated utilities subject to some form of regulation which can impact future revenue and earnings. Each operating utility must ensure compliance with current regulations and proactive measures towards regulatory issues.
- **Risk of Fluctuating Bond Yields** – The share price of Fortis is inversely related to bond yields. Furthermore, lower bond yields may result in Fortis having to lower the rates for certain subsidiaries, thereby hampering earnings.

FORTIS INC.

Western Canada Leads Strong Q3 Results

Highlights

- Fortis reported strong Q3/10 results with consolidated net earnings attributable to common equity of \$45 million, or \$0.26 per share, compared to \$36 million, or \$0.21 per share in Q3/09. Results for the quarter were boosted by the strong performance of the regulated electric utilities in Western Canada, and non-regulated hydroelectric generation.
- FortisAlberta and FortisBC benefited from higher allowed ROE and Newfoundland Power improved results by increasing electricity sales. All three utilities also grew their respective electrical infrastructure investments helping results further. At the same time, lower transmission revenues, weather-related decreases in electricity sales, and higher operating expenses due to hurricane damage repairs, held back some of those improvements.
- Fortis Generation was another area of strength in the quarter helped by the increased hydroelectric production in Belize.
- We remain optimistic that management should be able to identify and execute an accretive acquisition of an investor-owned electrical utility in the U.S., but remain uncertain this will occur in 2011.
- We have increased our 2010 EPS estimate to \$1.64 from \$1.62 and we remain comfortable with our 2011 EPS estimate of \$1.79. As a result of expanding our P/E multiple to 19.0x, we are raising our 12-month target price to \$34.00 from \$32.00. With the recent significant run up, we are reducing our rating to a HOLD on the shares. The current dividend yield stands at 3.3%.**

Q3 Financial Results

Fortis Inc. reported strong Q3/10 results with consolidated net earnings attributable to common equity of \$45 million, or \$0.26 per share, compared to \$36 million, or \$0.21 per share in Q3/09.

- Fortis Inc. reported strong Q3/10 results with consolidated net earnings attributable to common equity of \$45 million, or \$0.26 per share, compared to \$36 million, or \$0.21 per share in Q3/09. Results for the quarter were boosted by the strong performance of the regulated electric utilities in Western Canada, and non-regulated hydroelectric generation. The exhibit below details the variances in year-over-year and quarter-over-quarter results for each of the Company's segments.

Exhibit 2: Fortis' Segmented Q3 Results Summary

Segmented net earnings summary (in C\$ millions, except per share data)	Q3/10	Q3/09	y/y % change	Q2/10	q/q % change
Regulated Gas Utilities - Canadian					
Terasen Gas Companies*	(9)	(3)	n. m.	17	n.m.

*note: Terasen Gas' earnings exclude \$4 million in approved project overrun reversals by BCUC

Source: Company reports, Beacon Securities.

- The **Terasen Gas** companies reported a loss of \$9 million, excluding the benefit of \$4 million in project overrun reversals approved by BCUC. The Company saw lower demand in the seasonally weaker quarter, and was further impacted by warmer temperatures in Q3/10. Terasen also saw higher operating and maintenance expenses in the quarter.
- The Canadian regulated electric utilities (primarily FortisAlberta, FortisBC and Newfoundland Power) drove most of Fortis' overall results delivering net earnings of \$43 million in the quarter, \$7 million higher than the same period a year ago.
- FortisAlberta** reported earnings of \$19 million, higher than our \$17 million expectation, and an improvement of \$4 million compared to the \$15 million in Q3/09. The improved results at the Western Canada utility were primarily driven by higher allowed ROE, higher equipment component of total capital structure, growth in electrical infrastructure investment and

growth in customer base. These were partially offset by lower net transmission revenue.

- **FortisBC** improved its earnings by \$2 million compared to Q3/09, primarily due to higher allowed ROE, and growth in electrical infrastructure investment, partially offset by weather-related decrease in electricity sales.
- **Newfoundland Power** also improved its earnings by \$1 million compared to Q3/09, primarily due to higher electricity sales and growth in electrical infrastructure investment, partially offset by higher operating expenses due to hurricane damage repairs.
- **Regulated Electric Utilities-Caribbean** improved earnings by \$1 million over the same period last year, largely due to the deferral of previously expensed business taxes at Belize Electricity. The Company expects to collect these in customer rates in the future.
- Earnings from **Fortis Generation** were \$9 million in Q3 2010, up \$5 million from the same period last year primarily due to increased hydroelectric production in Belize. The strength was helped by higher rainfall and the commissioning of the Vaca hydroelectric generating facility in March 2010, and lower finance charges.
- **Fortis Properties** earnings came at \$9 million, flat with the same period a year ago.
- **Corporate and other expenses** came in at \$19 million, compared to \$17 million for the same quarter last year. The increase in dividends associated with the First Preference Shares, Series H issued in January 2010 was partially offset by lower finance charges.
- Gross capital expenditures were \$703 million for the first nine months of 2010 compared to \$763 million in the same period a year ago.

Outlook and Financial Forecast

We are increasing our 2010 EPS estimate to \$1.64 from \$1.62. Our 2011 EPS remains at \$1.79

We have adjusted our estimates to reflect stronger than forecast results from FortisAlberta, FortisBC and Newfoundland Power. We have tempered our expectation for the Caribbean utilities slightly and increase our estimates for Fortis Generation and maintained our forecasts for Fortis Properties. Exhibit 2 shows our updated forecast for overall EBITDA, net income and EPS. **We are increasing our 2010 EPS estimate to \$1.64 from \$1.62, and maintaining our 2011 EPS at \$1.79.**

Exhibit 2: Beacon Securities' Forecast

(\$C Millions except per share data)	2010E		2011E	
	New	Previous	New	Previous
EBITDA	\$1,167	\$1,134	\$1,233	\$1,219
Net Income	\$290	\$286	\$311	\$309
EPS (<i>basic</i>)	\$1.68	\$1.67	\$1.80	\$1.80
EPS (<i>diluted</i>)	\$1.64	\$1.62	\$1.79	\$1.79
Cash Flow	\$740	\$721	\$768	\$763
CFPS (<i>basic</i>)	\$4.29	\$4.20	\$4.44	\$4.45

Source: Company reports, Beacon Securities.

Long-term debt totaled \$5.4 billion, as of the end of Q3 2010. Fortis continues to have strong access to capital markets, to finance its future capital programs. We expect gross capital expenditures for 2010 to be almost \$1.1 billion and management expects the Company's capex to reach almost \$5.5 billion over the next five years, including the work related to the Waneta Expansion Project.

Valuation and Recommendation

We are increasing our 12-month target price to \$34.00, from \$32.00, and reducing our rating to a HOLD

We are increasing our 12-month target price \$34.00 (was \$32.00) and reducing our rating to a HOLD recommendation. Our valuation is based on analysis of P/E and EV/EBITDA multiples and our dividend discount model. Our target equates to 19.0x 2011E EPS and 10.0x 2011E EV/EBITDA. Including dividends, there is a potential return of approximately 4% over the next year, which justifies our HOLD rating. The dividend currently yields 3.3%. Fortis has a long history of dividend increases, and we expect another dividend increase to be announced in the coming months.

We believe management continues to pursue acquisition opportunities to assertively add a regulated electric utility in the United States to its portfolio. We have not included any acquisitions in our numbers for next year, primarily due to the uncertainty on the timing of such an acquisition.

Key Risks

- **Interest Rate Risk** – The capital requirements outlined by the Company will likely require additional debt financing.
- **International Risk** – With operations in Belize, the Cayman Islands, and the Turks and Caicos, Fortis is subject to currency risk, sovereign risk, and the risk of hurricanes.
- **Regulatory Risk** – Regulated assets consist of 92% of Fortis' total assets, with each of the regulated utilities subject to some form of regulation which can impact future revenue and earnings. Each operating utility must ensure compliance with current regulations and proactive measures towards regulatory issues.
- **Risk of Fluctuating Bond Yields** – The share price of Fortis is inversely related to bond yields. Furthermore, lower bond yields may result in Fortis having to lower the rates for certain subsidiaries, thereby hampering earnings.

FORTIS INC.

Reports 11th Consecutive Record Annual Earnings

Highlights

- Fortis reported record annual earnings of \$285 million, or \$1.65 per common share, for the year ended December 31, 2010, compared to \$262 million, or \$1.54 per share, in 2009. The 8.8% y/y growth in earnings was boosted by the strong performance of the regulated electric utilities in Canada, and the Company's non-regulated hydroelectric generation segment.
- The Canadian Regulated Electric Utilities (primarily FortisAlberta, FortisBC and Newfoundland Power) delivered \$164 million of the year's overall earnings, a year-over-year improvement of more than 10%. The strong results in that segment were helped by an increase in electrical infrastructure investment and the increase in allowable ROE at FortisBC effective January 1, 2010.
- We are confident the Company's management remains disciplined and patient in its pursuit of an accretive acquisition opportunity to add a regulated utility, in the United States or Canada, to its portfolio.
- We are maintaining our 12-month target price of \$34.00 and our HOLD rating on the name.** Our valuation is based on analysis of P/E and EV/EBITDA multiples and our dividend discount model. Our target equates to 19.6x 2011E EPS and 10.2x 2011E EV/EBITDA. Including dividends, there is a potential return of approximately 4% over the next year, which justifies our HOLD rating. The shares currently yield 3.3%.

Company Description

Fortis Inc. is Canada's largest investor-owned distribution utility, with more than two million gas and electricity customers. The Company is headquartered in St. John's, NL. Its main focus is the ownership and operation of regulated utilities, with operations in five provinces and three Caribbean countries. Fortis also owns and operates non-regulated generation assets and commercial real estate and hotel assets.

*Please view the disclaimer at the end of this report

Financial Results

Fortis Inc. reported a 4.9% y/y growth in Q4/10 consolidated net earnings attributable to common equity of \$85 million, or \$0.49 per share, compared to \$81 million, or \$0.48 per share in Q4/09

- **Fortis Inc. reported record annual results for fiscal 2010 with consolidated net earnings attributable to common equity shareholders of \$285 million, or \$1.65 per share, compared to \$262 million, or \$1.54 per share, in 2009.** This represents the 11th consecutive year of record earnings for the Company. The 8.8% y/y growth in 2010 earnings was supported by strength in the Canadian Regulated Utilities and non-regulated hydroelectric generation segments, which more than offset pressures in the Caribbean Regulated Electric Utilities and higher corporate expenses. Fortis also delivered good Q4 results with a 4.9% y/y growth in earnings to reach \$85 million in the quarter. Below is a summary of the key drivers in each of the Company's businesses.

Exhibit 1: Results Summary (in Canadian dollars)

	Q4 2010	Q4 2009	2010	2009
Net Earnings Applicable to Common Shares (\$M)	\$85	\$81	\$285	\$262
Reported Basic EPS	\$0.49	\$0.48	\$1.65	\$1.54
Reported Diluted EPS	\$0.47	\$0.46	\$1.62	\$1.51

Source: Company reports, Beacon Securities.

The Canadian Regulated Electric Utilities (primarily FortisAlberta, FortisBC and Newfoundland Power) delivered \$164 million of the year's overall earnings, a year-over-year improvement of more than 10%

- The **Terasen Gas** companies reported an 11% y/y growth in earnings to reach \$130 million for the year. However, almost \$9 million of the \$13 million in earnings growth was attributed to a reversal of a provision taken in Q4/09 for project cost overruns. The reversal was approved by the regulator. The Company also saw a boost to earnings due to an increase to the allowable ROE at Terasen Gas effective July 1, 2009 and an increase in the common equity thickness effective January 1, 2010.
- The Canadian Regulated Electric Utilities (primarily FortisAlberta, FortisBC and Newfoundland Power) delivered \$164 million of the year's overall earnings, a year-over-year improvement of more than 10%. The strong results in that segment were helped by an increase in electrical infrastructure investment and the increase in allowable ROE at FortisBC effective January 1, 2010.
- **FortisAlberta** reported 2010 earnings of \$68 million, almost 13% higher than last year's \$60 million. The improved results at the Western Canada utility were primarily driven by higher allowed ROE, higher energy deliveries and an increase in customers. These were partially offset by slightly lower than average consumption in the residential customer base.
- **FortisBC** improved its earnings by 14% y/y to reach \$42 million for the year compared to \$37 million in 2009. The

increase was primarily due to a 6% increase in customer electricity rates, effective January 1, 2010, reflecting increased allowed ROE of 9.90% for 2010, compared to 8.87% in 2009. This was slightly offset by a 3.5% decrease in annual electricity sales.

- **Newfoundland Power** also improved its earnings by more than 9% to reach \$35 million for the year, compared to \$32 million in 2009. Customer growth drove the improved results, however lower average consumption due to milder temperatures and lower activity in the commercial sector offset some of that growth.
- **Regulated Electric Utilities-Caribbean** delivered weaker earnings of \$23 million for the year, compared to \$27 million in 2009. This segment was the key drag on overall results, primarily due to lower consumption driven by lower average temperatures experienced on Grand Cayman and Turks and Caicos Islands and Belize. This was offset slightly by some customer growth in Belize and Turks and Caicos Islands.
- Earnings from **Fortis Generation** were up 25% to reach \$20 million for the year, compared to \$16 million in 2009. The results were boosted by higher rainfall and the commissioning of Vaca hydroelectric generating facility in Belize in March 2010. Higher production in Upper New York State, Ontario and British Columbia was also experienced due to higher rainfall.
- **Fortis Properties** earnings came at \$26 million, compared to \$24 million in 2009. The results were primarily due to higher revenue from hotel properties in Atlantic Canada and offset by slightly lower occupancy rates in the Real Estate division.
- **Corporate and other expenses** came in at \$78 million for the year, compared to \$71 million in 2009. The increase in dividends associated with the First Preference Shares, Series H issued in January 2010 was partially offset by lower finance charges.

Exhibit 2: Segmented Results (in Canadian dollars)

	Q4 2010	Q4 2009	2010	2009
Terasen Gas Companies	\$45	\$48	\$130	\$117

- Cash flow from operations grew almost 23% y/y to reach \$783 million in 2010, largely driven by the strong earnings, increased amortization costs and improved working capital management. Gross capital expenditures reached almost \$1.1 billion in 2010 as the Company continues to aggressively invest in its infrastructure assets.

Outlook and Financial Forecast

We have updated our model to better reflect results from FortisAlberta, FortisBC and Newfoundland Power. We have tempered our expectation for the Caribbean utilities slightly and increase our estimates for Fortis Generation and maintained our forecasts for Fortis Properties. Exhibit 3 shows our updated forecast for overall EBITDA, net income and EPS.

Exhibit 3: Beacon Securities' Updated Forecast (in Canadian dollars)

	2010A	2011E - New	2011E - Old
EBITDA (\$M)	\$1,150	\$1,191	\$1,233
Net Income (\$M)	\$285	\$302	\$311
EPS (<i>basic</i>)	\$1.65	\$1.74	\$1.80
EPS (<i>diluted</i>)	\$1.62	\$1.68	\$1.79

Source: Company reports, Beacon Securities.

Long-term debt increased slightly to end 2010 at \$5.6 billion, compared to \$5.3 billion at the end of 2009. Fortis continues to have strong access to capital markets, to finance its future capital programs. We expect the Company to continue to invest in infrastructure and estimated gross capital expenditures for 2011 to reach nearly \$1.2 billion. Management also plans to spend almost \$5.5 billion on further capex projects over the next five years, including the work related to the Waneta Expansion Project.

Valuation and Recommendation

We are maintaining our 12-month target price of \$34.00 and our HOLD rating on the name

We are maintaining our 12-month target price of \$34.00 and our HOLD rating on the name. Our valuation is based on analysis of P/E and EV/EBITDA multiples and our dividend discount model. Our target equates to 19.6x 2011E EPS and 10.2x 2011E EV/EBITDA. Including dividends, there is a potential return of approximately 4% over the next year, which justifies our HOLD rating. The dividend currently yields 3.3%.

We are confident the Company's management remains disciplined and patient in its pursuit of an accretive acquisition opportunity to add a regulated utility, in the United States or Canada, to its portfolio. We have not included any acquisitions in our numbers, primarily due to the uncertainty on the timing of such an acquisition.

Key Risks

- **Interest Rate Risk** – The capital requirements outlined by the Company will likely require additional debt financing.
- **International Risk** – With operations in Belize, the Cayman Islands, and the Turks and Caicos, Fortis is subject to currency risk, sovereign risk, and the risk of hurricanes.
- **Regulatory Risk** – Regulated assets consist of 92% of Fortis' total assets, with each of the regulated utilities subject to some form of regulation which can impact future revenue and earnings. Each operating utility must ensure compliance with current regulations and proactive measures towards regulatory issues.
- **Risk of Fluctuating Bond Yields** – The share price of Fortis is inversely related to bond yields. Furthermore, lower bond yields may result in Fortis having to lower the rates for certain subsidiaries, thereby hampering earnings.

FORTIS INC.

Healthy Economic Activity in Western Canada Driving Fortis' Performance

Highlights

- **Fortis reported strong Q1/2011 earnings of \$117 million, or \$0.65 per common share, compared to \$100 million, or \$0.58 per share, in Q1/2010.** The 17.0% y/y growth in earnings was driven by the Company's regulated utilities in Western Canada.
- **FortisAlberta grew its quarterly earnings by 50% y/y.** Results were primarily driven by customer electricity rate growth and growth in electricity sales. FortisBC also delivered strong quarterly earnings which grew 34% y/y largely due to increased electricity rates and continued investment in utility infrastructure. **The Company also maintained its expectation to invest \$5.5 billion on capex initiatives over the next five years.**
- We believe the Company's management remains disciplined and patient in its pursuit of an accretive regulated utility acquisition, in the United States or Canada. We believe current valuations dictate additional patience in order to prevent overpayment for desired targets. We have not included any acquisitions in our numbers, primarily due to the uncertainty on the timing of such an acquisition.
- **We are maintaining our 12-month target price of \$34.00 and our HOLD rating on the name.** Our valuation is based on analysis of P/E and EV/EBITDA multiples and our dividend discount model. Our target equates to 19.4x 2011E EPS and 10.3x 2011E EV/EBITDA. Including dividends, there is a potential return of approximately 8.7% over the next year, which justifies our HOLD rating. The shares currently yield 3.6%.

Financial Results

Fortis Inc. reported a 17.0% y/y growth in Q1/2011 consolidated net earnings attributable to common equity of \$117 million, or \$0.67 per share, compared to \$100 million, or \$0.58 per share in Q1/2010

- Fortis Inc. reported strong Q1/2011 results with consolidated net earnings attributable to common equity shareholders of \$117 million, or \$0.67 per common share, compared to \$100 million, or \$0.58 per share, in Q1/2010. The 17.0% y/y growth in Q1 earnings was largely driven by strength in the Company's regulated utilities in western Canada. Below is a summary of the contribution from each of the Company's business segments in the quarter compared to the same period last year.

Exhibit 1: Consolidated net earnings summary

(in millions of Canadian dollars, except per share data)	Q1 2011	Q1 2010
Net Earnings Applicable to Common Shares (\$M)	\$117	\$100
Reported Basic EPS	\$0.67	\$0.58
Reported Diluted EPS	\$0.65	\$0.56

Source: Company reports, Beacon Securities.

Effective March 1, 2011, the Company's Canadian Regulated Gas Utilities, the Terasen Gas companies, were renamed FortisBC Energy Inc.

- Effective March 1, 2011, the Company's Canadian Regulated Gas Utilities, the **Terasen Gas** companies, were renamed **FortisBC Energy Inc.** These Gas Utilities grew earnings by 4.1% y/y to reach \$76 million in the first quarter. The strength was driven by growth in utility infrastructure investment, reduced amortization costs and higher capitalized finance charges. This was partially offset by an increase in operating expenses. Management also commented positively on the heightened focus on natural gas and its potential use for transportation in North America. Key contributors to FortisBC Energy's strong performance in the quarter were higher average consumption by residential and commercial customers driven by cooler weather, and higher transportation volumes driven by increased economic activity, especially in the forestry sector.

FortisBC Energy's strong performance in the quarter was supported by higher transportation volumes driven by increased economic activity, especially in the forestry sector

Exhibit 2: Segmented net earnings

(in millions of Canadian dollars)	Q1 2011	Q1 2010
FortisBC Energy Inc. (formerly Terasen Gas)	\$76	\$73
FortisAlberta	\$21	\$14
FortisBC Electric	\$19	\$14
Newfoundland Power	\$7	\$7
Other Canadian Electric Utils	\$6	\$5
Electric Caribbean	\$4	\$4
Non-Regulated - Fortis Generation	\$3	\$2

Corporate and Other	-\$20	-\$21
Total	\$117	\$100

Source: Company reports, Beacon Securities.

- The Canadian Regulated Electric Utilities delivered 32% y/y growth in earnings, to reach \$53 million (primarily driven by FortisAlberta, and FortisBC Electric.)

FortisAlberta's performance was largely supported by a 4.7% increase in base customer electricity distribution rates over final approved 2010 rates, growth in customer base and higher energy deliveries

- **FortisAlberta's** quarterly earnings grew by 50% y/y, to reach \$21 million. The improvements were largely supported by a 4.7% increase in base customer electricity distribution rates over final approved 2010 rates, growth in customer base and higher energy deliveries. The segment's results were also boosted by a \$1 million gain from the sale of property.
- **FortisBC Electric** quarterly earnings grew 36% y/y, to reach \$19 million. The improvements were largely supported by a 6.6% increase in customer electricity rates and a 10.4% increase in electricity sales as well as continued investment in utility infrastructure. This was slightly offset by lower pole attachment revenue and an increase in incentive adjustments owed to customers.
- **Newfoundland Power** delivered flat y/y growth with quarterly earnings of \$7 million. The growth in the number of customers and higher average consumption were offset by the decrease in allowed ROE and higher maintenance costs and higher labour costs in the quarter.
- **Regulated Electric Utilities-Caribbean** quarterly earnings of \$4 million were also flat on a year-over-year basis. Key contributors to the segment's performance were increased electricity sales in Grand Cayman and lower maintenance costs at Caribbean Utilities in the quarter. These were offset by higher provisions for bad debt at Belize Electricity and higher finance charges at that same utility, due to interest expense on regulatory liabilities.

Fortis Generation grew to \$3 million in the quarter, compared to \$2 million in Q1/2010, mainly due to higher production in Belize and higher average energy sales rates in Ontario.

- Earnings from **Fortis Generation** grew to \$3 million in the quarter, compared to \$2 million in Q1/2010, mainly due to higher production in Belize and higher average energy sales rates in Ontario. Higher finance charges dampened earnings slightly.
- **Fortis Properties** earned \$1 million in the quarter, compared to \$2 million in Q1/2010, primarily due to the negative impact of economy on hotel operations and higher amortization costs driven by capital investments in Hospitality and Real Estate divisions. The segment benefited, however, from a gain on the sale of the Viking Mall.
- **Corporate and other expenses** came in at \$20 million for the quarter, compared to \$21 million in Q1/2010. The increase in dividends associated with the First Preference Shares, Series H issued in January 2010 and lower corporate tax recovery in the quarter, was partially offset by reduced operating expenses, lower finance charges and lower amortization costs.
- Cash flow from operations, before changes in non-cash operating working capital, also grew nearly 19% y/y to reach

The Company is continuing work on the \$126 million Automated Meter Project at FortisAlberta and the \$106 million Okanagan Transmission Reinforcement Project at FortisBC Electric

Fortis' \$900 million Waneta Expansion Project is expected to be completed in the spring of 2015

\$242 million in Q1/2010 largely driven by strong net earnings. Gross capital expenditures reached almost \$233 million in Q1/2010 as the Company continues to aggressively invest in its infrastructure assets, including the construction of the \$214 million liquefied natural gas (LNG) storage facility on Vancouver Island, which is expected to be completed in the next several weeks. The Company is also continuing work on the \$126 million Automated Meter Project at FortisAlberta and the \$106 million Okanagan Transmission Reinforcement Project at FortisBC Electric. Work is also continuing on the \$900 million Waneta Expansion Project which is expected to be completed in the spring of 2015.

Outlook and Financial Forecast

We have updated our model to reflect the strong Q1/2010 performance. We expect the Company's operation in western Canada, namely its regulated utilities FortisAlberta, and FortisBC Electric to continue to benefit from the region's healthy economic activity. We have tempered our expectation for the Caribbean utilities slightly and increase our estimates for Fortis Generation but maintained our forecasts for Fortis Properties. Exhibit 3 shows our updated forecast for overall EBITDA, net income and EPS.

Exhibit 3: Beacon Securities' Updated Forecast (in Canadian dollars)

	2010A	2011E - New	2011E - Old	2012E - New
EBITDA (\$M)	\$1,150	\$1,172	\$1,191	\$1,251
Net Income (\$M)	\$285	\$307	\$302	\$320
EPS (basic)	\$1.65	\$1.75	\$1.74	\$1.83
EPS (diluted)	\$1.62	\$1.70	\$1.68	\$1.78

Source: Company reports, Beacon Securities.

Long-term debt remained flat q/q at \$5.6 billion, but increase from \$5.1 billion at the end of Q1/2010. We believe Fortis continues to have strong access to capital markets, to finance its future capital programs. The Company maintained its expectation to continue to invest in its infrastructure and reiterated its \$5.5 billion estimate of gross capital expenditures on various projects over the next five years, including the work related to the Waneta Expansion Project.

Valuation and Recommendation

We are maintaining our 12-month target price of \$34.00 and our HOLD rating on the name

We are maintaining our 12-month target price of \$34.00 and our HOLD rating on the name. Our valuation is based on analysis of P/E and EV/EBITDA multiples and our dividend discount model. Our target equates to 19.4x 2011E EPS and 10.3x 2011E EV/EBITDA. Including dividends, there is a potential return of approximately 8.7% over the next year, which justifies our HOLD rating. The shares currently yield 3.6%.

We believe the Company's management remains disciplined and patient in its pursuit of an accretive regulated utility acquisition, in the United States or Canada. We believe current valuations dictate additional patience in order to prevent overpayment for desired targets. We have not included any acquisitions in our numbers, primarily due to the uncertainty on the timing of such an acquisition.

Key Risks

- **Interest Rate Risk** – The capital requirements outlined by the Company will likely require additional debt financing.
- **International Risk** – With operations in Belize, the Cayman Islands, and the Turks and Caicos, Fortis is subject to currency risk, sovereign risk, and the risk of hurricanes.
- **Regulatory Risk** – Regulated assets consist of 92% of Fortis' total assets, with each of the regulated utilities subject to some form of regulation which can impact future revenue and earnings. Each operating utility must ensure compliance with current regulations and proactive measures towards regulatory issues.
- **Risk of Fluctuating Bond Yields** – The share price of Fortis is inversely related to bond yields. Furthermore, lower bond yields may result in Fortis having to lower the rates for certain subsidiaries, thereby hampering earnings.

FORTIS INC.

Infrastructure Investments Keep Performance Strong in Q2/2011

Highlights

- **Fortis Inc. reported another strong quarter with the release of its Q2/2011 results today.** Consolidated net earnings attributable to common equity shareholders were \$58 million, or \$0.33 per common share, compared to \$55 million, or \$0.32 per share, in Q2/2010. Overall EBITDA margins also improved to 32.8%, up 90 bps from the same quarter, a year ago. **Fortis also generated impressive cash flow from operations in the first half of 2011, reaching \$527 million, up \$122 million or 30% from the first half of 2010.**
- We continue to expect the Company's operation in western Canada, namely its regulated utilities FortisBC Electric and FortisAlberta to continue to benefit from the region's sound fundamentals and healthy customer demand.
- Capital expenditures totaled \$519 million in first half of 2011 as the Company continues to aggressively invest in its infrastructure assets. **The Company is on track to invest over \$1.2 billion in 2011.** By the end of 2015, we expect the Company to have invested close to \$5.7 billion on its capex program.
- **We are maintaining our 12-month target price of \$34.00 and our HOLD rating on the name.** Our valuation is based on analysis of P/E and EV/EBITDA multiples and our dividend discount model. Our target equates to 19.1x 2012E EPS and 9.8x 2012E EV/EBITDA. Including dividends, there is a potential return of approximately 14% over the next year, which justifies our HOLD rating. The shares currently yield 3.8%.

Company Description

Fortis Inc. is Canada's largest investor-owned distribution utility, with more than two million gas and electricity customers. The Company is headquartered in St. John's, NL. Its main focus is the ownership and operation of regulated utilities, with operations in five provinces and three Caribbean countries. Fortis also owns and operates non-regulated generation assets and commercial real estate and hotel assets.

Financial Results

Fortis Inc. reported another strong quarter with the release of its Q2/2011 results today. Consolidated net earnings attributable to common equity shareholders were \$58 million, or \$0.33 per common share, compared to \$55 million, or \$0.32 per share, in Q2/2010

- **Fortis Inc. reported another strong quarter with the release of its Q2/2011 results today. Consolidated net earnings attributable to common equity shareholders were \$58 million, or \$0.33 per common share, compared to \$55 million, or \$0.32 per share, in Q2/2010, and slightly below our \$0.36 EPS estimate.** Net earnings growth in the quarter was primarily driven by 1) the strong results in the Company's regulated utilities in western Canada, primarily related to overall growth in the utility infrastructure investments, 2) lower market-priced purchased power costs at FortisBC, and 3) additional return earned on FortisAlberta's investment in automated meters. Overall EBITDA margins also improved to 32.8%, up 90 bps from the same quarter a year ago. Fortis also generated impressive cash flow from operations in the first half of 2011, reaching \$527 million, up \$122 million or 30% from the first half of 2010. In addition to higher earnings, the growth in cash flows was largely driven by the collection from customers of higher amortization costs and favourable changes in working capital and regulatory deferral accounts. Exhibit 1 shows a summary of Fortis' consolidated net earnings for the quarter.

Exhibit 1: Consolidated net earnings summary

<i>(in millions of Canadian dollars, except per share data)</i>	Q2 2011	Q2 2010
Net Earnings Applicable to Common Shares (\$M)	\$58	\$55
Reported Basic EPS	\$0.33	\$0.32
Reported Diluted EPS	\$0.33	\$0.32

FortisBC Energy Inc. results were slightly negatively impacted by lower natural gas volumes under fixed contracts, mainly due to higher precipitation and lower natural gas pricing charged to customers

Below is a summary of the contribution from each of the Company's business segments in the quarter compared to the same period last year.

- **FortisBC Energy Inc.** results were slightly negatively impacted by lower natural gas volumes under fixed contracts, mainly due to higher precipitation and lower natural gas pricing charged to customers. Revenues and net earnings in the segment were \$320 million and \$15 million, respectively, in Q2/2011, compared to revenues of \$336 million and net earnings of \$17 million in Q2/2010.
- The Company's Canadian Regulated Electric Utilities delivered 12.5% y/y growth in earnings, to reach \$45 million, again driven by FortisAlberta, and FortisBC Electric, similar to Q1/2011.
- **FortisAlberta's** quarterly earnings grew to reach \$19 million in Q2/2011, compared to \$17 million in Q2/2011. The

FortisAlberta's quarterly earnings grew to reach \$19 million in Q2/2011, compared to \$17 million in Q2/2010. Meanwhile, FortisBC Electric quarterly earnings grew 12.5% y/y, to reach \$9 million

improvements in the quarter were largely due to growth in the number of total customers by approximately 9,400 over the same quarter last year.

- **FortisBC Electric** quarterly earnings grew 12.5% y/y, to reach \$9 million. The improvements were largely supported by the 6.6% increase in customer electricity rates and a 1.4% increase in electricity sales in the quarter. This was slightly offset by lower pole attachment revenue and an increase in incentive adjustments owed to customers.
- **Newfoundland Power** delivered flat y/y growth with quarterly earnings of \$11 million. The growth in the number of customers and higher average consumption were offset by the decrease in allowed ROE and wage increases.
- **Other Canadian Electric Utilities** grew quarterly earnings to reach \$6 million in Q2/2011, compared to \$4 million in Q2/2010. The growth was driven primarily by an average 3.8% increase in customer electricity rates, and higher allowed ROE at Algoma Power.

Exhibit 2: Segmented net earnings

(in millions of Canadian dollars)	Q2 2011	Q2 2010
FortisBC Energy Inc. (formerly Terasen Gas)	\$15	\$17
FortisAlberta	\$19	\$17
FortisBC Electric	\$9	\$8
Newfoundland Power	\$11	\$11
Other Canadian Electric Utils	\$6	\$4
Electric Caribbean	\$7	\$7
Non-Regulated - Fortis Generation	\$2	\$3
Non-Regulated - Fortis Properties	\$7	\$8
Corporate and Other	-\$18	-\$20
Total	\$58	\$55

Source: Company reports, Beacon Securities.

Fortis Properties earned \$7 million in the quarter, compared to \$8 million in Q2/2010, primarily due to a 2.2% decrease in hotel occupancy, mainly in Western Canada

- **Regulated Electric Utilities-Caribbean** quarterly earnings of \$7 million were flat on a year-over-year basis. This was primarily driven by lower electricity sales in Grand Cayman, and the discontinuance of consolidation method accounting for financial results of Belize Electricity, effective June 20, 2011. These were offset by lower corporate taxes at Belize Electricity and a commercial customer billing adjustment at Caribbean Utilities.
- Earnings from **Fortis Generation** declined to \$2 million in the quarter, compared to \$3 million in Q2/2010, mainly due to decreased production in Belize and higher finance charges in the quarter.
- **Fortis Properties** earned \$7 million in the quarter, compared to \$8 million in Q2/2010, primarily due to a 2.2% decrease in hotel occupancy, mainly in Western Canada. This was slightly

offset by an overall 2.0% increase in the average daily room rate. The Real Estate division's occupancy rate decreased to 93.4% as at June 30, 2011, from 94.8% at the end of the same period last year.

FortisBC Energy
substantially completed
the construction of its
\$214 million liquefied
natural gas (LNG)
storage facility on
Vancouver Island

FortisAlberta
substantially completed
its \$126 million
Automated Meter
Project, including the
replacement of 466,000
conventional meters

Fortis' \$900 million
Waneta Expansion
Project is expected to be
completed in the spring
of 2015

- **Corporate and other expenses** came in at \$18 million for the quarter, compared to \$20 million in Q2/2010. Last year, the Company incurred higher business development costs in Q2. In the quarter, the Company also incurred lower finance charges, largely due to the redemption of the \$125 million 8% Capital Securities in April 2010 and a favourable foreign exchange impact, which were slightly offset by lower corporate tax recoveries.
- Gross capital expenditures totaled \$519 million in first half of 2011 as the Company continues to aggressively invest in its infrastructure assets. In the quarter, FortisBC Energy substantially completed the construction of its \$214 million liquefied natural gas (LNG) storage facility on Vancouver Island. At the same time, FortisAlberta substantially completed its \$126 million Automated Meter Project, including the replacement of 466,000 conventional meters. In the meantime, work continues to progress on the \$900 million Waneta Expansion Project, which is expected to be completed in the spring of 2015.
- The Company's merger agreement with Central Vermont Public Service Corporation (CVPS) was terminated in July, subsequent to quarter end. According to the terms of the agreement, CVPS paid Fortis a US\$17.5 million termination fee plus US\$2 million for expenses.

Outlook and Financial Forecast

We believe Fortis Inc. is on track to complete \$1.2 billion in capital expenditures in 2011, primarily in infrastructure projects across its Western Canada businesses. By the end of 2015, we expect the Company to have invested close to \$5.7 billion on its capex program. We continue to expect the Company's operation in western Canada, namely its regulated FortisBC Electric and FortisAlberta utilities to continue to benefit from the region's sound fundamentals and healthy customer demand. Our updated model reflects the latest Q2/2011 results. Exhibit 3 shows our updated forecast for overall EBITDA, net income and EPS.

Exhibit 3: Beacon Securities' Updated Forecast (in Canadian dollars)

	2011E - New	2011E - Old	2012E - New	2012E - Old

Valuation and Recommendation

We are maintaining our 12-month target price of \$34.00 and our HOLD rating on the name

We are maintaining our 12-month target price of \$34.00 and our HOLD rating on the name. Our valuation is based on analysis of P/E and EV/EBITDA multiples and our dividend discount model. Our target equates to 19.1x 2012E EPS and 9.8x 2012E EV/EBITDA. Including dividends, there is a potential return of approximately 14% over the next year, which justifies our HOLD rating. The shares currently yield 3.8%.

The Company continues to remain disciplined and patient in its pursuit of an accretive regulated utility acquisition, in the United States or Canada. Current valuations seem to be making it difficult to not overpay for desired targets. We have not included any acquisitions in our numbers, primarily due to the uncertainty on the timing of such an acquisition.

Key Risks

- **Interest Rate Risk** – The capital requirements outlined by the Company will likely require additional debt financing.
- **International Risk** – With operations in Belize, the Cayman Islands, and the Turks and Caicos, Fortis is subject to currency risk, sovereign risk, and the risk of hurricanes.
- **Regulatory Risk** – Regulated assets consist of 92% of Fortis' total assets, with each of the regulated utilities subject to some form of regulation which can impact future revenue and earnings. Each operating utility must ensure compliance with current regulations and proactive measures towards regulatory issues.
- **Risk of Fluctuating Bond Yields** – The share price of Fortis is inversely related to bond yields. Furthermore, lower bond yields may result in Fortis having to lower the rates for certain subsidiaries, thereby hampering earnings.

Newfoundland Regulator Approves 2006 Accounting Policy Application - Market Perform

Event

On December 23, the Newfoundland Board of Commissioners of Public Utilities approved Newfoundland Power Inc.'s (100% - Fortis Inc.) Accounting Policy Application, as highlighted in our December 16 research comment. On January 9, the utility submitted a compliance filing with the Board, requesting final approval of the following pursuant to the December 23 decision: (1) forecast rate base for 2006 of \$743.976 million and actual capital outstanding of \$745.402 million for the purpose of determining the 2006 return on capital; and (2) approval of a range of return on rate base for 2006 of 8.50% to 8.86%, which is unchanged from 2004 and accordingly, no change in customer rates is required for 2006 by the virtue of the operation of the cost of capital formula.

Impact

Neutral.

Forecasts

Our 2006 and 2007 diluted EPS estimates increase by \$0.01 respectively to \$1.13 and \$1.25.

Valuation

Our target price of \$23.25 reflects a weighted average valuation approach: 17x diluted 2007E EPS of \$1.25 (12.5%), 1.75x 2007E book value per share of \$13.15 (12.5%), and a target yield of 3% (75%), assuming 2007 dividends per share of \$0.70 per share.

Recommendation

We believe that the shares are reasonably valued at current levels. Our rating is Market Perform.

Company Risk Disclosure

In addition to the risks involved in investing in common stocks generally, we also highlight the following risks that pertain to this company. Operations are subject to complex regulation by a variety of provincial, state and federal (Canada, Cayman Islands & Belize) agencies. Changes in regulation may adversely affect performance.

Financial performance is dependent upon the availability of installed generation and the production of electric power by third parties. Fortis Properties' cash flow is dependent on hotel room vacancy rates and commercial building occupancy levels. The Company's operations in Belize may be disrupted and assets may be damaged by hurricanes and/or tropical storms.

Analyst's Certification

I, Karen Taylor, CFA, hereby certify that the views expressed in this report accurately reflect my personal views about the subject securities or issuers. I also certify that I have not, am not, and will not receive, directly or indirectly, compensation in exchange for expressing the specific recommendations or views in this report.

General Disclosure

The information and opinions in this report were prepared by BMO Nesbitt Burns Research, the research department of BMO Nesbitt Burns Inc., and BMO Nesbitt Burns Ltee./Ltd. ("BMO Nesbitt Burns"). Harris Nesbitt Corp. ("HNC") is an affiliate of BMO Nesbitt Burns. BMO Nesbitt Burns and HNC are subsidiaries of Bank of Montreal. The reader should assume that BMO Nesbitt Burns, HNC or their affiliates may have a conflict of interest and should not rely solely on this report in evaluating whether or not to buy or sell securities of issuers discussed herein.

The opinions, estimates and projections contained in this report are those of BMO Nesbitt Burns Research as of the date of this report and are subject to change without notice. BMO Nesbitt Burns Research endeavours to ensure that the contents have been compiled or derived from sources that we believe are reliable and contain information and opinions that are accurate and complete. However, BMO Nesbitt Burns makes no representation or warranty, express or implied, in respect thereof, takes no responsibility for any errors and omissions contained herein and accepts no liability whatsoever for any loss arising from any use of, or reliance on, this report or its contents. Information may be available to BMO Nesbitt Burns or its affiliates that is not reflected in this report. This report is not to be construed as an offer to sell or the solicitation of an offer to buy or sell any security.

The research analyst and/or associates who prepared this report are compensated based upon (among other factors) the overall profitability of BMO Nesbitt Burns, HNC and their affiliates, which includes the overall profitability of investment banking services. BMO Nesbitt Burns, HNC or their affiliates expect to receive or will seek compensation for investment banking services within the next 3 months from all issuers covered by BMO Nesbitt Burns Research.

BMO Nesbitt Burns, HNC or their affiliates will buy from or sell to customers the securities of issuers mentioned in this report on a principal basis. BMO Nesbitt Burns, HNC, their affiliates, officers, directors or employees may have a long or short position in the securities discussed herein, related securities or in options, futures or other derivative instruments based thereon. BMO Nesbitt Burns, HNC or their affiliates may act as financial advisor and/or underwriter for the issuers mentioned herein and may receive remuneration for same. Bank of Montreal or its affiliates ("BMO Financial Group") has lending arrangements with, or provide other remunerated services to, many issuers covered by BMO Nesbitt Burns Research. A significant lending relationship may exist between BMO Financial Group and certain of the issuers mentioned herein.

Company Specific Disclosure

Disclosure 9: HNC or an affiliate received compensation for products or services other than investment banking services from this issuer within the past 12 months.

Disclosure 10: This issuer is a client (or was a client) of BMO Nesbitt Burns, HNC or an affiliate within the past 12 months: Non Securities Related Services.

Fiscal 2005 Diluted EPS In Line With Expectations; No Change in View - Market Perform

Event

Fortis reported Q4/05 and fiscal 2005 EPS of \$0.22 and \$1.35, respectively. After adjusting for one-time items in Q4/05 and those in the first three quarters of the year, reported results were \$0.24 and \$1.17 (basic), respectively. Diluted 2005 EPS were \$1.10. Aggregate normalized earnings of \$119.3 million were slightly higher than our expectation of \$114.6 million. On a diluted basis, fiscal 2005 EPS of \$1.10 were directly in line with our diluted EPS estimate of \$1.10.

Impact

Neutral.

Forecasts

We have fine-tuned our financial model to reflect actual fiscal 2005 results and updated our outlook for FortisAlberta. Our 2006 and 2007 diluted EPS estimates increase to \$1.18 and \$1.29, respectively from \$1.13 and \$1.25.

Valuation

Our new target price of \$23.75 reflects a weighted average valuation approach: 17x diluted 2007E EPS of \$1.29 (12.5%), 1.75x estimate 2007 book value per share of \$13.37 (12.5%), and a target yield of 3.00% (75%), assuming 2007 dividends of \$0.72 per share.

Recommendation

We believe that the shares are reasonably valued at current levels. Our rating is Market Perform.

After adjusting for one-time items in Q4/05 and those in the first three quarters of the year, reported results were \$0.24 and \$1.17 (basic), respectively. Diluted 2005 EPS were \$1.10. Aggregate normalized earnings of \$119.3 million were slightly higher than our expectation of \$114.6 million. On a diluted basis, fiscal 2005 EPS of \$1.10 were directly in line with our diluted EPS estimate of \$1.10.

We believe that the following points are relevant about Q4/05 and fiscal 2005 performance:

- We have normalized reported fiscal 2005 results for the following one-time items and adjustments:

First Quarter

- \$7.9 million after-tax benefit in Fortis Ontario arising from the Niagara Exchange Agreement with Ontario Power Generation.

Second Quarter

- \$7.0 million after-tax gain relating to the resolution of tax matters resulting in the reduction of liabilities associated with prior periods at FortisAlberta.
- \$1.4 million after-tax interest revenue from a tax settlement at Newfoundland Power.
- \$1.1 million after-tax gain at Caribbean Utilities relating to a change in accounting practice for recognizing unbilled revenue.

Third Quarter

- \$1.6 million future income tax reduction at Cornwall Electric.
- Approximately \$1.8 million after-tax associated with Fortis Alberta and the resolution of the EPCOR litigation.

Fourth Quarter

- \$3 million after-tax one-time adjustment relating to the implementation of the Negotiated Settlement reached on May 24, 2005 by FortisAlberta.
- Segment performance was largely in line with expectations, as set out in Table 1.

Source: BMO Nesbitt Burns, Company Reports

- The contribution from FortisOntario was lower than expected, largely due to the timing of anticipated regulatory decisions that are anticipated to provide rate relief at Canadian Niagara Power, increase the return on invested capital. We have reduced our outlook from this segment in 2006 and 2007 to more appropriately reflect the requirement for future rate applications to increase the realized return on equity at this utility.
- The contribution from FortisAlberta was higher than expected on a normalized basis, reflecting the difference between the contribution from the utility on a stand-alone basis (as reported separately) and the contribution to Fortis Inc. on a consolidated basis. The latter reflects adjustments to various regulatory accounts at the time of acquisition, increasing the return on a consolidated basis. We have made the requisite adjustments to our financial model to more appropriately reflect these ongoing adjustments.
- Our estimates and outlook for Maritime Electric do not yet include the January 31, 2006 rate application filed by the utility with the Island Regulatory and Appeals Commission and the January 20, 2006 decision by the regulator regarding the fiscal 2006 capital budget. We will update our outlook upon the receipt of these documents; however, we do not expect the application and the capital budget decision to materially change our outlook.
- We have fully incorporated the December 12, 2005 rate application filed by FortisAlberta for 2006/2007 with the Alberta Energy and Utilities Board and the November 24, 2005 application by FortisBC to the British Columbia Utilities Commission for 2006 rates.
- The contribution from FortisProperties was slightly higher than expected, largely due to the contribution from three hotels acquired in Alberta and Manitoba that were acquired in February 2005.
- The December 31, 2005 decision by the Public Utilities Commission of Belize that allows Belize Electricity Limited to: (1) recover approximately BZ\$8.4 million that has accrued in the Cost of Power Rate Stabilization Account via a BZ0.6 cent per kilowatt increase in electricity rates; (2) increase the cost of power per kilowatt hour for calendar year 2006 by BZ\$0.045 to BZ\$0.255 (or a reference cost of power of BZ\$0.224 per kWh); and (3) increase the mean electricity rate charged to customers to BZ\$0.441 from BZ\$0.39

previously, is positive. The decision does not increase the earnings contribution from the utility on a consolidated basis; however, we believe that a reduction in energy-related cost deferral accounts and the “true-up” of customer rates and power costs are likely to reduce capital employed, moderate risk and facilitate the continued investment in the utility system.

- We assume that capital expenditures are approximately \$419.8 million and \$381.0 million in 2006 and 2007, respectively. Anticipated expenditure levels reflect large capital programs at FortisAlberta and FortisBC.

Estimates

We have fine-tuned our financial model to reflect actual fiscal 2005 results and updated our outlook for FortisAlberta. Our 2006 and 2007 diluted EPS estimates increase to \$1.18 and \$1.29, respectively from \$1.13 and \$1.25. We assume that Fortis issues approximately \$100 million of common stock in 2007 to support the ongoing utility capital program and maintain adequate balance sheet strength.

Valuation

Our new target price of \$23.75 reflects a weighted average valuation approach: 17x diluted 2007E EPS of \$1.29 (12.5%), 1.75x estimate 2007 book value per share of \$13.37 (12.5%), and a target yield of 3.00% (75%), assuming 2007 dividends of \$0.72 per share.

Recommendation

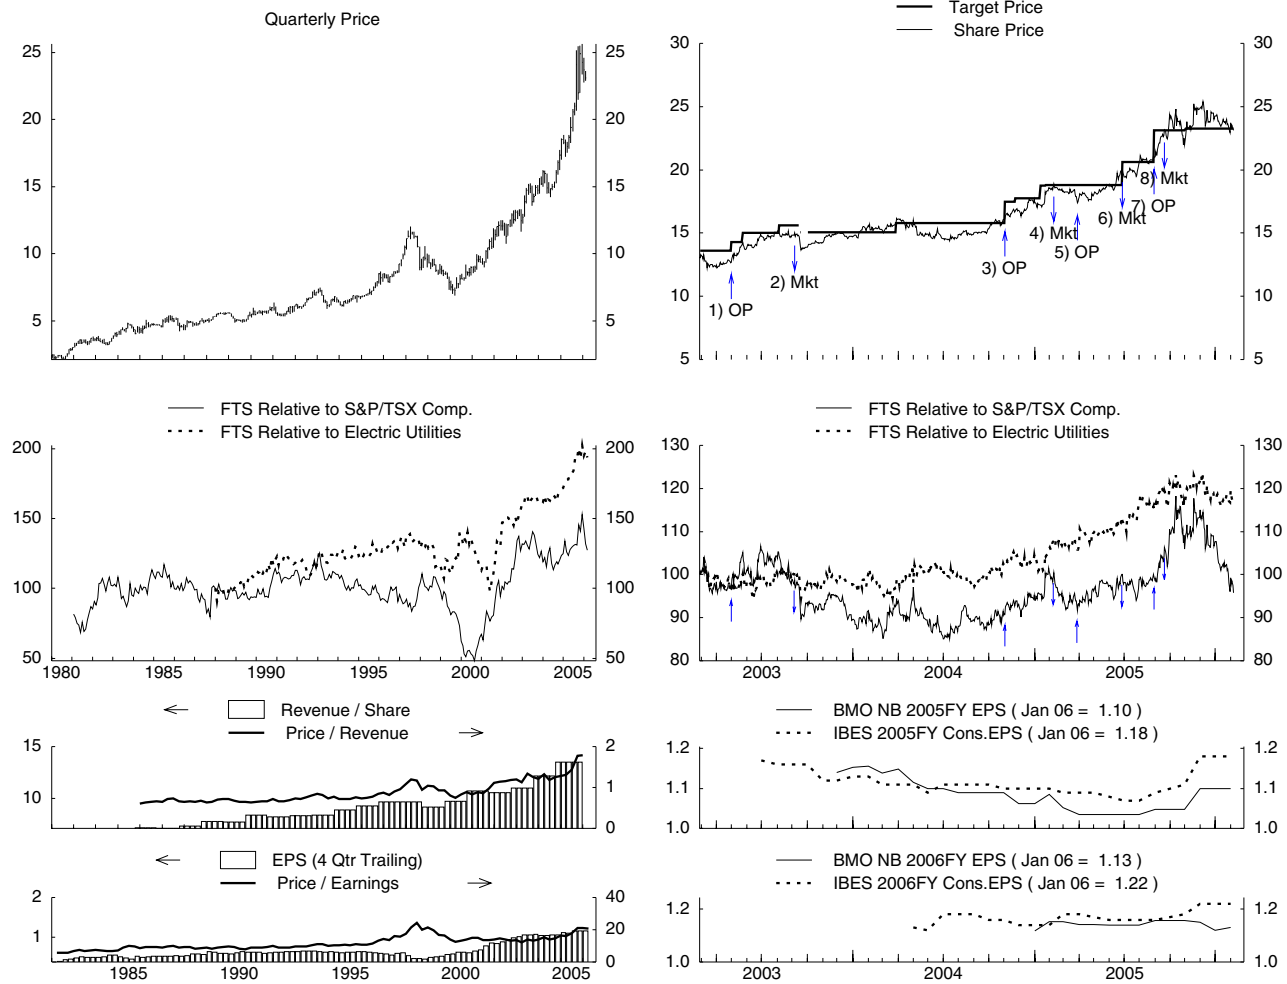

We believe that the shares are reasonably valued at current levels. Our rating is Market Perform.

Company Risk Disclosure

In addition to the risks involved in investing in common stocks generally, we also highlight the following risks that pertain to this company. Operations are subject to complex regulation by a variety of provincial, state and federal (Canada, Cayman Islands & Belize) agencies. Changes in regulation may adversely affect performance.

Financial performance is dependent upon the availability of installed generation and the production of electric power by third parties. Fortis Properties' cash flow is dependent on hotel room vacancy rates and commercial building occupancy levels. The Company's operations in Belize may be disrupted and assets may be damaged by hurricanes and/or tropical storms.

Analyst's Certification

I, Karen Taylor, CFA, hereby certify that the views expressed in this report accurately reflect my personal views about the subject securities or issuers. I also certify that I have not, am not, and will not receive, directly or indirectly, compensation in exchange for expressing the specific recommendations or views in this report.

General Disclosure

The information and opinions in this report were prepared by BMO Nesbitt Burns Research, the research department of BMO Nesbitt Burns Inc., and BMO Nesbitt Burns Ltee./Ltd. ("BMO Nesbitt Burns"). Harris Nesbitt Corp. ("HNC") is an affiliate of BMO Nesbitt Burns. BMO Nesbitt Burns and HNC are subsidiaries of Bank of Montreal. The reader should assume that BMO Nesbitt Burns, HNC or their affiliates may have a conflict of interest and should not rely solely on this report in evaluating whether or not to buy or sell securities of issuers discussed herein.

The opinions, estimates and projections contained in this report are those of BMO Nesbitt Burns Research as of the date of this report and are subject to change without notice. BMO Nesbitt Burns Research endeavours to ensure that the contents have been compiled or derived from sources that we believe are reliable and contain information and opinions that are accurate and complete. However, BMO Nesbitt Burns makes no representation or warranty, express or implied, in respect thereof, takes no responsibility for any errors and omissions contained herein and accepts no liability whatsoever for any loss arising from any use of, or reliance on, this report or its contents. Information may be available to BMO Nesbitt Burns or its affiliates that is not reflected in this report. This report is not to be construed as an offer to sell or the solicitation of an offer to buy or sell any security.

The research analyst and/or associates who prepared this report are compensated based upon (among other factors) the overall profitability of BMO Nesbitt Burns, HNC and their affiliates, which includes the overall profitability of investment banking services. BMO Nesbitt Burns, HNC or their affiliates expect to receive or will seek compensation for investment banking services within the next 3 months from all issuers covered by BMO Nesbitt Burns Research.

BMO Nesbitt Burns, HNC or their affiliates will buy from or sell to customers the securities of issuers mentioned in this report on a principal basis. BMO Nesbitt Burns, HNC, their affiliates, officers, directors or employees may have a long or short position in the securities discussed herein, related securities or in options, futures or other derivative instruments based thereon. BMO Nesbitt Burns, HNC or their affiliates may act as financial advisor and/or underwriter for the issuers mentioned herein and may receive remuneration for same. Bank of Montreal or its affiliates ("BMO Financial Group") has lending arrangements with, or provide other remunerated services to, many issuers covered by BMO Nesbitt Burns Research. A significant lending relationship may exist between BMO Financial Group and certain of the issuers mentioned herein.

Company Specific Disclosure

Disclosure 9: HNC or an affiliate received compensation for products or services other than investment banking services from this issuer within the past 12 months.

Disclosure 10: This issuer is a client (or was a client) of BMO Nesbitt Burns, HNC or an affiliate within the past 12 months: Non Securities Related Services.

* Reflects rating distribution of all companies where BMO NB has received compensation for Investment Banking services.

** Reflects rating distribution of all North American equity research analysts.

Ratings Key

BMO Nesbitt Burns uses the following ratings system definitions. **OP = Outperform** - Forecast to outperform the market; **Mkt = Market Perform** - Forecast to perform roughly in line with the market; **Und = Underperform** - Forecast to underperform the market; **(S) = speculative investment**; **NR** = No rating at this time; **(R) = Restricted** - Dissemination of research is currently restricted.

^ Market performance as measured by a benchmark index such as the S&P/TSX Composite Index, S&P 500, Nasdaq Composite, as appropriate for each company.

Prior to September 1, 2003, a fourth rating tier—Top Pick—was used to designate those stocks we felt would be the best performers relative to the market. Our six Top 15 lists which guide investors to our best ideas according to six different objectives (large, small, growth, value, income and quantitative) have replaced the Top Pick rating.

Dissemination of Research

BMO Nesbitt Burns Research publications are available via our web site <http://bmonesbittburns.com>. Institutional clients may also receive our research via FIRST CALL Research Direct and Reuters. All of our research is made widely available at the same time to all BMO Nesbitt Burns client groups entitled to our research. Please contact your investment advisor or institutional salesperson for more information.

Maritime Electric Files for 2006/07 Rates; Market Perform Rating Maintained

Event

On January 31, Maritime Electric Company, Limited (100% - Fortis Inc.) applied to the Island Regulatory and Appeals Commission for rates, tolls and charges for electric service for the period July 1 2006 to December 31, 2007. The application was made available as a public document on March 1. The application contains the following highlights: (1) average 2006 and 2007 rate base of \$223.1 million and \$250.9 million; (2) net capital expenditures of \$20.5 million in 2006 and \$15.9 million in 2007; (3) deemed equity of 42.2% in 2006 and 41.5% in 2007; and (4) return on equity range of 10.0% to 10.5%, as per the current authorization.

Impact

Neutral.

Forecasts

We have updated our financial model to reflect the application and fine-tuned our outlook pursuant to the conclusion of fiscal 2005. Our diluted 2006 and 2007 EPS estimates decline marginally to \$1.17 and \$1.26 from \$1.18 and \$1.29, respectively.

Valuation

Our target price of \$23.75 reflects a weighted average valuation approach: 17x diluted 2007E EPS of \$1.26 (12.5%), 1.75x estimated book value per share of \$13.33 (12.5%), and a target yield of 3% (75%), assuming 2007 dividends per share of \$0.72 per share.

Recommendation

We believe that the shares are reasonably valued. Our rating is Market Perform.

Price (2-Mar) \$22.60
Target Price \$23.75

Company Risk Disclosure

In addition to the risks involved in investing in common stocks generally, we also highlight the following risks that pertain to this company. Operations are subject to complex regulation by a variety of provincial, state and federal (Canada, Cayman Islands & Belize) agencies. Changes in regulation may adversely affect performance.

Financial performance is dependent upon the availability of installed generation and the production of electric power by third parties. Fortis Properties' cash flow is dependent on hotel room vacancy rates and commercial building occupancy levels. The Company's operations in Belize may be disrupted and assets may be damaged by hurricanes and/or tropical storms.

Analyst's Certification

I, Karen Taylor, CFA, hereby certify that the views expressed in this report accurately reflect my personal views about the subject securities or issuers. I also certify that I have not, am not, and will not receive, directly or indirectly, compensation in exchange for expressing the specific recommendations or views in this report.

General Disclosure

The information and opinions in this report were prepared by BMO Nesbitt Burns Research, the research department of BMO Nesbitt Burns Inc., and BMO Nesbitt Burns Ltee./Ltd. ("BMO Nesbitt Burns"). Harris Nesbitt Corp. ("HNC") is an affiliate of BMO Nesbitt Burns. BMO Nesbitt Burns and HNC are subsidiaries of Bank of Montreal. The reader should assume that BMO Nesbitt Burns, HNC or their affiliates may have a conflict of interest and should not rely solely on this report in evaluating whether or not to buy or sell securities of issuers discussed herein.

The opinions, estimates and projections contained in this report are those of BMO Nesbitt Burns Research as of the date of this report and are subject to change without notice. BMO Nesbitt Burns Research endeavours to ensure that the contents have been compiled or derived from sources that we believe are reliable and contain information and opinions that are accurate and complete. However, BMO Nesbitt Burns makes no representation or warranty, express or implied, in respect thereof, takes no responsibility for any errors and omissions contained herein and accepts no liability whatsoever for any loss arising from any use of, or reliance on, this report or its contents. Information may be available to BMO Nesbitt Burns or its affiliates that is not reflected in this report. This report is not to be construed as an offer to sell or the solicitation of an offer to buy or sell any security.

The research analyst and/or associates who prepared this report are compensated based upon (among other factors) the overall profitability of BMO Nesbitt Burns, HNC and their affiliates, which includes the overall profitability of investment banking services. BMO Nesbitt Burns, HNC or their affiliates expect to receive or will seek compensation for investment banking services within the next 3 months from all issuers covered by BMO Nesbitt Burns Research.

BMO Nesbitt Burns, HNC or their affiliates will buy from or sell to customers the securities of issuers mentioned in this report on a principal basis. BMO Nesbitt Burns, HNC, their affiliates, officers, directors or employees may have a long or short position in the securities discussed herein, related securities or in options, futures or other derivative instruments based thereon. BMO Nesbitt Burns, HNC or their affiliates may act as financial advisor and/or underwriter for the issuers mentioned herein and may receive remuneration for same. Bank of Montreal or its affiliates ("BMO Financial Group") has lending arrangements with, or provide other remunerated services to, many issuers covered by BMO Nesbitt Burns Research. A significant lending relationship may exist between BMO Financial Group and certain of the issuers mentioned herein.

Company Specific Disclosure

Disclosure 9: HNC or an affiliate received compensation for products or services other than investment banking services from this issuer within the past 12 months.

Disclosure 10: This issuer is a client (or was a client) of BMO Nesbitt Burns, HNC or an affiliate within the past 12 months: Non Securities Related Services.

Distribution of Ratings

Rating Category	BMO NB Rating	BMO NB Universe	BMO NB I.B. Clients*	First Call Universe**
Buy	Outperform	41%	54%	47%
Hold	Market Perform	48%	39%	46%
Sell	Underperform	11%	7%	7%

* Reflects rating distribution of all companies where BMO NB has received compensation for Investment Banking services.

** Reflects rating distribution of all North American equity research analysts.

Ratings Key

BMO Nesbitt Burns uses the following ratings system definitions. **OP = Outperform** - Forecast to outperform the market; **Mkt = Market Perform** - Forecast to perform roughly in line with the market; **Und = Underperform** - Forecast to underperform the market; **(S) = speculative investment**; **NR** = No rating at this time; **(R) = Restricted** - Dissemination of research is currently restricted.

^ Market performance as measured by a benchmark index such as the S&P/TSX Composite Index, S&P 500, Nasdaq Composite, as appropriate for each company.

Prior to September 1, 2003, a fourth rating tier—Top Pick—was used to designate those stocks we felt would be the best performers relative to the market. Our six Top 15 lists which guide investors to our best ideas according to six different objectives (large, small, growth, value, income and quantitative) have replaced the Top Pick rating.

Dissemination of Research

BMO Nesbitt Burns Research publications are available via our web site <http://bmonesbittburns.com>. Institutional clients may also receive our research via FIRST CALL Research Direct and Reuters. All of our research is made widely available at the same time to all BMO Nesbitt Burns client groups entitled to our research. Please contact your investment advisor or institutional salesperson for more information.

Additional Matters

BCUC Increases Benchmark ROE; Market Perform Rating Unchanged

Event

On March 2, the British Columbia Utilities Commission issued its Decision relating to an application by Terasen Gas Inc. and Terasen Gas (Vancouver Island) Inc. to determine the appropriate return on equity and capital structure, and to review and revise the automatic adjustment mechanism. In the decision, the Commission increases the benchmark return on equity for 2006 to 8.80% versus 8.29% previously and alters the automatic adjustment mechanism (see our industry comment dated March 6 for additional information). FortisBC (100% - Fortis Inc.) is regulated by the Commission and is subject to the automatic adjustment mechanism and the established benchmark ROE.

Impact

Slightly positive.

Forecasts

We have revised our financial model to reflect the change in benchmark ROE. The utility operations of FortisBC earn the benchmark ROE plus a 0.40% premium, for a total allowed return in 2006 of 9.20% versus 8.69% previously. Our diluted 2006 and 2007 EPS estimates increase to \$1.18 and \$1.27, respectively, from \$1.17 and \$1.26 previously.

Valuation

Our target price reflects a weighted average valuation approach: 17x diluted 2007E EPS of \$1.27 (12.5%), 1.75x 2007E book value per share of \$13.35 (12.5%), and a target yield of 3.0% (75%), assuming 2007 dividends per share of \$0.72.

Recommendation

We believe that the shares are reasonably valued. Our rating is Market Perform.

Company Risk Disclosure

In addition to the risks involved in investing in common stocks generally, we also highlight the following risks that pertain to this company. Operations are subject to complex regulation by a variety of provincial, state and federal (Canada, Cayman Islands & Belize) agencies. Changes in regulation may adversely affect performance.

Financial performance is dependent upon the availability of installed generation and the production of electric power by third parties. Fortis Properties' cash flow is dependent on hotel room vacancy rates and commercial building occupancy levels. The Company's operations in Belize may be disrupted and assets may be damaged by hurricanes and/or tropical storms.

Analyst's Certification

I, Karen Taylor, CFA, hereby certify that the views expressed in this report accurately reflect my personal views about the subject securities or issuers. I also certify that I have not, am not, and will not receive, directly or indirectly, compensation in exchange for expressing the specific recommendations or views in this report.

General Disclosure

The information and opinions in this report were prepared by BMO Nesbitt Burns Research, the research department of BMO Nesbitt Burns Inc., and BMO Nesbitt Burns Ltee./Ltd. ("BMO Nesbitt Burns"). Harris Nesbitt Corp. ("HNC") is an affiliate of BMO Nesbitt Burns. BMO Nesbitt Burns and HNC are subsidiaries of Bank of Montreal. The reader should assume that BMO Nesbitt Burns, HNC or their affiliates may have a conflict of interest and should not rely solely on this report in evaluating whether or not to buy or sell securities of issuers discussed herein.

The opinions, estimates and projections contained in this report are those of BMO Nesbitt Burns Research as of the date of this report and are subject to change without notice. BMO Nesbitt Burns Research endeavours to ensure that the contents have been compiled or derived from sources that we believe are reliable and contain information and opinions that are accurate and complete. However, BMO Nesbitt Burns makes no representation or warranty, express or implied, in respect thereof, takes no responsibility for any errors and omissions contained herein and accepts no liability whatsoever for any loss arising from any use of, or reliance on, this report or its contents. Information may be available to BMO Nesbitt Burns or its affiliates that is not reflected in this report. This report is not to be construed as an offer to sell or the solicitation of an offer to buy or sell any security.

The research analyst and/or associates who prepared this report are compensated based upon (among other factors) the overall profitability of BMO Nesbitt Burns, HNC and their affiliates, which includes the overall profitability of investment banking services. BMO Nesbitt Burns, HNC or their affiliates expect to receive or will seek compensation for investment banking services within the next 3 months from all issuers covered by BMO Nesbitt Burns Research.

BMO Nesbitt Burns, HNC or their affiliates will buy from or sell to customers the securities of issuers mentioned in this report on a principal basis. BMO Nesbitt Burns, HNC, their affiliates, officers, directors or employees may have a long or short position in the securities discussed herein, related securities or in options, futures or other derivative instruments based thereon. BMO Nesbitt Burns, HNC or their affiliates may act as financial advisor and/or underwriter for the issuers mentioned herein and may receive remuneration for same. Bank of Montreal or its affiliates ("BMO Financial Group") has lending arrangements with, or provide other remunerated services to, many issuers covered by BMO Nesbitt Burns Research. A significant lending relationship may exist between BMO Financial Group and certain of the issuers mentioned herein.

Company Specific Disclosure

Disclosure 9: HNC or an affiliate received compensation for products or services other than investment banking services from this issuer within the past 12 months.

Disclosure 10: This issuer is a client (or was a client) of BMO Nesbitt Burns, HNC or an affiliate within the past 12 months: Non Securities Related Services.

Distribution of Ratings

Rating Category	BMO NB Rating	BMO NB Universe	BMO NB I.B. Clients*	First Call Universe**
Buy	Outperform	41%	54%	47%
Hold	Market Perform	48%	39%	46%
Sell	Underperform	11%	7%	7%

* Reflects rating distribution of all companies where BMO NB has received compensation for Investment Banking services.

** Reflects rating distribution of all North American equity research analysts.

Ratings Key

BMO Nesbitt Burns uses the following ratings system definitions. **OP = Outperform** - Forecast to outperform the market; **Mkt = Market Perform** - Forecast to perform roughly in line with the market; **Und = Underperform** - Forecast to underperform the market; **(S) = speculative investment**; **NR** = No rating at this time; **(R) = Restricted** - Dissemination of research is currently restricted.

^ Market performance as measured by a benchmark index such as the S&P/TSX Composite Index, S&P 500, Nasdaq Composite, as appropriate for each company.

Prior to September 1, 2003, a fourth rating tier—Top Pick—was used to designate those stocks we felt would be the best performers relative to the market. Our six Top 15 lists which guide investors to our best ideas according to six different objectives (large, small, growth, value, income and quantitative) have replaced the Top Pick rating.

Dissemination of Research

BMO Nesbitt Burns Research publications are available via our web site <http://bmonesbittburns.com>. Institutional clients may also receive our research via FIRST CALL Research Direct and Reuters. All of our research is made widely available at the same time to all BMO Nesbitt Burns client groups entitled to our research. Please contact your investment advisor or institutional salesperson for more information.

Company Description – Fortis is a publicly listed holding company with three key businesses: electric utility operations, non-regulated electric power generation, and non-utility property activities. Electric power operations include: Newfoundland Power (100%, Newfoundland), Maritime Electric (100%, PEI), FortisOntario (100%, Fort Erie, Ontario), Belize Electricity (68%, Belize), Caribbean Utilities (37.17%, Grand Cayman Island), FortisAlberta

(100%, Alberta) and FortisBC (100%, British Columbia).
Website: fortisinc.com

Recent Results – Fortis reported Q4/05 and fiscal 2005 EPS of \$0.22 and \$1.35, respectively. After adjusting for one-time items in Q4/05 and those in the first three quarters of the year, reported results were \$0.24 and \$1.17 (basic), respectively. Diluted 2005 EPS were \$1.10. Aggregate normalized earnings of \$119.3 million were slightly higher

than our expectation of \$1.14.6 million. On a diluted basis, fiscal 2005 EPS of \$1.10 were directly in line with our diluted EPS estimate of \$1.10.

Corporate Developments – On December 31, the Public Utilities Commission of Belize issued a decision that allows Belize Electricity to: (1) recover approximately BZ8.4 million that has accrued in the Cost of Power Rate Stabilization Account via a BZ0.6 cent per kWh increase in electricity rates; (2) increase the cost of power per kWh for calendar year 2006 by BZ0.045 to BZ0.255 per kWh; and (3) increase the mean electricity rate charged to customers to BZ0.441 from BZ0.39 per kWh.

On December 23, 2005, the Newfoundland Board of Commissioners of Public Utilities approved Newfoundland Power's Accounting Policy Application. On January 9, the utility submitted a compliance filing with the Board,

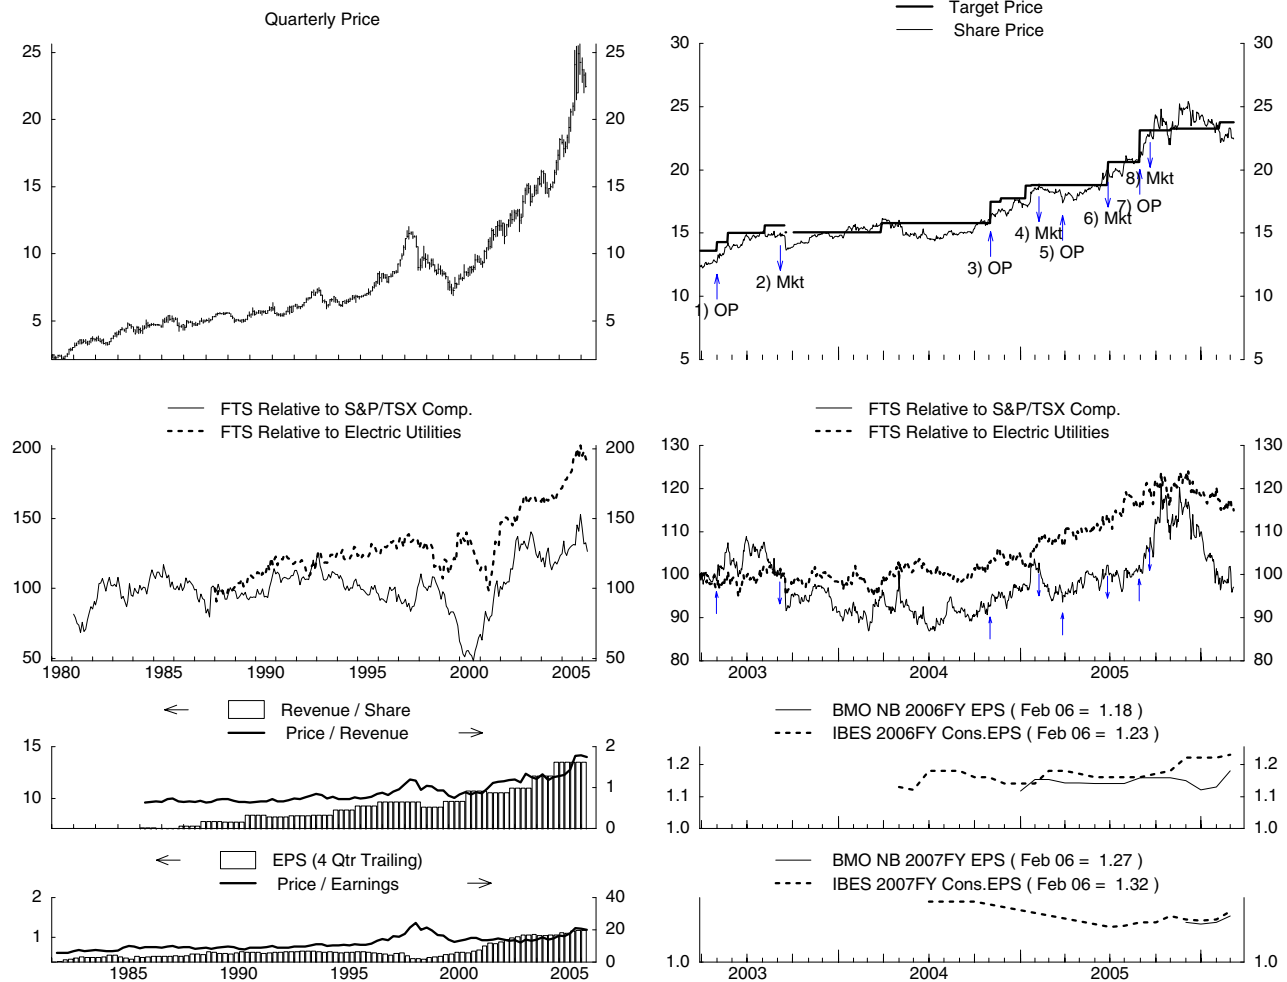

requesting final approval of the following key metrics: (1) forecast rate base for 2006 of \$743.976 million and actual capital outstanding of \$745.402 million for the purpose of determining the 2006 return on capital; and (2) approval of a range of return on rate base for 2006 of 8.50% to 8.86%, unchanged from 2004.

Forecasts – Our 2006 and 2007 diluted EPS estimates are \$1.17 and \$1.26, respectively.

Valuation – Our target price of \$23.75 reflects a weighted average valuation approach: 17x estimated 2007 diluted EPS of \$1.26 (12.5%), 1.75x estimated 2007 book value per share of \$13.35 (12.5%), and a target yield of 3.00%, assuming 2007 dividends per share of \$0.72 (75%).

Recommendation – We believe the shares are reasonably valued. Our rating is Market Perform

* Reflects rating distribution of all companies where BMO NB has received compensation for Investment Banking services.

** Reflects rating distribution of all North American equity research analysts.

Ratings Key

BMO Nesbitt Burns uses the following ratings system definitions. **OP = Outperform** - Forecast to outperform the market; **Mkt = Market Perform** - Forecast to perform roughly in line with the market; **Und = Underperform** - Forecast to underperform the market; **(S) = speculative investment**; **NR = No rating at this time**; **(R) = Restricted** - Dissemination of research is currently restricted.

^Market performance as measured by a benchmark index such as the S&P/TSX Composite Index, S&P 500, Nasdaq Composite, as appropriate for each company.

Prior to September 1, 2003, a fourth rating tier—Top Pick—was used to designate those stocks we felt would be the best performers relative to the market. Our six Top 15 lists which guide investors to our best ideas according to six different objectives (large, small, growth, value, income and quantitative) have replaced the Top Pick rating.

Dissemination of Research

BMO Nesbitt Burns Equity Research is available via our web site <http://bmonesbittburns.com>. Institutional clients may also receive our research via FIRST CALL Research Direct and Reuters. All of our research is made widely available at the same time to all BMO Nesbitt Burns client groups entitled to our research. Please contact your investment advisor or institutional salesperson for more information.

Q1/06 EPS Slightly Higher than Expected; Market Perform Rating Maintained

Event

Fortis reported Q1/06 EPS of \$0.35 versus \$0.32 from continuing operations in Q1/05 and our estimate of \$0.32. Q1/06 results were slightly higher than expected. The primary variance between expected and actual performance is largely attributable to a stronger than expected contribution from the non-regulated generation segment. We note that the Q1/06 contribution from Newfoundland Power and Caribbean Utilities (100% and 37% - Fortis Inc., respectively) was adversely affected by a change in review recognition and a lag in the recovery of fuel costs. We do not believe that these items are likely to adversely affect annual performance and are largely timing, likely to affect the seasonal pattern of earnings only.

Impact

Slightly Positive.

Forecasts

We have revised our diluted 2006 and 2007 EPS estimates to reflect slightly higher than expected average realized prices in the non-regulated power segment. Our diluted 2006 estimate is unchanged at \$1.18; however, our diluted 2007 EPS estimate increases slightly to \$1.28 from \$1.27.

Valuation

Our revised target price reflects a weighted average valuation approach: 17x diluted 2007 EPS of \$1.28 (12.5%), 1.75x 2007E BV of \$13.37 (12.5%), and a target yield of 3.25% (75%), assuming 2007 dividends of \$0.73 per share.

Recommendation

We believe that the shares are reasonably valued. Our rating is Market Perform.

Details & Analysis

Fortis reported Q1/06 EPS of \$0.35 versus \$0.32 from continuing operations in Q1/05 and our estimate of \$0.32. Q1/06 results were slightly higher than expected. The primary variance between expected and actual performance is largely attributable to a stronger than expected contribution from the non-regulated generation segment. We note that the Q1/06 contribution from Newfoundland Power and Caribbean Utilities (100% and 37% - Fortis Inc., respectively) was adversely affected by a change in review recognition and a lag in the recovery of fuel costs. We do not believe that these items are likely to adversely affect annual performance and are largely timing, likely to affect the seasonal pattern of earnings only.

We believe that the following points are relevant about Q1/06 performance:

- The contribution from FortisAlberta is approximately \$0.1 million higher than that reported by the utility in its Q1/06 release. We believe that the difference is attributable to restructuring charges that were anticipated by Fortis Inc. at the time it acquired the utility, therefore increasing current performance. We expect these charges to be approximately \$3 million in 2006 and \$0 in 2007.
- The contribution from FortisBC was approximately \$0.5 million higher than that reported by the utility in its Q1/06 release. We believe that the difference is attributable to: (1) inclusion of the 16 MW Walden facility in the Utility's financial results. The contribution from Walden was a loss of \$0.2 million in Q1/06. This facility is contained in the Generation segment in the reported results of Fortis Inc.; (2) contribution from Princeton Light & Power was \$0.2 million in Q1/06; and (3) various non-regulated services contracts, which contributed approximately \$0.1 million in Q1/06.
- Higher power production from Fortis' New York and Belize assets are set out in Tables 1 through 3.

Source: Company Reports

- On April 28, the Ontario Energy Board (OEB) issued its 2006 electricity distribution rate Decisions and Orders for Canadian Niagara Power (100% - Fortis Inc.), Eastern Ontario Power (100% - Fortis Inc.), Fort Erie (100% - Fortis Inc.) and Port Colbourne (10-year lease agreement). The OEB approved rates do not materially change our outlook for Fortis Ontario and the increased distribution and Regulated Price Plan (RPP) rates allowed by the Board are as follows:
 - CNPI – Eastern Ontario Power: Distribution Rate Change 2%; RPP Change 8.8%.
 - CNPI – Fort Erie: Distribution Rate Change 8.6%; RPP Change 9.0%.
 - CNPI – Port Colbourne: Distribution Rate Change 8.6%; RPP Change 8.9%.

Approved distribution rates reflect an allowed Return on Equity of 9.00% versus 9.88% previously.

Estimates

We have revised our diluted 2006 and 2007 EPS estimates to reflect slightly higher than expected average realized prices in the non-regulated power segment. Our diluted 2006 estimate is unchanged at \$1.18; however, our diluted 2007 EPS estimate increases slightly to \$1.28 from \$1.27.

Valuation

Our revised target price reflects a weighted average valuation approach: 17x diluted 2007 EPS of \$1.28 (12.5%), 1.75x 2007E BV of \$13.37 (12.5%), and a target yield of 3.25% (75%), assuming 2007 dividends of \$0.73 per share.

Recommendation

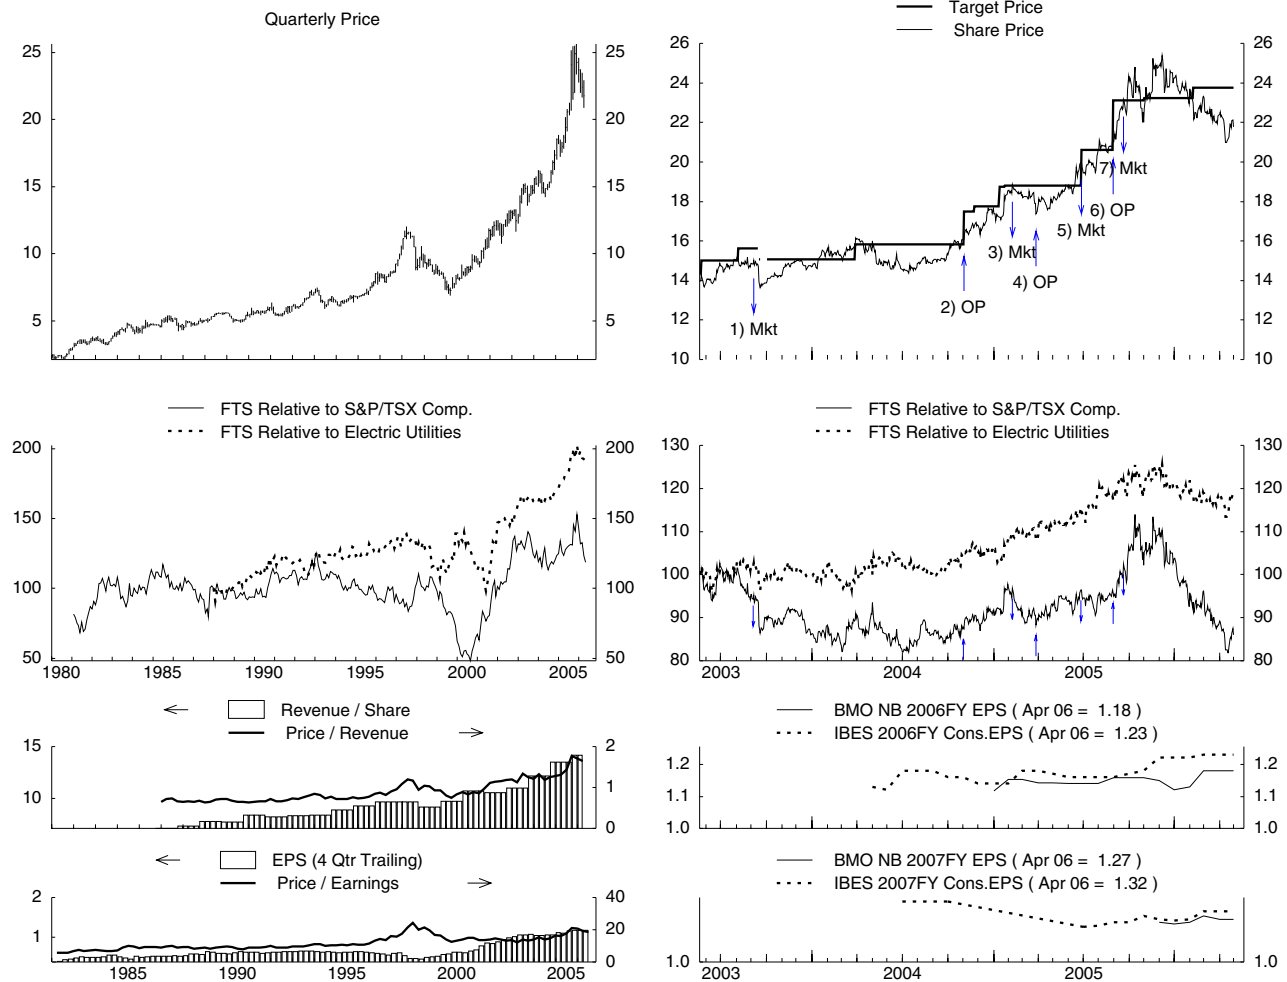

We believe that the shares of Fortis Inc. are reasonably valued at current levels. Our rating is Market Perform.

Company Risk Disclosure

In addition to the risks involved in investing in common stocks generally, we also highlight the following risks that pertain to this company. Operations are subject to complex regulation by a variety of provincial, state and federal (Canada, Cayman Islands & Belize) agencies. Changes in regulation may adversely affect performance.

Financial performance is dependent upon the availability of installed generation and the production of electric power by third parties. Fortis Properties' cash flow is dependent on hotel room vacancy rates and commercial building occupancy levels. The Company's operations in Belize may be disrupted and assets may be damaged by hurricanes and/or tropical storms.

Analyst's Certification

I, Karen Taylor, CFA, hereby certify that the views expressed in this report accurately reflect my personal views about the subject securities or issuers. I also certify that I have not, am not, and will not receive, directly or indirectly, compensation in exchange for expressing the specific recommendations or views in this report.

General Disclosure

The information and opinions in this report were prepared by BMO Nesbitt Burns Research, the research department of BMO Nesbitt Burns Inc., and BMO Nesbitt Burns Ltee./Ltd. ("BMO Nesbitt Burns"). Harris Nesbitt Corp. ("HNC") is an affiliate of BMO Nesbitt Burns. BMO Nesbitt Burns and HNC are subsidiaries of Bank of Montreal. The reader should assume that BMO Nesbitt Burns, HNC or their affiliates may have a conflict of interest and should not rely solely on this report in evaluating whether or not to buy or sell securities of issuers discussed herein.

The opinions, estimates and projections contained in this report are those of BMO Nesbitt Burns Research as of the date of this report and are subject to change without notice. BMO Nesbitt Burns Research endeavours to ensure that the contents have been compiled or derived from sources that we believe are reliable and contain information and opinions that are accurate and complete. However, BMO Nesbitt Burns makes no representation or warranty, express or implied, in respect thereof, takes no responsibility for any errors and omissions contained herein and accepts no liability whatsoever for any loss arising from any use of, or reliance on, this report or its contents. Information may be available to BMO Nesbitt Burns or its affiliates that is not reflected in this report. This report is not to be construed as an offer to sell or the solicitation of an offer to buy or sell any security.

The research analyst and/or associates who prepared this report are compensated based upon (among other factors) the overall profitability of BMO Nesbitt Burns, HNC and their affiliates, which includes the overall profitability of investment banking services. BMO Nesbitt Burns, HNC or their affiliates expect to receive or will seek compensation for investment banking services within the next 3 months from all issuers covered by BMO Nesbitt Burns Research.

BMO Nesbitt Burns, HNC or their affiliates will buy from or sell to customers the securities of issuers mentioned in this report on a principal basis. BMO Nesbitt Burns, HNC, their affiliates, officers, directors or employees may have a long or short position in the securities discussed herein, related securities or in options, futures or other derivative instruments based thereon. BMO Nesbitt Burns, HNC or their affiliates may act as financial advisor and/or underwriter for the issuers mentioned herein and may receive remuneration for same. Bank of Montreal or its affiliates ("BMO Financial Group") has lending arrangements with, or provide other remunerated services to, many issuers covered by BMO Nesbitt Burns Research. A significant lending relationship may exist between BMO Financial Group and certain of the issuers mentioned herein.

Sell	Underperform	11%	5%	7%

* Reflects rating distribution of all companies where BMO NB has received compensation for Investment Banking services.

** Reflects rating distribution of all North American equity research analysts.

Ratings Key

BMO Nesbitt Burns uses the following ratings system definitions. **OP = Outperform** - Forecast to outperform the market; **Mkt = Market Perform** - Forecast to perform roughly in line with the market; **Und = Underperform** - Forecast to underperform the market; **(S) = speculative investment**; **NR = No rating at this time**; **(R) = Restricted** - Dissemination of research is currently restricted.

^ Market performance as measured by a benchmark index such as the S&P/TSX Composite Index, S&P 500, Nasdaq Composite, as appropriate for each company.

Prior to September 1, 2003, a fourth rating tier—Top Pick—was used to designate those stocks we felt would be the best performers relative to the market. Our six Top 15 lists which guide investors to our best ideas according to six different objectives (large, small, growth, value, income and quantitative) have replaced the Top Pick rating.

Dissemination of Research

BMO Nesbitt Burns Research publications are available via our web site <http://bmonesbittburns.com>. Institutional clients may also receive our research via FIRST CALL Research Direct and Reuters. All of our research is made widely available at the same time to all BMO Nesbitt Burns client groups entitled to our research. Please contact your investment advisor or institutional salesperson for more information.

2007 Foreign Exchange Assumption Changed; Rating Increased to Outperform

Event

We have updated our financial model to reflect a new foreign exchange rate assumption for the USD for 2007 due to pervasive strength in the Canadian dollar versus the U.S. dollar. We now assume an exchange rate of C\$1.00 equals US\$0.90 versus our previous assumption that C\$1.00 equals US\$0.83. We are also increasing our rating on the shares of Fortis Inc. to Outperform from Market Perform due to recent weakness in share price.

Impact

Neutral.

Forecasts

Our diluted 2006 EPS estimate of \$1.18 is unchanged. Our diluted 2007 EPS estimate declines to \$1.27 from \$1.28.

Valuation

Our target price of \$22.50 reflects a weighted average valuation approach: 17x diluted 2007E EPS of \$1.27 (12.5%), 1.75x 2007E BV of \$13.36 (12.5%), and a target yield of 3.25% (75%), assuming 2007 dividends per share of \$0.73.

Recommendation

We believe that the shares are attractively valued at current levels. We are increasing our rating to Outperform from Market Perform.

** Reflects rating distribution of all North American equity research analysts.

Ratings Key

BMO Nesbitt Burns uses the following ratings system definitions. **OP = Outperform** - Forecast to outperform the market; **Mkt = Market Perform** - Forecast to perform roughly in line with the market; **Und = Underperform** - Forecast to underperform the market; **(S) = speculative investment**; **NR** = No rating at this time; **(R) = Restricted** - Dissemination of research is currently restricted.

^ Market performance as measured by a benchmark index such as the S&P/TSX Composite Index, S&P 500, Nasdaq Composite, as appropriate for each company.

Prior to September 1, 2003, a fourth rating tier—Top Pick—was used to designate those stocks we felt would be the best performers relative to the market. Our six Top 15 lists which guide investors to our best ideas according to six different objectives (large, small, growth, value, income and quantitative) have replaced the Top Pick rating.

Dissemination of Research

BMO Nesbitt Burns Research publications are available via our web site <http://bmonesbittburns.com>. Institutional clients may also receive our research via FIRST CALL Research Direct and Reuters. All of our research is made widely available at the same time to all BMO Nesbitt Burns client groups entitled to our research. Please contact your investment advisor or institutional salesperson for more information.

Settlement Agreements Filed in Alberta and British Columbia; Outperform Rating Maintained

Event

On May 9, FortisBC filed a Negotiated Settlement with the British Columbia Utilities Commission (BCUC) relating to its 2006 Revenue Requirements Application and Multi-Year Performance Based Regulation (PBR) for the years 2007 through 2009, inclusively. On May 17, FortisAlberta filed a Negotiated Settlement Agreement and a Negotiated Settlement Agreement on Terms and Conditions of Service for 2006 and 2007 with the Alberta Energy and Utilities Board. The key terms of these applications are set out herein.

Impact

Slightly positive.

Forecasts

We have updated our financial model to reflect these settlement agreements. Our diluted 2006 and 2007 EPS estimates decline by \$0.01 to \$1.17 and \$1.26 per share, respectively.

Valuation

Our target price of \$22.50 reflects a weighted average valuation approach: 17x diluted 2007E EPS of \$1.27 (12.5%), 1.75x 2007 BV of \$13.34 (12.5%), and a target yield of 3.25% (75%), assuming 2007 dividends per share of \$0.73.

Recommendation

We believe that the shares are attractively valued. Our rating is Outperform.

Q3/06E \$0.33 to \$0.32

Details & Analysis

On May 9, FortisBC filed a Negotiated Settlement with the British Columbia Utilities Commission (BCUC) relating to its 2006 Revenue Requirements Application and Multi-Year Performance Based Regulation for the years 2007 through 2009, inclusively. On May 17, FortisAlberta filed a Negotiated Settlement Agreement and a Negotiated Settlement Agreement on Terms and Conditions of Service (T&C Settlement Agreement) for 2006 and 2007. The key financial terms of each Settlement are set out below.

FortisAlberta:

- The 2006/2007 Negotiated Settlement Agreement (NSA) provides for settlement of all 2006/2007 Phase I matters and is supported by representatives of all segments of FortisAlberta's customer base. The T&C Settlement Agreement provides agreed Terms and Conditions of Service and is to be effective January 1, 2007. This Settlement also has the support of FortisAlberta's customer base.
- The T&C Agreement is intended to result in upgrades that include: (i) clarity with respect to the requirement of a customer to provide notice to FortisAlberta prior to decreasing or exiting service; (ii) removes all instances where FortisAlberta granted to itself "sole discretion" or "sole judgment"; (iii) provides for options other than arbitration, and to make the arbitrator responsible for determining the allocation of compensation when disputes or differences arise; and (iv) deletes the previous section that pertained to Project Cancellation and the associated cancellation costs.
- Next distribution tariff application is expected for 2008.
- Distribution revenue requirement (after refunds) of \$217.1 million and \$228.2 million in 2006 and 2007, respectively.
- Effective change from 2005 rates: -1.9% in 2006 and 0.7% in 2007.
- Depreciation and amortization of \$73.8 million and \$78.5 million in 2006 and 2007, respectively.
- Deemed equity of 37%;
- Alberta Energy and Utility Board Generic Cost of Capital formula to apply in both 2006 and 2007 (i.e., the allowed ROE will be subject to reset annually). ROE for 2006 8.93% and this rate is used as a placeholder for 2007 rates.
- Mid-year Rate Base subject to debt and equity return is \$767.4 million in 2006 and \$864.9 million in 2007.
- Total Net Capital Invested in 2006 and 2007 of \$171.9 million and \$177.2 million, respectively.

FortisBC:

- Filed 2006 Revenue Requirements and Multi-Year Performance Based Regulation Plan for 2007 to 2009 is supported by a number of parties but does not yet have the support of all constituencies. The document has been filed with the Commission and all intervenors, including those that did not participate in the settlement process.
- The 2006 Revenue Requirement Settlement would result in a 5.9% general rate increase effective January 1, 2006, equal to the existing interim increase.
- The sharing mechanism adopted for the PBR term will apply to 2006, subject to certain performance standards.
- Capital expenditures are to be tested in a separate process.
- For the term of the PBR, Gross Operating and Maintenance Expenses before Capitalized Overheads will be set annually by the formula set out, incorporating a growth escalator (customer growth) and an inflation factor (the consumer price index for British Columbia), minus an agreed Productivity Improvement Factor (2% in 2007, 2% in 2008% and 3% in 2009 if the PBR is extended) were agreed to, in recognition that FortisBC is in the early stages of its transition to a stand-alone, locally managed utility, and that progress in achieving efficiencies will accelerate throughout the term of the PBR.
- Capitalized overheads will also be determined annually by formula, at 20% of gross O&M. All other cost accounts will be forecast annually.
- With respect to the allowed ROE, all variances, positive or negative, equal to or less than 2.0% will be shared equally between customers and the company. If the variance exceeds 2.0%, the excess will be placed in a deferral account for review at the next annual review. The 2008 Annual Review will include a review of the PBR mechanism, and the extension of the PBR plan to 2009 will be contingent upon the mutual agreement of the parties.
- Revenue requirement for 2006 of \$197.404 million.
- Depreciation and amortization for 2006 of \$26.740 million.
- 2006 mid-year utility rate base of \$675.906 million. Net plant additions of \$107.816 million in 2006.
- 40% common equity component and 9.20% return on equity. We do not believe that the British Columbia Utility Commission's ROE mechanism will apply through the term of the PBR agreement (i.e., the ROE will change annually, as per the formula). We have requested clarification from Fortis.

Estimates

We have updated our financial model to reflect these settlement agreements. Our diluted 2006 and 2007 EPS estimates decline by \$0.01 to \$1.17 and \$1.26 per share, respectively. Our estimates do not reflect material incentive returns at FortisBC.

Valuation

Our target price of \$22.50 reflects a weighted average valuation approach: 17x diluted 2007E EPS of \$1.27 (12.5%), 1.75x 2007 BV of \$13.34 (12.5%), and a target yield of 3.25% (75%), assuming 2007 dividends per share of \$0.73.

Recommendation

We believe that the shares are attractively valued. Our rating is Outperform.

Company Risk Disclosure

In addition to the risks involved in investing in common stocks generally, we also highlight the following risks that pertain to this company. Operations are subject to complex regulation by a variety of provincial, state and federal (Canada, Cayman Islands & Belize) agencies. Changes in regulation may adversely affect performance.

Financial performance is dependent upon the availability of installed generation and the production of electric power by third parties. Fortis Properties' cash flow is dependent on hotel room vacancy rates and commercial building occupancy levels. The Company's operations in Belize may be disrupted and assets may be damaged by hurricanes and/or tropical storms.

Analyst's Certification

I, Karen Taylor, CFA, hereby certify that the views expressed in this report accurately reflect my personal views about the subject securities or issuers. I also certify that I have not, am not, and will not receive, directly or indirectly, compensation in exchange for expressing the specific recommendations or views in this report.

General Disclosure

The information and opinions in this report were prepared by BMO Nesbitt Burns Research, the research department of BMO Nesbitt Burns Inc., and BMO Nesbitt Burns Ltee./Ltd. ("BMO Nesbitt Burns"). Harris Nesbitt Corp. ("HNC") is an affiliate of BMO Nesbitt Burns. BMO Nesbitt Burns and HNC are subsidiaries of Bank of Montreal. The reader should assume that BMO Nesbitt Burns, HNC or their affiliates may have a conflict of interest and should not rely solely on this report in evaluating whether or not to buy or sell securities of issuers discussed herein.

The opinions, estimates and projections contained in this report are those of BMO Nesbitt Burns Research as of the date of this report and are subject to change without notice. BMO Nesbitt Burns Research endeavours to ensure that the contents have been compiled or derived from sources that we believe are reliable and contain information and opinions that are accurate and complete. However, BMO Nesbitt Burns makes no representation or warranty, express or implied, in respect thereof, takes no responsibility for any errors and omissions contained herein and accepts no liability whatsoever for any loss arising from any use of, or reliance on, this report or its contents. Information may be available to BMO Nesbitt Burns or its affiliates that is not reflected in this report. This report is not to be construed as an offer to sell or the solicitation of an offer to buy or sell any security.

The research analyst and/or associates who prepared this report are compensated based upon (among other factors) the overall profitability of BMO Nesbitt Burns, HNC and their affiliates, which includes the overall profitability of investment banking services. BMO Nesbitt Burns, HNC or their affiliates expect to receive or will seek compensation for investment banking services within the next 3 months from all issuers covered by BMO Nesbitt Burns Research.

BMO Nesbitt Burns, HNC or their affiliates will buy from or sell to customers the securities of issuers mentioned in this report on a principal basis. BMO Nesbitt Burns, HNC, their affiliates, officers, directors or employees may have a long or short position in the securities discussed herein, related securities or in options, futures or other derivative instruments based thereon. BMO Nesbitt Burns, HNC or their affiliates may act as financial advisor and/or underwriter for the issuers mentioned herein and may receive remuneration for same. Bank of Montreal or its affiliates ("BMO Financial Group") has lending arrangements with, or provide other remunerated services to, many issuers covered by BMO Nesbitt Burns Research. A significant lending relationship may exist between BMO Financial Group and certain of the issuers mentioned herein.

Distribution of Ratings

Rating Category	BMO NB Rating	BMO NB Universe	BMO NB I.B. Clients*	First Call Universe**

** Reflects rating distribution of all North American equity research analysts.

Ratings Key

BMO Nesbitt Burns uses the following ratings system definitions. **OP = Outperform** - Forecast to outperform the market; **Mkt = Market Perform** - Forecast to perform roughly in line with the market; **Und = Underperform** - Forecast to underperform the market; **(S) = speculative investment**; **NR** = No rating at this time; **(R) = Restricted** - Dissemination of research is currently restricted.

^ Market performance as measured by a benchmark index such as the S&P/TSX Composite Index, S&P 500, Nasdaq Composite, as appropriate for each company.

Prior to September 1, 2003, a fourth rating tier—Top Pick—was used to designate those stocks we felt would be the best performers relative to the market. Our six Top 15 lists which guide investors to our best ideas according to six different objectives (large, small, growth, value, income and quantitative) have replaced the Top Pick rating.

Dissemination of Research

BCUC Approves 2006 Settlement Agreement and Multi-Year PBR

Impact

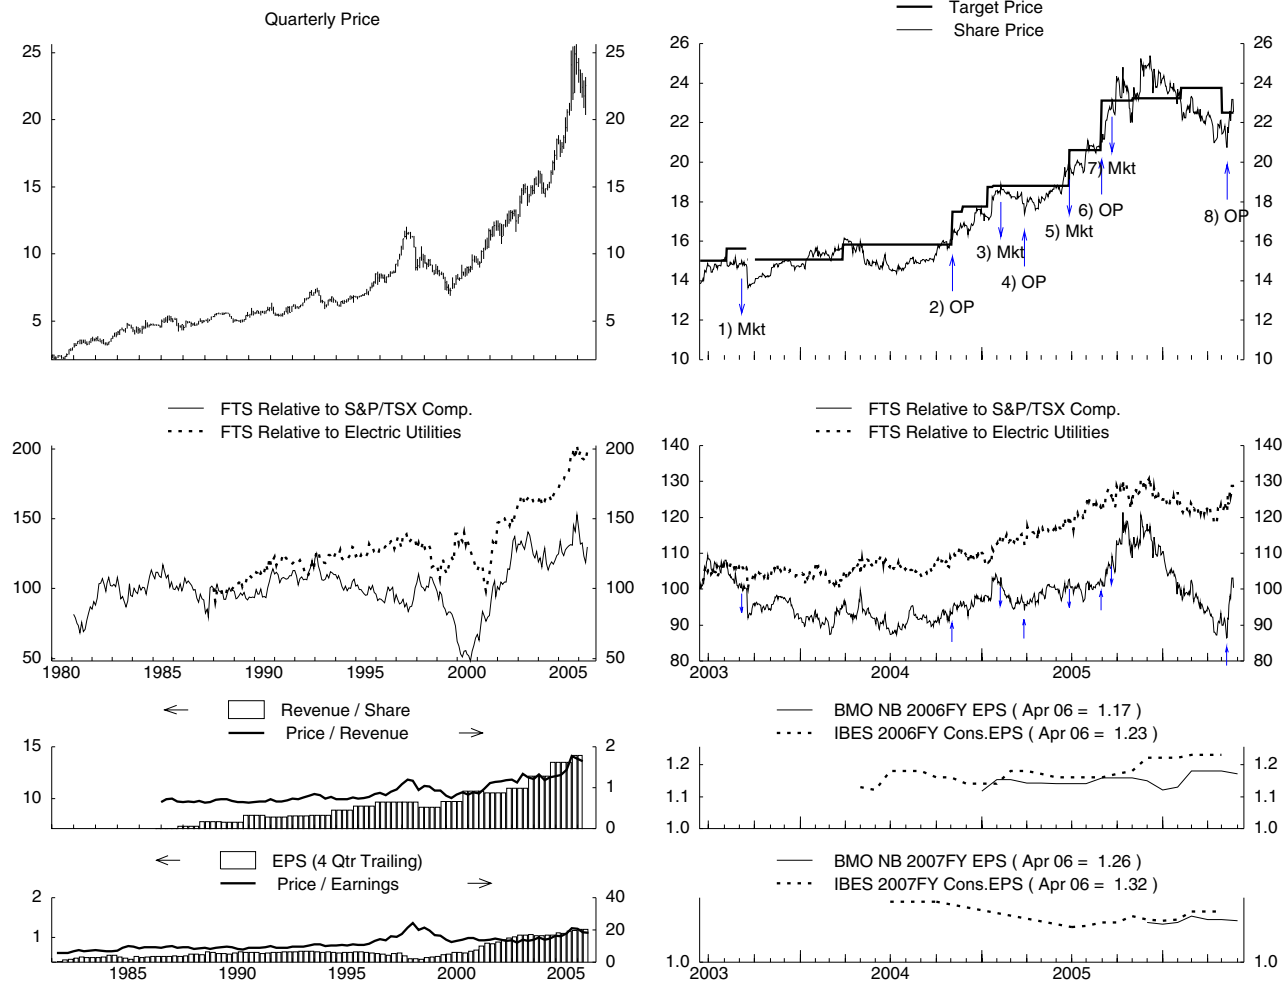

Neutral

Details & Analysis

On May 23, the British Columbia Utilities Commission (BCUC) approved the Settlement Agreement relating to FortisBC's (100% - Fortis Inc.) 2006 Revenue Requirements Application and Multi-Year Performance Based Regulation (PBR) for the years 2007 through 2009, filed by the utility on May 9, 2006. See our May 19 comment on Fortis Inc. for additional information about the Settlement Agreement and the Multi-Year PBR. Approval by the BCUC is in line with expectations and the financial terms of the Settlement Agreement are fully reflected in our financial model. No change in view. We rate the shares of Fortis Inc. Outperform.

Please refer to pages 2 to 4 for Disclosure Statements, including the Analyst's Certification.

Company Risk Disclosure

In addition to the risks involved in investing in common stocks generally, we also highlight the following risks that pertain to this company. Operations are subject to complex regulation by a variety of provincial, state and federal (Canada, Cayman Islands & Belize) agencies. Changes in regulation may adversely affect performance.

Financial performance is dependent upon the availability of installed generation and the production of electric power by third parties. Fortis Properties' cash flow is dependent on hotel room vacancy rates and commercial building occupancy levels. The Company's operations in Belize may be disrupted and assets may be damaged by hurricanes and/or tropical storms.

Analyst's Certification

I, Karen Taylor, CFA, hereby certify that the views expressed in this report accurately reflect my personal views about the subject securities or issuers. I also certify that no part of my compensation was, is, or will be, directly or indirectly, related to the specific recommendations or views expressed in this report.

General Disclosure

The information and opinions in this report were prepared by BMO Nesbitt Burns Inc., and BMO Nesbitt Burns Ltee/Ltd. ("BMO Nesbitt Burns"). Harris Nesbitt Corp. ("HNC") is an affiliate of BMO Nesbitt Burns. BMO Nesbitt Burns and HNC are subsidiaries of Bank of Montreal. The reader should assume that BMO Nesbitt Burns, HNC or their affiliates may have a conflict of interest and should not rely solely on this report in evaluating whether or not to buy or sell securities of issuers discussed herein.

The opinions, estimates and projections contained in this report are those of BMO Nesbitt Burns as of the date of this report and are subject to change without notice. BMO Nesbitt Burns endeavours to ensure that the contents have been compiled or derived from sources that we believe are reliable and contain information and opinions that are accurate and complete. However, BMO Nesbitt Burns makes no representation or warranty, express or implied, in respect thereof, takes no responsibility for any errors and omissions contained herein and accepts no liability whatsoever for any loss arising from any use of, or reliance on, this report or its contents. Information may be available to BMO Nesbitt Burns or its affiliates that is not reflected in this report. This report is not to be construed as an offer to sell or the solicitation of an offer to buy or sell any security.

The research analyst and/or associates who prepared this report are compensated based upon (among other factors) the overall profitability of BMO Nesbitt Burns, HNC and their affiliates, which includes the overall profitability of investment banking services. BMO Nesbitt Burns, HNC or their affiliates expect to receive or will seek compensation for investment banking services within the next 3 months from all issuers covered by BMO Nesbitt Burns' Equity Research. BMO Nesbitt Burns HNC or their affiliates will buy from or sell to customers the securities of issuers mentioned in this report on a principal basis.

BMO Nesbitt Burns, HNC, their affiliates, officers, directors or employees may have a long or short position in the securities discussed herein, related securities or in options, futures or other derivative instruments based thereon. BMO Nesbitt Burns, HNC or their affiliates may act as financial advisor and/or underwriter for the issuers mentioned herein and may receive remuneration for same. Bank of Montreal or its affiliates ("BMO Financial Group") has lending arrangements with, or provides other remunerated services to, many issuers covered by BMO Nesbitt Burns' Equity Research. A significant lending relationship may exist between BMO Financial Group and certain of the issuers mentioned herein.

Distribution of Ratings

Rating Category	BMO NB Rating	BMO NB Universe	BMO NB I.B. Clients*	First Call Universe**
Buy	Outperform	35%	39%	46%
Hold	Market Perform	54%	56%	47%
Sell	Underperform	11%	5%	7%

* Reflects rating distribution of all companies where BMO NB has received compensation for Investment Banking services.

** Reflects rating distribution of all North American equity research analysts.

Ratings Key

BMO Nesbitt Burns uses the following ratings system definitions. **OP** = **Outperform** - Forecast to outperform the market; **Mkt** = **Market Perform** - Forecast to perform roughly in line with the market; **Und** = **Underperform** - Forecast to underperform the market; **(S)** = **speculative investment**; **NR** = No rating at this time; **(R)** = **Restricted** - Dissemination of research is currently restricted.

Market performance as measured by a benchmark index such as the S&P/TSX Composite Index, S&P 500, Nasdaq Composite, as appropriate for each company.

Prior to September 1, 2003, a fourth rating tier—Top Pick—was used to designate those stocks we felt would be the best performers relative to the market. Our six Top 15 lists which guide investors to our best ideas according to six different objectives (large, small, growth, value, income and quantitative) have replaced the Top Pick rating.

Dissemination of Research

BMO Nesbitt Burns Equity Research is available via our web site <http://bmonesbittburns.com>. Institutional clients may also receive our research via FIRST CALL Research Direct and Reuters. All of our research is made widely available at the same time to all BMO Nesbitt Burns client groups entitled to our research. Notes: EPS estimates are diluted; Quarterly numbers are basic

Company Description – Fortis is a publicly listed holding company with three key businesses: electric utility operations, non-regulated electric power generation, and non-utility property activities. Electric power operations include: Newfoundland Power (100%, Newfoundland), Maritime Electric (100%, PEI), FortisOntario (100%, Fort Erie, Ontario), Belize Electricity (68%, Belize), Caribbean Utilities (37.17%, Grand Cayman Island), FortisAlberta

(100%, Alberta) and FortisBC (100%, British Columbia).
Website: fortisinc.com

Recent Results – Fortis reported Q1/06 EPS of \$0.35 versus \$0.32 from continuing operations in Q1/05 and our estimate of \$0.32. Q1/06 results were slightly higher than expected and the primary variance between actual and expected performance is largely attributable to a stronger than expected contribution from the non-regulated power generation segment. We note that the Q1/06 contribution

from Newfoundland Power and Caribbean Utilities was adversely affected by a change in revenue recognition and a lag in the recovery of fuel costs. We believe that these issues are largely timing and are not expected to adversely affect fiscal performance.

Corporate Developments – On May 9, FortisBC filed a Negotiated Settlement with the British Columbia Utilities Commission (BCUC) relating to its 2006 Revenue Requirements Application and Multi-Year Performance Based Regulation (PBR) for the years 2007 through 2009. The Settlement Agreement was approved by the BCUC on May 23, which was in line with our expectation. The Settlement stipulates a 40% common equity component and a 9.20% return on equity. The ROE formula will apply throughout the term of the PRB plan; however, there will be an equal sharing of ROE variances, positive and negative, equal to or less than 2.0%. On May 17, FortisAlberta filed a

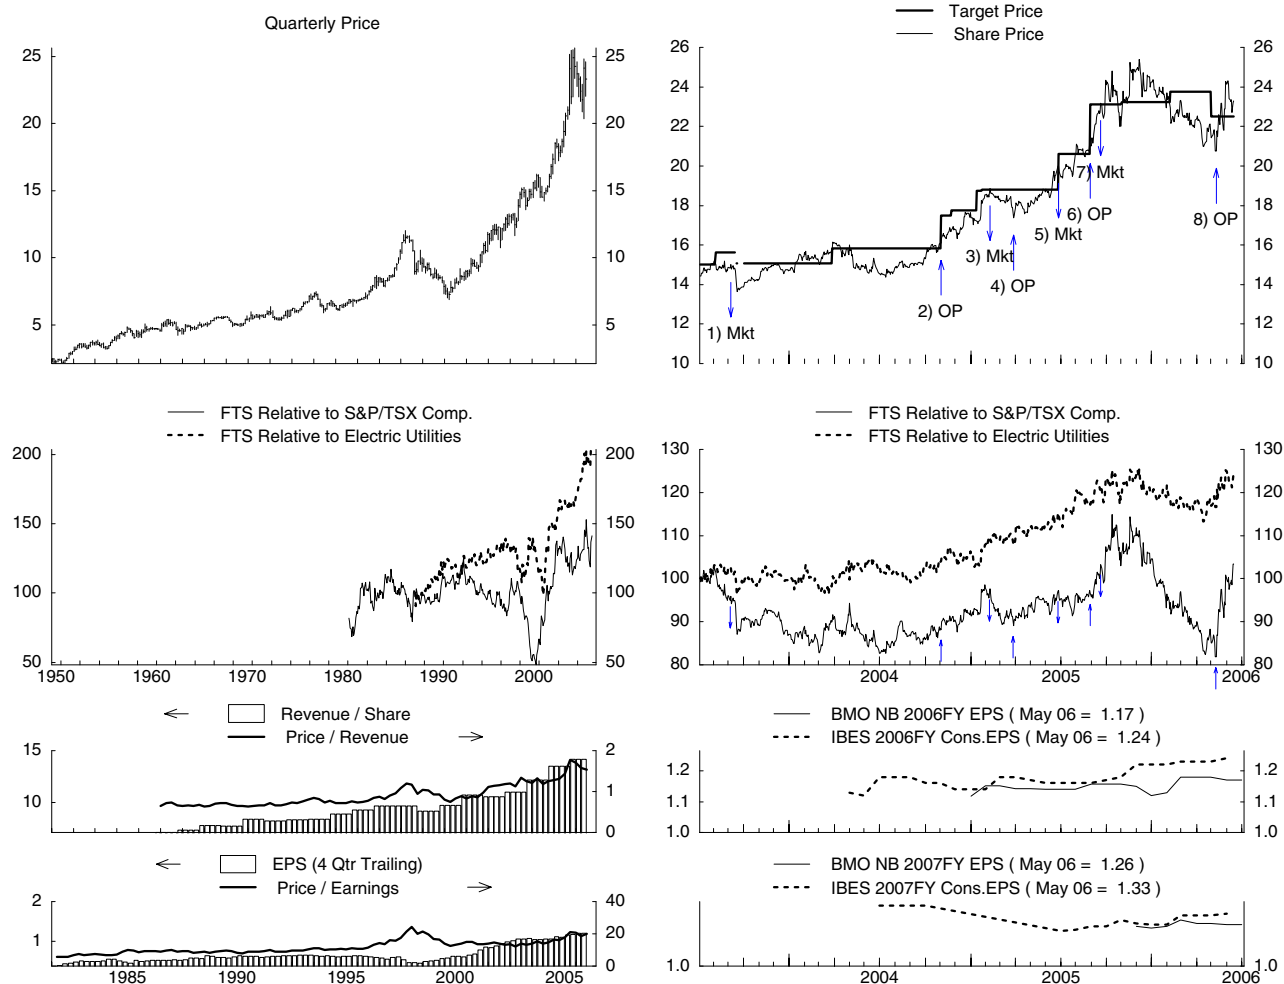

Negotiated Settlement Agreement and a Negotiated Settlement Agreement on Terms and Conditions of Service for 2006 and 2007 with the Alberta Energy and Utilities Board. The return on equity formula relevant in Alberta also applies in 2006 and 2007.

Forecasts – Our diluted 2006 and 2007 EPS estimates of \$1.17 and \$1.26, respectively, reflect these settlement agreements.

Valuation – Our target price of \$22.50 reflects a weighted average valuation approach: 17x diluted 2007E EPS of \$1.26 (12.5%), 1.75x 2007E BV of \$13.34 (12.5%), and a target yield of 3.25% (75%), assuming 2007E dividends per share of \$0.73. In light of recent price strength, we are reconsidering our target price.

Recommendation – We believe the shares are attractively valued. Our rating is Outperform

AEUB Approves 2006/07 Revenue Requirement

Impact

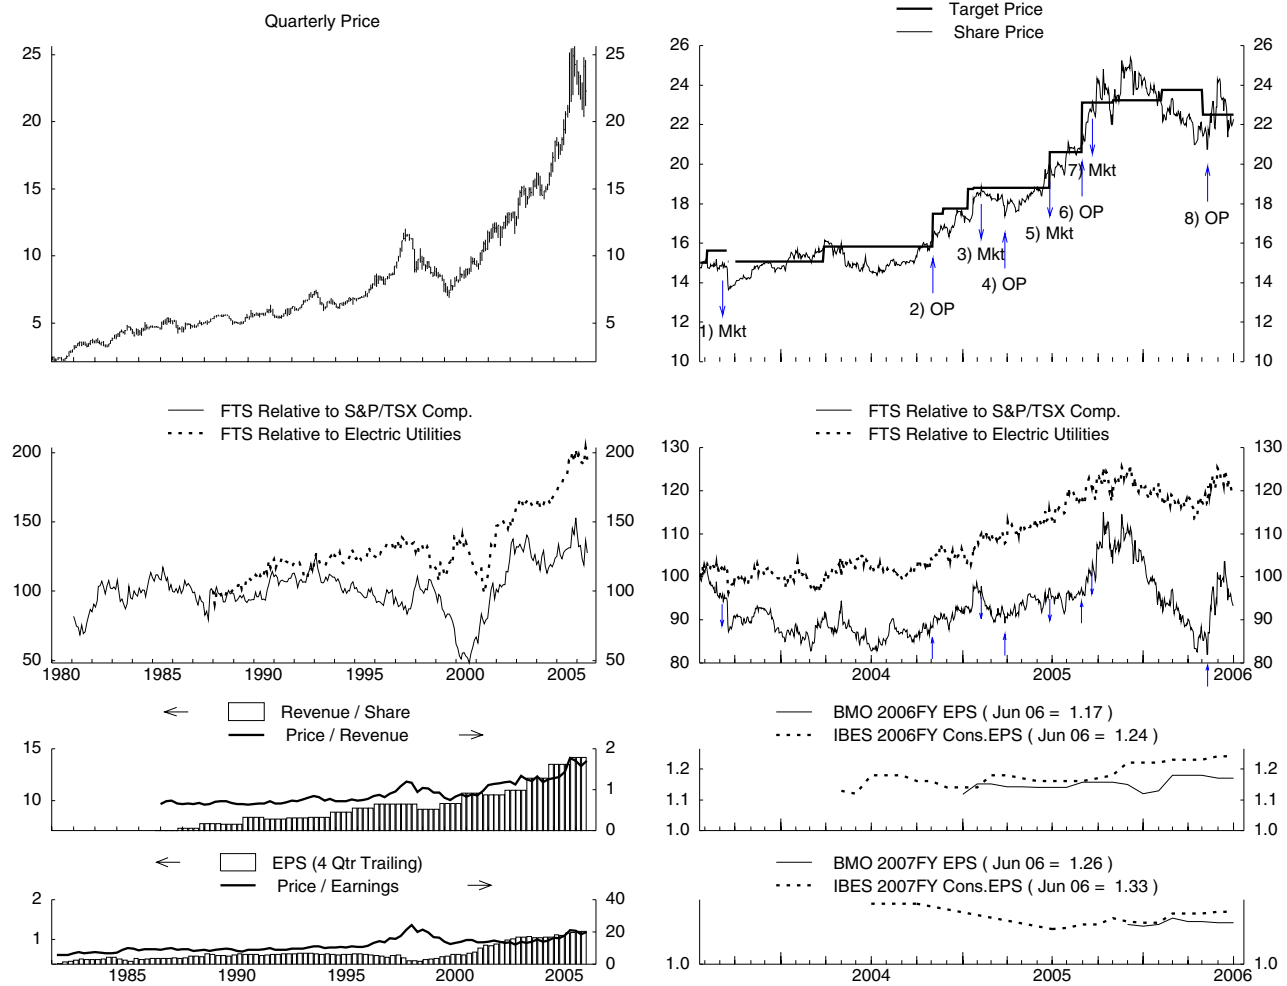

Neutral

Details & Analysis

On June 29, the Alberta Energy and Utilities Board (AEUB) approved the negotiated settlement agreement filed by FortisAlberta Inc. on May 17, 2006 relating to its 2006/07 Distribution Tariff Application. The negotiated settlement is fully reflected in our financial model and approval by the AEUB is in line with expectations. We are reviewing our target price and rating on the shares of Fortis Inc.

This report was prepared by an Analyst employed by a Canadian affiliate, BMO Nesbitt Burns Inc., and who is not registered/qualified as a research analyst under NYSE/NASD rules. For disclosure statements, including the Analyst's Certification, please refer to pages 2 to 4.

IRAC Approves 3.35% Rate Increase; Rating Lowered to Market Perform

Event

On June 27, the Island Regulatory and Appeals Commission (IRAC) approved Maritime Electric's (100% - Fortis Inc.) January 31, 2006 application for an increase in basic utility rates of 3.35%, effective July 1, 2006 (see our comment dated March 3, 2006). The decision contains the following key highlights: (1) allowed maximum return on equity of 10.25% versus the previously allowed range of 10% to 10.50%; (2) deemed equity for rate purposes of 45%; (3) deferred cost recovery of \$1.5 million in 2006 and \$1.3 million in 2007, as per the company's application; and (4) continuation of the current Energy Cost Adjustment Mechanism, pending the receipt and review of depreciation and cost allocation studies, new energy supply agreements and Point Lepreau refurbishment costs.

Impact

Neutral.

Forecasts

No change.

Valuation

Our target price of \$22.50 reflects a weighted average valuation approach: 17x diluted 2007E EPS of \$1.26 (12.5%), 1.75x 2007E book value of \$13.33 (12.5%), and a target yield of 3.25% (75%), assuming 2007 dividends of \$0.73.

Recommendation

We are lowering our rating on the shares of Fortis Inc. to Market Perform from Outperform. We believe that the shares are reasonably valued at current levels.

Company Risk Disclosure

In addition to the risks involved in investing in common stocks generally, we also highlight the following risks that pertain to this company. Operations are subject to complex regulation by a variety of provincial, state and federal (Canada, Cayman Islands & Belize) agencies. Changes in regulation may adversely affect performance.

Financial performance is dependent upon the availability of installed generation and the production of electric power by third parties. Fortis Properties' cash flow is dependent on hotel room vacancy rates and commercial building occupancy levels. The Company's operations in Belize may be disrupted and assets may be damaged by hurricanes and/or tropical storms.

Analyst's Certification

I, Karen Taylor, CFA, hereby certify that the views expressed in this report accurately reflect my personal views about the subject securities or issuers. I also certify that no part of my compensation was, is, or will be, directly or indirectly, related to the specific recommendations or views expressed in this report.

General Disclosure

The information and opinions in this report were prepared by BMO Nesbitt Burns Inc. and BMO Nesbitt Burns Ltée./Ltd., collectively ("BMO NB"). BMO NB is not subject to U.S. rules with regard to the preparation of research reports and the independence of analysts. "BMO Capital Markets" is a trade name used by the BMO Investment Banking Group, which includes the wholesale/institutional arms of Bank of Montreal and BMO NB in Canada, and BMO Capital Markets Corp. in the U.S. BMO Capital Markets Corp. is an affiliate of BMO NB. BMO NB and BMO Capital Markets Corp. are subsidiaries of Bank of Montreal. Bank of Montreal or its affiliates ("BMO Financial Group") has lending arrangements with, or provide other remunerated services to, many issuers covered by BMO NB research. A significant lending relationship may exist between BMO Financial Group and certain of the issuers mentioned herein. The reader should assume that BMO NB, BMO Capital Markets Corp., Bank of Montreal or their affiliates may have a conflict of interest and should not rely solely on this report in evaluating whether or not to buy or sell securities of issuers discussed herein. The opinions, estimates and projections contained in this report are those of BMO NB as of the date of this report and are subject to change without notice. BMO NB endeavours to ensure that the contents have been compiled or derived from sources that we believe are reliable and contain information and opinions that are accurate and complete. However, BMO NB makes no representation or warranty, express or implied, in respect thereof, takes no responsibility for any errors and omissions contained herein and accepts no liability whatsoever for any loss arising from any use of, or reliance on, this report or its contents. Information may be available to BMO NB or its affiliates that is not reflected in this report. The information in this report is not intended to be used as the primary basis of investment decisions, and because of individual client objectives, should not be construed as advice designed to meet the particular investment needs of any investor. This material is for information purposes only and is not an offer to sell or the solicitation of an offer to buy any security. The research analyst and/or associates who prepared this report are compensated based upon (among other factors) the overall profitability of BMO NB and its affiliates, which includes the overall profitability of investment banking services. BMO NB, or its affiliates expect to receive or will seek compensation for investment banking services within the next 3 months from all issuers covered by BMO NB. BMO NB or its affiliates will buy from or sell to customers the securities of issuers mentioned in this report on a principal basis. BMO NB or its affiliates, officers, directors or employees may have a long or short position in the securities discussed herein, related securities or in options, futures or other derivative instruments based thereon.

Rating Category	BMO Rating	BMO Universe	BMO I.B. Clients*	First Call Universe**
Buy	Outperform	40%	49%	48%
Hold	Market Perform	50%	47%	45%
Sell	Underperform	10%	4%	7%

* Reflects rating distribution of all companies where BMO Capital Markets has received compensation for Investment Banking services.

** Reflects rating distribution of all North American equity research analysts.

Ratings Key

We use the following ratings system definitions:

OP = Outperform - Forecast to outperform the market;

Mkt = Market Perform - Forecast to perform roughly in line with the market;

Und = Underperform - Forecast to underperform the market;

(S) = speculative investment;

NR = No rating at this time;

R = Restricted – Dissemination of research is currently restricted.

Market performance is measured by a benchmark index such as the S&P/TSX Composite Index, S&P 500, Nasdaq Composite, as appropriate for each company. Prior to September 1, 2003, a fourth rating tier—Top Pick—was used to designate those stocks we felt would be the best performers relative to the market. Our six Top 15 lists which guide investors to our best ideas according to six different objectives (large, small, growth, value, income and quantitative) have replaced the Top Pick rating.

Dissemination of Research

Our research publications are available via our web site <http://bmocapitalmarkets.com>. Institutional clients may also receive our research via FIRST CALL Research Direct and Reuters. All of our research is made widely available at the same time to all BMO NB, BMO Capital Markets Corp. and BMO Nesbitt Burns Securities Ltd. client groups entitled to our research. Please contact your investment advisor or institutional salesperson for more information.

Q2/06 EPS Higher Than Expected

Impact

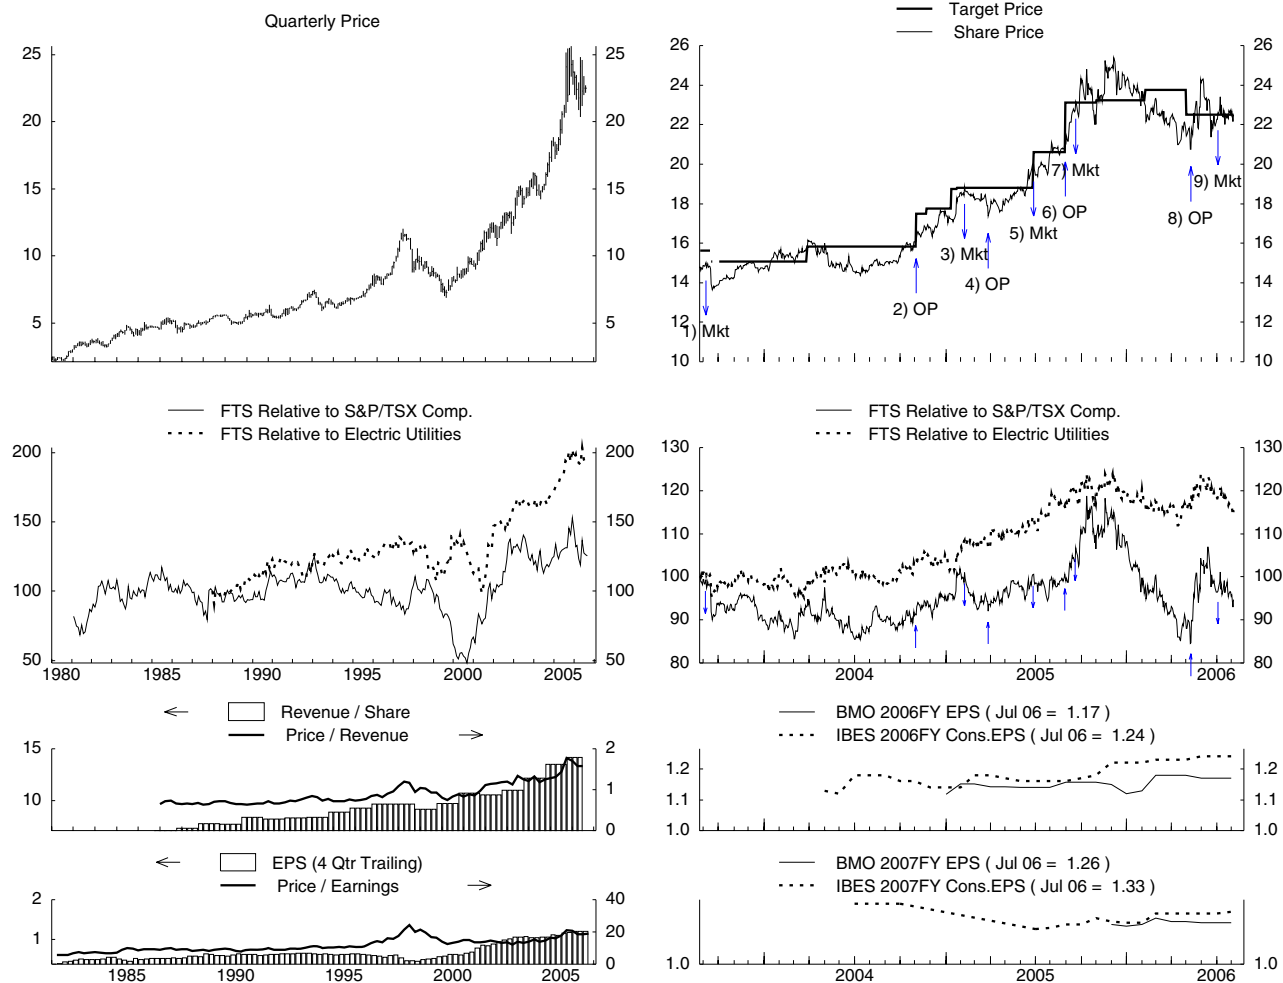

Positive

Details & Analysis

Fortis Inc. reported Q2/06 EPS of \$0.37. After adjusting for the following one-time items: (i) after tax insurance gain of \$0.7 million; (ii) gain on the sale of a hotel asset of \$1.6 million after tax; (iii) benefit from the reduction of future income tax rates of \$1.5 million; and (iv) unrealized foreign exchange gains of \$1.6 million after tax, Q2/06 EPS were \$0.31, higher than our expectation of \$0.27 per share. The variance between actual and expected performance is largely due to: (1) better than expected performance at FortisAlberta due to higher than expected ratebase growth; and (2) return to normal hydrological conditions in Belize, substantially increasing the contribution from the non-regulated generation business segment. We are continuing to review the release. Our estimates, target price and rating are under review. We currently rate the shares Market Perform.

This report was prepared by an Analyst employed by a Canadian affiliate, BMO Nesbitt Burns Inc., and who is not registered/qualified as a research analyst under NYSE/NASD rules. For disclosure statements, including the Analyst's Certification, please refer to pages 2 to 4.

Company Risk Disclosure

In addition to the risks involved in investing in common stocks generally, we also highlight the following risks that pertain to this company. Operations are subject to complex regulation by a variety of provincial, state and federal (Canada, Cayman Islands & Belize) agencies. Changes in regulation may adversely affect performance.

Financial performance is dependent upon the availability of installed generation and the production of electric power by third parties. Fortis Properties' cash flow is dependent on hotel room vacancy rates and commercial building occupancy levels. The Company's operations in Belize may be disrupted and assets may be damaged by hurricanes and/or tropical storms.

Ratings Key

We use the following ratings system definitions:

OP = Outperform - Forecast to outperform the market;

Mkt = Market Perform - Forecast to perform roughly in line with the market;

Und = Underperform - Forecast to underperform the market;

(S) = speculative investment;
NR = No rating at this time;
R = Restricted – Dissemination of research is currently restricted.

Market performance is measured by a benchmark index such as the S&P/TSX Composite Index, S&P 500, Nasdaq Composite, as appropriate for each company. Prior to September 1, 2003, a fourth rating tier—Top Pick—was used to designate those stocks we felt would be the best performers relative to the market. Our six Top 15 lists which guide investors to our best ideas according to six different objectives (large, small, growth, value, income and quantitative) have replaced the Top Pick rating.

Dissemination of Research

Our research publications are available via our web site <http://bmocapitalmarkets.com>. Institutional clients may also receive our research via FIRST CALL Research Direct and Reuters. All of our research is made widely available at the same time to all BMO NB, BMO Capital Markets Corp. and BMO Nesbitt Burns Securities Ltd. client groups entitled to our research. Please contact your investment advisor or institutional salesperson for more information.

Additional Matters

Fortis Inc.

Lower Cash Flows Marginally Weaken Credit Metrics

Event

Fortis Inc. reported Q2/06 earnings.

Impact

Slightly negative.

Key Points

Although Q2/06 results were higher than expected on an EPS basis, lower earnings and cash flows relative to Q2/05 resulted in marginally weaker credit metrics, with funds from operations (FFO) interest and FFO-to-total debt lower than expected. Lower FFO, high capital expenditure, and higher dividend payments not surprisingly led to negative free cash flow for the quarter and first half of 2006. However, leverage, as measured by total debt-to-total capital remained steady in Q2/06 at 59%. The reliability and flexibility of Fortis' credit facilities at the holding company level were enhanced with two facilities extended in Q2/06, and the size of its major facility increased in July 2006. An unquantifiable credit risk for Fortis' is its appetite for acquisitions.

Recommendation

Year-to-date 2006, Fortis' 5-year generic credit spreads have remained steady, while the 10-year spreads are back to where they were at the start of the year after narrowing during the second quarter. Like its 10-year spreads, Fortis' 30-year spreads tightened in the second quarter before finishing wider by 5 basis points compared to year-end 2005. In the absence of a material debt funded or higher risk asset acquisition, the ratings on Fortis are expected to be consolidated at their current levels as the company's financial profile is expected to show modest improvement from its recent weakened position and Fortis works its way through its major capital expenditure program. We are working toward initiating coverage of Fortis.

Laurence.conheady@bmo.com

Details & Analysis

Although Fortis' Q2/06 results were higher than expected on an EPS basis, lower earnings and cash flows relative to Q2/05 resulted in marginally weaker credit metrics, with funds from operations (FFO) interest and FFO-to-total debt lower than expected. The company reported Q2/06 EPS of \$0.37, and after adjusting for one-time items, the comparable results were \$0.31 versus the BMO equity research estimate of \$0.27.

Fortis' lower earnings translated to lower cash flows with consolidated FFO for Q2/06 of \$70.8 million, \$22.05 million lower than that recorded in Q2/05. The lower cash flow for the quarter also dragged down FFO for the first half of 2006 to \$150.4 million versus \$172 million in the first half of 2005. The lower FFO and high capital expenditure levels and higher dividend payments not surprisingly led to negative free cash (FFO less capital expenditure net of customer contributions, acquisitions and dividends) for Q2/06 and for the first half of 2006. For Q2/06 free cash flow was negative \$48.9 million and for the first two quarters of 2006 it was negative \$87.1 million. The funding shortfall was met largely through increased short and long-term borrowings. The company's large capital expenditure program will dominate cash flows outlays and financing activities for the next few years at least, with negative free cash flow expected to be the norm.

FFO interest coverage for the first half of 2006 was lower than expected at 3.1x, compared to 3.4x for the first half of 2005. On a rolling 12-month basis, FFO-to-total debt was low at 12.5%. Given the company's need to take on increased debt commitments to fund its large capital expenditure program (without immediate receipt of cash flows) and the presence of holding company debt, Fortis' consolidated FFO-to-total debt ratio is expected to be on the low side compared to other regulated network businesses in Canada. Nevertheless, the company's FFO-to-total debt for the year to June 30, 2006 was lower than expected and the company will need to ensure that this ratio in particular shows improvement in the coming quarters to avoid pressure on its ratings. Despite the lower cash flows, a positive development for future stability and predictability of cash flows in the second quarter of 2006 was the receipt of regulatory approvals of rate applications at FortisAlberta, FortisBC, Maritime Electric, Canadian Niagara Power, and Belize Electricity.

An unquantifiable credit risk is Fortis' appetite for acquisitions. In the company's Q2/06 outlook statement it says it expects to focus its capital on funding further acquisitions of utility assets and to this end will pursue acquisition opportunities in Canada, the Caribbean and the United States. Although this strategy is of no surprise, with the bedding down of its last major acquisitions now two years down the track and the recent increase in its major credit facility at the holding company level to be used for general corporate purposes, including acquisitions, it appears a further acquisition should not be unexpected over the medium term.

Capital Structure and Liquidity

Fortis' leverage as measured by total debt-to-total capital and treating the preference shares as equity at June 30, 2006 was consistent with year-end 2005. Despite higher debt outstanding, growth in assets during the first half of the year meant leverage of 58.8% was on a par with year-end 2005 leverage of 58.5%. As of June 30, 2006 Fortis had \$2.32 billion of consolidated debt, just over \$100 million higher than six months previously. The vast majority of the consolidated debt, about 85%, resides at the company's various subsidiaries, with the debt at the holding company level comprising \$100 million of senior unsecured debentures maturing 2010, US\$150

million senior unsecured notes maturing 2014, and US\$20 million in unsecured subordinated debt. At quarter-end Q2/06 Fortis also had additional bank debt of \$46.1 million at the holding company level. Fortis and its subsidiaries have manageable annual debt repayments of under \$100 million in the period 2006 – 2009.

During the second quarter of 2006, Fortis' access to liquidity improved. Available consolidated credit facilities at June 30, 2006 were \$573.8 million, up from \$542.7 million at quarter end March 31, 2006, and \$538.8 million at year end 2005. The improved access to liquidity in part reflects a \$50 million increase in credit facilities during the first half of 2006. Fortis also improved the reliability of its credit facilities at the holding company level by extending the maturity date of its \$145 million and \$50 million unsecured term credit facilities to May 2010 and January 2011 from May 2008 and January 2009, respectively. Furthermore, subsequent to the end of the second quarter the company increased the size of its \$145 million credit facility to \$250 million. As of June 30, 2006 Fortis had consolidated cash on hand of \$27.4 million, up from \$21.5 million at the end of the first quarter 2006.

Credit Ratings

Fortis has a BBB(High) unsecured debenture rating by DBRS, and a senior unsecured rating of BBB from Standard & Poor's. The outlook on the company by both agencies is Stable. Of interest is that apart from the different ratings assigned, a key differentiating feature of the ratings is the approach taken by DBRS and Standard & Poor's to the assessment of Fortis' financial risk profile. DBRS's focus is more on the non-consolidated financial profile, while Standard & Poor's focus is more on the consolidated financial profile. Both rating agencies recognize the structurally subordinated position of the holding company debt vis-à-vis the operating company debt.

DBRS confirmed its rating on Fortis on February 8, 2006, citing the underlying credit strength of the company's diversified portfolio of regulated utility holdings together with the strength of its non-consolidated balance sheet. The stable trend reflects the agency's expectations that the company's diversified portfolio of regulated utilities will continue to generate relatively stable consolidated earnings over the medium term, with growth coming primarily from growth in the utility's customer base and rate base. DBRS is comfortable with Fortis' non-consolidated debt to capital of 21% in 2005, with the agency adding that it expects the company to maintain this ratio within the 20% to 30% range. Leverage beyond 30% would not support the current rating.

Standard & Poor's last affirmed the ratings on Dec. 7, 2005, at which time the outlook on the ratings was changed to Stable, from Negative reflecting greater stability in Fortis' business and financial profiles and reduced concern surrounding the level of operational and funding risk involved with its major capital expenditure program. The Stable outlook reflects an expectation of no material change to the current mix of regulated and unregulated operations, and the company successfully undertaking its major capital expenditure program. Furthermore, the outlook reflects an expectation of no material debt-funded acquisitions resulting in a weakening of its credit metrics due to the limited cushion at the current ratings level for deterioration in Fortis' financial profile.

Recommendation

Year-to-date 2006, the company's 5-year generic credit spreads have remained steady, while the company's 10-year spreads are back to where they were at the start of the year after narrowing during the second quarter. Like its 10-year spreads, the company's 30-year spreads tightened in the second quarter before finishing wider by 5 basis points compared to year end 2005. In the absence of a material debt funded or higher risk asset acquisition, the ratings on Fortis are expected to be consolidated at their current levels as the company's financial profile is expected to show modest improvement from its recent weakened position and Fortis works its way through its major capital expenditure program. We are working toward initiating coverage of Fortis.

Q2/06 EPS Higher than Expected; Rating Increased to Outperform

Event

Fortis Inc. reported Q2/06 EPS of \$0.37. After adjusting for the following one-time items: (i) after-tax insurance gain of \$0.7 million; (ii) gain on the sale of a hotel asset of \$1.6 million after tax; (iii) benefit from the reduction of future income tax rates of \$1.5 million; and (iv) unrealized foreign exchange gains of \$1.6 million after tax, Q2/06 EPS were \$0.31, higher than our expectation of \$0.27. The variance between actual and expected performance is largely due to: (1) better than expected performance at FortisAlberta due to higher than expected rate base growth; and (2) return to normal hydrological conditions in Belize, substantially increasing the contribution from the non-regulated generation business segment.

Impact

Positive.

Forecasts

We have revised our financial model to better reflect year-to-date financial performance and, as set out herein, made a number of changes to our outlook. As a result, our diluted 2006 and 2007 EPS estimates increase to \$1.24 and \$1.36 from \$1.17 and \$1.26, respectively.

Valuation

Our revised target price reflects a weighted average valuation approach: 17x 2007E diluted EPS of \$1.36 (12.5%), 1.75x 2007E BV of \$13.44 (12.5%) and a target yield of 3.00% (75%), assuming 2007 dividends per share of \$0.78.

Recommendation

We believe that the shares are attractively valued at current levels. We are increasing our rating to Outperform.

Details & Analysis

Fortis Inc. reported Q2/06 EPS of \$0.37. After adjusting for the following one-time items: (i) after-tax insurance gain of \$0.7 million; (ii) gain on the sale of a hotel asset of \$1.6 million after tax; (iii) benefit from the reduction of future income tax rates of \$1.5 million; and (iv) unrealized foreign exchange gains of \$1.6 million after tax, Q2/06 EPS were \$0.31, higher than our expectation of \$0.27. The variance between actual and expected performance is largely due to: (1) better than expected performance at FortisAlberta due to higher than expected rate base growth; and (2) return to normal hydrological conditions in Belize, substantially increasing the contribution from the non-regulated generation business segment.

As illustrated in Table 1, segment quarterly performance and annual estimated earnings (basic) include the non-cash foreign exchange gains/losses. Our estimates do not include these items and we exclude them for comparable purposes only.

Source: BMO Capital Markets

We believe that the following points are relevant about Q2/06 performance:

- During the second quarter, negotiated settlement agreements were approved and implemented at FortisAlberta and FortisBC. Both of these agreements were effective January 1, 2006 and the respective adjustments required to implement the settlements were implemented in Q2/06. We believe that there may have been a moderate realignment of expenses from Q1/06 to Q2/06 due to the timing of approval of the settlements; however, we do not believe that the amount on a net basis is material to Q2/06 or likely to affect overall fiscal 2006 performance.
- As highlighted in Table 2, a return to normal hydrological conditions in Belize resulted in a substantial increase in hydroelectric energy production from the 25 MW Mollejon and the recently completed 7.3 MW Chalillo hydroelectric facilities. We note that the storage reservoir constructed in conjunction with Chalillo represents approximately 45 GWh when at full supply level. The reservoir is currently full. The combined Chalillo/Mollejon facilities are expected to produce approximately 150 GWh of energy in fiscal 2006. As illustrated by Table 2, annual production from the Mollejon facility has been adversely affected by lower than normal hydrology over consecutive fiscal periods and the lack of upstream storage that would have increased the production of the facility and potentially smoothed production over time. There was no benefit recorded in the generation segment arising from the reduction in future income tax rates.

- We have adjusted the segment contribution from Fortis Properties to net out the \$1.6 million after-tax gain on the sale of the Days Inn Sydney hotel and further adjusted the segment contribution to deduct a \$1.5 million benefit arising from lower future taxation rates.

Source: Company Reports, BMO Capital Markets

- The contribution from FortisAlberta was higher than expected, largely due to the quantum and timing of capital expenditures. Gross capital expenditures were \$59.319 million in Q2/06 and \$105.1 million year to date, a \$40.4 million increase in gross capital expenditures versus the six months ended June 30, 2005. We previously assumed that planned capital expenditures would total some \$177 million in 2006 and a similar amount in 2007.
- The decline in the Q2/06 contribution from Newfoundland power versus Q2/05 reflects the previously announced change in the revenue recognition policy of the utility from a billed basis to an accrual basis. The change in revenue recognition policy is not expected to materially change fiscal 2006 performance. We expect Q3 and Q4/06 performance to compare favourably versus Q3 and Q4/05.

Estimates

We have revised our financial model to better reflect year-to-date financial performance. As a result, our diluted 2006 and 2007 EPS estimates increase to \$1.24 and \$1.36 from \$1.17 and \$1.26, respectively. Our outlook reflects a number of key assumptions:

- We continue to assume that the company issues approximately \$100 million in equity in 2007, in order to preserve and enhance its credit metrics over the forecast period.
- We have increased the company's ownership interest in Caribbean Utilities to 37.4% versus 37.3% previously.
- We have increased the company's ownership interest in Belize to 70.1% from 68.5%, previously, as a result of the recently completed rights offering.
- We have increased our gross capital expenditure expectation at FortisAlberta to approximately \$240 million in each of 2006 and 2007 from approximately \$177 million.
- We have increased the estimated production from Belizian facilities and reduced operating expenses in the non-regulated generating segment, reflecting a return to normal hydrological conditions for 2006 and 2007.

Valuation

Our revised target price reflects a weighted average valuation approach: 17x 2007E diluted EPS of \$1.36 (12.5%), 1.75x 2007E BV of \$13.44 (12.5%) and a target yield of 3.00% (75%), assuming 2007 dividends per share of \$0.78. We have reduced our target yield to 3% from 3.25% to reflect the following key points:

- Over the 2005 to 2010 forecast period, diluted EPS are expected to grow by 5.2%. We note that this is one of the best growth rates in our coverage universe.
- EPS growth is largely reliant on rate base growth at utility operations subject to cost of service regulation. We believe that this growth profile has significantly lower project execution risk than the construction of large diameter, inter and intra-state/province liquids and natural gas transportation facilities and the refurbishment of laid-up nuclear reactors.
- The company's non-regulated generating portfolio is almost exclusively comprised of long-life, hydroelectric assets, without material exposure to natural gas spark spread risks.
- Forecast EPS do not rely on highly volatile midstream processing and natural gas storage revenues, which are subject to substantial seasonal volatility due to weather, basis differentials between natural gas hubs, fractionation margins and the relationship between natural gas and oil prices.
- Financial reporting structure of the company is transparent and superior to a number of entities in its Canadian peer group.
- The company's dividend payout ratio, actual and forecast, is expected to remain in the 50–60% of basic EPS range over the forecast period, below the average range of 60–70% of its utility peer group.

Recommendation

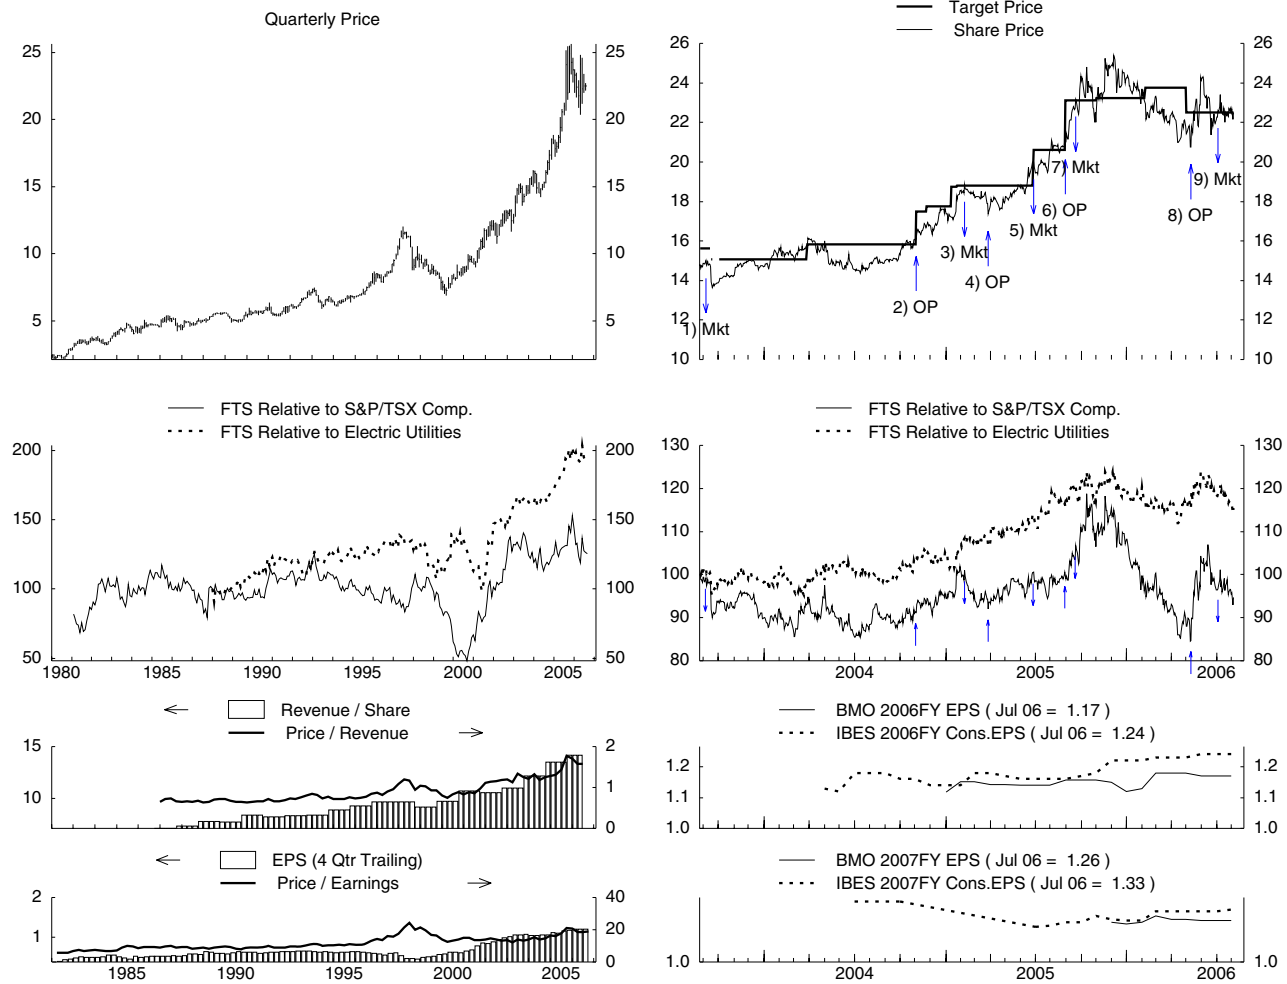

We believe that the shares are attractively priced at current levels. We are increasing our rating to Outperform.

Company Risk Disclosure

In addition to the risks involved in investing in common stocks generally, we also highlight the following risks that pertain to this company. Operations are subject to complex regulation by a variety of provincial, state and federal (Canada, Cayman Islands & Belize) agencies. Changes in regulation may adversely affect performance.

Financial performance is dependent upon the availability of installed generation and the production of electric power by third parties. Fortis Properties' cash flow is dependent on hotel room vacancy rates and commercial building occupancy levels. The Company's operations in Belize may be disrupted and assets may be damaged by hurricanes and/or tropical storms.

Analyst's Certification

I, Karen Taylor, CFA, hereby certify that the views expressed in this report accurately reflect my personal views about the subject securities or issuers. I also certify that no part of my compensation was, is, or will be, directly or indirectly, related to the specific recommendations or views expressed in this report.

General Disclosure

The information and opinions in this report were prepared by BMO Nesbitt Burns Inc. and BMO Nesbitt Burns Ltée./Ltd., collectively ("BMO NB"). BMO NB is not subject to U.S. rules with regard to the preparation of research reports and the independence of analysts. "BMO Capital Markets" is a trade name used by the BMO Investment Banking Group, which includes the wholesale/institutional arms of Bank of Montreal and BMO NB in Canada, and BMO Capital Markets Corp. in the U.S. BMO Capital Markets Corp. is an affiliate of BMO NB. BMO NB and BMO Capital Markets Corp. are subsidiaries of Bank of Montreal. Bank of Montreal or its affiliates ("BMO Financial Group") has lending arrangements with, or provide other remunerated services to, many issuers covered by BMO NB research. A significant lending relationship may exist between BMO Financial Group and certain of the issuers mentioned herein. The reader should assume that BMO NB, BMO Capital Markets Corp., Bank of Montreal or their affiliates may have a conflict of interest and should not rely solely on this report in evaluating whether or not to buy or sell securities of issuers discussed herein. The opinions, estimates and projections contained in this report are those of BMO NB as of the date of this report and are subject to change without notice. BMO NB endeavours to ensure that the contents have been compiled or derived from sources that we believe are reliable and contain information and opinions that are accurate and complete. However, BMO NB makes no representation or warranty, express or implied, in respect thereof, takes no responsibility for any errors and omissions contained herein and accepts no liability whatsoever for any loss arising from any use of, or reliance on, this report or its contents. Information may be available to BMO NB or its affiliates that is not reflected in this report. The information in this report is not intended to be used as the primary basis of investment decisions, and because of individual client objectives, should not be construed as advice designed to meet the particular investment needs of any investor. This material is for information purposes only and is not an offer to sell or the solicitation of an offer to buy any security. The research analyst and/or associates who prepared this report are compensated based upon (among other factors) the overall profitability of BMO NB and its affiliates, which includes the overall profitability of investment banking services. BMO NB, or its affiliates expect to receive or will seek compensation for investment banking services within the next 3 months from all issuers covered by BMO NB. BMO NB or its affiliates will buy from or sell to customers the securities of issuers mentioned in this report on a principal basis. BMO NB or its affiliates, officers, directors or employees may have a long or short position in the securities discussed herein, related securities or in options, futures or other derivative instruments based thereon.

Rating Category	BMO Rating	BMO Universe	BMO I.B. Clients*	First Call Universe**
Buy	Outperform	40%	49%	48%
Hold	Market Perform	50%	47%	45%
Sell	Underperform	10%	4%	7%

* Reflects rating distribution of all companies where BMO Capital Markets has received compensation for Investment Banking services.

** Reflects rating distribution of all North American equity research analysts.

Ratings Key

We use the following ratings system definitions:

OP = Outperform - Forecast to outperform the market;

Mkt = Market Perform - Forecast to perform roughly in line with the market;

Und = Underperform - Forecast to underperform the market;

(S) = speculative investment;

NR = No rating at this time;

R = Restricted – Dissemination of research is currently restricted.

Market performance is measured by a benchmark index such as the S&P/TSX Composite Index, S&P 500, Nasdaq Composite, as appropriate for each company. Prior to September 1, 2003, a fourth rating tier—Top Pick—was used to designate those stocks we felt would be the best performers relative to the market. Our six Top 15 lists which guide investors to our best ideas according to six different objectives (large, small, growth, value, income and quantitative) have replaced the Top Pick rating.

Dissemination of Research

Our research publications are available via our web site <http://bmocapitalmarkets.com>. Institutional clients may also receive our research via FIRST CALL Research Direct and Reuters. All of our research is made widely available at the same time to all BMO NB, BMO Capital Markets Corp. and BMO Nesbitt Burns Securities Ltd. client groups entitled to our research. Please contact your investment advisor or institutional salesperson for more information.

Acquisition of Turks and Caicos Utilities Announced

Impact

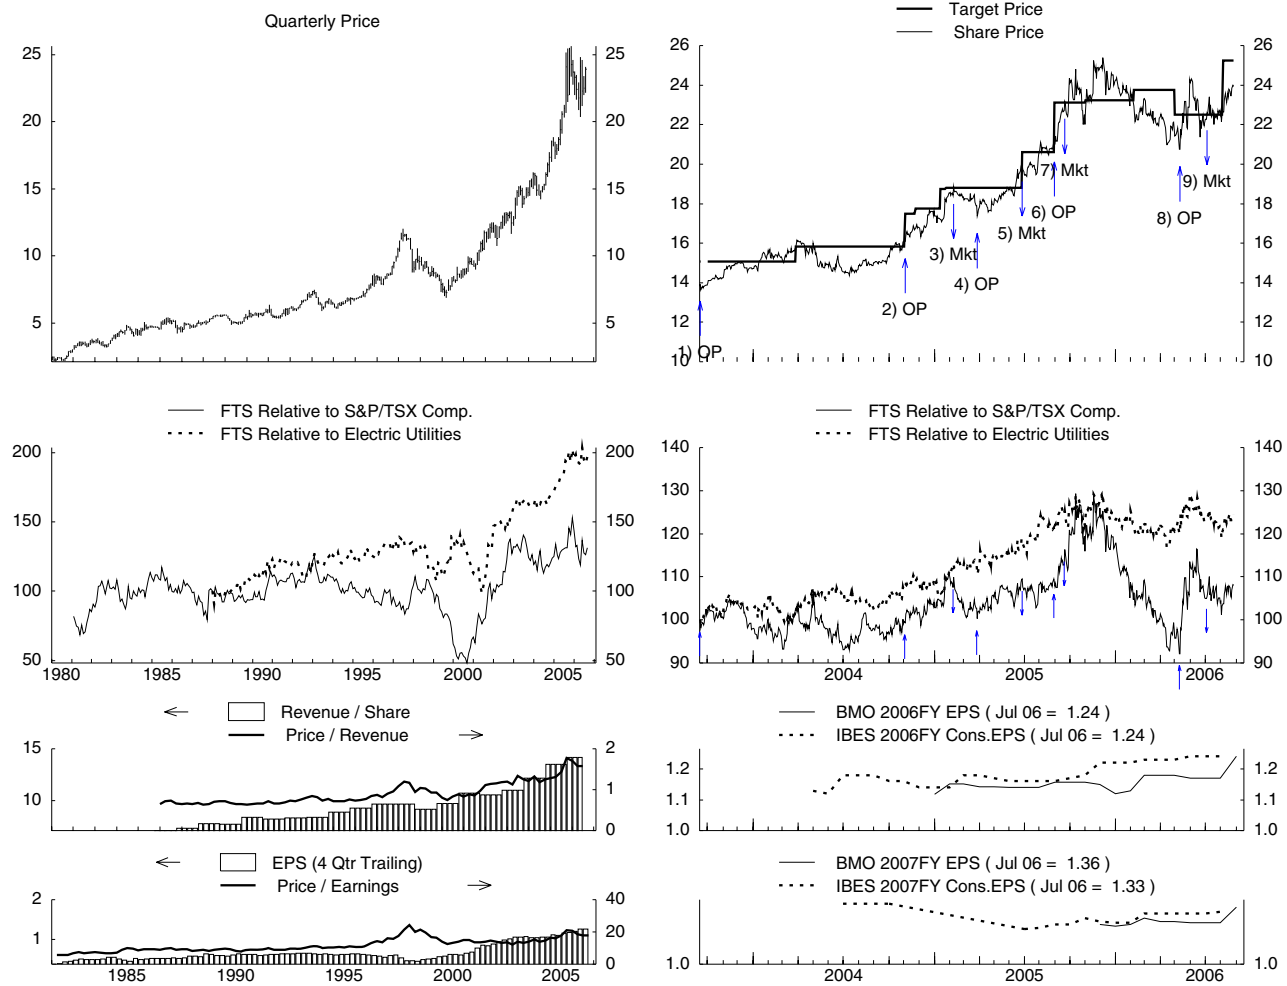

Slightly Positive

Details & Analysis

Fortis has announced that it has acquired all of the shares of two utilities based in the Turks and Caicos Islands, P.P.C. Limited and Atlantic Equipment and Power (Turks and Caicos) Limited, for US\$90 million, including assumed debt. Both utilities operate under exclusive, long-term licence arrangements in their respective jurisdictions and are regulated under a traditional rate of return on rate base approach. The utilities are allowed to earn a fixed rate of return of 17.5% on a defined asset base, which was approximately US\$50 million as at June 30, 2006. We estimate that the transaction could add approximately \$0.01-0.02 to our 2007E EPS, depending on financial assumptions, including the amount of project-level debt assumed by Fortis. This acquisition is in line with our expectations for the following reasons: (1) it allows Fortis to expand its regulated Caribbean utility operations in a stable jurisdiction; (2) it is consistent with management's past comments which indicated that Fortis was seeking to expand its regulated Caribbean operations; and (3) we presently assume that Fortis will issue approximately \$100 million of equity in 2007. No change in view. We rate the share of Fortis Outperform.

This report was prepared by an Analyst employed by a Canadian affiliate, BMO Nesbitt Burns Inc., and who is not registered/qualified as a research analyst under NYSE/NASD rules. For disclosure statements, including the Analyst's Certification, please refer to pages 2 to 4.

Turks & Caicos Acquisition; Outperform Rating Maintained

Event

On August 28, Fortis announced that it has acquired all of the outstanding shares of P.P.C Limited and Atlantic Equipment and Power (Turks and Caicos) Limited from T.C. Energy Holdings Inc. for US\$90 million. The combined utilities serve approximately 7,500 customers or 80% of customers in the Turks and Caicos pursuant to 50-year licences. The utilities have a combined installed generating base of 35 MW and a peak load of 20 MW. We believe that the transaction price is approximately 7.5x fiscal 2005 EBITDA, the lower end of the range of observed transactions.

Impact

Positive.

Forecasts

We have updated our financial model to reflect this acquisition. We have included a number of assumptions, as set out herein and our diluted 2006 and 2007 EPS estimates increase to \$1.26 and \$1.41, respectively, from \$1.24 and \$1.36 per share previously.

Valuation

We have increased our target price to \$26. Our new target price reflects a weighted average valuation approach: 17x 2007E diluted EPS of \$1.41 (12.5%), 2.0x 2007E book value of \$13.68 (12.5%) and a target yield of 3% (75%), assuming 2007E dividends of \$0.78.

Recommendation

We believe that the shares are attractively valued. Our rating is Outperform.

Details & Analysis

On August 28, Fortis announced that it has acquired all of the outstanding shares of P.P.C Limited and Atlantic Equipment and Power (Turks and Caicos) Limited from T.C. Energy Holdings Inc. for US\$90 million. The combined utilities serve approximately 7,500 customers or 80% of customers in the Turks and Caicos pursuant to 50-year licences. The utilities have a combined installed generating base of 35 MW and a peak load of 20 MW. We note the following about the announced acquisition:

- PPC is the sole provider of electricity in Providenciales, North Caicos and Middle Caicos pursuant to an exclusive 50-year licence that expires in 2037. Atlantic is the sole provider of electricity in South Caicos pursuant to an exclusive 50-year licence that expires in 2036.
- We continue to believe that Fortis is likely to acquire additional utility assets in the Caribbean, likely Bermuda and the Bahamas. We do not expect Fortis to pursue the acquisition of the assets presently offered for sale by Mirant, which include: Jamaica Public Service Company Limited – 80%, Grand Bahama Power Company – 55%, Power Generation Company of Trinidad and Tobago – 39%, Curacao Utilities Company – 25.5%. In 2005, these assets contributed approximately US\$156 million of adjusted EBITDA.
- The announced acquisition of US\$90 million includes the assumption of approximately US\$20 million of existing bank debt, which is likely to be refinanced. The acquisition was priced at 7.5x EV/EBITDA, at the low end of the range of recently observed transactions.
- Utility rates are adjusted annually. The utilities make an annual filing with the Energy Commission and if the actual, realized return on defined assets is less than 17.5%, the utilities are entitled to a rate increase. There has not been a rate increase in a number of years. Base fuel costs (diesel) are included in rates and costs above the base rate are deferred and recovered from customers on a two-month lagged basis.
- The utilities maintain adequate hurricane insurance and the most recent policy was renewed on July 1, 2006. Approximately US\$20 million of the gross US\$57 million utility assets are transmission and distribution facilities that are not subject to insurance protection. Generating capacity of approximately US\$25 million is fully insured. The utilities maintain adequate business interruption insurance coverage, subject to a deductible.
- The two principle risks associated with this acquisition are: (1) hurricanes; and (2) risk of government intervention in the licence. Although we have not seen the governing licences, we understand that the government has limited ability to interfere with the normal course operation of the licences and can only intervene when the utilities don't deliver service.

Estimates

We have updated our financial model to reflect this acquisition. Our diluted 2006 and 2007 EPS estimates increase to \$1.26 and \$1.41, respectively, from \$1.24 and \$1.36 per share previously. Our estimates reflect the following key assumptions:

- Target capital structure for Fortis Inc. of 60% debt and 40% equity, with the equity component likely to be 30% common equity and 10% preferred shares.
- Equity issue in 2007 of \$140 million.

- Regulated asset base of US\$50 million in 2006, a return on rate base of 17.5%. Annual capital expenditures are assumed to be US\$8 million per annum and depreciation is assumed to be 3.5% per annum or approximately US\$2 million.
- 60% or US\$54 million of the purchase price is funded with U.S. dollar denominated debt at a cost of approximately 8%.

Valuation

We have increased our target price to \$26. Our new target price reflects a weighted average valuation approach: 17x 2007E diluted EPS of \$1.41 (12.5%), 2.0x 2007E book value of \$13.68 (12.5%) and a target yield of 3% (75%), assuming 2007E dividends of \$0.78.

Recommendation

We believe the shares are attractively valued at current levels. Our rating is Outperform.

Company Risk Disclosure

In addition to the risks involved in investing in common stocks generally, we also highlight the following risks that pertain to this company. Operations are subject to complex regulation by a variety of provincial, state and federal (Canada, Cayman Islands & Belize) agencies. Changes in regulation may adversely affect performance.

Financial performance is dependent upon the availability of installed generation and the production of electric power by third parties. Fortis Properties' cash flow is dependent on hotel room vacancy rates and commercial building occupancy levels. The Company's operations in Belize may be disrupted and assets may be damaged by hurricanes and/or tropical storms.

Analyst's Certification

I, Karen Taylor, CFA, hereby certify that the views expressed in this report accurately reflect my personal views about the subject securities or issuers. I also certify that no part of my compensation was, is, or will be, directly or indirectly, related to the specific recommendations or views expressed in this report.

General Disclosure

The information and opinions in this report were prepared by BMO Nesbitt Burns Inc. and BMO Nesbitt Burns Ltée./Ltd., collectively ("BMO NB"). BMO NB is not subject to U.S. rules with regard to the preparation of research reports and the independence of analysts. "BMO Capital Markets" is a trade name used by the BMO Investment Banking Group, which includes the wholesale/institutional arms of Bank of Montreal and BMO NB in Canada, and BMO Capital Markets Corp. in the U.S. BMO Capital Markets Corp. is an affiliate of BMO NB. BMO NB and BMO Capital Markets Corp. are subsidiaries of Bank of Montreal. Bank of Montreal or its affiliates ("BMO Financial Group") has lending arrangements with, or provide other remunerated services to, many issuers covered by BMO NB research. A significant lending relationship may exist between BMO Financial Group and certain of the issuers mentioned herein. The reader should assume that BMO NB, BMO Capital Markets Corp., Bank of Montreal or their affiliates may have a conflict of interest and should not rely solely on this report in evaluating whether or not to buy or sell securities of issuers discussed herein. The opinions, estimates and projections contained in this report are those of BMO NB as of the date of this report and are subject to change without notice. Rating Category	BMO Rating	BMO Universe	BMO I.B. Clients*	First Call Universe**
Buy	Outperform	40%	49%	48%
Hold	Market Perform	50%	47%	45%
Sell	Underperform	10%	4%	7%

* Reflects rating distribution of all companies where BMO Capital Markets has received compensation for Investment Banking services.

** Reflects rating distribution of all North American equity research analysts.

Ratings Key

We use the following ratings system definitions:

OP = Outperform - Forecast to outperform the market;

Mkt = Market Perform - Forecast to perform roughly in line with the market;

Und = Underperform - Forecast to underperform the market;

(S) = speculative investment;

NR = No rating at this time;

R = Restricted – Dissemination of research is currently restricted.

Market performance is measured by a benchmark index such as the S&P/TSX Composite Index, S&P 500, Nasdaq Composite, as appropriate for each company. Prior to September 1, 2003, a fourth rating tier—Top Pick—was used to designate those stocks we felt would be the best performers relative to the market. Our six Top 15 lists which guide investors to our best ideas according to six different objectives (large, small, growth, value, income and quantitative) have replaced the Top Pick rating.

Dissemination of Research

Our research publications are available via our web site <http://bmocapitalmarkets.com>. Institutional clients may also receive our research via FIRST CALL Research Direct and Reuters. All of our research is made widely available at the same time to all BMO NB, BMO Capital Markets Corp. and BMO Nesbitt Burns Securities Ltd. client groups entitled to our research. Please contact your investment advisor or institutional salesperson for more information.

Additional Matters

TO U.S. RESIDENTS: BMO Capital Markets Corp. and/or BMO Nesbitt Burns Securities Ltd., affiliates of BMO NB, furnish this report to U.S. residents and accept responsibility for the contents herein, except to the extent that it refers to securities of Bank of Montreal. Any U.S. person wishing to effect transactions in any security discussed herein should do so through BMO Capital Markets Corp. and/or BMO Nesbitt Burns Securities Ltd.

TO U.K. RESIDENTS: The contents hereof are intended solely for the use of, and may only be issued or passed onto, persons described in part VI of the Financial Services and Markets Act 2000 (Financial Promotion) Order 2001.

BMO Nesbitt Burns Inc. and BMO Nesbitt Burns Ltée/Ltd. are Members of CIPF. BMO Capital Markets Corp. and BMO Nesbitt Burns Securities Ltd. are Members of SIPC.

"BMO Capital Markets" is a trade-mark of Bank of Montreal, used under licence.

"BMO (M-Bar roundel symbol)" is a registered trade-mark of Bank of Montreal, used under licence.

Perpetual Preferred Share Issue; Outperform Rating Maintained

Event

Fortis Inc. has announced that it has issued \$125 million Series F Cumulative Redeemable First Preference Shares, bearing a dividend rate of 4.90%. The shares are not redeemable prior to December 1, 2011 and have no shareholder retraction rights. Proceeds from the issue will be used to repay approximately \$72 million borrowed by the company on its corporate credit facility to partially fund the US\$90 million acquisition of utility assets on the Turks & Caicos Islands (announced on August 28, 2006) and to fund further equity investments in the company's western Canadian regulated utility operations, to support robust capital expenditure programs and general corporate purposes.

Impact

Neutral.

Forecasts

We have updated our financial model to reflect the issuance of the perpetual preferred shares. We have also assumed that the company is no longer likely to issue common equity of approximately \$130 million. As a result of these changes, our 2006 and 2007 EPS estimates decline by \$0.01 per share to \$1.25 and \$1.40, respectively.

Valuation

Our target price reflects a weighted average valuation approach: 17x diluted 2007E EPS of \$1.40 (12.5%), 2x 2007E BV of \$13.13 (12.5%), and a target yield of 3% (75%), assuming 2007 dividends per share of \$0.78.

Recommendation

We believe that the shares are attractively valued at current levels. Our rating is Outperform.

Company Risk Disclosure

In addition to the risks involved in investing in common stocks generally, we also highlight the following risks that pertain to this company. Operations are subject to complex regulation by a variety of provincial, state and federal (Canada, Cayman Islands & Belize) agencies. Changes in regulation may adversely affect performance.

Financial performance is dependent upon the availability of installed generation and the production of electric power by third parties. Fortis Properties' cash flow is dependent on hotel room vacancy rates and commercial building occupancy levels. The Company's operations in Belize may be disrupted and assets may be damaged by hurricanes and/or tropical storms.

Analyst's Certification

I, Karen Taylor, CFA, hereby certify that the views expressed in this report accurately reflect my personal views about the subject securities or issuers. I also certify that no part of my compensation was, is, or will be, directly or indirectly, related to the specific recommendations or views expressed in this report.

General Disclosure

The information and opinions in this report were prepared by BMO Nesbitt Burns Inc. and BMO Nesbitt Burns Ltée./Ltd., collectively ("BMO NB"). BMO NB is not subject to U.S. rules with regard to the preparation of research reports and the independence of analysts. "BMO Capital Markets" is a trade name used by the BMO Investment Banking Group, which includes the wholesale/institutional arms of Bank of Montreal and BMO NB in Canada, and BMO Capital Markets Corp. in the U.S. BMO Capital Markets Corp. is an affiliate of BMO NB. BMO NB and BMO Capital Markets Corp. are subsidiaries of Bank of Montreal. Bank of Montreal or its affiliates ("BMO Financial Group") has lending arrangements with, or provide other remunerated services to, many issuers covered by BMO NB research. A significant lending relationship may exist between BMO Financial Group and certain of the issuers mentioned herein. The reader should assume that BMO NB, BMO Capital Markets Corp., Bank of Montreal or their affiliates may have a conflict of interest and should not rely solely on this report in evaluating whether or not to buy or sell securities of issuers discussed herein. The opinions, estimates and projections contained in this report are those of BMO NB as of the date of this report and are subject to change without notice. BMO NB endeavours to ensure that the contents have been compiled or derived from sources that we believe are reliable and contain information and opinions that are accurate and complete. However, BMO NB makes no representation or warranty, express or implied, in respect thereof, takes no responsibility for any errors and omissions contained herein and accepts no liability whatsoever for any loss arising from any use of, or reliance on, this report or its contents. Information may be available to BMO NB or its affiliates that is not reflected in this report. The information in this report is not intended to be used as the primary basis of investment decisions, and because of individual client objectives, should not be construed as advice designed to meet the particular investment needs of any investor. This material is for information purposes only and is not an offer to sell or the solicitation of an offer to buy any security. The research analyst and/or associates who prepared this report are compensated based upon (among other factors) the overall profitability of BMO NB and its affiliates, which includes the overall profitability of investment banking services. BMO NB, or its affiliates expect to receive or will seek compensation for investment banking services within the next 3 months from all issuers covered by BMO NB. BMO NB or its affiliates will buy from or sell to customers the securities of issuers mentioned in this report on a principal basis. BMO NB or its affiliates, officers, directors or employees may have a long or short position in the securities discussed herein, related securities or in options, futures or other derivative instruments based thereon.

Company Specific Disclosure

Rating Category	BMO Rating	BMO Universe	BMO I.B. Clients*	First Call Universe**
Buy	Outperform	40%	49%	48%
Hold	Market Perform	50%	47%	45%
Sell	Underperform	10%	4%	7%

* Reflects rating distribution of all companies where BMO Capital Markets has received compensation for Investment Banking services.

** Reflects rating distribution of all North American equity research analysts.

Ratings Key

We use the following ratings system definitions:

OP = Outperform - Forecast to outperform the market;

Mkt = Market Perform - Forecast to perform roughly in line with the market;

Und = Underperform - Forecast to underperform the market;

(S) = speculative investment;

NR = No rating at this time;

R = Restricted – Dissemination of research is currently restricted.

Market performance is measured by a benchmark index such as the S&P/TSX Composite Index, S&P 500, Nasdaq Composite, as appropriate for each company. Prior to September 1, 2003, a fourth rating tier—Top Pick—was used to designate those stocks we felt would be the best performers relative to the market. Our six Top 15 lists which guide investors to our best ideas according to six different objectives (large, small, growth, value, income and quantitative) have replaced the Top Pick rating.

Dissemination of Research

Our research publications are available via our web site <http://bmocapitalmarkets.com>. Institutional clients may also receive our research via FIRST CALL Research Direct and Reuters. All of our research is made widely available at the same time to all BMO NB, BMO Capital Markets Corp. and BMO Nesbitt Burns Securities Ltd. client groups entitled to our research. Please contact your investment advisor or institutional salesperson for more information.

Additional Matters

TO U.S. RESIDENTS: BMO Capital Markets Corp. and/or BMO Nesbitt Burns Securities Ltd., affiliates of BMO NB, furnish this report to U.S. residents and accept responsibility for the contents herein, except to the extent that it refers to securities of Bank of Montreal. Any U.S. person wishing to effect transactions in any security discussed herein should do so through BMO Capital Markets Corp. and/or BMO Nesbitt Burns Securities Ltd.

TO U.K. RESIDENTS: The contents hereof are intended solely for the use of, and may only be issued or passed onto, persons described in part VI of the Financial Services and Markets Act 2000 (Financial Promotion) Order 2001.

BMO Nesbitt Burns Inc. and BMO Nesbitt Burns Ltée/Ltd. are Members of CIPF. BMO Capital Markets Corp. and BMO Nesbitt Burns Securities Ltd. are Members of SIPC.

"BMO Capital Markets" is a trade-mark of Bank of Montreal, used under licence.

"BMO (M-Bar roundel symbol)" is a registered trade-mark of Bank of Montreal, used under licence.

Notes: EPS estimates are diluted; Quarterly numbers are basic **Disclosures:** 9, 10C

Company Description – Fortis is a publicly listed holding company with three key businesses: electric utility operations, non-regulated electric power generation, and non-utility property activities. Electric power operations include: Newfoundland Power (100%, Newfoundland), Maritime Electric (100%, PEI), FortisOntario (100%, Fort Erie, Ontario), Belize Electricity (68%, Belize), Caribbean Utilities (37.2%, Grand Cayman Island), FortisAlberta

(100%, Alberta) and FortisBC (100%, British Columbia).
Website: fortisinc.com

Recent Results – Fortis Inc. reported Q2/06 EPS of \$0.37. After adjusting for the following one-time items: (i) after-tax insurance gain of \$0.7 million; (ii) gain on the sale of a hotel asset of \$1.6 million after tax; (iii) benefit from the reduction of future income tax rates of \$1.5 million; and (iv) unrealized foreign exchange gains of \$1.6 million after tax, Q2/06 EPS were \$0.31, higher than our expectation of

\$0.27. The variance between actual and expected performance is largely due to: (1) better than expected performance at FortisAlberta due to higher than expected rate base growth; and (2) return to normal hydrological conditions in Belize, substantially increasing the contribution from the non-regulated generation business segment.

Corporate Developments – On August 28, Fortis announced that it has acquired all of the shares of two utilities based in the Turks and Caicos Islands, P.P.C. Limited and Atlantic Equipment and Power (Turks and Caicos) Limited, for US\$90 million, including assumed debt. Both utilities operate under exclusive, long-term licence arrangements in their respective jurisdictions and are

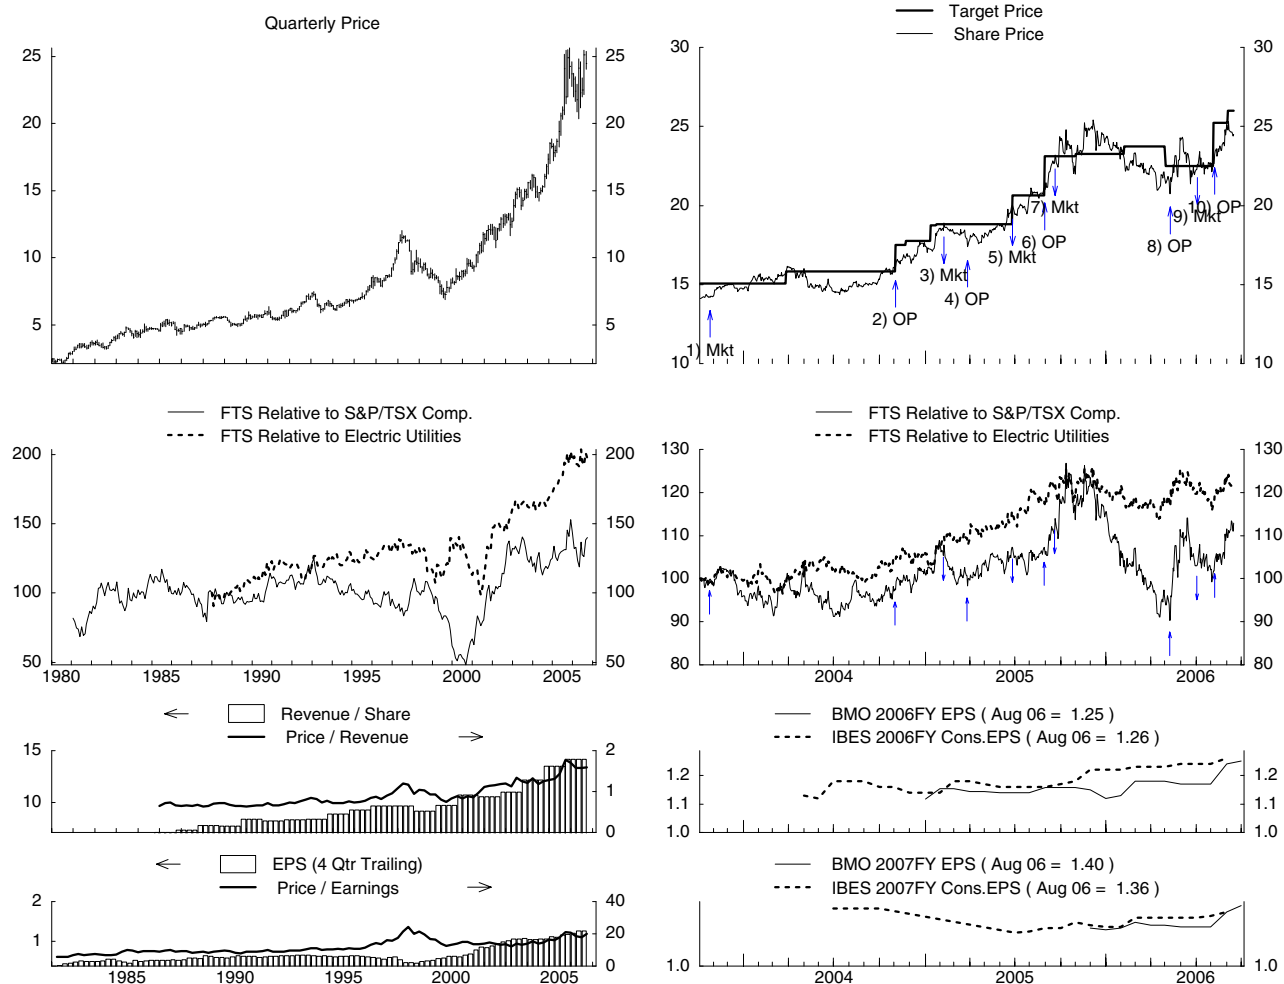

regulated under a traditional rate of return on rate base approach. The utilities are allowed to earn a fixed rate of return of 17.5% on a defined asset base, which was approximately US\$50 million as at June 30, 2006.

Forecasts – Our diluted 2006 and 2007 EPS are \$1.26 and \$1.41, respectively.

Valuation – Our target price of \$26.00 reflects a weighted average valuation approach: 17x 2007E diluted EPS of \$1.41 (12.5%), 2.00x 2007E BV of \$13.68 (12.5%) and a target yield of 3.00% (75%), assuming 2007 dividends per share of \$0.78.

Recommendation – We believe the shares are attractively valued. Our rating is Outperform

The information in this report is not intended to be used as the primary basis of investment decisions, and because of individual client objectives, should not be construed as advice designed to meet the particular investment needs of any investor. This material is for information purposes only and is not an offer to sell or the solicitation of an offer to buy any security. The research analyst and/or associates who prepared this report are compensated based upon (among other factors) the overall profitability of BMO NB and its affiliates, which includes the overall profitability of investment banking services. BMO NB, or its affiliates expect to receive or will seek compensation for investment banking services within the next 3 months from all issuers covered by BMO NB. BMO NB or its affiliates will buy from or sell to customers the securities of issuers mentioned in this report on a principal basis. BMO NB or its affiliates, officers, directors or employees may have a long or short position in the securities discussed herein, related securities or in options, futures or other derivative instruments based thereon.

Company Specific Disclosure

Disclosure 9: BMO Capital Markets Corp. or an affiliate received compensation for products or services other than investment banking services within the past 12 months.

Disclosure 10: This issuer is a client (or was a client) of BMO NB, BMO Capital Markets Corp. or an affiliate within the past 12 months: Non-Securities Related Services.

Distribution of Ratings

Rating Category	BMO Rating	BMO Universe	BMO I.B. Clients *	First Call Universe **
Buy	Outperform	40%	49%	48%
Hold	Market Perform	50%	47%	45%
Sell	Underperform	10%	4%	7%

* Reflects rating distribution of all companies where BMO Capital Markets has received compensation for Investment Banking services.

** Reflects rating distribution of all North American equity research analysts.

Ratings Key

We use the following ratings system definitions:

OP = Outperform - Forecast to outperform the market;

Mkt = Market Perform - Forecast to perform roughly in line with the market;

Und = Underperform - Forecast to underperform the market;

(S) = speculative investment;

NR = No rating at this time;

R = Restricted – Dissemination of research is currently restricted.

Market performance is measured by a benchmark index such as the S&P/TSX Composite Index, S&P 500, Nasdaq Composite, as appropriate for each company. Prior to September 1, 2003, a fourth rating tier—Top Pick—was used to designate those stocks we felt would be the best performers relative to the market. Our six Top 15 lists which guide investors to our best ideas according to six different objectives (large, small, growth, value, income and quantitative) have replaced the Top Pick rating.

Dissemination of Research

Our research publications are available via our web site <http://bmocapitalmarkets.com>. Institutional clients may also receive our research via FIRST CALL Research Direct and Reuters. All of our research is made widely available at the same time to all BMO NB, BMO Capital Markets Corp. and BMO Nesbitt Burns Securities Ltd. client groups entitled to our research. Please contact your investment advisor or institutional salesperson for more information.

Additional Matters

TO U.S. RESIDENTS: BMO Capital Markets Corp. and/or BMO Nesbitt Burns Securities Ltd., affiliates of BMO NB, furnish this report to U.S. residents and accept responsibility for the contents herein, except to the extent that it refers to securities of Bank of Montreal. Any U.S. person wishing to effect transactions in any security discussed herein should do so through BMO Capital Markets Corp. and/or BMO Nesbitt Burns Securities Ltd.

TO U.K. RESIDENTS: The contents hereof are intended solely for the use of, and may only be issued or passed onto, persons described in part VI of the Financial Services and Markets Act 2000 (Financial Promotion) Order 2001.

BMO Nesbitt Burns Inc. and BMO Nesbitt Burns Ltée/Ltd. are Members of CIPF. BMO Capital Markets Corp. and BMO Nesbitt Burns Securities Ltd. are Members of SIPC.

"BMO Capital Markets" is a trade-mark of Bank of Montreal, used under licence.

"BMO (M-Bar roundel symbol)" is a registered trade-mark of Bank of Montreal, used under licence.

Newfoundland Power Files Application – Outperform Maintained

Event

On September 13, Newfoundland Power filed a 2007 Amortization and Cost Deferrals Application with the Board of Commissioners of Public Utilities, in which the utility addresses a number of 2007 costs that are not reflected in customer rates (including \$2.7 million of increased income tax costs, \$5.8 million of increased depreciation expenses related to the conclusion of the depreciation true-up that was concluded in 2005, and \$1.8 million of replacement energy costs associated with the planned 2007 refurbishment of the Rattling Brook hydroelectric plant) and a proposal to: (1) amortize \$2.7 million of the 2005 Unbilled Revenue as revenue in 2007; (2) defer \$5.8 million in higher depreciation costs; (3) defer \$1.1 million of the replacement power costs; and (4) confirm a 2007 forecast rate base of \$785.3 million. The allowed rate of return on rate base appears to be within the band established by the automatic adjustment mechanism used by the Commission (allowed ROE currently 9.24%, with a 50 basis point range).

Impact

Neutral.

Forecasts

We have updated our outlook to incorporate the September 13 application. Our 2006 EPS estimate is unchanged and our diluted 2007 EPS estimate declines marginally to \$1.39 from \$1.40.

Valuation

Our target price reflects a weighted average valuation approach: 17x 2007E diluted EPS of \$1.30 (12.5%), 2.00 2007E BV per share of \$13.11 (12.5%), and a target yield of 2.85% (75%), assuming 2007E dividends of \$0.78.

Recommendation

We believe the shares are attractively valued. Our rating is Outperform.

Company Risk Disclosure

In addition to the risks involved in investing in common stocks generally, we also highlight the following risks that pertain to this company. Operations are subject to complex regulation by a variety of provincial, state and federal (Canada, Cayman Islands & Belize) agencies. Changes in regulation may adversely affect performance.

Financial performance is dependent upon the availability of installed generation and the production of electric power by third parties. Fortis Properties' cash flow is dependent on hotel room vacancy rates and commercial building occupancy levels. The Company's operations in Belize may be disrupted and assets may be damaged by hurricanes and/or tropical storms.

Analyst's Certification

I, Karen Taylor, CFA, hereby certify that the views expressed in this report accurately reflect my personal views about the subject securities or issuers. I also certify that no part of my compensation was, is, or will be, directly or indirectly, related to the specific recommendations or views expressed in this report.

General Disclosure

The information and opinions in this report were prepared by BMO Nesbitt Burns Inc. and BMO Nesbitt Burns Ltée./Ltd., collectively ("BMO NB"). BMO NB is not subject to U.S. rules with regard to the preparation of research reports and the independence of analysts. "BMO Capital Markets" is a trade name used by the BMO Investment Banking Group, which includes the wholesale/institutional arms of Bank of Montreal and BMO NB in Canada, and BMO Capital Markets Corp. in the U.S. BMO Capital Markets Corp. is an affiliate of BMO NB. BMO NB and BMO Capital Markets Corp. are subsidiaries of Bank of Montreal. Bank of Montreal or its affiliates ("BMO Financial Group") has lending arrangements with, or provide other remunerated services to, many issuers covered by BMO NB research. A significant lending relationship may exist between BMO Financial Group and certain of the issuers mentioned herein. The reader should assume that BMO NB, BMO Capital Markets Corp., Bank of Montreal or their affiliates may have a conflict of interest and should not rely solely on this report in evaluating whether or not to buy or sell securities of issuers discussed herein. The opinions, estimates and projections contained in this report are those of BMO NB as of the date of this report and are subject to change without notice. BMO NB endeavours to ensure that the contents have been compiled or derived from sources that we believe are reliable and contain information and opinions that are accurate and complete. However, BMO NB makes no representation or warranty, express or implied, in respect thereof, takes no responsibility for any errors and omissions contained herein and accepts no liability whatsoever for any loss arising from any use of, or reliance on, this report or its contents. Information may be available to BMO NB or its affiliates that is not reflected in this report. The information in this report is not intended to be used as the primary basis of investment decisions, and because of individual client objectives, should not be construed as advice designed to meet the particular investment needs of any investor. This material is for information purposes only and is not an offer to sell or the solicitation of an offer to buy any security. The research analyst and/or associates who prepared this report are compensated based upon (among other factors) the overall profitability of BMO NB and its affiliates, which includes the overall profitability of investment banking services. BMO NB, or its affiliates expect to receive or will seek compensation for investment banking services within the next 3 months from all issuers covered by BMO NB. BMO NB or its affiliates will buy from or sell to customers the securities of issuers mentioned in this report on a principal basis. BMO NB or its affiliates, officers, directors or employees may have a long or short position in the securities discussed herein, related securities or in options, futures or other derivative instruments based thereon.

Company Specific Disclosure

Disclosure 9: BMO Capital Markets Corp. or an affiliate received compensation for products or services other than investment banking services within the past 12 months.

Disclosure 10: This issuer is a client (or was a client) of BMO NB, BMO Capital Markets Corp. or an affiliate within the past 12 months: Non-Securities Related Services.

Distribution of Ratings

Rating Category	BMO Rating	BMO Universe	BMO I.B. Clients*	First Call Universe**
Buy	Outperform	38%	47%	49%
Hold	Market Perform	53%	47%	45%
Sell	Underperform	9%	6%	6%

* Reflects rating distribution of all companies where BMO Capital Markets has received compensation for Investment Banking services.

** Reflects rating distribution of all North American equity research analysts.

Ratings Key

We use the following ratings system definitions:

OP = Outperform - Forecast to outperform the market;

Mkt = Market Perform - Forecast to perform roughly in line with the market;

Und = Underperform - Forecast to underperform the market;

(S) = speculative investment;

NR = No rating at this time;

R = Restricted – Dissemination of research is currently restricted.

Market performance is measured by a benchmark index such as the S&P/TSX Composite Index, S&P 500, Nasdaq Composite, as appropriate for each company. Prior to September 1, 2003, a fourth rating tier—Top Pick—was used to designate those stocks we felt would be the best performers relative to the market. Our six Top 15 lists which guide investors to our best ideas according to six different objectives (large, small, growth, value, income and quantitative) have replaced the Top Pick rating.

Dissemination of Research

Our research publications are available via our web site <http://bmocapitalmarkets.com>. Institutional clients may also receive our research via FIRST CALL Research Direct and Reuters. All of our research is made widely available at the same time to all BMO NB, BMO Capital Markets Corp. and BMO Nesbitt Burns Securities Ltd. client groups entitled to our research. Please contact your investment advisor or institutional salesperson for more information.

Quarterly Dividend Increased 18.75%

Impact

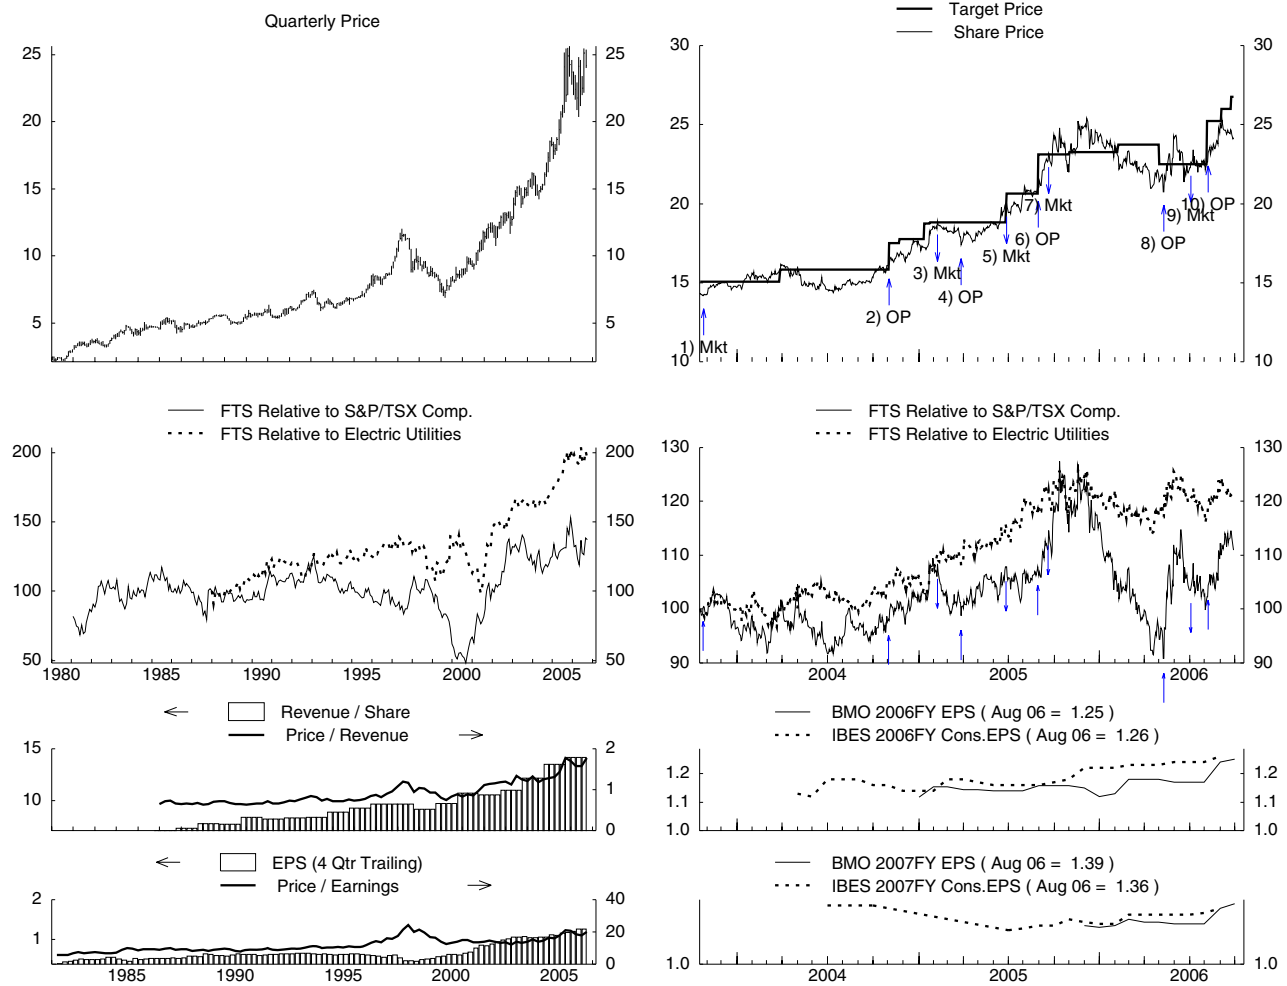

Neutral

Details & Analysis

Fortis has announced that its quarterly common share dividend has been increased by 18.75% to \$0.19 per share versus \$0.16 per share presently. The higher common share dividend is payable on December 1, 2006 to shareholders of record at the close of business on November 3, 2006. The dividend increase is one quarter earlier than expected and \$0.005 per share lower than expected. We estimated that the quarterly dividend would increase to \$0.195, effective for the first payment in 2007. No change in view. We rate the shares of Fortis Inc. Outperform.

This report was prepared by an Analyst employed by a Canadian affiliate, BMO Nesbitt Burns Inc., and who is not registered/qualified as a research analyst under NYSE/NASD rules. For disclosure statements, including the Analyst's Certification, please refer to pages 2 to 4.

Company Risk Disclosure

In addition to the risks involved in investing in common stocks generally, we also highlight the following risks that pertain to this company. Operations are subject to complex regulation by a variety of provincial, state and federal (Canada, Cayman Islands & Belize) agencies. Changes in regulation may adversely affect performance.

Financial performance is dependent upon the availability of installed generation and the production of electric power by third parties. Fortis Properties' cash flow is dependent on hotel room vacancy rates and commercial building occupancy levels. The Company's operations in Belize may be disrupted and assets may be damaged by hurricanes and/or tropical storms.

Analyst's Certification

I, Karen Taylor, CFA, hereby certify that the views expressed in this report accurately reflect my personal views about the subject securities or issuers. I also certify that no part of my compensation was, is, or will be, directly or indirectly, related to the specific recommendations or views expressed in this report.

General Disclosure

The information and opinions in this report were prepared by BMO Nesbitt Burns Inc. and BMO Nesbitt Burns Ltée./Ltd., collectively ("BMO NB"). BMO NB is not subject to U.S. rules with regard to the preparation of research reports and the independence of analysts. "BMO Capital Markets" is a trade name used by the BMO Investment Banking Group, which includes the wholesale/institutional arms of Bank of Montreal and BMO NB in Canada, and BMO Capital Markets Corp. in the U.S. BMO Capital Markets Corp. is an affiliate of BMO NB. BMO NB and BMO Capital Markets Corp. are subsidiaries of Bank of Montreal. Bank of Montreal or its affiliates ("BMO Financial Group") has lending arrangements with, or provide other remunerated services to, many issuers covered by BMO NB research. A significant lending relationship may exist between BMO Financial Group and certain of the issuers mentioned herein. The reader should assume that BMO NB, BMO Capital Markets Corp., Bank of Montreal or their affiliates may have a conflict of interest and should not rely solely on this report in evaluating whether or not to buy or sell securities of issuers discussed herein. The opinions, estimates and projections contained in this report are those of BMO NB as of the date of this report and are subject to change without notice. BMO NB endeavours to ensure that the contents have been compiled or derived from sources that we believe are reliable and contain information and opinions that are accurate and complete. However, BMO NB makes no representation or warranty, express or implied, in respect thereof, takes no responsibility for any errors and omissions contained herein and accepts no liability whatsoever for any loss arising from any use of, or reliance on, this report or its contents. Information may be available to BMO NB or its affiliates that is not reflected in this report. The information in this report is not intended to be used as the primary basis of investment decisions, and because of individual client objectives, should not be construed as advice designed to meet the particular investment needs of any investor. This material is for information purposes only and is not an offer to sell or the solicitation of an offer to buy any security. The research analyst and/or associates who prepared this report are compensated based upon (among other factors) the overall profitability of BMO NB and its affiliates, which includes the overall profitability of investment banking services. BMO NB, or its affiliates expect to receive or will seek compensation for investment banking services within the next 3 months from all issuers covered by BMO NB. BMO NB or its affiliates will buy from or sell to customers the securities of issuers mentioned in this report on a principal basis. BMO NB or its affiliates, officers, directors or employees may have a long or short position in the securities discussed herein, related securities or in options, futures or other derivative instruments based thereon.

Company Specific Disclosure

Disclosure 9: BMO Capital Markets Corp. or an affiliate received compensation for products or services other than investment banking services within the past 12 months.

Disclosure 10: This issuer is a client (or was a client) of BMO NB, BMO Capital Markets Corp. or an affiliate within the past 12 months: Non-Securities Related Services.

Rating Category	BMO Rating	BMO Universe	BMO I.B. Clients*	First Call Universe**
Buy	Outperform	38%	47%	49%
Hold	Market Perform	53%	47%	45%
Sell	Underperform	9%	6%	6%

* Reflects rating distribution of all companies where BMO Capital Markets has received compensation for Investment Banking services.

** Reflects rating distribution of all North American equity research analysts.

Ratings Key

We use the following ratings system definitions:

OP = Outperform - Forecast to outperform the market;

Mkt = Market Perform - Forecast to perform roughly in line with the market;

Und = Underperform - Forecast to underperform the market;

(S) = speculative investment;

NR = No rating at this time;

R = Restricted – Dissemination of research is currently restricted.

Market performance is measured by a benchmark index such as the S&P/TSX Composite Index, S&P 500, Nasdaq Composite, as appropriate for each company. Prior to September 1, 2003, a fourth rating tier—Top Pick—was used to designate those stocks we felt would be the best performers relative to the market. Our six Top 15 lists which guide investors to our best ideas according to six different objectives (large, small, growth, value, income and quantitative) have replaced the Top Pick rating.

Dissemination of Research

Our research publications are available via our web site <http://bmocapitalmarkets.com>. Institutional clients may also receive our research via FIRST CALL Research Direct and Reuters. All of our research is made widely available at the same time to all BMO NB, BMO Capital Markets Corp. and BMO Nesbitt Burns Securities Ltd. client groups entitled to our research. Please contact your investment advisor or institutional salesperson for more information.

Additional Matters

TO U.S. RESIDENTS: BMO Capital Markets Corp. and/or BMO Nesbitt Burns Securities Ltd., affiliates of BMO NB, furnish this report to U.S. residents and accept responsibility for the contents herein, except to the extent that it refers to securities of Bank of Montreal. Any U.S. person wishing to effect transactions in any security discussed herein should do so through BMO Capital Markets Corp. and/or BMO Nesbitt Burns Securities Ltd.

TO U.K. RESIDENTS: The contents hereof are intended solely for the use of, and may only be issued or passed onto, persons described in part VI of the Financial Services and Markets Act 2000 (Financial Promotion) Order 2001.

BMO Nesbitt Burns Inc. and BMO Nesbitt Burns Ltée/Ltd. are Members of CIPF. BMO Capital Markets Corp. and BMO Nesbitt Burns Securities Ltd. are Members of SIPC.

"BMO Capital Markets" is a trade-mark of Bank of Montreal, used under licence.

"BMO (M-Bar roundel symbol)" is a registered trade-mark of Bank of Montreal, used under licence.

Capital Budget Approved and 2007 Rate Application Filed

Impact

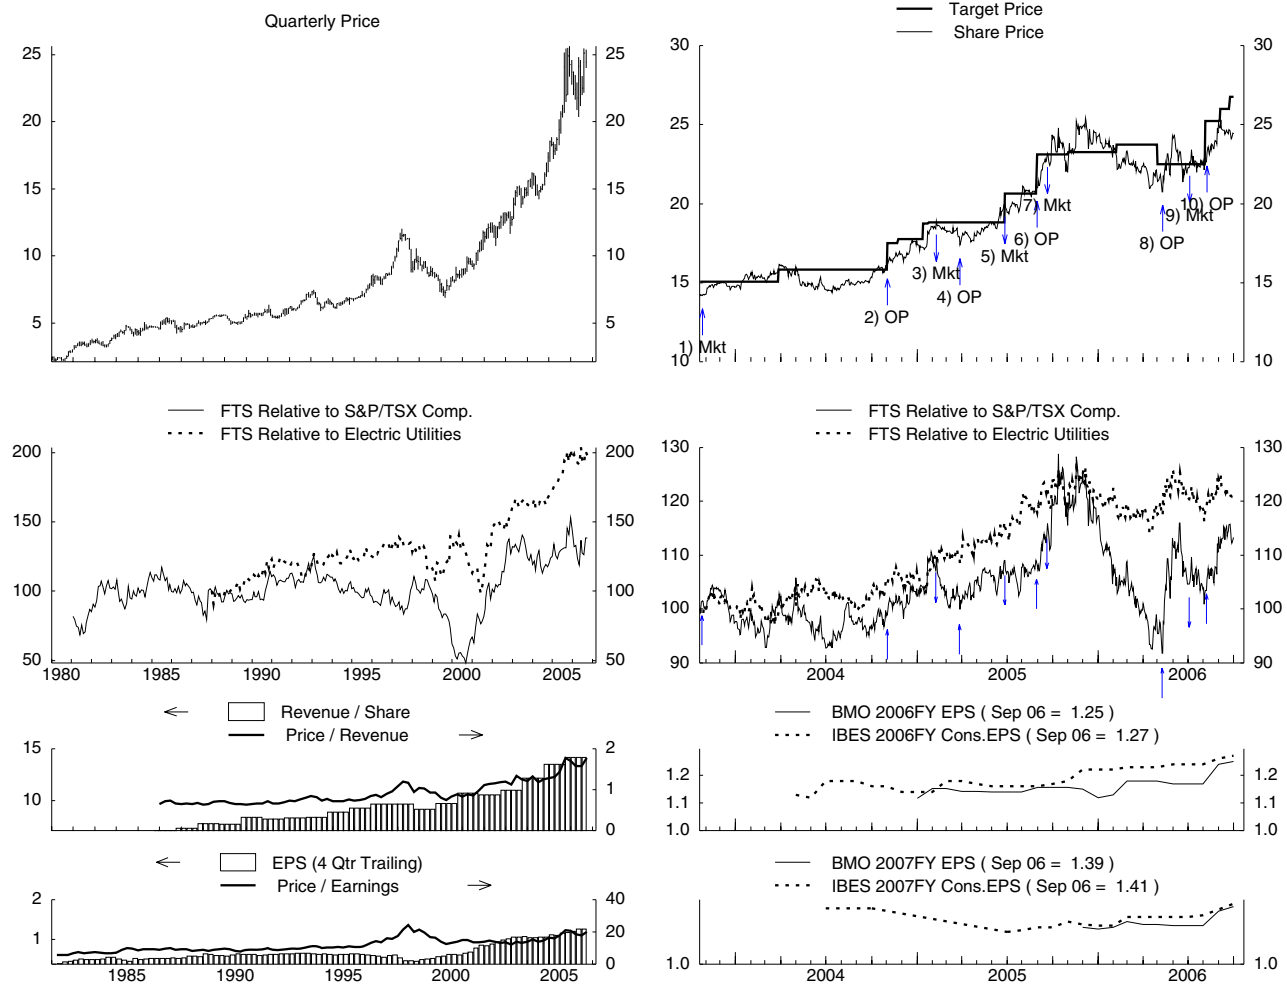

Neutral

Details & Analysis

On September 29, FortisBC Inc. (100% - Fortis Inc.) announced that it has filed an application with the British Columbia Utilities Commission to set customer electricity rates for 2007. The company is seeking a 2.9% rate increase, effective January 1, 2007. The multi-year performance based incentive regulation model approved for 2006 was used to calculate the proposed rate increase. We have not yet reviewed this application. Newfoundland Power (100% - Fortis Inc.) has announced that its 2007 Capital Budget of \$62 million has been approved by the Newfoundland and Labrador Board of Commissioners of Public Utilities. The capital budget is consistent with our outlook for Newfoundland Power and is fully reflected in our 2007 estimates. No change in view. We rate the shares of Fortis Inc. Outperform.

This report was prepared by an Analyst employed by a Canadian affiliate, BMO Nesbitt Burns Inc., and who is not registered/qualified as a research analyst under NYSE/NASD rules. For disclosure statements, including the Analyst's Certification, please refer to pages 2 to 4.

FortisBC Files for 2.9% Rate Increase; Outperform Rating Unchanged

Event

On September 29, FortisBC (100% - Fortis Inc.) filed a Preliminary 2007 Revenue Requirements application with the British Columbia Utilities Commission. The application was filed pursuant to the previously approved Performance Based Regulation (PBR) Settlement for the years 2007 to 2009, inclusively. The utility is also seeking to address the filing via the Commission's Negotiated Settlement Process. The application stipulates that the prime components of the requested rate increase include: (i) the increased cost of financing a growing rate base (2.4% increase); (ii) increased power purchase costs (1.8% increase); and (iii) slightly higher operating costs (0.3%), offset by: (i) lower income tax expense due to timing differences and lower water fees (reduction of 1.1%); and (ii) incentive flow-through adjustments from the PBR (reduction of 0.5%).

Impact

Neutral.

Forecasts

We have updated our financial model to reflect the application. In particular, we have updated our outlook to reflect the reorganization of FortisBC and Princeton Light and Power Company, Limited. Our fiscal 2006 diluted EPS estimate is unchanged at \$1.25, but our diluted 2007E EPS declines marginally to \$1.38 from \$1.39. Key metrics in the application include mid-year rate base of \$771.3 million and capital expenditures of \$128.5 million. We note that our estimates are likely to be subject to a further change once the ROE is set for 2007 in early December 2006.

Valuation

Our target price reflects a weighted average valuation approach: 17x 2007E diluted EPS of \$1.38 (12.5%), 2.0x 2007E BV of \$13.07 (12.5%), and a target yield of 2.85% (75%), assuming 2007 dividends of \$0.78 per share.

Recommendation

We believe that the shares are attractively valued. Our rating is Outperform.

Company Risk Disclosure

In addition to the risks involved in investing in common stocks generally, we also highlight the following risks that pertain to this company. Operations are subject to complex regulation by a variety of provincial, state and federal (Canada, Cayman Islands & Belize) agencies. Changes in regulation may adversely affect performance.

Financial performance is dependent upon the availability of installed generation and the production of electric power by third parties. Fortis Properties' cash flow is dependent on hotel room vacancy rates and commercial building occupancy levels. The Company's operations in Belize may be disrupted and assets may be damaged by hurricanes and/or tropical storms.

Analyst's Certification

I, Karen Taylor, CFA, hereby certify that the views expressed in this report accurately reflect my personal views about the subject securities or issuers. I also certify that no part of my compensation was, is, or will be, directly or indirectly, related to the specific recommendations or views expressed in this report.

General Disclosure

The information and opinions in this report were prepared by BMO Nesbitt Burns Inc. and BMO Nesbitt Burns Ltée./Ltd., collectively ("BMO NB"). BMO NB is not subject to U.S. rules with regard to the preparation of research reports and the independence of analysts. "BMO Capital Markets" is a trade name used by the BMO Investment Banking Group, which includes the wholesale/institutional arms of Bank of Montreal and BMO NB in Canada, and BMO Capital Markets Corp. in the U.S. BMO Capital Markets Corp. is an affiliate of BMO NB. BMO NB and BMO Capital Markets Corp. are subsidiaries of Bank of Montreal. Bank of Montreal or its affiliates ("BMO Financial Group") has lending arrangements with, or provide other remunerated services to, many issuers covered by BMO NB research. A significant lending relationship may exist between BMO Financial Group and certain of the issuers mentioned herein. The reader should assume that BMO NB, BMO Capital Markets Corp., Bank of Montreal or their affiliates may have a conflict of interest and should not rely solely on this report in evaluating whether or not to buy or sell securities of issuers discussed herein. The opinions, estimates and projections contained in this report are those of BMO NB as of the date of this report and are subject to change without notice. BMO NB endeavours to ensure that the contents have been compiled or derived from sources that we believe are reliable and contain information and opinions that are accurate and complete. However, BMO NB makes no representation or warranty, express or implied, in respect thereof, takes no responsibility for any errors and omissions contained herein and accepts no liability whatsoever for any loss arising from any use of, or reliance on, this report or its contents. Information may be available to BMO NB or its affiliates that is not reflected in this report. The information in this report is not intended to be used as the primary basis of investment decisions, and because of individual client objectives, should not be construed as advice designed to meet the particular investment needs of any investor. This material is for information purposes only and is not an offer to sell or the solicitation of an offer to buy any security. The research analyst and/or associates who prepared this report are compensated based upon (among other factors) the overall profitability of BMO NB and its affiliates, which includes the overall profitability of investment banking services. BMO NB, or its affiliates expect to receive or will seek compensation for investment banking services within the next 3 months from all issuers covered by BMO NB. BMO NB or its affiliates will buy from or sell to customers the securities of issuers mentioned in this report on a principal basis. BMO NB or its affiliates, officers, directors or employees may have a long or short position in the securities discussed herein, related securities or in options, futures or other derivative instruments based thereon.

Company Specific Disclosure

Disclosure 9: BMO Capital Markets Corp. or an affiliate received compensation for products or services other than investment banking services within the past 12 months.

Disclosure 10: This issuer is a client (or was a client) of BMO NB, BMO Capital Markets Corp. or an affiliate within the past 12 months: Non-Securities Related Services.

Distribution of Ratings

Rating Category	BMO Rating	BMO Universe	BMO I.B. Clients*	First Call Universe**
Buy	Outperform	38%	47%	49%
Hold	Market Perform	53%	47%	45%
Sell	Underperform	9%	6%	6%

* Reflects rating distribution of all companies where BMO Capital Markets has received compensation for Investment Banking services.

** Reflects rating distribution of all North American equity research analysts.

Ratings Key

We use the following ratings system definitions:

OP = Outperform - Forecast to outperform the market;
Mkt = Market Perform - Forecast to perform roughly in line with the market;
Und = Underperform - Forecast to underperform the market;
(S) = speculative investment;
NR = No rating at this time;
R = Restricted – Dissemination of research is currently restricted.

Market performance is measured by a benchmark index such as the S&P/TSX Composite Index, S&P 500, Nasdaq Composite, as appropriate for each company. Prior to September 1, 2003, a fourth rating tier—Top Pick—was used to designate those stocks we felt would be the best performers relative to the market. Our six Top 15 lists which guide investors to our best ideas according to six different objectives (large, small, growth, value, income and quantitative) have replaced the Top Pick rating.

Dissemination of Research

Our research publications are available via our web site <http://bmocapitalmarkets.com>. Institutional clients may also receive our research via FIRST CALL Research Direct and Reuters. All of our research is made widely available at the same time to all BMO NB, BMO Capital Markets Corp. and BMO Nesbitt Burns Securities Ltd. client groups entitled to our research. Please contact your investment advisor or institutional salesperson for more information.

Additional Matters

TO U.S. RESIDENTS: BMO Capital Markets Corp. and/or BMO Nesbitt Burns Securities Ltd., affiliates of BMO NB, furnish this report to U.S. residents and accept responsibility for the contents herein, except to the extent that it refers to securities of Bank of Montreal. Any U.S. person wishing to effect transactions in any security discussed herein should do so through BMO Capital Markets Corp. and/or BMO Nesbitt Burns Securities Ltd.

TO U.K. RESIDENTS: The contents hereof are intended solely for the use of, and may only be issued or passed onto, persons described in part VI of the Financial Services and Markets Act 2000 (Financial Promotion) Order 2001.

BMO Nesbitt Burns Inc. and BMO Nesbitt Burns Ltée/Ltd. are Members of CIPF. BMO Capital Markets Corp. and BMO Nesbitt Burns Securities Ltd. are Members of SIPC.

"BMO Capital Markets" is a trade-mark of Bank of Montreal, used under licence.

"BMO (M-Bar roundel symbol)" is a registered trade-mark of Bank of Montreal, used under licence.

Fortis Inc.

(FTS-TSX)

Stock Rating: Outperform
Industry Rating: Market Perform

Hotel Acquisition Consistent with Strategy; Outperform Rating Maintained

Event

Fortis Properties (100% - Fortis Inc.) has announced that it has agreed to acquire four internationally branded hotel properties in Alberta and British Columbia from Lodge Motel (Kelowna) Ltd. for \$51.6 million, including \$16 million of assumed debt. The transaction reflects a cap rate of approximately 10x and is consistent with the average cap rate of 9.8x observed on 49 sales transactions year to date for hotel properties of similar quality and size. The transaction is expected to close on October 31, 2006.

Impact

Neutral. The transaction is consistent with Fortis' stated strategy for its properties division: (i) maintain a portfolio that is approximately 10–15% of the company's total assets; (ii) "follow" the regulated utility operations; (iii) acquire mid-market hospitality assets; (iv) focus on smaller centres; and (v) enhance corporate tax efficiency. Tables 1 and 2 highlight Fortis' commercial and hospitality portfolio, as at October 2006.

Forecasts

Our diluted 2006 EPS estimate of \$1.25 is unchanged. Our diluted 2007 EPS estimate increases by \$0.01 per share to \$1.39. We have updated our financial model to reflect this transaction and have assumed: (i) a target capital structure of 65% debt and 35% equity; and (ii) target return on equity of 10%.

Valuation

Our target price reflects a weighted average valuation approach: 17x 2007E diluted EPS of \$1.39 (12.5%), 2.0x 2007E BV of \$13.08 (12.5%), and a target yield of 2.85% (75%), assuming 2007 dividends per share of \$0.78.

Recommendation

We believe that the shares are attractively valued at current levels. Our rating is Outperform.

Company Risk Disclosure

In addition to the risks involved in investing in common stocks generally, we also highlight the following risks that pertain to this company. Operations are subject to complex regulation by a variety of provincial, state and federal (Canada, Cayman Islands & Belize) agencies. Changes in regulation may adversely affect performance.

Financial performance is dependent upon the availability of installed generation and the production of electric power by third parties. Fortis Properties' cash flow is dependent on hotel room vacancy rates and commercial building occupancy levels. The Company's operations in Belize may be disrupted and assets may be damaged by hurricanes and/or tropical storms.

Analyst's Certification

I, Karen Taylor, CFA, hereby certify that the views expressed in this report accurately reflect my personal views about the subject securities or issuers. I also certify that no part of my compensation was, is, or will be, directly or indirectly, related to the specific recommendations or views expressed in this report.

General Disclosure

The information and opinions in this report were prepared by BMO Nesbitt Burns Inc. and BMO Nesbitt Burns Ltée./Ltd., collectively ("BMO NB"). BMO NB is not subject to U.S. rules with regard to the preparation of research reports and the independence of analysts. "BMO Capital Markets" is a trade name used by the BMO Investment Banking Group, which includes the wholesale/institutional arms of Bank of Montreal and BMO NB in Canada, and BMO Capital Markets Corp. in the U.S. BMO Capital Markets Corp. is an affiliate of BMO NB. BMO NB and BMO Capital Markets Corp. are subsidiaries of Bank of Montreal. Bank of Montreal or its affiliates ("BMO Financial Group") has lending arrangements with, or provide other remunerated services to, many issuers covered by BMO NB research. A significant lending relationship may exist between BMO Financial Group and certain of the issuers mentioned herein. The reader should assume that BMO NB, BMO Capital Markets Corp., Bank of Montreal or their affiliates may have a conflict of interest and should not rely solely on this report in evaluating whether or not to buy or sell securities of issuers discussed herein. The opinions, estimates and projections contained in this report are those of BMO NB as of the date of this report and are subject to change without notice. BMO NB endeavours to ensure that the contents have been compiled or derived from sources that we believe are reliable and contain information and opinions that are accurate and complete. However, BMO NB makes no representation or warranty, express or implied, in respect thereof, takes no responsibility for any errors and omissions contained herein and accepts no liability whatsoever for any loss arising from any use of, or reliance on, this report or its contents. Information may be available to BMO NB or its affiliates that is not reflected in this report. The information in this report is not intended to be used as the primary basis of investment decisions, and because of individual client objectives, should not be construed as advice designed to meet the particular investment needs of any investor. This material is for information purposes only and is not an offer to sell or the solicitation of an offer to buy any security. The research analyst and/or associates who prepared this report are compensated based upon (among other factors) the overall profitability of BMO NB and its affiliates, which includes the overall profitability of investment banking services. BMO NB, or its affiliates expect to receive or will seek compensation for investment banking services within the next 3 months from all issuers covered by BMO NB. BMO NB or its affiliates will buy from or sell to customers the securities of issuers mentioned in this report on a principal basis. BMO NB or its affiliates, officers, directors or employees may have a long or short position in the securities discussed herein, related securities or in options, futures or other derivative instruments based thereon.

Company Specific Disclosure

Disclosure 2: BMO NB has undertaken an underwriting liability with respect to this issuer within the past 12 months.

Disclosure 3: BMO NB has provided investment banking services with respect to this issuer within the past 12 months.

Disclosure 7: BMO Capital Markets Corp. or an affiliate has received compensation for investment banking services from this issuer within the **past 12 months**.

Disclosure 9: BMO Capital Markets Corp. or an affiliate received compensation for products or services other than investment banking services within the past 12 months.

Disclosure 10: This issuer is a client (or was a client) of BMO NB, BMO Capital Markets Corp. or an affiliate within the past 12 months: Investment Banking Services & Non-Securities Related Services.

Ratings Key

We use the following ratings system definitions:

OP = Outperform - Forecast to outperform the market;

Mkt = Market Perform - Forecast to perform roughly in line with the market;

Und = Underperform - Forecast to underperform the market;

(S) = speculative investment;

NR = No rating at this time;

R = Restricted – Dissemination of research is currently restricted.

Market performance is measured by a benchmark index such as the S&P/TSX Composite Index, S&P 500, Nasdaq Composite, as appropriate for each company. Prior to September 1, 2003, a fourth rating tier—Top Pick—was used to designate those stocks we felt would be the best performers relative to the market. Our six Top 15 lists which guide investors to our best ideas according to six different objectives (large, small, growth, value, income and quantitative) have replaced the Top Pick rating.

Dissemination of Research

Our research publications are available via our web site <http://bmocapitalmarkets.com>. Institutional clients may also receive our research via FIRST CALL Research Direct and Reuters. All of our research is made widely available at the same time to all BMO NB, BMO Capital Markets Corp. and BMO Nesbitt Burns Securities Ltd. client groups entitled to our research. Please contact your investment advisor or institutional salesperson for more information.

Q3/06 Higher than Expected

Impact

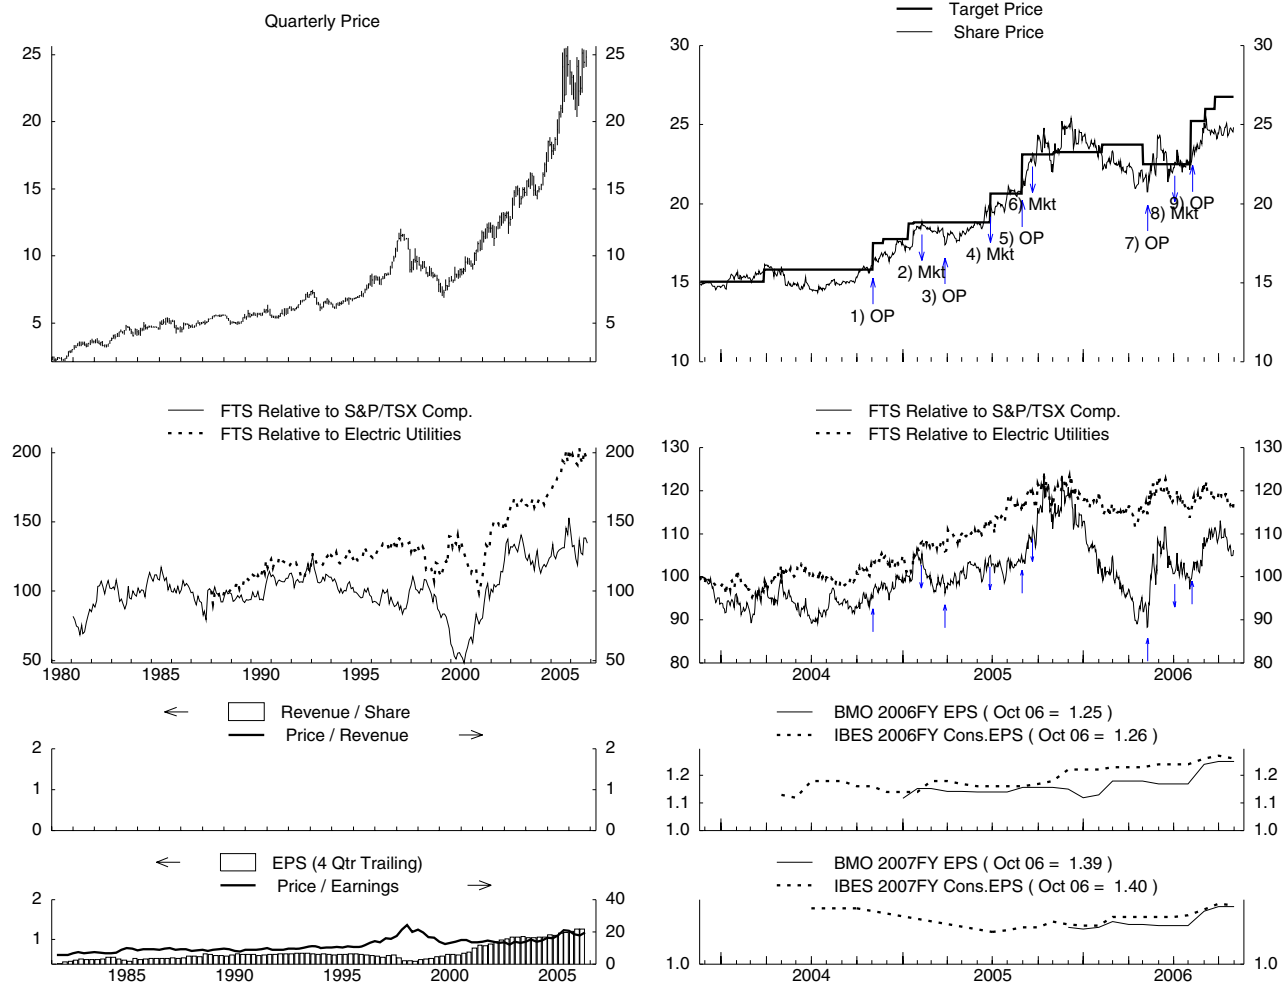

Positive

Details & Analysis

Fortis Inc. reported Q3/06 EPS of \$0.37 versus our estimate of \$0.31. The variance between actual and estimated performance appears to be attributable to: (i) higher than expected contribution at FortisAlberta, arising from continued customer growth and higher facilities additions; and (ii) higher segment contribution from Fortis Generation due to stronger than anticipated production at the Mollejon and Chalillo generation stations from higher levels of rainfall. Our financial model reflects the completion of and commercial production associated with the Chalillo storage facility. There do not appear to be any material one-time items during the quarter. We continue to review the comprehensive release. We continue to rate the shares of Fortis Inc. Outperform.

This report was prepared by an Analyst employed by a Canadian affiliate, BMO Nesbitt Burns Inc., and who is not registered/qualified as a research analyst under NYSE/NASD rules. For disclosure statements, including the Analyst's Certification, please refer to pages 2 to 4.

FortisAB Drives Q3/06 EPS; Outperform Rating Unchanged

Event

Fortis Inc. reported Q3/06 EPS of \$0.37 versus our estimate of \$0.31 per share. The variance between actual and estimated performance is largely attributable to: (i) higher than expected contribution from FortisAlberta, due to lower than expected income taxes not otherwise contemplated in the utility's negotiated settlement agreement approved by the Alberta Energy and Utilities Board on June 29 for 2006/07 distribution tariffs; and (ii) higher segment contribution from Fortis Generation due to stronger than anticipated production at the Mollejon and Chalillo generation stations.

Impact

Slightly positive.

Forecasts

We have revised our 2006 diluted EPS estimates to reflect: (i) estimated annual electricity production of 155 GWh from the hydroelectric assets in Belize versus our previous assumption of 147 GWh; and (ii) reduced the cash taxes payable by FortisAlberta to a net credit of approximately \$6.5 million, the bulk of which accrues to shareholders in 2006. We do not assume that taxation benefits are recurring in 2007. Our diluted 2006E EPS increases to \$1.28 versus \$1.25 previously and our diluted 2007 EPS estimate increases marginally to \$1.40 versus \$1.39 previously.

Valuation

Our target price of \$26.75 reflects a weighted valuation approach: 17x 2007E EPs of \$1.40 (12.5%), 2.0x 2007E BV of \$13.13 (12.5%), and a target yield of 2.85% (75%), assuming 2007 dividends per share of \$0.78.

Recommendation

We believe that the shares are attractively valued at current levels. Our rating is Outperform.

Details & Analysis

Fortis Inc. reported Q3/06 EPS of \$0.37 versus our estimate of \$0.31 per share. The variance between actual and estimated performance is largely attributable to: (i) higher than expected contribution from FortisAlberta, due to lower than expected income taxes not otherwise contemplated in the utility's negotiated settlement agreement approved by the Alberta Energy and Utilities Board on June 29 for 2006/07 distribution tariffs; and (ii) higher segment contribution from Fortis Generation due to stronger than anticipated production at the Mollejon and Chalillo generation stations.

As illustrated in Table 1, segment quarterly performance has been normalized for one-time items, including taxation benefits arising from lower taxation rates and non-cash foreign exchange gains and losses. With the exception of the lower than expected effective taxation rate at FortisAlberta, as set out below, there were no material one-time items or adjustments in Q3/06 results.

Source: Company Reports, BMO Capital Markets

We believe that the following points are relevant about quarterly performance:

- The contribution from Newfoundland Power continues to reflect the timing issues associated with the transition to recording revenue on the accrual basis in 2006. In the first half of 2006, earnings were reduced by approximately \$5.6 million. In Q3/06, earnings increased by approximately \$0.2 million versus Q3/05. According to the company's Q3/06 release, the adoption of the accrual method for revenue recognition will not have a material impact on annual earnings as Q4/06 earnings are expected to offset the net \$5.4 million year-to-date decrease in earnings.
- The contribution from FortisAlberta is much higher than expected, reflecting year-to-date taxation recoveries of \$5.7 million and recoveries of \$1.2 million in Q3/06. Lower than expected cash taxes payable arises from timing issues associated with the accrual of flow through costs and the use of tax deductions in addition to those contemplated in the Negotiated Settlement Agreement that substantially reduced cash taxes payable in 2006 and 2007 and thus reduced the associated revenue requirements in those years. We do not expect that a majority of these further tax deductions will be

sustainable beyond 2006 and have not factored such credits into our estimated contribution from FortisAlberta in 2007.

- As highlighted in Table 2, a return to normal hydrological conditions in Belize resulted in a substantial increase in hydroelectric energy production from the 25 MW Mollejon and the 7.3 MW Chalillo hydroelectric facilities. We have increased the assumed production from the combined facilities over the forecast period. We now assume annual production of approximately 155 GWh versus 147 GWh previously. We note that the storage reservoir constructed in conjunction with Chalillo represents approximately 45 GWh of production when the reservoir is at full supply level.

Estimates

We have revised our 2006 diluted EPS estimates to reflect: (i) estimated annual electricity production of 155 GWh from the hydroelectric assets in Belize versus our previous assumption of 147 GWh; and (ii) reduced the cash taxes payable by FortisAlberta to a net credit of approximately \$6.5 million, the bulk of which accrues to shareholders in 2006. We do not assume that taxation benefits are recurring in 2007. Our diluted 2006E EPS increases to \$1.28

versus \$1.25 previously and our diluted 2007 EPS estimate increases marginally to \$1.40 versus \$1.39 previously.

Valuation

Our target price of \$26.75 reflects a weighted valuation approach: 17x 2007E EPs of \$1.40 (12.5%), 2.0x 2007E BV of \$13.13 (12.5%), and a target yield of 2.85% (75%), assuming 2007 dividends per share of \$0.78.

Recommendation

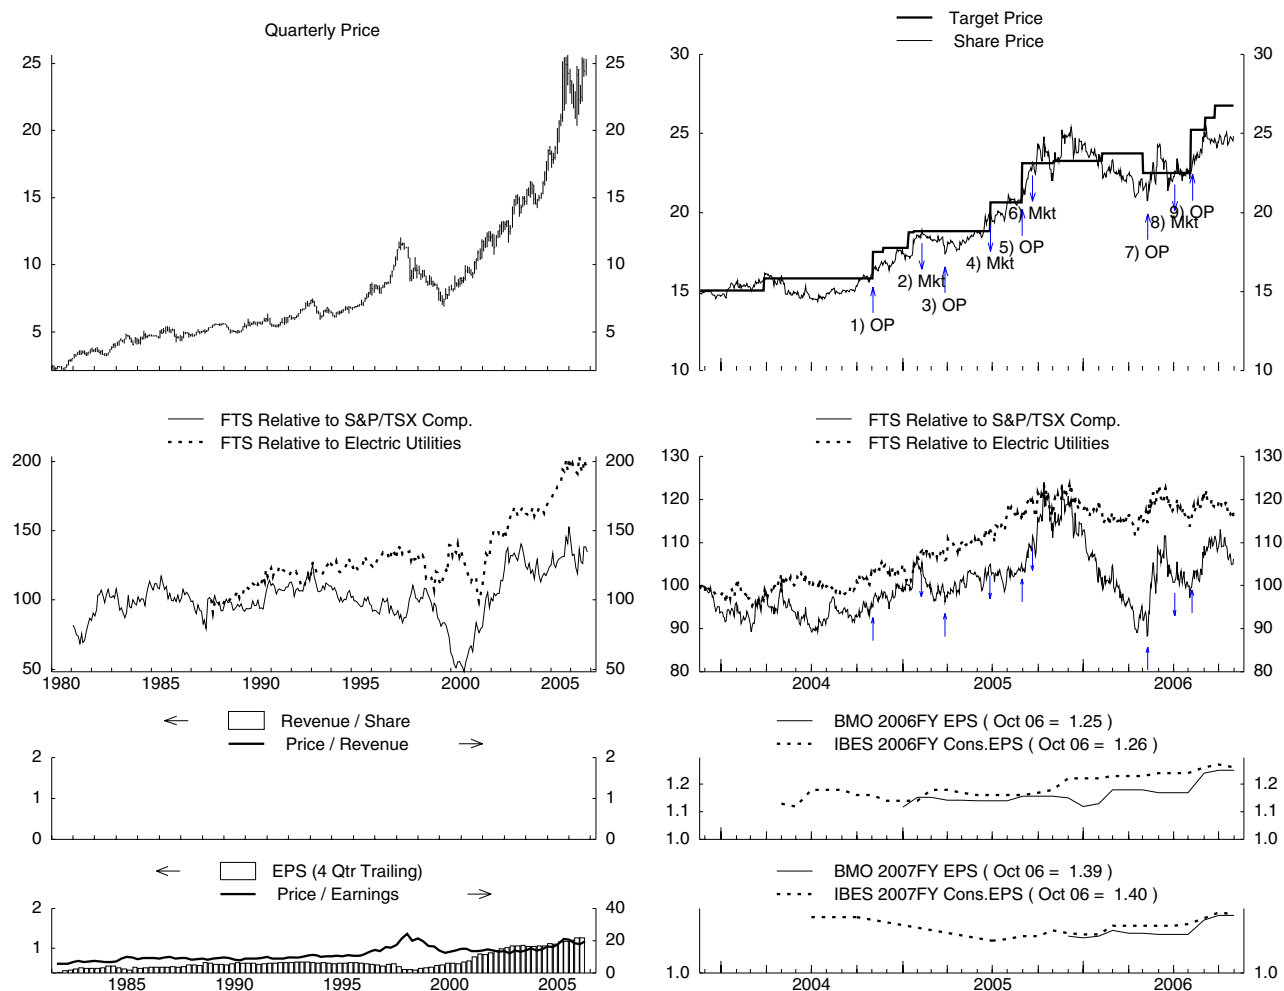

We believe that the shares are attractively valued at current levels. Our rating is Outperform.

Company Risk Disclosure

In addition to the risks involved in investing in common stocks generally, we also highlight the following risks that pertain to this company. Operations are subject to complex regulation by a variety of provincial, state and federal (Canada, Cayman Islands & Belize) agencies. Changes in regulation may adversely affect performance.

Financial performance is dependent upon the availability of installed generation and the production of electric power by third parties. Fortis Properties' cash flow is dependent on hotel room vacancy rates and commercial building occupancy levels. The Company's operations in Belize may be disrupted and assets may be damaged by hurricanes and/or tropical storms.

I, Karen Taylor, CFA, hereby certify that the views expressed in this report accurately reflect my personal views about the subject securities or issuers. I also certify that no part of my compensation was, is, or will be, directly or indirectly, related to the specific recommendations or views expressed in this report.

General Disclosure

The information and opinions in this report were prepared by BMO Nesbitt Burns Inc. and BMO Nesbitt Burns Ltée./Ltd., collectively ("BMO NB"). BMO NB is not subject to U.S. rules with regard to the preparation of research reports and the independence of analysts. "BMO Capital Markets" is a trade name used by the BMO Investment Banking Group, which includes the wholesale/institutional arms of Bank of Montreal and BMO NB in Canada, and BMO Capital Markets Corp. in the U.S. BMO Capital Markets Corp. is an affiliate of BMO NB. BMO NB and BMO Capital Markets Corp. are subsidiaries of Bank of Montreal. Bank of Montreal or its affiliates ("BMO Financial Group") has lending arrangements with, or provide other remunerated services to, many issuers covered by BMO NB research. A significant lending relationship may exist between BMO Financial Group and certain of the issuers mentioned herein. The reader should assume that BMO NB, BMO Capital Markets Corp., Bank of Montreal or their affiliates may have a conflict of interest and should not rely solely on this report in evaluating whether or not to buy or sell securities of issuers discussed herein. The opinions, estimates and projections contained in this report are those of BMO NB as of the date of this report and are subject to change without notice. BMO NB endeavours to ensure that the contents have been compiled or derived from sources that we believe are reliable and contain information and opinions that are accurate and complete. However, BMO NB makes no representation or warranty, express or implied, in respect thereof, takes no responsibility for any errors and omissions contained herein and accepts no liability whatsoever for any loss arising from any use of, or reliance on, this report or its contents. Information may be available to BMO NB or its affiliates that is not reflected in this report. The information in this report is not intended to be used as the primary basis of investment decisions, and because of individual client objectives, should not be construed as advice designed to meet the particular investment needs of any investor. This material is for information purposes only and is not an offer to sell or the solicitation of an offer to buy any security. The research analyst and/or associates who prepared this report are compensated based upon (among other factors) the overall profitability of BMO NB and its affiliates, which includes the overall profitability of investment banking services. BMO NB, or its affiliates expect to receive or will seek compensation for investment banking services within the next 3 months from all issuers covered by BMO NB. BMO NB or its affiliates will buy from or sell to customers the securities of issuers mentioned in this report on a principal basis. BMO NB or its affiliates, officers, directors or employees may have a long or short position in the securities discussed herein, related securities or in options, futures or other derivative instruments based thereon.

Company Specific Disclosure

Disclosure 2: BMO NB has undertaken an underwriting liability with respect to this issuer within the past 12 months.

Disclosure 3: BMO NB has provided investment banking services with respect to this issuer within the past 12 months.

Disclosure 7: BMO Capital Markets Corp. or an affiliate has received compensation for investment banking services from this issuer within the **past 12 months**.

Disclosure 9: BMO Capital Markets Corp. or an affiliate received compensation for products or services other than investment banking services within the past 12 months.

Disclosure 10: This issuer is a client (or was a client) of BMO NB, BMO Capital Markets Corp. or an affiliate within the past 12 months: Investment Banking Services & Non-Securities Related Services.

Distribution of Ratings

Rating Category	BMO Rating	BMO Universe	BMO I.B. Clients*	First Call Universe**
Buy	Outperform	38%	47%	49%
Hold	Market Perform	53%	47%	45%
Sell	Underperform	9%	6%	6%

* Reflects rating distribution of all companies where BMO Capital Markets has received compensation for Investment Banking services.

** Reflects rating distribution of all North American equity research analysts.

Ratings Key

We use the following ratings system definitions:

OP = Outperform - Forecast to outperform the market;

Mkt = Market Perform - Forecast to perform roughly in line with the market;

Und = Underperform - Forecast to underperform the market;

(S) = speculative investment;

NR = No rating at this time;

R = Restricted – Dissemination of research is currently restricted.

Market performance is measured by a benchmark index such as the S&P/TSX Composite Index, S&P 500, Nasdaq Composite, as appropriate for each company. Prior to September 1, 2003, a fourth rating tier—Top Pick—was used to designate those stocks we felt would be the best performers relative to the market. Our six Top 15 lists which guide investors to our best ideas according to six different objectives (large, small, growth, value, income and quantitative) have replaced the Top Pick rating.

Dissemination of Research

Our research publications are available via our web site <http://bmocapitalmarkets.com>. Institutional clients may also receive our research via FIRST CALL Research Direct and Reuters. All of our research is made widely available at the same time to all BMO NB, BMO Capital Markets Corp. and BMO Nesbitt Burns Securities Ltd. client groups entitled to our research. Please contact your investment advisor or institutional salesperson for more information.

Additional Matters

TO U.S. RESIDENTS: BMO Capital Markets Corp. and/or BMO Nesbitt Burns Securities Ltd., affiliates of BMO NB, furnish this report to U.S. residents and accept responsibility for the contents herein, except to the extent that it refers to securities of Bank of Montreal. Any U.S. person wishing to effect transactions in any security discussed herein should do so through BMO Capital Markets Corp. and/or BMO Nesbitt Burns Securities Ltd.

TO U.K. RESIDENTS: The contents hereof are intended solely for the use of, and may only be issued or passed onto, persons described in part VI of the Financial Services and Markets Act 2000 (Financial Promotion) Order 2001.

BMO Nesbitt Burns Inc. and BMO Nesbitt Burns Ltée/Ltd. are Members of CIPF. BMO Capital Markets Corp. and BMO Nesbitt Burns Securities Ltd. are Members of SIPC.

"BMO Capital Markets" is a trade-mark of Bank of Montreal, used under licence.

"BMO (M-Bar roundel symbol)" is a registered trade-mark of Bank of Montreal, used under licence.

Fortis Acquires an Additional Interest in Caribbean Utilities; Outperform Rating Unchanged

Event

Fortis Inc. and Caribbean Utilities have jointly announced that Fortis Inc. has acquired from International Power Holdings Ltd., and four other vendors associated with International Power, an additional 4.113116 million Class A common shares of Caribbean Utilities for US\$11.89 per share or approximately US\$48.9 million or C\$54.8 million. Fortis' interest in Caribbean Utilities is now approximately 54% versus approximately 38% previously. International Power Holdings has no remaining interest in Caribbean Utilities. Fortis also announced that it has issued US\$40 million of convertible debentures, bearing an interest rate of 5.5% and maturing November 7, 2016, to finance the acquisition of shares.

Impact

Slightly Positive. The acquisition of International Power Holdings' interest in Caribbean Utilities is in line with expectations. Over time, we expect that Fortis may acquire the remaining issued and outstanding Class A shares of Caribbean Utilities, via a public market tender process. We do not believe that this is likely to occur prior to the renewal of Caribbean Utilities' current operating licence, which expires in January 2011 and is currently subject to ongoing negotiations with the government to renew prior to expiry.

Forecasts

Our 2006 diluted EPS estimate of \$1.28 is unchanged; however, our diluted 2007 EPS estimate increases by \$0.02 per share to \$1.42.

Valuation

Our target price of \$27.00 reflects a weighted valuation approach: 17x diluted 2007E EPS of \$1.42 (12.5%), 2.0x 2007E BV of \$13.15 (12.5%), and a target yield of 2.85% (75%), assuming 2007 dividends per share of \$0.78.

Recommendation

We believe that the shares of Fortis Inc. are attractively valued. Our rating is Outperform.

Company Risk Disclosure

In addition to the risks involved in investing in common stocks generally, we also highlight the following risks that pertain to this company. Operations are subject to complex regulation by a variety of provincial, state and federal (Canada, Cayman Islands & Belize) agencies. Changes in regulation may adversely affect performance.

Financial performance is dependent upon the availability of installed generation and the production of electric power by third parties. Fortis Properties' cash flow is dependent on hotel room vacancy rates and commercial building occupancy levels. The Company's operations in Belize may be disrupted and assets may be damaged by hurricanes and/or tropical storms.

Analyst's Certification

I, Karen Taylor, CFA, hereby certify that the views expressed in this report accurately reflect my personal views about the subject securities or issuers. I also certify that no part of my compensation was, is, or will be, directly or indirectly, related to the specific recommendations or views expressed in this report.

General Disclosure

The information and opinions in this report were prepared by BMO Nesbitt Burns Inc. and BMO Nesbitt Burns Ltée./Ltd., collectively ("BMO NB"). BMO NB is not subject to U.S. rules with regard to the preparation of research reports and the independence of analysts. "BMO Capital Markets" is a trade name used by the BMO Investment Banking Group, which includes the wholesale/institutional arms of Bank of Montreal and BMO NB in Canada, and BMO Capital Markets Corp. in the U.S. BMO Capital Markets Corp. is an affiliate of BMO NB. BMO NB and BMO Capital Markets Corp. are subsidiaries of Bank of Montreal. Bank of Montreal or its affiliates ("BMO Financial Group") has lending arrangements with, or provide other remunerated services to, many issuers covered by BMO NB research. A significant lending relationship may exist between BMO Financial Group and certain of the issuers mentioned herein. The reader should assume that BMO NB, BMO Capital Markets Corp., Bank of Montreal or their affiliates may have a conflict of interest and should not rely solely on this report in evaluating whether or not to buy or sell securities of issuers discussed herein. The opinions, estimates and projections contained in this report are those of BMO NB as of the date of this report and are subject to change without notice. BMO NB endeavours to ensure that the contents have been compiled or derived from sources that we believe are reliable and contain information and opinions that are accurate and complete. However, BMO NB makes no representation or warranty, express or implied, in respect thereof, takes no responsibility for any errors and omissions contained herein and accepts no liability whatsoever for any loss arising from any use of, or reliance on, this report or its contents. Information may be available to BMO NB or its affiliates that is not reflected in this report. The information in this report is not intended to be used as the primary basis of investment decisions, and because of individual client objectives, should not be construed as advice designed to meet the particular investment needs of any investor. This material is for information purposes only and is not an offer to sell or the solicitation of an offer to buy any security. The research analyst and/or associates who prepared this report are compensated based upon (among other factors) the overall profitability of BMO NB and its affiliates, which includes the overall profitability of investment banking services. BMO NB, or its affiliates expect to receive or will seek compensation for investment banking services within the next 3 months from all issuers covered by BMO NB. BMO NB or its affiliates will buy from or sell to customers the securities of issuers mentioned in this report on a principal basis. BMO NB or its affiliates, officers, directors or employees may have a long or short position in the securities discussed herein, related securities or in options, futures or other derivative instruments based thereon.

Company Specific Disclosure

Disclosure 2: BMO NB has undertaken an underwriting liability with respect to this issuer within the past 12 months.

Disclosure 3: BMO NB has provided investment banking services with respect to this issuer within the past 12 months.

Disclosure 7: BMO Capital Markets Corp. or an affiliate has received compensation for investment banking services from this issuer within the **past 12 months**.

Distribution of Ratings

Rating Category	BMO Rating	BMO Universe	BMO I.B. Clients*	First Call Universe**
Buy	Outperform	38%	47%	49%
Hold	Market Perform	53%	47%	45%
Sell	Underperform	9%	6%	6%

* Reflects rating distribution of all companies where BMO Capital Markets has received compensation for Investment Banking services.

** Reflects rating distribution of all North American equity research analysts.

Ratings Key

We use the following ratings system definitions:

OP = Outperform - Forecast to outperform the market;

Mkt = Market Perform - Forecast to perform roughly in line with the market;

Und = Underperform - Forecast to underperform the market;

(S) = speculative investment;

NR = No rating at this time;

R = Restricted – Dissemination of research is currently restricted.

Market performance is measured by a benchmark index such as the S&P/TSX Composite Index, S&P 500, Nasdaq Composite, as appropriate for each company. Prior to September 1, 2003, a fourth rating tier—Top Pick—was used to designate those stocks we felt would be the best performers relative to the market. Our six Top 15 lists which guide investors to our best ideas according to six different objectives (large, small, growth, value, income and quantitative) have replaced the Top Pick rating.

Dissemination of Research

Our research publications are available via our web site <http://bmocapitalmarkets.com>. Institutional clients may also receive our research via FIRST CALL Research Direct and Reuters. All of our research is made widely available at the same time to all BMO NB, BMO Capital Markets Corp. and BMO Nesbitt Burns Securities Ltd. client groups entitled to our research. Please contact your investment advisor or institutional salesperson for more information.

Additional Matters

Fortis Inc. Increases Its investment in Caribbean Utilities

Impact

Neutral

Details & Analysis

Fortis Inc. today announced it has become the controlling shareholder in Grand Cayman Island-based Caribbean Utilities Company Ltd. Fortis increased its stake in the utility to 54% from 38%. The announcement is not surprising given Fortis had indicated its wish to grow its investments in the Caribbean region. The impact of the increased shareholding on Fortis' credit quality is neutral, with the US\$48.9 million acquisition small in relation to Fortis' financial position. Further, the acquisition is consistent with the risk profile of the company's existing scope of operations, and is merely an extension of the company's existing investment in, and influence on, Caribbean Utilities. Fortis also announced today that it has issued US\$40 million unsecured subordinated convertible debentures. The increased ownership of Caribbean Utilities follows Fortis' recently announced acquisition of hotels in British Columbia for \$51.6 million, and the US\$90 million acquisition of utilities in Turks & Caicos, which we also viewed as credit neutral. We do not expect today's announcements to impact Fortis's spreads or credit ratings. However, given Fortis' majority ownership and increased control of Caribbean Utilities as a result of the investment, it may have a negative impact on the rating of Caribbean Utilities by Standard & Poor (A/Negative). The current Standard & Poor's rating on Caribbean Utilities is based on the utility's stand-alone creditworthiness but may in the future be linked to its new, but lower rated controlling shareholder.

Analyst's Certification

I, Laurie Conheady, hereby certify that the views expressed in this report accurately reflect my personal views about the subject securities or issuers. I also certify that no part of my compensation was, is, or will be, directly or indirectly, related to the specific recommendations or views expressed in this report.

General Disclosure

The information and opinions in this report were prepared by BMO Nesbitt Burns Inc. and BMO Nesbitt Burns Ltée./Ltd., collectively ("BMO NB"). BMO NB is not subject to U.S. rules with regard to the preparation of research reports and the independence of analysts. "BMO Capital Markets" is a trade name used by the BMO Investment Banking Group, which includes the wholesale/institutional arms of Bank of Montreal and BMO NB in Canada, and BMO Capital Markets Corp. in the U.S. BMO Capital Markets Corp. is an affiliate of BMO NB. BMO NB and BMO Capital Markets Corp. are subsidiaries of Bank of Montreal. Bank of Montreal or its affiliates ("BMO Financial Group") has lending arrangements with, or provide other remunerated services to, many issuers covered by BMO NB research. A significant lending relationship may exist between BMO Financial Group and certain of the issuers mentioned herein. The reader should assume that BMO NB, BMO Capital Markets Corp., Bank of Montreal or their affiliates may have a conflict of interest and should not rely solely on this report in evaluating whether or not to buy or sell securities of issuers discussed herein. The opinions, estimates and projections contained in this report are those of BMO NB as of the date of this report and are subject to change without notice. BMO NB endeavours to ensure that the contents have been compiled or derived from sources that we believe are reliable and contain information and opinions that are accurate and complete. However, BMO NB makes no representation or warranty, express or implied, in respect thereof, takes no responsibility for any errors and omissions contained herein and accepts no liability whatsoever for any loss arising from any use of, or reliance on, this report or its contents. Information may be available to BMO NB or its affiliates that is not reflected in this report. The information in this report is not intended to be used as the primary basis of investment decisions, and because of individual client objectives, should not be construed as advice designed to meet the particular investment needs of any investor. This material is for information purposes only and is not an offer to sell or the solicitation of an offer to buy any security. The research analyst and/or associates who prepared this report are compensated based upon (among other factors) the overall profitability of BMO NB and its affiliates, which includes the overall profitability of investment banking services. BMO NB, or its affiliates expect to receive or will seek compensation for investment banking services within the next 3 months from all issuers covered by BMO NB. BMO NB or its affiliates will buy from or sell to customers the securities of issuers mentioned in this report on a principal basis. BMO NB or its affiliates, officers, directors or employees may have a long or short position in the securities discussed herein, related securities or in options, futures or other derivative instruments based thereon.

2007 ROE at Newfoundland Power; Outperform Rating Unchanged

Event

Newfoundland Power (100% - Fortis Inc.) has announced that its allowed return on equity for 2007 is expected to be 8.60% versus 9.24% in 2006. In 2003, the Board of Commissioners of Public Utilities authorized the use of an automatic adjustment mechanism for a three-year period ending 2007. Pursuant to the formula, a return on rate base range is established and the allowed rate of equity return changes only if the return on rate base calculated for the prospective year is outside of the previously approved range. In 2006, the Board approved a rate of return on rate base of 8.68% in a range of 8.50% to 8.86%, and authorized the continued use of the customer rates approved for 2005 (including a return on equity of 9.24%). The filed rate of return on rate base for 2007 is 8.47%, outside of the previously approved range. The 2007 return on rate base reflects a return on equity of 8.60%.

Impact

Neutral. 2007 allowed ROE across utility jurisdictions are expected to decline in 2007 versus 2006. 2007 Allowed ROEs are expected to be released over the next three weeks, by the various federal and provincial regulators.

Forecasts

Our 2006 diluted EPS estimate of \$1.28 is unchanged. Our 2007 diluted EPS estimate declines marginally to \$1.41 from \$1.42.

Valuation

Our target price reflects a weighted valuation approach: 17x diluted 2008 EPS of \$1.50 (12.5%), 2.0x 2008E BV of \$13.80 (12.5%), and a target yield of 3.00% (75%), assuming 2008 dividends per share of \$0.90.

Recommendation

We believe that the shares are attractively priced at current levels. Our rating is Outperform.

Company Risk Disclosure

In addition to the risks involved in investing in common stocks generally, we also highlight the following risks that pertain to this company. Operations are subject to complex regulation by a variety of provincial, state and federal (Canada, Cayman Islands & Belize) agencies. Changes in regulation may adversely affect performance.

Financial performance is dependent upon the availability of installed generation and the production of electric power by third parties. Fortis Properties' cash flow is dependent on hotel room vacancy rates and commercial building occupancy levels. The Company's operations in Belize may be disrupted and assets may be damaged by hurricanes and/or tropical storms.

The information in this report is not intended to be used as the primary basis of investment decisions, and because of individual client objectives, should not be construed as advice designed to meet the particular investment needs of any investor. This material is for information purposes only and is not an offer to sell or the solicitation of an offer to buy any security. The research analyst and/or associates who prepared this report are compensated based upon (among other factors) the overall profitability of BMO NB and its affiliates, which includes the overall profitability of investment banking services. BMO NB, or its affiliates expect to receive or will seek compensation for investment banking services within the next 3 months from all issuers covered by BMO NB. BMO NB or its affiliates will buy from or sell to customers the securities of issuers mentioned in this report on a principal basis. BMO NB or its affiliates, officers, directors or employees may have a long or short position in the securities discussed herein, related securities or in options, futures or other derivative instruments based thereon.

Company Specific Disclosure

Disclosure 2: BMO NB has undertaken an underwriting liability with respect to this issuer within the past 12 months.

Disclosure 3: BMO NB has provided investment banking services with respect to this issuer within the past 12 months.

Disclosure 7: BMO Capital Markets Corp. or an affiliate has received compensation for investment banking services from this issuer within the **past 12 months**.

Disclosure 9: BMO Capital Markets Corp. or an affiliate received compensation for products or services other than investment banking services within the past 12 months.

Disclosure 10: This issuer is a client (or was a client) of BMO NB, BMO Capital Markets Corp. or an affiliate within the past 12 months: Investment Banking Services & Non-Securities Related Services.

Distribution of Ratings

Rating Category	BMO Rating	BMO Universe	BMO I.B. Clients*	First Call Universe**
Buy	Outperform	38%	47%	49%
Hold	Market Perform	53%	47%	45%
Sell	Underperform	9%	6%	6%

* Reflects rating distribution of all companies where BMO Capital Markets has received compensation for Investment Banking services.

** Reflects rating distribution of all North American equity research analysts.

Ratings Key

We use the following ratings system definitions:

OP = Outperform - Forecast to outperform the market;

Mkt = Market Perform - Forecast to perform roughly in line with the market;

Und = Underperform - Forecast to underperform the market;

(S) = speculative investment;

NR = No rating at this time;

R = Restricted – Dissemination of research is currently restricted.

Market performance is measured by a benchmark index such as the S&P/TSX Composite Index, S&P 500, Nasdaq Composite, as appropriate for each company. Prior to September 1, 2003, a fourth rating tier—Top Pick—was used to designate those stocks we felt would be the best performers relative to the market. Our six Top 15 lists which guide investors to our best ideas according to six different objectives (large, small, growth, value, income and quantitative) have replaced the Top Pick rating.

Dissemination of Research

Our research publications are available via our web site <http://bmocapitalmarkets.com>. Institutional clients may also receive our research via FIRST CALL Research Direct and Reuters. All of our research is made widely available at the same time to all BMO NB, BMO Capital Markets Corp. and BMO Nesbitt Burns Securities Ltd. client groups entitled to our research. Please contact your investment advisor or institutional salesperson for more information.

BCUC Releases 2007 ROE; Rating Lowered to Market Perform

Event

On November 23, the British Columbia Utilities Commission (BCUC) released its return on common equity for a low-risk benchmark utility for the year 2007. The low-risk return is 8.37% for 2007 versus 8.80% in 2006. The operations of FortisBC earn the benchmark return of 8.37% plus a 0.40% premium, or 8.77% in 2007 versus 9.20% in 2006. We note that the operations of FortisAlberta are subject to a similar automatic adjustment mechanism, and we expect the Alberta Energy and Utilities Board to release its 2007 return on equity the week of November 27.

Impact

Neutral. While we believe that the return on equity determined by the automatic adjustment mechanism currently used by the BCUC likely violates the fair return standard and is confiscatory, it is in line with expectations and is therefore neutral to our outlook.

Forecasts

Our 2007 and 2008 diluted EPS estimates decline by \$0.01 to \$1.40 and \$1.49, respectively.

Valuation

Our target price reflects a weighted valuation approach: 17x diluted 2008E EPS of \$1.49 (12.5%), 2x 2008E BV per share of \$13.77 (12.5%), and a target yield of 3% (75%), assuming 2008E dividends per share of \$0.90.

Recommendation

We believe that the shares are reasonably valued at current levels. Our rating is Market Perform.

Company Risk Disclosure

In addition to the risks involved in investing in common stocks generally, we also highlight the following risks that pertain to this company. Operations are subject to complex regulation by a variety of provincial, state and federal (Canada, Cayman Islands & Belize) agencies. Changes in regulation may adversely affect performance.

Financial performance is dependent upon the availability of installed generation and the production of electric power by third parties. Fortis Properties' cash flow is dependent on hotel room vacancy rates and commercial building occupancy levels. The Company's operations in Belize may be disrupted and assets may be damaged by hurricanes and/or tropical storms.

Analyst's Certification

I, Karen Taylor, CFA, hereby certify that the views expressed in this report accurately reflect my personal views about the subject securities or issuers. I also certify that no part of my compensation was, is, or will be, directly or indirectly, related to the specific recommendations or views expressed in this report.

General Disclosure

The information and opinions in this report were prepared by BMO Nesbitt Burns Inc. and BMO Nesbitt Burns Ltée./Ltd., collectively ("BMO NB"). BMO NB is not subject to U.S. rules with regard to the preparation of research reports and the independence of analysts. "BMO Capital Markets" is a trade name used by the BMO Investment Banking Group, which includes the wholesale/institutional arms of Bank of Montreal and BMO NB in Canada, and BMO Capital Markets Corp. in the U.S. BMO Capital Markets Corp. is an affiliate of BMO NB. BMO NB and BMO Capital Markets Corp. are subsidiaries of Bank of Montreal. Bank of Montreal or its affiliates ("BMO Financial Group") has lending arrangements with, or provide other remunerated services to, many issuers covered by BMO NB research. A significant lending relationship may exist between BMO Financial Group and certain of the issuers mentioned herein. The reader should assume that BMO NB, BMO Capital Markets Corp., Bank of Montreal or their affiliates may have a conflict of interest and should not rely solely on this report in evaluating whether or not to buy or sell securities of issuers discussed herein. The opinions, estimates and projections contained in this report are those of BMO NB as of the date of this report and are subject to change without notice. BMO NB endeavours to ensure that the contents have been compiled or derived from sources that we believe are reliable and contain information and opinions that are accurate and complete. Disclosure 10: This issuer is a client (or was a client) of BMO NB, BMO Capital Markets Corp. or an affiliate within the past 12 months: Investment Banking Services & Non-Securities Related Services.

Distribution of Ratings

Rating Category	BMO Rating	BMO Universe	BMO I.B. Clients*	First Call Universe**
Buy	Outperform	38%	47%	49%
Hold	Market Perform	53%	47%	45%
Sell	Underperform	9%	6%	6%

* Reflects rating distribution of all companies where BMO Capital Markets has received compensation for Investment Banking services.

** Reflects rating distribution of all North American equity research analysts.

Ratings Key

We use the following ratings system definitions:

OP = Outperform - Forecast to outperform the market;

Mkt = Market Perform - Forecast to perform roughly in line with the market;

Und = Underperform - Forecast to underperform the market;

(S) = speculative investment;

NR = No rating at this time;

R = Restricted – Dissemination of research is currently restricted.

Market performance is measured by a benchmark index such as the S&P/TSX Composite Index, S&P 500, Nasdaq Composite, as appropriate for each company. Prior to September 1, 2003, a fourth rating tier—Top Pick—was used to designate those stocks we felt would be the best performers relative to the market. Our six Top 15 lists which guide investors to our best ideas according to six different objectives (large, small, growth, value, income and quantitative) have replaced the Top Pick rating.

Dissemination of Research

Our research publications are available via our web site <http://bmocapitalmarkets.com>. Institutional clients may also receive our research via FIRST CALL Research Direct and Reuters. All of our research is made widely available at the same time to all BMO NB, BMO Capital Markets Corp. and BMO Nesbitt Burns Securities Ltd. client groups entitled to our research. Please contact your investment advisor or institutional salesperson for more information.

AEUB Sets 2007 ROE and BCUC Approves 2007/08 Capital Budget; Market Perform Rating Maintained

Event

On November 27, the Alberta Energy and Utilities Board issued its determination of the 2007 return on equity for utilities subject to the Board's purview. The allowed return on equity for 2007 is 8.51% versus 8.93% in 2006. Also on November 27, the British Columbia Utilities Commission approved FortisBC's 2007-2008 capital plan. The utility has received approval to spend approximately \$128.6 million and \$111.6 million in 2008. Approved capital expenditures are presently reflected in our financial model.

Impact

Neutral. While we believe that the return on equity determined by the Alberta Energy and Utilities Board pursuant to the formula set out in the Generic Cost of Capital decision dated July 2, 2004, likely violates the fair return standard and is confiscatory, it is in line with our expectations and is therefore neutral to our outlook.

Forecasts

Our diluted 2006 EPS estimate of \$1.28 is unchanged. Our diluted 2007 and 2008 EPS estimates decline by \$0.01 to \$1.39 and \$1.48, respectively.

Valuation

Our target price of \$29.25 reflects a weighted valuation approach: 17x diluted 2008E EPS of \$1.48 (12.5%), 2.0x 2008E book value of \$13.74 (12.5%), and a target yield of 3.00% (75%), assuming 2008 dividends per share of \$0.90.

Recommendation

We believe the shares are reasonably valued at present levels. Our rating is Market Perform.

Company Risk Disclosure

In addition to the risks involved in investing in common stocks generally, we also highlight the following risks that pertain to this company. Operations are subject to complex regulation by a variety of provincial, state and federal (Canada, Cayman Islands & Belize) agencies. Changes in regulation may adversely affect performance.

Financial performance is dependent upon the availability of installed generation and the production of electric power by third parties. Fortis Properties' cash flow is dependent on hotel room vacancy rates and commercial building occupancy levels. The Company's operations in Belize may be disrupted and assets may be damaged by hurricanes and/or tropical storms.

Analyst's Certification

I, Karen Taylor, CFA, hereby certify that the views expressed in this report accurately reflect my personal views about the subject securities or issuers. I also certify that no part of my compensation was, is, or will be, directly or indirectly, related to the specific recommendations or views expressed in this report.

General Disclosure

The information and opinions in this report were prepared by BMO Nesbitt Burns Inc. and BMO Nesbitt Burns Ltée./Ltd., collectively ("BMO NB"). BMO NB is not subject to U.S. rules with regard to the preparation of research reports and the independence of analysts. "BMO Capital Markets" is a trade name used by the BMO Investment Banking Group, which includes the wholesale/institutional arms of Bank of Montreal and BMO NB in Canada, and BMO Capital Markets Corp. in the U.S. BMO Capital Markets Corp. is an affiliate of BMO NB. BMO NB and BMO Capital Markets Corp. are subsidiaries of Bank of Montreal. Bank of Montreal or its affiliates ("BMO Financial Group") has lending arrangements with, or provide other remunerated services to, many issuers covered by BMO NB research. A significant lending relationship may exist between BMO Financial Group and certain of the issuers mentioned herein. The reader should assume that BMO NB, BMO Capital Markets Corp., Bank of Montreal or their affiliates may have a conflict of interest and should not rely solely on this report in evaluating whether or not to buy or sell securities of issuers discussed herein. The opinions, estimates and projections contained in this report are those of BMO NB as of the date of this report and are subject to change without notice. BMO NB endeavours to ensure that the contents have been compiled or derived from sources that we believe are reliable and contain information and opinions that are accurate and complete. However, BMO NB makes no representation or warranty, express or implied, in respect thereof, takes no responsibility for any errors and omissions contained herein and accepts no liability whatsoever for any loss arising from any use of, or reliance on, this report or its contents. Information may be available to BMO NB or its affiliates that is not reflected in this report. The information in this report is not intended to be used as the primary basis of investment decisions, and because of individual client objectives, should not be construed as advice designed to meet the particular investment needs of any investor. This material is for information purposes only and is not an offer to sell or the solicitation of an offer to buy any security. The research analyst and/or associates who prepared this report are compensated based upon (among other factors) the overall profitability of BMO NB and its affiliates, which includes the overall profitability of investment banking services. BMO NB, or its affiliates expect to receive or will seek compensation for investment banking services within the next 3 months from all issuers covered by BMO NB. BMO NB or its affiliates will buy from or sell to customers the securities of issuers mentioned in this report on a principal basis. BMO NB or its affiliates, officers, directors or employees may have a long or short position in the securities discussed herein, related securities or in options, futures or other derivative instruments based thereon.

Company Specific Disclosure

Disclosure 2: BMO NB has undertaken an underwriting liability with respect to this issuer within the past 12 months.

Disclosure 3: BMO NB has provided investment banking services with respect to this issuer within the past 12 months.

Disclosure 7: BMO Capital Markets Corp. or an affiliate has received compensation for investment banking services from this issuer within the **past 12 months**.

Disclosure 9: BMO Capital Markets Corp. or an affiliate received compensation for products or services other than investment banking services within the past 12 months.

Disclosure 10: This issuer is a client (or was a client) of BMO NB, BMO Capital Markets Corp. or an affiliate within the past 12 months: Investment Banking Services & Non-Securities Related Services.

Distribution of Ratings

Rating Category	BMO Rating	BMO Universe	BMO I.B. Clients*	First Call Universe**
Buy	Outperform	38%	47%	49%
Hold	Market Perform	53%	47%	45%
Sell	Underperform	9%	6%	6%

* Reflects rating distribution of all companies where BMO Capital Markets has received compensation for Investment Banking services.

** Reflects rating distribution of all North American equity research analysts.

Ratings Key

We use the following ratings system definitions:

OP = Outperform - Forecast to outperform the market;

Mkt = Market Perform - Forecast to perform roughly in line with the market;

Und = Underperform - Forecast to underperform the market;

(S) = speculative investment;

NR = No rating at this time;

R = Restricted – Dissemination of research is currently restricted.

Market performance is measured by a benchmark index such as the S&P/TSX Composite Index, S&P 500, Nasdaq Composite, as appropriate for each company. Prior to September 1, 2003, a fourth rating tier—Top Pick—was used to designate those stocks we felt would be the best performers relative to the market. Our six Top 15 lists which guide investors to our best ideas according to six different objectives (large, small, growth, value, income and quantitative) have replaced the Top Pick rating.

Dissemination of Research

Our research publications are available via our web site <http://bmocapitalmarkets.com>. Institutional clients may also receive our research via FIRST CALL Research Direct and Reuters. All of our research is made widely available at the same time to all BMO NB, BMO Capital Markets Corp. and BMO Nesbitt Burns Securities Ltd. client groups entitled to our research. Please contact your investment advisor or institutional salesperson for more information.

Additional Matters

2007 Capital Budget of \$240 Million

Impact

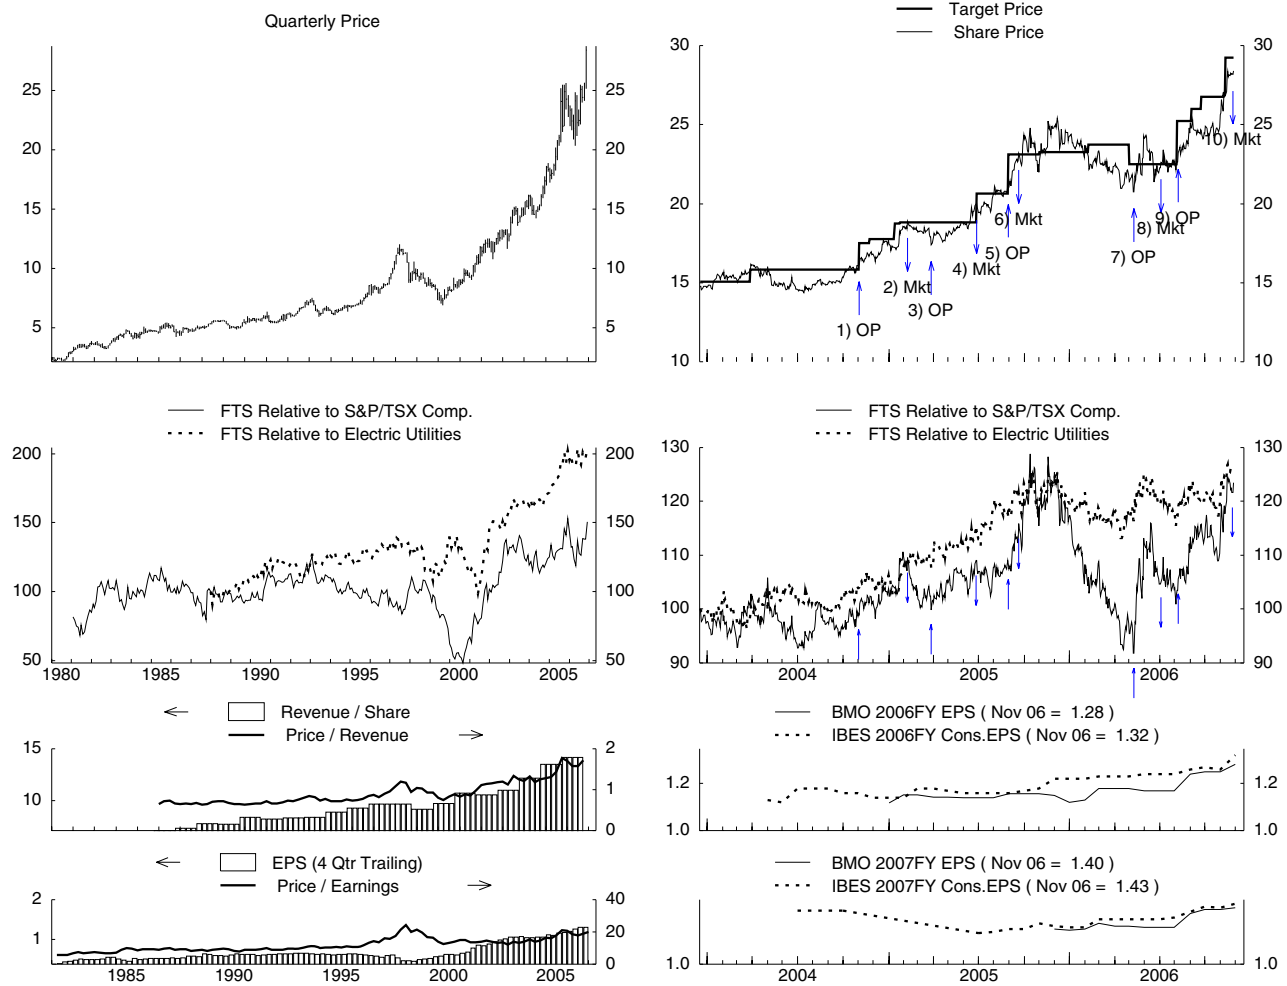

Neutral

Details & Analysis

FortisAlberta (100% - Fortis Inc.) has announced that its board of directors has approved a 2007 capital budget of \$240 million, which is net of customer contributions totalling some \$33 million. The current capital budget for 2006 is \$217 million, net of customer contributions of \$33 million. The 2006/07 Negotiated Settlement Agreement between the utility and its customers contemplates 2007 capital expenditures of \$177 million, which was net of customer contributions of \$24 million. The increase in planned capital expenditures is due to higher-than-expected electricity demand and customer growth in the residential, commercial, and oil and gas customer segments. The capital plan for 2006 and 2007 is consistent with the rate base additions in our financial model. No change in view. We believe that the shares of Fortis Inc. are reasonably valued at current levels. Our rating is Market Perform.

This report was prepared by an Analyst employed by a Canadian affiliate, BMO Nesbitt Burns Inc., and who is not registered/qualified as a research analyst under NYSE/NASD rules. For disclosure statements, including the Analyst's Certification, please refer to pages 2 to 4.

Ratings Key

We use the following ratings system definitions:

OP = Outperform - Forecast to outperform the market;

Mkt = Market Perform - Forecast to perform roughly in line with the market;

Und = Underperform - Forecast to underperform the market;

(S) = speculative investment;

NR = No rating at this time;

R = Restricted – Dissemination of research is currently restricted.

Market performance is measured by a benchmark index such as the S&P/TSX Composite Index, S&P 500, Nasdaq Composite, as appropriate for each company. Prior to September 1, 2003, a fourth rating tier—Top Pick—was used to designate those stocks we felt would be the best performers relative to the market. Our six Top 15 lists which guide investors to our best ideas according to six different objectives (large, small, growth, value, income and quantitative) have replaced the Top Pick rating.

Dissemination of Research

Our research publications are available via our web site <http://bmocapitalmarkets.com>. Institutional clients may also receive our research via FIRST CALL Research Direct and Reuters. All of our research is made widely available at the same time to all BMO NB, BMO Capital Markets Corp. and BMO Nesbitt Burns Securities Ltd. client groups entitled to our research. Please contact your investment advisor or institutional salesperson for more information.

Company Description – Fortis is a publicly listed holding company with three key businesses: electric utility operations, non-regulated electric power generation, and non-utility property activities. Electric power operations include: Newfoundland Power (100%, Newfoundland), Maritime Electric (100%, PEI), FortisOntario (100%, Fort Erie, Ontario), Belize Electricity (68%, Belize), Caribbean Utilities (54%, Grand Cayman Island), Turks and Caicos (100%, Turks and Caicos), FortisAlberta (100%, Alberta)

and FortisBC (100%, British Columbia). *Website:* fortisinc.com

Recent Results – Fortis Inc. reported Q3/06 EPS of \$0.37 versus our estimate of \$0.31 per share. The variance between actual and estimated performance is largely attributable to: (i) higher than expected contribution from FortisAlberta, due to lower than expected income taxes not otherwise contemplated in the utility's negotiated settlement agreement approved by the Alberta Energy and Utilities

Board on June 29 for 2006/07 distribution tariffs; and (ii) higher segment contribution from Fortis Generation due to stronger than anticipated production at the Mollejon and Chalillo generation stations.

Corporate Developments – On November 7, Fortis Inc. and Caribbean Utilities jointly announced that Fortis Inc. has acquired from International Power Holdings Ltd., and four other vendors associated with International Power, an additional 4.113116 million Class A common shares of Caribbean Utilities for US\$11.89 per share or approximately US\$48.9 million or C\$54.8 million. Fortis' interest in Caribbean Utilities is now approximately 54% versus approximately 38% previously. International Power Holdings has no remaining interest in Caribbean Utilities.

On November 1, Fortis Properties (100% - Fortis Inc.) announced that it has agreed to acquire four internationally

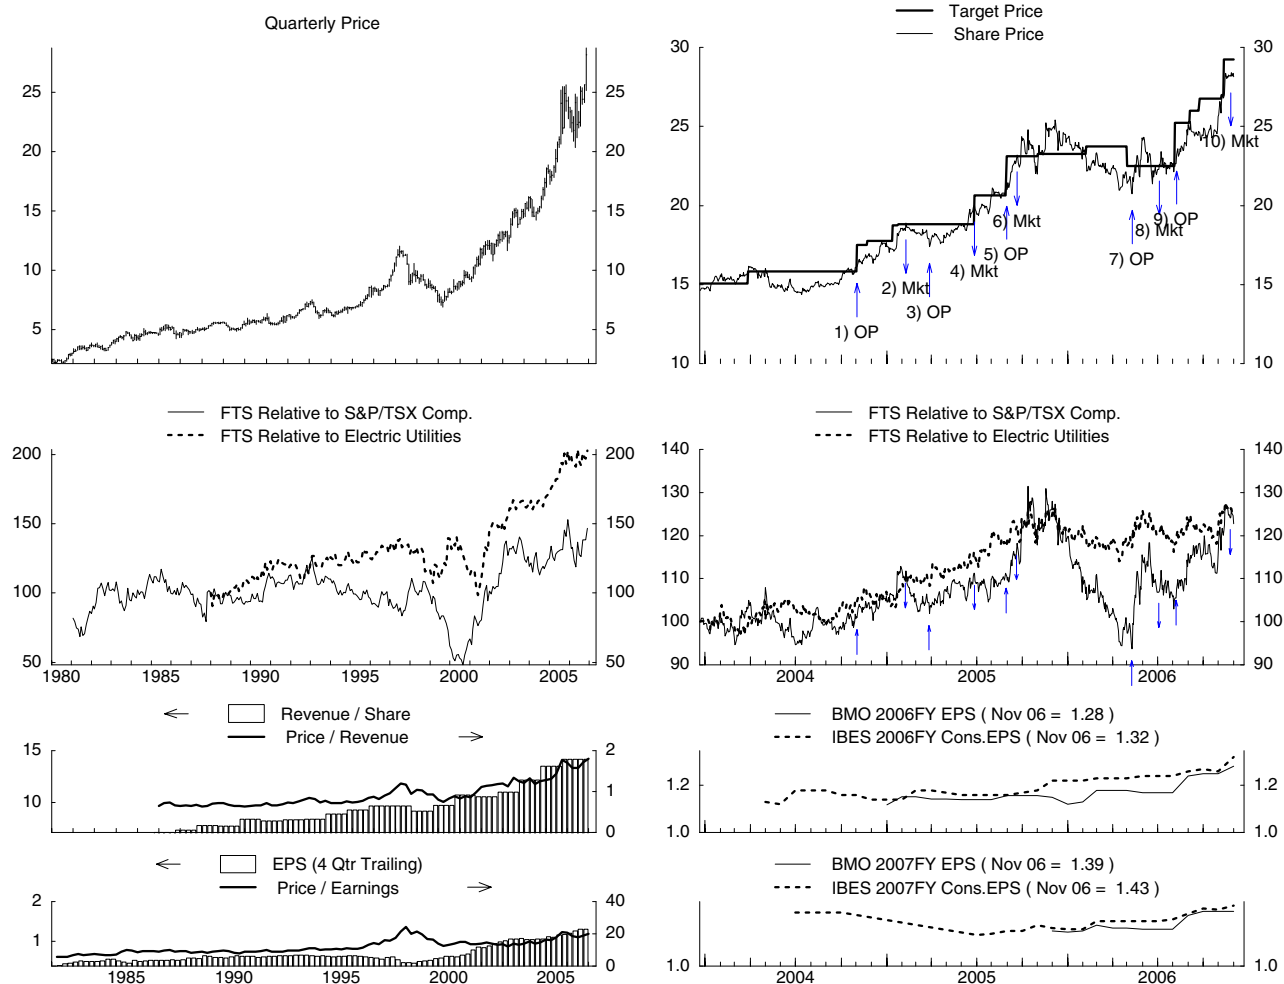

branded hotel properties in Alberta and British Columbia from Lodge Motel (Kelowna) Ltd. for \$51.6 million, including \$16 million of assumed debt. The transaction reflects a cap rate of approximately 10x and is consistent with the average cap rate of 9.8x observed on 49 sales transactions year to date for hotel properties of similar quality and size.

Forecasts – Our diluted 2006, 2007, and 2008 EPS are \$1.28, \$1.41, and \$1.50, respectively.

Valuation – Our target price reflects a weighted valuation approach: 17x diluted 2008 EPS of \$1.50 (12.5%), 2.0x 2008E BV of \$13.80 (12.5%), and a target yield of 3.00% (75%), assuming 2008 dividends per share of \$0.90.

Recommendation – We believe the shares are attractively valued. Our rating is Outperform

Company Risk Disclosure

In addition to the risks involved in investing in common stocks generally, we also highlight the following risks that pertain to this company. Operations are subject to complex regulation by a variety of provincial, state and federal (Canada, Cayman Islands & Belize) agencies. Changes in regulation may adversely affect performance.

Financial performance depends on the availability of installed generation and the production of electric power by third parties. Fortis Properties' cash flow is dependent on hotel room vacancy rates and commercial building occupancy levels. The company's operations in Belize may be disrupted and assets may be damaged by hurricanes and/or tropical storms.

\$150 Million Equity Issue; Market Perform Rating Unchanged

Event

Fortis has announced that it has entered into an agreement with underwriters to sell 5.170 million shares to the public at a price of \$29.00 per share. Total gross proceeds from the transaction are expected to be \$149.930 million. Net proceeds from the transaction are expected to be used by the company to repay indebtedness, support a robust capital expenditure program at its wholly owned utilities and for general corporate purposes.

Impact

Slightly negative. The announced equity issue was somewhat unexpected and may be opportunistic, reflecting the relatively high market valuations in the pipeline and energy utility sectors generally.

Forecasts

Our diluted 2007 and 2008 EPS estimates decline to \$1.35 and \$1.42, respectively, from \$1.39 and \$1.48. Average diluted shares in 2007 and 2008 are expected to be 122.9 million and 124.5 million, respectively.

Valuation

Our target price reflects a weighted average valuation approach: 17x diluted 2008E EPS of \$1.42 (12.5%), 2.0x 2008E BV of \$14.43 (12.5%), and a target yield of 3.0% (75%), assuming 2008 dividends per share of \$0.90.

Recommendation

We believe that the shares are reasonably valued at current levels. Our rating is Market Perform.

Company Risk Disclosure

In addition to the risks involved in investing in common stocks generally, we also highlight the following risks that pertain to this company. Operations are subject to complex regulation by a variety of provincial, state and federal (Canada, Cayman Islands & Belize) agencies. Changes in regulation may adversely affect performance.

Financial performance depends on the availability of installed generation and the production of electric power by third parties. Fortis Properties' cash flow is dependent on hotel room vacancy rates and commercial building occupancy levels. The company's operations in Belize may be disrupted and assets may be damaged by hurricanes and/or tropical storms.

Analyst's Certification

I, Karen Taylor, CFA, hereby certify that the views expressed in this report accurately reflect my personal views about the subject securities or issuers. I also certify that no part of my compensation was, is, or will be, directly or indirectly, related to the specific recommendations or views expressed in this report.

General Disclosure

The information and opinions in this report were prepared by BMO Nesbitt Burns Inc. and BMO Nesbitt Burns Ltée./Ltd., collectively ("BMO NB"). BMO NB is not subject to U.S. rules with regard to the preparation of research reports and the independence of analysts. "BMO Capital Markets" is a trade name used by the BMO Investment Banking Group, which includes the wholesale/institutional arms of Bank of Montreal and BMO NB in Canada, and BMO Capital Markets Corp. in the U.S. BMO Capital Markets Corp. is an affiliate of BMO NB. BMO NB and BMO Capital Markets Corp. are subsidiaries of Bank of Montreal. Bank of Montreal or its affiliates ("BMO Financial Group") has lending arrangements with, or provide other remunerated services to, many issuers covered by BMO NB research. A significant lending relationship may exist between BMO Financial Group and certain of the issuers mentioned herein. The reader should assume that BMO NB, BMO Capital Markets Corp., Bank of Montreal or their affiliates may have a conflict of interest and should not rely solely on this report in evaluating whether or not to buy or sell securities of issuers discussed herein. Ratings Key

We use the following ratings system definitions:

OP = Outperform - Forecast to outperform the market;

Mkt = Market Perform - Forecast to perform roughly in line with the market;

Und = Underperform - Forecast to underperform the market;

(S) = speculative investment;

NR = No rating at this time;

R = Restricted – Dissemination of research is currently restricted.

Market performance is measured by a benchmark index such as the S&P/TSX Composite Index, S&P 500, Nasdaq Composite, as appropriate for each company. Prior to September 1, 2003, a fourth rating tier—Top Pick—was used to designate those stocks we felt would be the best performers relative to the market. Our six Top 15 lists which guide investors to our best ideas according to six different objectives (large, small, growth, value, income and quantitative) have replaced the Top Pick rating.

Dissemination of Research

Our research publications are available via our web site <http://bmocapitalmarkets.com>. Institutional clients may also receive our research via FIRST CALL Research Direct and Reuters. All of our research is made widely available at the same time to all BMO NB, BMO Capital Markets Corp. and BMO Nesbitt Burns Securities Ltd. client groups entitled to our research. Please contact your investment advisor or institutional salesperson for more information.

Additional Matters

TO U.S. RESIDENTS: BMO Capital Markets Corp. and/or BMO Nesbitt Burns Securities Ltd., affiliates of BMO NB, furnish this report to U.S. residents and accept responsibility for the contents herein, except to the extent that it refers to securities of Bank of Montreal. Any U.S. person wishing to effect transactions in any security discussed herein should do so through BMO Capital Markets Corp. and/or BMO Nesbitt Burns Securities Ltd.

TO U.K. RESIDENTS: The contents hereof are intended solely for the use of, and may only be issued or passed onto, persons described in part VI of the Financial Services and Markets Act 2000 (Financial Promotion) Order 2001.

BMO Nesbitt Burns Inc. and BMO Nesbitt Burns Ltée/Ltd. are Members of CIPF. BMO Capital Markets Corp. and BMO Nesbitt Burns Securities Ltd. are Members of SIPC.

Q4/06 and Fiscal 2006 EPS Higher than Expected; Resuming Coverage with Outperform Rating

Event

Fortis Inc. reported Q4/06 EPS of \$0.33 versus our expectation of \$0.24 for the quarter. The variance between expected and actual performance is largely attributable to: (i) larger contribution from FortisAlberta due to lower than expected income taxes not otherwise contemplated in the utility's negotiated settlement agreement approved by the Alberta Energy and Utilities Board on June 29 for 2006 and 2007 distribution rates; and (ii) marginally higher than expected contributions from FortisBC, Belize Electricity, and FortisGeneration, partially offset by slightly lower than expected performance at Newfoundland Power, Maritime Electric and Caribbean Utilities Limited (54% - Fortis Inc.). Fiscal 2006 diluted EPS of \$1.33, as adjusted, were also slightly higher than our expectation of \$1.28, largely due to the performance of FortisAlberta, as previously noted.

Impact

Positive.

Forecasts

We have updated our financial model to reflect actual 2006 performance. Our diluted 2007 and 2008 EPS estimates increase to \$1.38 and \$1.44 per share, respectively, versus \$1.35 and \$1.42 diluted, previously.

Valuation

Our target price of \$29.50 reflects a weighted valuation approach: 18x diluted 2008E EPS of \$1.44 (12.5%), 2.0x 2008E book value per share of \$14.19 (12.5%), and a target yield of 3% (75%), assuming 2008 dividends of \$0.91.

Recommendation

We believe the shares are attractively valued. We are resuming coverage with an Outperform rating.

Details & Analysis

Fortis Inc. reported Q4/06 EPS of \$0.33 versus our expectation of \$0.24 for the quarter. The variance between expected and actual performance is largely attributable to: (i) larger contribution from FortisAlberta due to lower than expected income taxes not otherwise contemplated in the utility's negotiated settlement agreement approved by the Alberta Energy and Utilities Board on June 29 for 2006 and 2007 distribution rates; and (ii) marginally higher than expected contributions from FortisBC, Belize Electricity, and FortisGeneration, partially offset by slightly lower than expected performance at Newfoundland Power, Maritime Electric and Caribbean Utilities Limited (54% - Fortis Inc.). Fiscal 2006 diluted EPS of \$1.33, as adjusted, were also slightly higher than our expectation of \$1.28, largely due to the performance of FortisAlberta, as previously noted.

We believe that the following points are relevant Q4/06 and fiscal 2006 performance:

- We have normalized annual performance for a number of one-time items, including: (i) after-tax insurance gain of \$0.7 million recognized in Q2/06; (ii) gain on the sale of a hotel asset of \$1.6 million after-tax in Q2/06; and (iii) benefit from the reduction of future income tax rates of \$1.5 million after-tax, also recognized in Q2/06.
- Table 1 sets out segment quarterly (basic) and annual estimated earnings per share.

Source: BMO Capital Markets, Company Reports

- The contribution from FortisAlberta reflects annual 2006 taxation recoveries of \$4.7 million and taxation costs of \$1.0 million in Q4/06. As noted in our Q3/06 write-up, lower than expected cash taxes payable arises from timing issues associated with the accrual of flow through costs and the use of tax deductions in addition to those contemplated in the Negotiated Settlement Agreement that substantially reduced cash taxes payable in 2006. While we expect this benefit to continue in 2007, we expect that it will be subject to rebasing in 2008 and any residual benefit to accrue to ratepayers rather than to shareholders.
- A return to normal hydrological conditions in Belize and the commissioning of the Chalillo storage facility in late 2005 resulted in a large, year-over-year increase in power production and higher production in Q4/06 versus Q4/05, as set out in Table 2. Lower average price

per MWh in Ontario (\$42.69/MWh in Q4/06 versus \$71.46/MWh in Q4/05) and a 45% reduction in average selling price for power production over 100 GWh pursuant to the power sales agreement reduced average revenue per MWh, as set out in Table 2. Annual operating costs declined by approximately \$1.0 million due to the cessation of operations at the Ranking Generation Station (74.6 MW), pursuant to the execution of the Niagara Exchange Agreement in late 2005. Virtual power production is assumed to expire in April 2009.

Estimates

We have updated our financial model to reflect actual 2006 performance. Our diluted 2007 and 2008 EPS estimates increase to \$1.38 and \$1.44 per share, respectively, versus \$1.35 and \$1.42 diluted, previously. Our estimates fully reflect the announced, applied-for and approved capital plans for FortisAlberta and FortisBC, and the ROEs allowed by the respective regulators at Newfoundland Power, Maritime Electric, FortisAlberta and FortisBC. Our estimates also reflect the \$150 million equity issue announced by the company on January 3 that closed on January 18. We believe that the issuance of equity by the company was largely opportunistic, and that barring any unanticipated acquisitions, we do not believe that further common equity issues are likely over the forecast period.

There is considerable discussion in the financial market with respect to the potential divestiture of Terasen Gas Inc. by Kinder Morgan Inc. once the plan to take that company private is completed in mid-2007. Although we believe that the acquisition of a natural gas distribution utility is the next logical step-out for Fortis in its strategic evolution, we remain cautious about this potential opportunity for a number of reasons:

- Terasen Gas Inc., exclusive of Terasen Gas Vancouver Island, is a slower growth utility than the assets acquired by Fortis from Aquila in Alberta and British Columbia. In the latter case, these utility's were largely deprived of necessary capital in the period prior to sale by Aquila, and the growth rate experienced by the utilities post acquisition by Fortis has exceeded expectations, making a dilutive transaction accretive earlier than expected.
- Terasen Gas is more highly levered than Fortis Inc. with deemed equity of 35%, and an allowed return on equity in F2007 of 8.37%, one of the lowest in Canada. Kinder Morgan paid approximately 23x diluted 2007 earnings to acquire the utility, a multiple that would likely be dilutive to most buyers, including Fortis Inc. We believe that any purchase price premium that would be paid for the utility operations of Terasen Gas could not be recovered in utility rates, consistent with the Aquila Alberta and AquilaBC transactions.
- The operations of Terasen Gas Vancouver Island are subject to a number of regulatory risks and the franchise is not robust.
- We do not believe that Fortis is likely to acquire any asset, Terasen Gas Inc. or otherwise, unless the planned acquisition is immediately accretive.

Valuation

Our target price of \$29.50 reflects a weighted valuation approach: 18x diluted 2008E EPS of \$1.44 (12.5%), 2.0x 2008E book value per share of \$14.19 (12.5%), and a target yield of 3% (75%), assuming 2008 dividends of \$0.91.

Recommendation

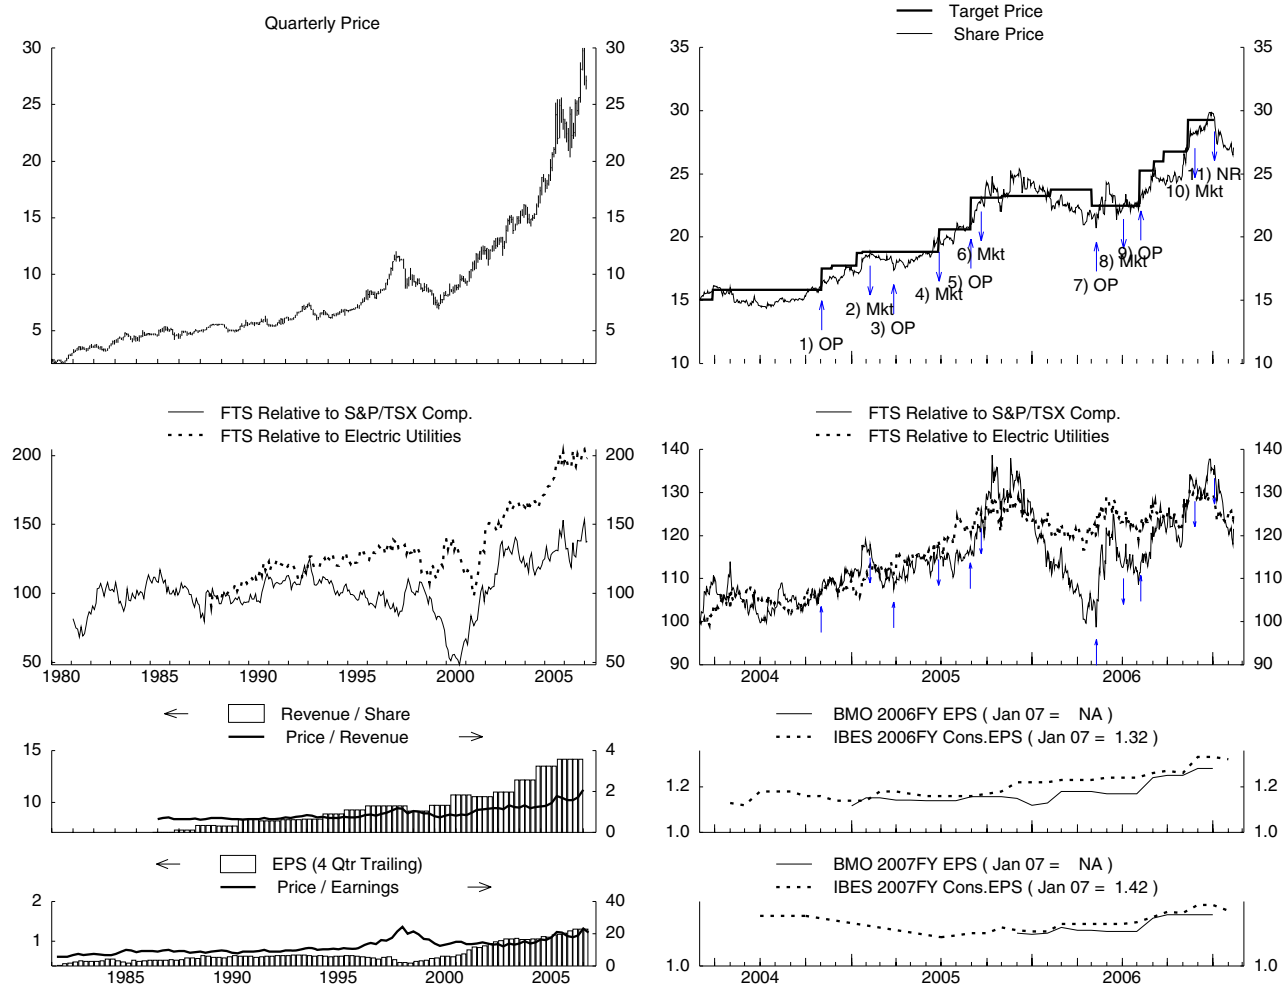

We believe the shares are attractively valued. We are resuming coverage with an Outperform rating.

Company Risk Disclosure

In addition to the risks involved in investing in common stocks generally, we also highlight the following risks that pertain to this company. Operations are subject to complex regulation by a variety of provincial, state and federal (Canada, Cayman Islands & Belize) agencies. Changes in regulation may adversely affect performance.

Financial performance depends on the availability of installed generation and the production of electric power by third parties. Fortis Properties' cash flow is dependent on hotel room vacancy rates and commercial building occupancy levels. The company's operations in Belize may be disrupted and assets may be damaged by hurricanes and/or tropical storms.

Analyst's Certification

I, Karen Taylor, CFA, hereby certify that the views expressed in this report accurately reflect my personal views about the subject securities or issuers. I also certify that no part of my compensation was, is, or will be, directly or indirectly, related to the specific recommendations or views expressed in this report.

General Disclosure

The information and opinions in this report were prepared by BMO Nesbitt Burns Inc. and BMO Nesbitt Burns Ltée./Ltd., collectively ("BMO NB"). BMO NB is not subject to U.S. rules with regard to the preparation of research reports and the independence of analysts. "BMO Capital Markets" is a trade name used by the BMO Investment Banking Group, which includes the wholesale/institutional arms of Bank of Montreal and BMO NB in Canada, and BMO Capital Markets Corp. in the U.S. BMO Capital Markets Corp. is an affiliate of BMO NB. BMO NB and BMO Capital Markets Corp. are subsidiaries of Bank of Montreal. Bank of Montreal or its affiliates ("BMO Financial Group") has lending arrangements with, or provide other remunerated services to, many issuers covered by BMO NB research. A significant lending relationship may exist between BMO Financial Group and certain of the issuers mentioned herein. The reader should assume that BMO NB, BMO Capital Markets Corp., Bank of Montreal or their affiliates may have a conflict of interest and should not rely solely on this report in evaluating whether or not to buy or sell securities of issuers discussed herein. The opinions, estimates and projections contained in this report are those of BMO NB as of the date of this report and are subject to change without notice. BMO NB endeavours to ensure that the contents have been compiled or derived from sources that we believe are reliable and contain information and opinions that are accurate and complete. However, BMO NB makes no representation or warranty, express or implied, in respect thereof, takes no responsibility for any errors and omissions contained herein and accepts no liability whatsoever for any loss arising from any use of, or reliance on, this report or its contents. Information may be available to BMO NB or its affiliates that is not reflected in this report. The information in this report is not intended to be used as the primary basis of investment decisions, and because of individual client objectives, should not be construed as advice designed to meet the particular investment needs of any investor. This material is for information purposes only and is not an offer to sell or the solicitation of an offer to buy any security. The research analyst and/or associates who prepared this report are compensated based upon (among other factors) the overall profitability of BMO NB and its affiliates, which includes the overall profitability of investment banking services. BMO NB, or its affiliates expect to receive or will seek compensation for investment banking services within the next 3 months from all issuers covered by BMO NB. BMO NB or its affiliates will buy from or sell to customers the securities of issuers mentioned in this report on a principal basis. BMO NB or its affiliates, officers, directors or employees may have a long or short position in the securities discussed herein, related securities or in options, futures or other derivative instruments based thereon.

Company Specific Disclosure

Disclosure 2: BMO NB has undertaken an underwriting liability with respect to this issuer within the past 12 months.

Disclosure 3: BMO NB has provided investment banking services with respect to this issuer within the past 12 months.

Disclosure 7: BMO Capital Markets Corp. or an affiliate has received compensation for investment banking services from this issuer within the past 12 months.

Disclosure 9: BMO Capital Markets Corp. or an affiliate received compensation for products or services other than investment banking services within the past 12 months.

Disclosure 10: This issuer is a client (or was a client) of BMO NB, BMO Capital Markets Corp. or an affiliate within the past 12 months: Investment Banking Services & Non-Securities Related Services.

Distribution of Ratings

Rating Category	BMO Rating	BMO Universe	BMO I.B. Clients*	First Call Universe**
Buy	Outperform	35%	45%	47%
Hold	Market Perform	55%	48%	46%
Sell	Underperform	10%	7%	7%

* Reflects rating distribution of all companies where BMO Capital Markets has received compensation for Investment Banking services.

** Reflects rating distribution of all North American equity research analysts.

Ratings Key

We use the following ratings system definitions:

OP = Outperform - Forecast to outperform the market;

Mkt = Market Perform - Forecast to perform roughly in line with the market;

Und = Underperform - Forecast to underperform the market;

(S) = speculative investment;

NR = No rating at this time;

R = Restricted – Dissemination of research is currently restricted.

Market performance is measured by a benchmark index such as the S&P/TSX Composite Index, S&P 500, Nasdaq Composite, as appropriate for each company. Prior to September 1, 2003, a fourth rating tier—Top Pick—was used to designate those stocks we felt would be the best performers relative to the market. Our six Top 15 lists which guide investors to our best ideas according to six different objectives (large, small, growth, value, income and quantitative) have replaced the Top Pick rating.

Dissemination of Research

Our research publications are available via our web site <http://bmocapitalmarkets.com>. Institutional clients may also receive our research via FIRST CALL Research Direct and Reuters. All of our research is made widely available at the same time to all BMO NB, BMO Capital Markets Corp. and BMO Nesbitt Burns Securities Ltd. client groups entitled to our research. Please contact your investment advisor or institutional salesperson for more information.

Additional Matters

TO U.S. RESIDENTS: BMO Capital Markets Corp. and/or BMO Nesbitt Burns Securities Ltd., affiliates of BMO NB, furnish this report to U.S. residents and accept responsibility for the contents herein, except to the extent that it refers to securities of Bank of Montreal. Any U.S. person wishing to effect transactions in any security discussed herein should do so through BMO Capital Markets Corp. and/or BMO Nesbitt Burns Securities Ltd.

TO U.K. RESIDENTS: The contents hereof are intended solely for the use of, and may only be issued or passed onto, persons described in part VI of the Financial Services and Markets Act 2000 (Financial Promotion) Order 2001.

BMO Nesbitt Burns Inc. and BMO Nesbitt Burns Ltée/Ltd. are Members of CIPF. BMO Capital Markets Corp. and BMO Nesbitt Burns Securities Ltd. are Members of SIPC.

"BMO Capital Markets" is a trade-mark of Bank of Montreal, used under licence.

"BMO (M-Bar roundel symbol)" is a registered trade-mark of Bank of Montreal, used under licence.

Ratings Key

We use the following ratings system definitions:

OP = Outperform - Forecast to outperform the market;

Mkt = Market Perform - Forecast to perform roughly in line with the market;

Und = Underperform - Forecast to underperform the market;

(S) = speculative investment;

NR = No rating at this time;

R = Restricted – Dissemination of research is currently restricted.

Market performance is measured by a benchmark index such as the S&P/TSX Composite Index, S&P 500, Nasdaq Composite, as appropriate for each company. Prior to September 1, 2003, a fourth rating tier—Top Pick—was used to designate those stocks we felt would be the best performers relative to the market. Our six Top 15 lists which guide investors to our best ideas according to six different objectives (large, small, growth, value, income and quantitative) have replaced the Top Pick rating.

Dissemination of Research

Our research publications are available via our web site <http://bmocapitalmarkets.com>. Institutional clients may also receive our research via FIRST CALL Research Direct and Reuters. All of our research is made widely available at the same time to all BMO NB, BMO Capital Markets Corp. and BMO Nesbitt Burns Securities Ltd. client groups entitled to our research. Please contact your investment advisor or institutional salesperson for more information.

Additional Matters

TO U.S. RESIDENTS: BMO Capital Markets Corp. and/or BMO Nesbitt Burns Securities Ltd., affiliates of BMO NB, furnish this report to U.S. residents and accept responsibility for the contents herein, except to the extent that it refers to securities of Bank of Montreal. Any U.S. person wishing to effect transactions in any security discussed herein should do so through BMO Capital Markets Corp. and/or BMO Nesbitt Burns Securities Ltd.

TO U.K. RESIDENTS: The contents hereof are intended solely for the use of, and may only be issued or passed onto, persons described in part VI of the Financial Services and Markets Act 2000 (Financial Promotion) Order 2001.

BMO Nesbitt Burns Inc. and BMO Nesbitt Burns Ltée/Ltd. are Members of CIPF. BMO Capital Markets Corp. and BMO Nesbitt Burns Securities Ltd. are Members of SIPC.

Fortis, You've Come a Long Way; Resuming Coverage with Outperform Rating

Event

We are resuming coverage of the shares of Fortis Inc. with an Outperform rating pursuant to the close of the \$1.0 billion treasury offering of subscription receipts announced on February 26, 2007. The subscription receipts were issued in conjunction with the February 26 announcement that the company has entered into an agreement to acquire all of the outstanding shares of Terasen Inc. from Kinder Morgan Inc. for a total purchase price of \$3.7 billion, including assumed debt of \$2.350 billion.

Impact

Positive. As we highlighted in our February 12 research note, we believe that the acquisition of Terasen Inc. is the next logical step-out for the company. As set out herein, we believe that the acquisition multiple of approximately 16.57x 2008E earnings of Terasen Inc. is likely to be immediately accretive, consistent with our understanding of management's acquisition guidelines.

Forecasts

We have updated our financial model to reflect the planned acquisition of Terasen Inc. from Kinder Morgan Inc., and the foregoing issuance of subscription receipts. We have assumed that both transactions close mid-2007. Our diluted 2007 and 2008 EPS estimates increase to \$1.43 and \$1.54, respectively, from \$1.38 and \$1.44.

Valuation

Our target price of \$31.00 reflects a weighted average valuation approach: 18x diluted 2008 EPS of \$1.54 (12.5%), 2.0x 2008E BV of \$17.96 (12.5%), and a target yield of 3.0% (75%), assuming 2008 dividends per share of \$0.92.

Recommendation

We believe that the shares are attractively valued at current levels. We are resuming coverage with an Outperform rating.

Price (14-Mar) \$27.10
Target Price \$31.00↑

Details and Analysis

We are resuming coverage of the shares of Fortis Inc. with an Outperform rating pursuant to the close of the \$1.0 billion treasury offering of subscription receipts announced on February 26, 2007. The subscription receipts were issued in conjunction with the February 26 announcement that the company has entered into an agreement to acquire all of the outstanding shares of Terasen Inc. from Kinder Morgan Inc. for a total purchase price of \$3.7 billion, including assumed debt of \$2.350 billion.

We believe that the following points are relevant about the acquisition of Terasen Inc.:

- The purchase does not include the petroleum transportation assets of Kinder Morgan Canada (formerly known as Terasen Pipelines). Prior to the close of the transaction, Kinder Morgan will cause Terasen Inc. to divest itself of its petroleum transportation assets, including Trans Mountain, Terasen Pipeline (Corridor) Inc., Express and Platte Pipeline Systems and Kinder Morgan Canada Inc., leaving in Terasen Inc. only the business interests related to the natural gas distribution business of that company. We note that, on March 5, 2007, Inter Pipeline Fund (IPL.UN, TSX) agreed to acquire Terasen Pipelines (Corridor) Inc. from Kinder Morgan Inc. for \$760 million and \$300 million of debt associated with the planned expansion of the Corridor Pipeline.
- The transaction is subject to a number of regulatory approvals, including the British Columbia Utilities Commission and a ruling pursuant to the *Competition Act*. We do not believe that these approvals are likely to be unreasonably withheld and we expect the transaction to close by mid-2007. On March 1, Fortis applied to the British Columbia Utilities Commission (BCUC) for an Order approving the acquisition of all of the issued and outstanding shares of Terasen Inc. On March 2, the Commission issued an Order outlining the regulatory process to consider the proposed acquisition: (i) Commission information requests are due on March 14, 2007, while written submissions by Fortis are due on March 19, 2007; (ii) a procedural conference will be held on March 29, 2007, to discuss the regulatory timetable and application process; (iii) intervenor written submissions are due on April 2, 2007, and written responses from Fortis by April 5, 2007.
- The transaction is not unexpected; we believed that Kinder Morgan was likely to put the natural gas assets of Terasen Inc. up for sale in 2007. However, we expected the transaction to occur after the plan to take Kinder Morgan private closed in mid-2007. Our primary concern with the acquisition of Terasen Inc. by Fortis (or any other buyer for that matter) was price. Kinder Morgan paid approximately 24.6x 2006E EPS for Terasen Inc. in November 2005. We believe that this transaction, assuming pro forma 2008 earnings for Terasen Inc. of \$108.6 million (prior to the cost of \$450 million of holdco debt at Terasen Inc.) and a net purchase price of \$1.8 billion (the total announced price of \$3.7 billion net of assumed utility debt of \$1.9 billion), is approximately 16.57x 2008E earnings. We believe that the transaction is priced at the midpoint of the range of comparable transactions.

- We believe that the \$3.7 billion transaction is likely to be financed as follows:
 - \$1.9 billion of assumed utility debt.
 - \$450 million of Terasen Inc. holdco debt that will be assumed.
 - \$1 billion subscription receipt offering that closed March 15, 2006. 38.5 million subscription receipts were issued at a price of \$26.00 per receipt. Each receipt represents the right to receive, for no additional consideration, one common share of Fortis Inc.
 - \$150 million of shares pursuant to an underwriter's over-allotment option that we assume will be exercised, such that the total shares ultimately issued will total approximately 44.269 million.
 - Issuance of \$200 million of preferred shares. We have assumed, for estimation purposes, that Fortis Inc. issues perpetual preferred shares with a coupon of approximately 4.70%.
- As set out in the Estimates section, we believe that the transaction is immediately accretive: \$0.05 per diluted share in 2007 and approximately \$0.10 per share on a full-year basis in 2008, such that our diluted 2007 and 2008 EPS estimates increase to \$1.43 and \$1.54 from \$1.38 and \$1.44 in 2007 and 2008, respectively.

The Assets to Be Acquired

Terasen Inc. is a holding company headquartered in Vancouver, BC, whose subsidiaries operate two lines of business: (a) natural gas distribution; and (b) petroleum transportation. The natural gas distribution business of Terasen consists of: Terasen Gas Inc. (TGI), Terasen Gas Vancouver Island (TGVI), Terasen Gas Whistler (TGW) and Terasen Energy Services Inc. (TES). Figure 1 highlights these businesses. Kinder Morgan will retain the petroleum transportation business of Terasen Inc. The natural gas distribution segments of Terasen Inc. are regulated by BCUC and are outlined below. Chart 1, below, highlights the company's natural gas service areas on Vancouver Island and the British Columbia mainland.

Terasen Gas Inc. – TGI

TGI provides service to more than 100 communities in British Columbia. Its service territory extends from Vancouver to the Fraser Valley and the interior of British Columbia, and has an estimated population of approximately four million. As at September 30, 2006, TGI and its subsidiaries transported and distributed natural gas to approximately 734,000 residential and 82,000 commercial and industrial customers, representing approximately 87% of the natural gas users in British Columbia. The rate base of TGI as at September 30, 2006, was approximately \$2,474 million. TGI has approximately 1,100 employees.

Terasen Gas (Vancouver Island) – TGVI

TGVI owns and operates the natural gas transmission pipeline from the Greater Vancouver area across the Georgia Strait to Vancouver Island, and the distribution system on Vancouver Island and along the Sunshine Coast of British Columbia. TGVI serves approximately 85,000 residential, commercial and industrial customers along the Sunshine Coast and in various

communities on Vancouver Island, including Victoria and surrounding areas. Among TGVI's largest customers are the Vancouver Island Gas Joint Venture, representing six large pulp and paper mills on Vancouver Island and the Sunshine Coast, and BC Hydro's contracted gas-fired electricity cogeneration facility at Elk Falls, Vancouver Island. The average rate base of TGVI approved by the Commission for 2007 is approximately \$482 million. TGVI has approximately 105 employees.

Terasen Gas Whistler- TGW

TGW has owned and operated the propane distribution system at Whistler since 1987. It provides service to approximately 2,350 residential and commercial customers in the Whistler area of British Columbia. The average rate base of TGW for 2006 was approximately \$16.5 million. The propane distribution system in Whistler has grown far beyond the original expectations and beyond the size and scale of other similar propane distribution systems in British Columbia and Canada. On June 28, 2006, TGVI and TGW received final approval from the BCUC to extend natural gas service to Whistler. Under the proposed arrangements, TGVI will extend its transmission system to serve TGW by the construction of a 50-kilometre pipeline lateral from Squamish to Whistler and TGW will convert its current piped propane system to natural gas. The pipeline is scheduled for completion in 2008.

Terasen Energy Services - TES

TES was established in 2006 and owns and/or operates geo-exchange, natural gas and propane distribution systems in communities across British Columbia. TES is also in the business of developing alternative energy systems.

Regulation

There have been several important regulatory developments at Terasen Inc. since its acquisition by Kinder Morgan Inc. on November 30, 2005, as set out below for each entity.

Terasen Gas

- On January 29, 2007, the BCUC issued an Order to consider an extension of the 2004–2007 Multi-Year Performance-Based Rate Plan for 2008-2009 for Terasen Gas. The Order established a written public hearing process and set out a regulatory timetable. In accordance with the regulatory timetable, stakeholders, intervenors, and interested party comments were due to be filed with the Commission by February 9, 2007, and Terasen Gas' reply comments were due on February 16, 2007. The BCUC has not yet issued a decision regarding the extension of the Multi-Year Performance-Based Rate.
- On December 18, 2006, the BCUC approved the Advance Annual Review materials in accordance with the 2004-2007 Multi-Year Performance-Based Rate Settlement filed by Terasen Gas on October 16, 2006. The advance annual review addresses the 2006 actual results, the 2007 forecasts and the 2006 earnings sharing that are used in setting 2007 rates. The key metrics included in this decision include:
 - TGI and Terasen Squamish (TGS) are to be amalgamated beginning January 1, 2007. The BCUC noted that Commission approval is not required for the amalgamation.

- The appropriate common equity component allowed in the capital structure of the amalgamated TGI and TGS is 35.01% in 2007 versus the approved rate of 35% in 2006. The approved return on common equity of the amalgamated TGI and TGS is 8.37% in 2007 versus the approved rate of 8.80% in 2006.
- Mid-year rate base of \$2.506 billion in 2006 and \$2.474 billion in 2007.
- Revenue Requirements of \$1.646 billion in 2006 and \$1.461 billion in 2007.
- Capital Expenditures of \$130.248 million in 2006 and \$137.854 million in 2007.
- Depreciation of \$83.894 million in 2006 and \$84.701 million in 2007.
- The Commission approved the \$0.021/GJ decrease in the Rate Stabilization Adjustment Mechanism (RSAM) rider from the currently approved level of \$0.16/GJ to \$0.145/GJ, effective January 1, 2007. The RSAM is a weather normalization account that enables TGI to defer margin variances arising from residential and commercial customer natural gas consumption that is more or less than forecasted. TGI forecasts \$7.99 million (net-of-tax) of RSAM additions at the end of 2006. The balance at the end of 2006 for the RSAM is projected to be \$34.58 million on a net-of-tax basis, which is being amortized over three years.
- TGI is projecting an actual 2006 return on equity of 10.098%. Under the earnings sharing mechanism (ESM), differences between actual utility earnings and the authorized level of earnings is shared 50/50 between TGI and its customers. The customer's portion of the 2006 earnings surplus is \$8.23 million and the total earnings surplus to be distributed in 2007 is \$12.74 million. Therefore, the approved ESM rider, effective January 1, 2007, will range from (\$0.108)/GJ to (\$0.018)/GJ, depending on the Rate Schedule applicable to each respective customer.
- Terasen Gas expects that it will file an application with the BCUC in the first or second quarter of 2009 regarding its 2010 Revenue Requirement.
- Terasen Gas has indicated that a potential amalgamation of the separate utility entities (TGI, TGVI and TGW) is being considered for as soon as 2010, which would require, in the view of the company, an application relating to the amalgamation to be filed in early 2009.

Terasen Gas Vancouver Island

- On January 29, 2007, the BCUC issued an Order to consider an extension of the 2006–2007 Negotiated Settlement for 2008–2009 for Terasen Gas Vancouver Island. The Order established a written public hearing process and set out a regulatory timetable. On January 22, 2007, TGVI provided copies of the application to all stakeholders, intervenors and interested parties concurrent with the submission of its application to the Commission. In accordance with the regulatory timetable, Commission and intervenor information submissions were due to be filed by February 9, 2007. Stakeholders, intervenors and interested party comments and TGVI reply comments were to be filed February 21, 2007, and February 26, 2007, respectively. The BCUC has not yet issued a decision.

- On December 14, 2006, the BCUC approved the 2006 Settlement Update in accordance with the 2006–2007 Negotiated Settlement Agreement filed by TGVI on October 23, 2006. The 2006 Settlement Update requested approval of 2007 Rates, 2007 Cost of Service and the Revenue Deficiency Deferral Account balance as at December 31, 2005. The key results of the decision include:
 - Mid-year rate base of \$469.683 million in 2006 and \$481.996 million in 2007 versus \$452.605 million in 2005.
 - Revenue Requirements of \$195.459 million in 2006 and \$207.972 million in 2007 versus \$193.301 million in 2005.
 - Capital Expenditures of \$35.338 million in 2006 and \$67.443 million in 2007.
 - Depreciation expenses of \$15.459 million in 2006 and \$16.339 million in 2007 versus \$14.984 million in 2005.
 - Deemed equity of 40% in 2006 and 2007 versus 35% in 2005. The allowed return on equity is 9.50% in 2006 and 9.07% in 2007 versus 9.53% in 2005.
 - A Revenue Deficiency Deferral Account (RDDA) balance as at December 31, 2005, of \$48.731 million (versus a reported balance of \$35.2 million). The company projects the Deferral Account balance to be \$41.842 million in 2006 and \$29.9 million at the end of 2007.
 - Terasen Gas Vancouver Island expects that it will file an application with the BCUC in the first or second quarter of 2009 regarding its 2010 Revenue Requirements.

BCUC Revises Benchmark ROE and Formula

On March 2, 2006, the BCUC issued a decision in response to an application submitted jointly by Terasen Gas and Terasen Gas Vancouver Island, dated June 30, 2005, to determine the appropriate return on equity and capital structure and to review and revise the automatic adjustment mechanism. The key terms of the decision include:

- The appropriate common equity component allowed in the capital structure of TGI is 35%. TGI had applied for a 38% equity structure in its application.
- The appropriate common equity component allowed in the capital structure of TGVI is 40%. TGVI had applied for a 40% equity structure in its application.
- The approved return on equity for the benchmark low-risk utility is 9.145%, assuming a 30-year long Canada bond yield of 5.25%. For 2006, this results in an approved return on equity for TGI of 8.80%. TGI had applied for an allowed return on equity of 10.5% for rate-making purposes in its application.
- The approved return on equity for TGVI is 70 basis points greater than the benchmark low-risk utility return, or 9.50% for 2006. TGVI had applied for an allowed return on equity of 11.25%, a 75 basis point premium to that of TGI in its application.

- The Commission gave weight to both the equity risk premium and the discounted cash flow approach in establishing a fair rate of return. The Commission did not give any weight to the comparable earnings of low-risk Canadian industrials in the proceeding, although it believes that this approach may play a role in future hearings.
- The Commission also concluded that a revision to the automatic adjustment mechanism is appropriate, such that the return on equity will be adjusted by 75 percent of the change in forecast long Canada bond yields, effective January 1, 2006. The new automatic adjustment mechanism will be subject to a review period of five years and should the mechanisms result in a ROE for the benchmark low-risk utility that is less than 8% or greater than 12%, the Commission will canvass the views of the parties on whether the mechanism should be reviewed. The sliding scale was 80% previously.
- TGI did not seek changes to its deferral accounts. TGI maintains two significant commodity deferral accounts: the Commodity Cost Reconciliation Account (CCRA) and the Midstream Cost Reconciliation Account (MCRA). These commodity deferral accounts collect the difference between the actual incurred gas costs and recoveries from rates. TGI's non-commodity deferral accounts defer elements of gross margin and of costs. The most significant non-commodity deferral account for TGI is the RSAM.
- TGVI also did not seek changes to its deferral accounts. TGVI maintains a commodity deferral account called the Gas Cost Variance Account, which captures the difference between actual and approved cost of gas. Deferral account balances at the end of the year are either refunded to or recovered from customers via an application to the BCUC. TGVI's most significant non-commodity deferral account is the RDDA, which has been operating for 15 years.

We have reflected the appropriate return on equity and capital structure in our outlook.

Estimates

We have updated our financial model to reflect the planned acquisition of Terasen Inc. from Kinder Morgan Inc., and the foregoing issuance of subscription receipts. We have assumed that both transactions close mid-2007. Our diluted 2007 and 2008 EPS estimates increase to \$1.43 and \$1.54, respectively, from \$1.38 and \$1.44.

Fortis Inc. has substantial experience in the acquisition, ownership and operation of regulated electric utilities. Although there are strong parallels between the natural gas distribution and electric utility businesses (i.e., among other things the businesses are natural monopoly, network operations), the natural gas distribution business of Terasen Inc. is subject to a number of risks:

- **Competitiveness of Natural Gas in British Columbia:** Prior to 2000, natural gas consistently had a substantial competitive advantage compared with electricity throughout the Lower Mainland, Inland, and Columbia regions. However, with the increasing price of natural gas, the price of electricity for residential customers in British Columbia is now only marginally higher than the comparable price for natural gas. There is no assurance that natural gas will continue to maintain a competitive price advantage in the future. If natural

gas pricing becomes uncompetitive with electricity pricing, Terasen Gas' ability to add new customers could be impaired, and existing customers could reduce their consumption of natural gas or eliminate its usage altogether.

- **Regulatory Risk:** The regulated operations of Terasen are subject to the normal uncertainties faced by regulated companies. These uncertainties include the approval by the BCUC of customer rates, which permit a reasonable opportunity to recover on a timely basis the estimated costs of providing services, including a fair rate of return on rate base. Upgrades of existing facilities and the addition of new facilities require the approval of the BCUC. Capital cost overruns relative to approvals granted might not be recoverable in customer rates. The ability of Terasen to recover the actual costs of providing services and to earn the approved rates of return depends on achieving the forecasts established in the rate-setting process.
- **Growth Dependent on Housing Market:** Terasen is essentially a mature business with very low growth prospects in British Columbia. Over the last few years, growth has mainly come from housing starts in British Columbia, which is currently trending above long-term averages. Housing starts have been favourably impacted by a number of economic factors, including low interest rates, consumer confidence, increased fiscal stimulus by the provincial and federal governments, and the 2010 Olympics. Although these economic factors still continue to be robust, there is a significant risk that they will not be sustained at current levels.
- **Alternative Energy Sources:** The residential heating market today in British Columbia included alternatives, such as ground source and air source heat pumps, that are much more economical than gas. Customer environmental awareness and recent negative perceptions regarding gas coupled with increased headline news on the Kyoto Accord are also influencing energy choices. There is an increased risk compared to prior years that Terasen will lose a number of projects to non-gas/non-traditional heating systems.

There are a number of risks specific to Terasen Gas Vancouver Island:

- **Relatively small greenfield utility:** TGVI is still a franchise under development, that has been built from the ground up over the last 15 years. The company continues to have difficulty developing markets in its service area in the face of relatively high natural gas prices, low population density in its service area and very competitive electricity rates.
- **Elimination of provincial royalty revenues:** To assist with competitive rates during franchise development, the provincial government provided and continues to provide royalty revenues that currently cover approximately 20% of the cost of service. The royalty revenues are expected to expire at the end of 2011, after which TGVI's customers will absorb the full commodity cost of gas. The company expects that annual royalty payments will grow to \$60 million by 2012. A request to the BCUC for a \$60 million revenue requirement in 2012 would result in a 35 to 40 per cent increase in rates across all customer classes.
- **Recovery of the Revenue Deficiency Deferral Account (RDDA):** Since 2003, TGVI's rates were set at a discount to competing fuels that were too low to recover TGVI's cost of service, which resulted in accumulations to the RDDA. Under the approved 2006–2007

negotiated settlement agreement, the RDDA balance is expected to be reduced by approximately \$17.4 from a total of \$52 million as of December 31, 2005, or to roughly \$29.9 million by the end of 2007. Even though the company has an opportunity to recover the remainder of the RDDA, there is no assurance that it will be able to do so before the elimination of the provincial royalty payments at the end of 2011.

- High dependence on industrial loads: Over 65 per cent of throughput is delivered to industrial customers, two-thirds of which is contracted on a year-to-year basis with no long-term commitments. A loss of industrial customers may increase the cost of service for residential and commercial customers, thereby decreasing the competitiveness of rates.
- Supply risk: TGVI is dependant on a single pipeline system that traverses rugged terrain, with underwater and marine crossings. Operational problems at the undersea high pressure transmission facilities may reduce or stop the supply of gas from the BC mainland to the island.
- Future repayment of senior government debt: The company is liable for a \$75 million non-interest bearing senior government debt, currently sitting as a credit to rate base. Repayment of the debt will increase TGVI's rate base and contribute to a higher cost of service.

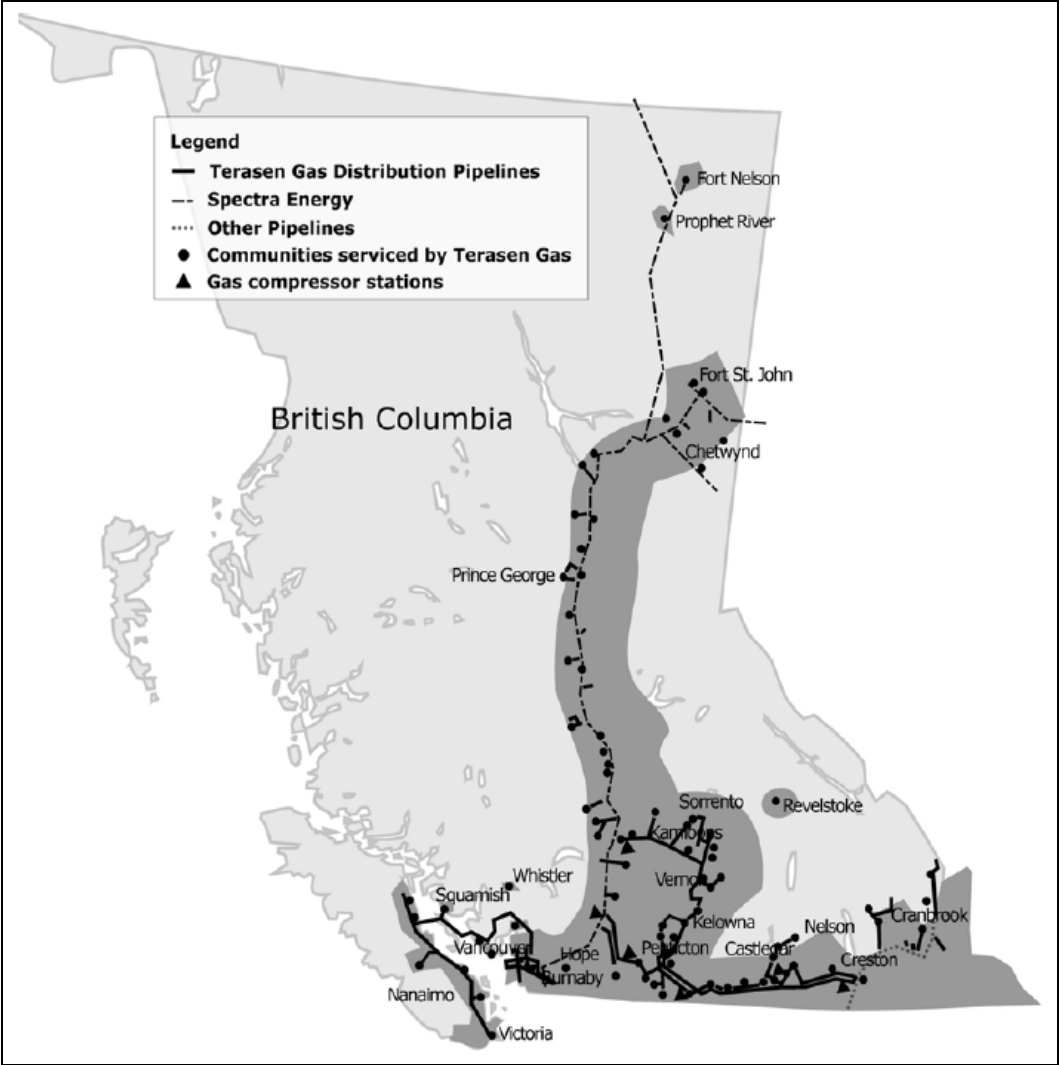

Valuation

Our target price of \$31.00 reflects a weighted average valuation approach: 18x diluted 2008 EPS of \$1.54 (12.5%), 2.0x 2008E BV of \$17.96 (12.5%), and a target yield of 3.0% (75%), assuming 2008 dividends per share of \$0.92.

Recommendation

We believe that the shares of Fortis Inc. are attractively valued at current levels. We are resuming coverage with an Outperform rating.

Company Risk Disclosure

In addition to the risks involved in investing in common stocks generally, we also highlight the following risks that pertain to this company. Operations are subject to complex regulation by a variety of provincial, state and federal (Canada, Cayman Islands & Belize) agencies. Changes in regulation may adversely affect performance.

Financial performance depends on the availability of installed generation and the production of electric power by third parties. Fortis Properties' cash flow is dependent on hotel room vacancy rates and commercial building occupancy levels. The company's operations in Belize may be disrupted and assets may be damaged by hurricanes and/or tropical storms.

Analyst's Certification

I, Karen Taylor, CFA, hereby certify that the views expressed in this report accurately reflect my personal views about the subject securities or issuers. I also certify that no part of my compensation was, is, or will be, directly or indirectly, related to the specific recommendations or views expressed in this report.

General Disclosure

The information and opinions in this report were prepared by BMO Nesbitt Burns Inc. and BMO Nesbitt Burns Ltée./Ltd., collectively ("BMO NB"). BMO NB is not subject to U.S. rules with regard to the preparation of research reports and the independence of analysts. "BMO Capital Markets" is a trade name used by the BMO Investment Banking Group, which includes the wholesale/institutional arms of Bank of Montreal and BMO NB in Canada, and BMO Capital Markets Corp. in the U.S. BMO Capital Markets Corp. is an affiliate of BMO NB. BMO NB and BMO Capital Markets Corp. are subsidiaries of Bank of Montreal. Bank of Montreal or its affiliates ("BMO Financial Group") has lending arrangements with, or provide other remunerated services to, many issuers covered by BMO NB research. A significant lending relationship may exist between BMO Financial Group and certain of the issuers mentioned herein. The reader should assume that BMO NB, BMO Capital Markets Corp., Bank of Montreal or their affiliates may have a conflict of interest and should not rely solely on this report in evaluating whether or not to buy or sell securities of issuers discussed herein. The opinions, estimates and projections contained in this report are those of BMO NB as of the date of this report and are subject to change without notice. BMO NB endeavours to ensure that the contents have been compiled or derived from sources that we believe are reliable and contain information and opinions that are accurate and complete. However, BMO NB makes no representation or warranty, express or implied, in respect thereof, takes no responsibility for any errors and omissions contained herein and accepts no liability whatsoever for any loss arising from any use of, or reliance on, this report or its contents. Information may be available to BMO NB or its affiliates that is not reflected in this report. The information in this report is not intended to be used as the primary basis of investment decisions, and because of individual client objectives, should not be construed as advice designed to meet the particular investment needs of any investor. This material is for information purposes only and is not an offer to sell or the solicitation of an offer to buy any security. The research analyst and/or associates who prepared this report are compensated based upon (among other factors) the overall profitability of BMO NB and its affiliates, which includes the overall profitability of investment banking services. BMO NB, or its affiliates expect to receive or will seek compensation for investment banking services within the next 3 months from all issuers covered by BMO NB. BMO NB or its affiliates will buy from or sell to customers the securities of issuers mentioned in this report on a principal basis. BMO NB or its affiliates, officers, directors or employees may have a long or short position in the securities discussed herein, related securities or in options, futures or other derivative instruments based thereon.

Company Specific Disclosure

Disclosure 2: BMO NB has undertaken an underwriting liability with respect to this issuer within the past 12 months.

Disclosure 3: BMO NB has provided investment banking services with respect to this issuer within the past 12 months.

Disclosure 7: BMO Capital Markets Corp. or an affiliate has received compensation for investment banking services from this issuer within the past 12 months.

Disclosure 9: BMO Capital Markets Corp. or an affiliate received compensation for products or services other than investment banking services within the past 12 months.

Disclosure 10: This issuer is a client (or was a client) of BMO NB, BMO Capital Markets Corp. or an affiliate within the past 12 months: Investment Banking Services & Non-Securities Related Services.

Distribution of Ratings

Rating Category	BMO Rating	BMO Universe	BMO I.B. Clients*	First Call Universe**
Buy	Outperform	39%	41%	45%
Hold	Market Perform	52%	52%	47%
Sell	Underperform	9%	7%	8%

* Reflects rating distribution of all companies where BMO Capital Markets has received compensation for Investment Banking services.

** Reflects rating distribution of all North American equity research analysts.

Ratings Key

We use the following ratings system definitions:

OP = Outperform - Forecast to outperform the market;

Mkt = Market Perform - Forecast to perform roughly in line with the market;

Und = Underperform - Forecast to underperform the market;

(S) = speculative investment;

NR = No rating at this time;

R = Restricted – Dissemination of research is currently restricted.

Market performance is measured by a benchmark index such as the S&P/TSX Composite Index, S&P 500, Nasdaq Composite, as appropriate for each company. Prior to September 1, 2003, a fourth rating tier—Top Pick—was used to designate those stocks we felt would be the best performers relative to the market. Our six Top 15 lists which guide investors to our best ideas according to six different objectives (large, small, growth, value, income and quantitative) have replaced the Top Pick rating.

Dissemination of Research

Our research publications are available via our web site <http://bmocapitalmarkets.com>. Institutional clients may also receive our research via FIRST CALL Research Direct and Reuters. All of our research is made widely available at the same time to all BMO NB, BMO Capital Markets Corp. and BMO Nesbitt Burns Securities Ltd. client groups entitled to our research. Please contact your investment advisor or institutional salesperson for more information.

Additional Matters

TO U.S. RESIDENTS: BMO Capital Markets Corp. and/or BMO Nesbitt Burns Securities Ltd., affiliates of BMO NB, furnish this report to U.S. residents and accept responsibility for the contents herein, except to the extent that it refers to securities of Bank of Montreal. Terasen Acquisition Receives Competition Act Clearance

Impact

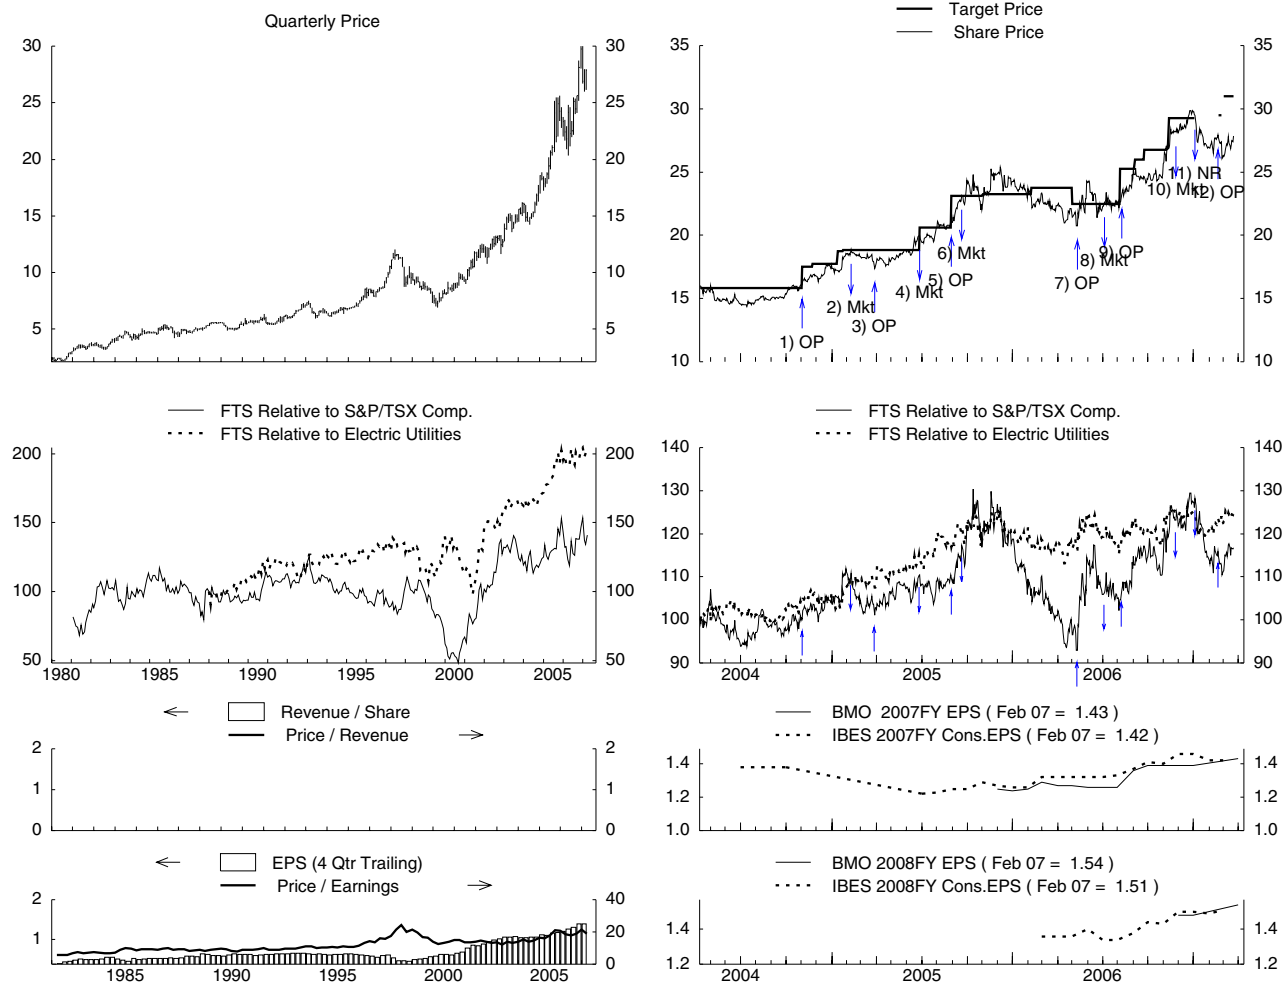

Neutral

Details & Analysis

Fortis Inc. has announced that it has received a no-action letter from the Competition Bureau of Canada regarding the previously announced agreement to acquire all of the shares of Terasen Inc. from Kinder Morgan Canada. The “no-action” letter from the Bureau is in line with expectations. Approval of the planned transaction by the British Columbia Utilities Commission is still outstanding and a schedule has been established to consider the application filed by Fortis to acquire the shares. The application is to be examined by a written public hearing process, scheduled to begin on March 14, with final company responses filed by April 5. A decision by the Commission is expected to follow thereafter. We do not believe that the Commission is likely to unreasonably withhold approval of the application. Kinder Morgan must also complete a number of conditions precedent, including: (i) sale of Corridor Pipeline to Inter Pipeline Fund; and (ii) transfer of the Trans Mountain and Express Pipeline systems. We continue to expect that the transaction is likely to close prior to the end of H1/07. We rate the shares of Fortis Outperform.

This report was prepared by an Analyst employed by a Canadian affiliate, BMO Nesbitt Burns Inc., and who is not registered as a research analyst under NYSE/NASD rules. For disclosure statements, including the Analyst's Certification, please refer to pages 2 to 4.

Disclosure 9: BMO Capital Markets Corp. or an affiliate received compensation for products or services other than investment banking services within the past 12 months.

Disclosure 10: This issuer is a client (or was a client) of BMO NB, BMO Capital Markets Corp. or an affiliate within the past 12 months: Investment Banking Services & Non-Securities Related Services.

Distribution of Ratings

Rating Category	BMO Rating	BMO Universe	BMO I.B. Clients*	First Call Universe**
Buy	Outperform	39%	41%	45%

Hold	Market Perform	52%	52%	47%
Sell	Underperform	9%	7%	8%

* Reflects rating distribution of all companies where BMO Capital Markets has received compensation for Investment Banking services.

** Reflects rating distribution of all North American equity research analysts.

Ratings Key

We use the following ratings system definitions:

OP = Outperform - Forecast to outperform the market;

Mkt = Market Perform - Forecast to perform roughly in line with the market;

Und = Underperform - Forecast to underperform the market;

(S) = speculative investment;

NR = No rating at this time;

R = Restricted – Dissemination of research is currently restricted.

Market performance is measured by a benchmark index such as the S&P/TSX Composite Index, S&P 500, Nasdaq Composite, as appropriate for each company. Prior to September 1, 2003, a fourth rating tier—Top Pick—was used to designate those stocks we felt would be the best performers relative to the market. Our six Top 15 lists which guide investors to our best ideas according to six different objectives (large, small, growth, value, income and quantitative) have replaced the Top Pick rating.

Dissemination of Research

Our research publications are available via our web site <http://bmocapitalmarkets.com>. Institutional clients may also receive our research via FIRST CALL Research Direct and Reuters. All of our research is made widely available at the same time to all BMO NB, BMO Capital Markets Corp. and BMO Nesbitt Burns Securities Ltd. client groups entitled to our research. Please contact your investment advisor or institutional salesperson for more information.

BCUC Approves Two-Year Extension of Rate Settlements [Headline Here](#)

Impact

Neutral

Details & Analysis

The British Columbia Utilities Commission has announced that it has approved a two-year extension of the 2004-2007 Multi-Year Performance-Based Rate Plan currently in place for Terasen Gas Inc. (100% - Terasen Inc.) and a similar extension of the 2006-2007 Negotiated Settlement Agreement currently in place for Terasen Gas (Vancouver Island) Inc. (100% - Terasen Inc.). The extensions approved by the commission apply in 2007 and 2008, inclusively. Approval by the Commission is in line with expectations and the terms of the extensions are fully reflected in our outlook for the regulated gas distribution operations of Terasen Inc. We note that the Commission has yet to issue its determination regarding the planned acquisition of Terasen Inc. by Fortis Inc. The established regulatory process to consider the acquisition is expected to conclude on April 5 and a decision from the Commission is expected thereafter. We continue to believe that approval by the Commission will not be unreasonably withheld and that the transaction is likely to close mid-2007. The Competition Bureau of Canada issued a “no action” letter regarding the transaction on March 21 and Kinder Morgan must also resolve certain conditions precedent. We continue to rate the shares of Fortis Inc. Outperform.

This report was prepared by an Analyst employed by a Canadian affiliate, BMO Nesbitt Burns Inc., and who is not registered as a research analyst under NYSE/NASD rules. For disclosure statements, including the Analyst's Certification, please refer to pages 2 to 4.

Company Risk Disclosure

In addition to the risks involved in investing in common stocks generally, we also highlight the following risks that pertain to this company. Operations are subject to complex regulation by a variety of provincial, state and federal (Canada, Cayman Islands & Belize) agencies. Changes in regulation may adversely affect performance.

Financial performance depends on the availability of installed generation and the production of electric power by third parties. Fortis Properties' cash flow is dependent on hotel room vacancy rates and commercial building occupancy levels. The company's operations in Belize may be disrupted and assets may be damaged by hurricanes and/or tropical storms.

Analyst's Certification

I, Karen Taylor, CFA, hereby certify that the views expressed in this report accurately reflect my personal views about the subject securities or issuers. I also certify that no part of my compensation was, is, or will be, directly or indirectly, related to the specific recommendations or views expressed in this report.

General Disclosure

The information and opinions in this report were prepared by BMO Nesbitt Burns Inc. and BMO Nesbitt Burns Ltée./Ltd., collectively ("BMO NB"). BMO NB is not subject to U.S. rules with regard to the preparation of research reports and the independence of analysts. "BMO Capital Markets" is a trade name used by the BMO Investment Banking Group, which includes the wholesale/institutional arms of Bank of Montreal and BMO NB in Canada, and BMO Capital Markets Corp. in the U.S. BMO Capital Markets Corp. is an affiliate of BMO NB. BMO NB and BMO Capital Markets Corp. are subsidiaries of Bank of Montreal. Bank of Montreal or its affiliates ("BMO Financial Group") has lending arrangements with, or provide other remunerated services to, many issuers covered by BMO NB research. A significant lending relationship may exist between BMO Financial Group and certain of the issuers mentioned herein. The reader should assume that BMO NB, BMO Capital Markets Corp., Bank of Montreal or their affiliates may have a conflict of interest and should not rely solely on this report in evaluating whether or not to buy or sell securities of issuers discussed herein. The opinions, estimates and projections contained in this report are those of BMO NB as of the date of this report and are subject to change without notice. BMO NB endeavours to ensure that the contents have been compiled or derived from sources that we believe are reliable and contain information and opinions that are accurate and complete. However, BMO NB makes no representation or warranty, express or implied, in respect thereof, takes no responsibility for any errors and omissions contained herein and accepts no liability whatsoever for any loss arising from any use of, or reliance on, this report or its contents. Information may be available to BMO NB or its affiliates that is not reflected in this report. The information in this report is not intended to be used as the primary basis of investment decisions, and because of individual client objectives, should not be construed as advice designed to meet the particular investment needs of any investor. This material is for information purposes only and is not an offer to sell or the solicitation of an offer to buy any security. The research analyst and/or associates who prepared this report are compensated based upon (among other factors) the overall profitability of BMO NB and its affiliates, which includes the overall profitability of investment banking services. BMO NB, or its affiliates expect to receive or will seek compensation for investment banking services within the next 3 months from all issuers covered by BMO NB. BMO NB or its affiliates will buy from or sell to customers the securities of issuers mentioned in this report on a principal basis. BMO NB or its affiliates, officers, directors or employees may have a long or short position in the securities discussed herein, related securities or in options, futures or other derivative instruments based thereon.

Company Specific Disclosure

Disclosure 2: BMO NB has undertaken an underwriting liability with respect to this issuer within the past 12 months.

Disclosure 3: BMO NB has provided investment banking services with respect to this issuer within the past 12 months.

BCUC Approves Acquisition of Terasen Inc.

Impact

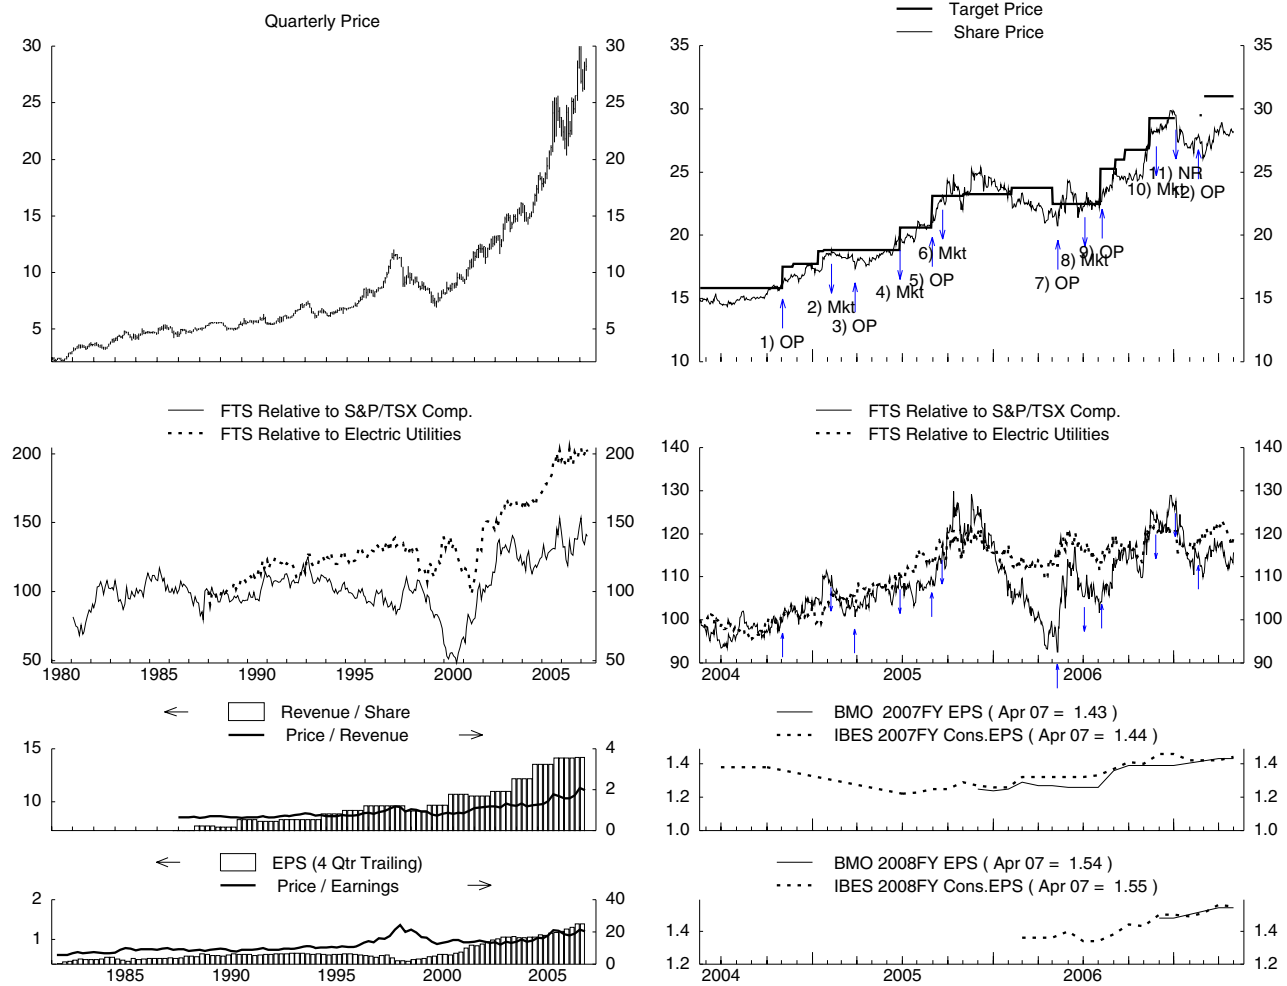

Neutral

Details & Analysis

The British Columbia Utilities Commission (BCUC) issued an Order and Reasons for Decision on April 30, 2007, approving the acquisition of 100% of Terasen Inc. by Fortis Inc. The planned acquisition of the natural gas distribution businesses of Terasen Inc. by Fortis was announced on February 26, 2007. The BCUC approved the transaction subject to: (i) ring-fencing conditions - the continued application of the five ring-fencing conditions implemented by the Commission at the time Terasen was acquired by Kinder Morgan Inc.; (ii) governance – existing governance policies are to be maintained, including continued independence of Directors of Terasen Inc.; (iii) location of functions and data – geographic location of any existing functions or data currently in the service area cannot change without the prior approval of the Commission; and (iv) data and server Providers – the location of data and servers providing service to the Terasen utilities is to be restricted to Canada and that any proposal to locate data and servers outside Canada will require the Commission's approval. These conditions, plus assurances made by Fortis that have not been made conditions of approval, are not likely to create hardship for Fortis, as they are consistent with the company's current, decentralized management practices. The five ring-fencing conditions previously implemented are: (1) requirement to maintain actual equity at a level at least equal to the deemed equity allowed by the Commission; (2) prohibition against the payment of dividends if doing so would violate (1) above; (3) prohibition against the financial support of affiliates of the utilities and requirement to maintain separate banking and cash management arrangements and a prohibition against tax sharing agreements; (4) no affiliate transactions that are not compliant with Commission guidelines and without Commission approval in certain circumstances; and (5) prohibition against the provision of financial support to or to guarantee non-regulated activities by the Terasen utilities. We believe that the transaction is likely to close by the end of Q2/07, once Kinder Morgan has completed the separation of its petroleum transportation operations from Terasen Inc. No change in view. We rate the shares of Fortis Inc. Outperform.

This report was prepared by an Analyst employed by a Canadian affiliate, BMO Nesbitt Burns Inc., and who is not registered as a research analyst under NYSE/NASD rules. For disclosure statements, including the Analyst's Certification, please refer to pages 2 to 4.

Distribution of Ratings

Rating Category	BMO Rating	BMO Universe	BMO I.B. Clients*	First Call Universe**
Buy	Outperform	39%	41%	45%
Hold	Market Perform	52%	52%	47%
Sell	Underperform	9%	7%	8%

* Reflects rating distribution of all companies where BMO Capital Markets has received compensation for Investment Banking services.

** Reflects rating distribution of all North American equity research analysts.

Ratings Key

We use the following ratings system definitions:

OP = Outperform - Forecast to outperform the market;

Mkt = Market Perform - Forecast to perform roughly in line with the market;

Und = Underperform - Forecast to underperform the market;

(S) = speculative investment;

NR = No rating at this time;

R = Restricted – Dissemination of research is currently restricted.

Market performance is measured by a benchmark index such as the S&P/TSX Composite Index, S&P 500, Nasdaq Composite, as appropriate for each company. Prior to September 1, 2003, a fourth rating tier—Top Pick—was used to designate those stocks we felt would be the best performers relative to the market. Our six Top 15 lists which guide investors to our best ideas according to six different objectives (large, small, growth, value, income and quantitative) have replaced the Top Pick rating.

Dissemination of Research

Our research publications are available via our web site <http://bmocapitalmarkets.com>. Institutional clients may also receive our research via FIRST CALL Research Direct and Reuters. All of our research is made widely available at the same time to all BMO NB, BMO Capital Markets Corp. and BMO Nesbitt Burns Securities Ltd. client groups entitled to our research. Please contact your investment advisor or institutional salesperson for more information.

KMP Completes Purchase of Trans Mountain

Impact

Neutral

Details & Analysis

Kinder Morgan Energy Partners has announced that it has completed the purchase of the Trans Mountain Pipeline System from Kinder Morgan Inc. for US\$550 million plus US\$450 million of debt associated with the planned TMX1 - Anchor Loop expansion that is expected to increase capacity on the Trans Mountain Pipeline to 300,000 bbls/d from 260,000 bbls/d presently by November 2008. We estimate that the transaction was priced at approximately 10.0x EV/EBITDA (US\$1 billion over discounted 2010E EBITDA of US\$123 million. Kinder Morgan must also close the sale of the Corridor Pipeline System to Inter Pipeline Fund in mid-May (this transaction was announced on March 5, 2007) and must also transfer its 33.3% interest in the Express Pipeline System from Terasen Inc., if this has not already occurred. We continue to expect that the planned acquisition of Terasen Inc. by Fortis Inc. closes no later than June 30. No change in view. We rate the shares of Fortis Inc. Outperform.

This report was prepared by an Analyst employed by a Canadian affiliate, BMO Nesbitt Burns Inc., and who is not registered as a research analyst under NYSE/NASD rules. For disclosure statements, including the Analyst's Certification, please refer to pages 2 to 4.

Company Risk Disclosure

In addition to the risks involved in investing in common stocks generally, we also highlight the following risks that pertain to this company. Operations are subject to complex regulation by a variety of provincial, state and federal (Canada, Cayman Islands & Belize) agencies. Changes in regulation may adversely affect performance.

Financial performance depends on the availability of installed generation and the production of electric power by third parties. Fortis Properties' cash flow is dependent on hotel room vacancy rates and commercial building occupancy levels. The company's operations in Belize may be disrupted and assets may be damaged by hurricanes and/or tropical storms.

Analyst's Certification

I, Karen Taylor, CFA, hereby certify that the views expressed in this report accurately reflect my personal views about the subject securities or issuers. I also certify that no part of my compensation was, is, or will be, directly or indirectly, related to the specific recommendations or views expressed in this report.

General Disclosure

The information and opinions in this report were prepared by BMO Nesbitt Burns Inc. and BMO Nesbitt Burns Ltée./Ltd., collectively ("BMO NB"). BMO NB is not subject to U.S. rules with regard to the preparation of research reports and the independence of analysts. "BMO Capital Markets" is a trade name used by the BMO Investment Banking Group, which includes the wholesale/institutional arms of Bank of Montreal and BMO NB in Canada, and BMO Capital Markets Corp. in the U.S. BMO Capital Markets Corp. is an affiliate of BMO NB. BMO NB and BMO Capital Markets Corp. are subsidiaries of Bank of Montreal. Bank of Montreal or its affiliates ("BMO Financial Group") has lending arrangements with, or provide other remunerated services to, many issuers covered by BMO NB research. A significant lending relationship may exist between BMO Financial Group and certain of the issuers mentioned herein. The reader should assume that BMO NB, BMO Capital Markets Corp., Bank of Montreal or their affiliates may have a conflict of interest and should not rely solely on this report in evaluating whether or not to buy or sell securities of issuers discussed herein. The opinions, estimates and projections contained in this report are those of BMO NB as of the date of this report and are subject to change without notice. BMO NB endeavours to ensure that the contents have been compiled or derived from sources that we believe are reliable and contain information and opinions that are accurate and complete. However, BMO NB makes no representation or warranty, express or implied, in respect thereof, takes no responsibility for any errors and omissions contained herein and accepts no liability whatsoever for any loss arising from any use of, or reliance on, this report or its contents. Information may be available to BMO NB or its affiliates that is not reflected in this report. The information in this report is not intended to be used as the primary basis of investment decisions, and because of individual client objectives, should not be construed as advice designed to meet the particular investment needs of any investor. This material is for information purposes only and is not an offer to sell or the solicitation of an offer to buy any security. The research analyst and/or associates who prepared this report are compensated based upon (among other factors) the overall profitability of BMO NB and its affiliates, which includes the overall profitability of investment banking services. BMO NB, or its affiliates expect to receive or will seek compensation for investment banking services within the next 3 months from all issuers covered by BMO NB. BMO NB or its affiliates will buy from or sell to customers the securities of issuers mentioned in this report on a principal basis. BMO NB or its affiliates, officers, directors or employees may have a long or short position in the securities discussed herein, related securities or in options, futures or other derivative instruments based thereon.

Company Specific Disclosure

Disclosure 2: BMO NB has undertaken an underwriting liability with respect to this issuer within the past 12 months.

Disclosure 3: BMO NB has provided investment banking services with respect to this issuer within the past 12 months.

Disclosure 7: BMO Capital Markets Corp. or an affiliate has received compensation for investment banking services from this issuer within the past 12 months.

Disclosure 9: BMO Capital Markets Corp. or an affiliate received compensation for products or services other than investment banking services within the past 12 months.

Disclosure 10: This issuer is a client (or was a client) of BMO NB, BMO Capital Markets Corp. or an affiliate within the past 12 months: Investment Banking Services & Non-Securities Related Services.

Distribution of Ratings

Rating Category	BMO Rating	BMO Universe	BMO I.B. Clients*	First Call Universe**
Buy	Outperform	39%	41%	45%
Hold	Market Perform	52%	52%	47%
Sell	Underperform	9%	7%	8%

* Reflects rating distribution of all companies where BMO Capital Markets has received compensation for Investment Banking services.

** Reflects rating distribution of all North American equity research analysts.

Ratings Key

We use the following ratings system definitions:

OP = Outperform - Forecast to outperform the market;

Mkt = Market Perform - Forecast to perform roughly in line with the market;

Und = Underperform - Forecast to underperform the market;

(S) = speculative investment;

NR = No rating at this time;

R = Restricted – Dissemination of research is currently restricted.

Market performance is measured by a benchmark index such as the S&P/TSX Composite Index, S&P 500, Nasdaq Composite, as appropriate for each company. Prior to September 1, 2003, a fourth rating tier—Top Pick—was used to designate those stocks we felt would be the best performers relative to the market. Our six Top 15 lists which guide investors to our best ideas according to six different objectives (large, small, growth, value, income and quantitative) have replaced the Top Pick rating.

Dissemination of Research

Our research publications are available via our web site <http://bmocapitalmarkets.com>. Institutional clients may also receive our research via FIRST CALL Research Direct and Reuters. All of our research is made widely available at the same time to all BMO NB, BMO Capital Markets Corp. and BMO Nesbitt Burns Securities Ltd. client groups entitled to our research. Please contact your investment advisor or institutional salesperson for more information.

Additional Matters

Q1/07 EPS Slightly Higher than Expected

Impact

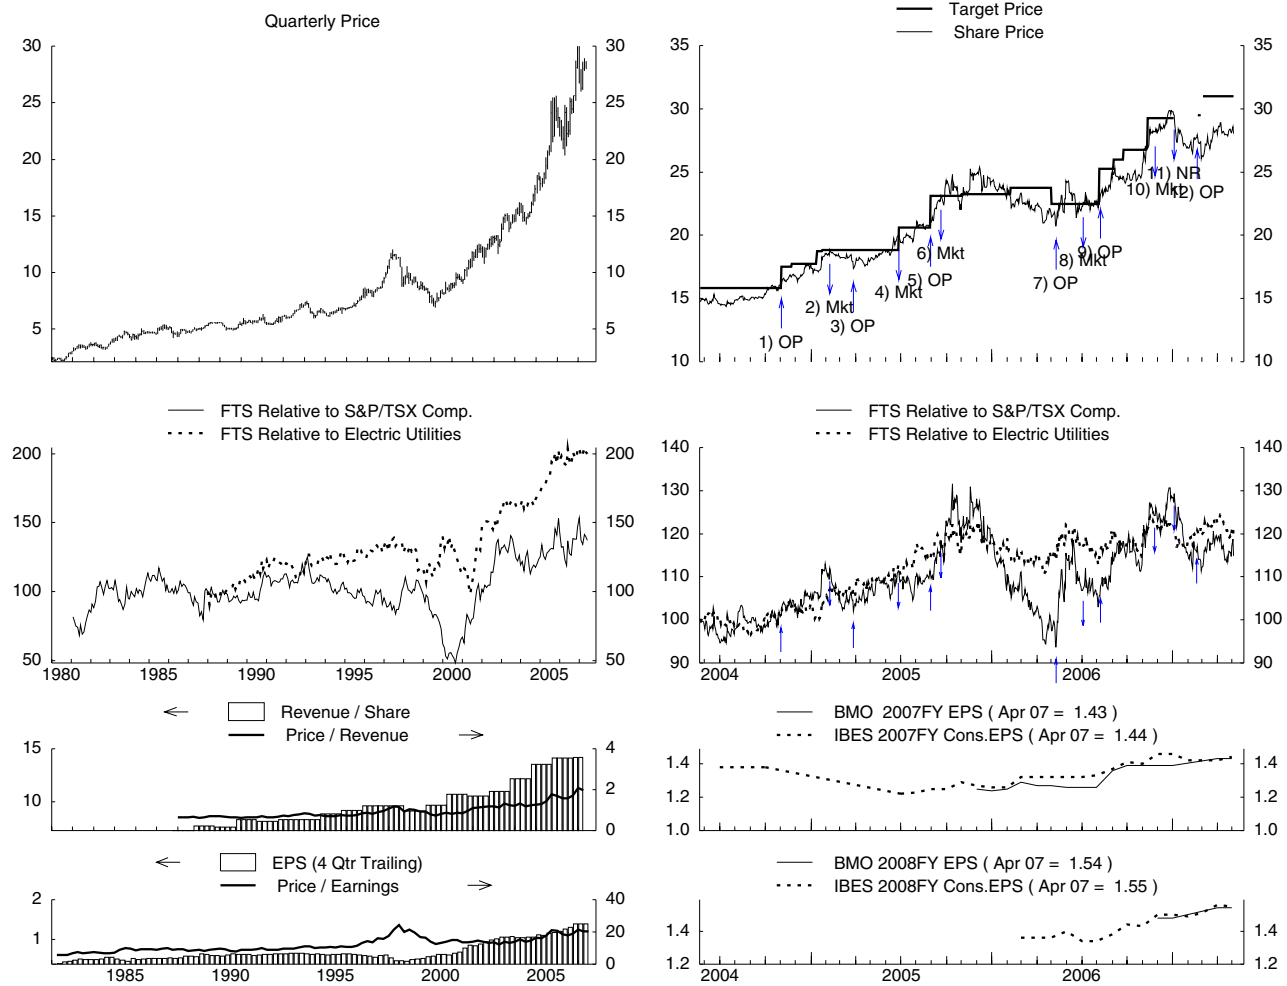

Neutral

Details & Analysis

Fortis Inc. reported Q1/07 EPS of \$0.38. After adjusting for a \$2.4 million after-tax impairment charge incurred by Caribbean Utilities in that company's Q3/07 (period ending January 31, 2007) and highlighted in our comment dated March 5, reported Q1/07 EPS were \$0.40 per share, slightly higher than our expectation of \$0.39 per share. Stronger quarter over quarter was observed in all key business segments, notably Fortis Generation (non-regulated hydro-electric generation), largely due to increased hydroelectric production in Belize and higher average wholesale energy prices in Ontario. The recently acquired utilities in the Turks and Caicos contributed approximately \$1.8 million after-tax in the quarter. We continue to review the release. We rate the shares of Fortis Outperform.

This report was prepared by an Analyst employed by a Canadian affiliate, BMO Nesbitt Burns Inc., and who is not registered as a research analyst under NYSE/NASD rules. For disclosure statements, including the Analyst's Certification, please refer to pages 2 to 4.

Credit Metrics Remain Low But Relatively Stable

Event

Fortis Inc. (Fortis) releases Q1/07 results.

Impact

Neutral.

Key Points

Fortis' earnings for Q1/07 were up 13.4% on Q1/06. The higher returns primarily stemmed from increased earnings from FortisAlberta, increased non-regulated power generation earnings due to higher hydroelectric generation at Belize Electricity and higher wholesale pool prices in Ontario, and contributions from its Fortis Turks and Caicos electric utility acquired in August 2006. The higher earnings translated to higher cash flows compared to Q1/06, however ongoing high capital outlays led to negative free cash flow. Cash flow credit metrics remain weak but adequate. A \$93.4 million drop in debt in Q1/07 coupled with higher shareholders' equity following an issue of common shares, led to a modest drop in leverage, and access to liquidity remains adequate.

Recommendation

Fortis has limited capital market issues outstanding at the holding company level, and what debt there is, is infrequently traded. Nevertheless, we believe the credit profile of Fortis continues to strengthen and will improve further with the increased diversity of regulated cash flows to flow from the Terasen Inc. acquisition. Further, for those investors with exposure to the holding company debt we believe there is a real potential for a ratings upgrade from Standard & Poor's. The benefit of the improving credit profile is not restricted to Fortis' direct debt holders. An improving credit profile for Fortis augurs well for the Fortis subsidiaries, such as FortisAlberta and FortisBC, as the company will be in a better position to assist these utility businesses in funding their significant capital expenditure programs.

Details & Analysis

Earnings and Cash Flow

Fortis' earnings for the first quarter of 2007 were up 13.4% on the corresponding period in 2006. Excluding a \$2.4 million net charge at its Caribbean Utilities subsidiary in the quarter, earnings would have been close to 20% higher. The higher returns primarily stemmed from:

- increased earnings from its expanding FortisAlberta subsidiary;
- higher non-regulated power generation earnings due to higher hydroelectric production at Belize Electricity, and higher average wholesale prices in Ontario; and
- contributions from its Fortis Turks and Caicos electric utility acquired in August 2006.

On an EPS basis, Fortis' reported EPS in the quarter of \$0.38. After adjusting for an after-tax impairment charge incurred by Caribbean Utilities Q1/07 EPS were \$0.40 per share, slightly higher than BMO Capital Market's equity research expectation of \$0.39 per share.

The higher earnings translated to an increase in cash flows compared to Q1/06; however ongoing high capital outlays resulted in negative free cash flow (funds from operations less capital expenditure net of contributions and distributions). Funds from operations (FFO) of \$85.7 million, up from \$76.9 million in Q1/06 was insufficient to meet \$112.7 million of net capital expenditure commitments and \$28.6 million in dividends. The cash flow shortfall was essentially met through proceeds from a common share issue of \$147.6 million in the quarter. Fortis' large capital expenditure program will dominate cash flows outlays and financing activities for the next few years at least, with negative free cash flow expected to be the norm. In the next five years, gross consolidated electric utility expenditure of about \$2.8 billion is expected, with about \$631 million to be undertaken in 2007. Of the 2007 program, about 66% is to be undertaken at its western Canadian subsidiaries, FortisAlberta and FortisBC. If the Terasen Gas acquisition closes as planned, an additional \$1 billion of consolidated gas utility capital expenditure is expected in the next five years.

The company's relative cash flow credit metrics remain weak but adequate (Chart 1). Unadjusted FFO gross interest coverage based on a 12-month rolling basis to March 31, 2007 was 2.8x, consistent with year end 2006, but slightly lower than the 3.0x in fiscal 2005. Not surprising given its partially debt financed expansion of its electricity network asset bases and the delay in receipt of regulated cash flows from the asset constructed, FFO-to-debt remained on the weak side at 11.7% for the 12-months to March 31, 2007, up from 10.9% at year end 2006, but down from 14% in fiscal 2005. We note, however, that the fiscal 2006 FFO-to-debt ratio was adversely affected by the consolidation of Caribbean Utilities' debt at year-end after taking a majority shareholding in the company in November 2006.

Recent Developments

The company's announced acquisition of Terasen Inc. on Feb. 26, 2007 moved a step closer to fruition with the provincial regulator, the British Columbia Utilities Commission, approving the proposed acquisition on April 30, 2007. This most recent step follows the receipt of a no-action letter from the Competition Bureau of Canada on March 20, 2007. What is left to complete the sale process is Kinder Morgan meeting a closing condition, which involves the requirement for it to separate its petroleum operations from Terasen, leaving just the natural gas distribution business operated by Terasen Gas. The condition precedent and financial close of the transaction is expected to be completed in Q2/07.

Capital Structure and Liquidity

A \$93.4 million drop in debt outstanding in Q1/07 coupled with higher shareholders' equity supported by an issue of common shares of \$147.6 million, led to a modest drop in Fortis' leverage at March 31, 2007. A significant portion of the proceeds from the equity issue was used to repay existing indebtedness at Fortis, fund a portion of acquisitions undertaken in 2006, and support capital expenditure programs. Leverage, as measured by total debt-to-total capital and treating the preference shares as equity at the end of Q1/07 was 56.9%, down from 59.7% at year end 2006. Total consolidated debt at quarter end was \$2.65 billion. The lower debt in the quarter versus year end 2006 reflects a combination of the reclassification of deferred charges and other assets as long-term debt (\$21.2 million) due to the adoption of a new accounting standard, in addition to net debt repayments on long-term credit facilities at Fortis, FortisAlberta and FortisBC. The reduction in debt was partly offset by FortisAlberta's \$110 million debenture offering, which closed Jan. 3, 2007.

The vast majority of Fortis' consolidated debt, about 90%, resides at the company's various subsidiaries. Debt at the holding company level comprises \$100 million of senior unsecured debentures maturing 2010, US\$150 million senior unsecured notes maturing 2014, and about US\$59 million in unsecured subordinated convertible debentures due between 2012 and 2016, after US\$1.1 million of the company's 2012 subordinated debentures were converted to common shares on March 21, 2007. The proportion of holding company debt in the consolidated capital structure will be significantly reduced with the addition of Terasen Inc.'s \$2.3 billion of debt on the close of the acquisition transaction. The company's leverage is expected to remain about its target level of 60%, and with the successful issuance of \$1.15 billion of subscription receipts in the quarter to fund its \$3.7 billion Terasen Inc. acquisition, this should remain the case.

Fortis' maintains adequate access to liquidity. Unused capacity under the company's \$963.5 million of consolidated lines of credit was \$722.8 million at the end of Q1/07 after draw downs and outstanding letters of credit, up from \$546.7 million at Dec. 31. 2006. The available capacity is sufficient to meet operating and capital requirements and refinancing needs. At the end of the quarter Fortis also had consolidated cash and cash equivalents of \$43.2 million. Further, in Q1/07 the company established \$1.425 billion non-revolving term credit facilities to fund the Terasen acquisition, of which advances of about \$300 million are expected to be drawn to complete the transaction. Maturing debt commitments and amortising debt repayments are manageable with less than \$100 million of existing long-term debt due in the next 12 months and under \$300 million in the next three years. We note, however, that if the Terasen Inc. acquisition closes as expected in Q2/07, the company's consolidated debt maturities in 2007 will also include \$250 million of maturing debt at Terasen Gas Inc. in October 2007.

Credit Ratings

As a result of its proposed acquisition of Terasen Inc., Fortis's corporate credit rating and senior unsecured debt issue rating face potential positive rating action.

Standard & Poor's places its ratings on Fortis on CreditWatch with Positive Implications on Feb. 26, 2007, following its announced acquisition of Terasen Inc. Of significance, the agency advised that it was opening the door to a possible modest rating separation between Fortis and some of its regulated subsidiaries. The open door suggests the agency's approach to analyzing Fortis may deviate from its current consolidated rating methodology to include a review of the credit profile from a deconsolidated point of view. If this approach is followed we see an upgrade of Fortis' corporate and senior debt issue ratings as a distinct possibility. In the event the corporate credit rating is affirmed under the agency's consolidated rating approach, we also believe an opportunity exists for the senior unsecured rating to be upgraded. The basis for the upgrade would be the added diversity the Terasen acquisition provides to the Fortis group with the agency's structural subordinated criteria providing the opportunity for the debt at the holding company level to be rated the same as the corporate credit rating based on sufficient business and/or geographic diversity of the subsidiaries. Fortis' senior debt rating is currently notched off from its corporate credit rating to reflect the debt's structurally subordinated position relative to the debt of its operating companies.

DBRS confirmed its ratings on Fortis on Feb. 26, 2007 following its announced intention to acquire 100% of the common shares of Terasen Inc. DBRS believes the transaction will have a positive impact on Fortis's overall business risk profile as a result of the acquisition of stable, low-risk gas distribution assets. From a financial risk perspective, DBRS expects a modest decline in consolidated interest coverage metrics, given the existing levels of debt at the acquired entities; however, it anticipates a modest improvement in non-consolidated credit metrics, given that the transaction is predominantly equity financed, coupled with the historical strength of Terasen Gas Inc.'s dividends. Overall, DBRS views the predominantly equity-financed acquisition of regulated assets as a good strategic fit for Fortis and views the proposed transaction as credit neutral to slightly credit positive.

Recommendation

Fortis has limited capital market issues outstanding at the holding company level, and what debt there is, is infrequently traded. Nevertheless, we believe the credit profile of Fortis continues to strengthen and will improve further with the increased diversity of regulated cash flows to flow from the Terasen Inc. acquisition. Further, for those investors with exposure to the holding company debt we believe there is a real potential for a ratings upgrade from Standard & Poor's. The benefit of the improving credit profile is not restricted to Fortis' direct debt holders. An improving credit profile for Fortis augurs well for the Fortis subsidiaries, such as FortisAlberta and FortisBC, as the company will be in a better position to assist these utility businesses in funding their significant capital expenditure programs.

 Assoc: Benjamin Pham

Q1/07 Slightly Higher than Expected – Outperform Rating Unchanged

Event

Fortis reported Q1/07 EPS of \$0.38. After adjusting for a \$2.4 million after-tax impairment charge incurred by Caribbean Utilities in that company's Q3/07 (period ending January 31, 2007) and highlighted in our comment dated March 5, 2007, reported Q1/07 EPS were \$0.40 per share, slightly higher than our expectation of \$0.39 per share. Strong quarter over quarter performance was observed in all key business segments, notably Fortis Generation (non-regulated hydroelectric generation), largely due to increased hydroelectric production in Belize and higher average wholesale energy prices in Ontario. The recently acquired utilities in the Turks and Caicos contributed approximately \$1.8 million after-tax in the quarter.

Impact

Neutral.

Forecasts

Unchanged. Our diluted 2007 EPS increases marginally due to rounding and the effect that a slightly higher share price has on the diluted EPS calculation. Our diluted 2007E and 2008E EPS estimates are \$1.44 and \$1.54, respectively. Our outlook fully reflects the successful close of the acquisition of Terasen Inc. from Kinder Morgan by June 30, 2007.

Valuation

Our target price of \$31.00 reflects a weighted approach: 18.0x diluted 2008E EPS of \$1.64 (12.5%), 2.0x 2008E BV of \$17.97 (12.5%), and a target yield of 3.00% (75%), assuming 2008 dividends of \$0.92.

Recommendation

We believe the shares are attractively valued at current levels. Our rating is Outperform.

Price (2-May) \$28.02 **52-Week High** \$30.00
Target Price \$31.00 **52-Week Low** \$20.36

Details & Analysis

Fortis reported Q1/07 EPS of \$0.38. After adjusting for a \$2.4 million after-tax impairment charge incurred by Caribbean Utilities in that company's Q3/07 (period ending January 31, 2007) and highlighted in our comment dated March 5, 2007, reported Q1/07 EPS were \$0.40 per share, slightly higher than our expectation of \$0.39 per share. Strong quarter over quarter performance was observed in all key business segments, notably Fortis Generation (non-regulated hydroelectric generation), largely due to increased hydroelectric production in Belize and higher average wholesale energy prices in Ontario. The recently acquired utilities in the Turks and Caicos contributed approximately \$1.8 million after-tax in the quarter.

We believe the following points are relevant about the quarter and our outlook:

- The company did not have any material mark-to-market gains or losses during the quarter, despite the change in accounting methodology. We believe that this reflects a real effort by management to minimize unnecessary complexities and highlights the prevalence of regulated assets within its asset portfolio.
- We note the distribution rate approvals for Fort Erie, Port Colborne and Gananoque. The key metrics in these decisions, 40% deemed equity and a return on equity of 9%, are consistent with the new rate-adjustment model as stipulated under the Ontario Energy Board's "Report of the Board on Cost of Capital and Second Generation Incentive Regulation".
- Utility capital expenditures are expected to be \$631 million in 2007, consistent with our expectation of a total spend of approximately \$710 million. Management highlighted the composition of the capital budget as follows: 32% - directed to ensure continued and enhanced performance, reliability and safety of the corporation's generation transmission and distribution assets; 48% - to meet customer growth; and 20% - facilities, equipment, vehicles and information technology systems. Capital investment at FortisAlberta and FortisBC is expected to be 66% of gross planned expenditures in 2007 and investment at the corporation's regulated and non-regulated utilities in the Caribbean is expected to represent approximately 18% of gross utility expenditures. These amounts are fully reflected in our financial model.
- We do expect that once closed, the company's primary focus will be on the integration of Terasen Inc. and the resumption of that entities' role as a core business, with a potential focus on renewed avenues for growth. The execution of two, two-year extensions to the incentive rate arrangements at Terasen Gas Inc. and Terasen Gas (Vancouver Island) until December 31, 2009 are important in this regard.
- We continue to believe the company is likely to select real estate and hospitality acquisitions in a manner consistent in size and scope with previous announcements – single properties or small asset pools acquired from families and/or other private buyers. Acquisitions are likely to be consistent with the following strategy: (i) maintain a portfolio that is approximately 10 to 15% of the company's total assets; (ii) follow the regulated utility operations; (iii) acquire mid-market hospitality assets; (iv) focus on smaller centres; and (v) enhance corporate tax efficiency.

- Our estimates assume that the planned acquisition of Terasen Inc. closes on June 30, 2007. We note that Terasen's earnings are highly seasonal and while we have attempted to match the seasonal profile in our Q3 and Q4 estimates, variances may occur. Fortis' Q1 and Q2/07 performance are not expected to reflect this transaction and there may be some per share averaging issues due to the large number of shares issued via the subscription receipt to finance this transaction. These issues are largely timing in nature and are largely neutral to our outlook.

Q1/07 performance and annual actual and expected performance by segment are set out in Table 1.

Estimates

Unchanged. Our diluted 2007 EPS increases marginally due to rounding and the effect that a slightly higher share price has on the diluted EPS calculation. Our diluted 2007E and 2008E EPS estimates are \$1.44 and \$1.54, respectively. Our outlook fully reflects the successful close of the acquisition of Terasen Inc. from Kinder Morgan by June 30, 2007.

Valuation

Our target price of \$31.00 reflects a weighted approach: 18.0x diluted 2008E EPS of \$1.64 (12.5%), 2.0x 2008E BV of \$17.97 (12.5%), and a target yield of 3.00% (75%), assuming 2008 dividends of \$0.92.

Recommendation

We believe that the shares are attractively valued at current levels. Our rating is Outperform.

Company Risk Disclosure

In addition to the risks involved in investing in common stocks generally, we also highlight the following risks that pertain to this company. Operations are subject to complex regulation by a variety of provincial, state and federal (Canada, Cayman Islands & Belize) agencies. Changes in regulation may adversely affect performance.

Financial performance depends on the availability of installed generation and the production of electric power by third parties. Fortis Properties' cash flow is dependent on hotel room vacancy rates and commercial building occupancy levels. The company's operations in Belize may be disrupted and assets may be damaged by hurricanes and/or tropical storms.

Analyst's Certification

I, Karen Taylor, CFA, hereby certify that the views expressed in this report accurately reflect my personal views about the subject securities or issuers. I also certify that no part of my compensation was, is, or will be, directly or indirectly, related to the specific recommendations or views expressed in this report.

General Disclosure

The information and opinions in this report were prepared by BMO Nesbitt Burns Inc. and BMO Nesbitt Burns Ltée./Ltd., collectively ("BMO NB"). BMO NB is not subject to U.S. rules with regard to the preparation of research reports and the independence of analysts. "BMO Capital Markets" is a trade name used by the BMO Investment Banking Group, which includes the wholesale/institutional arms of Bank of Montreal and BMO NB in Canada, and BMO Capital Markets Corp. in the U.S. BMO Capital Markets Corp. is an affiliate of BMO NB. BMO NB and BMO Capital Markets Corp. are subsidiaries of Bank of Montreal. Bank of Montreal or its affiliates ("BMO Financial Group") has lending arrangements with, or provide other remunerated services to, many issuers covered by BMO NB research. A significant lending relationship may exist between BMO Financial Group and certain of the issuers mentioned herein. The reader should assume that BMO NB, BMO Capital Markets Corp., Bank of Montreal or their affiliates may have a conflict of interest and should not rely solely on this report in evaluating whether or not to buy or sell securities of issuers discussed herein. The opinions, estimates and projections contained in this report are those of BMO NB as of the date of this report and are subject to change without notice. BMO NB endeavours to ensure that the contents have been compiled or derived from sources that we believe are reliable and contain information and opinions that are accurate and complete. However, BMO NB makes no representation or warranty, express or implied, in respect thereof, takes no responsibility for any errors and omissions contained herein and accepts no liability whatsoever for any loss arising from any use of, or reliance on, this report or its contents. Information may be available to BMO NB or its affiliates that is not reflected in this report. The information in this report is not intended to be used as the primary basis of investment decisions, and because of individual client objectives, should not be construed as advice designed to meet the particular investment needs of any investor. This material is for information purposes only and is not an offer to sell or the solicitation of an offer to buy any security. The research analyst and/or associates who prepared this report are compensated based upon (among other factors) the overall profitability of BMO NB and its affiliates, which includes the overall profitability of investment banking services. BMO NB, or its affiliates expect to receive or will seek compensation for investment banking services within the next 3 months from all issuers covered by BMO NB. BMO NB or its affiliates will buy from or sell to customers the securities of issuers mentioned in this report on a principal basis. BMO NB or its affiliates, officers, directors or employees may have a long or short position in the securities discussed herein, related securities or in options, futures or other derivative instruments based thereon.

Company Specific Disclosure

Disclosure 2: BMO NB has undertaken an underwriting liability with respect to this issuer within the past 12 months.

Disclosure 3: BMO NB has provided investment banking services with respect to this issuer within the past 12 months.

Disclosure 7: BMO Capital Markets Corp. or an affiliate has received compensation for investment banking services from this issuer within the past 12 months.

Disclosure 9: BMO Capital Markets Corp. or an affiliate received compensation for products or services other than investment banking services within the past 12 months.

Disclosure 10: This issuer is a client (or was a client) of BMO NB, BMO Capital Markets Corp. or an affiliate within the past 12 months: Investment Banking Services & Non-Securities Related Services.

Distribution of Ratings

Rating Category	BMO Rating	BMO Universe	BMO I.B. Clients*	First Call Universe**
Buy	Outperform	39%	41%	45%
Hold	Market Perform	52%	52%	47%
Sell	Underperform	9%	7%	8%

* Reflects rating distribution of all companies where BMO Capital Markets has received compensation for Investment Banking services.

** Reflects rating distribution of all North American equity research analysts.

Ratings Key

We use the following ratings system definitions:

OP = Outperform - Forecast to outperform the market;

Mkt = Market Perform - Forecast to perform roughly in line with the market;

Und = Underperform - Forecast to underperform the market;

(S) = speculative investment;

NR = No rating at this time;

R = Restricted – Dissemination of research is currently restricted.

Market performance is measured by a benchmark index such as the S&P/TSX Composite Index, S&P 500, Nasdaq Composite, as appropriate for each company. Prior to September 1, 2003, a fourth rating tier—Top Pick—was used to designate those stocks we felt would be the best performers relative to the market. Our six Top 15 lists which guide investors to our best ideas according to six different objectives (large, small, growth, value, income and quantitative) have replaced the Top Pick rating.

Dissemination of Research

Our research publications are available via our web site <http://bmocapitalmarkets.com>. Institutional clients may also receive our research via FIRST CALL Research Direct and Reuters. All of our research is made widely available at the same time to all BMO NB, BMO Capital Markets Corp. and BMO Nesbitt Burns Securities Ltd. client groups entitled to our research. Please contact your investment advisor or institutional salesperson for more information.

Additional Matters

Acquisition of Terasen Inc. Closes

Impact

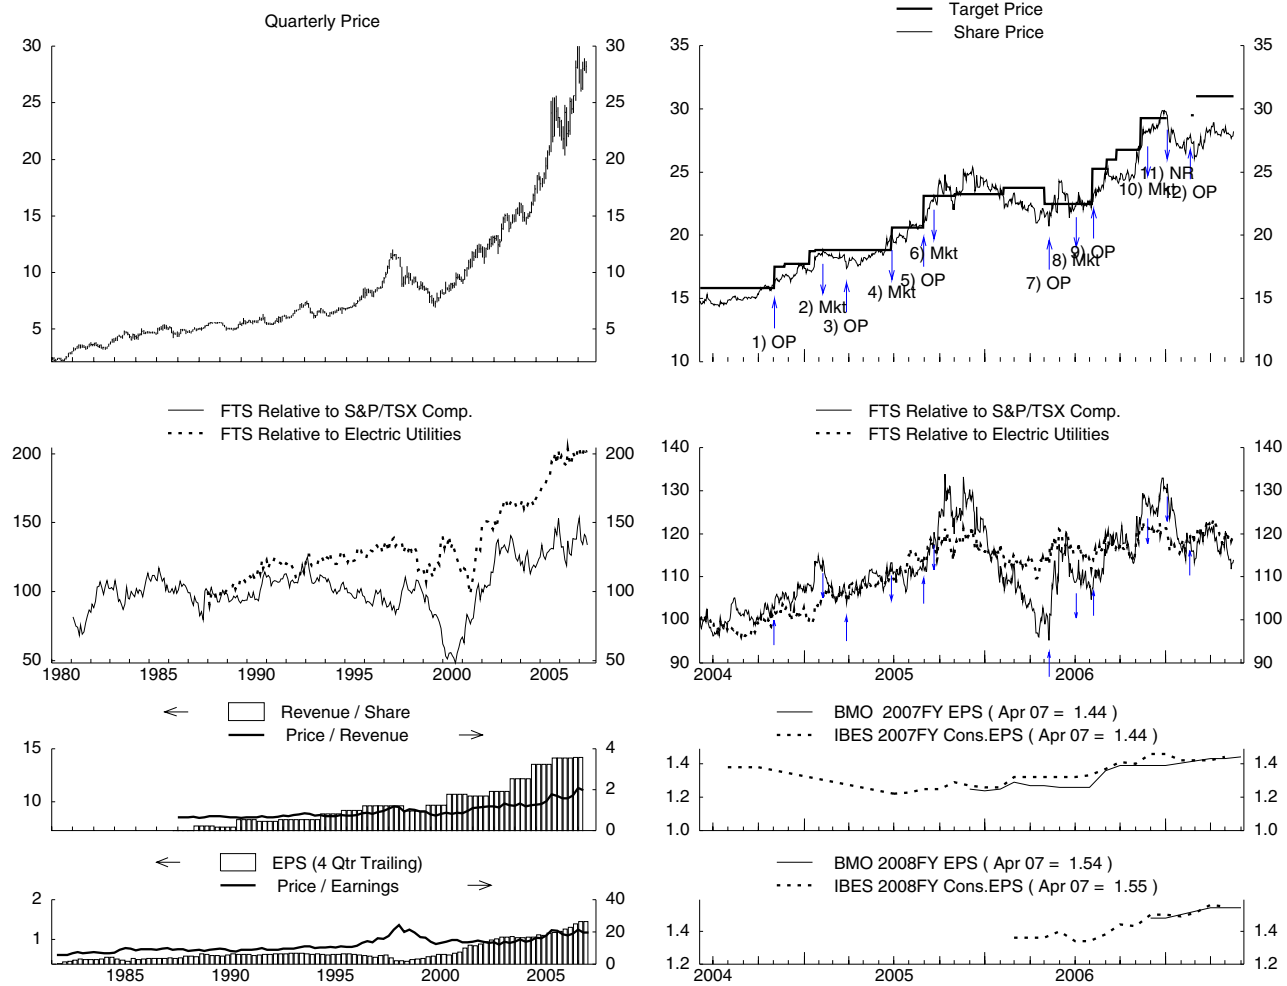

Neutral

Details & Analysis

Fortis Inc. has announced that it has completed the transaction to acquire all of the shares of Terasen Inc. from Kinder Morgan Inc. for total consideration of \$3.7 billion, including assumed debt. The announcement is in line with expectations and the acquisition is fully reflected in our outlook for Fortis. The subscription receipts issued (\$1 billion plus \$150 million pursuant to an over-allotment option) that closed on March 15, 2007, have been automatically exchanged for common shares (approximately 44.269 million common shares). Each subscription receipt holder also receives a cash payment of \$0.21 per subscription receipt, an amount equal to the dividends declared on the common shares of Fortis since March 15, 2007. We continue to rate the shares of Fortis Inc. Outperform.

This report was prepared by an Analyst employed by a Canadian affiliate, BMO Nesbitt Burns Inc., and who is not registered as a research analyst under NYSE/NASD rules. For disclosure statements, including the Analyst's Certification, please refer to pages 2 to 4.

Company Risk Disclosure

In addition to the risks involved in investing in common stocks generally, we also highlight the following risks that pertain to this company. Operations are subject to complex regulation by a variety of provincial, state and federal (Canada, Cayman Islands & Belize) agencies. Changes in regulation may adversely affect performance.

Financial performance depends on the availability of installed generation and the production of electric power by third parties. Fortis Properties' cash flow is dependent on hotel room vacancy rates and commercial building occupancy levels. The company's operations in Belize may be disrupted and assets may be damaged by hurricanes and/or tropical storms.

Analyst's Certification

I, Karen Taylor, CFA, hereby certify that the views expressed in this report accurately reflect my personal views about the subject securities or issuers. I also certify that no part of my compensation was, is, or will be, directly or indirectly, related to the specific recommendations or views expressed in this report.

General Disclosure

The information and opinions in this report were prepared by BMO Nesbitt Burns Inc. and BMO Nesbitt Burns Ltée./Ltd., collectively ("BMO NB"). BMO NB is not subject to U.S. rules with regard to the preparation of research reports and the independence of analysts. "BMO Capital Markets" is a trade name used by the BMO Investment Banking Group, which includes the wholesale/institutional arms of Bank of Montreal and BMO NB in Canada, and BMO Capital Markets Corp. in the U.S. BMO Capital Markets Corp. is an affiliate of BMO NB. BMO NB and BMO Capital Markets Corp. are subsidiaries of Bank of Montreal. Bank of Montreal or its affiliates ("BMO Financial Group") has lending arrangements with, or provide other remunerated services to, many issuers covered by BMO NB research. A significant lending relationship may exist between BMO Financial Group and certain of the issuers mentioned herein. The reader should assume that BMO NB, BMO Capital Markets Corp., Bank of Montreal or their affiliates may have a conflict of interest and should not rely solely on this report in evaluating whether or not to buy or sell securities of issuers discussed herein. The opinions, estimates and projections contained in this report are those of BMO NB as of the date of this report and are subject to change without notice. BMO NB endeavours to ensure that the contents have been compiled or derived from sources that we believe are reliable and contain information and opinions that are accurate and complete. However, BMO NB makes no representation or warranty, express or implied, in respect thereof, takes no responsibility for any errors and omissions contained herein and accepts no liability whatsoever for any loss arising from any use of, or reliance on, this report or its contents. Information may be available to BMO NB or its affiliates that is not reflected in this report. The information in this report is not intended to be used as the primary basis of investment decisions, and because of individual client objectives, should not be construed as advice designed to meet the particular investment needs of any investor. This material is for information purposes only and is not an offer to sell or the solicitation of an offer to buy any security. The research analyst and/or associates who prepared this report are compensated based upon (among other factors) the overall profitability of BMO NB and its affiliates, which includes the overall profitability of investment banking services. BMO NB, or its affiliates expect to receive or will seek compensation for investment banking services within the next 3 months from all issuers covered by BMO NB. BMO NB or its affiliates will buy from or sell to customers the securities of issuers mentioned in this report on a principal basis. BMO NB or its affiliates, officers, directors or employees may have a long or short position in the securities discussed herein, related securities or in options, futures or other derivative instruments based thereon.

Company Specific Disclosure

Disclosure 2: BMO NB has undertaken an underwriting liability with respect to this issuer within the past 12 months.

Disclosure 3: BMO NB has provided investment banking services with respect to this issuer within the past 12 months.

Disclosure 7: BMO Capital Markets Corp. or an affiliate has received compensation for investment banking services from this issuer within the past 12 months.

Disclosure 9: BMO Capital Markets Corp. or an affiliate received compensation for products or services other than investment banking services within the past 12 months.

Disclosure 10: This issuer is a client (or was a client) of BMO NB, BMO Capital Markets Corp. or an affiliate within the past 12 months: Investment Banking Services & Non-Securities Related Services.

Ratings Key

We use the following ratings system definitions:

OP = Outperform - Forecast to outperform the market;

Mkt = Market Perform - Forecast to perform roughly in line with the market;

Und = Underperform - Forecast to underperform the market;

(S) = speculative investment;

NR = No rating at this time;

R = Restricted – Dissemination of research is currently restricted.

Market performance is measured by a benchmark index such as the S&P/TSX Composite Index, S&P 500, Nasdaq Composite, as appropriate for each company. Prior to September 1, 2003, a fourth rating tier—Top Pick—was used to designate those stocks we felt would be the best performers relative to the market. Our six Top 15 lists which guide investors to our best ideas according to six different objectives (large, small, growth, value, income and quantitative) have replaced the Top Pick rating.

Dissemination of Research

Our research publications are available via our web site <http://bmocapitalmarkets.com>. Institutional clients may also receive our research via FIRST CALL Research Direct and Reuters. All of our research is made widely available at the same time to all BMO NB, BMO Capital Markets Corp. and BMO Nesbitt Burns Securities Ltd. client groups entitled to our research. Please contact your investment advisor or institutional salesperson for more information.

Additional Matters

TO U.S. RESIDENTS: BMO Capital Markets Corp. and/or BMO Nesbitt Burns Securities Ltd., affiliates of BMO NB, furnish this report to U.S. residents and accept responsibility for the contents herein, except to the extent that it refers to securities of Bank of Montreal. Any U.S. person wishing to effect transactions in any security discussed herein should do so through BMO Capital Markets Corp. and/or BMO Nesbitt Burns Securities Ltd.

TO U.K. RESIDENTS: The contents hereof are intended solely for the use of, and may only be issued or passed onto, persons described in part VI of the Financial Services and Markets Act 2000 (Financial Promotion) Order 2001.

BMO Nesbitt Burns Inc. and BMO Nesbitt Burns Ltée/Ltd. are Members of CIPF. BMO Capital Markets Corp. and BMO Nesbitt Burns Securities Ltd. are Members of SIPC.

"BMO Capital Markets" is a trade-mark of Bank of Montreal, used under licence.

"BMO (M-Bar roundel symbol)" is a registered trade-mark of Bank of Montreal, used under licence.

Newfoundland Power Files 2008 GRA; Outperform Rating Unchanged

Event

On May 10, Newfoundland Power (100% - Fortis Inc.) filed two applications with the Newfoundland and Labrador Board of Commissioners of Public Utilities: (i) 2.9% proposed rate decrease relating to the disposition of the Rate Stabilization Account, which provides for adjustment to electricity rates each year on July 1 to reflect the price and amount of oil used by Newfoundland and Labrador Hydro in the generation of electricity; and (ii) 2008 General Rate Application, in which the utility is proposing a 5.3% rate increase, effective January 1, 2008. The key highlights of the 2008 GRA are set out herein.

Impact

Neutral.

Forecasts

We have updated our outlook for Newfoundland Power to reflect the key metrics of the application. Our diluted 2007 and 2008 EPS estimates for Fortis Inc. are unchanged at \$1.44 and \$1.54, respectively.

Valuation

Our target price of \$31.00 reflects a weighed valuation approach: 18.0x diluted 2008E EPS of \$1.54 (12.5%), 2.0x 2008E BV of \$17.97 (12.5%), and a target yield of 3.00% (75%), assuming 2008 dividends of \$0.92.

Recommendation

We believe that the shares are attractively valued at current levels. Our rating is Outperform.

Details & Analysis

On May 10, Newfoundland Power (100% - Fortis Inc.) filed two applications with the Newfoundland and Labrador Board of Commissioners of Public Utilities: (i) 2.9% proposed rate decrease relating to the disposition of the Rate Stabilization Account, which provides for adjustment to electricity rates each year on July 1 to reflect the price and amount of oil used by Newfoundland and Labrador Hydro in the generation of electricity; and (ii) 2008 General Rate Application, in which the utility is proposing a 5.3% rate increase, effective January 1, 2008. The key highlights of the 2008 GRA include:

- A 5.3% increase in customer rates arising from three changes: (i) depreciation cost recovery accounts for an approximately 1.9% increase in 2008 revenues; (ii) proposed 2008 return on equity of 10.25% versus the 2007 return for ratemaking purposes of 8.60%, which increases the proposed revenue requirement by 1.9%; and (iii) recognition of other employee future benefits on an accrual basis, commencing in 2008, increasing revenue by 1.5%.
- Capital expenditures are expected to be \$52.854 million in 2008 versus \$62.851 million in 2007 and \$58.629 million in 2006.
- In 2008, 45% deemed equity capitalization, consistent with 2007.
- Common equity return of 10.25% for ratemaking purposes in 2008 versus 8.60% in 2007. We have not reflected this metric in our outlook for 2008, as we cannot reasonably ascertain whether the arguments presented in the application and the supporting cost of capital evidence will be adopted by the Board of Commissioners. We believe that the proposed rate of return of 10.25% to be within the range we have previously indicated is likely to meet the Fair Return Standard, given present capital markets and monetary conditions.
- Depreciation expense of \$41.002 million.
- Average rate base at year-end 2008 of \$816.6 million versus \$789.8 at year-end 2007 and \$752.9 at year-end 2006.
- Proposed amortization of the following amounts: (i) amortize as revenue over five years \$16.446 million of 2005 unbilled revenue and \$4.087 million related to a timing difference in receipt and recognition of municipal taxes; (ii) amortize the recovery over a five-year period of \$12.733 million in costs previously deferred by the Board; (iii) amortize the recovery over a five-year period of \$6.8 million of the balance of the Weather Normalization Reserve Account; (iv) amortize over a five-year period the balance of \$1.342 million in the Purchased Power Unit Cost Variance Reserve Account; and (v) amortize the recovery over a three-year period of an estimated \$1.250 million in Board and Consumer Advocate costs related to the Application.

Estimates

We have updated our outlook for Newfoundland Power to reflect the key metrics of the application. Our diluted 2007 and 2008 EPS estimates for Fortis Inc. are unchanged at \$1.44 and \$1.54, respectively.

Valuation

Our target price of \$31.00 reflects a weighed valuation approach: 18.0x diluted 2008E EPS of \$1.54 (12.5%), 2.0x 2008E BV of \$17.97 (12.5%), and a target yield of 3.00% (75%), assuming 2008 dividends of \$0.92.

Recommendation

We believe that the shares are attractively valued at current levels. Our rating is Outperform.

Company Risk Disclosure

In addition to the risks involved in investing in common stocks generally, we also highlight the following risks that pertain to this company. Operations are subject to complex regulation by a variety of provincial, state and federal (Canada, Cayman Islands & Belize) agencies. Changes in regulation may adversely affect performance.

Financial performance depends on the availability of installed generation and the production of electric power by third parties. Fortis Properties' cash flow is dependent on hotel room vacancy rates and commercial building occupancy levels. The company's operations in Belize may be disrupted and assets may be damaged by hurricanes and/or tropical storms.

Analyst's Certification

I, Karen Taylor, CFA, hereby certify that the views expressed in this report accurately reflect my personal views about the subject securities or issuers. I also certify that no part of my compensation was, is, or will be, directly or indirectly, related to the specific recommendations or views expressed in this report.

General Disclosure

The information and opinions in this report were prepared by BMO Nesbitt Burns Inc. and BMO Nesbitt Burns Ltée./Ltd., collectively ("BMO NB"). BMO NB is not subject to U.S. rules with regard to the preparation of research reports and the independence of analysts. "BMO Capital Markets" is a trade name used by the BMO Investment Banking Group, which includes the wholesale/institutional arms of Bank of Montreal and BMO NB in Canada, and BMO Capital Markets Corp. in the U.S. BMO Capital Markets Corp. is an affiliate of BMO NB. BMO NB and BMO Capital Markets Corp. are subsidiaries of Bank of Montreal. Bank of Montreal or its affiliates ("BMO Financial Group") has lending arrangements with, or provide other remunerated services to, many issuers covered by BMO NB research. A significant lending relationship may exist between BMO Financial Group and certain of the issuers mentioned herein. The reader should assume that BMO NB, BMO Capital Markets Corp., Bank of Montreal or their affiliates may have a conflict of interest and should not rely solely on this report in evaluating whether or not to buy or sell securities of issuers discussed herein. The opinions, estimates and projections contained in this report are those of BMO NB as of the date of this report and are subject to change without notice. BMO NB endeavours to ensure that the contents have been compiled or derived from sources that we believe are reliable and contain information and opinions that are accurate and complete. However, BMO NB makes no representation or warranty, express or implied, in respect thereof, takes no responsibility for any errors and omissions contained herein and accepts no liability whatsoever for any loss arising from any use of, or reliance on, this report or its contents. Information may be available to BMO NB or its affiliates that is not reflected in this report. The information in this report is not intended to be used as the primary basis of investment decisions, and because of individual client objectives, should not be construed as advice designed to meet the particular investment needs of any investor. This material is for information purposes only and is not an offer to sell or the solicitation of an offer to buy any security. The research analyst and/or associates who prepared this report are compensated based upon (among other factors) the overall profitability of BMO NB and its affiliates, which includes the overall profitability of investment banking services. BMO NB, or its affiliates expect to receive or will seek compensation for investment banking services within the next 3 months from all issuers covered by BMO NB. BMO NB or its affiliates will buy from or sell to customers the securities of issuers mentioned in this report on a principal basis. BMO NB or its affiliates, officers, directors or employees may have a long or short position in the securities discussed herein, related securities or in options, futures or other derivative instruments based thereon.

Company Specific Disclosure

Disclosure 2: BMO NB has undertaken an underwriting liability with respect to this issuer within the past 12 months.

Disclosure 3: BMO NB has provided investment banking services with respect to this issuer within the past 12 months.

Disclosure 7: BMO Capital Markets Corp. or an affiliate has received compensation for investment banking services from this issuer within the past 12 months.

Disclosure 9: BMO Capital Markets Corp. or an affiliate received compensation for products or services other than investment banking services within the past 12 months.

Disclosure 10: This issuer is a client (or was a client) of BMO NB, BMO Capital Markets Corp. or an affiliate within the past 12 months: Investment Banking Services & Non-Securities Related Services.

Distribution of Ratings

Rating Category	BMO Rating	BMO Universe	BMO I.B. Clients*	First Call Universe**
Buy	Outperform	39%	41%	45%
Hold	Market Perform	52%	52%	47%
Sell	Underperform	9%	7%	8%

* Reflects rating distribution of all companies where BMO Capital Markets has received compensation for Investment Banking services.

** Reflects rating distribution of all North American equity research analysts.

Ratings Key

We use the following ratings system definitions:

OP = Outperform - Forecast to outperform the market;

Mkt = Market Perform - Forecast to perform roughly in line with the market;

Und = Underperform - Forecast to underperform the market;

(S) = speculative investment;

NR = No rating at this time;

R = Restricted – Dissemination of research is currently restricted.

Market performance is measured by a benchmark index such as the S&P/TSX Composite Index, S&P 500, Nasdaq Composite, as appropriate for each company. Prior to September 1, 2003, a fourth rating tier—Top Pick—was used to designate those stocks we felt would be the best performers relative to the market. Our six Top 15 lists which guide investors to our best ideas according to six different objectives (large, small, growth, value, income and quantitative) have replaced the Top Pick rating.

Dissemination of Research

Our research publications are available via our web site <http://bmocapitalmarkets.com>. Institutional clients may also receive our research via FIRST CALL Research Direct and Reuters. All of our research is made widely available at the same time to all BMO NB, BMO Capital Markets Corp. and BMO Nesbitt Burns Securities Ltd. client groups entitled to our research. Please contact your investment advisor or institutional salesperson for more information.

18 MW Hydro Electric Facility to Be Constructed

Impact

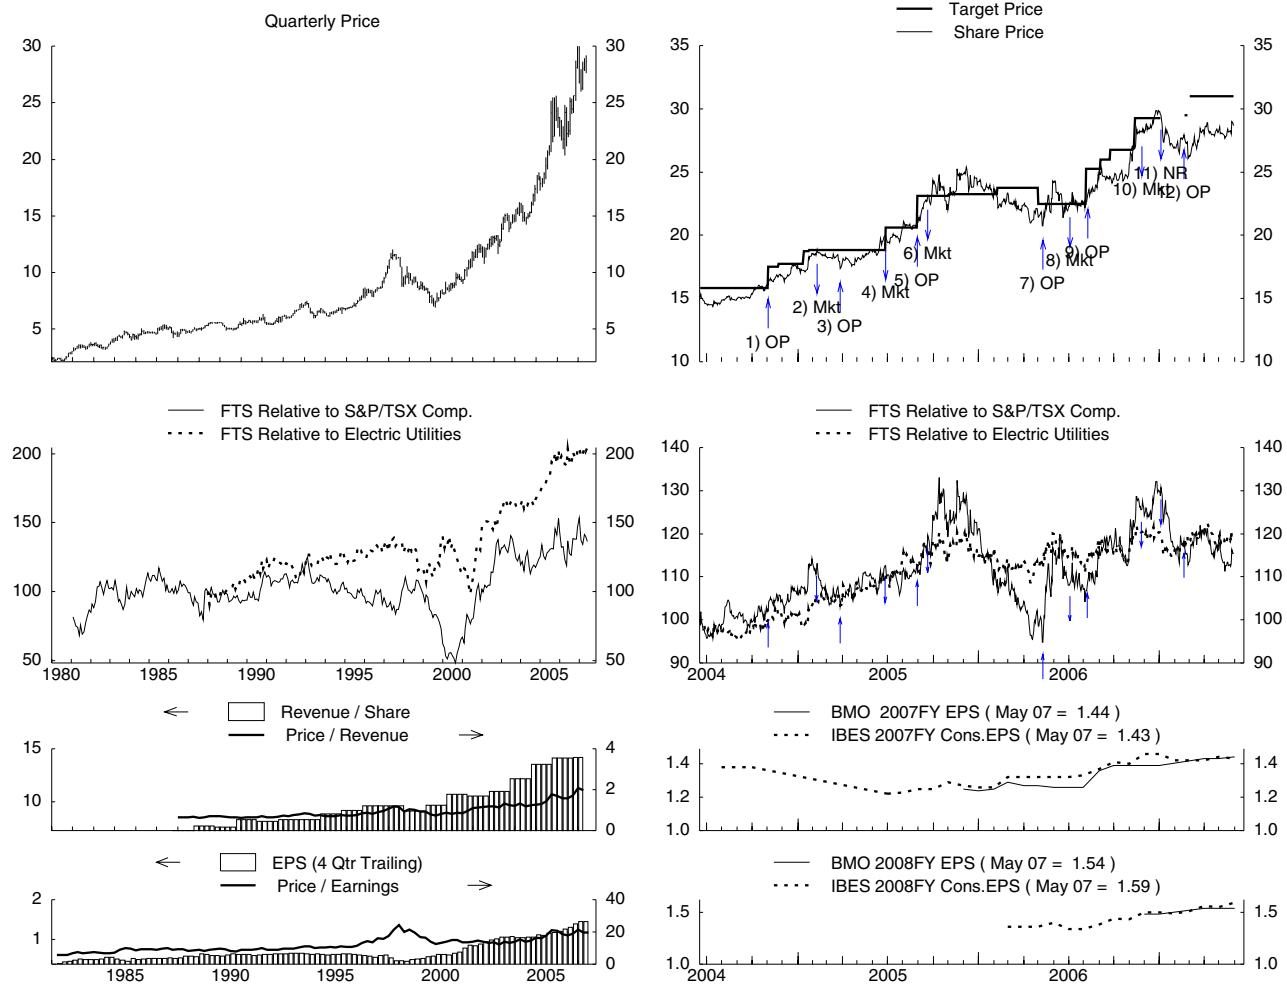

Neutral

Details & Analysis

Fortis has announced that BECOL, its indirect wholly owned subsidiary, has received all major approvals for the construction of a US\$52.5 million, 18 MW run-of-the-river hydroelectric generating facility at Vaca, on the Macal River in Belize. The Vaca facility is the final phase of a three-phase development on the Macal River and is downstream of the 25MW Mollejon hydroelectric facility and the 7MW Chalillo storage and hydro facility. The Vaca facility is expected to be in service in late 2009. Our diluted 2007 and 2008 EPS estimates of \$1.44 and \$1.54, respectively, are unchanged by this announcement, and we note that we previously reflected the potential construction of an 18MW plant in our outlook for 2009, pending the receipt of the requisite approvals. No change in view. We continue to rate the shares Outperform.

This report was prepared by an Analyst employed by a Canadian affiliate, BMO Nesbitt Burns Inc., and who is not registered as a research analyst under NYSE/NASD rules. For disclosure statements, including the Analyst's Certification, please refer to pages 2 to 4.

FortisAlberta Files 2008/09 DTA – Outperform Rating Unchanged

Event

On June 1, FortisAlberta (100% - Fortis Inc.) filed its 2008 and 2009 Distribution Tariff Application (DTA) with Alberta Energy and Utilities Board (AEUB), seeking approval for an increase in distribution rates of 8.5% and 9.0% in 2008 and 2009, respectively. Rate increases are expected in 2008 and 2009 due to increased capital expenditures and the addition of approximately \$145 million to 2008 opening rate base as a result of 2006/07 capital expenditures in excess of those anticipated under the 2006/07 Negotiated Settlement Agreement. This increase in capital spending is primarily related to customer-driven new connects resulting from higher than forecast growth and significantly higher labour and materials escalation than originally forecast. The key financial metrics from the application are included herein.

Impact

Neutral.

Forecasts

We have updated our outlook to reflect FortisAlberta's 2008/09 DTA. Our diluted 2007 EPS estimate of \$1.44 is unchanged. Our diluted 2008 EPS estimate increases to \$1.55 from 1.54.

Valuation

Our target price reflects a weighted valuation approach: 18x diluted 2008E EPS of \$1.55 (12.5%), 2.0x 2008E BVPS of \$17.97 (12.5%), and a target yield of 3.00% (75%), assuming 2008 dividends per share of \$0.92.

Recommendation

We believe that the shares are attractively valued at current levels. Our rating is Outperform.

Details & Analysis

On June 1, FortisAlberta (100% - Fortis Inc.) filed its 2008 and 2009 Distribution Tariff Application (DTA) with Alberta Energy and Utilities Board (AEUB), seeking approval for an increase in distribution rates of 8.5% and 9.0% in 2008 and 2009, respectively. Rate increases are expected in 2008 and 2009 due to increased capital expenditures and the addition of approximately \$145 million to 2008 opening rate base as a result of 2006/07 capital expenditures in excess of those expected under the 2006/07 Negotiated Settlement Agreement. This increase in capital spending is primarily related to customer-driven new connects resulting from higher than forecast growth and significantly higher labour and materials escalation than originally forecast. The key financial metrics of the application include:

- Mid-year rate base subject to debt and equity return of \$799.6 million in 2006 (actual), \$961.5 million in 2007 (current estimate), and \$1,144.4 and \$1,373.5 million in 2008 and 2009, respectively.
- Deemed equity of 37% in each of 2008 and 2009. Cost of equity is assumed to 8.51%, the return allowed for fiscal 2007, to be subject to true-up in December 2007 and 2008 when the AEUB's Generic Cost of Capital formula is reset for each of 2008 and 2009, respectively.
- Total gross capital expenditures of \$256.3 million in 2006 (actual), \$285.3 million in 2007 (current estimate), \$305.1 million in 2008 and \$315.2 million in 2009. Expenditures relating to customer growth in each year are: \$142.1 million in 2006, \$149.3 million in 2007, \$155.3 million in 2008, and \$152.3 million in 2009.
- Total depreciation and amortization costs of \$73.6 million in 2006, \$81.6 million in 2007, \$91.9 million in 2008 and \$100.6 million in 2009.
- Total operating expenses of \$112.7 million in 2006, \$117.5 million in 2007, \$126.4 million in 2008 and \$128.3 million in 2009. Total operating costs before flow-through items are expected to be \$97.9 million in 2006 (actual), \$100.6 million in 2007 (current estimate), \$108.8 million in 2008 and \$109.6 million in 2009.
- Economic growth during the 2006 to 2009 period (Alberta GDP growth) is expected to be as follows: 6.8% in 2006, 3.8% in 2007, 3.7% in 2008 and 3.2% in 2009. In 2006, FortisAlberta delivered energy in the amount of 14,917 GWh to an average of 422,000 distribution connected customers. Energy delivery in 2007 is forecast to grow to 15,455 GWh, to an average of over 437,000 distribution connected customers. Delivery volumes in 2008 and 2009 are expected to increase to 15,974 GWh and 16,344 GWh, respectively, and distribution connected customers are expected to be 450,700 and 463,600 in 2008 and 2009, respectively.

Estimates

We have updated our outlook to reflect FortisAlberta's 2008/09 DTA. Our diluted 2007 EPS estimate of \$1.44 is unchanged. Our diluted 2008 EPS estimate increases to \$1.55 from 1.54.

Valuation

Our target price reflects a weighted valuation approach: 18x diluted 2008E EPS of \$1.55 (12.5%), 2.0x 2008E BVPS of \$17.97 (12.5%), and a target yield of 3.00% (75%), assuming 2008 dividends per share of \$0.92.

Recommendation

We believe that the shares are attractively valued at current levels. Our rating is Outperform.

Company Risk Disclosure

In addition to the risks involved in investing in common stocks generally, we also highlight the following risks that pertain to this company. Operations are subject to complex regulation by a variety of provincial, state and federal (Canada, Cayman Islands & Belize) agencies. Changes in regulation may adversely affect performance.

Financial performance depends on the availability of installed generation and the production of electric power by third parties. Fortis Properties' cash flow is dependent on hotel room vacancy rates and commercial building occupancy levels. The company's operations in Belize may be disrupted and assets may be damaged by hurricanes and/or tropical storms.

Analyst's Certification

I, Karen Taylor, CFA, hereby certify that the views expressed in this report accurately reflect my personal views about the subject securities or issuers. I also certify that no part of my compensation was, is, or will be, directly or indirectly, related to the specific recommendations or views expressed in this report.

General Disclosure

The information and opinions in this report were prepared by BMO Nesbitt Burns Inc. and BMO Nesbitt Burns Ltée./Ltd., collectively ("BMO NB"). BMO NB is not subject to U.S. rules with regard to the preparation of research reports and the independence of analysts. "BMO Capital Markets" is a trade name used by the BMO Investment Banking Group, which includes the wholesale/institutional arms of Bank of Montreal and BMO NB in Canada, and BMO Capital Markets Corp. in the U.S. BMO Capital Markets Corp. is an affiliate of BMO NB. BMO NB and BMO Capital Markets Corp. are subsidiaries of Bank of Montreal. Bank of Montreal or its affiliates ("BMO Financial Group") has lending arrangements with, or provide other remunerated services to, many issuers covered by BMO NB research. A significant lending relationship may exist between BMO Financial Group and certain of the issuers mentioned herein. The reader should assume that BMO NB, BMO Capital Markets Corp., Bank of Montreal or their affiliates may have a conflict of interest and should not rely solely on this report in evaluating whether or not to buy or sell securities of issuers discussed herein. The opinions, estimates and projections contained in this report are those of BMO NB as of the date of this report and are subject to change without notice. BMO NB endeavours to ensure that the contents have been compiled or derived from sources that we believe are reliable and contain information and opinions that are accurate and complete. However, BMO NB makes no representation or warranty, express or implied, in respect thereof, takes no responsibility for any errors and omissions contained herein and accepts no liability whatsoever for any loss arising from any use of, or reliance on, this report or its contents. Information may be available to BMO NB or its affiliates that is not reflected in this report. The information in this report is not intended to be used as the primary basis of investment decisions, and because of individual client objectives, should not be construed as advice designed to meet the particular investment needs of any investor. This material is for information purposes only and is not an offer to sell or the solicitation of an offer to buy any security. The research analyst and/or associates who prepared this report are compensated based upon (among other factors) the overall profitability of BMO NB and its affiliates, which includes the overall profitability of investment banking services. BMO NB, or its affiliates expect to receive or will seek compensation for investment banking services within the next 3 months from all issuers covered by BMO NB. BMO NB or its affiliates will buy from or sell to customers the securities of issuers mentioned in this report on a principal basis. BMO NB or its affiliates, officers, directors or employees may have a long or short position in the securities discussed herein, related securities or in options, futures or other derivative instruments based thereon.

Company Specific Disclosure

Disclosure 2: BMO NB has undertaken an underwriting liability with respect to this issuer within the past 12 months.

Disclosure 3: BMO NB has provided investment banking services with respect to this issuer within the past 12 months.

Disclosure 7: BMO Capital Markets Corp. or an affiliate has received compensation for investment banking services from this issuer within the past 12 months.

Disclosure 9: BMO Capital Markets Corp. or an affiliate received compensation for products or services other than investment banking services within the past 12 months.

Disclosure 10: This issuer is a client (or was a client) of BMO NB, BMO Capital Markets Corp. or an affiliate within the past 12 months: Investment Banking Services & Non-Securities Related Services.

Distribution of Ratings

Ratings Key

We use the following ratings system definitions:

OP = Outperform - Forecast to outperform the market;

Mkt = Market Perform - Forecast to perform roughly in line with the market;

Und = Underperform - Forecast to underperform the market;

(S) = speculative investment;

NR = No rating at this time;

R = Restricted – Dissemination of research is currently restricted.

Market performance is measured by a benchmark index such as the S&P/TSX Composite Index, S&P 500, Nasdaq Composite, as appropriate for each company. Prior to September 1, 2003, a fourth rating tier—Top Pick—was used to designate those stocks we felt would be the best performers relative to the market. Our six Top 15 lists which guide investors to our best ideas according to six different objectives (large, small, growth, value, income and quantitative) have replaced the Top Pick rating.

Dissemination of Research

Our research publications are available via our web site <http://bmocapitalmarkets.com>. Institutional clients may also receive our research via FIRST CALL Research Direct and Reuters. All of our research is made widely available at the same time to all BMO NB, BMO Capital Markets Corp. and BMO Nesbitt Burns Securities Ltd. client groups entitled to our research. Please contact your investment advisor or institutional salesperson for more information.

Additional Matters

TO U.S. RESIDENTS: BMO Capital Markets Corp. and/or BMO Nesbitt Burns Securities Ltd., affiliates of BMO NB, furnish this report to U.S. residents and accept responsibility for the contents herein, except to the extent that it refers to securities of Bank of Montreal. Any U.S. person wishing to effect transactions in any security discussed herein should do so through BMO Capital Markets Corp. and/or BMO Nesbitt Burns Securities Ltd.

TO U.K. RESIDENTS: The contents hereof are intended solely for the use of, and may only be issued or passed onto, persons described in part VI of the Financial Services and Markets Act 2000 (Financial Promotion) Order 2001.

BMO Nesbitt Burns Inc. and BMO Nesbitt Burns Ltée/Ltd. are Members of CIPF. BMO Capital Markets Corp. and BMO Nesbitt Burns Securities Ltd. are Members of SIPC.

"BMO Capital Markets" is a trade-mark of Bank of Montreal, used under licence.

"BMO (M-Bar roundel symbol)" is a registered trade-mark of Bank of Montreal, used under licence.

Terasen Gas Files Gas Storage Application; Outperform Rating Unchanged

Event

On June 5, Terasen Gas (Vancouver Island) Inc. (TGVI, 100% - Fortis Inc.) filed an application with the British Columbia Utilities Commission (BCUC) for a Certificate of Public Convenience and Necessity (CPCN) to build the Mt. Hayes liquefied natural gas (LNG) storage facility on Vancouver Island and the facilities to connect the LNG Storage Facility to TGVI's natural gas transmission system and associated upgrades. The proposed facilities are expected to cost between \$175 million and \$200 million and have a planned in-service date of November 1, 2011.

Impact

Potentially positive.

Forecasts

Unchanged. We have not updated our estimates for this project, pending the receipt of regulatory approval. As set out herein, similar facilities were approved on a conditional basis by the Commission in February 2005. The approval conditions were subsequently not met and construction of the facility did not proceed by December 31, 2005.

Valuation

Our target price of \$31.00 reflects a weighted valuation approach: 18.0x diluted 2008E EPs of \$1.55 (12.5%), 2.0x 2008E BVPS of \$17.97 (12.5%), and a target yield of 3.00% (75%), assuming 2008 dividends per share of \$0.92.

Recommendation

We believe that the shares are attractively valued at current levels. Our rating is Outperform.

Details & Analysis

On June 5, Terasen Gas (Vancouver Island) Inc. (TGVI, 100% - Fortis Inc.) filed an application with the British Columbia Utilities Commission (BCUC) for a Certificate of Public Convenience and Necessity (CPCN) to build the Mt. Hayes liquefied natural gas (LNG) storage facility on Vancouver Island and the facilities to connect the LNG Storage Facility to TGVI's natural gas transmission system and associated upgrades. The proposed facilities are expected to cost between \$175 million and \$200 million and have a planned in-service date of November 1, 2011.

The applied for facilities include:

- LNG storage facility consisting of a 1.5 Bcf storage tank and ancillary facilities including liquefaction and vaporization components, and substation and 5 km power line from the BC Hydro transmission system to provide the required electrical supply to the site;
- The liquefaction Rate will be 7.5 mmcf/d and the facility will have a maximum send-out rate of 150 mmcf/d. It will be designed of liquefaction to fill the tank if completely utilized in any one season and the ability to send-out at daily rates up to 10% of the storage capacity.
- A block of property at the proposed Mt. Hayes Project site has been optioned by TGVI for purchase from the owner. The 42 hectare section of the property was rezoned by the Cowichan Valley Regional District in 2004 to allow construction and operation of an LNG facility with up to two 1.5 Bcf storage tanks. An additional 20 hectares to the east of the rezone area will likely be retained in order to maintain control over the CSA code required buffer zone.
- Pipeline laterals connecting the TGVI transmission pipeline to the Mt. Hayes LNG Storage Facility and a measurement/odourization station adjacent to the LNG Storage Facility.
- Transmission system modifications in order to allow bi-directional flow. In most instances, gas nominated by Terasen Gas Inc. (TGI) under the proposed Storage and Delivery Services Agreement will be redelivered to Terasen Gas Inc.'s system through displacement. However, under certain demand conditions, there may be a requirement to physically flow gas sent out from the LNG Storage Facility to the interconnection between the TGVI and Terasen Gas Inc. systems at the Coquitlam compressor station. This requirement was not contemplated in the previous facilities application. Planned transmission modifications include: (i) replacement of check valves on each side of the two main marine crossings to allow for bi-directional flow; (ii) modification of the Texada Compressor Station including the installation of a second set of side valves and associated piping and control system changes; and (iii) the TGI/TGVI custody transfer station will be modified to include flow measurement, pressure control and overpressure protection.
- A return on equity that is a 50-basis-point premium to the return allowed by the BCUC for TGVI, which is presently 9.07% for 2007 (a 70-basis-point premium to the benchmark return of 8.37% in 2007) or 9.57%. TGVI's deemed equity is currently 40%.

Pre-construction development costs are expected to be \$1.9 million to December 31, 2007.

This is not a new project or business development concept for TGVI. The TGVI has been investigating the potential to locate an LNG peak shaving facility on Vancouver Island since 2003. The project was proposed as an alternative to the Georgia Strait Crossing pipeline proposed by BC Hydro and Williams Cos. to deliver natural gas to Vancouver Island to serve both the existing Island Cogeneration Project (previously 70% - Calpine Power Income Fund) and the proposed Vancouver Island Generation Project being advanced by BC Hydro at Duke Point. The development of new gas-fired generation on Vancouver Island over this period has a tortuous history, with the net result that TGVI filed for a CPCN for the LNG storage facility to meet a November 2007 in-service date. In February 2005, the BCUC conditionally approved the project, subject to the following:

- A maximum engineering, procurement and construction price for facility construction;
- An agreement for storage serviced provided to Terasen Gas Inc.;
- A long-term firm transportation service agreement with BC Hydro for existing and proposed gas-fired power generation facilities; and
- The commencement of construction by December 31, 2005.

The current application is based on the conclusions of the 2006 Resource Plan filed by TGVI and TGI with the BCUC, which provided an assessment of the benefits of developing an LNG storage facility on Vancouver Island based on facility sizes ranging from 0.5 to 1.5 Bcf of LNG storage and assume a 2011 in-service date. The assessment concluded that the development of a storage facility was in the best interest of TGVI's customers across a broad range of customer demand. It also concluded that economies of scale could be realized through the construction of a large facility, thereby allowing TGVI to offer competitive storage services to TGI and reduce the cost impact to its own customers.

We believe that the issue of project need is likely to be a dominant factor in the consideration of the project by the regulator. The scale, scope and cost of the facilities are also likely to be material issues.

The project development schedule filed with the Commission anticipates regulatory approval by year-end 2007.

Estimates

Unchanged. We have not updated our estimates for this project, pending the receipt of regulatory approval. If we assume that the project is approved by the BCUC with an in-service date of November 1, 2011, we estimate the potential earnings contribution from the project to be approximately \$7.5 million on a full-year basis in 2012 or approximately \$0.04 per share (diluted).

Valuation

Our target price of \$31.00 reflects a weighted valuation approach: 18.0x diluted 2008E EPs of \$1.55 (12.5%), 2.0x 2008E BVPS of \$17.97 (12.5%), and a target yield of 3.00% (75%), assuming 2008 dividends per share of \$0.92.

Recommendation

We believe that the shares are attractively valued at current levels. Our rating is Outperform.

Company Risk Disclosure

In addition to the risks involved in investing in common stocks generally, we also highlight the following risks that pertain to this company. Operations are subject to complex regulation by a variety of provincial, state and federal (Canada, Cayman Islands & Belize) agencies. Changes in regulation may adversely affect performance.

Financial performance depends on the availability of installed generation and the production of electric power by third parties. Fortis Properties' cash flow is dependent on hotel room vacancy rates and commercial building occupancy levels. The company's operations in Belize may be disrupted and assets may be damaged by hurricanes and/or tropical storms.

Analyst's Certification

I, Karen Taylor, CFA, hereby certify that the views expressed in this report accurately reflect my personal views about the subject securities or issuers. I also certify that no part of my compensation was, is, or will be, directly or indirectly, related to the specific recommendations or views expressed in this report.

General Disclosure

The information and opinions in this report were prepared by BMO Nesbitt Burns Inc. and BMO Nesbitt Burns Ltée./Ltd., collectively ("BMO NB"). BMO NB is not subject to U.S. rules with regard to the preparation of research reports and the independence of analysts. "BMO Capital Markets" is a trade name used by the BMO Investment Banking Group, which includes the wholesale/institutional arms of Bank of Montreal and BMO NB in Canada, and BMO Capital Markets Corp. in the U.S. BMO Capital Markets Corp. is an affiliate of BMO NB. BMO NB and BMO Capital Markets Corp. are subsidiaries of Bank of Montreal. Bank of Montreal or its affiliates ("BMO Financial Group") has lending arrangements with, or provide other remunerated services to, many issuers covered by BMO NB research. A significant lending relationship may exist between BMO Financial Group and certain of the issuers mentioned herein. The reader should assume that BMO NB, BMO Capital Markets Corp., Bank of Montreal or their affiliates may have a conflict of interest and should not rely solely on this report in evaluating whether or not to buy or sell securities of issuers discussed herein. The opinions, estimates and projections contained in this report are those of BMO NB as of the date of this report and are subject to change without notice. BMO NB endeavours to ensure that the contents have been compiled or derived from sources that we believe are reliable and contain information and opinions that are accurate and complete. However, BMO NB makes no representation or warranty, express or implied, in respect thereof, takes no responsibility for any errors and omissions contained herein and accepts no liability whatsoever for any loss arising from any use of, or reliance on, this report or its contents. Information may be available to BMO NB or its affiliates that is not reflected in this report. The information in this report is not intended to be used as the primary basis of investment decisions, and because of individual client objectives, should not be construed as advice designed to meet the particular investment needs of any investor. This material is for information purposes only and is not an offer to sell or the solicitation of an offer to buy any security. The research analyst and/or associates who prepared this report are compensated based upon (among other factors) the overall profitability of BMO NB and its affiliates, which includes the overall profitability of investment banking services. BMO NB, or its affiliates expect to receive or will seek compensation for investment banking services within the next 3 months from all issuers covered by BMO NB. BMO NB or its affiliates will buy from or sell to customers the securities of issuers mentioned in this report on a principal basis. BMO NB or its affiliates, officers, directors or employees may have a long or short position in the securities discussed herein, related securities or in options, futures or other derivative instruments based thereon.

Company Specific Disclosure

Disclosure 2: BMO NB has undertaken an underwriting liability with respect to this issuer within the past 12 months.

Disclosure 3: BMO NB has provided investment banking services with respect to this issuer within the past 12 months.

Disclosure 7: BMO Capital Markets Corp. or an affiliate has received compensation for investment banking services from this issuer within the past 12 months.

Disclosure 9: BMO Capital Markets Corp. or an affiliate received compensation for products or services other than investment banking services within the past 12 months.

Disclosure 10: This issuer is a client (or was a client) of BMO NB, BMO Capital Markets Corp. or an affiliate within the past 12 months: Investment Banking Services & Non-Securities Related Services.

Distribution of Ratings

Rating Category	BMO Rating	BMO Universe	BMO I.B. Clients*	First Call Universe**
Buy	Outperform	39%	41%	45%
Hold	Market Perform	52%	52%	47%
Sell	Underperform	9%	7%	8%

* Reflects rating distribution of all companies where BMO Capital Markets has received compensation for Investment Banking services.

** Reflects rating distribution of all North American equity research analysts.

Ratings Key

We use the following ratings system definitions:

OP = Outperform - Forecast to outperform the market;

Mkt = Market Perform - Forecast to perform roughly in line with the market;

Und = Underperform - Forecast to underperform the market;

(S) = speculative investment;

NR = No rating at this time;

R = Restricted – Dissemination of research is currently restricted.

Market performance is measured by a benchmark index such as the S&P/TSX Composite Index, S&P 500, Nasdaq Composite, as appropriate for each company. Prior to September 1, 2003, a fourth rating tier—Top Pick—was used to designate those stocks we felt would be the best performers relative to the market. Our six Top 15 lists which guide investors to our best ideas according to six different objectives (large, small, growth, value, income and quantitative) have replaced the Top Pick rating.

Dissemination of Research

Our research publications are available via our web site <http://bmocapitalmarkets.com>. Institutional clients may also receive our research via FIRST CALL Research Direct and Reuters. All of our research is made widely available at the same time to all BMO NB, BMO Capital Markets Corp. and BMO Nesbitt Burns Securities Ltd. client groups entitled to our research. Please contact your investment advisor or institutional salesperson for more information.

Standard & Poor's Upgrades and Changes Basis for Ratings on Fortis Inc.

Impact

Positive.

Details & Analysis

Standard & Poor's today upgraded its corporate credit rating on Fortis Inc. one notch to A- from BBB+ and assigned a Stable outlook. The ratings were also removed from CreditWatch with Positive Implications, where they were placed on February 26, 2007, on the announcement that the company was to acquire Terasen Inc. and its gas utility Terasen Gas Inc. Of greater significance is that the agency upgraded its senior unsecured debt rating two notches to A- from BBB. The rating on the senior unsecured debt had previously been rated a notch below the company's corporate credit rating to reflect its structurally subordinated position. Standard & Poor's decision to depart from its previous treatment of the senior unsecured debt and equalize the senior unsecured debt rating with the corporate credit rating reflects the increasing diversification of the company and the financial separation among its investments. The departure is not surprising and is in line with our expectations, as outlined in our *Weekly Credit Edge* article, "Potential Rating Upgrade for Fortis, Terasen Inc. and Terasen Gas Inc. - but Wait There's More ..." published on March 19, 2007.

The agency has advised the rating upgrade of Fortis reflects:

- the improved diversity resulting from the recent acquisition of Terasen Inc.;
- the operation of each regulated subsidiary as a separate stand-alone entity with debt non-recourse to Fortis Inc.;
- management's commitment to maintaining low levels of debt at the Fortis Inc. holding company level;
- management's continuing focus on pursuing acquisitions in stable, regulated utilities; and
- the success of key subsidiaries FortisBC and Fortis Alberta in executing their capital expansions.

Company Description – Fortis is a publicly listed holding company with four key businesses: electric utility operations, regulated natural gas distribution, non-regulated electric power generation, and non-utility property activities. Electric power operations include: Newfoundland Power (100%, Newfoundland), Maritime Electric (100%, PEI), FortisOntario (100%, Fort Erie, Ontario), Belize Electricity (68%, Belize), Caribbean Utilities (54%, Grand Cayman Island), Turks and Caicos (100%, Turks and Caicos),

FortisAlberta (100%, Alberta) and FortisBC (100%, British Columbia). *Website: fortisinc.com*

Recent Results – Q1/07 EPS were \$0.38. After adjusting for a \$2.4 million after-tax impairment charge incurred by Caribbean Utilities in that company's Q3/07 (period ending January 31, 2007), Q1/07 EPS were \$0.40, slightly higher than our expectation of \$0.39 per share. Strong quarter over quarter performance was observed in all key business segments, notably Fortis Generation (non-regulated

hydroelectric generation), largely due to increased hydroelectric production in Belize and higher average wholesale energy prices in Ontario.

Corporate Developments – On May 30, Fortis announced that BECOL (100% - Fortis Inc.) has received all major approvals for the construction of a US\$52.5 million, 18 MW run-of-the-river hydroelectric generating facility at Vaca, on the Macal River in Belize. The Vaca facility is the final phase of a three-phase development on the Macal River and is downstream of the 25 MW Mollejon hydroelectric facility and the 7 MW Chalillo storage and hydro facility. The Vaca plant is expected to be in service in late 2009.

On May 17, Fortis announced that it has completed the previously announced transaction to acquire all of the shares of Terasen Inc. from Kinder Morgan Inc. for total consideration of \$3.7 billion, including assumed debt.

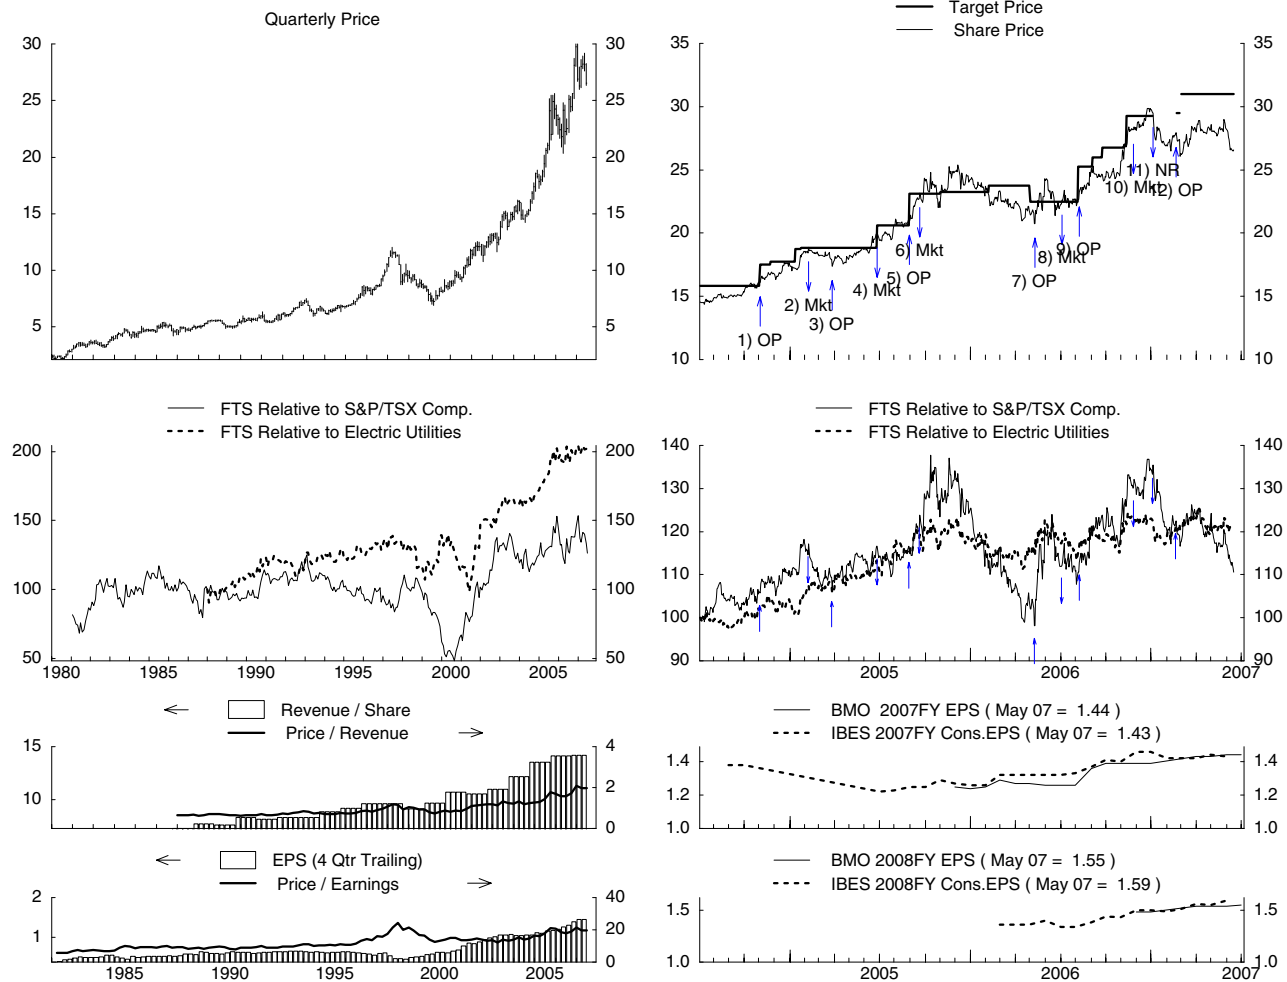

On May 10, Newfoundland Power filed two applications with the Newfoundland and Labrador Board of Commissioners of Public Utilities: (i) 2.9% proposed rate decrease relating to the disposition of the Rate Stabilization Account; and (ii) 2008 General Rate Application, in which the utility is proposing a 5.3% rate increase, effective January 1, 2008.

Forecasts – Diluted 2007E and 2008E EPS of \$1.44 and \$1.55 fully reflect the Vaca facility and the Terasen purchase.

Valuation – Our target price reflects a weighted valuation approach: 18.0x diluted 2008E EPS of \$1.55 (12.5%), 2.0x 2008E BVPS of \$17.97 (12.5%), and a target yield of 3.00% (75%), assuming 2008 dividends per share of \$0.92.

Recommendation – We believe that the shares are attractively valued at current levels. Our rating is Outperform. Member of Top 15 Income stock selections.

Company Risk Disclosure

In addition to the risks involved in investing in common stocks generally, we also highlight the following risks that pertain to this company. Operations are subject to complex regulation by a variety of provincial, state and federal (Canada, Cayman Islands & Belize) agencies. Changes in regulation may adversely affect performance.

Financial performance depends on the availability of installed generation and the production of electric power by third parties. Fortis Properties' cash flow is dependent on hotel room vacancy rates and commercial building occupancy levels. The company's operations in Belize may be disrupted and assets may be damaged by hurricanes and/or tropical storms.

Analyst's Certification

I, Karen Taylor, CFA, hereby certify that the views expressed in this report accurately reflect my personal views about the subject securities or issuers. I also certify that no part of my compensation was, is, or will be, directly or indirectly, related to the specific recommendations or views expressed in this report.

General Disclosure

The information and opinions in this report were prepared by BMO Nesbitt Burns Inc. and BMO Nesbitt Burns Ltée./Ltd., collectively ("BMO NB"). BMO NB is not subject to U.S. rules with regard to the preparation of research reports and the independence of analysts. "BMO Capital Markets" is a trade name used by the BMO Investment Banking Group, which includes the wholesale/institutional arms of Bank of Montreal and BMO NB in Canada, and BMO Capital Markets Corp. in the U.S. BMO Capital Markets Corp. is an affiliate of BMO NB. BMO NB and BMO Capital Markets Corp. are subsidiaries of Bank of Montreal. Bank of Montreal or its affiliates ("BMO Financial Group") has lending arrangements with, or provide other remunerated services to, many issuers covered by BMO NB research. A significant lending relationship may exist between BMO Financial Group and certain of the issuers mentioned herein. The reader should assume that BMO NB, BMO Capital Markets Corp., Bank of Montreal or their affiliates may have a conflict of interest and should not rely solely on this report in evaluating whether or not to buy or sell securities of issuers discussed herein. The opinions, estimates and projections contained in this report are those of BMO NB as of the date of this report and are subject to change without notice. Ratings Key

We use the following ratings system definitions:

OP = Outperform - Forecast to outperform the market;

Mkt = Market Perform - Forecast to perform roughly in line with the market;

Und = Underperform - Forecast to underperform the market;

(S) = speculative investment;

NR = No rating at this time;

R = Restricted – Dissemination of research is currently restricted.

Market performance is measured by a benchmark index such as the S&P/TSX Composite Index, S&P 500, Nasdaq Composite, as appropriate for each company. Prior to September 1, 2003, a fourth rating tier—Top Pick—was used to designate those stocks we felt would be the best performers relative to the market. Our six Top 15 lists which guide investors to our best ideas according to six different objectives (large, small, growth, value, income and quantitative) have replaced the Top Pick rating.

Dissemination of Research

Our research publications are available via our web site <http://bmocapitalmarkets.com>. Institutional clients may also receive our research via FIRST CALL Research Direct and Reuters. All of our research is made widely available at the same time to all BMO NB, BMO Capital Markets Corp. and BMO Nesbitt Burns Securities Ltd. client groups entitled to our research. Please contact your investment advisor or institutional salesperson for more information.

Additional Matters

TO U.S. RESIDENTS: BMO Capital Markets Corp. and/or BMO Nesbitt Burns Securities Ltd., affiliates of BMO NB, furnish this report to U.S. residents and accept responsibility for the contents herein, except to the extent that it refers to securities of Bank of Montreal. Any U.S. person wishing to effect transactions in any security discussed herein should do so through BMO Capital Markets Corp. and/or BMO Nesbitt Burns Securities Ltd.

TO U.K. RESIDENTS: The contents hereof are intended solely for the use of, and may only be issued or passed onto, persons described in part VI of the Financial Services and Markets Act 2000 (Financial Promotion) Order 2001.

BMO Nesbitt Burns Inc. and BMO Nesbitt Burns Ltée/Ltd. are Members of CIPF. BMO Capital Markets Corp. and BMO Nesbitt Burns Securities Ltd. are Members of SIPC.

"BMO Capital Markets" is a trade-mark of Bank of Montreal, used under licence.

Delta Regina to Be Acquired; Outperform Rating Unchanged

Event

Fortis Properties Corporation (100% - Fortis Inc.) has announced that it has entered into an agreement to purchase the Delta Regina in Regina, Saskatchewan, for \$49.95 million. We believe that the transaction is about 9.5x trailing 12-month EBITDA and reflects a cap rate of approximately 9x, slightly lower than the hotel properties acquired in Alberta and British Columbia in 2006 (see our October 20, 2006, comment for additional information). The transaction is expected to close in Q3 2007.

Impact

Neutral. The acquisition is consistent with Fortis' stated strategy for its property division: (i) maintain a portfolio that is 10% to 15% of total assets; (ii) "follow" the regulated utility operations; (iii) acquire mid-market hospitality assets; (iv) focus on smaller centres; and (iv) enhance corporate tax efficiency.

Forecasts

No change. Our current estimates reflect an earnings growth rate of approximately 5% over the 2007 to 2010 period for the Fortis Properties Segment, which includes asset acquisitions in both 2007 and 2009, each totalling some \$50 million. We continue to assume each acquisition is debt-financed. We do not assume a further equity issue until mid-2009. We note, however, that higher than forecast utility rate base growth could accelerate the requirement for additional common equity. We currently estimate total consolidated 2007 capital expenditures are assumed to be \$775 million and approximately \$675 million in 2008.

Valuation

Our target price of \$31.00 reflects a weighted valuation approach: 18.0x diluted 2008E EPS of \$1.55 (12.5%), 2.0x 2008E BV per share of \$17.97 (12.5%), and a target yield of 3.00% (75%), assuming 2008 dividends per share of \$0.92.

Recommendation

We believe that the shares are attractively valued at current levels. Our Outperform rating is unchanged.

Company Risk Disclosure

In addition to the risks involved in investing in common stocks generally, we also highlight the following risks that pertain to this company. Operations are subject to complex regulation by a variety of provincial, state and federal (Canada, Cayman Islands & Belize) agencies. Changes in regulation may adversely affect performance.

Financial performance depends on the availability of installed generation and the production of electric power by third parties. Fortis Properties' cash flow is dependent on hotel room vacancy rates and commercial building occupancy levels. The company's operations in Belize may be disrupted and assets may be damaged by hurricanes and/or tropical storms.

Analyst's Certification

I, Karen Taylor, CFA, hereby certify that the views expressed in this report accurately reflect my personal views about the subject securities or issuers. I also certify that no part of my compensation was, is, or will be, directly or indirectly, related to the specific recommendations or views expressed in this report.

General Disclosure

The information and opinions in this report were prepared by BMO Nesbitt Burns Inc. and BMO Nesbitt Burns Ltée./Ltd., collectively ("BMO NB"). BMO NB is not subject to U.S. rules with regard to the preparation of research reports and the independence of analysts. "BMO Capital Markets" is a trade name used by the BMO Investment Banking Group, which includes the wholesale/institutional arms of Bank of Montreal and BMO NB in Canada, and BMO Capital Markets Corp. in the U.S. BMO Capital Markets Corp. is an affiliate of BMO NB. BMO NB and BMO Capital Markets Corp. are subsidiaries of Bank of Montreal. Bank of Montreal or its affiliates ("BMO Financial Group") has lending arrangements with, or provide other remunerated services to, many issuers covered by BMO NB research. A significant lending relationship may exist between BMO Financial Group and certain of the issuers mentioned herein. The reader should assume that BMO NB, BMO Capital Markets Corp., Bank of Montreal or their affiliates may have a conflict of interest and should not rely solely on this report in evaluating whether or not to buy or sell securities of issuers discussed herein. The opinions, estimates and projections contained in this report are those of BMO NB as of the date of this report and are subject to change without notice. BMO NB endeavours to ensure that the contents have been compiled or derived from sources that we believe are reliable and contain information and opinions that are accurate and complete. However, BMO NB makes no representation or warranty, express or implied, in respect thereof, takes no responsibility for any errors and omissions contained herein and accepts no liability whatsoever for any loss arising from any use of, or reliance on, this report or its contents. Information may be available to BMO NB or its affiliates that is not reflected in this report. The information in this report is not intended to be used as the primary basis of investment decisions, and because of individual client objectives, should not be construed as advice designed to meet the particular investment needs of any investor. This material is for information purposes only and is not an offer to sell or the solicitation of an offer to buy any security. The research analyst and/or associates who prepared this report are compensated based upon (among other factors) the overall profitability of BMO NB and its affiliates, which includes the overall profitability of investment banking services. BMO NB, or its affiliates expect to receive or will seek compensation for investment banking services within the next 3 months from all issuers covered by BMO NB. BMO NB or its affiliates will buy from or sell to customers the securities of issuers mentioned in this report on a principal basis. BMO NB or its affiliates, officers, directors or employees may have a long or short position in the securities discussed herein, related securities or in options, futures or other derivative instruments based thereon.

Company Specific Disclosure

Disclosure 2: BMO NB has undertaken an underwriting liability with respect to this issuer within the past 12 months.

Disclosure 3: BMO NB has provided investment banking services with respect to this issuer within the past 12 months.

Disclosure 7: BMO Capital Markets Corp. or an affiliate has received compensation for investment banking services from this issuer within the past 12 months.

Disclosure 9: BMO Capital Markets Corp. or an affiliate received compensation for products or services other than investment banking services within the past 12 months.

Disclosure 10: This issuer is a client (or was a client) of BMO NB, BMO Capital Markets Corp. or an affiliate within the past 12 months: Investment Banking Services & Non-Securities Related Services.

Distribution of Ratings

Rating Category	BMO Rating	BMO Universe	BMO I.B. Clients*	First Call Universe**
Buy	Outperform	38%	47%	47%
Hold	Market Perform	52%	45%	46%
Sell	Underperform	10%	8%	7%

* Reflects rating distribution of all companies where BMO Capital Markets has received compensation for Investment Banking services.

** Reflects rating distribution of all North American equity research analysts.

Ratings Key

We use the following ratings system definitions:

OP = Outperform - Forecast to outperform the market;

Mkt = Market Perform - Forecast to perform roughly in line with the market;

Und = Underperform - Forecast to underperform the market;

(S) = speculative investment;

NR = No rating at this time;

R = Restricted – Dissemination of research is currently restricted.

Market performance is measured by a benchmark index such as the S&P/TSX Composite Index, S&P 500, Nasdaq Composite, as appropriate for each company. Prior to September 1, 2003, a fourth rating tier—Top Pick—was used to designate those stocks we felt would be the best performers relative to the market. Our six Top 15 lists which guide investors to our best ideas according to six different objectives (large, small, growth, value, income and quantitative) have replaced the Top Pick rating.

Dissemination of Research

Our research publications are available via our web site <http://bmocapitalmarkets.com>. Institutional clients may also receive our research via FIRST CALL Research Direct and Reuters. All of our research is made widely available at the same time to all BMO NB, BMO Capital Markets Corp. and BMO Nesbitt Burns Securities Ltd. client groups entitled to our research. Please contact your investment advisor or institutional salesperson for more information.

Delta Regina Acquired

Impact

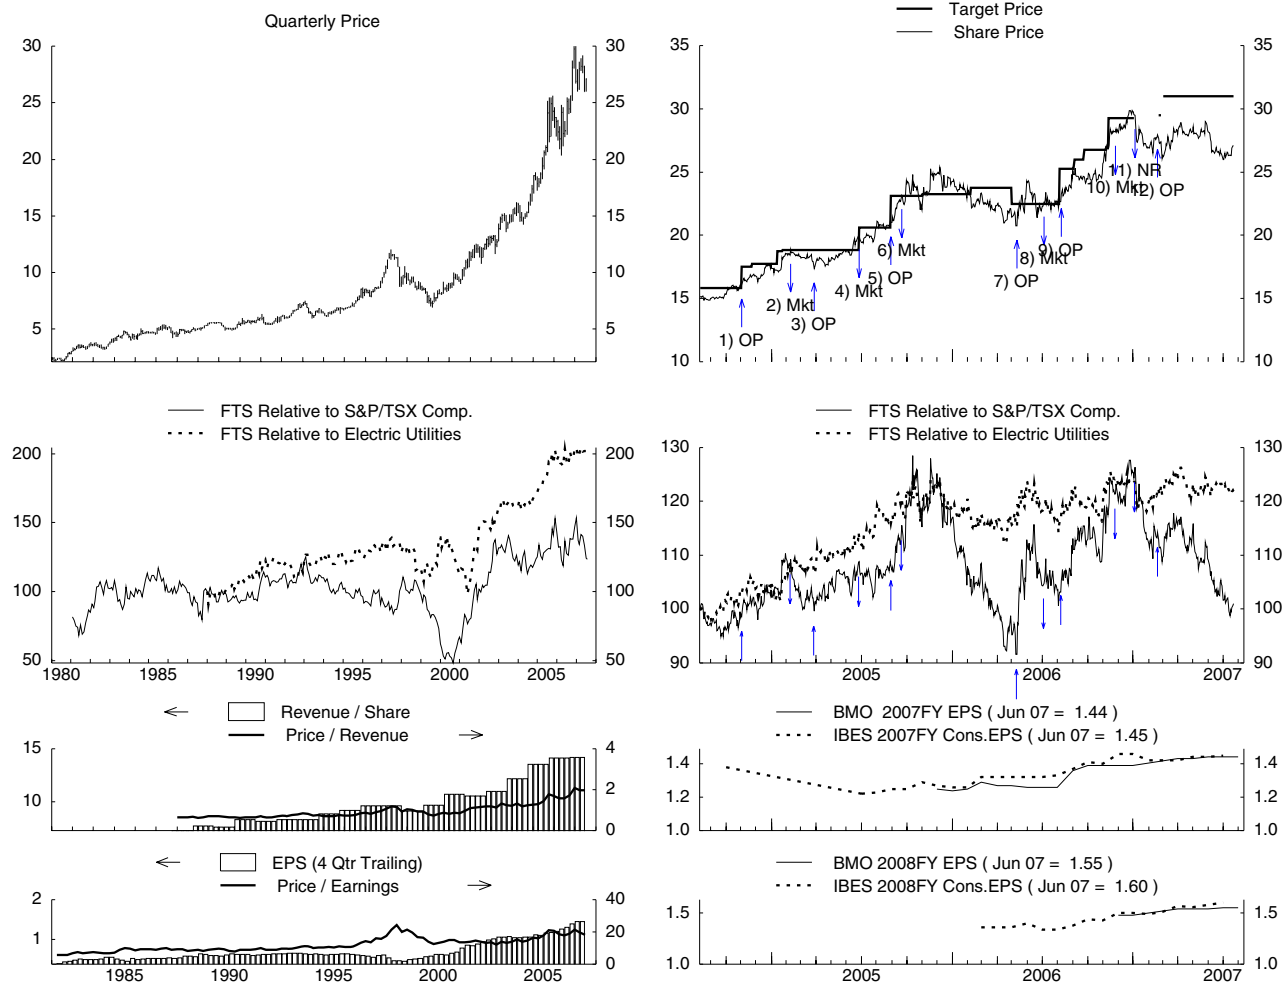

Neutral

Details & Analysis

Fortis Properties Corporation (100% - Fortis Inc.) has announced that it has entered into an agreement to purchase Delta Regina in Regina, Saskatchewan for \$49.95 million. The transaction is expected to close in Q3/07 and is also expected to be immediately accretive to consolidated corporate earnings. We are currently following-up with management; however, the planned acquisition is consistent with Fortis' stated strategy for its properties division: (i) maintain a portfolio that is approximately 10-15% of the company's total assets; (ii) "follow" the regulated utility operations; (iii) acquire mid-market hospitality assets; (iv) focus on smaller centres; and (v) enhance corporate tax efficiency. We believe the acquisition is likely to be debt financed; we do not expect a further equity issue until 2009, barring an additional utility acquisition. We continue to rate the shares Outperform.

This report was prepared by an Analyst employed by a Canadian affiliate, BMO Nesbitt Burns Inc., and who is not registered as a research analyst under NYSE/NASD rules. For disclosure statements, including the Analyst's Certification, please refer to pages 2 to 4.

Q2/07 EPS Largely in Line

Impact

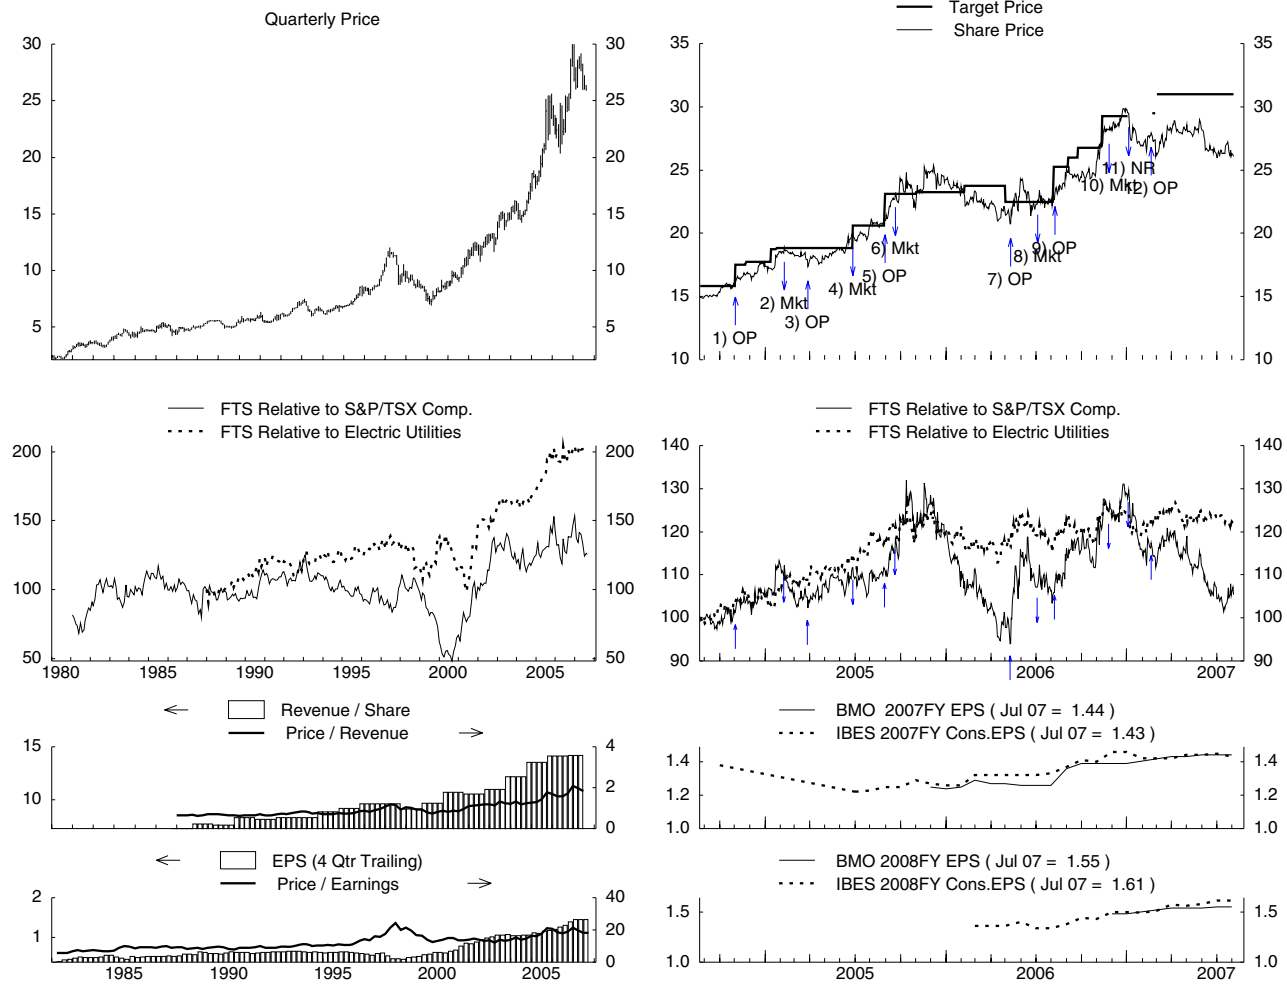

Neutral

Details & Analysis

Fortis Inc. reported Q2/07 earnings of \$41.5 million versus our expectation of \$39.8 million. On a per share basis, results were \$0.31 versus our expectation of \$0.30 per share and higher than the mean estimate of \$0.29 per share. Q2/07 results were largely in line with expectations. The quarter included a \$1.6 million contribution from the acquisition of Terasen Inc., which closed on May 17. The variance between expected and actual performance appears to be attributable to: (i) moderately better than expected performance at FortisAlberta and FortisBC due to higher than expected customer growth and capital expenditures; offset by: (ii) reduction in the contribution from Fortis Generation due to lower Q2/07 hydrology versus Q2/06 in Belize, central Newfoundland and Upper New York State. We continue to review the release. No change in view. We rate the shares of Fortis Outperform.

This report was prepared by an Analyst employed by a Canadian affiliate, BMO Nesbitt Burns Inc., and who is not registered as a research analyst under NYSE/NASD rules. For disclosure statements, including the Analyst's Certification, please refer to pages 2 to 4.

Ratings Key

We use the following ratings system definitions:

OP = Outperform - Forecast to outperform the market;

Mkt = Market Perform - Forecast to perform roughly in line with the market;

Und = Underperform - Forecast to underperform the market;

(S) = speculative investment;

NR = No rating at this time;

R = Restricted – Dissemination of research is currently restricted.

Market performance is measured by a benchmark index such as the S&P/TSX Composite Index, S&P 500, Nasdaq Composite, as appropriate for each company. Prior to September 1, 2003, a fourth rating tier—Top Pick—was used to designate those stocks we felt would be the best performers relative to the market. Our six Top 15 lists which guide investors to our best ideas according to six different objectives (large, small, growth, value, income and quantitative) have replaced the Top Pick rating.

Dissemination of Research

Our research publications are available via our web site <http://bmocapitalmarkets.com>. Institutional clients may also receive our research via FIRST CALL Research Direct and Reuters. All of our research is made widely available at the same time to all BMO NB, BMO Capital Markets Corp. and BMO Nesbitt Burns Securities Ltd. client groups entitled to our research. Please contact your investment advisor or institutional salesperson for more information.

Additional Matters

TO U.S. RESIDENTS: BMO Capital Markets Corp. and/or BMO Nesbitt Burns Securities Ltd., affiliates of BMO NB, furnish this report to U.S. residents and accept responsibility for the contents herein, except to the extent that it refers to securities of Bank of Montreal. Any U.S. person wishing to effect transactions in any security discussed herein should do so through BMO Capital Markets Corp. and/or BMO Nesbitt Burns Securities Ltd.

TO U.K. RESIDENTS: The contents hereof are intended solely for the use of, and may only be issued or passed onto, persons described in part VI of the Financial Services and Markets Act 2000 (Financial Promotion) Order 2001.

BMO Nesbitt Burns Inc. and BMO Nesbitt Burns Ltée/Ltd. are Members of CIPF. BMO Capital Markets Corp. and BMO Nesbitt Burns Securities Ltd. are Members of SIPC.

Q2/07 EPS in Line; Outperform Rating Maintained

Event

Fortis reported Q2/07 earnings of \$41.5 million versus our expectation of \$39.8 million. On a per-share basis, results were \$0.31 per share versus our expectation of \$0.30 per share and the mean estimate of \$0.29 per share. Results were largely in line with expectations. The quarter included a \$1.6 million contribution from Terasen Inc., which closed on May 17, 2007. The variance between expected and actual performance is largely attributable to: (i) higher contribution from FortisAlberta and FortisBC due to income tax recoveries at FortisAlberta, and higher than expected customer growth and capital expenditures at both utilities YTD; partially offset by: (ii) reduction in the contribution from Fortis Generation due to lower Q2/07 hydrology versus Q2/06 in Belize, central Newfoundland and Upper New York State.

Impact

Neutral.

Forecasts

Unchanged. We have refined our quarterly EPS profile to reflect the seasonality expected in Q3/07 deriving from Terasen Inc., which tends to report higher EPS in Q1 and Q4 due to the winter peaking characteristics of natural gas consumption in its service areas.

Valuation

Our target price of \$31 reflects a weighted valuation approach; 18.0x diluted 2008E EPS of \$1.55 (12.5%), 2.0x 2008E BVPS of \$17.97 (12.5%), and a target yield of 3.00% (75%), assuming 2008 dividends per share of \$0.92.

Recommendation

We believe that the shares are attractively valued at current levels. Our rating is Outperform.

Details & Analysis

Fortis reported Q2/07 earnings of \$41.5 million versus our expectation of \$39.8 million. On a per-share basis, results were \$0.31 per share versus our expectation of \$0.30 per share and the mean estimate of \$0.29 per share. Q2/07 results were largely in line with expectations. The quarter included a \$1.6 million contribution from Terasen Inc., which closed on May 17, 2007. The variance between expected and actual performance is largely attributable to: (i) higher contribution from FortisAlberta and FortisBC due to income tax recoveries at FortisAlberta, and higher than expected customer growth and capital expenditures at both utilities year-to-date; partially offset by: (ii) reduction in the contribution from Fortis Generation due to lower Q2/07 hydrology versus Q2/06 in Belize, central Newfoundland and Upper New York State.

We believe that the following points are relevant about the quarter and our outlook:

- There were no material one-time items or adjustments in the quarter and no material mark-to-market gains or losses that affected net income.
- The rate applications discussed for FortisAlberta and Newfoundland Power are fully reflected in our outlook, as per our comments dated June 4, 2007 and May 18, 2007, respectively. The June 29, 2007, Capital Budget application filed by Newfoundland Power requesting approval for a 2008 capital budget of \$50.8 million is also reflected in our outlook. The application contains a five-year capital plan for the utility which stipulates \$288 million in capital expenditures for plant and equipment over the 2008 to 2012 period, including amounts for the refurbishment of the Rattling Brook Dam, which is expected to total \$18 million and result in the production of additional energy and displace the consumption of 10,500 barrels of oil per year. The capital plan set out is as follows: 2008 - \$53.429 million; 2009 - \$58.605 million; 2010 - \$58.049 million; 2011 - \$58.181 million; and 2012 - \$59.291 million. These amounts are reflected in our estimates profile for Newfoundland Power. The approved capital budget for 2007 is \$62.851 million. Actual year-to-date spending highlighted in the application was \$66.032 million, with approximately \$1.8 million of the \$3.181 million expected to be recovered via contributions in aid of construction.
- The June application filed by Maritime Electric with the Island Regulatory and Appeals Commission in P.E.I. for its 2008 capital budget of \$18.6 million is not yet available. We currently assume that 2008 capital expenditures at Maritime Electric are approximately \$20.3 million.
- On August 2, the company closed the acquisition of the Delta Regina and the associated Saskatchewan Trade and Convention Centre for \$49.95 million. This acquisition is fully reflected in our outlook for Fortis.
- The June 26, 2007, decision of the Belize Public Utilities Commission (PUC) is not expected to have a material effect on the consolidated outlook for Fortis Inc. and we expect Belize Electricity Ltd. (BEL, 70.1% - Fortis Inc.) to appeal to the PUC to reconsider its final order. The most material part of the decision is the order by the PUC for a reduction in the forecast cost of power for 2007 and 2008 by BZ\$1.28 million and BZ\$1.142 million, respectively, and BZ\$1.77 million for the annual tariff period 2007/08, due to the disallowance of the full CFE cost of power under an August 2006 contract versus a March Offer.
- Planned capital expenditures are expected to be approximately \$775 million in 2007 and \$665 million in 2008.

Q2/07 performance and annual actual and expected performance by segment are set out in Table 1.

Estimates

Unchanged. We have refined our quarterly EPS profile to reflect the seasonality expected in Q3/07 deriving from Terasen Inc., which tends to report higher EPS in Q1 and Q4 due to the winter peaking characteristics of natural gas consumption in its service areas.

Valuation

Our target price of \$31.00 reflects a weighted valuation approach; 18.0x diluted 2008E EPS of \$1.55 (12.5%), 2.0x 2008E book value per share of \$17.97 (12.5%), and a target yield of 3.00% (75%), assuming 2008 dividends per share of \$0.92.

Recommendation

We believe that the shares are attractively valued at current levels. Our rating is Outperform.

Company Risk Disclosure

In addition to the risks involved in investing in common stocks generally, we also highlight the following risks that pertain to this company. Operations are subject to complex regulation by a variety of provincial, state and federal (Canada, Cayman Islands & Belize) agencies. Changes in regulation may adversely affect performance.

Financial performance depends on the availability of installed generation and the production of electric power by third parties. Fortis Properties' cash flow is dependent on hotel room vacancy rates and commercial building occupancy levels. The company's operations in Belize may be disrupted and assets may be damaged by hurricanes and/or tropical storms.

Analyst's Certification

I, Karen Taylor, CFA, hereby certify that the views expressed in this report accurately reflect my personal views about the subject securities or issuers. I also certify that no part of my compensation was, is, or will be, directly or indirectly, related to the specific recommendations or views expressed in this report.

General Disclosure

The information and opinions in this report were prepared by BMO Nesbitt Burns Inc. and BMO Nesbitt Burns Ltée./Ltd., collectively ("BMO NB"). BMO NB is not subject to U.S. rules with regard to the preparation of research reports and the independence of analysts. "BMO Capital Markets" is a trade name used by the BMO Investment Banking Group, which includes the wholesale/institutional arms of Bank of Montreal and BMO NB in Canada, and BMO Capital Markets Corp. in the U.S. BMO Capital Markets Corp. is an affiliate of BMO NB. BMO NB and BMO Capital Markets Corp. are subsidiaries of Bank of Montreal. Bank of Montreal or its affiliates ("BMO Financial Group") has lending arrangements with, or provide other remunerated services to, many issuers covered by BMO NB research. A significant lending relationship may exist between BMO Financial Group and certain of the issuers mentioned herein. The reader should assume that BMO NB, BMO Capital Markets Corp., Bank of Montreal or their affiliates may have a conflict of interest and should not rely solely on this report in evaluating whether or not to buy or sell securities of issuers discussed herein. The opinions, estimates and projections contained in this report are those of BMO NB as of the date of this report and are subject to change without notice. BMO NB endeavours to ensure that the contents have been compiled or derived from sources that we believe are reliable and contain information and opinions that are accurate and complete. However, BMO NB makes no representation or warranty, express or implied, in respect thereof, takes no responsibility for any errors and omissions contained herein and accepts no liability whatsoever for any loss arising from any use of, or reliance on, this report or its contents. Information may be available to BMO NB or its affiliates that is not reflected in this report. The information in this report is not intended to be used as the primary basis of investment decisions, and because of individual client objectives, should not be construed as advice designed to meet the particular investment needs of any investor. This material is for information purposes only and is not an offer to sell or the solicitation of an offer to buy any security. The research analyst and/or associates who prepared this report are compensated based upon (among other factors) the overall profitability of BMO NB and its affiliates, which includes the overall profitability of investment banking services. BMO NB, or its affiliates expect to receive or will seek compensation for investment banking services within the next 3 months from all issuers covered by BMO NB. BMO NB or its affiliates will buy from or sell to customers the securities of issuers mentioned in this report on a principal basis. BMO NB or its affiliates, officers, directors or employees may have a long or short position in the securities discussed herein, related securities or in options, futures or other derivative instruments based thereon.

Company Specific Disclosure

Disclosure 2: BMO NB has undertaken an underwriting liability with respect to this issuer within the past 12 months.

Disclosure 3: BMO NB has provided investment banking services with respect to this issuer within the past 12 months.

Disclosure 7: BMO Capital Markets Corp. or an affiliate has received compensation for investment banking services from this issuer within the past 12 months.

Disclosure 9: BMO Capital Markets Corp. or an affiliate received compensation for products or services other than investment banking services within the past 12 months.

Disclosure 10: This issuer is a client (or was a client) of BMO NB, BMO Capital Markets Corp. or an affiliate within the past 12 months: Investment Banking Services & Non-Securities Related Services.

Distribution of Ratings

Rating Category	BMO Rating	BMO Universe	BMO I.B. Clients*	First Call Universe**
Buy	Outperform	38%	47%	47%
Hold	Market Perform	52%	45%	46%
Sell	Underperform	10%	8%	7%

* Reflects rating distribution of all companies where BMO Capital Markets has received compensation for Investment Banking services.

** Reflects rating distribution of all North American equity research analysts.

Ratings Key

We use the following ratings system definitions:

OP = Outperform - Forecast to outperform the market;

Mkt = Market Perform - Forecast to perform roughly in line with the market;

Und = Underperform - Forecast to underperform the market;

(S) = speculative investment;

NR = No rating at this time;

R = Restricted – Dissemination of research is currently restricted.

Market performance is measured by a benchmark index such as the S&P/TSX Composite Index, S&P 500, Nasdaq Composite, as appropriate for each company. Prior to September 1, 2003, a fourth rating tier—Top Pick—was used to designate those stocks we felt would be the best performers relative to the market. Our six Top 15 lists which guide investors to our best ideas according to six different objectives (large, small, growth, value, income and quantitative) have replaced the Top Pick rating.

Dissemination of Research

Our research publications are available via our web site <http://bmocapitalmarkets.com>. Institutional clients may also receive our research via FIRST CALL Research Direct and Reuters. All of our research is made widely available at the same time to all BMO NB, BMO Capital Markets Corp. and BMO Nesbitt Burns Securities Ltd. client groups entitled to our research. Please contact your investment advisor or institutional salesperson for more information.

Additional Matters

TO U.S. RESIDENTS: BMO Capital Markets Corp. and/or BMO Nesbitt Burns Securities Ltd., affiliates of BMO NB, furnish this report to U.S. residents and accept responsibility for the contents herein, except to the extent that it refers to securities of Bank of Montreal. Any U.S. person wishing to effect transactions in any security discussed herein should do so through BMO Capital Markets Corp. and/or BMO Nesbitt Burns Securities Ltd.

TO U.K. RESIDENTS: The contents hereof are intended solely for the use of, and may only be issued or passed onto, persons described in part VI of the Financial Services and Markets Act 2000 (Financial Promotion) Order 2001.

BMO Nesbitt Burns Inc. and BMO Nesbitt Burns Ltée/Ltd. are Members of CIPF. BMO Capital Markets Corp. and BMO Nesbitt Burns Securities Ltd. are Members of SIPC.

"BMO Capital Markets" is a trade-mark of Bank of Montreal, used under licence.

"BMO (M-Bar roundel symbol)" is a registered trade-mark of Bank of Montreal, used under licence.

2007 Average Shares Fine-Tuned; Outperform Rating Maintained

Event

We have fine-tuned our estimated 2007 weighted average shares outstanding, basic and diluted, to more fully reflect the May 17, 2007, acquisition of Terasen Inc. and the subsequent conversion of the previously issued subscription receipts into 44.275 million common shares of the corporation.

Impact

Neutral.

Forecasts

Our diluted 2007 EPS estimate declines to \$1.42 from \$1.44. Our diluted 2008 EPS estimate of \$1.55 is unchanged.

Valuation

Our target price of \$31 reflects a weighted valuation approach: 18.0x diluted 2008E EPS of \$1.55 (12.5%), 2.0x 2008E book value per share of \$17.96 (12.5%), and a target yield of 3.00% (75%), assuming 2008 dividends per share of \$0.92.

Recommendation

We believe that the shares are attractively valued at current levels. Our rating is Outperform.

Ratings Key

We use the following ratings system definitions:

OP = Outperform - Forecast to outperform the market;

Mkt = Market Perform - Forecast to perform roughly in line with the market;

Und = Underperform - Forecast to underperform the market;

(S) = speculative investment;

NR = No rating at this time;

R = Restricted – Dissemination of research is currently restricted.

Market performance is measured by a benchmark index such as the S&P/TSX Composite Index, S&P 500, Nasdaq Composite, as appropriate for each company. Prior to September 1, 2003, a fourth rating tier—Top Pick—was used to designate those stocks we felt would be the best performers relative to the market. Our six Top 15 lists which guide investors to our best ideas according to six different objectives (large, small, growth, value, income and quantitative) have replaced the Top Pick rating.

Dissemination of Research

Our research publications are available via our web site <http://bmocapitalmarkets.com>. Institutional clients may also receive our research via FIRST CALL Research Direct and Reuters. All of our research is made widely available at the same time to all BMO NB, BMO Capital Markets Corp. and BMO Nesbitt Burns Securities Ltd. client groups entitled to our research. Please contact your investment advisor or institutional salesperson for more information.

Q2/07 Results: Credit Metrics Weaken on Terasen Acquisition

Event

Fortis Inc. (Fortis) releases Q2/07 results.

Impact

Neutral.

Key Points

Fortis Inc.'s earnings in Q2/07 of \$41.5 million were up 9% versus Q2/06, and higher than BMO Capital Markets equity research's expectation of \$39.8 million. Funds from operations (FFO) in Q2/07 jumped 56% to \$116 million compared to Q2/06 but credit metrics weakened, albeit temporarily, due to the higher debt associated with the Terasen Inc. acquisition and the seasonality of Terasen Gas' cash flow. Fortis' total debt commitments and leverage were significantly impacted by the \$3.7 billion acquisition of Terasen Inc. and assumed debt of \$2.4 billion as part of the transaction. Fortis' consolidated liquidity improved in Q2/07 and remains adequate for its operational, refinancing and capital requirement needs.

Recommendation

We believe the credit profile of Fortis continues to strengthen and will improve further with the increased diversity of regulated cash flows from the recent Terasen Inc. acquisition. The company's single Canadian dollar issue limits the opportunity for investors to pursue relative value trades along the issuer's credit curve and the relative illiquid nature of its paper is a pricing consideration. The 5-year indicative spreads of Fortis have largely flat-lined since mid-2005, before moving out in recent weeks on general spread widening.

Senior Unsecured Debt Ratings

DBRS	S&P	Moody's
BBB (High)	A-	Not Rated
Stable	Stable	

Details & Analysis

Earnings and Cash Flow

Fortis Inc.'s earnings in Q2/07 of \$41.5 million were up 9% versus Q2/06, and were higher than BMO Capital Markets equity research's expectation of \$39.8 million. On a per share basis, results were \$0.31 versus BMO Capital Markets' expectation of \$0.30 and higher than the mean estimate of \$0.29. Impacting the result were:

- moderately better than expected performance at FortisAlberta and FortisBC; offset by
- a reduction in the contribution from Fortis Generation due to lower Q2/07 hydrology versus Q2/06 in Belize, central Newfoundland and Upper New York State.

The quarter included a \$1.6 million contribution from the acquisition of Terasen Inc., which closed on May 17, 2007.

Funds from operations (FFO) in Q2/07 jumped 56% to \$116 million versus Q2/06 but credit metrics weakened, albeit temporarily, due to the higher debt associated with the Terasen Inc. acquisition and the seasonality of Terasen Gas' cash flow. Despite the higher FFO, the cash flows were insufficient to meet cash outlays with negative free cash flow (FFO less capital expenditure and distributions) of \$114 million as the result. The cash flow shortfall was met through proceeds from long-term debt. Fortis' large capital expenditure program will dominate cash flows outlays and financing activities for the next few years at least, with negative free cash flow expected to be the norm. In the next five years, gross consolidated electric utility expenditure of close to \$4 billion is expected.

Chart 1: Fortis Inc. Cash Flow Credit Metrics on a Rolling 12-months Basis

Source: BMO Capital Markets

Although unadjusted FFO interest coverage on a rolling 12-month basis to June 30, 2007, of 2.7x was close to that in Q2/06 of 2.8x, the company's FFO-to-total debt took a tumble, falling to 6.5% from 11.7% at the end of Q1/07. We expect the ratio to improve over the next 12 months to levels similar to its recent past as cash flow received from its Terasen Inc. subsidiary is matched against the higher debt levels that have resulted from the acquisition. Nonetheless, even when it does improve we expect the ratio to remain on the low side for some time as the company continues to partially debt finance expansion of its electricity network asset bases and the delay in receipt of regulated cash flows from the asset constructed.

Capital Structure and Liquidity

Fortis' total debt commitments and leverage were significantly impacted by the \$3.7 billion acquisition of Terasen Inc. and assumed debt of \$2.4 billion as part of the transaction. Total consolidated debt doubled to \$5.2 billion from \$2.6 billion in Q1/07. The vast majority of Fortis' consolidated debt, about 95%, resides at the company's various subsidiaries. Debt at the holding company level comprises \$100 million of senior unsecured debentures maturing 2010, US\$150 million senior unsecured notes maturing 2014 and about US\$59 million in unsecured subordinated convertible debentures due between 2012 and 2016. The company's leverage, as measured by total debt-to-total capital and treating the preference shares as equity, is expected to settle about its target level of 60%. At June 30, 2007, leverage was a touch above its target at 63%, up from 57% in Q1/07 and reflecting the higher debt associated with the Terasen Inc. acquisition.

Fortis' consolidated liquidity improved in Q2/07 and remains adequate for its operational, refinancing and capital requirement needs. Total credit facilities of the company increased to \$2.2 billion in Q2/07 compared to \$963.5 million in Q1/07. Unused capacity after drawdowns and outstanding letters of credit under the facilities was \$1.03 billion, up from \$722.8 million at the end of Q1/07. At the end of the quarter, Fortis also had consolidated cash and cash equivalents of \$63.5 million. We note that on May 14, 2007, the company terminated its unused \$1.425 billion non-revolving term credit facilities established to fund the Terasen acquisition. Maturing debt commitments and amortizing debt repayments are manageable. The company's earliest maturities are two debt issues at Terasen Gas Inc. totalling \$250 million in October 2007, and a \$40 million issue (of which \$32 million was outstanding at June 30, 2007) at Newfoundland Power due to mature in December this year.

Credit Ratings

Fortis' corporate credit rating and senior unsecured debt issue rating benefited from the company's recent acquisition of Terasen Inc.

On June 19, 2007, **Standard & Poor's** upgraded its corporate credit rating on Fortis Inc. one notch to A- and assigned a Stable outlook. Of greater significance was that the senior unsecured debt rating was upgraded two notches to A- from BBB. The rating on the senior unsecured debt had previously been rated a notch below the corporate credit rating to reflect its structurally subordinated position. Standard & Poor's decision to depart from its previous treatment of the senior unsecured debt and equalize the senior unsecured debt rating with the corporate credit

rating reflects the increasing diversification of the company and the financial separation among its investments. The agency has advised that the rating upgrade of Fortis reflects the improved diversity resulting from the recent acquisition of Terasen Inc.; the operation of each regulated subsidiary as a separate stand-alone entity with debt non-recourse to Fortis Inc.; management's commitment to maintaining low levels of debt at the Fortis Inc. holding company level; management's continuing focus on pursuing acquisitions in stable, regulated utilities; and the success of key subsidiaries FortisBC and Fortis Alberta in executing their capital expansions.

DBRS confirmed its ratings on Fortis on February 26, 2007, following its announced intention to acquire 100% of the common shares of Terasen Inc. DBRS believes the transaction will have a positive impact on Fortis's overall business risk profile as a result of the acquisition of stable, low-risk gas distribution assets. From a financial risk perspective, DBRS expects a modest decline in consolidated interest coverage metrics, given the existing levels of debt at the acquired entities; however, it expects modest improvement in non-consolidated credit metrics, given that the transaction is predominantly equity financed, coupled with the historical strength of Terasen Gas Inc.'s dividends. Overall, DBRS views the predominantly equity-financed acquisition of regulated assets as a good strategic fit for Fortis and views the proposed transaction as credit neutral to slightly credit positive.

Recommendation

We believe the credit profile of Fortis continues to strengthen and will improve further with the increased diversity of regulated cash flows from the recent Terasen Inc. acquisition. The company's single Canadian dollar issue limits the opportunity for investors to pursue relative value trades along the issuer's credit curve and the relative illiquid nature of its paper is a pricing consideration. The 5-year indicative spreads of Fortis have largely flat-lined since mid-2005, before moving out in recent weeks on general spread widening.

Maritime Electric Files 2008 Capital Budget

Impact

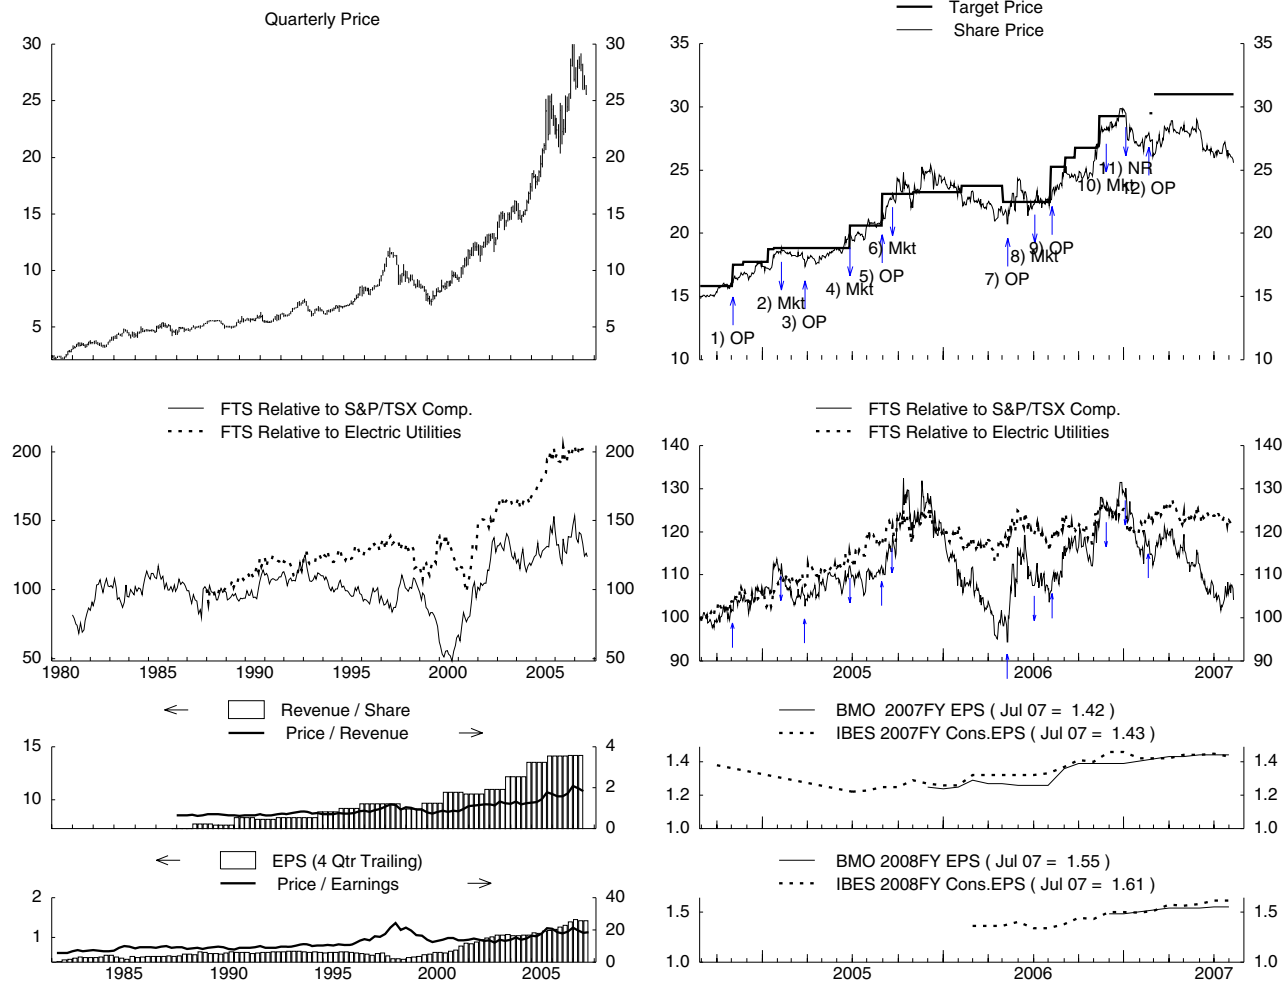

Neutral

Details & Analysis

On August 6, the Island Regulatory and Appeals Commission (IRAC) issued a Notice of Application regarding a June 27, 2008, application by Maritime Electric (100% - Fortis Inc.) that seeks approval for utility capital expenditures of \$18.358 million in 2008. The application also highlights an anticipated 2009 capital plan of \$19.269 million. We believe that IRAC is likely to issue a decision on this application in early Q4/07. The applied-for budget for 2008 and the outlook for 2009 are fully reflected in our outlook for Fortis Inc. We continue to rate the shares of Fortis Inc. Outperform.

This report was prepared by an Analyst employed by a Canadian affiliate, BMO Nesbitt Burns Inc., and who is not registered as a research analyst under NYSE/NASD rules. For disclosure statements, including the Analyst's Certification, please refer to pages 2 to 4.

Company Risk Disclosure

In addition to the risks involved in investing in common stocks generally, we also highlight the following risks that pertain to this company. Operations are subject to complex regulation by a variety of provincial, state and federal (Canada, Cayman Islands & Belize) agencies. Changes in regulation may adversely affect performance.

Financial performance depends on the availability of installed generation and the production of electric power by third parties. Fortis Properties' cash flow is dependent on hotel room vacancy rates and commercial building occupancy levels. The company's operations in Belize may be disrupted and assets may be damaged by hurricanes and/or tropical storms.

Analyst's Certification

I, Karen Taylor, CFA, hereby certify that the views expressed in this report accurately reflect my personal views about the subject securities or issuers. I also certify that no part of my compensation was, is, or will be, directly or indirectly, related to the specific recommendations or views expressed in this report.

General Disclosure

The information and opinions in this report were prepared by BMO Nesbitt Burns Inc. and BMO Nesbitt Burns Ltée./Ltd., collectively ("BMO NB"). BMO NB is not subject to U.S. rules with regard to the preparation of research reports and the independence of analysts. "BMO Capital Markets" is a trade name used by the BMO Investment Banking Group, which includes the wholesale/institutional arms of Bank of Montreal and BMO NB in Canada, and BMO Capital Markets Corp. in the U.S. BMO Capital Markets Corp. is an affiliate of BMO NB. BMO NB and BMO Capital Markets Corp. are subsidiaries of Bank of Montreal. Bank of Montreal or its affiliates ("BMO Financial Group") has lending arrangements with, or provide other remunerated services to, many issuers covered by BMO NB research. A significant lending relationship may exist between BMO Financial Group and certain of the issuers mentioned herein. The reader should assume that BMO NB, BMO Capital Markets Corp., Bank of Montreal or their affiliates may have a conflict of interest and should not rely solely on this report in evaluating whether or not to buy or sell securities of issuers discussed herein. The opinions, estimates and projections contained in this report are those of BMO NB as of the date of this report and are subject to change without notice. BMO NB endeavours to ensure that the contents have been compiled or derived from sources that we believe are reliable and contain information and opinions that are accurate and complete. However, BMO NB makes no representation or warranty, express or implied, in respect thereof, takes no responsibility for any errors and omissions contained herein and accepts no liability whatsoever for any loss arising from any use of, or reliance on, this report or its contents. Information may be available to BMO NB or its affiliates that is not reflected in this report. The information in this report is not intended to be used as the primary basis of investment decisions, and because of individual client objectives, should not be construed as advice designed to meet the particular investment needs of any investor. This material is for information purposes only and is not an offer to sell or the solicitation of an offer to buy any security. The research analyst and/or associates who prepared this report are compensated based upon (among other factors) the overall profitability of BMO NB and its affiliates, which includes the overall profitability of investment banking services. BMO NB, or its affiliates expect to receive or will seek compensation for investment banking services within the next 3 months from all issuers covered by BMO NB. BMO NB or its affiliates will buy from or sell to customers the securities of issuers mentioned in this report on a principal basis. BMO NB or its affiliates, officers, directors or employees may have a long or short position in the securities discussed herein, related securities or in options, futures or other derivative instruments based thereon.

Company Specific Disclosure

Disclosure 2: BMO NB has undertaken an underwriting liability with respect to this issuer within the past 12 months.

Disclosure 3: BMO NB has provided investment banking services with respect to this issuer within the past 12 months.

Disclosure 7: BMO Capital Markets Corp. or an affiliate has received compensation for investment banking services from this issuer within the past 12 months.

Disclosure 9: BMO Capital Markets Corp. or an affiliate received compensation for products or services other than investment banking services within the past 12 months.

Disclosure 10: This issuer is a client (or was a client) of BMO NB, BMO Capital Markets Corp. or an affiliate within the past 12 months: Investment Banking Services & Non-Securities Related Services.

Distribution of Ratings

Rating Category	BMO Rating	BMO Universe	BMO I.B. Clients*	First Call Universe**
Buy	Outperform	38%	47%	47%
Hold	Market Perform	52%	45%	46%
Sell	Underperform	10%	8%	7%

** Reflects rating distribution of all North American equity research analysts.

Ratings Key

We use the following ratings system definitions:

OP = Outperform - Forecast to outperform the market;

Mkt = Market Perform - Forecast to perform roughly in line with the market;

Und = Underperform - Forecast to underperform the market;

(S) = speculative investment;

NR = No rating at this time;

R = Restricted – Dissemination of research is currently restricted.

Market performance is measured by a benchmark index such as the S&P/TSX Composite Index, S&P 500, Nasdaq Composite, as appropriate for each company. Prior to September 1, 2003, a fourth rating tier—Top Pick—was used to designate those stocks we felt would be the best performers relative to the market. Our six Top 15 lists which guide investors to our best ideas according to six different objectives (large, small, growth, value, income and quantitative) have replaced the Top Pick rating.

Dissemination of Research

Our research publications are available via our web site <http://bmocapitalmarkets.com>. Institutional clients may also receive our research via FIRST CALL Research Direct and Reuters. All of our research is made widely available at the same time to all BMO NB, BMO Capital Markets Corp. and BMO Nesbitt Burns Securities Ltd. client groups entitled to our research. Please contact your investment advisor or institutional salesperson for more information.

Additional Matters

TO U.S. RESIDENTS: BMO Capital Markets Corp. and/or BMO Nesbitt Burns Securities Ltd., affiliates of BMO NB, furnish this report to U.S. residents and accept responsibility for the contents herein, except to the extent that it refers to securities of Bank of Montreal. Any U.S. person wishing to effect transactions in any security discussed herein should do so through BMO Capital Markets Corp. and/or BMO Nesbitt Burns Securities Ltd.

TO U.K. RESIDENTS: The contents hereof are intended solely for the use of, and may only be issued or passed onto, persons described in part VI of the Financial Services and Markets Act 2000 (Financial Promotion) Order 2001.

BMO Nesbitt Burns Inc. and BMO Nesbitt Burns Ltée/Ltd. are Members of CIPF. BMO Capital Markets Corp. and BMO Nesbitt Burns Securities Ltd. are Members of SIPC.

"BMO Capital Markets" is a trade-mark of Bank of Montreal, used under licence.

"BMO (M-Bar roundel symbol)" is a registered trade-mark of Bank of Montreal, used under licence.

Management Meetings – Outperform Rating Unchanged

Event

We hosted investor meetings with management on September 18/19 and note the following highlights: (i) the low-risk growth strategy remains intact – we estimate a 5% compound annual growth rate over the 2006 to 2010 period substantially from visible, utility projects. The company has very few larger, high risk projects that would jeopardize estimated growth rates were they not to be approved; (ii) we continue to expect \$250 million in common share equity will be required in early 2009 in order to partially fund \$900 million of utility capital expenditures in both 2008 and 2009; and (iii) we continue to believe that the company may be acquisitive over the forecast period, in the gas/electric distribution segment in Canada or the Pacific Northwestern United States, and that the company is likely to undertake only accretive transactions.

Impact

Neutral.

Forecasts

We have updated our outlook to: (i) better reflect the seasonality of Terasen Inc's quarterly earnings profile of Q1 – 55%; Q2 – 5%; Q3 – (5%); and Q4 – 45%; and (ii) incorporate the LNG Storage Facility applied for by Terasen Gas (Vancouver Island) on June 5 (see our June 6, 2007 comment). Our estimates currently reflect a December 31, 2006 rate base for Newfoundland Power of \$752.9 million and 2008 capital additions of \$50.754 million, as per that utility's May 10 filing that was approved by the Newfoundland Board of Commissioners of Public Utilities on September 19/2007. Our 2007 EPS estimate declines to \$1.36 from \$1.44, as a result of the change in the assumed seasonality of Terasen's earnings.

Valuation

Our target price reflects a weighted valuation approach: 18.0x diluted 2008E EPS of \$1.55 (12.5%), 2.0x 2008E book value per share of \$17.90 (12.5%), and a target yield of 3.00% (75%), assuming 2008E dividends per share of \$0.92.

Recommendation

We believe the shares are attractively valued at current levels. Our rating is Outperform.

Company Risk Disclosure

In addition to the risks involved in investing in common stocks generally, we also highlight the following risks that pertain to this company. Operations are subject to complex regulation by a variety of provincial, state and federal (Canada, Cayman Islands & Belize) agencies. Changes in regulation may adversely affect performance.

Financial performance depends on the availability of installed generation and the production of electric power by third parties. Fortis Properties' cash flow is dependent on hotel room vacancy rates and commercial building occupancy levels. The company's operations in Belize may be disrupted and assets may be damaged by hurricanes and/or tropical storms.

Analyst's Certification

I, Karen Taylor, CFA, hereby certify that the views expressed in this report accurately reflect my personal views about the subject securities or issuers. I also certify that no part of my compensation was, is, or will be, directly or indirectly, related to the specific recommendations or views expressed in this report.

General Disclosure

The information and opinions in this report were prepared by BMO Nesbitt Burns Inc. and BMO Nesbitt Burns Ltée./Ltd., collectively ("BMO NB"). BMO NB is not subject to U.S. rules with regard to the preparation of research reports and the independence of analysts. "BMO Capital Markets" is a trade name used by the BMO Investment Banking Group, which includes the wholesale/institutional arms of Bank of Montreal and BMO NB in Canada, and BMO Capital Markets Corp. in the U.S. BMO Capital Markets Corp. is an affiliate of BMO NB. BMO NB and BMO Capital Markets Corp. are subsidiaries of Bank of Montreal. Bank of Montreal or its affiliates ("BMO Financial Group") has lending arrangements with, or provide other remunerated services to, many issuers covered by BMO NB research. A significant lending relationship may exist between BMO Financial Group and certain of the issuers mentioned herein. The reader should assume that BMO NB, BMO Capital Markets Corp., Bank of Montreal or their affiliates may have a conflict of interest and should not rely solely on this report in evaluating whether or not to buy or sell securities of issuers discussed herein. The opinions, estimates and projections contained in this report are those of BMO NB as of the date of this report and are subject to change without notice. BMO NB endeavours to ensure that the contents have been compiled or derived from sources that we believe are reliable and contain information and opinions that are accurate and complete. However, BMO NB makes no representation or warranty, express or implied, in respect thereof, takes no responsibility for any errors and omissions contained herein and accepts no liability whatsoever for any loss arising from any use of, or reliance on, this report or its contents. Information may be available to BMO NB or its affiliates that is not reflected in this report. The information in this report is not intended to be used as the primary basis of investment decisions, and because of individual client objectives, should not be construed as advice designed to meet the particular investment needs of any investor. This material is for information purposes only and is not an offer to sell or the solicitation of an offer to buy any security. The research analyst and/or associates who prepared this report are compensated based upon (among other factors) the overall profitability of BMO NB and its affiliates, which includes the overall profitability of investment banking services. BMO NB, or its affiliates expect to receive or will seek compensation for investment banking services within the next 3 months from all issuers covered by BMO NB. BMO NB or its affiliates will buy from or sell to customers the securities of issuers mentioned in this report on a principal basis. BMO NB or its affiliates, officers, directors or employees may have a long or short position in the securities discussed herein, related securities or in options, futures or other derivative instruments based thereon.

Company Specific Disclosure

Disclosure 2: BMO NB has undertaken an underwriting liability with respect to this issuer within the past 12 months.

Disclosure 3: BMO NB has provided investment banking services with respect to this issuer within the past 12 months.

Disclosure 7: BMO Capital Markets Corp. or an affiliate has received compensation for investment banking services from this issuer within the past 12 months.

Disclosure 9: BMO Capital Markets Corp. or an affiliate received compensation for products or services other than investment banking services within the past 12 months.

Disclosure 10: This issuer is a client (or was a client) of BMO NB, BMO Capital Markets Corp. or an affiliate within the past 12 months: Investment Banking Services & Non-Securities Related Services.

** Reflects rating distribution of all North American equity research analysts.

Ratings Key

We use the following ratings system definitions:

OP = Outperform - Forecast to outperform the market;

Mkt = Market Perform - Forecast to perform roughly in line with the market;

Und = Underperform - Forecast to underperform the market;

(S) = speculative investment;

NR = No rating at this time;

R = Restricted – Dissemination of research is currently restricted.

Market performance is measured by a benchmark index such as the S&P/TSX Composite Index, S&P 500, Nasdaq Composite, as appropriate for each company. Prior to September 1, 2003, a fourth rating tier—Top Pick—was used to designate those stocks we felt would be the best performers relative to the market. Our six Top 15 lists which guide investors to our best ideas according to six different objectives (large, small, growth, value, income and quantitative) have replaced the Top Pick rating.

Dissemination of Research

Our research publications are available via our web site <http://bmocapitalmarkets.com>. Institutional clients may also receive our research via FIRST CALL Research Direct and Reuters. All of our research is made widely available at the same time to all BMO NB, BMO Capital Markets Corp. and BMO Nesbitt Burns Securities Ltd. client groups entitled to our research. Please contact your investment advisor or institutional salesperson for more information.

Additional Matters

TO U.S. RESIDENTS: BMO Capital Markets Corp. and/or BMO Nesbitt Burns Securities Ltd., affiliates of BMO NB, furnish this report to U.S. residents and accept responsibility for the contents herein, except to the extent that it refers to securities of Bank of Montreal. Any U.S. person wishing to effect transactions in any security discussed herein should do so through BMO Capital Markets Corp. and/or BMO Nesbitt Burns Securities Ltd.

TO U.K. RESIDENTS: The contents hereof are intended solely for the use of, and may only be issued or passed onto, persons described in part VI of the Financial Services and Markets Act 2000 (Financial Promotion) Order 2001.

BMO Nesbitt Burns Inc. and BMO Nesbitt Burns Ltée/Ltd. are Members of CIPF. BMO Capital Markets Corp. and BMO Nesbitt Burns Securities Ltd. are Members of SIPC.

"BMO Capital Markets" is a trade-mark of Bank of Montreal, used under licence.

"BMO (M-Bar roundel symbol)" is a registered trade-mark of Bank of Montreal, used under licence.

FortisBC Applies for 2008 Rates; Outperform Rating Unchanged

Event

On October 2, FortisBC (100% - Fortis Inc.) filed an application with the British Columbia Utilities Commission (BCUC) to set customer electricity rates for 2008. The application that was filed by the utility is consistent with the Multi-Year Performance Based Regulation (PBR) Plan for the period 2006 to 2008 (with an option to extend the Plan for 2009) approved by the Commission on May 19, 2006, and has a number of key highlights, as set out herein.

Impact

Neutral.

Forecasts

Our diluted 2007 and 2008 EPS estimates of \$1.36 and \$1.55, respectively, are unchanged.

Valuation

Our target price of \$31.00 reflects a weighted valuation approach: 18.0x diluted 2008E EPS of \$1.55 (12.5%), 2.0x 2008E book value per share of \$17.90 (12.5%), and a target yield of 3.00% (75%), assuming 2008 dividends per share of \$0.92.

Recommendation

We believe that the shares are attractively valued at current levels. Our rating is Outperform.

Details & Analysis

On October 2, FortisBC (100% - Fortis Inc.) filed an application with the British Columbia Utilities Commission (BCUC) to set customer electricity rates for 2008. The application that was filed by the utility is consistent with the Multi-Year Performance Based Regulation (PBR) Plan for the period 2006 to 2008 (with an option to extend the Plan for 2009) approved by the Commission on May 19, 2006, and has a number of key highlights, as set out below:

- 4% Rate Increase – the utility has requested a 4% rate increase effective January 1, 2008. The proposed increase is attributable to the following: (i) financing costs associated with incremental rate base \$11.6 million or 2.6% of the proposed increase; (ii) increased power supply costs due to load growth \$2.8 million or 0.6% of the proposed increase in rates; (iii) increased income tax expense of \$1.3 million or 0.3% of the proposed increases; (iv) \$0.7 million higher operating costs or 0.2% of the increase; (v) flow-through adjustments of \$1.3 million or 0.3% of the increase; and (vi) reduction in rates of 1% arising from \$2.3 million returned to customers via the approved return on equity sharing mechanism adjustment. This adjustment provides for equal sharing of any return on equity variance within a 2% band above or below the approved return on equity.
- Mid-year utility rate base of \$833.035 million, versus a forecast mid-year utility rate base of \$750.832 million in 2007.
- Net plant additions of \$111.150 million in 2008 versus forecast net additions of \$134.696 million in 2007. Gross capital expenditures are expected to be \$124.050 million in 2008 and \$142.508 million in 2007.
- Allowed capital structure of 40% equity and 60% debt in 2008, consistent with the capital structure in 2007.
- The allowed return for 2008 will be subject to the Commission's existing formula, which provides the utility with a 40-basis-point premium to the benchmark utility allowed return. For 2007, the allowed return on equity was 8.77%. The 2008 allowed return is expected to be determined in late November 2007.
- Depreciation and amortization of \$34.953 million in 2008 versus \$31.051 million approved for fiscal 2007.
- The utility does not anticipate issuing long-term debt in 2008; however, it is anticipating the use of its \$150 million operating credit facility in order to finance its 2008 capital expenditure program.

Estimates

Our diluted 2007 and 2008 EPS estimates of \$1.36 and \$1.55, respectively, are unchanged.

Valuation

Our target price of \$31.00 reflects a weighted valuation approach: 18.0x diluted 2008E EPS of \$1.55 (12.5%), 2.0x 2008E book value per share of \$17.90 (12.5%), and a target yield of 3.00% (75%), assuming 2008 dividends per share of \$0.92.

Recommendation

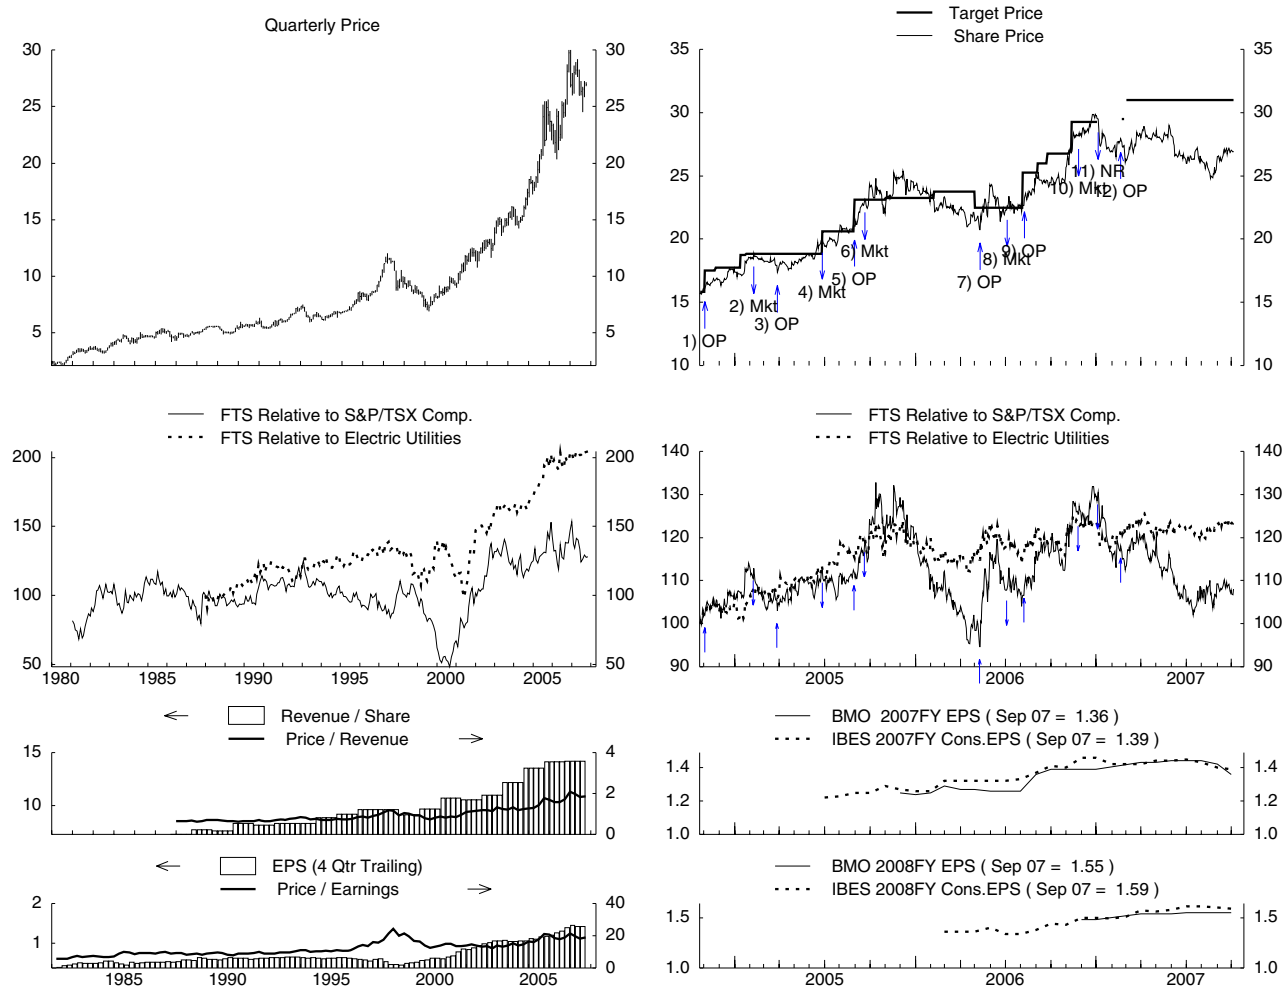

We believe that the shares are attractively valued at current levels. Our rating is Outperform.

Company Risk Disclosure

In addition to the risks involved in investing in common stocks generally, we also highlight the following risks that pertain to this company. Operations are subject to complex regulation by a variety of provincial, state and federal (Canada, Cayman Islands & Belize) agencies. Changes in regulation may adversely affect performance.

Financial performance depends on the availability of installed generation and the production of electric power by third parties. Fortis Properties' cash flow is dependent on hotel room vacancy rates and commercial building occupancy levels. The company's operations in Belize may be disrupted and assets may be damaged by hurricanes and/or tropical storms.

BMO NB is not subject to U.S. rules with regard to the preparation of research reports and the independence of analysts. "BMO Capital Markets" is a trade name used by the BMO Investment Banking Group, which includes the wholesale/institutional arms of Bank of Montreal and BMO NB in Canada, and BMO Capital Markets Corp. in the U.S. BMO Capital Markets Corp. is an affiliate of BMO NB. BMO NB and BMO Capital Markets Corp. are subsidiaries of Bank of Montreal. Bank of Montreal or its affiliates ("BMO Financial Group") has lending arrangements with, or provide other remunerated services to, many issuers covered by BMO NB research. A significant lending relationship may exist between BMO Financial Group and certain of the issuers mentioned herein. The reader should assume that BMO NB, BMO Capital Markets Corp., Bank of Montreal or their affiliates may have a conflict of interest and should not rely solely on this report in evaluating whether or not to buy or sell securities of issuers discussed herein. The opinions, estimates and projections contained in this report are those of BMO NB as of the date of this report and are subject to change without notice. BMO NB endeavours to ensure that the contents have been compiled or derived from sources that we believe are reliable and contain information and opinions that are accurate and complete. However, BMO NB makes no representation or warranty, express or implied, in respect thereof, takes no responsibility for any errors and omissions contained herein and accepts no liability whatsoever for any loss arising from any use of, or reliance on, this report or its contents. Information may be available to BMO NB or its affiliates that is not reflected in this report. The information in this report is not intended to be used as the primary basis of investment decisions, and because of individual client objectives, should not be construed as advice designed to meet the particular investment needs of any investor. This material is for information purposes only and is not an offer to sell or the solicitation of an offer to buy any security. The research analyst and/or associates who prepared this report are compensated based upon (among other factors) the overall profitability of BMO NB and its affiliates, which includes the overall profitability of investment banking services. BMO NB, or its affiliates expect to receive or will seek compensation for investment banking services within the next 3 months from all issuers covered by BMO NB. BMO NB or its affiliates will buy from or sell to customers the securities of issuers mentioned in this report on a principal basis. BMO NB or its affiliates, officers, directors or employees may have a long or short position in the securities discussed herein, related securities or in options, futures or other derivative instruments based thereon.

Company Specific Disclosure

Disclosure 2: BMO NB has undertaken an underwriting liability with respect to this issuer within the past 12 months.

Disclosure 3: BMO NB has provided investment banking services with respect to this issuer within the past 12 months.

Disclosure 9: BMO Capital Markets Corp. or an affiliate received compensation for products or services other than investment banking services within the past 12 months.

Disclosure 10: This issuer is a client (or was a client) of BMO NB, BMO Capital Markets Corp. or an affiliate within the past 12 months: Investment Banking Services & Non-Securities Related Services.

Distribution of Ratings

Rating Category	BMO Rating	BMO Universe	BMO I.B. Clients*	First Call Universe**
Buy	Outperform	42%	49%	49%
Hold	Market Perform	50%	46%	45%
Sell	Underperform	8%	5%	6%

* Reflects rating distribution of all companies where BMO Capital Markets has received compensation for Investment Banking services.

** Reflects rating distribution of all North American equity research analysts.

Ratings Key

We use the following ratings system definitions:

OP = Outperform - Forecast to outperform the market;

Mkt = Market Perform - Forecast to perform roughly in line with the market;

Und = Underperform - Forecast to underperform the market;

(S) = speculative investment;

NR = No rating at this time;

R = Restricted – Dissemination of research is currently restricted.

Market performance is measured by a benchmark index such as the S&P/TSX Composite Index, S&P 500, Nasdaq Composite, as appropriate for each company. Prior to September 1, 2003, a fourth rating tier—Top Pick—was used to designate those stocks we felt would be the best performers relative to the market. Our six Top 15 lists which guide investors to our best ideas according to six different objectives (large, small, growth, value, income and quantitative) have replaced the Top Pick rating.

Dissemination of Research

Our research publications are available via our web site <http://bmocapitalmarkets.com>. Institutional clients may also receive our research via FIRST CALL Research Direct and Reuters. All of our research is made widely available at the same time to all BMO NB, BMO Capital Markets Corp. and BMO Nesbitt Burns Securities Ltd. client groups entitled to our research. Please contact your investment advisor or institutional salesperson for more information.

Additional Matters

TO U.S. RESIDENTS: BMO Capital Markets Corp. and/or BMO Nesbitt Burns Securities Ltd., affiliates of BMO NB, furnish this report to U.S. residents and accept responsibility for the contents herein, except to the extent that it refers to securities of Bank of Montreal. Revised 2008 Rate Application Filed; Outperform Rating Maintained

Event

On October 11, Newfoundland Power (100% - Fortis Inc.) filed a revised application for 2008 rates with the Newfoundland and Labrador Board of Commissioners of Public Utilities (PUB). The revised application proposes an average electricity rate increase of 2.8% versus the previously applied-for increase of 5.3%. The revised application is the result of recent negotiations between the company and the Consumer Advocate, which determined that the applied-for ROE for 2008 should be 8.95% versus the previously applied-for ROE of 10.25% and an allowed ROE of 8.60% in 2007. The parties agree that the risk-free rate for 2008 be set at 4.60% and the risk premium be set at 4.35%.

Impact

Neutral.

Forecasts

We have updated our financial model to reflect the revised estimated 2008 rate base, allowed ROE and capital expenditure budget outlined in the new application. We have also updated our U.S. dollar/Canadian dollar exchange rate assumptions. We now assume an average exchange rate of 1.0746 CDN/USD in 2007 and parity thereafter versus 1.11 CDN/USD in 2007 and 2008. Average fiscal 2008 rate base is assumed to be \$812.2 million versus year-end 2008 rate base of \$816.6 million previously.

Valuation

Our \$31 target reflects a weighted valuation approach: 18.0x diluted 2008E EPS of \$1.55 (12.5%), 2.0x 2008E book value per share of \$17.89 (12.5%), and a target yield of 3.00% (75%), assuming 2008 dividends per share of \$0.92.

Recommendation

We believe that the shares are attractively valued at current levels. Our rating is Outperform.

Company Risk Disclosure

In addition to the risks involved in investing in common stocks generally, we also highlight the following risks that pertain to this company. Operations are subject to complex regulation by a variety of provincial, state and federal (Canada, Cayman Islands & Belize) agencies. Changes in regulation may adversely affect performance.

Financial performance depends on the availability of installed generation and the production of electric power by third parties. Fortis Properties' cash flow is dependent on hotel room vacancy rates and commercial building occupancy levels. The company's operations in Belize may be disrupted and assets may be damaged by hurricanes and/or tropical storms.

Analyst's Certification

I, Karen Taylor, CFA, hereby certify that the views expressed in this report accurately reflect my personal views about the subject securities or issuers. I also certify that no part of my compensation was, is, or will be, directly or indirectly, related to the specific recommendations or views expressed in this report.

General Disclosure

The information and opinions in this report were prepared by BMO Nesbitt Burns Inc. and BMO Nesbitt Burns Ltée./Ltd., collectively ("BMO NB"). BMO NB is not subject to U.S. rules with regard to the preparation of research reports and the independence of analysts. "BMO Capital Markets" is a trade name used by the BMO Investment Banking Group, which includes the wholesale/institutional arms of Bank of Montreal and BMO NB in Canada, and BMO Capital Markets Corp. in the U.S. BMO Capital Markets Corp. is an affiliate of BMO NB. BMO NB and BMO Capital Markets Corp. are subsidiaries of Bank of Montreal. Bank of Montreal or its affiliates ("BMO Financial Group") has lending arrangements with, or provide other remunerated services to, many issuers covered by BMO NB research. A significant lending relationship may exist between BMO Financial Group and certain of the issuers mentioned herein. The reader should assume that BMO NB, BMO Capital Markets Corp., Bank of Montreal or their affiliates may have a conflict of interest and should not rely solely on this report in evaluating whether or not to buy or sell securities of issuers discussed herein. The opinions, estimates and projections contained in this report are those of BMO NB as of the date of this report and are subject to change without notice. BMO NB endeavours to ensure that the contents have been compiled or derived from sources that we believe are reliable and contain information and opinions that are accurate and complete. However, BMO NB makes no representation or warranty, express or implied, in respect thereof, takes no responsibility for any errors and omissions contained herein and accepts no liability whatsoever for any loss arising from any use of, or reliance on, this report or its contents. Information may be available to BMO NB or its affiliates that is not reflected in this report. The information in this report is not intended to be used as the primary basis of investment decisions, and because of individual client objectives, should not be construed as advice designed to meet the particular investment needs of any investor. This material is for information purposes only and is not an offer to sell or the solicitation of an offer to buy any security. The research analyst and/or associates who prepared this report are compensated based upon (among other factors) the overall profitability of BMO NB and its affiliates, which includes the overall profitability of investment banking services. BMO NB, or its affiliates expect to receive or will seek compensation for investment banking services within the next 3 months from all issuers covered by BMO NB. BMO NB or its affiliates will buy from or sell to customers the securities of issuers mentioned in this report on a principal basis. BMO NB or its affiliates, officers, directors or employees may have a long or short position in the securities discussed herein, related securities or in options, futures or other derivative instruments based thereon.

Company Specific Disclosure

Disclosure 2: BMO NB has undertaken an underwriting liability with respect to this issuer within the past 12 months.

Disclosure 3: BMO NB has provided investment banking services with respect to this issuer within the past 12 months.

Disclosure 7: BMO Capital Markets Corp. or an affiliate has received compensation for investment banking services from this issuer within the past 12 months.

Disclosure 9: BMO Capital Markets Corp. or an affiliate received compensation for products or services other than investment banking services within the past 12 months.

Disclosure 10: This issuer is a client (or was a client) of BMO NB, BMO Capital Markets Corp. or an affiliate within the past 12 months: Investment Banking Services & Non-Securities Related Services.

Distribution of Ratings

Rating Category	BMO Rating	BMO Universe	BMO I.B. Clients*	First Call Universe**
Buy	Outperform	42%	49%	49%
Hold	Market Perform	50%	46%	45%

** Reflects rating distribution of all North American equity research analysts.

Ratings Key

We use the following ratings system definitions:

OP = Outperform - Forecast to outperform the market;

Mkt = Market Perform - Forecast to perform roughly in line with the market;

Und = Underperform - Forecast to underperform the market;

(S) = speculative investment;

NR = No rating at this time;

R = Restricted – Dissemination of research is currently restricted.

Market performance is measured by a benchmark index such as the S&P/TSX Composite Index, S&P 500, Nasdaq Composite, as appropriate for each company. Prior to September 1, 2003, a fourth rating tier—Top Pick—was used to designate those stocks we felt would be the best performers relative to the market. Our six Top 15 lists which guide investors to our best ideas according to six different objectives (large, small, growth, value, income and quantitative) have replaced the Top Pick rating.

Dissemination of Research

Our research publications are available via our web site <http://bmocapitalmarkets.com>. Institutional clients may also receive our research via FIRST CALL Research Direct and Reuters. All of our research is made widely available at the same time to all BMO NB, BMO Capital Markets Corp. and BMO Nesbitt Burns Securities Ltd. client groups entitled to our research. Please contact your investment advisor or institutional salesperson for more information.

Proposed Royalty Regime

Impact

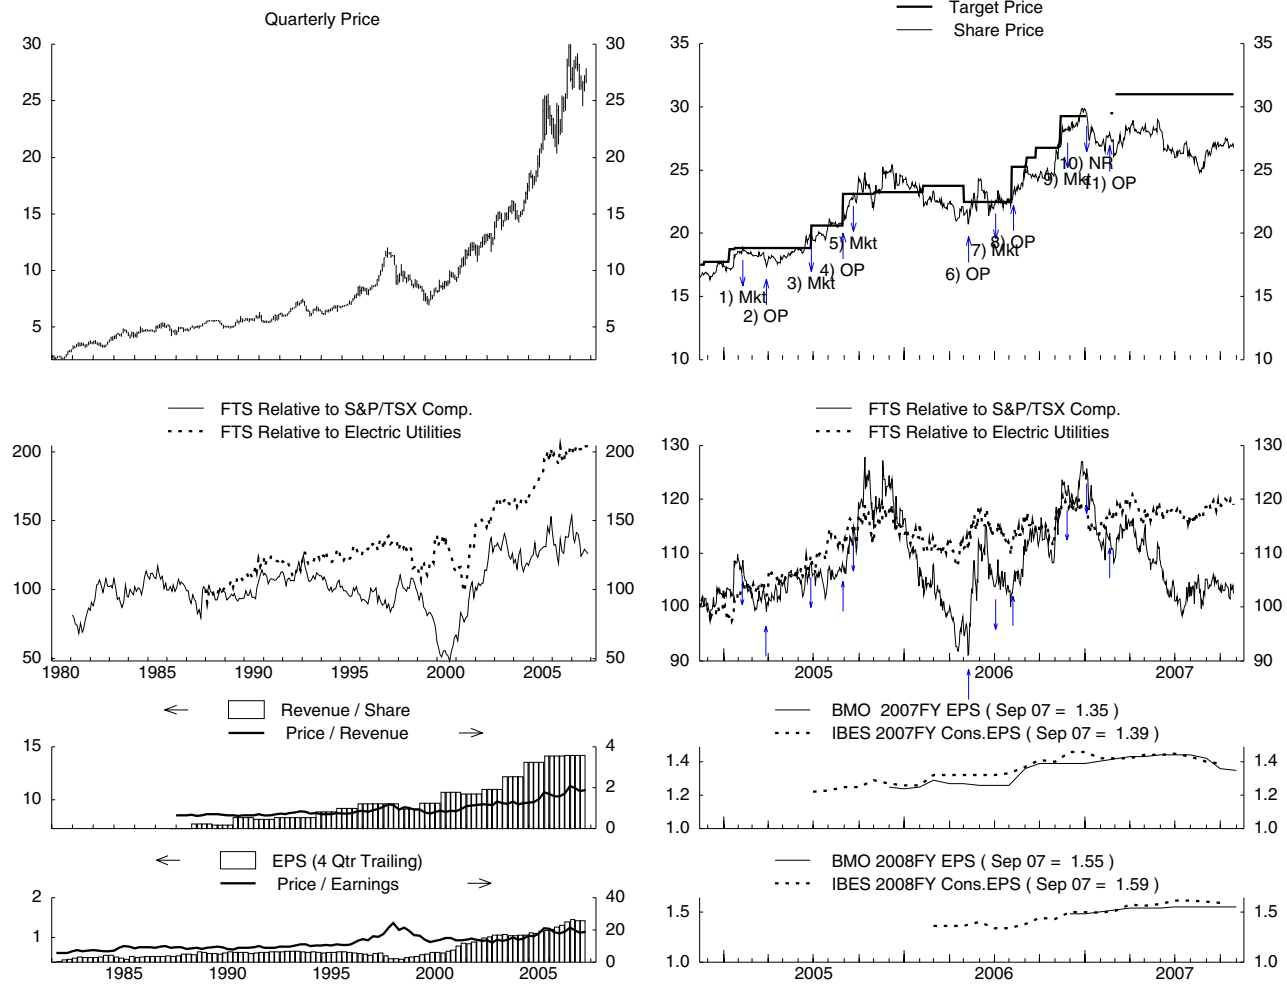

Neutral

Details & Analysis

Alberta Premier Ed Stelmach unveiled the province's new royalty tax regime yesterday, increasing royalties an average of 20% or \$1.4 billion by 2010. Although FortisAlberta (100% - Fortis Inc.) is one of the fastest-growing utility operations in the Fortis group of utilities, we do not expect the new royalty regime to have a material effect on our outlook for the stock. FortisAlberta has been growing at an above-average rate for several years. Even if customer requests for new service were to decline as a result of this new royalty regime, we believe that the utility would continue to have elevated capital expenditure levels to in-fill the growth it has already accommodated on its system. Capital expenditures are expected to remain at above-average levels beyond the end of our current forecast period. We continue to rate the shares of Fortis Inc. Outperform.

This report was prepared by an Analyst employed by a Canadian affiliate, BMO Nesbitt Burns Inc., and who is not registered as a research analyst under FINRA rules. For disclosure statements, including the Analyst's Certification, please refer to pages 2 to 4.

Company Risk Disclosure

In addition to the risks involved in investing in common stocks generally, we also highlight the following risks that pertain to this company. Operations are subject to complex regulation by a variety of provincial, state and federal (Canada, Cayman Islands & Belize) agencies. Changes in regulation may adversely affect performance.

Financial performance depends on the availability of installed generation and the production of electric power by third parties. Fortis Properties' cash flow is dependent on hotel room vacancy rates and commercial building occupancy levels. The company's operations in Belize may be disrupted and assets may be damaged by hurricanes and/or tropical storms.

Analyst's Certification

I, Karen Taylor, CFA, hereby certify that the views expressed in this report accurately reflect my personal views about the subject securities or issuers. I also certify that no part of my compensation was, is, or will be, directly or indirectly, related to the specific recommendations or views expressed in this report.

General Disclosure

The information and opinions in this report were prepared by BMO Nesbitt Burns Inc. and BMO Nesbitt Burns Ltée./Ltd., collectively ("BMO NB"). BMO NB is not subject to U.S. rules with regard to the preparation of research reports and the independence of analysts. "BMO Capital Markets" is a trade name used by the BMO Investment Banking Group, which includes the wholesale/institutional arms of Bank of Montreal and BMO NB in Canada, and BMO Capital Markets Corp. in the U.S. BMO Capital Markets Corp. is an affiliate of BMO NB. BMO NB and BMO Capital Markets Corp. are subsidiaries of Bank of Montreal. Bank of Montreal or its affiliates ("BMO Financial Group") has lending arrangements with, or provide other remunerated services to, many issuers covered by BMO NB research. A significant lending relationship may exist between BMO Financial Group and certain of the issuers mentioned herein. The reader should assume that BMO NB, BMO Capital Markets Corp., Bank of Montreal or their affiliates may have a conflict of interest and should not rely solely on this report in evaluating whether or not to buy or sell securities of issuers discussed herein. The opinions, estimates and projections contained in this report are those of BMO NB as of the date of this report and are subject to change without notice. Ratings Key

We use the following ratings system definitions:

OP = Outperform - Forecast to outperform the market;

Mkt = Market Perform - Forecast to perform roughly in line with the market;

Und = Underperform - Forecast to underperform the market;

(S) = speculative investment;

NR = No rating at this time;

R = Restricted – Dissemination of research is currently restricted.

Market performance is measured by a benchmark index such as the S&P/TSX Composite Index, S&P 500, Nasdaq Composite, as appropriate for each company. Prior to September 1, 2003, a fourth rating tier—Top Pick—was used to designate those stocks we felt would be the best performers relative to the market. Our six Top 15 lists which guide investors to our best ideas according to six different objectives (large, small, growth, value, income and quantitative) have replaced the Top Pick rating.

Dissemination of Research

Our research publications are available via our web site <http://bmocapitalmarkets.com>. Institutional clients may also receive our research via FIRST CALL Research Direct and Reuters. All of our research is made widely available at the same time to all BMO NB, BMO Capital Markets Corp. and BMO Nesbitt Burns Securities Ltd. client groups entitled to our research. Please contact your investment advisor or institutional salesperson for more information.

Additional Matters

TO U.S. RESIDENTS: BMO Capital Markets Corp. and/or BMO Nesbitt Burns Securities Ltd., affiliates of BMO NB, furnish this report to U.S. residents and accept responsibility for the contents herein, except to the extent that it refers to securities of Bank of Montreal. Any U.S. person wishing to effect transactions in any security discussed herein should do so through BMO Capital Markets Corp. and/or BMO Nesbitt Burns Securities Ltd.

TO U.K. RESIDENTS: In the UK this document is published by BMO Capital Markets Limited which is authorised and regulated by the Financial Services Authority. The contents hereof are intended solely for the use of, and may only be issued or passed onto, persons described in part VI of the Financial Services and Markets Act 2000 (Financial Promotion) Order 2001.

BMO Nesbitt Burns Inc. and BMO Nesbitt Burns Ltée/Ltd. are Members of CIPF. BMO Capital Markets Corp. and BMO Nesbitt Burns Securities Ltd. are Members of SIPC.

"BMO Capital Markets" is a trade-mark of Bank of Montreal, used under licence.

"BMO (M-Bar roundel symbol)" is a registered trade-mark of Bank of Montreal, used under licence.

Q3/07 EPS in Line with Expectations; Outperform Rating Maintained

Event

Fortis reported Q3/07 EPS of \$0.20 versus our expectation of \$0.19 and a mean estimate of \$0.21. Results were largely in line with expectations. We note the following: (i) the contribution from FortisAlberta and FortisBC were moderately higher than expected, due to higher taxation recoveries at FortisAlberta and stronger-than-expected customer growth at FortisBC. These gains were partially offset by: (ii) lower contribution from the non-regulated power generation segment, arising from lower quarter-over-quarter hydrological conditions in Ontario, Upper State New York and Belize; and (iii) higher-than-expected unallocated Corporate costs. There were no material one-time items or adjustments during the quarter.

Impact

Neutral.

Forecasts

We have updated our financial model to better reflect year-to-date performance. Our diluted 2007 EPS estimate of \$1.35 is unchanged. Our diluted 2008 EPS estimate declines marginally to \$1.52 from \$1.55, and we are introducing our 2009 EPS estimate of \$1.53.

Valuation

Our target price of \$32.00 reflects a weighted valuation approach: 18x diluted 2009E EPS of \$1.53 (12.5%), 2.0x 2009E BVPS of \$19.12 (12.5%) and a target yield of 3.00% (75%), assuming 2009 dividends per share of \$0.96.

Recommendation

We believe that the shares are attractively valued at current levels. Our rating is Outperform.

Details & Analysis

Fortis reported Q3/07 EPS of \$0.20 versus our expectation of \$0.19 and a mean estimate of \$0.21. Results were largely in line with expectations. We note the following: (i) the contribution from FortisAlberta and FortisBC were moderately higher than expected, due to higher taxation recoveries at FortisAlberta and stronger-than-expected customer growth at FortisBC. These gains were partially offset by: (ii) lower contribution from the non-regulated power generation segment, arising from lower quarter-over-quarter hydrological conditions in Ontario, Upper State New York and Belize; and (iii) higher-than-expected unallocated Corporate costs. There were no material one-time items or adjustments during the quarter.

We believe that the following points are relevant about quarterly and year-to-date performance:

- The contribution from FortisAlberta was higher than expected due to the continued benefit arising from corporate income tax recoveries associated with AESO deferral amounts. In Q3/07, \$2.7 million of taxation recoveries were booked, and \$7.0 million year to date. We note that FortisAlberta has sold the \$28 million amount in its annual Alberta Electric System Operator (AESO) Charges Deferral Account for cash consideration of approximately \$26.8 million and a receivable of approximately \$1.2 million, due in February 15, 2008. We do not believe that any further corporate income tax recoveries are likely to be forthcoming in Q4/07 and thereafter. We believe that in Q4/06, there were approximately \$1.4 million of recoveries, and estimated performance reflects our assumption that the amortization of deferred taxation balances is now complete.
- With the exception of the 2008 rate application filed by Maritime Electric (100% - Fortis) with the Prince Edward Island Regulatory Appeals Commission (IRAC) on October 18, our estimates fully reflect: (i) \$18.6 million capital budget for 2008 at Maritime Electric, as approved by IRAC on October 11, 2007; (ii) Newfoundland Power's October 11 revised filing with the Newfoundland & Labrador Board of Commissioners of Public Utilities for 2008 rates; (iii) FortisBC's October 2, application with the British Columbia Utilities Commission (BCUC) for approval to set 2008 rates in accordance with the previously approved Multi-Year Performance Based Regulation Plan for 2006 to 2008 (extendible until the end of 2009); (iv) FortisAlberta's June 1 application to the Alberta Energy and Utilities Board for 2008 and 2009 Distribution Tariffs; (v) Terasen Gas (Vancouver Island)'s June 5 application to the BCUC to build, own and operate the Mt. Hayes liquefied natural gas storage facility on Vancouver Island; and (vi) Newfoundland Power's 2008 capital budget of \$50.754 million was approved by the Newfoundland & Labrador Board of Commissioners of Public Utilities on September 19, 2007.
- Corporate costs of approximately \$16.3 million in Q3/07 were higher than expected. We have revised our outlook for these unallocated financing amounts, to approximately \$16.5 million of cost per quarter in 2008 or \$66 million and approximately \$62.3 million in 2009.
- We have adjusted the seasonality of our 2008 quarterly EPS profile to reflect the expected contribution from Terasen Inc. on a full-year basis. We expect the following quarterly EPS profile for Terasen: Q1 – 55%, Q2 – 5%, Q3 – (5%), and Q4 – 45%.

- We have fine-tuned our 2009 contribution for Fortis' non-regulated generation segment, to reflect an expected \$14 million reduction in segment contribution from the previously announced expiry of the water rights on the Rankine River (74.6 MW of capacity). Our estimates previously incorporated a larger reduction in segment contribution.
- Quarterly and annual performance by segment is set out in Table 1, below.

Estimates

We have updated our financial model to better reflect year-to-date performance. Our diluted 2007 EPS estimate of \$1.35 is unchanged. Our diluted 2008 EPS estimate declines marginally to \$1.52 from \$1.55, and we are introducing our 2009 EPS estimate of \$1.53.

Valuation

Our target price of \$32.00 reflects a weighted valuation approach: 18x diluted 2009E EPS of \$1.53 (12.5%), 2.0x 2009E BVPS of \$19.12 (12.5%) and a target yield of 3.00% (75%), assuming 2009 dividends per share of \$0.96.

Recommendation

We believe that the shares are attractively valued at current levels. Our rating is Outperform.

Company Risk Disclosure

In addition to the risks involved in investing in common stocks generally, we also highlight the following risks that pertain to this company. Operations are subject to complex regulation by a variety of provincial, state and federal (Canada, Cayman Islands & Belize) agencies. Changes in regulation may adversely affect performance.

Financial performance depends on the availability of installed generation and the production of electric power by third parties. Fortis Properties' cash flow is dependent on hotel room vacancy rates and commercial building occupancy levels. The company's operations in Belize may be disrupted and assets may be damaged by hurricanes and/or tropical storms.

Analyst's Certification

I, Karen Taylor, CFA, hereby certify that the views expressed in this report accurately reflect my personal views about the subject securities or issuers. I also certify that no part of my compensation was, is, or will be, directly or indirectly, related to the specific recommendations or views expressed in this report.

General Disclosure

The information and opinions in this report were prepared by BMO Nesbitt Burns Inc. and BMO Nesbitt Burns Ltée./Ltd., collectively ("BMO NB"). BMO NB is not subject to U.S. rules with regard to the preparation of research reports and the independence of analysts. "BMO Capital Markets" is a trade name used by the BMO Investment Banking Group, which includes the wholesale/institutional arms of Bank of Montreal and BMO NB in Canada, and BMO Capital Markets Corp. in the U.S. BMO Capital Markets Corp. is an affiliate of BMO NB. BMO NB and BMO Capital Markets Corp. are subsidiaries of Bank of Montreal. Bank of Montreal or its affiliates ("BMO Financial Group") has lending arrangements with, or provide other remunerated services to, many issuers covered by BMO NB research. A significant lending relationship may exist between BMO Financial Group and certain of the issuers mentioned herein. The reader should assume that BMO NB, BMO Capital Markets Corp., Bank of Montreal or their affiliates may have a conflict of interest and should not rely solely on this report in evaluating whether or not to buy or sell securities of issuers discussed herein. The opinions, estimates and projections contained in this report are those of BMO NB as of the date of this report and are subject to change without notice. BMO NB endeavours to ensure that the contents have been compiled or derived from sources that we believe are reliable and contain information and opinions that are accurate and complete. However, BMO NB makes no representation or warranty, express or implied, in respect thereof, takes no responsibility for any errors and omissions contained herein and accepts no liability whatsoever for any loss arising from any use of, or reliance on, this report or its contents. Information may be available to BMO NB or its affiliates that is not reflected in this report. The information in this report is not intended to be used as the primary basis of investment decisions, and because of individual client objectives, should not be construed as advice designed to meet the particular investment needs of any investor. This material is for information purposes only and is not an offer to sell or the solicitation of an offer to buy any security. The research analyst and/or associates who prepared this report are compensated based upon (among other factors) the overall profitability of BMO NB and its affiliates, which includes the overall profitability of investment banking services. BMO NB, or its affiliates expect to receive or will seek compensation for investment banking services within the next 3 months from all issuers covered by BMO NB. BMO NB or its affiliates will buy from or sell to customers the securities of issuers mentioned in this report on a principal basis. BMO NB or its affiliates, officers, directors or employees may have a long or short position in the securities discussed herein, related securities or in options, futures or other derivative instruments based thereon.

Company Specific Disclosure

Disclosure 2: BMO NB has undertaken an underwriting liability with respect to this issuer within the past 12 months.

Disclosure 3: BMO NB has provided investment banking services with respect to this issuer within the past 12 months.

Disclosure 7: BMO Capital Markets Corp. or an affiliate has received compensation for investment banking services from this issuer within the past 12 months.

Disclosure 9: BMO Capital Markets Corp. or an affiliate received compensation for products or services other than investment banking services within the past 12 months.

Disclosure 10: This issuer is a client (or was a client) of BMO NB, BMO Capital Markets Corp. or an affiliate within the past 12 months: Investment Banking Services & Non-Securities Related Services.

Distribution of Ratings

Rating Category	BMO Rating	BMO Universe	BMO I.B. Clients*	First Call Universe**
Buy	Outperform	42%	49%	49%
Hold	Market Perform	50%	46%	45%
Sell	Underperform	8%	5%	6%

** Reflects rating distribution of all North American equity research analysts.

Ratings Key

We use the following ratings system definitions:

OP = Outperform - Forecast to outperform the market;

Mkt = Market Perform - Forecast to perform roughly in line with the market;

Und = Underperform - Forecast to underperform the market;

(S) = speculative investment;

NR = No rating at this time;

R = Restricted – Dissemination of research is currently restricted.

Market performance is measured by a benchmark index such as the S&P/TSX Composite Index, S&P 500, Nasdaq Composite, as appropriate for each company. Prior to September 1, 2003, a fourth rating tier—Top Pick—was used to designate those stocks we felt would be the best performers relative to the market. Our six Top 15 lists which guide investors to our best ideas according to six different objectives (large, small, growth, value, income and quantitative) have replaced the Top Pick rating.

Dissemination of Research

Our research publications are available via our web site <http://bmocapitalmarkets.com>. Institutional clients may also receive our research via FIRST CALL Research Direct and Reuters. All of our research is made widely available at the same time to all BMO NB, BMO Capital Markets Corp. and BMO Nesbitt Burns Securities Ltd. client groups entitled to our research. Please contact your investment advisor or institutional salesperson for more information.

Additional Matters

TO U.S. RESIDENTS: BMO Capital Markets Corp. and/or BMO Nesbitt Burns Securities Ltd., affiliates of BMO NB, furnish this report to U.S. residents and accept responsibility for the contents herein, except to the extent that it refers to securities of Bank of Montreal. Q3/07 EPS in Line With Expectations

Impact

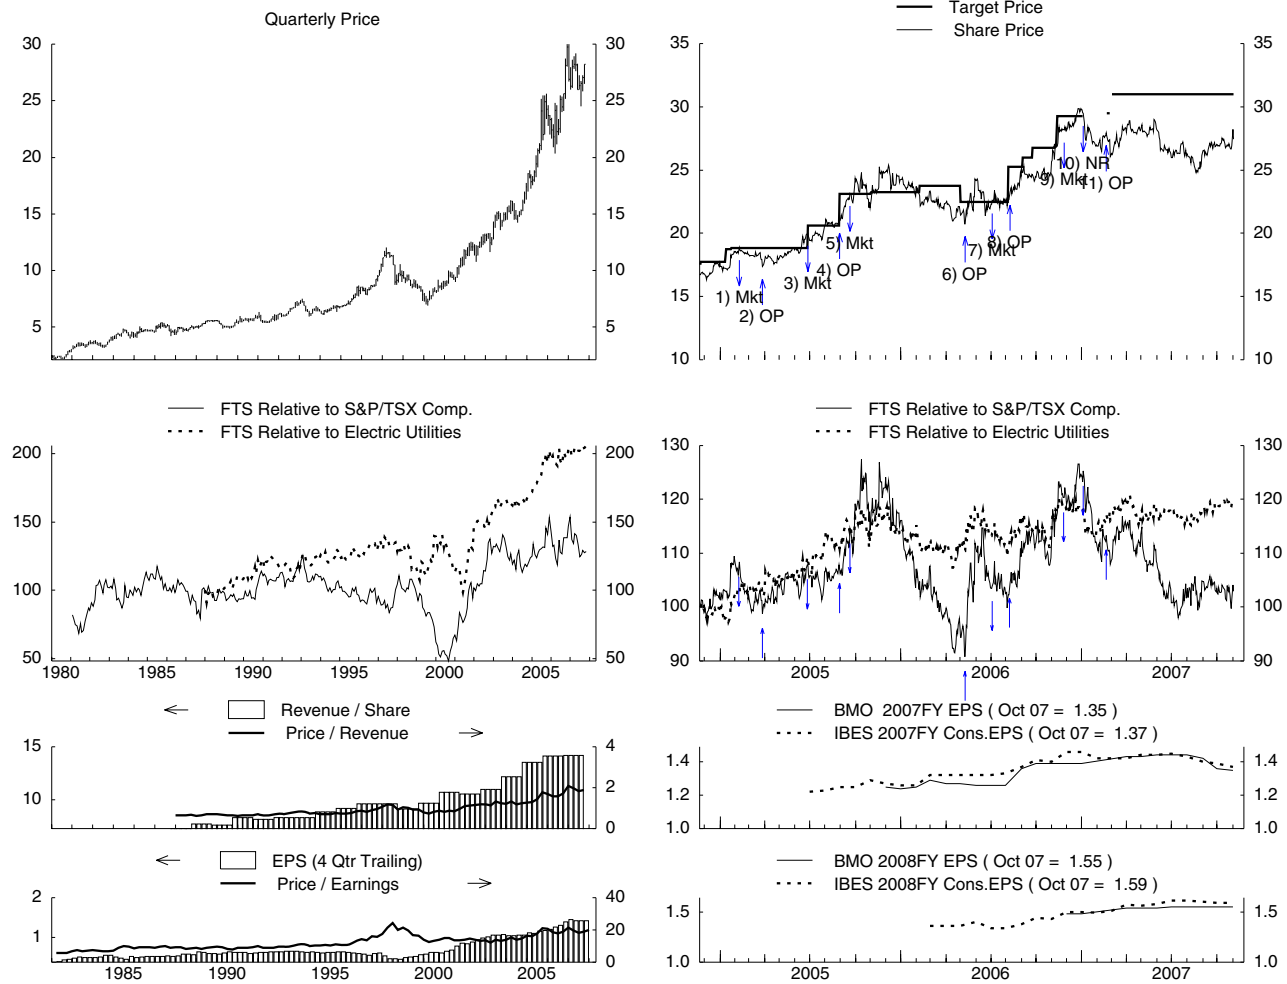

Neutral

Details & Analysis

Fortis reported Q3/07 EPS of \$0.20, slightly higher than our estimate of \$0.19 and slightly lower than a mean estimate of \$0.21. Results were largely in line with expectations. We note the following: (i) the contribution from FortisAlberta and FortisBC were moderately higher than expected, due to higher taxation recoveries at FortisAlberta and stronger than expected customer growth at FortisBC; these gains were partially offset by: (ii) lower contribution from the non-regulated power generation segment, arising from lower quarter-over-quarter hydrological conditions in Ontario and Belize; and (iii) higher than expected unallocated Corporate costs. Although we continue to review the comprehensive release, there does not appear to be any significant one-time items or adjustments. We rate the shares of Fortis Inc. Outperform.

This report was prepared by an Analyst employed by a Canadian affiliate, BMO Nesbitt Burns Inc., and who is not registered as a research analyst under FINRA rules. For disclosure statements, including the Analyst's Certification, please refer to pages 2 to 4.

Ratings Key

We use the following ratings system definitions:

OP = Outperform - Forecast to outperform the market;

Mkt = Market Perform - Forecast to perform roughly in line with the market;

Und = Underperform - Forecast to underperform the market;

(S) = speculative investment;

NR = No rating at this time;

R = Restricted – Dissemination of research is currently restricted.

Market performance is measured by a benchmark index such as the S&P/TSX Composite Index, S&P 500, Nasdaq Composite, as appropriate for each company. Prior to September 1, 2003, a fourth rating tier—Top Pick—was used to designate those stocks we felt would be the best performers relative to the market. Our six Top 15 lists which guide investors to our best ideas according to six different objectives (large, small, growth, value, income and quantitative) have replaced the Top Pick rating.

Dissemination of Research

Our research publications are available via our web site <http://bmocapitalmarkets.com>. Institutional clients may also receive our research via FIRST CALL Research Direct and Reuters. All of our research is made widely available at the same time to all BMO NB, BMO Capital Markets Corp. and BMO Nesbitt Burns Securities Ltd. client groups entitled to our research. Please contact your investment advisor or institutional salesperson for more information.

Q3/07 Results: Weakened Credit Metrics Are Expected to Improve in Coming Quarters

Event

Fortis Inc. (Fortis) released Q3/07 results.

Impact

Neutral.

Key Points

Fortis Inc.'s Q3/07 earnings were impacted by its \$3.7 billion acquisition of Terasen Inc. in Q2/07. On an earnings per share basis, results were largely in line with expectations. FFO of \$145.7 million in Q3/07 was more than double the \$68.2 million realized in Q3/06. However, the company's credit metrics were weak in the third quarter and are expected to remain so until the full-year cash flow impact of its Terasen Inc. acquisition is realized. Debt issues undertaken by Fortis Inc. and its regulated subsidiaries in Q3/07 pushed debt outstanding marginally higher in the quarter, but consolidated liquidity remains adequate for its operational, capital requirement and refinancing needs.

Recommendation

We believe the credit profile of Fortis continues to strengthen and will improve further with the added diversity of regulated cash flows provided by the Terasen Inc. acquisition. The company's only Canadian dollar issue (\$100 million due in 2010) limits the opportunity for investors to pursue relative value trades along the issuer's credit curve, and the relative illiquid nature of the paper is a pricing consideration. Nevertheless, we view Fortis Inc. as a good buy and hold exposure. Along with other utilities, Fortis Inc.'s 5-year indicative spreads have softened recently but are largely in line with those of other regulated utilities in the sector.

Details & Analysis

Earnings and Cash Flow

Fortis Inc.'s Q3/07 earnings were impacted by its \$3.7 billion acquisition of Terasen Inc. in Q2/07. Despite higher operating income of \$41 million in Q3/07 versus Q3/06, higher financing costs largely associated with the Terasen Inc. acquisition (of \$48.3 million), compared to the same period a year earlier, contributed to a \$6.5 million drop in net earnings to \$32.3 million in Q3/07. We note the higher earnings from the Terasen Inc. acquisition will not be materially realized until the fourth quarter of 2007. Due to the seasonal nature of its gas distribution businesses, Terasen Inc. effectively realizes all its earnings in the first and fourth quarters. Highlighting the seasonal nature of its business, Terasen reported a net loss of \$3.7 million for Q3/07.

On an earnings per share basis, Fortis Inc.'s results were largely in line with expectations. The company reported Q3/07 EPS of \$0.20, slightly higher than BMO Capital Markets' equity research estimate of \$0.19 and slightly lower than a mean estimate of \$0.21. With respect to the earnings we note:

- the contribution from FortisAlberta and FortisBC were moderately higher than expected, due to higher taxation recoveries at FortisAlberta and stronger-than-expected customer growth at FortisBC; and

the gains from FortisAlberta and FortisBC were partially offset by:

- a lower contribution from the non-regulated power generation segment, arising from lower quarter-over-quarter hydrological conditions in Ontario and Belize; and
- higher-than-expected unallocated corporate costs.

For a more detailed review of Fortis Inc.'s Q3/07 earnings results, refer to BMO Capital Markets equity analyst Karen Taylor's equity comment on [Fortis Inc.](#), published November 2, 2007.

As was the case in Q2/07, funds from operations (FFO) moved higher in Q3/07 compared to the corresponding period a year earlier. FFO of \$145.7 million in Q3/07 was more than double the \$68.2 million realised in Q3/06. The improved cash flows reflect in part business acquisitions undertaken in the past year; however, they were insufficient to fund capital outlays in the quarter. The company realized negative free cash flow (FFO less capital expenditure and dividends) of \$86.8 million in the quarter as it undertook capital expenditures net of customer contributions of \$195.4 million and made distributions of \$37.1 million. The shortfall was met through an increase in short-term borrowings and proceeds from long-term debt issues undertaken in the quarter.

Fortis' large capital expenditure program will dominate cash flows outlays and financing activities for the next few years at least, with negative free cash flow expected to be the norm. In the next five years, gross consolidated electric utility expenditure of close to \$4 billion is expected.

As expected, Fortis Inc.'s cash flow credit metrics were weak in the third quarter and are expected to remain so until the full-year cash flow impact of its Terasen Inc. acquisition is realized. Unadjusted FFO gross interest coverage on a rolling 12-month basis to September 30, 2007, of 2.7x was marginally below the 2.8x in Q2/07 and for fiscal 2006. The bigger impact of the Terasen Inc. acquisition is on the FFO-to-total-debt ratio, which was 8% for the 12 months to September 30, 2007, down from 11% in 2006. We expect the ratio to improve over the next 12 months to levels similar to its recent past as cash flow received from its Terasen Inc. subsidiary are matched against the higher debt levels incurred when acquiring the subsidiary. Despite an expected improvement, we expect the ratio to remain on the low side for some time as the company continues to partially debt finance expansion of its electricity network asset bases with a delay in receipt of regulated cash flows from the assets constructed.

Chart 1: Fortis Inc. Cash Flow Credit Metrics on a Rolling 12-Month Basis

Source: BMO Capital Markets

Capital Structure and Liquidity

Debt issues undertaken by Fortis Inc. and its regulated subsidiaries (Newfoundland Power, FortisBC and Caribbean Utilities) in Q3/07 pushed debt outstanding higher in the quarter. The company's total debt commitments at September of \$5.4 billion were up from \$5.2 billion at the half-year with the \$449.4 million in proceeds from the issuance undertaken in the quarter used in part to reduce outstanding debt under credit facilities. The vast majority of Fortis' consolidated debt, about 95%, resides at the company's various subsidiaries. Debt at the holding company level comprises:

- a \$100 million of senior unsecured debentures maturing 2010;
- US\$150 million senior unsecured notes maturing 2014;
- US\$200 million senior unsecured notes maturing 2037 (issued September 6, 2007); and

- US\$60 million in unsecured subordinated convertible debentures due between 2012 and 2016.

Leverage, as measured by total debt to total capital and treating the preference shares as equity, is expected to settle about the company's target level of 60%; but at the end of Q3/07 it was marginally over the targeted level at 63.5%, largely unchanged from Q2/06.

Fortis' consolidated liquidity remains adequate for its operational, capital requirement and refinancing needs. At the end of Q3/07 the company had \$1.23 billion of available capacity under its \$2.12 billion of credit facilities after drawdowns and outstanding letters of credit. The available capacity was \$92 million more than at June 30, 2007. In addition, the company had cash and cash equivalents of \$50.7 million, down from \$63.5 million mid-year. Maturing debt commitments and amortizing debt repayments are manageable, with the company facing a maturing debt of \$32 million at Newfoundland Power on December 16, 2007; a \$188 million maturity at Terasen Gas in June 2008; and a \$200 million maturing debt issue at Terasen Inc. due December 2008, which that is expected to be repaid on maturity. We note Terasen Gas undertook a \$260 million MTN debt issue on October 2, 2007, to repay its maturing debt in October 2007.

Credit Ratings

Fortis' corporate credit rating and senior unsecured debt issue rating benefited from the company's recent acquisition of Terasen Inc.

On June 19, 2007, **Standard & Poor's** upgraded its corporate credit rating on Fortis Inc. one notch to A- and assigned a Stable outlook. Of greater significance was that the senior unsecured debt rating was upgraded two notches to A- from BBB. The rating on the senior unsecured debt had previously been rated a notch below the corporate credit rating to reflect its structurally subordinated position. Standard & Poor's decision to depart from its previous treatment of the senior unsecured debt and equalize the senior unsecured debt rating with the corporate credit rating reflects the increasing diversification of the company and the financial separation among its investments. The agency has advised the rating upgrade of Fortis reflects:

- the improved diversity resulting from the recent acquisition of Terasen Inc.;
- the operation of each regulated subsidiary as a separate stand-alone entity with debt non-recourse to Fortis Inc.;
- management's commitment to maintaining low levels of debt at the Fortis Inc. holding company level;
- management's continuing focus on pursuing acquisitions in stable, regulated utilities; and
- the success of key subsidiaries FortisBC and Fortis Alberta in executing their capital expansions.

DBRS confirmed its ratings on Fortis on February 26, 2007, following its announced intention to acquire Terasen Inc. DBRS believes the transaction will have a positive impact on Fortis's overall business risk profile as a result of the acquisition of stable, low-risk gas distribution

assets. From a financial risk perspective, DBRS expects a modest decline in consolidated interest coverage metrics, given the existing levels of debt at the acquired entities; however, it expects modest improvement in non-consolidated credit metrics, given that the transaction is predominantly equity financed, coupled with the historical strength of Terasen Gas Inc.'s dividends. Overall, DBRS views the predominantly equity-financed acquisition of regulated assets as a good strategic fit for Fortis and views the proposed transaction as credit neutral to slightly credit positive.

Recommendation

We believe the credit profile of Fortis continues to strengthen and will improve further with the added diversity of regulated cash flows provided by the recent Terasen Inc. acquisition. The company's only Canadian dollar issue (a \$100 million issue due 2010) limits the opportunity for investors to pursue relative value trades along the issuer's credit curve, and the relative illiquid nature of its paper is a pricing consideration. Nevertheless, we view Fortis Inc. as a good buy and hold exposure. Along with other utilities, Fortis Inc.'s 5-year indicative spreads have softened recently but are largely in line with those of other regulated utilities in the sector.

2008/09 Rate Settlement Agreement Filed

Impact

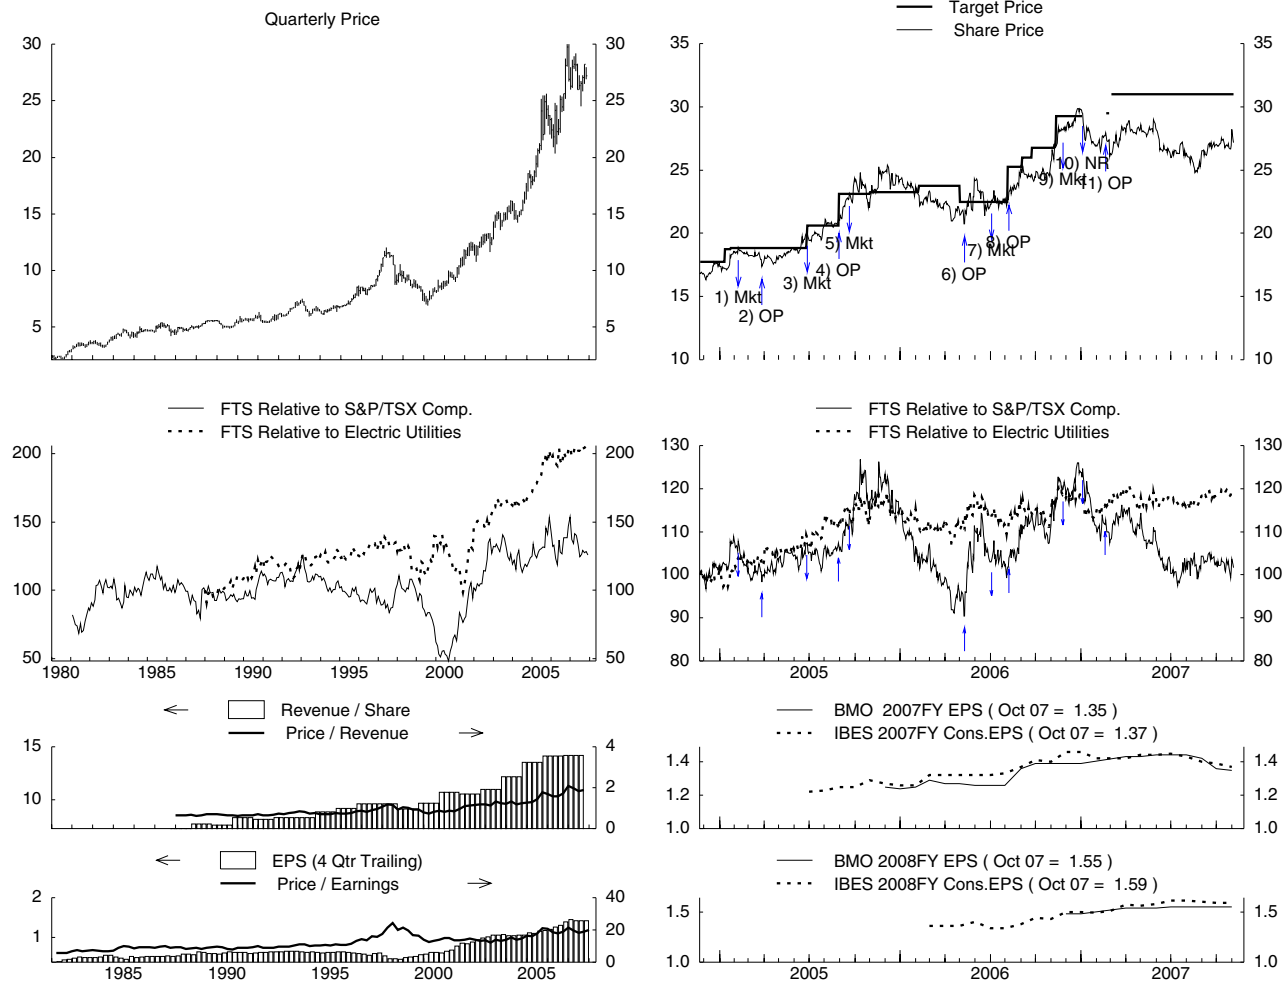

Neutral

Details & Analysis

FortisAlberta (100% - Fortis Inc.) has announced that it has filed a Negotiated Settlement Agreement (NSA) with the Alberta Energy and Utilities Board (AEUB) regarding its 2008 and 2009 revenue requirement application. The Settlement Agreement, if approved, would result in 2008 and 2009 distribution rate increases of 6.8% and 7.3%, respectively. We have not yet reviewed the NSA; however, we do not expect it to materially change our outlook for FortisAlberta in 2008 and 2009. Capital expenditures are expected to total \$600 million, prior to customer contributions, over the term of the NSA, consistent with our current outlook. The Settlement Agreement is supported by representatives of all segments of FortisAlberta's customer base, including residential, farm, commercial, and industrial classes. No change in view. We rate the shares of Fortis Inc. Outperform.

This report was prepared by an Analyst employed by a Canadian affiliate, BMO Nesbitt Burns Inc., and who is not registered as a research analyst under FINRA rules. For disclosure statements, including the Analyst's Certification, please refer to pages 2 to 4.

Company Risk Disclosure

In addition to the risks involved in investing in common stocks generally, we also highlight the following risks that pertain to this company. Operations are subject to complex regulation by a variety of provincial, state and federal (Canada, Cayman Islands & Belize) agencies. Changes in regulation may adversely affect performance.

Financial performance depends on the availability of installed generation and the production of electric power by third parties. Fortis Properties' cash flow is dependent on hotel room vacancy rates and commercial building occupancy levels. The company's operations in Belize may be disrupted and assets may be damaged by hurricanes and/or tropical storms.

Analyst's Certification

I, Karen Taylor, CFA, hereby certify that the views expressed in this report accurately reflect my personal views about the subject securities or issuers. I also certify that no part of my compensation was, is, or will be, directly or indirectly, related to the specific recommendations or views expressed in this report.

General Disclosure

The information and opinions in this report were prepared by BMO Nesbitt Burns Inc. and BMO Nesbitt Burns Ltée./Ltd., collectively ("BMO NB"). BMO NB is not subject to U.S. rules with regard to the preparation of research reports and the independence of analysts. "BMO Capital Markets" is a trade name used by the BMO Investment Banking Group, which includes the wholesale/institutional arms of Bank of Montreal and BMO NB in Canada, and BMO Capital Markets Corp. in the U.S. BMO Capital Markets Corp. is an affiliate of BMO NB. BMO NB and BMO Capital Markets Corp. are subsidiaries of Bank of Montreal. Bank of Montreal or its affiliates ("BMO Financial Group") has lending arrangements with, or provide other remunerated services to, many issuers covered by BMO NB research. A significant lending relationship may exist between BMO Financial Group and certain of the issuers mentioned herein. The reader should assume that BMO NB, BMO Capital Markets Corp., Bank of Montreal or their affiliates may have a conflict of interest and should not rely solely on this report in evaluating whether or not to buy or sell securities of issuers discussed herein. The opinions, estimates and projections contained in this report are those of BMO NB as of the date of this report and are subject to change without notice. BMO NB endeavours to ensure that the contents have been compiled or derived from sources that we believe are reliable and contain information and opinions that are accurate and complete. Ratings Key

We use the following ratings system definitions:

OP = Outperform - Forecast to outperform the market;

Mkt = Market Perform - Forecast to perform roughly in line with the market;

Und = Underperform - Forecast to underperform the market;

(S) = speculative investment;

NR = No rating at this time;

R = Restricted – Dissemination of research is currently restricted.

Market performance is measured by a benchmark index such as the S&P/TSX Composite Index, S&P 500, Nasdaq Composite, as appropriate for each company. Prior to September 1, 2003, a fourth rating tier—Top Pick—was used to designate those stocks we felt would be the best performers relative to the market. Our six Top 15 lists which guide investors to our best ideas according to six different objectives (large, small, growth, value, income and quantitative) have replaced the Top Pick rating.

Dissemination of Research

Our research publications are available via our web site <http://bmocapitalmarkets.com>. Institutional clients may also receive our research via FIRST CALL Research Direct and Reuters. All of our research is made widely available at the same time to all BMO NB, BMO Capital Markets Corp. and BMO Nesbitt Burns Securities Ltd. client groups entitled to our research. Please contact your investment advisor or institutional salesperson for more information.

Rate Filings - FortisAB and Maritime Electric; Outperform Rating Unchanged

Event

On October 18, Maritime Electric (100% - Fortis Inc.) filed an application for rates, tolls and charges for electric service for the period April 1, 2008, to March 31, 2009, with the Island Regulatory and Appeals Commission (IRAC). The key performance metrics of that application are set out herein and are reflected in our estimates. On November 2, FortisAlberta (100% - Fortis Inc.) filed a Settlement Brief with the Alberta Energy and Utilities Board (AEUB) seeking approval of a Negotiated Settlement Agreement for 2008 and 2009 distribution tariffs. The key components of this Negotiated Settlement Agreement are set out herein and are reflected in our estimates.

Impact

Neutral.

Forecasts

We have incorporated each application/filing in our estimates for Maritime Electric and FortisAlberta. Our diluted 2007 and 2008 EPS estimates decline by \$0.01 per share to \$1.34 and \$1.51, respectively. Our diluted 2009 EPS estimate of \$1.53 is unchanged.

Valuation

Our target price reflects a weighted valuation approach: 18x diluted 2009E EPS of \$1.53 (12.5%), 2.0x 2009E BVPS of \$19.10 (12.5%) and a target yield of 3.00 (75%), assuming 2009 dividends per share of \$0.96.

Recommendation

We believe that the shares are attractively valued at current levels. Our rating is Outperform.

Details & Analysis

On October 18, Maritime Electric (100% - Fortis Inc.) filed an application for rates, tolls and charges for electric service for the period April 1, 2008, to March 31, 2009, with the Island Regulatory and Appeals Commission (IRAC). The key performance metrics of that application are set out below and are reflected in our estimates. On November 2, FortisAlberta (100% - Fortis Inc.) filed a Settlement Brief with the Alberta Energy and Utilities Board (AEUB) seeking approval of a Negotiated Settlement Agreement for 2008 and 2009 distribution tariffs. The key components of this Negotiated Settlement Agreement are set out below and are reflected in our estimates.

FortisAlberta Negotiated Settlement Agreement (NSA)

The Negotiated Settlement Agreement contains the following key highlights:

- 2008 and 2009 distribution revenue requirement of \$256.2 million and \$280.8 million, respectively.
- Under the NSA, the annualized rate increases for 2008 and 2009 are 6.8% and 7.3%, respectively.
- Estimated 2008 and 2009 capital expenditures are \$257.3 million and \$297.0 million, respectively, versus \$274.6 million and \$315.2 million as per the June 1, 2007, Distribution Tariff Application (DTA) filed with the AEUB.
- There were no matters arising from the 2008/09 DTA left unresolved among the settlement parties; all elements of the 2008/09 NSA have been accepted on a unanimous basis by the signatory parties.
- Mid-year 2008 and 2009 rate bases are \$1,125.5 million and \$1,335.8 million versus \$1,144.4 million and \$1,373.5 million as per the June 1, 2007 DTA.
- Thirty-seven per cent deemed equity and an allowed ROE for 2008 and 2009 to be determined based on the AEUB's generic cost of capital decision, set annually.

Maritime Electric Application for Rates, Tolls and Charges April 1, 2008, to March 31, 2009

The Application contains the following key highlights:

- Increase in basic rates of 1.8% on April 1, 2008.
- Total rate increase of 9.7% for Rural Residential customers reflecting higher forecast energy costs and the continued operation of the Energy Cost Adjustment Mechanism.
- The utility expects to file a report in mid-2008 to re-base the Energy Cost Adjustment Mechanism (ECAM) to bring the base rate of \$0.0673/kWh more in line with current market based pricing. The ECAM is designed to collect energy costs above or below the base rate and deposit the balance (positive or negative) on the Balance Sheet for collection

for/return to customers over a rolling 12-month basis. Current supply costs are above the current base rate and resulted in a large receivable on the utility's financial statements, creating significant pressure on the capital structure, as these costs must be funded through debt (short-term borrowing) until they are recovered from customers.

- Energy costs incurred but not recovered from customers prior to 2004 total \$15.284 million as at December 31, 2006. In accordance with a prior regulatory decision, the utility is proposing to amortize \$2 million of the deferred Costs Recoverable From Customers in 2008.
- Return on equity of 10% in 2008 and deemed equity of 40–45%. Actual common equity in 2008 is estimated to be 41.3% versus 41.1% in 2007 and 40.8% in 2006.
- Capital expenditures of \$18.412 million, as previously approved by the IRAC.
- Average year-end utility rate base of \$276.823 million in 2008 versus \$254.362 million in 2007.

Estimates

We have incorporated each application/filing in our estimates for Maritime Electric and FortisAlberta. Our diluted 2007 and 2008 EPS estimates decline by \$0.01 per share to \$1.34 and \$1.51, respectively. Our diluted 2009 EPS estimate of \$1.53 is unchanged.

Valuation

Our target price reflects a weighted valuation approach: 18x diluted 2009E EPS of \$1.53 (12.5%), 2.0x 2009E BVPS of \$19.10 (12.5%) and a target yield of 3.00 (75%), assuming 2009 dividends per share of \$0.96.

Recommendation

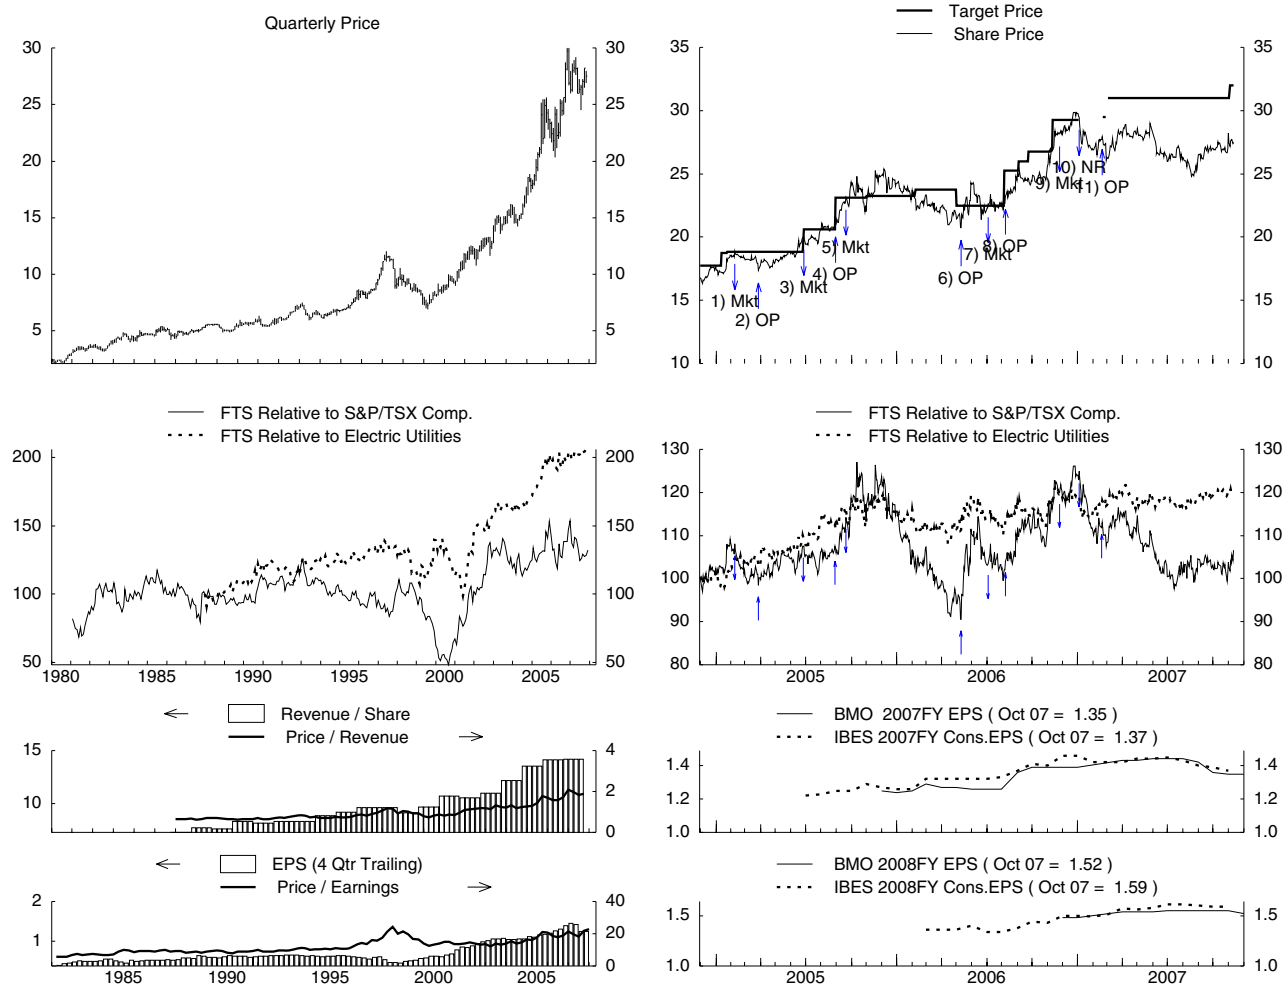

We believe that the shares are attractively valued at current levels. Our rating is Outperform.

Company Risk Disclosure

In addition to the risks involved in investing in common stocks generally, we also highlight the following risks that pertain to this company. Operations are subject to complex regulation by a variety of provincial, state and federal (Canada, Cayman Islands & Belize) agencies. Changes in regulation may adversely affect performance.

Financial performance depends on the availability of installed generation and the production of electric power by third parties. Fortis Properties' cash flow is dependent on hotel room vacancy rates and commercial building occupancy levels. The company's operations in Belize may be disrupted and assets may be damaged by hurricanes and/or tropical storms.

Analyst's Certification

I, Karen Taylor, CFA, hereby certify that the views expressed in this report accurately reflect my personal views about the subject securities or issuers. I also certify that no part of my compensation was, is, or will be, directly or indirectly, related to the specific recommendations or views expressed in this report.

General Disclosure

The information and opinions in this report were prepared by BMO Nesbitt Burns Inc. and BMO Nesbitt Burns Ltée./Ltd., collectively ("BMO NB"). BMO NB is not subject to U.S. rules with regard to the preparation of research reports and the independence of analysts. "BMO Capital Markets" is a trade name used by the BMO Investment Banking Group, which includes the wholesale/institutional arms of Bank of Montreal and BMO NB in Canada, and BMO Capital Markets Corp. in the U.S. BMO Capital Markets Corp. is an affiliate of BMO NB. BMO NB and BMO Capital Markets Corp. are subsidiaries of Bank of Montreal. Bank of Montreal or its affiliates ("BMO Financial Group") has lending arrangements with, or provide other remunerated services to, many issuers covered by BMO NB research. A significant lending relationship may exist between BMO Financial Group and certain of the issuers mentioned herein. The reader should assume that BMO NB, BMO Capital Markets Corp., Bank of Montreal or their affiliates may have a conflict of interest and should not rely solely on this report in evaluating whether or not to buy or sell securities of issuers discussed herein. The opinions, estimates and projections contained in this report are those of BMO NB as of the date of this report and are subject to change without notice. BMO NB endeavours to ensure that the contents have been compiled or derived from sources that we believe are reliable and contain information and opinions that are accurate and complete. However, BMO NB makes no representation or warranty, express or implied, in respect thereof, takes no responsibility for any errors and omissions contained herein and accepts no liability whatsoever for any loss arising from any use of, or reliance on, this report or its contents. Information may be available to BMO NB or its affiliates that is not reflected in this report. The information in this report is not intended to be used as the primary basis of investment decisions, and because of individual client objectives, should not be construed as advice designed to meet the particular investment needs of any investor. This material is for information purposes only and is not an offer to sell or the solicitation of an offer to buy any security. The research analyst and/or associates who prepared this report are compensated based upon (among other factors) the overall profitability of BMO NB and its affiliates, which includes the overall profitability of investment banking services. BMO NB, or its affiliates expect to receive or will seek compensation for investment banking services within the next 3 months from all issuers covered by BMO NB. BMO NB or its affiliates will buy from or sell to customers the securities of issuers mentioned in this report on a principal basis. BMO NB or its affiliates, officers, directors or employees may have a long or short position in the securities discussed herein, related securities or in options, futures or other derivative instruments based thereon.

Company Specific Disclosure

Disclosure 2: BMO NB has undertaken an underwriting liability with respect to this issuer within the past 12 months.

Disclosure 3: BMO NB has provided investment banking services with respect to this issuer within the past 12 months.

Disclosure 7: BMO Capital Markets Corp. or an affiliate has received compensation for investment banking services from this issuer within the past 12 months.

Disclosure 9: BMO Capital Markets Corp. or an affiliate received compensation for products or services other than investment banking services within the past 12 months.

Disclosure 10: This issuer is a client (or was a client) of BMO NB, BMO Capital Markets Corp. or an affiliate within the past 12 months: Investment Banking Services & Non-Securities Related Services.

Distribution of Ratings

Rating Category	BMO Rating	BMO Universe	BMO I.B. Clients*	First Call Universe**
Buy	Outperform	42%	49%	49%
Hold	Market Perform	50%	46%	45%
Sell	Underperform	8%	5%	6%

* Reflects rating distribution of all companies where BMO Capital Markets has received compensation for Investment Banking services.

** Reflects rating distribution of all North American equity research analysts.

Ratings Key

We use the following ratings system definitions:

OP = Outperform - Forecast to outperform the market;

Mkt = Market Perform - Forecast to perform roughly in line with the market;

Und = Underperform - Forecast to underperform the market;

(S) = speculative investment;

NR = No rating at this time;

R = Restricted – Dissemination of research is currently restricted.

Market performance is measured by a benchmark index such as the S&P/TSX Composite Index, S&P 500, Nasdaq Composite, as appropriate for each company. Prior to September 1, 2003, a fourth rating tier—Top Pick—was used to designate those stocks we felt would be the best performers relative to the market. Our six Top 15 lists which guide investors to our best ideas according to six different objectives (large, small, growth, value, income and quantitative) have replaced the Top Pick rating.

Dissemination of Research

Our research publications are available via our web site <http://bmocapitalmarkets.com>. Institutional clients may also receive our research via FIRST CALL Research Direct and Reuters. All of our research is made widely available at the same time to all BMO NB, BMO Capital Markets Corp. and BMO Nesbitt Burns Securities Ltd. client groups entitled to our research. Please contact your investment advisor or institutional salesperson for more information.

BCUC Conditionally Approves LNG Storage Facility

Impact

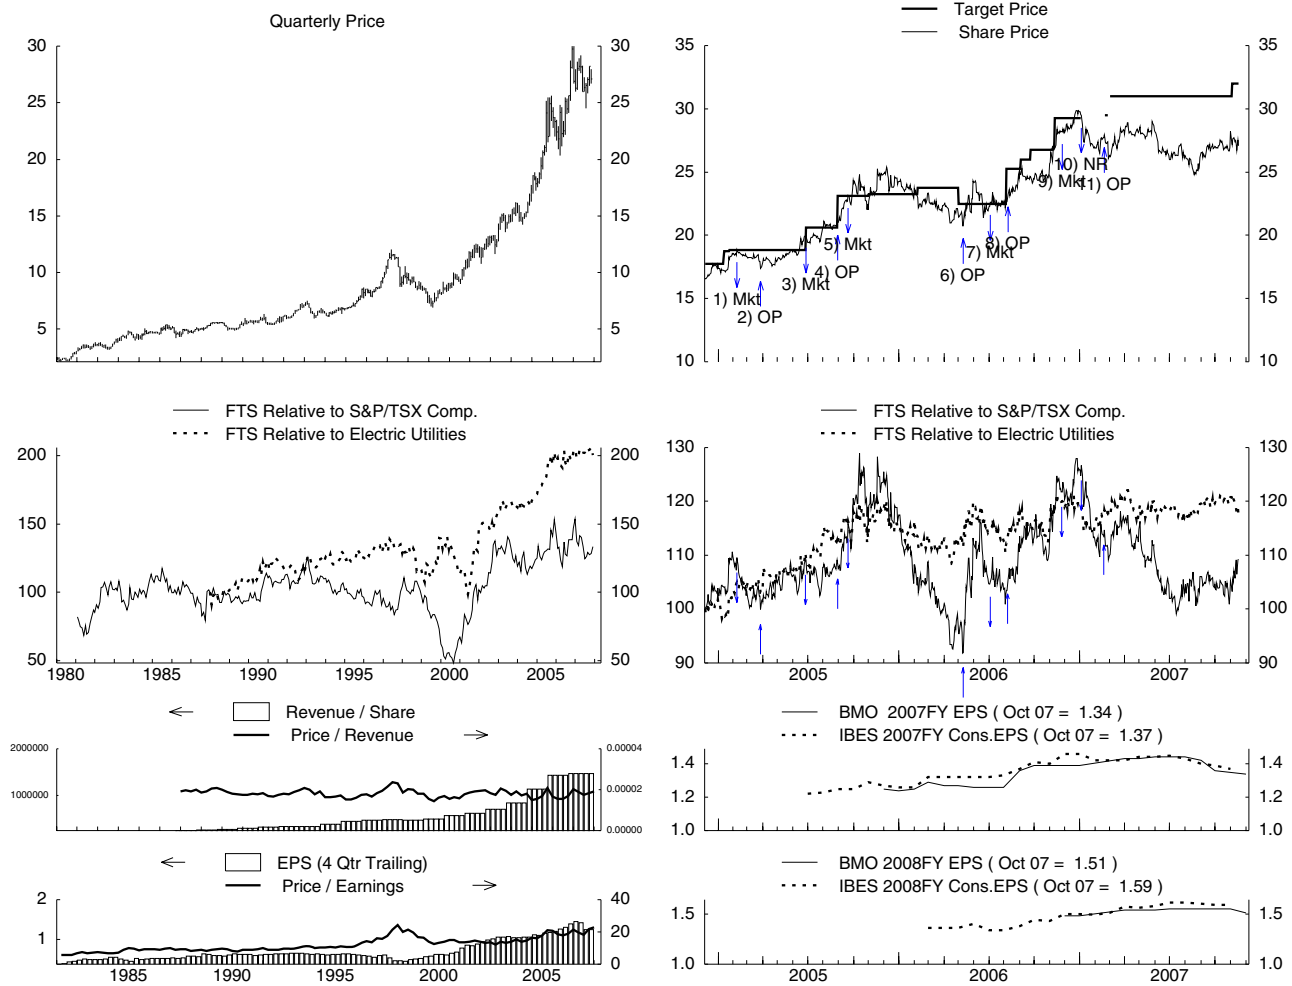

Neutral

Details & Analysis

The British Columbia Utilities Commission (BCUC) has issued an Order conditionally approving an application by Terasen Gas (Vancouver Island) Inc. (TGVI, 100% - Fortis Inc.) to build, own and operate a \$200 million liquefied natural gas (LNG) storage facility, and an application by Terasen Gas Inc. (TGI, 100% - Fortis Inc.) to execute a storage and delivery agreement relating the facility. The proposed LNG storage facility has a target in-service date of late 2011 and construction is expected to commence in April 2008. The Commission denied TGVI's application for a 50 basis point premium to its return on equity for the project. We note that: (i) the project is fully reflected in our outlook for Fortis Inc.; and (ii) we did not assume that the ROE premium would be approved. No change in view. We rate the shares of Fortis Inc. Outperform.

This report was prepared by an Analyst employed by a Canadian affiliate, BMO Nesbitt Burns Inc., and who is not registered as a research analyst under FINRA rules. For disclosure statements, including the Analyst's Certification, please refer to pages 2 to 4.

2008 ROE Updated; Outperform Rating Unchanged

Event

On November 22, the British Columbia Utilities Commission (BCUC) issued a Decision in which it established the return on Common Equity for Low-Risk Benchmark Utility for the Year 2008. A number of the wholly owned utility operations of Fortis Inc. are subject to this determination, as follows: (i) Terasen Gas Inc. is the Benchmark Utility and is therefore permitted an allowed ROE for 2008 of 8.62%; (ii) Terasen Gas Vancouver Island is allowed the Benchmark Return plus a 70 basis point risk premium or 9.32% for 2008; and (iii) FortisBC is allowed the Benchmark Return plus a 40 basis point risk premium or 9.02% for 2008. The utility operation of FortisAlberta is also subject to a Generic Cost of Capital determination; however, this metric is to be established by the Alberta Energy and Utility Board (AEUB) and has not yet been released. We believe that the AEUB's Generic Cost of Capital for 2008 is likely to be approximately 8.75%.

Impact

Neutral.

Forecasts

We have reflected the updated allowed ROEs in our outlook for Fortis. In most cases, utility performance is subject to Settlement Agreements and incentive returns are assumed. Our diluted 2008 and 2009 EPS estimates are therefore unchanged.

Valuation

Our target price reflects a weighted valuation approach: 18x diluted 2009 EPS of \$1.53 (12.5%), 2.0x 2009E BVPS of \$19.10 (12.5%) and a target yield of 3.00% (75%), assuming 2009 dividends per share of \$0.96.

Recommendation

We believe that the shares are attractively valued at current levels. Our rating is Outperform.

Company Risk Disclosure

In addition to the risks involved in investing in common stocks generally, we also highlight the following risks that pertain to this company. Operations are subject to complex regulation by a variety of provincial, state and federal (Canada, Cayman Islands & Belize) agencies. Changes in regulation may adversely affect performance.

Financial performance depends on the availability of installed generation and the production of electric power by third parties. Fortis Properties' cash flow is dependent on hotel room vacancy rates and commercial building occupancy levels. The company's operations in Belize may be disrupted and assets may be damaged by hurricanes and/or tropical storms.

Analyst's Certification

I, Karen Taylor, CFA, hereby certify that the views expressed in this report accurately reflect my personal views about the subject securities or issuers. I also certify that no part of my compensation was, is, or will be, directly or indirectly, related to the specific recommendations or views expressed in this report.

General Disclosure

The information and opinions in this report were prepared by BMO Nesbitt Burns Inc. and BMO Nesbitt Burns Ltée./Ltd., collectively ("BMO NB"). BMO NB is not subject to U.S. rules with regard to the preparation of research reports and the independence of analysts. "BMO Capital Markets" is a trade name used by the BMO Investment Banking Group, which includes the wholesale/institutional arms of Bank of Montreal and BMO NB in Canada, and BMO Capital Markets Corp. in the U.S. BMO Capital Markets Corp. is an affiliate of BMO NB. BMO NB and BMO Capital Markets Corp. are subsidiaries of Bank of Montreal. Bank of Montreal or its affiliates ("BMO Financial Group") has lending arrangements with, or provide other remunerated services to, many issuers covered by BMO NB research. A significant lending relationship may exist between BMO Financial Group and certain of the issuers mentioned herein. The reader should assume that BMO NB, BMO Capital Markets Corp., Bank of Montreal or their affiliates may have a conflict of interest and should not rely solely on this report in evaluating whether or not to buy or sell securities of issuers discussed herein. The opinions, estimates and projections contained in this report are those of BMO NB as of the date of this report and are subject to change without notice. BMO NB endeavours to ensure that the contents have been compiled or derived from sources that we believe are reliable and contain information and opinions that are accurate and complete. However, BMO NB makes no representation or warranty, express or implied, in respect thereof, takes no responsibility for any errors and omissions contained herein and accepts no liability whatsoever for any loss arising from any use of, or reliance on, this report or its contents. Information may be available to BMO NB or its affiliates that is not reflected in this report. The information in this report is not intended to be used as the primary basis of investment decisions, and because of individual client objectives, should not be construed as advice designed to meet the particular investment needs of any investor. This material is for information purposes only and is not an offer to sell or the solicitation of an offer to buy any security. The research analyst and/or associates who prepared this report are compensated based upon (among other factors) the overall profitability of BMO NB and its affiliates, which includes the overall profitability of investment banking services. BMO NB, or its affiliates expect to receive or will seek compensation for investment banking services within the next 3 months from all issuers covered by BMO NB. BMO NB or its affiliates will buy from or sell to customers the securities of issuers mentioned in this report on a principal basis. BMO NB or its affiliates, officers, directors or employees may have a long or short position in the securities discussed herein, related securities or in options, futures or other derivative instruments based thereon.

Company Specific Disclosure

Disclosure 2: BMO NB has undertaken an underwriting liability with respect to this issuer within the past 12 months.

Disclosure 3: BMO NB has provided investment banking services with respect to this issuer within the past 12 months.

Disclosure 7: BMO Capital Markets Corp. or an affiliate has received compensation for investment banking services from this issuer within the past 12 months.

Disclosure 9: BMO Capital Markets Corp. or an affiliate received compensation for products or services other than investment banking services within the past 12 months.

Disclosure 10: This issuer is a client (or was a client) of BMO NB, BMO Capital Markets Corp. or an affiliate within the past 12 months: Investment Banking Services & Non-Securities Related Services.

Distribution of Ratings

Rating Category	BMO Rating	BMO Universe	BMO I.B. Clients*	First Call Universe**
Buy	Outperform	42%	49%	49%
Hold	Market Perform	50%	46%	45%
Sell	Underperform	8%	5%	6%

* Reflects rating distribution of all companies where BMO Capital Markets has received compensation for Investment Banking services.

** Reflects rating distribution of all North American equity research analysts.

Ratings Key

We use the following ratings system definitions:

OP = Outperform - Forecast to outperform the market;

Mkt = Market Perform - Forecast to perform roughly in line with the market;

Und = Underperform - Forecast to underperform the market;

(S) = speculative investment;

NR = No rating at this time;

R = Restricted – Dissemination of research is currently restricted.

Market performance is measured by a benchmark index such as the S&P/TSX Composite Index, S&P 500, Nasdaq Composite, as appropriate for each company. Prior to September 1, 2003, a fourth rating tier—Top Pick—was used to designate those stocks we felt would be the best performers relative to the market. Our six Top 15 lists which guide investors to our best ideas according to six different objectives (large, small, growth, value, income and quantitative) have replaced the Top Pick rating.

Dissemination of Research

Our research publications are available via our web site <http://bmocapitalmarkets.com>. Institutional clients may also receive our research via FIRST CALL Research Direct and Reuters. All of our research is made widely available at the same time to all BMO NB, BMO Capital Markets Corp. and BMO Nesbitt Burns Securities Ltd. client groups entitled to our research. Please contact your investment advisor or institutional salesperson for more information.

Additional Matters

TO U.S. RESIDENTS: BMO Capital Markets Corp. and/or BMO Nesbitt Burns Securities Ltd., affiliates of BMO NB, furnish this report to U.S. residents and accept responsibility for the contents herein, except to the extent that it refers to securities of Bank of Montreal. Any U.S. person wishing to effect transactions in any security discussed herein should do so through BMO Capital Markets Corp. and/or BMO Nesbitt Burns Securities Ltd.

TO U.K. RESIDENTS: In the UK this document is published by BMO Capital Markets Limited which is authorised and regulated by the Financial Services Authority. The contents hereof are intended solely for the use of, and may only be issued or passed onto, persons described in part VI of the Financial Services and Markets Act 2000 (Financial Promotion) Order 2001.

BMO Nesbitt Burns Inc. and BMO Nesbitt Burns Ltée/Ltd. are Members of CIPF. BMO Capital Markets Corp. and BMO Nesbitt Burns Securities Ltd. are Members of SIPC.

"BMO Capital Markets" is a trade-mark of Bank of Montreal, used under licence.

"BMO (M-Bar roundel symbol)" is a registered trade-mark of Bank of Montreal, used under licence.

General Disclosure

The information and opinions in this report were prepared by BMO Nesbitt Burns Inc. and BMO Nesbitt Burns Ltée./Ltd., collectively ("BMO NB"). BMO NB is not subject to U.S. rules with regard to the preparation of research reports and the independence of analysts. "BMO Capital Markets" is a trade name used by the BMO Investment Banking Group, which includes the wholesale/institutional arms of Bank of Montreal and BMO NB in Canada, and BMO Capital Markets Corp. in the U.S. BMO Capital Markets Corp. is an affiliate of BMO NB. BMO NB and BMO Capital Markets Corp. are subsidiaries of Bank of Montreal. Bank of Montreal or its affiliates ("BMO Financial Group") has lending arrangements with, or provide other remunerated services to, many issuers covered by BMO NB research. A significant lending relationship may exist between BMO Financial Group and certain of the issuers mentioned herein. The reader should assume that BMO NB, BMO Capital Markets Corp., Bank of Montreal or their affiliates may have a conflict of interest and should not rely solely on this report in evaluating whether or not to buy or sell securities of issuers discussed herein. The opinions, estimates and projections contained in this report are those of BMO NB as of the date of this report and are subject to change without notice. BMO NB endeavours to ensure that the contents have been compiled or derived from sources that we believe are reliable and contain information and opinions that are accurate and complete. However, BMO NB makes no representation or warranty, express or implied, in respect thereof, takes no responsibility for any errors and omissions contained herein and accepts no liability whatsoever for any loss arising from any use of, or reliance on, this report or its contents. Information may be available to BMO NB or its affiliates that is not reflected in this report. The information in this report is not intended to be used as the primary basis of investment decisions, and because of individual client objectives, should not be construed as advice designed to meet the particular investment needs of any investor. This material is for information purposes only and is not an offer to sell or the solicitation of an offer to buy any security. The research analyst and/or associates who prepared this report are compensated based upon (among other factors) the overall profitability of BMO NB and its affiliates, which includes the overall profitability of investment banking services. BMO NB, or its affiliates expect to receive or will seek compensation for investment banking services within the next 3 months from all issuers covered by BMO NB. BMO NB or its affiliates will buy from or sell to customers the securities of issuers mentioned in this report on a principal basis. BMO NB or its affiliates, officers, directors or employees may have a long or short position in the securities discussed herein, related securities or in options, futures or other derivative instruments based thereon.

Company Specific Disclosure

Disclosure 2: BMO NB has undertaken an underwriting liability with respect to this issuer within the past 12 months.

Disclosure 3: BMO NB has provided investment banking services with respect to this issuer within the past 12 months.

Disclosure 7: BMO Capital Markets Corp. or an affiliate has received compensation for investment banking services from this issuer within the past 12 months.

Disclosure 9: BMO Capital Markets Corp. or an affiliate received compensation for products or services other than investment banking services within the past 12 months.

Disclosure 10: This issuer is a client (or was a client) of BMO NB, BMO Capital Markets Corp. or an affiliate within the past 12 months: Investment Banking Services & Non-Securities Related Services.

Distribution of Ratings

Rating Category	BMO Rating	BMO Universe	BMO I.B. Clients*	First Call Universe**
Buy	Outperform	38%	42%	49%
Hold	Market Perform	53%	52%	46%
Sell	Underperform	9%	6%	5%

* Reflects rating distribution of all companies where BMO Capital Markets has received compensation for Investment Banking services.

** Reflects rating distribution of all North American equity research analysts.

Ratings Key

We use the following ratings system definitions:

OP = Outperform - Forecast to outperform the market;

Mkt = Market Perform - Forecast to perform roughly in line with the market;

Und = Underperform - Forecast to underperform the market;

(S) = speculative investment;

NR = No rating at this time;

R = Restricted – Dissemination of research is currently restricted.

Market performance is measured by a benchmark index such as the S&P/TSX Composite Index, S&P 500, Nasdaq Composite, as appropriate for each company. Prior to September 1, 2003, a fourth rating tier—Top Pick—was used to designate those stocks we felt would be the best performers relative to the market. Our six Top 15 lists which guide investors to our best ideas according to six different objectives (large, small, growth, value, income and quantitative) have replaced the Top Pick rating.

Dissemination of Research

Our research publications are available via our web site <http://bmocapitalmarkets.com>. Institutional clients may also receive our research via FIRST CALL Research Direct and Reuters. All of our research is made widely available at the same time to all BMO NB, BMO Capital Markets Corp. and BMO Nesbitt Burns Securities Ltd. client groups entitled to our research. Please contact your investment advisor or institutional salesperson for more information.

Additional Matters

TO U.S. RESIDENTS: BMO Capital Markets Corp. and/or BMO Nesbitt Burns Securities Ltd., affiliates of BMO NB, furnish this report to U.S. residents and accept responsibility for the contents herein, except to the extent that it refers to securities of Bank of Montreal. Any U.S. person wishing to effect transactions in any security discussed herein should do so through BMO Capital Markets Corp. and/or BMO Nesbitt Burns Securities Ltd.

TO U.K. RESIDENTS: In the UK this document is published by BMO Capital Markets Limited which is authorised and regulated by the Financial Services Authority. The contents hereof are intended solely for the use of, and may only be issued or passed onto, persons described in part VI of the Financial Services and Markets Act 2000 (Financial Promotion) Order 2001.

BMO Nesbitt Burns Inc. and BMO Nesbitt Burns Ltée/Ltd. are Members of CIPF. BMO Capital Markets Corp. and BMO Nesbitt Burns Securities Ltd. are Members of SIPC.

"BMO Capital Markets" is a trade-mark of Bank of Montreal, used under licence.

"BMO (M-Bar roundel symbol)" is a registered trade-mark of Bank of Montreal, used under licence.

Quarterly Dividend Increased 19%; Outperform Rating Unchanged

Event

Fortis Inc. has announced that it is increasing its quarterly dividend by 19% to \$0.25 per share versus \$0.21 per share currently. The dividend is payable on March 1, 2008, to shareholders of record at the close of business on February 8, 2008. The dividend increase is one quarter earlier than expected and \$0.015 higher than our estimate of the increased dividend of \$0.235 per share. The new annualized common share dividend is \$1.00 versus \$0.84 previously. We now expect a \$0.01 increase in the quarterly dividend to \$0.26 per share from the new rate of \$0.25 per share, beginning in the first quarter of 2009.

Impact

Positive.

Forecasts

Our diluted 2007, 2008, and 2009 EPS estimates of \$1.34, \$1.51 and \$1.53, respectively, are unchanged.

Valuation

Our revised target price of \$32.50 reflects a weighted valuation approach: 18x diluted 2009 EPS of \$1.53 (12.5%), 1.75x 2009E BVPS of \$18.94 (12.5%) and a target yield of 3.15% (75%), assuming 2009 dividends per share of \$1.04.

Recommendation

We believe that the shares are attractively valued at current levels. We continue to rate the shares Outperform.

Company Risk Disclosure

In addition to the risks involved in investing in common stocks generally, we also highlight the following risks that pertain to this company. Operations are subject to complex regulation by a variety of provincial, state and federal (Canada, Cayman Islands & Belize) agencies. Changes in regulation may adversely affect performance.

Financial performance depends on the availability of installed generation and the production of electric power by third parties. Fortis Properties' cash flow is dependent on hotel room vacancy rates and commercial building occupancy levels. The company's operations in Belize may be disrupted and assets may be damaged by hurricanes and/or tropical storms.

Analyst's Certification

I, Karen Taylor, CFA, hereby certify that the views expressed in this report accurately reflect my personal views about the subject securities or issuers. I also certify that no part of my compensation was, is, or will be, directly or indirectly, related to the specific recommendations or views expressed in this report.

General Disclosure

The information and opinions in this report were prepared by BMO Nesbitt Burns Inc. and BMO Nesbitt Burns Ltée./Ltd., collectively ("BMO NB"). BMO NB is not subject to U.S. rules with regard to the preparation of research reports and the independence of analysts. "BMO Capital Markets" is a trade name used by the BMO Investment Banking Group, which includes the wholesale/institutional arms of Bank of Montreal and BMO NB in Canada, and BMO Capital Markets Corp. in the U.S. BMO Capital Markets Corp. is an affiliate of BMO NB. BMO NB and BMO Capital Markets Corp. are subsidiaries of Bank of Montreal. Bank of Montreal or its affiliates ("BMO Financial Group") has lending arrangements with, or provide other remunerated services to, many issuers covered by BMO NB research. A significant lending relationship may exist between BMO Financial Group and certain of the issuers mentioned herein. The reader should assume that BMO NB, BMO Capital Markets Corp., Bank of Montreal or their affiliates may have a conflict of interest and should not rely solely on this report in evaluating whether or not to buy or sell securities of issuers discussed herein. The opinions, estimates and projections contained in this report are those of BMO NB as of the date of this report and are subject to change without notice. Distribution of Ratings

Rating Category	BMO Rating	BMO Universe	BMO I.B. Clients*	First Call Universe**
Buy	Outperform	38%	42%	49%
Hold	Market Perform	53%	52%	46%
Sell	Underperform	9%	6%	5%

* Reflects rating distribution of all companies where BMO Capital Markets has received compensation for Investment Banking services.

** Reflects rating distribution of all North American equity research analysts.

Ratings Key

We use the following ratings system definitions:

OP = Outperform - Forecast to outperform the market;

Mkt = Market Perform - Forecast to perform roughly in line with the market;

Und = Underperform - Forecast to underperform the market;

(S) = speculative investment;

NR = No rating at this time;

R = Restricted – Dissemination of research is currently restricted.

Market performance is measured by a benchmark index such as the S&P/TSX Composite Index, S&P 500, Nasdaq Composite, as appropriate for each company. Prior to September 1, 2003, a fourth rating tier—Top Pick—was used to designate those stocks we felt would be the best performers relative to the market. Our six Top 15 lists which guide investors to our best ideas according to six different objectives (large, small, growth, value, income and quantitative) have replaced the Top Pick rating.

Dissemination of Research

Our research publications are available via our web site <http://bmocapitalmarkets.com>. Institutional clients may also receive our research via FIRST CALL Research Direct and Reuters. All of our research is made widely available at the same time to all BMO NB, BMO Capital Markets Corp. and BMO Nesbitt Burns Securities Ltd. client groups entitled to our research. Please contact your investment advisor or institutional salesperson for more information.

Additional Matters

Company Description – Fortis is a publicly listed holding company with four key businesses: electric utility operations, regulated natural gas distribution, non-regulated electric power generation and non-utility property activities. Electric power operations include: Newfoundland Power (100%, Newfoundland), Maritime Electric (100%, PEI), FortisOntario (100%, Fort Erie, Ontario), Belize Electricity (68%, Belize), Caribbean Utilities (54%, Grand Cayman Island), Turks and Caicos (100%, Turks and Caicos),

FortisAlberta (100%, Alberta) and FortisBC (100%, British Columbia). *Website: fortisinc.com*

Recent Results – Fortis reported Q3/07 EPS of \$0.20 versus our expectation of \$0.19 and a mean estimate of \$0.21. We note the following: the contributions from FortisAlberta and FortisBC were moderately higher than expected, due to higher taxation recoveries at FortisAlberta and stronger-than-expected customer growth at FortisBC. These gains were partially offset by: (i) lower contribution from the non-

regulated power generation segment, arising from lower quarter-over-quarter hydrological conditions in Ontario, Upper State New York and Belize; and (ii) higher-than-expected unallocated Corporate costs.

Corporate Developments – On November 15, The British Columbia Utilities Commission (BCUC) issued an Order conditionally approving an application by Terasen Gas (Vancouver Island) Inc. (TGVI, 100% - Fortis Inc.) to build, own and operate a \$200 million liquefied natural gas (LNG) storage facility, and an application by Terasen Gas Inc. (100% - Fortis Inc.) to execute a storage and delivery agreement relating to the facility. The proposed LNG storage facility has a target in-service date of late 2011 and construction is expected to commence in April 2008. The Commission denied TGVI's application for a 50-basis-point premium to its return on equity for the project.

On October 11, Newfoundland Power filed a revised application for 2008 rates with the Newfoundland and

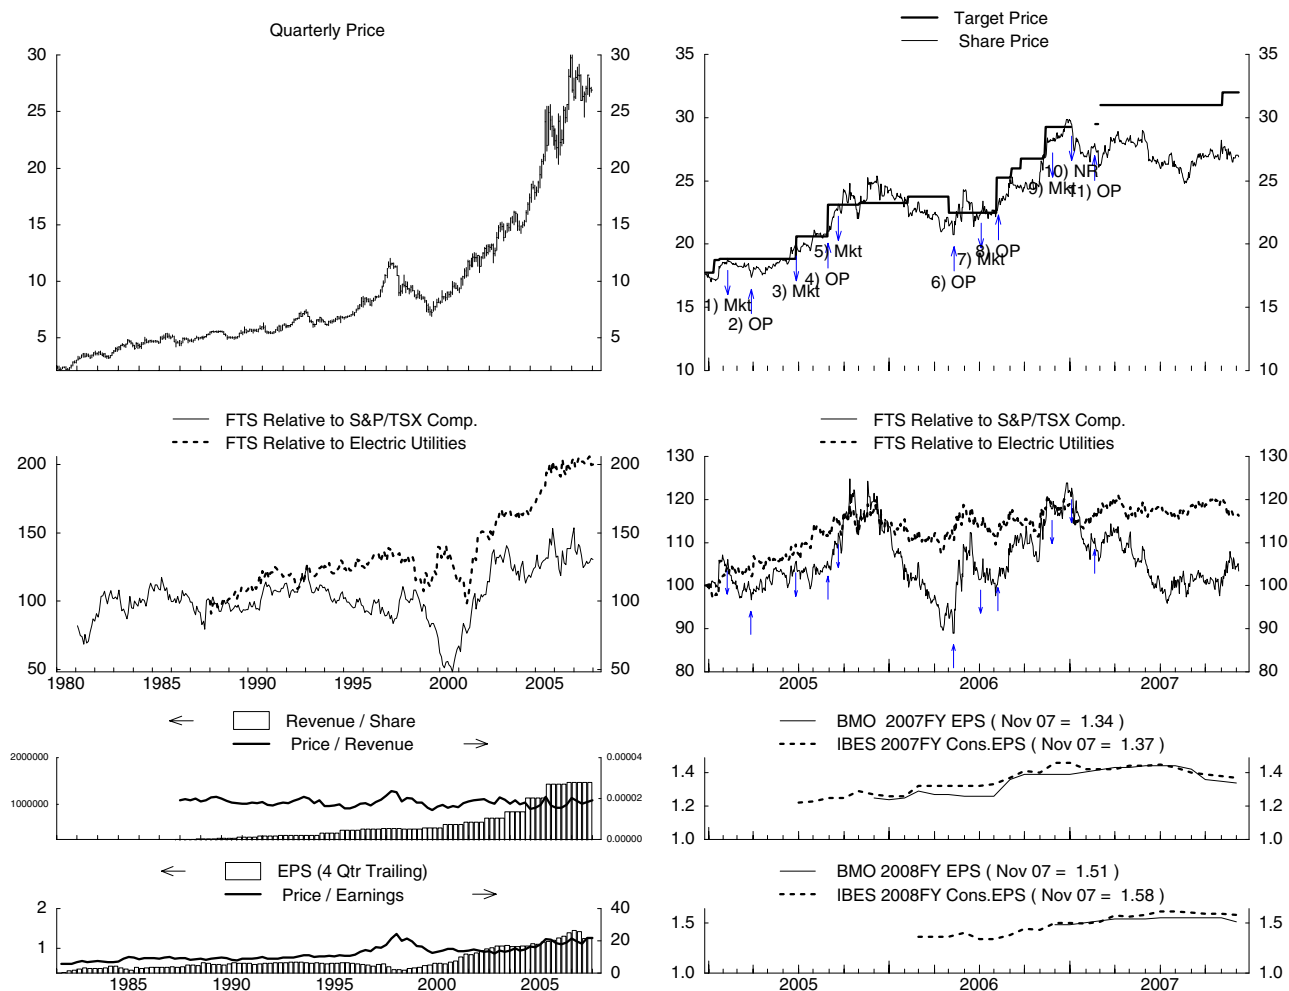

Labrador Board of Commissioners of Public Utilities. The revised application is the result of recent negotiations between the company and the Consumer Advocate, which determined that the applied-for ROE for 2008 should be 8.95% versus the previously applied-for ROE of 10.25% and an allowed ROE of 8.60% in 2007.

Forecasts – Our diluted 2007, 2008 and 2009 EPS estimates are \$1.34, \$1.51 and \$1.53, respectively.

Valuation – Our target price of \$32.00 reflects a weighted valuation approach: 18x diluted 2009E EPS of \$1.53 (12.5%), 2.0x 2009E BVPS of \$19.10 (12.5%) and a target yield of 3.00% (75%), assuming 2009 dividends per share of \$0.96.

Recommendation – We believe the shares are attractively valued at current levels. Our rating is Outperform. Member of Top 15 Income stock selections.

Company Risk Disclosure

In addition to the risks involved in investing in common stocks generally, we also highlight the following risks that pertain to this company. Operations are subject to complex regulation by a variety of provincial, state and federal (Canada, Cayman Islands & Belize) agencies. Changes in regulation may adversely affect performance.

Financial performance depends on the availability of installed generation and the production of electric power by third parties. Fortis Properties' cash flow is dependent on hotel room vacancy rates and commercial building occupancy levels. The company's operations in Belize may be disrupted and assets may be damaged by hurricanes and/or tropical storms.

Analyst's Certification

I, Karen Taylor, CFA, hereby certify that the views expressed in this report accurately reflect my personal views about the subject securities or issuers. I also certify that no part of my compensation was, is, or will be, directly or indirectly, related to the specific recommendations or views expressed in this report.

General Disclosure

The information and opinions in this report were prepared by BMO Nesbitt Burns Inc. and BMO Nesbitt Burns Ltée./Ltd., collectively ("BMO NB"). BMO NB is not subject to U.S. rules with regard to the preparation of research reports and the independence of analysts. "BMO Capital Markets" is a trade name used by the BMO Investment Banking Group, which includes the wholesale/institutional arms of Bank of Montreal and BMO NB in Canada, and BMO Capital Markets Corp. in the U.S. BMO Capital Markets Corp. is an affiliate of BMO NB. BMO NB and BMO Capital Markets Corp. are subsidiaries of Bank of Montreal. Bank of Montreal or its affiliates ("BMO Financial Group") has lending arrangements with, or provide other remunerated services to, many issuers covered by BMO NB research. A significant lending relationship may exist between BMO Financial Group and certain of the issuers mentioned herein. The reader should assume that BMO NB, BMO Capital Markets Corp., Bank of Montreal or their affiliates may have a conflict of interest and should not rely solely on this report in evaluating whether or not to buy or sell securities of issuers discussed herein. The opinions, estimates and projections contained in this report are those of BMO NB as of the date of this report and are subject to change without notice. BMO NB endeavours to ensure that the contents have been compiled or derived from sources that we believe are reliable and contain information and opinions that are accurate and complete. However, BMO NB makes no representation or warranty, express or implied, in respect thereof, takes no responsibility for any errors and omissions contained herein and accepts no liability whatsoever for any loss arising from any use of, or reliance on, this report or its contents. Information may be available to BMO NB or its affiliates that is not reflected in this report. The information in this report is not intended to be used as the primary basis of investment decisions, and because of individual client objectives, should not be construed as advice designed to meet the particular investment needs of any investor. This material is for information purposes only and is not an offer to sell or the solicitation of an offer to buy any security. The research analyst and/or associates who prepared this report are compensated based upon (among other factors) the overall profitability of BMO NB and its affiliates, which includes the overall profitability of investment banking services. BMO NB, or its affiliates expect to receive or will seek compensation for investment banking services within the next 3 months from all issuers covered by BMO NB. BMO NB or its affiliates will buy from or sell to customers the securities of issuers mentioned in this report on a principal basis. BMO NB or its affiliates, officers, directors or employees may have a long or short position in the securities discussed herein, related securities or in options, futures or other derivative instruments based thereon.

Company Specific Disclosure

Disclosure 2: BMO NB has undertaken an underwriting liability with respect to this issuer within the past 12 months.

Disclosure 3: BMO NB has provided investment banking services with respect to this issuer within the past 12 months.

Disclosure 7: BMO Capital Markets Corp. or an affiliate has received compensation for investment banking services from this issuer within the past 12 months.

Disclosure 9: BMO Capital Markets Corp. or an affiliate received compensation for products or services other than investment banking services within the past 12 months.

Disclosure 10: This issuer is a client (or was a client) of BMO NB, BMO Capital Markets Corp. or an affiliate within the past 12 months: Investment Banking Services & Non-Securities Related Services.

Ratings Key

We use the following ratings system definitions:

OP = Outperform - Forecast to outperform the market;

Mkt = Market Perform - Forecast to perform roughly in line with the market;

Und = Underperform - Forecast to underperform the market;

(S) = speculative investment;

NR = No rating at this time;

R = Restricted – Dissemination of research is currently restricted.

Market performance is measured by a benchmark index such as the S&P/TSX Composite Index, S&P 500, Nasdaq Composite, as appropriate for each company. Prior to September 1, 2003, a fourth rating tier—Top Pick—was used to designate those stocks we felt would be the best performers relative to the market. Our six Top 15 lists which guide investors to our best ideas according to six different objectives (large, small, growth, value, income and quantitative) have replaced the Top Pick rating.

Dissemination of Research

Our research publications are available via our web site <http://bmocapitalmarkets.com>. Institutional clients may also receive our research via FIRST CALL Research Direct and Reuters. All of our research is made widely available at the same time to all BMO NB, BMO Capital Markets Corp. and BMO Nesbitt Burns Securities Ltd. client groups entitled to our research. Please contact your investment advisor or institutional salesperson for more information.

Newfoundland Power 2008 Rates Approved

Impact

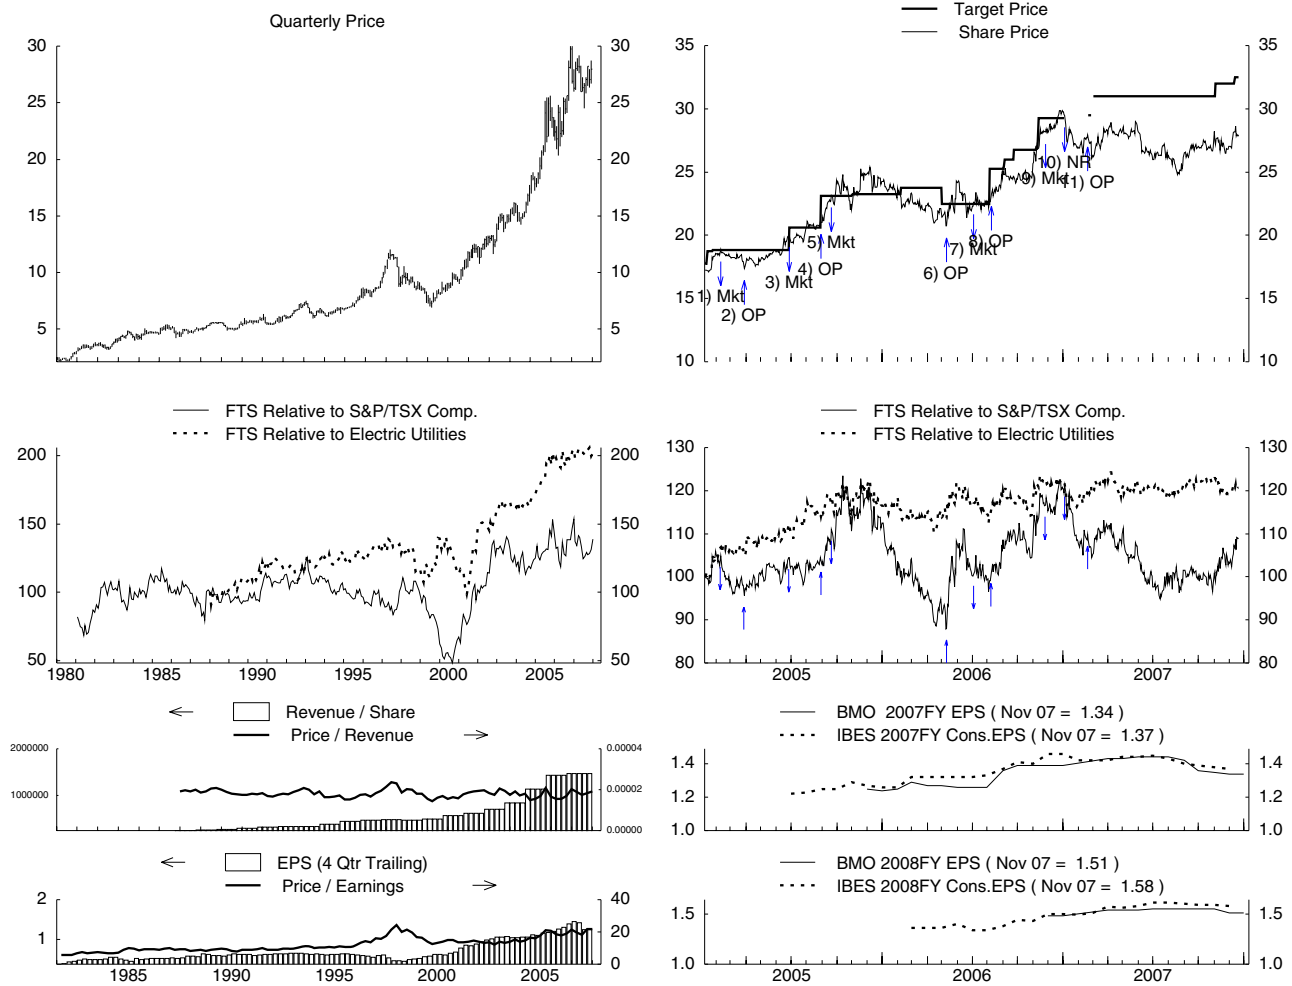

Neutral

Details & Analysis

The Newfoundland & Labrador Board of Commissioners of Public Utilities issued its Decision and Order regarding Newfoundland Power Inc.'s (100% - Fortis Inc.) 2008 General Rate Application. The Board approved the settlement agreement filed by Newfoundland Power as filed and ordered the utility to file its next general rate application by June 30, 2010 using a 2011 test year. Approval of the Settlement Agreement by the board was in line with expectations and our outlook fully reflects the key financial terms of the Settlement Agreement. No change in view. We rate the shares of Fortis Inc. Outperform.

This report was prepared by an Analyst employed by a Canadian affiliate, BMO Nesbitt Burns Inc., and who is not registered as a research analyst under FINRA rules. For disclosure statements, including the Analyst's Certification, please refer to pages 2 to 4.

Q4/07 EPS in Line With Expectations

Impact

Neutral

Details & Analysis

Fortis Inc. reported EPS of \$0.51. After adjusting for: (i) a \$7 million gain on sale of surplus land in Terasen Gas; (ii) a \$4 million benefit from the reduction in future income tax rates in Fortis Properties; and (iii) a \$2 million gain related to a refund received that was associated with an interconnection arrangement in Fortis Ontario, EPS were \$0.42, in line with our estimate of \$0.42 and slightly below the mean estimate of \$0.45. For fiscal 2007, the company reported EPS of \$1.40. After adjusting for a \$2.4 million turbine impairment charge recorded in Q1 and the previously mentioned one-time items reported in Q4, comparable 2007 EPS were \$1.33 versus our estimate of \$1.36 and a mean estimate of \$1.38. We continue to review the comprehensive release. We rate the shares Outperform.

This report was prepared by an Analyst employed by a Canadian affiliate, BMO Nesbitt Burns Inc., and who is not registered as a research analyst under FINRA rules. For disclosure statements, including the Analyst's Certification, please refer to pages 2 to 4.

Company Risk Disclosure

In addition to the risks involved in investing in common stocks generally, we also highlight the following risks that pertain to this company. Operations are subject to complex regulation by a variety of provincial, state and federal (Canada, Cayman Islands & Belize) agencies. Changes in regulation may adversely affect performance.

Financial performance depends on the availability of installed generation and the production of electric power by third parties. Fortis Properties' cash flow is dependent on hotel room vacancy rates and commercial building occupancy levels. The company's operations in Belize may be disrupted and assets may be damaged by hurricanes and/or tropical storms.

Analyst's Certification

I, Karen Taylor, CFA, hereby certify that the views expressed in this report accurately reflect my personal views about the subject securities or issuers. I also certify that no part of my compensation was, is, or will be, directly or indirectly, related to the specific recommendations or views expressed in this report.

General Disclosure

The information and opinions in this report were prepared by BMO Nesbitt Burns Inc. and BMO Nesbitt Burns Ltée./Ltd., collectively ("BMO NB"). BMO NB is not subject to U.S. rules with regard to the preparation of research reports and the independence of analysts. "BMO Capital Markets" is a trade name used by the BMO Investment Banking Group, which includes the wholesale arm of Bank of Montreal and its subsidiaries BMO NB in Canada, BMO Capital Markets Ltd. in the U.K. and BMO Capital Markets Corp. in the U.S. BMO Capital Markets Ltd. and BMO Capital Markets Corp. are affiliates of BMO NB. Bank of Montreal or its subsidiaries ("BMO Financial Group") has lending arrangements with, or provide other remunerated services to, many issuers covered by BMO NB research. A significant lending relationship may exist between BMO Financial Group and certain of the issuers mentioned herein. The opinions, estimates and projections contained in this report are those of BMO NB as of the date of this report and are subject to change without notice. Ratings Key

We use the following ratings system definitions:

OP = Outperform - Forecast to outperform the market;

Mkt = Market Perform - Forecast to perform roughly in line with the market;

Und = Underperform - Forecast to underperform the market;

(S) = speculative investment;

NR = No rating at this time;

R = Restricted – Dissemination of research is currently restricted.

Market performance is measured by a benchmark index such as the S&P/TSX Composite Index, S&P 500, Nasdaq Composite, as appropriate for each company. Prior to September 1, 2003, a fourth rating tier—Top Pick—was used to designate those stocks we felt would be the best performers relative to the market. Our six Top 15 lists which guide investors to our best ideas according to six different objectives (large, small, growth, value, income and quantitative) have replaced the Top Pick rating.

Dissemination of Research

Our research publications are available via our web site <http://bmocapitalmarkets.com>. Institutional clients may also receive our research via FIRST CALL Research Direct and Reuters. All of our research is made widely available at the same time to all BMO NB, BMO Capital Markets Ltd., BMO Capital Markets Corp. and BMO Nesbitt Burns Securities Ltd. client groups entitled to our research. Please contact your investment advisor or institutional salesperson for more information.

Conflict Statement

A general description of how BMO Financial Group identifies and manages conflicts of interest is contained in our public facing policy for managing conflicts of interest in connection with investment research which is available at http://equityresearch.bmogc.net/conflict_statement.asp

Additional Matters

TO U.S. RESIDENTS: BMO Capital Markets Corp. and/or BMO Nesbitt Burns Securities Ltd., affiliates of BMO NB, furnish this report to U.S. residents and accept responsibility for the contents herein, except to the extent that it refers to securities of Bank of Montreal. Any U.S. person wishing to effect transactions in any security discussed herein should do so through BMO Capital Markets Corp. and/or BMO Nesbitt Burns Securities Ltd.

TO U.K. RESIDENTS: In the UK this document is published by BMO Capital Markets Limited which is authorised and regulated by the Financial Services Authority. The contents hereof are intended solely for the use of, and may only be issued or passed on to, (I) persons who have professional experience in matters relating to investments falling within Article 19(5) of the Financial Services and Markets Act 2000 (Financial Promotion) Order 2005 (the "Order") or (II) high net worth entities falling within Article 49(2)(a) to (d) of the Order (all such persons together referred to as "relevant persons"). The contents hereof are not intended for the use of and may not be issued or passed on to, retail clients.

BMO Nesbitt Burns Inc. and BMO Nesbitt Burns Ltée/Ltd. are Members of CIPF. BMO Capital Markets Corp. and BMO Nesbitt Burns Securities Ltd. are Members of SIPC.

"BMO Capital Markets" is a trade-mark of Bank of Montreal, used under licence.

Q4/07 EPS Largely in Line; Outperform Rating Unchanged

Event

Fortis Inc. reported Q4/07 EPS of \$0.51. After adjusting for a number of one-time adjustments, Q4/07 EPS were \$0.46, moderately higher than our estimate of \$0.42 and slightly higher than a mean estimate of \$0.45. The variance between expected and actual performance is largely attributable to higher-than-expected performance from Terasen Gas, Fortis Alberta, and Fortis Properties, which was offset by slightly lower-than-expected performance from Other Canadian Utilities. For fiscal 2007, the company reported basic EPS of \$1.40. After adjusting for a number of one-time items, comparable 2007 basic EPS were \$1.36, in line with our estimate of basic EPS \$1.36 and slightly lower than a mean estimate of \$1.38. Diluted 2007 EPS of \$1.29 was slightly lower than our expectation of \$1.34.

Impact

Neutral.

Forecasts

We have updated our outlook to reflect actual 2007 performance and the information contained in the quarterly release. Our diluted 2008 and 2009 EPS estimates of \$1.51 and \$1.53, respectively, are unchanged.

Valuation

Our target price of \$32.50 reflects a weighted valuation approach: 18x diluted 2009 EPS of \$1.53 (25%), 1.75x 2009E BVPS of \$18.44 (12.5%), and a target yield of 3.15% (75%), assuming 2009 dividends per share of \$1.04.

Recommendation

We believe that the shares are attractively valued at current levels. We rate the shares Outperform.

Price (7-Feb) \$28.85 **52-Week High** \$29.89
Target Price \$32.50 **52-Week Low** \$24.50

Details & Analysis

Fortis Inc. reported Q4/07 EPS of \$0.51. After adjusting for a number of one-time adjustments, Q4/07 EPS was \$0.46, moderately higher than our Q4/07 estimate of \$0.42 slightly higher than a mean estimate of \$0.45. The variance between expected and actual performance is largely attributable to higher-than-expected performance from Terasen Gas, Fortis Alberta, and Fortis Properties, which was offset by slightly lower-than-expected performance from Other Canadian Utilities. For fiscal 2007, the company reported basic EPS of \$1.40. After adjusting for a number of one-time items, comparable 2007 basic EPS were \$1.36, in line with our estimate of basic EPS \$1.36 and slightly lower than a mean estimate of \$1.38.

We believe that the following points are relevant about quarterly performance and our outlook:

- One-time items in Q4/07 included: (i) \$7 million gain on sale of surplus land in Terasen Gas; (ii) \$2 million benefit related to a refund received that was associated with an interconnection arrangement in FortisOntario; and (iii) \$4 million benefit arising from the reduction in future income tax rates in Fortis Properties.
- Reported Q4/07 corporate costs included a number of non-recurring items: (i) \$2.0 million taxation assessment relating to Terasen Inc. and Fortis Inc.; (ii) Purchase price adjustment with respect to the acquisition of Terasen of \$2.0 million a.t.; and (iii) cost to unwind an interest rate swap related to a high interest rate loan at BECOL of approximately \$0.7 million a.t. Adjusted corporate costs of approximately \$17.3 million in Q4/07 were in line with expectations. We continue to assume approximately \$16.5 million of cost per quarter in 2008 or \$66 million and approximately \$62.3 million in 2009.
- In the quarterly release, management set out its capital budget for 2008 of \$890 million, comprised of: \$250 million for Terasen Gas; \$400 million for Fortis Alberta/BC; \$53 million for Newfoundland Power; \$38 million for Other Regulated Utilities Canadian; \$101 million for Regulated Caribbean Utilities; and \$48 million for Non-regulated. Management also highlighted the composition of the capital budget as follows: 50% - growth capital; 35% - sustaining capital expenditures, directed to ensure continued and enhanced performance, reliability and safety of generation and transmission & distribution assets; and 15% - other investment in facilities, equipment, vehicles, information technology systems, and other assets. We have assumed capital expenditures of approximately \$890 million in 2008 and approximately \$866 million in 2009.
- In the short-term, we believe that the company's primary focus will be on the integration of Terasen Inc. and the resumption of that entities' role as a core business, with a potential focus on renewed growth. These assets were acquired by Fortis Inc. on May 17, 2007. The segment contribution from Terasen Inc. was \$52 million for Q4/07, which was higher than our estimate of \$36.9 million, primarily due to the seasonality of these operations. We note that Terasen's quarterly earnings profile is: 55% - Q1; 5% - Q2; (5%) - Q3; and 45% - Q4. We expect earnings from this segment to be approximately \$91 million in 2008 and 2009, reflecting a full-year of contribution from Terasen Inc. in 2008.
- In 2008, Terasen Gas (Vancouver Island) Inc. (TGVI; 100% - Fortis Inc) is expected to spend approximately \$50 million on the construction of its \$200 million liquefied natural gas (LNG) storage facility. In November 2007, TGVI received conditional approval from the British Columbia and Utilities Commission for the construction of the facility. The LNG storage facility has a target in-service date of late 2011 and construction is expected to begin in April 2008. The project is fully reflected in our outlook for Fortis.

- Belize Electricity Ltd. (BEL, 70.1% - Fortis Inc) has resolved all its outstanding concerns in respect of the June 26, 2007, decision of the Belize Public Utilities Commission (PUC), including the order by the PUC to disallow certain electricity costs paid to Comision Federal de Electricidad. While we note that these issues have been resolved by the introduction and enactment of specific legislation, we understand that a general election process is underway and that a change of government may occur. We do not expect a potential change in government to have a material adverse effect on the consolidated operations of Fortis Inc., due to the diversity of the company's utility operations in Canada and the Caribbean.
- Quarterly and annual performance by segment is set out in Table 1.

Estimates

We have updated our outlook to reflect actual 2007 performance and the information contained in the quarterly release. Our diluted 2008 and 2009 EPS estimates of \$1.51 and \$1.53, respectively, are unchanged.

Valuation

Our target price of \$32.50 reflects a weighted valuation approach: 18x diluted 2009 EPS of \$1.53 (25%), 1.75x 2009E BVPS of \$18.44 (12.5%), and a target yield of 3.15% (75%), assuming 2009 dividends per share of \$1.04.

Recommendation

We believe that the shares are attractively valued at current levels. We rate the shares Outperform.

Company Risk Disclosure

In addition to the risks involved in investing in common stocks generally, we also highlight the following risks that pertain to this company. Operations are subject to complex regulation by a variety of provincial, state and federal (Canada, Cayman Islands & Belize) agencies. Changes in regulation may adversely affect performance.

Financial performance depends on the availability of installed generation and the production of electric power by third parties. Fortis Properties' cash flow is dependent on hotel room vacancy rates and commercial building occupancy levels. The company's operations in Belize may be disrupted and assets may be damaged by hurricanes and/or tropical storms.

Analyst's Certification

I, Karen Taylor, CFA, hereby certify that the views expressed in this report accurately reflect my personal views about the subject securities or issuers. I also certify that no part of my compensation was, is, or will be, directly or indirectly, related to the specific recommendations or views expressed in this report.

General Disclosure

The information and opinions in this report were prepared by BMO Nesbitt Burns Inc. and BMO Nesbitt Burns Ltée./Ltd., collectively ("BMO NB"). BMO NB is not subject to U.S. rules with regard to the preparation of research reports and the independence of analysts. "BMO Capital Markets" is a trade name used by the BMO Investment Banking Group, which includes the wholesale arm of Bank of Montreal and its subsidiaries BMO NB in Canada, BMO Capital Markets Ltd. in the U.K. and BMO Capital Markets Corp. in the U.S. BMO Capital Markets Ltd. and BMO Capital Markets Corp. are affiliates of BMO NB. Bank of Montreal or its subsidiaries ("BMO Financial Group") has lending arrangements with, or provide other remunerated services to, many issuers covered by BMO NB research. A significant lending relationship may exist between BMO Financial Group and certain of the issuers mentioned herein. The opinions, estimates and projections contained in this report are those of BMO NB as of the date of this report and are subject to change without notice. BMO NB endeavours to ensure that the contents have been compiled or derived from sources that we believe are reliable and contain information and opinions that are accurate and complete. However, BMO NB makes no representation or warranty, express or implied, in respect thereof, takes no responsibility for any errors and omissions contained herein and accepts no liability whatsoever for any loss arising from any use of, or reliance on, this report or its contents. Information may be available to BMO NB or its affiliates that is not reflected in this report. The information in this report is not intended to be used as the primary basis of investment decisions, and because of individual client objectives, should not be construed as advice designed to meet the particular investment needs of any investor. This material is for information purposes only and is not an offer to sell or the solicitation of an offer to buy any security. The research analyst and/or associates who prepared this report are compensated based upon (among other factors) the overall profitability of BMO NB and its affiliates, which includes the overall profitability of investment banking services. BMO NB, or its affiliates expect to receive or will seek compensation for investment banking services within the next 3 months from all issuers covered by BMO NB. BMO NB or its affiliates will buy from or sell to customers the securities of issuers mentioned in this report on a principal basis. BMO NB or its affiliates, officers, directors or employees may have a long or short position in the securities discussed herein, related securities or in options, futures or other derivative instruments based thereon. The reader should assume that BMO NB, BMO Capital Markets Ltd., BMO Capital Markets Corp., Bank of Montreal or their affiliates may have a conflict of interest and should not rely solely on this report in evaluating whether or not to buy or sell securities of issuers discussed herein.

Company Specific Disclosure

Disclosure 2: BMO NB has undertaken an underwriting liability with respect to this issuer within the past 12 months.

Disclosure 3: BMO NB has provided investment banking services with respect to this issuer within the past 12 months.

Disclosure 7: BMO Capital Markets Corp. or an affiliate has received compensation for investment banking services from this issuer within the past 12 months.

Disclosure 9: BMO Capital Markets Corp. or an affiliate received compensation for products or services other than investment banking services within the past 12 months.

Disclosure 10: This issuer is a client (or was a client) of BMO NB, BMO Capital Markets Corp. or an affiliate within the past 12 months: Investment Banking Services & Non-Securities Related Services.

Rating Category	BMO Rating	BMO Universe	BMO I.B. Clients*	First Call Universe**
Buy	Outperform	38%	42%	49%
Hold	Market Perform	53%	52%	46%
Sell	Underperform	9%	6%	5%

* Reflects rating distribution of all companies where BMO Capital Markets has received compensation for Investment Banking services.

** Reflects rating distribution of all North American equity research analysts.

Ratings Key

We use the following ratings system definitions:

OP = Outperform - Forecast to outperform the market;

Mkt = Market Perform - Forecast to perform roughly in line with the market;

Und = Underperform - Forecast to underperform the market;

(S) = speculative investment;

NR = No rating at this time;

R = Restricted – Dissemination of research is currently restricted.

Market performance is measured by a benchmark index such as the S&P/TSX Composite Index, S&P 500, Nasdaq Composite, as appropriate for each company. Prior to September 1, 2003, a fourth rating tier—Top Pick—was used to designate those stocks we felt would be the best performers relative to the market. Our six Top 15 lists which guide investors to our best ideas according to six different objectives (large, small, growth, value, income and quantitative) have replaced the Top Pick rating.

Dissemination of Research

Our research publications are available via our web site <http://bmocapitalmarkets.com>. Institutional clients may also receive our research via FIRST CALL Research Direct and Reuters. All of our research is made widely available at the same time to all BMO NB, BMO Capital Markets Ltd., BMO Capital Markets Corp. and BMO Nesbitt Burns Securities Ltd. client groups entitled to our research. Please contact your investment advisor or institutional salesperson for more information.

Conflict Statement

A general description of how BMO Financial Group identifies and manages conflicts of interest is contained in our public facing policy for managing conflicts of interest in connection with investment research which is available at http://equityresearch.bmogc.net/conflict_statement.asp

AUC Approves FortisAlberta's 2008/09 Revenue Requirements

Impact

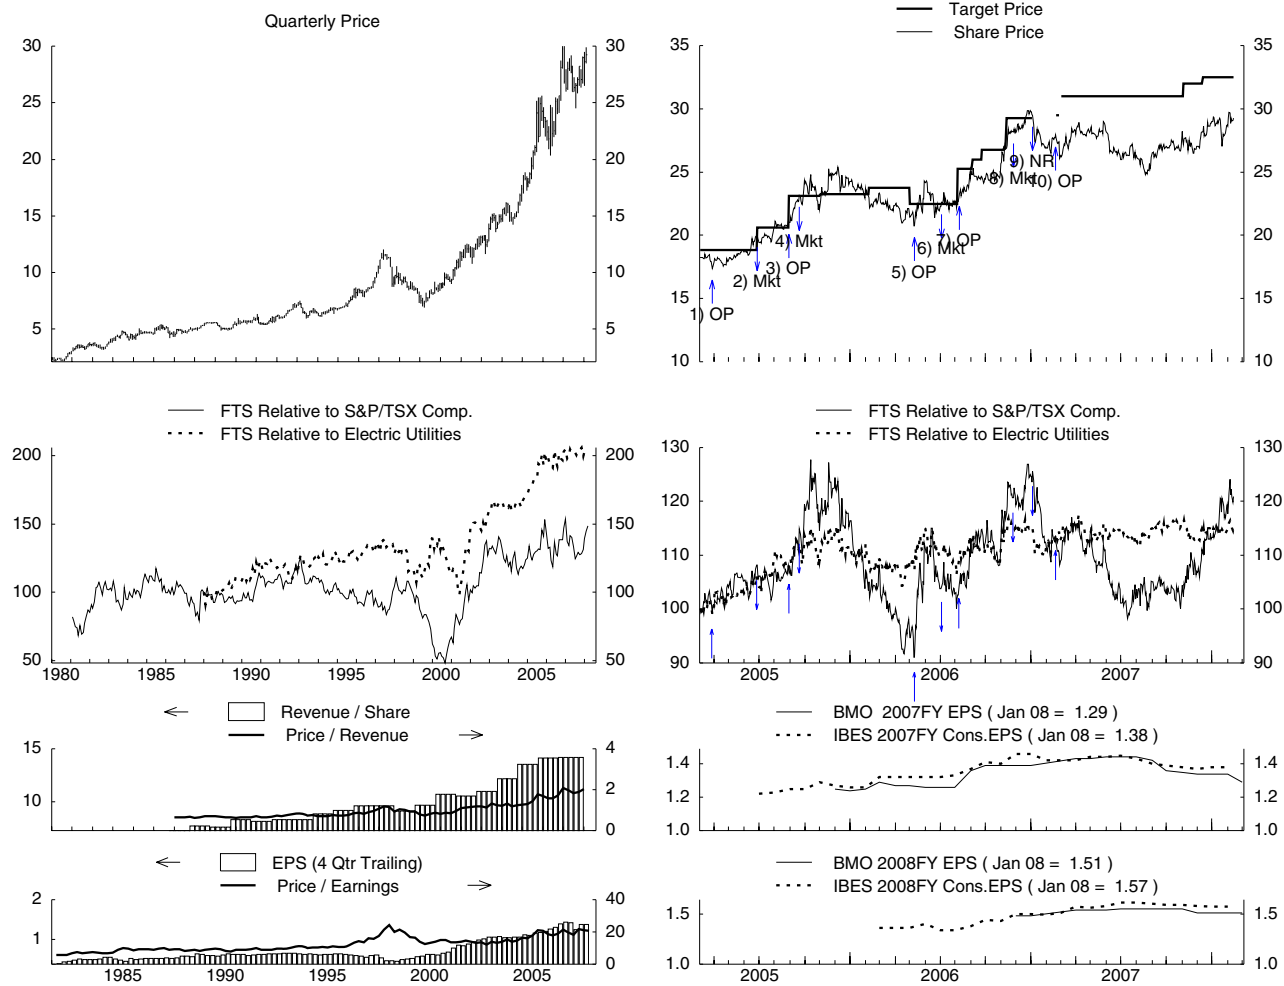

Neutral

Details & Analysis

On February 12, the Alberta Utilities Commission (AUC) approved the negotiated settlement agreement filed by FortisAlberta Inc. (100% - Fortis Inc.) on November 2, 2007, relating to its 2008/09 Distribution Tariff Application. Approval of the negotiated settlement agreement by the AUC is in line with expectations, and our outlook fully reflects the key financial terms of the settlement agreement. No change in view. We continue to rate the shares Outperform.

This report was prepared by an Analyst employed by a Canadian affiliate, BMO Nesbitt Burns Inc., and who is not registered as a research analyst under FINRA rules. For disclosure statements, including the Analyst's Certification, please refer to pages 2 to 4.

Company Risk Disclosure

In addition to the risks involved in investing in common stocks generally, we also highlight the following risks that pertain to this company. Operations are subject to complex regulation by a variety of provincial, state and federal (Canada, Cayman Islands & Belize) agencies. Changes in regulation may adversely affect performance.

Financial performance depends on the availability of installed generation and the production of electric power by third parties. Fortis Properties' cash flow is dependent on hotel room vacancy rates and commercial building occupancy levels. The company's operations in Belize may be disrupted and assets may be damaged by hurricanes and/or tropical storms.

Analyst's Certification

I, Karen Taylor, CFA, hereby certify that the views expressed in this report accurately reflect my personal views about the subject securities or issuers. I also certify that no part of my compensation was, is, or will be, directly or indirectly, related to the specific recommendations or views expressed in this report.

General Disclosure

The information and opinions in this report were prepared by BMO Nesbitt Burns Inc. and BMO Nesbitt Burns Ltée./Ltd., collectively ("BMO NB"). BMO NB is not subject to U.S. rules with regard to the preparation of research reports and the independence of analysts. "BMO Capital Markets" is a trade name used by the BMO Investment Banking Group, which includes the wholesale arm of Bank of Montreal and its subsidiaries BMO NB in Canada, BMO Capital Markets Ltd. in the U.K. and BMO Capital Markets Corp. in the U.S. BMO Capital Markets Ltd. and BMO Capital Markets Corp. are affiliates of BMO NB. Bank of Montreal or its subsidiaries ("BMO Financial Group") has lending arrangements with, or provide other remunerated services to, many issuers covered by BMO NB research. A significant lending relationship may exist between BMO Financial Group and certain of the issuers mentioned herein. The opinions, estimates and projections contained in this report are those of BMO NB as of the date of this report and are subject to change without notice. BMO NB endeavours to ensure that the contents have been compiled or derived from sources that we believe are reliable and contain information and opinions that are accurate and complete. However, BMO NB makes no representation or warranty, express or implied, in respect thereof, takes no responsibility for any errors and omissions contained herein and accepts no liability whatsoever for any loss arising from any use of, or reliance on, this report or its contents. Information may be available to BMO NB or its affiliates that is not reflected in this report. The information in this report is not intended to be used as the primary basis of investment decisions, and because of individual client objectives, should not be construed as advice designed to meet the particular investment needs of any investor. This material is for information purposes only and is not an offer to sell or the solicitation of an offer to buy any security. The research analyst and/or associates who prepared this report are compensated based upon (among other factors) the overall profitability of BMO NB and its affiliates, which includes the overall profitability of investment banking services. BMO NB, or its affiliates expect to receive or will seek compensation for investment banking services within the next 3 months from all issuers covered by BMO NB. BMO NB or its affiliates will buy from or sell to customers the securities of issuers mentioned in this report on a principal basis. BMO NB or its affiliates, officers, directors or employees may have a long or short position in the securities discussed herein, related securities or in options, futures or other derivative instruments based thereon. The reader should assume that BMO NB, BMO Capital Markets Ltd., BMO Capital Markets Corp., Bank of Montreal or their affiliates may have a conflict of interest and should not rely solely on this report in evaluating whether or not to buy or sell securities of issuers discussed herein.

Company Specific Disclosure

Disclosure 2: BMO NB has undertaken an underwriting liability with respect to this issuer within the past 12 months.

Disclosure 3: BMO NB has provided investment banking services with respect to this issuer within the past 12 months.

Disclosure 7: BMO Capital Markets Corp. or an affiliate has received compensation for investment banking services from this issuer within the past 12 months.

Disclosure 9: BMO Capital Markets Corp. or an affiliate received compensation for products or services other than investment banking services within the past 12 months.

Disclosure 10: This issuer is a client (or was a client) of BMO NB, BMO Capital Markets Corp. or an affiliate within the past 12 months: Investment Banking Services & Non-Securities Related Services.

Distribution of Ratings

Rating Category	BMO Rating	BMO Universe	BMO I.B. Clients*	First Call Universe**
Buy	Outperform	38%	42%	49%

Hold	Market Perform	53%	52%	46%
Sell	Underperform	9%	6%	5%

* Reflects rating distribution of all companies where BMO Capital Markets has received compensation for Investment Banking services.

** Reflects rating distribution of all North American equity research analysts.

Ratings Key

We use the following ratings system definitions:

OP = Outperform - Forecast to outperform the market;

Mkt = Market Perform - Forecast to perform roughly in line with the market;

Und = Underperform - Forecast to underperform the market;

(S) = speculative investment;

NR = No rating at this time;

R = Restricted – Dissemination of research is currently restricted.

Market performance is measured by a benchmark index such as the S&P/TSX Composite Index, S&P 500, Nasdaq Composite, as appropriate for each company. Prior to September 1, 2003, a fourth rating tier—Top Pick—was used to designate those stocks we felt would be the best performers relative to the market. Our six Top 15 lists which guide investors to our best ideas according to six different objectives (large, small, growth, value, income and quantitative) have replaced the Top Pick rating.

Dissemination of Research

Our research publications are available via our web site <http://bmocapitalmarkets.com>. Institutional clients may also receive our research via FIRST CALL Research Direct and Reuters. All of our research is made widely available at the same time to all BMO NB, BMO Capital Markets Ltd., BMO Capital Markets Corp. and BMO Nesbitt Burns Securities Ltd. client groups entitled to our research. Please contact your investment advisor or institutional salesperson for more information.

Conflict Statement

A general description of how BMO Financial Group identifies and manages conflicts of interest is contained in our public facing policy for managing conflicts of interest in connection with investment research which is available at http://equityresearch.bmogc.net/conflict_statement.asp

IRAC Approves 1.8% Rate Increase

Impact

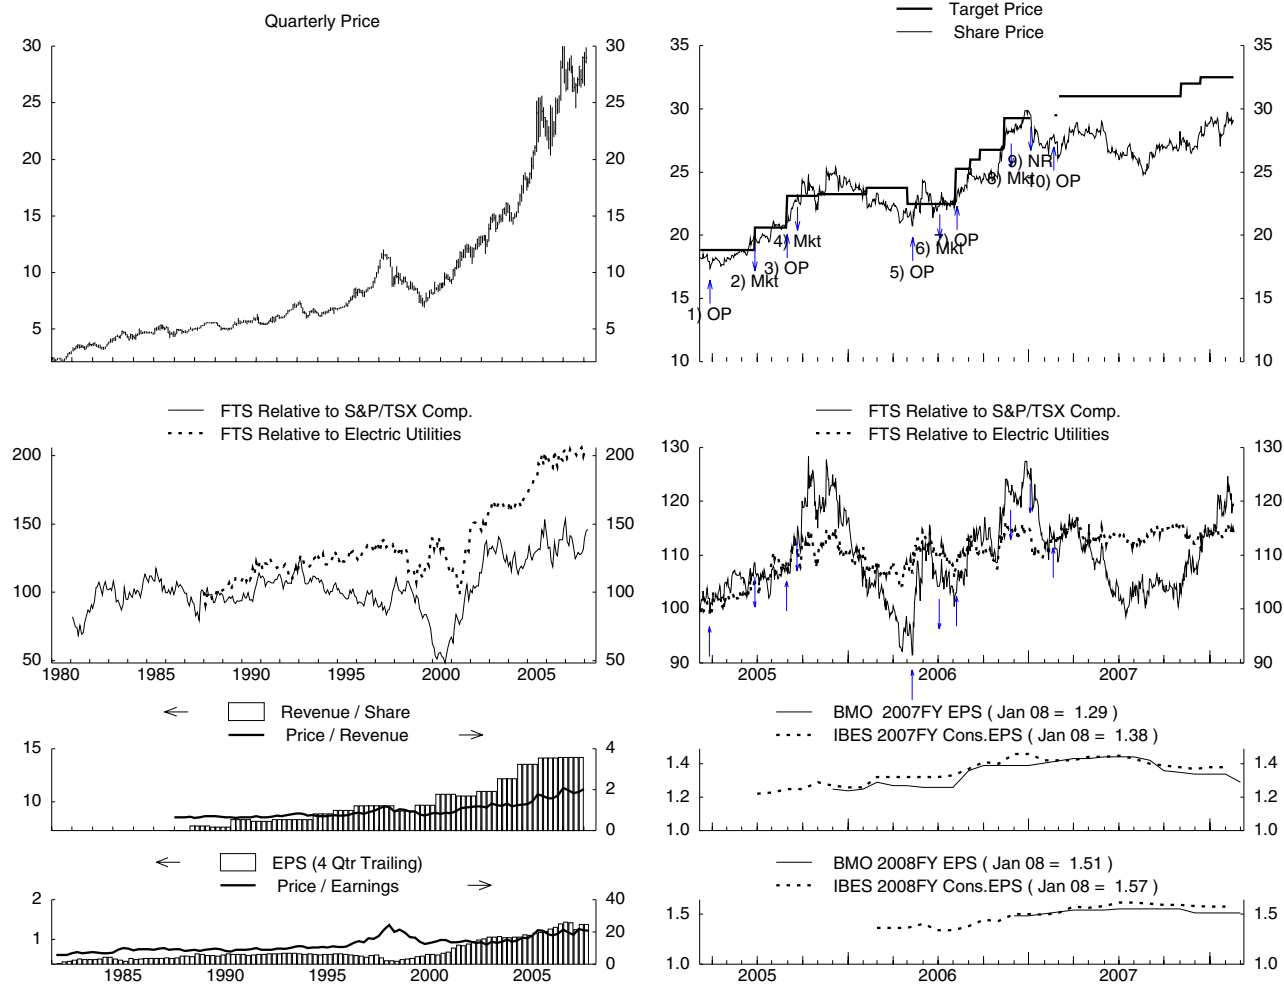

Neutral

Details & Analysis

On January 24, the Island Regulatory and Appeals Commission (IRAC) approved Maritime Electric's (100% - Fortis Inc.) October 18, 2007, application for an increase in basic utility rates of 1.8%, effective April 1, 2008 (see our comment dated November 12, 2007). The decision contains the following highlights: (i) the requested maximum allowed return on equity of 10.0% is approved for 2008. Actual common equity in 2008 is estimated to be 41.3%; and (ii) the IRAC has ordered the company to file a report by September 1 providing recommendations for rebasing the Energy Cost Adjustment Mechanism to bring the base rate of \$0.0673/kWh more in line with current market-based pricing. Approval of the application by the IRAC is in line with expectations and the key components of the application are currently reflected in our estimates. We continue to rate the shares of Fortis Outperform.

This report was prepared by an Analyst employed by a Canadian affiliate, BMO Nesbitt Burns Inc., and who is not registered as a research analyst under FINRA rules. For disclosure statements, including the Analyst's Certification, please refer to pages 2 to 4.

Company Risk Disclosure

In addition to the risks involved in investing in common stocks generally, we also highlight the following risks that pertain to this company. Operations are subject to complex regulation by a variety of provincial, state and federal (Canada, Cayman Islands & Belize) agencies. Changes in regulation may adversely affect performance.

Financial performance depends on the availability of installed generation and the production of electric power by third parties. Fortis Properties' cash flow is dependent on hotel room vacancy rates and commercial building occupancy levels. The company's operations in Belize may be disrupted and assets may be damaged by hurricanes and/or tropical storms.

Analyst's Certification

I, Karen Taylor, CFA, hereby certify that the views expressed in this report accurately reflect my personal views about the subject securities or issuers. I also certify that no part of my compensation was, is, or will be, directly or indirectly, related to the specific recommendations or views expressed in this report.

General Disclosure

The information and opinions in this report were prepared by BMO Nesbitt Burns Inc. and BMO Nesbitt Burns Ltée./Ltd., collectively ("BMO NB"). BMO NB is not subject to U.S. rules with regard to the preparation of research reports and the independence of analysts. "BMO Capital Markets" is a trade name used by the BMO Investment Banking Group, which includes the wholesale arm of Bank of Montreal and its subsidiaries BMO NB in Canada, BMO Capital Markets Ltd. in the U.K. and BMO Capital Markets Corp. in the U.S. BMO Capital Markets Ltd. and BMO Capital Markets Corp. are affiliates of BMO NB. Bank of Montreal or its subsidiaries ("BMO Financial Group") has lending arrangements with, or provide other remunerated services to, many issuers covered by BMO NB research. A significant lending relationship may exist between BMO Financial Group and certain of the issuers mentioned herein. The opinions, estimates and projections contained in this report are those of BMO NB as of the date of this report and are subject to change without notice. BMO NB endeavours to ensure that the contents have been compiled or derived from sources that we believe are reliable and contain information and opinions that are accurate and complete. However, BMO NB makes no representation or warranty, express or implied, in respect thereof, takes no responsibility for any errors and omissions contained herein and accepts no liability whatsoever for any loss arising from any use of, or reliance on, this report or its contents. Information may be available to BMO NB or its affiliates that is not reflected in this report. The information in this report is not intended to be used as the primary basis of investment decisions, and because of individual client objectives, should not be construed as advice designed to meet the particular investment needs of any investor. This material is for information purposes only and is not an offer to sell or the solicitation of an offer to buy any security. The research analyst and/or associates who prepared this report are compensated based upon (among other factors) the overall profitability of BMO NB and its affiliates, which includes the overall profitability of investment banking services. BMO NB, or its affiliates expect to receive or will seek compensation for investment banking services within the next 3 months from all issuers covered by BMO NB. BMO NB or its affiliates will buy from or sell to customers the securities of issuers mentioned in this report on a principal basis. BMO NB or its affiliates, officers, directors or employees may have a long or short position in the securities discussed herein, related securities or in options, futures or other derivative instruments based thereon. The reader should assume that BMO NB, BMO Capital Markets Ltd., BMO Capital Markets Corp., Bank of Montreal or their affiliates may have a conflict of interest and should not rely solely on this report in evaluating whether or not to buy or sell securities of issuers discussed herein.

Company Specific Disclosure

Disclosure 2: BMO NB has undertaken an underwriting liability with respect to this issuer within the past 12 months.

Disclosure 3: BMO NB has provided investment banking services with respect to this issuer within the past 12 months.

Disclosure 7: BMO Capital Markets Corp. or an affiliate has received compensation for investment banking services from this issuer within the past 12 months.

Disclosure 9: BMO Capital Markets Corp. or an affiliate received compensation for products or services other than investment banking services within the past 12 months.

Disclosure 10: This issuer is a client (or was a client) of BMO NB, BMO Capital Markets Corp. or an affiliate within the past 12 months: Investment Banking Services & Non-Securities Related Services.

Distribution of Ratings

Rating Category	BMO Rating	BMO Universe	BMO I.B. Clients*	First Call Universe**
Buy	Outperform	38%	42%	49%
Hold	Market Perform	53%	52%	46%
Sell	Underperform	9%	6%	5%

* Reflects rating distribution of all companies where BMO Capital Markets has received compensation for Investment Banking services.

** Reflects rating distribution of all North American equity research analysts.

Ratings Key

We use the following ratings system definitions:

OP = Outperform - Forecast to outperform the market;

Mkt = Market Perform - Forecast to perform roughly in line with the market;

Und = Underperform - Forecast to underperform the market;

(S) = speculative investment;

NR = No rating at this time;

R = Restricted – Dissemination of research is currently restricted.

Market performance is measured by a benchmark index such as the S&P/TSX Composite Index, S&P 500, Nasdaq Composite, as appropriate for each company. Prior to September 1, 2003, a fourth rating tier—Top Pick—was used to designate those stocks we felt would be the best performers relative to the market. Our six Top 15 lists which guide investors to our best ideas according to six different objectives (large, small, growth, value, income and quantitative) have replaced the Top Pick rating.

Dissemination of Research

Our research publications are available via our web site <http://bmocapitalmarkets.com>. Institutional clients may also receive our research via FIRST CALL Research Direct and Reuters. All of our research is made widely available at the same time to all BMO NB, BMO Capital Markets Ltd., BMO Capital Markets Corp. and BMO Nesbitt Burns Securities Ltd. client groups entitled to our research. Please contact your investment advisor or institutional salesperson for more information.

Conflict Statement

A general description of how BMO Financial Group identifies and manages conflicts of interest is contained in our public facing policy for managing conflicts of interest in connection with investment research which is available at http://equityresearch.bmogc.net/conflict_statement.asp

Additional Matters

TO U.S. RESIDENTS: BMO Capital Markets Corp. and/or BMO Nesbitt Burns Securities Ltd., affiliates of BMO NB, furnish this report to U.S. residents and accept responsibility for the contents herein, except to the extent that it refers to securities of Bank of Montreal. Any U.S. person wishing to effect transactions in any security discussed herein should do so through BMO Capital Markets Corp. and/or BMO Nesbitt Burns Securities Ltd.

TO U.K. RESIDENTS: In the UK this document is published by BMO Capital Markets Limited which is authorised and regulated by the Financial Services Authority. The contents hereof are intended solely for the use of, and may only be issued or passed on to, (I) persons who have professional experience in matters relating to investments falling within Article 19(5) of the Financial Services and Markets Act 2000 (Financial Promotion) Order 2005 (the "Order") or (II) high net worth entities falling within Article 49(2)(a) to (d) of the Order (all such persons together referred to as "relevant persons"). The contents hereof are not intended for the use of and may not be issued or passed on to, retail clients.

BMO Nesbitt Burns Inc. and BMO Nesbitt Burns Ltée/Ltd. are Members of CIPF. BMO Capital Markets Corp. and BMO Nesbitt Burns Securities Ltd. are Members of SIPC.

"BMO Capital Markets" is a trade-mark of Bank of Montreal, used under licence.

"BMO (M-Bar roundel symbol)" is a registered trade-mark of Bank of Montreal, used under licence.

Notes: EPS estimates are diluted; Quarterly numbers are basic **Disclosures:** 2, 3, 7, 9, 10AC

Company Description – Fortis is a publicly listed holding company with four key businesses: electric utility operations, regulated natural gas distribution, non-regulated electric power generation and non-utility property activities. Electric power operations include: Newfoundland Power (100%, Newfoundland), Maritime Electric (100%, PEI), FortisOntario (100%, Fort Erie, Ontario), Belize Electricity (68%, Belize), Caribbean Utilities (54%, Grand Cayman Island), Turks and Caicos (100%, Turks and Caicos),

FortisAlberta (100%, Alberta) and FortisBC (100%, British Columbia). *Website: fortisinc.com*

Recent Results – Fortis Inc. reported Q4/07 EPS of \$0.51. After adjusting for a number of one-time items, Q4/07 EPS were \$0.46, moderately higher than our estimate of \$0.42 and slightly higher than a mean estimate of \$0.45. The variance between expected and actual performance is largely attributable to higher-than-expected performance from Terasen Gas, Fortis Alberta, and Fortis Properties, which

was offset by slightly lower-than-expected performance from Other Canadian Utilities. For 2007, the company reported basic EPS of \$1.40. After adjusting for a number of one-time items, comparable 2007 basic EPS were \$1.36, largely in line with our estimate of basic EPS of \$1.36 and slightly lower than a mean estimate of \$1.38. Diluted 2007 EPS of \$1.29 was slightly lower than our expectation of \$1.34.

Corporate Developments – On January 24, the Island Regulatory and Appeals Commission (IRAC) approved Maritime Electric's (100% - Fortis Inc.) October 18, 2007, application for an increase in basic utility rates of 1.8%, effective April 1, 2008 (see our comment dated November 12, 2007). The decision contains the following highlights: (i) the requested maximum allowed return on equity of 10.0% is approved for 2008. Actual common equity in 2008 is estimated to be 41.3%; and (ii) the IRAC has ordered the

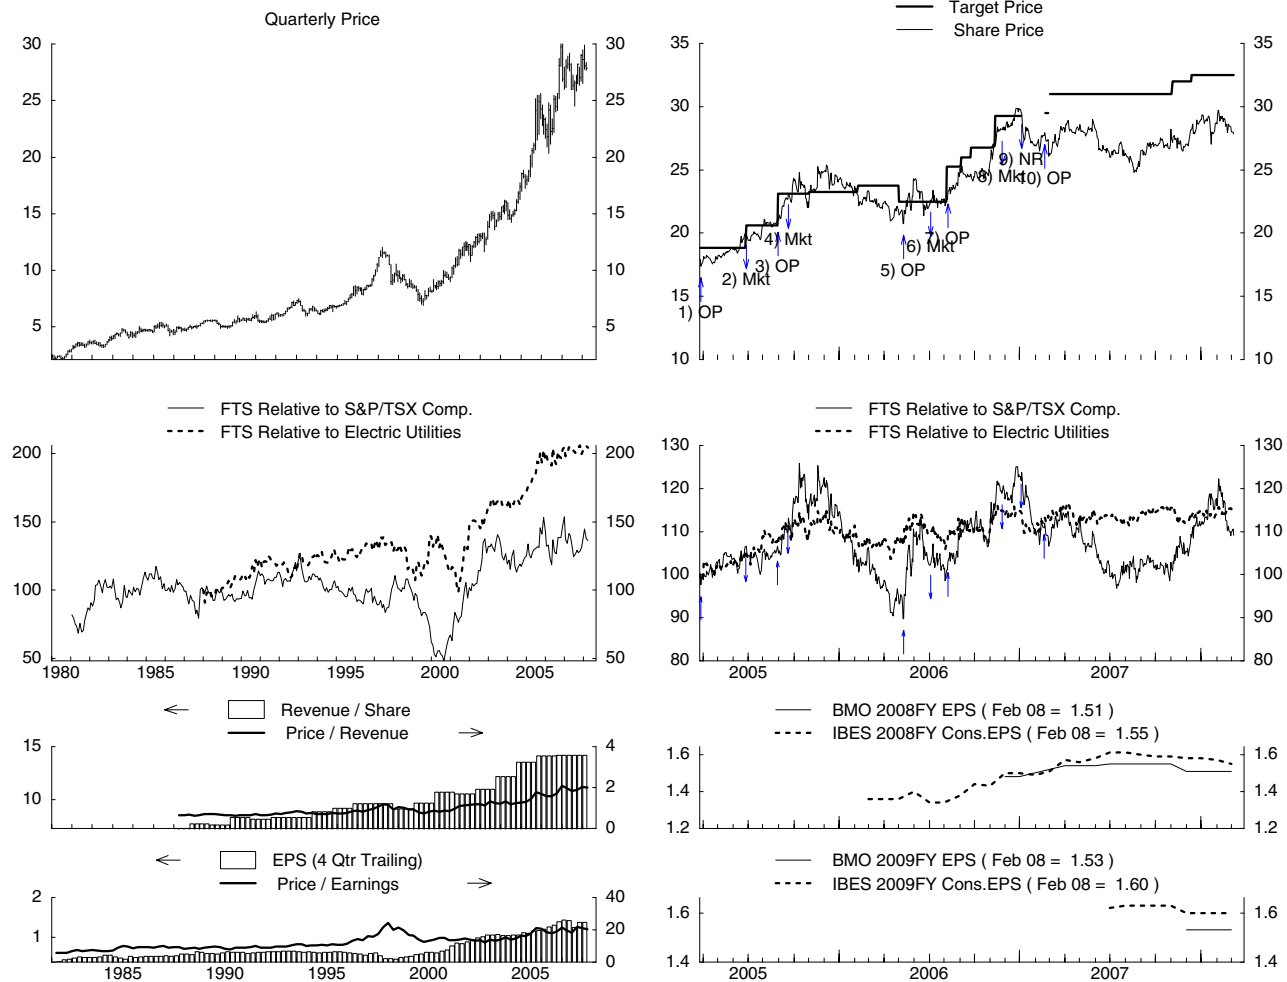

company to file a report by September 1 providing recommendations for rebasing the Energy Cost Adjustment Mechanism to bring the base rate of \$0.0673/kWh more in line with current market-based pricing. Approval of the application by the IRAC is in line with expectations and the key components of the application are currently reflected in our estimates.

Forecasts – Our diluted 2008 and 2009 EPS estimates are \$1.51 and \$1.53, respectively.

Valuation – Our target price of \$32.50 reflects a weighted valuation approach: 18x diluted 2009 EPS of \$1.53 (12.5%), 1.75x 2009E BVPS of \$18.44 (12.5%) and a target yield of 3.15% (75%), assuming 2009 dividends per share of \$1.04.

Recommendation – We believe the shares are attractively valued at current levels. Our rating is Outperform. Member of Top 15 Income and Value stock selections.

Company Risk Disclosure

In addition to the risks involved in investing in common stocks generally, we also highlight the following risks that pertain to this company. Operations are subject to complex regulation by a variety of provincial, state and federal (Canada, Cayman Islands & Belize) agencies. Changes in regulation may adversely affect performance.

Financial performance depends on the availability of installed generation and the production of electric power by third parties. Fortis Properties' cash flow is dependent on hotel room vacancy rates and commercial building occupancy levels. The company's operations in Belize may be disrupted and assets may be damaged by hurricanes and/or tropical storms.

Ratings Key

We use the following ratings system definitions:

OP = Outperform - Forecast to outperform the market;

Mkt = Market Perform - Forecast to perform roughly in line with the market;

Und = Underperform - Forecast to underperform the market;

(S) = speculative investment;

NR = No rating at this time;

R = Restricted – Dissemination of research is currently restricted.

Market performance is measured by a benchmark index such as the S&P/TSX Composite Index, S&P 500, Nasdaq Composite, as appropriate for each company. Prior to September 1, 2003, a fourth rating tier—Top Pick—was used to designate those stocks we felt would be the best performers relative to the market. Our six Top 15 lists which guide investors to our best ideas according to six different objectives (large, small, growth, value, income and quantitative) have replaced the Top Pick rating.

Dissemination of Research

Our research publications are available via our web site <http://bmocapitalmarkets.com>. Institutional clients may also receive our research via FIRST CALL Research Direct and Reuters. All of our research is made widely available at the same time to all BMO NB, BMO Capital Markets Ltd., BMO Capital Markets Corp. and BMO Nesbitt Burns Securities Ltd. client groups entitled to our research. Please contact your investment advisor or institutional salesperson for more information.

Conflict Statement

A general description of how BMO Financial Group identifies and manages conflicts of interest is contained in our public facing policy for managing conflicts of interest in connection with investment research which is available at http://equityresearch.bmogc.net/conflict_statement.asp

BCUC Approves LNG Storage Facility

Impact

Neutral

Details & Analysis

Terasen Gas (Vancouver Island) Inc. (TGVI, 100% Fortis Inc.) has announced that it has received final approval from the British Columbia Utilities Commission (BCUC) to build own and operate a \$200 million liquefied natural gas (LNG) storage facility. The LNG facility will allow TGVI to store natural gas supplied by pipelines owned by Terasen Gas Inc. (TGI, 100% Fortis Inc.) as LNG in the summer months for use during high demand periods in the winter. TGVI expects to spend \$50 million on the project during 2008 and construction is expected to commence later this month. The project, which is scheduled to be completed by late 2011, is fully reflected in our outlook.

This report was prepared by an Analyst employed by a Canadian affiliate, BMO Nesbitt Burns Inc., and who is not registered as a research analyst under FINRA rules. For disclosure statements, including the Analyst's Certification, please refer to pages 2 to 4.

Company Risk Disclosure

In addition to the risks involved in investing in common stocks generally, we also highlight the following risks that pertain to this company. Operations are subject to complex regulation by a variety of provincial, state and federal (Canada, Cayman Islands & Belize) agencies. Changes in regulation may adversely affect performance.

Financial performance depends on the availability of installed generation and the production of electric power by third parties. Fortis Properties' cash flow is dependent on hotel room vacancy rates and commercial building occupancy levels. The company's operations in Belize may be disrupted and assets may be damaged by hurricanes and/or tropical storms.

Ratings Key

We use the following ratings system definitions:

OP = Outperform - Forecast to outperform the market;

Mkt = Market Perform - Forecast to perform roughly in line with the market;

Und = Underperform - Forecast to underperform the market;

(S) = speculative investment;

NR = No rating at this time;

R = Restricted – Dissemination of research is currently restricted.

Market performance is measured by a benchmark index such as the S&P/TSX Composite Index, S&P 500, Nasdaq Composite, as appropriate for each company. Prior to September 1, 2003, a fourth rating tier—Top Pick—was used to designate those stocks we felt would be the best performers relative to the market. Our six Top 15 lists which guide investors to our best ideas according to six different objectives (large, small, growth, value, income and quantitative) have replaced the Top Pick rating.

Dissemination of Research

Our research publications are available via our web site <http://bmocapitalmarkets.com>. Institutional clients may also receive our research via FIRST CALL Research Direct and Reuters. All of our research is made widely available at the same time to all BMO NB, BMO Capital Markets Ltd., BMO Capital Markets Corp. and BMO Nesbitt Burns Securities Ltd. client groups entitled to our research. Please contact your investment advisor or institutional salesperson for more information.

Conflict Statement

A general description of how BMO Financial Group identifies and manages conflicts of interest is contained in our public facing policy for managing conflicts of interest in connection with investment research which is available at http://equityresearch.bmogc.net/conflict_statement.asp

Additional Matters

TO U.S. RESIDENTS: BMO Capital Markets Corp. and/or BMO Nesbitt Burns Securities Ltd., affiliates of BMO NB, furnish this report to U.S. residents and accept responsibility for the contents herein, except to the extent that it refers to securities of Bank of Montreal. Any U.S. person wishing to effect transactions in any security discussed herein should do so through BMO Capital Markets Corp. and/or BMO Nesbitt Burns Securities Ltd.

Meetings With Management; Outperform Rating Maintained

Event

On April 8, we met with Fortis' management team to discuss the company's operations and growth prospects. Key themes discussed during the meeting included: (1) Fortis' recent acquisitions and its outlook regarding future deals; (2) rate base growth and the financing of the company's capital program; and (3) the company's exposure to proposed environmental legislation.

Impact

Neutral.

Forecasts

Our financial forecasts are unchanged.

Valuation

Our target price of \$32.50 reflects a weighted valuation approach: 18x diluted 2009E EPS of \$1.53 (12.5%); 1.75x 2009E BVPS of \$18.44 (12.5%); and a target yield of 3.15% (75%), assuming 2009 dividends per share of \$1.04.

Recommendation

We believe the shares are attractively valued. Our rating is Outperform.

Details & Analysis

On April 8, we met with Fortis' management team to discuss the company's operations and growth prospects. Key themes discussed during the meeting included: (1) Fortis' recent acquisitions and its outlook regarding future deals; (2) rate base growth and the financing of the company's capital program; and (3) the company's exposure to proposed environmental legislation.

Management Reviewing Opportunities in the U.S.

Acquisitions are likely to continue to be a core part of Fortis' growth strategy, with a focus on acquiring regulated electric and gas transmission companies. During the meeting, management noted that future growth may involve the acquisition of U.S. utilities, as: (1) the number of potential acquisition targets in the U.S. is greater than in Canada; and (2) many of the remaining utilities in Canada are not of a sufficient size to meaningfully add EPS accretion.

Acquisitions Must Be Accretive and of a Meaningful Size to Increase Fortis' Scale and Scope

Although specific acquisition targets or regions of interest were not discussed, Fortis noted that it would consider acquiring assets that are a similar size to Terasen Inc.'s natural gas distribution business, the purchase of which Fortis completed on May 17, 2007 for consideration of \$3.7 billion, including the assumption of \$2.35 billion of debt. We believe Fortis acquired Terasen in order to gain experience operating regulated natural gas distribution utilities and to increase its presence in the Pacific Northwest.

We believe it is possible for Fortis to acquire the 46% of Caribbean Utilities that it does not own; or acquire Pacific Northern Gas ("PNG"; PNG-TSX), as PNG's regulated natural gas business could be seen to be complementary to Terasen's asset base. However, we believe Fortis will take a very patient approach in deciding whether to acquire either of these businesses. For example: (1) neither acquisition is likely to be materially accretive to Fortis' EPS; and (2) neither acquisition would materially expand the size and scope of Fortis' core regulated utility business.

We estimate that the acquisition of the remaining outstanding interest of Caribbean Utilities at a price of US\$12.00 per share (which is slightly below the closing price of US \$12.09/share on Friday, April 11, 2008) could be \$0.01-0.02 accretive to our 2009E Fortis EPS estimate. At higher prices, this acquisition becomes less accretive and we estimate that it would be neutral to our 2009E EPS estimate for Fortis at a price of US\$16.00/share.

We have performed a similar accretion estimate regarding the potential acquisition of Pacific Northern Gas, which closed at a price of approximately \$17.68 on Friday, April 11, 2009. We estimate that if Fortis acquired Pacific Northern Gas at a price of \$20.00 per share (which represents a premium of 13% to Friday's closing price), the transaction could add approximately \$0.02 to our 2009E Fortis EPS estimate.

Growth in Rate Base Expected to be Robust

Growth in Fortis' existing regulated utility business is expected to remain strong. Over the next four years, Fortis is planning to invest \$3 billion in its electric business and \$1 billion in its regulated gas distribution business. The company estimates that, absent an acquisition, it would likely need to issue \$300–400 million in new equity to finance this growth.

Our financial forecasts assume that Fortis issues \$260 million in equity at the end of 2008 to partially finance its capital plan.

Asset Mix Well-Suited to Benefit From More Stringent Environmental Regulations

Fortis' asset base consists primarily of natural gas distribution utilities, regulated electric utilities (primarily transmission and distribution), and unregulated hydroelectric generation. We believe Fortis is relatively well-positioned with respect to pending legislation associated with the Government of Canada's Greenhouse Gas Regulatory Framework, as the company has very little exposure to fossil fuel-fired power generation.

We believe Fortis may also benefit from renewable portfolio standards that mandate the construction of green power generation facilities, such as wind farms. In order to accommodate the large-scale deployment of intermittent green resources, transmission systems often need to be upgraded. As an operator of transmission systems, the deployment of additional green power generation facilities represents an opportunity for Fortis to add to its rate base through the reinforcement of transmission systems in the franchise and service areas in which it operates.

Estimates

Our financial forecasts are unchanged.

Valuation

Our target price of \$32.50 reflects a weighted valuation approach: 18x diluted 2009E EPS of \$1.53 (12.5%); 1.75x 2009E BVPS of \$18.44 (12.5%); and a target yield of 3.15% (75%), assuming 2009 dividends per share of \$1.04.

Recommendation

We believe the shares are attractively valued. Our rating is Outperform.

Company Risk Disclosure

In addition to the risks involved in investing in common stocks generally, we also highlight the following risks that pertain to this company. Operations are subject to complex regulation by a variety of provincial, state and federal (Canada, Cayman Islands & Belize) agencies. Changes in regulation may adversely affect performance.

Financial performance depends on the availability of installed generation and the production of electric power by third parties. Fortis Properties' cash flow is dependent on hotel room vacancy rates and commercial building occupancy levels. The company's operations in Belize may be disrupted and assets may be damaged by hurricanes and/or tropical storms.

Ratings Key

We use the following ratings system definitions:

OP = Outperform - Forecast to outperform the market;

Mkt = Market Perform - Forecast to perform roughly in line with the market;

Und = Underperform - Forecast to underperform the market;

(S) = speculative investment;

NR = No rating at this time;

R = Restricted – Dissemination of research is currently restricted.

Market performance is measured by a benchmark index such as the S&P/TSX Composite Index, S&P 500, Nasdaq Composite, as appropriate for each company. Prior to September 1, 2003, a fourth rating tier—Top Pick—was used to designate those stocks we felt would be the best performers relative to the market. Our six Top 15 lists which guide investors to our best ideas according to six different objectives (large, small, growth, value, income and quantitative) have replaced the Top Pick rating.

Dissemination of Research

Our research publications are available via our web site <http://bmocapitalmarkets.com>. Institutional clients may also receive our research via FIRST CALL Research Direct and Reuters. All of our research is made widely available at the same time to all BMO NB, BMO Capital Markets Ltd., BMO Capital Markets Corp. and BMO Nesbitt Burns Securities Ltd. client groups entitled to our research. Please contact your investment advisor or institutional salesperson for more information.

Conflict Statement

A general description of how BMO Financial Group identifies and manages conflicts of interest is contained in our public facing policy for managing conflicts of interest in connection with investment research which is available at http://equityresearch.bmogc.net/conflict_statement.asp

Q1/08 Slightly Above Expectations

Impact

Neutral

Details & Analysis

Fortis reported Q1/08 EPS of \$0.58. After adjusting for a regulatory decision at Newfoundland Power that resulted in a change in the method in which purchased power expenses are allocated during the year and reduced Q1/08 earnings by \$6 million (\$0.04/share), comparable EPS of \$0.62 exceeded our estimate of \$0.58. The difference is largely related to earnings at Terasen Gas, which were \$8.1 million (\$0.05/share) higher than expected, and may reflect the seasonality of the gas distribution business in British Columbia. The earnings release noted that the newly elected government of Belize repealed regulations enacted in December 2007 that previously settled matters relating to customer rates. We do not expect this matter to materially affect Fortis' financial results (we estimate that contributions from Belize Electricity represent approximately 4% of Fortis' consolidated earnings) and note that in April, Belize Electricity filed its Annual Tariff Review, which requested a 13.4% increase in electricity rates. Estimated capital expenditures of \$900 million for 2008 are consistent with our outlook. We continue to review the release.

This report was prepared by an Analyst employed by a Canadian affiliate, BMO Nesbitt Burns Inc., and who is not registered as a research analyst under FINRA rules. For disclosure statements, including the Analyst's Certification, please refer to pages 2 to 4.

Company Risk Disclosure

In addition to the risks involved in investing in common stocks generally, we also highlight the following risks that pertain to this company. Operations are subject to complex regulation by a variety of provincial, state and federal (Canada, Cayman Islands & Belize) agencies. Changes in regulation may adversely affect performance.

Financial performance depends on the availability of installed generation and the production of electric power by third parties. Fortis Properties' cash flow is dependent on hotel room vacancy rates and commercial building occupancy levels. The company's operations in Belize may be disrupted and assets may be damaged by hurricanes and/or tropical storms.

Research Comment
Corporate Debt – Utilities

Laurence Conheady
(416) 359-4584
laurence.conheady@bmo.com

Q1/08 Results: Contributions From Terasen Enable Fortis to Achieve Record Earnings

Event: Fortis Inc. (Fortis) released Q1/08 financial results.

Impact: Neutral.

Key Points: Contributions from Terasen Gas companies and an improved performance at Caribbean Utilities, offset partly by lower earnings from Newfoundland Power, enabled Fortis to achieve record Q1/08 earnings and marginally exceed expectations. Benefiting from seasonal high cash flows of Terasen, Fortis' consolidated FFO of \$186 million in Q1/08 were more than double those realized a year earlier. The higher cash flows improved Fortis' cash flow leverage ratio but it remains relatively weak relative to peers. Fortis' access to liquidity is adequate for its needs and leverage in Q1/08 was unchanged from year-end 2007 at 63%.

Credit and Spread Implications

Near Term: We do not expect Fortis' Q1/08 results to materially affect its spreads.

Medium Term: There is the potential for some volatility in Fortis' spreads relative to peers as it pursues further asset and business acquisitions, which may carry additional risk. If the volatility occurs, we believe it is likely to be temporary in nature, as Fortis has a demonstrated track record of managing its credit profile.

Recommendation

Fortis has only one Canadian dollar debt issue, a \$100 million debenture due 2010. Nevertheless, we view Fortis as a good buy and hold exposure. We believe the added diversity provided by the Terasen acquisition in 2007 has strengthened Fortis' credit profile and that its credit profile will continue to strengthen as further benefits of the acquisition are realized through integrating Terasen within the Fortis group. We view the conservative management of Fortis as very supportive of its credit quality, as well as that of its operating subsidiaries, especially those that rely on Fortis for ongoing financial and executive support.

Source: BMO Capital Markets

Relative Value

Sector Value: Along with other utilities, Fortis' 5-year indicative spreads have softened in the past few quarters; however, on a relative basis the spread widening has been greater for Fortis than for many of its peers. Compared to where Fortis' spreads were in relation to peers before the recent widening, they currently offer good value, especially when you consider that over this time the company's credit profile and ratings have strengthened.

Credit Curve: Fortis' single Canadian dollar debt issue limits the opportunity for investors to pursue relative value trades along the issuer's credit curve. The relatively illiquid nature of its paper is also a potential pricing consideration.

Details & Analysis

Earnings and Cash Flow

Contributions from Terasen Gas companies and an improved performance at Caribbean Utilities, offset partly by lower earnings from Newfoundland Power associated with a shift in the quarterly distribution of annual purchase power expense, enabled Fortis to achieve record first-quarter earnings. Net earnings applicable to common shares were 117% higher than those achieved in Q1/07. We note that the significant increase in earnings is amplified by the seasonality of Terasen's operations, which means it effectively realizes all its earnings in the first and fourth quarters of the year. Highlighting the contribution of its gas utilities, the Terasen Gas companies contributed 64% of Fortis' net earnings of \$91 million in Q1/08.

Summary of Earnings - Fortis Companies

Net Income	91	42	49

Source: Company Reports

On an earnings per share basis Fortis reported Q1/08 EPS of \$0.58. As per BMO Capital Markets equity research, after adjusting for a regulatory decision at Newfoundland Power that reduced Q1/08 earnings by \$6 million (\$0.04/share), comparable EPS of \$0.62 exceeded BMO Capital Markets equity research estimate of \$0.58. The difference is largely related to earnings at Terasen Gas, which were \$8.1 million (\$0.05/share) higher than expected, and may reflect the seasonality of the gas distribution business in British Columbia. For a more detailed review of Fortis' Q1/08 earnings results, refer to Michael McGowan's equity comment on Fortis published May 2, 2008.

Benefiting from the seasonal cash flows of Terasen Gas, Fortis' consolidated funds from operations (FFO) in Q1/08 of \$186 million were more than double the \$90 million realized in Q1/07. Despite the higher FFO, the company was unable to fund from internal cash flows its capital expenditure in the quarter (net of customer contributions) of \$153 million, and distributions of \$43 million. The result was negative free cash flow of \$10 million, with the small cash flow shortfall met through proceeds from the sale of capital assets of \$15 million.

Fortis' large capital expenditure program will dominate its capital outlays and financing activities for the next few years at least, with negative free cash flow expected to be the norm. In 2008, Fortis utilities are expected to undertake capital expenditure of \$900 million, and in the next five years, gross consolidated expenditure of more than \$4 billion is expected; \$3 billion of which is to be undertaken by its electric utilities and \$1 billion by its gas utilities.

As expected, the trend in Fortis' cash flow leverage ratio is one of improvement although it remains relatively weak. Reflecting increasing cash flow contributions from Terasen, unadjusted FFO-to-total debt on a rolling 12-months basis to the end of Q1/08 was 11%, up from single-digit levels throughout 2007. Despite the improvement, we expect the ratio to remain on the low side for some time as the company continues to partially debt finance expansion of its electricity network asset bases with a delay in receipt of regulated cash flows from the assets constructed. FFO gross interest coverage was 2.7x for the 12 months to March 31, 2008, relatively unchanged from year-end 2007.

Recent Developments

Recent developments with respect to Fortis have generally involved regulatory developments at its operating subsidiaries. The developments are not expected to have a material positive or negative effect on the company's credit profile. The major developments include:

- On April 1, 2008, Terasen Gas (Vancouver Island) Inc. received final regulatory approval for the construction of a liquefied natural gas facility on Vancouver Island. Total estimated cost of the project is approximately \$200 million;
- In February 2008, FortisAlberta received regulatory approval for its negotiated agreement associated with its 2008/2009 revenue requirements. The decision will result in distribution rate increases of 6.8% effective January 1, 2008, and 7.3% effective January 1, 2009;
- In February 2008, FortisAlberta's regulator, the Alberta Utilities Commission, initiated a proceeding to address whether its cost of capital adjustment formula continues to yield a fair return on equity and whether capital structures for all applicable utilities in Alberta should be addressed on a generic basis; and
- In April 2008, a new exclusive 20-year T&D licence and a new 21.5-year non-exclusive generation licence were granted to Caribbean Utilities.

Capital Structure and Liquidity

Fortis's consolidated debt varied little in Q1/08 with outstanding debt of \$5.5 billion largely unchanged from year-end 2007. Debt repayments of \$249 million in the quarter, the bulk of which were associated with repayments under committed credit facilities, were offset by proceeds from debt issues of \$250 million. The vast majority of Fortis' consolidated debt, about 95%, continues to reside at the company's various subsidiaries. Debt at the holding company level comprises:

- a \$100 million of senior unsecured debentures maturing 2010
- US\$150 million senior unsecured notes maturing 2014
- US\$200 million senior unsecured notes maturing 2037
- US\$50 million of outstanding unsecured subordinated convertible debentures due between 2012 and 2016 (US\$60 million initially issued)

Leverage, as measured by total debt-to-total capital and treating the company's preference shares as equity, is slightly above the company's target level of 60%. At the end of Q1/08, leverage was 63%, down a percentage point from 64% at year-end 2007.

On a consolidated basis Fortis' liquidity remains adequate for its operational, capital requirement and refinancing needs. At the end of Q1/08, the company has \$1.33 billion of available capacity under its \$2.24 billion of credit facilities after drawdowns and outstanding letters of credit. The available capacity was \$261 million more than at year-end 2007. In addition, the company had cash and cash equivalents of \$67 million, up from \$58 million at December 31, 2007.

Maturing debt commitments and amortizing debt repayments are manageable, with the company facing maturing debt of \$188 million at Terasen Gas in June 2008, and a \$200 million maturing debt issue at Terasen Inc. in December 2008 that is expected to be repaid on maturity. In the most recent quarter, Terasen Gas (Vancouver Island) Inc. undertook a \$250 million MTN debt issue.

Subsequent to quarter-end, Maritime Electric and FortisAlberta undertook issues of \$60 million and \$100 million, respectively.

Credit Ratings

The corporate credit and senior unsecured debt issue ratings on Fortis remained Stable. The stability of the ratings reflects in part an improvement in its credit quality after its acquisition of Terasen Inc. and its subsidiaries in May 2007.

The last rating action on Fortis by **Standard & Poor's** was the upgrade of its corporate credit and senior unsecured debt ratings one and two notches, respectively on June 19, 2007. At the time the agency advised that the basis for the rating upgrade was the improved diversity resulting from the acquisition of Terasen Inc., the operation of each regulated subsidiary as a separate stand-alone entity with debt non-recourse to Fortis, a commitment to maintaining low levels of debt at the Fortis holding company level, management's continuing focus on pursuing acquisitions in stable, regulated utilities; and the success of key subsidiaries FortisBC and FortisAlberta in executing their capital expansions.

DBRS last confirmed its ratings on Fortis on November 30, 2007 based on its strong credit metrics and low business risk profile driven by its diverse ownership of regulated operating subsidiaries. DBRS viewed the acquisition of Terasen as neutral to slightly positive to the credit profile of Fortis with the improvement in its business risk profile attributable to the stable cash flow and earnings of the established, mature regulated gas utilities, as well as increased diversification the acquisition provides. The agency advises that Fortis' consolidated coverage metrics may be modestly affected by the accelerated capital expenditures of a number of its utility subsidiaries, as earnings and cash flows do not begin until projects are completed and rolled into the rate base of utilities.

Recommendation

Fortis has only one Canadian dollar debt issue, a \$100 million debenture due 2010. Nevertheless, we view Fortis as a good buy and hold exposure. We believe the added diversity provided by the Terasen acquisition in 2007 has strengthened Fortis' credit profile and that its credit profile will continue to strengthen as further benefits of the acquisition are realized through integrating Terasen within the Fortis group. Moreover, we view the conservative management of Fortis as very supportive of its credit quality, as well as that of its operating subsidiaries, especially those that rely on Fortis for ongoing financial and executive support.

Fortis Inc.

Q1/08 Slightly Above Expectations; Outperform Rating Maintained

Event

Fortis reported Q1/08 EPS of \$0.58. Comparable EPS of \$0.62 exceeded our estimate of \$0.58 after adjusting for a regulatory decision at Newfoundland Power. The decision resulted in a change in the way purchased power expenses are allocated during the year and reduced Q1/08 earnings by \$6 million (\$0.04/share). The difference is largely related to earnings at Terasen Gas, which were \$8.1 million (\$0.05/share) higher than expected. We have stated Q1/08 EPS as \$0.58, inclusive of the regulatory accounting adjustment at Newfoundland Power.

Impact

Neutral.

Forecasts

We have updated our estimates to reflect slightly better-than-expected performance at Terasen Gas. In addition, we have updated our quarterly estimates to reflect the revised accounting for purchased electricity at Newfoundland Power. Our diluted EPS estimates increase to \$1.53 from \$1.51 in 2008 and to \$1.55 from \$1.53 in 2009.

Valuation

Our target price of \$32.50 reflects a weighted valuation approach: 18x diluted 2009E EPS of \$1.55 (12.5%); 1.75x 2009E BVPS of \$18.63 (12.5%); and a target yield of 3.15% (75%) applied to our 2009E dividend per share estimate of \$1.04.

Recommendation

We believe the shares are attractively valued, considering Fortis' large organic growth pipeline and low-risk business model that focuses on the acquisition and operation of regulated electric and gas utilities. Our rating is Outperform.

Details & Analysis

Fortis reported Q1/08 EPS of \$0.58. Comparable EPS of \$0.62 exceeded our estimate of \$0.58 after adjusting for a regulatory decision at Newfoundland Power. The decision resulted in a change in the way purchased power expenses are allocated during the year and reduced Q1/08 earnings by \$6 million (\$0.04/share). The difference is largely related to earnings at Terasen Gas, which were \$8.1 million (\$0.05/share) higher than expected. We have stated Q1/08 EPS as \$0.58, inclusive of the regulatory accounting adjustment at Newfoundland Power.

Operating Results Generally Consistent With Expectations

The operating performance of Fortis' business segments was generally in line with our expectations. Notable variances from our estimates include:

- The earnings contribution from Terasen Gas of \$58 million, which was \$8.1 million higher than our estimate of \$49.9 million. We believe the variance between annual and expected results is partially explained by the seasonality of the gas distribution business in British Columbia. Actual results were consistent with management's expectations.
- The earnings contribution from Newfoundland Power of \$6 million, which was \$5.5 million lower than our estimate of \$11 million. The difference between actual and estimated results was primarily due to the regulatory decision that modified the way purchased power expenses are allocated between quarters. This decision reduced earnings at Newfoundland power by \$6 million in Q1/08.

Pursuant to the decision, Newfoundland Power will now account for purchased power at cost whereas under the previous accounting treatment, purchased power expense was based on an estimated annual rate. The \$6 million reduction in earnings experienced by Newfoundland Power in Q1/08 is expected to reverse in the second and third quarters.

- The earnings contribution from the power generation segment, which was \$6 million vs. our estimate of \$8.9 million. The variance between expected and actual results was caused by lower-than-expected realized power prices at Ontario (\$49.93/MWh vs. our estimate of \$60.00/MWh) and below average hydrology in Belize, which negatively affected power generation.
- Corporate expenses of \$16 million, which were approximately \$2 million lower than our expectations.

Growth Profile Remains Consistent With Our Outlook

Growth in Fortis' existing regulated utility business is expected to remain strong. Over the next four years, Fortis plans to invest \$3 billion in its electric businesses and \$1 billion in its regulated gas distribution businesses.

Near-Term Rate Proceedings at Belize Electricity Limited May be Contentious

The earnings release noted two developments at Belize Electricity Limited (BEL; 70.1% Fortis Inc.) that may increase the near-term regulatory risk at this business segment. First, the newly elected government of Belize repealed amendments to the *Electricity (Tariffs, Charges and Quality of Services Standards) Byelaws* that became effective in December 2007. These amendments resolved concerns that BEL had regarding a rate decision released on June 26, 2007 which disallowed certain electricity costs paid to the Comision Federal de Electricidad.

It is our understanding that pursuant to current electricity bylaws in Belize, fuel costs in excess of approved rates are collected in a deferral account (referred to as the Cost of Power Rate Stabilization Account “CPRSA”). We also understand that BEL is entitled to file an application for a rate increase when balances in the deferral account increase by more than BZ\$3 million above the deferral balances approved in the most recent review proceeding.

In March 2008, BEL made such an application to the Belize Public Utilities Commission (“PUC”), as amounts accrued in the CPRSA had grown by \$6.65 million from July 1, 2008 – June 30, 2009. The PUC denied the request on the grounds that in the interim, the BEL could decrease its operating expenses and capital expenditures to offset the impact on cash flow.

On April 2, 2008, BEL filed its annual tariff application, which will be used to set rates for the period July 1, 2008 – June 30, 2009. BEL’s application requests a 13.5% increase in rates, including the recovery of balances included in the CPRSA. Per our review of the rate filing, the CPRSA balance was BZ\$24.5 million (US\$12.5 million) at the end of February 2008. The current rate filing includes a request to recover deferred fuel costs through a surcharge of BZ 4.5 cents per kWh. An initial decision on the BEL’s 2008/2009 rate filing is expected on May 2, 2008, with a final decision to be issued by June 26, 2008.

Although we believe that the rate-setting process at BEL may be contentious in the short term, we do not expect that rate proceedings at BEL will have a material impact on Fortis’ consolidated results. We estimate that the earnings contribution from BEL represents approximately 4% of Fortis’ consolidated earnings.

Estimates

We have updated our estimates to reflect slightly better-than-expected performance at Terasen Gas. In addition, we have updated our quarterly estimates to reflect the revised accounting for purchased electricity at Newfoundland Power. Our diluted EPS estimates increase to \$1.53 from \$1.51 in 2008 and to \$1.55 from \$1.53 in 2009

Valuation

Our target price of \$32.50 reflects a weighted valuation approach: 18x diluted 2009E EPS of \$1.55 (12.5%); 1.75x 2009E BVPS of \$18.63; and a target yield of 3.15% (75%) applied to our 2009E dividend per share estimate of \$1.04.

Recommendation

We believe the shares are attractively valued, considering Fortis' large organic growth pipeline and low-risk business model that focuses on the acquisition and operation of regulated electric and gas utilities. Our rating is Outperform.

Company Risk Disclosure

In addition to the risks involved in investing in common stocks generally, we also highlight the following risks that pertain to this company. Operations are subject to complex regulation by a variety of provincial, state and federal (Canada, Cayman Islands & Belize) agencies. Changes in regulation may adversely affect performance.

Financial performance depends on the availability of installed generation and the production of electric power by third parties. Fortis Properties' cash flow is dependent on hotel room vacancy rates and commercial building occupancy levels. The company's operations in Belize may be disrupted and assets may be damaged by hurricanes and/or tropical storms.

Analyst's Certification

I, Michael McGowan, CA, CFA, hereby certify that the views expressed in this report accurately reflect my personal views about the subject securities or issuers. I also certify that no part of my compensation was, is, or will be, directly or indirectly, related to the specific recommendations or views expressed in this report.

General Disclosure

The information and opinions in this report were prepared by BMO Nesbitt Burns Inc. and BMO Nesbitt Burns Ltée./Ltd., collectively ("BMO NB"). BMO NB is not subject to U.S. rules with regard to the preparation of research reports and the independence of analysts. "BMO Capital Markets" is a trade name used by the BMO Investment Banking Group, which includes the wholesale arm of Bank of Montreal and its subsidiaries BMO NB in Canada, BMO Capital Markets Ltd. in the U.K. and BMO Capital Markets Corp. in the U.S. BMO Capital Markets Ltd. and BMO Capital Markets Corp. are affiliates of BMO NB. Bank of Montreal or its subsidiaries ("BMO Financial Group") has lending arrangements with, or provide other remunerated services to, many issuers covered by BMO NB research. A significant lending relationship may exist between BMO Financial Group and certain of the issuers mentioned herein. The opinions, estimates and projections contained in this report are those of BMO NB as of the date of this report and are subject to change without notice. BMO NB endeavours to ensure that the contents have been compiled or derived from sources that we believe are reliable and contain information and opinions that are accurate and complete. However, BMO NB makes no representation or warranty, express or implied, in respect thereof, takes no responsibility for any errors and omissions contained herein and accepts no liability whatsoever for any loss arising from any use of, or reliance on, this report or its contents. Information may be available to BMO NB or its affiliates that is not reflected in this report. The information in this report is not intended to be used as the primary basis of investment decisions, and because of individual client objectives, should not be construed as advice designed to meet the particular investment needs of any investor. This material is for information purposes only and is not an offer to sell or the solicitation of an offer to buy any security. The research analyst and/or associates who prepared this report are compensated based upon (among other factors) the overall profitability of BMO NB and its affiliates, which includes the overall profitability of investment banking services. BMO NB, or its affiliates expect to receive or will seek compensation for investment banking services within the next 3 months from all issuers covered by BMO NB. BMO NB or its affiliates will buy from or sell to customers the securities of issuers mentioned in this report on a principal basis. BMO NB or its affiliates, officers, directors or employees may have a long or short position in the securities discussed herein, related securities or in options, futures or other derivative instruments based thereon. The reader should assume that BMO NB, BMO Capital Markets Ltd., BMO Capital Markets Corp., Bank of Montreal or their affiliates may have a conflict of interest and should not rely solely on this report in evaluating whether or not to buy or sell securities of issuers discussed herein.

Company Specific Disclosure

Disclosure 9: BMO Capital Markets Corp. or an affiliate received compensation for products or services other than investment banking services within the past 12 months.

Disclosure 10: This issuer is a client (or was a client) of BMO NB, BMO Capital Markets Corp. or an affiliate within the past 12 months: Non-Securities Related Services.

Distribution of Ratings

Rating Category	BMO Rating	BMO Universe	BMO I.B. Clients*	First Call Universe**
Buy	Outperform	42%	47%	49%
Hold	Market Perform	50%	49%	46%
Sell	Underperform	8%	4%	5%

* Reflects rating distribution of all companies where BMO Capital Markets has received compensation for Investment Banking services.

** Reflects rating distribution of all North American equity research analysts.

Ratings Key

We use the following ratings system definitions:

OP = Outperform - Forecast to outperform the market;

Mkt = Market Perform - Forecast to perform roughly in line with the market;

Und = Underperform - Forecast to underperform the market;

(S) = speculative investment;

NR = No rating at this time;

R = Restricted – Dissemination of research is currently restricted.

Market performance is measured by a benchmark index such as the S&P/TSX Composite Index, S&P 500, Nasdaq Composite, as appropriate for each company. Prior to September 1, 2003, a fourth rating tier—Top Pick—was used to designate those stocks we felt would be the best performers relative to the market. Our six Top 15 lists which guide investors to our best ideas according to six different objectives (large, small, growth, value, income and quantitative) have replaced the Top Pick rating.

Dissemination of Research

Our research publications are available via our web site <http://bmocapitalmarkets.com>. Institutional clients may also receive our research via FIRST CALL Research Direct and Reuters. All of our research is made widely available at the same time to all BMO NB, BMO Capital Markets Ltd., BMO Capital Markets Corp. and BMO Nesbitt Burns Securities Ltd. client groups entitled to our research. Please contact your investment advisor or institutional salesperson for more information.

Conflict Statement

A general description of how BMO Financial Group identifies and manages conflicts of interest is contained in our public facing policy for managing conflicts of interest in connection with investment research which is available at http://equityresearch.bmogc.net/conflict_statement.asp

Additional Matters

TO U.S. RESIDENTS: BMO Capital Markets Corp. and/or BMO Nesbitt Burns Securities Ltd., affiliates of BMO NB, furnish this report to U.S. residents and accept responsibility for the contents herein, except to the extent that it refers to securities of Bank of Montreal. Belize PUC Releases Rate Decision

Impact

Potentially Negative

Details & Analysis

On May 2 the Belize Public Utilities Commission (PUC) released its initial decision for Belize Electricity Limited's (BEL, 70.1% Fortis) annual tariff application, which was filed on April 2. BEL's application requested that average electricity rates be increased by 13.4% (to \$0.50/kWh from \$0.441/kWh) largely in order to mitigate the effect that rising commodity prices have had on purchased power expenses, and recover BZ\$24.5 million (U.S. \$12.3 million) in purchased power costs that have been deferred. The PUC's decision effectively denied BEL's request by: (1) approving an average cost of power of \$0.441/kWh (which is identical to the current rate); (2) reducing the balance in the purchased power deferral account by an unspecified amount; and (3) modifying BEL's rate structure in a manner that appears to allow for an increase in the recovery of purchased power expenses and a decrease in other costs of service such as depreciation expense and the regulated return on BEL's assets. We will follow up with management to discuss: (1) its strategy to collect unrecovered costs related to prior purchased power amounts; (2) its response to the PUC's decision; and (3) the impact, if any, on its hydroelectric generation facilities located in Belize.

NR = No rating at this time;

R = Restricted – Dissemination of research is currently restricted.

Market performance is measured by a benchmark index such as the S&P/TSX Composite Index, S&P 500, Nasdaq Composite, as appropriate for each company. Prior to September 1, 2003, a fourth rating tier—Top Pick—was used to designate those stocks we felt would be the best performers relative to the market. Our six Top 15 lists which guide investors to our best ideas according to six different objectives (large, small, growth, value, income and quantitative) have replaced the Top Pick rating.

Dissemination of Research

Our research publications are available via our web site <http://bmocapitalmarkets.com>. Institutional clients may also receive our research via FIRST CALL Research Direct and Reuters. All of our research is made widely available at the same time to all BMO NB, BMO Capital Markets Ltd., BMO Capital Markets Corp. and BMO Nesbitt Burns Securities Ltd. client groups entitled to our research. Please contact your investment advisor or institutional salesperson for more information.

Conflict Statement

A general description of how BMO Financial Group identifies and manages conflicts of interest is contained in our public facing policy for managing conflicts of interest in connection with investment research which is available at http://equityresearch.bmogc.net/conflict_statement.asp

Additional Matters

TO U.S. RESIDENTS: BMO Capital Markets Corp. and/or BMO Nesbitt Burns Securities Ltd., affiliates of BMO NB, furnish this report to U.S. residents and accept responsibility for the contents herein, except to the extent that it refers to securities of Bank of Montreal. Any U.S. person wishing to effect transactions in any security discussed herein should do so through BMO Capital Markets Corp. and/or BMO Nesbitt Burns Securities Ltd.

TO U.K. RESIDENTS: In the UK this document is published by BMO Capital Markets Limited which is authorised and regulated by the Financial Services Authority. The contents hereof are intended solely for the use of, and may only be issued or passed on to, (I) persons who have professional experience in matters relating to investments falling within Article 19(5) of the Financial Services and Markets Act 2000 (Financial Promotion) Order 2005 (the "Order") or (II) high net worth entities falling within Article 49(2)(a) to (d) of the Order (all such persons together referred to as "relevant persons"). The contents hereof are not intended for the use of and may not be issued or passed on to, retail clients.

BMO Nesbitt Burns Inc. and BMO Nesbitt Burns Ltée/Ltd. are Members of CIPF. BMO Capital Markets Corp. and BMO Nesbitt Burns Securities Ltd. are Members of SIPC.

Updating Outlook to Reflect Rate Proceedings in Belize; Outperform Rating Maintained

Event

On May 2 the Belize Public Utilities Commission (PUC) released its initial decision for Belize Electricity Limited's (BEL, 70.1% Fortis) annual tariff application, which was filed on April 2. BEL's application requested that average electricity rates be increased by 13.4% (to BZ\$0.50/kWh from BZ\$0.441/kWh) largely in order to mitigate the effect that rising commodity prices have had on purchased power expenses, and recover BZ\$24.5 million (U.S. \$12.3 million) in purchased power costs that have been deferred. The PUC's decision effectively denied BEL's request by approving an average cost of power of BZ\$0.441/kWh (which is identical to the current rate).

Impact

Slightly Negative. Although earnings from BEL represent only 4% of Fortis' consolidated earnings, we believe the rate proceedings at BEL may increase near-term regulatory risk. We do not expect the rate proceedings at BEL to affect earnings from Fortis' Belizean hydroelectric facilities.

Forecasts

Our financial forecasts are unchanged.

Valuation

Our revised target price of \$31.50 reflects a weighted valuation approach: 18x diluted 2009E EPS of \$1.55 (12.5%); 1.75x 2009E BVPS of \$18.44 (12.5%); and a target yield of 3.25% (75%), assuming 2009 dividends per share of \$1.04.

Recommendation

We believe the shares are attractively valued, considering Fortis' large organic growth pipeline and relatively low-risk business model that focuses on the acquisition and operation of regulated electric and gas utilities. Our rating is Outperform.

Details & Analysis

On May 2 the Belize Public Utilities Commission (PUC) released its initial decision for Belize Electricity Limited's (BEL, 70.1% Fortis) annual tariff application, which was filed on April 2. BEL's application requested that average electricity rates be increased by 13.4% (to BZ\$0.50/kWh from BZ\$0.441/kWh) largely in order to mitigate the effect that rising commodity prices have had on purchased power expenses, and recover BZ\$24.5 million (U.S. \$12.3 million) in purchased power costs that have been deferred. The PUC's decision effectively denied BEL's request by approving an average cost of power of BZ\$0.441/kWh (which is identical to the current rate).

Other notable aspects from the PUC's initial decision include:

- Reducing the balance in purchased power deferral account (referred to as the Cost of Power Rate Stabilization Account "CPRSA") by an amount that was unspecified in the initial decision. Reports in the Belizean press have indicated that the PUC may have reduced the beginning balance in the CPRSA from BZ\$18.9 million (US\$9.4 million) to approximately BZ\$0.7 million (US \$0.35 million).
- Disallowing the inclusion of fuel deferrals for January, February and March into the CPRSA. We believe approximately BZ\$6 million (US\$3 million) of fuel costs were deferred during January and February of 2008. Actual deferred fuel costs for March were not disclosed.
- Modifying BEL's rate structure in a manner that appears to allow for an increase in the recovery of purchased power expenses and a decrease in other costs of service such as depreciation expense and the regulated return on BEL's assets. A comparison of the rate increase requested by BEL and the preliminary rates approved by the regulator are set out in Table 1.

Table 1: Requested Rate Increase vs. Preliminary Decision (BZ cents per kWh)

	Current Rate	BEL Requested	PUC Approved	Approved vs. Requested	Approved vs. Current Rate
Reference Cost of Power	\$0.253	\$0.287	\$0.307	\$0.020	\$0.054
Value Added Delivery	\$0.168	\$0.168	\$0.130	(\$0.038)	(\$0.038)
Rate Stabilization Recovery	\$0.020	\$0.045	\$0.004	(\$0.041)	(\$0.016)
Total	\$0.441	\$0.500	\$0.441	(\$0.059)	\$0.000

Source: Belize Public Utilities Commission, Company Reports, BMO Capital Markets

The PUC's decision appears to allow BEL to recover higher fuel costs in rates (which would reduce the need for fuel deferrals), while effectively reducing Fortis's allowed rate of return. Comments made by the Chairman of the Belize PUC indicate that the PUC may be seeking to reduce BEL's regulated return on assets to 8.5% from the current allowed range of 10 -15%.

It is our understanding that BEL will file an objection to the PUC's initial decision and the PUC will now appoint an independent expert to review BEL's application and the PUC's decision. We understand that the expert's report is due on June 11 and the PUC will release its final rate decision on June 26.

In a research comment published on May 2, we noted that although the rate-setting process at BEL may be contentious in the short term, we do not expect that rate proceedings at BEL to have a material effect on Fortis' consolidated results.

We estimate that BEL represents approximately 4% of Fortis' consolidated earnings and do not expect that the rate proceedings between BEL and the PUC to affect the financial results from Fortis' Belizean hydroelectric facilities.

Estimates

Our financial forecasts are unchanged.

Valuation

Our revised target price of \$31.50 reflects a weighted valuation approach: 18x diluted 2009E EPS of \$1.55 (12.5%); 1.75x 2009E BVPS of \$18.44 (12.5%); and a target yield of 3.25% (75%), assuming 2009 dividends per share of \$1.04.

We have increased our target yield to 3.25% from 3.15% to reflect slightly higher regulatory risk at Belize Electricity Limited.

Recommendation

We believe the shares are attractively valued, considering Fortis' large organic growth pipeline and relatively low-risk business model that focuses on the acquisition and operation of regulated electric and gas utilities. Our rating is Outperform.

Company Risk Disclosure

In addition to the risks involved in investing in common stocks generally, we also highlight the following risks that pertain to this company. Operations are subject to complex regulation by a variety of provincial, state and federal (Canada, Cayman Islands & Belize) agencies. Changes in regulation may adversely affect performance.

Financial performance depends on the availability of installed generation and the production of electric power by third parties. Fortis Properties' cash flow is dependent on hotel room vacancy rates and commercial building occupancy levels. The company's operations in Belize may be disrupted and assets may be damaged by hurricanes and/or tropical storms.

Analyst's Certification

I, Michael McGowan, CA, CFA, hereby certify that the views expressed in this report accurately reflect my personal views about the subject securities or issuers. I also certify that no part of my compensation was, is, or will be, directly or indirectly, related to the specific recommendations or views expressed in this report.

General Disclosure

The information and opinions in this report were prepared by BMO Nesbitt Burns Inc. and BMO Nesbitt Burns Ltée./Ltd., collectively ("BMO NB"). BMO NB is not subject to U.S. rules with regard to the preparation of research reports and the independence of analysts. Ratings Key

We use the following ratings system definitions:

OP = Outperform - Forecast to outperform the market;

Mkt = Market Perform - Forecast to perform roughly in line with the market;

Und = Underperform - Forecast to underperform the market;

(S) = speculative investment;

NR = No rating at this time;

R = Restricted – Dissemination of research is currently restricted.

Market performance is measured by a benchmark index such as the S&P/TSX Composite Index, S&P 500, Nasdaq Composite, as appropriate for each company. Prior to September 1, 2003, a fourth rating tier—Top Pick—was used to designate those stocks we felt would be the best performers relative to the market. Our six Top 15 lists which guide investors to our best ideas according to six different objectives (large, small, growth, value, income and quantitative) have replaced the Top Pick rating.

Dissemination of Research

Company Description – Fortis is a publicly listed holding company with four key businesses: electric utility operations, regulated natural gas distribution, non-regulated electric power generation and non-utility property activities. Electric power operations include: Newfoundland Power (100%, Newfoundland), Maritime Electric (100%, PEI), Fortis Ontario (100%, Fort Erie, Ontario), Belize Electricity (70.1%, Belize), Caribbean Utilities (54%, Grand Cayman Island), Turks and Caicos (100%, Turks and Caicos),

FortisAlberta (100%, Alberta) and FortisBC (100%, British Columbia). *Website: fortisinc.com*

Recent Results – Fortis reported Q1/08 EPS of \$0.58. Comparable EPS of \$0.62 exceeded our estimate of \$0.58 after adjusting for a regulatory decision at Newfoundland Power. The decision resulted in a change in the way purchased power expenses are allocated during the year and reduced Q1/08 earnings by \$6 million (\$0.04/share). The remaining difference between actual and expected results

was largely related to earnings at Terasen Gas, which were \$8.1 million (\$0.05/share) higher than expected. We have stated Q1/08 EPS as \$0.58, inclusive of the regulatory accounting adjustment at Newfoundland Power.

Corporate Developments – On May 2, the Belize Public Utilities Commission (PUC) released its initial decision for Belize Electricity Limited's (BEL, 70.1% Fortis) annual tariff application, which was filed on April 2. The PUC effectively denied BEL's request to increase average electricity rates by 13.4%, or \$0.50/kWh, and recover BZ\$24.5 million (U.S. \$12.3 million) in deferred purchased power costs by: (1) approving the current average cost of power of \$0.441/kWh; (2) reducing the balance in the purchased power deferral account by an unspecified amount; and (3) modifying BEL's rate structure in a manner that appears to allow for an increase in the recovery of purchased power expenses and a decrease in other costs of

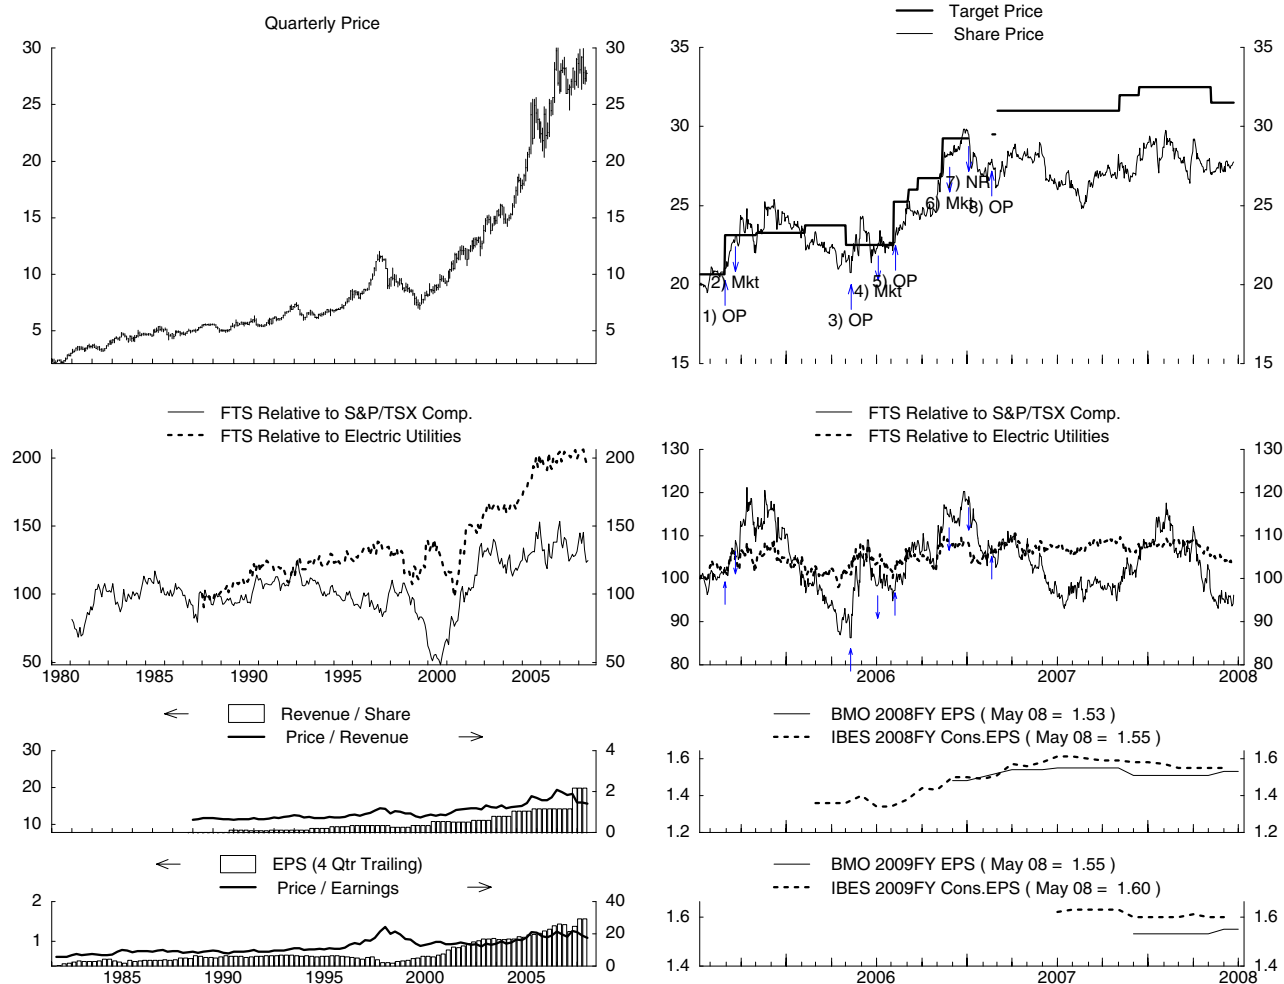

service such as depreciation expense and the regulated return on BEL's assets. A final decision is expected on June 26.

Forecasts – Our diluted EPS estimates are \$1.53 in 2008 and \$1.55 in 2009.

Valuation – Our target price of \$31.50 reflects a weighted valuation approach: 18x diluted 2009E EPS of \$1.55 (12.5%), 1.75x 2009E BVPS of \$18.63 (12.5%) and a target yield of 3.25% (75%) applied to our 2009E dividend per share estimate of \$1.04.

Recommendation – We believe the shares are attractively valued, considering Fortis' large organic growth pipeline and relatively low-risk business model that focuses on the acquisition and operation of regulated electric and gas utilities. Our rating is Outperform. Member of Top 15 Income and Value stock selections.

Company Risk Disclosure

In addition to the risks involved in investing in common stocks generally, we also highlight the following risks that pertain to this company. Operations are subject to complex regulation by a variety of provincial, state and federal (Canada, Cayman Islands & Belize) agencies. Changes in regulation may adversely affect performance.

Financial performance depends on the availability of installed generation and the production of electric power by third parties. Fortis Properties' cash flow is dependent on hotel room vacancy rates and commercial building occupancy levels. The company's operations in Belize may be disrupted and assets may be damaged by hurricanes and/or tropical storms.

Analyst's Certification

I, Michael McGowan, CA, CFA, hereby certify that the views expressed in this report accurately reflect my personal views about the subject securities or issuers. I also certify that no part of my compensation was, is, or will be, directly or indirectly, related to the specific recommendations or views expressed in this report.

General Disclosure

The information and opinions in this report were prepared by BMO Nesbitt Burns Inc. and BMO Nesbitt Burns Ltée./Ltd., collectively ("BMO NB"). Ratings Key

We use the following ratings system definitions:

OP = Outperform - Forecast to outperform the market;

Mkt = Market Perform - Forecast to perform roughly in line with the market;

Und = Underperform - Forecast to underperform the market;

(S) = speculative investment;

NR = No rating at this time;

R = Restricted – Dissemination of research is currently restricted.

Market performance is measured by a benchmark index such as the S&P/TSX Composite Index, S&P 500, Nasdaq Composite, as appropriate for each company. Prior to September 1, 2003, a fourth rating tier—Top Pick—was used to designate those stocks we felt would be the best performers relative to the market. Our six Top 15 lists which guide investors to our best ideas according to six different objectives (large, small, growth, value, income and quantitative) have replaced the Top Pick rating.

Dissemination of Research

Our research publications are available via our web site <http://bmocapitalmarkets.com>. Institutional clients may also receive our research via FIRST CALL Research Direct and Reuters. All of our research is made widely available at the same time to all BMO NB, BMO Capital Markets Ltd., BMO Capital Markets Corp. and BMO Nesbitt Burns Securities Ltd. client groups entitled to our research. Please contact your investment advisor or institutional salesperson for more information.

Conflict Statement

A general description of how BMO Financial Group identifies and manages conflicts of interest is contained in our public facing policy for managing conflicts of interest in connection with investment research which is available at http://equityresearch.bmogc.net/conflict_statement.asp

Final Decision on Belize Rates Announced

Impact

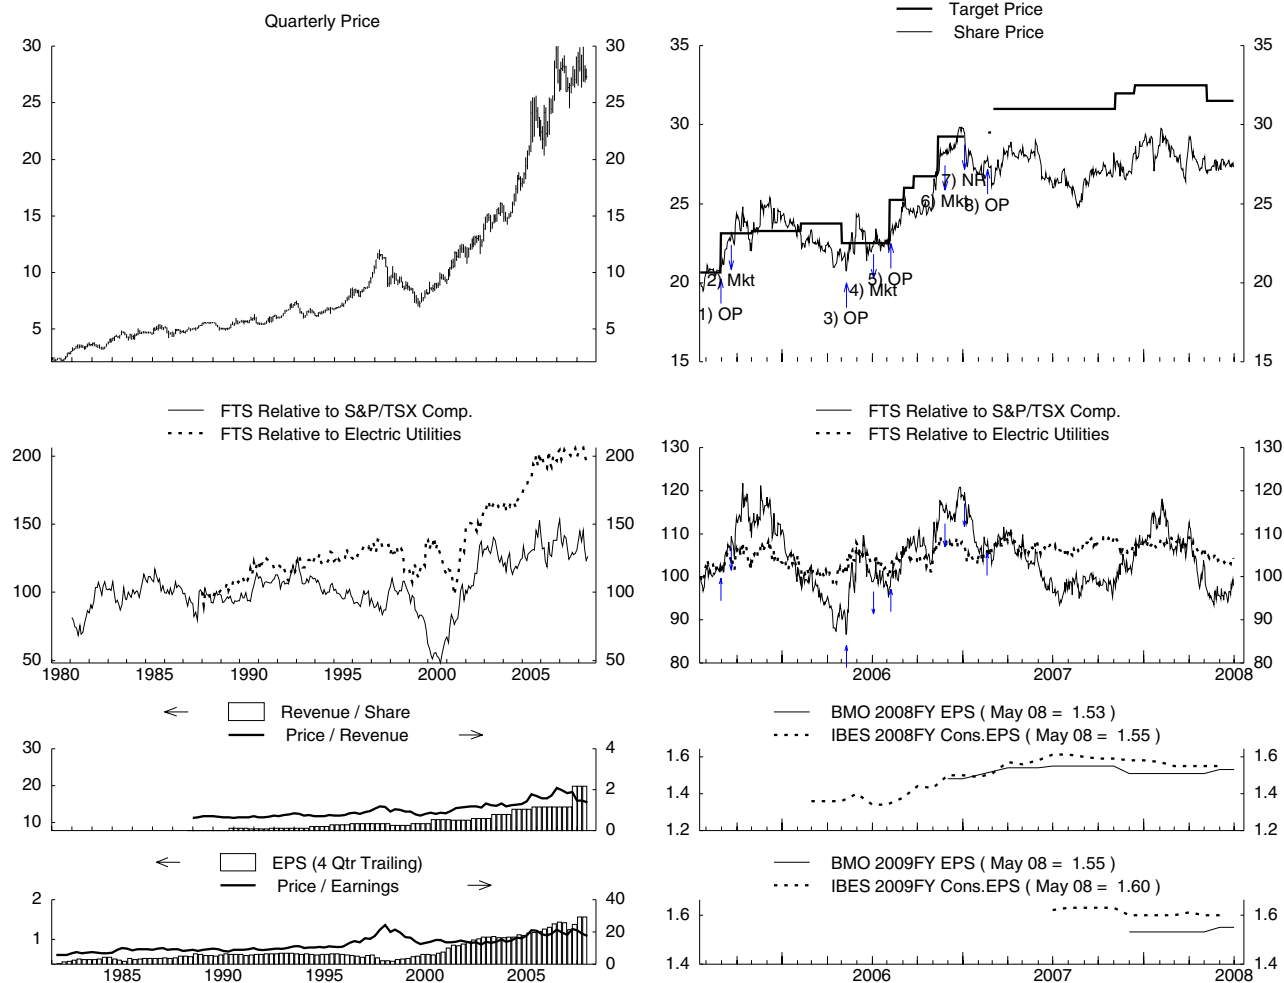

Negative

Details & Analysis

On June 27, the Belize Public Utilities Commission (PUC) released its final decision for Belize Electricity Limited's (BEL, 70.1% Fortis) annual tariff application, which was filed on April 2. The PUC's final decision is largely consistent with the preliminary decision issued on May 2. Specifically, the PUC's final decision appears to: (1) maintain current electricity rates at BZ\$0.441/kWh; (2) disallow BZ\$36 million (C\$12.6 million of which is Fortis' share) of previously deferred costs; and (3) lower BEL's allowed return on rate base to 10% from 12%. A discussion with Fortis management has indicated that the PUC's decision may reduce the annual earnings contribution from BEL by \$6 million or \$0.04/share. Although we understand that BEL intends to legally contest the PUC's final decision, it is possible that Fortis will record a charge of C\$12.6 million (\$0.08/share) in Q2/08 in respect of the regulatory disallowances. While we do not view the PUC's final decision favourably, we note that: (1) a reduction in the earnings contribution from BEL was likely expected since May 2, when the PUC released its preliminary decision; and (2) the final decision contains language that indicates that the component of electricity rates that relate to the cost of generating power is to be adjusted monthly, which should mitigate the prospect of future cost disallowances related to electricity procurement or power generation.

This report was prepared by an Analyst employed by a Canadian affiliate, BMO Nesbitt Burns Inc., and who is not registered as a research analyst under FINRA rules. For disclosure statements, including the Analyst's Certification, please refer to pages 2 to 4.

We use the following ratings system definitions:

OP = Outperform - Forecast to outperform the market;

Mkt = Market Perform - Forecast to perform roughly in line with the market;

Und = Underperform - Forecast to underperform the market;

(S) = speculative investment;

NR = No rating at this time;

R = Restricted – Dissemination of research is currently restricted.

Market performance is measured by a benchmark index such as the S&P/TSX Composite Index, S&P 500, Nasdaq Composite, as appropriate for each company. Prior to September 1, 2003, a fourth rating tier—Top Pick—was used to designate those stocks we felt would be the best performers relative to the market. Our six Top 15 lists which guide investors to our best ideas according to six different objectives (large, small, growth, value, income and quantitative) have replaced the Top Pick rating.

Dissemination of Research

Our research publications are available via our web site <http://bmocapitalmarkets.com>. Institutional clients may also receive our research via FIRST CALL Research Direct and Reuters. All of our research is made widely available at the same time to all BMO NB, BMO Capital Markets Ltd., BMO Capital Markets Corp. and BMO Nesbitt Burns Securities Ltd. client groups entitled to our research. Please contact your investment advisor or institutional salesperson for more information.

Conflict Statement

A general description of how BMO Financial Group identifies and manages conflicts of interest is contained in our public facing policy for managing conflicts of interest in connection with investment research which is available at http://equityresearch.bmogc.net/conflict_statement.asp

Additional Matters

TO U.S. RESIDENTS: BMO Capital Markets Corp. and/or BMO Nesbitt Burns Securities Ltd., affiliates of BMO NB, furnish this report to U.S. residents and accept responsibility for the contents herein, except to the extent that it refers to securities of Bank of Montreal. Any U.S. person wishing to effect transactions in any security discussed herein should do so through BMO Capital Markets Corp. and/or BMO Nesbitt Burns Securities Ltd.

Final Decision on Belize Rates Announced; Outperform Rating Maintained

Event

On June 27, the Belize Public Utilities Commission (PUC) released its final decision for Belize Electricity Limited's (BEL, 70.1% Fortis) annual tariff application, which was filed on April 2. The PUC's final decision is largely consistent with the preliminary decision issued on May 2. Specifically, the PUC's final decision appears to: (1) maintain current electricity rates at BZ\$0.441/kWh; (2) result in regulatory disallowances totalling BZ\$36 million (C\$12.6 million of which is Fortis' share); and (3) lower BEL's allowed return on rate base to 10% from 12%.

Impact

Negative.

Forecasts

We have updated our financial forecast to reflect the Belize PUC's final decision. Our diluted EPU estimates decline to \$1.50 in 2008 and \$1.52 in 2009. Although we understand that BEL intends to legally contest the PUC's final decision, it is possible that Fortis will record a charge of C\$12.6 million in Q2/08 in respect of the regulatory disallowances.

Valuation

Our revised target price of \$31 reflects a weighted valuation approach: 17x diluted 2009E EPS of \$1.52 (12.5%), 1.75x 2009E book value of \$18.57 (12.5%) and a target yield of 3.25% (75%), assuming 2009 dividends per share of \$1.04.

Recommendation

We believe the shares are attractively valued, considering Fortis' large organic growth pipeline and business model that focus on the acquisition and operation of regulated electric and gas utilities. Our rating is Outperform.

Details & Analysis

On June 27, the Belize Public Utilities Commission (PUC) released its final decision for Belize Electricity Limited's (BEL, 70.1% Fortis) annual tariff application, which was filed on April 2. The PUC's final decision is largely consistent with the preliminary decision issued on May 2, which we discussed in a research note published on May 7, 2008.

Specifically, the PUC's final decision appears to: (1) maintain current electricity rates at BZ\$0.441/kWh; (2) result in regulatory disallowances totalling BZ\$36 million (C\$12.6 million of which is Fortis' share); and (3) lower BEL's allowed return on rate base to 10% from 12%.

Per a discussion with Fortis management, the PUC's decision is expected to reduce the annual earnings contribution from BEL by approximately C\$6 million or \$0.04 per share.

Regulatory Disallowances Applied to Cost of Power Deferral Account, Thereby Re-Basing Rates

The PUC's final decision resulted in regulatory disallowances that, in aggregate, sum to BZ\$36.2 million. These disallowances are largely the result of prior-period adjustments to the calculation of BEL's regulated rate base for the periods 2005–2007, and a subsequent recalculation of depreciation and regulated returns using the modified rate base values.

Specifically, the PUC's calculation removed the following items from BEL's rate base: (1) working capital; (2) the book value of the Mollejon Transmission Line; (3) Construction Work in Progress; and (4) 50% of assets that were placed in service during each year from 2005–2007.

The BZ\$36.2 million in regulatory disallowances appear to have been used to reduce the outstanding balance in the Cost of Power Rate Stabilization Account ("CPRSA"), a deferral account where variances between the cost of acquiring power and the cost of purchased power reflected in customer rates were charged. Uncollected balances in the CPRSA accrued interest at 12% per annum.

Per a review of the final decision, and the revised rate-setting methodology, the PUC does not appear to be ideologically opposed to allowing BEL to recover prudently incurred purchased power and power generation expenses. However, the growing balance in the CPRSA and the practice of accruing interest on outstanding CPRSA balances appear to have been controversial.

Per page 35 of the final decision, the PUC noted that,

"The Commission has assessed the value of the CPRSA and has concluded that the cost of the CPRSA outweighs the benefits, and the Commission will bring the account to a close. It is expected that Consumers will be required to pay monthly for the full cost of power, since this is a lower cost option than to keep the CPRSA, and will relieve BEL of cash flow pressures as a result of the deferral of excess power cost expenses."

Taken in aggregate, the PUC's actions appear to constitute an effort to re-base customer rates at a time when record commodity prices have rapidly increased the cost of generating electricity. Now that rates at BEL have effectively been reset, we are hopeful that the PUC's intention to

allow BEL to more frequently pass the cost of power through to customers should reduce the prospect of future cost disallowances related to electricity procurement or power generation.

However, we do not believe that the PUC's final decision is fair to BEL shareholders, and we believe that the rate proceedings in Belize have increased near-term regulatory risk. We note, however, that contributions from BEL represent a relatively minor component of Fortis' consolidated earnings. Rate base additions of \$4 billion over the next five years in relatively low-risk jurisdictions, such as Alberta and British Columbia, will drive EPS growth and further reduce Fortis' exposure to Belize.

Estimates

We have updated our financial forecast to reflect the Belize PUC's final decision. Our diluted EPU estimates decline to \$1.50 in 2008 and \$1.52 in 2009. Although we understand that BEL intends to legally contest the PUC's final decision, it is possible that Fortis will record a charge of C\$12.6 million in Q2/08 in respect of the regulatory disallowances.

Valuation

Our revised target of \$31 reflects a weighted valuation approach: 17x diluted 2009E EPS of \$1.52 (12.5%), 1.75x 2009E book value of \$18.57 (12.5%) and a target yield of 3.25% (75%), assuming 2009 dividends per share of \$1.04.

We have decreased our P/E to 17x from 18x to reflect heightened regulatory risk at BEL.

Recommendation

We believe the shares are attractively valued, considering Fortis' large organic growth pipeline and business model that focus on the acquisition and operation of regulated electric and gas utilities. Our rating is Outperform.

Company Risk Disclosure

In addition to the risks involved in investing in common stocks generally, we also highlight the following risks that pertain to this company. Operations are subject to complex regulation by a variety of provincial, state and federal (Canada, Cayman Islands & Belize) agencies. Changes in regulation may adversely affect performance.

Financial performance depends on the availability of installed generation and the production of electric power by third parties. Fortis Properties' cash flow is dependent on hotel room vacancy rates and commercial building occupancy levels. The company's operations in Belize may be disrupted and assets may be damaged by hurricanes and/or tropical storms.

** Reflects rating distribution of all North American equity research analysts.

Ratings Key

We use the following ratings system definitions:

OP = Outperform - Forecast to outperform the market;

Mkt = Market Perform - Forecast to perform roughly in line with the market;

Und = Underperform - Forecast to underperform the market;

(S) = speculative investment;

NR = No rating at this time;

R = Restricted – Dissemination of research is currently restricted.

Market performance is measured by a benchmark index such as the S&P/TSX Composite Index, S&P 500, Nasdaq Composite, as appropriate for each company. Prior to September 1, 2003, a fourth rating tier—Top Pick—was used to designate those stocks we felt would be the best performers relative to the market. Our six Top 15 lists which guide investors to our best ideas according to six different objectives (large, small, growth, value, income and quantitative) have replaced the Top Pick rating.

Dissemination of Research

Our research publications are available via our web site <http://bmocapitalmarkets.com>. Institutional clients may also receive our research via FIRST CALL Research Direct and Reuters. All of our research is made widely available at the same time to all BMO NB, BMO Capital Markets Ltd., BMO Capital Markets Corp. and BMO Nesbitt Burns Securities Ltd. client groups entitled to our research. Please contact your investment advisor or institutional salesperson for more information.

Conflict Statement

A general description of how BMO Financial Group identifies and manages conflicts of interest is contained in our public facing policy for managing conflicts of interest in connection with investment research which is available at http://equityresearch.bmogc.net/conflict_statement.asp

Capital Budgets Filed; Outperform Rating Unchanged

Event

A number of Fortis subsidiaries have recently filed capital budgets with provincial regulatory authorities for approval. On June 27, 2008 Fortis BC filed its 2009-2010 capital expenditure plan with the BC Utilities Commission, requesting approval of \$178.8 million of capital expenditures in 2009 and \$181.1 million in 2010. On July 9, Maritime Electric filed its 2009 capital budget application with the Island Regulatory and Appeals Commission. The application requested approval of capital expenditures of \$19.4 million in 2009 and made note of anticipated spending of \$21.4 million in 2010. On July 11, Newfoundland Power filed its 2009 capital budget with the Newfoundland and Labrador Board of Commissioners of Public Utilities, requesting the approval of a capital expenditure budget of \$62 million in 2009.

Impact

Neutral.

Forecasts

We have updated our forecasts to reflect rate base additions consistent with the capital budgets filed with provincial regulatory authorities. Our diluted 2008 EPS estimate of \$1.50 is unchanged and our diluted 2009 EPS estimate increases to \$1.53 from \$1.52.

Valuation

Our target price reflects a weighted valuation approach: 17x diluted 2009E EPS of \$1.53 (12.5%), 1.75x 2009E book value per share of \$18.58 (12.5%), and a target yield of 3.25% (75%), assuming 2009 dividends per share of \$1.04.

Recommendation

We believe Fortis' shares are attractively valued. Our rating is Outperform.

Company Risk Disclosure

In addition to the risks involved in investing in common stocks generally, we also highlight the following risks that pertain to this company. Operations are subject to complex regulation by a variety of provincial, state and federal (Canada, Cayman Islands & Belize) agencies. Changes in regulation may adversely affect performance.

Financial performance depends on the availability of installed generation and the production of electric power by third parties. Fortis Properties' cash flow is dependent on hotel room vacancy rates and commercial building occupancy levels. The company's operations in Belize may be disrupted and assets may be damaged by hurricanes and/or tropical storms.

Analyst's Certification

I, Michael McGowan, CA, CFA, hereby certify that the views expressed in this report accurately reflect my personal views about the subject securities or issuers. I also certify that no part of my compensation was, is, or will be, directly or indirectly, related to the specific recommendations or views expressed in this report.

General Disclosure

The information and opinions in this report were prepared by BMO Nesbitt Burns Inc. and BMO Nesbitt Burns Ltée./Ltd., collectively ("BMO NB"). Ratings Key

We use the following ratings system definitions:

OP = Outperform - Forecast to outperform the market;

Mkt = Market Perform - Forecast to perform roughly in line with the market;

Und = Underperform - Forecast to underperform the market;

(S) = speculative investment;

NR = No rating at this time;

R = Restricted – Dissemination of research is currently restricted.

Market performance is measured by a benchmark index such as the S&P/TSX Composite Index, S&P 500, Nasdaq Composite, as appropriate for each company. Prior to September 1, 2003, a fourth rating tier—Top Pick—was used to designate those stocks we felt would be the best performers relative to the market. Our six Top 15 lists which guide investors to our best ideas according to six different objectives (large, small, growth, value, income and quantitative) have replaced the Top Pick rating.

Dissemination of Research

Our research publications are available via our web site <http://bmocapitalmarkets.com>. Institutional clients may also receive our research via FIRST CALL Research Direct and Reuters. All of our research is made widely available at the same time to all BMO NB, BMO Capital Markets Ltd., BMO Capital Markets Corp. and BMO Nesbitt Burns Securities Ltd. client groups entitled to our research. Please contact your investment advisor or institutional salesperson for more information.

Conflict Statement

A general description of how BMO Financial Group identifies and manages conflicts of interest is contained in our public facing policy for managing conflicts of interest in connection with investment research which is available at http://equityresearch.bmogc.net/conflict_statement.asp

Additional Matters

TO U.S. RESIDENTS: BMO Capital Markets Corp. and/or BMO Nesbitt Burns Securities Ltd., affiliates of BMO NB, furnish this report to U.S. residents and accept responsibility for the contents herein, except to the extent that it refers to securities of Bank of Montreal. Any U.S. person wishing to effect transactions in any security discussed herein should do so through BMO Capital Markets Corp. and/or BMO Nesbitt Burns Securities Ltd.

TO U.K. RESIDENTS: In the UK this document is published by BMO Capital Markets Limited which is authorised and regulated by the Financial Services Authority. The contents hereof are intended solely for the use of, and may only be issued or passed on to, (I) persons who have professional experience in matters relating to investments falling within Article 19(5) of the Financial Services and Markets Act 2000 (Financial Promotion) Order 2005 (the "Order") or (II) high net worth entities falling within Article 49(2)(a) to (d) of the Order (all such persons together referred to as "relevant persons"). The contents hereof are not intended for the use of and may not be issued or passed on to, retail clients.

BMO Nesbitt Burns Inc. and BMO Nesbitt Burns Ltée/Ltd. are Members of CIPF. BMO Capital Markets Corp. and BMO Nesbitt Burns Securities Ltd. are Members of SIPC.

"BMO Capital Markets" is a trade-mark of Bank of Montreal, used under licence.

Target Price Reduced to Reflect Lower Valuation Multiples; Outperform Rating Maintained

Event

On July 21, we published a sector comment entitled "Correlation Breakdown: Revising Target Prices and Ratings to Reflect Market Realities," where we noted that regulated rates of return for utilities operating in Canada are poised to fall by an average of 17 basis points in 2009 at a time when the historical relationship between Government of Canada bond yields and dividend yields appears to have broken down. We believe the combination of these factors suggests that the recent compression in valuation multiples for companies in our coverage universe may be warranted. We are revising our valuation assumptions to incorporate a target dividend yield 3.75%, up from 3.25%, to reflect the possibility of lower regulated ROE in 2009 and to more closely align our target dividend yield with the observed trading yield. Our target price decreases to \$28 from \$31.

Impact

Mixed. Although the change in our valuation assumptions has resulted in a reduction to our target price, we believe that Fortis is attractively valued.

Forecasts

There are no changes to our financial forecasts.

Valuation

Our revised target price of \$28 reflects a weighted valuation approach: 17x diluted 2009E EPS of \$1.53 (12.5%), 1.75x 2009E book value per share of \$18.58 (12.5%) and a target yield of 3.75% (75%), assuming 2009 dividends per share of \$1.04.

Recommendation

We believe that Fortis' shares are attractively valued, considering its large organic growth pipeline. Our rating is Outperform.

Company Risk Disclosure

In addition to the risks involved in investing in common stocks generally, we also highlight the following risks that pertain to this company. Operations are subject to complex regulation by a variety of provincial, state and federal (Canada, Cayman Islands & Belize) agencies. Changes in regulation may adversely affect performance.

Financial performance depends on the availability of installed generation and the production of electric power by third parties. Fortis Properties' cash flow is dependent on hotel room vacancy rates and commercial building occupancy levels. The company's operations in Belize may be disrupted and assets may be damaged by hurricanes and/or tropical storms.

Analyst's Certification

Ratings Key

We use the following ratings system definitions:

OP = Outperform - Forecast to outperform the market;

Mkt = Market Perform - Forecast to perform roughly in line with the market;

Und = Underperform - Forecast to underperform the market;

(S) = speculative investment;

NR = No rating at this time;

R = Restricted – Dissemination of research is currently restricted.

Market performance is measured by a benchmark index such as the S&P/TSX Composite Index, S&P 500, Nasdaq Composite, as appropriate for each company. Prior to September 1, 2003, a fourth rating tier—Top Pick—was used to designate those stocks we felt would be the best performers relative to the market. Our six Top 15 lists which guide investors to our best ideas according to six different objectives (large, small, growth, value, income and quantitative) have replaced the Top Pick rating.

Dissemination of Research

Our research publications are available via our web site <http://bmocapitalmarkets.com>. Institutional clients may also receive our research via FIRST CALL Research Direct and Reuters. All of our research is made widely available at the same time to all BMO NB, BMO Capital Markets Ltd., BMO Capital Markets Corp. and BMO Nesbitt Burns Securities Ltd. client groups entitled to our research. Please contact your investment advisor or institutional salesperson for more information.

Conflict Statement

A general description of how BMO Financial Group identifies and manages conflicts of interest is contained in our public facing policy for managing conflicts of interest in connection with investment research which is available at http://equityresearch.bmogg.net/conflict_statement.asp

Additional Matters

TO U.S. RESIDENTS: BMO Capital Markets Corp. and/or BMO Nesbitt Burns Securities Ltd., affiliates of BMO NB, furnish this report to U.S. residents and accept responsibility for the contents herein, except to the extent that it refers to securities of Bank of Montreal. Any U.S. person wishing to effect transactions in any security discussed herein should do so through BMO Capital Markets Corp. and/or BMO Nesbitt Burns Securities Ltd.

TO U.K. RESIDENTS: In the UK this document is published by BMO Capital Markets Limited which is authorised and regulated by the Financial Services Authority. The contents hereof are intended solely for the use of, and may only be issued or passed on to, (I) persons who have professional experience in matters relating to investments falling within Article 19(5) of the Financial Services and Markets Act 2000 (Financial Promotion) Order 2005 (the "Order") or (II) high net worth entities falling within Article 49(2)(a) to (d) of the Order (all such persons together referred to as "relevant persons"). The contents hereof are not intended for the use of and may not be issued or passed on to, retail clients.

BMO Nesbitt Burns Inc. and BMO Nesbitt Burns Ltée/Ltd. are Members of CIPF. BMO Capital Markets Corp. and BMO Nesbitt Burns Securities Ltd. are Members of SIPC.

Q2/08 Earnings Reflect Accounting Charges

Impact

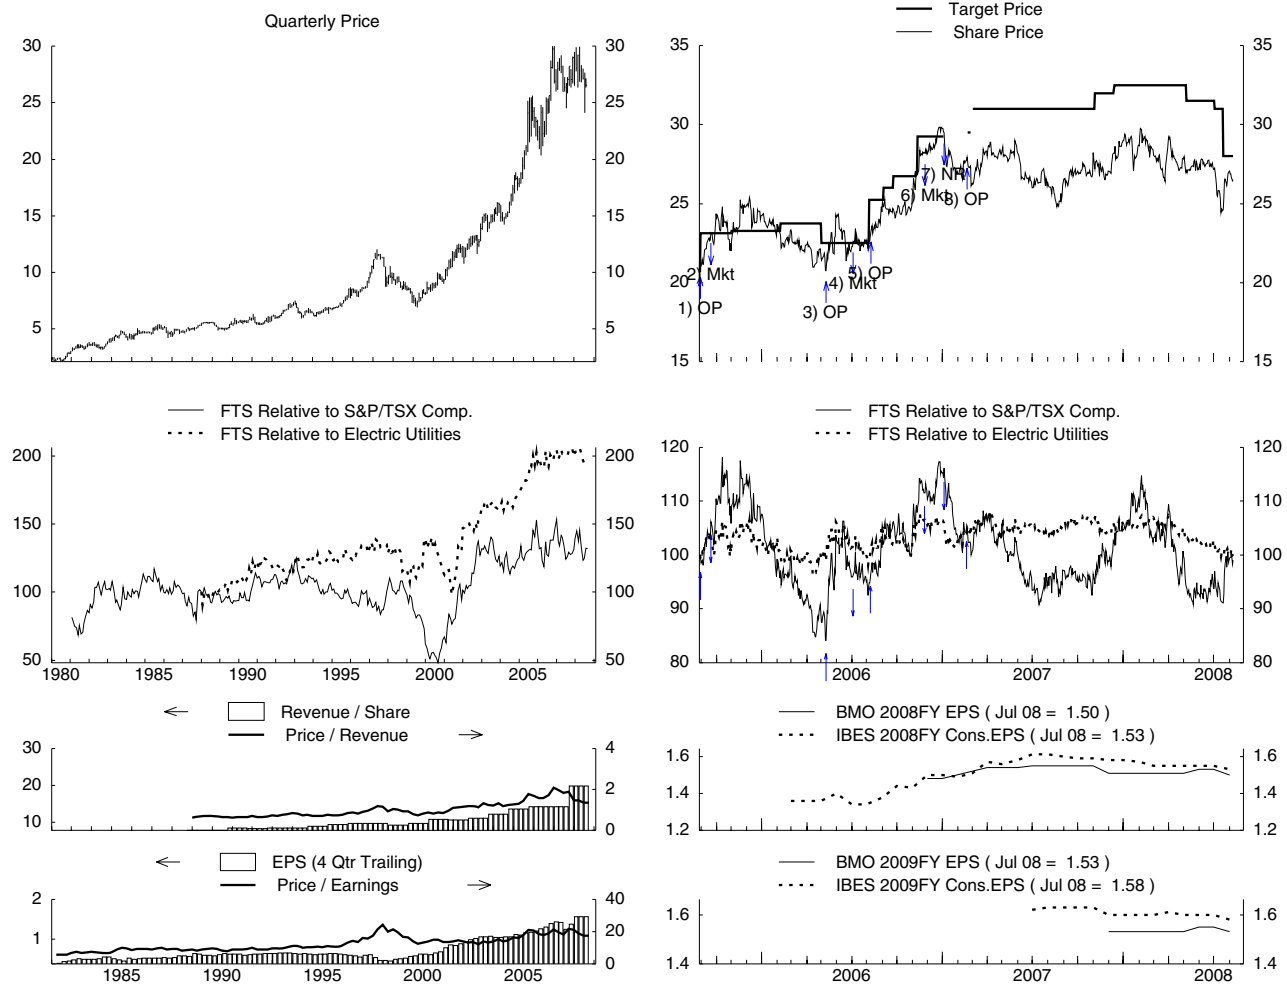

Slightly Negative

Details & Analysis

Fortis reported Q2/08 GAAP EPS of \$0.19. After adjusting for: (1) a \$13 million (\$0.08/share) charge related to the company's share of a regulatory disallowance of previously incurred fuel and purchased power costs at Belize Electricity Limited (BEL, 70.1% Fortis); and (2) a \$2 million (\$0.01/share) charge related to the repayment of a refund received in 2007 related to cross-border transmission interconnection agreements at Fortis Ontario, comparable EPS of \$0.28 exceeded the First Call Mean of \$0.27 and were slightly below our estimate of \$0.30. With the exception of BEL, the majority of Fortis's subsidiaries appear to be performing well and we note the following developments from the release: (1) On July 25, BEL filed an application for judicial review and appeal of the Belize Public Utility Commission's decision regarding BEL's 2008/2009 rate application with the Supreme Court of Belize; (2) As a result of the PUC's decision, BEL is in violation of certain debt covenants and approximately C\$16 million of BEL's debt is in default. We understand BEL is seeking a waiver from its lenders.

This report was prepared by an Analyst employed by a Canadian affiliate, BMO Nesbitt Burns Inc., and who is not registered as a research analyst under FINRA rules. For disclosure statements, including the Analyst's Certification, please refer to pages 2 to 4.

Company Risk Disclosure

In addition to the risks involved in investing in common stocks generally, we also highlight the following risks that pertain to this company. Operations are subject to complex regulation by a variety of provincial, state and federal (Canada, Cayman Islands & Belize) agencies. Changes in regulation may adversely affect performance.

Financial performance depends on the availability of installed generation and the production of electric power by third parties. Fortis Properties' cash flow is dependent on hotel room vacancy rates and commercial building occupancy levels. The company's operations in Belize may be disrupted and assets may be damaged by hurricanes and/or tropical storms.

Ratings Key

We use the following ratings system definitions:

OP = Outperform - Forecast to outperform the market;

Mkt = Market Perform - Forecast to perform roughly in line with the market;

Und = Underperform - Forecast to underperform the market;

(S) = speculative investment;

NR = No rating at this time;

R = Restricted – Dissemination of research is currently restricted.

Market performance is measured by a benchmark index such as the S&P/TSX Composite Index, S&P 500, Nasdaq Composite, as appropriate for each company. Prior to September 1, 2003, a fourth rating tier—Top Pick—was used to designate those stocks we felt would be the best performers relative to the market. Our six Top 15 lists which guide investors to our best ideas according to six different objectives (large, small, growth, value, income and quantitative) have replaced the Top Pick rating.

Dissemination of Research

Our research publications are available via our web site <http://bmocapitalmarkets.com>. Institutional clients may also receive our research via FIRST CALL Research Direct and Reuters. All of our research is made widely available at the same time to all BMO NB, BMO Capital Markets Ltd., BMO Capital Markets Corp. and BMO Nesbitt Burns Securities Ltd. client groups entitled to our research. Please contact your investment advisor or institutional salesperson for more information.

Conflict Statement

A general description of how BMO Financial Group identifies and manages conflicts of interest is contained in our public facing policy for managing conflicts of interest in connection with investment research which is available at http://equityresearch.bmogc.net/conflict_statement.asp

Additional Matters

TO U.S. RESIDENTS: BMO Capital Markets Corp. and/or BMO Nesbitt Burns Securities Ltd., affiliates of BMO NB, furnish this report to U.S. residents and accept responsibility for the contents herein, except to the extent that it refers to securities of Bank of Montreal. Any U.S. person wishing to effect transactions in any security discussed herein should do so through BMO Capital Markets Corp. and/or BMO Nesbitt Burns Securities Ltd.

TO U.K. RESIDENTS: In the UK this document is published by BMO Capital Markets Limited which is authorised and regulated by the Financial Services Authority. The contents hereof are intended solely for the use of, and may only be issued or passed on to, (I) persons who have professional experience in matters relating to investments falling within Article 19(5) of the Financial Services and Markets Act 2000 (Financial Promotion) Order 2005 (the "Order") or (II) high net worth entities falling within Article 49(2)(a) to (d) of the Order (all such persons together referred to as "relevant persons"). The contents hereof are not intended for the use of and may not be issued or passed on to, retail clients.

BMO Nesbitt Burns Inc. and BMO Nesbitt Burns Ltée/Ltd. are Members of CIPF. BMO Capital Markets Corp. and BMO Nesbitt Burns Securities Ltd. are Members of SIPC.

Q2/08 Results Reflect Accounting Adjustments; Outperform Rating Maintained

Event

Fortis reported Q2/08 GAAP EPS of \$0.19. After adjusting for: (1) a \$13 million (\$0.08/share) charge related to the company's share of regulatory disallowances at Belize Electricity Limited (BEL, 70.1% Fortis) associated with BEL's 2008/2009 rate application; and (2) a \$2 million (\$0.01/share) charge related to the repayment of a refund received in 2007 related to cross-border transmission interconnection agreements at FortisOntario, comparable EPS of \$0.28 exceeded the First Call Mean of \$0.27 and were slightly below our estimate of \$0.30.

Impact

Mixed. Although Q2/08 GAAP earnings were affected by non-recurring charges, the majority of Fortis' business segments continues to perform well.

Forecasts

Although Q2/08 adjusted EPS were \$0.02/share below our estimate, we believe the variance is attributable to the seasonality of earnings at Terasen Gas and Fortis Alberta. Our financial forecasts for 2008 and 2009 are unchanged.

Valuation

Our valuation reflects a weighted approach: 17x diluted 2009E EPS of \$1.53 (12.5%), 1.75x 2009E book value per share of \$18.58, and a target yield of 3.75% (75%), assuming 2009E dividends per share of \$1.04.

Recommendation

We believe that Fortis' shares are attractively valued, considering its large organic growth pipeline. Our rating is Outperform.

Details & Analysis

Fortis reported Q2/08 GAAP EPS of \$0.19. After adjusting for: (1) a \$13 million (\$0.08/share) charge related to the company's share of regulatory disallowances at Belize Electricity Limited (BEL, 70.1% Fortis) associated with BEL's 2008/2009 rate application; and (2) a \$2 million (\$0.01/share) charge related to the repayment of a refund received in 2007 related to cross-border transmission interconnection agreements at Fortis Ontario, comparable EPS of \$0.28 exceeded the First Call Mean of \$0.27 and were slightly below our estimate of \$0.30.

Belize Electricity Limited

As expected, Fortis accrued a C\$13 million (\$0.08/share) charge associated with its share of BZ \$36.2 million in regulatory disallowances related to the Belize Public Utility Commission's (PUC) final decision on Belize Electricity Limited's 2008-2009 rate application. These regulatory disallowances are largely the result of prior-period adjustments to the calculation of BEL's rate base for the periods 2005-2007, and a subsequent recalculation of depreciation and regulated returns using the modified rate base values. Accordingly, we have not incorporated the regulatory disallowance into our 2008E EPS estimate. We note, however, that the regulatory decision is expected to reduce the annual earnings contribution from BEL by approximately \$6 million and the prospective impact of the ruling has been reflected in our estimates. In addition, as a result of the PUC's final decision, BEL is in violation of certain debt covenants and approximately C\$16 million of debt is in default. We understand that BEL is seeking a waiver from its lenders regarding these covenant breaches.

In response to the PUC's final decision, on July 25, 2008, BEL filed an application for judicial review and appeal of the decision with the Supreme Court of Belize. A ruling from the Supreme Court of Belize is expected within the next 6-12 months.

Although the earnings contribution from BEL represent a minor component of Fortis' consolidated earnings, we believe that recent regulatory proceedings at BEL have increased the regulatory risk associated with Fortis' Belizean operations.

The future earnings contribution from BEL (and by extension, the regulatory risk associated with BEL) will likely be dependent on the effectiveness of a fuel adjustment mechanism which should allow BEL to recover fuel costs from customers on a monthly basis. We understand this mechanism is expected to become effective on September 1, 2008, and we will follow-up with management on its implementation.

For information related to BEL's 2008-2009 rate application, please see our research comments dated May 7, 2008 (which discusses the PUC's initial decision) and July 2, 2008 (which discusses the PUC's final decision).

Capital Investment Forecast Increased

During Q2/08, Fortis increased the capital expenditure estimate for its five-year capital budget to approximately \$4.5 billion from \$4 billion. Approximately \$3.5 billion of the revised amount relates to planned expenditures in the electric utility business segment, and the majority of spending is expected to be incurred in FortisAlberta and FortisBC. Over the next five years, Fortis continues to expect that capital expenditures at Terasen Gas will exceed \$1 billion.

An estimate of planned capital expenditures by business segment for the rest of 2008 is set out in Table 1:

Table 1: 2008E Capital Expenditures by Segment

Segment	Q1/08	Q2/08	2H08E	2008E	% of Total
Terasen Gas Companies	\$40	\$56	\$154	\$250	26.9%
FortisAlberta	\$63	\$81	\$142	\$286	30.8%
FortisBC	\$24	\$26	\$86	\$136	14.6%
Newfoundland Power	\$13	\$17	\$23	\$53	5.7%
Other Regulated Utilities - Canadian	\$7	\$10	\$38	\$55	5.9%
Regulated Utilities - Caribbean	\$11	\$23	\$67	\$101	10.9%

Total	\$162	\$227	\$540	\$929	100.0%

Source: BMO Capital Markets, Company Reports

Small Acquisition in Ontario

In August 2008, FortisOntario and Grimsby Power Inc. entered into a non-binding letter of intent for FortisOntario to acquire a 10% interest in Grimsby Power Inc.'s electricity distribution business for \$1.1 million. Although this is a very small acquisition, we believe that FortisOntario intends to evaluate similar transactions and, where possible, may seek to acquire minority interest in other Ontario-based local distribution companies.

\$7.5 Million Tax Recovery Expected in Q3/08

In August 2008, Terasen Gas settled certain historical tax matters regarding legislation related to interprovincial tax structures. The settlement is expected to result in a non-recurring \$7.5 million benefit to Q3/08 earnings.

Q2/08 Results

As set out in Table 2, Q2/08 GAAP net income of \$29 million was \$12 million lower than net income of \$41 million reported in Q2/07. After adjusting for: (1) \$13 million in regulatory disallowances at BEL, and (2) the refund of payments received in 2007 related to cross-border interconnection agreements, net income increased by \$3 million in Q2/08 compared to Q2/07. A discussion of operating performance at each business segment is set out below.

Table 2: Historical Results by Operating Segment

	Q2/08 GAAP	Adjustments	Q2/08 Adjusted	Q2/07	Variance Q2/08 Adj vs. Q2/07	Variance %

Source: BMO Capital Markets, Company Reports

Regulated Gas Utilities - Terasen Gas Companies

Due to the timing of the Terasen Gas acquisition 2007, which closed on May 17, 2008, Q2/08 income of \$12 million is not comparable to Q2/07 income of \$1 million. Quarterly results from Terasen Gas are highly seasonal, with the majority of earnings occurring in the first and fourth quarters. Discussions with management indicate that on a full quarter-over-quarter basis, earnings in Q2/08 were comparable to Q2/07.

Regulated Electric Utilities – FortisAlberta

Net earnings for FortisAlberta in Q2/08 were \$7.0 million, compared to \$15.0 million in Q2/07. The \$8 million variance in quarterly earnings is largely due to changes in future income tax expenses associated with deferral account balances related to Alberta Electric System Operator (“AESO”) charges that are either refundable or recoverable in customer rates. The quarter-over-quarter variance associated with future income tax adjustments related to AESO deferral balances was approximately \$7.5 million; a non-cash expense of \$4 million was recorded in Q2/08 associated with an increase in the deferral account balance related to AESO charges, whereas Q2/07 results included a future income tax recovery of \$3.5 million associated with a reduction in the AESO deferral account.

Regulated Electric Utilities – FortisBC

Earnings at FortisBC were \$7.0 million in Q2/08 compared with \$6.0 million in Q2/07. The variance in quarterly earnings was largely due to an insurance settlement of \$0.6 million received during Q2/08 related to a turbine generator failure in 2006.

Regulated Electric Utilities – Newfoundland Power

Net earnings for the Newfoundland Power were \$10 million in Q2/08 compared with \$8 million in Q2/07. The quarter-over-quarter variance was primarily due to a regulatory decision that modified the way purchased power expenses are allocated between quarters. Previously, monthly purchased power expenses were recognized based on an estimate of actual costs and

variances between actual and estimated purchased power expenses were accrued to a deferral account that was discontinued effective, January 1, 2008. Newfoundland Power now recognizes the actual cost of purchased power each month. Although this regulatory change is not expected to impact annual earnings, the change in regulatory accounting increased earnings at Newfoundland Power by \$2.5 million in Q2/08 compared to Q2/07.

Regulated Electric Utilities – Caribbean

The Caribbean regulated utilities reported a Q2/08 loss of \$5 million, compared with net income of \$8 million in Q2/07. Reported results include \$13 million of regulatory disallowances accrued in relation to the Belize PUC's final decision on BEL's 2008/2009 rate application. After adjusting for these regulatory disallowances, Q2/08 earnings would have been consistent with Q2/07 results.

Non-Regulated – Fortis Generation

Net earnings for Fortis Generation increased to \$7 million in Q2/08 from \$5 million in Q2/07, as: (1) greater rainfall in central Newfoundland led to increased power production; and, (2) the company realized higher energy prices in Ontario and New York. Average realized power prices increased to \$70.51/MWh in Q2/08 from 65.69/MWh in Q2/07. Power production increased by 38 GWh in Q2/08 to 312 GWh, compared to electricity production of 274 GWh Q2/07.

Non-Regulated – Fortis Properties

Net earnings at Fortis Properties increased to \$7 million in Q2/08 from \$6 million in Q2/07. The increase in earnings was largely the result of the acquisition of the Delta Regina, which closed on August 1, 2007, and improved performance across the portfolio. Average revenue per available room increased to \$87.54 in Q2/08 from \$77.68 in Q2/07, while occupancy as at June 30, 2008 was 96.7%, up from 96% as at June 30, 2007.

Corporate and Other

Expenses at the corporate and other segment increased to \$18.0 million in Q2/08, from \$12 million in Q2/07, largely due to increased financing charges associated with the acquisition of Terasen Gas.

Estimates

Although Q2/08 adjusted EPS were \$0.02/share below our estimate, we believe the variance is attributable to the seasonality of earnings at Terasen Gas and Fortis Alberta. Our financial forecasts for 2008 and 2009 are unchanged.

Valuation

Our valuation reflects a weighted approach: 17x diluted 2009E EPS of \$1.53 (12.5%), 1.75x 2009E book value per share of \$18.58, and a target yield of 3.75% (75%), assuming 2009E dividends per share of \$1.04.

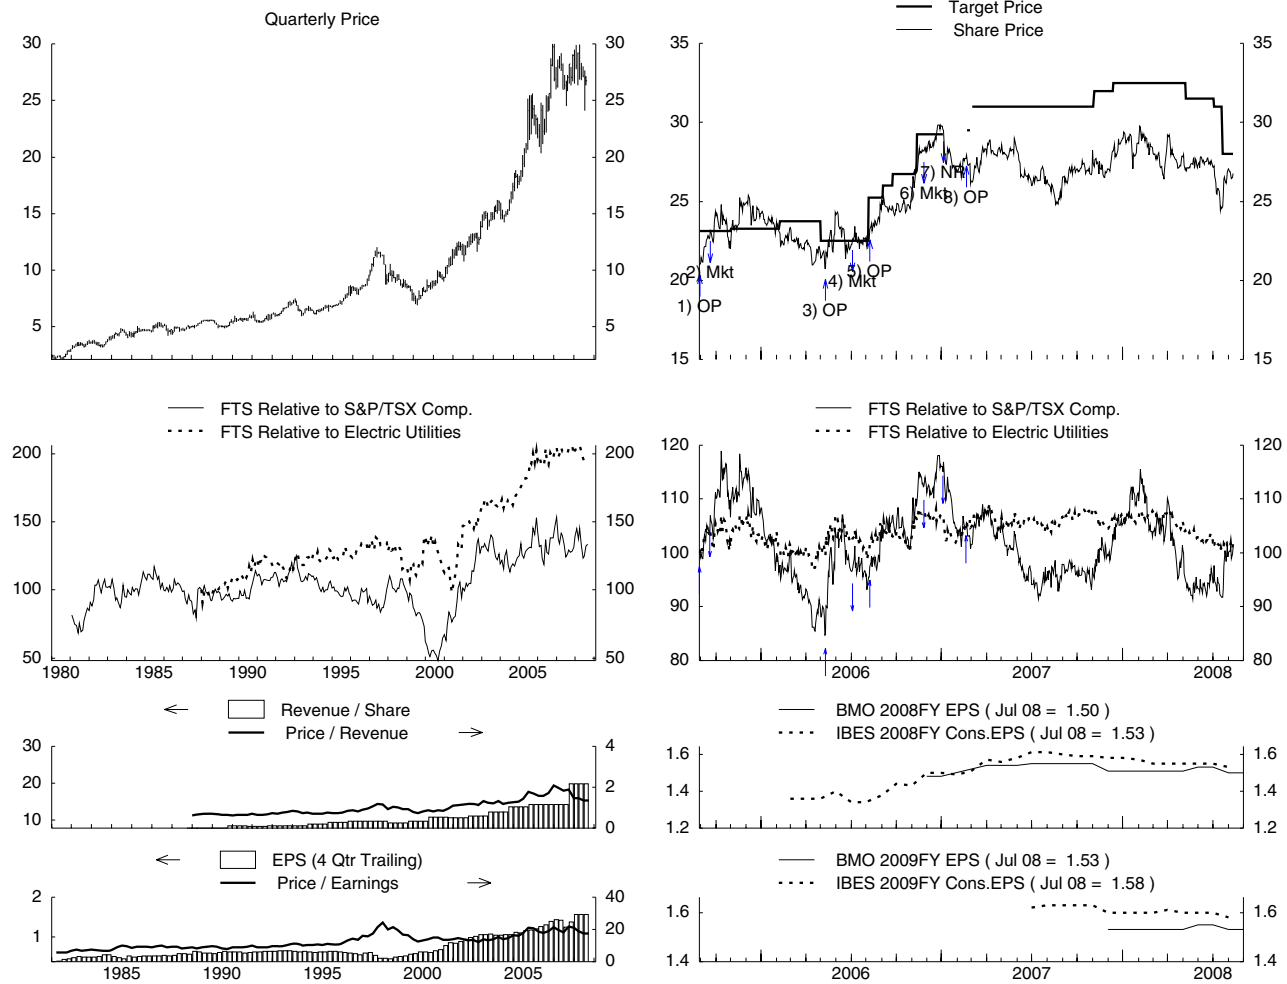

Recommendation

We believe that Fortis' shares are attractively valued, considering its large organic growth pipeline. Our rating is Outperform.

Company Risk Disclosure

In addition to the risks involved in investing in common stocks generally, we also highlight the following risks that pertain to this company. Operations are subject to complex regulation by a variety of provincial, state and federal (Canada, Cayman Islands & Belize) agencies. Changes in regulation may adversely affect performance.

Financial performance depends on the availability of installed generation and the production of electric power by third parties. Fortis Properties' cash flow is dependent on hotel room vacancy rates and commercial building occupancy levels. The company's operations in Belize may be disrupted and assets may be damaged by hurricanes and/or tropical storms.

** Reflects rating distribution of all North American equity research analysts.

Ratings Key

We use the following ratings system definitions:

OP = Outperform - Forecast to outperform the market;

Mkt = Market Perform - Forecast to perform roughly in line with the market;

Und = Underperform - Forecast to underperform the market;

(S) = speculative investment;

NR = No rating at this time;

R = Restricted – Dissemination of research is currently restricted.

Market performance is measured by a benchmark index such as the S&P/TSX Composite Index, S&P 500, Nasdaq Composite, as appropriate for each company. Prior to September 1, 2003, a fourth rating tier—Top Pick—was used to designate those stocks we felt would be the best performers relative to the market. Our six Top 15 lists which guide investors to our best ideas according to six different objectives (large, small, growth, value, income and quantitative) have replaced the Top Pick rating.

Dissemination of Research

Our research publications are available via our web site <http://bmocapitalmarkets.com>. Institutional clients may also receive our research via FIRST CALL Research Direct and Reuters. All of our research is made widely available at the same time to all BMO NB, BMO Capital Markets Ltd., BMO Capital Markets Corp. and BMO Nesbitt Burns Securities Ltd. client groups entitled to our research. Please contact your investment advisor or institutional salesperson for more information.

Conflict Statement

A general description of how BMO Financial Group identifies and manages conflicts of interest is contained in our public facing policy for managing conflicts of interest in connection with investment research which is available at http://equityresearch.bmogc.net/conflict_statement.asp

Additional Matters

laurence.conheady@bmo.com

Q2/08 Results: One-Time Items Lower Earnings but Cash Flow Moves Higher

Event: Fortis Inc. (Fortis) released Q2/08 financial results.

Impact: Neutral.

Key Points: One-time negative items at its Belize Electricity and FortisOntario subsidiaries pushed Fortis' net earnings 29% lower to \$29 million in Q2/08 versus Q2/07. Excluding the one-time items, comparable EPS of \$0.28 exceeded the First Call Mean of \$0.27 but were slightly below BMO Capital Markets equity research estimate of \$0.30. Largely reflecting the seasonal nature of Terasen Gas' cash flows and the timing of the Terasen acquisition, FFO in Q2/08 was 30% higher than Q2/07. Cash flow credit metrics to June 30 were either unchanged or modestly stronger but remain weak versus peers. Fortis' access to liquidity is adequate and leverage moved two percentage points lower in Q2/08.

Credit and Spread Implications

Near Term: We do not expect Fortis' Q2/08 results to materially affect the spreads on its short-dated issue due 2010.

Medium Term: Potential exists for some uncertainty in Fortis' credit profile and ratings as it pursues further asset and business acquisitions. If Fortis' credit quality comes under pressure, we believe it is likely to be temporary, as Fortis has demonstrated a successful track record of managing its credit profile longer term.

Recommendation

With only one Canadian dollar debt issue, a \$100 million debenture due 2010, the opportunity to gain exposure to Fortis is limited. Nevertheless, we view Fortis as a solid credit and one unlikely to cause too much concern for investors. We believe the added fuel and geographic diversity provided by the Terasen acquisition in 2007 has strengthened Fortis' credit profile. We also view Fortis' conservative management as very supportive of its credit quality and that of its operating subsidiaries, especially those that rely on Fortis for ongoing financial and executive support.

Source: BMO Capital Markets

Relative Value

Sector Value: Along with those of other utilities, Fortis' 5-year indicative spreads moved wider in the last half of 2007 and early 2008 but unlike many of its peers, its spreads have remained reasonably stable in the past six months. We believe Fortis' current spreads offer reasonable value relative to those of similarly rated peers.

Credit Curve: Fortis' single Canadian dollar debt issue limits the opportunity for investors to pursue relative value trades along the issuer's credit curve. The relatively illiquid nature of its paper is also a pricing consideration.

Details & Analysis

Earnings and Cash Flow

One-time items at its Belize Electricity and FortisOntario subsidiaries of \$13 million and approx. \$2 million, respectively, pushed Fortis' net earnings 29% lower to \$29 million in Q2/08, from \$41 million for the same period in 2007. Excluding the one-time items, earnings for the second quarter of 2008 would have been \$44 million, a tad higher than the \$41 million recorded in Q2/07. The one-time item affecting the Belize Electricity earnings is Fortis' approximate share of an \$18 million disallowance with respect to incurred fuel and purchased power costs. The one-time item affecting the FortisOntario results was a refund to Niagara Mohawk Power Corp. related to a previous payment made in December 2007.

Apart from Belize Electricity and FortisOntario, FortisAlberta also realized lower earnings, driven by increased corporate taxes primarily associated with the regulator-approved Alberta Electric System Operator charges deferral account and the timing of its collection. A notable jump in the earnings of Terasen Gas companies, essentially due to the timing of its acquisition in mid Q2/07, partly offset the lower earnings from the subsidiaries. Fortis' other subsidiaries performed reasonably well, while corporate expenses increased by 50%. The increase in expenses reflects Terasen's acquisition-related finance charges, and Terasen corporate and CustomerWorks Limited Partnership (CWLP) amortization costs and operating expenses, less revenue from CWLP.

Summary of Earnings - Fortis Companies

Quarter Ended June 30			
(\$mm)	2008	2007	Variance

Net Income	29	41	(12)

*Includes Maritime Electric and FortisOntario.

#Includes Belize Electricity, Fortis Turks and Caicos, Caribbean Utilities.

Source: Company Reports

On an earnings per share basis, Fortis' reported EPS in Q2/08 were \$0.19. As per BMO Capital Markets equity research, after adjusting for the one-time items at Belize Electricity Limited (70.1% Fortis); and FortisOntario, comparable EPS of \$0.28 exceeded the First Call Mean of \$0.27 and were slightly below BMO Capital Markets equity research estimate of \$0.30. For a detailed review of Fortis' earnings results, refer to BMO Capital Markets' equity comment by Michael McGowan published August 11, 2008.

Largely reflecting the seasonal nature of Terasen Gas' cash flows and the fact that Fortis' Q2/07 results only included Terasen Inc.'s cash flows from May 17, Fortis' consolidated funds from operations (FFO) in Q2/08 of \$150 million were 30% higher than the same period in 2007.

However, as is the norm with Fortis in view of its heavy capital expenditure outlays, the higher FFO was insufficient to fund its capital expenditure in the quarter (net of customer contributions) of \$204 million, and distributions of \$45 million. The resulting cash flow shortfall of \$99 million was largely met through positive working capital adjustments.

Fortis' large capital expenditure program will dominate its capital outlays and financing activities for the next few years at least, with negative free cash flow expected. In 2008, Fortis utilities are expected to undertake capital expenditure in excess of \$900 million, and in the next five years the company's consolidated expenditure program is expected to exceed \$4.5 billion. Of the expected expenditure, approx. \$3.5 billion is to be undertaken by its electric utilities, with expenditure by its gas utilities expected to exceed \$1 billion.

Fortis' cash flow credit metrics on a rolling 12-months basis to June 30, 2008, were either unchanged or modestly stronger than in Q1/08, but still low relative to peers. As expected, increasing cash flow contributions from Terasen has led to an improving trend in Fortis' FFO-to-total debt ratio to the point that it is now at about its pre-Terasen acquisition level. At the end of Q2/08, the ratio was 12%, a tad higher (essentially due to rounding) than the 11% realized in Q1/08. Despite the improvement, the ratio is expected to remain on the low side for some time as Fortis continues to partially debt finance expansion of its electricity and gas network assets with a delay in receipt of regulated cash flows from the assets constructed. FFO gross interest coverage was 2.7x for the 12 months to June 30, relatively unchanged from Q1/08 and year-end 2007.

Recent Developments

Developments with respect to Fortis in Q2/08 generally involved regulatory developments and growth initiatives at its operating subsidiaries. The developments are not expected to have a material impact on the issuer's credit profile. Some of the more notable developments include:

- The Terasen Gas companies are now substantially integrated into the Fortis Group of companies, with Fortis advising that it is now well-positioned to pursue acquisitions;
- Terasen Gas (Vancouver Island) Inc. has commenced construction of its \$200 million LNG storage. Regulatory approval to construct the facility was received April 1, 2008;
- FortisBC filed its 2009 and 2010 capital plan for gross capex of approx. \$193 million for 2009 and \$196 million for 2010. A decision is expected in Q4/08. In addition, the utility expects to file a 2009 Revenue Requirements Application during Q4/08;
- Newfoundland Power filed with the regulator its 2009 Capital Budget Application of approx. \$62 million;
- In June 2008, the Alberta Utilities Commission issued a decision, ruling that there is sufficient evidence that a review of the ROE level, the adjustment mechanism and utility capital structures in a generic proceeding would be appropriate. The proceeding applies to FortisAlberta and a hearing is scheduled for Q1/09;
- On July 25, Belize Electricity filed an application with the Supreme Court of Belize for judicial review and appeal of the Belize Public Utility Commission's decision regarding the utility's 2008/2009 rate application; and
- Subsequent to quarter end, FortisOntario and Grimsby Power Inc. entered into a non-binding letter of intent for the acquisition by FortisOntario of a 10% interest in Grimsby Power Inc.'s electricity distribution business for cash of approx. \$1.1 million. Grimsby Power Inc. serves approx. 10,000 customers in a service territory that is in close proximity to FortisOntario's operations in Fort Erie. The transaction is structured to take advantage of the existing transfer tax holiday, which expires in October 2008.

Capital Structure and Liquidity

A net reduction in consolidated debt of \$220 million together with issued equity proceeds of \$228 million, mostly in the form of preferred shares, improved Fortis' capital structure in Q2/08. Total consolidated debt at the end of the second quarter was \$5.3 billion, down from \$5.5 billion at the end of the first quarter. Debt repayments of \$629 million in the quarter, the bulk of which were associated with repayments under committed credit facilities and repayment of long-term debt at Terasen Gas, were offset by net proceeds from long-term debt issues of \$409 million. The majority of Fortis' consolidated debt, about 95%, resides at the company's various subsidiaries. Debt at the holding company level comprises:

- a \$100 million of senior unsecured debentures maturing 2010
- US\$150 million senior unsecured notes maturing 2014
- US\$200 million senior unsecured notes maturing 2037
- US\$50 million of outstanding unsecured subordinated convertible debentures due between 2012 and 2016 (US\$60 million initially issued)

Leverage, as measured by total debt-to-total capital and treating the company's preference shares as equity, is marginally above the company's target level of 60%. At the end of Q2/08 leverage was 61%, down two percentage points on that in Q1/08 and down from 64% at year-end 2007.

On a consolidated basis, Fortis' liquidity remains adequate for its operational, capital requirement and refinancing needs. At the end of Q2/08 the company had \$1.8 billion of available credit facilities after drawdowns and outstanding letters of credit under its \$2.2 billion of credit facilities. The available capacity was \$463 million more than at the end of Q1/08. In addition, the company had cash and cash equivalents of \$59 million, down modestly from \$67 million at March 31, 2008. Maturing debt commitments and amortizing debt repayments are manageable with the company facing maturing debt of \$200 million at Terasen Inc. in December 2008 that is expected to be repaid on maturity. In 2009, the company has three small debt maturities totalling \$125 million. In the most recent quarter, Terasen Gas Inc. undertook a \$250 million MTN debt issue, Maritime Electric undertook a \$60 million issue, and FortisAlberta a \$100 million issue.

Credit Ratings

The corporate credit and senior unsecured debt issue ratings on Fortis remained stable and in the absence of a material, largely debt-financed, asset or business acquisition, we do not anticipate any downward pressure on its ratings in the near term.

Standard & Poor's last rating action on Fortis was the upgrade of its corporate credit and senior unsecured debt ratings one and two notches, respectively on June 19, 2007. At the time, the agency advised that the basis for the rating upgrade was the improved diversity resulting from the acquisition of Terasen Inc., the operation of each regulated subsidiary as a separate stand-alone entity with debt non-recourse to Fortis, a commitment to maintaining low levels of debt at the Fortis holding company level, management's continuing focus on pursuing acquisitions in stable, regulated utilities, and the success of key subsidiaries FortisBC and FortisAlberta in executing their capital expansions.

More recently in its industry report card published June 24, 2008, the agency commented on Fortis' dispute with the Belize government regarding rates for Belize Electricity. While Standard & Poor's view the dispute as serious to Belize Electricity, the small proportion of Fortis earnings affected (2%-3%) mean the dispute's consequences are not material to Fortis.

DBRS last confirmed its ratings on Fortis on November 30, 2007 based on its strong credit metrics and low business risk profile driven by its diverse ownership of regulated operating subsidiaries. DBRS viewed the acquisition of Terasen as neutral to slightly positive to the credit profile of Fortis with the improvement in its business risk profile attributable to the stable cash flow and earnings of the established, mature regulated gas utilities, as well as increased diversification the acquisition provides. The agency advises that Fortis' consolidated coverage metrics may be modestly affected by the accelerated capital expenditures of a number of its utility subsidiaries, as earnings and cash flows do not begin until projects are completed and rolled into the rate base of utilities.

Recommendation

With only one Canadian dollar debt issue, a \$100 million debenture due 2010, the opportunity to gain exposure to Fortis is limited. Nevertheless, we view Fortis as a solid credit and one unlikely to cause too much concern for investors. We believe the added fuel and geographic diversity provided by the Terasen acquisition in 2007 has strengthened Fortis' credit profile. We also view Fortis' conservative management as very supportive of its credit quality and that of its operating subsidiaries, especially those that rely on Fortis for ongoing financial and executive support.

Company Description – Fortis is a publicly listed holding company with four key businesses: electric utility operations, regulated natural gas distribution, non-regulated electric power generation and non-utility property activities. Electric power operations include: Newfoundland Power (100%, Newfoundland), Maritime Electric (100%, PEI), Fortis Ontario (100%, Fort Erie, Ontario), Belize Electricity (70.1%, Belize), Caribbean Utilities (56%, Grand Cayman Island), Turks and Caicos (100%, Turks and Caicos),

FortisAlberta (100%, Alberta) and FortisBC (100%, British Columbia). *Website: fortisinc.com*

Recent Results – Fortis reported Q2/08 GAAP EPS of \$0.19. After adjusting for: (1) a \$13 million (\$0.08/share) charge related to the company's share of regulatory disallowances at Belize Electricity Limited (BEL, 70.1% Fortis) associated with BEL's 2008/2009 rate application; and (2) a \$2 million (\$0.01/share) charge related to the repayment of a refund received in 2007 related to cross-

border transmission interconnection agreements at Fortis Ontario, comparable EPS of \$0.28 exceeded the First Call Mean of \$0.27 and were slightly below our estimate of \$0.30.

Corporate Developments – On August 18, Caribbean Utilities Company Ltd. announced that it has issued 2.54 million common shares for gross proceeds of approximately US\$28.2 million, pursuant to a rights offering that was announced on June 23, 2008. Fortis Energy (Bermuda) Ltd., a wholly owned subsidiary of Fortis Inc., acquired 2.16 million common shares during the offering and now owns 56% of the Class A shares issued by Caribbean Utilities, up from 54%.

On June 27, the Belize Public Utilities Commission (PUC) released its final decision for BEL's annual tariff application, which was filed on April 2. The PUC's final decision is largely consistent with the preliminary decision issued on May 2. Specifically, the PUC's final decision

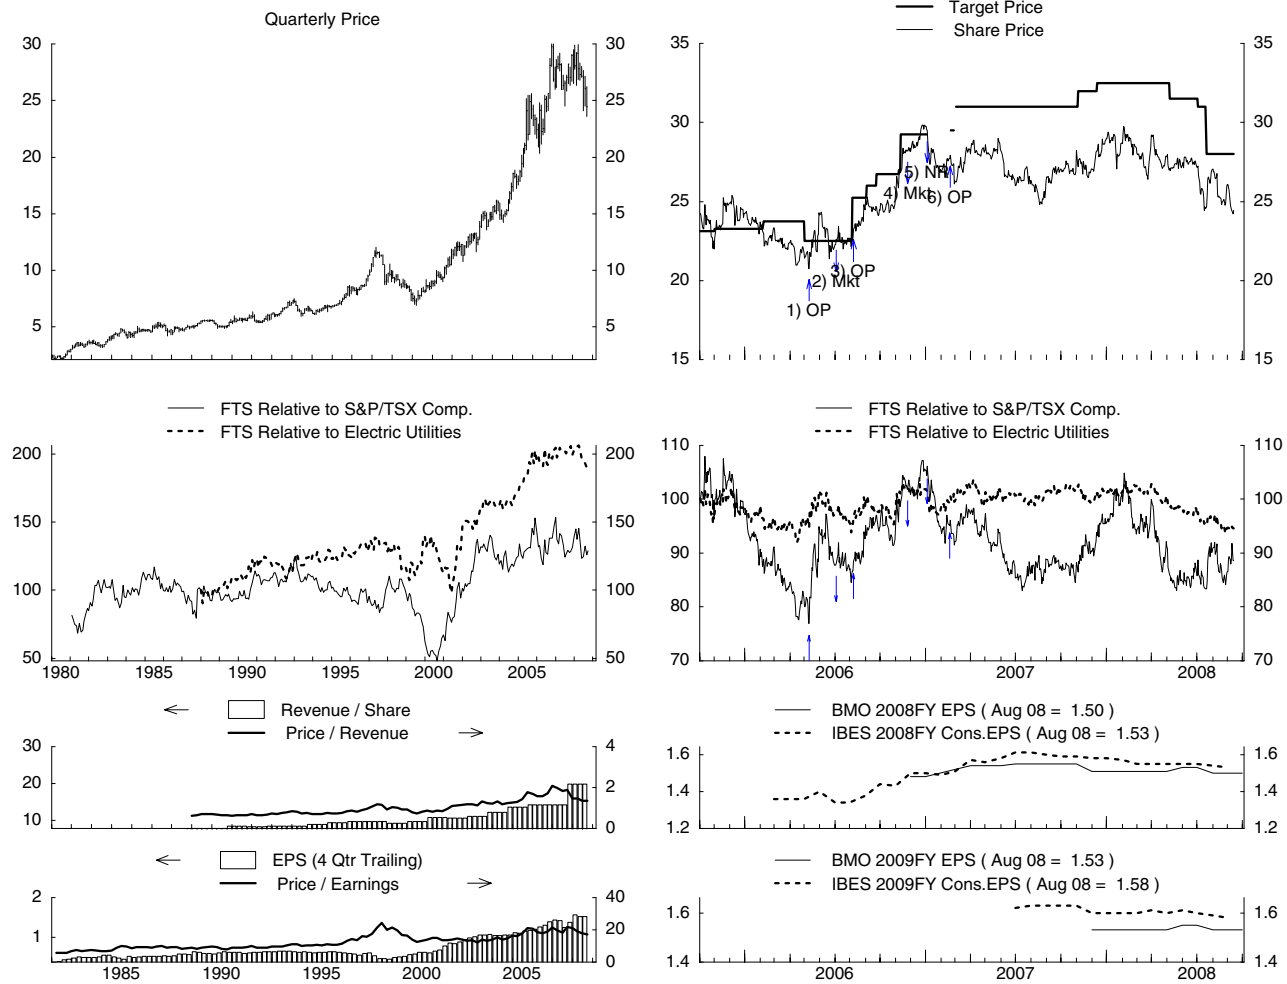

appears to: (1) maintain current electricity rates at BZ\$0.441/kWh; (2) result in regulatory disallowances totalling BZ\$36 million (C\$12.6 million of which is Fortis' share); and (3) lower BEL's allowed return on rate base to 10% from 12%. PUC's decision is expected to reduce the annual earnings contribution from BEL by approximately C\$6 million or \$0.04 per share.

Forecasts – Our diluted EPS estimates are \$1.50 in 2008 and \$1.53 in 2009.

Valuation – Our \$28.00 target price reflects a weighted valuation approach: 17x diluted 2009E EPS of \$1.53 (12.5%), 1.75x 2009E BVPS of \$18.63, and a target yield of 3.75% (75%), assuming 2009E dividends per share of \$1.04.

Recommendation – We believe that Fortis' shares are attractively valued, considering its large organic growth pipeline. Our rating is Outperform. Member of Top 15 Income and Value stock selections.

Company Risk Disclosure

In addition to the risks involved in investing in common stocks generally, we also highlight the following risks that pertain to this company. Operations are subject to complex regulation by a variety of provincial, state and federal (Canada, Cayman Islands & Belize) agencies. Changes in regulation may adversely affect performance.

Financial performance depends on the availability of installed generation and the production of electric power by third parties. Fortis Properties' cash flow is dependent on hotel room vacancy rates and commercial building occupancy levels. The company's operations in Belize may be disrupted and assets may be damaged by hurricanes and/or tropical storms.

Ratings Key

We use the following ratings system definitions:

OP = Outperform - Forecast to outperform the market;

Mkt = Market Perform - Forecast to perform roughly in line with the market;

Und = Underperform - Forecast to underperform the market;

(S) = speculative investment;

NR = No rating at this time;

R = Restricted – Dissemination of research is currently restricted.

Market performance is measured by a benchmark index such as the S&P/TSX Composite Index, S&P 500, Nasdaq Composite, as appropriate for each company. Prior to September 1, 2003, a fourth rating tier—Top Pick—was used to designate those stocks we felt would be the best performers relative to the market. Our six Top 15 lists which guide investors to our best ideas according to six different objectives (large, small, growth, value, income and quantitative) have replaced the Top Pick rating.

Dissemination of Research

Our research publications are available via our web site <http://bmocapitalmarkets.com>. Institutional clients may also receive our research via FIRST CALL Research Direct and Reuters. All of our research is made widely available at the same time to all BMO NB, BMO Capital Markets Ltd., BMO Capital Markets Corp. and BMO Nesbitt Burns Securities Ltd. client groups entitled to our research. Please contact your investment advisor or institutional salesperson for more information.

Conflict Statement

A general description of how BMO Financial Group identifies and manages conflicts of interest is contained in our public facing policy for managing conflicts of interest in connection with investment research which is available at http://equityresearch.bmogc.net/conflict_statement.asp

Turks and Caicos Restoring Power After Hurricane Ike

Impact

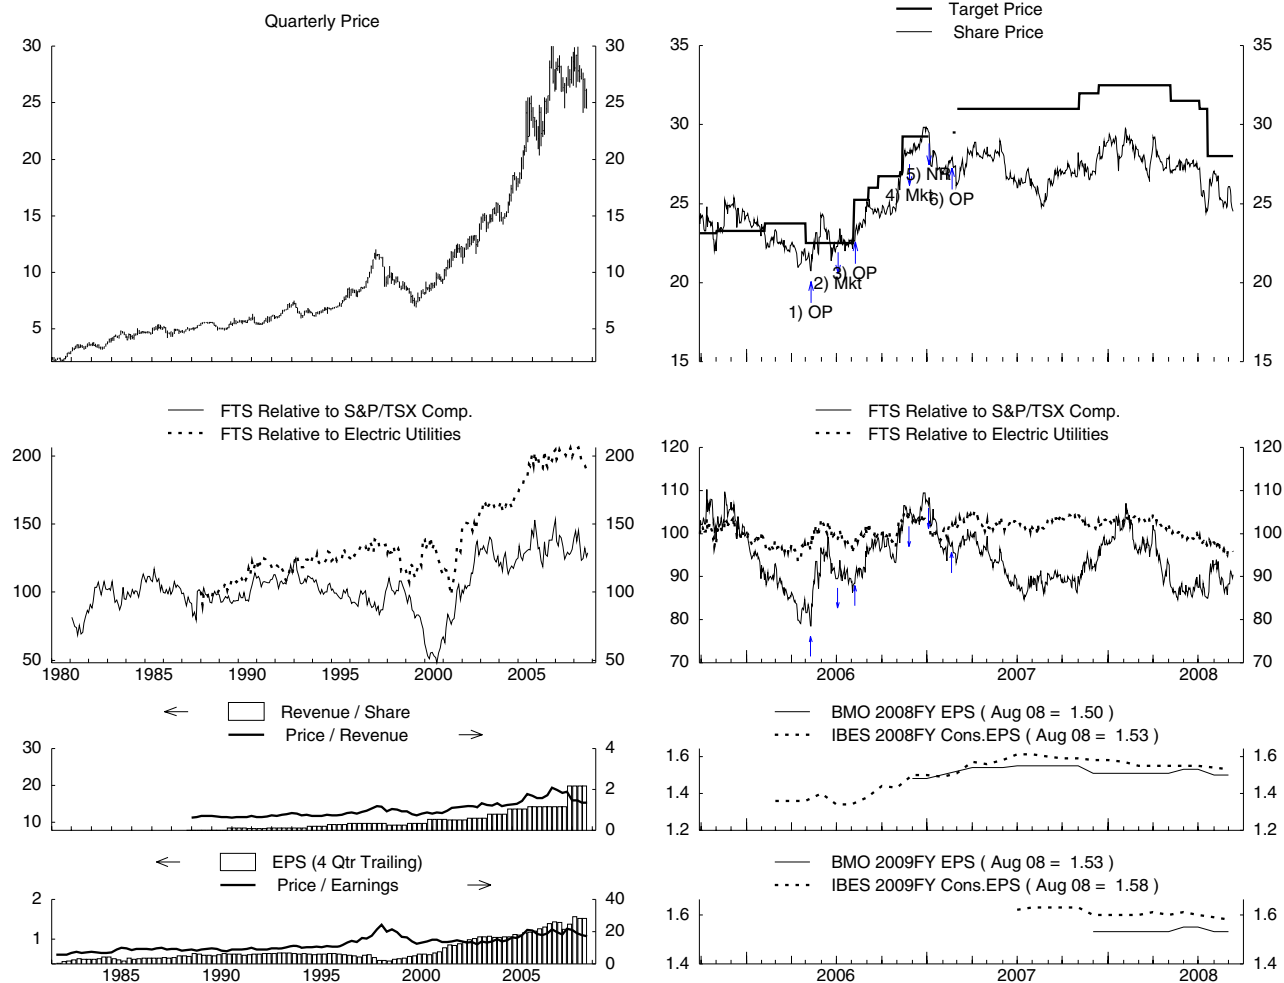

Mixed

Details & Analysis

On September 8, Fortis issued a press release stating that Fortis Turks and Caicos ("Fortis TCI"; 100% Fortis Inc.) is working to restore electricity service to its customers after Hurricane Ike, a Category 4 Hurricane, passed through the Turks and Caicos Islands. Fortis has indicated that there does not appear to be substantial damage to its power generation facilities. Although it is too early to determine the costs associated with transmission system repairs or whether Fortis TCI will draw on its hurricane insurance, it is our understanding that Fortis TCI is able to utilize the following mechanisms to recovery hurricane related costs: (1) if the utility's actual return on assets is below the allowed regulated return of 17.5%, Fortis TCI may apply for a rate increase in order to collect the variance the following year; (2) Fortis TCI can capitalize hurricane-related repairs for potential collection in future rates; and (3) plant and property impaired by the storm could be accounted for as a regulatory deferral and collected in future rates. Management has noted that the impact of Hurricane Ike on Fortis TCI's service area in Providenciales is far less severe than the damage caused by Hurricane Ivan to Caribbean Utilities' (56% Fortis Inc.) service area in 2004. Management will assess the impact to Fortis TCI's earnings after electricity service has been restored to the island.

**Company Risk Disclosure**

In addition to the risks involved in investing in common stocks generally, we also highlight the following risks that pertain to this company. Operations are subject to complex regulation by a variety of provincial, state and federal (Canada, Cayman Islands & Belize) agencies. Changes in regulation may adversely affect performance.

Financial performance depends on the availability of installed generation and the production of electric power by third parties. Fortis Properties' cash flow is dependent on hotel room vacancy rates and commercial building occupancy levels. The company's operations in Belize may be disrupted and assets may be damaged by hurricanes and/or tropical storms.

Analyst's Certification

I, Michael McGowan, CA, CFA, hereby certify that the views expressed in this report accurately reflect my personal views about the subject securities or issuers. I also certify that no part of my compensation was, is, or will be, directly or indirectly, related to the specific recommendations or views expressed in this report.

General Disclosure

The information and opinions in this report were prepared by BMO Nesbitt Burns Inc. and BMO Nesbitt Burns Ltée./Ltd., collectively ("BMO NB"). BMO NB is not subject to U.S. rules with regard to the preparation of research reports and the independence of analysts. "BMO Capital Markets" is a trade name used by the BMO Investment Banking Group, which includes the wholesale arm of Bank of Montreal and its subsidiaries BMO NB in Canada, BMO Capital Markets Ltd. in the U.K. and BMO Capital Markets Corp. in the U.S. BMO Capital Markets Ltd. and BMO Capital Markets Corp. are affiliates of BMO NB. Bank of Montreal or its subsidiaries ("BMO Financial Group") has lending arrangements with, or provide other remunerated services to, many issuers covered by BMO NB research. A significant lending relationship may exist between BMO Financial Group and certain of the issuers mentioned herein. The opinions, estimates and projections contained in this report are those of BMO NB as of the date of this report and are subject to change without notice. BMO NB endeavours to ensure that the contents have been compiled or derived from sources that we believe are reliable and contain information and opinions that are accurate and complete. However, BMO NB makes no representation or warranty, express or implied, in respect thereof, takes no responsibility for any errors and omissions contained herein and accepts no liability whatsoever for any loss arising from any use of, or reliance on, this report or its contents. Information may be available to BMO NB or its affiliates that is not reflected in this report. The information in this report is not intended to be used as the primary basis of investment decisions, and because of individual client objectives, should not be construed as advice designed to meet the particular investment needs of any investor. This material is for information purposes only and is not an offer to sell or the solicitation of an offer to buy any security. The research analyst and/or associates who prepared this report are compensated based upon (among other factors) the overall profitability of BMO NB and its affiliates, which includes the overall profitability of investment banking services. BMO NB, or its affiliates expect to receive or will seek compensation for investment banking services within the next 3 months from all issuers covered by BMO NB. BMO NB or its affiliates will buy from or sell to customers the securities of issuers mentioned in this report on a principal basis. BMO NB or its affiliates, officers, directors or employees may have a long or short position in the securities discussed herein, related securities or in options, futures or other derivative instruments based thereon. The reader should assume that BMO NB, BMO Capital Markets Ltd., BMO Capital Markets Corp., Bank of Montreal or their affiliates may have a conflict of interest and should not rely solely on this report in evaluating whether or not to buy or sell securities of issuers discussed herein.

Company Specific Disclosure

Disclosure 2: BMO NB has undertaken an underwriting liability with respect to this issuer within the past 12 months.

Disclosure 3: BMO NB has provided investment banking services with respect to this issuer within the past 12 months.

Disclosure 7: BMO Capital Markets Corp. or an affiliate has received compensation for investment banking services from this issuer within the past 12 months.

Disclosure 9: BMO Capital Markets Corp. or an affiliate received compensation for products or services other than investment banking services within the past 12 months.

Disclosure 10: This issuer is a client (or was a client) of BMO NB, BMO Capital Markets Corp. or an affiliate within the past 12 months: Investment Banking Services & Non-Securities Related Services.

Ratings Key

We use the following ratings system definitions:

OP = Outperform - Forecast to outperform the market;

Mkt = Market Perform - Forecast to perform roughly in line with the market;

Und = Underperform - Forecast to underperform the market;

(S) = speculative investment;

NR = No rating at this time;

R = Restricted – Dissemination of research is currently restricted.

Market performance is measured by a benchmark index such as the S&P/TSX Composite Index, S&P 500, Nasdaq Composite, as appropriate for each company. Prior to September 1, 2003, a fourth rating tier—Top Pick—was used to designate those stocks we felt would be the best performers relative to the market. Our six Top 15 lists which guide investors to our best ideas according to six different objectives (large, small, growth, value, income and quantitative) have replaced the Top Pick rating.

Dissemination of Research

Our research publications are available via our web site <http://bmocapitalmarkets.com>. Institutional clients may also receive our research via FIRST CALL Research Direct and Reuters. All of our research is made widely available at the same time to all BMO NB, BMO Capital Markets Ltd., BMO Capital Markets Corp. and BMO Nesbitt Burns Securities Ltd. client groups entitled to our research. Please contact your investment advisor or institutional salesperson for more information.

Conflict Statement

A general description of how BMO Financial Group identifies and manages conflicts of interest is contained in our public facing policy for managing conflicts of interest in connection with investment research which is available at http://equityresearch.bmogc.net/conflict_statement.asp

Q3/08 Results Exceed Expectations, Assisted By Tax Benefits

Impact

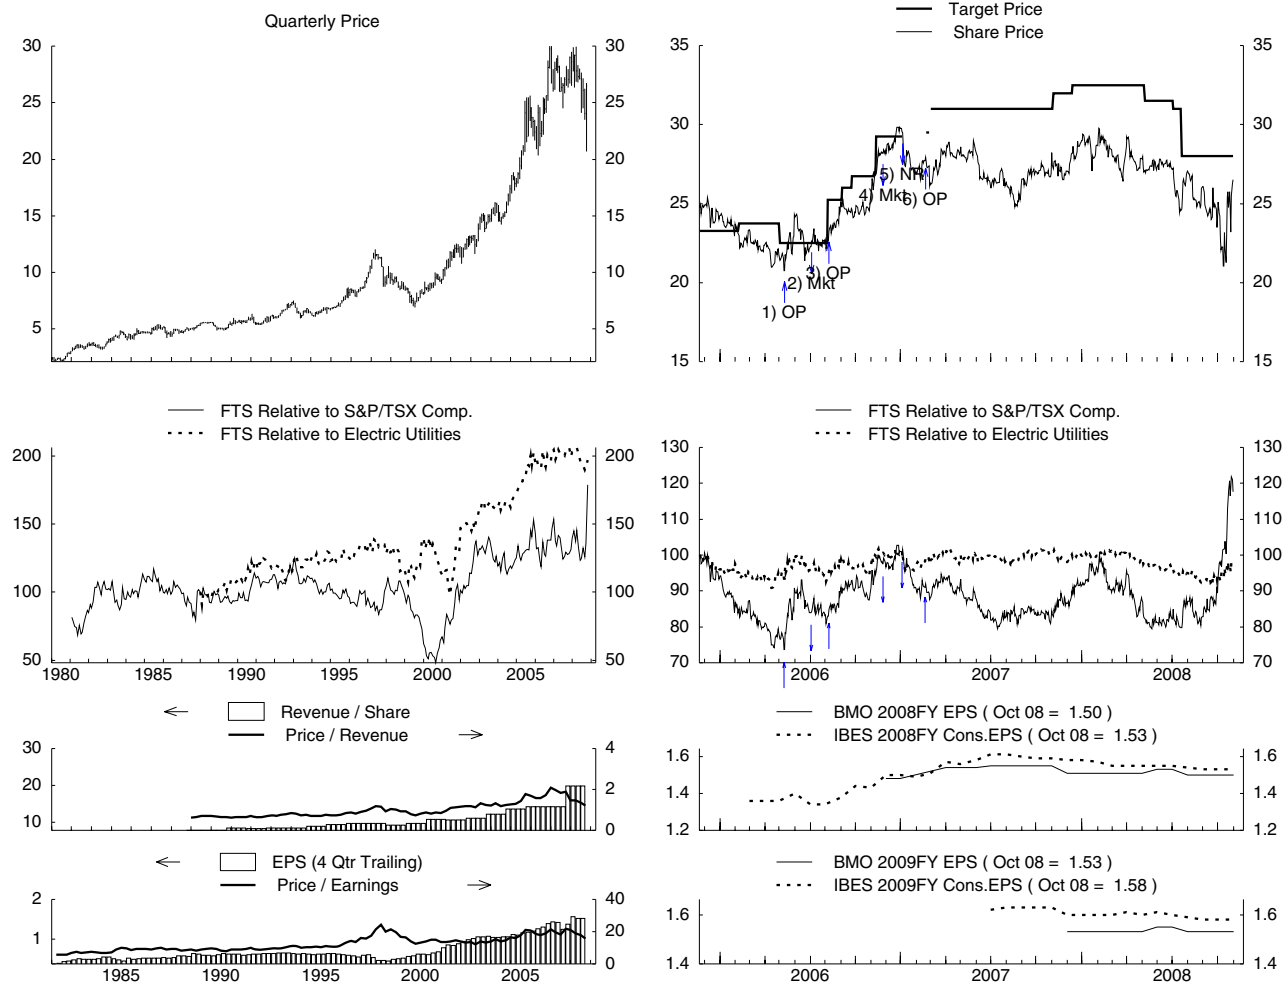

Slightly Positive

Details & Analysis

Fortis reported Q3/08 GAAP EPS of \$0.31. After adjusting for a \$7.5 million tax recovery regarding the settlement of legislation related to interprovincial tax structures, comparable Q3/08 EPS of \$0.26 were higher than our estimate of \$0.22 and the First Call Mean estimate of \$0.21. The variance between expected and actual results largely appears to be due to a \$4.5 million (\$0.03/share) recovery of future income taxes related to AESO deferral account balances at FortisAlberta that were previously expensed during the first half of 2008. The remainder of Fortis' business segments (especially Fortis BC, Terasen Gas, and Fortis Generation) appear to have performed well during the quarter. Other notable items from the release include: (1) the company estimates that Hurricane Ike reduced earnings at Fortis Turks and Caicos by approximately \$1 million; (2) the company's five-year capital budget remains at \$4.5 billion, consistent with guidance provided during Q2/08; and (3) on October 3, 2008, Belize Electricity Limited (BEL, 70.1% Fortis) was granted leave by the Supreme Court of Belize to apply for a judicial review of the Belize Public Utility Commission's final decision on BEL's 2008–2009 rate application. The judicial review is expected to be heard in late 2008.

This report was prepared by an Analyst employed by a Canadian affiliate, BMO Nesbitt Burns Inc., and who is not registered as a research analyst under FINRA rules. For disclosure statements, including the Analyst's Certification, please refer to pages 2 to 4.

Research Comment

Corporate Debt – Utilities

Laurence Conheady

(416) 359-4584

laurence.conheady@bmo.com

Q3/08 EPS Above Expectations; Cash Flow Slightly Lower, But Metrics Stable

Event: Fortis Inc. (Fortis) released Q3/08 financial results.

Impact: Neutral.

Key Points: Reflecting in part a \$7.5 million tax reduction at the Terasen group of companies, Fortis Inc. recorded a 58% increase in earnings in Q3/08 versus Q3/07. After adjusting for the tax recovery, comparable EPS of \$0.26 were higher than BMO Capital Markets' equity research estimate of \$0.22 and the First Call Mean of \$0.21. FFO dipped by \$15 million with the lower FFO, reflecting more of a decline from an elevated level the year earlier than weaker performance. Fortis' credit metrics remain low versus peers but are relatively stable. Access to liquidity remains adequate and leverage moved marginally higher on the back of higher debt.

Credit and Spread Implications

Near Term: We do not expect Fortis' Q3/08 results to materially impact the spreads on its short-dated issue due 2010.

Medium Term: Potential exists for some uncertainty in Fortis' credit profile and ratings as it pursues further asset and business acquisitions. Should Fortis' credit quality come under pressure, we believe it is likely to be temporary as Fortis has demonstrated a successful track record of managing its credit profile longer term.

Recommendation

With only one Canadian dollar debt issue, a \$100 million debenture due 2010, the opportunity to gain exposure to Fortis is limited. Nevertheless, we view Fortis as a solid credit and one unlikely to cause too much concern for investors. Should it undertake a debt issue, possibly to refinance upcoming maturing debt at Terasen Inc., we would suggest investors take advantage of the limited opportunity it would offer to gain exposure to the credit. We also view Fortis' conservative management as very supportive of its credit quality and that of its operating subsidiaries, especially those that rely on Fortis for ongoing financial and executive support.

Source: BMO Capital Markets

Relative Value

Sector Value: We believe that Fortis' current 5-year indicative spreads offer good relative value compared to those of similarly rated peers. The only problem for investors is trying to get access to the limited issue outstanding.

Credit Curve: Fortis' single Canadian dollar debt issue limits the opportunity for investors to pursue relative value trades along the issuer's credit curve. The relatively illiquid nature of its paper is also a pricing consideration.

Details & Analysis

Earnings and Cash Flow

Reflecting in part a \$7.5 million tax reduction at the Terasen group of companies, Fortis Inc. recorded a 58% increase in earnings in Q3/08 versus that realized in the corresponding period a year earlier. Excluding the tax reduction associated with the settlement of historical tax matters at Terasen, Q3/08 earnings were 34% higher than a year earlier. Also contributing to the higher earnings was the following:

- the favourable impact of a shift in the quarterly distribution of annual purchased power expense at Newfoundland Power, which increased its earnings by approx. \$5.5 million;
- lower energy supply costs at FortisBC;
- higher corporate tax recoveries at FortisAlberta; and
- Higher returns from non-regulated Fortis generation, reflecting higher hydroelectric production due to higher rainfall in Belize and upper New York State.

Partly offsetting the higher earnings from the Canadian regulated electric utilities were lower earnings at Caribbean regulated utilities related to the 3.25% reduction in basic electricity rates at Caribbean Utilities, effective January 1, 2008; the lower allowed rate of return on the rate base assets at Belize Electricity; and a loss of revenue at Fortis Turks and Caicos due to the impact of Hurricane Ike, partially offset by overall growth in electricity sales.

Summary of Earnings - Fortis Companies			
Quarter Ended September 30			
(\$mm)	2008	2007	Variance

[#]Includes Belize Electricity, Fortis Turks and Caicos, Caribbean Utilities.

Source: Company Reports

Fortis reported EPS of \$0.31. As per BMO Capital Markets equity research, after adjusting for the \$7.5 million tax recovery, comparable Q3/08 EPS of \$0.26 were higher than BMO Capital Markets' equity research estimate of \$0.22 and the First Call Mean of \$0.21. The variance between expected and actual results largely appears to be due to a \$4.5 million (\$0.03/share) recovery of future income taxes related to AESO deferral account balances at FortisAlberta that were previously expensed during the first half of 2008. The rest of Fortis' business segments (especially Fortis BC, Terasen Gas, and Fortis Generation) performed well during the quarter. For a more detailed review of Fortis' earnings results, refer to BMO Capital Markets' equity comment by Michael McGowan published Nov. 3, 2008.

Fortis' funds from operations (FFO) dipped by \$15 million or 10% in Q3/08 relative to that realized in the same period a year earlier. The lower FFO in the most recent quarter reflected more a decline from an elevated level the year earlier than weaker performance in Q3/08. More particularly, contributing to the dip was lower cash flows from FortisAlberta relative to what the utility realized in Q3/07. In Q3/07, FortisAlberta included in its FFO proceeds from the sale of its 2006 AESO charges deferral account and a \$12 million tax refund.

Fortis' heavy capex outlays ensured that it again realized negative free cash flow in Q3/08, as it will for the next few years. FFO of \$131 million was insufficient to meet capex (net of customer contributions) of \$203 million and distributions of \$46 million. The cash flow shortfall was met through an increase in short-term borrowings and draw-downs under credit facilities. The company's large capex program will dominate its capital outlays and financing activities for the next few years at least, with negative free cash flow expected. Fortis expects gross consolidated capex to exceed \$4.5 billion in the next five years, driven largely by the Terasen companies, FortisAlberta, FortisBC, and the company's regulated utility operations in the Caribbean. For 2008, the company is looking to spend over \$900 million.

Fortis' cash flow credit metrics on a rolling-12-months basis to September 30, 2008, remain low compared to peers but nevertheless relatively stable. More particularly, FFO gross interest coverage was 2.7x for the 12-months to the end of the third quarter as it has been for the past three quarters.

A metric showing slightly more variability is the company's FFO-to-debt. As expected, it has improved over the past few quarters as the company received increasing cash flow contributions from Terasen. The ratio is now back in the range of its pre-Terasen acquisition level. At the end of Q3/08, the ratio was 11%, slightly down on the 12% realized in Q2/08, although it should be noted that the increase in Q2/08 was in part due to rounding. Despite the improved FFO-to-debt ratio in recent times, it is expected to remain on the low side for some time as Fortis continues to partially debt finance expansion of its electricity and gas network assets with a delay in receipt of regulated cash flows from the assets constructed.

Recent Developments

- On October 3, 2008, Belize Electricity Limited (70.1% Fortis) was granted leave by the Supreme Court of Belize to apply for a judicial review of the Belize Public Utility Commission's final decision on Belize Electricity Limited's 2008-2009 rate application. The company expects the judicial review to be heard in late 2008;
- In October Maritime Electric filed for a basic rate increase, effective April 1, 2009. The application reflects an increase in energy-related costs;
- In September, FortisBC filed its 2009 rate application requesting a general rate increase, effective January 1, 2009. The increase reflects the impact of ongoing investments in infrastructure and increasing power purchases;
- In September, Hurricane Ike struck the Turks and Caicos Islands causing damage to the distribution system of Fortis Turks and Caicos. The company estimates that Hurricane Ike reduced the utility's earnings by approximately \$1 million;
- Fortis has advised that following a revision in Q3/08 of the tax treatment associated with AESO transmission tariff payments, FortisAlberta is no longer expected to experience fluctuations in corporate income taxes associated with the operation of the AESO charges deferral account. As a result, the current two-year lag between the recording future income tax impacts and payment of the transmission tariff amounts to the AESO and the collection from customers is not expected to occur; and
- In August Newfoundland Power extended its \$100 million revolving credit facility to August 2011. The facility was due to expire in January 2009.

Capital Structure and Liquidity

Fortis consolidated debt outstanding moved higher in the third quarter by \$276 million, largely on the back of increased short-term borrowings of \$160 million and net borrowings under credit facilities of \$103 million. No long-term debt issues were undertaken by Fortis or its subsidiaries in Q3/08. Total consolidated debt at the end of the third quarter was \$5.6 billion, about 90% of which resides at the company's various subsidiaries. Of the \$550 million to \$600 million of debt issues at the holding company level (depending on the prevailing US\$/C\$ exchange rate) only one, a \$100 million senior unsecured debenture maturing 2010, is a Canadian dollar issue.

Leverage, as measured by total debt-to-total capital and treating the company's preference shares as equity, continues to be marginally above the company's target level of 60% as it has been for the last six quarters. At the end of Q3/08, increased debt commitments in the quarter moved leverage to 62%, up from 61% at mid-year but still below its most recent high of 64% at year-end 2007.

On a consolidated basis, Fortis' liquidity remains adequate for its operational, capital requirement and refinancing needs. At the end of Q3/08 the company had:

- \$1.5 billion of available credit facilities after draw downs and outstanding letters of credit under its \$2.2 billion of credit facilities, down from \$1.8 billion at mid-year; and
- cash and cash equivalents of \$68 million, \$9 million more than at June 30, 2008.

In addition, the company faces no material credit facility renewal risk, although we note one of the subsidiaries, FortisBC, faces a facility renewal in May 2009. Further, the company does not face material debt refinancing risk. Between now and the end of 2009, Fortis Inc. and its subsidiaries have \$325 million in maturities including a \$200 million maturity of Terasen Inc. in December 2008 which is to be repaid on maturity, and three small debt maturities totalling \$125 million.

Credit Ratings

The corporate credit and senior unsecured debt issue ratings on Fortis remained stable and in the absence of a material largely debt-financed asset or business acquisition, we do not anticipate any downward pressure on its ratings in the near term.

Standard & Poor's stable outlook on the Fortis rating reflects the underlying operational and financial stability of Fortis' operating companies. The agency advises that the two main factors that could lead to lower ratings would be if Fortis materially elevated its leverage, or if one of its larger subsidiaries encountered major financial or operational difficulties. On the flip side, the agency sees little chance of a positive outlook or upgrade in the near term, but they could occur as a result of further diversification. Embedded in the rating is an expectation that Fortis will remain acquisitive in the next few years, with the agency noting that further acquisitions should not prompt a downgrade, provided they remain consistent within the company's regulated focus and expertise and were financed consistent with current financial policies.

DBRS last confirmed its ratings on Fortis on November 30, 2007, based on its strong credit metrics and low business risk profile driven by its diverse ownership of regulated operating subsidiaries. DBRS viewed the acquisition of Terasen as neutral to slightly positive to the credit profile of Fortis with the improvement in its business risk profile attributable to the stable cash flow and earnings of the established, mature regulated gas utilities, as well as increased diversification the acquisition provides. The agency advises that Fortis' consolidated coverage metrics may be modestly impacted by the accelerated capital expenditures of a number of its utility subsidiaries, as earnings and cash flows do not begin until projects are completed and rolled into the rate base of utilities.

Recommendation

With only one Canadian dollar debt issue, a \$100 million debenture due 2010, the opportunity to gain exposure to Fortis is limited. Nevertheless, we view Fortis as a solid credit and one unlikely to cause too much concern for investors. Should it undertake a debt issue, possibly to refinance upcoming maturing debt at Terasen Inc., we would suggest investors take advantage of the limited opportunity it would offer to gain exposure to the credit. We also view Fortis' conservative management as very supportive of its credit quality and that of its operating subsidiaries, especially those that rely on Fortis for ongoing financial and executive support.

Q3/08 Earnings Above Expectations, Assisted by Tax Benefits

Event

Fortis reported Q3/08 GAAP EPS of \$0.31. After adjusting for a \$7.5 million tax recovery regarding a settlement related to interprovincial tax structure legislation, comparable Q3/08 EPS of \$0.26 were higher than our estimate of \$0.22 and the First Call Mean estimate of \$0.21. The variance between expected and actual results largely appears to be due to a \$4.5 million (\$0.03/share) recovery of future income taxes related to AESO deferral account balances at FortisAlberta that were previously expensed during the first half of 2008. The remainder of Fortis' business segments (especially Fortis BC and Fortis Generation) performed well during the quarter.

Impact

Slightly Positive.

Forecasts

We have updated our forecasts to reflect reported results, increased our foreign exchange assumption to 1.20 CAD = 1.00 USD from our previous assumption of parity and slightly increased our earnings estimates from Terasen Gas where results have consistently been above our estimates.

Valuation

Our valuation reflects a weighted approach: 17x diluted 2009E EPS of \$1.57 (12.5%), 1.70x 2009E book value per share of \$18.66 and a target yield of 3.75% (75%), assuming 2009E dividends per share of \$1.04. Our diluted EPS estimates increase to \$1.54 from \$1.50 in 2008 to \$1.57 from \$1.53 in 2009, and we are introducing our 2010 diluted EPS estimate of \$1.63.

Recommendation

We believe that Fortis' shares are attractively valued, considering its relatively low-risk, diversified business model. Our rating is Outperform.

Price (31-Oct) \$26.30 **52-Week High** \$29.94

 2009E \$1.53 to \$1.57

Q3/08 Results Exceed Expectations; Expect Steady Hand Over Next Few Quarters

Fortis reported Q3/08 GAAP EPS of \$0.31. After adjusting for a \$7.5 million tax recovery regarding a settlement related to interprovincial tax structure legislation, comparable Q3/08 EPS of \$0.26 were higher than our estimate of \$0.22 and the First Call Mean estimate of \$0.21. The variance between expected and actual results largely appears to be due to a \$4.5 million (\$0.03/share) recovery of future income taxes related to AESO deferral account balances at FortisAlberta that were previously expensed during the first half of 2008. The remainder of Fortis' business segments (especially Fortis BC and Fortis Generation) performed well during the quarter.

Much of Fortis' recent growth has been the result of business combinations: FortisAlberta and FortisBC were acquired in May 2004, and Terasen Inc was acquired in May 2007. Although we believe that Fortis will continue to expand through acquisitions, the difficulty of raising financing in tumultuous equity and credit markets may limit near-term acquisition opportunities.

We therefore believe that in the short term Fortis will continue to optimize its various business segments and progress on its five-year \$4.5 billion capital expenditure program.

We continue to believe that Fortis' shares are attractively valued, considering its relatively low-risk, diversified business model. We are maintaining our \$28 price target and our Outperform rating.

Q3/08 Results

As set out in Table 1, Q3/08 GAAP income of \$49 million was \$18 million higher than net income of \$31 million reported in Q3/07. After adjusting for a \$7.5 million tax recovery regarding a settlement related to interprovincial tax structure legislation, Q3/08 adjusted income of \$41.5 million was 33.9% higher than net income of \$31 million in Q3/07. A discussion of the operating performance of each business segment follows below.

Table 1: Historical Results by Segment

Source: BMO Capital Markets, Company Reports

Regulated Gas Utilities – Terasen Gas Companies

Terasen Inc.'s GAAP results included a \$5.5 million tax benefit regarding the settlement of a case related to interprovincial tax structures. Approximately \$2 million of the \$7.5 million tax benefit received during Q3/08 was recorded in the corporate segment. After adjusting for this tax benefit, reported results at Terasen Gas were consistent with those reported in Q3/07.

Regulated Electric Utilities – FortisAlberta

Net earnings at FortisAlberta in Q3/08 were \$17 million compared to \$15 million in Q2/07. Included in reported results was a \$4.5 million recovery of future income taxes expensed during the first half of 2008, which are related to deferral account balances associated with charges levied by the Alberta Electric System Operator that are either refundable or recoverable in customer rates. Reported results in Q3/07 included approximately \$3 million of tax recoveries related to the AESO deferral account balances. Excluding these tax recoveries, reported results at Fortis Alberta would have been \$12.5 million in Q3/08, or approximately 4.2% higher than net income of \$12 million (excluding tax recoveries) earned in Q3/07.

Regulated Electric Utilities – FortisBC

Net earnings at Fortis BC increased by \$2 million in Q3/08 compared to Q3/07. The increase was largely due to decreased energy supply costs, as the company was able to generate a higher proportion of energy from company-owned hydroelectric facilities as opposed to purchasing power.

Regulated Electric Utilities – Newfoundland Power

Net earnings from Newfoundland Power were \$8 million in Q3/08, up from \$2 million in Q3/07. The quarter-over-quarter variance was primarily due to a regulatory decision that modified the way purchased power expenses are allocated between quarters. Previously, monthly purchased power expenses were recognized based on an estimate of actual costs, with variances between actual and estimated purchased power expenses accrued to a deferral account that was discontinued, effective January 1, 2008. Newfoundland Power now recognizes the actual cost of purchased power each month. Although this change in regulatory accounting is not expected to impact annual earnings, the change in regulatory accounting increased earnings at Newfoundland Power by \$5.5 million in Q3/07.

Regulated Electric Utilities – Caribbean

Net earnings at the Caribbean business segment fell to \$7 million in Q3/08 compared to \$10 million in Q3/07. Lower revenues caused by Hurricane Ike reduced earnings at Fortis Turks and Caicos by approximately \$1 million during Q3/08 and are expected to reduce earnings by a further \$1 million in Q4/08. Fortis is in the preliminary stage of determining a claim under business interruption insurance. Business interruption insurance at Fortis Turks and Caicos carries a 30-day deductible.

The remainder of the decrease was the result of lower earnings at Belize Electricity Limited (BEL, 70.1% Fortis), caused by the Belize Public Utility Commission's final decision on BEL's 2008–2009 rate application, which effectively reduced BEL's allowed return on assets; and reduced earnings at Caribbean Utilities (57% Fortis) due to the elimination of the hurricane cost recovery surcharge effective January 1, 2008.

Unregulated – Fortis Generation

Strong hydrology and higher realized power prices increased earnings at Fortis Generation to \$9 million in Q3/08 compared to \$5 million in Q3/07.

Unregulated – Fortis Properties

Net earnings at Fortis properties increased to \$9 million in Q3/08 compared to \$8 million in Q3/07. The increase largely reflects contributions from the Delta Regina, which was acquired on August 1, 2007, and improved performance at properties located in Atlantic Canada. Revenue per available room (REVPAR) fell during Q3/08, but to \$93.64 from \$95.11 in Q3/07. In addition, occupancy declined slightly to 96.6% in Q3/08 compared to 96.9% in Q3/07.

Capital Expenditure Update

Consistent with guidance contained in the Q2/08 earnings release, Fortis' five-year capital budget remains at \$4.5 billion (up from a target of \$4 billion in early 2008). Approximately \$3.5 billion is expected to be spent in the regulated electricity business, with the majority at FortisAlberta and FortisBC. Capital expenditures at Terasen Gas over the next five years are expected to be approximately \$1 billion.

Details on specific capital projects contained in the Q3/08 earnings release are:

- FortisAlberta has begun the second phase of a program to replace conventional meters in its service area with new automated meters. Overall, FortisAlberta's meter replacement program expected to cost \$124 million and will convert approximately 435,000 customers to automated meters over a four year period that began in 2007.
- In October, FortisBC received approval from the British Columbia Utilities Commission for a \$141 million project to upgrade the transmission system in the Okanagan region of British Columbia. The project includes upgrading the existing overhead transmission line running from Vaseux Lake to the Oliver and Penticton regions of BC from 161 kV to 230 kV. In addition, a new 230 kV transmission line running from Vaseux Lake to Penticton will also be constructed.
- Fortis Properties intends to expand the Holiday Inn in Kelowna, BC, by adding 70 rooms and 4,000 square feet of meeting room space. Construction of this project is expected to begin in late 2008, with completion targeted for January 2010. The capital cost of this initiative is \$13 million.

Our estimate of Fortis' planned capital expenditures for the remainder of 2008 is set out in Table 2.

Table 2: Capital Expenditure by Business Segment

Segment	Q1/08	Q2/08	Q3/08	Q4/08E	2008E	% of Total
Terasen Gas Companies	\$40	\$56	\$56	\$98	\$250	26.9%
FortisAlberta	\$63	\$81	\$78	\$64	\$286	30.8%

Other Items

- On October 3, 2008, BEL was granted leave by the Supreme Court of Belize to apply for a judicial review of the Belize Public Utility Commission's final decision on BEL's 2008-2009 rate application. The judicial review is expected to be heard in late 2008.
- The capital cost to repair damage caused by Hurricane Ike has been estimated at approximately \$6 million. Fortis expects that damage repair expenditures made by Fortis Turks and Caicos will qualify as rate base additions and that the company will be allowed to earn a return on and of this capital.

Estimates

Our valuation reflects a weighted approach: 17x diluted 2009E EPS of \$1.57 (12.5%), 1.70x 2009E book value per share of \$18.66 and a target yield of 3.75% (75%), assuming 2009E dividends per share of \$1.04. Our diluted EPS estimates increase to \$1.54 from \$1.50 in 2008 to \$1.57 from \$1.53 in 2009, and we are introducing our 2010 diluted EPS estimate of \$1.63.

Company Risk Disclosure

In addition to the risks involved in investing in common stocks generally, we also highlight the following risks that pertain to this company. Operations are subject to complex regulation by a variety of provincial, state and federal (Canada, Cayman Islands & Belize) agencies. Changes in regulation may adversely affect performance.

Financial performance depends on the availability of installed generation and the production of electric power by third parties. Fortis Properties' cash flow is dependent on hotel room vacancy rates and commercial building occupancy levels. The company's operations in Belize may be disrupted and assets may be damaged by hurricanes and/or tropical storms.

Analyst's Certification

I, Michael McGowan, CA, CFA, hereby certify that the views expressed in this report accurately reflect my personal views about the subject securities or issuers. I also certify that no part of my compensation was, is, or will be, directly or indirectly, related to the specific recommendations or views expressed in this report.

General Disclosure

The information and opinions in this report were prepared by BMO Nesbitt Burns Inc. and BMO Nesbitt Burns Ltée./Ltd., collectively ("BMO NB"). BMO NB is not subject to U.S. rules with regard to the preparation of research reports and the independence of analysts. "BMO Capital Markets" is a trade name used by the BMO Investment Banking Group, which includes the wholesale arm of Bank of Montreal and its subsidiaries BMO NB in Canada, BMO Capital Markets Ltd. in the U.K. and BMO Capital Markets Corp. in the U.S. BMO Capital Markets Ltd. and BMO Capital Markets Corp. are affiliates of BMO NB. Bank of Montreal or its subsidiaries ("BMO Financial Group") has lending arrangements with, or provide other remunerated services to, many issuers covered by BMO NB research. A significant lending relationship may exist between BMO Financial Group and certain of the issuers mentioned herein. The opinions, estimates and projections contained in this report are those of BMO NB as of the date of this report and are subject to change without notice. BMO NB endeavours to ensure that the contents have been compiled or derived from sources that we believe are reliable and contain information and opinions that are accurate and complete. Information may be available to BMO NB or its affiliates that is not reflected in this report. The information in this report is not intended to be used as the primary basis of investment decisions, and because of individual client objectives, should not be construed as advice designed to meet the particular investment needs of any investor. This material is for information purposes only and is not an offer to sell or the solicitation of an offer to buy any security. The research analyst and/or associates who prepared this report are compensated based upon (among other factors) the overall profitability of BMO NB and its affiliates, which includes the overall profitability of investment banking services. BMO NB, or its affiliates expect to receive or will seek compensation for investment banking services within the next 3 months from all issuers covered by BMO NB. BMO NB or its affiliates will buy from or sell to customers the securities of issuers mentioned in this report on a principal basis. BMO NB or its affiliates, officers, directors or employees may have a long or short position in the securities discussed herein, related securities or in options, futures or other derivative instruments based thereon. The reader should assume that BMO NB, BMO Capital Markets Ltd., BMO Capital Markets Corp., Bank of Montreal or their affiliates may have a conflict of interest and should not rely solely on this report in evaluating whether or not to buy or sell securities of issuers discussed herein.

Company Specific Disclosure

Disclosure 2: BMO NB has undertaken an underwriting liability with respect to this issuer within the past 12 months.

Disclosure 3: BMO NB has provided investment banking services with respect to this issuer within the past 12 months.

Disclosure 7: BMO Capital Markets Corp. or an affiliate has received compensation for investment banking services from this issuer within the past 12 months.

Disclosure 9: BMO Capital Markets Corp. or an affiliate received compensation for products or services other than investment banking services within the past 12 months.

Disclosure 10: This issuer is a client (or was a client) of BMO NB, BMO Capital Markets Corp., BMO CM Ltd. or an affiliate within the past 12 months: Investment Banking Services & Non-Securities Related Services.

Distribution of Ratings

Rating Category	BMO Rating	BMO Universe	BMO I.B. Clients*	Starmine Universe**
Buy	Outperform	44%	55%	52%
Hold	Market Perform	48%	41%	42%
Sell	Underperform	8%	4%	6%

* Reflects rating distribution of all companies where BMO Capital Markets has received compensation for Investment Banking services.

** Reflects rating distribution of all North American equity research analysts.

Ratings Key

We use the following ratings system definitions:

OP = Outperform - Forecast to outperform the market;

Mkt = Market Perform - Forecast to perform roughly in line with the market;

Und = Underperform - Forecast to underperform the market;

(S) = speculative investment;

NR = No rating at this time;

R = Restricted – Dissemination of research is currently restricted.

Market performance is measured by a benchmark index such as the S&P/TSX Composite Index, S&P 500, Nasdaq Composite, as appropriate for each company. Prior to September 1, 2003, a fourth rating tier—Top Pick—was used to designate those stocks we felt would be the best performers relative to the market. Our six Top 15 lists which guide investors to our best ideas according to six different objectives (large, small, growth, value, income and quantitative) have replaced the Top Pick rating.

Dissemination of Research

Our research publications are available via our web site <http://bmocapitalmarkets.com>. Institutional clients may also receive our research via FIRST CALL Research Direct and Reuters. All of our research is made widely available at the same time to all BMO NB, BMO Capital Markets Ltd., BMO Capital Markets Corp. and BMO Nesbitt Burns Securities Ltd. client groups entitled to our research. Please contact your investment advisor or institutional salesperson for more information.

Conflict Statement

A general description of how BMO Financial Group identifies and manages conflicts of interest is contained in our public facing policy for managing conflicts of interest in connection with investment research which is available at http://equityresearch.bmogc.net/conflict_statement.asp

Additional Matters

TO U.S. RESIDENTS: BMO Capital Markets Corp. and/or BMO Nesbitt Burns Securities Ltd., affiliates of BMO NB, furnish this report to U.S. residents and accept responsibility for the contents herein, except to the extent that it refers to securities of Bank of Montreal. Any U.S. person wishing to effect transactions in any security discussed herein should do so through BMO Capital Markets Corp. and/or BMO Nesbitt Burns Securities Ltd.

TO U.K. RESIDENTS: In the UK this document is published by BMO Capital Markets Limited which is authorised and regulated by the Financial Services Authority. The contents hereof are intended solely for the use of, and may only be issued or passed on to, (I) persons who have professional experience in matters relating to investments falling within Article 19(5) of the Financial Services and Markets Act 2000 (Financial Promotion) Order 2005 (the “Order”) or (II) high net worth entities falling within Article 49(2)(a) to (d) of the Order (all such persons together referred to as “relevant persons”). The contents hereof are not intended for the use of and may not be issued or passed on to, retail clients.

BMO Nesbitt Burns Inc. and BMO Nesbitt Burns Ltée/Ltd. are Members of CIPF. BMO Capital Markets Corp. and BMO Nesbitt Burns Securities Ltd. are Members of SIPC.
