In jurisdictions where CS is not already registered or licensed to trade in securities, transactions will only be effected in accordance with applicable securities legislation, which will vary from jurisdiction to jurisdiction and may require that the trade be made in accordance with applicable exemptions from registration or licensing requirements. Non-U.S. customers wishing to effect a transaction should contact a CS entity in their local jurisdiction unless governing law permits otherwise. U.S. customers wishing to effect a transaction should do so only by contacting a representative at Credit Suisse Securities (USA) LLC in the U.S.

Please note that this report was originally prepared and issued by CS for distribution to their market professional and institutional investor customers. Recipients who are not market professional or institutional investor customers of CS should seek the advice of their independent financial advisor prior to taking any investment decision based on this report or for any necessary explanation of its contents. This research may relate to investments or services of a person outside of the UK or to other matters which are not regulated by the FSA or in respect of which the protections of the FSA for private customers and/or the UK compensation scheme may not be available, and further details as to where this may be the case are available upon request in respect of this report.

PRE RESULTS COMMENT

Quarterly earnings preview

- **Earnings preview:** Fortis is scheduled to report Q1 2008 earnings on or about the 1st of May. We are forecasting Q1 2008 earnings per share of C\$0.62 which is slightly higher than the Street's C\$0.56 consensus estimate and at the top end of the C\$0.43-C\$0.62 range. In considering some of the weather related impacts from the company's natural gas distribution utility, the earnings dispersion among the quarters can often be considerable. Moreover, the long-cycle nature of most of our coverage universe, we do not place undue emphasis on quarterly results. Yet, we do believe certain issues will be pertinent in the quarter.
- **Selected issues:** With the company's results, we focus our analytical efforts on both the financial and strategic issues. From a financial perspective, we focus on three areas: (a) capital expenditure guidance and actual spend in the last quarter; (b) financing costs; and, (c) balance sheet strength. In terms of strategic issues, we consider the following to be pertinent: (a) an acquisition outlook; (b) potential for capital efficiency initiatives; and, (c) future financing plans.
- **Conference call details:** Fortis does not typically conduct conference calls associated with earnings releases.
- **Valuation:** We utilize multiple valuation methodologies to obtain our C\$32.00 target price, including: a 19.9x P/E multiple of 2009 earnings; an 88 bps yield spread; and, a DCF based valuation. We reiterate our Neutral rating.

The analyst(s) responsible for preparing this research report received compensation that is based upon various factors including Credit Suisse's total revenues, a portion of which are generated by Credit Suisse's investment banking activities.

Analysts' stock ratings are defined as follows***:

Outperform (O): The stock's total return is expected to exceed the industry average* by at least 10-15% (or more, depending on perceived risk) over the next 12 months.

Neutral (N): The stock's total return is expected to be in line with the industry average* (range of $\pm 10\%$) over the next 12 months.

Underperform (U):** The stock's total return is expected to underperform the industry average* by 10-15% or more over the next 12 months.

*The industry average refers to the average total return of the relevant country or regional index (except with respect to Europe, where stock ratings are relative to the analyst's industry coverage universe).

**In an effort to achieve a more balanced distribution of stock ratings, the Firm has requested that analysts maintain at least 15% of their rated coverage universe as Underperform. This guideline is subject to change depending on several factors, including general market conditions.

***For Australian and New Zealand stocks a 7.5% threshold replaces the 10% level in all three rating definitions, with a required equity return overlay applied.

Restricted (R): In certain circumstances, Credit Suisse policy and/or applicable law and regulations preclude certain types of communications, including an investment recommendation, during the course of Credit Suisse's engagement in an investment banking transaction and in certain other circumstances.

Volatility Indicator [V]: A stock is defined as volatile if the stock price has moved up or down by 20% or more in a month in at least 8 of the past 24 months or the analyst expects significant volatility going forward.

Analysts' coverage universe weightings are distinct from analysts' stock ratings and are based on the expected performance of an analyst's coverage universe* versus the relevant broad market benchmark**:

Overweight: Industry expected to outperform the relevant broad market benchmark over the next 12 months.

Market Weight: Industry expected to perform in-line with the relevant broad market benchmark over the next 12 months.

Underweight: Industry expected to underperform the relevant broad market benchmark over the next 12 months.

*An analyst's coverage universe consists of all companies covered by the analyst within the relevant sector.

**The broad market benchmark is based on the expected return of the local market index (e.g., the S&P 500 in the U.S.) over the next 12 months.

Credit Suisse's distribution of stock ratings (and banking clients) is:

Global Ratings Distribution		
Outperform/Buy*	46%	(57% banking clients)
Neutral/Hold*	40%	(56% banking clients)

Underperform/Sell*	12%	(48% banking clients)
Restricted	2%	

**For purposes of the NYSE and NASD ratings distribution disclosure requirements, our stock ratings of Outperform, Neutral, and Underperform most closely correspond to Buy, Hold, and Sell, respectively; however, the meanings are not the same, as our stock ratings are determined on a relative basis. (Please refer to definitions above.) An investor's decision to buy or sell a security should be based on investment objectives, current holdings, and other individual factors.*

Credit Suisse's policy is to update research reports as it deems appropriate, based on developments with the subject company, the sector or the market that may have a material impact on the research views or opinions stated herein.

Credit Suisse's policy is only to publish investment research that is impartial, independent, clear, fair and not misleading. Credit Suisse does not provide any tax advice. Any statement herein regarding any US federal tax is not intended or written to be used, and cannot be used, by any taxpayer for the purposes of avoiding any penalties.

See the Companies Mentioned section for full company names.

Price Target: (12 months) for (FTS.TO)

Method: We obtain our C\$32 target price for Fortis Inc. by using multiple valuation methodologies, yield base analysis, and discounted cash flow. We use a P/E (price/earnings) multiples of 19.9x our 2009 EPS (earnings per share) estimate of C\$1.61; we use an EV/EBITDA (enterprise value/earnings before interest, taxes, depreciation, and amortization) of 10.8x and a 88 bps yield spread.

Risks: There are a number of risk to Fortis' achievement of our C\$32.00 target price: commodity prices; weather; environmental; regulatory; access to capital markets; and, interest rates. Moreover, one should never underestimate the power of the regulator in any regulated business.

See the Companies Mentioned section for full company names.

The subject company (FTS.TO) currently is, or was during the 12-month period preceding the date of distribution of this report, a client of Credit Suisse.

Credit Suisse provided investment banking services to the subject company (FTS.TO) within the past 12 months.

Credit Suisse provided non-investment banking services, which may include Sales and Trading services, to the subject company (FTS.TO) within the past 12 months.

Credit Suisse expects to receive or intends to seek investment banking related compensation from the subject company (FTS.TO) within the next 3 months.

Credit Suisse has received compensation for products and services other than investment banking services from the subject company (FTS.TO) within the past 12 months.

Important Regional Disclosures

An analyst involved in the preparation of this report has visited certain material operations of the subject company (FTS.TO) within the past 12 months. The analyst may not have visited all material operations of the subject company. The travel expenses of the analyst in connection with such visits were not paid or reimbursed by the subject company, other than de minimus local travel expenses.

Restrictions on certain Canadian securities are indicated by the following abbreviations: NVS--Non-Voting shares; RVS--Restricted Voting Shares; SVS--Subordinate Voting Shares.

Individuals receiving this report from a Canadian investment dealer that is not affiliated with Credit Suisse should be advised that this report may not contain regulatory disclosures the non-affiliated Canadian investment dealer would be required to make if this were its own report.

As of the date of this report, Credit Suisse acts as a market maker or liquidity provider in the equities securities that are the subject of this report.

Principal is not guaranteed in the case of equities because equity prices are variable.

Commission is the commission rate or the amount agreed with a customer when setting up an account or at anytime after that.

CS may have issued a Trade Alert regarding this security. Trade Alerts are short term trading opportunities identified by an analyst on the basis of market events and catalysts, while stock ratings reflect an analyst's investment recommendations based on expected total return over a 12-month period relative to the relevant coverage universe. Because Trade Alerts and stock ratings reflect different assumptions and analytical methods, Trade Alerts may differ directionally from the analyst's stock rating.

The author(s) of this report maintains a CS Model Portfolio that he/she regularly adjusts. The security or securities discussed in this report may be a component of the CS Model Portfolio and subject to such adjustments (which, given the composition of the CS Model Portfolio as a whole, may differ from the recommendation in this report, as well as opportunities or strategies identified in Trading Alerts concerning the same security). The CS Model Portfolio and important disclosures about it are available at www.credit-suisse.com/ti.

For Credit Suisse disclosure information on other companies mentioned in this report, please visit the website at www.credit-suisse.com/researchdisclosures or call +1 (877) 291-2683.

Disclaimers continue on next page.

This report is not directed to, or intended for distribution to or use by, any person or entity who is a citizen or resident of or located in any locality, state, country or other jurisdiction where such distribution, publication, availability or use would be contrary to law or regulation or which would subject Credit Suisse, the Swiss bank, or its subsidiaries or its affiliates ("CS") to any registration or licensing requirement within such jurisdiction. All material presented in this report, unless specifically indicated otherwise, is under copyright to CS. None of the material, nor its content, nor any copy of it, may be altered in any way, transmitted to, copied or distributed to any other party, without the prior express written permission of CS. All trademarks, service marks and logos used in this report are trademarks or service marks or registered trademarks or service marks of CS or its affiliates.

The information, tools and material presented in this report are provided to you for information purposes only and are not to be used or considered as an offer or the solicitation of an offer to sell or to buy or subscribe for securities or other financial instruments. CS may not have taken any steps to ensure that the securities referred to in this report are suitable for any particular investor. CS will not treat recipients as its customers by virtue of their receiving the report. The investments or services contained or referred to in this report may not be suitable for you and it is recommended that you consult an independent investment advisor if you are in doubt about such investments or investment services. Nothing in this report constitutes investment, legal, accounting or tax advice or a representation that any investment or strategy is suitable or appropriate to your individual circumstances or otherwise constitutes a personal recommendation to you. CS does not offer advice on the tax consequences of investment and you are advised to contact an independent tax adviser. Please note in particular that the bases and levels of taxation may change.

CS believes the information and opinions in the Disclosure Appendix of this report are accurate and complete. Information and opinions presented in the other sections of the report were obtained or derived from sources CS believes are reliable, but CS makes no representations as to their accuracy or completeness. Additional information is available upon request. CS accepts no liability for loss arising from the use of the material presented in this report, except that this exclusion of liability does not apply to the extent that liability arises under specific statutes or regulations applicable to CS. This report is not to be relied upon in substitution for the exercise of independent judgment. CS may have issued, and may in the future issue, a trading call regarding this security. Trading calls are short term trading opportunities based on market events and catalysts, while stock ratings reflect investment recommendations based on expected total return over a 12-month period as defined in the disclosure section. Because trading calls and stock ratings reflect different assumptions and analytical methods, trading calls may differ directionally from the stock rating. In addition, CS may have issued, and may in the future issue, other reports that are inconsistent with, and reach different conclusions from, the information presented in this report. Those reports reflect the different assumptions, views and analytical methods of the analysts who prepared them and CS is under no obligation to ensure that such other reports are brought to the attention of any recipient of this report. CS is involved in many businesses that relate to companies mentioned in this report. These businesses include specialized trading, risk arbitrage, market making, and other proprietary trading.

Past performance should not be taken as an indication or guarantee of future performance, and no representation or warranty, express or implied, is made regarding future performance. Information, opinions and estimates contained in this report reflect a judgement at its original date of publication by CS and are subject to change without notice. The price, value of and income from any of the securities or financial instruments mentioned in this report can fall as well as rise. The value of securities and financial instruments is subject to exchange rate fluctuation that may have a positive or adverse effect on the price or income of such securities or financial instruments. Investors in securities such as ADR's, the values of which are influenced by currency volatility, effectively assume this risk.

Structured securities are complex instruments, typically involve a high degree of risk and are intended for sale only to sophisticated investors who are capable of understanding and assuming the risks involved. The market value of any structured security may be affected by changes in economic, financial and political factors (including, but not limited to, spot and forward interest and exchange rates), time to maturity, market conditions and volatility, and the credit quality of any issuer or reference issuer. Any investor interested in purchasing a structured product should conduct their own investigation and analysis of the product and consult with their own professional advisers as to the risks involved in making such a purchase.

Some investments discussed in this report have a high level of volatility. High volatility investments may experience sudden and large falls in their value causing losses when that investment is realised. Those losses may equal your original investment. Indeed, in the case of some investments the potential losses may exceed the amount of initial investment, in such circumstances you may be required to pay more money to support those losses. Income yields from investments may fluctuate and, in consequence, initial capital paid to make the investment may be used as part of that income yield. Some investments may not be readily realisable and it may be difficult to sell or realise those investments, similarly it may prove difficult for you to obtain reliable information about the value, or risks, to which such an investment is exposed.

Shifting among the quarters

- **Slight miss:** Fortis reported Q1 2008 EPS (FD) of C\$0.55 which was below our estimate of C\$0.62 and slightly below the Street's C\$0.56 estimate and well within the C\$0.43-C\$0.62 range. We believe the earnings difference is attributable to three things: (a) as reported, a quarterly shift in Newfoundland Power's purchased power expense; (b) slightly higher than anticipated corporate costs; and, (c) selected other minor non-material variances. We do not place undue emphasis on quarterly results in much of our universe as a result of the inherently long-cycle nature of many assets. In our view, Fortis delivered a relatively solid financial and operation performance which is somewhat typical.
- **Significant organic growth continues:** As expected, Fortis continued to provide a rather robust outlook for its utility capital program. The company expects consolidated utility capital expenditures to exceed C\$4 billion. More than three-quarters of that amount is expected to come from electric utilities which are largely centered on the growth of FortisAlberta, FortisBC and the Caribbean operations.
- **Improved capital efficiency:** From our perspective, Fortis possesses ample opportunities to become much more capital efficient. One strategy involves divesting certain non-utility assets and redeploying capital into utility assets or funding the capital program. Another option would entail divesting partial interests in selected utility assets in an asset management model approach and receiving a management fee. Regardless of approach, we believe there are some rather simple ways for Fortis to increase existing returns.
- **Valuation:** We utilize multiple valuation methodologies to obtain our C\$32.00 target price, including: a 19.9x P/E multiple of 2009 earnings; an 88 bps yield spread; and, a DCF based valuation. We reiterate our Neutral rating.

IMPORTANT DISCLOSURES, ANALYST CERTIFICATIONS AND INFORMATION ON TRADE ALERTS AND ANALYST MODEL PORTFOLIOS ARE IN THE DISCLOSURE APPENDIX. U.S. Disclosure: Credit Suisse does and seeks to do business with companies covered in its research reports. As a result, investors should be aware that the Firm may have a conflict of interest that could affect the objectivity of this report. Investors should consider this report as only a single factor in making their investment decision.

Fortis reported Q1 2008 EPS (FD) of C\$0.55 which was below our estimate of C\$0.62 and slightly below the Street's C\$0.56 estimate and well within the C\$0.43-C\$0.62 range. We believe the earnings difference is attributable to three things: (a) as reported, a quarterly shift in Newfoundland Power's purchased power expense; (b) slightly higher than anticipated corporate costs; and, (c) selected other minor non-material variances. We do not place undue emphasis on quarterly results in much of our universe as a result of the inherently long-cycle nature of many assets. In our view, Fortis delivered a relatively solid financial and operation performance which is somewhat typical. This research note is divided into three parts: (a) results; (b) outlook; and, (c) valuation. Each of these areas will be addressed in greater detail below.

Results

Exhibit 1 highlights the segmented unadjusted earnings contributions for the most recent quarter and for the comparable period one year ago. Our commentary for each segment appears under the various headings below.

Exhibit 1: Segmented unadjusted earnings contribution

C\$ in millions, unless otherwise stated

	Q1 2008	Q1 2007	chg y/y
Regulated Gas Utilities - Canadian	58	-	N/A
Regulated Electric Utilities - Canadian	33	39	-15%
Regulated Electric Utilities - Caribbean	7	4	75%
Non-regulated - Fortis Generation	6	7	-14%
Non-regulated - Fortis Properties	3	2	50%
Corporate and other	(16)	(10)	60%
Net earnings applicable to common shares	91	42	117%

Source: Company data and Credit Suisse

Regulated Gas Utilities - Canadian

This segment consists of Terasen Gas which was acquired on 17 May 2007. Those that have followed the Terasen assets for an extended time frame would likely generally agree with the company's assessment that "[p]erformance was consistent with that expected to be achieved".

Exhibit 2: Regulated gas utilities – Canadian earnings contribution

C\$ in millions, unless otherwise stated

Newfoundland Power

Earnings in this segment decreased by roughly 45% this period compared to the same period last year. Worth noting the drop in earnings was attributed to a shift in the quarterly distribution of annual purchased power expense which reduced earnings by approximately C\$6m. Exhibit 6 below contains selected highlights for Newfoundland Power.

Exhibit 6: Selected Newfoundland Power performance highlights

	Q1 2008	Q1 2007	chg y/y
Energy deliveries (GWh)	1,716	1,663	3%

Regulated Electric Utilities – Caribbean

This segment includes Belize Electricity, Caribbean Utilities, and Fortis Turks and Caicos. Earnings for this segment increased by roughly 75% compared to the same quarter last year. One notable item in this segment was a C\$12m unfavourable impact relating to foreign exchange associated with the strengthening of the Canadian dollar versus the US dollar. Q1 2007 figure was reduced by C\$2m associated with a charge on the disposal of steam-turbine assets. See the table below for selected highlights.

Non-regulated – Fortis Generation

This segment includes non-regulated generation assets located in Belize, Ontario, Central Newfoundland, British Columbia and Upper New York State. Earnings for the segment decreased by 14% from the current quarter compared to the same quarter last year. See the table below for selected highlights.

Exhibit 9: Selected non-regulated – Fortis Generation performance highlights

	Q1 2008	Q1 2007	chg y/y
Energy deliveries (GWh)	288	291	-1%
Revenue (C\$/MWh)	65.97	72.16	-9%
Energy supply costs (C\$/MWh)	6.94	6.87	1%
Operating expenses (C\$/MWh)	13.89	13.75	1%
Gross margin (C\$/MWh)	45.14	51.55	-12%
Earnings (C\$millions)	6	7	-14%

Source: Company data and Credit Suisse

Non-regulated – Fortis Properties

Fortis Properties' net unadjusted earning contribution during the quarter was C\$3 million which is nearly a 50% increase over last year's quarterly earnings. REVPAR increased to C\$67.82 from C\$65.46 for the comparable period last year. Additionally, the occupancy rate of the Real Estate Division was 96.6%, up from 94.9% last year.

Corporate

Corporate expenses significantly increased to C\$16 million from C\$10 million in Q1 2007. The increase was primarily related to acquisition financing for Terasen.

Outlook

We continue to believe investor, whether existing or prospective, should consider several major issues, including (a) organic growth; (b) capital efficiency; and, (c) acquisition trail. Each of these issues is addressed below.

Organic growth

In the most recent quarter the company's capital expenditure totaled C\$165 million of which C\$158 million was for its regulated utilities. Fortis is projecting that capital expenditures for 2008 would amount to roughly C\$900 million, a roughly 14% increase from last year. The bulk of this amount will be invested in the company's regulated utility segments. A majority of the total will be spent on Western Canadian assets (Terasen Gas, FortisAlberta, and FortisBC). The company is forecasting to spend over C\$4 billion over the next five years. Due to this large capital requirement, we continue to believe that capital market access is critical to Fortis. Yet, we do not forecast a specific common equity funding requirement until 2010.

Capital efficiency

From our perspective, Fortis possesses ample opportunities to become much more capital efficient. One strategy involves divesting certain non-utility assets and redeploying capital into utility assets or funding the capital program. Another option would entail divesting partial interests in selected utility assets in an asset management model approach and receiving a management fee. Regardless of approach, we believe there are some rather simple ways for Fortis to increase existing returns.

Generally, we continue to prefer pure-play utility companies without an undue amount of non-core asset exposure. Historically, non-core assets (especially real estate) have been somewhat commonplace for many utilities. Fortis has been no exception to that approach. Notably, the mix of commercial and hospitality real estate assets held by Fortis have been positive contributors and also provide the company a bit of financial flexibility for a selection of reasons. Given the valuation of selected real estate assets, we believe any such monetisation of these assets would likely be favourable for the stock. Additionally, given the recent acquisitions, Fortis Properties continues to increase in scale and scope, which may make it much more attractive for acquisition or monetisation. Yet, for a number of reasons, we continue to believe there is a rather low probability of either of those events occurring.

Opportunities for improved capital efficiency

Even discounting the potential monetization of assets that we would consider to be non-core, we believe Fortis possesses considerable potential to become much more capital efficient. Given the significant interest in infrastructure assets by many investors seeking long-dated types of return, Fortis could easily divest portions of its existing asset base to pension fund investors and charge a management fee for their operational and management expertise. This type of approach could significantly improve capital efficiency and returns on capital. In addition, this asset management approach could also free-up capital that could be used for future acquisitions.

Acquisition trail

In our view, Fortis continues to demonstrate a rather impressive ability to successfully integrate acquisitions. Additionally, we view acquisitions as somewhat central to the company's growth strategy. For instance, the company's most recent Management Discussion and Analysis stated "The Corporation is pursuing acquisitions for profitable growth, focusing on opportunities to acquire regulated natural gas and electric utilities in Canada, the United States and the Caribbean. Fortis will also pursue growth in its non-regulated businesses in support of its regulated utility growth strategy." Given the success of Fortis in past transactions, as measured in terms of financials, share price and operationally, we believe the company's current valuation and skill set may lead to some

potentially value creating acquisition activity (see Exhibit 10 below for select Fortis M&A transactions).

Exhibit 10: Selected Fortis M&A transactions

\$ in millions, unless otherwise stated

Announced Date	Asset/Company	Deal value (\$m)	Comment
7/23/2007	Delta Regina	CAD 49.95	Delta hotel located in Regina, Saskatchewan.
2/26/2007	Terasen Inc.	CAD 3,700.00	Gas distribution in British Columbia.
11/7/2006	Caribbean Utilities Co.	CAD 55.70	Acquired an additional 16% of Caribbean Utilities Co.
10/19/2006	4 hotels in western Canada	CAD 51.60	4 hotels (Holiday Inn, Best Western and Ramada) located in BC and Alberta.

	Total USD	USD 65.50	
	Total CAD	CAD 6,110.64	

Source: Bloomberg, Company data and Credit Suisse

In terms of acquisitions, we believe Fortis has a few advantages over others, including:

- With the recent Terasen acquisition, Fortis has growing expertise with both electric and gas utilities;
- Larger size will allow it to look at a larger spectrum of potential target companies;
- A proven ability to effectively integrate acquisitions;
- A rather strong appetite for yield oriented securities in Canada;
- Canada's rather benign interest rate environment;
- Bought deal financing commonly employed in Canada; and,
- Canadian dollar strength versus US players.

Fortis possesses a number of absolute and relative advantages over some other competitors

Valuation

We continue to believe that Fortis has strong organic growth in key areas such as British Columbia, Alberta and the Caribbean. Yet, the company does not have visibly sustainable growth over the longer-term. From our perspective, the next big catalysts for the stock will likely revolve around capital efficiency initiatives or a large scale acquisition. Our 2008 earnings estimate decreased from C\$1.63 to C\$1.54. We retain our C\$32.00 target price which is obtained utilizing multiple valuation methodologies, including: a 19.9x P/E multiple of 2009 earnings; an 88 bps yield spread; and, a DCF based valuation. We reiterate our Neutral rating.

Maintain Neutral rating and C\$32.00 target price

3-Year Price, Target Price and Rating Change History Chart for FTS.TO

The analyst(s) responsible for preparing this research report received compensation that is based upon various factors including Credit Suisse's total revenues, a portion of which are generated by Credit Suisse's investment banking activities.

Analysts' stock ratings are defined as follows***:

Outperform (O): The stock's total return is expected to exceed the industry average* by at least 10-15% (or more, depending on perceived risk) over the next 12 months.

Neutral (N): The stock's total return is expected to be in line with the industry average* (range of $\pm 10\%$) over the next 12 months.

Underperform (U):** The stock's total return is expected to underperform the industry average* by 10-15% or more over the next 12 months.

*The industry average refers to the average total return of the relevant country or regional index (except with respect to Europe, where stock ratings are relative to the analyst's industry coverage universe).

**In an effort to achieve a more balanced distribution of stock ratings, the Firm has requested that analysts maintain at least 15% of their rated coverage universe as Underperform. This guideline is subject to change depending on several factors, including general market conditions.

***For Australian and New Zealand stocks a 7.5% threshold replaces the 10% level in all three rating definitions, with a required equity return overlay applied.

Restricted (R): In certain circumstances, Credit Suisse policy and/or applicable law and regulations preclude certain types of communications, including an investment recommendation, during the course of Credit Suisse's engagement in an investment banking transaction and in certain other circumstances.

Volatility Indicator [V]: A stock is defined as volatile if the stock price has moved up or down by 20% or more in a month in at least 8 of the past 24 months or the analyst expects significant volatility going forward.

Analysts' coverage universe weightings are distinct from analysts' stock ratings and are based on the expected performance of an analyst's coverage universe* versus the relevant broad market benchmark**:

Overweight: Industry expected to outperform the relevant broad market benchmark over the next 12 months.

Market Weight: Industry expected to perform in-line with the relevant broad market benchmark over the next 12 months.

Underweight: Industry expected to underperform the relevant broad market benchmark over the next 12 months.

*An analyst's coverage universe consists of all companies covered by the analyst within the relevant sector.

**The broad market benchmark is based on the expected return of the local market index (e.g., the S&P 500 in the U.S.) over the next 12 months.

Credit Suisse's distribution of stock ratings (and banking clients) is:

Global Ratings Distribution		
Outperform/Buy*	45%	(57% banking clients)
Neutral/Hold*	40%	(56% banking clients)
Underperform/Sell*	12%	(48% banking clients)
Restricted	2%	

*For purposes of the NYSE and NASD ratings distribution disclosure requirements, our stock ratings of Outperform, Neutral, and Underperform most closely correspond to Buy, Hold, and Sell, respectively; however, the meanings are not the same, as our stock ratings are determined on a relative basis. (Please refer to definitions above.) An investor's decision to buy or sell a security should be based on investment objectives, current holdings, and other individual factors.

Price Target: (12 months) for (FTS.TO)

Method: We obtain our C\$32 target price for Fortis Inc. by using multiple valuation methodologies, yield base analysis, and discounted cash flow. We use a P/E (price/earnings) multiples of 19.9x our 2009 EPS (earnings per share) estimate of C\$1.61; we use an EV/EBITDA (enterprise value/earnings before interest, taxes, depreciation, and amortization) of 10.8x and a 88 bps yield spread.

Risks: There are a number of risk to Fortis' achievement of our C\$32.00 target price: commodity prices; weather; environmental; regulatory; access to capital markets; and, interest rates. Moreover, one should never underestimate the power of the regulator in any regulated business.

See the Companies Mentioned section for full company names.

The subject company (FTS.TO) currently is, or was during the 12-month period preceding the date of distribution of this report, a client of Credit Suisse.

Credit Suisse provided investment banking services to the subject company (FTS.TO) within the past 12 months.

Credit Suisse provided non-investment banking services, which may include Sales and Trading services, to the subject company (FTS.TO) within the past 12 months.

Credit Suisse expects to receive or intends to seek investment banking related compensation from the subject company (FTS.TO) within the next 3 months.

Credit Suisse has received compensation for products and services other than investment banking services from the subject company (FTS.TO) within the past 12 months.

CS may not have taken any steps to ensure that the securities referred to in this report are suitable for any particular investor. CS will not treat recipients as its customers by virtue of their receiving the report. The investments or services contained or referred to in this report may not be suitable for you and it is recommended that you consult an independent investment advisor if you are in doubt about such investments or investment services. Nothing in this report constitutes investment, legal, accounting or tax advice or a representation that any investment or strategy is suitable or appropriate to your individual circumstances or otherwise constitutes a personal recommendation to you. CS does not offer advice on the tax consequences of investment and you are advised to contact an independent tax adviser. Please note in particular that the bases and levels of taxation may change.

CS believes the information and opinions in the Disclosure Appendix of this report are accurate and complete. Information and opinions presented in the other sections of the report were obtained or derived from sources CS believes are reliable, but CS makes no representations as to their accuracy or completeness. Additional information is available upon request. CS accepts no liability for loss arising from the use of the material presented in this report, except that this exclusion of liability does not apply to the extent that liability arises under specific statutes or regulations applicable to CS. This report is not to be relied upon in substitution for the exercise of independent judgment. CS may have issued, and may in the future issue, a trading call regarding this security. Trading calls are short term trading opportunities based on market events and catalysts, while stock ratings reflect investment recommendations based on expected total return over a 12-month period as defined in the disclosure section. Because trading calls and stock ratings reflect different assumptions and analytical methods, trading calls may differ directionally from the stock rating. In addition, CS may have issued, and may in the future issue, other reports that are inconsistent with, and reach different conclusions from, the information presented in this report. Those reports reflect the different assumptions, views and analytical methods of the analysts who prepared them and CS is under no obligation to ensure that such other reports are brought to the attention of any recipient of this report. CS is involved in many businesses that relate to companies mentioned in this report. These businesses include specialized trading, risk arbitrage, market making, and other proprietary trading.

Past performance should not be taken as an indication or guarantee of future performance, and no representation or warranty, express or implied, is made regarding future performance. Information, opinions and estimates contained in this report reflect a judgement at its original date of publication by CS and are subject to change without notice. The price, value of and income from any of the securities or financial instruments mentioned in this report can fall as well as rise. The value of securities and financial instruments is subject to exchange rate fluctuation that may have a positive or adverse effect on the price or income of such securities or financial instruments. Investors in securities such as ADR's, the values of which are influenced by currency volatility, effectively assume this risk.

Structured securities are complex instruments, typically involve a high degree of risk and are intended for sale only to sophisticated investors who are capable of understanding and assuming the risks involved. The market value of any structured security may be affected by changes in economic, financial and political factors (including, but not limited to, spot and forward interest and exchange rates), time to maturity, market conditions and volatility, and the credit quality of any issuer or reference issuer. Any investor interested in purchasing a structured product should conduct their own investigation and analysis of the product and consult with their own professional advisers as to the risks involved in making such a purchase.

Some investments discussed in this report have a high level of volatility. High volatility investments may experience sudden and large falls in their value causing losses when that investment is realised. Those losses may equal your original investment. Indeed, in the case of some investments the potential losses may exceed the amount of initial investment, in such circumstances you may be required to pay more money to support those losses. Income yields from investments may fluctuate and, in consequence, initial capital paid to make the investment may be used as part of that income yield. Some investments may not be readily realisable and it may be difficult to sell or realise those investments, similarly it may prove difficult for you to obtain reliable information about the value, or risks, to which such an investment is exposed.

- **Negative regulatory decision:** Belize Electricity Limited (BEL), which is 70.1% owned by Fortis Inc., received a negative regulatory decision from the Belizean Public Utilities Commission (PUC) in relation to the Annual Rate Review Proceeding. That adverse decision retroactively disallowed BZ\$36m (roughly C\$18m) of previously incurred power costs and reduced "Belize Electricity's rate of return on assets to 10 per cent from 12 per cent." In the near term, we are obviously concerned about the cash flows, earnings and returns at BEL, as they will modestly impact Fortis on a consolidated basis.
- **Regulatory evolution will be critical:** Given the balance of capital costs, consumer rates, selected commodity prices and utility returns, we believe certain regulatory trends are likely to continue favouring ratepayers over utility companies in the near term. Obviously, the progression of the current decision, whether on appeal or in future rate applications, will be critical to fully assess the value of BEL.
- **Improved capital efficiency:** From our perspective, Fortis possesses ample opportunities to become much more capital efficient. One strategy involves divesting certain non-utility assets and redeploying capital into utility assets or funding the capital program. Another option would entail divesting partial interests in selected utility assets in an asset management model approach and receiving a management fee. Regardless of approach, we believe there are some rather simple ways for Fortis to increase existing returns.
- **Valuation:** We utilize multiple valuation methodologies to obtain our C\$32.00 target price, including: a 19.9x P/E multiple of 2009 earnings; an 88 bps yield spread; and, a DCF based valuation. We reiterate our Neutral rating.

The analyst(s) responsible for preparing this research report received compensation that is based upon various factors including Credit Suisse's total revenues, a portion of which are generated by Credit Suisse's investment banking activities.

Analysts' stock ratings are defined as follows***:

Outperform (O): The stock's total return is expected to exceed the industry average* by at least 10-15% (or more, depending on perceived risk) over the next 12 months.

Neutral (N): The stock's total return is expected to be in line with the industry average* (range of $\pm 10\%$) over the next 12 months.

Underperform (U):** The stock's total return is expected to underperform the industry average* by 10-15% or more over the next 12 months.

*The industry average refers to the average total return of the relevant country or regional index (except with respect to Europe, where stock ratings are relative to the analyst's industry coverage universe).

**In an effort to achieve a more balanced distribution of stock ratings, the Firm has requested that analysts maintain at least 15% of their rated coverage universe as Underperform. This guideline is subject to change depending on several factors, including general market conditions.

***For Australian and New Zealand stocks a 7.5% threshold replaces the 10% level in all three rating definitions, with a required equity return overlay applied.

Restricted (R): In certain circumstances, Credit Suisse policy and/or applicable law and regulations preclude certain types of communications, including an investment recommendation, during the course of Credit Suisse's engagement in an investment banking transaction and in certain other circumstances.

Volatility Indicator [V]: A stock is defined as volatile if the stock price has moved up or down by 20% or more in a month in at least 8 of the past 24 months or the analyst expects significant volatility going forward.

Analysts' coverage universe weightings are distinct from analysts' stock ratings and are based on the expected performance of an analyst's coverage universe* versus the relevant broad market benchmark:**

Overweight: Industry expected to outperform the relevant broad market benchmark over the next 12 months.

Market Weight: Industry expected to perform in-line with the relevant broad market benchmark over the next 12 months.

Underweight: Industry expected to underperform the relevant broad market benchmark over the next 12 months.

*An analyst's coverage universe consists of all companies covered by the analyst within the relevant sector.

**The broad market benchmark is based on the expected return of the local market index (e.g., the S&P 500 in the U.S.) over the next 12 months.

Credit Suisse's distribution of stock ratings (and banking clients) is:

	Global Ratings Distribution	
Outperform/Buy*	45%	(57% banking clients)
Neutral/Hold*	41%	(56% banking clients)
Underperform/Sell*	12%	(50% banking clients)
Restricted	2%	

*For purposes of the NYSE and NASD ratings distribution disclosure requirements, our stock ratings of Outperform, Neutral, and Underperform most closely correspond to Buy, Hold, and Sell, respectively; however, the meanings are not the same, as our stock ratings are determined on a relative basis. (Please refer to definitions above.) An investor's decision to buy or sell a security should be based on investment objectives, current holdings, and other individual factors.

Credit Suisse's policy is to update research reports as it deems appropriate, based on developments with the subject company, the sector or the market that may have a material impact on the research views or opinions stated herein.

Credit Suisse's policy is only to publish investment research that is impartial, independent, clear, fair and not misleading. Credit Suisse does not provide any tax advice. Any statement herein regarding any US federal tax is not intended or written to be used, and cannot be used, by any taxpayer for the purposes of avoiding any penalties.

See the Companies Mentioned section for full company names.

Price Target: (12 months) for (FTS.TO)

Method: We obtain our C\$32 target price for Fortis Inc. by using multiple valuation methodologies, yield base analysis, and discounted cash flow. We use a P/E (price/earnings) multiples of 19.9x our 2009 EPS (earnings per share) estimate of C\$1.61; we use an EV/EBITDA (enterprise value/earnings before interest, taxes, depreciation, and amortization) of 10.8x and a 88 bps yield spread.

Risks: There are a number of risk to Fortis' achievement of our C\$32.00 target price: commodity prices; weather; environmental; regulatory; access to capital markets; and, interest rates. Moreover, one should never underestimate the power of the regulator in any regulated business.

See the Companies Mentioned section for full company names.

The subject company (FTS.TO) currently is, or was during the 12-month period preceding the date of distribution of this report, a client of Credit Suisse.

Credit Suisse provided investment banking services to the subject company (FTS.TO) within the past 12 months.

Credit Suisse provided non-investment banking services, which may include Sales and Trading services, to the subject company (FTS.TO) within the past 12 months.

Credit Suisse expects to receive or intends to seek investment banking related compensation from the subject company (FTS.TO) within the next 3 months.

Credit Suisse has received compensation for products and services other than investment banking services from the subject company (FTS.TO) within the past 12 months.

Important Regional Disclosures

An analyst involved in the preparation of this report has visited certain material operations of the subject company (FTS.TO) within the past 12 months. The analyst may not have visited all material operations of the subject company. The travel expenses of the analyst in connection with such visits were not paid or reimbursed by the subject company, other than de minimus local travel expenses.

Restrictions on certain Canadian securities are indicated by the following abbreviations: NVS--Non-Voting shares; RVS--Restricted Voting Shares; SVS--Subordinate Voting Shares.

Individuals receiving this report from a Canadian investment dealer that is not affiliated with Credit Suisse should be advised that this report may not contain regulatory disclosures the non-affiliated Canadian investment dealer would be required to make if this were its own report.

As of the date of this report, Credit Suisse acts as a market maker or liquidity provider in the equities securities that are the subject of this report.

Principal is not guaranteed in the case of equities because equity prices are variable.

Commission is the commission rate or the amount agreed with a customer when setting up an account or at anytime after that.

CS may have issued a Trade Alert regarding this security. Trade Alerts are short term trading opportunities identified by an analyst on the basis of market events and catalysts, while stock ratings reflect an analyst's investment recommendations based on expected total return over a 12-month period relative to the relevant coverage universe. Because Trade Alerts and stock ratings reflect different assumptions and analytical methods, Trade Alerts may differ directionally from the analyst's stock rating.

The author(s) of this report maintains a CS Model Portfolio that he/she regularly adjusts. The security or securities discussed in this report may be a component of the CS Model Portfolio and subject to such adjustments (which, given the composition of the CS Model Portfolio as a whole, may differ from the recommendation in this report, as well as opportunities or strategies identified in Trading Alerts concerning the same security). The CS Model Portfolio and important disclosures about it are available at www.credit-suisse.com/ti.

This report is not directed to, or intended for distribution to or use by, any person or entity who is a citizen or resident of or located in any locality, state, country or other jurisdiction where such distribution, publication, availability or use would be contrary to law or regulation or which would subject Credit Suisse, the Swiss bank, or its subsidiaries or its affiliates ("CS") to any registration or licensing requirement within such jurisdiction. All material presented in this report, unless specifically indicated otherwise, is under copyright to CS. None of the material, nor its content, nor any copy of it, may be altered in any way, transmitted to, copied or distributed to any other party, without the prior express written permission of CS. All trademarks, service marks and logos used in this report are trademarks or service marks or registered trademarks or service marks of CS or its affiliates.

The information, tools and material presented in this report are provided to you for information purposes only and are not to be used or considered as an offer or the solicitation of an offer to sell or to buy or subscribe for securities or other financial instruments. CS may not have taken any steps to ensure that the securities referred to in this report are suitable for any particular investor. CS will not treat recipients as its customers by virtue of their receiving the report. The investments or services contained or referred to in this report may not be suitable for you and it is recommended that you consult an independent investment advisor if you are in doubt about such investments or investment services. Nothing in this report constitutes investment, legal, accounting or tax advice or a representation that any investment or strategy is suitable or appropriate to your individual circumstances or otherwise constitutes a personal recommendation to you. CS does not offer advice on the tax consequences of investment and you are advised to contact an independent tax adviser. Please note in particular that the bases and levels of taxation may change.

CS believes the information and opinions in the Disclosure Appendix of this report are accurate and complete. Information and opinions presented in the other sections of the report were obtained or derived from sources CS believes are reliable, but CS makes no representations as to their accuracy or completeness. Additional information is available upon request. CS accepts no liability for loss arising from the use of the material presented in this report, except that this exclusion of liability does not apply to the extent that liability arises under specific statutes or regulations applicable to CS. This report is not to be relied upon in substitution for the exercise of independent judgment. CS may have issued, and may in the future issue, a trading call regarding this security. Trading calls are short term trading opportunities based on market events and catalysts, while stock ratings reflect investment recommendations based on expected total return over a 12-month period as defined in the disclosure section. Because trading calls and stock ratings reflect different assumptions and analytical methods, trading calls may differ directionally from the stock rating. In addition, CS may have issued, and may in the future issue, other reports that are inconsistent with, and reach different conclusions from, the information presented in this report. Those reports reflect the different assumptions, views and analytical methods of the analysts who prepared them and CS is under no obligation to ensure that such other reports are brought to the attention of any recipient of this report. CS is involved in many businesses that relate to companies mentioned in this report. These businesses include specialized trading, risk arbitrage, market making, and other proprietary trading.

Past performance should not be taken as an indication or guarantee of future performance, and no representation or warranty, express or implied, is made regarding future performance. Information, opinions and estimates contained in this report reflect a judgement at its original date of publication by CS and are subject to change without notice. The price, value of and income from any of the securities or financial instruments mentioned in this report can fall as well as rise. The value of securities and financial instruments is subject to exchange rate fluctuation that may have a positive or adverse effect on the price or income of such securities or financial instruments. Investors in securities such as ADR's, the values of which are influenced by currency volatility, effectively assume this risk.

Structured securities are complex instruments, typically involve a high degree of risk and are intended for sale only to sophisticated investors who are capable of understanding and assuming the risks involved. The market value of any structured security may be affected by changes in economic, financial and political factors (including, but not limited to, spot and forward interest and exchange rates), time to maturity, market conditions and volatility, and the credit quality of any issuer or reference issuer. Any investor interested in purchasing a structured product should conduct their own investigation and analysis of the product and consult with their own professional advisers as to the risks involved in making such a purchase.

Some investments discussed in this report have a high level of volatility. High volatility investments may experience sudden and large falls in their value causing losses when that investment is realised. Those losses may equal your original investment. Indeed, in the case of some investments the potential losses may exceed the amount of initial investment, in such circumstances you may be required to pay more money to support those losses. Income yields from investments may fluctuate and, in consequence, initial capital paid to make the investment may be used as part of that income yield. Some investments may not be readily realisable and it may be difficult to sell or realise those investments, similarly it may prove difficult for you to obtain reliable information about the value, or risks, to which such an investment is exposed.

RESULTS

Capital creep

- **In-line quarter:** On a headline basis, Fortis reported Q2 2008 headline EPS (FD) of C\$0.18 which required several adjustments. Comparable EPS of C\$0.28 is the result of adjusting for a C\$2m one-time charge at FortisOntario and C\$13m of disallowed fuel and purchased power costs in Belize. The adjusted EPS matched our C\$0.28 and the identical Street estimate within a C\$0.25-C\$0.30 range. We do not place undue emphasis on quarterly results in much of our universe as a result of the inherently long-cycle nature of many assets. In our view, Fortis delivered a relatively solid financial and operation performance which is somewhat typical.
- **Significant organic growth continues:** As expected, Fortis continued to provide a rather robust outlook for its utility capital program. The company expects consolidated utility capital expenditures to exceed C\$4.5 billion from the previous quarter's C\$4.0 billion. More than three-quarters of that amount is expected to come from electric utilities which are largely centered on the growth of FortisAlberta, FortisBC and the Caribbean operations.
- **Improved capital efficiency:** From our perspective, Fortis possesses ample opportunities to become much more capital efficient. One strategy involves divesting certain non-utility assets and redeploying capital into utility assets or funding the capital program. Another option would entail divesting partial interests in selected utility assets in an asset management model approach and receiving a management fee. Regardless of approach, we believe there are some rather simple ways for Fortis to increase existing returns.
- **Valuation:** We utilize multiple valuation methodologies to obtain our C\$32.00 target price, including: a 19.9x P/E multiple of 2009 earnings; an 88 bps yield spread; and, a DCF based valuation. We reiterate our Neutral rating.

DISCLOSURE APPENDIX CONTAINS IMPORTANT DISCLOSURES, ANALYST CERTIFICATIONS, INFORMATION ON TRADE ALERTS, ANALYST MODEL PORTFOLIOS AND THE STATUS OF NON-U.S. ANALYSTS. U.S. Disclosure: Credit Suisse does and seeks to do business with companies covered in its research reports. As a result, investors should be aware that the Firm may have a conflict of interest that could affect the objectivity of this report. Investors should consider this report as only a single factor in making their investment decision.

By our calculations, Fortis reported comparable EPS of C\$0.28 after adjusting for a C\$2m one-time charge at FortisOntario and C\$13m of disallowed power costs in Belize. In our view, Fortis delivered a relatively solid financial and operation performance which is somewhat typical. This research note is divided into three parts: (a) results; (b) outlook; and, (c) valuation. Each of these areas will be addressed in greater detail below.

Results

Exhibit 1 highlights the segmented unadjusted earnings contributions for the most recent quarter and for the comparable period one year ago. Our commentary for each segment appears under the various headings below.

Exhibit 1: Segmented unadjusted earnings contribution

C\$ in millions, unless otherwise stated

	Q2 2008	Q2 2007	chg y/y
Regulated Gas Utilities - Canadian	12	1	1100%
Regulated Electric Utilities - Canadian	26	33	-21%
Regulated Electric Utilities - Caribbean	(5)	8	-163%
Non-regulated - Fortis Generation	7	5	40%
Non-regulated - Fortis Properties	7	6	17%
Corporate and other	(18)	(12)	-50%
Net earnings applicable to common shares	29	41	-29%

Source: Company data and Credit Suisse

Regulated Gas Utilities - Canadian

This segment consists of Terasen Gas which was acquired on 17 May 2007. Those that have followed the Terasen assets for an extended time frame would likely generally agree with the company's assessment that "[p]erformance was consistent with that expected to be achieved". The company stated that "[o]n a full quarter-over-quarter basis, earnings of the Terasen Gas companies were comparable."

Exhibit 2: Regulated gas utilities – Canadian earnings contribution

C\$ in millions, unless otherwise stated

	Q2 2008	Q2 2007	chg y/y
Terasen Gas	12	1	1100%

Source: Company data and Credit Suisse

Regulated Electric Utilities – Canadian

This segment consists of operating companies such as FortisBC, FortisAlberta, Newfoundland Power and Other Canadian Electric Utilities, which includes Maritime Electric and FortisOntario. Detailed contributions for each of these divisions can be found in the table below.

Exhibit 3: Regulated electric utilities – Canadian contribution

C\$ in millions, unless otherwise stated

	Q2 2008	Q2 2007	chg y/y
FortisBC	7	6	17%
FortisAlberta	7	15	-53%
Newfoundland Power	10	8	25%
Other Cdn Electric Utilities	2	4	-50%
Earnings	26	33	-21%

Source: Company data and Credit Suisse

FortisBC

Segmented earnings at FortisBC increased by 17% compared to the same period last year. See Exhibit 4 for selected highlights.

Exhibit 4: Selected FortisBC performance highlights

	Q2 2008	Q2 2007	chg y/y
Energy deliveries (GWh)	673	670	0%
Revenue (C\$/MWh)	78.75	77.61	1%
Energy supply costs (C\$/MWh)	17.83	19.40	-8%
Operating expenses (C\$/MWh)	25.26	25.37	0%
Gross margin (C\$/MWh)	35.66	32.84	9%
Earnings (C\$millions)	7	6	17%

Source: Company data and Credit Suisse

FortisAlberta

Largely the result of timing issues with regulator approved charges, segmented earnings at FortisAlberta decreased by approximately 53% compared to the same period last year. See the table below for selected highlights.

Exhibit 5: Selected FortisAlberta performance highlights

	Q2 2008	Q2 2007	chg y/y
Energy deliveries (GWh)	3,768	3,650	3%
Revenue (C\$/MWh)	19.90	18.63	7%
Operating expenses (C\$/MWh)	8.49	8.22	3%
Gross margin (C\$/MWh)	11.41	10.41	10%
Earnings (C\$millions)	7	15	-53%

Source: Company data and Credit Suisse

Timing issues at a number of utilities

Newfoundland Power

Earnings in this segment increased by roughly 25% this period compared to the same period last year. Worth noting the increase in earnings was attributed to a shift in the quarterly distribution of annual purchased power expense which increased earnings by approximately C\$2.5m. Exhibit 6 below contains selected highlights for Newfoundland Power.

Exhibit 6: Selected Newfoundland Power performance highlights

	Q2 2008	Q2 2007	chg y/y
Energy deliveries (GWh)	1,183	1,172	1%
Revenue (C\$/MWh)	101.44	98.12	3%
Energy supply costs (C\$/MWh)	59.17	63.14	-6%
Operating expenses (C\$/MWh)	10.99	11.09	-1%
Gross margin (C\$/MWh)	31.28	23.89	31%
Earnings (C\$millions)	10	8	25%

Source: Company data, Credit Suisse estimates

Other Canadian Electric Utilities

Segmented earnings for the quarter decreased by 50% compared to the same quarter last year mainly the result of a C\$2m after-tax repayment by FortisOntario related to a refund the company received in December 2007. See the table below for selected highlights.

Exhibit 7: Selected Other Canadian Electric Utilities performance highlights

	Q2 2008	Q2 2007	chg y/y
Energy deliveries (GWh)	508	516	-2%
Revenue (C\$/MWh)	120.08	125.97	-5%

Regulated Electric Utilities – Caribbean

This segment includes Belize Electricity, Caribbean Utilities, and Fortis Turks and Caicos. Earnings for this segment decreased by roughly 163% compared to the same quarter last year. One notable item in this segment was a C\$13m unfavourable impact relating to the company's 70% share of disallowed previously incurred fuel and purchased power costs at Belize Electricity (see our 30 June 2008 note "*Caribbean conundrum*" for details). The company stated regarding Belize Electricity:

"As a result of the PUC's Final Decision on Belize Electricity's 2008/2009 rate application, Belize Electricity does not meet certain debt covenant financial ratios resulting in approximately \$16 million (BZ\$30 million) of indebtedness being in default as at June 30, 2008. In accordance with certain of these debt covenants, Belize Electricity is also prohibited from incurring new indebtedness or declaring dividends. The Company has informed the lenders of the situation and has requested appropriate waivers. As at June 30, 2008, \$10 million of the above debt was reclassified from long-term to current on the balance sheet."

Belize situation requires ongoing monitoring

See the table below for selected highlights.

Exhibit 8: Selected Caribbean Electric Utilities performance highlights

	Q2 2008	Q2 2007	chg y/y
Energy deliveries (GWh)	276	258	7%
Revenue (C\$/MWh)	282.61	286.82	-1%
Energy supply costs (C\$/MWh)	231.88	158.91	46%
Operating expenses (C\$/MWh)	43.48	42.64	2%
Gross margin (C\$/MWh)	7.25	85.27	-92%
Earnings (C\$millions)	(5)	8	-163%

Non-regulated – Fortis Generation

This segment includes non-regulated generation assets located in Belize, Ontario, Central Newfoundland, British Columbia and Upper New York State. Earnings for the segment increased by 40% from the current quarter compared to the same quarter last year. The improvement can partly be attributed to New York State power prices. See the table below for selected highlights.

Exhibit 9: Selected non-regulated – Fortis Generation performance highlights

	Q2 2008	Q2 2007	chg y/y
Energy deliveries (GWh)	312	274	14%
Revenue (C\$/MWh)	70.51	65.69	7%
Energy supply costs (C\$/MWh)	6.41	7.30	-12%
Operating expenses (C\$/MWh)	12.82	14.60	-12%
Gross margin (C\$/MWh)	51.28	43.80	17%
Earnings (C\$millions)	7	5	40%

Source: Company data and Credit Suisse

Strong NY power prices

Non-regulated – Fortis Properties

Fortis Properties' net unadjusted earning contribution during the quarter was C\$7 million which is nearly a 16.6% increase over last year's quarterly earnings. REVPAR increased to C\$87.54 from C\$82.11 for the comparable period last year. Additionally, the occupancy rate of the Real Estate Division was 96.7%, up from 96.0% last year.

Corporate

Corporate expenses significantly increased to C\$18 million from C\$12 million in Q2 2007. The increase was primarily related to acquisition financing for Terasen.

Outlook

We continue to believe investor, whether existing or prospective, should consider several major issues, including (a) organic growth; (b) capital efficiency; and, (c) acquisition trail. Each of these issues is addressed below.

Organic growth

In the most recent quarter the company's reported capital expenditures totaled C\$389 million for the first half of 2008, of which C\$371 million was for its regulated utilities. Fortis now projects that capital expenditures for 2008 will exceed C\$900 million, a roughly 14% increase from last year. The bulk of this amount will be invested in the company's regulated utility segments. A majority of the total will be spent on Western Canadian assets (Terasen Gas, FortisAlberta, and FortisBC). Additionally, Fortis forecasts a capital plan of more than C\$4.5 billion over the next five years which amounts to roughly a C\$500 million increase from Q1 2008's figures. Roughly C\$300m of the incremental amount is the result of new projects and the remainder arises from overall project inflation. Given the regulated rates of return with utility capital expenditures, the increases should be viewed as longer-term positives provided an appropriate financial balance is struck. Due to the large capital investment opportunity, we continue to believe that capital market access is critical to Fortis. Yet, we do not forecast a specific common equity funding requirement until 2010.

Creeping capital figures

Capital efficiency

From our perspective, Fortis possesses ample opportunities to become much more capital efficient. One strategy involves divesting certain non-utility assets and redeploying capital into utility assets or funding the capital program. Another option would entail divesting partial interests in selected utility assets in an asset management model approach and receiving a management fee. Regardless of approach, we believe there are some rather simple ways for Fortis to increase existing returns.

Generally, we continue to prefer pure-play utility companies without an undue amount of non-core asset exposure. Historically, non-core assets (especially real estate) have been somewhat commonplace for many utilities. Fortis has been no exception to that approach. Notably, the mix of commercial and hospitality real estate assets held by Fortis have been positive contributors and also provide the company a bit of financial flexibility for a selection of reasons. Given the valuation of selected real estate assets, we believe any such monetisation of these assets would likely be favourable for the stock. Additionally, given the recent acquisitions, Fortis Properties continues to increase in scale and scope, which may make it much more attractive for acquisition or monetisation. Yet, for a number of reasons, we continue to believe there is a rather low probability of either of those events occurring.

Opportunities for improved capital efficiency

Even discounting the potential monetization of assets that we would consider to be non-core, we believe Fortis possesses considerable potential to become much more capital efficient. Given the significant interest in infrastructure assets by many investors seeking long-dated types of return, Fortis could easily divest portions of its existing asset base to pension fund investors and charge a management fee for their operational and management expertise. This type of approach could significantly improve capital efficiency and returns on capital. In addition, this asset management approach could also free-up capital that could be used for future acquisitions.

Acquisition trail

In our view, Fortis continues to demonstrate a rather impressive ability to successfully integrate acquisitions. Additionally, we view acquisitions as somewhat central to the company's growth strategy. For instance, the company's most recent Management Discussion and Analysis stated "The Corporation is pursuing acquisitions for profitable growth, focusing on opportunities to acquire regulated natural gas and electric utilities in

Canada, the United States and the Caribbean. Fortis will also pursue growth in its non-regulated businesses in support of its regulated utility growth strategy.” Given the success of Fortis in past transactions, as measured in terms of financials, share price and operationally, we believe the company's current valuation and skill set may lead to some potentially value creating acquisition activity (see Exhibit 10 below for select Fortis M&A transactions).

Exhibit 10: Selected Fortis M&A transactions

\$ in millions, unless otherwise stated

Announced Date	Asset/Company	Deal value (\$m)	Comment
7/23/2007	Delta Regina	CAD 49.95	Delta hotel located in Regina, Saskatchewan.
2/26/2007	Terasen Inc.	CAD 3,700.00	Gas distribution in British Columbia.
11/7/2006	Caribbean Utilities Co.	CAD 55.70	Acquired an additional 16% of Caribbean Utilities Co.
10/19/2006	4 hotels in western Canada	CAD 51.60	4 hotels (Holiday Inn, Best Western and Ramada) located in BC and Alberta.
8/28/2006	PPC Ltd & Atlantic Equipment & Power (Turks & Caicos) Ltd.	CAD 97.70	Electric utility that services ~80% of the Turks and Caicos Islands.

8/31/1999	Brunswick Square Ltd.	CAD 10.12	Acquired 50% of the company by Fortis Properties.
1/31/1999	Mount Peyton	CAD 2.20	Acquired all common shares and notes payable.
	Total USD	USD 65.50	
	Total CAD	CAD 6,110.64	

Source: Bloomberg, Company data and Credit Suisse

In terms of acquisitions, we believe Fortis has a few advantages over others, including:

- With the recent Terasen acquisition, Fortis has growing expertise with both electric and gas utilities;
- Larger size will allow it to look at a larger spectrum of potential target companies;
- A proven ability to effectively integrate acquisitions;
- A rather strong appetite for yield oriented securities in Canada;
- Canada's rather benign interest rate environment;
- Bought deal financing commonly employed in Canada; and,
- The historically strong Canadian dollar versus US players.

Fortis possesses a number of absolute and relative advantages over some other competitors

Valuation

We continue to believe that Fortis has strong organic growth in key areas such as British Columbia, Alberta and the Caribbean. In our view, the company faces a delicate balance of capital investment opportunities and cash flow needs. From our perspective, the next big catalysts for the stock will likely revolve around capital efficiency initiatives or a large scale acquisition. We retain our C\$32.00 target price which is obtained utilizing multiple valuation methodologies, including: a 19.9x P/E multiple of 2009 earnings; an 88 bps yield spread; and, a DCF based valuation. We reiterate our Neutral rating.

Maintain Neutral rating and C\$32.00 target price

3-Year Price, Target Price and Rating Change History Chart for FTS.TO

The analyst(s) responsible for preparing this research report received compensation that is based upon various factors including Credit Suisse's total revenues, a portion of which are generated by Credit Suisse's investment banking activities.

Analysts' stock ratings are defined as follows***:

Outperform (O): The stock's total return is expected to exceed the industry average* by at least 10-15% (or more, depending on perceived risk) over the next 12 months.

Neutral (N): The stock's total return is expected to be in line with the industry average* (range of $\pm 10\%$) over the next 12 months.

Underperform (U):** The stock's total return is expected to underperform the industry average* by 10-15% or more over the next 12 months.

*The industry average refers to the average total return of the relevant country or regional index (except with respect to Europe, where stock ratings are relative to the analyst's industry coverage universe).

**In an effort to achieve a more balanced distribution of stock ratings, the Firm has requested that analysts maintain at least 15% of their rated coverage universe as Underperform. This guideline is subject to change depending on several factors, including general market conditions.

***For Australian and New Zealand stocks a 7.5% threshold replaces the 10% level in all three rating definitions, with a required equity return overlay applied.

Restricted (R): In certain circumstances, Credit Suisse policy and/or applicable law and regulations preclude certain types of communications, including an investment recommendation, during the course of Credit Suisse's engagement in an investment banking transaction and in certain other circumstances.

Volatility Indicator [V]: A stock is defined as volatile if the stock price has moved up or down by 20% or more in a month in at least 8 of the past 24 months or the analyst expects significant volatility going forward.

Analysts' coverage universe weightings are distinct from analysts' stock ratings and are based on the expected performance of an analyst's coverage universe* versus the relevant broad market benchmark**:

Overweight: Industry expected to outperform the relevant broad market benchmark over the next 12 months.

Market Weight: Industry expected to perform in-line with the relevant broad market benchmark over the next 12 months.

Underweight: Industry expected to underperform the relevant broad market benchmark over the next 12 months.

*An analyst's coverage universe consists of all companies covered by the analyst within the relevant sector.

**The broad market benchmark is based on the expected return of the local market index (e.g., the S&P 500 in the U.S.) over the next 12 months.

Credit Suisse's distribution of stock ratings (and banking clients) is:

Global Ratings Distribution		
Outperform/Buy*	44%	(58% banking clients)
Neutral/Hold*	42%	(56% banking clients)
Underperform/Sell*	12%	(52% banking clients)
Restricted	2%	

**For purposes of the NYSE and NASD ratings distribution disclosure requirements, our stock ratings of Outperform, Neutral, and Underperform most closely correspond to Buy, Hold, and Sell, respectively; however, the meanings are not the same, as our stock ratings are determined on a relative basis. (Please refer to definitions above.) An investor's decision to buy or sell a security should be based on investment objectives, current holdings, and other individual factors.*

Price Target: (12 months) for (FTS.TO)

Method: We obtain our C\$32 target price for Fortis Inc. by using multiple valuation methodologies, yield base analysis, and discounted cash flow. We use a P/E (price/earnings) multiples of 19.9x our 2009 EPS (earnings per share) estimate of C\$1.61; we use an EV/EBITDA (enterprise value/earnings before interest, taxes, depreciation, and amortization) of 10.8x and a 88 bps yield spread.

Risks: There are a number of risk to Fortis' achievement of our C\$32.00 target price: commodity prices; weather; environmental; regulatory; access to capital markets; and, interest rates. Moreover, one should never underestimate the power of the regulator in any regulated business.

See the Companies Mentioned section for full company names.

The subject company (FTS.TO) currently is, or was during the 12-month period preceding the date of distribution of this report, a client of Credit Suisse.

Credit Suisse provided investment banking services to the subject company (FTS.TO) within the past 12 months.

Credit Suisse provided non-investment banking services, which may include Sales and Trading services, to the subject company (FTS.TO) within the past 12 months.

Credit Suisse expects to receive or intends to seek investment banking related compensation from the subject company (FTS.TO) within the next 3 months.

Credit Suisse has received compensation for products and services other than investment banking services from the subject company (FTS.TO) within the past 12 months.

CS may not have taken any steps to ensure that the securities referred to in this report are suitable for any particular investor. CS will not treat recipients as its customers by virtue of their receiving the report. The investments or services contained or referred to in this report may not be suitable for you and it is recommended that you consult an independent investment advisor if you are in doubt about such investments or investment services. Nothing in this report constitutes investment, legal, accounting or tax advice or a representation that any investment or strategy is suitable or appropriate to your individual circumstances or otherwise constitutes a personal recommendation to you. CS does not offer advice on the tax consequences of investment and you are advised to contact an independent tax adviser. Please note in particular that the bases and levels of taxation may change.

CS believes the information and opinions in the Disclosure Appendix of this report are accurate and complete. Information and opinions presented in the other sections of the report were obtained or derived from sources CS believes are reliable, but CS makes no representations as to their accuracy or completeness. Additional information is available upon request. CS accepts no liability for loss arising from the use of the material presented in this report, except that this exclusion of liability does not apply to the extent that liability arises under specific statutes or regulations applicable to CS. This report is not to be relied upon in substitution for the exercise of independent judgment. CS may have issued, and may in the future issue, a trading call regarding this security. Trading calls are short term trading opportunities based on market events and catalysts, while stock ratings reflect investment recommendations based on expected total return over a 12-month period as defined in the disclosure section. Because trading calls and stock ratings reflect different assumptions and analytical methods, trading calls may differ directionally from the stock rating. In addition, CS may have issued, and may in the future issue, other reports that are inconsistent with, and reach different conclusions from, the information presented in this report. Those reports reflect the different assumptions, views and analytical methods of the analysts who prepared them and CS is under no obligation to ensure that such other reports are brought to the attention of any recipient of this report. CS is involved in many businesses that relate to companies mentioned in this report. These businesses include specialized trading, risk arbitrage, market making, and other proprietary trading.

Past performance should not be taken as an indication or guarantee of future performance, and no representation or warranty, express or implied, is made regarding future performance. Information, opinions and estimates contained in this report reflect a judgement at its original date of publication by CS and are subject to change without notice. The price, value of and income from any of the securities or financial instruments mentioned in this report can fall as well as rise. The value of securities and financial instruments is subject to exchange rate fluctuation that may have a positive or adverse effect on the price or income of such securities or financial instruments. Investors in securities such as ADR's, the values of which are influenced by currency volatility, effectively assume this risk.

Structured securities are complex instruments, typically involve a high degree of risk and are intended for sale only to sophisticated investors who are capable of understanding and assuming the risks involved. The market value of any structured security may be affected by changes in economic, financial and political factors (including, but not limited to, spot and forward interest and exchange rates), time to maturity, market conditions and volatility, and the credit quality of any issuer or reference issuer. Any investor interested in purchasing a structured product should conduct their own investigation and analysis of the product and consult with their own professional advisers as to the risks involved in making such a purchase.

Some investments discussed in this report have a high level of volatility. High volatility investments may experience sudden and large falls in their value causing losses when that investment is realised. Those losses may equal your original investment. Indeed, in the case of some investments the potential losses may exceed the amount of initial investment, in such circumstances you may be required to pay more money to support those losses. Income yields from investments may fluctuate and, in consequence, initial capital paid to make the investment may be used as part of that income yield. Some investments may not be readily realisable and it may be difficult to sell or realise those investments, similarly it may prove difficult for you to obtain reliable information about the value, or risks, to which such an investment is exposed.

Unlikely acquisition activity

- **Considering the conditions:** Under the existing capital market conditions, we believe clear limitations exist for the acquisition strategy often used by Fortis. Such limitations along with the company's existing leverage levels and possible access to capital markets may affect stock performance. In the near-term, we believe Fortis faces a few positives, including: S&P/TSX 60 index inclusion; ongoing organic utility growth; and, continued interest in selected dividend paying stocks. Given our cautionary stance, we are reducing our target price to C\$28.00 from the previous C\$32.00.
- **Acquisitions delayed, but organic growth continues:** As capital markets become more predictable and less volatile, we believe Fortis may resume an acquisition-based strategy. Yet, until that time, Fortis continues to possess a rather robust outlook for its utility capital program exceeding C\$4.5 billion over the next five years. More than three-quarters of that amount is expected to come from electric utilities which are largely centered on the growth of FortisAlberta, FortisBC and the Caribbean operations.
- **Improved capital efficiency:** From our perspective, Fortis possesses ample opportunities to become much more capital efficient. One strategy involves divesting certain non-utility assets and redeploying capital into utility assets or funding the capital program. Another option would entail divesting partial interests in selected utility assets in an asset management model approach and receiving a management fee. Regardless of approach, we believe there are some rather simple ways for Fortis to increase existing returns.
- **Valuation:** In light of the current environment, we have reduced our Fortis target from C\$32.00 to C\$28.00. We utilize multiple valuation methodologies to obtain our target price, including: roughly a 17.5x P/E multiple of 2009 earnings; a 1.75x book value multiple; and, a DCF based valuation. We reiterate our Neutral rating.

Disclosure Appendix

Important Global Disclosures

I, Andrew M. Kuske, certify that (1) the views expressed in this report accurately reflect my personal views about all of the subject companies and securities and (2) no part of my compensation was, is or will be directly or indirectly related to the specific recommendations or views expressed in this report.

See the Companies Mentioned section for full company names.

3-Year Price, Target Price and Rating Change History Chart for FTS.TO

The analyst(s) responsible for preparing this research report received compensation that is based upon various factors including Credit Suisse's total revenues, a portion of which are generated by Credit Suisse's investment banking activities.

Analysts' stock ratings are defined as follows***:

Outperform (O): The stock's total return is expected to exceed the industry average* by at least 10-15% (or more, depending on perceived risk) over the next 12 months.

Neutral (N): The stock's total return is expected to be in line with the industry average* (range of $\pm 10\%$) over the next 12 months.

Underperform (U):** The stock's total return is expected to underperform the industry average* by 10-15% or more over the next 12 months.

*The industry average refers to the average total return of the relevant country or regional index (except with respect to Europe, where stock ratings are relative to the analyst's industry coverage universe).

**In an effort to achieve a more balanced distribution of stock ratings, the Firm has requested that analysts maintain at least 15% of their rated coverage universe as Underperform. This guideline is subject to change depending on several factors, including general market conditions.

***For Australian and New Zealand stocks a 7.5% threshold replaces the 10% level in all three rating definitions, with a required equity return overlay applied.

Restricted (R): In certain circumstances, Credit Suisse policy and/or applicable law and regulations preclude certain types of communications, including an investment recommendation, during the course of Credit Suisse's engagement in an investment banking transaction and in certain other circumstances.

Volatility Indicator [V]: A stock is defined as volatile if the stock price has moved up or down by 20% or more in a month in at least 8 of the past 24 months or the analyst expects significant volatility going forward.

Analysts' coverage universe weightings are distinct from analysts' stock ratings and are based on the expected performance of an analyst's coverage universe* versus the relevant broad market benchmark**:

Overweight: Industry expected to outperform the relevant broad market benchmark over the next 12 months.

Market Weight: Industry expected to perform in-line with the relevant broad market benchmark over the next 12 months.

Underweight: Industry expected to underperform the relevant broad market benchmark over the next 12 months.

*An analyst's coverage universe consists of all companies covered by the analyst within the relevant sector.

**The broad market benchmark is based on the expected return of the local market index (e.g., the S&P 500 in the U.S.) over the next 12 months.

Credit Suisse's distribution of stock ratings (and banking clients) is:

Global Ratings Distribution		
Outperform/Buy*	41%	(59% banking clients)
Neutral/Hold*	44%	(56% banking clients)
Underperform/Sell*	13%	(50% banking clients)

Restricted

2%

**For purposes of the NYSE and NASD ratings distribution disclosure requirements, our stock ratings of Outperform, Neutral, and Underperform most closely correspond to Buy, Hold, and Sell, respectively; however, the meanings are not the same, as our stock ratings are determined on a relative basis. (Please refer to definitions above.) An investor's decision to buy or sell a security should be based on investment objectives, current holdings, and other individual factors.*

Price Target: (12 months) for (FTS.TO)

Method: We obtain our C\$28 target price for Fortis Inc. by using multiple valuation methodologies, yield base analysis, and discounted cash flow. We use a P/E (price/earnings) multiples of 17.5x our 2009 EPS (earnings per share) estimate of C\$1.61; we use an EV/EBITDA (enterprise value/earnings before interest, taxes, depreciation, and amortization) of 9.8x and a 43 bps yield spread.

Risks: There are a number of risk to Fortis' achievement of our C\$28.00 target price: commodity prices; weather; environmental; regulatory; access to capital markets; and, interest rates. Moreover, one should never underestimate the power of the regulator in any regulated business.

See the Companies Mentioned section for full company names.

The subject company (FTS.TO) currently is, or was during the 12-month period preceding the date of distribution of this report, a client of Credit Suisse.

Credit Suisse provided investment banking services to the subject company (FTS.TO) within the past 12 months.

Credit Suisse provided non-investment banking services, which may include Sales and Trading services, to the subject company (FTS.TO) within the past 12 months.

Credit Suisse expects to receive or intends to seek investment banking related compensation from the subject company (FTS.TO) within the next 3 months.

Credit Suisse has received compensation for products and services other than investment banking services from the subject company (FTS.TO) within the past 12 months.

Important Regional Disclosures

An analyst involved in the preparation of this report has visited certain material operations of the subject company (FTS.TO) within the past 12 months. The analyst may not have visited all material operations of the subject company. The travel expenses of the analyst in connection with such visits were not paid or reimbursed by the subject company, other than de minimus local travel expenses.

Restrictions on certain Canadian securities are indicated by the following abbreviations: NVS--Non-Voting shares; RVS--Restricted Voting Shares; SVS--Subordinate Voting Shares.

Individuals receiving this report from a Canadian investment dealer that is not affiliated with Credit Suisse should be advised that this report may not contain regulatory disclosures the non-affiliated Canadian investment dealer would be required to make if this were its own report.

As of the date of this report, Credit Suisse acts as a market maker or liquidity provider in the equities securities that are the subject of this report.

Principal is not guaranteed in the case of equities because equity prices are variable.

Commission is the commission rate or the amount agreed with a customer when setting up an account or at anytime after that.

CS may have issued a Trade Alert regarding this security. Trade Alerts are short term trading opportunities identified by an analyst on the basis of market events and catalysts, while stock ratings reflect an analyst's investment recommendations based on expected total return over a 12-month period relative to the relevant coverage universe. Because Trade Alerts and stock ratings reflect different assumptions and analytical methods, Trade Alerts may differ directionally from the analyst's stock rating.

The author(s) of this report maintains a CS Model Portfolio that he/she regularly adjusts. The security or securities discussed in this report may be a component of the CS Model Portfolio and subject to such adjustments (which, given the composition of the CS Model Portfolio as a whole, may differ from the recommendation in this report, as well as opportunities or strategies identified in Trading Alerts concerning the same security). The CS Model Portfolio and important disclosures about it are available at www.credit-suisse.com/ti.

To the extent this is a report authored in whole or in part by a non-U.S. analyst and is made available in the U.S., the following are important disclosures regarding any non-U.S. analyst contributors:

The non-U.S. research analysts listed below (if any) are not registered/qualified as research analysts with FINRA. The non-U.S. research analysts listed below may not be associated persons of CSSU and therefore may not be subject to the NASD Rule 2711 and NYSE Rule 472 restrictions on communications with a subject company, public appearances and trading securities held by a research analyst account.

- Andrew M. Kuske, non-U.S. analyst, is a research analyst employed by Credit Suisse Securities (Canada), Inc..

Disclaimers continue on next page.

This report is not directed to, or intended for distribution to or use by, any person or entity who is a citizen or resident of or located in any locality, state, country or other jurisdiction where such distribution, publication, availability or use would be contrary to law or regulation or which would subject Credit Suisse, the Swiss bank, or its subsidiaries or its affiliates ("CS") to any registration or licensing requirement within such jurisdiction. All material presented in this report, unless specifically indicated otherwise, is under copyright to CS. None of the material, nor its content, nor any copy of it, may be altered in any way, transmitted to, copied or distributed to any other party, without the prior express written permission of CS. All trademarks, service marks and logos used in this report are trademarks or service marks or registered trademarks or service marks of CS or its affiliates.

The information, tools and material presented in this report are provided to you for information purposes only and are not to be used or considered as an offer or the solicitation of an offer to sell or to buy or subscribe for securities or other financial instruments. CS may not have taken any steps to ensure that the securities referred to in this report are suitable for any particular investor. CS will not treat recipients as its customers by virtue of their receiving the report. The investments or services contained or referred to in this report may not be suitable for you and it is recommended that you consult an independent investment advisor if you are in doubt about such investments or investment services. Nothing in this report constitutes investment, legal, accounting or tax advice or a representation that any investment or strategy is suitable or appropriate to your individual circumstances or otherwise constitutes a personal recommendation to you. CS does not offer advice on the tax consequences of investment and you are advised to contact an independent tax adviser. Please note in particular that the bases and levels of taxation may change.

CS believes the information and opinions in the Disclosure Appendix of this report are accurate and complete. Information and opinions presented in the other sections of the report were obtained or derived from sources CS believes are reliable, but CS makes no representations as to their accuracy or completeness. Additional information is available upon request. CS accepts no liability for loss arising from the use of the material presented in this report, except that this exclusion of liability does not apply to the extent that liability arises under specific statutes or regulations applicable to CS. This report is not to be relied upon in substitution for the exercise of independent judgment. CS may have issued, and may in the future issue, a trading call regarding this security. Trading calls are short term trading opportunities based on market events and catalysts, while stock ratings reflect investment recommendations based on expected total return over a 12-month period as defined in the disclosure section. Because trading calls and stock ratings reflect different assumptions and analytical methods, trading calls may differ directionally from the stock rating. In addition, CS may have issued, and may in the future issue, other reports that are inconsistent with, and reach different conclusions from, the information presented in this report. Those reports reflect the different assumptions, views and analytical methods of the analysts who prepared them and CS is under no obligation to ensure that such other reports are brought to the attention of any recipient of this report. CS is involved in many businesses that relate to companies mentioned in this report. These businesses include specialized trading, risk arbitrage, market making, and other proprietary trading.

Past performance should not be taken as an indication or guarantee of future performance, and no representation or warranty, express or implied, is made regarding future performance. Information, opinions and estimates contained in this report reflect a judgement at its original date of publication by CS and are subject to change without notice. The price, value of and income from any of the securities or financial instruments mentioned in this report can fall as well as rise. The value of securities and financial instruments is subject to exchange rate fluctuation that may have a positive or adverse effect on the price or income of such securities or financial instruments. Investors in securities such as ADR's, the values of which are influenced by currency volatility, effectively assume this risk.

Structured securities are complex instruments, typically involve a high degree of risk and are intended for sale only to sophisticated investors who are capable of understanding and assuming the risks involved. The market value of any structured security may be affected by changes in economic, financial and political factors (including, but not limited to, spot and forward interest and exchange rates), time to maturity, market conditions and volatility, and the credit quality of any issuer or reference issuer. Any investor interested in purchasing a structured product should conduct their own investigation and analysis of the product and consult with their own professional advisers as to the risks involved in making such a purchase.

Some investments discussed in this report have a high level of volatility. High volatility investments may experience sudden and large falls in their value causing losses when that investment is realised. Those losses may equal your original investment. Indeed, in the case of some investments the potential losses may exceed the amount of initial investment, in such circumstances you may be required to pay more money to support those losses. Income yields from investments may fluctuate and, in consequence, initial capital paid to make the investment may be used as part of that income yield. Some investments may not be readily realisable and it may be difficult to sell or realise those investments, similarly it may prove difficult for you to obtain reliable information about the value, or risks, to which such an investment is exposed.

Fortis Inc. (FTS.TO)

FORECAST INCREASE

Ongoing organic growth

- **A slight beat:** On a headline basis, Fortis reported Q3 2008 headline EPS (FD) of C\$0.31 which required several adjustments. Comparable EPS of C\$0.26 is the result of adjusting for C\$5.5m and C\$2m tax reductions at Terasen Gas and Terasen Inc respectively. The adjusted EPS was higher than our C\$0.24 and that of the Street's at C\$0.21. The figure also exceeded the C\$0.18-C\$0.24 range. We do not place undue emphasis on quarterly results in much of our universe as a result of the inherently long-cycle nature of many assets. In our view, Fortis delivered a relatively solid financial and operation performance which is somewhat typical.
- **Significant organic growth continues:** As expected, Fortis continued to provide a rather robust outlook for its utility capital program. The company expects consolidated utility capital expenditures to exceed C\$4.5 billion from the previous quarter's C\$4.0 billion. More than three-quarters of that amount is expected to come from electric utilities which are largely centered on the growth of FortisAlberta, FortisBC and the Caribbean operations.
- **Wary of M&A in current market conditions:** Historically, Fortis has been very adept at acquisitions. The company's ability to successfully acquire and integrate selected assets has clearly aided corporate growth. Under the existing capital market conditions, we believe clear limitations exist for the typical Fortis strategy. Under normal market conditions, our concerns about the company's balance sheet and minimal maturity profile would be minimal. Yet, we do not view the current capital market conditions for the foreseeable future as being overly conducive to obtaining capital on reasonable terms.
- **Valuation:** Our C\$28.00 target and Neutral rating are obtained via multiple valuation methodologies to obtain our target price, including: roughly a 17.5x P/E multiple of 2009 earnings; a 1.75x book value multiple; and, a DCF based valuation. We reiterate our Neutral rating.

DISCLOSURE APPENDIX CONTAINS IMPORTANT DISCLOSURES, ANALYST CERTIFICATIONS, INFORMATION ON TRADE ALERTS, ANALYST MODEL PORTFOLIOS AND THE STATUS OF NON-U.S. ANALYSTS. U.S. Disclosure: Credit Suisse does and seeks to do business with companies covered in its research reports. As a result, investors should be aware that the Firm may have a conflict of interest that could affect the objectivity of this report. Investors should consider this report as only a single factor in making their investment decision.

On a headline basis, Fortis reported Q3 2008 headline EPS (FD) of C\$0.31 which required several adjustments. Comparable EPS of C\$0.26 is the result of adjusting for C\$5.5m and C\$2m tax reductions at Terasen Gas and Terasen Inc respectively. The adjusted EPS was higher than our C\$0.24 and that of the Street's at C\$0.21. As usual, a substantial amount of organic utility growth continues across various Fortis assets. Once again, in a somewhat typical fashion, we believe Fortis delivered a relatively solid financial and operational performance. This research note is divided into three parts: (a) results; (b) outlook; and, (c) valuation. Each of these areas will be addressed in greater detail below.

A slight beat

Results

Exhibit 1 highlights the segmented unadjusted earnings contributions for the most recent quarter and for the comparable period one year ago. Our commentary for each segment appears under the various headings below.

Exhibit 1: Segmented unadjusted earnings contribution

C\$ in millions, unless otherwise stated

	Q3 2008	Q3 2007	chg y/y
Regulated Gas Utilities - Canadian	1	(4)	125%
Regulated Electric Utilities - Canadian	38	28	36%
Regulated Electric Utilities - Caribbean	7	10	-30%
Non-regulated - Fortis Generation	9	5	80%
Non-regulated - Fortis Properties	9	8	13%
Corporate and other	(15)	(16)	6%
Net earnings applicable to common shares	49	31	58%

Source: Company data and Credit Suisse

Regulated Gas Utilities - Canadian

This segment consists of Terasen Gas which was acquired on 17 May 2007. Those that have followed the Terasen assets for an extended time frame would likely generally agree with the company's assessment that "[d]ue to seasonality of the business, virtually all of the annual earnings of the Terasen Gas companies are generated in the first and fourth quarters". Upon the adjustment for a C\$5.5 million tax reduction, the earnings for this segment were roughly 13% weaker than last year.

Exhibit 2: Regulated gas utilities – Canadian earnings contribution

C\$ in millions, unless otherwise stated

	Q3 2008	Q3 2007	chg y/y
Terasen Gas	(4.5)	(4.0)	-13%

Source: Company data and Credit Suisse

Regulated Electric Utilities – Canadian

This segment consists of operating companies such as FortisBC, FortisAlberta, Newfoundland Power and Other Canadian Electric Utilities, which includes Maritime Electric and FortisOntario. Detailed contributions for each of these divisions can be found in the table below.

Exhibit 3: Regulated electric utilities – Canadian contribution

C\$ in millions, unless otherwise stated

	Q3 2008	Q3 2007	chg y/y
FortisBC	8	6	33%
FortisAlberta	17	15	13%
Newfoundland Power	8	2	300%
Other Cdn Electric Utilities	5	5	0%
Earnings	38	28	36%

Source: Company data and Credit Suisse

FortisBC

Segmented earnings at FortisBC increased by 33% compared to the same period last year. See Exhibit 4 for selected highlights.

Exhibit 4: Selected FortisBC performance highlights

	Q3 2008	Q3 2007	chg y/y
Energy deliveries (GWh)	697	703	-1%
Revenue (C\$/MWh)	74.61	73.97	1%
Energy supply costs (C\$/MWh)	17.22	21.34	-19%
Operating expenses (C\$/MWh)	22.96	22.76	1%
Gross margin (C\$/MWh)	34.43	29.87	15%
Earnings (C\$millions)	8	6	33%

Source: Company data and Credit Suisse

FortisAlberta

Largely the result of increased future income tax recoveries associated with the Alberta Electric System Operator (AESO) charges deferral account, segmented earnings at FortisAlberta increased by approximately 13% compared to the same period last year. See the table below for selected highlights.

Exhibit 5: Selected FortisAlberta performance highlights

	Q3 2008	Q3 2007	chg y/y
Energy deliveries (GWh)	3,748	3,781	-1%
Revenue (C\$/MWh)	19.74	18.51	7%
Operating expenses (C\$/MWh)	8.27	8.20	1%
Gross margin (C\$/MWh)	11.47	10.31	11%
Earnings (C\$millions)	17	15	13%

Source: Company data and Credit Suisse

Newfoundland Power

Earnings in this segment increased by roughly 300% this period compared to the same period last year. Worth noting the increase in earnings was attributed to a shift in the quarterly distribution of annual purchased power expense which increased earnings by approximately C\$5.5m. Exhibit 6 below contains selected highlights for Newfoundland Power.

Exhibit 6: Selected Newfoundland Power performance highlights

	Q3 2008	Q3 2007	chg y/y
Energy deliveries (GWh)	897	874	3%

Regulated Electric Utilities – Caribbean

This segment includes Belize Electricity, Caribbean Utilities, and Fortis Turks and Caicos. Earnings for this segment decreased by roughly 30% compared to the same quarter last year. The C\$3 million decrease in earnings for this segment was mainly due to a reduction in the “value-added” component of the average electricity rate at Belize; a 3.25% reduction in rates and elimination of the CRS at Caribbean Utilities; higher amortization and operating costs; and the losses due to the impact of Hurricane Ike.

The company stated that “[o]n July 25, 2008, Belize Electricity filed application with the Supreme Court of Belize for leave to apply for judicial review of 2008 amended bylaws, upon which the Final Decision was premised, and appeal of the Final Decision. Leave was granted on October 3, 2008. It is expected that the judicial review will be heard in late 2008.”

Belize situation requires ongoing monitoring

See the table below for selected highlights.

	Q3 2008	Q3 2007	chg y/y
Energy deliveries (GWh)	304	283	7%
Revenue (C\$/MWh)	315.79	282.69	12%
Energy supply costs (C\$/MWh)	197.37	148.41	33%
Operating expenses (C\$/MWh)	39.47	38.87	2%
Gross margin (C\$/MWh)	78.95	95.41	-17%
Earnings (C\$millions)	7	10	-30%

Source: Company data and Credit Suisse

Non-regulated – Fortis Generation

This segment includes non-regulated generation assets located in Belize, Ontario, Central Newfoundland, British Columbia and Upper New York State. Earnings for the segment increased by 80% from the current quarter compared to the same quarter last year. The improvement can partly be attributed to New York State power prices and increased production. See the table below for selected highlights.

Exhibit 9: Selected non-regulated – Fortis Generation performance highlights

	Q3 2008	Q3 2007	chg y/y
Energy deliveries (GWh)	305	254	20%
Revenue (C\$/MWh)	68.85	66.93	3%
Energy supply costs (C\$/MWh)	6.56	7.87	-17%
Operating expenses (C\$/MWh)	9.84	11.81	-17%

Strong NY power prices

Non-regulated – Fortis Properties

Fortis Properties' net unadjusted earning contribution during the quarter was C\$9 million which is nearly a 12.5% increase over last year's quarterly earnings. REVPAR slightly

decreased to C\$93.64 from C\$95.11 for the comparable period last year. Additionally, the occupancy rate of the Real Estate Division was 96.6%, slightly down from 96.9% last year.

Corporate

Corporate expenses significantly decreased to C\$15 million from C\$16 million in Q2 2007. The increase was primarily related to a C\$2 million tax reduction associated with the settlement of historical corporate tax at Terasen. However, the adjusted figure would show an increase in corporate expenses by roughly C\$1 million.

Outlook

We continue to believe investor, whether existing or prospective, should consider several major issues, including (a) funding organic growth; (b) a consideration of credit markets; and, (c) acquisition trail. Each of these issues is addressed below.

Funding organic growth

In the most recent quarter the company's reported capital expenditures totaled C\$623 million for the nine months in 2008, of which C\$595 million was for its regulated utilities. Fortis now projects that capital expenditures for 2008 will exceed C\$900 million, a roughly 14% increase from last year. The bulk of this amount will be invested in the company's regulated utility segments. A majority of the total will be spent on Western Canadian assets (Terasen Gas, FortisAlberta, and FortisBC). In addition, Fortis continues to forecast a capital plan of more than C\$4.5 billion over the next five years. Given the regulated rates of return with utility capital expenditures, the increases should be viewed as longer-term positives provided an appropriate financial balance is struck. Due to the large capital investment opportunity, we continue to believe that capital market access is critical to Fortis. Yet, we do not forecast a specific common equity funding requirement until 2010.

With the significant current capital market dislocations, we believe that Fortis may become more motivated to explore possible capital efficiency initiatives. In our view, the company possesses ample opportunities to become much more capital efficient. One strategy involves divesting certain non-utility assets and redeploying capital into utility assets or funding the capital program. Another option would entail divesting partial interests in selected utility assets in an asset management model approach and receiving a management fee. Regardless of approach, we believe there are some rather simple ways for Fortis to increase existing returns.

Generally, we continue to prefer pure-play utility companies without an undue amount of non-core asset exposure. Historically, non-core assets (especially real estate) have been somewhat commonplace for many utilities. Fortis has been no exception to that approach. Notably, the mix of commercial and hospitality real estate assets held by Fortis have been positive contributors and also provide the company a bit of financial flexibility for a selection of reasons. Given the valuation of selected real estate assets, we believe any such monetisation of these assets would likely be favourable for the stock. Additionally, given the recent acquisitions, Fortis Properties continues to increase in scale and scope, which may make it much more attractive for acquisition or monetisation. Yet, for a number of reasons, we continue to believe there is a rather low probability of either of those events occurring.

Even discounting the potential monetization of assets that we would consider to be non-core, we believe Fortis possesses considerable potential to become much more capital efficient. Given the significant interest in infrastructure assets by many investors seeking long-dated types of return, Fortis could easily divest portions of its existing asset base to pension fund investors and charge a management fee for their operational and management expertise. This type of approach could significantly improve capital efficiency and returns on capital. In addition, this asset management approach could also free-up capital that could be used to fund the existing capital program or fund future acquisitions.

Ongoing organic growth

Opportunities for improved capital efficiency

Capital efficiency initiatives could aid funding of acquisitions or the existing capital program funding

A consideration of credit markets

For the infrastructure sector, we have several of concerns about credit market conditions for the foreseeable future. Some of those concerns include:

- The ability to access to credit markets on reasonable terms;
- Placing debt at the appropriate duration for utility assets;
- Regulatory acceptance of potentially meaningfully higher interest costs;
- The credit raters potentially changing the thresholds for credit metrics;
- Concentration of credit risk with certain financial institutions; and,
- Will the regulatory direction align appropriately with the capital market's expectations.

Many issues related to the direction of credit markets

With respect to capital structure, Fortis has clearly stated objectives:

“To help ensure access to capital, the Corporation targets a consolidated long-term capital structure containing approximately 40 per cent equity, including preference shares, and 60 per cent debt, as well as investment-grade ratings.”

In addition, the company usually raises debt at the subsidiary level “to ensure regulatory transparency, tax efficiency and financial flexibility.” Under normal market conditions, our concerns about the company's balance sheet and minimal maturity profile would be minimal. Yet, we do not view the current capital market conditions for the foreseeable future as being overly conducive to obtaining capital on reasonable terms. Therefore, we have a degree of concern about potential required de-leveraging by Fortis to maintain a reasonably competitive credit rating.

Acquisition trail

In our view, Fortis continues to demonstrate a rather impressive ability to successfully integrate acquisitions. Additionally, we view acquisitions as somewhat central to the company's growth strategy. For instance, the company's most recent Management Discussion and Analysis stated “The Corporation is pursuing acquisitions for profitable growth, focusing on opportunities to acquire regulated natural gas and electric utilities in Canada, the United States and the Caribbean. Fortis will also pursue growth in its non-regulated businesses in support of its regulated utility growth strategy.” Given the success of Fortis in past transactions, as measured in terms of financials, share price and operationally, we believe the company's current valuation and skill set may lead to some potentially value creating acquisition activity (see Exhibit 10 below for select Fortis M&A transactions).

Exhibit 10: Selected Fortis M&A transactions

\$ in millions, unless otherwise stated

Announced Date	Asset/Company	Deal value (\$m)	Comment
10/1/2008	Grimsby Power Inc.	CAD 1.10	Acquired a 10% minority interest.
10/1/2008	Caribbean Utilities Co.	CAD 3.00	Acquired an additional 1% of Caribbean Utilities Co.
8/15/2008	Caribbean Utilities Co.	CAD 25.00	Acquired an additional 2% of Caribbean Utilities Co.
7/23/2007	Delta Regina	CAD 49.95	Delta hotel located in Regina, Saskatchewan.
2/26/2007	Terasen Inc.	CAD 3,700.00	Gas distribution in British Columbia.
11/7/2006	Caribbean Utilities Co.	CAD 55.70	Acquired an additional 16% of Caribbean Utilities Co.
10/19/2006	4 hotels in western Canada	CAD 51.60	4 hotels (Holiday Inn, Best Western and Ramada) located in BC and Alberta.
8/28/2006	PPC Ltd & Atlantic Equipment & Power (Turks & Caicos) Ltd.	CAD 97.70	Electric utility that services ~80% of the Turks and Caicos Islands.
1/25/2005	3 hotels in western Canada	CAD 62.60	3 hotels in Western Canada from Greenwood Inns (Calgary, Edmonton and Winnipeg).
12/15/2004	Princeton Light & Power	CAD 3.70	PLP is an electric utility that services Princeton, BC.
5/21/2004	Belize Electric Company Ltd.	USD 3.50	Acquired the remaining 5% interest of the company.
9/17/2003	4 hotels in Ontario	CAD 43.20	4 hotels located in Ontario (Cambridge, Kitchener, Sarnia and Peterborough).
9/15/2003	Alberta Utility & British Columbia Utility (from Aquila)	CAD 1,500.00	BC and Alberta units of Aquila Inc.
2/26/2003	Granite Power Corp	CAD 8.80	Company consist of Granite Power Distribution & Granite Power Generation.
1/30/2003	Caribbean Utilities Co.	CAD 71.00	Acquired additional 3,863,695 Class A Ordinary Shares, representing approximately 15.9 per cent of the outstanding shares of the company and increased Fortis' holding to roughly 38%.
12/1/2002	Delta St John's Hotel and conference centre	CAD 25.90	Hotel in downtown St. John's, Newfoundland
5/9/2002	Cornwall Street Railway Light	CAD 67.70	City of Cornwall electric transmission & distribution utility.
4/16/2002	Kings Place	CAD 27.70	Commercial property in Fredericton, NB.
3/13/2002	Caribbean Utilities Co.	CAD 12.90	Acquired additional ~2% of the company.
3/20/2002	Niagara Power Co.	CAD 49.00	Purchase remaining 50% of Niagara Power Co.
2/1/2002	Cabot palace I	CAD 14.30	133,327 Square feet premium office tower in St. John's, Newfound land
9/18/2001	Portfolio of properties in St. John's	CAD 8.30	Purchased TD Place commercial bldg and 6 parcels of land.
9/14/2001	Aliant Poles	CAD 46.00	Purchased 102,000 poles and related infrastructure from Aliant Telecom.
1/26/2001	Belize Electric Company Ltd.	USD 62.00	Acquired 95% of company from Duke Energy.
12/19/2000	2 Hydro generating stations	CAD 6.90	2 generating stations (6.88MW) in upper New York state.
12/14/2000	Brunswick Square Ltd.	CAD 6.20	Acquired 50% of the company Fortis doesn't own.
12/1/2000	Fort William Building and Blue cross centre	CAD 52.70	Fort William building in St. John's, Newfound land and Blue cross centre in Moncton, New Brunswick.
2/23/2000	Caribbean Utilities Co.	CAD 79.90	Acquired 20% of the company.
12/30/1999	2 Hydro generating stations	CAD 19.77	2 generating stations (16MW) in upper New York state (Moose River & Philadelphia)
10/28/1999	Belize Electricity Ltd.	CAD 36.80	Acquired 67% interest in the main commercial generator, transmitter & distributor of electricity in Belize.
8/31/1999	Brunswick Square Ltd.	CAD 10.12	Acquired 50% of the company by Fortis Properties.
1/31/1999	Mount Peyton	CAD 2.20	Acquired all common shares and notes payable.
	Total USD	USD 65.50	
	Total CAD	CAD 6,139.74	

Source: Bloomberg, Company data and Credit Suisse

In terms of acquisitions, we believe Fortis has a few advantages over others, including:

- With the recent Terasen acquisition, Fortis has growing expertise with both electric and gas utilities;
- Larger size will allow it to look at a larger spectrum of potential target companies;
- A proven ability to effectively integrate acquisitions;
- A rather strong appetite for yield oriented securities in Canada;
- Canada's rather benign interest rate environment;
- Bought deal financing commonly employed in Canada; and,
- The historically strong Canadian dollar versus US players.

Fortis possesses a number of absolute and relative advantages over some other competitors

Historically, Fortis has been very adept at acquisitions. The company's ability to successfully acquire and integrate selected assets has clearly aided corporate growth. Under the existing capital market conditions, we believe clear limitations exist for the typical Fortis strategy. Under normal market conditions, our concerns about the company's balance sheet and minimal maturity profile would be minimal. Yet, we do not view the current capital market conditions for the foreseeable future as being overly conducive to obtaining capital on reasonable terms.

Valuation

We continue to believe that Fortis has strong organic growth in key areas such as British Columbia, Alberta and the Caribbean. In our view, the company faces a delicate balance of capital investment opportunities and cash flow needs. From our perspective, the next big catalysts for the stock will likely revolve around capital efficiency initiatives or a large scale acquisition. Our 2008 earnings estimate increased from C\$1.54 to C\$1.56. We retain

Maintain Neutral rating and C\$28.00 target price

our C\$28.00 target price which is obtained utilizing multiple valuation methodologies, including: a 17.5x P/E multiple of 2009 earnings; a 1.75x book value multiple; and, a DCF based valuation. We reiterate our Neutral rating.

3-Year Price, Target Price and Rating Change History Chart for FTS.TO

FTS.TO	Closing Price	Target Price	Initiation/
Date	(CAD)	(CAD)	Rating Assumption
11/14/05	23.4	27	
9/18/06	24.5	25.5	N
3/16/07	27.15		NC
12/4/07	27.04	32	N X
10/24/08	24.75	28	

The analyst(s) responsible for preparing this research report received compensation that is based upon various factors including Credit Suisse's total revenues, a portion of which are generated by Credit Suisse's investment banking activities.

Analysts' stock ratings are defined as follows***:

Outperform (O): The stock's total return is expected to exceed the industry average* by at least 10-15% (or more, depending on perceived risk) over the next 12 months.

Neutral (N): The stock's total return is expected to be in line with the industry average* (range of $\pm 10\%$) over the next 12 months.

Underperform (U):** The stock's total return is expected to underperform the industry average* by 10-15% or more over the next 12 months.

*The industry average refers to the average total return of the relevant country or regional index (except with respect to Europe, where stock ratings are relative to the analyst's industry coverage universe).

**In an effort to achieve a more balanced distribution of stock ratings, the Firm has requested that analysts maintain at least 15% of their rated coverage universe as Underperform. This guideline is subject to change depending on several factors, including general market conditions.

***For Australian and New Zealand stocks a 7.5% threshold replaces the 10% level in all three rating definitions, with a required equity return overlay applied.

Restricted (R): In certain circumstances, Credit Suisse policy and/or applicable law and regulations preclude certain types of communications, including an investment recommendation, during the course of Credit Suisse's engagement in an investment banking transaction and in certain other circumstances.

Volatility Indicator [V]: A stock is defined as volatile if the stock price has moved up or down by 20% or more in a month in at least 8 of the past 24 months or the analyst expects significant volatility going forward.

Analysts' coverage universe weightings are distinct from analysts' stock ratings and are based on the expected performance of an analyst's coverage universe* versus the relevant broad market benchmark**:

Overweight: Industry expected to outperform the relevant broad market benchmark over the next 12 months.

Market Weight: Industry expected to perform in-line with the relevant broad market benchmark over the next 12 months.

Underweight: Industry expected to underperform the relevant broad market benchmark over the next 12 months.

*An analyst's coverage universe consists of all companies covered by the analyst within the relevant sector.

**The broad market benchmark is based on the expected return of the local market index (e.g., the S&P 500 in the U.S.) over the next 12 months.

Credit Suisse's distribution of stock ratings (and banking clients) is:

Global Ratings Distribution		
Outperform/Buy*	41%	(60% banking clients)
Neutral/Hold*	44%	(56% banking clients)
Underperform/Sell*	13%	(50% banking clients)
Restricted	2%	

**For purposes of the NYSE and NASD ratings distribution disclosure requirements, our stock ratings of Outperform, Neutral, and Underperform most closely correspond to Buy, Hold, and Sell, respectively; however, the meanings are not the same, as our stock ratings are determined on a relative basis. (Please refer to definitions above.) An investor's decision to buy or sell a security should be based on investment objectives, current holdings, and other individual factors.*

Price Target: (12 months) for (FTS.TO)

Method: We obtain our C\$28 target price for Fortis Inc. by using multiple valuation methodologies, yield base analysis, and discounted cash flow. We use a P/E (price/earnings) multiples of 17.5x our 2009 EPS (earnings per share) estimate of C\$1.61; we use an EV/EBITDA (enterprise value/earnings before interest, taxes, depreciation, and amortization) of 9.8x and a 43 bps yield spread.

Risks: There are a number of risk to Fortis' achievement of our C\$28.00 target price: commodity prices; weather; environmental; regulatory; access to capital markets; and, interest rates. Moreover, one should never underestimate the power of the regulator in any regulated business.

See the Companies Mentioned section for full company names.

The subject company (FTS.TO) currently is, or was during the 12-month period preceding the date of distribution of this report, a client of Credit Suisse.

Credit Suisse provided investment banking services to the subject company (FTS.TO) within the past 12 months.

Credit Suisse provided non-investment banking services, which may include Sales and Trading services, to the subject company (FTS.TO) within the past 12 months.

Credit Suisse expects to receive or intends to seek investment banking related compensation from the subject company (FTS.TO) within the next 3 months.

Credit Suisse has received compensation for products and services other than investment banking services from the subject company (FTS.TO) within the past 12 months.

CS may not have taken any steps to ensure that the securities referred to in this report are suitable for any particular investor. CS will not treat recipients as its customers by virtue of their receiving the report. The investments or services contained or referred to in this report may not be suitable for you and it is recommended that you consult an independent investment advisor if you are in doubt about such investments or investment services. Nothing in this report constitutes investment, legal, accounting or tax advice or a representation that any investment or strategy is suitable or appropriate to your individual circumstances or otherwise constitutes a personal recommendation to you. CS does not offer advice on the tax consequences of investment and you are advised to contact an independent tax adviser. Please note in particular that the bases and levels of taxation may change.

CS believes the information and opinions in the Disclosure Appendix of this report are accurate and complete. Information and opinions presented in the other sections of the report were obtained or derived from sources CS believes are reliable, but CS makes no representations as to their accuracy or completeness. Additional information is available upon request. CS accepts no liability for loss arising from the use of the material presented in this report, except that this exclusion of liability does not apply to the extent that liability arises under specific statutes or regulations applicable to CS. This report is not to be relied upon in substitution for the exercise of independent judgment. CS may have issued, and may in the future issue, a trading call regarding this security. Trading calls are short term trading opportunities based on market events and catalysts, while stock ratings reflect investment recommendations based on expected total return over a 12-month period as defined in the disclosure section. Because trading calls and stock ratings reflect different assumptions and analytical methods, trading calls may differ directionally from the stock rating. In addition, CS may have issued, and may in the future issue, other reports that are inconsistent with, and reach different conclusions from, the information presented in this report. Those reports reflect the different assumptions, views and analytical methods of the analysts who prepared them and CS is under no obligation to ensure that such other reports are brought to the attention of any recipient of this report. CS is involved in many businesses that relate to companies mentioned in this report. These businesses include specialized trading, risk arbitrage, market making, and other proprietary trading.

Past performance should not be taken as an indication or guarantee of future performance, and no representation or warranty, express or implied, is made regarding future performance. Information, opinions and estimates contained in this report reflect a judgement at its original date of publication by CS and are subject to change without notice. The price, value of and income from any of the securities or financial instruments mentioned in this report can fall as well as rise. The value of securities and financial instruments is subject to exchange rate fluctuation that may have a positive or adverse effect on the price or income of such securities or financial instruments. Investors in securities such as ADR's, the values of which are influenced by currency volatility, effectively assume this risk.

Structured securities are complex instruments, typically involve a high degree of risk and are intended for sale only to sophisticated investors who are capable of understanding and assuming the risks involved. The market value of any structured security may be affected by changes in economic, financial and political factors (including, but not limited to, spot and forward interest and exchange rates), time to maturity, market conditions and volatility, and the credit quality of any issuer or reference issuer. Any investor interested in purchasing a structured product should conduct their own investigation and analysis of the product and consult with their own professional advisers as to the risks involved in making such a purchase.

Some investments discussed in this report have a high level of volatility. High volatility investments may experience sudden and large falls in their value causing losses when that investment is realised. Those losses may equal your original investment. Indeed, in the case of some investments the potential losses may exceed the amount of initial investment, in such circumstances you may be required to pay more money to support those losses. Income yields from investments may fluctuate and, in consequence, initial capital paid to make the investment may be used as part of that income yield. Some investments may not be readily realisable and it may be difficult to sell or realise those investments, similarly it may prove difficult for you to obtain reliable information about the value, or risks, to which such an investment is exposed.

This report is issued and distributed in Europe (except Switzerland) by Credit Suisse Securities (Europe) Limited, One Cabot Square, London E14 4QJ, England, which is regulated in the United Kingdom by The Financial Services Authority ("FSA"). This report is being distributed in Germany by Credit Suisse Securities (Europe) Limited Niederlassung Frankfurt am Main regulated by the Bundesanstalt fuer Finanzdienstleistungsaufsicht ("BaFin"). This report is being distributed in the United States by Credit Suisse Securities (USA) LLC ; in Switzerland by Credit Suisse; in Canada by Credit Suisse Securities (Canada), Inc.; in Brazil by Banco de Investimentos Credit Suisse (Brasil) S.A.; in Japan by Credit Suisse Securities (Japan) Limited, Financial Instrument Firm, Director-General of Kanto Local Finance Bureau (Kinsho) No. 66, a member of Japan Securities Dealers Association, The Financial Futures Association of Japan; elsewhere in Asia/Pacific by whichever of the following is the appropriately authorised entity in the relevant jurisdiction: Credit Suisse (Hong Kong) Limited, Credit Suisse Equities (Australia) Limited, Credit Suisse Securities (Thailand) Limited, Credit Suisse Securities (Malaysia) Sdn Bhd, Credit Suisse Singapore Branch, Credit Suisse Securities (India) Private Limited, Credit Suisse Securities (Europe) Limited, Seoul Branch, Credit Suisse Taipei Branch, PT Credit Suisse Securities Indonesia, and elsewhere in the world by the relevant authorised affiliate of the above. Research on Taiwanese securities produced by Credit Suisse Taipei Branch has been prepared by a registered Senior Business Person. Research provided to residents of Malaysia is authorised by the Head of Research for Credit Suisse Securities (Malaysia) Sdn. Bhd., to whom they should direct any queries on +603 2723 2020.

In jurisdictions where CS is not already registered or licensed to trade in securities, transactions will only be effected in accordance with applicable securities legislation, which will vary from jurisdiction to jurisdiction and may require that the trade be made in accordance with applicable exemptions from registration or licensing requirements. Non-U.S. customers wishing to effect a transaction should contact a CS entity in their local jurisdiction unless governing law permits otherwise. U.S. customers wishing to effect a transaction should do so only by contacting a representative at Credit Suisse Securities (USA) LLC in the U.S.

Please note that this report was originally prepared and issued by CS for distribution to their market professional and institutional investor customers. Recipients who are not market professional or institutional investor customers of CS should seek the advice of their independent financial advisor prior to taking any investment decision based on this report or for any necessary explanation of its contents. This research may relate to investments or services of a person outside of the UK or to other matters which are not regulated by the FSA or in respect of which the protections of the FSA for private customers and/or the UK compensation scheme may not be available, and further details as to where this may be the case are available upon request in respect of this report.

Any Nielsen Media Research material contained in this report represents Nielsen Media Research's estimates and does not represent facts. NMR has neither reviewed nor approved this report and/or any of the statements made herein.

If this report is being distributed by a financial institution other than Credit Suisse, or its affiliates, that financial institution is solely responsible for distribution. Clients of that institution should contact that institution to effect a transaction in the securities mentioned in this report or require further information. This report does not constitute investment advice by Credit Suisse to the clients of the distributing financial institution, and neither Credit Suisse, its affiliates, and their respective officers, directors and employees accept any liability whatsoever for any direct or consequential loss arising from their use of this report or its content.

Shoring up the balance sheet

- **Equity issue:** After market close, Fortis announced a bought deal financing of 11.7m common shares at a C\$25.65 purchase price which represented a 5% discount to the C\$27.00 closing price. Gross proceeds will be roughly C\$300.1m or, assuming full exercise of an over allotment option, C\$345.1m. Closing for the deal is expected on or about December 19th, 2008. Proceeds will be used to repay debt and for general corporate purposes. In our view, the deal timing is earlier than we expected and for a slightly larger amount.
- **Earnings dilution, but improved balance sheet:** Largely the result of the size of the issue and timing differences against our previous expectations, we have made a number of adjustments to our financial model. We view the equity issue as mildly dilutive and our earnings estimates for 2009 and 2010 decline from C\$1.61 and C\$1.69 to C\$1.57 and C\$1.64, respectively. We believe modest balance sheet improvement should be viewed positively in the current capital markets. Yet, as with other recent equity issuers, we do not expect positive near-term post-issue performance for the Fortis stock.
- **Ongoing growth:** Fortis has a very robust utility capital program. Over the next five-years, Fortis expects consolidated utility capital expenditures to exceed C\$4.5bn. That capital program will likely be balanced with selected strategic acquisitions. In our view, this equity issue is not dissimilar than the C\$150m issued in January, 2007. Less than 2 months after that equity issue, the company announced the Terasen acquisition. We don't believe anything is imminent, however, some relative valuations are attractive at this time.
- **Valuation:** Given the dilution outlined above, we are modestly reducing our target from C\$28.00 to C\$27.50. That target is based upon multiple valuation methodologies, including: roughly a 17.5x P/E multiple on 2009 earnings; a 1.6x book value multiple; and, a DCF based valuation. We reiterate our Neutral rating.

Disclosure Appendix

Important Global Disclosures

I, Andrew M. Kuske, certify that (1) the views expressed in this report accurately reflect my personal views about all of the subject companies and securities and (2) no part of my compensation was, is or will be directly or indirectly related to the specific recommendations or views expressed in this report.

See the Companies Mentioned section for full company names.

3-Year Price, Target Price and Rating Change History Chart for FTS.TO

The analyst(s) responsible for preparing this research report received compensation that is based upon various factors including Credit Suisse's total revenues, a portion of which are generated by Credit Suisse's investment banking activities.

Analysts' stock ratings are defined as follows***:

Outperform (O): The stock's total return is expected to exceed the industry average* by at least 10-15% (or more, depending on perceived risk) over the next 12 months.

Neutral (N): The stock's total return is expected to be in line with the industry average* (range of $\pm 10\%$) over the next 12 months.

Underperform (U):** The stock's total return is expected to underperform the industry average* by 10-15% or more over the next 12 months.

*The industry average refers to the average total return of the relevant country or regional index (except with respect to Europe, where stock ratings are relative to the analyst's industry coverage universe).

**In an effort to achieve a more balanced distribution of stock ratings, the Firm has requested that analysts maintain at least 15% of their rated coverage universe as Underperform. This guideline is subject to change depending on several factors, including general market conditions.

***For Australian and New Zealand stocks a 7.5% threshold replaces the 10% level in all three rating definitions, with a required equity return overlay applied.

Restricted (R): In certain circumstances, Credit Suisse policy and/or applicable law and regulations preclude certain types of communications, including an investment recommendation, during the course of Credit Suisse's engagement in an investment banking transaction and in certain other circumstances.

Volatility Indicator [V]: A stock is defined as volatile if the stock price has moved up or down by 20% or more in a month in at least 8 of the past 24 months or the analyst expects significant volatility going forward.

Analysts' coverage universe weightings are distinct from analysts' stock ratings and are based on the expected performance of an analyst's coverage universe* versus the relevant broad market benchmark**:

Overweight: Industry expected to outperform the relevant broad market benchmark over the next 12 months.

Market Weight: Industry expected to perform in-line with the relevant broad market benchmark over the next 12 months.

Underweight: Industry expected to underperform the relevant broad market benchmark over the next 12 months.

*An analyst's coverage universe consists of all companies covered by the analyst within the relevant sector.

**The broad market benchmark is based on the expected return of the local market index (e.g., the S&P 500 in the U.S.) over the next 12 months.

Credit Suisse's distribution of stock ratings (and banking clients) is:

Global Ratings Distribution		
Outperform/Buy*	39%	(59% banking clients)
Neutral/Hold*	44%	(57% banking clients)
Underperform/Sell*	14%	(51% banking clients)

Restricted

2%

**For purposes of the NYSE and NASD ratings distribution disclosure requirements, our stock ratings of Outperform, Neutral, and Underperform most closely correspond to Buy, Hold, and Sell, respectively; however, the meanings are not the same, as our stock ratings are determined on a relative basis. (Please refer to definitions above.) An investor's decision to buy or sell a security should be based on investment objectives, current holdings, and other individual factors.*

Credit Suisse's policy is to update research reports as it deems appropriate, based on developments with the subject company, the sector or the market that may have a material impact on the research views or opinions stated herein.

Credit Suisse's policy is only to publish investment research that is impartial, independent, clear, fair and not misleading. Credit Suisse does not provide any tax advice. Any statement herein regarding any US federal tax is not intended or written to be used, and cannot be used, by any taxpayer for the purposes of avoiding any penalties.

See the Companies Mentioned section for full company names.

Price Target: (12 months) for (FTS.TO)

Method: We obtain our C\$27.50 target price for Fortis Inc. by using multiple valuation methodologies, yield base analysis, and discounted cash flow. Our target price implies a P/E (price/earnings) multiples of 17.5x our 2009 EPS (earnings per share) estimate of C\$1.57 and an EV/EBITDA (enterprise value/earnings before interest, taxes, depreciation, and amortization) of 10.3x.

Risks: There are a number of risk to Fortis' achievement of our C\$27.50 target price: commodity prices; weather; environmental; regulatory; access to capital markets; and, interest rates. Moreover, one should never underestimate the power of the regulator in any regulated business.

See the Companies Mentioned section for full company names.

The subject company (FTS.TO) currently is, or was during the 12-month period preceding the date of distribution of this report, a client of Credit Suisse.

Credit Suisse provided investment banking services to the subject company (FTS.TO) within the past 12 months.

Credit Suisse provided non-investment banking services, which may include Sales and Trading services, to the subject company (FTS.TO) within the past 12 months.

Credit Suisse expects to receive or intends to seek investment banking related compensation from the subject company (FTS.TO) within the next 3 months.

Credit Suisse has received compensation for products and services other than investment banking services from the subject company (FTS.TO) within the past 12 months.

Important Regional Disclosures

An analyst involved in the preparation of this report has visited certain material operations of the subject company (FTS.TO) within the past 12 months. The analyst may not have visited all material operations of the subject company. The travel expenses of the analyst in connection with such visits were not paid or reimbursed by the subject company, other than de minimus local travel expenses.

Restrictions on certain Canadian securities are indicated by the following abbreviations: NVS--Non-Voting shares; RVS--Restricted Voting Shares; SVS--Subordinate Voting Shares.

Individuals receiving this report from a Canadian investment dealer that is not affiliated with Credit Suisse should be advised that this report may not contain regulatory disclosures the non-affiliated Canadian investment dealer would be required to make if this were its own report.

For Credit Suisse Securities (Canada), Inc.'s policies and procedures regarding the dissemination of equity research, please visit http://www.csfb.com/legal_terms/canada_research_policy.shtml.

As of the date of this report, Credit Suisse acts as a market maker or liquidity provider in the equities securities that are the subject of this report.

Principal is not guaranteed in the case of equities because equity prices are variable.

Commission is the commission rate or the amount agreed with a customer when setting up an account or at anytime after that.

CS may have issued a Trade Alert regarding this security. Trade Alerts are short term trading opportunities identified by an analyst on the basis of market events and catalysts, while stock ratings reflect an analyst's investment recommendations based on expected total return over a 12-month period relative to the relevant coverage universe. Because Trade Alerts and stock ratings reflect different assumptions and analytical methods, Trade Alerts may differ directionally from the analyst's stock rating.

The author(s) of this report maintains a CS Model Portfolio that he/she regularly adjusts. The security or securities discussed in this report may be a component of the CS Model Portfolio and subject to such adjustments (which, given the composition of the CS Model Portfolio as a whole, may differ from the recommendation in this report, as well as opportunities or strategies identified in Trading Alerts concerning the same security). The CS Model Portfolio and important disclosures about it are available at www.credit-suisse.com/ti.

To the extent this is a report authored in whole or in part by a non-U.S. analyst and is made available in the U.S., the following are important disclosures regarding any non-U.S. analyst contributors:

The non-U.S. research analysts listed below (if any) are not registered/qualified as research analysts with FINRA. The non-U.S. research analysts listed below may not be associated persons of CSSU and therefore may not be subject to the NASD Rule 2711 and NYSE Rule 472 restrictions on communications with a subject company, public appearances and trading securities held by a research analyst account.

- Andrew M. Kuske, non-U.S. analyst, is a research analyst employed by Credit Suisse Securities (Canada), Inc..
- Paul Tan, non-U.S. analyst, is a research analyst employed by Credit Suisse Securities (Canada), Inc..

Disclaimers continue on next page.

This report is not directed to, or intended for distribution to or use by, any person or entity who is a citizen or resident of or located in any locality, state, country or other jurisdiction where such distribution, publication, availability or use would be contrary to law or regulation or which would subject Credit Suisse, the Swiss bank, or its subsidiaries or its affiliates ("CS") to any registration or licensing requirement within such jurisdiction. All material presented in this report, unless specifically indicated otherwise, is under copyright to CS. None of the material, nor its content, nor any copy of it, may be altered in any way, transmitted to, copied or distributed to any other party, without the prior express written permission of CS. All trademarks, service marks and logos used in this report are trademarks or service marks or registered trademarks or service marks of CS or its affiliates.

The information, tools and material presented in this report are provided to you for information purposes only and are not to be used or considered as an offer or the solicitation of an offer to sell or to buy or subscribe for securities or other financial instruments. CS may not have taken any steps to ensure that the securities referred to in this report are suitable for any particular investor. CS will not treat recipients as its customers by virtue of their receiving the report. The investments or services contained or referred to in this report may not be suitable for you and it is recommended that you consult an independent investment advisor if you are in doubt about such investments or investment services. Nothing in this report constitutes investment, legal, accounting or tax advice or a representation that any investment or strategy is suitable or appropriate to your individual circumstances or otherwise constitutes a personal recommendation to you. CS does not offer advice on the tax consequences of investment and you are advised to contact an independent tax adviser. Please note in particular that the bases and levels of taxation may change.

CS believes the information and opinions in the Disclosure Appendix of this report are accurate and complete. Information and opinions presented in the other sections of the report were obtained or derived from sources CS believes are reliable, but CS makes no representations as to their accuracy or completeness. Additional information is available upon request. CS accepts no liability for loss arising from the use of the material presented in this report, except that this exclusion of liability does not apply to the extent that liability arises under specific statutes or regulations applicable to CS. This report is not to be relied upon in substitution for the exercise of independent judgment. CS may have issued, and may in the future issue, a trading call regarding this security. Trading calls are short term trading opportunities based on market events and catalysts, while stock ratings reflect investment recommendations based on expected total return over a 12-month period as defined in the disclosure section. Because trading calls and stock ratings reflect different assumptions and analytical methods, trading calls may differ directionally from the stock rating. In addition, CS may have issued, and may in the future issue, other reports that are inconsistent with, and reach different conclusions from, the information presented in this report. Those reports reflect the different assumptions, views and analytical methods of the analysts who prepared them and CS is under no obligation to ensure that such other reports are brought to the attention of any recipient of this report. CS is involved in many businesses that relate to companies mentioned in this report. These businesses include specialized trading, risk arbitrage, market making, and other proprietary trading.

Past performance should not be taken as an indication or guarantee of future performance, and no representation or warranty, express or implied, is made regarding future performance. Information, opinions and estimates contained in this report reflect a judgement at its original date of publication by CS and are subject to change without notice. The price, value of and income from any of the securities or financial instruments mentioned in this report can fall as well as rise. The value of securities and financial instruments is subject to exchange rate fluctuation that may have a positive or adverse effect on the price or income of such securities or financial instruments. Investors in securities such as ADR's, the values of which are influenced by currency volatility, effectively assume this risk.

Structured securities are complex instruments, typically involve a high degree of risk and are intended for sale only to sophisticated investors who are capable of understanding and assuming the risks involved. The market value of any structured security may be affected by changes in economic, financial and political factors (including, but not limited to, spot and forward interest and exchange rates), time to maturity, market conditions and volatility, and the credit quality of any issuer or reference issuer. Any investor interested in purchasing a structured product should conduct their own investigation and analysis of the product and consult with their own professional advisers as to the risks involved in making such a purchase.

Some investments discussed in this report have a high level of volatility. High volatility investments may experience sudden and large falls in their value causing losses when that investment is realised. Those losses may equal your original investment. Indeed, in the case of some investments the potential losses may exceed the amount of initial investment, in such circumstances you may be required to pay more money to support those losses. Income yields from investments may fluctuate and, in consequence, initial capital paid to make the investment may be used as part of that income yield. Some investments may not be readily realisable and it may be difficult to sell or realise those investments, similarly it may prove difficult for you to obtain reliable information about the value, or risks, to which such an investment is exposed.

Potential power plant purchase

- **Acquisition opportunity:** AbitibiBowater Inc. announced that the company will take several actions "aimed at creating a more flexible and responsive operating platform". One such action was the permanent closure by the end of Q1 2009 of the Grand Falls, Newfoundland and Labrador newsprint mill. That facility receives some power from the Exploits River Hydro Partnership in which Fortis Generation holds a 51% interest and Abitibi the remainder. The partnership owns and operates two hydro electric generating plants in central Newfoundland. These plants produce roughly 590 GWh annually, of which 450 GWh is utilized by AbitibiBowater and the remainder is sold to Newfoundland Hydro under a 30-year take-or-pay PPA, expiring in 2033.
- **Powering up:** Given the partnership structure, Fortis seems well positioned to purchase the remaining portion of the Exploits River Hydro Partnership that it does not own from Abitibi. In our view, the incremental power could be easily sold to Newfoundland Hydro under a new longer-term PPA. Subject to terms, this potential transaction could be incrementally positive for Fortis.
- **Ongoing growth:** Fortis has a very robust utility capital program. Over the next five years, Fortis expects consolidated utility capital expenditures to exceed C\$4.5bn. That capital program will likely be balanced with selected strategic acquisitions. We don't believe anything material is imminent, however, some relative valuations are attractive at this time.
- **Valuation:** Our rating and C\$27.50 target price is based upon multiple valuation methodologies, including: roughly a 17.5x P/E multiple on 2009 earnings; a 1.6x book value multiple; and, a DCF based valuation. We reiterate our Neutral rating.

3-Year Price, Target Price and Rating Change History Chart for FTS.TO

The analyst(s) responsible for preparing this research report received compensation that is based upon various factors including Credit Suisse's total revenues, a portion of which are generated by Credit Suisse's investment banking activities.

Analysts' stock ratings are defined as follows***:

Outperform (O): The stock's total return is expected to exceed the industry average* by at least 10-15% (or more, depending on perceived risk) over the next 12 months.

Neutral (N): The stock's total return is expected to be in line with the industry average* (range of $\pm 10\%$) over the next 12 months.

Underperform (U):** The stock's total return is expected to underperform the industry average* by 10-15% or more over the next 12 months.

*The industry average refers to the average total return of the relevant country or regional index (except with respect to Europe, where stock ratings are relative to the analyst's industry coverage universe).

**In an effort to achieve a more balanced distribution of stock ratings, the Firm has requested that analysts maintain at least 15% of their rated coverage universe as Underperform. This guideline is subject to change depending on several factors, including general market conditions.

***For Australian and New Zealand stocks a 7.5% threshold replaces the 10% level in all three rating definitions, with a required equity return overlay applied.

Restricted (R): In certain circumstances, Credit Suisse policy and/or applicable law and regulations preclude certain types of communications, including an investment recommendation, during the course of Credit Suisse's engagement in an investment banking transaction and in certain other circumstances.

Volatility Indicator [V]: A stock is defined as volatile if the stock price has moved up or down by 20% or more in a month in at least 8 of the past 24 months or the analyst expects significant volatility going forward.

Analysts' coverage universe weightings are distinct from analysts' stock ratings and are based on the expected performance of an analyst's coverage universe* versus the relevant broad market benchmark**:

Overweight: Industry expected to outperform the relevant broad market benchmark over the next 12 months.

Market Weight: Industry expected to perform in-line with the relevant broad market benchmark over the next 12 months.

Underweight: Industry expected to underperform the relevant broad market benchmark over the next 12 months.

*An analyst's coverage universe consists of all companies covered by the analyst within the relevant sector.

**The broad market benchmark is based on the expected return of the local market index (e.g., the S&P 500 in the U.S.) over the next 12 months.

Credit Suisse's distribution of stock ratings (and banking clients) is:

Global Ratings Distribution		
Outperform/Buy*	39%	(60% banking clients)
Neutral/Hold*	45%	(57% banking clients)

Underperform/Sell*	14%	(51% banking clients)
Restricted	2%	

*For purposes of the NYSE and NASD ratings distribution disclosure requirements, our stock ratings of Outperform, Neutral, and Underperform most closely correspond to Buy, Hold, and Sell, respectively; however, the meanings are not the same, as our stock ratings are determined on a relative basis. (Please refer to definitions above.) An investor's decision to buy or sell a security should be based on investment objectives, current holdings, and other individual factors.

Credit Suisse's policy is to update research reports as it deems appropriate, based on developments with the subject company, the sector or the market that may have a material impact on the research views or opinions stated herein.

Credit Suisse's policy is only to publish investment research that is impartial, independent, clear, fair and not misleading. For more detail please refer to Credit Suisse's Policies for Managing Conflicts of Interest in connection with Investment Research: http://www.csfb.com/research-and-analytics/disclaimer/managing_conflicts_disclaimer.html

Credit Suisse does not provide any tax advice. Any statement herein regarding any US federal tax is not intended or written to be used, and cannot be used, by any taxpayer for the purposes of avoiding any penalties.

See the Companies Mentioned section for full company names.

Price Target: (12 months) for (FTS.TO)

Method: We obtain our C\$27.50 target price for Fortis Inc. by using multiple valuation methodologies, yield base analysis, and discounted cash flow. Our target price implies a P/E (price/earnings) multiples of 17.5x our 2009 EPS (earnings per share) estimate of C\$1.57 and an EV/EBITDA (enterprise value/earnings before interest, taxes, depreciation, and amortization) of 10.3x.

Risks: There are a number of risk to Fortis' achievement of our C\$27.50 target price: commodity prices; weather; environmental; regulatory; access to capital markets; and, interest rates. Moreover, one should never underestimate the power of the regulator in any regulated business.

See the Companies Mentioned section for full company names.

The subject company (FTS.TO) currently is, or was during the 12-month period preceding the date of distribution of this report, a client of Credit Suisse.

Credit Suisse provided investment banking services to the subject company (FTS.TO) within the past 12 months.

Credit Suisse provided non-investment banking services, which may include Sales and Trading services, to the subject company (FTS.TO) within the past 12 months.

Credit Suisse expects to receive or intends to seek investment banking related compensation from the subject company (FTS.TO) within the next 3 months.

Credit Suisse has received compensation for products and services other than investment banking services from the subject company (FTS.TO) within the past 12 months.

Important Regional Disclosures

An analyst involved in the preparation of this report has visited certain material operations of the subject company (FTS.TO) within the past 12 months. The analyst may not have visited all material operations of the subject company. The travel expenses of the analyst in connection with such visits were not paid or reimbursed by the subject company, other than de minimus local travel expenses.

Restrictions on certain Canadian securities are indicated by the following abbreviations: NVS--Non-Voting shares; RVS--Restricted Voting Shares; SVS--Subordinate Voting Shares.

Individuals receiving this report from a Canadian investment dealer that is not affiliated with Credit Suisse should be advised that this report may not contain regulatory disclosures the non-affiliated Canadian investment dealer would be required to make if this were its own report.

For Credit Suisse Securities (Canada), Inc.'s policies and procedures regarding the dissemination of equity research, please visit http://www.csfb.com/legal_terms/canada_research_policy.shtml.

As of the date of this report, Credit Suisse acts as a market maker or liquidity provider in the equities securities that are the subject of this report.

Principal is not guaranteed in the case of equities because equity prices are variable.

Commission is the commission rate or the amount agreed with a customer when setting up an account or at anytime after that.

CS may have issued a Trade Alert regarding this security. Trade Alerts are short term trading opportunities identified by an analyst on the basis of market events and catalysts, while stock ratings reflect an analyst's investment recommendations based on expected total return over a 12-month period relative to the relevant coverage universe. Because Trade Alerts and stock ratings reflect different assumptions and analytical methods, Trade Alerts may differ directionally from the analyst's stock rating.

The author(s) of this report maintains a CS Model Portfolio that he/she regularly adjusts. The security or securities discussed in this report may be a component of the CS Model Portfolio and subject to such adjustments (which, given the composition of the CS Model Portfolio as a whole, may differ from the recommendation in this report, as well as opportunities or strategies identified in Trading Alerts concerning the same security). The CS Model Portfolio and important disclosures about it are available at www.credit-suisse.com/ti.

To the extent this is a report authored in whole or in part by a non-U.S. analyst and is made available in the U.S., the following are important disclosures regarding any non-U.S. analyst contributors:

The non-U.S. research analysts listed below (if any) are not registered/qualified as research analysts with FINRA. The non-U.S. research analysts listed below may not be associated persons of CSSU and therefore may not be subject to the NASD Rule 2711 and NYSE Rule 472 restrictions on communications with a subject company, public appearances and trading securities held by a research analyst account.

- Andrew M. Kuske, non-U.S. analyst, is a research analyst employed by Credit Suisse Securities (Canada), Inc..
- Paul Tan, non-U.S. analyst, is a research analyst employed by Credit Suisse Securities (Canada), Inc..

Disclaimers continue on next page.

This report is not directed to, or intended for distribution to or use by, any person or entity who is a citizen or resident of or located in any locality, state, country or other jurisdiction where such distribution, publication, availability or use would be contrary to law or regulation or which would subject Credit Suisse, the Swiss bank, or its subsidiaries or its affiliates ("CS") to any registration or licensing requirement within such jurisdiction. All material presented in this report, unless specifically indicated otherwise, is under copyright to CS. None of the material, nor its content, nor any copy of it, may be altered in any way, transmitted to, copied or distributed to any other party, without the prior express written permission of CS. All trademarks, service marks and logos used in this report are trademarks or service marks or registered trademarks or service marks of CS or its affiliates.

The information, tools and material presented in this report are provided to you for information purposes only and are not to be used or considered as an offer or the solicitation of an offer to sell or to buy or subscribe for securities or other financial instruments. CS may not have taken any steps to ensure that the securities referred to in this report are suitable for any particular investor. CS will not treat recipients as its customers by virtue of their receiving the report. The investments or services contained or referred to in this report may not be suitable for you and it is recommended that you consult an independent investment advisor if you are in doubt about such investments or investment services. Nothing in this report constitutes investment, legal, accounting or tax advice or a representation that any investment or strategy is suitable or appropriate to your individual circumstances or otherwise constitutes a personal recommendation to you. CS does not offer advice on the tax consequences of investment and you are advised to contact an independent tax adviser. Please note in particular that the bases and levels of taxation may change.

CS believes the information and opinions in the Disclosure Appendix of this report are accurate and complete. Information and opinions presented in the other sections of the report were obtained or derived from sources CS believes are reliable, but CS makes no representations as to their accuracy or completeness. Additional information is available upon request. CS accepts no liability for loss arising from the use of the material presented in this report, except that this exclusion of liability does not apply to the extent that liability arises under specific statutes or regulations applicable to CS. This report is not to be relied upon in substitution for the exercise of independent judgment. CS may have issued, and may in the future issue, a trading call regarding this security. Trading calls are short term trading opportunities based on market events and catalysts, while stock ratings reflect investment recommendations based on expected total return over a 12-month period as defined in the disclosure section. Because trading calls and stock ratings reflect different assumptions and analytical methods, trading calls may differ directionally from the stock rating. In addition, CS may have issued, and may in the future issue, other reports that are inconsistent with, and reach different conclusions from, the information presented in this report. Those reports reflect the different assumptions, views and analytical methods of the analysts who prepared them and CS is under no obligation to ensure that such other reports are brought to the attention of any recipient of this report. CS is involved in many businesses that relate to companies mentioned in this report. These businesses include specialized trading, risk arbitrage, market making, and other proprietary trading.

Past performance should not be taken as an indication or guarantee of future performance, and no representation or warranty, express or implied, is made regarding future performance. Information, opinions and estimates contained in this report reflect a judgement at its original date of publication by CS and are subject to change without notice. The price, value of and income from any of the securities or financial instruments mentioned in this report can fall as well as rise. The value of securities and financial instruments is subject to exchange rate fluctuation that may have a positive or adverse effect on the price or income of such securities or financial instruments. Investors in securities such as ADR's, the values of which are influenced by currency volatility, effectively assume this risk.

Structured securities are complex instruments, typically involve a high degree of risk and are intended for sale only to sophisticated investors who are capable of understanding and assuming the risks involved. The market value of any structured security may be affected by changes in economic, financial and political factors (including, but not limited to, spot and forward interest and exchange rates), time to maturity, market conditions and volatility, and the credit quality of any issuer or reference issuer. Any investor interested in purchasing a structured product should conduct their own investigation and analysis of the product and consult with their own professional advisers as to the risks involved in making such a purchase.

Some investments discussed in this report have a high level of volatility. High volatility investments may experience sudden and large falls in their value causing losses when that investment is realised. Those losses may equal your original investment. Indeed, in the case of some investments the potential losses may exceed the amount of initial investment, in such circumstances you may be required to pay more money to support those losses. Income yields from investments may fluctuate and, in consequence, initial capital paid to make the investment may be used as part of that income yield. Some investments may not be readily realisable and it may be difficult to sell or realise those investments, similarly it may prove difficult for you to obtain reliable information about the value, or risks, to which such an investment is exposed.

COMPANY UPDATE

A discounted DRIP

- **Dividend increase:** Fortis Inc. announced the company will be increasing its quarterly dividend by roughly 4% from C\$0.25 to C\$0.26, payable on March 1, 2009 for shareholders of record at the close of business on February 6, 2009. We previously forecasted no dividend growth in 2009 and a modest growth to C\$0.26/sh per quarter in 2010. Therefore, the earlier than anticipated dividend growth may be viewed somewhat positively. Additionally, the company amended and restated its Dividend Reinvestment and Share Purchase Plan to provide a 2% discount (previously no discount). The discount will be effective for dividends payable on March 1, 2009 and will continue indefinitely.
- **Keeping cash:** We view the steps taken by the company as incrementally (albeit modestly) positive for the stock. Moreover, the company's dividend reinvestment plan should provide additional cash flow to the company for its large capital program. We continue to believe that Fortis will require external equity in the future to fund its capital program.
- **Ongoing growth:** Fortis has a very robust utility capital program. Over the next five-years, Fortis expects consolidated utility capital expenditures to exceed C\$4.5bn. That capital program will likely be balanced with selected strategic acquisitions. A potential acquisition of the remaining share of the Exploits River Hydro Partnership is possible (see our 4 December note). Yet, we don't believe anything material is imminent, however, some relative valuations are attractive at this time.
- **Valuation:** Our rating and C\$27.50 target price is based upon multiple valuation methodologies, including: roughly a 17.5x P/E multiple on 2009 earnings; a 1.6x book value multiple; and, a DCF based valuation. We reiterate our Neutral rating.

Share price performance

3-Year Price, Target Price and Rating Change History Chart for FTS.TO

The analyst(s) responsible for preparing this research report received compensation that is based upon various factors including Credit Suisse's total revenues, a portion of which are generated by Credit Suisse's investment banking activities.

Analysts' stock ratings are defined as follows***:

Outperform (O): The stock's total return is expected to exceed the industry average* by at least 10-15% (or more, depending on perceived risk) over the next 12 months.

Neutral (N): The stock's total return is expected to be in line with the industry average* (range of $\pm 10\%$) over the next 12 months.

Underperform (U):** The stock's total return is expected to underperform the industry average* by 10-15% or more over the next 12 months.

*The industry average refers to the average total return of the relevant country or regional index (except with respect to Europe, where stock ratings are relative to the analyst's industry coverage universe).

**In an effort to achieve a more balanced distribution of stock ratings, the Firm has requested that analysts maintain at least 15% of their rated coverage universe as Underperform. This guideline is subject to change depending on several factors, including general market conditions.

***For Australian and New Zealand stocks a 7.5% threshold replaces the 10% level in all three rating definitions, with a required equity return overlay applied.

Restricted (R): In certain circumstances, Credit Suisse policy and/or applicable law and regulations preclude certain types of communications, including an investment recommendation, during the course of Credit Suisse's engagement in an investment banking transaction and in certain other circumstances.

Volatility Indicator [V]: A stock is defined as volatile if the stock price has moved up or down by 20% or more in a month in at least 8 of the past 24 months or the analyst expects significant volatility going forward.

Analysts' coverage universe weightings are distinct from analysts' stock ratings and are based on the expected performance of an analyst's coverage universe* versus the relevant broad market benchmark**:

Overweight: Industry expected to outperform the relevant broad market benchmark over the next 12 months.

Market Weight: Industry expected to perform in-line with the relevant broad market benchmark over the next 12 months.

Underweight: Industry expected to underperform the relevant broad market benchmark over the next 12 months.

*An analyst's coverage universe consists of all companies covered by the analyst within the relevant sector.

**The broad market benchmark is based on the expected return of the local market index (e.g., the S&P 500 in the U.S.) over the next 12 months.

Credit Suisse's distribution of stock ratings (and banking clients) is:

Global Ratings Distribution		
Outperform/Buy*	39%	(61% banking clients)
Neutral/Hold*	44%	(58% banking clients)
Underperform/Sell*	15%	(49% banking clients)

Restricted

2%

**For purposes of the NYSE and NASD ratings distribution disclosure requirements, our stock ratings of Outperform, Neutral, and Underperform most closely correspond to Buy, Hold, and Sell, respectively; however, the meanings are not the same, as our stock ratings are determined on a relative basis. (Please refer to definitions above.) An investor's decision to buy or sell a security should be based on investment objectives, current holdings, and other individual factors.*

CS will not treat recipients as its customers by virtue of their receiving the report. The investments or services contained or referred to in this report may not be suitable for you and it is recommended that you consult an independent investment advisor if you are in doubt about such investments or investment services. Nothing in this report constitutes investment, legal, accounting or tax advice or a representation that any investment or strategy is suitable or appropriate to your individual circumstances or otherwise constitutes a personal recommendation to you. CS does not offer advice on the tax consequences of investment and you are advised to contact an independent tax adviser. Please note in particular that the bases and levels of taxation may change.

CS believes the information and opinions in the Disclosure Appendix of this report are accurate and complete. Information and opinions presented in the other sections of the report were obtained or derived from sources CS believes are reliable, but CS makes no representations as to their accuracy or completeness. Additional information is available upon request. CS accepts no liability for loss arising from the use of the material presented in this report, except that this exclusion of liability does not apply to the extent that liability arises under specific statutes or regulations applicable to CS. This report is not to be relied upon in substitution for the exercise of independent judgment. CS may have issued, and may in the future issue, a trading call regarding this security. Trading calls are short term trading opportunities based on market events and catalysts, while stock ratings reflect investment recommendations based on expected total return over a 12-month period as defined in the disclosure section. Because trading calls and stock ratings reflect different assumptions and analytical methods, trading calls may differ directionally from the stock rating. In addition, CS may have issued, and may in the future issue, other reports that are inconsistent with, and reach different conclusions from, the information presented in this report. Those reports reflect the different assumptions, views and analytical methods of the analysts who prepared them and CS is under no obligation to ensure that such other reports are brought to the attention of any recipient of this report. CS is involved in many businesses that relate to companies mentioned in this report. These businesses include specialized trading, risk arbitrage, market making, and other proprietary trading.

Past performance should not be taken as an indication or guarantee of future performance, and no representation or warranty, express or implied, is made regarding future performance. Information, opinions and estimates contained in this report reflect a judgement at its original date of publication by CS and are subject to change without notice. The price, value of and income from any of the securities or financial instruments mentioned in this report can fall as well as rise. The value of securities and financial instruments is subject to exchange rate fluctuation that may have a positive or adverse effect on the price or income of such securities or financial instruments. Investors in securities such as ADR's, the values of which are influenced by currency volatility, effectively assume this risk.

Structured securities are complex instruments, typically involve a high degree of risk and are intended for sale only to sophisticated investors who are capable of understanding and assuming the risks involved. The market value of any structured security may be affected by changes in economic, financial and political factors (including, but not limited to, spot and forward interest and exchange rates), time to maturity, market conditions and volatility, and the credit quality of any issuer or reference issuer. Any investor interested in purchasing a structured product should conduct their own investigation and analysis of the product and consult with their own professional advisers as to the risks involved in making such a purchase.

Some investments discussed in this report have a high level of volatility. High volatility investments may experience sudden and large falls in their value causing losses when that investment is realised. Those losses may equal your original investment. Indeed, in the case of some investments the potential losses may exceed the amount of initial investment, in such circumstances you may be required to pay more money to support those losses. Income yields from investments may fluctuate and, in consequence, initial capital paid to make the investment may be used as part of that income yield. Some investments may not be readily realisable and it may be difficult to sell or realise those investments, similarly it may prove difficult for you to obtain reliable information about the value, or risks, to which such an investment is exposed.

This report may provide the addresses of, or contain hyperlinks to, websites. Except to the extent to which the report refers to website material of CS, CS has not reviewed the linked site and takes no responsibility for the content contained therein. Such address or hyperlink (including addresses or hyperlinks to CS's own website material) is provided solely for your convenience and information and the content of the linked site does not in any way form part of this document. This report is issued and distributed in Europe (except Switzerland) by Credit Suisse Securities (Europe) Limited, One Cabot Square, London E14 4QJ, England, which is regulated in the United Kingdom by The Financial Services Authority ("FSA"). This report is being distributed in Germany by Credit Suisse Securities (Europe) Limited Niederlassung Frankfurt am Main regulated by the Bundesanstalt fuer Finanzdienstleistungsaufsicht ("BaFin"). This report is being distributed in the United States by Credit Suisse Securities (USA) LLC ; in Switzerland by Credit Suisse; in Canada by Credit Suisse Securities (Canada), Inc.; in Brazil by Banco de Investimentos Credit Suisse (Brasil) S.A.; in Japan by Credit Suisse Securities (Japan) Limited, Financial Instrument Firm, Director-General of Kanto Local Finance Bureau (Kinsho) No. 66, a member of Japan Securities Dealers Association, The Financial Futures Association of Japan; elsewhere in Asia/Pacific by whichever of the following is the appropriately authorised entity in the relevant jurisdiction: Credit Suisse (Hong Kong) Limited, Credit Suisse Equities (Australia) Limited, Credit Suisse Securities (Thailand) Limited, Credit Suisse Securities (Malaysia) Sdn Bhd, Credit Suisse Singapore Branch, Credit Suisse Securities (India) Private Limited, Credit Suisse Securities (Europe) Limited, Seoul Branch, Credit Suisse Taipei Branch, PT Credit Suisse Securities Indonesia, and elsewhere in the world by the relevant authorised affiliate of the above. Research on Taiwanese securities produced by Credit Suisse Taipei Branch has been prepared by a registered Senior Business Person. Research provided to residents of Malaysia is authorised by the Head of Research for Credit Suisse Securities (Malaysia) Sdn. Bhd., to whom they should direct any queries on +603 2723 2020.

In jurisdictions where CS is not already registered or licensed to trade in securities, transactions will only be effected in accordance with applicable securities legislation, which will vary from jurisdiction to jurisdiction and may require that the trade be made in accordance with applicable exemptions from registration or licensing requirements. Non-U.S. customers wishing to effect a transaction should contact a CS entity in their local jurisdiction unless governing law permits otherwise. U.S. customers wishing to effect a transaction should do so only by contacting a representative at Credit Suisse Securities (USA) LLC in the U.S.

Please note that this report was originally prepared and issued by CS for distribution to their market professional and institutional investor customers. Recipients who are not market professional or institutional investor customers of CS should seek the advice of their independent financial advisor prior to taking any investment decision based on this report or for any necessary explanation of its contents. This research may relate to investments or services of a person outside of the UK or to other matters which are not regulated by the FSA or in respect of which the protections of the FSA for private customers and/or the UK compensation scheme may not be available, and further details as to where this may be the case are available upon request in respect of this report.

Any Nielsen Media Research material contained in this report represents Nielsen Media Research's estimates and does not represent facts. NMR has neither reviewed nor approved this report and/or any of the statements made herein.

If this report is being distributed by a financial institution other than Credit Suisse, or its affiliates, that financial institution is solely responsible for distribution. Clients of that institution should contact that institution to effect a transaction in the securities mentioned in this report or require further information. This report does not constitute investment advice by Credit Suisse to the clients of the distributing financial institution, and neither Credit Suisse, its affiliates, and their respective officers, directors and employees accept any liability whatsoever for any direct or consequential loss arising from their use of this report or its content.

Provincial power play?

- **Power plant in play:** After the recent announcement by AbitibiBowater Inc. to permanently close by the end of Q1 2009 the Grand Falls, Newfoundland and Labrador newsprint mill, the Government of Newfoundland and Labrador introduced, what amounts to, an expropriation bill. According to the Government press release, the bill will “ensure these valuable natural resources are returned to their rightful owners – the people of Newfoundland and Labrador.” The Government also stated, “[t]he Provincial Government will also be taking control of the power plants of Abitibi... ..Nalcor Energy will now manage this asset.” In the near-term, we believe that Fortis will be able to maintain its 51% interest in this generation plant.
- **Ownership change?:** Given the surprise announcement and position, we no longer believe that Fortis will have any opportunity to purchase the 49% interest in the Exploits River Hydro Partnership that it does not own. In fact, over the longer-term, we believe there is a greater probability that Fortis will be able to divest its stake in that asset to Nalcor Energy for fair market value.
- **Ongoing growth:** Fortis has a very robust utility capital program. Over the next five-years, Fortis expects consolidated utility capital expenditures to exceed C\$4.5bn. That capital program will likely be balanced with selected strategic acquisitions. We don't believe anything material is imminent, however, some relative valuations are attractive at this time.
- **Valuation:** Our rating and C\$27.50 target price is based upon multiple valuation methodologies, including: roughly a 17.5x P/E multiple on 2009 earnings; a 1.6x book value multiple; and, a DCF based valuation. We reiterate our Neutral rating.

Important Global Disclosures

I, Andrew M. Kuske, certify that (1) the views expressed in this report accurately reflect my personal views about all of the subject companies and securities and (2) no part of my compensation was, is or will be directly or indirectly related to the specific recommendations or views expressed in this report.

See the Companies Mentioned section for full company names.

3-Year Price, Target Price and Rating Change History Chart for FTS.TO

The analyst(s) responsible for preparing this research report received compensation that is based upon various factors including Credit Suisse's total revenues, a portion of which are generated by Credit Suisse's investment banking activities.

Analysts' stock ratings are defined as follows***:

Outperform (O): The stock's total return is expected to exceed the industry average* by at least 10-15% (or more, depending on perceived risk) over the next 12 months.

Neutral (N): The stock's total return is expected to be in line with the industry average* (range of $\pm 10\%$) over the next 12 months.

Underperform (U):** The stock's total return is expected to underperform the industry average* by 10-15% or more over the next 12 months.

**The industry average refers to the average total return of the relevant country or regional index (except with respect to Europe, where stock ratings are relative to the analyst's industry coverage universe).*

***In an effort to achieve a more balanced distribution of stock ratings, the Firm has requested that analysts maintain at least 15% of their rated coverage universe as Underperform. This guideline is subject to change depending on several factors, including general market conditions.*

****For Australian and New Zealand stocks a 7.5% threshold replaces the 10% level in all three rating definitions, with a required equity return overlay applied.*

Restricted (R): In certain circumstances, Credit Suisse policy and/or applicable law and regulations preclude certain types of communications, including an investment recommendation, during the course of Credit Suisse's engagement in an investment banking transaction and in certain other circumstances.

Volatility Indicator [V]: A stock is defined as volatile if the stock price has moved up or down by 20% or more in a month in at least 8 of the past 24 months or the analyst expects significant volatility going forward.

Analysts' coverage universe weightings are distinct from analysts' stock ratings and are based on the expected performance of an analyst's coverage universe* versus the relevant broad market benchmark**:

Overweight: Industry expected to outperform the relevant broad market benchmark over the next 12 months.

Market Weight: Industry expected to perform in-line with the relevant broad market benchmark over the next 12 months.

Underweight: Industry expected to underperform the relevant broad market benchmark over the next 12 months.

**An analyst's coverage universe consists of all companies covered by the analyst within the relevant sector.*

***The broad market benchmark is based on the expected return of the local market index (e.g., the S&P 500 in the U.S.) over the next 12 months.*

Credit Suisse's distribution of stock ratings (and banking clients) is:

Global Ratings Distribution		
Outperform/Buy*	39%	(61% banking clients)
Neutral/Hold*	44%	(57% banking clients)

Underperform/Sell*	15%	(48% banking clients)
Restricted	2%	

*For purposes of the NYSE and NASD ratings distribution disclosure requirements, our stock ratings of Outperform, Neutral, and Underperform most closely correspond to Buy, Hold, and Sell, respectively; however, the meanings are not the same, as our stock ratings are determined on a relative basis. (Please refer to definitions above.) An investor's decision to buy or sell a security should be based on investment objectives, current holdings, and other individual factors.

Credit Suisse's policy is to update research reports as it deems appropriate, based on developments with the subject company, the sector or the market that may have a material impact on the research views or opinions stated herein.

Credit Suisse's policy is only to publish investment research that is impartial, independent, clear, fair and not misleading. For more detail please refer to Credit Suisse's Policies for Managing Conflicts of Interest in connection with Investment Research: http://www.csfb.com/research-and-analytics/disclaimer/managing_conflicts_disclaimer.html

Credit Suisse does not provide any tax advice. Any statement herein regarding any US federal tax is not intended or written to be used, and cannot be used, by any taxpayer for the purposes of avoiding any penalties.

See the Companies Mentioned section for full company names.

Price Target: (12 months) for (FTS.TO)

Method: We obtain our C\$27.50 target price for Fortis Inc. by using multiple valuation methodologies, yield base analysis, and discounted cash flow. Our target price implies a P/E (price/earnings) multiples of 17.5x our 2009 EPS (earnings per share) estimate of C\$1.57 and an EV/EBITDA (enterprise value/earnings before interest, taxes, depreciation, and amortization) of 10.3x.

Risks: There are a number of risk to Fortis' achievement of our C\$27.50 target price: commodity prices; weather; environmental; regulatory; access to capital markets; and, interest rates. Moreover, one should never underestimate the power of the regulator in any regulated business.

See the Companies Mentioned section for full company names.

The subject company (FTS.TO) currently is, or was during the 12-month period preceding the date of distribution of this report, a client of Credit Suisse.

Credit Suisse provided investment banking services to the subject company (FTS.TO) within the past 12 months.

Credit Suisse provided non-investment banking services, which may include Sales and Trading services, to the subject company (FTS.TO) within the past 12 months.

Credit Suisse expects to receive or intends to seek investment banking related compensation from the subject company (FTS.TO) within the next 3 months.

Credit Suisse has received compensation for products and services other than investment banking services from the subject company (FTS.TO) within the past 12 months.

Important Regional Disclosures

An analyst involved in the preparation of this report has visited certain material operations of the subject company (FTS.TO) within the past 12 months. The analyst may not have visited all material operations of the subject company. The travel expenses of the analyst in connection with such visits were not paid or reimbursed by the subject company, other than de minimus local travel expenses.

Restrictions on certain Canadian securities are indicated by the following abbreviations: NVS--Non-Voting shares; RVS--Restricted Voting Shares; SVS--Subordinate Voting Shares.

Individuals receiving this report from a Canadian investment dealer that is not affiliated with Credit Suisse should be advised that this report may not contain regulatory disclosures the non-affiliated Canadian investment dealer would be required to make if this were its own report.

For Credit Suisse Securities (Canada), Inc.'s policies and procedures regarding the dissemination of equity research, please visit http://www.csfb.com/legal_terms/canada_research_policy.shtml.

As of the date of this report, Credit Suisse acts as a market maker or liquidity provider in the equities securities that are the subject of this report.

Principal is not guaranteed in the case of equities because equity prices are variable.

Commission is the commission rate or the amount agreed with a customer when setting up an account or at anytime after that.

CS may have issued a Trade Alert regarding this security. Trade Alerts are short term trading opportunities identified by an analyst on the basis of market events and catalysts, while stock ratings reflect an analyst's investment recommendations based on expected total return over a 12-month period relative to the relevant coverage universe. Because Trade Alerts and stock ratings reflect different assumptions and analytical methods, Trade Alerts may differ directionally from the analyst's stock rating.

The author(s) of this report maintains a CS Model Portfolio that he/she regularly adjusts. The security or securities discussed in this report may be a component of the CS Model Portfolio and subject to such adjustments (which, given the composition of the CS Model Portfolio as a whole, may differ from the recommendation in this report, as well as opportunities or strategies identified in Trading Alerts concerning the same security). The CS Model Portfolio and important disclosures about it are available at www.credit-suisse.com/ti.

To the extent this is a report authored in whole or in part by a non-U.S. analyst and is made available in the U.S., the following are important disclosures regarding any non-U.S. analyst contributors:

The non-U.S. research analysts listed below (if any) are not registered/qualified as research analysts with FINRA. The non-U.S. research analysts listed below may not be associated persons of CSSU and therefore may not be subject to the NASD Rule 2711 and NYSE Rule 472 restrictions on communications with a subject company, public appearances and trading securities held by a research analyst account.

- Andrew M. Kuske, non-U.S. analyst, is a research analyst employed by Credit Suisse Securities (Canada), Inc..
- Paul Tan, non-U.S. analyst, is a research analyst employed by Credit Suisse Securities (Canada), Inc..

Continuing capital expenditures

- **Earnings review:** On a headline basis, Fortis reported Q4 2008 headline EPS (FD) of C\$0.46. Comparable EPS of C\$0.45 is the result of adjusting for C\$1m additional earnings from Caribbean Utilities related to a change in its fiscal year-end. The adjusted EPS was largely in line with our C\$0.46 estimate which was identical to the Street's view. The figure is roughly in the middle of the C\$0.36-C\$0.58 range. We do not place undue emphasis on quarterly results in much of our universe as a result of the inherently long-cycle nature of many assets. In our view, Fortis delivered a relatively solid financial and operation performance which is somewhat typical.
- **Significant organic growth continues:** As expected, Fortis continued to provide a rather robust outlook for its utility capital program. The company expects consolidated gross capital expenditures to be roughly C\$1bn for 2009 and C\$4.5bn over the next five years. Roughly three-quarters of that amount is expected to come from electric utilities which are largely centered on the growth of FortisAlberta, FortisBC and the Caribbean operations.
- **Wary of M&A in current market conditions:** Historically, Fortis has been very adept at acquisitions. The company's ability to successfully acquire and integrate selected assets has clearly aided corporate growth. Under the existing capital market conditions, we believe clear limitations exist for the typical Fortis strategy. Capital market conditions are demonstrating some signs of improved functioning. Yet, we do not believe the market would likely positively respond to large scale acquisition financing at this time.
- **Valuation:** Our rating and C\$27.50 target price is based upon multiple valuation methodologies, including: roughly a 17.0x P/E multiple on 2010 earnings; a 1.52x book value multiple; and, a DCF based valuation. We reiterate our Neutral rating.

DISCLOSURE APPENDIX CONTAINS IMPORTANT DISCLOSURES, ANALYST CERTIFICATIONS, INFORMATION ON TRADE ALERTS, ANALYST MODEL PORTFOLIOS AND THE STATUS OF NON-U.S. ANALYSTS. U.S. Disclosure: Credit Suisse does and seeks to do business with companies covered in its research reports. As a result, investors should be aware that the Firm may have a conflict of interest that could affect the objectivity of this report. Investors should consider this report as only a single factor in making their investment decision.

On a headline basis, Fortis reported Q4 2008 headline EPS (FD) of C\$0.46. Comparable EPS of C\$0.45 reflected the impact of a C\$1m adjustment arising from Caribbean Utilities earnings related to a change in fiscal year-end. The adjusted EPS was largely in line with our C\$0.46 estimate which was identical to the Street's view. The figure is roughly in the middle of the C\$0.36-C\$0.58 range. As usual, a substantial amount of organic utility growth continues across various Fortis assets. Once again, in a somewhat typical fashion, we believe Fortis delivered a relatively solid financial and operational performance. This research note is divided into three parts: (a) results; (b) outlook; and, (c) valuation. Each of these areas will be addressed in greater detail below.

Largely in line

Results

Exhibit 1 highlights the segmented unadjusted earnings contributions for the most recent quarter and for the comparable period one year ago. Our commentary for each segment appears under the various headings below.

Exhibit 1: Segmented unadjusted earnings contribution

C\$ in millions, unless otherwise stated

	Q4 2008	Q4 2007	chg y/y
Regulated Gas Utilities - Canadian	47	52	-10%
Regulated Electric Utilities - Canadian	29	25	16%
Regulated Electric Utilities - Caribbean	8	9	-11%
Non-regulated - Fortis Generation	8	7	14%
Non-regulated - Fortis Properties	4	8	-50%
Corporate and other	(20)	(22)	9%
Net earnings applicable to common shares	76	79	-4%

Source: Company data and Credit Suisse

Regulated Gas Utilities - Canadian

This segment consists of Terasen Gas which was acquired on 17 May 2007. Those that have followed the Terasen assets for an extended time frame would likely generally agree with the company's assessment that "[d]ue to seasonality of the business, virtually all of the annual earnings of the Terasen Gas companies are generated in the first and fourth quarters". The unadjusted earnings for this segment decreased by roughly 10%. However, upon the adjustment in Q4 2007 for a C\$7 million after-tax gain on the sale of surplus land, the earnings for this segment were roughly 4% stronger than last year.

Exhibit 2: Regulated gas utilities – Canadian earnings contribution (unadjusted)

C\$ in millions, unless otherwise stated

	Q4 2008	Q4 2007	chg y/y
Terasen Gas	47.0	52.0	-10%

Regulated Electric Utilities – Canadian

This segment consists of operating companies such as FortisBC, FortisAlberta, Newfoundland Power and Other Canadian Electric Utilities, which includes Maritime Electric and FortisOntario. Detailed contributions for each of these divisions can be found in the table below.

Exhibit 3: Regulated electric utilities – Canadian contribution (unadjusted)*C\$ in millions, unless otherwise stated*

	Q4 2008	Q4 2007	chg y/y
FortisBC	7	7	0%
FortisAlberta	11	6	83%
Newfoundland Power	8	9	-11%
Other Cdn Electric Utilities	3	3	0%
Earnings	29	25	16%

*Source: Company data and Credit Suisse***FortisBC**

Segmented earnings at FortisBC were flat compared to the same period last year. See Exhibit 4 for selected highlights.

Flat energy deliveries in BC

Exhibit 4: Selected FortisBC performance highlights (unadjusted)

	Q4 2008	Q4 2007	chg y/y
Energy deliveries (GWh)	842	839	0%
Revenue (C\$/MWh)	78.38	72.71	8%
Energy supply costs (C\$/MWh)	27.32	22.65	21%
Operating expenses (C\$/MWh)	21.38	23.84	-10%
Gross margin (C\$/MWh)	29.69	26.22	13%
Earnings (C\$millions)	7	7	0%

*Source: Company data and Credit Suisse***FortisAlberta**

Largely the result of higher revenue and increased future income tax recoveries associated with the Alberta Electric System Operator (AESO) charges deferral account, segmented earnings at FortisAlberta increased by approximately 83% compared to the same period last year. See the table below for selected highlights.

Modest energy delivery growth in Alberta

Exhibit 5: Selected FortisAlberta performance highlights (unadjusted)

	Q4 2008	Q4 2007	chg y/y
Energy deliveries (GWh)	4,068	4,002	2%
Revenue (C\$/MWh)	19.17	16.99	13%
Operating expenses (C\$/MWh)	8.36	8.00	5%
Gross margin (C\$/MWh)	10.82	9.00	20%
Earnings (C\$millions)	11	6	83%

*Source: Company data and Credit Suisse***Newfoundland Power**

Earnings in this segment decreased by roughly 11% this period compared to the same period last year. Worth noting the increase in earnings was attributed to a shift in the quarterly distribution of annual purchased power expense which decreased earnings by approximately C\$2m. Exhibit 6 below contains selected highlights for Newfoundland Power.

Slightly increased NP energy deliveries

Exhibit 6: Selected Newfoundland Power performance highlights (unadjusted)

	Q4 2008	Q4 2007	chg y/y
Energy deliveries (GWh)	1,412	1,384	2%
Revenue (C\$/MWh)	98.44	95.38	3%

Gross margin (C\$/MWh)	25.78	27.08	-5%
Earnings (C\$millions)	3	3	0%

Source: Company data and Credit Suisse

Regulated Electric Utilities – Caribbean

This segment includes Belize Electricity, Caribbean Utilities, and Fortis Turks and Caicos. Earnings for this segment decreased by roughly 11% compared to the same quarter last year. The C\$8m Q4 2008 earnings figure contains a C\$1m positive impact from Caribbean Utilities associate with the change in the utility's fiscal year end.

The company stated that:

"In January 2009, the PUC amended the Final Decision on Belize Electricity's 2008/2009 rate application (the "Amendment"), effective for the period from January 1, 2009 through June 30, 2009. The Amendment provides for an increase in the VAD component of the average electricity rate to allow Belize Electricity to earn a targeted allowed ROA of 12 per cent but reduces the reference cost of power component of the average electricity rate, due to an overall decline in the cost of power. The Amendment, therefore, allows for an overall decrease in the average electricity rate from BZ44.1 cents per kWh to BZ38.7 cents per kWh. The Amendment also provides for a lower regulated asset value upon which the ROA is calculated, while increasing operating expenses by the same amount, and reduces depreciation, taxes and fees and the related revenue requirement."

"Changes made in electricity legislation by the Government of Belize and the PUC, and the June 2008 Final Decision and Amendment, which were based on the changed legislation, have been judicially challenged by Belize Electricity in several proceedings. The judicial process is ongoing with interim rulings, judgments and appeals. The timing or likely outcome of the proceedings is indeterminable at this time."

Belize situation requires ongoing monitoring

See the table below for selected highlights.

Robust energy delivery growth in the Caribbean

Exhibit 8: Selected Caribbean Electric Utilities performance highlights (unadjusted)

	Q4 2008	Q4 2007	chg y/y
Energy deliveries (GWh)	361	272	33%
Revenue (C\$/MWh)	440.44	279.41	58%
Energy supply costs (C\$/MWh)	301.94	154.41	96%
Operating expenses (C\$/MWh)	55.40	36.76	51%
Gross margin (C\$/MWh)	83.10	88.24	-6%
Earnings (C\$millions)	8	9	-11%

Source: Company data and Credit Suisse

Notably, as a result of the regulator's Final Decision on Belize Electricity's 2008/2009 rate application, that company

“does not meet certain debt covenant financial ratios related to loans with the International Bank for Reconstruction and Development and the Caribbean Development Bank... The Company has informed the lenders of the defaults and has requested appropriate waivers. Belize Electricity is also in default of certain debt covenants which have resulted in Belize Electricity being prohibited from incurring new indebtedness or declaring dividends.

In November 2008, First Caribbean Bank withdrew its credit facility with Belize Electricity, requiring the Company to repay approximately BZ\$4 million outstanding under the facility. Scotiabank has also put Belize Electricity on notice that it may not renew its BZ\$5.1 million credit facility with the Company if conditions do not show signs of improvement. As at December 31, 2008, the Scotiabank credit facility was undrawn. A continuation of lower energy supply costs should provide Belize Electricity with some liquidity relief in the near term.”

Non-regulated – Fortis Generation

This segment includes non-regulated generation assets located in Belize, Ontario, Central Newfoundland, British Columbia and Upper New York State. Earnings for the segment increased by 14% from the current quarter compared to the same quarter last year. The improvement can partly be attributed increased production and lower finance charges drive by the refinancing in November 2007. See the table below for selected highlights.

Exhibit 9: Selected non-regulated – Fortis Generation performance highlights

(unadjusted)

	Q4 2008	Q4 2007	chg y/y
Energy deliveries (GWh)	312	303	3%
Revenue (C\$/MWh)	64.10	62.71	2%
Energy supply costs (C\$/MWh)	3.21	6.60	-51%
Operating expenses (C\$/MWh)	9.62	9.90	-3%
Gross margin (C\$/MWh)	51.28	46.20	11%
Earnings (C\$millions)	8	7	14%

Source: Company data and Credit Suisse

Non-regulated – Fortis Properties

Fortis Properties' net unadjusted earning contribution during the quarter was C\$4 million which is nearly a 50% decrease over last year's quarterly earnings. REVPAR slightly decreased to C\$72.86 from C\$73.84 for the comparable period last year. Additionally, the occupancy rate of the Real Estate Division was flat at 96.8% versus last year.

Corporate

Corporate expenses decreased to C\$20 million from C\$22 million in Q4 2007. The decrease was primarily related to lower finance charges, resulting from lower net credit facility borrowings and a higher corporate tax recovery.

Outlook

We continue to believe investor, whether existing or prospective, should consider several major issues, including (a) funding organic growth; (b) a consideration of credit markets; and, (c) acquisition trail. Each of these issues is addressed below.

Funding organic growth

In the most recent quarter the company's reported capital expenditures totaled C\$904 million for the twelve months in 2008, of which C\$862 million was for its regulated utilities. Fortis now projects that capital expenditures for 2009 will exceed C\$1 billion, a roughly 15% increase from 2008. The bulk of this amount will be invested in the company's regulated utility segments. A majority of the total will be spent on Western Canadian assets (Terasen Gas, FortisAlberta, and FortisBC). In addition, Fortis continues to forecast

Ongoing organic growth

a capital plan of more than C\$4.5 billion over the next five years. Given the regulated rates of return with utility capital expenditures, the increases should be viewed as longer-term positives provided an appropriate financial balance is struck. Due to the large capital investment opportunity, we continue to believe that capital market access is critical to Fortis. Given the company's recent common equity issue, we do not forecast a specific common equity funding requirement until 2010 (See note titled "*Shoring up the balance sheet*" published on 2 December 2008 for details on the equity issuance.)

With the significant current capital market dislocations, we believe that Fortis may become more motivated to explore possible capital efficiency initiatives. In our view, the company possesses ample opportunities to become much more capital efficient. One strategy involves divesting certain non-utility assets and redeploying capital into utility assets or funding the capital program. Another option would entail divesting partial interests in selected utility assets in an asset management model approach and receiving a management fee. Regardless of approach, we believe there are some rather simple ways for Fortis to increase existing returns.

Generally, we continue to prefer pure-play utility companies without an undue amount of non-core asset exposure. Historically, non-core assets (especially real estate) have been somewhat commonplace for many utilities. Fortis has been no exception to that approach. Notably, the mix of commercial and hospitality real estate assets held by Fortis have been positive contributors and also provide the company a bit of financial flexibility for a selection of reasons. Given the valuation of selected real estate assets, we believe any such monetisation of these assets would likely be favourable for the stock. Additionally, given the recent acquisitions, Fortis Properties continues to increase in scale and scope, which may make it much more attractive for acquisition or monetisation. Yet, for a number of reasons, we continue to believe there is a rather low probability of either of those events occurring.

Opportunities for improved capital efficiency

Even discounting the potential monetization of assets that we would consider to be non-core, we believe Fortis possesses considerable potential to become much more capital efficient. Given the significant interest in infrastructure assets by many investors seeking long-dated types of return, Fortis could easily divest portions of its existing asset base to pension fund investors and charge a management fee for their operational and management expertise. This type of approach could significantly improve capital efficiency and returns on capital. In addition, this asset management approach could also free-up capital that could be used to fund the existing capital program or fund future acquisitions.

Capital efficiency initiatives could aid funding of acquisitions or the existing capital program funding

A consideration of credit markets

For the infrastructure sector, we have several of concerns about credit market conditions for the foreseeable future. Some of those concerns include:

- The ability to access to credit markets on reasonable terms;
- Placing debt at the appropriate duration for utility assets;
- Regulatory acceptance of potentially meaningfully higher interest costs;
- The credit raters potentially changing the thresholds for credit metrics;
- Concentration of credit risk with certain financial institutions; and,
- Will the regulatory direction align appropriately with the capital market's expectations.

Many issues related to the direction of credit markets

With respect to capital structure, Fortis has clearly stated objectives:

"To help ensure access to capital, the Corporation targets a consolidated long-term capital structure containing approximately 40 per cent equity, including preference shares, and 60 per cent debt, as well as investment-grade ratings."

In addition, the company usually raises debt at the subsidiary level “to ensure regulatory transparency, tax efficiency and financial flexibility.” We are witnessing some signs of improvement in the functioning of capital markets. Yet, we have not really witnessed any major challenges for the higher quality, long-dated infrastructure and regulated utilities in accessing the capital markets.

Acquisition trail

In our view, Fortis continues to demonstrate a rather impressive ability to successfully integrate acquisitions. Additionally, we view acquisitions as somewhat central to the company's growth strategy. For instance, the company's most recent Management Discussion and Analysis stated “The Corporation continues to pursue acquisitions for profitable growth, focusing on opportunities to acquire regulated natural gas and electric utilities in Canada, the United States and the Caribbean. Fortis will also pursue growth in its non-regulated businesses in support of its regulated utility growth strategy.” Given the success of Fortis in past transactions, as measured in terms of financials, share price and operationally, we believe the company's current valuation and skill set may lead to some potentially value creating acquisition activity (see Exhibit 10 below for select Fortis M&A transactions).

Exhibit 10: Selected Fortis M&A transactions

\$ in millions, unless otherwise stated

Announced Date	Asset/Company	Deal value (\$m)	Comment
10/1/2008	Grimsby Power Inc.	CAD 1.10	Acquired a 10% minority interest.
10/1/2008	Caribbean Utilities Co.	CAD 3.00	Acquired an additional 1% of Caribbean Utilities Co.
8/15/2008	Caribbean Utilities Co.	CAD 25.00	Acquired an additional 2% of Caribbean Utilities Co.
7/23/2007	Delta Regina	CAD 49.95	Delta hotel located in Regina, Saskatchewan.
2/26/2007	Terasen Inc.	CAD 3,700.00	Gas distribution in British Columbia.
11/7/2006	Caribbean Utilities Co.	CAD 55.70	Acquired an additional 16% of Caribbean Utilities Co.
10/19/2006	4 hotels in western Canada	CAD 51.60	4 hotels (Holiday Inn, Best Western and Ramada) located in BC and Alberta.
8/28/2006	PPC Ltd & Atlantic Equipment & Power (Turks & Caicos) Ltd.	CAD 97.70	Electric utility that services ~80% of the Turks and Caicos Islands.

5/9/2002	Cornwall Street Railway Light	CAD 67.70	City of Cornwall electric transmission & distribution utility.
4/16/2002	Kings Place	CAD 27.70	Commercial property in Fredericton, NB.
3/13/2002	Caribbean Utilities Co.	CAD 12.90	Acquired additional ~2% of the company.
3/20/2002	Niagara Power Co.	CAD 49.00	Purchase remaining 50% of Niagara Power Co.
2/1/2002	Cabot palace I	CAD 14.30	133,327 Square feet premium office tower in St. John's, Newfoundland
9/18/2001	Portfolio of properties in St. John's	CAD 8.30	Purchased TD Place commercial bldg and 6 parcels of land.
9/14/2001	Aliant Poles	CAD 46.00	Purchased 102,000 poles and related infrastructure from Aliant Telecom.
1/26/2001	Belize Electric Company Ltd.	USD 62.00	Acquired 95% of company from Duke Energy.
12/19/2000	2 Hydro generating stations	CAD 6.90	2 generating stations (6.88MW) in upper New York state.
12/14/2000	Brunswick Square Ltd.	CAD 6.20	Acquired 50% of the company Fortis doesn't own.
12/1/2000	Fort William Building and Blue cross centre	CAD 52.70	Fort William building in St. John's, Newfoundland and Blue cross centre in Moncton, New Brunswick.
2/23/2000	Caribbean Utilities Co.	CAD 79.90	Acquired 20% of the company.
12/30/1999	2 Hydro generating stations	CAD 19.77	2 generating stations (16MW) in upper New York state (Moose River & Philadelphia)
10/28/1999	Belize Electricity Ltd.	CAD 36.80	Acquired 67% interest in the main commercial generator, transmitter & distributor of electricity in Belize.
8/31/1999	Brunswick Square Ltd.	CAD 10.12	Acquired 50% of the company by Fortis Properties.
1/31/1999	Mount Peyton	CAD 2.20	Acquired all common shares and notes payable.
	Total USD	USD 65.50	
	Total CAD	CAD 6,139.74	

Source: Bloomberg, Company data and Credit Suisse

In terms of acquisitions, we believe Fortis has a few advantages over others, including:

- Fortis has growing expertise with both electric and gas utilities;
- Larger size will allow it to look at a larger spectrum of potential target companies;
- A proven ability to effectively integrate acquisitions;
- A rather strong appetite for yield oriented securities in Canada;
- Canada's rather benign interest rate environment; and,

Fortis possesses a number of absolute and relative advantages over some other competitors

■ Bought deal financing commonly employed in Canada.

Historically, Fortis has been very adept at acquisitions. The company's ability to successfully acquire and integrate selected assets has clearly aided corporate growth. Under the existing capital market conditions, we believe clear limitations exist for the typical Fortis strategy. Capital market conditions are demonstrating some signs of improved functioning. Yet, we do not believe the market would likely positively respond to large scale acquisition financing at this time.

We also continue to believe that Fortis may be able to acquire hydro electric generation assets from resources companies that are willing to divest non-core assets. Please see our notes titled "*Provincial power play?*" and "*Potential power plant purchase*" published on 16 December 2008 and 4 December 2008 respectively. (See our note titled "*Expanding spreads?*" published on 12 January 2009 that discusses debt issuances by infrastructure companies in Canada and the US.)

Valuation

We continue to believe that Fortis has strong organic growth in key areas such as British Columbia, Alberta and the Caribbean. In our view, the company faces a delicate balance of capital investment opportunities and cash flow needs. From our perspective, the next big catalysts for the stock will likely revolve around capital efficiency initiatives or a large scale acquisition. Our 2009 earnings estimate is C\$1.57 and we introduce our 2010 estimate at C\$1.64. We retain our C\$27.50 target price which is obtained utilizing multiple valuation methodologies, including: a 17.0x P/E multiple of 2010 earnings; a 1.52x book value multiple; and, a DCF based valuation. We reiterate our Neutral rating.

Maintain Neutral rating and

3-Year Price, Target Price and Rating Change History Chart for FTS.TO

The analyst(s) responsible for preparing this research report received compensation that is based upon various factors including Credit Suisse's total revenues, a portion of which are generated by Credit Suisse's investment banking activities.

Analysts' stock ratings are defined as follows***:

Outperform (O): The stock's total return is expected to exceed the industry average* by at least 10-15% (or more, depending on perceived risk) over the next 12 months.

Neutral (N): The stock's total return is expected to be in line with the industry average* (range of $\pm 10\%$) over the next 12 months.

Underperform (U):** The stock's total return is expected to underperform the industry average* by 10-15% or more over the next 12 months.

**The industry average refers to the average total return of the relevant country or regional index (except with respect to Europe, where stock ratings are relative to the analyst's industry coverage universe).*

***In an effort to achieve a more balanced distribution of stock ratings, the Firm has requested that analysts maintain at least 15% of their rated coverage universe as Underperform. This guideline is subject to change depending on several factors, including general market conditions.*

****For Australian and New Zealand stocks a 7.5% threshold replaces the 10% level in all three rating definitions, with a required equity return overlay applied.*

Restricted (R): In certain circumstances, Credit Suisse policy and/or applicable law and regulations preclude certain types of communications, including an investment recommendation, during the course of Credit Suisse's engagement in an investment banking transaction and in certain other circumstances.

Volatility Indicator [V]: A stock is defined as volatile if the stock price has moved up or down by 20% or more in a month in at least 8 of the past 24 months or the analyst expects significant volatility going forward.

Analysts' coverage universe weightings are distinct from analysts' stock ratings and are based on the expected performance of an analyst's coverage universe* versus the relevant broad market benchmark:**

Overweight: Industry expected to outperform the relevant broad market benchmark over the next 12 months.

Market Weight: Industry expected to perform in-line with the relevant broad market benchmark over the next 12 months.

Underweight: Industry expected to underperform the relevant broad market benchmark over the next 12 months.

**An analyst's coverage universe consists of all companies covered by the analyst within the relevant sector.*

***The broad market benchmark is based on the expected return of the local market index (e.g., the S&P 500 in the U.S.) over the next 12 months.*

Credit Suisse's distribution of stock ratings (and banking clients) is:

Global Ratings Distribution		
Outperform/Buy*	38%	(58% banking clients)
Neutral/Hold*	44%	(55% banking clients)
Underperform/Sell*	17%	(50% banking clients)
Restricted	2%	

**For purposes of the NYSE and NASD ratings distribution disclosure requirements, our stock ratings of Outperform, Neutral, and Underperform most closely correspond to Buy, Hold, and Sell, respectively; however, the meanings are not the same, as our stock ratings are determined on a relative basis. (Please refer to definitions above.) An investor's decision to buy or sell a security should be based on investment objectives, current holdings, and other individual factors.*

See the Companies Mentioned section for full company names.

Price Target: (12 months) for (FTS.TO)

Method: We obtain our C\$27.50 target price for Fortis Inc. by using multiple valuation methodologies, yield base analysis, and discounted cash flow. Our target price implies a P/E (price/earnings) multiple of 17.0x our 2010 EPS (earnings per share) estimate of C\$1.64 and an EV/EBITDA (enterprise value/earnings before interest, taxes, depreciation, and amortization) multiple of 9.9x our EBITDA estimate.

Risks: There are a number of risks to Fortis' achievement of our C\$27.50 target price: commodity prices; weather; environmental; regulatory; access to capital markets; and, interest rates. Moreover, one should never underestimate the power of the regulator in any regulated business.

See the Companies Mentioned section for full company names.

The subject company (FTS.TO) currently is, or was during the 12-month period preceding the date of distribution of this report, a client of Credit Suisse.

Credit Suisse provided investment banking services to the subject company (FTS.TO) within the past 12 months.

Credit Suisse provided non-investment banking services, which may include Sales and Trading services, to the subject company (FTS.TO) within the past 12 months.

Credit Suisse expects to receive or intends to seek investment banking related compensation from the subject company (FTS.TO) within the next 3 months.

Credit Suisse has received compensation for products and services other than investment banking services from the subject company (FTS.TO) within the past 12 months.

Important Regional Disclosures

An analyst involved in the preparation of this report has visited certain material operations of the subject company (FTS.TO) within the past 12 months. The analyst may not have visited all material operations of the subject company. The travel expenses of the analyst in connection with such visits were not paid or reimbursed by the subject company, other than de minimus local travel expenses.

Restrictions on certain Canadian securities are indicated by the following abbreviations: NVS--Non-Voting shares; RVS--Restricted Voting Shares; SVS--Subordinate Voting Shares.

Individuals receiving this report from a Canadian investment dealer that is not affiliated with Credit Suisse should be advised that this report may not contain regulatory disclosures the non-affiliated Canadian investment dealer would be required to make if this were its own report.

For Credit Suisse Securities (Canada), Inc.'s policies and procedures regarding the dissemination of equity research, please visit http://www.csfb.com/legal_terms/canada_research_policy.shtml.

As of the date of this report, Credit Suisse acts as a market maker or liquidity provider in the equities securities that are the subject of this report.

Principal is not guaranteed in the case of equities because equity prices are variable.

Commission is the commission rate or the amount agreed with a customer when setting up an account or at anytime after that.

CS may have issued a Trade Alert regarding this security. Trade Alerts are short term trading opportunities identified by an analyst on the basis of market events and catalysts, while stock ratings reflect an analyst's investment recommendations based on expected total return over a 12-month period relative to the relevant coverage universe. Because Trade Alerts and stock ratings reflect different assumptions and analytical methods, Trade Alerts may differ directionally from the analyst's stock rating.

The author(s) of this report maintains a CS Model Portfolio that he/she regularly adjusts. The security or securities discussed in this report may be a component of the CS Model Portfolio and subject to such adjustments (which, given the composition of the CS Model Portfolio as a whole, may differ from the recommendation in this report, as well as opportunities or strategies identified in Trading Alerts concerning the same security). The CS Model Portfolio and important disclosures about it are available at www.credit-suisse.com/ti.

To the extent this is a report authored in whole or in part by a non-U.S. analyst and is made available in the U.S., the following are important disclosures regarding any non-U.S. analyst contributors:

The non-U.S. research analysts listed below (if any) are not registered/qualified as research analysts with FINRA. The non-U.S. research analysts listed below may not be associated persons of CSSU and therefore may not be subject to the NASD Rule 2711 and NYSE Rule 472 restrictions on communications with a subject company, public appearances and trading securities held by a research analyst account.

- Andrew M. Kuske, non-U.S. analyst, is a research analyst employed by Credit Suisse Securities (Canada), Inc..
- Paul Tan, non-U.S. analyst, is a research analyst employed by Credit Suisse Securities (Canada), Inc..

Disclaimers continue on next page.

This report is not directed to, or intended for distribution to or use by, any person or entity who is a citizen or resident of or located in any locality, state, country or other jurisdiction where such distribution, publication, availability or use would be contrary to law or regulation or which would subject Credit Suisse, the Swiss bank, or its subsidiaries or its affiliates ("CS") to any registration or licensing requirement within such jurisdiction. All material presented in this report, unless specifically indicated otherwise, is under copyright to CS. None of the material, nor its content, nor any copy of it, may be altered in any way, transmitted to, copied or distributed to any other party, without the prior express written permission of CS. All trademarks, service marks and logos used in this report are trademarks or service marks or registered trademarks or service marks of CS or its affiliates.

The information, tools and material presented in this report are provided to you for information purposes only and are not to be used or considered as an offer or the solicitation of an offer to sell or to buy or subscribe for securities or other financial instruments. CS may not have taken any steps to ensure that the securities referred to in this report are suitable for any particular investor. CS will not treat recipients as its customers by virtue of their receiving the report. The investments or services contained or referred to in this report may not be suitable for you and it is recommended that you consult an independent investment advisor if you are in doubt about such investments or investment services. Nothing in this report constitutes investment, legal, accounting or tax advice or a representation that any investment or strategy is suitable or appropriate to your individual circumstances or otherwise constitutes a personal recommendation to you. CS does not offer advice on the tax consequences of investment and you are advised to contact an independent tax adviser. Please note in particular that the bases and levels of taxation may change.

CS believes the information and opinions in the Disclosure Appendix of this report are accurate and complete. Information and opinions presented in the other sections of the report were obtained or derived from sources CS believes are reliable, but CS makes no representations as to their accuracy or completeness. Additional information is available upon request. CS accepts no liability for loss arising from the use of the material presented in this report, except that this exclusion of liability does not apply to the extent that liability arises under specific statutes or regulations applicable to CS. This report is not to be relied upon in substitution for the exercise of independent judgment. CS may have issued, and may in the future issue, a trading call regarding this security. Trading calls are short term trading opportunities based on market events and catalysts, while stock ratings reflect investment recommendations based on expected total return over a 12-month period as defined in the disclosure section. Because trading calls and stock ratings reflect different assumptions and analytical methods, trading calls may differ directionally from the stock rating. In addition, CS may have issued, and may in the future issue, other reports that are inconsistent with, and reach different conclusions from, the information presented in this report. Those reports reflect the different assumptions, views and analytical methods of the analysts who prepared them and CS is under no obligation to ensure that such other reports are brought to the attention of any recipient of this report. CS is involved in many businesses that relate to companies mentioned in this report. These businesses include specialized trading, risk arbitrage, market making, and other proprietary trading.

Past performance should not be taken as an indication or guarantee of future performance, and no representation or warranty, express or implied, is made regarding future performance. Information, opinions and estimates contained in this report reflect a judgement at its original date of publication by CS and are subject to change without notice. The price, value of and income from any of the securities or financial instruments mentioned in this report can fall as well as rise. The value of securities and financial instruments is subject to exchange rate fluctuation that may have a positive or adverse effect on the price or income of such securities or financial instruments. Investors in securities such as ADR's, the values of which are influenced by currency volatility, effectively assume this risk.

Structured securities are complex instruments, typically involve a high degree of risk and are intended for sale only to sophisticated investors who are capable of understanding and assuming the risks involved. The market value of any structured security may be affected by changes in economic, financial and political factors (including, but not limited to, spot and forward interest and exchange rates), time to maturity, market conditions and volatility, and the credit quality of any issuer or reference issuer. Any investor interested in purchasing a structured product should conduct their own investigation and analysis of the product and consult with their own professional advisers as to the risks involved in making such a purchase.

Some investments discussed in this report have a high level of volatility. High volatility investments may experience sudden and large falls in their value causing losses when that investment is realised. Those losses may equal your original investment. Indeed, in the case of some investments the potential losses may exceed the amount of initial investment, in such circumstances you may be required to pay more money to support those losses. Income yields from investments may fluctuate and, in consequence, initial capital paid to make the investment may be used as part of that income yield. Some investments may not be readily realisable and it may be difficult to sell or realise those investments, similarly it may prove difficult for you to obtain reliable information about the value, or risks, to which such an investment is exposed.

This report may provide the addresses of, or contain hyperlinks to, websites. Except to the extent to which the report refers to website material of CS, CS has not reviewed the linked site and takes no responsibility for the content contained therein. Such address or hyperlink (including addresses or hyperlinks to CS's own website material) is provided solely for your convenience and information and the content of the linked site does not in any way form part of this document. Accessing such website or following such link through this report or CS's website shall be at your own risk.

This report is issued and distributed in Europe (except Switzerland) by Credit Suisse Securities (Europe) Limited, One Cabot Square, London E14 4QJ, England, which is regulated in the United Kingdom by The Financial Services Authority ("FSA"). This report is being distributed in Germany by Credit Suisse Securities (Europe) Limited Niederlassung Frankfurt am Main regulated by the Bundesanstalt fuer Finanzdienstleistungsaufsicht ("BaFin"). This report is being distributed in the United States by Credit Suisse Securities (USA) LLC ; in Switzerland by Credit Suisse; in Canada by Credit Suisse Securities (Canada), Inc.; in Brazil by Banco de Investimentos Credit Suisse (Brasil) S.A.; in Japan by Credit Suisse Securities (Japan) Limited, Financial Instrument Firm, Director-General of Kanto Local Finance Bureau (Kinsho) No. 66, a member of Japan Securities Dealers Association, The Financial Futures Association of Japan; elsewhere in Asia/Pacific by whichever of the following is the appropriately authorised entity in the relevant jurisdiction: Credit Suisse (Hong Kong) Limited, Credit Suisse Equities (Australia) Limited, Credit Suisse Securities (Thailand) Limited, Credit Suisse Securities (Malaysia) Sdn Bhd, Credit Suisse Singapore Branch, Credit Suisse Securities (India) Private Limited, Credit Suisse Securities (Europe) Limited, Seoul Branch, Credit Suisse Taipei Branch, PT Credit Suisse Securities Indonesia, and elsewhere in the world by the relevant authorised affiliate of the above. Research on Taiwanese securities produced by Credit Suisse Taipei Branch has been prepared by a registered Senior Business Person. Research provided to residents of Malaysia is authorised by the Head of Research for Credit Suisse Securities (Malaysia) Sdn. Bhd., to whom they should direct any queries on +603 2723 2020.

In jurisdictions where CS is not already registered or licensed to trade in securities, transactions will only be effected in accordance with applicable securities legislation, which will vary from jurisdiction to jurisdiction and may require that the trade be made in accordance with applicable exemptions from registration or licensing requirements. Non-U.S. customers wishing to effect a transaction should contact a CS entity in their local jurisdiction unless governing law permits otherwise. U.S. customers wishing to effect a transaction should do so only by contacting a representative at Credit Suisse Securities (USA) LLC in the U.S.

Please note that this report was originally prepared and issued by CS for distribution to their market professional and institutional investor customers. Recipients who are not market professional or institutional investor customers of CS should seek the advice of their independent financial advisor prior to taking any investment decision based on this report or for any necessary explanation of its contents. This research may relate to investments or services of a person outside of the UK or to other matters which are not regulated by the FSA or in respect of which the protections of the FSA for private customers and/or the UK compensation scheme may not be available, and further details as to where this may be the case are available upon request in respect of this report.

FORECAST REDUCTION

Earnings adjustment

- **Selected revisions:** After reviewing the current business environment and operating conditions, we made several revisions to our Fortis financial model. Those revisions included:
 - Our Q1 2009 EPS estimate declining from C\$0.61 to C\$0.59;
 - A reduced 2009 EPS estimate from C\$1.57 to C\$1.51; and,
 - Our 2010 estimate declining from C\$1.64 to C\$1.59.
- **A variety of reasons:** The adjustments were made for a number of reasons, including: a reduced outlook for the company's hotel business; and, selected weakness in a variety of power markets. Additional commentary is contained in our Q1 earnings preview "*The quarter and beyond*".

Disclosure Appendix

Important Global Disclosures

I, Andrew M. Kuske, certify that (1) the views expressed in this report accurately reflect my personal views about all of the subject companies and securities and (2) no part of my compensation was, is or will be directly or indirectly related to the specific recommendations or views expressed in this report.

See the *Companies Mentioned* section for full company names.

3-Year Price, Target Price and Rating Change History Chart for FTS.TO

The analyst(s) responsible for preparing this research report received compensation that is based upon various factors including Credit Suisse's total revenues, a portion of which are generated by Credit Suisse's investment banking activities.

Analysts' stock ratings are defined as follows***:

Outperform (O): The stock's total return is expected to exceed the industry average* by at least 10-15% (or more, depending on perceived risk) over the next 12 months.

Neutral (N): The stock's total return is expected to be in line with the industry average* (range of $\pm 10\%$) over the next 12 months.

Underperform (U):** The stock's total return is expected to underperform the industry average* by 10-15% or more over the next 12 months.

*The industry average refers to the average total return of the relevant country or regional index (except with respect to Europe, where stock ratings are relative to the analyst's industry coverage universe).

**In an effort to achieve a more balanced distribution of stock ratings, the Firm has requested that analysts maintain at least 15% of their rated coverage universe as Underperform. This guideline is subject to change depending on several factors, including general market conditions.

***For Australian and New Zealand stocks a 7.5% threshold replaces the 10% level in all three rating definitions, with a required equity return overlay applied.

Restricted (R): In certain circumstances, Credit Suisse policy and/or applicable law and regulations preclude certain types of communications, including an investment recommendation, during the course of Credit Suisse's engagement in an investment banking transaction and in certain other circumstances.

Volatility Indicator [V]: A stock is defined as volatile if the stock price has moved up or down by 20% or more in a month in at least 8 of the past 24 months or the analyst expects significant volatility going forward.

Analysts' coverage universe weightings are distinct from analysts' stock ratings and are based on the expected performance of an analyst's coverage universe* versus the relevant broad market benchmark**:

Overweight: Industry expected to outperform the relevant broad market benchmark over the next 12 months.

Market Weight: Industry expected to perform in-line with the relevant broad market benchmark over the next 12 months.

Underweight: Industry expected to underperform the relevant broad market benchmark over the next 12 months.

*An analyst's coverage universe consists of all companies covered by the analyst within the relevant sector.

**The broad market benchmark is based on the expected return of the local market index (e.g., the S&P 500 in the U.S.) over the next 12 months.

Credit Suisse's distribution of stock ratings (and banking clients) is:

Global Ratings Distribution		
Outperform/Buy*	36%	(57% banking clients)
Neutral/Hold*	44%	(57% banking clients)
Underperform/Sell*	18%	(48% banking clients)

Restricted

2%

**For purposes of the NYSE and NASD ratings distribution disclosure requirements, our stock ratings of Outperform, Neutral, and Underperform most closely correspond to Buy, Hold, and Sell, respectively; however, the meanings are not the same, as our stock ratings are determined on a relative basis. (Please refer to definitions above.) An investor's decision to buy or sell a security should be based on investment objectives, current holdings, and other individual factors.*

Credit Suisse's policy is to update research reports as it deems appropriate, based on developments with the subject company, the sector or the market that may have a material impact on the research views or opinions stated herein.

Credit Suisse's policy is only to publish investment research that is impartial, independent, clear, fair and not misleading. For more detail please refer to Credit Suisse's Policies for Managing Conflicts of Interest in connection with Investment Research: http://www.csfb.com/research-and-analytics/disclaimer/managing_conflicts_disclaimer.html

Credit Suisse does not provide any tax advice. Any statement herein regarding any US federal tax is not intended or written to be used, and cannot be used, by any taxpayer for the purposes of avoiding any penalties.

See the Companies Mentioned section for full company names.

Price Target: (12 months) for (FTS.TO)

Method: We obtain our C\$27.50 target price for Fortis Inc. by using multiple valuation methodologies, yield base analysis, and discounted cash flow. Our target price implies a P/E (price/earnings) multiple of 17.5x our 2010 EPS (earnings per share) estimate of C\$1.59 and an EV/EBITDA (enterprise value/earnings before interest, taxes, depreciation, and amortization) multiple of 10.0x our EBITDA estimate.

Risks: There are a number of risks to Fortis' achievement of our C\$27.50 target price: commodity prices; weather; environmental; regulatory; access to capital markets; and, interest rates. Moreover, one should never underestimate the power of the regulator in any regulated business.

See the Companies Mentioned section for full company names.

- **A miss:** Fortis reported Q1 2009 headline EPS (FD) of C\$0.52 and our view of a comparable EPS (FD) of C\$0.51 arising from a minor adjustments to Fortis Turks and Caicos. The adjusted EPS missed both our C\$0.59 and the Street's C\$0.573 estimates and was below the C\$0.53-C\$0.59 range. We do not place undue emphasis on quarterly results in much of our universe as a result of the inherently long-cycle nature of many assets. In our view, Fortis delivered a relatively weak financial performance from both of the Properties and Caribbean operations.
- **Significant organic growth continues:** As expected, Fortis continued to provide a rather robust outlook for its utility capital program. The company expects consolidated gross capital expenditures to be roughly C\$1bn for 2009 and C\$4.5bn over the next five years. Roughly three-quarters of that amount is expected to come from electric utilities which are largely centered on the growth of FortisAlberta, FortisBC and the Caribbean operations.
- **Wary of M&A in current market conditions:** Historically, Fortis has been very adept at acquisitions. The company's ability to successfully acquire and integrate selected assets has clearly aided corporate growth. Under the existing capital market conditions, we believe clear limitations exist for the typical Fortis strategy. Capital market conditions are demonstrating some signs of improved functioning. Yet, we do not believe the market would likely positively respond to large scale acquisition financing at this time.
- **Valuation:** After some changes to our financial model, we have reduced our 2009 and 2010 earnings estimates from C\$1.51 to C\$1.42 and from C\$1.59 to C\$1.56, respectively. We retain our C\$27.50 target price which is obtained utilizing multiple valuation methodologies, including: a 17.5x P/E multiple of 2010 earnings; a 1.53x book value multiple; and, a DCF based valuation. We reiterate our Neutral rating.

Earnings miss

Fortis reported Q1 2009 headline EPS (FD) of C\$0.52 and our view of a comparable EPS (FD) of C\$0.51 arising from a minor adjustments to Fortis Turks and Caicos. The adjusted EPS missed both our C\$0.59 and the Street's C\$0.573 estimates and was below the C\$0.53-C\$0.59 range. As usual, a substantial amount of organic utility growth continues across various Fortis assets. This research note is divided into three parts: (a) results; (b) outlook; and, (c) valuation. Each of these areas will be addressed in greater detail below.

Results

Exhibit 1 highlights the segmented unadjusted earnings contributions for the most recent quarter and for the comparable period one year ago. Our commentary for each segment appears under the various headings below.

Exhibit 1: Segmented unadjusted earnings contribution

C\$ in millions, unless otherwise stated

	Q1 2009	Q1 2008	chg y/y
Regulated Gas Utilities - Canadian	58	58	0%
Regulated Electric Utilities - Canadian	37	33	12%
Regulated Electric Utilities - Caribbean	6	7	-14%
Non-regulated - Fortis Generation	6	6	0%
Non-regulated - Fortis Properties	2	3	-33%
Corporate and other	(17)	(16)	-6%
Net earnings applicable to common shares	92	91	1%

Source: Company data and Credit Suisse

Regulated Gas Utilities - Canadian

This segment consists of Terasen Gas which was acquired on 17 May 2007. Those that have followed the Terasen assets for an extended time frame would likely generally agree with the company's assessment that "[d]ue to seasonality of the business, virtually all of the earnings of the Terasen Gas companies are generated in the first and fourth quarters". The earnings for this segment remained flat year-over-year.

Exhibit 2: Regulated gas utilities – Canadian earnings contribution (unadjusted)

C\$ in millions, unless otherwise stated

	Q1 2009	Q1 2008	chg y/y
Terasen Gas	58.0	58.0	0%

Regulated Electric Utilities – Canadian

This segment consists of operating companies such as FortisBC, FortisAlberta, Newfoundland Power and Other Canadian Electric Utilities, which includes Maritime Electric and FortisOntario. Detailed contributions for each of these divisions can be found in the table below.

Exhibit 3: Regulated electric utilities – Canadian contribution (unadjusted)

C\$ in millions, unless otherwise stated

	Q1 2009	Q1 2008	chg y/y
FortisBC	14	12	17%
FortisAlberta	12	11	9%
Newfoundland Power	6	6	0%
Other Cdn Electric Utilities	5	4	25%
Earnings	37	33	12%

Source: Company data and Credit Suisse

FortisBC

Segmented earnings at FortisBC were up roughly 17% compared to the same period last year mainly due to increased in electricity rates and customer growth. See Exhibit 4 for selected highlights.

Increased energy deliveries in BC

Exhibit 4: Selected FortisBC performance highlights (unadjusted)

	Q1 2009	Q1 2008	chg y/y
Energy deliveries (GWh)	903	875	3%
Revenue (C\$/MWh)	79.73	75.43	6%
Energy supply costs (C\$/MWh)	24.36	24.00	2%
Operating expenses (C\$/MWh)	18.83	18.29	3%
Gross margin (C\$/MWh)	36.54	33.14	10%
Earnings (C\$millions)	14	12	17%

Source: Company data and Credit Suisse

FortisAlberta

Largely the result of increase in customer distribution rates and load and customer growth, segmented earnings at FortisAlberta increased by approximately 9% compared to the same period last year. See the table below for selected highlights.

Flat energy delivery growth in Alberta

Exhibit 5: Selected FortisAlberta performance highlights (unadjusted)

	Q1 2009	Q1 2008	chg y/y
Energy deliveries (GWh)	4,152	4,138	0%
Revenue (C\$/MWh)	19.03	17.64	8%
Operating expenses (C\$/MWh)	8.19	7.97	3%
Gross margin (C\$/MWh)	10.84	9.67	12%
Earnings (C\$millions)	12	11	9%

Source: Company data and Credit Suisse

Newfoundland Power

Earnings in this segment remained flat this period compared to the same period last year. Exhibit 6 below contains selected highlights for Newfoundland Power.

Slightly increased NP energy deliveries

Exhibit 6: Selected Newfoundland Power performance highlights (unadjusted)

	Q1 2009	Q1 2008	chg y/y
Energy deliveries (GWh)	1,763	1,716	3%
Revenue (C\$/MWh)	95.86	95.57	0%
Energy supply costs (C\$/MWh)	72.04	71.10	1%
Operating expenses (C\$/MWh)	7.94	8.16	-3%
Gross margin (C\$/MWh)	15.88	16.32	-3%
Earnings (C\$millions)	6	6	0%

Source: Company data, Credit Suisse estimates

Other Canadian Electric Utilities

Segmented earnings for the quarter increased 25% compared to the same quarter last year. Earnings were higher primarily due to higher basic electricity rates and electricity sales. See the table below for selected highlights.

Other Canadian utilities showing an increase in energy deliveries

Exhibit 7: Selected Other Canadian Electric Utilities performance highlights (unadjusted)

	Q1 2009	Q1 2008	chg y/y
Energy deliveries (GWh)	616	599	3%

Regulated Electric Utilities – Caribbean

This segment includes Belize Electricity, Caribbean Utilities, and Fortis Turks and Caicos. Earnings for this segment (unadjusted) decreased by roughly 14% compared to the same quarter last year. The C\$6m Q1 2009 earnings figure contains a C\$1m one-time favourable appeal judgment at Fortis Turks and Caicos. The earnings figure also includes C\$1m favourable adjustment to energy supply costs “associated with a change in the methodology for accruing unbilled fuel factor revenue at Fortis Turks and Caicos “

The company stated that:

“In February 2009, the PUC amended the Final Decision on Belize Electricity’s 2008/2009 Rate Application (the “Amendment”), effective for the period from January 1, 2009 through June 30, 2009. The Amendment provides for an increase in the VAD component of the average electricity rate to allow Belize Electricity to earn a targeted allowed ROA of 12 per cent but reduces the reference cost of power component of the average electricity rate, due to an overall decline in the cost of power. The Amendment, therefore, allows for an overall decrease in the average electricity rate from BZ44.1 cents per kWh to BZ37.5 cents per kWh. The Amendment also provides for a lower regulated asset value upon which the allowed ROA is calculated, while increasing operating expenses by the same amount, and reduces depreciation, taxes and fees and the related revenue requirement.”

“Changes made in electricity legislation by the Government of Belize and the PUC, and the June 2008 Final Decision and Amendment, which were based on the changed legislation, have been judicially challenged by Belize Electricity in several proceedings. The judicial process is ongoing with interim rulings, judgments and appeals. The timing or likely final outcome of the proceedings is indeterminable at this time. However, the Supreme Court of Belize has approved an injunction against the Amendment until Belize Electricity’s appeal of the June 2008 Final Decision is heard in court.”

“In April 2009, Belize Electricity filed its Annual Tariff Review Application for the annual tariff period from July 1, 2009 to June 30, 2010 (“2009/2010 Rate Application”) proposing a 6 per cent decrease in the average electricity rate, as well as a reversal of the BZ\$36 million charge, described above. The PUC has not accepted the 2009/2010 Rate Application on the grounds that an Annual Tariff Review Proceeding is not in effect.”

Belize situation requires ongoing monitoring

See the table below for selected highlights.

Exhibit 8: Selected Caribbean Electric Utilities performance highlights (unadjusted)

	Q1 2009	Q1 2008	chg y/y
Energy deliveries (GWh)	247	258	-4%
Revenue (C\$/MWh)	336.03	290.70	16%
Energy supply costs (C\$/MWh)	186.23	155.04	20%
Operating expenses (C\$/MWh)	56.68	42.64	33%
Gross margin (C\$/MWh)	93.12	93.02	0%
Earnings (C\$millions)	6	7	-14%

Source: Company data and Credit Suisse

Robust energy delivery
growth in the Caribbean

Notably, as a result of the regulator's Final Decision on Belize Electricity's 2008/2009 rate application, that company

"does not meet certain debt covenant financial ratios related to loans totalling \$9 million (BZ\$14 million), as at March 31, 2009, with the International Bank for Reconstruction and Development and the Caribbean Development Bank. The Company has informed the lenders of the defaults and has requested appropriate waivers. Belize Electricity is also in default of certain debt covenants, which has resulted in the utility being prohibited from incurring new indebtedness or declaring dividends."

Non-regulated – Fortis Generation

This segment includes non-regulated generation assets located in Belize, Ontario, Central Newfoundland, British Columbia and Upper New York State. Earnings for the segment were flat from the current quarter compared to the same quarter last year. The positive impact from F/X and Belize was offset by the impact of lower production and prices in Upper New York State and Ontario. See the table below for selected highlights.

Exhibit 9: Selected non-regulated – Fortis Generation performance highlights (unadjusted)

	Q1 2009	Q1 2008	chg y/y
Energy deliveries (GWh)	257	288	-11%
Revenue (C\$/MWh)	62.26	65.97	-6%
Energy supply costs (C\$/MWh)	3.89	6.94	-44%
Operating expenses (C\$/MWh)	15.56	13.89	12%
Gross margin (C\$/MWh)	42.80	45.14	-5%
Earnings (C\$millions)	6	6	0%

Source: Company data and Credit Suisse

Non-regulated – Fortis Properties

Fortis Properties' net unadjusted earning contribution during the quarter was C\$2 million which is nearly a 33% decrease over last year's quarterly earnings. REVPAR decreased to C\$64.40 from C\$67.82 for the comparable period last year. Additionally, the occupancy rate of the Real Estate Division was slightly down at 96.0% versus last year's 96.6%.

Corporate

Corporate expenses increased to C\$17 million from C\$16 million in Q1 2008. The increase was primarily related to higher preference share dividends due to the issuance of First Preference Shares, Series G, partially offset by lower finance charges.

Outlook

We continue to believe investor, whether existing or prospective, should consider several major issues, including (a) funding organic growth; (b) rising returns; and, (c) acquisition trail. Each of these issues is addressed below.

Funding organic growth

In the most recent quarter the company's reported capital expenditures totaled C\$219 million for the three months in 2009, of which C\$207 million was for its regulated utilities. Fortis maintains that capital expenditures for 2009 will be approximately C\$1 billion, a roughly 11% increase from 2008. The bulk of this amount will be invested in the company's regulated utility segments. A majority of the total will be spent on Western Canadian assets (Terasen Gas, FortisAlberta, and FortisBC). In addition, Fortis continues to forecast a capital plan of more than C\$4.5 billion over the next five years. Given the regulated rates of return with utility capital expenditures, the increases should be viewed as longer-term positives provided an appropriate financial balance is struck. Due to the large capital investment opportunity, we continue to believe that capital market access is critical to Fortis. Given the company's recent common equity issue, we do not forecast a specific common equity funding requirement until 2010 (See note titled "*Shoring up the balance sheet*" published on 2 December 2008 for details on the equity issuance.)

Ongoing organic growth

With the significant current capital market dislocations, we believe that Fortis may become more motivated to explore possible capital efficiency initiatives. In our view, the company possesses ample opportunities to become much more capital efficient. One strategy involves divesting certain non-utility assets and redeploying capital into utility assets or funding the capital program. Another option would entail divesting partial interests in selected utility assets in an asset management model approach and receiving a management fee. Regardless of approach, we believe there are some rather simple ways for Fortis to increase existing returns.

Generally, we continue to prefer pure-play utility companies without an undue amount of non-core asset exposure. Historically, non-core assets (especially real estate) have been somewhat commonplace for many utilities. Fortis has been no exception to that approach. Notably, the mix of commercial and hospitality real estate assets held by Fortis have been positive contributors and also provide the company a bit of financial flexibility for a selection of reasons. In light of current market conditions, we believe there is a much less compelling case for the monetization of these assets than as in the past. We note Fortis Properties continues to increase in scale and scope which may eventually make it more attractive for acquisition or monetization. Yet, for a number of reasons, we continue to believe there is a rather low probability of either of those events occurring.

Opportunities for improved capital efficiency

Even discounting the potential monetization of assets that we would consider to be non-core, we believe Fortis possesses considerable potential to become much more capital efficient. Given the significant interest in infrastructure assets by many investors seeking long-dated types of return, Fortis could easily divest portions of its existing asset base to pension fund investors and charge a management fee for their operational and management expertise. This type of approach could significantly improve capital efficiency and returns on capital. In addition, this asset management approach could also free-up capital that could be used to fund the existing capital program or fund future acquisitions.

Capital efficiency initiatives could aid funding of acquisitions or the existing capital program funding

Rising returns

Across much of the Canadian regulated infrastructure sector, we believe there are some notable opportunities for greater returns. Recently, the Trans-Quebec & Maritimes Pipeline decision (see file RH-1-2008) determined that an after-tax weighted average cost of capital (ATWACC) approach would be utilized to calculate a revenue requirement (for greater details please refer to our March 19, 2009 note "*Regulatory round-up*"). The decision is clearly important for TQM, however, we believe the decision will have a broader impact. In our view, most of the infrastructure and utility asset regulators assets across the country will need to re-visit the methodologies established for allowable returns. Positively, a few of the regulators have already started various processes to canvass opinions on allowed returns. Ultimately, we view regulators moving away from a very mechanical approach that lasted for well more than a decade and shifting towards an approach that should help ensure an appropriate level of returns.

Specifically for Fortis, we believe the company's regulatory schedule is relatively well positioned to benefit from potential changes in regulatory regimes. Without delving into too much detail, we highlight selected regulatory timelines, including:

- Terasen will be filing a rate application in the summer of 2009 with the expectation for a cost-of-capital and rate decision before the end of the year;
- FortisBC will likely adopt a methodology similar to the decision for Terasen;
- A decision for FortisAlberta's Q2 2009 filing will be expected around Q3, but will be impacted by the ongoing Generic Cost of Capital Proceeding;
- Newfoundland Power will file an application later in 2009 with a potential for changed returns in 2010; and,
- In Ontario, the review process for returns is ongoing consultative process.

Based upon the TQM decision, we could see a potential increase in returns of 100-200 bps. Moreover, the standards relating to required equity levels within assets may become somewhat more liberal. Yet, we believe that purely regulated monopoly utilities providing essential services are likely to face a variety of financial threshold tests or deemed equity requirements. Frankly, from a regulatory perspective, deemed equity requirements are administratively simpler and very transparent. Therefore, we do not necessarily believe the TQM decision will be adopted in a rather explicit fashion by other regulators. The spirit and the intent of the decision to provide fair and reasonable returns in the context of the market conditions will clearly be upheld in our opinion. That type of regulatory movement may give Fortis some interesting cash flow and earnings upside into 2010 that is not currently in our forecasts.

Acquisition trail

In our view, Fortis continues to demonstrate a rather impressive ability to successfully integrate acquisitions. Additionally, we view acquisitions as somewhat central to the company's growth strategy. For instance, the company's most recent Management Discussion and Analysis stated "The Corporation continues to pursue acquisitions for profitable growth, focusing on opportunities to acquire regulated natural gas and electric utilities in Canada, the United States and the Caribbean. Fortis will also pursue growth in its non-regulated businesses in support of its regulated utility growth strategy." Given the success of Fortis in past transactions, as measured in terms of financials, share price and operationally, we believe the company's current valuation and skill set may lead to some potentially value creating acquisition activity (see Exhibit 10 below for select Fortis M&A transactions).

Exhibit 10: Selected Fortis M&A transactions

\$ in millions, unless otherwise stated

12/30/1999	2 Hydro generating stations	CAD 19.77	2 generating stations (16MW) in upper New York state (Moose River & Philadelphia)
10/28/1999	Belize Electricity Ltd.	CAD 36.80	Acquired 67% interest in the main commercial generator, transmitter & distributor of electricity in Belize.
8/31/1999	Brunswick Square Ltd.	CAD 10.12	Acquired 50% of the company by Fortis Properties.
1/31/1999	Mount Peyton	CAD 2.20	Acquired all common shares and notes payable.
	Total USD	USD 65.50	
	Total CAD	CAD 6,139.74	

Source: Bloomberg, Company data and Credit Suisse

In terms of acquisitions, we believe Fortis has a few advantages over others, including:

- Fortis has growing expertise with both electric and gas utilities;
- Larger size will allow it to look at a larger spectrum of potential target companies;
- A proven ability to effectively integrate acquisitions;
- A rather strong appetite for yield oriented securities in Canada;
- Canada's rather benign interest rate environment; and,
- Bought deal financing commonly employed in Canada.

Fortis possesses a number of absolute and relative advantages over some other competitors

Historically, Fortis has been very adept at acquisitions. The company's ability to successfully acquire and integrate selected assets has clearly aided corporate growth. Under the existing capital market conditions, we believe clear limitations exist for the typical Fortis strategy. Capital market conditions are demonstrating some signs of improved functioning. Yet, we do not believe the market would likely positively respond to large scale acquisition financing at this time.

We also continue to believe that Fortis may be able to acquire hydro electric generation assets from resources companies that are willing to divest non-core assets. Please see our notes titled "Provincial power play?" and "Potential power plant purchase" published on 16 December 2008 and 4 December 2008 respectively. (See our note titled "Expanding spreads?" published on 12 January 2009 that discusses debt issuances by infrastructure companies in Canada and the US.)

Valuation

We continue to believe that Fortis has strong organic growth in key areas such as British Columbia, Alberta and the Caribbean. In our view, the company faces a delicate balance

Maintain Neutral rating and C\$27.50 target price

of capital investment opportunities and cash flow needs. From our perspective, the next big catalysts for the stock will likely revolve around capital efficiency initiatives or a large scale acquisition which seems somewhat unlikely at this time. After some changes to our financial model, we have reduced our 2009 and 2010 earnings estimates from C\$1.51 to C\$1.42 and from C\$1.59 to C\$1.56, respectively. We retain our C\$27.50 target price which is obtained utilizing multiple valuation methodologies, including: a 17.5x P/E multiple of 2010 earnings; a 1.53x book value multiple; and, a DCF based valuation. We reiterate our Neutral rating.

3-Year Price, Target Price and Rating Change History Chart for FTS.TO

FTS.TO Date	Closing Price (CAD)	Target Price (CAD)	Initiation/ Rating Assumption
9/18/06	24.5	25.5	N
3/16/07	27.15		NC
12/4/07	27.04	32	N X
10/24/08	24.75	28	
12/3/08	25.48	27.5	

The analyst(s) responsible for preparing this research report received compensation that is based upon various factors including Credit Suisse's total revenues, a portion of which are generated by Credit Suisse's investment banking activities.

Analysts' stock ratings are defined as follows***:

Outperform (O): The stock's total return is expected to exceed the industry average* by at least 10-15% (or more, depending on perceived risk) over the next 12 months.

Neutral (N): The stock's total return is expected to be in line with the industry average* (range of $\pm 10\%$) over the next 12 months.

Underperform (U):** The stock's total return is expected to underperform the industry average* by 10-15% or more over the next 12 months.

*The industry average refers to the average total return of the relevant country or regional index (except with respect to Europe, where stock ratings are relative to the analyst's industry coverage universe).

**In an effort to achieve a more balanced distribution of stock ratings, the Firm has requested that analysts maintain at least 15% of their rated coverage universe as Underperform. This guideline is subject to change depending on several factors, including general market conditions.

***For Australian and New Zealand stocks a 7.5% threshold replaces the 10% level in all three rating definitions, with a required equity return overlay applied.

Restricted (R): In certain circumstances, Credit Suisse policy and/or applicable law and regulations preclude certain types of communications, including an investment recommendation, during the course of Credit Suisse's engagement in an investment banking transaction and in certain other circumstances.

Volatility Indicator [V]: A stock is defined as volatile if the stock price has moved up or down by 20% or more in a month in at least 8 of the past 24 months or the analyst expects significant volatility going forward.

Analysts' coverage universe weightings are distinct from analysts' stock ratings and are based on the expected performance of an analyst's coverage universe* versus the relevant broad market benchmark:**

Overweight: Industry expected to outperform the relevant broad market benchmark over the next 12 months.

Market Weight: Industry expected to perform in-line with the relevant broad market benchmark over the next 12 months.

Underweight: Industry expected to underperform the relevant broad market benchmark over the next 12 months.

**An analyst's coverage universe consists of all companies covered by the analyst within the relevant sector.*

***The broad market benchmark is based on the expected return of the local market index (e.g., the S&P 500 in the U.S.) over the next 12 months.*

Credit Suisse's distribution of stock ratings (and banking clients) is:

Global Ratings Distribution		
Outperform/Buy*	36%	(57% banking clients)
Neutral/Hold*	44%	(57% banking clients)
Underperform/Sell*	18%	(48% banking clients)
Restricted	2%	

**For purposes of the NYSE and NASD ratings distribution disclosure requirements, our stock ratings of Outperform, Neutral, and Underperform most closely correspond to Buy, Hold, and Sell, respectively; however, the meanings are not the same, as our stock ratings are determined on a relative basis. (Please refer to definitions above.) An investor's decision to buy or sell a security should be based on investment objectives, current holdings, and other individual factors.*

Credit Suisse's policy is to update research reports as it deems appropriate, based on developments with the subject company, the sector or the market that may have a material impact on the research views or opinions stated herein.

Credit Suisse's policy is only to publish investment research that is impartial, independent, clear, fair and not misleading. See the Companies Mentioned section for full company names.

Price Target: (12 months) for (FTS.TO)

Method: We obtain our C\$27.50 target price for Fortis Inc. by using multiple valuation methodologies, yield base analysis, and discounted cash flow. Our target price implies a P/E (price/earnings) multiple of 17.5x our 2010 EPS (earnings per share) estimate of C\$1.56 and an EV/EBITDA (enterprise value/earnings before interest, taxes, depreciation, and amortization) multiple of 10.0x our EBITDA estimate.

Risks: There are a number of risks to Fortis' achievement of our C\$27.50 target price: commodity prices; weather; environmental; regulatory; access to capital markets; and, interest rates. Moreover, one should never underestimate the power of the regulator in any regulated business.

See the Companies Mentioned section for full company names.

The subject company (FTS.TO) currently is, or was during the 12-month period preceding the date of distribution of this report, a client of Credit Suisse.

Credit Suisse provided investment banking services to the subject company (FTS.TO) within the past 12 months.

Credit Suisse provided non-investment banking services, which may include Sales and Trading services, to the subject company (FTS.TO) within the past 12 months.

Credit Suisse expects to receive or intends to seek investment banking related compensation from the subject company (FTS.TO) within the next 3 months.

Credit Suisse has received compensation for products and services other than investment banking services from the subject company (FTS.TO) within the past 12 months.

Important Regional Disclosures

An analyst involved in the preparation of this report has visited certain material operations of the subject company (FTS.TO) within the past 12 months. The analyst may not have visited all material operations of the subject company. The travel expenses of the analyst in connection with such visits were not paid or reimbursed by the subject company, other than de minimus local travel expenses.

Restrictions on certain Canadian securities are indicated by the following abbreviations: NVS--Non-Voting shares; RVS--Restricted Voting Shares; SVS--Subordinate Voting Shares.

Individuals receiving this report from a Canadian investment dealer that is not affiliated with Credit Suisse should be advised that this report may not contain regulatory disclosures the non-affiliated Canadian investment dealer would be required to make if this were its own report.

As of the date of this report, Credit Suisse acts as a market maker or liquidity provider in the equities securities that are the subject of this report.

Principal is not guaranteed in the case of equities because equity prices are variable.

Commission is the commission rate or the amount agreed with a customer when setting up an account or at anytime after that.

CS may have issued a Trade Alert regarding this security. Trade Alerts are short term trading opportunities identified by an analyst on the basis of market events and catalysts, while stock ratings reflect an analyst's investment recommendations based on expected total return over a 12-month period relative to the relevant coverage universe. Because Trade Alerts and stock ratings reflect different assumptions and analytical methods, Trade Alerts may differ directionally from the analyst's stock rating.

The author(s) of this report maintains a CS Model Portfolio that he/she regularly adjusts. The security or securities discussed in this report may be a component of the CS Model Portfolio and subject to such adjustments (which, given the composition of the CS Model Portfolio as a whole, may differ from the recommendation in this report, as well as opportunities or strategies identified in Trading Alerts concerning the same security). The CS Model Portfolio and important disclosures about it are available at www.credit-suisse.com/ti.

To the extent this is a report authored in whole or in part by a non-U.S. analyst and is made available in the U.S., the following are important disclosures regarding any non-U.S. analyst contributors:

Disclaimers continue on next page.

This report is not directed to, or intended for distribution to or use by, any person or entity who is a citizen or resident of or located in any locality, state, country or other jurisdiction where such distribution, publication, availability or use would be contrary to law or regulation or which would subject Credit Suisse, the Swiss bank, or its subsidiaries or its affiliates ("CS") to any registration or licensing requirement within such jurisdiction. All material presented in this report, unless specifically indicated otherwise, is under copyright to CS. None of the material, nor its content, nor any copy of it, may be altered in any way, transmitted to, copied or distributed to any other party, without the prior express written permission of CS. All trademarks, service marks and logos used in this report are trademarks or service marks or registered trademarks or service marks of CS or its affiliates.

The information, tools and material presented in this report are provided to you for information purposes only and are not to be used or considered as an offer or the solicitation of an offer to sell or to buy or subscribe for securities or other financial instruments. CS may not have taken any steps to ensure that the securities referred to in this report are suitable for any particular investor. CS will not treat recipients as its customers by virtue of their receiving the report. The investments or services contained or referred to in this report may not be suitable for you and it is recommended that you consult an independent investment advisor if you are in doubt about such investments or investment services. Nothing in this report constitutes investment, legal, accounting or tax advice or a representation that any investment or strategy is suitable or appropriate to your individual circumstances or otherwise constitutes a personal recommendation to you. CS does not offer advice on the tax consequences of investment and you are advised to contact an independent tax adviser. Please note in particular that the bases and levels of taxation may change.

CS believes the information and opinions in the Disclosure Appendix of this report are accurate and complete. Information and opinions presented in the other sections of the report were obtained or derived from sources CS believes are reliable, but CS makes no representations as to their accuracy or completeness. Additional information is available upon request. CS accepts no liability for loss arising from the use of the material presented in this report, except that this exclusion of liability does not apply to the extent that liability arises under specific statutes or regulations applicable to CS. This report is not to be relied upon in substitution for the exercise of independent judgment. CS may have issued, and may in the future issue, a trading call regarding this security. Trading calls are short term trading opportunities based on market events and catalysts, while stock ratings reflect investment recommendations based on expected total return over a 12-month period as defined in the disclosure section. Because trading calls and stock ratings reflect different assumptions and analytical methods, trading calls may differ directionally from the stock rating. In addition, CS may have issued, and may in the future issue, other reports that are inconsistent with, and reach different conclusions from, the information presented in this report. Those reports reflect the different assumptions, views and analytical methods of the analysts who prepared them and CS is under no obligation to ensure that such other reports are brought to the attention of any recipient of this report. CS is involved in many businesses that relate to companies mentioned in this report. These businesses include specialized trading, risk arbitrage, market making, and other proprietary trading.

Past performance should not be taken as an indication or guarantee of future performance, and no representation or warranty, express or implied, is made regarding future performance. Information, opinions and estimates contained in this report reflect a judgement at its original date of publication by CS and are subject to change without notice. The price, value of and income from any of the securities or financial instruments mentioned in this report can fall as well as rise. The value of securities and financial instruments is subject to exchange rate fluctuation that may have a positive or adverse effect on the price or income of such securities or financial instruments. Investors in securities such as ADR's, the values of which are influenced by currency volatility, effectively assume this risk.

Structured securities are complex instruments, typically involve a high degree of risk and are intended for sale only to sophisticated investors who are capable of understanding and assuming the risks involved. The market value of any structured security may be affected by changes in economic, financial and political factors (including, but not limited to, spot and forward interest and exchange rates), time to maturity, market conditions and volatility, and the credit quality of any issuer or reference issuer. Any investor interested in purchasing a structured product should conduct their own investigation and analysis of the product and consult with their own professional advisers as to the risks involved in making such a purchase.

Some investments discussed in this report have a high level of volatility. High volatility investments may experience sudden and large falls in their value causing losses when that investment is realised. Those losses may equal your original investment. Indeed, in the case of some investments the potential losses may exceed the amount of initial investment, in such circumstances you may be required to pay more money to support those losses. Income yields from investments may fluctuate and, in consequence, initial capital paid to make the investment may be used as part of that income yield. Some investments may not be readily realisable and it may be difficult to sell or realise those investments, similarly it may prove difficult for you to obtain reliable information about the value, or risks, to which such an investment is exposed.

Extending an empire?

- **Potential opportunity:** We believe a smaller scale opportunity may develop for the Fortis Properties business. Earlier today, the privately held Extended Stay Hotels (ESH) filed for bankruptcy protection in New York. ESH is the operator of a chain of mid-priced extended stay hotels in Canada and the US. Specifically related to Fortis, we believe the company could be interested in ESH's three Canadian hotel properties located in St. John's, Newfoundland, Ottawa, Ontario and Vaughan, Ontario. There are limited details available at this time, however, we would not regard any potential transaction for these properties as being material.
- **Hotels and hospitality:** Over the years, Fortis steadily and opportunistically has purchased several hotel properties across Canada and across several brands. Obviously, any possibilities with the three Canadian ESH properties are relatively minor in the context of a potentially complex restructuring. Yet, the small scale of the Canadian properties to the ESH restructuring may provide a compelling value proposition to Fortis and the court process.
- **Wary of M&A in current market conditions:** Historically, Fortis has been very adept at acquisitions. The company's ability to successfully acquire and integrate selected assets has clearly aided corporate growth. Clearly, capital market conditions are demonstrating signs of improved functioning. Thus, the typical Fortis acquisition strategy is much more palatable in the existing capital markets.
- **Valuation:** Our rating and C\$27.50 target price is obtained utilizing multiple valuation methodologies, including: a roughly 17.5x P/E multiple of 2010 earnings; a 1.53x book value multiple; and, a DCF based valuation. We reiterate our Neutral rating.

3-Year Price, Target Price and Rating Change History Chart for FTS.TO

The analyst(s) responsible for preparing this research report received compensation that is based upon various factors including Credit Suisse's total revenues, a portion of which are generated by Credit Suisse's investment banking activities.

Analysts' stock ratings are defined as follows:

Outperform (O): The stock's total return is expected to outperform the relevant benchmark* by at least 10-15% (or more, depending on perceived risk) over the next 12 months.

Neutral (N): The stock's total return is expected to be in line with the relevant benchmark* (range of $\pm 10-15\%$) over the next 12 months.

Underperform (U): The stock's total return is expected to underperform the relevant benchmark* by 10-15% or more over the next 12 months.

*Relevant benchmark by region: As of 29th May 2009, Australia, New Zealand, U.S. and Canadian ratings are based on (1) a stock's absolute total return potential to its current share price and (2) the relative attractiveness of a stock's total return potential within an analyst's coverage universe**, with Outperforms representing the most attractive, Neutrals the less attractive, and Underperforms the least attractive investment opportunities. Some U.S. and Canadian ratings may fall outside the absolute total return ranges defined above, depending on market conditions and industry factors. For Latin American, Japanese, and non-Japan Asia stocks, ratings are based on a stock's total return relative to the average total return of the relevant country or regional index; for European stocks, ratings are based on a stock's total return relative to the analyst's coverage universe**. For Australian and New Zealand stocks a 22% and a 12% threshold replace the 10-15% level in the Outperform and Underperform stock rating definitions, respectively, subject to analysts' perceived risk. The 22% and 12% thresholds replace the +10-15% and -10-15% levels in the Neutral stock rating definition, respectively, subject to analysts' perceived risk.

**An analyst's coverage universe consists of all companies covered by the analyst within the relevant sector.

Restricted (R): In certain circumstances, Credit Suisse policy and/or applicable law and regulations preclude certain types of communications, including an investment recommendation, during the course of Credit Suisse's engagement in an investment banking transaction and in certain other circumstances.

Volatility Indicator [V]: A stock is defined as volatile if the stock price has moved up or down by 20% or more in a month in at least 8 of the past 24 months or the analyst expects significant volatility going forward.

Analysts' coverage universe weightings are distinct from analysts' stock ratings and are based on the expected performance of an analyst's coverage universe* versus the relevant broad market benchmark**:

Overweight: Industry expected to outperform the relevant broad market benchmark over the next 12 months.

Market Weight: Industry expected to perform in-line with the relevant broad market benchmark over the next 12 months.

Underweight: Industry expected to underperform the relevant broad market benchmark over the next 12 months.

*An analyst's coverage universe consists of all companies covered by the analyst within the relevant sector.

**The broad market benchmark is based on the expected return of the local market index (e.g., the S&P 500 in the U.S.) over the next 12 months.

Credit Suisse's distribution of stock ratings (and banking clients) is:

Global Ratings Distribution		
Outperform/Buy*	36%	(58% banking clients)
Neutral/Hold*	43%	(59% banking clients)
Underperform/Sell*	20%	(47% banking clients)
Restricted	2%	

*For purposes of the NYSE and NASD ratings distribution disclosure requirements, our stock ratings of Outperform, Neutral, and Underperform most closely correspond to Buy, Hold, and Sell, respectively; however, the meanings are not the same, as our stock ratings are determined on a relative basis. (Please refer to definitions above.) An investor's decision to buy or sell a security should be based on investment objectives, current holdings, and other individual factors.

Credit Suisse's policy is to update research reports as it deems appropriate, based on developments with the subject company, the sector or the market that may have a material impact on the research views or opinions stated herein.

Credit Suisse's policy is only to publish investment research that is impartial, independent, clear, fair and not misleading. For more detail please refer to Credit Suisse's Policies for Managing Conflicts of Interest in connection with Investment Research: http://www.csfb.com/research-and-analytics/disclaimer/managing_conflicts_disclaimer.html

Credit Suisse does not provide any tax advice. Any statement herein regarding any US federal tax is not intended or written to be used, and cannot be used, by any taxpayer for the purposes of avoiding any penalties.

See the Companies Mentioned section for full company names.

Price Target: (12 months) for (FTS.TO)

Method: We obtain our C\$27.50 target price for Fortis Inc. by using multiple valuation methodologies, yield base analysis, and discounted cash flow. Our target price implies a P/E (price/earnings) multiple of 17.5x our 2010 EPS (earnings per share) estimate of C\$1.56 and an EV/EBITDA (enterprise value/earnings before interest, taxes, depreciation, and amortization) multiple of 10.0x our EBITDA estimate.

Risks: There are a number of risks to Fortis' achievement of our C\$27.50 target price: commodity prices; weather; environmental; regulatory; access to capital markets; and, interest rates. Moreover, one should never underestimate the power of the regulator in any regulated business.

Please refer to the firm's disclosure website at www.credit-suisse.com/researchdisclosures for the definitions of abbreviations typically used in the target price method and risk sections.

See the Companies Mentioned section for full company names.

The subject company (FTS.TO) currently is, or was during the 12-month period preceding the date of distribution of this report, a client of Credit Suisse.

Credit Suisse provided non-investment banking services, which may include Sales and Trading services, to the subject company (FTS.TO) within the past 12 months.

Credit Suisse expects to receive or intends to seek investment banking related compensation from the subject company (FTS.TO) within the next 3 months.

Credit Suisse has received compensation for products and services other than investment banking services from the subject company (FTS.TO) within the past 12 months.

Important Regional Disclosures

An analyst involved in the preparation of this report has visited certain material operations of the subject company (FTS.TO) within the past 12 months. The analyst may not have visited all material operations of the subject company. The travel expenses of the analyst in connection with such visits were not paid or reimbursed by the subject company, other than de minimus local travel expenses.

Restrictions on certain Canadian securities are indicated by the following abbreviations: NVS--Non-Voting shares; RVS--Restricted Voting Shares; SVS--Subordinate Voting Shares.

Individuals receiving this report from a Canadian investment dealer that is not affiliated with Credit Suisse should be advised that this report may not contain regulatory disclosures the non-affiliated Canadian investment dealer would be required to make if this were its own report.

For Credit Suisse Securities (Canada), Inc.'s policies and procedures regarding the dissemination of equity research, please visit http://www.csfb.com/legal_terms/canada_research_policy.shtml.

As of the date of this report, Credit Suisse acts as a market maker or liquidity provider in the equities securities that are the subject of this report.

Principal is not guaranteed in the case of equities because equity prices are variable.

Commission is the commission rate or the amount agreed with a customer when setting up an account or at anytime after that.

CS may have issued a Trade Alert regarding this security. Trade Alerts are short term trading opportunities identified by an analyst on the basis of market events and catalysts, while stock ratings reflect an analyst's investment recommendations based on expected total return over a 12-month period relative to the relevant coverage universe. Because Trade Alerts and stock ratings reflect different assumptions and analytical methods, Trade Alerts may differ directionally from the analyst's stock rating.

The author(s) of this report maintains a CS Model Portfolio that he/she regularly adjusts. The security or securities discussed in this report may be a component of the CS Model Portfolio and subject to such adjustments (which, given the composition of the CS Model Portfolio as a whole, may differ from the recommendation in this report, as well as opportunities or strategies identified in Trading Alerts concerning the same security). The CS Model Portfolio and important disclosures about it are available at www.credit-suisse.com/ti.

To the extent this is a report authored in whole or in part by a non-U.S. analyst and is made available in the U.S., the following are important disclosures regarding any non-U.S. analyst contributors:

The non-U.S. research analysts listed below (if any) are not registered/qualified as research analysts with FINRA. The non-U.S. research analysts listed below may not be associated persons of CSSU and therefore may not be subject to the NASD Rule 2711 and NYSE Rule 472 restrictions on communications with a subject company, public appearances and trading securities held by a research analyst account.

- Andrew M. Kuske, non-U.S. analyst, is a research analyst employed by Credit Suisse Securities (Canada), Inc..
- Paul Tan, non-U.S. analyst, is a research analyst employed by Credit Suisse Securities (Canada), Inc..

Disclaimers continue on next page.

This report is not directed to, or intended for distribution to or use by, any person or entity who is a citizen or resident of or located in any locality, state, country or other jurisdiction where such distribution, publication, availability or use would be contrary to law or regulation or which would subject Credit Suisse, the Swiss bank, or its subsidiaries or its affiliates ("CS") to any registration or licensing requirement within such jurisdiction. All material presented in this report, unless specifically indicated otherwise, is under copyright to CS. None of the material, nor its content, nor any copy of it, may be altered in any way, transmitted to, copied or distributed to any other party, without the prior express written permission of CS. All trademarks, service marks and logos used in this report are trademarks or service marks or registered trademarks or service marks of CS or its affiliates.

The information, tools and material presented in this report are provided to you for information purposes only and are not to be used or considered as an offer or the solicitation of an offer to sell or to buy or subscribe for securities or other financial instruments. CS may not have taken any steps to ensure that the securities referred to in this report are suitable for any particular investor. CS will not treat recipients as its customers by virtue of their receiving the report. The investments or services contained or referred to in this report may not be suitable for you and it is recommended that you consult an independent investment advisor if you are in doubt about such investments or investment services. Nothing in this report constitutes investment, legal, accounting or tax advice or a representation that any investment or strategy is suitable or appropriate to your individual circumstances or otherwise constitutes a personal recommendation to you. CS does not offer advice on the tax consequences of investment and you are advised to contact an independent tax adviser. Please note in particular that the bases and levels of taxation may change.

CS believes the information and opinions in the Disclosure Appendix of this report are accurate and complete. Information and opinions presented in the other sections of the report were obtained or derived from sources CS believes are reliable, but CS makes no representations as to their accuracy or completeness. Additional information is available upon request. CS accepts no liability for loss arising from the use of the material presented in this report, except that this exclusion of liability does not apply to the extent that liability arises under specific statutes or regulations applicable to CS. This report is not to be relied upon in substitution for the exercise of independent judgment. CS may have issued, and may in the future issue, a trading call regarding this security. Trading calls are short term trading opportunities based on market events and catalysts, while stock ratings reflect investment recommendations based on expected total return over a 12-month period as defined in the disclosure section. Because trading calls and stock ratings reflect different assumptions and analytical methods, trading calls may differ directionally from the stock rating. In addition, CS may have issued, and may in the future issue, other reports that are inconsistent with, and reach different conclusions from, the information presented in this report. Those reports reflect the different assumptions, views and analytical methods of the analysts who prepared them and CS is under no obligation to ensure that such other reports are brought to the attention of any recipient of this report. CS is involved in many businesses that relate to companies mentioned in this report. These businesses include specialized trading, risk arbitrage, market making, and other proprietary trading.

Past performance should not be taken as an indication or guarantee of future performance, and no representation or warranty, express or implied, is made regarding future performance. Information, opinions and estimates contained in this report reflect a judgement at its original date of publication by CS and are subject to change without notice. The price, value of and income from any of the securities or financial instruments mentioned in this report can fall as well as rise. The value of securities and financial instruments is subject to exchange rate fluctuation that may have a positive or adverse effect on the price or income of such securities or financial instruments. Investors in securities such as ADR's, the values of which are influenced by currency volatility, effectively assume this risk.

Structured securities are complex instruments, typically involve a high degree of risk and are intended for sale only to sophisticated investors who are capable of understanding and assuming the risks involved. The market value of any structured security may be affected by changes in economic, financial and political factors (including, but not limited to, spot and forward interest and exchange rates), time to maturity, market conditions and volatility, and the credit quality of any issuer or reference issuer. Any investor interested in purchasing a structured product should conduct their own investigation and analysis of the product and consult with their own professional advisers as to the risks involved in making such a purchase.

Some investments discussed in this report have a high level of volatility. High volatility investments may experience sudden and large falls in their value causing losses when that investment is realised. Those losses may equal your original investment. Indeed, in the case of some investments the potential losses may exceed the amount of initial investment, in such circumstances you may be required to pay more money to support those losses. Income yields from investments may fluctuate and, in consequence, initial capital paid to make the investment may be used as part of that income yield. Some investments may not be readily realisable and it may be difficult to sell or realise those investments, similarly it may prove difficult for you to obtain reliable information about the value, or risks, to which such an investment is exposed.

This report may provide the addresses of, or contain hyperlinks to, websites. Except to the extent to which the report refers to website material of CS, CS has not reviewed the linked site and takes no responsibility for the content contained therein. Such address or hyperlink (including addresses or hyperlinks to CS's own website material) is provided solely for your convenience and information and the content of the linked site does not in any way form part of this document. Accessing such website or following such link through this report or CS's website shall be at your own risk.

This report is issued and distributed in Europe (except Switzerland) by Credit Suisse Securities (Europe) Limited, One Cabot Square, London E14 4QJ, England, which is regulated in the United Kingdom by The Financial Services Authority ("FSA"). This report is being distributed in Germany by Credit Suisse Securities (Europe) Limited Niederlassung Frankfurt am Main regulated by the Bundesanstalt fuer Finanzdienstleistungsaufsicht ("BaFin"). This report is being distributed in the United States by Credit Suisse Securities (USA) LLC ; in Switzerland by Credit Suisse; in Canada by Credit Suisse Securities (Canada), Inc.; in Brazil by Banco de Investimentos Credit Suisse (Brasil) S.A.; in Japan by Credit Suisse Securities (Japan) Limited, Financial Instrument Firm, Director-General of Kanto Local Finance Bureau (Kinsho) No. 66, a member of Japan Securities Dealers Association, The Financial Futures Association of Japan; elsewhere in Asia/Pacific by whichever of the following is the appropriately authorised entity in the relevant jurisdiction: Credit Suisse (Hong Kong) Limited, Credit Suisse Equities (Australia) Limited, Credit Suisse Securities (Thailand) Limited, Credit Suisse Securities (Malaysia) Sdn Bhd, Credit Suisse Singapore Branch, Credit Suisse Securities (India) Private Limited, Credit Suisse Securities (Europe) Limited, Seoul Branch, Credit Suisse Taipei Branch, PT Credit Suisse Securities Indonesia, and elsewhere in the world by the relevant authorised affiliate of the above. Research on Taiwanese securities produced by Credit Suisse Taipei Branch has been prepared by a registered Senior Business Person. Research provided to residents of Malaysia is authorised by the Head of Research for Credit Suisse Securities (Malaysia) Sdn. Bhd., to whom they should direct any queries on +603 2723 2020.

In jurisdictions where CS is not already registered or licensed to trade in securities, transactions will only be effected in accordance with applicable securities legislation, which will vary from jurisdiction to jurisdiction and may require that the trade be made in accordance with applicable exemptions from registration or licensing requirements. Non-U.S. customers wishing to effect a transaction should contact a CS entity in their local jurisdiction unless governing law permits otherwise. U.S. customers wishing to effect a transaction should do so only by contacting a representative at Credit Suisse Securities (USA) LLC in the U.S.

Please note that this report was originally prepared and issued by CS for distribution to their market professional and institutional investor customers. Recipients who are not market professional or institutional investor customers of CS should seek the advice of their independent financial advisor prior to taking any investment decision based on this report or for any necessary explanation of its contents. This research may relate to investments or services of a person outside of the UK or to other matters which are not regulated by the FSA or in respect of which the protections of the FSA for private customers and/or the UK compensation scheme may not be available, and further details as to where this may be the case are available upon request in respect of this report.

Any Nielsen Media Research material contained in this report represents Nielsen Media Research's estimates and does not represent facts. NMR has neither reviewed nor approved this report and/or any of the statements made herein.

If this report is being distributed by a financial institution other than Credit Suisse, or its affiliates, that financial institution is solely responsible for distribution. Clients of that institution should contact that institution to effect a transaction in the securities mentioned in this report or require further information. This report does not constitute investment advice by Credit Suisse to the clients of the distributing financial institution, and neither Credit Suisse, its affiliates, and their respective officers, directors and employees accept any liability whatsoever for any direct or consequential loss arising from their use of this report or its content.

Ongoing Ontario growth

- **Owning Ontario:** Fortis announced wholly owned subsidiary, FortisOntario Inc. entered into an agreement with Brookfield Renewable Power Inc., a Brookfield Asset Management subsidiary, to purchase all of the issued and outstanding shares of Great Lakes Power Distribution Inc. (GLPD). Based upon past GLPD disclosures, the purchase price of roughly C\$68 million, subject to adjustments, equates to approximately the book value of the asset base excluding a rate mitigation accrual. The closing of the transaction is subject to the approval of the Ontario Energy Board and Competition Act.
- **Selected details:** GLPD serves roughly 12,000 customers in the District of Algoma in northern Ontario. The utility's assets include more than 1,800 km of distribution lines with peak loads of approximately 40MW. Notably, the deal does not include the northern Ontario-based transmission lines owned by Brookfield Infrastructure Partners. We view this transaction positively as Fortis continues to gradually grow its Canadian regulated asset base.
- **Improving capital market conditions:** Historically, Fortis has been very adept at acquisitions. The company's ability to successfully acquire and integrate selected assets has clearly aided corporate growth. Clearly, capital market conditions are demonstrating signs of improved functioning. Thus, the typical Fortis acquisition strategy is much more palatable in the existing capital markets.
- **Valuation:** Our rating and C\$27.50 target price is obtained utilizing multiple valuation methodologies, including: a roughly 17.5x P/E multiple of 2010 earnings; a 1.53x book value multiple; and, a DCF based valuation. We reiterate our Neutral rating.

The analyst(s) responsible for preparing this research report received compensation that is based upon various factors including Credit Suisse's total revenues, a portion of which are generated by Credit Suisse's investment banking activities.

Analysts' stock ratings are defined as follows:

Outperform (O): The stock's total return is expected to outperform the relevant benchmark* by at least 10-15% (or more, depending on perceived risk) over the next 12 months.

Neutral (N): The stock's total return is expected to be in line with the relevant benchmark* (range of $\pm 10-15\%$) over the next 12 months.

Underperform (U): The stock's total return is expected to underperform the relevant benchmark* by 10-15% or more over the next 12 months.

*Relevant benchmark by region: As of 29th May 2009, Australia, New Zealand, U.S. and Canadian ratings are based on (1) a stock's absolute total return potential to its current share price and (2) the relative attractiveness of a stock's total return potential within an analyst's coverage universe**, with Outperforms representing the most attractive, Neutrals the less attractive, and Underperforms the least attractive investment opportunities. Some U.S. and Canadian ratings may fall outside the absolute total return ranges defined above, depending on market conditions and industry factors. For Latin American, Japanese, and non-Japan Asia stocks, ratings are based on a stock's total return relative to the average total return of the relevant country or regional index; for European stocks, ratings are based on a stock's total return relative to the analyst's coverage universe**. For Australian and New Zealand stocks a 22% and a 12% threshold replace the 10-15% level in the Outperform and Underperform stock rating definitions, respectively, subject to analysts' perceived risk. The 22% and 12% thresholds replace the +10-15% and -10-15% levels in the Neutral stock rating definition, respectively, subject to analysts' perceived risk.

**An analyst's coverage universe consists of all companies covered by the analyst within the relevant sector.

Restricted (R): In certain circumstances, Credit Suisse policy and/or applicable law and regulations preclude certain types of communications, including an investment recommendation, during the course of Credit Suisse's engagement in an investment banking transaction and in certain other circumstances.

Volatility Indicator [V]: A stock is defined as volatile if the stock price has moved up or down by 20% or more in a month in at least 8 of the past 24 months or the analyst expects significant volatility going forward.

Analysts' coverage universe weightings are distinct from analysts' stock ratings and are based on the expected performance of an analyst's coverage universe* versus the relevant broad market benchmark:**

Overweight: Industry expected to outperform the relevant broad market benchmark over the next 12 months.

Market Weight: Industry expected to perform in-line with the relevant broad market benchmark over the next 12 months.

Underweight: Industry expected to underperform the relevant broad market benchmark over the next 12 months.

*An analyst's coverage universe consists of all companies covered by the analyst within the relevant sector.

**The broad market benchmark is based on the expected return of the local market index (e.g., the S&P 500 in the U.S.) over the next 12 months.

Credit Suisse's distribution of stock ratings (and banking clients) is:

Global Ratings Distribution		
Outperform/Buy*	36%	(58% banking clients)
Neutral/Hold*	42%	(59% banking clients)
Underperform/Sell*	20%	(47% banking clients)
Restricted	2%	

*For purposes of the NYSE and NASD ratings distribution disclosure requirements, our stock ratings of Outperform, Neutral, and Underperform most closely correspond to Buy, Hold, and Sell, respectively; however, the meanings are not the same, as our stock ratings are determined on a relative basis. (Please refer to definitions above.) An investor's decision to buy or sell a security should be based on investment objectives, current holdings, and other individual factors.

Credit Suisse's policy is to update research reports as it deems appropriate, based on developments with the subject company, the sector or the market that may have a material impact on the research views or opinions stated herein.

Credit Suisse's policy is only to publish investment research that is impartial, independent, clear, fair and not misleading. For more detail please refer to Credit Suisse's Policies for Managing Conflicts of Interest in connection with Investment Research: http://www.csfb.com/research-and-analytics/disclaimer/managing_conflicts_disclaimer.html

Credit Suisse does not provide any tax advice. Any statement herein regarding any US federal tax is not intended or written to be used, and cannot be used, by any taxpayer for the purposes of avoiding any penalties.

See the Companies Mentioned section for full company names.

Price Target: (12 months) for (BAM)

Method: We obtain our US\$18 target price for Brookfield Asset Management by the net asset value (NAV) approach. Our NAV includes roughly an implied 7.5% capitalization rate on commercial properties; a 10x cash flow multiple on hydroelectric generation assets; and, an 8x multiple on net fee income.

Risks: The US\$18 target price of Brookfield Asset Management faces a number of risks, including: underlying investment value; increasing competition; potential taxation changes; credit and counterparty risks; regulation; interest rate movements; foreign exchange; and, selected energy market dynamics.

Price Target: (12 months) for (BIP)

Method: We obtain our 12-month US\$14.00 target price for Brookfield Infrastructure Partners LP by using multiple valuation methods, including: a targeted cash-on-cash yield of 7.5%; a 10.2x multiple applied to our forecasted Adjusted Net Operating Income (ANOI) of the underlying infrastructure limited partnership; and a 50% discount to our longer-term BIP timberland net asset value (NAV) estimate because of ongoing capital market volatility, a fundamental re-pricing of risk and lackluster forest products pricing.

Risks: There are a number of risk to Brookfield Infrastructure Partners LP's achievement of our US\$14.00 target price: increasing competitive environment for infrastructure assets; BAM dependency; interest rate movements; access to capital markets; regulatory; taxation; credit and counterparty risk; commodity prices; energy market dynamics; environmental legislation; foreign exchange; infestations and disease; weather; and, labour shortage/strikes.

Price Target: (12 months) for (FTS.TO)

Method: We obtain our C\$27.50 target price for Fortis Inc. by using multiple valuation methodologies, yield base analysis, and discounted cash flow. Our target price implies a P/E (price/earnings) multiple of 17.5x our 2010 EPS (earnings per share) estimate of C\$1.56 and an EV/EBITDA (enterprise value/earnings before interest, taxes, depreciation, and amortization) multiple of 10.0x our EBITDA estimate.

Risks: There are a number of risks to Fortis' achievement of our C\$27.50 target price: commodity prices; weather; environmental; regulatory; access to capital markets; and, interest rates. Moreover, one should never underestimate the power of the regulator in any regulated business.

Please refer to the firm's disclosure website at www.credit-suisse.com/researchdisclosures for the definitions of abbreviations typically used in the target price method and risk sections.

See the Companies Mentioned section for full company names.

The subject company (BAM, BIP, FTS.TO) currently is, or was during the 12-month period preceding the date of distribution of this report, a client of Credit Suisse.

Credit Suisse provided investment banking services to the subject company (BAM, BIP, FTS.TO) within the past 12 months.

Credit Suisse provided non-investment banking services, which may include Sales and Trading services, to the subject company (BAM, FTS.TO) within the past 12 months.

Credit Suisse has received investment banking related compensation from the subject company (BAM, BIP) within the past 12 months.

Credit Suisse expects to receive or intends to seek investment banking related compensation from the subject company (BAM, BIP, FTS.TO) within the next 3 months.

Credit Suisse has received compensation for products and services other than investment banking services from the subject company (BAM, FTS.TO) within the past 12 months.

Important Regional Disclosures

An analyst involved in the preparation of this report has visited certain material operations of the subject company (BIP, FTS.TO) within the past 12 months. The analyst may not have visited all material operations of the subject company. The travel expenses of the analyst in connection with such visits were not paid or reimbursed by the subject company, other than de minimus local travel expenses.

The analyst(s) involved in the preparation of this report have not visited the material operations of the subject company (BAM) within the past 12 months.

Restrictions on certain Canadian securities are indicated by the following abbreviations: NVS--Non-Voting shares; RVS--Restricted Voting Shares; SVS--Subordinate Voting Shares.

Individuals receiving this report from a Canadian investment dealer that is not affiliated with Credit Suisse should be advised that this report may not contain regulatory disclosures the non-affiliated Canadian investment dealer would be required to make if this were its own report.

For Credit Suisse Securities (Canada), Inc.'s policies and procedures regarding the dissemination of equity research, please visit http://www.csfb.com/legal_terms/canada_research_policy.shtml.

As of the date of this report, Credit Suisse acts as a market maker or liquidity provider in the equities securities that are the subject of this report.

Principal is not guaranteed in the case of equities because equity prices are variable.

Commission is the commission rate or the amount agreed with a customer when setting up an account or at anytime after that.

CS may have issued a Trade Alert regarding this security. Trade Alerts are short term trading opportunities identified by an analyst on the basis of market events and catalysts, while stock ratings reflect an analyst's investment recommendations based on expected total return over a 12-month period relative to the relevant coverage universe. Because Trade Alerts and stock ratings reflect different assumptions and analytical methods, Trade Alerts may differ directionally from the analyst's stock rating.

The author(s) of this report maintains a CS Model Portfolio that he/she regularly adjusts. The security or securities discussed in this report may be a component of the CS Model Portfolio and subject to such adjustments (which, given the composition of the CS Model Portfolio as a whole, may differ

from the recommendation in this report, as well as opportunities or strategies identified in Trading Alerts concerning the same security). The CS Model Portfolio and important disclosures about it are available at www.credit-suisse.com/ti.

To the extent this is a report authored in whole or in part by a non-U.S. analyst and is made available in the U.S., the following are important disclosures regarding any non-U.S. analyst contributors:

The non-U.S. research analysts listed below (if any) are not registered/qualified as research analysts with FINRA. The non-U.S. research analysts listed below may not be associated persons of CSSU and therefore may not be subject to the NASD Rule 2711 and NYSE Rule 472 restrictions on communications with a subject company, public appearances and trading securities held by a research analyst account.

- Andrew M. Kuske, non-U.S. analyst, is a research analyst employed by Credit Suisse Securities (Canada), Inc..
- Paul Tan, non-U.S. analyst, is a research analyst employed by Credit Suisse Securities (Canada), Inc..

Disclaimers continue on next page.

This report is not directed to, or intended for distribution to or use by, any person or entity who is a citizen or resident of or located in any locality, state, country or other jurisdiction where such distribution, publication, availability or use would be contrary to law or regulation or which would subject Credit Suisse, the Swiss bank, or its subsidiaries or its affiliates ("CS") to any registration or licensing requirement within such jurisdiction. All material presented in this report, unless specifically indicated otherwise, is under copyright to CS. None of the material, nor its content, nor any copy of it, may be altered in any way, transmitted to, copied or distributed to any other party, without the prior express written permission of CS. All trademarks, service marks and logos used in this report are trademarks or service marks or registered trademarks or service marks of CS or its affiliates.

The information, tools and material presented in this report are provided to you for information purposes only and are not to be used or considered as an offer or the solicitation of an offer to sell or to buy or subscribe for securities or other financial instruments. CS may not have taken any steps to ensure that the securities referred to in this report are suitable for any particular investor. CS will not treat recipients as its customers by virtue of their receiving the report. The investments or services contained or referred to in this report may not be suitable for you and it is recommended that you consult an independent investment advisor if you are in doubt about such investments or investment services. Nothing in this report constitutes investment, legal, accounting or tax advice or a representation that any investment or strategy is suitable or appropriate to your individual circumstances or otherwise constitutes a personal recommendation to you. CS does not offer advice on the tax consequences of investment and you are advised to contact an independent tax adviser. Please note in particular that the bases and levels of taxation may change.

CS believes the information and opinions in the Disclosure Appendix of this report are accurate and complete. Information and opinions presented in the other sections of the report were obtained or derived from sources CS believes are reliable, but CS makes no representations as to their accuracy or completeness. Additional information is available upon request. CS accepts no liability for loss arising from the use of the material presented in this report, except that this exclusion of liability does not apply to the extent that liability arises under specific statutes or regulations applicable to CS. This report is not to be relied upon in substitution for the exercise of independent judgment. CS may have issued, and may in the future issue, a trading call regarding this security. Trading calls are short term trading opportunities based on market events and catalysts, while stock ratings reflect investment recommendations based on expected total return over a 12-month period as defined in the disclosure section. Because trading calls and stock ratings reflect different assumptions and analytical methods, trading calls may differ directionally from the stock rating. In addition, CS may have issued, and may in the future issue, other reports that are inconsistent with, and reach different conclusions from, the information presented in this report. Those reports reflect the different assumptions, views and analytical methods of the analysts who prepared them and CS is under no obligation to ensure that such other reports are brought to the attention of any recipient of this report. CS is involved in many businesses that relate to companies mentioned in this report. These businesses include specialized trading, risk arbitrage, market making, and other proprietary trading.

Past performance should not be taken as an indication or guarantee of future performance, and no representation or warranty, express or implied, is made regarding future performance. Information, opinions and estimates contained in this report reflect a judgement at its original date of publication by CS and are subject to change without notice. The price, value of and income from any of the securities or financial instruments mentioned in this report can fall as well as rise. The value of securities and financial instruments is subject to exchange rate fluctuation that may have a positive or adverse effect on the price or income of such securities or financial instruments. Investors in securities such as ADR's, the values of which are influenced by currency volatility, effectively assume this risk.

Structured securities are complex instruments, typically involve a high degree of risk and are intended for sale only to sophisticated investors who are capable of understanding and assuming the risks involved. The market value of any structured security may be affected by changes in economic, financial and political factors (including, but not limited to, spot and forward interest and exchange rates), time to maturity, market conditions and volatility, and the credit quality of any issuer or reference issuer. Any investor interested in purchasing a structured product should conduct their own investigation and analysis of the product and consult with their own professional advisers as to the risks involved in making such a purchase.

Some investments discussed in this report have a high level of volatility. High volatility investments may experience sudden and large falls in their value causing losses when that investment is realised. Those losses may equal your original investment. Indeed, in the case of some investments the potential losses may exceed the amount of initial investment, in such circumstances you may be required to pay more money to support those losses. Income yields from investments may fluctuate and, in consequence, initial capital paid to make the investment may be used as part of that income yield. Some investments may not be readily realisable and it may be difficult to sell or realise those investments, similarly it may prove difficult for you to obtain reliable information about the value, or risks, to which such an investment is exposed.

FORECAST INCREASE

Ongoing organic growth

- **Earnings beat:** Fortis reported Q2 2009 headline and comparable EPS (FD) of C\$0.31. The EPS exceeded both our C\$0.26 and the Street's C\$0.267 estimates and was above the C\$0.21-C\$0.29 range. We do not place undue emphasis on quarterly results in much of our universe as a result of the inherently long-cycle nature of many assets. In our view, Fortis delivered a relatively strong financial performance from all segments except Newfoundland Power, the Caribbean operations and corporate versus our expectations.
- **Significant organic growth continues:** As expected, Fortis continued to provide a rather robust outlook for its utility capital program. The company expects consolidated gross capital expenditures to be more than C\$1bn for 2009 (which is C\$50m more than what was disclosed at year-end 2008) and roughly C\$5bn over the next five years. Approximately 70% of that amount is expected to come from electric utilities which are largely centered on the growth of FortisAlberta, FortisBC and the Caribbean operations. Additionally, roughly 25% of the total amount is planned to be spent at the Terasen Gas entities.
- **Improving capital market conditions:** Historically, Fortis has been very adept at acquisitions. Corporate growth has benefited from the company's ability to successfully acquire and integrate selected assets. Capital market conditions are demonstrating signs of improved functioning. Therefore, the typical Fortis acquisition strategy is more palatable in current capital markets.
- **Valuation:** After the quarter we have increased our 2009 earnings estimates from C\$1.42 to C\$1.47. We retain our C\$27.50 target price which is obtained utilizing multiple valuation methodologies, including: a 17.5x P/E multiple of 2010 earnings; a 1.53x book value multiple; and, a DCF based valuation. We reiterate our Neutral rating.

Earnings beat

Fortis reported Q2 2009 headline and comparable EPS (FD) of C\$0.31. The EPS exceeded both our C\$0.26 and the Street's C\$0.267 estimates and was above the C\$0.21-C\$0.29 range. As usual, a substantial amount of organic utility growth continues across various Fortis assets. This research note is divided into three parts: (a) results; (b) outlook; and (c) valuation. Each of these areas will be addressed in greater detail below.

Results

Exhibit 1 highlights the segmented unadjusted earnings contributions for the most recent quarter and for the comparable period one year ago. Our commentary for each segment appears under the various headings below.

Exhibit 1: Segmented unadjusted earnings contribution

C\$ in millions, unless otherwise stated

	Q2 2009	Q2 2008	chg y/y
Regulated Gas Utilities - Canadian	14	12	17%
Regulated Electric Utilities - Canadian	39	26	50%
Regulated Electric Utilities - Caribbean	7	(5)	240%
Non-regulated - Fortis Generation	3	7	-57%
Non-regulated - Fortis Properties	8	7	14%
Corporate and other	(18)	(18)	0%
Net earnings applicable to common shares	53	29	83%

Source: Company data and Credit Suisse

Regulated Gas Utilities - Canadian

The earnings for this segment increased by roughly 17% year-over-year due mainly to a lower effective corporate income tax rate, lower finance charges due to lower borrowing rates and lower borrowing under the credit facilities.

Exhibit 2: Regulated gas utilities – Canadian earnings contribution (unadjusted)

C\$ in millions, unless otherwise stated

	Q2 2009	Q2 2008	chg y/y
Terasen Gas	14.0	12.0	17%

FortisBC

Segmented earnings at FortisBC were up roughly flat compared to the same period last year. See Exhibit 4 for selected highlights.

Flat energy deliveries in BC

Exhibit 4: Selected FortisBC performance highlights (unadjusted)

	Q2 2009	Q2 2008	chg y/y
Energy deliveries (GWh)	675	673	0%
Revenue (C\$/MWh)	81.48	78.75	3%
Energy supply costs (C\$/MWh)	19.26	17.83	8%
Operating expenses (C\$/MWh)	25.19	25.26	0%
Gross margin (C\$/MWh)	37.04	35.66	4%
Earnings (C\$millions)	7	7	0%

Source: Company data and Credit Suisse

FortisAlberta

Largely the result of increase in customer distribution rates and load and customer growth coupled with lower corporate income taxes, segmented earnings at FortisAlberta increased by approximately 143% compared to the same period last year. See the table below for selected highlights.

Flat energy delivery growth in Alberta

Exhibit 5: Selected FortisAlberta performance highlights (unadjusted)

	Q2 2009	Q2 2008	chg y/y
Energy deliveries (GWh)	3,765	3,768	0%
Revenue (C\$/MWh)	21.51	19.90	8%
Operating expenses (C\$/MWh)	8.23	8.49	-3%
Gross margin (C\$/MWh)	13.28	11.41	16%
Earnings (C\$millions)	17	7	143%

Source: Company data and Credit Suisse

Newfoundland Power

Earnings in this segment increased by 10% this period compared to the same period last year. The increased earning was mainly due to lower amortization costs and lower corporate income tax rate that were slightly offset by a decrease in electricity sales. Exhibit 6 below contains selected highlights for Newfoundland Power.

Slight decreased in NP energy deliveries

Exhibit 6: Selected Newfoundland Power performance highlights (unadjusted)

	Q2 2009	Q2 2008	chg y/y
Energy deliveries (GWh)	1,177	1,183	-1%
Revenue (C\$/MWh)	101.10	101.44	0%
Energy supply costs (C\$/MWh)	59.47	59.17	1%
Operating expenses (C\$/MWh)	11.05	10.99	1%
Gross margin (C\$/MWh)	30.59	31.28	-2%
Earnings (C\$millions)	11	10	10%

Source: Company data, Credit Suisse estimates

Other Canadian Electric Utilities

Segmented earnings (unadjusted) for the quarter increased 100% compared to the same quarter last year. After considering the C\$2m after-tax one-time charge at FortisOntario in Q2 2008, earnings were flat comparing Q2 2009 to Q2 2008. See the table below for selected highlights.

Other Canadian utilities showing a decrease in energy deliveries

Exhibit 7: Selected Other Canadian Electric Utilities performance highlights (unadjusted)

	Q2 2009	Q2 2008	chg y/y
Energy deliveries (GWh)	483	508	-5%
Revenue (C\$/MWh)	130.43	120.08	9%
Energy supply costs (C\$/MWh)	82.82	78.74	5%
Operating expenses (C\$/MWh)	14.49	13.78	5%
Gross margin (C\$/MWh)	33.13	27.56	20%
Earnings (C\$millions)	4	2	100%

Source: Company data and Credit Suisse

Regulated Electric Utilities – Caribbean

This segment includes Belize Electricity, Caribbean Utilities, and Fortis Turks and Caicos. Earnings for this segment (unadjusted) increased by roughly 240% compared to the same quarter last year. The -C\$5m Q2 2008 earnings figure contains a C\$13m one-time charge relating to disallowed previously incurred fuel and purchased power costs at Belize Electricity. The earnings figure in Q2 2008 also includes C\$1m favourable foreign currency translation. On an adjusted basis Q2 2009 earnings for this segment were roughly C\$2m lower than the same quarter last year.

The company stated that:

“In February 2009, the PUC amended the Final Decision on Belize Electricity’s 2008/2009 Rate Application (the “Amendment”), effective for the period from January 1, 2009 through June 30, 2009. The Amendment provides for an increase in the VAD component of the average electricity rate to allow Belize Electricity to earn a targeted allowed ROA of 12 per cent but reduces the reference COP component of the average electricity rate, due to an overall decline in the cost of power. The Amendment, therefore, allows for an overall decrease in the average electricity rate from BZ44.1 cents per kWh to BZ37.5 cents per kWh. The Amendment also provides for a lower regulated asset value upon which the allowed ROA is calculated, while increasing operating expenses by the same amount, and reduces depreciation, taxes and fees and the related revenue requirement.”

“Changes made in electricity legislation by the Government of Belize and the PUC, and the June 2008 Final Decision and Amendment, which were based on the changed legislation, have been judicially challenged by Belize Electricity in several proceedings. The judicial process is ongoing with interim rulings, judgments and appeals. The timing or likely final outcome of the proceedings is indeterminable at this time. However, the Supreme Court of Belize has approved an injunction against the Amendment until Belize Electricity’s appeal of the June 2008 Final Decision has been heard in court, which is currently scheduled for October 2009. In addition, Belize Electricity’s appeal of the Supreme Court of Belize’s previous decision to uphold certain changes made in electricity legislation by the Government of Belize and the PUC was dismissed in June 2009.”

“In April 2009, Belize Electricity filed its Annual Tariff Review Application for the annual tariff period from July 1, 2009 to June 30, 2010 (“2009/2010 Rate Application”) proposing a 6 per cent decrease in the average electricity rate, as well as a reversal of the BZ\$36 million charge described above. The PUC has not accepted the 2009/2010 Rate Application on the grounds that an Annual Tariff Review Proceeding is not in effect.”

“The Minister of Public Utilities of Belize recently issued a statutory instrument purporting to declare providers of electricity generation and water services, including BECOL, as public utility providers within the meaning of the Public Utilities Commission Act as of May 1, 2009. Fortis is currently

Belize situation requires ongoing monitoring

assessing the statutory instrument and its impact on previously negotiated and PUC-approved power purchase agreements.”

See the table below for selected highlights.

Exhibit 8: Selected Caribbean Electric Utilities performance highlights (unadjusted)

	Q2 2009	Q2 2008	chg y/y
Energy deliveries (GWh)	293	276	6%
Revenue (C\$/MWh)	279.86	282.61	-1%
Energy supply costs (C\$/MWh)	153.58	231.88	-34%
Operating expenses (C\$/MWh)	47.78	43.48	10%
Gross margin (C\$/MWh)	78.50	7.25	983%
Earnings (C\$millions)	7	(5)	240%

Source: Company data and Credit Suisse

Notably, as a result of the regulator's Final Decision on Belize Electricity's 2008/2009 rate application, that company

“does not meet certain debt covenant financial ratios related to loans totalling \$8 million (BZ\$14 million), as at June 30, 2009, with the International Bank for Reconstruction and Development and the Caribbean Development Bank. The Company has informed the lenders of the defaults and has requested appropriate waivers.”

Non-regulated – Fortis Generation

This segment includes non-regulated generation assets located in Belize, Ontario, Central Newfoundland, British Columbia and Upper New York State. Earnings for the segment were lower by 57% from the current quarter compared to the same quarter last year. The decrease was primarily related to the loss in earnings from the expiration of the power-for-water agreement related to the Rankine facility and the lower power pricing in Upper New York State and Ontario. See the table below for selected highlights.

Exhibit 9: Selected non-regulated – Fortis Generation performance highlights (unadjusted)

	Q2 2009	Q2 2008	chg y/y
Energy deliveries (GWh)	141	312	-55%
Revenue (C\$/MWh)	63.83	70.51	-9%
Energy supply costs (C\$/MWh)	-	6.41	-100%
Operating expenses (C\$/MWh)	14.18	12.82	11%
Gross margin (C\$/MWh)	49.65	51.28	-3%
Earnings (C\$millions)	3	7	-57%

Source: Company data and Credit Suisse

Non-regulated – Fortis Properties

Fortis Properties' net unadjusted earning contribution during the quarter was C\$8 million which is nearly a 14% increase over last year's quarterly earnings. REVPAR decreased to C\$83.15 from C\$87.54 for the comparable period last year. Additionally, the occupancy rate of the Real Estate Division was slightly down at 95.9% versus last year's 96.7%.

Corporate

Corporate expenses remained flat at C\$18 million in Q2 2009.

Outlook

We continue to believe investor, whether existing or prospective, should consider several major issues, including (a) funding organic growth; (b) rising returns; and, (c) acquisition trail. Each of these issues is addressed below.

Energy delivery growth in the Caribbean

Funding organic growth

In the most recent quarter the company's reported capital expenditures totaled C\$277 million for the three months in 2009, of which C\$267 million was for its regulated utilities. Fortis maintains that capital expenditures for 2009 will be more than C\$1 billion, a roughly 11% increase from 2008. The bulk of this amount will be invested in the company's regulated utility segments. A majority of the total will be spent on Western Canadian assets (Terasen Gas, FortisAlberta, and FortisBC). In addition, Fortis continues to forecast a capital plan of approximately C\$5 billion over the next five years. Given the regulated rates of return with utility capital expenditures, the increases should be viewed as longer-term positives provided an appropriate financial balance is struck. The release contained a slight, but meaningful, change in language relating to the capital program. With respect to the capital program, Fortis stated that "substantially all of which will be funded at the subsidiary level." While we did not foresee any immediate capital need nor one in the near future, we believe this statement provides greater confidence with the balance sheet and cash flow generation capabilities of the company's existing assets.

Ongoing organic growth

With the significant current relative valuation advantages, we believe that Fortis may become more motivated to explore possible capital efficiency initiatives. In our view, the company possesses ample opportunities to become much more capital efficient. One strategy involves divesting certain non-utility assets and redeploying capital into utility assets or funding the capital program. Another option would entail divesting partial interests in selected utility assets in an asset management model approach and receiving a management fee. Regardless of approach, we believe there are some rather simple ways for Fortis to increase existing returns.

Opportunities for improved capital efficiency

Generally, we continue to prefer pure-play utility companies without an undue amount of non-core asset exposure. Historically, non-core assets (especially real estate) have been somewhat commonplace for many utilities. Fortis has been no exception to that approach. Notably, the mix of commercial and hospitality real estate assets held by Fortis have been positive contributors and also provide the company a bit of financial flexibility for a selection of reasons. In light of current market conditions, we believe there is a much less compelling case for the monetization of these assets than as in the past. We note Fortis Properties continues to increase in scale and scope which may eventually make it more attractive for acquisition or monetization. Yet, for a number of reasons, we continue to believe there is a rather low probability of either of those events occurring.

Even discounting the potential monetization of assets that we would consider to be non-core, we believe Fortis possesses considerable potential to become much more capital efficient. Given the significant interest in infrastructure assets by many investors seeking long-dated types of return, Fortis could easily divest portions of its existing asset base to pension fund investors and charge a management fee for their operational and management expertise. This type of approach could significantly improve capital efficiency and returns on capital. In addition, this asset management approach could also free-up capital that could be used to fund the existing capital program or fund future acquisitions.

Capital efficiency initiatives could aid funding of acquisitions or the existing capital program funding

Rising returns

Across much of the Canadian regulated infrastructure sector, we believe there are some notable opportunities for greater returns. Recently, the Trans-Quebec & Maritimes Pipeline decision (see file RH-1-2008) determined that an after-tax weighted average cost of capital (ATWACC) approach would be utilized to calculate a revenue requirement (for greater details please refer to our March 19, 2009 note "*Regulatory round-up*"). The decision is clearly important for TQM, however, we believe the decision will have a broader impact. In our view, most of the infrastructure and utility asset regulators assets across the country will need to re-visit the methodologies established for allowable returns. Positively, a few of the regulators have already started various processes to canvass opinions on allowed returns. Ultimately, we view regulators moving away from a very mechanical approach that

lasted for well more than a decade and shifting towards an approach that should help ensure an appropriate level of returns.

Specifically for Fortis, we believe the company's regulatory schedule is relatively well positioned to benefit from potential changes in regulatory regimes. Without delving into too much detail, we highlight selected regulatory timelines, including:

- In the months of May and June, the Terasen gas utilities filed various applications with the British Columbia Utilities Commission;
- FortisBC will likely adopt a methodology similar to the decision for Terasen;
- In June FortisAlberta filed a comprehensive two-year distribution revenue requirement application for 2010 and 2011;
- In the months of May and June, Newfoundland Power filed application for a general rates and the utility's capital budget; and,
- In Ontario, the review process for returns is ongoing consultative process.

Based upon the TQM decision, we could see a potential increase in returns of 100-200 bps. Moreover, the standards relating to required equity levels within assets may become somewhat more liberal. Yet, we believe that purely regulated monopoly utilities providing essential services are likely to face a variety of financial threshold tests or deemed equity requirements. Frankly, from a regulatory perspective, deemed equity requirements are administratively simpler and very transparent. Therefore, we do not necessarily believe the TQM decision will be adopted in a rather explicit fashion by other regulators. The spirit and the intent of the decision to provide fair and reasonable returns in the context of the market conditions will clearly be upheld in our opinion. That type of regulatory movement may give Fortis some interesting cash flow and earnings upside into 2010 that is not currently in our forecasts.

Acquisition trail

In our view, Fortis continues to demonstrate a rather impressive ability to successfully integrate acquisitions. Additionally, we view acquisitions as somewhat central to the company's growth strategy. For instance, the company's most recent Management Discussion and Analysis stated "The Corporation continues to pursue acquisitions for profitable growth, focusing on opportunities to acquire regulated natural gas and electric utilities in the United States and Canada. Fortis will also pursue growth in its non-regulated businesses in support of its regulated utility growth strategy." Given the success of Fortis in past transactions, as measured in terms of financials, share price and operationally, we believe the company's current valuation and skill set may lead to some potentially value creating acquisition activity (see Exhibit 10 below for select Fortis M&A transactions).

Exhibit 10: Selected Fortis M&A transactions

\$ in millions, unless otherwise stated

	Total USD	USD 65.50	
	Total CAD	CAD 6,214.48	

Source: Bloomberg, Company data and Credit Suisse

In terms of acquisitions, we believe Fortis has a few advantages over others, including:

- Fortis has growing expertise with both electric and gas utilities;
- Larger size will allow it to look at a larger spectrum of potential target companies;
- A proven ability to effectively integrate acquisitions;
- A rather strong appetite for yield oriented securities in Canada;
- Canada's rather benign interest rate environment; and,
- Bought deal financing commonly employed in Canada.

Fortis possesses a number of absolute and relative advantages over some other competitors

Historically, Fortis has been very adept at acquisitions. Corporate growth has benefited from the company's ability to successfully acquire and integrate selected assets. Capital market conditions are demonstrating signs of improved functioning. Therefore, the typical Fortis acquisition strategy is more palatable in current capital markets.

Valuation

We continue to believe that Fortis has strong organic growth in key areas such as British Columbia, Alberta and the Caribbean. In our view, the company faces a delicate balance of capital investment opportunities and cash flow needs. From our perspective, the next big catalysts for the stock will likely revolve around capital efficiency initiatives or a large scale acquisition which seems somewhat unlikely at this time. After the quarter, we have increased our 2009 earnings estimates from C\$1.42 to C\$1.47. We retain our C\$27.50 target price which is obtained utilizing multiple valuation methodologies, including: a 17.5x P/E multiple of 2010 earnings; a 1.53x book value multiple; and, a DCF based valuation. We reiterate our Neutral rating.

Rating: Neutral

Target: C\$27.50

12/3/08	25.48	27.5	

The analyst(s) responsible for preparing this research report received compensation that is based upon various factors including Credit Suisse's total revenues, a portion of which are generated by Credit Suisse's investment banking activities.

Analysts' stock ratings are defined as follows:

Outperform (O): The stock's total return is expected to outperform the relevant benchmark* by at least 10-15% (or more, depending on perceived risk) over the next 12 months.

Neutral (N): The stock's total return is expected to be in line with the relevant benchmark* (range of $\pm 10-15\%$) over the next 12 months.

Underperform (U): The stock's total return is expected to underperform the relevant benchmark* by 10-15% or more over the next 12 months.

*Relevant benchmark by region: As of 29th May 2009, Australia, New Zealand, U.S. and Canadian ratings are based on (1) a stock's absolute total return potential to its current share price and (2) the relative attractiveness of a stock's total return potential within an analyst's coverage universe**, with Outperforms representing the most attractive, Neutrals the less attractive, and Underperforms the least attractive investment opportunities. Some U.S. and Canadian ratings may fall outside the absolute total return ranges defined above, depending on market conditions and industry factors. For Latin American, Japanese, and non-Japan Asia stocks, ratings are based on a stock's total return relative to the average total return of the relevant country or regional benchmark; for European stocks, ratings are based on a stock's total return relative to the analyst's coverage universe**. For Australian and New Zealand stocks a 22% and a 12% threshold replace the 10-15% level in the Outperform and Underperform stock rating definitions, respectively, subject to analysts' perceived risk. The 22% and 12% thresholds replace the +10-15% and -10-15% levels in the Neutral stock rating definition, respectively, subject to analysts' perceived risk.

**An analyst's coverage universe consists of all companies covered by the analyst within the relevant sector.

Restricted (R): In certain circumstances, Credit Suisse policy and/or applicable law and regulations preclude certain types of communications, including an investment recommendation, during the course of Credit Suisse's engagement in an investment banking transaction and in certain other circumstances.

Volatility Indicator [V]: A stock is defined as volatile if the stock price has moved up or down by 20% or more in a month in at least 8 of the past 24 months or the analyst expects significant volatility going forward.

Analysts' coverage universe weightings are distinct from analysts' stock ratings and are based on the expected performance of an analyst's coverage universe* versus the relevant broad market benchmark**:

Overweight: Industry expected to outperform the relevant broad market benchmark over the next 12 months.

Market Weight: Industry expected to perform in-line with the relevant broad market benchmark over the next 12 months.

Underweight: Industry expected to underperform the relevant broad market benchmark over the next 12 months.

*An analyst's coverage universe consists of all companies covered by the analyst within the relevant sector.

**The broad market benchmark is based on the expected return of the local market index (e.g., the S&P 500 in the U.S.) over the next 12 months.

Credit Suisse's distribution of stock ratings (and banking clients) is:

Global Ratings Distribution		
Outperform/Buy*	37%	(57% banking clients)
Neutral/Hold*	43%	(58% banking clients)
Underperform/Sell*	19%	(49% banking clients)
Restricted	2%	

*For purposes of the NYSE and NASD ratings distribution disclosure requirements, our stock ratings of Outperform, Neutral, and Underperform most closely correspond to Buy, Hold, and Sell, respectively; however, the meanings are not the same, as our stock ratings are determined on a relative basis. (Please refer to definitions above.) An investor's decision to buy or sell a security should be based on investment objectives, current holdings, and other individual factors.

Price Target: (12 months) for (FTS.TO)

Method: We obtain our C\$27.50 target price for Fortis Inc. by using multiple valuation methodologies, yield base analysis, and discounted cash flow. Our target price implies a P/E (price/earnings) multiple of 17.5x our 2010 EPS (earnings per share) estimate of C\$1.56 and an EV/EBITDA (enterprise value/earnings before interest, taxes, depreciation, and amortization) multiple of 10.0x our EBITDA estimate.

Risks: There are a number of risks to Fortis' achievement of our C\$27.50 target price: commodity prices; weather; environmental; regulatory; access to capital markets; and, interest rates. Moreover, one should never underestimate the power of the regulator in any regulated business.

Please refer to the firm's disclosure website at www.credit-suisse.com/researchdisclosures for the definitions of abbreviations typically used in the target price method and risk sections.

See the Companies Mentioned section for full company names.

The subject company (FTS.TO) currently is, or was during the 12-month period preceding the date of distribution of this report, a client of Credit Suisse.

Credit Suisse provided investment banking services to the subject company (FTS.TO) within the past 12 months.

Credit Suisse provided non-investment banking services, which may include Sales and Trading services, to the subject company (FTS.TO) within the past 12 months.

Credit Suisse expects to receive or intends to seek investment banking related compensation from the subject company (FTS.TO) within the next 3 months.

Credit Suisse has received compensation for products and services other than investment banking services from the subject company (FTS.TO) within the past 12 months.

CS may not have taken any steps to ensure that the securities referred to in this report are suitable for any particular investor. CS will not treat recipients as its customers by virtue of their receiving the report. The investments or services contained or referred to in this report may not be suitable for you and it is recommended that you consult an independent investment advisor if you are in doubt about such investments or investment services. Nothing in this report constitutes investment, legal, accounting or tax advice or a representation that any investment or strategy is suitable or appropriate to your individual circumstances or otherwise constitutes a personal recommendation to you. CS does not offer advice on the tax consequences of investment and you are advised to contact an independent tax adviser. Please note in particular that the bases and levels of taxation may change.

CS believes the information and opinions in the Disclosure Appendix of this report are accurate and complete. Information and opinions presented in the other sections of the report were obtained or derived from sources CS believes are reliable, but CS makes no representations as to their accuracy or completeness. Additional information is available upon request. CS accepts no liability for loss arising from the use of the material presented in this report, except that this exclusion of liability does not apply to the extent that liability arises under specific statutes or regulations applicable to CS. This report is not to be relied upon in substitution for the exercise of independent judgment. CS may have issued, and may in the future issue, a trading call regarding this security. Trading calls are short term trading opportunities based on market events and catalysts, while stock ratings reflect investment recommendations based on expected total return over a 12-month period as defined in the disclosure section. Because trading calls and stock ratings reflect different assumptions and analytical methods, trading calls may differ directionally from the stock rating. In addition, CS may have issued, and may in the future issue, other reports that are inconsistent with, and reach different conclusions from, the information presented in this report. Those reports reflect the different assumptions, views and analytical methods of the analysts who prepared them and CS is under no obligation to ensure that such other reports are brought to the attention of any recipient of this report. CS is involved in many businesses that relate to companies mentioned in this report. These businesses include specialized trading, risk arbitrage, market making, and other proprietary trading.

Past performance should not be taken as an indication or guarantee of future performance, and no representation or warranty, express or implied, is made regarding future performance. Information, opinions and estimates contained in this report reflect a judgement at its original date of publication by CS and are subject to change without notice. The price, value of and income from any of the securities or financial instruments mentioned in this report can fall as well as rise. The value of securities and financial instruments is subject to exchange rate fluctuation that may have a positive or adverse effect on the price or income of such securities or financial instruments. Investors in securities such as ADR's, the values of which are influenced by currency volatility, effectively assume this risk.

Structured securities are complex instruments, typically involve a high degree of risk and are intended for sale only to sophisticated investors who are capable of understanding and assuming the risks involved. The market value of any structured security may be affected by changes in economic, financial and political factors (including, but not limited to, spot and forward interest and exchange rates), time to maturity, market conditions and volatility, and the credit quality of any issuer or reference issuer. Any investor interested in purchasing a structured product should conduct their own investigation and analysis of the product and consult with their own professional advisers as to the risks involved in making such a purchase.

Some investments discussed in this report have a high level of volatility. High volatility investments may experience sudden and large falls in their value causing losses when that investment is realised. Those losses may equal your original investment. Indeed, in the case of some investments the potential losses may exceed the amount of initial investment, in such circumstances you may be required to pay more money to support those losses. Income yields from investments may fluctuate and, in consequence, initial capital paid to make the investment may be used as part of that income yield. Some investments may not be readily realisable and it may be difficult to sell or realise those investments, similarly it may prove difficult for you to obtain reliable information about the value, or risks, to which such an investment is exposed.

COMMENT

Pondering a potential Portland purchase?

- **Portland purchase?:** We believe the conditions for another potential Fortis utility acquisition are coming into place. Recently, Portland General Electric Company (POR.N) announced a substantial guidance revision for 2009 from US\$1.80 to US\$1.90 to US\$1.35 to US\$1.45 per diluted share. As expected, the revision resulted in the shares falling by 6.5% on July 22nd. In our view, Portland's earnings revision may provide an interesting opportunity for Fortis to finally make a notable move into the US utility market. We do not believe a transaction is imminent, however, many of the conditions are in place for the acquisitive Canadian utility to make a bold move.
- **Accretive acquisition:** Based upon our financial analysis, we believe Portland General would make an interesting acquisition for Fortis on an earnings accretive basis. Similar to a number of past Fortis deals, the company would need to issue a substantial amount of equity or, more likely, subscription receipts on a bought deal basis. Strategically, we consider Portland as an interesting, albeit not perfect, fit for Fortis. Finally, in our view, it is only a matter of time before Fortis becomes active with US-based M&A.
- **Improving capital market conditions:** Historically, Fortis has been very adept at acquisitions. Corporate growth has benefited from the company's ability to successfully acquire and integrate selected assets. Capital market conditions are demonstrating signs of improved functioning. Therefore, the typical Fortis acquisition strategy is more palatable in current capital markets.
- **Valuation:** Our rating and C\$27.50 target price is obtained utilizing multiple valuation methodologies, including: a roughly 17.5x P/E multiple of 2010 earnings; a 1.53x book value multiple; and, a DCF based valuation. We reiterate our Neutral rating.

DISCLOSURE APPENDIX CONTAINS IMPORTANT DISCLOSURES, ANALYST CERTIFICATIONS, INFORMATION ON TRADE ALERTS, ANALYST MODEL PORTFOLIOS AND THE STATUS OF NON-U.S. ANALYSTS. U.S. Disclosure: Credit Suisse does and seeks to do business with companies covered in its research reports. As a result, investors should be aware that the Firm may have a conflict of interest that could affect the objectivity of this report. Investors should consider this report as only a single factor in making their investment decision.

After the recent substantial negative earnings guidance revision by Portland General, we believe the conditions for another potential Fortis utility acquisition are coming into place. In our view, Portland's earnings revision may provide an interesting opportunity for Fortis to finally make a notable move into the US utility market. We do not believe a transaction is imminent, however, many of the conditions are in place for the acquisitive Canadian utility to make a bold move. Strategically, we consider Portland as an interesting, albeit not perfect, fit for Fortis. Finally, in our view, it is only a matter of time before Fortis becomes active with US-based M&A.

This research note is divided into three parts: (a) Possibly Portland?; (b) Outlook; and, (c) Valuation.

Possibly Portland?

Historically, Fortis has been very adept at acquisitions. As examples, the Canadian-based Aquila asset acquisition in 2003 and the Terasen Gas deal in 2007 highlight some of the company's bold moves. Barring any dramatic restructuring by government-owned utilities, we believe the Canadian utility market is largely lacking for substantial acquisition focused growth opportunities. As a result, we continue to believe Fortis has steadily shifted focus on the US market. Clearly, potential acquisition opportunities are much more abundant in the US than in Canada. Yet, the Fortis acquisition strategy can benefit from several factors, including: (a) a stronger Canadian dollar; (b) favourable financing markets for both debt and equity; (c) an index uplift; (d) improved rates of return in the US versus those allowed in Canada; and, (e) at times, a substantial valuation advantage.

Synergies are not typically a large component of utility M&A, however, there is a strategic logic to have a certain degree of proximity among assets. Therefore, our Fortis US-based M&A focus traditionally centered on two regions: (a) the Pacific Northwest; and, (b) the US Northeast. Additional traits that we look for in potential acquisitions include:

- Predominately regulated electric or gas distribution utility assets;
- Other than hydroelectric generation, somewhat limited exposure to generation assets, especially the direct ownership of fossil fuel assets;
- Above average utility growth often caused by previous under investment;
- Acquisitions that are either friendly or conducted via an auction process; and,
- A relatively favourable regulatory environment.

From our perspective, Portland matches some, but not all, of the above criteria. In our view, a potentially compelling financial case exists for Fortis to contemplate the acquisition of Portland General Electric. This portion of our research note highlights three areas:

- (1) A brief Portland background;
- (2) A collection of utility assets; and,
- (3) Preliminary financial analysis.

A brief Portland background

As a starting point, Portland General Electric is a NYSE-listed vertically integrated electric utility headquartered in Portland, Oregon. Several years ago, after a rather brief period of ownership by Enron, the utility re-entered the capital markets by way of an initial public offering. In our view, an interesting part of the Portland General Electric investment at the time of the IPO was the steady growth in regulated utility capital. As described below, such growth continues and would clearly be attractive from a Fortis perspective.

Recently, Portland General Electric announced a substantial negative revision to previous 2009 earnings guidance from US\$1.80 to US\$1.90 to US\$1.35 to US\$1.45 per diluted

A history of acquisitions

Fewer opportunities in Canada than the US market

PGE lowered 2009 guidance

share. From the Portland General Electric press release, we understand some of the key items for the guidance reduction to include:

- Margin compression from “the impacts on retail load from the economic recession, primarily in the industrial sector”;
- “Power originally intended to meet forecasted load was sold into a declining electricity market”;
- The extension of an already planned maintenance outage at the Colstrip coal plant;
- Extended maintenance at the Boardman coal plant;
- Weaker than expected hydroelectric results; and,
- As a result of weaker net income, a mandated increase customer refunds.

Multiple reasons for PORs
guidance revision

In the guidance revision press release, Portland General Electric stated,

“Oregon's economy continues to be impacted by the national recession. Retail loads are down, primarily because our industrial customers' electricity use has declined by more than we projected just three months ago. In addition, lower prices in the wholesale energy market have made it difficult to offset lost revenue with the sale of excess power. These issues, combined with an extended outage at the Colstrip plant, have led us to reduce our full-year earnings guidance”.

The guidance revision caused the stock to close at US\$18.56 on the day of announcement from the open of US\$19.86, a roughly 6.5% drop. In the context of the current economic and market downturn, we do not believe the market should be substantially surprised by a significant negative guidance revision. Yet, such revisions often cast a rather negative light upon existing management teams and can lead to groups of disenchanted shareholders. At this time, the stock continues to trade fairly range bound and closed at US\$18.50 on 5 August 2009. Given these factors, we believe the negative guidance revision provides the potential for a compelling M&A opportunity.

Potential for longer-term
disenchantment with the
stock post revision

A collection of utility assets

Portland General Electric's utility assets have some notable attributes, including:

- The company is a vertically integrated electric utility in the State of Oregon;
- Roughly 815,000 retail customers are served with an average annual customer growth of 1.5% and an average load growth of 1.4% since the end of 2003;
- A combination of generation assets across fuel types and purchased power contracts with a total nameplate capacity of 4,455 MW;
- Ownership of roughly 1,643 miles of transmission lines and 24,000 miles of distribution lines;
- A regulatory environment offering a 10% allowed return on equity on a deemed equity base of 50% with 50% debt in the capital structure;
- As per a May 2009 presentation, net utility plant of roughly US\$2.8 billion; and,
- Approximately US\$1.1bn of already identified regulated utility capital investments from 2009-2013 to drive rate base growth.

Our starting point for considering a potential Portland purchase is the utility's asset values. The figures in Exhibit 1 were obtained and replicated from a recent Portland General Electric presentation.

Exhibit 1: Asset value
in millions, unless otherwise stated

Source: Company data and Credit Suisse

Obviously, the critical issue for any regulated utility investment is the regulatory regime. In light of our preliminary analysis on a potential transaction, we do not see it as necessary to engage in a robust discussion of Portland General Electric's regulatory environment. To provide some background for the regulatory environment, we highlight selected attributes of the regulatory framework addressed in a recent corporate presentation, including:

- Portland General Electric operates with a regulated deemed capital structure of 50% equity and 50% debt;
- There utility has an allowed 10% return on equity;
- Various cost adjustment mechanisms exist for power expenses;
- The framework intends to allow the recovery of fixed revenue requirements as a result of lower sales resulting from energy efficiency and conservation efforts; and,
- By 2025, Portland will be required to serve 25% of retail load from renewable sources.

Given the history of utility ownership and various acquisitions and attempted acquisitions in the State of Oregon, we believe any potential transaction would need to demonstrate a clear net benefit, comply with existing legislation and be politically palatable. Moreover, in our view, any such transaction must be friendly in nature. From our perspective, each of these objectives could be achieved by Fortis, however, there are clearly other states and regulatory environments that lack the unique history of Oregon's utility sector.

From a Fortis perspective, we consider selected attributes of Oregon's utility regulation to be attractive. Despite the potential attraction to facets of the regulatory environment, parts of Portland General Electric's asset base do not entirely fit with a typical Fortis acquisition strategy. Namely, the company's generation portfolio and exposure to fossil fuels is not all that attractive for a typical Fortis deal. At the end of 2008, Exhibit 2 highlights generation capacity owned or under contract to Portland General Electric over several fuel types and Exhibit 3 illustrates the source as a percentage of retail load. From our perspective, the abundance of coal, natural gas and oil fired generation capacity is not a perfect fit for Fortis. Thus, if a transaction were to occur, then some potential may exist for selected divestitures.

Historical issues in Oregon may make other jurisdictions more attractive for acquisitions

Some of POR's generation exposure is not a good fit for Fortis

Exhibit 2: Generation capacity (end of 2008)

	Physical Capacity (MW)	% of Total Capacity

Exhibit 3: 2008 power sources as a % of retail load

Source: Company data and Credit Suisse

Similar to other Fortis markets, Portland General Electric believes “long-term retail load is expected to grow consistently while selected long-term power purchase contracts expire, driving the need for additional generation capacity”. That growth potential combined with renewable portfolio standards may translate into an even more compelling investment than the simple near-term pro-forma financial statements reveal.

Similar to the large organic growth embedded within a number of the wholly-owned Fortis utilities, Portland General Electric has significant near-term rate base growth. Exhibit 4 illustrates Portland’s historical and forecast capital expenditures. As one would expect for regulated assets, capital expenditures have a strong (if not virtually perfect) relationship to the growth in average rate base (see Exhibit 5). As per a recent Portland General Electric presentation, the company expects to fund new capital investments “through cash from operations and issuances of debt and equity with a targeted capital structure of 50/50”. We view this approach very similar to methods typically used by Fortis.

Considerable potential rate base growth

Exhibit 4: PGE capital expenditure

US\$ in millions, unless otherwise stated

Source: Company data and Credit Suisse

Exhibit 5: PGE average rate base

US\$ in millions, unless otherwise stated

Source: Company data and Credit Suisse

One example of Portland's organic growth is the Biglow Canyon Wind Farm in Columbia Gorge (eastern Oregon). The three phase project will have a total installed capacity of 450MW and will cost roughly US\$1.0 billion (see Exhibit 6). According to company data, the completion of this wind project will bring its "load served by renewables" to roughly 11%. Renewable power other than hydroelectric investment has not been an area of focus for Fortis. Subject to regulatory regime, the allocation of capital to renewable power can be very favourable.

Renewable power potential

Preliminary financials analysis

At present, Portland General Electric's market value is roughly US\$1.4 billion and the company has US\$1.4 billion in debt for a total enterprise value of roughly US\$2.8 billion. Based upon consensus figures and publicly available information, we note the following:

- Based on 5 August 2009 close of US\$18.50 per share, forward P/E ratio based on Bloomberg estimates are 13.3x and 10.3x for 2009 and 2010 respectively; and,
- On an EV/EBITDA basis, using consensus forecast for 2009 and 2010 results in 6.0x and 5.4x multiple.

Based upon our earnings forecasts, Fortis is trading at a 17.4x and 16.4x P/E multiple for 2009 and 2010, respectively. In terms of EV/EBITDA, Fortis is trading at 9.8x and 9.4x, respectively, on our 2009 and 2010 estimates. Given these trading multiples, a Fortis led acquisition should be accretive in many scenarios. Some of our baseline assumptions for the hypothetical Fortis acquisition of Portland General Electric, include:

Multiple accretive

- Fortis pays a 25% premium to the current trading price equating to US\$23.13 for each Portland General Electric share;
- Via the bought deal market, Fortis is able to issue 78m subscription receipts or shares at price of C\$24.10 a share for a 6% discount to market;
- The total gross proceeds from the equity financing would be roughly C\$1.87bn; and,
- Fortis could close the deal by the end of 2009 which may be viewed aggressively.

Large equity issuance required

In Exhibit 7 and Exhibit 8, we provide financial statements for a potential Fortis-Portland transaction. Notably, the Portland General Electric statements are based, in part, upon Bloomberg consensus estimates and have been converted into Canadian dollars. Roughly calculated, Portland's regulated earnings streams correspond to the adapted Bloomberg estimates. Pro-forma financials reflect the simple combination of the companies with an entirely equity financed deal.

Exhibit 7: Hypothetical 2010e combined earnings

C\$ in millions, unless otherwise stated

	FTS	POR	Pro Forma
2010e Income Statement			
Sales	\$3,573	\$2,002	\$5,575
EBITDA	\$1,139	\$569	\$1,718
EBITDA margin	31.9%	28.4%	30.8%
Depreciation	<u>\$344</u>	<u>\$257</u>	<u>\$601</u>
EBIT	\$795	\$312	\$1,117
Interest	\$391	\$127	\$520
Other	\$5	\$0	\$5
EBT	\$399	\$185	\$592
Taxes	\$115	\$50	\$167
Minority interest	<u>\$14</u>	<u>\$0</u>	<u>\$14</u>
Net income	\$270	\$136	\$411
Fully-diluted EPS	\$1.56	\$1.80	\$1.63

Source: Bloomberg, Company data and Credit Suisse estimates

Under a variety of our assumptions, an almost entirely equity financed transaction could be roughly 4% earnings accretive on a per share basis for Fortis in the first full year post closing. We do not believe a FTS-POR deal is imminent, however, we believe some aspects of a transaction could be quite compelling. At these current levels, a potential transaction may also be viewed as rather opportunistic from a Fortis perspective. Given the history of PGE, we believe there clearly would be considerable regulatory resistance and scrutiny with any kind of transaction. Finally, in our view, almost any successful M&A transaction in the utilities sector should be friendly and have both regulatory and local political support.

Outlook

We continue to believe investor, whether existing or prospective, should consider several major issues, including (a) funding organic growth; (b) rising returns; and, (c) acquisition trail. Each of these issues is addressed below.

Funding organic growth

In the most recent quarter the company's reported capital expenditures totaled C\$277 million for the three months in 2009, of which C\$267 million was for its regulated utilities. Fortis maintains that capital expenditures for 2009 will be more than C\$1 billion, a roughly 11% increase from 2008. The bulk of this amount will be invested in the company's regulated utility segments. A majority of the total will be spent on Western Canadian assets (Terasen Gas, FortisAlberta, and FortisBC). In addition, Fortis continues to forecast a capital plan of approximately C\$5 billion over the next five years. Given the regulated rates of return with utility capital expenditures, the increases should be viewed as longer-term positives provided an appropriate financial balance is struck. The release contained a slight, but meaningful, change in language relating to the capital program. With respect to the capital program, Fortis stated that "substantially all of which will be funded at the subsidiary level." While we did not foresee any immediate capital need nor one in the near future, we believe this statement provides greater confidence with the balance sheet and cash flow generation capabilities of the company's existing assets.

With the significant current relative valuation advantages, we believe that Fortis may become more motivated to explore possible capital efficiency initiatives. In our view, the company possesses ample opportunities to become much more capital efficient. One strategy involves divesting certain non-utility assets and redeploying capital into utility assets or funding the capital program. Another option would entail divesting partial interests in selected utility assets in an asset management model approach and receiving

Exhibit 8: Hypothetical combined balance sheet

Source: Company data and Credit Suisse estimates

An entirely equity financed deal translates into roughly 4% earnings accretion

Ongoing organic growth

a management fee. Regardless of approach, we believe there are some rather simple ways for Fortis to increase existing returns.

Generally, we continue to prefer pure-play utility companies without an undue amount of non-core asset exposure. Historically, non-core assets (especially real estate) have been somewhat commonplace for many utilities. Fortis has been no exception to that approach. Notably, the mix of commercial and hospitality real estate assets held by Fortis have been positive contributors and also provide the company a bit of financial flexibility for a selection of reasons. In light of current market conditions, we believe there is a much less compelling case for the monetization of these assets than as in the past. We note Fortis Properties continues to increase in scale and scope which may eventually make it more attractive for acquisition or monetization. Yet, for a number of reasons, we continue to believe there is a rather low probability of either of those events occurring.

Opportunities for improved capital efficiency

Even discounting the potential monetization of assets that we would consider to be non-core, we believe Fortis possesses considerable potential to become much more capital efficient. Given the significant interest in infrastructure assets by many investors seeking long-dated types of return, Fortis could easily divest portions of its existing asset base to pension fund investors and charge a management fee for their operational and management expertise. This type of approach could significantly improve capital efficiency and returns on capital. In addition, this asset management approach could also free-up capital that could be used to fund the existing capital program or fund future acquisitions.

Capital efficiency initiatives could aid funding of acquisitions or the existing capital program funding

Rising returns

Across much of the Canadian regulated infrastructure sector, we believe there are some notable opportunities for greater returns. Recently, the Trans-Quebec & Maritimes Pipeline decision (see file RH-1-2008) determined that an after-tax weighted average cost of capital (ATWACC) approach would be utilized to calculate a revenue requirement (for greater details please refer to our March 19, 2009 note "*Regulatory round-up*"). The decision is clearly important for TQM, however, we believe the decision will have a broader impact. In our view, most of the infrastructure and utility asset regulators assets across the country will need to re-visit the methodologies established for allowable returns. Positively, a few of the regulators have already started various processes to canvass opinions on allowed returns. Ultimately, we view regulators moving away from a very mechanical approach that lasted for well more than a decade and shifting towards an approach that should help ensure an appropriate level of returns.

Specifically for Fortis, we believe the company's regulatory schedule is relatively well positioned to benefit from potential changes in regulatory regimes. Without delving into too much detail, we highlight selected regulatory timelines, including:

- In the months of May and June, the Terasen gas utilities filed various applications with the British Columbia Utilities Commission;
- FortisBC will likely adopt a methodology similar to the decision for Terasen;
- In June FortisAlberta filed a comprehensive two-year distribution revenue requirement application for 2010 and 2011;
- In the months of May and June, Newfoundland Power filed application for a general rates and the utility's capital budget; and,
- In Ontario, the review process for returns is ongoing consultative process.

Based upon the TQM decision, we could see a potential increase in returns of 100-200 bps. Moreover, the standards relating to required equity levels within assets may become somewhat more liberal. Yet, we believe that purely regulated monopoly utilities providing essential services are likely to face a variety of financial threshold tests or deemed equity requirements. Frankly, from a regulatory perspective, deemed equity requirements are administratively simpler and very transparent. Therefore, we do not necessarily believe the

TQM decision will be adopted in a rather explicit fashion by other regulators. The spirit and the intent of the decision to provide fair and reasonable returns in the context of the market conditions will clearly be upheld in our opinion. That type of regulatory movement may give Fortis some interesting cash flow and earnings upside into 2010 that is not currently in our forecasts.

Acquisition trail

In our view, Fortis continues to demonstrate a rather impressive ability to successfully integrate acquisitions. Additionally, we view acquisitions as somewhat central to the company's growth strategy. For instance, the company's most recent Management Discussion and Analysis stated "The Corporation continues to pursue acquisitions for profitable growth, focusing on opportunities to acquire regulated natural gas and electric utilities in the United States and Canada. Fortis will also pursue growth in its non-regulated businesses in support of its regulated utility growth strategy." Given the success of Fortis in past transactions, as measured in terms of financials, share price and operationally, we believe the company's current valuation and skill set may lead to some potentially value creating acquisition activity (see Exhibit 9 below for select Fortis M&A transactions).

Exhibit 9: Selected Fortis M&A transactions

\$ in millions, unless otherwise stated

Announced Date	Asset/Company	Deal value (\$m)	Comment
7/22/2009	Caribbean Utilities Co.	CAD 6.74	Acquired an additional 2.7% of Caribbean Utilities Co.

4/16/2002	Kings Place	CAD 27.70	Commercial property in Fredericton, NB.
3/13/2002	Caribbean Utilities Co.	CAD 12.90	Acquired additional ~2% of the company.
3/20/2002	Niagara Power Co.	CAD 49.00	Purchase remaining 50% of Niagara Power Co.
2/1/2002	Cabot palace I	CAD 14.30	133,327 Square feet premium office tower in St. John's, Newfoundland
9/18/2001	Portfolio of properties in St. John's	CAD 8.30	Purchased TD Place commercial bldg and 6 parcels of land.
9/14/2001	Aliant Poles	CAD 46.00	Purchased 102,000 poles and related infrastructure from Aliant Telecom.
1/26/2001	Belize Electric Company Ltd.	USD 62.00	Acquired 95% of company from Duke Energy.
12/19/2000	2 Hydro generating stations	CAD 6.90	2 generating stations (6.88MW) in upper New York state.
12/14/2000	Brunswick Square Ltd.	CAD 6.20	Acquired 50% of the company Fortis doesn't own.
12/1/2000	Fort William Building and Blue cross centre	CAD 52.70	Fort William building in St. John's, Newfoundland and Blue cross centre in Moncton, New Brunswick.
2/23/2000	Caribbean Utilities Co.	CAD 79.90	Acquired 20% of the company.
12/30/1999	2 Hydro generating stations	CAD 19.77	2 generating stations (16MW) in upper New York state (Moose River & Philadelphia)
10/28/1999	Belize Electricity Ltd.	CAD 36.80	Acquired 67% interest in the main commercial generator, transmitter & distributor of electricity in Belize.
8/31/1999	Brunswick Square Ltd.	CAD 10.12	Acquired 50% of the company by Fortis Properties.
1/31/1999	Mount Peyton	CAD 2.20	Acquired all common shares and notes payable.
	Total USD	USD 65.50	
	Total CAD	CAD 6,214.48	

Source: Bloomberg, Company data and Credit Suisse

In terms of acquisitions, we believe Fortis has a few advantages over others, including:

- Fortis has growing expertise with both electric and gas utilities;
- Larger size will allow it to look at a larger spectrum of potential target companies;
- A proven ability to effectively integrate acquisitions;
- A rather strong appetite for yield oriented securities in Canada;
- Canada's rather benign interest rate environment; and,

Fortis possesses a number of absolute and relative advantages over some other competitors

- Bought deal financing commonly employed in Canada.

Historically, Fortis has been very adept at acquisitions. Corporate growth has benefited from the company's ability to successfully acquire and integrate selected assets. Capital market conditions are demonstrating signs of improved functioning. Therefore, the typical Fortis acquisition strategy is more palatable in current capital markets.

Valuation

We continue to believe that Fortis has strong organic growth in key areas such as British Columbia, Alberta and the Caribbean. In our view, the company faces a delicate balance of capital investment opportunities and cash flow needs. From our perspective, the next big catalysts for the stock will likely revolve around capital efficiency initiatives or a large scale acquisition which seems somewhat unlikely at this time. We retain our C\$27.50 target price which is obtained utilizing multiple valuation methodologies, including: a 17.5x P/E multiple of 2010 earnings; a 1.53x book value multiple; and, a DCF based valuation. We reiterate our Neutral rating.

Rating: Neutral

Target Price: C\$27.50

The analyst(s) responsible for preparing this research report received compensation that is based upon various factors including Credit Suisse's total revenues, a portion of which are generated by Credit Suisse's investment banking activities.

Analysts' stock ratings are defined as follows:

Outperform (O): The stock's total return is expected to outperform the relevant benchmark* by at least 10-15% (or more, depending on perceived risk) over the next 12 months.

Neutral (N): The stock's total return is expected to be in line with the relevant benchmark* (range of $\pm 10-15\%$) over the next 12 months.

Underperform (U): The stock's total return is expected to underperform the relevant benchmark* by 10-15% or more over the next 12 months.

*Relevant benchmark by region: As of 29th May 2009, Australia, New Zealand, U.S. and Canadian ratings are based on (1) a stock's absolute total return potential to its current share price and (2) the relative attractiveness of a stock's total return potential within an analyst's coverage universe**, with Outperforms representing the most attractive, Neutrals the less attractive, and Underperforms the least attractive investment opportunities. Some U.S. and Canadian ratings may fall outside the absolute total return ranges defined above, depending on market conditions and industry factors. For Latin American, Japanese, and non-Japan Asia stocks, ratings are based on a stock's total return relative to the average total return of the relevant country or regional benchmark; for European stocks, ratings are based on a stock's total return relative to the analyst's coverage

universe**. For Australian and New Zealand stocks a 22% and a 12% threshold replace the 10-15% level in the Outperform and Underperform stock rating definitions, respectively, subject to analysts' perceived risk. The 22% and 12% thresholds replace the +10-15% and -10-15% levels in the Neutral stock rating definition, respectively, subject to analysts' perceived risk.

**An analyst's coverage universe consists of all companies covered by the analyst within the relevant sector.

Restricted (R): In certain circumstances, Credit Suisse policy and/or applicable law and regulations preclude certain types of communications, including an investment recommendation, during the course of Credit Suisse's engagement in an investment banking transaction and in certain other circumstances.

Volatility Indicator [V]: A stock is defined as volatile if the stock price has moved up or down by 20% or more in a month in at least 8 of the past 24 months or the analyst expects significant volatility going forward.

Analysts' coverage universe weightings are distinct from analysts' stock ratings and are based on the expected performance of an analyst's coverage universe* versus the relevant broad market benchmark:**

Overweight: Industry expected to outperform the relevant broad market benchmark over the next 12 months.

Market Weight: Industry expected to perform in-line with the relevant broad market benchmark over the next 12 months.

Underweight: Industry expected to underperform the relevant broad market benchmark over the next 12 months.

*An analyst's coverage universe consists of all companies covered by the analyst within the relevant sector.

**The broad market benchmark is based on the expected return of the local market index (e.g., the S&P 500 in the U.S.) over the next 12 months.

Credit Suisse's distribution of stock ratings (and banking clients) is:

Global Ratings Distribution		
Outperform/Buy*	37%	(58% banking clients)
Neutral/Hold*	43%	(58% banking clients)
Underperform/Sell*	19%	(48% banking clients)
Restricted	2%	

*For purposes of the NYSE and NASD ratings distribution disclosure requirements, our stock ratings of Outperform, Neutral, and Underperform most closely correspond to Buy, Hold, and Sell, respectively; however, the meanings are not the same, as our stock ratings are determined on a relative basis. (Please refer to definitions above.) An investor's decision to buy or sell a security should be based on investment objectives, current holdings, and other individual factors.

Credit Suisse's policy is to update research reports as it deems appropriate, based on developments with the subject company, the sector or the market that may have a material impact on the research views or opinions stated herein.

Credit Suisse's policy is only to publish investment research that is impartial, independent, clear, fair and not misleading. Price Target: (12 months) for (FTS.TO)

Method: We obtain our C\$27.50 target price for Fortis Inc. by using multiple valuation methodologies, yield base analysis, and discounted cash flow. Our target price implies a P/E (price/earnings) multiple of 17.5x our 2010 EPS (earnings per share) estimate of C\$1.56 and an EV/EBITDA (enterprise value/earnings before interest, taxes, depreciation, and amortization) multiple of 10.0x our EBITDA estimate.

Risks: There are a number of risks to Fortis' achievement of our C\$27.50 target price: commodity prices; weather; environmental; regulatory; access to capital markets; and, interest rates. Moreover, one should never underestimate the power of the regulator in any regulated business.

Please refer to the firm's disclosure website at www.credit-suisse.com/researchdisclosures for the definitions of abbreviations typically used in the target price method and risk sections.

See the Companies Mentioned section for full company names.

The subject company (FTS.TO) currently is, or was during the 12-month period preceding the date of distribution of this report, a client of Credit Suisse.

Credit Suisse provided investment banking services to the subject company (FTS.TO) within the past 12 months.

Credit Suisse provided non-investment banking services, which may include Sales and Trading services, to the subject company (FTS.TO) within the past 12 months.

Credit Suisse expects to receive or intends to seek investment banking related compensation from the subject company (FTS.TO) within the next 3 months.

Credit Suisse has received compensation for products and services other than investment banking services from the subject company (FTS.TO) within the past 12 months.

Important Regional Disclosures

An analyst involved in the preparation of this report has visited certain material operations of the subject company (FTS.TO) within the past 12 months. The analyst may not have visited all material operations of the subject company. The travel expenses of the analyst in connection with such visits were not paid or reimbursed by the subject company, other than de minimus local travel expenses.

Restrictions on certain Canadian securities are indicated by the following abbreviations: NVS--Non-Voting shares; RVS--Restricted Voting Shares; SVS--Subordinate Voting Shares.

Individuals receiving this report from a Canadian investment dealer that is not affiliated with Credit Suisse should be advised that this report may not contain regulatory disclosures the non-affiliated Canadian investment dealer would be required to make if this were its own report. For Credit Suisse Securities (Canada), Inc.'s policies and procedures regarding the dissemination of equity research, please visit http://www.csfb.com/legal_terms/canada_research_policy.shtml.

As of the date of this report, Credit Suisse acts as a market maker or liquidity provider in the equities securities that are the subject of this report.

Principal is not guaranteed in the case of equities because equity prices are variable.

Commission is the commission rate or the amount agreed with a customer when setting up an account or at anytime after that.

CS may have issued a Trade Alert regarding this security. Trade Alerts are short term trading opportunities identified by an analyst on the basis of market events and catalysts, while stock ratings reflect an analyst's investment recommendations based on expected total return over a 12-month period relative to the relevant coverage universe. Because Trade Alerts and stock ratings reflect different assumptions and analytical methods, Trade Alerts may differ directionally from the analyst's stock rating.

The author(s) of this report maintains a CS Model Portfolio that he/she regularly adjusts. The security or securities discussed in this report may be a component of the CS Model Portfolio and subject to such adjustments (which, given the composition of the CS Model Portfolio as a whole, may differ from the recommendation in this report, as well as opportunities or strategies identified in Trading Alerts concerning the same security). The CS Model Portfolio and important disclosures about it are available at www.credit-suisse.com/ti.

This report is not directed to, or intended for distribution to or use by, any person or entity who is a citizen or resident of or located in any locality, state, country or other jurisdiction where such distribution, publication, availability or use would be contrary to law or regulation or which would subject Credit Suisse, the Swiss bank, or its subsidiaries or its affiliates ("CS") to any registration or licensing requirement within such jurisdiction. All material presented in this report, unless specifically indicated otherwise, is under copyright to CS. None of the material, nor its content, nor any copy of it, may be altered in any way, transmitted to, copied or distributed to any other party, without the prior express written permission of CS. All trademarks, service marks and logos used in this report are trademarks or service marks or registered trademarks or service marks of CS or its affiliates.

The information, tools and material presented in this report are provided to you for information purposes only and are not to be used or considered as an offer or the solicitation of an offer to sell or to buy or subscribe for securities or other financial instruments. CS may not have taken any steps to ensure that the securities referred to in this report are suitable for any particular investor. CS will not treat recipients as its customers by virtue of their receiving the report. The investments or services contained or referred to in this report may not be suitable for you and it is recommended that you consult an independent investment advisor if you are in doubt about such investments or investment services. Nothing in this report constitutes investment, legal, accounting or tax advice or a representation that any investment or strategy is suitable or appropriate to your individual circumstances or otherwise constitutes a personal recommendation to you. CS does not offer advice on the tax consequences of investment and you are advised to contact an independent tax adviser. Please note in particular that the bases and levels of taxation may change.

CS believes the information and opinions in the Disclosure Appendix of this report are accurate and complete. Information and opinions presented in the other sections of the report were obtained or derived from sources CS believes are reliable, but CS makes no representations as to their accuracy or completeness. Additional information is available upon request. CS accepts no liability for loss arising from the use of the material presented in this report, except that this exclusion of liability does not apply to the extent that liability arises under specific statutes or regulations applicable to CS. This report is not to be relied upon in substitution for the exercise of independent judgment. CS may have issued, and may in the future issue, a trading call regarding this security. Trading calls are short term trading opportunities based on market events and catalysts, while stock ratings reflect investment recommendations based on expected total return over a 12-month period as defined in the disclosure section. Because trading calls and stock ratings reflect different assumptions and analytical methods, trading calls may differ directionally from the stock rating. In addition, CS may have issued, and may in the future issue, other reports that are inconsistent with, and reach different conclusions from, the information presented in this report. Those reports reflect the different assumptions, views and analytical methods of the analysts who prepared them and CS is under no obligation to ensure that such other reports are brought to the attention of any recipient of this report. CS is involved in many businesses that relate to companies mentioned in this report. These businesses include specialized trading, risk arbitrage, market making, and other proprietary trading.

Past performance should not be taken as an indication or guarantee of future performance, and no representation or warranty, express or implied, is made regarding future performance. Information, opinions and estimates contained in this report reflect a judgement at its original date of publication by CS and are subject to change without notice. The price, value of and income from any of the securities or financial instruments mentioned in this report can fall as well as rise. The value of securities and financial instruments is subject to exchange rate fluctuation that may have a positive or adverse effect on the price or income of such securities or financial instruments. Investors in securities such as ADR's, the values of which are influenced by currency volatility, effectively assume this risk.

Structured securities are complex instruments, typically involve a high degree of risk and are intended for sale only to sophisticated investors who are capable of understanding and assuming the risks involved. The market value of any structured security may be affected by changes in economic, financial and political factors (including, but not limited to, spot and forward interest and exchange rates), time to maturity, market conditions and volatility, and the credit quality of any issuer or reference issuer. Any investor interested in purchasing a structured product should conduct their own investigation and analysis of the product and consult with their own professional advisers as to the risks involved in making such a purchase.

Some investments discussed in this report have a high level of volatility. High volatility investments may experience sudden and large falls in their value causing losses when that investment is realised. Those losses may equal your original investment. Indeed, in the case of some investments the potential losses may exceed the amount of initial investment, in such circumstances you may be required to pay more money to support those losses. Income yields from investments may fluctuate and, in consequence, initial capital paid to make the investment may be used as part of that income yield. Some investments may not be readily realisable and it may be difficult to sell or realise those investments, similarly it may prove difficult for you to obtain reliable information about the value, or risks, to which such an investment is exposed.

RESULTS

Quarterly consistency

- **Earnings review:** Fortis reported Q3 2009 headline and comparable EPS (FD) of C\$0.21. The EPS was inline with both our and the Street's C\$0.21 estimates and was within the C\$0.19-C\$0.24 range. We do not place undue emphasis on quarterly results in much of our universe as a result of the inherently long-cycle nature of many assets. In our view, Fortis delivered a relatively strong consistent financial performance from all segments, aside from some minor quarterly issues at Terasen Gas. The results illustrate the company's ongoing capital plan execution and management of regulatory relationships.
- **Significant organic growth continues:** As expected, Fortis continued to provide a rather robust outlook for its utility capital program. The company expects consolidated gross capital expenditures to be more than C\$1bn for 2009 (which is C\$50m more than what was disclosed at year-end 2008) and roughly C\$5bn over the next five years. Approximately 70% of that amount is expected to come from electric utilities which are largely centered on the growth of FortisAlberta, FortisBC and the Caribbean operations. Additionally, roughly 25% of the total amount is planned to be spent at the Terasen Gas entities.
- **Improving capital market conditions:** Historically, Fortis has been very adept at acquisitions. Corporate growth has benefited from the company's ability to successfully acquire and integrate selected assets. Capital market conditions are demonstrating signs of improved functioning. Therefore, the typical Fortis acquisition strategy is more palatable in current capital markets.
- **Valuation:** We retain our C\$27.50 target price which is obtained utilizing multiple valuation methodologies, including: a 17.5x P/E multiple of 2010 earnings; a 1.54x book value multiple; and, a DCF based valuation. We reiterate our Neutral rating.

Earnings inline

Fortis reported Q3 2009 headline and comparable EPS (FD) of C\$0.21. The EPS was inline with both our and the Street's C\$0.21 estimates and was within the C\$0.19-C\$0.24 range. As usual, a substantial amount of organic utility growth continues across various Fortis assets. This research note is divided into three parts: (a) results; (b) outlook; and, (c) valuation. Each of these areas will be addressed in greater detail below.

Results

Exhibit 1 highlights the segmented unadjusted earnings contributions for the most recent quarter and for the comparable period one year ago. Our commentary for each segment appears under the various headings below.

Exhibit 1: Segmented unadjusted earnings contribution

C\$ in millions, unless otherwise stated

	Q3 2009	Q3 2008	chg y/y
Regulated Gas Utilities - Canadian	(3)	1	-400%
Regulated Electric Utilities - Canadian	36	38	-5%
Regulated Electric Utilities - Caribbean	7	7	0%
Non-regulated - Fortis Generation	4	9	-56%
Non-regulated - Fortis Properties	9	9	0%
Corporate and other	(17)	(15)	-13%
Net earnings applicable to common shares	36	49	-27%

Source: Company data and Credit Suisse

Regulated Gas Utilities - Canadian

The unadjusted earnings for this segment decreased by roughly 400% year-over-year due mainly to a 27.2% (8,370 TJ) drop in gas volumes to core customers. The drop in gas volume was due to warmer-than-normal weather during the third quarter. Adjusted for the C\$5.5m tax reduction in Q3 2008, Q3 2009 earnings was C\$1.5m higher.

Exhibit 2: Regulated gas utilities – Canadian earnings contribution (unadjusted)

C\$ in millions, unless otherwise stated

	Q3 2009	Q3 2008	chg y/y
Terasen Gas	(3.0)	1.0	-400%

Source: Company data and Credit Suisse

Regulated Electric Utilities – Canadian

This segment consists of operating companies such as FortisBC, FortisAlberta, Newfoundland Power and Other Canadian Electric Utilities, which includes Maritime Electric and FortisOntario. Detailed contributions for each of these divisions can be found in the table below.

Exhibit 3: Regulated electric utilities – Canadian contribution (unadjusted)

C\$ in millions, unless otherwise stated

	Q3 2009	Q3 2008	chg y/y
FortisBC	8	8	0%
FortisAlberta	16	17	-6%
Newfoundland Power	7	8	-13%
Other Cdn Electric Utilities	5	5	0%
Earnings	36	38	-5%

Source: Company data and Credit Suisse

FortisBC

Segmented earnings at FortisBC were flat compared to the same period last year. See Exhibit 4 for selected highlights.

Increase energy deliveries in BC

Exhibit 4: Selected FortisBC performance highlights (unadjusted)

	Q3 2009	Q3 2008	chg y/y
Energy deliveries (GWh)	720	697	3%
Revenue (C\$/MWh)	79.17	74.61	6%
Energy supply costs (C\$/MWh)	20.83	17.22	21%
Operating expenses (C\$/MWh)	23.61	22.96	3%
Gross margin (C\$/MWh)	34.72	34.43	1%
Earnings (C\$millions)	8	8	0%

Source: Company data and Credit Suisse

FortisAlberta

Largely the result of customer growth, increase in customer distribution rates, and higher net transmission revenue; segmented adjusted earnings at FortisAlberta increased by approximately C\$3.5m compared to the same period last year (excluding C\$4.5m recovery of future income taxes for Q3 2008). See the table below for selected highlights.

Slight increase in energy delivery in Alberta

Exhibit 5: Selected FortisAlberta performance highlights (unadjusted)

	Q3 2009	Q3 2008	chg y/y
Energy deliveries (GWh)	3,819	3,748	2%
Revenue (C\$/MWh)	22.26	19.74	13%
Operating expenses (C\$/MWh)	8.64	8.27	4%
Gross margin (C\$/MWh)	13.62	11.47	19%
Earnings (C\$millions)	16	17	-6%

Source: Company data and Credit Suisse

Newfoundland Power

Earnings in this segment decreased by 13% this period compared to the same period last year. The decreased earnings were mainly due to higher operating expense and higher amortization costs that were slightly offset by lower corporate income tax rate. Exhibit 6 below contains selected highlights for Newfoundland Power.

Slight decreased in NP energy deliveries

Exhibit 6: Selected Newfoundland Power performance highlights (unadjusted)

	Q3 2009	Q3 2008	chg y/y
Energy deliveries (GWh)	885	897	-1%
Revenue (C\$/MWh)	105.08	104.79	0%
Energy supply costs (C\$/MWh)	56.50	56.86	-1%
Operating expenses (C\$/MWh)	13.56	12.26	11%
Gross margin (C\$/MWh)	35.03	35.67	-2%
Earnings (C\$millions)	7	8	-13%

Source: Company data, Credit Suisse estimates

Other Canadian Electric Utilities

Segmented earnings for the quarter were flat compared to the same quarter last year. See the table below for selected highlights.

Other Canadian utilities showing a decrease in energy deliveries

Exhibit 7: Selected Other Canadian Electric Utilities performance highlights (unadjusted)

	Q3 2009	Q3 2008	chg y/y
Energy deliveries (GWh)	514	532	-3%
Revenue (C\$/MWh)	134.24	124.06	8%

Operating expenses (C\$/MWh)	13.62	13.16	4%
Gross margin (C\$/MWh)	31.13	28.20	10%
Earnings (C\$millions)	5	5	0%

Source: Company data and Credit Suisse

Regulated Electric Utilities – Caribbean

This segment includes Belize Electricity, Caribbean Utilities, and Fortis Turks and Caicos. Earnings for this segment were flat compared to the same quarter last year. There is an ongoing situation with Belize Electricity that does require a degree of monitoring. In brief, the utility received an adverse regulatory decision relating to a rate application. Moreover, there have been changes to the electricity legislation in Belize that have been challenged by the Fortis-owned utility. The company stated

Belize situation requires ongoing monitoring

“[t]he judicial process is ongoing with interim rulings, judgments and appeals. The timing or likely final outcome of the proceedings is indeterminable at this time. However, the Supreme Court of Belize has approved an injunction against the Amendment until Belize Electricity’s appeal of the June 2008 Final Decision has been heard in court, which commenced early October 2009, but after considering some preliminary matters the trial judge postponed the case for a date to be determined. In addition, Belize Electricity’s appeal of the Supreme Court of Belize’s previous decision to uphold certain changes made in electricity legislation by the Government of Belize and the PUC was dismissed in June 2009.”

See the table below for selected highlights.

Exhibit 8: Selected Caribbean Electric Utilities performance highlights (unadjusted)

	Q3 2009	Q3 2008	chg y/y
Energy deliveries (GWh)	312	304	3%
Revenue (C\$/MWh)	285.26	315.79	-10%
Energy supply costs (C\$/MWh)	163.46	197.37	-17%
Operating expenses (C\$/MWh)	41.67	39.47	6%
Gross margin (C\$/MWh)	80.13	78.95	1%
Earnings (C\$millions)	7	7	0%

Energy delivery growth in the Caribbean

Source: Company data and Credit Suisse

Notably, as a result of the regulator’s Final Decision on Belize Electricity’s 2008/2009 rate application, that company

“does not meet certain debt covenant financial ratios related to loans totalling \$7 million (BZ\$13 million), as at September 30, 2009, with the International Bank for Reconstruction and Development and the Caribbean Development Bank. The Company has informed the lenders of the defaults.”

Non-regulated – Fortis Generation

This segment includes non-regulated generation assets located in Belize, Ontario, Central Newfoundland, British Columbia and Upper New York State. Earnings for the segment were lower by 56% from the current quarter compared to the same quarter last year. The decrease was primarily related to the loss in earnings from the expiration of the power-for-water agreement related to the Rankine facility and the lower power pricing in Upper New York State and reduced Belize production. See the table below for selected highlights.

Exhibit 9: Selected non-regulated – Fortis Generation performance highlights (unadjusted)

	Q3 2009	Q3 2008	chg y/y
Energy deliveries (GWh)	98	305	-68%
Revenue (C\$/MWh)	91.84	68.85	33%
Energy supply costs (C\$/MWh)	10.20	6.56	56%
Operating expenses (C\$/MWh)	20.41	9.84	107%
Gross margin (C\$/MWh)	61.22	52.46	17%
Earnings (C\$millions)	4	9	-56%

Source: Company data and Credit Suisse

Non-regulated – Fortis Properties

Fortis Properties' net unadjusted earning contribution during the quarter was C\$9 million which is the same as last year's quarterly earnings. REVPAR decreased to C\$89.02 from C\$93.64 for the comparable period last year. Additionally, the occupancy rate of the Real Estate Division was slightly down at 96.2% versus last year's 96.6%.

Corporate

Corporate expenses increased to C\$17 million in Q3 2009 from C\$15m in Q3 2008.

Outlook

We continue to believe investor, whether existing or prospective, should consider several major issues, including (a) funding organic growth; (b) rising returns; and, (c) acquisition trail. Each of these issues is addressed below.

Funding organic growth

In the most recent quarter the company's reported capital expenditures totaled C\$267 million, of which C\$258 million was spent at regulated utilities. Fortis maintains that capital expenditures for 2009 will be more than C\$1 billion, a roughly 11% increase from 2008. The bulk of this amount will be invested in the company's regulated utility segments. A majority of the total will be spent on Western Canadian assets (Terasen Gas, FortisAlberta, and FortisBC). In addition, Fortis continues to forecast a capital plan of approximately C\$5 billion over the next five years. Given the regulated rates of return with utility capital expenditures, the increases should be viewed as longer-term positives provided an appropriate financial balance is struck. Fortis stated the capital program should allow rate base growth of 6%-7% per annum which "should drive growth in earnings and dividends."

Ongoing organic growth

With the significant current relative valuation advantages, we believe that Fortis may become more motivated to explore possible capital efficiency initiatives. In our view, the company possesses ample opportunities to become much more capital efficient. One strategy involves divesting certain non-utility assets and redeploying capital into utility assets or funding the capital program. Another option would entail divesting partial interests in selected utility assets in an asset management model approach and receiving a management fee. Regardless of approach, we believe there are some rather simple ways for Fortis to increase existing returns.

Opportunities for improved capital efficiency

Generally, we continue to prefer pure-play utility companies without an undue amount of non-core asset exposure. Historically, non-core assets (especially real estate) have been somewhat commonplace for many utilities. Fortis has been no exception to that approach. Notably, the mix of commercial and hospitality real estate assets held by Fortis have been positive contributors and also provide the company a bit of financial flexibility for a selection of reasons. In light of current market conditions, we believe there is a much less compelling case for the monetization of these assets than as in the past. We note Fortis Properties continues to increase in scale and scope which may eventually make it more attractive for acquisition or monetization. Yet, for a number of reasons, we continue to believe there is a rather low probability of either of those events occurring.

Even discounting the potential monetization of assets that we would consider to be non-core, we believe Fortis possesses considerable potential to become much more capital efficient. Given the significant interest in infrastructure assets by many investors seeking long-dated types of return, Fortis could easily divest portions of its existing asset base to pension fund investors and charge a management fee for their operational and management expertise. This type of approach could significantly improve capital efficiency and returns on capital. In addition, this asset management approach could also free-up capital that could be used to fund the existing capital program or fund future acquisitions.

Capital efficiency initiatives could aid funding of acquisitions or the existing capital program funding

Rising returns

Across much of the Canadian regulated infrastructure sector, we believe there are some notable opportunities for greater returns. Recently, the Trans-Quebec & Maritimes Pipeline decision (see file RH-1-2008) determined that an after-tax weighted average cost of capital (ATWACC) approach would be utilized to calculate a revenue requirement (for greater details please refer to our March 19, 2009 note "*Regulatory round-up*"). The decision is clearly important for TQM, however, we believe the decision will have a broader impact. In our view, most of the infrastructure and utility asset regulators assets across the country will need to re-visit the methodologies established for allowable returns. Positively, a few of the regulators have already started various processes to canvass opinions on allowed returns. Ultimately, we view regulators moving away from a very mechanical approach that lasted for well more than a decade and shifting towards an approach that should help ensure an appropriate level of returns.

Specifically for Fortis, we believe the company's regulatory schedule is relatively well positioned to benefit from potential changes in regulatory regimes. Without delving into too much detail, we highlight selected regulatory timelines, including:

- In the months of May and June, the Terasen gas utilities filed various applications with the British Columbia Utilities Commission;
- FortisBC will likely adopt a methodology similar to the decision for Terasen. FortisBC, in August 2009 applied for and received BCUC approval for a 2.2% increase in customer rates effected September 2009. In October the utility filed its Preliminary 2010 Revenue Requirements.
- In June FortisAlberta filed a comprehensive two-year distribution revenue requirement application for 2010 and 2011;
- In September, Newfoundland Power filed a revised 2010 General Rate Application for and in November the utility's capital budget for 2010 was approved by the PUB; and,
- In Ontario, the review process for returns is undergoing a consultative process.

Based upon the TQM decision, we could see a potential increase in returns of 100-200 bps. Moreover, the standards relating to required equity levels within assets may become somewhat more liberal. Yet, we believe that purely regulated monopoly utilities providing essential services are likely to face a variety of financial threshold tests or deemed equity requirements. Frankly, from a regulatory perspective, deemed equity requirements are administratively simpler and very transparent. Therefore, we do not necessarily believe the TQM decision will be adopted in a rather explicit fashion by other regulators. The spirit and the intent of the decision to provide fair and reasonable returns in the context of the market conditions will clearly be upheld in our opinion. That type of regulatory movement may give Fortis some interesting cash flow and earnings upside into 2010 and 2011 that is not currently in our forecasts.

Potential future regulatory positives

Acquisition trail

In our view, Fortis continues to demonstrate a rather impressive ability to successfully integrate acquisitions. Additionally, we view acquisitions as somewhat central to the company's growth strategy. For instance, the company's most recent Management Discussion and Analysis stated "The Corporation continues to pursue acquisitions for profitable growth, focusing on opportunities to acquire regulated natural gas and electric utilities in the United States and Canada. Fortis will also pursue growth in its non-regulated businesses in support of its regulated utility growth strategy." Given the success of Fortis in past transactions, as measured in terms of financials, share price and operationally, we believe the company's current valuation and skill set may lead to some potentially value creating acquisition activity (see Exhibit 10 below for select Fortis M&A transactions).

Exhibit 10: Selected Fortis M&A transactions

\$ in millions, unless otherwise stated

Announced Date	Asset/Company	Deal value (\$m)	Comment
7/22/2009	Caribbean Utilities Co.	CAD 6.74	Acquired an additional 2.7% of Caribbean Utilities Co.
6/23/2009	Great Lakes Power Distribution	CAD 68.00	Acquired from Brookfield the utility that serves the District of Algoma in northern Ontario.
10/1/2008	Grimsby Power Inc.	CAD 1.10	Acquired a 10% minority interest.
10/1/2008	Caribbean Utilities Co.	CAD 3.00	Acquired an additional 1% of Caribbean Utilities Co.
8/15/2008	Caribbean Utilities Co.	CAD 25.00	Acquired an additional 2% of Caribbean Utilities Co.
7/23/2007	Delta Regina	CAD 49.95	Delta hotel located in Regina, Saskatchewan.
2/26/2007	Terasen Inc.	CAD 3,700.00	Gas distribution in British Columbia.
11/7/2006	Caribbean Utilities Co.	CAD 55.70	Acquired an additional 16% of Caribbean Utilities Co.
10/19/2006	4 hotels in western Canada	CAD 51.60	4 hotels (Holiday Inn, Best Western and Ramada) located in BC and Alberta.
8/28/2006	PPC Ltd & Atlantic Equipment & Power (Turks & Caicos) Ltd.	CAD 97.70	Electric utility that services ~80% of the Turks and Caicos Islands.
1/25/2005	3 hotels in western Canada	CAD 62.60	3 hotels in Western Canada from Greenwood Inns (Calgary, Edmonton and Winnipeg).
12/15/2004	Princeton Light & Power	CAD 3.70	PLP is an electric utility that services Princeton, BC.
5/21/2004	Belize Electric Company Ltd.	USD 3.50	Acquired the remaining 5% interest of the company.
9/17/2003	4 hotels in Ontario	CAD 43.20	4 hotels located in Ontario (Cambridge, Kitchener, Sarnia and Peterborough).
9/15/2003	Alberta Utility & British Columbia Utility (from Aquila)	CAD 1,500.00	BC and Alberta units of Aquila Inc.
2/26/2003	Granite Power Corp	CAD 8.80	Company consist of Granite Power Distribution & Granite Power Generation.
1/30/2003	Caribbean Utilities Co.	CAD 71.00	Acquired additional 3,863,695 Class A Ordinary Shares, representing approximately 15.9 per cent of the outstanding shares of the company and increased Fortis' holding to roughly 38%.
12/1/2002	Delta St John's Hotel and conference centre	CAD 25.90	Hotel in downtown St. John's, Newfoundland
5/9/2002	Cornwall Street Railway Light	CAD 67.70	City of Cornwall electric transmission & distribution utility.
4/16/2002	Kings Place	CAD 27.70	Commercial property in Fredericton, NB.
3/13/2002	Caribbean Utilities Co.	CAD 12.90	Acquired additional ~2% of the company.
3/20/2002	Niagara Power Co.	CAD 49.00	Purchase remaining 50% of Niagara Power Co.
2/1/2002	Cabot palace I	CAD 14.30	133,327 Square feet premium office tower in St. John's, Newfoundland
9/18/2001	Portfolio of properties in St. John's	CAD 8.30	Purchased TD Place commercial bldg and 6 parcels of land.
9/14/2001	Aliant Poles	CAD 46.00	Purchased 102,000 poles and related infrastructure from Aliant Telecom.
1/26/2001	Belize Electric Company Ltd.	USD 62.00	Acquired 95% of company from Duke Energy.
12/19/2000	2 Hydro generating stations	CAD 6.90	2 generating stations (6.88MW) in upper New York state.
12/14/2000	Brunswick Square Ltd.	CAD 6.20	Acquired 50% of the company Fortis doesn't own.
12/1/2000	Fort William Building and Blue cross centre	CAD 52.70	Fort William building in St. John's, Newfoundland and Blue cross centre in Moncton, New Brunswick.
2/23/2000	Caribbean Utilities Co.	CAD 79.90	Acquired 20% of the company.
12/30/1999	2 Hydro generating stations	CAD 19.77	2 generating stations (16MW) in upper New York state (Moose River & Philadelphia)
10/28/1999	Belize Electricity Ltd.	CAD 36.80	Acquired 67% interest in the main commercial generator, transmitter & distributor of electricity in Belize.
8/31/1999	Brunswick Square Ltd.	CAD 10.12	Acquired 50% of the company by Fortis Properties.
1/31/1999	Mount Peyton	CAD 2.20	Acquired all common shares and notes payable.
	Total USD	USD 65.50	
	Total CAD	CAD 6,214.48	

Source: Bloomberg, Company data and Credit Suisse

In terms of acquisitions, we believe Fortis has a few advantages over others, including:

- Fortis has growing expertise with both electric and gas utilities;
- Larger size will allow it to look at a larger spectrum of potential target companies;
- A proven ability to effectively integrate acquisitions;
- A rather strong appetite for yield oriented securities in Canada;
- Canada's rather benign interest rate environment; and,
- Bought deal financing commonly employed in Canada.

Fortis possesses a number of absolute and relative advantages over some other competitors

Historically, Fortis has been very adept at acquisitions. Corporate growth has benefited from the company's ability to successfully acquire and integrate selected assets. Capital market conditions are demonstrating signs of improved functioning. Therefore, the typical Fortis acquisition strategy is more palatable in current capital markets. For greater details, please refer to our 6 August 2009 note entitled "Pondering a Portland purchase?"

Valuation

We continue to believe that Fortis has strong organic growth in key areas such as British Columbia, Alberta and the Caribbean. In our view, the company faces a delicate balance of capital investment opportunities and cash flow needs. From our perspective, the next big catalysts for the stock will likely revolve around capital efficiency initiatives or a large scale acquisition which seems somewhat unlikely at this time. We retain our C\$27.50 target price which is obtained utilizing multiple valuation methodologies, including: a 17.5x P/E multiple of 2010 earnings; a 1.54x book value multiple; and, a DCF based valuation. We reiterate our Neutral rating.

Rating: Neutral

Target: C\$27.50

12/3/08	25.48	27.5	

The analyst(s) responsible for preparing this research report received compensation that is based upon various factors including Credit Suisse's total revenues, a portion of which are generated by Credit Suisse's investment banking activities.

Analysts' stock ratings are defined as follows:

Outperform (O): The stock's total return is expected to outperform the relevant benchmark* by at least 10-15% (or more, depending on perceived risk) over the next 12 months.

Neutral (N): The stock's total return is expected to be in line with the relevant benchmark* (range of $\pm 10-15\%$) over the next 12 months.

Underperform (U): The stock's total return is expected to underperform the relevant benchmark* by 10-15% or more over the next 12 months.

*Relevant benchmark by region: As of 29th May 2009, Australia, New Zealand, U.S. and Canadian ratings are based on (1) a stock's absolute total return potential to its current share price and (2) the relative attractiveness of a stock's total return potential within an analyst's coverage universe**, with Outperforms representing the most attractive, Neutrals the less attractive, and Underperforms the least attractive investment opportunities. Some U.S. and Canadian ratings may fall outside the absolute total return ranges defined above, depending on market conditions and industry factors. For Latin American, Japanese, and non-Japan Asia stocks, ratings are based on a stock's total return relative to the average total return of the relevant country or regional benchmark; for European stocks, ratings are based on a stock's total return relative to the analyst's coverage universe**. For Australian and New Zealand stocks a 22% and a 12% threshold replace the 10-15% level in the Outperform and Underperform stock rating definitions, respectively, subject to analysts' perceived risk. The 22% and 12% thresholds replace the +10-15% and -10-15% levels in the Neutral stock rating definition, respectively, subject to analysts' perceived risk.

**An analyst's coverage universe consists of all companies covered by the analyst within the relevant sector.

Restricted (R): In certain circumstances, Credit Suisse policy and/or applicable law and regulations preclude certain types of communications, including an investment recommendation, during the course of Credit Suisse's engagement in an investment banking transaction and in certain other circumstances.

Volatility Indicator [V]: A stock is defined as volatile if the stock price has moved up or down by 20% or more in a month in at least 8 of the past 24 months or the analyst expects significant volatility going forward.

Analysts' coverage universe weightings are distinct from analysts' stock ratings and are based on the expected performance of an analyst's coverage universe* versus the relevant broad market benchmark**:

Overweight: Industry expected to outperform the relevant broad market benchmark over the next 12 months.

Market Weight: Industry expected to perform in-line with the relevant broad market benchmark over the next 12 months.

Underweight: Industry expected to underperform the relevant broad market benchmark over the next 12 months.

*An analyst's coverage universe consists of all companies covered by the analyst within the relevant sector.

**The broad market benchmark is based on the expected return of the local market index (e.g., the S&P 500 in the U.S.) over the next 12 months.

Credit Suisse's distribution of stock ratings (and banking clients) is:

Global Ratings Distribution	
Outperform/Buy*	40% (56% banking clients)

Neutral/Hold*	42%	(59% banking clients)
Underperform/Sell*	16%	(50% banking clients)
Restricted	2%	

*For purposes of the NYSE and NASD ratings distribution disclosure requirements, our stock ratings of Outperform, Neutral, and Underperform most closely correspond to Buy, Hold, and Sell, respectively; however, the meanings are not the same, as our stock ratings are determined on a relative basis. (Please refer to definitions above.) An investor's decision to buy or sell a security should be based on investment objectives, current holdings, and other individual factors.

Price Target: (12 months) for (FTS.TO)

Method: We obtain our C\$27.50 target price for Fortis Inc. by using multiple valuation methodologies, yield base analysis, and discounted cash flow. Our target price implies a P/E (price/earnings) multiple of 17.5x our 2010 EPS (earnings per share) estimate of C\$1.56 and an EV/EBITDA (enterprise value/earnings before interest, taxes, depreciation, and amortization) multiple of 10.0x our EBITDA estimate.

Risks: There are a number of risks to Fortis' achievement of our C\$27.50 target price: commodity prices; weather; environmental; regulatory; access to capital markets; and, interest rates. Moreover, one should never underestimate the power of the regulator in any regulated business.

Please refer to the firm's disclosure website at www.credit-suisse.com/researchdisclosures for the definitions of abbreviations typically used in the target price method and risk sections.

See the Companies Mentioned section for full company names.

The subject company (FTS.TO) currently is, or was during the 12-month period preceding the date of distribution of this report, a client of Credit Suisse.

Credit Suisse provided investment banking services to the subject company (FTS.TO) within the past 12 months.

Credit Suisse provided non-investment banking services, which may include Sales and Trading services, to the subject company (FTS.TO) within the past 12 months.

Credit Suisse expects to receive or intends to seek investment banking related compensation from the subject company (FTS.TO) within the next 3 months.

Credit Suisse has received compensation for products and services other than investment banking services from the subject company (FTS.TO) within the past 12 months.

Additional information is available upon request. CS accepts no liability for loss arising from the use of the material presented in this report, except that this exclusion of liability does not apply to the extent that liability arises under specific statutes or regulations applicable to CS. This report is not to be relied upon in substitution for the exercise of independent judgment. CS may have issued, and may in the future issue, a trading call regarding this security. Trading calls are short term trading opportunities based on market events and catalysts, while stock ratings reflect investment recommendations based on expected total return over a 12-month period as defined in the disclosure section. Because trading calls and stock ratings reflect different assumptions and analytical methods, trading calls may differ directionally from the stock rating. In addition, CS may have issued, and may in the future issue, other reports that are inconsistent with, and reach different conclusions from, the information presented in this report. Those reports reflect the different assumptions, views and analytical methods of the analysts who prepared them and CS is under no obligation to ensure that such other reports are brought to the attention of any recipient of this report. CS is involved in many businesses that relate to companies mentioned in this report. These businesses include specialized trading, risk arbitrage, market making, and other proprietary trading.

Past performance should not be taken as an indication or guarantee of future performance, and no representation or warranty, express or implied, is made regarding future performance. Information, opinions and estimates contained in this report reflect a judgement at its original date of publication by CS and are subject to change without notice. The price, value of and income from any of the securities or financial instruments mentioned in this report can fall as well as rise. The value of securities and financial instruments is subject to exchange rate fluctuation that may have a positive or adverse effect on the price or income of such securities or financial instruments. Investors in securities such as ADR's, the values of which are influenced by currency volatility, effectively assume this risk.

Structured securities are complex instruments, typically involve a high degree of risk and are intended for sale only to sophisticated investors who are capable of understanding and assuming the risks involved. The market value of any structured security may be affected by changes in economic, financial and political factors (including, but not limited to, spot and forward interest and exchange rates), time to maturity, market conditions and volatility, and the credit quality of any issuer or reference issuer. Any investor interested in purchasing a structured product should conduct their own investigation and analysis of the product and consult with their own professional advisers as to the risks involved in making such a purchase.

Some investments discussed in this report have a high level of volatility. High volatility investments may experience sudden and large falls in their value causing losses when that investment is realised. Those losses may equal your original investment. Indeed, in the case of some investments the potential losses may exceed the amount of initial investment, in such circumstances you may be required to pay more money to support those losses. Income yields from investments may fluctuate and, in consequence, initial capital paid to make the investment may be used as part of that income yield. Some investments may not be readily realisable and it may be difficult to sell or realise those investments, similarly it may prove difficult for you to obtain reliable information about the value, or risks, to which such an investment is exposed.

Delivering delightful dividend

- **Dividend delight:** Fortis Inc. announced the declaration of a C\$0.28/share quarterly dividend for each FTS common share payable on 1 March 2010 for shareholders of record at the close of business on 5 February 2010. This amount represents a 7.7% increase from 2009 quarterly dividend of C\$0.26 per share. Additionally, Fortis stated the increase "extends the Corporation's record of annual common share dividend payment increases to 37 consecutive years". From our perspective, past and ongoing annual dividend growth is partly the result of a skillful combination of acquisitions and a large capital program within Fortis' regulated utilities.
- **Capital raise:** Subsequent to the dividend increase, the company announced the offering of 10m Series H First Preference Shares priced at C\$25 per share for total gross proceeds of C\$250m. The preferred shares will have an initial fixed dividend of 4.25% per year until 1 June 2015. The dividend yield going forward will be reset every five years at 1.45% over the five-year Canada bond yield. The company stated that the net proceeds will be used "to repay borrowings under the Corporation's committed credit facility and to inject additional equity into a regulated subsidiary."
- **Improving capital market conditions:** Historically, Fortis has been very adept at acquisitions. Corporate growth has benefited from the company's ability to successfully acquire and integrate selected assets. Capital market conditions are demonstrating signs of improved functioning. Therefore, the typical Fortis acquisition strategy is more palatable in current capital markets.
- **Valuation:** We retain our C\$27.50 target price which is obtained utilizing multiple valuation methodologies, including: a 17.5x P/E multiple of 2010 earnings; a 1.54x book value multiple; and, a DCF based valuation. We reiterate our Neutral rating.

Disclosure Appendix

Important Global Disclosures

I, Andrew M. Kuske, certify that (1) the views expressed in this report accurately reflect my personal views about all of the subject companies and securities and (2) no part of my compensation was, is or will be directly or indirectly related to the specific recommendations or views expressed in this report.

See the *Companies Mentioned* section for full company names.

3-Year Price, Target Price and Rating Change History Chart for FTS.TO

FTS.TO	Closing Price (C\$)	Target Price (C\$)	Rating	Initiation/Assumption
3/16/07	27.15		NC	
12/4/07	27.04	32	N	X
10/24/08	24.75	28		
12/3/08	25.48	27.5		

The analyst(s) responsible for preparing this research report received compensation that is based upon various factors including Credit Suisse's total revenues, a portion of which are generated by Credit Suisse's investment banking activities.

Analysts' stock ratings are defined as follows:

Outperform (O): The stock's total return is expected to outperform the relevant benchmark* by at least 10-15% (or more, depending on perceived risk) over the next 12 months.

Neutral (N): The stock's total return is expected to be in line with the relevant benchmark* (range of $\pm 10-15\%$) over the next 12 months.

Underperform (U): The stock's total return is expected to underperform the relevant benchmark* by 10-15% or more over the next 12 months.

*Relevant benchmark by region: As of 29th May 2009, Australia, New Zealand, U.S. and Canadian ratings are based on (1) a stock's absolute total return potential to its current share price and (2) the relative attractiveness of a stock's total return potential within an analyst's coverage universe**, with Outperforms representing the most attractive, Neutrals the less attractive, and Underperforms the least attractive investment opportunities. Some U.S. and Canadian ratings may fall outside the absolute total return ranges defined above, depending on market conditions and industry factors. For Latin American, Japanese, and non-Japan Asia stocks, ratings are based on a stock's total return relative to the average total return of the relevant country or regional benchmark; for European stocks, ratings are based on a stock's total return relative to the analyst's coverage universe**. For Australian and New Zealand stocks a 22% and a 12% threshold replace the 10-15% level in the Outperform and Underperform stock rating definitions, respectively, subject to analysts' perceived risk. The 22% and 12% thresholds replace the +10-15% and -10-15% levels in the Neutral stock rating definition, respectively, subject to analysts' perceived risk.

**An analyst's coverage universe consists of all companies covered by the analyst within the relevant sector.

Restricted (R): In certain circumstances, Credit Suisse policy and/or applicable law and regulations preclude certain types of communications, including an investment recommendation, during the course of Credit Suisse's engagement in an investment banking transaction and in certain other circumstances.

Volatility Indicator [V]: A stock is defined as volatile if the stock price has moved up or down by 20% or more in a month in at least 8 of the past 24 months or the analyst expects significant volatility going forward.

Analysts' coverage universe weightings are distinct from analysts' stock ratings and are based on the expected performance of an analyst's coverage universe* versus the relevant broad market benchmark**:

Overweight: Industry expected to outperform the relevant broad market benchmark over the next 12 months.

Market Weight: Industry expected to perform in-line with the relevant broad market benchmark over the next 12 months.

Underweight: Industry expected to underperform the relevant broad market benchmark over the next 12 months.

*An analyst's coverage universe consists of all companies covered by the analyst within the relevant sector.

**The broad market benchmark is based on the expected return of the local market index (e.g., the S&P 500 in the U.S.) over the next 12 months.

Credit Suisse's distribution of stock ratings (and banking clients) is:

Global Ratings Distribution		
Outperform/Buy*	42%	(56% banking clients)
Neutral/Hold*	41%	(60% banking clients)
Underperform/Sell*	15%	(52% banking clients)
Restricted	2%	

*For purposes of the NYSE and NASD ratings distribution disclosure requirements, our stock ratings of Outperform, Neutral, and Underperform most closely correspond to Buy, Hold, and Sell, respectively; however, the meanings are not the same, as our stock ratings are determined on a relative basis. (Please refer to definitions above.) An investor's decision to buy or sell a security should be based on investment objectives, current holdings, and other individual factors.

Credit Suisse's policy is to update research reports as it deems appropriate, based on developments with the subject company, the sector or the market that may have a material impact on the research views or opinions stated herein.

Credit Suisse's policy is only to publish investment research that is impartial, independent, clear, fair and not misleading. Credit Suisse does not provide any tax advice. Any statement herein regarding any US federal tax is not intended or written to be used, and cannot be used, by any taxpayer for the purposes of avoiding any penalties.

See the Companies Mentioned section for full company names.

Price Target: (12 months) for (FTS.TO)

Method: We obtain our C\$27.50 target price for Fortis Inc. by using multiple valuation methodologies, yield base analysis, and discounted cash flow. Our target price implies a P/E (price/earnings) multiple of 17.5x our 2010 EPS (earnings per share) estimate of C\$1.56 and an EV/EBITDA (enterprise value/earnings before interest, taxes, depreciation, and amortization) multiple of 10.0x our EBITDA estimate.

Risks: There are a number of risks to Fortis' achievement of our C\$27.50 target price: commodity prices; weather; environmental; regulatory; access to capital markets; and, interest rates. Moreover, one should never underestimate the power of the regulator in any regulated business.

Please refer to the firm's disclosure website at www.credit-suisse.com/researchdisclosures for the definitions of abbreviations typically used in the target price method and risk sections.

See the Companies Mentioned section for full company names.

The subject company (FTS.TO) currently is, or was during the 12-month period preceding the date of distribution of this report, a client of Credit Suisse.

Credit Suisse provided investment banking services to the subject company (FTS.TO) within the past 12 months.

Credit Suisse provided non-investment banking services, which may include Sales and Trading services, to the subject company (FTS.TO) within the past 12 months.

Credit Suisse expects to receive or intends to seek investment banking related compensation from the subject company (FTS.TO) within the next 3 months.

Credit Suisse has received compensation for products and services other than investment banking services from the subject company (FTS.TO) within the past 12 months.

Important Regional Disclosures

Singapore recipients should contact a Singapore financial adviser for any matters arising from this research report.

An analyst involved in the preparation of this report has visited certain material operations of the subject company (FTS.TO) within the past 12 months. The analyst may not have visited all material operations of the subject company. The travel expenses of the analyst in connection with such visits were not paid or reimbursed by the subject company, other than de minimus local travel expenses.

Restrictions on certain Canadian securities are indicated by the following abbreviations: NVS--Non-Voting shares; RVS--Restricted Voting Shares; SVS--Subordinate Voting Shares.

Individuals receiving this report from a Canadian investment dealer that is not affiliated with Credit Suisse should be advised that this report may not contain regulatory disclosures the non-affiliated Canadian investment dealer would be required to make if this were its own report.

For Credit Suisse Securities (Canada), Inc.'s policies and procedures regarding the dissemination of equity research, please visit http://www.csfb.com/legal_terms/canada_research_policy.shtml.

As of the date of this report, Credit Suisse acts as a market maker or liquidity provider in the equities securities that are the subject of this report.

Principal is not guaranteed in the case of equities because equity prices are variable.

Commission is the commission rate or the amount agreed with a customer when setting up an account or at anytime after that.

CS may have issued a Trade Alert regarding this security. Trade Alerts are short term trading opportunities identified by an analyst on the basis of market events and catalysts, while stock ratings reflect an analyst's investment recommendations based on expected total return over a 12-month period relative to the relevant coverage universe. Because Trade Alerts and stock ratings reflect different assumptions and analytical methods, Trade Alerts may differ directionally from the analyst's stock rating.

The author(s) of this report maintains a CS Model Portfolio that he/she regularly adjusts. The security or securities discussed in this report may be a component of the CS Model Portfolio and subject to such adjustments (which, given the composition of the CS Model Portfolio as a whole, may differ from the recommendation in this report, as well as opportunities or strategies identified in Trading Alerts concerning the same security). The CS Model Portfolio and important disclosures about it are available at www.credit-suisse.com/ti.

To the extent this is a report authored in whole or in part by a non-U.S. analyst and is made available in the U.S., the following are important disclosures regarding any non-U.S. analyst contributors:

The non-U.S. research analysts listed below (if any) are not registered/qualified as research analysts with FINRA. The non-U.S. research analysts listed below may not be associated persons of CSSU and therefore may not be subject to the NASD Rule 2711 and NYSE Rule 472 restrictions on communications with a subject company, public appearances and trading securities held by a research analyst account.

- Andrew M. Kuske, non-U.S. analyst, is a research analyst employed by Credit Suisse Securities (Canada), Inc..
- Paul Tan, non-U.S. analyst, is a research analyst employed by Credit Suisse Securities (Canada), Inc..

Disclaimers continue on next page.

This report is not directed to, or intended for distribution to or use by, any person or entity who is a citizen or resident of or located in any locality, state, country or other jurisdiction where such distribution, publication, availability or use would be contrary to law or regulation or which would subject Credit Suisse AG, the Swiss bank, or its subsidiaries or its affiliates ("CS") to any registration or licensing requirement within such jurisdiction. All material presented in this report, unless specifically indicated otherwise, is under copyright to CS. None of the material, nor its content, nor any copy of it, may be altered in any way, transmitted to, copied or distributed to any other party, without the prior express written permission of CS. All trademarks, service marks and logos used in this report are trademarks or service marks or registered trademarks or service marks of CS or its affiliates.

The information, tools and material presented in this report are provided to you for information purposes only and are not to be used or considered as an offer or the solicitation of an offer to sell or to buy or subscribe for securities or other financial instruments. CS may not have taken any steps to ensure that the securities referred to in this report are suitable for any particular investor. CS will not treat recipients as its customers by virtue of their receiving the report. The investments or services contained or referred to in this report may not be suitable for you and it is recommended that you consult an independent investment advisor if you are in doubt about such investments or investment services. Nothing in this report constitutes investment, legal, accounting or tax advice or a representation that any investment or strategy is suitable or appropriate to your individual circumstances or otherwise constitutes a personal recommendation to you. CS does not offer advice on the tax consequences of investment and you are advised to contact an independent tax adviser. Please note in particular that the bases and levels of taxation may change.

CS believes the information and opinions in the Disclosure Appendix of this report are accurate and complete. Information and opinions presented in the other sections of the report were obtained or derived from sources CS believes are reliable, but CS makes no representations as to their accuracy or completeness. Additional information is available upon request. CS accepts no liability for loss arising from the use of the material presented in this report, except that this exclusion of liability does not apply to the extent that liability arises under specific statutes or regulations applicable to CS. This report is not to be relied upon in substitution for the exercise of independent judgment. CS may have issued, and may in the future issue, a trading call regarding this security. Trading calls are short term trading opportunities based on market events and catalysts, while stock ratings reflect investment recommendations based on expected total return over a 12-month period as defined in the disclosure section. Because trading calls and stock ratings reflect different assumptions and analytical methods, trading calls may differ directionally from the stock rating. In addition, CS may have issued, and may in the future issue, other reports that are inconsistent with, and reach different conclusions from, the information presented in this report. Those reports reflect the different assumptions, views and analytical methods of the analysts who prepared them and CS is under no obligation to ensure that such other reports are brought to the attention of any recipient of this report. CS is involved in many businesses that relate to companies mentioned in this report. These businesses include specialized trading, risk arbitrage, market making, and other proprietary trading.

Past performance should not be taken as an indication or guarantee of future performance, and no representation or warranty, express or implied, is made regarding future performance. Information, opinions and estimates contained in this report reflect a judgement at its original date of publication by CS and are subject to change without notice. The price, value of and income from any of the securities or financial instruments mentioned in this report can fall as well as rise. The value of securities and financial instruments is subject to exchange rate fluctuation that may have a positive or adverse effect on the price or income of such securities or financial instruments. Investors in securities such as ADR's, the values of which are influenced by currency volatility, effectively assume this risk.

Structured securities are complex instruments, typically involve a high degree of risk and are intended for sale only to sophisticated investors who are capable of understanding and assuming the risks involved. The market value of any structured security may be affected by changes in economic, financial and political factors (including, but not limited to, spot and forward interest and exchange rates), time to maturity, market conditions and volatility, and the credit quality of any issuer or reference issuer. Any investor interested in purchasing a structured product should conduct their own investigation and analysis of the product and consult with their own professional advisers as to the risks involved in making such a purchase.

Some investments discussed in this report have a high level of volatility. High volatility investments may experience sudden and large falls in their value causing losses when that investment is realised. Those losses may equal your original investment. Indeed, in the case of some investments the potential losses may exceed the amount of initial investment, in such circumstances you may be required to pay more money to support those losses. Income yields from investments may fluctuate and, in consequence, initial capital paid to make the investment may be used as part of that income yield. Some investments may not be readily realisable and it may be difficult to sell or realise those investments, similarly it may prove difficult for you to obtain reliable information about the value, or risks, to which such an investment is exposed.

3-Year Price, Target Price and Rating Change History Chart for FTS.TO

The analyst(s) responsible for preparing this research report received compensation that is based upon various factors including Credit Suisse's total revenues, a portion of which are generated by Credit Suisse's investment banking activities.

Analysts' stock ratings are defined as follows:

Outperform (O): The stock's total return is expected to outperform the relevant benchmark* by at least 10-15% (or more, depending on perceived risk) over the next 12 months.

Neutral (N): The stock's total return is expected to be in line with the relevant benchmark* (range of $\pm 10-15\%$) over the next 12 months.

Underperform (U): The stock's total return is expected to underperform the relevant benchmark* by 10-15% or more over the next 12 months.

*Relevant benchmark by region: As of 29th May 2009, Australia, New Zealand, U.S. and Canadian ratings are based on (1) a stock's absolute total return potential to its current share price and (2) the relative attractiveness of a stock's total return potential within an analyst's coverage universe**, with Outperforms representing the most attractive, Neutrals the less attractive, and Underperforms the least attractive investment opportunities. Some U.S. and Canadian ratings may fall outside the absolute total return ranges defined above, depending on market conditions and industry factors. For Latin American, Japanese, and non-Japan Asia stocks, ratings are based on a stock's total return relative to the average total return of the relevant country or regional benchmark; for European stocks, ratings are based on a stock's total return relative to the analyst's coverage universe**. For Australian and New Zealand stocks a 22% and a 12% threshold replace the 10-15% level in the Outperform and Underperform stock rating definitions, respectively, subject to analysts' perceived risk. The 22% and 12% thresholds replace the +10-15% and -10-15% levels in the Neutral stock rating definition, respectively, subject to analysts' perceived risk.

**An analyst's coverage universe consists of all companies covered by the analyst within the relevant sector.

Restricted (R): In certain circumstances, Credit Suisse policy and/or applicable law and regulations preclude certain types of communications, including an investment recommendation, during the course of Credit Suisse's engagement in an investment banking transaction and in certain other circumstances.

Volatility Indicator [V]: A stock is defined as volatile if the stock price has moved up or down by 20% or more in a month in at least 8 of the past 24 months or the analyst expects significant volatility going forward.

Analysts' coverage universe weightings are distinct from analysts' stock ratings and are based on the expected performance of an analyst's coverage universe* versus the relevant broad market benchmark**:

Overweight: Industry expected to outperform the relevant broad market benchmark over the next 12 months.

Market Weight: Industry expected to perform in-line with the relevant broad market benchmark over the next 12 months.

Underweight: Industry expected to underperform the relevant broad market benchmark over the next 12 months.

*An analyst's coverage universe consists of all companies covered by the analyst within the relevant sector.

**The broad market benchmark is based on the expected return of the local market index (e.g., the S&P 500 in the U.S.) over the next 12 months.

Credit Suisse's distribution of stock ratings (and banking clients) is:

Global Ratings Distribution		
Outperform/Buy*	42%	(58% banking clients)
Neutral/Hold*	42%	(59% banking clients)
Underperform/Sell*	15%	(51% banking clients)
Restricted	2%	

*For purposes of the NYSE and NASD ratings distribution disclosure requirements, our stock ratings of Outperform, Neutral, and Underperform most closely correspond to Buy, Hold, and Sell, respectively; however, the meanings are not the same, as our stock ratings are determined on a relative basis. (Please refer to definitions above.) An investor's decision to buy or sell a security should be based on investment objectives, current holdings, and other individual factors.

Credit Suisse's policy is to update research reports as it deems appropriate, based on developments with the subject company, the sector or the market that may have a material impact on the research views or opinions stated herein.

Credit Suisse's policy is only to publish investment research that is impartial, independent, clear, fair and not misleading. Credit Suisse does not provide any tax advice. Any statement herein regarding any US federal tax is not intended or written to be used, and cannot be used, by any taxpayer for the purposes of avoiding any penalties.

See the Companies Mentioned section for full company names.

Price Target: (12 months) for (FTS.TO)

Method: We obtain our C\$30.00 target price for Fortis Inc. by using multiple valuation methodologies, yield base analysis, and discounted cash flow. Our target price implies a P/E (price/earnings) multiple of 19.2x our 2010 EPS (earnings per share) estimate of C\$1.56 and an EV/EBITDA (enterprise value/earnings before interest, taxes, depreciation, and amortization) multiple of 10.4x our EBITDA estimate.

Risks: There are a number of risks to Fortis' achievement of our C\$30.00 target price: commodity prices; weather; environmental; regulatory; access to capital markets; and, interest rates. Moreover, one should never underestimate the power of the regulator in any regulated business.

Please refer to the firm's disclosure website at www.credit-suisse.com/researchdisclosures for the definitions of abbreviations typically used in the target price method and risk sections.

See the Companies Mentioned section for full company names.

The subject company (FTS.TO) currently is, or was during the 12-month period preceding the date of distribution of this report, a client of Credit Suisse.

Credit Suisse provided investment banking services to the subject company (FTS.TO) within the past 12 months.

Credit Suisse provided non-investment banking services, which may include Sales and Trading services, to the subject company (FTS.TO) within the past 12 months.

Credit Suisse expects to receive or intends to seek investment banking related compensation from the subject company (FTS.TO) within the next 3 months.

Credit Suisse has received compensation for products and services other than investment banking services from the subject company (FTS.TO) within the past 12 months.

Important Regional Disclosures

Singapore recipients should contact a Singapore financial adviser for any matters arising from this research report.

An analyst involved in the preparation of this report has visited certain material operations of the subject company (FTS.TO) within the past 12 months. The analyst may not have visited all material operations of the subject company. The travel expenses of the analyst in connection with such visits were not paid or reimbursed by the subject company, other than de minimus local travel expenses.

Restrictions on certain Canadian securities are indicated by the following abbreviations: NVS--Non-Voting shares; RVS--Restricted Voting Shares; SVS--Subordinate Voting Shares.

Individuals receiving this report from a Canadian investment dealer that is not affiliated with Credit Suisse should be advised that this report may not contain regulatory disclosures the non-affiliated Canadian investment dealer would be required to make if this were its own report.

For Credit Suisse Securities (Canada), Inc.'s policies and procedures regarding the dissemination of equity research, please visit http://www.csfb.com/legal_terms/canada_research_policy.shtml.

As of the date of this report, Credit Suisse acts as a market maker or liquidity provider in the equities securities that are the subject of this report.

Principal is not guaranteed in the case of equities because equity prices are variable.

Commission is the commission rate or the amount agreed with a customer when setting up an account or at anytime after that.

CS may have issued a Trade Alert regarding this security. Trade Alerts are short term trading opportunities identified by an analyst on the basis of market events and catalysts, while stock ratings reflect an analyst's investment recommendations based on expected total return over a 12-month period relative to the relevant coverage universe. Because Trade Alerts and stock ratings reflect different assumptions and analytical methods, Trade Alerts may differ directionally from the analyst's stock rating.

The author(s) of this report maintains a CS Model Portfolio that he/she regularly adjusts. The security or securities discussed in this report may be a component of the CS Model Portfolio and subject to such adjustments (which, given the composition of the CS Model Portfolio as a whole, may differ from the recommendation in this report, as well as opportunities or strategies identified in Trading Alerts concerning the same security). The CS Model Portfolio and important disclosures about it are available at www.credit-suisse.com/ti.

To the extent this is a report authored in whole or in part by a non-U.S. analyst and is made available in the U.S., the following are important disclosures regarding any non-U.S. analyst contributors:

The non-U.S. research analysts listed below (if any) are not registered/qualified as research analysts with FINRA. The non-U.S. research analysts listed below may not be associated persons of CSSU and therefore may not be subject to the NASD Rule 2711 and NYSE Rule 472 restrictions on communications with a subject company, public appearances and trading securities held by a research analyst account.

- Andrew M. Kuske, non-U.S. analyst, is a research analyst employed by Credit Suisse Securities (Canada), Inc..
- Paul Tan, non-U.S. analyst, is a research analyst employed by Credit Suisse Securities (Canada), Inc..

Disclaimers continue on next page.

This report is not directed to, or intended for distribution to or use by, any person or entity who is a citizen or resident of or located in any locality, state, country or other jurisdiction where such distribution, publication, availability or use would be contrary to law or regulation or which would subject Credit Suisse AG, the Swiss bank, or its subsidiaries or its affiliates ("CS") to any registration or licensing requirement within such jurisdiction. All material presented in this report, unless specifically indicated otherwise, is under copyright to CS. None of the material, nor its content, nor any copy of it, may be altered in any way, transmitted to, copied or distributed to any other party, without the prior express written permission of CS. All trademarks, service marks and logos used in this report are trademarks or service marks or registered trademarks or service marks of CS or its affiliates.

The information, tools and material presented in this report are provided to you for information purposes only and are not to be used or considered as an offer or the solicitation of an offer to sell or to buy or subscribe for securities or other financial instruments. CS may not have taken any steps to ensure that the securities referred to in this report are suitable for any particular investor. CS will not treat recipients as its customers by virtue of their receiving the report. The investments or services contained or referred to in this report may not be suitable for you and it is recommended that you consult an independent investment advisor if you are in doubt about such investments or investment services. Nothing in this report constitutes investment, legal, accounting or tax advice or a representation that any investment or strategy is suitable or appropriate to your individual circumstances or otherwise constitutes a personal recommendation to you. CS does not offer advice on the tax consequences of investment and you are advised to contact an independent tax adviser. Please note in particular that the bases and levels of taxation may change.

CS believes the information and opinions in the Disclosure Appendix of this report are accurate and complete. Information and opinions presented in the other sections of the report were obtained or derived from sources CS believes are reliable, but CS makes no representations as to their accuracy or completeness. Additional information is available upon request. CS accepts no liability for loss arising from the use of the material presented in this report, except that this exclusion of liability does not apply to the extent that liability arises under specific statutes or regulations applicable to CS. This report is not to be relied upon in substitution for the exercise of independent judgment. CS may have issued, and may in the future issue, a trading call regarding this security. Trading calls are short term trading opportunities based on market events and catalysts, while stock ratings reflect investment recommendations based on expected total return over a 12-month period as defined in the disclosure section. Because trading calls and stock ratings reflect different assumptions and analytical methods, trading calls may differ directionally from the stock rating. In addition, CS may have issued, and may in the future issue, other reports that are inconsistent with, and reach different conclusions from, the information presented in this report. Those reports reflect the different assumptions, views and analytical methods of the analysts who prepared them and CS is under no obligation to ensure that such other reports are brought to the attention of any recipient of this report. CS is involved in many businesses that relate to companies mentioned in this report. These businesses include specialized trading, risk arbitrage, market making, and other proprietary trading.

Past performance should not be taken as an indication or guarantee of future performance, and no representation or warranty, express or implied, is made regarding future performance. Information, opinions and estimates contained in this report reflect a judgement at its original date of publication by CS and are subject to change without notice. The price, value of and income from any of the securities or financial instruments mentioned in this report can fall as well as rise. The value of securities and financial instruments is subject to exchange rate fluctuation that may have a positive or adverse effect on the price or income of such securities or financial instruments. Investors in securities such as ADR's, the values of which are influenced by currency volatility, effectively assume this risk.

Structured securities are complex instruments, typically involve a high degree of risk and are intended for sale only to sophisticated investors who are capable of understanding and assuming the risks involved. The market value of any structured security may be affected by changes in economic, financial and political factors (including, but not limited to, spot and forward interest and exchange rates), time to maturity, market conditions and volatility, and the credit quality of any issuer or reference issuer. Any investor interested in purchasing a structured product should conduct their own investigation and analysis of the product and consult with their own professional advisers as to the risks involved in making such a purchase.

Some investments discussed in this report have a high level of volatility. High volatility investments may experience sudden and large falls in their value causing losses when that investment is realised. Those losses may equal your original investment. Indeed, in the case of some investments the potential losses may exceed the amount of initial investment, in such circumstances you may be required to pay more money to support those losses. Income yields from investments may fluctuate and, in consequence, initial capital paid to make the investment may be used as part of that income yield. Some investments may not be readily realisable and it may be difficult to sell or realise those investments, similarly it may prove difficult for you to obtain reliable information about the value, or risks, to which such an investment is exposed.

This report may provide the addresses of, or contain hyperlinks to, websites. Except to the extent to which the report refers to website material of CS, CS has not reviewed the linked site and takes no responsibility for the content contained therein. Such address or hyperlink (including addresses or hyperlinks to CS's own website material) is provided solely for your convenience and information and the content of the linked site does not in any way form part of this document. Accessing such website or following such link through this report or CS's website shall be at your own risk.

This report is issued and distributed in Europe (except Switzerland) by Credit Suisse Securities (Europe) Limited, One Cabot Square, London E14 4QJ, England, which is regulated in the United Kingdom by The Financial Services Authority ("FSA"). This report is being distributed in Germany by Credit Suisse Securities (Europe) Limited Niederlassung Frankfurt am Main regulated by the Bundesanstalt fuer Finanzdienstleistungsaufsicht ("BaFin"). This report is being distributed in the United States by Credit Suisse Securities (USA) LLC ; in Switzerland by Credit Suisse AG; in Canada by Credit Suisse Securities (Canada), Inc.; in Brazil by Banco de Investimentos Credit Suisse (Brasil) S.A.; in Japan by Credit Suisse Securities (Japan) Limited, Financial Instrument Firm, Director-General of Kanto Local Finance Bureau (Kinsho) No. 66, a member of Japan Securities Dealers Association, The Financial Futures Association of Japan, Japan Securities Investment Advisers Association; elsewhere in Asia/Pacific by whichever of the following is the appropriately authorised entity in the relevant jurisdiction: Credit Suisse (Hong Kong) Limited, Credit Suisse Equities (Australia) Limited, Credit Suisse Securities (Thailand) Limited, Credit Suisse Securities (Malaysia) Sdn Bhd, Credit Suisse AG, Singapore Branch, Credit Suisse Securities (India) Private Limited, Credit Suisse Securities (Europe) Limited, Seoul Branch, Credit Suisse AG, Taipei Securities Branch, PT Credit Suisse Securities Indonesia, and elsewhere in the world by the relevant authorised affiliate of the above. Research on Taiwanese securities produced by Credit Suisse AG, Taipei Securities Branch has been prepared by a registered Senior Business Person. Research provided to residents of Malaysia is authorised by the Head of Research for Credit Suisse Securities (Malaysia) Sdn. Bhd., to whom they should direct any queries on +603 2723 2020.

In jurisdictions where CS is not already registered or licensed to trade in securities, transactions will only be effected in accordance with applicable securities legislation, which will vary from jurisdiction to jurisdiction and may require that the trade be made in accordance with applicable exemptions from registration or licensing requirements. Non-U.S. customers wishing to effect a transaction should contact a CS entity in their local jurisdiction unless governing law permits otherwise. U.S. customers wishing to effect a transaction should do so only by contacting a representative at Credit Suisse Securities (USA) LLC in the U.S.

Please note that this report was originally prepared and issued by CS for distribution to their market professional and institutional investor customers. Recipients who are not market professional or institutional investor customers of CS should seek the advice of their independent financial advisor prior to taking any investment decision based on this report or for any necessary explanation of its contents. This research may relate to investments or services of a person outside of the UK or to other matters which are not regulated by the FSA or in respect of which the protections of the FSA for private customers and/or the UK compensation scheme may not be available, and further details as to where this may be the case are available upon request in respect of this report.

FORECAST INCREASE

Earnings revision

- **Earnings revisions:** For several reasons, we made a number of revisions to our Fortis financial model. Our changes focused on several changes ahead of the forthcoming Q4 results. The most significant change was an increase to our Q4 2009 EPS estimate from C\$0.44 to C\$0.50; and (b) a revision in our 2009 EPS estimate from C\$1.47 to C\$1.53. For greater details, please refer to our Q4 2009 earnings preview entitled "*Closing out 2009: Q4 earnings preview*".

I, Andrew M. Kuske, certify that (1) the views expressed in this report accurately reflect my personal views about all of the subject companies and securities and (2) no part of my compensation was, is or will be directly or indirectly related to the specific recommendations or views expressed in this report.

See the *Companies Mentioned* section for full company names.

3-Year Price, Target Price and Rating Change History Chart for FTS.TO

The analyst(s) responsible for preparing this research report received compensation that is based upon various factors including Credit Suisse's total revenues, a portion of which are generated by Credit Suisse's investment banking activities.

Analysts' stock ratings are defined as follows:

Outperform (O): The stock's total return is expected to outperform the relevant benchmark* by at least 10-15% (or more, depending on perceived risk) over the next 12 months.

Neutral (N): The stock's total return is expected to be in line with the relevant benchmark* (range of $\pm 10-15\%$) over the next 12 months.

Underperform (U): The stock's total return is expected to underperform the relevant benchmark* by 10-15% or more over the next 12 months.

*Relevant benchmark by region: As of 29th May 2009, Australia, New Zealand, U.S. and Canadian ratings are based on (1) a stock's absolute total return potential to its current share price and (2) the relative attractiveness of a stock's total return potential within an analyst's coverage universe**, with Outperforms representing the most attractive, Neutrals the less attractive, and Underperforms the least attractive investment opportunities. Some U.S. and Canadian ratings may fall outside the absolute total return ranges defined above, depending on market conditions and industry factors. For Latin American, Japanese, and non-Japan Asia stocks, ratings are based on a stock's total return relative to the average total return of the relevant country or regional benchmark; for European stocks, ratings are based on a stock's total return relative to the analyst's coverage universe**. For Australian and New Zealand stocks a 22% and a 12% threshold replace the 10-15% level in the Outperform and Underperform stock rating definitions, respectively, subject to analysts' perceived risk. The 22% and 12% thresholds replace the +10-15% and -10-15% levels in the Neutral stock rating definition, respectively, subject to analysts' perceived risk.

**An analyst's coverage universe consists of all companies covered by the analyst within the relevant sector.

Restricted (R): In certain circumstances, Credit Suisse policy and/or applicable law and regulations preclude certain types of communications, including an investment recommendation, during the course of Credit Suisse's engagement in an investment banking transaction and in certain other circumstances.

Volatility Indicator [V]: A stock is defined as volatile if the stock price has moved up or down by 20% or more in a month in at least 8 of the past 24 months or the analyst expects significant volatility going forward.

Analysts' coverage universe weightings are distinct from analysts' stock ratings and are based on the expected performance of an analyst's coverage universe* versus the relevant broad market benchmark**:

Overweight: Industry expected to outperform the relevant broad market benchmark over the next 12 months.

Market Weight: Industry expected to perform in-line with the relevant broad market benchmark over the next 12 months.

Underweight: Industry expected to underperform the relevant broad market benchmark over the next 12 months.

*An analyst's coverage universe consists of all companies covered by the analyst within the relevant sector.

**The broad market benchmark is based on the expected return of the local market index (e.g., the S&P 500 in the U.S.) over the next 12 months.

Credit Suisse's distribution of stock ratings (and banking clients) is:

Global Ratings Distribution		
Outperform/Buy*	42%	(59% banking clients)
Neutral/Hold*	41%	(60% banking clients)
Underperform/Sell*	14%	(52% banking clients)
Restricted	2%	

*For purposes of the NYSE and NASD ratings distribution disclosure requirements, our stock ratings of Outperform, Neutral, and Underperform most closely correspond to Buy, Hold, and Sell, respectively; however, the meanings are not the same, as our stock ratings are determined on a relative basis. (Please refer to definitions above.) An investor's decision to buy or sell a security should be based on investment objectives, current holdings, and other individual factors.

Credit Suisse's policy is to update research reports as it deems appropriate, based on developments with the subject company, the sector or the market that may have a material impact on the research views or opinions stated herein.

Credit Suisse's policy is only to publish investment research that is impartial, independent, clear, fair and not misleading. For more detail please refer to Credit Suisse's Policies for Managing Conflicts of Interest in connection with Investment Research: http://www.csfb.com/research-and-analytics/disclaimer/managing_conflicts_disclaimer.html

Credit Suisse does not provide any tax advice. Any statement herein regarding any US federal tax is not intended or written to be used, and cannot be used, by any taxpayer for the purposes of avoiding any penalties.

FORECAST INCREASE

A modest miss

- **Earnings review:** Fortis reported Q4 2009 EPS (FD) of C\$0.46 that missed both our C\$0.50 estimate and an identical Street view (within a C\$0.44-C\$0.55 range). Several items required adjustment, however, collectively, those factors largely offset each other. We do not place undue emphasis on quarterly results in much of our universe as a result of the inherently long-cycle nature of many assets. Despite the quarterly miss, our Fortis focus is largely upon the continuing significant regulated capital plan and the positive upward bias to regulated returns.
- **Significant organic growth continues:** As expected, Fortis continued to provide a robust outlook for its utility capital program. The company expects consolidated gross capital expenditures to be nearly C\$1.1bn for 2010 and about C\$5bn over the next five years. Roughly 70% of the total amount is targeted to come from electric utilities and 27% allocated to the Terasen Gas entities.
- **Improving capital market conditions:** Historically, Fortis has been very adept at acquisitions. Corporate growth has benefited from the company's ability to successfully acquire and integrate selected assets. In our view, the company is well positioned in the current market for various acquisition opportunities.
- **Valuation:** We made several changes to our financial model largely related to regulated returns. As a result, we revised our EPS estimates for 2010 from C\$1.56 to C\$1.70. Our 2011 and 2012 estimates are C\$1.80 and C\$1.88 respectively. Our C\$30.00 target price and Neutral rating are obtained utilizing multiple valuation methodologies, including: a 17.0x P/E multiple of 2011 earnings; a 1.62x book value multiple; and, a DCF based valuation. We reiterate our Neutral rating.

U.S. Disclosure: Credit Suisse does and seeks to do business with companies covered in its research reports. As a result, investors should be aware that the Firm may have a conflict of interest that could affect the objectivity of this report. Investors should consider this report as only a single factor in making their investment decision.

Fortis reported Q4 2009 EPS (FD) of C\$0.46 that missed both our C\$0.50 estimate and an identical Street view (within a C\$0.44-C\$0.55 range). Several items required adjustment, however, collectively, those factors largely offset each other. We do not place undue emphasis on quarterly results in much of our universe as a result of the inherently long-cycle nature of many assets. Despite the quarterly miss, our Fortis focus is largely upon the continuing significant regulated capital plan and the positive upward bias to regulated returns. This research note is divided into three parts: (a) results; (b) outlook; and, (c) valuation. Each of these areas will be addressed in greater detail below.

An earnings miss

Results

Exhibit 1 highlights the segmented unadjusted earnings contributions for the most recent quarter and for the comparable period one year ago. Our commentary for each segment appears under the various headings below.

Exhibit 1: Segmented unadjusted earnings contribution

C\$ in millions, unless otherwise stated

	Q4 2009	Q4 2008	chg y/y
Regulated Gas Utilities - Canadian	48	47	2%
Regulated Electric Utilities - Canadian	37	29	28%
Regulated Electric Utilities - Caribbean	7	8	13%
Non-regulated - Fortis Generation	3	8	-63%
Non-regulated - Fortis Properties	5	4	25%
Corporate and other	(19)	(20)	5%
Net earnings applicable to common shares	81	76	7%

Source: Company data and Credit Suisse

Several items required adjustment, however, collectively, those factors largely offset each other. Those items included:

- C\$10m of favourable cumulative retroactive impact associated with increased ROEs at FortisAlberta and Terasen Gas for all of 2009;
- A favourable one-time C\$3m corporate tax adjustment at FortisOntario; and,
- Approximately C\$5m of unfavourable costs relating to Whistler appliance conversions, however, this amount may possibly be recovered in future rate base applications.

Regulated Gas Utilities - Canadian

The unadjusted earnings for this segment increased modestly by 2% year-over-year (see Exhibit 2). Some notable items for the regulated gas utilities, include:

- Net customer additions were 7,400 during Q4 for a total of 939,600 at the end of 2009;
- The amount of additions declined versus Q4 2008 partially evidencing the slowdown in construction and weaker housing markets; and,
- Sales volumes across customer classes declined as did transportation volumes.

Exhibit 2: Regulated Gas Utilities (unadjusted)

	Q4 2009	Q4 2008	chg y/y
Terasen Gas	48.0	47.0	2%

Source: Company data and Credit Suisse

Regulated Electric Utilities – Canadian

This segment consists of operating companies such as FortisBC, FortisAlberta, Newfoundland Power and Other Canadian Electric Utilities, which includes Maritime Electric and FortisOntario. Detailed contributions for each of these divisions can be found in Exhibit 3.

Exhibit 3: Regulated electric utilities – Canadian contribution (unadjusted)

C\$ in millions, unless otherwise stated

	Q4 2009	Q4 2008	chg y/y
FortisBC	8	7	14%
FortisAlberta	15	11	36%
Newfoundland Power	8	8	0%
Other Cdn Electric Utilities	6	3	100%
Earnings	37	29	28%

Source: Company data and Credit Suisse

FortisBC

Segmented earnings at FortisBC increased by 14% compared to the same period last year. See Exhibit 4 for selected highlights.

Increase energy deliveries in BC

Exhibit 4: Selected FortisBC performance highlights (unadjusted)

	Q4 2009	Q4 2008	chg y/y
Energy deliveries (GWh)	859	842	2%
Revenue (C\$/MWh)	80.33	78.38	2%
Energy supply costs (C\$/MWh)	25.61	27.32	-6%
Operating expenses (C\$/MWh)	22.12	21.38	3%
Gross margin (C\$/MWh)	32.60	29.69	10%
Earnings (C\$millions)	8	7	14%

Source: Company data and Credit Suisse

FortisAlberta

Earnings at this regulated utility increased by 36% comparing Q4 2009 versus the prior period which was largely the result of an increased capital base and improved regulated returns. See Exhibit 5 for selected highlights.

Slight increase in energy delivery in Alberta

Exhibit 5: Selected FortisAlberta performance highlights (unadjusted)

	Q4 2009	Q4 2008	chg y/y
Energy deliveries (GWh)	4,129	4,068	1%
Revenue (C\$/MWh)	20.83	19.17	9%
Operating expenses (C\$/MWh)	8.23	8.36	-1%
Gross margin (C\$/MWh)	12.59	10.82	16%
Earnings (C\$millions)	15	11	36%

Source: Company data and Credit Suisse

Newfoundland Power

While this segment's earnings generation was flat comparing Q4 2009 versus Q4 2008, however, energy deliveries were up by 4% (see Exhibit 6).

Notable increase in NP's energy deliveries

Exhibit 6: Selected Newfoundland Power performance highlights (unadjusted)

	Q4 2009	Q4 2008	chg y/y
Energy deliveries (GWh)	1,474	1,412	4%
Revenue (C\$/MWh)	99.05	98.44	1%
Energy supply costs (C\$/MWh)	67.16	66.57	1%
Operating expenses (C\$/MWh)	8.82	8.50	4%
Gross margin (C\$/MWh)	23.07	23.37	-1%
Earnings (C\$millions)	8	8	0%

Source: Company data, Credit Suisse estimates

Other Canadian Electric Utilities

Largely related to a one-time favourable tax adjustment at FortisOntario, this segment's earnings were up 100% from Q4 2008 to Q4 2009. Excluding that favourable tax item, the segment's earnings were flat. The roughly 7% increase in energy deliveries was the result of the Algoma Power Inc. acquisition (previously Great Lakes Power Distribution Inc.). Without that acquisition, energy deliveries actually decreased by 1.3% quarter over quarter and 1.5% year over year. Exhibit 7 contains selected highlights.

Discouraging and declining energy deliveries

Exhibit 7: Selected Other Canadian Electric Utilities performance highlights (unadjusted)

	Q4 2009	Q4 2008	chg y/y
Energy deliveries (GWh)	582	543	7%
Revenue (C\$/MWh)	132.30	119.71	11%
Energy supply costs (C\$/MWh)	85.91	81.03	6%
Operating expenses (C\$/MWh)	18.90	12.89	47%
Gross margin (C\$/MWh)	27.49	25.78	7%
Earnings (C\$millions)	6	3	100%

Source: Company data and Credit Suisse

Regulated Electric Utilities – Caribbean

This segment includes Belize Electricity, Caribbean Utilities, and Fortis Turks and Caicos. Earnings for this segment declined by 13% compared to the same quarter last year. Aside from some regulatory matters discussed below, economic conditions were clearly reflected with a 20% decline in energy deliveries. On the regulatory front, the ongoing situation with Belize Electricity requires a degree of monitoring. In brief, the utility received an adverse regulatory decision relating to a rate application. Moreover, there have been changes to the electricity legislation in Belize that have been challenged by the Fortis-owned utility. The company stated

Belize situation requires ongoing monitoring

"[t]he judicial process is ongoing with interim rulings, judgments and appeals. The timing or likely final outcome of the proceedings is indeterminable at this time. The Supreme Court of Belize issued an injunction against the Amendment until Belize Electricity's appeal of the June 2008 Final Decision has been heard in court. The court appeal of the June 2008 Final Decision was called in early October 2009 but after considering some preliminary matters the trial judge postponed the case for a date to be determined. In addition, Belize Electricity's appeal of the Supreme Court of Belize's previous decision to uphold certain changes made in electricity legislation by the Government of Belize and the PUC was dismissed in June 2009."

See Exhibit 8 below for selected highlights.

Exhibit 8: Caribbean - Regulated Electric Utilities performance highlights (unadjusted)

	Q4 2009	Q4 2008	chg y/y
Energy deliveries (GWh)	290	364	-20%
Revenue (C\$/MWh)	293.10	436.81	-33%
Energy supply costs (C\$/MWh)	172.41	299.45	-42%
Operating expenses (C\$/MWh)	44.83	54.95	-18%
Gross margin (C\$/MWh)	75.86	82.42	-8%
Earnings (C\$millions)	7	8	-13%

Source: Company data and Credit Suisse

Also of note in Belize was the November 2009 Comision Federal de Electricidad (CFE) cancelation of a power supply contract with Belize Electricity for reasons of force majeure. CFE continues to supply Belize Electricity when power is available, however, enough in country generation exists without the external supply.

Non-regulated – Fortis Generation

The non-regulated generation assets within this segment are located in Belize, British Columbia, Central Newfoundland and Upper New York State. Earnings for the segment were lower by 63% from the current quarter compared to the same quarter last year. The decrease was primarily related to the loss in earnings from the expiration of the power-for-water agreement related to the Rankine facility and the lower power pricing in Upper New York State and reduced Belize production. See the table below for selected highlights.

Exhibit 9: Non-regulated generation – selected highlights

	Q4 2009	Q4 2008	chg y/y
Energy deliveries (GWh)	87	312	-72%
Revenue (C\$/MWh)	57.47	64.10	-10%
Energy supply costs (C\$/MWh)	-	3.21	-100%
Operating expenses (C\$/MWh)	34.48	9.62	259%
Gross margin (C\$/MWh)	22.99	51.28	-55%
Earnings (C\$millions)	3	8	-63%

Source: Company data and Credit Suisse

Non-regulated – Fortis Properties

Fortis Properties' net unadjusted earning contribution during the quarter was C\$5m up from C\$4m in Q4 2008. REVPAR decreased to C\$68.87 from C\$72.86 for the comparable period last year. Additionally, the occupancy rate of the Real Estate Division was slightly down at 96.2% versus last year's 96.8%.

Corporate

Corporate expenses declined to C\$19 million in Q4 2009 from C\$20m in Q4 2008.

Outlook

We continue to believe investor, whether existing or prospective, should consider several major issues, including (a) funding organic growth; (b) rising returns; and, (c) acquisition trail. Each of these issues is addressed below.

Funding organic growth

For 2009, Fortis had gross capital expenditures of C\$1.024bn of which C\$888m focused on regulated utilities. In 2010, Fortis guided to C\$1.098bn of gross capital expenditures with C\$974m of that total amount being allocated toward regulated utilities. The company continues to expect consolidated gross capital expenditures to approach C\$5bn with 70% of that total amount being allocated to regulated utilities. Both FortisAlberta and FortisBC will receive the vast majority of that amount; whereas, the regulated gas utilities are planned to receive 27% of the total capex amount. Given the regulated rates of return with utility capital expenditures, the increases should be viewed as longer-term positives provided an appropriate financial balance is struck.

Ongoing organic growth

With the significant current relative valuation advantages, we believe that Fortis may become more motivated to explore possible capital efficiency initiatives. In our view, the company possesses ample opportunities to become much more capital efficient. One strategy involves divesting certain non-utility assets and redeploying capital into utility assets or funding the capital program. Another option would entail divesting partial interests in selected utility assets in an asset management model approach and receiving a management fee. Regardless of approach, we believe there are some rather simple ways for Fortis to increase existing returns.

Opportunities for improved capital efficiency

Generally, we continue to prefer pure-play utility companies without an undue amount of non-core asset exposure. Historically, non-core assets (especially real estate) have been somewhat commonplace for many utilities. Fortis has been no exception to that approach. Notably, the mix of commercial and hospitality real estate assets held by Fortis have been

positive contributors and also provide the company a bit of financial flexibility for a selection of reasons. In light of current market conditions, we believe there is a much less compelling case for the monetization of these assets than as in the past. We note Fortis Properties continues to increase in scale and scope which may eventually make it more attractive for acquisition or monetization. Yet, for a number of reasons, we continue to believe there is a rather low probability of either of those events occurring.

Even discounting the potential monetization of assets that we would consider to be non-core, we believe Fortis possesses considerable potential to become much more capital efficient. Given the significant interest in infrastructure assets by many investors seeking long-dated types of return, Fortis could easily divest portions of its existing asset base to pension fund investors and charge a management fee for their operational and management expertise. This type of approach could significantly improve capital efficiency and returns on capital. In addition, this asset management approach could also free-up capital that could be used to fund the existing capital program or fund future acquisitions.

Capital efficiency initiatives could aid funding of acquisitions or the existing capital program funding

Rising returns

Positively, Fortis has been successful in obtaining several favourable regulatory decisions. For example and most recently, the allowed equity at Terasen Gas Inc. (TGI) was boosted from 35% to 40% effective January 1, 2010. In addition to that positive move for the equity base, the allowed return on equity for TGI increased from 8.47% to 9.5%. In a related judgment, Terasen Gas (Vancouver Island) Inc. (TGVI) and Terasen Gas Whistler Inc. (TGW) returns increased from 9.17% to 10%. Additionally, the British Columbia Utilities Commission (BCUC) held the former automatic adjustment mechanism for annual ROE determination would no longer apply. Also in BC, FortisBC obtained an increased allowed ROE from 8.87% to 9.9% that became effective on January 1, 2010. The upward bias in utility returns should be viewed positively. Clearly, many questions exist as to the methods for determining and predicting future return levels. Yet, we view the regulatory movement away from a very mechanical return approach work as a notable positive that should help ensure an appropriate level of returns over a period of time.

Similar to the BCUC, the Alberta Utilities Commission (AUC) issued a decision on the 2009 Generic Cost of Capital establishing a 9% ROE for utilities like FortisAlberta in 2009 and 2010. Under the previous formulaic approach, that utility would have been entitled to an 8.61% return. Moreover, the allowed equity within the regulated capital structure moved from 37% to 41% effective January 1, 2009. Notably, this return framework will be in effect for 2011 providing a level of certainty to FortisAlberta's future earnings.

Unfortunately, not every jurisdiction is proving to be as progressive as Alberta, BC and the National Energy Board regulated Trans-Quebec & Maritimes Pipeline decision (see file RH-1-2008 and our March 19, 2009 note "*Regulatory round-up*"). The Newfoundland and Labrador Board of Commissioners of Public Utilities (PUB) most recent decision increased the allowed ROE for Newfoundland Power from 8.95% in 2009 to 9% in 2010. Additionally, in the past, the PUB ordered Newfoundland Power's allowed ROEs for 2011 and 2012 would be determined by an automated formula that will be subject to review in Q1 2010. We do not need to belabour all of the regulatory developments, however, we note that returns are slowly biasing to the upside. The only challenge with the upward bias is that it comes at a time of potentially rising interest rates.

Acquisition trail

In our view, Fortis continues to demonstrate a rather impressive ability to successfully integrate acquisitions. Additionally, we view acquisitions as somewhat central to the company's growth strategy. For instance, the company's most recent Management Discussion and Analysis stated "The Corporation continues to pursue acquisitions for profitable growth, focusing on strategic opportunities to acquire regulated natural gas and electric utilities in the United States, Canada and the Caribbean. Fortis will also pursue growth in its non-regulated businesses in support of its regulated utility growth strategy." Given the success of Fortis in past transactions, as measured in terms of financials, share

price and operationally, we believe the company's current valuation and skill set may lead to some potentially value creating acquisition activity (see Exhibit 10 below for select Fortis M&A transactions).

Exhibit 10: Selected Fortis M&A transactions

\$ in millions, unless otherwise stated

Announced Date	Asset/Company	Deal value (\$m)	Comment
7/22/2009	Caribbean Utilities Co.	CAD 6.74	Acquired an additional 2.7% of Caribbean Utilities Co.

Source: Bloomberg, Company data and Credit Suisse

In terms of acquisitions, we believe Fortis has a few advantages over others, including:

- Fortis has growing expertise with both electric and gas utilities;
- Larger size will allow it to look at a larger spectrum of potential target companies;
- A proven ability to effectively integrate acquisitions;
- A rather strong appetite for yield oriented securities in Canada;
- Canada's rather benign interest rate environment; and,
- Bought deal financing commonly employed in Canada.

Fortis possesses a number of absolute and relative advantages over some other competitors

Historically, Fortis has been very adept at acquisitions. Corporate growth has benefited from the company's ability to successfully acquire and integrate selected assets. Capital market conditions are demonstrating signs of improved functioning. Therefore, the typical Fortis acquisition strategy is more palatable in current capital markets. For greater details, please refer to our 6 August 2009 note entitled "Pondering a Portland purchase?"

Valuation

We continue to believe that Fortis has strong organic growth in key areas such as British Columbia, Alberta and the Caribbean. In our view, the company faces a delicate balance of capital investment opportunities and cash flow needs. From our perspective, the next big catalysts for the stock will likely revolve around capital efficiency initiatives or a large scale acquisition which will always lack predictability. At this time, we made several

Rating: Neutral

Target: C\$30.00

adjustments to our financial model largely related to regulated returns. Accordingly, we revised our EPS estimate for 2010 and officially introduce a 2011 and 2012 estimates. Specifically, our old number was C\$1.56 and our revised number is C\$1.70 for 2010. Our 2011 and 2012 estimates are C\$1.80 and C\$1.88 respectively. Our target price of C\$30.00 and Neutral rating are obtained utilizing multiple valuation methodologies, including: a 17.0x P/E multiple of 2011 earnings; a 1.62x book value multiple; and, a DCF based valuation. We reiterate our Neutral rating.

3-Year Price, Target Price and Rating Change History Chart for FTS.TO

FTS.TO Date	Closing Price (C\$)	Target Price (C\$)	Initiation/ Rating Assumption
3/16/07	27.15		NC
12/4/07	27.04	32	N X
10/24/08	24.75	28	
12/3/08	25.48	27.5	
1/25/10	28.5	30	

The analyst(s) responsible for preparing this research report received compensation that is based upon various factors including Credit Suisse's total revenues, a portion of which are generated by Credit Suisse's investment banking activities.

Analysts' stock ratings are defined as follows:

Outperform (O): The stock's total return is expected to outperform the relevant benchmark* by at least 10-15% (or more, depending on perceived risk) over the next 12 months.

Neutral (N): The stock's total return is expected to be in line with the relevant benchmark* (range of $\pm 10-15\%$) over the next 12 months.

Underperform (U): The stock's total return is expected to underperform the relevant benchmark* by 10-15% or more over the next 12 months.

*Relevant benchmark by region: As of 29th May 2009, Australia, New Zealand, U.S. and Canadian ratings are based on (1) a stock's absolute total return potential to its current share price and (2) the relative attractiveness of a stock's total return potential within an analyst's coverage universe**, with Outperforms representing the most attractive, Neutrals the less attractive, and Underperforms the least attractive investment opportunities. Some U.S. and Canadian ratings may fall outside the absolute total return ranges defined above, depending on market conditions and industry factors. For Latin American, Japanese, and non-Japan Asia stocks, ratings are based on a stock's total return relative to the average total return of the relevant country or regional benchmark; for European stocks, ratings are based on a stock's total return relative to the analyst's coverage universe**. For Australian and New Zealand stocks a 22% and a 12% threshold replace the 10-15% level in the Outperform and Underperform stock rating definitions, respectively, subject to analysts' perceived risk. The 22% and 12% thresholds replace the +10-15% and -10-15% levels in the Neutral stock rating definition, respectively, subject to analysts' perceived risk.

**An analyst's coverage universe consists of all companies covered by the analyst within the relevant sector.

Restricted (R): In certain circumstances, Credit Suisse policy and/or applicable law and regulations preclude certain types of communications, including an investment recommendation, during the course of Credit Suisse's engagement in an investment banking transaction and in certain other circumstances.

Volatility Indicator [V]: A stock is defined as volatile if the stock price has moved up or down by 20% or more in a month in at least 8 of the past 24 months or the analyst expects significant volatility going forward.

Analysts' coverage universe weightings are distinct from analysts' stock ratings and are based on the expected performance of an analyst's coverage universe* versus the relevant broad market benchmark:**

Overweight: Industry expected to outperform the relevant broad market benchmark over the next 12 months.

Market Weight: Industry expected to perform in-line with the relevant broad market benchmark over the next 12 months.

Underweight: Industry expected to underperform the relevant broad market benchmark over the next 12 months.

*An analyst's coverage universe consists of all companies covered by the analyst within the relevant sector.

**The broad market benchmark is based on the expected return of the local market index (e.g., the S&P 500 in the U.S.) over the next 12 months.

Credit Suisse's distribution of stock ratings (and banking clients) is:

Global Ratings Distribution		
Outperform/Buy*	42%	(59% banking clients)
Neutral/Hold*	42%	(60% banking clients)
Underperform/Sell*	14%	(51% banking clients)
Restricted	2%	

*For purposes of the NYSE and NASD ratings distribution disclosure requirements, our stock ratings of Outperform, Neutral, and Underperform most closely correspond to Buy, Hold, and Sell, respectively; however, the meanings are not the same, as our stock ratings are determined on a relative basis. (Please refer to definitions above.) An investor's decision to buy or sell a security should be based on investment objectives, current holdings, and other individual factors.

Credit Suisse's policy is to update research reports as it deems appropriate, based on developments with the subject company, the sector or the market that may have a material impact on the research views or opinions stated herein.

Price Target: (12 months) for (FTS.TO)

Method: We obtain our C\$30.00 target price for Fortis Inc. by using multiple valuation methodologies, yield base analysis, and discounted cash flow. Our target price implies a P/E (price/earnings) multiple of 17.0x our 2011 EPS (earnings per share) estimate of C\$1.80 and an EV/EBITDA (enterprise value/earnings before interest, taxes, depreciation, and amortization) multiple of 9.8x our EBITDA estimate.

Risks: There are a number of risks to Fortis' achievement of our C\$30.00 target price: commodity prices; weather; environmental; regulatory; access to capital markets; and, interest rates. Moreover, one should never underestimate the power of the regulator in any regulated business.

Please refer to the firm's disclosure website at www.credit-suisse.com/researchdisclosures for the definitions of abbreviations typically used in the target price method and risk sections.

See the Companies Mentioned section for full company names.

The subject company (FTS.TO) currently is, or was during the 12-month period preceding the date of distribution of this report, a client of Credit Suisse.

Credit Suisse provided investment banking services to the subject company (FTS.TO) within the past 12 months.

Credit Suisse provided non-investment banking services, which may include Sales and Trading services, to the subject company (FTS.TO) within the past 12 months.

Credit Suisse expects to receive or intends to seek investment banking related compensation from the subject company (FTS.TO) within the next 3 months.

Credit Suisse has received compensation for products and services other than investment banking services from the subject company (FTS.TO) within the past 12 months.

Important Regional Disclosures

Singapore recipients should contact a Singapore financial adviser for any matters arising from this research report.

An analyst involved in the preparation of this report has visited certain material operations of the subject company (FTS.TO) within the past 12 months. The analyst may not have visited all material operations of the subject company. The travel expenses of the analyst in connection with such visits were not paid or reimbursed by the subject company, other than de minimus local travel expenses.

Restrictions on certain Canadian securities are indicated by the following abbreviations: NVS--Non-Voting shares; RVS--Restricted Voting Shares; SVS--Subordinate Voting Shares.

Individuals receiving this report from a Canadian investment dealer that is not affiliated with Credit Suisse should be advised that this report may not contain regulatory disclosures the non-affiliated Canadian investment dealer would be required to make if this were its own report.

For Credit Suisse Securities (Canada), Inc.'s policies and procedures regarding the dissemination of equity research, please visit http://www.csfb.com/legal_terms/canada_research_policy.shtml.

As of the date of this report, Credit Suisse acts as a market maker or liquidity provider in the equities securities that are the subject of this report.

Principal is not guaranteed in the case of equities because equity prices are variable.

Commission is the commission rate or the amount agreed with a customer when setting up an account or at anytime after that.

CS may have issued a Trade Alert regarding this security. Trade Alerts are short term trading opportunities identified by an analyst on the basis of market events and catalysts, while stock ratings reflect an analyst's investment recommendations based on expected total return over a 12-month period relative to the relevant coverage universe. Because Trade Alerts and stock ratings reflect different assumptions and analytical methods, Trade Alerts may differ directionally from the analyst's stock rating.

The author(s) of this report maintains a CS Model Portfolio that he/she regularly adjusts. The security or securities discussed in this report may be a component of the CS Model Portfolio and subject to such adjustments (which, given the composition of the CS Model Portfolio as a whole, may differ from the recommendation in this report, as well as opportunities or strategies identified in Trading Alerts concerning the same security). The CS Model Portfolio and important disclosures about it are available at www.credit-suisse.com/ti.

To the extent this is a report authored in whole or in part by a non-U.S. analyst and is made available in the U.S., the following are important disclosures regarding any non-U.S. analyst contributors:

Disclaimers continue on next page.

This report is not directed to, or intended for distribution to or use by, any person or entity who is a citizen or resident of or located in any locality, state, country or other jurisdiction where such distribution, publication, availability or use would be contrary to law or regulation or which would subject Credit Suisse AG, the Swiss bank, or its subsidiaries or its affiliates ("CS") to any registration or licensing requirement within such jurisdiction. All material presented in this report, unless specifically indicated otherwise, is under copyright to CS. None of the material, nor its content, nor any copy of it, may be altered in any way, transmitted to, copied or distributed to any other party, without the prior express written permission of CS. All trademarks, service marks and logos used in this report are trademarks or service marks or registered trademarks or service marks of CS or its affiliates.

The information, tools and material presented in this report are provided to you for information purposes only and are not to be used or considered as an offer or the solicitation of an offer to sell or to buy or subscribe for securities or other financial instruments. CS may not have taken any steps to ensure that the securities referred to in this report are suitable for any particular investor. CS will not treat recipients as its customers by virtue of their receiving the report. The investments or services contained or referred to in this report may not be suitable for you and it is recommended that you consult an independent investment advisor if you are in doubt about such investments or investment services. Nothing in this report constitutes investment, legal, accounting or tax advice or a representation that any investment or strategy is suitable or appropriate to your individual circumstances or otherwise constitutes a personal recommendation to you. CS does not offer advice on the tax consequences of investment and you are advised to contact an independent tax adviser. Please note in particular that the bases and levels of taxation may change.

CS believes the information and opinions in the Disclosure Appendix of this report are accurate and complete. Information and opinions presented in the other sections of the report were obtained or derived from sources CS believes are reliable, but CS makes no representations as to their accuracy or completeness. Additional information is available upon request. CS accepts no liability for loss arising from the use of the material presented in this report, except that this exclusion of liability does not apply to the extent that liability arises under specific statutes or regulations applicable to CS. This report is not to be relied upon in substitution for the exercise of independent judgment. CS may have issued, and may in the future issue, a trading call regarding this security. Trading calls are short term trading opportunities based on market events and catalysts, while stock ratings reflect investment recommendations based on expected total return over a 12-month period as defined in the disclosure section. Because trading calls and stock ratings reflect different assumptions and analytical methods, trading calls may differ directionally from the stock rating. In addition, CS may have issued, and may in the future issue, other reports that are inconsistent with, and reach different conclusions from, the information presented in this report. Those reports reflect the different assumptions, views and analytical methods of the analysts who prepared them and CS is under no obligation to ensure that such other reports are brought to the attention of any recipient of this report. CS is involved in many businesses that relate to companies mentioned in this report. These businesses include specialized trading, risk arbitrage, market making, and other proprietary trading.

Past performance should not be taken as an indication or guarantee of future performance, and no representation or warranty, express or implied, is made regarding future performance. Information, opinions and estimates contained in this report reflect a judgement at its original date of publication by CS and are subject to change without notice. The price, value of and income from any of the securities or financial instruments mentioned in this report can fall as well as rise. The value of securities and financial instruments is subject to exchange rate fluctuation that may have a positive or adverse effect on the price or income of such securities or financial instruments. Investors in securities such as ADR's, the values of which are influenced by currency volatility, effectively assume this risk.

Structured securities are complex instruments, typically involve a high degree of risk and are intended for sale only to sophisticated investors who are capable of understanding and assuming the risks involved. The market value of any structured security may be affected by changes in economic, financial and political factors (including, but not limited to, spot and forward interest and exchange rates), time to maturity, market conditions and volatility, and the credit quality of any issuer or reference issuer. Any investor interested in purchasing a structured product should conduct their own investigation and analysis of the product and consult with their own professional advisers as to the risks involved in making such a purchase.

Some investments discussed in this report have a high level of volatility. High volatility investments may experience sudden and large falls in their value causing losses when that investment is realised. Those losses may equal your original investment. Indeed, in the case of some investments the potential losses may exceed the amount of initial investment, in such circumstances you may be required to pay more money to support those losses. Income yields from investments may fluctuate and, in consequence, initial capital paid to make the investment may be used as part of that income yield. Some investments may not be readily realisable and it may be difficult to sell or realise those investments, similarly it may prove difficult for you to obtain reliable information about the value, or risks, to which such an investment is exposed.

- **Earnings shifts:** For several reasons, we made a number of revisions to our Fortis Inc. financial model. Our changes focused on several changes ahead of the forthcoming Q1 results. We have not changed our annual earnings estimates, however, the dispersion of net earnings has changed through the quarters. The most significant change was a shift in earnings estimate for Q1 2010 from C\$0.69 to C\$0.60 and for Q4 2010 from C\$0.50 to C\$0.54. For greater details, please refer to our Q1 2010 earnings preview entitled "*Starting out 2010: Q1 earnings preview*".

The analyst(s) responsible for preparing this research report received compensation that is based upon various factors including Credit Suisse's total revenues, a portion of which are generated by Credit Suisse's investment banking activities.

Analysts' stock ratings are defined as follows:

Outperform (O): The stock's total return is expected to outperform the relevant benchmark* by at least 10-15% (or more, depending on perceived risk) over the next 12 months.

Neutral (N): The stock's total return is expected to be in line with the relevant benchmark* (range of $\pm 10-15\%$) over the next 12 months.

Underperform (U): The stock's total return is expected to underperform the relevant benchmark* by 10-15% or more over the next 12 months.

*Relevant benchmark by region: As of 29th May 2009, Australia, New Zealand, U.S. and Canadian ratings are based on (1) a stock's absolute total return potential to its current share price and (2) the relative attractiveness of a stock's total return potential within an analyst's coverage universe**, with Outperforms representing the most attractive, Neutrals the less attractive, and Underperforms the least attractive investment opportunities. Some U.S. and Canadian ratings may fall outside the absolute total return ranges defined above, depending on market conditions and industry factors. For Latin American, Japanese, and non-Japan Asia stocks, ratings are based on a stock's total return relative to the average total return of the relevant country or regional benchmark; for European stocks, ratings are based on a stock's total return relative to the analyst's coverage universe**. For Australian and New Zealand stocks a 22% and a 12% threshold replace the 10-15% level in the Outperform and Underperform stock rating definitions, respectively, subject to analysts' perceived risk. The 22% and 12% thresholds replace the +10-15% and -10-15% levels in the Neutral stock rating definition, respectively, subject to analysts' perceived risk.

**An analyst's coverage universe consists of all companies covered by the analyst within the relevant sector.

Restricted (R): In certain circumstances, Credit Suisse policy and/or applicable law and regulations preclude certain types of communications, including an investment recommendation, during the course of Credit Suisse's engagement in an investment banking transaction and in certain other circumstances.

Volatility Indicator [V]: A stock is defined as volatile if the stock price has moved up or down by 20% or more in a month in at least 8 of the past 24 months or the analyst expects significant volatility going forward.

Analysts' coverage universe weightings are distinct from analysts' stock ratings and are based on the expected performance of an analyst's coverage universe* versus the relevant broad market benchmark**:

Overweight: Industry expected to outperform the relevant broad market benchmark over the next 12 months.

Market Weight: Industry expected to perform in-line with the relevant broad market benchmark over the next 12 months.

Underweight: Industry expected to underperform the relevant broad market benchmark over the next 12 months.

*An analyst's coverage universe consists of all companies covered by the analyst within the relevant sector.

**The broad market benchmark is based on the expected return of the local market index (e.g., the S&P 500 in the U.S.) over the next 12 months.

Credit Suisse's distribution of stock ratings (and banking clients) is:

Global Ratings Distribution		
Outperform/Buy*	44%	(61% banking clients)
Neutral/Hold*	42%	(60% banking clients)
Underperform/Sell*	13%	(55% banking clients)
Restricted	2%	

*For purposes of the NYSE and NASD ratings distribution disclosure requirements, our stock ratings of Outperform, Neutral, and Underperform most closely correspond to Buy, Hold, and Sell, respectively; however, the meanings are not the same, as our stock ratings are determined on a relative basis. (Please refer to definitions above.) An investor's decision to buy or sell a security should be based on investment objectives, current holdings, and other individual factors.

Credit Suisse's policy is to update research reports as it deems appropriate, based on developments with the subject company, the sector or the market that may have a material impact on the research views or opinions stated herein.

Credit Suisse's policy is only to publish investment research that is impartial, independent, clear, fair and not misleading. Credit Suisse does not provide any tax advice. Any statement herein regarding any US federal tax is not intended or written to be used, and cannot be used, by any taxpayer for the purposes of avoiding any penalties.

See the Companies Mentioned section for full company names.

Price Target: (12 months) for (FTS.TO)

Method: We obtain our C\$30.00 target price for Fortis Inc. by using multiple valuation methodologies, yield base analysis, and discounted cash flow. Our target price implies a P/E (price/earnings) multiple of 17.0x our 2011 EPS (earnings per share) estimate of C\$1.80 and an EV/EBITDA (enterprise value/earnings before interest, taxes, depreciation, and amortization) multiple of 9.8x our EBITDA estimate.

Risks: There are a number of risks to Fortis' achievement of our C\$30.00 target price: commodity prices; weather; environmental; regulatory; access to capital markets; and, interest rates. Moreover, one should never underestimate the power of the regulator in any regulated business.

Please refer to the firm's disclosure website at www.credit-suisse.com/researchdisclosures for the definitions of abbreviations typically used in the target price method and risk sections.

See the Companies Mentioned section for full company names.

The subject company (FTS.TO) currently is, or was during the 12-month period preceding the date of distribution of this report, a client of Credit Suisse.

Credit Suisse provided investment banking services to the subject company (FTS.TO) within the past 12 months.

Credit Suisse provided non-investment banking services, which may include Sales and Trading services, to the subject company (FTS.TO) within the past 12 months.

Credit Suisse expects to receive or intends to seek investment banking related compensation from the subject company (FTS.TO) within the next 3 months.

Credit Suisse has received compensation for products and services other than investment banking services from the subject company (FTS.TO) within the past 12 months.

Important Regional Disclosures

Singapore recipients should contact a Singapore financial adviser for any matters arising from this research report.

An analyst involved in the preparation of this report has visited certain material operations of the subject company (FTS.TO) within the past 12 months. The analyst may not have visited all material operations of the subject company. The travel expenses of the analyst in connection with such visits were not paid or reimbursed by the subject company, other than de minimus local travel expenses.

Restrictions on certain Canadian securities are indicated by the following abbreviations: NVS--Non-Voting shares; RVS--Restricted Voting Shares; SVS--Subordinate Voting Shares.

Individuals receiving this report from a Canadian investment dealer that is not affiliated with Credit Suisse should be advised that this report may not contain regulatory disclosures the non-affiliated Canadian investment dealer would be required to make if this were its own report.

For Credit Suisse Securities (Canada), Inc.'s policies and procedures regarding the dissemination of equity research, please visit http://www.csfb.com/legal_terms/canada_research_policy.shtml.

As of the date of this report, Credit Suisse acts as a market maker or liquidity provider in the equities securities that are the subject of this report.

Principal is not guaranteed in the case of equities because equity prices are variable.

Commission is the commission rate or the amount agreed with a customer when setting up an account or at anytime after that.

CS may have issued a Trade Alert regarding this security. Trade Alerts are short term trading opportunities identified by an analyst on the basis of market events and catalysts, while stock ratings reflect an analyst's investment recommendations based on expected total return over a 12-month period relative to the relevant coverage universe. Because Trade Alerts and stock ratings reflect different assumptions and analytical methods, Trade Alerts may differ directionally from the analyst's stock rating.

The author(s) of this report maintains a CS Model Portfolio that he/she regularly adjusts. The security or securities discussed in this report may be a component of the CS Model Portfolio and subject to such adjustments (which, given the composition of the CS Model Portfolio as a whole, may differ from the recommendation in this report, as well as opportunities or strategies identified in Trading Alerts concerning the same security). The CS Model Portfolio and important disclosures about it are available at www.credit-suisse.com/ti.

To the extent this is a report authored in whole or in part by a non-U.S. analyst and is made available in the U.S., the following are important disclosures regarding any non-U.S. analyst contributors:

This report is not directed to, or intended for distribution to or use by, any person or entity who is a citizen or resident of or located in any locality, state, country or other jurisdiction where such distribution, publication, availability or use would be contrary to law or regulation or which would subject Credit Suisse AG, the Swiss bank, or its subsidiaries or its affiliates ("CS") to any registration or licensing requirement within such jurisdiction. All material presented in this report, unless specifically indicated otherwise, is under copyright to CS. None of the material, nor its content, nor any copy of it, may be altered in any way, transmitted to, copied or distributed to any other party, without the prior express written permission of CS. All trademarks, service marks and logos used in this report are trademarks or service marks or registered trademarks or service marks of CS or its affiliates.

The information, tools and material presented in this report are provided to you for information purposes only and are not to be used or considered as an offer or the solicitation of an offer to sell or to buy or subscribe for securities or other financial instruments. CS may not have taken any steps to ensure that the securities referred to in this report are suitable for any particular investor. CS will not treat recipients as its customers by virtue of their receiving the report. The investments or services contained or referred to in this report may not be suitable for you and it is recommended that you consult an independent investment advisor if you are in doubt about such investments or investment services. Nothing in this report constitutes investment, legal, accounting or tax advice or a representation that any investment or strategy is suitable or appropriate to your individual circumstances or otherwise constitutes a personal recommendation to you. CS does not offer advice on the tax consequences of investment and you are advised to contact an independent tax adviser. Please note in particular that the bases and levels of taxation may change.

CS believes the information and opinions in the Disclosure Appendix of this report are accurate and complete. Information and opinions presented in the other sections of the report were obtained or derived from sources CS believes are reliable, but CS makes no representations as to their accuracy or completeness. Additional information is available upon request. CS accepts no liability for loss arising from the use of the material presented in this report, except that this exclusion of liability does not apply to the extent that liability arises under specific statutes or regulations applicable to CS. This report is not to be relied upon in substitution for the exercise of independent judgment. CS may have issued, and may in the future issue, a trading call regarding this security. Trading calls are short term trading opportunities based on market events and catalysts, while stock ratings reflect investment recommendations based on expected total return over a 12-month period as defined in the disclosure section. Because trading calls and stock ratings reflect different assumptions and analytical methods, trading calls may differ directionally from the stock rating. In addition, CS may have issued, and may in the future issue, other reports that are inconsistent with, and reach different conclusions from, the information presented in this report. Those reports reflect the different assumptions, views and analytical methods of the analysts who prepared them and CS is under no obligation to ensure that such other reports are brought to the attention of any recipient of this report. CS is involved in many businesses that relate to companies mentioned in this report. These businesses include specialized trading, risk arbitrage, market making, and other proprietary trading.

Past performance should not be taken as an indication or guarantee of future performance, and no representation or warranty, express or implied, is made regarding future performance. Information, opinions and estimates contained in this report reflect a judgement at its original date of publication by CS and are subject to change without notice. The price, value of and income from any of the securities or financial instruments mentioned in this report can fall as well as rise. The value of securities and financial instruments is subject to exchange rate fluctuation that may have a positive or adverse effect on the price or income of such securities or financial instruments. Investors in securities such as ADR's, the values of which are influenced by currency volatility, effectively assume this risk.

Structured securities are complex instruments, typically involve a high degree of risk and are intended for sale only to sophisticated investors who are capable of understanding and assuming the risks involved. The market value of any structured security may be affected by changes in economic, financial and political factors (including, but not limited to, spot and forward interest and exchange rates), time to maturity, market conditions and volatility, and the credit quality of any issuer or reference issuer. Any investor interested in purchasing a structured product should conduct their own investigation and analysis of the product and consult with their own professional advisers as to the risks involved in making such a purchase.

Some investments discussed in this report have a high level of volatility. High volatility investments may experience sudden and large falls in their value causing losses when that investment is realised. Those losses may equal your original investment. Indeed, in the case of some investments the potential losses may exceed the amount of initial investment, in such circumstances you may be required to pay more money to support those losses. Income yields from investments may fluctuate and, in consequence, initial capital paid to make the investment may be used as part of that income yield. Some investments may not be readily realisable and it may be difficult to sell or realise those investments, similarly it may prove difficult for you to obtain reliable information about the value, or risks, to which such an investment is exposed.

Continuing capital expenditures

- **Earnings review:** Fortis reported Q1 2010 EPS (FD) of C\$0.56 that missed our C\$0.60 estimate and that of the Street's view of C\$0.586 and the low end of the C\$0.55-C\$0.68 range. The miss versus ours was based on several factors such as lower earnings from Newfoundland Power and the Caribbean. We do not place undue emphasis on quarterly results in much of our universe as a result of the inherently long-cycle nature of many assets. Despite the slight quarterly miss, our focus is largely upon the company's continuing significant regulated capital plan and the positive upward bias to regulated returns.
- **Significant organic growth continues:** As expected, Fortis continued to provide a robust outlook for its utility capital program. The company expects consolidated gross capital expenditures to be nearly C\$1.1bn for 2010 and about C\$5bn over the next five years. Roughly 70% of the total amount is targeted to come from regulated electric utilities and 27% allocated to the Terasen Gas entities.
- **Improving capital market conditions:** Historically, Fortis has been very adept at acquisitions. Corporate growth has benefited from the company's ability to successfully acquire and integrate selected assets. In our view, the company is well positioned in the current market for various acquisition opportunities.
- **Valuation:** As a result of the quarter, we revised our EPS estimates for 2010 from C\$1.70 to C\$1.68. Our C\$30.00 target price and Neutral rating are obtained utilizing multiple valuation methodologies, including: a 17.0x P/E multiple of 2011 earnings; a 1.63x book value multiple; and, a DCF based valuation. We reiterate our Neutral rating.

DISCLOSURE APPENDIX CONTAINS IMPORTANT DISCLOSURES, ANALYST CERTIFICATIONS, INFORMATION ON TRADE ALERTS, ANALYST MODEL PORTFOLIOS AND THE STATUS OF NON-U.S. ANALYSTS. U.S. Disclosure: Credit Suisse does and seeks to do business with companies covered in its research reports. As a result, investors should be aware that the Firm may have a conflict of interest that could affect the objectivity of this report. Investors should consider this report as only a single factor in making their investment decision.

Fortis reported Q1 2010 EPS (FD) of C\$0.56 that missed our C\$0.60 estimate and that of the Street's view of C\$0.586 and the low end of the C\$0.55-C\$0.68 range. The miss versus ours was based on several factors such as lower earnings from Newfoundland Power and the Caribbean. We do not place undue emphasis on quarterly results in much of our universe as a result of the inherently long-cycle nature of many assets. Despite the slight quarterly miss, our Fortis focus is largely upon the continuing significant regulated capital plan and the positive upward bias to regulated returns. This research note is divided into three parts: (a) results; (b) outlook; and, (c) valuation. Each of these areas will be addressed in greater detail below.

An earnings miss

Results

Exhibit 1 highlights the segmented unadjusted earnings contributions for the most recent quarter and for the comparable period one year ago. Our commentary for each segment appears under the various headings below.

Exhibit 1: Segmented unadjusted earnings contribution

C\$ in millions, unless otherwise stated

	Q1 2010	Q1 2009	chg y/y
Regulated Gas Utilities - Canadian	73	58	26%
Regulated Electric Utilities - Canadian	40	37	8%
Regulated Electric Utilities - Caribbean	4	6	-33%
Non-regulated - Fortis Generation	2	6	-67%
Non-regulated - Fortis Properties	2	2	0%
Corporate and other	(21)	(17)	-24%
Net earnings applicable to common shares	100	92	9%

Source: Company data and Credit Suisse

Regulated Gas Utilities - Canadian

The unadjusted earnings for this segment increased by roughly 26% year-over-year (see Exhibit 2). Some notable items for the regulated gas utilities, include:

- Net customer additions were 1,566 during Q1 2010 versus net addition of 2,256 during Q1 2009;
- The amount of additions declined versus Q1 2009 due to customer disconnections because of warmer weather and the growth of multi-family housing where natural gas is use less compared to single-family housing; and,
- Sales volumes across customer classes declined as did transportation volumes.

Exhibit 2: Regulated Gas Utilities (unadjusted)

	Q1 2010	Q1 2009	chg y/y
Terasen Gas	73.0	58.0	26%

Source: Company data and Credit Suisse

Regulated Electric Utilities – Canadian

This segment consists of operating companies such as FortisBC, FortisAlberta, Newfoundland Power and Other Canadian Electric Utilities, which includes Maritime Electric and FortisOntario. Detailed contributions for each of these divisions can be found in Exhibit 3.

Exhibit 3: Regulated electric utilities – Canadian contribution (unadjusted)

C\$ in millions, unless otherwise stated

	Q1 2010	Q1 2009	chg y/y
FortisBC	14	14	0%
FortisAlberta	14	12	17%
Newfoundland Power	7	6	17%
Other Cdn Electric Utilities	5	5	0%
Earnings	40	37	8%

Source: Company data and Credit Suisse

FortisBC

Segmented earnings at FortisBC was flat compared to the same period last year. See Exhibit 4 for selected highlights.

Decrease energy deliveries in BC

Exhibit 4: Selected FortisBC performance highlights (unadjusted)

	Q1 2010	Q1 2009	chg y/y
Energy deliveries (GWh)	820	903	-9%
Revenue (C\$/MWh)	87.80	79.73	10%
Energy supply costs (C\$/MWh)	25.61	24.36	5%
Operating expenses (C\$/MWh)	20.73	18.83	10%
Gross margin (C\$/MWh)	41.46	36.54	13%
Earnings (C\$millions)	14	14	0%

Source: Company data and Credit Suisse

FortisAlberta

Earnings at this regulated utility increased by approximately 17% comparing Q1 2010 versus the prior period which was largely the result of an increased capital base and improved regulated returns. See Exhibit 5 for selected highlights.

Slight decrease in energy delivery in Alberta

Exhibit 5: Selected FortisAlberta performance highlights (unadjusted)

	Q1 2010	Q1 2009	chg y/y
Energy deliveries (GWh)	4,109	4,152	-1%
Revenue (C\$/MWh)	21.17	19.03	11%
Operating expenses (C\$/MWh)	8.52	8.19	4%
Gross margin (C\$/MWh)	12.66	10.84	17%
Earnings (C\$millions)	14	12	17%

Source: Company data and Credit Suisse

Newfoundland Power

This segment's earnings generation increased by roughly 17% comparing Q1 2010 versus Q1 2009. Energy deliveries were up slightly by approximately 2% (see Exhibit 6).

Slight increase in NP's energy deliveries

Exhibit 6: Selected Newfoundland Power performance highlights (unadjusted)

	Q1 2010	Q1 2009	chg y/y
Energy deliveries (GWh)	1,795	1,763	2%
Revenue (C\$/MWh)	99.16	95.86	3%
Energy supply costs (C\$/MWh)	72.98	72.04	1%
Operating expenses (C\$/MWh)	8.91	7.94	12%
Gross margin (C\$/MWh)	17.27	15.88	9%
Earnings (C\$millions)	7	6	17%

Source: Company data, Credit Suisse estimates

Other Canadian Electric Utilities

The roughly 3% increase in energy deliveries was the result of the Algoma Power Inc. acquisition (previously Great Lakes Power Distribution Inc.). Without that acquisition, energy deliveries actually decreased by 6.2% year over year. Exhibit 7 contains selected highlights.

Increased in energy deliveries

Exhibit 7: Selected Other Canadian Electric Utilities performance highlights (unadjusted)

	Q1 2010	Q1 2009	chg y/y
Energy deliveries (GWh)	632	616	3%

Gross margin (C\$/MWh)	28.48	25.97	10%
Earnings (C\$millions)	5	5	0%

Source: Company data and Credit Suisse

Regulated Electric Utilities – Caribbean

This segment includes Belize Electricity, Caribbean Utilities, and Fortis Turks and Caicos. Earnings for this segment declined by roughly 33% compared to the same quarter last year. Notably, energy deliveries increased by 4% on a year-over-year comparison. Aside from some regulatory matters discussed below, economic conditions may have stabilized/improved with a “relatively strong winter tourist season experienced in the Turks and Caicos Islands in 2010”. On the regulatory front, the ongoing situation with Belize Electricity requires a degree of monitoring. In brief, the utility received an adverse regulatory decision relating to a rate application. Moreover, there have been changes to the electricity legislation in Belize that have been challenged by the Fortis-owned utility. The company stated

“Changes made in electricity legislation by the Government of Belize and the PUC, and the PUC’s June 2008 Final Decision on Belize Electricity’s 2008/2009 Rate Application and the PUC’s amendment to the June 2008 Final Decision (the “Amendment”), which were based on the changed legislation, have been judicially challenged by Belize Electricity in several proceedings. The judicial process is ongoing with interim rulings, judgments and appeals. The timing or likely final outcome of the proceedings is indeterminable at this time. In 2009, the Supreme Court of Belize issued an injunction against the Amendment until Belize Electricity’s appeal of the June 2008 Final Decision has been heard in court. The court appeal of the June 2008 Final Decision was called in early October 2009 but, after considering some preliminary matters, the trial judge postponed the case for a date to be determined.”

Belize situation requires ongoing monitoring

“In April 2010, Belize Electricity filed its annual tariff review proceeding application for the annual tariff period from July 1, 2010 through June 30, 2011. The application requests changes to various components of the electric rate, while maintaining the average electricity rate at BZ44.1 cents per kWh.”

See Exhibit 8 below for selected highlights.

Exhibit 8: Caribbean - Regulated Electric Utilities performance highlights (unadjusted)

	Q1 2010	Q1 2009	chg y/y
Energy deliveries (GWh)	256	247	4%
Revenue (C\$/MWh)	296.88	336.03	-12%
Energy supply costs (C\$/MWh)	175.78	186.23	-6%
Operating expenses (C\$/MWh)	46.88	56.68	-17%
Gross margin (C\$/MWh)	74.22	93.12	-20%
Earnings (C\$millions)	4	6	-33%

Source: Company data and Credit Suisse

Non-regulated – Fortis Generation

The non-regulated generation assets within this segment are located in Belize, British Columbia, Central Newfoundland and Upper New York State. Earnings for the segment were lower by 67% from the current quarter compared to the same quarter last year. The decrease was primarily related to the loss in earnings from the expiration of the power-for-water agreement related to the Rankine facility and the reduced Belize production. See the table below for selected highlights.

Exhibit 9: Non-regulated generation – selected highlights

	Q1 2010	Q1 2009	chg y/y
Energy deliveries (GWh)	64	257	-75%
Revenue (C\$/MWh)	78.13	62.26	25%
Energy supply costs (C\$/MWh)	-	3.89	-100%
Operating expenses (C\$/MWh)	31.25	15.56	101%
Gross margin (C\$/MWh)	46.88	42.80	10%
Earnings (C\$millions)	2	6	-67%

Source: Company data and Credit Suisse

Non-regulated – Fortis Properties

Fortis Properties' net unadjusted earning contribution during the quarter was C\$2m which is similar to earnings in Q1 2009. REVPAR decreased to C\$62.93 from C\$64.40 for the comparable period last year. Additionally, the occupancy rate of the Real Estate Division was slightly down at 95.8% versus last year's 96.0%.

Corporate

Corporate expenses increased to C\$21 million in Q1 2010 from C\$17m in Q1 2009.

Outlook

We continue to believe investor, whether existing or prospective, should consider several major issues, including (a) funding organic growth; (b) rising returns; and, (c) acquisition trail. Each of these issues is addressed below.

Funding organic growth

In the most recent quarter the company's reported capital expenditures totaled C\$188 million, of which C\$182 million was spent at regulated utilities. Fortis maintains that capital expenditures for 2010 will be approximately C\$1.1 billion, a roughly 7% increase from 2008's C\$1.024 billion. A majority of the total will be spent on Western Canadian assets (Terasen Gas, FortisAlberta, and FortisBC). The company's expectations continue to be for consolidated gross capital expenditures over 5 years (2010-2014) approaching C\$5bn with 70% of that total amount being allocated to regulated utilities. Both FortisAlberta and FortisBC will receive the vast majority of that amount; whereas, the regulated gas utilities are planned to receive 27% of the total capex amount. Three percent is expected to be at the non-regulated operations. Given the regulated rates of return with utility capital expenditures, the increases should be viewed as longer-term positives provided an appropriate financial balance is struck.

Ongoing organic growth

With the significant current relative valuation advantages, we believe that Fortis may become more motivated to explore possible capital efficiency initiatives. In our view, the company possesses ample opportunities to become much more capital efficient. One strategy involves divesting certain non-utility assets and redeploying capital into utility assets or funding the capital program. Another option would entail divesting partial interests in selected utility assets in an asset management model approach and receiving a management fee.

In fact, some of the media reports prior to the official announcement of PPL Corporation's acquisition of E.ON's Kentucky utility assets for US\$7.625 billion stated that a consortium led by Fortis Inc. was one of three finalists for those assets. We would regard that type of information in media reports as being something akin to an asset management style of approach. Ultimately, we believe that such a strategy would help Fortis generate a higher level of returns. Additionally, the use of an asset management type approach would make large acquisitions which could potentially further accelerate growth.

Opportunities for improved capital efficiency

Generally, we continue to prefer pure-play utility companies without an undue amount of non-core asset exposure. Historically, non-core assets (especially real estate) have been somewhat commonplace for many utilities. Fortis has been no exception to that approach. Notably, the mix of commercial and hospitality real estate assets held by Fortis have been positive contributors and also provide the company a bit of financial flexibility for a selection of reasons. In light of current market conditions, we believe there is a much less compelling case for the monetization of these assets than as in the past. We note Fortis Properties continues to increase in scale and scope which may eventually make it more attractive for acquisition or monetization. Yet, for a number of reasons, we continue to believe there is a rather low probability of either of those events occurring.

Even discounting the potential monetization of assets that we would consider to be non-core, we believe Fortis possesses considerable potential to become much more capital efficient. Given the significant interest in infrastructure assets by many investors seeking long-dated types of return, Fortis could easily divest portions of its existing asset base to pension fund investors and charge a management fee for their operational and management expertise. This type of approach could significantly improve capital efficiency and returns on capital. In addition, this asset management approach could also free-up capital that could be used to fund the existing capital program or fund future acquisitions.

Capital efficiency initiatives could aid funding of acquisitions or the existing capital program funding

Rising returns

Positively, Fortis has been successful in obtaining several favourable regulatory decisions. For example, the allowed equity at Terasen Gas Inc. (TGI) was boosted from 35% to 40% effective January 1, 2010. In addition to that positive move for the equity base, the allowed return on equity for TGI increased from 8.47% to 9.50%. In a related judgment, Terasen Gas (Vancouver Island) Inc. (TGVI) and Terasen Gas Whistler Inc. (TGWI) returns increased from 9.17% to 10%. Additionally, the British Columbia Utilities Commission (BCUC) held the former automatic adjustment mechanism for annual ROE determination would no longer apply. Also in BC, FortisBC obtained an increased allowed ROE from 8.87% to 9.90% that became effective on January 1, 2010. The upward bias in utility returns should be viewed positively. Clearly, many questions exist as to the methods for determining and predicting future return levels. Yet, we view the regulatory movement away from a very mechanical return approach work as a notable positive that should help ensure an appropriate level of returns over a period of time.

Similar to the BCUC, the Alberta Utilities Commission (AUC) issued a decision on the 2009 Generic Cost of Capital establishing a 9% ROE for utilities like FortisAlberta in 2009 and 2010. Under the previous formulaic approach, that utility would have been entitled to an 8.61% return. Moreover, the allowed equity within the regulated capital structure moved from 37% to 41% effective January 1, 2009. Notably, this return framework will be in effect for 2011 providing a level of certainty to FortisAlberta's future earnings.

Unfortunately, not every jurisdiction is proving to be as progressive as Alberta, BC and the National Energy Board regulated Trans-Quebec & Maritimes Pipeline decision (see file RH-1-2008 and our March 19, 2009 note “*Regulatory round-up*”). The Newfoundland and Labrador Board of Commissioners of Public Utilities (PUB) most recent decision increased the allowed ROE for Newfoundland Power from 8.95% in 2009 to 9% in 2010. Additionally, in the past, the PUB ordered Newfoundland Power’s allowed ROEs for 2011 and 2012 would be determined by an automated formula that will be subject to review in Q1 2010. We do not need to belabour all of the regulatory developments, however, we note that returns are slowly biasing to the upside. The only challenge with the upward bias is that it comes at a time of potentially rising interest rates.

Acquisition trail

In our view, Fortis continues to demonstrate a rather impressive ability to successfully integrate acquisitions. Additionally, we view acquisitions as somewhat central to the company’s growth strategy. For instance, the company’s most recent Management Discussion and Analysis stated “The Corporation continues to pursue acquisitions for profitable growth, focusing on strategic opportunities to acquire regulated electric and natural gas electric utilities in the United States, Canada and the Caribbean. Fortis will also pursue growth in its non-regulated businesses in support of its regulated utility growth strategy.” Given the success of Fortis in past transactions, as measured in terms of financials, share price and operationally, we believe the company’s current valuation and skill set may lead to some potentially value creating acquisition activity (see Exhibit 10 below for select Fortis M&A transactions).

Exhibit 10: Selected Fortis M&A transactions

\$ in millions, unless otherwise stated

Announced Date	Asset/Company	Deal value (\$m)	Comment
7/22/2009	Caribbean Utilities Co.	CAD 6.74	Acquired an additional 2.7% of Caribbean Utilities Co.
6/23/2009	Great Lakes Power Distribution	CAD 68.00	Acquired from Brookfield the utility that serves the District of Algoma in northern Ontario.
10/1/2008	Grimsby Power Inc.	CAD 1.10	Acquired a 10% minority interest.
10/1/2008	Caribbean Utilities Co.	CAD 3.00	Acquired an additional 1% of Caribbean Utilities Co.
8/15/2008	Caribbean Utilities Co.	CAD 25.00	Acquired an additional 2% of Caribbean Utilities Co.
7/23/2007	Delta Regina	CAD 49.95	Delta hotel located in Regina, Saskatchewan.
2/26/2007	Terasen Inc.	CAD 3,700.00	Gas distribution in British Columbia.
11/7/2006	Caribbean Utilities Co.	CAD 55.70	Acquired an additional 16% of Caribbean Utilities Co.
10/19/2006	4 hotels in western Canada	CAD 51.60	4 hotels (Holiday Inn, Best Western and Ramada) located in BC and Alberta.
8/28/2006	PPC Ltd & Atlantic Equipment & Power (Turks & Caicos) Ltd.	CAD 97.70	Electric utility that services ~80% of the Turks and Caicos Islands.
1/25/2005	3 hotels in western Canada	CAD 62.60	3 hotels in Western Canada from Greenwood Inns (Calgary, Edmonton and Winnipeg).
12/15/2004	Princeton Light & Power	CAD 3.70	PLP is an electric utility that services Princeton, BC.
5/21/2004	Belize Electric Company Ltd.	USD 3.50	Acquired the remaining 5% interest of the company.
9/17/2003	4 hotels in Ontario	CAD 43.20	4 hotels located in Ontario (Cambridge, Kitchener, Sarnia and Peterborough).
9/15/2003	Alberta Utility & British Columbia Utility (from Aquila)	CAD 1,500.00	BC and Alberta units of Aquila Inc.
2/26/2003	Granite Power Corp	CAD 8.80	Company consist of Granite Power Distribution & Granite Power Generation.
1/30/2003	Caribbean Utilities Co.	CAD 71.00	Acquired additional 3,863,695 Class A Ordinary Shares, representing approximately 15.9 per cent of the outstanding shares of the company and increased Fortis’ holding to roughly 38%.
12/1/2002	Delta St John’s Hotel and conference centre	CAD 25.90	Hotel in downtown St. John’s, Newfoundland
5/9/2002	Cornwall Street Railway Light	CAD 67.70	City of Cornwall electric transmission & distribution utility.
4/16/2002	Kings Place	CAD 27.70	Commercial property in Fredericton, NB.
3/13/2002	Caribbean Utilities Co.	CAD 12.90	Acquired additional ~2% of the company.
3/20/2002	Niagara Power Co.	CAD 49.00	Purchase remaining 50% of Niagara Power Co.
2/1/2002	Cabot palace I	CAD 14.30	133,327 Square feet premium office tower in St. John’s, Newfoundland
9/18/2001	Portfolio of properties in St. John’s	CAD 8.30	Purchased TD Place commercial bldg and 6 parcels of land.
9/14/2001	Aliant Poles	CAD 46.00	Purchased 102,000 poles and related infrastructure from Aliant Telecom.
1/26/2001	Belize Electric Company Ltd.	USD 62.00	Acquired 95% of company from Duke Energy.
12/19/2000	2 Hydro generating stations	CAD 6.90	2 generating stations (6.88MW) in upper New York state.
12/14/2000	Brunswick Square Ltd.	CAD 6.20	Acquired 50% of the company Fortis doesn’t own.
12/1/2000	Fort William Building and Blue cross centre	CAD 52.70	Fort William building in St. John’s, Newfoundland and Blue cross centre in Moncton, New Brunswick.

12/30/1999	2 Hydro generating stations	CAD 19.77	2 generating stations (16MW) in upper New York state (Moose River & Philadelphia)
10/28/1999	Belize Electricity Ltd.	CAD 36.80	Acquired 67% interest in the main commercial generator, transmitter & distributor of electricity in Belize.
8/31/1999	Brunswick Square Ltd.	CAD 10.12	Acquired 50% of the company by Fortis Properties.
1/31/1999	Mount Peyton	CAD 2.20	Acquired all common shares and notes payable.
	Total USD	USD 65.50	
	Total CAD	CAD 6,214.48	

Source: Bloomberg, Company data and Credit Suisse

In terms of acquisitions, we believe Fortis has a few advantages over others, including:

- Fortis has growing expertise with both electric and gas utilities;

- Larger size will allow it to look at a larger spectrum of potential target companies;
- A proven ability to effectively integrate acquisitions;
- A rather strong appetite for yield oriented securities in Canada;
- Canada's rather benign interest rate environment; and,
- Bought deal financing commonly employed in Canada.

Fortis possesses a number of absolute and relative advantages over some other competitors

Historically, Fortis has been very adept at acquisitions. Corporate growth has benefited from the company's ability to successfully acquire and integrate selected assets. Capital market conditions are demonstrating signs of improved functioning. Therefore, the typical Fortis acquisition strategy is more palatable in current capital markets. For greater details, please refer to our 6 August 2009 note entitled "Pondering a Portland purchase?"

Valuation

We continue to believe that Fortis has strong organic growth in key areas such as British Columbia, Alberta and the Caribbean. In our view, the company faces a delicate balance of capital investment opportunities and cash flow needs. From our perspective, the next big catalysts for the stock will likely revolve around capital efficiency initiatives or a large scale acquisition which will always lack predictability. At this time, we made several adjustments to our financial model after the quarter. Accordingly, we revised our EPS estimate for 2010 to C\$1.68 from C\$1.70. Our target price of C\$30.00 and Neutral rating are obtained utilizing multiple valuation methodologies, including: a 17.0x P/E multiple of 2011 earnings; a 1.63x book value multiple; and, a DCF based valuation. We reiterate our Neutral rating.

Rating: Neutral

Target: C\$30.00

3-Year Price, Target Price and Rating Change History Chart for FTS.TO

FTS.TO Date	Closing Price (C\$)	Target Price (C\$)	Initiation/ Rating Assumption
12/4/07	27.04	32	N X
10/24/08	24.75	28	
12/3/08	25.48	27.5	
1/25/10	28.5	30	

The analyst(s) responsible for preparing this research report received compensation that is based upon various factors including Credit Suisse's total revenues, a portion of which are generated by Credit Suisse's investment banking activities.

Analysts' stock ratings are defined as follows:

Outperform (O): The stock's total return is expected to outperform the relevant benchmark* by at least 10-15% (or more, depending on perceived risk) over the next 12 months.

Neutral (N): The stock's total return is expected to be in line with the relevant benchmark* (range of $\pm 10-15\%$) over the next 12 months.

Underperform (U): The stock's total return is expected to underperform the relevant benchmark* by 10-15% or more over the next 12 months.

Relevant benchmark by region: As of 29th May 2009, Australia, New Zealand, U.S. and Canadian ratings are based on (1) a stock's absolute total return potential to its current share price and (2) the relative attractiveness of a stock's total return potential within an analyst's coverage universe, with Outperforms representing the most attractive, Neutrals the less attractive, and Underperforms the least attractive investment opportunities. Some U.S. and Canadian ratings may fall outside the absolute total return ranges defined above, depending on market conditions and industry factors. For Latin American, Japanese, and non-Japan Asia stocks, ratings are based on a stock's total return relative to the average total return of the relevant country or regional benchmark; for European stocks, ratings are based on a stock's total return relative to the analyst's coverage universe**. For Australian and New Zealand stocks a 22% and a 12% threshold replace the 10-15% level in the Outperform and Underperform stock rating definitions, respectively, subject to analysts' perceived risk. The 22% and 12% thresholds replace the +10-15% and -10-15% levels in the Neutral stock rating definition, respectively, subject to analysts' perceived risk.*

***An analyst's coverage universe consists of all companies covered by the analyst within the relevant sector.*

Restricted (R): In certain circumstances, Credit Suisse policy and/or applicable law and regulations preclude certain types of communications, including an investment recommendation, during the course of Credit Suisse's engagement in an investment banking transaction and in certain other circumstances.

Volatility Indicator [V]: A stock is defined as volatile if the stock price has moved up or down by 20% or more in a month in at least 8 of the past 24 months or the analyst expects significant volatility going forward.

Analysts' coverage universe weightings are distinct from analysts' stock ratings and are based on the expected performance of an analyst's coverage universe* versus the relevant broad market benchmark:**

Overweight: Industry expected to outperform the relevant broad market benchmark over the next 12 months.

Market Weight: Industry expected to perform in-line with the relevant broad market benchmark over the next 12 months.

Underweight: Industry expected to underperform the relevant broad market benchmark over the next 12 months.

**An analyst's coverage universe consists of all companies covered by the analyst within the relevant sector.*

***The broad market benchmark is based on the expected return of the local market index (e.g., the S&P 500 in the U.S.) over the next 12 months.*

Credit Suisse's distribution of stock ratings (and banking clients) is:

	Global Ratings Distribution	
Outperform/Buy*	44%	(61% banking clients)
Neutral/Hold*	41%	(61% banking clients)
Underperform/Sell*	13%	(54% banking clients)
Restricted	2%	

**For purposes of the NYSE and NASD ratings distribution disclosure requirements, our stock ratings of Outperform, Neutral, and Underperform most closely correspond to Buy, Hold, and Sell, respectively; however, the meanings are not the same, as our stock ratings are determined on a relative basis. (Please refer to definitions above.) An investor's decision to buy or sell a security should be based on investment objectives, current holdings, and other individual factors.*

Price Target: (12 months) for (FTS.TO)

Method: We obtain our C\$30.00 target price for Fortis Inc. by using multiple valuation methodologies, yield base analysis, and discounted cash flow. Our target price implies a P/E (price/earnings) multiple of 17.0x our 2011 EPS (earnings per share) estimate of C\$1.80 and an EV/EBITDA (enterprise value/earnings before interest, taxes, depreciation, and amortization) multiple of 9.8x our EBITDA estimate.

Risks: There are a number of risks to Fortis' achievement of our C\$30.00 target price: commodity prices; weather; environmental; regulatory; access to capital markets; and, interest rates. Moreover, one should never underestimate the power of the regulator in any regulated business.

Please refer to the firm's disclosure website at www.credit-suisse.com/researchdisclosures for the definitions of abbreviations typically used in the target price method and risk sections.

See the Companies Mentioned section for full company names.

The subject company (FTS.TO) currently is, or was during the 12-month period preceding the date of distribution of this report, a client of Credit Suisse.

Credit Suisse provided investment banking services to the subject company (FTS.TO) within the past 12 months.

Credit Suisse provided non-investment banking services, which may include Sales and Trading services, to the subject company (FTS.TO) within the past 12 months.

Credit Suisse expects to receive or intends to seek investment banking related compensation from the subject company (FTS.TO) within the next 3 months.

Credit Suisse has received compensation for products and services other than investment banking services from the subject company (FTS.TO) within the past 12 months.

CS may not have taken any steps to ensure that the securities referred to in this report are suitable for any particular investor. CS will not treat recipients as its customers by virtue of their receiving the report. The investments or services contained or referred to in this report may not be suitable for you and it is recommended that you consult an independent investment advisor if you are in doubt about such investments or investment services. Nothing in this report constitutes investment, legal, accounting or tax advice or a representation that any investment or strategy is suitable or appropriate to your individual circumstances or otherwise constitutes a personal recommendation to you. CS does not offer advice on the tax consequences of investment and you are advised to contact an independent tax adviser. Please note in particular that the bases and levels of taxation may change.

CS believes the information and opinions in the Disclosure Appendix of this report are accurate and complete. Information and opinions presented in the other sections of the report were obtained or derived from sources CS believes are reliable, but CS makes no representations as to their accuracy or completeness. Additional information is available upon request. CS accepts no liability for loss arising from the use of the material presented in this report, except that this exclusion of liability does not apply to the extent that liability arises under specific statutes or regulations applicable to CS. This report is not to be relied upon in substitution for the exercise of independent judgment. CS may have issued, and may in the future issue, a trading call regarding this security. Trading calls are short term trading opportunities based on market events and catalysts, while stock ratings reflect investment recommendations based on expected total return over a 12-month period as defined in the disclosure section. Because trading calls and stock ratings reflect different assumptions and analytical methods, trading calls may differ directionally from the stock rating. In addition, CS may have issued, and may in the future issue, other reports that are inconsistent with, and reach different conclusions from, the information presented in this report. Those reports reflect the different assumptions, views and analytical methods of the analysts who prepared them and CS is under no obligation to ensure that such other reports are brought to the attention of any recipient of this report. CS is involved in many businesses that relate to companies mentioned in this report. These businesses include specialized trading, risk arbitrage, market making, and other proprietary trading.

Past performance should not be taken as an indication or guarantee of future performance, and no representation or warranty, express or implied, is made regarding future performance. Information, opinions and estimates contained in this report reflect a judgement at its original date of publication by CS and are subject to change without notice. The price, value of and income from any of the securities or financial instruments mentioned in this report can fall as well as rise. The value of securities and financial instruments is subject to exchange rate fluctuation that may have a positive or adverse effect on the price or income of such securities or financial instruments. Investors in securities such as ADR's, the values of which are influenced by currency volatility, effectively assume this risk.

Structured securities are complex instruments, typically involve a high degree of risk and are intended for sale only to sophisticated investors who are capable of understanding and assuming the risks involved. The market value of any structured security may be affected by changes in economic, financial and political factors (including, but not limited to, spot and forward interest and exchange rates), time to maturity, market conditions and volatility, and the credit quality of any issuer or reference issuer. Any investor interested in purchasing a structured product should conduct their own investigation and analysis of the product and consult with their own professional advisers as to the risks involved in making such a purchase.

Some investments discussed in this report have a high level of volatility. High volatility investments may experience sudden and large falls in their value causing losses when that investment is realised. Those losses may equal your original investment. Indeed, in the case of some investments the potential losses may exceed the amount of initial investment, in such circumstances you may be required to pay more money to support those losses. Income yields from investments may fluctuate and, in consequence, initial capital paid to make the investment may be used as part of that income yield. Some investments may not be readily realisable and it may be difficult to sell or realise those investments, similarly it may prove difficult for you to obtain reliable information about the value, or risks, to which such an investment is exposed.

Fortis Inc. (FTS.TO)

FORECAST REDUCTION

Ongoing organic growth

- **Earnings review:** Fortis reported Q2 2010 EPS (FD) of C\$0.32 that met our and the Street's C\$0.32 estimate and within the C\$0.30-C\$0.34 range. In our view, Fortis continues to make steady progress in delivering a relatively consistent and predictable set of financial results from a largely regulated asset base. Accordingly, we do not place undue emphasis on quarterly results in much of our universe as a result of the inherently long-cycle nature of many assets. For Fortis, we continue to focus our analytical efforts on the ongoing significant regulated capital plan along with the positive upward bias to regulated returns.
- **Significant organic growth continues:** As expected, Fortis continued to provide a robust outlook for its utility capital program. The company expects consolidated gross capital expenditures to be roughly C\$1.1bn for 2010 and about C\$5bn over the next five years. Roughly 71% of the total amount is targeted to come from regulated electric utilities and 27% allocated to the Terasen Gas entities.
- **Improving capital market conditions:** Historically, Fortis has been very adept at acquisitions. Corporate growth has benefited from the company's ability to successfully acquire and integrate selected assets. In our view, the company is well positioned in the current market for various acquisition opportunities.
- **Valuation:** As a result of the quarter, we slightly revised our EPS estimates for 2011 and 2012 to C\$1.79 and C\$1.87 respectively from C\$1.80 and C\$1.88. Our C\$30.00 target price and Neutral rating are obtained utilizing multiple valuation methodologies, including: a 17.0x P/E multiple of 2011 earnings; a 1.62x book value multiple; and, a DCF based valuation. We reiterate our Neutral rating.

DISCLOSURE APPENDIX CONTAINS IMPORTANT DISCLOSURES, ANALYST CERTIFICATIONS, INFORMATION ON TRADE ALERTS, ANALYST MODEL PORTFOLIOS AND THE STATUS OF NON-U.S. ANALYSTS. U.S. Disclosure: Credit Suisse does and seeks to do business with companies covered in its research reports. As a result, investors should be aware that the Firm may have a conflict of interest that could affect the objectivity of this report. Investors should consider this report as only a single factor in making their investment decision.

Fortis reported Q2 2010 EPS (FD) of C\$0.32 that met our and the Street's C\$0.32 estimate and within the C\$0.30-C\$0.34 range. We do not place undue emphasis on quarterly results in much of our universe as a result of the inherently long-cycle nature of many assets. Our focus is largely upon the company's continuing significant regulated capital plan and the positive upward bias to regulated returns. This research note is divided into three parts: (a) results; (b) outlook; and, (c) valuation. Each of these areas will be addressed in greater detail below.

Meeting expectations

Results

Exhibit 1 highlights the segmented unadjusted earnings contributions for the most recent quarter and for the comparable period one year ago. Our commentary for each segment appears under the various headings below.

Exhibit 1: Segmented unadjusted earnings contribution

C\$ in millions, unless otherwise stated

	Q2 2010	Q2 2009	chg y/y
Regulated Gas Utilities - Canadian	17	14	21%
Regulated Electric Utilities - Canadian	40	39	3%
Regulated Electric Utilities - Caribbean	7	7	0%
Non-regulated - Fortis Generation	3	3	0%
Non-regulated - Fortis Properties	8	8	0%
Corporate and other	(20)	(18)	-11%
Net earnings applicable to common shares	55	53	4%

Source: Company data and Credit Suisse

Regulated Gas Utilities - Canadian

The unadjusted earnings for this segment increased by roughly 21% year-over-year (see Exhibit 2). Some notable items for the regulated gas utilities, include:

- Net customer additions were 1,829 during H1 2010 versus net addition of 1,068 during H1 2009;
- The amount of customer additions increased versus H1 2009 due to lower customer disconnections because of cooler weather and the growth of multi-family housing; and,
- Sales volumes increased for the Core-Residential and Commercial and decreased for the Industrial segment. Transportation volumes as increased.

Exhibit 2: Regulated Gas Utilities (unadjusted)

	Q2 2010	Q2 2009	chg y/y
Terasen Gas	17.0	14.0	21%

Regulated Electric Utilities – Canadian

This segment consists of operating companies such as FortisBC, FortisAlberta, Newfoundland Power and Other Canadian Electric Utilities, which includes Maritime Electric and FortisOntario. Detailed contributions for each of these divisions can be found in Exhibit 3.

Exhibit 3: Regulated electric utilities – Canadian contribution (unadjusted)

C\$ in millions, unless otherwise stated

	Q2 2010	Q2 2009	chg y/y
FortisBC	8	7	14%
FortisAlberta	17	17	0%
Newfoundland Power	11	11	0%
Other Cdn Electric Utilities	4	4	0%
Earnings	40	39	3%

Source: Company data and Credit Suisse

FortisBC

Segmented earnings at FortisBC increased by 14% compared to the same period last year. The increase was due to a 6.0% increase in customer electricity rates starting in January 2010 and increased in PBR incentive adjustments and pole-attachment revenue. See Exhibit 4 for selected highlights.

Slight decrease in energy deliveries in BC

Exhibit 4: Selected FortisBC performance highlights (unadjusted)

	Q2 2010	Q2 2009	chg y/y
Energy deliveries (GWh)	670	675	-1%
Revenue (C\$/MWh)	88.06	81.48	8%
Energy supply costs (C\$/MWh)	19.40	19.26	1%

Gross margin (C\$/MWh)	40.30	37.04	9%
Earnings (C\$millions)	8	7	14%

Source: Company data and Credit Suisse

FortisAlberta

Earnings at this regulated utility were flat comparing Q2 2010 versus the prior period. See Exhibit 5 for selected highlights.

Slight decrease in energy delivery in Alberta

Exhibit 5: Selected FortisAlberta performance highlights (unadjusted)

	Q2 2010	Q2 2009	chg y/y
Energy deliveries (GWh)	3,724	3,765	-1%
Revenue (C\$/MWh)	24.70	21.51	15%
Operating expenses (C\$/MWh)	9.67	8.23	17%
Gross margin (C\$/MWh)	15.04	13.28	13%
Earnings (C\$millions)	17	17	0%

Source: Company data and Credit Suisse

Newfoundland Power

This segment's earnings generation was flat when comparing Q2 2010 versus Q2 2009. Energy deliveries were up by approximately 4% (see Exhibit 6).

Increase in NP's energy deliveries

Exhibit 6: Selected Newfoundland Power performance highlights (unadjusted)

	Q2 2010	Q2 2009	chg y/y
Energy deliveries (GWh)	1,220	1,177	4%
Revenue (C\$/MWh)	103.28	101.10	2%
Energy supply costs (C\$/MWh)	61.48	59.47	3%
Operating expenses (C\$/MWh)	12.30	11.05	11%
Gross margin (C\$/MWh)	29.51	30.59	-4%
Earnings (C\$millions)	11	11	0%

Source: Company data, Credit Suisse estimates

Other Canadian Electric Utilities

The roughly 11% increase in energy deliveries was the result of the Algoma Power Inc. acquisition (previously Great Lakes Power Distribution Inc.). Without that acquisition, energy deliveries increased by 2.9% year over year. Exhibit 7 contains selected highlights.

Increased in energy deliveries

Regulated Electric Utilities – Caribbean

This segment includes Belize Electricity, Caribbean Utilities, and Fortis Turks and Caicos. Earnings for this segment were flat compared to the same quarter last year. Notably, energy deliveries increased by 6% on a year-over-year basis. Aside from some regulatory matters discussed below, economic conditions may have stabilized/improved with a “[i]mproving tourism activity in the Turks and Caicos Islands”. On the regulatory front, the ongoing situation with Belize Electricity requires a degree of monitoring. In brief, the utility received an adverse regulatory decision relating to a rate application. Moreover, there have been changes to the electricity legislation in Belize that have been challenged by the Fortis-owned utility. The company stated

“Changes made in electricity legislation by the Government of Belize and the PUC, and the PUC’s June 2008 Final Decision on Belize Electricity’s 2008/2009 Rate Application and the PUC’s amendment to the June 2008 Final Decision, which were based on the changed legislation, have been judicially challenged by Belize Electricity in several proceedings. The judicial process is ongoing with interim rulings, judgments and appeals. The timing or likely final outcome of the proceedings is indeterminable at this time. In response to an application from Belize Electricity, the Supreme Court of Belize issued an order in June 2010 prohibiting the PUC from carrying out any rate-setting review proceedings, changing any rates and taking any enforcement or penal steps against Belize Electricity until further order of the Supreme Court.”

Belize situation requires ongoing monitoring

“As a result of the regulatory’s Final Decision on Belize Electricity’s 2008/2009 Rate Application in June 2008, Belize Electricity does not meet certain debt covenant financial ratios related to loans with the International Bank for Reconstruction and Development and the Caribbean Development Bank totalling \$6 million (BZ\$11 million) as at June 30, 2010.”

Fortis Turks and Caicos, received on June 2010 notice from the Governor of the Turks and Caicos Islands that the company’s electricity rate review filing was not accepted, “because of concern of the impact that the proposed rate increase might have on key sectors of the Island’s economy.” The company stated that it is, “continuing discussions with the Government and has requested the Governor to appoint an outside, independent consultant to review the filing and the current rate setting mechanism and make recommendations regarding both.”

See Exhibit 8 below for selected highlights.

Exhibit 8: Caribbean - Regulated Electric Utilities performance highlights (unadjusted)

	Q2 2010	Q2 2009	chg y/y
Energy deliveries (GWh)	307	290	6%
Revenue (C\$/MWh)	270.36	282.76	-4%
Energy supply costs (C\$/MWh)	153.09	151.72	1%

Non-regulated – Fortis Generation

The non-regulated generation assets within this segment are located in Belize, British Columbia, Central Newfoundland, Ontario and Upper New York State. Earnings for the segment were flat from the current quarter compared to the same quarter last year. Energy deliveries decreased by 36% from Q2 2009 to Q2 2010 due to the expiration of the water rights of Rankine hydro facility and lower production in Upper New York State due to low rainfall. See the table below for selected highlights.

Exhibit 9: Non-regulated generation – selected highlights

	Q2 2010	Q2 2009	chg y/y
Energy deliveries (GWh)	90	141	-36%
Revenue (C\$/MWh)	88.89	63.83	39%
Energy supply costs (C\$/MWh)	11.11	7.09	57%
Operating expenses (C\$/MWh)	22.22	14.18	57%
Gross margin (C\$/MWh)	55.56	42.55	31%
Earnings (C\$millions)	3	3	0%

Source: Company data and Credit Suisse

Non-regulated – Fortis Properties

Fortis Properties' net unadjusted earning contribution during the quarter was C\$8m which is similar to earnings in Q2 2009. REVPAR slightly increased to C\$83.77 from C\$83.15 for the comparable period last year. Additionally, the occupancy rate of the Real Estate Division was slightly down at 94.8% versus last year's 95.9%.

Corporate

Corporate expenses increased to C\$20 million in Q2 2010 from C\$18m in Q2 2009.

Outlook

We continue to believe investor, whether existing or prospective, should consider several major issues, including (a) funding organic growth; (b) rising returns; and, (c) acquisition trail. Each of these issues is addressed below.

Funding organic growth

In the most recent quarter the company's reported capital expenditures totaled C\$244 million, of which C\$237 million was spent at regulated utilities. Fortis maintains that capital expenditures for 2010 will be roughly C\$1.1 billion. A majority of the total will be spent on Western Canadian assets (Terasen Gas, FortisAlberta, and FortisBC). The company's expectations continue to be for consolidated gross capital expenditures over 5 years (2010-2014) approaching C\$5bn with 71% of that total amount being allocated to regulated utilities. Both FortisAlberta and FortisBC will receive the vast majority of that amount; whereas, the regulated gas utilities are planned to receive 27% of the total capex amount. Three percent is expected to be at the non-regulated operations. Given the regulated rates of return with utility capital expenditures, the increases should be viewed as longer-term positives provided an appropriate financial balance is struck.

Ongoing organic growth

With the significant current relative valuation advantages, we believe that Fortis may become more motivated to explore possible capital efficiency initiatives. In our view, the company possesses ample opportunities to become much more capital efficient. One strategy involves divesting certain non-utility assets and redeploying capital into utility assets or funding the capital program. Another option would entail divesting partial interests in selected utility assets in an asset management model approach and receiving a management fee.

In fact, some of the media reports prior to the official announcement of PPL Corporation's acquisition of E.ON's Kentucky utility assets for US\$7.625 billion stated that a consortium led by Fortis Inc. was one of three finalists for those assets. We would regard that type of information in media reports as being something akin to an asset management style of approach. Ultimately, we believe that such a strategy would help Fortis generate a higher level of returns. Additionally, the use of an asset management type approach would make large acquisitions which could potentially further accelerate growth.

Opportunities for improved capital efficiency

Generally, we continue to prefer pure-play utility companies without an undue amount of non-core asset exposure. Historically, non-core assets (especially real estate) have been somewhat commonplace for many utilities. Fortis has been no exception to that approach. Notably, the mix of commercial and hospitality real estate assets held by Fortis have been positive contributors and also provide the company a bit of financial flexibility for a selection of reasons. In light of current market conditions, we believe there is a much less compelling case for the monetization of these assets than as in the past. We note Fortis Properties continues to increase in scale and scope which may eventually make it more attractive for acquisition or monetization. Yet, for a number of reasons, we continue to believe there is a rather low probability of either of those events occurring.

Even discounting the potential monetization of assets that we would consider to be non-core, we believe Fortis possesses considerable potential to become much more capital efficient. Given the significant interest in infrastructure assets by many investors seeking long-dated types of return, Fortis could easily divest portions of its existing asset base to pension fund investors and charge a management fee for their operational and management expertise. This type of approach could significantly improve capital efficiency and returns on capital. In addition, this asset management approach could also free-up capital that could be used to fund the existing capital program or fund future acquisitions.

Capital efficiency initiatives could aid funding of acquisitions or the existing capital program funding

Rising returns

Positively, Fortis has been successful in obtaining several favourable regulatory decisions. For example, the allowed equity at Terasen Gas Inc. (TGI) was boosted from 35% to 40% effective January 1, 2010. In addition to that positive move for the equity base, the allowed return on equity for TGI increased from 8.47% to 9.50%. In a related judgment, Terasen Gas (Vancouver Island) Inc. (TGVI) and Terasen Gas Whistler Inc. (TGWI) returns increased from 9.17% to 10%. Additionally, the British Columbia Utilities Commission (BCUC) held the former automatic adjustment mechanism for annual ROE determination would no longer apply. Also in BC, FortisBC obtained an increased allowed ROE from 8.87% to 9.90% that became effective on January 1, 2010. The upward bias in utility returns should be viewed positively. Clearly, many questions exist as to the methods for determining and predicting future return levels. Yet, we view the regulatory movement away from a very mechanical return approach work as a notable positive that should help ensure an appropriate level of returns over a period of time.

Similar to the BCUC, the Alberta Utilities Commission (AUC) issued a decision on the 2009 Generic Cost of Capital establishing a 9% ROE for utilities like FortisAlberta in 2009 and 2010. Under the previous formulaic approach, that utility would have been entitled to an 8.61% return. Moreover, the allowed equity within the regulated capital structure moved from 37% to 41% effective January 1, 2009. Notably, this return framework will be in effect for 2011 providing a level of certainty to FortisAlberta's future earnings.

Unfortunately, not every jurisdiction is proving to be as progressive as Alberta, BC and the National Energy Board regulated Trans-Quebec & Maritimes Pipeline decision (see file RH-1-2008 and our March 19, 2009 note “*Regulatory round-up*”). The Newfoundland and Labrador Board of Commissioners of Public Utilities (PUB) most recent decision increased the allowed ROE for Newfoundland Power from 8.95% in 2009 to 9% in 2010. Additionally, in the past, the PUB ordered Newfoundland Power’s allowed ROEs for 2011 and 2012 would be determined by an automated formula that will be subject to review in Q1 2010. We do not need to belabour all of the regulatory developments, however, we note that returns are slowly biasing to the upside. The only challenge with the upward bias is that it comes at a time of potentially rising interest rates.

Acquisition trail

In our view, Fortis continues to demonstrate a rather impressive ability to successfully integrate acquisitions. Additionally, we view acquisitions as somewhat central to the company’s growth strategy. For instance, the company’s most recent Management Discussion and Analysis stated “The Corporation continues to pursue acquisitions for profitable growth, focusing on strategic opportunities to acquire regulated electric and natural gas electric utilities in the United States, Canada and the Caribbean. Fortis will also pursue growth in its non-regulated businesses in support of its regulated utility growth strategy.” Given the success of Fortis in past transactions, as measured in terms of financials, share price and operationally, we believe the company’s current valuation and skill set may lead to some potentially value creating acquisition activity (see Exhibit 10 below for select Fortis M&A transactions).

Exhibit 10: Selected Fortis M&A transactions

\$ in millions, unless otherwise stated

Announced Date	Asset/Company	Deal value (\$m)	Comment
7/22/2009	Caribbean Utilities Co.	CAD 6.74	Acquired an additional 2.7% of Caribbean Utilities Co.
6/23/2009	Great Lakes Power Distribution	CAD 68.00	Acquired from Brookfield the utility that serves the District of Algoma in northern Ontario.
10/1/2008	Grimsby Power Inc.	CAD 1.10	Acquired a 10% minority interest.
10/1/2008	Caribbean Utilities Co.	CAD 3.00	Acquired an additional 1% of Caribbean Utilities Co.

1/30/2003	Caribbean Utilities Co.	CAD 71.00	Acquired additional 3,863,695 Class A Ordinary Shares, representing approximately 15.9 per cent of the outstanding shares of the company and increased Fortis’ holding to roughly 38%.
12/1/2002	Delta St John’s Hotel and conference centre	CAD 25.90	Hotel in downtown St. John’s, Newfoundland
5/9/2002	Cornwall Street Railway Light	CAD 67.70	City of Cornwall electric transmission & distribution utility.
4/16/2002	Kings Place	CAD 27.70	Commercial property in Fredericton, NB.
3/13/2002	Caribbean Utilities Co.	CAD 12.90	Acquired additional ~2% of the company.
3/20/2002	Niagara Power Co.	CAD 49.00	Purchase remaining 50% of Niagara Power Co.
2/1/2002	Cabot palace I	CAD 14.30	133,327 Square feet premium office tower in St. John’s, Newfoundland
9/18/2001	Portfolio of properties in St. John’s	CAD 8.30	Purchased TD Place commercial bldg and 6 parcels of land.
9/14/2001	Aliant Poles	CAD 46.00	Purchased 102,000 poles and related infrastructure from Aliant Telecom.
1/26/2001	Belize Electric Company Ltd.	USD 62.00	Acquired 95% of company from Duke Energy.
12/19/2000	2 Hydro generating stations	CAD 6.90	2 generating stations (6.88MW) in upper New York state.
12/14/2000	Brunswick Square Ltd.	CAD 6.20	Acquired 50% of the company Fortis doesn’t own.
12/1/2000	Fort William Building and Blue cross centre	CAD 52.70	Fort William building in St. John’s, Newfoundland and Blue cross centre in Moncton, New Brunswick.
2/23/2000	Caribbean Utilities Co.	CAD 79.90	Acquired 20% of the company.
12/30/1999	2 Hydro generating stations	CAD 19.77	2 generating stations (16MW) in upper New York state (Moose River & Philadelphia)
10/28/1999	Belize Electricity Ltd.	CAD 36.80	Acquired 67% interest in the main commercial generator, transmitter & distributor of electricity in Belize.
8/31/1999	Brunswick Square Ltd.	CAD 10.12	Acquired 50% of the company by Fortis Properties.
1/31/1999	Mount Peyton	CAD 2.20	Acquired all common shares and notes payable.
	Total USD	USD 65.50	
	Total CAD	CAD 6,214.48	

Source: Bloomberg, Company data and Credit Suisse

In terms of acquisitions, we believe Fortis has a few advantages over others, including:

- Fortis has growing expertise with both electric and gas utilities;

- Larger size will allow it to look at a larger spectrum of potential target companies;
- A proven ability to effectively integrate acquisitions;
- A rather strong appetite for yield oriented securities in Canada;
- Canada's rather benign interest rate environment; and,
- Bought deal financing commonly employed in Canada.

Fortis possesses a number of absolute and relative advantages over some other competitors

Historically, Fortis has been very adept at acquisitions. Corporate growth has benefited from the company's ability to successfully acquire and integrate selected assets. Capital market conditions are demonstrating signs of improved functioning. Therefore, the typical Fortis acquisition strategy is more palatable in current capital markets. For greater details, please refer to our 6 August 2009 note entitled "Pondering a Portland purchase?"

Valuation

We continue to believe that Fortis has strong organic growth in key areas such as British Columbia, Alberta and the Caribbean. In our view, the company faces a delicate balance of capital investment opportunities and cash flow needs. From our perspective, the next big catalysts for the stock will likely revolve around capital efficiency initiatives or a large scale acquisition which will always lack predictability. At this time, we made several adjustments to our financial model after the quarter. Accordingly, we slightly revised our EPS estimate for 2011 and 2012 to C\$1.69 and C\$1.87 respectively from C\$1.70 and C\$1.88. We outline our valuation methodology below, however, we believe it is useful to consider the historic yield spread analysis for Fortis as previously published in the 27 July 2010 report "Canadian Equity Strategy: Delightful dividend deviations".

Rating: Neutral

Target: C\$30.00

Exhibit 11: Fortis Inc.

Source: Bloomberg and Credit Suisse

As illustrated above, at the time of that publication, the stock was trading nearly two-standard deviations wide from the historic dividend yield spread. Finally, our target price of C\$30.00 and Neutral rating are obtained utilizing multiple valuation methodologies. Our approaches include: a 17.0x P/E multiple of 2011 earnings; a 1.62x book value multiple; and, a DCF based valuation. We reiterate our Neutral rating.

3-Year Price, Target Price and Rating Change History Chart for FTS.TO

The analyst(s) responsible for preparing this research report received compensation that is based upon various factors including Credit Suisse's total revenues, a portion of which are generated by Credit Suisse's investment banking activities.

Analysts' stock ratings are defined as follows:

Outperform (O): The stock's total return is expected to outperform the relevant benchmark* by at least 10-15% (or more, depending on perceived risk) over the next 12 months.

Neutral (N): The stock's total return is expected to be in line with the relevant benchmark* (range of ± 10 -15%) over the next 12 months.

Underperform (U): The stock's total return is expected to underperform the relevant benchmark* by 10-15% or more over the next 12 months.

*Relevant benchmark by region: As of 29th May 2009, Australia, New Zealand, U.S. and Canadian ratings are based on (1) a stock's absolute total return potential to its current share price and (2) the relative attractiveness of a stock's total return potential within an analyst's coverage universe**, with Outperforms representing the most attractive, Neutrals the less attractive, and Underperforms the least attractive investment opportunities. Some U.S. and Canadian ratings may fall outside the absolute total return ranges defined above, depending on market conditions and industry factors. For Latin American, Japanese, and non-Japan Asia stocks, ratings are based on a stock's total return relative to the average total return of the relevant country or regional benchmark; for European stocks, ratings are based on a stock's total return relative to the analyst's coverage universe**. For Australian and New Zealand stocks a 22% and a 12% threshold replace the 10-15% level in the Outperform and Underperform stock rating definitions, respectively, subject to analysts' perceived risk. The 22% and 12% thresholds replace the +10-15% and -10-15% levels in the Neutral stock rating definition, respectively, subject to analysts' perceived risk.

**An analyst's coverage universe consists of all companies covered by the analyst within the relevant sector.

Restricted (R): In certain circumstances, Credit Suisse policy and/or applicable law and regulations preclude certain types of communications, including an investment recommendation, during the course of Credit Suisse's engagement in an investment banking transaction and in certain other circumstances.

Volatility Indicator [V]: A stock is defined as volatile if the stock price has moved up or down by 20% or more in a month in at least 8 of the past 24 months or the analyst expects significant volatility going forward.

Analysts' coverage universe weightings are distinct from analysts' stock ratings and are based on the expected performance of an analyst's coverage universe* versus the relevant broad market benchmark**:

Overweight: Industry expected to outperform the relevant broad market benchmark over the next 12 months.

Market Weight: Industry expected to perform in-line with the relevant broad market benchmark over the next 12 months.

Underweight: Industry expected to underperform the relevant broad market benchmark over the next 12 months.

*An analyst's coverage universe consists of all companies covered by the analyst within the relevant sector.

**The broad market benchmark is based on the expected return of the local market index (e.g., the S&P 500 in the U.S.) over the next 12 months.

Credit Suisse's distribution of stock ratings (and banking clients) is:

Global Ratings Distribution		
Outperform/Buy*	47%	(63% banking clients)
Neutral/Hold*	40%	(60% banking clients)
Underperform/Sell*	12%	(52% banking clients)
Restricted	2%	

*For purposes of the NYSE and NASD ratings distribution disclosure requirements, our stock ratings of Outperform, Neutral, and Underperform most closely correspond to Buy, Hold, and Sell, respectively; however, the meanings are not the same, as our stock ratings are determined on a relative basis. (Please refer to definitions above.) An investor's decision to buy or sell a security should be based on investment objectives, current holdings, and other individual factors.

Credit Suisse's policy is to update research reports as it deems appropriate, based on developments with the subject company, the sector or the market that may have a material impact on the research views or opinions stated herein.

Credit Suisse's policy is only to publish investment research that is impartial, independent, clear, fair and not misleading. For more detail please refer to Credit Suisse's Policies for Managing Conflicts of Interest in connection with Investment Research: http://www.csfb.com/research-and-analytics/disclaimer/managing_conflicts_disclaimer.html

Credit Suisse does not provide any tax advice. Any statement herein regarding any US federal tax is not intended or written to be used, and cannot be used, by any taxpayer for the purposes of avoiding any penalties.

See the Companies Mentioned section for full company names.

Price Target: (12 months) for (FTS.TO)

Method: We obtain our C\$30.00 target price for Fortis Inc. by using multiple valuation methodologies, yield base analysis, and discounted cash flow. Our target price implies a P/E (price/earnings) multiple of 17.0x our 2011 EPS (earnings per share) estimate of C\$1.79 and an EV/EBITDA (enterprise value/earnings before interest, taxes, depreciation, and amortization) multiple of 9.8x our EBITDA estimate.

Risks: There are a number of risks to Fortis' achievement of our C\$30.00 target price: commodity prices; weather; environmental; regulatory; access to capital markets; and, interest rates. Moreover, one should never underestimate the power of the regulator in any regulated business.

Please refer to the firm's disclosure website at www.credit-suisse.com/researchdisclosures for the definitions of abbreviations typically used in the target price method and risk sections.

See the Companies Mentioned section for full company names.

The subject company (FTS.TO) currently is, or was during the 12-month period preceding the date of distribution of this report, a client of Credit Suisse.

Credit Suisse provided investment banking services to the subject company (FTS.TO) within the past 12 months.

Credit Suisse provided non-investment banking services, which may include Sales and Trading services, to the subject company (FTS.TO) within the past 12 months.

Credit Suisse expects to receive or intends to seek investment banking related compensation from the subject company (FTS.TO) within the next 3 months.

Credit Suisse has received compensation for products and services other than investment banking services from the subject company (FTS.TO) within the past 12 months.

Important Regional Disclosures

Singapore recipients should contact a Singapore financial adviser for any matters arising from this research report.

An analyst involved in the preparation of this report has visited certain material operations of the subject company (FTS.TO) within the past 12 months. The analyst may not have visited all material operations of the subject company. The travel expenses of the analyst in connection with such visits were not paid or reimbursed by the subject company, other than de minimus local travel expenses.

Restrictions on certain Canadian securities are indicated by the following abbreviations: NVS--Non-Voting shares; RVS--Restricted Voting Shares; SVS--Subordinate Voting Shares.

Individuals receiving this report from a Canadian investment dealer that is not affiliated with Credit Suisse should be advised that this report may not contain regulatory disclosures the non-affiliated Canadian investment dealer would be required to make if this were its own report.

For Credit Suisse Securities (Canada), Inc.'s policies and procedures regarding the dissemination of equity research, please visit http://www.csfb.com/legal_terms/canada_research_policy.shtml.

As of the date of this report, Credit Suisse acts as a market maker or liquidity provider in the equities securities that are the subject of this report.

Principal is not guaranteed in the case of equities because equity prices are variable.

Commission is the commission rate or the amount agreed with a customer when setting up an account or at anytime after that.

CS may have issued a Trade Alert regarding this security. Trade Alerts are short term trading opportunities identified by an analyst on the basis of market events and catalysts, while stock ratings reflect an analyst's investment recommendations based on expected total return over a 12-month period relative to the relevant coverage universe. Because Trade Alerts and stock ratings reflect different assumptions and analytical methods, Trade Alerts may differ directionally from the analyst's stock rating.

The author(s) of this report maintains a CS Model Portfolio that he/she regularly adjusts. The security or securities discussed in this report may be a component of the CS Model Portfolio and subject to such adjustments (which, given the composition of the CS Model Portfolio as a whole, may differ from the recommendation in this report, as well as opportunities or strategies identified in Trading Alerts concerning the same security). The CS Model Portfolio and important disclosures about it are available at www.credit-suisse.com/ti.

To the extent this is a report authored in whole or in part by a non-U.S. analyst and is made available in the U.S., the following are important disclosures regarding any non-U.S. analyst contributors:

The non-U.S. research analysts listed below (if any) are not registered/qualified as research analysts with FINRA. The non-U.S. research analysts listed below may not be associated persons of CSSU and therefore may not be subject to the NASD Rule 2711 and NYSE Rule 472 restrictions on communications with a subject company, public appearances and trading securities held by a research analyst account.

- Andrew M. Kuske, non-U.S. analyst, is a research analyst employed by Credit Suisse Securities (Canada), Inc..
- Paul Tan, non-U.S. analyst, is a research analyst employed by Credit Suisse Securities (Canada), Inc..

Disclaimers continue on next page.

This report is not directed to, or intended for distribution to or use by, any person or entity who is a citizen or resident of or located in any locality, state, country or other jurisdiction where such distribution, publication, availability or use would be contrary to law or regulation or which would subject Credit Suisse AG, the Swiss bank, or its subsidiaries or its affiliates ("CS") to any registration or licensing requirement within such jurisdiction. All material presented in this report, unless specifically indicated otherwise, is under copyright to CS. None of the material, nor its content, nor any copy of it, may be altered in any way, transmitted to, copied or distributed to any other party, without the prior express written permission of CS. All trademarks, service marks and logos used in this report are trademarks or service marks or registered trademarks or service marks of CS or its affiliates.

The information, tools and material presented in this report are provided to you for information purposes only and are not to be used or considered as an offer or the solicitation of an offer to sell or to buy or subscribe for securities or other financial instruments. CS may not have taken any steps to ensure that the securities referred to in this report are suitable for any particular investor. CS will not treat recipients as its customers by virtue of their receiving the report. The investments or services contained or referred to in this report may not be suitable for you and it is recommended that you consult an independent investment advisor if you are in doubt about such investments or investment services. Nothing in this report constitutes investment, legal, accounting or tax advice or a representation that any investment or strategy is suitable or appropriate to your individual circumstances or otherwise constitutes a personal recommendation to you. CS does not offer advice on the tax consequences of investment and you are advised to contact an independent tax adviser. Please note in particular that the bases and levels of taxation may change.

CS believes the information and opinions in the Disclosure Appendix of this report are accurate and complete. Information and opinions presented in the other sections of the report were obtained or derived from sources CS believes are reliable, but CS makes no representations as to their accuracy or completeness. Additional information is available upon request. CS accepts no liability for loss arising from the use of the material presented in this report, except that this exclusion of liability does not apply to the extent that liability arises under specific statutes or regulations applicable to CS. This report is not to be relied upon in substitution for the exercise of independent judgment. CS may have issued, and may in the future issue, a trading call regarding this security. Trading calls are short term trading opportunities based on market events and catalysts, while stock ratings reflect investment recommendations based on expected total return over a 12-month period as defined in the disclosure section. Because trading calls and stock ratings reflect different assumptions and analytical methods, trading calls may differ directionally from the stock rating. In addition, CS may have issued, and may in the future issue, other reports that are inconsistent with, and reach different conclusions from, the information presented in this report. Those reports reflect the different assumptions, views and analytical methods of the analysts who prepared them and CS is under no obligation to ensure that such other reports are brought to the attention of any recipient of this report. CS is involved in many businesses that relate to companies mentioned in this report. These businesses include specialized trading, risk arbitrage, market making, and other proprietary trading.

Past performance should not be taken as an indication or guarantee of future performance, and no representation or warranty, express or implied, is made regarding future performance. Information, opinions and estimates contained in this report reflect a judgement at its original date of publication by CS and are subject to change without notice. The price, value of and income from any of the securities or financial instruments mentioned in this report can fall as well as rise. The value of securities and financial instruments is subject to exchange rate fluctuation that may have a positive or adverse effect on the price or income of such securities or financial instruments. Investors in securities such as ADR's, the values of which are influenced by currency volatility, effectively assume this risk.

Structured securities are complex instruments, typically involve a high degree of risk and are intended for sale only to sophisticated investors who are capable of understanding and assuming the risks involved. The market value of any structured security may be affected by changes in economic, financial and political factors (including, but not limited to, spot and forward interest and exchange rates), time to maturity, market conditions and volatility, and the credit quality of any issuer or reference issuer. Any investor interested in purchasing a structured product should conduct their own investigation and analysis of the product and consult with their own professional advisers as to the risks involved in making such a purchase.

Some investments discussed in this report have a high level of volatility. High volatility investments may experience sudden and large falls in their value causing losses when that investment is realised. Those losses may equal your original investment. Indeed, in the case of some investments the potential losses may exceed the amount of initial investment, in such circumstances you may be required to pay more money to support those losses. Income yields from investments may fluctuate and, in consequence, initial capital paid to make the investment may be used as part of that income yield. Some investments may not be readily realisable and it may be difficult to sell or realise those investments, similarly it may prove difficult for you to obtain reliable information about the value, or risks, to which such an investment is exposed.

This report may provide the addresses of, or contain hyperlinks to, websites. Except to the extent to which the report refers to website material of CS, CS has not reviewed the linked site and takes no responsibility for the content contained therein. Such address or hyperlink (including addresses or hyperlinks to CS's own website material) is provided solely for your convenience and information and the content of the linked site does not in any way form part of this document. Accessing such website or following such link through this report or CS's website shall be at your own risk.

This report is issued and distributed in Europe (except Switzerland) by Credit Suisse Securities (Europe) Limited, One Cabot Square, London E14 4QJ, England, which is regulated in the United Kingdom by The Financial Services Authority ("FSA"). This report is being distributed in Germany by Credit Suisse Securities (Europe) Limited Niederlassung Frankfurt am Main regulated by the Bundesanstalt fuer Finanzdienstleistungsaufsicht ("BaFin"). This report is being distributed in the United States by Credit Suisse Securities (USA) LLC ; in Switzerland by Credit Suisse AG; in Canada by Credit Suisse Securities (Canada), Inc.; in Brazil by Banco de Investimentos Credit Suisse (Brasil) S.A.; in Mexico by Banco Credit Suisse (México), S.A. (transactions related to the securities mentioned in this report will only be effected in compliance with applicable regulation); in Japan by Credit Suisse Securities (Japan) Limited, Financial Instrument Firm, Director-General of Kanto Local Finance Bureau (Kinsho) No. 66, a member of Japan Securities Dealers Association, The Financial Futures Association of Japan, Japan Securities Investment Advisers Association; elsewhere in Asia/Pacific by whichever of the following is the appropriately authorised entity in the relevant jurisdiction: Credit Suisse (Hong Kong) Limited, Credit Suisse Equities (Australia) Limited, Credit Suisse Securities (Thailand) Limited, Credit Suisse Securities (Malaysia) Sdn Bhd, Credit Suisse AG, Singapore Branch, Credit Suisse Securities (India) Private Limited, Credit Suisse Securities (Europe) Limited, Seoul Branch, Credit Suisse AG, Taipei Securities Branch, PT Credit Suisse Securities Indonesia, and elsewhere in the world by the relevant authorised affiliate of the above. Research on Taiwanese securities produced by Credit Suisse AG, Taipei Securities Branch has been prepared by a registered Senior Business Person. Research provided to residents of Malaysia is authorised by the Head of Research for Credit Suisse Securities (Malaysia) Sdn. Bhd., to whom they should direct any queries on +603 2723 2020.

In jurisdictions where CS is not already registered or licensed to trade in securities, transactions will only be effected in accordance with applicable securities legislation, which will vary from jurisdiction to jurisdiction and may require that the trade be made in accordance with applicable exemptions from registration or licensing requirements. Non-U.S. customers wishing to effect a transaction should contact a CS entity in their local jurisdiction unless governing law permits otherwise. U.S. customers wishing to effect a transaction should do so only by contacting a representative at Credit Suisse Securities (USA) LLC in the U.S.

Please note that this report was originally prepared and issued by CS for distribution to their market professional and institutional investor customers. Recipients who are not market professional or institutional investor customers of CS should seek the advice of their independent financial advisor prior to taking any investment decision based on this report or for any necessary explanation of its contents. This research may relate to investments or services of a person outside of the UK or to other matters which are not regulated by the FSA or in respect of which the protections of the FSA for private customers and/or the UK compensation scheme may not be available, and further details as to where this may be the case are available upon request in respect of this report.

- **Hydro highlights:** Fortis Inc. announced the development of a new 335MW hydroelectric facility (Waneta Expansion) situated near the Waneta Dam with Columbia Power Corporation and Columbia Basin Trust (both 100% owned by the Government of British Columbia). The total capital cost is expected to be roughly C\$900m with Fortis owning 51% of the Waneta Expansion and being responsible for operations. In our view, this investment is positive for several reasons, including the capacity shortfall issues at FortisBC.
- **Selected details:** Some highlights include: (a) the hydro facility will not be part of regulated rate base; (b) in-service date is expected to be in the spring of 2015; (c) target returns are anticipated to be higher than regulated assets; (d) under the Canal Plant Agreement, the Waneta Expansion will receive fixed energy and capacity payments based upon long-term hydrology which minimizes shorter-term hydrology risk; (e) BC Hydro will buy power under a long-term agreement and excess power, subject to regulatory approval, will be sold to FortisBC; (f) FTS consolidated capex over the next five years will increase by 10% to roughly C\$5.5b; and, (g) initially, credit facilities will fund the project, however, debt and equity will form the permanent financing.
- **Improving capital market conditions:** Historically, Fortis has been very adept at acquisitions. Corporate growth has benefited from the company's ability to successfully acquire and integrate selected assets. In our view, the company is well positioned in the current market for various acquisition opportunities.
- **Valuation:** Our C\$30.00 target price and Neutral rating are obtained utilizing multiple valuation methodologies, including: a 17.0x P/E multiple of 2011 earnings; a 1.62x book value multiple; and, a DCF based valuation. We reiterate our Neutral rating.

3-Year Price, Target Price and Rating Change History Chart for FTS.TO

FTS.TO	Closing Price	Target Price	Initiation/
Date	(C\$)	(C\$)	Rating Assumption
12/4/07	27.04	32	N X
10/24/08	24.75	28	
12/3/08	25.48	27.5	
1/25/10	28.5	30	

The analyst(s) responsible for preparing this research report received compensation that is based upon various factors including Credit Suisse's total revenues, a portion of which are generated by Credit Suisse's investment banking activities.

Analysts' stock ratings are defined as follows:

Outperform (O): The stock's total return is expected to outperform the relevant benchmark* by at least 10-15% (or more, depending on perceived risk) over the next 12 months.

Neutral (N): The stock's total return is expected to be in line with the relevant benchmark* (range of $\pm 10-15\%$) over the next 12 months.

Underperform (U): The stock's total return is expected to underperform the relevant benchmark* by 10-15% or more over the next 12 months.

*Relevant benchmark by region: As of 29th May 2009, Australia, New Zealand, U.S. and Canadian ratings are based on (1) a stock's absolute total return potential to its current share price and (2) the relative attractiveness of a stock's total return potential within an analyst's coverage universe**, with Outperforms representing the most attractive, Neutrals the less attractive, and Underperforms the least attractive investment opportunities. Some U.S. and Canadian ratings may fall outside the absolute total return ranges defined above, depending on market conditions and industry factors. For Latin American, Japanese, and non-Japan Asia stocks, ratings are based on a stock's total return relative to the average total return of the relevant country or regional benchmark; for European stocks, ratings are based on a stock's total return relative to the analyst's coverage universe**. For Australian and New Zealand stocks a 22% and a 12% threshold replace the 10-15% level in the Outperform and Underperform stock rating definitions, respectively, subject to analysts' perceived risk. The 22% and 12% thresholds replace the +10-15% and -10-15% levels in the Neutral stock rating definition, respectively, subject to analysts' perceived risk.

**An analyst's coverage universe consists of all companies covered by the analyst within the relevant sector.

Restricted (R): In certain circumstances, Credit Suisse policy and/or applicable law and regulations preclude certain types of communications, including an investment recommendation, during the course of Credit Suisse's engagement in an investment banking transaction and in certain other circumstances.

Volatility Indicator [V]: A stock is defined as volatile if the stock price has moved up or down by 20% or more in a month in at least 8 of the past 24 months or the analyst expects significant volatility going forward.

Analysts' coverage universe weightings are distinct from analysts' stock ratings and are based on the expected performance of an analyst's coverage universe* versus the relevant broad market benchmark**:

Overweight: Industry expected to outperform the relevant broad market benchmark over the next 12 months.

Market Weight: Industry expected to perform in-line with the relevant broad market benchmark over the next 12 months.

Underweight: Industry expected to underperform the relevant broad market benchmark over the next 12 months.

*An analyst's coverage universe consists of all companies covered by the analyst within the relevant sector.

**The broad market benchmark is based on the expected return of the local market index (e.g., the S&P 500 in the U.S.) over the next 12 months.

Credit Suisse's distribution of stock ratings (and banking clients) is:

Global Ratings Distribution		
Outperform/Buy*	46%	(62% banking clients)
Neutral/Hold*	40%	(60% banking clients)
Underperform/Sell*	11%	(53% banking clients)
Restricted	2%	

*For purposes of the NYSE and NASD ratings distribution disclosure requirements, our stock ratings of Outperform, Neutral, and Underperform most closely correspond to Buy, Hold, and Sell, respectively; however, the meanings are not the same, as our stock ratings are determined on a relative basis. (Please refer to definitions above.) An investor's decision to buy or sell a security should be based on investment objectives, current holdings, and other individual factors.

Credit Suisse's policy is to update research reports as it deems appropriate, based on developments with the subject company, the sector or the market that may have a material impact on the research views or opinions stated herein.

Credit Suisse's policy is only to publish investment research that is impartial, independent, clear, fair and not misleading. For more detail please refer to Credit Suisse's Policies for Managing Conflicts of Interest in connection with Investment Research: http://www.csfb.com/research-and-analytics/disclaimer/managing_conflicts_disclaimer.html

Credit Suisse does not provide any tax advice. Any statement herein regarding any US federal tax is not intended or written to be used, and cannot be used, by any taxpayer for the purposes of avoiding any penalties.

See the Companies Mentioned section for full company names.

Price Target: (12 months) for (FTS.TO)

Method: We obtain our C\$30.00 target price for Fortis Inc. by using multiple valuation methodologies, yield base analysis, and discounted cash flow. Our target price implies a P/E (price/earnings) multiple of 17.0x our 2011 EPS (earnings per share) estimate of C\$1.79 and an EV/EBITDA (enterprise value/earnings before interest, taxes, depreciation, and amortization) multiple of 9.8x our EBITDA estimate.

Risks: There are a number of risks to Fortis' achievement of our C\$30.00 target price: commodity prices; weather; environmental; regulatory; access to capital markets; and, interest rates. Moreover, one should never underestimate the power of the regulator in any regulated business.

Please refer to the firm's disclosure website at www.credit-suisse.com/researchdisclosures for the definitions of abbreviations typically used in the target price method and risk sections.

See the Companies Mentioned section for full company names.

The subject company (FTS.TO) currently is, or was during the 12-month period preceding the date of distribution of this report, a client of Credit Suisse.

Credit Suisse provided investment banking services to the subject company (FTS.TO) within the past 12 months.

Credit Suisse provided non-investment banking services, which may include Sales and Trading services, to the subject company (FTS.TO) within the past 12 months.

Credit Suisse expects to receive or intends to seek investment banking related compensation from the subject company (FTS.TO) within the next 3 months.

Credit Suisse has received compensation for products and services other than investment banking services from the subject company (FTS.TO) within the past 12 months.

Important Regional Disclosures

Singapore recipients should contact a Singapore financial adviser for any matters arising from this research report.

An analyst involved in the preparation of this report has visited certain material operations of the subject company (FTS.TO) within the past 12 months. The analyst may not have visited all material operations of the subject company. The travel expenses of the analyst in connection with such visits were not paid or reimbursed by the subject company, other than de minimus local travel expenses.

Restrictions on certain Canadian securities are indicated by the following abbreviations: NVS--Non-Voting shares; RVS--Restricted Voting Shares; SVS--Subordinate Voting Shares.

Individuals receiving this report from a Canadian investment dealer that is not affiliated with Credit Suisse should be advised that this report may not contain regulatory disclosures the non-affiliated Canadian investment dealer would be required to make if this were its own report.

For Credit Suisse Securities (Canada), Inc.'s policies and procedures regarding the dissemination of equity research, please visit http://www.csfb.com/legal_terms/canada_research_policy.shtml.

As of the date of this report, Credit Suisse acts as a market maker or liquidity provider in the equities securities that are the subject of this report.

Principal is not guaranteed in the case of equities because equity prices are variable.

Commission is the commission rate or the amount agreed with a customer when setting up an account or at anytime after that.

CS may have issued a Trade Alert regarding this security. Trade Alerts are short term trading opportunities identified by an analyst on the basis of market events and catalysts, while stock ratings reflect an analyst's investment recommendations based on expected total return over a 12-month period relative to the relevant coverage universe. Because Trade Alerts and stock ratings reflect different assumptions and analytical methods, Trade Alerts may differ directionally from the analyst's stock rating.

The author(s) of this report maintains a CS Model Portfolio that he/she regularly adjusts. The security or securities discussed in this report may be a component of the CS Model Portfolio and subject to such adjustments (which, given the composition of the CS Model Portfolio as a whole, may differ from the recommendation in this report, as well as opportunities or strategies identified in Trading Alerts concerning the same security). The CS Model Portfolio and important disclosures about it are available at www.credit-suisse.com/ti.

To the extent this is a report authored in whole or in part by a non-U.S. analyst and is made available in the U.S., the following are important disclosures regarding any non-U.S. analyst contributors:

This report is not directed to, or intended for distribution to or use by, any person or entity who is a citizen or resident of or located in any locality, state, country or other jurisdiction where such distribution, publication, availability or use would be contrary to law or regulation or which would subject Credit Suisse AG, the Swiss bank, or its subsidiaries or its affiliates ("CS") to any registration or licensing requirement within such jurisdiction. All material presented in this report, unless specifically indicated otherwise, is under copyright to CS. None of the material, nor its content, nor any copy of it, may be altered in any way, transmitted to, copied or distributed to any other party, without the prior express written permission of CS. All trademarks, service marks and logos used in this report are trademarks or service marks or registered trademarks or service marks of CS or its affiliates.

The information, tools and material presented in this report are provided to you for information purposes only and are not to be used or considered as an offer or the solicitation of an offer to sell or to buy or subscribe for securities or other financial instruments. CS may not have taken any steps to ensure that the securities referred to in this report are suitable for any particular investor. CS will not treat recipients as its customers by virtue of their receiving the report. The investments or services contained or referred to in this report may not be suitable for you and it is recommended that you consult an independent investment advisor if you are in doubt about such investments or investment services. Nothing in this report constitutes investment, legal, accounting or tax advice or a representation that any investment or strategy is suitable or appropriate to your individual circumstances or otherwise constitutes a personal recommendation to you. CS does not offer advice on the tax consequences of investment and you are advised to contact an independent tax adviser. Please note in particular that the bases and levels of taxation may change.

CS believes the information and opinions in the Disclosure Appendix of this report are accurate and complete. Information and opinions presented in the other sections of the report were obtained or derived from sources CS believes are reliable, but CS makes no representations as to their accuracy or completeness. Additional information is available upon request. CS accepts no liability for loss arising from the use of the material presented in this report, except that this exclusion of liability does not apply to the extent that liability arises under specific statutes or regulations applicable to CS. This report is not to be relied upon in substitution for the exercise of independent judgment. CS may have issued, and may in the future issue, a trading call regarding this security. Trading calls are short term trading opportunities based on market events and catalysts, while stock ratings reflect investment recommendations based on expected total return over a 12-month period as defined in the disclosure section. Because trading calls and stock ratings reflect different assumptions and analytical methods, trading calls may differ directionally from the stock rating. In addition, CS may have issued, and may in the future issue, other reports that are inconsistent with, and reach different conclusions from, the information presented in this report. Those reports reflect the different assumptions, views and analytical methods of the analysts who prepared them and CS is under no obligation to ensure that such other reports are brought to the attention of any recipient of this report. CS is involved in many businesses that relate to companies mentioned in this report. These businesses include specialized trading, risk arbitrage, market making, and other proprietary trading.

Past performance should not be taken as an indication or guarantee of future performance, and no representation or warranty, express or implied, is made regarding future performance. Information, opinions and estimates contained in this report reflect a judgement at its original date of publication by CS and are subject to change without notice. The price, value of and income from any of the securities or financial instruments mentioned in this report can fall as well as rise. The value of securities and financial instruments is subject to exchange rate fluctuation that may have a positive or adverse effect on the price or income of such securities or financial instruments. Investors in securities such as ADR's, the values of which are influenced by currency volatility, effectively assume this risk.

Structured securities are complex instruments, typically involve a high degree of risk and are intended for sale only to sophisticated investors who are capable of understanding and assuming the risks involved. The market value of any structured security may be affected by changes in economic, financial and political factors (including, but not limited to, spot and forward interest and exchange rates), time to maturity, market conditions and volatility, and the credit quality of any issuer or reference issuer. Any investor interested in purchasing a structured product should conduct their own investigation and analysis of the product and consult with their own professional advisers as to the risks involved in making such a purchase.

Some investments discussed in this report have a high level of volatility. High volatility investments may experience sudden and large falls in their value causing losses when that investment is realised. Those losses may equal your original investment. Indeed, in the case of some investments the potential losses may exceed the amount of initial investment, in such circumstances you may be required to pay more money to support those losses. Income yields from investments may fluctuate and, in consequence, initial capital paid to make the investment may be used as part of that income yield. Some investments may not be readily realisable and it may be difficult to sell or realise those investments, similarly it may prove difficult for you to obtain reliable information about the value, or risks, to which such an investment is exposed.

INCREASE TARGET PRICE

Oodles of organic opportunity

- **Earnings review:** Fortis reported Q3 2010 headline EPS (FD) of C\$0.26 and a CS calculated adjusted figure of C\$0.25 for a regulatory reversal. The adjusted figure was largely in line with our C\$0.25 estimate, but higher than the Street's C\$0.241 view and within the C\$0.23-C\$0.26 range. In our view, Fortis continues to make steady progress in delivering a relatively consistent and predictable set of financial results from a largely regulated asset base. Accordingly, we do not place undue emphasis on quarterly results in much of our universe as a result of the inherently long-cycle nature of many assets. For Fortis, we continue to focus on the ongoing significant regulated capital plan along with the positive upward bias to regulated returns.
- **Significant organic growth continues:** As expected, Fortis continued to provide a robust outlook for its utility capital program. The company expects consolidated gross capital expenditures to be roughly C\$1.1bn for 2010 and about C\$5.5bn over the next five years which is roughly C\$500m more than announced in Q2 2010 with 84% of that total amount going to utility activity.
- **Improving capital market conditions:** Historically, Fortis has been very adept at acquisitions. Corporate growth has benefited from the company's ability to successfully acquire and integrate selected assets. In our view, the company is well positioned in the current market for various acquisition opportunities.
- **Valuation:** In light of the current interest rate environment, we have slightly adjusted our target price to C\$32.00 from the previous C\$30.00. That target price is obtained utilizing multiple valuation methodologies, including: an 18.0x P/E multiple of 2011 earnings; a 1.76x book value multiple; and, a DCF based valuation. We reiterate our Neutral rating.

DISCLOSURE APPENDIX CONTAINS IMPORTANT DISCLOSURES, ANALYST CERTIFICATIONS, INFORMATION ON TRADE ALERTS, ANALYST MODEL PORTFOLIOS AND THE STATUS OF NON-U.S. ANALYSTS. U.S. Disclosure: Credit Suisse does and seeks to do business with companies covered in its research reports. As a result, investors should be aware that the Firm may have a conflict of interest that could affect the objectivity of this report. Investors should consider this report as only a single factor in making their investment decision.

Fortis reported Q3 2010 headline EPS (FD) of C\$0.26 and a CS calculated adjusted figure of C\$0.25 for a regulatory reversal. The adjusted figure was largely in line with our C\$0.25 estimate, but higher than the Street's C\$0.241 view and within the C\$0.23-C\$0.26 range. The adjusted figure excluded the C\$4m related to BCUC's approved reversal of certain cost overruns in Q4 2009. We do not place undue emphasis on quarterly results in much of our universe as a result of the inherently long-cycle nature of many assets. Our focus is largely upon the company's continuing significant regulated capital plan and the positive upward bias to regulated returns.

Meeting expectations

This research note is divided into three parts: (a) results; (b) outlook; and, (c) valuation. Each of these areas will be addressed in greater detail below.

Results

Exhibit 1 highlights the segmented unadjusted earnings contributions for the most recent quarter and for the comparable period one year ago. Our commentary for each segment appears under the various headings below.

Exhibit 1: Segmented unadjusted earnings contribution

C\$ in millions, unless otherwise stated

	Q3 2010	Q3 2009	chg y/y
Regulated Gas Utilities - Canadian	(5)	(3)	-67%
Regulated Electric Utilities - Canadian	43	36	19%
Regulated Electric Utilities - Caribbean	8	7	14%
Non-regulated - Fortis Generation	9	4	125%
Non-regulated - Fortis Properties	9	9	0%
Corporate and other	(19)	(17)	-12%
Net earnings applicable to common shares	45	36	25%

Source: Company data and Credit Suisse

Regulated Gas Utilities - Canadian

The unadjusted earnings for this segment decreased by roughly 67% year-over-year (see Exhibit 2). Some notable items for the regulated gas utilities, include:

- Net customer additions were 3,460 during 9M 2010 versus net addition of 743 during 9M 2009;
- The amount of customer additions increased versus 9M 2009 due increased building activity, customer reconnections because of cooler weather in Q3 2010 versus Q3 2009; and,
- Sales volumes increased for both the Core-Residential and Commercial and for the Industrial segment. Transportation volumes also increased.

Regulated Electric Utilities – Canadian

This segment includes operating companies like FortisBC, FortisAlberta, Newfoundland Power and Other Canadian Electric Utilities, which includes Maritime Electric and FortisOntario. Detailed contributions for each of these divisions can be found in Exhibit 3.

Exhibit 3: Regulated electric utilities – Canadian contribution (unadjusted)

C\$ in millions, unless otherwise stated

	Q3 2010	Q3 2009	chg y/y
FortisBC	11	9	22%
FortisAlberta	19	15	27%
Newfoundland Power	8	7	14%
Other Cdn Electric Utilities	5	5	0%
Earnings	43	36	19%

Source: Company data and Credit Suisse

FortisBC

Segmented earnings at FortisBC increased by 22% compared to the same period last year. The increase was due to an increase in customer electricity rates starting in January 2010 and September 1 2010, and increased in PBR incentive adjustments and lower finance charges. See Exhibit 4 for selected highlights.

Slight decrease in energy deliveries in BC

Exhibit 4: Selected FortisBC performance highlights (unadjusted)

	Q3 2010	Q3 2009	chg y/y
Energy deliveries (GWh)	709	720	-2%
Revenue (C\$/MWh)	87.45	79.17	10%
Energy supply costs (C\$/MWh)	22.57	20.83	8%
Operating expenses (C\$/MWh)	23.98	22.22	8%
Gross margin (C\$/MWh)	40.90	36.11	13%
Earnings (C\$millions)	11	9	22%

Source: Company data and Credit Suisse

FortisAlberta

Earnings at this regulated utility were up by roughly 27% comparing Q3 2010 versus the prior period. The increase was primarily due to increase in electricity distribution rates due to increase in allowed ROE and equity component; continued growth in the system; and customer growth. See Exhibit 5 for selected highlights.

Slight decrease in energy delivery in Alberta

Exhibit 5: Selected FortisAlberta performance highlights (unadjusted)

	Q3 2010	Q3 2009	chg y/y
Energy deliveries (GWh)	3,778	3,819	-1%
Revenue (C\$/MWh)	28.85	22.00	31%
Operating expenses (C\$/MWh)	8.73	8.64	1%
Gross margin (C\$/MWh)	20.12	13.35	51%
Earnings (C\$millions)	19	15	27%

Source: Company data and Credit Suisse

Newfoundland Power

This segment's earnings generation was higher by roughly 14% when comparing Q3 2010 versus Q3 2009 due to increase in electricity rates starting January 1, 2010 and increased in electricity sales. Energy deliveries were up by approximately 3.5% (see Exhibit 6).

Increase in NP's energy deliveries

Exhibit 6: Selected Newfoundland Power performance highlights (unadjusted)

	Q3 2010	Q3 2009	chg y/y
Energy deliveries (GWh)	916	885	4%
Revenue (C\$/MWh)	108.08	105.08	3%
Energy supply costs (C\$/MWh)	54.59	56.50	-3%
Operating expenses (C\$/MWh)	17.47	13.56	29%
Gross margin (C\$/MWh)	36.03	35.03	3%
Earnings (C\$millions)	8	7	14%

Source: Company data, Credit Suisse estimates

Other Canadian Electric Utilities

The roughly 13% increase in energy deliveries was primarily the result of the Algoma Power Inc. acquisition and greater consumption at PEI and Ontario. Without the Algoma acquisition, energy deliveries increased by 5.8%. Exhibit 7 contains selected highlights.

Increased in energy deliveries

Exhibit 7: Selected Other Canadian Electric Utilities performance highlights (unadjusted)

	Q3 2010	Q3 2009	chg y/y
Energy deliveries (GWh)	583	514	13%

Energy supply costs (C\$/MWh)	97.77	89.49	9%
Operating expenses (C\$/MWh)	18.87	15.56	21%
Gross margin (C\$/MWh)	32.59	31.13	5%
Earnings (C\$millions)	5	5	0%

Source: Company data and Credit Suisse

Regulated Electric Utilities – Caribbean

This segment includes Belize Electricity, Caribbean Utilities, and Fortis Turks and Caicos. Earnings for this segment were flat compared to the same quarter last year. Energy deliveries increased by 1.9% on a year-over-year basis. Aside from some regulatory matters discussed below, economic conditions may have stabilized/improved with a “[i]mproving tourism activity in the Turks and Caicos Islands”. On the regulatory front, the ongoing situation with Belize Electricity requires a degree of monitoring. In brief, the utility received an adverse regulatory decision relating to a rate application. Moreover, there have been changes to the electricity legislation in Belize that have been challenged by the Fortis-owned utility. The company stated

“Changes made in electricity legislation by the Government of Belize and the PUC, and the PUC’s June 2008 Final Decision on Belize Electricity’s 2008/2009 Rate Application and the PUC’s amendment to the June 2008 Final Decision, which were based on the changed legislation, have been judicially challenged by Belize Electricity in several proceedings. The judicial process is ongoing with interim rulings, judgments and appeals. The timing or likely final outcome of the proceedings is indeterminable at this time. In response to an application from Belize Electricity, the Supreme Court of Belize issued an order in June 2010 prohibiting the PUC from carrying out any rate-setting review proceedings, changing any rates and taking any enforcement or penal steps against Belize Electricity until further order of the Supreme Court. The evidentiary portion of the trial of Belize Electricity’s appeal of the PUC’s June 2008 Final Decision was heard in October 2010. Closing arguments are expected to be completed in early December 2010 so that the case will be closed pending judgment of the Court”

Belize situation requires ongoing monitoring

“As a result of the regulatory’s Final Decision on Belize Electricity’s 2008/2009 Rate Application in June 2008, Belize Electricity does not meet certain debt covenant financial ratios related to loans with the International Bank for Reconstruction and Development and the Caribbean Development Bank totalling \$5 million (BZ\$10 million) as at September 30, 2010.”

Fortis Turks and Caicos, received on June 2010 notice from the Governor of the Turks and Caicos Islands that the company’s electricity rate review filing was not accepted, “because of concern of the impact that the proposed rate increase might have on key sectors of the Island’s economy.” The company stated that it is, “continuing discussions with the Government and has requested the Governor to appoint an outside, independent consultant to review the filing and the current rate setting mechanism and make recommendations regarding both.”

See Exhibit 8 below for selected highlights.

Exhibit 8: Caribbean - Regulated Electric Utilities performance highlights (unadjusted)

	Q3 2010	Q3 2009	chg y/y
Energy deliveries (GWh)	318	312	2%

Non-regulated – Fortis Generation

The non-regulated generation assets within this segment are located in Belize, British Columbia, Central Newfoundland, Ontario and Upper New York State. Earnings for the segment were up 125% from the current quarter compared to the same quarter last year. Energy deliveries decreased by 37% from Q3 2009 to Q3 2010 due to higher rainfall and the commissioning of the Vaca hydroelectric facility in Belize. See the table below for selected highlights.

Exhibit 9: Non-regulated generation – selected highlights

	Q3 2010	Q3 2009	chg y/y
Energy deliveries (GWh)	134	98	37%
Revenue (C\$/MWh)	97.01	81.63	19%
Energy supply costs (C\$/MWh)	-	-	NA
Operating expenses (C\$/MWh)	14.93	20.41	-27%
Gross margin (C\$/MWh)	82.09	61.22	34%
Earnings (C\$millions)	9	4	125%

Source: Company data and Credit Suisse

Non-regulated – Fortis Properties

Fortis Properties' net unadjusted earning contribution during the quarter was C\$9m which is similar to earnings in Q3 2009. REVPAR slightly increased to C\$89.54 from C\$89.02 for the comparable period last year. Additionally, the occupancy rate of the Real Estate Division was down at 93.7% versus last year's 96.2%.

Corporate

Corporate expenses increased to C\$19 million in Q3 2010 from C\$17m in Q3 2009.

Outlook

We continue to believe investor, whether existing or prospective, should consider several major issues, including (a) funding organic growth; (b) rising returns; and, (c) acquisition trail. Each of these issues is addressed below.

Funding organic growth

In the most recent quarter the company's reported capital expenditures totaled C\$271 million, of which C\$262 million was spent at regulated utilities. Fortis maintains that capital expenditures for 2010 will be roughly C\$1.1 billion. A majority of the total will be spent on Western Canadian assets (Terasen Gas, FortisAlberta, and FortisBC). The company's expectations continue to be for consolidated gross capital expenditures over 5 years (2011-2015) approaching C\$5.5bn with 63% of that total amount being allocated to regulated utilities. Both FortisAlberta and FortisBC will receive the vast majority of that amount; whereas, the regulated gas utilities are planned to receive 21% of the total capex amount, and 16% is allocated to non-regulated operations. Three percent is expected to be at the non-regulated operations. Given the regulated rates of return with utility capital expenditures, the increases should be viewed as longer-term positives provided an appropriate financial balance is struck.

Ongoing organic growth

With the significant current relative valuation advantages, we believe that Fortis may become more motivated to explore possible capital efficiency initiatives. In our view, the company possesses ample opportunities to become much more capital efficient. One strategy involves divesting certain non-utility assets and redeploying capital into utility assets or funding the capital program. Another option would entail divesting partial interests in selected utility assets in an asset management model approach and receiving a management fee.

In fact, some of the media reports prior to the official announcement of PPL Corporation's acquisition of E.ON's Kentucky utility assets for US\$7.625 billion stated that a consortium led by Fortis Inc. was one of three finalists for those assets. We would regard that type of information in media reports as being something akin to an asset management style of approach. Ultimately, we believe that such a strategy would help Fortis generate a higher level of returns. Additionally, the use of an asset management type approach would make large acquisitions which could potentially further accelerate growth.

Opportunities for improved capital efficiency

Generally, we continue to prefer pure-play utility companies without an undue amount of non-core asset exposure. Historically, non-core assets (especially real estate) have been somewhat commonplace for many utilities. Fortis has been no exception to that approach. Notably, the mix of commercial and hospitality real estate assets held by Fortis have been positive contributors and also provide the company a bit of financial flexibility for a selection of reasons. In light of current market conditions, we believe there is a much less compelling case for the monetization of these assets than as in the past. We note Fortis Properties continues to increase in scale and scope which may eventually make it more attractive for acquisition or monetization. Yet, for a number of reasons, we continue to believe there is a rather low probability of either of those events occurring.

Even discounting the potential monetization of assets that we would consider to be non-core, we believe Fortis possesses considerable potential to become much more capital efficient. Given the significant interest in infrastructure assets by many investors seeking long-dated types of return, Fortis could easily divest portions of its existing asset base to pension fund investors and charge a management fee for their operational and management expertise. This type of approach could significantly improve capital efficiency and returns on capital. In addition, this asset management approach could also free-up capital that could be used to fund the existing capital program or fund future acquisitions.

Capital efficiency initiatives could aid funding of acquisitions or the existing capital program funding

Rising returns

Positively, Fortis has been successful in obtaining several favourable regulatory decisions. For example, the allowed equity at Terasen Gas Inc. (TGI) was boosted from 35% to 40% effective January 1, 2010. In addition to that positive move for the equity base, the allowed return on equity for TGI increased from 8.47% to 9.50%. In a related judgment, Terasen Gas (Vancouver Island) Inc. (TGVI) and Terasen Gas Whistler Inc. (TGWI) returns increased from 9.17% to 10%. Additionally, the British Columbia Utilities Commission (BCUC) held the former automatic adjustment mechanism for annual ROE determination would no longer apply. Also in BC, FortisBC obtained an increased allowed ROE from 8.87% to 9.90% that became effective on January 1, 2010. The upward bias in utility returns should be viewed positively. Clearly, many questions exist as to the methods for determining and predicting future return levels. Yet, we view the regulatory movement away from a very mechanical return approach work as a notable positive that should help ensure an appropriate level of returns over a period of time.

Similar to the BCUC, the Alberta Utilities Commission (AUC) issued a decision on the 2009 Generic Cost of Capital establishing a 9% ROE for utilities like FortisAlberta in 2009 and 2010. Under the previous formulaic approach, that utility would have been entitled to an 8.61% return. Moreover, the allowed equity within the regulated capital structure moved from 37% to 41% effective January 1, 2009. Notably, this return framework will be in effect for 2011 providing a level of certainty to FortisAlberta's future earnings.

Unfortunately, not every jurisdiction is proving to be as progressive as Alberta, BC and the National Energy Board regulated Trans-Quebec & Maritimes Pipeline decision (see file RH-1-2008 and our March 19, 2009 note “*Regulatory round-up*”). The Newfoundland and Labrador Board of Commissioners of Public Utilities (PUB) most recent decision increased the allowed ROE for Newfoundland Power from 8.95% in 2009 to 9% in 2010. Additionally, in the past, the PUB ordered Newfoundland Power’s allowed ROEs for 2011 and 2012 would be determined by an automated formula that will be subject to review in Q1 2010. We do not need to belabour all of the regulatory developments, however, we note that returns are slowly biasing to the upside. The only challenge with the upward bias is that it comes at a time of potentially rising interest rates.

Acquisition trail

In our view, Fortis continues to demonstrate a rather impressive ability to successfully integrate acquisitions. Additionally, we view acquisitions as somewhat central to the company’s growth strategy. For instance, the company’s most recent Management Discussion and Analysis stated “Fortis continues to pursue acquisitions to build on this organic growth, focusing on regulated electric and natural gas utilities in the United States and Canada” Given the success of Fortis in past transactions, as measured in terms of financials, share price and operationally, we believe the company’s current valuation and skill set may lead to some potentially value creating acquisition activity (see Exhibit 10 below for select Fortis M&A transactions).

Exhibit 10: Selected Fortis M&A transactions

\$ in millions, unless otherwise stated

Announced Date	Asset/Company	Deal value (\$m)	Comment
7/22/2009	Caribbean Utilities Co.	CAD 6.74	Acquired an additional 2.7% of Caribbean Utilities Co.
6/23/2009	Great Lakes Power Distribution	CAD 68.00	Acquired from Brookfield the utility that serves the District of Algoma in northern Ontario.
10/1/2008	Grimsby Power Inc.	CAD 1.10	Acquired a 10% minority interest.
10/1/2008	Caribbean Utilities Co.	CAD 3.00	Acquired an additional 1% of Caribbean Utilities Co.

	Total USD	USD 65.50	
	Total CAD	CAD 6,214.48	

Source: Bloomberg, Company data and Credit Suisse

In terms of acquisitions, we believe Fortis has a few advantages over others, including:

- Fortis has growing expertise with both electric and gas utilities;

- Larger size will allow it to look at a larger spectrum of potential target companies;
- A proven ability to effectively integrate acquisitions;
- A rather strong appetite for yield oriented securities in Canada;
- The potential ability to support a transaction with pension fund capital;
- Canada's rather benign interest rate environment; and,
- Bought deal financing commonly employed in Canada.

Fortis possesses a number of absolute and relative advantages over some other competitors

Historically, Fortis has been very adept at acquisitions. Corporate growth has benefited from the company's ability to successfully acquire and integrate selected assets. Capital market conditions are demonstrating signs of improved functioning. Therefore, the typical Fortis acquisition strategy is more palatable in current capital markets. For greater details, please refer to our 6 August 2009 note entitled "*Pondering a Portland purchase?*"

Valuation

We continue to believe that Fortis has strong organic growth in key areas such as British Columbia, Alberta and the Caribbean. In our view, the company faces a delicate balance of capital investment opportunities and cash flow needs. From our perspective, the next big catalysts for the stock will likely revolve around capital efficiency initiatives or a large scale acquisition which will always lack predictability. At this time, we made several adjustments to our financial model. As a result of the quarter, we slightly revised our EPS estimates for 2010 to C\$1.67 from C\$1.68. In light of the current interest rate environment, we have slightly adjusted our target price to C\$32.00 from the previous C\$30.00. That target price is obtained utilizing multiple valuation methodologies, including: an 18.0x P/E multiple of 2011 earnings; a 1.76x book value multiple; and, a DCF based valuation. We reiterate our Neutral rating.

Rating: Neutral

Target: C\$32 up from C\$30

1/25/10	28.5	30		

The analyst(s) responsible for preparing this research report received compensation that is based upon various factors including Credit Suisse's total revenues, a portion of which are generated by Credit Suisse's investment banking activities.

Analysts' stock ratings are defined as follows:

Outperform (O): The stock's total return is expected to outperform the relevant benchmark* by at least 10-15% (or more, depending on perceived risk) over the next 12 months.

Neutral (N): The stock's total return is expected to be in line with the relevant benchmark* (range of $\pm 10\text{-}15\%$) over the next 12 months.

Underperform (U): The stock's total return is expected to underperform the relevant benchmark* by 10-15% or more over the next 12 months.

Relevant benchmark by region: As of 29th May 2009, Australia, New Zealand, U.S. and Canadian ratings are based on (1) a stock's absolute total return potential to its current share price and (2) the relative attractiveness of a stock's total return potential within an analyst's coverage universe, with Outperforms representing the most attractive, Neutrals the less attractive, and Underperforms the least attractive investment opportunities. Some U.S. and Canadian ratings may fall outside the absolute total return ranges defined above, depending on market conditions and industry factors. For Latin American, Japanese, and non-Japan Asia stocks, ratings are based on a stock's total return relative to the average total return of the relevant country or regional benchmark; for European stocks, ratings are based on a stock's total return relative to the analyst's coverage universe**. For Australian and New Zealand stocks a 22% and a 12% threshold replace the 10-15% level in the Outperform and Underperform stock rating definitions, respectively, subject to analysts' perceived risk. The 22% and 12% thresholds replace the +10-15% and -10-15% levels in the Neutral stock rating definition, respectively, subject to analysts' perceived risk.*

***An analyst's coverage universe consists of all companies covered by the analyst within the relevant sector.*

Restricted (R): In certain circumstances, Credit Suisse policy and/or applicable law and regulations preclude certain types of communications, including an investment recommendation, during the course of Credit Suisse's engagement in an investment banking transaction and in certain other circumstances.

Volatility Indicator [V]: A stock is defined as volatile if the stock price has moved up or down by 20% or more in a month in at least 8 of the past 24 months or the analyst expects significant volatility going forward.

Analysts' coverage universe weightings are distinct from analysts' stock ratings and are based on the expected performance of an analyst's coverage universe* versus the relevant broad market benchmark:**

Overweight: Industry expected to outperform the relevant broad market benchmark over the next 12 months.

Market Weight: Industry expected to perform in-line with the relevant broad market benchmark over the next 12 months.

Underweight: Industry expected to underperform the relevant broad market benchmark over the next 12 months.

**An analyst's coverage universe consists of all companies covered by the analyst within the relevant sector.*

***The broad market benchmark is based on the expected return of the local market index (e.g., the S&P 500 in the U.S.) over the next 12 months.*

Credit Suisse's distribution of stock ratings (and banking clients) is:

Global Ratings Distribution		
Outperform/Buy*	46%	(62% banking clients)
Neutral/Hold*	40%	(59% banking clients)
Underperform/Sell*	12%	(51% banking clients)
Restricted	2%	

**For purposes of the NYSE and NASD ratings distribution disclosure requirements, our stock ratings of Outperform, Neutral, and Underperform most closely correspond to Buy, Hold, and Sell, respectively; however, the meanings are not the same, as our stock ratings are determined on a relative basis. (Please refer to definitions above.) An investor's decision to buy or sell a security should be based on investment objectives, current holdings, and other individual factors.*

Price Target: (12 months) for (FTS.TO)

Method: We obtain our C\$32.00 target price for Fortis Inc. by using multiple valuation methodologies, yield base analysis, and discounted cash flow, all of which produce the C\$32.00 target. Our target price implies a P/E (price/earnings) multiple of 18.0x our 2011 EPS (earnings per share) estimate of C\$1.79 and an EV/EBITDA (enterprise value/earnings before interest, taxes, depreciation, and amortization) multiple of 10.0x our EBITDA estimate.

Risks: There are a number of risks to Fortis' achievement of our C\$32.00 target price: commodity prices; weather; environmental; regulatory; access to capital markets; and, interest rates. Moreover, one should never underestimate the power of the regulator in any regulated business.

Please refer to the firm's disclosure website at www.credit-suisse.com/researchdisclosures for the definitions of abbreviations typically used in the target price method and risk sections.

See the Companies Mentioned section for full company names.

The subject company (FTS.TO) currently is, or was during the 12-month period preceding the date of distribution of this report, a client of Credit Suisse.

Credit Suisse provided investment banking services to the subject company (FTS.TO) within the past 12 months.

Credit Suisse provided non-investment banking services, which may include Sales and Trading services, to the subject company (FTS.TO) within the past 12 months.

Credit Suisse expects to receive or intends to seek investment banking related compensation from the subject company (FTS.TO) within the next 3 months.

Credit Suisse has received compensation for products and services other than investment banking services from the subject company (FTS.TO) within the past 12 months.

Important Regional Disclosures

Singapore recipients should contact a Singapore financial adviser for any matters arising from this research report.

An analyst involved in the preparation of this report has visited certain material operations of the subject company (FTS.TO) within the past 12 months. The analyst may not have visited all material operations of the subject company. The travel expenses of the analyst in connection with such visits were not paid or reimbursed by the subject company, other than de minimus local travel expenses.

Restrictions on certain Canadian securities are indicated by the following abbreviations: NVS--Non-Voting shares; RVS--Restricted Voting Shares; SVS--Subordinate Voting Shares.

Individuals receiving this report from a Canadian investment dealer that is not affiliated with Credit Suisse should be advised that this report may not contain regulatory disclosures the non-affiliated Canadian investment dealer would be required to make if this were its own report.

As of the date of this report, Credit Suisse acts as a market maker or liquidity provider in the equities securities that are the subject of this report.

Principal is not guaranteed in the case of equities because equity prices are variable.

Commission is the commission rate or the amount agreed with a customer when setting up an account or at anytime after that.

CS may have issued a Trade Alert regarding this security. Trade Alerts are short term trading opportunities identified by an analyst on the basis of market events and catalysts, while stock ratings reflect an analyst's investment recommendations based on expected total return over a 12-month period relative to the relevant coverage universe. Because Trade Alerts and stock ratings reflect different assumptions and analytical methods, Trade Alerts may differ directionally from the analyst's stock rating.

The author(s) of this report maintains a CS Model Portfolio that he/she regularly adjusts. The security or securities discussed in this report may be a component of the CS Model Portfolio and subject to such adjustments (which, given the composition of the CS Model Portfolio as a whole, may differ from the recommendation in this report, as well as opportunities or strategies identified in Trading Alerts concerning the same security). The CS Model Portfolio and important disclosures about it are available at www.credit-suisse.com/ti.

To the extent this is a report authored in whole or in part by a non-U.S. analyst and is made available in the U.S., the following are important disclosures regarding any non-U.S. analyst contributors:

All trademarks, service marks and logos used in this report are trademarks or service marks or registered trademarks or service marks of CS or its affiliates.

The information, tools and material presented in this report are provided to you for information purposes only and are not to be used or considered as an offer or the solicitation of an offer to sell or to buy or subscribe for securities or other financial instruments. CS may not have taken any steps to ensure that the securities referred to in this report are suitable for any particular investor. CS will not treat recipients as its customers by virtue of their receiving the report. The investments or services contained or referred to in this report may not be suitable for you and it is recommended that you consult an independent investment advisor if you are in doubt about such investments or investment services. Nothing in this report constitutes investment, legal, accounting or tax advice or a representation that any investment or strategy is suitable or appropriate to your individual circumstances or otherwise constitutes a personal recommendation to you. CS does not offer advice on the tax consequences of investment and you are advised to contact an independent tax adviser. Please note in particular that the bases and levels of taxation may change.

CS believes the information and opinions in the Disclosure Appendix of this report are accurate and complete. Information and opinions presented in the other sections of the report were obtained or derived from sources CS believes are reliable, but CS makes no representations as to their accuracy or completeness. Additional information is available upon request. CS accepts no liability for loss arising from the use of the material presented in this report, except that this exclusion of liability does not apply to the extent that liability arises under specific statutes or regulations applicable to CS. This report is not to be relied upon in substitution for the exercise of independent judgment. CS may have issued, and may in the future issue, a trading call regarding this security. Trading calls are short term trading opportunities based on market events and catalysts, while stock ratings reflect investment recommendations based on expected total return over a 12-month period as defined in the disclosure section. Because trading calls and stock ratings reflect different assumptions and analytical methods, trading calls may differ directionally from the stock rating. In addition, CS may have issued, and may in the future issue, other reports that are inconsistent with, and reach different conclusions from, the information presented in this report. Those reports reflect the different assumptions, views and analytical methods of the analysts who prepared them and CS is under no obligation to ensure that such other reports are brought to the attention of any recipient of this report. CS is involved in many businesses that relate to companies mentioned in this report. These businesses include specialized trading, risk arbitrage, market making, and other proprietary trading.

Past performance should not be taken as an indication or guarantee of future performance, and no representation or warranty, express or implied, is made regarding future performance. Information, opinions and estimates contained in this report reflect a judgement at its original date of publication by CS and are subject to change without notice. The price, value of and income from any of the securities or financial instruments mentioned in this report can fall as well as rise. The value of securities and financial instruments is subject to exchange rate fluctuation that may have a positive or adverse effect on the price or income of such securities or financial instruments. Investors in securities such as ADR's, the values of which are influenced by currency volatility, effectively assume this risk.

Structured securities are complex instruments, typically involve a high degree of risk and are intended for sale only to sophisticated investors who are capable of understanding and assuming the risks involved. The market value of any structured security may be affected by changes in economic, financial and political factors (including, but not limited to, spot and forward interest and exchange rates), time to maturity, market conditions and volatility, and the credit quality of any issuer or reference issuer. Any investor interested in purchasing a structured product should conduct their own investigation and analysis of the product and consult with their own professional advisers as to the risks involved in making such a purchase.

Some investments discussed in this report have a high level of volatility. High volatility investments may experience sudden and large falls in their value causing losses when that investment is realised. Those losses may equal your original investment. Indeed, in the case of some investments the potential losses may exceed the amount of initial investment, in such circumstances you may be required to pay more money to support those losses. Income yields from investments may fluctuate and, in consequence, initial capital paid to make the investment may be used as part of that income yield. Some investments may not be readily realisable and it may be difficult to sell or realise those investments, similarly it may prove difficult for you to obtain reliable information about the value, or risks, to which such an investment is exposed.

INCREASE TARGET PRICE

Continuing capital control

- **Earnings review:** Fortis reported Q4 2010 headline EPS (FD) of C\$0.47 that missed our C\$0.54 estimate, the Street's C\$0.513 view and fell beneath the C\$0.48-C\$0.55 range. Against our numbers, the primary culprits looked to be timing issues at the regulated gas utilities, weakness at the Caribbean segment and our overly ambitious view on the Other Canadian Electric Utilities. In general, we believe Fortis continues to make steady progress in delivering relatively consistent financial results from a largely regulated asset base. We do not place undue emphasis on quarterly results in much of our universe as a result of the inherently long-cycle nature of many assets. For Fortis, we continue to focus on the ongoing significant regulated capital plan along with the potentially positive upward bias to regulated returns.
- **Significant organic growth continues:** As expected, Fortis continued to provide a robust outlook for its utility capital program. The company expects consolidated gross capital expenditures to be roughly C\$1.2bn for 2011 and about C\$5.5bn over the next five years with 83% of that total amount going to utility activity.
- **Improving capital market conditions:** Historically, Fortis has been very adept at acquisitions. Corporate growth has benefited from the company's ability to successfully acquire and integrate selected assets. In our view, the company is well positioned in the current market for acquisition opportunities.
- **Valuation:** Given the current interest rate environment and looking ahead to 2012 estimates, we boosted our target price to C\$34.00 from the previous C\$32.00. That target price is obtained from multiple valuation approaches, including: an 18.5x P/E multiple of 2012 earnings; a 1.8x book value multiple; and, a DCF based valuation. We reiterate our Neutral rating.

DISCLOSURE APPENDIX CONTAINS IMPORTANT DISCLOSURES, ANALYST CERTIFICATIONS, INFORMATION ON TRADE ALERTS, ANALYST MODEL PORTFOLIOS AND THE STATUS OF NON-U.S. ANALYSTS. U.S. Disclosure: Credit Suisse does and seeks to do business with companies covered in its research reports. As a result, investors should be aware that the Firm may have a conflict of interest that could affect the objectivity of this report. Investors should consider this report as only a single factor in making their investment decision.

Fortis reported Q4 2010 headline EPS (FD) of C\$0.47 that missed our C\$0.54 estimate, the Street's C\$0.513 view and fell beneath the C\$0.48-C\$0.55 range. Against our numbers, the primary culprits looked to be timing issues at the regulated gas utilities, weakness at the Caribbean segment and our overly ambitious view the Other Canadian Electric Utilities. In general, we believe Fortis continues to make steady progress in delivering relatively consistent financial results from a largely regulated asset base. For Fortis, we continue to focus on the ongoing significant regulated capital plan along with the potentially positive upward bias to regulated returns. This research note is divided into three parts: (a) results; (b) outlook; and, (c) valuation. Each of these areas will be addressed in greater detail below.

A modest miss

Results

Exhibit 1 highlights the segmented unadjusted earnings contributions for the most recent quarter and for the comparable period one year ago. Our commentary for each segment appears under the various headings below.

Exhibit 1: Segmented unadjusted earnings contribution

C\$ in millions, unless otherwise stated

	Q4 2010	Q4 2009	chg y/y
Regulated Gas Utilities - Canadian	45	48	-6%
Regulated Electric Utilities - Canadian	41	38	8%
Regulated Electric Utilities - Caribbean	5	7	-29%
Non-regulated - Fortis Generation	5	2	150%
Non-regulated - Fortis Properties	7	5	40%
Corporate and other	(18)	(19)	5%
Net earnings applicable to common shares	85	81	5%

Source: Company data and Credit Suisse

Regulated Gas Utilities - Canadian

The unadjusted earnings for this segment decreased by roughly 6% year-over-year (see Exhibit 2). Some notable items for the regulated gas utilities, include:

- Net customer additions were 9,400 during 2010 versus net addition of 8,200 during the full year 2009;
- The amount of customer additions increased versus 2009 due to increased building activity; and,
- Sales volumes for the quarter decreased for both the Core-Residential and Commercial and for the Industrial segment. Transportation volumes increased.

	Q4 2010	Q4 2009	chg y/y
Terasen Gas	45.0	48.0	-6%

Source: Company data and Credit Suisse

Regulated Electric Utilities – Canadian

This segment includes operating companies like FortisAlberta, FortisBC, Newfoundland Power and Other Canadian Electric Utilities, which includes Maritime Electric and FortisOntario. Detailed contributions for each of these divisions can be found in Exhibit 3.

Exhibit 3: Regulated electric utilities – Canadian contribution (unadjusted)

C\$ in millions, unless otherwise stated

	Q4 2010	Q4 2009	chg y/y
FortisAlberta	17	15	13%
FortisBC	10	8	25%
Newfoundland Power	9	8	13%
Other Cdn Electric Utilities	5	7	-29%
Earnings	41	38	8%

Source: Company data and Credit Suisse

FortisAlberta

Earnings at this regulated utility were up by roughly 13% comparing Q4 2010 versus the prior period. The increase was primarily due to increase in electricity distribution rates due to continued growth in the system, customer growth and higher regulator-approved expenses recoverable from customers. See Exhibit 4 for selected highlights.

Increase in energy delivery in Alberta

Exhibit 4: Selected FortisAlberta performance highlights (unadjusted)

	Q4 2010	Q4 2009	chg y/y
Energy deliveries (GWh)	4,255	4,129	3%
Revenue (C\$/MWh)	23.27	20.83	12%
Operating expenses (C\$/MWh)	8.70	8.23	6%
Gross margin (C\$/MWh)	14.57	12.59	16%
Earnings (C\$millions)	17	15	13%

Source: Company data and Credit Suisse

FortisBC

Segmented earnings at FortisBC increased by 25% compared to the same period last year. The increase was due to an increase in customer electricity rates starting in January 2010, increased in PBR incentive adjustments and lower corporate taxes. See Exhibit 5 for selected highlights.

Slight decrease in energy deliveries in BC

Exhibit 5: Selected FortisBC performance highlights (unadjusted)

	Q4 2010	Q4 2009	chg y/y
Energy deliveries (GWh)	847	859	-1%
Revenue (C\$/MWh)	86.19	80.33	7%
Energy supply costs (C\$/MWh)	27.15	25.61	6%
Operating expenses (C\$/MWh)	24.79	23.28	6%
Gross margin (C\$/MWh)	34.24	31.43	9%
Earnings (C\$millions)	10	8	25%

Source: Company data and Credit Suisse

Newfoundland Power

This segment's earnings generation was higher by roughly 13% when comparing Q4 2010 versus Q4 2009 due to increase in electricity rates starting January 1, 2010 and increased in electricity sales. Energy deliveries were up by approximately 1% (see Exhibit 6).

Slight increase in NP's energy deliveries

Exhibit 6: Selected Newfoundland Power performance highlights (unadjusted)

	Q4 2010	Q4 2009	chg y/y
Energy deliveries (GWh)	1,488	1,474	1%
Revenue (C\$/MWh)	102.15	99.05	3%
Energy supply costs (C\$/MWh)	68.55	67.16	2%
Operating expenses (C\$/MWh)	10.08	8.82	14%
Gross margin (C\$/MWh)	23.52	23.07	2%
Earnings (C\$millions)	9	8	13%

Source: Company data, Credit Suisse estimates

Other Canadian Electric Utilities

The roughly 1% decrease in energy deliveries was primarily the result of lower average consumption in Ontario. Exhibit 7 contains selected highlights.

Slight decrease in energy deliveries

Regulated Electric Utilities – Caribbean

This segment includes Belize Electricity, Caribbean Utilities, and Fortis Turks and Caicos. Earnings for this segment were down roughly 29% compared to the same quarter last year. Energy deliveries decreased by 7% on a year-over-year basis due to decreased air conditioning load because of lower average temperatures in the region. On the regulatory front, the ongoing situation with Belize Electricity requires a degree of monitoring. In brief, the utility received an adverse regulatory decision relating to a rate application. Moreover, there have been changes to the electricity legislation in Belize that have been challenged by the Fortis-owned utility. The company stated

Awaiting a decision in Belize

“The evidentiary portion of the trial of Belize Electricity’s appeal of the PUC’s June 2008 Final Decision was heard in October 2010 with closing arguments completed in December 2010. A court decision on the matter is expected in the first quarter of 2011.”

Fortis Turks and Caicos, received on September 2010 “draft proposals and terms of reference from the Governor of the Turks and Caicos Islands (the “Governor”) to review the Company’s Electricity Rate Review filing.” The company stated that “[m]anagement has acknowledged the Governor’s proposed terms of reference and objectives, and has proposed that a jointly funded and identified outside independent consultant be engaged to conduct a review of the filing and current rate-setting mechanism and make recommendations regarding both.”

See Exhibit 8 below for selected highlights.

Exhibit 8: Caribbean - Regulated Electric Utilities performance highlights (unadjusted)

	Q4 2010	Q4 2009	chg y/y
Energy deliveries (GWh)	270	291	-7%
Revenue (C\$/MWh)	311.11	292.10	7%
Energy supply costs (C\$/MWh)	188.89	171.82	10%
Operating expenses (C\$/MWh)	48.15	44.67	8%
Gross margin (C\$/MWh)	74.07	75.60	-2%
Earnings (C\$millions)	5	7	-29%

Non-regulated – Fortis Generation

The non-regulated generation assets within this segment are located in Belize, British Columbia, Central Newfoundland, Ontario and Upper New York State. Earnings for the segment were up 150% from the current quarter compared to the same quarter last year. Energy deliveries increased by 57% from Q4 2009 to Q4 2010 due to higher rainfall and the commissioning of the Vaca hydroelectric facility in Belize. See the table below for selected highlights.

Exhibit 9: Non-regulated generation – selected highlights

	Q4 2010	Q4 2009	chg y/y
Energy deliveries (GWh)	137	87	57%
Revenue (C\$/MWh)	65.69	57.47	14%
Energy supply costs (C\$/MWh)	-	-	n/a
Operating expenses (C\$/MWh)	14.60	22.99	-36%
Gross margin (C\$/MWh)	51.09	34.48	48%
Earnings (C\$millions)	5	2	150%

Source: Company data and Credit Suisse

Non-regulated – Fortis Properties

Fortis Properties' net unadjusted earning contribution during the quarter was C\$7m which is higher than Q4 2009 earnings of C\$5m. REVPAR slightly increased to C\$70.76 from C\$68.87 for the comparable period last year. Additionally, the occupancy rate of the Real Estate Division was down at 94.5% versus last year's 96.2%.

Corporate

Corporate expenses decreased to C\$18 million in Q4 2010 from C\$19m in Q4 2009.

Outlook

We continue to believe investor, whether existing or prospective, should consider several major issues, including (a) funding organic growth; (b) rising returns; and, (c) acquisition trail. Each of these issues is addressed below.

Funding organic growth

In the most recent quarter the company's reported capital expenditures totaled C\$370 million, of which C\$288 million was spent at regulated utilities. Fortis guided that capital expenditures for 2011 will be roughly C\$1.2 billion. A majority of the total will be spent on Western Canadian assets (Terasen Gas, FortisAlberta, and FortisBC). The company's expectations continue to be for consolidated gross capital expenditures over 5 years (2011-2015) approaching C\$5.5bn with 63% of that total amount being allocated to regulated utilities. Both FortisAlberta and FortisBC will receive the vast majority of that amount; whereas, the regulated gas utilities are planned to receive 20% of the total capex amount, and 17% is allocated to non-regulated operations. Given the regulated rates of return with utility capital expenditures, the increases should be viewed as longer-term positives provided an appropriate financial balance is struck.

Ongoing organic growth

With the significant current relative valuation advantages, we believe that Fortis may become more motivated to explore possible capital efficiency initiatives. In our view, the company possesses ample opportunities to become much more capital efficient. One strategy involves divesting certain non-utility assets and redeploying capital into utility assets or funding the capital program. Another option would entail divesting partial interests in selected utility assets in an asset management model approach and receiving a management fee.

In fact, some of the media reports prior to the official announcement of PPL Corporation's acquisition of E.ON's Kentucky utility assets for US\$7.625 billion stated that a consortium led by Fortis Inc. was one of three finalists for those assets. We would regard that type of information in media reports as being something akin to an asset management style of approach. Ultimately, we believe that such a strategy would help Fortis generate a higher level of returns. Additionally, the use of an asset management type approach would make large acquisitions which could potentially further accelerate growth.

Opportunities for improved capital efficiency

Generally, we continue to prefer pure-play utility companies without an undue amount of non-core asset exposure. Historically, non-core assets (especially real estate) have been somewhat commonplace for many utilities. Fortis has been no exception to that approach.

Notably, the mix of commercial and hospitality real estate assets held by Fortis have been positive contributors and also provide the company a bit of financial flexibility for a selection of reasons. In light of current market conditions, we believe there is a much less compelling case for the monetization of these assets than as in the past. We note Fortis Properties continues to increase in scale and scope which may eventually make it more attractive for acquisition or monetization. Yet, for a number of reasons, we continue to believe there is a rather low probability of either of those events occurring.

Even discounting the potential monetization of assets that we would consider to be non-core, we believe Fortis possesses considerable potential to become much more capital efficient. Given the significant interest in infrastructure assets by many investors seeking long-dated types of return, Fortis could easily divest portions of its existing asset base to pension fund investors and charge a management fee for their operational and management expertise. This type of approach could significantly improve capital efficiency and returns on capital. In addition, this asset management approach could also free-up capital that could be used to fund the existing capital program or fund future acquisitions.

Capital efficiency initiatives could aid funding of acquisitions or the existing capital program funding

Rising returns

Positively, Fortis has been successful in obtaining several favourable regulatory decisions. For example, the allowed equity at Terasen Gas Inc. (TGI) was boosted from 35% to 40% effective January 1, 2010. In addition to that positive move for the equity base, the allowed return on equity for TGI increased from 8.47% to 9.50%. In a related judgment, Terasen Gas (Vancouver Island) Inc. (TGV) and Terasen Gas Whistler Inc. (TGW) returns increased from 9.17% to 10%. Additionally, the British Columbia Utilities Commission (BCUC) held the former automatic adjustment mechanism for annual ROE determination would no longer apply. Also in BC, FortisBC obtained an increased allowed ROE from 8.87% to 9.90% that became effective on January 1, 2010. The upward bias in utility returns should be viewed positively. Clearly, many questions exist as to the methods for determining and predicting future return levels. Yet, we view the regulatory movement away from a very mechanical return approach work as a notable positive that should help ensure an appropriate level of returns over a period of time.

Similar to the BCUC, the Alberta Utilities Commission (AUC) issued a decision on the 2009 Generic Cost of Capital establishing a 9% ROE for utilities like FortisAlberta in 2009 and 2010. Under the previous formulaic approach, that utility would have been entitled to an 8.61% return. Moreover, the allowed equity within the regulated capital structure moved from 37% to 41% effective January 1, 2009. Notably, this return framework will be in effect for 2011 providing a level of certainty to FortisAlberta's future earnings.

Unfortunately, not every jurisdiction is proving to be as progressive as Alberta, BC and the National Energy Board regulated Trans-Quebec & Maritimes Pipeline decision (see file RH-1-2008 and our March 19, 2009 note "*Regulatory round-up*"). The Newfoundland and Labrador Board of Commissioners of Public Utilities (PUB) most recent decision increased the allowed ROE for Newfoundland Power from 8.95% in 2009 to 9% in 2010. Additionally, in the past, the PUB ordered Newfoundland Power's allowed ROEs for 2011 and 2012 would be determined by an automated formula that will be subject to review in Q1 2010. We do not need to belabour all of the regulatory developments, however, we note that returns are slowly biasing to the upside. The only challenge with the upward bias is that it comes at a time of potentially rising interest rates.

Acquisition trail

In our view, Fortis continues to demonstrate a rather impressive ability to successfully integrate acquisitions. Additionally, we view acquisitions as somewhat central to the company's growth strategy. For instance, the company's most recent Management Discussion and Analysis stated "We will continue to pursue acquisitions of regulated electric and natural gas utilities in the United States and Canada that will add value for our shareholders". Given the success of Fortis in past transactions, as measured in terms of financials, share price and operationally, we believe the company's current valuation and

skill set may lead to some potentially value creating acquisition activity (see Exhibit 10 below for select Fortis M&A transactions).

Exhibit 10: Selected Fortis M&A transactions

\$ in millions, unless otherwise stated

Announced Date	Asset/Company	Deal value (\$m)	Comment
7/22/2009	Caribbean Utilities Co.	CAD 6.74	Acquired an additional 2.7% of Caribbean Utilities Co.
6/23/2009	Great Lakes Power Distribution	CAD 68.00	Acquired from Brookfield the utility that serves the District of Algoma in northern Ontario.
10/1/2008	Grimsbey Power Inc.	CAD 1.10	Acquired a 10% minority interest.
10/1/2008	Caribbean Utilities Co.	CAD 3.00	Acquired an additional 1% of Caribbean Utilities Co.
8/15/2008	Caribbean Utilities Co.	CAD 25.00	Acquired an additional 2% of Caribbean Utilities Co.
7/23/2007	Delta Regina	CAD 49.95	Delta hotel located in Regina, Saskatchewan.
2/26/2007	Terasen Inc.	CAD 3,700.00	Gas distribution in British Columbia.
11/7/2006	Caribbean Utilities Co.	CAD 55.70	Acquired an additional 16% of Caribbean Utilities Co.
10/19/2006	4 hotels in western Canada	CAD 51.60	4 hotels (Holiday Inn, Best Western and Ramada) located in BC and Alberta.
8/28/2006	PPC Ltd & Atlantic Equipment & Power (Turks & Caicos) Ltd.	CAD 97.70	Electric utility that services ~80% of the Turks and Caicos Islands.
1/25/2005	3 hotels in western Canada	CAD 62.60	3 hotels in Western Canada from Greenwood Inns (Calgary, Edmonton and Winnipeg).
12/15/2004	Princeton Light & Power	CAD 3.70	PLP is an electric utility that services Princeton, BC.
5/21/2004	Belize Electric Company Ltd.	USD 3.50	Acquired the remaining 5% interest of the company.
9/17/2003	4 hotels in Ontario	CAD 43.20	4 hotels located in Ontario (Cambridge, Kitchener, Sarnia and Peterborough).

1/30/2003	Caribbean Utilities Co.	CAD 71.00	Acquired additional 3,863,695 Class A Ordinary Shares, representing approximately 15.9 per cent of the outstanding shares of the company and increased Fortis' holding to roughly 38%.
12/1/2002	Delta St John's Hotel and conference centre	CAD 25.90	Hotel in downtown St. John's, Newfoundland
5/9/2002	Cornwall Street Railway Light	CAD 67.70	City of Cornwall electric transmission & distribution utility.
4/16/2002	Kings Place	CAD 27.70	Commercial property in Fredericton, NB.
3/13/2002	Caribbean Utilities Co.	CAD 12.90	Acquired additional ~2% of the company.
3/20/2002	Niagara Power Co.	CAD 49.00	Purchase remaining 50% of Niagara Power Co.
2/1/2002	Cabot palace I	CAD 14.30	133,327 Square feet premium office tower in St. John's, Newfoundland
9/18/2001	Portfolio of properties in St. John's	CAD 8.30	Purchased TD Place commercial bldg and 6 parcels of land.
9/14/2001	Aliant Poles	CAD 46.00	Purchased 102,000 poles and related infrastructure from Aliant Telecom.
1/26/2001	Belize Electric Company Ltd.	USD 62.00	Acquired 95% of company from Duke Energy.
12/19/2000	2 Hydro generating stations	CAD 6.90	2 generating stations (6.88MW) in upper New York state.
12/14/2000	Brunswick Square Ltd.	CAD 6.20	Acquired 50% of the company Fortis doesn't own.
12/1/2000	Fort William Building and Blue cross centre	CAD 52.70	Fort William building in St. John's, Newfoundland and Blue cross centre in Moncton, New Brunswick.
2/23/2000	Caribbean Utilities Co.	CAD 79.90	Acquired 20% of the company.
12/30/1999	2 Hydro generating stations	CAD 19.77	2 generating stations (16MW) in upper New York state (Moose River & Philadelphia)
10/28/1999	Belize Electricity Ltd.	CAD 36.80	Acquired 67% interest in the main commercial generator, transmitter & distributor of electricity in Belize.
8/31/1999	Brunswick Square Ltd.	CAD 10.12	Acquired 50% of the company by Fortis Properties.
1/31/1999	Mount Peyton	CAD 2.20	Acquired all common shares and notes payable.
	Total USD	USD 65.50	
	Total CAD	CAD 6,214.48	

Source: Bloomberg, Company data and Credit Suisse

In terms of acquisitions, we believe Fortis has a few advantages over others, including:

- Fortis has growing expertise with both electric and gas utilities;
- Larger size will allow it to look at a larger spectrum of potential target companies;
- A proven ability to effectively integrate acquisitions;
- A rather strong appetite for yield oriented securities in Canada;
- The potential ability to support a transaction with pension fund capital;
- Canada's rather benign interest rate environment; and,
- Bought deal financing commonly employed in Canada.

Fortis possesses a number of absolute and relative advantages over some other competitors

Historically, Fortis has been very adept at acquisitions. Corporate growth has benefited from the company's ability to successfully acquire and integrate selected assets. Capital market conditions are demonstrating signs of improved functioning. Therefore, the typical Fortis acquisition strategy is more palatable in current capital markets. For greater details, please refer to our 6 August 2009 note entitled "Pondering a Portland purchase?"

Valuation

We continue to believe that Fortis has strong organic growth in key areas such as British Columbia, Alberta and the Caribbean. In our view, the company faces a delicate balance of capital investment opportunities and cash flow needs. From our perspective, the next big catalysts for the stock will likely revolve around capital efficiency initiatives or a large scale acquisition which will always lack predictability. At this time, we made several

Rating: Neutral

Target: C\$34, up from C\$32

adjustments to our financial model. As a result of the quarter, we slightly revised our EPS estimates for 2011 and 2012 to C\$1.76 and C\$1.86 from C\$1.79 and C\$1.87, respectively. Given the current interest rate environment and looking ahead to 2012 estimates, we boosted our target price to C\$34.00 from the previous C\$32.00. That target price is obtained from multiple valuation approaches, including: an 18.5x P/E multiple of 2012 earnings; a 1.8x book value multiple; and, a DCF based valuation. We reiterate our Neutral rating.

3-Year Price, Target Price and Rating Change History Chart for FTS.TO

The analyst(s) responsible for preparing this research report received compensation that is based upon various factors including Credit Suisse's total revenues, a portion of which are generated by Credit Suisse's investment banking activities.

Analysts' stock ratings are defined as follows:

Outperform (O): The stock's total return is expected to outperform the relevant benchmark* by at least 10-15% (or more, depending on perceived risk) over the next 12 months.

Neutral (N): The stock's total return is expected to be in line with the relevant benchmark* (range of $\pm 10-15\%$) over the next 12 months.

Underperform (U): The stock's total return is expected to underperform the relevant benchmark* by 10-15% or more over the next 12 months.

*Relevant benchmark by region: As of 29th May 2009, Australia, New Zealand, U.S. and Canadian ratings are based on (1) a stock's absolute total return potential to its current share price and (2) the relative attractiveness of a stock's total return potential within an analyst's coverage universe**, with Outperforms representing the most attractive, Neutrals the less attractive, and Underperforms the least attractive investment opportunities. Some U.S. and Canadian ratings may fall outside the absolute total return ranges defined above, depending on market conditions and industry factors. For Latin American, Japanese, and non-Japan Asia stocks, ratings are based on a stock's total return relative to the average total return of the relevant country or regional benchmark; for European stocks, ratings are based on a stock's total return relative to the analyst's coverage universe**. For Australian and New Zealand stocks a 22% and a 12% threshold replace the 10-15% level in the Outperform and Underperform stock rating definitions, respectively, subject to analysts' perceived risk. The 22% and 12% thresholds replace the +10-15% and -10-15% levels in the Neutral stock rating definition, respectively, subject to analysts' perceived risk.

**An analyst's coverage universe consists of all companies covered by the analyst within the relevant sector.

Restricted (R): In certain circumstances, Credit Suisse policy and/or applicable law and regulations preclude certain types of communications, including an investment recommendation, during the course of Credit Suisse's engagement in an investment banking transaction and in certain other circumstances.

Volatility Indicator [V]: A stock is defined as volatile if the stock price has moved up or down by 20% or more in a month in at least 8 of the past 24 months or the analyst expects significant volatility going forward.

Analysts' coverage universe weightings are distinct from analysts' stock ratings and are based on the expected performance of an analyst's coverage universe* versus the relevant broad market benchmark:**

Overweight: Industry expected to outperform the relevant broad market benchmark over the next 12 months.

Market Weight: Industry expected to perform in-line with the relevant broad market benchmark over the next 12 months.

Underweight: Industry expected to underperform the relevant broad market benchmark over the next 12 months.

*An analyst's coverage universe consists of all companies covered by the analyst within the relevant sector.

**The broad market benchmark is based on the expected return of the local market index (e.g., the S&P 500 in the U.S.) over the next 12 months.

Credit Suisse's distribution of stock ratings (and banking clients) is:

	Global Ratings Distribution	
Outperform/Buy*	45%	(62% banking clients)
Neutral/Hold*	41%	(59% banking clients)
Underperform/Sell*	11%	(54% banking clients)
Restricted	2%	

*For purposes of the NYSE and NASD ratings distribution disclosure requirements, our stock ratings of Outperform, Neutral, and Underperform most closely correspond to Buy, Hold, and Sell, respectively; however, the meanings are not the same, as our stock ratings are determined on a relative basis. (Please refer to definitions above.) An investor's decision to buy or sell a security should be based on investment objectives, current holdings, and other individual factors.

Price Target: (12 months) for (FTS.TO)

Method: We obtain our C\$34.00 target price for Fortis Inc. by using multiple valuation methodologies, yield base analysis, and discounted cash flow, all of which produce the C\$34.00 target. Our target price implies a P/E (price/earnings) multiple of 18.5x our 2012 EPS (earnings per share) estimate of C\$1.86 and an EV/EBITDA (enterprise value/earnings before interest, taxes, depreciation, and amortization) multiple of 10.0x our EBITDA estimate.

Risks: There are a number of risks to Fortis' achievement of our C\$34.00 target price: commodity prices; weather; environmental; regulatory; access to capital markets; and, interest rates. Moreover, one should never underestimate the power of the regulator in any regulated business.

Please refer to the firm's disclosure website at www.credit-suisse.com/researchdisclosures for the definitions of abbreviations typically used in the target price method and risk sections.

See the Companies Mentioned section for full company names.

The subject company (FTS.TO) currently is, or was during the 12-month period preceding the date of distribution of this report, a client of Credit Suisse.

Credit Suisse provided investment banking services to the subject company (FTS.TO) within the past 12 months.

Credit Suisse provided non-investment banking services, which may include Sales and Trading services, to the subject company (FTS.TO) within the past 12 months.

Credit Suisse expects to receive or intends to seek investment banking related compensation from the subject company (FTS.TO) within the next 3 months.

Credit Suisse has received compensation for products and services other than investment banking services from the subject company (FTS.TO) within the past 12 months.

Important Regional Disclosures

Singapore recipients should contact a Singapore financial adviser for any matters arising from this research report.

An analyst involved in the preparation of this report has visited certain material operations of the subject company (FTS.TO) within the past 12 months. The analyst may not have visited all material operations of the subject company. The travel expenses of the analyst in connection with such visits were not paid or reimbursed by the subject company, other than de minimus local travel expenses.

Restrictions on certain Canadian securities are indicated by the following abbreviations: NVS--Non-Voting shares; RVS--Restricted Voting Shares; SVS--Subordinate Voting Shares.

Individuals receiving this report from a Canadian investment dealer that is not affiliated with Credit Suisse should be advised that this report may not contain regulatory disclosures the non-affiliated Canadian investment dealer would be required to make if this were its own report.

For Credit Suisse Securities (Canada), Inc.'s policies and procedures regarding the dissemination of equity research, please visit http://www.csfb.com/legal_terms/canada_research_policy.shtml.

As of the date of this report, Credit Suisse acts as a market maker or liquidity provider in the equities securities that are the subject of this report.

Principal is not guaranteed in the case of equities because equity prices are variable.

Commission is the commission rate or the amount agreed with a customer when setting up an account or at anytime after that.

CS may have issued a Trade Alert regarding this security. Trade Alerts are short term trading opportunities identified by an analyst on the basis of market events and catalysts, while stock ratings reflect an analyst's investment recommendations based on expected total return over a 12-month period relative to the relevant coverage universe. Because Trade Alerts and stock ratings reflect different assumptions and analytical methods, Trade Alerts may differ directionally from the analyst's stock rating.

The author(s) of this report maintains a CS Model Portfolio that he/she regularly adjusts. The security or securities discussed in this report may be a component of the CS Model Portfolio and subject to such adjustments (which, given the composition of the CS Model Portfolio as a whole, may differ from the recommendation in this report, as well as opportunities or strategies identified in Trading Alerts concerning the same security). The CS Model Portfolio and important disclosures about it are available at www.credit-suisse.com/ti.

To the extent this is a report authored in whole or in part by a non-U.S. analyst and is made available in the U.S., the following are important disclosures regarding any non-U.S. analyst contributors:

The non-U.S. research analysts listed below (if any) are not registered/qualified as research analysts with FINRA. The non-U.S. research analysts listed below may not be associated persons of CSSU and therefore may not be subject to the NASD Rule 2711 and NYSE Rule 472 restrictions on communications with a subject company, public appearances and trading securities held by a research analyst account.

- Andrew M. Kuske, non-U.S. analyst, is a research analyst employed by Credit Suisse Securities (Canada), Inc..
- Paul Tan, non-U.S. analyst, is a research analyst employed by Credit Suisse Securities (Canada), Inc..

Where this research report is about a non-Taiwanese company, written by a Taiwan-based analyst, it is not a recommendation to buy or sell securities

For Credit Suisse disclosure information on other companies mentioned in this report, please visit the website at www.credit-suisse.com/researchdisclosures or call +1 (877) 291-2683.

Disclaimers continue on next page.

This report is not directed to, or intended for distribution to or use by, any person or entity who is a citizen or resident of or located in any locality, state, country or other jurisdiction where such distribution, publication, availability or use would be contrary to law or regulation or which would subject Credit Suisse AG, the Swiss bank, or its subsidiaries or its affiliates ("CS") to any registration or licensing requirement within such jurisdiction. All material presented in this report, unless specifically indicated otherwise, is under copyright to CS. None of the material, nor its content, nor any copy of it, may be altered in any way, transmitted to, copied or distributed to any other party, without the prior express written permission of CS. All trademarks, service marks and logos used in this report are trademarks or service marks or registered trademarks or service marks of CS or its affiliates.

The information, tools and material presented in this report are provided to you for information purposes only and are not to be used or considered as an offer or the solicitation of an offer to sell or to buy or subscribe for securities or other financial instruments. CS may not have taken any steps to ensure that the securities referred to in this report are suitable for any particular investor. CS will not treat recipients as its customers by virtue of their receiving the report. The investments or services contained or referred to in this report may not be suitable for you and it is recommended that you consult an independent investment advisor if you are in doubt about such investments or investment services. Nothing in this report constitutes investment, legal, accounting or tax advice or a representation that any investment or strategy is suitable or appropriate to your individual circumstances or otherwise constitutes a personal recommendation to you. CS does not offer advice on the tax consequences of investment and you are advised to contact an independent tax adviser. Please note in particular that the bases and levels of taxation may change.

CS believes the information and opinions in the Disclosure Appendix of this report are accurate and complete. Information and opinions presented in the other sections of the report were obtained or derived from sources CS believes are reliable, but CS makes no representations as to their accuracy or completeness. Additional information is available upon request. CS accepts no liability for loss arising from the use of the material presented in this report, except that this exclusion of liability does not apply to the extent that liability arises under specific statutes or regulations applicable to CS. This report is not to be relied upon in substitution for the exercise of independent judgment. CS may have issued, and may in the future issue, a trading call regarding this security. Trading calls are short term trading opportunities based on market events and catalysts, while stock ratings reflect investment recommendations based on expected total return over a 12-month period as defined in the disclosure section. Because trading calls and stock ratings reflect different assumptions and analytical methods, trading calls may differ directionally from the stock rating. In addition, CS may have issued, and may in the future issue, other reports that are inconsistent with, and reach different conclusions from, the information presented in this report. Those reports reflect the different assumptions, views and analytical methods of the analysts who prepared them and CS is under no obligation to ensure that such other reports are brought to the attention of any recipient of this report. CS is involved in many businesses that relate to companies mentioned in this report. These businesses include specialized trading, risk arbitrage, market making, and other proprietary trading.

Past performance should not be taken as an indication or guarantee of future performance, and no representation or warranty, express or implied, is made regarding future performance. Information, opinions and estimates contained in this report reflect a judgement at its original date of publication by CS and are subject to change without notice. The price, value of and income from any of the securities or financial instruments mentioned in this report can fall as well as rise. The value of securities and financial instruments is subject to exchange rate fluctuation that may have a positive or adverse effect on the price or income of such securities or financial instruments. Investors in securities such as ADR's, the values of which are influenced by currency volatility, effectively assume this risk.

Structured securities are complex instruments, typically involve a high degree of risk and are intended for sale only to sophisticated investors who are capable of understanding and assuming the risks involved. The market value of any structured security may be affected by changes in economic, financial and political factors (including, but not limited to, spot and forward interest and exchange rates), time to maturity, market conditions and volatility, and the credit quality of any issuer or reference issuer. Any investor interested in purchasing a structured product should conduct their own investigation and analysis of the product and consult with their own professional advisers as to the risks involved in making such a purchase.

Some investments discussed in this report have a high level of volatility. High volatility investments may experience sudden and large falls in their value causing losses when that investment is realised. Those losses may equal your original investment. Indeed, in the case of some investments the potential losses may exceed the amount of initial investment, in such circumstances you may be required to pay more money to support those losses. Income yields from investments may fluctuate and, in consequence, initial capital paid to make the investment may be used as part of that income yield. Some investments may not be readily realisable and it may be difficult to sell or realise those investments, similarly it may prove difficult for you to obtain reliable information about the value, or risks, to which such an investment is exposed.

This report may provide the addresses of, or contain hyperlinks to, websites. Except to the extent to which the report refers to website material of CS, CS has not reviewed the linked site and takes no responsibility for the content contained therein. Such address or hyperlink (including addresses or hyperlinks to CS's own website material) is provided solely for your convenience and information and the content of the linked site does not in any way form part of this document. Accessing such website or following such link through this report or CS's website shall be at your own risk.

This report is issued and distributed in Europe (except Switzerland) by Credit Suisse Securities (Europe) Limited, One Cabot Square, London E14 4QJ, England, which is regulated in the United Kingdom by The Financial Services Authority ("FSA"). This report is being distributed in Germany by Credit Suisse Securities (Europe) Limited Niederlassung Frankfurt am Main regulated by the Bundesanstalt fuer Finanzdienstleistungsaufsicht ("BaFin"). This report is being distributed in the United States by Credit Suisse Securities (USA) LLC ; in Switzerland by Credit Suisse AG; in Canada by Credit Suisse Securities (Canada), Inc.; in Brazil by Banco de Investimentos Credit Suisse (Brasil) S.A. or its affiliates; in Mexico by Banco Credit Suisse (México), S.A. (transactions related to the securities mentioned in this report will only be effected in compliance with applicable regulation); in Japan by Credit Suisse Securities (Japan) Limited, Financial Instrument Firm, Director-General of Kanto Local Finance Bureau (Kinsho) No. 66, a member of Japan Securities Dealers Association, The Financial Futures Association of Japan, Japan Securities Investment Advisers Association; elsewhere in Asia/Pacific by whichever of the following is the appropriately authorised entity in the relevant jurisdiction: Credit Suisse (Hong Kong) Limited, Credit Suisse Equities (Australia) Limited, Credit Suisse Securities (Thailand) Limited, Credit Suisse Securities (Malaysia) Sdn Bhd, Credit Suisse AG, Singapore Branch, Credit Suisse Securities (India) Private Limited, Credit Suisse Securities (Europe) Limited, Seoul Branch, Credit Suisse AG, Taipei Securities Branch, PT Credit Suisse Securities Indonesia, and elsewhere in the world by the relevant authorised affiliate of the above. Research on Taiwanese securities produced by Credit Suisse AG, Taipei Securities Branch has been prepared by a registered Senior Business Person. Research provided to residents of Malaysia is authorised by the Head of Research for Credit Suisse Securities (Malaysia) Sdn. Bhd., to whom they should direct any queries on +603 2723 2020.

In jurisdictions where CS is not already registered or licensed to trade in securities, transactions will only be effected in accordance with applicable securities legislation, which will vary from jurisdiction to jurisdiction and may require that the trade be made in accordance with applicable exemptions from registration or licensing requirements. Non-U.S. customers wishing to effect a transaction should contact a CS entity in their local jurisdiction unless governing law permits otherwise. U.S. customers wishing to effect a transaction should do so only by contacting a representative at Credit Suisse Securities (USA) LLC in the U.S.

Please note that this report was originally prepared and issued by CS for distribution to their market professional and institutional investor customers. Recipients who are not market professional or institutional investor customers of CS should seek the advice of their independent financial advisor prior to taking any investment decision based on this report or for any necessary explanation of its contents. This research may relate to investments or services of a person outside of the UK or to other matters which are not regulated by the FSA or in respect of which the protections of the FSA for private customers and/or the UK compensation scheme may not be available, and further details as to where this may be the case are available upon request in respect of this report.

Any Nielsen Media Research material contained in this report represents Nielsen Media Research's estimates and does not represent facts. NMR has neither reviewed nor approved this report and/or any of the statements made herein.

If this report is being distributed by a financial institution other than Credit Suisse AG, or its affiliates, that financial institution is solely responsible for distribution. Clients of that institution should contact that institution to effect a transaction in the securities mentioned in this report or require further information. This report does not constitute investment advice by Credit Suisse to the clients of the distributing financial institution, and neither Credit Suisse AG, its affiliates, and their respective officers, directors and employees accept any liability whatsoever for any direct or consequential loss arising from their use of this report or its content.

PRE RESULTS COMMENT

Q1 earnings preview

- **Earnings revisions:** For several reasons, we made a number of revisions to our Fortis Inc. financial model. Our changes focused on several areas ahead of the forthcoming Q1 results. Specifically, our Q1 EPS estimate decreased from C\$0.70 to C\$0.64. Our full year EPS is unchanged at C\$1.76. For greater details, please refer to our Canadian Infrastructure Q1 2011 earnings preview entitled “*Starting the season: Q1 earnings preview*” (21 April 2011).

Disclosure Appendix

Important Global Disclosures

I, Andrew M. Kuske, certify that (1) the views expressed in this report accurately reflect my personal views about all of the subject companies and securities and (2) no part of my compensation was, is or will be directly or indirectly related to the specific recommendations or views expressed in this report.

See the Companies Mentioned section for full company names.

3-Year Price, Target Price and Rating Change History Chart for FTS.TO

The analyst(s) responsible for preparing this research report received compensation that is based upon various factors including Credit Suisse's total revenues, a portion of which are generated by Credit Suisse's investment banking activities.

Analysts' stock ratings are defined as follows:

Outperform (O): The stock's total return is expected to outperform the relevant benchmark* by at least 10-15% (or more, depending on perceived risk) over the next 12 months.

Neutral (N): The stock's total return is expected to be in line with the relevant benchmark* (range of $\pm 10-15\%$) over the next 12 months.

Underperform (U): The stock's total return is expected to underperform the relevant benchmark* by 10-15% or more over the next 12 months.

*Relevant benchmark by region: As of 29th May 2009, Australia, New Zealand, U.S. and Canadian ratings are based on (1) a stock's absolute total return potential to its current share price and (2) the relative attractiveness of a stock's total return potential within an analyst's coverage universe**, with Outperforms representing the most attractive, Neutrals the less attractive, and Underperforms the least attractive investment opportunities. Some U.S. and Canadian ratings may fall outside the absolute total return ranges defined above, depending on market conditions and industry factors. For Latin American, Japanese, and non-Japan Asia stocks, ratings are based on a stock's total return relative to the average total return of the relevant country or regional benchmark; for European stocks, ratings are based on a stock's total return relative to the analyst's coverage universe**. For Australian and New Zealand stocks a 22% and a 12% threshold replace the 10-15% level in the Outperform and Underperform stock rating definitions, respectively, subject to analysts' perceived risk. The 22% and 12% thresholds replace the +10-15% and -10-15% levels in the Neutral stock rating definition, respectively, subject to analysts' perceived risk.

**An analyst's coverage universe consists of all companies covered by the analyst within the relevant sector.

Restricted (R): In certain circumstances, Credit Suisse policy and/or applicable law and regulations preclude certain types of communications, including an investment recommendation, during the course of Credit Suisse's engagement in an investment banking transaction and in certain other circumstances.

Volatility Indicator [V]: A stock is defined as volatile if the stock price has moved up or down by 20% or more in a month in at least 8 of the past 24 months or the analyst expects significant volatility going forward.

Analysts' coverage universe weightings are distinct from analysts' stock ratings and are based on the expected performance of an analyst's coverage universe* versus the relevant broad market benchmark**:

Overweight: Industry expected to outperform the relevant broad market benchmark over the next 12 months.

Market Weight: Industry expected to perform in-line with the relevant broad market benchmark over the next 12 months.

Underweight: Industry expected to underperform the relevant broad market benchmark over the next 12 months.

*An analyst's coverage universe consists of all companies covered by the analyst within the relevant sector.

**The broad market benchmark is based on the expected return of the local market index (e.g., the S&P 500 in the U.S.) over the next 12 months.

Credit Suisse's distribution of stock ratings (and banking clients) is:

Global Ratings Distribution		
Outperform/Buy*	47%	(63% banking clients)
Neutral/Hold*	41%	(58% banking clients)
Underperform/Sell*	11%	(51% banking clients)
Restricted	2%	

*For purposes of the NYSE and NASD ratings distribution disclosure requirements, our stock ratings of Outperform, Neutral, and Underperform most closely correspond to Buy, Hold, and Sell, respectively; however, the meanings are not the same, as our stock ratings are determined on a relative basis. (Please refer to definitions above.) An investor's decision to buy or sell a security should be based on investment objectives, current holdings, and other individual factors.

Credit Suisse's policy is to update research reports as it deems appropriate, based on developments with the subject company, the sector or the market that may have a material impact on the research views or opinions stated herein.

Credit Suisse's policy is only to publish investment research that is impartial, independent, clear, fair and not misleading. For more detail please refer to Credit Suisse's Policies for Managing Conflicts of Interest in connection with Investment Research: http://www.csfb.com/research-and-analytics/disclaimer/managing_conflicts_disclaimer.html

Credit Suisse does not provide any tax advice. Any statement herein regarding any US federal tax is not intended or written to be used, and cannot be used, by any taxpayer for the purposes of avoiding any penalties.

See the Companies Mentioned section for full company names.

Price Target: (12 months) for (FTS.TO)

Method: We obtain our C\$34.00 target price for Fortis Inc. by using multiple valuation methodologies, yield base analysis, and discounted cash flow, all of which produce the C\$34.00 target. Our target price implies a P/E (price/earnings) multiple of 18.5x our 2012 EPS (earnings per share) estimate of C\$1.86 and an EV/EBITDA (enterprise value/earnings before interest, taxes, depreciation, and amortization) multiple of 10.0x our EBITDA estimate.

Risks: There are a number of risks to Fortis' achievement of our C\$34.00 target price: commodity prices; weather; environmental; regulatory; access to capital markets; and, interest rates. Moreover, one should never underestimate the power of the regulator in any regulated business.

Please refer to the firm's disclosure website at www.credit-suisse.com/researchdisclosures for the definitions of abbreviations typically used in the target price method and risk sections.

See the Companies Mentioned section for full company names.

The subject company (FTS.TO) currently is, or was during the 12-month period preceding the date of distribution of this report, a client of Credit Suisse.

Credit Suisse provided investment banking services to the subject company (FTS.TO) within the past 12 months.

Credit Suisse provided non-investment banking services, which may include Sales and Trading services, to the subject company (FTS.TO) within the past 12 months.

Credit Suisse expects to receive or intends to seek investment banking related compensation from the subject company (FTS.TO) within the next 3 months.

Credit Suisse has received compensation for products and services other than investment banking services from the subject company (FTS.TO) within the past 12 months.

Important Regional Disclosures

Singapore recipients should contact a Singapore financial adviser for any matters arising from this research report.

An analyst involved in the preparation of this report has visited certain material operations of the subject company (FTS.TO) within the past 12 months. The analyst may not have visited all material operations of the subject company. The travel expenses of the analyst in connection with such visits were not paid or reimbursed by the subject company, other than de minimus local travel expenses.

Restrictions on certain Canadian securities are indicated by the following abbreviations: NVS--Non-Voting shares; RVS--Restricted Voting Shares; SVS--Subordinate Voting Shares.

Individuals receiving this report from a Canadian investment dealer that is not affiliated with Credit Suisse should be advised that this report may not contain regulatory disclosures the non-affiliated Canadian investment dealer would be required to make if this were its own report.

For Credit Suisse Securities (Canada), Inc.'s policies and procedures regarding the dissemination of equity research, please visit http://www.csfb.com/legal_terms/canada_research_policy.shtml.

As of the date of this report, Credit Suisse acts as a market maker or liquidity provider in the equities securities that are the subject of this report.

Principal is not guaranteed in the case of equities because equity prices are variable.

Commission is the commission rate or the amount agreed with a customer when setting up an account or at anytime after that.

CS may have issued a Trade Alert regarding this security. Trade Alerts are short term trading opportunities identified by an analyst on the basis of market events and catalysts, while stock ratings reflect an analyst's investment recommendations based on expected total return over a 12-month period relative to the relevant coverage universe. Because Trade Alerts and stock ratings reflect different assumptions and analytical methods, Trade Alerts may differ directionally from the analyst's stock rating.

The author(s) of this report maintains a CS Model Portfolio that he/she regularly adjusts. The security or securities discussed in this report may be a component of the CS Model Portfolio and subject to such adjustments (which, given the composition of the CS Model Portfolio as a whole, may differ

from the recommendation in this report, as well as opportunities or strategies identified in Trading Alerts concerning the same security). The CS Model Portfolio and important disclosures about it are available at www.credit-suisse.com/ti.

To the extent this is a report authored in whole or in part by a non-U.S. analyst and is made available in the U.S., the following are important disclosures regarding any non-U.S. analyst contributors:

The price, value of and income from any of the securities or financial instruments mentioned in this report can fall as well as rise. The value of securities and financial instruments is subject to exchange rate fluctuation that may have a positive or adverse effect on the price or income of such securities or financial instruments. Investors in securities such as ADR's, the values of which are influenced by currency volatility, effectively assume this risk.

Structured securities are complex instruments, typically involve a high degree of risk and are intended for sale only to sophisticated investors who are capable of understanding and assuming the risks involved. The market value of any structured security may be affected by changes in economic, financial and political factors (including, but not limited to, spot and forward interest and exchange rates), time to maturity, market conditions and volatility, and the credit quality of any issuer or reference issuer. Any investor interested in purchasing a structured product should conduct their own investigation and analysis of the product and consult with their own professional advisers as to the risks involved in making such a purchase.

Some investments discussed in this report have a high level of volatility. High volatility investments may experience sudden and large falls in their value causing losses when that investment is realised. Those losses may equal your original investment. Indeed, in the case of some investments the potential losses may exceed the amount of initial investment, in such circumstances you may be required to pay more money to support those losses. Income yields from investments may fluctuate and, in consequence, initial capital paid to make the investment may be used as part of that income yield. Some investments may not be readily realisable and it may be difficult to sell or realise those investments, similarly it may prove difficult for you to obtain reliable information about the value, or risks, to which such an investment is exposed.

Working the western front

- **Earnings review:** Fortis reported Q1 2011 headline EPS (FD) of C\$0.65 beating our C\$0.64 estimate, the Street's C\$0.624 view and exceeding the C\$0.59-C\$0.64 range. In general, we believe Fortis continues to make steady progress in delivering relatively consistent financial results from a largely regulated asset base. We do not place undue emphasis on quarterly results in much of our universe as a result of the inherently long-cycle nature of many assets. For Fortis, we continue to focus on the ongoing significant regulated capital plan along with the potentially positive upward bias to regulated returns.
- **Significant organic growth continues:** As expected, Fortis continued to provide a robust outlook for its utility capital program. The company expects consolidated gross capital expenditures to be roughly C\$1.2bn for 2011 and about C\$5.5bn over the next five years with 83% of that total amount going to utility activity.
- **Improving capital market conditions:** Historically, Fortis has been very adept at acquisitions. Corporate growth has benefited from the company's ability to successfully acquire and integrate selected assets. In our view, the company is well positioned in the current market for acquisition opportunities.
- **Valuation:** Our C\$34 target price and Neutral rating are obtained utilizing multiple valuation approaches, including: an 18.5x P/E multiple of 2012 earnings; a 1.8x book value multiple; and, a DCF based valuation. We reiterate our Neutral rating.

Fortis reported Q1 2011 headline EPS (FD) of C\$0.65 beating our C\$0.64 estimate, the Street's C\$0.624 view and exceeding the C\$0.59-C\$0.64 range. In general, we believe Fortis continues to make steady progress in delivering relatively consistent financial results from a largely regulated asset base. For Fortis, we continue to focus on the ongoing significant regulated capital plan along with the potentially positive upward bias to regulated returns. This research note is divided into three parts: (a) results; (b) outlook; and, (c) valuation. Each of these areas will be addressed in greater detail below.

A modest beat

Results

Exhibit 1 highlights the segmented unadjusted earnings contributions for the most recent quarter and for the comparable period one year ago. Our commentary for each segment appears under the various headings below.

Exhibit 1: Segmented unadjusted earnings contribution

C\$ in millions, unless otherwise stated

	Q1 2011	Q1 2010	chg y/y
Regulated Gas Utilities - Canadian	76	73	4%
Regulated Electric Utilities - Canadian	53	40	33%
Regulated Electric Utilities - Caribbean	4	4	0%
Non-regulated - Fortis Generation	3	2	50%
Non-regulated - Fortis Properties	1	2	-50%
Corporate and other	(20)	(21)	5%
Net earnings applicable to common shares	117	100	17%

Source: Company data and Credit Suisse

Regulated Gas Utilities - Canadian

The unadjusted earnings for this segment increased by roughly 4% year-over-year (see Exhibit 2). Some notable items for the regulated gas utilities, include:

- Net customer additions were 1,373 during Q1 2011 versus net addition of 1,566 during the Q1 2010;
- The amount of customer additions decreased versus Q1 2010 due to lower building activity; and,
- Sales volumes for the quarter increased for all the segments (Core-Residential and Commercial, the Industrial segment and transportation volumes).

Exhibit 2: Regulated Gas Utilities (unadjusted)

	Q1 2011	Q1 2010	chg y/y
FortisBC Energy	76.0	73.0	4%

Regulated Electric Utilities – Canadian

This segment includes operating companies like FortisAlberta, FortisBC Electric, Newfoundland Power and Other Canadian Electric Utilities, which includes Maritime Electric and FortisOntario. Detailed contributions for each of these divisions can be found in Exhibit 3.

Exhibit 3: Regulated electric utilities – Canadian contribution (unadjusted)*C\$ in millions, unless otherwise stated*

	Q1 2011	Q1 2010	chg y/y
FortisAlberta	21	14	50%
FortisBC Electric	19	14	36%
Newfoundland Power	7	7	0%
Other Cdn Electric Utilities	6	5	20%
Earnings	53	40	33%

*Source: Company data and Credit Suisse***FortisAlberta**

Earnings at this regulated utility were up by roughly 50% comparing Q1 2011 versus the prior period. The increase was primarily due to increase in electricity distribution rates due to continued growth in the system, customer growth and higher volumes due to cooler-than-normal temperatures and increased economic activity in the province. See Exhibit 4 for selected highlights.

Increase in energy delivery
in Alberta

Exhibit 4: Selected FortisAlberta performance highlights (unadjusted)

	Q1 2011	Q1 2010	chg y/y
Energy deliveries (GWh)	4,402	4,109	7%
Revenue (C\$/MWh)	23.40	21.17	11%
Operating expenses (C\$/MWh)	7.95	8.52	-7%
Gross margin (C\$/MWh)	15.45	12.66	22%
Earnings (C\$millions)	21	14	50%

*Source: Company data and Credit Suisse***FortisBC Electric**

Segmented earnings at FortisBC Electric increased by 36% compared to the same period last year. The increase was due to increase in electricity sales growth and rate base growth due to continued investment in utility capital assets. See Exhibit 5 for selected highlights.

Increase in energy
deliveries in BC

Exhibit 5: Selected FortisBC Electric performance highlights (unadjusted)

	Q1 2011	Q1 2010	chg y/y
Energy deliveries (GWh)	905	820	10%
Revenue (C\$/MWh)	91.71	87.80	4%
Energy supply costs (C\$/MWh)	25.41	25.61	-1%
Operating expenses (C\$/MWh)	19.89	20.73	-4%
Gross margin (C\$/MWh)	46.41	41.46	12%
Earnings (C\$millions)	19	14	36%

*Source: Company data and Credit Suisse***Newfoundland Power**

This segment's earnings generation was flat when comparing Q1 2011 versus Q1 2010. Higher electricity sales were offset by timing of certain labour costs in Q1 2011, higher maintenance costs and lower allowed ROE. Energy deliveries were up by approximately 2% (see Exhibit 6).

Slight increase in NP's
energy deliveries

Exhibit 6: Selected Newfoundland Power performance highlights (unadjusted)

	Q1 2011	Q1 2010	chg y/y
Energy deliveries (GWh)	1,834	1,795	2%
Revenue (C\$/MWh)	99.78	99.16	1%
Energy supply costs (C\$/MWh)	73.06	72.98	0%
Operating expenses (C\$/MWh)	10.91	8.91	22%
Gross margin (C\$/MWh)	15.81	17.27	-8%
Earnings (C\$millions)	7	7	0%

Source: Company data, Credit Suisse estimates

Other Canadian Electric Utilities

The roughly 3% increase in energy deliveries was primarily the result of higher average consumption due to colder temperatures in Ontario and Prince Edward Island. Exhibit 7 contains selected highlights.

Regulated Electric Utilities – Caribbean

This segment includes Belize Electricity, Caribbean Utilities, and Fortis Turks and Caicos. Earnings for this segment were flat when compared the same quarter last year at C\$4m. Energy deliveries were also flat on a year-over-year basis. On the regulatory front, the ongoing situation with Belize Electricity requires a degree of monitoring. In brief, the utility received an adverse regulatory decision relating to a rate application. Moreover, there have been changes to the electricity legislation in Belize that have been challenged by the Fortis-owned utility. The company stated

Awaiting a decision in Belize

“In March 2011 the Supreme Court of Belize dismissed Belize Electricity’s appeal of the regulator’s June 2008 Final Rate Decision. The Company is in the process of filing an appeal of the trial judgment with the Belize Court of Appeal and has filed an application to restrain the regulator from initiating any rate action pending the hearing and determination of the appeal.”

Fortis Turks and Caicos, in March 2011 submitted “its 2010 annual regulatory filing outlining the Company’s performance in 2010.” Fortis “intends to submit a new Rate Variation Application in 2011, which takes into account changes in the utility’s rate base and in the local business and regulatory environment since filing its 2010 application. The 2010 application was not accepted by the Governor of the Turks and Caicos Islands due to concern about the impact a proposed rate increase might have on key sectors of the local economy.”

See Exhibit 8 below for selected highlights.

Exhibit 8: Caribbean - Regulated Electric Utilities performance highlights (unadjusted)

	Q1 2011	Q1 2010	chg y/y
Energy deliveries (GWh)	257	256	0%
Revenue (C\$/MWh)	295.72	296.88	0%
Energy supply costs (C\$/MWh)	178.99	175.78	2%

Non-regulated – Fortis Generation

The non-regulated generation assets within this segment are located in Belize, British Columbia, Central Newfoundland, Ontario and Upper New York State. Earnings for the segment were up 50% from the current quarter compared to the same quarter last year. Energy deliveries increased by 13% from Q1 2010 to Q1 2011 due the commissioning of the Vaca hydroelectric facility in Belize in late March 2010. See the table below for selected highlights.

Exhibit 9: Non-regulated generation – selected highlights

	Q1 2011	Q1 2010	chg y/y
Energy deliveries (GWh)	76	67	13%
Revenue (C\$/MWh)	92.11	74.63	23%
Energy supply costs (C\$/MWh)	-	-	n/a
Operating expenses (C\$/MWh)	39.47	29.85	32%
Gross margin (C\$/MWh)	52.63	44.78	18%
Earnings (C\$millions)	3	2	50%

Source: Company data and Credit Suisse

Non-regulated – Fortis Properties

Fortis Properties' net unadjusted earning contribution during the quarter was C\$1m which is lower than Q1 2010 earnings of C\$2m. REVPAR slightly increased to C\$63.29 from C\$62.93 for the comparable period last year. Additionally, the occupancy rate of the Real Estate Division was down at 94.3% versus last year's 95.8%.

Corporate

Corporate expenses decreased to C\$20 million in Q1 2011 from C\$21m in Q4 2009.

Outlook

We continue to believe investor, whether existing or prospective, should consider several major issues, including (a) funding organic growth; (b) rising returns; and, (c) acquisition trail. Each of these issues is addressed below.

Funding organic growth

In the most recent quarter the company's reported capital expenditures totaled C\$233 million, of which C\$207 million was spent at regulated utilities. Fortis continues to guide that capital expenditures for 2011 will be roughly C\$1.2 billion. A majority of the total will be spent on Western Canadian assets (FortisBC Energy, FortisAlberta, and FortisBC Electric). The company's expectations continue to be for consolidated gross capital expenditures over 5 years (2011-2015) approaching C\$5.5bn with 63% of that total amount being allocated to regulated utilities. Both FortisAlberta and FortisBC Electric will receive the vast majority of that amount; whereas, the regulated gas utilities are planned to receive 20% of the total capex amount, and 17% is allocated to non-regulated operations. Given the regulated rates of return with utility capital expenditures, the increases should be viewed as longer-term positives provided an appropriate financial balance is struck.

Ongoing organic growth

With the significant current relative valuation advantages, we believe that Fortis may become more motivated to explore possible capital efficiency initiatives. In our view, the company possesses ample opportunities to become much more capital efficient. One strategy involves divesting certain non-utility assets and redeploying capital into utility assets or funding the capital program. Another option would entail divesting partial interests in selected utility assets in an asset management model approach and receiving a management fee.

In fact, some of the media reports prior to the official announcement of PPL Corporation's acquisition of E.ON's Kentucky utility assets for US\$7.625 billion stated that a consortium led by Fortis Inc. was one of three finalists for those assets. We would regard that type of information in media reports as being something akin to an asset management style of approach. Ultimately, we believe that such a strategy would help Fortis generate a higher level of returns. Additionally, the use of an asset management type approach would make large acquisitions which could potentially further accelerate growth.

Opportunities for improved capital efficiency

Generally, we continue to prefer pure-play utility companies without an undue amount of non-core asset exposure. Historically, non-core assets (especially real estate) have been somewhat commonplace for many utilities. Fortis has been no exception to that approach. Notably, the mix of commercial and hospitality real estate assets held by Fortis have been positive contributors and also provide the company a bit of financial flexibility for a selection of reasons. In light of current market conditions, we believe there is a much less compelling case for the monetization of these assets than as in the past. We note Fortis Properties continues to increase in scale and scope which may eventually make it more attractive for acquisition or monetization. Yet, for a number of reasons, we continue to believe there is a rather low probability of either of those events occurring.

Even discounting the potential monetization of assets that we would consider to be non-core, we believe Fortis possesses considerable potential to become much more capital efficient. Given the significant interest in infrastructure assets by many investors seeking long-dated types of return, Fortis could easily divest portions of its existing asset base to pension fund investors and charge a management fee for their operational and management expertise. This type of approach could significantly improve capital efficiency and returns on capital. In addition, this asset management approach could also free-up capital that could be used to fund the existing capital program or fund future acquisitions.

Capital efficiency initiatives could aid funding of acquisitions or the existing capital program funding

Rising returns

Positively, Fortis has been successful in obtaining several favourable regulatory decisions. For example, the allowed equity at Terasen Gas Inc. (TGI) was boosted from 35% to 40% effective January 1, 2010. In addition to that positive move for the equity base, the allowed return on equity for TGI increased from 8.47% to 9.50%. In a related judgment, Terasen Gas (Vancouver Island) Inc. (TGVI) and Terasen Gas Whistler Inc. (TGWI) returns increased from 9.17% to 10%. Additionally, the British Columbia Utilities Commission (BCUC) held the former automatic adjustment mechanism for annual ROE determination would no longer apply. Also in BC, FortisBC obtained an increased allowed ROE from 8.87% to 9.90% that became effective on January 1, 2010. The upward bias in utility returns should be viewed positively. Clearly, many questions exist as to the methods for determining and predicting future return levels. Yet, we view the regulatory movement away from a very mechanical return approach work as a notable positive that should help ensure an appropriate level of returns over a period of time.

Similar to the BCUC, the Alberta Utilities Commission (AUC) issued a decision on the 2009 Generic Cost of Capital establishing a 9% ROE for utilities like FortisAlberta in 2009 and 2010. Under the previous formulaic approach, that utility would have been entitled to an 8.61% return. Moreover, the allowed equity within the regulated capital structure moved from 37% to 41% effective January 1, 2009. Notably, this return framework will be in effect for 2011 providing a level of certainty to FortisAlberta's future earnings.

Unfortunately, not every jurisdiction is proving to be as progressive as Alberta, BC and the National Energy Board in the regulated Trans-Quebec & Maritimes Pipeline decision (see file RH-1-2008 and our March 19, 2009 note "*Regulatory round-up*"). The Newfoundland and Labrador Board of Commissioners of Public Utilities (PUB) most recent decision increased the allowed ROE for Newfoundland Power from 8.95% in 2009 to 9% in 2010. Additionally, in the past, the PUB ordered Newfoundland Power's allowed ROEs for 2011 and 2012 would be determined by an automated formula that will be subject to review in Q1 2010. We do not need to belabour all of the regulatory developments, however, we note that returns are slowly biasing to the upside. The only challenge with the upward bias is that it comes at a time of potentially rising interest rates.

Acquisition trail

In our view, Fortis continues to demonstrate a rather impressive ability to successfully integrate acquisitions. Additionally, we view acquisitions as somewhat central to the company's growth strategy. For instance, the company's most recent Management Discussion and Analysis stated "We will continue to pursue acquisitions of regulated electric and natural gas utilities in the United States and Canada that will add value for our shareholders". Given the success of Fortis in past transactions, as measured in terms of financials, share price and operationally, we believe the company's current valuation and skill set may lead to some potentially value creating acquisition activity (see Exhibit 10 below for select Fortis M&A transactions).

Exhibit 10: Selected Fortis M&A transactions

\$ in millions, unless otherwise stated

Announced Date	Asset/Company	Deal value (\$m)	Comment
7/22/2009	Caribbean Utilities Co.	CAD 6.74	Acquired an additional 2.7% of Caribbean Utilities Co.

	Total USD	USD 65.50	
	Total CAD	CAD 6,214.48	

Source: Bloomberg, Company data and Credit Suisse

In terms of acquisitions, we believe Fortis has a few advantages over others, including:

- Fortis has growing expertise with both electric and gas utilities;

- Larger size will allow it to look at a larger spectrum of potential target companies;
- A proven ability to effectively integrate acquisitions;
- A rather strong appetite for yield oriented securities in Canada;
- The potential ability to support a transaction with pension fund capital;
- Canada's rather benign interest rate environment; and,
- Bought deal financing commonly employed in Canada.

Fortis possesses a number of absolute and relative advantages over some other competitors

Historically, Fortis has been very adept at acquisitions. Corporate growth has benefited from the company's ability to successfully acquire and integrate selected assets. Capital market conditions are demonstrating signs of improved functioning. Therefore, the typical Fortis acquisition strategy is more palatable in current capital markets. For greater details, please refer to our 6 August 2009 note entitled "*Pondering a Portland purchase?*"

Valuation

We continue to believe that Fortis has strong organic growth in key areas such as British Columbia, Alberta and the Caribbean. In our view, the company faces a delicate balance of capital investment opportunities and cash flow needs. From our perspective, the next big catalysts for the stock will likely revolve around capital efficiency initiatives or a large scale acquisition which will always lack predictability. As a result of the quarter, we slightly revised our EPS estimates for 2011 to C\$1.77 from C\$1.76. Our Neutral rating and C\$34.00 target price is obtained from multiple valuation approaches, including: an 18.5x P/E multiple of 2012 earnings; a 1.8x book value multiple; and, a DCF based valuation. We reiterate our Neutral rating.

Rating: Neutral

Target: C\$34

3-Year Price, Target Price and Rating Change History Chart for FTS.TO

FTS.TO Date	Closing Price (C\$)	Target Price (C\$)	Initiation/ Rating Assumption
10/24/08	24.75	28	
12/3/08	25.48	27.5	
1/25/10	28.5	30	
11/8/10	33.6	32	
2/10/11	33.81	34	

The analyst(s) responsible for preparing this research report received compensation that is based upon various factors including Credit Suisse's total revenues, a portion of which are generated by Credit Suisse's investment banking activities.

Analysts' stock ratings are defined as follows:

Outperform (O): The stock's total return is expected to outperform the relevant benchmark* by at least 10-15% (or more, depending on perceived risk) over the next 12 months.

Neutral (N): The stock's total return is expected to be in line with the relevant benchmark* (range of $\pm 10-15\%$) over the next 12 months.

Underperform (U): The stock's total return is expected to underperform the relevant benchmark* by 10-15% or more over the next 12 months.

Relevant benchmark by region: As of 29th May 2009, Australia, New Zealand, U.S. and Canadian ratings are based on (1) a stock's absolute total return potential to its current share price and (2) the relative attractiveness of a stock's total return potential within an analyst's coverage universe, with Outperforms representing the most attractive, Neutrals the less attractive, and Underperforms the least attractive investment opportunities. Some U.S. and Canadian ratings may fall outside the absolute total return ranges defined above, depending on market conditions and industry factors. For Latin American, Japanese, and non-Japan Asia stocks, ratings are based on a stock's total return relative to the average total return of the relevant country or regional benchmark; for European stocks, ratings are based on a stock's total return relative to the analyst's coverage universe**. For Australian and New Zealand stocks a 22% and a 12% threshold replace the 10-15% level in the Outperform and Underperform stock rating definitions, respectively, subject to analysts' perceived risk. The 22% and 12% thresholds replace the +10-15% and -10-15% levels in the Neutral stock rating definition, respectively, subject to analysts' perceived risk.*

***An analyst's coverage universe consists of all companies covered by the analyst within the relevant sector.*

Restricted (R): In certain circumstances, Credit Suisse policy and/or applicable law and regulations preclude certain types of communications, including an investment recommendation, during the course of Credit Suisse's engagement in an investment banking transaction and in certain other circumstances.

Volatility Indicator [V]: A stock is defined as volatile if the stock price has moved up or down by 20% or more in a month in at least 8 of the past 24 months or the analyst expects significant volatility going forward.

Analysts' coverage universe weightings are distinct from analysts' stock ratings and are based on the expected performance of an analyst's coverage universe* versus the relevant broad market benchmark:**

Overweight: Industry expected to outperform the relevant broad market benchmark over the next 12 months.

Market Weight: Industry expected to perform in-line with the relevant broad market benchmark over the next 12 months.

Underweight: Industry expected to underperform the relevant broad market benchmark over the next 12 months.

**An analyst's coverage universe consists of all companies covered by the analyst within the relevant sector.*

***The broad market benchmark is based on the expected return of the local market index (e.g., the S&P 500 in the U.S.) over the next 12 months.*

Credit Suisse's distribution of stock ratings (and banking clients) is:

Global Ratings Distribution		
Outperform/Buy*	47%	(62% banking clients)
Neutral/Hold*	40%	(57% banking clients)
Underperform/Sell*	11%	(50% banking clients)
Restricted	2%	

**For purposes of the NYSE and NASD ratings distribution disclosure requirements, our stock ratings of Outperform, Neutral, and Underperform most closely correspond to Buy, Hold, and Sell, respectively; however, the meanings are not the same, as our stock ratings are determined on a relative basis. (Please refer to definitions above.) An investor's decision to buy or sell a security should be based on investment objectives, current holdings, and other individual factors.*

Credit Suisse's policy is to update research reports as it deems appropriate, based on developments with the subject company, the sector or the market that may have a material impact on the research views or opinions stated herein.

Credit Suisse's policy is only to publish investment research that is impartial, independent, clear, fair and not misleading. See the Companies Mentioned section for full company names.

Price Target: (12 months) for (FTS.TO)

Method: We obtain our C\$34.00 target price for Fortis Inc. by using multiple valuation methodologies, yield base analysis, and discounted cash flow, all of which produce the C\$34.00 target. Our target price implies a P/E (price/earnings) multiple of 18.5x our 2012 EPS (earnings per share) estimate of C\$1.86 and an EV/EBITDA (enterprise value/earnings before interest, taxes, depreciation, and amortization) multiple of 10.5x our EBITDA estimate.

Risks: There are a number of risks to Fortis' achievement of our C\$34.00 target price: commodity prices; weather; environmental; regulatory; access to capital markets; and, interest rates. Moreover, one should never underestimate the power of the regulator in any regulated business.

Please refer to the firm's disclosure website at www.credit-suisse.com/researchdisclosures for the definitions of abbreviations typically used in the target price method and risk sections.

See the Companies Mentioned section for full company names.

The subject company (FTS.TO) currently is, or was during the 12-month period preceding the date of distribution of this report, a client of Credit Suisse.

Credit Suisse provided investment banking services to the subject company (FTS.TO) within the past 12 months.

Credit Suisse provided non-investment banking services, which may include Sales and Trading services, to the subject company (FTS.TO) within the past 12 months.

Credit Suisse expects to receive or intends to seek investment banking related compensation from the subject company (FTS.TO) within the next 3 months.

Credit Suisse has received compensation for products and services other than investment banking services from the subject company (FTS.TO) within the past 12 months.

Important Regional Disclosures

Singapore recipients should contact a Singapore financial adviser for any matters arising from this research report.

An analyst involved in the preparation of this report has visited certain material operations of the subject company (FTS.TO) within the past 12 months. The analyst may not have visited all material operations of the subject company. The travel expenses of the analyst in connection with such visits were not paid or reimbursed by the subject company, other than de minimus local travel expenses.

Restrictions on certain Canadian securities are indicated by the following abbreviations: NVS--Non-Voting shares; RVS--Restricted Voting Shares; SVS--Subordinate Voting Shares.

Individuals receiving this report from a Canadian investment dealer that is not affiliated with Credit Suisse should be advised that this report may not contain regulatory disclosures the non-affiliated Canadian investment dealer would be required to make if this were its own report.

For Credit Suisse Securities (Canada), Inc.'s policies and procedures regarding the dissemination of equity research, please visit http://www.csfb.com/legal/terms/canada_research_policy.shtml.

As of the date of this report, Credit Suisse acts as a market maker or liquidity provider in the equities securities that are the subject of this report.

Principal is not guaranteed in the case of equities because equity prices are variable.

Commission is the commission rate or the amount agreed with a customer when setting up an account or at anytime after that.

CS may have issued a Trade Alert regarding this security. Trade Alerts are short term trading opportunities identified by an analyst on the basis of market events and catalysts, while stock ratings reflect an analyst's investment recommendations based on expected total return over a 12-month period relative to the relevant coverage universe. Because Trade Alerts and stock ratings reflect different assumptions and analytical methods, Trade Alerts may differ directionally from the analyst's stock rating.

The author(s) of this report maintains a CS Model Portfolio that he/she regularly adjusts. The security or securities discussed in this report may be a component of the CS Model Portfolio and subject to such adjustments (which, given the composition of the CS Model Portfolio as a whole, may differ from the recommendation in this report, as well as opportunities or strategies identified in Trading Alerts concerning the same security). The CS Model Portfolio and important disclosures about it are available at www.credit-suisse.com/ti.

To the extent this is a report authored in whole or in part by a non-U.S. analyst and is made available in the U.S., the following are important disclosures regarding any non-U.S. analyst contributors:

Disclaimers continue on next page.

This report is not directed to, or intended for distribution to or use by, any person or entity who is a citizen or resident of or located in any locality, state, country or other jurisdiction where such distribution, publication, availability or use would be contrary to law or regulation or which would subject Credit Suisse AG, the Swiss bank, or its subsidiaries or its affiliates ("CS") to any registration or licensing requirement within such jurisdiction. All material presented in this report, unless specifically indicated otherwise, is under copyright to CS. None of the material, nor its content, nor any copy of it, may be altered in any way, transmitted to, copied or distributed to any other party, without the prior express written permission of CS. All trademarks, service marks and logos used in this report are trademarks or service marks or registered trademarks or service marks of CS or its affiliates.

The information, tools and material presented in this report are provided to you for information purposes only and are not to be used or considered as an offer or the solicitation of an offer to sell or to buy or subscribe for securities or other financial instruments. CS may not have taken any steps to ensure that the securities referred to in this report are suitable for any particular investor. CS will not treat recipients as its customers by virtue of their receiving the report. The investments or services contained or referred to in this report may not be suitable for you and it is recommended that you consult an independent investment advisor if you are in doubt about such investments or investment services. Nothing in this report constitutes investment, legal, accounting or tax advice or a representation that any investment or strategy is suitable or appropriate to your individual circumstances or otherwise constitutes a personal recommendation to you. CS does not offer advice on the tax consequences of investment and you are advised to contact an independent tax adviser. Please note in particular that the bases and levels of taxation may change.

CS believes the information and opinions in the Disclosure Appendix of this report are accurate and complete. Information and opinions presented in the other sections of the report were obtained or derived from sources CS believes are reliable, but CS makes no representations as to their accuracy or completeness. Additional information is available upon request. CS accepts no liability for loss arising from the use of the material presented in this report, except that this exclusion of liability does not apply to the extent that liability arises under specific statutes or regulations applicable to CS. This report is not to be relied upon in substitution for the exercise of independent judgment. CS may have issued, and may in the future issue, a trading call regarding this security. Trading calls are short term trading opportunities based on market events and catalysts, while stock ratings reflect investment recommendations based on expected total return over a 12-month period as defined in the disclosure section. Because trading calls and stock ratings reflect different assumptions and analytical methods, trading calls may differ directionally from the stock rating. In addition, CS may have issued, and may in the future issue, other reports that are inconsistent with, and reach different conclusions from, the information presented in this report. Those reports reflect the different assumptions, views and analytical methods of the analysts who prepared them and CS is under no obligation to ensure that such other reports are brought to the attention of any recipient of this report. CS is involved in many businesses that relate to companies mentioned in this report. These businesses include specialized trading, risk arbitrage, market making, and other proprietary trading.

Past performance should not be taken as an indication or guarantee of future performance, and no representation or warranty, express or implied, is made regarding future performance. Information, opinions and estimates contained in this report reflect a judgement at its original date of publication by CS and are subject to change without notice. The price, value of and income from any of the securities or financial instruments mentioned in this report can fall as well as rise. The value of securities and financial instruments is subject to exchange rate fluctuation that may have a positive or adverse effect on the price or income of such securities or financial instruments. Investors in securities such as ADR's, the values of which are influenced by currency volatility, effectively assume this risk.

Structured securities are complex instruments, typically involve a high degree of risk and are intended for sale only to sophisticated investors who are capable of understanding and assuming the risks involved. The market value of any structured security may be affected by changes in economic, financial and political factors (including, but not limited to, spot and forward interest and exchange rates), time to maturity, market conditions and volatility, and the credit quality of any issuer or reference issuer. Any investor interested in purchasing a structured product should conduct their own investigation and analysis of the product and consult with their own professional advisers as to the risks involved in making such a purchase.

Some investments discussed in this report have a high level of volatility. High volatility investments may experience sudden and large falls in their value causing losses when that investment is realised. Those losses may equal your original investment. Indeed, in the case of some investments the potential losses may exceed the amount of initial investment, in such circumstances you may be required to pay more money to support those losses. Income yields from investments may fluctuate and, in consequence, initial capital paid to make the investment may be used as part of that income yield. Some investments may not be readily realisable and it may be difficult to sell or realise those investments, similarly it may prove difficult for you to obtain reliable information about the value, or risks, to which such an investment is exposed.

ACQUISITION

Cross border connections

- **Accretive action:** Fortis plans to acquire Central Vermont Public Service (CV.N) for US\$700m (including the assumption of US\$230m in debt) for US\$35.10/share in cash representing a 44% premium to Friday's closing price of US\$24.32. FTS believes the deal will close in 6-12 months and will be EPS accretive in the first full year of ownership. We view this long-awaited initial FTS foray into the US as incrementally positive. From our perspective, we believe Fortis is very well positioned to consolidate the small to mid-cap US utility sector. Given Central Vermont's potential future rate base growth, we view this deal positively. Additionally, we believe Fortis is very well positioned for more US targeted deals.
- **Deal details:** Under simple assumptions, we believe this deal may result in more than C\$0.10/sh of earnings accretion for Fortis in the first full year after close. Similar to past FTS acquisitions, CV's large investment plan may result in 9% compound average annual growth from 2010 to 2015. Such growth should provide further financial upside, however, in the near-term, significant earnings accretion is possible largely the result of the wide valuation gap between Canadian and US utilities. Given the current appetite for yield in the Canadian market, we expect ongoing US targeted deals that are also aided by the level of the CAD/USD.
- **Improving capital market conditions:** Historically, Fortis is very adept at acquisitions and this transaction highlights long-term and low-risk growth.
- **Valuation:** We have not adjusted our numbers for this deal, but will do so over time. Our C\$34.target price and Neutral rating are obtained utilizing multiple valuation approaches, including: an 18.5x P/E multiple of 2012 earnings; a 1.8x book value multiple; and, a DCF based valuation. We reiterate our Neutral rating.

3-Year Price, Target Price and Rating Change History Chart for FTS.TO

The analyst(s) responsible for preparing this research report received compensation that is based upon various factors including Credit Suisse's total revenues, a portion of which are generated by Credit Suisse's investment banking activities.

Analysts' stock ratings are defined as follows:

Outperform (O): The stock's total return is expected to outperform the relevant benchmark* by at least 10-15% (or more, depending on perceived risk) over the next 12 months.

Neutral (N): The stock's total return is expected to be in line with the relevant benchmark* (range of ± 10 -15%) over the next 12 months.

Underperform (U): The stock's total return is expected to underperform the relevant benchmark* by 10-15% or more over the next 12 months.

*Relevant benchmark by region: As of 29th May 2009, Australia, New Zealand, U.S. and Canadian ratings are based on (1) a stock's absolute total return potential to its current share price and (2) the relative attractiveness of a stock's total return potential within an analyst's coverage universe**, with Outperforms representing the most attractive, Neutrals the less attractive, and Underperforms the least attractive investment opportunities. Some U.S. and Canadian ratings may fall outside the absolute total return ranges defined above, depending on market conditions and industry factors. For Latin American, Japanese, and non-Japan Asia stocks, ratings are based on a stock's total return relative to the average total return of the relevant country or regional benchmark; for European stocks, ratings are based on a stock's total return relative to the analyst's coverage universe**. For Australian and New Zealand stocks a 22% and a 12% threshold replace the 10-15% level in the Outperform and Underperform stock rating definitions, respectively, subject to analysts' perceived risk. The 22% and 12% thresholds replace the +10-15% and -10-15% levels in the Neutral stock rating definition, respectively, subject to analysts' perceived risk.

**An analyst's coverage universe consists of all companies covered by the analyst within the relevant sector.

Restricted (R): In certain circumstances, Credit Suisse policy and/or applicable law and regulations preclude certain types of communications, including an investment recommendation, during the course of Credit Suisse's engagement in an investment banking transaction and in certain other circumstances.

Volatility Indicator [V]: A stock is defined as volatile if the stock price has moved up or down by 20% or more in a month in at least 8 of the past 24 months or the analyst expects significant volatility going forward.

Analysts' coverage universe weightings are distinct from analysts' stock ratings and are based on the expected performance of an analyst's coverage universe* versus the relevant broad market benchmark**:

Overweight: Industry expected to outperform the relevant broad market benchmark over the next 12 months.

Market Weight: Industry expected to perform in-line with the relevant broad market benchmark over the next 12 months.

Underweight: Industry expected to underperform the relevant broad market benchmark over the next 12 months.

*An analyst's coverage universe consists of all companies covered by the analyst within the relevant sector.

**The broad market benchmark is based on the expected return of the local market index (e.g., the S&P 500 in the U.S.) over the next 12 months.

Credit Suisse's distribution of stock ratings (and banking clients) is:

Global Ratings Distribution		
Outperform/Buy*	47%	(63% banking clients)
Neutral/Hold*	40%	(56% banking clients)
Underperform/Sell*	10%	(50% banking clients)
Restricted	2%	

*For purposes of the NYSE and NASD ratings distribution disclosure requirements, our stock ratings of Outperform, Neutral, and Underperform most closely correspond to Buy, Hold, and Sell, respectively; however, the meanings are not the same, as our stock ratings are determined on a relative basis. (Please refer to definitions above.) An investor's decision to buy or sell a security should be based on investment objectives, current holdings, and other individual factors.

Credit Suisse's policy is to update research reports as it deems appropriate, based on developments with the subject company, the sector or the market that may have a material impact on the research views or opinions stated herein.

Credit Suisse's policy is only to publish investment research that is impartial, independent, clear, fair and not misleading. Price Target: (12 months) for (FTS.TO)

Method: We obtain our C\$34.00 target price for Fortis Inc. by using multiple valuation methodologies, yield base analysis, and discounted cash flow, all of which produce the C\$34.00 target. Our target price implies a P/E (price/earnings) multiple of 18.5x our 2012 EPS (earnings per share) estimate of C\$1.86 and an EV/EBITDA (enterprise value/earnings before interest, taxes, depreciation, and amortization) multiple of 10.5x our EBITDA estimate.

Risks: There are a number of risks to Fortis' achievement of our C\$34.00 target price: commodity prices; weather; environmental; regulatory; access to capital markets; and, interest rates. Moreover, one should never underestimate the power of the regulator in any regulated business.

Please refer to the firm's disclosure website at www.credit-suisse.com/researchdisclosures for the definitions of abbreviations typically used in the target price method and risk sections.

See the Companies Mentioned section for full company names.

The subject company (FTS.TO) currently is, or was during the 12-month period preceding the date of distribution of this report, a client of Credit Suisse.

Credit Suisse provided investment banking services to the subject company (FTS.TO) within the past 12 months.

Credit Suisse provided non-investment banking services, which may include Sales and Trading services, to the subject company (FTS.TO) within the past 12 months.

Credit Suisse expects to receive or intends to seek investment banking related compensation from the subject company (FTS.TO) within the next 3 months.

Credit Suisse has received compensation for products and services other than investment banking services from the subject company (FTS.TO) within the past 12 months.

Important Regional Disclosures

Singapore recipients should contact a Singapore financial adviser for any matters arising from this research report.

An analyst involved in the preparation of this report has visited certain material operations of the subject company (FTS.TO) within the past 12 months. The analyst may not have visited all material operations of the subject company. The travel expenses of the analyst in connection with such visits were not paid or reimbursed by the subject company, other than de minimus local travel expenses.

Restrictions on certain Canadian securities are indicated by the following abbreviations: NVS--Non-Voting shares; RVS--Restricted Voting Shares; SVS--Subordinate Voting Shares.

Individuals receiving this report from a Canadian investment dealer that is not affiliated with Credit Suisse should be advised that this report may not contain regulatory disclosures the non-affiliated Canadian investment dealer would be required to make if this were its own report.

For Credit Suisse Securities (Canada), Inc.'s policies and procedures regarding the dissemination of equity research, please visit http://www.csfb.com/legal_terms/canada_research_policy.shtml.

As of the date of this report, Credit Suisse acts as a market maker or liquidity provider in the equities securities that are the subject of this report.

Principal is not guaranteed in the case of equities because equity prices are variable.

Commission is the commission rate or the amount agreed with a customer when setting up an account or at anytime after that.

CS may have issued a Trade Alert regarding this security. Trade Alerts are short term trading opportunities identified by an analyst on the basis of market events and catalysts, while stock ratings reflect an analyst's investment recommendations based on expected total return over a 12-month period relative to the relevant coverage universe. Because Trade Alerts and stock ratings reflect different assumptions and analytical methods, Trade Alerts may differ directionally from the analyst's stock rating.

The author(s) of this report maintains a CS Model Portfolio that he/she regularly adjusts. The security or securities discussed in this report may be a component of the CS Model Portfolio and subject to such adjustments (which, given the composition of the CS Model Portfolio as a whole, may differ from the recommendation in this report, as well as opportunities or strategies identified in Trading Alerts concerning the same security). The CS Model Portfolio and important disclosures about it are available at www.credit-suisse.com/ti.

To the extent this is a report authored in whole or in part by a non-U.S. analyst and is made available in the U.S., the following are important disclosures regarding any non-U.S. analyst contributors:

- Andrew M. Kuske, non-U.S. analyst, is a research analyst employed by Credit Suisse Securities (Canada), Inc..
- Paul Tan, non-U.S. analyst, is a research analyst employed by Credit Suisse Securities (Canada), Inc..

Taiwanese Disclosures: Reports written by Taiwan-based analysts on non-Taiwan listed companies are not considered recommendations to buy or sell securities under Taiwan Stock Exchange Operational Regulations Governing Securities Firms Recommending Trades in Securities to Customers.

For Credit Suisse disclosure information on other companies mentioned in this report, please visit the website at www.credit-suisse.com/researchdisclosures or call +1 (877) 291-2683.

Disclaimers continue on next page.

This report is not directed to, or intended for distribution to or use by, any person or entity who is a citizen or resident of or located in any locality, state, country or other jurisdiction where such distribution, publication, availability or use would be contrary to law or regulation or which would subject Credit Suisse AG, the Swiss bank, or its subsidiaries or its affiliates ("CS") to any registration or licensing requirement within such jurisdiction. All material presented in this report, unless specifically indicated otherwise, is under copyright to CS. None of the material, nor its content, nor any copy of it, may be altered in any way, transmitted to, copied or distributed to any other party, without the prior express written permission of CS. All trademarks, service marks and logos used in this report are trademarks or service marks or registered trademarks or service marks of CS or its affiliates.

The information, tools and material presented in this report are provided to you for information purposes only and are not to be used or considered as an offer or the solicitation of an offer to sell or to buy or subscribe for securities or other financial instruments. CS may not have taken any steps to ensure that the securities referred to in this report are suitable for any particular investor. CS will not treat recipients as its customers by virtue of their receiving the report. The investments or services contained or referred to in this report may not be suitable for you and it is recommended that you consult an independent investment advisor if you are in doubt about such investments or investment services. Nothing in this report constitutes investment, legal, accounting or tax advice or a representation that any investment or strategy is suitable or appropriate to your individual circumstances or otherwise constitutes a personal recommendation to you. CS does not offer advice on the tax consequences of investment and you are advised to contact an independent tax adviser. Please note in particular that the bases and levels of taxation may change.

CS believes the information and opinions in the Disclosure Appendix of this report are accurate and complete. Information and opinions presented in the other sections of the report were obtained or derived from sources CS believes are reliable, but CS makes no representations as to their accuracy or completeness. Additional information is available upon request. CS accepts no liability for loss arising from the use of the material presented in this report, except that this exclusion of liability does not apply to the extent that liability arises under specific statutes or regulations applicable to CS. This report is not to be relied upon in substitution for the exercise of independent judgment. CS may have issued, and may in the future issue, a trading call regarding this security. Trading calls are short term trading opportunities based on market events and catalysts, while stock ratings reflect investment recommendations based on expected total return over a 12-month period as defined in the disclosure section. Because trading calls and stock ratings reflect different assumptions and analytical methods, trading calls may differ directionally from the stock rating. In addition, CS may have issued, and may in the future issue, other reports that are inconsistent with, and reach different conclusions from, the information presented in this report. Those reports reflect the different assumptions, views and analytical methods of the analysts who prepared them and CS is under no obligation to ensure that such other reports are brought to the attention of any recipient of this report. CS is involved in many businesses that relate to companies mentioned in this report. These businesses include specialized trading, risk arbitrage, market making, and other proprietary trading.

Past performance should not be taken as an indication or guarantee of future performance, and no representation or warranty, express or implied, is made regarding future performance. Information, opinions and estimates contained in this report reflect a judgement at its original date of publication by CS and are subject to change without notice. The price, value of and income from any of the securities or financial instruments mentioned in this report can fall as well as rise. The value of securities and financial instruments is subject to exchange rate fluctuation that may have a positive or adverse effect on the price or income of such securities or financial instruments. Investors in securities such as ADR's, the values of which are influenced by currency volatility, effectively assume this risk.

Structured securities are complex instruments, typically involve a high degree of risk and are intended for sale only to sophisticated investors who are capable of understanding and assuming the risks involved. The market value of any structured security may be affected by changes in economic, financial and political factors (including, but not limited to, spot and forward interest and exchange rates), time to maturity, market conditions and volatility, and the credit quality of any issuer or reference issuer. Any investor interested in purchasing a structured product should conduct their own investigation and analysis of the product and consult with their own professional advisers as to the risks involved in making such a purchase.

Some investments discussed in this report have a high level of volatility. High volatility investments may experience sudden and large falls in their value causing losses when that investment is realised. Those losses may equal your original investment. Indeed, in the case of some investments the potential losses may exceed the amount of initial investment, in such circumstances you may be required to pay more money to support those losses. Income yields from investments may fluctuate and, in consequence, initial capital paid to make the investment may be used as part of that income yield. Some investments may not be readily realisable and it may be difficult to sell or realise those investments, similarly it may prove difficult for you to obtain reliable information about the value, or risks, to which such an investment is exposed.

This report may provide the addresses of, or contain hyperlinks to, websites. Except to the extent to which the report refers to website material of CS, CS has not reviewed the linked site and takes no responsibility for the content contained therein. Such address or hyperlink (including addresses or hyperlinks to CS's own website material) is provided solely for your convenience and information and the content of the linked site does not in any way form part of this document. Accessing such website or following such link through this report or CS's website shall be at your own risk.

BUSINESS DISPOSAL

Bye-bye Belize?

- **A government grab:** Fortis Inc. press released the Government of Belize's interest "...in purchasing majority shares in BEL so as to assume control of the company." Fortis has yet to receive a purchase proposal for the approximate 70% interest in Belize Electricity Limited (BEL). At this time, we view the prospects for BEL disposition as a potentially minor positive for FTS. We take that view for multiple reasons, including: (a) over the last few years, BEL experienced regulatory issues that led to a lengthy legal battle; (b) FTS would likely repatriate the BEL proceeds towards a combination of organic and acquisition oriented growth activities in North American; and, (c) clearly, we assume any BEL disposition will occur at a fair value. A future deal price is critical to assessing impact, but a potential dispute resolution is positive.
- **Some details:** Without delving into the history of Fortis in Belize, we believe selected points are pertinent, including: (a) FTS owns roughly 70% of Belize Electricity Limited which is an integrated electric utility in Belize; (b) FTS owns the Belize Electric Company Limited (BECOL), an unregulated hydroelectric generation company, in Belize; and, and, (c) for FTS less than 2% of total assets are exposed at BEL (~C\$259m) and the combination of BEL and BECOL amount to only 3% of the total assets as of March 31, 2011.
- **Improving capital market conditions:** Historically, Fortis has been very adept at acquisitions. Corporate growth has benefited from the company's ability to successfully acquire and integrate selected assets. In our view, the company is well positioned in the current market for acquisition opportunities.
- **Valuation:** Our C\$34.target price and Neutral rating are obtained utilizing multiple valuation approaches, including: an 18.5x P/E multiple of 2012 earnings; a 1.8x book value multiple; and, a DCF based valuation. We reiterate our Neutral rating.

Disclosure Appendix

Important Global Disclosures

I, Andrew M. Kuske, certify that (1) the views expressed in this report accurately reflect my personal views about all of the subject companies and securities and (2) no part of my compensation was, is or will be directly or indirectly related to the specific recommendations or views expressed in this report.

See the Companies Mentioned section for full company names.

3-Year Price, Target Price and Rating Change History Chart for FTS.TO

The analyst(s) responsible for preparing this research report received compensation that is based upon various factors including Credit Suisse's total revenues, a portion of which are generated by Credit Suisse's investment banking activities.

Analysts' stock ratings are defined as follows:

Outperform (O): The stock's total return is expected to outperform the relevant benchmark* by at least 10-15% (or more, depending on perceived risk) over the next 12 months.

Neutral (N): The stock's total return is expected to be in line with the relevant benchmark* (range of $\pm 10-15\%$) over the next 12 months.

Underperform (U): The stock's total return is expected to underperform the relevant benchmark* by 10-15% or more over the next 12 months.

*Relevant benchmark by region: As of 29th May 2009, Australia, New Zealand, U.S. and Canadian ratings are based on (1) a stock's absolute total return potential to its current share price and (2) the relative attractiveness of a stock's total return potential within an analyst's coverage universe**, with Outperforms representing the most attractive, Neutrals the less attractive, and Underperforms the least attractive investment opportunities. Some U.S. and Canadian ratings may fall outside the absolute total return ranges defined above, depending on market conditions and industry factors. For Latin American, Japanese, and non-Japan Asia stocks, ratings are based on a stock's total return relative to the average total return of the relevant country or regional benchmark; for European stocks, ratings are based on a stock's total return relative to the analyst's coverage universe**. For Australian and New Zealand stocks a 22% and a 12% threshold replace the 10-15% level in the Outperform and Underperform stock rating definitions, respectively, subject to analysts' perceived risk. The 22% and 12% thresholds replace the +10-15% and -10-15% levels in the Neutral stock rating definition, respectively, subject to analysts' perceived risk.

**An analyst's coverage universe consists of all companies covered by the analyst within the relevant sector.

Restricted (R): In certain circumstances, Credit Suisse policy and/or applicable law and regulations preclude certain types of communications, including an investment recommendation, during the course of Credit Suisse's engagement in an investment banking transaction and in certain other circumstances.

Volatility Indicator [V]: A stock is defined as volatile if the stock price has moved up or down by 20% or more in a month in at least 8 of the past 24 months or the analyst expects significant volatility going forward.

Analysts' coverage universe weightings are distinct from analysts' stock ratings and are based on the expected performance of an analyst's coverage universe* versus the relevant broad market benchmark**:

Overweight: Industry expected to outperform the relevant broad market benchmark over the next 12 months.

Market Weight: Industry expected to perform in-line with the relevant broad market benchmark over the next 12 months.

Underweight: Industry expected to underperform the relevant broad market benchmark over the next 12 months.

*An analyst's coverage universe consists of all companies covered by the analyst within the relevant sector.

**The broad market benchmark is based on the expected return of the local market index (e.g., the S&P 500 in the U.S.) over the next 12 months.

Credit Suisse's distribution of stock ratings (and banking clients) is:

Global Ratings Distribution		
Outperform/Buy*	48%	(62% banking clients)
Neutral/Hold*	40%	(56% banking clients)
Underperform/Sell*	10%	(50% banking clients)
Restricted	2%	

*For purposes of the NYSE and NASD ratings distribution disclosure requirements, our stock ratings of Outperform, Neutral, and Underperform most closely correspond to Buy, Hold, and Sell, respectively; however, the meanings are not the same, as our stock ratings are determined on a relative basis. (Please refer to definitions above.) An investor's decision to buy or sell a security should be based on investment objectives, current holdings, and other individual factors.

Credit Suisse's policy is to update research reports as it deems appropriate, based on developments with the subject company, the sector or the market that may have a material impact on the research views or opinions stated herein.

Credit Suisse's policy is only to publish investment research that is impartial, independent, clear, fair and not misleading. For more detail please refer to Credit Suisse's Policies for Managing Conflicts of Interest in connection with Investment Research: http://www.csfb.com/research-and-analytics/disclaimer/managing_conflicts_disclaimer.html

Credit Suisse does not provide any tax advice. Any statement herein regarding any US federal tax is not intended or written to be used, and cannot be used, by any taxpayer for the purposes of avoiding any penalties.

See the Companies Mentioned section for full company names.

Price Target: (12 months) for (FTS.TO)

Method: We obtain our C\$34.00 target price for Fortis Inc. by using multiple valuation methodologies, yield base analysis, and discounted cash flow, all of which produce the C\$34.00 target. Our target price implies a P/E (price/earnings) multiple of 18.5x our 2012 EPS (earnings per share) estimate of C\$1.86 and an EV/EBITDA (enterprise value/earnings before interest, taxes, depreciation, and amortization) multiple of 10.5x our EBITDA estimate.

Risks: There are a number of risks to Fortis' achievement of our C\$34.00 target price: commodity prices; weather; environmental; regulatory; access to capital markets; and, interest rates. Moreover, one should never underestimate the power of the regulator in any regulated business.

Please refer to the firm's disclosure website at www.credit-suisse.com/researchdisclosures for the definitions of abbreviations typically used in the target price method and risk sections.

See the Companies Mentioned section for full company names.

The investments or services contained or referred to in this report may not be suitable for you and it is recommended that you consult an independent investment advisor if you are in doubt about such investments or investment services. Nothing in this report constitutes investment, legal, accounting or tax advice or a representation that any investment or strategy is suitable or appropriate to your individual circumstances or otherwise constitutes a personal recommendation to you. CS does not offer advice on the tax consequences of investment and you are advised to contact an independent tax adviser. Please note in particular that the bases and levels of taxation may change.

CS believes the information and opinions in the Disclosure Appendix of this report are accurate and complete. Information and opinions presented in the other sections of the report were obtained or derived from sources CS believes are reliable, but CS makes no representations as to their accuracy or completeness. Additional information is available upon request. CS accepts no liability for loss arising from the use of the material presented in this report, except that this exclusion of liability does not apply to the extent that liability arises under specific statutes or regulations applicable to CS. This report is not to be relied upon in substitution for the exercise of independent judgment. CS may have issued, and may in the future issue, a trading call regarding this security. Trading calls are short term trading opportunities based on market events and catalysts, while stock ratings reflect investment recommendations based on expected total return over a 12-month period as defined in the disclosure section. Because trading calls and stock ratings reflect different assumptions and analytical methods, trading calls may differ directionally from the stock rating. In addition, CS may have issued, and may in the future issue, other reports that are inconsistent with, and reach different conclusions from, the information presented in this report. Those reports reflect the different assumptions, views and analytical methods of the analysts who prepared them and CS is under no obligation to ensure that such other reports are brought to the attention of any recipient of this report. CS is involved in many businesses that relate to companies mentioned in this report. These businesses include specialized trading, risk arbitrage, market making, and other proprietary trading.

Past performance should not be taken as an indication or guarantee of future performance, and no representation or warranty, express or implied, is made regarding future performance. Information, opinions and estimates contained in this report reflect a judgement at its original date of publication by CS and are subject to change without notice. The price, value of and income from any of the securities or financial instruments mentioned in this report can fall as well as rise. The value of securities and financial instruments is subject to exchange rate fluctuation that may have a positive or adverse effect on the price or income of such securities or financial instruments. Investors in securities such as ADR's, the values of which are influenced by currency volatility, effectively assume this risk.

Structured securities are complex instruments, typically involve a high degree of risk and are intended for sale only to sophisticated investors who are capable of understanding and assuming the risks involved. The market value of any structured security may be affected by changes in economic, financial and political factors (including, but not limited to, spot and forward interest and exchange rates), time to maturity, market conditions and volatility, and the credit quality of any issuer or reference issuer. Any investor interested in purchasing a structured product should conduct their own investigation and analysis of the product and consult with their own professional advisers as to the risks involved in making such a purchase.

Some investments discussed in this report have a high level of volatility. High volatility investments may experience sudden and large falls in their value causing losses when that investment is realised. Those losses may equal your original investment. Indeed, in the case of some investments the potential losses may exceed the amount of initial investment, in such circumstances you may be required to pay more money to support those losses. Income yields from investments may fluctuate and, in consequence, initial capital paid to make the investment may be used as part of that income yield. Some investments may not be readily realisable and it may be difficult to sell or realise those investments, similarly it may prove difficult for you to obtain reliable information about the value, or risks, to which such an investment is exposed.

This report may provide the addresses of, or contain hyperlinks to, websites. Except to the extent to which the report refers to website material of CS, CS has not reviewed the linked site and takes no responsibility for the content contained therein. Such address or hyperlink (including addresses or hyperlinks to CS's own website material) is provided solely for your convenience and information and the content of the linked site does not in any way form part of this document. Accessing such website or following such link through this report or CS's website shall be at your own risk.

This report is issued and distributed in Europe (except Switzerland) by Credit Suisse Securities (Europe) Limited, One Cabot Square, London E14 4QJ, England, which is regulated in the United Kingdom by The Financial Services Authority ("FSA"). This report is being distributed in Germany by Credit Suisse Securities (Europe) Limited Niederlassung Frankfurt am Main regulated by the Bundesanstalt fuer Finanzdienstleistungsaufsicht ("BaFin"). (transactions related to the securities mentioned in this report will only be effected in compliance with applicable regulation); in Japan by Credit Suisse Securities (Japan) Limited, Financial Instrument Firm, Director-General of Kanto Local Finance Bureau (Kinsho) No. 66, a member of Japan Securities Dealers Association, The Financial Futures Association of Japan, Japan Securities Investment Advisers Association; elsewhere in Asia/Pacific by whichever of the following is the appropriately authorised entity in the relevant jurisdiction: Credit Suisse (Hong Kong) Limited, Credit Suisse Equities (Australia) Limited, Credit Suisse Securities (Thailand) Limited, Credit Suisse Securities (Malaysia) Sdn Bhd, Credit Suisse AG, Singapore Branch, Credit Suisse Securities (India) Private Limited regulated by the Securities and Exchange Board of India (registration Nos. INB230970637; INF230970637; INB010970631; INF010970631), having registered address at 9th Floor, Ceejay House, Dr.A.B. Road, Worli, Mumbai - 18, India, T- +91-22 6777 3777, Credit Suisse Securities (Europe) Limited, Seoul Branch, Credit Suisse AG, Taipei Securities Branch, PT Credit Suisse Securities Indonesia, and elsewhere in the world by the relevant authorised affiliate of the above. Research on Taiwanese securities produced by Credit Suisse AG, Taipei Securities Branch has been prepared by a registered Senior Business Person. Research provided to residents of Malaysia is authorised by the Head of Research for Credit Suisse Securities (Malaysia) Sdn. Bhd., to whom they should direct any queries on +603 2723 2020.

In jurisdictions where CS is not already registered or licensed to trade in securities, transactions will only be effected in accordance with applicable securities legislation, which will vary from jurisdiction to jurisdiction and may require that the trade be made in accordance with applicable exemptions from registration or licensing requirements. Non-U.S. customers wishing to effect a transaction should contact a CS entity in their local jurisdiction unless governing law permits otherwise. U.S. customers wishing to effect a transaction should do so only by contacting a representative at Credit Suisse Securities (USA) LLC in the U.S.

Please note that this report was originally prepared and issued by CS for distribution to their market professional and institutional investor customers. Recipients who are not market professional or institutional investor customers of CS should seek the advice of their independent financial advisor prior to taking any investment decision based on this report or for any necessary explanation of its contents. This research may relate to investments or services of a person outside of the UK or to other matters which are not regulated by the FSA or in respect of which the protections of the FSA for private customers and/or the UK compensation scheme may not be available, and further details as to where this may be the case are available upon request in respect of this report.

Any Nielsen Media Research material contained in this report represents Nielsen Media Research's estimates and does not represent facts. NMR has neither reviewed nor approved this report and/or any of the statements made herein.

If this report is being distributed by a financial institution other than Credit Suisse AG, or its affiliates, that financial institution is solely responsible for distribution. Clients of that institution should contact that institution to effect a transaction in the securities mentioned in this report or require further information. This report does not constitute investment advice by Credit Suisse to the clients of the distributing financial institution, and neither Credit Suisse AG, its affiliates, and their respective officers, directors and employees accept any liability whatsoever for any direct or consequential loss arising from their use of this report or its content.

COMPANY UPDATE

Valuing Vermont

- **Competing bid:** Roughly three and a half weeks after Central Vermont Public Service Corporation (CVPS) agreed to be purchased by Fortis Inc. for US\$35.10 per share, Northern New England Energy Corp. (NNEEC), a wholly owned subsidiary of Gaz Métro Limited Partnership made an unsolicited offer for CVPS. CVPS announced its board of directors “will review the unsolicited offer in due course based on its fiduciary responsibilities and contractual commitments to Fortis.” We believe FTS is a very disciplined buyer of assets. The recent equity offering, CV deal and Belize issues have weighed on the stock.
- **Deal differences:** Selected differences between the NNEEC and FTS offers include: (a) NNEEC bid US\$35.25 per CVPS share vs. FTS at US\$35.10/sh; (b) under NNEEC’s bid, CVPS shareholders will receive quarterly dividend payments of US\$0.23/sh until closing versus FTS’s offer capping dividends at US\$0.46; (c) NNEEC stated the transaction will create roughly US\$144m over 10-year customer savings to CVPS and, wholly-owned subsidiary, Green Mountain Energy (GMP) rate payers versus US\$21m in the FTS transaction; and (d) the NNEEC deal will see CVPS and GMP contribute roughly 30% ownership interest in VELCO to a “permanent trust under public direction”. As with many utility transactions, the potential for greater customer benefits may be critical in the regulatory approval process.
- **Improving capital market conditions:** Historically, Fortis has been very adept at acquisitions. Corporate growth has benefited from the company’s ability to successfully acquire and integrate selected assets. In our view, the company is well positioned in the current market for acquisition opportunities.
- **Valuation:** Our C\$34 target price and Neutral rating are obtained utilizing multiple valuation approaches, including: an 18.5x P/E multiple of 2012 earnings; a 1.8x book value multiple; and, a DCF based valuation.

Important Global Disclosures

I, Andrew M. Kuske, certify that (1) the views expressed in this report accurately reflect my personal views about all of the subject companies and securities and (2) no part of my compensation was, is or will be directly or indirectly related to the specific recommendations or views expressed in this report.

See the Companies Mentioned section for full company names.

3-Year Price, Target Price and Rating Change History Chart for FTS.TO

The analyst(s) responsible for preparing this research report received compensation that is based upon various factors including Credit Suisse's total revenues, a portion of which are generated by Credit Suisse's investment banking activities.

Analysts' stock ratings are defined as follows:

Outperform (O): The stock's total return is expected to outperform the relevant benchmark* by at least 10-15% (or more, depending on perceived risk) over the next 12 months.

Neutral (N): The stock's total return is expected to be in line with the relevant benchmark* (range of $\pm 10-15\%$) over the next 12 months.

Underperform (U): The stock's total return is expected to underperform the relevant benchmark* by 10-15% or more over the next 12 months.

*Relevant benchmark by region: As of 29th May 2009, Australia, New Zealand, U.S. and Canadian ratings are based on (1) a stock's absolute total return potential to its current share price and (2) the relative attractiveness of a stock's total return potential within an analyst's coverage universe**, with Outperforms representing the most attractive, Neutrals the less attractive, and Underperforms the least attractive investment opportunities. Some U.S. and Canadian ratings may fall outside the absolute total return ranges defined above, depending on market conditions and industry factors. For Latin American, Japanese, and non-Japan Asia stocks, ratings are based on a stock's total return relative to the average total return of the relevant country or regional benchmark; for European stocks, ratings are based on a stock's total return relative to the analyst's coverage universe**. For Australian and New Zealand stocks a 22% and a 12% threshold replace the 10-15% level in the Outperform and Underperform stock rating definitions, respectively, subject to analysts' perceived risk. The 22% and 12% thresholds replace the +10-15% and -10-15% levels in the Neutral stock rating definition, respectively, subject to analysts' perceived risk.

**An analyst's coverage universe consists of all companies covered by the analyst within the relevant sector.

Restricted (R): In certain circumstances, Credit Suisse policy and/or applicable law and regulations preclude certain types of communications, including an investment recommendation, during the course of Credit Suisse's engagement in an investment banking transaction and in certain other circumstances.

Volatility Indicator [V]: A stock is defined as volatile if the stock price has moved up or down by 20% or more in a month in at least 8 of the past 24 months or the analyst expects significant volatility going forward.

Analysts' coverage universe weightings are distinct from analysts' stock ratings and are based on the expected performance of an analyst's coverage universe* versus the relevant broad market benchmark:**

Overweight: Industry expected to outperform the relevant broad market benchmark over the next 12 months.

Market Weight: Industry expected to perform in-line with the relevant broad market benchmark over the next 12 months.

Underweight: Industry expected to underperform the relevant broad market benchmark over the next 12 months.

*An analyst's coverage universe consists of all companies covered by the analyst within the relevant sector.

**The broad market benchmark is based on the expected return of the local market index (e.g., the S&P 500 in the U.S.) over the next 12 months.

Credit Suisse's distribution of stock ratings (and banking clients) is:

Global Ratings Distribution		
Outperform/Buy*	48%	(62% banking clients)
Neutral/Hold*	40%	(56% banking clients)
Underperform/Sell*	10%	(51% banking clients)
Restricted	3%	

*For purposes of the NYSE and NASD ratings distribution disclosure requirements, our stock ratings of Outperform, Neutral, and Underperform most closely correspond to Buy, Hold, and Sell, respectively; however, the meanings are not the same, as our stock ratings are determined on a relative basis. (Please refer to definitions above.) An investor's decision to buy or sell a security should be based on investment objectives, current holdings, and other individual factors.

Credit Suisse's policy is to update research reports as it deems appropriate, based on developments with the subject company, the sector or the market that may have a material impact on the research views or opinions stated herein.

Credit Suisse's policy is only to publish investment research that is impartial, independent, clear, fair and not misleading. For more detail please refer to Credit Suisse's Policies for Managing Conflicts of Interest in connection with Investment Research: http://www.csfb.com/research-and-analytics/disclaimer/managing_conflicts_disclaimer.html

Credit Suisse does not provide any tax advice. Any statement herein regarding any US federal tax is not intended or written to be used, and cannot be used, by any taxpayer for the purposes of avoiding any penalties.

See the Companies Mentioned section for full company names.

Price Target: (12 months) for (FTS.TO)

Method: We obtain our C\$34.00 target price for Fortis Inc. by using multiple valuation methodologies, yield base analysis, and discounted cash flow, all of which produce the C\$34.00 target. Our target price implies a P/E (price/earnings) multiple of 18.5x our 2012 EPS (earnings per share) estimate of C\$1.86 and an EV/EBITDA (enterprise value/earnings before interest, taxes, depreciation, and amortization) multiple of 10.5x our EBITDA estimate.

Risks: There are a number of risks to Fortis' achievement of our C\$34.00 target price: commodity prices; weather; environmental; regulatory; access to capital markets; and, interest rates. Moreover, one should never underestimate the power of the regulator in any regulated business.

Please refer to the firm's disclosure website at www.credit-suisse.com/researchdisclosures for the definitions of abbreviations typically used in the target price method and risk sections.

See the Companies Mentioned section for full company names.

The subject company (FTS.TO) currently is, or was during the 12-month period preceding the date of distribution of this report, a client of Credit Suisse.

Credit Suisse provided investment banking services to the subject company (FTS.TO) within the past 12 months.

Credit Suisse provided non-investment banking services, which may include Sales and Trading services, to the subject company (FTS.TO) within the past 12 months.

Credit Suisse expects to receive or intends to seek investment banking related compensation from the subject company (FTS.TO) within the next 3 months.

Credit Suisse has received compensation for products and services other than investment banking services from the subject company (FTS.TO) within the past 12 months.

Important Regional Disclosures

Singapore recipients should contact a Singapore financial adviser for any matters arising from this research report.

An analyst involved in the preparation of this report has visited certain material operations of the subject company (FTS.TO) within the past 12 months. The analyst may not have visited all material operations of the subject company. The travel expenses of the analyst in connection with such visits were not paid or reimbursed by the subject company, other than de minimus local travel expenses.

Restrictions on certain Canadian securities are indicated by the following abbreviations: NVS--Non-Voting shares; RVS--Restricted Voting Shares; SVS--Subordinate Voting Shares.

Individuals receiving this report from a Canadian investment dealer that is not affiliated with Credit Suisse should be advised that this report may not contain regulatory disclosures the non-affiliated Canadian investment dealer would be required to make if this were its own report.

For Credit Suisse Securities (Canada), Inc.'s policies and procedures regarding the dissemination of equity research, please visit http://www.csfb.com/legal_terms/canada_research_policy.shtml.

As of the date of this report, Credit Suisse acts as a market maker or liquidity provider in the equities securities that are the subject of this report.

Principal is not guaranteed in the case of equities because equity prices are variable.

Commission is the commission rate or the amount agreed with a customer when setting up an account or at anytime after that.

CS may have issued a Trade Alert regarding this security. Trade Alerts are short term trading opportunities identified by an analyst on the basis of market events and catalysts, while stock ratings reflect an analyst's investment recommendations based on expected total return over a 12-month period relative to the relevant coverage universe. Because Trade Alerts and stock ratings reflect different assumptions and analytical methods, Trade Alerts may differ directionally from the analyst's stock rating.

The author(s) of this report maintains a CS Model Portfolio that he/she regularly adjusts. The security or securities discussed in this report may be a component of the CS Model Portfolio and subject to such adjustments (which, given the composition of the CS Model Portfolio as a whole, may differ from the recommendation in this report, as well as opportunities or strategies identified in Trading Alerts concerning the same security). The CS Model Portfolio and important disclosures about it are available at www.credit-suisse.com/ti.

To the extent this is a report authored in whole or in part by a non-U.S. analyst and is made available in the U.S., the following are important disclosures regarding any non-U.S. analyst contributors:

The non-U.S. research analysts listed below (if any) are not registered/qualified as research analysts with FINRA. The non-U.S. research analysts listed below may not be associated persons of CSSU and therefore may not be subject to the NASD Rule 2711 and NYSE Rule 472 restrictions on communications with a subject company, public appearances and trading securities held by a research analyst account.

- Andrew M. Kuske, non-U.S. analyst, is a research analyst employed by Credit Suisse Securities (Canada), Inc..
- Paul Tan, non-U.S. analyst, is a research analyst employed by Credit Suisse Securities (Canada), Inc..

Taiwanese Disclosures: Reports written by Taiwan-based analysts on non-Taiwan listed companies are not considered recommendations to buy or sell securities under Taiwan Stock Exchange Operational Regulations Governing Securities Firms Recommending Trades in Securities to Customers.

For Credit Suisse disclosure information on other companies mentioned in this report, please visit the website at www.credit-suisse.com/researchdisclosures or call +1 (877) 291-2683.

Disclaimers continue on next page.

This report is not directed to, or intended for distribution to or use by, any person or entity who is a citizen or resident of or located in any locality, state, country or other jurisdiction where such distribution, publication, availability or use would be contrary to law or regulation or which would subject Credit Suisse AG, the Swiss bank, or its subsidiaries or its affiliates ("CS") to any registration or licensing requirement within such jurisdiction. All material presented in this report, unless specifically indicated otherwise, is under copyright to CS. None of the material, nor its content, nor any copy of it, may be altered in any way, transmitted to, copied or distributed to any other party, without the prior express written permission of CS. All trademarks, service marks and logos used in this report are trademarks or service marks or registered trademarks or service marks of CS or its affiliates.

The information, tools and material presented in this report are provided to you for information purposes only and are not to be used or considered as an offer or the solicitation of an offer to sell or to buy or subscribe for securities or other financial instruments. CS may not have taken any steps to ensure that the securities referred to in this report are suitable for any particular investor. CS will not treat recipients as its customers by virtue of their receiving the report. The investments or services contained or referred to in this report may not be suitable for you and it is recommended that you consult an independent investment advisor if you are in doubt about such investments or investment services. Nothing in this report constitutes investment, legal, accounting or tax advice or a representation that any investment or strategy is suitable or appropriate to your individual circumstances or otherwise constitutes a personal recommendation to you. CS does not offer advice on the tax consequences of investment and you are advised to contact an independent tax adviser. Please note in particular that the bases and levels of taxation may change.

CS believes the information and opinions in the Disclosure Appendix of this report are accurate and complete. Information and opinions presented in the other sections of the report were obtained or derived from sources CS believes are reliable, but CS makes no representations as to their accuracy or completeness. Additional information is available upon request. CS accepts no liability for loss arising from the use of the material presented in this report, except that this exclusion of liability does not apply to the extent that liability arises under specific statutes or regulations applicable to CS. This report is not to be relied upon in substitution for the exercise of independent judgment. CS may have issued, and may in the future issue, a trading call regarding this security. Trading calls are short term trading opportunities based on market events and catalysts, while stock ratings reflect investment recommendations based on expected total return over a 12-month period as defined in the disclosure section. Because trading calls and stock ratings reflect different assumptions and analytical methods, trading calls may differ directionally from the stock rating. In addition, CS may have issued, and may in the future issue, other reports that are inconsistent with, and reach different conclusions from, the information presented in this report. Those reports reflect the different assumptions, views and analytical methods of the analysts who prepared them and CS is under no obligation to ensure that such other reports are brought to the attention of any recipient of this report. CS is involved in many businesses that relate to companies mentioned in this report. These businesses include specialized trading, risk arbitrage, market making, and other proprietary trading.

Past performance should not be taken as an indication or guarantee of future performance, and no representation or warranty, express or implied, is made regarding future performance. Information, opinions and estimates contained in this report reflect a judgement at its original date of publication by CS and are subject to change without notice. The price, value of and income from any of the securities or financial instruments mentioned in this report can fall as well as rise. The value of securities and financial instruments is subject to exchange rate fluctuation that may have a positive or adverse effect on the price or income of such securities or financial instruments. Investors in securities such as ADR's, the values of which are influenced by currency volatility, effectively assume this risk.

Structured securities are complex instruments, typically involve a high degree of risk and are intended for sale only to sophisticated investors who are capable of understanding and assuming the risks involved. The market value of any structured security may be affected by changes in economic, financial and political factors (including, but not limited to, spot and forward interest and exchange rates), time to maturity, market conditions and volatility, and the credit quality of any issuer or reference issuer. Any investor interested in purchasing a structured product should conduct their own investigation and analysis of the product and consult with their own professional advisers as to the risks involved in making such a purchase.

Some investments discussed in this report have a high level of volatility. High volatility investments may experience sudden and large falls in their value causing losses when that investment is realised. Those losses may equal your original investment. Indeed, in the case of some investments the potential losses may exceed the amount of initial investment, in such circumstances you may be required to pay more money to support those losses. Income yields from investments may fluctuate and, in consequence, initial capital paid to make the investment may be used as part of that income yield. Some investments may not be readily realisable and it may be difficult to sell or realise those investments, similarly it may prove difficult for you to obtain reliable information about the value, or risks, to which such an investment is exposed.

COMPANY UPDATE

A positive pass

- **Terminating transaction:** Fortis Inc. announced the Central Vermont Public Service Corporation's (CVPS) Board of Directors determined Gaz Métro Limited Partnership's acquisition proposal was a "Superior Proposal". Thus, CVPS terminated the Merger Agreement with Fortis Inc. As a result, Fortis will receive a termination fee of US\$17.5m plus US\$2.0m in expenses. We believe the transaction illustrates the company's traditional discipline by not engaging in a bidding war. Roughly concurrent with the initial bid for CV, Fortis raised more than C\$300m of gross proceeds from an equity issue. We believe the money gives more flexibility for Fortis to potentially accelerate the existing capital program, de-levering or engage in further acquisitions.
- **Positive pass:** We continue to believe Fortis is extremely well positioned to consolidate the small to mid-cap US utility sector. In our view, Fortis remains a disciplined buyer of assets with a view for longer-term rate base growth. In light of the difficulties around many utility transactions, we do not expect FTS to announce another deal in short order. Yet, we believe FTS will continue to be very active in the US market for the "right" utility deal. Despite the Street's potential lingering M&A concerns, we believe the shares rally on the CV deal termination.
- **Improving capital market conditions:** Historically, Fortis has been very adept at acquisitions. Corporate growth has benefited from the company's ability to successfully acquire and integrate selected assets. In our view, the company is well positioned in the current market for acquisition opportunities.
- **Valuation:** Our C\$34.target price and Neutral rating are obtained utilizing multiple valuation approaches, including: an 18.5x P/E multiple of 2012 earnings; a 1.8x book value multiple; and, a DCF based valuation. We reiterate our Neutral rating.

Disclosure Appendix

Important Global Disclosures

I, Andrew M. Kuske, certify that (1) the views expressed in this report accurately reflect my personal views about all of the subject companies and securities and (2) no part of my compensation was, is or will be directly or indirectly related to the specific recommendations or views expressed in this report.

See the Companies Mentioned section for full company names.

3-Year Price, Target Price and Rating Change History Chart for FTS.TO

The analyst(s) responsible for preparing this research report received compensation that is based upon various factors including Credit Suisse's total revenues, a portion of which are generated by Credit Suisse's investment banking activities.

Analysts' stock ratings are defined as follows:

Outperform (O): The stock's total return is expected to outperform the relevant benchmark* by at least 10-15% (or more, depending on perceived risk) over the next 12 months.

Neutral (N): The stock's total return is expected to be in line with the relevant benchmark* (range of $\pm 10-15\%$) over the next 12 months.

Underperform (U): The stock's total return is expected to underperform the relevant benchmark* by 10-15% or more over the next 12 months.

*Relevant benchmark by region: As of 29th May 2009, Australia, New Zealand, U.S. and Canadian ratings are based on (1) a stock's absolute total return potential to its current share price and (2) the relative attractiveness of a stock's total return potential within an analyst's coverage universe**, with Outperforms representing the most attractive, Neutrals the less attractive, and Underperforms the least attractive investment opportunities. Some U.S. and Canadian ratings may fall outside the absolute total return ranges defined above, depending on market conditions and industry factors. For Latin American, Japanese, and non-Japan Asia stocks, ratings are based on a stock's total return relative to the average total return of the relevant country or regional benchmark; for European stocks, ratings are based on a stock's total return relative to the analyst's coverage universe**. For Australian and New Zealand stocks a 22% and a 12% threshold replace the 10-15% level in the Outperform and Underperform stock rating definitions, respectively, subject to analysts' perceived risk. The 22% and 12% thresholds replace the +10-15% and -10-15% levels in the Neutral stock rating definition, respectively, subject to analysts' perceived risk.

**An analyst's coverage universe consists of all companies covered by the analyst within the relevant sector.

Restricted (R): In certain circumstances, Credit Suisse policy and/or applicable law and regulations preclude certain types of communications, including an investment recommendation, during the course of Credit Suisse's engagement in an investment banking transaction and in certain other circumstances.

Volatility Indicator [V]: A stock is defined as volatile if the stock price has moved up or down by 20% or more in a month in at least 8 of the past 24 months or the analyst expects significant volatility going forward.

Analysts' coverage universe weightings are distinct from analysts' stock ratings and are based on the expected performance of an analyst's coverage universe* versus the relevant broad market benchmark**:

Overweight: Industry expected to outperform the relevant broad market benchmark over the next 12 months.

Market Weight: Industry expected to perform in-line with the relevant broad market benchmark over the next 12 months.

Underweight: Industry expected to underperform the relevant broad market benchmark over the next 12 months.

*An analyst's coverage universe consists of all companies covered by the analyst within the relevant sector.

**The broad market benchmark is based on the expected return of the local market index (e.g., the S&P 500 in the U.S.) over the next 12 months.

Credit Suisse's distribution of stock ratings (and banking clients) is:

Global Ratings Distribution		
Outperform/Buy*	48%	(61% banking clients)
Neutral/Hold*	40%	(57% banking clients)
Underperform/Sell*	10%	(52% banking clients)
Restricted	2%	

*For purposes of the NYSE and NASD ratings distribution disclosure requirements, our stock ratings of Outperform, Neutral, and Underperform most closely correspond to Buy, Hold, and Sell, respectively; however, the meanings are not the same, as our stock ratings are determined on a relative basis. (Please refer to definitions above.) An investor's decision to buy or sell a security should be based on investment objectives, current holdings, and other individual factors.

Credit Suisse's policy is to update research reports as it deems appropriate, based on developments with the subject company, the sector or the market that may have a material impact on the research views or opinions stated herein.

Credit Suisse's policy is only to publish investment research that is impartial, independent, clear, fair and not misleading. Credit Suisse does not provide any tax advice. Any statement herein regarding any US federal tax is not intended or written to be used, and cannot be used, by any taxpayer for the purposes of avoiding any penalties.

See the Companies Mentioned section for full company names.

Price Target: (12 months) for (FTS.TO)

Method: We obtain our C\$34.00 target price for Fortis Inc. by using multiple valuation methodologies, yield base analysis, and discounted cash flow, all of which produce the C\$34.00 target. Our target price implies a P/E (price/earnings) multiple of 18.5x our 2012 EPS (earnings per share) estimate of C\$1.86 and an EV/EBITDA (enterprise value/earnings before interest, taxes, depreciation, and amortization) multiple of 10.5x our EBITDA estimate.

Risks: There are a number of risks to Fortis' achievement of our C\$34.00 target price: commodity prices; weather; environmental; regulatory; access to capital markets; and, interest rates. Moreover, one should never underestimate the power of the regulator in any regulated business.

Please refer to the firm's disclosure website at www.credit-suisse.com/researchdisclosures for the definitions of abbreviations typically used in the target price method and risk sections.

See the Companies Mentioned section for full company names.

The subject company (FTS.TO) currently is, or was during the 12-month period preceding the date of distribution of this report, a client of Credit Suisse.

Credit Suisse provided investment banking services to the subject company (FTS.TO) within the past 12 months.

Credit Suisse provided non-investment banking services, which may include Sales and Trading services, to the subject company (FTS.TO) within the past 12 months.

Credit Suisse expects to receive or intends to seek investment banking related compensation from the subject company (FTS.TO) within the next 3 months.

Credit Suisse has received compensation for products and services other than investment banking services from the subject company (FTS.TO) within the past 12 months.

Important Regional Disclosures

Singapore recipients should contact a Singapore financial adviser for any matters arising from this research report.

An analyst involved in the preparation of this report has visited certain material operations of the subject company (FTS.TO) within the past 12 months. The analyst may not have visited all material operations of the subject company. The travel expenses of the analyst in connection with such visits were not paid or reimbursed by the subject company, other than de minimus local travel expenses.

Restrictions on certain Canadian securities are indicated by the following abbreviations: NVS--Non-Voting shares; RVS--Restricted Voting Shares; SVS--Subordinate Voting Shares.

Individuals receiving this report from a Canadian investment dealer that is not affiliated with Credit Suisse should be advised that this report may not contain regulatory disclosures the non-affiliated Canadian investment dealer would be required to make if this were its own report.

For Credit Suisse Securities (Canada), Inc.'s policies and procedures regarding the dissemination of equity research, please visit http://www.csfb.com/legal_terms/canada_research_policy.shtml.

As of the date of this report, Credit Suisse acts as a market maker or liquidity provider in the equities securities that are the subject of this report.

Principal is not guaranteed in the case of equities because equity prices are variable.

Commission is the commission rate or the amount agreed with a customer when setting up an account or at anytime after that.

CS may have issued a Trade Alert regarding this security. Trade Alerts are short term trading opportunities identified by an analyst on the basis of market events and catalysts, while stock ratings reflect an analyst's investment recommendations based on expected total return over a 12-month period relative to the relevant coverage universe. Because Trade Alerts and stock ratings reflect different assumptions and analytical methods, Trade Alerts may differ directionally from the analyst's stock rating.

The author(s) of this report maintains a CS Model Portfolio that he/she regularly adjusts. The security or securities discussed in this report may be a component of the CS Model Portfolio and subject to such adjustments (which, given the composition of the CS Model Portfolio as a whole, may differ from the recommendation in this report, as well as opportunities or strategies identified in Trading Alerts concerning the same security). The CS Model Portfolio and important disclosures about it are available at www.credit-suisse.com/ti.

To the extent this is a report authored in whole or in part by a non-U.S. analyst and is made available in the U.S., the following are important disclosures regarding any non-U.S. analyst contributors:

The non-U.S. research analysts listed below (if any) are not registered/qualified as research analysts with FINRA. The non-U.S. research analysts listed below may not be associated persons of CSSU and therefore may not be subject to the NASD Rule 2711 and NYSE Rule 472 restrictions on communications with a subject company, public appearances and trading securities held by a research analyst account.

Disclaimers continue on next page.

This report is not directed to, or intended for distribution to or use by, any person or entity who is a citizen or resident of or located in any locality, state, country or other jurisdiction where such distribution, publication, availability or use would be contrary to law or regulation or which would subject Credit Suisse AG, the Swiss bank, or its subsidiaries or its affiliates ("CS") to any registration or licensing requirement within such jurisdiction. All material presented in this report, unless specifically indicated otherwise, is under copyright to CS. None of the material, nor its content, nor any copy of it, may be altered in any way, transmitted to, copied or distributed to any other party, without the prior express written permission of CS. All trademarks, service marks and logos used in this report are trademarks or service marks or registered trademarks or service marks of CS or its affiliates.

The information, tools and material presented in this report are provided to you for information purposes only and are not to be used or considered as an offer or the solicitation of an offer to sell or to buy or subscribe for securities or other financial instruments. CS may not have taken any steps to ensure that the securities referred to in this report are suitable for any particular investor. CS will not treat recipients as its customers by virtue of their receiving the report. The investments or services contained or referred to in this report may not be suitable for you and it is recommended that you consult an independent investment advisor if you are in doubt about such investments or investment services. Nothing in this report constitutes investment, legal, accounting or tax advice or a representation that any investment or strategy is suitable or appropriate to your individual circumstances or otherwise constitutes a personal recommendation to you. CS does not offer advice on the tax consequences of investment and you are advised to contact an independent tax adviser. Please note in particular that the bases and levels of taxation may change.

CS believes the information and opinions in the Disclosure Appendix of this report are accurate and complete. Information and opinions presented in the other sections of the report were obtained or derived from sources CS believes are reliable, but CS makes no representations as to their accuracy or completeness. Additional information is available upon request. CS accepts no liability for loss arising from the use of the material presented in this report, except that this exclusion of liability does not apply to the extent that liability arises under specific statutes or regulations applicable to CS. This report is not to be relied upon in substitution for the exercise of independent judgment. CS may have issued, and may in the future issue, a trading call regarding this security. Trading calls are short term trading opportunities based on market events and catalysts, while stock ratings reflect investment recommendations based on expected total return over a 12-month period as defined in the disclosure section. Because trading calls and stock ratings reflect different assumptions and analytical methods, trading calls may differ directionally from the stock rating. In addition, CS may have issued, and may in the future issue, other reports that are inconsistent with, and reach different conclusions from, the information presented in this report. Those reports reflect the different assumptions, views and analytical methods of the analysts who prepared them and CS is under no obligation to ensure that such other reports are brought to the attention of any recipient of this report. CS is involved in many businesses that relate to companies mentioned in this report. These businesses include specialized trading, risk arbitrage, market making, and other proprietary trading.

Past performance should not be taken as an indication or guarantee of future performance, and no representation or warranty, express or implied, is made regarding future performance. Information, opinions and estimates contained in this report reflect a judgement at its original date of publication by CS and are subject to change without notice. The price, value of and income from any of the securities or financial instruments mentioned in this report can fall as well as rise. The value of securities and financial instruments is subject to exchange rate fluctuation that may have a positive or adverse effect on the price or income of such securities or financial instruments. Investors in securities such as ADR's, the values of which are influenced by currency volatility, effectively assume this risk.

Structured securities are complex instruments, typically involve a high degree of risk and are intended for sale only to sophisticated investors who are capable of understanding and assuming the risks involved. The market value of any structured security may be affected by changes in economic, financial and political factors (including, but not limited to, spot and forward interest and exchange rates), time to maturity, market conditions and volatility, and the credit quality of any issuer or reference issuer. Any investor interested in purchasing a structured product should conduct their own investigation and analysis of the product and consult with their own professional advisers as to the risks involved in making such a purchase.

Some investments discussed in this report have a high level of volatility. High volatility investments may experience sudden and large falls in their value causing losses when that investment is realised. Those losses may equal your original investment. Indeed, in the case of some investments the potential losses may exceed the amount of initial investment, in such circumstances you may be required to pay more money to support those losses. Income yields from investments may fluctuate and, in consequence, initial capital paid to make the investment may be used as part of that income yield. Some investments may not be readily realisable and it may be difficult to sell or realise those investments, similarly it may prove difficult for you to obtain reliable information about the value, or risks, to which such an investment is exposed.

UPGRADE RATING

Caught in the downdraft

- **Earnings review:** Fortis reported Q1 2011 headline EPS (FD) of C\$0.33 slightly below our C\$0.34 estimate, the Street's C\$0.347 view and at the bottom end of the C\$0.33-C\$0.36 range. Year-to-date, Fortis shares have been the weakest performer in the Canadian utility universe returning -9%. We believe Fortis delivers organic growth that is combined with a disciplined acquisition framework. In our view, the market remains somewhat concerned about deal potential and the Belize Electricity situation. Given the potential excess return, we upgrade FTS to Outperform from the previous Neutral. Our target is maintained at C\$34.
- **Significant organic growth continues:** Fortis continues to provide a rather robust capital expenditure outlook with a reiteration of the C\$1.2bn target for 2011. Additionally, Fortis increased the 5-year capex outlook to C\$5.7b from C\$5.5bn. Eighty-four percent of that total amount is expected to go towards utility activity that should deliver favourable risk adjusted returns.
- **Improving capital market conditions:** Historically, Fortis has been very adept at acquisitions. Corporate growth has benefited from the company's ability to successfully acquire and integrate selected assets. In our view, the company is well positioned in the current market for acquisition opportunities. The company stated, "We are disciplined and patient in our pursuit of electric and gas utility acquisitions in the United States and Canada that will add value for Fortis shareholders".
- **Valuation:** With the recent sell-off, we upgrade our FTS rating to Outperform from the previous Neutral. We also maintain our C\$34 that is obtained via multiple valuation approaches, including: an 18.5x P/E multiple of 2012 earnings; a 1.7x book value multiple; and, a DCF-based valuation. We introduce our Outperform rating.

Regulated Gas Utilities - Canadian

The unadjusted earnings for this segment decreased by roughly 12% year-over-year (see Exhibit 2). Some notable items for the regulated gas utilities, include:

- Net customer additions were 1,002 during H1 2011 versus net addition of 1,829 during the H1 2010;
- The amount of customer additions decreased versus H1 2010 due to lower building activity; and,
- Sales volumes for the quarter increased for all the segments (Core-Residential and Commercial, the Industrial segment and transportation volumes).

FortisAlberta

Earnings at this regulated utility were up by roughly 12% comparing Q2 2011 versus the prior period. See Exhibit 4 for selected highlights.

Increase in energy delivery in Alberta

Exhibit 4: Selected FortisAlberta performance highlights (unadjusted)

	Q2 2011	Q2 2010	chg y/y
Energy deliveries (GWh)	3,822	3,784	1%
Revenue (C\$/MWh)	27.21	24.31	12%
Operating expenses (C\$/MWh)	9.42	9.51	-1%
Gross margin (C\$/MWh)	17.79	14.80	20%
Earnings (C\$millions)	19	17	12%

Source: Company data and Credit Suisse

FortisBC Electric

Segmented earnings at FortisBC Electric increased by 13% compared to the same period last year. The increase was due rate base growth due to continued investment in utility capital assets and lower-than-expected average market priced purchase power costs. See Exhibit 5 for selected highlights.

Increase in energy deliveries in BC

Exhibit 5: Selected FortisBC Electric performance highlights (unadjusted)

	Q2 2011	Q2 2010	chg y/y

Earnings (C\$millions)	9	8	13%

Source: Company data and Credit Suisse

Newfoundland Power

This segment's earnings generation was flat when comparing Q2 2011 versus Q2 2010. Higher electricity sales and lower effective income taxes were offset by timing of certain labour costs in H1 2011, wage and inflationary increases and lower allowed ROE. Energy deliveries were up by approximately 4% (see Exhibit 6).

Increase in NP's energy deliveries

Exhibit 6: Selected Newfoundland Power performance highlights (unadjusted)

	Q2 2011	Q2 2010	chg y/y
Energy deliveries (GWh)	1,269	1,220	4%
Revenue (C\$/MWh)	104.81	103.28	1%
Energy supply costs (C\$/MWh)	63.04	61.48	3%
Operating expenses (C\$/MWh)	13.40	12.30	9%
Gross margin (C\$/MWh)	28.37	29.51	-4%
Earnings (C\$millions)	11	11	0%

Source: Company data, Credit Suisse estimates

Other Canadian Electric Utilities

The roughly 5% increase in energy deliveries was primarily the result of higher average consumption due to colder temperatures in Ontario and Prince Edward Island. Exhibit 7 contains selected highlights.

Regulated Electric Utilities – Caribbean

Awaiting a decision in Belize

This segment includes Belize Electricity (up to June 20, 2011), Caribbean Utilities, and Fortis Turks and Caicos. Earnings for this segment were flat when compared the same quarter last year at C\$7m. Energy deliveries declined 6% for several reasons. In our view, Belize Electricity was not overly material to Fortis. Additionally, we anticipate the dispute to be resolved in a rationale manner with Fortis recovering, at least, the rate base value. Yet, any such recovery may be over a period of time.

See Exhibit 8 below for selected highlights.

Exhibit 8: Caribbean - Regulated Electric Utilities performance highlights (unadjusted)

	Q2 2011	Q2 2010	chg y/y
Energy deliveries (GWh)	290	307	-6%
Revenue (C\$/MWh)	300.00	270.36	11%
Energy supply costs (C\$/MWh)	182.76	153.09	19%
Operating expenses (C\$/MWh)	37.93	35.83	6%
Gross margin (C\$/MWh)	79.31	81.43	-3%
Earnings (C\$millions)	7	7	0%

Source: Company data and Credit Suisse

Non-regulated – Fortis Generation

The non-regulated generation assets within this segment are located in Belize, British Columbia, Central Newfoundland, Ontario and Upper New York State. Earnings for the segment were down 33% from the current quarter compared to the same quarter last year. Energy deliveries increased by 3% from Q2 2010 to Q2 2011 due increased production New York and Ontario caused by higher rainfall. Exhibit 9 provides selected highlights.

Exhibit 9: Non-regulated generation – selected highlights

	Q2 2011	Q2 2010	chg y/y
Energy deliveries (GWh)	90	87	3%
Revenue (C\$/MWh)	77.78	91.95	-15%
Energy supply costs (C\$/MWh)	11.11	11.49	-3%
Operating expenses (C\$/MWh)	11.11	22.99	-52%
Gross margin (C\$/MWh)	55.56	57.47	-3%
Earnings (C\$millions)	2	3	-33%

Source: Company data and Credit Suisse

Non-regulated – Fortis Properties

Fortis Properties' net unadjusted earning contribution during the quarter was C\$7m which is lower than Q2 2010 earnings of C\$8m. REVPAR slightly decreased to C\$83.57 from C\$83.77 for the comparable period last year. Additionally, the occupancy rate of the Real Estate Division was down at 93.4% versus last year's 94.8%.

Corporate

Corporate expenses decreased to C\$18million in Q2 2011 from C\$20m in Q2 2010.

Outlook

We continue to believe investor, whether existing or prospective, should consider several major issues, including (a) funding organic growth; (b) rising returns; and, (c) acquisition trail. Each of these issues is addressed below.

Funding organic growth

In the most recent quarter the company's reported capital expenditures totaled C\$286 million, of which C\$221 million was spent at regulated utilities. Fortis continues to guide that capital expenditures for 2011 will be roughly C\$1.2 billion. A majority of the total will be spent on Western Canadian assets (FortisBC Energy, FortisAlberta, and FortisBC Electric). Fortis increased consolidated gross capital expenditures expectations over the 5 year plan (2011-2015) to C\$5.7bn from the previous guidance of C\$5.5bn with 84% of that total amount being allocated to regulated utilities. Both FortisAlberta and FortisBC Electric will receive the vast majority of that amount; whereas, the regulated gas utilities are planned to receive 23% of the total capex amount, and 16% is allocated to non-regulated operations. Given the regulated rates of return with utility capital expenditures, the increases should be viewed as longer-term positives provided an appropriate financial balance is struck.

Ongoing organic growth

With the significant current relative valuation advantages, we believe that Fortis may become more motivated to explore possible capital efficiency initiatives. In our view, the company possesses ample opportunities to become much more capital efficient. One strategy involves divesting certain non-utility assets and redeploying capital into utility assets or funding the capital program. Another option would entail divesting partial interests in selected utility assets in an asset management model approach and receiving a management fee.

In fact, some of the media reports prior to the official announcement of PPL Corporation's acquisition of E.ON's Kentucky utility assets for US\$7.625 billion stated that a consortium led by Fortis Inc. was one of three finalists for those assets. We would regard that type of information in media reports as being something akin to an asset management style of approach. Ultimately, we believe that such a strategy would help Fortis generate a higher level of returns. Additionally, the use of an asset management type approach would make large acquisitions which could potentially further accelerate growth.

Opportunities for improved capital efficiency

Generally, we continue to prefer pure-play utility companies without an undue amount of non-core asset exposure. Historically, non-core assets (especially real estate) have been somewhat commonplace for many utilities. Fortis has been no exception to that approach. Notably, the mix of commercial and hospitality real estate assets held by Fortis have been positive contributors and also provide the company a bit of financial flexibility for a selection of reasons. In light of current market conditions, we believe there is a much less compelling case for the monetization of these assets than as in the past. We note Fortis Properties continues to increase in scale and scope which may eventually make it more attractive for acquisition or monetization. Yet, for a number of reasons, we continue to believe there is a rather low probability of either of those events occurring.

Even discounting the potential monetization of assets that we would consider to be non-core, we believe Fortis possesses considerable potential to become much more capital efficient. Given the significant interest in infrastructure assets by many investors seeking long-dated types of return, Fortis could easily divest portions of its existing asset base to pension fund investors and charge a management fee for their operational and management expertise. This type of approach could significantly improve capital efficiency and returns on capital. In addition, this asset management approach could also free-up capital that could be used to fund the existing capital program or fund future acquisitions.

Capital efficiency initiatives could aid funding of acquisitions or the existing capital program funding

Rising returns

Positively, Fortis has been successful in obtaining several favourable regulatory decisions. For example, the allowed equity at Terasen Gas Inc. (TGI) was boosted from 35% to 40% effective January 1, 2010. In addition to that positive move for the equity base, the allowed return on equity for TGI increased from 8.47% to 9.50%. In a related judgment, Terasen Gas (Vancouver Island) Inc. (TGVI) and Terasen Gas Whistler Inc. (TGWI) returns increased from 9.17% to 10%. Additionally, the British Columbia Utilities Commission (BCUC) held the former automatic adjustment mechanism for annual ROE determination would no longer apply. Also in BC, FortisBC obtained an increased allowed ROE from 8.87% to 9.90% that became effective on January 1, 2010. The upward bias in utility returns should be viewed positively. Clearly, many questions exist as to the methods for determining and predicting future return levels. Yet, we view the regulatory movement away from a very mechanical return approach work as a notable positive that should help ensure an appropriate level of returns over a period of time.

Similar to the BCUC, the Alberta Utilities Commission (AUC) issued a decision on the 2009 Generic Cost of Capital establishing a 9% ROE for utilities like FortisAlberta in 2009 and 2010. Under the previous formulaic approach, that utility would have been entitled to an 8.61% return. Moreover, the allowed equity within the regulated capital structure moved from 37% to 41% effective January 1, 2009. Notably, this return framework will be in effect for 2011 providing a level of certainty to FortisAlberta's future earnings.

Unfortunately, not every jurisdiction is proving to be as progressive as Alberta, BC and the National Energy Board in the regulated Trans-Quebec & Maritimes Pipeline decision (see file RH-1-2008 and our March 19, 2009 note "*Regulatory round-up*"). The Newfoundland and Labrador Board of Commissioners of Public Utilities (PUB) most recent decision increased the allowed ROE for Newfoundland Power from 8.95% in 2009 to 9% in 2010. Additionally, in the past, the PUB ordered Newfoundland Power's allowed ROEs for 2011 and 2012 would be determined by an automated formula that will be subject to review in Q1 2010. We do not need to belabour all of the regulatory developments, however, we note that returns are slowly biasing to the upside.

Acquisition trail

In our view, Fortis continues to demonstrate a rather impressive ability to successfully integrate acquisitions. Additionally, we view acquisitions as somewhat central to the company's growth strategy. For instance, the company's most recent Management Discussion and Analysis stated "We will continue to pursue acquisitions of regulated electric and natural gas utilities in the United States and Canada that will add value for our shareholders". Given the success of Fortis in past transactions, as measured in terms of financials, share price and operationally, we believe the company's current valuation and skill set may lead to some potentially value creating acquisition activity (see Exhibit 10 below for select Fortis M&A transactions).

Exhibit 10: Selected Fortis M&A transactions

\$ in millions, unless otherwise stated

Announced Date	Asset/Company	Deal value (\$m)	Comment
7/22/2009	Caribbean Utilities Co.	CAD 6.74	Acquired an additional 2.7% of Caribbean Utilities Co.
6/23/2009	Great Lakes Power Distribution	CAD 68.00	Acquired from Brookfield the utility that serves the District of Algoma in northern Ontario.
10/1/2008	Grimsby Power Inc.	CAD 1.10	Acquired a 10% minority interest.
10/1/2008	Caribbean Utilities Co.	CAD 3.00	Acquired an additional 1% of Caribbean Utilities Co.
8/15/2008	Caribbean Utilities Co.	CAD 25.00	Acquired an additional 2% of Caribbean Utilities Co.
7/23/2007	Delta Regina	CAD 49.95	Delta hotel located in Regina, Saskatchewan.
2/26/2007	Terasen Inc.	CAD 3,700.00	Gas distribution in British Columbia.
11/7/2006	Caribbean Utilities Co.	CAD 55.70	Acquired an additional 16% of Caribbean Utilities Co.
10/19/2006	4 hotels in western Canada	CAD 51.60	4 hotels (Holiday Inn, Best Western and Ramada) located in BC and Alberta.
8/28/2006	PPC Ltd & Atlantic Equipment & Power (Turks & Caicos) Ltd.	CAD 97.70	Electric utility that services ~80% of the Turks and Caicos Islands.
1/25/2005	3 hotels in western Canada	CAD 62.60	3 hotels in Western Canada from Greenwood Inns (Calgary, Edmonton and Winnipeg).
12/15/2004	Princeton Light & Power	CAD 3.70	PLP is an electric utility that services Princeton, BC.
5/21/2004	Belize Electric Company Ltd.	USD 3.50	Acquired the remaining 5% interest of the company.
9/17/2003	4 hotels in Ontario	CAD 43.20	4 hotels located in Ontario (Cambridge, Kitchener, Sarnia and Peterborough).
9/15/2003	Alberta Utility & British Columbia Utility (from Aquila)	CAD 1,500.00	BC and Alberta units of Aquila Inc.
2/26/2003	Granite Power Corp	CAD 8.80	Company consist of Granite Power Distribution & Granite Power Generation.
1/30/2003	Caribbean Utilities Co.	CAD 71.00	Acquired additional 3,863,695 Class A Ordinary Shares, representing approximately 15.9 per cent of the outstanding shares of the company and increased Fortis' holding to roughly 38%.
12/1/2002	Delta St John's Hotel and conference centre	CAD 25.90	Hotel in downtown St. John's, Newfoundland
5/9/2002	Cornwall Street Railway Light	CAD 67.70	City of Cornwall electric transmission & distribution utility.
4/16/2002	Kings Place	CAD 27.70	Commercial property in Fredericton, NB.
3/13/2002	Caribbean Utilities Co.	CAD 12.90	Acquired additional ~2% of the company.
3/20/2002	Niagara Power Co.	CAD 49.00	Purchase remaining 50% of Niagara Power Co.
2/1/2002	Cabot palace I	CAD 14.30	133,327 Square feet premium office tower in St. John's, Newfoundland
9/18/2001	Portfolio of properties in St. John's	CAD 8.30	Purchased TD Place commercial bldg and 6 parcels of land.
9/14/2001	Aliant Poles	CAD 46.00	Purchased 102,000 poles and related infrastructure from Aliant Telecom.
1/26/2001	Belize Electric Company Ltd.	USD 62.00	Acquired 95% of company from Duke Energy.
12/19/2000	2 Hydro generating stations	CAD 6.90	2 generating stations (6.88MW) in upper New York state.
12/14/2000	Brunswick Square Ltd.	CAD 6.20	Acquired 50% of the company Fortis doesn't own.
12/1/2000	Fort William Building and Blue cross centre	CAD 52.70	Fort William building in St. John's, Newfoundland and Blue cross centre in Moncton, New Brunswick.
2/23/2000	Caribbean Utilities Co.	CAD 79.90	Acquired 20% of the company.
12/30/1999	2 Hydro generating stations	CAD 19.77	2 generating stations (16MW) in upper New York state (Moose River & Philadelphia)
10/28/1999	Belize Electricity Ltd.	CAD 36.80	Acquired 67% interest in the main commercial generator, transmitter & distributor of electricity in Belize.
8/31/1999	Brunswick Square Ltd.	CAD 10.12	Acquired 50% of the company by Fortis Properties.
1/31/1999	Mount Peyton	CAD 2.20	Acquired all common shares and notes payable.
	Total USD	USD 65.50	
	Total CAD	CAD 6,214.48	

Source: Bloomberg, Company data and Credit Suisse

In terms of acquisitions, we believe Fortis has a few advantages over others, including:

- Fortis has growing expertise with both electric and gas utilities;
- Larger size will allow it to look at a larger spectrum of potential target companies;
- A proven ability to effectively integrate acquisitions;
- A rather strong appetite for yield oriented securities in Canada;
- The potential ability to support a transaction with pension fund capital;
- Canada's rather benign interest rate environment; and,
- Bought deal financing commonly employed in Canada.

Fortis possesses a number of absolute and relative advantages over some other competitors

Historically, Fortis has been very adept at acquisitions. Corporate growth has benefited from the company's ability to successfully acquire and integrate selected assets. Capital market conditions are demonstrating signs of improved functioning. Therefore, the typical Fortis acquisition strategy is more palatable in current capital markets. For greater details, please refer to our 6 August 2009 note entitled "Pondering a Portland purchase?"

Valuation

We continue to believe that Fortis has strong organic growth in key areas such as British Columbia, Alberta and the Caribbean. In our view, the company faces a delicate balance of capital investment opportunities and cash flow needs. From our perspective, the next big catalysts for the stock will likely revolve around capital efficiency initiatives or a large scale acquisition which will always lack predictability.

Rating: Upgrade to Outperform from Neutral

Target: C\$34

Year-to-date, Fortis shares have been the weakest performer in the Canadian utility universe returning -9%. We believe Fortis delivers organic growth that is combined with a

disciplined acquisition framework. In our view, the market remains somewhat concerned about deal potential and the Belize Electricity situation. Given the potential excess return, we upgrade FTS to Outperform from the previous Neutral. Our target is maintained at C\$34 and is obtained via multiple valuation approaches, including: an 18.5x P/E multiple of 2012 earnings; 10.2x EV/EBITDA; a 1.7x book value multiple; an implied 3.4% dividend yield; and, a DCF based valuation. We introduce our Outperform rating.

For greater valuation context, please see the series of historical valuations below.

The 10-year historical 2-year forward P/E is 15.8x, while the 1-year and 2-year averages are 17.9x and 16.9x, respectively. (see Exhibit 11)

Exhibit 11: FTS historical 2 year forward P/E

Source: FactSet and Credit Suisse

The 10-year historical EV/EBITDA multiple is 11.2x, while the 1-year and 2-year averages are 11.3x and 10.9x, respectively. (see Exhibit 12)

Exhibit 12: FTS historical EV/EBITDA

Source: FactSet and Credit Suisse

The 10-year historical dividend yield is 3.37%, while the 1-year and 2-year averages are 3.44% and 3.63%, respectively. (see Exhibit 13)

O=Outperform; N=Neutral; U=Underperform; R=Restricted; NR=Not Rated; NC=Not Covered

The analyst(s) responsible for preparing this research report received compensation that is based upon various factors including Credit Suisse's total revenues, a portion of which are generated by Credit Suisse's investment banking activities.

Analysts' stock ratings are defined as follows:

Outperform (O): The stock's total return is expected to outperform the relevant benchmark* by at least 10-15% (or more, depending on perceived risk) over the next 12 months.

Neutral (N): The stock's total return is expected to be in line with the relevant benchmark* (range of $\pm 10-15\%$) over the next 12 months.

Underperform (U): The stock's total return is expected to underperform the relevant benchmark* by 10-15% or more over the next 12 months.

Relevant benchmark by region: As of 29th May 2009, Australia, New Zealand, U.S. and Canadian ratings are based on (1) a stock's absolute total return potential to its current share price and (2) the relative attractiveness of a stock's total return potential within an analyst's coverage universe, with Outperforms representing the most attractive, Neutrals the less attractive, and Underperforms the least attractive investment opportunities. Some U.S. and Canadian ratings may fall outside the absolute total return ranges defined above, depending on market conditions and industry factors. For Latin American, Japanese, and non-Japan Asia stocks, ratings are based on a stock's total return relative to the average total return of the relevant country or regional benchmark; for European stocks, ratings are based on a stock's total return relative to the analyst's coverage universe**. For Australian and New Zealand stocks, 12-month rolling yield is incorporated in the absolute total return calculation and a 15% and a 7.5% threshold replace the 10-15% level in the Outperform and Underperform stock rating definitions, respectively. The 15% and 7.5% thresholds replace the +10-15% and -10-15% levels in the Neutral stock rating definition, respectively.*

***An analyst's coverage universe consists of all companies covered by the analyst within the relevant sector.*

Restricted (R): In certain circumstances, Credit Suisse policy and/or applicable law and regulations preclude certain types of communications, including an investment recommendation, during the course of Credit Suisse's engagement in an investment banking transaction and in certain other circumstances.

Volatility Indicator [V]: A stock is defined as volatile if the stock price has moved up or down by 20% or more in a month in at least 8 of the past 24 months or the analyst expects significant volatility going forward.

Analysts' coverage universe weightings are distinct from analysts' stock ratings and are based on the expected performance of an analyst's coverage universe* versus the relevant broad market benchmark:**

Overweight: Industry expected to outperform the relevant broad market benchmark over the next 12 months.

Market Weight: Industry expected to perform in-line with the relevant broad market benchmark over the next 12 months.

Underweight: Industry expected to underperform the relevant broad market benchmark over the next 12 months.

**An analyst's coverage universe consists of all companies covered by the analyst within the relevant sector.*

***The broad market benchmark is based on the expected return of the local market index (e.g., the S&P 500 in the U.S.) over the next 12 months.*

Credit Suisse's distribution of stock ratings (and banking clients) is:

	Global Ratings Distribution	
Outperform/Buy*	48%	(61% banking clients)
Neutral/Hold*	40%	(57% banking clients)
Underperform/Sell*	10%	(50% banking clients)
Restricted	2%	

**For purposes of the NYSE and NASD ratings distribution disclosure requirements, our stock ratings of Outperform, Neutral, and Underperform most closely correspond to Buy, Hold, and Sell, respectively; however, the meanings are not the same, as our stock ratings are determined on a relative basis. (Please refer to definitions above.) An investor's decision to buy or sell a security should be based on investment objectives, current holdings, and other individual factors.*

Price Target: (12 months) for (FTS.TO)

Method: We obtain our C\$34.00 target price for Fortis Inc. by using multiple valuation methodologies, yield base analysis, and discounted cash flow, all of which produce the C\$34.00 target. Our target price implies a P/E (price/earnings) multiple of 18.5x our 2012 EPS (earnings per share) estimate of C\$1.86 and an EV/EBITDA (enterprise value/earnings before interest, taxes, depreciation, and amortization) multiple of 10.2x our EBITDA estimate.

Risks: There are a number of risks to Fortis' achievement of our C\$34.00 target price: commodity prices; weather; environmental; regulatory; access to capital markets; and, interest rates. Moreover, one should never underestimate the power of the regulator in any regulated business.

Please refer to the firm's disclosure website at www.credit-suisse.com/researchdisclosures for the definitions of abbreviations typically used in the target price method and risk sections.

See the Companies Mentioned section for full company names.

As of the date of this report, Credit Suisse acts as a market maker or liquidity provider in the equities securities that are the subject of this report.

Principal is not guaranteed in the case of equities because equity prices are variable.

Commission is the commission rate or the amount agreed with a customer when setting up an account or at anytime after that.

CS may have issued a Trade Alert regarding this security. Trade Alerts are short term trading opportunities identified by an analyst on the basis of market events and catalysts, while stock ratings reflect an analyst's investment recommendations based on expected total return over a 12-month period relative to the relevant coverage universe. Because Trade Alerts and stock ratings reflect different assumptions and analytical methods, Trade Alerts may differ directionally from the analyst's stock rating.

The author(s) of this report maintains a CS Model Portfolio that he/she regularly adjusts. The security or securities discussed in this report may be a component of the CS Model Portfolio and subject to such adjustments (which, given the composition of the CS Model Portfolio as a whole, may differ from the recommendation in this report, as well as opportunities or strategies identified in Trading Alerts concerning the same security). The CS Model Portfolio and important disclosures about it are available at www.credit-suisse.com/ti.

Taiwanese Disclosures: Reports written by Taiwan-based analysts on non-Taiwan listed companies are not considered recommendations to buy or sell securities under Taiwan Stock Exchange Operational Regulations Governing Securities Firms Recommending Trades in Securities to Customers.

To the extent this is a report authored in whole or in part by a non-U.S. analyst and is made available in the U.S., the following are important disclosures regarding any non-U.S. analyst contributors:

The non-U.S. research analysts listed below (if any) are not registered/qualified as research analysts with FINRA. The non-U.S. research analysts listed below may not be associated persons of CSSU and therefore may not be subject to the NASD Rule 2711 and NYSE Rule 472 restrictions on communications with a subject company, public appearances and trading securities held by a research analyst account.

- Andrew M. Kuske, non-U.S. analyst, is a research analyst employed by Credit Suisse Securities (Canada), Inc..
- Paul Tan, non-U.S. analyst, is a research analyst employed by Credit Suisse Securities (Canada), Inc..

For Credit Suisse disclosure information on other companies mentioned in this report, please visit the website at www.credit-suisse.com/researchdisclosures or call +1 (877) 291-2683.

Disclaimers continue on next page.

This report is not directed to, or intended for distribution to or use by, any person or entity who is a citizen or resident of or located in any locality, state, country or other jurisdiction where such distribution, publication, availability or use would be contrary to law or regulation or which would subject Credit Suisse AG, the Swiss bank, or its subsidiaries or its affiliates ("CS") to any registration or licensing requirement within such jurisdiction. All material presented in this report, unless specifically indicated otherwise, is under copyright to CS. None of the material, nor its content, nor any copy of it, may be altered in any way, transmitted to, copied or distributed to any other party, without the prior express written permission of CS. All trademarks, service marks and logos used in this report are trademarks or service marks or registered trademarks or service marks of CS or its affiliates.

The information, tools and material presented in this report are provided to you for information purposes only and are not to be used or considered as an offer or the solicitation of an offer to sell or to buy or subscribe for securities or other financial instruments. CS may not have taken any steps to ensure that the securities referred to in this report are suitable for any particular investor. CS will not treat recipients as its customers by virtue of their receiving the report. The investments or services contained or referred to in this report may not be suitable for you and it is recommended that you consult an independent investment advisor if you are in doubt about such investments or investment services. Nothing in this report constitutes investment, legal, accounting or tax advice or a representation that any investment or strategy is suitable or appropriate to your individual circumstances or otherwise constitutes a personal recommendation to you. CS does not offer advice on the tax consequences of investment and you are advised to contact an independent tax adviser. Please note in particular that the bases and levels of taxation may change.

CS believes the information and opinions in the Disclosure Appendix of this report are accurate and complete. Information and opinions presented in the other sections of the report were obtained or derived from sources CS believes are reliable, but CS makes no representations as to their accuracy or completeness. Additional information is available upon request. CS accepts no liability for loss arising from the use of the material presented in this report, except that this exclusion of liability does not apply to the extent that liability arises under specific statutes or regulations applicable to CS. This report is not to be relied upon in substitution for the exercise of independent judgment. CS may have issued, and may in the future issue, a trading call regarding this security. Trading calls are short term trading opportunities based on market events and catalysts, while stock ratings reflect investment recommendations based on expected total return over a 12-month period as defined in the disclosure section. Because trading calls and stock ratings reflect different assumptions and analytical methods, trading calls may differ directionally from the stock rating. In addition, CS may have issued, and may in the future issue, other reports that are inconsistent with, and reach different conclusions from, the information presented in this report. Those reports reflect the different assumptions, views and analytical methods of the analysts who prepared them and CS is under no obligation to ensure that such other reports are brought to the attention of any recipient of this report. CS is involved in many businesses that relate to companies mentioned in this report. These businesses include specialized trading, risk arbitrage, market making, and other proprietary trading.

Past performance should not be taken as an indication or guarantee of future performance, and no representation or warranty, express or implied, is made regarding future performance. Information, opinions and estimates contained in this report reflect a judgement at its original date of publication by CS and are subject to change without notice. The price, value of and income from any of the securities or financial instruments mentioned in this report can fall as well as rise. The value of securities and financial instruments is subject to exchange rate fluctuation that may have a positive or adverse effect on the price or income of such securities or financial instruments. Investors in securities such as ADR's, the values of which are influenced by currency volatility, effectively assume this risk.

Structured securities are complex instruments, typically involve a high degree of risk and are intended for sale only to sophisticated investors who are capable of understanding and assuming the risks involved. The market value of any structured security may be affected by changes in economic, financial and political factors (including, but not limited to, spot and forward interest and exchange rates), time to maturity, market conditions and volatility, and the credit quality of any issuer or reference issuer. Any investor interested in purchasing a structured product should conduct their own investigation and analysis of the product and consult with their own professional advisers as to the risks involved in making such a purchase.

Some investments discussed in this report have a high level of volatility. High volatility investments may experience sudden and large falls in their value causing losses when that investment is realised. Those losses may equal your original investment. Indeed, in the case of some investments the potential losses may exceed the amount of initial investment, in such circumstances you may be required to pay more money to support those losses. Income yields from investments may fluctuate and, in consequence, initial capital paid to make the investment may be used as part of that income yield. Some investments may not be readily realisable and it may be difficult to sell or realise those investments, similarly it may prove difficult for you to obtain reliable information about the value, or risks, to which such an investment is exposed.

This report may provide the addresses of, or contain hyperlinks to, websites. Except to the extent to which the report refers to website material of CS, CS has not reviewed the linked site and takes no responsibility for the content contained therein. Such address or hyperlink (including addresses or hyperlinks to CS's own website material) is provided solely for your convenience and information and the content of the linked site does not in any way form part of this document. Accessing such website or following such link through this report or CS's website shall be at your own risk.

This report is issued and distributed in Europe (except Switzerland) by Credit Suisse Securities (Europe) Limited, One Cabot Square, London E14 4QJ, England, which is regulated in the United Kingdom by The Financial Services Authority ("FSA"). This report is being distributed in Germany by Credit Suisse Securities (Europe) Limited Niederlassung Frankfurt am Main regulated by the Bundesanstalt fuer Finanzdienstleistungsaufsicht ("BaFin"). This report is being distributed in the United States by Credit Suisse Securities (USA) LLC ; in Switzerland by Credit Suisse AG; in Canada by Credit Suisse Securities (Canada), Inc.; in Brazil by Banco de Investimentos Credit Suisse (Brasil) S.A. or its affiliates; in Mexico by Banco Credit Suisse (México), S.A. (transactions related to the securities mentioned in this report will only be effected in compliance with applicable regulation); in Japan by Credit Suisse Securities (Japan) Limited, Financial Instrument Firm, Director-General of Kanto Local Finance Bureau (Kinsho) No. 66, a member of Japan Securities Dealers Association, The Financial Futures Association of Japan, Japan Securities Investment Advisers Association, Type II Financial Instruments Firms Association; elsewhere in Asia/Pacific by whichever of the following is the appropriately authorised entity in the relevant jurisdiction: Credit Suisse (Hong Kong) Limited, Credit Suisse Equities (Australia) Limited, Credit Suisse Securities (Thailand) Limited, Credit Suisse Securities (Malaysia) Sdn Bhd, Credit Suisse AG, Singapore Branch, Credit Suisse Securities (India) Private Limited regulated by the Securities and Exchange Board of India (registration Nos. INB230970637; INF230970637; INB010970631; INF010970631), having registered address at 9th Floor, Ceejay House, Dr.A.B. Road, Worli, Mumbai - 18, India, T- +91-22 6777 3777, Credit Suisse Securities (Europe) Limited, Seoul Branch, Credit Suisse AG, Taipei Securities Branch, PT Credit Suisse Securities Indonesia, Credit Suisse Securities (Philippines) Inc., and elsewhere in the world by the relevant authorised affiliate of the above. Research on Taiwanese securities produced by Credit Suisse AG, Taipei Securities Branch has been prepared by a registered Senior Business Person. Research provided to residents of Malaysia is authorised by the Head of Research for Credit Suisse Securities (Malaysia) Sdn. Bhd., to whom they should direct any queries on +603 2723 2020.

In jurisdictions where CS is not already registered or licensed to trade in securities, transactions will only be effected in accordance with applicable securities legislation, which will vary from jurisdiction to jurisdiction and may require that the trade be made in accordance with applicable exemptions from registration or licensing requirements. Non-U.S. customers wishing to effect a transaction should contact a CS entity in their local jurisdiction unless governing law permits otherwise. U.S. customers wishing to effect a transaction should do so only by contacting a representative at Credit Suisse Securities (USA) LLC in the U.S.

Please note that this report was originally prepared and issued by CS for distribution to their market professional and institutional investor customers. Recipients who are not market professional or institutional investor customers of CS should seek the advice of their independent financial advisor prior to taking any investment decision based on this report or for any necessary explanation of its contents. This research may relate to investments or services of a person outside of the UK or to other matters which are not regulated by the FSA or in respect of which the protections of the FSA for private customers and/or the UK compensation scheme may not be available, and further details as to where this may be the case are available upon request in respect of this report.

Any Nielsen Media Research material contained in this report represents Nielsen Media Research's estimates and does not represent facts. NMR has neither reviewed nor approved this report and/or any of the statements made herein.

If this report is being distributed by a financial institution other than Credit Suisse AG, or its affiliates, that financial institution is solely responsible for distribution. Clients of that institution should contact that institution to effect a transaction in the securities mentioned in this report or require further information. This report does not constitute investment advice by Credit Suisse to the clients of the distributing financial institution, and neither Credit Suisse AG, its affiliates, and their respective officers, directors and employees accept any liability whatsoever for any direct or consequential loss arising from their use of this report or its content.

paul.tan@credit-suisse.com

- **Revising rating:** In a relatively short period of time following the Fortis Inc. Q2 results, the stock appreciated by more than 8% (not including dividends). Given this performance, the stock offers a total potential return of roughly 5%. We view that total potential return as being insufficient to justify our Outperform rating. Accordingly, we downgrade our rating to Neutral, however, we maintain our target price at C\$34.00.
- **Significant organic growth continues:** Fortis continues to provide a rather robust capital expenditure outlook with a reiteration of the C\$1.2bn target for 2011 in their Q2 results. Additionally, Fortis increased the 5-year capex outlook to C\$5.7b from C\$5.5bn in their Q2. Eighty-four percent of that total amount is expected to go towards utility activity that should deliver favourable risk adjusted returns over a period of time.
- **Improving capital market conditions:** Historically, Fortis has been very adept at acquisitions. Corporate growth has benefited from the company's ability to successfully acquire and integrate selected assets. In our view, the company is well positioned in the current market for acquisition opportunities. The company stated, "We are disciplined and patient in our pursuit of electric and gas utility acquisitions in the United States and Canada that will add value for Fortis shareholders".
- **Valuation:** With the recent stock performance, we downgrade our FTS rating to Neutral from the previous Outperform. We maintain our C\$34.00 that is obtained via multiple valuation approaches, including: an 18.5x P/E multiple of 2012 earnings; a 1.7x book value multiple; and, a DCF-based valuation. We introduce our Neutral rating.

Disclosure Appendix

Important Global Disclosures

I, Andrew M. Kuske, certify that (1) the views expressed in this report accurately reflect my personal views about all of the subject companies and securities and (2) no part of my compensation was, is or will be directly or indirectly related to the specific recommendations or views expressed in this report.

See the Companies Mentioned section for full company names.

3-Year Price, Target Price and Rating Change History Chart for FTS.TO

The analyst(s) responsible for preparing this research report received compensation that is based upon various factors including Credit Suisse's total revenues, a portion of which are generated by Credit Suisse's investment banking activities.

Analysts' stock ratings are defined as follows:

Outperform (O): The stock's total return is expected to outperform the relevant benchmark* by at least 10-15% (or more, depending on perceived risk) over the next 12 months.

Neutral (N): The stock's total return is expected to be in line with the relevant benchmark* (range of $\pm 10-15\%$) over the next 12 months.

Underperform (U): The stock's total return is expected to underperform the relevant benchmark* by 10-15% or more over the next 12 months.

*Relevant benchmark by region: As of 29th May 2009, Australia, New Zealand, U.S. and Canadian ratings are based on (1) a stock's absolute total return potential to its current share price and (2) the relative attractiveness of a stock's total return potential within an analyst's coverage universe**, with Outperforms representing the most attractive, Neutrals the less attractive, and Underperforms the least attractive investment opportunities. Some U.S. and Canadian ratings may fall outside the absolute total return ranges defined above, depending on market conditions and industry factors. For Latin American, Japanese, and non-Japan Asia stocks, ratings are based on a stock's total return relative to the average total return of the relevant country or regional benchmark; for European stocks, ratings are based on a stock's total return relative to the analyst's coverage universe**. For Australian and New Zealand stocks, 12-month rolling yield is incorporated in the absolute total return calculation and a 15% and a 7.5% threshold replace the 10-15% level in the Outperform and Underperform stock rating definitions, respectively. The 15% and 7.5% thresholds replace the +10-15% and -10-15% levels in the Neutral stock rating definition, respectively.

**An analyst's coverage universe consists of all companies covered by the analyst within the relevant sector.

Restricted (R): In certain circumstances, Credit Suisse policy and/or applicable law and regulations preclude certain types of communications, including an investment recommendation, during the course of Credit Suisse's engagement in an investment banking transaction and in certain other circumstances.

Volatility Indicator [V]: A stock is defined as volatile if the stock price has moved up or down by 20% or more in a month in at least 8 of the past 24 months or the analyst expects significant volatility going forward.

Analysts' coverage universe weightings are distinct from analysts' stock ratings and are based on the expected performance of an analyst's coverage universe* versus the relevant broad market benchmark**:

Overweight: Industry expected to outperform the relevant broad market benchmark over the next 12 months.

Market Weight: Industry expected to perform in-line with the relevant broad market benchmark over the next 12 months.

Underweight: Industry expected to underperform the relevant broad market benchmark over the next 12 months.

*An analyst's coverage universe consists of all companies covered by the analyst within the relevant sector.

**The broad market benchmark is based on the expected return of the local market index (e.g., the S&P 500 in the U.S.) over the next 12 months.

Credit Suisse's distribution of stock ratings (and banking clients) is:

Global Ratings Distribution		
Outperform/Buy*	49%	(61% banking clients)
Neutral/Hold*	39%	(56% banking clients)
Underperform/Sell*	9%	(54% banking clients)
Restricted	2%	

*For purposes of the NYSE and NASD ratings distribution disclosure requirements, our stock ratings of Outperform, Neutral, and Underperform most closely correspond to Buy, Hold, and Sell, respectively; however, the meanings are not the same, as our stock ratings are determined on a relative basis. (Please refer to definitions above.) An investor's decision to buy or sell a security should be based on investment objectives, current holdings, and other individual factors.

Credit Suisse's policy is to update research reports as it deems appropriate, based on developments with the subject company, the sector or the market that may have a material impact on the research views or opinions stated herein.

Credit Suisse's policy is only to publish investment research that is impartial, independent, clear, fair and not misleading. For more detail please refer to Credit Suisse's Policies for Managing Conflicts of Interest in connection with Investment Research: http://www.csfb.com/research-and-analytics/disclaimer/managing_conflicts_disclaimer.html

Credit Suisse does not provide any tax advice. Any statement herein regarding any US federal tax is not intended or written to be used, and cannot be used, by any taxpayer for the purposes of avoiding any penalties.

See the Companies Mentioned section for full company names.

Price Target: (12 months) for (FTS.TO)

Method: We obtain our C\$34.00 target price for Fortis Inc. by using multiple valuation methodologies, yield base analysis, and discounted cash flow, all of which produce the C\$34.00 target. Our target price implies a P/E (price/earnings) multiple of 18.5x our 2012 EPS (earnings per share) estimate of C\$1.86 and an EV/EBITDA (enterprise value/earnings before interest, taxes, depreciation, and amortization) multiple of 10.2x our EBITDA estimate.

Risks: There are a number of risks to Fortis' achievement of our C\$34.00 target price: commodity prices; weather; environmental; regulatory; access to capital markets; and, interest rates. Moreover, one should never underestimate the power of the regulator in any regulated business.

Please refer to the firm's disclosure website at www.credit-suisse.com/researchdisclosures for the definitions of abbreviations typically used in the target price method and risk sections.

See the Companies Mentioned section for full company names.

The subject company (FTS.TO) currently is, or was during the 12-month period preceding the date of distribution of this report, a client of Credit Suisse.

Credit Suisse provided investment banking services to the subject company (FTS.TO) within the past 12 months.

Credit Suisse provided non-investment banking services, which may include Sales and Trading services, to the subject company (FTS.TO) within the past 12 months.

Credit Suisse expects to receive or intends to seek investment banking related compensation from the subject company (FTS.TO) within the next 3 months.

Credit Suisse has received compensation for products and services other than investment banking services from the subject company (FTS.TO) within the past 12 months.

Important Regional Disclosures

Singapore recipients should contact a Singapore financial adviser for any matters arising from this research report.

An analyst involved in the preparation of this report has visited certain material operations of the subject company (FTS.TO) within the past 12 months. The analyst may not have visited all material operations of the subject company. The travel expenses of the analyst in connection with such visits were not paid or reimbursed by the subject company, other than de minimus local travel expenses.

Restrictions on certain Canadian securities are indicated by the following abbreviations: NVS--Non-Voting shares; RVS--Restricted Voting Shares; SVS--Subordinate Voting Shares.

Individuals receiving this report from a Canadian investment dealer that is not affiliated with Credit Suisse should be advised that this report may not contain regulatory disclosures the non-affiliated Canadian investment dealer would be required to make if this were its own report.

For Credit Suisse Securities (Canada), Inc.'s policies and procedures regarding the dissemination of equity research, please visit http://www.csfb.com/legal_terms/canada_research_policy.shtml.

As of the date of this report, Credit Suisse acts as a market maker or liquidity provider in the equities securities that are the subject of this report.

Principal is not guaranteed in the case of equities because equity prices are variable.

Commission is the commission rate or the amount agreed with a customer when setting up an account or at anytime after that.

CS may have issued a Trade Alert regarding this security. Trade Alerts are short term trading opportunities identified by an analyst on the basis of market events and catalysts, while stock ratings reflect an analyst's investment recommendations based on expected total return over a 12-month period relative to the relevant coverage universe. Because Trade Alerts and stock ratings reflect different assumptions and analytical methods, Trade Alerts may differ directionally from the analyst's stock rating.

The author(s) of this report maintains a CS Model Portfolio that he/she regularly adjusts. The security or securities discussed in this report may be a component of the CS Model Portfolio and subject to such adjustments (which, given the composition of the CS Model Portfolio as a whole, may differ

from the recommendation in this report, as well as opportunities or strategies identified in Trading Alerts concerning the same security). The CS Model Portfolio and important disclosures about it are available at www.credit-suisse.com/ti.

Taiwanese Disclosures: Reports written by Taiwan-based analysts on non-Taiwan listed companies are not considered recommendations to buy or sell securities under Taiwan Stock Exchange Operational Regulations Governing Securities Firms Recommending Trades in Securities to Customers.

To the extent this is a report authored in whole or in part by a non-U.S. analyst and is made available in the U.S., the following are important disclosures regarding any non-U.S. analyst contributors:

The non-U.S. research analysts listed below (if any) are not registered/qualified as research analysts with FINRA. The non-U.S. research analysts listed below may not be associated persons of CSSU and therefore may not be subject to the NASD Rule 2711 and NYSE Rule 472 restrictions on communications with a subject company, public appearances and trading securities held by a research analyst account.

- Andrew M. Kuske, non-U.S. analyst, is a research analyst employed by Credit Suisse Securities (Canada), Inc..
- Paul Tan, non-U.S. analyst, is a research analyst employed by Credit Suisse Securities (Canada), Inc..

- **Earnings review:** Fortis reported Q3 2011 headline EPS (FD) of C\$0.31, adjusting for the termination fee paid to FTS by Central Vermont Public Service Corp. the adjusted figure is C\$0.26, which missed our C\$0.28 estimate but was higher than the Street's C\$0.244 view and within the C\$0.22-C\$0.28 range. In general, we believe Fortis is making steady progress in delivering consistent financial results from a largely regulated asset base. We do not place undue emphasis on quarterly results in much of our universe as a result of the inherently long-cycle nature of many assets. For Fortis, we continue to focus on the ongoing significant regulated capital plan along with the potentially positive upward bias to regulated returns.
- **Significant organic growth continues:** Fortis continues to provide a rather robust capital expenditure outlook with a reiteration of their C\$1.2bn target for 2011. Additionally, Fortis reiterated its 5-year capex outlook of C\$5.7bn. Eighty-four percent of that total amount is expected to go towards regulated utility activities that should deliver favourable risk adjusted returns.
- **Improving capital market conditions:** Historically, Fortis has been very adept at acquisitions. Corporate growth has benefited from the company's ability to successfully acquire and integrate selected assets. In our view, the company is well positioned in the current market for acquisition opportunities. The company stated, "We are disciplined and patient in our pursuit of electric and gas utility acquisitions in the United States and Canada that will add value for Fortis shareholders".
- **Valuation:** Our C\$34.target price and Neutral rating are obtained utilizing multiple valuation approaches, including: a 19.0x P/E multiple of 2012 earnings; a 1.7x book value multiple; and, a DCF-based valuation. We reiterate our Neutral rating.

Corporate and other	(5)	(19)	74%
Net earnings applicable to common shares	58	45	29%

Source: Company data and Credit Suisse

Regulated Gas Utilities - Canadian

The unadjusted earnings for this segment improved by roughly 40% year-over-year (see Exhibit 2). Some notable items for the regulated gas utilities include:

- Net customer additions were 1,965 during 9M 2011 versus net additions of 3,460 during the 9M 2010;
- The amount of customer additions decreased versus 9M 2010 due to lower building activity; and,
- Sales volumes for the quarter decreased for both the Core-residential and commercial and for the industrial segment while transportation volumes increased.

FortisAlberta

Earnings at this regulated utility were flat comparing Q3 2011 versus the prior period. See Exhibit 4 for selected highlights.

Increase in energy delivery
in Alberta

Exhibit 4: Selected FortisAlberta performance highlights (unadjusted)

	Q3 2011	Q3 2010	chg y/y
Energy deliveries (GWh)	3,911	3,778	4%
Revenue (C\$/MWh)	26.34	28.85	-9%
Operating expenses (C\$/MWh)	8.95	8.73	2%
Gross margin (C\$/MWh)	17.39	20.12	-14%
Earnings (C\$millions)	19	19	0%

Source: Company data and Credit Suisse

FortisBC Electric

Segmented earnings at FortisBC Electric decreased by 9% compared to the same period last year. The decrease was due to higher effective corporate income taxes, mainly due to lower deductions for income tax purposes compared to accounting purposes and lower capitalized AFUDC, due to fewer assets under construction during 2011.

Increase in energy
deliveries in BC

See Exhibit 5 for selected highlights.

Exhibit 5: Selected FortisBC Electric performance highlights (unadjusted)

	Q3 2011	Q3 2010	chg y/y
Energy deliveries (GWh)	713	709	1%
Revenue (C\$/MWh)	93.97	87.45	7%
Energy supply costs (C\$/MWh)	21.04	22.57	-7%
Operating expenses (C\$/MWh)	26.65	23.98	11%
Gross margin (C\$/MWh)	46.28	40.90	13%
Earnings (C\$millions)	10	11	-9%

Source: Company data and Credit Suisse

Newfoundland Power

This segment's earnings generation was flat when comparing Q3 2011 versus Q3 2010. Higher electricity sales and lower effective income taxes were offset by wage and inflationary increases, higher employee-related operating expenses and lower allowed ROE. Energy deliveries were up by approximately 1% (see Exhibit 6).

Increase in NP's energy
deliveries

Exhibit 6: Selected Newfoundland Power performance highlights (unadjusted)

	Q3 2011	Q3 2010	chg y/y
Energy deliveries (GWh)	923	916	1%
Revenue (C\$/MWh)	109.43	108.08	1%
Energy supply costs (C\$/MWh)	56.34	54.59	3%
Operating expenses (C\$/MWh)	18.42	17.47	5%
Gross margin (C\$/MWh)	34.67	36.03	-4%
Earnings (C\$millions)	8	8	0%

Source: Company data, Credit Suisse estimates

Other Canadian Electric Utilities

This segment's earning generation increased by 20% in Q3 2011 versus Q3 2010 primarily due to higher allowed ROE at Algoma Power and lower effective corporate income taxes at Fortis Ontario. The energy deliveries for the period remained flat. Exhibit 7 contains selected highlights.

Flat energy deliveries

Regulated Electric Utilities – Caribbean

This segment includes Belize Electricity (up to June 20, 2011), Caribbean Utilities, and Fortis Turks and Caicos. Earnings for this segment declined by 25% in Q3 2011 versus the same quarter last year. Energy deliveries declined 38% for several reasons. In our view, Belize Electricity was not overly material to Fortis. Additionally, we anticipate the dispute to be resolved in a rationale manner with Fortis recovering, at least, the rate base value. Yet, any such recovery may be over a period of time. The company stated that it has “commissioned an independent valuation of its previous investment in Belize Electricity and expects to submit its claim for compensation to the GOB during the fourth quarter of 2011.”

Awaiting a decision in Belize

See Exhibit 8 below for selected highlights.

Exhibit 8: Caribbean - Regulated Electric Utilities performance highlights (unadjusted)

	Q3 2011	Q3 2010	chg y/y
Energy deliveries (GWh)	197	318	-38%
Revenue (C\$/MWh)	370.56	289.31	28%
Energy supply costs (C\$/MWh)	238.58	179.25	33%
Operating expenses (C\$/MWh)	40.61	37.74	8%
Gross margin (C\$/MWh)	91.37	72.33	26%
Earnings (C\$millions)	6	8	-25%

Source: Company data and Credit Suisse

Non-regulated – Fortis Generation

The non-regulated generation assets within this segment are located in Belize, British Columbia, Central Newfoundland, Ontario and Upper New York State. Earnings for the segment were down 11% from the current quarter compared to the same quarter last year. Energy deliveries decreased by 17% from Q3 2010 to Q3 2011 due to decreased production in Upper New York and Belize caused by generating plant being out of service and longer dry season in 2011, respectively. Exhibit 9 provides selected highlights.

Exhibit 9: Non-regulated generation – selected highlights

	Q3 2011	Q3 2010	chg y/y
Energy deliveries (GWh)	111	134	-17%
Revenue (C\$/MWh)	99.10	97.01	2%
Operating expenses (C\$/MWh)	18.02	14.93	21%
Gross margin (C\$/MWh)	81.08	82.09	-1%
Earnings (C\$millions)	8	9	-11%

Source: Company data and Credit Suisse

Non-regulated – Fortis Properties

Fortis Properties' net unadjusted earning contribution remained flat during the quarter at C\$9m. REVPAR increased to C\$94.83 from C\$89.54 for the comparable period last year. Additionally, the occupancy rate of the Real Estate Division was up at 94.2% versus last year's 93.7%.

Corporate

Corporate expenses decreased to C\$5million in Q3 2011 from C\$19m in Q3 2010. The figures for Q3 2011 included the C\$17m (C\$11m after tax) fee paid to Fortis upon the termination of the merger agreement with Central Vermont Public Service Corp.

Outlook

We continue to believe investor, whether existing or prospective, should consider several major issues, including (a) funding organic growth; (b) rising returns; and, (c) acquisition trail. Each of these issues is addressed below.

Funding organic growth

In the most recent quarter the company's reported capital expenditures totaled C\$287 million, of which C\$227 million was spent at regulated utilities. Fortis continues to guide that capital expenditures for 2011 will be roughly C\$1.2 billion. A majority of the total will be spent on Western Canadian assets (FortisBC Energy, FortisAlberta, and FortisBC Electric). Fortis reiterated its consolidated gross capital expenditures expectations over the 5 year plan (2011-2015) at C\$5.7bn with 84% of that total amount being allocated to regulated utilities. Both FortisAlberta and FortisBC Electric will receive the vast majority of that amount; whereas, the regulated gas utilities are planned to receive 23% of the total capex amount, and 16% is allocated to non-regulated operations. Given the regulated rates of return with utility capital expenditures, the increases should be viewed as longer-term positives provided an appropriate financial balance is struck.

Ongoing organic growth

With the significant current relative valuation advantages, we believe that Fortis may become more motivated to explore possible capital efficiency initiatives. In our view, the company possesses ample opportunities to become much more capital efficient. One strategy involves divesting certain non-utility assets and redeploying capital into utility assets or funding the capital program. Another option would entail divesting partial interests in selected utility assets in an asset management model approach and receiving a management fee.

In fact, some of the media reports prior to the official announcement of PPL Corporation's acquisition of E.ON's Kentucky utility assets for US\$7.625 billion stated that a consortium led by Fortis Inc. was one of three finalists for those assets. We would regard that type of information in media reports as being something akin to an asset management style of approach. Ultimately, we believe that such a strategy would help Fortis generate a higher level of returns. Additionally, the use of an asset management type approach would make large acquisitions which could potentially further accelerate growth.

Opportunities for improved capital efficiency

Generally, we continue to prefer pure-play utility companies without an undue amount of non-core asset exposure. Historically, non-core assets (especially real estate) have been somewhat commonplace for many utilities. Fortis has been no exception to that approach. Notably, the mix of commercial and hospitality real estate assets held by Fortis have been positive contributors and also provide the company a bit of financial flexibility for a selection of reasons. In light of current market conditions, we believe there is a much less compelling case for the monetization of these assets than as in the past. We note Fortis Properties continues to increase in scale and scope which may eventually make it more attractive for acquisition or monetization. Yet, for a number of reasons, we continue to believe there is a rather low probability of either of those events occurring.

Even discounting the potential monetization of assets that we would consider to be non-core, we believe Fortis possesses considerable potential to become much more capital efficient. Given the significant interest in infrastructure assets by many investors seeking long-dated types of return, Fortis could easily divest portions of its existing asset base to pension fund investors and charge a management fee for their operational and management expertise. This type of approach could significantly improve capital efficiency

Capital efficiency initiatives could aid funding of acquisitions or the existing capital program funding

and returns on capital. In addition, this asset management approach could also free-up capital that could be used to fund the existing capital program or fund future acquisitions.

Rising returns

Positively, Fortis has been successful in obtaining several favourable regulatory decisions. For example, the allowed equity at Terasen Gas Inc. (TGI) was boosted from 35% to 40% effective January 1, 2010. In addition to that positive move for the equity base, the allowed return on equity for TGI increased from 8.47% to 9.50%. In a related judgment, Terasen Gas (Vancouver Island) Inc. (TGVI) and Terasen Gas Whistler Inc. (TGWI) returns increased from 9.17% to 10%. Additionally, the British Columbia Utilities Commission (BCUC) held the former automatic adjustment mechanism for annual ROE determination would no longer apply. Also in BC, FortisBC obtained an increased allowed ROE from 8.87% to 9.90% that became effective on January 1, 2010. The upward bias in utility returns should be viewed positively. Clearly, many questions exist as to the methods for determining and predicting future return levels. Yet, we view the regulatory movement away from a very mechanical return approach work as a notable positive that should help ensure an appropriate level of returns over a period of time.

Similar to the BCUC, the Alberta Utilities Commission (AUC) issued a decision on the 2009 Generic Cost of Capital establishing a 9% ROE for utilities like FortisAlberta in 2009 and 2010. Under the previous formulaic approach, that utility would have been entitled to an 8.61% return. Moreover, the allowed equity within the regulated capital structure moved from 37% to 41% effective January 1, 2009. Notably, this return framework will be in effect for 2011 providing a level of certainty to FortisAlberta's future earnings.

Unfortunately, not every jurisdiction is proving to be as progressive as Alberta, BC and the National Energy Board in the regulated Trans-Quebec & Maritimes Pipeline decision (see file RH-1-2008 and our March 19, 2009 note "*Regulatory round-up*"). The Newfoundland and Labrador Board of Commissioners of Public Utilities (PUB) most recent decision increased the allowed ROE for Newfoundland Power from 8.95% in 2009 to 9% in 2010. Additionally, in the past, the PUB ordered Newfoundland Power's allowed ROEs for 2011 and 2012 would be determined by an automated formula that will be subject to review in Q1 2010. We do not need to belabour all of the regulatory developments, however, we note that returns are slowly biasing to the upside.

Acquisition trail

In our view, Fortis continues to demonstrate a rather impressive ability to successfully integrate acquisitions. Additionally, we view acquisitions as somewhat central to the company's growth strategy. Fortis management has been reiterating this. For instance, the company's most recent Management Discussion and Analysis stated "We remain disciplined and patient in our pursuit of electric and gas utility acquisitions in the United States and Canada that will add value for Fortis shareholders". Fortis showed discipline in its acquisition strategy by not competing in a bidding war for Central Vermont Service Corp. The company received a C\$17m termination fee. For further details see "*A positive pass*" published on 12 July 2011.

Given the success of Fortis in past transactions, as measured in terms of financials, share price and operationally, we believe the company's current valuation and skill set may lead to some potentially value creating acquisition activity (see Exhibit 10 below for select Fortis M&A transactions).

Exhibit 10: Selected Fortis M&A transactions

\$ in millions, unless otherwise stated

Announced Date	Asset/Company	Deal value (\$m)	Comment
7/22/2009	Caribbean Utilities Co.	CAD 6.74	Acquired an additional 2.7% of Caribbean Utilities Co.

	Total USD	USD 65.50	
	Total CAD	CAD 6,214.48	

Source: Bloomberg, Company data and Credit Suisse

In terms of acquisitions, we believe Fortis has a few advantages over others, including:

- Fortis has growing expertise with both electric and gas utilities;
- Larger size will allow it to look at a larger spectrum of potential target companies;
- A proven ability to effectively integrate acquisitions;
- A rather strong appetite for yield oriented securities in Canada;
- The potential ability to support a transaction with pension fund capital;
- Canada's rather benign interest rate environment; and,
- Bought deal financing commonly employed in Canada.

Fortis possesses a number of absolute and relative advantages over some other competitors

Historically, Fortis has been very adept at acquisitions. Corporate growth has benefited from the company's ability to successfully acquire and integrate selected assets. Capital market conditions are demonstrating signs of improved functioning. Therefore, the typical Fortis acquisition strategy is more palatable in current capital markets. For greater details, please refer to our 6 August 2009 note entitled "Pondering a Portland purchase?"

Valuation

We continue to believe that Fortis has strong organic growth in key areas such as British Columbia, Alberta and the Caribbean. In our view, the company faces a delicate balance of capital investment opportunities and cash flow needs. From our perspective, the next big catalysts for the stock will likely revolve around capital efficiency initiatives or a large scale acquisition which will always lack predictability. As a result of the quarter, we revised our EPS estimates for 2011, 2012 and 2013 to C\$1.74, C\$1.82 and C\$1.87 from C\$1.77, C\$1.86 and C\$1.91, respectively. Our Neutral rating and C\$34.00 target price is obtained

Rating: Neutral

Target: C\$34

from multiple valuation approaches, including: a 19.0x P/E multiple of 2012 earnings; a 1.7x book value multiple; and, a DCF-based valuation. We reiterate our Neutral rating. Some historical Fortis valuation parameters appear in Exhibit 11 below generated by Credit Suisse RAVE.

Important Global Disclosures

I, Andrew M. Kuske, certify that (1) the views expressed in this report accurately reflect my personal views about all of the subject companies and securities and (2) no part of my compensation was, is or will be directly or indirectly related to the specific recommendations or views expressed in this report.

See the Companies Mentioned section for full company names.

3-Year Price, Target Price and Rating Change History Chart for FTS.TO

The analyst(s) responsible for preparing this research report received compensation that is based upon various factors including Credit Suisse's total revenues, a portion of which are generated by Credit Suisse's investment banking activities.

Analysts' stock ratings are defined as follows:

Outperform (O): The stock's total return is expected to outperform the relevant benchmark* by at least 10-15% (or more, depending on perceived risk) over the next 12 months.

Neutral (N): The stock's total return is expected to be in line with the relevant benchmark* (range of $\pm 10-15\%$) over the next 12 months.

Underperform (U): The stock's total return is expected to underperform the relevant benchmark* by 10-15% or more over the next 12 months.

*Relevant benchmark by region: As of 29th May 2009, Australia, New Zealand, U.S. and Canadian ratings are based on (1) a stock's absolute total return potential to its current share price and (2) the relative attractiveness of a stock's total return potential within an analyst's coverage universe**, with Outperforms representing the most attractive, Neutrals the less attractive, and Underperforms the least attractive investment opportunities. Some U.S. and Canadian ratings may fall outside the absolute total return ranges defined above, depending on market conditions and industry factors. For Latin American, Japanese, and non-Japan Asia stocks, ratings are based on a stock's total return relative to the average total return of the relevant country or regional benchmark; for European stocks, ratings are based on a stock's total return relative to the analyst's coverage universe**. For Australian and New Zealand stocks, 12-month rolling yield is incorporated in the absolute total return calculation and a 15% and a 7.5% threshold replace the 10-15% level in the Outperform and Underperform stock rating definitions, respectively. The 15% and 7.5% thresholds replace the +10-15% and -10-15% levels in the Neutral stock rating definition, respectively.

**An analyst's coverage universe consists of all companies covered by the analyst within the relevant sector.

Restricted (R): In certain circumstances, Credit Suisse policy and/or applicable law and regulations preclude certain types of communications, including an investment recommendation, during the course of Credit Suisse's engagement in an investment banking transaction and in certain other circumstances.

Volatility Indicator [V]: A stock is defined as volatile if the stock price has moved up or down by 20% or more in a month in at least 8 of the past 24 months or the analyst expects significant volatility going forward.

Analysts' coverage universe weightings are distinct from analysts' stock ratings and are based on the expected performance of an analyst's coverage universe* versus the relevant broad market benchmark:**

Overweight: Industry expected to outperform the relevant broad market benchmark over the next 12 months.

Market Weight: Industry expected to perform in-line with the relevant broad market benchmark over the next 12 months.

Underweight: Industry expected to underperform the relevant broad market benchmark over the next 12 months.

*An analyst's coverage universe consists of all companies covered by the analyst within the relevant sector.

**The broad market benchmark is based on the expected return of the local market index (e.g., the S&P 500 in the U.S.) over the next 12 months.

Credit Suisse's distribution of stock ratings (and banking clients) is:

Global Ratings Distribution		
Outperform/Buy*	48%	(62% banking clients)
Neutral/Hold*	40%	(57% banking clients)
Underperform/Sell*	10%	(54% banking clients)
Restricted	2%	

*For purposes of the NYSE and NASD ratings distribution disclosure requirements, our stock ratings of Outperform, Neutral, and Underperform most closely correspond to Buy, Hold, and Sell, respectively; however, the meanings are not the same, as our stock ratings are determined on a relative basis. (Please refer to definitions above.) An investor's decision to buy or sell a security should be based on investment objectives, current holdings, and other individual factors.

Credit Suisse's policy is to update research reports as it deems appropriate, based on developments with the subject company, the sector or the market that may have a material impact on the research views or opinions stated herein.

Credit Suisse's policy is only to publish investment research that is impartial, independent, clear, fair and not misleading. See the Companies Mentioned section for full company names.

Price Target: (12 months) for (FTS.TO)

Method: We obtain our C\$34.00 target price for Fortis Inc. by using multiple valuation methodologies, yield base analysis, and discounted cash flow, all of which produce the C\$34.00 target. Our target price implies a P/E (price/earnings) multiple of 19.0x our 2012 EPS (earnings per share) estimate of C\$1.82 and an EV/EBITDA (enterprise value/earnings before interest, taxes, depreciation, and amortization) multiple of 10.2x our EBITDA estimate.

Risks: There are a number of risks to Fortis' achievement of our C\$34.00 target price: commodity prices; weather; environmental; regulatory; access to capital markets; and, interest rates. Moreover, one should never underestimate the power of the regulator in any regulated business.

Please refer to the firm's disclosure website at www.credit-suisse.com/researchdisclosures for the definitions of abbreviations typically used in the target price method and risk sections.

See the Companies Mentioned section for full company names.

The subject company (FTS.TO) currently is, or was during the 12-month period preceding the date of distribution of this report, a client of Credit Suisse.

Credit Suisse provided investment banking services to the subject company (FTS.TO) within the past 12 months.

Credit Suisse provided non-investment banking services, which may include Sales and Trading services, to the subject company (FTS.TO) within the past 12 months.

Credit Suisse expects to receive or intends to seek investment banking related compensation from the subject company (FTS.TO) within the next 3 months.

Credit Suisse has received compensation for products and services other than investment banking services from the subject company (FTS.TO) within the past 12 months.

Important Regional Disclosures

Singapore recipients should contact a Singapore financial adviser for any matters arising from this research report.

An analyst involved in the preparation of this report has visited certain material operations of the subject company (FTS.TO) within the past 12 months. The analyst may not have visited all material operations of the subject company. The travel expenses of the analyst in connection with such visits were not paid or reimbursed by the subject company, other than de minimus local travel expenses.

Restrictions on certain Canadian securities are indicated by the following abbreviations: NVS--Non-Voting shares; RVS--Restricted Voting Shares; SVS--Subordinate Voting Shares.

Individuals receiving this report from a Canadian investment dealer that is not affiliated with Credit Suisse should be advised that this report may not contain regulatory disclosures the non-affiliated Canadian investment dealer would be required to make if this were its own report.

For Credit Suisse Securities (Canada), Inc.'s policies and procedures regarding the dissemination of equity research, please visit http://www.csfb.com/legal_terms/canada_research_policy.shtml.

As of the date of this report, Credit Suisse acts as a market maker or liquidity provider in the equities securities that are the subject of this report.

Principal is not guaranteed in the case of equities because equity prices are variable.

Commission is the commission rate or the amount agreed with a customer when setting up an account or at anytime after that.

CS may have issued a Trade Alert regarding this security. Trade Alerts are short term trading opportunities identified by an analyst on the basis of market events and catalysts, while stock ratings reflect an analyst's investment recommendations based on expected total return over a 12-month period relative to the relevant coverage universe. Because Trade Alerts and stock ratings reflect different assumptions and analytical methods, Trade Alerts may differ directionally from the analyst's stock rating.

The author(s) of this report maintains a CS Model Portfolio that he/she regularly adjusts. The security or securities discussed in this report may be a component of the CS Model Portfolio and subject to such adjustments (which, given the composition of the CS Model Portfolio as a whole, may differ from the recommendation in this report, as well as opportunities or strategies identified in Trading Alerts concerning the same security). The CS Model Portfolio and important disclosures about it are available at www.credit-suisse.com/ti.

Taiwanese Disclosures: Reports written by Taiwan-based analysts on non-Taiwan listed companies are not considered recommendations to buy or sell securities under Taiwan Stock Exchange Operational Regulations Governing Securities Firms Recommending Trades in Securities to Customers.

To the extent this is a report authored in whole or in part by a non-U.S. analyst and is made available in the U.S., the following are important disclosures regarding any non-U.S. analyst contributors:

The non-U.S. research analysts listed below (if any) are not registered/qualified as research analysts with FINRA. The non-U.S. research analysts listed below may not be associated persons of CSSU and therefore may not be subject to the NASD Rule 2711 and NYSE Rule 472 restrictions on communications with a subject company, public appearances and trading securities held by a research analyst account.

- Andrew M. Kuske, non-U.S. analyst, is a research analyst employed by Credit Suisse Securities (Canada), Inc..
- Paul Tan, non-U.S. analyst, is a research analyst employed by Credit Suisse Securities (Canada), Inc..

Disclaimers continue on next page.

This report is not directed to, or intended for distribution to or use by, any person or entity who is a citizen or resident of or located in any locality, state, country or other jurisdiction where such distribution, publication, availability or use would be contrary to law or regulation or which would subject Credit Suisse AG, the Swiss bank, or its subsidiaries or its affiliates ("CS") to any registration or licensing requirement within such jurisdiction. All material presented in this report, unless specifically indicated otherwise, is under copyright to CS. None of the material, nor its content, nor any copy of it, may be altered in any way, transmitted to, copied or distributed to any other party, without the prior express written permission of CS. All trademarks, service marks and logos used in this report are trademarks or service marks or registered trademarks or service marks of CS or its affiliates.

The information, tools and material presented in this report are provided to you for information purposes only and are not to be used or considered as an offer or the solicitation of an offer to sell or to buy or subscribe for securities or other financial instruments. CS may not have taken any steps to ensure that the securities referred to in this report are suitable for any particular investor. CS will not treat recipients as its customers by virtue of their receiving the report. The investments or services contained or referred to in this report may not be suitable for you and it is recommended that you consult an independent investment advisor if you are in doubt about such investments or investment services. Nothing in this report constitutes investment, legal, accounting or tax advice or a representation that any investment or strategy is suitable or appropriate to your individual circumstances or otherwise constitutes a personal recommendation to you. CS does not offer advice on the tax consequences of investment and you are advised to contact an independent tax adviser. Please note in particular that the bases and levels of taxation may change.

CS believes the information and opinions in the Disclosure Appendix of this report are accurate and complete. Information and opinions presented in the other sections of the report were obtained or derived from sources CS believes are reliable, but CS makes no representations as to their accuracy or completeness. Additional information is available upon request. CS accepts no liability for loss arising from the use of the material presented in this report, except that this exclusion of liability does not apply to the extent that liability arises under specific statutes or regulations applicable to CS. This report is not to be relied upon in substitution for the exercise of independent judgment. CS may have issued, and may in the future issue, a trading call regarding this security. Trading calls are short term trading opportunities based on market events and catalysts, while stock ratings reflect investment recommendations based on expected total return over a 12-month period as defined in the disclosure section. Because trading calls and stock ratings reflect different assumptions and analytical methods, trading calls may differ directionally from the stock rating. In addition, CS may have issued, and may in the future issue, other reports that are inconsistent with, and reach different conclusions from, the information presented in this report. Those reports reflect the different assumptions, views and analytical methods of the analysts who prepared them and CS is under no obligation to ensure that such other reports are brought to the attention of any recipient of this report. CS is involved in many businesses that relate to companies mentioned in this report. These businesses include specialized trading, risk arbitrage, market making, and other proprietary trading.

Past performance should not be taken as an indication or guarantee of future performance, and no representation or warranty, express or implied, is made regarding future performance. Information, opinions and estimates contained in this report reflect a judgement at its original date of publication by CS and are subject to change without notice. The price, value of and income from any of the securities or financial instruments mentioned in this report can fall as well as rise. The value of securities and financial instruments is subject to exchange rate fluctuation that may have a positive or adverse effect on the price or income of such securities or financial instruments. Investors in securities such as ADR's, the values of which are influenced by currency volatility, effectively assume this risk.

Structured securities are complex instruments, typically involve a high degree of risk and are intended for sale only to sophisticated investors who are capable of understanding and assuming the risks involved. The market value of any structured security may be affected by changes in economic, financial and political factors (including, but not limited to, spot and forward interest and exchange rates), time to maturity, market conditions and volatility, and the credit quality of any issuer or reference issuer. Any investor interested in purchasing a structured product should conduct their own investigation and analysis of the product and consult with their own professional advisers as to the risks involved in making such a purchase.

Some investments discussed in this report have a high level of volatility. High volatility investments may experience sudden and large falls in their value causing losses when that investment is realised. Those losses may equal your original investment. Indeed, in the case of some investments the potential losses may exceed the amount of initial investment, in such circumstances you may be required to pay more money to support those losses. Income yields from investments may fluctuate and, in consequence, initial capital paid to make the investment may be used as part of that income yield. Some investments may not be readily realisable and it may be difficult to sell or realise those investments, similarly it may prove difficult for you to obtain reliable information about the value, or risks, to which such an investment is exposed.

Delivering on dividends

- **Earnings review:** Fortis reported Q4 2011 headline EPS (FD) of C\$0.45, which missed our C\$0.50 and the Street's C\$0.48 view and at the low end of the C\$0.45-C\$0.50 range. Positively, the company increased its quarterly dividend to C\$0.30 from the previous C\$0.29. The increase was inline with our estimate but slightly missed the Street's C\$1.21 annualized figure. In general, we believe Fortis is making steady progress in delivering consistent financial results from a largely regulated asset base. We do not place undue emphasis on quarterly results in much of our universe as a result of the inherently long-cycle nature of many assets. For Fortis, we continue to focus on the ongoing significant regulated capital plan.
- **Significant organic growth continues:** Fortis continues to provide a rather robust capital expenditure outlook with guidance of C\$1.3bn for 2012. Additionally, Fortis updated its 5-year capex outlook to C\$5.5bn. Eighty-seven percent of that total amount is expected to go towards regulated utility activities that should deliver favourable risk adjusted returns.
- **Improving capital market conditions:** Historically, Fortis has been very adept at acquisitions. Corporate growth has benefited from the company's ability to successfully acquire and integrate selected assets. In our view, the company is well positioned in the current market for acquisition opportunities. The company stated, "We remain disciplined and patient in our pursuit of electric and gas utility acquisitions in the United States and Canada that will add value for Fortis shareholders".
- **Valuation:** Our C\$34.target price and Neutral rating are obtained utilizing multiple valuation approaches, including: a 18.5x P/E multiple of 2013 earnings; a 1.7x book value multiple; and, a DCF based valuation. We reiterate our Neutral rating.

DISCLOSURE APPENDIX CONTAINS IMPORTANT DISCLOSURES, ANALYST CERTIFICATIONS, INFORMATION ON TRADE ALERTS, ANALYST MODEL PORTFOLIOS AND THE STATUS OF NON-U.S. ANALYSTS. U.S. Disclosure: Credit Suisse does and seeks to do business with companies covered in its research reports. As a result, investors should be aware that the Firm may have a conflict of interest that could affect the objectivity of this report. Investors should consider this report as only a single factor in making their investment decision.

This research note is divided into three parts: (a) results; (b) outlook; and, (c) valuation. Each of these areas will be addressed in greater detail below.

Results

Exhibit 1 highlights the segmented unadjusted earnings contributions for the most recent quarter and for the comparable period one year ago. Our commentary for each segment appears under the various headings below.

Results missed our and the Street's estimate

Exhibit 1: Segmented unadjusted earnings contribution

C\$ in millions, unless otherwise stated

	Q4 2011	Q4 2010	chg y/y
Regulated Gas Utilities - Canadian	51	45	13%
Regulated Electric Utilities - Canadian	40	41	-2%
Regulated Electric Utilities - Caribbean	3	4	-25%
Non-regulated - Fortis Generation	5	6	-17%
Non-regulated - Fortis Properties	5	7	-29%
Corporate and other	(18)	(18)	0%
Net earnings applicable to common shares	86	85	1%

Source: Company data and Credit Suisse

Regulated Gas Utilities - Canadian

The unadjusted earnings for this segment improved by roughly 13% year-over-year (see Exhibit 2). Some notable items for the regulated gas utilities include:

- Net customer additions were 7,450 during 2011 versus net additions of 9,393 during 2010;
- The amount of customer additions decreased versus 2010 due to lower building activity; and,
- Sales volumes for the quarter increased for all the segments, which includes Core-residential, Commercial, Industrial and Transportation segment.

Exhibit 2: Regulated Gas Utilities (unadjusted)

	Q4 2011	Q4 2010	chg y/y
FortisBC Energy	51.0	45.0	13%

Source: Company data and Credit Suisse

Regulated Electric Utilities – Canadian

This segment includes operating companies like FortisAlberta, FortisBC Electric, Newfoundland Power and Other Canadian Electric Utilities, which includes Maritime Electric and FortisOntario. Detailed contributions for each of these divisions can be found in Exhibit 3.

Exhibit 3: Regulated electric utilities – Canadian contribution (unadjusted)

C\$ in millions, unless otherwise stated

	Q4 2011	Q4 2010	chg y/y
FortisAlberta	17	17	0%
FortisBC Electric	11	10	10%
Newfoundland Power	8	9	-11%
Other Cdn Electric Utilities	4	5	-20%
Earnings	40	41	-2%

Source: Company data and Credit Suisse

FortisAlberta

Earnings at this regulated utility were flat comparing Q4 2011 versus the prior period. See Exhibit 4 for selected highlights.

Slight decrease in energy delivery in Alberta

Exhibit 4: Selected FortisAlberta performance highlights (unadjusted)

	Q4 2011	Q4 2010	chg y/y
Energy deliveries (GWh)	4,232	4,255	-1%
Revenue (C\$/MWh)	24.10	23.27	4%
Operating expenses (C\$/MWh)	8.74	8.70	1%
Gross margin (C\$/MWh)	15.36	14.57	5%
Earnings (C\$millions)	17	17	0%

Source: Company data and Credit Suisse

FortisBC Electric

Segmented earnings at FortisBC Electric increased by 10% compared to the same period last year. The increase was due to growth in rate base.

Flat energy deliveries in BC

See Exhibit 5 for selected highlights.

Exhibit 5: Selected FortisBC Electric performance highlights (unadjusted)

	Q4 2011	Q4 2010	chg y/y
Energy deliveries (GWh)	843	847	0%
Revenue (C\$/MWh)	96.09	86.19	11%
Energy supply costs (C\$/MWh)	26.10	27.15	-4%
Operating expenses (C\$/MWh)	29.66	24.79	20%
Gross margin (C\$/MWh)	40.33	34.24	18%
Earnings (C\$millions)	11	10	10%

Source: Company data and Credit Suisse

Newfoundland Power

This segment's earnings reduced by 11% when comparing Q4 2011 versus Q4 2010. Higher electricity sales and reduction in energy supply cost were offset by wage and inflationary increases, higher effective corporate taxes and lower allowed ROE. Energy deliveries were up by approximately 3% (see Exhibit 6).

Increase in NP's energy deliveries

Exhibit 6: Selected Newfoundland Power performance highlights (unadjusted)

	Q4 2011	Q4 2010	chg y/y
Energy deliveries (GWh)	1,527	1,488	3%
Revenue (C\$/MWh)	102.16	102.15	0%
Energy supply costs (C\$/MWh)	67.45	68.55	-2%
Operating expenses (C\$/MWh)	13.10	10.08	30%
Gross margin (C\$/MWh)	21.61	23.52	-8%
Earnings (C\$millions)	8	9	-11%

Other Canadian Electric Utilities

This segment's earning decreased by 20% in Q4 2011 versus Q4 2010 primarily due to lower electricity sales at FortisOntario and higher operating expense. The energy deliveries for the period declined by 2%, when compared Q4 2010. Exhibit 7 contains selected highlights.

Decrease in energy deliveries

Exhibit 7: Selected Other Canadian Electric Utilities performance highlights (unadjusted)

	Q4 2011	Q4 2010	chg y/y
Energy deliveries (GWh)	568	578	-2%
Revenue (C\$/MWh)	147.89	150.52	-2%
Energy supply costs (C\$/MWh)	96.83	102.08	-5%
Operating expenses (C\$/MWh)	26.41	20.76	27%
Gross margin (C\$/MWh)	24.65	27.68	-11%
Earnings (C\$millions)	4	5	-20%

Source: Company data and Credit Suisse

Regulated Electric Utilities – Caribbean

This segment includes Belize Electricity (up to June 20, 2011), Caribbean Utilities, and Fortis Turks and Caicos. Earnings for this segment declined by 25% in Q4 2011 versus the same quarter last year. Energy deliveries declined 21% for several reasons. In our view, Belize Electricity was not overly material to Fortis. Additionally, we anticipate the dispute to be resolved in a rationale manner with Fortis recovering, at least, the rate base value. Yet, any such recovery may be over a period of time. The company stated that it “commenced an action in the Belize Supreme Court to challenge the legality of the expropriation of its investment in Belize Electricity. Fortis commissioned an independent valuation of its expropriated investment in Belize Electricity and submitted its claim for compensation to the GOB in November 2011.”

Awaiting a decision in Belize

See Exhibit 8 below for selected highlights.

Exhibit 8: Caribbean - Regulated Electric Utilities performance highlights (unadjusted)

	Q4 2011	Q4 2010	chg y/y
Energy deliveries (GWh)	174	220	-21%
Revenue (C\$/MWh)	402.30	381.82	5%
Energy supply costs (C\$/MWh)	264.37	236.36	12%
Operating expenses (C\$/MWh)	51.72	59.09	-12%
Gross margin (C\$/MWh)	86.21	86.36	0%
Earnings (C\$millions)	3	4	-25%

Source: Company data and Credit Suisse

Non-regulated – Fortis Generation

The non-regulated generation assets within this segment are located in Belize, British Columbia, Central Newfoundland, Ontario and Upper New York State. Earnings for the segment were down 17% in Q4 2011 compared to the same quarter last year. Energy deliveries decreased by 18% from Q4 2010 to Q4 2011 due to decreased production in Upper New York and Belize. Exhibit 9 provides selected highlights.

Exhibit 9: Non-regulated generation – selected highlights

	Q4 2011	Q4 2010	chg y/y
Energy deliveries (GWh)	112	137	-18%
Revenue (C\$/MWh)	80.36	65.69	22%
Operating expenses (C\$/MWh)	17.86	7.30	145%
Gross margin (C\$/MWh)	62.50	58.39	7%
Earnings (C\$millions)	5	6	-17%

Source: Company data and Credit Suisse

Non-regulated – Fortis Properties

Fortis Properties' net unadjusted earning contribution decreased by 29% in the Q4 2011 compared to Q4 2010. REVPAR increased to C\$72.39 from C\$70.76 for the comparable period last year. While, the occupancy rate of the Real Estate Division was down at 93.2% versus last year's 94.5%.

Corporate

Corporate expenses remained flat to C\$18million in Q4 2011, when compared to Q4 2010.

Outlook

We continue to believe investor, whether existing or prospective, should consider several major issues, including (a) funding organic growth; and (b) acquisition trail. Each of these issues is addressed below.

Funding organic growth

In the most recent quarter the company's reported capital expenditures totaled C\$368 million, of which C\$315 million was spent at regulated utilities. Fortis guided that capital expenditures for 2012 will be roughly C\$1.3 billion. A majority of the total will be spent on Western Canadian assets (FortisBC Energy, FortisAlberta, and FortisBC Electric). Fortis' consolidated gross capital expenditures expectations over the 5 year plan (2012-2016) stood at C\$5.5bn with 87% of that total amount being allocated to regulated utilities. Both FortisAlberta and FortisBC Electric will receive the vast majority of that amount; whereas, the regulated gas utilities are planned to receive 23% of the total capex amount, and 13% is allocated to non-regulated operations. Given the regulated rates of return with utility capital expenditures, the increases should be viewed as longer-term positives provided an appropriate financial balance is struck.

Ongoing organic growth

With the significant current relative valuation advantages, we believe that Fortis may become more motivated to explore possible capital efficiency initiatives. In our view, the company possesses ample opportunities to become much more capital efficient. One strategy involves divesting certain non-utility assets and redeploying capital into utility assets or funding the capital program. Another option would entail divesting partial interests in selected utility assets in an asset management model approach and receiving a management fee.

In fact, some of the media reports prior to the official announcement of PPL Corporation's acquisition of E.ON's Kentucky utility assets for US\$7.625 billion stated that a consortium led by Fortis Inc. was one of three finalists for those assets. We would regard that type of information in media reports as being something akin to an asset management style of approach. Ultimately, we believe that such a strategy would help Fortis generate a higher level of returns. Additionally, the use of an asset management type approach would make large acquisitions which could potentially further accelerate growth.

Opportunities for improved capital efficiency

Generally, we continue to prefer pure-play utility companies without an undue amount of non-core asset exposure. Historically, non-core assets (especially real estate) have been somewhat commonplace for many utilities. Fortis has been no exception to that approach. Notably, the mix of commercial and hospitality real estate assets held by Fortis have been positive contributors and also provide the company a bit of financial flexibility for a selection of reasons. In light of current market conditions, we believe there is a much less compelling case for the monetization of these assets than as in the past. We note Fortis Properties continues to increase in scale and scope which may eventually make it more attractive for acquisition or monetization. Yet, for a number of reasons, we continue to believe there is a rather low probability of either of those events occurring.

Even discounting the potential monetization of assets that we would consider to be non-core, we believe Fortis possesses considerable potential to become much more capital efficient. Given the significant interest in infrastructure assets by many investors seeking long-dated types of return, Fortis could easily divest portions of its existing asset base to pension fund investors and charge a management fee for their operational and management expertise. This type of approach could significantly improve capital efficiency and returns on capital. In addition, this asset management approach could also free-up capital that could be used to fund the existing capital program or fund future acquisitions.

Capital efficiency initiatives could aid funding of acquisitions or the existing capital program funding

Acquisition trail

In our view, Fortis continues to demonstrate a rather impressive ability to successfully integrate acquisitions. Additionally, we view acquisitions as somewhat central to the company's growth strategy. Fortis management has been reiterating this. For instance, the company's most recent Management Discussion and Analysis stated "We remain disciplined and patient in our pursuit of electric and gas utility acquisitions in the United States and Canada that will add value for Fortis shareholders". Fortis showed discipline in its acquisition strategy by not competing in a bidding war for Central Vermont Service Corp. The company received a C\$17m termination fee. For further details see "A positive pass" published on 12 July 2011.

Given the success of Fortis in past transactions, as measured in terms of financials, share price and operationally, we believe the company's current valuation and skill set may lead to some potentially value creating acquisition activity (see Exhibit 10 below for select Fortis M&A transactions).

Exhibit 10: Selected Fortis M&A transactions

\$ in millions, unless otherwise stated

Announced Date	Asset/Company	Deal value (\$m)	Comment
7/22/2009	Caribbean Utilities Co.	CAD 6.74	Acquired an additional 2.7% of Caribbean Utilities Co.
6/23/2009	Great Lakes Power Distribution	CAD 68.00	Acquired from Brookfield the utility that serves the District of Algoma in northern Ontario.
10/1/2008	Grimsby Power Inc.	CAD 1.10	Acquired a 10% minority interest.
10/1/2008	Caribbean Utilities Co.	CAD 3.00	Acquired an additional 1% of Caribbean Utilities Co.
8/15/2008	Caribbean Utilities Co.	CAD 25.00	Acquired an additional 2% of Caribbean Utilities Co.
7/23/2007	Delta Regina	CAD 49.95	Delta hotel located in Regina, Saskatchewan.
2/26/2007	Terasen Inc.	CAD 3,700.00	Gas distribution in British Columbia.
11/7/2006	Caribbean Utilities Co.	CAD 55.70	Acquired an additional 16% of Caribbean Utilities Co.
10/19/2006	4 hotels in western Canada	CAD 51.60	4 hotels (Holiday Inn, Best Western and Ramada) located in BC and Alberta.
8/28/2006	PPC Ltd & Atlantic Equipment & Power (Turks & Caicos) Ltd.	CAD 97.70	Electric utility that services ~80% of the Turks and Caicos Islands.

2/26/2003	Granite Power Corp	CAD 8.80	Company consist of Granite Power Distribution & Granite Power Generation.
1/30/2003	Caribbean Utilities Co.	CAD 71.00	Acquired additional 3,863,695 Class A Ordinary Shares, representing approximately 15.9 per cent of the outstanding shares of the company and increased Fortis' holding to roughly 38%.
12/1/2002	Delta St John's Hotel and conference centre	CAD 25.90	Hotel in downtown St. John's, Newfoundland
5/9/2002	Cornwall Street Railway Light	CAD 67.70	City of Cornwall electric transmission & distribution utility.
4/16/2002	Kings Place	CAD 27.70	Commercial property in Fredericton, NB.
3/13/2002	Caribbean Utilities Co.	CAD 12.90	Acquired additional ~2% of the company.
3/20/2002	Niagara Power Co.	CAD 49.00	Purchase remaining 50% of Niagara Power Co.
2/1/2002	Cabot palace I	CAD 14.30	133,327 Square feet premium office tower in St. John's, Newfoundland
9/18/2001	Portfolio of properties in St. John's	CAD 8.30	Purchased TD Place commercial bldg and 6 parcels of land.
9/14/2001	Aliant Poles	CAD 46.00	Purchased 102,000 poles and related infrastructure from Aliant Telecom.
1/26/2001	Belize Electric Company Ltd.	USD 62.00	Acquired 95% of company from Duke Energy.
12/19/2000	2 Hydro generating stations	CAD 6.90	2 generating stations (6.88MW) in upper New York state.
12/14/2000	Brunswick Square Ltd.	CAD 6.20	Acquired 50% of the company Fortis doesn't own.
12/1/2000	Fort William Building and Blue cross centre	CAD 52.70	Fort William building in St. John's, Newfoundland and Blue cross centre in Moncton, New Brunswick.
2/23/2000	Caribbean Utilities Co.	CAD 79.90	Acquired 20% of the company.
12/30/1999	2 Hydro generating stations	CAD 19.77	2 generating stations (16MW) in upper New York state (Moose River & Philadelphia)
10/28/1999	Belize Electricity Ltd.	CAD 36.80	Acquired 67% interest in the main commercial generator, transmitter & distributor of electricity in Belize.
8/31/1999	Brunswick Square Ltd.	CAD 10.12	Acquired 50% of the company by Fortis Properties.
1/31/1999	Mount Peyton	CAD 2.20	Acquired all common shares and notes payable.
	Total USD	USD 65.50	
	Total CAD	CAD 6,214.48	

Source: Bloomberg, Company data and Credit Suisse

In terms of acquisitions, we believe Fortis has a few advantages over others, including:

- Fortis has growing expertise with both electric and gas utilities;
- Larger size will allow it to look at a larger spectrum of potential target companies;
- A proven ability to effectively integrate acquisitions;
- A rather strong appetite for yield oriented securities in Canada;
- The potential ability to support a transaction with pension fund capital;
- Canada's rather benign interest rate environment; and,
- Bought deal financing commonly employed in Canada.

Fortis possesses a number of absolute and relative advantages over some other competitors

Historically, Fortis has been very adept at acquisitions. Corporate growth has benefited from the company's ability to successfully acquire and integrate selected assets. Capital market conditions are demonstrating signs of improved functioning. Therefore, the typical Fortis acquisition strategy is more palatable in current capital markets. For greater details, please refer to our 6 August 2009 note entitled "*Pondering a Portland purchase?*"

Valuation

We continue to believe that Fortis has strong organic growth in key areas such as British Columbia, Alberta and the Caribbean. In our view, the company faces a delicate balance of capital investment opportunities and cash flow needs. From our perspective, the next big catalysts for the stock will likely revolve around capital efficiency initiatives or a large scale acquisition which will always lack predictability. As a result of the quarter, we revised our EPS estimates for 2012 and 2013 to C\$1.79 and C\$1.85 from C\$1.82 and C\$1.87, respectively. Our Neutral rating and C\$34.00 target price is obtained from multiple valuation approaches, including: a 18.5x P/E multiple of 2013 earnings; a 1.7x book value multiple; and, a DCF based valuation. We reiterate our Neutral rating. Some historical Fortis valuation parameters appear in Exhibit 11 below generated by Credit Suisse RAVE.

Rating: Neutral

3-Year Price, Target Price and Rating Change History Chart for FTS.TO

FTS.TO	Closing Price	Target Price	Initiation/
Date	(C\$)	(C\$)	Assumption
1/25/10	28.5	30	
11/8/10	33.6	32	
2/10/11	33.81	34	
8/3/11	31.37		O
9/28/11	33.08		N

The analyst(s) responsible for preparing this research report received compensation that is based upon various factors including Credit Suisse's total revenues, a portion of which are generated by Credit Suisse's investment banking activities.

Analysts' stock ratings are defined as follows:

Outperform (O): The stock's total return is expected to outperform the relevant benchmark* by at least 10-15% (or more, depending on perceived risk) over the next 12 months.

Neutral (N): The stock's total return is expected to be in line with the relevant benchmark* (range of $\pm 10-15\%$) over the next 12 months.

Underperform (U): The stock's total return is expected to underperform the relevant benchmark* by 10-15% or more over the next 12 months.

*Relevant benchmark by region: As of 29th May 2009, Australia, New Zealand, U.S. and Canadian ratings are based on (1) a stock's absolute total return potential to its current share price and (2) the relative attractiveness of a stock's total return potential within an analyst's coverage universe**, with Outperforms representing the most attractive, Neutrals the less attractive, and Underperforms the least attractive investment opportunities. Some U.S. and Canadian ratings may fall outside the absolute total return ranges defined above, depending on market conditions and industry factors. For Latin American, Japanese, and non-Japan Asia stocks, ratings are based on a stock's total return relative to the average total return of the relevant country or regional benchmark; for European stocks, ratings are based on a stock's total return relative to the analyst's coverage universe**. For Australian and New Zealand stocks, 12-month rolling yield is incorporated in the absolute total return calculation and a 15% and a 7.5% threshold replace the 10-15% level in the Outperform and Underperform stock rating definitions, respectively. The 15% and 7.5% thresholds replace the +10-15% and -10-15% levels in the Neutral stock rating definition, respectively.

**An analyst's coverage universe consists of all companies covered by the analyst within the relevant sector.

Restricted (R): In certain circumstances, Credit Suisse policy and/or applicable law and regulations preclude certain types of communications, including an investment recommendation, during the course of Credit Suisse's engagement in an investment banking transaction and in certain other circumstances.

Volatility Indicator [V]: A stock is defined as volatile if the stock price has moved up or down by 20% or more in a month in at least 8 of the past 24 months or the analyst expects significant volatility going forward.

Analysts' coverage universe weightings are distinct from analysts' stock ratings and are based on the expected performance of an analyst's coverage universe* versus the relevant broad market benchmark**:

Overweight: Industry expected to outperform the relevant broad market benchmark over the next 12 months.

Market Weight: Industry expected to perform in-line with the relevant broad market benchmark over the next 12 months.

Underweight: Industry expected to underperform the relevant broad market benchmark over the next 12 months.

*An analyst's coverage universe consists of all companies covered by the analyst within the relevant sector.

**The broad market benchmark is based on the expected return of the local market index (e.g., the S&P 500 in the U.S.) over the next 12 months.

Credit Suisse's distribution of stock ratings (and banking clients) is:

Global Ratings Distribution	
Outperform/Buy*	46% (60% banking clients)

Neutral/Hold*	42%	(56% banking clients)
Underperform/Sell*	10%	(50% banking clients)
Restricted	2%	

*For purposes of the NYSE and NASD ratings distribution disclosure requirements, our stock ratings of Outperform, Neutral, and Underperform most closely correspond to Buy, Hold, and Sell, respectively; however, the meanings are not the same, as our stock ratings are determined on a relative basis. (Please refer to definitions above.) An investor's decision to buy or sell a security should be based on investment objectives, current holdings, and other individual factors.

Price Target: (12 months) for (FTS.TO)

Method: We obtain our C\$34.00 target price for Fortis Inc. by using multiple valuation methodologies, yield base analysis, and discounted cash flow, all of which produce the C\$34.00 target. Our target price implies a P/E (price/earnings) multiple of 18.5x our 2013 EPS (earnings per share) estimate of C\$1.85 and an EV/EBITDA (enterprise value/earnings before interest, taxes, depreciation, and amortization) multiple of 10.3x our EBITDA estimate.

Risks: There are a number of risks to Fortis' achievement of our C\$34.00 target price: commodity prices; weather; environmental; regulatory; access to capital markets; and, interest rates. Moreover, one should never underestimate the power of the regulator in any regulated business.

Please refer to the firm's disclosure website at www.credit-suisse.com/researchdisclosures for the definitions of abbreviations typically used in the target price method and risk sections.

The information, tools and material presented in this report are provided to you for information purposes only and are not to be used or considered as an offer or the solicitation of an offer to sell or to buy or subscribe for securities or other financial instruments. CS may not have taken any steps to ensure that the securities referred to in this report are suitable for any particular investor. CS will not treat recipients as its customers by virtue of their receiving the report. The investments or services contained or referred to in this report may not be suitable for you and it is recommended that you consult an independent investment advisor if you are in doubt about such investments or investment services. Nothing in this report constitutes investment, legal, accounting or tax advice or a representation that any investment or strategy is suitable or appropriate to your individual circumstances or otherwise constitutes a personal recommendation to you. CS does not offer advice on the tax consequences of investment and you are advised to contact an independent tax adviser. Please note in particular that the bases and levels of taxation may change.

CS believes the information and opinions in the Disclosure Appendix of this report are accurate and complete. Information and opinions presented in the other sections of the report were obtained or derived from sources CS believes are reliable, but CS makes no representations as to their accuracy or completeness. Additional information is available upon request. CS accepts no liability for loss arising from the use of the material presented in this report, except that this exclusion of liability does not apply to the extent that liability arises under specific statutes or regulations applicable to CS. This report is not to be relied upon in substitution for the exercise of independent judgment. CS may have issued, and may in the future issue, a trading call regarding this security. Trading calls are short term trading opportunities based on market events and catalysts, while stock ratings reflect investment recommendations based on expected total return over a 12-month period as defined in the disclosure section. Because trading calls and stock ratings reflect different assumptions and analytical methods, trading calls may differ directionally from the stock rating. In addition, CS may have issued, and may in the future issue, other reports that are inconsistent with, and reach different conclusions from, the information presented in this report. Those reports reflect the different assumptions, views and analytical methods of the analysts who prepared them and CS is under no obligation to ensure that such other reports are brought to the attention of any recipient of this report. CS is involved in many businesses that relate to companies mentioned in this report. These businesses include specialized trading, risk arbitrage, market making, and other proprietary trading.

Past performance should not be taken as an indication or guarantee of future performance, and no representation or warranty, express or implied, is made regarding future performance. Information, opinions and estimates contained in this report reflect a judgement at its original date of publication by CS and are subject to change without notice. The price, value of and income from any of the securities or financial instruments mentioned in this report can fall as well as rise. The value of securities and financial instruments is subject to exchange rate fluctuation that may have a positive or adverse effect on the price or income of such securities or financial instruments. Investors in securities such as ADR's, the values of which are influenced by currency volatility, effectively assume this risk.

Structured securities are complex instruments, typically involve a high degree of risk and are intended for sale only to sophisticated investors who are capable of understanding and assuming the risks involved. The market value of any structured security may be affected by changes in economic, financial and political factors (including, but not limited to, spot and forward interest and exchange rates), time to maturity, market conditions and volatility, and the credit quality of any issuer or reference issuer. Any investor interested in purchasing a structured product should conduct their own investigation and analysis of the product and consult with their own professional advisers as to the risks involved in making such a purchase.

Some investments discussed in this report have a high level of volatility. High volatility investments may experience sudden and large falls in their value causing losses when that investment is realised. Those losses may equal your original investment. Indeed, in the case of some investments the potential losses may exceed the amount of initial investment, in such circumstances you may be required to pay more money to support those losses. Income yields from investments may fluctuate and, in consequence, initial capital paid to make the investment may be used as part of that income yield. Some investments may not be readily realisable and it may be difficult to sell or realise those investments, similarly it may prove difficult for you to obtain reliable information about the value, or risks, to which such an investment is exposed.

ACQUISITION

Acquiring American assets

- **American acquisition:** Fortis Inc. announced that it has entered into an agreement to acquire CH Energy Group, Inc. (CHG) for US\$65 per share for a total consideration of roughly US\$1.5b. The purchase price is roughly a 10.5% premium above CHG's most recent stock price close. We calculate the transaction to be modestly accretive to FTS under conservative assumptions. Several reasons to like this deal include: (a) single state results in less complexity; (b) relatively smaller size of the transaction versus some other potential transactions; and, (c) good near to medium-term organic growth at CHG.
- **Deal details:** Selected details include: (a) FTS will be using debt to finance the transaction in the short-term; (b) 97% of CHG net income comes from regulated business; (c) FTS expects closing of the transaction within 12 months; (d) capex at the regulated business to "exceed" US\$100m on average through 2016; (e) CHG total asset roughly US\$1.7b; and (f) for the last three years, CHG regulated business has operated under 10% ROE with 48% common equity (both are higher than many equivalents in Canada).
- **Improving capital market conditions:** Historically, Fortis has been very adept at acquisitions. Corporate growth has benefited from the company's ability to successfully acquire and integrate selected assets. In our view, the company is well positioned in the current market for acquisition opportunities. The company stated, "We remain disciplined and patient in our pursuit of electric and gas utility acquisitions in the United States and Canada that will add value for Fortis shareholders".
- **Valuation:** Our C\$34.target price and Neutral rating are obtained utilizing multiple valuation approaches, including: a 18.5x P/E multiple of 2013 earnings; a 1.7x book value multiple; and, a DCF based valuation. We reiterate our Neutral rating.

Important Global Disclosures

I, Andrew M. Kuske, certify that (1) the views expressed in this report accurately reflect my personal views about all of the subject companies and securities and (2) no part of my compensation was, is or will be directly or indirectly related to the specific recommendations or views expressed in this report.

See the Companies Mentioned section for full company names.

3-Year Price, Target Price and Rating Change History Chart for FTS.TO

The analyst(s) responsible for preparing this research report received compensation that is based upon various factors including Credit Suisse's total revenues, a portion of which are generated by Credit Suisse's investment banking activities.

Analysts' stock ratings are defined as follows:

Outperform (O): The stock's total return is expected to outperform the relevant benchmark* by at least 10-15% (or more, depending on perceived risk) over the next 12 months.

Neutral (N): The stock's total return is expected to be in line with the relevant benchmark* (range of $\pm 10-15\%$) over the next 12 months.

Underperform (U): The stock's total return is expected to underperform the relevant benchmark* by 10-15% or more over the next 12 months.

*Relevant benchmark by region: As of 29th May 2009, Australia, New Zealand, U.S. and Canadian ratings are based on (1) a stock's absolute total return potential to its current share price and (2) the relative attractiveness of a stock's total return potential within an analyst's coverage universe**, with Outperforms representing the most attractive, Neutrals the less attractive, and Underperforms the least attractive investment opportunities. Some U.S. and Canadian ratings may fall outside the absolute total return ranges defined above, depending on market conditions and industry factors. For Latin American, Japanese, and non-Japan Asia stocks, ratings are based on a stock's total return relative to the average total return of the relevant country or regional benchmark; for European stocks, ratings are based on a stock's total return relative to the analyst's coverage universe**. For Australian and New Zealand stocks, 12-month rolling yield is incorporated in the absolute total return calculation and a 15% and a 7.5% threshold replace the 10-15% level in the Outperform and Underperform stock rating definitions, respectively. The 15% and 7.5% thresholds replace the +10-15% and -10-15% levels in the Neutral stock rating definition, respectively.

**An analyst's coverage universe consists of all companies covered by the analyst within the relevant sector.

Restricted (R): In certain circumstances, Credit Suisse policy and/or applicable law and regulations preclude certain types of communications, including an investment recommendation, during the course of Credit Suisse's engagement in an investment banking transaction and in certain other circumstances.

Volatility Indicator [V]: A stock is defined as volatile if the stock price has moved up or down by 20% or more in a month in at least 8 of the past 24 months or the analyst expects significant volatility going forward.

Analysts' coverage universe weightings are distinct from analysts' stock ratings and are based on the expected performance of an analyst's coverage universe* versus the relevant broad market benchmark**:

Overweight: Industry expected to outperform the relevant broad market benchmark over the next 12 months.

Market Weight: Industry expected to perform in-line with the relevant broad market benchmark over the next 12 months.

Underweight: Industry expected to underperform the relevant broad market benchmark over the next 12 months.

*An analyst's coverage universe consists of all companies covered by the analyst within the relevant sector.

**The broad market benchmark is based on the expected return of the local market index (e.g., the S&P 500 in the U.S.) over the next 12 months.

Credit Suisse's distribution of stock ratings (and banking clients) is:

Global Ratings Distribution		
Outperform/Buy*	46%	(60% banking clients)
Neutral/Hold*	42%	(56% banking clients)
Underperform/Sell*	10%	(50% banking clients)
Restricted	2%	

*For purposes of the NYSE and NASD ratings distribution disclosure requirements, our stock ratings of Outperform, Neutral, and Underperform most closely correspond to Buy, Hold, and Sell, respectively; however, the meanings are not the same, as our stock ratings are determined on a relative basis. (Please refer to definitions above.) An investor's decision to buy or sell a security should be based on investment objectives, current holdings, and other individual factors.

Credit Suisse's policy is to update research reports as it deems appropriate, based on developments with the subject company, the sector or the market that may have a material impact on the research views or opinions stated herein.

Credit Suisse's policy is only to publish investment research that is impartial, independent, clear, fair and not misleading. For more detail please refer to Credit Suisse's Policies for Managing Conflicts of Interest in connection with Investment Research: http://www.csfb.com/research-and-analytics/disclaimer/managing_conflicts_disclaimer.html

Credit Suisse does not provide any tax advice. Any statement herein regarding any US federal tax is not intended or written to be used, and cannot be used, by any taxpayer for the purposes of avoiding any penalties.

See the Companies Mentioned section for full company names.

Price Target: (12 months) for (FTS.TO)

Method: We obtain our C\$34.00 target price for Fortis Inc. by using multiple valuation methodologies, yield base analysis, and discounted cash flow, all of which produce the C\$34.00 target. Our target price implies a P/E (price/earnings) multiple of 18.5x our 2013 EPS (earnings per share) estimate of C\$1.85 and an EV/EBITDA (enterprise value/earnings before interest, taxes, depreciation, and amortization) multiple of 10.3x our EBITDA estimate.

Risks: There are a number of risks to Fortis' achievement of our C\$34.00 target price: commodity prices; weather; environmental; regulatory; access to capital markets; and, interest rates. Moreover, one should never underestimate the power of the regulator in any regulated business.

Please refer to the firm's disclosure website at www.credit-suisse.com/researchdisclosures for the definitions of abbreviations typically used in the target price method and risk sections.

See the Companies Mentioned section for full company names.

The subject company (FTS.TO) currently is, or was during the 12-month period preceding the date of distribution of this report, a client of Credit Suisse.

Credit Suisse provided investment banking services to the subject company (FTS.TO) within the past 12 months.

Credit Suisse provided non-investment banking services, which may include Sales and Trading services, to the subject company (FTS.TO) within the past 12 months.

Credit Suisse expects to receive or intends to seek investment banking related compensation from the subject company (FTS.TO) within the next 3 months.

Credit Suisse has received compensation for products and services other than investment banking services from the subject company (FTS.TO) within the past 12 months.

Important Regional Disclosures

Singapore recipients should contact a Singapore financial adviser for any matters arising from this research report.

An analyst involved in the preparation of this report has visited certain material operations of the subject company (FTS.TO) within the past 12 months. The analyst may not have visited all material operations of the subject company. The travel expenses of the analyst in connection with such visits were not paid or reimbursed by the subject company, other than de minimus local travel expenses.

Restrictions on certain Canadian securities are indicated by the following abbreviations: NVS--Non-Voting shares; RVS--Restricted Voting Shares; SVS--Subordinate Voting Shares.

Individuals receiving this report from a Canadian investment dealer that is not affiliated with Credit Suisse should be advised that this report may not contain regulatory disclosures the non-affiliated Canadian investment dealer would be required to make if this were its own report.

For Credit Suisse Securities (Canada), Inc.'s policies and procedures regarding the dissemination of equity research, please visit http://www.csfb.com/legal_terms/canada_research_policy.shtml.

As of the date of this report, Credit Suisse acts as a market maker or liquidity provider in the equities securities that are the subject of this report.

Principal is not guaranteed in the case of equities because equity prices are variable.

Commission is the commission rate or the amount agreed with a customer when setting up an account or at anytime after that.

CS may have issued a Trade Alert regarding this security. Trade Alerts are short term trading opportunities identified by an analyst on the basis of market events and catalysts, while stock ratings reflect an analyst's investment recommendations based on expected total return over a 12-month period relative to the relevant coverage universe. Because Trade Alerts and stock ratings reflect different assumptions and analytical methods, Trade Alerts may differ directionally from the analyst's stock rating.

The author(s) of this report maintains a CS Model Portfolio that he/she regularly adjusts. The security or securities discussed in this report may be a component of the CS Model Portfolio and subject to such adjustments (which, given the composition of the CS Model Portfolio as a whole, may differ from the recommendation in this report, as well as opportunities or strategies identified in Trading Alerts concerning the same security). The CS Model Portfolio and important disclosures about it are available at www.credit-suisse.com/ti.

Taiwanese Disclosures: Reports written by Taiwan-based analysts on non-Taiwan listed companies are not considered recommendations to buy or sell securities under Taiwan Stock Exchange Operational Regulations Governing Securities Firms Recommending Trades in Securities to Customers.

To the extent this is a report authored in whole or in part by a non-U.S. analyst and is made available in the U.S., the following are important disclosures regarding any non-U.S. analyst contributors:

The non-U.S. research analysts listed below (if any) are not registered/qualified as research analysts with FINRA. The non-U.S. research analysts listed below may not be associated persons of CSSU and therefore may not be subject to the NASD Rule 2711 and NYSE Rule 472 restrictions on communications with a subject company, public appearances and trading securities held by a research analyst account.

- Andrew M. Kuske, non-U.S. analyst, is a research analyst employed by Credit Suisse Securities (Canada), Inc..
- Paul Tan, non-U.S. analyst, is a research analyst employed by Credit Suisse Securities (Canada), Inc..

For Credit Suisse disclosure information on other companies mentioned in this report, please visit the website at www.credit-suisse.com/researchdisclosures or call +1 (877) 291-2683.

Disclaimers continue on next page.

This report is not directed to, or intended for distribution to or use by, any person or entity who is a citizen or resident of or located in any locality, state, country or other jurisdiction where such distribution, publication, availability or use would be contrary to law or regulation or which would subject Credit Suisse AG, the Swiss bank, or its subsidiaries or its affiliates ("CS") to any registration or licensing requirement within such jurisdiction. All material presented in this report, unless specifically indicated otherwise, is under copyright to CS. None of the material, nor its content, nor any copy of it, may be altered in any way, transmitted to, copied or distributed to any other party, without the prior express written permission of CS. All trademarks, service marks and logos used in this report are trademarks or service marks or registered trademarks or service marks of CS or its affiliates.

The information, tools and material presented in this report are provided to you for information purposes only and are not to be used or considered as an offer or the solicitation of an offer to sell or to buy or subscribe for securities or other financial instruments. CS may not have taken any steps to ensure that the securities referred to in this report are suitable for any particular investor. CS will not treat recipients as its customers by virtue of their receiving the report. The investments or services contained or referred to in this report may not be suitable for you and it is recommended that you consult an independent investment advisor if you are in doubt about such investments or investment services. Nothing in this report constitutes investment, legal, accounting or tax advice or a representation that any investment or strategy is suitable or appropriate to your individual circumstances or otherwise constitutes a personal recommendation to you. CS does not offer advice on the tax consequences of investment and you are advised to contact an independent tax adviser. Please note in particular that the bases and levels of taxation may change.

CS believes the information and opinions in the Disclosure Appendix of this report are accurate and complete. Information and opinions presented in the other sections of the report were obtained or derived from sources CS believes are reliable, but CS makes no representations as to their accuracy or completeness. Additional information is available upon request. CS accepts no liability for loss arising from the use of the material presented in this report, except that this exclusion of liability does not apply to the extent that liability arises under specific statutes or regulations applicable to CS. This report is not to be relied upon in substitution for the exercise of independent judgment. CS may have issued, and may in the future issue, a trading call regarding this security. Trading calls are short term trading opportunities based on market events and catalysts, while stock ratings reflect investment recommendations based on expected total return over a 12-month period as defined in the disclosure section. Because trading calls and stock ratings reflect different assumptions and analytical methods, trading calls may differ directionally from the stock rating. In addition, CS may have issued, and may in the future issue, other reports that are inconsistent with, and reach different conclusions from, the information presented in this report. Those reports reflect the different assumptions, views and analytical methods of the analysts who prepared them and CS is under no obligation to ensure that such other reports are brought to the attention of any recipient of this report. CS is involved in many businesses that relate to companies mentioned in this report. These businesses include specialized trading, risk arbitrage, market making, and other proprietary trading.

Past performance should not be taken as an indication or guarantee of future performance, and no representation or warranty, express or implied, is made regarding future performance. Information, opinions and estimates contained in this report reflect a judgement at its original date of publication by CS and are subject to change without notice. The price, value of and income from any of the securities or financial instruments mentioned in this report can fall as well as rise. The value of securities and financial instruments is subject to exchange rate fluctuation that may have a positive or adverse effect on the price or income of such securities or financial instruments. Investors in securities such as ADR's, the values of which are influenced by currency volatility, effectively assume this risk.

Structured securities are complex instruments, typically involve a high degree of risk and are intended for sale only to sophisticated investors who are capable of understanding and assuming the risks involved. The market value of any structured security may be affected by changes in economic, financial and political factors (including, but not limited to, spot and forward interest and exchange rates), time to maturity, market conditions and volatility, and the credit quality of any issuer or reference issuer. Any investor interested in purchasing a structured product should conduct their own investigation and analysis of the product and consult with their own professional advisers as to the risks involved in making such a purchase.

Some investments discussed in this report have a high level of volatility. High volatility investments may experience sudden and large falls in their value causing losses when that investment is realised. Those losses may equal your original investment. Indeed, in the case of some investments the potential losses may exceed the amount of initial investment, in such circumstances you may be required to pay more money to support those losses. Income yields from investments may fluctuate and, in consequence, initial capital paid to make the investment may be used as part of that income yield. Some investments may not be readily realisable and it may be difficult to sell or realise those investments, similarly it may prove difficult for you to obtain reliable information about the value, or risks, to which such an investment is exposed.

Q1 earnings preview

- **Earnings revisions:** For several reasons, we made a number of revisions to our Fortis Inc. financial model. Our changes focused on several areas ahead of the forthcoming Q1 2012 results. Specifically, our Q1 EPS estimate declined from C\$0.71 to C\$0.68. Our annual estimate declines from C\$1.79 to C\$1.76. For greater details, please refer to our Canadian Infrastructure Q1 2012 earnings preview "Starting the season: Q1 earnings preview" (25 April 2012).

Disclosure Appendix

Important Global Disclosures

I, Andrew M. Kuske, certify that (1) the views expressed in this report accurately reflect my personal views about all of the subject companies and securities and (2) no part of my compensation was, is or will be directly or indirectly related to the specific recommendations or views expressed in this report.

See the Companies Mentioned section for full company names.

3-Year Price, Target Price and Rating Change History Chart for FTS.TO

FTS.TO	Closing Price	Target Price	Initiation/
Date	(C\$)	(C\$)	Rating Assumption
1/25/10	28.5	30	
11/8/10	33.6	32	
2/10/11	33.81	34	
8/3/11	31.37		O
9/28/11	33.08		N

The analyst(s) responsible for preparing this research report received compensation that is based upon various factors including Credit Suisse's total revenues, a portion of which are generated by Credit Suisse's investment banking activities.

Analysts' stock ratings are defined as follows:

Outperform (O): The stock's total return is expected to outperform the relevant benchmark* by at least 10-15% (or more, depending on perceived risk) over the next 12 months.

Neutral (N): The stock's total return is expected to be in line with the relevant benchmark* (range of $\pm 10\text{-}15\%$) over the next 12 months.

Underperform (U): The stock's total return is expected to underperform the relevant benchmark* by 10-15% or more over the next 12 months.

*Relevant benchmark by region: As of 29th May 2009, Australia, New Zealand, U.S. and Canadian ratings are based on (1) a stock's absolute total return potential to its current share price and (2) the relative attractiveness of a stock's total return potential within an analyst's coverage universe**, with Outperforms representing the most attractive, Neutrals the less attractive, and Underperforms the least attractive investment opportunities. Some U.S. and Canadian ratings may fall outside the absolute total return ranges defined above, depending on market conditions and industry factors. For Latin American, Japanese, and non-Japan Asia stocks, ratings are based on a stock's total return relative to the average total return of the relevant country or regional benchmark; for European stocks, ratings are based on a stock's total return relative to the analyst's coverage universe**. For Australian and New Zealand stocks, 12-month rolling yield is incorporated in the absolute total return calculation and a 15% and a 7.5% threshold replace the 10-15% level in the Outperform and Underperform stock rating definitions, respectively. The 15% and 7.5% thresholds replace the +10-15% and -10-15% levels in the Neutral stock rating definition, respectively.

**An analyst's coverage universe consists of all companies covered by the analyst within the relevant sector.

Restricted (R): In certain circumstances, Credit Suisse policy and/or applicable law and regulations preclude certain types of communications, including an investment recommendation, during the course of Credit Suisse's engagement in an investment banking transaction and in certain other circumstances.

Volatility Indicator [V]: A stock is defined as volatile if the stock price has moved up or down by 20% or more in a month in at least 8 of the past 24 months or the analyst expects significant volatility going forward.

Analysts' coverage universe weightings are distinct from analysts' stock ratings and are based on the expected performance of an analyst's coverage universe* versus the relevant broad market benchmark:**

Overweight: Industry expected to outperform the relevant broad market benchmark over the next 12 months.

Market Weight: Industry expected to perform in-line with the relevant broad market benchmark over the next 12 months.

Underweight: Industry expected to underperform the relevant broad market benchmark over the next 12 months.

*An analyst's coverage universe consists of all companies covered by the analyst within the relevant sector.

**The broad market benchmark is based on the expected return of the local market index (e.g., the S&P 500 in the U.S.) over the next 12 months.

Credit Suisse's distribution of stock ratings (and banking clients) is:

Global Ratings Distribution		
Outperform/Buy*	46%	(60% banking clients)
Neutral/Hold*	42%	(58% banking clients)
Underperform/Sell*	10%	(51% banking clients)
Restricted	2%	

*For purposes of the NYSE and NASD ratings distribution disclosure requirements, our stock ratings of Outperform, Neutral, and Underperform most closely correspond to Buy, Hold, and Sell, respectively; however, the meanings are not the same, as our stock ratings are determined on a relative basis. (Please refer to definitions above.) An investor's decision to buy or sell a security should be based on investment objectives, current holdings, and other individual factors.

Credit Suisse's policy is to update research reports as it deems appropriate, based on developments with the subject company, the sector or the market that may have a material impact on the research views or opinions stated herein.

Credit Suisse's policy is only to publish investment research that is impartial, independent, clear, fair and not misleading. For more detail please refer to Credit Suisse's Policies for Managing Conflicts of Interest in connection with Investment Research: http://www.csfb.com/research-and-analytics/disclaimer/managing_conflicts_disclaimer.html

Credit Suisse does not provide any tax advice. Any statement herein regarding any US federal tax is not intended or written to be used, and cannot be used, by any taxpayer for the purposes of avoiding any penalties.

Price Target: (12 months) for (FTS.TO)

Method: We obtain our C\$34.00 target price for Fortis Inc. by using multiple valuation methodologies, yield base analysis, and discounted cash flow, all of which produce the C\$34.00 target. Our target price implies a P/E (price/earnings) multiple of 18.5x our 2013 EPS (earnings per share) estimate of C\$1.85 and an EV/EBITDA (enterprise value/earnings before interest, taxes, depreciation, and amortization) multiple of 10.3x our EBITDA estimate.

Risks: There are a number of risks to Fortis' achievement of our C\$34.00 target price: commodity prices; weather; environmental; regulatory; access to capital markets; and, interest rates. Moreover, one should never underestimate the power of the regulator in any regulated business.

Please refer to the firm's disclosure website at www.credit-suisse.com/researchdisclosures for the definitions of abbreviations typically used in the target price method and risk sections.

See the Companies Mentioned section for full company names.

The subject company (FTS.TO) currently is, or was during the 12-month period preceding the date of distribution of this report, a client of Credit Suisse.

Credit Suisse provided investment banking services to the subject company (FTS.TO) within the past 12 months.

Credit Suisse provided non-investment banking services, which may include Sales and Trading services, to the subject company (FTS.TO) within the past 12 months.

Credit Suisse expects to receive or intends to seek investment banking related compensation from the subject company (FTS.TO) within the next 3 months.

Credit Suisse has received compensation for products and services other than investment banking services from the subject company (FTS.TO) within the past 12 months.

Important Regional Disclosures

Singapore recipients should contact a Singapore financial adviser for any matters arising from this research report.

An analyst involved in the preparation of this report has visited certain material operations of the subject company (FTS.TO) within the past 12 months. The analyst may not have visited all material operations of the subject company. The travel expenses of the analyst in connection with such visits were not paid or reimbursed by the subject company, other than de minimus local travel expenses.

Restrictions on certain Canadian securities are indicated by the following abbreviations: NVS--Non-Voting shares; RVS--Restricted Voting Shares; SVS--Subordinate Voting Shares.

Individuals receiving this report from a Canadian investment dealer that is not affiliated with Credit Suisse should be advised that this report may not contain regulatory disclosures the non-affiliated Canadian investment dealer would be required to make if this were its own report.

For Credit Suisse Securities (Canada), Inc.'s policies and procedures regarding the dissemination of equity research, please visit http://www.csfb.com/legal_terms/canada_research_policy.shtml.

As of the date of this report, Credit Suisse acts as a market maker or liquidity provider in the equities securities that are the subject of this report.

Principal is not guaranteed in the case of equities because equity prices are variable.

Commission is the commission rate or the amount agreed with a customer when setting up an account or at anytime after that.

Taiwanese Disclosures: This research report is for reference only. Investors should carefully consider their own investment risk. Investment results are the responsibility of the individual investor. Reports may not be reprinted without permission of CS. Reports written by Taiwan-based analysts on non-Taiwan listed companies are not considered recommendations to buy or sell securities under Taiwan Stock Exchange Operational Regulations Governing Securities Firms Recommending Trades in Securities to Customers.

To the extent this is a report authored in whole or in part by a non-U.S. analyst and is made available in the U.S., the following are important disclosures regarding any non-U.S. analyst contributors:

The non-U.S. research analysts listed below (if any) are not registered/qualified as research analysts with FINRA. The non-U.S. research analysts listed below may not be associated persons of CSSU and therefore may not be subject to the NASD Rule 2711 and NYSE Rule 472 restrictions on communications with a subject company, public appearances and trading securities held by a research analyst account.

- Andrew M. Kuske, non-U.S. analyst, is a research analyst employed by Credit Suisse Securities (Canada), Inc..
- Paul Tan, non-U.S. analyst, is a research analyst employed by Credit Suisse Securities (Canada), Inc..

Disclaimers continue on next page.

This report is not directed to, or intended for distribution to or use by, any person or entity who is a citizen or resident of or located in any locality, state, country or other jurisdiction where such distribution, publication, availability or use would be contrary to law or regulation or which would subject Credit Suisse AG, the Swiss bank, or its subsidiaries or its affiliates ("CS") to any registration or licensing requirement within such jurisdiction. All material presented in this report, unless specifically indicated otherwise, is under copyright to CS. None of the material, nor its content, nor any copy of it, may be altered in any way, transmitted to, copied or distributed to any other party, without the prior express written permission of CS. All trademarks, service marks and logos used in this report are trademarks or service marks or registered trademarks or service marks of CS or its affiliates.

The information, tools and material presented in this report are provided to you for information purposes only and are not to be used or considered as an offer or the solicitation of an offer to sell or to buy or subscribe for securities or other financial instruments. CS may not have taken any steps to ensure that the securities referred to in this report are suitable for any particular investor. CS will not treat recipients as its customers by virtue of their receiving the report. The investments or services contained or referred to in this report may not be suitable for you and it is recommended that you consult an independent investment advisor if you are in doubt about such investments or investment services. Nothing in this report constitutes investment, legal, accounting or tax advice or a representation that any investment or strategy is suitable or appropriate to your individual circumstances or otherwise constitutes a personal recommendation to you. CS does not offer advice on the tax consequences of investment and you are advised to contact an independent tax adviser. Please note in particular that the bases and levels of taxation may change.

CS believes the information and opinions in the Disclosure Appendix of this report are accurate and complete. Information and opinions presented in the other sections of the report were obtained or derived from sources CS believes are reliable, but CS makes no representations as to their accuracy or completeness. Additional information is available upon request. CS accepts no liability for loss arising from the use of the material presented in this report, except that this exclusion of liability does not apply to the extent that liability arises under specific statutes or regulations applicable to CS. This report is not to be relied upon in substitution for the exercise of independent judgment. CS may have issued, and may in the future issue, a trading call regarding this security. Trading calls are short term trading opportunities based on market events and catalysts, while stock ratings reflect investment recommendations based on expected total return over a 12-month period as defined in the disclosure section. Because trading calls and stock ratings reflect different assumptions and analytical methods, trading calls may differ directionally from the stock rating. In addition, CS may have issued, and may in the future issue, other reports that are inconsistent with, and reach different conclusions from, the information presented in this report. Those reports reflect the different assumptions, views and analytical methods of the analysts who prepared them and CS is under no obligation to ensure that such other reports are brought to the attention of any recipient of this report. CS is involved in many businesses that relate to companies mentioned in this report. These businesses include specialized trading, risk arbitrage, market making, and other proprietary trading.

Past performance should not be taken as an indication or guarantee of future performance, and no representation or warranty, express or implied, is made regarding future performance. Information, opinions and estimates contained in this report reflect a judgement at its original date of publication by CS and are subject to change without notice. The price, value of and income from any of the securities or financial instruments mentioned in this report can fall as well as rise. The value of securities and financial instruments is subject to exchange rate fluctuation that may have a positive or adverse effect on the price or income of such securities or financial instruments. Investors in securities such as ADR's, the values of which are influenced by currency volatility, effectively assume this risk.

Structured securities are complex instruments, typically involve a high degree of risk and are intended for sale only to sophisticated investors who are capable of understanding and assuming the risks involved. The market value of any structured security may be affected by changes in economic, financial and political factors (including, but not limited to, spot and forward interest and exchange rates), time to maturity, market conditions and volatility, and the credit quality of any issuer or reference issuer. Any investor interested in purchasing a structured product should conduct their own investigation and analysis of the product and consult with their own professional advisers as to the risks involved in making such a purchase.

Some investments discussed in this report have a high level of volatility. High volatility investments may experience sudden and large falls in their value causing losses when that investment is realised. Those losses may equal your original investment. Indeed, in the case of some investments the potential losses may exceed the amount of initial investment, in such circumstances you may be required to pay more money to support those losses. Income yields from investments may fluctuate and, in consequence, initial capital paid to make the investment may be used as part of that income yield. Some investments may not be readily realisable and it may be difficult to sell or realise those investments, similarly it may prove difficult for you to obtain reliable information about the value, or risks, to which such an investment is exposed.

The regulatory march

- **Earnings review:** Fortis reported Q1 2012 headline EPS (FD) of C\$0.62, which missed our C\$0.68 and the Street's C\$0.67 view and at the low end of the C\$0.62-C\$0.69 range. In general, we believe Fortis is making steady progress in delivering consistent financial results from a largely regulated asset base. With the current regulatory process surrounding the CH Energy deal, we do not believe Fortis will be involved in major transactional activity until sometime after close. We do not place undue emphasis on quarterly results as a result of the inherently long-cycle nature of many assets.
- **Significant organic growth continues:** Fortis continues to provide a rather robust capital expenditure outlook with guidance of C\$1.3bn for 2012. Additionally, Fortis' 5-year capex outlook continues to stand at C\$5.5bn. Eighty-seven percent of that total amount is expected to go towards regulated utility activities that should deliver favourable risk adjusted returns.
- **Improving capital market conditions:** Historically, Fortis has been very adept at acquisitions. Corporate growth has benefited from the company's ability to successfully acquire and integrate selected assets. In our view, the company is well positioned in the current market for acquisition opportunities post completion of the CH Energy acquisition. The company stated, "We remain disciplined and patient in our pursuit of additional electric and gas utility acquisitions in the United States and Canada that will add value for Fortis shareholders".
- **Valuation:** Our C\$34 target price and Neutral rating are obtained utilizing multiple valuation approaches, including: an 18.5x P/E multiple of 2013 earnings; a 1.7x book value multiple; and, a DCF based valuation. We reiterate our Neutral rating.

DISCLOSURE APPENDIX CONTAINS ANALYST CERTIFICATIONS AND THE STATUS OF NON-US ANALYSTS. U.S. Disclosure: Credit Suisse does and seeks to do business with companies covered in its research reports. As a result, investors should be aware that the Firm may have a conflict of interest that could affect the objectivity of this report. Investors should consider this report as only a single factor in making their investment decision.

This research note is divided into three parts: (a) results; (b) outlook; and, (c) valuation. Each of these areas will be addressed in greater detail below.

Results

Exhibit 1 highlights the segmented unadjusted earnings contributions for the most recent quarter and for the comparable period one year ago. Our commentary for each segment appears under the various headings below.

Results missed our and the Street's estimate

Exhibit 1: Segmented unadjusted earnings contribution

C\$ in millions, unless otherwise stated

	Q1 2012	Q1 2011	chg y/y
Regulated Gas Utilities - Canadian	82	75	9%
Regulated Electric Utilities - Canadian	51	52	-2%
Regulated Electric Utilities - Caribbean	3	4	-25%
Non-regulated - Fortis Generation	5	3	67%
Non-regulated - Fortis Properties	1	1	0%
Corporate and other	(21)	(19)	-11%
Net earnings applicable to common shares	121	116	4%

Source: Company data and Credit Suisse

Regulated Gas Utilities - Canadian

The unadjusted earnings for this segment improved by roughly 9% year-over-year (see Exhibit 2). Some notable items for the regulated gas utilities include:

- Net customer additions were 1,000 during Q1 2012 versus net additions of 1,400 in Q1 2011;
- The amount of customer additions decreased versus Q1 2012 due to lower building activity; and,
- Sales volumes for the quarter decreased for the residential and commercial, industrial segments, while increased for the transportation segment.

Exhibit 2: Regulated Gas Utilities (unadjusted)

	Q1 2012	Q1 2011	chg y/y
FortisBC Energy	82.0	75.0	9%

Source: Company data and Credit Suisse

Regulated Electric Utilities – Canadian

This segment includes operating companies like FortisAlberta, FortisBC Electric, Newfoundland Power and Other Canadian Electric Utilities, which includes Maritime Electric and FortisOntario. Detailed contributions for each of these divisions can be found in Exhibit 3.

Exhibit 3: Regulated electric utilities – Canadian contribution (unadjusted)

C\$ in millions, unless otherwise stated

	Q1 2012	Q1 2011	chg y/y
FortisAlberta	21	21	0%
FortisBC Electric	16	19	-16%
Newfoundland Power	7	6	17%
Other Cdn Electric Utilities	7	6	17%
Earnings	51	52	-2%

Source: Company data and Credit Suisse

FortisAlberta

Earnings at this regulated utility were flat comparing Q1 2012 versus the prior period. See Exhibit 4 for selected highlights.

Slight increase in energy delivery in Alberta

Exhibit 4: Selected FortisAlberta performance highlights (unadjusted)

	Q1 2012	Q1 2011	chg y/y
Energy deliveries (GWh)	4,482	4,402	2%
Revenue (C\$/MWh)	24.10	22.72	6%
Operating expenses (C\$/MWh)	8.70	7.95	9%
Gross margin (C\$/MWh)	15.39	14.77	4%
Earnings (C\$millions)	21	21	0%

Source: Company data and Credit Suisse

FortisBC Electric

Segmented earnings at FortisBC Electric decreased by 16% compared to the same period last year. The decrease was due to increased operating expense, lower capitalized AFUDC and expiry of PBR mechanism on December 31, 2011.

Flat energy deliveries in BC

See Exhibit 5 for selected highlights.

Exhibit 5: Selected FortisBC Electric performance highlights (unadjusted)

	Q1 2012	Q1 2011	chg y/y
Energy deliveries (GWh)	909	905	0%
Revenue (C\$/MWh)	95.71	91.71	4%
Energy supply costs (C\$/MWh)	27.50	25.41	8%
Operating expenses (C\$/MWh)	23.10	19.89	16%
Gross margin (C\$/MWh)	45.10	46.41	-3%
Earnings (C\$millions)	16	19	-16%

Source: Company data and Credit Suisse

Newfoundland Power

This segment's earnings gained by 17% when comparing Q1 2012 versus Q1 2011. Higher electricity sales and lower effective corporate taxes led to result in higher earnings. Energy deliveries were up by approximately 4% (see Exhibit 6).

Increase in NP's energy deliveries

Exhibit 6: Selected Newfoundland Power performance highlights (unadjusted)

	Q1 2012	Q1 2011	chg y/y
Energy deliveries (GWh)	1,914	1,834	4%
Revenue (C\$/MWh)	100.31	99.78	1%
Energy supply costs (C\$/MWh)	74.19	73.06	2%
Operating expenses (C\$/MWh)	10.45	10.91	-4%
Gross margin (C\$/MWh)	15.67	15.81	-1%
Earnings (C\$millions)	7	6	17%

Source: Company data, Credit Suisse estimates

Other Canadian Electric Utilities

This segment's earning increased by 17% in Q1 2012 versus Q1 2011 primarily due to increased electricity sales on PEI and lower effective corporate income taxes. The energy deliveries for the period declined by 1% compared to Q1 2011. Exhibit 7 contains selected highlights.

Decrease in energy deliveries

Exhibit 7: Selected Other Canadian Electric Utilities performance highlights (unadjusted)

	Q1 2012	Q1 2011	chg y/y
Energy deliveries (GWh)	645	654	-1%
Revenue (C\$/MWh)	141.09	139.14	1%
Energy supply costs (C\$/MWh)	89.92	91.74	-2%
Operating expenses (C\$/MWh)	18.60	18.35	1%
Gross margin (C\$/MWh)	32.56	29.05	12%
Earnings (C\$millions)	7	6	17%

Source: Company data and Credit Suisse

Regulated Electric Utilities – Caribbean

This segment includes Belize Electricity (up to June 20, 2011), Caribbean Utilities, and Fortis Turks and Caicos. Earnings for this segment declined by 25% in Q1 2012 versus the same quarter last year. Energy deliveries declined 35% for several reasons. In our view, Belize Electricity was not overly material to Fortis. Additionally, we anticipate the dispute to be resolved in a rationale manner with Fortis recovering, at least, the rate base value. Yet, any such recovery may be over a period of time.

See Exhibit 8 below for selected highlights.

Exhibit 8: Caribbean - Regulated Electric Utilities performance highlights (unadjusted)

	Q1 2012	Q1 2011	chg y/y
Energy deliveries (GWh)	166	257	-35%
Revenue (C\$/MWh)	379.52	291.83	30%
Energy supply costs (C\$/MWh)	240.96	178.99	35%
Operating expenses (C\$/MWh)	48.19	42.80	13%
Gross margin (C\$/MWh)	90.36	70.04	29%
Earnings (C\$millions)	3	4	-25%

Source: Company data and Credit Suisse

Non-regulated – Fortis Generation

The non-regulated generation assets within this segment are located in Belize, British Columbia, Central Newfoundland, Ontario and Upper New York State. Earnings for the segment were up 67% in Q1 2012 compared to the same quarter last year. Energy deliveries increased by 16% from Q1 2011 to Q1 2012 due to increased production in Belize. Exhibit 9 provides selected highlights.

Exhibit 9: Non-regulated generation – selected highlights

	Q1 2012	Q1 2011	chg y/y
Energy deliveries (GWh)	88	76	16%
Revenue (C\$/MWh)	102.27	92.11	11%
Operating expenses (C\$/MWh)	34.09	39.47	-14%
Gross margin (C\$/MWh)	68.18	52.63	30%
Earnings (C\$millions)	5	3	67%

Source: Company data and Credit Suisse

Non-regulated – Fortis Properties

Fortis Properties' net unadjusted earning contribution remained flat during the quarter. REVPAR increased by 5% to C\$66.54 on a year over year comparison. While, the occupancy rate of the Real Estate Division was down by 2.1%.

Corporate

Corporate expenses increase by C\$2 million to C\$10 million in Q1 2012, when compared with last quarter during the same period.

Outlook

We continue to believe investor, whether existing or prospective, should consider several major issues, including (a) funding organic growth; and (b) acquisition trail. Each of these issues is addressed below.

Funding organic growth

In the most recent quarter the company's reported capital expenditures totaled C\$229 million, of which C\$176 million was spent at regulated utilities. Fortis guided that capital expenditures for 2012 will be roughly C\$1.3 billion. A majority of the total will be spent on Western Canadian assets (FortisBC Energy, FortisAlberta, and FortisBC Electric). Fortis' consolidated gross capital expenditures expectations over the 5 year plan (2012-2016) stood at C\$5.5bn with 87% of that total amount being allocated to regulated utilities. Both FortisAlberta and FortisBC Electric will receive the vast majority of that amount; whereas, the regulated gas utilities are planned to receive 23% of the total capex amount, and 13% is allocated to non-regulated operations. Given the regulated rates of return with utility capital expenditures, the increases should be viewed as longer-term positives provided an appropriate financial balance is struck.

Ongoing organic growth

With the significant current relative valuation advantages, we believe that Fortis may become more motivated to explore possible capital efficiency initiatives. In our view, the company possesses ample opportunities to become much more capital efficient. One strategy involves divesting certain non-utility assets and redeploying capital into utility assets or funding the capital program. Another option would entail divesting partial interests in selected utility assets in an asset management model approach and receiving a management fee.

In fact, some of the media reports prior to the official announcement of PPL Corporation's acquisition of E.ON's Kentucky utility assets for US\$7.625 billion stated that a consortium led by Fortis Inc. was one of three finalists for those assets. We would regard that type of information in media reports as being something akin to an asset management style of approach. Ultimately, we believe that such a strategy would help Fortis generate a higher level of returns. Additionally, the use of an asset management type approach would make large acquisitions which could potentially further accelerate growth.

Opportunities for improved capital efficiency

Generally, we continue to prefer pure-play utility companies without an undue amount of non-core asset exposure. Historically, non-core assets (especially real estate) have been somewhat commonplace for many utilities. Fortis has been no exception to that approach. Notably, the mix of commercial and hospitality real estate assets held by Fortis have been positive contributors and also provide the company a bit of financial flexibility for a selection of reasons. In light of current market conditions, we believe there is a much less compelling case for the monetization of these assets than as in the past. We note Fortis Properties continues to increase in scale and scope which may eventually make it more attractive for acquisition or monetization. Yet, for a number of reasons, we continue to believe there is a rather low probability of either of those events occurring.

Even discounting the potential monetization of assets that we would consider to be non-core, we believe Fortis possesses considerable potential to become much more capital efficient. Given the significant interest in infrastructure assets by many investors seeking long-dated types of return, Fortis could easily divest portions of its existing asset base to pension fund investors and charge a management fee for their operational and management expertise. This type of approach could significantly improve capital efficiency and returns on capital. In addition, this asset management approach could also free-up capital that could be used to fund the existing capital program or fund future acquisitions.

Capital efficiency initiatives could aid funding of acquisitions or the existing capital program funding

Acquisition trail

In our view, Fortis continues to demonstrate a rather impressive ability to successfully integrate acquisitions. Additionally, we view acquisitions as somewhat central to the

company's growth strategy. Fortis is currently working towards to complete its acquisition of CH Energy Group (see "Acquiring American assets" on 21 February 2012), which it expects to occur by the end of Q1 2013. We view Fortis management to continue to look to further grow in the US. The company's most recent Management Discussion and Analysis stated "We remain disciplined and patient in our pursuit of additional electric and gas utility acquisitions in the United States and Canada that will add value for Fortis shareholders". Fortis showed discipline in its acquisition strategy by not competing in a bidding war for Central Vermont Service Corp. The company received a C\$17m termination fee. For further details see "A positive pass" published on 12 July 2011.

Given the success of Fortis in past transactions, as measured in terms of financials, share price and operationally, we believe the company's current valuation and skill set may lead to some potentially value creating acquisition activity (see Exhibit 10 below for select Fortis M&A transactions).

Exhibit 10: Selected Fortis M&A transactions

\$ in millions, unless otherwise stated

Announced Date	Asset/Company	Deal value (\$m)	Comment
2/21/2012	CH Energy Group	USD 1,500.00	Pending acquisition of NY State electric utility
7/22/2009	Caribbean Utilities Co.	CAD 6.74	Acquired an additional 2.7% of Caribbean Utilities Co.
6/23/2009	Great Lakes Power Distribution	CAD 68.00	Acquired from Brookfield the utility that serves the District of Algoma in northern Ontario.
10/1/2008	Grimsby Power Inc.	CAD 1.10	Acquired a 10% minority interest.
10/1/2008	Caribbean Utilities Co.	CAD 3.00	Acquired an additional 1% of Caribbean Utilities Co.
8/15/2008	Caribbean Utilities Co.	CAD 25.00	Acquired an additional 2% of Caribbean Utilities Co.
7/23/2007	Delta Regina	CAD 49.95	Delta hotel located in Regina, Saskatchewan.
2/26/2007	Terasen Inc.	CAD 3,700.00	Gas distribution in British Columbia.
11/7/2006	Caribbean Utilities Co.	CAD 55.70	Acquired an additional 16% of Caribbean Utilities Co.
10/19/2006	4 hotels in western Canada	CAD 51.60	4 hotels (Holiday Inn, Best Western and Ramada) located in BC and Alberta.

8/31/1999	Brunswick Square Ltd.	CAD 10.12	Acquired 50% of the company by Fortis Properties.
1/31/1999	Mount Peyton	CAD 2.20	Acquired all common shares and notes payable.
	Total USD	USD 1,565.50	
	Total CAD	CAD 6,214.48	

Source: Bloomberg, Company data and Credit Suisse

In terms of acquisitions, we believe Fortis has a few advantages over others, including:

- Fortis has growing expertise with both electric and gas utilities;
- Larger size will allow it to look at a larger spectrum of potential target companies;
- A proven ability to effectively integrate acquisitions;
- A rather strong appetite for yield oriented securities in Canada;
- The potential ability to support a transaction with pension fund capital;
- Canada's rather benign interest rate environment; and,
- Bought deal financing commonly employed in Canada.

Fortis possesses a number of absolute and relative advantages over some other competitors

Historically, Fortis has been very adept at acquisitions. Corporate growth has benefited from the company's ability to successfully acquire and integrate selected assets.

Valuation

We continue to believe that Fortis has strong organic growth in key areas such as British Columbia, Alberta and the Caribbean. In our view, the company faces a delicate balance of capital investment opportunities and cash flow needs. After the quarter, we revised our EPS estimates for 2012 to C\$1.72 from C\$1.76. Our Neutral rating and C\$34.00 target price is obtained from multiple valuation approaches, including: a 18.5x P/E multiple of 2013 earnings; a 1.7x book value multiple; and, a DCF based valuation. We reiterate our Neutral rating. Some historical Fortis valuation parameters appear in Exhibit 11 below generated by Credit Suisse RAVE.

Rating: Neutral

Target: C\$34

Exhibit 11: Fortis historical valuation

3-Year Price, Target Price and Rating Change History Chart for FTS.TO

The analyst(s) responsible for preparing this research report received compensation that is based upon various factors including Credit Suisse's total revenues, a portion of which are generated by Credit Suisse's investment banking activities.

Analysts' stock ratings are defined as follows:

Outperform (O): The stock's total return is expected to outperform the relevant benchmark* by at least 10-15% (or more, depending on perceived risk) over the next 12 months.

Neutral (N): The stock's total return is expected to be in line with the relevant benchmark* (range of $\pm 10-15\%$) over the next 12 months.

Underperform (U): The stock's total return is expected to underperform the relevant benchmark* by 10-15% or more over the next 12 months.

*Relevant benchmark by region: As of 29th May 2009, Australia, New Zealand, U.S. and Canadian ratings are based on (1) a stock's absolute total return potential to its current share price and (2) the relative attractiveness of a stock's total return potential within an analyst's coverage universe**, with Outperforms representing the most attractive, Neutrals the less attractive, and Underperforms the least attractive investment opportunities. Some U.S. and Canadian ratings may fall outside the absolute total return ranges defined above, depending on market conditions and industry factors. For Latin American, Japanese, and non-Japan Asia stocks, ratings are based on a stock's total return relative to the average total return of the relevant country or regional benchmark; for European stocks, ratings are based on a stock's total return relative to the analyst's coverage universe**. For Australian and New Zealand stocks, 12-month rolling yield is incorporated in the absolute total return calculation and a 15% and a 7.5% threshold replace the 10-15% level in the Outperform and Underperform stock rating definitions, respectively. The 15% and 7.5% thresholds replace the +10-15% and -10-15% levels in the Neutral stock rating definition, respectively.

**An analyst's coverage universe consists of all companies covered by the analyst within the relevant sector.

Restricted (R): In certain circumstances, Credit Suisse policy and/or applicable law and regulations preclude certain types of communications, including an investment recommendation, during the course of Credit Suisse's engagement in an investment banking transaction and in certain other circumstances.

Volatility Indicator [V]: A stock is defined as volatile if the stock price has moved up or down by 20% or more in a month in at least 8 of the past 24 months or the analyst expects significant volatility going forward.

Analysts' coverage universe weightings are distinct from analysts' stock ratings and are based on the expected performance of an analyst's coverage universe* versus the relevant broad market benchmark**:

Overweight: Industry expected to outperform the relevant broad market benchmark over the next 12 months.

Market Weight: Industry expected to perform in-line with the relevant broad market benchmark over the next 12 months.

Underweight: Industry expected to underperform the relevant broad market benchmark over the next 12 months.

*An analyst's coverage universe consists of all companies covered by the analyst within the relevant sector.

**The broad market benchmark is based on the expected return of the local market index (e.g., the S&P 500 in the U.S.) over the next 12 months.

Credit Suisse's distribution of stock ratings (and banking clients) is:

Global Ratings Distribution		
Outperform/Buy*	47%	(59% banking clients)
Neutral/Hold*	41%	(57% banking clients)
Underperform/Sell*	10%	(52% banking clients)

Restricted

2%

**For purposes of the NYSE and NASD ratings distribution disclosure requirements, our stock ratings of Outperform, Neutral, and Underperform most closely correspond to Buy, Hold, and Sell, respectively; however, the meanings are not the same, as our stock ratings are determined on a relative basis. (Please refer to definitions above.) An investor's decision to buy or sell a security should be based on investment objectives, current holdings, and other individual factors.*

Price Target: (12 months) for (FTS.TO)

Method: We obtain our C\$34.00 target price for Fortis Inc. by using multiple valuation methodologies, yield base analysis, and discounted cash flow, all of which produce the C\$34.00 target. Our target price implies a P/E (price/earnings) multiple of 18.5x our 2013 EPS (earnings per share) estimate of C\$1.85 and an EV/EBITDA (enterprise value/earnings before interest, taxes, depreciation, and amortization) multiple of 10.3x our EBITDA estimate.

Risks: There are a number of risks to Fortis' achievement of our C\$34.00 target price: commodity prices; weather; environmental; regulatory; access to capital markets; and, interest rates. Moreover, one should never underestimate the power of the regulator in any regulated business.

Please refer to the firm's disclosure website at www.credit-suisse.com/researchdisclosures for the definitions of abbreviations typically used in the target price method and risk sections.

See the Companies Mentioned section for full company names.

The subject company (FTS.TO) currently is, or was during the 12-month period preceding the date of distribution of this report, a client of Credit Suisse.

Credit Suisse provided investment banking services to the subject company (FTS.TO) within the past 12 months.

Credit Suisse provided non-investment banking services, which may include Sales and Trading services, to the subject company (FTS.TO) within the past 12 months.

This report is not directed to, or intended for distribution to or use by, any person or entity who is a citizen or resident of or located in any locality, state, country or other jurisdiction where such distribution, publication, availability or use would be contrary to law or regulation or which would subject Credit Suisse AG, the Swiss bank, or its subsidiaries or its affiliates ("CS") to any registration or licensing requirement within such jurisdiction. All material presented in this report, unless specifically indicated otherwise, is under copyright to CS. None of the material, nor its content, nor any copy of it, may be altered in any way, transmitted to, copied or distributed to any other party, without the prior express written permission of CS. All trademarks, service marks and logos used in this report are trademarks or service marks or registered trademarks or service marks of CS or its affiliates.

The information, tools and material presented in this report are provided to you for information purposes only and are not to be used or considered as an offer or the solicitation of an offer to sell or to buy or subscribe for securities or other financial instruments. CS may not have taken any steps to ensure that the securities referred to in this report are suitable for any particular investor. CS will not treat recipients as its customers by virtue of their receiving the report. The investments or services contained or referred to in this report may not be suitable for you and it is recommended that you consult an independent investment advisor if you are in doubt about such investments or investment services. Nothing in this report constitutes investment, legal, accounting or tax advice or a representation that any investment or strategy is suitable or appropriate to your individual circumstances or otherwise constitutes a personal recommendation to you. CS does not offer advice on the tax consequences of investment and you are advised to contact an independent tax adviser. Please note in particular that the bases and levels of taxation may change.

CS believes the information and opinions in the Disclosure Appendix of this report are accurate and complete. Information and opinions presented in the other sections of the report were obtained or derived from sources CS believes are reliable, but CS makes no representations as to their accuracy or completeness. Additional information is available upon request. CS accepts no liability for loss arising from the use of the material presented in this report, except that this exclusion of liability does not apply to the extent that liability arises under specific statutes or regulations applicable to CS. This report is not to be relied upon in substitution for the exercise of independent judgment. CS may have issued, and may in the future issue, a trading call regarding this security. Trading calls are short term trading opportunities based on market events and catalysts, while stock ratings reflect investment recommendations based on expected total return over a 12-month period as defined in the disclosure section. Because trading calls and stock ratings reflect different assumptions and analytical methods, trading calls may differ directionally from the stock rating. In addition, CS may have issued, and may in the future issue, other reports that are inconsistent with, and reach different conclusions from, the information presented in this report. Those reports reflect the different assumptions, views and analytical methods of the analysts who prepared them and CS is under no obligation to ensure that such other reports are brought to the attention of any recipient of this report. CS is involved in many businesses that relate to companies mentioned in this report. These businesses include specialized trading, risk arbitrage, market making, and other proprietary trading.

Past performance should not be taken as an indication or guarantee of future performance, and no representation or warranty, express or implied, is made regarding future performance. Information, opinions and estimates contained in this report reflect a judgement at its original date of publication by CS and are subject to change without notice. The price, value of and income from any of the securities or financial instruments mentioned in this report can fall as well as rise. The value of securities and financial instruments is subject to exchange rate fluctuation that may have a positive or adverse effect on the price or income of such securities or financial instruments. Investors in securities such as ADR's, the values of which are influenced by currency volatility, effectively assume this risk.

Structured securities are complex instruments, typically involve a high degree of risk and are intended for sale only to sophisticated investors who are capable of understanding and assuming the risks involved. The market value of any structured security may be affected by changes in economic, financial and political factors (including, but not limited to, spot and forward interest and exchange rates), time to maturity, market conditions and volatility, and the credit quality of any issuer or reference issuer. Any investor interested in purchasing a structured product should conduct their own investigation and analysis of the product and consult with their own professional advisers as to the risks involved in making such a purchase.

Some investments discussed in this report have a high level of volatility. High volatility investments may experience sudden and large falls in their value causing losses when that investment is realised. Those losses may equal your original investment. Indeed, in the case of some investments the potential losses may exceed the amount of initial investment, in such circumstances you may be required to pay more money to support those losses. Income yields from investments may fluctuate and, in consequence, initial capital paid to make the investment may be used as part of that income yield. Some investments may not be readily realisable and it may be difficult to sell or realise those investments, similarly it may prove difficult for you to obtain reliable information about the value, or risks, to which such an investment is exposed.

COMPANY UPDATE

Finalizing funding for CH

- **Funding announcement:** Fortis Inc. announced an underwriter agreement for an 18.5m subscription receipt bought deal at C\$32.50 (~1.8% discount to the share price prior to announcement). Gross proceeds equate to roughly C\$601m before the 2.775m over-allotment option (C\$691m with the exercise of that option). As largely expected, the net proceeds will be used to fund a portion of the previously announced CH Energy Group Inc. acquisition for roughly US\$1.5 billion. Unlike some other offerings in the market, we believe this deal is likely better placed for a variety of reasons. Given the offering and some other factors, we believe the stock is likely to be somewhat range-bound until the closing of the acquisition.
- **Transaction timing:** Fortis expects the offering to close on or about 27 June 2012. Additionally, the company continues to expect the CH deal closes by the end of Q1 2013. In our view, Fortis will continue to be acquisitive and is well positioned to benefit from potential North American asset sales from selected Spanish companies (see the 23 April note for details).
- **Improving capital market conditions:** Historically, Fortis has been very adept at acquisitions. After the closing of the CH deal, we believe FTS is well positioned for additional opportunities. Fortis stated, "We remain disciplined and patient in our pursuit of additional electric and gas utility acquisitions in the United States and Canada that will add value for Fortis shareholders."
- **Valuation:** Our C\$34 target price and Neutral rating are obtained utilizing multiple valuation approaches, including: an 18.5x P/E multiple of 2013 earnings; a 1.7x book value multiple; and, a DCF-based valuation. We reiterate our Neutral rating.

3-Year Price, Target Price and Rating Change History Chart for FTS.TO

FTS.TO	Closing Price	Target Price	Initiation/
Date	(C\$)	(C\$)	Rating Assumption
1/25/10	28.5	30	
11/8/10	33.6	32	
2/10/11	33.81	34	
8/3/11	31.37		O
9/28/11	33.08		N

The analyst(s) responsible for preparing this research report received compensation that is based upon various factors including Credit Suisse's total revenues, a portion of which are generated by Credit Suisse's investment banking activities.

Analysts' stock ratings are defined as follows:

Outperform (O): The stock's total return is expected to outperform the relevant benchmark* by at least 10-15% (or more, depending on perceived risk) over the next 12 months.

Neutral (N): The stock's total return is expected to be in line with the relevant benchmark* (range of $\pm 10-15\%$) over the next 12 months.

Underperform (U): The stock's total return is expected to underperform the relevant benchmark* by 10-15% or more over the next 12 months.

*Relevant benchmark by region: As of 29th May 2009, Australia, New Zealand, U.S. and Canadian ratings are based on (1) a stock's absolute total return potential to its current share price and (2) the relative attractiveness of a stock's total return potential within an analyst's coverage universe**, with Outperforms representing the most attractive, Neutrals the less attractive, and Underperforms the least attractive investment opportunities. Some U.S. and Canadian ratings may fall outside the absolute total return ranges defined above, depending on market conditions and industry factors. For Latin American, Japanese, and non-Japan Asia stocks, ratings are based on a stock's total return relative to the average total return of the relevant country or regional benchmark; for European stocks, ratings are based on a stock's total return relative to the analyst's coverage universe**. For Australian and New Zealand stocks, 12-month rolling yield is incorporated in the absolute total return calculation and a 15% and a 7.5% threshold replace the 10-15% level in the Outperform and Underperform stock rating definitions, respectively. The 15% and 7.5% thresholds replace the +10-15% and -10-15% levels in the Neutral stock rating definition, respectively.

**An analyst's coverage universe consists of all companies covered by the analyst within the relevant sector.

Restricted (R): In certain circumstances, Credit Suisse policy and/or applicable law and regulations preclude certain types of communications, including an investment recommendation, during the course of Credit Suisse's engagement in an investment banking transaction and in certain other circumstances.

Volatility Indicator [V]: A stock is defined as volatile if the stock price has moved up or down by 20% or more in a month in at least 8 of the past 24 months or the analyst expects significant volatility going forward.

Analysts' coverage universe weightings are distinct from analysts' stock ratings and are based on the expected performance of an analyst's coverage universe* versus the relevant broad market benchmark**:

Overweight: Industry expected to outperform the relevant broad market benchmark over the next 12 months.

Market Weight: Industry expected to perform in-line with the relevant broad market benchmark over the next 12 months.

Underweight: Industry expected to underperform the relevant broad market benchmark over the next 12 months.

*An analyst's coverage universe consists of all companies covered by the analyst within the relevant sector.

**The broad market benchmark is based on the expected return of the local market index (e.g., the S&P 500 in the U.S.) over the next 12 months.

Credit Suisse's distribution of stock ratings (and banking clients) is:

Global Ratings Distribution		
Outperform/Buy*	48%	(59% banking clients)
Neutral/Hold*	41%	(56% banking clients)
Underperform/Sell*	9%	(51% banking clients)
Restricted	2%	

*For purposes of the NYSE and NASD ratings distribution disclosure requirements, our stock ratings of Outperform, Neutral, and Underperform most closely correspond to Buy, Hold, and Sell, respectively; however, the meanings are not the same, as our stock ratings are determined on a relative basis. (Please refer to definitions above.) An investor's decision to buy or sell a security should be based on investment objectives, current holdings, and other individual factors.

Credit Suisse's policy is to update research reports as it deems appropriate, based on developments with the subject company, the sector or the market that may have a material impact on the research views or opinions stated herein.

Credit Suisse's policy is only to publish investment research that is impartial, independent, clear, fair and not misleading. Credit Suisse does not provide any tax advice. Any statement herein regarding any US federal tax is not intended or written to be used, and cannot be used, by any taxpayer for the purposes of avoiding any penalties.

See the Companies Mentioned section for full company names.

Price Target: (12 months) for (FTS.TO)

Method: We obtain our C\$34.00 target price for Fortis Inc. by using multiple valuation methodologies, yield base analysis, and discounted cash flow, all of which produce the C\$34.00 target. Our target price implies a P/E (price/earnings) multiple of 18.5x our 2013 EPS (earnings per share) estimate of C\$1.85 and an EV/EBITDA (enterprise value/earnings before interest, taxes, depreciation, and amortization) multiple of 10.3x our EBITDA estimate.

Risks: There are a number of risks to Fortis' achievement of our C\$34.00 target price: commodity prices; weather; environmental; regulatory; access to capital markets; and, interest rates. Moreover, one should never underestimate the power of the regulator in any regulated business.

Please refer to the firm's disclosure website at www.credit-suisse.com/researchdisclosures for the definitions of abbreviations typically used in the target price method and risk sections.

See the Companies Mentioned section for full company names.

Disclaimers continue on next page.

This report is not directed to, or intended for distribution to or use by, any person or entity who is a citizen or resident of or located in any locality, state, country or other jurisdiction where such distribution, publication, availability or use would be contrary to law or regulation or which would subject Credit Suisse AG, the Swiss bank, or its subsidiaries or its affiliates ("CS") to any registration or licensing requirement within such jurisdiction. All material presented in this report, unless specifically indicated otherwise, is under copyright to CS. None of the material, nor its content, nor any copy of it, may be altered in any way, transmitted to, copied or distributed to any other party, without the prior express written permission of CS. All trademarks, service marks and logos used in this report are trademarks or service marks or registered trademarks or service marks of CS or its affiliates.

The information, tools and material presented in this report are provided to you for information purposes only and are not to be used or considered as an offer or the solicitation of an offer to sell or to buy or subscribe for securities or other financial instruments. CS may not have taken any steps to ensure that the securities referred to in this report are suitable for any particular investor. CS will not treat recipients as its customers by virtue of their receiving the report. The investments or services contained or referred to in this report may not be suitable for you and it is recommended that you consult an independent investment advisor if you are in doubt about such investments or investment services. Nothing in this report constitutes investment, legal, accounting or tax advice or a representation that any investment or strategy is suitable or appropriate to your individual circumstances or otherwise constitutes a personal recommendation to you. CS does not offer advice on the tax consequences of investment and you are advised to contact an independent tax adviser. Please note in particular that the bases and levels of taxation may change.

CS believes the information and opinions in the Disclosure Appendix of this report are accurate and complete. Information and opinions presented in the other sections of the report were obtained or derived from sources CS believes are reliable, but CS makes no representations as to their accuracy or completeness. Additional information is available upon request. CS accepts no liability for loss arising from the use of the material presented in this report, except that this exclusion of liability does not apply to the extent that liability arises under specific statutes or regulations applicable to CS. This report is not to be relied upon in substitution for the exercise of independent judgment. CS may have issued, and may in the future issue, a trading call regarding this security. Trading calls are short term trading opportunities based on market events and catalysts, while stock ratings reflect investment recommendations based on expected total return over a 12-month period as defined in the disclosure section. Because trading calls and stock ratings reflect different assumptions and analytical methods, trading calls may differ directionally from the stock rating. In addition, CS may have issued, and may in the future issue, other reports that are inconsistent with, and reach different conclusions from, the information presented in this report. Those reports reflect the different assumptions, views and analytical methods of the analysts who prepared them and CS is under no obligation to ensure that such other reports are brought to the attention of any recipient of this report. CS is involved in many businesses that relate to companies mentioned in this report. These businesses include specialized trading, risk arbitrage, market making, and other proprietary trading.

Past performance should not be taken as an indication or guarantee of future performance, and no representation or warranty, express or implied, is made regarding future performance. Information, opinions and estimates contained in this report reflect a judgement at its original date of publication by CS and are subject to change without notice. The price, value of and income from any of the securities or financial instruments mentioned in this report can fall as well as rise. The value of securities and financial instruments is subject to exchange rate fluctuation that may have a positive or adverse effect on the price or income of such securities or financial instruments. Investors in securities such as ADR's, the values of which are influenced by currency volatility, effectively assume this risk.

Structured securities are complex instruments, typically involve a high degree of risk and are intended for sale only to sophisticated investors who are capable of understanding and assuming the risks involved. The market value of any structured security may be affected by changes in economic, financial and political factors (including, but not limited to, spot and forward interest and exchange rates), time to maturity, market conditions and volatility, and the credit quality of any issuer or reference issuer. Any investor interested in purchasing a structured product should conduct their own investigation and analysis of the product and consult with their own professional advisers as to the risks involved in making such a purchase.

Some investments discussed in this report have a high level of volatility. High volatility investments may experience sudden and large falls in their value causing losses when that investment is realised. Those losses may equal your original investment. Indeed, in the case of some investments the potential losses may exceed the amount of initial investment, in such circumstances you may be required to pay more money to support those losses. Income yields from investments may fluctuate and, in consequence, initial capital paid to make the investment may be used as part of that income yield. Some investments may not be readily realisable and it may be difficult to sell or realise those investments, similarly it may prove difficult for you to obtain reliable information about the value, or risks, to which such an investment is exposed.

Upgrade to Outperform; acquisitions on the sidelines with CH Energy regulatory process

- **Upgrade to Outperform:** We upgrade Fortis to Outperform from our prior Neutral rating and boost our target price to C\$38 from the previous C\$34. In historical terms, Fortis is trading more than 200 bps wide of the 10-year yield spread average. That value combined with completion of the CH Energy deal funding, along with other acquisitions being more distant in time, provides the rationale for the upgrade. Additionally, those factors are also supported by the prolonged low interest rate environment further benefitting the corporate valuation.
- **Transaction timing:** Fortis expects the CH Energy deal to close by the end of Q1 2013. In our view, Fortis will largely be on the sidelines from the M&A market until this deal officially closes with the necessary regulatory approvals. Therefore, we do not expect a typical acquisition overhang to surround the potential deal-making activities of the stock. Yet, we believe a greater focus on the potential of CH, among other prospects, will come into the stock over the next few quarters.
- **Improving capital market conditions:** Historically, Fortis has been very adept at acquisitions. After the closing of the CH deal, we believe FTS is well positioned for additional opportunities. Fortis recently stated, "We remain disciplined and patient in our pursuit of additional electric and gas utility acquisitions in the United States and Canada that will add value for Fortis shareholders".
- **Valuation:** We obtain our revised C\$38 target price (up from the prior C\$34) from multiple valuation methods, but we primarily rely upon a targeted dividend yield of 3.25%. We upgrade Fortis to Outperform.

FORECAST INCREASE

A British Columbia Bolt On

- **Earnings review:** Fortis reported Q2 2012 headline EPS (FD) of C\$0.33, which was ahead of our C\$0.32 and inline with the Street's C\$0.33 view and within the C\$0.32-C\$0.34 range. In general, we believe Fortis continues to deliver rather consistent financial results from a largely regulated asset base. With the current regulatory process surrounding the CH Energy deal, we do not believe Fortis will be involved in major transactional activity until sometime after close. Notably, FTS announced negotiations for the Kelowna, BC electricity utility's ownership that is already operated by the company's BC-based business. We do not place undue emphasis on quarterly results as a result of the inherently long-cycle nature of many assets.
- **Significant organic growth continues:** Fortis continues to provide a rather robust capital expenditure outlook with guidance of C\$1.3bn for 2012. Additionally, Fortis' 5-year capex outlook continues to stand at C\$5.5bn. Eighty-six percent of that total amount is expected to go towards regulated utility activities that should deliver favourable risk adjusted returns.
- **Improving capital market conditions:** A large part of corporate growth has come from successfully acquiring and integrating assets. In our view, Fortis is well positioned in the current market for acquisition opportunities post completion of the CH Energy acquisition. FTS stated, "[w]e remain disciplined and patient in our pursuit of additional electric and gas utility acquisitions in the United States and Canada that will add value for Fortis shareholders".
- **Valuation:** We obtain our C\$38 target price from multiple valuation methods, but primarily rely upon a targeted dividend yield of 3.25%. We maintain our Outperform rating.

Investors should consider this report as only a single factor in making their investment decision.

This research note is divided into three parts: (a) results; (b) outlook; and, (c) valuation. Each of these areas will be addressed in greater detail below.

Results

Exhibit 1 highlights the segmented unadjusted earnings contributions for the most recent quarter and for the comparable period one year ago. Our commentary for each segment appears under the various headings below.

Results surpassed our estimate

Exhibit 1: Segmented unadjusted earnings contribution

C\$ in millions, unless otherwise stated

	Q2 2012	Q2 2011	chg y/y
Regulated Gas Utilities - Canadian	13	15	-13%
Regulated Electric Utilities - Canadian	52	43	21%
Regulated Electric Utilities - Caribbean	6	6	0%
Non-regulated - Fortis Generation	5	2	150%
Non-regulated - Fortis Properties	8	8	0%
Corporate and other	(22)	(17)	-29%
Net earnings applicable to common shares	62	57	9%

Source: Company data and Credit Suisse

Regulated Gas Utilities - Canadian

The unadjusted earnings for this segment decreased by roughly 13% year-over-year (see Exhibit 2). Some notable items for the regulated gas utilities include:

- Sales volumes for the quarter decreased for the residential and commercial, industrial segments, while there was a slight increase for the transportation segment.

Exhibit 2: Regulated Gas Utilities (unadjusted)

	Q2 2012	Q2 2011	chg y/y
FortisBC Energy	13.0	15.0	-13%

Slight increase in energy delivery in Alberta

FortisBC Electric

Segmented earnings at FortisBC Electric remained flat compared to the same period last year.

See Exhibit 5 for selected highlights.

Slight decrease in energy deliveries in BC

Exhibit 5: Selected FortisBC Electric performance highlights (unadjusted)

	Q2 2012	Q2 2011	chg y/y
Energy deliveries (GWh)	676	682	-1%
Revenue (C\$/MWh)	99.11	95.31	4%
Energy supply costs (C\$/MWh)	19.23	16.13	19%
Operating expenses (C\$/MWh)	31.07	30.79	1%
Gross margin (C\$/MWh)	48.82	48.39	1%
Earnings (C\$millions)	9	9	0%

Source: Company data and Credit Suisse

Newfoundland Power

This segment's earnings gained by 20% when comparing Q2 2012 versus Q2 2011. Higher ROE and lower effective corporate taxes led to result in higher earnings. Energy deliveries were down by approximately 1% (see Exhibit 6).

Slight decrease in NP's energy deliveries

Exhibit 6: Selected Newfoundland Power performance highlights (unadjusted)

	Q2 2012	Q2 2011	chg y/y
Energy deliveries (GWh)	1,259	1,269	-1%
Revenue (C\$/MWh)	103.26	104.81	-1%
Energy supply costs (C\$/MWh)	61.95	63.04	-2%

Earnings (C\$millions)	12	10	20%

Source: Company data, Credit Suisse estimates

Other Canadian Electric Utilities

This segment's earning decreased by roughly 17% in Q2 2012 versus Q2 2011 primarily due to increased operating expenses at FortisOntario. The energy deliveries for the period were flat compared to Q2 2011. Exhibit 7 contains selected highlights.

Flat energy deliveries

Exhibit 7: Selected Other Canadian Electric Utilities performance highlights (unadjusted)

Regulated Electric Utilities – Caribbean

This segment includes Belize Electricity (up to June 20, 2011), Caribbean Utilities, and Fortis Turks and Caicos. Earnings for this segment were flat in Q2 2012 versus the same quarter last year. Energy deliveries declined 52% for several reasons. In our view, Belize Electricity was not overly material to Fortis. Additionally, we anticipate the dispute to be resolved in a rational manner with Fortis recovering, at least, the rate base value. Yet, any such recovery may be over a period of time.

See Exhibit 8 below for selected highlights.

Exhibit 8: Caribbean - Regulated Electric Utilities performance highlights (unadjusted)

	Q2 2012	Q2 2011	chg y/y
Energy deliveries (GWh)	184	383	-52%
Revenue (C\$/MWh)	364.13	221.93	64%
Energy supply costs (C\$/MWh)	211.96	138.38	53%
Operating expenses (C\$/MWh)	48.91	28.72	70%
Gross margin (C\$/MWh)	103.26	54.83	88%
Earnings (C\$millions)	6	6	0%

Source: Company data and Credit Suisse

Non-regulated – Fortis Generation

The non-regulated generation assets within this segment are located in Belize, British Columbia, Central Newfoundland, Ontario and Upper New York State. Earnings for the segment were up 150% in Q2 2012 compared to the same quarter last year. Energy deliveries decreased by 3% from Q2 2011 to Q2 2012 due to decreased production in Upstate New York and in Ontario. Exhibit 9 provides selected highlights.

Exhibit 9: Non-regulated generation – selected highlights

	Q2 2012	Q2 2011	chg y/y
Energy deliveries (GWh)	87	90	-3%
Revenue (C\$/MWh)	103.45	77.78	33%
Energy supply costs (C\$/MWh)	11.49	11.11	n/a
Operating expenses (C\$/MWh)	11.49	11.11	3%
Gross margin (C\$/MWh)	80.46	55.56	45%
Earnings (C\$millions)	5	2	150%

Source: Company data and Credit Suisse

Non-regulated – Fortis Properties

Fortis Properties' net unadjusted earning contribution remained flat during the quarter. REVPAR increased by 2.4% to C\$85.56 on a year over year comparison. While, the occupancy rate of the Real Estate Division was down by 2.0%.

Corporate

Corporate expenses increase by C\$5 million to C\$22 million in Q2 2012, when compared with last quarter during the same period.

Outlook

We continue to believe investors, whether existing or prospective, should consider several major issues, including (a) funding organic growth; and (b) acquisition trail. Each of these issues is addressed below.

Funding organic growth

In the most recent quarter the company's reported capital expenditures totaled C\$282 million, of which C\$215 million was spent at regulated utilities. Fortis guided that capital expenditures for 2012 will be roughly C\$1.3 billion. A majority of the total will be spent on

Ongoing organic growth

Western Canadian assets (FortisBC Energy, FortisAlberta, and FortisBC Electric). Fortis' consolidated gross capital expenditures expectations over the 5 year plan (2012-2016) stood at C\$5.5bn with 86% of that total amount being allocated to regulated utilities. Both FortisAlberta and FortisBC Electric will receive the vast majority of that amount; whereas, the regulated gas utilities are planned to receive 21% of the total capex amount, and 14% is allocated to non-regulated operations. Given the regulated rates of return with utility capital expenditures, the increases should be viewed as longer-term positives provided an appropriate financial balance is struck.

With the significant current relative valuation advantages, we believe that Fortis may become more motivated to explore possible capital efficiency initiatives. In our view, the company possesses ample opportunities to become much more capital efficient. One strategy involves divesting certain non-utility assets and redeploying capital into utility assets or funding the capital program. Another option would entail divesting partial interests in selected utility assets in an asset management model approach and receiving a management fee.

In fact, some of the media reports prior to the official announcement of PPL Corporation's acquisition of E.ON's Kentucky utility assets for US\$7.625 billion stated that a consortium led by Fortis Inc. was one of three finalists for those assets. We would regard that type of information in media reports as being something akin to an asset management style of approach. Ultimately, we believe that such a strategy would help Fortis generate a higher level of returns. Additionally, the use of an asset management type approach would make large acquisitions which could potentially further accelerate growth.

Opportunities for improved capital efficiency

Generally, we continue to prefer pure-play utility companies without an undue amount of non-core asset exposure. Historically, non-core assets (especially real estate) have been somewhat commonplace for many utilities. Fortis has been no exception to that approach. Notably, the mix of commercial and hospitality real estate assets held by Fortis have been positive contributors and also provide the company a bit of financial flexibility for a selection of reasons. In light of current market conditions, we believe there is a much less compelling case for the monetization of these assets than as in the past. We note Fortis Properties continues to increase in scale and scope which may eventually make it more attractive for acquisition or monetization. Yet, for a number of reasons, we continue to believe there is a rather low probability of either of those events occurring.

Even discounting the potential monetization of assets that we would consider to be non-core, we believe Fortis possesses considerable potential to become much more capital efficient. Given the significant interest in infrastructure assets by many investors seeking long-dated types of return, Fortis could easily divest portions of its existing asset base to pension fund investors and charge a management fee for their operational and management expertise. This type of approach could significantly improve capital efficiency and returns on capital. In addition, this asset management approach could also free-up capital that could be used to fund the existing capital program or fund future acquisitions.

Capital efficiency initiatives could aid funding of acquisitions or the existing capital program funding

Acquisition trail

In our view, Fortis continues to demonstrate a rather impressive ability to successfully integrate acquisitions. Additionally, we view acquisitions as somewhat central to the company's growth strategy. Fortis is currently working towards to complete its acquisition of CH Energy Group (see "*Acquiring American assets*" on 21 February 2012), which it expects to occur by the end of Q1 2013. On 31 July 2012, on the company's Q2 2012 results, announced that they are in discussion with the City of Kelowna (British Columbia) to acquire the city's electricity distribution utility. No details were given, however, we don't believe the amount to be meaningful to Fortis Inc. We view Fortis management to continue to look to further grow in the US. The company's most recent Management Discussion and Analysis stated "We remain disciplined and patient in our pursuit of additional electric and gas utility acquisitions in the United States and Canada that will add value for Fortis shareholders". Fortis showed discipline in its acquisition strategy by not competing in a

bidding war for Central Vermont Service Corp. The company received a C\$17m termination fee. For further details see “A positive pass” published on 12 July 2011.

Given the success of Fortis in past transactions, as measured in terms of financials, share price and operationally, we believe the company's current valuation and skill set may lead to some potentially value creating acquisition activity (see Exhibit 10 below for select Fortis M&A transactions).

Exhibit 10: Selected Fortis M&A transactions

\$ in millions, unless otherwise stated

Announced Date	Asset/Company	Deal value (\$m)	Comment
2/21/2012	CH Energy Group	USD 1,500.00	Pending acquisition of NY State electric utility
7/22/2009	Caribbean Utilities Co.	CAD 6.74	Acquired an additional 2.7% of Caribbean Utilities Co.

Source: Bloomberg, Company data and Credit Suisse

In terms of acquisitions, we believe Fortis has a few advantages over others, including:

- Fortis has growing expertise with both electric and gas utilities;
- Larger size will allow it to look at a larger spectrum of potential target companies;
- A proven ability to effectively integrate acquisitions;
- A rather strong appetite for yield oriented securities in Canada;
- The potential ability to support a transaction with pension fund capital;
- Canada's rather benign interest rate environment; and,
- Bought deal financing commonly employed in Canada.

Fortis possesses a number of absolute and relative advantages over some other competitors

Historically, Fortis has been very adept at acquisitions. Corporate growth has benefited from the company's ability to successfully acquire and integrate selected assets.

Valuation

We continue to believe that Fortis has strong organic growth in key areas such as British Columbia, Alberta and the Caribbean. After the quarter, we revised our EPS estimates for 2012 to C\$1.73 from C\$1.72. Our Outperform rating and C\$38.00 target price is obtained

Rating: Outperform
Target: C\$38

from multiple valuation methods, but primarily rely upon a targeted dividend yield of 3.25%. We reiterate our Outperform rating. Some historical Fortis valuation parameters appear in Exhibit 11 below generated by Credit Suisse RAVE.

3-Year Price, Target Price and Rating Change History Chart for FTS.TO

The analyst(s) responsible for preparing this research report received compensation that is based upon various factors including Credit Suisse's total revenues, a portion of which are generated by Credit Suisse's investment banking activities.

Analysts' stock ratings are defined as follows:

Outperform (O): The stock's total return is expected to outperform the relevant benchmark* by at least 10-15% (or more, depending on perceived risk) over the next 12 months.

Neutral (N): The stock's total return is expected to be in line with the relevant benchmark* (range of $\pm 10-15\%$) over the next 12 months.

Underperform (U): The stock's total return is expected to underperform the relevant benchmark* by 10-15% or more over the next 12 months.

*Relevant benchmark by region: As of 29th May 2009, Australia, New Zealand, U.S. and Canadian ratings are based on (1) a stock's absolute total return potential to its current share price and (2) the relative attractiveness of a stock's total return potential within an analyst's coverage universe**, with Outperforms representing the most attractive, Neutrals the less attractive, and Underperforms the least attractive investment opportunities. Some U.S. and Canadian ratings may fall outside the absolute total return ranges defined above, depending on market conditions and industry factors. For Latin American, Japanese, and non-Japan Asia stocks, ratings are based on a stock's total return relative to the average total return of the relevant country or regional benchmark; for European stocks, ratings are based on a stock's total return relative to the analyst's coverage universe**. For Australian and New Zealand stocks, 12-month rolling yield is incorporated in the absolute total return calculation and a 15% and a 7.5% threshold replace the 10-15% level in the Outperform and Underperform stock rating definitions, respectively. The 15% and 7.5% thresholds replace the +10-15% and -10-15% levels in the Neutral stock rating definition, respectively.

**An analyst's coverage universe consists of all companies covered by the analyst within the relevant sector.

Restricted (R): In certain circumstances, Credit Suisse policy and/or applicable law and regulations preclude certain types of communications, including an investment recommendation, during the course of Credit Suisse's engagement in an investment banking transaction and in certain other circumstances.

Volatility Indicator [V]: A stock is defined as volatile if the stock price has moved up or down by 20% or more in a month in at least 8 of the past 24 months or the analyst expects significant volatility going forward.

Analysts' coverage universe weightings are distinct from analysts' stock ratings and are based on the expected performance of an analyst's coverage universe* versus the relevant broad market benchmark**:

Overweight: Industry expected to outperform the relevant broad market benchmark over the next 12 months.

Market Weight: Industry expected to perform in-line with the relevant broad market benchmark over the next 12 months.

Underweight: Industry expected to underperform the relevant broad market benchmark over the next 12 months.

*An analyst's coverage universe consists of all companies covered by the analyst within the relevant sector.

**The broad market benchmark is based on the expected return of the local market index (e.g., the S&P 500 in the U.S.) over the next 12 months.

Credit Suisse's distribution of stock ratings (and banking clients) is:

Global Ratings Distribution		
Outperform/Buy*	46%	(59% banking clients)
Neutral/Hold*	42%	(55% banking clients)
Underperform/Sell*	10%	(48% banking clients)

Restricted

2%

**For purposes of the NYSE and NASD ratings distribution disclosure requirements, our stock ratings of Outperform, Neutral, and Underperform most closely correspond to Buy, Hold, and Sell, respectively; however, the meanings are not the same, as our stock ratings are determined on a relative basis. (Please refer to definitions above.) An investor's decision to buy or sell a security should be based on investment objectives, current holdings, and other individual factors.*

Credit Suisse's policy is to update research reports as it deems appropriate, based on developments with the subject company, the sector or the market that may have a material impact on the research views or opinions stated herein.

Credit Suisse's policy is only to publish investment research that is impartial, independent, clear, fair and not misleading. For more detail please refer to Credit Suisse's Policies for Managing Conflicts of Interest in connection with Investment Research: http://www.csfb.com/research-and-analytics/disclaimer/managing_conflicts_disclaimer.html

Credit Suisse does not provide any tax advice. Any statement herein regarding any US federal tax is not intended or written to be used, and cannot be used, by any taxpayer for the purposes of avoiding any penalties.

See the Companies Mentioned section for full company names.

Price Target: (12 months) for (FTS.TO)

Method: We obtain our C\$38.00 target price for Fortis Inc. by using multiple valuation methodologies, but primarily rely upon a targeted dividend yield of 3.25% and an imputed 125 bps spread over a 2% Canadian 10-year bond yield.

Risks: There are a number of risks to Fortis' achievement of our C\$38.00 target price: commodity prices; weather; environmental; regulatory; access to capital markets; and, interest rates. Moreover, one should never underestimate the power of the regulator in any regulated business.

Please refer to the firm's disclosure website at www.credit-suisse.com/researchdisclosures for the definitions of abbreviations typically used in the target price method and risk sections.

See the Companies Mentioned section for full company names.

The subject company (FTS.TO) currently is, or was during the 12-month period preceding the date of distribution of this report, a client of Credit Suisse.

Credit Suisse provided non-investment banking services, which may include Sales and Trading services, to the subject company (FTS.TO) within the past 12 months.

Credit Suisse expects to receive or intends to seek investment banking related compensation from the subject company (FTS.TO) within the next 3 months.

Credit Suisse has received compensation for products and services other than investment banking services from the subject company (FTS.TO) within the past 12 months.

Important Regional Disclosures

Singapore recipients should contact a Singapore financial adviser for any matters arising from this research report.

An analyst involved in the preparation of this report has visited certain material operations of the subject company (FTS.TO) within the past 12 months. The analyst may not have visited all material operations of the subject company. The travel expenses of the analyst in connection with such visits were not paid or reimbursed by the subject company, other than de minimus local travel expenses.

Restrictions on certain Canadian securities are indicated by the following abbreviations: NVS--Non-Voting shares; RVS--Restricted Voting Shares; SVS--Subordinate Voting Shares.

Individuals receiving this report from a Canadian investment dealer that is not affiliated with Credit Suisse should be advised that this report may not contain regulatory disclosures the non-affiliated Canadian investment dealer would be required to make if this were its own report.

For Credit Suisse Securities (Canada), Inc.'s policies and procedures regarding the dissemination of equity research, please visit http://www.csfb.com/legal_terms/canada_research_policy.shtml.

As of the date of this report, Credit Suisse acts as a market maker or liquidity provider in the equities securities that are the subject of this report.

Principal is not guaranteed in the case of equities because equity prices are variable.

Commission is the commission rate or the amount agreed with a customer when setting up an account or at anytime after that.

Taiwanese Disclosures: This research report is for reference only. Investors should carefully consider their own investment risk. Investment results are the responsibility of the individual investor. Reports may not be reprinted without permission of CS. Reports written by Taiwan-based analysts on non-Taiwan listed companies are not considered recommendations to buy or sell securities under Taiwan Stock Exchange Operational Regulations Governing Securities Firms Recommending Trades in Securities to Customers.

To the extent this is a report authored in whole or in part by a non-U.S. analyst and is made available in the U.S., the following are important disclosures regarding any non-U.S. analyst contributors:

The non-U.S. research analysts listed below (if any) are not registered/qualified as research analysts with FINRA. The non-U.S. research analysts listed below may not be associated persons of CSSU and therefore may not be subject to the NASD Rule 2711 and NYSE Rule 472 restrictions on communications with a subject company, public appearances and trading securities held by a research analyst account.

- Andrew M. Kuske, non-U.S. analyst, is a research analyst employed by Credit Suisse Securities (Canada), Inc..
- Paul Tan, non-U.S. analyst, is a research analyst employed by Credit Suisse Securities (Canada), Inc..

Disclaimers continue on next page.

This report is not directed to, or intended for distribution to or use by, any person or entity who is a citizen or resident of or located in any locality, state, country or other jurisdiction where such distribution, publication, availability or use would be contrary to law or regulation or which would subject Credit Suisse AG, the Swiss bank, or its subsidiaries or its affiliates ("CS") to any registration or licensing requirement within such jurisdiction. All material presented in this report, unless specifically indicated otherwise, is under copyright to CS. None of the material, nor its content, nor any copy of it, may be altered in any way, transmitted to, copied or distributed to any other party, without the prior express written permission of CS. All trademarks, service marks and logos used in this report are trademarks or service marks or registered trademarks or service marks of CS or its affiliates.

The information, tools and material presented in this report are provided to you for information purposes only and are not to be used or considered as an offer or the solicitation of an offer to sell or to buy or subscribe for securities or other financial instruments. CS may not have taken any steps to ensure that the securities referred to in this report are suitable for any particular investor. CS will not treat recipients as its customers by virtue of their receiving the report. The investments or services contained or referred to in this report may not be suitable for you and it is recommended that you consult an independent investment advisor if you are in doubt about such investments or investment services. Nothing in this report constitutes investment, legal, accounting or tax advice or a representation that any investment or strategy is suitable or appropriate to your individual circumstances or otherwise constitutes a personal recommendation to you. CS does not offer advice on the tax consequences of investment and you are advised to contact an independent tax adviser. Please note in particular that the bases and levels of taxation may change.

CS believes the information and opinions in the Disclosure Appendix of this report are accurate and complete. Information and opinions presented in the other sections of the report were obtained or derived from sources CS believes are reliable, but CS makes no representations as to their accuracy or completeness. Additional information is available upon request. CS accepts no liability for loss arising from the use of the material presented in this report, except that this exclusion of liability does not apply to the extent that liability arises under specific statutes or regulations applicable to CS. This report is not to be relied upon in substitution for the exercise of independent judgment. CS may have issued, and may in the future issue, a trading call regarding this security. Trading calls are short term trading opportunities based on market events and catalysts, while stock ratings reflect investment recommendations based on expected total return over a 12-month period as defined in the disclosure section. Because trading calls and stock ratings reflect different assumptions and analytical methods, trading calls may differ directionally from the stock rating. In addition, CS may have issued, and may in the future issue, other reports that are inconsistent with, and reach different conclusions from, the information presented in this report. Those reports reflect the different assumptions, views and analytical methods of the analysts who prepared them and CS is under no obligation to ensure that such other reports are brought to the attention of any recipient of this report. CS is involved in many businesses that relate to companies mentioned in this report. These businesses include specialized trading, risk arbitrage, market making, and other proprietary trading.

Past performance should not be taken as an indication or guarantee of future performance, and no representation or warranty, express or implied, is made regarding future performance. Information, opinions and estimates contained in this report reflect a judgement at its original date of publication by CS and are subject to change without notice. The price, value of and income from any of the securities or financial instruments mentioned in this report can fall as well as rise. The value of securities and financial instruments is subject to exchange rate fluctuation that may have a positive or adverse effect on the price or income of such securities or financial instruments. Investors in securities such as ADR's, the values of which are influenced by currency volatility, effectively assume this risk.

Structured securities are complex instruments, typically involve a high degree of risk and are intended for sale only to sophisticated investors who are capable of understanding and assuming the risks involved. The market value of any structured security may be affected by changes in economic, financial and political factors (including, but not limited to, spot and forward interest and exchange rates), time to maturity, market conditions and volatility, and the credit quality of any issuer or reference issuer. Any investor interested in purchasing a structured product should conduct their own investigation and analysis of the product and consult with their own professional advisers as to the risks involved in making such a purchase.

Some investments discussed in this report have a high level of volatility. High volatility investments may experience sudden and large falls in their value causing losses when that investment is realised. Those losses may equal your original investment. Indeed, in the case of some investments the potential losses may exceed the amount of initial investment, in such circumstances you may be required to pay more money to support those losses. Income yields from investments may fluctuate and, in consequence, initial capital paid to make the investment may be used as part of that income yield. Some investments may not be readily realisable and it may be difficult to sell or realise those investments, similarly it may prove difficult for you to obtain reliable information about the value, or risks, to which such an investment is exposed.

This report may provide the addresses of, or contain hyperlinks to, websites. Except to the extent to which the report refers to website material of CS, CS has not reviewed the linked site and takes no responsibility for the content contained therein. Such address or hyperlink (including addresses or hyperlinks to CS's own website material) is provided solely for your convenience and information and the content of the linked site does not in any way form part of this document. Accessing such website or following such link through this report or CS's website shall be at your own risk.

This report is issued and distributed in Europe (except Switzerland) by Credit Suisse Securities (Europe) Limited, One Cabot Square, London E14 4QJ, England, which is regulated in the United Kingdom by The Financial Services Authority ("FSA"). This report is being distributed in Germany by Credit Suisse Securities (Europe) Limited Niederlassung Frankfurt am Main regulated by the Bundesanstalt fuer Finanzdienstleistungsaufsicht ("BaFin"). This report is being distributed in the United States by Credit Suisse Securities (USA) LLC ; in Switzerland by Credit Suisse AG; in Canada by Credit Suisse Securities (Canada), Inc.; in Brazil by Banco de Investimentos Credit Suisse (Brasil) S.A. or its affiliates; in Mexico by Banco Credit Suisse (México), S.A. (transactions related to the securities mentioned in this report will only be effected in compliance with applicable regulation); in Japan by Credit Suisse Securities (Japan) Limited, Financial Instrument Firm, Director-General of Kanto Local Finance Bureau (Kinsho) No. 66, a member of Japan Securities Dealers Association, The Financial Futures Association of Japan, Japan Securities Investment Advisers Association, Type II Financial Instruments Firms Association; elsewhere in Asia/Pacific by whichever of the following is the appropriately authorised entity in the relevant jurisdiction: Credit Suisse (Hong Kong) Limited, Credit Suisse Equities (Australia) Limited, Credit Suisse Securities (Thailand) Limited, Credit Suisse Securities (Malaysia) Sdn Bhd, Credit Suisse AG, Singapore Branch, Credit Suisse Securities (India) Private Limited regulated by the Securities and Exchange Board of India (registration Nos.
