Although relatively modest from a financial point of view, we remain concerned about negative sentiment regarding the troubles in Belize. Further, EPS growth over the next couple of years is expected to slow due to the expiration of the Rankine hydro license (estimated annual impact of about $0.10/share). Our current EPS estimates continue to support an annual $0.08/share dividend increase that we expect to be announced later this year, although the expected payout ratio would move to the high-end of the 60% to 70% range for most Canadian Energy Infrastructure companies.

Based on our new $29.00/share price target, and the expected 10% total return, we continue to rank the shares Sector Perform, Average Risk.

Companies Mentioned

Caribbean Utilities [TSX: CUP.U; $12.10; Not Rated]

Emera [TSX: EMA; $22.65; Sector Perform, Average Risk]

TransAlta [TSX/NYSE: TA/TAC; $35.35; Sector Perform, Above Average Risk]

TransCanada [TSX/NYSE: TRP; $39.28; Outperform, Average Risk]

Valuation

Our target price of $29.00 is based on a 12-month dividend distribution one year forward of $1.12 and a required dividend yield of 3.9%, and is supported by our sum-of-the-parts analysis. We estimate that a 10 bp change in the required dividend yield would impact our price target by approximately $0.75 per share.

Price Target Impediment

The political environment in Belize, risk of punitive regulatory decisions, economic/tourism conditions in its service territories, operational or financial issues at newly acquired businesses or power prices in Ontario may have implications for our target price as well as our earnings and dividend estimates.

Company Description

Fortis Inc. is a utility holding company for Newfoundland Power, FortisAlberta, FortisBC, Terasen Inc., Maritime Electric, Canadian Niagara Power, Cornwall Electric, BECOL, two electric utilities in the Turks and Caicos, and 70%-owned Belize Electricity. It also holds a 100% interest in Fortis Properties and a 54% interest in Caribbean Utilities.

Explanation of RBC Capital Markets Rating System

An analyst's 'sector' is the universe of companies for which the analyst provides research coverage. Accordingly, the rating assigned to a particular stock represents solely the analyst's view of how that stock will perform over the next 12 months relative to the analyst's sector average.

Ratings

Top Pick (TP): Represents best in Outperform category; analyst's best ideas; expected to significantly outperform the sector over 12 months; provides best risk-reward ratio; approximately 10% of analyst's recommendations.

Outperform (O): Expected to materially outperform sector average over 12 months.

Sector Perform (SP): Returns expected to be in line with sector average over 12 months.

Underperform (U): Returns expected to be materially below sector average over 12 months.

Risk Qualifiers (any of the following criteria may be present):

Average Risk (Avg): Volatility and risk expected to be comparable to sector; average revenue and earnings predictability; no significant cash flow/financing concerns over coming 12-24 months; fairly liquid.

Above Average Risk (AA): Volatility and risk expected to be above sector; below average revenue and earnings predictability; may not be suitable for a significant class of individual equity investors; may have negative cash flow; low market cap or float.

Speculative (Spec): Risk consistent with venture capital; low public float; potential balance sheet concerns; risk of being delisted.

Distribution of Ratings, Firmwide

For the purpose of ratings distributions, regulatory rules require member firms to assign ratings to one of three rating categories - Buy, Hold/Neutral, or Sell - regardless of a firm's own rating categories. Although RBC Capital Markets' ratings of Top Pick/Outperform, Sector Perform and Underperform most closely correspond to Buy, Hold/Neutral and Sell, respectively, the meanings are not the same because our ratings are determined on a relative basis (as described above).

References to a Recommended List in the recommendation history chart may include one or more recommended lists or model portfolios maintained by a business unit of the Wealth Management Division of RBC Capital Markets Corporation. These Recommended Lists include the Prime Opportunity List (RL 3), the Private Client Prime Portfolio (RL 4), the Prime Income List (RL 6), the Guided Portfolio: Large Cap (RL 7), and the Guided Portfolio: Dividend Growth (RL 8). The abbreviation 'RL On' means the date a security was placed on a Recommended List. The abbreviation 'RL Off' means the date a security was removed from a Recommended List.

Analyst Certification

All of the views expressed in this report accurately reflect the personal views of the responsible analyst(s) about any and all of the subject securities or issuers. No part of the compensation of the responsible analyst(s) named herein is, or will be, directly or indirectly, related to the specific recommendations or views expressed by the responsible analyst(s) in this report.

Dissemination of Research

RBC Capital Markets endeavours to make all reasonable efforts to provide research simultaneously to all eligible clients, having regard to local time zones in overseas jurisdictions. RBC Capital Markets' research is posted to our proprietary websites to ensure eligible clients receive coverage initiations and changes in rating, targets and opinions in a timely manner. Additional distribution may be done by the sales personnel via email, fax or regular mail. Clients may also receive our research via third party vendors. Please contact your investment advisor or institutional salesperson for more information regarding RBC Capital Markets research.
RBC Capital Markets also provides eligible clients with access to a database which may contain Short-Term trading calls on certain of the subject companies for which it currently provides equity research coverage. The database may be accessed via the following hyperlink https://www2.rbccm.com/cmonline/index.html. The information regarding Short-Term trading calls accessible through the database does not constitute a research report. These Short-Term trading calls are not formal ratings and reflect the research analyst's views with respect to market and trading events in the coming days or weeks and, as such, may differ from the price targets and recommendations in our published research reports reflecting the research analyst's views of the longer-term (one year) prospects of the subject company. Thus, it is possible that a subject company's common equity rated a long-term 'sector perform' or even an 'underperform' might be a Short-Term buying opportunity as a result of temporary selling pressure in the market; conversely, a subject company's common equity rated a long-term 'outperform' could be considered susceptible to a Short-Term downward price correction.

Event

The Belize Public Utilities Commission (PUC) issued its "Final Decision" for 70%-owned Belize Electricity Limited.

Investment Opinion

- **Financial Impact Relatively Modest, but Continued Uncertainty in Belize Likely to Overhang the Shares.** Fortis announced that its 70%-owned Belize Electricity Limited (BEL) will legally contest the PUC's "Final Decision" for its electricity rates. Although the financial impact of the decision is relatively modest for Fortis, we believe that the uncertainty regarding the situation is likely to cap the share price. As such, we remain comfortable with our Sector Perform ranking.
- **The Ongoing Financial Impact Appears to be Roughly In Line With Our Previous Estimates.** The PUC maintained electricity rates at 2007 levels despite a significant rise in fuel and purchased power costs. In justifying the maintenance of 2007 rates, the PUC is allowing a greater fuel cost/purchased power "recovery", but has offset it by a lower return on assets (now 10% vs. 12% previously) combined with BZ$36 million (C$18 million) of retroactive disallowances. On the whole, the impact of the "Final Decision" appears to be roughly in line with our previously estimated annual earnings impact of $6 million (about $0.04/share).
- **Background and Additional Information.** The "Final Decision" and other regulatory documents can be found on the PUC website http://www.puc.bz/publications. Also, please refer to our *Research Comments* dated May 2, 2008 and May 29, 2008 for additional details.
- **Valuation.** Our target price of $29.00 (unchanged) is based on a 12-month dividend distribution one year forward of $1.12 and a required dividend yield of 3.9%, and is supported by our sum-of-the-parts analysis. We estimate that a 10 bp change in the required dividend yield would impact our price target by approximately $0.75 per share.

Priced as of prior trading day's market close, EST (unless otherwise noted).

For Required Disclosures, please see Page 3.

Valuation

Our target price of $29.00 is based on a 12-month dividend distribution one year forward of $1.12 and a required dividend yield of 3.9%, and is supported by our sum-of-the-parts analysis. We estimate that a 10 bp change in the required dividend yield would impact our price target by approximately $0.75 per share.

Price Target Impediment

The political environment in Belize, risk of punitive regulatory decisions, economic/tourism conditions in its service territories, operational or financial issues at newly acquired businesses or power prices in Ontario may have implications for our target price as well as our earnings and dividend estimates.

References to a Recommended List in the recommendation history chart may include one or more recommended lists or model portfolios maintained by a business unit of the Wealth Management Division of RBC Capital Markets Corporation. These Recommended Lists include the Prime Opportunity List (RL 3), the Private Client Prime Portfolio (RL 4), the Prime Income List (RL

6), the Guided Portfolio: Large Cap (RL 7), and the Guided Portfolio: Dividend Growth (RL 8). The abbreviation 'RL On' means the date a security was placed on a Recommended List. The abbreviation 'RL Off' means the date a security was removed from a Recommended List.

Analyst Certification

All of the views expressed in this report accurately reflect the personal views of the responsible analyst(s) about any and all of the subject securities or issuers. No part of the compensation of the responsible analyst(s) named herein is, or will be, directly or indirectly, related to the specific recommendations or views expressed by the responsible analyst(s) in this report.

Dissemination of Research

RBC Capital Markets endeavours to make all reasonable efforts to provide research simultaneously to all eligible clients, having regard to local time zones in overseas jurisdictions. RBC Capital Markets' research is posted to our proprietary websites to ensure eligible clients receive coverage initiations and changes in rating, targets and opinions in a timely manner. Additional distribution may be done by the sales personnel via email, fax or regular mail. Clients may also receive our research via third party vendors. Please contact your investment advisor or institutional salesperson for more information regarding RBC Capital Markets research.
RBC Capital Markets also provides eligible clients with access to a database which may contain Short-Term trading calls on certain of the subject companies for which it currently provides equity research coverage. The database may be accessed via the following hyperlink https://www2.rbccm.com/cmonline/index.html. The information regarding Short-Term trading calls accessible through the database does not constitute a research report. These Short-Term trading calls are not formal ratings and reflect the research analyst's views with respect to market and trading events in the coming days or weeks and, as such, may differ from the price targets and recommendations in our published research reports reflecting the research analyst's views of the longer-term (one year) prospects of the subject company. Thus, it is possible that a subject company's common equity that is considered a long-term 'sector perform' or even an 'underperform' might be a Short-Term buying opportunity as a result of temporary selling pressure in the market; conversely, a subject company's common equity rated a long-term 'outperform' could be considered susceptible to a Short-Term downward price correction.

Conflicts Disclosures

RBC Capital Markets Policy for Managing Conflicts of Interest in Relation to Investment Research is available from us on request. To access our current policy, clients should refer to
http://www.rbccm.com/cm/file/0,,63022,00.pdf
or send a request to RBC CM Research Publishing, P.O. Box 50, 200 Bay Street, Royal Bank Plaza, 29th Floor, South Tower, Toronto, Ontario M5J 2W7. We reserve the right to amend or supplement this policy at any time.

Important Disclosures

The analyst(s) responsible for preparing this research report received compensation that is based upon various factors, including total revenues of the member companies of RBC Capital Markets and its affiliates, a portion of which are or have been generated by investment banking activities of the member companies of RBC Capital Markets and its affiliates.

A member company of RBC Capital Markets or one of its affiliates managed or co-managed a public offering of securities for Fortis Inc. in the past 12 months.

A member company of RBC Capital Markets or one of its affiliates received compensation for investment banking services from Fortis Inc. in the past 12 months.

Royal Bank of Canada, together with its affiliates, beneficially owns 1 percent or more of a class of common equity securities of Fortis Inc.

A member company of RBC Capital Markets or one of its affiliates received compensation for products or services other than investment banking services from Fortis Inc. during the past 12 months. During this time, a member company of RBC Capital Markets or one of its affiliates provided non-investment banking securities-related services to Fortis Inc.

Additional Disclosures

RBC Capital Markets is the business name used by certain subsidiaries of Royal Bank of Canada, including RBC Dominion Securities Inc., RBC Capital Markets Corporation, Royal Bank of Canada Europe Limited and Royal Bank of Canada - Sydney Branch. The information contained in this report has been compiled by RBC Capital Markets from sources believed to be reliable, but no representation or warranty, express or implied, is made by Royal Bank of Canada, RBC Capital Markets, its affiliates or any other person as to its accuracy, completeness or correctness. All opinions and estimates contained in this report constitute RBC Capital Markets' judgement as of the date of this report, are subject to change without notice and are provided in good faith but without legal responsibility. Nothing in this report constitutes legal, accounting or tax advice or individually tailored investment advice. This material is prepared for general circulation to clients and has been prepared without regard to the individual financial circumstances and objectives of persons who receive it. The investments or services contained in this report may not be suitable for you and it is recommended that you consult an independent investment advisor if you are in doubt about the suitability of such investments or services. This report is not an offer to sell or a solicitation of an offer to buy any securities. Past performance is not a guide to future performance, future returns are not guaranteed, and a loss of original capital may occur. RBC Capital Markets research analyst compensation is based in part on the overall profitability of RBC Capital Markets, which includes profits attributable to investment banking revenues. Every province in Canada, state in the U.S., and most countries throughout the world have their own laws regulating the types of securities and other investment products which may be offered to their residents, as well as the process for doing so. As a result, the securities discussed in this report may not be eligible for sale in some jurisdictions. This report is not, and under no circumstances should be construed as, a solicitation to act as securities broker or dealer in any jurisdiction by any person or company that is not legally permitted to carry on the business of a securities broker or dealer in that jurisdiction. To the full extent permitted by law neither RBC Capital Markets nor any of its affiliates, nor any other person, accepts any liability whatsoever for any direct or consequential loss arising from any use of this report or the information contained herein. No matter contained in this document may be reproduced or copied by any means without the prior consent of RBC Capital Markets.

Event

Fortis reported Q2/08 results.

Investment Opinion

- **Q2/08 Results Generally in Line.** Fortis' normalized EPS in Q2/08 was $0.28 compared to our estimate of $0.29 and Q2/07 normalized EPS of $0.32. The Thomson One consensus EPS estimate for the quarter was $0.27 (range of $0.20 to $0.30). Most segments were in line with expectations; however, higher-than-expected earnings from Terasen were offset by lower-than-forecast earnings from FortisAlberta due to a future tax expense related to AESO charges, which will reverse in the future, but possibly not until 2010.
- **5-Year Capex Plan Increased.** Citing both inflation and higher than previously forecast growth in its utility business, Fortis increased its 5-year capex forecast to $4.5 billion (previously $4.0 billion). Primarily, spending in the Western Canadian utilities was a key driver of the increase in forecast capex. We expect the Western Canadian utilities to be the driver of organic growth in the company over the foreseeable future.
- **Estimates Modestly Reduced for 2008 and 2009.** We have reduced our 2008 and 2009 EPS estimates to $1.53 and $1.57 (from $1.56 and $1.59), respectively, primarily due to higher corporate costs, partially offset by a modest increase in earnings at Terasen. Our 2008 estimate is also impacted by the unexpected $4 million future tax expense related to FortisAlberta that may not reverse until 2010.
- **Valuation.** Our target price of $29.00 (unchanged) is based on a 12-month dividend distribution one year forward of $1.13 and a required dividend yield of 3.9%, and is supported by our sum-of-the-parts analysis. We estimate that a 10 bp change in the required dividend yield would impact our price target by approximately $0.75 per share.

Priced as of prior trading day's market close, EST (unless otherwise noted).

For Required Disclosures, please see Page 5.

Q2/08 Results Largely In Line

Fortis' normalized EPS in Q2/08 was $0.28 compared to our estimate of $0.29 and Q2/07 normalized EPS of $0.32. The Thomson One consensus EPS estimate for the quarter was $0.27 (range of $0.20 to $0.30). Most segments were in line with expectations; however, higher-than-expected earnings from Terasen were offset by lower-than-forecast earnings from FortisAlberta.

A table showing the Q2/08 results compared to our forecasts is set out in Exhibit 1.

Exhibit 1: Normalized Earnings (In $MM except per share figures)

	Q2 2008	RBC CM Q2/08 Est.	Q2 2007	Comments
Newfoundland Power	$10.0	$9.0	$8.0	
FortisOntario & Maritime Electric	4.0	4.2	4.0	
Terasen	12.0	5.0	1.6	Strong quarterly earnings; outlook for 2008 generally unchanged
FortisAlberta	7.0	14.0	15.5	Future tax related to AESO charges; will reverse in the future
FortisBC	7.0	6.5	6.5	
Regulated Utilities - Canadian	40.0	38.7	35.6	
Regulated Utilities - Caribbean	8.0	7.5	7.6	
Non-regulated - Fortis Generation	7.0	9.2	4.9	
Non-regulated - Fortis Properties	7.0	6.6	6.0	
Corporate	(18.0)	(16.5)	(12.6)	
Normalized Earnings	**$44.0**	**$45.5**	**$41.5**

Average shares outstanding (MM)	157.0	157.0	131.1	
Normalization adjustments:				
Charge for disallowed previously incurred fuel and purchased power costs	(13.0)			Belize Electricity
Charge associated with repayment of interconnection amounts received in Q4/07	(2.0)			FortisOntario
	(15.0)		-	
Reported Earnings	$29.0		$41.5	

Source: Company reports, RBC Capital Markets estimates

Highlights of the Quarter

- **Canadian Regulated Utilities.** Overall earnings were in line with expectations, but a higher-than-expected contribution from Terasen was offset by FortisAlberta due to $4 million of future taxes that is largely a timing issue related to deferred AESO charges. A reversal of the charge may not happen until 2010 when new rates are set. However, FortisAlberta is working on a strategy to present to its regulator to eliminate this timing issue. Although the future tax negatively impacted the quarter and likely 2008 earnings as well, we note that the $4 million expense is non-cash and will reverse over time.

- **Caribbean Regulated Utilities.** Earnings from the segment were in line with expectations after we normalized the $13 million ($0.08 per share) charge Fortis took related to a negative regulatory decision in Belize that we highlighted in *Research Comments* published May 29, 2008, and June 30, 2008. Belize Electricity Limited (BEL), which is 70% owned by Fortis, filed an application for a judicial review and appeal of the negative regulatory decision with the Supreme Court of Belize. If BEL is unsuccessful in its appeal attempts, the company could ultimately appeal the decision to the Privy Council in the U.K., which is the highest court in Belize. Should the Privy Council agree to hear an appeal, we would expect BEL to be granted at least partial relief.

- **Non-Regulated.** Earnings were impacted by higher-than-expected Corporate expense as well as lower-than-expected realized power pricing at Fortis Generation. Earnings contribution from Fortis Properties was in line with expectations.

- **5-Year Capex Plan Increased to $4.5 Billion (from $4.0 Billion).** Citing both inflation and higher than previously forecast growth in its utility business, Fortis increased its 5-year capex forecast to $4.5 billion (previously $4.0 billion). Primarily, spending in the Western Canadian utilities was a key driver of the increase in forecast capex. We expect the Western Canadian utilities to be the driver of organic growth in the company over the foreseeable future.

Estimates Modestly Reduced for 2008 and 2009

We have reduced our 2008 and 2009 EPS estimates to $1.53 and $1.57 (from $1.56 and $1.59), respectively, primarily due to higher corporate costs partially offset by a modest increase in earnings at Terasen. Our 2008 estimate is also impacted by the unexpected $4 million future tax expense related to at FortisAlberta that may not reverse until 2010. A summary of our segmented earnings forecast is set out in Exhibit 2.

Exhibit 2: Segment Earnings Forecast (In $MM except per share figures)

Source: Company reports, RBC Capital Markets estimates

Valuation

Our target price of $29.00 is based on a 12-month dividend distribution one year forward of $1.13 and a required dividend yield of 3.9%, and is supported by our sum-of-the-parts analysis. We estimate that a 10 bp change in the required dividend yield would impact our price target by approximately $0.75 per share.

Price Target Impediment

The political environment in Belize, risk of punitive regulatory decisions, economic/tourism conditions in its service territories, operational or financial issues at newly acquired businesses or power prices in Ontario may have implications for our target price as well as our earnings and dividend estimates.

Company Description

Fortis Inc. is a utility holding company for Newfoundland Power, FortisAlberta, FortisBC, Terasen Inc., Maritime Electric, Canadian Niagara Power, Cornwall Electric, BECOL, two electric utilities in the Turks and Caicos, and 70%-owned Belize Electricity. It also holds a 100% interest in Fortis Properties and a 54% interest in Caribbean Utilities.

Required Disclosures

Explanation of RBC Capital Markets Rating System

An analyst's 'sector' is the universe of companies for which the analyst provides research coverage. Accordingly, the rating assigned to a particular stock represents solely the analyst's view of how that stock will perform over the next 12 months relative to the analyst's sector average.

Ratings

Top Pick (TP): Represents best in Outperform category; analyst's best ideas; expected to significantly outperform the sector over 12 months; provides best risk-reward ratio; approximately 10% of analyst's recommendations.

Outperform (O): Expected to materially outperform sector average over 12 months.

Sector Perform (SP): Returns expected to be in line with sector average over 12 months.

Underperform (U): Returns expected to be materially below sector average over 12 months.

Risk Qualifiers (any of the following criteria may be present):

Average Risk (Avg): Volatility and risk expected to be comparable to sector; average revenue and earnings predictability; no significant cash flow/financing concerns over coming 12-24 months; fairly liquid.

Above Average Risk (AA): Volatility and risk expected to be above sector; below average revenue and earnings predictability; may not be suitable for a significant class of individual equity investors; may have negative cash flow; low market cap or float.

Speculative (Spec): Risk consistent with venture capital; low public float; potential balance sheet concerns; risk of being delisted.

Distribution of Ratings, Firmwide

For the purpose of ratings distributions, regulatory rules require member firms to assign ratings to one of three rating categories - Buy, Hold/Neutral, or Sell - regardless of a firm's own rating categories. Although RBC Capital Markets' ratings of Top Pick/Outperform, Sector Perform and Underperform most closely correspond to Buy, Hold/Neutral and Sell, respectively, the meanings are not the same because our ratings are determined on a relative basis (as described above).

Distribution of Ratings/IB Services
RBC Capital Markets

			Investment Banking Serv./Past 12 Mos.	
Rating	Count	Percent	Count	Percent
BUY[TP/O]	552	48.21	191	34.60

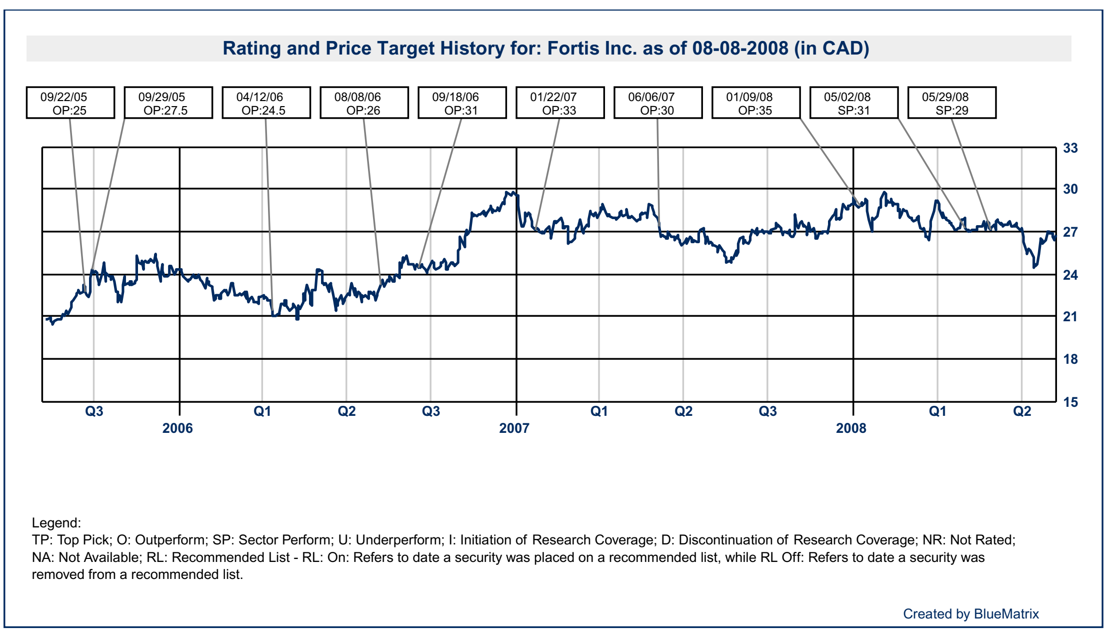
SELL[U]	79	6.90	16	20.25



References to a Recommended List in the recommendation history chart may include one or more recommended lists or model portfolios maintained by a business unit of the Wealth Management Division of RBC Capital Markets Corporation. These Recommended Lists include the Prime Opportunity List (RL 3), the Private Client Prime Portfolio (RL 4), the Prime Income List (RL

6), the Guided Portfolio: Large Cap (RL 7), and the Guided Portfolio: Dividend Growth (RL 8). The abbreviation 'RL On' means the date a security was placed on a Recommended List. The abbreviation 'RL Off' means the date a security was removed from a Recommended List.

Analyst Certification

All of the views expressed in this report accurately reflect the personal views of the responsible analyst(s) about any and all of the subject securities or issuers. No part of the compensation of the responsible analyst(s) named herein is, or will be, directly or indirectly, related to the specific recommendations or views expressed by the responsible analyst(s) in this report.

Dissemination of Research

RBC Capital Markets endeavours to make all reasonable efforts to provide research simultaneously to all eligible clients, having regard to local time zones in overseas jurisdictions. RBC Capital Markets' research is posted to our proprietary websites to ensure eligible clients receive coverage initiations and changes in rating, targets and opinions in a timely manner. Additional distribution may be done by the sales personnel via email, fax or regular mail. Clients may also receive our research via third party vendors. Please contact your investment advisor or institutional salesperson for more information regarding RBC Capital Markets research.
RBC Capital Markets also provides eligible clients with access to a database which may contain Short-Term trading calls on certain of the subject companies for which it currently provides equity research coverage. The database may be accessed via the following hyperlink https://www2.rbccm.com/cmonline/index.html. The information regarding Short-Term trading calls accessible through the database does not constitute a research report. These Short-Term trading calls are not formal ratings and reflect the research analyst's views with respect to market and trading events in the coming days or weeks and, as such, may differ from the price targets and recommendations in our published research reports reflecting the research analyst's views of the longer-term (one year) prospects of the subject company. Thus, it is possible that a subject company's common equity that is considered a long-term 'sector perform' or even an 'underperform' might be a Short-Term buying opportunity as a result of temporary selling pressure in the market; conversely, a subject company's common equity rated a long-term 'outperform' could be considered susceptible to a Short-Term downward price correction.

Conflicts Disclosures

RBC Capital Markets Policy for Managing Conflicts of Interest in Relation to Investment Research is available from us on request. To access our current policy, clients should refer to

COMPANY UPDATE | COMMENT

NOVEMBER 3, 2008

Fortis Inc. (TSX: FTS)

Q3/08 Results Modestly Ahead of Expectations

Sector Perform
Average Risk

Price:	26.30	**Price Target:**	24.00
		Implied All-In Return:	(5%)
Shares O/S (MM):	157.3	**Market Cap (MM):**	4,137
Dividend:	1.00	**Yield:**	3.8%
Float (MM):	157.3		
Debt to Cap:	62%		

Event

Fortis reported Q3/08 results.

Investment Opinion

- **Q3/08 Results Modestly Ahead of Expectations.** Fortis' normalized EPS in Q3/08 was $0.24 compared to our estimate of $0.21, consensus of $0.21, and Q3/07 normalized EPS of $0.17.
- **2008 EPS Estimate Increased.** We have increased our 2008 EPS estimate to $1.56 (from $1.53) to primarily reflect the unexpected $4.5 million (about $0.03/share) future tax reversal related to AESO charges at FortisAlberta in Q3/08 (that had negatively impacted Q2/08 earnings). Our 2009 and 2010 EPS estimates remain unchanged at $1.57 and $1.63, respectively.
- **Dividend Forecast Moderated.** Due to the weak equity and credit market environment, we expect the board to take a conservative approach and moderate the growth of its dividend to conserve cash, but also to enhance equity on the balance sheet. Previously, we had expected Fortis to increase its dividend by $0.08/share in 2009 and 2010, resulting in a payout ratio at the top end of its 60-70% range. However, we believe that the board will err on the side of prudence and only increase the dividend by $0.04/share in 2009, resulting in an annual dividend of $1.04 (66% payout ratio). In 2010, assuming equity and credit markets stabilize, we expect an $0.08/share increase in the dividend.
- **Acquisition and Equity Financing Outlook.** Given the state of the equity and credit markets, management does not envision making any major acquisitions until markets stabilize. Should the company not be able to find a suitable acquisition in the next 12-18 months, we believe that the company will need to issue roughly $300 million of equity to enhance its capital ratios to bring them up to its target 40% equity (including preferred equity). Currently, the capital structure consists of 37.8% equity (including preferred equity).
- **Valuation.** Our target price of $24.00 (unchanged) implies a forward P/E of 14.7x, and a required dividend yield of 4.75% based on a 12-month dividend distribution one year forward of $1.11. The forward P/E multiple is in line with the average current forward P/E multiple for the group, reflecting Fortis' slowing EPS growth profile that should approximate the average growth rate of the group over the next couple of years.

Priced as of prior trading day's market close, EST (unless otherwise noted).

For Required Disclosures, please see Page 5.

Q3/08 Results Modestly Ahead of Expectations

Fortis' normalized EPS in Q3/08 was $0.24 compared to our estimate of $0.21 and Q3/07 normalized EPS of $0.17. The Thomson One consensus EPS estimate for the quarter was $0.21 (range of $0.18 to $0.22). The better-than-expected results were primarily due to strong hydrology in New York State and Belize, and better-than-forecast quarterly results for Newfoundland Power.

A table showing the Q3/08 results compared to our forecasts is set out in Exhibit 1.

Exhibit 1: Normalized Earnings (In $MM except per share figures)

	Q3 2008	RBC CM Q3/08 Est.	Q3 2007	Comments

Reported Earnings	$49.0		$30.8	

Source: Company reports; RBC Capital Markets estimates

Highlights of the Quarter

Canadian Regulated Utilities

- **FortisAlberta Future Income Tax Recovery.** FortisAlberta's reported earnings included a recovery of $4.5 million (about $0.03/share) of future income taxes that were previously expensed during the first half of 2008. The future taxes are associated with an Alberta Electric System Operator (AESO) charges deferral account that are generally not recovered in rates for about two years. However, by making tax planning adjustments (which allowed Fortis to record the $4.5 million recovery) during the quarter, FortisAlberta expects to eliminate the regulatory lag in future quarters.

Caribbean Regulated Utilities

- **Moderate Hit to Turks and Caicos from Hurricane Ike.** Earnings from the Caribbean Regulated Utilities segment were slightly lower than expected primarily due to the impact of Hurricane Ike at Fortis Turks and Caicos. Hurricane damage reduced earnings by approximately $1 million during the quarter and the utility is in the preliminary stage of determining its business interruption insurance claim.

- **Increased Ownership in Caribbean Utilities.** Fortis' ownership in Caribbean Utilities increased to about 57% (from 54%) through the purchase of 2.4 million shares of Caribbean Utilities at a total cost of approximately $28 million. In August 2008, Fortis acquired 2.1 million shares under a Rights Offering for about $25 million, and in October 2008, Fortis acquired an additional 267,669 shares for approximately $3 million.

- **Belize Electricity Leave to Appeal.** On July 25, 2008, Belize Electricity, which is 70% owned by Fortis, filed an application for a judicial review and appeal with the Supreme Court of Belize related to a negative regulatory decision we highlighted in *Research Comments* published May 29, 2008, and June 30, 2008. Leave was granted on October 3, 2008, and the judicial review is expected to be heard in late 2008.

Non-Regulated

- **Strong Hydrology at Fortis Generation.** Strong hydrology in Belize and upper New York State was the driver behind the better-than-expected earnings contribution from Fortis Generation. Fortis noted that year-to-date hydro production in Belize is 22% higher than the same period last year and that the Chalillo reservoir in Belize is currently full.

Acquisition and Equity Financing Outlook

Given the state of the equity and credit markets, management does not envision making any major acquisitions until markets stabilize. With respect to an acquisition, management continues to expect to finance the equity portion of an acquisition in the Canadian markets (i.e. unlikely to offer a share exchange to the target's shareholders if publicly-traded). We continue to believe that this strategy introduces a measure of financing risk as there is a possibility that investors may have hesitation supporting a transaction due to unfamiliarity with the regulatory history/outlook in the jurisdiction that the acquired utility operates. In the past, Fortis has acquired utility assets that investors were familiar with (e.g. Terasen) and/or were in jurisdictions that investors were familiar with the regulatory framework (in the case of both Terasen and Aquila Canada).

Should the company not be able to find a suitable acquisition in the next 12-18 months, we believe that the company will need to issue roughly $300 million of equity to enhance its capital ratios to bring them up to its target 40% equity (including preferred equity). Currently, the capital structure consists of 37.8% equity (including preferred equity).

2008 Estimate Increased; Dividend Forecasts Moderated

We have increased our 2008 EPS estimate to $1.56 (from $1.53) to primarily reflect the unexpected $4.5 million (about $0.03/share) future tax reversal related to AESO charges at FortisAlberta in Q3/08 (that had negatively impacted Q2/08 earnings). Our 2009 and 2010 EPS estimates remain unchanged at $1.57 and $1.63, respectively. Our segment earnings forecast is set out in Exhibit 2 below.

Due to the weak equity and credit market environment, we expect the board to take a conservative approach and moderate the growth of its dividend to conserve cash, but also to enhance equity on the balance sheet. Previously, we had expected Fortis to increase its dividend by $0.08/share in 2009 and 2010 resulting in a payout ratio at the top end of its 60-70% range. However, we believe that the board will err on the side of prudence and only increase the dividend by $0.04/share in 2009 resulting in an annual dividend of $1.04 (66% payout ratio). In 2010, assuming equity and credit markets stabilize, we expect an $0.08/share increase in the dividend. In the current market environment, we believe that more modest dividend growth for companies to reduce payout ratios towards the mid-60% range will not impact valuation.

Valuation

Our target price of $24.00 implies a forward P/E of 14.7x, and a required dividend yield of 4.75% based on a 12-month dividend distribution one year forward of $1.11. A 10 bp change in the required dividend yield would affect our price target by approximately $0.50 per share. The forward P/E multiple is in line with the average current multiple for the group, reflecting Fortis' slowing EPS growth profile that should approximate the average growth rate of the group over the next couple of years. In addition, the forward P/E used in our valuation is at the low end of the stock's 5-year historical P/E range (roughly 14x-20x), reflecting the weak equity markets and the slowing EPS growth profile.

Price Target Impediment

The political environment in Belize, risk of punitive regulatory decisions, economic/tourism conditions in its service territories, operational or financial issues at newly acquired businesses or power prices in Ontario may have implications for our target price as well as our earnings and dividend estimates.

Company Description

Fortis Inc. is a utility holding company for Newfoundland Power, FortisAlberta, FortisBC, Terasen Inc., Maritime Electric, Canadian Niagara Power, Cornwall Electric, BECOL, two electric utilities in the Turks and Caicos, and 70%-owned Belize Electricity. It also holds a 100% interest in Fortis Properties and a 57% interest in Caribbean Utilities.

Required Disclosures

Explanation of RBC Capital Markets Rating System

An analyst's 'sector' is the universe of companies for which the analyst provides research coverage. Accordingly, the rating assigned to a particular stock represents solely the analyst's view of how that stock will perform over the next 12 months relative to the analyst's sector average.

Ratings

Top Pick (TP): Represents best in Outperform category; analyst's best ideas; expected to significantly outperform the sector over 12 months; provides best risk-reward ratio; approximately 10% of analyst's recommendations.

Outperform (O): Expected to materially outperform sector average over 12 months.

Sector Perform (SP): Returns expected to be in line with sector average over 12 months.

Underperform (U): Returns expected to be materially below sector average over 12 months.

Risk Qualifiers (any of the following criteria may be present):

Average Risk (Avg): Volatility and risk expected to be comparable to sector; average revenue and earnings predictability; no significant cash flow/financing concerns over coming 12-24 months; fairly liquid.

Above Average Risk (AA): Volatility and risk expected to be above sector; below average revenue and earnings predictability; may not be suitable for a significant class of individual equity investors; may have negative cash flow; low market cap or float.

Speculative (Spec): Risk consistent with venture capital; low public float; potential balance sheet concerns; risk of being delisted.

Distribution of Ratings, Firmwide

For the purpose of ratings distributions, regulatory rules require member firms to assign ratings to one of three rating categories - Buy, Hold/Neutral, or Sell - regardless of a firm's own rating categories. Although RBC Capital Markets' ratings of Top Pick/Outperform, Sector Perform and Underperform most closely correspond to Buy, Hold/Neutral and Sell, respectively, the meanings are not the same because our ratings are determined on a relative basis (as described above).

Distribution of Ratings/IB Services
RBC Capital Markets

			Investment Banking Serv./Past 12 Mos.

These Recommended Lists include the Prime Opportunity List (RL 3), the Private Client Prime Portfolio (RL 4), the Prime Income List (RL 6), the Guided Portfolio: Large Cap (RL 7), and the Guided Portfolio: Dividend Growth (RL 8). The abbreviation 'RL On' means the date a security was placed on a Recommended List. The abbreviation 'RL Off' means the date a security was removed from a Recommended List.

Analyst Certification

All of the views expressed in this report accurately reflect the personal views of the responsible analyst(s) about any and all of the subject securities or issuers. No part of the compensation of the responsible analyst(s) named herein is, or will be, directly or indirectly, related to the specific recommendations or views expressed by the responsible analyst(s) in this report.

Dissemination of Research

RBC Capital Markets endeavours to make all reasonable efforts to provide research simultaneously to all eligible clients, having regard to local time zones in overseas jurisdictions. RBC Capital Markets' research is posted to our proprietary websites to ensure eligible clients receive coverage initiations and changes in rating, targets and opinions in a timely manner. Additional distribution may be done by the sales personnel via email, fax or regular mail. Clients may also receive our research via third party vendors. Please contact your investment advisor or institutional salesperson for more information regarding RBC Capital Markets research.
RBC Capital Markets also provides eligible clients with access to a database which may contain Short-Term trading calls on certain of the subject companies for which it currently provides equity research coverage. The database may be accessed via the following hyperlink https://www2.rbccm.com/cmonline/index.html. The information regarding Short-Term trading calls accessible through the database does not constitute a research report. These Short-Term trading calls are not formal ratings and reflect the research analyst's views with respect to market and trading events in the coming days or weeks and, as such, may differ from the price targets and recommendations in our published research reports reflecting the research analyst's views of the longer-term (one year) prospects of the subject company. Thus, it is possible that a subject company's common equity that is considered a long-term 'sector perform' or even an 'underperform' might be a Short-Term buying opportunity as a result of temporary selling pressure in the market; conversely, a subject company's common equity rated a long-term 'outperform' could be considered susceptible to a Short-Term downward price correction.

COMPANY UPDATE | COMMENT

DECEMBER 22, 2008

Fortis Inc. (TSX: FTS)

Resuming Coverage: Estimates Updated to Reflect Equity Issue

Sector Perform
Average Risk

Price:	24.34
Shares O/S (MM):	169.2
Dividend:	1.04
Float (MM):	169.2
Debt to Cap:	59%

Price Target:	24.00
Implied All-In Return:	3%
Market Cap (MM):	4,118
Yield:	4.3%

Event

Resuming coverage following a publishing restriction; updating estimates to reflect $300 million equity issue.

Investment Opinion

- **Equity Issue Earlier-than-Forecast.** Although the size of the equity issue ($300 million) was in line with our expectations, we had forecast the equity issue to occur in early 2010.
- **A Prudent Move on Timing to Shore Up the Balance Sheet.** Given the state of the equity and credit markets, the company took advantage of a window to issue common stock to restore total equity (common and preferreds) as a proportion of its capital structure to slightly over its 40% target.
- **Dividend Increase In Line with Expectations.** The $0.04/share increase in the annual dividend to $1.04/share matched our expectations.
- **2009 EPS Estimate Reduced to Reflect Dilution from Earlier than Expected Equity Issuance.** We reduced our 2009 EPS estimate to $1.54 (from $1.57) to reflect Fortis' share issuance and subsequent dilution, which is partially offset by other changes to our financial model (primarily a weaker Canadian dollar and lower interest expense from earlier share issuance). We have left our 2010 EPS estimate unchanged as the incremental dilution (due to a lower issue price than forecast) is expected to be roughly offset by the benefit of a weaker Canadian dollar.
- **A Good Defensive Choice in Uncertain Times.** For investors looking for maximum defensive positioning within the Energy Infrastructure sector, Fortis offers strong defensive characteristics as roughly 75% of its segment earnings are forecast to come from Canadian cost-of-service regulated utilities. Canadian cost-of-service regulation provides for reduced business risk (adjustments for changes in customer usage, pass through of actual interest costs, etc.).
- **Valuation.** Our target price of $24.00 implies a forward P/E of 14.7x, and a required dividend yield of 4.75% based on a 12-month dividend distribution one year forward of $1.12.

Priced as of prior trading day's market close, EST (unless otherwise noted).

For Required Disclosures, please see Page 4.

Financial Forecast Updated to Reflect Equity Issue

We reduced our 2009 EPS estimate to $1.54 (from $1.57) to reflect Fortis' share issuance and subsequent dilution, which is partially offset by other changes to our financial model (primarily a weaker Canadian dollar and lower interest expense from earlier share issuance). We had previously expected the company to issue roughly $300 million of equity at the beginning of 2010. We have left our 2010 EPS estimate unchanged as the incremental dilution (due to a lower issue price than forecast) is expected to be roughly offset by the benefit of a weaker Canadian dollar.

Our segment earnings forecast is set out in Exhibit 1.

Exhibit 1: Segment Earnings Forecast (In $MM except per share figures)

Valuation

Our target price of $24.00 implies a forward P/E of 14.7x, and a required dividend yield of 4.75% based on a 12-month dividend distribution one year forward of $1.12. A 10 bp change in the required dividend yield would affect our price target by approximately $0.50 per share. The forward P/E multiple is in line with the average current multiple for the group, reflecting Fortis' slowing EPS growth profile that should approximate the average growth rate of the group over the next couple of years. In addition, the forward P/E used in our valuation is at the low end of the stock's 5-year historical P/E range (roughly 14x-20x), reflecting the weak equity markets and the slowing EPS growth profile.

Price Target Impediment

The political environment in Belize, risk of punitive regulatory decisions, economic/tourism conditions in its service territories, operational or financial issues at newly acquired businesses or power prices in Ontario may have implications for our target price as well as our earnings and dividend estimates.

Company Description

Fortis Inc. is a utility holding company for Newfoundland Power, FortisAlberta, FortisBC, Terasen Inc., Maritime Electric, Canadian Niagara Power, Cornwall Electric, BECOL, two electric utilities in the Turks and Caicos, and 70%-owned Belize Electricity. It also holds a 100% interest in Fortis Properties and a 57% interest in Caribbean Utilities.

Required Disclosures

Explanation of RBC Capital Markets Rating System

An analyst's 'sector' is the universe of companies for which the analyst provides research coverage. Accordingly, the rating assigned to a particular stock represents solely the analyst's view of how that stock will perform over the next 12 months relative to the analyst's sector average.

Ratings

Top Pick (TP): Represents best in Outperform category; analyst's best ideas; expected to significantly outperform the sector over 12 months; provides best risk-reward ratio; approximately 10% of analyst's recommendations.

Outperform (O): Expected to materially outperform sector average over 12 months.

Sector Perform (SP): Returns expected to be in line with sector average over 12 months.

Underperform (U): Returns expected to be materially below sector average over 12 months.

Risk Qualifiers (any of the following criteria may be present):

Average Risk (Avg): Volatility and risk expected to be comparable to sector; average revenue and earnings predictability; no significant cash flow/financing concerns over coming 12-24 months; fairly liquid.

Above Average Risk (AA): Volatility and risk expected to be above sector; below average revenue and earnings predictability; may not be suitable for a significant class of individual equity investors; may have negative cash flow; low market cap or float.

Speculative (Spec): Risk consistent with venture capital; low public float; potential balance sheet concerns; risk of being delisted.

Distribution of Ratings

For the purpose of ratings distributions, regulatory rules require member firms to assign ratings to one of three rating categories - Buy, Hold/Neutral, or Sell - regardless of a firm's own rating categories. Although RBC Capital Markets' ratings of Top Pick/Outperform, Sector Perform and Underperform most closely correspond to Buy, Hold/Neutral and Sell, respectively, the meanings are not the same because our ratings are determined on a relative basis (as described above).

These Recommended Lists include the Prime Opportunity List (RL 3), the Private Client Prime Portfolio (RL 4), the Prime Income List (RL

6), the Guided Portfolio: Large Cap (RL 7), and the Guided Portfolio: Dividend Growth (RL 8). The abbreviation 'RL On' means the date a security was placed on a Recommended List. The abbreviation 'RL Off' means the date a security was removed from a Recommended List.

Analyst Certification

All of the views expressed in this report accurately reflect the personal views of the responsible analyst(s) about any and all of the subject securities or issuers. No part of the compensation of the responsible analyst(s) named herein is, or will be, directly or indirectly, related to the specific recommendations or views expressed by the responsible analyst(s) in this report.

Dissemination of Research

RBC Capital Markets endeavours to make all reasonable efforts to provide research simultaneously to all eligible clients, having regard to local time zones in overseas jurisdictions. RBC Capital Markets' research is posted to our proprietary websites to ensure eligible clients receive coverage initiations and changes in rating, targets and opinions in a timely manner. Additional distribution may be done by the sales personnel via email, fax or regular mail. Clients may also receive our research via third party vendors. Please contact your investment advisor or institutional salesperson for more information regarding RBC Capital Markets research.
RBC Capital Markets also provides eligible clients with access to a database which may contain Short-Term trading calls on certain of the subject companies for which it currently provides equity research coverage. The database may be accessed via the following hyperlink https://www2.rbccm.com/cmonline/index.html. The information regarding Short-Term trading calls accessible through the database does not constitute a research report. These Short-Term trading calls are not formal ratings and reflect the research analyst's views with respect to market and trading events in the coming days or weeks and, as such, may differ from the price targets and recommendations in our published research reports reflecting the research analyst's views of the longer-term (one year) prospects of the subject company. Thus, it is possible that a subject company's common equity that is considered a long-term 'sector perform' or even an 'underperform' might be a Short-Term buying opportunity as a result of temporary selling pressure in the market; conversely, a subject company's common equity rated a long-term 'outperform' could be considered susceptible to a Short-Term downward price correction.

PRICE TARGET REVISION | COMMENT

FEBRUARY 6, 2009

Fortis Inc. (TSX: FTS)

Good Q4 Results; Target Nudged Up to $25.00

Sector Perform
Average Risk

Price:	23.64	**Price Target:**	25.00 ↑ 24.00
		Implied All-In Return:	10%
Shares O/S (MM):	169.2	**Market Cap (MM):**	4,000
Dividend:	1.04	**Yield:**	4.4%
Float (MM):	169.2		
Debt to Cap:	59%		

Event

Fortis reported Q4 results; target increased to $25.00 (from $24.00).

Investment Opinion

- **Q4/08 Results Ahead of Expectations.** Q4/08 normalized EPS was $0.48 compared to our estimate of $0.43 and $0.45 a year ago. The higher-than-forecast earnings were almost entirely due to a strong performance from Terasen. The increased earnings were partially offset by higher Corporate costs (mostly business development costs).
- **Terasen Fired on All Cylinders in 2008.** Q4 results capped off a very strong year for Terasen. We believe that a good result in 2009 will be very modest growth off of the 2008 results, particularly given a 15 basis point reduction in the allowed ROE.
- **EPS Estimates Unchanged.** We remain comfortable with our 2009 and 2010 EPS estimates of $1.54 and $1.63, respectively. The forecast decline in 2009 EPS is due to the expiration of the water rights for the Rankine Hydro facility in Ontario at the end of April.
- **Outlook Unchanged - Still a Good Defensive Pick.** With roughly 75% of segment earnings coming from Canadian cost of service regulation, we consider Fortis a good defensive choice against weakness in the equity and credit markets along with the economy. However, at current prices and with earnings expected to decline in 2009, we remain comfortable with our Sector Perform ranking at this time.
- **Valuation: Price Target Nudged Up to $25.00 (from $24.00).** We have increased our price target to $25.00 to reflect a similar valuation (i.e., roughly 15.5x 2010E earnings) to Emera, which we view as a stock possessing comparable defensive characteristics to Fortis.

Priced as of prior trading day's market close, EST (unless otherwise noted).

For Required Disclosures, please see Page 5.

Q4/08 Results Modestly Ahead of Expectations Due to Strong Year at Terasen

Fortis' normalized EPS in Q4/08 was $0.48 compared to our estimate of $0.43 and $0.45 a year ago. The higher-than-forecast earnings were almost entirely due to a strong performance from Terasen, partially offset by higher Corporate costs (mostly business development costs). Q4 results capped off a very strong year for Terasen, and we believe that a good result in 2009 will be very modest growth off of the 2008 results, particularly given a 15 basis point reduction in the allowed ROE.

A table showing the Q4/08 results compared to our forecasts is set out in Exhibit 1.

Exhibit 1: Normalized Earnings (In $MM except per share figures)

	Q4/08	RBC CM Q4/08 Est.	Q4/07	2008	2007

Reported Earnings	$76.0	$68.6	$79.0	$245.0	$192.8	

Source: Company reports; RBC Capital Markets estimates

Outlook Unchanged: Fortis Is Still a Good Defensive Pick

With roughly 75% of segment earnings coming from Canadian cost of service regulation, we consider Fortis a good defensive choice against weakness in the equity and credit markets along with the economy. However, at current prices and with earnings expected to decline in 2009, we remain comfortable with our Sector Perform ranking at this time.

Target Price Nudged Up to $25.00 (from $24.00)

We have increased our price target to $25.00 to reflect a similar valuation (i.e., roughly 15.5x 2010E earnings) to Emera, which we view as a stock possessing comparable defensive characteristics to Fortis.

Financial Forecast Unchanged

We remain comfortable with our 2009 and 2010 EPS estimates of $1.54 and $1.63, respectively. We have set out our segment earnings forecast in Exhibit 2. Despite growth in the core Canadian utility operations, we expect EPS in 2009 to decline due to the expiration of the water rights for the Rankine Hydro facility in Ontario at the end of April.

Exhibit 2: Segment Earnings Forecast (In $MM except per share figures)

Companies Mentioned

Emera Inc. [TSX: EMA; $21.24; Sector Perform, Average Risk]

Valuation

Our target price of $25.00 implies a forward P/E of 15.5x, and a required dividend yield of 4.5% based on a 12-month dividend distribution one year forward of $1.13. A 10 bp change in the required dividend yield would affect our price target by approximately $0.50 per share. The forward P/E multiple is in line with the multiple that we use for Emera, which we view as a stock possessing comparable defensive characteristics to Fortis.

Price Target Impediment

The political environment in Belize, risk of punitive regulatory decisions, economic/tourism conditions in its service territories, operational or financial issues at newly acquired businesses or power prices in Ontario may have implications for our target price as well as our earnings and dividend estimates.

Company Description

Fortis Inc. is a utility holding company for Newfoundland Power, FortisAlberta, FortisBC, Terasen Inc., Maritime Electric, Canadian Niagara Power, Cornwall Electric, BECOL, two electric utilities in the Turks and Caicos, and 70%-owned Belize Electricity. It also holds a 100% interest in Fortis Properties and a 57% interest in Caribbean Utilities.

Analyst Certification

All of the views expressed in this report accurately reflect the personal views of the responsible analyst(s) about any and all of the subject securities or issuers. No part of the compensation of the responsible analyst(s) named herein is, or will be, directly or indirectly, related to the specific recommendations or views expressed by the responsible analyst(s) in this report.

Dissemination of Research

RBC Capital Markets endeavours to make all reasonable efforts to provide research simultaneously to all eligible clients, having regard to local time zones in overseas jurisdictions. RBC Capital Markets' research is posted to our proprietary websites to ensure eligible clients receive coverage initiations and changes in rating, targets and opinions in a timely manner. Additional distribution may be done by the sales personnel via email, fax or regular mail. Clients may also receive our research via third party vendors. Please contact your investment advisor or institutional salesperson for more information regarding RBC Capital Markets research.
RBC Capital Markets also provides eligible clients with access to a database which may contain Short-Term trading calls on certain of the subject companies for which it currently provides equity research coverage. The database may be accessed via the following hyperlink https://www2.rbccm.com/cmonline/index.html. The information regarding Short-Term trading calls accessible through the database does not constitute a research report. These Short-Term trading calls are not formal ratings and reflect the research analyst's views with respect to market and trading events in the coming days or weeks and, as such, may differ from the price targets and recommendations in our published research reports reflecting the research analyst's views of the longer-term (one year) prospects of the subject company. Thus, it is possible that a subject company's common equity that is considered a long-term 'sector perform' or even an 'underperform' might be a Short-Term buying opportunity as a result of temporary selling pressure in the market; conversely, a subject company's common equity rated a long-term 'outperform' could be considered susceptible to a Short-Term downward price correction.

Conflicts Disclosures

RBC Capital Markets Policy for Managing Conflicts of Interest in Relation to Investment Research is available from us on request. To access our current policy, clients should refer to
http://www.rbccm.com/cm/file/0,,63022,00.pdf
or send a request to RBC CM Research Publishing, P.O. Box 50, 200 Bay Street, Royal Bank Plaza, 29th Floor, South Tower, Toronto, Ontario M5J 2W7. We reserve the right to amend or supplement this policy at any time.

Important Disclosures

The analyst(s) responsible for preparing this research report received compensation that is based upon various factors, including total revenues of the member companies of RBC Capital Markets and its affiliates, a portion of which are or have been generated by investment banking activities of the member companies of RBC Capital Markets and its affiliates.

Royal Bank of Canada, together with its affiliates, beneficially owns 1 percent or more of a class of common equity securities of Emera Incorporated.

A member company of RBC Capital Markets or one of its affiliates received compensation for products or services other than investment banking services from Emera Incorporated during the past 12 months. During this time, a member company of RBC Capital Markets or one of its affiliates provided non-securities services to Emera Incorporated.

RBC Capital Markets is currently providing Emera Incorporated with non-securities services.

RBC Capital Markets has provided Emera Incorporated with non-securities services in the past 12 months.

A member company of RBC Capital Markets or one of its affiliates managed or co-managed a public offering of securities for Fortis Inc. in the past 12 months.

A member company of RBC Capital Markets or one of its affiliates received compensation for investment banking services from Fortis Inc. in the past 12 months.

Royal Bank of Canada, together with its affiliates, beneficially owns 1 percent or more of a class of common equity securities of Fortis Inc.

A member company of RBC Capital Markets or one of its affiliates received compensation for products or services other than investment banking services from Fortis Inc. during the past 12 months. During this time, a member company of RBC Capital Markets or one of its affiliates provided non-investment banking securities-related services to Fortis Inc.

Additional Disclosures

RBC Capital Markets is the business name used by certain subsidiaries of Royal Bank of Canada, including RBC Dominion Securities Inc., RBC Capital Markets Corporation, Royal Bank of Canada Europe Limited and Royal Bank of Canada - Sydney Branch. The information contained in this report has been compiled by RBC Capital Markets from sources believed to be reliable, but no representation or warranty, express or implied, is made by Royal Bank of Canada, RBC Capital Markets, its affiliates or any other person as to its accuracy, completeness or correctness. All opinions and estimates contained in this report constitute RBC Capital Markets' judgement as of the date of this report, are subject to change without notice and are provided in good faith but without legal responsibility. Nothing in this report constitutes legal, accounting or tax advice or individually tailored investment advice. This material is prepared for general circulation to clients and has been prepared without regard to the individual financial circumstances and objectives of persons who receive it. The investments or services contained in this report may not be suitable for you and it is recommended that you consult an independent investment advisor if you are in doubt about the suitability of such investments or services. This report is not an offer to sell or a solicitation of an offer to buy any securities. Past performance is not a guide to future performance, future returns are not guaranteed, and a loss of original capital may occur. RBC Capital Markets research analyst compensation is based in part on the overall profitability of RBC Capital Markets, which includes profits attributable to investment banking revenues. Every province in Canada, state in the U.S., and most countries throughout the world have their own laws regulating the types of securities and other investment products which may be offered to their residents, as well as the process for doing so. As a result, the securities discussed in this report may not be eligible for sale in some jurisdictions. This report is not, and under no circumstances should be construed as, a solicitation to act as securities broker or dealer in any jurisdiction by any person or company that is not legally permitted to carry on the business of a securities broker or dealer in that jurisdiction. To the full extent permitted by law neither RBC Capital Markets nor any of its affiliates, nor any other person, accepts any liability whatsoever for any direct or consequential loss arising from any use of this report or the information contained herein. No matter contained in this document may be reproduced or copied by any means without the prior consent of RBC Capital Markets.

Additional information is available on request.

Dividend:	1.04	**Yield:**	4.7%
Float (MM):	169.2		
Debt to Cap:	59%		

Event

Upgrading the shares to Outperform (from Sector Perform).

Investment Opinion

- **Increasing Ranking to Outperform (from Sector Perform).** As a result of the potential upside in earnings due to changes in the ROE and the estimated impact on value, we have upgraded the shares of Fortis to Outperform.
- **Fortis Could be an Indirect Beneficiary from NEB Decision.** The National Energy Board (NEB) released its cost of capital decision for the TQM pipeline, which had the effect of significantly increasing the allowed ROE by roughly 300 basis points. For details on the NEB decision, please see today's *Research Comment* on the Energy Infrastructure sector titled "Goodbye Formula, Hello Higher Returns".
- **Potentially Significant Earnings Upside.** Using the framework of the NEB's decision, we estimate that Fortis could realize about $0.22/share of increased earnings.
- **Key Risk: Provincial Regulators May Not Follow Suit.** The NEB decision does not have any direct impact on Fortis, and it is possible that the provincial regulators may not follow the NEB's lead and increase ROEs. Even if they do, it is uncertain as to how much they will increase returns. However, given the magnitude of the increase in ROEs implied by the NEB's decision, we believe it will be very difficult for the provincial regulators to not improve returns. If there is no ROE relief, it may become difficult for provincially-regulated utility businesses to attract capital given what would be a significant difference in ROEs relative to NEB-regulated pipelines without a meaningfully different risk profile.
- **Valuation: Target Price Increased to $27.00 (from $25.00).** Our new price target includes roughly half of the estimated upside from higher ROEs. We have used 50% of the potential upside to account for uncertainty as to whether provincial regulators will follow the NEB's lead and increase allowed returns and if they do, how much the increased ROEs will be.

Priced as of prior trading day's market close, EST (unless otherwise noted).

For Required Disclosures, please see Page 3.

Valuation

Our target price of $27.00 implies a forward P/E of 15.3x 2010E EPS plus roughly half of the estimated upside from higher ROEs (about $2/share). We have used 50% of the potential upside to account for uncertainty as to whether provincial regulators will follow the National Energy Board's lead and increase allowed returns and if they do, how much the increased ROEs will be. The forward P/E multiple is in line with the multiple that we use for Emera, which we view as a stock possessing comparable defensive characteristics to Fortis.

Price Target Impediment

The political environment in Belize, whether provincial regulators increase ROEs for the company's businesses, risk of punitive regulatory decisions, economic/tourism conditions in its service territories, operational or financial issues at newly acquired businesses or power prices in Ontario may have implications for our target price as well as our earnings and dividend estimates.

Company Description

Fortis Inc. is a utility holding company for Newfoundland Power, FortisAlberta, FortisBC, Terasen Inc., Maritime Electric, Canadian Niagara Power, Cornwall Electric, BECOL, two electric utilities in the Turks and Caicos, and 70%-owned Belize Electricity. It also holds a 100% interest in Fortis Properties and a 57% interest in Caribbean Utilities.

Required Disclosures

Explanation of RBC Capital Markets Rating System

An analyst's 'sector' is the universe of companies for which the analyst provides research coverage. Accordingly, the rating assigned to a particular stock represents solely the analyst's view of how that stock will perform over the next 12 months relative to the analyst's sector average.

Ratings

Top Pick (TP): Represents best in Outperform category; analyst's best ideas; expected to significantly outperform the sector over 12 months; provides best risk-reward ratio; approximately 10% of analyst's recommendations.

Outperform (O): Expected to materially outperform sector average over 12 months.

Sector Perform (SP): Returns expected to be in line with sector average over 12 months.

Underperform (U): Returns expected to be materially below sector average over 12 months.

Risk Qualifiers (any of the following criteria may be present):

Average Risk (Avg): Volatility and risk expected to be comparable to sector; average revenue and earnings predictability; no significant cash flow/financing concerns over coming 12-24 months; fairly liquid.

Above Average Risk (AA): Volatility and risk expected to be above sector; below average revenue and earnings predictability; may not be suitable for a significant class of individual equity investors; may have negative cash flow; low market cap or float.

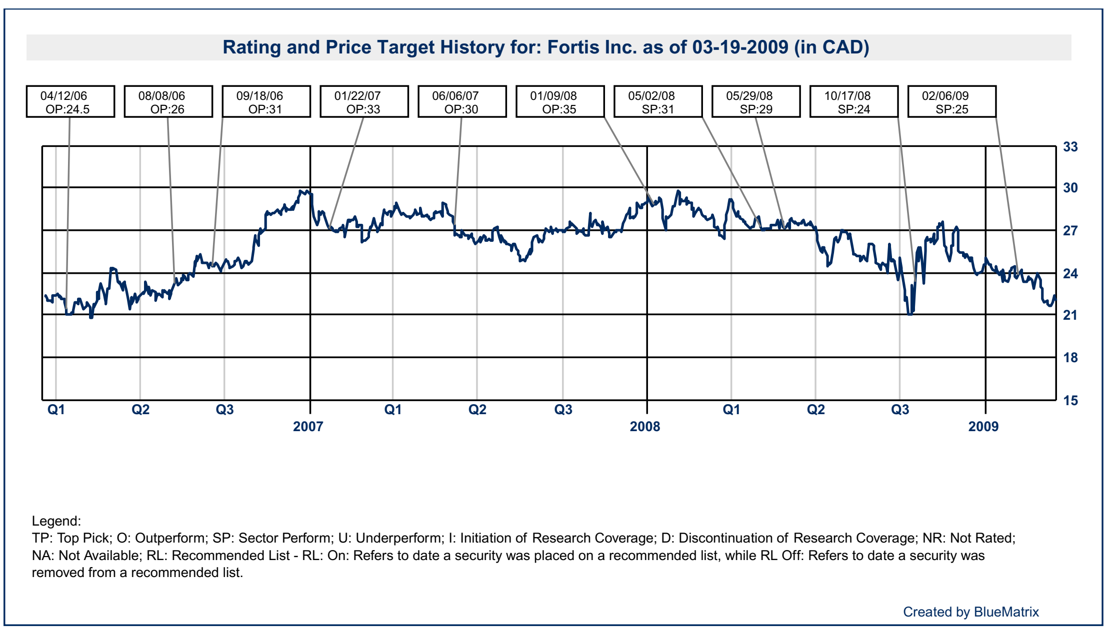
Speculative (Spec): Risk consistent with venture capital; low public float; potential balance sheet concerns; risk of being delisted.

Distribution of Ratings

For the purpose of ratings distributions, regulatory rules require member firms to assign ratings to one of three rating categories - Buy, Hold/Neutral, or Sell - regardless of a firm's own rating categories. Although RBC Capital Markets' ratings of Top Pick/Outperform, Sector Perform and Underperform most closely correspond to Buy, Hold/Neutral and Sell, respectively, the meanings are not the same because our ratings are determined on a relative basis (as described above).

Distribution of Ratings
RBC Capital Markets, Equity Research

			Investment Banking Serv./Past 12 Mos.	
Rating	Count	Percent	Count	Percent
BUY[TP/O]	472	43.60	107	22.67
HOLD[SP]	501	46.30	78	15.57
SELL[U]	109	10.10	13	11.93



References to a Recommended List in the recommendation history chart may include one or more recommended lists or model portfolios maintained by a business unit of the Wealth Management Division of RBC Capital Markets Corporation. These Recommended Lists include the Prime Opportunity List (RL 3), the Private Client Prime Portfolio (RL 4), the Prime Income List (RL

6), the Guided Portfolio: Large Cap (RL 7), and the Guided Portfolio: Dividend Growth (RL 8). The abbreviation 'RL On' means the date a security was placed on a Recommended List. The abbreviation 'RL Off' means the date a security was removed from a Recommended List.

Analyst Certification

All of the views expressed in this report accurately reflect the personal views of the responsible analyst(s) about any and all of the subject securities or issuers. No part of the compensation of the responsible analyst(s) named herein is, or will be, directly or indirectly, related to the specific recommendations or views expressed by the responsible analyst(s) in this report.

Dissemination of Research

RBC Capital Markets endeavours to make all reasonable efforts to provide research simultaneously to all eligible clients, having regard to local time zones in overseas jurisdictions. RBC Capital Markets' research is posted to our proprietary websites to ensure eligible clients receive coverage initiations and changes in rating, targets and opinions in a timely manner. Additional distribution may be done by the sales personnel via email, fax or regular mail. Clients may also receive our research via third party vendors. Please contact your investment advisor or institutional salesperson for more information regarding RBC Capital Markets research.
RBC Capital Markets also provides eligible clients with access to a database which may contain Short-Term trading calls on certain of the subject companies for which it currently provides equity research coverage. The database may be accessed via the following hyperlink https://www2.rbccm.com/cmonline/index.html. The information regarding Short-Term trading calls accessible through the database does not constitute a research report. These Short-Term trading calls are not formal ratings and reflect the research analyst's views with respect to market and trading events in the coming days or weeks and, as such, may differ from the price targets and recommendations in our published research reports reflecting the research analyst's views of the longer-term (one year) prospects of the subject company. Thus, it is possible that a subject company's common equity that is considered a long-term 'sector perform' or even an 'underperform' might be a Short-Term buying opportunity as a result of temporary selling pressure in the market; conversely, a subject company's common equity rated a long-term 'outperform' could be considered susceptible to a Short-Term downward price correction.

COMPANY UPDATE | COMMENT

MAY 1, 2009

Fortis Inc. (TSX: FTS)

Q1 Results A Little Light; Outlook Unchanged

Outperform
Average Risk

Price:	22.15	**Price Target:**	27.00
		Implied All-In Return:	27%
Shares O/S (MM):	169.8	**Market Cap (MM):**	3,761
Dividend:	1.04	**Yield:**	4.7%
Float (MM):	169.8		
Debt to Cap:	59%		

Event

Fortis reported Q1 results.

Investment Opinion

- **Q1/09 Results Modestly Short of Expectations.** Q1/09 normalized EPS was $0.53 compared to our estimate of $0.57 and $0.58 a year ago. The core Canadian regulated assets performed in line, while earnings were short from the utilities in the Caribbean (cooler weather and lower tourism).
- **Estimates Reduced to Primarily Reflect Softer Forecast for the Caribbean.** We have reduced our 2009 and 2010 EPS estimates to $1.48 and $1.60, respectively (from $1.54 and $1.63), to reflect the Q1/09 results and expected continued softness from utilities in the Caribbean due to the economic slowdown and its impact on tourism.
- **Potential for ROE Upside.** Processes to review returns are ongoing in Alberta (would impact FortisAlberta) and Ontario (would impact FortisOntario). Further, Fortis expects to ask the B.C. Utilities Commission for a higher ROE when it files its rate case for Terasen (expected this summer) along with asking the Public Utilities Board to look at Newfoundland Power's ROE as part of its rate filing later this year.
- **Strong Growth in Core Business Plus ROE Optionality.** With $1 billion of investment primarily in the core utilities forecast for 2009 and roughly $4.5 billion of expected investment over the next five years, there is visibility into attractive future growth with below average risk. Further, based on the NEB's recent cost of capital decision, we see up to $0.22/share of potential earnings upside depending on the outcome of various reviews of provincially regulated ROEs.
- **Modest-Sized Acquisitions Possible.** Although management continues to caution against a large U.S. utility acquisition, more modest-sized acquisitions (under $1 billion in total) are possible. Specifically, up to $50 million could be deployed into Class A or B office space. Also, Fortis would be a logical buyer of the Waneta hydro plant near Trail, B.C. should it come up for sale, as it already operates the plant and may be best positioned to handle the regulatory approval.
- **Valuation:** Our target price of $27.00 (unchanged) implies a forward P/E of 15.5x 2010E EPS plus roughly half of the estimated upside from higher ROEs (about $2/share).

Priced as of prior trading day's market close, EST (unless otherwise noted).

For Required Disclosures, please see Page 5.

Q1/09 Results Modestly Short of Expectations Primarily Due to Weakness in the Caribbean

Fortis' Q1/09 normalized EPS was $0.53 compared to our estimate of $0.57 and Q1/08 normalized EPS of $0.58. As shown in Exhibit 1, almost all of the segments performed in line with expectations, with the shortfall coming from the regulated utilities in the Caribbean. Specifically, lower demand due to cooler weather (11% below average) and lower tourism activity due to the economic slowdown were the key drivers behind the lower-than-expected results.

Exhibit 1: Normalized Earnings (In $MM except per share figures)

	Q1/09	RBC CM Q1/09E	Q1/08	Comments
Newfoundland Power	$6.0	$6.3	$6.0	
FortisOntario & Maritime Electric	5.0	4.2	4.0

Source: Company reports; RBC Capital Markets estimates

Highlights of the Quarter

- **Canadian Regulated Utilities: Performing as Expected.** In aggregate, the Canadian Regulated Utilities contributed $95 million to earnings compared to our estimate of $96.4 million and $91 million in Q1/08. The year-over-year increase is primarily due to rate base growth.
- **Caribbean Regulated Utilities: Impacted by Cooler Weather and the Economic Downturn.** In Q1/09, earnings from the regulated utilities in the Caribbean were $4 million compared to our estimate of $7.5 million and $7 million a year ago. During the quarter, about half of the shortfall was due to 11% cooler-than-normal weather, with the other half coming from lower demand due to reduced tourism-related activity resulting from the economic downturn.
- **Non-Regulated Generation: In Line with Expectations.** The non-regulated generation segment contributed $6 million to earnings in Q1/09, in line with our estimate and results in Q1/08. Management disclosed that the Chalillo reservoir in Belize was at normal levels for this time of year.
- **Non-Regulated Properties: Results as Expected Although Potential Weakness Ahead; Small Acquisition Announced.** Normalized earnings in Q1/09 from the properties division were basically flat at $2.5 million compared to Q1/08 and our estimate of $3 million. During the quarter, we normalized for $0.5 million of one-time severance charges. Due to lower hotel occupancy, REVPAR was down 5% during the quarter to $64.40 compared to $67.82 a year ago. In April 2009, the company acquired the 214-room Holiday Inn Select in Windsor for $7 million.

Acquisition Outlook: Large U.S. Utility Acquisitions Still on Hold, but More Modest-Sized Acquisitions a Possibility

- **Major U.S. Utility Acquisitions Still on Hold.** Given the economic and capital markets uncertainty, management continues to caution against the possibility of a major U.S. utility acquisition.
- **More Modest-Sized Acquisitions a Possibility.** Given the common share issuance in December 2008, management believes it has the ability to complete an acquisition (or acquisitions) of a little under $1 billion through available credit and the

issuance of preferred shares. Due to the decline in the real estate market, management sees up to $50 million of acquisition potential, particularly for Class A or Class B office space. In terms of a potentially larger acquisition, Fortis would be a logical buyer of the 450 MW Waneta hydro facility near Trail, B.C. should it become available for sale, as Fortis operates and maintains the plant, which is owned by Teck.

Potential for ROE Upside: Fortis Expected to Be Active in 2009

As initially highlighted in our *Research Comment* dated March 20, 2009, we see the potential for significant upside in earnings as a result of possible changes in regulated ROEs following a key decision from the National Energy Board (NEB) that increased returns for the TQM pipeline.

- **Processes Under Way in Alberta and Ontario.** The Alberta Utilities Commission (AUC) has already commenced a process to review its Generic ROE in addition to evaluating the potential to standardize capital structures. The Ontario Energy Board (OEB) has initiated a consultative process to determine whether an adjustment to the cost of capital is necessary. The result of these processes could impact FortisAlberta and FortisOntario.
- **Terasen to Seek Higher ROE as Part of Its Upcoming Rate Filing.** Terasen is expected to file a rate case this summer that we expect to include a request for a higher ROE citing the NEB's cost of capital decision as supporting evidence. If the B.C. Utilities Commission (BCUC) grants a higher ROE for Terasen, we expect FortisBC to also benefit.
- **Newfoundland Power to File a Rate Case Later This Year.** With respect to potential upside in allowed ROE, we believe that there is limited upside based on the parameters of the NEB's decision for TQM due to the higher equity thickness in place for Newfoundland Power.

As shown in Exhibit 3, we see up to $0.22/share of upside if the parameters from the NEB's cost of capital decision for TQM are applied to Fortis' operations.

Exhibit 2: Potential Upside from a Higher ROE Based on the NEB's Cost of Capital Decision for TQM

	Potential EPS Impact	Comments
FortisAlberta (Alberta Utilities Commission)	$0.05	
Terasen, FortisBC (B.C. Utilities Commission)	0.17	
FortisOntario (Ontario Energy Board)	0.00	Return parameters appear to be consistent with NEB decision
Newfoundland Power (Newfoundland PUB)	0.00	Return parameters appear to be consistent with NEB decision
Total	$0.22

Earnings Estimates Reduced to Reflect Q1 Results and the Impact of a Weak Economy

Primarily reflecting lower forecast earnings from the utilities in the Caribbean (lower Q1 results and softness in tourism), we have reduced our 2009 and 2010 EPS estimates to $1.48 and $1.60, respectively (from $1.54 and $1.63, respectively).

Valuation

Our target price of $27.00 implies a forward P/E of 15.5x 2010E EPS plus roughly half of the estimated upside from higher ROEs (about $2/share). We have used 50% of the potential upside to account for uncertainty as to whether provincial regulators will follow the National Energy Board's lead and increase allowed returns and if they do, how much the increased ROEs will be. The forward P/E multiple is in line with the multiple that we use for Emera, which we view as a stock possessing comparable defensive characteristics to Fortis.

Price Target Impediment

The political environment in Belize, whether provincial regulators increase ROEs for the company's businesses, risk of punitive regulatory decisions, economic/tourism conditions in its service territories, operational or financial issues at newly acquired businesses or power prices in Ontario may have implications for our target price as well as our earnings and dividend estimates.

Company Description

Fortis Inc. is a utility holding company for Newfoundland Power, FortisAlberta, FortisBC, Terasen Inc., Maritime Electric, Canadian Niagara Power, Cornwall Electric, BECOL, two electric utilities in the Turks and Caicos, and 70%-owned Belize Electricity. It also holds a 100% interest in Fortis Properties and a 57% interest in Caribbean Utilities.

Required Disclosures

Explanation of RBC Capital Markets Rating System

An analyst's 'sector' is the universe of companies for which the analyst provides research coverage. Accordingly, the rating assigned to a particular stock represents solely the analyst's view of how that stock will perform over the next 12 months relative to the analyst's sector average.

Ratings

Top Pick (TP): Represents best in Outperform category; analyst's best ideas; expected to significantly outperform the sector over 12 months; provides best risk-reward ratio; approximately 10% of analyst's recommendations.

Outperform (O): Expected to materially outperform sector average over 12 months.

Sector Perform (SP): Returns expected to be in line with sector average over 12 months.

Underperform (U): Returns expected to be materially below sector average over 12 months.

Risk Qualifiers (any of the following criteria may be present):

Average Risk (Avg): Volatility and risk expected to be comparable to sector; average revenue and earnings predictability; no significant cash flow/financing concerns over coming 12-24 months; fairly liquid.

Above Average Risk (AA): Volatility and risk expected to be above sector; below average revenue and earnings predictability; may not be suitable for a significant class of individual equity investors; may have negative cash flow; low market cap or float.

Speculative (Spec): Risk consistent with venture capital; low public float; potential balance sheet concerns; risk of being delisted.

Distribution of Ratings

For the purpose of ratings distributions, regulatory rules require member firms to assign ratings to one of three rating categories - Buy, Hold/Neutral, or Sell - regardless of a firm's own rating categories. Although RBC Capital Markets' ratings of Top Pick/Outperform, Sector Perform and Underperform most closely correspond to Buy, Hold/Neutral and Sell, respectively, the meanings are not the same because our ratings are determined on a relative basis (as described above).

References to a Recommended List in the recommendation history chart may include one or more recommended lists or model portfolios maintained by a business unit of the Wealth Management Division of RBC Capital Markets Corporation. These Recommended Lists include the Prime Opportunity List (RL 3), a former list called the Private Client Prime Portfolio (RL 4), the Prime

Income List (RL 6), the Guided Portfolio: Large Cap (RL 7), and the Guided Portfolio: Dividend Growth (RL 8). The abbreviation 'RL On' means the date a security was placed on a Recommended List. The abbreviation 'RL Off' means the date a security was removed from a Recommended List.

Analyst Certification

All of the views expressed in this report accurately reflect the personal views of the responsible analyst(s) about any and all of the subject securities or issuers. No part of the compensation of the responsible analyst(s) named herein is, or will be, directly or indirectly, related to the specific recommendations or views expressed by the responsible analyst(s) in this report.

Dissemination of Research

RBC Capital Markets endeavours to make all reasonable efforts to provide research simultaneously to all eligible clients, having regard to local time zones in overseas jurisdictions. RBC Capital Markets' research is posted to our proprietary websites to ensure eligible clients receive coverage initiations and changes in rating, targets and opinions in a timely manner. Additional distribution may be done by the sales personnel via email, fax or regular mail. Clients may also receive our research via third party vendors. Please contact your investment advisor or institutional salesperson for more information regarding RBC Capital Markets research.
RBC Capital Markets also provides eligible clients with access to a database which may contain Short-Term trading calls on certain of the subject companies for which it currently provides equity research coverage. The database may be accessed via the following hyperlink https://www2.rbccm.com/cmonline/index.html. The information regarding Short-Term trading calls accessible through the database does not constitute a research report. These Short-Term trading calls are not formal ratings and reflect the research analyst's views with respect to market and trading events in the coming days or weeks and, as such, may differ from the price targets and recommendations in our published research reports reflecting the research analyst's views of the longer-term (one year) prospects of the subject company. Thus, it is possible that a subject company's common equity that is considered a long-term 'sector perform' or even an 'underperform' might be a Short-Term buying opportunity as a result of temporary selling pressure in the market; conversely, a subject company's common equity rated a long-term 'outperform' could be considered susceptible to a Short-Term downward price correction.

Event

Fortis reported Q2/09 results; reducing to Sector Perform (from Outperform).

Investment Opinion

- **Shares Fairly Reflecting Potential ROE Upside; Reducing to Sector Perform (from Outperform).** We are reducing our ranking for the shares to Sector Perform due to price appreciation, with the current share price resulting in an implied all-in return of 9%. At the current price, we believe that the shares are reflecting a roughly 50% probability that provincial regulators (namely the BCUC and to a lesser extent the AUC) will increase regulated ROEs to a level consistent with the National Energy Board's decision for the TQM pipeline.
- **Q2 Results In Line with Expectations.** Q2/09 normalized EPS was in line with our estimate of $0.29, and a modest decrease from $0.31 in Q2/08. After normalizing for $3 million of tax benefits at FortisAlberta, there were no major variances in Fortis' segment results compared to our estimates.
- **Stay Tuned for Key Decisions on Allowed ROEs.** Fortis has filed rate cases seeking an increase in the allowed ROE in B.C. and Newfoundland, and is taking part in the general cost of capital review processes in Alberta and Ontario. Positive decisions from the various provincial regulators to levels in line with the NEB's decision for TQM could increase annual earnings by $0.22/share.
- **Investment in Canadian Regulated Utilities Expected to Drive Low-Risk EPS Growth.** Fortis continues to make significant investments in its regulated utility assets. Capex is expected to exceed $1 billion for 2009, and total approximately $5 billion through 2013.
- **Valuation.** Our target price of $27.00 (unchanged) implies a forward P/E of 15.5x 2010E EPS plus roughly half of the estimated upside from higher regulated ROEs (about $2/share).

Priced as of prior trading day's market close, EST (unless otherwise noted).

For Required Non-U.S. Analyst and Conflicts Disclosures, see page 6.

Reducing Ranking to Sector Perform; Shares Fairly Reflect Potential ROE Upside

We are reducing our ranking for the shares to Sector Perform due to price appreciation, which we partially attribute to the market pricing in potential upside from an increase in regulated ROEs. We believe that the share price is reflecting a roughly 50% probability (i.e. about $2/share) that provincial regulators (namely the BCUC and to a lesser extent the AUC) will increase regulated ROEs to a level consistent with the National Energy Board's decision for the TQM pipeline. Backing out the $2/share of potential upside from the current share price results in a valuation of 15x 12-month forward earnings, which is a slight premium to the group average.

Given the uncertainty as to whether the provincial regulators will approve a fair return in line with the NEB's decision, we recommend taking profits at this time. We believe Fortis remains a good choice for defensive-oriented investors with a cautious view on the equity markets, the credit markets and the economy. For investors with high conviction that ROEs will increase, Fortis has the greatest earnings leverage to higher regulated returns in our coverage universe.

Q2/09 Results In Line With Expectations

Fortis' Q2/09 normalized EPS was in line with our estimate of $0.29, a modest decrease from $0.31 in Q2/08. The normalized earnings were generally flat, but modestly lower on a per share basis due to the dilutive impact of the share issuance in Q4/08. Terasen performed better-than-expected due to a lower effective corporate tax rate and lower financing costs, offset by lower-than-expected contributions from Fortis Generation due to weak power prices.

Exhibit 1: Normalized Earnings (In $MM except per share figures)

	Q2 2009	RBC CM Q2 2009E	Q2 2008	Comments

Source: Company reports; RBC Capital Markets estimates

Highlights of the Quarter

- **Canadian Regulated Utilities: Performing Well.** The Canadian Regulated Utilities contributed $50 million to earnings compared to our estimate of $48 million and $45 million in Q2/08. The earnings growth is primarily due to rate base growth as Fortis continues to invest in the regulated businesses. Management indicated that Fortis' 2009 capital expenditures will exceed $1 billion and the total expenditures for the 2009 to 2013 period would total approximately $5 billion.

- **Caribbean Regulated Utilities: Generally In Line With Expectations.** The Q2/09 earnings from the regulated utilities in the Caribbean were $7 million compared to our estimate of $6 million and $8 million in Q2/08. Year-over-year, a stronger U.S. dollar offset some of the decline from lower tourism activity and the reduction in the allowed return for Belize Electricity.

- **Non-Regulated Generation: Below Expectations Due to Weak Power Prices.** The non-regulated generation segment contributed $3 million to earnings in Q2/09 compared to our estimate of $5 million and Q2/08 earnings of $7 million. The variance compared to our forecast was primarily due to weak power prices, particularly in New York.
- **Non-Regulated Properties: Slightly Ahead of Expectations.** Normalized earnings in Q2/09 from the properties division improved slightly to $8 million from $7 million in Q2/08, beating our estimate of $7 million. The results include the acquisition of the Sheraton Hotel Newfoundland (November 2008) and the Holiday Inn Select (April 2009) in Windsor, Ontario. REVPAR was down 5% during the quarter to $83.15 compared to $87.54 a year ago.

Potential for ROE Upside

As initially highlighted in our *Research Comment* dated March 20, 2009, we see the potential for significant upside in earnings as a result of possible changes in regulated ROEs following a key decision from the National Energy Board that increased returns for the TQM pipeline.

- **Processes Underway in Alberta and Ontario.** The Alberta Utilities Commission has already commenced a process to review its Generic ROE in addition to evaluating the potential to standardize capital structures. The Ontario Energy Board has initiated a consultative process to determine whether an adjustment to the cost of capital is necessary. The result of these processes could impact FortisAlberta and FortisOntario.
- **Terasen Seeks Higher ROE as Part of its Rate Filing.** Terasen filed a rate case in May which includes a request for an increase in the allowed ROE to 11% (from the current 8.47%) and an increase in the equity thickness to 40% (from 35%). If the B.C. Utilities Commission grants a higher ROE for Terasen, we expect FortisBC to also benefit.
- **Newfoundland Power Files Rate Case Seeking Higher ROE.** With respect to the potential upside in allowed ROE, we believe that there is limited upside based on the parameters of the NEB's decision for TQM due to the higher equity thickness already in place for Newfoundland Power.

As shown in Exhibit 3, we see up to $0.22/share of upside if the parameters from the NEB's cost of capital decision for TQM are applied to Fortis' operations.

Exhibit 2: Potential Upside From a Higher ROE Based on the NEB's Cost of Capital Decision for TQM

	Potential EPS Impact	Comments
FortisAlberta (Alberta Utilities Commission)	$0.05	
Terasen, FortisBC (B.C. Utilities Commission)	0.17	
FortisOntario (Ontario Energy Board)	0.00	Return parameters appear to be consistent with NEB decision
Newfoundland Power (Newfoundland PUB)	0.00	Return parameters appear to be consistent with NEB decision
Total	$0.22

Valuation

Our target price of $27.00 implies a forward P/E of 15.5x 2010E EPS plus roughly half of the estimated upside from higher regulated ROEs (about $2/share). We have used 50% of the potential upside to account for uncertainty as to whether provincial regulators will follow the National Energy Board's lead and increase allowed returns and if they do, how much the increased ROEs will be. The forward P/E multiple is in line with the multiple that we use for peers.

Price Target Impediment

The political environment in Belize, whether provincial regulators increase ROEs for the company's businesses, risk of punitive regulatory decisions, economic/tourism conditions in its service territories, operational or financial issues at newly acquired businesses or power prices in Ontario may have implications for our target price as well as our earnings and dividend estimates.

Company Description

Fortis Inc. is a utility holding company for Newfoundland Power, FortisAlberta, FortisBC, Terasen Inc., Maritime Electric, Canadian Niagara Power, Cornwall Electric, BECOL, two electric utilities in the Turks and Caicos, and 70%-owned Belize Electricity. It also holds a 100% interest in Fortis Properties and a 57% interest in Caribbean Utilities.

Required Disclosures

Non-U.S. Analyst Disclosure

Nelson Ng, CFA and Danny Hung, CA (i) are not registered/qualified as research analysts with the NYSE and/or FINRA and (ii) may not be associated persons of the RBC Capital Markets Corporation and therefore may not be subject to FINRA Rule 2711 and NYSE Rule 472 restrictions on communications with a subject company, public appearances and trading securities held by a research analyst account.

Conflicts Disclosures

The analyst(s) responsible for preparing this research report received compensation that is based upon various factors, including total revenues of the member companies of RBC Capital Markets and its affiliates, a portion of which are or have been generated by investment banking activities of the member companies of RBC Capital Markets and its affiliates.

A member company of RBC Capital Markets or one of its affiliates managed or co-managed a public offering of securities for Fortis Inc. in the past 12 months.

A member company of RBC Capital Markets or one of its affiliates received compensation for investment banking services from Fortis Inc. in the past 12 months.

Royal Bank of Canada, together with its affiliates, beneficially owns 1 percent or more of a class of common equity securities of Fortis Inc.

A member company of RBC Capital Markets or one of its affiliates received compensation for products or services other than investment banking services from Fortis Inc. during the past 12 months. During this time, a member company of RBC Capital Markets or one of its affiliates provided non-investment banking securities-related services to Fortis Inc.

A member company of RBC Capital Markets or one of its affiliates received compensation for products or services other than investment banking services from Fortis Inc. during the past 12 months. During this time, a member company of RBC Capital Markets or one of its affiliates provided non-securities services to Fortis Inc.

RBC Capital Markets is currently providing Fortis Inc. with non-investment banking securities-related services.

Explanation of RBC Capital Markets Equity Rating System

An analyst's 'sector' is the universe of companies for which the analyst provides research coverage. Accordingly, the rating assigned to a particular stock represents solely the analyst's view of how that stock will perform over the next 12 months relative to the analyst's sector average.

Ratings

Top Pick (TP): Represents best in Outperform category; analyst's best ideas; expected to significantly outperform the sector over 12 months; provides best risk-reward ratio; approximately 10% of analyst's recommendations.

Outperform (O): Expected to materially outperform sector average over 12 months.

Sector Perform (SP): Returns expected to be in line with sector average over 12 months.

Underperform (U): Returns expected to be materially below sector average over 12 months.

Risk Qualifiers (any of the following criteria may be present):

Average Risk (Avg): Volatility and risk expected to be comparable to sector; average revenue and earnings predictability; no significant cash flow/financing concerns over coming 12-24 months; fairly liquid.

Above Average Risk (AA): Volatility and risk expected to be above sector; below average revenue and earnings predictability; may not be suitable for a significant class of individual equity investors; may have negative cash flow; low market cap or float.

Speculative (Spec): Risk consistent with venture capital; low public float; potential balance sheet concerns; risk of being delisted.

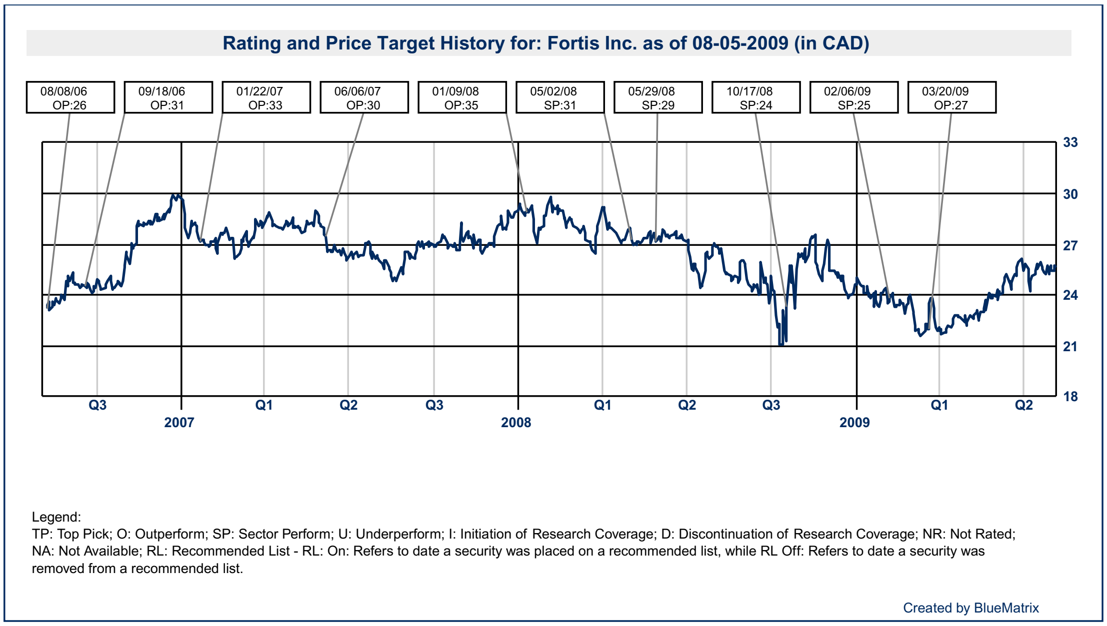
Distribution of Ratings

For the purpose of ratings distributions, regulatory rules require member firms to assign ratings to one of three rating categories - Buy,

Hold/Neutral, or Sell - regardless of a firm's own rating categories. Although RBC Capital Markets' ratings of Top Pick/Outperform, Sector Perform and Underperform most closely correspond to Buy, Hold/Neutral and Sell, respectively, the meanings are not the same because our ratings are determined on a relative basis (as described above).

Distribution of Ratings
RBC Capital Markets, Equity Research

Rating	Count	Percent	Investment Banking Serv./Past 12 Mos. Count	Percent
BUY[TP/O]	522	46.20	121	23.18
HOLD[SP]	528	46.80	87	16.48
SELL[U]	79	7.00	5	6.33



References to a Recommended List in the recommendation history chart may include one or more recommended lists or model portfolios maintained by a business unit of the Wealth Management Division of RBC Capital Markets Corporation. These Recommended Lists include the Prime Opportunity List (RL 3), a former list called the Private Client Prime Portfolio (RL 4), the Prime Income List (RL 6), the Guided Portfolio: Large Cap (RL 7), and the Guided Portfolio: Dividend Growth (RL 8). The abbreviation 'RL On' means the date a security was placed on a Recommended List. The abbreviation 'RL Off' means the date a security was removed from a Recommended List.

Conflicts Policy

RBC Capital Markets Policy for Managing Conflicts of Interest in Relation to Investment Research is available from us on request. To access our current policy, clients should refer to
http://www.rbccm.com/cm/file/0,,63022,00.pdf
or send a request to RBC CM Research Publishing, P.O. Box 50, 200 Bay Street, Royal Bank Plaza, 29th Floor, South Tower, Toronto, Ontario M5J 2W7. We reserve the right to amend or supplement this policy at any time.

Dissemination of Research and Short-Term Trading Calls

RBC Capital Markets endeavours to make all reasonable efforts to provide research simultaneously to all eligible clients, having regard to local time zones in overseas jurisdictions. RBC Capital Markets' research is posted to our proprietary websites to ensure eligible clients receive coverage initiations and changes in rating, targets and opinions in a timely manner. Additional distribution may be done by the sales personnel via email, fax or regular mail. Clients may also receive our research via third party vendors. Please contact your investment advisor or institutional salesperson for more information regarding RBC Capital Markets research.
RBC Capital Markets also provides eligible clients with access to a database which may contain Short-Term trading calls on certain of the subject companies for which it currently provides equity research coverage. The database may be accessed via the following hyperlink https://www2.rbccm.com/cmonline/index.html. The information regarding Short-Term trading calls accessible through the database does not constitute a research report. These Short-Term trading calls are not formal ratings and reflect the research analyst's

views with respect to market and trading events in the coming days or weeks and, as such, may differ from the price targets and recommendations in our published research reports reflecting the research analyst's views of the longer-term (one year) prospects of the subject company. Thus, it is possible that a subject company's common equity that is considered a long-term 'sector perform' or even an 'underperform' might be a Short-Term buying opportunity as a result of temporary selling pressure in the market; conversely, a subject company's common equity rated a long-term 'outperform' could be considered susceptible to a Short-Term downward price correction.

Analyst Certification

All of the views expressed in this report accurately reflect the personal views of the responsible analyst(s) about any and all of the subject securities or issuers. No part of the compensation of the responsible analyst(s) named herein is, or will be, directly or indirectly, related to the specific recommendations or views expressed by the responsible analyst(s) in this report.

COMPANY UPDATE | COMMENT

SEPTEMBER 28, 2009

Fortis Inc. (TSX: FTS)

Investor Meetings Highlight the Focus on Long-Term Utility Growth

Sector Perform
Average Risk

Price:	24.98	**Price Target:**	27.00
		Implied All-In Return:	12%
Shares O/S (MM):	170.0	**Market Cap (MM):**	4,247
Dividend:	1.04	**Yield:**	4.2%
Float (MM):	170.0		
Debt to Cap:	59%		

Event

We recently hosted investor meetings with the management of Fortis (Barry Perry, CFO).

Investment Opinion

- **Rate Base Expected to Grow at 7% CAGR Through 2013.** Based on current capex projects, Fortis expects its average annual rate base to grow from roughly $7.1 billion in 2009 to $9.4 billion in 2013, representing roughly 7% compound annual growth. We view investment in Canadian regulated utility assets as a low-risk way to grow EPS.
- **A Utility Acquisition in the U.S. Is Likely, but Doesn't Appear Imminent.** Management continues to look to acquire U.S. utility assets with a size of $1 billion to $5 billion (enterprise value), although we are under the impression that there is nothing imminent. Fortis is open to both electric and/or gas utilities, and would be open to an integrated utility (i.e., with power generation) as long as the power plants are included in utility rate base. Management stressed that it will be disciplined and that any acquisition needs to be EPS accretive within the first year.
- **Potential Kicker from Higher Allowed ROEs.** Fortis expects cost of capital processes in Alberta, B.C. and Newfoundland to wrap up by year-end. Management stated that a 100 basis point increase in allowed ROE would improve earnings by roughly $25 million (about $0.15/share). We note that similar return parameters from the National Energy Board's decision in March 2009 for TQM would result in an estimated $39 million increase in earnings (about $0.23/share) for Fortis.
- **Common Equity Unlikely Over the Next Few Years to Fund Utility Capex.** Based on its capex forecast for the existing business, Fortis might look to the preferred share market in late 2010 or in 2011, but management does not expect to issue common equity in the foreseeable future absent of an acquisition.
- **Rolling Out 2011 Estimates.** Our new 2011 EPS estimate is $1.70. The forecast growth from 2010 is primarily due to continued investment in the Canadian regulated utility businesses (mostly FortisAlberta and FortisBC).
- **Valuation.** Our target price of $27.00 (unchanged) implies a forward P/E of 15x 2011E EPS plus roughly half of the estimated upside from higher regulated ROEs (about $2/share).

Priced as of prior trading day's market close, EST (unless otherwise noted).

For Required Non-U.S. Analyst and Conflicts Disclosures, see page 7.

Rate Base Expected to Grow at a 7% CAGR Through 2013

Management expects to grow its utility rate base at a 7% compound annual growth rate over the next five years, primarily through investment in its Canadian regulated utilities (please see Exhibit 1). The company noted five major capital projects that it expects to drive EPS growth:

(1) **Terasen Gas: $122 Million for a New Customer Care Information System.** This expenditure has not yet been approved by the B.C. Utilities Commission (BCUC). However, Fortis is optimistic that it will be approved by the BCUC as it involves bringing back in-house the customer care function for the utility, which would result in the repatriation of 300 jobs back to the province that are currently outsourced with workers in New Brunswick. Management noted that the overall cost is expected to be roughly neutral to ratepayers with a modest benefit in a few years (lower operating costs mostly offset by higher capital costs).

(2) **Terasen Gas Vancouver Island (TGVI): $200 Million for a Liquefied Natural Gas Storage Facility.** This project was previously approved by the BCUC and construction is about 50% completed. The facility will store natural gas during off-peak periods and provide supply during higher demand periods to serve Vancouver Island customers.

(3) **FortisAlberta: $168 Million for Automated Meters.** This project has been approved by the Alberta Utilities Commission (AUC) and involves plans to roll out automated meters to the company's roughly 450,000 customers. The new meters eliminate the need to manually read each meter to determine customer usage.

(4) **FortisBC: $110 Million for Transmission Reinforcement.** In October 2008, the BCUC approved the Okanagan Transmission Reinforcement Project, which will enhance reliability in FortisBC's service territory. Since the time of approval, the company has been able to procure materials at a lower cost, resulting in the project's expected cost declining to roughly $110 million (from about $140 million).

(5) **BECOL: US$53 Million Vaca Hydro Project.** The commissioning of the unregulated 19 MW Vaca hydro project in Belize is expected to occur in early 2010.

Exhibit 1: Estimated Rate Base Growth (In $ billions)

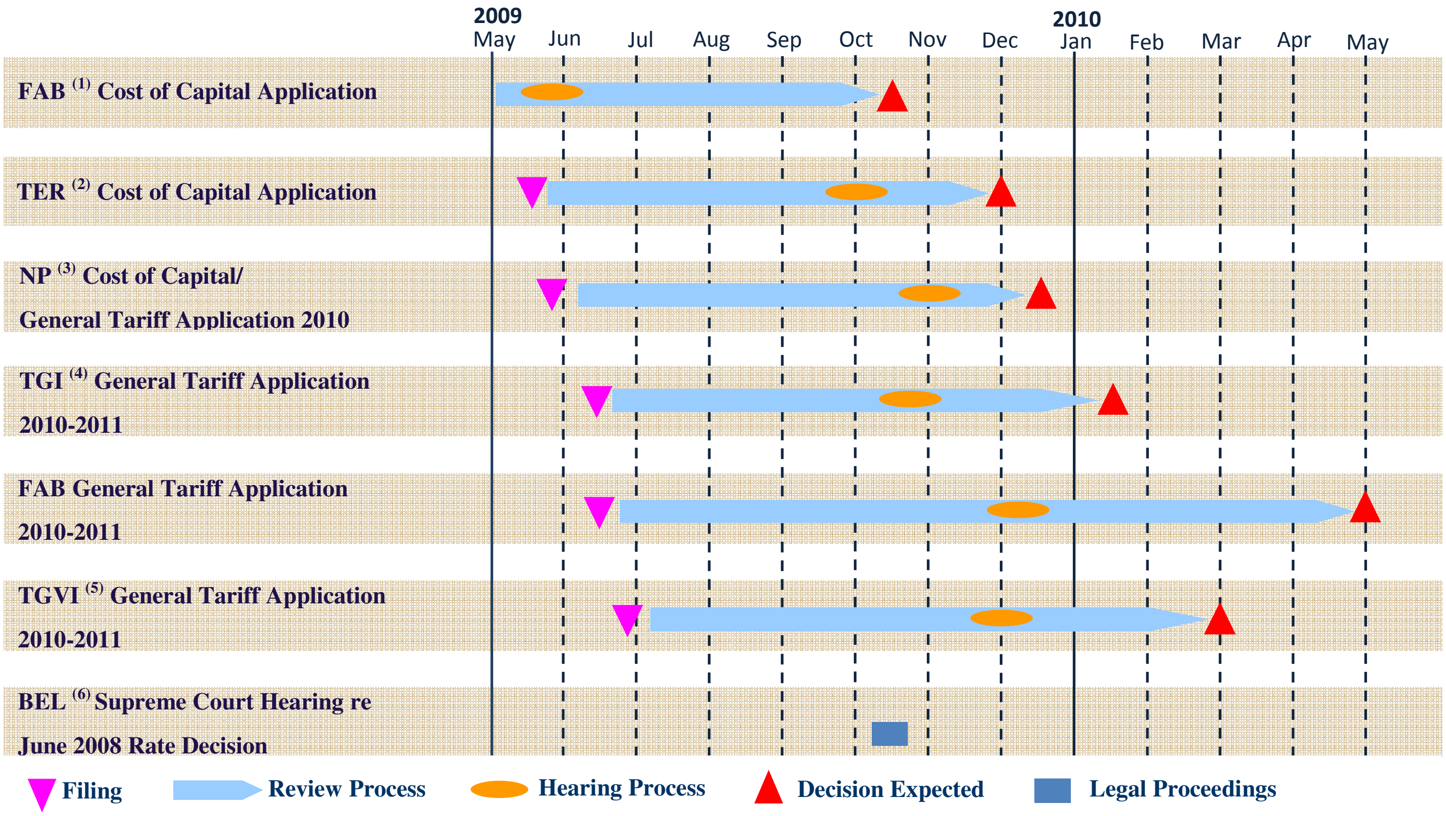
Busy Regulatory Calendar: Allowed ROE Proceedings a Front Burner Topic

The company's utility subsidiaries have a busy regulatory calendar through the end of 2009 with cost of capital proceedings/applications in Alberta, B.C. and Newfoundland, rate applications in Alberta and B.C. and a court hearing for Belize Electricity Limited. Exhibit 2 shows the company's expectations for the timing with regards to each of the regulatory processes.

Exhibit 2: Regulatory Calendar



(1) FortisAlberta (2) Terasen Gas companies (3) Newfoundland Power (4) Terasen Gas Inc. (5) Terasen Gas (Vancouver Island) (6) Belize

Source: Company reports

Potential for Higher Allowed ROEs

The first three items in the regulatory calendar set out in Exhibit 2 relate to cost of capital processes/applications that could impact Fortis' largest utility assets. Following the National Energy Board's (NEB) cost of capital decision in March 2009 for the TQM pipeline, other provinces in Canada have either commenced broad processes to examine allowed ROEs, or received applications from utilities in the province to examine the issue (for further details on the NEB's decision, please see our *Energy Infrastructure Research Comment* dated March 19, 2009).

Of the companies in our coverage universe, Fortis has the greatest exposure to formula-based allowed ROEs in Canada. Management noted that a 100 basis point increase in allowed ROEs would improve earnings by roughly $25 million (about $0.15/share). As set out in Exhibit 3, we estimate that the positive EPS impact of higher allowed ROEs using the return parameters from the NEB's decision for the TQM pipeline is about $0.23/share. Since the NEB decision used an after-tax weighted average cost of capital methodology with different implied ROEs based on capital structure, the assumed increase in allowed ROE for each of the utilities is not a consistent number.

In our valuation for Fortis, we estimate that higher allowed ROEs could add roughly $4/share of incremental value. However, due to the more political nature of the provincial processes and a view that the NEB is a more progressive regulator, we continue to remain comfortable including 50% of the estimated upside in our $27 price target.

Exhibit 3: Estimated Impact of Higher Allowed ROEs Based on the NEB's Decision in March 2009

	2009 ROE	Potential ROE	Estimated Rate Base	Equity Component	Estimated Earnings Impact
Newfoundland Power	8.95%	9.10%	$849	45%	$1
Maritime Electric	9.75%	9.75%	291	40%	0
Terasen Gas	8.47%	10.50%	2,503	35%	18
Terasen Gas Vancouver Island (TGVI)	9.17%	11.20%	506	40%	4
FortisOntario	8.01%	9.31%	100	43%	1
FortisAlberta	8.51%	10.20%	1,349	37%	8
FortisBC	8.87%	10.90%	921	40%	7
				Total	$39
				Shares O/S (MM)	170
				EPS Impact	$0.23

Rolling Out 2011 Financial Forecast

Growth Expected to Be Primarily Driven by Investment in Canadian Regulated Utilities

Exhibit 4 sets out our segment financial forecast, which includes our new 2011 estimates. We expect continued growth in earnings to be primarily driven by investment in the Canadian regulated utility businesses, with most of the growth from the western Canadian electric utilities (FortisAlberta and FortisBC).

Our financial forecast does not assume any increase in allowed ROEs as part of the ongoing regulatory processes (the potential EPS impact is shown in Exhibit 3). However, we have included the potential uplift in value from higher allowed ROEs in our price target. We continue to see up to $4/share of incremental value should the ongoing regulatory processes result in allowed ROEs that are consistent with the TQM decision. However, due to uncertainty regarding the outcome of those processes and the amount of uplift if regulators decide to increase returns, we have included only 50% of the potential upside (i.e., $2/share) in our valuation.

Exhibit 4: Financial Forecast

	2007	2008	Q1/09	Q2/09	Q3/09E	Q4/09E	2009E	2010E	2011E
Newfoundland Power	$30.2	$32.0	$6.0	$11.0	$8.3	$8.0	$33.4	$35.3	$36.3

Valuation

Our target price of $27.00 implies a forward P/E of 15x 2011E EPS plus roughly half of the estimated upside from higher regulated ROEs (about $2/share). We have used 50% of the potential upside to account for uncertainty as to whether provincial regulators will follow the National Energy Board's lead and increase allowed returns and if they do, how much the increased ROEs will be. The forward P/E multiple is in line with the multiple that we use for peers.

Price Target Impediment

The political environment in Belize, whether provincial regulators increase ROEs for the company's businesses, risk of punitive regulatory decisions, economic/tourism conditions in its service territories, operational or financial issues at newly acquired businesses or power prices in Ontario may have implications for our target price as well as our earnings and dividend estimates.

Company Description

Fortis Inc. is a utility holding company for Newfoundland Power, FortisAlberta, FortisBC, Terasen Inc., Maritime Electric, Canadian Niagara Power, Cornwall Electric, BECOL, two electric utilities in the Turks and Caicos, and 70%-owned Belize Electricity. It also holds a 100% interest in Fortis Properties and a 59.5% interest in Caribbean Utilities.

Required Disclosures

Non-U.S. Analyst Disclosure

Nelson Ng, CFA and Danny Hung, CA (i) are not registered/qualified as research analysts with the NYSE and/or FINRA and (ii) may not be associated persons of the RBC Capital Markets Corporation and therefore may not be subject to FINRA Rule 2711 and NYSE Rule 472 restrictions on communications with a subject company, public appearances and trading securities held by a research analyst account.

Conflicts Disclosures

The analyst(s) responsible for preparing this research report received compensation that is based upon various factors, including total revenues of the member companies of RBC Capital Markets and its affiliates, a portion of which are or have been generated by investment banking activities of the member companies of RBC Capital Markets and its affiliates.

A member company of RBC Capital Markets or one of its affiliates managed or co-managed a public offering of securities for Fortis Inc. in the past 12 months.

A member company of RBC Capital Markets or one of its affiliates received compensation for investment banking services from Fortis Inc. in the past 12 months.

Royal Bank of Canada, together with its affiliates, beneficially owns 1 percent or more of a class of common equity securities of Fortis Inc.

A member company of RBC Capital Markets or one of its affiliates received compensation for products or services other than investment banking services from Fortis Inc. during the past 12 months. During this time, a member company of RBC Capital Markets or one of its affiliates provided non-investment banking securities-related services to Fortis Inc.

A member company of RBC Capital Markets or one of its affiliates received compensation for products or services other than investment banking services from Fortis Inc. during the past 12 months. During this time, a member company of RBC Capital Markets or one of its affiliates provided non-securities services to Fortis Inc.

RBC Capital Markets is currently providing Fortis Inc. with non-investment banking securities-related services.

RBC Capital Markets is currently providing Fortis Inc. with non-securities services.

RBC Capital Markets has provided Fortis Inc. with investment banking services in the past 12 months.

RBC Capital Markets has provided Fortis Inc. with non-investment banking securities-related services in the past 12 months.

RBC Capital Markets has provided Fortis Inc. with non-securities services in the past 12 months.

The author is employed by RBC Dominion Securities Inc., a securities broker-dealer with principal offices located in Toronto, Canada.

Explanation of RBC Capital Markets Equity Rating System

An analyst's 'sector' is the universe of companies for which the analyst provides research coverage. Accordingly, the rating assigned to a particular stock represents solely the analyst's view of how that stock will perform over the next 12 months relative to the analyst's sector average.
Ratings
Top Pick (TP): Represents best in Outperform category; analyst's best ideas; expected to significantly outperform the sector over 12 months; provides best risk-reward ratio; approximately 10% of analyst's recommendations.
Outperform (O): Expected to materially outperform sector average over 12 months.
Sector Perform (SP): Returns expected to be in line with sector average over 12 months.
Underperform (U): Returns expected to be materially below sector average over 12 months.
Risk Qualifiers (any of the following criteria may be present):
Average Risk (Avg): Volatility and risk expected to be comparable to sector; average revenue and earnings predictability; no significant cash flow/financing concerns over coming 12-24 months; fairly liquid.
Above Average Risk (AA): Volatility and risk expected to be above sector; below average revenue and earnings predictability; may not be suitable for a significant class of individual equity investors; may have negative cash flow; low market cap or float.
Speculative (Spec): Risk consistent with venture capital; low public float; potential balance sheet concerns; risk of being delisted.

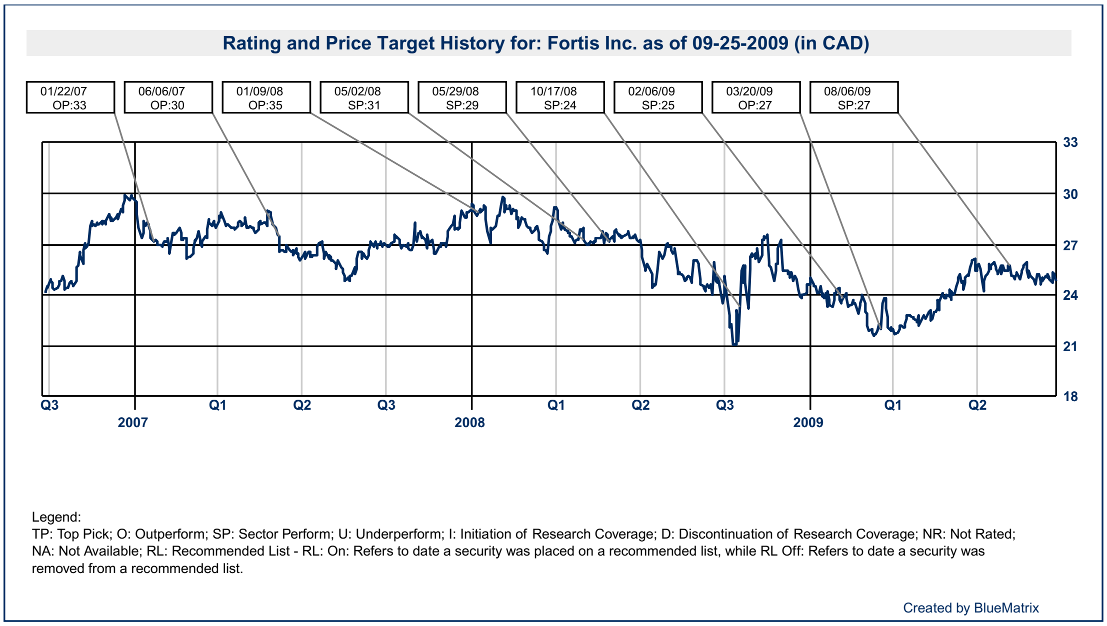
Distribution of Ratings

For the purpose of ratings distributions, regulatory rules require member firms to assign ratings to one of three rating categories - Buy,

Hold/Neutral, or Sell - regardless of a firm's own rating categories. Although RBC Capital Markets' ratings of Top Pick/Outperform, Sector Perform and Underperform most closely correspond to Buy, Hold/Neutral and Sell, respectively, the meanings are not the same because our ratings are determined on a relative basis (as described above).

Distribution of Ratings
RBC Capital Markets, Equity Research

Rating	Count	Percent	Investment Banking Serv./Past 12 Mos. Count	Percent
BUY[TP/O]	540	47.50	136	25.19
HOLD[SP]	519	45.60	104	20.04
SELL[U]	78	6.90	5	6.41



References to a Recommended List in the recommendation history chart may include one or more recommended lists or model portfolios maintained by a business unit of the Wealth Management Division of RBC Capital Markets Corporation. These Recommended Lists include the Prime Opportunity List (RL 3), a former list called the Private Client Prime Portfolio (RL 4), the Prime Income List (RL 6), the Guided Portfolio: Large Cap (RL 7), and the Guided Portfolio: Dividend Growth (RL 8). The abbreviation 'RL On' means the date a security was placed on a Recommended List. The abbreviation 'RL Off' means the date a security was removed from a Recommended List.

Conflicts Policy

RBC Capital Markets Policy for Managing Conflicts of Interest in Relation to Investment Research is available from us on request. To access our current policy, clients should refer to
https://www.rbccm.com/global/file-414164.pdf
or send a request to RBC CM Research Publishing, P.O. Box 50, 200 Bay Street, Royal Bank Plaza, 29th Floor, South Tower, Toronto, Ontario M5J 2W7. We reserve the right to amend or supplement this policy at any time.

Dissemination of Research and Short-Term Trading Calls

RBC Capital Markets endeavours to make all reasonable efforts to provide research simultaneously to all eligible clients, having regard to local time zones in overseas jurisdictions. RBC Capital Markets' research is posted to our proprietary websites to ensure eligible clients receive coverage initiations and changes in rating, targets and opinions in a timely manner. Additional distribution may be done by the sales personnel via email, fax or regular mail. Clients may also receive our research via third party vendors. Please contact your investment advisor or institutional salesperson for more information regarding RBC Capital Markets research.
RBC Capital Markets also provides eligible clients with access to a database which may contain Short-Term trading calls on certain of the subject companies for which it currently provides equity research coverage. The database may be accessed via the following hyperlink https://www2.rbccm.com/cmonline/index.html. The information regarding Short-Term trading calls accessible through the database does not constitute a research report. These Short-Term trading calls are not formal ratings and reflect the research analyst's

views with respect to market and trading events in the coming days or weeks and, as such, may differ from the price targets and recommendations in our published research reports reflecting the research analyst's views of the longer-term (one year) prospects of the subject company. Thus, it is possible that a subject company's common equity that is considered a long-term 'sector perform' or even an 'underperform' might be a Short-Term buying opportunity as a result of temporary selling pressure in the market; conversely, a subject company's common equity rated a long-term 'outperform' could be considered susceptible to a Short-Term downward price correction.

Analyst Certification

All of the views expressed in this report accurately reflect the personal views of the responsible analyst(s) about any and all of the subject securities or issuers. No part of the compensation of the responsible analyst(s) named herein is, or will be, directly or indirectly, related to the specific recommendations or views expressed by the responsible analyst(s) in this report.

Event

Fortis reported Q3/09 results; rolling forward price target to $28.00 (from $27.00).

Investment Opinion

- **Q3/09 Results In Line With Expectations.** Fortis' Q3/09 normalized EPS was $0.21 compared to our estimate of $0.20 and $0.24 in Q3/08. All of the segments reported earnings that were generally in line with expectations.
- **2009 Capex Up Modestly Due to Spending at FortisAlberta.** Capital expenditures for 2009 are expected to exceed $1 billion, which is approximately $50 million higher than the guidance in Q2/09. The higher spending is primarily at FortisAlberta as a result of higher customer-driven growth.
- **Gearing Up for the AUC's Cost of Capital Decision.** The decision from the Alberta Utilities Commission (AUC) on utility cost of capital is expected in the next couple of weeks. We believe that there is a good case to be made for higher regulated ROEs in Canada. We estimate that a 100 basis point increase in allowed ROE for all of Fortis' utilities would increase EPS by roughly $0.15/share. Due to a prior decision from the AUC, the current ROE used for placeholder rates for FortisAlberta is 8.51% pending the outcome of the cost of capital proceeding (note: this is lower than the 8.75% placeholder ROE being used by most other utilities in Alberta).
- **We Believe the Market Has Already Priced in Roughly 100 Basis Points of ROE Upside.** We believe that the market has priced in a roughly 100 basis point increase in allowed ROEs, which would translate into about $2/share at a 15x P/E multiple. This is a similar value to what we have included in our price target.
- **Valuation: Rolling Forward Target to $28.00 (from $27.00).** Our target price of $28.00 implies a forward P/E of 15x 2011E EPS plus an assumed 100 basis point increase in allowed ROEs (about $2/share). The forward P/E multiple is in line with the multiple that we use for peers.

Priced as of prior trading day's market close, EST (unless otherwise noted).

For Required Non-U.S. Analyst and Conflicts Disclosures, see page 6.

Q3/09 Results In Line With Expectations

Fortis' Q3/09 normalized EPS was $0.21 compared to our estimate of $0.20 and a modest decrease from $0.24 in Q3/08. The normalized earnings were generally flat year-over-year, but modestly lower on a per share basis due to the dilutive impact of the share issuance in Q4/08. All of the segments were broadly in line with our forecast.

Exhibit 1: Normalized Earnings (In $MM except per share figures)

	Q3/09	RBC CM Q3/09E	Q3/08	Comments
Newfoundland Power	$7.0	$8.3	$8.0	Higher operating expenses and amortization costs
FortisOntario & Maritime Electric	5.0	5.2	5.0	
Terasen	(3.0)	(4.6)	(4.5)	
FortisAlberta	16.0	14.6	12.5	Yr/Yr increase mostly due to rate base growth
FortisBC	8.0	9.0	8.0	
Regulated Utilities - Canadian	33.0	32.6	29.0	
Regulated Utilities - Caribbean	7.0	7.4	7.0	
Non-regulated - Fortis Generation	4.0	2.9	9.0	Yr/Yr decline mainly due to expiration of agreement at Rankine in Q2/09

	1.0		12.0	
Reported Earnings	$36.0		$49.0	

Source: Company reports; RBC Capital Markets estimates

Highlights of the Quarter

- **Canadian Regulated Utilities Performing Well.** The Canadian Regulated Utilities contributed $33 million to earnings compared to our estimate of $32.6 million and $29 million in Q3/08. The earnings growth over Q3/08 was mainly due to rate base growth at FortisAlberta.
- **Caribbean Regulated Utilities: Generally In Line With Expectations.** The Q3/09 earnings from the regulated utilities in the Caribbean were $7 million compared to our estimate of $7.4 million and $7 million in Q3/08. Year-over-year, the impact of modestly higher electricity sales, a 2.4% rate increase at Caribbean Utilities and favourable energy supply pricing was offset by both higher amortization and higher operating costs.
- **Non-Regulated Generation: Year-over-Year Decline Due to Expiration of Rankine Agreement and Lower Power Prices.** The non-regulated generation segment contributed $4 million to earnings in Q3/09 compared to our estimate of $2.9 million and Q3/08 earnings of $9 million.
- **Non-Regulated Properties: In Line With Expectations.** Normalized earnings of $9 million in Q3/09 from the properties division were generally in line with our estimate of $9.2 million and $9 million in Q3/08. Increased contribution from the Real Estate division as well as incremental contribution from the Sheraton Hotel Newfoundland and the Holiday Inn Select in Windsor, which were acquired in mid-Q3/08 and Q2/09, respectively, was offset by generally lower occupancy rates and lower REVPAR.

Alberta Utilities Commission Expected to Release its Decision on Cost of Capital in the Near Future

The Alberta Utilities Commission (AUC) is expected to release its decision on regulated utility cost of capital in the next couple of weeks.

- **Processes Underway in Ontario.** The Ontario Energy Board has received final comments as part of its process to determine whether an adjustment to the cost of capital is necessary. The result of this process could impact FortisOntario.
- **Terasen Seeks Higher ROE as Part of its Rate Filing.** Terasen filed a rate case in May which includes a request for an increase in the allowed ROE to 11% (from the current 8.47%) and an increase in the equity thickness to 40% (from 35%). If the B.C. Utilities Commission grants a higher ROE for Terasen, we expect the decision to also impact FortisBC. We expect a decision in early 2010.
- **Newfoundland Power Rate Case Seeking Higher ROE.** Newfoundland Power filed a rate case in September, which sought an increase in allowed ROE to 11% (from 9.75%) on the current 45% equity thickness. A public hearing occurred in October and a decision is expected to be received by early 2010.

As shown in Exhibit 2, we estimate that a 100 basis point increase in allowed ROE for all of Fortis' regulated utilities subject to ROE formulas could result in an approximate $0.15/share increase in annual earnings. As shown in the exhibit, most of Fortis' exposure to allowed ROEs is from potential changes to the formula used by the B.C. Utilities Commission for Terasen and FortisBC. However, we believe that the AUC's decision could provide insight into a potential move from the BCUC.

Exhibit 2: Potential Upside From a 100 Basis Point Increase in Allowed ROE

	Regulator	Est. 2010 Ratebase Impacted by Change	Deemed Equity	Deemed Equity	Chng. In ROE (bps)	Earnings Impact	EPS Impact

Dec. 2010	Expected increase in the dividend to $1.12 (from $1.04)
Feb. 4, 2010	Expected Q4 earnings release date

Source: Company reports; RBC Capital Markets estimates

Valuation

Our target price of $28.00 implies a forward P/E of 15x 2011E EPS plus an assumed 100 basis point increase in allowed ROEs (about $2/share). The forward P/E multiple is in line with the multiple that we use for peers.

Price Target Impediment

The political environment in Belize, whether provincial regulators increase ROEs for the company's businesses, risk of punitive regulatory decisions, economic/tourism conditions in its service territories, operational or financial issues at newly acquired businesses or power prices in Ontario may have implications for our target price as well as our earnings and dividend estimates.

Company Description

Fortis Inc. is a utility holding company for Newfoundland Power, FortisAlberta, FortisBC, Terasen Inc., Maritime Electric, Canadian Niagara Power, Cornwall Electric, BECOL, two electric utilities in the Turks and Caicos, and 70%-owned Belize Electricity. It also holds a 100% interest in Fortis Properties and a 59.5% interest in Caribbean Utilities.

Required Disclosures

Non-U.S. Analyst Disclosure

Nelson Ng, CFA and Danny Hung, CA (i) are not registered/qualified as research analysts with the NYSE and/or FINRA and (ii) may not be associated persons of the RBC Capital Markets Corporation and therefore may not be subject to FINRA Rule 2711 and NYSE Rule 472 restrictions on communications with a subject company, public appearances and trading securities held by a research analyst account.

Conflicts Disclosures

The analyst(s) responsible for preparing this research report received compensation that is based upon various factors, including total revenues of the member companies of RBC Capital Markets and its affiliates, a portion of which are or have been generated by investment banking activities of the member companies of RBC Capital Markets and its affiliates.

A member company of RBC Capital Markets or one of its affiliates managed or co-managed a public offering of securities for Fortis Inc. in the past 12 months.

A member company of RBC Capital Markets or one of its affiliates received compensation for investment banking services from Fortis Inc. in the past 12 months.

Royal Bank of Canada, together with its affiliates, beneficially owns 1 percent or more of a class of common equity securities of Fortis Inc.

A member company of RBC Capital Markets or one of its affiliates received compensation for products or services other than investment banking services from Fortis Inc. during the past 12 months. During this time, a member company of RBC Capital Markets or one of its affiliates provided non-investment banking securities-related services to Fortis Inc.

A member company of RBC Capital Markets or one of its affiliates received compensation for products or services other than investment banking services from Fortis Inc. during the past 12 months. During this time, a member company of RBC Capital Markets or one of its affiliates provided non-securities services to Fortis Inc.

RBC Capital Markets is currently providing Fortis Inc. with non-investment banking securities-related services.

RBC Capital Markets is currently providing Fortis Inc. with non-securities services.

RBC Capital Markets has provided Fortis Inc. with investment banking services in the past 12 months.

RBC Capital Markets has provided Fortis Inc. with non-investment banking securities-related services in the past 12 months.

RBC Capital Markets has provided Fortis Inc. with non-securities services in the past 12 months.

The author is employed by RBC Dominion Securities Inc., a securities broker-dealer with principal offices located in Toronto, Canada.

Explanation of RBC Capital Markets Equity Rating System

An analyst's 'sector' is the universe of companies for which the analyst provides research coverage. Accordingly, the rating assigned to a particular stock represents solely the analyst's view of how that stock will perform over the next 12 months relative to the analyst's sector average.

Ratings

Top Pick (TP): Represents best in Outperform category; analyst's best ideas; expected to significantly outperform the sector over 12 months; provides best risk-reward ratio; approximately 10% of analyst's recommendations.

Outperform (O): Expected to materially outperform sector average over 12 months.

Sector Perform (SP): Returns expected to be in line with sector average over 12 months.

Underperform (U): Returns expected to be materially below sector average over 12 months.

Risk Qualifiers (any of the following criteria may be present):

Average Risk (Avg): Volatility and risk expected to be comparable to sector; average revenue and earnings predictability; no significant cash flow/financing concerns over coming 12-24 months; fairly liquid.

Above Average Risk (AA): Volatility and risk expected to be above sector; below average revenue and earnings predictability; may not be suitable for a significant class of individual equity investors; may have negative cash flow; low market cap or float.

Speculative (Spec): Risk consistent with venture capital; low public float; potential balance sheet concerns; risk of being delisted.

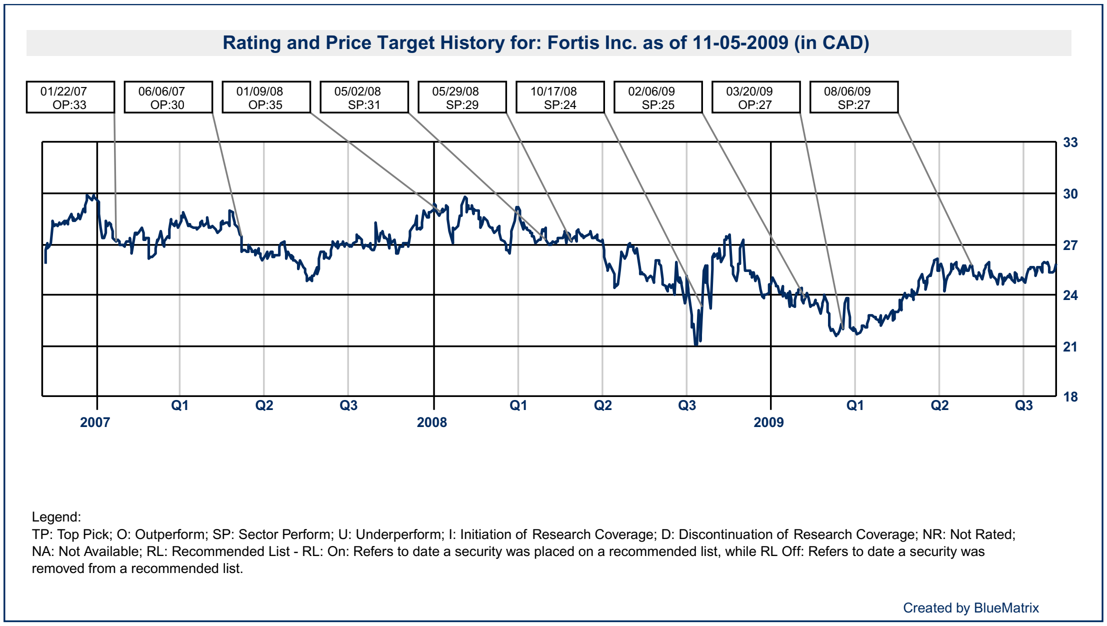
Distribution of Ratings

For the purpose of ratings distributions, regulatory rules require member firms to assign ratings to one of three rating categories - Buy,

Hold/Neutral, or Sell - regardless of a firm's own rating categories. Although RBC Capital Markets' ratings of Top Pick/Outperform, Sector Perform and Underperform most closely correspond to Buy, Hold/Neutral and Sell, respectively, the meanings are not the same because our ratings are determined on a relative basis (as described above).

Distribution of Ratings
RBC Capital Markets, Equity Research

Rating	Count	Percent	Investment Banking Serv./Past 12 Mos. Count	Investment Banking Serv./Past 12 Mos. Percent
BUY[TP/O]	578	49.00	162	28.03
HOLD[SP]	525	44.50	108	20.57
SELL[U]	77	6.50	6	7.79



References to a Recommended List in the recommendation history chart may include one or more recommended lists or model portfolios maintained by a business unit of the Wealth Management Division of RBC Capital Markets Corporation. These Recommended Lists include the Prime Opportunity List (RL 3), a former list called the Private Client Prime Portfolio (RL 4), the Prime Income List (RL 6), the Guided Portfolio: Large Cap (RL 7), and the Guided Portfolio: Dividend Growth (RL 8). The abbreviation 'RL On' means the date a security was placed on a Recommended List. The abbreviation 'RL Off' means the date a security was removed from a Recommended List.

Conflicts Policy

RBC Capital Markets Policy for Managing Conflicts of Interest in Relation to Investment Research is available from us on request. To access our current policy, clients should refer to
https://www.rbccm.com/global/file-414164.pdf
or send a request to RBC CM Research Publishing, P.O. Box 50, 200 Bay Street, Royal Bank Plaza, 29th Floor, South Tower, Toronto, Ontario M5J 2W7. We reserve the right to amend or supplement this policy at any time.

Dissemination of Research and Short-Term Trading Calls

RBC Capital Markets endeavours to make all reasonable efforts to provide research simultaneously to all eligible clients, having regard to local time zones in overseas jurisdictions. RBC Capital Markets' research is posted to our proprietary websites to ensure eligible clients receive coverage initiations and changes in rating, targets and opinions in a timely manner. Additional distribution may be done by the sales personnel via email, fax or regular mail. Clients may also receive our research via third party vendors. Please contact your investment advisor or institutional salesperson for more information regarding RBC Capital Markets research.
RBC Capital Markets also provides eligible clients with access to a database which may contain Short-Term trading calls on certain of the subject companies for which it currently provides equity research coverage. The database may be accessed via the following hyperlink https://www2.rbccm.com/cmonline/index.html. The information regarding Short-Term trading calls accessible through the

database does not constitute a research report. These Short-Term trading calls are not formal ratings and reflect the research analyst's views with respect to market and trading events in the coming days or weeks and, as such, may differ from the price targets and recommendations in our published research reports reflecting the research analyst's views of the longer-term (one year) prospects of the subject company. Thus, it is possible that a subject company's common equity that is considered a long-term 'sector perform' or even an 'underperform' might be a Short-Term buying opportunity as a result of temporary selling pressure in the market; conversely, a subject company's common equity rated a long-term 'outperform' could be considered susceptible to a Short-Term downward price correction.

Analyst Certification

All of the views expressed in this report accurately reflect the personal views of the responsible analyst(s) about any and all of the subject securities or issuers. No part of the compensation of the responsible analyst(s) named herein is, or will be, directly or indirectly, related to the specific recommendations or views expressed by the responsible analyst(s) in this report.

Disclaimer

RBC Capital Markets is the business name used by certain subsidiaries of Royal Bank of Canada, including RBC Dominion Securities Inc., RBC Capital Markets Corporation, Royal Bank of Canada Europe Limited and Royal Bank of Canada - Sydney Branch. The information contained in this report has been compiled by RBC Capital Markets from sources believed to be reliable, but no representation or warranty, express or implied, is made by Royal Bank of Canada, RBC Capital Markets, its affiliates or any other person as to its accuracy, completeness or correctness. All opinions and estimates contained in this report constitute RBC Capital Markets' judgement as of the date of this report, are subject to change without notice and are provided in good faith but without legal responsibility. Nothing in this report constitutes legal, accounting or tax advice or individually tailored investment advice. This material is prepared for general circulation to clients and has been prepared without regard to the individual financial circumstances and objectives of persons who receive it. The investments or services contained in this report may not be suitable for you and it is recommended that you consult an independent investment advisor if you are in doubt about the suitability of such investments or services. This report is not an offer to sell or a solicitation of an offer to buy any securities. Past performance is not a guide to future performance, future returns are not guaranteed, and a loss of original capital may occur. RBC Capital Markets research analyst compensation is based in part on the overall profitability of RBC Capital Markets, which includes profits attributable to investment banking revenues. Every province in Canada, state in the U.S., and most countries throughout the world have their own laws regulating the types of securities and other investment products which may be offered to their residents, as well as the process for doing so. As a result, the securities discussed in this report may not be eligible for sale in some jurisdictions. This report is not, and under no circumstances should be construed as, a solicitation to act as securities broker or dealer in any jurisdiction by any person or company that is not legally permitted to carry on the business of a securities broker or dealer in that jurisdiction. To the full extent permitted by law neither RBC Capital Markets nor any of its affiliates, nor any other person, accepts any liability whatsoever for any direct or consequential loss arising from any use of this report or the information contained herein. No matter contained in this document may be reproduced or copied by any means without the prior consent of RBC Capital Markets.

Additional information is available on request.

To U.S. Residents:
This publication has been approved by RBC Capital Markets Corporation (member FINRA, NYSE), which is a U.S. registered broker-dealer and which accepts responsibility for this report and its dissemination in the United States. Any U.S. recipient of this report that is not a registered broker-dealer or a bank acting in a broker or dealer capacity and that wishes further information regarding, or to effect any transaction in, any of the securities discussed in this report, should contact and place orders with RBC Capital Markets Corporation.

To Canadian Residents:
This publication has been approved by RBC Dominion Securities Inc.(member IIROC). Any Canadian recipient of this report that is not a Designated Institution in Ontario, an Accredited Investor in British Columbia or Alberta or a Sophisticated Purchaser in Quebec (or similar permitted purchaser in any other province) and that wishes further information regarding, or to effect any transaction in, any of the securities discussed in this report should contact and place orders with RBC Dominion Securities Inc., which, without in any way limiting the foregoing, accepts responsibility for this report and its dissemination in Canada.

To U.K. Residents:
This publication has been approved by Royal Bank of Canada Europe Limited ('RBCEL') which is authorized and regulated by Financial ServicesAuthority ('FSA'), in connection with its distribution in the United Kingdom. This material is not for general distribution in the United Kingdom to retail clients, as defined under the rules of the FSA. However, targeted distribution may be made to selected retail clients of RBC and its affiliates. RBCEL accepts responsibility for this report and its dissemination in the United Kingdom.

To Persons Receiving This Advice in Australia:
This material has been distributed in Australia by Royal Bank of Canada - Sydney Branch (ABN 86 076 940 880, AFSL No. 246521). This material has been prepared for general circulation and does not take into account the objectives, financial situation or needs of any recipient. Accordingly, any recipient should, before acting on this material, consider the appropriateness of this material having regard to their objectives, financial situation and needs. If this material relates to the acquisition or possible acquisition of a particular financial product, a recipient in Australia should obtain any relevant disclosure document prepared in respect of that product and consider that document before making any decision about whether to acquire the product.

To Hong Kong Residents:
This publication is distributed in Hong Kong by RBC Investment Services (Asia) Limited and RBC Investment Management (Asia) Limited, licensed corporations under the Securities and Futures Ordinance or, by Royal Bank of Canada, Hong Kong Branch, a registered institution under the Securities and Futures Ordinance. This material has been prepared for general circulation and does not take into account the objectives, financial situation, or needs of any recipient. Hong Kong persons wishing to obtain further information on any of the securities mentioned in this publication should contact RBC Investment Services (Asia) Limited, RBC Investment Management (Asia) Limited or Royal Bank of Canada, Hong Kong Branch at 17/Floor, Cheung Kong Center, 2 Queen's Road Central, Hong Kong (telephone number is 2848-1388).

To Singapore Residents:
This publication is distributed in Singapore by RBC (Singapore Branch) and RBC (Asia) Limited, registered entities granted offshore bank status by the Monetary Authority of Singapore. This material has been prepared for general circulation and does not take into account the objectives, financial situation, or needs of any recipient. You are advised to seek independent advice from a financial adviser before purchasing any product. If you do not obtain independent advice, you should consider whether the product is suitable for you. Past performance is not indicative of future performance.

Fortis Inc. (TSX: FTS; 26.11)

No PBR for Terasen Could Offset Upside from Higher ROE

Sector Perform
Average Risk

Impact

Negative

First Impression

- **Lack of PBR Puts Pressure on Earnings.** We estimate that Terasen Gas and Terasen Gas Vancouver Island (collectively, "Terasen") have earned about $10 million per year over and above what would have been earned on a pure cost-of-service basis. With no Performance Based Rate-Setting (PBR) as part of the negotiated settlement, we estimate a negative impact of roughly $10 million of earnings (about $0.06/share) compared to our estimates.
- **Could Wipe Out Upside from Upcoming Cost of Capital Decision.** Terasen is still waiting for a decision from the B.C. Utilities Commission (BCUC) on its allowed ROE and capital structure. The decision is expected either later this month or in early 2010. Assuming a similar decision as the Alberta Utilities Commission's (AUC) a couple of weeks ago, we previously estimated that Terasen's earnings could increase by about $0.06/share.
- **Leaving Estimates Unchanged.** Previously, we estimated the positive earnings impact from the AUC's cost of capital decision at roughly $0.05/share (please see our sector *Research Comment* dated November 16, 2009), although we did not increase our EPS estimates at the time. As such, the lower forecast earnings from there being no PBR for Terasen is roughly offset by the impact of the positive decision from the AUC.

Priced as of prior trading day's market close, EST (unless otherwise noted).

Float (MM):	170.7		
Debt to Cap:	60%		

Event

The British Columbia Utilities Commission (BCUC) issued its cost of capital decision for Terasen.

Investment Opinion

- **ROE Generally In Line With Expectations, But Equity Thickness Is Higher-Than-Expected.** The BCUC determined that an ROE of 9.50% (up from 8.47%) is fair for Terasen Gas Inc. (TGI), while Terasen Gas (Vancouver Island) Inc. (TGVI) and Terasen Gas (Whistler) Inc. (TGW) would earn a 50 basis point premium (TGVI previously earned a 70 basis point premium; no change for TGW). The BCUC determined that a 40% equity thickness (up from 35%) is appropriate for TGI, while evidence as to what is an appropriate equity component for TVGI and TGW must be filed with Terasen's next revenue requirement application.
- **TGI's ROE Continues To Serve As The Benchmark ROE.** The BCUC indicated that TGI's ROE (9.50%) should continue to serve as the Benchmark ROE for FortisBC and any other utility in B.C. that uses the Benchmark ROE to set rates.
- **Automatic Adjustment Mechanism Eliminated; Terasen To Present Potential Alternatives By End Of 2010.** It was determined that the automatic adjustment mechanism (AAM) in its current form does not provide an ROE for 2010 that meets the fair return standard. As a result, the AAM will be eliminated and TGI is directed to complete its study of alternative formulae and report to the BCUC by December 31, 2010.
- **Increasing Estimates To Reflect BCUC Decision.** We are increasing our 2010 and 2011 EPS estimates to $1.76 and $1.86, respectively (from $1.60 and $1.70, respectively), to reflect the BCUC decision. For 2009, the ROE component of the decision is effective July 1, 2009. As such, we have increased our 2009 EPS estimate to $1.52 (from $1.48).
- **Valuation: Increasing Price Target To $29.00 (From $28.00).** Due to the better-than-expected cost of capital decision, we have increased our target price to $29.00. Our target is based on a forward P/E of 15.5x 2011E EPS, which is roughly in line with the multiple that we use for peers.

Priced as of prior trading day's market close, EST (unless otherwise noted).

For Required Non-U.S. Analyst and Conflicts Disclosures, see page 4.

Impact of the Decision

Exhibit 1 below sets out the total EPS impact on Fortis' shares from the BCUC decision. We estimate the total impact to be roughly $0.16/share for 2010 and 2011. Note that the equity thicknesses for TGVI and FortisBC are left unchanged at 40% pending a submission by Terasen (with their next revenue requirement application to the BCUC) to propose an appropriate level of equity thickness.

The decision can be found at: http://www.bcuc.com/Documents/Decisions/2009/DOC_23952_TUS_ROE-Decision-Web.pdf

Exhibit 1: Impact of Decision on Fortis

	Est. Rate Base	ROE		Equity Thickness		Total Impact per Share	% of 2010E EPS
		Old	New	Old	New		
Terasen Gas	$2,536	8.47%	9.50%	35%	40%	$0.12	
Terasen Gas Vancouver Island	555	9.17%	10.00%	40%	40%	0.01	
FortisBC	976	8.87%	9.90%	40%	40%	0.02	
Total Direct Impact						**$0.16**	**10%**

Source: BCUC and Company reports; RBC Capital Markets estimates

Valuation

Our target price of $29.00 is based on a forward P/E of 15.5x 2011E EPS. The forward P/E multiple is roughly in line with the multiple that we use for peers.

Price Target Impediment

The political environment in Belize, whether provincial regulators increase ROEs for the company's businesses, risk of punitive regulatory decisions, economic/tourism conditions in its service territories, operational or financial issues at newly acquired businesses or power prices in Ontario may have implications for our target price as well as our earnings and dividend estimates.

Company Description

Fortis Inc. is a utility holding company for Newfoundland Power, FortisAlberta, FortisBC, Terasen Inc., Maritime Electric, Canadian Niagara Power, Cornwall Electric, BECOL, two electric utilities in the Turks and Caicos, and 70%-owned Belize Electricity. It also holds a 100% interest in Fortis Properties and a 59.5% interest in Caribbean Utilities.

Required Disclosures

Non-U.S. Analyst Disclosure

Nelson Ng, CFA and Danny Hung, CA (i) are not registered/qualified as research analysts with the NYSE and/or FINRA and (ii) may not be associated persons of the RBC Capital Markets Corporation and therefore may not be subject to FINRA Rule 2711 and NYSE Rule 472 restrictions on communications with a subject company, public appearances and trading securities held by a research analyst account.

Conflicts Disclosures

The analyst(s) responsible for preparing this research report received compensation that is based upon various factors, including total revenues of the member companies of RBC Capital Markets and its affiliates, a portion of which are or have been generated by investment banking activities of the member companies of RBC Capital Markets and its affiliates.

A member company of RBC Capital Markets or one of its affiliates managed or co-managed a public offering of securities for Fortis Inc. in the past 12 months.

A member company of RBC Capital Markets or one of its affiliates received compensation for investment banking services from Fortis Inc. in the past 12 months.

Royal Bank of Canada, together with its affiliates, beneficially owns 1 percent or more of a class of common equity securities of Fortis Inc.

A member company of RBC Capital Markets or one of its affiliates received compensation for products or services other than investment banking services from Fortis Inc. during the past 12 months. During this time, a member company of RBC Capital Markets or one of its affiliates provided non-investment banking securities-related services to Fortis Inc.

A member company of RBC Capital Markets or one of its affiliates received compensation for products or services other than investment banking services from Fortis Inc. during the past 12 months. During this time, a member company of RBC Capital Markets or one of its affiliates provided non-securities services to Fortis Inc.

RBC Capital Markets is currently providing Fortis Inc. with non-investment banking securities-related services.

RBC Capital Markets is currently providing Fortis Inc. with non-securities services.

Explanation of RBC Capital Markets Equity Rating System

An analyst's 'sector' is the universe of companies for which the analyst provides research coverage. Accordingly, the rating assigned to a particular stock represents solely the analyst's view of how that stock will perform over the next 12 months relative to the analyst's sector average.

Ratings

Top Pick (TP): Represents best in Outperform category; analyst's best ideas; expected to significantly outperform the sector over 12 months; provides best risk-reward ratio; approximately 10% of analyst's recommendations.

Outperform (O): Expected to materially outperform sector average over 12 months.

Sector Perform (SP): Returns expected to be in line with sector average over 12 months.

Underperform (U): Returns expected to be materially below sector average over 12 months.

Risk Qualifiers (any of the following criteria may be present):

Average Risk (Avg): Volatility and risk expected to be comparable to sector; average revenue and earnings predictability; no significant cash flow/financing concerns over coming 12-24 months; fairly liquid.

Above Average Risk (AA): Volatility and risk expected to be above sector; below average revenue and earnings predictability; may not be suitable for a significant class of individual equity investors; may have negative cash flow; low market cap or float.

Speculative (Spec): Risk consistent with venture capital; low public float; potential balance sheet concerns; risk of being delisted.

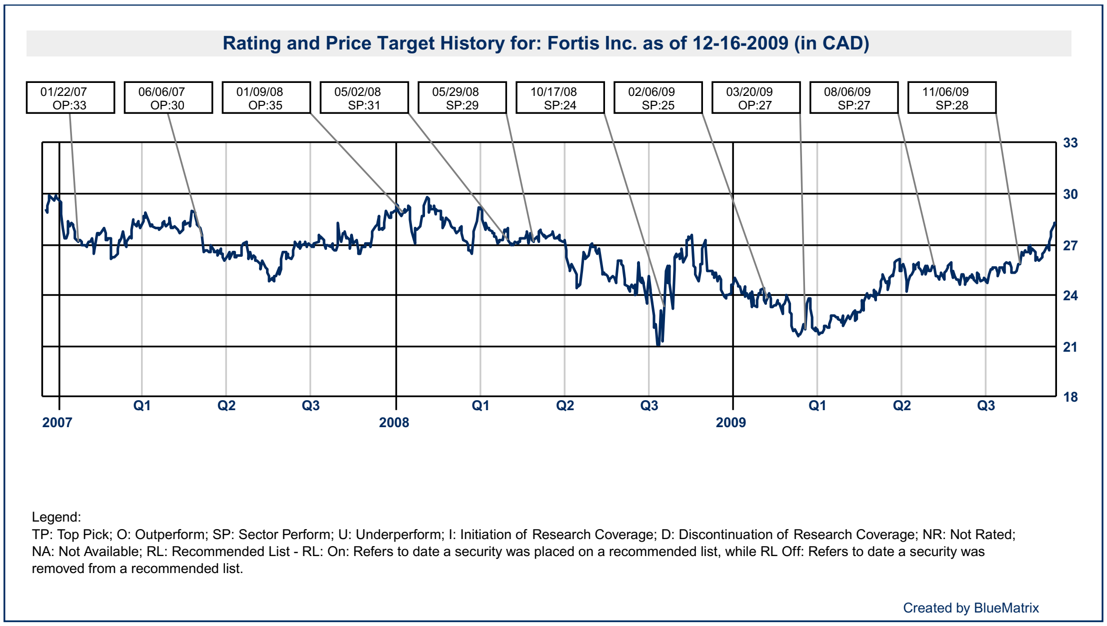
Distribution of Ratings

For the purpose of ratings distributions, regulatory rules require member firms to assign ratings to one of three rating categories - Buy,

Hold/Neutral, or Sell - regardless of a firm's own rating categories. Although RBC Capital Markets' ratings of Top Pick/Outperform, Sector Perform and Underperform most closely correspond to Buy, Hold/Neutral and Sell, respectively, the meanings are not the same because our ratings are determined on a relative basis (as described above).

Distribution of Ratings
RBC Capital Markets, Equity Research

Rating	Count	Percent	Investment Banking Serv./Past 12 Mos. Count	Investment Banking Serv./Past 12 Mos. Percent
BUY[TP/O]	584	49.50	176	30.14
HOLD[SP]	521	44.20	122	23.42
SELL[U]	75	6.40	4	5.33



References to a Recommended List in the recommendation history chart may include one or more recommended lists or model portfolios maintained by a business unit of the Wealth Management Division of RBC Capital Markets Corporation. These Recommended Lists include the Prime Opportunity List (RL 3), a former list called the Private Client Prime Portfolio (RL 4), the Prime Income List (RL 6), the Guided Portfolio: Large Cap (RL 7), and the Guided Portfolio: Dividend Growth (RL 8). The abbreviation 'RL On' means the date a security was placed on a Recommended List. The abbreviation 'RL Off' means the date a security was removed from a Recommended List.

Conflicts Policy

RBC Capital Markets Policy for Managing Conflicts of Interest in Relation to Investment Research is available from us on request. To access our current policy, clients should refer to
https://www.rbccm.com/global/file-414164.pdf
or send a request to RBC CM Research Publishing, P.O. Box 50, 200 Bay Street, Royal Bank Plaza, 29th Floor, South Tower, Toronto, Ontario M5J 2W7. We reserve the right to amend or supplement this policy at any time.

Dissemination of Research and Short-Term Trading Calls

RBC Capital Markets endeavours to make all reasonable efforts to provide research simultaneously to all eligible clients, having regard to local time zones in overseas jurisdictions. RBC Capital Markets' research is posted to our proprietary websites to ensure eligible clients receive coverage initiations and changes in rating, targets and opinions in a timely manner. Additional distribution may be done by the sales personnel via email, fax or regular mail. Clients may also receive our research via third party vendors. Please contact your investment advisor or institutional salesperson for more information regarding RBC Capital Markets research.
RBC Capital Markets also provides eligible clients with access to a database which may contain Short-Term trading calls on certain of the subject companies for which it currently provides equity research coverage. The database may be accessed via the following hyperlink https://www2.rbccm.com/cmonline/index.html. The information regarding Short-Term trading calls accessible through the

database does not constitute a research report. These Short-Term trading calls are not formal ratings and reflect the research analyst's views with respect to market and trading events in the coming days or weeks and, as such, may differ from the price targets and recommendations in our published research reports reflecting the research analyst's views of the longer-term (one year) prospects of the subject company. Thus, it is possible that a subject company's common equity that is considered a long-term 'sector perform' or even an 'underperform' might be a Short-Term buying opportunity as a result of temporary selling pressure in the market; conversely, a subject company's common equity rated a long-term 'outperform' could be considered susceptible to a Short-Term downward price correction.

Analyst Certification

All of the views expressed in this report accurately reflect the personal views of the responsible analyst(s) about any and all of the subject securities or issuers. No part of the compensation of the responsible analyst(s) named herein is, or will be, directly or indirectly, related to the specific recommendations or views expressed by the responsible analyst(s) in this report.

PRICE TARGET REVISION | COMMENT

FEBRUARY 5, 2010

Fortis Inc. (TSX: FTS)

Updated Forecast Results in More Modest Growth; Target Trimmed to $30.00

Sector Perform
Average Risk

Price:	27.76	**Price Target:**	30.00 ↓ 31.00
		Implied All-In Return:	12%
Shares O/S (MM):	171.0	**Market Cap (MM):**	4,747
Dividend:	1.04	**Yield:**	3.7%
Float (MM):	171.0		
Debt to Cap:	60%		

Event

Fortis reported Q4 results; price target trimmed to $30.00 (from $31.00).

Investment Opinion

- **Q4/09 Results In Line With Forecast.** Q4/09 normalized EPS was $0.46 compared to our estimate of $0.46 and $0.48 in Q4/08. Slightly better-than-expected results at Terasen were offset by higher Corporate costs.
- **Recent Preferred Share Issue Cleans Up 2010 "Equity" Requirements.** Although the issuance occurred earlier than expected, Fortis took advantage of attractive rates and recently issued $250 million of 4.25% preferred shares, which should satisfy the company's "equity" requirements for 2010.
- **Previous Forecast A Little Too Optimistic.** Following a review of our financial forecast, we have reduced our 2010 and 2011 EPS estimates to primarily reflect an earlier than expected preferred share issuance, and lower contributions from FortisAlberta (lower assumed achieved ROE) and FortisBC (lower forecast rate base). Our new 2010 and 2011 EPS estimates are $1.67 and $1.81, respectively (down from $1.76 and $1.86, respectively). Please see Exhibit 3 for additional details.
- **Capex Plan To Drive Earnings Growth.** Management continues to expect $5 billion of capex over the next five years, with $1.1 billion slated to be spent in 2010. The majority of spending is forecast for the Canadian regulated utilities, which should continue to drive low-risk earnings growth.
- **On The Lookout For A Possible U.S. Acquisition.** Fortis continues to look for utility acquisition opportunities in the U.S. with a target size of $1 billion to $5 billion of enterprise value. The company also continues to seek out acquisitions in Canada and the Caribbean.
- **Valuation: Target Price Trimmed To $30.00 (From $31.00).** Our new price target is based on our new 2011E EPS estimate of $1.81, leaving our previous 16.5x forward P/E valuation unchanged. The forward P/E multiple is roughly in line with the 5-year average multiple and is similar to what we use for peers.

Priced as of prior trading day's market close, EST (unless otherwise noted).

For Required Non-U.S. Analyst and Conflicts Disclosures, see page 6.

Q4/09 Results In Line With Expectations

Fortis' normalized EPS in Q4/09 was $0.46 compared to our estimate of $0.46 and $0.48 in Q4/08. The year-over-year increase in earnings from the Canadian regulated utilities was driven by both rate base growth and favourable ROE decisions issued by regulatory commissions in Q4/09. Lower contribution in Q4/09 from Fortis Generation due to the expiration of the license for the Rankine hydro facility in Ontario was partially offset by the incremental earnings from hotel acquisitions during 2009 in Fortis Properties. The Q4/09 and full-year results are set out in Exhibit 1.

Exhibit 1: Normalized Earnings (In $MM except per share figures)

	Q4/09	RBC CM Est. Q4/09	Q4/08	2009	2008	Comments
Newfoundland Power	$8.0	$8.3	$8.0	$32.0	$32.0

Highlights

- **ROE Decisions Issued by the AUC and BCUC.** In November 2009, the Alberta Utilities Commission (AUC) released its cost of capital decision, in which it increased the allowed ROE to 9.0% (retroactive for 2009) from the 8.51% return that FortisAlberta was using per a previous AUC decision. Subsequently, the British Columbia Utilities Commission (BCUC) released its decision for Terasen, in which equity thickness was increased to 40% (from 35%) effective July 1, 2009, and the ROE was increased to 9.5% (from 8.47%) for 2010. For additional details, please refer to our *Research Comments* regarding the AUC and BCUC decisions dated November 16, 2009 and December 17, 2009, respectively.
- **$250 Million Preferred Share Issuance.** In January 2010, Fortis completed a $250 million five-year fixed rate reset preference share offering with the net proceeds of roughly $242 million being used for repayment of existing debt.
- **Long-Term Utility Growth.** With roughly $1 billion of gross capex in 2009, planned capex over the next five years is expected to approach $5 billion. As the majority of Fortis' planned capital investment is in Canadian regulated utilities, rate base is expected to grow at a roughly 7% compound annual growth rate, which should translate into similar earnings growth. Below are updates and revised costs for significant capital projects.
    - **Caribbean: Vaca Hydro Project.** Fortis' US$53 million Vaca project, a 19 MW hydro facility in Belize, is expected to be commissioned shortly. No further investment in Belize is planned by management.
    - **FortisBC: Okanagan Transmission Reinforcement.** The Okanagan Transmission project will enhance reliability in the company's service territory and has already been approved by the BCUC. The capital cost is approximately $110 million with an expected in-service date of 2011.

- **TVGI: Liquefied Natural Gas Facility.** Construction work continues on the $200 million liquefied natural gas storage facility.
- **FortisAlberta: Automated Meters.** With a revised cost of approximately $155 million (subject to regulatory approval), the project plans to replace conventional customer meters with new automated meters that eliminate the need for manual readings to determine customer usage.
- **Terasen Gas: New Customer Care System.** Management has filed an application for approval with the BCUC to bring the customer care function back in-house by investing in two new call centers and a customer information system with expected costs of roughly $113 million and a target in-service date of January 2012 (pending required approvals).

Exhibit 2: Capital Expenditures (2009 vs. 2010E)

	Terasen	FortisAlberta	FortisBC	Newfoundland Power	Other Cdn Reg	Caribbean Reg Util	Non-Reg Utility	Properties	Total
2009	$246	$407	$115	$74	$46	$92	$18	$26	$1,024
2010E	$327	$363	$168	$69	$47	$82	$16	$26	$1,098

Growth Outlook Moderated

Following a review of our financial forecast, we have reduced our 2010 and 2011 EPS estimates to $1.67 and $1.81, respectively (down from $1.76 and $1.86, respectively). A summary of our revised segment earnings is set out in Exhibit 3.

For 2010, the major drivers behind our changes include:

- higher corporate costs due to an earlier than expected issuance of preferred shares (i.e., the $250 million of preferred shares issued in January 2010);
- lower earnings from FortisAlberta primarily due to an assumed lower achieved ROE; and
- a lower contribution from FortisBC primarily due to a lower-than-forecast mid-year rate base.

For 2011, the major drivers behind our changes include:

- lower earnings from FortisAlberta primarily due to an assumed lower achieved ROE; and

- a lower contribution from FortisBC due to the lower rate base in 2010, which in turn reduces our 2011 rate base forecast as we have left our 2011 capex assumption unchanged.

Source: Company reports; RBC Capital Markets estimates

Valuation

Our target price of $30.00 is based on a forward P/E of 16.5x 2011E EPS. The forward P/E multiple is roughly in line with the 5-year average multiple and is similar to what we use for peers.

Price Target Impediment

The political environment in Belize, whether provincial regulators increase ROEs for the company's businesses, risk of punitive regulatory decisions, economic/tourism conditions in its service territories, operational or financial issues at newly acquired businesses or power prices in Ontario may have implications for our target price as well as our earnings and dividend estimates.

Company Description

Fortis Inc. is a utility holding company for Newfoundland Power, FortisAlberta, FortisBC, Terasen Inc., Maritime Electric, Canadian Niagara Power, Cornwall Electric, BECOL, two electric utilities in the Turks and Caicos, and 70%-owned Belize Electricity. It also holds a 100% interest in Fortis Properties and a 59.5% interest in Caribbean Utilities.

Required Disclosures

Non-U.S. Analyst Disclosure

Nelson Ng, CFA and Danny Hung, CA (i) are not registered/qualified as research analysts with the NYSE and/or FINRA and (ii) may not be associated persons of the RBC Capital Markets Corporation and therefore may not be subject to FINRA Rule 2711 and NYSE Rule 472 restrictions on communications with a subject company, public appearances and trading securities held by a research analyst account.

Conflicts Disclosures

The analyst(s) responsible for preparing this research report received compensation that is based upon various factors, including total revenues of the member companies of RBC Capital Markets and its affiliates, a portion of which are or have been generated by investment banking activities of the member companies of RBC Capital Markets and its affiliates.

A member company of RBC Capital Markets or one of its affiliates managed or co-managed a public offering of securities for Fortis Inc. in the past 12 months.

A member company of RBC Capital Markets or one of its affiliates received compensation for investment banking services from Fortis Inc. in the past 12 months.

Royal Bank of Canada, together with its affiliates, beneficially owns 1 percent or more of a class of common equity securities of Fortis Inc.

A member company of RBC Capital Markets or one of its affiliates received compensation for products or services other than investment banking services from Fortis Inc. during the past 12 months. During this time, a member company of RBC Capital Markets or one of its affiliates provided non-investment banking securities-related services to Fortis Inc.

A member company of RBC Capital Markets or one of its affiliates received compensation for products or services other than investment banking services from Fortis Inc. during the past 12 months. During this time, a member company of RBC Capital Markets or one of its affiliates provided non-securities services to Fortis Inc.

RBC Capital Markets is currently providing Fortis Inc. with non-investment banking securities-related services.

RBC Capital Markets is currently providing Fortis Inc. with non-securities services.

RBC Capital Markets has provided Fortis Inc. with investment banking services in the past 12 months.

RBC Capital Markets has provided Fortis Inc. with non-investment banking securities-related services in the past 12 months.

RBC Capital Markets has provided Fortis Inc. with non-securities services in the past 12 months.

The author is employed by RBC Dominion Securities Inc., a securities broker-dealer with principal offices located in Toronto, Canada.

Explanation of RBC Capital Markets Equity Rating System

An analyst's 'sector' is the universe of companies for which the analyst provides research coverage. Accordingly, the rating assigned to a particular stock represents solely the analyst's view of how that stock will perform over the next 12 months relative to the analyst's sector average.
Ratings
Top Pick (TP): Represents best in Outperform category; analyst's best ideas; expected to significantly outperform the sector over 12 months; provides best risk-reward ratio; approximately 10% of analyst's recommendations.
Outperform (O): Expected to materially outperform sector average over 12 months.
Sector Perform (SP): Returns expected to be in line with sector average over 12 months.
Underperform (U): Returns expected to be materially below sector average over 12 months.
Risk Qualifiers (any of the following criteria may be present):
Average Risk (Avg): Volatility and risk expected to be comparable to sector; average revenue and earnings predictability; no significant cash flow/financing concerns over coming 12-24 months; fairly liquid.
Above Average Risk (AA): Volatility and risk expected to be above sector; below average revenue and earnings predictability; may not be suitable for a significant class of individual equity investors; may have negative cash flow; low market cap or float.
Speculative (Spec): Risk consistent with venture capital; low public float; potential balance sheet concerns; risk of being delisted.

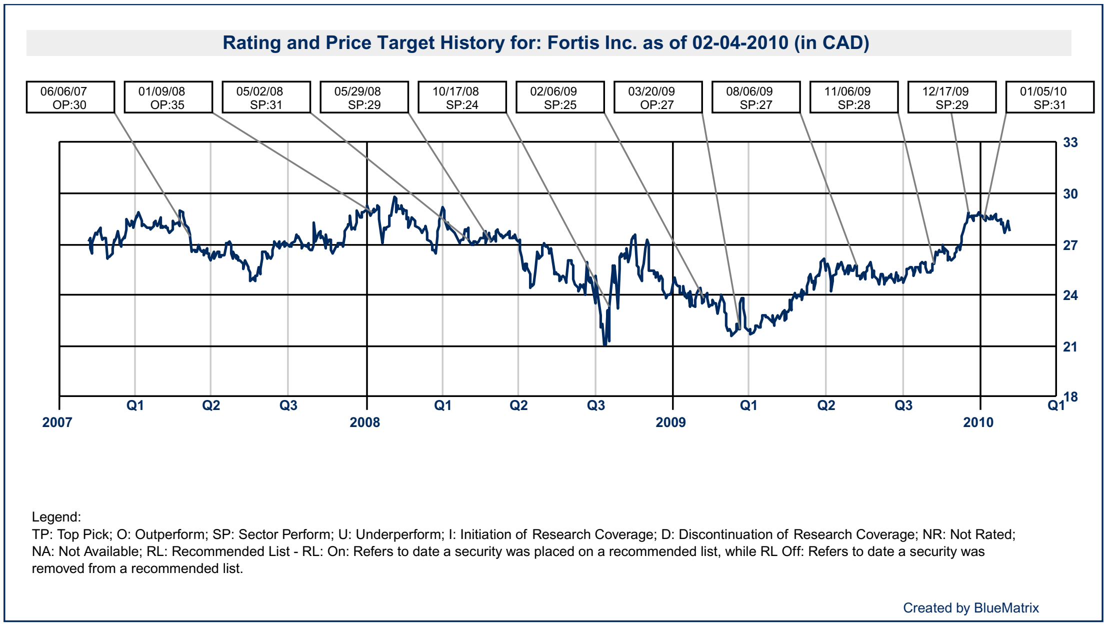
Distribution of Ratings

For the purpose of ratings distributions, regulatory rules require member firms to assign ratings to one of three rating categories - Buy,

Hold/Neutral, or Sell - regardless of a firm's own rating categories. Although RBC Capital Markets' ratings of Top Pick/Outperform, Sector Perform and Underperform most closely correspond to Buy, Hold/Neutral and Sell, respectively, the meanings are not the same because our ratings are determined on a relative basis (as described above).

Distribution of Ratings
RBC Capital Markets, Equity Research

Rating	Count	Percent	Investment Banking Serv./Past 12 Mos. Count	Percent
BUY[TP/O]	586	49.50	183	31.23
HOLD[SP]	527	44.50	121	22.96
SELL[U]	70	5.90	7	10.00



References to a Recommended List in the recommendation history chart may include one or more recommended lists or model portfolios maintained by a business unit of the Wealth Management Division of RBC Capital Markets Corporation. These Recommended Lists include the Prime Opportunity List (RL 3), a former list called the Private Client Prime Portfolio (RL 4), the Prime Income List (RL 6), the Guided Portfolio: Large Cap (RL 7), and the Guided Portfolio: Dividend Growth (RL 8). The abbreviation 'RL On' means the date a security was placed on a Recommended List. The abbreviation 'RL Off' means the date a security was removed from a Recommended List.

Conflicts Policy

RBC Capital Markets Policy for Managing Conflicts of Interest in Relation to Investment Research is available from us on request. To access our current policy, clients should refer to
https://www.rbccm.com/global/file-414164.pdf
or send a request to RBC CM Research Publishing, P.O. Box 50, 200 Bay Street, Royal Bank Plaza, 29th Floor, South Tower, Toronto, Ontario M5J 2W7. We reserve the right to amend or supplement this policy at any time.

Dissemination of Research and Short-Term Trading Calls

RBC Capital Markets endeavours to make all reasonable efforts to provide research simultaneously to all eligible clients, having regard to local time zones in overseas jurisdictions. RBC Capital Markets' research is posted to our proprietary websites to ensure eligible clients receive coverage initiations and changes in rating, targets and opinions in a timely manner. Additional distribution may be done by the sales personnel via email, fax or regular mail. Clients may also receive our research via third party vendors. Please contact your investment advisor or institutional salesperson for more information regarding RBC Capital Markets research.
RBC Capital Markets also provides eligible clients with access to a database which may contain Short-Term trading calls on certain of the subject companies for which it currently provides equity research coverage. The database may be accessed via the following hyperlink https://www2.rbccm.com/cmonline/index.html. The information regarding Short-Term trading calls accessible through the

database does not constitute a research report. These Short-Term trading calls are not formal ratings and reflect the research analyst's views with respect to market and trading events in the coming days or weeks and, as such, may differ from the price targets and recommendations in our published research reports reflecting the research analyst's views of the longer-term (one year) prospects of the subject company. Thus, it is possible that a subject company's common equity that is considered a long-term 'sector perform' or even an 'underperform' might be a Short-Term buying opportunity as a result of temporary selling pressure in the market; conversely, a subject company's common equity rated a long-term 'outperform' could be considered susceptible to a Short-Term downward price correction.

Analyst Certification

All of the views expressed in this report accurately reflect the personal views of the responsible analyst(s) about any and all of the subject securities or issuers. No part of the compensation of the responsible analyst(s) named herein is, or will be, directly or indirectly, related to the specific recommendations or views expressed by the responsible analyst(s) in this report.

Disclaimer

RBC Capital Markets is the business name used by certain subsidiaries of Royal Bank of Canada, including RBC Dominion Securities Inc., RBC Capital Markets Corporation, Royal Bank of Canada Europe Limited and Royal Bank of Canada - Sydney Branch. The information contained in this report has been compiled by RBC Capital Markets from sources believed to be reliable, but no representation or warranty, express or implied, is made by Royal Bank of Canada, RBC Capital Markets, its affiliates or any other person as to its accuracy, completeness or correctness. All opinions and estimates contained in this report constitute RBC Capital Markets' judgement as of the date of this report, are subject to change without notice and are provided in good faith but without legal responsibility. Nothing in this report constitutes legal, accounting or tax advice or individually tailored investment advice. This material is prepared for general circulation to clients and has been prepared without regard to the individual financial circumstances and objectives of persons who receive it. The investments or services contained in this report may not be suitable for you and it is recommended that you consult an independent investment advisor if you are in doubt about the suitability of such investments or services. This report is not an offer to sell or a solicitation of an offer to buy any securities. Past performance is not a guide to future performance, future returns are not guaranteed, and a loss of original capital may occur. RBC Capital Markets research analyst compensation is based in part on the overall profitability of RBC Capital Markets, which includes profits attributable to investment banking revenues. Every province in Canada, state in the U.S., and most countries throughout the world have their own laws regulating the types of securities and other investment products which may be offered to their residents, as well as the process for doing so. As a result, the securities discussed in this report may not be eligible for sale in some jurisdictions. This report is not, and under no circumstances should be construed as, a solicitation to act as securities broker or dealer in any jurisdiction by any person or company that is not legally permitted to carry on the business of a securities broker or dealer in that jurisdiction. To the full extent permitted by law neither RBC Capital Markets nor any of its affiliates, nor any other person, accepts any liability whatsoever for any direct or consequential loss arising from any use of this report or the information contained herein. No matter contained in this document may be reproduced or copied by any means without the prior consent of RBC Capital Markets.

Additional information is available on request.

To U.S. Residents:
This publication has been approved by RBC Capital Markets Corporation (member FINRA, NYSE), which is a U.S. registered broker-dealer and which accepts responsibility for this report and its dissemination in the United States. Any U.S. recipient of this report that is not a registered broker-dealer or a bank acting in a broker or dealer capacity and that wishes further information regarding, or to effect any transaction in, any of the securities discussed in this report, should contact and place orders with RBC Capital Markets Corporation.
To Canadian Residents:
This publication has been approved by RBC Dominion Securities Inc.(member IIROC). Any Canadian recipient of this report that is not a Designated Institution in Ontario, an Accredited Investor in British Columbia or Alberta or a Sophisticated Purchaser in Quebec (or similar permitted purchaser in any other province) and that wishes further information regarding, or to effect any transaction in, any of the securities discussed in this report should contact and place orders with RBC Dominion Securities Inc., which, without in any way limiting the foregoing, accepts responsibility for this report and its dissemination in Canada.
To U.K. Residents:
This publication has been approved by Royal Bank of Canada Europe Limited ('RBCEL') which is authorized and regulated by Financial ServicesAuthority ('FSA'), in connection with its distribution in the United Kingdom. This material is not for general distribution in the United Kingdom to retail clients, as defined under the rules of the FSA. However, targeted distribution may be made to selected retail clients of RBC and its affiliates. RBCEL accepts responsibility for this report and its dissemination in the United Kingdom.
To Persons Receiving This Advice in Australia:
This material has been distributed in Australia by Royal Bank of Canada - Sydney Branch (ABN 86 076 940 880, AFSL No. 246521). This material has been prepared for general circulation and does not take into account the objectives, financial situation or needs of any recipient. Accordingly, any recipient should, before acting on this material, consider the appropriateness of this material having regard to their objectives, financial situation and needs. If this material relates to the acquisition or possible acquisition of a particular financial product, a recipient in Australia should obtain any relevant disclosure document prepared in respect of that product and consider that document before making any decision about whether to acquire the product.
To Hong Kong Residents:
This publication is distributed in Hong Kong by RBC Investment Services (Asia) Limited and RBC Investment Management (Asia) Limited, licensed corporations under the Securities and Futures Ordinance or, by Royal Bank of Canada, Hong Kong Branch, a registered institution under the Securities and Futures Ordinance. This material has been prepared for general circulation and does not take into account the objectives, financial situation, or needs of any recipient. Hong Kong persons wishing to obtain further information on any of the securities mentioned in this publication should contact RBC Investment Services (Asia) Limited, RBC Investment Management (Asia) Limited or Royal Bank of Canada, Hong Kong Branch at 17/Floor, Cheung Kong Center, 2 Queen's Road Central, Hong Kong (telephone number is 2848-1388).
To Singapore Residents:
This publication is distributed in Singapore by RBC (Singapore Branch) and RBC (Asia) Limited, registered entities granted offshore bank status by the Monetary Authority of Singapore. This material has been prepared for general circulation and does not take into account the objectives, financial situation, or needs of any recipient. You are advised to seek independent advice from a financial adviser before purchasing any product. If you do not obtain independent advice, you should consider whether the product is suitable for you. Past performance is not indicative of future performance.

COMPANY UPDATE | COMMENT

FEBRUARY 18, 2010

Fortis Inc. (TSX: FTS)

BCUC Sets Conditions for Approval of Customer Care Project

Sector Perform
Average Risk

Price:	27.34	**Price Target:**	30.00
		Implied All-In Return:	14%
Shares O/S (MM):	171.0	**Market Cap (MM):**	4,675
Dividend:	1.04	**Yield:**	3.8%
Float (MM):	171.0		
Debt to Cap:	60%		

Event

The British Columbia Utilities Commission (BCUC) issued a decision on Terasen's customer care enhancement project.

Investment Opinion

- **BCUC Sets Conditions for Approval for Terasen's Customer Care Project.** The BCUC denied Terasen's proposed customer care insourcing project as applied. However, the BCUC is willing to approve the project under the condition that final project costs outside of a +/- 10% band around Terasen's estimated $115.5 million project cost be shared 50/50 between rate payers and Fortis' shareholders. Terasen has 10 days (until February 26, 2010) to confirm its acceptance of the BCUC's conditional approval.
- **Management Reviewing the Decision.** Management is currently reviewing the decision to see whether it is able to work within the conditions set out by the BCUC.
- **Not Material One Way or the Other.** Although approval of the project would have been a modest positive to earnings, we estimate that the project would only add about $0.02/share to EPS based on a $115.5 million addition to rate base and Terasen's regulated return metrics (i.e. 40% equity component at 9.5% allowed ROE) net of costs to finance the equity component of the project.
- **Overview of the Customer Care Enhancement Project.** Currently, Terasen's customer care function is outsourced, and the company would like to bring customer care back "in house" at an estimated capital cost of $115.5 million. Fortis sees the benefits of improved customer service quality, lower overall cost, and the creation of jobs within its own service territory as the outsourced call centre is currently located in New Brunswick.
- **Valuation.** Our target price of $30.00 (unchanged) is based on a forward P/E of 16.5x 2011E EPS. The forward P/E multiple is roughly in line with the 5-year average multiple and is similar to what we use for peers.

Priced as of prior trading day's market close, EST (unless otherwise noted).

For Required Non-U.S. Analyst and Conflicts Disclosures, see page 3.

Valuation

Our target price of $30.00 is based on a forward P/E of 16.5x 2011E EPS. The forward P/E multiple is roughly in line with the 5-year average multiple and is similar to what we use for peers.

Price Target Impediment

The political environment in Belize, whether provincial regulators increase ROEs for the company's businesses, risk of punitive regulatory decisions, economic/tourism conditions in its service territories, operational or financial issues at newly acquired businesses or power prices in Ontario may have implications for our target price as well as our earnings and dividend estimates.

Company Description

Float (MM):	172.2		
Debt to Cap:	58%		

Event

Fortis reported Q1/10 results.

Investment Opinion

- **Q1/10 Results in Line.** Fortis' normalized EPS in Q1/10 was $0.58 compared to our estimate of $0.57 and $0.54 in Q1/09. Higher-than-expected earnings in the Canadian regulated utilities appear to be due to quarterly timing differences. This was mostly offset by lower-than-forecast earnings from non-regulated Fortis Generation as a result of low water flows in Belize and higher-than-forecast corporate costs.
- **Long-Term Capital Plan Intact; Attractive Low-Risk Investment in Utility Rate Base.** With a focus on investments in regulated utilities located in western Canada, management reiterated its 2010 capex plan of over $1 billion. Gross consolidated capital expenditures in Q1/10 were roughly $188 million, the majority of which was invested in Canadian regulated utilities.
- **The Search for a Strategic Acquisition Continues.** Fortis continues to pursue strategic opportunities to acquire regulated electric and gas utilities in Canada, the U.S. and the Caribbean. Although going solo is preferred, management commented that it would be open to a partnership with one other entity (e.g., a pension fund) for a larger transaction that would be difficult to finance.
- **Shares Appear Fairly Valued; Sector Perform Ranking Unchanged.** While we like the existing asset base, and in particular the growth in the western Canadian utilities, the shares appear to be fairly valued trading at almost 16x our 2011E EPS, which is about 1x higher than the group average. However, we see the premium as justified given the low-risk nature of the regulated utility business coupled with an above average earnings growth profile.
- **Valuation.** Our target price of $30.00 (unchanged) is based on a forward P/E of 17x 2011E EPS. The forward P/E multiple is roughly in line with the 5-year average multiple and is similar to what we use for peers.

Priced as of prior trading day's market close, EST (unless otherwise noted).

For Required Non-U.S. Analyst and Conflicts Disclosures, see page 5.

Q1/10 Results In Line With Expectations, But Variances In Some Segments

Fortis' normalized EPS in Q1/10 was $0.58 compared to our estimate of $0.57 and $0.54 in Q1/09. Higher-than-expected earnings in the Canadian regulated utilities were primarily driven by a higher contribution from Terasen, which appears to be due to quarterly timing differences. This was mostly offset by lower-than-forecast earnings from non-regulated Fortis Generation as a result of low water flows in Belize, and higher-than-forecast corporate costs, some of which were isolated to the quarter. The results are set out in Exhibit 1.

Exhibit 1: Normalized Earnings (In $MM except per share figures)

	Q1/10	RBC CM Q1/10E	Q1/09	Comments
Newfoundland Power	$7.0	$6.4	$6.0	
FortisOntario & Maritime Electric	5.0	5.6	5.0	
Terasen	73.0	59.7	58.0	Appears to be quarterly timing differences
FortisAlberta	14.0	14.8	13.0	
FortisBC	14.0	17.4	14.0	Appears to be quarterly timing differences
Regulated Utilities - Canadian	113.0	104.0	96.0	
Regulated Utilities - Caribbean	4.0	4.8	4.0	
Non-regulated - Fortis Generation	2.0	4.9	6.0	Low water flows in Belize

Source: Company reports; RBC Capital Markets estimates

Highlights of the Quarter

- **Canadian Regulated Utilities Higher on Timing Differences.** Earnings from Canadian regulated utilities in Q1/10 were higher-than-expected mainly due to higher-than-forecast earnings from Terasen, partially offset by a lower-than expected contribution from FortisBC. Both variances appear to be due to quarterly timing differences and we have largely left our annual estimates for each segment unchanged.

- **Non-Regulated Fortis Generation Negatively Impacted by Hydrology.** Lower-than-expected earnings from non-regulated Fortis Generation were mainly attributable to lower-than-forecast rainfall in Belize in Q1/10.

- **19 MW Vaca Hydro Project in Belize Commissioned in Q1/10.** Fortis' US$53 million Vaca project, a 19 MW hydro facility in Belize, was commissioned in March 2010 and delivered 4 GWh during the quarter.

- **Long-Term Utility Growth Capex Plan Continues as Planned.** With a focus on investments in regulated utilities located in western Canada, management reiterated its 2010 capex plan of over $1 billion. Gross consolidated capital expenditures in Q1/10 were roughly $188 million, the majority of which was invested in Canadian regulated utilities.

- **Search for the Right Strategic Acquisition Continues.** Fortis continues to pursue strategic opportunities to acquire regulated electric and gas utilities in Canada, the U.S. and the Caribbean. Although there was no confirmation that it was a bidder for the E.ON utilities that were sold in Kentucky, management provided general colour with respect to its acquisition plans:

  - **Going Solo Is Preferred.** Similar to comments made throughout the years, management continues to prefer to acquire 100% of assets without any partners. The company believes this reduces the complexity of a transaction and allows it to proceed with an acquisition more expeditiously.

- **Will Partner if Necessary, but NOT a Consortium.** To the extent an acquisition target is too large for Fortis to complete on its own, the company would consider taking on one partner (e.g., a pension fund) where the company would have at least a 50% interest.
- **The Acquisition Parameters Remain Unchanged.** In the U.S., the company continues to seek out regulated electric and/or gas utilities with a preference for businesses in a single state (i.e., one regulator). Fortis is comfortable with an integrated electric utility as long as the generation assets are in regulated rate base.

Estimates Slightly Revised For Higher Forecast Corporate Costs and Shares Outstanding

Following a review of our financial model, we have modestly reduced our 2010 and 2011 EPS estimates to $1.63 and $1.78, respectively (from $1.67 and $1.81, respectively). For 2010, our revised estimate reflects lower power generation in Q1/10, higher forecast corporate costs and higher estimated shares outstanding. For 2011, our revised estimate reflects both higher forecast corporate costs and shares outstanding. Our revised estimates are set out in Exhibit 2.

Exhibit 2: Revised Financial Forecast (In $MM except per share figures)

Source: Company reports; RBC Capital Markets estimates

Valuation

Our target price of $30.00 is based on a forward P/E of 17x 2011E EPS. The forward P/E multiple is roughly in line with the 5-year average multiple and is similar to what we use for peers.

Price Target Impediment

The political environment in Belize, whether provincial regulators increase ROEs for the company's businesses, risk of punitive regulatory decisions, economic/tourism conditions in its service territories, operational or financial issues at newly acquired businesses or power prices in Ontario may have implications for our target price as well as our earnings and dividend estimates.

Company Description

Fortis Inc. is a utility holding company for Newfoundland Power, FortisAlberta, FortisBC, Terasen Inc., Maritime Electric, Canadian Niagara Power, Cornwall Electric, BECOL, two electric utilities in the Turks and Caicos, and 70%-owned Belize Electricity. It also holds a 100% interest in Fortis Properties and a 59.5% interest in Caribbean Utilities.

Required Disclosures

Non-U.S. Analyst Disclosure

Nelson Ng, CFA and Danny Hung, CA (i) are not registered/qualified as research analysts with the NYSE and/or FINRA and (ii) may not be associated persons of the RBC Capital Markets Corporation and therefore may not be subject to FINRA Rule 2711 and NYSE Rule 472 restrictions on communications with a subject company, public appearances and trading securities held by a research analyst account.

Conflicts Disclosures

The analyst(s) responsible for preparing this research report received compensation that is based upon various factors, including total revenues of the member companies of RBC Capital Markets and its affiliates, a portion of which are or have been generated by investment banking activities of the member companies of RBC Capital Markets and its affiliates.

A member company of RBC Capital Markets or one of its affiliates managed or co-managed a public offering of securities for Fortis Inc. in the past 12 months.

A member company of RBC Capital Markets or one of its affiliates received compensation for investment banking services from Fortis Inc. in the past 12 months.

Royal Bank of Canada, together with its affiliates, beneficially owns 1 percent or more of a class of common equity securities of Fortis Inc.

A member company of RBC Capital Markets or one of its affiliates received compensation for products or services other than investment banking services from Fortis Inc. during the past 12 months. During this time, a member company of RBC Capital Markets or one of its affiliates provided non-investment banking securities-related services to Fortis Inc.

A member company of RBC Capital Markets or one of its affiliates received compensation for products or services other than investment banking services from Fortis Inc. during the past 12 months. During this time, a member company of RBC Capital Markets or one of its affiliates provided non-securities services to Fortis Inc.

RBC Capital Markets is currently providing Fortis Inc. with non-investment banking securities-related services.

RBC Capital Markets is currently providing Fortis Inc. with non-securities services.

Explanation of RBC Capital Markets Equity Rating System

An analyst's 'sector' is the universe of companies for which the analyst provides research coverage. Accordingly, the rating assigned to a particular stock represents solely the analyst's view of how that stock will perform over the next 12 months relative to the analyst's sector average.

Ratings

Top Pick (TP): Represents best in Outperform category; analyst's best ideas; expected to significantly outperform the sector over 12 months; provides best risk-reward ratio; approximately 10% of analyst's recommendations.

Outperform (O): Expected to materially outperform sector average over 12 months.

Sector Perform (SP): Returns expected to be in line with sector average over 12 months.

Underperform (U): Returns expected to be materially below sector average over 12 months.

Risk Qualifiers (any of the following criteria may be present):

Average Risk (Avg): Volatility and risk expected to be comparable to sector; average revenue and earnings predictability; no significant cash flow/financing concerns over coming 12-24 months; fairly liquid.

Above Average Risk (AA): Volatility and risk expected to be above sector; below average revenue and earnings predictability; may not be suitable for a significant class of individual equity investors; may have negative cash flow; low market cap or float.

Speculative (Spec): Risk consistent with venture capital; low public float; potential balance sheet concerns; risk of being delisted.

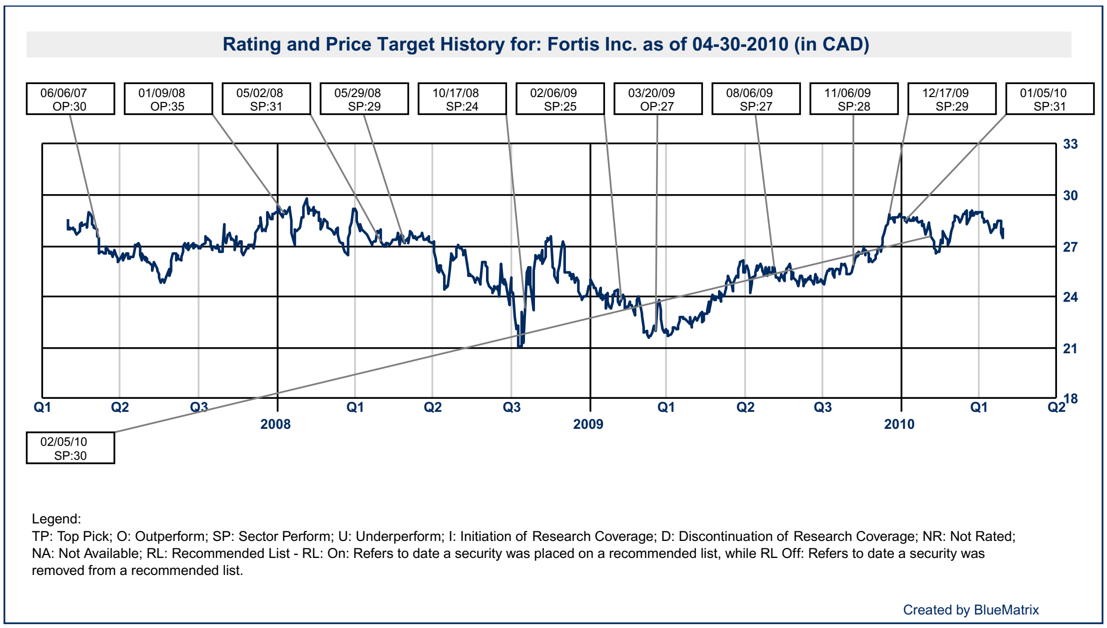
Distribution of Ratings

For the purpose of ratings distributions, regulatory rules require member firms to assign ratings to one of three rating categories - Buy,

Hold/Neutral, or Sell - regardless of a firm's own rating categories. Although RBC Capital Markets' ratings of Top Pick/Outperform, Sector Perform and Underperform most closely correspond to Buy, Hold/Neutral and Sell, respectively, the meanings are not the same because our ratings are determined on a relative basis (as described above).

Distribution of Ratings
RBC Capital Markets, Equity Research

Rating	Count	Percent	Investment Banking Serv./Past 12 Mos. Count	Investment Banking Serv./Past 12 Mos. Percent
BUY[TP/O]	607	49.20	185	30.48
HOLD[SP]	559	45.30	134	23.97
SELL[U]	67	5.40	9	13.43



References to a Recommended List in the recommendation history chart may include one or more recommended lists or model portfolios maintained by a business unit of the Wealth Management Division of RBC Capital Markets Corporation. These Recommended Lists include the Prime Opportunity List (RL 3), a former list called the Private Client Prime Portfolio (RL 4), the Prime Income List (RL 6), the Guided Portfolio: Large Cap (RL 7), and the Guided Portfolio: Dividend Growth (RL 8). The abbreviation 'RL On' means the date a security was placed on a Recommended List. The abbreviation 'RL Off' means the date a security was removed from a Recommended List.

Conflicts Policy

RBC Capital Markets Policy for Managing Conflicts of Interest in Relation to Investment Research is available from us on request. To access our current policy, clients should refer to
https://www.rbccm.com/global/file-414164.pdf
or send a request to RBC CM Research Publishing, P.O. Box 50, 200 Bay Street, Royal Bank Plaza, 29th Floor, South Tower, Toronto, Ontario M5J 2W7. We reserve the right to amend or supplement this policy at any time.

Dissemination of Research and Short-Term Trading Calls

RBC Capital Markets endeavors to make all reasonable efforts to provide research simultaneously to all eligible clients, having regard to local time zones in overseas jurisdictions. RBC Capital Markets' equity research is posted to our proprietary websites to ensure eligible clients receive coverage initiations and changes in ratings, targets and opinions in a timely manner. Additional distribution may be done by the sales personnel via email, fax or regular mail. Clients may also receive our research via third-party vendors. Please contact your investment advisor or institutional salesperson for more information regarding RBC Capital Markets' research. RBC Capital Markets also provides eligible clients with access to SPARC on the Firm's proprietary INSIGHT website. SPARC contains market color and commentary, and may also contain Short-Term Trade Ideas regarding the publicly-traded common equity of subject companies on which the Firm currently provides equity research coverage. SPARC may be accessed via the following hyperlink:

www.rbcinsight.com. A Short-Term Trade Idea reflects the research analyst's directional view regarding the price of the subject company's publicly-traded common equity in the coming days or weeks, based on market and trading events. A Short-Term Trade Idea may differ from the price targets and recommendations in our published research reports reflecting the research analyst's views of the longer-term (one year) prospects of the subject company, as a result of the differing time horizons, methodologies and/or other factors. Thus, it is possible that a subject company's common equity that is considered a long-term 'sector perform' or even an 'underperform' might be a short-term buying opportunity as a result of temporary selling pressure in the market; conversely, a subject company's common equity rated a long-term 'outperform' could be considered susceptible to a short-term downward price correction. Short-Term Trade Ideas are not ratings, nor are they part of any ratings system, and the Firm generally does not intend, nor undertakes any obligation, to maintain or update Short-Term Trade Ideas. Securities and Short-Term Trade Ideas discussed in SPARC may not be suitable for all investors and have not been tailored to individual investor circumstances and objectives, and investors should make their own independent decisions regarding any securities or strategies discussed herein.

Analyst Certification

All of the views expressed in this report accurately reflect the personal views of the responsible analyst(s) about any and all of the subject securities or issuers. No part of the compensation of the responsible analyst(s) named herein is, or will be, directly or indirectly, related to the specific recommendations or views expressed by the responsible analyst(s) in this report.

Float (MM):	172.9		
Debt to Cap:	58%		

Event

Fortis reported Q2/10 results; increasing price target to $32.00 (from $30.00).

Investment Opinion

- **Q2/10 Results in Line with Expectations.** Fortis' Q2/10 EPS was $0.32 compared to our estimate of $0.32 and $0.30 in Q2/09. Higher-than-expected earnings from Terasen, partly due to quarterly timing factors, were offset by slightly lower-than-forecast earnings from FortisBC, Newfoundland Power, Generation and the utilities in the Caribbean.
- **Core Utilities Performing Well.** On the whole, the utility businesses in Canada are performing in line with our expectations. With continued significant rate base investment planned (roughly $1 billion per year), we see these businesses as the organic growth engine for the next several years.
- **We Remain Comfortable with Our Estimates.** Other than minor changes within the segments (Terasen slightly higher with FortisBC and Generation slightly lower), we have not made changes to our overall EPS estimates for 2010 and 2011.
- **Maintaining Sector Perform Ranking; We Remain Neutral Until the Valuation Becomes More Attractive and/or a U.S. Acquisition Unfolds.** We view the stock as fairly valued with Fortis having the highest P/E among the regulated utilities in our coverage, which we see as supported by the Canadian regulated utilities' outlook for growth. At this time, we maintain our Sector Perform rating pending either: (1) a better relative valuation; or (2) more insight into what could potentially be a scale-changing U.S. utility acquisition.
- **Valuation: Increasing Price Target to $32.00 (from $30.00).** We believe that companies in the sector will benefit from a shift toward stocks that have attractive total return profiles resulting in multiple expansion. Our new price target is based on a P/E of roughly 17x, which we believe is reasonable based on historical valuations for the stock.

Priced as of prior trading day's market close, EST (unless otherwise noted).

For Required Non-U.S. Analyst and Conflicts Disclosures, see page 6.

Q2/10 Results in Line with Expectations

Fortis' normalized EPS in Q2/10 was $0.32 compared to our estimate of $0.32 and $0.30 in Q2/09. Higher-than-expected earnings from Terasen were partially offset by slightly lower-than-forecast earnings from Newfoundland Power, FortisBC, Generation and the utilities in the Caribbean. The results are set out in Exhibit 1.

Source: Company reports; RBC Capital Markets estimates

Highlights of the Quarter

- **Canadian Regulated Utilities Impacted by Quarterly Timing Factors.** Earnings from Terasen were well ahead of expectations, while earnings from FortisBC were short of expectations. Discussions with the company indicate that quarterly timing factors (e.g., timing of O&M costs) impacted results. We have made minor changes to our forecast for Terasen (about $2 million higher in 2010) and FortisBC (about $2 million lower in 2010), but our overall outlook for the segment remains unchanged.
- **Caribbean Regulated Utilities Results Lower-Than-Forecast Due to Higher Taxes.** Lower-than-forecast earnings from Caribbean regulated utilities were due to higher corporate taxes in Belize and a weaker U.S. dollar.
- **Non-Regulated Fortis Generation Negatively Impacted by Hydrology.** Lower-than-expected earnings from non-regulated Fortis Generation were primarily attributable to poor hydrology in New York in addition to a weaker U.S. dollar.
- **Long-Term Utility Growth Capex Plan on Track.** The capital program of roughly $5 billion over the five-year period from 2010 through 2014 remains on track. With $1.1 billion slated to be spent in 2010, gross consolidated capital expenditures in H1/10 were roughly $432 million, the majority of which was invested in Canadian regulated utilities.
- **Decision to Opt for Two-Year IFRS Deferral.** The Canadian Accounting Standards Board recently announced that subject to the finalization of an exposure draft, it will offer a two-year deferral for the adoption of IFRS for qualifying entities with rate regulated activities. If the exposure draft is approved, Fortis will elect to defer the adoption of IFRS until 2013, as the company is a qualifying entity.

The Hunt for a U.S. Utility Acquisition Continues, but Nothing New to Report

Fortis continues to pursue strategic opportunities to acquire regulated electric and gas utilities in Canada, the U.S. and the Caribbean.

In particular, Fortis remains interested in acquiring a U.S. utility. We believe that the company will remain disciplined with respect to acquisition parameters, evidenced by the fact that although management has been talking about a U.S. utility acquisition for many years, it has yet to pull the trigger. The following is a recap of the parameters that management has discussed with respect to a U.S. utility acquisition.

- **Potential for a Scale-Changing Acquisition.** The company continues to seek out regulated electric and/or gas utilities with a preference for businesses in a single state (i.e., one regulator). Fortis is comfortable with an integrated electric utility as long as the generation assets are in regulated rate base. The target size is US$1 billion to US$5 billion of enterprise value with a utility in the US$3 billion enterprise value range being optimal.
- **Going Solo Is Preferred.** Similar to comments made throughout the years, management continues to prefer to acquire 100% of assets without any partners. The company believes this would reduce the complexity of a transaction and allow it to proceed with an acquisition more expeditiously.
  - **Will Partner if Necessary, but Not a Consortium.** To the extent that an acquisition target is too large for Fortis to complete on its own, the company would consider taking on one partner (e.g., a Canadian pension fund) where the company would have at least a 50% interest.

Minor Changes Within the Segments but Overall Estimates Remain Unchanged

We have made minor changes to our forecast for Terasen (about $2 million and $3 million higher in 2010 and 2011, respectively) and FortisBC (about $2 million lower in 2010), but our 2010 and 2011 EPS estimates remain unchanged. Our revised estimates are set out in Exhibit 2.

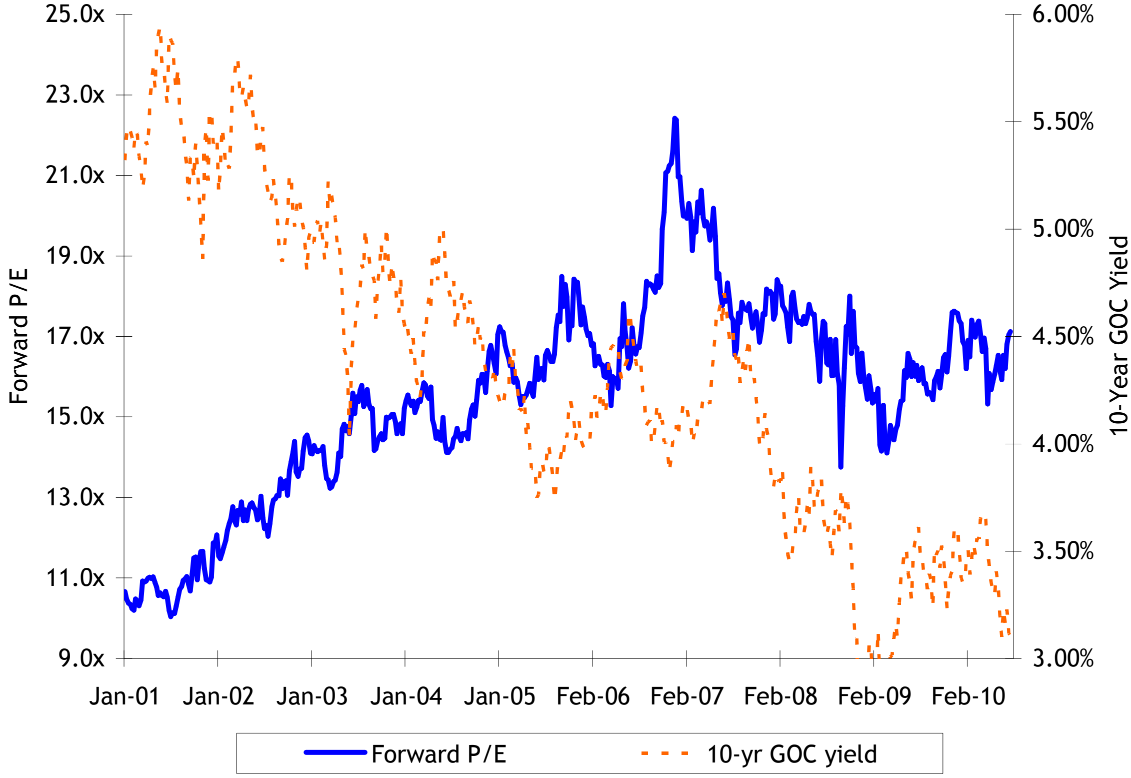
Increasing Price Target to $32.00 (from $30.00)

We have increased our price target to $32.00 (from $30.00) to reflect a forward P/E of 17x 2011E EPS, which we believe is reasonable based on historical valuations for the stock and what we use for its peers. As shown in Exhibit 3, Fortis' forward P/E over the past five years mostly ranged from about 15x to 19x. We believe that companies in the sector will benefit from a shift toward stocks that have attractive total return profiles resulting in multiple expansion.

Exhibit 3: Forward P/E



Source: Company reports; RBC Capital Markets estimates

Valuation

Our target price of $32.00 is based on a forward P/E of 17x 2011E EPS. The forward P/E multiple is roughly in line with the 5-year average multiple and is similar to what we use for peers.

Price Target Impediment

The political environment in Belize, whether provincial regulators increase ROEs for the company's businesses, risk of punitive regulatory decisions, economic/tourism conditions in its service territories, operational or financial issues at newly acquired businesses or power prices in Ontario may have implications for our target price as well as our earnings and dividend estimates.

Company Description

Fortis Inc. is a utility holding company for Newfoundland Power, FortisAlberta, FortisBC, Terasen Inc., Maritime Electric, Canadian Niagara Power, Cornwall Electric, BECOL, two electric utilities in the Turks and Caicos, and 70%-owned Belize Electricity. It also holds a 100% interest in Fortis Properties and a 59.5% interest in Caribbean Utilities.

Required Disclosures

Non-U.S. Analyst Disclosure

Nelson Ng, CFA and Danny Hung, CA (i) are not registered/qualified as research analysts with the NYSE and/or FINRA and (ii) may not be associated persons of the RBC Capital Markets Corporation and therefore may not be subject to FINRA Rule 2711 and NYSE Rule 472 restrictions on communications with a subject company, public appearances and trading securities held by a research analyst account.

Conflicts Disclosures

The analyst(s) responsible for preparing this research report received compensation that is based upon various factors, including total revenues of the member companies of RBC Capital Markets and its affiliates, a portion of which are or have been generated by investment banking activities of the member companies of RBC Capital Markets and its affiliates.

A member company of RBC Capital Markets or one of its affiliates managed or co-managed a public offering of securities for Fortis Inc. in the past 12 months.

A member company of RBC Capital Markets or one of its affiliates received compensation for investment banking services from Fortis Inc. in the past 12 months.

Royal Bank of Canada, together with its affiliates, beneficially owns 1 percent or more of a class of common equity securities of Fortis Inc.

A member company of RBC Capital Markets or one of its affiliates received compensation for products or services other than investment banking services from Fortis Inc. during the past 12 months. During this time, a member company of RBC Capital Markets or one of its affiliates provided non-investment banking securities-related services to Fortis Inc.

A member company of RBC Capital Markets or one of its affiliates received compensation for products or services other than investment banking services from Fortis Inc. during the past 12 months. During this time, a member company of RBC Capital Markets or one of its affiliates provided non-securities services to Fortis Inc.

Explanation of RBC Capital Markets Equity Rating System

An analyst's 'sector' is the universe of companies for which the analyst provides research coverage. Accordingly, the rating assigned to a particular stock represents solely the analyst's view of how that stock will perform over the next 12 months relative to the analyst's sector average.

Ratings

Top Pick (TP): Represents best in Outperform category; analyst's best ideas; expected to significantly outperform the sector over 12 months; provides best risk-reward ratio; approximately 10% of analyst's recommendations.

Outperform (O): Expected to materially outperform sector average over 12 months.

Sector Perform (SP): Returns expected to be in line with sector average over 12 months.

Underperform (U): Returns expected to be materially below sector average over 12 months.

Risk Qualifiers (any of the following criteria may be present):

Average Risk (Avg): Volatility and risk expected to be comparable to sector; average revenue and earnings predictability; no significant cash flow/financing concerns over coming 12-24 months; fairly liquid.

Above Average Risk (AA): Volatility and risk expected to be above sector; below average revenue and earnings predictability; may not be suitable for a significant class of individual equity investors; may have negative cash flow; low market cap or float.

Speculative (Spec): Risk consistent with venture capital; low public float; potential balance sheet concerns; risk of being delisted.

Distribution of Ratings

For the purpose of ratings distributions, regulatory rules require member firms to assign ratings to one of three rating categories - Buy,

Hold/Neutral, or Sell - regardless of a firm's own rating categories. Although RBC Capital Markets' ratings of Top Pick/Outperform, Sector Perform and Underperform most closely correspond to Buy, Hold/Neutral and Sell, respectively, the meanings are not the same because our ratings are determined on a relative basis (as described above).

Distribution of Ratings
RBC Capital Markets, Equity Research

			Investment Banking Serv./Past 12 Mos.	
Rating	**Count**	**Percent**	**Count**	**Percent**
BUY[TP/O]	635	50.20	181	28.50

References to a Recommended List in the recommendation history chart may include one or more recommended lists or model portfolios maintained by a business unit of the Wealth Management Division of RBC Capital Markets Corporation. These Recommended Lists include the Prime Opportunity List (RL 3), a former list called the Private Client Prime Portfolio (RL 4), the Prime Income List (RL 6), the Guided Portfolio: Large Cap (RL 7), and the Guided Portfolio: Dividend Growth (RL 8). The abbreviation 'RL On' means the date a security was placed on a Recommended List. The abbreviation 'RL Off' means the date a security was removed from a Recommended List.

Conflicts Policy

RBC Capital Markets Policy for Managing Conflicts of Interest in Relation to Investment Research is available from us on request. To access our current policy, clients should refer to
https://www.rbccm.com/global/file-414164.pdf
or send a request to RBC CM Research Publishing, P.O. Box 50, 200 Bay Street, Royal Bank Plaza, 29th Floor, South Tower, Toronto, Ontario M5J 2W7. We reserve the right to amend or supplement this policy at any time.

Dissemination of Research and Short-Term Trading Calls

RBC Capital Markets endeavors to make all reasonable efforts to provide research simultaneously to all eligible clients, having regard to local time zones in overseas jurisdictions. RBC Capital Markets' equity research is posted to our proprietary websites to ensure eligible clients receive coverage initiations and changes in ratings, targets and opinions in a timely manner. Additional distribution may be done by the sales personnel via email, fax or regular mail. Clients may also receive our research via third-party vendors. Please contact your investment advisor or institutional salesperson for more information regarding RBC Capital Markets' research. RBC Capital Markets also provides eligible clients with access to SPARC on the Firm's proprietary INSIGHT website. SPARC contains market color and commentary, and may also contain Short-Term Trade Ideas regarding the publicly-traded common equity of subject companies on which the Firm currently provides equity research coverage. SPARC may be accessed via the following hyperlink:

www.rbcinsight.com. A Short-Term Trade Idea reflects the research analyst's directional view regarding the price of the subject company's publicly-traded common equity in the coming days or weeks, based on market and trading events. A Short-Term Trade Idea may differ from the price targets and recommendations in our published research reports reflecting the research analyst's views of the longer-term (one year) prospects of the subject company, as a result of the differing time horizons, methodologies and/or other factors. Thus, it is possible that a subject company's common equity that is considered a long-term 'sector perform' or even an 'underperform' might be a short-term buying opportunity as a result of temporary selling pressure in the market; conversely, a subject company's common equity rated a long-term 'outperform' could be considered susceptible to a short-term downward price correction. Short-Term Trade Ideas are not ratings, nor are they part of any ratings system, and the Firm generally does not intend, nor undertakes any obligation, to maintain or update Short-Term Trade Ideas. Securities and Short-Term Trade Ideas discussed in SPARC may not be suitable for all investors and have not been tailored to individual investor circumstances and objectives, and investors should make their own independent decisions regarding any securities or strategies discussed herein.

Analyst Certification

COMPANY UPDATE | COMMENT

AUGUST 27, 2010

Fortis Inc. (TSX: FTS)

New Hydro Project in B.C.

Sector Perform
Average Risk

Price:	29.05	**Price Target:**	32.00
		Implied All-In Return:	14%
Shares O/S (MM):	172.9	**Market Cap (MM):**	5,023
Dividend:	1.12	**Yield:**	3.9%
Float (MM):	172.9		
Debt to Cap:	58%		

Event

Fortis has agreed to invest in a 335 MW hydro project in B.C.

Investment Opinion

- **New Hydro Investment.** Fortis has entered into a partnership with Columbia Power Corporation and Columbia Basin Trust (CPC/CBT) to construct the $900 million Waneta Expansion, a 335 MW hydro project in B.C. Fortis will own 51% of the plant and will operate and maintain the facility. The Waneta Expansion is expected to be in service in the spring of 2015.
- **Relatively Low Risk Project.** The hydro plant will sell energy and capacity to BC Hydro and FortisBC (the company's regulated electric utility) under long-term contracts. Further, hydrology risk is reduced due to the project receiving fixed payments based on long-term average water flows as stipulated under the Canal Plant Agreement. Capital cost risk has been reduced through a fixed price design build contract that has been negotiated with SNC-Lavalin.
- **Expected to Be Modestly Accretive to EPS.** Our preliminary analysis indicates that the project could add roughly $0.03 to $0.05 per share to earnings. We have left our 2010 and 2011 EPS estimates unchanged due to the in-service date being 2015.
- **Flexibility on Funding.** Fortis will initially fund the capex using available credit facilities with the aim of putting in place permanent financing at a later date at a target capital structure of 65% debt and 35% equity. From an equity perspective, we do not expect the project to trigger any near-term requirements for common equity. It is likely that future equity needs for the project will be funded in conjunction with other equity requirements in the business (e.g., utility capex funding, acquisitions).
- **Valuation.** Our target price of $32.00 is based on a forward P/E of 17x 2011E EPS. The forward P/E multiple is roughly in line with the 5-year average multiple and is similar to what we use for peers.

Priced as of prior trading day's market close, EST (unless otherwise noted).

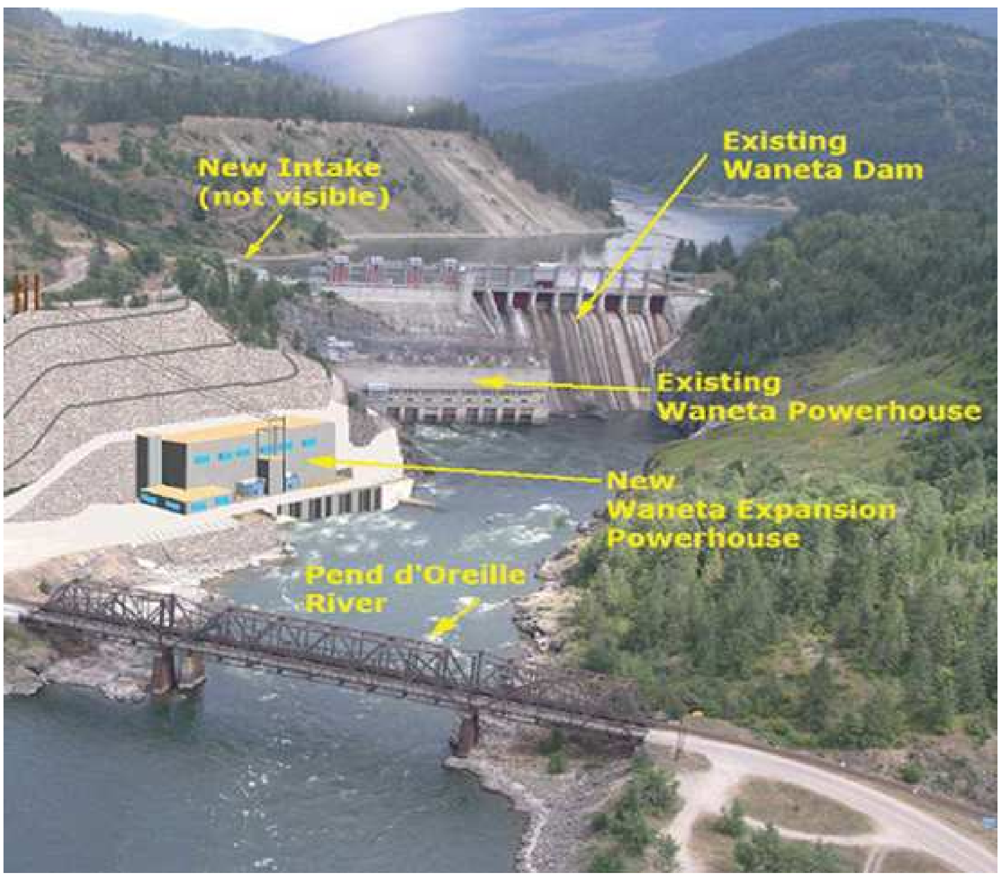
For Required Non-U.S. Analyst and Conflicts Disclosures, see page 5.

Fortis to Invest in 335 MW Hydro Facility in B.C.

Fortis announced a partnership with CPC/CBT to construct a 335 MW hydro project for $900 million near the Waneta Dam, which is on the Pend d'Oreille River south of Trail, B.C. (please refer to Exhibit 1). Subject to negotiation and completion of definitive agreements, Fortis will own 51% of the Waneta Expansion, and operate and maintain the facility when it is expected to be in service in the spring of 2015.

- **Financing:** Fortis intends to initially finance its share of the costs through existing credit facilities with the goal of putting in place permanent financing at a later date at a target capital structure of 65% debt and 35% equity.
- **Long-Term Contracts:** Approximately 630 GWh (and associated capacity required to deliver such energy) of the Waneta Expansion will be sold to BC Hydro under a long-term EPA, while the surplus capacity of 234 MW on an average annual basis will be sold under a long-term capacity purchase agreement to FortisBC, pending the approval of the British Columbia Utilities Commission.
- **Relatively Low Risk:** The project's hydrology risk is reduced as the Waneta Expansion will become part of the Canal Plant Agreement, under which it will receive fixed energy and capacity payments based on long-term average water flows. Further, capital cost risk has been reduced through a fixed-price design build contract that has been negotiated with SNC-Lavalin.
- **Project Returns:** In the press release, Fortis stated that it "expects to generate slightly better financial returns than regulated investments, commensurate with the higher risk associated with a non-regulated project." In comparison, Fortis' regulated gas utility in B.C. (Terasen) earns a regulated ROE of 9.5%.

Exhibit 1: Waneta Expansion



Source: Columbia Power Corporation

Waneta Expansion Appears to Be Roughly $0.03 to $0.05 Accretive to EPS

Based on our analysis of the project set out in Exhibit 2, it appears that the Waneta Expansion could add roughly $0.03 to $0.05 to EPS in 2015, and the sensitivity to the return on equity coupled with the equity issuance price is shown in Exhibit 3.

Danny Hung and Nelson Ng (i) are not registered/qualified as research analysts with the NYSE and/or FINRA and (ii) may not be associated persons of the RBC Capital Markets Corporation and therefore may not be subject to FINRA Rule 2711 and NYSE Rule 472 restrictions on communications with a subject company, public appearances and trading securities held by a research analyst account.

Conflicts Disclosures

The analyst(s) responsible for preparing this research report received compensation that is based upon various factors, including total revenues of the member companies of RBC Capital Markets and its affiliates, a portion of which are or have been generated by investment banking activities of the member companies of RBC Capital Markets and its affiliates.

A member company of RBC Capital Markets or one of its affiliates managed or co-managed a public offering of securities for Fortis Inc. in the past 12 months.

A member company of RBC Capital Markets or one of its affiliates received compensation for investment banking services from Fortis Inc. in the past 12 months.

Royal Bank of Canada, together with its affiliates, beneficially owns 1 percent or more of a class of common equity securities of Fortis Inc..

A member company of RBC Capital Markets or one of its affiliates received compensation for products or services other than investment banking services from Fortis Inc. during the past 12 months. During this time, a member company of RBC Capital Markets or one of its affiliates provided non-investment banking securities-related services to Fortis Inc..

A member company of RBC Capital Markets or one of its affiliates received compensation for products or services other than investment banking services from Fortis Inc. during the past 12 months. During this time, a member company of RBC Capital Markets or one of its affiliates provided non-securities services to Fortis Inc..

RBC Capital Markets is currently providing Fortis Inc. with non-investment banking securities-related services.

RBC Capital Markets is currently providing Fortis Inc. with non-securities services.

RBC Capital Markets has provided Fortis Inc. with investment banking services in the past 12 months.

RBC Capital Markets has provided Fortis Inc. with non-investment banking securities-related services in the past 12 months.

RBC Capital Markets has provided Fortis Inc. with non-securities services in the past 12 months.

The author is employed by RBC Dominion Securities Inc., a securities broker-dealer with principal offices located in Toronto, Canada.

Explanation of RBC Capital Markets Equity Rating System

An analyst's 'sector' is the universe of companies for which the analyst provides research coverage. Accordingly, the rating assigned to a particular stock represents solely the analyst's view of how that stock will perform over the next 12 months relative to the analyst's sector average.
Ratings
Top Pick (TP): Represents best in Outperform category; analyst's best ideas; expected to significantly outperform the sector over 12 months; provides best risk-reward ratio; approximately 10% of analyst's recommendations.
Outperform (O): Expected to materially outperform sector average over 12 months.
Sector Perform (SP): Returns expected to be in line with sector average over 12 months.
Underperform (U): Returns expected to be materially below sector average over 12 months.
Risk Qualifiers (any of the following criteria may be present):
Average Risk (Avg): Volatility and risk expected to be comparable to sector; average revenue and earnings predictability; no significant cash flow/financing concerns over coming 12-24 months; fairly liquid.
Above Average Risk (AA): Volatility and risk expected to be above sector; below average revenue and earnings predictability; may not be suitable for a significant class of individual equity investors; may have negative cash flow; low market cap or float.
Speculative (Spec): Risk consistent with venture capital; low public float; potential balance sheet concerns; risk of being delisted.

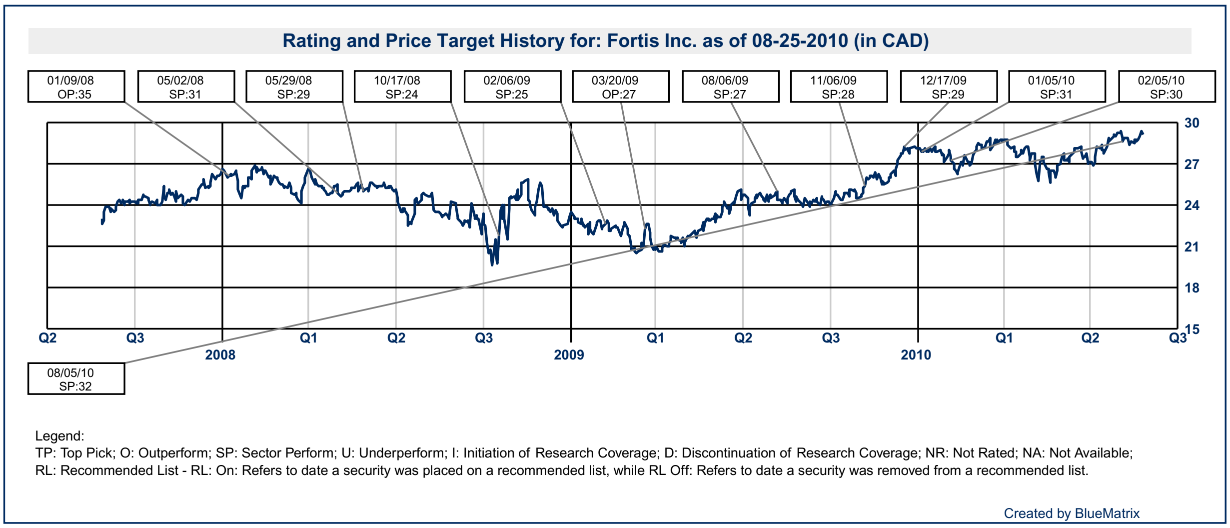
Distribution of Ratings

For the purpose of ratings distributions, regulatory rules require member firms to assign ratings to one of three rating categories - Buy,

Hold/Neutral, or Sell - regardless of a firm's own rating categories. Although RBC Capital Markets' ratings of Top Pick/Outperform, Sector Perform and Underperform most closely correspond to Buy, Hold/Neutral and Sell, respectively, the meanings are not the same because our ratings are determined on a relative basis (as described above).

Distribution of Ratings
RBC Capital Markets, Equity Research

Rating	Count	Percent	Investment Banking Serv./Past 12 Mos. Count	Investment Banking Serv./Past 12 Mos. Percent
BUY[TP/O]	621	49.40	187	30.11
HOLD[SP]	577	45.90	122	21.14
SELL[U]	60	4.80	10	16.67



References to a Recommended List in the recommendation history chart may include one or more recommended lists or model portfolios maintained by a business unit of the Wealth Management Division of RBC Capital Markets Corporation. These Recommended Lists include the Prime Opportunity List (RL 3), a former list called the Private Client Prime Portfolio (RL 4), the Prime Income List (RL 6), the Guided Portfolio: Large Cap (RL 7), and the Guided Portfolio: Dividend Growth (RL 8). The abbreviation 'RL On' means the date a security was placed on a Recommended List. The abbreviation 'RL Off' means the date a security was removed from a Recommended List.

Conflicts Policy

RBC Capital Markets Policy for Managing Conflicts of Interest in Relation to Investment Research is available from us on request. To access our current policy, clients should refer to
https://www.rbccm.com/global/file-414164.pdf
or send a request to RBC CM Research Publishing, P.O. Box 50, 200 Bay Street, Royal Bank Plaza, 29th Floor, South Tower, Toronto, Ontario M5J 2W7. We reserve the right to amend or supplement this policy at any time.

Dissemination of Research and Short-Term Trading Calls

RBC Capital Markets endeavors to make all reasonable efforts to provide research simultaneously to all eligible clients, having regard to local time zones in overseas jurisdictions. RBC Capital Markets' equity research is posted to our proprietary websites to ensure eligible clients receive coverage initiations and changes in ratings, targets and opinions in a timely manner. Additional distribution may be done by the sales personnel via email, fax or regular mail. Clients may also receive our research via third-party vendors. Please contact your investment advisor or institutional salesperson for more information regarding RBC Capital Markets' research. RBC Capital Markets also provides eligible clients with access to SPARC on the Firm's proprietary INSIGHT website. SPARC contains market color and commentary, and may also contain Short-Term Trade Ideas regarding the publicly-traded common equity of subject companies on which the Firm currently provides equity research coverage. SPARC may be accessed via the following hyperlink:

https://www.rbcinsight.com. A Short-Term Trade Idea reflects the research analyst's directional view regarding the price of the subject company's publicly-traded common equity in the coming days or weeks, based on market and trading events. A Short-Term Trade Idea may differ from the price targets and recommendations in our published research reports reflecting the research analyst's views of the longer-term (one year) prospects of the subject company, as a result of the differing time horizons, methodologies and/or other factors. Thus, it is possible that a subject company's common equity that is considered a long-term 'sector perform' or even an 'underperform' might be a short-term buying opportunity as a result of temporary selling pressure in the market; conversely, a subject company's common equity rated a long-term 'outperform' could be considered susceptible to a short-term downward price correction. Short-Term Trade Ideas are not ratings, nor are they part of any ratings system, and the Firm generally does not intend, nor undertakes any obligation, to maintain or update Short-Term Trade Ideas. Securities and Short-Term Trade Ideas discussed in SPARC may not be suitable for all investors and have not been tailored to individual investor circumstances and objectives, and investors should make their own independent decisions regarding any securities or strategies discussed herein.

Analyst Certification

All of the views expressed in this report accurately reflect the personal views of the responsible analyst(s) about any and all of the subject securities or issuers. No part of the compensation of the responsible analyst(s) named herein is, or will be, directly or indirectly, related to the specific recommendations or views expressed by the responsible analyst(s) in this report.

PRICE TARGET REVISION | COMMENT

NOVEMBER 8, 2010

Fortis Inc. (TSX: FTS)

Q3/10 Results In-Line; Raising Price Target to $33 on Higher Dividend Forecast

Sector Perform
Average Risk

Price:	33.26	**Price Target:**	33.00 ↑ 32.00
		Implied All-In Return:	3%
Shares O/S (MM):	173.6	**Market Cap (MM):**	5,774
Dividend:	1.12	**Yield:**	3.4%
Float (MM):	173.6		
Debt to Cap:	58%		

Event

Fortis reported Q3/10 results; increasing price target increased to $33.00 (from $32.00) based on higher dividend forecast.

Investment Opinion

- **Normalized Results in Line with Expectations.** Fortis' Q3/10 normalized EPS was $0.24 compared with our estimate of $0.24 and $0.22 in Q3/09. Reported EPS was $0.26 and we normalized for $4 million gain ($0.02/share) from a reversal of a loss at Terasen originally booked in Q4/09.
- **Ready to Ride the Dividend Wave?** Previously, we had forecast an $0.08/share increase in the dividend for 2011, which implied a 67% payout ratio. With a yield-driven market and other companies we cover receiving a favourable response from higher-than-forecast dividend increases, we see the potential for a larger increase from Fortis (likely to be announced in December or January). We have modestly increased our dividend forecast for 2011 to $1.24/share (from $1.20/share), with the new forecast implying a 70% payout ratio. Given the ongoing "equity" needs in the business resulting from the strong capex profile, we do not expect the company to push past the 70% payout mark.
- **A U.S. Acquisition Seems to Be Getting Closer.** Over the past several quarters, management has been incrementally optimistic regarding the potential to make a utility acquisition in the U.S. This quarter was no different.
- **A Stock Worth Owning, Just Not an Overweight Position Right Now.** In our view, Fortis has premium regulated utility assets and management has demonstrated its ability to acquire assets at good prices. However, we are more cautious regarding a U.S. utility acquisition as previous acquisitions were well known to investors (either the asset itself and/or the regulatory regime) whereas a U.S. acquisition is unlikely to be a familiar asset or a state regulator that Canadian investors will be familiar with.
- **Valuation: Raising Price Target to $33.00 (from $32.00).** We think that a larger dividend increase would be well received by the market. As such, we see the potential for modest valuation improvement. Our new price target is based on a forward P/E of 17.5x our 2012E EPS (previously 17.0x).

Priced as of prior trading day's market close, EST (unless otherwise noted).

For Required Non-U.S. Analyst and Conflicts Disclosures, see page 6.

Q3/10 Results in Line with Expectations

Fortis' normalized EPS in Q3/10 was $0.24 compared to our estimate of $0.24 and $0.22 in Q3/09. Excluding a $4 million ($0.02/share) benefit related to prior periods, lower-than-expected earnings from Terasen were offset by higher-than-forecast earnings from Generation (strong water flows in Belize). The results are set out in Exhibit 1.

Exhibit 1: Normalized Earnings (In $MM except per share figures)

	Q3/10	RBC CM Q3/10E	Q3/09	Comments
Newfoundland Power	$8.0	$7.5	$7.0

	4.0		(1.5)	
Reported Earnings	$45.0		$36.0	
Reported EPS	$0.26		$0.21	

Source: Company reports; RBC Capital Markets estimates

Highlights of the Quarter

- **Canadian Regulated Utilities Impacted by Earnings from Terasen.** Excluding a $4 million ($0.02/share) benefit related to the B.C. Utilities Commission approving the reversal of a project cost overrun previously expensed in Q4/09, earnings from Terasen were short of expectations in Q3/10.
- **Non-Regulated Fortis Generation Positively Impacted by Hydrology.** Higher-than-expected earnings from non-regulated Fortis Generation were primarily attributable to strong hydrology in Belize, including the recently commissioned Vaca hydro plant.
- **Waneta Expansion: 335 MW Hydro Project in B.C.** In Q3/10, Fortis finalized definitive agreements to enter into a partnership with Columbia Power Corporation and Columbia Basin Trust to construct the $900 million Waneta Expansion, a 335 MW hydro project in B.C. Fortis will own 51% of the plant and will operate and maintain the facility. The Waneta Expansion, which is expected to be in service in the spring of 2015, will sell energy and capacity to BC Hydro and FortisBC (Fortis' regulated electric utility) under long-term contracts. Construction is expected to start in November 2010. Fortis will initially fund the capex using available credit facilities with the aim of putting in place permanent financing at a later date. Our preliminary analysis indicates that the project could add roughly $0.03 to $0.05 per share to earnings. For additional details, please refer to our *Research Comment* dated August 27, 2010.
- **$5.5 Billion Long-Term Utility Growth Capex Plan.** Including the Waneta Expansion, the capital program over the five-year period from 2011 through 2015 is roughly $5.5 billion. Consolidated year-to-date capital expenditures were roughly $703 million, the majority of which was invested in the Canadian regulated utilities.
- **The Hunt Continues for Sizeable U.S. Utility Acquisition.** Fortis continues to pursue strategic opportunities to acquire regulated electric and gas utilities in Canada and the U.S. (of note, management intentionally removed the Caribbean as a

target geography from the "Outlook" section of the MD&A this quarter). Over the past several quarters, management has been incrementally optimistic regarding the potential to make a utility acquisition in the U.S.

Overall EPS Estimates Unchanged; Boosting Dividend Forecast

We have made changes to some of our segment forecasts but have left our overall EPS estimates unchanged through 2012. However, we have increased our forecast for dividends. Previously, we had forecast an $0.08/share increase in the dividend for 2011, which implied a 67% payout ratio. With a yield-driven market and other companies we cover receiving a favourable response from higher-than-forecast dividend increases, we see the potential for a larger increase from Fortis (likely to be announced in December or January). We have modestly increased our dividend estimate for 2011 to $1.24/share (from $1.20/share) with the new forecast implying a 70% payout ratio. Given the ongoing "equity" needs in the business due to the strong capex profile, we do not expect the company to push past the 70% payout mark.

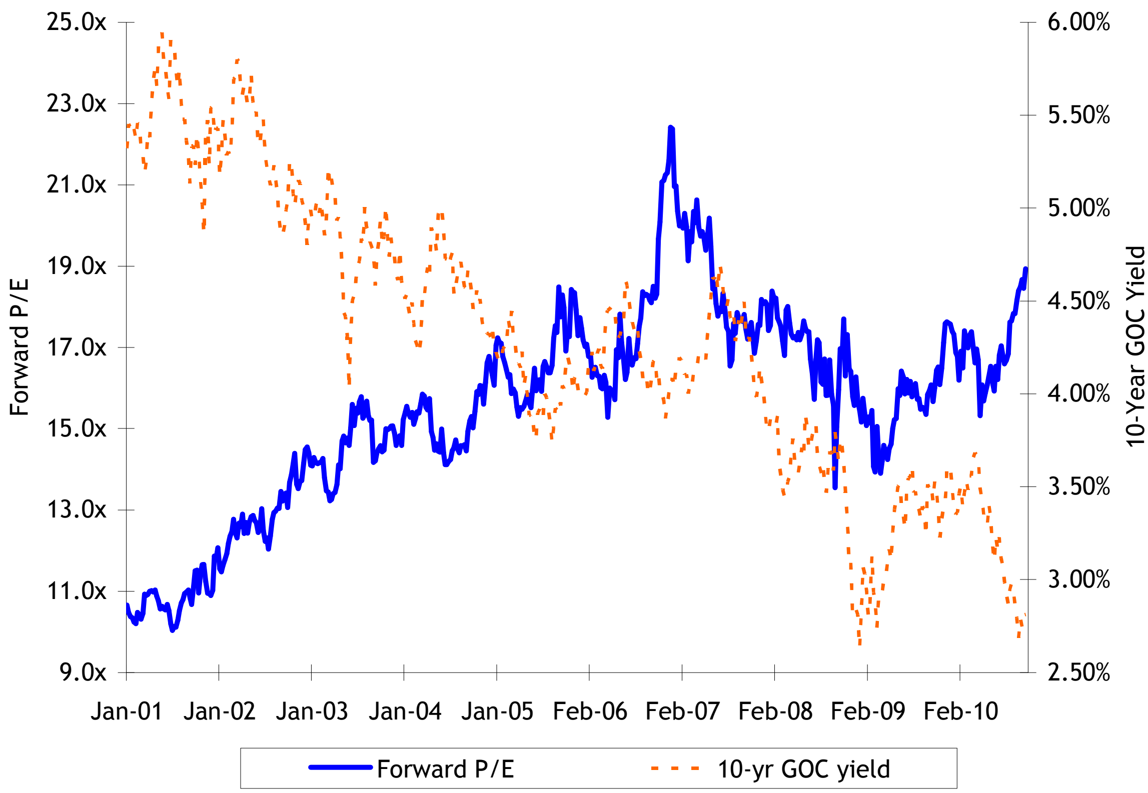
Increasing Price Target to $33.00 (from $32.00)

We have increased our price target to $33.00 (from $32.00) to reflect a forward P/E of 17.5x 2011E EPS (previously 17.0x) as we think that a larger dividend increase will be well received by the market. As shown in Exhibit 3, Fortis' forward P/E over the past five years mostly ranged from about 14x to 19x (excluding the peak in 2007 due to EPS dilution from the Terasen transaction as the deal closed in May, which is after Terasen's seasonally strong months). As such, our target multiple is well within the historical range.

Exhibit 3: Forward P/E



Source: Company reports; RBC Capital Markets estimates

Valuation

Our price target of $33.00 is based on a forward P/E of 17.5x 2012E EPS. The forward P/E multiple is roughly in line with the 5-year average multiple and is similar to what we use for peers.

Price Target Impediment

The political environment in Belize, the risk of punitive regulatory decisions, economic/tourism conditions in its service territories, operational or financial issues at newly acquired businesses, and acquisitions or projects that fail to gain the confidence of investors may have implications for our price target.

Company Description

Fortis Inc. is a utility holding company for Newfoundland Power, FortisAlberta, FortisBC, Terasen Inc., Maritime Electric, Canadian Niagara Power, Cornwall Electric, BECOL, two electric utilities in the Turks and Caicos, and 70%-owned Belize Electricity. It also holds a 100% interest in Fortis Properties and a 59.5% interest in Caribbean Utilities.

Required Disclosures

Non-U.S. Analyst Disclosure

Danny Hung and Nelson Ng (i) are not registered/qualified as research analysts with the NYSE and/or FINRA and (ii) may not be associated persons of the RBC Capital Markets, LLC and therefore may not be subject to FINRA Rule 2711 and NYSE Rule 472 restrictions on communications with a subject company, public appearances and trading securities held by a research analyst account.

Conflicts Disclosures

The analyst(s) responsible for preparing this research report received compensation that is based upon various factors, including total revenues of the member companies of RBC Capital Markets and its affiliates, a portion of which are or have been generated by investment banking activities of the member companies of RBC Capital Markets and its affiliates.

A member company of RBC Capital Markets or one of its affiliates managed or co-managed a public offering of securities for Fortis Inc. in the past 12 months.

A member company of RBC Capital Markets or one of its affiliates received compensation for investment banking services from Fortis Inc. in the past 12 months.

Royal Bank of Canada, together with its affiliates, beneficially owns 1 percent or more of a class of common equity securities of Fortis Inc..

A member company of RBC Capital Markets or one of its affiliates received compensation for products or services other than investment banking services from Fortis Inc. during the past 12 months. During this time, a member company of RBC Capital Markets or one of its affiliates provided non-investment banking securities-related services to Fortis Inc..

A member company of RBC Capital Markets or one of its affiliates received compensation for products or services other than investment banking services from Fortis Inc. during the past 12 months. During this time, a member company of RBC Capital Markets or one of its affiliates provided non-securities services to Fortis Inc..

RBC Capital Markets is currently providing Fortis Inc. with non-investment banking securities-related services.

RBC Capital Markets is currently providing Fortis Inc. with non-securities services.

RBC Capital Markets has provided Fortis Inc. with non-investment banking securities-related services in the past 12 months.

RBC Capital Markets has provided Fortis Inc. with non-securities services in the past 12 months.

The author is employed by RBC Dominion Securities Inc., a securities broker-dealer with principal offices located in Toronto, Canada.

Explanation of RBC Capital Markets Equity Rating System

An analyst's 'sector' is the universe of companies for which the analyst provides research coverage. Accordingly, the rating assigned to a particular stock represents solely the analyst's view of how that stock will perform over the next 12 months relative to the analyst's sector average.

Ratings

Top Pick (TP): Represents best in Outperform category; analyst's best ideas; expected to significantly outperform the sector over 12 months; provides best risk-reward ratio; approximately 10% of analyst's recommendations.

Outperform (O): Expected to materially outperform sector average over 12 months.

Sector Perform (SP): Returns expected to be in line with sector average over 12 months.

Underperform (U): Returns expected to be materially below sector average over 12 months.

Risk Qualifiers (any of the following criteria may be present):

Average Risk (Avg): Volatility and risk expected to be comparable to sector; average revenue and earnings predictability; no significant cash flow/financing concerns over coming 12-24 months; fairly liquid.

Above Average Risk (AA): Volatility and risk expected to be above sector; below average revenue and earnings predictability; may not be suitable for a significant class of individual equity investors; may have negative cash flow; low market cap or float.

Speculative (Spec): Risk consistent with venture capital; low public float; potential balance sheet concerns; risk of being delisted.

Distribution of Ratings

For the purpose of ratings distributions, regulatory rules require member firms to assign ratings to one of three rating categories - Buy, Hold/Neutral, or Sell - regardless of a firm's own rating categories. Although RBC Capital Markets' ratings of Top Pick/Outperform,

Sector Perform and Underperform most closely correspond to Buy, Hold/Neutral and Sell, respectively, the meanings are not the same because our ratings are determined on a relative basis (as described above).

References to a Recommended List in the recommendation history chart may include one or more recommended lists or model portfolios maintained by a business unit of the Wealth Management Division of RBC Capital Markets, LLC. These Recommended Lists include the Prime Opportunity List (RL 3), a former list called the Private Client Prime Portfolio (RL 4), the Guided Portfolio: Prime Income (RL 6), the Guided Portfolio: Large Cap (RL 7), the Guided Portfolio: Dividend Growth (RL 8), and the Guided Portfolio: Midcap 111 (RL9). The abbreviation 'RL On' means the date a security was placed on a Recommended List. The abbreviation 'RL Off' means the date a security was removed from a Recommended List.

Conflicts Policy

RBC Capital Markets Policy for Managing Conflicts of Interest in Relation to Investment Research is available from us on request. To access our current policy, clients should refer to
https://www.rbccm.com/global/file-414164.pdf
or send a request to RBC CM Research Publishing, P.O. Box 50, 200 Bay Street, Royal Bank Plaza, 29th Floor, South Tower, Toronto, Ontario M5J 2W7. We reserve the right to amend or supplement this policy at any time.

Dissemination of Research and Short-Term Trading Calls

RBC Capital Markets endeavors to make all reasonable efforts to provide research simultaneously to all eligible clients, having regard to local time zones in overseas jurisdictions. RBC Capital Markets' equity research is posted to our proprietary websites to ensure eligible clients receive coverage initiations and changes in ratings, targets and opinions in a timely manner. Additional distribution may be done by the sales personnel via email, fax or regular mail. Clients may also receive our research via third-party vendors. Please contact your investment advisor or institutional salesperson for more information regarding RBC Capital Markets' research. RBC Capital Markets also provides eligible clients with access to SPARC on the Firm's proprietary INSIGHT website. SPARC contains market color and commentary, and may also contain Short-Term Trade Ideas regarding the publicly-traded common equity of subject companies on which the Firm currently provides equity research coverage. SPARC may be accessed via the following hyperlink: https://www.rbcinsight.com. A Short-Term Trade Idea reflects the research analyst's directional view regarding the price of the subject

company's publicly-traded common equity in the coming days or weeks, based on market and trading events. A Short-Term Trade Idea may differ from the price targets and recommendations in our published research reports reflecting the research analyst's views of the longer-term (one year) prospects of the subject company, as a result of the differing time horizons, methodologies and/or other factors. Thus, it is possible that a subject company's common equity that is considered a long-term 'sector perform' or even an 'underperform' might be a short-term buying opportunity as a result of temporary selling pressure in the market; conversely, a subject company's common equity rated a long-term 'outperform' could be considered susceptible to a short-term downward price correction. Short-Term Trade Ideas are not ratings, nor are they part of any ratings system, and the Firm generally does not intend, nor undertakes any obligation, to maintain or update Short-Term Trade Ideas. Securities and Short-Term Trade Ideas discussed in SPARC may not be suitable for all investors and have not been tailored to individual investor circumstances and objectives, and investors should make their own independent decisions regarding any securities or strategies discussed herein.

Analyst Certification

All of the views expressed in this report accurately reflect the personal views of the responsible analyst(s) about any and all of the subject securities or issuers. No part of the compensation of the responsible analyst(s) named herein is, or will be, directly or indirectly, related to the specific recommendations or views expressed by the responsible analyst(s) in this report.

Disclaimer

RBC Capital Markets is the business name used by certain subsidiaries of Royal Bank of Canada, including RBC Dominion Securities Inc., RBC Capital Markets, LLC, Royal Bank of Canada Europe Limited and Royal Bank of Canada - Sydney Branch. The information contained in this report has been compiled by RBC Capital Markets from sources believed to be reliable, but no representation or warranty, express or implied, is made by Royal Bank of Canada, RBC Capital Markets, its affiliates or any other person as to its accuracy, completeness or correctness. All opinions and estimates contained in this report constitute RBC Capital Markets' judgement as of the date of this report, are subject to change without notice and are provided in good faith but without legal responsibility. Nothing in this report constitutes legal, accounting or tax advice or individually tailored investment advice. This material is prepared for general circulation to clients and has been prepared without regard to the individual financial circumstances and objectives of persons who receive it. The investments or services contained in this report may not be suitable for you and it is recommended that you consult an independent investment advisor if you are in doubt about the suitability of such investments or services. This report is not an offer to sell or a solicitation of an offer to buy any securities. Past performance is not a guide to future performance, future returns are not guaranteed, and a loss of original capital may occur. RBC Capital Markets research analyst compensation is based in part on the overall profitability of RBC Capital Markets, which includes profits attributable to investment banking revenues. Every province in Canada, state in the U.S., and most countries throughout the world have their own laws regulating the types of securities and other investment products which may be offered to their residents, as well as the process for doing so. As a result, the securities discussed in this report may not be eligible for sale in some jurisdictions. This report is not, and under no circumstances should be construed as, a solicitation to act as securities broker or dealer in any jurisdiction by any person or company that is not legally permitted to carry on the business of a securities broker or dealer in that jurisdiction. To the full extent permitted by law neither RBC Capital Markets nor any of its affiliates, nor any other person, accepts any liability whatsoever for any direct or consequential loss arising from any use of this report or the information contained herein. No matter contained in this document may be reproduced or copied by any means without the prior consent of RBC Capital Markets.

Additional information is available on request.

To U.S. Residents:
This publication has been approved by RBC Capital Markets, LLC (member FINRA, NYSE), which is a U.S. registered broker-dealer and which accepts responsibility for this report and its dissemination in the United States. Any U.S. recipient of this report that is not a registered broker-dealer or a bank acting in a broker or dealer capacity and that wishes further information regarding, or to effect any transaction in, any of the securities discussed in this report, should contact and place orders with RBC Capital Markets, LLC.

To Canadian Residents:
This publication has been approved by RBC Dominion Securities Inc.(member IIROC). Any Canadian recipient of this report that is not a Designated Institution in Ontario, an Accredited Investor in British Columbia or Alberta or a Sophisticated Purchaser in Quebec (or similar permitted purchaser in any other province) and that wishes further information regarding, or to effect any transaction in, any of the securities discussed in this report should contact and place orders with RBC Dominion Securities Inc., which, without in any way limiting the foregoing, accepts responsibility for this report and its dissemination in Canada.

To U.K. Residents:
This publication has been approved by Royal Bank of Canada Europe Limited ('RBCEL') which is authorized and regulated by Financial ServicesAuthority ('FSA'), in connection with its distribution in the United Kingdom. This material is not for general distribution in the United Kingdom to retail clients, as defined under the rules of the FSA. However, targeted distribution may be made to selected retail clients of RBC and its affiliates. RBCEL accepts responsibility for this report and its dissemination in the United Kingdom.

To Persons Receiving This Advice in Australia:
This material has been distributed in Australia by Royal Bank of Canada - Sydney Branch (ABN 86 076 940 880, AFSL No. 246521). This material has been prepared for general circulation and does not take into account the objectives, financial situation or needs of any recipient. Accordingly, any recipient should, before acting on this material, consider the appropriateness of this material having regard to their objectives, financial situation and needs. If this material relates to the acquisition or possible acquisition of a particular financial product, a recipient in Australia should obtain any relevant disclosure document prepared in respect of that product and consider that document before making any decision about whether to acquire the product.

To Hong Kong Residents:
This publication is distributed in Hong Kong by RBC Investment Services (Asia) Limited and RBC Investment Management (Asia) Limited, licensed corporations under the Securities and Futures Ordinance or, by Royal Bank of Canada, Hong Kong Branch, a registered institution under the Securities and Futures Ordinance. This material has been prepared for general circulation and does not take into account the objectives, financial situation, or needs of any recipient. Hong Kong persons wishing to obtain further information on any of the securities mentioned in this publication should contact RBC Investment Services (Asia) Limited, RBC Investment Management (Asia) Limited or Royal Bank of Canada, Hong Kong Branch at 17/Floor, Cheung Kong Center, 2 Queen's Road Central, Hong Kong (telephone number is 2848-1388).

To Singapore Residents:
This publication is distributed in Singapore by RBC (Singapore Branch) and RBC (Asia) Limited, registered entities granted offshore bank status by the Monetary Authority of Singapore. This material has been prepared for general circulation and does not take into account the objectives, financial situation, or needs of any recipient. You are advised to seek independent advice from a financial adviser before purchasing any product. If you do not obtain independent advice, you should consider whether the product is suitable for you. Past performance is not indicative of future performance.

COMPANY UPDATE

Commercial Metals Company (CMC)

Not Rated

Equity Research

Revising estimates post FY1Q2012 earnings

What's changed

We are raising our FY12/FY13 EPS estimate for CMC to $0.90/$1.35 from $0.89/$1.20 on some expected recovery in non-res construction beginning in FY4Q 2012. Our FY2Q 2012 estimate is lowered to $0.02 due to assumption of a LIFO charge of $15 mn or $0.09 per share. We are also raising our FY4Q2012 estimate to $0.33 from $0.25 due to expectation of some recovery in non-residential construction activity by then.

The company commented that the construction market in the Central US is showing some strength and is also seeing some recovery in the East Coast, but West Coast is continuing to lag. It is seeing some signs of improvement in commercial construction but also noticing a slowdown in public infrastructure activity. While the company said that 2012 is unlikely to be a breakout year for construction, demand continues to come back and would become a larger part of the company's order book.

The last shipments from the Croatian pipe mill business will be sold in the second quarter of fiscal 2012. Only employees engaged in shutdown and preparation of final shipments are still working at the mill.

Implications

We are Not Rated (NR) on CMC.

Valuation

CMC is currently trading at 14.8X CY2012E P/E and 6.3X EV/EBITDA. This is a premium to peers at 12.7X CY2012E P/E and 6.2X EV/EBITDA.

Key risks

Upside/downside risks: quick/delayed recovery in non-residential construction end-markets.

Financial Advisory Disclosure

Goldman Sachs is acting as financial advisor to Commercial Metals Company in an announced matter.

Disclosure Appendix

Reg AC

We, Sal Tharani, Sandeep SM and Chelsea Bolton, hereby certify that all of the views expressed in this report accurately reflect our personal views about the subject company or companies and its or their securities. We also certify that no part of our compensation was, is or will be, directly or indirectly, related to the specific recommendations or views expressed in this report.

Investment Profile

The Goldman Sachs Investment Profile provides investment context for a security by comparing key attributes of that security to its peer group and market. The four key attributes depicted are: growth, returns, multiple and volatility. Growth, returns and multiple are indexed based on composites of several methodologies to determine the stocks percentile ranking within the region's coverage universe.

The precise calculation of each metric may vary depending on the fiscal year, industry and region but the standard approach is as follows:

Growth is a composite of next year's estimate over current year's estimate, e.g. EPS, EBITDA, Revenue. **Return** is a year one prospective aggregate of various return on capital measures, e.g. CROCI, ROACE, and ROE. **Multiple** is a composite of one-year forward valuation ratios, e.g. P/E, dividend yield, EV/FCF, EV/EBITDA, EV/DACF, Price/Book. **Volatility** is measured as trailing twelve-month volatility adjusted for dividends.

Quantum

Quantum is Goldman Sachs' proprietary database providing access to detailed financial statement histories, forecasts and ratios. It can be used for in-depth analysis of a single company, or to make comparisons between companies in different sectors and markets.

GS SUSTAIN

GS SUSTAIN is a global investment strategy aimed at long-term, long-only performance with a low turnover of ideas. The GS SUSTAIN focus list includes leaders our analysis shows to be well positioned to deliver long term outperformance through sustained competitive advantage and superior returns on capital relative to their global industry peers. Leaders are identified based on quantifiable analysis of three aspects of corporate performance: cash return on cash invested, industry positioning and management quality (the effectiveness of companies' management of the environmental, social and governance issues facing their industry).

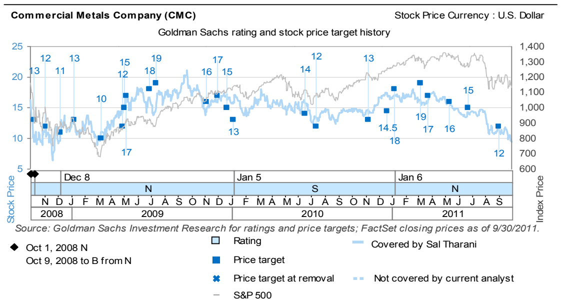
Distribution of ratings/investment banking relationships

Goldman Sachs Investment Research global coverage universe

	Rating Distribution			Investment Banking Relationships		
	Buy	Hold	Sell	Buy	Hold	Sell
Global	31%	55%	14%	50%	43%	36%

As of October 1, 2011, Goldman Sachs Global Investment Research had investment ratings on 3,198 equity securities. Goldman Sachs assigns stocks as Buys and Sells on various regional Investment Lists; stocks not so assigned are deemed Neutral. Such assignments equate to Buy, Hold and Sell for the purposes of the above disclosure required by NASD/NYSE rules. See 'Ratings, Coverage groups and views and related definitions' below.

Price target and rating history chart(s)



The price targets shown should be considered in the context of all prior published Goldman Sachs research, which may or may not have included price targets, as well as developments relating to the company, its industry and financial markets.

Regulatory disclosures

Disclosures required by United States laws and regulations

See company-specific regulatory disclosures above for any of the following disclosures required as to companies referred to in this report: manager or co-manager in a pending transaction; 1% or other ownership; compensation for certain services; types of client relationships; managed/co-managed public offerings in prior periods; directorships; for equity securities, market making and/or specialist role. Goldman Sachs usually makes a market in fixed income securities of issuers discussed in this report and usually deals as a principal in these securities.

The following are additional required disclosures: **Ownership and material conflicts of interest:** Goldman Sachs policy prohibits its analysts, professionals reporting to analysts and members of their households from owning securities of any company in the analyst's area of coverage. **Analyst compensation:** Analysts are paid in part based on the profitability of Goldman Sachs, which includes investment banking revenues. **Analyst as officer or director:** Goldman Sachs policy prohibits its analysts, persons reporting to analysts or members of their households from serving as an officer, director, advisory board member or employee of any company in the analyst's area of coverage. **Non-U.S. Analysts:** Non-U.S. analysts may not be associated persons of Goldman, Sachs & Co. and therefore may not be subject to NASD Rule 2711/NYSE Rules 472 restrictions on communications with subject company, public appearances and trading securities held by the analysts.

Distribution of ratings: See the distribution of ratings disclosure above. **Price chart:** See the price chart, with changes of ratings and price targets in prior periods, above, or, if electronic format or if with respect to multiple companies which are the subject of this report, on the Goldman Sachs website at http://www.gs.com/research/hedge.html.

Additional disclosures required under the laws and regulations of jurisdictions other than the United States

The following disclosures are those required by the jurisdiction indicated, except to the extent already made above pursuant to United States laws and regulations. **Australia:** This research, and any access to it, is intended only for "wholesale clients" within the meaning of the Australian Corporations Act. **Brazil:** Disclosure information in relation to CVM Instruction 483 is available at http://www.gs.com/worldwide/brazil/area/gir/index.html. Where applicable, the Brazil-registered analyst primarily responsible for the content of this research report, as defined in Article 16 of CVM Instruction 483, is the first author named at the beginning of this report, unless indicated otherwise at the end of the text. **Canada:** Goldman, Sachs & Co. has approved of, and agreed to take responsibility for, this research in Canada if and to the extent it relates to equity securities of Canadian issuers. Analysts may conduct site visits but are prohibited from accepting payment or reimbursement by the company of travel expenses for such visits. **Hong Kong:** Further information on the securities of covered companies referred to in this research may be obtained on request from Goldman Sachs (Asia) L.L.C. **India:** Further information on the subject company or companies referred to in this research may be obtained from Goldman Sachs (India) Securities Private Limited; **Japan:** See below. **Korea:** Further information on the subject company or companies referred to in this research may be obtained from Goldman Sachs (Asia) L.L.C., Seoul Branch. **Russia:** Research reports distributed in the Russian Federation are not advertising as defined in the Russian legislation, but are information and analysis not having product promotion as their main purpose and do not provide appraisal within the meaning of the Russian legislation on appraisal activity. **Singapore:** Further information on the covered companies referred to in this research may be obtained from Goldman Sachs (Singapore) Pte. (Company Number: 198602165W). **Taiwan:** This material is for reference only and must not be reprinted without permission. Investors should carefully consider their own investment risk. European Union: Disclosure information in relation to Article 4 (1) (d) and Article 6 (2) of the European Commission Directive 2003/126/EC is available at http://www.gs.com/disclosures/europeanpolicy.html which states the European Policy for Managing Conflicts of Interest in Connection with Investment Research.

Japan: Goldman Sachs Japan Co., Ltd. is a Financial Instrument Dealer under the Financial Instrument and Exchange Law, registered with the Kanto Financial Bureau (Registration No. 69), and is a member of Japan Securities Dealers Association (JSDA) and Financial Futures Association of Japan (FFAJ). Sales and purchase of equities are subject to commission pre-determined with clients plus consumption tax. See company-specific disclosures as to any applicable disclosures required by Japanese stock exchanges, the Japanese Securities Dealers Association or the Japanese Securities Finance Company.

Ratings, coverage groups and views and related definitions

Buy (B), Neutral (N), Sell (S) -Analysts recommend stocks as Buys or Sells for inclusion on various regional Investment Lists. Being assigned a Buy or Sell on an Investment List is determined by a stock's return potential relative to its coverage group as described below. Any stock not assigned as a Buy or a Sell on an Investment List is deemed Neutral. Each regional Investment Review Committee manages various regional Investment Lists to a global guideline of 25%-35% of stocks as Buy and 10%-15% of stocks as Sell; however, the distribution of Buys and Sells in any particular coverage group may vary as determined by the regional Investment Review Committee. Regional Conviction Buy and Sell lists represent investment recommendations focused on either the size of the potential return or the likelihood of the realization of the return.

Return potential represents the price differential between the current share price and the price target expected during the time horizon associated with the price target. Price targets are required for all covered stocks. The return potential, price target and associated time horizon are stated in each report adding or reiterating an Investment List membership.

Coverage groups and views: A list of all stocks in each coverage group is available by primary analyst, stock and coverage group at http://www.gs.com/research/hedge.html. The analyst assigns one of the following coverage views which represents the analyst's investment outlook on the coverage group relative to the group's historical fundamentals and/or valuation. **Attractive (A).** The investment outlook over the following 12 months is favorable relative to the coverage group's historical fundamentals and/or valuation. **Neutral (N).** The investment outlook over the following 12 months is neutral relative to the coverage group's historical fundamentals and/or valuation. **Cautious (C).** The investment outlook over the following 12 months is unfavorable relative to the coverage group's historical fundamentals and/or valuation.

Not Rated (NR). The investment rating and target price have been removed pursuant to Goldman Sachs policy when Goldman Sachs is acting in an advisory capacity in a merger or strategic transaction involving this company and in certain other circumstances. **Rating Suspended (RS).** Goldman Sachs Research has suspended the investment rating and price target for this stock, because there is not a sufficient fundamental basis for determining, or there are legal, regulatory or policy constraints around publishing, an investment rating or target. The previous investment rating and price target, if any, are no longer in effect for this stock and should not be relied upon. **Coverage Suspended (CS).** Goldman Sachs has suspended coverage of this company. **Not Covered (NC).** Goldman Sachs does not cover this company. **Not Available or Not Applicable (NA).** The information is not available for display or is not applicable. **Not Meaningful (NM).** The information is not meaningful and is therefore excluded.

Global product; distributing entities

The Global Investment Research Division of Goldman Sachs produces and distributes research products for clients of Goldman Sachs, and pursuant to certain contractual arrangements, on a global basis. Analysts based in Goldman Sachs offices around the world produce equity research on industries and companies, and research on macroeconomics, currencies, commodities and portfolio strategy. This research is disseminated in Australia by Goldman Sachs Australia Pty Ltd (ABN 21 006 797 897); in Brazil by Goldman Sachs do Brasil Banco Múltiplo S.A.; in Canada by Goldman, Sachs & Co. regarding Canadian equities and by Goldman, Sachs & Co. (all other research); in Hong Kong by Goldman Sachs (Asia) L.L.C.; in India by Goldman Sachs (India) Securities Private Ltd.; in Japan by Goldman Sachs Japan Co., Ltd.; in the Republic of Korea by Goldman Sachs (Asia) L.L.C., Seoul Branch; in New Zealand by Goldman Sachs New Zealand Limited; in Russia by OOO Goldman Sachs; in Singapore by Goldman Sachs (Singapore) Pte. (Company Number: 198602165W); and in the United States of America by Goldman, Sachs & Co. Goldman Sachs International has approved this research in connection with its distribution in the United Kingdom and European Union.

European Union: Goldman Sachs International, authorized and regulated by the Financial Services Authority, has approved this research in connection with its distribution in the European Union and United Kingdom; Goldman Sachs AG, regulated by the Bundesanstalt für Finanzdienstleistungsaufsicht, may also distribute research in Germany.

General disclosures

This research is for our clients only. Other than disclosures relating to Goldman Sachs, this research is based on current public information that we consider reliable, but we do not represent it is accurate or complete, and it should not be relied on as such. We seek to update our research as appropriate, but various regulations may prevent us from doing so. Other than certain industry reports published on a periodic basis, the large majority of reports are published at irregular intervals as appropriate in the analyst's judgment.

Goldman Sachs conducts a global full-service, integrated investment banking, investment management, and brokerage business. We have investment banking and other business relationships with a substantial percentage of the companies covered by our Global Investment Research Division. Goldman, Sachs & Co., the United States broker dealer, is a member of SIPC (http://www.sipc.org).

Our salespeople, traders, and other professionals may provide oral or written market commentary or trading strategies to our clients and our proprietary trading desks that reflect opinions that are contrary to the opinions expressed in this research. Our asset management area, our proprietary trading desks and investing businesses may make investment decisions that are inconsistent with the recommendations or views expressed in this research.

The analysts named in this report may have from time to time discussed with our clients, including Goldman Sachs salespersons and traders, or may discuss in this report, trading strategies that reference catalysts or events that may have a near-term impact on the market price of the equity securities discussed in this report, which impact may be directionally counter to the analysts' published price target expectations for such stocks. Any such trading strategies are distinct from and do not affect the analysts' fundamental equity rating for such stocks, which rating reflects a stock's return potential relative to its coverage group as described herein.

We and our affiliates, officers, directors, and employees, excluding equity and credit analysts, will from time to time have long or short positions in, act as principal in, and buy or sell, the securities or derivatives, if any, referred to in this research.

This research is not an offer to sell or the solicitation of an offer to buy any security in any jurisdiction where such an offer or solicitation would be illegal. It does not constitute a personal recommendation or take into account the particular investment objectives, financial situations, or needs of individual clients. Clients should consider whether any advice or recommendation in this research is suitable for their particular circumstances and, if appropriate, seek professional advice, including tax advice. The price and value of investments referred to in this research and the income from them may fluctuate. Past performance is not a guide to future performance, future returns are not guaranteed, and a loss of original capital may occur. Fluctuations in exchange rates could have adverse effects on the value or price of, or income derived from, certain investments.

Certain transactions, including those involving futures, options, and other derivatives, give rise to substantial risk and are not suitable for all investors. Investors should review current options disclosure documents which are available from Goldman Sachs sales representatives or at http://www.theocc.com/about/publications/character-risks.jsp. Transactions cost may be significant in option strategies calling for multiple purchase and sales of options such as spreads. Supporting documentation will be supplied upon request.

All research reports are disseminated and available to all clients simultaneously through electronic publication to our internal client websites. Not all research content is redistributed to our clients or available to third-party aggregators, nor is Goldman Sachs responsible for the redistribution of our research by third party aggregators. For all research available on a particular stock, please contact your sales representative or go to http://360.gs.com.

Disclosure information is also available at http://www.gs.com/research/hedge.html or from Research Compliance, 200 West Street, New York, NY 10282.

Debt to Cap:	58%		

Event

Fortis reported Q4/10 results.

Investment Opinion

- **Q4/10 Results in Line with Expectations.** Normalized Q4/10 EPS was $0.49, matching our estimate of $0.49 and slightly up from $0.48 in Q4/09. During the quarter, the performance of the Canadian regulated utilities was in line with our expectations. Weaker-than-forecast results from the Caribbean regulated utilities were broadly offset by good performance from the Properties division.
- **Growth Expected to Continue in the Core Canadian Utility Franchise.** Fortis expects to spend $1.2 billion on capex in 2011 with $919 million of that amount forecast for the Canadian regulated utilities. The estimated capital for 2011 is a modest increase from the $1.1 billion spent in 2010.
- **Headwinds in the Caribbean.** 2010 was a disappointing year for the segment, primarily driven by the ongoing situation in Belize although issues have popped up in Turks & Caicos along with Grand Cayman. Fortis hopes that it will be able to settle the rate issues in both Belize and Turks & Caicos in 2011, along with improving operational results in Grand Cayman.
- **Still Upbeat on the Potential for a U.S. Acquisition.** Fortis remains upbeat about the potential for a U.S. utility acquisition. We continue to believe that management will take a disciplined approach (Fortis has been looking to acquire a U.S. utility for years), although we continue to be cautious due to the potential size of the transaction (up to $5 billion enterprise value) in addition to investor familiarity with the asset and regulatory regime that will be lower than previous acquisitions (e.g., Terasen, Aquila Canada).
- **Valuation: Nudging Up Price Target to $34.00 (from $33.00).** Our price target of $34.00 is based on a forward P/E of 18x 2012E EPS. Although we remain cautious on the prospects for a large U.S. acquisition, we are incrementally more comfortable with the financing strategy based on our recent discussions with the company. Our selected P/E multiple is at the upper end of the five-year range, reflecting the low interest rate environment, good growth from the core Canadian regulated utilities, and the Waneta Dam expansion that will not contribute to earnings until 2015.

Priced as of prior trading day's market close, EST (unless otherwise noted).

For Required Non-U.S. Analyst and Conflicts Disclosures, see page 7.

Q4/10 Results in Line with Expectations

Fortis' normalized Q4/10 EPS was $0.49, matching our estimate of $0.49 and slightly up from $0.48 in Q4/09. During the quarter, the performance of the Canadian regulated utilities was in line with our expectations. Weaker-than-forecast results from the Caribbean regulated utilities were mostly offset by good performance from the Properties division. The Q4/10 and full-year results are set out in Exhibit 1.

Highlights of the Quarter

- **Caribbean Regulated Utilities Impacted by Higher Expenses.** Lower-than-expected earnings from Caribbean Regulated Utilities in Q4/10 were partly attributable to higher operating expenses at Belize Electricity due to legal fees associated with continued regulatory challenges, and weaker customer demand. Management noted that while Belize Electricity contributed only about $1.5 million of earnings in 2010, it expects the utility to earn roughly $10 million annually under normal operations.

- **Non-Regulated Fortis Properties Positively Impacted by Lower Taxes.** Higher-than-expected earnings from non-regulated Fortis Properties were primarily attributable to lower corporate taxes and an improvement in results from hotel operations (i.e., Atlantic Canada and central Canada) and rental properties.

- **US$200 Million Private Placement Completed.** On December 22, 2010, Fortis closed a private placement of US$200 million in senior unsecured notes, which were issued to institutional investors in the U.S. in two tranches (US$125 million of 10-year at a coupon rate of 3.53% and US$75 million of 30-year notes at a coupon rate of 5.26%).

- **Long-Term Utility Growth Plan Remains Intact.** With roughly $1.1 billion of gross capex in 2010 and $1.2 billion expected in 2011 (please refer to Exhibit 2), planned capex over the next five years is expected to approach $5.5 billion. As the majority of Fortis' planned capital investment is in regulated electric utilities (about 63%), rate base is expected to grow at a roughly 6% compound annual growth rate, which should translate into similar earnings growth. Approximately 20% and 17% of the five-year capex program will be incurred at Terasen and at non-regulated operations, respectively.

- **Construction Under Way for Waneta Expansion.** In October 2010, construction began on the $900 million Waneta Expansion, a 335 MW hydro project in B.C that is expected to be in service in the spring of 2015. With a controlling interest of 51%, Fortis will operate and maintain the facility which will sell energy and capacity to BC Hydro and FortisBC (Fortis' regulated electric utility), under 40-year power sales contracts.

Exhibit 2: Capital Expenditures (2010 vs. 2011E)

	Terasen	FortisAlberta	FortisBC	Newfoundland Power	Other Cdn Reg	Caribbean Reg Util	Non-Reg Utility	Properties	Total
2010	$253	$379	$139	$78	$48	$72	$85	$19	$1,073
2011E	$281	$420	$99	$73	$46	$83	$183	$27	$1,212

Minor Changes within the Segments but Overall Estimates Remain Unchanged

We have made minor changes within some of our segment forecasts, but have left our overall EPS estimates unchanged through 2012. We have lowered our forecast for Terasen (about $3 million and $6 million lower in 2011 and 2012, respectively) which is offset by a higher forecast for Properties (about $3 million in both 2011 and 2012) and other minor changes for other segments. Our revised estimates are set out in Exhibit 3.

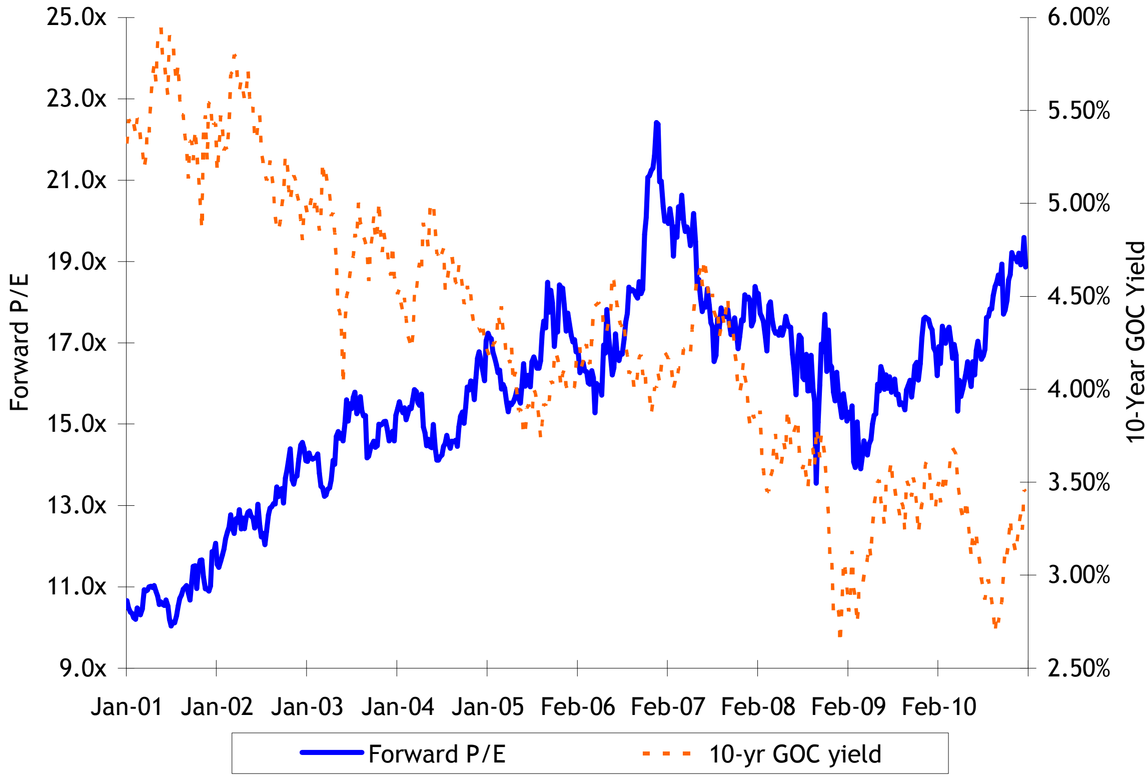
Increasing Price Target to $34.00 (from $33.00)

We have increased our price target to $34.00 (from $33.00) to reflect a forward P/E of 18.0x 2012E EPS (previously 17.5x). Although we remain cautious on the prospects for a large U.S. acquisition, we are incrementally more comfortable with the financing strategy based on our recent discussions with management. As shown in Exhibit 4, Fortis' forward P/E over the past five years mostly ranged from about 14x to 19x (excluding the peak in 2007 due to EPS dilution from the Terasen transaction as the deal closed in May, which is after Terasen's seasonally strong months). Our selected P/E multiple is at the upper end of the five-year range, reflecting the low interest rate environment and good growth from the core Canadian regulated utilities.

Exhibit 4: Forward P/E



Source: Company reports; RBC Capital Markets estimates

Valuation

Our price target of $34.00 is based on a forward P/E of 18x 2012E EPS. Our selected P/E multiple is at the upper end of the five-year range, reflecting the low interest rate environment, good growth from the core Canadian regulated utilities, and the Waneta Dam expansion that will not contribute to earnings until 2015.

Price Target Impediment

The political environment in Belize, the risk of punitive regulatory decisions, economic/tourism conditions in its service territories, operational or financial issues at newly acquired businesses, and acquisitions or projects that fail to gain the confidence of investors may have implications for our price target.

Company Description

Fortis Inc. is a utility holding company for Newfoundland Power, FortisAlberta, FortisBC, Terasen Inc., Maritime Electric, Canadian Niagara Power, Cornwall Electric, BECOL, two electric utilities in the Turks and Caicos, and 70%-owned Belize Electricity. It also holds a 100% interest in Fortis Properties and a 59.5% interest in Caribbean Utilities.

RBC Capital Markets has provided Fortis Inc. with non-securities services in the past 12 months.

The author is employed by RBC Dominion Securities Inc., a securities broker-dealer with principal offices located in Toronto, Canada.

Explanation of RBC Capital Markets Equity Rating System

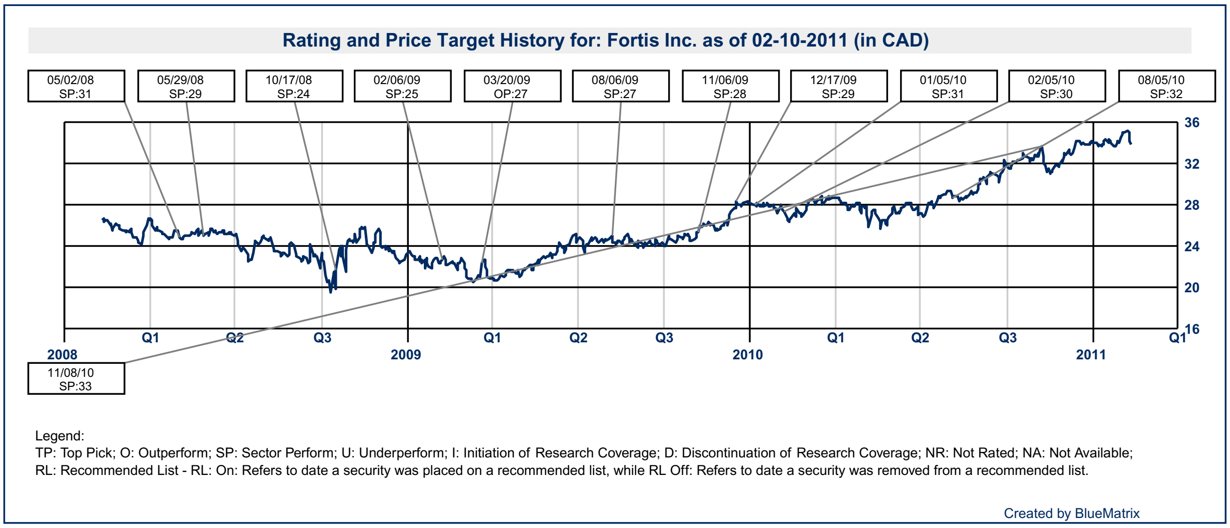
An analyst's 'sector' is the universe of companies for which the analyst provides research coverage. Accordingly, the rating assigned to a particular stock represents solely the analyst's view of how that stock will perform over the next 12 months relative to the analyst's sector average.
Ratings
Top Pick (TP): Represents best in Outperform category; analyst's best ideas; expected to significantly outperform the sector over 12 months; provides best risk-reward ratio; approximately 10% of analyst's recommendations.
Outperform (O): Expected to materially outperform sector average over 12 months.
Sector Perform (SP): Returns expected to be in line with sector average over 12 months.
Underperform (U): Returns expected to be materially below sector average over 12 months.
Risk Qualifiers (any of the following criteria may be present):
Average Risk (Avg): Volatility and risk expected to be comparable to sector; average revenue and earnings predictability; no significant cash flow/financing concerns over coming 12-24 months; fairly liquid.
Above Average Risk (AA): Volatility and risk expected to be above sector; below average revenue and earnings predictability; may not be suitable for a significant class of individual equity investors; may have negative cash flow; low market cap or float.
Speculative (Spec): Risk consistent with venture capital; low public float; potential balance sheet concerns; risk of being delisted.

Distribution of Ratings

For the purpose of ratings distributions, regulatory rules require member firms to assign ratings to one of three rating categories - Buy, Hold/Neutral, or Sell - regardless of a firm's own rating categories. Although RBC Capital Markets' ratings of Top Pick/Outperform, Sector Perform and Underperform most closely correspond to Buy, Hold/Neutral and Sell, respectively, the meanings are not the same because our ratings are determined on a relative basis (as described above).

Distribution of Ratings
RBC Capital Markets, Equity Research

Rating	Count	Percent	Investment Banking Serv./Past 12 Mos. Count	Investment Banking Serv./Past 12 Mos. Percent
BUY[TP/O]	694	50.70	189	27.23
HOLD[SP]	613	44.70	136	22.19
SELL[U]	64	4.70	9	14.06



References to a Recommended List in the recommendation history chart may include one or more recommended lists or model portfolios maintained by a business unit of the Wealth Management Division of RBC Capital Markets, LLC. These Recommended Lists include the Prime Opportunity List (RL 3), a former list called the Private Client Prime Portfolio (RL 4), the Guided Portfolio: Prime Income (RL 6), the Guided Portfolio: Large Cap (RL 7), the Guided Portfolio: Dividend Growth (RL 8), and the Guided Portfolio: Midcap 111 (RL9). The abbreviation 'RL On' means the date a security was placed on a Recommended List. The abbreviation 'RL Off' means the date a security was removed from a Recommended List.

Conflicts Policy

RBC Capital Markets Policy for Managing Conflicts of Interest in Relation to Investment Research is available from us on request. To access our current policy, clients should refer to

or send a request to RBC CM Research Publishing, P.O. Box 50, 200 Bay Street, Royal Bank Plaza, 29th Floor, South Tower, Toronto, Ontario M5J 2W7. We reserve the right to amend or supplement this policy at any time.

Dissemination of Research and Short-Term Trading Calls

RBC Capital Markets endeavors to make all reasonable efforts to provide research simultaneously to all eligible clients, having regard to local time zones in overseas jurisdictions. RBC Capital Markets' equity research is posted to our proprietary websites to ensure eligible clients receive coverage initiations and changes in ratings, targets and opinions in a timely manner. Additional distribution may be done by the sales personnel via email, fax or regular mail. Clients may also receive our research via third-party vendors. Please contact your investment advisor or institutional salesperson for more information regarding RBC Capital Markets' research. RBC Capital Markets also provides eligible clients with access to SPARC on the Firm's proprietary INSIGHT website. SPARC contains market color and commentary, and may also contain Short-Term Trade Ideas regarding the publicly-traded common equity of subject companies on which the Firm currently provides equity research coverage. SPARC may be accessed via the following hyperlink: https://www.rbcinsight.com. A Short-Term Trade Idea reflects the research analyst's directional view regarding the price of the subject company's publicly-traded common equity in the coming days or weeks, based on market and trading events. A Short-Term Trade Idea may differ from the price targets and recommendations in our published research reports reflecting the research analyst's views of the longer-term (one year) prospects of the subject company, as a result of the differing time horizons, methodologies and/or other factors. Thus, it is possible that a subject company's common equity that is considered a long-term 'sector perform' or even an

'underperform' might be a short-term buying opportunity as a result of temporary selling pressure in the market; conversely, a subject company's common equity rated a long-term 'outperform' could be considered susceptible to a short-term downward price correction. Short-Term Trade Ideas are not ratings, nor are they part of any ratings system, and the Firm generally does not intend, nor undertakes any obligation, to maintain or update Short-Term Trade Ideas. Securities and Short-Term Trade Ideas discussed in SPARC may not be suitable for all investors and have not been tailored to individual investor circumstances and objectives, and investors should make their own independent decisions regarding any securities or strategies discussed herein.

Analyst Certification

COMPANY UPDATE | COMMENT

MARCH 16, 2011

Fortis Inc. (TSX: FTS)

Supreme Court of Belize Dismisses Belize Electricity's Appeal

Sector Perform
Average Risk

Price:	32.13	**Price Target:**	34.00
		Implied All-In Return:	9%
Shares O/S (MM):	174.4	**Market Cap (MM):**	5,603
Dividend:	1.16	**Yield:**	3.6%
Float (MM):	174.4		
Debt to Cap:	58%		

Event

The Supreme Court of Belize released its decision on the 2008 Annual Tariff Review Proceeding.

Investment Opinion

- **Belize Electricity's Appeal Dismissed.** The Supreme Court of Belize dismissed Belize Electricity Limited's appeal (BEL is 70% owned by Fortis) of the Public Utilities Commission's Final Decision, following the 2008 Annual Tariff Reviewing Proceeding. The Supreme Court judge found that among other things, "Good Utility Practice as defined by [the Independent Expert appointed by the Court] in his Report is not applicable to Belize."
- **What Comes Next?** Fortis and Belize Electricity will continue to further assess their options and legal remedies, including appeal. It is our understanding that the next highest court is a pan-Caribbean court and although the politics of the dispute may be one step removed, it is possible that BEL will need to appeal to the highest court, which is the Privy Council that sits in the United Kingdom where we believe the appeal has the best chance of succeeding.
- **BEL is Not a Material Contributor to Earnings.** Despite the headlines regarding Fortis' troubles in Belize, BEL contributed only $2 million to earnings in 2010 (less than 1% of total earnings). As such, we do not view the ongoing dispute as material to Fortis' earnings or our outlook.
- **Background on Fight with Belize Regulator.** In its June 2008 Final Decision on Belize Electricity's 2008/2009 rate application, the PUC allowed a greater fuel cost/purchased power "recovery", which was offset by a lower return on assets (10% vs. the previous 12%) combined with BZ$36 million (C$18 million) of retroactive disallowances for Belize Electricity. For further details, please refer to our *Research Comment* on June 30, 2008.
- **Valuation.** Our price target of $34.00 (unchanged) is based on a forward P/E of 18x 2012E EPS. Our selected P/E multiple is at the upper end of the five-year range, reflecting the low interest rate environment, good growth from the core Canadian regulated utilities, and the Waneta Dam expansion that will not contribute to earnings until 2015.

Priced as of prior trading day's market close, EST (unless otherwise noted).

For Required Non-U.S. Analyst and Conflicts Disclosures, see page 3.

Valuation

Our price target of $34.00 is based on a forward P/E of 18x 2012E EPS. Our selected P/E multiple is at the upper end of the five-year range, reflecting the low interest rate environment, good growth from the core Canadian regulated utilities, and the Waneta Dam expansion that will not contribute to earnings until 2015.

Price Target Impediment

The political environment in Belize, the risk of punitive regulatory decisions, economic/tourism conditions in its service territories, operational or financial issues at newly acquired businesses, and acquisitions or projects that fail to gain the confidence of investors may have implications for our price target.

Company Description

Fortis Inc. is a utility holding company for Newfoundland Power, FortisAlberta, FortisBC, Terasen Inc., Maritime Electric, Canadian Niagara Power, Cornwall Electric, BECOL, two electric utilities in the Turks and Caicos, and 70%-owned Belize Electricity. It also holds a 100% interest in Fortis Properties and a 59.5% interest in Caribbean Utilities.

RBC Capital Markets is currently providing Fortis Inc. with non-securities services.

RBC Capital Markets has provided Fortis Inc. with investment banking services in the past 12 months.

RBC Capital Markets has provided Fortis Inc. with non-investment banking securities-related services in the past 12 months.

RBC Capital Markets has provided Fortis Inc. with non-securities services in the past 12 months.

The author is employed by RBC Dominion Securities Inc., a securities broker-dealer with principal offices located in Toronto, Canada.

Explanation of RBC Capital Markets Equity Rating System

An analyst's 'sector' is the universe of companies for which the analyst provides research coverage. Accordingly, the rating assigned to a particular stock represents solely the analyst's view of how that stock will perform over the next 12 months relative to the analyst's sector average.
Ratings
Top Pick (TP): Represents best in Outperform category; analyst's best ideas; expected to significantly outperform the sector over 12 months; provides best risk-reward ratio; approximately 10% of analyst's recommendations.
Outperform (O): Expected to materially outperform sector average over 12 months.
Sector Perform (SP): Returns expected to be in line with sector average over 12 months.
Underperform (U): Returns expected to be materially below sector average over 12 months.
Risk Qualifiers (any of the following criteria may be present):
Average Risk (Avg): Volatility and risk expected to be comparable to sector; average revenue and earnings predictability; no significant cash flow/financing concerns over coming 12-24 months; fairly liquid.
Above Average Risk (AA): Volatility and risk expected to be above sector; below average revenue and earnings predictability; may not be suitable for a significant class of individual equity investors; may have negative cash flow; low market cap or float.
Speculative (Spec): Risk consistent with venture capital; low public float; potential balance sheet concerns; risk of being delisted.

Distribution of Ratings

For the purpose of ratings distributions, regulatory rules require member firms to assign ratings to one of three rating categories - Buy, Hold/Neutral, or Sell - regardless of a firm's own rating categories. Although RBC Capital Markets' ratings of Top Pick/Outperform, Sector Perform and Underperform most closely correspond to Buy, Hold/Neutral and Sell, respectively, the meanings are not the same because our ratings are determined on a relative basis (as described above).

Distribution of Ratings
RBC Capital Markets, Equity Research

			Investment Banking Serv./Past 12 Mos.	
Rating	Count	Percent	Count	Percent
BUY[TP/O]	693	51.30	200	28.86

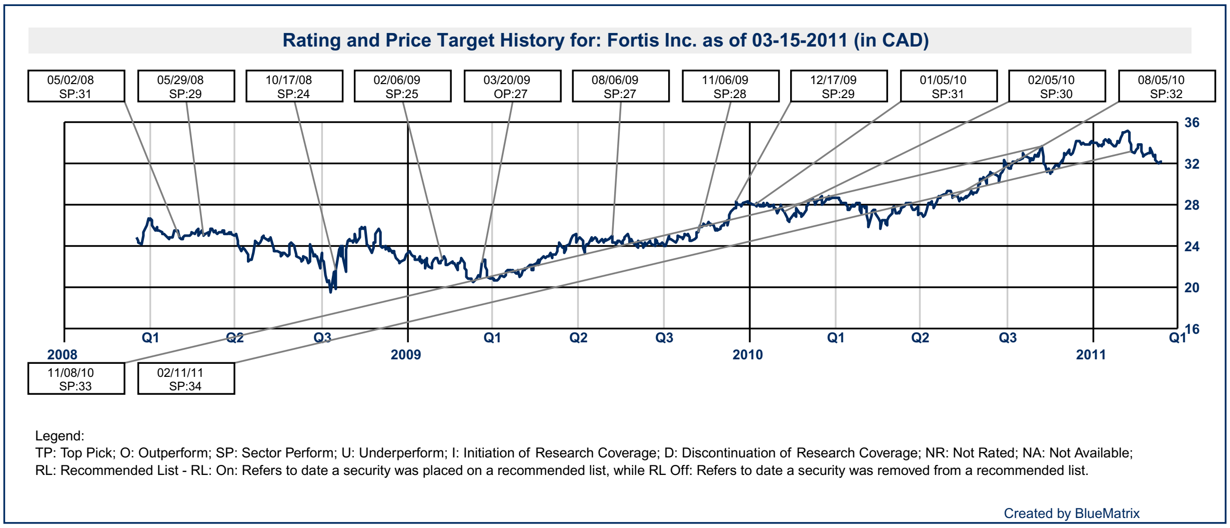
SELL[U]	61	4.50	11	18.03



References to a Recommended List in the recommendation history chart may include one or more recommended lists or model portfolios maintained by a business unit of the Wealth Management Division of RBC Capital Markets, LLC. These Recommended Lists include the Prime Opportunity List (RL 3), a former list called the Private Client Prime Portfolio (RL 4), the Guided Portfolio: Prime Income (RL 6), the Guided Portfolio: Large Cap (RL 7), the Guided Portfolio: Dividend Growth (RL 8), and the Guided Portfolio: Midcap 111 (RL9). The abbreviation 'RL On' means the date a security was placed on a Recommended List. The abbreviation 'RL Off' means the date a security was removed from a Recommended List.

Conflicts Policy

RBC Capital Markets Policy for Managing Conflicts of Interest in Relation to Investment Research is available from us on request. To access our current policy, clients should refer to
https://www.rbccm.com/global/file-414164.pdf
or send a request to RBC CM Research Publishing, P.O. Box 50, 200 Bay Street, Royal Bank Plaza, 29th Floor, South Tower, Toronto, Ontario M5J 2W7. We reserve the right to amend or supplement this policy at any time.

Dissemination of Research and Short-Term Trading Calls

RBC Capital Markets endeavors to make all reasonable efforts to provide research simultaneously to all eligible clients, having regard to local time zones in overseas jurisdictions. RBC Capital Markets' equity research is posted to our proprietary websites to ensure eligible clients receive coverage initiations and changes in ratings, targets and opinions in a timely manner. Additional distribution may be done by the sales personnel via email, fax or regular mail. Clients may also receive our research via third-party vendors. Please contact your investment advisor or institutional salesperson for more information regarding RBC Capital Markets' research. RBC Capital Markets also provides eligible clients with access to SPARC on the Firm's proprietary INSIGHT website. SPARC contains market color and commentary, and may also contain Short-Term Trade Ideas regarding the publicly-traded common equity of subject companies on which the Firm currently provides equity research coverage. SPARC may be accessed via the following hyperlink: https://www.rbcinsight.com. A Short-Term Trade Idea reflects the research analyst's directional view regarding the price of the subject company's publicly-traded common equity in the coming days or weeks, based on market and trading events. A Short-Term Trade Idea may differ from the price targets and recommendations in our published research reports reflecting the research analyst's views of the longer-term (one year) prospects of the subject company, as a result of the differing time horizons, methodologies and/or other factors. Thus, it is possible that a subject company's common equity that is considered a long-term 'sector perform' or even an

'underperform' might be a short-term buying opportunity as a result of temporary selling pressure in the market; conversely, a subject company's common equity rated a long-term 'outperform' could be considered susceptible to a short-term downward price correction. Short-Term Trade Ideas are not ratings, nor are they part of any ratings system, and the Firm generally does not intend, nor undertakes any obligation, to maintain or update Short-Term Trade Ideas. Securities and Short-Term Trade Ideas discussed in SPARC may not be suitable for all investors and have not been tailored to individual investor circumstances and objectives, and investors should make their own independent decisions regarding any securities or strategies discussed herein.

Analyst Certification

All of the views expressed in this report accurately reflect the personal views of the responsible analyst(s) about any and all of the subject securities or issuers. No part of the compensation of the responsible analyst(s) named herein is, or will be, directly or indirectly, related to the specific recommendations or views expressed by the responsible analyst(s) in this report.

COMPANY UPDATE | COMMENT

MAY 5, 2011

Fortis Inc. (TSX: FTS)

2011 Off to a Good Start

Sector Perform
Average Risk

Price:	32.35	**Price Target:**	34.00
		Implied All-In Return:	9%
Shares O/S (MM):	175.5	**Market Cap (MM):**	5,677
Dividend:	1.16	**Yield:**	3.6%
Float (MM):	175.5		
Debt to Cap:	58%		

Event

Fortis reported Q1/11 results.

Investment Opinion

- **Good Q1/11 Results.** EPS for the quarter was $0.67 compared to our estimate of $0.63 and $0.58 in Q1/10. The Canadian Regulated Utilities turned in solid results, which were due to a combination of good underlying fundamentals in the businesses, quarterly timing differences related to costs and the timing of rate increases, and a small gain on sale in FortisAlberta (less than $0.01/share).
- **Modestly Bumping Up 2011 EPS Estimate.** We have increased our 2011 EPS estimate to $1.80 (from $1.78) to reflect better results from the Canadian Regulated Utilities (in particular FortisBC Electric), partially offset by weaker estimated earnings from the utilities in the Caribbean (Belize and also a stronger C$).
- **U.S. Utility Acquisition: Still Working Away, but We Expect Management to Continue to Show Lots of Discipline.** Fortis continues to evaluate U.S. utility acquisition opportunities and the parameters remain the same (i.e., up to $5 billion EV and single state preferred). One trend that could provide acquisition opportunities is the possible sale of U.S. utilities owned by foreign companies.
- **Funding Plan is Solid.** Despite a heavy capex plan (about $1.2 billion for 2011), the balance sheet is in good shape, which affords the company flexibility. Equity needs are expected to be modest with the potential for a relatively small issuance late in 2011 or in 2012. Optimally, any equity issuance would coincide with acquisition financing.
- **Overall Views Unchanged.** We view the shares as fairly valued despite trading at a premium to other large cap regulated utility stocks in our coverage. We see a premium P/E valuation as warranted due to the attractive group of Canadian regulated utility assets (particularly the western Canadian utilities) and a disciplined management team.
- **Valuation.** Our price target of $34.00 is based on a forward P/E of 18x 2012E EPS. Our selected P/E multiple is at the upper end of the five-year range, reflecting the low interest rate environment, good growth from the core Canadian regulated utilities, and the Waneta Dam expansion that will not contribute to earnings until 2015.

Priced as of prior trading day's market close, EST (unless otherwise noted).

For Required Non-U.S. Analyst and Conflicts Disclosures, see page 5.

Q1/11 Results Higher Than Expectations

Fortis' normalized Q1/11 EPS was $0.67, compared to our estimate of $0.63 and $0.58 in Q1/10. The higher-than-expected earnings were mainly due to results from FortisAlberta and FortisBC Electric, which benefited from a combination of low purchased power costs (strong hydrology driving down prices in BC/PacNW) for FortisBC Electric, and quarterly timing differences (costs and rate implementation) along with a gain on sale for FortisAlberta. The quarterly results compared to our estimate are set out in Exhibit 1.

Exhibit 1: Normalized Earnings (In $MM except per share figures)

	Q1/11	RBC CM Q1/11E	Q1/10	Comments
Newfoundland Power	$7	$7	$7	
FortisOntario & Maritime Electric	6	5	5	
FortisBC Energy	76	74	73	
FortisAlberta	21	16	14	Quarterly timing difference (incl. rate implementation); $1mm gain on sale
FortisBC Electric	19	15	14	Low purchased power costs (low BC/PacNW hydro prices)
Regulated Utilities - Canadian	129	117	113	
Regulated Utilities - Caribbean	4	5	4	
Non-regulated - Fortis Generation	3	5	2	
Non-regulated - Fortis Properties	1	2	2

Average shares outstanding (MM)	175	174	172	

Source: Company reports; RBC Capital Markets estimates

Highlights of the Quarter and Outlook

- **Strong Q1/11 Mainly Due to Canadian Regulated Utilities.** Higher-than-forecast earnings were mainly attributable to strong results from FortisAlberta and FortisBC Electric, and to a lesser extent, FortisBC Energy (formerly Terasen) due to a combination of strong underlying business fundamentals and quarterly timing differences. FortisAlberta also benefited from a roughly $1 million gain (after-tax) on the sale of land in Q1/11.

- **Belize Update: Appeal of Trial Judgment to be Filed.** In March 2011, the Supreme Court of Belize dismissed Belize Electricity Limited's appeal (BEL is 70% owned by Fortis) of the Public Utilities Commission's Final Decision, following the 2008 Annual Tariff Reviewing Proceeding. Fortis is in the process of filing an appeal of the trial judgment, which is required prior to filing an appeal to the Caribbean Court of Justice. As BEL is not a material contributor to Fortis' earnings (it contributed $2 million of earnings in 2010), we do not view the ongoing dispute as material to the share price.

- **Long-Term Utility Growth Plan Remains Intact.** With roughly $1.2 billion of capex expected in 2011 and over the $5.5 billion over the five-year period 2011 through 2015, the majority of Fortis' planned capital investment remains in regulated electric utilities (about 63%) driven by FortisAlberta and FortisBC Electric. Approximately 20% and 17% of the five-year capex program will be incurred at FortisBC Energy and at non-regulated operations, respectively.

- **Construction Work Continues on Waneta Expansion.** Construction work continued on the $900 million Waneta Expansion, a 335 MW hydro project in B.C. that is expected to be in service in the spring of 2015. With a controlling interest of 51%, Fortis will operate and maintain the facility, which will sell energy and capacity to BC Hydro and FortisBC Electric under 40-year power sales contracts.

- **Potential U.S. Utility Acquisition: Still Active, But Not Much New to Report.** Fortis remains interested in acquiring a U.S. utility. We believe that the company will remain disciplined with respect to acquisition parameters, evidenced by the fact that management has been talking about a U.S. utility acquisition for many years, but has yet to pull the trigger. The following is a recap of the parameters that management has discussed with respect to a U.S. utility acquisition.
    - **Potential for a Scale Changing Acquisition.** The company continues to seek out regulated electric and/or gas utilities with a preference for businesses in a single state (i.e. one regulator). Fortis is comfortable with an integrated

electric utility as long as the generation assets are in regulated rate base. The target size is US$1 billion to US$5 billion of enterprise value with a utility in the US$3 billion enterprise value range as being optimal.

- **Going Solo is Preferred.** Similar to comments made throughout the years, management continues to prefer to acquire 100% of assets without any partners. The company feels this reduces the complexity of a transaction and allows the company to proceed with an acquisition more expeditiously.
- **Will Partner if Necessary, but Not a Consortium.** To the extent an acquisition target is too large for Fortis to complete on its own, the company would consider taking on one partner (e.g. a Canadian pension fund) where the company would have at least a 50% interest.

2011 EPS Estimate Modestly Increased

We have increased our 2011 EPS estimate to $1.80 (from $1.78) to reflect better results from the Canadian Regulated Utilities (in particular FortisBC Electric), partially offset by weaker estimated earnings from the utilities in the Caribbean (Belize in particular, but also a stronger C$). Our revised estimates are set out in Exhibit 2.

Valuation

Our price target of $34.00 is based on a forward P/E of 18x 2012E EPS. Our selected P/E multiple is at the upper end of the five-year range, reflecting the low interest rate environment, good growth from the core Canadian regulated utilities and the Waneta Dam expansion, which will not contribute to earnings until 2015.

Price Target Impediment

The political environment in Belize, the risk of punitive regulatory decisions, economic/tourism conditions in its service territories, operational or financial issues at newly acquired businesses, and acquisitions or projects that fail to gain the confidence of investors may have implications for our price target.

Company Description

Fortis Inc. is a utility holding company for Newfoundland Power, FortisAlberta, FortisBC, Terasen Inc., Maritime Electric, Canadian Niagara Power, Cornwall Electric, BECOL, two electric utilities in the Turks and Caicos, and 70%-owned Belize Electricity. It also holds a 100% interest in Fortis Properties and a 59.5% interest in Caribbean Utilities.

Explanation of RBC Capital Markets Equity Rating System

An analyst's 'sector' is the universe of companies for which the analyst provides research coverage. Accordingly, the rating assigned to a particular stock represents solely the analyst's view of how that stock will perform over the next 12 months relative to the analyst's sector average.

Ratings

Top Pick (TP): Represents best in Outperform category; analyst's best ideas; expected to significantly outperform the sector over 12 months; provides best risk-reward ratio; approximately 10% of analyst's recommendations.

Outperform (O): Expected to materially outperform sector average over 12 months.

Sector Perform (SP): Returns expected to be in line with sector average over 12 months.

Underperform (U): Returns expected to be materially below sector average over 12 months.

Risk Qualifiers (any of the following criteria may be present):

Average Risk (Avg): Volatility and risk expected to be comparable to sector; average revenue and earnings predictability; no significant cash flow/financing concerns over coming 12-24 months; fairly liquid.

Above Average Risk (AA): Volatility and risk expected to be above sector; below average revenue and earnings predictability; may not be suitable for a significant class of individual equity investors; may have negative cash flow; low market cap or float.

Speculative (Spec): Risk consistent with venture capital; low public float; potential balance sheet concerns; risk of being delisted.

Distribution of Ratings

For the purpose of ratings distributions, regulatory rules require member firms to assign ratings to one of three rating categories - Buy, Hold/Neutral, or Sell - regardless of a firm's own rating categories. Although RBC Capital Markets' ratings of Top Pick/Outperform, Sector Perform and Underperform most closely correspond to Buy, Hold/Neutral and Sell, respectively, the meanings are not the same because our ratings are determined on a relative basis (as described above).

Distribution of Ratings

References to a Recommended List in the recommendation history chart may include one or more recommended lists or model portfolios maintained by a business unit of the Wealth Management Division of RBC Capital Markets, LLC. These Recommended Lists include the Prime Opportunity List (RL 3), a former list called the Private Client Prime Portfolio (RL 4), the Guided Portfolio: Prime Income (RL 6), the Guided Portfolio: Large Cap (RL 7), the Guided Portfolio: Dividend Growth (RL 8), and the Guided Portfolio: Midcap 111 (RL9). The abbreviation 'RL On' means the date a security was placed on a Recommended List. The abbreviation 'RL Off' means the date a security was removed from a Recommended List.

Conflicts Policy

RBC Capital Markets Policy for Managing Conflicts of Interest in Relation to Investment Research is available from us on request. To access our current policy, clients should refer to
https://www.rbccm.com/global/file-414164.pdf
or send a request to RBC CM Research Publishing, P.O. Box 50, 200 Bay Street, Royal Bank Plaza, 29th Floor, South Tower, Toronto, Ontario M5J 2W7. We reserve the right to amend or supplement this policy at any time.

Dissemination of Research and Short-Term Trading Calls

RBC Capital Markets endeavors to make all reasonable efforts to provide research simultaneously to all eligible clients, having regard to local time zones in overseas jurisdictions. RBC Capital Markets' equity research is posted to our proprietary websites to ensure eligible clients receive coverage initiations and changes in ratings, targets and opinions in a timely manner. Additional distribution may be done by the sales personnel via email, fax or regular mail. Clients may also receive our research via third-party vendors. Please contact your investment advisor or institutional salesperson for more information regarding RBC Capital Markets' research. RBC Capital Markets also provides eligible clients with access to SPARC on the Firm's proprietary INSIGHT website. SPARC contains market color and commentary, and may also contain Short-Term Trade Ideas regarding the publicly-traded common equity of subject companies on which the Firm currently provides equity research coverage. SPARC may be accessed via the following hyperlink: https://www.rbcinsight.com. A Short-Term Trade Idea reflects the research analyst's directional view regarding the price of the subject company's publicly-traded common equity in the coming days or weeks, based on market and trading events. A Short-Term Trade Idea may differ from the price targets and recommendations in our published research reports reflecting the research analyst's views of the longer-term (one year) prospects of the subject company, as a result of the differing time horizons, methodologies and/or other factors. Thus, it is possible that a subject company's common equity that is considered a long-term 'sector perform' or even an

'underperform' might be a short-term buying opportunity as a result of temporary selling pressure in the market; conversely, a subject company's common equity rated a long-term 'outperform' could be considered susceptible to a short-term downward price correction. Short-Term Trade Ideas are not ratings, nor are they part of any ratings system, and the Firm generally does not intend, nor undertakes any obligation, to maintain or update Short-Term Trade Ideas. Securities and Short-Term Trade Ideas discussed in SPARC may not be suitable for all investors and have not been tailored to individual investor circumstances and objectives, and investors should make their own independent decisions regarding any securities or strategies discussed herein.

Analyst Certification

Event

Fortis closed its $300 million equity offering; publishing our views on the Central Vermont Public Service (CVPS) acquisition.

Investment Opinion

- **CVPS Acquisition is Incrementally Positive.** We view the pending CVPS acquisition as modestly positive as it: (1) is a smaller transaction at US$700 million enterprise value compared to the previously-stated US$3 billion to US$5 billion target-size (enterprise value) that can help prove-up the U.S. expansion strategy; (2) the utility is fairly close geographically to Fortis' utilities in eastern Canada; (3) CVPS is geographically close to other potential utility targets, particularly those owned by European companies that might eventually be sold; and (4) the transaction is expected to deliver modest EPS accretion in its first full year, which should increase over time as CVPS' annual rate base growth is forecast to be 9% (faster than the roughly 6% average growth for Fortis' other utilities).
- **Fortis Paid a Full Price for CVPS.** The purchase price P/E valuation is 21x the mid-point of CVPS' 2011 EPS guidance. As a multiple to rate base (adjusted for debt at Vermont Transco), Fortis paid approximately 1.4x 2011E mid-year rate base.
- **Modest Expected Accretion Should Increase Over Time.** Based on CVPS' 2011 EPS guidance range, we estimate that the transaction could add between $0.01/share and $0.03/share to EPS in the first full-year. We expect EPS accretion to increase over time as rate base growth at CVPS is forecast to exceed that of Fortis' other utilities.
- **Colour Coding the Dollars: The Recent Equity Issue is Not Earmarked for the CVPS Transaction.** Fortis needed roughly $300 million of common equity in late 2011 or early 2012 to fund the existing capital plan. While it is hard to resist tying the equity deal to the CVPS announcement, the equity deal is an acceleration of the existing need that also reduces financing risk when the CVPS deal closes (Fortis is likely to issue preferred shares at that time).
- **Valuation.** Our price target of $34.00 is based on a forward P/E of 18x 2012E EPS. Our selected P/E multiple is at the upper end of the five-year range, reflecting the low interest rate environment, good growth from the core Canadian regulated utilities and the Waneta Dam expansion, which will not contribute to earnings until 2015.

Priced as of prior trading day's market close, EST (unless otherwise noted).

For Required Non-U.S. Analyst and Conflicts Disclosures, see page 6.

CVPS Transaction: Incrementally Positive

We view the Central Vermont Public Service (CVPS) acquisition as a modest positive for the stock for the following reasons:

(1) **Relatively Small Size Allows Fortis to "Prove" the U.S. Acquisition Strategy to the Market.** Fortis has long discussed a desire to acquire a US$3 billion to US$5 billion enterprise value utility. However, we believe that the market was cautious on a transaction of that size and the CVPS deal at roughly US$700 million enterprise value is a more manageable size that will allow the company to prove to the market that it can navigate U.S. state regulation. Further, it demonstrates that management is taking a methodical approach to U.S. expansion and will not "force" a larger deal if the fit (strategic and financial) is not right.

(2) **Geographically Attractive Footprint to Further Grow the U.S. Business.** The U.S. northeast is a region that is fairly close to Fortis' central and eastern Canadian operations, but is also well situated for potential future acquisitions, which may include utilities that are currently owned by larger European-based companies.

(3) **Modest Expected EPS Accretion That Will Grow Over Time.** As shown in Exhibit 1, we expect the transaction to contribute between $0.01/share and $0.03/share to annual EPS. Despite a significant premium paid for CVPS' shares, we expect accretion to initially be driven by double-leverage (CVPS equity thickness of 57% compared to Fortis' overall structure at 40%) and a "double-dip" cross-border financing that will result in a lower effective tax rate. Over time, CVPS' rate base is expected to grow at roughly 9% annually (please see Exhibit 2), which is faster than the 6% estimated annual growth in rate base for the rest of Fortis' utilities.

(4) **Other Than the Smaller Size, the Acquisition Fits Everything That Management Has Discussed.** In looking at U.S. acquisitions, management has expressed a preference for an electric utility with single state regulation, minimal unregulated assets and good prospects for rate base growth. CVPS meets each of these factors.

(5) **A Larger Acquisition is Likely Not Imminent.** We believe that Fortis executing a US$700 million deal, while preferring to target a utility in the US$3 billion to US$5 billion range, is a sign that there is nothing of that size on the front burner that is likely to be announced in the near future.

Our Thoughts on Other Recent Events

Equity Financing: An Acceleration of Future Needs and De-Risking the Pending CVPS Requirement

Previous to the CVPS announcement, we estimated that Fortis had a need for roughly $300 million in equity in late 2011 or early 2012 to finance the growth in its existing utilities (in particular western Canada) and the Waneta hydro expansion. Although it is convenient to link the $300 million equity financing that just closed with the CVPS transaction, the acquisition is expected to close in six to 12 months and will be fully financed closer to that date. As such, we view the recently-closed equity financing as an acceleration of the forecast equity requirement to take advantage of supportive equity markets in addition to reducing the future equity needs (i.e. internal growth plus the CVPS acquisition).

Management expects to finance the equity for the CVPS acquisition with preferred shares although this will be dependent on the state of the preferred share market at the time. As such, it remains a possibility that common shares could be issued in six to 12 months time.

Belize: Government Interested in Acquiring Fortis' 70% Stake in Belize Electricity Limited (BEL)

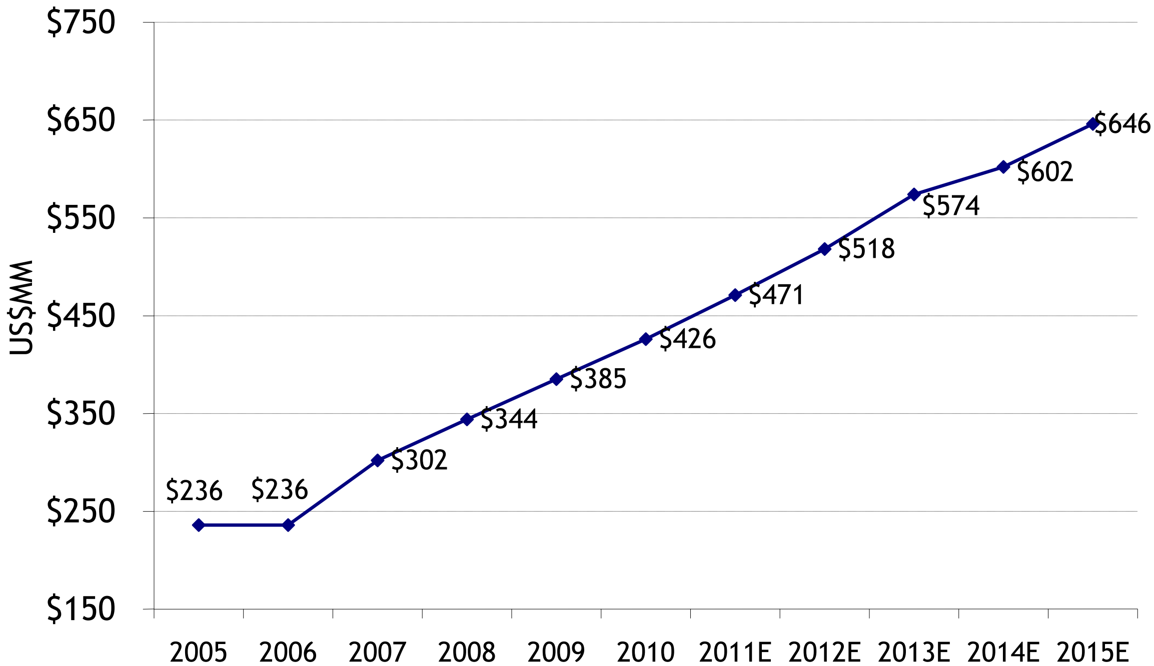
As a result of the ongoing issues at Belize Electricity Limited (BEL), the electric distribution utility in the country that is 70%-owned by Fortis, the government has expressed an interest in acquiring Fortis' stake. Overall, we believe that the ongoing dispute will continue to create negative headlines, although we believe that the financial impact is not particularly material.

- **BEL Does Not Materially Contribute to Earnings.** BEL generated $2 million ($0.01/share) of net income in 2010 and $4 million in 2009 ($0.02/share). From an asset perspective, BEL makes up 2% of Fortis' assets.
- **Appears to be Confined to BEL, but an Expansion to the Unregulated Power Business Could Increase the Exposure.** Fortis owns three unregulated hydro facilities in the country, which are not part of BEL. However, there is the potential that these assets could become swept up as part of the ongoing dispute. We estimate that the assets contribute roughly $12 million to $14 million of annual earnings (about $0.06/share to $0.07/share).
- **Mitigating Factor #1: It Appears that the Government is Willing to Pay (Some Concept of) Fair Value.** As far as we can tell, the government of Belize is not contemplating trying to seize the asset. There are various statements regarding the acquisition based on "fair value". If this were the case, Fortis would receive proceeds that it could either use to repay debt, or redeploy, thereby offsetting any negative impact from lost earnings.
- **Mitigating Factor #2: The Ultimate Court of Appeal is Not in Belize.** BEL lost its case in front of the Belize Supreme Court with respect to its rate dispute with the Belize Public Utilities Commission. The case is being heard by the court of appeal in Belize, which is unlikely to yield results. However, the ultimate court of appeal is a pan-Caribbean court, which should be more independent from Belize with a greater likelihood that BEL's arguments will resonate with respect to "good utility practices".

Overview of Central Vermont Public Service (CVPS)

- **Service Territory and Customers.** CVPS is an electric utility with almost 160,000 customers in a service territory that covers about two-thirds of Vermont. In addition, CVPS owns a 41% interest in Vermont Transco, which owns and operates a high-voltage electric transmission system in the state.
- **Rate Base Expected to Grow at a 9% CAGR.** The historical rate base in addition to CVPS management's forecast is shown in Exhibit 2.
- **Capital Structure and ROE.** CVPS' allowed ROE for 2011 is 9.45%, which is broadly comparable to many of Fortis' existing utilities. However, the 57% equity thickness is quite a bit higher than Fortis' other utilities, although we see that as a compensating factor for a higher level of risk at CVPS compared to Fortis' Canadian regulated businesses (e.g., lower protection against customer usage).
- **Power Supply Expected to Shift.** Currently, about 50% of energy supply is sourced from nuclear (Vermont Yankee; owned by a third-party), about 40% from hydroelectric production (mostly Hydro-Quebec) and 10% from other sources. Going forward, CVPS has locked up additional supply from Hydro-Quebec and other sources to proactively replace the potential for lost power from the Vermont Yankee nuclear facility in 2012.

Exhibit 2: Forecast Rate Base Growth (CVPS Management)



Source: Company reports; RBC Capital Markets

Estimates Revised

We have revised our 2011 and 2012 EPS estimates to reflect the recent equity issuance in addition to the pending CVPS transaction. In 2011, our EPS estimate modestly declines to $1.78 (down from $1.80) to reflect dilution from the equity issued, partially offset by lower interest expense (at the Corporate level) on the repayment of debt. For 2012, our EPS estimate increases to $1.91 (up from $1.89) to reflect earnings from CVPS, partially offset by higher interest expense on debt used to partially finance the CVPS transaction (recorded at the CVPS level) and dilution from the recent equity issuance. Our revised estimates are set out in Exhibit 3.

Valuation

Our price target of $34.00 is based on a forward P/E of 18x 2012E EPS. Our selected P/E multiple is at the upper end of the five-year range, reflecting the low interest rate environment, good growth from the core Canadian regulated utilities and the Waneta Dam expansion, which will not contribute to earnings until 2015.

Price Target Impediment

The political environment in Belize, the risk of punitive regulatory decisions, economic/tourism conditions in its service territories, operational or financial issues at newly acquired businesses, and acquisitions or projects that fail to gain the confidence of investors may have implications for our price target.

Company Description

Fortis Inc. is a utility holding company for Newfoundland Power, FortisAlberta, FortisBC, Terasen Inc., Maritime Electric, Canadian Niagara Power, Cornwall Electric, BECOL, two electric utilities in the Turks and Caicos, and 70%-owned Belize Electricity. It also holds a 100% interest in Fortis Properties and a 59.5% interest in Caribbean Utilities. The company is in the process of acquiring Central Vermont Public Service.

Required Disclosures

Non-U.S. Analyst Disclosure

Danny Hung and Nelson Ng (i) are not registered/qualified as research analysts with the NYSE and/or FINRA and (ii) may not be associated persons of the RBC Capital Markets, LLC and therefore may not be subject to FINRA Rule 2711 and NYSE Rule 472 restrictions on communications with a subject company, public appearances and trading securities held by a research analyst account.

Conflicts Disclosures

The analyst(s) responsible for preparing this research report received compensation that is based upon various factors, including total revenues of the member companies of RBC Capital Markets and its affiliates, a portion of which are or have been generated by investment banking activities of the member companies of RBC Capital Markets and its affiliates.

A member company of RBC Capital Markets or one of its affiliates received compensation for investment banking services from Fortis Inc. in the past 12 months.

A member company of RBC Capital Markets or one of its affiliates expects to receive or intends to seek compensation for investment banking services from Fortis Inc. in the next three months.

Royal Bank of Canada, together with its affiliates, beneficially owns 1 percent or more of a class of common equity securities of Fortis Inc..

A member company of RBC Capital Markets or one of its affiliates received compensation for products or services other than investment banking services from Fortis Inc. during the past 12 months. During this time, a member company of RBC Capital Markets or one of its affiliates provided non-investment banking securities-related services to Fortis Inc..

A member company of RBC Capital Markets or one of its affiliates received compensation for products or services other than investment banking services from Fortis Inc. during the past 12 months. During this time, a member company of RBC Capital Markets or one of its affiliates provided non-securities services to Fortis Inc..

RBC Capital Markets is currently providing Fortis Inc. with investment banking services.

RBC Capital Markets is currently providing Fortis Inc. with non-investment banking securities-related services.

RBC Capital Markets is currently providing Fortis Inc. with non-securities services.

RBC Capital Markets has provided Fortis Inc. with non-securities services in the past 12 months.

The author is employed by RBC Dominion Securities Inc., a securities broker-dealer with principal offices located in Toronto, Canada.

Explanation of RBC Capital Markets Equity Rating System

An analyst's 'sector' is the universe of companies for which the analyst provides research coverage. Accordingly, the rating assigned to a particular stock represents solely the analyst's view of how that stock will perform over the next 12 months relative to the analyst's sector average.

Ratings

Top Pick (TP): Represents best in Outperform category; analyst's best ideas; expected to significantly outperform the sector over 12 months; provides best risk-reward ratio; approximately 10% of analyst's recommendations.

Outperform (O): Expected to materially outperform sector average over 12 months.

Sector Perform (SP): Returns expected to be in line with sector average over 12 months.

Underperform (U): Returns expected to be materially below sector average over 12 months.

Risk Qualifiers (any of the following criteria may be present):

Average Risk (Avg): Volatility and risk expected to be comparable to sector; average revenue and earnings predictability; no significant cash flow/financing concerns over coming 12-24 months; fairly liquid.

Above Average Risk (AA): Volatility and risk expected to be above sector; below average revenue and earnings predictability; may not be suitable for a significant class of individual equity investors; may have negative cash flow; low market cap or float.

Speculative (Spec): Risk consistent with venture capital; low public float; potential balance sheet concerns; risk of being delisted.

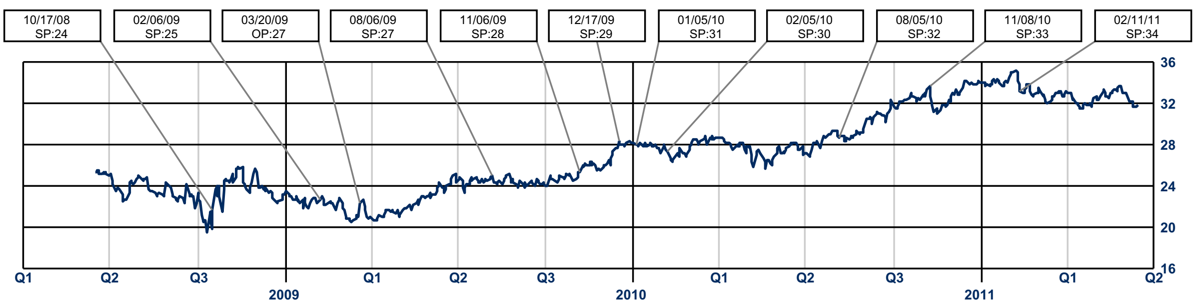
Distribution of Ratings

For the purpose of ratings distributions, regulatory rules require member firms to assign ratings to one of three rating categories - Buy, Hold/Neutral, or Sell - regardless of a firm's own rating categories. Although RBC Capital Markets' ratings of Top Pick/Outperform, Sector Perform and Underperform most closely correspond to Buy, Hold/Neutral and Sell, respectively, the meanings are not the same because our ratings are determined on a relative basis (as described above).

Distribution of Ratings
RBC Capital Markets, Equity Research

Rating	Count	Percent	Investment Banking Serv./Past 12 Mos. Count	Investment Banking Serv./Past 12 Mos. Percent
BUY[TP/O]	738	52.90	217	29.40
HOLD[SP]	595	42.70	135	22.69
SELL[U]	61	4.40	11	18.03

Rating and Price Target History for: Fortis Inc. as of 06-14-2011 (in CAD)



Legend:
TP: Top Pick; O: Outperform; SP: Sector Perform; U: Underperform; I: Initiation of Research Coverage; D: Discontinuation of Research Coverage; NR: Not Rated; NA: Not Available;

Created by BlueMatrix

References to a Recommended List in the recommendation history chart may include one or more recommended lists or model portfolios maintained by a business unit of the Wealth Management Division of RBC Capital Markets, LLC. These Recommended Lists include the Prime Opportunity List (RL 3), a former list called the Private Client Prime Portfolio (RL 4), the Guided Portfolio: Prime Income (RL 6), the Guided Portfolio: Large Cap (RL 7), the Guided Portfolio: Dividend Growth (RL 8), and the Guided Portfolio: Midcap 111 (RL9). The abbreviation 'RL On' means the date a security was placed on a Recommended List. The abbreviation 'RL Off' means the date a security was removed from a Recommended List.

Conflicts Policy

RBC Capital Markets Policy for Managing Conflicts of Interest in Relation to Investment Research is available from us on request. To access our current policy, clients should refer to
https://www.rbccm.com/global/file-414164.pdf
or send a request to RBC CM Research Publishing, P.O. Box 50, 200 Bay Street, Royal Bank Plaza, 29th Floor, South Tower, Toronto, Ontario M5J 2W7. We reserve the right to amend or supplement this policy at any time.

Dissemination of Research and Short-Term Trading Calls

RBC Capital Markets endeavors to make all reasonable efforts to provide research simultaneously to all eligible clients, having regard to local time zones in overseas jurisdictions. RBC Capital Markets' equity research is posted to our proprietary websites to ensure eligible clients receive coverage initiations and changes in ratings, targets and opinions in a timely manner. Additional distribution may be done by the sales personnel via email, fax or regular mail. Clients may also receive our research via third-party vendors. Please contact your investment advisor or institutional salesperson for more information regarding RBC Capital Markets' research. RBC Capital Markets also provides eligible clients with access to SPARC on the Firm's proprietary INSIGHT website. SPARC contains market color and commentary, and may also contain Short-Term Trade Ideas regarding the publicly-traded common equity of subject companies on which the Firm currently provides equity research coverage. SPARC may be accessed via the following hyperlink: https://www.rbcinsight.com. A Short-Term Trade Idea reflects the research analyst's directional view regarding the price of the subject company's publicly-traded common equity in the coming days or weeks, based on market and trading events. A Short-Term Trade Idea may differ from the price targets and recommendations in our published research reports reflecting the research analyst's views of the longer-term (one year) prospects of the subject company, as a result of the differing time horizons, methodologies and/or other factors. Thus, it is possible that a subject company's common equity that is considered a long-term 'sector perform' or even an 'underperform' might be a short-term buying opportunity as a result of temporary selling pressure in the market; conversely, a subject company's common equity rated a long-term 'outperform' could be considered susceptible to a short-term downward price correction. Short-Term Trade Ideas are not ratings, nor are they part of any ratings system, and the Firm generally does not intend, nor undertakes any obligation, to maintain or update Short-Term Trade Ideas. Securities and Short-Term Trade Ideas discussed in SPARC may not be suitable for all investors and have not been tailored to individual investor circumstances and objectives, and investors should make their own independent decisions regarding any securities or strategies discussed herein.

Analyst Certification

All of the views expressed in this report accurately reflect the personal views of the responsible analyst(s) about any and all of the subject securities or issuers. No part of the compensation of the responsible analyst(s) named herein is, or will be, directly or indirectly, related to the specific recommendations or views expressed by the responsible analyst(s) in this report.

The North West Company Inc. (TSX: NWC; 19.97)

Rating: Sector Perform
Risk Qualifier: Average Risk
Price Target: 22.00 ▼ 23.00

Q1 Results Slightly Softer Than Expected; Tweaking Target To $22

- **Consolidated Q1 results were below our forecast on lower sales and slightly lower margins.** NWC delivered total Q1 revenue of $346.3 million, up +1.8%, below our $355.1 million estimate. Arctic and Alaska results continued to show top-line growth, but this was muted by declines at the discount banners. Consolidated EBITDA of $28.4 million was slightly below our $29.7 million forecast. Slightly lower taxes offset the lower EBITDA, driving EPS of $0.26, versus our and consensus forecast of $0.27.
- **Northern markets are expected to show continued momentum, while southern markets should gradually pick up steam.** Retail activity in the northern markets remains quite healthy and is expected to deliver continued gains. Giant Tiger sales and margins will remain pressured: competition, while moderating, remains intense in food and execution in general merchandise categories, particularly apparel, needs to improve to drive margins.
- **Tweaking target to $22 from $23, maintaining Sector Perform.**

First Glance Notes

Fortress Paper Ltd. (TSX: FTP; 29.38)

Rating: Outperform
Risk Qualifier: Above Average Risk

Q111 Results Lower than Expected

- **Q111 results lower than expected – Fortress reported normalized EPS of ($0.42) in Q111 compared to our estimate of $0.08 and consensus of ($0.05). Normalized EBITDA was $1.0MM, compared to our $6.1MM forecast and consensus of $4.1MM. Strong performance in the wallpaper business was offset by a weak quarter for the bank note business and higher costs in specialty cellulose. Paper shipments of 15.5k mt were unchanged q/q but down 5.6% y/y.**
- The dissolving pulp conversion at Thurso will result in the mill shutting down in late Q3 to implement the modifications.

Fortis Inc. (TSX: FTS; 31.77)

Rating: Sector Perform
Risk Qualifier: Average Risk
Price Target: 34.00

Cross-Border Shopping

- **CVPS Acquisition is Incrementally Positive.** Our note highlights four key reasons why we view the pending CVPS acquisition as modestly positive.
- **Modest Expected Accretion Should Increase Over Time.** Based on CVPS' 2011 EPS guidance range, we estimate that the transaction could add between $0.01/share and $0.03/share to EPS in the first full-year. We expect EPS accretion to increase over time as rate base growth at CVPS is forecast to exceed that of Fortis' other utilities.
- **The Recent Equity Issue is Not Earmarked for the CVPS Transaction.** Fortis needed roughly $300 million of common equity in late 2011 or early 2012 to fund the existing capital plan. While it is hard to resist tying the equity deal to the CVPS announcement, the equity deal is an acceleration of the existing need that also reduces financing risk when the CVPS deal close.

2012E	268.7↑	258.7

All values in CAD unless otherwise noted.

Glacier Media Inc. (TSX: GVC; 2.30)

Rating: Outperform
Risk Qualifier: Average Risk
Price Target: 3.50

Value Still To Be Realized This Cycle

- **No change to $3.50 target price.** Following in-line Q1/11 results, we have made modest changes to our forecast to reflect: (i) Q2/11 acquisitions including the trade publications from Rogers Publishing ($11MM total cost); (ii) lower revenue growth in Business and professional; and (iii) IFRS.
- **Valuation premium justified but not without re-rating risk.** The TSX Media Index has declined -11% since reaching a cycle-high on February 8th, which we attribute to both cyclical and secular factors. Glacier is one of five media stocks that have outperformed the broader market over this period. Glacier trades at 5.8x FTM EV/EBITDA versus averages of 4.5x and 4.7x for Canadian and U.S. publishers, respectively. While rising secular concerns for media companies among investors is a risk to valuation, we continue to believe this premium is justified given: (i) minimal cash taxes; (ii) exposure to higher-growth Western Canada; and (iii) accretive acquisition opportunities.

Global Mining Trends & Values

June 15, 2011

Commodity Price Performance:

- Metal prices were up on average 0.7% last week. Lead was the best performer up 6.2%, followed by nickel up 1.5%, zinc up 1.4%, and silver up 0.1%. Uranium was the worst performer down 2.6%, followed by gold down 0.6%, aluminium down 0.2%, and copper down 0.2%.

Mining Share Price Performance:

- Mining shares were down on average 4.3% last week. The best performing group was mineral sands up 6.4%, followed by coal down 2.6%, aluminium down 4.0%, the diversified group down 4.3%, copper down 4.4%, molybdenum down 5.9%, iron ore down 5.9%, uranium down 6.1%, and nickel down 6.8%.

Valuation:

- Mining shares are now trading at a 28.0% discount to NAV at forward curve prices, versus a 27.7% discount one week ago.

Long/Short Metal Positions:

- RBC CM's proprietary data for the LME shows that the net short positions in copper, zinc, and nickel decreased last week, while net long positions in aluminium and lead increased last week.

Exchange Inventories:

- Total exchange inventories of aluminium and nickel decreased last week, while total inventories of copper and zinc increased last week.

Required Disclosures

Non-U.S. Analyst Disclosure

Adam Schatzker, Geoff Breen, Chris Drew, Steuart McIntyre, Leon Esterhuizen, Timothy Huff, Des Kilalea, Tal Woolley, Valerie Blume, Danny Hung, Nelson Ng, Haran Posner, Paul C. Quinn and Hamir Patel (i) are not registered/qualified as research analysts with the NYSE and/or FINRA and (ii) may not be associated persons of the RBC Capital Markets, LLC and therefore may not be subject to FINRA Rule 2711 and NYSE Rule 472 restrictions on communications with a subject company, public appearances and trading securities held by a research analyst account.

Conflicts Disclosures

This product constitutes a compendium report (covers six or more subject companies). As such, RBC Capital Markets chooses to provide specific disclosures for the subject companies by reference. To access current disclosures for the subject companies, clients should refer to https://www.rbccm.com/GLDisclosure/PublicWeb/DisclosureLookup.aspx?entityId=1 or send a request to RBC CM Research Publishing, P.O. Box 50, 200 Bay Street, Royal Bank Plaza, 29th Floor, South Tower, Toronto, Ontario M5J 2W7.

The analyst(s) responsible for preparing this research report received compensation that is based upon various factors, including total revenues of the member companies of RBC Capital Markets and its affiliates, a portion of which are or have been generated by investment banking activities of the member companies of RBC Capital Markets and its affiliates.

Distribution of Ratings

For the purpose of ratings distributions, regulatory rules require member firms to assign ratings to one of three rating categories - Buy, Hold/Neutral, or Sell - regardless of a firm's own rating categories. Although RBC Capital Markets' ratings of Top Pick/Outperform, Sector Perform and Underperform most closely correspond to Buy, Hold/Neutral and Sell, respectively, the meanings are not the same because our ratings are determined on a relative basis (as described above).

Distribution of Ratings
RBC Capital Markets, Equity Research

			Investment Banking Serv./Past 12 Mos.	
Rating	**Count**	**Percent**	**Count**	**Percent**
BUY[TP/O]	**738**	**52.90**	**217**	**29.40**

Conflicts Policy

RBC Capital Markets Policy for Managing Conflicts of Interest in Relation to Investment Research is available from us on request. To access our current policy, clients should refer to
https://www.rbccm.com/global/file-414164.pdf
or send a request to RBC CM Research Publishing, P.O. Box 50, 200 Bay Street, Royal Bank Plaza, 29th Floor, South Tower, Toronto, Ontario M5J 2W7. We reserve the right to amend or supplement this policy at any time.

Dissemination of Research and Short-Term Trading Calls

RBC Capital Markets endeavors to make all reasonable efforts to provide research simultaneously to all eligible clients, having regard to local time zones in overseas jurisdictions. RBC Capital Markets' equity research is posted to our proprietary websites to ensure eligible clients receive coverage initiations and changes in ratings, targets and opinions in a timely manner. Additional distribution may be done by the sales personnel via email, fax or regular mail. Clients may also receive our research via third-party vendors. Please contact your investment advisor or institutional salesperson for more information regarding RBC Capital Markets' research. RBC Capital Markets also provides eligible clients with access to SPARC on the Firm's proprietary INSIGHT website. SPARC contains market color and commentary, and may also contain Short-Term Trade Ideas regarding the publicly-traded common equity of subject companies on which the Firm currently provides equity research coverage. SPARC may be accessed via the following hyperlink: https://www.rbcinsight.com. A Short-Term Trade Idea reflects the research analyst's directional view regarding the price of the subject company's publicly-traded common equity in the coming days or weeks, based on market and trading events. A Short-Term Trade Idea may differ from the price targets and recommendations in our published research reports reflecting the research analyst's views of the longer-term (one year) prospects of the subject company, as a result of the differing time horizons, methodologies and/or other factors. Thus, it is possible that a subject company's common equity that is considered a long-term 'sector perform' or even an 'underperform' might be a short-term buying opportunity as a result of temporary selling pressure in the market; conversely, a subject company's common equity rated a long-term 'outperform' could be considered susceptible to a short-term downward price correction. Short-Term Trade Ideas are not ratings, nor are they part of any ratings system, and the Firm generally does not intend, nor undertakes any obligation, to maintain or update Short-Term Trade Ideas. Securities and Short-Term Trade Ideas discussed in SPARC may not be suitable for all investors and have not been tailored to individual investor circumstances and objectives, and investors should make their own independent decisions regarding any securities or strategies discussed herein.

Analyst Certification

All of the views expressed in this report accurately reflect the personal views of the responsible analyst(s) about any and all of the subject securities or issuers. No part of the compensation of the responsible analyst(s) named herein is, or will be, directly or indirectly, related to the specific recommendations or views expressed by the responsible analyst(s) in this report.

Disclaimer

RBC Capital Markets is the business name used by certain subsidiaries of Royal Bank of Canada, including RBC Dominion Securities Inc., RBC Capital Markets, LLC, Royal Bank of Canada Europe Limited and Royal Bank of Canada - Sydney Branch. The information contained in this report has been compiled by RBC Capital Markets from sources believed to be reliable, but no representation or warranty, express or implied, is made by Royal Bank of Canada, RBC Capital Markets, its affiliates or any other person as to its accuracy, completeness or correctness. All opinions and estimates contained in this report constitute RBC Capital Markets' judgement as of the date of this report, are subject to change without notice and are provided in good faith but without legal responsibility. Nothing in this report constitutes legal, accounting or tax advice or individually tailored investment advice. This material is prepared for general circulation to clients and has been prepared without regard to the individual financial circumstances and objectives of persons who receive it. The investments or services contained in this report may not be suitable for you and it is recommended that you consult an independent investment advisor if you are in doubt about the suitability of such investments or services. This report is not an offer to sell or a solicitation of an offer to buy any securities. Past performance is not a guide to future performance, future returns are not guaranteed, and a loss of original capital may occur. RBC Capital Markets research analyst compensation is based in part on the overall profitability of RBC Capital Markets, which includes profits attributable to investment banking revenues. Every province in Canada, state in the U.S., and most countries throughout the world have their own laws regulating the types of securities and other investment products which may be offered to their residents, as well as the process for doing so. As a result, the securities discussed in this report may not be eligible for sale in some jurisdictions. This report is not, and under no circumstances should be construed as, a solicitation to act as securities broker or dealer in any jurisdiction by any person or company that is not legally permitted to carry on the business of a securities broker or dealer in that jurisdiction. To the full extent permitted by law neither RBC Capital Markets nor any of its affiliates, nor any other person, accepts any liability whatsoever for any direct or consequential loss arising from any use of this report or the information contained herein. No matter contained in this document may be reproduced or copied by any means without the prior consent of RBC Capital Markets.

Additional information is available on request.

To U.S. Residents:
This publication has been approved by RBC Capital Markets, LLC (member FINRA, NYSE), which is a U.S. registered broker-dealer and which accepts responsibility for this report and its dissemination in the United States. Any U.S. recipient of this report that is not a registered broker-dealer or a bank acting in a broker or dealer capacity and that wishes further information regarding, or to effect any transaction in, any of the securities discussed in this report, should contact and place orders with RBC Capital Markets, LLC.
To Canadian Residents:
This publication has been approved by RBC Dominion Securities Inc.(member IIROC). Any Canadian recipient of this report that is not a Designated Institution in Ontario, an Accredited Investor in British Columbia or Alberta or a Sophisticated Purchaser in Quebec (or similar permitted purchaser in any other province) and that wishes further information regarding, or to effect any transaction in, any of the securities discussed in this report should contact and place orders with RBC Dominion Securities Inc., which, without in any way limiting the foregoing, accepts responsibility for this report and its dissemination in Canada.
To U.K. Residents:
This publication has been approved by Royal Bank of Canada Europe Limited ('RBCEL') which is authorized and regulated by Financial ServicesAuthority ('FSA'), in connection with its distribution in the United Kingdom. This material is not for general distribution in the United Kingdom to retail clients, as defined under the rules of the FSA. However, targeted distribution may be made to selected retail clients of RBC and its affiliates. RBCEL accepts responsibility for this report and its dissemination in the United Kingdom.
To Persons Receiving This Advice in Australia:
This material has been distributed in Australia by Royal Bank of Canada - Sydney Branch (ABN 86 076 940 880, AFSL No. 246521). This material has been prepared for general circulation and does not take into account the objectives, financial situation or needs of any recipient. Accordingly, any recipient should, before acting on this material, consider the appropriateness of this material having regard to their objectives, financial situation and needs. If this material relates to the acquisition or possible acquisition of a particular financial product, a recipient in Australia should obtain any relevant disclosure document prepared in respect of that product and consider that document before making any decision about whether to acquire the product.
To Hong Kong Residents:
This publication is distributed in Hong Kong by RBC Investment Services (Asia) Limited and RBC Investment Management (Asia) Limited, licensed corporations under the Securities and Futures Ordinance or, by Royal Bank of Canada, Hong Kong Branch, a registered institution under the Securities and Futures Ordinance. This material has been prepared for general circulation and does not take into account the objectives, financial situation, or needs of any recipient. Hong Kong persons wishing to obtain further information on any of the securities mentioned in this publication should contact RBC Investment Services (Asia) Limited, RBC Investment Management (Asia) Limited or Royal Bank of Canada, Hong Kong Branch at 17/Floor, Cheung Kong Center, 2 Queen's Road Central, Hong Kong (telephone number is 2848-1388).
To Singapore Residents:
This publication is distributed in Singapore by RBC (Singapore Branch) and RBC (Asia) Limited, registered entities granted offshore bank status by the Monetary Authority of Singapore. This material has been prepared for general circulation and does not take into account the objectives, financial situation, or needs of any recipient. You are advised to seek independent advice from a financial adviser before purchasing any product. If you do not obtain independent advice, you should consider whether the product is suitable for you. Past performance is not indicative of future performance.

FIRST GLANCE | COMMENT

JUNE 21, 2011

Fortis Inc. (TSX: FTS; 32.04)
News Reports That Belize Government Seizes BEL

Sector Perform
Average Risk

Impact

Negative (for investor sentiment)

First Impression

- **Belize Government Takes Over BEL.** Channel 7 News in Belize is reporting on its website that the government has signed a law that allows it to take over Belize Electricity Limited, which is 70%-owned by Fortis. A link to the story can be found by clicking here.
- **The Next Steps are Unclear at this Point.** Fortis has not issued a press release as of yet and there is no official statement available on the Belize government's website.
- **Negative to Investor Sentiment, but Limited Financial Impact.** We believe that the negative headlines could put some pressure on Fortis' stock. However, we note that BEL is not material to earnings or assets, having contributed only $2 million to earnings in 2010 (less than 1%) and making up about 2% of total assets. We see the potential for this dispute to end up including Fortis' unregulated hydro assets in Belize and the impact could become a bit more meaningful. We estimate that the unregulated hydro assets generated about $12 million to $14 million of earnings (just under 5% of earnings).
- **What Do You Do?** We believe that any material downward pressure on the share price in the 5% to 10% range would represent an attractive entry point.

Priced as of prior trading day's market close, EST (unless otherwise noted).

For Required Non-U.S. Analyst and Conflicts Disclosures, see page 3.

Company Description

Fortis Inc. is a utility holding company for Newfoundland Power, FortisAlberta, FortisBC, Terasen Inc., Maritime Electric, Canadian Niagara Power, Cornwall Electric, BECOL, two electric utilities in the Turks and Caicos, and 70%-owned Belize Electricity. It also holds a 100% interest in Fortis Properties and a 59.5% interest in Caribbean Utilities. The company is in the process of acquiring Central Vermont Public Service.

Required Disclosures

RBC Capital Markets has provided Fortis Inc. with non-investment banking securities-related services in the past 12 months.

RBC Capital Markets has provided Fortis Inc. with non-securities services in the past 12 months.

The author is employed by RBC Dominion Securities Inc., a securities broker-dealer with principal offices located in Toronto, Canada.

Explanation of RBC Capital Markets Equity Rating System

An analyst's 'sector' is the universe of companies for which the analyst provides research coverage. Accordingly, the rating assigned to a particular stock represents solely the analyst's view of how that stock will perform over the next 12 months relative to the analyst's sector average.

Ratings

Top Pick (TP): Represents best in Outperform category; analyst's best ideas; expected to significantly outperform the sector over 12 months; provides best risk-reward ratio; approximately 10% of analyst's recommendations.
Outperform (O): Expected to materially outperform sector average over 12 months.
Sector Perform (SP): Returns expected to be in line with sector average over 12 months.
Underperform (U): Returns expected to be materially below sector average over 12 months.

Risk Qualifiers (any of the following criteria may be present):

Average Risk (Avg): Volatility and risk expected to be comparable to sector; average revenue and earnings predictability; no significant cash flow/financing concerns over coming 12-24 months; fairly liquid.
Above Average Risk (AA): Volatility and risk expected to be above sector; below average revenue and earnings predictability; may not be suitable for a significant class of individual equity investors; may have negative cash flow; low market cap or float.
Speculative (Spec): Risk consistent with venture capital; low public float; potential balance sheet concerns; risk of being delisted.

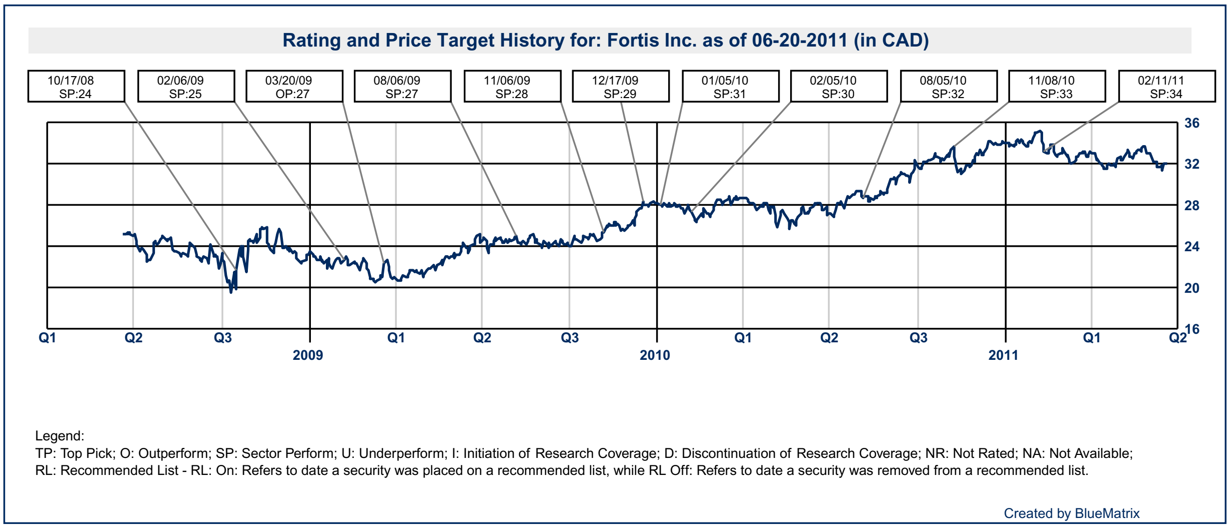
Distribution of Ratings

For the purpose of ratings distributions, regulatory rules require member firms to assign ratings to one of three rating categories - Buy, Hold/Neutral, or Sell - regardless of a firm's own rating categories. Although RBC Capital Markets' ratings of Top Pick/Outperform,

Sector Perform and Underperform most closely correspond to Buy, Hold/Neutral and Sell, respectively, the meanings are not the same because our ratings are determined on a relative basis (as described above).

Distribution of Ratings
RBC Capital Markets, Equity Research

Rating	Count	Percent	Investment Banking Serv./Past 12 Mos. Count	Investment Banking Serv./Past 12 Mos. Percent
BUY[TP/O]	741	52.90	218	29.42
HOLD[SP]	599	42.80	137	22.87
SELL[U]	60	4.30	11	18.33



References to a Recommended List in the recommendation history chart may include one or more recommended lists or model portfolios maintained by a business unit of the Wealth Management Division of RBC Capital Markets, LLC. These Recommended Lists include the Prime Opportunity List (RL 3), a former list called the Private Client Prime Portfolio (RL 4), the Guided Portfolio: Prime Income (RL 6), the Guided Portfolio: Large Cap (RL 7), the Guided Portfolio: Dividend Growth (RL 8), and the Guided Portfolio: Midcap 111 (RL9). The abbreviation 'RL On' means the date a security was placed on a Recommended List. The abbreviation 'RL Off' means the date a security was removed from a Recommended List.

Conflicts Policy

RBC Capital Markets Policy for Managing Conflicts of Interest in Relation to Investment Research is available from us on request. To access our current policy, clients should refer to

COMPANY UPDATE | COMMENT

JUNE 23, 2011

Fortis Inc. (TSX: FTS)

Examining the Options in Light of a Competing Bid for CVPS

Sector Perform
Average Risk

Price:	32.00	**Price Target:**	34.00
		Implied All-In Return:	10%
Shares O/S (MM):	184.6	**Market Cap (MM):**	5,907
Dividend:	1.16	**Yield:**	3.6%
Float (MM):	184.6		
Debt to Cap:	58%		

Event

Following Fortis' outstanding US$35.10/share bid for CVPS, Gaz Metro launched a US$35.25/share unsolicited offer for CVPS.

Investment Opinion

- **Competing Bid for CVPS.** Gaz Metro made a US$35.25/share bid for Central Vermont Public Service (CVPS), which is slightly higher than Fortis' existing US$35.10/share offer that was supported by CVPS' board. Gaz Metro has agreed to allow the regular US$0.23/share dividend to be paid through closing, while Fortis' offer is for the next two dividends at the current rate and then US$0.01/share until closing.
- **Gaz Metro's Offer Focuses on Benefits to Vermont.** In our opinion, both offers for CVPS are fair from a financial point of view and Gaz Metro's offer seems to be focusing on gaining public and regulatory support for its transaction. Gaz Metro, which owns Green Mountain Power (the other major electric distribution company in Vermont), is offering a combination of cost synergies and rate payer inducements to win support.
- **What Will CVPS Do?** In light of the US$17.5 million break fee and up to $2 million expense reimbursement that could be payable to Fortis (about US$1.50/share), we expect that CVPS' board will announce its continued support for Fortis' offer.
- **We Do Not Expect an Imminent Bidding War.** Regardless of CVPS' response, we do not expect either company to raise their bid in the near-term. It seems clear to us that this transaction has become more about gaining regulatory approval.
- **In Fact, We Think it is Possible That Any Extra Value Could Largely be Conferred to Rate Payers.** Our analysis indicates that both companies could afford to pay roughly US$5/share more (about US$70 million) and eke out EPS accretion (please see Exhibits 1 & 2). However, we believe that it is possible that the majority of any extra value could come in the form of benefits to rate payers (e.g. lower rates, additional VELCO contributions, etc.) with very little in the form of an increased offer for CVPS.
- **Valuation.** In our June 15, 2011 *Research Comment*, we did not increase our price target to reflect this transaction and therefore we remain comfortable with our existing $34.00/share price target, which is based on a forward P/E of 18x 2012E EPS.

Priced as of prior trading day's market close, EST (unless otherwise noted).

For Required Non-U.S. Analyst and Conflicts Disclosures, see page 6.

Estimated EPS Accretion

In Exhibit 1, we set out the estimated EPS accretion based on the current US$35.10/share offer. In Exhibit 2, we examine the economics if the offer were increased by $5/share.

Why is the Deal Accretive?

We have received a number of questions as to how a company can pay a roughly 40% premium to regulated rate base and still generate EPS accretion, particularly since premiums to rate base are almost never recoverable in customer rates and cost synergies are usually for the benefit of rate payers. Two factors that help drive the accretion include:

- **Double-Leverage.** CVPS' equity thickness is 57% for rate making purposes, which combined with a relatively low 9.45% allowed ROE results in an overall return framework that seems fair from a risk perspective. However, since CVPS is fairly small in the grand scope of Fortis, the company is able to finance the overall transaction with only 40% equity and the rest with debt.
- **Cross-Border Tax Benefits.** CVPS has guided to a 36.77% effective tax rate for 2011. A structure that we commonly see for Canadian companies with U.S. operations is a financing structure that results in a reduction in the effective tax rate (we have seen similar structures for U.S. companies with Canadian operations). Although the exact details of what will be put in place are not known, we have assumed a 25% effective rate, which is similar to what we have observed for many companies in our coverage universe.

Overview of Central Vermont Public Service (CVPS)

- **Service Territory and Customers.** CVPS is an electric utility with almost 160,000 customers in a service territory that covers about two-thirds of Vermont. In addition, CVPS owns a 41% interest in Vermont Transco, which owns and operates a high-voltage electric transmission system in the state.
- **Rate Base Expected to Grow at a 9% CAGR.** The historical rate base in addition to CVPS management's forecast is shown in Exhibit 2.
- **Capital Structure and ROE.** CVPS' allowed ROE for 2011 is 9.45%, which is broadly comparable to many of Fortis' existing utilities. However, the 57% equity thickness is quite a bit higher than Fortis' other utilities, which we see as a compensating factor for a higher level of risk at CVPS compared to Fortis' Canadian regulated businesses (e.g., lower protection against customer usage).
- **Power Supply Expected to Shift.** Currently, about 50% of energy supply is sourced from nuclear (Vermont Yankee; owned by a third-party), about 40% from hydroelectric production (mostly Hydro-Quebec) and 10% from other sources. Going forward, CVPS has locked up additional supply from Hydro-Quebec and other sources to proactively replace the potential for lost power from the Vermont Yankee nuclear facility in 2012.

Exhibit 3: Forecast Rate Base Growth (CVPS Management)

Valuation

Our price target of $34.00 is based on a forward P/E of 18x 2012E EPS. Our selected P/E multiple is at the upper end of the five-year range, reflecting the low interest rate environment, good growth from the core Canadian regulated utilities and the Waneta Dam expansion, which will not contribute to earnings until 2015.

Price Target Impediment

The political environment in Belize, the risk of punitive regulatory decisions, economic/tourism conditions in its service territories, operational or financial issues at newly acquired businesses, and acquisitions or projects that fail to gain the confidence of investors may have implications for our price target.

Company Description

Fortis Inc. is a utility holding company for Newfoundland Power, FortisAlberta, FortisBC, Terasen Inc., Maritime Electric, Canadian Niagara Power, Cornwall Electric, BECOL, two electric utilities in the Turks and Caicos, and 70%-owned Belize Electricity. It also holds a 100% interest in Fortis Properties and a 59.5% interest in Caribbean Utilities. The company is in the process of acquiring Central Vermont Public Service.

Explanation of RBC Capital Markets Equity Rating System

An analyst's 'sector' is the universe of companies for which the analyst provides research coverage. Accordingly, the rating assigned to a particular stock represents solely the analyst's view of how that stock will perform over the next 12 months relative to the analyst's sector average.

Ratings

Top Pick (TP): Represents best in Outperform category; analyst's best ideas; expected to significantly outperform the sector over 12 months; provides best risk-reward ratio; approximately 10% of analyst's recommendations.

Outperform (O): Expected to materially outperform sector average over 12 months.

Sector Perform (SP): Returns expected to be in line with sector average over 12 months.

Underperform (U): Returns expected to be materially below sector average over 12 months.

Risk Qualifiers (any of the following criteria may be present):

Average Risk (Avg): Volatility and risk expected to be comparable to sector; average revenue and earnings predictability; no significant cash flow/financing concerns over coming 12-24 months; fairly liquid.

Above Average Risk (AA): Volatility and risk expected to be above sector; below average revenue and earnings predictability; may not be suitable for a significant class of individual equity investors; may have negative cash flow; low market cap or float.

Speculative (Spec): Risk consistent with venture capital; low public float; potential balance sheet concerns; risk of being delisted.

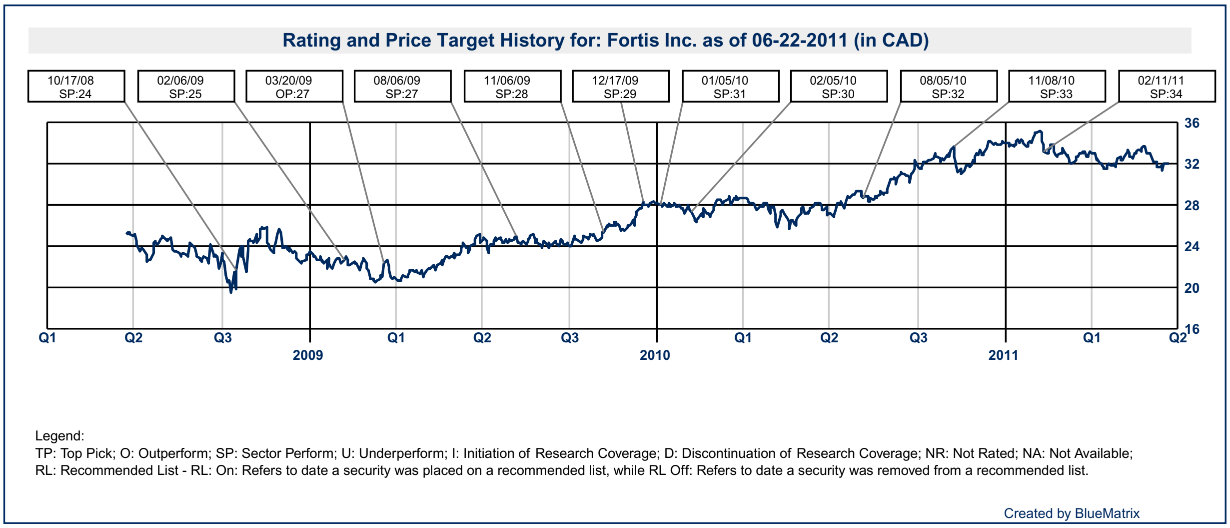
Distribution of Ratings

For the purpose of ratings distributions, regulatory rules require member firms to assign ratings to one of three rating categories - Buy, Hold/Neutral, or Sell - regardless of a firm's own rating categories. Although RBC Capital Markets' ratings of Top Pick/Outperform,

Sector Perform and Underperform most closely correspond to Buy, Hold/Neutral and Sell, respectively, the meanings are not the same because our ratings are determined on a relative basis (as described above).

Distribution of Ratings
RBC Capital Markets, Equity Research

Rating	Count	Percent	Investment Banking Serv./Past 12 Mos. Count	Investment Banking Serv./Past 12 Mos. Percent
BUY[TP/O]	744	53.10	220	29.57
HOLD[SP]	598	42.70	135	22.58
SELL[U]	60	4.30	11	18.33



References to a Recommended List in the recommendation history chart may include one or more recommended lists or model portfolios maintained by a business unit of the Wealth Management Division of RBC Capital Markets, LLC. These Recommended Lists include the Prime Opportunity List (RL 3), a former list called the Private Client Prime Portfolio (RL 4), the Guided Portfolio: Prime Income (RL 6), the Guided Portfolio: Large Cap (RL 7), the Guided Portfolio: Dividend Growth (RL 8), and the Guided Portfolio: Midcap 111 (RL9). The abbreviation 'RL On' means the date a security was placed on a Recommended List. The abbreviation 'RL Off' means the date a security was removed from a Recommended List.

Conflicts Policy

RBC Capital Markets Policy for Managing Conflicts of Interest in Relation to Investment Research is available from us on request. To access our current policy, clients should refer to
https://www.rbccm.com/global/file-414164.pdf
or send a request to RBC CM Research Publishing, P.O. Box 50, 200 Bay Street, Royal Bank Plaza, 29th Floor, South Tower, Toronto, Ontario M5J 2W7. We reserve the right to amend or supplement this policy at any time.

Dissemination of Research and Short-Term Trading Calls

RBC Capital Markets endeavors to make all reasonable efforts to provide research simultaneously to all eligible clients, having regard to local time zones in overseas jurisdictions. RBC Capital Markets' equity research is posted to our proprietary websites to ensure eligible clients receive coverage initiations and changes in ratings, targets and opinions in a timely manner. Additional distribution may be done by the sales personnel via email, fax or regular mail. Clients may also receive our research via third-party vendors. Please contact your investment advisor or institutional salesperson for more information regarding RBC Capital Markets' research. RBC Capital Markets also provides eligible clients with access to SPARC on the Firm's proprietary INSIGHT website. SPARC contains market color and commentary, and may also contain Short-Term Trade Ideas regarding the publicly-traded common equity of subject companies on which the Firm currently provides equity research coverage. SPARC may be accessed via the following hyperlink: https://www.rbcinsight.com. A Short-Term Trade Idea reflects the research analyst's directional view regarding the price of the subject

company's publicly-traded common equity in the coming days or weeks, based on market and trading events. A Short-Term Trade Idea may differ from the price targets and recommendations in our published research reports reflecting the research analyst's views of the longer-term (one year) prospects of the subject company, as a result of the differing time horizons, methodologies and/or other factors. Thus, it is possible that a subject company's common equity that is considered a long-term 'sector perform' or even an 'underperform' might be a short-term buying opportunity as a result of temporary selling pressure in the market; conversely, a subject company's common equity rated a long-term 'outperform' could be considered susceptible to a short-term downward price correction. Short-Term Trade Ideas are not ratings, nor are they part of any ratings system, and the Firm generally does not intend, nor undertakes any obligation, to maintain or update Short-Term Trade Ideas. Securities and Short-Term Trade Ideas discussed in SPARC may not be suitable for all investors and have not been tailored to individual investor circumstances and objectives, and investors should make their own independent decisions regarding any securities or strategies discussed herein.

Analyst Certification

All of the views expressed in this report accurately reflect the personal views of the responsible analyst(s) about any and all of the subject securities or issuers. No part of the compensation of the responsible analyst(s) named herein is, or will be, directly or indirectly, related to the specific recommendations or views expressed by the responsible analyst(s) in this report.

COMPANY UPDATE | COMMENT

JULY 13, 2011

Fortis Inc. (TSX: FTS)

CVPS Acquisition Terminated

Sector Perform
Average Risk

Price:	32.76	**Price Target:**	34.00
		Implied All-In Return:	7%
Shares O/S (MM):	184.6	**Market Cap (MM):**	6,047
Dividend:	1.16	**Yield:**	3.5%
Float (MM):	184.6		
Debt to Cap:	58%		

Event

CVPS deemed Gaz Metro's offer a "superior proposal" and terminated the previous merger agreement with Fortis.

Investment Opinion

- **CVPS Merger Agreement Terminated.** Central Vermont Public Service (CVPS) has deemed Gaz Metro's US$35.25/share offer a "superior proposal" and therefore its previous merger agreement with Fortis has been terminated. On June 23, 2011, Gaz Metro made a competing bid for CVPS, following Fortis' US$35.10/share offer that was announced on May 30, 2011.
- **Fortis Will Receive a Break Fee and Expenses.** Fortis will immediately receive a US$17.5 million break fee plus US$2.0 million in expense reimbursement, which is roughly $0.10/share.
- **Acquisition Loss Disappointing but Shows Discipline.** While the CVPS acquisition loss is disappointing, we believe that walking away from CVPS rather than getting involved in a bidding war shows tremendous discipline, which should serve to demonstrate that Fortis will take a measured approach with its U.S. acquisition strategy.
- **What About the Equity Issue?** While there will be negative carry through 2011 from the recent equity issue (already in our numbers), the equity would have been needed, albeit in late 2011/early 2012 to finance the significant capex plan, mostly related to the Western Canadian assets.
- **Fortis' Stock Could Be a Place to "Hide Out".** While we have hesitated to recommend Fortis as a good name in which to "hide out" during these uncertain times due to the potential negative headlines related to CVPS, we believe that defensive investors should consider the stock as a good place to park money now that the CVPS saga is over.
- **Modest Revision to 2012 Estimate.** We have modestly revised our 2012 EPS estimate to $1.88 (from $1.91) to reflect the impact of the CVPS acquisition termination (i.e., removing the expected EPS accretion from the transaction).
- **Valuation.** Since we did not previously increase our price target to reflect the transaction, we remain comfortable with our existing $34.00/share price target, which is based on a forward P/E of 18x 2012E EPS.

Priced as of prior trading day's market close, EST (unless otherwise noted).

Explanation of RBC Capital Markets Equity Rating System

An analyst's 'sector' is the universe of companies for which the analyst provides research coverage. Accordingly, the rating assigned to a particular stock represents solely the analyst's view of how that stock will perform over the next 12 months relative to the analyst's sector average.

Ratings

Top Pick (TP): Represents best in Outperform category; analyst's best ideas; expected to significantly outperform the sector over 12 months; provides best risk-reward ratio; approximately 10% of analyst's recommendations.

Outperform (O): Expected to materially outperform sector average over 12 months.

Sector Perform (SP): Returns expected to be in line with sector average over 12 months.

Underperform (U): Returns expected to be materially below sector average over 12 months.

Risk Qualifiers (any of the following criteria may be present):

Average Risk (Avg): Volatility and risk expected to be comparable to sector; average revenue and earnings predictability; no significant cash flow/financing concerns over coming 12-24 months; fairly liquid.

Above Average Risk (AA): Volatility and risk expected to be above sector; below average revenue and earnings predictability; may not be suitable for a significant class of individual equity investors; may have negative cash flow; low market cap or float.

Speculative (Spec): Risk consistent with venture capital; low public float; potential balance sheet concerns; risk of being delisted.

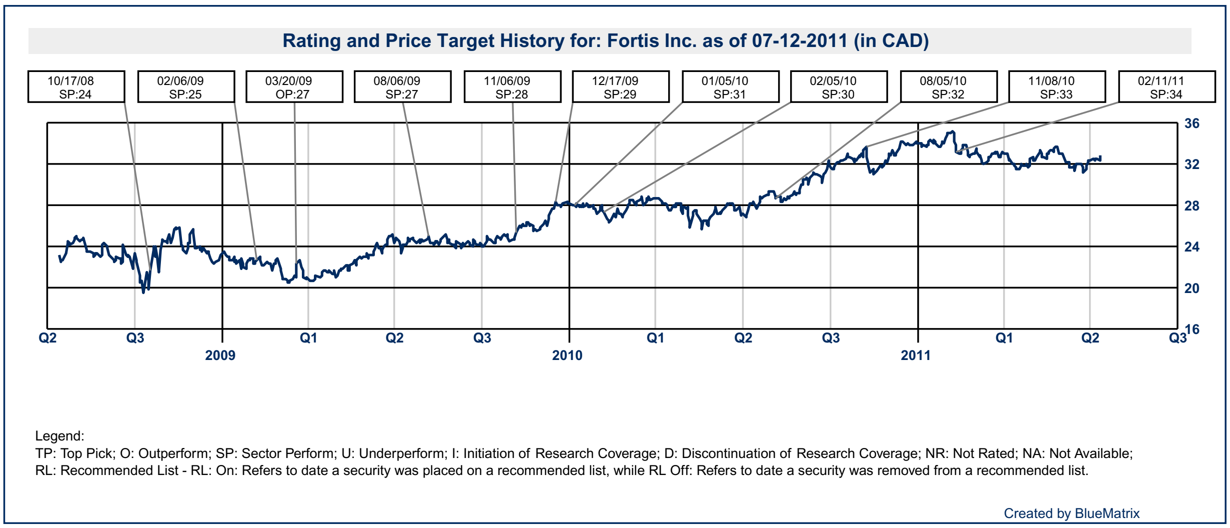
Distribution of Ratings

For the purpose of ratings distributions, regulatory rules require member firms to assign ratings to one of three rating categories - Buy, Hold/Neutral, or Sell - regardless of a firm's own rating categories. Although RBC Capital Markets' ratings of Top Pick/Outperform,

Sector Perform and Underperform most closely correspond to Buy, Hold/Neutral and Sell, respectively, the meanings are not the same because our ratings are determined on a relative basis (as described above).

Distribution of Ratings
RBC Capital Markets, Equity Research

Rating	Count	Percent	Investment Banking Serv./Past 12 Mos. Count	Investment Banking Serv./Past 12 Mos. Percent
BUY[TP/O]	751	52.70	229	30.49
HOLD[SP]	612	43.00	136	22.22
SELL[U]	60	4.20	11	18.33



References to a Recommended List in the recommendation history chart may include one or more recommended lists or model portfolios maintained by a business unit of the Wealth Management Division of RBC Capital Markets, LLC. These Recommended Lists include the Prime Opportunity List (RL 3), a former list called the Private Client Prime Portfolio (RL 4), the Guided Portfolio: Prime Income (RL 6), the Guided Portfolio: Large Cap (RL 7), the Guided Portfolio: Dividend Growth (RL 8), and the Guided Portfolio: Midcap 111 (RL9). The abbreviation 'RL On' means the date a security was placed on a Recommended List. The abbreviation 'RL Off' means the date a security was removed from a Recommended List.

Conflicts Policy

RBC Capital Markets Policy for Managing Conflicts of Interest in Relation to Investment Research is available from us on request. To access our current policy, clients should refer to
https://www.rbccm.com/global/file-414164.pdf
or send a request to RBC CM Research Publishing, P.O. Box 50, 200 Bay Street, Royal Bank Plaza, 29th Floor, South Tower, Toronto, Ontario M5J 2W7. We reserve the right to amend or supplement this policy at any time.

Dissemination of Research and Short-Term Trading Calls

RBC Capital Markets endeavors to make all reasonable efforts to provide research simultaneously to all eligible clients, having regard to local time zones in overseas jurisdictions. RBC Capital Markets' equity research is posted to our proprietary websites to ensure eligible clients receive coverage initiations and changes in ratings, targets and opinions in a timely manner. Additional distribution may be done by the sales personnel via email, fax or regular mail. Clients may also receive our research via third-party vendors. Please contact your investment advisor or institutional salesperson for more information regarding RBC Capital Markets' research. RBC Capital Markets also provides eligible clients with access to SPARC on the Firm's proprietary INSIGHT website. SPARC contains market color and commentary, and may also contain Short-Term Trade Ideas regarding the publicly-traded common equity of subject companies on which the Firm currently provides equity research coverage. SPARC may be accessed via the following hyperlink: https://www.rbcinsight.com. A Short-Term Trade Idea reflects the research analyst's directional view regarding the price of the subject

company's publicly-traded common equity in the coming days or weeks, based on market and trading events. A Short-Term Trade Idea may differ from the price targets and recommendations in our published research reports reflecting the research analyst's views of the longer-term (one year) prospects of the subject company, as a result of the differing time horizons, methodologies and/or other factors. Thus, it is possible that a subject company's common equity that is considered a long-term 'sector perform' or even an 'underperform' might be a short-term buying opportunity as a result of temporary selling pressure in the market; conversely, a subject company's common equity rated a long-term 'outperform' could be considered susceptible to a short-term downward price correction. Short-Term Trade Ideas are not ratings, nor are they part of any ratings system, and the Firm generally does not intend, nor undertakes any obligation, to maintain or update Short-Term Trade Ideas. Securities and Short-Term Trade Ideas discussed in SPARC may not be suitable for all investors and have not been tailored to individual investor circumstances and objectives, and investors should make their own independent decisions regarding any securities or strategies discussed herein.

Analyst Certification

All of the views expressed in this report accurately reflect the personal views of the responsible analyst(s) about any and all of the subject securities or issuers. No part of the compensation of the responsible analyst(s) named herein is, or will be, directly or indirectly, related to the specific recommendations or views expressed by the responsible analyst(s) in this report.

Disclaimer

RBC Capital Markets is the business name used by certain subsidiaries of Royal Bank of Canada, including RBC Dominion Securities Inc., RBC Capital Markets, LLC, Royal Bank of Canada Europe Limited and Royal Bank of Canada - Sydney Branch. The information contained in this report has been compiled by RBC Capital Markets from sources believed to be reliable, but no representation or warranty, express or implied, is made by Royal Bank of Canada, RBC Capital Markets, its affiliates or any other person as to its accuracy, completeness or correctness. All opinions and estimates contained in this report constitute RBC Capital Markets' judgement as of the date of this report, are subject to change without notice and are provided in good faith but without legal responsibility. Nothing in this report constitutes legal, accounting or tax advice or individually tailored investment advice. This material is prepared for general circulation to clients and has been prepared without regard to the individual financial circumstances and objectives of persons who receive it. The investments or services contained in this report may not be suitable for you and it is recommended that you consult an independent investment advisor if you are in doubt about the suitability of such investments or services. This report is not an offer to sell or a solicitation of an offer to buy any securities. Past performance is not a guide to future performance, future returns are not guaranteed, and a loss of original capital may occur. RBC Capital Markets research analyst compensation is based in part on the overall profitability of RBC Capital Markets, which includes profits attributable to investment banking revenues. Every province in Canada, state in the U.S., and most countries throughout the world have their own laws regulating the types of securities and other investment products which may be offered to their residents, as well as the process for doing so. As a result, the securities discussed in this report may not be eligible for sale in some jurisdictions. This report is not, and under no circumstances should be construed as, a solicitation to act as securities broker or dealer in any jurisdiction by any person or company that is not legally permitted to carry on the business of a securities broker or dealer in that jurisdiction. To the full extent permitted by law neither RBC Capital Markets nor any of its affiliates, nor any other person, accepts any liability whatsoever for any direct or consequential loss arising from any use of this report or the information contained herein. No matter contained in this document may be reproduced or copied by any means without the prior consent of RBC Capital Markets.

Additional information is available on request.

To U.S. Residents:
This publication has been approved by RBC Capital Markets, LLC (member FINRA, NYSE), which is a U.S. registered broker-dealer and which accepts responsibility for this report and its dissemination in the United States. Any U.S. recipient of this report that is not a registered broker-dealer or a bank acting in a broker or dealer capacity and that wishes further information regarding, or to effect any transaction in, any of the securities discussed in this report, should contact and place orders with RBC Capital Markets, LLC.

To Canadian Residents:
This publication has been approved by RBC Dominion Securities Inc.(member IIROC). Any Canadian recipient of this report that is not a Designated Institution in Ontario, an Accredited Investor in British Columbia or Alberta or a Sophisticated Purchaser in Quebec (or similar permitted purchaser in any other province) and that wishes further information regarding, or to effect any transaction in, any of the securities discussed in this report should contact and place orders with RBC Dominion Securities Inc., which, without in any way limiting the foregoing, accepts responsibility for this report and its dissemination in Canada.

To U.K. Residents:
This publication has been approved by Royal Bank of Canada Europe Limited ('RBCEL') which is authorized and regulated by Financial ServicesAuthority ('FSA'), in connection with its distribution in the United Kingdom. This material is not for general distribution in the United Kingdom to retail clients, as defined under the rules of the FSA. However, targeted distribution may be made to selected retail clients of RBC and its affiliates. RBCEL accepts responsibility for this report and its dissemination in the United Kingdom.

To Persons Receiving This Advice in Australia:
This material has been distributed in Australia by Royal Bank of Canada - Sydney Branch (ABN 86 076 940 880, AFSL No. 246521). This material has been prepared for general circulation and does not take into account the objectives, financial situation or needs of any recipient. Accordingly, any recipient should, before acting on this material, consider the appropriateness of this material having regard to their objectives, financial situation and needs. If this material relates to the acquisition or possible acquisition of a particular financial product, a recipient in Australia should obtain any relevant disclosure document prepared in respect of that product and consider that document before making any decision about whether to acquire the product.

To Hong Kong Residents:
This publication is distributed in Hong Kong by RBC Investment Services (Asia) Limited and RBC Investment Management (Asia) Limited, licensed corporations under the Securities and Futures Ordinance or, by Royal Bank of Canada, Hong Kong Branch, a registered institution under the Securities and Futures Ordinance. This material has been prepared for general circulation and does not take into account the objectives, financial situation, or needs of any recipient. Hong Kong persons wishing to obtain further information on any of the securities mentioned in this publication should contact RBC Investment Services (Asia) Limited, RBC Investment Management (Asia) Limited or Royal Bank of Canada, Hong Kong Branch at 17/Floor, Cheung Kong Center, 2 Queen's Road Central, Hong Kong (telephone number is 2848-1388).

To Singapore Residents:
This publication is distributed in Singapore by RBC (Singapore Branch) and RBC (Asia) Limited, registered entities granted offshore bank status by the Monetary Authority of Singapore. This material has been prepared for general circulation and does not take into account the objectives, financial situation, or needs of any recipient. You are advised to seek independent advice from a financial adviser before purchasing any product. If you do not obtain independent advice, you should consider whether the product is suitable for you. Past performance is not indicative of future performance.

All values in CAD unless otherwise noted.

Sector Perform
Average Risk

Impact

Neutral

First Impression

- **Q2/11 Results Slightly Below Expectations.** Q2/11 normalized EPS was $0.33 compared to our estimate of $0.36 and $0.32 in Q2/10. Consensus was $0.35 (four estimates, range of $0.34 to $0.36). There were small negative variances in most of the segments with nothing major causing the modestly lower-than-forecast earnings. With most utility businesses that are regulated on an annual basis, some of the variances within the quarter could be due to timing differences that will reverse themselves throughout the rest of the year. A table showing the segment earnings compared to our estimates is set out in Exhibit 1.
- **Update on Belize Situation.** Due to the expropriation of Belize Electricity Limited (BEL), Fortis has deconsolidated the results of BEL effective June 20, 2011. The book value of the BEL investment was $112 million as at June 30, 2011. Fortis has initiated proceedings for compensation from the Government of Belize. With respect to BECOL, the company's unregulated power generation assets in Belize, the Government of Belize has publicly indicated that it does not intend to expropriate these assets.
- **$1.2 Billion Capex Program On Track.** Gross capex for H1/11 was $519 million and the $1.2 billion capex program for 2011 remains on track.
- **No Conference Call.** Fortis does not hold a conference call to discuss the Q2/11 results. We will follow up with management later today to discuss the quarter and the outlook.
- **Neutral View on the Quarter.** Based on our initial review of the quarterly results and pending a discussion with management on the quarter and outlook, we view the Q2/11 results as neutral for the share price.

Priced as of prior trading day's market close, EST (unless otherwise noted).

Fortis Inc. (TSX: FTS)

Q2/11 Results Modestly Below Expectations

Sector Perform
Average Risk

Price:	30.87	**Price Target:**	34.00
		Implied All-In Return:	14%
Shares O/S (MM):	186.3	**Market Cap (MM):**	5,751
Dividend:	1.16	**Yield:**	3.8%
Float (MM):	186.3		
Debt to Cap:	55%		

Event

Fortis reported Q2/11 results.

Investment Opinion

- **Q2/11 Results Modestly Below Expectations.** Fortis' Q2/11 normalized EPS was $0.33 compared to our estimate of $0.36 and $0.32 in Q2/10. There were small negative variances in most of the segments with nothing major causing the modestly lower-than-forecast earnings.
- **Still on the Hunt for a U.S. Utility Acquisition, but the CVPS Process Shows Fortis Will Be Disciplined.** Fortis remains interested in acquiring a U.S. utility, despite the recent Central Vermont Public Service (CVPS) agreement that was scuttled by a hostile bid by Gaz Metro. As evidenced by the company's walking away from CVPS rather than getting involved in a bidding war, we continue to believe that Fortis will remain very disciplined.
- **Capex Plan Nudged Up.** With gross capital expenditures of $519 million spent in H1/11, Fortis continues to expect $1.2 billion of capex in 2011. The company also expects a five-year capex program of $5.7 billion through to the end of 2015, which is up from the $5.5 billion capex plan stated in previous guidance.
- **Update on Belize.** Due to the expropriation of Belize Electricity Limited (BEL), Fortis has deconsolidated the results of BEL effective June 20, 2011. The book value of the BEL investment was $112 million as at June 30, 2011. Fortis has initiated proceedings for compensation from the Government of Belize, and from our discussion with management, the company plans to file a formal proposal in the next several months. With respect to Belize Electric Company Limited (BECOL), the company's unregulated power generation assets in Belize, the Government of Belize has publicly indicated that it does not intend to expropriate these assets.
- **Reducing Estimates.** We have reduced our 2011 and 2012 EPS estimates to $1.74 and $1.82, respectively (from $1.78 and $1.88) to primarily reflect the Q2/11 results in addition to modest changes to a number of the segments.
- **Valuation.** We have left our $34.00/share price target unchanged with a modest increase in the forward P/E to 18.5x (from 18.0x) offsetting the lower 2012 EPS estimate. We believe that a higher P/E valuation is supported by declining long bond yields and an overall rise in infrastructure valuations.

Priced as of prior trading day's market close, EST (unless otherwise noted).

For Required Non-U.S. Analyst and Conflicts Disclosures, see page 5.

Q2/11 Results Modestly Below Expectations

Fortis' Q2/11 normalized EPS was $0.33 compared to our estimate of $0.36 and $0.32 in Q2/10. There were small negative variances in most of the segments with nothing major causing the modestly lower-than-forecast earnings. A table showing the segment earnings compared to our estimates is set out in Exhibit 1.

Exhibit 1: Normalized Earnings (In $MM except per share figures)

	Q2/11	RBC CM Q2/11E	Q2/10	Comments
Newfoundland Power	$11	$11	$11	
FortisOntario & Maritime Electric	6	4	4	Lower effective tax rate (higher Q2/11 deductions)

Average shares outstanding (MM)	177	177	172	

Source: Company reports; RBC Capital Markets estimates

Highlights of the Quarter and Outlook

- **Slightly Lower Q1/11 Results Due to Small Segment Variances.** Lower-than-forecast earnings were mainly attributable to lower results from FortisBC Energy (timing of approved cost recovery), FortisAlberta (lower transmission revenue and customer growth), and Non-regulated Fortis Generation (lower hydrology in Belize), partially offset by higher earnings from FortisOntario & Maritime Electric (lower effective tax rate due to higher Q2/11 deductions at FortisOntario).

- **Update on Belize Situation.** Due to the expropriation of Belize Electricity Limited (BEL), Fortis has deconsolidated the results of BEL effective June 20, 2011. The book value of the BEL investment was $112 million as at June 30, 2011. Fortis has initiated proceedings for compensation from the Government of Belize, and our discussion with management indicates the company plans to file a formal proposal in the next several months. With respect to Belize Electric Company Limited (BECOL), the company's unregulated power generation assets in Belize, the Government of Belize has publicly indicated that it does not intend to expropriate these assets.

- **Search for U.S. Utility Goes On Despite CVPS Acquisition That Fell Through.** Fortis remains interested in acquiring a U.S. utility, despite the recent Central Vermont Public Service (CVPS) agreement that was scuttled by a hostile bid by Gaz Metro (for additional details, please refer to our *Research Comment* dated July 13, 2011). As evidenced by the company's walking away from CVPS rather than getting involved in a bidding war, we continue to believe that Fortis will remain very disciplined with respect to its previously stated acquisition parameters.

    - **Potential for a Scale-Changing Acquisition.** The company continues to seek out regulated electric and/or gas utilities with a preference for businesses in a single state (i.e., one regulator). Fortis is comfortable with an integrated electric utility as long as the generation assets are in regulated rate base. The target size is US$1 billion to US$5 billion of enterprise value with a utility in the US$3 billion enterprise value range as being optimal.

    - **Going Solo is Preferred.** Similar to comments made throughout the years, management continues to prefer to acquire 100% of assets without any partners. The company feels this reduces the complexity of a transaction and allows it to proceed with an acquisition more expeditiously.

    - **Will Partner if Necessary, but Not a Consortium.** To the extent an acquisition target is too large for Fortis to complete on its own, the company would consider taking on one partner (e.g., a Canadian pension fund) where the company would have at least a 50% interest.

- **Long-Term Utility Growth Plan Remains on Track.** With gross capital expenditures of $519 million spent in H1/11, Fortis continues to expect $1.2 billion of capex in 2011. The company also expects a five-year capex program of $5.7 billion through to the end of 2015, which is up from the $5.5 billion capex plan stated in previous guidance.
- **Construction Work Continues on Waneta Expansion.** Construction work continued on the $900 million Waneta Expansion, a 335 MW hydro project in B.C. that is expected to be in service in the spring of 2015. With a controlling interest of 51%, Fortis will operate and maintain the facility, which will sell energy and capacity to BC Hydro and FortisBC Electric under 40-year power sales contracts.
- **$341 Million Equity Issuance Completed.** Fortis recently completed its roughly $341 million equity offering (including approximately $41 million from the exercise of the over-allotment option). We had previously forecast Fortis' need for roughly $300 million of common equity in late 2011 or early 2012 to finance the growth in its existing utilities (in particular western Canada) and the Waneta hydro expansion.

Reducing 2011 and 2012 Estimates

We have reduced our 2011 and 2012 EPS estimates to $1.74 and $1.82, respectively (from $1.78 and $1.88) to primarily reflect the Q2/11 results in addition to modest changes to a number of the segments. Our revised estimates are set out in Exhibit 2.

Valuation

Our price target of $34.00 is based on a forward P/E of 18.5x 2012E EPS. Our selected P/E multiple is at the upper end of the five-year range, reflecting the low interest rate environment, good growth from the core Canadian regulated utilities, and the Waneta Dam expansion, which will not contribute to earnings until 2015.

Price Target Impediment

The political environment in Belize, the risk of punitive regulatory decisions, economic/tourism conditions in its service territories, operational or financial issues at newly acquired businesses, and acquisitions or projects that fail to gain the confidence of investors may have implications for our price target.

Company Description

Fortis Inc. is a utility holding company for Newfoundland Power, FortisAlberta, FortisBC, Terasen Inc., Maritime Electric, Canadian Niagara Power, Cornwall Electric, BECOL, two electric utilities in the Turks and Caicos, and 70%-owned Belize Electricity. It also holds a 100% interest in Fortis Properties and a 59.5% interest in Caribbean Utilities. The company is in the process of acquiring Central Vermont Public Service.

Required Disclosures

Explanation of RBC Capital Markets Equity Rating System

An analyst's 'sector' is the universe of companies for which the analyst provides research coverage. Accordingly, the rating assigned to a particular stock represents solely the analyst's view of how that stock will perform over the next 12 months relative to the analyst's sector average.

Ratings

Top Pick (TP): Represents best in Outperform category; analyst's best ideas; expected to significantly outperform the sector over 12 months; provides best risk-reward ratio; approximately 10% of analyst's recommendations.

Outperform (O): Expected to materially outperform sector average over 12 months.

Sector Perform (SP): Returns expected to be in line with sector average over 12 months.

Underperform (U): Returns expected to be materially below sector average over 12 months.

Risk Qualifiers (any of the following criteria may be present):

Average Risk (Avg): Volatility and risk expected to be comparable to sector; average revenue and earnings predictability; no significant cash flow/financing concerns over coming 12-24 months; fairly liquid.

Above Average Risk (AA): Volatility and risk expected to be above sector; below average revenue and earnings predictability; may not be suitable for a significant class of individual equity investors; may have negative cash flow; low market cap or float.

Speculative (Spec): Risk consistent with venture capital; low public float; potential balance sheet concerns; risk of being delisted.

Distribution of Ratings

For the purpose of ratings distributions, regulatory rules require member firms to assign ratings to one of three rating categories - Buy, Hold/Neutral, or Sell - regardless of a firm's own rating categories. Although RBC Capital Markets' ratings of Top Pick/Outperform,

Sector Perform and Underperform most closely correspond to Buy, Hold/Neutral and Sell, respectively, the meanings are not the same because our ratings are determined on a relative basis (as described above).

Distribution of Ratings
RBC Capital Markets, Equity Research

Rating	Count	Percent	Investment Banking Serv./Past 12 Mos. Count	Investment Banking Serv./Past 12 Mos. Percent
BUY[TP/O]	750	52.40	217	28.93

References to a Recommended List in the recommendation history chart may include one or more recommended lists or model portfolios maintained by a business unit of the Wealth Management Division of RBC Capital Markets, LLC. These Recommended Lists include the Prime Opportunity List (RL 3), a former list called the Private Client Prime Portfolio (RL 4), the Guided Portfolio: Prime Income (RL 6), the Guided Portfolio: Large Cap (RL 7), the Guided Portfolio: Dividend Growth (RL 8), and the Guided Portfolio: Midcap 111 (RL9). The abbreviation 'RL On' means the date a security was placed on a Recommended List. The abbreviation 'RL Off' means the date a security was removed from a Recommended List.

Conflicts Policy

RBC Capital Markets Policy for Managing Conflicts of Interest in Relation to Investment Research is available from us on request. To access our current policy, clients should refer to
https://www.rbccm.com/global/file-414164.pdf
or send a request to RBC CM Research Publishing, P.O. Box 50, 200 Bay Street, Royal Bank Plaza, 29th Floor, South Tower, Toronto, Ontario M5J 2W7. We reserve the right to amend or supplement this policy at any time.

Dissemination of Research and Short-Term Trading Calls

RBC Capital Markets endeavors to make all reasonable efforts to provide research simultaneously to all eligible clients, having regard to local time zones in overseas jurisdictions. RBC Capital Markets' equity research is posted to our proprietary websites to ensure eligible clients receive coverage initiations and changes in ratings, targets and opinions in a timely manner. Additional distribution may be done by the sales personnel via email, fax or regular mail. Clients may also receive our research via third-party vendors. Please contact your investment advisor or institutional salesperson for more information regarding RBC Capital Markets' research. RBC Capital Markets also provides eligible clients with access to SPARC on the Firm's proprietary INSIGHT website. SPARC contains market color and commentary, and may also contain Short-Term Trade Ideas regarding the publicly-traded common equity of subject companies on which the Firm currently provides equity research coverage. SPARC may be accessed via the following hyperlink: https://www.rbcinsight.com. A Short-Term Trade Idea reflects the research analyst's directional view regarding the price of the subject

company's publicly-traded common equity in the coming days or weeks, based on market and trading events. A Short-Term Trade Idea may differ from the price targets and recommendations in our published research reports reflecting the research analyst's views of the longer-term (one year) prospects of the subject company, as a result of the differing time horizons, methodologies and/or other factors. Thus, it is possible that a subject company's common equity that is considered a long-term 'sector perform' or even an 'underperform' might be a short-term buying opportunity as a result of temporary selling pressure in the market; conversely, a subject company's common equity rated a long-term 'outperform' could be considered susceptible to a short-term downward price correction. Short-Term Trade Ideas are not ratings, nor are they part of any ratings system, and the Firm generally does not intend, nor undertakes any obligation, to maintain or update Short-Term Trade Ideas. Securities and Short-Term Trade Ideas discussed in SPARC may not be suitable for all investors and have not been tailored to individual investor circumstances and objectives, and investors should make their own independent decisions regarding any securities or strategies discussed herein.

Analyst Certification

All of the views expressed in this report accurately reflect the personal views of the responsible analyst(s) about any and all of the subject securities or issuers. No part of the compensation of the responsible analyst(s) named herein is, or will be, directly or indirectly, related to the specific recommendations or views expressed by the responsible analyst(s) in this report.

COMPANY UPDATE | COMMENT

NOVEMBER 4, 2011

Fortis Inc. (TSX: FTS)

Regulated Utilities Drive a Solid Quarter

Sector Perform
Average Risk

Price:	34.06	**Price Target:**	34.00
		Implied All-In Return:	3%
Shares O/S (MM):	186.9	**Market Cap (MM):**	6,366
Dividend:	1.16	**Yield:**	3.4%
Float (MM):	186.9		
Debt to Cap:	55%		

Event

Fortis reported Q3/11 results.

Investment Opinion

- **Normalized Results In-Line.** The Q3/11 normalized EPS was $0.25 compared to our estimate of $0.24 and $0.24 in Q3/10. Consensus for the quarter was $0.24 (four estimates with a range of $0.22 to $0.24). Reported EPS was $0.31 and included a $0.06/share gain from the termination fee from the CVPS transaction.
- **No Major Surprises.** Overall, Canadian regulated utilities posted a good quarter with $40 million of earnings (our estimate was $38 million). All of the other segments were within +/- $1 million of our estimate.
- **Growth Plan Remains Unchanged.** With gross capital expenditures of $806 million spent in the first nine months of the year, Fortis continues to expect $1.2 billion of capex in 2011. The company also expects a five-year capex program of $5.7 billion through to the end of 2015.
- **Update on Belize Situation.** Fortis has commissioned an independent valuation of its previous investment in BEL and expects to submit a claim for compensation to the Government of Belize during Q4/11.
- **Estimates Unchanged.** Based on an in-line quarter, we have left our 2011–2013 annual EPS estimates unchanged.
- **A Good Stock for Investors Looking to Play Defense.** With roughly 75% of earnings derived from Canadian cost-of-service regulated utilities, we believe that Fortis' stock is a good choice for investors looking for a defensive business to protect against both market and economic weakness.
- **Valuation.** Our price target of $34.00 (unchanged) is based on a forward P/E of 18.0x 2013E EPS. Our selected P/E multiple is at the upper end of the five-year range, reflecting the low interest rate environment, good growth from the core Canadian regulated utilities, and the Waneta Dam expansion, which will not contribute to earnings until 2015.

Priced as of prior trading day's market close, EST (unless otherwise noted).

For Required Non-U.S. Analyst and Conflicts Disclosures, see page 5.

Q3/11 Results in Line with Expectations after One-Time Adjustment

Fortis' Q3/11 normalized EPS was $0.25 compared to our estimate of $0.24 and $0.24 in Q3/10. Reported EPS was $0.31 and included a $0.06/share gain from the termination fee from the CVPS transaction. There were no major surprises in the segment results. Overall, Canadian regulated utilities posted a good quarter with $40 million of earnings (our estimate was $38 million). All of the other segments were within +/- $1 million of our estimate. A table showing the segment earnings compared to our estimates is set out in Exhibit 1.

Exhibit 1: Normalized Earnings (In $MM except per share figures)

	Q3/11	RBC CM Q3/11E	Q3/10	Comments
Newfoundland Power	$8	$8	$8	
FortisOntario & Maritime Electric	6	5	5	
FortisBC Energy	(3)	(5)	(9)	Higher regulator-approved operating expenses recoverable from customers

Highlights of the Quarter and Outlook

- **Newfoundland Power Sells 40% of Joint-Use Poles to Bell Aliant.** In September, 2011, Newfoundland Power received regulatory approval for the sale of 40% of the utility's joint-use poles to Bell Aliant. The transaction closed on October 5, 2011 and the proceeds were approximately $46 million.

- **$25 Million Acquisition Made by Fortis Properties.** On October 19, 2011, Fortis Properties acquired the 160-room, full-service Hilton Suites Winnipeg Airport Hotel for approximately $25 million.

- **Update on Belize Situation.** Due to the expropriation of Belize Electricity Limited (BEL), Fortis deconsolidated the results of BEL effective June 20, 2011. The book value of the BEL investment was $112 million as at June 30, 2011. Fortis has commissioned an independent valuation of its previous investment in BEL and expects to submit a claim for compensation to the Government of Belize during Q4/11.

- **Long-Term Utility Growth Plan Remains Unchanged.** With gross capital expenditures of $806 million spent in the first nine months of the year, Fortis continues to expect $1.2 billion of capex in 2011. The company also expects a five-year capex program of $5.7 billion through to the end of 2015.

- **Construction Work Continues on Waneta Expansion.** Construction work continued on the $900 million Waneta Expansion, a 335 MW hydro project in B.C. that is expected to be in service in the spring of 2015. With a controlling interest of 51%, Fortis will operate and maintain the facility, which will sell energy and capacity to BC Hydro and FortisBC Electric under 40-year power sales contracts.

- **Still Looking for U.S. Acquisitions, but Nothing Appears Imminent.** Fortis continues to look in the U.S. for utilities to acquire, although we do not get the impression that anything meaningful is in the works at this time. We continue to expect management to remain patient (the acquisition hunt in the U.S. has been going on for years). The preference has been for a utility in the US$3 billion to US$5 billion range (enterprise value), operating in a single state with no material unregulated assets. Fortis would prefer to be the sole owner and operator but would consider a partnership with a Canadian pension fund if Fortis maintained control (i.e., not a minority position or part of a consortium).

- **Moose River Hydroelectric Facility Expected to Be Operational in February 2012.** In May 2011, the Moose River generator (part of Fortis Generation segment) in Upper New York State sustained electrical damage and is expected to be operational again in February 2012. In the meantime, equipment and business interruption insurance claims have been made.

Overall Estimates Remain Unchanged

We have made minor changes to our Q4/11 estimate, but have left our overall EPS estimates unchanged through 2013. Our revised estimates are set out in Exhibit 2.

Valuation

Our price target of $34.00 is based on a forward P/E of 18.0x 2013E EPS. Our selected P/E multiple is at the upper end of the five-year range, reflecting the low interest rate environment, good growth from the core Canadian regulated utilities, and the Waneta Dam expansion, which will not contribute to earnings until 2015.

Price Target Impediment

The political environment in Belize, the risk of punitive regulatory decisions, economic/tourism conditions in its service territories, operational or financial issues at newly acquired businesses, and acquisitions or projects that fail to gain the confidence of investors may have implications for our price target.

Company Description

Fortis Inc. is a utility holding company for Newfoundland Power, FortisAlberta, FortisBC, Terasen Inc., Maritime Electric, Canadian Niagara Power, Cornwall Electric, BECOL, two electric utilities in the Turks and Caicos, and 70%-owned Belize Electricity. It also holds a 100% interest in Fortis Properties and a 59.5% interest in Caribbean Utilities. The company is in the process of acquiring Central Vermont Public Service.

Required Disclosures

Non-U.S. Analyst Disclosure

Kelsey Roste and Danny Hung (i) are not registered/qualified as research analysts with the NYSE and/or FINRA and (ii) may not be associated persons of the RBC Capital Markets, LLC and therefore may not be subject to FINRA Rule 2711 and NYSE Rule 472 restrictions on communications with a subject company, public appearances and trading securities held by a research analyst account.

Conflicts Disclosures

The analyst(s) responsible for preparing this research report received compensation that is based upon various factors, including total revenues of the member companies of RBC Capital Markets and its affiliates, a portion of which are or have been generated by investment banking activities of the member companies of RBC Capital Markets and its affiliates.

A member company of RBC Capital Markets or one of its affiliates managed or co-managed a public offering of securities for Fortis Inc. in the past 12 months.

A member company of RBC Capital Markets or one of its affiliates received compensation for investment banking services from Fortis Inc. in the past 12 months.

Royal Bank of Canada, together with its affiliates, beneficially owns 1 percent or more of a class of common equity securities of Fortis Inc..

A member company of RBC Capital Markets or one of its affiliates received compensation for products or services other than investment banking services from Fortis Inc. during the past 12 months. During this time, a member company of RBC Capital Markets or one of its affiliates provided non-investment banking securities-related services to Fortis Inc..

A member company of RBC Capital Markets or one of its affiliates received compensation for products or services other than investment banking services from Fortis Inc. during the past 12 months. During this time, a member company of RBC Capital Markets or one of its affiliates provided non-securities services to Fortis Inc..

RBC Capital Markets is currently providing Fortis Inc. with non-securities services.

RBC Capital Markets has provided Fortis Inc. with investment banking services in the past 12 months.

RBC Capital Markets has provided Fortis Inc. with non-investment banking securities-related services in the past 12 months.

RBC Capital Markets has provided Fortis Inc. with non-securities services in the past 12 months.

The author is employed by RBC Dominion Securities Inc., a securities broker-dealer with principal offices located in Toronto, Canada.

Explanation of RBC Capital Markets Equity Rating System

An analyst's 'sector' is the universe of companies for which the analyst provides research coverage. Accordingly, the rating assigned to a particular stock represents solely the analyst's view of how that stock will perform over the next 12 months relative to the analyst's sector average.

Ratings

Top Pick (TP): Represents best in Outperform category; analyst's best ideas; expected to significantly outperform the sector over 12 months; provides best risk-reward ratio; approximately 10% of analyst's recommendations.

Outperform (O): Expected to materially outperform sector average over 12 months.

Sector Perform (SP): Returns expected to be in line with sector average over 12 months.

Underperform (U): Returns expected to be materially below sector average over 12 months.

Risk Qualifiers (any of the following criteria may be present):

Average Risk (Avg): Volatility and risk expected to be comparable to sector; average revenue and earnings predictability; no significant cash flow/financing concerns over coming 12-24 months; fairly liquid.

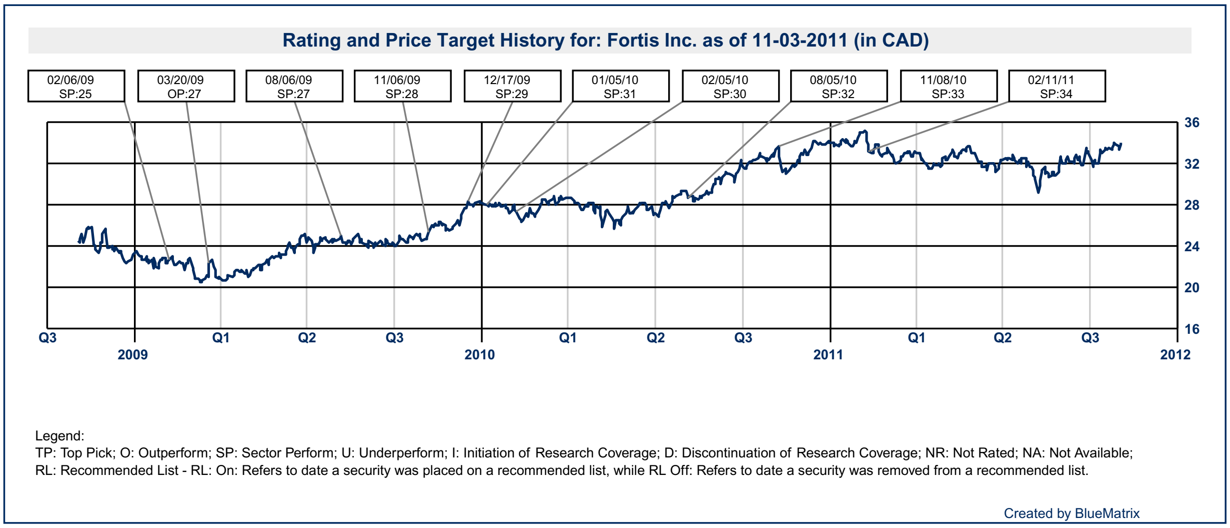
Above Average Risk (AA): Volatility and risk expected to be above sector; below average revenue and earnings predictability; may not be suitable for a significant class of individual equity investors; may have negative cash flow; low market cap or float.

Speculative (Spec): Risk consistent with venture capital; low public float; potential balance sheet concerns; risk of being delisted.

Distribution of Ratings

For the purpose of ratings distributions, regulatory rules require member firms to assign ratings to one of three rating categories - Buy, Hold/Neutral, or Sell - regardless of a firm's own rating categories. Although RBC Capital Markets' ratings of Top Pick/Outperform, Sector Perform and Underperform most closely correspond to Buy, Hold/Neutral and Sell, respectively, the meanings are not the same because our ratings are determined on a relative basis (as described above).

	Distribution of Ratings RBC Capital Markets, Equity Research			
			Investment Banking Serv./Past 12 Mos.	
Rating	Count	Percent	Count	Percent
BUY[TP/O]	775	52.80	230	29.68
HOLD[SP]	628	42.80	137	21.82
SELL[U]	64	4.40	6	9.38



References to a Recommended List in the recommendation history chart may include one or more recommended lists or model portfolios maintained by a business unit of the Wealth Management Division of RBC Capital Markets, LLC. These Recommended Lists include the Prime Opportunity List (RL 3), a former list called the Private Client Prime Portfolio (RL 4), the Guided Portfolio: Prime Income (RL 6), the Guided Portfolio: Large Cap (RL 7), the Guided Portfolio: Dividend Growth (RL 8), and the Guided Portfolio: Midcap 111 (RL9). The abbreviation 'RL On' means the date a security was placed on a Recommended List. The abbreviation 'RL Off' means the date a security was removed from a Recommended List.

Conflicts Policy

RBC Capital Markets Policy for Managing Conflicts of Interest in Relation to Investment Research is available from us on request. To access our current policy, clients should refer to
https://www.rbccm.com/global/file-414164.pdf
or send a request to RBC CM Research Publishing, P.O. Box 50, 200 Bay Street, Royal Bank Plaza, 29th Floor, South Tower, Toronto, Ontario M5J 2W7. We reserve the right to amend or supplement this policy at any time.

Dissemination of Research and Short-Term Trade Ideas

RBC Capital Markets endeavors to make all reasonable efforts to provide research simultaneously to all eligible clients, having regard to local time zones in overseas jurisdictions. RBC Capital Markets' research is posted to our proprietary websites to ensure eligible clients receive coverage initiations and changes in ratings, targets and opinions in a timely manner. Additional distribution may be done by the sales personnel via email, fax or regular mail. Clients may also receive our research via third-party vendors. Please contact your investment advisor or institutional salesperson for more information regarding RBC Capital Markets' research. RBC Capital Markets also provides eligible clients with access to SPARC on its proprietary INSIGHT website. SPARC contains market color and commentary, and may also contain Short-Term Trade Ideas regarding the securities of subject companies discussed in this or other research reports. SPARC may be accessed via the following hyperlink: https://www.rbcinsight.com. A Short-Term Trade Idea reflects the research analyst's directional view regarding the price of the security of a subject company in the coming days or weeks, based on market and trading events. A Short-Term Trade Idea may differ from the price targets and/or recommendations in our published research reports reflecting the research analyst's views of the longer-term (one year) prospects of the subject company, as a result of the differing time horizons, methodologies and/or other factors. Thus, it is possible that the security of a subject company that is considered a long-term 'Sector Perform' or even an 'Underperform' might be a short-term buying opportunity as a result of temporary

selling pressure in the market; conversely, the security of a subject company that is rated a long-term 'Outperform' could be considered susceptible to a short-term downward price correction. Short-Term Trade Ideas are not ratings, nor are they part of any ratings system, and RBC Capital Markets generally does not intend, nor undertakes any obligation, to maintain or update Short-Term Trade Ideas. Short-Term Trade Ideas discussed in SPARC may not be suitable for all investors and have not been tailored to individual investor circumstances and objectives, and investors should make their own independent decisions regarding any Short-Term Trade Ideas discussed therein.

Analyst Certification

All of the views expressed in this report accurately reflect the personal views of the responsible analyst(s) about any and all of the subject securities or issuers. No part of the compensation of the responsible analyst(s) named herein is, or will be, directly or indirectly, related to the specific recommendations or views expressed by the responsible analyst(s) in this report.

Disclaimer

RBC Capital Markets is the business name used by certain branches and subsidiaries of the Royal Bank of Canada, including RBC Dominion Securities Inc., RBC Capital Markets, LLC, RBC Europe Limited, RBC Capital Markets (Hong Kong) Limited, Royal Bank of Canada, Hong Kong Branch and Royal Bank of Canada, Sydney Branch. Event

Fortis reported Q4/11 results.

Investment Opinion

- **Q4/11 Results Slightly Short of Expectations.** Normalized Q4/11 EPS was $0.46, compared to our estimate of $0.49 and $0.49 in Q4/10. The core Canadian Regulated Utilities segment was in line with expectations with the shortfall coming from the utilities in the Caribbean and the Properties division.
- **Utility Spending Continues to Drive the Organic Growth Story.** After spending $900 million to grow rate base in its Canadian regulated utilities in 2011, Fortis expects to spend a similar amount in 2012 as part of the 5-year $5.5 billion capex plan with almost 90% directed to the utilities in Canada.
- **Nothing New on Potential U.S. Acquisitions.** The directional strategy of trying to grow in the U.S. has not changed, but there is nothing to update on strategy or likelihood of an acquisition coming to fruition. We continue to expect management to exercise patience and discipline given this strategy has existed for several years with Fortis walking away from various targets, some which have been high profile, given high valuations.
- **Modestly Reducing Estimates to Primarily Reflect Headwinds in the Caribbean and Properties.** Our new 2012 and 2013 EPS estimates are $1.76 and $1.87, respectively (down from $1.81 and $1.91, respectively). The estimates for the core Canadian Regulated Utilities remain largely unchanged. We would note that our forecast does not include any impact from a possible reduction in ROE for the B.C.-based utilities given the pending review by the BCUC. We estimate that a 50 basis point change in allowed ROE would impact EPS by roughly $0.05/share.
- **Valuation.** Our price target of $34.00 (unchanged) is based on forward P/E of 18.0x 2013E EPS. Our selected P/E multiple is at the upper end of the five-year range, reflecting the low interest rate environment, good growth from the core Canadian regulated utilities, and the Waneta Dam expansion, which will not contribute to earnings until 2015.

Priced as of prior trading day's market close, EST (unless otherwise noted).

For Required Non-U.S. Analyst and Conflicts Disclosures, see page 5.

Q4/11 Results Slightly Lower-Than-Expected

Fortis' Q4/11 normalized EPS was $0.46 compared to our estimate of $0.49 and $0.49 in Q4/10. The lower-than-expected results were primarily driven by Caribbean Regulated Utilities ($0.02/share) and Fortis Properties ($0.02/share). All of the other segments were within +/- $1 million of our estimate. A table showing the segment earnings compared to our estimates is set out in Exhibit 1.

Exhibit 1: Normalized Earnings (In $MM except per share figures)

Source: Company reports; RBC Capital Markets estimates

Highlights of the Quarter and Outlook

- **Regulatory Reviews on ROE: One Down, Two to Go.** With the Alberta Utilities Commission (AUC) modestly reducing the allowed ROE to 8.75% (from 9.00%), the focus shifts to the British Columbia Utilities Commission (BCUC), which will review allowed ROEs and capital structures this year. Further, the Newfoundland and Labrador Board of Commissioners of Public Utilities provided relief on the 2012 ROE by suspending the formula and maintaining the 8.38% ROE (it would have dropped to 7.85%) with a full cost of capital review also likely to occur this year. We estimate that a 50 basis point change in allowed ROE in B.C. would impact EPS by roughly $0.05/share. A similar change in Newfoundland and Labrador would impact EPS by about $0.01/share.

- **Government's Belize Valuation Significantly Lower-Than-Expected.** During Q4/11, Fortis commissioned an independent valuation of its investment in Belize Electricity Limited (BEL) and submitted a claim for compensation to the Government of Belize (GOB). In response to Fortis' claim, the GOB also commissioned an independent valuation of BEL, resulting in a significantly lower fair value than was estimated by the Fortis valuation. The company is pursuing alternative options for obtaining fair compensation from the GOB.

- **5-year Capex Plan Continues To Remain Strong.** The company's updated 5-year capex plan through 2016 has not significantly changed from the 2011 plan. In summary, over the next five years (2012 to 2016), Fortis' planned capex is expected to approximate $5.5 billion. The majority of Fortis' planned capital investment is in Canadian regulated electric utilities (approximately 64%) and Canadian regulated gas utilities (approximately 23%), subject to regulatory approval.

- **$244 Million Invested To Date In The Waneta Dam Expansion.** Construction work continues on the $900 million Waneta Expansion, a 335 MW hydro project in B.C. that is expected to be in service in the spring of 2015. The project is on schedule and budget, with approximately $244 million invested since construction started in late 2010. With a controlling interest of 51%, Fortis will operate and maintain the facility, which will sell energy and capacity to BC Hydro and FortisBC Electric under 40-year power sales contracts.

- **Mount Hayes Storage Facility Brought On-Line In Late 2011.** The 1.5 billion-cubic foot LNG storage facility, located on Vancouver Island, was completed during Q2/11 and brought on-line in late 2011. The project costs were approximately $212 million and are included in FortisBC Energy's rate base (Vancouver Island).
- **Customer Care Enhancement Project in Service in January 2012.** The $110 million project at FortisBC Energy was put into service in January 2012. The company estimates that approximately $30 million of the project costs will be incurred in H1/12, as they relate to final contractor payments. Total costs for the project are expected to come in under budget.

Modestly Reducing Estimates to Reflect Headwinds in Caribbean and Properties

We have slightly reduced our 2012 and 2013 EPS estimates $1.76 and $1.87, respectively (from $1.81 and $1.91, respectively). The estimates for the core Canadian Regulated Utilities remain largely unchanged. We would note that our forecast does not include any impact from a reduction in ROE for the B.C.-based utilities. We estimate that a 50 basis point change in allowed ROE would impact EPS by roughly $0.05/share. Due to our lower EPS forecast, we have also modified our dividend estimate for 2013 to an annual increase of $0.06/share (down from $0.08/share). Our revised estimates are set out in Exhibit 2.

Source: Company reports; RBC Capital Markets estimates

Valuation

Our price target of $34.00 is based on a forward P/E of 18.0x 2013E EPS. Our selected P/E multiple is at the upper end of the five-year range, reflecting the low interest rate environment, good growth from the core Canadian regulated utilities, and the Waneta Dam expansion, which will not contribute to earnings until 2015.

Price Target Impediment

The political environment in Belize, the risk of punitive regulatory decisions, economic/tourism conditions in its service territories, operational or financial issues at newly acquired businesses, and acquisitions or projects that fail to gain the confidence of investors may have implications for our price target.

Company Description

Fortis Inc. is a utility holding company for Newfoundland Power, FortisAlberta, FortisBC, Terasen Inc., Maritime Electric, Canadian Niagara Power, Cornwall Electric, BECOL, and two electric utilities in the Turks and Caicos. It also holds a 100% interest in Fortis Properties and a 59.5% interest in Caribbean Utilities.

RBC Capital Markets has provided Fortis Inc. with investment banking services in the past 12 months.

RBC Capital Markets has provided Fortis Inc. with non-investment banking securities-related services in the past 12 months.

RBC Capital Markets has provided Fortis Inc. with non-securities services in the past 12 months.

The author is employed by RBC Dominion Securities Inc., a securities broker-dealer with principal offices located in Toronto, Canada.

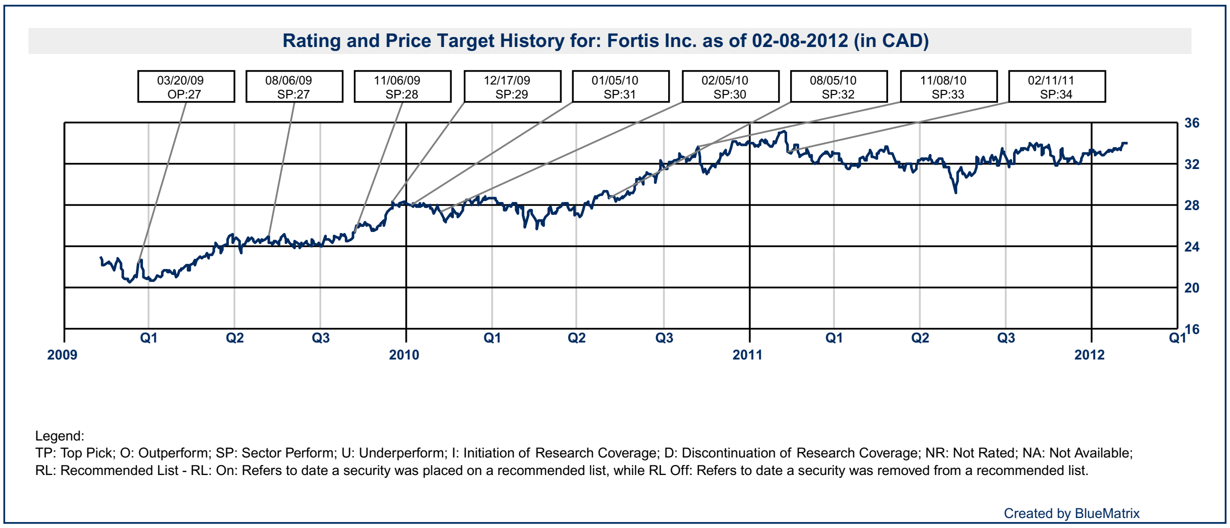
Explanation of RBC Capital Markets Equity Rating System

An analyst's 'sector' is the universe of companies for which the analyst provides research coverage. Accordingly, the rating assigned to a particular stock represents solely the analyst's view of how that stock will perform over the next 12 months relative to the analyst's sector average.
Ratings
Top Pick (TP): Represents analyst's best idea in the sector; expected to provide significant absolute total return over 12 months with a favorable risk-reward ratio.
Outperform (O): Expected to materially outperform sector average over 12 months.
Sector Perform (SP): Returns expected to be in line with sector average over 12 months.
Underperform (U): Returns expected to be materially below sector average over 12 months.
Risk Qualifiers (any of the following criteria may be present):
Average Risk (Avg): Volatility and risk expected to be comparable to sector; average revenue and earnings predictability; no significant cash flow/financing concerns over coming 12-24 months; fairly liquid.
Above Average Risk (AA): Volatility and risk expected to be above sector; below average revenue and earnings predictability; may not be suitable for a significant class of individual equity investors; may have negative cash flow; low market cap or float.
Speculative (Spec): Risk consistent with venture capital; low public float; potential balance sheet concerns; risk of being delisted.

Distribution of Ratings

For the purpose of ratings distributions, regulatory rules require member firms to assign ratings to one of three rating categories - Buy, Hold/Neutral, or Sell - regardless of a firm's own rating categories. Although RBC Capital Markets' ratings of Top Pick/Outperform, Sector Perform and Underperform most closely correspond to Buy, Hold/Neutral and Sell, respectively, the meanings are not the same because our ratings are determined on a relative basis (as described above).

Distribution of Ratings RBC Capital Markets, Equity Research			Investment Banking Serv./Past 12 Mos.	
Rating	Count	Percent	Count	Percent
BUY[TP/O]	774	51.90	224	28.94
HOLD[SP]	648	43.40	146	22.53
SELL[U]	71	4.80	5	7.04



References to a Recommended List in the recommendation history chart may include one or more recommended lists or model portfolios maintained by a business unit of the Wealth Management Division of RBC Capital Markets, LLC. These Recommended Lists include a former list called the Prime Opportunity List (RL 3), a former list called the Private Client Prime Portfolio (RL 4), the Guided Portfolio: Prime Income (RL 6), the Guided Portfolio: Large Cap (RL 7), Guided Portfolio: Dividend Growth (RL 8), the Guided Portfolio: Midcap 111 (RL9), and the Guided Portfolio: ADR (RL 10). The abbreviation 'RL On' means the date a security was placed on a Recommended List. The abbreviation 'RL Off' means the date a security was removed from a Recommended List.

Conflicts Policy

RBC Capital Markets Policy for Managing Conflicts of Interest in Relation to Investment Research is available from us on request. To access our current policy, clients should refer to
https://www.rbccm.com/global/file-414164.pdf
or send a request to RBC CM Research Publishing, P.O. Box 50, 200 Bay Street, Royal Bank Plaza, 29th Floor, South Tower, Toronto, Ontario M5J 2W7. We reserve the right to amend or supplement this policy at any time.

Dissemination of Research and Short-Term Trade Ideas

RBC Capital Markets endeavors to make all reasonable efforts to provide research simultaneously to all eligible clients, having regard to local time zones in overseas jurisdictions. RBC Capital Markets' research is posted to our proprietary websites to ensure eligible clients receive coverage initiations and changes in ratings, targets and opinions in a timely manner. Additional distribution may be done by the sales personnel via email, fax or regular mail. Clients may also receive our research via third-party vendors. Please contact your investment advisor or institutional salesperson for more information regarding RBC Capital Markets' research. RBC Capital Markets also provides eligible clients with access to SPARC on its proprietary INSIGHT website. SPARC contains market color and commentary, and may also contain Short-Term Trade Ideas regarding the securities of subject companies discussed in this or other research reports. SPARC may be accessed via the following hyperlink: https://www.rbcinsight.com. A Short-Term Trade Idea reflects the research analyst's directional view regarding the price of the security of a subject company in the coming days or weeks, based on market and trading events. A Short-Term Trade Idea may differ from the price targets and/or recommendations in our published research reports reflecting the research analyst's views of the longer-term (one year) prospects of the subject company, as a result of the differing time horizons, methodologies and/or other factors. Thus, it is possible that the security of a subject company that is considered a long-term 'Sector Perform' or even an 'Underperform' might be a short-term buying opportunity as a result of temporary

selling pressure in the market; conversely, the security of a subject company that is rated a long-term 'Outperform' could be considered susceptible to a short-term downward price correction. Short-Term Trade Ideas are not ratings, nor are they part of any ratings system, and RBC Capital Markets generally does not intend, nor undertakes any obligation, to maintain or update Short-Term Trade Ideas. Short-Term Trade Ideas discussed in SPARC may not be suitable for all investors and have not been tailored to individual investor circumstances and objectives, and investors should make their own independent decisions regarding any Short-Term Trade Ideas discussed therein.

Analyst Certification

All of the views expressed in this report accurately reflect the personal views of the responsible analyst(s) about any and all of the subject securities or issuers. No part of the compensation of the responsible analyst(s) named herein is, or will be, directly or indirectly, related to the specific recommendations or views expressed by the responsible analyst(s) in this report.

Disclaimer

RBC Capital Markets is the business name used by certain branches and subsidiaries of the Royal Bank of Canada, including RBC Dominion Securities Inc., RBC Capital Markets, LLC, RBC Europe Limited, RBC Capital Markets (Hong Kong) Limited, Royal Bank of Canada, Hong Kong Branch and Royal Bank of Canada, Sydney Branch. The information contained in this report has been compiled by RBC Capital Markets from sources believed to be reliable, but no representation or warranty, express or implied, is made by Royal Bank of Canada, RBC Capital Markets, its affiliates or any other person as to its accuracy, completeness or correctness. All opinions and estimates contained in this report constitute RBC Capital Markets' judgement as of the date of this report, are subject to change without notice and are provided in good faith but without legal responsibility. Nothing in this report constitutes legal, accounting or tax advice or individually tailored investment advice. This material is prepared for general circulation to clients and has been prepared without regard to the individual financial circumstances and objectives of persons who receive it. The investments or services contained in this report may not be suitable for you and it is recommended that you consult an independent investment advisor if you are in doubt about the suitability of such investments or services. This report is not an offer to sell or a solicitation of an offer to buy any securities. Past performance is not a guide to future performance, future returns are not guaranteed, and a loss of original capital may occur. RBC Capital Markets research analyst compensation is based in part on the overall profitability of RBC Capital Markets, which includes profits attributable to investment banking revenues. Every province in Canada, state in the U.S., and most countries throughout the world have their own laws regulating the types of securities and other investment products which may be offered to their residents, as well as the process for doing so. As a result, the securities discussed in this report may not be eligible for sale in some jurisdictions. This report is not, and under no circumstances should be construed as, a solicitation to act as securities broker or dealer in any jurisdiction by any person or company that is not legally permitted to carry on the business of a securities broker or dealer in that jurisdiction. To the full extent permitted by law neither RBC Capital Markets nor any of its affiliates, nor any other person, accepts any liability whatsoever for any direct or consequential loss arising from any use of this report or the information contained herein. No matter contained in this document may be reproduced or copied by any means without the prior consent of RBC Capital Markets.

Additional information is available on request.

To U.S. Residents:
This publication has been approved by RBC Capital Markets, LLC (member FINRA, NYSE, SIPC), which is a U.S. registered broker-dealer and which accepts responsibility for this report and its dissemination in the United States. Any U.S. recipient of this report that is not a registered broker-dealer or a bank acting in a broker or dealer capacity and that wishes further information regarding, or to effect any transaction in, any of the securities discussed in this report, should contact and place orders with RBC Capital Markets, LLC.

To Canadian Residents:
This publication has been approved by RBC Dominion Securities Inc.(member IIROC). Any Canadian recipient of this report that is not a Designated Institution in Ontario, an Accredited Investor in British Columbia or Alberta or a Sophisticated Purchaser in Quebec (or similar permitted purchaser in any other province) and that wishes further information regarding, or to effect any transaction in, any of the securities discussed in this report should contact and place orders with RBC Dominion Securities Inc., which, without in any way limiting the foregoing, accepts responsibility for this report and its dissemination in Canada.

To U.K. Residents:
This publication has been approved by RBC Europe Limited ('RBCEL') which is authorized and regulated by Financial Services Authority ('FSA'), in connection with its distribution in the United Kingdom. This material is not for general distribution in the United Kingdom to retail clients, as defined under the rules of the FSA. However, targeted distribution may be made to selected retail clients of RBC and its affiliates. RBCEL accepts responsibility for this report and its dissemination in the United Kingdom.

To Persons Receiving This Advice in Australia:

All values in CAD unless otherwise noted.

Fortis Inc. (TSX: FTS; 32.85)

Agrees to Acquire U.S. Regulated Utility

Sector Perform
Average Risk

Impact

Modestly Positive

First Impression

- **Acquires CH Energy Group for US$1.5 Billion.** Fortis has entered into an agreement to acquire CH Energy Group (NYSE: CHG, US$58.77; not rated) for an aggregate purchase price of approximately US$1.5 billion (including US$500 million of debt). CH Energy's main business segment is a regulated transmission and distribution utility in New York State (97% of net income). CH Energy also owns and operates a non-regulated fuel delivery business.
- **Purchase Price Represents 10.5% Premium.** The US$65/share purchase price represents a 10.5% premium above CHG's most recent closing price. We note that the acquisition is subject to shareholder and other regulatory approvals including, the New York Public Service Commission and the Federal Energy Regulatory Commission.
- **Transaction Expected to Be Immediately Accretive to EPS.** Fortis stated that it expects the acquisition to be immediately accretive to EPS excluding one-time transaction costs. The total assets of Fortis are expected to increase by approximately 16% to $17 billion following the completion of the transaction.
- **Initial Financing Will Be the Credit Facility.** Fortis will use its multi-year committed credit facility to finance the acquisition in the short term. However, we note that any need for common equity would be reduced by the $341 million equity issuance in mid-2011 with proceeds that were partly intended to finance the CVPS acquisition that did not proceed.
- **Fast Growing Utility.** Fortis expects annual capital expenditures at Central Hudson to exceed US$100 million on average through 2016. The increase in rate base should drive above-average EPS growth.
- **Low Risk Utility.** Central Hudson operates under cost-of-service regulation with a framework that provides full recovery and deferral provisions for pension and fuel costs. Furthermore, rates are de-coupled, which provides increased protection against changes in customer usage.
- **Attractive ROE for Now.** Central Hudson's current rates having been established using a 10% return on equity and a 48% equity thickness for three years beginning on July 1, 2010. We note that ROEs in New York have recently been pegged below 9.5%.
- **Overall, We View the Transaction as a Modest Positive.** Similar to our thoughts on the CVPS approach, we view the CH Energy transaction as a modest positive as: (1) it is a smaller transaction that can help prove-up the U.S. expansion strategy; (2) the utility is fairly close geographically to Fortis' utilities in Eastern Canada; (3) Central Hudson is geographically close to other potential utility targets, particularly those owned by European companies; and (4) the transaction is expected to be immediately accretive to EPS.

Priced as of prior trading day's market close, EST (unless otherwise noted).

COMPANY UPDATE | COMMENT

FEBRUARY 22, 2012

Fortis Inc. (TSX: FTS)

Fortis Loves New York

Sector Perform
Average Risk

Price:	32.38	**Price Target:**	34.00
		Implied All-In Return:	9%
Shares O/S (MM):	189.0	**Market Cap (MM):**	6,120
Dividend:	1.20	**Yield:**	3.7%
Float (MM):	189.0		
Debt to Cap:	55%		

Event

Fortis agreed to acquire CH Energy, which owns a New York utility, for US$1.5 billion (includes US$500 million of debt).

Investment Opinion

- **Strategic and Accretive.** Similar to the CVPS approach, we view the CH Energy transaction as a modest positive as: (1) it is a smaller transaction that can help prove-up the U.S. expansion strategy; (2) Central Hudson is in New York State, which is where other potential utility targets are (particularly those held by European companies); and (3) the transaction is expected to be immediately accretive to EPS, which should increase over time due to expected 6% to 7% annual rate base growth through 2016.
- **Should Be EPS Accretive Regardless of ROE Outcome.** Our analysis in Exhibit 1 (on page 2) indicates that the acquisition should be mildly accretive to EPS even if the allowed ROE declines toward 9% (from 10%) as part of the upcoming rate case. Central Hudson's rate decision in mid-2010 runs through mid-2013 and includes an ROE of 10%. However, a rate decision for Orange & Rockland in mid-2011 pegged the ROE at 9.2%.
- **Equity Could Be Issued in Mid/Late 2012.** Fortis has the ability to fund the transaction using its credit facilities. At a minimum, the company will probably wait until the outcome of the CH Energy shareholder vote (likely summer 2012) before moving forward on financing. We have assumed that $500 million of common shares are issued in our analysis.
- **Feels Like Home: New York State Regulation a Lot Like Canada.** New York State regulation has many similarities to the low-risk, cost-of-service framework prevalent in Canada, including those for Fortis' existing utility assets. Specifically, fuel pass-through mechanisms, rate de-coupling (to protect against declines in customer usage), and the use of deferral accounts are part of Central Hudson's regulated framework.
- **Increasing 2013 Estimate.** Assuming the transaction closes in Q1/13, we have increased our 2013 EPS estimate to $1.89 (from $1.87). Our revised estimate assumes that the ROE in mid-2013 declines to 9.25% (from 10%), which is more in line with a recent ROE decision.
- **Valuation: No Change in Price Target.** Reflecting the modest expected accretion, we have left our $34.00/share price target unchanged. If the ultimate ROE decision for Central Hudson is closer to 10%, we see roughly $1/share of upside.

Priced as of prior trading day's market close, EST (unless otherwise noted).

For Required Non-U.S. Analyst and Conflicts Disclosures, see page 6.

CH Energy Acquisition Slightly Accretive

Similar to the CVPS transaction, we view the CH Energy acquisition as a modest positive for the stock for the following reasons:

(1) Relatively Small Size Allows Fortis to Test U.S. Waters. Although the acquisition is larger than the CVPS proposed transaction, we believe that the CH Energy acquisition at roughly US$1.5 billion enterprise value is a more manageable size than the US$3 billion to US$5 billion transaction range that Fortis has previously discussed. Since we believe that the market is cautious on the U.S. acquisition strategy, the CH Energy acquisition should allow the company to prove to the market that it can navigate U.S. state regulation.

(2) Good Fit Geographically. Central Hudson is in New York State, a state where there is the potential for future utility acquisitions (particularly from European owners). Furthermore, New York is relatively close geographically to Fortis' eastern Canadian utility assets.

(3) Expected to Be Accretive to EPS Regardless of the ROE Scenario. As shown in Exhibit 1, we expect the transaction to contribute $0.02/share to $0.04/share to annual EPS, depending on whether in the upcoming rate case the allowed ROE declines toward 9% (from 10%). We have set out a sensitivity analysis in Exhibit 2, which shows that under a range of ROEs and equity pricing, the transaction is expected to be accretive to EPS regardless of the assumption.

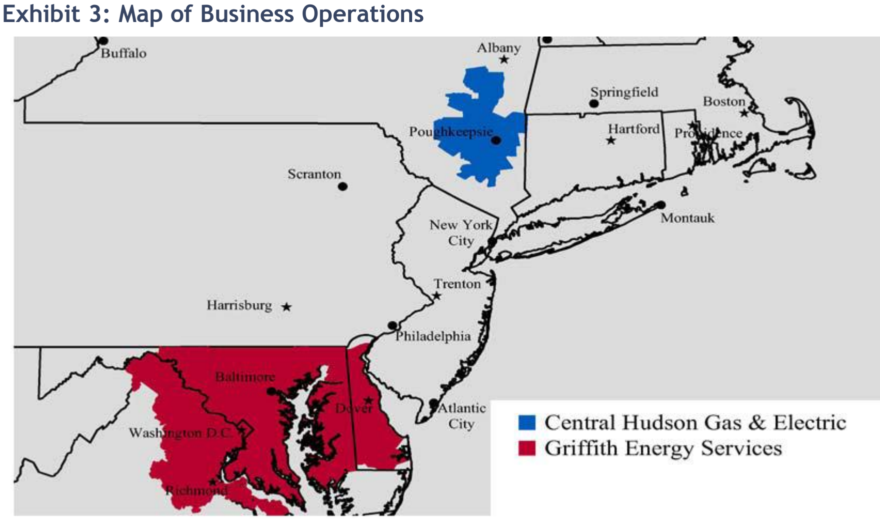
Transaction Mechanics

- **Purchase Price.** Fortis entered into an agreement to acquire CH Energy Group (NYSE: CHG; US$66.22; not rated) for US$65.00 in cash. The total purchase price is an approximately 10.5% premium to the previous close.
- **Transaction Approvals and Timing.** The transaction requires shareholder approval (meeting in summer of 2012) and regulatory approvals including the New York Public Service Commission (NYPSC), the Federal Regulatory Energy Commission (FERC), and the expiration of the waiting period under the Hart-Scott-Rodino (HSR) Act. We do not expect FERC or HSR approval to be an issue. However, for the NYPSC, Fortis must demonstrate a net tangible benefit to rate payers, and although no specifics were given, it appears that Fortis may have some tools at its discretion to help deliver value to rate payers without a material change in earnings. Fortis expects to close the acquisition within 12 months.
- **Financing.** The company expects to use its credit facilities in the short term, although we believe permanent financing will come in the form of common equity, additional debt, and potentially preferred shares. In terms of the timing of common equity, it appears that Fortis will wait at least until shareholder approval before reviewing the timing of its equity requirements.

Overview of CH Energy

- **Primarily Acquiring a Single-State, Regulated Electric and Gas Transmission & Distribution Business.** CH Energy's main business segment is Central Hudson Gas & Electric Corporation (Central Hudson), a regulated transmission and distribution utility in New York State (97% of net income) serving 300,000 electric and 75,000 natural gas customers. CH Energy also owns and operates a non-regulated fuel delivery business (Griffith Energy Services) with this business contributing only about 3% to annual earnings.
- **Fast-Growing Utility.** Fortis expects annual capital expenditures at Central Hudson to exceed US$100 million on average through 2016. The increase in rate base should be about 6% to 7% per year, which will help drive attractive EPS growth.
- **Capital Structure and ROE.** Central Hudson's current rates were established using a 10% return on equity and a 48% equity thickness for three years beginning on July 1, 2010. We note that ROEs in New York have recently been pegged below 9.5%.

Exhibit 3: Map of Business Operations



Source: Company reports; RBC Capital Markets

2013 EPS Estimate Increased

Assuming the transaction closes in Q1/13, we have increased our 2013 EPS estimate to $1.89 (from $1.87). Our revised estimate assumes that the ROE in mid-2013 declines to 9.25% (from 10%), which is more in line with a recent ROE decision in New York for Orange & Rockland, another utility in the state. Our revised estimates are set out in Exhibit 4.

Valuation

Our price target of $34.00 is based on a forward P/E of 18.0x 2013E EPS. Our selected P/E multiple is at the upper end of the five-year range, reflecting the low interest rate environment, good growth from the core Canadian regulated utilities, and the Waneta Dam expansion, which will not contribute to earnings until 2015.

Price Target Impediment

The political environment in Belize, the risk of punitive regulatory decisions, economic/tourism conditions in its service territories, operational or financial issues at newly acquired businesses, and acquisitions or projects that fail to gain the confidence of investors may have implications for our price target.

Company Description

Fortis Inc. is a utility holding company for Newfoundland Power, FortisAlberta, FortisBC, Terasen Inc., Maritime Electric, Canadian Niagara Power, Cornwall Electric, BECOL, and two electric utilities in the Turks and Caicos. It also holds a 100% interest in Fortis Properties and a 59.5% interest in Caribbean Utilities.

The analyst(s) responsible for preparing this research report received compensation that is based upon various factors, including total revenues of the member companies of RBC Capital Markets and its affiliates, a portion of which are or have been generated by investment banking activities of the member companies of RBC Capital Markets and its affiliates.

A member company of RBC Capital Markets or one of its affiliates managed or co-managed a public offering of securities for Fortis Inc. in the past 12 months.

A member company of RBC Capital Markets or one of its affiliates received compensation for investment banking services from Fortis Inc. in the past 12 months.

Royal Bank of Canada, together with its affiliates, beneficially owns 1 percent or more of a class of common equity securities of Fortis Inc..

A member company of RBC Capital Markets or one of its affiliates received compensation for products or services other than investment banking services from Fortis Inc. during the past 12 months. During this time, a member company of RBC Capital Markets or one of its affiliates provided non-investment banking securities-related services to Fortis Inc..

A member company of RBC Capital Markets or one of its affiliates received compensation for products or services other than investment banking services from Fortis Inc. during the past 12 months. During this time, a member company of RBC Capital Markets or one of its affiliates provided non-securities services to Fortis Inc..

RBC Capital Markets is currently providing Fortis Inc. with non-securities services.

RBC Capital Markets has provided Fortis Inc. with investment banking services in the past 12 months.

RBC Capital Markets has provided Fortis Inc. with non-investment banking securities-related services in the past 12 months.

RBC Capital Markets has provided Fortis Inc. with non-securities services in the past 12 months.

The author is employed by RBC Dominion Securities Inc., a securities broker-dealer with principal offices located in Toronto, Canada.

Explanation of RBC Capital Markets Equity Rating System

An analyst's 'sector' is the universe of companies for which the analyst provides research coverage. Accordingly, the rating assigned to a particular stock represents solely the analyst's view of how that stock will perform over the next 12 months relative to the analyst's sector average.

Ratings

Top Pick (TP): Represents analyst's best idea in the sector; expected to provide significant absolute total return over 12 months with a favorable risk-reward ratio.

Outperform (O): Expected to materially outperform sector average over 12 months.

Sector Perform (SP): Returns expected to be in line with sector average over 12 months.

Underperform (U): Returns expected to be materially below sector average over 12 months.

Risk Qualifiers (any of the following criteria may be present):

Average Risk (Avg): Volatility and risk expected to be comparable to sector; average revenue and earnings predictability; no significant cash flow/financing concerns over coming 12-24 months; fairly liquid.

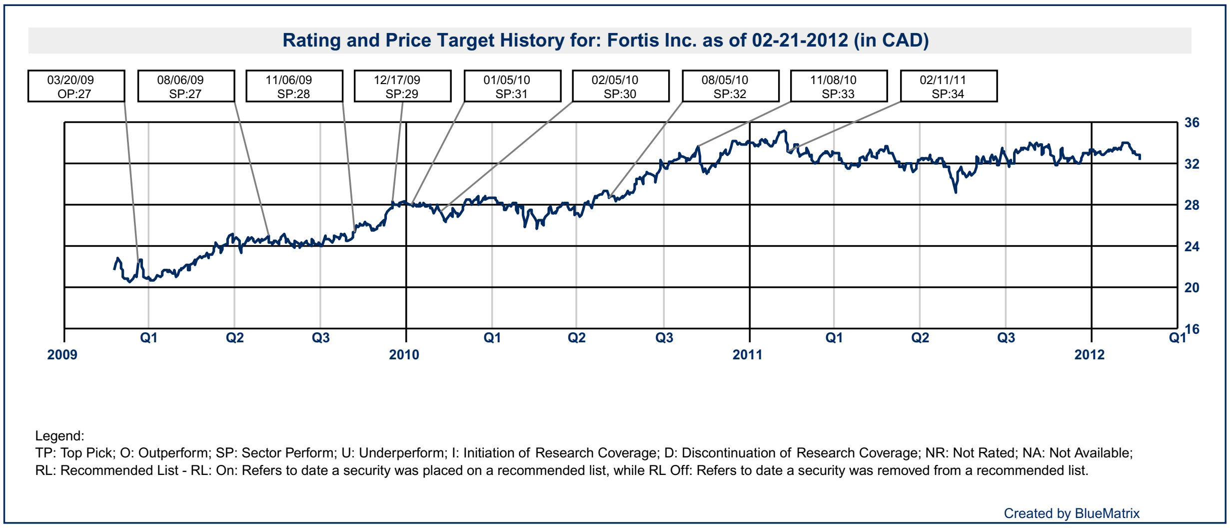
Above Average Risk (AA): Volatility and risk expected to be above sector; below average revenue and earnings predictability; may not be suitable for a significant class of individual equity investors; may have negative cash flow; low market cap or float.

Speculative (Spec): Risk consistent with venture capital; low public float; potential balance sheet concerns; risk of being delisted.

Distribution of Ratings

For the purpose of ratings distributions, regulatory rules require member firms to assign ratings to one of three rating categories - Buy, Hold/Neutral, or Sell - regardless of a firm's own rating categories. Although RBC Capital Markets' ratings of Top Pick/Outperform, Sector Perform and Underperform most closely correspond to Buy, Hold/Neutral and Sell, respectively, the meanings are not the same because our ratings are determined on a relative basis (as described above).

Distribution of Ratings RBC Capital Markets, Equity Research			Investment Banking Serv./Past 12 Mos.	
Rating	Count	Percent	Count	Percent
BUY[TP/O]	780	52.10	227	29.10
HOLD[SP]	648	43.20	148	22.84
SELL[U]	71	4.70	5	7.04



References to a Recommended List in the recommendation history chart may include one or more recommended lists or model portfolios maintained by a business unit of the Wealth Management Division of RBC Capital Markets, LLC. These Recommended Lists include a former list called the Prime Opportunity List (RL 3), a former list called the Private Client Prime Portfolio (RL 4), the Guided Portfolio: Prime Income (RL 6), the Guided Portfolio: Large Cap (RL 7), Guided Portfolio: Dividend Growth (RL 8), the Guided Portfolio: Midcap 111 (RL9), and the Guided Portfolio: ADR (RL 10). The abbreviation 'RL On' means the date a security was placed on a Recommended List. The abbreviation 'RL Off' means the date a security was removed from a Recommended List.

Conflicts Policy

RBC Capital Markets Policy for Managing Conflicts of Interest in Relation to Investment Research is available from us on request. To access our current policy, clients should refer to
https://www.rbccm.com/global/file-414164.pdf
or send a request to RBC CM Research Publishing, P.O. Box 50, 200 Bay Street, Royal Bank Plaza, 29th Floor, South Tower, Toronto, Ontario M5J 2W7. We reserve the right to amend or supplement this policy at any time.

Dissemination of Research and Short-Term Trade Ideas

RBC Capital Markets endeavors to make all reasonable efforts to provide research simultaneously to all eligible clients, having regard to local time zones in overseas jurisdictions. RBC Capital Markets' research is posted to our proprietary websites to ensure eligible clients receive coverage initiations and changes in ratings, targets and opinions in a timely manner. Additional distribution may be done by the sales personnel via email, fax or regular mail. Clients may also receive our research via third-party vendors. Please contact your investment advisor or institutional salesperson for more information regarding RBC Capital Markets' research. RBC Capital Markets also provides eligible clients with access to SPARC on its proprietary INSIGHT website. SPARC contains market color and commentary, and may also contain Short-Term Trade Ideas regarding the securities of subject companies discussed in this or other research reports. SPARC may be accessed via the following hyperlink: https://www.rbcinsight.com. A Short-Term Trade Idea reflects the research analyst's directional view regarding the price of the security of a subject company in the coming days or weeks, based on market and trading events. A Short-Term Trade Idea may differ from the price targets and/or recommendations in our published research reports reflecting the research analyst's views of the longer-term (one year) prospects of the subject company, as a result of the differing time horizons, methodologies and/or other factors. Thus, it is possible that the security of a subject company that is considered a long-term 'Sector Perform' or even an 'Underperform' might be a short-term buying opportunity as a result of temporary

selling pressure in the market; conversely, the security of a subject company that is rated a long-term 'Outperform' could be considered susceptible to a short-term downward price correction. Short-Term Trade Ideas are not ratings, nor are they part of any ratings system, and RBC Capital Markets generally does not intend, nor undertakes any obligation, to maintain or update Short-Term Trade Ideas. Short-Term Trade Ideas discussed in SPARC may not be suitable for all investors and have not been tailored to individual investor circumstances and objectives, and investors should make their own independent decisions regarding any Short-Term Trade Ideas discussed therein.

Analyst Certification

All of the views expressed in this report accurately reflect the personal views of the responsible analyst(s) about any and all of the subject securities or issuers. No part of the compensation of the responsible analyst(s) named herein is, or will be, directly or indirectly, related to the specific recommendations or views expressed by the responsible analyst(s) in this report.

Event

Fortis reported Q1/12 results; increasing price target to $35.00 (from $34.00).

Investment Opinion

- **Q1/12 Results Generally in Line with Expectations.** Q1/12 normalized EPS was $0.66 compared to our estimate of $0.65 and $0.66 (restated) in Q1/11. All of the segments were roughly in line with our expectations. Non-Regulated Generation and FortisBC Energy were slightly ahead of expectations, whereas FortisAlberta and FortisBC Electric were slightly below expectations.
- **Various Regulatory Decisions Pending.** The generic cost of capital proceeding in B.C. to determine the cost of capital (effective January 1, 2013) and a PBR rate-regulation initiative in Alberta are in progress. Further, a cost of capital application was filed for Newfoundland Power in March 2012. We estimate that a 50 basis point change in allowed ROE in B.C. would impact EPS by roughly $0.05/share, whereas a similar change in Newfoundland and Labrador would impact EPS by approximately $0.01/share.
- **CH Energy Acquisition Continuing to Progress.** On April 20, 2012, Fortis filed for state regulatory approval and management expects the CH Energy shareholder transaction approval vote to be scheduled in mid to late June. Management is targeting to close the transaction during Q4/12 or Q1/13.
- **Equity Issuance Expected During H2/12.** Management indicated that the company's financing plan to issue approximately $500 million in common equity has not materially changed. However, the equity issuance may be slightly higher, depending on discussions with the credit rating agencies, as management wants to maintain its A- credit rating. We believe that the company will not issue equity until it has greater visibility on shareholder and regulatory approval.
- **Valuation: Increasing Price Target to $35.00 (from $34.00).** Our new price target of $35.00 is based on a forward P/E of 18.0x applied to the 2013E EPS plus a present value of approximately $1.00/share for the Waneta Dam expansion that is expected to contribute to earnings in 2015. The P/E multiple is consistent with other Canadian utility valuations.

Priced as of prior trading day's market close, EST (unless otherwise noted).

For Required Non-U.S. Analyst and Conflicts Disclosures, see page 5.

Q1/12 Generally in Line with Expectations

Fortis' Q1/12 normalized EPS was $0.66 compared to our estimate of $0.65 and $0.66 (restated) in Q1/11. All of the segments were roughly in line with our expectations. Non-Regulated Generation (good hydrology in Belize) and FortisBC Energy (quarterly timing of operating costs) were slightly ahead of expectations, whereas FortisAlberta (lower consumption) and FortisBC Electric (higher-than-expected operating expenses) were slightly below expectations.

A table showing the segment earnings compared to our estimates is set out in Exhibit 1.

Exhibit 1: Normalized Earnings (In $MM except per share figures)

	Q1/12	RBC CM Q1/12E	Q1/11 (Restated)	Comments
Newfoundland Power	$7	$7	$6	
FortisOntario & Maritime Electric	7	7	6	
FortisBC Energy	82	79	75	Quarterly timing of operating costs
FortisAlberta	21	23	21	Lower-than-average consumption due to warm weather
FortisBC Electric	16	18	19	Higher operating expenses due to timing of expenditures
Regulated Utilities - Canadian	133	133	127	
Regulated Utilities - Caribbean	3	4	4	Higher-than-expected financing charges
Non-regulated - Fortis Generation	5	3	3	Good hydrology in Belize
Non-regulated - Fortis Properties	1	1	1	
Corporate	(17)	(18)	(19)

Average shares outstanding (MM)	189	189	175	
Normalization adjustments:				
CH Energy Transaction Costs	(4)		0	
	(4)		0	
Reported Earnings	$121		$116	

Source: Company reports; RBC Capital Markets estimates

Highlights of the Quarter and Outlook

- **Various Regulatory Decisions Received During the Quarter.** In April 2012, regulatory decisions were received for 2012/2013 customer gas delivery rates for FortisBC Energy and 2012 customer electricity distribution rates for FortisAlberta. A decision on the 2012/2013 customer electricity rates at FortisBC is expected in mid-2012.

- **Regulatory Processes Under Way for FortisBC, FortisAlberta and Newfoundland Power.** The generic cost of capital proceeding in British Columbia to determine the cost of capital as of January 1, 2013 (and an ROE automatic adjustment mechanism) is currently under way and a cost of capital application was filed by Newfoundland Power in March 2012. We estimate that a 50 basis point change in allowed ROE in B.C. would impact EPS by roughly $0.05/share, whereas a similar change in Newfoundland and Labrador would impact EPS by approximately $0.01/share. Lastly, the Alberta Utilities Commission is currently reviewing a PBR rate-regulation initiative.

- **Waneta Dam Expansion Continues to Progress.** Management indicated that the project is still on schedule and budget. Since construction started in late 2010, the company has invested approximately $290 million into the $900 million Waneta Expansion, a 335 MW hydro project in B.C. that is expected to be in service in the spring of 2015.

- **2012 Capex Plan Remains Unchanged.** Fortis' capital expenditure plan of $1.3 billion for 2012 is unchanged from Q4/11 guidance. Fortis spent approximately $229 million in capital expenditures during the quarter.

CH Energy Transaction Is Moving Along As Expected

- **CH Energy Acquisition Expected to Close by Q1/13.** In April 2012, Fortis filed for New York state regulatory approval, which management is confident it will receive. The CH Energy shareholder vote is expected to be scheduled for mid to late June. Management's target is for the transaction to close in Q4/12, but depending on the timing of approvals, the transaction could close in Q1/13. We note that our 2013 EPS estimates include a full year contribution from CH Energy, but a delay to Q1/13 would not have a material impact on our estimates.
- **CH Energy Financing Plans Virtually Unchanged.** Management indicated that the company still intends to issue approximately $500 million in common equity. However, management wants to ensure that the A- credit rating is maintained, and depending on discussions with the credit rating agencies, the equity issuance may be slightly higher.

Overall Estimates Remain Unchanged

We have made minor changes within the segments to our 2012 forecast, and since Q1/12 was generally in line with our estimate, we have left our overall EPS estimates unchanged through 2013. A summary of our segment forecast is set out in Exhibit 2.

Increasing Price Target to $35.00 (from $34.00)

We have increased our price target to $35.00 (from $34.00) to reflect a forward P/E of 18.0x (previously 17.5x) applied to the 2013 EPS estimate plus a present value of approximately $1.00/share for the Waneta Dam expansion (applying a 18.0x P/E to the estimated $0.06/share of EPS accretion on a present value basis). The P/E multiple of 18.0x is consistent with other Canadian utility valuations.

Valuation

Our price target of $35.00 is based on a forward P/E of 18.0x applied to the 2013E EPS plus a present value of approximately $1.00/share for the Waneta Dam expansion that is expected to contribute to earnings in 2015. The P/E multiple is consistent with other Canadian utility valuations.

Price Target Impediment

The political environment in Belize, the risk of punitive regulatory decisions, economic/tourism conditions in its service territories, operational or financial issues at newly acquired businesses, and acquisitions or projects that fail to gain the confidence of investors may have implications for our price target.

Company Description

Fortis Inc. is a utility holding company for Newfoundland Power, FortisAlberta, FortisBC, Terasen Inc., Maritime Electric, Canadian Niagara Power, Cornwall Electric, BECOL, and two electric utilities in the Turks and Caicos. It also holds a 100% interest in Fortis Properties and a 59.5% interest in Caribbean Utilities.

Required Disclosures

Non-U.S. Analyst Disclosure

Kelsey Roste and Danny Hung (i) are not registered/qualified as research analysts with the NYSE and/or FINRA and (ii) may not be associated persons of the RBC Capital Markets, LLC and therefore may not be subject to FINRA Rule 2711 and NYSE Rule 472 restrictions on communications with a subject company, public appearances and trading securities held by a research analyst account.

Conflicts Disclosures

The analyst(s) responsible for preparing this research report received compensation that is based upon various factors, including total revenues of the member companies of RBC Capital Markets and its affiliates, a portion of which are or have been generated by investment banking activities of the member companies of RBC Capital Markets and its affiliates.

A member company of RBC Capital Markets or one of its affiliates managed or co-managed a public offering of securities for Fortis Inc. in the past 12 months.

A member company of RBC Capital Markets or one of its affiliates received compensation for investment banking services from Fortis Inc. in the past 12 months.

Royal Bank of Canada, together with its affiliates, beneficially owns 1 percent or more of a class of common equity securities of Fortis Inc..

A member company of RBC Capital Markets or one of its affiliates received compensation for products or services other than investment banking services from Fortis Inc. during the past 12 months. During this time, a member company of RBC Capital Markets or one of its affiliates provided non-investment banking securities-related services to Fortis Inc..

A member company of RBC Capital Markets or one of its affiliates received compensation for products or services other than investment banking services from Fortis Inc. during the past 12 months. During this time, a member company of RBC Capital Markets or one of its affiliates provided non-securities services to Fortis Inc..

RBC Capital Markets is currently providing Fortis Inc. with non-investment banking securities-related services.

RBC Capital Markets is currently providing Fortis Inc. with non-securities services.

RBC Capital Markets has provided Fortis Inc. with investment banking services in the past 12 months.

RBC Capital Markets has provided Fortis Inc. with non-investment banking securities-related services in the past 12 months.

RBC Capital Markets has provided Fortis Inc. with non-securities services in the past 12 months.

Explanation of RBC Capital Markets Equity Rating System

An analyst's 'sector' is the universe of companies for which the analyst provides research coverage. Accordingly, the rating assigned to a particular stock represents solely the analyst's view of how that stock will perform over the next 12 months relative to the analyst's sector average.

Ratings

Top Pick (TP): Represents analyst's best idea in the sector; expected to provide significant absolute total return over 12 months with a favorable risk-reward ratio.

Outperform (O): Expected to materially outperform sector average over 12 months.

Sector Perform (SP): Returns expected to be in line with sector average over 12 months.

Underperform (U): Returns expected to be materially below sector average over 12 months.

Risk Qualifiers (any of the following criteria may be present):

Average Risk (Avg): Volatility and risk expected to be comparable to sector; average revenue and earnings predictability; no significant cash flow/financing concerns over coming 12-24 months; fairly liquid.

Above Average Risk (AA): Volatility and risk expected to be above sector; below average revenue and earnings predictability; may not be suitable for a significant class of individual equity investors; may have negative cash flow; low market cap or float.

Speculative (Spec): Risk consistent with venture capital; low public float; potential balance sheet concerns; risk of being delisted.

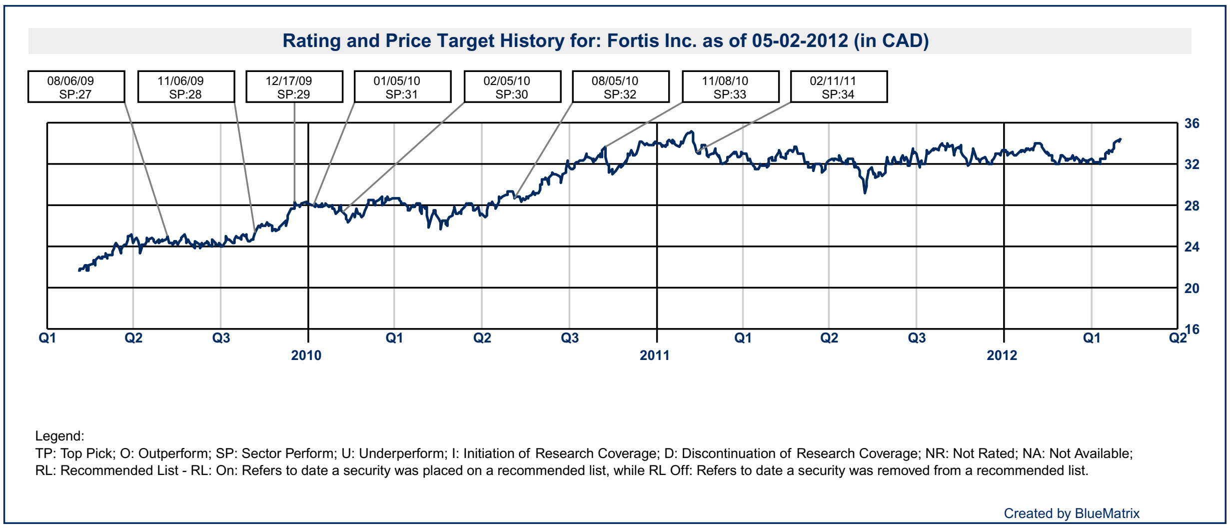
Distribution of Ratings

For the purpose of ratings distributions, regulatory rules require member firms to assign ratings to one of three rating categories - Buy, Hold/Neutral, or Sell - regardless of a firm's own rating categories. Although RBC Capital Markets' ratings of Top Pick/Outperform,

Sector Perform and Underperform most closely correspond to Buy, Hold/Neutral and Sell, respectively, the meanings are not the same because our ratings are determined on a relative basis (as described above).

Distribution of Ratings
RBC Capital Markets, Equity Research

			Investment Banking Serv./Past 12 Mos.	
Rating	Count	Percent	Count	Percent
BUY[TP/O]	769	51.64	226	29.39
HOLD[SP]	653	43.85	154	23.58
SELL[U]	67	4.50	3	4.48



References to a Recommended List in the recommendation history chart may include one or more recommended lists or model portfolios maintained by a business unit of the Wealth Management Division of RBC Capital Markets, LLC. These Recommended Lists include a former list called the Prime Opportunity List (RL 3), the Guided Portfolio: Prime Income (RL 6), the Guided Portfolio: Large Cap (RL 7), Guided Portfolio: Dividend Growth (RL 8), the Guided Portfolio: Midcap 111 (RL9), and the Guided Portfolio: ADR (RL 10). The abbreviation 'RL On' means the date a security was placed on a Recommended List. The abbreviation 'RL Off' means the date a security was removed from a Recommended List.

Conflicts Policy

RBC Capital Markets Policy for Managing Conflicts of Interest in Relation to Investment Research is available from us on request. To access our current policy, clients should refer to
https://www.rbccm.com/global/file-414164.pdf
or send a request to RBC CM Research Publishing, P.O. Box 50, 200 Bay Street, Royal Bank Plaza, 29th Floor, South Tower, Toronto, Ontario M5J 2W7. We reserve the right to amend or supplement this policy at any time.

Dissemination of Research and Short-Term Trade Ideas

RBC Capital Markets endeavors to make all reasonable efforts to provide research simultaneously to all eligible clients, having regard to local time zones in overseas jurisdictions. RBC Capital Markets' research is posted to our proprietary websites to ensure eligible clients receive coverage initiations and changes in ratings, targets and opinions in a timely manner. Additional distribution may be done by the sales personnel via email, fax or regular mail. Clients may also receive our research via third-party vendors. Please contact your investment advisor or institutional salesperson for more information regarding RBC Capital Markets' research. RBC Capital Markets also provides eligible clients with access to SPARC on its proprietary INSIGHT website. SPARC contains market color and commentary, and may also contain Short-Term Trade Ideas regarding the securities of subject companies discussed in this or other research reports. SPARC may be accessed via the following hyperlink: https://www.rbcinsight.com. A Short-Term Trade Idea reflects the research analyst's directional view regarding the price of the security of a subject company in the coming days or weeks, based on market and trading events. A Short-Term Trade Idea may differ from the price targets and/or recommendations in our published research reports reflecting the research analyst's views of the longer-term (one year) prospects of the subject company, as a result of the differing time horizons, methodologies and/or other factors. Thus, it is possible that the security of a subject company that is considered a long-term 'Sector Perform' or even an 'Underperform' might be a short-term buying opportunity as a result of temporary selling pressure in the market; conversely, the security of a subject company that is rated a long-term 'Outperform' could be considered susceptible to a short-term downward price correction. Short-Term Trade Ideas are not ratings, nor are they part of any ratings system, and RBC Capital Markets generally does not intend, nor undertakes any obligation, to maintain or update Short-Term Trade Ideas. Short-Term Trade Ideas discussed in SPARC may not be suitable for all investors and have not been tailored to individual investor circumstances and objectives, and investors should make their own independent decisions regarding any Short-Term Trade Ideas discussed therein.

Analyst Certification

COMPANY UPDATE | COMMENT

JUNE 18, 2012

Fortis Inc. (TSX: FTS)

In a New York State of Mind

Sector Perform
Average Risk

Price:	32.50	**Price Target:**	35.00
		Implied All-In Return:	11%
Shares O/S (MM):	189.3	**Market Cap (MM):**	6,152
Dividend:	1.20	**Yield:**	3.7%
Float (MM):	189.3		
Debt to Cap:	56%		

Event

We recently hosted investor meetings with Barry Perry, CFO of Fortis.

Investment Opinion

- **Central Hudson is Both Strategic and Accretive.** We continue to view the transaction as strategic, while delivering modest EPS accretion ($0.02/share). With a similar regulatory framework to Canada's low-risk provincial utility structures, Central Hudson is an attractive way for Fortis to enter the U.S. and demonstrate that its success with acquisitions in Canada can be applied to the U.S., particularly other utilities in New York that may come up for sale over the next several years.
- **A Big Week for the Central Hudson Transaction.** CH Energy's shareholders will vote on the takeover bid by Fortis on Tuesday, June 19. A nice positive last week was the support for the transaction from proxy firms ISS and Glass Lewis. A positive shareholder vote (50% plus one of all shareholders) will open the window for the roughly $600 million of common equity financing. The major hurdle following the shareholder vote is New York State Public Service Commission approval, which continues to progress well. The company anticipates closing the transaction by the end of Q1/13.
- **Good Progress on the Waneta Dam Expansion.** The company is making good progress on the $900 million Waneta Dam expansion project (51%-owned by Fortis) with both costs and timing slightly ahead of plan. The 335 MW hydro project is expected to be completed in the spring of 2015 and is underpinned by 40-year contracts.
- **An Attractive Total Return Story, Although We Would Wait for the Equity Issuance.** Based on expected regulated rate base growth along with the Waneta Dam expansion project, EPS growth should be in the mid-single digits and dividends are expected to grow at a similar rate with upside depending on acquisition activity. The expected total return profile is in the 10%-range (dividend yield 3.6%), which we see as attractive for yield-oriented investors seeking businesses with below average risk profiles. While we believe investors should look to accumulate shares on weakness, we would wait for the pending equity issuance to finance the CH Energy acquisition to build larger positions.
- **Valuation.** Our price target of $35.00 is based on a forward P/E of 18x applied to the 2013E EPS plus a present value of approximately $1.00/share for the Waneta Dam expansion.

Priced as of prior trading day's market close, EST (unless otherwise noted).

For Required Non-U.S. Analyst and Conflicts Disclosures, see page 6.

CH Energy Acquisition is Both Strategic and Accretive

- **A Low-Risk Way to Enter the U.S.** After over five years of patiently pursuing a U.S. regulated utility acquisition, we see CH Energy, which owns Central Hudson (electric transmission and distribution in New York), as the most strategic target of the utilities that Fortis has been reported to have pursued. Specifically, we like the low-risk regulatory framework that matches up very well with Canadian provincial regulation, the relatively small size of the transaction, the ability to demonstrate a relationship with the New York State Public Service Commission (NYSPSC) ahead of potential follow-on deals in the state.

- **Similar Regulatory Framework to Canadian Provincial Regulation.** As shown in Exhibit 1, we have reproduced a slide from Fortis' presentation that shows how Central Hudson's regulatory framework compares to Canadian provincial regulation. Specifically, we note that Central Hudson's framework matches up with FortisBC Energy (formerly Terasen Gas) and has some risk-mitigation features that other utilities owned by Fortis do not have.

Exhibit 1: Central Hudson's Regulatory Framework Matches Up Well With What Fortis' Investors Have Come to Expect

Notes:
(1) Majority of power requirements met through the utility's own generation and long-term fixed-price contracts.
(2) FortisBC Electric has requested energy supply cost trackers for 2012 and 2013, subject to regulatory approval.
(3) Distribution utility only. No commodity or purchased power exposure.
(4) Primarily has a defined contribution pension plan.
(5) ROE is for FortisBC Energy. The ROE for FortisBC Energy (Vancouver Island) and FortisBC Energy (Whistler) is 50 bps higher.

Source: Company reports; RBC Capital Markets

- **Forecast EPS Accretion Under a Range of Scenarios (Including a Lower Allowed ROE).** As shown in Exhibit 2 and Exhibit 3, our analysis indicates that the CH Energy acquisition should be modestly accretive to EPS under a range of scenarios including the cost of financing in addition to the potential for a lower allowed ROE. The most recent ROE decision from the NYSPSC was 9.5% (Orange and Rockland; June 2012).

Valuation

Our price target of $35.00 is based on a forward P/E of 18.0x applied to the 2013E EPS plus a present value of approximately $1.00/share for the Waneta Dam expansion that is expected to contribute to earnings in 2015. The P/E multiple is consistent with other Canadian utility valuations.

Price Target Impediment

The political environment in Belize, the risk of punitive regulatory decisions, economic/tourism conditions in its service territories, operational or financial issues at newly acquired businesses, and acquisitions or projects that fail to gain the confidence of investors may have implications for our price target.

Company Description

Fortis Inc. is a utility holding company for Newfoundland Power, FortisAlberta, FortisBC, Terasen Inc., Maritime Electric, Canadian Niagara Power, Cornwall Electric, BECOL, and two electric utilities in the Turks and Caicos. It also holds a 100% interest in Fortis Properties and a 59.5% interest in Caribbean Utilities.

Required Disclosures

Non-U.S. Analyst Disclosure

Kelsey Roste and Danny Hung (i) are not registered/qualified as research analysts with the NYSE and/or FINRA and (ii) may not be associated persons of the RBC Capital Markets, LLC and therefore may not be subject to FINRA Rule 2711 and NYSE Rule 472 restrictions on communications with a subject company, public appearances and trading securities held by a research analyst account.

Conflicts Disclosures

The analyst(s) responsible for preparing this research report received compensation that is based upon various factors, including total revenues of the member companies of RBC Capital Markets and its affiliates, a portion of which are or have been generated by investment banking activities of the member companies of RBC Capital Markets and its affiliates.

A member company of RBC Capital Markets or one of its affiliates received compensation for investment banking services from Fortis Inc. in the past 12 months.

Royal Bank of Canada, together with its affiliates, beneficially owns 1 percent or more of a class of common equity securities of Fortis Inc..

A member company of RBC Capital Markets or one of its affiliates received compensation for products or services other than investment banking services from Fortis Inc. during the past 12 months. During this time, a member company of RBC Capital Markets or one of its affiliates provided non-investment banking securities-related services to Fortis Inc..

A member company of RBC Capital Markets or one of its affiliates received compensation for products or services other than investment banking services from Fortis Inc. during the past 12 months. During this time, a member company of RBC Capital Markets or one of its affiliates provided non-securities services to Fortis Inc..

RBC Capital Markets is currently providing Fortis Inc. with non-securities services.

RBC Capital Markets has provided Fortis Inc. with investment banking services in the past 12 months.

RBC Capital Markets has provided Fortis Inc. with non-investment banking securities-related services in the past 12 months.

RBC Capital Markets has provided Fortis Inc. with non-securities services in the past 12 months.

The author is employed by RBC Dominion Securities Inc., a securities broker-dealer with principal offices located in Toronto, Canada.

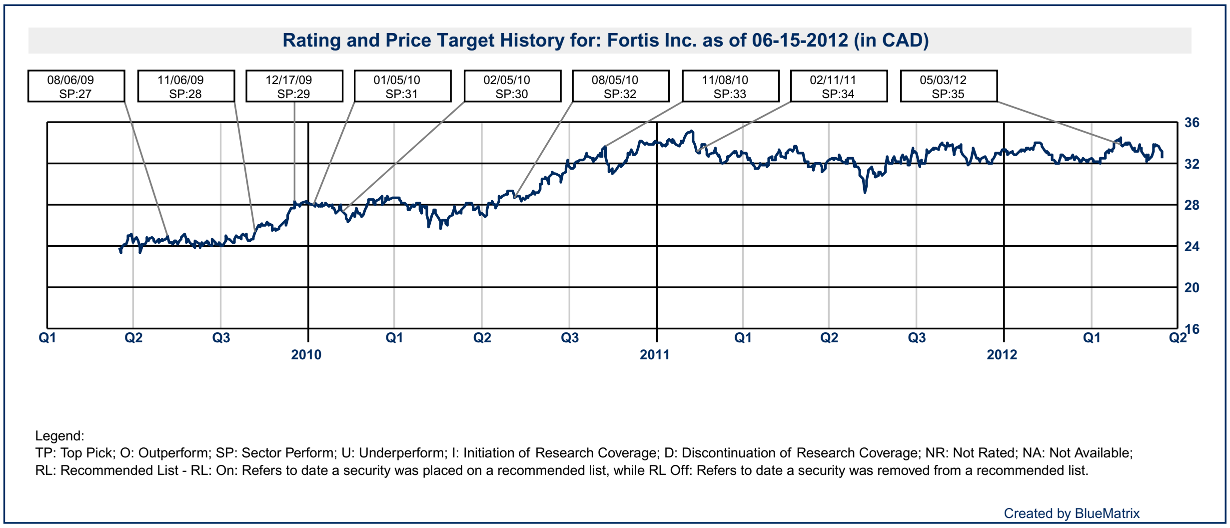
Explanation of RBC Capital Markets Equity Rating System

An analyst's 'sector' is the universe of companies for which the analyst provides research coverage. Accordingly, the rating assigned to a particular stock represents solely the analyst's view of how that stock will perform over the next 12 months relative to the analyst's sector average.
Ratings
Top Pick (TP): Represents analyst's best idea in the sector; expected to provide significant absolute total return over 12 months with a favorable risk-reward ratio.
Outperform (O): Expected to materially outperform sector average over 12 months.
Sector Perform (SP): Returns expected to be in line with sector average over 12 months.
Underperform (U): Returns expected to be materially below sector average over 12 months.
Risk Qualifiers (any of the following criteria may be present):
Average Risk (Avg): Volatility and risk expected to be comparable to sector; average revenue and earnings predictability; no significant cash flow/financing concerns over coming 12-24 months; fairly liquid.
Above Average Risk (AA): Volatility and risk expected to be above sector; below average revenue and earnings predictability; may not be suitable for a significant class of individual equity investors; may have negative cash flow; low market cap or float.
Speculative (Spec): Risk consistent with venture capital; low public float; potential balance sheet concerns; risk of being delisted.

Distribution of Ratings

For the purpose of ratings distributions, regulatory rules require member firms to assign ratings to one of three rating categories - Buy, Hold/Neutral, or Sell - regardless of a firm's own rating categories. Although RBC Capital Markets' ratings of Top Pick/Outperform, Sector Perform and Underperform most closely correspond to Buy, Hold/Neutral and Sell, respectively, the meanings are not the same because our ratings are determined on a relative basis (as described above).

Distribution of Ratings RBC Capital Markets, Equity Research			Investment Banking Serv./Past 12 Mos.	
Rating	Count	Percent	Count	Percent
BUY[TP/O]	782	52.23	230	29.41
HOLD[SP]	650	43.42	163	25.08
SELL[U]	65	4.34	2	3.08



References to a Recommended List in the recommendation history chart may include one or more recommended lists or model portfolios maintained by a business unit of the Wealth Management Division of RBC Capital Markets, LLC. These Recommended Lists include a former list called the Prime Opportunity List (RL 3), the Guided Portfolio: Prime Income (RL 6), the Guided Portfolio: Large Cap (RL 7), Guided Portfolio: Dividend Growth (RL 8), the Guided Portfolio: Midcap 111 (RL9), and the Guided Portfolio: ADR (RL 10). Conflicts Policy

RBC Capital Markets Policy for Managing Conflicts of Interest in Relation to Investment Research is available from us on request. To access our current policy, clients should refer to
https://www.rbccm.com/global/file-414164.pdf
or send a request to RBC CM Research Publishing, P.O. Box 50, 200 Bay Street, Royal Bank Plaza, 29th Floor, South Tower, Toronto, Ontario M5J 2W7. We reserve the right to amend or supplement this policy at any time.

Dissemination of Research and Short-Term Trade Ideas

RBC Capital Markets endeavors to make all reasonable efforts to provide research simultaneously to all eligible clients, having regard to local time zones in overseas jurisdictions. RBC Capital Markets' research is posted to our proprietary websites to ensure eligible clients receive coverage initiations and changes in ratings, targets and opinions in a timely manner. Additional distribution may be done by the sales personnel via email, fax or regular mail. Clients may also receive our research via third-party vendors. Please contact your investment advisor or institutional salesperson for more information regarding RBC Capital Markets' research. RBC Capital Markets also provides eligible clients with access to SPARC on its proprietary INSIGHT website. SPARC contains market color and commentary, and may also contain Short-Term Trade Ideas regarding the securities of subject companies discussed in this or other research reports. SPARC may be accessed via the following hyperlink: https://www.rbcinsight.com. A Short-Term Trade Idea reflects the research analyst's directional view regarding the price of the security of a subject company in the coming days or weeks, based on market and trading events. A Short-Term Trade Idea may differ from the price targets and/or recommendations in our published research reports reflecting the research analyst's views of the longer-term (one year) prospects of the subject company, as a result of the differing time horizons, methodologies and/or other factors. Thus, it is possible that the security of a subject company that is considered a long-term 'Sector Perform' or even an 'Underperform' might be a short-term buying opportunity as a result of temporary

selling pressure in the market; conversely, the security of a subject company that is rated a long-term 'Outperform' could be considered susceptible to a short-term downward price correction. Short-Term Trade Ideas are not ratings, nor are they part of any ratings system, and RBC Capital Markets generally does not intend, nor undertakes any obligation, to maintain or update Short-Term Trade Ideas. Short-Term Trade Ideas discussed in SPARC may not be suitable for all investors and have not been tailored to individual investor circumstances and objectives, and investors should make their own independent decisions regarding any Short-Term Trade Ideas discussed therein.

Analyst Certification

All of the views expressed in this report accurately reflect the personal views of the responsible analyst(s) about any and all of the subject securities or issuers. No part of the compensation of the responsible analyst(s) named herein is, or will be, directly or indirectly, related to the specific recommendations or views expressed by the responsible analyst(s) in this report.

Disclaimer

RBC Capital Markets is the business name used by certain branches and subsidiaries of the Royal Bank of Canada, including RBC Dominion Securities Inc., RBC Capital Markets, LLC, RBC Europe Limited, RBC Capital Markets (Hong Kong) Limited, Royal Bank of Canada, Hong Kong Branch and Royal Bank of Canada, Sydney Branch. Event

Fortis reported its Q2/12 results.

Investment Opinion

- **Q2/12 Results in Line with Expectations.** Fortis' Q2/12 normalized EPS was $0.33 compared to our estimate of $0.34 and $0.32 (restated) in Q2/11. Most of the segments were roughly in line with our expectations. We note that normalized EPS has been adjusted for offsetting one-time items (about $0.02/share of acquisition-related costs related to the CH Energy deal and about $0.02/share of positive adjustments related to Q1/12 booked at FortisAlberta).
- **Waneta Dam Expansion Continues to Make Good Progress.** The company is making good progress on the $900 million Waneta Dam expansion project (51%-owned by Fortis) with both costs and timing appearing to be slightly ahead of plan. The Waneta Expansion is a 335 MW hydro project in B.C. that is expected to be in service in the spring of 2015 and is underpinned by a 40-year contract with BC Hydro and FortisBC Electric.
- **CH Energy Shareholders Approved the Transaction.** In June 2012, the transaction received shareholder approval and regulatory approval from the Federal Energy Regulatory Commission and the Committee on Foreign Investment in the U.S. The New York State Public Service Commission is currently reviewing the application for approval of the transaction. The company expects to close the acquisition by the end of Q1/13 and we continue to view this transaction as strategic and modestly accretive to EPS in the first full year.
- **The B.C. Generic Cost of Capital Hearing the Last Major Decision on Allowed ROE.** Following decisions in Alberta and Newfoundland & Labrador, the remaining material ROE decision is in B.C. The oral hearings, if necessary, are not scheduled to begin until December 2012 and any changes to ROE will impact 2013 results. We estimate that a 50 basis point change in allowed ROE in B.C. would impact earnings by $0.05/share.
- **Valuation.** Our price target of $35.00 (unchanged) is based on a forward P/E of 18.0x applied to the 2013E EPS plus a present value of approximately $1.00/share for the Waneta Dam expansion that is expected to contribute to earnings in 2015.

Priced as of prior trading day's market close, EST (unless otherwise noted).

For Required Non-U.S. Analyst and Conflicts Disclosures, see page 5.

Q2/12 Generally in Line with Expectations

Fortis' Q2/12 normalized EPS was $0.33 compared to our estimate of $0.34 and $0.32 (restated) in Q2/11. Most of the segments were roughly in line with our expectations. FortisAlberta (higher-than-average consumption) was ahead of expectations, whereas FortisBC Energy (quarterly timing of operating costs) was slightly below expectations. We note that normalized EPS has been adjusted for offsetting one-time items (about $0.02/share of acquisition-related costs related to the CH Energy deal in the Corporate segment and about $0.02/share of positive adjustments related to Q1/12 at FortisAlberta).

A table showing the segment earnings compared to our estimates is set out in Exhibit 1.

Exhibit 1: Normalized Earnings (In $MM except per share figures)

	Q2/12	RBC CM Q2/12E	Q2/11 (Restated)	Comments
Newfoundland Power	$12	$11	$10

Source: Company reports; RBC Capital Markets estimates

Highlights of the Quarter and Outlook

- **Allowed ROE for Newfoundland Power Increases.** In June 2012, Newfoundland Power received regulatory approval of an increase in its allowed ROE to 8.80% for 2012, up from 8.38% for 2011. The company expects to file a general rate application during the quarter.
- **Regulatory Processes Under Way for FortisBC and FortisAlberta.** The generic cost of capital proceeding in British Columbia to determine the cost of capital as of January 1, 2013 (and an ROE automatic adjustment mechanism) and the Alberta Utilities Commission (PBR rate-regulation initiative) are currently under review. On the B.C. cost of capital proceeding, we estimate that a 50 basis point change in ROE in B.C. would impact Fortis' earnings by about $0.05/share.
- **Equity Issuance to Fund CH Energy.** Fortis issued 18.5 million subscription receipts at $32.50/share (gross proceeds of $601 million) to finance a portion of the purchase price of CH Energy. The proceeds are being held in escrow pending the close of the transaction.
- **Waneta Dam Expansion Continues to Progress.** Management indicated that the project is still on schedule and budget. Since construction started in late 2010, the company has invested approximately $345 million into the $900 million Waneta Expansion, a 335 MW hydro project in B.C. that is expected to be in service in the spring of 2015.
- **2012 Capex Plan Remains Unchanged.** Fortis' capital expenditure plan of $1.3 billion for 2012 is unchanged from Q1/12 guidance. Fortis spent approximately $511 million in capital expenditures during the H1/12. The company continues to expect a

total of $5.5 billion of capex as part of its five-year plan with CH Energy, adding $0.5 billion to that plan following the close of the transaction.

CH Energy Transaction Expected to Close in Q1/13

In June, 92% of the CH Energy's shareholders who voted on the transaction voted to approve Fortis' acquisition of 100% of CH Energy. Furthermore, the transaction received regulatory approval from the Federal Energy Regulatory Commission and the Committee on Foreign Investment in the U.S. in June. The New York State Public Service Commission (NYSPSC) is currently reviewing the application for approval of the transaction. Management expects the transaction to close by the end of Q1/13, depending on the timing of receiving approval from NYSPSC. We note that our 2013 EPS estimates include a full-year contribution from CH Energy, but a delay in closing to the end of Q1/13 would not have a material impact on our estimates.

Overall Estimates Remain Unchanged

We have made minor changes within the segments to our 2012 forecast, and since Q2/12 was generally in line with our estimate, we remain comfortable with our overall EPS estimates and have left them unchanged. A summary of our segment forecast is set out in Exhibit 2.

Source: Company reports; RBC Capital Markets estimates

Valuation

Our price target of $35.00 is based on a forward P/E of 18.0x applied to the 2013E EPS plus a present value of approximately $1.00/share for the Waneta Dam expansion that is expected to contribute to earnings in 2015. The P/E multiple is consistent with other Canadian utility valuations.

Price Target Impediment

The political environment in Belize, the risk of punitive regulatory decisions, economic/tourism conditions in its service territories, operational or financial issues at newly acquired businesses, and acquisitions or projects that fail to gain the confidence of investors may have implications for our price target.

Company Description

Fortis Inc. is a utility holding company for Newfoundland Power, FortisAlberta, FortisBC, Terasen Inc., Maritime Electric, Canadian Niagara Power, Cornwall Electric, BECOL, and two electric utilities in the Turks and Caicos. It also holds a 100% interest in Fortis Properties and a 59.5% interest in Caribbean Utilities.

Required Disclosures

Non-U.S. Analyst Disclosure

Kelsey Roste and Danny Hung (i) are not registered/qualified as research analysts with the NYSE and/or FINRA and (ii) may not be associated persons of the RBC Capital Markets, LLC and therefore may not be subject to FINRA Rule 2711 and NYSE Rule 472 restrictions on communications with a subject company, public appearances and trading securities held by a research analyst account.

Conflicts Disclosures

The analyst(s) responsible for preparing this research report received compensation that is based upon various factors, including total revenues of the member companies of RBC Capital Markets and its affiliates, a portion of which are or have been generated by investment banking activities of the member companies of RBC Capital Markets and its affiliates.

A member company of RBC Capital Markets or one of its affiliates managed or co-managed a public offering of securities for Fortis Inc. in the past 12 months.

A member company of RBC Capital Markets or one of its affiliates received compensation for investment banking services from Fortis Inc. in the past 12 months.

A member company of RBC Capital Markets or one of its affiliates expects to receive or intends to seek compensation for investment banking services from Fortis Inc. in the next three months.

Royal Bank of Canada, together with its affiliates, beneficially owns 1 percent or more of a class of common equity securities of Fortis Inc..

A member company of RBC Capital Markets or one of its affiliates received compensation for products or services other than investment banking services from Fortis Inc. during the past 12 months. During this time, a member company of RBC Capital Markets or one of its affiliates provided non-investment banking securities-related services to Fortis Inc..

A member company of RBC Capital Markets or one of its affiliates received compensation for products or services other than investment banking services from Fortis Inc. during the past 12 months. During this time, a member company of RBC Capital Markets or one of its affiliates provided non-securities services to Fortis Inc..

RBC Capital Markets is currently providing Fortis Inc. with investment banking services.

RBC Capital Markets is currently providing Fortis Inc. with non-securities services.

RBC Capital Markets has provided Fortis Inc. with investment banking services in the past 12 months.

RBC Capital Markets has provided Fortis Inc. with non-investment banking securities-related services in the past 12 months.

RBC Capital Markets has provided Fortis Inc. with non-securities services in the past 12 months.

Explanation of RBC Capital Markets Equity Rating System

An analyst's 'sector' is the universe of companies for which the analyst provides research coverage. Accordingly, the rating assigned to a particular stock represents solely the analyst's view of how that stock will perform over the next 12 months relative to the analyst's sector average.

Ratings

Top Pick (TP): Represents analyst's best idea in the sector; expected to provide significant absolute total return over 12 months with a favorable risk-reward ratio.

Outperform (O): Expected to materially outperform sector average over 12 months.

Sector Perform (SP): Returns expected to be in line with sector average over 12 months.

Underperform (U): Returns expected to be materially below sector average over 12 months.

Risk Qualifiers (any of the following criteria may be present):

Average Risk (Avg): Volatility and risk expected to be comparable to sector; average revenue and earnings predictability; no significant cash flow/financing concerns over coming 12-24 months; fairly liquid.

Above Average Risk (AA): Volatility and risk expected to be above sector; below average revenue and earnings predictability; may not be suitable for a significant class of individual equity investors; may have negative cash flow; low market cap or float.

Speculative (Spec): Risk consistent with venture capital; low public float; potential balance sheet concerns; risk of being delisted.

Distribution of Ratings

For the purpose of ratings distributions, regulatory rules require member firms to assign ratings to one of three rating categories - Buy, Hold/Neutral, or Sell - regardless of a firm's own rating categories. Although RBC Capital Markets' ratings of Top Pick/Outperform, Sector Perform and Underperform most closely correspond to Buy, Hold/Neutral and Sell, respectively, the meanings are not the same because our ratings are determined on a relative basis (as described above).

Distribution of Ratings
RBC Capital Markets, Equity Research

Rating	Count	Percent	Investment Banking Serv./Past 12 Mos. Count	Investment Banking Serv./Past 12 Mos. Percent
BUY[TP/O]	774	51.98	225	29.07

or send a request to RBC CM Research Publishing, P.O. Box 50, 200 Bay Street, Royal Bank Plaza, 29th Floor, South Tower, Toronto, Ontario M5J 2W7. We reserve the right to amend or supplement this policy at any time.

Dissemination of Research and Short-Term Trade Ideas

RBC Capital Markets endeavors to make all reasonable efforts to provide research simultaneously to all eligible clients, having regard to local time zones in overseas jurisdictions. RBC Capital Markets' research is posted to our proprietary websites to ensure eligible clients receive coverage initiations and changes in ratings, targets and opinions in a timely manner. Additional distribution may be done by the sales personnel via email, fax or regular mail. Clients may also receive our research via third-party vendors. Please contact your investment advisor or institutional salesperson for more information regarding RBC Capital Markets' research. RBC Capital Markets also provides eligible clients with access to SPARC on its proprietary INSIGHT website. SPARC contains market color and commentary, and may also contain Short-Term Trade Ideas regarding the securities of subject companies discussed in this or other research reports. SPARC may be accessed via the following hyperlink: https://www.rbcinsight.com. A Short-Term Trade Idea reflects the research analyst's directional view regarding the price of the security of a subject company in the coming days or weeks, based on market and trading events. A Short-Term Trade Idea may differ from the price targets and/or recommendations in our published research reports reflecting the research analyst's views of the longer-term (one year) prospects of the subject company, as a result of the differing time horizons, methodologies and/or other factors. Thus, it is possible that the security of a subject company that is considered a long-term 'Sector Perform' or even an 'Underperform' might be a short-term buying opportunity as a result of temporary selling pressure in the market; conversely, the security of a subject company that is rated a long-term 'Outperform' could be considered susceptible to a short-term downward price correction. Short-Term Trade Ideas are not ratings, nor are they part of any ratings system, and RBC Capital Markets generally does not intend, nor undertakes any obligation, to maintain or update Short-Term Trade Ideas. Short-Term Trade Ideas discussed in SPARC may not be suitable for all investors and have not been tailored to individual investor circumstances and objectives, and investors should make their own independent decisions regarding any Short-Term Trade Ideas discussed therein.

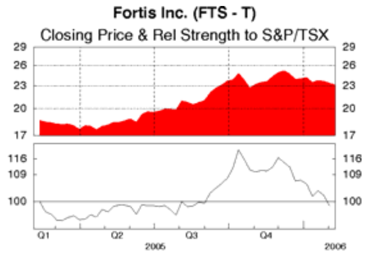
Q4/05 EPS Slightly Misses



Source: Global Insight, Inc.

Event

- Fortis (FTS) reported basic Q4/05 earnings of $0.22/share ($0.22/share in Q4/04) that, on a recurring basis, was about $0.26/share basic versus our $0.28/share estimate and the First Call Average of $0.27/share.

What It Means

- In Q4/05, FTS' regulated Ontario and Newfoundland power utilities experienced lower earnings due to negative demand YOY that more than offset much stronger Fortis non-regulated generation earnings.
- The Q4/05 non-recurring items were: 1) a $3M one time adjustment for implementing the FortisAlberta negotiated rate settlement established in May 2005, 2) a $1.1M write-off of some Rankine Niagara Falls Ontario power assets and 3) FortisOntario early retirement program costs were $0.8M pre-tax.
- Our one year valuation of Fortis is unchanged at 20x P/E on 2007 EPS.

Qtly EPS (Basic)	Q1	Q2	Q3	Q4	Year	P/E

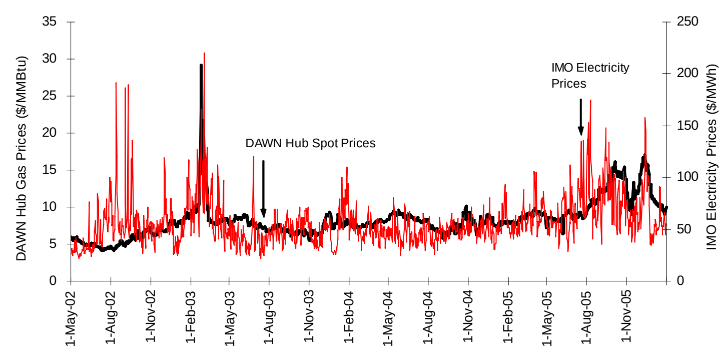
Highlights

- **Q4/05 EPS Misses Slightly:** FTS' recurring basic Q4/05 earnings were about $0.26/share which was lower than our $0.28/share estimate and the consensus of $0.27/share. Q4/05 reported basic EPS of $0.22/share included three non-recurring items: a $3.0M ($0.03/share) one time adjustment due to the implementation of the negotiated rate settlement for FortisAlberta, a $1.1M charge associated with the write down of FortisOntario's Rankine hydro asset as well as a $0.8M pre-tax cost for FortisOntario employees that retired in Q4/05. Increased earnings from higher energy prices and non-regulated generation in Ontario and New York were more than offset by increased operating expenses and decreased earnings from regulated assets.
- **Q4/05 Newfoundland Power:** 2005 earnings of $30.7M decreased $0.4M YOY due to timing differences related to when purchased power is charged and the impact of a 0.5% decrease in electricity rates in 2005 versus 2004, early retirement costs and higher financing costs. **Previously, FTS forecasted 2005 earnings to be flat in the $31M area**. Q4/05 earnings were down to $2.9M from $3.3M in Q4/04 for the same reasons and poor demand.
    - **Power demand declined 3.6%** to 1,191GWh in Q4/05 from 1,236GWh in Q4/04 due to lower customer usage (likely from a warmer than normal Q4/05) partially offset by an increase in customers. FY2005 usage was up 0.5% YOY.
    - In January 2006, Newfoundland Power received notice from its regulator that it had approved customer rates unchanged from 2005 with an unchanged 9.24% allowed ROE.
- **Q4/05 Maritime Electric Flat, FortisOntario Declined:**
    - Maritime Electric earned $1.7M versus $1.8M in Q4/04 and $9.1M for FY05 versus $8.2M for 2004. **Demand in Q4/05 at Maritime Electric was flat** at 242GWh. On January 31, 2006 Maritime filed an application with its regulator for an increase in electricity rates by 1.6% effective July 1, 2006. Maritime's proposed 2006 capital budget was approved by the regulator on Jan 20, 2006.
    - Financing charges for Q4/05 were $1.8M, down from $2.2M in Q4/04. The decrease is related to the use of short term financing and the capitalization of interest costs associated with the construction of the $35M 50MW gas turbine generation facility in Charlottetown, PEI. Commissioning and winter operation testing should be complete in February 2006.
    - FortisOntario earned $0.2M versus $0.9M in Q4/04. The $0.7M decline was due mostly to costs associated with the early retirement program offered in Q4/05. Electricity sales in Q4/05 **were flat** YOY (296GWh) while 2005 electricity sales were **also flat**. In September 2005, FortisOntario filed a GRA to set electricity rates effective May 1, 2006. We understand that this will only get allowed 2006 ROE to 6%-7% **as there is a maximum rate hike cap of only 10%/year in Ontario.** There is no cumulative catch-up provision.
- **Q4/05 FortisAlberta and FortisBC Recurring Earnings Flat to Down**:
    - FortisAlberta reported Q4/05 earnings of $4.2M down from $7.5M in Q4/04, while electricity sales for Q4/05 were up 8.4% YOY and electricity rates were up 2.1%. Earnings were down due to amortization costs from the negotiated settlement and a higher effective corporate income tax.
    - On November 22, 2005, based on its automatic adjustment formula, the Alberta Energy and Utilities Board (EUB) set **FortisAlberta's allowed ROE at 8.93% for 2006 down from 9.5% for 2005, due to lower long-term Canada interest rate forecasts.** FortisAlberta filed its 2006/07 distribution access tariff with the EUB on December 12, 2005. If approved the filing will result in no distribution rate increase in 2006 and a 3% rate increase to customers in 2007. On December 20, 2005 the EUB approved interim rates effective January 1, 2006.

- FortisBC reported Q4/05 earnings of $5.7M, down from $11.6M during Q4/04 due to lower accrued unbilled electricity revenue, increased operating expenses and amortization charges. On February 1, 2006 FortisBC announced it had received approval from the BCUC for its 2006 capital plan. The plan calls for cap-ex of $111.7M with expenditures being used for upgrading transmission and distribution assets as well as generation upgrades of hydro facilities on the Kootenay River.
- On November 24, 2005 FortisBC filed its 2006 revenue requirement application with the British Columbia Utilities Commission (BCUC) for a 5.9% electricity rate increase effective January 1, 2006. The BCUC approved an interim rate increase and will review the application in February 2006. The Generic ROE mechanism for the application set FortisBC's **allowed ROE at 8.69% for 2006 down from 9.43% for 2005, due to lower long-term Canada interest rate forecasts.**
- Forecast quarterly normalized earnings seasonality should be about 35%/20%/20%/25% for FortisBC and 28%/22%/22%/28% for FortisAlberta.

- **Q4/05 CUP:** Equity income of $2.8M from 36.8% owned Caribbean Utilities (CUP.u) was up from $(5.8M) from Q4/04, due to the negative impact on demand from Hurricane Ivan's destruction in Q4/04. FTS expects CUP to have electricity sales back to pre-Ivan levels (September 2004) by April 2006 (unchanged). In November 2005, CUP resumed License extension negotiations with the government and expects to obtain a new license in the summer of 2006.
- **Q4/05 Belize Electricity Stronger:** Earnings of $2.0M were up $0.4M from Q4/04, due to an 11% increase in electricity rates (effective July 2005 from a 4-year tariff agreement), higher electricity sales and the foreign exchange impact associated with Fortis' Euro debt. That was somewhat offset by the depreciation of the US$ versus the C$. On December 31, 2005 the Belize regulator approved a BZ5.1 cents/kWh (13%) increase in electricity prices effective January 1, 2006. The increase in the rate will have no impact on Belize Electricity's 2006 earnings due to a flow through to customers.
- **Q4/05 Fortis Non-Regulated Generation Strong:** Earnings **were up sharply** to $8.5M in Q4/05 from $4.7M in Q4/04. The earnings strength is largely due to much higher Q4/05 spot electricity prices and production in New York and Belize. Power prices in Ontario were up sharply to $71.46/MWh vs. $50.80/MWh in Q4/04 but warm weather weighed on demand (See Exhibit 1). Operating expenses increased mainly due to a $1.1M after-tax write down of the Rankine hydro assets due to the implementation of the Niagara Exchange Agreement which gives FortisOntario's water rights to the OPG in exchange for 75MW of power **but only until April 30, 2009**.

Exhibit 1 – 2002 - 2006 Ontario YTD Power and Gas Prices



Source: Ontario Independent Market Operator, Bloomberg, Scotia Capital.

- **Q4/05 Fortis Properties Flat:** Earnings were relatively flat at $2.9M in Q4/05 versus $2.8M in Q4/04. This was a little disappointing since Fortis acquired additional properties in Western Canada in February 2005 while the expansion of the Delta St. John's hotel was completed in June 2005. REVPAR increased 3.3% in Q4/05 to $63.38 from $61.37 in Q4/04 due to an increase in occupancy. Completion of the previously announced $7.7M expansion to the Holiday Inn Sarnia, $2.5M expansion to the Holiday Inn Kitchener-Waterloo and a $7.2M expansion of the Blue Cross Centre in Moncton remain on track. Cap-ex for these projects was $6.7M in 2005 with completion expected by mid-2006.
- **Q4/05 Corporate/Financial:** Net corporate expenses increased to a loss of $8.6M in Q4/05 versus a loss of $7.2M in Q4/04. The decrease was mainly related to lower revenue, higher expenses and lower net unrealized foreign exchange gains, offset by lower finance charges.

FTS' debt level dropped to 58.7% versus 61.4% at December 31, 2004, its preference share level dropped to 8.6% from 9.4% while its equity rose to 32.7% from 29.2% of capitalization due to 2005 earnings and a March 1, 2005 equity issue. FTS targets a minimum 40% equity, 60% debt capital structure going forward. **FTS has an S&P issuer credit rating of BBB+/Stable which was revised from a Negative outlook in December 2005**. DBRS is currently conducting its annual review of Fortis and currently rates Fortis BBB (high).

- **2006 Outlook OK:** Fortis expects FortisAlberta and FortisBC to comprise most of its cap-ex over the next five years. 2006 capital expenditures for 2006 are forecast by Fortis to be about $450M of which $420M will be allocated for regulated utilities. Fortis also expects there could be further acquisitions of utility assets in Canada, the U.S. and in the Caribbean as well as in non-regulated businesses including hydro generation, hotels and real estate. Previously, Fortis has stated it was not able to compete with "income trust valuations" on hotels and real estate transactions.
- **Q4/05 Valuation Observations:** On December 7, 2005, we downgraded FTS to a 3-Sector Underperform at $25.40. Then on December 13, 2005, based solely on the 7.5% price depreciation the company experienced since December 7, 2005 we upgraded Fortis back to a 2-Sector Perform at $23.50. It is still our view that FTS has strong growth opportunities over the next few years, including a program of organic growth starting with $450M in utility capital expenditures in 2006 and $2B over the next five years. Fortis will experience slightly lower earnings from its regulated assets within **FortisAlberta (now the largest contributor to EBITDA, having passed Newfoundland Power**) and FortisBC. We reiterate our 2-Sector Perform rating with a one year unchanged target of $25.50 and a slightly increased two year target of $26.50.

Definition of Scotia Capital Equity Research Ratings & Risk Rankings

We have a three-tiered rating system, with ratings of 1-Sector Outperform, 2-Sector Perform, and 3-Sector Underperform. Each analyst assigns a rating that is relative to his or her coverage universe.

Our risk ranking system provides transparency as to the underlying financial and operational risk of each stock covered. Statistical and judgmental factors considered are: historical financial results, share price volatility, liquidity of the shares, credit ratings, analyst forecasts, consistency and predictability of earnings, EPS growth, dividends, cash flow from operations, and strength of balance sheet. The Director of Research and the Supervisory Analyst jointly make the final determination of all risk rankings.

Ratings

1-Sector Outperform
The stock is expected to outperform the average total return of the analyst's coverage universe by sector over the next 12 months.

2-Sector Perform
The stock is expected to perform approximately in line with the average total return of the analyst's coverage universe by sector over the next 12 months.

3-Sector Underperform
The stock is expected to underperform the average total return of the analyst's coverage universe by sector over the next 12 months.

Other Ratings
Tender – Investors are guided to tender to the terms of the takeover offer.

Under Review – The rating has been temporarily placed under review, until sufficient information has been received and assessed by the analyst.

Risk Rankings

Low
Low financial and operational risk, high predictability of financial results, low stock volatility.

Medium
Moderate financial and operational risk, moderate predictability of financial results, moderate stock volatility.

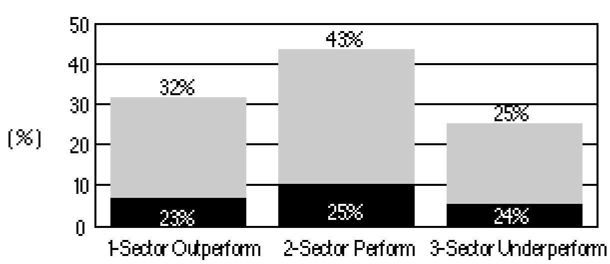
High
High financial and/or operational risk, low predictability of financial results, high stock volatility.

Caution Warranted
Exceptionally high financial and/or operational risk, exceptionally low predictability of financial results, exceptionally high stock volatility. For risk-tolerant investors only.

Venture
Risk and return consistent with Venture Capital. For risk-tolerant investors only.

Scotia Capital Equity Research Ratings Distribution*

Distribution by Ratings and Equity and Equity-Related Financings*



* As at January 31, 2006.

Percentage of companies covered by Scotia Capital Equity Research within each rating category.

Percentage of companies within each rating category for which Scotia Capital has undertaken an underwriting liability or has provided advice for a fee within the last 12 months.

Source: Scotia Capital.

For the purposes of the ratings distribution disclosure the NASD requires members who use a ratings system with terms different than "buy," "hold/neutral" and "sell," to equate their own ratings into these categories. Our 1-Sector Outperform, 2-Sector Perform, and 3-Sector Underperform ratings are based on the criteria above, but for this purpose could be equated to buy, neutral and sell ratings, respectively.

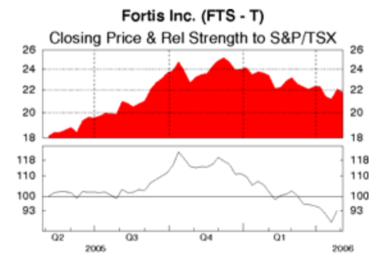
Q1/06 EPS Slightly Misses



Source: Global Insight, Inc.

Event

- Fortis (FTS) reported basic Q1/06 earnings of $0.35/share ($0.34/share diluted) that was slightly below the First Call average of $0.36/share and modestly above our $0.32/share estimate.

What It Means

- We had underestimated the magnitude of improved hydro generation in Belize and had been a little more conservative with Ontario power generation due to materially weaker Ontario merchant power prices. However, Ontario generation was not as bad as expected as YOY water flow improved over Niagara Falls. F/X also helped a little.
- Fortis Properties results were flat YOY that may have led to slight market disappointment.
- FTS' 15% stock correction since December 7/05 is representative of its higher yield sector, so accordingly we left FTS as a 2-Sector Perform.

Qtly EPS (Basic)	Q1	Q2	Q3	Q4	Year	P/E

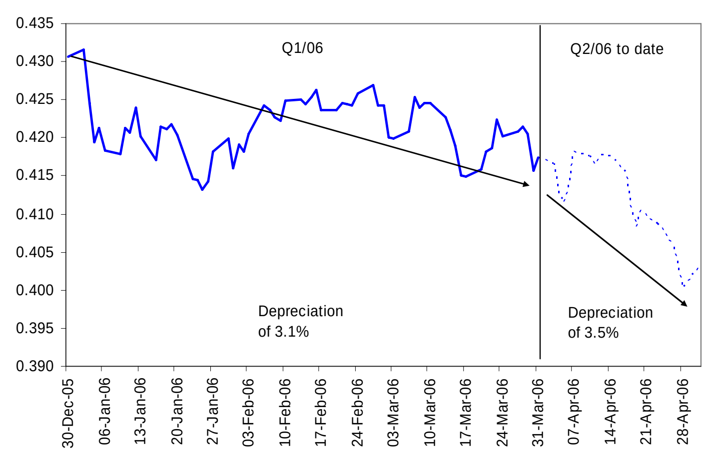
Historical price multiple calculations use FYE prices. Source: Reuters; Company reports; Scotia Capital estimates.

Highlights

- **Q1/06 EPS Misses Consensus Slightly:** FTS reported basic Q1/06 earnings of $0.35/share ($0.34/share diluted) that was a little higher than our $0.32/share estimate and slightly below the consensus of $0.36/share. While we do not know what was in our competitor's forecasts, the softness in Newfoundland Power's Q1/05 from a regulatory revenue shift may have been missed by some.
- **Q1/06 Stock Valuation/Observations:** On December 7, 2005, we downgraded FTS to a 3-Sector Under-perform at $25.40. Then on December 13, 2005, based solely on the 7.5% price depreciation the company experienced since December 7, 2005 we upgraded Fortis back to a 2-Sector Perform at $23.50/share. On Mar. 31/06 we reduced all of the sector's P/Es by 1x (including FTS and excluding CUP) due to too much capital chasing commodity stocks and lowered expectations on provincial dividend tax cuts. This took our FTS 1-YR target down to $24/share. **Given the recent strength of the U.S. economy and higher than expected Canadian PPI at 0.8%, it is likely that interest sensitive stocks will continue to under-peform in the short term.** This could swing a little if the first minority Conservative Budget on Tuesday May 2/06 confirms/denies a material Federal dividend tax cut. Our bias at the moment is to lower P/E multiples again.
- **2006 Outlook OK:** Fortis expects FortisAlberta and FortisBC to comprise most of its capex over the next five years. 2006 capital expenditures forecast remains unchanged at about $450M of which $425M will be allocated for regulated utilities. Fortis also expects there could be further acquisitions of utility assets in Canada, the U.S. and in the Caribbean as well as in non-regulated businesses including hydro generation, hotels and real estate. Previously, Fortis has stated it was not able to compete with "income trust valuations" on hotels and real estate transactions.
- **Q1/06 Newfoundland Power Soft But Expected:** Q1/06 earnings of $10.7M decreased $2.3M YOY primarily due to a known change (effective 1/1/06) of its revenue recognition policy to an accrual basis from a billed basis. Lower Q1 and Q2 earnings should be offset by higher Q3 and Q4 earnings. The allowed 2005 ROE was kept constant at 9.25% for 2006. Electricity sales for the quarter were 67 GWh lower YOY with 57 GWh attributed to the change in revenue recognition, and the remaining 10 GWh decline (0.6%) was primarily due to reduced consumption from changing customer demographics and conservation due to increased energy prices.
- **Q1/06 Maritime Electric Flat, FortisOntario Declined Slightly:**
    - Maritime Electric earned $2.1M in the quarter, in line with Q1/05. Demand in Q1/06 at Maritime Electric was flat at 255GWh, with a slight decrease in residential sales (down 1.8%) that was offset by a slight increase in commercial sales (up 0.6%). On January 31, 2006 Maritime filed an application with its regulator for a 1.6% increase in electricity rates effective July 1, 2006. Maritime Electric expects to receive a decision in Q2/06.
    - On Apr. 5/06 Maritime Electric filed for approval of a 39MW wind power purchase agreement with PEI, as PEI legislation requires Maritime to obtain 15% of its annual energy requirements from renewable sources going forward. During Q1/06, Maritime commissioned a 50MW combustion turbine generating facility that can run on either diesel or natural gas.
    - FortisOntario earned $1.0M versus $1.1M in Q1/05. The $0.1M decline was due to a decrease in electricity sales (down 6 GWh or 1.8%) and an increase in the allocation of shared service costs. In September 2005, FortisOntario filed a general rate application (GRA) to set electricity rates effective May 1, 2006. Based on a 50/50 capital structure, FortisOntario seeks an allowed ROE of 9%. A decision from the OEB is expected in Q2/06.

- **Q1/06 FortisAlberta and FortisBC Stronger**
  - **FortisAlberta** reported Q1/06 earnings of $9.5M up from $7.8M in Q1/05. Electricity sales were 69GWh or 1.9% higher due to growth in both commercial/industrial customers and their levels of consumption. Expenses were $1.8M higher due mostly to the inflationary effect on Alberta labour conditions.
  - On November 22, 2005, based on its automatic adjustment formula, the Alberta Energy and Utilities Board (AEUB) set **FortisAlberta's allowed ROE at 8.93% for 2006 down from 9.5% for 2005, due to lower long-term Canada interest rate forecasts.** FortisAlberta filed its 2006/07 distribution access tariff with the AEUB on December 12, 2005. If approved the filing will result in no distribution rate increase in 2006 and a 3% rate increase to customers in 2007. On December 20, 2005 the AEUB approved interim rates effective January 1, 2006.
  - **FortisBC** reported Q1/06 earnings of $11.8M, up from $8.9M during Q1/05 due to higher electricity revenue (1% higher on Okanagan customer growth), and lower operating expenses ($0.7M lower due to an increased allocation to capitalized overhead). This was offset by higher finance charges ($1.1M higher YOY for a larger capex program) and increased energy supply costs. On February 1, 2006 FortisBC announced it had received approval from the BCUC for its $111.7M 2006 capital plan to upgrade transmission and distribution assets as well as generation upgrades of hydro facilities on the Kootenay River.
  - On November 24, 2005 FortisBC filed its 2006 revenue requirement application with the British Columbia Utilities Commission (BCUC) for a 5.9% electricity rate increase effective January 1, 2006. The Generic ROE mechanism for the application **set FortisBC's allowed ROE at 8.69% for 2006 down from 9.43% for 2005,** due to lower long-term Canada interest rate forecasts. On Mar. 2/06 the BCUC approved an **increase** in FortisBC's ROE to 9.20% from 8.69% due to BCUC's review of the current ROE mechanism.
  - Management forecast quarterly normalized earnings seasonality should be about 35%/20%/20%/25% for FortisBC and 28%/22%/22%/28% for FortisAlberta.
- **Q1/06 CUP:** Equity income of $1.6M from 37% owned Caribbean Utilities (CUP.u) was down from $2.5 from Q1/05, due partly to the negative impact on demand from Hurricane Ivan's destruction in Q4/04 and a weaker US$. Equity income also declined due to higher insurance premiums, interest expense, and leasing costs associated with temporary generation. CUP is now finally at pre-Ivan generation sales and levels. CUP expects to have generating capacity of 120MW by Q2/Q3-06 compared to 123MW pre-Ivan.
- **Q1/06 Belize Electricity Stronger:** Earnings of $1.5M was up $0.5M from Q1/05, due to an 11% increase in electricity rate (effective July 2005 from a 4-year tariff agreement) and higher electricity sales (up 5.3%). That was partially offset by a negative foreign exchange impact associated with Fortis' Euro debt and higher finance charges. The Belize dollar weakened by 3.1% relative to the Euro during Q1/06 (Exhibit 1). On

Exhibit 1 - Bad to Worse - Depreciation of Belize Dollar to Euro

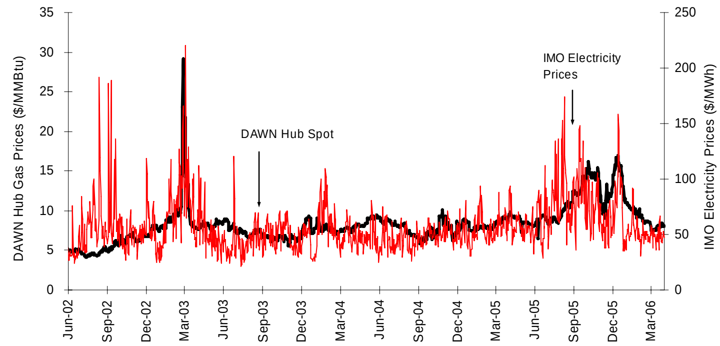


Source: Bloomberg.

December 31, 2005 the Belize regulator approved a BZ5.1 cents/kWh (13%) increase in electricity prices effective January 1, 2006. but this will have no impact on Belize Electricity's 2006 earnings due to it being a flow through to customers.

- **Q1/06 Fortis Non-Regulated Generation (Recurring) Strong:** Earnings fell to $5.4M in Q1/06 from $10M in Q1/05 but Q1/05 included a $7.9M after-tax settlement with OPG. Q1/06 recurring earnings were therefore $3.3M higher YOY due to increased production and lower finance charges. Energy sales strengthened YOY primarily from Belize and Upper New York State, up 20GWh to 27GWh and up 12GWh to 29GWh respectively. Generation revenue rose to $19.3M from $17M YOY due to stronger production. This was partially offset by lower Ontario wholesale power prices at $50.98/MWh compared to $55.99/MWh YOY (Exhibit 2). The repayment of a $22.5M term loan in Q2/05 reduced finance charges in Q1/06 by $1.2M YOY.

Exhibit 2 - 2002 - 2006 Ontario YTD Power and Gas Prices



Source: Ontario Independent Market Operator, Bloomberg, Scotia Capital

- **Q1/06 Fortis Properties Flat:** Earnings were flat at $1.5M in Q1/06. Real Estate revenue increased 3% to $13.6M and Hospitality revenue increased 8.6% to $21.5M, but this was offset by 8% higher operating expenses ($24.6M). Occupancy rose slightly to 95.9% from 95.1% but revenue per room fell to $59.26 from $60.15 YOY. Expansions totalling $17.4M ($11.7M spent to date) continued at the Holiday Inn Sarnia, Holiday Inn Kitchener-Waterloo, and the Blue Cross Centre in Moncton all continued in Q1/06 with a second quarter expected completion.

- **Q1/06 Corporate/Financial:** Net corporate expenses improved slightly to a loss of $8.5M in Q1/06 versus a loss of $8.7M in Q1/05. The decrease was mainly related to lower finance charges and a reduction in unrealized foreign exchange **losses due to unhedged U.S. dollar denominated debt**, offset by a slight decline in inter-company interest revenue. In Q1/06 FTS' debt level increased to 59.1% versus 58.7% at December 31, 2005, its preference share level dropped to 8.4% from 8.6% while its equity declined to 32.5% from 32.7% of capitalization. FTS targets a minimum 40% equity, 60% debt capital structure going forward. **FTS has an S&P issuer credit rating of BBB/Stable which was revised from a Negative outlook in December 2005**. DBRS rates FTS's unsecured debt at BBB(high), confirmed Feb/06. On April 21 2006, FortisAlberta raised $100M in unsecured debentures at a 5.4% interest rate to mature on April 21 2036.

Definition of Scotia Capital Equity Research Ratings & Risk Rankings

We have a three-tiered rating system, with ratings of 1-Sector Outperform, 2-Sector Perform, and 3-Sector Underperform. Each analyst assigns a rating that is relative to his or her coverage universe.

Our risk ranking system provides transparency as to the underlying financial and operational risk of each stock covered. Statistical and judgmental factors considered are: historical financial results, share price volatility, liquidity of the shares, credit ratings, analyst forecasts, consistency and predictability of earnings, EPS growth, dividends, cash flow from operations, and strength of balance sheet. The Director of Research and the Supervisory Analyst jointly make the final determination of all risk rankings.

Ratings

1-Sector Outperform
The stock is expected to outperform the average total return of the analyst's coverage universe by sector over the next 12 months.

2-Sector Perform
The stock is expected to perform approximately in line with the average total return of the analyst's coverage universe by sector over the next 12 months.

3-Sector Underperform
The stock is expected to underperform the average total return of the analyst's coverage universe by sector over the next 12 months.

Other Ratings
Tender – Investors are guided to tender to the terms of the takeover offer.

Under Review – The rating has been temporarily placed under review, until sufficient information has been received and assessed by the analyst.

Risk Rankings

Low
Low financial and operational risk, high predictability of financial results, low stock volatility.

Medium
Moderate financial and operational risk, moderate predictability of financial results, moderate stock volatility.

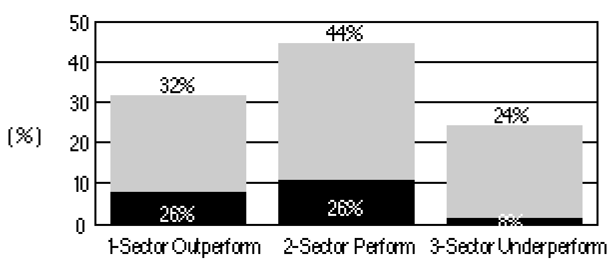
High
High financial and/or operational risk, low predictability of financial results, high stock volatility.

Caution Warranted
Exceptionally high financial and/or operational risk, exceptionally low predictability of financial results, exceptionally high stock volatility. For risk-tolerant investors only.

Venture
Risk and return consistent with Venture Capital. For risk-tolerant investors only.

Scotia Capital Equity Research Ratings Distribution*

Distribution by Ratings and Equity and Equity-Related Financings*



- Percentage of companies covered by Scotia Capital Equity Research within each rating category.
- Percentage of companies within each rating category for which Scotia Capital has undertaken an underwriting liability or has provided advice for a fee within the last 12 months.

* As at April 28, 2006.

Q2/06 EPS Slight/Mild Miss

Event

- Fortis (FTS) reported basic Q2/06 earnings of $0.37/share that included $0.07/share for reduced future income tax liabilities and $0.01/share for the sale of a property. Recurring EPS of $0.29/share was just under our $0.30/share estimate, and below the First Call average of $0.32/share.

What It Means

- Overall, regulated operations were weaker due partly to a shift in revenue recognition being deferred at Newfoundland Power into the second half of its year. Recurring non-regulated generation and property results supported the quarter but did not fully offset regulated operations weakness.
- We introduce our 2008E EPS and now value FTS at 2007E EPS plus 2008E EPS averaged using an 18x (unchanged) P/E. This added $1/share to both our 1-YR and 2-YR targets.

		0.37		0.35		0.37	

Note: Q2/05 EPS contribution adjusted to reflect 4 - 1 split completed October 2005.

Source: Company reports; Scotia Capital estimates.

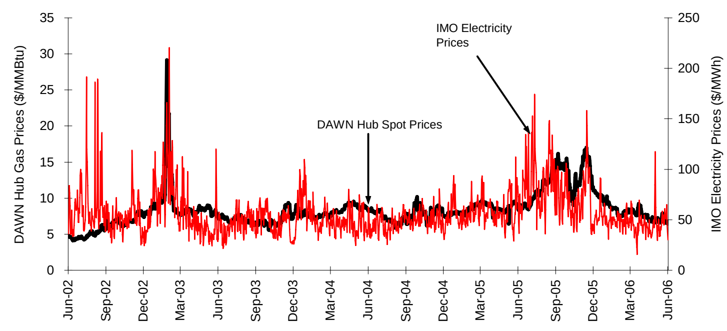
- **Stock Valuation/Observations:** We have moved our energy utility valuations to 2007E plus 2008E EPS averaged from using 2007E only previously, including Fortis. We expect Fortis to grow its EPS by 6%-7% in 2008. The certainty of FTS' EPS growth is relatively high as is its EPS quality. **We therefore use an 18x P/E for FTS.** Given 1) greater geopolitical risks; 2) slower than expected U.S. economy; 3) lower 2007 GDP for both the U.S. and Canada; and, 4) a lower interest rate forecast, we moved up to recommending Overweight Energy Utilities on July 31/06. Weak Canadian and U.S. employment growth data last week and Ontario decreasing taxes on corporate dividends over the next 5 years also support after tax dividend yield values. Our P/E bias on all energy utilities is therefore biased a little higher lately on energy utilities.
- **Q2/06 Maritime Electric:** Maritime Electric earned $2.2M in the quarter, **slightly below** Q2/05's $2.3M. Demand in Q2/06 at Maritime Electric **was flat** at 241GWh, with **a slight decrease** in residential sales due to a milder than normal winter/spring that was offset by a slight increase in basic electricity rates (2%). On June 27/06 Maritime Electric's regulator approved a 1.2% decrease in customer electricity rates, as an effective refund to a previous 3.55% increase in basic electricity rates due to higher fuel costs. The regulator also approved Maritime Electric's maximum allowed ROE at 10.25%. On Apr. 6/06 Maritime Electric filed for approval of a 39MW wind power purchase agreement with PEI, as PEI legislation requires Maritime Electric to obtain 15% of its annual energy requirements from renewable sources going forward. If approved, the agreement will take affect on January 1, 2007.

- **FortisOntario Q2/06 Declines**: FortisOntario earned $0.5M versus $0.9M in Q1/05. The $0.4M decline was due to 1) a decrease in electricity sales (down 13 GWh or 4.8%); 2) a higher allocation of shared-service costs; 3) increased payroll costs; and 4) higher taxes due to the reduction of future income tax **asset** balances. On April 28/06, the OEB approved (effective May 1/06) a 50/50 capital structure, with an allowed ROE of 9%.
- **Q2/06 Newfoundland Power Down:** Newfoundland Power earned only $8.0M compared to Q2/05's $11.5M. Effective January 1, 2006, the company changed its revenue recognition policy from a billed basis to an accrual basis. On a 2005 comparable basis, Q2/06 earnings would have been $11.2M, **or 2.6% lower YOY**. Higher finance charges reduced YOY earnings for the quarter, partially offset by lower operating expenses and a reduced effective income tax rate. On July 1, 2006, the average rate of electricity increased 4.8% as part of the Rate Stabilization Account, primarily to recover higher fuel costs. 1H/06 capital spending was $26M, in line with its projected $52M 2006 capital expenditure program.
- **Q2/06 FortisAlberta Up:** reported Q2/06 earnings of $11.3M up $1.6M from $9.7M in Q2/05. The increase was due to reduced operating expenses and lower income taxes. Partially offsetting was a rate decrease, and higher depreciation and interest costs. While total Q2/06 revenue was down 16% YOY to $58.6M from $70.1M, $10.8M in Q2/05 was associated with the resolution of a tax-related matter. YOY comparable revenue was about flat. FortisAlberta increased YOY capex expenditures by 68% to $48.1M. The company made significant capital investments in its electrical system, including the commissioning of a distribution line from the Bassano substation, increasing Alberta's electrical capacity by 25MW.
- **FortisAlberta 2006-07 Revenue Requirements:** On June 29, 2006, FortisAlberta announced AEUB approval for the company's 2006-07 revenue requirements. Revenue for 2006 and 2007 is set at $217M and $228M, respectively. As part of the agreement with AUEB, FortisAlberta has agreed to an operating expense of $114M in each of 2006 and 2007. Also capital expenditures (before customer contributions) will be about $400M for the two years combined.
- **Q2/06 FortisBC** reported Q2/06 net earnings of $3.6M, down from $4.7M during Q2/05. YOY earnings were lower due to increased power purchases, higher depreciation/amortization, and a higher interest expense. Partially offsetting the decline in earnings were increases in electricity revenue, lower operating expenses, and reduced income taxes. FortisBC also announced the conclusion of its negotiations with BCUC for the company's 2006 revenue requirements. BCUC approved a 5.9% customer rate increase effective January 1, 2006. During Q2/06, the company spent $20.5M to expand and upgrade its transmission and distribution system as part of FortisBC's long-term capital investment plan.
- **Q4/06 CUP:** Q4/06 CUP earnings of US$0.20/share were below our US$0.25/share estimate due to higher insurance costs and lower than expected revenue growth. Operating revenue rose 57% YOY to US$32.2M due to the ongoing hurricane recovery and new customer growth such as the recently opened 365-room Ritz-Carlton hotel. Under CUP's current license, effective until January 2011, CUP is entitled to a 2% rate increase effective August 1/06. However, as part of the Hurricane Ivan related settlement, CUP did not seek to implement this rate increase as part of an ongoing negotiation to renew its license after 2011 with the Cayman Islands Government. This is now expected to be completed by early 2007, a chronic delay. CUP forecasts fiscal 2007 sales volume growth of about 10%.
- **Q2/06 Belize Electricity Stronger:** Earnings of $2.3M was up $0.4M from Q2/05, due primarily to a sharp increase in revenue. This was due to a 13% increase in electricity rates (11% effective July 2005 from a 4-year tariff agreement, and 2% effective January 2006). Q2/06 electricity sales increased 1.1% YOY to 93GWh. The increase in earnings was partially offset by a YOY negative foreign exchange impact of $0.4M ($0.2M loss in Q2/06 and $0.2M gain in Q2/05). QOQ amortization costs declined slightly due to the recovery of all generation power equipment depreciation through the costs of power. On June 19, 2006, BEL announced a BZ$66.8M share offering (US$38.2M). The proceeds will be used to repay short term debt and to continue investments in capital projects. From 2006 through 2011,

capital investment is expected to be about BZ$177M, or over C$100M. Demand for energy is growing at about 6% annually in Belize. As a result of the offering, FTS **increased** its ownership position to 70.1% from 68.5%

- **Q2/06 Fortis Non-Regulated Generation Strong:** Earnings sharply improved to $6.7M in Q2/06 from $3.2M in Q2/05 due mainly to a 12% YOY increase in electricity sales to 290GWh. Generation in both Belize and Upper New York State improved sharply, offset partially by a decline in Central Newfoundland. Q2/06 operating expenses declined 11% YOY to $3.9M, due to a reduction in the allocation of shared-service costs, lower water right fees, and about $0.2M in cost savings from the closure of the Rankine Generating Station. The repayment of a $22.5M term loan in Q2/05 reduced finance charges in Q2/06 by about $1.4M YOY.
- **Q2/06 Fortis Properties Up Sharply:** Earnings jumped almost 70% YOY to $8.1M in Q2/06, partly due to a sale of the Sydney, NS based Days Inn. Both Real Estate and Hospitality revenues each increased 3% YOY to $13.7M and $28.2M, respectively. Q2/06 corporate taxes dropped in half YOY to $1.7M, due to the reduction of future income tax liabilities. Q2/06 saw the completion of a few major projects, including 1) $7.7M expansion of the Holiday Inn in Sarnia; 2) a $2.5M expansion of the Holiday Inn in Kitchener-Waterloo; and, 3) a $7.2M expansion of the Blue Cross Centre in Moncton.

Exhibit 2 – 2002 - 2006 Ontario YTD Power and Gas Prices



Source: Ontario Independent Market Operator, Bloomberg, Scotia Capital.

- **Q2/06 Corporate/Financial:** Net corporate expenses improved to a loss of $6.7M in Q2/06 versus a loss of $9.6M in Q2/05. The improvement was mainly related to a $3.1M positive YOY change in foreign exchange, or a $1.9M gain in Q2/06 compared to a $1.2M loss in Q2/05. In Q2/06 FTS' debt level increased to 59.2% versus 58.7% at December 31, 2005, its preference share level dropped to 8.3% from 8.6% while its equity declined to 32.5% from 32.7% of capitalization. FTS targets a minimum 40% equity, 60% debt capital structure going forward. **FTS has an S&P issuer credit rating of BBB/Stable which was revised from a Negative outlook in December 2005**. DBRS rates FTS's unsecured debt at BBB (high), confirmed Feb/06. Fiscal 2006 capital expenditures are expected to be about $450M, of which $228M has been spent to date.
- **2H/06-2007 Outlook OK:** Fortis expects FortisAlberta and FortisBC to comprise most of its capex over the next five years. The 2006 capital expenditure forecast of $450M has $425M budgeted for regulated utilities. Fortis also expects there could be further acquisitions of utility assets in Canada, the U.S. and in the Caribbean as well as in non-regulated businesses including hydro generation, hotels and real estate. Previously, Fortis stated that it was not able to compete with "income trust valuations" on hotels and real estate transactions.

Definition of Scotia Capital Equity Research Ratings & Risk Rankings

We have a three-tiered rating system, with ratings of 1-Sector Outperform, 2-Sector Perform, and 3-Sector Underperform. Each analyst assigns a rating that is relative to his or her coverage universe.

Our risk ranking system provides transparency as to the underlying financial and operational risk of each stock covered. Statistical and judgmental factors considered are: historical financial results, share price volatility, liquidity of the shares, credit ratings, analyst forecasts, consistency and predictability of earnings, EPS growth, dividends, cash flow from operations, and strength of balance sheet. The Director of Research and the Supervisory Analyst jointly make the final determination of all risk rankings.

Ratings

1-Sector Outperform
The stock is expected to outperform the average total return of the analyst's coverage universe by sector over the next 12 months.

2-Sector Perform
The stock is expected to perform approximately in line with the average total return of the analyst's coverage universe by sector over the next 12 months.

3-Sector Underperform
The stock is expected to underperform the average total return of the analyst's coverage universe by sector over the next 12 months.

Other Ratings
Tender – Investors are guided to tender to the terms of the takeover offer.

Under Review – The rating has been temporarily placed under review, until sufficient information has been received and assessed by the analyst.

Risk Rankings

Low
Low financial and operational risk, high predictability of financial results, low stock volatility.

Medium
Moderate financial and operational risk, moderate predictability of financial results, moderate stock volatility.

High
High financial and/or operational risk, low predictability of financial results, high stock volatility.

Caution Warranted
Exceptionally high financial and/or operational risk, exceptionally low predictability of financial results, exceptionally high stock volatility. For risk-tolerant investors only.

Venture
Risk and return consistent with Venture Capital. For risk-tolerant investors only.

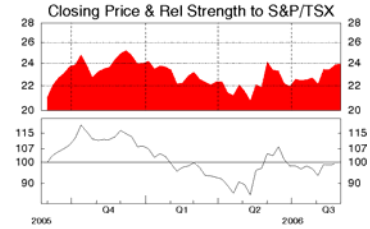
Fortis Acquires 2 Turks & Caicos Utilities

Fortis Inc. (FTS - T)
Closing Price & Rel Strength to S&P/TSX



Source: Global Insight, Inc.

Event

- Fortis (FTS) announced yesterday that it had acquired two electric utilities in the Turks & Caicos for US$90M that includes assumed debt. EPS accretion could be $0.03-$0.04/FTS share.

What It Means

- Fortis Energy, a wholly owned subsidiary of FTS, acquired all of the outstanding shares of PPC Limited (PPC) and Atlantic Equipment and Power (Atlantic) for US$90M, which includes assumed debt. Book value is about $50M that is allowed a 17.5% pre-tax base return.
- The two companies serve 80% of electricity customers in the Turks & Caicos. PPC and Atlantic each have exclusive 50-year licenses for their operating regions that expire in 2037 and 2036, respectively.
- The two utilities generate a combined 35MW of diesel-fired power to service a peak demand of about 20MW. Growth could be 6%-12%/year.
- We added $0.01 and $0.04/share to our 2H/06E and 2007E EPS on this news and added $0.50/share to our 1-YR and 2-YR targets.

For important disclosure information see Appendix A of this report.

Transaction Details:

- **Turks and Caicos' Political Structure:** While still a British Colony, Turks and Caicos just brought back a Constitution from England. There is a "Premier" as well as a British Governor since 1973 for the string of islands (two Turks and 12 Caicos islands in total). Canada has tried several times since 1973 to consolidate or form a union with Turks and Caicos. However, since the population is less than 20,000, it is possible that Turks and Caicos could join as a territory. In 2004, Nova Scotia voted to invite Turks and Caicos to join its province. This would bypass the problems admitting it as a separate province.
- **Purchase Price/Valuation:** Fortis closed this 100% regulated deal yesterday for US$90M. **We are told this equates to about 9x 2006 EPS for the assets acquired.** The status of Turks and Caicos power regulation sophistication is somewhere between Cayman Islands (advanced) and Belize (behind). FTS expects a 10% net return on its new asset base (17.5% of allowed original asset base). After higher interest expense and depreciation/amortization, FTS anticipates a $0.03-$0.04/share EPS pick-up annualized. Power demand growth (100% diesel based like Cayman Islands) in the Turks and Caicos is mostly dependent on condo developments. The 35MW of diesel generation meet a peak demand of 20MW. In 2005, there were less than 100,000 tourists that visited the islands. 2005 real growth was 4.9% with a 4% inflation rate. FTS believes that over the next 5 years, Turks and Caicos' power demand growth will be about 6%-12%/year depending on the pace of condo completions. The regulated assets were bought privately by Fortis at what appears to us to be a discount price.

Exhibit 1 – Turks and Caicos

Source: www.wikipedia.org

- **Risks:** As for all Caribbean and Atlantic islands, hurricane risks are #1 for energy utilities followed by local political changes and credit quality changes. Currently Belize's sovereign debt is in default, leading to ratings of C by S&P and Caa3 by Moody's. **FTS has close to 10% of its assets tied up in Belize.** The only dent into the 15%/year growth rate in Turks and Caicos power demand over the past 5 years was in 2004 due to tropical storm damage. While there has been no direct impact yet on FTS's profitability at either its generation or transmission/distribution assets in Belize from the default there has been a dramatic slowdown in the growth rate of Belize lately down to 2%-3%/year from 10%/year. Downside earnings risk exists on Fortis' Belize returns as higher government imposed taxation of sales and income have already occurred in Belize since its default. Belize has to import over half of its power needs from Mexico. We have not taken any Fortis EPS reduction due to Belize but caution that this is possible.

Q3/06 EPS Slight Beat Net of Tax Change

Event

- Fortis (FTS) reported basic Q3/06 earnings of $0.37/share that included $0.05/share for reduced future income tax liabilities. Recurring EPS of $0.32/share was slightly above our $0.30/share estimate and the First Call average of $0.31/share in a tight $0.29/share to $0.32/share range.

What It Means

- There was a $5.7 million positive non-recurring adjustment to FortisAlberta future taxes payable as FTS is moving to a flow through tax methodology as of January 1, 2007 ($0.05/share).
- The new $51 million hotel purchase (plus $11.6 million debt) should add about $0.01/share going forward to FTS. We believe that there was very little premium given to FTS's hotel and property division for a possible REIT conversion.
- We added 1x P/E to 20.5x to value FTS 1-Yr out for the drastic change announced on taxing income trusts in Canada that should lead to more funds flow into high yielding stocks like Fortis.

Highlights

- **Q3/06 EPS Slightly Beats Consensus:** FTS reported basic Q3/06 earnings of $0.37/share ($0.36/share diluted), or $0.32/share recurring ($0.31/share diluted) that was slightly above our $0.30/share estimate as well as the First Call consensus estimate of $0.31/share. We exclude $0.05/share ($5.7M) for the **one-time positive adjustment** in FortisAlberta to a flow through tax methodology that resulted from the mid-2006 AEUB negotiated settlement for 2007-08 rates. Exhibit 1 shows a breakdown of Q3/06 EPS contribution by segment, with select prior periods shown for comparative purposes.

Exhibit 1 – Fortis' EPS Contribution By Segment

FORTIS INC.		EPS Contribution					
		Q3/06	(%)	Q2/06	(%)	Q3/05	(%)
Regulated Utilities	FortisAlberta	0.12	32%	0.11	30%	0.09	25%
	FortisBC	0.05	15%	0.03	9%	0.04	12%
	Newfoundland Power	0.03	7%	0.08	21%	0.03	9%
	Maritime Electric	0.03	8%	0.02	6%	0.03	8%
	FortisOntario	0.02	4%	0.00	1%	0.02	6%

Note: Q3/05 EPS contribution adjusted to reflect 4 - 1 split completed October 2005.

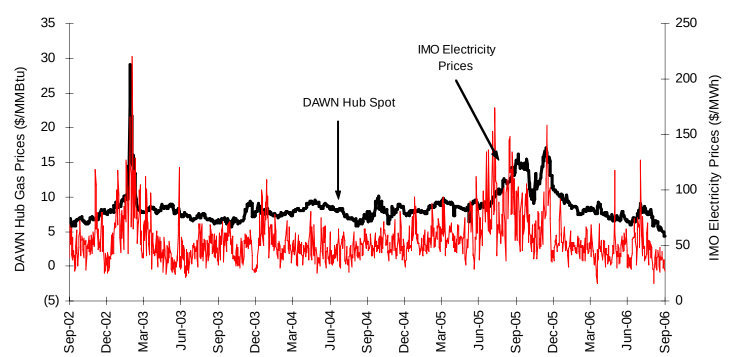
Source: Company reports; Scotia Capital estimates.

- **Stock Valuation/Observations:** We have rolled forward our energy utility valuations to Q4/07E plus Q1-Q3/08E EPS averaged. We expect Fortis to grow its EPS by 6% to 7% per year in 2007 and 2008. The certainty of FTS' EPS growth is relatively high as is its EPS quality (excluding Belize Electricity). **We now use a 20.5x P/E for FTS (up 1x yesterday on the major Income Trust taxation announcement by the Canadian Government). We believe this will steer income oriented funds flows into high yielding Canadian equities over time.**
- **Sector Thoughts:** Given 1) slower than expected U.S. and Canadian economic data; and, 2) a very low interest-rate forecast (3.8% 1-Yr out on 10-year Canadas), we moved up to recommending Overweight Energy Utilities on July 31, 2006. **We maintain that view.**
- **Q3/06 Maritime Electric:** Maritime Electric earned $3.1 million in the quarter, **slightly above** Q3/05's $3 million. Demand in Q3/06 at Maritime Electric **was up 2%** at 255 GWh due to customer growth in the residential sector and higher consumption by customers in the general service sector. On August 22, 2006, Maritime Electric received regulatory approval for a 39 MW wind power purchase agreement with the PEI Energy Corporation, which takes effect on January 1, 2007. **The Government of PEI requires 15% of its annual energy requirements to come from wind-based power by 2010.** On June 27, 2006, Maritime Electric's regulator approved a 1.2% decrease in customer electricity rates, as an effective

refund to a previous 3.55% increase in basic electricity rates due to higher fuel costs. The regulator also approved Maritime Electric's maximum allowed ROE at **10.25%, which is higher than all other Canadian energy utilities.**

- **FortisOntario Q3/06 Declines**: FortisOntario earned $1.6 million versus $2.1 million in Q3/05. The $0.5 million decline was due to the Q3/05 recognition of $1.6 million relating to a CRA reassessment of Cornwall Electric. Excluding last year's reassessment, earnings were $1.1 million higher year-over-year due to higher electricity rates. Energy supply costs decreased by $5.5 million year-over-year, due to lower market energy prices, which was partially offset by an OEB Regulated Price Plan rate increase, effective May 1, 2006.
- **Q3/06 Newfoundland Power Down:** Newfoundland Power earned only $2.6 million, compared to Q3/05's $3.4 million. Effective January 1, 2006, the company changed its revenue recognition policy from a billed basis to an accrual basis. On a 2005 comparable basis, Q3/06 earnings would have been $2.4 million, **or 8% lower year-over-year**. Higher energy supply costs led to the reduction in earnings, which was partially offset by the adoption of the accrual method for revenue recognition. During Q3/06, the regulator approved Newfoundland Power's $62.2 million 2007 Capital Budget. Customer rates increased by an average of 4.8% at the start of Q3/06, as a direct result of the Rate Stabilization Plan. Year-over-year finance charges increased slightly by $0.2 million to $8.2 million as lower-cost short-term borrowings were replaced last year with a 30-year 5.441% $60 million first mortgage sinking fund bond.
- **Q3/06 FortisAlberta Strong:** reported Q3/06 earnings of $12.3 million, up $3 million from $9.3 million in Q3/06. The increase was due to lower effective corporate income tax rates relative to previous regulatory structure for income tax recognition. Also, increased energy deliveries (**up 3.8% year-over-year** to 3,658 GWh) benefited Q3/06. Revenue decreased by 3.3% due to 1) a 1.9% decrease in distribution rates, effective January 1, 2006; and, 2) billing adjustments that favourably impacted revenue during Q3/05. FortisAlberta recognized a corporate tax gain of $1.2 million, compared to an expense of $8.3 million in Q3/05. The year-over-year reduction in corporate taxes by $9.5 million was mainly due to increased deductions taken for income tax expense purposes in excess of amounts for accounting purposes in 2006 versus 2005. FTS estimated a net non-recurring positive $5.7 million impact on Q3/06 ($0.05/share) for current and prior-year tax period adjustments.
- **FortisAlberta 2006-07 Revenue Requirements:** On June 29, 2006, FortisAlberta announced AEUB approval for the company's 2006-07 revenue requirements. Revenue for 2006 and 2007 is set at $217 million and $228 million, respectively. As part of the agreement with AEUB, FortisAlberta has agreed to an operating expense of $114 million in each of 2006 and 2007. Also capital expenditures (before customer contributions) will be about $400 million for the two years combined. Under the agreement and effective January 1, 2006, **the allowed rate of return on common equity is 8.93%.**
- **Q3/06 FortisBC** reported Q3/06 net earnings of $5.7 million, up from $4.6 million during Q3/05. Year-over-year earnings were higher due to 1) 5.9% higher electricity rates; 2) electricity sales growth; 3) lower operating expenses; and, 4) lower effective corporate tax rates. The increase in earnings was partially offset by 1) higher amortization costs; 2) higher finance charges; 3) increased power purchase expenses; and, 4) the implementation of the new performance-based rate-setting mechanism (PBR). Electricity sales were 20 GWh, or **3% higher** than the same period last year due to customer growth in the Okanagan area. Q3/06 operating expenses declined by $1.2 million year-over-

Exhibit 2 – 2002 - 2006 Ontario YTD Power and Gas Prices



Source: Ontario Independent Market Operator, Bloomberg, Scotia Capital year as a **relatively higher amount of overhead costs were capitalized**. The higher costs of borrowing increased FortisBC's year-over-year finance charges by $1.7 million in Q3/06.

- **Q1/07 CUP:** Q1/07 CUP earnings of US$0.30/share, was **above our estimate of US$0.18/share** due to lower operating expenses and the implementation of the Cost Recovery Surcharge. Operating revenue for Q1/07 rose 30% year-over-year to US$41.3 million due to new customers such as the recently opened 365-room Ritz-Carlton hotel as well as new office towers. On August 1, 2005, CUP implemented a Cost Recovery Surcharge (CRS) of about $0.0089/kWh to recover about US$13.4 million of uninsured hurricane losses. The Q1/07 CRS surcharge revenue was US$1.2 million. During the expected term of the CRS ending July 31, 2008, there will be no increase in CUP's billing rate as agreed to with the Cayman Islands Government. CUP forecasts fiscal 2007 sales volume growth of about 10%.
- **Q3/06 Belize Electricity Stronger:** Earnings of $3.8 million were up $0.6 million from Q3/05, **due primarily to** reduced finance charges (down $1.1 million year-over-year) and slightly stronger electricity sales growth (up only 1% versus a historical 10% due to the country's bankruptcy). Energy supply costs increased 21% year-over-year (excluding f/x currency translation impacts), primarily due to an increase in the cost of purchased fuel. Q3/06 finance charges dropped by $1.1 million year-over-year due to the repayment (with proceeds from a recent preferred share offering) of 1) certain trade payables; 2) inter-company loans; 3) external loans; and, 4) various overdraft facilities. On August 20, 2006, Belize Electricity signed a new PPA with Comision Federal de Electricidad (CFE) of Mexico, following the expiration of the previous PPA with CFE. Under the agreement, the cost of power to Belize Electricity will be tied to international fuel prices (similar to the recent US$50 billion natural gas deal between Bolivia and Argentina), which represents about a 59% increase to the company's average cost of power. As a result of the increased cost of CFE's power, Belize Electricity has reduced its purchases of firm power by 10 MW to 15 MW.
- **Q3/06 Turks and Caicos Utilities:** On August 28, 2006, FTS acquired all of the outstanding shares of PPC Limited and Atlantic Equipment & Power (Turks and Caicos) Ltd. for a combined purchase price of about $97.4 million. The two companies combined serve 7,400 customers, or about 80% of electricity requirements in the Turks and Caicos Islands. Both companies operate on 50-year licenses that expire between 2036 to 2037. A fixed rate of return of 17.5% is used on a defined asset base of about US$50 million, so FTS' net return is about 9%. For the period August 28, 2006 to September 30, 2006, Turks and Caicos Utilities generated $0.7 million in earnings, or about $0.01/share.
- **Q3/06 Fortis Non-Regulated Generation:** Year-over-year earnings remained flat at $7.8 million due to 1) lower average wholesale energy prices in Ontario; and, 2) higher operating costs; which offset 1) higher production in Belize; 2) lower finance charges; and, 3) a lower effective corporate income tax rate. Year-over-year energy sales increased by 24% to 288 GWh, primarily due to higher hydroelectric production at the Mollejon and Chalillo generating facilities in Belize that benefited from higher rainfall levels. In Ontario, the average wholesale energy price was $46.59/MWh compared to $85.91/MWh last year. Finance charges were $1 million lower year-over-year due to a reduction of inter-company finance charges in the company's Belize operations. During the quarter, a relatively higher proportion of earnings were derived from the tax-exempt Belize operations, which resulted in a $2.8 million year-over-year decline in corporate taxes, to $1.6 million.
- **Q3/06 Fortis Properties Up:** Earnings jumped 29% year-over-year to $6.3 million in Q3/06, partly due to higher earnings from the expansions of the Holiday Inn Sarnia, Holiday Inn Kitchener-Waterloo, and the Blue Cross Centre. Real Estate and Hospitality revenues increased 5% and 4% year-over-year to $13.7 million and $30.3 million, respectively. Q3/06 corporate taxes remained flat year-over-year at $3.2 million as the effective corporate tax rate was lower due to Federal tax rate reductions effective January 1, 2006. On October 19, 2006, Fortis Properties announced an agreement to purchase four hotels in Western Canada for $51.6 million (plus $11.6 million of debt).The deal closed on November 1, 2006. Fortis' CEO stated "the acquisition is expected to be immediately accretive to earnings of Fortis". Our speculative estimate is that initial EPS accretion is quite modest at $0.01/share/year starting in 2007.

- **Q3/06 Corporate/Financial:** Net corporate expenses increased year-over-year to a loss of $8.3 million in Q3/06 versus a loss of $3.9 million in Q3/05. The increase was mainly related to a negative $3.5 million year-over-year change in foreign exchange, or a $0.3 million gain in Q3/06 compared to a $3.8 million gain in Q3/05. In Q3/06 FTS' debt level decreased to 57.1% versus 58.7% at December 31, 2005. Its preference share level increased to 11% from 8.6% ($125 million preferred share issuance - F Series) while its equity declined to 31.9% from 32.7% of capitalization. FTS targets a minimum 40% equity, 60% debt capital structure going forward. **FTS has an S&P issuer credit rating of BBB/Stable which was revised from a Negative outlook in December 2005**. DBRS rates FTS's unsecured debt at BBB (high). Fiscal 2006 capital expenditures are expected to be about $475 million, of which $346 million has been spent to date.
- **Outlook:** Fortis expects FortisAlberta and FortisBC to comprise most of its capex over the next five years. The 2006 capital expenditure forecast of $475 million has $425 million budgeted for regulated utilities. Fortis also expects there could be further acquisitions of utility assets in Canada, the U.S. and in the Caribbean (such as Turks and Caicos) as well as in non-regulated businesses including hydro generation, hotels and real estate. Previously, Fortis stated that it was not able to compete with "income trust valuations" on hotels and real estate transactions. This has not stopped management from finding several good deals over the past few years. Now, with the announced Federal changes to tax income trusts going forward, **the real estate playing field will be level once again.**

Definition of Scotia Capital Equity Research Ratings & Risk Rankings

We have a three-tiered rating system, with ratings of 1-Sector Outperform, 2-Sector Perform, and 3-Sector Underperform. Each analyst assigns a rating that is relative to his or her coverage universe.

Our risk ranking system provides transparency as to the underlying financial and operational risk of each stock covered. Statistical and judgmental factors considered are: historical financial results, share price volatility, liquidity of the shares, credit ratings, analyst forecasts, consistency and predictability of earnings, EPS growth, dividends, cash flow from operations, and strength of balance sheet. The Director of Research and the Supervisory Analyst jointly make the final determination of all risk rankings.

Ratings

1-Sector Outperform
The stock is expected to outperform the average total return of the analyst's coverage universe by sector over the next 12 months.

2-Sector Perform
The stock is expected to perform approximately in line with the average total return of the analyst's coverage universe by sector over the next 12 months.

3-Sector Underperform
The stock is expected to underperform the average total return of the analyst's coverage universe by sector over the next 12 months.

Other Ratings
Tender – Investors are guided to tender to the terms of the takeover offer.

Under Review – The rating has been temporarily placed under review, until sufficient information has been received and assessed by the analyst.

Risk Rankings

Low
Low financial and operational risk, high predictability of financial results, low stock volatility.

Medium
Moderate financial and operational risk, moderate predictability of financial results, moderate stock volatility.

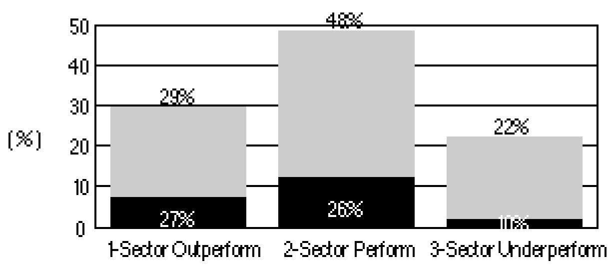
High
High financial and/or operational risk, low predictability of financial results, high stock volatility.

Caution Warranted
Exceptionally high financial and/or operational risk, exceptionally low predictability of financial results, exceptionally high stock volatility. For risk-tolerant investors only.

Venture
Risk and return consistent with Venture Capital. For risk-tolerant investors only.

Scotia Capital Equity Research Ratings Distribution*

Distribution by Ratings and Equity and Equity-Related Financings*



■ Percentage of companies covered by Scotia Capital Equity Research within each rating category.

■ Percentage of companies within each rating category for which Scotia Capital has undertaken an underwriting liability or has provided advice for a fee within the last 12 months.

* As at October 31, 2006.

Q4/06 EPS Slightly/Mildly Beats

Event

- Fortis (FTS) reported basic Q4/06 earnings of $0.33/share that appears to be about $0.30/share on a recurring basis, slightly beating our $0.29/share estimate and the First Call average of $0.27/share in an unusually wide and unrealistic $0.19/share to $0.37/share range.

What It Means

- We are upgrading FTS to 2-Sector Perform from 3-Sector Underperform on its 12% plus recent price depreciation from a peak price of about $30/share, on January 2, 2007.
- Given the stronger than expected U.S. economy since January 2, 2007, that has weakened U.S. prospects for rate cuts toward nil and resulted in higher Canadian and U.S. interest rates, we shaved 0.5x off our FTS P/E to 20x.
- After a review of our 2007E-08E EPS, we added $0.05/share to 2007E and 2008E EPS. This kept our $28.50/share 1-Yr target unchanged.

Highlights

- **Q4/06 EPS A Slight/Mild Beat:** FTS reported basic Q4/06 earnings of $0.33/share that appeared to be about $0.30/share net of minor non-recurring items. This was slightly above our $0.30/share estimate as well as the First Call consensus estimate of $0.27/share that was $0.02/share lower that it should have been due to an outlier $0.19/share estimate. We excluded $0.01/share ($1.2 million) for the one-time Q4/06 positive regulatory adjustment in FortisAlberta to a flow through tax methodology change in mid-2006 (same amount in Q3/06). We also excluded $0.01/share for the hurricane related cost recovery of previously written down costs at Caribbean Utilities in its Oct. 31, 2006 quarterly. Exhibit 1 shows a breakdown of Q4/06 EPS contribution by segment, with select prior periods shown for comparative purposes.

Exhibit 1 – Fortis' EPS Contribution by Segment

FORTIS INC.		EPS Contribution Q4/06	(%)	Q3/06	(%)	Q4/05	(%)
Regulated Utilities	FortisAlberta	0.08	24%	0.12	32%	0.04	19%
	FortisBC	0.06	19%	0.05	15%	0.06	26%
	Newfoundland Power	0.08	26%	0.03	7%	0.03	13%
	Maritime Electric	0.02	7%	0.03	8%	0.02	8%
	FortisOntario	0.01	3%	0.02	4%	0.00	1%
	Belize Electricity	0.03	8%	0.04	10%	0.02	9%
	Caribbean Utilities	0.03	8%	0.03	8%	0.03	13%
	Turks and Caicos	0.03	8%	0.01	2%		
Non-Regulated Businesses	Fortis Generation	0.07	20%	0.08	20%	0.08	38%
	Fortis Properties	0.03	8%	0.06	16%	0.03	13%
	Fortis Corporate	-0.11	-32%	-0.08	-21%	-0.08	-39%
		0.33		0.37		0.22	

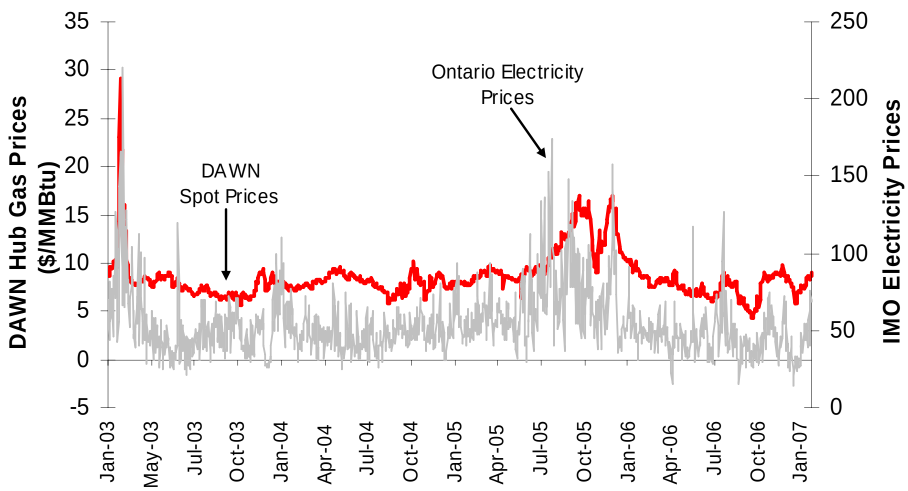
Note: Q4/05 EPS contribution adjusted to reflect 4 - 1 split completed October 2005.

Source: Company reports; Scotia Capital estimates.

- **Stock Valuation/Observations:** We went to **3-Sector Underperform in Q4/06** as FTS' interest sensitive stock shot up over 20% with **no** change in interest rates. We shaved our 20.5x P/E multiple to 20x to reflect somewhat higher interest rates in 2007 YTD than our economists were forecasting. However, we added $0.05/share to both 2007E and 2008E EPS for stronger organic growth expectations. FTS announced 7% earnings growth in 2006. We expect Fortis to grow its EPS by 6% to 7% per year in 2007 and 2008 **but only at constant allowed ROEs**. This will **not** be the case in 2007 as (1) FTS received a 64 basis point cut at Newfoundland Power to an 8.6% Allowed ROE for 2007; and, (2) Fortis Alberta received a 42 basis point cut to an 8.51% Allowed ROE from an 8.93% Allowed ROE. Coupled with FTS' 5.1M share equity deal at $29/share and some positive non-recurring items, 2007 EPS should be about flat. The equity deal was a timing coup as the yield market turned south the day after its deal was announced on much stronger than expected U.S. and Canadian jobs growth. FTS' yield is also still materially lower than both Canada's large cap pipeline stock yields. We still prefer the pipes.

- **Sector Weight Lowered Entering 2007: We also reduced** our Overweight call on the Energy Utilities sector to Market Weight entering January 2007. This was due to Canadian energy utility stock yields falling to a point where they entered fair valuation territory relative to 10-year Canada yields. Given (1) better than expected U.S. and Canadian economic data; and, (2) a very low interest-rate forecast (3.8% 1-Yr out on 10-year Canadas), we moved up to recommending Overweight Energy Utilities on July 31, 2006. **We maintain that view.** We just received net funds flows data into dividend and income funds for December 2006. It was a **negative $8 million, the second month of negative flow in a row. The last time this occurred was in early 2000.**
- **Q4/06 Maritime Electric:** Maritime Electric earned $2.4 million in the quarter, **well above** Q4/05's $1.7 million. Higher earnings were due to a 3.35% increase in basic electricity rates as well as higher electricity sales. In Q3/06, Maritime Electric received regulatory approval for a 39 MW wind power purchase agreement with the PEI Energy Corporation, which took effect on January 1, 2007. **2007 Allowed ROE: 10.25%** (2006 Allowed ROE: 10.25%).
- **FortisOntario Q4/06 Up**: FortisOntario earned $1 million in Q4/06 versus $0.2 million in Q4/05. The $0.8 million increase was due to increased distribution electricity rates and lower YOY operating expenses that included costs for an early retirement program in Q4/05. Moderate weather conditions reduced electricity sales by 5.1% to 15 GWh. **2007 Allowed ROE: 9%** (2006 Allowed ROE: similar).

Exhibit 2 – Ontario Power Prices vs. DAWN Spot Prices



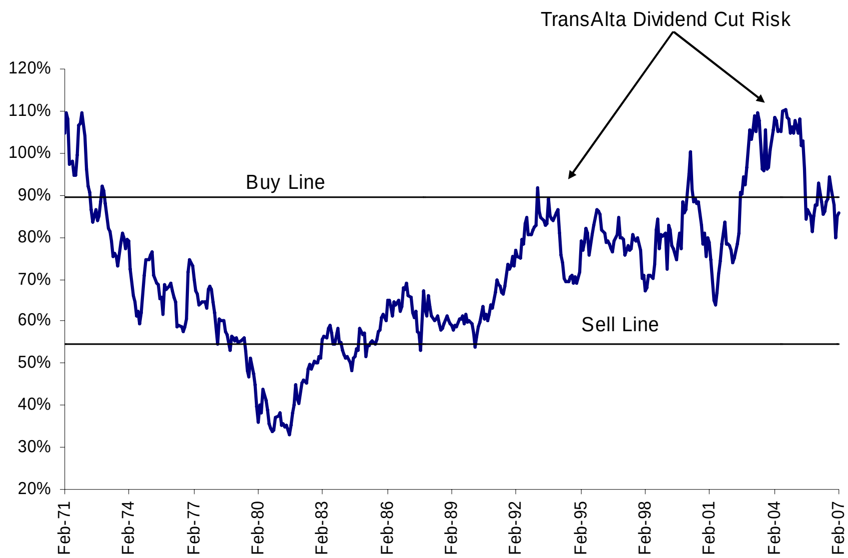
Source: IESO; Bloomberg; Scotia Capital.

- **Q4/06 Newfoundland Power Up, 2007 Earnings To Be Slightly Lower:** Newfoundland Power earned $8.8 million versus only $2.9 million in Q4/05 due partially to YOY changes in billing methodology and a 4.8% increase in customer rates in mid-2006. During Q4/06, the Regulator allowed a $2.7 million one-time accounting accrual to offset increased taxes in 2007 plus ordered the deferral of $6.9 million of increased depreciation expense until a 2007 hearing. The regulator also approved Newfoundland Power's $62.2 million 2007 Capital Budget. FTS' CEO stated that Newfoundland Power's 2007 earnings will be slightly lower due to a materially lower ROE more than offsetting rate base growth. **2007 Allowed ROE: 8.60%** (2006 Allowed ROE: 9.24%).
- **Q4/06 FortisAlberta Doubles YOY:** Reported Q4/06 earnings of $8.3 million, or about double the $4.2 million earned in Q4/05. The YOY earnings increase was primarily due to lower effective corporate income tax rates relative to the previous regulatory structure for

income tax recognition. Also, energy deliveries of 68 GWh increased 2.8% YOY. Corporate taxes at FortisAlberta were only $1 million in Q4/06, compared to $2.4 million in Q4/05. The YOY reduction in corporate taxes by $1.4 million was mainly due to increased deductions taken for income tax expense purposes in excess of amounts for accounting purposes in 2006 versus 2005. **2007 Allowed ROE: 8.51%** (2006 Allowed ROE: 8.93%).

- **Q4/06 FortisBC** reported Q4/06 net earnings of $6.4 million, up from $4.6 million during Q4/05. Year-over-year earnings were higher due to 5.9% higher electricity rates as well as electricity sales growth. The increase in earnings was partially offset by 1) higher amortization costs; 2) higher finance charges; and, 3) increased power purchase expenses. **2007 Allowed ROE: 8.77%** (2006 Allowed ROE: 9.20%).
- **Q2/07 CUP:** Q2/07 CUP earnings of US$0.27/share, was **above our estimate of US$0.19/share** due to lower operating expenses and the Cost Recovery Surcharge ($0.05/share). Operating revenue for Q2/07 rose 19% YOY due to new customers such as the recently opened 365-room Ritz-Carlton hotel as well as new office towers. On August 1, 2005, CUP implemented a temporary Cost Recovery Surcharge (CRS) of about $0.0089/kWh to recover about US$13.4 million of uninsured hurricane losses. The Q2/07 CRS non-recurring surcharge revenue was US$1.2 million. During the expected term of the CRS ending July 31, 2008, there will be no increase in CUP's billing rate as agreed to with the Cayman Islands Government. CUP forecasts fiscal 2007 sales volume growth of about 10%.

Exhibit 3 – Electric Utility Dividend Yields vs. 10-year Canadas



Source: Global Insight Inc.; Scotia Capital.

- **Further CUP Developments:** On November 7, 2007, FTS acquired an additional 16% ownership interest in CUP for US$49 million, and now owns about 54% of CUP. **Going forward, FTS will consolidate CUP's financials on a 2-month lag basis.** CUP's stock has dropped over 10% recently, primarily due to, in our opinion, local Caymans that may be selling CUP's stock on the back of a series of unexpected generator failures that made front page news there. Some of these unplanned outages appear to be the lingering effect of Hurricane Ivan on transmission and distribution assets. We believe that this is temporary in nature, and not a chronic problem. System availability in 2006 was 99.92%. We continue to have concerns over fair CUP treatment by the government in a license extension that has drifted since pre-hurricane Ivan (expires in 2011).

- **Q4/06 Belize Electricity Stronger:** Earnings of $2.8 million were up $0.8 million from Q4/05, due primarily to lower finance charges and slightly stronger electricity sales growth (up 4.6% QOQ). Finance charges were $1.2 million lower than Q4/05 due to debt repayment from proceeds received from a recent Belize share offering. A 35% increase in energy supply costs had little if any impact on the company as the cost of fuel and purchased power is effectively a flow through to customer rates. On August 20, 2006, Belize Electricity signed a new two-year PPA with Comision Federal de Electricidad (CFE) of Mexico, following the expiration of the previous PPA with CFE. Under the agreement, the cost of power to Belize Electricity will be tied to international fuel prices **which represents about a 59% increase to the company's average cost of power.** As a result of the increased cost of CFE's power, Belize Electricity has reduced its purchases of firm power by 10 MW to 15 MW. The country of Belize remains rated D (insolvent) by S&P. We have concerns about consistent treatment of FTS' asset there by the government.
- **Q4/06 Turks and Caicos Utilities:** On August 28, 2006, FTS acquired all of the outstanding shares of PPC Limited and Atlantic Equipment & Power (Turks and Caicos) Ltd. for $97.4 million. Both companies operate on 50-year licenses. During Q4/06, Turks and Caicos Utilities generated $2.8 million in earnings, reflecting the first full quarter under Fortis since the acquisition. YOY electricity sales increased 32% in Q4/06. **Fixed rate of return: 17.5% (on a defined asset based of US$50 million).** FTS paid only 10x P/E for this business.
- **Q4/06 Fortis Non-Regulated Generation:** YOY earnings fell by $1.7 million to $6.8 million due to (1) materially lower average wholesale energy prices in Ontario ($42.69/MWH versus $71.46/MWH); and, (2) a lower contracted price for energy sales in Belize, which offset (1) increased production; 2) lower operating expenses; and, (3) a lower effective corporate income tax rate. YOY energy sales increased by 9.3% to 340 GWh, primarily due to higher hydroelectric production at the Mollejon and Chalillo generating facilities in Belize that benefited from higher rainfall levels.
- **Q4/06 Fortis Properties:** Q4/06 earnings were relatively flat YOY at $2.8 million. On November 1, 2006, Fortis Properties purchased four hotels in Alberta and B.C. for $52 million (including assumed debt). Higher operating expenses and amortization costs prevented a 9% YOY revenue increase from flowing through to earnings. The occupancy rate in the Real Estate Division was 94.9%, **down** from 95.9% during the previous year. Fortis' CEO previously stated "the acquisition is expected to be immediately accretive to earnings of Fortis". Our speculative estimate remains that the initial EPS accretion will be quite modest at $0.01/share/year starting in 2007.
- **Outlook:** FTS' forecast of $600 million for 2007 spending and $2.6 billion over the next five years will keep it coming back for more equity at times, especially if acquisitions continue. FTS also issued $25 million of 4.9% preferred in September 2006. In the January 29, 2007, issue of *Power Finance & Risk*, FTS' CFO stated that its target equity structure is about 40% versus only 32% (which is why FTS is rated BBB+ and not A). With plenty of organic growth, we believe FTS should trade similar to Canada's pipes on P/E and yield minus a fraction for the financial mess uncertainty in Belize and uncertainty in Cayman Islands over future shareholder treatment.

Definition of Scotia Capital Equity Research Ratings & Risk Rankings

We have a three-tiered rating system, with ratings of 1-Sector Outperform, 2-Sector Perform, and 3-Sector Underperform. Each analyst assigns a rating that is relative to his or her coverage universe.

Our risk ranking system provides transparency as to the underlying financial and operational risk of each stock covered. Statistical and judgmental factors considered are: historical financial results, share price volatility, liquidity of the shares, credit ratings, analyst forecasts, consistency and predictability of earnings, EPS growth, dividends, cash flow from operations, and strength of balance sheet. The Director of Research and the Supervisory Analyst jointly make the final determination of all risk rankings.

Ratings

1-Sector Outperform
The stock is expected to outperform the average total return of the analyst's coverage universe by sector over the next 12 months.

2-Sector Perform
The stock is expected to perform approximately in line with the average total return of the analyst's coverage universe by sector over the next 12 months.

3-Sector Underperform
The stock is expected to underperform the average total return of the analyst's coverage universe by sector over the next 12 months.

Other Ratings
Tender – Investors are guided to tender to the terms of the takeover offer.

Under Review – The rating has been temporarily placed under review, until sufficient information has been received and assessed by the analyst.

Risk Rankings

Low
Low financial and operational risk, high predictability of financial results, low stock volatility.

Medium
Moderate financial and operational risk, moderate predictability of financial results, moderate stock volatility.

High
High financial and/or operational risk, low predictability of financial results, high stock volatility.

Caution Warranted
Exceptionally high financial and/or operational risk, exceptionally low predictability of financial results, exceptionally high stock volatility. For risk-tolerant investors only.

Venture
Risk and return consistent with Venture Capital. For risk-tolerant investors only.

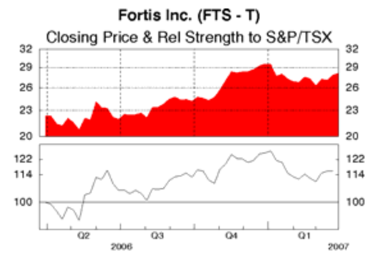
Blue Chip Terasen Gas Acquisition Slightly/Mildly Accretive



Source: Global Insight, Inc.

Event

- We came off a Fortis (FTS) research restriction following its $1.15 billion subscription receipts offering, issued as part of the February 26, 2007 acquisition of Terasen Inc. from Kinder Morgan.

What It Means

- The $3.7 billion acquisition, including assumed debt of $2.3 billion, of Terasen Gas from Kinder Morgan gives Fortis on average, a higher quality and broader regulated asset base. We calculate 2H/07E accretion of $0.02/share assuming the deal closes on June 30/07 and 2008E accretion of $0.04/share (possibly $0.05/share in 2009E assuming some SG&A synergies by that time). This assumes about 90-100 bp of additional ROE is earned from Terasen Gas PBR savings.
- We added $1/share rounded to our $28.50/share 1-Yr target (now $29.50/share) using an unchanged 20x P/E. Our last recommendation move was upgrading Fortis to 2-Sector Perform after a 12% stock price correction from its peak January 2, 2007 share price of $30/share.
- Using our new 1-Yr target price of $29.50/share, we like the deal at $26.00/share. We maintain FTS at 2-Sector Perform.

Acquisition Details

- On February 26, 2007, Fortis announced it will acquire Terasen Inc. from Kinder Morgan for $3.7 billion that includes the assumption of $2.3 billion in A3-rated debt (Moody's). The deal is expected to close in mid-2007 following various regulatory approvals.
- Assets included in the purchase are:
  - **Terasen Gas Inc.** - natural gas distribution to 90% of B.C. gas users. The 2007 rate base is $2,474 million, using a 35% common equity component. The allowed regulated ROE for 2007 is 8.37%. We assume FTS earns 50 bp extra of ROE under agreed upon cost performance sharing programs.
  - **Terasen Gas (Vancouver Island)** - 85,000 customers on Vancouver Island and B.C.'s Sunshine Coast. The 2007 rate base is $482 million, using a 40% common equity component. The allowed ROE for 2007 is 9.07%.
  - **Terasen Gas Whistler** - serves over 2,000 customers in the Whistler, B.C. area; and,
  - **Terasen Gas Energy Services** - an alternative energy development company with small distribution systems.
- Assets **not** included in the Terasen purchase are: (1) the Corridor Pipeline; (2) the Express Pipeline; (3) the Platte Pipeline; (4) Trans Mountain; and, (5) Kinder Morgan Canada.
- **Next Steps:** On March 21, 2007 the Competition Bureau of Canada approved the Terasen Inc. transaction with a "no-action" letter (expected). The final material regulatory approval will be from the British Columbia Utilities Commission (BCUC), which is expected without controversy in Q2/07.

Financing Details

- Fortis will finance the Terasen acquisition with a now completed $1.152 billion subscription receipt offer at $26.00/receipt. The deal went well as it was priced at a 5% discount to its previous closing price at that time. Since the acquisition/offering announcements on February 26, 2007 at $26/share, Fortis's stock is up 7.2% to $28.12/share, which beat the S&P/TSX Utilities Index at 3.6% and the S&P/TSX Composite at 1.8%. This showed that FTS' $26/share receipt deal was priced to sell while the $29/share deal in early January 2007 was not.
- FTS was rated BBB+ going into the Terasen transaction due to inadequate equity levels according to the credit rating agencies, even after its $150 million equity deal in early January 2007.
- The $3.7 billion purchase price will buy:
  - $900 billion of regulated equity (35% of $2.5B rate base) at Terasen Gas;
  - $200 million of regulated equity (40% of $480M) at Terasen Gas Vancouver Island (TGVI); and,
  - about $10 million of regulated equity at Terasen Gas Whistler (TGW).
- FTS therefore issued $1.152 billion of new equity for $1.11 billion of Terasen's 2007 regulated equity, in line.

Valuation Impact

- For 2007, we increased our average FTS shares O/S to 131.5 million, or the mid-point between Q4/06 shares outstanding of 109.3 million and post Terasen transaction shares O/S of 153.6 million (44.3M new shares).
- Since FTS' purchase price of about 18x P/E on 2007E Terasen earnings of $102 million (see Exhibit 1) is lower than FTS' P/E multiple of 20x, the transaction by definition is moderately accretive prior to additional debt and preferred financing as FTS raised equity that is almost identical to the regulated equity being purchased.
- However, **one has to deduct** the after-tax incremental debt and preferred service charges on the additional $450 million of holdco debt ($14 million est. at 3% after-tax) and $200 million of preferred shares ($9 million at 4.5% after tax) that we assume FTS needs to issue ($650 million total). Regulated debt to be assumed is only $1.9 billion versus $2.55 billion required at FTS' $3.7 billion purchase price. **We therefore believe that only with immediate synergies** (FTS estimated a minimum 2 years that it would run Terasen as a stand alone) could the deal be materially accretive.

Exhibit 1 – Terasen Regulated 2007 Earnings

ROE	Regulated Equity	2007E Earnings
8.37%	$900M (TG)	$75
9.03%	$200M (TGVI)	$18
10.00%	$10M (TGW)	$1
Est. 2007 PBR (70bps x $900M)		$6
		$102M
18x P/E multiple		**$1.8B**

Source: Scotia Capital.

- **2007E-08E EPS Pick-Up:** We estimate FTS could pick up $0.02/share for 2H/07E, $0.04/share for 2008E and $0.05/share for 2009E from the deal as currently envisioned depending on degree of success in performance based cost savings sharing (PBR). Without any PBR, the deal looks like an EPS wash. FTS applied for a 2-year extension to a 4-year PBR agreement at Terasen Gas that the Regulator has not yet ruled on.
- **Summary:** We added $1/share to our FTS 1-Yr target and 2-Yr targets maintaining our 20x P/E. We rounded up the additional $0.04/share in 2008 from the deal at 20x to $1/share. At $26/share where the equity issue was priced at a 5% discount to trading levels, we would by definition have gone to a 1-Sector Outperform as the deal (1) is mildly accretive; (2) lowers the regulatory risk of FTS; and, (3) at $26/share would have produced a 16% 1-Yr return. However, FTS' stock moved up 7% to over $28/share from the $26/share deal while we were under restriction.

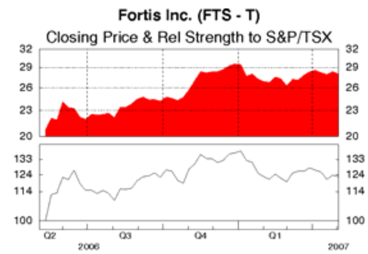
Q1/F07 EPS Beats On Tax Adjustments



Source: Global Insight, Inc.

Event

- Fortis (FTS) reported basic Q1/F07 EPS of $0.38 ($0.35 diluted) beating our $0.35 estimate and the Bloomberg consensus EPS estimate of $0.35. Results were in line except for a $0.05/share positive swing year-over-year in regulator-approved Alberta tax treatments.

What It Means

- Q1/F07 EPS: The key factor was the $0.05/share positive swing in year-over-year Alberta tax treatments. Starting in Q3/F07, year-over-year quarterly earnings will finally be comparable again except for the new acquisition of Terasen Gas.
- FTS also raised its quarterly dividend by 10.5% or $0.02/share to $0.21/share.
- On Feb. 9, 2007, we upgraded FTS to 2-Sector Perform from 3-Sector Underperform on its 12% plus price depreciation from a peak price of about $30/share (January 2, 2007).

Qtly EPS (Basic)	Q1	Q2	Q3	Q4	Year	P/E
2005A	$0.40 A	$0.37 A	$0.36 A	$0.22 A	$1.35	17.98
2006A	$0.35 A	$0.37 A	$0.37 A	$0.33 A	$1.42	20.96

Highlights

- **Q1/F07 EPS A Slight/Mild Beat:** FTS reported basic Q1/07 EPS of $0.38 ($0.35 diluted). Basic earnings were moderately above our $0.35/share estimate as well as the Bloomberg consensus estimate of $0.354/share. The one-time Q3/06 regulatory adjustment to FortisAlberta's tax charges in customer rates to a flow through tax methodology from normalized taxes worked its way through Q1/07 with a positive $0.05 EPS swing. There was also $0.01/share for the non-recurring hurricane-related cost recovery of previously written-down costs at Caribbean Utilities. Exhibit 1 shows a breakdown of Q1/07 EPS contribution by segment, with select prior periods shown for comparative purposes.

Exhibit 1 – Fortis' EPS Contribution by Segment

FORTIS		EPS Contribution					
		Q1/07	(%)	Q4/06	(%)	Q1/06	(%)

		0.38		0.33		0.35	

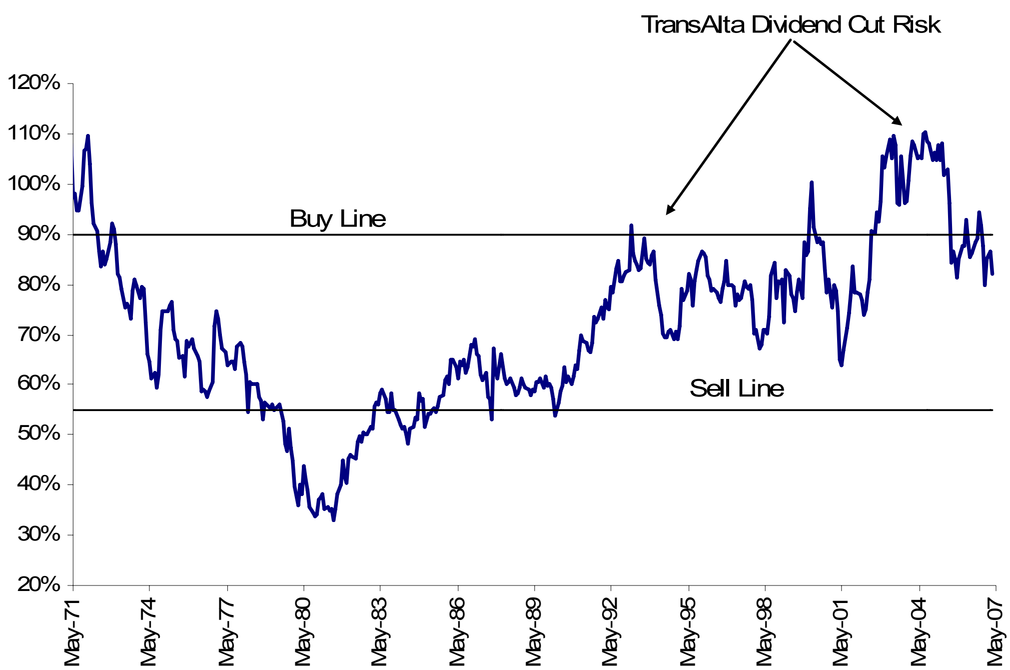
Note: Q4/05 EPS contribution adjusted to reflect 4 - 1 split completed October 2005.

Source: Company reports; Scotia Capital estimates.

- **Stock Valuation/Observations:** We are at 2-Sector Perform and stayed there after FTS' results, shaving Q2/F07 by the same $0.03/share that FTS beat by in Q1/F07. We use a 20x P/E multiple on an unchanged 2008E EPS of $1.47/share. There is a slight bias higher on 2008E EPS as our economists are now looking at 4.4%. 10-Yr Canada rates in one year (up 25 bp). If proven accurate, 4.4% rates would also compel us to reduce our sector P/E's by about 1x. FTS' yield moved up with a 10.5% dividend hike to $0.21/share yesterday. Its yield was materially lower than both Canada's large cap pipeline stock yields. We still prefer the pipes.
- **Sector Weight Neutral: We reduced** our Overweight call on the Energy Utilities sector to Market Weight entering January 2007 on (1) much higher than expected jobs growth that lifted interest rates; and, (2) a 14% total return in Q4/06 for the group we cover**.** At that time, our economists forecast 3.8% 10-Yr Canada rates one year out.
- **Q1/F07 Maritime Electric:** Maritime Electric earned $2.6 million in the quarter, up $0.5 million, as a 3.35% increase in basic electricity rates as well as higher electricity sales kicked in. Allowed 2007 ROE remains at the 2006 rate of 10.25%. Maritime Electric will file for new rates in fall 2007 for 2008.

- **Q1/F07 FortisOntario:** FortisOntario earned $1.3 million in Q1/F07 versus $1 million in Q1/06 on higher electricity rates and a 1.5% sales increase. Colder weather conditions supported. **2007 Allowed ROE: 9%, same as 2006**.
- **Q1/F07 Newfoundland Power:** Earnings of $10.5 million were slightly off the $10.7 million earned in Q1/F06 as a materially lower allowed ROE hurt earnings, partly offset by higher sales (up 1.8%) and lower effective tax rates. Newfoundland Power's $62.2 million 2007 Capital Budget was approved. **2007 Allowed ROE: 8.60%** (2006 Allowed ROE was 9.24%).
- **Q1/F07 FortisAlberta Up 25%:** Earnings of $11.9 million were up 25% over the $9.5 million earned in Q1/F06 due to lower effective FortisAlberta corporate income tax rates. FTS posted a $4.1 million recovery of tax expenses versus $1.1 million expensed in Q1/F06 (a $0.05/share swing). Revenue was up only 2.2% to $63.3 million on energy deliveries of 3,945 GWh (up 2.8% year-over-year). FTS estimated $275 million of 2007 capital expenditures driven by customer growth and inflation. **2007 Allowed ROE: 8.51%** (2006 Allowed ROE was 8.93%).
- **Q1/F07 FortisBC:** Reported Q1/F07 net earnings of $11.7 million were flat with $11.8 million earned in Q1/F06. The positive impacts of 5.9% higher electricity rates and 4.6% higher electricity sales were offset by a lower allowed ROE, lower capitalization of overhead costs to projects (20% versus 27.5%) and higher amortization. **2007 Allowed ROE: 8.77%** (2006 Allowed ROE was 9.20%).

Exhibit 3 – Electric Utility Dividend Yields vs. 10-year Canadas



Source: Global Insight Inc.; Scotia Capital

- **Q1/F07 CUP:** FTS estimated the March 31, 2007 CUP quarter earnings loss at $0.4 million (actual quarter will end April 30, 2007) versus $1.6 million earned in equity income in 2006. Operating expenses were up due to a charge on disposal of CUP's steam system (US$3.7 million) that could debatably be a one time item. FTS now consolidates CUP's results as it now owns 54% of CUP. During the expected term of the hurricane recovery (CRS) ending

July 31, 2008, there will be no increase in CUP's billing rate as agreed to with the Cayman Islands Government. CUP forecasts fiscal 2007 sales volume growth of about 10%.

- **Q1/F07 Belize Electricity Stronger:** Earnings of $2.7 million were up $1.2 million from Q1/F06, due primarily to lower finance charges and 8.8% higher electricity sales. Finance charges were $0.9 million lower than Q1/F06 due to debt repayment from proceeds received from a recent Belize share offering. On August 20, 2006, Belize Electricity signed a new two-year PPA with Comision Federal de Electricidad (CFE) of Mexico, following the expiration of the previous PPA with CFE. Under the agreement, the cost of power to Belize Electricity will be tied to international fuel prices. This is **a 59% increase to the company's average cost of power.** As a result of the increased cost of CFE's power, Belize Electricity has reduced its purchases of firm power by 10 MW to 15 MW. The country of Belize remains rated D (insolvent) by S&P. We have concerns about consistent treatment of FTS' asset there by the government that will set rates on or before June 26/07 for July 1, 2007 implementation.
- **Q1/F07 Turks and Caicos Utilities:** On August 28, 2006, FTS acquired all of the outstanding shares of PPC Limited and Atlantic Equipment & Power (Turks and Caicos) Ltd. for $97.4 million (10x P/E). In Q1/F07, Turks and Caicos Utilities generated $1.8 million in earnings on a 23% sales increase. **Fixed rate of return: 17.5% (on a defined asset based of US$50 million).**
- **Q1/F07 Fortis Non-Regulated Generation:** Year-over-year earnings increased $1.9 million to $7.3 million due to increased generation in Belize and slightly higher average wholesale prices in Ontario. Year-over-year energy sales increased by 2.5% to 291 GWh, primarily due to higher hydroelectric production at the Chalillo generating facilities in Belize that benefited from higher rainfall levels.
- **Q1/F07 Fortis Properties:** Q1/F07 earnings increased 20% year-over-year to $1.8 million due mostly to the addition of 4 hotels in western Canada acquired on November 1, 2006. Higher operating expenses and amortization costs offset a 14% year-over-year revenue increase. The occupancy rate in the Real Estate Division was 94.9%, down slightly from 95.9% in Q1/F06.
- **Outlook:** FTS' 2007 regulated capital spending forecast of $630 million and $2.8 billion over the next five years (up $30 million and $200 million respectively) is mainly due to robust Alberta and B.C. growth. It will require a variety of financing to support 7%-8% asset growth. The new Terasen asset base may be included by July 1, 2007 and will have its own spending profile. FTS' low risk growth rate is similar to the growth profiles of Enbridge and TransCanada which is why we have all three at 20x-22x P/E. We do discount FTS' Belize and Cayman Islands contributions/values a bit off FTS's P/E multiples due to higher risks as we do for TransCanada's spot merchant power and more volatile nuclear results. FTS is also rated only BBB (like Emera) by S&P due in part to its higher leverage than the pipes have. The acquisition of Terasen Gas will support FTS' credit rating due to its high quality low risk nature monopoly.

Definition of Scotia Capital Equity Research Ratings & Risk Rankings

We have a three-tiered rating system, with ratings of 1-Sector Outperform, 2-Sector Perform, and 3-Sector Underperform. Each analyst assigns a rating that is relative to his or her coverage universe.

Our risk ranking system provides transparency as to the underlying financial and operational risk of each stock covered. Statistical and judgmental factors considered are: historical financial results, share price volatility, liquidity of the shares, credit ratings, analyst forecasts, consistency and predictability of earnings, EPS growth, dividends, cash flow from operations, and strength of balance sheet. The Director of Research and the Supervisory Analyst jointly make the final determination of all risk rankings.

Ratings

1-Sector Outperform
The stock is expected to outperform the average total return of the analyst's coverage universe by sector over the next 12 months.

2-Sector Perform
The stock is expected to perform approximately in line with the average total return of the analyst's coverage universe by sector over the next 12 months.

3-Sector Underperform
The stock is expected to underperform the average total return of the analyst's coverage universe by sector over the next 12 months.

Other Ratings
Tender – Investors are guided to tender to the terms of the takeover offer.

Under Review – The rating has been temporarily placed under review, until sufficient information has been received and assessed by the analyst.

Risk Rankings

Low
Low financial and operational risk, high predictability of financial results, low stock volatility.

Medium
Moderate financial and operational risk, moderate predictability of financial results, moderate stock volatility.

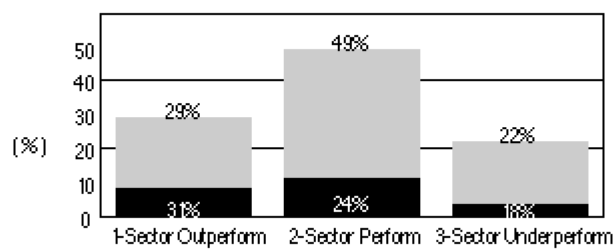
High
High financial and/or operational risk, low predictability of financial results, high stock volatility.

Caution Warranted
Exceptionally high financial and/or operational risk, exceptionally low predictability of financial results, exceptionally high stock volatility. For risk-tolerant investors only.

Venture
Risk and return consistent with Venture Capital. For risk-tolerant investors only.

Scotia Capital Equity Research Ratings Distribution*

Distribution by Ratings and Equity and Equity-Related Financings*



- Percentage of companies covered by Scotia Capital Equity Research within each rating category.
- Percentage of companies within each rating category for which Scotia Capital has undertaken an underwriting liability or has provided advice for a fee within the last 12 months.

* As at April 30, 2007.

Source: Scotia Capital.

For the purposes of the ratings distribution disclosure the NASD requires members who use a ratings system with terms different than "buy," "hold/neutral" and "sell," to equate their own ratings into these categories. Our 1-Sector Outperform, 2-Sector Perform, and 3-Sector Underperform ratings are based on the criteria above, but for this purpose could be equated to buy, neutral and sell ratings, respectively.

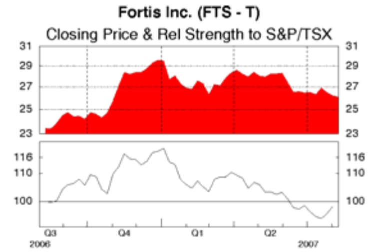
Q2/07 EPS A Match



Source: Global Insight, Inc.

Event

- Fortis (FTS) reported basic Q2/07 EPS of $0.31 ($0.27 diluted), essentially matching our $0.30 estimate and the Bloomberg consensus EPS estimate of $0.305. There were no major variances.

What It Means

- Q2/07: This was a trickier quarter to estimate as FTS' $3.4B Terasen purchase closed on May 17/07, resulting in the issuance of 44.3M additional shares. The Bloomberg forecast range was $0.25-$0.36/share. Terasen's seasonally weak 6-week $1.6M contribution to FTS was normal. FTS' CEO re-stated the Terasen acquisition will be accretive in the first year.
- Since: (1) FTS' stock has eased back towards $26/share; (2) Canada's 10-year rates have eased from 4.75% to 4.5% (we use 5% for our forecast Q3/08, Scotia Economics uses 5.25%); and, (3) a quarter has passed, we decided to move up FTS to a 1-Sector Outperform. FTS' Q4/07 and Q1/08 will also look very strong with Terasen's seasonally strong winter results.

Qtly EPS (Basic)	Q1	Q2	Q3	Q4	Year	P/E

Highlights

- **Q2/07 EPS A Match:** FTS reported basic Q2/07 EPS of $0.31 ($0.27 diluted). Basic earnings generally matched our $0.30/share estimate as well as the Bloomberg consensus estimate of $0.305/share.
- **Stock Valuation/Observations:** We moved up to 1-Sector Perform as FTS's stock price has eased while results were in line. We use a 18x P/E multiple on unchanged blended 2H/08E and 1H/09E EPS.
- **Sector Underweight:** We reduced our Market Weight call on the Energy Utilities sector to Underweight in mid-June 2007 on a material hike in our forecast for 10-year Canada interest rates to 5.25% and 5.4% for Q3/08 and Q4/08, respectively. We are using 5% to set our energy utility and pipeline P/E multiples.

Exhibit 1 – Fortis' EPS Contribution by Segment

	0.31		0.37	

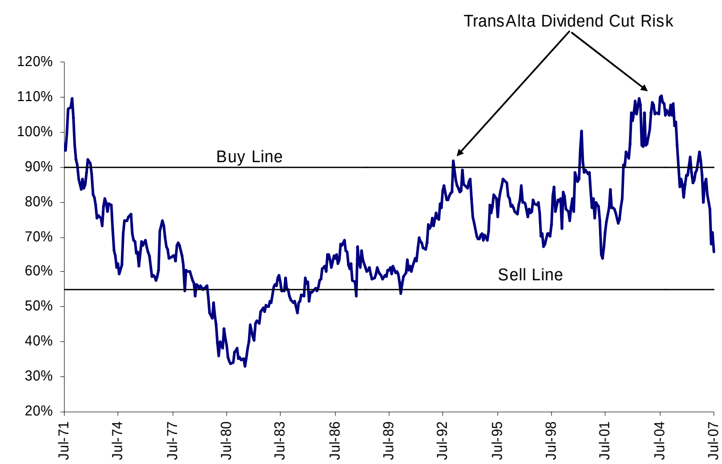
Source: Company reports; Scotia Capital estimates.

- **Q2/07 Terasen Gas:** Terasen contributed $1.6 million in earnings for the 6 weeks in Q2/07 that it was owned by Fortis. This was expected as Terasen's Q2 and Q3 are relatively weak relative to Q4 and Q1 due to natural gas demand. FTS restated that the first full year of Terasen operations will be earnings accretive. Terasen Gas is comprised of TGI (i.e. Vancouver), TGVI (i.e. Vancouver Island), and TGWI (i.e. Whistler area). TGI's allowed ROE is 8.37% on deemed equity of 35%, while TGVI's allowed 2007 ROE is 9.07% on deemed equity of 40%.
- **TGVI** filed an application with the BCUC on June 5, 2007, seeking approval for the construction and operation of a natural gas storage facility on Vancouver Island. The facility would have a storage capacity of 1.5 Bcf/d, enabling both TGI and TGVI to meet their respective future gas needs. Capital costs have been estimated by the company between $175 million and $200 million, with an in-service date of 2011.
- **Q2/07 FortisAlberta Up 37%:** Earnings of $15.5 million increased by 37% over Q2/06 levels due to higher sales revenues partially offset by higher operating costs. Revenue was up 17% to $63.3 million on energy deliveries of 3,650 GWh (up 3.2% year over year). Operating expenses were $3.6 million higher year over year due to higher labour costs,

employee-benefits costs and taxes. FTS estimated $271 million of 2007 capital expenditures driven by customer growth and inflation, of which $122 million has been invested year to date. FTS' rates for 2007 assumed an 8.93% ROE versus the 8.51% allowed. There will be a small $1.3M credit ($0.01/share) given back to rate payers in 2008 to reflect the difference. **2007 Allowed ROE: 8.51%** (2006 Allowed ROE was 8.93%).

- **2008/09 FortisAlberta Rate Applications**: FortisAlberta filed rate applications with the AEUB on June 1, 2007. The company has requested an 8.5% increase in base distribution rates for 2008, followed by a 9% increase in 2009. The rate increases are due to "significant investment in electrical infrastructure". These rate hike proposals may give the AEUB some grief.
- **Q2/07 FortisBC:** Reported Q2/07 net earnings of $6.5 million were well above the $3.4 million earned in Q2/06. Modestly higher electricity sales (670 GWh vs. 662 GWh in Q2/06), an approved rate increase of 3.3%, and lower corporate taxes were cited. PBR customer incentive decreases and a decrease in operating expenses associated with a true up to the estimate of capitalization expenses in Q2/06 were partially offset by higher depreciation expenses. **2007 Allowed ROE: 8.77%** (2006 Allowed ROE was 9.20%).
- **Q2/07 Newfoundland Power:** Earnings of $8.0 million were flat with Q2/06 as increased revenues were offset by (1) 28% higher energy supply costs; (2) a lower ROE for 2007; and (3) slightly higher amortization and corporate tax expenses. Electricity sales increased 3.1% in Q2/07 due to both customer growth and higher average consumption. During Q2/07, Newfoundland Power began an $18 million refurbishment of its Rattling Brook Hydro plant, representing the subsidiary's largest capital project ever. Newfoundland Power has a 2007 Capital Budget of $62.2 million, $30 million of which has already been invested year to date. **2007 Allowed ROE: 8.60%** (2006 Allowed ROE was 9.24%).
- **Q2/07 Other Canadian Electric Utilities**: Following the acquisition of Terasen, Fortis has lumped together Maritime Electric and FortisOntario into an "other" category. The two subsidiaries combined for a year-over-year earnings improvement of 50% due to (1) higher generation in both units; (2) a 3.35% rate increase at Maritime Electric; (3) higher electricity sales; and (4) a lower corporate tax rate (38.5% versus 47.1% in Q2/06).

Exhibit 2 – Electric Utility Dividend Yields vs. 10-year Canadas



Source: Global Insight Inc.; Scotia Capital

- **Q2/06 Regulated Utilities - Caribbean:** FTS now consolidates earnings of Caribbean Utilities (54% owned since Q4/06), Belize Electricity (70% owned), and Fortis Turks and Caicos (100% owned) into a new group: Regulated Utilities - Caribbean. Year-over-year electricity sales grew a weighted average 10% in GWh sales. Earnings increased by $3.2 million year over year to $7.6 million due to (1) $2.4 million in earnings from Fortis Turks and Caicos that were not owned in Q2/06; 2) lower finance charges at Belize Electricity; and, (3) increased investment in Caribbean Utilities from 37% to 54%. There was no further progress made on the license negotiations between Caribbean Utilities and the Cayman Government.
- **Q2/07 Fortis Non-Regulated Generation:** Year-over-year earnings **decreased** by $1.8 million to $4.9 million due to decreased generation in Belize, central Newfoundland, and Upper NY State. The 16 GWh, or 5.5%, decline in generation was due to lower rainfall in these regions. The average price per MWh of energy sold in Upper NY State increased to US$63.72/MWh from US$56.11/MWh due to the expiry of two fixed-rate energy sale contracts at lower-than-market rates. The average price per MWh in Ontario was $47.74, slightly below the Q2/06 average price of $48.15/MWh.

- **Q2/07 Fortis Properties:** Q2/07 earnings decreased 26% year over year despite a 12% increase in revenue. However, last year's earnings included a non-recurring $1.6 million after-tax gain on the sale of Days Inn Sydney as well as a $1.6 million corporate tax adjustment. Q2/07 recurring earnings were $1.1 million higher due to additional contributions from four new hotels in western Canada that were acquired on November 1, 2006. Revenue per available room increased to $82.11 in Q2/07 from $75.97 one year earlier. The average occupancy rate also increased to 96% from 95.6% previously. On August 1, 2007, Fortis Properties announced the purchase of the Delta Regina for $49.95 million. The complex adds 274 rooms and includes the four-star Delta Regina hotel as well as the Saskatchewan Trade and Convention Centre.
- **Outlook Strong:** The increase in FTS' 2007 regulated capital spending forecast to $770 million and $2.8 billion over the next five years (up $30 million and $200 million respectively) is attributable to the robust economic growth of Alberta and B.C. A variety of financing will be required to support this 7%-8%/year asset growth. The new Terasen asset base will have its own spending profile. FTS' low risk growth rate is similar to the growth profiles of Enbridge and TransCanada, which is why we have all three at 18x-20x P/E's. As 84% of assets are now Canadian Regulated, the discount for FTS' Belize and Cayman Islands contributions/values has become immaterial. S&P upgraded FTS to an A- from BBB+ due to the acquisition of Terasen. We last wrote that the acquisition of Terasen Gas will support FTS' credit rating due to its high quality and low risk monopoly nature.

Definition of Scotia Capital Equity Research Ratings & Risk Rankings

We have a three-tiered rating system, with ratings of 1-Sector Outperform, 2-Sector Perform, and 3-Sector Underperform. Each analyst assigns a rating that is relative to his or her coverage universe.

Our risk ranking system provides transparency as to the underlying financial and operational risk of each stock covered. Statistical and judgmental factors considered are: historical financial results, share price volatility, liquidity of the shares, credit ratings, analyst forecasts, consistency and predictability of earnings, EPS growth, dividends, cash flow from operations, and strength of balance sheet. The Director of Research and the Supervisory Analyst jointly make the final determination of all risk rankings.

Ratings

1-Sector Outperform
The stock is expected to outperform the average total return of the analyst's coverage universe by sector over the next 12 months.

2-Sector Perform
The stock is expected to perform approximately in line with the average total return of the analyst's coverage universe by sector over the next 12 months.

3-Sector Underperform
The stock is expected to underperform the average total return of the analyst's coverage universe by sector over the next 12 months.

Other Ratings
Tender – Investors are guided to tender to the terms of the takeover offer.

Under Review – The rating has been temporarily placed under review, until sufficient information has been received and assessed by the analyst.

Risk Rankings

Low
Low financial and operational risk, high predictability of financial results, low stock volatility.

Medium
Moderate financial and operational risk, moderate predictability of financial results, moderate stock volatility.

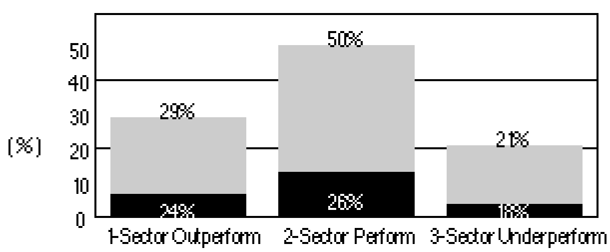
High
High financial and/or operational risk, low predictability of financial results, high stock volatility.

Caution Warranted
Exceptionally high financial and/or operational risk, exceptionally low predictability of financial results, exceptionally high stock volatility. For risk-tolerant investors only.

Venture
Risk and return consistent with Venture Capital. For risk-tolerant investors only.

Scotia Capital Equity Research Ratings Distribution*

Distribution by Ratings and Equity and Equity-Related Financings*



- Percentage of companies covered by Scotia Capital Equity Research within each rating category.
- Percentage of companies within each rating category for which Scotia Capital has undertaken an underwriting liability or has provided advice for a fee within the last 12 months.

* As at July 31, 2007.

Source: Scotia Capital.

For the purposes of the ratings distribution disclosure the NASD requires members who use a ratings system with terms different than "buy," "hold/neutral" and "sell," to equate their own ratings into these categories. Our 1-Sector Outperform, 2-Sector Perform, and 3-Sector Underperform ratings are based on the criteria above, but for this purpose could be equated to buy, neutral and sell ratings, respectively.

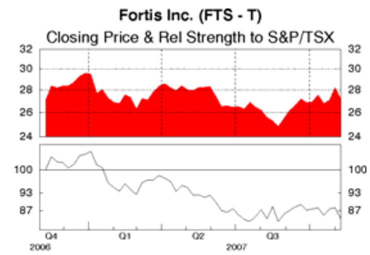
Q3/07 EPS Misses Us, Matches Street



Source: Global Insight, Inc.

Event

- Fortis (FTS) reported basic Q3/07 EPS of 20¢, missing our 25¢ estimate but essentially matching the Bloomberg consensus EPS estimate of 20.6¢ (in a wide 17¢ to 25¢ range).

What It Means

- Q3/07: We had expected seasonal weakness at Terasen as well as an f/x translation hit to earnings. Our 5¢ miss was mainly due to higher than forecast financing costs at the corporate level, and materially poorer than expected hydroelectric production as a result of lower rainfall in Belize and Upper NY State.
- Valuation: We remain comfortable with our earnings forecasts for 2008 and 2009. It is time to roll forward our valuation to 2009E EPS only. This increased our 1-Yr FTS target to $29.50/share, using an unchanged 18x PE multiple.

Qtly EPS (Basic)	Q1	Q2	Q3	Q4	Year	P/E

Highlights

- **Q3/07 EPS Misses Us, Matches Street:** FTS reported basic Q3/07 EPS of 20¢ versus 37¢ in Q3/06. The current quarter is not comparable due to the large and seasonal Terasen Gas acquisition. Earnings per share missed our 25¢ estimate but essentially matched the Bloomberg consensus estimate of 20.6¢. Poorer than expected rainfall in Belize and Upper NY State, as well as higher corporate financing charges than we had forecast were the primary reasons for our miss.
- **Stock Valuation/Observations:** We have rolled forward our valuation to 2009E EPS using an unchanged 18x P/E multiple. As a result, we have increased our 1-Yr target by $1/share to $29.50/share.
- **Sector Market Weight:** As the global credit crunch hit in early Q3/07, we went to Market Weight and on August 16, we went to short-term Overweight prior to the S&P/TSX Composite Index collapsing 580 points. We returned to Market Weight Energy Utilities, Pipes and high yielding IPP's like TA following the aggressive global injection of about US$1 trillion of liquidity and the aggressive 50 point cut by the U.S. Fed that lessened recession risks and increased inflation risks. A further 25 bp U.S. Fed cut occurred on October 31. For further details, please refer to our October 2007 *Gas & Electric Utilities Outlook.*

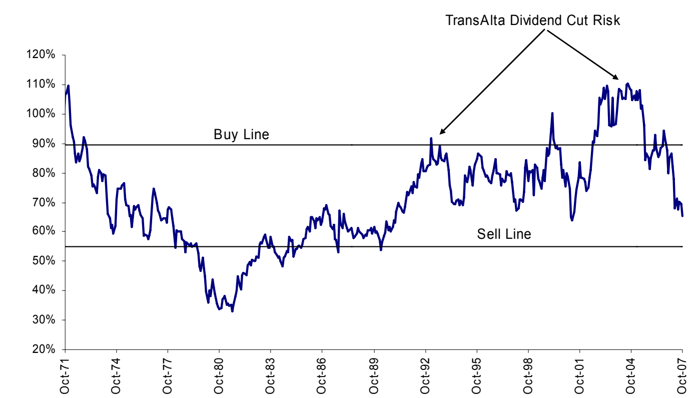
Source: Company reports; Scotia Capital estimates.

- **Q3/07 Terasen Gas:** Terasen Gas reported a $3.7M loss for Q3/07, as expected and inline with previous Q3s. The majority of Terasen's annual earnings are generated in Q1 and Q4 due to stronger natural gas demand. Gas volume for the quarter was 31,441 TJ, down 4.2% year over year due to a 10.2% decline ingas transportation volumes. FTS restated **again** that the first full year of Terasen operations will be **earnings accretive**. Terasen Gas is comprised of TGI (i.e. Vancouver), TGVI (i.e. Vancouver Island), and TGWI (i.e. Whistler area). TGI's allowed ROE is 8.37% on deemed equity of 35%, while TGVI's allowed 2007 ROE is 9.07%

on deemed equity of 40%. On June 19, S&P raised its senior unsecured debt rating on TGI to A from BBB.

- **TGVI** filed an application with the BCUC on June 5, 2007, seeking approval for the construction and operation of a 1.5 Bcf/d natural gas storage facility on Vancouver Island. FTS estimates a capital cost of $175 million to $200 million, with an in-service date of 2011.
- **Q3/07 FortisAlberta Up 20%:** Earnings of $14.7 million increased by 20% over Q3/06 levels due to higher sales revenues and increased corporate income tax recoveries, which were partially offset by higher operating costs. Revenue was up 8% to $69.7 million on energy deliveries of 3,781 GWh (up 3.4% year over year). Operating expenses were $2 million higher year over year due to higher labour costs and employee-benefits costs. FTS estimated $283 million of 2008 capital expenditures ($312 million for 2009) driven by strong customer growth and an improvement to system reliability. There will be a small $1.3 million credit ($0.01/share) given back to rate payers in 2008 to reflect the difference. **2007 Allowed ROE: 8.51%** (2006 Allowed ROE was 8.93%).
- **2008/09 FortisAlberta Rate Applications**: FortisAlberta filed rate applications with the AEUB on June 1, 2007. The company has requested an 8.5% increase in base distribution rates for 2008, followed by a 9% increase in 2009. The rate increases are due to "significant investment in electrical infrastructure". The size of the rate hike proposals may give the AEUB some grief.
- **Q3/07 FortisBC:** Reported Q3/07 net earnings of $6.2 million were 9% above the $5.7 million earned in Q3/06. Modestly higher electricity sales (703 GWh vs. 694 GWh in Q3/06), an approved rate increase of 3.3%, and lower energy supply costs supported. Higher operating expenses, amortization costs and finance charges partially offset. On July 4, FortisBC issued $105 million 5.90% senior unsecured 40 year debentures, primarily to repay existing credit facilities. **2007 Allowed ROE: 8.77%** (2006 Allowed ROE was 9.20%).
- **Q3/07 Newfoundland Power:** Earnings of $2.7 million were flat with Q3/06 as a 13% increase to revenue was offset by higher energy supply costs (due to the flow through of higher purchased power costs from Newfoundland Hydro). Customer growth was mostly offset by lower average consumption per customer, as well as a lower ROE for 2007. On September 18, the PUB approved Newfoundland Power's 2008 capital budget program of $51 million. On October 11, the company filed for a 2.8% increase in electricity rates, effective January 1, 2008, down from the originally proposed 5.3% increase. The PUB has agreed to a **2008 Allowed ROE of 8.95%** (2007 Allowed ROE: 8.60%, and 2006 Allowed ROE: 9.24%).

Exhibit 2 – Electric Utility Dividend Yields vs. 10-year Canadas



Source: Global Insight Inc.; Scotia Capital

- **Q3/07 Other Canadian Electric Utilities**: Following the acquisition of Terasen, Fortis lumped together Maritime Electric and FortisOntario into an "other" category. The two subsidiaries combined for a year-over-year **earnings decline of 6%** due to increased operating expenses and higher amortization costs, which were partially offset by a lower effective tax rate (36.2% compared to 37.3% in Q3/06). Electricity sales decreased by 14 GWh, or 2.5%, due to lower sales at FortisOntario (moderate weather conditions and a loss of a major customer).
- **Q3/07 Regulated Utilities - Caribbean:** FTS now consolidates earnings of Caribbean Utilities (54% owned since Q4/06), Belize Electricity (70% owned), and Fortis Turks and Caicos (100% owned) into a new group: Regulated Utilities - Caribbean. Year-over-year electricity sales grew a weighted average 8.8% to 283 GWh. Earnings increased by $2.1

million year over year (up 27%) to $9.8 million due to (1) $2 million in earnings from Fortis Turks and Caicos that was only owned for one month in Q3/06; and, (2) increased investment in Caribbean Utilities from 37% to 54%. There was no update provided on the license negotiations between Caribbean Utilities and the Cayman Government. The earnings increase was partially offset by a decreased contribution from Belize Electricity of $0.8 million due to higher operating expenses, amortization costs and financing charges. The strengthening of the C$ also negatively impacted earnings by $0.8 million.

- **Q3/07 Fortis Non-Regulated Generation:** Year-over-year earnings **decreased materially** by $2.8 million to $5 million due to decreased production as a result of lower rainfall and a $0.2 million f/x translation hit. Energy sales declined in 4 of 5 regions (B.C. increased slightly), resulting in an overall 12% decline in energy sales to 254 GWh. The average price per MWh in Ontario was $47.42, slightly above the Q3/06 average price of $46.59/MWh.
- **Q3/07 Fortis Properties:** Q3/07 earnings increased 27% year over year on the back of a 22% increase in revenue. Hospitality revenue improved 29% to $38.9 million due to growth in the company's western Canadian operations, as well as increased revenue earned from the expanded Ontario hotels. Real estate revenue increased by $1 million year over year due to the Blue Cross Centre expansion in Moncton. Revenue per available room increased substantially to $95.11 in Q3/07 from $88.09 one year earlier. The average occupancy rate also increased to 96.9% from 94.7% previously. On August 1, 2007, Fortis Properties announced the purchase of the Delta Regina for $50 million. The complex adds 274 rooms and includes the four-star Delta Regina hotel as well as the Saskatchewan Trade and Convention Centre.

Definition of Scotia Capital Equity Research Ratings & Risk Rankings

We have a three-tiered rating system, with ratings of 1-Sector Outperform, 2-Sector Perform, and 3-Sector Underperform. Each analyst assigns a rating that is relative to his or her coverage universe.

Our risk ranking system provides transparency as to the underlying financial and operational risk of each stock covered. Statistical and judgmental factors considered are: historical financial results, share price volatility, liquidity of the shares, credit ratings, analyst forecasts, consistency and predictability of earnings, EPS growth, dividends, cash flow from operations, and strength of balance sheet. The Director of Research and the Supervisory Analyst jointly make the final determination of all risk rankings.

Ratings

1-Sector Outperform
The stock is expected to outperform the average total return of the analyst's coverage universe by sector over the next 12 months.

2-Sector Perform
The stock is expected to perform approximately in line with the average total return of the analyst's coverage universe by sector over the next 12 months.

3-Sector Underperform
The stock is expected to underperform the average total return of the analyst's coverage universe by sector over the next 12 months.

Other Ratings
Tender – Investors are guided to tender to the terms of the takeover offer.

Under Review – The rating has been temporarily placed under review, until sufficient information has been received and assessed by the analyst.

Risk Rankings

Low
Low financial and operational risk, high predictability of financial results, low stock volatility.

Medium
Moderate financial and operational risk, moderate predictability of financial results, moderate stock volatility.

High
High financial and/or operational risk, low predictability of financial results, high stock volatility.

Caution Warranted
Exceptionally high financial and/or operational risk, exceptionally low predictability of financial results, exceptionally high stock volatility. For risk-tolerant investors only.

Venture
Risk and return consistent with Venture Capital. For risk-tolerant investors only.

Strong FTS Dividend Hike

Event

- Fortis (FTS) announced a 19% increase of its quarterly dividend to 25¢ from 21¢. We had estimated a 7% increase to 22.5¢.

What It Means

- The 19% dividend increase to 25¢ per quarter results in a payout ratio of 66%, above our universe average of 59% but below that of Emera (70%) and TransAlta (69%). FTS has the longest Canadian track record of dividend hikes at 35 years in a row. The dividend increase clearly implies that the $4B Terasen Gas acquisition form Kinder Morgan is performing "as planned". Accordingly, we nudged up our P/E by 0.5x to reflect this.
- We attended a Toronto Board of Trade Power Breakfast this week where FTS' CEO spoke about the future of Canada's electricity industry. Highlights were: (1) his negative view on all aspects of attempts to deregulate the electricity business other than for generation, particularly in Alberta; and, (2) his support for Mr. Harper in Bali with respect to having to get China and India on the same CO_2 reduction page.

For the purposes of the ratings distribution disclosure the NASD requires members who use a ratings system with terms different than "buy," "hold/neutral" and "sell," to equate their own ratings into these categories. Our 1-Sector Outperform, 2-Sector Perform, and 3-Sector Underperform ratings are based on the criteria above, but for this purpose could be equated to buy, neutral and sell ratings, respectively.

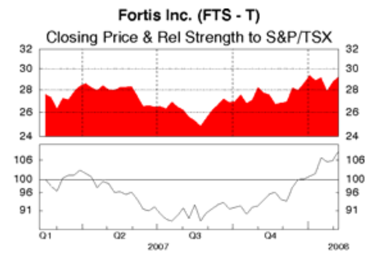
Q4/07 Recurring EPS Mildly Misses Us/Street



Source: Global Insight, Inc.

Event

- Fortis (FTS) reported basic Q4/07 EPS of $0.51 that was about $0.43 recurring after adjusting for various non-recurring items. This mildly missed our $0.45 recurring estimate and the Bloomberg consensus EPS estimate of $0.45 in a 42¢ to 48¢ range.

What It Means

- Q4/07 EPS: We did not see any reason why we and the Street were a little optimistic other than overestimating the Q4/07 Terasen Gas acquisition contribution. FTS' CEO re-stated that this $3.7B acquisition that doubled FTS' regulated assets will be EPS accretive in year one, implying that Q1/08 should be stronger.
- Non-recurring Items: They were: 1) gain on sale of vacant land ($0.04/share), 2) gain on regulatory adjustment in Ontario ($0.01/share), 3) Fortis Property corporate tax rate reduction ($0.04/share) partly offset by a hedge loss ($0.01/share). This netted to $0.08/share.
- Valuation: We stuck with our FTS earnings forecasts for 2008 and 2009 and our valuation set at 19x 2009E EPS, anticipating a seasonally stronger Q1/08 EPS with Terasen's peak winter quarter.

Qtly EPS (Basic)	Q1	Q2	Q3	Q4	Year	P/E
2006A	$0.35 A	$0.37 A	$0.37 A	$0.33 A	$1.42	20.96
2007A	$0.38 A	$0.31 A	$0.20 A	$0.51 A	$1.40	20.71

Highlights

- **Q4/07 EPS Mildly Misses Us/Street, Make-up in Q1/08?** FTS reported basic Q4/07 EPS of 51¢ that appears to be about 43¢ recurring. This mildly missed our 45¢ recurring Q4/07 EPS estimate as well as the Street's 45¢ average. The current quarter is not comparable year over year due to the seasonal nature of Terasen Gas contributions. We as FTS analysts collectively appear to have been a touch optimistic on Q4/07. This implies we may also be a little pessimistic on our Q1/08 EPS forecasts if one believes FTS's CEO stating that "the Terasen acquisition will be accretive in year one". Our initial view was that the $3.7B deal done in mid-May 2007 was 3% EPS accretive in year one. Non-recurring details are shown in Exhibit 1.

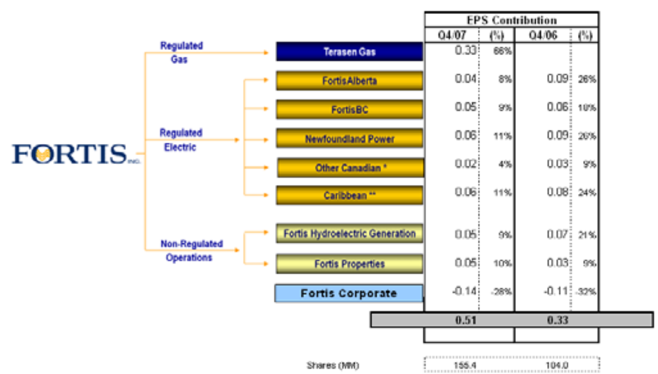
Exhibit 1 – FTS' Q4/07 Recurring EPS Mildly Missed Our Estimate

FTS Reported Q4/07 EPS:	**$0.51**
After-tax gain on sale of land - Terasen Gas	$0.05
Regulator approved after-tax gain - FortisOntario	$0.01
Reduction of future tax liability - Fortis Properties	$0.03
Mark-to-market loss on derivative instruments	($0.01)
FTS Recurring Q4/07 EPS:	**$0.43**
SC Q4/07E Recurring EPS	**$0.45**

Source: Company reports; Scotia Capital estimates.

- **Valuation:** We value FTS at 19x 2009E unchanged EPS to set our one year $31/share unchanged target. Our FTS P/E multiple is biased a little higher as our forecast long Canada interest rates are now down to 4% from 4.3% one year out. We have been conservatively using 4.5% to set our P/E multiples. Our TransCanada Corp is at a similar P/E with Enbridge as our top P/E at 20.5x. We discount Fortis somewhat for its Belize assets as Belize debt is rated deep junk debt. We discount TransCanada to 18.5x P/E due to its material exposure to spot merchant power markets. The major stock market correction to date from peak levels has reduced 1.5x P/E points off trailing S&P/TSX earnings. Stocks like FTS are normally at about 0.5x beta to the TSX volatility.
- **Sector Overweight:** We went to sector overweight defensive energy utilities in early December 2007 as both the U.S. and Canadian long interest rates fell through 4% signalling an economic slowdown. U.S. economists are now split at 50% believing the U.S. is entering a recession. This is an **ideal situation** for relative as well as absolute outperformance by defensive high yielding stocks as both the U.S. and Canadian yield curves are poised to steepen and drop further. For further details, please refer to our January 2008 *Gas & Electric Utilities Outlook*.

Exhibit 2 – Fortis' EPS Contribution by Segment



Source: Company reports; Scotia Capital estimates.

- **Q4/07 Terasen Gas:** Terasen Gas reported $52 million in earnings for Q4/07 that included a $7 million after-tax gain on the sale of land ($0.04/share). Gas volumes were up 7% during the quarter to 69,108 TJ due to customer growth and colder-than-normal weather. The majority of Terasen's annual earnings are generated in Q1 and Q4 due to stronger natural gas demand. Terasen Gas is comprised of TGI (i.e., Vancouver), TGVI (i.e., Vancouver Island), and TGWI (i.e., Whistler area). TGI's allowed 2008 ROE is 8.62% on a deemed equity of 35%, while TGVI's allowed 2008 ROE is 9.32% on deemed equity of 40%.
- **TGVI** filed an application with the BCUC on June 5, 2007, seeking approval for the construction and operation of a 1.5 Bcf/d natural gas storage facility on Vancouver Island. FTS estimates a capital cost of $175 million to $200 million, with an in-service date of 2011.

- **Q4/07 FortisAlberta Drops 33%:** Earnings of $6 million decreased by 33% over Q4/06 levels due to higher operating expenses (mainly labour costs), amortization costs. Additionally, finance charges were $2 million higher year over year due to the January 2007 issuance of $110 million senior debt at 5%. Energy deliveries increased by 101 GWh to 4,002 GWh due to normal customer growth. **2008 Allowed ROE: 8.75%** (2007 Allowed ROE was 8.51%).
- **Q4/07 FortisBC:** Reported Q4/07 net earnings of $7 million were 16% higher than one year ago, despite flat energy deliveries of 839 GWh. We were **disappointed** by a $3 million increase in operating expenses to $20 million due to "inflationary pressures" as well as an increase in the allowance for doubtful accounts related to the forestry sector. **2008 Allowed ROE: 9.02%** (2007 Allowed ROE was 8.77%).
- **Q4/07 Newfoundland Power:** Earnings of $9 million were **flat** as expected with Q4/06 as a 16% increase to revenue was offset by higher energy supply costs (due to the flow through of higher purchased power costs from Newfoundland Hydro). Higher electricity sales (up 2.3%) were offset by a lower year over year allowed ROE of 64 bp in 2007. On September 18, the PUB approved Newfoundland Power's 2008 capital budget program of $51 million. On October 11, the company filed for a 2.8% increase in electricity rates, effective January 1, 2008, down from the originally proposed 5.3% increase. The PUB has given the FTS subsidiary a **2008 Allowed ROE of 8.95%** (8.6% in 2007).

Exhibit 3 – Nature of FTS' Regulation

Regulated Utility	Allowed Common Equity (%)	Allowed Returns (%) 2006	2007	2008
		ROE		
Terasen Gas Companies				
TGI	35	8.8	8.37	8.62
TGVI	40	9.5	9.07	9.32
FortisBC	40	9.2	8.77	9.02
FortisAlberta	37	8.93	8.51	8.75
Newfoundland Power	45	9.24	8.6	8.95
Maritime Electric	40	10.25	10.25	10
Fortis Ontario	50	9	9	9
		ROA		
Belize Electricity	N/A	10-15	10-15	10-15
Caribbean Utilities	N/A	15	15	9-11
Fortis Turks and Caicos	N/A	17.5	17.5	17.5

Source: Company reports.

- **Q4/07 Other Canadian Electric Utilities**: Following the acquisition of Terasen, Fortis lumped Maritime Electric and FortisOntario into an "other" category. The two subsidiaries' had flat year-over-year earnings at $3 million, despite $3 million higher combined revenue of $66 million. There was a $1 million year-over-year increase in each of the following: (1) amortization - due to higher investment in capital assets; (2) finance charges - due to higher borrowings to fund capital spending; and, (3) corporate taxes - due to higher pre-tax earnings. Maritime Electric's 2008 ROE will **decline** to 10% (on deemed equity of 40%) from 10.25% previously due to a multi-year reset.
- **Q4/07 Regulated Utilities - Caribbean:** FTS owns 54% of Caribbean Utilities, 70% of Belize Electricity and 100% of Fortis Turks and Caicos in this group. Year-over-year electricity sales grew 5% to 272 GWh. Earnings increased by $1 million year over year to $9 million due to increased investment in Caribbean Utilities from 37% to 54%. License negotiations between Caribbean Utilities and the Cayman Government finally settled on December 20, 2007 after three years of effort. Its return on rate base **fell to 9%-11% from 15%** based on attaining various incentive levels. We viewed this reduction as being in line with our expectations given where interest rates are. Belize Electricity was weaker by $0.8 million due to higher operating expenses, amortization costs and financing charges. The strengthening of the C$ also negatively impacted C$ earnings by $0.8 million.

- **Q4/07 Fortis Non-Regulated Generation:** Year-over-year earnings were **flat** at $7 million despite 11% lower production (303 GWh), higher energy supply costs, and higher corporate taxes. Partially offsetting softer energy deliveries was a higher Ontario average power price at $48.33/MWh compared to $42.69/MWh one year ago. Operating expenses were $1 million lower year over year due to the receipt of flood-related insurance proceeds. Energy sales declined in four of five regions (B.C. increased slightly).
- **Q4/07 Fortis Properties:** Q4/07 earnings increased by $5 million to $8 million year over year on 1) Corporate taxes that were $4 million lower in Q4/07 due to lower future federal tax rates and 2) a 19% increase in revenue. Hospitality revenue improved by 21% to $34 million due to growth in the company's western Canadian operations. Real estate revenue increased by $2 million year over year due to the Blue Cross Centre expansion in Moncton. Revenue per available room was up 9% to $73.84 in Q4/07 from $67.84 one year earlier. The average occupancy rate also increased to 96.8% from 94.9% previously.
- **Financial:** FTS drew down $125M on its existing credit facilities to help pay for Terasen in mid-2007. This, along with regulated capital expenditures of $900M in 2008 will eventually have to be financed with some form of new equity. FTS issued $200M of 6.6% coupon U.S. debt in September 2007 in a private placement to 2037. We speculate FTS visits equity markets for $150M in Q4/08. At December 31 2007, FTS' capital structure had only 30.5% equity and 5.2% preference shares. The $1.00/share dividend as of March 1 2008 yields 3.4% on FTS' stock as of yesterday's close just above $29/share.

Definition of Scotia Capital Equity Research Ratings & Risk Rankings

We have a three-tiered rating system, with ratings of 1-Sector Outperform, 2-Sector Perform, and 3-Sector Underperform. Each analyst assigns a rating that is relative to his or her coverage universe.

Our risk ranking system provides transparency as to the underlying financial and operational risk of each stock covered. Statistical and judgmental factors considered are: historical financial results, share price volatility, liquidity of the shares, credit ratings, analyst forecasts, consistency and predictability of earnings, EPS growth, dividends, cash flow from operations, and strength of balance sheet. The Director of Research and the Supervisory Analyst jointly make the final determination of all risk rankings.

Ratings

1-Sector Outperform
The stock is expected to outperform the average total return of the analyst's coverage universe by sector over the next 12 months.

2-Sector Perform
The stock is expected to perform approximately in line with the average total return of the analyst's coverage universe by sector over the next 12 months.

3-Sector Underperform
The stock is expected to underperform the average total return of the analyst's coverage universe by sector over the next 12 months.

Other Ratings
Tender – Investors are guided to tender to the terms of the takeover offer.

Under Review – The rating has been temporarily placed under review, until sufficient information has been received and assessed by the analyst.

Risk Rankings

Low
Low financial and operational risk, high predictability of financial results, low stock volatility.

Medium
Moderate financial and operational risk, moderate predictability of financial results, moderate stock volatility.

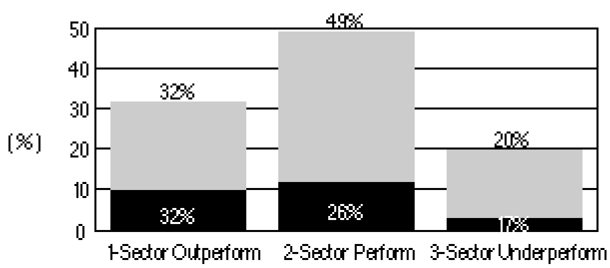
High
High financial and/or operational risk, low predictability of financial results, high stock volatility.

Caution Warranted
Exceptionally high financial and/or operational risk, exceptionally low predictability of financial results, exceptionally high stock volatility. For risk-tolerant investors only.

Venture
Risk and return consistent with Venture Capital. For risk-tolerant investors only.

Scotia Capital Equity Research Ratings Distribution*

Distribution by Ratings and Equity and Equity-Related Financings*



- Percentage of companies covered by Scotia Capital Equity Research within each rating category.
- Percentage of companies within each rating category for which Scotia Capital has undertaken an underwriting liability or has provided advice for a fee within the last 12 months.

* As at January 31, 2008.

Source: Scotia Capital.

For the purposes of the ratings distribution disclosure the NASD requires members who use a ratings system with terms different than "buy," "hold/neutral" and "sell," to equate their own ratings into these categories. Our 1-Sector Outperform, 2-Sector Perform, and 3-Sector Underperform ratings are based on the criteria above, but for this purpose could be equated to buy, neutral and sell ratings, respectively.

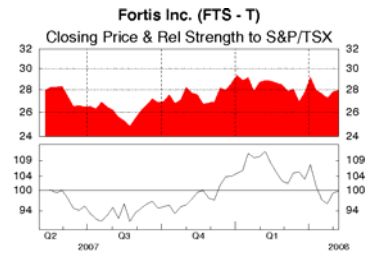
Q1/08 EPS Shows Terasen Gas Accretive



Source: Global Insight, Inc.

Event

- Fortis (FTS) reported Q1/08 EPS of $0.58 versus our $0.43 recurring estimate and the Bloomberg consensus EPS estimate of $0.58 in a $0.43 to $0.65 range. We were too low on Q1/08 and too high on Q2/08.

What It Means

- Q1/08 EPS: After three quarters of mildly missing Street average estimates including ours, FTS finally had its big quarter from its $3.7B Terasen Gas acquisition. The CEO stated "Terasen is delivering as expected". We were too conservative on Q1 and too aggressive on Q2.
- Excluding Terasen the quarter was unusually uneventful across the board. There was a minor increase in Corporate Tax recovery to $5M that was offset by a $5M adjustment in Newfoundland Power's Q1/08 annual purchased power expense that will be picked up in Q2-Q4.
- Valuation: We use an unchanged 19.5x 2009E EPS to set our 1-YR $33/share target, up $1. We moved our $1.62 to $1.67 for 2009 EPS sensing we have been a bit conservative on the magnitude of growth at Fortis partly offset by our estimated 5M share issue at $30 for 1/1/09.

Qtly EPS (Basic)	Q1	Q2	Q3	Q4	Year	P/E

For important disclosure information see Appendix A of this report.

Highlights

- **Q1/08 EPS Meets Street Expectations:** FTS reported Q1/08 EPS of $0.58 matching the Bloomberg average in a $0.43 (us) to $0.65/share range. The vast majority of the growth in earnings was due to Terasen Gas that was acquired for $3.7B in mid-May 2007. A $5M drop in earnings at Newfoundland Power caused by a change in the quarterly distribution of annual purchased power expense was offset by $5M of Corporate Tax recovery ($2M recovery in Q1/07). We are told that the Corporate Tax recovery should be relatively constant. The Alberta and BC tax recovery levels have been shrinking as tax versus accounting variances have narrowed.
- **Stock Valuation:** We value FTS at 19.5x 2009E EPS that we moved up $0.05 to $1.67 to account for the $900M of new capital spending at Fortis utilities in 2008 less an assumed 5M share issue for $150M at $30/share effective 1/1/09. This added $1/share to our 1-YR target.
- **Sector Valuation:** We set our energy utility P/E multiples assuming 4.25% 10-YR Canada rates (currently 3.6%). Our TransCanada Corp P/E is similar P/E to FTS'. We discount both slightly versus Enbridge due to FTS' Belize interests as it is a junk debt country and TransCanada due to its material exposure to spot merchant power markets.
- **Q1/08 Terasen Gas:** Terasen Gas reported $58 million in earnings for Q1/08 versus nil YOY as it was not acquired until mid-May/07. Gas volumes were up 3% during the quarter to 78,184 TJ due to customer growth and colder-than-normal weather. Customer additions weakened to 2,494 from 3,157. According to management, "Virtually all of the earnings of the Terasen Gas companies are generated in the first and fourth quarters" due to strong natural gas demand in winter months for space heating. Terasen Gas is comprised of TGI (i.e. Vancouver), TGVI (i.e. Vancouver Island), and TGWI (i.e. Whistler area). TGI's allowed 2008 ROE is 8.62% on a deemed equity of 35%, while TGVI's allowed 2008 ROE is 9.32% on deemed equity of 40%. See Exhibit 1 for a breakdown of EPS by segment.

Exhibit 1 - Fortis' EPS Contribution by Segment

FORTIS INC.

		EPS Contribution			
		Q1/08	(%)	Q1/07	(%)

Source: Company reports; Scotia Capital estimates.

- **TGVI** got approval for the construction and operation of a 1.5 Bcf/d natural gas storage facility on Vancouver Island. FTS estimated a capital cost of $175 million to $200 million, with an in-service date of 2011.
- **Q1/08 FortisAlberta:** Earnings for Q1/08 were down $1M YOY to $11M due to lower tax recoveries, higher wages and higher depreciation. Higher 2008/09 negotiated settlement rates have been allowed. Energy deliveries increased by 193 GWh to 4,138 GWh due to normal customer growth. **2008 Allowed ROE: 8.75%** (2007 Allowed ROE was 8.51%).
- **Q1/08 FortisBC:** Reported Q1/08 net earnings of $12 million were flat YOY and consistent with flat electricity sales of 875 GWh versus 879 GWh YOY. A customer rate increase and lower effective corporate taxes were offset by increased energy supply costs (driven by higher power purchase prices), as well as higher amortization and finance charges. **2008 Allowed ROE: 9.02%** (2007 Allowed ROE was 8.77%).

- **Q1/08 Newfoundland Power:** Earnings fell 45% YOY from $11M to $6M mainly due to a new timing difference caused by a change in expense recognition. Electricity sales volumes increased to 1,716 GWh compared to 1,663 GWh in Q1/07 and revenues increased 6%. Supply costs jumped from $106M in Q1/07 to $122M in Q1/08 due mainly to a timing difference. Winter months have a higher expense per kWh and lower in the summer under the regulated rate structure. In 2007, expenses were estimated based on a forecasted annual average. Any difference between this smoothed amount and actual costs were adjusted to a regulatory reserve. The Newfoundland and Labrador Board of Commissioners of Public Utilities mandated **that this reserve be eliminated effective January 1, 2008.** Now, monthly cost is actual cost which will drive Q1 and Q4 earnings down in comparison to prior years but help Q2 and Q3. **This change will have no impact on annual earnings.** The PUB has given the FTS subsidiary a 2008 Allowed ROE of 8.95% (8.6% in 2007).
- **Q1/08 Other Canadian Electric Utilities**: Following the acquisition of Terasen, Fortis lumped Maritime Electric and FortisOntario into an "other" category. The two subsidiaries' had flat year-over-year earnings at $4 million, with identical revenues and expenses YOY. Maritime Electric's 2008 ROE will **decline slightly** to 10% (on deemed equity of 40%) from 10.25% previously due to a multi-year reset.

Exhibit 2 - Nature of FTS' Regulation

Source: Company reports.

- **Q1/08 Regulated Utilities - Caribbean:** FTS owns 54% of Caribbean Utilities, 70% of Belize Electricity and 100% of Fortis Turks and Caicos in this group. Year-over-year electricity sales grew 7% to 258 GWh. Earnings increased by $3 million year over year to $7 million as there was a one-time charge in Q1/07 of $2M relating to the disposition of steam-turbine assets. There was $12M in FX losses caused by the C$ reaching parity. In April 2008, Caribbean Utilities obtained an exclusive T&D license from the Government of the Cayman Islands for 20 years, as well as a non-exclusive 21.5 year generation license. The T&D license will set customer rates using an initial targeted rate of return on rate base assets of 10%, down from 15% allowed under the previous license, in line with our previous estimate. Following this agreement, S&P affirmed 'A' credit ratings on Caribbean's long-term corporate credit and senior unsecured debt and removed it from credit watch.
- **Q1/08 Fortis Non-Regulated Generation:** Year-over-year earnings were **down slightly** to $6 million from $7 million a year before. Lower production (288 GWh in Q1/08 vs. 291 GWh in Q1/07) resulted in a $2 million decrease in revenue which was offset by lower amortization and finance charges, each down $1 million. Corporate taxes increased by $1 million. The Ontario average power price dropped to $49.93/MWh compared to $52.61/MWh one year ago.
- **Q1/08 Fortis Properties:** Q1/08 earnings increased by $1 million to $3 million year over year. Real estate revenues grew by $2M, mainly due to the real estate acquired in August 2007 as a part of the acquisition of the Delta Regina. Overall occupancy improved significantly YOY, to 96.6% in Q1/08 from 94.9% in Q1/07. Hospitality was up $3M over the prior year due to the same acquisition (Delta Regina). Revenue per available room rose 3.6% to $67.82 YOY. Partially offsetting were the expenses, also coming from the Delta Regina.
- **2009 Impact of Niagra Exchange Agreement:** As of April 30, 2009, FTS will lose the earnings from the Rankine Generating Station as per the Niagra Exchange Agreement implemented late in 2005. The lost run rate is $14-$15 million per year or $0.02 per quarter.

FTS expects the earnings from the new 18MW Vaca hydroelectric generating facility in Belize should offset the loss in earnings from Rankine. Since we assume an October 1, 2009 in service date for Vaca, this leaves a flat spot in earnings for Q2 and Q3 2009 for which we are taking off $0.02/quarter.

- **Corporate and Other:** Overall net corporate and other expenses increased 60% YOY to $16 million. Revenues increased by $4 million on higher inter-corporate lending but this was more than offset by a $10 million increase in finance charges due to new Terasen acquisition-related finance charges.
- **Financial:** FTS issued $400M in debt markets in YTD 2008. Utility capital expenditures are expected to be $900M in 2008 with most growth driven by BC and Alberta. We speculate FTS asks equity markets for $150M in Q1/09 or 5M share at $30/share in our 20089 EPS. At March 31 2007, FTS' capital structure had only 31.1% equity and 5.1% preference shares. The new $1.00/share dividend became effective as of March 1, 2008.

* *Legend*

H3 The Head of Equity Research/Supervisory Analyst, in his/her own account or in a related account, owns securities of this issuer.

S Scotia Capital Inc. and its affiliates collectively beneficially own in excess of 1% of one or more classes of the issued and outstanding equity securities of this issuer.

Definition of Scotia Capital Equity Research Ratings & Risk Rankings

We have a three-tiered rating system, with ratings of 1-Sector Outperform, 2-Sector Perform, and 3-Sector Underperform. Each analyst assigns a rating that is relative to his or her coverage universe.

Our risk ranking system provides transparency as to the underlying financial and operational risk of each stock covered. Statistical and judgmental factors considered are: historical financial results, share price volatility, liquidity of the shares, credit ratings, analyst forecasts, consistency and predictability of earnings, EPS growth, dividends, cash flow from operations, and strength of balance sheet. The Director of Research and the Supervisory Analyst jointly make the final determination of all risk rankings.

Ratings

1-Sector Outperform
The stock is expected to outperform the average total return of the analyst's coverage universe by sector over the next 12 months.

2-Sector Perform
The stock is expected to perform approximately in line with the average total return of the analyst's coverage universe by sector over the next 12 months.

3-Sector Underperform
The stock is expected to underperform the average total return of the analyst's coverage universe by sector over the next 12 months.

Other Ratings
Tender – Investors are guided to tender to the terms of the takeover offer.

Under Review – The rating has been temporarily placed under review, until sufficient information has been received and assessed by the analyst.

Risk Rankings

Low
Low financial and operational risk, high predictability of financial results, low stock volatility.

Medium
Moderate financial and operational risk, moderate predictability of financial results, moderate stock volatility.

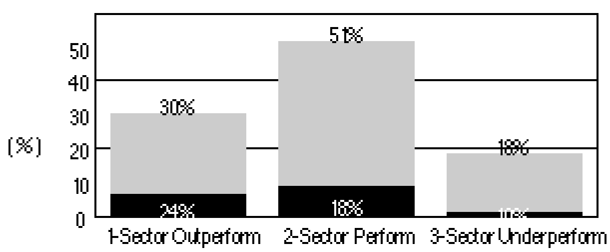
High
High financial and/or operational risk, low predictability of financial results, high stock volatility.

Caution Warranted
Exceptionally high financial and/or operational risk, exceptionally low predictability of financial results, exceptionally high stock volatility. For risk-tolerant investors only.

Venture
Risk and return consistent with Venture Capital. For risk-tolerant investors only.

Scotia Capital Equity Research Ratings Distribution*

Distribution by Ratings and Equity and Equity-Related Financings*



- Percentage of companies covered by Scotia Capital Equity Research within each rating category.
- Percentage of companies within each rating category for which Scotia Capital has undertaken an underwriting liability or has provided advice for a fee within the last 12 months.

* As at April 30, 2008.

Belize Government Plays Hardball

Event

- Fortis (FTS) rejected a hardball proposal by the new Belize government that would have reduced its regulated return from roughly 12% ROE earned in recent years to 8.5%. FTS views 15% ROE as acceptable.

What It Means

- EPS: A maximum $0.01/share/quarter current EPS exposure to date, or $1.5M/quarter, at 70%-owned BEL is due to FTS rejecting a hardball Belize government proposal for higher rates that do not cover higher power costs from Mexico.
- A U.S. arbitrator has been called in with a decision expected by the end of June/08. The Belize government offered about 8.5% ROE on a 50% BEL equity base. FTS has earned about 12% ROE in recent years on 50% of its now-$90M investment in BEL under different regulations.
- The soaring cost of Mexico power imports based on diesel and natural gas prices are behind the rate conflict. The new government was elected in Feb/08 with promises to reduce power, cable, and phone rates.
- Valuation: We chose to stay put for now on this immaterial negative. Our bias is perhaps down $0.50/share if the final ruling is not fair.

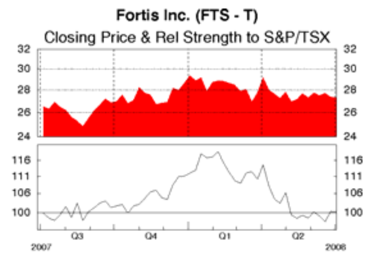
Belize Government Disappoints



Source: Global Insight, Inc.

Event

- Fortis (FTS) last rejected a tough proposal by the new Belize government that would have cut 70.1%-owned BEL's regulated return to 8.5% from 12%. BEL got 10% but with a rejection of $12.6M of retroactive costs net to FTS. BEL will legally contest the decision.

What It Means

- EPS: The C$12.6M retroactive denial net to FTS of higher third-party power costs should hurt FTS's Q2/08E EPS by about $0.08. We had last wrote/estimated a maximum of $0.01/quarter EPS exposure to date or $1.5M/quarter.
- A U.S. arbitrator had been called in, with its recommendations mostly rejected. The Belize government's initial offer of about 8.5% ROE on a 50% BEL equity base will now be a harder initial retroactive cost denial but with a more fair return going forward of 10%. FTS had earned about 12% on assets on 50% of its now $90M investment in BEL.
- The soaring cost of Mexico power imports based on diesel and natural gas prices are behind this, while the new government was elected in Feb/08 with promises to reduce power, cable, and phone rates.
- Valuation: Our last observation on this topic suggested a $0.50/share cut in FTS's one-year target if the final ruling was not fair. It was not, in our opinion.

Q3/08 Recurring EPS Modestly Beats

Event

- Fortis (FTS) reported Q3/08 EPS of $0.31 of which $0.05 was one time Terasen tax related. We estimate FTS' net was $0.23 recurring, modestly beating us and consensus at $0.21 in an $0.18-$0.24 range.

What It Means

- Q3/08 EPS OK: After mildly missing EPS consensus for Q2-Q4/07, FTS beat in Q1/08, matched in Q2/08 and modestly beat in Q3/08. FTS' $3.7B Terasen asset had a non-recurring $0.05 tax adjustment in Q3/08.
- Hurricane Ike cost FTS $0.01 in Q3/08 and is expected to cost $0.01 more in Q4/08 that will be about $0.02 lower overall as the new quarterly expense allocation at Nfld Power that helped its Q3 should mildly hurt Q4.
- Valuation: We nudged up our P/E multiple by 0.5x to 17x for greater liquidity available for FTS's stock, being added to the TSX 60 index recently. We shaved our 2009/2010 EPS estimates by $0.02 and $0.01 for the economic slowdown effect on at FTS' Caribbean operations and Real Estate/Hospitality division. This netted $1 up on our one-year target.

Q3/08 Highlights

- **Q3/08 Recurring EPS A Modest Beat:** Fortis (FTS) reported Q3/08 EPS of $0.31 which we calculate at $0.23 recurring. This modestly beat our $0.21 and consensus of $0.21 in a $0.18-$0.24 range. Reported earnings included: $0.006/share loss in earnings due to Hurricane Ike in the Turks and Caicos, a $0.025 hydro gain due to wet weather in both the U.S. Northeast and in Belize and a $0.01 gain from a one-time future income tax benefit being booked at Fortis Alberta. This nets FTS' recurring to $0.23. There was also a $0.035/share favourable shift in the quarterly distribution of annual purchased power expense at Newfoundland Power. Q4/08 should be $0.02 lower. FTS reported $0.20/share in Q3/07. See Exhibit 1.
- **Q3/08 vs. Q3/07 EPS Results Summary:** Full comparable recurring EPS was flat at $0.20 in Q3/08 vs. $0.20 in Q3/07. FortisAlberta and FortisBC had a reported improvement YOY, increasing $2M each due to higher corporate tax recoveries at Fortis Alberta and lower energy supply costs at FortisBC. These gains were partially offset by $3M lower earnings at its Caribbean operation where Belize Electricity's targeted allowed ROA was reduced to 10% from 12%. Terasen Gas results were **flat** YOY. See Exhibit 2 for a breakdown of EPS by segment and Exhibit 3 for each segment's allowed ROE.
- **Stock & Sector Valuation:** We are nudging up our P/E multiple for FTS by 0.5x to reflect its recent addition to the S&P/TSX 60, 60 Capped and Equity 60 indices**.** Our 2009 EPS forecast includes an assumed 5.5M share issue for $150M at $27.50/share effective 1/1/09 that may/may not happen. We set our energy utility P/E multiples assuming 4.25% 10-year Canada rates. Our range is 15x (Emera) to 20x (Enbridge) vs. our new FTS multiple of 17x. FTS' Belize interests are less than 10% of assets but have been hurt by its new government promising to keep power rates frozen to get elected. Belize is a junk debt country so earnings from there should be given a 10x P/E. We shaved our 2009/10 EPS estimates by $0.02/share and $0.01/share to reflect some likely impact of the economic slowdown at FTS' Caribbean operations and Canadian Real Estate/Hospitality division. The 0.5x P/E multiple increase more than offsets this so our one-year target moves up $1 to $29.
- **Q3/08 Terasen Gas:** Reported $1 million in earnings for Q3/08 versus a loss of $4 million in Q3/07. **All of the difference was caused by a $5.5M tax reduction** which benefitted Q3/08, otherwise, results were in line YOY. Gas volumes were **down 2.0%** to 30,798 TJ. Residential volumes were up on cooler than normal weather, but this was more than offset by lower transportation volumes to customers sourcing their own gas supplies. Net customer additions eased a bit to 5,573 YTD versus 6,323 YOY. The $1M recurring loss incurred is consistent for an off-season quarter. Terasen Gas is comprised of TGI (i.e., Vancouver), TGVI (i.e., Vancouver Island), and TGWI (i.e., Whistler area). TGI's allowed 2008 ROE is 8.62% on a deemed equity of 35%, while TGVI's allowed 2008 ROE is 9.32% on deemed equity of 40%.

Source: Bloomberg; Scotia Capital estimates.

- **Terasen Gas Vancouver Island (TGVI)** got approval on April 1, 2008 for the construction and operation of a 1.5 Bcf/d natural gas storage facility on Vancouver Island. FTS estimated a capital cost of $175 million to $200 million, with an in-service date of 2011.
- **Q3/08 FortisAlberta:** Earnings increased $2M YOY to $17M **primarily due to booked future income tax recoveries.** Energy deliveries **decreased** by 33 GWh YOY to 3,748 GWh due to strong customer additions. In June 2008, the AUC determined that a review of the ROE level and adjustment mechanism was warranted and in July 2008 issued its notice of application for the 2009 Generic Cost of Capital Proceeding. A hearing is scheduled for Q1/09. **2008 Allowed ROE: 8.75%** (2007 was 8.51%).
- **Q3/08 FortisBC:** Reported Q3/08 net earnings of $8 million were up $2 million YOY and consistent with relatively flat electricity sales YOY. A customer rate increase of 2.9% and lower energy supply costs were partly offset by increased financing charges as the company continues its investment in capital expenditures. In June 2008, FortisBC filed its Capital Plan for 2009/10; a decision is expected in Q4/08. **2008 Allowed ROE: 9.02%** (2007 was 8.77%). In September 2008, FTS filed a 5.6% rate increase with the BCUC that would be effective January 1, 2009.
- **Q3/08 Newfoundland Power:** Earnings rose $6M from $2M to $8M YOY **mainly due to a new timing difference caused by a change in expense recognition.** Electricity sales volumes increased 2.6% YOY to 897 GWh compared to 874 GWh in Q3/07 and revenues increased 4%. Supply costs decreased by 14% from $59M in Q3/07 to $51M in Q3/08 due mainly to a timing difference. Winter months have a higher expense per kWh and lower in the summer under the regulated rate structure. In 2007, expenses were estimated based on a forecasted annual average while any difference between this smoothed amount and actual costs were adjusted to a regulatory reserve. The Newfoundland and Labrador Board of Commissioners of Public Utilities mandated **that this reserve be eliminated effective January 1, 2008.** Now, monthly cost is actual cost which is driving Q1 and Q4 earnings down and Q2 and Q3 up.

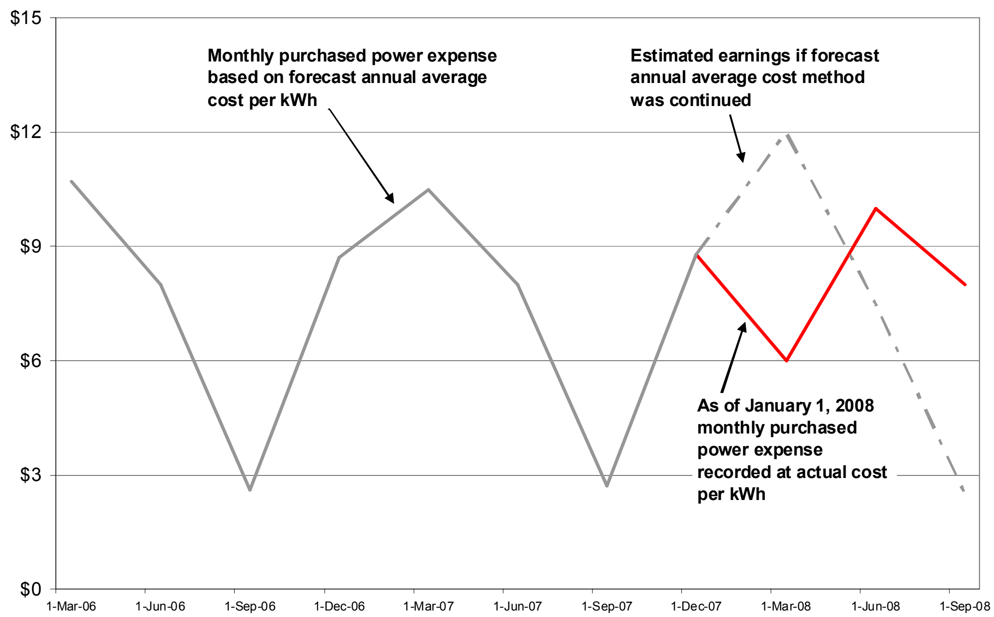
Exhibit 4 – Impact of Expense Accounting Change on FTS Earnings



Source: Company reports; Scotia Capital estimates.

See Exhibit 4 for the impact of this accounting change on earnings. **This change has no impact on annual earnings.** The PUB has given the FTS subsidiary a 2008 Allowed ROE of 8.95% (8.6% in 2007).

- **Q3/08 Other Canadian Electric Utilities**: Following the acquisition of Terasen, Fortis lumped Maritime Electric and FortisOntario into an "other" category. The two subsidiaries' had **flat** year-over-year earnings at $5 million. Excluding the one-time charge to FortisOntario of $2 million, earnings were **flat YOY.** Maritime Electric's 2008 ROE **declined slightly** to 10% (on deemed equity of 40%) from 10.25%. In October 2008, FortisOntario agreed to acquire a 10% minority interest in Grimsby Power Inc.'s Fort Erie distribution business (10,000 customers) for $1.1M. FTS also agreed to provide services to Grimsby Power Inc.'s customer information system. In October 2008, Maritime Electric filed its 2009 basic rate application for 7.46%-8.25% higher rates and a 2009 maximum ROE of 9.75%.
- **Q3/08 Regulated Utilities - Caribbean:** FTS owns 54% of Caribbean Utilities, 70% of Belize Electricity and 100% of Fortis Turks and Caicos in this group. Electricity sales increased 7% YOY to 304 GWh but earnings decreased by $3 million to $7 million. Contributing to the decline were: (1) lower VAD component of the average electricity rate at Belize Electricity, (2) 3.25% reduction in basic electricity rates and (3) higher amortization costs. The Caribbean operation also lost $1M due to Hurricane Ike and expects to lose another $1M in Q4/08. The Company has a 30-day insurance deductible when claiming lost revenues, so the $1M loss in revenues in Q4/08 may be partially offset. Electricity service was restored as of October 22, 2008. In April 2008, Caribbean Utilities obtained an exclusive T&D license extension from the Government of the Cayman Islands for 20 years and a non-exclusive 21.5 year generation license. The T&D license sets customer rates using a 10% rate of return on rate base assets versus 15% allowed previously, in line with our previous reduction estimate. S&P affirmed 'A' credit ratings on Caribbean's long-term corporate credit

and senior unsecured debt and removed it from credit watch. In July 2008, Caribbean Utilities began a process to evaluate wind-generation projects up to 10 MW.

- **Regulated Utilities - Caribbean, Outlook:** Electricity sales growth at Caribbean Utilities and FTS Turks & Caicos is expected by FTS to be **lower than expected**, now at 6%-7%. The decline in forecast is due to reduced demand expected on account of the U.S. slowdown which should impact the tourism industry on the islands. Also, Hurricane Ike has delayed the reopening of hotels on the islands. Offsetting the lower-than-expected sales growth, is a lower C$ (we are using C$0.90 compared to parity last year).
- **Belize Electricity ("BEL") 2008/2009 Rate Application:** On June 30, 2008, Fortis rejected a tough proposal by the new Belize government that would have cut 70.1%-owned BEL's regulated return to 8.5% from 12%. BEL got 10% but with a rejection of $12.6M of retroactive costs net to FTS. In Q2/08, FTS recorded a $13 million charge or $0.08/share as a result of this ruling. On July 25, 2008, BEL appealed this decision to the Supreme Court of Belize that will rule on this in 2009.
- **Q3/08 Fortis Non-Regulated Generation:** Year-over-year earnings were up 23% to $21 million from $17 million. Higher hydro production (305 GWh in Q3/08 vs. 254 GWh in Q3/07) resulted in a $4 million increase in revenue which was partially offset by higher amortization and the negative impact of foreign exchange translation. The Ontario average power price increased to $50.76/MWh compared to $47.42/MWh one year ago.
- **Q3/08 Fortis Properties:** Q3/08 earnings increased by $1 million to $9 million year over year as Hospitality and Real Estate revenues each grew by $1 million YOY. The Delta Regina purchase last year helped with other operations flat. Occupancy was down 30 bp YOY to 96.6%.
- **2009 Impact of Niagara Exchange Agreement:** As of April 30, 2009, FTS will lose the earnings stream from the Rankine Generating Station as per the Niagara Exchange Agreement with OPG. The lost earnings will be $14-$15 million per year or $0.02/share per quarter. FTS expects the earnings from its new 18MW Vaca hydroelectric generating facility in Belize **should offset the loss in earnings from Rankine**. Since we assume an October 1, 2009 in-service date for Vaca, this leaves a flat spot in earnings for Q2 and Q3 2009 for which we previously took off $0.02/quarter.
- **Corporate and Other:** Overall net corporate and other expenses decreased $1M YOY to $15 million while revenues decreased by the same amount. Both operating expenses and financing charges increased YOY. A $2M tax reduction related to historical tax matters at Terasen was booked that offset the increase.
- **Financial:** Utility capital expenditures are expected to be over $900M in 2008 with most growth driven by B.C. and Alberta. Capital expenditures are currently at $623M. Over the next five years, FTS expects capital expenditures **to exceed $4.5B**. We speculate FTS asks equity markets for $150M in Q1/09 or 5.5M shares at $27.50/share in our 2009 EPS. At September 30 2008, FTS' Q3/08 capital **structure had only 28.6% equity** including 3.3% in preference shares that included a new $230M 5.25% First Preference share issue in May/08 to complete the Terasen financing. FTS' new $1.00/share dividend was effective March 1, 2008.

Definition of Scotia Capital Equity Research Ratings & Risk Rankings

We have a three-tiered rating system, with ratings of 1-Sector Outperform, 2-Sector Perform, and 3-Sector Underperform. Each analyst assigns a rating that is relative to his or her coverage universe.

Our risk ranking system provides transparency as to the underlying financial and operational risk of each stock covered. Statistical and judgmental factors considered are: historical financial results, share price volatility, liquidity of the shares, credit ratings, analyst forecasts, consistency and predictability of earnings, EPS growth, dividends, cash flow from operations, and strength of balance sheet. The Director of Research and the Supervisory Analyst jointly make the final determination of all risk rankings.

Ratings

1-Sector Outperform
The stock is expected to outperform the average total return of the analyst's coverage universe by sector over the next 12 months.

2-Sector Perform
The stock is expected to perform approximately in line with the average total return of the analyst's coverage universe by sector over the next 12 months.

3-Sector Underperform
The stock is expected to underperform the average total return of the analyst's coverage universe by sector over the next 12 months.

Other Ratings
Tender – Investors are guided to tender to the terms of the takeover offer.

Under Review – The rating has been temporarily placed under review, until sufficient information has been received and assessed by the analyst.

Risk Rankings

Low
Low financial and operational risk, high predictability of financial results, low stock volatility.

Medium
Moderate financial and operational risk, moderate predictability of financial results, moderate stock volatility.

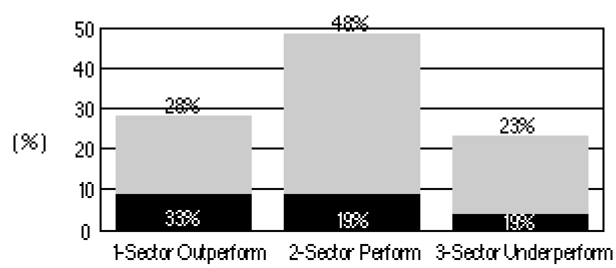
High
High financial and/or operational risk, low predictability of financial results, high stock volatility.

Caution Warranted
Exceptionally high financial and/or operational risk, exceptionally low predictability of financial results, exceptionally high stock volatility. For risk-tolerant investors only.

Venture
Risk and return consistent with Venture Capital. For risk-tolerant investors only.

Scotia Capital Equity Research Ratings Distribution*

Distribution by Ratings and Equity and Equity-Related Financings*



Percentage of companies covered by Scotia Capital Equity Research within each rating category.

Percentage of companies within each rating category for which Scotia Capital has undertaken an underwriting liability or has provided advice for a fee within the last 12 months.

Downgrading on Price Appreciation

Event

- We are downgrading Fortis solely on relative price appreciation, to 2-SP from 1-SO. At the same time, we are lowering our risk ranking to Low from Medium.

What It Means

- Since upgrading FTS to 1-Sector Outperform on August 7, 2007, FTS has appreciated +8%, significantly outperforming the S&P TSX Utilities Index at -17% as well as outperforming all utility stocks in our coverage universe. We are now downgrading FTS to a 2-Sector Perform solely due to relative price appreciation. Our target price and EPS forecasts remain unchanged.
- The acquisition of blue chip Terasen Gas has lowered the overall risk ranking of FTS, representing ~40% of FTS' balance sheet. As a result, we are improving the risk ranking to Low from Medium, consistent with others in the space.

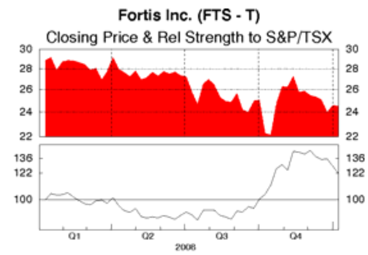
Off Restriction; Equity Raise More than Expected



Source: Global Insight, Inc.

Event

- Fortis has closed its $300M common share issue which could result in gross proceeds of $345M if the over-allotment is exercised. We had assumed $150M in our 2009/2010 estimates.

What It Means

- FTS stated that it would use a portion of the proceeds to repay the $200M Terasen debt that matured in December 2008. The remainder will be used to repay credit facilities and general corporate purposes.
- To account for greater-than-expected dilution from the share issue, we are lowering our 2009E and 2010E EPS by $0.07/share and $0.03/share, respectively. Additionally we are assuming an 8% 2009 ROE (70 bp lower YOY) on FTS' Canadian regulated utility returns, directionally lower than expected. This cuts a further $0.08 and $0.04 from our 09/10E EPS, respectively. Our one-year target is reduced by $1.50/share to $28.50. We kept our 17x P/E multiple constant.
- We downgraded FTS on November 18, 2008 to 2-Sector Perform solely due to price appreciation after FTS stock hit $28/share intraday. At its current price, we continue to prefer Fortis within our Utilities universe, and prefer Pipelines over Utilities.

Definition of Scotia Capital Equity Research Ratings & Risk Rankings

We have a three-tiered rating system, with ratings of 1-Sector Outperform, 2-Sector Perform, and 3-Sector Underperform. Each analyst assigns a rating that is relative to his or her coverage universe.

Our risk ranking system provides transparency as to the underlying financial and operational risk of each stock covered. Statistical and judgmental factors considered are: historical financial results, share price volatility, liquidity of the shares, credit ratings, analyst forecasts, consistency and predictability of earnings, EPS growth, dividends, cash flow from operations, and strength of balance sheet. The Director of Research and the Supervisory Analyst jointly make the final determination of all risk rankings.

Ratings

1-Sector Outperform
The stock is expected to outperform the average total return of the analyst's coverage universe by sector over the next 12 months.

2-Sector Perform
The stock is expected to perform approximately in line with the average total return of the analyst's coverage universe by sector over the next 12 months.

3-Sector Underperform
The stock is expected to underperform the average total return of the analyst's coverage universe by sector over the next 12 months.

Other Ratings
Tender – Investors are guided to tender to the terms of the takeover offer.

Under Review – The rating has been temporarily placed under review, until sufficient information has been received and assessed by the analyst.

Risk Rankings

Low
Low financial and operational risk, high predictability of financial results, low stock volatility.

Medium
Moderate financial and operational risk, moderate predictability of financial results, moderate stock volatility.

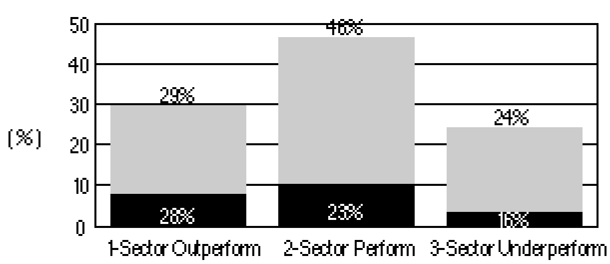
High
High financial and/or operational risk, low predictability of financial results, high stock volatility.

Caution Warranted
Exceptionally high financial and/or operational risk, exceptionally low predictability of financial results, exceptionally high stock volatility. For risk-tolerant investors only.

Venture
Risk and return consistent with Venture Capital. For risk-tolerant investors only.

Scotia Capital Equity Research Ratings Distribution*

Distribution by Ratings and Equity and Equity-Related Financings*



- Percentage of companies covered by Scotia Capital Equity Research within each rating category.
- Percentage of companies within each rating category for which Scotia Capital has undertaken an underwriting liability or has provided advice for a fee within the last 12 months.

* As at December 31, 2008.

Source: Scotia Capital.

For the purposes of the ratings distribution disclosure the NASD requires members who use a ratings system with terms different than "buy," "hold/neutral" and "sell," to equate their own ratings into these categories. Our 1-Sector Outperform, 2-Sector Perform, and 3-Sector Underperform ratings are based on the criteria above, but for this purpose could be equated to buy, neutral and sell ratings, respectively.

Q4/08 EPS Mildly Above Consensus

Event

- Fortis reported Q4/08 EPS of $0.48 or a net $0.49 recurring. This beat consensus at $0.46 in a $0.36-$0.58 range, but missed our $0.58 that had lower depreciation ($0.05 difference) and assumed non-cash FX gains.

What It Means

- After mildly missing EPS Bloomberg consensus for Q2-Q4/07, FTS beat in Q1/08, matched in Q2/08 and mildly beat in Q3/08 and Q4/08.
- **2009 EPS outlook:** We shaved $0.04/share off 2009E EPS split evenly between the economic slowdown's impact on FTS' Hospitality and tourism-related (Caribbean) operations and the announced three-month delay in the start-up of the Belize Vaca hydro plant to Q1/10.
- **2010 EPS outlook:** We also shaved $0.02/share from our 2010 EPS due to substandard 2010 economic recovery expectations.
- **Valuation:** We left our P/E multiple of 17x intact but rounded down our one-year target to $28 from $28.50 on slightly lower 2010E EPS. We like FTS' exposure to its green assets relative to all other Canadian power utilities that have coal-fired power plant exposure.

Qtly EPS (Basic)	Q1	Q2	Q3	Q4	Year	P/E

Q4/08 Highlights

- **Fortis reported Q4/08 EPS** of $0.48 which appears to be $0.49 recurring. This beats consensus at $0.46 in a $0.36-$0.58 range but missed our $0.58 as we had included some expected FX gains due to the C$ slump and had our depreciation too high by about $0.05/share. See Exhibit 1 for recurring adjustment details. See Exhibit 2 for a breakdown of EPS by segment and Exhibit 3 for each segment's allowed ROE.

Exhibit 1 – EPS Recurring Breakdown

Reported EPS	**$**	**0.48**
Caribbean Utilities change in year end	$	(0.006)
Loss in revenue due to Hurricane Ike	$	0.006
Newfoundland Power shift in quarterly distribution	$	0.013
Recurring EPS	**$**	**0.492**
Scotia Capital EPS Estimate	**$**	**0.58**
Bloomberg Consensus EPS (range $0.38-$0.56)	**$**	**0.46**

Source: Bloomberg; Scotia Capital estimates.

- **EPS outlook flatter:** Hospitality earnings growth is expected to be weak in 2009 due to the economic downturn (Hospitality represented 9% of FTS' 2008 EPS). FTS' Caribbean operations are driven by U.S. tourism so their earnings will also be negatively affected. FTS had stated that electricity sales growth at Caribbean Utilities and FTS Turks & Caicos will be lower than 2008. We had already shaved our 2009/10 EPS estimates by $0.02/share and $0.01/share to reflect some likely impact of the economic slowdown at FTS' Caribbean operations and Canadian Real Estate/Hospitality division. Given worsethan-expected economic conditions we shaved a further $0.02/share from 2009E and 2010E. We are also taking 2009E EPS by another $0.02/share in Q4/09 as FTS announced a three-month delay starting its Belize Vaca hydro plant (see below for further details) to January 1, 2010. FTS had estimated that this hydro plant could contribute $0.08/share/year offsetting the loss of $0.08/share earned from the OPG Niagara Falls water rights sale that expires in late 2009.
- **Stock & sector valuation:** We left our 17x P/E multiple steady but rounded down our $28.50/share one-year target to $28.00**.** We set our energy utility P/E multiples assuming 4.25% 10-year Canada rates (currently 3.1%) and much more normal corporate debt risk premiums (currently 200-300 points over normal levels for BBB+/A-). Our current range is 15.5x (Emera) to 20x (Enbridge) with FTS slightly below the median. We do **not like** FTS' Belize interests that were temporarily held for ransom by the new 2008 government that confiscated rightful earnings from FTS' 70% owned Belize Electricity in 2008. Belize assets are about 10% of FTS assets once the new dam is finished there. Belize debt remains rated as junk so earnings from there should be given a sub-10x P/E. We do like FTS' exposure to its benign, green assets over all other utilities covered that have exposure to coal-fired assets.
- **Q4/08 Terasen Gas:** Reported $47 million in earnings for Q4/08 versus $52 million in Q4/07 that had a $7M after-tax gain on a Q4/07 land sale. Recurring earnings were $2M higher YOY. Gas volumes were **down 3.3%**. Residential volumes were up on cooler-than-normal weather, but this was more than offset by lower transportation volumes to customers sourcing their own gas supplies. Net customer additions eased a bit to 12,800 YTD (up 1.3%) versus 13,900 YOY. Virtually all of Terasen's earnings are achieved in the 1st and 4th quarters. Terasen Gas is composed of TGI (i.e., Vancouver), TGVI (i.e., Vancouver Island), and TGWI (i.e., Whistler area). TGI's allowed 2008 ROE was 8.62% on deemed equity of 35%, while TGVI's allowed 2008 ROE was 9.32% on deemed equity of 40%.

Exhibit 2 – Fortis' EPS Contribution by Segment

FORTIS INC.	Segment	EPS Contribution Q4/08	(%)	Q4/07	(%)
Regulated Gas	Terasen Gas	$ 0.30	63%	$ 0.34	66%
Regulated Electric	FortisAlberta	$ 0.07	14%	$ 0.04	8%
	FortisBC	$ 0.04	9%	$ 0.05	9%
	Newfoundland Power	$ 0.05	11%	$ 0.06	11%
	Other Canadian *	$ 0.02	4%	$ 0.02	4%
	Caribbean **	$ 0.05	10%	$ 0.06	11%
Non-Regulated Operations	Fortis Hydroelectric Generation	$ 0.05	10%	$ 0.05	9%
	Fortis Properties	$ 0.03	5%	$ 0.05	10%
	Fortis Corporate	$ (0.13)	-26%	$ (0.14)	-28%
	EPS	$0.48		$0.51	

Source: Company reports; Scotia Capital estimates.

- **Terasen Gas Vancouver Island (TGVI)** got approval on April 1, 2008 for the construction and operation of a 1.5 Bcf/d LNG natural gas storage facility on Vancouver Island. FTS estimated a capital cost of $175 million to $200 million, with an in-service date of 2011.
- **Q4/08 FortisAlberta:** Earnings increased $5M YOY to $11M primarily due to the approved AESO charges deferral account. Energy deliveries **increased** by 66 GWh YOY or 1.6%. In June 2008, the AUC determined that a review of the ROE level and adjustment mechanism was warranted and in July 2008 issued its notice of application for the 2009 Generic Cost of Capital Proceeding. A hearing is scheduled for Q1/09. 2008 Allowed ROE was 8.75% (2007 was 8.51%).
- **Q4/08 FortisBC:** Reported Q4/08 net earnings of $7 million were flat YOY with flat electricity sales. An electricity rate increase of 2.9% was offset by increased energy supply costs. 2008 allowed ROE was 9.02% (2007 was 8.77%). In December 2008, the BCUC approved a general rate increase of 4.6% effective January 1, 2009.
- **Q4/08 Newfoundland Power:** Earnings fell $1M from $9M to $8M YOY **due to the quarterly distribution of annual purchased power expenses that decreased Q4/08 earnings by $2M.** Electricity sales volumes increased 2.0% YOY to 1,412 GWh in Q4/07. Supply costs increased by 7% from $88M in Q4/07 to $94M in Q4/08 due mainly to a timing difference. Winter months have a higher expense per kWh and lower in the summer under the new regulated rate structure. In 2007, expenses were estimated based on a forecasted annual average while any difference between this smoothed amount and actual costs were adjusted to a regulatory reserve. The Newfoundland and Labrador Board of Commissioners of Public Utilities mandated **that this reserve be eliminated effective January 1, 2008.** Now, monthly cost is based on actual cost. This drives down Q1 and Q4 earnings and drives Q2 and Q3 up. **This change has no impact on annual earnings.** The PUB gave this FTS subsidiary a 2008 allowed ROE of 8.95% (8.6% in 2007).

- **Q4/08 other canadian electric utilities**: Following the acquisition of Terasen, Fortis lumped Maritime Electric and FortisOntario into an "other" category. It had **flat** year-over-year earnings at $3 million. Maritime Electric's 2008 ROE **declined slightly** to 10% (on deemed equity of 40%) from 10.25%. In October 2008, Maritime Electric filed its 2009 basic rate application for 7.46%-8.25% higher rates and a 2009 maximum ROE of 9.75%. A decision is expected Q1/09.

Exhibit 3 – Nature of FTS' Regulation

Nature of Regulation

(1) Application pending regulatory approval
(2) Rate effective 1H/09

Source: Company reports.

- **Q4/08 regulated utilities - caribbean:** FTS owns 54% of Caribbean Utilities, 70% of Belize Electricity, and 100% of Fortis Turks and Caicos in this group. Electricity sales increased 32.7% YOY to 361 GWh but earnings **decreased** by $1 million to $8 million due to: (1) lower VAD component of the average electricity rate at Belize Electricity, (2) 3.25% reduction in basic electricity rates and (3) higher amortization costs. Fortis Turks and Caicos also lost $2M due to Hurricane Ike (Class 4) that hit those islands. The company has a 30-day insurance deductible when claiming lost revenues, so the $2M loss may be partially offset upon claims settlement. The T&D license for Caribbean Utilities sets customer rates using a 10% rate of return on rate base assets versus 15% allowed previously. S&P affirmed 'A' credit ratings on Caribbean's long-term corporate credit and senior unsecured debt and removed it from credit watch.
- **Belize electricity ("BEL") 2008/2009 rate application:** On June 30, 2008, Fortis rejected a tough proposal by the new Belize government that would have cut 70.1%-owned BEL's regulated return to 8.5% from 12%. BEL got 10% but the government rejected $12.6M of retroactive costs buying necessary diesel-based power from Mexico net to FTS. In Q2/08, FTS recorded a $13 million charge or $0.08/share as a result of this ruling. On July 25, 2008, BEL appealed this decision to the Supreme Court of Belize. They will rule on this in 2009.
- **Q4/08 Fortis non-regulated generation:** Year-over-year earnings were up 14% to $8 million from $7 million. Higher hydro production (312 GWh in Q4/08 vs. 303 GWh in Q4/07) resulted in a $1 million increase in revenue, which was partially offset by higher amortization and the negative impact of foreign exchange translation. The Ontario average power price increased to $48.83/MWh compared to $47.81/MWh one year ago.
- **Q4/08 Fortis properties:** Q4/08 earnings decreased by $4 million to $4 million YOY even though Hospitality revenues grew $2 million and Real Estate revenues remained constant. The Delta Regina purchase last year helped keep other operations flat. Occupancy remained steady YOY at 96.8%.
- **2009 impact of Niagara Exchange Agreement:** As of April 30, 2009, FTS will lose the $15M annual earnings stream from its Rankine Generating Station that controlled 5% of the Niagara Falls water flow. This was sold under the Niagara Exchange Agreement to Ontario's OPG. This was adding $0.02/FTS share per quarter. FTS expects its new US$53M 19 MW Vaca hydroelectric generating facility in Belize **could offset this earnings loss, but only starting in 2010.** We had previously assumed an October 1, 2009 in-service date for Vaca, as did FTS, **so we lowered our Q4/09 EPS by $0.02/quarter.**
- **Corporate and other:** Overall net corporate and other expenses decreased $2M YOY to $20 million. Both operating expenses increased YOY while financing charges decreased. There was a $2M tax reduction in 2008 related with the settlement of historical tax matters at Terasen.

- **Capital expenditures:** Utility capital expenditures are expected to be an **unchanged $1B** in 2009 ($904M in 2008) with most growth driven by B.C. and Alberta. Over the next five years, FTS still expects capital expenditures **to exceed $4.5B**. Major projects include:
  - **$200M** liquefied natural gas facility on Vancouver Island.
  - **US$53M** Vaca hydro facility (see above).
  - **$124M** installation of auto meters at Fortis Alberta.
- **Financial:** FTS' capital structure is now at 59.5% debt, 7% preferred equity, and 33% common equity. **This is now in line with its target** of 60% debt post its $300M Q4/08 equity issue. FTS has $2.2B in credit facilities available (maturities do not start until 2011) with **$1.5B undrawn**. Due to the regulator's decision on Belize Electric (BE) Rate application, BE does **not** meet debt covenant ratios for its $11M loan. Waivers have been requested. First Caribbean Bank also withdrew its credit facility requiring payment of $2.5M. Scotiabank said that it may not renew their $3.2M facility (undrawn). **We view this Belize covenant-related issue of just under $20M as immaterial but a key reason why we view Belize earnings to be worth no more than 10x P/E**. In December 2008 the Government of Newfoundland expropriated the Newfoundland assets of Abitibi, which included a hydro facility owned by Exploits River Hydro Partnership (51% owned by FTS Properties). Exploit has a $61M loan secured by assets of Exploit and is **now classified as current. This loan is non-recourse to FTS.** We are watching to see what the Newfoundland government pays for this asset or how it deals with Fortis. The government has stated it had no interest in damaging the interests of Abitibi's JV partners in Newfoundland assets.

The stock is expected to outperform the average total return of the analyst's coverage universe by sector over the next 12 months.

2-Sector Perform
The stock is expected to perform approximately in line with the average total return of the analyst's coverage universe by sector over the next 12 months.

3-Sector Underperform
The stock is expected to underperform the average total return of the analyst's coverage universe by sector over the next 12 months.

Other Ratings
Tender – Investors are guided to tender to the terms of the takeover offer.

Under Review – The rating has been temporarily placed under review, until sufficient information has been received and assessed by the analyst.

Risk Rankings

Low
Low financial and operational risk, high predictability of financial results, low stock volatility.

Medium
Moderate financial and operational risk, moderate predictability of financial results, moderate stock volatility.

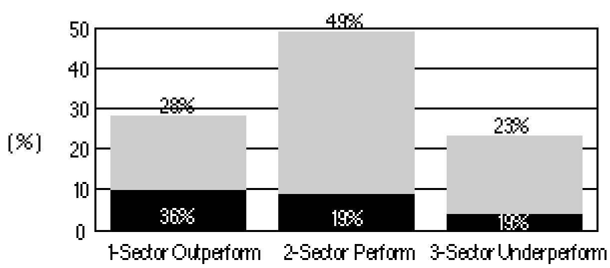
High
High financial and/or operational risk, low predictability of financial results, high stock volatility.

Caution Warranted
Exceptionally high financial and/or operational risk, exceptionally low predictability of financial results, exceptionally high stock volatility. For risk-tolerant investors only.

Venture
Risk and return consistent with Venture Capital. For risk-tolerant investors only.

Scotia Capital Equity Research Ratings Distribution*

Distribution by Ratings and Equity and Equity-Related Financings*



- Percentage of companies covered by Scotia Capital Equity Research within each rating category.
- Percentage of companies within each rating category for which Scotia Capital has undertaken an underwriting liability or has provided advice for a fee within the last 12 months.

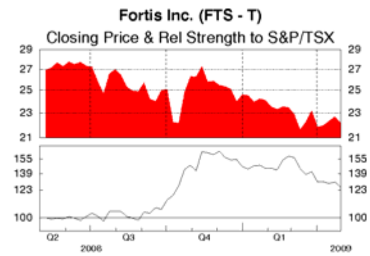
Q1/09 EPS Mildly Misses Us/Consensus



Source: Global Insight, Inc.

Event

- Fortis reported Q1/09 EPS of $0.54 mildly missing us and consensus at $0.57. Weak economies weighed on FTS' Hospitality and tourism-related (Caribbean) operations. Terasen Gas' results were flat and weaker non-utility generation results weighed.

Implications

- We shaved $0.02 off our 2009E EPS and cut our 2010E EPS by $0.05 due to the depth of the economic downturn and now swine flu that will reduce air travel to the Caribbean for a while.
- A possible Alberta EUB change in allowed ROE's to a WACC-based formula in Alberta could be a positive catalyst for FTS' EPS forecasts.
- We kept our 17x P/E multiple steady but took $1/share off our FTS one-year target on lower 2010E EPS to $27/share.

Recommendation

- We like FTS' exposure to its green assets relative to all other Canadian power utilities that have coal-fired power plant exposure. However, we do not like FTS' Caribbean and hotel exposure so we maintain a 2-SP.

Q1/09 Highlights

- **Fortis reported Q1/09 EPS** of $0.54 which appears to us to be also recurring - see Exhibit 1. This mildly missed us and consensus at $0.57 in a $0.53-$0.59 range. The EPS impact of the economic slowdown on FTS' Hospitality and tourism-related (Caribbean) operations was worse than expected while all other utility results appeared in line. See Exhibit 2 for a breakdown of EPS by segment and Exhibit 3 for each segment's allowed ROE.
- **2009 EPS down $0.02, 2010 EPS down $0.05:** We shaved both our 2009E and 2010E as the depth and duration of the downturn and now swine flu impacts on travel to anywhere will linger longer on FTS' Caribbean operations and Canadian Real Estate/Hospitality division.
- **Stock & sector valuation:** We left our 17x P/E multiple on FTS steady even though 2009 EPS should be flat to down due to a sizable equity dilution that helped FTS' balance sheet but should hurt short-term EPS. However, **we shaved our one-year target by $1/share to $27/share.** We set our energy utility P/E multiples assuming 4.25% 10-year Canada rates (currently 3.1% and rising) and more normal corporate debt risk premiums (currently 200 points over normal levels for BBB+/A-). We see rising interest rates (negative) offset by narrowing corporate spreads (positive). Our current range is 15x (CU and Emera) to 19.5x (Enbridge) with FTS in the middle. We do **not like** FTS' Belize interests that were temporarily held for ransom by the new 2008 government that confiscated rightful earnings from FTS' 70% owned Belize Electricity in 2008. Belize assets are growing to about 5% of FTS assets once the new Belize dam is on the books. The Government of Belize's debt remains rated as junk so we believe Belize EPS should get a sub-10x P/E. We **do like** FTS' exposure to its benign, green asset base over utilities with coal-fired assets. Our sector weighting is Market, biased to Underweight.

Exhibit 1 – EPS Recurring Breakdown

Reported EPS	**$**	**0.54**
Fortis Turks & Caicos favorable appeal judgment	$	(0.01)
Fortis Turks & Caicos change in accounting of unbilled fuel factor revenue	$	(0.01)
Sheraton Newfoundland transitional operating costs	$	0.01

Bloomberg Consensus EPS (range $0.53-$0.59)	**$**	**0.57**

Source: Bloomberg; Scotia Capital estimates.

- **Regulated allowed returns changing?** Late March 2009, the NEB agreed to allow Trans Quebec & Maritimes Pipeline Inc. (TQM, owned 50% by TRP and 50% by Gaz Metro) the right to include after-tax weighted average cost of capital (ATWACC) in its revenue requirement for 2007 and 2008. This translated into a 100bp increase in TQM's allowed ROE. FTS' Terasen Gas and Terasen Gas Vancouver Island are also applying for a review of their current ROE formula and deemed equity through their application for 2010, to be decided in mid-09. Fortis Alberta is also pursuing a review of its 2009 allowed ROE/capital structure. **We believe an ATWACC-based formula shows more economic reality than historical book value ROE methods based on forecasted 10-year risk free government bonds.**
- **Q1/09 Terasen Gas:** Reported $58 million in earnings for Q1/09 versus $58 million in Q1/08 or $0.01/FTS share disappointing as gas volumes **fell 0.3% YOY**. Residential volumes were up on cooler-than-normal weather, but this was more than offset by lower transportation volumes to customers sourcing their own gas supplies. Net customer adds thinned to 2,256 for the quarter, bringing the total customer count to approximately 934,000. All of Terasen's annual earnings are typically achieved in the 1st and 4th quarters. Terasen Gas is comprised of TGI (i.e. Vancouver), TGVI (i.e. Vancouver Island), and TGWI (i.e. Whistler area). TGI's allowed 2009 ROE is 8.47% on a deemed equity of 35%, while TGVI's allowed 2009 ROE is 9.17% on deemed equity of 40%.

- **Terasen Gas Vancouver Island (TGVI)** got approval on April 1, 2008 for the construction and operation of a 1.5 Bcf/d LNG natural gas storage facility on Vancouver Island. FTS estimated a capital cost of $175 million to $200 million, with an in-service date of 2011.

Exhibit 2 – Fortis' EPS Contribution by Segment

	EPS	$0.54		$0.58	
	Shares Outstanding (MM)	169.4		156.6	

Source: Company reports; Scotia Capital estimates.

- **Q1/09 FortisAlberta:** Earnings increased $1M YOY to $12M primarily due to customer growth and an increase in customer distribution rates. However, energy deliveries **increased** only 14 GWh YOY or 0.3%. In June 2008, the AUC determined that a review of the ROE level and adjustment mechanism was warranted and in July 2008 issued its notice of application for the 2009 Generic Cost of Capital Proceeding (GCCP). Interim customer rates for 2009 have been set using the 2007 ROE of 8.51%, pending the outcome of the GCCP already underway.
- **Q1/09 FortisBC:** Reported Q1/09 net earnings of $14 million were $2 million **higher YOY** with a 3.2% increase in electricity sales. An electricity rate increase of 4.6% was offset by increased energy supply costs. 2009 Allowed ROE is 8.87% (2007 was 9.02%).
- **Q1/09 Newfoundland Power:** Earnings were **flat** at $6 million YOY. Revenue was $5 million higher, offset by the impact of higher demand charges from Newfoundland and Labrador Hydro. Electricity sales volumes increased 2.7% YOY to 1,763 GWh in Q1/09. Supply costs rose by 4% from $122M in Q1/08 to $127M in Q1/09. Winter months have a higher expense per kWh and lower in the summer under the new regulated rate structure. The PUB gave this FTS subsidiary a 2009 Allowed ROE of 8.95% (unchanged from 2008).

- **Q1/09 Other Canadian Electric Utilities**: Following the acquisition of Terasen, Fortis lumped Maritime Electric and FortisOntario into an "other" category. It had **positive** year-over-year earnings at $5 million versus $4 million in Q1/08. Maritime Electric's 2009 ROE **declined slightly** to 9.75% (on deemed equity of 40%) from 10.0%. FortisOntario's 2009 ROE decreased materially to 8.39% from 9.00% in 2008.
- **Q1/09 Regulated Utilities - Caribbean:** FTS owns 54% of Caribbean Utilities, 70% of Belize Electricity, and 100% of Fortis Turks and Caicos in this group. Electricity sales **decreased 4% YOY** to 247 GWh and earnings **decreased** by $1 million to $6 million due to: (1) decreased electricity sales, (2) a lower ROA at Caribbean Utilities and Belize Electricity, (3) higher amortization costs, and (4) the elimination of the utility's hurricane cost recovery surcharge. The new T&D license for Caribbean Utilities sets 2009 customer rates using a 10% rate of return on rate base assets versus 15% allowed previously. S&P affirmed 'A' credit ratings on Caribbean's long-term corporate credit and senior unsecured debt and removed it from credit watch.

Exhibit 3 – Nature of FTS' Regulation

Nature of Regulation

Regulated Utility	Allowed Common Equity (%)	Allowed Returns (%) 2006	2007	2008	2009
		ROE			
Terasen Gas Companies					
TGI	35	8.8	8.37	8.62	8.47
TGVI	40	9.5	9.07	9.32	9.17

Fortis Turks and Caicos	N/A	17.5	17.5	17.5	17.5

(1) Application pending regulatory approval

Source: Company reports.

- **Belize Electricity ("BEL") 2008/2009 Rate Application:** On June 30, 2008, Fortis rejected a tough proposal by the new Belize government that would have cut 70.1%-owned BEL's regulated return to 8.5% from 12%. BEL got 10% but the Government rejected $12.6M of retroactive costs buying necessary diesel-based power from Mexico net to FTS. In Q2/08, FTS recorded a $13 million charge or $0.08/share as a result of this ruling. On July 25, 2008, BEL appealed this decision to the Supreme Court of Belize. Their ruling is expected in 2009.
- **Q1/09 Fortis Non-Regulated Generation:** Year-over-year earnings were **flat** at $6 million. Lower hydro production (257 GWh in Q1/09 vs. 288 GWh in Q1/08) resulted in a $3 million decrease in revenue which was partially offset by the approximate $1 million favourable impact of foreign exchange. The Ontario average power price **decreased** to $42.98/MWh compared to $49.93/MWh one year ago.
- **Q1/09 Fortis Properties:** Earnings **decreased** by $1-$2 million YOY even though Hospitality revenues grew $2 million and Real Estate revenues remained constant. Fortis purchased the 214-room Holiday Inn Select in Windsor, Ontario in April 2009 for $7 million. Occupancy remained steady YOY at 96.6%.
- **2009 Impact of Niagara Exchange Agreement:** As of April 30, 2009, FTS will lose the $15M annual earnings stream from its Rankine Generating Station that controlled 5% of the Niagara Falls water flow. This was sold under the Niagara Exchange Agreement to Ontario's OPG. **This was adding $0.02/FTS share per quarter**. FTS expects its new US$53M 19MW Vaca hydroelectric generating facility in Belize **could offset this earnings loss but only starting in 2010.**
- **Corporate and Other:** Overall net corporate and other expenses increased $1M YOY to $17 million. Operating expenses remained flat YOY while financing charges decreased. There was an unfavourable foreign exchange impact associated with the translation of US dollar-denominated interest expense.
- **Capital expenditures:** Utility capital expenditures are expected to be an **unchanged $1B** in 2009 ($904M in 2008) with most growth driven by B.C. and Alberta. Over the next five years, FTS still expects capital expenditures **to exceed $4.5B**. Major projects include:
  - **$200M** liquefied natural gas facility on Vancouver Island
  - **US$53M** Vaca hydro facility in Belize
  - **$161M** installation of automated meters at Fortis Alberta
  - **$139M** Okanagan Transmission Reinforcement Project at Fortis BC

- **Financial:** FTS' capital structure is now at 59.1% debt, 7.2% preferred equity and 33.7% common equity. **This is in line with FTS' target** of 60% debt post its $300M Q4/08 equity issue. FTS has $2.2B in credit facilities available (maturities do not start until 2011) with **$1.6B undrawn**. Due to the regulator's decision on Belize Electric (BE) Rate application, BE does **not** meet debt covenant ratios for its $9M loan (down $2M from Q4/08). Waivers have been requested. In December 2008 the Government of Newfoundland expropriated the Newfoundland assets of Abitibi which included a hydro facility owned by Exploits River Hydro Partnership (51% owned by FTS Properties). Exploit has a $61M loan secured by assets of Exploit and is **now classified as current. This loan is non-recourse to FTS.** We are watching to see what the Newfoundland Government pays for this asset or how it deals with Fortis. The government has stated it had no interest in damaging the interests of Abitibi's JV partners in Newfoundland assets. On April 23, 2009, Abitibi announced it was challenging the Newfoundland government's decision to expropriate Abitibi's resource rights and most of its assets within the province. Abitibi is seeking $300M in direct compensation.

Definition of Scotia Capital Equity Research Ratings & Risk Rankings

We have a three-tiered rating system, with ratings of 1-Sector Outperform, 2-Sector Perform, and 3-Sector Underperform. Each analyst assigns a rating that is relative to his or her coverage universe.

Our risk ranking system provides transparency as to the underlying financial and operational risk of each stock covered. Statistical and judgmental factors considered are: historical financial results, share price volatility, liquidity of the shares, credit ratings, analyst forecasts, consistency and predictability of earnings, EPS growth, dividends, cash flow from operations, and strength of balance sheet. The Director of Research and the Supervisory Analyst jointly make the final determination of all risk rankings.

Ratings

1-Sector Outperform
The stock is expected to outperform the average total return of the analyst's coverage universe by sector over the next 12 months.

2-Sector Perform
The stock is expected to perform approximately in line with the average total return of the analyst's coverage universe by sector over the next 12 months.

3-Sector Underperform
The stock is expected to underperform the average total return of the analyst's coverage universe by sector over the next 12 months.

Other Ratings
Tender – Investors are guided to tender to the terms of the takeover offer.

Under Review – The rating has been temporarily placed under review, until sufficient information has been received and assessed by the analyst.

Risk Rankings

Low
Low financial and operational risk, high predictability of financial results, low stock volatility.

Medium
Moderate financial and operational risk, moderate predictability of financial results, moderate stock volatility.

High
High financial and/or operational risk, low predictability of financial results, high stock volatility.

Caution Warranted
Exceptionally high financial and/or operational risk, exceptionally low predictability of financial results, exceptionally high stock volatility. For risk-tolerant investors only.

Venture
Risk and return consistent with Venture Capital. For risk-tolerant investors only.

Possible Waneta B.C. Dam Acquisition from Teck Resources (TCK/b)

Event

- TCK (BB+ credit) is now in the process of shopping its B.C. based 450-490MW Waneta Dam in an effort to raise funds through sales of non-core assets and equity interests in core assets (i.e. coal to China).

Implications

- TCK's CEO stated that he believes the company's Waneta Dam residual interest could fetch US$300M-$400M. This suggests a 5.4x-7.2x trailing P/EBITDA multiple using the current CDN/USD exchange rate.
- We believe FTS is a logical buyer as: (1) it operates the dam, (2) it is net short power for its regulated BC power customers, (3) it has made investments in the past in hydro dams and (4) it is part of the B.C. Canal Plant Agreement

Recommendation

- If approved by all parties, including the B.C. Government and B.C. Hydro, and assuming TCK's value estimate is reasonable, the asset would become part of FortisBC's rate base. We continue to prefer Fortis over other Canadian utilities due partly to its green asset mix.

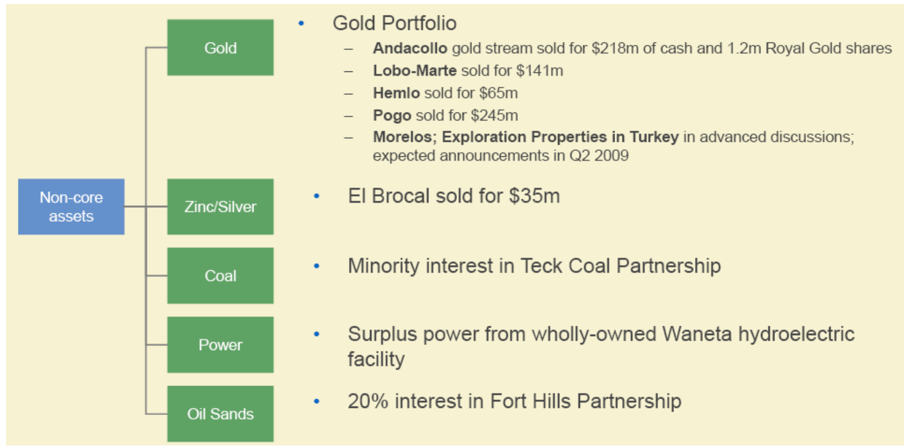
For important disclosure information see Appendix A of this report.

FTS As Potential Buyer of Dam

- **TCK's Waneta Dam is now up for sale** according to Exhibit 1, a slide taken from TCK's most recent investor presentation on May 13, 2009. Its 450 MW-490 MW Waneta dam is located in B.C. and operated by FTS. The dam was built in 1954 and is located 10 kilometres south of TCK's Trail Operations, near the U.S. border. TCK also owns a 15 km transmission line from Waneta to the U.S. power distribution system.
- **Canal Plant Agreement (CPA):** The Waneta dam is operated by FTS via a contractual arrangement (CPA) that lasts until 2035. FTS, B.C. Hydro, Crown owned Columbia Power, TCK and Brilliant Power Corp. are parties to the CPA. Its purpose is to allow for all of the water reservoirs and generating plants to produce more power together than they could if they were independent. The CPA provides TCK with 2,750 GWh per year **regardless of variable water flow available** for generation. TCK uses its share of the Waneta power (about 66%) for its integrated zinc and lead smelting and refining complexes at Trail, B.C. The 33% or so energy surplus is sold by TCK to third parties at market rates. **It is this third that is for sale** as TCK will likely take back a power purchase agreement to 2035 for its 66% first rights power share at cost. In 2008, the 33% or so power surplus sales increased TCK's EBITDA by $62M in 2008 vs. $60M in 2007 - see Exhibit 2 for a history of EBITDA from TCK's surplus energy sales from its Waneta Dam interest.
- **FTS' interest in TCK's Waneta Dam is logical.** FTS' familiarity with the Waneta Dam as its sole operator allows FTS to fast track due diligence. Given the exclusive club in the CPA arrangement, it would also appear logical that club members would first sort out any asset sale/transfer/purchase agreement changes internally.
- **FortisBC:** FTS' FortisBC regulated operations are **net short power** as only 15% of its rate base assets are currently generation assets. There is a logical case that FTS can make to the B.C. government and regulator for acquiring this residual asset as a regulated addition. We speculate that FTS would offer TCK conditional to receiving this support.
- **Valuation of TCK's Waneta Dam:**
  - **TCK's expectation:** At a recent TCK Investor Conference, TCK's CEO stated a US$300M-$400M value. This would imply a 5.4x-7.2x trailing P/EBITDA multiple using the current US/CDN exchange rate of C$1.115/USD. We note/caution that TCK's EBITDA from annual residual net power sales is **wildly volatile** and that current prices in the PacNW are depressed back to 2002 levels when TCK earned less than $10M EBITDA.
  - **$/MW B.C. hydro benchmark:** Using a C$4M per MW benchmark for British Columbia hydro asset replacement cost new implies the 450 MW-490 MW Waneta Dam could be worth C$1.8B-C$2B at 100% replacement cost, so a 33% value would be closer to C$600M (US$550M). If B.C. water storage potential is included, a benchmark new B.C. hydro generation price could reach up to $5M per MW. The devil gets into the details fast with power assets as any long-term contracts could be above/below market such as TCK's, priority of power allocation on a variable hydro dam complex going to TCK first. This reduces the potential fair value of the residual 33% of the dam's power to TCK's assumed value range of US$300-$400M.

Exhibit 1 – TCK Non-Core Asset Sales



Source: Company reports.

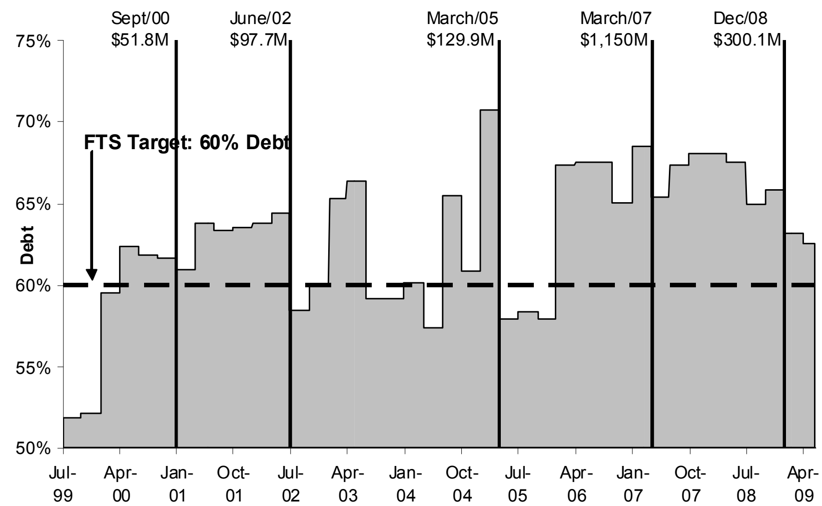
Exhibit 2 – Waneta Dam Surplus Energy Power EBITDA

	Cdn$M	Non-recurring events
2008	$ 62	
2007	$ 60	
2006	$ 25	Maintenance performed reduced the amount of power produced.
2005	$ 69	Strike at Trail Operations, increasing the power available to be sold to market.
2004	$ 37	
2003	$ 26	
2002	$ 6	

Source: Company reports.

- **Recent Canadian hydro generation market transaction comps.** In March 2009, AbitibiBowater announced the sale of its 60% interest in the Manicouagan River hydro facility to Hydro-Quebec for C$615M (**$3.06M per MW)**. Abitibi's December 2008 hydro asset sale was eventually blocked by the Ontario government. It valued Abitibi's ACH Limited Partnership hydro assets at **$3.95M per MW** based on a combined capacity of 136.8 MW for C$540M.
- **Other valuation considerations:** The contracts/agreements surrounding the method of sale of the 1/3 energy surplus will therefore impact its valuation. If the purchaser (such as FTS) is able to earn a fixed return on capital by its regulator (BCUC), this would allow for a higher purchase multiple whereas residual spot market sales only would have the greatest volatility and therefore the lowest purchase multiple, but potentially higher earnings. The BCUC might go for a fixed rate of return on FTS' purchase price if the overriding concern is to keep this surplus power in-province as: (1) B.C. is net short power today and (2) the just elected Liberals have committed in previous B.C. governments to get B.C. self sufficient in power by 2016. We would expect a rate of return agreement to be more in line with FTS' interests and its shareholders.

Exhibit 3 --FTS Capital Structure History



Source: Company reports.

- **FTS' capital structure implications:** As of March 31, 2009, FTS' capital structure was at 59.1% debt, 7.2% preferred equity and 33.7% common equity. This is **currently in line** with FTS' target of 60% debt post its $300M Q4/08 equity issue. See Exhibit 3 for FTS' capital structure and equity issue history. At the end of Q1/09, FTS also had $1.6B in undrawn credit facilities. Yesterday, FortisBC issued $105M in 30-year debt with only a +200 bp spread that was heavily sold out. **We believe FTS would need about C$150M of equity or so again if FTS buys the residual 33% power interest in TCK's Waneta Dam to stay below 60% debt.** Currently we have no material reason to argue for/against TCK's suggested US$300M-$400M sales price.

Definition of Scotia Capital Equity Research Ratings & Risk Rankings

We have a three-tiered rating system, with ratings of 1-Sector Outperform, 2-Sector Perform, and 3-Sector Underperform. Each analyst assigns a rating that is relative to his or her coverage universe.

Our risk ranking system provides transparency as to the underlying financial and operational risk of each stock covered. Statistical and judgmental factors considered are: historical financial results, share price volatility, liquidity of the shares, credit ratings, analyst forecasts, consistency and predictability of earnings, EPS growth, dividends, cash flow from operations, and strength of balance sheet. The Director of Research and the Supervisory Analyst jointly make the final determination of all risk rankings.

Ratings

1-Sector Outperform
The stock is expected to outperform the average total return of the analyst's coverage universe by sector over the next 12 months.

2-Sector Perform
The stock is expected to perform approximately in line with the average total return of the analyst's coverage universe by sector over the next 12 months.

3-Sector Underperform
The stock is expected to underperform the average total return of the analyst's coverage universe by sector over the next 12 months.

Other Ratings
Tender – Investors are guided to tender to the terms of the takeover offer.

Under Review – The rating has been temporarily placed under review, until sufficient information has been received and assessed by the analyst.

Risk Rankings

Low
Low financial and operational risk, high predictability of financial results, low stock volatility.

Medium
Moderate financial and operational risk, moderate predictability of financial results, moderate stock volatility.

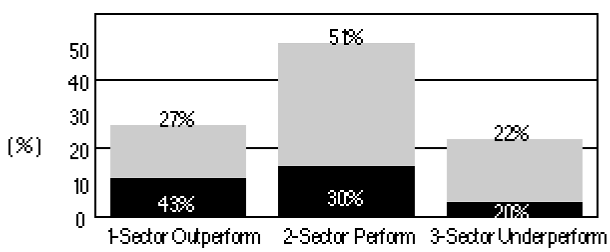
High
High financial and/or operational risk, low predictability of financial results, high stock volatility.

Caution Warranted
Exceptionally high financial and/or operational risk, exceptionally low predictability of financial results, exceptionally high stock volatility. For risk-tolerant investors only.

Venture
Risk and return consistent with Venture Capital. For risk-tolerant investors only.

Scotia Capital Equity Research Ratings Distribution*

Distribution by Ratings and Equity and Equity-Related Financings*



- Percentage of companies covered by Scotia Capital Equity Research within each rating category.
- Percentage of companies within each rating category for which Scotia Capital has undertaken an underwriting liability or has provided advice for a fee within the last 12 months.

* As at April 30, 2009.

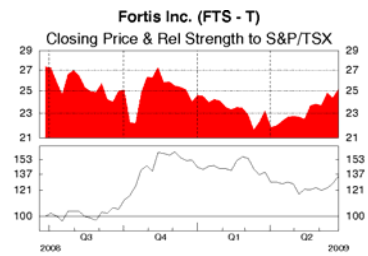
$68M Distribution Asset Acquisition



Source: Global Insight, Inc.

Event

- Fortis agreed to purchase Great Lakes Power Distribution Inc. (GLPD) from Brookfield Renewable Power for $68M, subject to approvals. The Ontario Energy Board (OEB) will assess the need to change the cost of capital formula in Sep/09 for 2010 but rejected 2009 changes.

Implications

- GLPD's assets include over 1,800 km of distribution lines in the district of Algoma, Ontario. Starting in 2010, we added $0.01/share rounded upwards for this small acquisition.
- Last week, the OEB postponed the decision to change the cost of capital calculation. The Board left the formula for 2009 rates unchanged but will consider adjusting the 2010 calculation at a stakeholder meeting to be held Sep. 21-25, 2009. If 2009 was not considered sufficient to warrant a change in methodology, we do not see how 2010 will.
- FTS also had a debenture offering; terms were not disclosed.

Recommendation

- The acquisition is immaterial to FTS, at only 0.5% of its $12B asset book value. A possible OEB switch to a WACC return approach for 2010 could be a mild catalyst for FTS. Due to FTS' strong relative performance we have moved both ACO and TA above FTS in our relative rankings of Energy Utilities/IPPs.

Q2/09 Adjusted EPS in Line With Street

Event

- Fortis reported Q2/09 EPS of $0.31 or $0.27 adjusted, in line with the Street's $0.27 average in a $0.21 (Scotia) to $0.29 range. We had used a 20% tax rate versus 10% actual and did not adjust for foreign exchange.

Implications

- Fortis Properties earnings improve $1M to $8M from $7M YOY. We had assumed lower YOY given the economic downturn. We did not adjust for the lower C$ in the quarter in our $0.21 Q2/09 EPS estimate and assumed a 20% tax rate for 2009 versus 10% actual in Q2/09.
- We chose to maintain our 17x P/E multiple for FTS on 2010E EPS giving us a $27 one-year target price, unchanged. Given the relative strength in FTS' stock price since late March 2009 against all others except for Enbridge that beat consensus EPS, we cut FTS' rating to 3-SU.

Recommendation

- After upgrading CU last week from 3-SU to 2-SP on material stock price underperformance we are obliged to downgrade another energy utility, being Underweight in that subsector. FTS's stock rose 16% while CU fell 4% since late March 2009 (peer average was 9%).

Qtly EPS (Basic)	Q1	Q2	Q3	Q4	Year	P/E

Q2/09 EPS Highlights

- **Q2/09 adjusted in line with street average:** Fortis reported Q2/09 EPS of $0.31 or $0.27 adjusted, in line with the Street average rounded $0.27 estimate in a $0.21-$0.29 range. See Exhibit 3 for a breakdown of EPS by segment and Exhibit 4 for each segment's allowed ROE. In our $0.21 estimate we did not assume any US$ related foreign exchange gains (C$ at $1.17 versus $1.01 YOY). We also did not know FTS's 10% overall Q2/09 tax rate due to a credit in FortisAlberta taxes payable versus our 20% assumed for Q2/09 and for the years (see Exhibit 1). We also assumed lower FortisProperties earnings that rose to $8M from $7M YOY. Details on FTS' foreign exchange and the FortisAlberta tax impacts:

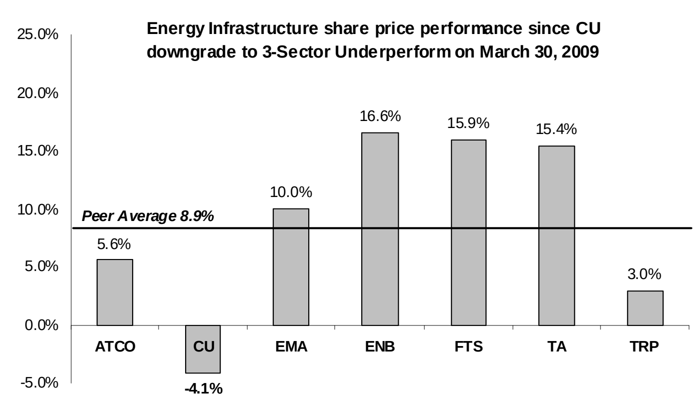
Exhibit 1 – Q2/09 EPS Recurring Breakdown

Reported EPS	**$ 0.31**
Net positive FX effect	$ (0.015)
Fortis AB flow through tax regulation	$ (0.020)
Change in quarterly allocation of amortization expense	$ (0.005)
Adjusted EPS	**$ 0.27**
Bloomberg Consensus EPS	**$ 0.27**
Adjusted EPS (from above)	$ 0.27
Tax provision difference from Scotia forecast (20%) to FTS actual (10%)	$ (0.020)
	$ 0.25
Scotia Capital EPS Estimate	**$ 0.21**

Source: Bloomberg; Scotia Capital estimates.

  - **Foreign exchange impacts:** FTS is materially but not 100% hedged in U.S. dollar debt at its corporate level. U.S. dollar interest paid on a stronger U.S. dollar increases Canadian interest expenses, partially offsetting higher U.S. dollar translated earnings. Net U.S. asset exposure of US$407 million as at June 30, 2009 was greater than U.S. debt at the corporate level by $130 million. The net YOY positive foreign exchange effect in Q2/09 was about $0.015 per share. We recently raised our Canadian dollar assumption to $0.90 (currently $0.93) so this minor foreign exchange gain is narrowing going forward. FTS is looking at doing its next corporate debt deal in U.S. dollar some time in late 2010 as other Canadian dollar corporate debt matures to tighten its foreign exchange hedge.
  - **FortisAlberta flow through tax regulation impacts:** According to FTS management that have now planned out through 2010 and 2011, FortisAlberta will typically have a zero (but not negative) tax rate going forward quarterly. FortisAlberta charges and collects tolls based on flow through tax regulation. FTS is upgrading and expanding FortisAlberta with a $300 million per year budget for 2010 and 2011 capital expenditures. This creates a new tax shield that will keep FortisAlberta's effective rate at zero. The fact that FTS reported a negative $3M tax had a $0.02 non-recurring positive impact to EPS in Q2/09 due mostly to a capitalized overhead provision no longer required.

Exhibit 2 – Energy Infrastructure Price Performance from March 30, 2009



Source: Bloomberg; Scotia Capital estimates.

- **Stock & sector valuation:** We left our 17x P/E multiple on FTS unchanged. This matches TransCanada's P/E multiple and is the highest P/E amongst energy utilities and IPPs that we follow. 2009 reported EPS should now be a little closer (after Q2/09 EPS) to 2008's $1.56 but still likely below. FTS' late Q4/08 $300M equity issue was used to strengthen FTS' balance sheet at the expense of short-term EPS. We still set our energy utility 2010E P/E multiples assuming 4.25% 10-year Canada rates (Scotia Economics now estimates 4.65% one year out vs. 3.55% today) and more normal corporate debt risk premiums (currently 50 basis points over normal levels for BBB+/A- rated equities). Rising interest rates (negative) have been offset by narrowing corporate spreads (positive) lately. FTS' exposure to its benign, green asset base over utilities with coal-fired assets is worth about 2x P/E points, in our opinion. As we raised our rating on CU last week to 2-Sector Perform from 3-Sector Underperform after CU fell 4% since March 30, 2009 compared to our Energy Infrastructure peer average rising 9% and Fortis rising 16%, we chose to cut Fortis to a 3-Sector Underperform based solely on relative valuation and targets.

- **Possible regulated allowed returns changing?** Late March 2009, the NEB agreed to allow Trans Quebec & Maritimes Pipeline Inc. (TQM, owned 50% by TRP and 50% by Gaz Metro) the right to include after-tax weighted average cost of capital (ATWACC) in its revenue requirement for 2007 and 2008. This translated into a 100 bp increase in TQM's allowed ROE. FTS' Terasen Gas and Terasen Gas Vancouver Island are also applying for a review of their current ROE formula and deemed equity through their application for 2010. FortisAlberta is also pursuing a review of its 2009 allowed ROE/capital structure. While we believe an ATWACC based formula is more realistic than historical book value ROE methods based on forecasted 10-year risk free government bonds, it has worked for 50 years. Regulators like Ontario's OEB **have already backed off adjusting anything for 2009** while stating they prefer the existing return method even though they will be reviewing other thoughts/methodologies.

Exhibit 3 – Fortis' EPS Contribution by Segment

FORTIS INC.

Segment	Business	EPS Contribution Q2/09	(%)	EPS Contribution Q2/08	(%)
Regulated Gas	Terasen Gas	$ 0.08	26%	$ 0.08	41%
Regulated Electric	FortisAlberta	$ 0.10	32%	$ 0.04	24%
	FortisBC	$ 0.04	13%	$ 0.04	24%
	Newfoundland Power	$ 0.06	21%	$ 0.06	34%
	Other Canadian *	$ 0.02	8%	$ 0.01	7%
	Caribbean **	$ 0.04	13%	$ (0.03)	-17%
Non-Regulated Operations	Fortis Hydroelectric Generation	$ 0.02	6%	$ 0.04	24%
	Fortis Properties	$ 0.05	15%	$ 0.04	24%
	Fortis Corporate	$ (0.11)	-34%	$ (0.11)	-62%
	EPS	$0.31		$0.18	
	Shares Outstanding (MM)	170.3		157.1	

Source: Company reports; Scotia Capital estimates.

- **Q2/09 Terasen Gas:** Reported $14 million in earnings for Q2/09 versus $12 million in Q2/08 was mildly positive as gas volumes **fell 20% YOY**. Residential volumes were down on warmer-than-normal weather and to a lesser extent the impact of a slower economy on fixed price customers and transportation volumes to customers sourcing their own gas. Net customer losses were 1,200 for Q2/09 (932,500 customers). Terasen Gas is comprised of TGI (i.e., Vancouver), TGVI (i.e., Vancouver Island), and TGWI (i.e., Whistler area). TGI's allowed 2009 ROE is 8.47% on a deemed equity of 35%, while TGVI's allowed 2009 ROE is 9.17% on deemed equity of 40%.
- **Terasen Gas Vancouver Island (TGVI)** got approval on April 1, 2008 for the construction and operation of a 1.5 Bcf/d LNG natural gas storage facility on Vancouver Island. FTS estimated a capital cost of $175 million to $200 million, with an in-service date of 2011.
- **Q2/09 FortisAlberta:** Reported earnings increased a surprising (to us) $10M YOY to $17M **primarily due to the impact of negative corporate tax rates** ($7M swing), higher customer distribution rates, and customer growth. **Energy deliveries rose a miniscule 3 GWh YOY or 0.1% YOY**. In Q3/08 a change was made to the tax strategy with regard to the AESO charges deferral account. Previously, FortisAlberta was not deducting transmission tariff payments made to the AESO which resulted in a future income tax expense recorded in 1H/08. The collection of the balance of the 2007 AESO charges deferral account also

resulted in an income tax recovery in 2009. In June 2008, the AUC determined that a review of the ROE level and adjustment mechanism was warranted and in July 2008 issued its notice of application for the 2009 Generic Cost of Capital Proceeding (GCCP). Interim customer rates for 2009 have been set using the 2007 ROE of 8.51%, pending the outcome of the GCCP already underway.

- **Q2/09 FortisBC:** Reported Q2/09 net earnings of $7 million, **flat YOY** with a negligible increase in electricity sales. An electricity rate increase of 4.6% was offset by increased energy supply costs. Allowed ROE in 2009 is 8.87% (2008 was 9.02%).
- **Q2/09 Newfoundland Power:** Earnings were **up $1 million** YOY at $11 million while electricity sales **fell 0.5% YOY** to 1,177 GWh in Q2/09. Amortization is now being allocated each quarter based on capitalized assets in service. Previous allocations were based on quarterly sales margin. Winter months have a higher expense per kWh and lower in the summer under the new regulated rate structure. The PUB gave this FTS subsidiary a 2009 allowed ROE of 8.95% (unchanged from 2008).
- **Q2/09 other canadian electric utilities**: Following the acquisition of Terasen, Fortis put Maritime Electric and FortisOntario into an "other" category. Excluding the $2 million one-time after-tax charge for an interconnection agreement-related refund in Q2/08, **earnings were flat year over year at $4 million**. FortisOntario entered into a $68 million purchase agreement in June 2009 for Great Lakes Power Distribution, which serves 12,000 customers. Maritime Electric's 2009 ROE **declined slightly** to 9.75% (on deemed equity of 40%) from 10.0%. FortisOntario's 2009 ROE **decreased materially** to 8.39% from 9.00% in 2008.

Exhibit 4 – Nature of FTS' Regulation

Nature of Regulation

Regulated Utility	Allowed Common Equity (%)	Allowed Returns (%) 2006	2007	2008	2009
		ROE

Fortis Turks and Caicos	N/A	17.5	17.5	17.5	17.5

(1) Application pending regulatory approval

Source: Company reports.

- **Q2/09 Regulated Utilities - Caribbean:** FTS owns 59.5% of Caribbean Utilities, 70% of Belize Electricity and 100% of Fortis Turks and Caicos in this group. Excluding the $13 million impact of disallowed fuel and purchased power costs in Q2/08 and favourable exchange gains of $1 million, **earnings decreased by $2 million.** Earnings in Q2/09 were lower due to: (1) lower allowed ROA at Belize Electricity, (2) higher amortization costs, and (3) favourable impact of the movement of deferred fuel costs in Q2/08. Electricity sales **increased 6% YOY** to 293 GWh. The new T&D license for Caribbean Utilities sets 2009 customer rates using a 10% rate of return on rate base assets versus 15% allowed previously. In July, 2009 FTS spent US$6.1 million to increase its ownership in Caribbean Utilities by 2.7% to 59.5%.
- **Belize Electricity ("BEL") 2008/2009 rate application:** On June 30, 2008, Fortis rejected a tough proposal by the new Belize government that would have cut 70.1%-owned BEL's regulated return to 8.5% from 12%. BEL got 10% but the Government rejected $12.6M of retroactive costs buying necessary diesel based power from Mexico net to FTS. In Q2/08, FTS recorded a $13 million charge or $0.08/share as a result of this ruling. On July 25, 2008, BEL appealed this decision to the Supreme Court of Belize. Their ruling is expected in 2009.
- **Q2/09 Fortis Non-Regulated Generation:** Year-over-year earnings were **down $4 million** at $3 million. Materially lower energy sales (141 GWh in Q2/09 vs. 312 GWh in Q2/08) were a result of the expected expiry of FTS' power-for-water exchange agreement with OPG for the Rankine Niagara Falls generating facility that controlled 5% of the Niagara Falls water flow. The Rankine earnings contribution was $0.2 million in Q2/09 compared with $3.6 million in Q2/08 **a difference of $0.02 per share per quarter**. FTS expects its new US$53M 19 MW Vaca hydroelectric generating facility in Belize **could offset this earnings loss but only starting in 2010.** Lower electricity prices in Ontario ($22.88/MWh in Q2/09

compared to $47.55/MWh in Q2/08) and New York State weighed on generating results, offsetting a favourable $1 million foreign exchange gain.

- **Q2/09 Fortis properties:** Earnings **increased** by $1 million year over year as a higher contribution from Real Estate and lower operating costs more than offset weaker hospitality results due to lower hotel occupancy. Revenue per available room slipped to $83.15 in Q2/09, down from $87.54 in Q2/08 due to lower occupancy, particularly in Western Canada.
- **Corporate and Other:** Overall net corporate and other expenses were **flat YOY** at $18 million. Finance charges were $2 million lower year over year due to lower debt levels and interest rates. There was an unfavourable foreign exchange impact associated with the translation of U.S. dollar-denominated interest expense at the corporate level that mostly offset C$ translation gains from U.S. asset-based earnings contributions.
- **Capital expenditures:** Utility capital expenditures are now expected to **exceed $1B** in 2009 ($904M in 2008) with most growth driven by B.C. and Alberta. Over the next five years, FTS expects capital expenditures **to total $5.0B**. Major projects include:
    - **$200M** liquefied natural gas facility on Vancouver Island.
    - **US$53M** Vaca 19 MW hydroelectric facility in Belize.
    - **$161M** installation of automated meters at FortisAlberta.
    - **$139M** Okanagan Transmission Reinforcement Project at FortisBC.
- **Financial:** FTS' capital structure now stands at 58.9% debt, 7.2% preferred equity, and 33.9% common equity, **in line with FTS' targets**. FTS has $2.2B in credit facilities available (maturities do not start until 2011) with **$1.6B undrawn**. In December 2008 the Government of Newfoundland expropriated the Newfoundland assets of Abitibi, which included a hydro facility owned by Exploits River Hydro Partnership (51% owned by FTS Properties). Exploit has a $61M loan secured by assets of Exploit and is **now classified as current. This loan is non-recourse to FTS.** We are watching to see what the Newfoundland Government pays for this asset or how it deals with Fortis. The government has stated it had no interest in damaging the interests of Abitibi's JV partners in Newfoundland assets. On April 23, 2009, Abitibi announced it was challenging the Newfoundland government's decision to expropriate Abitibi's resource rights and most of its assets within the province. Abitibi is seeking $300M in direct compensation.

Definition of Scotia Capital Equity Research Ratings & Risk Rankings

We have a three-tiered rating system, with ratings of 1-Sector Outperform, 2-Sector Perform, and 3-Sector Underperform. Each analyst assigns a rating that is relative to his or her coverage universe.

Our risk ranking system provides transparency as to the underlying financial and operational risk of each stock covered. Statistical and judgmental factors considered are: historical financial results, share price volatility, liquidity of the shares, credit ratings, analyst forecasts, consistency and predictability of earnings, EPS growth, dividends, cash flow from operations, and strength of balance sheet. The Director of Research and the Supervisory Analyst jointly make the final determination of all risk rankings.

Ratings

1-Sector Outperform
The stock is expected to outperform the average total return of the analyst's coverage universe by sector over the next 12 months.

2-Sector Perform
The stock is expected to perform approximately in line with the average total return of the analyst's coverage universe by sector over the next 12 months.

3-Sector Underperform
The stock is expected to underperform the average total return of the analyst's coverage universe by sector over the next 12 months.

Other Ratings
Tender – Investors are guided to tender to the terms of the takeover offer.

Under Review – The rating has been temporarily placed under review, until sufficient information has been received and assessed by the analyst.

Risk Rankings

Low
Low financial and operational risk, high predictability of financial results, low stock volatility.

Medium
Moderate financial and operational risk, moderate predictability of financial results, moderate stock volatility.

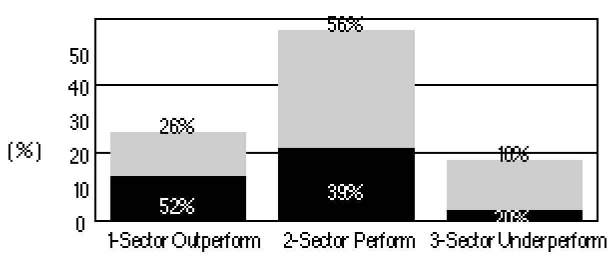
High
High financial and/or operational risk, low predictability of financial results, high stock volatility.

Caution Warranted
Exceptionally high financial and/or operational risk, exceptionally low predictability of financial results, exceptionally high stock volatility. For risk-tolerant investors only.

Venture
Risk and return consistent with Venture Capital. For risk-tolerant investors only.

Scotia Capital Equity Research Ratings Distribution*

Distribution by Ratings and Equity and Equity-Related Financings*



- Percentage of companies covered by Scotia Capital Equity Research within each rating category.
- Percentage of companies within each rating category for which Scotia Capital has undertaken an underwriting liability or has provided advice for a fee within the last 12 months.

* As at July 31, 2009.

Source: Scotia Capital.

For the purposes of the ratings distribution disclosure the NASD requires members who use a ratings system with terms different than "buy," "hold/neutral" and "sell," to equate their own ratings into these categories. Our 1-Sector Outperform, 2-Sector Perform, and 3-Sector Underperform ratings are based on the criteria above, but for this purpose could be equated to buy, neutral and sell ratings, respectively.

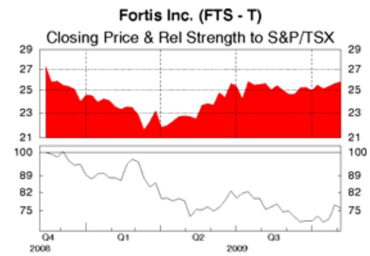
Q3/09 Adjusted EPS Matches Us, Mildly Misses Street



Source: Global Insight, Inc.

Event

- Fortis reported Q3/09 EPS of $0.21 or $0.19 ex. a one-time tax benefit and favourable non-cash FX balance sheet related translation. This was matched our estimate at $0.19 but mildly missed the Street at $0.21 ($0.19-$0.24).

Implications

- Earnings were relatively flat YOY across all segments except non-regulated generation, which fell $5M YOY to $4M due to: (1) the Rankine Niagara OPG agreement expiring Apr/09, and (2) lower power prices. Lower room rates/occupancies at FTS' Properties division were offset by newly acquired properties. We expect lower YOY room rates/occupancies and weak power prices in Q4/09, so we shaved $0.02/share from Q4/09E EPS.
- FTS' five-year, $5B capital program should allow its rate base to grow on average 6%-7%/year. After flat 2009E EPS due to FTS' equity issue (8% dilution), FTS' EPS growth should pick up again starting in 2010.
- Given the in line quarter (to our estimate), we kept our 2010E/11E EPS, 16x 2010E/11E averaged EPS P/E multiple and $26.50 one-year target.

Recommendation

- We continue to prefer higher growth Pipelines (ENB EPS expected to grow 10%/year through 2014-2015) over Energy Utilities and IPPs.

Qtly Adj EPS (Basic)	Q1	Q2	Q3	Q4	Year	P/E
2008A	$0.58 A	$0.19 A	$0.31 A	$0.48 A	$1.56	15.76
2009E	$0.54 A	$0.31 A	$0.21 A	$0.48	$1.54	16.76

Q3/09 EPS / EPS Forecasts / Stock & Sector Valuation

- **Fortis reported Q3/09 EPS** of $0.21 or $0.19 ex. a one-time tax benefit and favourable non-cash FX balance sheet related translation (Exhibit 1) that we did not adjust for. This matched our estimate at $0.19 but mildly missed the Street at $0.21 ($0.19-$0.24). Earnings were relatively flat YOY across all segments except non-regulated generation which fell $5M YOY to $4M due the Rankine Niagara agreement with OPG expiring Apr/09. Lower occupancies and room rates at FTS' Properties division were offset by new properties acquired that did not contribute in Q3/08. We expect the lower YOY room rates/occupancies and weak power prices to persist in Q4/09 as North American unemployment continues to rise and Caribbean tourism remains depressed, so we shaved $0.02/share from our Q4/09E EPS. See Exhibit 2 for Fortis' EPS contribution by segment.

Exhibit 1 – Q3/09 EPS Recurring Breakdown

Reported EPS	$	**0.21**
Net positive FX effect	$	(0.01)
Tax adjustment at Terasen	$	(0.01)
Adjusted EPS	$	**0.19**
Bloomberg Consensus EPS	$	**0.21**
Scotia Capital EPS Estimate	$	**0.19**

Source: Bloomberg; Scotia Capital estimates.

- **Stock & sector valuation:** We left our 16x P/E multiple on FTS unchanged. This is the highest P/E amongst energy utilities and IPPs that we follow as FTS has no coal-fired asset exposure. We continue to prefer higher growth Pipelines (ENB EPS expected to grow 10%/year through 2014-2015) over Energy Utilities and IPPs. FTS' five-year, $5B capital program ($1B+ expected this year) should allow its rate base to grow on average 6%-7%/year. Therefore, after flat 2009E EPS due to FTS' equity issue (8% stock dilution), FTS' 2010E/2011E EPS growth should pick up again. We set our energy utility 2010E/2011E P/E multiples assuming 4.6% 10-year Canada rates (Scotia Economics now estimates 4.7% one year out vs. 3.5% today) and more normal corporate debt risk premiums (currently 130 basis points over normal levels for A- rated pipeline/utility equities). Forecasted rising interest rates (negative) have been offset by narrowing corporate spreads (positive) lately.
- **Possible regulated allowed returns changing?** Late March 2009, the NEB agreed to allow Trans Quebec & Maritimes Pipeline Inc. (TQM, owned 50% by TRP and 50% by Gaz Metro) an after-tax weighted average cost of capital (ATWACC) in its revenue requirement for 2007 and 2008. This translated into a 100 bp increase in TQM's allowed ROE. FTS' Terasen Gas and Terasen Gas Vancouver Island are also applying for a review of their current ROE formula and deemed equity through their application for 2010. FortisAlberta is also pursuing a review of its 2009 allowed ROE/capital structure. While we believe an ATWACC based formula is more realistic than historical book value ROE methods based on forecasted 10-year risk free government bonds, it has worked for 50 years. Regulators like Ontario's OEB backed off adjusting anything for 2009 while stating they prefer the existing return method even though they will be reviewing other thoughts/methodologies. On October 8, 2009, the NEB revoked its allowed ROE formula first set in 1994 but has not yet set a new formula (and may not set a new formula if pipeline customers agree to negotiated settlements). The AUC Generic Cost of Capital decision is expected on November 10, 2009 and the OEB is expected to decide in December 2009. Canadian provincial utilities boards still use the spread over long-term Canada risk free bonds for determining ROEs, including this year. **Should they adopt the NEB's possible ATWACC approach in 2011/2012, we may nudge up our FTS, CU, EMA, and ATCO EPS.** See our October 13, 2009 comment for more details on the topic.

Segmented Q3/09 Results

- **Q3/09 Terasen Gas:** Reported a loss of $3 million in Q3/09 versus earnings of $1 million in Q3/08 as gas volumes fell 27% YOY due to lower weather-related gas consumption and a weak economy. Residential volumes were down on warmer-than-normal weather and to a lesser extent the impact of a slower economy. Net customer losses (a first for us) were 300 for Q3/09 (932,200 customers). Terasen Gas is comprised of TGI (i.e., Vancouver), TGVI (i.e., Vancouver Island), and TGWI (i.e., Whistler area). TGI's allowed 2009 ROE is 8.47% on a deemed equity of 35%, while TGVI's allowed 2009 ROE is 9.17% on a deemed equity of 40% (Exhibit 3).

Source: Company reports; Scotia Capital estimates.

- **Terasen Gas Vancouver Island (TGVI)** got approval on April 1, 2008 for the construction and operation of a 1.5 Bcf/d LNG natural gas storage facility on Vancouver Island. FTS estimated a capital cost of $175 million to $200 million, with an in-service date of 2011.
- **Q3/09 FortisAlberta:** Reported earnings decreased $1M YOY to $16M primarily due to lower corporate income tax recoveries and higher operating expenses, partially offset by overall load and customer growth. **Energy deliveries rose 71 GWh YOY or 1.9% YOY**, due to an increase in residential, commercial, farm, and irrigation customers. Rates for 2009 reflect an interim allowed ROE of 8.51% compared to an allowed ROE of 8.75% for 2008.
- **Q3/09 FortisBC:** Reported Q3/09 net earnings of $8 million, **flat YOY** with a 3.3% increase in electricity sales due to growth in residential and general service customers. An electricity rate increase of 4.6% (effective January 1, 2009) and a further 2.2% increase in customer electricity rates (effective September 1, 2009) increased revenue $5M YOY. Allowed ROE in 2009 is 8.87% (2008 was 9.02%).
- **Q3/09 Newfoundland Power:** Earnings were **down $1 million** at $7 million YOY as electricity sales **fell 1.3% YOY** to 885 GWh in Q3/09. Amortization is now being allocated each quarter based on capitalized assets in service. Previous allocations were based on quarterly sales margin. The PUB gave this FTS subsidiary a 2009 allowed ROE of 8.95% (unchanged from 2008).
- **Q3/09 Other Canadian Electric Utilities**: Following the acquisition of Terasen, Fortis put Maritime Electric and FortisOntario into an "other" category. **Earnings were flat year over year at $5 million** with electricity sales **down 3.4%** to 514 GWh in Q3/09. In October 2009, FortisOntario completed the $75M acquisition of Great Lakes Power Distribution (subsequently

Exhibit 3 – Nature of FTS' Regulation

Nature of Regulation

Fortis Turks and Caicos	N/A	17.5	17.5	17.5	17.5

Source: Company reports.

renamed Algoma Power Inc.) which serves 12,000 customers in northern Ontario. Maritime Electric's 2009 ROE **declined slightly** to 9.75% (on deemed equity of 40%) from 10.0%. FortisOntario's 2009 ROE **decreased materially** to 8.01% from 9.00% in 2008.

- **Q3/09 Regulated Utilities - Caribbean:** In July, 2009 FTS spent US$6.1 million to increase its ownership in Caribbean Utilities by 2.7% to now own 59.5%. FTS also owns 70% of Belize Electricity and 100% of Fortis Turks and Caicos in this group. Excluding $1 million foreign currency translation gains in Q3/08, **earnings decreased by $1 million**, to $6 million**.** Earnings in Q3/09 were lower due to higher operating and amortization costs. Electricity sales **increased 2.6% YOY** to 312 GWh due to higher-than-normal temperatures on Grand Cayman in Q3/09 and loss of sales during Q3/08 from Hurricane Ike. The new T&D license for Caribbean Utilities sets 2009 customer rates using a 10% rate of return on rate base assets versus 15% allowed previously. Caribbean Utilities' CEO stated that he expects weak or no growth in sales through 2009 and into 2010. This led to CUC scratching its 32 MW capacity expansion solicitation.
- **Belize Electricity ("BEL") 2008/2009 rate application:** On June 30, 2008, Fortis rejected a tough proposal by the new Belize government that would have cut 70.1%-owned BEL's regulated return to 8.5% from 12%. BEL got 10% but the Government rejected $12.6M of retroactive costs buying necessary diesel-based power from Mexico net to FTS shareholders. On July 25, 2008, BEL appealed this decision to the Supreme Court of Belize. The hearing began in early October 2009, but the Belize trial judge postponed the case for a date still to be determined.
- **Q3/09 Fortis Non-Regulated Generation:** Year-over-year earnings were **down $5 million YOY** to $4 million in Q3/09 due to a loss of earnings from the expiration of FTS/OPG's power-for-water exchange agreement at Rankine, lower energy prices in Upper New York State, and decreased production in Belize. Materially lower energy sales (91 GWh in Q3/09 vs. 305 GWh in Q3/08) were the result. FTS expects its new US$53M 19 MW Vaca hydroelectric generating facility in Belize **could offset this earnings loss but only starting in 2010.** Much lower average wholesale market energy prices in Upper State New York (US$31.37/MWh in Q3/09 compared to US$77.82/MWh in Q3/08) and decreased production cut revenues by $12M YOY to $9M.
- **Q3/09 Fortis Properties:** Earnings were **flat** YOY at $9 million as a higher contribution from Real Estate offset lower hotel occupancy. Revenue per available room slipped to $89.02 in Q3/09, down from $93.64 in Q3/08 due to lower occupancy, particularly in Ontario and western Canada.
- **Corporate and other:** Overall net corporate and other expenses were **up $2 million YOY** to $17 million due to higher financing charges. Revenues were flat YOY at $7 million driven by higher inter-company interest income as a result of increased inter-company lending.
- **Capital expenditures:** Utility capital expenditures are now expected to **exceed $1B** in 2009 ($904M in 2008) with most growth driven by B.C. and Alberta utlities. Fortis continues to pursue acquisitions for profitable growth, focusing on regulated natural gas and electric utilities in the U.S. and Canada. Over the next five years, FTS expects capital expenditures **to total $5.0B, unchanged**. Major projects include:
  - **$200M** liquefied natural gas facility on Vancouver Island.
  - **US$53M** Vaca 19 MW hydroelectric facility in Belize.
  - **$161M** installation of automated meters at FortisAlberta.
  - **$139M** Okanagan Transmission Reinforcement Project at FortisBC.
- **Financial:** FTS' capital structure now stands at 59.8% debt, 7.1% preferred equity and 33.1% common equity, **in line with FTS' targets**. However, FTS is more levered than TRP (50% debt, 3% preferred equity, 3% junior sub notes and 44% common equity). FTS has $2.15B in credit facilities available (maturities do not start until 2011) with **$1.56B undrawn**. S&P confirmed FTS with an A- credit rating with a stable outlook in September 2009 citing the broad diversification of FTS' asset base. FTS stated it focuses on EPS as its final measure of performance (as do we).

Definition of Scotia Capital Equity Research Ratings & Risk Rankings

We have a three-tiered rating system, with ratings of 1-Sector Outperform, 2-Sector Perform, and 3-Sector Underperform. Each analyst assigns a rating that is relative to his or her coverage universe.

Our risk ranking system provides transparency as to the underlying financial and operational risk of each stock covered. Statistical and judgmental factors considered are: historical financial results, share price volatility, liquidity of the shares, credit ratings, analyst forecasts, consistency and predictability of earnings, EPS growth, dividends, cash flow from operations, and strength of balance sheet. The Director of Research and the Supervisory Analyst jointly make the final determination of all risk rankings.

Ratings

1-Sector Outperform
The stock is expected to outperform the average total return of the analyst's coverage universe by sector over the next 12 months.

2-Sector Perform
The stock is expected to perform approximately in line with the average total return of the analyst's coverage universe by sector over the next 12 months.

3-Sector Underperform
The stock is expected to underperform the average total return of the analyst's coverage universe by sector over the next 12 months.

Other Ratings
Tender – Investors are guided to tender to the terms of the takeover offer.

Under Review – The rating has been temporarily placed under review, until sufficient information has been received and assessed by the analyst.

Risk Rankings

Low
Low financial and operational risk, high predictability of financial results, low stock volatility.

Medium
Moderate financial and operational risk, moderate predictability of financial results, moderate stock volatility.

High
High financial and/or operational risk, low predictability of financial results, high stock volatility.

Caution Warranted
Exceptionally high financial and/or operational risk, exceptionally low predictability of financial results, exceptionally high stock volatility. For risk-tolerant investors only.

Venture
Risk and return consistent with Venture Capital. For risk-tolerant investors only.

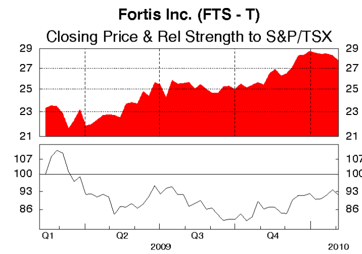
Q4/09 EPS a Mild Miss



Source: Global Insight, Inc.

Event

- Fortis reported Q4/09 EPS of $0.48 post three one-time items, ex the announced multiple ROE/equity base adjustments totalling $0.06. The $0.48 missed us and the Street at $0.52 and $0.50 ($0.46-$0.55 range).

Implications

- The $0.04 miss vs. our estimate was due partly to the new third Belize hydro facility coming on stream now instead of in Q4/09. We had expected $0.02 in Q4/09 from this facility. Other segment earnings were relatively in line with our expectations.
- FTS' unchanged five-year $5B capital program should allow its rate base to grow an average 6%-7%/year. After flat 2009 EPS due to FTS' equity issue (8% dilution), FTS' EPS growth should pick up again starting in 2010.
- There was no change to our 2010E/2011E outlook, so we kept our 2010E/11E EPS, 16.5x 2011E EPS P/E multiple, and $30 one-year target unchanged.

Recommendation

- We upgraded FTS on Feb. 3 to 2-Sector Perform with an unchanged $30 one-year target due to a lower expected return on Capital Power (downgraded on Feb. 3 to 3-Sector Underperform on weaker power prices).

Qtly Adj EPS (Basic)	Q1	Q2	Q3	Q4	Year	P/E
2008A	$0.58 A	$0.19 A	$0.31 A	$0.48 A	$1.56	15.76

Q4/09 EPS / EPS Forecasts / Stock & Sector Valuation

- **Q4/09 EPS a mild miss:** Fortis reported Q4/09 EPS of $0.48. This number was post the adjustment of a one-time cost conversion of Whistler customer appliances from propane to natural gas, a $0.01 prior period tax adjustment and a $0.01 favourable adjustment to depreciation expense. The Q4/09 adjusted EPS of $0.48 is ex the multiple ROE/equity base adjustments that FTS received totalling $0.06 which included prior period adjustments. The $0.48 missed us and the Street at $0.52 and $0.50 ($0.46-$0.55 range). This was mainly due to the new third Belize hydro facility coming on 90 days late so it had no impact to Q4 EPS (we had expected $0.02). We had $0.07 relating to the retro ROE and equity rate base percentage regulatory decisions vs. FTS' actual amount of $0.06 reported. Other segment earnings were relatively in line with our expectations See Exhibit 1 for an EPS recurring/adjusted breakdown and Exhibit 2 for Fortis' EPS contribution by segment.

Exhibit 1 – Q4/09 EPS Recurring Breakdown

Reported EPS	**$**	**0.48**
Conversion of Whistler customer appliances	$	0.030
Prior period tax adjustment	$	(0.018)
Favourable adjustment to depreciation expense	$	(0.009)
Adjusted EPS	**$**	**0.48**
Scotia Estimate	**$**	**0.52**
Bloomberg Consensus EPS	**$**	**0.50**

Source: Bloomberg; Scotia Capital estimates.

- **Stock & sector valuation:** We left our 16.5x P/E multiple on FTS unchanged. This is at the upper end for energy utilities and IPPs that we follow as FTS has no coal-fired asset exposure and minimal spot merchant power exposure in the U.S. Northeast. **We continue to prefer higher growth Pipelines** (ENB EPS expected to grow 10%/year through 2014-2015, TRP EBITDA 10% plus/year through 2010) over Energy Utilities and IPPs. FTS' five-year, $5B capital program ($1B+ expected this year) should allow its rate base to grow an average 6%-7%/year again.

- **FTS recommendation:** FTS' 2010E/2011E EPS growth should now pick up again with no equity required in 2010 after its $250M preferred share deal done in January 2010. We set our energy utility 2011E P/E multiples assuming 4.6% 10-year Canada rates (Scotia Economics now estimates 4.8% one year out vs. 3.4% today) and more normal corporate debt risk premiums (currently 90-110 basis points over normal levels for A- rated pipeline/utility equities).

Segmented Q4/09 Results

- **Q4/09 Terasen Gas:** Reported a earnings of $48 million in Q4/09 versus earnings of $47 million in Q4/08 despite gas volumes falling 17% YOY due to lower weather-related gas consumption and a weak economy. Net customer additions were only 7,400 or less than 1%, following a loss of 300 customers in Q3/09. Total net additions for 2009 were lower YOY at 8,200 vs. 12,800 in 2008 due to a continued weakening in housing and construction markets, slowing economic growth and growth in multi-family housing. Terasen Gas is composed of TGI (i.e., Vancouver), TGVI (i.e., Vancouver Island), and TGWI (i.e., Whistler area). TGI's allowed 2009 ROE was increased in Q4/09 to 9.5% from 8.47% on an increased deemed equity of 40% vs. 35% previously. TGVI's allowed ROE was also increased to 10% vs. 9.17% previously on an unchanged deemed equity of 40% (Exhibit 3). **Both increases are effective July 1, 2009 through December 31, 2010.**

Exhibit 2 – Fortis' EPS Contribution by Segment

FORTIS INC.		EPS Contribution			
		Q4/09	(%)	Q4/08	(%)
Regulated Gas	Terasen Gas	$ 0.28	59%	$ 0.30	62%
Regulated Electric	FortisAlberta	$ 0.09	19%	$ 0.07	14%
	FortisBC	$ 0.05	10%	$ 0.04	9%
	Newfoundland Power	$ 0.05	10%	$ 0.05	11%
	Other Canadian *	$ 0.04	7%	$ 0.02	4%
	Caribbean **	$ 0.04	9%	$ 0.05	11%
Non-Regulated Operations	Fortis Hydroelectric Generation	$ 0.02	4%	$ 0.05	11%
	Fortis Properties	$ 0.03	6%	$ 0.03	5%
	Fortis Corporate	$ (0.11)	-23%	$ (0.13)	-26%
	EPS	$0.48		$0.48	

Source: Company reports; Scotia Capital estimates.

- **Terasen Gas Vancouver Island (TGVI)** got approval on April 1, 2008 for the construction and operation of a 1.5 Bcf/d LNG natural gas storage facility on Vancouver Island. FTS estimated a capital cost of $175 million to $200 million, with an in-service date of 2011.
- **Q4/09 FortisAlberta:** Reported earnings increased $4M YOY to $15M as an 8.6% increase in customer distribution rates was more than offset by higher amortization and finance charges associated with FortisAlberta's capex program. **Energy deliveries rose 1.5% or 61 GWh YOY**, due to an increase in residential, commercial, and farm customers, partially offset by a decrease in oilfield customers. In November 2009, the AUC approved an increase to FortisAlberta's ROE to 9% from 8.61% and boosted the allowed equity thickness to 41% from 37% for 2009/2010/2011.
- **Q4/09 FortisBC:** Reported Q4/09 net earnings of $8 million were up $1 million YOY due to a 2.3% increase in electricity sales from residential, indirect wholesale, and general service customers. An electricity rate increase of 4.6% (effective January 1, 2009) and a further 2.2% increase in customer electricity rates (effective September 1, 2009) increased revenue $3M YOY. In December 2009, the BCUC awarded an additional 103 bp to FortisBC's allowed ROE, now 9.9%, on an unchanged equity thickness.

- **Q4/09 Newfoundland Power:** Earnings were **flat YOY at $8 million**. Slightly higher YOY electricity sales (+1.7%) were offset by higher peak demand charges and higher operating expenses, Amortization is now being allocated each quarter based on capitalized assets in service. Previous allocations were based on quarterly sales margin. The PUB gave this FTS subsidiary a 2010 allowed ROE of 9%, up 5 bp from 8.95% in 2009 and 2008.
- **Q4/09 Other Canadian Electric Utilities**: Following the acquisition of Terasen, Fortis put Maritime Electric and FortisOntario into an "other" category. **Earnings were up $3M YOY to $6 million due to** a one-time prior period income tax adjustment of $3M. In October 2009, FortisOntario completed the $75M acquisition of Great Lakes Power Distribution (subsequently renamed Algoma Power Inc.), which serves 12,000 customers in northern Ontario. Algoma accounted for $8M of the $12M increase in revenues but did not contribute significantly to the bottom line ($0.1M). Excluding Algoma Power, sales volumes decreased 1% YOY in Q4/09. Maritime Electric's 2009 ROE **declined slightly** to 9.75% (on deemed equity of 40%) from 10.0%. Maritime Electric has requested a flat 9.75% ROE for 2010 and 2011. FortisOntario's 2010 "preliminary" ROE is set at 9.75%. FTS has requested the same rate apply to Algoma Power.

Exhibit 3 – Nature of FTS' Regulation

Nature of Regulation						
Regulated Utility	Allowed Common Equity (%)	Allowed Returns (%) 2006	2007	2008	2009	2010
		ROE				
Terasen Gas Companies						
TGI	40	8.8	8.37	8.62	8.47	9.5
TGVI	40	9.5	9.07	9.32	9.17	10
FortisBC	40	9.2	8.77	9.02	8.87	9.9
FortisAlberta	41	8.93	8.51	8.75	8.51	9
Newfoundland Power	45	9.24 +/- 50 bps	8.6 +/- 50 bps	8.95 +/- 50 bps	8.95 +/- 50 bps	9
Maritime Electric	40	10.25	10.25	10	9.75	?
Fortis Ontario	43.3	9	9	9	8.01	9.75
		ROA				
Belize Electricity	N/A	10-15	10-15	10	10	?
Caribbean Utilities	N/A	15	15	9-11	9-11	?
Fortis Turks and Caicos	N/A	17.5	17.5	17.5	17.5	?

Source: Company reports.

- **Q4/09 Regulated Utilities - Caribbean:** In July 2009, FTS spent US$6.1 million to increase its ownership in Caribbean Utilities by 2.7% to now own 59.5%. FTS also owns 70% of Belize Electricity and 100% of Fortis Turks and Caicos in this group. Excluding $1 million foreign currency translation gains in Q4/09, **earnings were flat YOY**, at nil**.** Electricity sales **decreased 20% YOY** to 290 GWh. Excluding the Caribbean Utilities results in Q4/08, electricity sales increased 10% YOY in Q4/09, but the YOY increase benefits from the lingering impact of Hurricane Ike in Q4/08. Caribbean Utilities' CEO stated previously that he expects weak or no growth in sales through 2009 and into 2010. This led to CUC scratching its 32 MW capacity expansion solicitation. In November 2009, the Comision Federal de Electricidad (CFE) of Mexico cancelled the guaranteed power supply contract for firm energy with Belize Electricity due to gas availability issues. The contract had been set to expire in December 2010. CFE is proposing a new 50 MW contract with Belize Electricity. We slightly discount FTS' P/E multiple to account for political/weather risks within its Caribbean operations. FTS stated it would no longer invest in Belize.
- **Belize Electricity ("BEL") 2008/2009 rate application:** On June 30, 2008, Fortis rejected a tough proposal by the new Belize government that would have cut 70.1%-owned BEL's regulated return to 8.5% from 12%. BEL got 10% but the government rejected $12.6M of retroactive costs buying necessary diesel-based power from Mexico net to FTS shareholders. On July 25, 2008, BEL appealed this decision to the Supreme Court of Belize. The hearing began in early October 2009, but the Belize trial judge postponed the case for a date still to be determined.
- **Q4/09 Fortis Non-Regulated Generation:** YOY earnings were **down $5 million** to $3 million in Q4/09 due to the expected loss of earnings from the expiration of FTS/OPG's power-for-water exchange agreement at Rankine, lower energy prices in Upper New York State, and decreased production in Belize. Materially lower energy sales (87 GWh in Q4/09 vs. 312 GWh in Q4/08) were the result.

- **Q4/09 Fortis Properties:** Earnings were **up $1 million** YOY to $5 million. Hospitality revenue increased $1 million YOY due to the contribution of the Sheraton Hotel Newfoundland, acquired in November 2008, and the Holiday Inn Select Windsor, acquired in April 2009. The benefit of these new acquisitions was partially offset by lower REVPAR of $68.87 vs. $72.86 last year.
- **Corporate and other:** Overall net corporate and other expenses were down **$1 million YOY** to $19 million due to lower operating expenses, partially offset by higher financing charges and a lower corporate tax recovery. Revenues were flat YOY at $6 million.
- **Capital expenditures:** Utility capital expenditures exceeded **$1B** in 2009. A similar spend is forecast for 2010 with most of the growth driven by B.C. and Alberta Utilities. Fortis continues to pursue acquisitions for profitable growth, focusing on regulated natural gas and electric utilities in the U.S. and Canada. Over the next five years, FTS expects capital expenditures **to total $5.0B, unchanged**. Major projects include:
  - **$200M** liquefied natural gas facility on Vancouver Island.
  - **US$53M** Vaca 19 MW hydroelectric facility in Belize.
  - **$161M** installation of automated meters at FortisAlberta.
  - **$139M** Okanagan Transmission Reinforcement Project at FortisBC.
- **Financial:** FTS' capital structure now stands at 60.2% debt, 6.9% preferred equity and 32.9% common equity, **in line with FTS' targets**. S&P confirmed FTS with an A- credit rating with a stable outlook in September 2009, citing the broad diversification of FTS' asset base. FTS stated it focuses on EPS as its final measure of performance (as do we).

U.S. Utility M&A Heats Up

Event

- E.ON has approved the sale of its U.S. regulated utility segment for at least US$6B but has yet to name the buyer. A deal is expected to be announced this morning (Thursday, April 28, 2010).

Implications

- U.S. utilities Duke Energy, PPL, and a consortium that included Fortis were said to be the last parties at the auction. Reuters reports PPL might have been the successful bidder.
- E.ON U.S.' aggregate generation capacity is 7.5 GW:5.3 GW coal (70%) and 2.2 GW natural gas (30%).
- We do not think that Fortis would be interested in E.ON U.S.' coal fired plant assets but could be interested in its regulated natural gas generation, transmission, and distribution assets. FTS is targeting U.S. electrical utility assets in the $3B-$4B range. In 2007, FTS purchased B.C.-based Terasen Gas for $3.7B.

Recommendation

- Our sector call remains Pipelines and Energy Utilities over IPPs. Our rank order Energy Utility preference is: (1) ATCO, (2) FTS, (3) EMA, and (4) CU.

Qtly Adj EPS (Basic)	Q1	Q2	Q3	Q4	Year	P/E

U.S. Utility M&A Heats Up

- **Motivated seller:** E.ON, the world's largest investor-owned utility by market value (US$68B) announced its board had approved the sale of its U.S. regulated utility segment for at least US$6B but has yet to name the buyer. E.ON previously stated its intention to sell €10B of non-core assets by the end of 2010 in order to reduce debt. U.S. utilities Duke Energy, PPL, and a consortium that including Fortis were said to be the last parties at the auction. Reuters reports PPL might have been the successful bidder. A deal is expected to be announced this morning (Thursday, April 28, 2010).
- **U.S. utility deal activity has increased in 2010.** In February, FirstEnergy Corp agreed to a $4.7B all-stock takeover of Allegheny Energy Inc. for ~6.6x EV/EBITDA. In early April, U.S. IPP's Mirant and RRI Energy agreed to a merger. See our April 13, 2010 comment for details, an excerpt on Mirant/RRI's merger valuation follows:
    - "Prior to the GenOn merger announcement, MIR and RRI traded at 5.4x and 8.0x 2011E EBITDA vs. TA and CPX at 8.2x and 11.3x. **This highlights TA's and CPX's better credit quality and greener asset base.** The EV to 2011E EBITDA for GenOn falls in between the standalone MIR and RRI multiples **and is still less than TA and CPX 2011E multiples.** If GenOn is able to realize the full $150M in synergies, the industry EV/EBITDA multiple range of 6x-8x would infer $900M to $1,200M in synergy enterprise value. This would imply a GenOn market cap of $3,840M-$4,140M based on closing prices of RRI Energy and Mirant prior to the deal announcement (Friday, April 9) vs. the current market cap of $3,434M."
- **E.ON's U.S. market segment consists of two utilities**: Louisville Gas and Electric Company (LG&E) and Kentucky Utilities Company (KUC):
    - **LG&E** - serves 389,000 electric customers and 314,000 natural gas customers. Total regulated generation capacity of is 3,514 MW.
    - **KU** - serves 508,000 electric customers in Kentucky and 30,000 electric customers in Virginia. Total regulated generation capacity of is 4,570 MW.

Exhibit 1 - E.ON's U.S. Midwest EBITDA Segment Results

Source: Company reports.

- **E.ON U.S.' aggregate generation capacity is 7.5 GW: 5.3 GW coal (70%) and 2.2 GW natural gas (30%).** Total generation for this segment is 30.9B kWh, virtually all coal-based: 98% coal, 1% natural gas and 1% hydro. E.ON also owns renewable generation in the U.S. (not included in the two utilities noted above), with 10 wind facilities located primarily in Texas. See Exhibit 1 for E.ON's U.S. Midwest EBITDA segment results that do not include the Texas wind assets, which are included in E.ON's Renewable segment.
- **Fortis implications:** We do not think that Fortis (FTS) would be interested in E.ON U.S.' coal fired plant assets but FTS could be interested in E.ON's U.S. natural gas, transmission, and distribution assets. In 2007, FTS purchased B.C.-based Terasen Gas for $3.7B. We hosted Fortis for an investor lunch on April 8, 2010, at which time FTS said it has been close on several U.S. utility transactions but boards of the takeover targets backed away. FTS targets U.S. electrical utility assets in the $3B-$4B range. A larger target would lead to FTS looking for a financing partner such as a pension fund involved in infrastructure. If FTS was successful in its consortium bid, we would expect FTS to issue equity as it has in the past for acquisitions of similar size, regulated assets like Terasen Gas. Subsequent to the February 2007 Terasen acquisition, FTS issued $1.152B of new equity for $1.11Bof Terasen's 2007 regulated equity, in line.

- LG&E serves 389,000 electric customers.
- LG&E serves 314,000 natural gas customers.
- Service area covers approximately 700 square miles.
- LG&E's total regulated generation capacity is 3,514 megawatts.

Definition of Scotia Capital Equity Research Ratings & Risk Rankings

We have a three-tiered rating system, with ratings of 1-Sector Outperform, 2-Sector Perform, and 3-Sector Underperform. Each analyst assigns a rating that is relative to his or her coverage universe.

Our risk ranking system provides transparency as to the underlying financial and operational risk of each stock covered. Statistical and judgmental factors considered are: historical financial results, share price volatility, liquidity of the shares, credit ratings, analyst forecasts, consistency and predictability of earnings, EPS growth, dividends, cash flow from operations, and strength of balance sheet. The Director of Research and the Supervisory Analyst jointly make the final determination of all risk rankings.

The rating assigned to each security covered in this report is based on the Scotia Capital research analyst's 12-month view on the security. Analysts may sometimes express to traders, salespeople and certain clients their shorter-term views on these securities that differ from their 12-month view due to several factors, including but not limited to the inherent volatility of the marketplace.

Ratings

1-Sector Outperform
The stock is expected to outperform the average 12-month total return of the analyst's coverage universe or an index identified by the analyst that includes, but is not limited to, stocks covered by the analyst.

2-Sector Perform
The stock is expected to perform approximately in line with the average 12-month total return of the analyst's coverage universe or an index identified by the analyst that includes, but is not limited to, stocks covered by the analyst.

3-Sector Underperform
The stock is expected to underperform the average 12-month total return of the analyst's coverage universe or an index identified by the analyst that includes, but is not limited to, stocks covered by the analyst.

Other Ratings
Tender – Investors are guided to tender to the terms of the takeover offer.
Under Review – The rating has been temporarily placed under review, until sufficient information has been received and assessed by the analyst.

Risk Rankings

Low
Low financial and operational risk, high predictability of financial results, low stock volatility.

Medium
Moderate financial and operational risk, moderate predictability of financial results, moderate stock volatility.

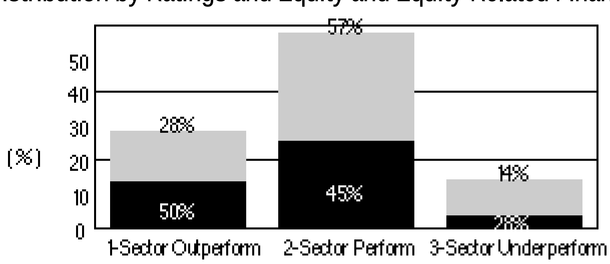
High
High financial and/or operational risk, low predictability of financial results, high stock volatility.

Caution Warranted
Exceptionally high financial and/or operational risk, exceptionally low predictability of financial results, exceptionally high stock volatility. For risk-tolerant investors only.

Venture
Risk and return consistent with Venture Capital. For risk-tolerant investors only.

Scotia Capital Equity Research Ratings Distribution*

Distribution by Ratings and Equity and Equity-Related Financings*



- Percentage of companies covered by Scotia Capital Equity Research within each rating category.
- Percentage of companies within each rating category for which Scotia Capital has undertaken an underwriting liability or has provided advice for a fee within the last 12 months.

* As at March 31, 2010.

Source: Scotia Capital.

For the purposes of the ratings distribution disclosure the NASD requires members who use a ratings system with terms different than "buy," "hold/neutral" and "sell," to equate their own ratings into these categories. Our 1-Sector Outperform, 2-Sector Perform, and 3-Sector Underperform ratings are based on the criteria above, but for this purpose could be equated to buy, neutral and sell ratings, respectively.

Valuation: 16.5x P/E on 2011E EPS							**Yield**	4.0%
Key Risks to Target: Interest rates, growth								

Q1/10 EPS Relatively in Line

Event

- Fortis reported Q1/10 EPS of $0.58, slightly missing our estimate at $0.60, but matching the Street at $0.58 ($0.55-$0.60). There was a delay starting up a Belize Hydro dam while Q1/10 rainfall there was below normal.

Implications

- The new Belize hydro facility finally started in March 2010 but Q1/10 rainfall was below normal. This cost $0.01-$0.02/share vs. our expectations. Our outlook on FTS' 2010E-14E $5B of capital expenditures along with its 6% organic rate base/EPS/dividend growth is unchanged. FTS stated in its release that it continues to look for acquisition growth opportunities.
- FTS has been targeting U.S. electrical utility assets in the US$3B-$4B range. It appears FTS' consortium came in second in the bid for E.ON's U.S. regulated utilities, won by PPL for US$6.7B.
- There was no change to our 2011E outlook, so we kept our 2011E EPS, 16.5x 2011E P/E multiple and $30 one-year target unchanged.

Recommendation

- We continue to like FTS for its highly regulated, mostly transmission and distribution asset base with mostly regulated and unregulated hydro generation.

segment.

- **Stock & sector valuation:** We left our 16.5x P/E multiple on FTS unchanged as our interest rate and S&P/TSX P/E outlook is unchanged. Our outlook on FTS' 2010E-14E $5B of capital expenditures is also unchanged as is our 6% organic rate base/EPS/dividend growth expectation for Fortis. Our 16.5x FTS 2011E P/E multiple is at the upper end for energy utilities and IPPs that we follow as FTS has: (1) no coal-fired asset exposure, and (2) minimal spot merchant power exposure in the U.S. Northeast with green hydro generation. **We continue to prefer Energy Utilities over IPPs** but the gap has narrowed given the recent uptick in forward Alberta power prices. 2010 Alberta forward power prices have moved to the upper $50's/MWh with 2011 AB forward prices **rising 6% to $47.50**/MWh since the start of April 2010.
- **FTS recommendation:** We continue to expect FTS' 2010E/2011E EPS growth to now pick up again. Equity required in 2010 was taken care of with a $250M preferred share deal done in January 2010. We set our energy utility 2011E P/E multiples assuming 4.6% 10-year Canada rates (Scotia Economics now estimates 4.8% one year out vs. 3.65% today) and more normal corporate debt risk premiums (currently 90-110 basis points over normal levels for A-rated pipeline/utility equities).
- **FTS acquisition targets:** This week, PPL prevailed over Fortis' consortium in the E.ON U.S. regulated utility acquisition by PPL for US$6.7B. PPL does not expect to realize any cost savings synergies, but was motivated to acquire assets that were less leveraged to wholesale power markets vs. its legacy asset portfolio. News reports had circulated that Duke Energy and a consortium including Fortis had also been bidding on E.ON's U.S. segment. E.ON was a motivated seller, previously stating its intention to sell €10B of non-core assets by the end of 2010 in order to reduce debt. The sale of E.ON's U.S. segment to PPL marks the third large U.S. utility deal so far in 2010. In February, FirstEnergy Corp agreed to a $4.7B all-

stock takeover of Allegheny Energy Inc. for ~6.6x EV/EBITDA. In early April, U.S. IPP's Mirant and RRI Energy agreed to a merger of equals. **We expect Fortis to continue to look for a $3B-$4B regulated utility acquisition, likely in the U.S.**

(1) Pre-July 2009 / Effective July 1, 2009

Source: Company reports.

Segmented Q1/10 Results

- **Q1/10 Terasen Gas:** Reported earnings of $73 million in Q1/10 versus earnings of $58 million in Q1/09 despite gas volumes falling 19% YOY due to lower weather-related gas consumption and a weak industrial economy. This was due to materially higher allowed ROEs. Net customer additions were 1,566 compared to 2,256 in Q1/09 due to a continued weakening in housing and construction markets, slowing economic growth, growth in multi-family housing. Terasen Gas is comprised of TGI (i.e., Vancouver), TGVI (i.e., Vancouver Island), and TGWI (i.e., Whistler area). TGI's allowed 2010 ROE is 9.5% on a deemed equity of 40%, versus 35% in 2009. TGVI's allowed ROE for 2010 is 10% on an unchanged deemed equity of 40% (Exhibit 2).
- **Terasen Gas Vancouver Island (TGVI)** got approval on April 1, 2008 for the construction and operation of a 1.5 Bcf/d LNG natural gas storage facility on Vancouver Island. FTS estimates a capital cost of $175 million to $200 million, with an in-service date of 2011.
- **Q1/10 FortisAlberta:** Reported earnings increased $2M YOY to $14M due to a 7.5% increase in customer distribution rates and customer growth. **Power deliveries fell 1% or 43 GWh YOY**, due to lower consumption based on mild temperatures. In November 2009, the AUC approved a material increase to FortisAlberta's ROE to 9% from 8.61% and materially boosted the allowed equity thickness to 41% from 37% for 2009/2010/2011.
- **Q1/10 FortisBC:** Reported Q1/10 net earnings of $14 million in line with Q1/09 was due to low demand due to warm weather, offset by residential and general service customer growth. An electricity rate increase of 6% (effective January 1, 2010) offset a 9.2% drop in electricity sales to keep revenue of $72M unchanged YOY. In December 2009, the BCUC awarded an additional 103 bp to FortisBC's allowed 2010 ROE, now 9.9%, on an unchanged equity thickness of 41%.
- **Q1/10 Newfoundland Power:** Earnings were **up $1M YOY to $7 million** due to 1.8% higher YOY electricity sales. Q1/10 revenue increased 5% YOY due to a 3.5% increase in electricity rates. The PUB gave this FTS subsidiary a 2010 allowed ROE of 9%, up only 5 bp from 8.95% in 2009 and 2008.
- **Q1/10 other Canadian electric utilities**: Following the acquisition of Terasen, Fortis put Maritime Electric and FortisOntario into an "other" category. **Earnings were flat at $5M YOY**. Electricity sales were up 2.6% based on strong sales at Algoma Power offset by warmer temperatures, conservation initiatives, and the economic downturn. Excluding Algoma Power, sales volumes decreased 6.2% YOY in Q1/10. Maritime Electric's 2010 ROE is 9.75% on deemed equity of 40%. Maritime Electric has requested a flat 9.75% ROE for 2010 and 2011. FortisOntario's 2010 ROE is 8.01%. Algoma Power's 2010 ROE is tentatively set at 9.75%, but is still subject to regulatory approval.
- **Q1/10 regulated utilities - Caribbean:** FTS owns 59.5% of Caribbean Utilities, 70% of Belize Electricity and 100% of Fortis Turks and Caicos in this group. Q1/10, **earnings were down 33% YOY**, to $4M**.** Electricity sales **increased 4% YOY** to 256 GWh based on

increased air conditioning load, customer growth, and a strong winter tourist season. Caribbean Utilities' CEO stated previously that he expects weak or no growth in sales through 2009 and into 2010. This led to CUC scratching its 32 MW capacity expansion solicitation. In November 2009, the Comision Federal de Electricidad (CFE) of Mexico cancelled the guaranteed power supply contract for firm energy with Belize Electricity due to gas availability issues. The contract had been set to expire in December 2010. CFE is proposing a new 50 MW contract with Belize Electricity. We slightly discount FTS' P/E multiple to account for political/weather risks within its Caribbean operations. FTS stated it would no longer invest in Belize.

- **Belize Electricity ("BEL") 2008/2009 rate application:** On June 30, 2008, Fortis rejected a tough proposal by the new Belize government that would have cut 70.1%-owned BEL's regulated return to 8.5% from 12%. BEL got 10% but the Government rejected $12.6M of retroactive costs buying necessary to make power from Mexico net to FTS shareholders. On July 25, 2008, BEL appealed this decision to the Supreme Court of Belize. The hearing began in early October 2009, but the Belize trial judge postponed the case for a date still to be determined.
- **Q1/10 Fortis non-regulated generation:** YOY earnings were **down $4M** to $2M in Q1/10 due to the expected loss of earnings from the expiration of FTS/OPG's power-for-water exchange agreement at Rankine. Materially lower energy sales (64 GWh in Q1/10 vs. 257 GWh in Q1/09) were the result. The contribution from the new Vaca dam was negligible as it started late in the quarter.
- **Q1/10 Fortis properties:** Earnings were **flat at $2M** YOY. Hospitality revenue increased $1 million YOY due to the contribution of the Holiday Inn Select Windsor, acquired in April 2009 and properties in Atlantic Canada. The earnings benefit of these new acquisitions was offset by lower REVPAR of $62.93/room vs. $64.40/room last year.
- **Corporate and other:** Overall net corporate and other expenses were up **$4M YOY** to $21 million due to higher financing charges and higher preference share dividends. Revenues were flat YOY at $7 million. In January 2010, FTS completed a $250M five-year fixed rate reset preference share offering with the proceeds being used to pay down debt and fund working capital and capex for TGI.
- **Capital expenditures:** Utility capital expenditures are still expected to exceed **$1B** in 2010 with most of the growth driven by B.C. and Alberta Utilities. Fortis continues to pursue mostly U.S. acquisitions focusing on regulated natural gas and electric utilities. Over the next five years, FTS expects capital expenditures **to total $5.0B, unchanged**. Major projects include:
  - **$200M** liquefied natural gas facility on Vancouver Island.
  - **US$53M** Vaca 19 MW hydroelectric facility in Belize (now finished).
  - **$161M** installation of automated meters at FortisAlberta.
  - **$139M** Okanagan Transmission Reinforcement Project at FortisBC.
- **Financial:** FTS' capital structure now stands at 57.5% debt, 9.4% preferred equity and 33.1% common equity, **in line with FTS' targets**. S&P confirmed FTS with an A- credit rating with a stable outlook in September 2009 citing the broad diversification of FTS' asset base. FTS stated it focuses on EPS as its final measure of performance (as do we).

Company	Ticker	Disclosures (see legend below)*
Fortis Inc.	FTS	G, H3, I, S, U

I, Sam Kanes, certify that (1) the views expressed in this report in connection with securities or issuers that I analyze accurately reflect my personal views and (2) no part of my compensation was, is, or will be directly or indirectly, related to the specific recommendations or views expressed by me in this report.

This research report was prepared by employees of Scotia Capital who have the title of Analyst.

All pricing of securities in reports is based on the closing price of the securities' principal marketplace on the night before the publication date, unless otherwise explicitly stated.

All Equity Research Analysts report to the Head of Equity Research. The Head of Equity Research reports to the Managing Director, Head of Institutional Equity Sales, Trading and Research, who is not and does not report to the Head of the Investment Banking Department. The Supervisory Analyst, who reviews the report prior to publication, has a dual reporting line to the Head of Equity Research and the Head of Scotia Capital Compliance. Scotia Capital has policies that are reasonably designed to prevent or control the sharing of material non-public information across internal information barriers, such as between Investment Banking and Research.

The compensation of the research analyst who prepared this report is based on several factors, including but not limited to, the overall profitability of Scotia Capital and the revenues generated from its various departments, including investment banking. Furthermore, the research analyst's compensation is charged as an expense to various Scotia Capital departments, including investment banking. Research Analysts may not receive compensation from the companies they cover.

Non-U.S. analysts may not be associated persons of Scotia Capital (USA) Inc. and therefore may not be subject to NASD Rule 2711 restrictions on communications with subject company, public appearances and trading securities held by the analysts.

Definition of Scotia Capital Equity Research Ratings & Risk Rankings

We have a three-tiered rating system, with ratings of 1-Sector Outperform, 2-Sector Perform, and 3-Sector Underperform. Each analyst assigns a rating that is relative to his or her coverage universe.

Our risk ranking system provides transparency as to the underlying financial and operational risk of each stock covered. Statistical and judgmental factors considered are: historical financial results, share price volatility, liquidity of the shares, credit ratings, analyst forecasts, consistency and predictability of earnings, EPS growth, dividends, cash flow from operations, and strength of balance sheet. The Director of Research and the Supervisory Analyst jointly make the final determination of all risk rankings.

The rating assigned to each security covered in this report is based on the Scotia Capital research analyst's 12-month view on the security. Analysts may sometimes express to traders, salespeople and certain clients their shorter-term views on these securities that differ from their 12-month view due to several factors, including but not limited to the inherent volatility of the marketplace.

Ratings

1-Sector Outperform
The stock is expected to outperform the average 12-month total return of the analyst's coverage universe or an index identified by the analyst that includes, but is not limited to, stocks covered by the analyst.

2-Sector Perform
The stock is expected to perform approximately in line with the average 12-month total return of the analyst's coverage universe or an index identified by the analyst that includes, but is not limited to, stocks covered by the analyst.

3-Sector Underperform
The stock is expected to underperform the average 12-month total return of the analyst's coverage universe or an index identified by the analyst that includes, but is not limited to, stocks covered by the analyst.

Other Ratings
Tender – Investors are guided to tender to the terms of the takeover offer.
Under Review – The rating has been temporarily placed under review, until sufficient information has been received and assessed by the analyst.

Risk Rankings

Low
Low financial and operational risk, high predictability of financial results, low stock volatility.

Medium
Moderate financial and operational risk, moderate predictability of financial results, moderate stock volatility.

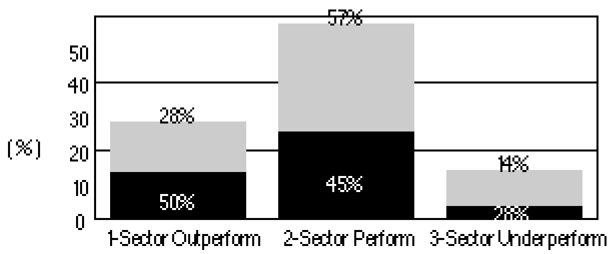
High
High financial and/or operational risk, low predictability of financial results, high stock volatility.

Caution Warranted
Exceptionally high financial and/or operational risk, exceptionally low predictability of financial results, exceptionally high stock volatility. For risk-tolerant investors only.

Venture
Risk and return consistent with Venture Capital. For risk-tolerant investors only.

Scotia Capital Equity Research Ratings Distribution*

Distribution by Ratings and Equity and Equity-Related Financings*



- Percentage of companies covered by Scotia Capital Equity Research within each rating category.
- Percentage of companies within each rating category for which Scotia Capital has undertaken an underwriting liability or has provided advice for a fee within the last 12 months.

* As at March 31, 2010.

Source: Scotia Capital.

For the purposes of the ratings distribution disclosure the NASD requires members who use a ratings system with terms different than "buy," "hold/neutral" and "sell," to equate their own ratings into these categories. Our 1-Sector Outperform, 2-Sector Perform, and 3-Sector Underperform ratings are based on the criteria above, but for this purpose could be equated to buy, neutral and sell ratings, respectively.

General Disclosures

This report has been prepared by analysts who are employed by the Research Department of Scotia Capital™. The Scotia Capital trademark represents the corporate and investment banking businesses of the Scotiabank Group.

Scotia Capital Research produces research reports under a single marketing identity referred to as "Globally-branded research" under U.S. rules. This research is produced on a single global research platform with one set of rules which meet the most stringent standards set by regulators in the various jurisdictions in which the research reports are produced. In addition, the analysts who produce the research reports, regardless of location, are subject to one set of policies designed to meet the most stringent rules established by regulators in the various jurisdictions where the research reports are produced.

Q2/10 EPS in Line

Event

- Fortis reported Q2/10 EPS of $0.32, $0.01 above our $0.31 estimate but matching the Street average at $0.32 (range $0.30-$0.34). The Q2/10 segmented EPS results yielded no surprises.

Implications

- Q2/10 EPS and contributions by segment were exceptionally in line. After a review, we were a bit more cautious on FTS Properties results that came in flat (slight positive) but were not aware of the larger Belize Corporate tax (slight negative).
- FTS' 2010E-14E $5B of mostly regulated budgeted capital expenditures is unchanged along with its 6% organic rate base/EPS/dividend growth. FTS continues to look for acquisition growth opportunities in mostly the U.S., targeting regulated U.S. electrical utility assets.
- There was no change to our 2011E EPS outlook, so we kept our 2011E EPS, 16.5x 2011E P/E multiple and $30 one-year target unchanged.

Recommendation

- We continue to like FTS for its highly regulated, low carbon footprint transmission and distribution asset base but currently prefer ATCO amongst FTS' Energy Utility peers.

Q2/10 EPS/EPS Forecasts/Stock & Sector Valuation

- **Q2/10 EPS in line:** Fortis reported Q2/10 EPS of $0.32, $0.01 above our $0.31 estimate but matching the Street at $0.32 (range $0.30-$0.34). The Q2/10 segmented EPS results yielded no surprises. The slight variations to our assumptions offset (flat Properties results were a slight positive to us offset by a larger Belize corporate tax, a slight negative). See Exhibit 1 for Fortis' EPS contribution by segment.

Exhibit 1 - Fortis' EPS Contribution by Segment

FORTIS INC.

		EPS Contribution			
		Q2/10	(%)	Q2/09	(%)

	EPS	$0.32		$0.31	

Source: Company reports; Scotia Capital estimates.

- **Stock & sector valuation:** We left our 16.5x P/E multiple and one-year target on FTS unchanged. Our outlook on FTS' 2010E-14E $5B of capital expenditures is also unchanged as is our 6% organic rate base/EPS/dividend growth expectation for Fortis. Our 16.5x FTS 2011E P/E multiple is at the upper end for energy utilities and IPPs that we follow as FTS has: (1) no coal-fired asset exposure, and (2) minimal spot merchant power exposure in the U.S. Northeast with green hydro generation. **We continue to prefer Energy Utilities over IPPs**.
- **FTS recommendation:** We continue to expect FTS' 2010E/2011E EPS growth to now pick up again at 6%/year or so. Equity required in 2010 was taken care of with a $250M preferred share deal done in January 2010. We set our energy utility 2011E P/E multiples assuming 4.6% 10-year Canada rates (Scotia Economics now estimates 3.95% 15 months out versus vs. 3.18% actual today) and normal corporate debt risk premiums (currently 90-110 basis points over normal levels for A- rated pipeline/utility equities).
- **FTS acquisition targets:** Last quarter, PPL prevailed over Fortis' consortium bid on the E.ON U.S. regulated utility acquisition by PPL for US$6.7B. News reports had circulated that Duke Energy and a consortium including Fortis had also been bidding on E.ON's U.S. segment. **We expect Fortis to continue to look for a $3B-$4B regulated utility acquisition, likely in the U.S.** Fortis stated in its release that it is looking at Canadian and Caribbean assets as well for potential acquisition targets.

Segmented Q2/10 Results

- **Q2/10 Terasen Gas:** Reported earnings of $17M in Q2/10 versus earnings of $14M in Q2/09 due to: (1) 17% higher gas volumes as a result of cooler weather and (2) increased delivery rates (effective January 1, 2010). Net customer additions were 1,829 compared to 1,068 in Q2/09 due to increased building activity, while customer disconnections were lower YOY due to cooler weather. Terasen Gas is comprised of TGI (i.e., Vancouver), TGVI (i.e., Vancouver Island), and TGWI (i.e., Whistler area). TGI's allowed 2010 ROE is 9.5% on a deemed equity of 40%, versus 35% in 2009. TGVI's allowed ROE for 2010 is 10% on an unchanged deemed equity of 40% (Exhibit 2).
- **Terasen Gas Vancouver Island (TGVI)** got approval on April 1, 2008 for the construction and operation of a 1.5 Bcf/d LNG natural gas storage facility on Vancouver Island. FTS estimated a capital cost of $175 million to $200 million, with an in-service date of 2011.

(1) Pre-July 2009 / Effective July 1, 2009

Source: Company reports.

- **Q2/10 FortisAlberta:** Reported earnings were flat YOY at $17M due to a 7.5% increase in customer distribution rates and customer growth off set by lower corporate tax recoveries. **Power deliveries fell 1% or 41 GWh YOY**, due to lower consumption based on mild temperatures, partially offset by a 20,000 increase in new customers YOY. In November 2009, the AUC approved a material increase to FortisAlberta's ROE to 9% from 8.61% and materially boosted the allowed equity thickness to 41% from 37% for 2009/2010/2011.
- **Q2/10 FortisBC:** Reported Q2/10 net earnings of $8M were up $1M from Q1/09 due to a 6% increase in customer electricity rates effective January 1, 2010. This was partially offset by a 0.7% drop in electricity sales. In December 2009, the BCUC awarded an additional 103 bps to FortisBC's allowed 2010 ROE, now 9.9%, on an unchanged equity thickness of 41%.
- **Q2/10 Newfoundland Power:** Earnings were **flat YOY at $11M** due to 3.6% higher YOY electricity sales offset by a gain on sale of property in Q2/09. Q2/10 revenue increased 6% YOY due to a 3.5% increase in electricity rates. The PUB gave this FTS subsidiary a 2010 allowed ROE of 9%, up only 5 bp from 8.95% in 2009 and 2008.
- **Q2/10 Other Canadian Electric Utilities**: Following the acquisition of Terasen, Fortis put Maritime Electric and FortisOntario into an "other" category. **Earnings were flat at $4M YOY**. Electricity sales were up 11% based on strong sales at Algoma Power and warmer temperatures in Ontario. Excluding Algoma Power, sales volumes increased 2.9% YOY in Q2/10. Maritime Electric's 2010 ROE is 9.75% on deemed equity of 40%. Maritime Electric has requested a flat 9.75% ROE for 2010 and 2011. FortisOntario's 2010 ROE is 8.01%. Algoma Power's 2010 ROE is tentatively set at 9.85% (effective July 1, 2010), but is still subject to regulatory approval.
- **Q2/10 Regulated Utilities - Caribbean:** FTS owns 59.5% of Caribbean Utilities, 70% of Belize Electricity, and 100% of Fortis Turks and Caicos in this group. Q2/10, **earnings were flat YOY** at $7M**.** Electricity sales **increased 6% YOY** to 307 GWh based on increased air conditioning load, customer growth, improving tourism activity, and record peak loads achieved in June 2010 at Caribbean Utilities (102 MW) and Fortis Turks and Caicos (30 MW). Caribbean Utilities' CEO stated previously that he expects weak or no growth in sales through 2009 and into 2010. This led to CUC scratching its 32 MW capacity expansion solicitation. In November 2009, the Comision Federal de Electricidad (CFE) of Mexico

cancelled the guaranteed power supply contract for firm energy with Belize Electricity due to gas availability issues. The contract had been set to expire in December 2010. CFE is proposing a new 50 MW contract with Belize Electricity. We slightly discount FTS' P/E multiple to account for political/weather risks within its Caribbean operations. FTS stated it would no longer invest in Belize.

- **Belize Electricity ("BEL") 2008/2009 rate application:** On June 30, 2008, Fortis rejected a tough proposal by the new Belize government that would have cut 70.1%-owned BEL's regulated return to 8.5% from 12%. BEL got 10% but the Government rejected $12.6M of retroactive costs buying necessary to make power from Mexico net to FTS shareholders. On July 25, 2008, BEL appealed this decision to the Supreme Court of Belize. The hearing began in early October 2009, but the Belize trial judge postponed the case for a date still to be determined. In June 2010 the Supreme Court of Belize issued an order prohibiting the PUC from carrying out any rate-setting review proceedings or changing any rates for Belize Electricity until further order of the Supreme Court.
- **Q2/10 Fortis Non-Regulated Generation:** YOY earnings were **flat at $3M** in Q2/10 due to the expected loss of earnings from the expiration of FTS/OPG's power-for-water exchange agreement at Rankine offset by higher production in Belize. Energy sales were down 36% YOY to 90 GWh due to the expiration of water rights at Rankine, lower production in upstate New York due to low rainfall, partially offset by the new Vaca hydroelectric generating facility that was commissioned in March 2010. The new Vaca dam produced 16 GWh in Q2/10 and 20 GWh in 1H/10 during the dry season.
- **Q2/10 Fortis Properties:** Earnings were **flat at $8M** YOY. Hospitality revenue increased $2M YOY due a 2.6% increase in average room rates partially offset by a 1.8% decrease in hotel occupancy, mainly in western Canada. In Q2/10 RevPR increased 0.8% to $83.77/room.
- **Corporate and other:** Overall net corporate and other expenses were up **$2M YOY** to $20M due to higher financing charges, higher preference share dividends, and higher business development costs. Revenues were up $2M YOY to $9M. In January 2010, FTS completed a $250M five-year fixed rate reset preference share offering with the proceeds being used to pay down debt and fund working capital and capex for TGI.
- **Capital expenditures:** Utility capital expenditures are still expected to exceed **$1B** in 2010 with most of the growth driven by B.C. and Alberta Utilities. Fortis continues to pursue mostly U.S. acquisitions focusing on regulated natural gas and electric utilities. Over the next five years, FTS expects capital expenditures **to total $5.0B, unchanged** with 71% in Regulated Electric Utilities (mainly FortisAlberta and FortisBC), 27% in Regulated Utilities, and 2% in non-regulated operations. Major projects include:
  - **$200M** liquefied natural gas facility on Vancouver Island.
  - **$141M** installation of automated meters at FortisAlberta (cost estimate revised down from $155M forecast in Q4/09).
  - **$139M** Okanagan Transmission Reinforcement Project at FortisBC.
- **Financial:** FTS' capital structure now stands at 57.7% debt, 9.3% preferred equity and 33 % common equity, **in line with FTS' targets**. In May 2010 S&P confirmed FTS with an A-credit rating with a stable outlook. In June 2010 DBRS confirmed FTS with a BBB(high) but changed the trend to positive from stable citing broad diversification of FTS' asset base. FTS stated it focuses on EPS as its final measure of performance (as do we).

Definition of Scotia Capital Equity Research Ratings & Risk Rankings

We have a three-tiered rating system, with ratings of 1-Sector Outperform, 2-Sector Perform, and 3-Sector Underperform. Each analyst assigns a rating that is relative to his or her coverage universe.

Our risk ranking system provides transparency as to the underlying financial and operational risk of each stock covered. Statistical and judgmental factors considered are: historical financial results, share price volatility, liquidity of the shares, credit ratings, analyst forecasts, consistency and predictability of earnings, EPS growth, dividends, cash flow from operations, and strength of balance sheet. The Director of Research and the Supervisory Analyst jointly make the final determination of all risk rankings.

The rating assigned to each security covered in this report is based on the Scotia Capital research analyst's 12-month view on the security. Analysts may sometimes express to traders, salespeople and certain clients their shorter-term views on these securities that differ from their 12-month view due to several factors, including but not limited to the inherent volatility of the marketplace.

Ratings

1-Sector Outperform
The stock is expected to outperform the average 12-month total return of the analyst's coverage universe or an index identified by the analyst that includes, but is not limited to, stocks covered by the analyst.

2-Sector Perform
The stock is expected to perform approximately in line with the average 12-month total return of the analyst's coverage universe or an index identified by the analyst that includes, but is not limited to, stocks covered by the analyst.

3-Sector Underperform
The stock is expected to underperform the average 12-month total return of the analyst's coverage universe or an index identified by the analyst that includes, but is not limited to, stocks covered by the analyst.

Other Ratings
Tender – Investors are guided to tender to the terms of the takeover offer.
Under Review – The rating has been temporarily placed under review, until sufficient information has been received and assessed by the analyst.

Risk Rankings

Low
Low financial and operational risk, high predictability of financial results, low stock volatility.

Medium
Moderate financial and operational risk, moderate predictability of financial results, moderate stock volatility.

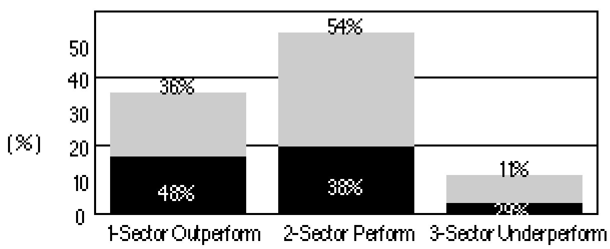
High
High financial and/or operational risk, low predictability of financial results, high stock volatility.

Caution Warranted
Exceptionally high financial and/or operational risk, exceptionally low predictability of financial results, exceptionally high stock volatility. For risk-tolerant investors only.

Venture
Risk and return consistent with Venture Capital. For risk-tolerant investors only.

Scotia Capital Equity Research Ratings Distribution*

Distribution by Ratings and Equity and Equity-Related Financings*



- Percentage of companies covered by Scotia Capital Equity Research within each rating category.
- Percentage of companies within each rating category for which Scotia Capital has undertaken an underwriting liability or has provided advice for a fee within the last 12 months.

* As at July 31, 2010.

Source: Scotia Capital.

For the purposes of the ratings distribution disclosure the NASD requires members who use a ratings system with terms different than "buy," "hold/neutral" and "sell," to equate their own ratings into these categories. Our 1-Sector Outperform, 2-Sector Perform, and 3-Sector Underperform ratings are based on the criteria above, but for this purpose could be equated to buy, neutral and sell ratings, respectively.

General Disclosures

This report has been prepared by analysts who are employed by the Research Department of Scotia Capital™. The Scotia Capital trademark represents the corporate and investment banking businesses of the Scotiabank Group.

Scotia Capital Research produces research reports under a single marketing identity referred to as "Globally-branded research" under U.S. rules. This research is produced on a single global research platform with one set of rules which meet the most stringent standards set by regulators in the various jurisdictions in which the research reports are produced. In addition, the analysts who produce the research reports, regardless of location, are subject to one set of policies designed to meet the most stringent rules established by regulators in the various jurisdictions where the research reports are produced.

$451M Incremental Waneta Hydro Expansion

Event

- Fortis announced it has partnered with Columbia Power Corporation & Columbia Basin Trust (CBC/CBT, 100% owned by the B.C. government) to construct a $900M 335 MW hydro facility, the Waneta Expansion.

Implications

- Fortis will own 51% of the Waneta Expansion, expected to come into service in spring 2015. Although non-regulated, the risk of this project is reduced through fixed energy and capacity entitlements. 101 MW of the capacity will be sold to BC Hydro under a long-term PPA with the remaining 234 MW sold to FortisBC.
- FTS' 2010E-14E capital expenditures increase $0.5B to $5.5B with an unchanged 6% organic rate base/EPS/dividend growth. FTS continues to look for acquisition growth opportunities in mostly the U.S., targeting regulated U.S. electrical utility assets.
- Our 2011E EPS, 16.5x 2011E P/E multiple, and $30 one-year target are unchanged for now.

Recommendation

- We continue to like FTS for its highly regulated, low carbon footprint transmission, and distribution asset base, but currently marginally prefer ATCO (1-SO) amongst FTS' Energy Utility peers.

Definition of Scotia Capital Equity Research Ratings & Risk Rankings

We have a three-tiered rating system, with ratings of 1-Sector Outperform, 2-Sector Perform, and 3-Sector Underperform. Each analyst assigns a rating that is relative to his or her coverage universe.

Our risk ranking system provides transparency as to the underlying financial and operational risk of each stock covered. Statistical and judgmental factors considered are: historical financial results, share price volatility, liquidity of the shares, credit ratings, analyst forecasts, consistency and predictability of earnings, EPS growth, dividends, cash flow from operations, and strength of balance sheet. The Director of Research and the Supervisory Analyst jointly make the final determination of all risk rankings.

The rating assigned to each security covered in this report is based on the Scotia Capital research analyst's 12-month view on the security. Analysts may sometimes express to traders, salespeople and certain clients their shorter-term views on these securities that differ from their 12-month view due to several factors, including but not limited to the inherent volatility of the marketplace.

Ratings

1-Sector Outperform
The stock is expected to outperform the average 12-month total return of the analyst's coverage universe or an index identified by the analyst that includes, but is not limited to, stocks covered by the analyst.

2-Sector Perform
The stock is expected to perform approximately in line with the average 12-month total return of the analyst's coverage universe or an index identified by the analyst that includes, but is not limited to, stocks covered by the analyst.

3-Sector Underperform
The stock is expected to underperform the average 12-month total return of the analyst's coverage universe or an index identified by the analyst that includes, but is not limited to, stocks covered by the analyst.

Other Ratings
Tender – Investors are guided to tender to the terms of the takeover offer.
Under Review – The rating has been temporarily placed under review, until sufficient information has been received and assessed by the analyst.

Risk Rankings

Low
Low financial and operational risk, high predictability of financial results, low stock volatility.

Medium
Moderate financial and operational risk, moderate predictability of financial results, moderate stock volatility.

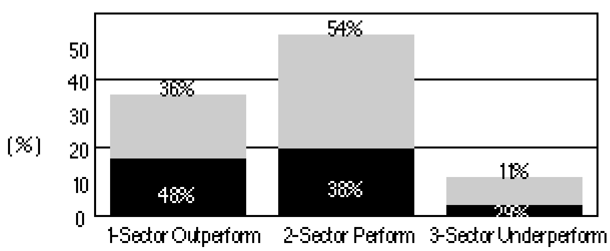
High
High financial and/or operational risk, low predictability of financial results, high stock volatility.

Caution Warranted
Exceptionally high financial and/or operational risk, exceptionally low predictability of financial results, exceptionally high stock volatility. For risk-tolerant investors only.

Venture
Risk and return consistent with Venture Capital. For risk-tolerant investors only.

Scotia Capital Equity Research Ratings Distribution*

Distribution by Ratings and Equity and Equity-Related Financings*



- Percentage of companies covered by Scotia Capital Equity Research within each rating category.
- Percentage of companies within each rating category for which Scotia Capital has undertaken an underwriting liability or has provided advice for a fee within the last 12 months.

* As at July 31, 2010.

Source: Scotia Capital.

For the purposes of the ratings distribution disclosure the NASD requires members who use a ratings system with terms different than "buy," "hold/neutral" and "sell," to equate their own ratings into these categories. Our 1-Sector Outperform, 2-Sector Perform, and 3-Sector Underperform ratings are based on the criteria above, but for this purpose could be equated to buy, neutral and sell ratings, respectively.

General Disclosures

This report has been prepared by analysts who are employed by the Research Department of Scotia Capital™. The Scotia Capital trademark represents the corporate and investment banking businesses of the Scotiabank Group.

Scotia Capital Research produces research reports under a single marketing identity referred to as "Globally-branded research" under U.S. rules. This research is produced on a single global research platform with one set of rules which meet the most stringent standards set by regulators in the various jurisdictions in which the research reports are produced. In addition, the analysts who produce the research reports, regardless of location, are subject to one set of policies designed to meet the most stringent rules established by regulators in the various jurisdictions where the research reports are produced.

This report is provided to you for informational purposes only. This report is not, and is not to be construed as, an offer to sell or solicitation of an offer to buy any securities and/or commodity futures contracts.

The securities mentioned in this report may neither be suitable for all investors nor eligible for sale in some jurisdictions where the report is distributed.

The information and opinions contained herein have been compiled or arrived at from sources believed reliable, however, Scotia Capital makes no representation or warranty, express or implied, as to their accuracy or completeness.

Scotia Capital has policies designed to make best efforts to ensure that the information contained in this report is current as of the date of this report, unless otherwise specified.

Valuation: 18.5x P/E on 2011E/2012E averaged EPS					**Yield**	3.4%

Key Risks to Target: Interest rates, growth

Q3/10 Recurring EPS Slightly Above (?)

Event

- Fortis reported Q3/10 EPS of $0.26 or about $0.25 recurring slightly beat our estimate and the Street at $0.24, but strong Belize hydro may have been above normal levels and a $1M business tax deferral could have helped.

Implications

- Small Q3/10 one-time items were $0.01 in hurricane recovery costs and a $0.02 BCUC-approved cost reversal of a Whistler customer appliance conversion program. Somewhat non-recurring were a new $1M deferral of Belize business taxes now allowed in rates and strong Belize Hydro results (35 GWh in Q3/10 out of 80 GWh annualized) due to good rain so FTS' slight beat does not change our EPS forecasts.
- FTS' 2011E-15E capital budget is unchanged at $5.5B post FTS' Waneta B.C. Hydro expansion announcement. FTS has guided to 6%/year organic EPS/dividend growth, not updated in its release.
- We kept our EPS forecasts but moved up our FTS P/E to 18x from 17x on 2011E/2012E that takes our $32.50 one-year target to $34.50/share.

Recommendation

- Given the strong price outperformance by FTS (and EMA) lately and sharply higher oil prices that tend to favour ATCO and Canadian Utilities, our unchanged ranking is: ATCO/CU/FTS/EMA.

Q3/10 EPS/EPS Forecasts/Stock & Sector Valuation

- **Q3/10 EPS appears to be slight beat:** Fortis reported Q3/10 EPS of $0.26 or about $0.25 recurring, appears to have slightly beat us and the Street at $0.24. Q3/10 one-time items were $0.01 per share in recovery costs at Nfld Power from Hurricane Igor and a $0.02 per share BCUC-approved cost reversal of a customer appliance conversion program. Also, a new deferral of $1M of Belize business taxes due to newly approved future recovery in rates and strong Belize Hydro results due to plentiful rain (35G GWh in Q3/10 out of 80 GWh annualized) are debatably the not so recurring reasons for the slight beat so there will be no change to our EPS forecasts. See Exhibit 1 for Fortis' EPS contribution by segment.

Exhibit 1 - Fortis' EPS Contribution by Segment

FORTIS INC.

		EPS Contribution						
		Q3/10		(%)	Q3/09		(%)

Source: Company reports; Scotia Capital estimates.

- **Stock & sector valuation:** We went to overweight Energy Utilities in early September 2010, from Market Weight as North American economies show fresh signs of easing taking interest rates down with them. We then raised our Energy Utility P/E multiples by 1x across the board (ATCO, CU, EMA, FTS) **and are raising them again 1x taking FTS' P/E to 18x from 17x** in a related note due to: (1) TSX P/E multiple up 1x since early September, (2) QE2 effects lowering U.S. interest rates, and (3) the continue materially higher valuations for energy infrastructure income trusts and L.P.'s. FTS' 2010E-14E $5.5B of capital expenditures supports its 6% organic annual EPS rate. **We continue to prefer Energy Utilities over IPPs**.
- **FTS acquisition targets:** Three quarters ago, PPL won over a consortium including Fortis bid to buy E.ON's U.S. regulated utility assets for US$6.7B. **Fortis' CEO continues to guide to looking at $3B-$4B regulated utility acquisitions, likely in the U.S.** We respect FTS' track record for making value added acquisitions but do not put any premium in our FTS P/E multiple or earnings until we see what transpires, if anything.

Segmented Q3/10 Results

- **Q3/10 Terasen Gas:** Reported a loss of $5M in Q3/10 versus a loss of $3M in Q3/09 due to: (1) higher labour and planned maintenance costs, and (2) lower capitalized overhead costs as a result of a Negotiated Settlement Agreement (NSA). These increased costs were partially offset by a one-time BCUIC approved recovery of Q4/09 cost overruns re the conversion of Whistler-based customer appliances from propane to natural gas. Net customer additions were strong at 3,460 YTD vs. 743 YOY. Terasen Gas is comprised of TGI (i.e., Vancouver), TGVI (i.e., Vancouver Island), and TGWI (i.e., Whistler area). TGI's allowed 2010 ROE is 9.5% on a deemed equity of 40%, versus 35% in 2009. TGVI's allowed ROE for 2010 is 10% on a deemed equity of 40% (Exhibit 2).

Exhibit 2 - Nature of FTS' Regulation

(1) Pre-July 2009 / Effective July 1, 2009

Source: Company reports.

- **Q3/10 FortisAlberta:** Reported earnings were up $4M YOY to $19M due to AUC's previous approval (November 2009) of a material increase to FortisAlberta's ROE to 9% from 8.61% and allowed equity thickness to 41% from 37% for 2009/2010/2011. **Power deliveries fell 1% YOY**, due to lower industrial consumption from mild temperatures, partially offset by an increase in the number of residential and commercial customers.
- **Q3/10 FortisBC:** Reported Q3/10 net earnings of $11M were up $2M from Q3/09 due to a 6% increase in customer electricity rates effective January 1, 2010, partially offset by a 0.7% drop in electricity sales. In December 2009, the BCUC awarded an additional 103 bp to FortisBC's allowed 2010 ROE, now 9.9%, on an unchanged equity thickness of 41%.
- **Q3/10 Newfoundland Power:** Earnings were **up $1M YOY to $8M largely** due to 3.5% higher YOY electricity sales. The PUB gave this original FTS subsidiary a 2010 allowed ROE of 9%, up only 5 bp from 8.95% in 2009 and 2008.
- **Q3/10 Other Canadian Electric Utilities**: Maritime Electric and FortisOntario are in this "other" category. **Earnings were flat at $5M YOY**. Electricity sales were up 13% based on strong sales at Algoma Power and warmer summer temperatures in Ontario and PEI. Excluding Algoma Power, sales volumes increased 5.8% YOY in Q3/10. Maritime Electric's 2010 and 2011 ROE is 9.75% on deemed equity of 40%. FortisOntario's 2010 ROE is only 8.01% while Algoma Power's 2010 ROE is tentatively set at 9.85% (effective July 1, 2010), subject to regulatory approval.
- **Q3/10 Regulated Utilities - Caribbean:** This group has 59.5% of Caribbean Utilities, 70% of Belize Electricity, and 100% of Fortis Turks and Caicos. Q3/10 **earnings rose $1M YOY** to $8M on a **2% sales increase YOY** to 318 GWh. Higher air conditioning load, customer growth, improving tourism activity, and record peak loads at Fortis Turks and Caicos (July 31 MW) were cited.
- **Belize Electricity ("BEL") 2008/2009 rate application:** On June 30, 2008, Fortis rejected a Belize government cut to 70.1%-owned BEL's regulated return to 8.5% from 12%. BEL eventually got 10% but the Government denied $12.6M of retroactive diesel costs incurred for Belize power production net to FTS shareholders. The appeal hearing began in early October 2009, but the Belize trial judge postponed the case for a date still to be determined. In June 2010, the Supreme Court of Belize issued an order prohibiting the PUC from carrying out any rate-setting review proceedings or changing any rates for Belize Electricity

until further order of the Supreme Court. The case was heard in October 2010, and closing arguments are slated for December 2010.

- **Q3/10 Fortis Non-Regulated Generation:** YOY earnings were **up a strong $5M YOY to $9M** in Q3/10 due to higher hydro production in Belize that led to 35 GWh of production in Q3/10 (out of 80 GWh annualized). Energy sales were up 38% YOY.
- **Q3/10 Fortis Properties:** Earnings were **flat at $9M** YOY as both hospitality and real estate revenues stayed flat YOY. In Q3/10, RevPR increased 0.6% to $89.02/room.
- **Corporate and other:** Overall net corporate and other expenses were up **$2M YOY** to $19M due to higher preferred share dividends, partially offset by lower finance charges as higher-interest paying debt that was retired. In April 2010, Terasen redeemed its 8% $125M Capital Securities.
- **Strong capital expenditures:** Utility capital expenditures will be **$1B+** in 2010, mostly in B.C. and Alberta. FTS expects 2010-14 capital expenditures to total $5.5B, unchanged post the Waneta Dam announcement with 71% in Regulated Electric Utilities (mainly FortisAlberta and FortisBC), 27% in other Regulated Utilities, and 2% in non-regulated operations. Some of the larger projects include:
  - **$200M** liquefied natural gas facility on Vancouver Island for 2011.
  - **$141M** installation of automated meters at FortisAlberta **$139M** Okanagan Transmission Reinforcement Project at FortisBC.
- **Financial:** FTS' capital structure at 9/30/10 is 58.2% debt, 9.2% preferred equity, and 32.6% common equity, **in line with FTS' targets**. In May 2010, S&P confirmed FTS with an A-credit rating with a stable outlook. In June 2010, DBRS confirmed FTS with a BBB (high) but changed the trend to positive from stable citing broad diversification of FTS' asset base. In October/10, DBRS raised FTS' credit rating to A- Stable. FTS stated it focuses on EPS as its final measure of financial performance (as we do).
- **Waneta expansion:** Fortis has partnered with Columbia Power Corporation & Columbia Basin Trust (CBC/CBT, 100% owned by the B.C. government) to construct a $900M 335 MW hydro facility, the Waneta Expansion, for 51% of the Waneta Expansion to enter service in 2015. Although non-regulated, the risk of this hydro project is reduced through fixed energy and capacity entitlements. 101 MW of the capacity will be sold to BC Hydro under a long-term PPA with the remaining 234 MW sold to FortisBC.

Definition of Scotia Capital Equity Research Ratings & Risk Rankings

We have a three-tiered rating system, with ratings of 1-Sector Outperform, 2-Sector Perform, and 3-Sector Underperform. Each analyst assigns a rating that is relative to his or her coverage universe.

Our risk ranking system provides transparency as to the underlying financial and operational risk of each stock covered. Statistical and judgmental factors considered are: historical financial results, share price volatility, liquidity of the shares, credit ratings, analyst forecasts, consistency and predictability of earnings, EPS growth, dividends, cash flow from operations, and strength of balance sheet. The Director of Research and the Supervisory Analyst jointly make the final determination of all risk rankings.

The rating assigned to each security covered in this report is based on the Scotia Capital research analyst's 12-month view on the security. Analysts may sometimes express to traders, salespeople and certain clients their shorter-term views on these securities that differ from their 12-month view due to several factors, including but not limited to the inherent volatility of the marketplace.

Ratings

1-Sector Outperform
The stock is expected to outperform the average 12-month total return of the analyst's coverage universe or an index identified by the analyst that includes, but is not limited to, stocks covered by the analyst.

2-Sector Perform
The stock is expected to perform approximately in line with the average 12-month total return of the analyst's coverage universe or an index identified by the analyst that includes, but is not limited to, stocks covered by the analyst.

3-Sector Underperform
The stock is expected to underperform the average 12-month total return of the analyst's coverage universe or an index identified by the analyst that includes, but is not limited to, stocks covered by the analyst.

Other Ratings
Tender – Investors are guided to tender to the terms of the takeover offer.
Under Review – The rating has been temporarily placed under review, until sufficient information has been received and assessed by the analyst.

Risk Rankings

Low
Low financial and operational risk, high predictability of financial results, low stock volatility.

Medium
Moderate financial and operational risk, moderate predictability of financial results, moderate stock volatility.

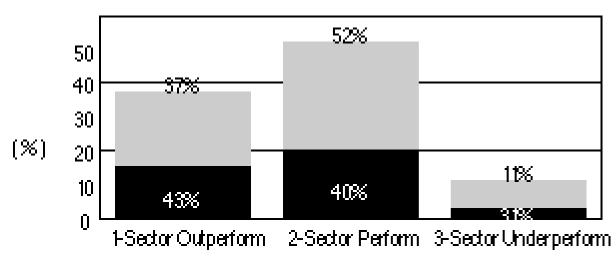
High
High financial and/or operational risk, low predictability of financial results, high stock volatility.

Caution Warranted
Exceptionally high financial and/or operational risk, exceptionally low predictability of financial results, exceptionally high stock volatility. For risk-tolerant investors only.

Venture
Risk and return consistent with Venture Capital. For risk-tolerant investors only.

Scotia Capital Equity Research Ratings Distribution*

Distribution by Ratings and Equity and Equity-Related Financings*



- Percentage of companies covered by Scotia Capital Equity Research within each rating category.
- Percentage of companies within each rating category for which Scotia Capital has undertaken an underwriting liability or has provided advice for a fee within the last 12 months.

* As at October 31, 2010.

Source: Scotia Capital.

For the purposes of the ratings distribution disclosure the NASD requires members who use a ratings system with terms different than "buy," "hold/neutral" and "sell," to equate their own ratings into these categories. Our 1-Sector Outperform, 2-Sector Perform, and 3-Sector Underperform ratings are based on the criteria above, but for this purpose could be equated to buy, neutral and sell ratings, respectively.

General Disclosures

This report has been prepared by analysts who are employed by the Research Department of Scotia Capital™. The Scotia Capital trademark represents the corporate and investment banking businesses of the Scotiabank Group.

Scotia Capital Research produces research reports under a single marketing identity referred to as "Globally-branded research" under U.S. rules. This research is produced on a single global research platform with one set of rules which meet the most stringent standards set by regulators in the various jurisdictions in which the research reports are produced. In addition, the analysts who produce the research reports, regardless of location, are subject to one set of policies designed to meet the most stringent rules established by regulators in the various jurisdictions where the research reports are produced.

This report is provided to you for informational purposes only. This report is not, and is not to be construed as, an offer to sell or solicitation of an offer to buy any securities and/or commodity futures contracts.

The securities mentioned in this report may neither be suitable for all investors nor eligible for sale in some jurisdictions where the report is distributed.

The information and opinions contained herein have been compiled or arrived at from sources believed reliable, however, Scotia Capital makes no representation or warranty, express or implied, as to their accuracy or completeness.

Scotia Capital has policies designed to make best efforts to ensure that the information contained in this report is current as of the date of this report, unless otherwise specified.

Valuation: 10.25x EV/EBITDA on 2012E EBITDA							**Yield**	3.4%

Key Risks to Target: Interest rates, growth

Q4/10 Recurring EPS Mildly Misses

Event

- Fortis reported Q4/10 EPS of $0.49 that looked recurring, missing our estimate at $0.55 and the Street at $0.51 ($0.47-$0.55). Fortis also increased its dividend 3.6% to $1.16 annualized, slightly behind our $1.18 estimate.

Implications

- Q4/10 EPS mild miss was due to (1) poor Belize Electricity results due to regulatory challenges ($1.5M in 2010 vs. $10M expected) and related legal fees, (2) lower-than-average temperatures at FTS's Caribbean operations, and (3) higher-than-expected Q4 O&M costs.
- FTS' 2011E-2015E capital budget is unchanged at $5.5B. FTS has guided to 6%/year organic EPS/dividend growth, not updated in its release. Most 2011 regulatory allowed ROE levels remain flat with 2010.
- We cut 2011E/2012E EPS by $0.04/$0.05 for lower Belize earnings and flatter Real Estate. FTS' guided 6%/year EPS accretion implies 2011/2012 EPS of $1.74/$1.84 based on $1.64 recurring 2010 EPS vs. our estimate, now at $1.76/$1.85. Our one-year FTS target has dropped $0.50/share to $33.50; our recommendation has also been lowered to 3-Sector Underperform.

Recommendation

- We cut FTS to 3-SU from 2-SP. Our current rank energy utilities order is ATCO, Emera, Canadian Utilities, and then Fortis.

Q4/10 EPS – 2011E/2012E EPS Forecasts – Stock & Sector Valuation

- **Fortis reported Q4/10 EPS** of $0.49 that appears to be recurring, moderately missing our estimate at $0.55 and mildly missing the Street at $0.51 ($0.47-$0.55). Fortis also increased its dividend per share 3.6% to $1.16 annualized, slightly behind our $1.18 estimate. The Q4/10 EPS miss vs. our expectations was due to (1) poorer-than-expected performance at Belize Electricity due to regulatory challenges (contributed only $1.5M in 2010 vs. $10M expected) and associated legal fees, (2) lower-than-average temperatures at FTS's Caribbean operations, (3) higher-than-expected O&M costs due to a heavier allocation in Q4 vs. other quarters, and (4) a 170 bp decrease in occupancy rate at FTS' Real Estate division. See Exhibit 1 for Fortis' EPS contribution by segment.

Exhibit 1 - Fortis' EPS Contribution by Segment

FORTIS INC.		EPS Contribution Q4/10	(%)	EPS Contribution Q4/09	(%)
Regulated Gas	Terasen Gas	$ 0.26	53%	$ 0.28	59%

	EPS	$0.49		$0.48	

Source: Company reports; Scotia Capital estimates.

- **2011E/2012E EPS forecasts lower:** Belize Electricity continues to underperform vs. FTS' expectations, contributing only $1.5M in 2010 vs. $10M expected (underperformance on a per share basis = $0.04). FTS stated the poor financial performance was due to "regulatory challenges [that] continue to impede the utility's ability to earn a fair and reasonable return." We cut $0.04/$0.05 per share from 2011E/2012E for lower-than-expected Belize earnings as well as some other minor adjustments. FTS' guided 6%/year EPS accretion would imply 2011/2012 EPS of $1.74/$1.84 using 2010 recurring EPS of $1.64 (reported = $1.65) as the base year, vs. our estimate, now at $1.76 and $1.85. Our one-year FTS target has dropped $0.50/share to $33.50.
- **Sector valuation:** We cut our energy utilities recommendation from market weight in mid-December 2010 to underweight in late January 2011. This cut was due to better-than-expected U.S. and Canadian economic data and 2011-2012 GDP and interest rate forecasts. Long 10-year government bond interest rates have already backed up 80 and 130 basis points in Canada and the U.S., respectively, from their October 2010 bottoms. Our economists now forecast 4% 10-year Canada rates by Q4/12. We use 3.6% forecast 10-year Canada rates to help set our Q1/11 one-year out stock price targets.
- **FTS acquisition targets unchanged:** Last year, PPL won over a consortium that included Fortis' bid to buy E.ON's U.S. regulated utility assets for US$6.7B. **Fortis' CEO previously**

guided to looking at \$3B-\$4B regulated utility acquisitions, likely in the U.S. In its Q4/10 release, FTS stated it **continues to pursue acquisitions** of regulated electric and natural gas utilities in the United States and Canada. We respect FTS' track record for making value added acquisitions but **do not put any premium in our FTS P/E multiple or earnings** until we see what transpires, if anything.

Segmented Q4/10 Results

- **Q4/10 Terasen Gas:** Reported earnings of \$45M in Q4/10 were down 6% YOY due to: (1) higher operating expenses as 2010 expenses were more heavily weighted in Q4/10 and (2) increased amortization rates as a result of higher capital investment and higher rates resulting from a recent regulator-approved study. These increased costs were partially offset by higher delivery rates, a \$5M after-tax provision take in Q4/09, and lower finance charges due to lower borrowings. Net customer additions were 9,400 in 2010 vs. 8,200 in 2009. Terasen Gas is comprised of TGI (i.e., Vancouver), TGVI (i.e., Vancouver Island), and TGWI (i.e., Whistler area). TGI's allowed 2011 ROE is 9.5% on a deemed equity of 40%, **flat YOY.** TGVI's allowed ROE for 2011 is 10% on a deemed equity of 40% (see Exhibit 2), also **flat YOY.**
- **Q4/10 FortisAlberta:** Reported earnings were up \$2M YOY to \$17M due to AUC's previous approval (November 2009) of a material increase to FortisAlberta's ROE to 9% from 8.61% and allowed equity thickness to 41% from 37% for 2009/2010/2011. **Power deliveries rose 3% YOY**, due to increased oil and gas activities driving an increased customer base and higher deliveries.
- **Q4/10 FortisBC:** Reported Q4/10 net earnings of \$10M were up \$2M from Q4/09 due to a 6% increase in customer electricity rates effective January 1, 2010, partially offset by a 1.4% drop in electricity sales. In December 2009, the BCUC awarded an additional 103 bp to FortisBC's allowed 2010 ROE, to 9.9%, on an unchanged equity thickness of 41%, **both unchanged for 2011.**
- **Q4/10 Newfoundland Power:** Earnings were **up \$1M YOY to \$9M largely** due to 1% higher YOY electricity sales and a slightly higher 2010 allowed ROE of 9%, up 31 bp from

8.69% in 2009 and 8.95% in 2008. **Nfld Power's 2011 ROE is set at only 8.38% for 2011 by way of automatic adjustment formula.**

- **Q4/10 Other Canadian Electric Utilities**: Maritime Electric and FortisOntario are in this "other" category. Earnings were down $2M YOY to $5M but **up $3M YOY on a recurring basis**. Increased YOY recurring earnings were driven by a $0.8M earnings contribution from Algoma Power ($nil in Q4/09) and lower finance charges on lower borrowing at a lower average rate. Partially offsetting were 0.7% lower electricity sales due to warmer temperatures. Maritime Electric's 2010 and 2011 ROE is 9.75% on deemed equity of 40%. FortisOntario's 2010 and 2011 ROE is at only 8.01%. The OEB approved Algoma Power's 2011 ROE at 9.85% on 40% deemed equity.
- **Q4/10 Regulated Utilities – Caribbean:** This group owns 59.5% of Caribbean Utilities, 70% of Belize Electricity, and 100% of Fortis Turks and Caicos. Q4/10 **earnings fell $2M YOY** to $5M on a **7% sales decrease YOY** to 270 GWh mainly due to lower average temperatures, $0.5M unfavourable foreign exchange, a depreciation change in Q4/09, and increased legal fees relating to continuing regulatory challenges. See EPS forecast section above for our 2011E/2012E EPS implications.
- **Belize Electricity ("BEL") 2008/2009 rate application:** On June 30, 2008, Fortis rejected a Belize government cut to 70.1%-owned BEL's regulated return to 8.5% from 12%. BEL eventually got 10% but the Government denied $12.6M of retroactive diesel costs incurred for Belize power production net to FTS shareholders. The appeal hearing began in early October 2009, but the Belize trial judge postponed the case for a date still to be determined. In June 2010, the Supreme Court of Belize issued an order prohibiting the PUC from carrying out any rate-setting review proceedings or changing any rates for Belize Electricity until further order of the Supreme Court. The case was heard in October 2010 and closing arguments completed December 2010. A court decision is expected in Q1/11.
- **Q4/10 Fortis Non-Regulated Generation:** YOY earnings were **up $3M YOY to $5M** in Q4/10 due to higher hydro production in and higher prices per MWh in Upper New York State and Ontario.
- **Q4/10 Fortis Properties:** Earnings were up $2M YOY due to lower effective taxes and rent/RevPAR increases that for now more than offset a 170 bp dip in occupancy rates and increased finance charges.
- **Corporate and other:** Overall net corporate and other expenses were down **$1M YOY** to $18M due to higher preferred share dividends that were more than offset by lower finance charges on higher-interest-paying debt that was retired. In April 2010, Terasen redeemed its 8% $125M Capital Securities.
- **Unchanged strong capital expenditures:** Utility capital expenditures will be **$1.2B** in 2011, mostly in B.C. and Alberta. FTS expects 2010-2014 capital expenditures to total $5.5B, unchanged post the Waneta Dam announcement. **Some of the larger projects include:**
  - **$900M** 335 MW Waneta Expansion hydro facility in B.C., of which FTS owns 51%, partnering with Columbia Power Corporation & Columbia Basin Trust (CBC/CBT, 100% owned by the B.C. government). Although non-regulated, the risk of this hydro project is reduced through fixed energy and capacity entitlements. 101 MW of the capacity will be sold to BC Hydro under a long-term PPA with the remaining 234 MW sold to FortisBC. Construction began in fall 2010 and is expected to come into service in 2015.
  - **$210M** (was $200M) liquefied natural gas facility on Vancouver Island, expected to be completed in Q2/11 and in service by late 2011.
  - **$126M** (was $141M) installation of automated meters at FortisAlberta, expected to be completed by the end of Mar. 2011.
  - **$106M** (was $139M) Okanagan Transmission Reinforcement Project at FortisBC, completion expected mid-2011
  - **$110M** Customer Care Enhancement Project at Terasen Gas, expected to be completed in early 2012 (FTS has previously stated Jan. 2012).

- **Financial:** FTS' capital structure at Dec. 31/10 is 58.4% debt, 9.0% preferred equity, and 32.6% common equity, **in line with FTS' targets** and relatively unchanged from Q3/10. In May 2010, S&P confirmed FTS with an A- credit rating with a stable outlook. In June 2010, DBRS confirmed FTS with a BBB (high) but changed the trend to positive from stable citing broad diversification of FTS' asset base. In October 2010, DBRS raised FTS' credit rating to A- Stable. FTS stated it focuses on EPS as its final measure of financial performance.

Definition of Scotia Capital Equity Research Ratings & Risk Rankings

We have a three-tiered rating system, with ratings of 1-Sector Outperform, 2-Sector Perform, and 3-Sector Underperform. Each analyst assigns a rating that is relative to his or her coverage universe.

Our risk ranking system provides transparency as to the underlying financial and operational risk of each stock covered. Statistical and judgmental factors considered are: historical financial results, share price volatility, liquidity of the shares, credit ratings, analyst forecasts, consistency and predictability of earnings, EPS growth, dividends, cash flow from operations, and strength of balance sheet. The Director of Research and the Supervisory Analyst jointly make the final determination of all risk rankings.

The rating assigned to each security covered in this report is based on the Scotia Capital research analyst's 12-month view on the security. Analysts may sometimes express to traders, salespeople and certain clients their shorter-term views on these securities that differ from their 12-month view due to several factors, including but not limited to the inherent volatility of the marketplace.

Ratings

1-Sector Outperform
The stock is expected to outperform the average 12-month total return of the analyst's coverage universe or an index identified by the analyst that includes, but is not limited to, stocks covered by the analyst.

2-Sector Perform
The stock is expected to perform approximately in line with the average 12-month total return of the analyst's coverage universe or an index identified by the analyst that includes, but is not limited to, stocks covered by the analyst.

3-Sector Underperform
The stock is expected to underperform the average 12-month total return of the analyst's coverage universe or an index identified by the analyst that includes, but is not limited to, stocks covered by the analyst.

Other Ratings
Tender – Investors are guided to tender to the terms of the takeover offer.
Under Review – The rating has been temporarily placed under review, until sufficient information has been received and assessed by the analyst.

Risk Rankings

Low
Low financial and operational risk, high predictability of financial results, low stock volatility.

Medium
Moderate financial and operational risk, moderate predictability of financial results, moderate stock volatility.

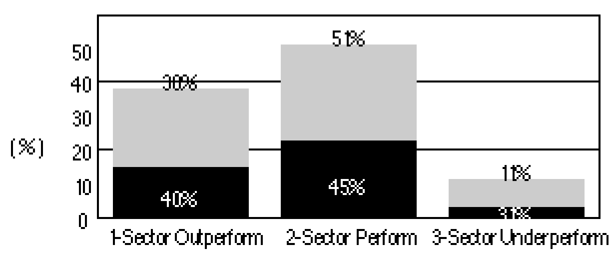
High
High financial and/or operational risk, low predictability of financial results, high stock volatility.

Caution Warranted
Exceptionally high financial and/or operational risk, exceptionally low predictability of financial results, exceptionally high stock volatility. For risk-tolerant investors only.

Venture
Risk and return consistent with Venture Capital. For risk-tolerant investors only.

Scotia Capital Equity Research Ratings Distribution*

Distribution by Ratings and Equity and Equity-Related Financings*



- Percentage of companies covered by Scotia Capital Equity Research within each rating category.
- Percentage of companies within each rating category for which Scotia Capital has undertaken an underwriting liability or has provided advice for a fee within the last 12 months.

* As at January 31, 2011.

Source: Scotia Capital.

For the purposes of the ratings distribution disclosure the NASD requires members who use a ratings system with terms different than "buy," "hold/neutral" and "sell," to equate their own ratings into these categories. Our 1-Sector Outperform, 2-Sector Perform, and 3-Sector Underperform ratings are based on the criteria above, but for this purpose could be equated to buy, neutral and sell ratings, respectively.

General Disclosures

This report has been prepared by analysts who are employed by the Research Department of Scotia Capital™. The Scotia Capital trademark represents the corporate and investment banking businesses of the Scotiabank Group.

Scotia Capital Research produces research reports under a single marketing identity referred to as "Globally-branded research" under U.S. rules. This research is produced on a single global research platform with one set of rules which meet the most stringent standards set by regulators in the various jurisdictions in which the research reports are produced. In addition, the analysts who produce the research reports, regardless of location, are subject to one set of policies designed to meet the most stringent rules established by regulators in the various jurisdictions where the research reports are produced.

This report is provided to you for informational purposes only. This report is not, and is not to be construed as, an offer to sell or solicitation of an offer to buy any securities and/or commodity futures contracts.

The securities mentioned in this report may neither be suitable for all investors nor eligible for sale in some jurisdictions where the report is distributed.

The information and opinions contained herein have been compiled or arrived at from sources believed reliable, however, Scotia Capital makes no representation or warranty, express or implied, as to their accuracy or completeness.

Scotia Capital has policies designed to make best efforts to ensure that the information contained in this report is current as of the date of this report, unless otherwise specified.

Any prices that are stated in this report are for informational purposes only. Scotia Capital makes no representation that any transaction may be or could have been effected at those prices.

Any opinions expressed herein are those of the author(s) and are subject to change without notice and may differ or be contrary from the opinions expressed by other departments of Scotia Capital or any of its affiliates.

Neither Scotia Capital nor its affiliates accepts any liability whatsoever for any direct or consequential loss arising from any use of this report or its contents.

Fortis Luncheon Highlights - Consistent

Event

- We hosted Fortis for an investor lunch yesterday. The investment message was overall consistent with unchanged $5.5B of capital expenditures and a 6% organic rate base/EPS/dividend growth intact.

Implications

- Future 6%/year EPS/dividend growth will be mostly driven by FTS' growing rate base. 80% of the growth will be in Western Canada.
- On potential acquisitions, FTS continues to target mostly U.S. electric utilities that are $1B-$5B in enterprise value. These U.S. utilities tend to have higher regulated equity thickness (45%-50% versus 40% in Canada) and ROE returns (10%-10.5% versus 9%-9.5% in Canada).
- FTS' Belize shareholder issues continue and an appeal is likely but Belize assets only generate 2.5% of earnings. On March 15, FTS announced the Supreme Court of Belize dismissed FTS' appeal.

Recommendation

- We like FTS' low risk and steady growth proposition but view FTS' stock price as high at 20x P/E for 6% EPS growth. EMA dividend is 60 bp higher while TRP's is 80 bp higher with better EPS growth.

Qtly Adj EPS (Basic)	Q1	Q2	Q3	Q4	Year	P/E

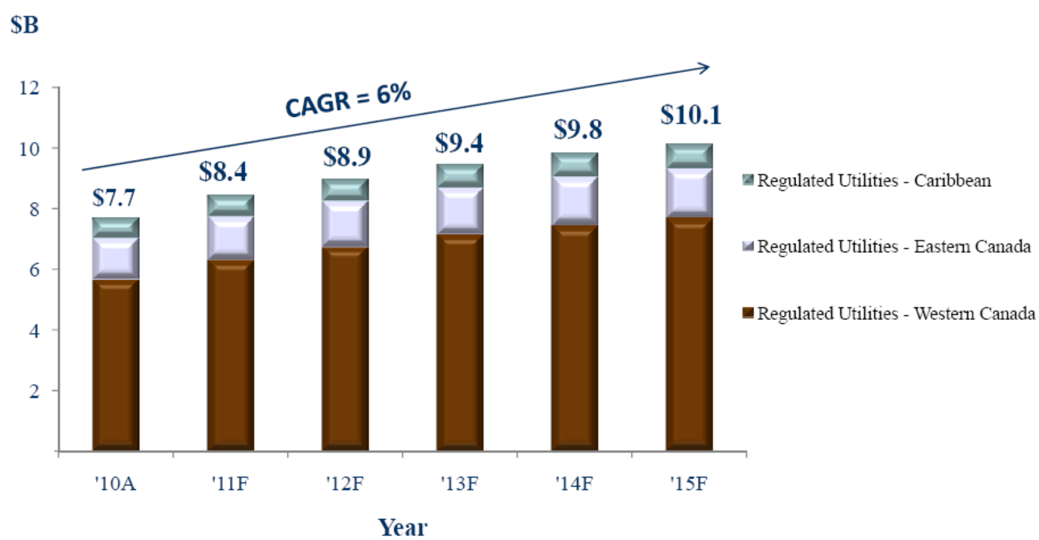
Investor Meeting Highlights

- **Steady 6%/yr dividend growth:** Fortis has grown its dividends per share at 9.3% since 1972 and currently pays out 68% of its earnings with an unofficial 60%-70% targeted range. FTS's payout ratio was closer to 50% prior to buying Terasen Gas so that is why FTS' forecast EPS growth rate will likely match its dividend growth rate going forward. In 2011 FTS inferred its 2011dividend payout will drop to ~65%. FTS' rate base at a 6% CAGR through 2015 will take overall regulated asset rate bases from $7.7B to $10.1B in 2015 (see Exhibit 1). Rate base growth is expected to be mainly driven by growth in FTS' Western Canada division (80%). FTS forecasts its 2011 capex spending at a steady $1.2B, of which $800M comes from Western Canada, including $210M on an LNG Storage Facility on Vancouver Island, expected to be completed in May 2011. The LNG Storage Facility is regulated with a 40% equity thickness and 10% allowed ROE. FTS stated the likelihood of some fixed asset investment in the Kitimat LNG terminal as highly unlikely but observed that buying the Pacific Northern Gas Pipeline would be more logical but currently too expensive.

Exhibit 1 - Mid-Year Rate Base Projections



Source: Company reports.

- **Belize update: FTS continues to have problems in Belize** following the 2008 Annual Tariff Review Proceeding that disallowed FTS a valid increase in rates to pay for valid fuel costs incurred to make power on behalf of Belize residents. On March 15, FTS announced the Supreme Court of Belize dismissed FTS' appeal. There are two more courts to appeal to if FTS chooses (Belize Appeals Court and then a Caribbean court based in Trinidad). FTS does not expect any resolution prospect until the final appeal is made. FTS noted its **Belize assets are relatively immaterial** at less than 2% of total assets while Belize earnings are ~2.5% overall.
- **On potential acquisitions, FTS continues to target mostly U.S. electric utilities** (lack of Canadian regulated targets) that are $1B-$5B in enterprise value. Traditionally, the U.S. electric utility industry benefits from higher equity thickness (45%-50% or 52%-53% with generation) and ROE returns (10%-10.5%) relative to Canada. These relatively higher returns (vs. Canada) are partially/mostly offset by a greater regulatory lag on rate hike request approvals. This can vary greatly among the 50 states so FTS is careful when assessing targets as the regulatory construct can be the greatest investment variable. Also, FTS does not

believe in paying more than 30% premium over regulated book values as at that level, most takeovers of regulated assets would not be accretive.

- **On wind:** FTS is not a supporter of investing in wind development/acquisitions as FTS had a bad experience with an Alberta wind farm (Crowley) in the past. FTS also does not like wind power's reliance on government tax incentives but would consider wind developments/acquisitions within a regulatory rate base as EMA has in N.S.
- **On Waneta:** FTS gave more colour on its pro-forma investment (51% of $900M) in the Waneta dam for 2015. FTS hopes to earn 12%-13% ROE on a 35%-40% equity thickness to compensate for taking financing and construction cost risks.

Definition of Scotia Capital Equity Research Ratings & Risk Rankings

We have a three-tiered rating system, with ratings of 1-Sector Outperform, 2-Sector Perform, and 3-Sector Underperform. Each analyst assigns a rating that is relative to his or her coverage universe.

Our risk ranking system provides transparency as to the underlying financial and operational risk of each stock covered. Statistical and judgmental factors considered are: historical financial results, share price volatility, liquidity of the shares, credit ratings, analyst forecasts, consistency and predictability of earnings, EPS growth, dividends, cash flow from operations, and strength of balance sheet. The Director of Research and the Supervisory Analyst jointly make the final determination of all risk rankings.

The rating assigned to each security covered in this report is based on the Scotia Capital research analyst's 12-month view on the security. Analysts may sometimes express to traders, salespeople and certain clients their shorter-term views on these securities that differ from their 12-month view due to several factors, including but not limited to the inherent volatility of the marketplace.

Ratings

1-Sector Outperform
The stock is expected to outperform the average 12-month total return of the analyst's coverage universe or an index identified by the analyst that includes, but is not limited to, stocks covered by the analyst.

2-Sector Perform
The stock is expected to perform approximately in line with the average 12-month total return of the analyst's coverage universe or an index identified by the analyst that includes, but is not limited to, stocks covered by the analyst.

3-Sector Underperform
The stock is expected to underperform the average 12-month total return of the analyst's coverage universe or an index identified by the analyst that includes, but is not limited to, stocks covered by the analyst.

Other Ratings
Tender – Investors are guided to tender to the terms of the takeover offer.
Under Review – The rating has been temporarily placed under review, until sufficient information has been received and assessed by the analyst.

Risk Rankings

Low
Low financial and operational risk, high predictability of financial results, low stock volatility.

Medium
Moderate financial and operational risk, moderate predictability of financial results, moderate stock volatility.

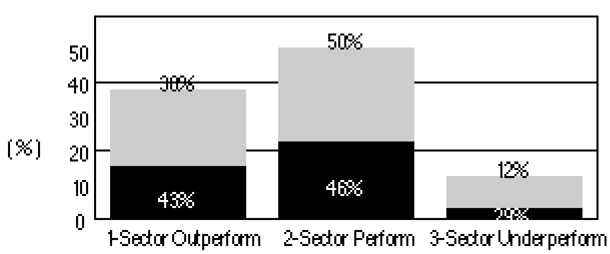
High
High financial and/or operational risk, low predictability of financial results, high stock volatility.

Caution Warranted
Exceptionally high financial and/or operational risk, exceptionally low predictability of financial results, exceptionally high stock volatility. For risk-tolerant investors only.

Venture
Risk and return consistent with Venture Capital. For risk-tolerant investors only.

Scotia Capital Equity Research Ratings Distribution*

Distribution by Ratings and Equity and Equity-Related Financings*



- Percentage of companies covered by Scotia Capital Equity Research within each rating category.
- Percentage of companies within each rating category for which Scotia Capital has undertaken an underwriting liability or has provided advice for a fee within the last 12 months.

* As at February 28, 2011.

Source: Scotia Capital.

For the purposes of the ratings distribution disclosure the NASD requires members who use a ratings system with terms different than "buy," "hold/neutral" and "sell," to equate their own ratings into these categories. Our 1-Sector Outperform, 2-Sector Perform, and 3-Sector Underperform ratings are based on the criteria above, but for this purpose could be equated to buy, neutral and sell ratings, respectively.

General Disclosures

This report has been prepared by analysts who are employed by the Research Department of Scotia Capital™. The Scotia Capital trademark represents the corporate and investment banking businesses of the Scotiabank Group.

Scotia Capital Research produces research reports under a single marketing identity referred to as "Globally-branded research" under U.S. rules. This research is produced on a single global research platform with one set of rules which meet the most stringent standards set by regulators in the various jurisdictions in which the research reports are produced. In addition, the analysts who produce the research reports, regardless of location, are subject to one set of policies designed to meet the most stringent rules established by regulators in the various jurisdictions where the research reports are produced.

Q1/11 EPS Mildly Beats Our Estimates/Street

Event

- FTS reported Q1/11 EPS of $0.67/sh or $0.65 recurring that mildly beat our estimate and the Street at $0.62 ($0.59-$0.64). FTS' electric utilities and strong demand benefitted from colder YOY conditions in W. Cda.

Implications

- Q1/11 EPS was mild beat at $0.65 adjusted. This offset Q4/10's mild miss on lower temperatures at FTS's Caribbean operations and higher-than-expected Q4 O&M costs. Strong Q1/11 electric utilities earnings of $53M were up $13M YOY on higher rate bases, cooler weather, and strong demand.
- FTS' 2011E-15E capital budget remains unchanged at $5.5B as does its 6%/year organic EPS/dividend growth. Most 2011 regulatory allowed ROE levels remain flat with 2010.
- We decided to maintain all our 2011/12 EPS forecasts and valuation parameters.

Recommendation

- Our current rank energy utilities/IPP/Pipe order is TRP and ATCO (1-SO), Emera, CPX, CU and Enbridge, followed by Fortis. Relative stock performances have however, tightened this group considerably with Q1/11 FTS stock price performance the poorest in the group.

Q1/11 EPS/2011E/2012E EPS Forecasts/Stock & Sector Valuation

- **Fortis reported Q1/11 EPS** of $0.67 ($0.58 in Q1/10), recurring at $0.65, moderately beating our estimate at $0.62 and the Street at $0.62 rounded ($0.59-$0.64). The mild Q1/11 EPS beat vs. our expectations was due to FortisBC Electric's and FortisAlberta's higher energy sales due partly to colder weather. The timing of revenue recognition in Q1/10 vs. Q1/11 was also a factor as well as higher Belize non-regulated hydroelectric generation. See Exhibit 1 for Fortis' EPS contribution by segment.

Exhibit 1 - Fortis' EPS Contribution by Segment

Source: Company reports; Scotia Capital estimates.

- **2011E/2012E EPS forecasts unchanged:** We conservatively decided to maintain all our 2011/12 EPS estimates and valuation parameters as is. Fortis beat our expectations after adjusting for non-recurring items partially due to colder weather. Therefore we left our 2011E/2012E EPS unchanged at $1.76/$1.85.
- **Sector valuation:** We cut our energy utilities recommendation from market weight in mid-December 2010 to underweight in late January 2011 due to better-than-expected U.S. and Canadian economic data, higher 2011-12 GDP and higher interest rate forecasts. Long 10-year government bond interest rates had backed up 80 and 130 basis points in Canada and the U.S., respectively from their October 2010 bottoms. While our economists still forecast 4% 10-year Canada rates by Q4/12, we use 3.6% forecast 10-year Canada rates to help set our Q1/11 one-year-out stock price targets versus 3.1% as of yesterday. Our bias is to move up to market weight again at the moment due to softer U.S. and Canadian economic growth data.
- **FTS US acquisition targets unchanged:** Last year, PPL won over a consortium that included Fortis' bid to buy E.ON's U.S. regulated utility assets for US$6.7B. **Fortis' CEO previously guided to looking at US$3B-$4B regulated utility acquisitions.** In its Q1/11 release, FTS stated it **continues to pursue acquisitions** of regulated electric and natural gas utilities in the United States and Canada. We respect FTS' track record for making value added acquisitions but **do not put any premium in our FTS P/E multiple or earnings** until we see what transpires, if anything.

Segmented Q1/11 Results

- **Q1/11 FortisBC Energy Companies (former Terasen Gas):** Reported earnings of $76M in Q1/11 were up 4% YOY due to: (1) higher rate base from continuous investment in utility capital assets, (2) lower earnings in Q1/10 from the timing of recording Q1/10 profits in Q3/10, and (3) lower depreciation expense due to retirement of some plant assets in late 2010. There was also unfavourable timing of increase in operating expenses, driven by higher labour costs. Net customer additions decreased 12% YOY to 1,373 in Q1/11 vs. 1,566 in Q1/10. FortisBC (former TerasenGas) is comprised of FEI (former TGI) (i.e., Vancouver), FEVI (former TGVI) (i.e., Vancouver Island), and FEWI (former TGWI) (i.e., Whistler area). FEI's allowed 2011 ROE is 9.5% on a deemed equity of 40%, **flat YOY.** FEVI's allowed ROE for 2011 is 10% on a deemed equity of 40% (see Exhibit 2), also **flat YOY.**
- **Q1/11 FortisAlberta:** Reported earnings were up $7M YOY to $21M due to (1) continued investment into utility capital assets and higher energy deliveries, (2) one time $1M gain on the sale of property ($0.01/share non recurring), and (3) the timing of revenue recording in Q1/10. **Power deliveries rose 7% YOY to 4,402 GWh**, due to increased oil & gas activities driving an increased customer base and higher deliveries with cooler winter temperatures. The client base increased by 10,800 QOQ. **Revenue for Q1/10** included only a 7.5% interim customer rate increase, **while Q1/11 revenues reflect the final approved 20.1% impact of the 2010 rate increase.**
- **Q1/11 FortisBC Electric:** Reported Q1/11 net earnings of $19M were up $5M from Q1/10 due to (1) a 10.4% increase in electricity sales, (2) 6.6% increase in customer electricity rates effective January 1, 2011, and (3) higher cost of capital, 2.9% increase in rate base as of September 1, 2010 (flow through of increased power costs). FortisBC's allowed 2011 ROE is 9.9%, **on an unchanged equity thickness of 40%, flat YOY.**
- **Q1/11 Newfoundland Power:** Earnings were **flat YOY.** Electricity sales went up by 2% YOY, offset by a lower ROE in 2011 (2010's 9% vs. 2011's 8.38%), higher maintenance, and labour costs.

- **Q1/11 Other Canadian Electric Utilities**: Maritime Electric and FortisOntario are in this "other" category. Earnings were **up $1M YOY to $6M**. Increased YOY earnings were driven by increased allowed ROE at Algoma Power to 9.85% from 8.57%. Electric sales increased by 3.5% due to colder weather. Maritime Electric's 2010 and 2011 ROE is 9.75% on deemed equity of 40%. FortisOntario OEB Canadian Niagara Power's 2010 and 2011 ROE is at only 8.01%.
- **Q1/11 Regulated Utilities - Caribbean:** This group owns 59.5% of Caribbean Utilities, 70% of Belize Electricity, and 100% of Fortis Turks and Caicos. Q1/11 **earnings were flat YOY** at $4M. Earnings from slightly higher Grand Cayman electricity sales ($1M increase form $256M YOY) were fully offset by higher provision for Belize Electricity bad debts and high interest expenses on regulatory liabilities.
- **Belize Electricity ("BEL") 2008/2009 rate application:** On June 30, 2008, Fortis rejected a Belize government cut to 70.1%-owned BEL's regulated return to 8.5% from 12%. BEL eventually got 10% but the Government denied $12.6M of retroactive diesel costs incurred for Belize power production net to FTS shareholders. The appeal hearing began in early October 2009, but the Belize trial judge postponed the case for a date still to be determined. In June 2010 the Supreme Court of Belize issued an order prohibiting the PUC from carrying out any rate-setting review proceedings or changing any rates for Belize Electricity until further order of the Supreme Court. The case was heard in October 2010 and closing arguments completed December 2010. **In March 2011, the Supreme Court of Belize dismissed the Belize Electricity's appeal.** Currently Fortis is in the process of filing an appeal and has filed an application to restrain the regulator from any rate action, pending the hearing of the appeal.
- **Q1/11 Fortis Non-Regulated Generation:** YOY earnings were **up $1M YOY to $3M** in Q1/11 due to higher hydro production in Belize.
- **Q1/11 Fortis Properties:** Earnings **decreased by $1M YOY** to $1M due to a lower average occupancy rate of 94.3% (Q1/10 rate 95.8%) and higher amortization costs because of the higher investments in Hospitality and Real Estate Divisions. The loss was partially offset by $0.5M gain resulting from the sale of the Viking Mall in Newfoundland.
- **Corporate and other expenses:** Overall net corporate and other expenses were down **$1M YOY** to $20M due to lower operating expenses, and lower finance charges related to $125M 8% Capital Securities, redeemed April 2010, offset by higher preference share dividends due to the issuance of First Preference Shares, Series H in January 2010.
- **Unchanged strong capital expenditures:** Expected utility capital expenditures remain at **$1.2B** in 2011, mostly in B.C. and Alberta. FTS expects 2011-15 capital expenditures will be $5.5B, unchanged, with 63% to be incurred at the regulated electric utilities, 20% at the regulated gas utilities, and 17% at the non regulated operations. **Some of the larger projects include:**
    - **$900M** 335 MW Waneta Expansion hydro facility in B.C. of which FTS owns 51%, partnering with Columbia Power Corporation & Columbia Basin Trust (CBC/CBT, 100% owned by the B.C. government). Although non-regulated, the risk of this hydro project is reduced through fixed energy and capacity entitlements. 101 MW of the capacity will be sold to BC Hydro under a long-term PPA with the remaining 234 MW sold to FortisBC. Construction began in fall/10 and is expected to come into service in spring 2015.
    - **$214M** (was $210M) liquefied natural gas facility on Vancouver Island, expected to be completed in the next several weeks and in service by January 2012.
    - **$126M** installation of automated meters at FortisAlberta was substantially completed as of March 2011.
    - **$106M** Okanagan Transmission Reinforcement Project at FortisBC, completion expected mid-2011.
    - **$110M** Customer Care Enhancement Project at FortisBC, expected to be completed by January 2012.
    - **$50M** 12-store office building in St. John's Newfoundland is expected to be completed in 2013. The project is subject to municipal government approval.

- **Financial:** FTS' capital structure at 3/31/11 is 57.5% debt, 9.0% preferred equity, and 33.5% common equity, **in line with FTS' targets except for certain debt at Belize Electricity and the Exploits River Hydro Partnership,** and relatively unchanged from Q4/10. In May 2010 S&P confirmed FTS with an A- credit rating with a stable outlook. In October/10, DBRS raised FTS' credit rating to A (low) Stable. FTS stated it focuses on EPS as its final measure of financial performance.

Definition of Scotia Capital Equity Research Ratings & Risk Rankings

We have a three-tiered rating system, with ratings of 1-Sector Outperform, 2-Sector Perform, and 3-Sector Underperform. Each analyst assigns a rating that is relative to his or her coverage universe.

Our risk ranking system provides transparency as to the underlying financial and operational risk of each stock covered. Statistical and judgmental factors considered are: historical financial results, share price volatility, liquidity of the shares, credit ratings, analyst forecasts, consistency and predictability of earnings, EPS growth, dividends, cash flow from operations, and strength of balance sheet. The Director of Research and the Supervisory Analyst jointly make the final determination of all risk rankings.

The rating assigned to each security covered in this report is based on the Scotia Capital research analyst's 12-month view on the security. Analysts may sometimes express to traders, salespeople and certain clients their shorter-term views on these securities that differ from their 12-month view due to several factors, including but not limited to the inherent volatility of the marketplace.

Ratings

1-Sector Outperform

The stock is expected to outperform the average 12-month total return of the analyst's coverage universe or an index identified by the analyst that includes, but is not limited to, stocks covered by the analyst.

2-Sector Perform

The stock is expected to perform approximately in line with the average 12-month total return of the analyst's coverage universe or an index identified by the analyst that includes, but is not limited to, stocks covered by the analyst.

3-Sector Underperform

The stock is expected to underperform the average 12-month total return of the analyst's coverage universe or an index identified by the analyst that includes, but is not limited to, stocks covered by the analyst.

Other Ratings

Tender – Investors are guided to tender to the terms of the takeover offer.

Under Review – The rating has been temporarily placed under review, until sufficient information has been received and assessed by the analyst.

Risk Rankings

Low

Low financial and operational risk, high predictability of financial results, low stock volatility.

Medium

Moderate financial and operational risk, moderate predictability of financial results, moderate stock volatility.

High

High financial and/or operational risk, low predictability of financial results, high stock volatility.

Caution Warranted

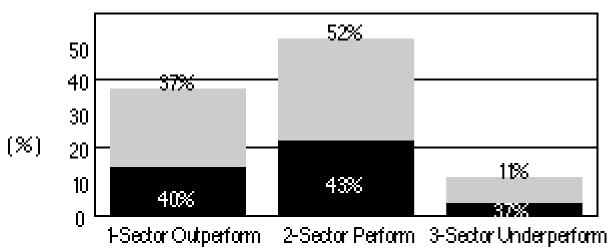
Exceptionally high financial and/or operational risk, exceptionally low predictability of financial results, exceptionally high stock volatility. For risk-tolerant investors only.

Venture

Risk and return consistent with Venture Capital. For risk-tolerant investors only.

Scotia Capital Equity Research Ratings Distribution*

Distribution by Ratings and Equity and Equity-Related Financings*



* As at April 30, 2011.

■ (grey) Percentage of companies covered by Scotia Capital Equity Research within each rating category.

■ Percentage of companies within each rating category for which Scotia Capital has undertaken an underwriting liability or has provided advice for a fee within the last 12 months.

For the purposes of the ratings distribution disclosure the NASD requires members who use a ratings system with terms different than "buy," "hold/neutral" and "sell," to equate their own ratings into these categories. Our 1-Sector Outperform, 2-Sector Perform, and 3-Sector Underperform ratings are based on the criteria above, but for this purpose could be equated to buy, neutral and sell ratings, respectively.

General Disclosures

This report has been prepared by analysts who are employed by the Research Department of Scotia Capital™. The Scotia Capital trademark represents the corporate and investment banking businesses of the Scotiabank Group.

Scotia Capital Research produces research reports under a single marketing identity referred to as "Globally-branded research" under U.S. rules. This research is produced on a single global research platform with one set of rules which meet the most stringent standards set by regulators in the various jurisdictions in which the research reports are produced. In addition, the analysts who produce the research reports, regardless of location, are subject to one set of policies designed to meet the most stringent rules established by regulators in the various jurisdictions where the research reports are produced.

This report is provided to you for informational purposes only. This report is not, and is not to be construed as, an offer to sell or solicitation of an offer to buy any securities and/or commodity futures contracts.

The securities mentioned in this report may neither be suitable for all investors nor eligible for sale in some jurisdictions where the report is distributed.

The information and opinions contained herein have been compiled or arrived at from sources believed reliable, however, Scotia Capital makes no representation or warranty, express or implied, as to their accuracy or completeness.

Scotia Capital has policies designed to make best efforts to ensure that the information contained in this report is current as of the date of this report, unless otherwise specified.

Any prices that are stated in this report are for informational purposes only. Scotia Capital makes no representation that any transaction may be or could have been effected at those prices.

Any opinions expressed herein are those of the author(s) and are subject to change without notice and may differ or be contrary from the opinions expressed by other departments of Scotia Capital or any of its affiliates.

Neither Scotia Capital nor its affiliates accepts any liability whatsoever for any direct or consequential loss arising from any use of this report or its contents.

Equity research reports published by Scotia Capital are available electronically via: Bloomberg, Thomson Financial/First Call - Research Direct, Reuters, Capital IQ, and FactSet. Institutional clients with questions regarding distribution of equity research should contact us at 1-800-208-7666.

Additional Disclosures

Canada: This report is distributed by Scotia Capital Inc., a subsidiary of the Bank of Nova Scotia. Scotia Capital Inc. is a member of CIPF.

Mexico: This report is distributed by Scotia Inverlat Casa de Bolsa S.A. de C.V., a subsidiary of the Bank of Nova Scotia.

United Kingdom and the rest of Europe: Except as otherwise specified herein, this report is distributed by Scotia Capital (Europe) Limited, a subsidiary of the Bank of Nova Scotia. Scotia Capital (Europe) Limited is authorized and regulated by the Financial Services Authority (FSA). Scotia Capital (Europe) Limited research complies with all the FSA requirements and laws concerning disclosures and these are indicated on the research where applicable. Scotia Capital Inc. is regulated by the FSA for the conduct of investment business in the UK.

United States: This report is distributed by Scotia Capital (USA) Inc., a subsidiary of Scotia Capital Inc., and a registered U.S. broker-dealer. All transactions by a U.S. investor of securities mentioned in this report must be effected through Scotia Capital (USA) Inc.

Non-U.S. investors wishing to effect a transaction in the securities discussed in this report should contact a Scotia Capital entity in their local jurisdiction unless governing law permits otherwise.

Key Risks to Target: Interest rates; Rate base growth; Regulated ROE; Acquisitions; Regulatory

Regulated Reliability

Event

- FTS reported Q3/11 results. Adjusted EPS was $0.25 (prior year $0.26), in line with our estimate of $0.24.

Implications

- The Q3 result demonstrates that business risk at FTS has declined since the relatively rocky events of the summer (Belize, Vermont). With the reduction in earnings from Caribbean and unregulated businesses, and growth in regulated Canadian utility, almost 90% of future earnings are expected to derive from low-volatility and mostly regulated sources.
- Any remaining risk relates primarily to changes in allowed Canadian returns for regulated utilities. We see potential for modest reductions, but are hopeful there will be no major adjustments.
- Acquisitions of U.S. utilities are still possible despite challenges in Vermont this past summer. Like other Canadian infrastructure, FTS maintains its cost of capital advantage and potential for accretive deals.

Recommendation

- Though earnings were in line and there are no changes to our estimates, the company's improved risk profile may attract a modestly higher valuation. We are raising our one-year target price by $1 to $35 and remain comfortable recommending investors hold the stock at these levels.

NEB 2012 Benchmark ROE Drags New Lows

Event

- The National Energy Board (NEB) yesterday released a 7.58% 2012 benchmark ROE for certain long-haul pipelines.

Implications

- The NEB benchmark does not apply to FTS (nor even to most Canadian pipelines any more) but establishes challenging optics going into the 2012 B.C. Utilities Commission (BCUC) hearing on cost of capital.
- As we wrote last week, the allowed ROE in B.C. is susceptible to a reduction as it sits at 9.5% - 10.15% depending on the asset.
- The NEB benchmark is only one data point and we are not suggesting the BCUC is going to 7.58%. Ontario's ROE is above 9% and comparable U.S. utility investments attract similar returns.
- Nevertheless, consumer advocates will no doubt highlight the NEB benchmark during the hearing process and it could influence the BCUC's decision.

Recommendation

- As highlighted in our Dec. 1 comment, FTS faces a risk to 2013 earnings. Our estimate reflects a 100 basis point reduction in the B.C. allowed ROE (every 100 basis points is about $0.11 in EPS). The stock could remain in a rut pending resolution of the matter.

Definition of Scotia Capital Equity Research Ratings & Risk Rankings

We have a three-tiered rating system, with ratings of 1-Sector Outperform, 2-Sector Perform, and 3-Sector Underperform. Each analyst assigns a rating that is relative to his or her coverage universe or an index identified by the analyst that includes, but is not limited to, stocks covered by the analyst.

Our risk ranking system provides transparency as to the underlying financial and operational risk of each stock covered. Statistical and judgmental factors considered are: historical financial results, share price volatility, liquidity of the shares, credit ratings, analyst forecasts, consistency and predictability of earnings, EPS growth, dividends, cash flow from operations, and strength of balance sheet. The Director of Research and the Supervisory Analyst jointly make the final determination of all risk rankings.

The rating assigned to each security covered in this report is based on the Scotia Capital research analyst's 12-month view on the security. Analysts may sometimes express to traders, salespeople and certain clients their shorter-term views on these securities that differ from their 12-month view due to several factors, including but not limited to the inherent volatility of the marketplace.

Ratings

1-Sector Outperform
The stock is expected to outperform the average 12-month total return of the analyst's coverage universe or an index identified by the analyst that includes, but is not limited to, stocks covered by the analyst.

2-Sector Perform
The stock is expected to perform approximately in line with the average 12-month total return of the analyst's coverage universe or an index identified by the analyst that includes, but is not limited to, stocks covered by the analyst.

3-Sector Underperform
The stock is expected to underperform the average 12-month total return of the analyst's coverage universe or an index identified by the analyst that includes, but is not limited to, stocks covered by the analyst.

Other Ratings
Tender – Investors are guided to tender to the terms of the takeover offer.
Under Review – The rating has been temporarily placed under review, until sufficient information has been received and assessed by the analyst.

Risk Rankings

Low
Low financial and operational risk, high predictability of financial results, low stock volatility.

Medium
Moderate financial and operational risk, moderate predictability of financial results, moderate stock volatility.

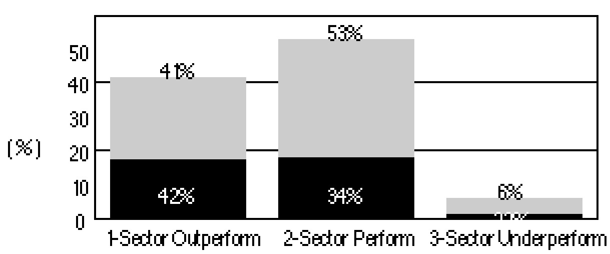
High
High financial and/or operational risk, low predictability of financial results, high stock volatility.

Caution Warranted
Exceptionally high financial and/or operational risk, exceptionally low predictability of financial results, exceptionally high stock volatility. For risk-tolerant investors only.

Venture
Risk and return consistent with Venture Capital. For risk-tolerant investors only.

Scotia Capital Equity Research Ratings Distribution*

Distribution by Ratings and Equity and Equity-Related Financings*



- Percentage of companies covered by Scotia Capital Equity Research within each rating category.
- Percentage of companies within each rating category for which Scotia Capital has undertaken an underwriting liability or has provided advice for a fee within the last 12 months.

* As at November 30, 2011.

Source: Scotia Capital.

For the purposes of the ratings distribution disclosure the NASD requires members who use a ratings system with terms different than "buy," "hold/neutral" and "sell," to equate their own ratings into these categories. Our 1-Sector Outperform, 2-Sector Perform, and 3-Sector Underperform ratings are based on the criteria above, but for this purpose could be equated to buy, neutral and sell ratings, respectively.

General Disclosures

This report has been prepared by analysts who are employed by the Research Department of Scotia Capital™. The Scotia Capital trademark represents the corporate and investment banking businesses of the Scotiabank Group.

All other trademarks are acknowledged as belonging to their respective owners and the display of such trademarks is for informational use only.

Scotia Capital Research produces research reports under a single marketing identity referred to as "Globally-branded research" under U.S. rules. This research is produced on a single global research platform with one set of rules which meet the most stringent standards set by regulators in the various jurisdictions in which the research reports are produced. In addition, the analysts who produce the research reports, regardless of location, are subject to one set of policies designed to meet the most stringent rules established by regulators in the various jurisdictions where the research reports are produced.

This report is provided to you for informational purposes only. This report is not, and is not to be construed as, an offer to sell or solicitation of an offer to buy any securities and/or commodity futures contracts.

The securities mentioned in this report may neither be suitable for all investors nor eligible for sale in some jurisdictions where the report is distributed.

The information and opinions contained herein have been compiled or arrived at from sources believed reliable, however, Scotia Capital makes no representation or warranty, express or implied, as to their accuracy or completeness.

Churning Through a Soft Patch

Event

- FTS reported Q4/11 EPS of $0.46 vs. $0.49 in Q4/10 (our est. - $0.45).

Implications

- Though full-year earnings were up, FTS growth is at least for now not what it used to be. Normalized 2011 EPS was $1.69 vs. $1.65 in 2010.
- The soft patch may continue for another year or two due to several factors including downward pressure on allowed ROEs, weak economic conditions in the Caribbean, and dilution from the 2011 equity issue.
- In particular, we remain concerned about the B.C. cost of capital review. The utilities commission has provided no update on a schedule but has stated an intention to hold a hearing "early in 2012."
- Goods news is regulated utility investments continue at a rapid pace, with a $1.3B capital budget for this year. Given balance sheet strength due to recent equity issuance, growth should offset ROE compression.

Recommendation

- Holding FTS shares may not hurt in 2012, but we see little potential for near-term capital appreciation. Despite an attractive investment program, the B.C. ROE proceeding casts uncertainty over earnings growth prospects and the stock is not cheap (free cash yield of 7.3% vs. group at 8.7%). We maintain our 2-SP rating and $34 one-year target.

Definition of Scotiabank, Global Banking and Markets Equity Research Ratings & Risk Rankings

We have a three-tiered rating system, with ratings of 1-Sector Outperform, 2-Sector Perform, and 3-Sector Underperform. Each analyst assigns a rating that is relative to his or her coverage universe or an index identified by the analyst that includes, but is not limited to, stocks covered by the analyst.

Our risk ranking system provides transparency as to the underlying financial and operational risk of each stock covered. Statistical and judgmental factors considered are: historical financial results, share price volatility, liquidity of the shares, credit ratings, analyst forecasts, consistency and predictability of earnings, EPS growth, dividends, cash flow from operations, and strength of balance sheet. The Director of Research and the Supervisory Analyst jointly make the final determination of all risk rankings.

The rating assigned to each security covered in this report is based on the Scotiabank, Global Banking and Markets research analyst's 12-month view on the security. Analysts may sometimes express to traders, salespeople and certain clients their shorter-term views on these securities that differ from their 12-month view due to several factors, including but not limited to the inherent volatility of the marketplace.

Ratings

1-Sector Outperform
The stock is expected to outperform the average 12-month total return of the analyst's coverage universe or an index identified by the analyst that includes, but is not limited to, stocks covered by the analyst.

2-Sector Perform
The stock is expected to perform approximately in line with the average 12-month total return of the analyst's coverage universe or an index identified by the analyst that includes, but is not limited to, stocks covered by the analyst.

3-Sector Underperform
The stock is expected to underperform the average 12-month total return of the analyst's coverage universe or an index identified by the analyst that includes, but is not limited to, stocks covered by the analyst.

Other Ratings
Tender – Investors are guided to tender to the terms of the takeover offer.
Under Review – The rating has been temporarily placed under review, until sufficient information has been received and assessed by the analyst.

Risk Rankings

Low
Low financial and operational risk, high predictability of financial results, low stock volatility.

Medium
Moderate financial and operational risk, moderate predictability of financial results, moderate stock volatility.

High
High financial and/or operational risk, low predictability of financial results, high stock volatility.

Caution Warranted

For the purposes of the ratings distribution disclosure the NASD requires members who use a ratings system with terms different than "buy," "hold/neutral" and "sell," to equate their own ratings into these categories. Our 1-Sector Outperform, 2-Sector Perform, and 3-Sector Underperform ratings are based on the criteria above, but for this purpose could be equated to buy, neutral and sell ratings, respectively.

General Disclosures

This report has been prepared by analysts who are employed by the Research Department of Scotiabank, Global Banking and Markets. Scotiabank, together with "Global Banking and Markets", is a marketing name for the global corporate and investment banking and capital markets businesses of The Bank of Nova Scotia and certain of its affiliates in the countries where they operate, including Scotia Capital Inc.

CH Energy - It's a Start

Event

- FTS announced an agreement to acquire CH Energy Group (CHG-NYSE) for US$1.5B in cash and assumed debt.

Implications

- The CH Energy acquisition, in our view, is a logical starting point for FTS in its quest for U.S. utility growth. The asset is consistent with the FTS geography, business profile, and risk profile.
- However, the transaction is not in itself a means to any end. We see the proposed valuation as relatively high in comparison to recent historical utility acquisitions by Canadian companies. Furthermore, there are regulatory and other risks in the year-long closing process.
- In the medium term, further growth opportunities may arise from the deal. CH is growing at about 5%, and contiguous regulated utilities may come for sale as European conglomerates shed non-core assets.

Recommendation

- The deal's short-term value remains uncertain due to transaction price and regulatory uncertainty. Meanwhile, earnings growth will likely be modest considering the potential for erosion of allowed ROEs in British Columbia. For these reasons, we still see the stock as range-bound in 2012 and maintain our 2-SP rating and $34 one-year price target.

CH Energy - It's a Start

- Acquiring an almost fully regulated distribution utility in rural and small-town New York sounds like a dull prospect. Unless, of course, your business is running regulated distribution utilities in rural areas and small towns. And so, for FTS, the proposed US$1.5B acquisition of CH Energy Group is not dull. On the contrary, it is the potential start of a broader U.S. growth initiative.
- The acquisition appears logical for FTS due to its consistency with the existing business. FTS had its start in running northeast electrical utilities with no generation assets, and CH Energy fits this bill with about 80% of its customers in electrical service and the rest in natural gas service. The target company fits the FTS low-risk profile, as it takes no commodity price risk and maintains variance accounts for potential expenditures on items like environmental remediation and pension benefits.
- But CH Energy is not in itself a means to an end for FTS because it is not meaningfully accretive at the proposed transaction price. Our preliminary analysis suggests FTS is proposing to pay about 1.5x closing rate base, 20.6x P/E, and 10.4x EBITDA[1]. These acquisition multiples sit toward the high end of the range for recent utility acquisitions by Canadian companies.

Exhibit 1 - Recent Utility Acquisitions by Canadian Companies

Announced Date	Target	Acquirer	EV ($M)	Rate Base	Rate Base Multiple	Regulated Book Equity Multiple	Effective ROE
6/23/2011	Central Vermont Public Service	Gaz Metro	US$702	US$426	1.6x	2.1x	4.4%
2/21/2012	CH Energy Group	Fortis	US$1,443	US$957	1.5x	2.1x	4.9%
9/15/2003	Aquila Canada	Fortis	C$1,394	C$943	1.5x	2.2x	4.4%

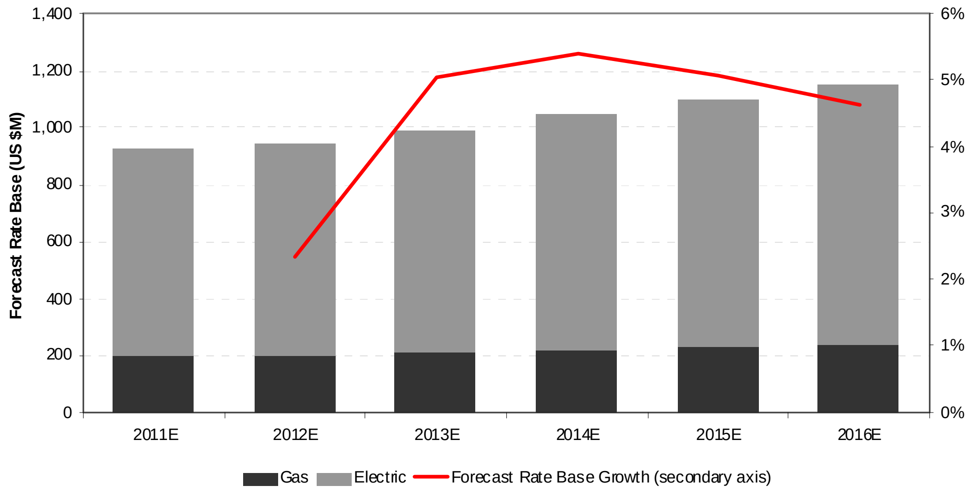
Source: Company reports; Scotiabank GBM estimates.

- There is no way for FTS to make up the premium, as there are no meaningful synergies available in the FTS decentralized operating model. Moreover, there is still some chance FTS has to raise its bid and/or that there is some rate reduction or mitigation required in the regulatory approval process. Finally, we believe appropriate long-term financing involves \$400M-\$500M of new equity. As a result, there are no changes to our 2013 EPS estimates (deal forecast to close in 1H/13).
- Companies can add shareholder value in the acquisition of regulated utilities even when they pay sizeable premiums, but generally only if there is significant organic growth. FTS grows EPS building utility assets at book value because its cost of capital is generally below the regulated returns (10% in the case of CH Energy). That is how FTS added value in the acquisition of Aquila, which was done at 1.6x rate base. The target in this case does not have the double-digit organic growth profile of Aquila, but it is not absent organic growth either. It appears the rate base grows at about 5%/year.

[1] *P/E based on trailing 2011 adjusted EPS as disclosed by CHG and EV/EBITDA from a CHG press release.*

Exhibit 2 - Central Hudson Gas & Electric Projected Rate Base Growth



Source: Company reports; Scotiabank GBM estimates.

- Contiguous acquisitions are another potential area for value-add going forward. The large utility owners in NY State (other than ConEd) are National Grid and Iberdrola, both of whom have been sellers of small non-core utility assets in recent years as they struggle with European operations and sub-par returns. On this basis, opportunities may emerge for FTS. Having said that, it appears the U.S. Northeast is still core to both European utility conglomerates - National Grid has 6.4 m customers and Iberdrola has 2.4 m customers in the region (not to mention transmission assets).
- The proposed CH Energy Group acquisition is a logical starting point for FTS in its U.S. acquisition strategy. Still, we see the stock as range-bound in 2012 for several reasons. The deal is not meaningfully accretive on its own and the regulatory approval process is lengthy and uncertain. Meanwhile, earnings growth will likely be modest considering the potential for erosion of allowed ROEs in British Columbia.
- We suggest monitoring progress on the CH Energy acquisition and potential follow-on transactions that may add shareholder value. FTS is a skilled operator and CH Energy could be the start of a more lucrative acquisition trend. However, there is no urgency to aggressively acquire FTS shares now in our opinion. Our 2-Sector Perform rating and $34 one-year target price are unchanged following the acquisition announcement.

Definition of Scotiabank, Global Banking and Markets Equity Research Ratings & Risk Rankings

We have a three-tiered rating system, with ratings of 1-Sector Outperform, 2-Sector Perform, and 3-Sector Underperform. Each analyst assigns a rating that is relative to his or her coverage universe or an index identified by the analyst that includes, but is not limited to, stocks covered by the analyst.

Our risk ranking system provides transparency as to the underlying financial and operational risk of each stock covered. Statistical and judgmental factors considered are: historical financial results, share price volatility, liquidity of the shares, credit ratings, analyst forecasts, consistency and predictability of earnings, EPS growth, dividends, cash flow from operations, and strength of balance sheet. The Director of Research and the Supervisory Analyst jointly make the final determination of all risk rankings.

The rating assigned to each security covered in this report is based on the Scotiabank, Global Banking and Markets research analyst's 12-month view on the security. Analysts may sometimes express to traders, salespeople and certain clients their shorter-term views on these securities that differ from their 12-month view due to several factors, including but not limited to the inherent volatility of the marketplace.

Ratings

1-Sector Outperform
The stock is expected to outperform the average 12-month total return of the analyst's coverage universe or an index identified by the analyst that includes, but is not limited to, stocks covered by the analyst.

2-Sector Perform
The stock is expected to perform approximately in line with the average 12-month total return of the analyst's coverage universe or an index identified by the analyst that includes, but is not limited to, stocks covered by the analyst.

3-Sector Underperform
The stock is expected to underperform the average 12-month total return of the analyst's coverage universe or an index identified by the analyst that includes, but is not limited to, stocks covered by the analyst.

Other Ratings

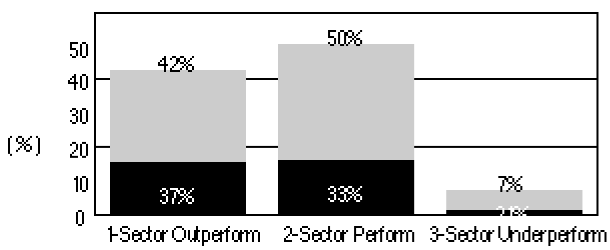
Scotiabank, Global Banking and Markets Equity Research Ratings Distribution*

Distribution by Ratings and Equity and Equity-Related Financings*



- Percentage of companies covered by Scotiabank, Global Banking and Markets within each rating category.
- Percentage of companies within each rating category for which Scotiabank, Global Banking and Markets has undertaken an underwriting liability or has provided advice for a fee within the last 12 months.

* As at January 31, 2012.

Source: Scotiabank GBM.

For the purposes of the ratings distribution disclosure the NASD requires members who use a ratings system with terms different than "buy," "hold/neutral" and "sell," to equate their own ratings into these categories. Our 1-Sector Outperform, 2-Sector Perform, and 3-Sector Underperform ratings are based on the criteria above, but for this purpose could be equated to buy, neutral and sell ratings, respectively.

General Disclosures

This report has been prepared by analysts who are employed by the Research Department of Scotiabank, Global Banking and Markets. Scotiabank, together with "Global Banking and Markets", is a marketing name for the global corporate and investment banking and capital markets businesses of The Bank of Nova Scotia and certain of its affiliates in the countries where they operate, including Scotia Capital Inc.

All other trademarks are acknowledged as belonging to their respective owners and the display of such trademarks is for informational use only.

Scotiabank, Global Banking and Markets Research produces research reports under a single marketing identity referred to as "Globally-branded research" under U.S. rules. This research is produced on a single global research platform with one set of rules which meet the most stringent standards set by regulators in the various jurisdictions in which the research reports are produced. In addition, the analysts who produce the research reports, regardless of location, are subject to one set of policies designed to meet the most stringent rules established by regulators in the various jurisdictions where the research reports are produced.

This report is provided to you for informational purposes only. This report is not, and is not to be construed as, an offer to sell or solicitation of an offer to buy any securities and/or commodity futures contracts.

The securities mentioned in this report may neither be suitable for all investors nor eligible for sale in some jurisdictions where the report is distributed.

The information and opinions contained herein have been compiled or arrived at from sources believed reliable, however, Scotiabank, Global Banking and Markets makes no representation or warranty, express or implied, as to their accuracy or completeness.

Scotiabank, Global Banking and Markets has policies designed to make best efforts to ensure that the information contained in this report is current as of the date of this report, unless otherwise specified.

Any prices that are stated in this report are for informational purposes only. Scotiabank, Global Banking and Markets makes no representation that any transaction may be or could have been effected at those prices.

Any opinions expressed herein are those of the author(s) and are subject to change without notice and may differ or be contrary from the opinions expressed by other departments of Scotiabank, Global Banking and Markets or any of its affiliates.

Neither Scotiabank, Global Banking and Markets nor its affiliates accepts any liability whatsoever for any direct or consequential loss arising from any use of this report or its contents.

Equity research reports published by Scotiabank, Global Banking and Markets are available electronically via: Bloomberg, Thomson Financial/First Call - Research Direct, Reuters, Capital IQ, and FactSet. Institutional clients with questions regarding distribution of equity research should contact us at 1-800-208-7666.

Additional Disclosures

Canada: This report is distributed by Scotia Capital Inc., a subsidiary of The Bank of Nova Scotia. DWM Securities Inc. is a subsidiary of The Bank of Nova Scotia and an affiliate of Scotia Capital Inc. Scotia Capital Inc. and DWM Securities Inc. are members of the Canadian Investor Protection Fund and the Investment Industry Regulatory Organization of Canada. DWM Securities Inc. does not provide investment banking services.

Hong Kong: This report is distributed by The Bank of Nova Scotia Hong Kong Branch, which is authorized by the Securities and Future Commission to conduct Type 1, Type 4 and Type 6 regulated activities and regulated by the Hong Kong Monetary Authority.

Mexico: This report is distributed by Scotia Inverlat Casa de Bolsa S.A. de C.V., a subsidiary of the Bank of Nova Scotia.

Singapore: This report is distributed by The Bank of Nova Scotia Asia Limited, a subsidiary of The Bank of Nova Scotia. The Bank of Nova Scotia Asia Limited is authorised and regulated by the Monetary Authority of Singapore, and exempted under Section 99(1)(a),and (b), (c) and (d) of the Securities and Futures Act to conduct regulated activities.

United Kingdom and the rest of Europe: Except as otherwise specified herein, this report is distributed by Scotia Capital (Europe) Limited, a subsidiary of the Bank of Nova Scotia. Scotia Capital (Europe) Limited is authorized and regulated by the Financial Services Authority (FSA). Scotia Capital (Europe) Limited research complies with all the FSA requirements and laws concerning disclosures and these are indicated on the research where applicable. Scotia Capital Inc. is regulated by the FSA for the conduct of investment business in the UK.

United States: This report is distributed by Scotia Capital (USA) Inc., a subsidiary of Scotia Capital Inc., and a registered U.S. broker-dealer. All transactions by a U.S. investor of securities mentioned in this report must be effected through Scotia Capital (USA) Inc.

Non-U.S. investors wishing to effect a transaction in the securities discussed in this report should contact a Scotiabank, Global Banking and Markets entity in their local jurisdiction unless governing law permits otherwise.

Grinding Through a Soft Spot

Event

- FTS reported adjusted Q1/12 EPS of $0.66 vs. our estimate of $0.69 and $0.67 in Q1/11.

Implications

- The Q1 report reinforces our view that FTS is going through a low-growth phase. While ratebase has grown, reductions in achieved returns are offsetting at this time.
- That trend probably continues through 2013 due to our forecast decline in allowed ROE in B.C. The BCUC has now commenced a proceeding that should conclude this year for Jan. 1, 2013 rates. We are assuming a 100 basis point reduction in allowed returns.
- Going forward from there, continued utility asset expansion and, to a lesser extent, the CH Energy acquisition (scheduled to close early next year) should bring some earnings growth back into the company. We are introducing a 2014 EPS estimate of $1.85.

Recommendation

- FTS is not cheap (20x P/E and free cash yield of 7.4%) and growth will likely remain slow for now. However, downside is limited as most of the key risks such as Belize have dissipated and earnings momentum should change in 2014. On this basis, we maintain our Sector Perform rating.

Definition of Scotiabank, Global Banking and Markets Equity Research Ratings & Risk Rankings

We have a three-tiered rating system, with ratings of 1-Sector Outperform, 2-Sector Perform, and 3-Sector Underperform. Each analyst assigns a rating that is relative to his or her coverage universe or an index identified by the analyst that includes, but is not limited to, stocks covered by the analyst.

Our risk ranking system provides transparency as to the underlying financial and operational risk of each stock covered. Statistical and judgmental factors considered are: historical financial results, share price volatility, liquidity of the shares, credit ratings, analyst forecasts, consistency and predictability of earnings, EPS growth, dividends, cash flow from operations, and strength of balance sheet. The Director of Research and the Supervisory Analyst jointly make the final determination of all risk rankings.

The rating assigned to each security covered in this report is based on the Scotiabank, Global Banking and Markets research analyst's 12-month view on the security. Analysts may sometimes express to traders, salespeople and certain clients their shorter-term views on these securities that differ from their 12-month view due to several factors, including but not limited to the inherent volatility of the marketplace.

Ratings

1-Sector Outperform
The stock is expected to outperform the average 12-month total return of the analyst's coverage universe or an index identified by the analyst that includes, but is not limited to, stocks covered by the analyst.

2-Sector Perform
The stock is expected to perform approximately in line with the average 12-month total return of the analyst's coverage universe or an index identified by the analyst that includes, but is not limited to, stocks covered by the analyst.

3-Sector Underperform
The stock is expected to underperform the average 12-month total return of the analyst's coverage universe or an index identified by the analyst that includes, but is not limited to, stocks covered by the analyst.

Other Ratings
Tender – Investors are guided to tender to the terms of the takeover offer.
Under Review – The rating has been temporarily placed under review, until sufficient information has been received and assessed by the analyst.

Risk Rankings

Low
Low financial and operational risk, high predictability of financial results, low stock volatility.

Medium
Moderate financial and operational risk, moderate predictability of financial results, moderate stock volatility.

High
High financial and/or operational risk, low predictability of financial results, high stock volatility.

Caution Warranted
Exceptionally high financial and/or operational risk, exceptionally low predictability of financial results, exceptionally high stock volatility. For risk-tolerant investors only.

Venture
Risk and return consistent with Venture Capital. For risk-tolerant investors only.

BC to Review Regulated Returns

Event

- The B.C. Utilities Commission (BCUC) announced it will initiate a generic cost of capital proceeding in early 2012.

Implications

- The BCUC last reviewed cost of capital in early 2009. Given that government bond yields and credit spreads have come in significantly since that time, and given that the BCUC unilaterally initiated the proceeding, we have to assume allowed returns are going lower.
- Fortis is the only utility we cover with material exposure to allowed returns on equity in B.C. Allowed ROEs are 9.5%-10%. With about $1.9B of 2013E regulated equity in the province, every 100 basis point reduction in allowed ROE decreases 2013E EPS by about $0.10.
- We are therefore reducing our 2013E EPS estimate by $0.10 and our one-year target price by $1 to $34. In a separate regulatory proceeding, the Alberta Utilities Commission is due to decide soon on a new generic ROE. Our estimates assume it is reduced to 8.5% from 9%.

Recommendation

- It will be hard for FTS shares to move up given new uncertainty around allowed returns in a core jurisdiction. We maintain our 2-SP rating and would only accumulate aggressively closer to $30.

Company	Ticker	Disclosures (see legend below)*
Fortis Inc.	FTS	G, I, S, U

I, Matthew Akman, certify that (1) the views expressed in this report in connection with securities or issuers that I analyze accurately reflect my personal views and (2) no part of my compensation was, is, or will be directly or indirectly, related to the specific recommendations or views expressed by me in this report.

This research report was prepared by employees of Scotia Capital Inc. who have the title of Analyst.

All pricing of securities in reports is based on the closing price of the securities' principal marketplace on the night before the publication date, unless otherwise explicitly stated.

All Equity Research Analysts report to the Head of Equity Research. The Head of Equity Research reports to the Managing Director, Head of Institutional Equity Sales, Trading and Research, who is not and does not report to the Head of the Investment Banking Department. Scotia Capital has policies that are reasonably designed to prevent or control the sharing of material non-public information across internal information barriers, such as between Investment Banking and Research.

The compensation of the research analyst who prepared this report is based on several factors, including but not limited to, the overall profitability of Scotia Capital and the revenues generated from its various departments, including investment banking. Furthermore, the research analyst's compensation is charged as an expense to various Scotia Capital departments, including investment banking. Research Analysts may not receive compensation from the companies they cover.

Non-U.S. analysts may not be associated persons of Scotia Capital (USA) Inc. and therefore may not be subject to NASD Rule 2711 restrictions on communications with subject company, public appearances and trading securities held by the analysts.

Definition of Scotia Capital Equity Research Ratings & Risk Rankings

We have a three-tiered rating system, with ratings of 1-Sector Outperform, 2-Sector Perform, and 3-Sector Underperform. Each analyst assigns a rating that is relative to his or her coverage universe or an index identified by the analyst that includes, but is not limited to, stocks covered by the analyst.

Our risk ranking system provides transparency as to the underlying financial and operational risk of each stock covered. Statistical and judgmental factors considered are: historical financial results, share price volatility, liquidity of the shares, credit ratings, analyst forecasts, consistency and predictability of earnings, EPS growth, dividends, cash flow from operations, and strength of balance sheet. The Director of Research and the Supervisory Analyst jointly make the final determination of all risk rankings.

The rating assigned to each security covered in this report is based on the Scotia Capital research analyst's 12-month view on the security. Analysts may sometimes express to traders, salespeople and certain clients their shorter-term views on these securities that differ from their 12-month view due to several factors, including but not limited to the inherent volatility of the marketplace.

Ratings

1-Sector Outperform
The stock is expected to outperform the average 12-month total return of the analyst's coverage universe or an index identified by the analyst that includes, but is not limited to, stocks covered by the analyst.

2-Sector Perform
The stock is expected to perform approximately in line with the average 12-month total return of the analyst's coverage universe or an index identified by the analyst that includes, but is not limited to, stocks covered by the analyst.

3-Sector Underperform
The stock is expected to underperform the average 12-month total return of the analyst's coverage universe or an index identified by the analyst that includes, but is not limited to, stocks covered by the analyst.

Other Ratings
Tender – Investors are guided to tender to the terms of the takeover offer.
Under Review – The rating has been temporarily placed under review, until sufficient information has been received and assessed by the analyst.

Risk Rankings

Low
Low financial and operational risk, high predictability of financial results, low stock volatility.

Medium
Moderate financial and operational risk, moderate predictability of financial results, moderate stock volatility.

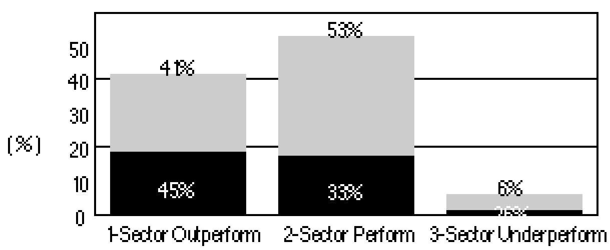
High
High financial and/or operational risk, low predictability of financial results, high stock volatility.

Caution Warranted
Exceptionally high financial and/or operational risk, exceptionally low predictability of financial results, exceptionally high stock volatility. For risk-tolerant investors only.

Venture
Risk and return consistent with Venture Capital. For risk-tolerant investors only.

Scotia Capital Equity Research Ratings Distribution*

Distribution by Ratings and Equity and Equity-Related Financings*



- Percentage of companies covered by Scotia Capital Equity Research within each rating category.
- Percentage of companies within each rating category for which Scotia Capital has undertaken an underwriting liability or has provided advice for a fee within the last 12 months.

* As at October 31, 2011.

Source: Scotia Capital.

For the purposes of the ratings distribution disclosure the NASD requires members who use a ratings system with terms different than "buy," "hold/neutral" and "sell," to equate their own ratings into these categories. Our 1-Sector Outperform, 2-Sector Perform, and 3-Sector Underperform ratings are based on the criteria above, but for this purpose could be equated to buy, neutral and sell ratings, respectively.

General Disclosures

This report has been prepared by analysts who are employed by the Research Department of Scotia Capital™. The Scotia Capital trademark represents the corporate and investment banking businesses of the Scotiabank Group.

Fourth Quarter In-Line with Expectations

Event

Fortis reported EPS of $0.21 (f.d.) or adjusted operating EPS of $0.23 in-line with our $0.23 estimate and Q4/04 operating EPS of $0.22, but fell short of the $0.28 consensus estimate.

Impact

Mildly Positive. We have adjusted our EPS forecasts slightly to reflect new information provided in the quarter and assumed higher overearnings at the utilities; our EPS forecasts increase $0.06 to $1.19 and $1.30 for 2006 and 2007 respectively.

Details

Regulated Utilities – Canadian earnings of $15.2 million declined 29% from Q4/05. The majority of the decrease was due to lower contributions from FortisAlberta and FortisBC, although contributions from the other segments declined as well (Exhibit 1). Higher finance charges and an approximate $3 mm revenue deferral related to the full year accounted for the bulk of the difference.

Regulated Utilities – Caribbean earnings of $4.8 million increased from $0.5 million in Q4/05. Earnings from Belize were positively affected by an 11% rate increase (effective July 2005) and gain on Euro denominated debt partially offset by the strength in the Canadian vs. U.S. dollar. Caribbean Utilities' earnings increased to $2.8 million and the company expects sales to reach pre-Hurricane Ivan levels by April 2006.

Non-regulated Fortis Generation earnings increased 102% to $9.5 million. The primary reason for the large increase was the continued strength in Ontario and upper New York wholesale power prices. Ontario wholesale prices increased to $71.46/MWh Q4/05 vs. $50.80/MWh in Q4/04 and upper New York wholesale prices increased to US$70.94/MWh vs. US$46.75/MWh in Q4/04.

Non-regulated Fortis Properties segmented earnings were relatively flat at $2.9 million. Increased revenues from three hotels acquired in February 2005 and the expansion of Delta St. John's were offset by increased operating expenses, amortization and financing charges.

Company Profile
Fortis Inc. (FTS-T) is a diversified infrastructure holding company, primarily comprising electric utilities in Atlantic Canada, Ontario, western Canada, Belize and the Cayman Islands. Fortis also owns a real estate and hotels subsidiary and has interests in electric generation ventures in Canada and the United States.

Please see the final pages of this document for important disclosure information.

Corporate expenses increased to $7.8 million in Q4/05. The increase was primarily a result of lower inter-company interest revenue partially offset by financing costs, which were lower in Q4/05 mainly as a result of the repayment of a short-term bridge facility in March 2005.

Exhibit 1. Segmented Earnings Analysis ($mm unless stated otherwise)

	Q4/05	Q4/04	YOY Change	YOY % Change
Newfoundland Power	$ 2.9	$ 3.3	$ (0.4)	-12%

Reported Earnings	**22.3**	**21.2**	**1.1**	**5%**
Average Shares Outstanding - Basic (mm)	103.1	95.5	7.7	8%
Average Shares Outstanding - Diluted (mm)	125.8	119.7	6.0	5%
Operating EPS (basic)	$ 0.24	$ 0.23	$ 0.01	3%
Reported EPS (basic)	$ 0.22	$ 0.22	$ -	0%
Operating EPS (f.d)	$ 0.23	$ 0.22	$ 0.01	4%
Reported EPS (f.d)	$ 0.21	$ 0.21	$ -	0%

Note that we adjusted Q4/05 earnings to normalize for a $0.4 mm insurance gain on the disposition of assets, $1.1 mm write down of Rankine assets, $0.8 of restructuring charges relating to Western Utilities and $0.8 mm of early retirement costs of which $0.5 mm relates to FortisOntario and the remainder relates to Fortis Generation. Q4/04 earnings were adjusted to back out a $3.7 mm FortisBC gain from the refinement of the process to estimate unbilled usage and $4.7 mm relating to the costs incurred by Caribbean Utilities due to Hurricane Ivan.

Source: Company reports, TD Newcrest.

Valuation

Fortis is trading at 19.3x price-to-forward earnings, a slight discount to the average 20.2x for the sector. We view this discount as warranted due to the lower profitability and relatively higher risk associated with its unregulated and non-Canadian operations.

Justification of Target Price

Our $23.00 target price is predicated on our 2007 financial estimates as follows: 1) 50% relative earnings yield of 133% (vs. historical average of 133%), 2) 25% relative dividend yield of 81% (vs. historical average of 82%), and 3) 25% P/B of 1.8x (vs. historical average of 1.4x). Our target price implies a 3.5% dividend yield and a price-to-earnings ratio of 17.7 times, compared to historical averages of 4.7% and 13.8 times, respectively. We believe that Fortis will continue to trade at a discount to the sector due to its lower profitability and above-average regulatory risk.

Key Risks to Target Price

1) higher than expected long bond yields, 2) operational disruptions, 3) regulatory surprises, 4) unexpected large acquisitions, and 5) materially different power prices in Ontario versus our forecast.

Investment Conclusion

While 2006 EPS growth will be challenged if power prices in Ontario don't recover from the soft start in January, growth should rebound in 2007 if regulated ROEs recover from historical lows in 2006 and the ascent of the Canadian dollar versus the US dollar decelerates. Over the next few years, Fortis will need to make an accretive acquisition to offset the loss in earnings contribution from the 75 MW Rankine dam in 2009, which has been a major growth driver for the company over the past few years. Absent an accretive acquisition, Fortis' share price lacks visible catalysts, and therefore we see little potential for share price appreciation. Conversely, we see few negative catalysts for the stock over the next year. In our view, our expectation that the shares will move sideways within a narrow band close to our target price warrants an upgrade in rating to a HOLD.

Fortis Inc.

(FTS-T) C$21.42

First Quarter In-Line With Expectations

Event

Fortis reported Q1/06 EPS (f.d) of $0.34, in-line with our estimate and $0.04 higher than Q1/05 operating EPS of $0.30 (Exhibit 1).

Impact

Neutral. Q1/06 was a solid quarter and in-line with our expectations.

Details

Regulated Utilities - Canadian earnings were $35.1 million in Q1/06 vs. $33.0 million in Q1/05, an increase of 6%. Strong rate base growth in FortisBC and FortisAlberta more than offset a lower contribution from Newfoundland Power, which declined primarily as a result of a change in the company's revenue recognition policy. Newfoundland Power's lower earnings are mainly timing related and on an annual basis are expected to be comparable with 2005.

Regulated Utilities - Caribbean earnings were $3.2 million, a decrease of 9% from Q1/05. Increased earnings from Belize Electricity, mainly as a result of an 11% increase in electricity rates, effective July 1, 2005, and a 5% increase in electricity sales were more than offset by a decreased contribution from Caribbean Utilities. The expensing of previously deferred fuel costs impacted Caribbean Utilities' earnings. Caribbean Utilities now is regularly achieving generation and sales levels realized prior to Hurricane Ivan; however, given the Cayman Islands' focus on post-hurricane rebuilding, not much progress has been made on its license renewal.

Fortis Generation earnings increased 159% to $5.4 million in Q1/06 from $2.1 million in Q1/05, after adjusting for a $7.9 million after-tax gain on the settlement of contractual matters with Ontario Power Generation. Revenue for the quarter increased mainly as a result of the Chalillo hydro facility, which commenced operations in September 2005 and full quarter contribution of the Dolgeville plant in Upper New York State, which was out of service for much of Q1/05. Operating expenses declined year-over-year mainly due to the Rankine Generating Station ceasing operations due to the Niagara Exchange Agreement, which assigns FortisOntario's Niagara River water rights to Ontario Power Generation. Interest charges and corporate taxes also declined during the quarter. Partially offsetting these items was the impact of lower average wholesale energy prices in Ontario, which averaged $50.98 in the

Company Profile

Fortis Inc. (FTS-T) is a diversified infrastructure holding company, primarily comprising electric utilities in Atlantic Canada, Ontario, western Canada, Belize and the Cayman Islands. Fortis also owns a real estate and hotels subsidiary and has interests in electric generation ventures in Canada and the United States.

quarter vs. $55.99 in Q1/05.

Fortis Properties earnings were flat year-over-year at $1.5 million. Increased hospitality revenue brought on by the full quarter contribution of three Greenwood Inn Hotels (vs. two months in Q1/05) and increased revenue at the Delta Brunswick was offset chiefly by increased operating expenses. In addition, Q1/05 hospitality earnings were positively impacted by a large conference and the Scott Tournament of Hearts curling championship, which strengthened hotel demand in the St. John's, Newfoundland area.

Corporate expenses declined slightly to $8.5 million for the quarter. Lower inter-company interest revenue was offset by decreased finance charges and unrealized foreign exchange losses.

Valuation

Fortis is trading at 17.5 times price-to-forward earnings, a slight discount to the average 18.3 times for the sector. We view this discount as warranted due to the lower profitability and relatively higher risk associated with its unregulated and non-Canadian operations.

Source: Bloomberg, TD Newcrest.

Justification of Target Price

Our $22.00 target price is predicated on our 2007 financial estimates as follows: 1) 50% relative earnings yield of 131% (vs. historical average of 133%), 2) 25% relative dividend yield of 81% (vs. historical average of 82%), and 3) 25% P/B of 1.7 times (vs. historical average of 1.4x). Our target price implies a 3.6% dividend yield and a price-to-earnings ratio of 16.9 times, compared to historical averages of 4.7% and 13.8 times, respectively. We believe that Fortis will continue to trade at a discount to the sector due to its lower profitability and above-average regulatory risk.

Key Risks to Target Price

1) Higher than expected long bond yields, 2) operational disruptions, 3) regulatory surprises, 4) unexpected large acquisitions, and 5) materially different power prices in Ontario versus our forecast.

Investment Conclusion

Higher rate base growth in Alberta should mitigate the effect of low regulated ROEs, strength in the Canadian dollar and soft Ontario power prices, during 2006. Over the next few years, Fortis will need to make an accretive acquisition, in what we view as a very competitive environment, to offset the loss in earnings contribution from the 75 MW Rankine dam in 2009, which has been a growth driver for the company in the past. Absent an accretive acquisition, we see limited visible catalysts, either positive or negative, for the stock over the next year and expect the shares will move sideways within a narrow band close to our target price. We reiterate our HOLD rating.

Fortis Inc.

(FTS-T) C$22.51

Focus Shifts to Acquisitions; Q2/06 In-Line with Expectations

Event

Fortis reported EPS of $0.35. Normalized Q2/06 EPS of $0.32 increased $0.05 year-over-year and was in-line with both our $0.31 estimate and the recent consensus of $0.33.

Impact

Neutral.

We have adjusted our estimates primarily to reflect slightly higher overearnings from FortisAlberta and higher revenues from Belize Electricity.

Details

Regulated Utilities – Canadian Q2/06 earnings of $25.4 mln declined $1.0 mln year-over-year primarily as a result of 1) timing due to a change in revenue recognition policy at Newfoundland Power, and 2) FortisBC being affected by the implementation of the new PBR mechanism as well as higher amortization costs and finance charges (Exhibit 1). Conversely, FortisAlberta achieving higher earnings due to electricity sales growth and lower corporate income taxes, partially offset by lower electricity rates as a result of the 2006/2007 Negotiated Settlement Agreement.

Regulated Utilities – Caribbean earnings grew $0.6 mln to $4.4 mln benefiting from a new four-year tariff agreement at Belize Electricity effective, July 1, 2005, which resulted in an 11 percent increase in electricity rates, partially offset by the weakening of the US dollar against the Canadian dollar. The effects of Hurricane Ivan appear to be largely behind Caribbean Utilities. Customer numbers at Caribbean Utilities surpassed pre-Hurricane Ivan levels in June 2006, and owned generating capacity reached 120 MW by the end of July 2006 compared to 123 MW prior to the hurricane.

Fortis Generation earnings of $6.0 mln almost doubled year-over-year due to higher production, lower finance charges and operating costs, partially offset by $2.4 mln lower revenue from milder weather causing wholesale energy prices in Ontario to drop to $45.32/MWh versus $60.24/MWh in Q2/05. Hydro production increased in Belize as a result of higher rainfall levels and the operation of the Chalillo dam. In Upper New York State, the Dolgeville plant was operating whereas in Q2/05 it was not operational due to flooding. The Dolgeville plant is expected to be out of commission for most of Q3/06 due to another flooding incident late in Q2/06.

Company Profile

Fortis Inc. (FTS-T) is a diversified infrastructure holding company, primarily comprising electric utilities in Atlantic Canada, Ontario, western Canada, Belize and the Cayman Islands. Fortis also owns a real estate and hotels subsidiary and has interests in electric generation ventures in Canada and the United States.

Please see the final pages of this document for important disclosure information.

Fortis Properties earnings of $5.0 mln were essentially flat year-over-year. Revenues increased due to expanded operations, although operating expenses and finance charges grew apace. During Q2/06, the expansions of the Holiday Inn hotels in Sarnia and Kitchener-Waterloo were completed, as well as the 57,000 square-foot expansion of the Blue Cross Centre in Moncton. Discussions with management indicate that Days Inn Sydney was sold as a result of an unsolicited high offer for the hotel. Other than periodically considering unsolicited high offers for its assets, the company remains in acquisition mode.

Corporate expenses of $6.7 mln improved $2.6 mln year-over-year primarily as a result of a Q2/05 $1.2 mln foreign exchange loss swinging to a $1.9 mln gain in Q2/06. These gains and losses are related to foreign currency exchange rate fluctuations associated with unhedged US dollar-denominated Corporate long-term debt.

(2) Q2/05 earnings have been adjusted for a) $7.0 mln income tax adjustment at FortisAlberta, b) $1.4 mln tax settlement in Newfoundland Power, c) $1.1 mln change in Caribbean Utilities unbilled revenue, and d) $0.35 mln write-off of acquisition costs related to prior periods. Source: Company Reports, TD Newcrest.

Outlook

We perceived a positive outlook for acquisition opportunities in our discussions with management. Now that a significant number of regulatory processes and the integration of the western Canadian utilities have been completed, Fortis can focus its attention on acquisitions.

Fortis indicated that it will pursue acquisitions of utilities in Canada, the Caribbean and the United States. Within its non-regulated businesses, it is looking to grow hydroelectric generation, hotels, and real estate. **While the acquisition arena remains very competitive, we believe Fortis' asset base and competencies position the company well within its core businesses and geographies.**

Valuation

Fortis is trading at 17.6 times price-to-forward earnings, a slight discount to the average 18.7 times for the sector. We view this discount as warranted due to the lower profitability and relatively higher risk associated with its unregulated and non-Canadian operations.

Justification of Target Price

Our $22.00 target price is predicated on our 2007 financial estimates as follows: 1) 50% relative earnings yield of 134% (vs. historical average of 133%), 2) 25% relative dividend yield of 80% (vs. historical average of 82%), and 3) 25% P/B of 1.7 times (vs. historical average of 1.4x). Our target price implies a 3.6% dividend yield and a price-to-earnings ratio of 16.5 times, compared to historical averages of 4.7% and 13.8 times, respectively. We believe that Fortis will continue to trade at a discount to the sector due to its lower profitability and Caribbean sovereign risk.

Key Risks to Target Price

1) Higher than expected long bond yields, 2) operational disruptions, 3) regulatory surprises, 4) unexpected large acquisitions, and 5) materially different power prices in Ontario versus our forecast.

Investment Conclusion

Higher rate base growth in Alberta is mitigating the effect of low regulated ROEs, strength in the Canadian dollar, and soft Ontario power prices during 2006, in our view. Over the next few years, We believe that Fortis will need to make an accretive acquisition to offset the loss in earnings contribution from the 75 MW Rankine dam in 2009, which has been a growth driver for the company in prior years. Absent an accretive acquisition, we see limited visible company-specific catalysts, either positive or negative, over the next year. We reiterate our HOLD rating.

Fortis Acquires Two Electric Utilities in the Turks and Caicos

Event

Fortis Inc. acquired two Turks and Caicos electric utilities, P.P.C. Ltd. and Atlantic Equipment and Power Ltd., from T.C. Energy Holdings.

Impact

Neutral. Based on our estimates the acquisition of the two utilities will be immediately accretive to earnings. As such, we have updated our financial model and our 2006 earnings estimate (f.d.) increases to $1.23 and our 2007 earnings estimate (f.d.) increases to $1.36 from $1.22 and $1.33 respectively.

Details

- The aggregate purchase price of the acquisition was US$90 million, including US$20 million of assumed debt, and was financed through Fortis' existing short-term credit line. We expect more permanent financing to be put in place in 2007.
- The Turks and Caicos utilities are regulated under a traditional return on rate base approach. As at June 30, 2006 the rate base was US$50 million on which Fortis earns a 17.5% return less interest costs. The regulated rate of return has been in effect since 1986 and is slated to remain in effect until 2036.
- The two utilities serve almost 80% of the electricity customers in the Turks and Caicos and are the sole providers of electricity to Providenciales, North Caicos, Middle Caicos and South Caicos pursuant to 50-year licenses that expire in 2036.
- Turks and Caicos is expected to experience high growth in the future and management estimates that sales will increase at least 30% in the next five years. Increased sales should help offset any cost creep.
- The electric utilities also have a combined diesel-fired generating capacity of 35 MW and meet a peak demand of approximately 20 MW.

Outlook

This latest acquisition reaffirms our expectation that Fortis will pursue acquisitions of utilities in Canada, the Caribbean and the United States. Within its non-regulated businesses, we believe it is looking to grow hydroelectric generation, hotels, and real estate. While the acquisition arena remains very competitive, we believe Fortis' asset base and competencies position the company well within its core businesses and geographies.

Company Profile

Fortis Inc. (FTS-T) is a diversified infrastructure holding company, primarily comprising electric utilities in Atlantic Canada, Ontario, western Canada, Belize, Turks and Caicos and the Cayman Islands. Fortis also owns a real estate and hotels subsidiary and has interests in electric generation ventures in Canada and the United States.

Please see the final pages of this document for important disclosure information.

Valuation

Fortis is trading at 18.1 times price-to-forward earnings, a slight discount to the average 18.7 times for the sector. We view this discount as warranted due to the lower profitability and relatively higher risk associated with its unregulated and non-Canadian operations.

Note: Averages exclude ATCO. All EPS forecasts are TD Newcrest estimates, with the exception of ATCO and Canadian Utilities (consensus estimates).

Source: Bloomberg, TD Newcrest.

Justification of Target Price

Our $22.00 target price is predicated on our 2007 financial estimates as follows: 1) 50% relative earnings yield of 137% (vs. historical average of 133%), 2) 25% relative dividend yield of 81% (vs. historical average of 82%), and 3) 25% P/B of 1.7 times (vs. historical average of 1.4x). Our target price implies a 3.6% dividend yield and a price-to-earnings ratio of 16.2 times, compared to historical averages of 4.7% and 13.8 times, respectively. We believe that Fortis will continue to trade at a discount to the sector due to its lower profitability and Caribbean sovereign risk.

Key Risks to Target Price

1) Higher than expected long bond yields, 2) operational disruptions, 3) regulatory surprises, 4) unexpected large acquisitions, and 5) materially different power prices in Ontario versus our forecast.

Investment Conclusion

We view this investment as neutral due to its potential contribution, however the transaction increases Fortis' risk profile due to the additional sovereign risk associated with assets located in the Turks and Caicos.

Higher rate base growth in Alberta is mitigating the effect of low regulated ROEs, strength in the Canadian dollar, and soft Ontario power prices during 2006, in our view. Over the next few years, we believe that Fortis will need to make a significant accretive acquisition to offset the loss in earnings contribution from the 75 MW Rankine dam in 2009, which has been a growth driver for the company in prior years. Absent a significant accretive acquisition, we see limited visible company-specific catalysts, either positive or negative, over the next year. We reiterate our HOLD rating.

Fortis Inc.

(FTS-T) C$25.65

Strong FortisAlberta Earnings Benefit Q3/06

Event

Fortis reported Q3/06 EPS (f.d) of $0.36, which was above our estimate of $0.32, recent consensus of $0.31 and Q3/05 normalized EPS (f.d.) of $0.32.

Impact

Positive. We have increased our financial forecasts primarily to reflect 1) higher rate base growth and overearnings in FortisAlberta, 2) higher contributions from Belize Electricity and BECOL, and 3) slightly higher growth in Fortis Properties. Our target price increases a dollar to $25.00 commensurate with our higher financial forecasts.

Details

Regulated Utilities – Canadian Q3/06 earnings of $25.3 million represented an increase of $4.5 million year-over-year (Exhibit 1). The increased earnings were mainly attributable to 1) a lower effective income tax rate in FortisAlberta, 2) increased electricity rates and sales growth coupled with lower operating expenses in FortisBC, and 3) an increase in FortisOntario's electricity distribution rates effective May 1, 2006 combined with lower operating expenses.

Regulated Utilities – Caribbean earnings increased 24% to $7.7 million. The increase was primarily a result of the one-month contribution from the Turks and Caicos Utilities, which were acquired August 28, 2006 and were immediately accretive to earnings. Lower finance charges at Belize Electricity also positively affected earnings.

Fortis Generation earnings of $7.8 million were in-line year-over-year. Increased hydroelectric production at the Mollejon and Chalillo facilities in Belize and decreased finance charges were offset by lower realized wholesale energy prices in Ontario. Energy prices in Ontario averaged $46.59/MWh during the quarter versus $85.91/MWh in Q3/05. In Upper New York the Dolgeville plant resumed operations late Q3/06 after experiencing a flood in June 2006, we note that the facility was out of service Q3/05 due to a flood in January 2005.

Fortis Properties earnings increased 29% year-over-year to $6.3 million. The expansions of the Holiday Inn Sarnia, Holiday Inn Kitchener-Waterloo and the Blue Cross Centre contributed to the higher earnings as well as a lower

Company Profile

Fortis Inc. (FTS-T) is a diversified infrastructure holding company, primarily comprising electric utilities in Atlantic Canada, Ontario, western Canada, Belize, Turks and Caicos and the Cayman Islands. Fortis also owns a real estate and hotels subsidiary and has interests in electric generation ventures in Canada and the United States.

average corporate income tax rate.

Corporate expenses of $8.3 million were more than double Q3/05 levels. Financing charges and operating expenses increased year-over-year coupled with lower inter-company interest revenue. We also note that Q3/05 corporate expenses included a $3.1 million after tax unrealized foreign currency translation gain associated with unhedged US dollar-denominated debt.

Valuation

Fortis is trading at 18.3 times price-to-forward earnings, a slight discount to the average 18.7 times for the sector (Exhibit 2). We believe that Fortis should trade at a discount to the sector due to the lower profitability and relatively higher risk associated with its unregulated and non-Canadian operations.

Source: Company Reports, Bloomberg, TD Newcrest.

Justification of Target Price

Our $25.00 price target is predicated on 25% of our 2007 & 75% of our 2008 financial estimates as follows: 1) 50% relative earnings yield of 140% (vs. historical average of 137%), 2) 25% relative dividend yield of 81% (vs. historical average of 82%), and 3) 25% P/B of 1.7 times (vs. historical average of 1.4x). Our target price implies a 3.3% dividend yield and a price-to-earnings ratio of 17.5 times, compared to historical averages of 4.7% and 13.8 times, respectively. We believe that Fortis should trade at a discount to the sector due to its lower profitability and Caribbean sovereign risk.

Key Risks to Target Price – Overall Risk Rating: LOW

1) Higher than expected long bond yields, 2) operational disruptions, 3) regulatory surprises, 4) unexpected large acquisitions, and 5) materially different power prices in Ontario versus our forecast.

Investment Conclusion

Higher rate base growth and overearnings in Alberta are mitigating the effect of low regulated ROEs, strength in the Canadian dollar, and soft Ontario power prices during 2006 and Alberta utility earnings should continue to be strong in 2007, in our view. Over the next few years, we believe that Fortis will need to make a significant accretive acquisition to offset the loss in earnings contribution from the 75 MW Rankine dam in 2009, which has been a growth driver for the company in prior years. Absent a significant accretive acquisition, we see limited visible company-specific catalysts, either positive or negative, over the next year. We reiterate our HOLD rating.

Fortis Inc.

(FTS-T) C$26.64

Increased Interest in Caribbean Utilities; Downgrading to Reduce

Event

Fortis has acquired 4.1 million shares, approximately 16 percent, of Caribbean Utilities (CUC) for US$11.89 per share under a private agreement with International Power. This brings Fortis' ownership to 54 percent, and our searches indicate no other large single shareholder at this point. Fortis issued a private placement of US$40 million unsecured subordinated convertible debentures maturing November 7, 2016 and bearing a 5.5% annual interest rate.

Impact

Neutral

- **Accretion of this Transaction Substantially Offset by Assumed 2007 Equity Offering:** We estimate that the acquisition when substantially financed by this debenture adds just over two cents a share to EPS. We assume that the debt rating agencies will treat this new capital as debt, and therefore incorporate a 2007 equity offering to ensure debt-to-capital doesn't creep too far above 60 percent. The dilution from this additional equity offsets the accretion of the higher ownership in CUC to our 2008E EPS, which remains unchanged.
- **Caribbean Operations Now Generate Almost One-Third of Fortis' Earnings:** We estimate that approximately 30% of Fortis' 2007 earnings will be generated in Belize, Cayman Islands, and Turks and Caicos. While we consider these to be high quality businesses for the region, we still view Caribbean assets as having a higher sovereign, foreign exchange, and operating risk than Fortis' Canadian businesses. We note that Fortis has recently been trading at 18.8x price-to-forward earnings and CUC has recently been trading at about 13x, and while some of that CUC discount can be attributed to lower liquidity, we believe much of that is in fact related to sovereign and operating risk.

Outlook

In the long-term, Fortis may buy out the remaining shareholders of CUC, but we believe that in the near term the priority will be to negotiate a new CUC license with the Cayman Island government. The current license expires in January, 2011.

Company Profile

Fortis Inc. (FTS-T) is a diversified infrastructure holding company, primarily comprising electric utilities in Atlantic Canada, Ontario, western Canada, Belize, Turks and Caicos and the Cayman Islands. Fortis also owns a real estate and hotels subsidiary and has interests in electric generation ventures in Canada and the United States.

Valuation

Fortis is trading at 18.8 times price-to-forward earnings, in line with the sector average of 18.8 times (Exhibit 1). We believe that Fortis should trade at a discount to the sector due to the lower profitability and relatively higher risk associated with its unregulated and non-Canadian operations.

Note: Averages exclude ATCO Ltd.

Source: Company Reports, Bloomberg, TD Newcrest.

Justification of Target Price

Our $25.00 price target is predicated on 25% of our 2007 & 75% of our 2008 financial estimates as follows: 1) 50% relative earnings yield of 140% (vs. historical average of 137%), 2) 25% relative dividend yield of 81% (vs. historical average of 82%), and 3) 25% P/B of 1.7 times (vs. historical average of 1.4x). Our target price implies a 3.3% dividend yield and a price-to-earnings ratio of 17.4 times, compared to historical averages of 4.7% and 13.8 times, respectively.

Key Risks to Target Price – Overall Risk Rating: LOW

1) Higher than expected long bond yields, 2) operational disruptions, 3) regulatory surprises, 4) unexpected large acquisitions, 5) sovereign risk, and 6) materially different power prices in Ontario versus our forecast.

Investment Conclusion

We view this incremental acquisition of CUC equity as overall neutral, as modest accretion is offset by a higher risk profile. We expect that the recent strength in Fortis' shares is largely a result of funds flow into pipeline, power and utility corporations subsequent to the government's announcement of its intentions to implement a new tax on publicly traded trusts. Fortis could continue to benefit from this trust tax dynamic in the near term, however, we think the price is starting to look rich both on an absolute basis as well as relative to other names in the sector given the company's risk profile. We therefore are compelled to downgrade Fortis to a REDUCE.

Fortis Inc.

(FTS-T) C$28.06

Resuming Coverage Upon Completion of Equity Offering

Event

Fortis announced an equity offering of 5.17 million shares priced at $29.00 for gross proceeds of $149,930,000, which closed on January 18, 2006. The net proceeds will be used to repay indebtedness incurred from recent acquisitions, to support the capital expenditure program of the western utilities, and for general corporate purposes.

Impact

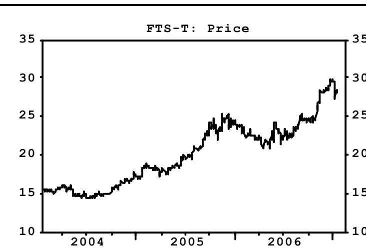
Neutral. We are adjusting our EPS estimates primarily to reflect a higher issue price and an earlier than expected equity offering (we had assumed this would occur mid-year). In addition, our Ontario power prices have been adjusting to reflect the recent weaker power prices. Our 2006E EPS drops three cents to $1.32, our 2007E EPS increases a cent to $1.44 and our 2008E EPS increases three cents to $1.47.

On January 9, 2007 we rolled forward our corporation target prices in the sector by three months to derive values based on our 2008 financial forecasts. This resulted in an average 3.5 percent increase in target prices. Similarly, our Fortis target price now increases 4 percent to $26.00.

Valuation

Fortis is trading at 19.4 times price-to-forward earnings, above the sector average of 18.2 times (Exhibit 1). We believe that Fortis should trade at a discount to the sector due to the lower profitability and relatively higher risk associated with its unregulated and non-Canadian operations.

Company Profile
Fortis Inc. (FTS-T) is a diversified infrastructure holding company, primarily comprising electric utilities in Atlantic Canada, Ontario, western Canada, Belize, Turks and Caicos and the Cayman Islands. Fortis also owns a real estate and hotels subsidiary and has interests in electric generation ventures in Canada and the U.S.



Please see the final pages of this document for important disclosure information.

Justification of Target Price

Our $26.00 price target is predicated on our 2008 financial estimates as follows: 1) 50% relative earnings yield of 138% (vs. historical average of 137%), 2) 25% relative dividend yield of 80% (vs. historical average of 82%), and 3) 25% P/B of 1.7 times (vs. historical average of 1.4x). Our target price implies a 3.3% dividend yield and a price-to-earnings ratio of 17.7 times, compared to historical averages of 4.7% and 13.8 times, respectively.

Key Risks to Target Price

1) Higher than expected long bond yields, 2) operational disruptions, 3) regulatory surprises, 4) unexpected large acquisitions, 5) sovereign risk, and 6) materially different power prices in Ontario versus our forecast.

Investment Conclusion

We think Fortis' valuation looks rich at these levels, especially now that its Caribbean operations now generate almost one-third of Fortis' earnings. For Caribbean Utilities, which is publicly traded, the higher sovereign, foreign exchange and operating risk has translated into a 5 to 6x price-to-earnings multiple discount versus the Canadian sector recently, and we have reflected this Caribbean discount in deriving our Fortis target price.

In addition to not reflecting the risk inherent its Caribbean operations, we believe Fortis' current share price incorporates an expectation of continued growth that we feel will be impossible to deliver absent a significant accretive transaction. In 2007, Fortis is facing lackluster Ontario power prices and all-time low Canadian regulated ROEs. In 2009, Fortis loses the water rights associated with its 75 MW Ontario Rankine hydro plant, which is a very profitable asset.

Given the relatively rich valuation and the high risk we see of disappointing the markets with muted growth over the next few years, we are maintaining our REDUCE rating.

Fortis Inc.

(FTS-T) C$26.50

FortisAlberta Tax Measures Benefit Q4/06

Event

- Fortis reported Q4/06 EPS (f.d) of $0.32, which was above our estimate of $0.30, recent consensus of $0.26 and Q4/05 normalized EPS (f.d.) of $0.23.
- The Board increased the quarterly dividend by 10.5% to $0.21 per share. This was the level of increase we were expecting but it came earlier in the year than we were forecasting, based on the timing of prior dividend increases.

Impact

Mildly Positive. We have updated our financial model, although at this time our overall earnings forecasts remain unchanged. We have increased our 2007E and 2008E dividend forecasts by $0.04 and $0.01 respectively to reflect the earlier than expected dividend increase in 2007 as well as a payout ratio more in line with the sector in 2008.

Details

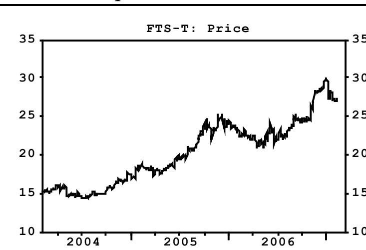
Regulated Utilities – Canadian Q4/06 earnings increased $11.7 million to $26.9 million (Exhibit 1). The majority of the increase was a result of increased Newfoundland Power earnings due to a change in revenue recognition policy, and FortisAlberta earnings, which almost doubled, due to lower corporate income taxes and incremental earnings on a higher rate base.

Regulated Utilities – Caribbean earnings increased $3.6 million to $8.4 million. The increase was primarily a result of a full quarter contribution from Fortis Turks and Caicos, lower finance charges and higher electricity sales at Belize Electricity.

Fortis Generation earnings declined $2.7 million year-over-year to $6.8 million. The decline was primarily a result of lower Ontario energy prices and a lower contracted energy sales price in Belize. Theses declines were partially offset by lower operating expenses and income taxes. Energy prices in Ontario averaged $42.69/MWh during the quarter versus $71.46/MWh in Q4/05, which negatively affected revenues by approximately $4.6 million.

Fortis Properties earnings declined slightly year-over-year to $2.8 million. Incremental contributions from the four hotels acquired November 2006 and

Company Profile
Fortis Inc. (FTS-T) is a diversified infrastructure holding company, primarily comprising electric utilities in Atlantic Canada, Ontario, western Canada, Belize, Turks and Caicos and the Cayman Islands. Fortis also owns a real estate and hotels subsidiary and has interests in electric generation ventures in Canada and the U.S.



expanded existing properties were more than offset by higher amortization and financing charges.

Corporate expenses increased 41% to $11.0 million during Q4/06. The increase was mainly a result of dividends on preference shares issued September 2006 as well as increased financing charges.

Note that we adjusted Q4/05 earnings to normalize for: 1) $0.4 mm insurance gain on the disposition of assets, 2) $1.1 mm write down of Rankine assets, 3) $0.8 mm of restructuring charges relating to Western Utilities, and 4) $0.8 mm of early retirement costs of which $0.5 mm relates to FortisOntario and the remainder relates to Fortis Generation.
Source: Company Reports, TD Newcrest.

Outlook

Rate Base Growth Should Offset Lower ROEs in 2007: Fortis expects to invest over $2.6 billion in its utilities over the next five years, $600 million of which is planned for 2007. FortisAlberta and FortisBC appear to have the strongest growth outlooks, driven by the need to enhance electrical system reliability and meet strong customer demand. In fact, management expects each of the western utilities' rate bases to grow approximately 30% over the next two years. This growth should more than offset the effects of lower regulated 2007 ROEs, in our view (Exhibit 2). We note however, that Newfoundland Power earnings are expected to decline modestly as a result of a lower ROE in 2007.

Exhibit 2. Regulated ROEs

Regulated Utility	2007	2006	Change
FortisAlberta	8.51%	8.93%	-0.42%
FortisBC	8.77%	9.20%	-0.43%
Newfoundland Power	8.60%	9.24%	-0.64%
Maritime Electric	10.25%	10.25%	0.00%
FortisOntario	9.00%	9.00%	0.00%

Source: Company Reports, TD Newcrest.

Future Acquisitions Possible: Management continues to be acquisitive, looking for utilities and non-regulated businesses (such as real estate and power generation) in Canada, the Caribbean and the United States.

Note: Averages exclude ATCO Ltd.
Source: Company Reports, Bloomberg, TD Newcrest.

Justification of Target Price

Our $26.00 price target is predicated on our 2008 financial estimates as follows: 1) 50% relative earnings yield of 138% (vs. historical average of 137%), 2) 25% relative dividend yield of 81% (vs. historical average of 82%), and 3) 25% P/B of 1.8 times (vs. historical average of 1.4x). Our target price implies a 3.3% dividend yield and a price-to-earnings ratio of 17.7 times, compared to historical averages of 4.7% and 13.8 times, respectively. We believe Fortis should trade at a modest discount to the sector, reflective of its higher proportionate risk related to its Caribbean operations. Based on Caribbean Utilities' historical trading pattern, we believe utilities domiciled in the Caribbean should be assigned an approximate six times price-to-earnings multiple discount versus the Canadian sector.

Key Risks to Target Price

1) Higher than expected long bond yields, 2) operational disruptions, 3) regulatory surprises, 4) unexpected large acquisitions, 5) sovereign risk, and 6) materially different power prices in Ontario versus our forecast.

Investment Conclusion

In 2007, Fortis is facing lackluster Ontario power prices and all-time low Canadian regulated ROEs. Over the next few years, we believe that Fortis will need to undertake a significant accretive acquisition or large high-return capital project to offset the loss in earnings contribution from the 75 MW Rankine dam in 2009, which is a very profitable asset. The recent pullback in Fortis shares warrants an upgrade to a HOLD. We expect the shares to move sideways given the lack of visible catalysts, and think Fortis is fully valued at these levels, especially now that by our calculations its Caribbean operations generate almost one-third of earnings.

Fortis Inc.

(FTS-T) C$27.10

Resuming Coverage: $3.7 billion Terasen Acquisition a Positive

Event

On February 26, 2007, Fortis announced its intention to acquire Terasen Inc. from Kinder Morgan for $3.7 billion. In conjunction, an equity offering of 38.5 million Subscription Receipts priced at $26.00 for gross proceeds of $1.0 billion was also announced. The offering, including the over-allotment option of an additional 5.8 million Subscription Receipts for a total of 44.3 million Receipts, closed on March 15, 2007. The Subscription Receipts will automatically be exchanged on a one-for-one basis for common shares upon closing of the Terasen acquisition, expected no later than Q3/07.

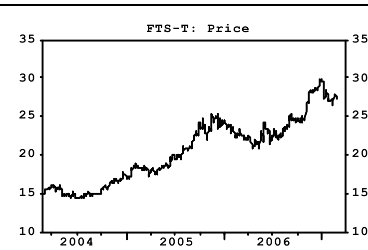
Impact

Positive. Accretive: We have updated our financial forecasts to include this acquisition, and we estimate that it will be $0.02 dilutive to 2007E EPS and $0.08 accretive to 2008E EPS. We note that the dilution in 2007 is a result of the seasonal nature of Terasen's business, in which approximately 50% of earnings have in recent history occurred in the first quarter. Our three-dollar increase in target price primarily reflects our increased forecasts and to a lesser extent valuation expansion from our view of a decreased company risk profile, discussed in detail below.

Price Reflects High Quality Business: At 1.7x equity value to equity rate base we believe the acquisition price is reflective of a high quality, well run business with a positive growth outlook. The acquisition also positions Fortis to possibly become a consolidator in the Northwest or expand further into gas distribution.

Decreased Risk Profile: The introduction of mature Canadian gas distribution operations provides Fortis with a more economically diverse portfolio of assets. Post closing, 87% of Fortis' earnings will be derived from relatively low risk Canadian regulated operations, which lessens the company's reliance on earnings from relatively higher risk Caribbean operations, in our view. We note that Fortis has a proven history of successfully integrating large acquisitions having successfully integrated the former Aquila assets, acquired for $1.5 billion, in 2004.

Company Profile
Fortis Inc. (FTS-T) is a diversified infrastructure holding company, primarily comprising of gas distribution utilities in B.C. and electric utilities in Canada, Belize, Turks and Caicos and the Cayman Islands. Fortis also owns a real estate and hotels subsidiary and has interests in electric generation ventures in Canada and the U.S.



Details

Terasen Inc. is primarily a regulated B.C. gas distribution utility providing service to 95% of the customers in the province. It consists of four companies: 1) Terasen Gas, 2) Terasen Gas Vancouver Island, 3) Terasen Gas (Whistler) and 4) a 30% interest in CustomerWorks LP, a non-regulated, shared service business. Overall, Terasen has $3.6 billion in assets and an aggregate rate base of almost $3.0 billion. We believe the rate base, which serves a high growth Western Canadian economy, can achieve organic growth averaging 2% per year. Longer term, we believe some synergies could be achieved with Fortis' existing electric utilities in the region.

Outlook

Our Fortis forecasts and estimated contribution from Fortis Gas BC (Terasen), which assume the transaction closes at the end of May 2007, are outlined in Exhibits 1-3.

Justification of Target Price

Our $29.00 price target is predicated on our 2008 financial estimates as follows: 1) 50% relative earnings yield of 130% (vs. historical average of 137%), 2) 25% relative dividend yield of 77% (vs. historical average of 82%), and 3) 25% P/B of 1.6 times (vs. historical average of 1.4x). Our target price implies a 3.2% dividend yield and a price-to-earnings ratio of 18.7 times, compared to historical averages of 4.7% and 13.8 times, respectively.

Key Risks to Target Price

1) Higher than expected long bond yields, 2) operational disruptions, 3) regulatory surprises, 4) unexpected large acquisitions, 5) sovereign risk, 6) materially different power prices in Ontario versus our forecast, and 7) integration risk.

Investment Conclusion

We view the Terasen acquisition as a positive event for Fortis. The accretive nature of the transaction not only increases Fortis' earning outlook but should also help offset the loss in earnings contribution from the 75 MW Rankine dam in 2009. The acquisition also increases Fortis' share of regulated Canadian earnings, which decreases its reliance on relatively higher risk Caribbean earnings. In addition to the announced Terasen acquisition, in the past year Fortis has increased its interest is Caribbean Utilities and acquired a Turks & Caicos utility; however, moving forward, we believe acquisition activity will be muted as we expect management's focus will be on the integration of the Terasen assets.

Fortis Inc.

(FTS-T) C$28.08

Q1 In-Line; Terasen Gas Acquisition on Track

Event

Fortis reported normalized Q1/07 EPS (f.d) of $0.36, which was in-line with our estimate and above Q1/06 EPS of $0.34.

Impact

Neutral. We have updated our financial model, with the biggest change being the inclusion of subscription receipts in our 2007E diluted EPS calculation.

Details

Regulated Utilities – Canadian Q1/07 earnings increased $2.9 million to $38.0 million (Exhibit 1). The increase was primarily a result of a $2.4 million increase in FortisAlberta earnings, which benefited from a $4.1 million corporate tax recovery as well as electric sales growth.

Regulated Utilities – Caribbean normalized earnings more than doubled to $6.5 million. The increase was primarily a result of a full quarter contribution from Fortis Turks and Caicos, acquired August 2006, and decreased finance charges and higher electricity sales growth in Belize Electricity.

Fortis Generation earnings increased $1.9 million year-over-year to $7.3 million. The increase was primarily a result of a 63% increase in Belize hydroelectric production due to higher rainfall and the operation of the Chalillo dam. A 3% increase in Ontario average electricity prices to $52.61/MWh also positively affected earnings.

Fortis Properties earnings increased 20% year-over-year to $1.8 million. The increase was mainly a result of the four hotels purchased in western Canada in Q1/07, partially offset by higher finance and amortization expenses.

Corporate expenses increased $1.2 million to $9.7 million during the quarter mainly as a result of increased financing charges and dividends on preference shares issued September 2006.

Company Profile

Fortis Inc. (FTS-T) is a diversified infrastructure holding company, primarily comprising of gas distribution utilities in B.C. and electric utilities in Canada, Belize, Turks and Caicos and the Cayman Islands. Fortis also owns a real estate and hotels subsidiary and has interests in electric generation ventures in Canada and the U.S.

Outlook

$3.7 billion Terasen Gas Acquisition Expected to Close in Q2/07: The BC regulator approved the acquisition on April 30th, and now the only remaining large closing condition is the separation of Kinder Morgan's Canadian petroleum business from Terasen Inc. On April 27, Inter Pipeline announced it expects to close its acquisition of Kinder Morgan's Corridor oil sands pipeline by mid-May, which suggests to us that Fortis' acquisition of Terasen Gas could close shortly thereafter. For a more in-depth analysis of Fortis' acquisition of Terasen Gas please see our March 15, 2007 Action Note titled "***Resuming Coverage: $3.7 billion Terasen Acquisition a Positive***".

Strong Regulated Rate Base Growth Expected: Fortis expects electric utility capital expenditures of $2.8 billion over the next five years, which it believes will translate into its electric utility capital assets growing at an average rate of 7-8%. The majority of this growth is expected to be driven by the western Canadian and Caribbean utilities. Assuming the Terasen Gas acquisition closes, the company believes an additional $1.0 billion would be spent over the next five years on its gas utility assets.

A Brief Pause in Acquisition Activity: In the near future we expect Fortis will be focused on the integration of Terasen Gas. However, beyond that we expect Fortis will continue to be acquisitive in its existing geographies and businesses. In our view, the acquisition of Terasen Gas positions Fortis to possibly become a consolidator in the Northwest and also provides the company with a platform for growth in gas distribution.

Source: Bloomberg, TD Newcrest.

Justification of Target Price

Our $29.00 price target is predicated on our 2008 financial estimates as follows: 1) 50% relative earnings yield of 130% (vs. historical average of 137%), 2) 25% relative dividend yield of 77% (vs. historical average of 82%), and 3) 25% P/B of 1.6 times (vs. historical average of 1.4x). Our target price implies a 3.2% dividend yield and a price-to-earnings ratio of 18.7 times, compared to historical averages of 4.7% and 13.8 times, respectively.

Key Risks to Target Price

1) Higher than expected long bond yields, 2) operational disruptions, 3) regulatory surprises, 4) unexpected large acquisitions, 5) sovereign risk, 6) materially different power prices in Ontario versus our forecast, and 7) integration risk.

Investment Conclusion

In 2007, we expect high regulated rate base growth and FortisAlberta tax planning to mitigate the effects of historically low regulated ROEs and strength in the Canadian dollar. We view the pending Terasen Gas acquisition as positive not only due to its accretive nature but also because it should help offset the loss in earnings contribution from the 75 MW Rankine dam in 2009. Terasen Gas will also increase Fortis' share of high quality regulated Canadian earnings, which decreases its reliance on relatively higher risk Caribbean earnings. At current levels we view Fortis as fairly valued and recommend investors HOLD Fortis.

Fortis Inc.

(FTS-T) C$26.05

Q2/07 In-Line; Focus Remains on Integrating Terasen Gas

Event

Fortis reported Q2/07 EPS (f.d.) of $0.27, in-line with our $0.28 estimate and down slightly versus normalized Q2/06 EPS of $0.32.

Impact

Neutral.

Details

Regulated Electric Utilities – Canadian Q2/07 earnings increased $8.6 million year-over-year to $34 million.

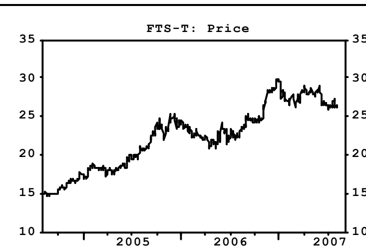
- **FortisAlberta** contributed the bulk of the increase with earnings of $15.5 million, a $4.2 million increase over Q2/06. The majority of the increase was due to higher revenues from customer growth, increased energy deliveries, and a 0.7 percent increase in distribution rates in Q1/07.
- **FortisBC** earnings were up $3.1 million to $6.5 million, nearly doubling year-over-year. This was mainly attributed to a 3.3 percent hike in electricity rates in 2007, higher electricity sales, and lower energy supply costs, partially offset by increased operating expenses, amortization, and finance charges.
- **Other Canadian Electric Utilities (Maritime Electric & FortisOntario)** earnings were higher year-over-year, increasing by $1.3 million to $4 million. This was primarily due to a 3.35 percent increase in basic electricity rates at Maritime Electric in Q3/06, and an increase in distribution rates at FortisOntario, effective May 1, 2007.

Regulated Gas Utilities (Terasen) reported $1.6 million in earnings since acquired by Fortis May 17, 2007. For more details about Terasen Gas, please see our Fortis Action Note dated March 15, 2007, titled *"Resuming Coverage: $3.7 Billion Terasen Acquisition a Positive"*.

Regulated Utilities – Caribbean earnings increased $3.2 million to $7.6 million in the quarter, largely driven by higher contribution from Fortis Turks and Caicos (acquired August 2006), together with electricity sales growth and lower finance charges at Belize Electricity. Partially offsetting the increase were higher operating expenses and amortization costs in Caribbean Utilities.

Company Profile

Fortis Inc. (FTS-T) is a diversified infrastructure holding company, primarily comprising of gas distribution utilities in B.C. and electric utilities in Canada, Belize, Turks and Caicos and the Cayman Islands. Fortis also owns a real estate and hotels subsidiary and has interests in electric generation ventures in Canada and the U.S.



Fortis Generation earnings of $4.9 million declined 18 percent primarily as a result of decreased rainfall in Belize, central Newfoundland and Upper New York State.

Fortis Properties earnings of $6 million increased $1 million year-over-year. The increase was mainly due to contributions from the four hotels in western Canada acquired in November 2006, and was partially offset by higher operating expenses brought on by expansion and general inflationary cost increases. On August 1, 2007, Fortis also completed the acquisition of Delta Regina.

Corporate expenses increased $5.9 million to $12.6 million largely due to increased finance charges, especially those related to the Terasen acquisition ($4.9 million).

Notes:
1) Q2/07 Terasen Gas earnings are from May 17, 2007
2) Q2/06 excludes a one-time $1.2 million pre-tax (0.7 million after-tax) gain on insurance related to the Dolgeville plant in NY
3) Q2/06 excludes a $1.6 million after-tax (2.1 million pre-tax) gain on the sale of Days Inn Sydney hotel, and a $1.5 milion one-time impact of reduction in tax rates on future income tax balances

Source: Company Reports, TD Newcrest.

Outlook

Fortis' pending regulatory initiatives include the following:

- **Newfoundland Power** has submitted its 2008 General Rate Application (GRA) to the regulator requesting an overall average increase to current electricity rates of approximately 5.3 percent, effective January 1, 2008. Among other items, the utility is requesting a change in the ROE formula to be similar to that which is used in other Canadian jurisdictions, as well as an increase in ROE to 10 percent (versus 8.6 percent in 2007). A hearing is expected during fall 2007. At this point our current financial forcasts do not incorporate these requested changes.
- **FortisAlberta** filed its 2008/2009 Distribution Access Tariff Application to the regulator, for the purpose of increasing base distribution rates by 8.5 percent, effective January 1, 2008 and by 9.0 percent, effective

January 1, 2009. The requested rate increases are primarily to fund significant investments in electrical infrastructure in order to meet customer growth and improve system reliability.

- **Maritime Electric** will be applying for a rate base change with the Island Regulatory and Appeals Commission (IRAC) in the fall of 2007 with the intention of setting rates for 2008.
- **Belize Electricity** is appealing the Public Utilities Commission's final decision on its Annual Tariff Review Application over a number of items that include power costs, commercial loss targets, and penalties associate with reliability targets. If a favourable outcome does not materialize for Belize, legal action may be taken through court proceedings to settle the matter. We believe that if the hearing and/or litigation is adjourned without a positive result, it could negatively affect 2007 earnings by approximately $1 million.

Source: Bloomberg, TD Newcrest.

Justification of Target Price

Our $28.00 target price is predicated on 50% of our 2008 & 50% of our 2009 financial estimates as follows: 1) 50% relative earnings yield of 122% (vs. historical average of 132%), 2) 25% relative dividend yield of 75% (vs. historical average of 80%), and 3) 25% P/B of 1.5 times (vs. historical average of 1.5x). Our target price implies a 3.4% dividend yield and a price-to-earnings ratio of 17.8x, compared to historical averages of 4.7% and 13.8x, respectively.

Key Risks to Target Price

1) Higher than expected long bond yields, 2) operational disruptions, 3) regulatory surprises, 4) unexpected large acquisitions, 5) sovereign risk, 6) materially different power prices in Ontario versus our forecast, and 7) integration risk.

Investment Conclusion

In the second quarter, Fortis benefited from western Canadian utility rate base growth and Alberta tax planning, partially offset by a seasonally weak period for the gas utility. We expect these factors will also drive Q3/07 results. Over the next year, Fortis will likely be focused on integrating the recent Terasen acquisition, as the addition of gas distribution doubles the company's investment in regulated utilities. Once the integration is complete, we expect Fortis will ramp up its efforts to acquire regulated gas and electric utilities in Canada, the Caribbean, and the United States. The acquisition of Terasen makes Fortis the largest investor-owned gas and electric distribution utility in Canada, and therefore we view it as a core holding for low-risk blue-chip portfolios.

Fortis Inc.

(FTS-T) C$25.17

Upgrading to BUY Due to Recent Share Price Decline

Event

Fortis has underperformed the sector this year-to-date, declining in value almost 16 percent versus a sector average decline of just under 5 percent. To date this month of August 2007, pipeline, power and utility corporations as a whole have pulled back in sympathy with the broader markets and Fortis has been no exception to this dynamic.

Impact

Positive. We view Fortis' valuation as more compelling at these lower levels. It has recently been trading at 16.9x price-to-forward earnings, a discount to the 17.6x sector average and below the 17.8x implied by our Fortis target price.

There has been no change to our fundamental outlook for Fortis. We forecast an EPS CAGR of 6 percent to the end of 2009 from 2006, and an accelerated dividend CAGR of 14 percent over this same period. We expect Fortis' dividend growth will be driven by an increase in payout ratio to just over 60 percent in 2009 from slightly under 50 percent in 2006, which will be more in-line with the payout ratios of comparable corporations.

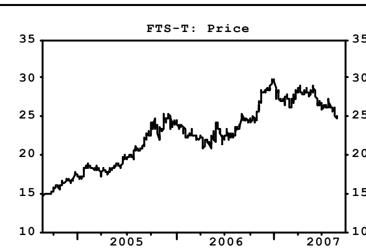
Given the stability of Fortis' core businesses, especially with the addition of Terasen Gas, we view the company as a very low-risk investment. By 2009, almost three-quarters of the company's earnings prior to corporate expenses will be derived from Canadian electric and gas utilities, by our calculations. When this low-risk is combined with the company's strong dividend growth, we believe Fortis has defensive appeal in a volatile market environment.

Outlook

Over the next year, Fortis will likely be focused on integrating the recent Terasen acquisition, as the addition of gas distribution doubles the company's investment in regulated utilities. Once the integration is complete, we expect Fortis will ramp up its efforts to acquire regulated gas and electric utilities near or within the current regions in which it operates.

Company Profile

Fortis Inc. (FTS-T) is a diversified infrastructure holding company, primarily comprising of gas distribution utilities in B.C. and electric utilities in Canada, Belize, Turks and Caicos and the Cayman Islands. Fortis also owns a real estate and hotels subsidiary and has interests in electric generation ventures in Canada and the U.S.



Please see the final pages of this document for important disclosure information.

Source: Bloomberg, TD Newcrest.

Justification of Target Price

Our $28.00 target price is predicated on 50% of our 2008 & 50% of our 2009 financial estimates as follows: 1) 50% relative earnings yield of 122% (vs. historical average of 132%), 2) 25% relative dividend yield of 75% (vs. historical average of 80%), and 3) 25% P/B of 1.5 times (vs. historical average of 1.5x). Our target price implies a 3.4% dividend yield and a price-to-earnings ratio of 17.8x, compared to historical averages of 4.7% and 13.8x, respectively.

Key Risks to Target Price

1) Higher than expected long bond yields, 2) operational disruptions, 3) regulatory surprises, 4) unexpected large acquisitions, 5) sovereign risk, 6) materially different power prices in Ontario versus our forecast, and 7) integration risk.

Investment Conclusion

We expect Fortis to benefit from Alberta tax planning in the near term and strong western Canadian utility rate base growth over the longer term. Management's continued focus on accretive acquisitions will likely continue after the integration of Terasen Gas is complete, which should translate into continued above-utility average growth for the company.

We believe the pull-back in the share price presents an excellent opportunity to buy the largest investor-owned gas and electric distribution utility in Canada, as we view Fortis to be a core holding for low-risk blue-chip portfolios.

Downgrading to HOLD Based on Valuation

Event

We are downgrading Fortis to HOLD from Buy due to price appreciation. Since upgrading Fortis on August 24, 2007 it has outperformed the sector increasing in value almost 7% versus the sector average increase of only 3%. We note that Fortis is expected to release its Q3/07 results on November 2, 2007. For an in-depth view of our quarterly expectations, please see our Q3/07 Preview and Sector Update bulletin, published in parallel with this note.

Impact

Neutral with Respect to Fundamentals – Downgrade is a Function of Share Price Appreciation. We view the units as more fairly valued and expect them to generate returns in line with similarly rated stocks in our coverage universe.

There has been no change to our fundamental outlook for Fortis. We forecast an EPS CAGR of 6 percent to the end of 2009 from 2006, and an accelerated dividend CAGR of 14 percent over this same period. We expect Fortis' dividend growth will be driven by an increase in payout ratio to just over 60 percent in 2009 from slightly under 50 percent in 2006, which will be more in-line with the payout ratios of comparable corporations.

Company Profile

Fortis Inc. (FTS-T) is a diversified infrastructure holding company, primarily comprising of gas distribution utilities in B.C. and electric utilities in Canada, Belize, Turks and Caicos and the Cayman Islands. Fortis also owns a real estate and hotels subsidiary and has interests in electric generation ventures in Canada and the U.S.

Source: Bloomberg, TD Newcrest.

Justification of Target Price

Our $28.00 target price is predicated on 50% of our 2008 & 50% of our 2009 financial estimates as follows: 1) 50% relative earnings yield of 122% (vs. historical average of 132%), 2) 25% relative dividend yield of 75% (vs. historical average of 80%), and 3) 25% P/B of 1.5 times (vs. historical average of 1.5x). Our target price implies a 3.4% dividend yield and a price-to-earnings ratio of 17.8x, compared to historical averages of 4.7% and 13.8x, respectively.

Key Risks to Target Price

1) Higher than expected long bond yields, 2) operational disruptions, 3) regulatory surprises, 4) unexpected large acquisitions, 5) sovereign risk, 6) materially different power prices in Ontario versus our forecast, and 7) integration risk.

Investment Conclusion

Over the next year, Fortis will likely be focused on integrating the recent Terasen Gas acquisition, as the addition of gas distribution doubles the company's investment in regulated utilities. Once the integration is complete, we expect Fortis will ramp up its efforts to acquire regulated gas and electric utilities in Canada, the Caribbean, and the United States. The acquisition of Terasen makes Fortis the largest investor-owned gas and electric distribution utility in Canada, and therefore we view it as a core holding for low-risk blue-chip portfolios. However, given the recent price appreciation we are compelled to downgrade Fortis to a HOLD from Buy.

Gas Utility Shifts Seasonality of Fortis Earnings

Event

Fortis reported Q3/07 EPS (f.d.) of $0.20, below our $0.23 estimate and Q3/06 EPS (f.d.) of $0.36.

Impact

Neutral.

Details

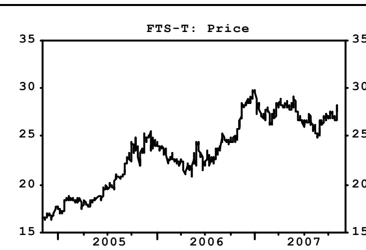
Regulated Electric Utilities – Canadian Q3/07 earnings increased $2.7 million year-over-year to $28.0 million.

- **FortisAlberta** contribution increased $2.4 million to $14.7 million in the quarter largely due to higher revenues from customer growth, a 0.7% hike in distribution rates on January 1, 2007, and higher corporate income tax recoveries.
- **FortisBC** earnings were $6.2 million in the quarter, $0.5 million higher than Q3/06. A 3.3% increase in electricity rates on January 1, 2007 and higher electricity sales were the main drivers of the increase. Partially offsetting the results were higher operating expenses, amortization, and finance charges.
- **Other Canadian Electric Utilities (Maritime Electric & FortisOntario)** earnings decreased $0.3 million year-over-year to $4.4 million as a result of lower electricity sales at FortisOntario and higher operating and amortization costs.

Regulated Gas Utilities (Terasen) experienced a loss of $3.7 million due largely to the seasonality of the business, as the majority of its earnings are generated in the first and fourth quarters of the year. Acquired by Fortis during Q2/07, Q3/07 earnings were comparable to previous third quarter results.

Regulated Utilities – Caribbean earnings totaled $9.8 million, $2.1 million higher year-over-year. The increase was due to a full quarter contribution at Turks and Caicos (acquired on August 28, 2006) and an increased investment in Caribbean Utilities. Partially offsetting the increase was Belize Electricity, which experienced increased operating expenses from higher employee related costs, and amortization costs from investment in capital assets. Note

Company Profile
Fortis Inc. (FTS-T) is a diversified infrastructure holding company, primarily comprising of gas distribution utilities in B.C. and electric utilities in Canada, Belize, Turks and Caicos and the Cayman Islands. Fortis also owns a real estate and hotels subsidiary and has interests in electric generation ventures in Canada and the U.S.



that the segment incurred a $0.8 million foreign exchange loss due to the appreciating Canadian dollar.

Fortis Generation earnings of $5.0 million were $2.8 million lower than the comparable period in 2006. The decline was mainly due to decreased production as a result of lower rainfall in most of the operating regions.

Fortis Properties reported $8.0 million in earnings, $1.7 million higher than Q3/06 results. The increase was primarily due to growth in western Canadian hospitality operations and increased revenue from the expanded Ontario hotels. Partially offsetting the increase were higher operating costs associated with growth in western Canada and increased finance charges.

Corporate expenses increased to $16.3 million, up $8.0 million year-over-year largely due to a $10.4 million finance charge associated with the Terasen acquisition, increased operating expenses from the inclusion of Terasen holding company and CWLP operating costs, and preference share dividends.

Outlook

Fortis' regulatory updates include the following:

- **FortisAlberta** recently filed a Negotiated Settlement Agreement with its regulator regarding its 2008 and 2009 revenue requirement. The filing is requesting a 6.7% distribution rate increase in 2008 and a 7.3% rate increase in 2009 primarily to fund capital expenditures to meet the demand of its customers.
- **FortisBC** filed a preliminary 2008 Revenue Requirements Application on October 1, 2007. The application is requesting a 4.0% increase in customer electricity rates, effective January 1, 2008. The requested rate increase is mainly to support an extensive capital investments program and higher purchased power costs from increased customer growth and electricity demand.
- **Newfoundland Power** filed a revision to its 2008 General Rate Application with its regulator on October 11, 2007. The filing requested a 2.8% average increase in electricity rates, down from its original proposal of 5.3%, effective January 1, 2008. This reduction is mainly due to recent negotiations between Newfoundland Power and the Consumer Advocate. In addition, an allowed 2008 ROE of 8.95% was agreed upon.

Terasen Integration A Priority: Over the next year, Fortis will likely be focused on integrating the recent Terasen acquisition, as the addition of gas distribution doubles the company's investment in regulated utilities.

Once the integration is complete, we expect Fortis will ramp up its efforts to acquire regulated gas and electric utilities near or within the current regions in which it operates.

Note: Averages exclude ATCO due to its holding company nature.

Source: Thomson, TD Newcrest.

Justification of Target Price

Our $28.00 target price is predicated on 25% of our 2008 & 75% of our 2009 financial estimates as follows: 1) 50% relative earnings yield of 121% (vs. historical average of 132%), 2) 25% relative dividend yield of 76% (vs. historical average of 80%), and 3) 25% P/B of 1.5 times (vs. historical average of 1.5x). Our target price implies a 3.5% dividend yield and a price-to-earnings ratio of 17.9x, compared to historical averages of 4.4% and 14.4x, respectively.

Key Risks to Target Price

1) Higher than expected long bond yields, 2) operational disruptions, 3) regulatory surprises, 4) unexpected large acquisitions, 5) sovereign risk, 6) materially different power prices in Ontario versus our forecast, and 7) integration risk.

Investment Conclusion

The quarter highlighted continued strength in western Canadian electric utilities, although we view the third quarter results neutrally as the spotlight continues to center on the integration of the Terasen Gas acquisition. We expect Q4/07 results to grow due to the seasonally strong gas utilities contribution. With the addition of Terasen, Fortis is the largest investor-owned gas and electric distribution utility in Canada, and therefore we view it as a core holding for low-risk blue-chip portfolios. At current levels we view Fortis as fairly valued and recommend a HOLD rating.

Fortis Inc.

(FTS-T) C$29.24

Terasen Gas Acquisition Drives Strong Year-Over-Year Growth

Event

Fortis reported normalized Q4/07 EPS (f.d.) of $0.45, largely in-line with our $0.43 estimate and above Q4/06 EPS (f.d.) of $0.32.

Impact

Neutral. We have updated our financial forecasts, primarily to reflect slightly higher corporate costs.

Details

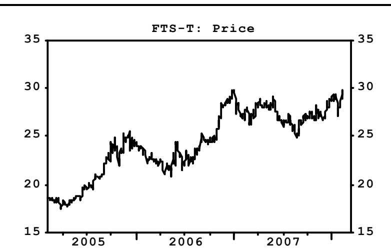
Regulated Gas Utilities (Terasen), acquired by Fortis during Q2/07, recorded normalized income of $45 million. We note that Terasen is a seasonal business, with the majority of its earnings generated in the first and fourth quarters of the year. Terasen Q4/07 earnings were consistent with Fortis' expectations and to previous fourth quarter results.

Regulated Electric Utilities – Canadian Q4/07 earnings declined $2 million year-over-year to $25 million.

- **FortisAlberta** contribution declined $3 million to $6 million largely due to higher operating, amortization and financing costs.
- **FortisBC** earnings increased slightly to $7 million. A 3.3% increase in electricity rates was the main driver of the increase, which more than offset higher operating expenses and lower electricity sales.
- **Newfoundland Power** earnings of $9 million were comparable year-over-year as higher electricity sales were offset by lower electricity rates.
- **Other Canadian Electric Utilities (Maritime Electric & FortisOntario)** earnings of $3 million were comparable year-over-year. A $2 million refund related to an interconnection arrangement at FortisOntario was largely offset by higher amortization and finance charges.

Regulated Utilities – Caribbean earnings totaled $9 million, $1 million higher year-over-year. The increase was mainly due an increased investment in Caribbean Utilities, which more than offset lower Caribbean Utilities earnings and a $1 million unfavourable impact due to the strengthening Canadian dollar.

Company Profile
Fortis Inc. (FTS-T) is a diversified infrastructure holding company, primarily comprising of gas distribution utilities in B.C. and electric utilities in Canada, Belize, Turks and Caicos and the Cayman Islands. Fortis also owns a real estate and hotels subsidiary and has interests in electric generation ventures in Canada and the U.S.



Fortis Generation earnings of $7 million were in-line with the comparable period in 2006. Lower energy production due to lower rainfall in most operating regions was offset by higher Ontario power prices and lower operating expenses.

Fortis Properties reported $4 million of normalized earnings, $1 million higher than Q4/06 results. The increase was primarily due to growth in western Canadian hospitality operations.

Corporate expenses increased to $18 million, up $7 million year-over-year largely due to $10 million of finance charges associated with the Terasen acquisition.

Exhibit 1. Segmented Earnings Analysis ($mm)

	Q4/07	Q4/06	YOY Change	YOY % Change

Reported EPS (basic)	$0.51	$0.33	$0.18	56%
Operating EPS (f.d)	**$0.45**	**$0.32**	**$0.13**	**42%**
Reported EPS (f.d)	$0.49	$0.32	$0.18	55%

Note: Reported earnings have been normalized to reflect the following:
1) $7.0 million gain on the sale of surplus land in Q4/07.
2) Charges to future tax expense of $4 million in Properties due to the reduction of future income tax asset balances.
3) Reduction in tax recovery of $4 million in Corporate as a result of purchase price allocation tax adjustments and the impact of lower enacted future income tax rates on future income tax assets.

Source: Thomson, TD Newcrest.

Justification of Target Price

Our $28.00 target price is predicated on our 2009 financial estimates as follows: 1) 50% relative earnings yield of 116% (vs. historical average of 132%), 2) 25% relative dividend yield of 84% (vs. historical average of 80%), and 3) 25% P/B of 1.5 times (vs. historical average of 1.5x). Our target price implies a 3.9% dividend yield and a price-to-earnings ratio of 18.7x, compared to historical averages of 4.4% and 14.4x, respectively.

Key Risks to Target Price

1) Higher than expected long bond yields, 2) operational disruptions, 3) regulatory surprises, 4) unexpected large acquisitions that do not create shareholder value, 5) sovereign risk, 6) materially different power prices in Ontario versus our forecast, and 7) integration risk.

Investment Conclusion

The recently acquired Terasen Gas made a strong contribution to Fortis' Q4/07 EPS. Now that the integration of the gas utility has progressed substantially, we expect Fortis will ramp up its efforts to acquire regulated gas and electric utilities in Canada, the Caribbean, and the United States. The acquisition of Terasen makes Fortis the largest investor-owned gas and electric distribution utility in Canada, and therefore we view it as a core holding for low-risk blue-chip portfolios.

Fortis Inc.

(FTS-T) C$27.99

Seasonal Terasen Strength Benefits Q1/08

Event

Fortis reported Q1/08 EPS (f.d.) of $0.55, above our $0.49 estimate and normalized Q1/07 EPS (f.d.) of $0.36.

Impact

Mildly Positive.

Details

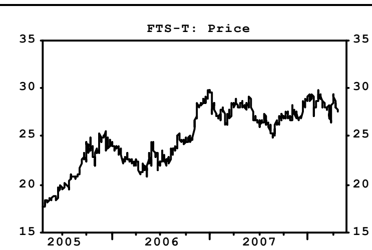
Regulated Gas Utilities (Terasen), acquired May 2007**,** recorded income of $58 million. Recall that Terasen is a seasonal business, with the majority of its earnings generated in the first and fourth quarters of the year. Fortis noted that Terasen's performance was consistent with its expectations and that the acquisition became accretive to earnings in the quarter.

Regulated Electric Utilities – Canadian Q1/08 earnings declined $6 million year-over-year to $33 million.

- **FortisAlberta** contribution declined $1 million to $11 million during the quarter. Customer growth and higher rates were more than offset by lower corporate tax recoveries and higher labour and amortization charges.
- **FortisBC** earnings of $12 million were in-line with Q1/07 levels. Customer rate increases and lower corporate taxes were offset by increased energy supply costs and higher amortization and finance charges.
- **Newfoundland Power** earnings of $6 million declined 45% year-over-year. This large decline was mainly related to a change in the quarterly allocation of annual purchase power expense, which lowered earnings by $6 million. Newfoundland Power's annual earnings are not expected to be impacted by this change. We note that excluding this change the segment's earnings would have increased $1 million year-over-year due to higher electricity sales and customer rates.
- **Other Canadian Electric Utilities (Maritime Electric & FortisOntario)** earnings of $4 million were comparable year-over-year.

Company Profile

Fortis Inc. (FTS-T) is a diversified infrastructure holding company, primarily comprising of gas distribution utilities in B.C. and electric utilities in Canada, Belize, Turks and Caicos and the Cayman Islands. Fortis also owns a real estate and hotels subsidiary and has interests in electric generation ventures in Canada and the U.S.



Please see the final pages of this document for important disclosure information.

Regulated Utilities – Caribbean normalized earnings totaled $7 million, $1 million higher year-over-year. The increase was mainly due to strong electricity sales growth and the flow through of fuel costs, which partially offset increased finance and amortization charges as well as a $1 million unfavourable impact from a stronger Canadian dollar.

Fortis Generation earnings of $6 million declined $1 million versus the comparable period in 2007. Lower energy production and a $0.5 million unfavourable impact from a stronger Canadian dollar were the main reasons for the decline.

Fortis Properties reported earnings of $3 million, $1 million higher than Q1/07 results. The increase was primarily due to the incremental contribution from Delta Regina, which was acquired August 2007.

Corporate expenses increased to $16 million from $10 million in Q1/07 largely due to $6.5 million of after-tax finance charges associated with the Terasen acquisition.

Note: 1) Q1/07 excludes a one-time loss of approximately $2 million related to the disposal of steam turbines.
Source: Company Reports, TD Newcrest.

Outlook

Introducing 2010 Estimates: We forecast 2010 EPS to increase four-cents versus 2009 mainly as a result of higher utility earnings, due to rate base growth, and to a lesser extent, increased Fortis Properties earnings. We expect lower Fortis Generation earnings will partially offset these factors as the incremental contribution from the 18 MW Vaca Hydroelectric Facility, scheduled to enter service late 2009, will be outweighed by the loss of earnings from the Rankine Dam beginning May 2009 (earnings of approximately $15 million in 2007).

Belize Regulatory Developments: In March 2008, Belize Electricity filed for a 15% increase in the power component of rates due to increasing fuel costs resulting from high oil prices. This application was declined as the regulator deferred its analysis until the next Annual Tariff Review and cited that in the interim a decrease in operating and capital expenditures would help offset the impact in cash flow. In April 2008, Belize Electricity filed its Annual Tariff Review for July 2008 to June 2009 that requested a 13.4% average rate increase; a final decision on this application is expected in Q2/08.

FortisOntario Refund Rescinded: FERC declared in April 2008 that it did not have jurisdiction to order a $2 million after-tax refund in Q4/07 related to an interconnection arrangement between FortisOntario and Niagara Mohawk Power. FERC expects Niagara Mohawk Power to be able to recover the refunded amounts and FortisOntario has until May 17, 2008 to request a rehearing. We expect the refund will be returned resulting in a one-cent charge to Fortis' Q2/08 earnings.

Source: Thomson, TD Newcrest.

Justification of Target Price

Our $29.00 target price is predicated on our 2009 financial estimates as follows: 1) 50% relative earnings yield of 129% (vs. historical average of 132%), 2) 25% relative dividend yield of 93% (vs. historical average of 80%), and 3) 25% P/B of 1.6 times (vs. historical average of 1.5x). Our target price implies a 3.7% dividend yield and a price-to-earnings ratio of 19.3x, compared to historical averages of 4.4% and 14.4x, respectively.

Key Risks to Target Price

1) Higher than expected long bond yields, 2) operational disruptions, 3) regulatory surprises, 4) unexpected large acquisitions, 5) sovereign risk, 6) materially different power prices in Ontario versus our forecast, and 7) integration risk.

Investment Conclusion

The quarter benefited from a strong incremental contribution from Terasen Gas, although we believe that some of the strength in the quarter was timing related. Now that the integration of the gas utility has progressed substantially, we expect Fortis to ramp up its efforts to acquire regulated gas and electric utilities in Canada, the Caribbean, and the United States. The acquisition of Terasen makes Fortis the largest investor-owned gas and electric distribution utility in Canada, and therefore we view it as a core holding for low-risk blue-chip portfolios. At current levels we view Fortis as fairly valued and recommend a HOLD rating.

Fortis Inc.

(FTS-T) C$26.42

Upgrading to BUY on Valuation

Event

We are upgrading Fortis Inc. to BUY from hold due to the recent decline in share price. In addition, we are changing our Fortis forecasts to largely reflect updates to our utility models and a recent Belize Electricity regulatory decision.

Impact

Positive. Since downgrading Fortis on October 22, 2007, Fortis' share price has pulled back approximately 1% while shares for comparable corporations in the space have increased by 10% on average (Exhibit 1). Fortis shares were also the bottom performer in Q2/08 versus its comparable group and experienced a decline of 7% versus an average gain of 7% for its comps. We believe investors may have overreacted to a recent Belize Electricity decision and view the recent decline in Fortis' stock price as a buying opportunity.

Exhibit 1. Recent Share Price Performance

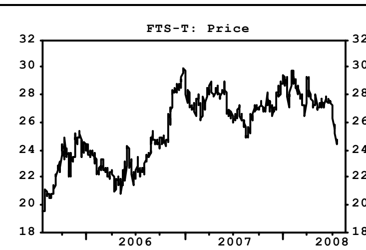
Corporation	Ticker	Recent Closing Price	Closing Price On Oct. 21 2007	Price Performance
Fortis Inc.	FTS	$26.42	$26.80	-1%
ATCO Ltd.	ACO.X	$52.03	$57.25	-9%
Canadian Utilities Ltd.	CU	$44.30	$48.50	-9%
Emera Inc.	EMA	$22.56	$19.54	15%
Enbridge Inc.	ENB	$43.73	$37.00	18%
TransAlta Corp.	TA	$36.97	$30.90	20%
TransCanada Corp.	TRP	$39.00	$37.00	5%
Average				10%

Note: Average does not include FTS, ACO.X.
Source: Thomson, TD Newcrest.

Details

We are marginally increasing our annual Fortis EPS estimates to largely reflect changes to our financial model, the most notable being updates to our utility models and lower corporate expenses (Exhibit 2). In addition, the Belizean Public Utilities Board in late June issued a decision, which disallowed previously incurred power costs and lowered Belize Electricity's return on assets to 10% from 12%. Fortis will likely book the results of this decision, which will likely negatively affect annual EPS by approximately

Company Profile
Fortis Inc. (FTS-T) is a diversified infrastructure holding company, primarily comprising of gas distribution utilities in B.C. and electric utilities in Canada, Belize, Turks and Caicos and the Cayman Islands. Fortis also owns a real estate and hotels subsidiary and has interests in electric generation ventures in Canada and the U.S.



$0.04 to $0.05 or about a penny a quarter. Our Q2/08 EPS estimate drops slightly to account for this announcement. We note that Fortis plans to challenge this decision but the timeline for the appeal process is unknown at this point.

Exhibit 2. Summary of Fortis' EPS Changes

	New	Old	Change
Q2/08E	0.28	0.30	-7%
2008E	1.47	1.43	3%
2009E	1.54	1.50	3%
2010E	1.57	1.54	2%

Note: Averages exclude ATCO due to its holding company nature.

Source: Thomson, TD Newcrest.

Justification of Target Price

Our $29.00 target price is predicated on our 2009 financial estimates as follows: 1) 50% relative earnings yield of 129% (vs. historical average of 132%), 2) 25% relative dividend yield of 93% (vs. historical average of 80%), and 3) 25% P/B of 1.6 times (vs. historical average of 1.5x). Our target price implies a 3.7% dividend yield and a price-to-earnings ratio of 19.3x, compared to historical averages of 4.4% and 14.4x, respectively.

Key Risks to Target Price

1) Higher than expected long bond yields, 2) operational disruptions, 3) regulatory surprises, 4) unexpected large acquisitions, 5) sovereign risk, 6) materially different power prices in Ontario versus our forecast, and 7) integration risk.

Investment Conclusion

We believe Fortis' share price has overreacted to the recent Belize Electricity decision. Indeed, our target price already reflects the relatively higher sovereign risk of the Belize and other Caribbean operations. Given the recent underperformance of Fortis shares, we are upgrading Fortis to a BUY.

Fortis Inc.

(FTS-T) C$26.76

Q2/08 Results In-Line With Expectations

Event

Fortis reported normalized Q2/08 EPS (f.d.) of $0.28, in-line with our estimate and above Q2/07 EPS (f.d.) of $0.27.

Impact

Neutral. We have updated our financial model largely to reflect higher utility capital expenditures. Our 2009E EPS (f.d.) estimate increases by $0.02 and our 2010E EPS (f.d.) estimate increases by $0.05. Our target price is now based on 50% of each of our 2009 and 2010 estimates, and therefore increases a dollar.

Details

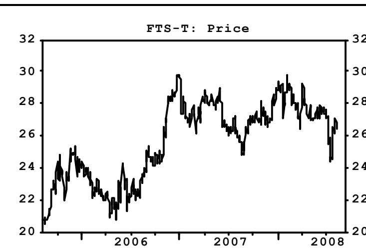
Regulated Gas Utilities (Terasen) recorded earnings of $12.0 million, an increase from $1.6 million in Q2/07 due to a full-quarter contribution from the Terasen Gas acquisition, which closed on May 17, 2007.

Regulated Electric Utilities – Canadian Q2/08 earnings of $28.0 million declined $6.0 million year-over-year.

- **FortisAlberta** contribution declined $8.5 million to $7.0 million during the quarter due to higher corporate income taxes related to regulator-approved deferral accounts and the timing of their collection.
- **FortisBC** earnings of $7.0 million were $0.5 million higher than Q2/07 results primarily due customer rate increases effective January 1, 2008 and May 1, 2008, related to a 2008 ROE increase.
- **Newfoundland Power** earnings of $10.0 million were $2.0 million higher than Q2/07 results. The increase was largely associated with a change in seasonality of purchased power expense, which increased earnings by approximately $2.5 million in the quarter.
- **Other Canadian Electric Utilities (Maritime Electric & FortisOntario)** normalized earnings of $4.0 million were comparable year-over-year.

Company Profile

Fortis Inc. (FTS-T) is a diversified infrastructure holding company, primarily comprising of gas distribution utilities in B.C. and electric utilities in Canada, Belize, Turks and Caicos and the Cayman Islands. Fortis also owns a real estate and hotels subsidiary and has interests in electric generation ventures in Canada and the U.S.



Please see the final pages of this document for important disclosure information.

Regulated Utilities – Caribbean normalized earnings of $8.0 million were essentially flat year-over-year. Sales growth was offset by higher operating expenses, increased amortization costs, and lower electricity rates at Caribbean Utilities.

Fortis Properties earnings of $7.0 million increased from $6.0 million in Q2/07 due to contributions from Delta Regina (acquired August 1, 2007) and improvements in Atlantic Canadian hospitality operations.

Fortis Generation earnings of $7.0 million increased $2.1 million year-over-year largely due to higher rainfall in Newfoundland facilitating increased hydroelectric production.

Corporate expenses of $18.0 million increased $5.4 million year-over-year primarily as a result of higher financing charges related to the Terasen Gas acquisition.

Exhibit 1. Segmented Earnings Analysis ($mm)

	Q2/08	Q2/07	YOY Change	YOY % Change
Regulated Gas Utilities - Canadian	$12.0	$1.6	$10.4	650%

Reported EPS (f.d)	$0.18	$0.27	($0.09)	-32%

Notes: Earnings have been normalized for the following items:
1) A $3mm ($2mm after tax) charge associated with the repayment of a refund at FortisOntario in Q2/08
2) An $18mm ($13mm after tax) charge related to a regulatory decision by the Public Utilities Commission in Belize in Q2/08
Source: Company Reports, TD Newcrest.

Outlook

Capital Program Revised: Management expects to spend approximately $4.5 billion in gross capital expenditures over the next five years, up $500 million from its previous guidance. A large portion of this increase is driven by transmission and metering expenditures at FortisBC, with incremental spending expected at FortisAlberta and the Caribbean operations. The expenditures are expected to be front-end loaded.

Acquisitions May be a Near-Term Focus:

- **Utilities:** With Fortis' recent non-binding letter of intent to acquire a 10 percent interest in Grimsby Power Inc., our perception is that Fortis could continue to potentially acquire increased ownership stakes in larger utilities in Ontario. If the transfer tax were ever to be eliminated, Fortis would be in a strategic position to purchase remaining ownership interests in existing utility investments and could very well be a consolidator in the Ontario utilities space.
- **Properties and Generation:** With the Terasen integration substantially completed, Fortis now has the capacity to potentially pursue other significant utility acquisitions. Smaller tuck-in transactions are a possibility in the real estate domain, with hydro generation less of a focus due to our perception of continued high competition for these assets.

Note: Averages exclude ATCO due to its holding company nature.

Source: Thomson, TD Newcrest.

Justification of Target Price

Our $30.00 target price is predicated on 50% of each of our 2009 and 2010 financial estimates as follows: 1) 50% relative earnings yield of 133% (vs. historical average of 132%), 2) 25% relative dividend yield of 93% (vs. historical average of 80%), and 3) 25% P/B of 1.6 times (vs. historical average of 1.5x). Our target price implies a 3.7% dividend yield and a price-to-earnings ratio of 18.9x, compared to historical averages of 4.4% and 14.4x, respectively.

Key Risks to Target Price

1) Higher than expected long bond yields, 2) operational disruptions, 3) regulatory surprises, 4) unexpected large acquisitions, 5) sovereign risk, 6) materially different power prices in Ontario versus our forecast, and 7) integration risk.

Investment Conclusion

The quarter benefited from a strong incremental contribution from Terasen Gas and offset timing issues in Canadian Regulated Electric Utilities' earnings. Now that the integration of the gas utility has progressed substantially, we expect Fortis to ramp up its efforts to acquire regulated gas and electric utilities in Canada, the Caribbean, and the United States. Fortis is the largest investor-owned gas and electric distribution utility in Canada, and therefore we view it as a core holding for low-risk blue-chip portfolios. At current levels we view Fortis as attractively valued and reiterate our BUY recommendation.

Fortis Inc.

(FTS-T) C$24.04

Upgrading to ACTION LIST BUY

Event

We are upgrading Fortis to an *ACTION LIST* BUY from BUY.

Impact

Positive. At recent levels we believe Fortis presents a compelling risk-return profile. Fortis recently made a new 52-week low and it has underperformed the sector year-to-date, outperforming only ATCO Ltd. and Canadian Utilities Ltd., which in our view have more exposure to a potential economic downturn through their unregulated businesses.

Details

We like Fortis for the following reasons:

- **Low Risk Business Model**: In our view, Fortis' low risk, utility dominated business model should weather any economic storm relatively unscathed. We estimate that approximately 75% of Fortis' 2009E earnings will be derived from Canadian regulated gas and electric utilities (Exhibit 1), and these regulated businesses are expected to drive an 8% EPS CAGR to 2010.

Exhibit 1. Fortis Inc. Model (C$mm)

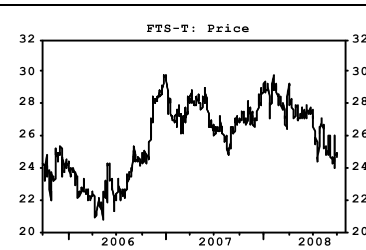
Company Profile
Fortis Inc. (FTS-T) is a diversified infrastructure holding company, primarily comprising of gas distribution utilities in B.C. and electric utilities in Canada, Belize, Turks and Caicos and the Cayman Islands. Fortis also owns a real estate and hotels subsidiary and has interests in electric generation ventures in Canada and the U.S.



Please see the final pages of this document for important disclosure information.

- **Quality Companies Should Continue to Have Access to Capital**: Over the next five years, Fortis' capital expenditures are expected to exceed $4.5 billion, $3.5 billion of which relates to electric utility operations and $1.0 billion within its gas distribution utility. With cash flows from operations forecast to grow to $700 million by 2010, and expected cash dividends just over $200 million, the approximate $500 million remaining cash flows, while significant, will require Fortis to raise external capital to finance the substantial capital program and debt maturities. We believe that quality companies, such as Fortis, will continue to have access to capital even in the toughest market conditions. In addition, we expect that the regulated cost-of-service nature of its utilities should allow the company to recover any potential higher interest rates from its utility customers. Over the past while, Fortis has termed out a lot of its debt; in the first half of 2008 Fortis issued approximately $660 million of long-term debt. This freed up substantial capacity in the company's extensive credit facilities. As of June 30, 2008 the company had aggregate credit facilities in place of almost $2.2 billion, $1.8 billion of which were available. In the event of continued tough debt markets in the medium term, these undrawn credit facilities provide flexibility to defer debt issuances until market conditions become more favourable.

Note: Averages exclude ATCO due to its holding company nature.

Source: Thomson, TD Newcrest.

Justification of Target Price

Our $30.00 target price is predicated on 50% of each of our 2009 and 2010 financial estimates as follows: 1) 50% relative earnings yield of 133% (vs. historical average of 132%), 2) 25% relative dividend yield of 93% (vs. historical average of 80%), and 3) 25% P/B of 1.6 times (vs. historical average of 1.5x). Our target price implies a 3.7% dividend yield and a price-to-earnings ratio of 18.9x, compared to historical averages of 4.4% and 14.4x, respectively.

Key Risks to Target Price

1) Higher than expected long bond yields, 2) operational disruptions, 3) regulatory surprises, 4) unexpected large acquisitions, 5) sovereign risk, 6) materially different power prices in Ontario versus our forecast, and 7) integration risk.

Investment Conclusion

In these volatile equity capital markets, we expect investors will find Fortis' low-risk, utility dominated business model especially attractive. Long-term, we expect Fortis to be well positioned as an aggregator of regulated gas and electric utilities in Canada, the Caribbean, and the United States. Fortis is the largest investor-owned gas and electric distribution utility in Canada, and therefore we view it as a core holding. We believe the recent underperformance presents a compelling risk-return profile and on this basis, we are upgrading Fortis to an *ACTION LIST* BUY.

Fortis Inc.

(FTS-T) C$26.30

Solid Q3 Underpinned by Core Canadian Electric Utilities

Event

Fortis reported normalized Q3/08 EPS (f.d.) of $0.26, exceeding our estimate of $0.21 and Q3/07 EPS (f.d.) of $0.20.

Impact

Mildly Positive. We have updated our financial model primarily to reflect lower regulated ROE estimates in 2009 and 2010. Our target price is now based on 25% of our 2009 and 75% of our 2010 estimates, and remains $30.

Details

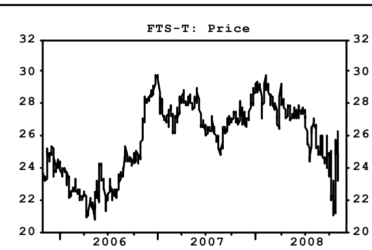
Regulated Gas Utilities (Terasen) recorded a normalized net loss of $4.5 million, an increase of $0.8 million year over year largely due to higher labour costs and amortization from increased capital expenditures.

Regulated Electric Utilities – Canadian Q3/08 earnings of $38.0 million increased 36% over the $28.0 million achieved in Q3/07.

- **FortisAlberta** contribution increased $2.3 million year over year to $17.0 million in the quarter due to higher future income tax recoveries related to regulator approved deferral accounts.
- **FortisBC** earnings of $8.0 million were $1.8 million higher year over year primarily due to lower energy supply costs from an increased proportion of hydroelectric generation over purchased power compared to Q3/07.
- **Newfoundland Power** earnings of $8.0 million nearly tripled Q3/07 results largely from a change in seasonality of purchased power expense, which boosted earnings by approximately $5.5 million in the quarter. We note this is largely timing of expense recognition within a year, with no expected impact on annual earnings.
- **Other Canadian Electric Utilities (Maritime Electric & FortisOntario)** earnings of $5.0 million were slightly higher year over year. Increased electricity rates at Maritime Electric and FortisOntario were largely offset by decreased sales from lower consumption in Ontario.

Regulated Utilities – Caribbean earnings of $7.0 million were down $2.8 million year over year due to 1) decreased average electricity rates at Belize

Company Profile
Fortis Inc. (FTS-T) is a diversified infrastructure holding company, primarily comprising of gas distribution utilities in B.C. and electric utilities in Canada, Belize, Turks and Caicos and the Cayman Islands. Fortis also owns a real estate and hotels subsidiary and has interests in electric generation ventures in Canada and the U.S.



Electricity, 2) a reduction in electricity rates and the elimination of the hurricane cost recovery surcharge at Caribbean Utilities, 3) increased amortization and operating expenses, and 4) loss of revenues from Hurricane Ike.

Fortis Generation earnings of $9.0 million increased $4.0 million from the comparable period in 2007. Higher production as a result of increased rainfall, and growth in average energy prices in Ontario and upper New York State were the main changes year over year.

Fortis Properties earnings increased $1.0 million from Q3/07 results to $9.0 million due to improved performance from the Real Estate and Hospitality operations, and contributions from the Delta Regina (acquired August 1, 2007).

Corporate normalized expenses of $17.0 million increased $0.7 million year over year primarily due to higher preference share dividends.

Notes:
1) Q3/08 excludes a tax reduction of $5.5 million related to historical corporate tax matters at Terasen Gas companies.
2) Q3/08 excludes a tax reduction of $2.0 million related to historical corporate tax matters at Terasen Inc.

Source: Company Reports, TD Newcrest.

Outlook

Company Reaffirms 5-Year Capital Program: Fortis still expects to spend approximately $4.5 billion over the next five years, the bulk of which is allocated to Western Canadian utilities. We expect that this forecast growth in rate base will drive above average and very low-risk EPS growth over the next few years; by our calculations the EPS CAGR to 2010 is 8%.

Liquidity Remains Strong: As at September 30, 2008, Fortis had consolidated credit facilities of $2.2 billion, of which $1.5 billion was available to be drawn.

Regulatory Updates: A number of Fortis' Canadian utilities have filed regulatory applications:

- FortisBC submitted a preliminary 2009 Revenue Requirements Application with its regulator requesting a 5.6% general rate increase effective January 1, 2009. A decision is expected by the end of 2008.
- Maritime Electric filed a rate application requesting basic rate increases effective April 1, 2009. A decision is expected by the end of Q1/09.

- FortisOntario submitted a Cost of Service Application for a rebasing of distribution rates using a 2009 test year. A decision is expected in April 2009.

Note: Averages exclude ATCO due to its holding company nature.

Source: Thomson, TD Newcrest.

Justification of Target Price

Our $30.00 target price is predicated on 25% of our 2009 and 75% of our 2010 financial estimates as follows: 1) 50% relative earnings yield of 131% (vs. historical average of 132%), 2) 25% relative dividend yield of 95% (vs. historical average of 80%), and 3) 25% P/B of 1.6 times (vs. historical average of 1.5x). Our target price implies a 3.8% dividend yield and a price-to-earnings ratio of 19.1x, compared to historical averages of 4.4% and 14.4x, respectively.

Key Risks to Target Price

1) Higher than expected long bond yields, 2) operational disruptions, 3) regulatory surprises, 4) unexpected large acquisitions, 5) sovereign risk, 6) materially different power prices in Ontario versus our forecast, and 7) integration risk.

Investment Conclusion

In our view Fortis had a very strong quarter with higher than expected contributions from Regulated Canadian Electric Utilities and Unregulated Power Generation more than offsetting softer earnings in the Regulated Caribbean Electric Utilities.

In these volatile equity capital markets, we expect investors will find Fortis' low-risk, utility dominated business model especially attractive. Long-term, we expect Fortis to be well positioned as an aggregator of regulated gas and electric utilities in Canada, the Caribbean, and the United States. Fortis is the largest investor-owned gas and electric distribution utility in Canada, and therefore we view it as a core holding. At current levels we believe Fortis presents a compelling risk-return profile and reiterate our Action List BUY recommendation.

Fortis Inc.

(FTS-T) C$24.34

Resuming Coverage Upon Completion of Equity Offering

Event

We are resuming coverage of Fortis Inc. following the completion of its $300 million bought deal common equity offering on December 19, 2008. During our restriction period, Fortis also announced the following events:

- On December 12, 2008, the British Columbia Utilities Commission (BCUC) approved FortisBC's (a wholly owned subsidiary of Fortis) 2009 rate application.
- On December 10, 2008, Fortis declared a four percent increase in its annual common share dividend to $1.04/share from $1.00/share, payable on March 1, 2009. Fortis' DRIP was also amended to provide a two percent discount on the purchase of common shares.

Impact

MIXED. The increase in annual dividend was slightly lower than our forecasts, while the timing of the equity issuance was a bit earlier than we had expected. We have updated our model to reflect these events along with FortisBC's updated regulatory information and our 2009 and 2010 estimates come down slightly.

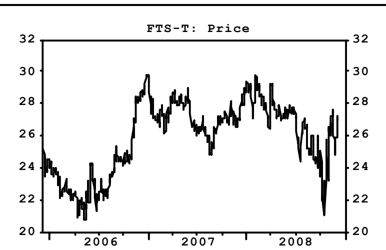
Details

Details of the FortisBC rate approval include:

- A disallowance of both the Copper Conductor Replacement Certificate of Public Convenience and Necessity (CPCN) and the Advanced Metering Infrastructure CPCN, resulting in approximately $160 million of total capital expenditures for FortisBC in 2009 (previously estimated at approximately $190 million). The BCUC is expected to approve FortisBC's 2009 capital expenditure plan sometime before the end of 2008 or in early 2009.
- Approved Productivity Improvement Factors (PIFs) of 3.0%, 1.5%, and 1.5% (for 2009, 2010, and 2011, respectively) were increased over the proposed percentages of 2.0%, 1.0%, and 1.0% (for 2009, 2010, and 2011, respectively).

Company Profile

Fortis Inc. (FTS-T) is a diversified infrastructure holding company, primarily comprising of gas distribution utilities in B.C. and electric utilities in Canada, Belize, Turks and Caicos and the Cayman Islands. Fortis also owns a real estate and hotels subsidiary and has interests in electric generation ventures in Canada and the U.S.



Details of the equity issuance include:

- An issuance of 11.7 million common shares at $25.65 per common share, with gross proceeds of $300.1 million.
- An over-allotment option for up to an additional 1.76 million common shares to be sold for 30 days following the closing of the offering.
- Net proceeds of the offering will be used to repay indebtedness outstanding under Fortis' credit facility (originally incurred primarily to repay $200 million of debt at its subsidiary, Terasen Inc., that matured on December 1, 2008) and for general corporate purposes.

Source: Thomson, TD Newcrest.

Justification of Target Price

Our $29.00 target price is predicated on 25% of our 2009 and 75% of our 2010 financial estimates as follows: 1) 50% relative earnings yield of 128% (vs. historical average of 132%), 2) 25% relative dividend yield of 92% (vs. historical average of 80%), and 3) 25% P/B of 1.5x (vs. historical average of 1.5x). Our target price implies a 3.7% dividend yield and a price-to-earnings ratio of 19.5x, compared to historical averages of 4.4% and 14.4x, respectively.

Key Risks to Target Price

1) Higher than expected long bond yields, 2) operational disruptions, 3) regulatory surprises, 4) unexpected large acquisitions, 5) sovereign risk, 6) materially different power prices in Ontario versus our forecast, and 7) integration risk.

Investment Conclusion

In these volatile equity capital markets, we expect investors will find Fortis' low-risk, utility dominated business model especially attractive. Long-term, we expect Fortis to be well positioned as an aggregator of regulated gas and electric utilities in Canada, the Caribbean, and the United States. Fortis is the largest investor-owned gas and electric distribution utility in Canada, and therefore we view it as a core holding. At current levels we believe Fortis presents a compelling risk-return profile and reiterate our *Action List* BUY recommendation.

Fortis Inc.

(FTS-T) C$23.64

Strong Performance Even in Tough Economic Times

Event

Fortis reported normalized Q4/08 EPS (f.d.) of $0.45, above our estimate of $0.36 and in-line with Q4/07 EPS.

Impact

POSITIVE. We have updated our financial forecasts, primarily to reflect stronger expected contributions from Terasen, due to strong rate base growth, and Regulated Caribbean Utilities, due to more favourable exchange rates.

Details

Regulated Gas Utilities (Terasen) Q4/08 normalized income increased $2 million year-over-year to $47 million. Recall that Terasen is a seasonal business, with the majority of its earnings generated in the first and fourth quarters of the year. The increase was primarily due to a higher allowed ROE.

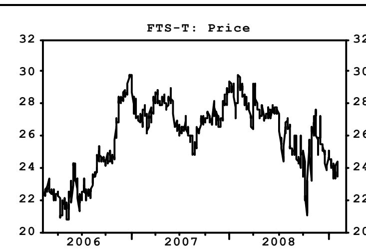
Regulated Electric Utilities – Canadian Q4/08 earnings increased $4 million year-over-year to $29 million.

- **FortisAlberta** income almost doubled year-over-year to $11 million. Higher revenues and lower future income tax expenses, mainly associated with regulator approved deferral accounts, were the main reasons for the increase.
- **FortisBC** earnings of $7 million were in-line with Q4/07 levels. Customer rate increases were offset by increased energy supply costs and higher amortization charges.
- **Newfoundland Power** earnings of $8 million declined $1 million versus Q4/07 results. The decline was mainly related to a change in the quarterly allocation of annual purchase power expense, which lowered earnings by $2 million. Newfoundland Power's annual earnings were not impacted by this change. We note that excluding this change the segment's earnings would have increased $1 million year-over-year due to higher customer rates and lower expenses.
- **Other Canadian Electric Utilities (Maritime Electric & FortisOntario)** earnings of $3 million were comparable year-over-year.

Regulated Utilities – Caribbean normalized earnings totaled $7 million, $2 million lower year-over-year. The decrease was mainly due to lower

Company Profile

Fortis Inc. (FTS-T) is a diversified infrastructure holding company, primarily comprising of gas distribution utilities in B.C. and electric utilities in Canada, Belize, Turks and Caicos and the Cayman Islands. Fortis also owns a real estate and hotels subsidiary and has interests in electric generation ventures in Canada and the U.S.



Please see the final pages of this document for important disclosure information.

electricity rates at Caribbean Utilities and Belize Electricity, $2 million of lost revenue at Fortis Turks and Caicos due to Hurricane Ike, as well as higher operating and amortization expenses. These factors were partially offset by electricity sales growth and a $1 million favourable foreign exchange impact.

Fortis Generation earnings of $8 million increased $1 million versus the comparable period in 2007. Increased energy production and lower financing charges were the main reasons for the higher earnings.

Fortis Properties reported earnings of $4 million, in-line with Q4/07 results.

Corporate expenses increased to $20 million from $18 million in Q4/07 largely due to higher preference share dividends and business development costs.

Exhibit 1. Segmented Earnings Analysis ($mm)

	Q4/08	Q4/07	YOY Change	YOY % Change
Regulated Gas Utilities - Canadian[1]	$47	$45	$2	4%

Regulated Utilities - Caribbean[2]	7	9	(2)	-22%
Total Regulated Utilities	**83**	**79**	**4**	**5%**
Non-regulated Fortis Generation	**8**	**7**	**1**	**14%**
Non-regulated Fortis Properties[3]	**4**	**4**	**0**	**0%**
Corporate[4]	**(20)**	**(18)**	**(2)**	**11%**
Operating Earnings	**75**	**72**	**3**	**4%**
Adjustments	1	7	(6)	-86%
Reported Earnings	**76**	**79**	**(3)**	**-4%**
Operating EPS (f.d)	**$0.45**	**$0.45**	**$0.00**	**0%**
Reported EPS (f.d)	$0.46	$0.49	($0.03)	-6%

Note: Reported earnings have been normalized to reflect:
1) $7 million gain on the sale of surplus land in Q4/07.
2) $1 million of additional earnings from Caribbean Utilities in Q4/08 due to a change in year end.
3) $4 million of charges to future tax expense due to the reduction of future income tax asset balances.
4) $4 million reduction of tax recoveries as a result of purchase price allocation tax adjustments and the impact of lower enacted future income tax rates on future income tax assets.

Source: Company Reports, TD Newcrest.

Outlook

Sizable Capital Program: Fortis expects capital expenditures of approximately $1.0 billion in 2009 and $4.5 billion over the next five years. The majority of these expenditures relate to Fortis' Western Canadian regulated gas and electric utilities. We do not expect the economic slowdown will materially affect Fortis' 2009 capital plan, given that a number of the large projects are already proceeding, although if economic conditions do not improve the possibility exists that some longer term projects could be deferred.

Strong Liquidity Position: At the end of 2008, Fortis had consolidated credit facilities of $2.2 billion, of which $1.5 billion was available to be drawn. Approximately $2.0 billion of the credit facilities are multi-year with the majority of maturities in 2011-2013.

Note: Averages exclude ATCO due to its holding company nature.

Source: Thomson, TD Newcrest.

Justification of Target Price

Our $29.00 target price is predicated on our 2010 financial estimates as follows: 1) 50% relative earnings yield of 141% (vs. historical average of 132%), 2) 25% relative dividend yield of 93% (vs. historical average of 80%), and 3) 25% P/B of 1.5x (vs. historical average of 1.5x). Our target price implies a 3.7% dividend yield and a price-to-earnings ratio of 17.7x, compared to historical averages of 4.4% and 14.4x, respectively.

Key Risks to Target Price

1) Higher than expected long bond yields, 2) operational disruptions, 3) regulatory surprises, 4) unexpected large acquisitions, 5) sovereign risk, 6) materially different power prices in Ontario versus our forecast, and 7) integration risk.

Investment Conclusion

Fortis' regulated Canadian utilities were the primary reason for the strong quarter. Moving forward we expect that the company's regulated Canadian gas and electric utilities will contribute approximately 75% of income before corporate expenses. We believe that in these volatile equity capital markets investors will find Fortis' low-risk, utility dominated business model especially attractive. Long-term, we expect Fortis to be well positioned as an aggregator of regulated gas and electric utilities in Canada, the Caribbean, and the United States. Fortis is the largest investor-owned gas and electric distribution utility in Canada, and therefore we view it as a core holding. At current levels we believe Fortis presents a compelling risk-return profile and reiterate our *Action List* BUY recommendation.

Fortis Inc.

(FTS-T) C$22.77

Q1 Results In-Line with Expectations

Event

Fortis reported normalized Q1/09 EPS (f.d.) of $0.51, slightly below our estimate of $0.53 and Q1/08 EPS (f.d.) of $0.55.

Impact

NEUTRAL.

Details

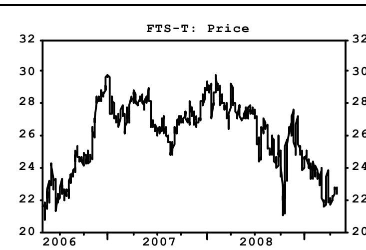
Regulated Gas Utilities (Terasen) Q1/09 earnings of $58 million were flat year over year (Exhibit 1). Higher basic customer delivery rates, customer growth, and lower income taxes were offset by increased labour and employee-benefit costs. Recall that Terasen is a seasonal business, with the majority of its earnings generated in the first and fourth quarters of the year.

Regulated Electric Utilities – Canadian Q1/09 earnings increased by $4 million year over year to $37 million.

- FortisAlberta income was $12 million, a 9% increase over Q1/08 results. Increased distribution rates along with higher load and customer growth were partially offset by increased labour and employee-benefit costs, amortization and interest expenses.
- FortisBC earnings of $14 million were up $2 million from the comparable period in 2008. Customer rate increases and customer growth were partly offset by increased energy supply costs and higher operating and amortization costs.
- Newfoundland Power earnings of $6 million remained flat year over year.
- Other Canadian Electric Utilities (Maritime Electric & FortisOntario) earnings of $5 million were $1 million higher than Q1/08 results largely a result of increased electricity rates and sales.

Regulated Utilities – Caribbean normalized earnings of $4 million were $3 million lower year over year. The decrease was mainly due to lower electricity sales, lower allowed ROA at Caribbean Utilities and Belize Electricity, and higher amortization expenses.

Company Profile
Fortis Inc. (FTS-T) is a diversified infrastructure holding company, primarily comprising of gas distribution utilities in B.C. and electric utilities in Canada, Belize, Turks and Caicos and the Cayman Islands. Fortis also owns a real estate and hotels subsidiary and has interests in electric generation ventures in Canada and the U.S.



Please see the final pages of this document for important disclosure information.

Fortis Properties earnings of $2 million were down from the $3 million earned in Q1/08 due to one-time transitional operating costs associated with the Sheraton Hotel Newfoundland and decreased hotel occupancies.

Fortis Generation earnings of $6 million were comparable to Q1/08 results.

Corporate expenses increased by $1 million year over year to $17 million in Q1/09 due to higher preferred share dividends from the Series G First Preference Share issuance in Q2/08.

Exhibit 1. Segmented Earnings Analysis ($mm, except per share amounts)

Note: Earnings have been normalized for the following items.
1) In Q1/09, a $1 million favourable appeal decision at Fortis Turks and Caicos and a $1 million favourable adjustment to energy supply costs at Fortis Turks and Caicos.

Source: Company Reports, TD Newcrest.

Outlook

Strong Balance Sheet and Liquidity: At the end of Q1/09, Fortis and its subsidiaries had consolidated credit facilities of $2.2 billion, of which $1.6 billion was available to be drawn. Approximately $2.0 billion of the facilities are committed with the majority of maturities in the 2011-2013 timeframe. Management has also taken steps to strengthen its capital position by de-leveraging its balance sheet. Over the last year, Fortis has reduced its debt-to-capital ratio from approximately 64-percent debt-to-capitalization to approximately 59-percent. We believe this action is prudent given some continued short-term uncertainty in the capital markets and provides the company with some flexibility.

NEB Decision Represents a Potential Fundamental Shift: Earlier in Q1/09, the National Energy Board (NEB) released a positive decision regarding Trans Quebec & Maritimes Pipeline's (TQM) cost of capital application for 2007 and 2008. In our view, this decision could have broad positive implications for regulated businesses in Canada as it could be used as a precedent in other jurisdictions for cost of capital hearings. Given any positive regulatory decisions in Fortis' operating jurisdictions, we believe the company stands to benefit the most (of its corporate peers) due to its utility dominated portfolio. By our calculations, Fortis has the highest positive leverage to increases in regulated returns of its peer group (Exhibit 2).

Exhibit 2. EPS Sensitivities to Changes in Regulated ROEs

Company Name	Regulatory Jurisdiction	2010E EPS Sensitivity to +50 bps Change in ROE
Fortis	AUC, BCUC, PUB	3.7%
Canadian Utilities	AUC	2.4%
ATCO	AUC	2.0%
Enbridge	NEB, OEB	1.3%
TransCanada	NEB	1.2%

Note: Larger regulatory jurisdictions include: 1) Alberta Utilities Commission (AUC), 2) British Columbia Utilities Commission (BCUC), 3) National Energy Board (NEB), 4) Ontario Energy Board (OEB), and 5) Board of Commissioners of Public Utilities - Newfoundland and Labrador (PUB). Sensitivities for TransCanada and Enbridge reflect 2012 and 2013 pro-forma sensitivities respectively, due to the presence of existing settlements in place limiting the full potential upside until those time periods.

Note: Averages exclude ATCO due to its holding company nature.

Source: Thomson, TD Newcrest.

Justification of Target Price

Our $29.00 target price is predicated on our 2010 financial estimates as follows: 1) 50% relative earnings yield of 141% (vs. historical average of 132%), 2) 25% relative dividend yield of 93% (vs. historical average of 80%), and 3) 25% P/B of 1.5x (vs. historical average of 1.5x). Our target price implies a 3.7% dividend yield and a price-to-earnings ratio of 17.7x, compared to historical averages of 4.4% and 14.4x, respectively.

Key Risks to Target Price

1) Higher than expected long bond yields, 2) operational disruptions, 3) regulatory surprises, 4) unexpected large acquisitions, 5) sovereign risk, and 6) materially different power prices in Ontario versus our forecast.

Investment Conclusion

Increased earnings from Fortis' Regulated Canadian Electric Utilities helped ease the slowing growth experienced in its Regulated Caribbean operations.

Fortis is the largest investor-owned gas and electric distribution utility in Canada, and therefore we view it as a core holding. We believe that in these volatile equity capital markets investors will find Fortis' low-risk, utility dominated business model especially attractive. Long-term, we expect Fortis to be well positioned as an aggregator of regulated gas and electric utilities in Canada, the Caribbean, and the United States. At current levels we believe Fortis presents a compelling risk-return profile and reiterate our Action List BUY recommendation.

Fortis Inc.

(FTS-T) C$25.83

Removing From Action List on Valuation

Event

We are downgrading Fortis to BUY as the returns implied by our target price no longer warrant inclusion on the Action List. Since upgrading Fortis on October 1, 2008 its shares have gained 7.4%, greatly outperforming the sector, which on average declined 7.9%.

Impact

Neutral with Respect to Fundamentals – Downgrade is a Function of Valuation. We continue to view the shares as attractive, although not sufficiently so to warrant inclusion in the Action List.

Introducing 2011E Estimates: We expect Fortis to achieve year-over-year EPS growth of almost 7% in 2011, primarily due to higher expected regulated ROEs and western Canadian rate base growth. In addition we are revising our 2009 and 2010 estimates to reflect recent regulatory filings. For an in-depth view of our 2011 estimates for the sector, please see our Industry Note titled "***Introducing 2011 Estimates and Updated Power Price Assumptions***", published in parallel with this note.

Company Profile
Fortis Inc. (FTS-T) is a diversified infrastructure holding company, primarily comprising of gas distribution utilities in B.C. and electric utilities in Canada, Belize, Turks and Caicos and the Cayman Islands. Fortis also owns a real estate and hotels subsidiary and has interests in electric generation ventures in Canada and the U.S.

Justification of Target Price

Our $29.00 target price is predicated on 50% of each of our 2010 and 2011 financial estimates as follows: 1) 50% relative earnings yield of 143% (vs. historical average of 132%), 2) 25% relative dividend yield of 95% (vs. historical average of 80%), and 3) 25% P/B of 1.5x (vs. historical average of 1.5x). Our target price implies a 3.8% dividend yield and a price-to-earnings ratio of 17.5x, compared to historical averages of 4.4% and 14.4x, respectively.

Key Risks to Target Price

1) Higher than expected long bond yields, 2) operational disruptions, 3) regulatory surprises, 4) unexpected large acquisitions, 5) sovereign risk, 6) materially different power prices in Ontario versus our forecast, and 7) integration risk.

Investment Conclusion

Fortis is the largest investor-owned gas and electric distribution utility in Canada, and therefore we view it as a core holding. We believe that in these volatile equity capital markets investors will find Fortis' low-risk, utility dominated business model attractive. Long-term, we expect Fortis to be well positioned as an aggregator of regulated gas and electric utilities in Canada, the Caribbean, and the United States.

Fortis Inc.

(FTS-T) C$25.74

Q2/09 Highlights Stability of Business Model

Event

Fortis reported normalized Q2/09 EPS (f.d.) of $0.28, in-line with our estimate, recent consensus of $0.27 and normalized Q2/08 EPS of $0.28.

Impact

NEUTRAL.

Details

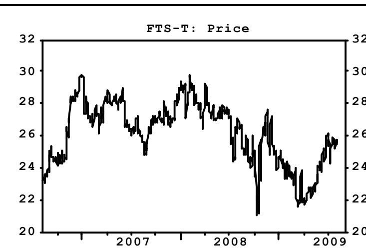
Regulated Gas Utilities (Terasen) Q2/09 normalized income of $12 million was unchanged year-over-year (Exhibit 1). Lower finance charges and higher basic customer delivery rates were offset by higher amortization costs. Recall that Terasen is a seasonal business, with the majority of its earnings generated in the first and fourth quarters of the year.

Regulated Electric Utilities – Canadian Q2/09 earnings increased $8 million year-over-year to $36 million.

- **FortisAlberta** normalized earnings of $14 million increased $7 million versus Q2/08. The increase was mainly a result of increased distribution rates along and higher load and customer growth partially offset by increased amortization and finance charges.
- **FortisBC** earnings of $7 million were in-line with Q2/08 levels. Customer rate increases were offset by increased energy supply, amortization and finance charges.
- **Newfoundland Power** earnings of $11 million increased $1 million versus Q2/08 results. The increase was mainly related to a change in the quarterly allocation of amortization costs as well as a lower effective tax rate.
- **Other Canadian Electric Utilities (Maritime Electric & FortisOntario)** earnings of $4 million were comparable year-over-year.

Regulated Utilities – Caribbean normalized earnings totaled $7 million, $1 million lower year-over-year. The decrease was mainly due to a lower allowed ROA at Belize Electricity and higher amortization expenses partially offset by a $1 million favourable foreign exchange impact.

Company Profile
Fortis Inc. (FTS-T) is a diversified infrastructure holding company, primarily comprising of gas distribution utilities in B.C. and electric utilities in Canada, Belize, Turks and Caicos and the Cayman Islands. Fortis also owns a real estate and hotels subsidiary and has interests in electric generation ventures in Canada and the U.S.



Fortis Generation earnings of $3 million decreased $4 million versus the comparable period in 2008. The loss of earnings from the April 2009 expiry of the Rankin hydroelectric power-for-water agreement as well as lower Ontario and New York power prices were the main reasons for the decrease. We note that the Rankine hydroelectric facility contributed $0.2 million of earnings in Q2/09 versus $3.6 million in Q2/08.

Fortis Properties reported earnings of $8 million increased $1 million versus Q2/08 results. Higher Real Estate Division earnings and lower operating expenses were the main reasons for the increase.

Corporate expenses of $18 million were in-line year-over-year as higher preference share dividends were offset by lower finance charges.

Outlook

Various Regulatory Updates:

- **Terasen Gas:** Recently submitted an application with the BC regulator (BCUC) requesting a review of the current generic ROE calculation and equity thickness. Terasen Gas Inc. (TGI) requested a ROE of 11%, effective July 1, 2009, and an equity thickness of 40%, effective 2010. We note that TGI's allowed 2009 ROE is 8.47% with an equity thickness of 35%.
- **Newfoundland Power:** In its 2010 customer rate application Newfoundland Power requested an increase in its allowed ROE to 11% from 8.95%.
- **FortisOntario**: The Ontario Energy Board (OEB) recently indicated that it would hold a conference in September 2009 to review its cost of capital policy for future years.
- **FortisAlberta**: Oral hearings for the Alberta Utilities Commission's (AUC) Generic Cost of Capital Proceeding took place in May and June 2009. A decision is expect by year end.

Notes:
1) Averages exclude ATCO due to its holding company nature.
2) 2011 forecasts are presented using current Canadian GAAP and not IFRS as a result of the uncertainties related to application of IFRS.
Source: Company Reports, Thomson, TD Newcrest.

Justification of Target Price

Our $29.00 target price is predicated on 50% of each of our 2010 and 2011 financial estimates as follows: 1) 50% relative earnings yield of 143% (vs. historical average of 132%), 2) 25% relative dividend yield of 95% (vs. historical average of 80%), and 3) 25% P/B of 1.5x (vs. historical average of 1.5x). Our target price implies a 3.8% dividend yield and a price-to-earnings ratio of 17.5x, compared to historical averages of 4.4% and 14.4x, respectively.

Key Risks to Target Price

1) Higher than expected long bond yields, 2) operational disruptions, 3) regulatory surprises, 4) unexpected large acquisitions, 5) sovereign risk, and 6) integration risk.

Investment Conclusion

Fortis is the largest investor-owned gas and electric distribution utility in Canada, and therefore we view it as a core holding. We believe that in these volatile equity capital markets investors will find Fortis' low-risk, utility dominated business model attractive. Long-term, we expect Fortis to be well positioned as an aggregator of regulated gas and electric utilities in Canada, the Caribbean, and the United States. At current levels we view Fortis as attractively valued and reiterate our BUY recommendation.

Fortis Inc.

(FTS-T) C$25.81

Lower Q3 Results Timing Related

Event

Fortis reported normalized Q3/09 EPS (f.d.) of $0.21, below our $0.24 estimate, and normalized Q3/08 EPS of $0.26.

Impact

NEUTRAL. Although EPS were slightly below our forecasts, we believe the weakness was likely related to the timing of expenses at the Company's utility businesses.

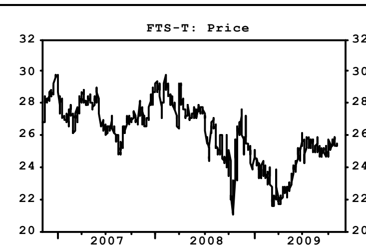
Details

Regulated Gas Utilities (Terasen) Q3/09 loss of $3 million was $2 million less than Q3/08 results. (Exhibit 1). The year-over-year reduction in loss was primarily due to lower effective corporate taxes arising from differences in deductions for tax purposes versus accounting purposes, and increased basic customer rates. These were partially offset by higher amortization and operating costs. Recall that Terasen is a seasonal business, with the majority of its earnings generated in the first and fourth quarters of the year.

Regulated Electric Utilities – Canadian Q3/09 earnings decreased by $2 million year over year to $36 million.

- **FortisAlberta** earnings of $16 million declined by $1 million versus Q3/08 results due to lower corporate income tax recoveries.
- **FortisBC** earnings of $8 million were flat year over year. An increase in customer rates and customer growth were offset by higher energy supply costs, increased amortization expenses from capital investments, and higher operating expenses.
- **Newfoundland Power** earnings of $7 million decreased by $1 million versus the comparable period in 2008. The decline was mainly related to higher operating expenses, and increased amortization costs stemming from a change in the quarterly allocation of those expenses.
- **Other Canadian Electric Utilities (Maritime Electric & FortisOntario)** earnings of $5 million were comparable year over year.

Company Profile
Fortis Inc. (FTS-T) is a diversified infrastructure holding company, primarily comprising of gas distribution utilities in B.C. and electric utilities in Canada, Belize, Turks and Caicos and the Cayman Islands. Fortis also owns a real estate and hotels subsidiary and has interests in electric generation ventures in Canada and the U.S.



Please see the final pages of this document for important disclosure information.

Regulated Utilities – Caribbean earnings were $7 million, in-line with Q3/08 earnings. Excluding approximately $1 million of favourable foreign currency translations in Q3/09, results were down year over year largely from higher operating and amortization costs.

Fortis Generation earnings of $4 million decreased by $5 million year over year. The loss of earnings was primarily due to the April 2009 expiry of the Rankin hydroelectric power-for-water agreement. In addition, lower average New York power prices and decreased generation in Belize contributed to the year-over-year decline.

Fortis Properties reported earnings of $9 million, flat versus Q3/08 results. Contribution from the Sheraton Hotel Newfoundland, the Holiday Inn Select in Windsor, and higher Real Estate Division earnings were offset by decreased occupancy at the remainder of the Company's hotels.

Corporate expenses of $18 million increased by $1 million year over year due to higher interest expenses from the $200 million of debt issued in July 2009.

Outlook

Continued Growth in Regulated Utilities: Despite the economic downturn, management expects 2009 total capital expenditures to be over $1 billion, with the bulk of this capital being spent in Fortis' Canadian Regulated Utilities businesses. Longer term, the Company's five-year, $5 billion capital program should grow its rate base, on average, by approximately six to seven percent annually, which should translate to both earnings and dividend growth.

2) Capital Power's 2008A EPS is a pro forma full-year estimate; 2009E EPS is a half-year estimate.
Source: Thomson, TD Newcrest estimates.

Justification of Target Price

Our $29.00 target price is predicated on 25% of our 2010 and 75% of our 2011 financial estimates as follows: 1) 50% relative earnings yield of 145% (vs. historical average of 132%), 2) 25% relative dividend yield of 96% (vs. historical average of 80%), and 3) 25% P/B of 1.4x (vs. historical average of 1.5x). Our target price implies a 3.8% dividend yield and a price-to-earnings ratio of 17.2x, compared to historical averages of 4.4% and 14.4x, respectively.

Key Risks to Target Price

1) Higher than expected long bond yields, 2) operational disruptions, 3) regulatory surprises, 4) unexpected large acquisitions, and 5) sovereign risk.

Investment Conclusion

Fortis' business segments have continued to perform well even in a tough economic environment, in our view. The Company is the largest investor-owned gas and electric distribution utility in Canada, and therefore we view it as a core holding. We believe that in these volatile equity capital markets investors will find Fortis' low-risk, utility dominated business model attractive. Long-term, we expect Fortis to be well positioned as an aggregator of regulated gas and electric utilities in Canada, the Caribbean, and the United States. At current levels we view Fortis as attractively valued and reiterate our BUY recommendation.

Fortis Inc.

(FTS-T) C$28.76

Terasen Gas Receives Positive Decision on Cost of Capital

Event

- The British Columbia Utility Commission (BCUC) issued a decision on Terasen Gas' return on equity and capital structure application.
- A number of regulatory decisions in BC, Ontario and Newfoundland have recently been issued which affect Fortis' regulated utilities.

Impact

POSITIVE.

We our increasing our estimates to primarily reflect the BCUC decision, and to a lesser extent, other recent regulatory decisions.

Details

Key highlights of the BCUC's decision include the following:

- **Regulated ROEs Increased**: The regulator has set the return on equity (ROE) for Terasen Gas at 9.5%, an increase from the current level of 8.47% (Exhibit 1). The new ROE is effective July 1, 2009. Terasen Gas' ROE remains the benchmark off which other utilities returns are set, and therefore, Terasen Gas Whistler and Vancouver Island ROEs are set at 10%. FortisBC's ROE is set at 9.9%, up from 8.87%.
- **Automatic Adjustment Mechanism Discontinued**: The commission determined that the automatic adjustment mechanism, which is used to determine Terasen's ROE on an annual basis, would not produce a fair return for 2010 and as such is discontinued. The regulator noted that the recent flight to quality has driven down the yields on long-term Canadian bonds, while the cost of risk has increased.
- **Terasen Gas' Equity Ratio Increased**: The commission increased Terasen Gas' equity ratio to 40% from 35.01%, effective January 1, 2010, to reflect increased business risk. The regulatory specifically noted that the risks posed by First Nations and climate change legislation have increased since 2005.

Company Profile

Fortis Inc. (FTS-T) is a diversified infrastructure holding company, primarily comprising of gas distribution utilities in B.C. and electric utilities in Canada, Belize, Turks and Caicos and the Cayman Islands. Fortis also owns a real estate and hotels subsidiary and has interests in electric generation ventures in Canada and the U.S.

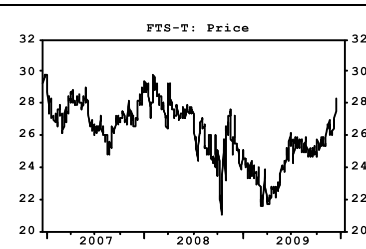

Exhibit 1. Overview of BCUC's Cost of Capital Decision

	2009E	2010E	2011E
Terasen Gas - Equity Ratios:			
New	35%	40%	40%
Prior	35%	35%	35%
Change (bps)	-	500	500
Terasen Gas - ROEs:			
New	8.98%	9.50%	9.50%
Prior	8.47%	8.90%	9.15%
Change (bps)	51	60	35
Terasen Gas (Vancouver Island) & (Whistler) - ROEs:			
New	9.58%	10.00%	10.00%
Prior	9.17%	9.60%	9.85%
Change (bps)	41	40	15
FortisBC - ROEs			
New	9.39%	9.90%	9.90%
Prior	8.87%	9.30%	9.55%
Change (bps)	52	60	35

Note: Prior ROE estimates for 2010 and 2011 were TD Newcrest estimates.
Source: Company Reports, BCUC, TD Newcrest.

Highlights from other recent decisions:

- **Newfoundland Power's 2010 General Rate Application Decision**: The Newfoundland regulator recently issued a decision which granted Newfoundland Power a ROE of 9.0% for 2010. This was in-line with the 8.95% estimate we had in our forecasts. There was no change to the 45% equity-capitalization or the formula to calculate ROEs for subsequent years.
- **Ontario Cost of Capital Decision**: The Ontario Energy Board (OEB) recently refined the approach it uses to calculate ROEs commencing in 2010. The new OEB formula is a function of both long Canada bonds as well as an A-rated Canadian utility bond index. The formula re-set adds 50 bps for transaction costs. Our expectation is that this new formula will translated into slightly higher ROEs in Ontario versus the previous approach.
- **Terasen's 2010-2011 Negotiated Settlement Approved**: The BCUC has approved Terasen Gas' and Terasen Gas (Vancouver Island) Inc.'s 2010-2011 revenue requirement negotiated settlement. The performance-based rate-setting mechanism, which expires at the end of 2009, will not be renewed for 2010 and 2011.

Notes:
1) Averages exclude ATCO due to its holding company nature.
2) Capital Power's 2008A EPS is a pro forma full-year estimate; 2009E EPS is a half-year estimate.
Source: Company Reports, Thomson, TD Newcrest.

Justification of Target Price

Our $30.00 target price is predicated on 25% of our 2010 and 75% of our 2011 financial estimates as follows: 1) 50% relative earnings yield of 148% (vs. historical average of 132%), 2) 25% relative dividend yield of 93% (vs. historical average of 80%), and 3) 25% P/B of 1.5x (vs. historical average of 1.5x). Our target price implies a 3.7% dividend yield and a price-to-earnings ratio of 16.9x, compared to historical averages of 4.4% and 14.4x, respectively.

Key Risks to Target Price

1) Higher than expected long bond yields, 2) operational disruptions, 3) regulatory surprises, 4) unexpected large acquisitions, and 5) sovereign risk.

Investment Conclusion

We view the BCUC’s decision favourably. The increase in allowed returns is less that the company requested, but greater than what has been granted by other regulators. In addition, Terasen Gas was successful in its application to increase its equity ratio to 40%. The Company is the largest investor-owned gas and electric distribution utility in Canada, and therefore we view it as a core holding. We believe that in these volatile equity markets investors will find Fortis’ low-risk, utility dominated business model attractive. Long-term, we expect Fortis to be well positioned as an aggregator of regulated gas and electric utilities in Canada, the Caribbean, and the United States. Given the relatively less compelling potential returns versus other investments in the sector, we are downgrading the shares to HOLD.

Fortis Inc.

(FTS-T) C$27.76

Q4 Results A Bit Shy Of Expectations

Event

Fortis reported normalized Q4/09 EPS (f.d.) of $0.45, below our $0.49 estimate, recent consensus of $0.50, and in-line with normalized Q4/08 EPS (f.d.).

Impact

SLIGHTLY NEGATIVE. The lighter than expected EPS was largely due to our over-estimation of the degree of growth in the Company's Regulated Canadian Electric Utilities. We still believe this segment will experience strong growth going forward, however, we have revised our estimates downwards, primarily to reflect the recent $250 million preference share issue.

Details

Regulated Gas Utilities (Terasen) Q4/09 earnings of $52 million were $5 million above Q4/08 results (Exhibit 1). The increase was largely a result of an accrual stemming from the increase, effective July 1, 2009, of the allowed ROE for the Terasen Gas companies, in addition to higher basic customer rates and lower finance charges. The increase was partly offset by higher depreciation costs due to capital investment.

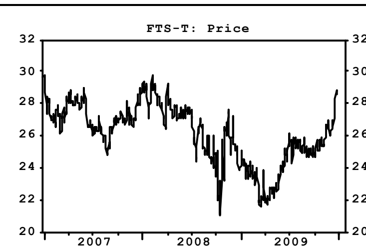
Regulated Electric Utilities – Canadian Q4/09 earnings of $31 million increased by $2 million year over year.

- **FortisAlberta** earnings of $12 million increased by $1 million versus Q4/08 results. Increased customer rates and electricity sales, along with the impact of increases in both 2009 allowed ROE and deemed equity thickness, were partially offset by higher amortization expenses and higher interest charges.
- **FortisBC** earnings of $8 million were $1 million higher than Q4/08 results. An increase in customer rates and customer growth were partially offset by higher operating expenses and finance charges.
- **Newfoundland Power** earnings of $8 million were flat year over year. An increase in electricity sales were mitigated by higher demand charges, and increased operating and financing expenses.

Other Canadian Electric Utilities (Maritime Electric & FortisOntario) earnings of $3 million were in-line with Q4/08 earnings.

Company Profile

Fortis Inc. (FTS-T) is a diversified infrastructure holding company, primarily comprising of gas distribution utilities in B.C. and electric utilities in Canada, Belize, Turks and Caicos and the Cayman Islands. Fortis also owns a real estate and hotels subsidiary and has interests in electric generation ventures in Canada and the U.S.



Regulated Utilities – Caribbean earnings of $7 million were comparable year over year. Lower amortization expenses at Fortis Turks and Caicos stemming from a favourable change in depreciation estimates, and increased electricity sales and rates at Caribbean Utilities were offset by unfavourable foreign exchange translations, and higher finance charges.

Fortis Generation earnings of $3 million decreased by $5 million year over year. The loss of earnings was primarily due to the April 2009 expiry of the Rankine hydroelectric power-for-water agreement. In addition, lower average New York power prices, decreased generation in New York and Belize, and an unfavourable currency impact contributed to the year-over-year decline.

Fortis Properties reported earnings of $5 million, an increase of $1 million versus Q4/08 results. A full quarter contribution from the Sheraton Hotel Newfoundland, incremental earnings from the Holiday Inn Select Windsor, and higher Real Estate Division earnings were partially offset by decreased occupancy at the remainder of the Company's hotels.

Corporate expenses of $19 million decreased by $1 million year over year due to lower business development costs.

Notes:
1) Q4/09 excludes $5.0 million of costs associated with the conversion of customer appliances from propane to natural gas.
2) Q4/09 excludes $1.5 million of earnings associated to prior periods.
3) Q4/09 excludes $3.0 million of earnings associated to prior periods.
4) Q4/09 excludes a $3.0 million favourable tax adjustment.
5) Q4/08 excludes $1.0 million of additional earnings from Caribbean Utilities due to a change in year end.

Outlook

Continued Growth in Regulated Utilities: Management has forecasted 2010 total capital expenditures to be approximately $1.1 billion, with the bulk of this capital being spent at Fortis' Canadian Regulated Utilities businesses. During the 2010–2014 timeframe, the Company is forecasting gross capital investment nearing $5 billion. Of this amount, approximately 70% is expected to be at the Regulated Electric Utilities, namely FortisAlberta and FortisBC, while 27% is forecasted to be at the Regulated Gas Utilities. The remainder is anticipated to go into non-regulated activities.

Vaca Facility Commissioning: The Company's 19 MW hydroelectric generating facility at Vaca in Belize is expected to be commissioned in Q1/10. The US$53 million project is forecasted to increase average annual electricity production by approximately 80 GWh to 240 GWh.

Regulatory Updates: In Q4/09, a number of regulatory decisions were received at the Company's Canadian Regulated Utilities, which resulted in increases to their allowed returns on equity and/or equity thicknesses. Please refer to our December 18, 2009 *Action Note* titled, **"Terasen Gas Receives Positive Decision on Cost of Capital"**, and our November 16, 2009 *Action Note* titled, **"Alberta Regulator Sets New ROEs and Equity Ratios"** for further details and the impact on Fortis.

Notes:
1) Averages exclude ATCO due to its holding company nature.
2) Capital Power's 2008A EPS is a pro forma full-year estimate; 2009E EPS is a half-year estimate.
Source: Thomson, TD Newcrest estimates.

Justification of Target Price

Our $30.00 target price is predicated on 25% of our 2010 and 75% of our 2011 financial estimates as follows: 1) 50% relative earnings yield of 146% (vs. historical average of 132%), 2) 25% relative dividend yield of 97% (vs. historical average of 80%), and 3) 25% P/B of 1.5x (vs. historical average of 1.5x). Our target price implies a 3.9% dividend yield and a price-to-earnings ratio of 17.1x, compared to historical averages of 4.4% and 14.4x, respectively.

Key Risks to Target Price

1) Higher than expected long bond yields, 2) operational disruptions, 3) regulatory surprises, 4) unexpected large acquisitions, and 5) sovereign risk.

Investment Conclusion

Fortis' business segments have continued to perform well even in a tough economic environment, in our view. The Company is the largest investor-owned gas and electric distribution utility in Canada, and therefore we view it as a core holding. We believe that in these volatile equity capital markets investors will find Fortis' low-risk, utility dominated business model attractive. Long-term, we expect the Company to be well positioned as an aggregator of regulated gas and electric utilities in the United States, Canada, and the Caribbean.

Fortis Inc.

(FTS-T) C$28.05

Strong Gas Utility Earnings Lead Q1 Results

Event

Fortis reported Q1/10 EPS (f.d.) of $0.56, in-line with our $0.55 estimate, but below recent consensus of $0.59. Q1/09 normalized EPS (f.d.) were $0.52.

Impact

NEUTRAL. We have revised our forecasts largely to reflect updated F/X assumptions and regulatory information.

Details

Regulated Gas Utilities (Terasen) Q1/10 earnings of $73 million were $15 million above Q1/09 results (Exhibit 1). The increase was largely a result of higher customer delivery rates from the impact of increased allowed ROEs and equity ratios, effective January 1, 2010, and decreased finance charges from lower interest rates and borrowings.

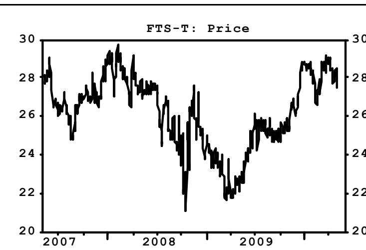
Regulated Electric Utilities – Canadian Q1/10 earnings of $40 million increased by $3 million year over year.

- **FortisAlberta** earnings of $14 million increased by $2 million versus Q1/09 results. Increased customer rates from the impact of increases in both 2010 allowed ROE and deemed equity thickness were partially offset by higher operating, amortization, and financing expenses.
- **FortisBC** earnings of $14 million were flat year over year. An increase in customer rates, higher incentive adjustments, and lower supply and operating costs were virtually offset by higher finance charges and lower electricity sales.
- **Newfoundland Power** earnings of $7 million were up $1 million versus Q1/09 results. Increased electricity rates and sales, along with lower labour costs were partially mitigated by higher administrative and financing expenses.
- **Other Canadian Electric Utilities (Maritime Electric & FortisOntario**) earnings of $5 million were in-line with Q1/09 earnings.

Regulated Utilities – Caribbean earnings of $4 million were comparable year over year. Unfavourable foreign exchange translations, and higher finance charges were offset by increased electricity sales and rates at Caribbean Utilities.

Company Profile

Fortis Inc. (FTS-T) is a diversified infrastructure holding company, primarily comprising of gas distribution utilities in B.C. and electric utilities in Canada, Belize, Turks and Caicos and the Cayman Islands. Fortis also owns a real estate and hotels subsidiary and has interests in electric generation ventures in Canada and the U.S.



Fortis Generation earnings of $2 million decreased by $4 million year over year. The loss of earnings was primarily due to the April 2009 expiry of the Rankine hydroelectric power-for-water agreement. In addition, lower generation in Belize contributed to the year-over-year decline.

Fortis Properties reported earnings of $2 million, in-line with Q1/09 results. Higher Real Estate Division earnings, contribution from the Holiday Inn Select Windsor, and improved performance from the Atlantic Canadian hotel operations were offset by decreased occupancy at the western Canadian hotel operations.

Corporate expenses increased by $4 million to $21 million in Q1/10 largely from increased preferred share dividends from the Series H issue in January 2010 and increased finance charges from a higher debt balance.

Exhibit 1. Segmented Earnings Analysis ($mm)

	Q1/10	Q1/09	YOY Change	YOY % Change

Operating EPS (f.d)	**$0.56**	**$0.52**	**$0.05**	**9%**
Reported EPS (f.d)	$0.56	$0.52	$0.04	8%

Note: Earnings have been normalized for the following items:
1) In Q1/09, a $1 million favourable appeal decision and a $1 million favourable adjustment to energy supply costs, both at Fortis Turks and Caicos.

Source: Company Reports, TD Newcrest.

Outlook

Q2/10 EPS Forecast: We are estimating Q2/10 EPS of $0.30, a $0.02 increase versus Q2/09 results. We believe the increase could largely be due to higher year-over-year earnings from its Canadian Utilities as a result of the favorable regulatory decisions received in both Alberta and BC subsidiaries back in Q4/09, along with growing rate bases. Incremental contribution from the Vaca Dam (commissioned in Q1/10) will also likely be a positive contributor. Partially offsetting the increase may be higher corporate expenses.

Source: Thomson, TD Newcrest.

Justification of Target Price

Our $30.00 target price is predicated on our 2011 financial estimates as follows: 1) 50% relative earnings yield of 141% (vs. historical average of 132%), 2) 25% relative dividend yield of 97% (vs. historical average of 80%), and 3) 25% P/B of 1.5x (vs. historical average of 1.5x). Our target price implies a 3.9% dividend yield and a price-to-earnings ratio of 17.7x, compared to historical averages of 4.4% and 14.4x, respectively.

Key Risks to Target Price

1) Higher than expected long bond yields, 2) operational disruptions, 3) regulatory surprises, 4) unexpected large acquisitions, and 5) sovereign risk.

Investment Conclusion

Terasen's strong contribution during the quarter helped the Company achieve year-over-year EPS growth. Fortis is the largest investor-owned gas and electric distribution utility in Canada, and therefore we view it as a core holding. We believe that in these volatile equity capital markets investors will find the Company's low-risk, utility dominated business model attractive. Long-term, we expect the Company to be well positioned as an aggregator of regulated gas and electric utilities in the United States, Canada, and the Caribbean.

Fortis Inc.

(FTS-T) C$28.84

Solid Q2/10 - Rolling Out 2012 Estimates

Event

Fortis reported Q2/10 EPS (f.d.) of $0.32, which was above both our $0.30 estimate and Q2/09 normalized EPS (f.d.) of $0.28.

Impact

MILDLY POSITIVE.

Our Fortis target price increases by a dollar to $31, as we are rolling forward our target to be based 50% on each of our 2011 and 2012 estimates.

Details

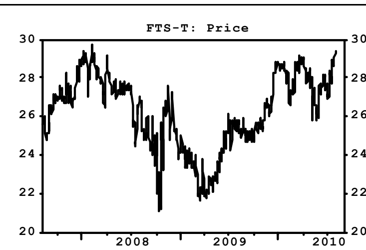
Regulated Gas Utilities (Terasen) Q2/10 normalized earnings of $17 million were $5 million above Q2/09 results (Exhibit 1). The increase was primarily due to higher customer delivery rates, effective January 2010, to reflect increased allowed ROEs and equity ratios. Partially offsetting this were higher operating and amortization expenses as well as a higher corporate tax rate.

Regulated Electric Utilities – Canadian Q2/10 normalized earnings of $40 million increased by $4 million year-over-year.

- **FortisAlberta** normalized earnings of $17 million increased by $3 million versus Q2/09 results. The main reason for the increase was higher interim customer rates, effective January 2010, to reflect an increased allowed ROE and deemed equity thickness. Partially offsetting this were higher operating, amortization and financing expenses.
- **FortisBC** earnings of $8 million increased $1 million year-over-year. Increased customer rates, effective January 2010, to reflect a higher allowed return and increased investment, was the main reason for the increase. This was partially offset by higher operating and amortization expenses as well as lower electricity sales.
- **Newfoundland Power** earnings of $11 million were in-line versus Q2/09. Increased electricity rates and sales as well as lower operating labour costs were offset by higher pension, wage and amortization expenses.
- **Other Canadian Electric Utilities (Maritime Electric & FortisOntario)** earnings of $4 million were in-line with Q2/09 earnings.

Company Profile

Fortis Inc. (FTS-T) is a diversified infrastructure holding company, primarily comprising of gas distribution utilities in B.C. and electric utilities in Canada, Belize, Turks and Caicos and the Cayman Islands. Fortis also owns a real estate and hotels subsidiary and has interests in electric generation ventures in Canada and the U.S.



Regulated Utilities – Caribbean earnings of $7 million were comparable year-over-year. Higher electricity rates and sales at Caribbean Utilities were offset by an unfavourable foreign exchange translation as well as increased tax and finance expenses.

Fortis Generation earnings of $3 million were in-line with Q2/09. Increased Belizean production and reduced finance charges were offset by an unfavourable currency translation and the April 2009 expiry of the Rankine hydroelectric power-for-water agreement.

Fortis Properties reported earnings of $8 million, in-line with Q2/09 results. An increased contribution from the Real Estate Division as well as improved Atlantic and central Canadian hotel operations were mainly offset by decreased occupancy at the western Canadian hotel operations.

Corporate expenses increased by $2 million to $20 million in Q2/10 largely from increased preferred share dividends from the Series H issue in January 2010 as well as higher business development costs.

Exhibit 1. Segmented Earnings Analysis ($mm unless stated otherwise)

	Q2/10	Q2/09	YOY Change	YOY % Change

Reported EPS (f.d)	$0.32	$0.31	$0.01	2%

Note: Earnings have been normalized for the following items:
1) Income tax benefits of $2 million and $3 million at Terasen and FortisAlberta, respectively, in Q2/09 related to prior periods.
Source: Company Reports, TD Newcrest.

Outlook

Rolling Out 2012 Forecasts: We are introducing a 2012 EPS (f.d.) of $1.77, up 4% from our 2011E EPS (f.d.) of $1.70. We expect rate base growth in the Company's Regulated Canadian Electric Utilities will be the primary driver of the bulk of the earnings increase.

Q3/10 Preview: We are forecasting Q3/10 EPS of $0.23, a penny higher than Q3/09 EPS largely due to increased earnings as a result of rate base growth at the Company's Regulated Canadian Electric Utilities, partially offset by higher Corporate costs.

Notes:
1) Averages exclude ATCO due to its holding company nature.
2) Capital Power's 2008A EPS is a pro forma full-year estimate; 2009E EPS is a half-year estimate.
Source: Company Reports, Thomson, TD Newcrest.

Justification of Target Price

Our $31.00 target price is predicated on 50% of our 2011 and 2012 financial estimates as follows: 1) 50% relative earnings yield of 140% (vs. historical average of 132%), 2) 25% relative dividend yield of 95% (vs. historical average of 80%), and 3) 25% P/B of 1.5x (vs. historical average of 1.5x). Our target price implies a 3.8% dividend yield and a price-to-earnings ratio of 17.9x, compared to historical averages of 4.4% and 14.4x, respectively.

Key Risks to Target Price

1) Higher than expected long bond yields, 2) operational disruptions, 3) regulatory surprises, 4) unexpected large acquisitions, and 5) sovereign risk.

Investment Conclusion

Terasen and FortisAlberta reported strong contributions during the quarter, which helped the company achieve strong year-over-year EPS growth. Moving forward we expect growth in Fortis' regulated utilities will continue to be the primary driver of EPS growth. Fortis is the largest investor-owned gas and electric distribution utility in Canada, and therefore we view it as a core holding. We believe that in these volatile equity capital markets investors will find the Company's low-risk, utility dominated business model attractive. Long-term, we expect the Company to be well positioned as an aggregator of regulated gas and electric utilities in the United States, Canada, and the Caribbean.

Waneta Expansion Hydro Project Announced - Upgrading to Buy

Event

Fortis along with the Columba Power Corporation and Columbia Basin Trust have announced an agreement to develop the 335 MW Waneta Expansion project.

Impact

POSITIVE.

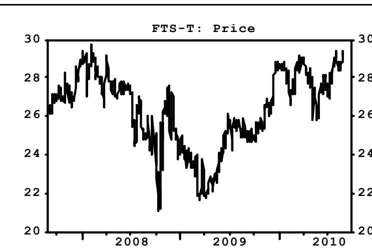
Once fully brought into service in 2015 we estimate the project could add $0.03 of EPS on an annualized basis. We estimate the project could represent one dollar of value on a present value basis, and as such we are increasing our target price to $32.

Details

- **Location**: The project is located on the Pend d'Oreille River, south of Trail, BC. The expansion facility would be directly downstream of the existing 493 MW Waneta Dam, which is owned by BC Hydro and Teck Resources.
- **Capacity:** The facility is expected to have a capacity of 335 MW and generate approximately 630 GWh of electricity per year.
- **Ownership:** Fortis along with the Columbia Power Corporation and Columbia Basin Trust, which are both government owned corporations, are jointly developing the project with Fortis' interest in the expansion expected to be 51%.
- **Cost**: The facility is expected to cost $930 million (100% basis), which includes interest during construction and contingencies.
- **Power Purchase Agreements**: BC Hydro will purchase an average of 101 MW of capacity under a 40-year energy purchase agreement at similar prices to projects that were successful in its 2008 Clean Power Call. The remaining capacity of approximately 234 MW will be sold to FortisBC under a 40-year contract.
- **Timing**: The project is expected to enter service in the spring of 2015.
- **Returns**: Fortis expects the project will earn a ROE that is slightly better than its regulated investments. We assume the project will earn a ROE in the range of 9-10%.

Company Profile

Fortis Inc. (FTS-T) is a diversified infrastructure holding company, primarily comprising of gas distribution utilities in B.C. and electric utilities in Canada, Belize, Turks and Caicos and the Cayman Islands. Fortis also owns a real estate and hotels subsidiary and has interests in electric generation ventures in Canada and the U.S.



- **Capital Structure**: A debt-to-capitalization of 65% is expected. We expect Fortis will initially finance the project with its credit facilities, start terming out its debt in 2012 and wait until the project enters service before installing permanent equity financing.
- **Capital Cost Risk:** A fixed-price, design-build contract has been secured with SNC Lavalin, which should remove the majority of the capital cost risk.
- **Hydrology Risk**: The facility will receive fixed energy and capacity entitlements based on long-term average generation levels, which should remove most of the hydrology risk.
- **Regulatory:** Federal and provincial environmental assessment approvals are in place. The power sold to FortisBC will be subject to the British Columbia Utilities Commission's approval. While interested parties have until September 13, 2010 to object to the Government entering into the Partnership with Fortis without a competitive process, we don't expect any serious objections to be filed.

Notes:
1) Averages exclude ATCO due to its holding company nature.
2) Capital Power's 2008A EPS is a pro forma full-year estimate; 2009E EPS is a half-year estimate.
Source: Company Reports, Thomson, TD Newcrest.

Justification of Target Price

Our $32.00 target price is predicated on 50% of our 2011 and 2012 financial estimates as follows: 1) 50% relative earnings yield of 135% (vs. historical average of 132%), 2) 25% relative dividend yield of 92% (vs. historical average of 80%), and 3) 25% P/B of 1.5x (vs. historical average of 1.5x). Our target price implies a 3.7% dividend yield and a price-to-earnings ratio of 18.5x, compared to historical averages of 4.4% and 14.4x, respectively.

Key Risks to Target Price

1) Higher than expected long bond yields, 2) operational disruptions, 3) regulatory surprises, 4) unexpected large acquisitions, and 5) sovereign risk.

Investment Conclusion

We view the Waneta Expansion project positively, as we believe it will contribute low-risk, long-life, stable cash flows to Fortis. In addition, we believe the project could facilitate further non-regulated hydro projects, not only in BC, but also the Pacific Northwest. Fortis is the largest investor-owned gas and electric distribution utility in Canada, and therefore we view it as a core holding. We believe that in these volatile equity capital markets investors will find the Company's low-risk, utility dominated business model attractive. Long-term, we expect the Company to be well positioned as an aggregator of regulated gas and electric utilities in the United States, Canada, and the Caribbean. Given what we view to be attractive risk adjusted returns, we are upgrading Fortis to a BUY.

Fortis Inc.

(FTS-T) C$33.26

Q3 Results in Line With Expectations

Event

Fortis reported normalized Q3/10 EPS (f.d.) of $0.24, in line with our $0.23 estimate, recent consensus of $0.24 and above Q3/09 normalized EPS (f.d.) of $0.21.

Impact

SLIGHTLY POSITIVE.

We have updated our forecasts largely to reflect increased earnings at the Other Canadian Electric Utilities segment. In addition, we are rolling forward our target to be based 25% on our 2011 and 75% on our 2012 financial estimates as well as incorporating a lower bond yield assumption into our target price derivation (see Justification of Target Price Section). As a result of these changes, our target price increases by $4 dollars to $36.

Details

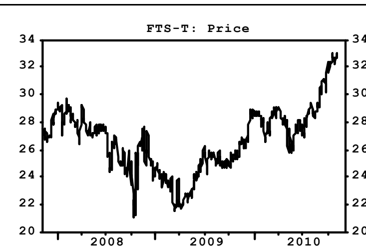
Regulated Gas Utilities (Terasen) Q3/10 normalized earnings of $(9) million were $6 million below Q3/09 results (Exhibit 1). The decrease was primarily due to higher operating and maintenance expenses at Terasen Gas Inc. that were approved by the regulator as a result of the recent Negotiated Settlement Agreement.

Regulated Electric Utilities – Canadian Q3/10 earnings of $43 million increased by $7 million year over year.

- **FortisAlberta** earnings of $19 million increased by $4 million versus Q3/09 results. The main reason for the increase was higher interim customer rates, effective January 2010, to reflect an increased allowed ROE and deemed equity thickness, in addition to growth in electrical infrastructure investment.
- **FortisBC** earnings of $11 million increased by $2 million year over year driven by increased customer rates to reflect a higher allowed return and increased utility investment.
- **Newfoundland Power** earnings of $8 million were $1 million higher than Q3/09 results. Increased electricity rates and sales were partially offset by higher operating expenses associated with repairs caused by Hurricane Igor in September 2010.

Company Profile

Fortis Inc. (FTS-T) is a diversified infrastructure holding company, primarily comprising of gas distribution utilities in B.C. and electric utilities in Canada, Belize, Turks and Caicos and the Cayman Islands. Fortis also owns a real estate and hotels subsidiary and has interests in electric generation ventures in Canada and the U.S.



Please see the final pages of this document for important disclosure information.

- **Other Canadian Electric Utilities (Maritime Electric & FortisOntario)** earnings of $5 million were in-line with Q3/09 results.

Regulated Utilities – Caribbean earnings of $8 million were slightly higher year over year largely from the deferral, for future collection in customer rates, of previously expensed business taxes at Belize Electricity.

Fortis Generation earnings of $9 million were $5 million higher than Q3/09 results largely due to increased rainfall and the contribution from the Vaca hydroelectric generating facility that was commissioned in March 2010.

Fortis Properties reported earnings of $9 million, in-line with Q3/09 results.

Corporate expenses increased by $1 million to $19 million in Q3/10 largely due to increased preferred share dividends from the Series H issue in January 2010 as well as higher business development costs.

Exhibit 1. Segmented Earnings Analysis ($mm unless stated otherwise)

	Q3/10	Q3/09	YOY Change	YOY % Change
Regulated Gas Utilities - Canadian[1]	($9)	($3)	($6)	200%

Regulated Electric Utilities - Canadian	43	36	7	19%
Regulated Utilities - Caribbean	8	7	1	14%
Total Regulated Utilities	**42**	**40**	**2**	**5%**
Non-Regulated Fortis Generation	**9**	**4**	**5**	**125%**
Non-Regulated Fortis Properties	**9**	**9**	**-**	**0%**
Corporate[2]	**(19)**	**(18)**	**(1)**	**6%**
Operating Earnings	**41**	**35**	**6**	**17%**
Adjustments	4	1	3	n.a.
Reported Earnings	**45**	**36**	**9**	**25%**
Operating EPS (f.d)	**$0.24**	**$0.21**	**$0.03**	**14%**
Reported EPS (f.d)	$0.26	$0.21	$0.05	22%

Note: Earnings have been normalized for the following items:
1) In Q3/10, a $4mm (after-tax) reversal of operating expenses related to project cost overruns previously expensed related to the Whistler conversion project.
2) Q3/09 excludes a favourable tax adjustment of $1mm.

Source: Company Reports, TD Newcrest.

Outlook

Potential Amalgamation of the Terasen Companies: Management spoke to the possibility of Terasen Gas Inc., Terasen Gas (Vancouver Island) Inc., and Terasen Gas (Whistler) Inc. merging into a single company. While no decision has been definitively set, the Company is considering the submission of an application in 2011, which would require approval from the British Columbia Utilities Commission (BCUC) and consent from the BC government. Any proposed combination would likely occur over the next 2-3 years and could present mutual benefits to both the Company and customers.

Competitive Transmission Build a Possibility: Given the increasing amount of power projects coming on-line in various provinces across Canada, the demand for transmission infrastructure to support this increase in generation is becoming apparent. Certain regions will require extensive transmission build to connect these projects to the grid and some jurisdictions are signaling that they could adopt a competitive tendering process for these transmission projects. Management is optimistic that these opportunities will arise and is hopeful that it can secure transmission project mandates in provinces like Alberta and Ontario in the future. We believe this is achievable given the Company's strong expertise in transmission, and its incumbency and ability to leverage its Newfoundland Power, FortisBC, FortisOntario, and FortisAlberta operations.

Belize Electricity Update: Final arguments will be presented in December 2010 relating to the Company's petition against the PUC's June 2008 Final Decision. Management believes it presented a solid appeal and expects a final judge ruling some time in the first half of 2011.

Q4/10 Preview: We are forecasting Q4/10 EPS of $0.48, a $0.03 increase over Q4/09 results largely due to contribution from the Vaca hydroelectric facility and rate base growth at the Company's Regulated Canadian Electric Utilities.

Source: Company Reports, Thomson, TD Newcrest.

Justification of Target Price

Our $36.00 target price is predicated on 25% of our 2011 and 75% of our 2012 financial estimates as follows: 1) 50% relative earnings yield of 142% (vs. historical average of 132%), 2) 25% relative dividend yield of 94% (vs. historical average of 80%), and 3) 25% P/B of 1.7x (vs. historical average of 1.5x). Our target price implies a 3.3% dividend yield and a price-to-earnings ratio of 20.1x, compared to historical averages of 4.4% and 14.4x, respectively. Note that we currently incorporate a 3.5% 10-year Canada bond yield assumption (previously 4.0%) into our target price calculations.

Key Risks to Target Price

1) Higher than expected long bond yields, 2) operational disruptions, 3) regulatory surprises, 4) unexpected large acquisitions, 5) sovereign risk, and 6) escalating construction costs.

Investment Conclusion

Fortis' Regulated Electric Utilities and Non-Regulated Generation segments reported strong contributions during the quarter. Moving forward we expect growth in the Company's regulated utilities will continue to be the primary driver of EPS growth.

Fortis is the largest investor-owned gas and electric distribution utility in Canada, and therefore we view it as a core holding. We believe that in these volatile equity capital markets investors will find the Company's low-risk, utility dominated business model attractive. Long-term, we expect the Company to be well positioned as an aggregator of regulated gas and electric utilities in the United States, Canada, and the Caribbean.

Fortis Inc.

(FTS-T) C$33.81

Q4 Results a Solid End to 2010

Event

Fortis reported Q4/10 EPS (f.d.) of $0.47, slightly lower than our $0.48 estimate, recent consensus of $0.51 but above Q4/09 normalized EPS (f.d.) of $0.45.

Impact

NEUTRAL. We have made numerous adjustments to our model, which include updating our Newfoundland Power rate base model and a private debt placement. Our estimates decrease slightly as a result of these changes. However, our target price increases by one dollar to $36.00 as we are rolling forward our target to be based 100% on our 2012 forecasts.

Details

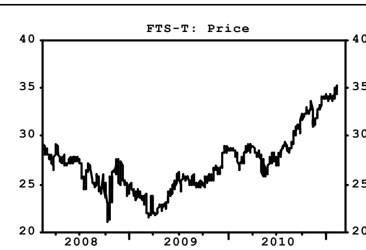
Regulated Gas Utilities (Terasen) Q4/10 earnings of $45 million were $7 million below normalized Q4/09 results (Exhibit 1). The decrease was largely due to the timing of operating expenses, with a higher weighting of costs in Q4/10, increased labour and employee-benefit expenses, and higher maintenance and operating activities that were approved by the regulator as a result of the recent Negotiated Settlement Agreement.

Regulated Electric Utilities – Canadian Q4/10 earnings of $41 million increased by $10 million year over year.

- **FortisAlberta** earnings of $17 million increased by $5 million versus Q4/09 normalized results primarily from ongoing electrical infrastructure investment, customer growth, and higher regulator-approved expenses recoverable from customers.
- **FortisBC** earnings of $10 million increased by $2 million year over year driven largely by increased customer rates reflecting a higher allowed return and increased incentive adjustments.
- **Newfoundland Power** earnings of $9 million were $1 million higher than Q4/09 results. Increased electricity rates and sales were the main drivers for the increase.
- **Other Canadian Electric Utilities (Maritime Electric & FortisOntario)** earnings of $5 million were $2 million ahead of Q4/09 normalized results largely due to higher capitalized overhead expenses in Q4/10.

Company Profile

Fortis Inc. (FTS-T) is a diversified infrastructure holding company, primarily comprising of gas distribution utilities in B.C. and electric utilities in Canada, Belize, Turks and Caicos and the Cayman Islands. Fortis also owns a real estate and hotels subsidiary and has interests in electric generation ventures in Canada and the U.S.



Regulated Utilities – Caribbean earnings of $5 million were $2 million lower year over year largely from increased legal expenses at Belize Electricity as a result of the regulatory challenges, in addition to lower electricity sales.

Fortis Generation earnings of $5 million were $2 million higher than Q4/09 results largely from increased generation production in all operating regions, and higher average electricity prices in Upper New York State and Ontario.

Fortis Properties reported earnings of $7 million, $2 million above Q4/09 results primarily due to lower effective income taxes, in addition to rent increases in the real estate division.

Corporate expenses decreased by $1 million to $18 million in Q4/10 largely due to lower financing costs.

Exhibit 1. Segmented Earnings Analysis ($mm unless stated otherwise)

	Q4/10	Q4/09	YOY Change	YOY % Change

Outlook

MOU to Develop Transmission Projects in Ontario: On February 2, 2011, FortisOntario announced that it had entered into a memorandum of understanding (MOU) with Lake Huron Anishinabek Transmission Company Inc. (LHATC) for the potential construction and operation of regulated electricity transmission projects in Ontario. FortisOntario will hold a minimum ownership of 51% and LHATC will have the right to acquire up to a 49% equity interest in the joint venture.

Given the increasing amount of renewable power projects coming on line in Ontario, the demand for transmission infrastructure to support this increase in generation has prompted the Ontario Energy Board (OEB) to issue a Framework for Transmission Project Development Plans, which could encourage new transmission investment in Ontario through a formal competitive process for projects identified by the Ontario Power Authority. Although it is still early days, we view this development positively as we believe Fortis' strong expertise in transmission and its incumbency in Ontario will allow the company to potentially secure transmission project mandates in the province.

Q1/11 Preview: We are forecasting Q1/11 EPS of $0.59, a $0.03 increase over Q1/10 results largely due to rate base growth at the Company's Regulated Canadian Utilities and a full-quarter contribution from the Vaca hydroelectric generating facility.

Notes:
1) Averages exclude ATCO due to its holding company nature.
2) Capital Power's 2009A is a half-year actual.

Source: Company Reports, Thomson, TD Newcrest.

Justification of Target Price

Our $36.00 target price is predicated on our 2012 financial estimates as follows: 1) 25% EV / EBITDA multiple of 11.0x, 2) 25% relative dividend yield of 90%, and 3) 50% free cash flow yield of 7.0%. Our target price also incorporates a 3.5% 10-year Government of Canada bond yield assumption.

Key Risks to Target Price

1) Higher than expected long bond yields, 2) operational disruptions, 3) regulatory surprises, 4) unexpected large acquisitions, 5) sovereign risk, and 6) escalating construction costs.

Investment Conclusion

We expect capital investments in the Company's regulated utilities to continue to be the primary driver of EPS growth in the medium term, which we view positively given the low-risk and regulated nature of the assets.

Fortis is the largest investor-owned gas and electric distribution utility in Canada, and therefore we view it as a core holding. We believe that in the current environment, investors will find the Company's low risk, utility dominated business model attractive. Long-term, we expect the Company to be well positioned as an aggregator of regulated gas and electric utilities in the United States, Canada, and the Caribbean.

Fortis Inc.

(FTS-T) C$32.29

Belize Electricity Receives Negative Court Decision

Event

The Supreme Court of Belize dismissed Belize Electricity Ltd.'s (70% owned by Fortis) appeal regarding the regulator's Final Decision following the 2008 Annual Tariff Review Proceeding.

Impact

MILDLY NEGATIVE.

We are reducing each of our 2011 and 2012 EPS estimates by three pennies to reflect lower expected Belize Electricity earnings as a result of the decision.

Details

Belize Electricity Ltd. Overview: An integrated electric utility and the principal distributor of electricity in Belize. The utility has approximately $0.2 billion of assets and serves more than 77,000 customers. Fortis has a 70% ownership interest in Belize Electricity.

Regulatory Overview: Belize Electricity is regulated by the Public Utilities Commission (PUC). The PUC issued a decision in June 2008, which disallowed $18 million of previously incurred power costs and lowered Belize Electricity's return on assets (ROA) to 10% from 12%. Fortis is of the view that the decision violated established regulatory practices and contractual obligations between the utility and the government. Belize Electricity challenged the decision in several proceedings during which time the PUC has been prohibited from carrying out any rate review proceedings and taking enforcement actions against the utility. We note that Belize Electricity has not been earning its 10% allowed ROA due to the aforementioned regulatory challenges.

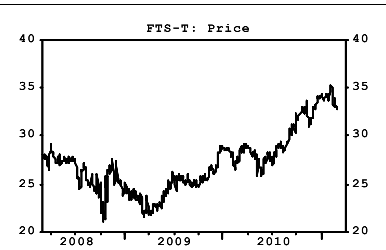
Company Profile

Fortis Inc. (FTS-T) is a diversified infrastructure holding company, primarily comprising of gas distribution utilities in B.C. and electric utilities in Canada, Belize, Turks and Caicos and the Cayman Islands. Fortis also owns a real estate and hotels subsidiary and has interests in electric generation ventures in Canada and the U.S.



Overview of Decision:

- **Decision**: The Supreme Court dismissed Belize Electricity's appeal of the regulator's Final Decision following the 2008 Annual Tariff Review Proceeding.
- **Earnings Impact**: Moving forward we expect earnings from Belize Electricity to be similar to the $1.5 million that was generated in 2010. Fortis believes the utility should generate $10 million of earnings under normal operations. We note that Belize Electricity represented less than 1% of Fortis' consolidated earnings in 2010.
- **Possible Next Steps**: Belize Electricity is reviewing the decision and its options. The company can appeal to the Belize Court of Appeal and following that, if required, the case could be brought to the Caribbean Court of Justice in Trinidad.

Notes:
1) Averages exclude ATCO due to its holding company nature.
Source: Company Reports, Thomson, TD Newcrest.

Justification of Target Price

Our $36.00 target price is predicated on our 2012 financial estimates as follows: 1) 25% EV / EBITDA multiple of 11.0x, 2) 25% relative dividend yield of 90%, and 3) 50% free cash flow yield of 7.0%. Our target price also incorporates a 3.5% 10-year Government of Canada bond yield assumption.

Key Risks to Target Price

1) Higher than expected long bond yields, 2) operational disruptions, 3) regulatory surprises, 4) unexpected large acquisitions, 5) sovereign risk, and 6) escalating construction costs.

Investment Conclusion

We expect Belize Electricity to continue to challenge the decision. The decision, while mildly negative is largely immaterial to the company, although it does highlight the higher risk nature of Fortis' Caribbean investments relative to its Canadian regulated businesses.

We expect capital investments in the Company's regulated utilities to continue to be the primary driver of EPS growth in the medium term, which we view positively given the low-risk and regulated nature of the assets. Fortis is the largest investor-owned gas and electric distribution utility in Canada, and therefore we view it as a core holding. We believe that in the current environment, investors will find the Company's low risk, utility dominated business model attractive. Long-term, we expect the Company to be well positioned as an aggregator of regulated gas and electric utilities in the United States, Canada, and the Caribbean.

Fortis Inc.

(FTS-T) C$32.35

Regulated Canadian Utilities Drive Q1 Results

Event

Fortis reported Q1/11 normalized EPS (f.d.) of $0.64, higher than our $0.59 estimate, recent consensus of $0.62, and Q1/10 EPS (f.d.) of $0.56.

Impact

SLIGHTLY POSITIVE. We have made several changes to our model, the largest of which includes adjusting our FortisAlberta rate base model for increased capital spend in 2011-2013, along with refining our overall maintenance expenditure forecasts. Our estimates increase slightly as a result of these changes. We are maintaining our $36.00 target price and BUY recommendation.

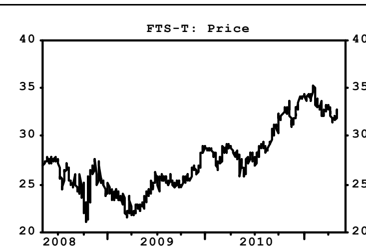
Details

Regulated Gas Utilities Q1/11 earnings of $76 million were $3 million above Q1/10 results (Exhibit 1). The increase was largely due to rate base growth from continued utility investments, the timing of the recorded impact of a rate decision received back in 2010, and lower amortization costs from retired assets.

Regulated Electric Utilities – Canadian Q1/11 normalized earnings of $52 million increased by $12 million year over year.

- **FortisAlberta** normalized earnings of $20 million increased by $6 million versus Q1/10 results, primarily due to rate base growth from continued utility investments and the timing of the recorded impact of a rate decision received back in 2010.
- **FortisBC** earnings of $19 million increased by $5 million year over year, driven largely by increased electricity sales and rate base growth from capital investments.
- **Newfoundland Power** earnings of $7 million were flat year over year.
- **Other Canadian Electric Utilities** earnings of $6 million were $1 million higher than Q1/10 results, largely due to an increase in ROE at Algoma Power and increased electricity sales.

Company Profile
Fortis Inc. (FTS-T) is a diversified infrastructure holding company, primarily comprising of gas distribution utilities in B.C. and electric utilities in Canada, Belize, Turks and Caicos and the Cayman Islands. Fortis also owns a real estate and hotels subsidiary and has interests in electric generation ventures in Canada and the U.S.



Please see the final pages of this document for important disclosure information.

Regulated Utilities – Caribbean earnings of $4 million were unchanged from Q1/10 results.

Fortis Generation earnings of $3 million were $1 million higher than Q1/10 results, largely from increased generation production in Belize and higher average energy sales in Ontario.

Fortis Properties normalized earnings of $1 million were $1 million below Q1/10 results, primarily due to the impact of the economic downturn on hotel operations and increased amortization expenses from capital investments.

Corporate expenses decreased by $1 million to $20 million in Q1/11, largely due to lower operating and financing costs.

Exhibit 1. Segmented Earnings Analysis ($mm unless stated otherwise)

	Q1/11	Q1/10	YOY Change	YOY % Change

Notes: Reported earnings have been normalized for the following items:
1) Q1/11 excludes a $1.0 million (after-tax) gain related to the sale of property.
2) Q1/11 excludes a $0.5 million (pre-tax) gain related to the sale of the Viking Mall in Newfoundland.

Source: Company Reports, TD Newcrest.

Outlook

Regulatory Updates:

- **FortisAlberta:** In March 2011, FortisAlberta filed its 2012 and 2013 Distribution Tariff Application, which also included approximately $776 million in forecasted gross capital expenditures over the two-year period. A final decision by the regulator is expected in Q1/12.
- **FortisBC:** FortisBC Electric intends to file a 2012-2013 Revenue Requirements Application (RRA) in the summer of 2011. Similarly, FortisBC Energy (previously known as the Terasen companies) expects to file a 2012-2013 RRA in May 2011.
- **Newfoundland Power:** A customer rate application is expected to be filed in May 2011, which proposes an increase in rates by approximately 8%, effective July 1, 2011.

Future Acquisitions a Possibility: Our growth outlook for Fortis incorporates an estimated $5.5 billion capital program over the next five years. Management is also actively pursuing regulated electric and natural gas distribution utilities, and an acquisition could occur first in the U.S. over Canada, given our view of the potential candidates. We would not expect Fortis to form a joint venture with or take a partial interest in a smaller, high-cash yielding corporate affiliate, although, for a very large acquisition, a purely financial partner could play a role.

Q2/11 Preview: We are forecasting Q2/11 EPS of $0.36, a $0.04 increase over Q2/10 results, largely due to rate base growth at the Company's FortisAlberta and FortisBC regulated utilities.

Resuming Coverage: Acquisition of Vermont Utility Announced

Event

- We are resuming coverage of Fortis after the completion of a $300 million equity offering.
- On May 30, 2011, Fortis announced that it entered into an agreement to acquire Central Vermont Public Service Corporation (CVPS) for an aggregate purchase price of approximately US$700 million.
- On June 10, 2011, the Government of Belize issued a statement announcing its interest in assuming control of Belize Electricity Ltd. (BEL).

Impact

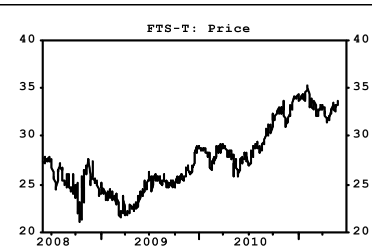
MIXED. We have revised our estimates to include the successful acquisition of CVPS along with updating our financing assumptions, which includes the recent equity offering. However, given that Fortis has not received any formal offer from the Belize Government for its investment in BEL we are not incorporating a sale of the asset in our model. Our target remains $36.00.

Details

CVPS Acquisition:

- **Description:** CVPS is the largest integrated electric utility in Vermont, and consists of approximately 9,000 miles of distribution lines and over 600 miles of sub-transmission lines. CVPS also holds directly and indirectly approximately 41% of Vermont Transco LLC (Velco), which owns and operates the high-voltage transmission system in Vermont. CVPS serves approximately 160,000 customers in about two-thirds of the cities and towns in Vermont.
- **Price:** US$35.10 per share in cash for an aggregate purchase price of approximately US$700 million, which includes approximately US$230 million of debt. This represents a 1.4x price-to-total rate base multiple when including CVPS' total interest in Velco.
- **Favourable Regulatory Framework:** For CVPS, the allowed rate of return on common equity for 2011 has been set at 9.45% and the equity thickness is currently 57%.

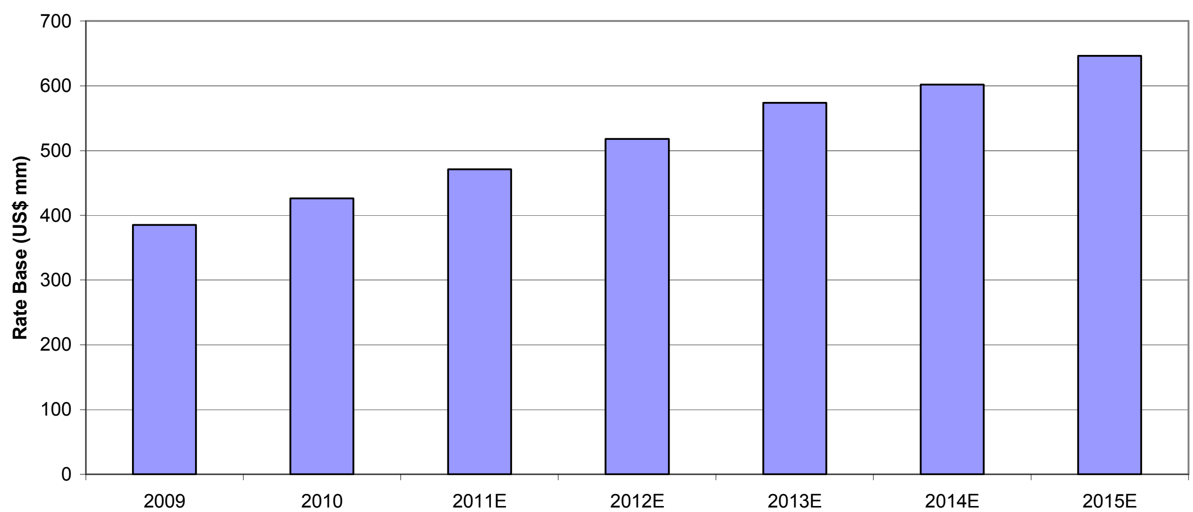
Company Profile
Fortis Inc. (FTS-T) is a diversified infrastructure holding company, primarily comprising of gas distribution utilities in B.C. and electric utilities in Canada, Belize, Turks and Caicos and the Cayman Islands. Fortis also owns a real estate and hotels subsidiary and has interests in electric generation ventures in Canada and the U.S.



Please see the final pages of this document for important disclosure information.

- **Rate Base Growth:** CVPS expects its rate base investment to reach approximately US$650 million by 2015, representing a compound average annual growth rate of 8.7% from 2010 to 2015 (Exhibit 1). In 2010, total assets and rate base assets of CVPS were approximately US$711 million and US$426 million, respectively.
- **EPS Accretive:** The acquisition is expected to be accretive to Fortis' EPS in the first full year of ownership. Based on our assumptions we estimate an annual EPS accretion of $0.04 in 2012.
- **Financing:** Upon the transaction close, Fortis expects to fund the acquisition by drawing on its committed term credit facility.
- **Higher Bid Unlikely:** Given our understanding that the sale process was thoroughly conducted (by Lazard Ltd.), we do not foresee a higher bid. The transaction break fee is $17.5 million plus expenses (capped at $2 million).
- **Approvals and Timing:** The transaction is subject to the receipt of approvals from CVPS shareholders, regulatory and other approvals, including those of the Vermont Public Service Board and the U.S. FERC, and customary closing conditions. Fortis expects to close the acquisition within 6 to 12 months. We have assumed an early 2012 closing.
- **In-Line With Strategy and Creates Further Opportunities in the U.S. Northeast:** We view the foray into the U.S. Northeast positively as it could build on Fortis' strategy of growing earnings through its regulated rate base investments, and potentially provide it with the foundation for growing its asset base in the U.S. Northeast. It is our understanding that Fortis sees other similar opportunities in the U.S., and a successful acquisition of CVPS could provide Fortis with the impetus to acquire other electric utilities in the region, in our view.

Exhibit 1. CVPS Estimated Rate Base Growth (2009–2015)



Note:
1) Includes Velco investments and VT Marble acquisition, net of stimulus funding.
Source: Company Reports, TD Newcrest.

Equity Offering:

- On May 30, 2011, Fortis entered into an agreement to sell 9.1 million common shares on a bought deal basis at $33.00 per share, for gross proceeds of approximately $300 million ($345.3 million with over-allotment). The underwriters have an option to purchase up to an additional 1.365 million common shares at the same price up to 30 days after the offering close.
- The net proceeds are expected to be used to repay the company's outstanding credit facility, finance additional equity injections into the company's western Canadian regulated utilities and the Waneta Expansion, and general corporate purposes.

Government of Belize Announcement:

- On June 10, 2011, the Government of Belize issued a statement announcing its interest in assuming control of BEL through the purchase of a majority stake of its shares. The Government of Belize currently owns approximately 25% of BEL while Fortis owns approximately 70%.
- **Offer Not Official:** No official offer has been made by the Belize Government for BEL but if a proposal is announced we would expect Fortis to prefer to sell either all or none of its stake in BEL.
- **BEL Investment Largely Immaterial:** In 2010, BEL contributed approximately $2 million of net earnings to Fortis (less than 1% of 2010 consolidated operating earnings) and the company's net investment in BEL is approximately C$125 million.
- **BECOL Investment Unaffected:** It is our understanding that the Government of Belize is not interested in Fortis' investment in Belize Electric Company Limited (BECOL), which operates three non-regulated generation assets in Belize and sells output to BEL under 50-year power purchase agreements (PPAs). We believe that the Belize Government intends to honour the PPAs with BECOL, and that there are strong mechanisms in place to ensure that those contracts are honoured.
- **Timing:** It is our understanding that BEL has the cash to purchase electricity for just under a month using a cash advance from the Belize Government, and that the Government would like to reach a deal prior to this deadline.

Notes:

1) Averages exclude ATCO due to its holding company nature.

Source: Company Reports, Thomson, TD Newcrest.

Justification of Target Price

Our $36.00 target price is predicated on our 2012 financial estimates as follows: 1) 25% EV/EBITDA multiple of 11.0x, 2) 25% relative dividend yield of 90%, and 3) 50% free cash flow yield of 7.0%. Our target price also incorporates a 3.5% 10-year Government of Canada bond-yield assumption.

Key Risks to Target Price

1) Higher-than-expected long bond yields, 2) operational disruptions, 3) regulatory surprises, 4) unexpected large acquisitions, 5) sovereign risk, and 6) escalating construction costs.

Investment Conclusion

If successful, we view the CVPS acquisition positively as we believe it would be mutually beneficial for both companies. The transaction should provide Fortis with a source of stable, regulated earnings, in a favourable regulatory jurisdiction with the potential to expand the company's footprint into the U.S. Northeast. CVPS is expected to gain the financial backing of a strong parent to help fund its future growth, receive benefits to improve its system reliability and efficiency for customers, and keep its operations autonomous in the Fortis fold.

Fortis is the largest investor-owned gas and electric distribution utility in Canada, and, therefore, we view it as a core holding. We believe that in the current environment, investors will find the Company's low risk, utility-dominated business model attractive. Long term, we expect the Company to be well positioned as an aggregator of regulated gas and electric utilities in the U.S. and Canada.

Fortis Inc.

(FTS-T) C$32.01

Fortis' Electric Utility in Belize to be Expropriated

Event

The Government of Belize has passed a legislation and issued an order to expropriate Fortis' 70% ownership interest in Belize Electricity Limited (BEL). Compensation for Fortis' interest remains to be determined.

Impact

MILDLY NEGATIVE.

We have updated our forecasts to remove the earnings contribution from BEL (approximately $2 million per year, versus a fair return level of $10 million). At this point, however, we have not written down the net investment from the company's balance sheet, as the final payment could take over a year to resolve.

While there is some risk to the earnings contribution from Fortis' non-regulated hydro generation assets in the country (BECOL), which we estimate to be $12-13 million annually (approximately 4% of consolidated earnings), we believe that the contractual provisions in place are sufficient to protect the investment's value and cash flow.

We would view any weakness in the stock price, as a result of this announcement, to be a buying opportunity.

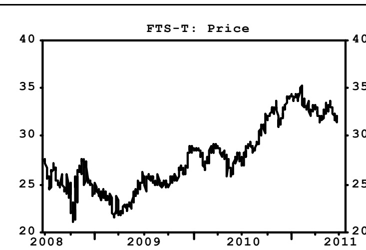
Details

- **BEL Overview**: Fortis owned approximately 70% of BEL, which is the main distributor of electricity in the country. Prior to the expropriation, the Government effectively owned 25% of BEL, with the balance being held by approximately 1,100 Belizeans.
- **BEL Investment Largely Immaterial to Fortis**: In 2010, BEL contributed approximately $2 million of net earnings to Fortis (less than 1% of 2010 consolidated operating earnings) and the company's net investment in BEL was approximately $125 million (less than 2% of Fortis' assets).

Please see the final pages of this document for important disclosure information.

Company Profile

Fortis Inc. (FTS-T) is a diversified infrastructure holding company, primarily comprising of gas distribution utilities in B.C. and electric utilities in Canada, Turks and Caicos and the Cayman Islands. Fortis also owns a real estate and hotels subsidiary and has interests in electric generation ventures in Canada and the U.S.



- **Expropriation was a Known Risk:** BEL had been unsuccessfully seeking a fair return for years through the courts of appeal as the regulator had kept electricity rates too low to allow direct operating costs to be recovered and the debt to be serviced. Last week, our understanding was that BEL had sufficient cash to purchase electricity for just under a month using a cash advance from the Belize Government, and that the Government was interested in purchasing a majority interest in BEL prior to the cash running out.
- **Foreign Investment Exiting Belize**: We continue to be hopeful that Fortis will be able to recover its net investment in BEL, although there is some risk to that scenario. Our understanding is that the water and telephone companies have already been taken over by the Government, with the water company acquired but the phone company expropriated.
- **Government Has No Plans to Nationalize BECOL**: Fortis also owns and operates three non-regulated hydro dams in Belize that sell electricity to BEL under 50-year power purchase agreements (PPAs). We estimate Fortis' investment in Belize Electric Company Limited (BECOL) to be $160-175 million and the assets to generate $12-13 million of earnings per year. We believe that the Belize Government intends to honour the PPAs with BECOL, and that there are strong mechanisms in place to ensure that those contracts are honoured. Local media has quoted Prime Minister Barrow as stating that "*...because BECOL is functioning well and there is no difficulty in its generation of electricity, there can be no reason to interfere with BECOL and Fortis' ownership...except for compelling, unavoidable public interest reasons, this Government observes the sanctity of contracts*".
- **Other Caribbean Investments Appear Stable**: Other than potentially consolidating utilities in Turks & Caicos and the Cayman Islands in the future, we would not expect Fortis to expand its presence to new countries in the Caribbean. As Fortis has been growing, the Caribbean has continued to shrink as a percentage of the consolidated company, which we have always viewed to be a positive trend. Last year Utilities earnings in the Caribbean region contributed 8% to Fortis' operating earnings, versus 18% in 2007.

Outlook

Timing Could Take Years to Fully Resolve: Our understanding is that while Fortis is required to file a claim within 30 days of expropriation, and have all final claims submitted within 12 months from expropriation. The Legislation does not set a timeline for actually paying out the claim beyond effectively stating that the reasonable payment is to be made in a reasonable time. Given our view of the weak financial state of the Government, it could take some time for any payment to be made. While Fortis could appeal the level of payment the Government establishes in the court system, to date Fortis has been unsuccessful in obtaining a fair return for BEL through the appeals process, suggesting that a significant write down of Fortis' BEL investment is a real risk. The Government does not appear to put much weight on the negative investment signal to foreigners that this move makes, especially since this is not the first infrastructure to be nationalized, increasing the risk of an investment write down for Fortis.

Source: Company Reports, Thomson, TD Newcrest.

Justification of Target Price

Our $36.00 target price is predicated on our 2012 financial estimates as follows: 1) 25% EV/EBITDA multiple of 11.0x, 2) 25% relative dividend yield of 90%, and 3) 50% free-cash-flow yield of 7.0%. Our target price also incorporates a 3.5% 10-year Government of Canada bond yield assumption.

Key Risks to Target Price

1) Higher-than-expected long bond yields, 2) operational disruptions, 3) regulatory surprises, 4) unexpected large acquisitions, 5) sovereign risk, and 6) escalating construction costs.

Investment Conclusion

We view the expropriation of Fortis' 70% interest in BEL as largely immaterial, as its investments in Belize are relatively small and have never been a part of our core investment thesis. Fortis is the largest investor-owned gas and electric distribution utility in Canada, and, therefore, we view it as a core holding. We believe that in the current environment, investors will find the Company's low risk, utility-dominated business model attractive. Long term, we expect the Company to be well-positioned as an aggregator of regulated gas and electric utilities in the U.S. and Canada. We would view any weakness in the stock price, as a result of this announcement, as a buying opportunity.

Gaz Metro's Bid for CVPS is Slightly Higher than Fortis'

Event

Gaz Metro Limited Partnership has submitted an unsolicited bid to acquire all of the common shares of Central Vermont Public Service Corporation (CVPS) for US$35.25 per share, in cash. This bid is slightly higher than the US$35.10 per share, in cash offer included in Fortis' and CVPS' merger agreement, which was announced on May 30, 2011.

CVPS commented that its board of directors would review the offer in due course based on its fiduciary responsibilities and contractual commitments to Fortis.

As a reminder, Valener has a 29% ownership interest in Gaz Metro LP.

Impact for Valener (VNR-T)
POTENTIALLY POSITIVE.
Given Gaz Metro's existing electric distribution utility operations in Vermont (Green Mountain Power), we believe the acquisition would make strategic sense. Based on our calculations, the acquisition of CVPS – as proposed – could add three cents of accretion to our Valener EPS estimates. However, due to the uncertainty surrounding the situation, we are leaving our estimates unchanged at this point.

Impact for Fortis (FTS-T)
POTENTIALLY NEGATIVE.
The CVPS acquisition is included in our Fortis forecasts and we estimate the transaction would be four cents accretive to our EPS estimates. At this point, our Fortis forecasts remain unchanged and continue to include the contribution from CVPS.

For further details on Fortis' offer please refer to our June 15, 2011 Action Note titled, *Resuming Coverage: Acquisition of Vermont Utility Announced*

Overview of CVPS

CVPS is the largest integrated electric utility in Vermont, and consists of approximately 9,000 miles of distribution lines and over 600 miles of sub-transmission lines. CVPS also holds directly and indirectly approximately 41% of Vermont Transco LLC (Velco), which owns and operates the high-voltage transmission system in Vermont. CVPS serves approximately 160,000 customers in about two-thirds of the cities and towns in Vermont.

CVPS is regulated by the Vermont Public Services Board (VPSB) and, for 2011, the allowed rate of return on common equity has been set at 9.45% and the equity thickness is currently 57%. CVPS expects its rate base investment to reach approximately US$650 million by 2015, representing a compound average annual growth rate of 8.7% from 2010 to 2015. In 2010, total assets and rate base assets of CVPS were approximately US$711 million and US$426 million, respectively.

Overview of Gaz Metro's Offer

- **Price**: US$35.25 per share in cash for an aggregate purchase price of US$702 million, which includes approximately US$230 million in debt. This represents a 1.5x price-to-total rate base multiple when including CVPS' total interest in Velco in addition to the break fee payable by CVPS to Fortis.
- **Dividends**: Shareholders will continue to receive the current quarterly dividend of US$0.23 per share. We note that under Fortis' offer, shareholders would receive dividends of US$0.23 per share for two quarters followed by US$0.01 per share for the remaining quarters until the transaction closes (Exhibit 1).

Exhibit 1: Comparison of Gaz Metro's and Fortis' Offers (US$)

	Gaz Metro	Fortis	% Delta
Cash Offer Price	35.25	35.10	0.4%
Total Consideration - Dec 31, 2011 Closing	35.71	35.56	0.4%
Total Consideration - March 31, 2012 Closing	35.94	35.57	1.0%
Total Consideration - June 30, 2012 Closing	36.17	35.58	1.7%

Note: Total consideration includes dividends received.

Source: Company Reports, TD Newcrest.

- **Timing**: Management expects the transaction to close in 8-12 months, based on prior transactions (including its purchase of Green Mountain Power in 2007).
- **Approvals**: The transaction is subject to approval by CVPS shareholders, then regulatory and other approvals including the US FERC and VPSB. We note that Gaz Metro has significant experience in dealing with the Vermont regulator, due to its existing natural gas and electric distribution utilities in the state. Local Gaz Metro utility manager discussed an offer with regulators prior to making the offer public.
- **Gaz Metro Financing**: Gaz Metro expects to fund a purchase of CVPS' shares with 50% debt and 50% equity. The debt and equity would be in-place prior to closing, although the company does have a bridge facility available.
- **Valener Financing:** We expect Valener to participate in any equity offering by Gaz Metro to maintain its 29% ownership interest. We believe Valener would finance its acquisition of Gaz Metro shares through an equity offering of approximately $70 million.
- **Strategic Rationale:** Gaz Metro has a sizable existing presence in Vermont including its ownership of Green Mountain Power, which is the second largest electric distribution utilty in Vermont (next to CVPS). The company had stated in the past that it would be interested in consolidation opportunities in the state.

Overview of Fortis' Offer

- **Price**: US$35.10 per share in cash for an aggregate purchase price of US$700 million, which includes approximately US$230 million of assumed debt. This represents a 1.4x price-to-total rate base multiple when including CVPS' total interest in Velco.
- **Dividends**: Shareholders would receive the current quarterly dividend of US$0.23 per share for the next two quarters followed by $0.01 per share for each subsequent quarter until closing.
- **Merger Agreement and Break Fee**: Fortis previously has entered into a merger agreement with CVPS. The agreement includes a break fee of US$17.5 million, in addition to expenses which are capped at US$2.0 million. Included in the agreement is a clause which allows Fortis to counter any superior offer.
- **Timing**: Fortis expects the transaction to close in 6-12 months.
- **Financing**: Upon the transaction close, Fortis expects to fund the acquisition by drawing on its committed term credit facility.
- **Strategic Rationale:** The acquisition would be Fortis' first foray into the U.S. Northeast. It is our understanding that Fortis sees other similar opportunities in the U.S., and a successful acquisition of CVPS could provide Fortis with the impetus to acquire other electric utilities in the region, in our view.

Investment Conclusion

Gaz Metro's offer was a surprise to us as it was our understanding that CVPS' merger agreement with Fortis was the result of a thorough sale process. We also point out that unsolicited bids for utility assets are a rare event given the importance and length of time required for regulatory approvals. Given the $17.5 million break fee with Fortis, we do not believe that Gaz Metro's offer is high enough for CVPS' board to recommend the offer, as the cost of the break fee would be borne by CVPS shareholders in the event that the regulator does not approve a takeover. At this point, we believe that a likely scenario is that Fortis increases its bid slightly.

Exhibit 3. Justification of Target Prices

Stock Name	Ticker	Exch.	Rating	Target Price	Justification of Target Price
ATCO Ltd.	ACO.X	T	AL BUY	$69.00	predicated on ATCO's estimated one-year forward NAV and applying a 20% discount to NAV. The company's estimated one-year forward NAV depends on our $60.00 CU target price. Our target price implies a 1.8% dividend yield and a price-to-earnings ratio of 13.1x, based on our 2012 financial estimates.
Canadian Utilities Ltd.	CU	T	AL BUY	$60.00	predicated on our 2012 financial estimates as follows: 1) 25% EV/EBITDA multiple of 9.5x, 2) 25% relative dividend yield of 90%, and 3) 50% free cash flow yield of 7.0%. Our target price also incorporates a 3.5% 10-year Government of Canada bond-yield assumption.
Capital Power Corp.	CPX	T	HOLD	$27.00	predicated on our 2012 financial estimates as follows: 1) 25% EV/EBITDA multiple of 9.0x, 2) 25% relative dividend yield of 170%, and 3) 50% free-cash-flow yield of 10.5%. Our target incorporates a 3.5% 10-year Government of Canada bond yield.
Emera Inc.	EMA	T	HOLD	$32.00	predicated on our 2012 financial estimates as follows: 1) 25% EV/EBITDA multiple of 11.0x, 2) 25% relative dividend yield of 90%, and 3) 50% free cash flow yield of 7.0%. Our target price also incorporates a 3.5% 10-year Government of Canada bond-yield assumption.
Enbridge Inc.	ENB	T, N	HOLD	$30.00	predicated on our 2012 financial estimates as follows: 1) 25% EV / EBITDA multiple of 10.5x, 2) 25% relative dividend yield of 130%, and 3) 50% free cash flow yield of 8.5%. Our target price also incorporates a 3.5% 10-year Government of Canada bond yield assumption.
Fortis Inc.	FTS	T	BUY	$36.00	predicated on our 2012 financial estimates as follows: 1) 25% EV/EBITDA multiple of 11.0x, 2) 25% relative dividend yield of 90%, and 3) 50% free cash flow yield of 7.0%. Our target price also incorporates a 3.5% 10-year Government of Canada bond-yield assumption.
TransAlta Corp.	TA, TAC	T, N	HOLD	$20.00	predicated on our financial estimates as follows: 1) 25% EV to 2012E EBITDA multiple of 9.0x, 2) 25% relative 2012E dividend yield of 160%, and 3) 50% 2011E free cash flow yield of 10.0%. Given the unusually high maintenance capital scheduled for 2012, at this point we believe a 2011 free cash flow metric is more representative of a more normal business operation and, therefore, is the input to our target price derivation. Our target price also incorporates a 3.5% 10-year Government of Canada bond yield assumption.
TransCanada Corp.	TRP	T, N	BUY	$43.00	predicated on 2012 financial estimates as follows: 1) 25% EV / EBITDA multiple of 9.5x, 2) 25% relative dividend yield of 140%, and 3) 50% free cash flow yield of 9.0%. Our target price also incorporates a 3.5% 10-year Government of Canada bond-yield assumption.
AltaGas Ltd.	ALA	T	BUY	$26.00	predicated on our 2012 financial estimates as follows: 1) 25% EV/EBITDA multiple of 11.0x, 2) 25% relative dividend yield of 150%, and 3) 50% free cash flow yield of 9.0%. Our target price also incorporates a 3.5% 10-year Government of Canada bond-yield assumption.
Enbridge Income Fund Holdings Inc.	ENF	T	REDUCE	$16.00	predicated on our 2012 financial estimates as follows: 1) 25% EV/EBITDA multiple of 10.0x, 2) 25% relative dividend yield of 180%, and 3) 50% free-cash-flow yield of 10.0%. Our target price also incorporates a 3.5% 10-year Government of Canada bond-yield assumption.
Veresen Inc.	VSN	T	HOLD	$13.50	predicated on 2012 financial estimates as follows: 1) 25% EV / EBITDA multiple of 10.0x, 2) 25% relative dividend yield of 190%, and 3) 50% free-cash-flow yield of 10.5%. Our target price also incorporates a 3.5% 10-year Government of Canada bond yield assumption.
Valener Inc.	VNR	T	HOLD	$16.50	predicated on 2012 financial estimates as follows: 1) 25% EV / EBITDA multiple of 9.0x, 2) 25% relative dividend yield of 175%, and 3) 50% free cash flow yield of 13.0%. Our target price also incorporates a 3.5% 10-year Government of Canada bond yield assumption.
Inter Pipeline Fund	IPL.UN	T	HOLD	$15.50	predicated on our 2012 financial estimates as follows: 1) 25% EV/EBITDA multiple of 10.5x, 2) 25% relative dividend yield of 140%, and 3) 50% free-cash-flow yield of 9.0%. Our target price also incorporates a 3.5% 10-year Government of Canada bond-yield assumption.
Keyera Corp.	KEY	T	REDUCE	$32.00	predicated on our 2012 financial estimates as follows: 1) 25% EV / EBITDA multiple of 10.0x, 2) 25% relative dividend yield of 140%, and 3) 50% free cash flow yield of 10.5%. Our target price also incorporates a 3.5% 10-year Government of Canada bond yield assumption.

Fortis Walks Away from CVPS Bid

Event

- Central Vermont Public Service Corporation (CVPS) and Gaz Metro Limited Partnership (Gaz Metro) announced a definitive agreement for the sale of CVPS to Gaz Metro.
- Fortis has effectively terminated its Merger Agreement with CVPS.

Impact

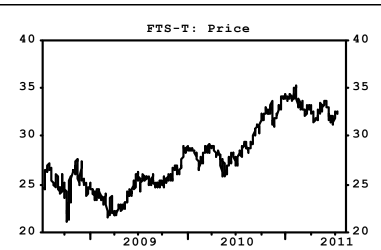
SLIGHTLY NEGATIVE. We have removed CVPS' contribution from our forecasts and added Fortis' receipt of the termination fee. We are also introducing our 2013 forecasts and rolling forward our target to be based 50% on each of our 2012 and 2013 estimates.

Details

- **Timeline:** Fortis management received notice yesterday that the Board of Directors of CVPS deemed Gaz Metro's bid a superior proposal. Fortis waived its right to enter into further discussions with CVPS in exchange for the prompt payment of the break fee, which resulted in the termination of its Merger Agreement with CVPS.
- **CVPS Contribution:** Our Fortis EPS forecasts previously included an accretion of approximately four cents from an assumed CVPS acquisition.
- **Break-Fee Proceeds:** Fortis will receive a US$17.5 million termination fee in addition to US$2.0 million in expenses.
- **Disciplined Management:** We believe an unwillingness to put in a higher bid demonstrates Fortis' disciplined approach to acquisitions.

Please see our July 13, 2011 Action Note on Valener titled, ***Gaz Metro Wins Bid for CVPS*** for more details on Gaz Metro's bid for CVPS.

Company Profile
Fortis Inc. (FTS-T) is a diversified infrastructure holding company, primarily comprising of gas distribution utilities in B.C. and electric utilities in Canada, Turks and Caicos and the Cayman Islands. Fortis also owns a real estate and hotels subsidiary and has interests in electric generation ventures in Canada and the U.S.



Please see the final pages of this document for important disclosure information.

Notes:
1) Averages exclude ATCO due to its holding company nature.
2) Capital Power's 2009A is a half-year actual.
Source: Thomson, TD Newcrest.

Justification of Target Price

Our $36.00 target is predicated on 50% of each of our 2012 and 2013 financial estimates as follows: 1) 25% EV/EBITDA multiple of 10.5x, 2) 25% relative dividend yield of 90%, and 3) 50% free-cash-flow yield of 7.0%. Our target incorporates a 3.5% 10-year Government of Canada bond yield.

Key Risks to Target Price

1) Higher-than-expected long bond yields, 2) operational disruptions, 3) regulatory surprises, 4) unexpected large acquisitions, 5) sovereign risk, and 6) escalating construction costs.

Investment Conclusion

Fortis demonstrated discipline in its decision not to make a counter offer for CVPS, in our view. Management has indicated that it is working on a few other opportunities, and we believe that Fortis is well-positioned to make future acquisitions, as any smaller utility the Company might acquire would likely gain the financial backing of a strong parent to help fund its future growth, receive benefits to improve its system reliability and efficiency for customers, and keep its operations autonomous in the Fortis fold.

Fortis is the largest investor-owned gas and electric distribution utility in Canada, and, therefore, we view it as a core holding. We believe that in the current environment, investors will find the Company’s low-risk, utility-dominated business model attractive.

Fortis Inc.

(FTS-T) C$30.60

Q2/11 Results Slightly Miss - Favourable Outlook Remains

Event

Fortis reported Q2/11 EPS (f.d.) of $0.33, which was slightly below our $0.36 estimate, recent consensus of $0.35, but above Q2/10 EPS (f.d.) of $0.32.

Impact

NEUTRAL.

We have made numerous changes to our financial model, primarily to reflect recent regulatory filings as well as more muted non-regulated generation and properties margins. The net result of these changes is that our 2011 EPS (f.d.) estimate decreases by a penny, while our 2012 and 2013 estimates each decrease by two pennies (Exhibit 1).

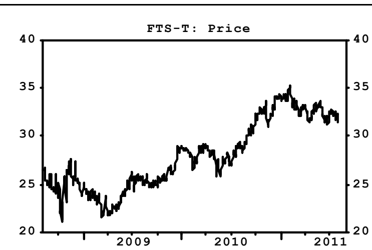
Details

Regulated Gas Utilities Q2/11 earnings of $15 million were $2 million below Q2/10 results (Exhibit 2). The decline was mainly attributable to the timing of operating expenses during the year partially offset by rate base growth from continued utility investments.

Company Profile

Fortis Inc. (FTS-T) is a diversified infrastructure holding company, primarily comprising of gas distribution utilities in B.C. and electric utilities in Canada, Turks and Caicos and the Cayman Islands. Fortis also owns a real estate and hotels subsidiary and has interests in electric generation ventures in Canada and the U.S.



Regulated Electric Utilities – Canadian Q2/11 earnings of $45 million increased by $5 million year over year.

- **FortisAlberta** earnings of $19 million increased $2 million versus Q2/10 results, primarily due to rate base growth from continued utility investments. The increase was partially offset by lower transmission revenue as well as lower than expected customer growth and energy deliveries.
- **FortisBC** earnings of $9 million increased by $1 million year over year, driven largely by rate base growth from capital investments as well as lower than expected power costs.
- **Newfoundland Power** earnings of $11 million were flat year over year. The effects of a lower allowed ROE and higher costs were offset by increased electricity sales growth and a lower effective tax rate.
- **Other Canadian Electric Utilities** earnings of $6 million were $2 million higher than Q2/10 results. The increase was largely due to Algoma Power ROE, increased electricity sales, the timing of costs during the year as well as a lower effective tax rate.

Regulated Utilities – Caribbean earnings of $7 million were unchanged from Q2/10 results.

Fortis Generation earnings of $2 million were $1 million higher than Q2/10 results. The decrease was mainly attributable to lower production in Belize due to lower rainfall. Partially offsetting this was increased production in New York and Ontario due to higher rainfall.

Fortis Properties earnings of $7 million were $1 million below Q2/10 results, primarily due to the impact of the economic downturn on hotel operations as well as increased operating and amortization costs.

Corporate expenses decreased by $2 million to $18 million in Q2/11, largely due to lower business development and financing costs.

Outlook

Belize Update: In late July Fortis initiated legal proceedings for compensation from the Government of Belize for the value of its previous investment in Belize Electricity, which recently had a book value of be $112 million. As a reminder, on June 20, 2011 the Government of Belize expropriated Fortis' 70% ownership interest in Belize Electricity. For more information please refer to our June 22, 2011 note titled, "***Fortis' Electric Utility in Belize to be Expropriated***." Fortis' non-regulated generating assets (BECOL) in the country have not been impacted, although Belize Electricity recently had US$6.5 million of overdue energy purchases outstanding to BECOL.

Regulatory Updates:

- **FortisBC Energy Companies (Terasen Gas)**: In May 2011 the FortisBC Energy companies filed their 2012-2013 Revenue Requirement Applications. FortisBC Energy's application includes forecast average rate bases of $2,737 million and $2,788 million for 2012 and 2013, respectively. The FortisBC Energy (Vancouver Island) application includes forecast average rate bases of $788 million and $814 million for 2012 and 2013, respectively.
- **FortisBC Electric**: In June 2011 FortisBC Electric filed a rate application that includes forecast average rate bases of $1,145 million and $1,212 million for 2012 and 2013, respectively.
- **FortisAlberta**: The Alberta regulator recently held a generic cost of capital hearing, which concluded on July 5, 2011. A decision is not expected until Q4/11 at the earliest. As a reminder, a number of Alberta utilities filed a joint submission in which they request: 1) an average ROE of 10.375% for 2011 and 2012, 2) a two percentage point increase to equity thickness, and 3) that a formula approach to establish the ROE not be implemented at this time.
- **Newfoundland Power**: In July 2011 the utility filed an application with the regulator requesting approval of its 2012 capital expenditures plan of $77 million.
- **Fortis Turks and Caicos**: The Government plans to implement a carbon tax effective September 2011. The utility may not be permitted to pass the costs along to customers, which if implemented could affect earnings by $2-3 million annually.

Q3/11 Preview: We are forecasting Q3/2011 EPS of $0.23, a penny below comparable Q3/2010 EPS. We expect rate base growth in the Canadian regulated utilities segment to be more than offset by lower contribution from the regulated Caribbean utilities, continued softness in hotel revenues, and a higher number of shares outstanding.

Source: Thomson, TD Newcrest.

Justification of Target Price

Our $36.00 target price is predicated on 50% of our 2012 and 2013 financial estimates as follows: 1) 25% EV/EBITDA multiple of 10.5x, 2) 25% relative dividend yield of 90%, and 3) 50% free cash flow yield of 7.5%. Our target price also incorporates a 3.5% 10-year Government of Canada bond-yield assumption.

Key Risks to Target Price

1) Higher-than-expected long bond yields, 2) operational disruptions, 3) regulatory surprises, 4) unexpected large acquisitions, 5) sovereign risk, and 6) escalating construction costs.

Investment Conclusion

The quarter was slightly below our expectations, mainly as a result of weaker than expected earnings at the company's regulated gas utility, mainly as a result of the timing of expenses during the year, as well as lower hospitality earnings. Fortis is the largest investor-owned gas and electric distribution utility in Canada, and, therefore, we view it as a core holding. We believe that Fortis is well-positioned to make future acquisitions, as any smaller utility the Company might acquire would likely gain the financial backing of a strong parent to help fund its future growth, receive benefits to improve its system reliability and efficiency for customers, and keep its operations autonomous in the Fortis fold. We believe that in the current environment, investors will find the Company's low-risk, utility-dominated business model attractive.

Fortis Inc.

(FTS-T) C$34.06

Q3/11 Results Slightly Above Expectations

Event

Fortis reported normalized Q3/11 EPS (f.d.) of $0.25, slightly above our $0.23 estimate, recent consensus of $0.24, and normalized Q3/10 EPS (f.d.) of $0.24.

Impact

NEUTRAL.

The results were better than our expectations largely due to timing of operating expenses in the Gas Distribution Utility in B.C. Corporate expenses were also lower than we were forecasting, partially a result of a favourable foreign exchange gain. We have updated our financial model primarily to reflect slightly lower returns in the unregulated businesses partially offset by increased earnings in Other Canadian Electric Utilities (Exhibit 1). We have also adjusted our maintenance capital assumptions.

We are rolling forward our target to be based 25% on our 2012 and 75% on our 2013 forecasts, and are maintaining our BUY recommendation and $37 target price.

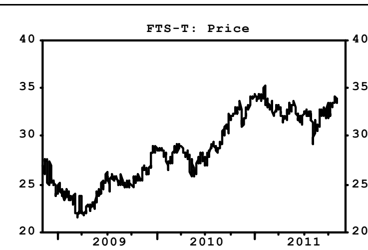
Details

Regulated Gas Utilities Q3/11 losses of $3 million were $6 million lower than Q3/10 results due to rate base growth from continued utility investments, lower than expected operating expenses from the timing of spending and capitalization of operating costs during the year, and lower effective income taxes.

Company Profile

Fortis Inc. (FTS-T) is a diversified infrastructure holding company, primarily comprising of gas distribution utilities in B.C. and electric utilities in Canada, Turks and Caicos and the Cayman Islands. Fortis also owns a real estate and hotels subsidiary and has interests in electric generation ventures in Canada and the U.S.



Please see the final pages of this document for important disclosure information.

Regulated Electric Utilities – Canadian Q3/11 earnings of $43 million were flat year over year.

- **FortisAlberta** earnings of $19 million were comparable to Q3/10 results. Rate base growth from continued utility investments along with higher customer growth and energy deliveries were offset by a positive 2010 revenue requirements decision, which was recorded in Q3/10.
- **FortisBC** earnings of $10 million decreased by $1 million year over year driven by lower capitalized allowance for funds used during construction (AFUDC) from fewer assets under construction, and higher effective income taxes.
- **Newfoundland Power** earnings of $8 million were flat year over year. The effects of increased electricity sales, a lower effective tax rate, and hurricane costs recorded back in Q3/10 were offset by a lower allowed ROE and higher employee-related costs.
- **Other Canadian Electric Utilities** earnings of $6 million were $1 million higher than Q3/10 results. The increase was due to a higher Algoma Power ROE, increased electricity sales, and a lower effective tax rate at FortisOntario.

Regulated Utilities – Caribbean earnings of $6 million were $2 million lower year over year largely from lower electricity sales, and no earnings contribution from Belize Electricity.

Fortis Generation earnings of $8 million were $1 million lower than Q3/10 results. The decrease was mainly attributable to lower production in Belize due to lower rainfall and lower Upper New York State generation from a plant outage.

Fortis Properties earnings of $9 million were flat year over year. Increased administrative expenses were offset by increased revenues at the hospitality division as a result of higher average room rates and hotel occupancy.

Corporate normalized expenses decreased by $3 million to $16 million in Q3/11, largely due to foreign exchange gains.

Outlook

Belize Electricity Update:

- On October 21, 2011, Fortis initiated actions in the Belize Supreme Court to challenge the expropriation of its investment in Belize Electricity. An independent valuation of Fortis' previous investment in Belize Electricity has been commissioned and Fortis expects to submit its claim to the Government of Belize (GOB) in Q4/11.
- On October 25, 2011, the GOB amended the Constitution of Belize to require majority government ownership of three public utilities, including Belize Electricity, but excluding Fortis' non-regulated Belizean generating assets (BECOL). The Prime Minister of Belize has stated that it is not the GOB's intention to expropriate BECOL.
- At September 30, 2011, the book values of Fortis' investments in Belize Electricity and BECOL were $120 million and $159 million, respectively. In addition, Belize Electricity recently had US$8.0 million of overdue energy purchases outstanding to BECOL. It is our understanding that there are agreements in place such that the GOB guarantees the payment of Belize Electricity's obligations to BECOL.

Regulatory Updates:

- **FortisBC Energy Companies:** In September 2011, the FortisBC Energy companies filed an update to their 2012-2013 Revenue Requirement Applications. FortisBC Energy Inc.'s application includes forecast average rate bases of $2,754 million and $2,811 million for 2012 and 2013, respectively. The FortisBC Energy (Vancouver Island) application includes forecast average rate bases of $788 million and $816 million for 2012 and 2013, respectively. The FortisBC Energy (Whistler) application includes forecast average rate bases of $42 million and $41 million for 2012 and 2013, respectively.
- **FortisOntario:** In September 2011, Algoma Power filed its first Third-Generation IRM application for customer electricity distribution rates, effective January 1, 2012, which maintains the allowed ROE at 9.85% for 2012. During Q4/11, FortisOntario expects to file a Third-Generation IRM application for its operations in Port Colborne and a similar application for its Fort Erie and Gananoque operations, maintaining an allowed ROE at 8.01% for 2012.

Continued Investment in Utilities: Management's five-year capital expenditure plan to the end of 2015 has increased by $0.2 billion to $5.7 billion. The higher outlook for capital expenditures is largely in the FortisBC Energy companies in Canada, which supports our view that Fortis' growth outlook will be driven by strong utility investment in Canada.

Q4/11 Preview: We are forecasting Q4/11 EPS of $0.47, in-line with Q4/10 results. We expect rate base growth in the Canadian regulated utilities to be offset by lower contribution from the regulated Caribbean utilities and a higher number of shares outstanding.

Source: Thomson, TD Securities.

Justification of Target Price

Our $37.00 target price is predicated on 25% of our 2012 and 75% of our 2013 financial estimates as follows: 1) 25% EV/EBITDA multiple of 10.5x, 2) 25% relative dividend yield of 95%, and 3) 50% free cash flow yield of 7.5%. Our target price also incorporates a 2.75% 10-year Government of Canada bond-yield assumption.

Key Risks to Target Price

1) Higher-than-expected long bond yields, 2) operational disruptions, 3) regulatory surprises, 4) unexpected large acquisitions, 5) sovereign risk, and 6) escalating construction costs.

Investment Conclusion

The quarter was slightly ahead of our expectations largely related to the timing of operating expenses in the Gas Distribution Utility.

Fortis is the largest investor-owned gas and electric distribution utility in Canada, and, therefore, we view it as a core holding. The Company's future growth is largely driven by utility investment in Canada. However, we believe that Fortis is also well-positioned to make future acquisitions, as any smaller utility the Company might acquire would likely gain the financial backing of a strong parent to help fund its future growth, receive benefits to improve its system reliability and efficiency for customers, and keep its operations autonomous in the Fortis fold. We believe that in the current environment, investors will find the Company's low-risk, utility-dominated business model attractive.

Q4/11 In-Line; Downgrading to HOLD on Valuation

Event

Fortis reported normalized Q4/11 EPS (f.d.) of $0.46, which was in line with our estimate, recent consensus, and normalized Q4/10 EPS (f.d.) of $0.47.

Impact

SLIGHTLY NEGATIVE.

Our 2012 and 2013 EPS (f.d.) estimates decline by $0.02 and $0.03, respectively, primarily to reflect lower expected returns from Fortis' non-regulated properties. Our target price declines $1 to $35 commensurate with our lower growth outlook.

Details

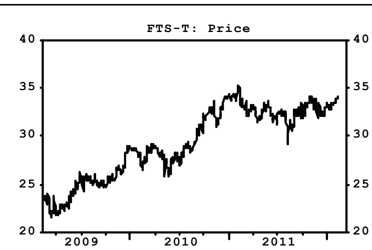
Regulated Gas Utilities Q4/11 earnings of $51 million were $6 million higher than Q4/10 results due to rate base growth from continued utility investments, lower-than-expected taxes and finance charges, and higher gas transportation volumes related to the forestry and mining sectors (Exhibit 2).

Regulated Electric Utilities – Canadian Q4/11 earnings of $42 million increased slightly year over year.

- **FortisAlberta** normalized earnings of $19 million increased $2 million versus Q4/10 results as rate base growth from continued utility investments was partially offset by a lower allowed ROE.
- **FortisBC Electric** earnings of $11 million increased by $1 million year over year driven by rate base growth, lower-than-expected energy supply costs and increased non-regulated income.

Company Profile

Fortis Inc. (FTS-T) is a diversified infrastructure holding company, primarily comprising of gas distribution utilities in B.C. and electric utilities in Canada, Turks and Caicos and the Cayman Islands. Fortis also owns a real estate and hotels subsidiary and has interests in electric generation ventures in Canada and the U.S.



- **Newfoundland Power** earnings of $8 million were $1 million lower year over year. The effects a lower allowed ROE, decreased earnings from a joint-use pole arrangement, higher effective tax rate and higher operating expenses were partially offset by electricity sales growth and lower energy supply costs.
- **Other Canadian Electric Utilities** earnings of $5 million were $1 million lower than Q4/10 results. The decrease was due to lower FortisOntario electricity sales, a $2 million rate of return adjustment at Maritime Electric due to higher-than-expected electricity sales and higher operating expenses.

Regulated Utilities – Caribbean earnings of $3 million were $2 million lower year over year largely from higher operating expenses at Turks & Caicos related to inflationary pressures and consulting fees associated with ongoing regulatory matters.

Fortis Generation earnings of $5 million were comparable with Q4/10. Lower New York energy prices, decreased interest income and higher business development costs were offset by increased production in Belize.

Fortis Properties earnings of $5 million declined $2 million versus Q4/10 primarily to reflect higher corporate income taxes partially offset by the incremental contribution from the Hilton Suites Winnipeg Airport hotel, which was acquired in October 2011.

Corporate expenses were flat year over year.

Exhibit 2. Segmented Earnings Analysis ($mm unless stated otherwise)

	Q4/11	Q4/10	YOY Change	YOY % Change

Reported EPS (f.d)	$0.45	$0.47	($0.02)	-4%

Notes: Earnings have been normalized for the following items:

1) ($1.5) million of earnings in Q4/11 related to a retroactive decision by the AUC in December 2011, which lowered FortisAlberta's allowed ROE to 8.75% from 9.00% for 2011.

Source: Company Reports, TD Securities.

Outlook

Belize Update:

- **Belize Expropriation Update**: In June 2011, the Government of Belize (GOB) enacted legislation leading to the expropriation of Belize Electricity. The book value of Fortis' investment in Belize Electricity at the end of 2011 was $106 million. In November 2011, Fortis commissioned an independent valuation of its investment and submitted its claim for compensation to the GOB. The GOB also commissioned an independent valuation and its estimated fair value was significantly below the Fortis' estimate. Fortis continues to purse alternative options for obtaining fair compensation from the GOB.
- **BECOL Update**: At December 31, 2011, the book value of Fortis' investment in BECOL (non-regulated Belizean generating assets) was $154 million. In addition, Belize Electricity recently had US$7.4 million of overdue energy purchases outstanding to BECOL. It is our understanding that there are agreements in place such that the GOB is highly motivated to guarantee the payment of Belize Electricity's obligations to BECOL.

Regulatory Updates:

- **BC Generic Cost of Capital Proceeding**: The British Columbia Utilities Commission gave preliminary notice of its intention to initiate a Generic Cost of Capital proceeding in early 2012. Items to be reviewed include: 1) setting an appropriate cost of capital for a low-risk utility, 2) establishing an automatic ROE adjustment mechanism, and 3) establishing deemed capital structure and cost of capital methodology.
- **FortisAlberta**: Fortis and other utilities in Alberta have appealed an element of the regulator's December 2011 cost of capital decision related to the wording around unused assets, asking clarification about treatment of such assets in rate base, which we expect will ultimately be resolved in the utilities' favour (to uphold the regulatory compact).
- **FortisBC Electric**: In November 2011, the FortisBC Electric filed an updated 2012-2013 Revenue Requirement, which includes forecast average rate bases of $1,146 million and $1,215 million for 2012 and 2013, respectively.
- **Newfoundland Power**: In November 2011 the utility's allowed 2012 ROE was calculated to be 7.85% under the automatic adjustment formula, down from 8.38% in 2011. Use of the automatic formula has been suspended and a full cost of capital review is expected in 2012.

Strong Capital Program: In 2012, management expects capital expenditures of approximately $1.3 billion. The company's five-year plan (2012-2016) forecasts gross capital expenditures of $5.5 billion. Of this amount, 63% is expected to be related to regulated electric utilities, 23% to regulated gas utilities and 13% to non-regulated operations. The strong outlook for capital expenditures supports our view that Fortis' growth outlook will be driven by utility investment in Canada.

Q1/12 Preview: We are forecasting Q1/12 EPS of $0.64, in line with Q1/11 results. We expect rate base growth in the Canadian regulated utilities to be offset by a higher number of shares outstanding.

Avg.					4.0%					21.8x	20.3x	18.6x	17.4x		18.4x

Source: Thomson, TD Securities.

Justification of Target Price

Our $35.00 target price is predicated on our 2013 financial estimates as follows: 1) 25% EV/EBITDA multiple of 10.5x, 2) 25% relative dividend yield of 125%, and 3) 50% free cash flow yield of 7.5%. Our target price also incorporates a 2.5% 10-year Government of Canada bond-yield assumption.

Key Risks to Target Price

1) Higher-than-expected long bond yields, 2) operational disruptions, 3) regulatory surprises, 4) unexpected large acquisitions, 5) sovereign risk, and 6) escalating construction costs.

Investment Conclusion

The quarter was largely in line with our expectations as stronger-than-expected Canadian Utilities earnings were offset by a weaker Properties contribution. During 2012, we expect Fortis to continue to benefit from strong growth from its regulated utilities, partially offset by continued Properties weakness.

Fortis is the largest investor-owned gas and electric distribution utility in Canada, and, therefore, we view it as a core holding. We expect the company's future growth to be largely driven by utility investment in Canada. However, we believe that Fortis is also well-positioned to make future acquisitions, as any smaller utility the company might acquire is likely gain the financial backing of a strong parent to help fund its future growth, and receive benefits to improve its system reliability and efficiency for customers. We believe that in the current environment, investors will find the company's low-risk, utility-dominated business model attractive. Given the relatively less compelling potential returns versus other investments in the sector, we are downgrading the shares to HOLD.

Fortis Inc.

(FTS-T) C$32.38

Fortis Enters into Agreement to Acquire CH Energy

Event

Fortis has entered into an agreement to acquire CH Energy Group (CHG-N) for US$65.00 per common share in cash, for an aggregate purchase price of US$1.5 billion, including the assumption of approximately US$500 million of debt.

Impact

POSITIVE.

The acquisition is expected to be immediately accretive to Fortis' EPS (excluding one-time transaction costs of $20 million-$25 million). We calculate the acquisition to be approximately $0.04 accretive to EPS on an annual basis, assuming that it is ultimately financed with approximately $150 million of preferred shares, $450 million of common equity and the remainder with debt. We have updated our financial model to assume the transaction closes at the end of February 2013 and to reflect other fine-tuning. (Exhibit 1). We note that our 2013 free cash flow estimate declines to reflect the on-time transactions costs associated with the acquisition. While we believe that this will add ballpark a dollar of value to Fortis' shares, this is dependent on the outcome of the regulatory approval process (e.g. concessions made to customers) and assumes no competing bids surface.

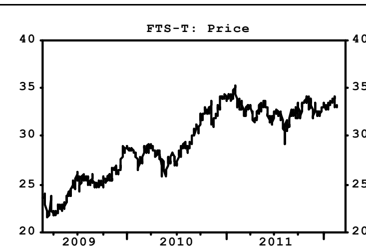
Company Profile

Fortis Inc. (FTS-T) is a diversified infrastructure holding company, primarily comprising of gas distribution utilities in B.C. and electric utilities in Canada, Turks and Caicos and the Cayman Islands. Fortis also owns a real estate and hotels subsidiary and has interests in electric generation ventures in Canada and the U.S.



Details

- **Description**: CH Energy's main business (93% of total assets, 97% of 2011 net income) is a regulated transmission and distribution (T&D) utility, Central Hudson, serving approximately 300,000 electric and 75,000 natural gas customers in New York State's Mid-Hudson River Valley region. CH Energy also has a non-regulated subsidiary primarily involved in fuel delivery to 56,000 customers in the Mid-Atlantic Region.
- **Acquisition Price Appears Reasonable**: The US$65.00 per share offer represents an approximate 10.5% premium above CH Energy's closing price on February 17, a 13% premium above the 20-day average share price of US$57.49, and approximately 10.4x 2011 EBITDA. On a 2013E basis, we calculate the EV/EBITDA to be 9.4x, P/E to be 19.4x and price-to-total rate base to be 1.5x.
- **Timing**: Fortis expects to close the acquisition within 12 months.
- **Competing Offers Possible, but Unlikely**: The merger agreement was a result of negotiations, rather than an auction process. Given what we view to be a fair price, we do not expect any higher competing offers. We note, however, that CH Energy shares have traded through the offer price. The transaction includes a break fee of US$19.7 million (US$1.32 per CHG share) plus expenses that are capped at US$4 million (US$0.27 per CHG share).
- **Financing**: Fortis expects to use its multi-year committed credit facility to finance the purchase in the short term. Long term, Management intends to finance the acquisition consistent with the corporation's current capital structure.
- **Favourable Regulatory Environment**: Central Hudson is regulated by the New York Public Service Commission (NYPSC) under a traditional cost of service model. Current rates are based on a three-year settlement, expiring mid-2013 that includes an allowed rate of return on common equity of 10% and an equity thickness of 48%.
- **Rate Base Growth:** Management expects annual capital expenditures to exceed US$100 million on average through 2016, which should result in rate base and earnings growth, in our view.
- **Regulatory approval risk Appears Low**: The transaction is subject to the receipt of approvals from CH Energy shareholders, the NYPSC, the U.S. FERC and Hart-Scott-Rodino, as well as customary closing conditions. We expect the NYPSC to approve the acquisition given Fortis' reputation and track record of successful utility acquisitions, and the potential customer benefits that could include any or all of the following: offsetting or deferring future rate increases, enhancing the quality of service to customers or making that service more affordable. Fortis will operate CH Energy as a standalone utility, keep the headquarters in Poughkeepsie, NY, and is also committed to maintaining existing wages and benefits to CH Energy employees.
- **Significant Strategic Thrust into U.S.**: We view the foray into the U.S. Northeast positively as it furthers Fortis' strategy of entering into the U.S. regulated electric and gas distribution business with what we view to be a good sized utility (material in size but not too large). Fortis has been looking for U.S. acquisitions for a number of years. We note that the company has a successful track record in acquiring utilities including Aquila Canada for $1.5 billion in 2004 and Terasen Gas for $3.7 billion in 2007.

Avg.					4.0%					21.8x	20.2x	18.4x	17.3x		18.2x

Source: Thomson, TD Securities.

Justification of Target Price

Our $35.00 target price is predicated on our 2013 financial estimates as follows: 1) 25% EV/EBITDA multiple of 10.5x, 2) 25% relative dividend yield of 125%, and 3) 50% free cash flow yield of 7.5%. Our target price also incorporates a 2.5% 10-year Government of Canada bond-yield assumption.

Key Risks to Target Price

1) Higher-than-expected long-bond yields, 2) operational disruptions, 3) regulatory surprises, 4) unexpected large acquisitions, 5) sovereign risk, and 6) escalating construction costs.

Investment Conclusion

If successful, we view the CH Energy acquisition positively as we believe that it will be mutually beneficial for both companies. The transaction should provide Fortis with a source of stable, regulated earnings, in a favourable regulatory jurisdiction with the potential to expand the company's footprint into the U.S. Northeast. CH Energy is expected to gain the financial backing of a strong parent to help fund its future growth, benefit from sharing of best practices across the Fortis group of utilities, and keep its operations autonomous in the Fortis fold.

Fortis is the largest investor-owned gas and electric distribution utility in Canada, and, therefore, we view it as a core holding. We expect the company's future growth to be largely driven by utility investment in Canada. However, we believe that Fortis is also well-positioned to make future acquisitions, as any smaller utility the company might acquire is likely gain the financial backing of a strong parent to help fund its future growth, and receive benefits to improve its system reliability and efficiency for customers. We believe that in the current environment, investors will find the company's low-risk, utility-dominated business model attractive.

Fortis Inc.

(FTS-T) C$34.55

Q1 Results In-Line With Expectations; Upgrading to BUY

Event

Fortis reported normalized Q1/12 EPS (f.d.) of $0.64, in line with our $0.64 estimate and Q1/11 EPS (f.d.) of $0.64 but slightly below recent consensus estimates of $0.66.

Impact

SLIGHTLY POSITIVE.

We have updated our model and our estimates remain largely unchanged. Effective Q1/12, Fortis also began reporting under U.S. GAAP. The adoption of U.S. GAAP does not materially change our earnings estimates.

We are also rolling forward our target price to be based 75% on our 2013 and 25% on our 2014 estimates and, as a result, we are increasing our target by $2 to $37. Given the implied total returns to our target, we are upgrading the stock to BUY (from Hold).

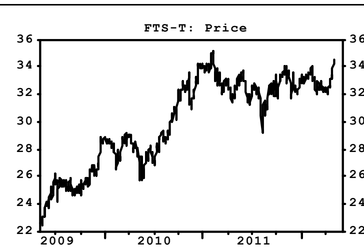
Details

Regulated Gas Utilities Q1/12 earnings of $82 million were $7 million higher than Q1/11 results, largely due to rate base growth from utility investments, and higher gas transportation volumes to both the forestry and mining industries (Exhibit 2).

Company Profile

Fortis Inc. (FTS-T) is a diversified infrastructure holding company, primarily comprising of gas distribution utilities in B.C. and electric utilities in Canada, Turks and Caicos and the Cayman Islands. Fortis also owns a real estate and hotels subsidiary and has interests in electric generation ventures in Canada and the U.S.



Regulated Electric Utilities – Canadian Q1/12 earnings of $51 million were comparable year over year.

- **FortisAlberta** earnings of $21 million increased by $1 million versus Q1/11 results as rate base growth from utility investments was partially offset by decreased energy consumption by residential customers and a lower allowed ROE.
- **FortisBC Electric** earnings of $16 million decreased by $3 million year over year, largely due to the expiration of the performance-based rate-setting (PBR) mechanism in December 2011. The decline was partially offset by rate base growth.
- **Newfoundland Power** earnings of $7 million were $1 million higher year over year as a result of increased electricity sales and lower effective income taxes. The increase was partially offset by decreased earnings from a joint-use pole arrangement that ended in October 2011.
- **Other Canadian Electric Utilities** earnings of $7 million were $1 million higher than Q1/11 results, largely from lower effective income taxes and increased electricity sales in PEI.

Regulated Utilities – Caribbean earnings of $3 million were $1 million lower year over year, largely from the expropriation of Belize Electricity.

Fortis Generation earnings of $5 million were $2 million higher year over year due to increased generation in Belize resulting from higher rainfall.

Fortis Properties earnings of $1 million were comparable year over year.

Corporate and Other expenses decreased by $2 million year over year, primarily due to increased capitalized interest related to the Waneta Expansion.

Exhibit 2. Segmented Earnings Analysis ($mm unless stated otherwise)

Outlook

Regulatory Updates:

- **B.C. Generic Cost of Capital Proceeding:** The British Columbia Utilities Commission gave a final notice of the items to be reviewed in the Generic Cost of Capital proceeding, which include 1) setting an appropriate cost of capital for a low-risk utility, including capital structure, ROE and debt interest; 2) establishing whether an automatic ROE adjustment mechanism is warranted; and 3) establishing a generic methodology for each utility's cost of capital in reference to the benchmark low-risk utility.
- **FortisAlberta:** In April 2012 the AUC approved a negotiated settlement with respect to 2012 distribution revenue requirements using a forecast mid-year rate base of $2.025 billion. The discussions regarding the PBR initiative for utilities in Alberta continues and a decision is expected by year-end.
- **Newfoundland Power:** In March 2012 Newfoundland Power filed a cost of capital application to discontinue the use of the current ROE adjustment mechanism and to approve a reasonable rate of return on rate base for 2012. A public hearing on the application is scheduled for June 2012.

CH Energy Update: In April 2012, applications were filed with the New York State Public Service Commission and FERC seeking approval of Fortis' acquisition of CH Energy. The CH Energy Group shareholder vote on the transaction is expected to occur in mid-2012, and management expects to close the acquisition by the end of Q1/13.

Organic Capital Program Remains Unchanged: In 2012, management expects gross capital expenditures of approximately $1.3 billion. The company's five-year plan (2012-2016) forecasts gross capital expenditures of $5.5 billion. Of this amount, 64% is expected to be related to regulated electric utilities, 23% to regulated gas utilities, and 13% to non-regulated operations. The B.C. Waneta Expansion project remains on track and has completed the intake, powerhouse, and power tunnel construction with $290 million spent to date.

Publishing Our 2014 Estimates and Q2/12 Preview: Our 2014 EPS (f.d.) estimate increases by $0.07 year over year to $1.86, largely due to growth at the Canadian regulated utilities in addition to a full-year contribution from CH Energy. We are also forecasting Q2/12 EPS of $0.33, in line with Q2/11 results. We expect rate base growth in the Canadian regulated utilities to be offset by the expiration of the PBR mechanism at FortisBC Electric and a higher number of shares outstanding.

Source: Thomson, TD Securities.

Justification of Target Price

Our $37.00 target price is predicated 75% on our 2013 and 25% on our 2014 financial estimates as follows: 1) 25% EV/EBITDA multiple of 10.5x, 2) 25% relative dividend yield of 125%, and 3) 50% free cash flow yield of 7.5%. Our target price also incorporates a 2.5% 10-year Government of Canada bond yield assumption.

Key Risks to Target Price

1) higher-than-expected long bond yields, 2) operational disruptions, 3) regulatory surprises, 4) unexpected large acquisitions, 5) sovereign risk, 6) escalating construction costs, and 7) access to capital markets.

Investment Conclusion

Going forward, we view the pending CH Energy acquisition positively as we believe that it will be mutually beneficial for both companies if successful. The transaction should provide Fortis with a source of stable, regulated earnings, in a favourable regulatory jurisdiction, with the potential to expand the company's footprint into the U.S. Northeast. CH Energy is expected to gain the financial backing of a strong parent to help fund its future growth, benefit from sharing of best practices across the Fortis group of utilities, and keep its operations autonomous in the Fortis fold.

Fortis is the largest investor-owned gas and electric distribution utility in Canada and, therefore, we view it as a core holding. We expect the company's future growth to be largely driven by utility investment in Canada. However, we believe that Fortis is also well-positioned to make future acquisitions, as any smaller utility the company might acquire is likely gain the financial backing of a strong parent to fund its future growth, and receive benefits to improve its system reliability and efficiency for customers. We believe that in the current environment investors will find the company's low-risk, utility-dominated business model attractive, and given the total potential returns to our target, we are upgrading the stock to BUY.

(FTS-T) C$32.14

Resuming Coverage Post Sub Receipt Offering

Event

- We are resuming coverage of Fortis Inc. following the close of an 18.5 million subscription receipt offering for gross proceeds of $601 million.
- On June 19, 2012, CH Energy Group (CH Energy) shareholders voted 92% in favour of the acquisition of the company by Fortis for US$65.00 per common share in cash (US$1.5 billion in aggregate).

For additional details on the CH Energy acquisition, please refer to our February 22, 2012, Action Note titled, "***Fortis Enters into Agreement to Acquire CH Energy*".**

Impact

SLIGHTLY POSITIVE.

We view both the subscription receipt closing and the CH Energy shareholder approval as positive steps towards closing the acquisition. Given the recent volatility in the capital markets, we believe that the use of subscription receipts reduces the financing risk associated with the acquisition. However, the offering was slightly larger than we were modeling and as a result our 2013 forecasts decline slightly, partially offset by a positive regulatory decision at Newfoundland Power, which saw its regulated ROE increase slightly to 8.80% (from 8.38%).

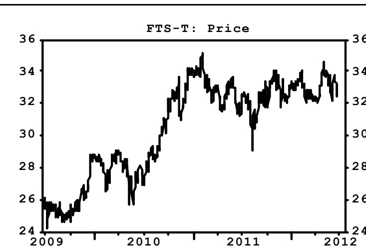
Company Profile

Fortis Inc. (FTS-T) is a diversified infrastructure holding company, primarily comprising of gas distribution utilities in B.C. and electric utilities in Canada, Turks and Caicos and the Cayman Islands. Fortis also owns a real estate and hotels subsidiary and has interests in electric generation ventures in Canada and the U.S.



Details

- **Approvals and Timing:** Regulatory approval is required from the New York State Public Service Commission (NYPSC), the U.S. FERC, and Hart-Scott-Rodino. In April 2012, Fortis and Central Hudson (the regulated electric utility owned by CH Energy) filed a joint petition to launch the regulatory review for approval of the acquisition. We expect the NYPSC to approve the acquisition given Fortis' reputation and track record of successful utility acquisitions, and the potential for customer benefits. The acquisition is expected to close by the end of Q1/13.
- **Favourable Regulatory Environment:** Central Hudson is regulated by the NYPSC under a traditional cost of service model. Current rates are based on a three-year settlement, expiring mid-2013 that includes an allowed ROE of 10% and an equity thickness of 48%. In our view, this compares favourably with Fortis' other large utilities as CH Energy offers slightly higher returns with a similar risk profile (Exhibit 2). CH Energy also has favourable regulatory mechanisms similar to those of Fortis' other large utilities (Exhibit 3).

Exhibit 2. Comparison of Fortis' Large Utilities

Utility	Customers (#000s)[1]	Rate Base ($B)[2]	2012 Equity Thickness (%)	2012 Allowed ROE (%)
FortisBC Energy	939	3.6	40%	9.50%[3]
FortisBC (Electric)	162	1.1	40%	9.90%
FortisAlberta	501	2.0	41%	8.75%
Newfoundland Power	248	0.9	45%	8.80%
Central Hudson[4]	**375**	**1.0**	**48%**	**10.00%**

Notes:
1) As at March 31, 2012.
2) Forecast mid-year 2012.
3) ROE is for FortisBC Energy Inc. ROE for FortisBC Energy (Vancouver Island) Inc. and FortisBC Energy (Whistler) Inc. is 50 bps higher.
4) CHEG acquisition announced on February 21, 2012. CHEG owns Central Hudson Gas & Electric. Transaction is expected to close by March 31, 2013.

Notes:
1) CHEG acquisition announced on February 21, 2012. CHEG owns Central Hudson Gas & Electric. Transaction is expected to close by March 31, 2013.
2) Deferral for future recovery from (refund to) customers of certain variances between actual and that forecast for rate setting.
3) Majority of power requirements met through the utility's own generation and long-term fixed-price contracts.
4) FortisBC Electric has requested commodity/energy supply cost and sales variance trackers for 2012 and 2013, subject to regulator approval.
5) Distribution utility only. No commodity or purchase power exposure.
6) Primarily has defined contribution pension plan.

Source: Company Reports, TD Securities.

- **Significant Strategic Thrust into the U.S.:** We view the pending foray into the U.S. Northeast as positive as it would further Fortis' strategy of entering into the U.S. regulated electric and gas distribution business with what we view to be a good-sized utility. Fortis has been looking for U.S. acquisitions for a number of years and we believe management has been disciplined in the process. For example, Fortis walked away from Central Vermont Public Service back in 2011 instead of increasing its original bid for the utility. We note that the company has a successful track record of acquiring utilities including Aquila Canada for $1.5 billion in 2004 and Terasen Gas for $3.7 billion in 2007.
- **Description of CH Energy Group:** CH Energy's main business (93% of total assets, 97% of 2011 net income) is a regulated transmission and distribution utility, Central Hudson, serving approximately 300,000 electric and 75,000 natural gas customers in New York State's Mid-Hudson River Valley region. CH Energy also has a non-regulated subsidiary primarily involved in fuel delivery to 56,000 customers in the Mid-Atlantic Region.

Outlook

- **Highest Degree of Regulation and Lowest Risk Large-Cap Name in our Sector:** We expect Fortis will continue to have the highest degree of regulation of other power and utility companies under our coverage and we view it as the lowest risk, best defensive large-cap play in our universe (Exhibit 4).

Exhibit 4. Degree of Regulation and Business Mix

	Fortis	ATCO	Canadian Utilities	Capital Power	Emera	TransAlta	Average
Degree of Regulation							
High	89%	39%	53%		62%		41%
Loose		12%	16%	36%	32%	13%	18%
Unregulated	11%	49%	31%	64%	6%	87%	41%
Business Mix							
Long-Haul Oil Transmission							
Long-Haul Natural Gas Transmission		7%	10%		11%		5%
Natural Gas Distribution	34%	11%	15%				10%
Electricity Transmission & Distribution	55%	21%	28%		73%		30%
Power Generation	5%	24%	33%	99%	12%	85%	43%
Oil Related Midstream							
Natural Gas Related Midstream		3%	4%				1%
Marketing and Other	6%	33%	10%	1%	4%	15%	12%

Notes:
1) Degree of regulation and business mix percentages are based off 2011A data, except for Fortis, which is based off 2013E.
2) ATCO and Canadian Utilities' debt values are adjusted for the companies' large cash balances.
Source: Company Reports, TD Securities.

- **Steady EPS and DPS Growth; No Further Need for Common Equity:** We are forecasting mid-single digit EPS and dividend per share CAGRs out to the end of 2014, largely on the back of rate base growth at the regulated utilities and the CH Energy acquisition. We believe Fortis could raise approximately $250 million of preferred shares but we do not forecast any additional common equity financings out to 2015 (Exhibits 5-8).
- **Continued Appetite for Acquisitions:** We believe that Fortis' management will remain acquisitive and will continue to look at utility acquisitions. Our understanding is that there are some European based utility owners in New York and given the uncertainty surrounding the current situation in Europe, there is the possibility for these European players to shed assets in order to raise capital and strengthen their balance sheets. We believe that Fortis would be a potential bidder for any asset divestitures by these entities. That being said, given Fortis' utility acquisition strategy of keeping its subsidiaries autonomous and self-functioning, we believe that Fortis has the capability to acquire regulated utilities throughout the U.S. and would not limit itself to existing regions.

Source: Thomson, TD Securities.

Justification of Target Price

Our $37.00 target price is predicated 75% on our 2013 and 25% on our 2014 financial estimates as follows: 1) 25% EV/EBITDA multiple of 10.5x, 2) 25% relative dividend yield of 125%, and 3) 50% free cash flow yield of 7.5%. Our target price also incorporates a 2.5% 10-year Government of Canada bond yield assumption.

Key Risks to Target Price

1) Higher-than-expected long bond yields, 2) operational disruptions, 3) regulatory surprises, 4) unexpected large acquisitions, 5) sovereign risk, 6) escalating construction costs, 7) closing of pending acquisitions, and 8) access to capital markets.

Investment Conclusion

Going forward, we view the pending CH Energy acquisition positively as we believe that it will be mutually beneficial for both companies if successful. The transaction should provide Fortis with a source of stable, regulated earnings, in a favourable regulatory jurisdiction, with the potential to expand the company's footprint into the U.S. Northeast. CH Energy is expected to gain the financial backing of a strong parent to help fund its future growth, benefit from sharing of best practices across the Fortis group of utilities, realize customer benefits while maintaining steady rates, and keep its operations autonomous within Fortis.

Fortis is the largest highly-regulated investor-owned gas and electric distribution utility in Canada and, therefore, we view it as a core holding. We expect the company's future growth to be largely driven by utility investment in Canada. However, we believe that Fortis is also well-positioned to make future acquisitions, as any smaller utility the company might acquire is likely to gain the financial backing of a strong parent to fund its future growth, and receive benefits to improve its system reliability and efficiency for customers. We believe that in the current environment investors will find the company's low-risk, utility-dominated business model attractive, and given the total potential returns to our target, we reiterate our BUY recommendation.

Fortis Inc.

(FTS-T) C$33.41

Solid Q2; CH Energy Acquisition Remains On Track

Event

Fortis reported adjusted Q2/12 EPS (f.d.) of $0.34, slightly above our $0.33 estimate, recent consensus and Q2/11 EPS (f.d.).

Impact

NEUTRAL.

We have revised our estimates slightly to reflect various regulatory updates and financing assumptions. We are rolling forward our target price to be based 50% on each of our 2013 and 2014 estimates. Our target remains $37.

Details

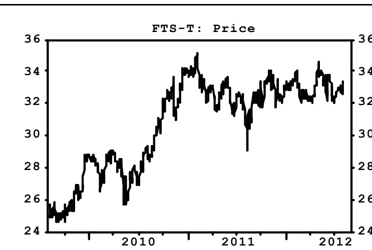
Regulated Gas Utilities Q2/12 earnings of $13 million declined by $2 million year over year, largely due to lower-than-expected customer additions and decreased capitalized allowance for funds used during construction (AFUDC) from a lower capital program in 2012.

Regulated Electric Utilities – Canadian Q2/12 earnings of $52 million were $9 million higher year over year.

- **FortisAlberta** earnings of $26 million increased by $8 million versus Q2/11 results, largely due to rate base growth from utility investments along with higher transmission revenue and lower depreciation deemed by the regulator. The increase was partially offset by a lower allowed ROE.
- **FortisBC Electric** earnings of $9 million were comparable year over year, as the expiration of the performance-based rate-setting (PBR) mechanism in December 2011 and lower capitalized AFUDC were offset by rate base growth.
- **Newfoundland Power** earnings of $12 million were $2 million higher year over year, largely a result of lower effective income taxes and a higher allowed ROE. The increase was partially offset by lower earnings from a joint-use pole arrangement that ended in October 2011 and increased depreciation from new investments.
- **Other Canadian Electric Utilities** earnings of $5 million were $1 million lower than Q2/11 results, mainly from increased operating expenses at FortisOntario resulting from higher employee-related costs and timing of expenses.

Company Profile

Fortis Inc. (FTS-T) is a diversified infrastructure holding company, primarily comprising of gas distribution utilities in B.C. and electric utilities in Canada, Turks and Caicos and the Cayman Islands. Fortis also owns a real estate and hotels subsidiary and has interests in electric generation ventures in Canada and the U.S.



Regulated Utilities – Caribbean earnings of $6 million were in line with Q2/11 results.

Fortis Generation earnings of $5 million were $3 million higher year over, largely due to increased generation in Belize resulting from higher rainfall.

Fortis Properties earnings of $8 million were comparable year over year.

Corporate and Other expenses increased by $2 million year over year, largely due to lower income tax recovery in Q2/12.

Outlook

Regulatory Updates:

- **B.C. Generic Cost of Capital Hearing:** The evidence portion of the proceeding will take place through to early-December 2012 with a potential oral hearing starting December 12, 2012. A decision is expected in early-2013. As a reminder, the British Columbia Utilities Commission gave a final notice of the items to be reviewed in the Generic Cost of Capital proceeding, which included 1) setting an appropriate cost of capital for a low-risk utility, including capital structure, ROE and debt interest; 2) establishing whether an automatic ROE adjustment mechanism is warranted; and 3) establishing a generic methodology for each utility's cost of capital in reference to the benchmark low-risk utility.
- **FortisAlberta:** In April 2012 the AUC approved a negotiated settlement with respect to 2012 distribution revenue requirements using a forecast mid-year rate base of $2.025 billion. The discussions regarding the PBR initiative for distribution utilities in Alberta continues and a decision is expected in Q4/12.
- **Newfoundland Power:** In June 2012 Newfoundland Power received a positive regulatory decision, which saw its regulated ROE increase slightly to 8.80% from 8.38% for 2011. However, the regulator has requested that Newfoundland Power file a General Rate Application for 2013, which it will do in Q3/12.

Acquisition and CH Energy Updates:

- FortisBC Electric is in preliminary discussion to purchase the City of Kelowna's electricity distribution utility for approximately $50 million-60 million. The utility serves 15,000 customers and FortisBC Electric has operated and maintained the assets since 2000. Both parties are working towards a close by the end of Q1/13.
- In July 2012 Fortis received regulatory approval for the CH Energy acquisition from the Federal Energy Regulatory Commission and the Committee on Foreign Investment in the U.S. Currently, the New York State Public Service Commission is reviewing the jointly filed Fortis and CH Energy application, and management remains on track to close the acquisition by the end of Q1/13.

Organic Capital Program Remains Unchanged: In 2012 management expects gross capital expenditures of approximately $1.3 billion. The company's five-year plan (2012-2016) forecasts gross capital expenditures of $5.5 billion. Of this amount, 65% is expected to be related to regulated electric utilities, 21% to regulated gas utilities, and 14% to non-regulated operations. The $900-million B.C. Waneta Expansion project remains on schedule and on budget, with the excavation of the intake, powerhouse and power tunnel complete. Approximately $345 million has been spent to date.

Q3/12 Preview: We are forecasting Q3/12 EPS of $0.26, slightly above Q3/11 results. We expect rate base growth in the Canadian regulated utilities to offset the expiration of the PBR mechanism at FortisBC Electric and a higher number of shares outstanding.

Justification of Target Price

Our $37.00 target price is predicated 50% on each of our 2013 and 2014 financial estimates as follows: 1) 25% EV/EBITDA multiple of 11.0x, 2) 25% relative dividend yield of 125%, and 3) 50% free cash flow yield of 7.5%. Our target price also incorporates a 2.5% 10-year Government of Canada bond yield assumption.

Key Risks to Target Price

1) higher-than-expected long bond yields, 2) operational disruptions, 3) regulatory surprises, 4) unexpected large acquisitions, 5) sovereign risk, 6) escalating construction costs, and 7) access to capital markets.

Investment Conclusion

Fortis is the largest highly-regulated investor-owned gas and electric distribution utility in Canada. The pending CH Energy transaction should also provide Fortis with a source of stable and regulated earnings in a favourable regulatory jurisdiction, with the potential to expand the company's footprint into the U.S. Northeast.

We expect Fortis' future growth to be largely driven by utility investment in Canada. However, we believe that the company is also well-positioned to make future acquisitions, as any smaller utility it might acquire is likely to gain the financial backing of a strong parent to fund its future growth, and receive benefits to improve its system reliability and efficiency for customers. We believe that in the current environment investors will find Fortis' low-risk, utility-dominated business model attractive and, given the total potential returns to our target, we reiterate our BUY recommendation. We view it as a core holding in the sector.

Everything moving in the right direction

■ **Upside potential from higher ROEs and equity thickness**

Driven by declines in government bond rates and higher equity risk premiums, some Canadian regulators are currently reviewing the level of allowed returns for utilities such as Fortis Inc. (FTS), with a goal of better aligning ROEs with capital costs. Based on modest expectations for a 50 bps uplift in ROEs and a 200 bps uplift in equity thickness across FTS's regulated portfolio, we foresee 8% upside potential to forward estimates.

■ **The more you spend, the more you make**

We forecast FTS's regulated rate base CAGR at 6.6% between 2009-13 as the company makes significant infrastructure investments in Alberta and British Colombia to meet expected economic and population growth. We expect both EPS growth and dividends to keep pace.

■ **Well positioned for accretive acquisitions**

FTS possesses one of the lowest costs of capital in its peer group, which, along with its premium valuation, gives the company a competitive advantage in the M&A market. Although the company's five-year capital program will absorb the bulk of free cash flow, we believe FTS is on the lookout for accretive acquisition opportunities. That said, we expect management to take a disciplined approach to capital deployment, ensuring that any new businesses are consistent with its existing low-risk model.

■ **Valuation: Initiating coverage with Buy rating and $29 price target**

Our price target is set at the average of 17.5x P/E and a forecast 3.7% dividend yield.

Investment Thesis

Everything moving in the right direction

Underpinned by a $5.0 billion, five-year capital program, we expect continued low-risk EPS and dividend growth at Fortis Inc. (FTS), driven by its highly stable regulated businesses. In addition to growth from an expanding rate base, we expect further uplift from favourable rulings at the regulatory level that would increase allowed ROEs and equity thickness to better align returns with capital costs. Based on modest expectations for a 50 bps uplift in ROEs and a 200 bps uplift in equity thickness across FTS's regulated portfolio, we foresee 8% upside potential to forward estimates.

Over the next five years, FTS will reinvest the majority of its free cash flow in its existing regulated businesses as economic and population growth in Western Canada fuel a need for further infrastructure projects. However, through its well deserved premium valuation multiple and low cost of capital, we believe FTS is well positioned to pursue accretive acquisition opportunities beyond its current suite of organic initiatives. As always, management will take a measured approach to acquisitions, ensuring that any new businesses are in keeping with the company's low-risk asset base.

We are initiating coverage of FTS with a Buy rating and a $29 price target. Our price target is based on the average of our forecast dividend yield of 3.7% and a 2010 P/E multiple of 17.5x, slightly above the five-year average of 17.2x.

Uplift from regulated business—ROE and equity thickness

Regulated ROE is poised to move higher to realign returns with capital costs

Lately, the precipitous decline in government bond rates and higher equity risk premiums have caused a dislocation between regulated rates of return and corporate costs of capital. In response, some Canadian regulators are reviewing the current structure of ROE calculations with the goal of better aligning returns with capital costs. Accordingly, we expect positive news flow over the next few months as regulators decide on the future level of ROEs, precipitating upward revisions of forward EPS estimates for utilities such as FTS.

Earnings and dividends to keep pace with strong rate base growth

Strong organic growth driven by Western Canadian businesses

We forecast FTS's regulated rate base CAGR at 6.6% between 2009-13 as the company makes significant infrastructure investments in Alberta and British Colombia. Over the same period, we expect both EPS growth and dividends to keep pace with the growth in the company's rate base. It should be noted that this growth rate at least matches the expected EPS growth of the market at large. However it will be achieved with greater safety as we foresee few risks to our forecast, given a stable regulatory framework that ensures a certain rate of return.

Premium valuation well deserved

Low-risk business model and clear organic growth outlook justify premium valuation

On almost any metric, FTS trades at a premium valuation to its peers in the regulated utility space. In our view, this premium is well deserved in light of the company's highly visible organic growth profile, which will deliver continued low-risk EPS and dividend growth through 2013. Accordingly, we are not concerned with the current valuation and, in fact, we note that at 16.0x P/E, FTS trades below its five-year average of 17.2x. For purposes of valuation, we assume FTS's valuation expands to 17.5x forward EPS to reflect an increasingly clear organic growth profile. Applying this multiple to forecast fully diluted 2010 EPS of $1.66 yields an expected share price $29.03.

Historically, FTS's dividend yield has demonstrated a strong relationship with BBB rated bond yields, staying fairly close to a 300 bps discount over the past 10 years. Although the spread has recently tightened as bond yields collapsed and equity risk premiums rose, we expect this relationship to be restored over the next year. Incorporating UBS forecasts for 6.7% BBB rated bond yields at year-end 2010, we believe FTS's dividend yield will fall to 3.7%, moderately below the current level of 4.0%. Conservatively assuming 2010 dividends of $1.08 per share results in an expected share price of $29.19.

Our $29 price target is set at the rounded average of the two methods above.

Low WACC, premium multiple = accretive opportunities

Well balanced from a capital structure perspective but premium valuation presents an opportunity

FTS possesses one of the lowest costs of capital in its peer group which, along with its premium valuation, gives the company a competitive advantage in the M&A market. Although the company's five-year capital program will absorb the bulk of free cash flow, we believe FTS is actively on the lookout for accretive acquisition opportunities. That said, we expect management to take a disciplined approach to capital deployment, ensuring that any new businesses are consistent with its existing low-risk business model.

Sensitivity analysis

8% upside potential to EPS estimates from a modest 50 bps increase in average ROE and a 200 bps increase in equity thickness

As principally a regulated entity, earning a consistent rate of return, FTS's earnings profile is highly stable and predictable. However, the company is currently engaged in a number of regulatory proceedings that could materially increase its ROE and equity thickness to better reflect capital costs. Should adjustments prove favourable, the company may realize a meaningful uplift to its EPS. We attempt to quantify these potential impacts in Table 1.

FTS estimates that every 100 bps change in allowed ROE on its four largest businesses (78% of assets) has a $0.15 impact on EPS, which is roughly consistent with our analysis below.

Table 1: Sensitivity of 2010E fully diluted EPS to changes in average regulated Canadian ROEs and equity thickness

2010 EPS (fully diluted)

		Change in regulated ROE				
		-0.50%	-0.25%	0.00%	0.25%	0.50%
Δ in equity thickness	-2%	$1.52	$1.56	$1.59	$1.62	$1.66
	-1%	$1.55	$1.59	$1.62	$1.66	$1.70
	0%	$1.59	$1.62	$1.66	$1.69	$1.73
	1%	$1.62	$1.65	$1.69	$1.73	$1.77
	2%	$1.65	$1.69	$1.73	$1.76	$1.80

Source: Bloomberg and UBS estimates

Consensus expectations

Unsurprisingly, given the nature of FTS's businesses, our forecasts are largely in line with consensus. We believe forward estimates do not yet reflect the uplift from higher ROEs and equity thickness that is likely to arise from current regulatory proceedings.

Table 2: UBS vs. consensus estimates

		UBS	Consensus	Variance
EPS	2009	$1.53	$1.52	1%
	2010	$1.66	$1.63	2%
EBITDA	2009	$1,092	$1,099	-1%
	2010	$1,156	$1,151	0%

Source: Bloomberg and UBS estimates

Risk analysis

Regulatory risk represents the majority of uncertainly in FTS's outlook. As discussed above, we expect any regulatory changes in the near to mid-term to be favourable. That said, the company does carry minor exposure to non-regulated businesses involved in power generation and income-producing real estate. These businesses contribute a relatively minor portion of earnings and we expect the majority of growth capital to be focused on FTS's more stable regulatory business. Of late, the company has received some unfavourable rulings on a regulated utility operating in Belize. There remains a degree of uncertainty throughout FTS's Caribbean segment, which comprises a fairly minor 8% of assets.

Forthcoming catalysts

(1) Over the next several months, the company is likely to receive rulings from certain regulatory bodies that govern FTS's activities in various Canadian provinces. To better align returns earned by regulated utilities and the cost of capital, we expect meaningful increases in both ROE levels and assumed equity thickness. These changes will provide another leg of EPS growth beyond the company's currently defined capital spending plan.

(2) FTS is in an enviable position to take advantage of its premium valuation and low cost of capital to pursue accretive acquisitions. While we see no immediate need for accelerated capital deployment, we believe the market would look favourably on further acquisitions that are complementary to FTS's existing business model.

Corporate overview

Fortis Inc. is principally a regulated utility operating a number of transmission and distribution businesses throughout Canada. Approximately 84% of FTS's assets are located in Canada and earn a regulated rate of return, driven by three factors:

95% of FTS's assets earn a highly predictable, regulated rate of return

(1) The rate base of its regulated businesses.

(2) The allowed ROE on its regulated assets.

(3) The allowed equity thickness on its regulated assets.

Simply put, FTS's earnings in each of its regulated Canadian businesses can be expressed as follows:

Rate Base x Return on Equity x Equity Thickness

Charges to end-users are periodically adjusted to ensure each regulated business continues to earn its targeted rate of return. The company has the ability to out-earn or under-earn its permitted rate of return based on, among other things, the impact of cost savings or overruns as well as actual amounts of leverage employed, which may differ from levels prescribed by the regulator. However, the three factors above are the principal drivers of the company's earnings.

The remainder of the FTS's business is composed of regulated utilities in Belize, the Grand Cayman and Turks and Caicos (8% of assets) which earn a return on *assets* rather than on *equity* as above. In addition, the company has two non-regulated sub-segments composed of Fortis Generation and Fortis Properties, which in aggregate comprise 8% of company assets.

Over the past 10 years, FTS has completed a number of transactions that transformed the company into a major player in Canada's utility sector. The first was the $1.5 billion acquisition of FortisAlberta and FortisBC from Aquila Inc. in 2004. The second was the $3.7 billion purchase of Terasen Inc. in 2007. Today, these businesses generate ~70% of consolidated earnings.

Regulated businesses

(92% of assets)

Rate base

Given that rate base is one of the key drivers of earnings growth, the more FTS can spend, the more it makes. However, spending levels first must be approved by the appropriate regulator to ensure that contemplated capital projects are for the public good and end-user rates will not be unduly increased. Accordingly, the level of spending and thus rate base growth in each regulated business is tied to the expected rate of economic and population growth in each respective region. As shown in Table 3, FTS has forecast its capital spending plans for the next five years. Over 2009-13, the company expects to spend $5.0 billion, with a significant concentration (74%) earmarked for businesses in Alberta and British Columbia. In aggregate, we forecast the company's regulated rate base CAGR will be 6.6% through 2013 (Chart 5).

Table 3: Five-year spending plan ($mln) (2009-13E)

	2009	2010	2011	2012	2013	Total
Terasen	240	270	270	260	260	1,300
FortisAB	410	350	350	350	340	1,800

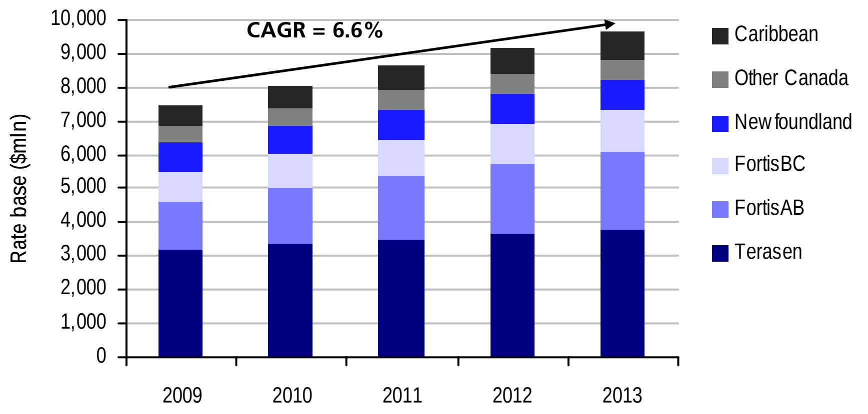
Total	1,100	990	990	980	940	5,000

Source: Company reports and UBS

Five-year, $5 billion capital program will drive 6.6% CAGR of rate base

Chart 5: Rate base growth of regulated businesses



Source: Company reports and UBS estimates

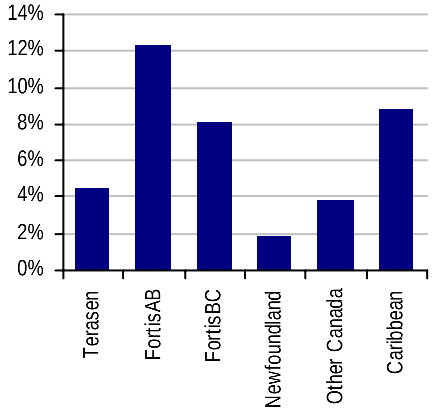
As shown in Chart 6, the majority of growth in FTS's aggregate rate base will be fuelled by capital spending in the electric utilities of FortisAlberta and FortisBC, which will respectively see a rate base CAGR of 12% and 8% through 2013. In Alberta, continued growth in oil sands development is expected to support economic growth and sustain above-average population growth. Similarly, in BC, continued migration should drive population growth and the need for increased infrastructure spending in FortisBC. That said, FTS's largest business—the regulated natural gas distribution utility of Terasen—should realize more modest growth of ~4%, as gas infrastructure needs are forecast to be relatively minimal.

74% of capital spending plan earmarked for businesses in Western Canada

Within the Caribbean sub-segment, there are a number of underdeveloped countries that will require significant infrastructure build-out as those regions become industrialized. Accordingly, we forecast a ~9% rate base CAGR over the forecast horizon. That said, we expect the company to proceed carefully in these regions, as recent regulatory proceedings have resulted in unilateral and unfavourable rulings against FTS (discussed in the next section). These regions carry relatively higher country and regulatory risk, which may precipitate the company to limit its exposure.

In contrast, economic and population growth in the eastern provinces of Ontario and Newfoundland is expected to be more modest as manufacturing activity remains depressed. Accordingly, infrastructure spending in those regions will result in below-average rate base growth in 2009-13.

Chart 6: 2009-13E rate base CAGR by regulated business



Source: Company reports and UBS estimates

ROE and equity thickness

FTS is currently engaged in a number of regulatory proceedings that may result in increases to its allowed ROE and permitted equity thickness (Figure 1). In general, these proceedings reflect the view of industry, which contends that current ROE calculations, driven by Government of Canada bond yields, fail to reflect the actual cost of equity. As a result, industry participants are optimistic that regulators across Canada will grant meaningful increases to ROE and equity thickness levels such that utilities will be adequately compensated for capital employed. These proceedings have the potential to result in a meaningful uplift to FTS's earnings level (Table 4).

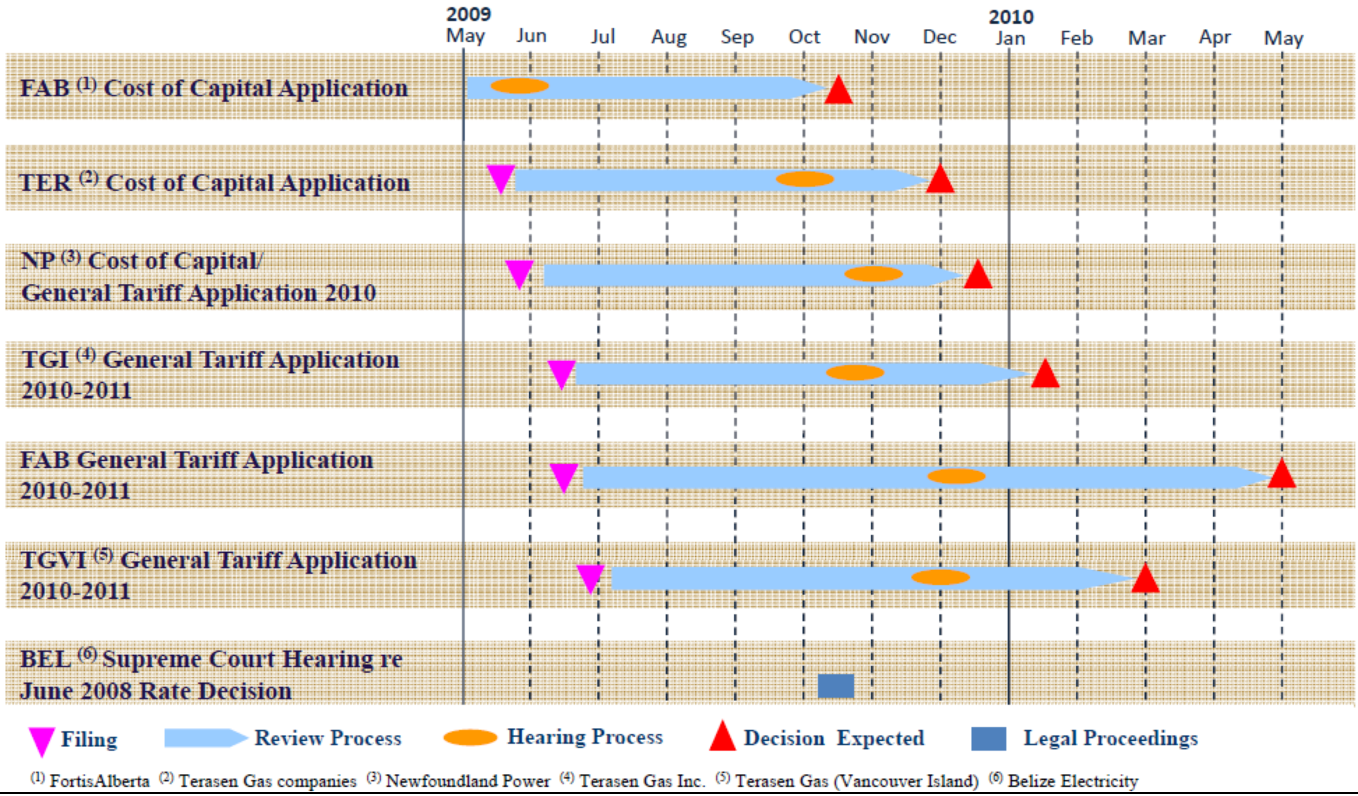
Table 4: Sensitivity of 2010E fully diluted EPS to changes in average regulated Canadian ROEs and equity thickness

2010 EPS (fully diluted)

Δ in equity thickness	Change in regulated ROE:	-0.50%	-0.25%	0.00%	0.25%	0.50%
	-2%	$1.52	$1.56	$1.59	$1.63	$1.66
	-1%	$1.55	$1.59	$1.62	$1.66	$1.70
	0%	$1.59	$1.62	$1.66	$1.70	$1.73
	1%	$1.62	$1.66	$1.69	$1.73	$1.77
	2%	$1.65	$1.69	$1.73	$1.76	$1.80

Source: Bloomberg and UBS estimates

Figure 1: Regulatory calendar



Source: Company reports

FortisAlberta

Consistent with the above schedule, the company most recently learned that the Alberta Utilities Commission (AUC), as part of its Generic Cost of Capital proceeding, has adjusted the allowed ROE to 9.0% for Alberta utilities, up 49 bps from the previous level of 8.51%. This action effectively removes the old generic formula based off Government of Canada bond yields, a move that may establish a benchmark from which other utilities in Canada will follow. In addition, FortisAlberta also received an uplift to its allowed equity thickness to 41% from 37%. Combined, we estimate these changes will result in a $0.05/share increase in annual EPS, all else equal.

The AUC recently raised FortisAlberta's allowed ROE from 8.51% to 9.00%, and its equity thickness from 37% to 41%

Historically, FortisAB has earned ROEs well in excess of its prescribed rates as a result of successful cost management activity, the benefit of which flows directly to the company. While we foresee some moderation in this premium, we expect the company to continue realizing supernormal returns as it efficiently executes on significant infrastructure programs in the province.

Terasen Gas Inc. (TGI) and Terasen Gas Vancouver Island (TGVI)

In May 2009, the Terasen Gas companies filed an application with the BC Utilities Commission (BCUC) requesting a review of the current ROE adjustment mechanism and the deemed equity component. The application seeks an increase in the allowed ROE for TGI from the current 8.47% to 11.00% while maintaining the risk-premium spread for TGVI at 70 bps. In addition, the companies have also applied for an increase in the allowed equity component from 35% to 40%. A decision is expected by early 2010.

FTS's largest business, Terasen, has applied for a significant increase in allowed ROEs

For the past few years, Terasen's ROEs have received the benefit for BCUC's Performance Based Return (PBR), which allows the company to split cost savings with customers on a 50/50 basis. This agreement is set to expire by the end of 2009 and it was announced on Dec 2/09 that the PBR program will be ended. While negative, we believe the termination of this program may increase the likelihood that the Terasen companies will receive a meaningful uplift to their regulated ROE levels.

FortisBC

The BCUC decision on Terasen is expected to affect FortisBC

As with Terasen, FortisBC is permitted to realize returns over and above the prescribed rate by splitting cost savings with customers on a 50/50 basis. This PBR program, which runs through 2011, limits savings to 200 bps of excess ROE. Based on our analysis, FortisBC has historically realized the full uplift from this program and we expect similar returns to continue.

Regulated rates of return for FortisBC have historically been set at a 40 bps premium over the level assigned for Terasen, which is 8.87% for 2009. We expect that the aforementioned regulatory proceeding concerning Terasen could have implications for FortisBC, given the historical link in allowed ROEs. However, the ultimate impact on FortisBC is uncertain.

Newfoundland Power

Newfoundland Power has applied for an increase in ROEs from 8.95% to 11.0%

In September 2009, Newfoundland Power filed an application seeking to increase its allowed ROE from 8.95% to 11.0% while keeping the equity thickness constant at 45%. A public hearing on the application occurred in October 2009 and a decision is expected by the end of 2009 or early in 2010.

FortisOntario

The OEB is currently reviewing its ROE adjustment mechanism

Included as part of the "other Canadian" segment, the cost of capital for FortisOntario and other utilities in the province is currently under review by the Ontario Energy Board (OEB). Although the timing for a potential increase in regulated ROE is uncertain, a stakeholder conference was held in September and October.

Belize Electricity

Regulatory framework in FTS's Caribbean segment appears less stable (but only 8% of assets)

Included as part of the "Caribbean" segment, Belize Electricity (BE) has perhaps been the most contentious of FTS's subsidiaries. In June 2008, Belize's Public Utilities Commission (PUC) issued its Final Decision on BE's 2008/2009 Rate Application and rejected most of the recommendations made by a PUC-appointed independent expert. In addition, the PUC imposed a retroactive adjustment to BE's prior year financial results ($13 million impact) while reducing the targeted allowed return on assets from 12% to 10%.

In February 2009, the PUC effectively restored BE's allowed ROA to 12%, although an April 2009 application to reverse the previously-imposed retroactive adjustment was denied. Legal proceedings between BE and PUC continue to this day and the ultimate outcome remains uncertain.

Non-regulated businesses

(8% of assets)

Fortis Generation

FTS's Generation segment has historically experienced greater shifts in profitability

The Generation segment is composed of a number of thermal and hydro facilities in Canada, the US, and Belize. The segment has historically experienced wide swings in profitability. Currently, unregulated generation across North America is plagued by weak power prices, which have come under pressure from lower natural gas prices (which typically set the marginal price of power), as well as depressed economic activity that has expanded reserve margins (the difference between capacity and demand). Until natural gas prices strengthen, we expect earnings of FTS's Generation segment to remain depressed. However, a significant portion of FTS's generation is sold under long-term power purchase agreements, thereby limiting the downside to earnings. We expect modest investment in FTS's Generation segment, consistent with management's five-year spending plan.

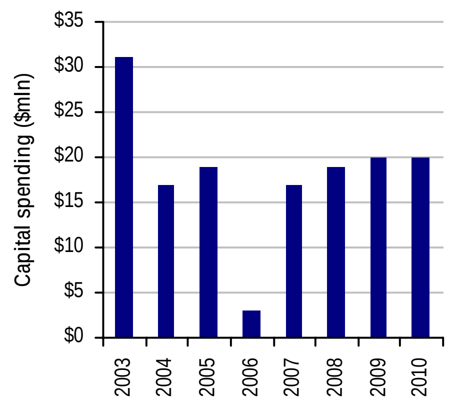
Chart 8: Capital spending—Fortis Generation



Source: Company reports and UBS estimates

Fortis Properties

Fortis Properties owns and operates 20 hotels with approximately 3,800 rooms in eight Canadian provinces. As shown in Chart 9 and Chart 10, this segment experienced steady earnings growth from 2001-07 as the company made meaningful investments in the business. However, investment over the past few years has been modest and, as such, tangible assets and earnings have reached a plateau. Based on the company's five-year spending plan, investment in this segment is expected to remain minimal as the majority of capital is directed towards regulated businesses in Western Canada.

Fortis Properties has delivered stable earnings similar to the company's regulated businesses

Strategy, acquisitions—ready to pounce

Debt levels stable

Debt/capital ratio forecast to remain stable at 60-63% over the next 5 years

For the next few years, the businesses operated by FTS have ample organic growth opportunities as infrastructure needs in Canada will absorb the majority of free cash flow, thereby holding relative debt ratios within their targeted range (Chart 11 and Chart 12). To the extent possible, we believe FTS will deploy capital into its regulated Canadian businesses, as the low-risk nature of such assets is in agreement with the company's core business model. Ultimately, as the company grows this business and earnings continue to expand, consolidated cash flows may begin to outstrip organic investment opportunities towards the end of our forecast horizon. This may precipitate a desire to layer on complementary businesses.

Source: Company reports and UBS estimates

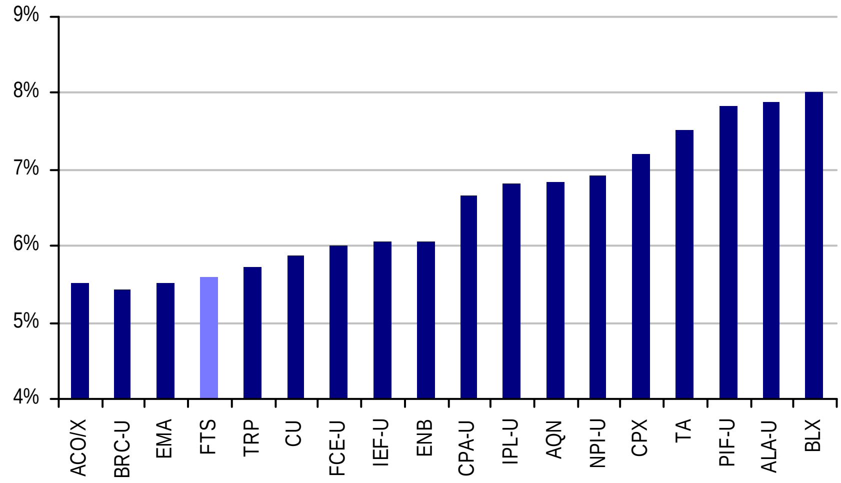
Low cost of capital, premium valuation = accretive opportunities

WACC among the lowest in the Canadian utility space and…

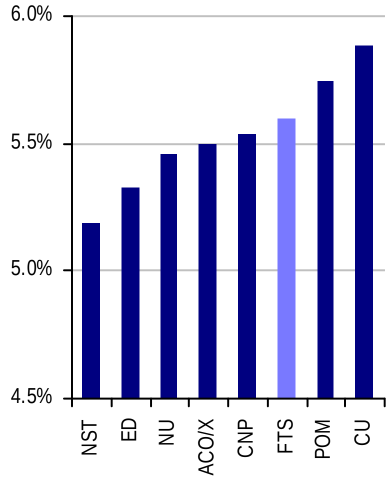
Unsurprisingly, given FTS's highly stable earnings profile, its cost of capital of 5.60% is among the lowest in the Canadian utility sector (Chart 13). Similarly, among regulated transmission & distribution utilities, FTS's weighted average cost of capital is just 41 bps above that of NSTAR, which is the lowest in the sector, at 5.19%. Finally, among regulated integrated utilities, FTS's WACC is well below the industry average of 6.02% and just 33 bps higher than Southern Company, one of the largest electric utilities in the US.

Chart 13: Relative WACC—Canadian utility sector



Source: Bloomberg

Chart 14: Relative WACC—N.A. regulated transmission & distribution



Source: Bloomberg

...the highest valuations among distribution utilities

As shown in the following charts, FTS trades at a meaningful premium to its peers both in the regulated transmission and distribution business and the regulated integrated business. This premium valuation reflects FTS's low-risk business model and clear growth profile, in our view. Combined with an exceptionally low cost of capital, this puts FTS in a strong competitive position to pursue accretive acquisitions. Where possible, we expect the company to capitalize on acquisition opportunities in Canada that are complementary to existing regulated businesses. However, such opportunities are limited and we believe management may look to the US for acquisition targets. We expect a very measured approach in this regard, ensuring that any purchases are in keeping with FTS's low-risk model.

Low WACC, high valuation open the door to accretive acquisitions

Led by CEO H. Stanley Marshall and CFO Barry Perry, FTS has consistently taken a disciplined approach to capital deployment. Although the company will be confronted with a number of acquisition opportunities, it is unlikely to be a buyer simply for the sake of growth. If the right opportunity fails to present itself, we expect management to simply return excess capital to shareholders. In the near term, the company has the luxury of simply redeploying cash flow into its existing businesses, which currently offer good organic growth opportunities. In the meantime, we expect the premium valuation to be sustained, thereby providing the flexibility to pursue accretive deals if the fit is right.

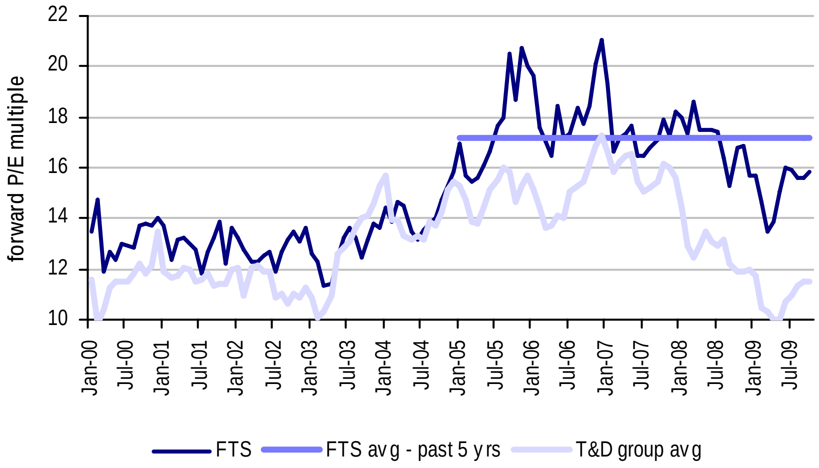
Valuation

Current valuation below historical levels

As the charts in the previous section demonstrated, FTS's valuation is at or near the front of the pack on both forward EPS and forward EBITDA. We believe this premium valuation is well deserved and supportable from a historical perspective. Over the past 5 years, FTS has traded at an average P/E of 17.2x, while ranging from 14x to 21x during that period. As such, FTS's current 16.0x multiple is high versus peers but remains below historical norms.

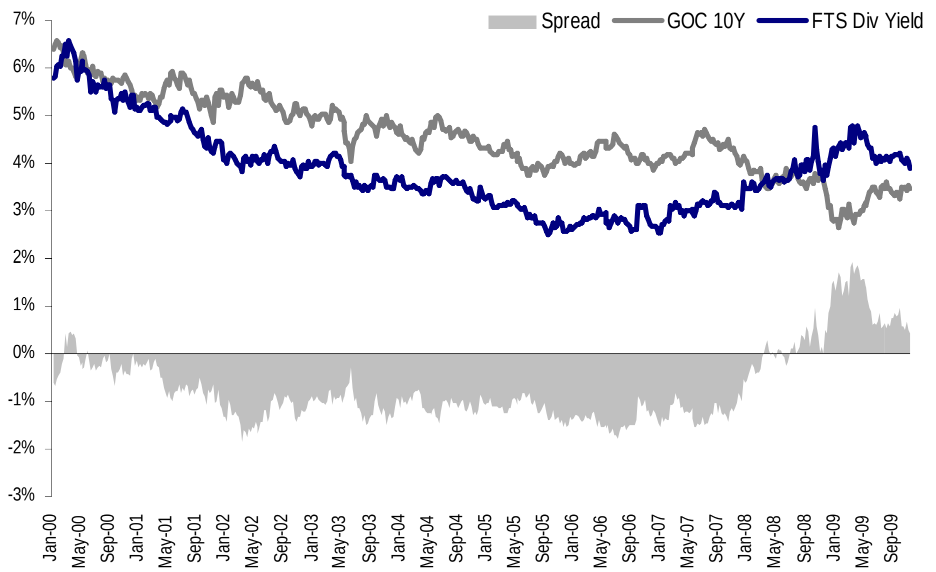
Chart 19: FTS—historical forward P/E ratio



Source: FactSet

FTS boasts 36 consecutive years of dividend growth, the longest streak of any public company in Canada. This track record speaks to the predictability and sustainability of its earnings base, which has been able to shrug off even the deepest economic downturns. We have confidence in this cash flow stream, almost to the point where FTS common equity might be considered a fixed income investment. In relation to government bond yields, we note a relatively strong historical relationship between FTS's dividend yield and the Government of Canada 10-year bond yield (Chart 20). That said, this relationship has broken down of late as a result of increased equity risk premiums combined with an expansionary monetary policy that has driven down the risk-free rate of interest.

Chart 20: Government of Canada 10-year bond yield vs. FTS dividend yield

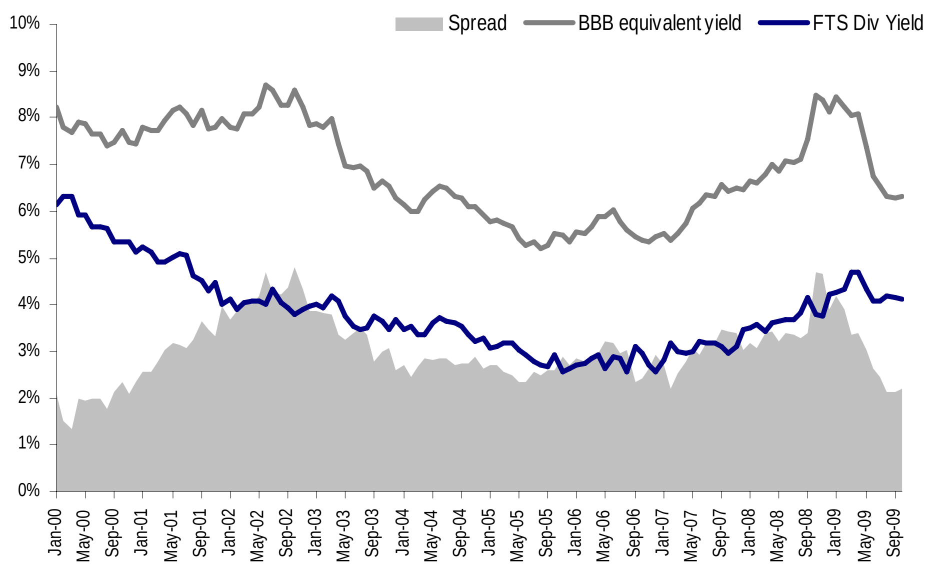


Source: Bloomberg and UBS

We expect FTS's dividend yield to maintain its historically strong relationship to BBB bond yields

To adjust for this, it is necessary to replace government bond yield with investment grade bond yield. For our purposes, and consistent with the views of rating agencies on FTS's debt, we compared the equivalent yield of BBB rated bonds in Canada to FTS's dividend yield (Chart 21). As expected, although the BBB-DY spread has tightened of late, the movements of these two variables are more closely aligned, suggesting that investment grade bond yields may be an appropriate valuation tool for FTS. Over the past 10 years, BBB bond yields have averaged a 3.0% premium over FTS's dividend yield, although bracketed by brief rendezvous with 2.0% on the low side and 4.0% on the high side. We expect the BBB premium to revert to its historical average of 3.0%, up from the current level of 2.2%.

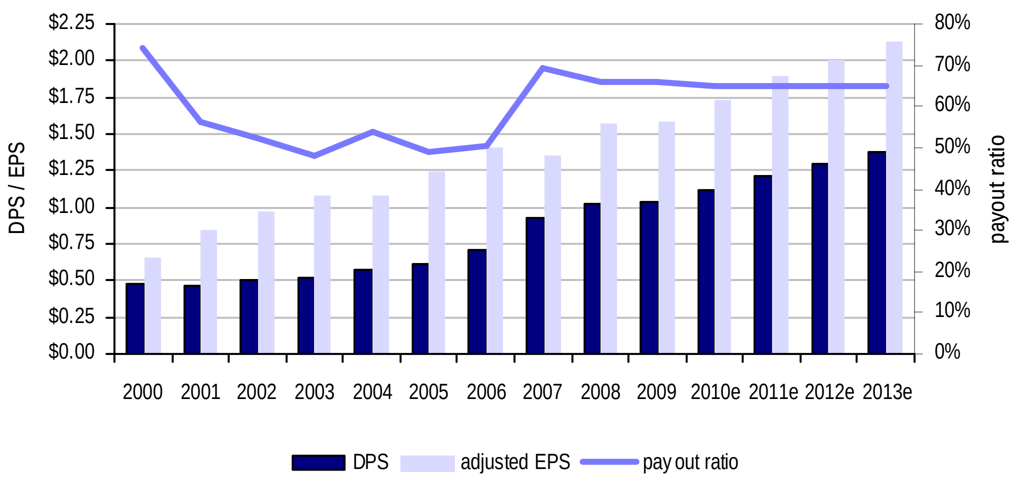
Chart 21: Investment grade bond yield vs. FTS dividend yield



Source: Bloomberg and UBS

As reflected in Chart 22, FTS accelerated its dividend program significantly in 2007, when the payout ratio was boosted from ~50% to ~65%, a level that we expect to remain unchanged for the foreseeable future. Accordingly, dividends should keep pace with earnings, with a CAGR of 5.8% between 2009-13. FTS currently pays a quarterly dividend of $0.26/share ($1.04/share annually), which was modestly raised from $0.25/share in December 2008. Based on our earnings forecast for 2010 and assuming a 65% payout ratio, we expect the company to raise its quarterly dividend to $0.27/share or $0.28/share in December 2009.

Chart 22: Dividend growth expected to keep pace with EPS growth given stable payout ratio



Source: Company reports and UBS estimates

Based on UBS forecasts of year-end 2010 government bond yields of 4.0% and our forecast for BBB credit spreads of 2.7%, we expect BBB bond yields of 6.7%. Applying our above-stated expectation of a 300 bps premium for BBB bond yields results in a forecast FTS dividend yield of 3.7%, modestly lower than the current level of 4.0%. Using this forecast 3.7% yield and conservatively assuming 2010 dividends per share of $1.08 results in an expected share price of $29.19.

In addition, we believe FTS's forward multiple will return to 17.5x, a level slightly above its historical average of 17.2x, to reflect the company's increasingly clear organic growth profile. Applying this 17.5x multiple to forecast 2010 fully diluted EPS $1.66 yields an expected share price of $29.03.

Our $29 price target is based on the average of our forecast 3.7% dividend yield and target P/E multiple of 17.5x

Taking the average of these methodologies, we arrive at a price target of $29. Given the implied forecast return of 14%, we have a Buy rating.

Terasen Gas (38% of assets)

Terasen Gas is a natural gas transmission and distribution company servicing approximately 834,000 residential, commercial and industrial users in British Colombia, Canada (86% of BC's natural gas users) Terasen Gas was originally a daughter company of Knight Inc. (formerly known as Kinder Morgan, Inc.) and was sold to Fortis Inc. in February of 2007 for $3.7 billion. Terasen Gas is rate regulated by the British Columbia Utilities Commission (BCUC).

FortisAlberta (18% of assets)

FortisAlberta provides electricity distribution services to end-user customers in the province of Alberta. The company's low-voltage distribution network is focused on servicing the rural and urban communities of central and southern Alberta. With approximately 107,600 kilometres of transmission lines throughout the province, FortisAlberta services 460,700 electricity users, a customer base which is comprised of residential, commercial, farm, oil and gas and industrial consumers of electricity.

FortisBC (11% of assets)

FortisBC is a rate-regulated electric utility servicing the province of British Colombia. Electricity is provided through an extensive network of hydroelectric generating plants, high voltage transmission lines, and distribution assets. As at year-end 2008, FortisBC's customer base had grown to roughly 157,000 customers, comprised of residential, general service, wholesale and industrial consumers of electricity located in the southern interior of British Columbia.

Fortis Inc. acquired FortisBC and FortisAlberta from what used to be Aquila Inc. in May of 2004 for a total acquisition price of $1.48 billion. Currently, the company's power generating assets are primarily comprised of four hydroelectric generating plants on the Kootenay River, as well as a number of BCUC approved purchase power agreements. Other company assets include approximately 7,000 kilometres of transmission and distribution power lines and 64 substations throughout British Columbia.

Newfoundland Power Inc. (11% of assets)

Newfoundland Power Inc. is a regulated, integrated generation, transmission and distribution company which services customers on the island portion of the Province of Newfoundland and Labrador. The company's customer base is comprised primarily of residential and commercial customers located in 600 communities and numbering 236,000 users.

Other Canadian (6% of assets)

Maritime Electric

Maritime Electric is an integrated electric utility which directly services approximately 73,000 residential customers located on Prince Edward Island through 5,300 kilometers of transmission and distribution lines. While the company currently owns and operates generating plants with capacity of 150 MW, the majority of the electricity the company distributes is purchased from NB Power. Maritime Electric obtains this power via two submarine cables between Prince Edward Island and New Brunswick, which the company leases from the government of PEI. Maritime Electric is 100% owned by Fortis Inc. through its subsidiary; Fortis Properties.

FortisOntario

FortisOntario is comprised of two wholly owned regulated utility subsidiaries; Canadian Niagara Power which services Fort Erie, Port Colborne and Gananoque, and Cornwall Electric which services Cornwall. Combined, the two entities service roughly 52,000 customers with 1,570 kilometers of transmission and distribution lines and a peak demand of 227 MW. Canadian Niagara Power also owns international transmission facilities in Fort Erie as well as a 10% interest in Westario Power Holdings Inc. and Rideau St. Lawrence, two regional electric distribution companies.

Caribbean segment (8% of assets)

Belize Electricity

Belize Electricity is the principle distributor of electricity in Belize, servicing nearly 74,000 customers with 2,840 kilometres of transmission and distribution lines and a peak demand of 74 MW. Fortis Inc. currently has a 70% controlling interest in Belize Electricity.

Caribbean Utilities

Caribbean Utilities is the sole distributor of electricity on Grand Cayman Island, servicing nearly 24,000 customers with 555 kilometres of transmission and distribution lines and a peak demand of 94 MW. Fortis currently has a 59.5% controlling interest in the company.

Fortis Turks and Caicos

Fortis Turks and Caicos is the principle distributor of electricity on the Turks and Caicos Islands, servicing over 9,000 customers with 335 kilometers of transmission and distribution lines and a peak demand of 29 MW. The company is secured as the principal distributor on the islands by a number of 50-year licenses which expire in 2036 and 2037.

Fortis Generation (2% of assets)

Fortis Generation consists of the operations of non-regulated generating assets in Belize, Ontario, central Newfoundland, British Columbia and Upper New York State; the combined assets have generating capacity of 120 MW (115 MW is hydroelectric).

In Belize, Fortis Generation currently owns and operates the 25-MW Mollejon and 7-MW Chalillo hydroelectric generating facilities located on the Macal River. In eastern Ontario, Fortis Generation currently owns six non-regulated hydroelectric generating stations with combined capacity of 8 MW. In addition, the company also owns a 5 MW gas-fired cogeneration plant in Cornwall. Fortis Generation’s only British Columbia asset is a 16-MW run-of-river non-regulated generating plant located near Lillooet. Finally, the U.S. assets include four hydroelectric generating stations with combined capacity of approximately 23 MW.

Fortis Properties (6% of assets)

Fortis Properties was established in 1989 and has grown significantly over the past 20 years. The company currently owns and operates over 2.8 million square feet of commercial real estate located throughout Atlantic Canada. The company also owns 21 hotels, with over 4,000 rooms, throughout Atlantic Canada, Ontario, Manitoba, Alberta, British Columbia and Saskatchewan.

■ Fortis Inc.

Fortis Inc. is the largest investor owned distribution utility in Canada, deriving the majority of its earnings from regulated rate base assets. Its regulated holdings include a natural gas utility in British Columbia and electric utilities in 5 Canadian provinces and 3 Caribbean countries. It owns non-regulated hydroelectric generation assets across Canada and in Belize and upper New York State. It also owns hotels and commercial real estate in Canada.

■ Statement of Risk

To varying extents across its respective regions, Fortis Inc. is subject to regulatory risk. A substantial portion of the company earnings are based on regulated rates of return, the level of which is subject to regulatory oversight. Shifts in political views towards Fortis' businesses could result in unfavourable changes to the company's permitted rates of return. In addition, interest rates play a significant role in the derivation of regulated ROEs. Thus, reduced interest rates have the potential to compress permitted rates of return.

■ Analyst Certification

Each research analyst primarily responsible for the content of this research report, in whole or in part, certifies that with respect to each security or issuer that the analyst covered in this report: (1) all of the views expressed accurately reflect his or her personal views about those securities or issuers; and (2) no part of his or her compensation was, is, or will be, directly or indirectly, related to the specific recommendations or views expressed by that research analyst in the research report.

Required Disclosures

This report has been prepared by UBS Securities Canada Inc, an affiliate of UBS AG. UBS AG, its subsidiaries, branches and affiliates are referred to herein as UBS.

For information on the ways in which UBS manages conflicts and maintains independence of its research product; historical performance information; and certain additional disclosures concerning UBS research recommendations, please visit www.ubs.com/disclosures. The figures contained in performance charts refer to the past; past performance is not a reliable indicator of future results. Additional information will be made available upon request.

UBS Investment Research: Global Equity Rating Definitions

UBS 12-Month Rating	Definition
Buy	FSR is > 6% above the MRA.
Neutral	FSR is between -6% and 6% of the MRA.
Sell	FSR is > 6% below the MRA.
UBS Short-Term Rating	**Definition**
Buy	Buy: Stock price expected to rise within three months from the time the rating was assigned because of a specific catalyst or event.
Sell	Sell: Stock price expected to fall within three months from the time the rating was assigned because of a specific catalyst or event.

KEY DEFINITIONS

Forecast Stock Return (FSR) is defined as expected percentage price appreciation plus gross dividend yield over the next 12 months.

Market Return Assumption (MRA) is defined as the one-year local market interest rate plus 5% (a proxy for, and not a forecast of, the equity risk premium).

Under Review (UR) Stocks may be flagged as UR by the analyst, indicating that the stock's price target and/or rating are subject to possible change in the near term, usually in response to an event that may affect the investment case or valuation.

Short-Term Ratings reflect the expected near-term (up to three months) performance of the stock and do not reflect any change in the fundamental view or investment case.

Equity Price Targets have an investment horizon of 12 months.

EXCEPTIONS AND SPECIAL CASES

UK and European Investment Fund ratings and definitions are: Buy: Positive on factors such as structure, management, performance record, discount; Neutral: Neutral on factors such as structure, management, performance record, discount; Sell: Negative on factors such as structure, management, performance record, discount.

Core Banding Exceptions (CBE): Exceptions to the standard +/-6% bands may be granted by the Investment Review Committee (IRC). Factors considered by the IRC include the stock's volatility and the credit spread of the respective company's debt. As a result, stocks deemed to be very high or low risk may be subject to higher or lower bands as they relate to the rating. When such exceptions apply, they will be identified in the Company Disclosures table in the relevant research piece.

Research analysts contributing to this report who are employed by any non-US affiliate of UBS Securities LLC are not registered/qualified as research analysts with the NASD and NYSE and therefore are not subject to the restrictions contained in the NASD and NYSE rules on communications with a subject company, public appearances, and trading securities held by a research analyst account. Fortis Inc. (C$)

Source: UBS; as of 02 Dec 2009

Note: On August 4, 2007 UBS revised its rating system. (See 'UBS Investment Research: Global Equity Rating Definitions' table for details). From September 9, 2006 through August 3, 2007 the UBS ratings and their definitions were: Buy 1 = FSR is > 6% above the MRA, higher degree of predictability; Buy 2 = FSR is > 6% above the MRA, lower degree of predictability; Neutral 1 = FSR is between -6% and 6% of the MRA, higher degree of predictability; Neutral 2 = FSR is between -6% and 6% of the MRA, lower degree of predictability; Reduce 1 = FSR is > 6% below the MRA, higher degree of predictability; Reduce 2 = FSR is > 6% below the MRA, lower degree of predictability. The predictability level indicates an analyst's conviction in the FSR. A predictability level of '1' means that the analyst's estimate of FSR is in the middle of a narrower, or smaller, range of possibilities. A predictability level of '2' means that the analyst's estimate of FSR is in the middle of a broader, or larger, range of possibilities. From October 13, 2003 through September 8, 2006 the percentage band criteria used in the rating system was 10%.

17 December 2009

BCUC decision -- call it a wash

- **Allowed ROE for Terasen raised to 9.50% from 8.47%**

Abandoning the old automatic adjustment mechanism, the British Columbia Utilities Commission (BCUC) announced that the ROE for Terasen Gas (TGI) is now 9.50%, up from 8.47%. In addition, the allowed equity thickness for TGI will be raised to 40%, up from 35%. The BCUC also announced that the spread to FortisBC will remain 40bps, thus raising its allowed ROE from 8.87% to 9.90%.

- **Balanced with removal of PBR, decision is neutral**

Together, the BC companies represent 49% of FTS assets. While today's decision is positive it must be balanced with a previous BCUC announcement that Terasen will no longer be eligible for Performance-Based Rate-Setting, an incentive which has historically generated more than 200 bps in excess ROE. On balance we view the decision as neutral and have made only minor changes to our estimates.

- **Regulatory decisions out of the way, expect dividend announcement**

With regulatory rulings out of the way for FortisAB, NF Power, Terasen and FortisBC, the 2010 earnings outlook has become clearer. As a result we expect FTS's 2010 dividend level to be announced shortly. We forecast 2010 dividends of $1.12/share, an increase of $0.08/share over 2009, reflecting a 65% payout ratio.

- **Valuation: Raise PT to $30 but d/g to Neutral on share price appreciation**

Over the past 3 months FTS has risen 14%, outperforming its peers. With most of the regulatory catalysts now behind and with valuation approaching the historical average, we expect the stock to level off in the near-term. Our target is set at the average of 18.0x 2010 EPS (5 yr avg = 17.2x) and a forecast 3.7% dividend yield.

This report has been prepared by UBS Securities Canada Inc

ANALYST CERTIFICATION AND REQUIRED DISCLOSURES BEGIN ON PAGE 7.

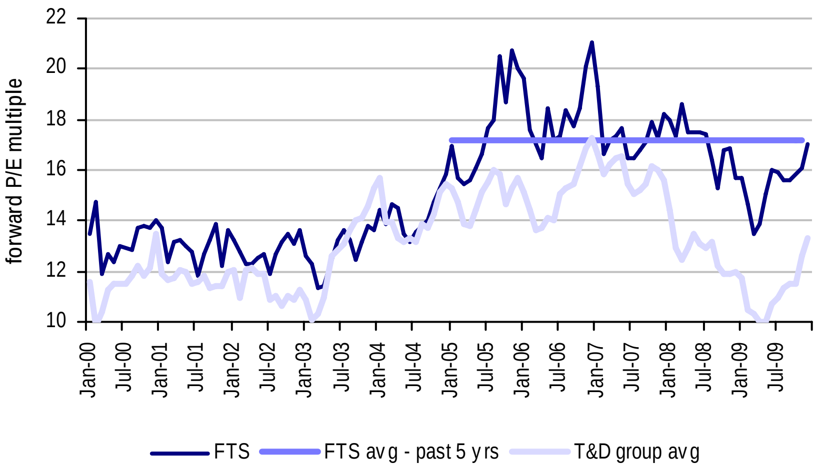
Due to take a breather

Over the past six months Fortis has risen 14%, outperforming all its peers in the distribution utility, integrated utility, and gas utility sectors (see Table 1) which collectively averaged a 6% return over the same period. In our view the outperformance was justified in anticipation of several regulatory decisions which de-risked 2010 earnings and prompted the Street to increase forward estimates.

In response to an increasingly clear 2010 earnings outlook the company's valuation has continued to trend higher and the current level of 17.0x 2010E EPS just shy of the 5-year average of 17.2x (Chart 1). With many of the regulatory catalysts now behind us, we believe further upside to forward estimates and valuation may be limited in the near-term. We note however that an announcement on the 2010 dividend level is expected early in the New Year. Assuming a constant 65% payout ratio, we are calling for a $0.08/share annual increase to $1.12/share.

As a result of a de-risked 2010 EPS outlook, we have increased our target from $29 to $30. Our target is set at the average of 18.0x 2010 EPS and a forecast 3.7% dividend yield. Given the implied return, our rating falls from Buy to Neutral.

Chart 1: Historical forward P/E



Source: FactSet, UBS

...But the long-term story is intact

Longer-term we believe the company represents a compelling low risk opportunity. Through 2013 we expect the company to grow its rate base at a CAGR of 6.6% (Chart 2). Further upside could come from additional regulatory ruling which raise allowed ROEs. In particular, we highlight FortisAB, which was recently granted an increase to its regulated ROE from 8.51% to 9.00%. With today's decision from the BCUC, we see a strong possibility that the AUC will be open to further discussions in a year's time.

In addition, the company's premium valuation opens to the doors to a number of accretive M&A opportunities. However the key challenge in 2010 will be identifying a willing seller of regulated assets which fit the current risk profile of

Fortis' existing base. Such assets are growing increasingly scarce. At any rate, the company's organic growth profile will absorb all free cash flow. As such, in the absence of upside from higher ROEs or accretive acquisitions we expect EPS and dividends to at least match the company's rate base growth.

Chart 2: Forecasted rate base growth

■ Fortis Inc.

Fortis Inc. is the largest investor owned distribution utility in Canada, deriving the majority of its earnings from regulated rate base assets. Its regulated holdings include a natural gas utility in British Columbia and electric utilities in 5 Canadian provinces and 3 Caribbean countries. It owns non-regulated hydroelectric generation assets across Canada and in Belize and upper New York State. It also owns hotels and commercial real estate in Canada.

■ Statement of Risk

To varying extents across its respective regions, Fortis Inc. is subject to regulatory risk. A substantial portion of the company earnings are based on regulated rates of return, the level of which is subject to regulatory oversight. Shifts in political views towards Fortis' businesses could result in unfavourable changes to the company's permitted rates of return. In addition, interest rates play a significant role in the derivation of regulated ROEs. Thus, reduced interest rates have the potential to compress permitted rates of return.

■ Analyst Certification

Each research analyst primarily responsible for the content of this research report, in whole or in part, certifies that with respect to each security or issuer that the analyst covered in this report: (1) all of the views expressed accurately reflect his or her personal views about those securities or issuers; and (2) no part of his or her compensation was, is, or will be, directly or indirectly, related to the specific recommendations or views expressed by that research analyst in the research report.

Required Disclosures

This report has been prepared by UBS Securities Canada Inc, an affiliate of UBS AG. UBS AG, its subsidiaries, branches and affiliates are referred to herein as UBS.

For information on the ways in which UBS manages conflicts and maintains independence of its research product; historical performance information; and certain additional disclosures concerning UBS research recommendations, please visit www.ubs.com/disclosures. The figures contained in performance charts refer to the past; past performance is not a reliable indicator of future results. Additional information will be made available upon request.

UBS Investment Research: Global Equity Rating Allocations

UBS 12-Month Rating	Rating Category	Coverage[1]	IB Services[2]
Buy	**Buy**	44%	39%

UBS Investment Research: Global Equity Rating Definitions

UBS 12-Month Rating	Definition
Buy	FSR is > 6% above the MRA.
Neutral	FSR is between -6% and 6% of the MRA.
Sell	FSR is > 6% below the MRA.
UBS Short-Term Rating	**Definition**
Buy	Buy: Stock price expected to rise within three months from the time the rating was assigned because of a specific catalyst or event.
Sell	Sell: Stock price expected to fall within three months from the time the rating was assigned because of a specific catalyst or event.

KEY DEFINITIONS

Forecast Stock Return (FSR) is defined as expected percentage price appreciation plus gross dividend yield over the next 12 months.

Market Return Assumption (MRA) is defined as the one-year local market interest rate plus 5% (a proxy for, and not a forecast of, the equity risk premium).

Under Review (UR) Stocks may be flagged as UR by the analyst, indicating that the stock's price target and/or rating are subject to possible change in the near term, usually in response to an event that may affect the investment case or valuation.

Short-Term Ratings reflect the expected near-term (up to three months) performance of the stock and do not reflect any change in the fundamental view or investment case.

Equity Price Targets have an investment horizon of 12 months.

EXCEPTIONS AND SPECIAL CASES

UK and European Investment Fund ratings and definitions are: Buy: Positive on factors such as structure, management, performance record, discount; Neutral: Neutral on factors such as structure, management, performance record, discount; Sell: Negative on factors such as structure, management, performance record, discount.

Core Banding Exceptions (CBE): Exceptions to the standard +/-6% bands may be granted by the Investment Review Committee (IRC). Factors considered by the IRC include the stock's volatility and the credit spread of the respective company's debt. As a result, stocks deemed to be very high or low risk may be subject to higher or lower bands as they relate to the rating. When such exceptions apply, they will be identified in the Company Disclosures table in the relevant research piece.

Research analysts contributing to this report who are employed by any non-US affiliate of UBS Securities LLC are not registered/qualified as research analysts with the NASD and NYSE and therefore are not subject to the restrictions contained in the NASD and NYSE rules on communications with a subject company, public appearances, and trading securities held by a research analyst account. The name of each affiliate and analyst employed by that affiliate contributing to this report, if any, follows.

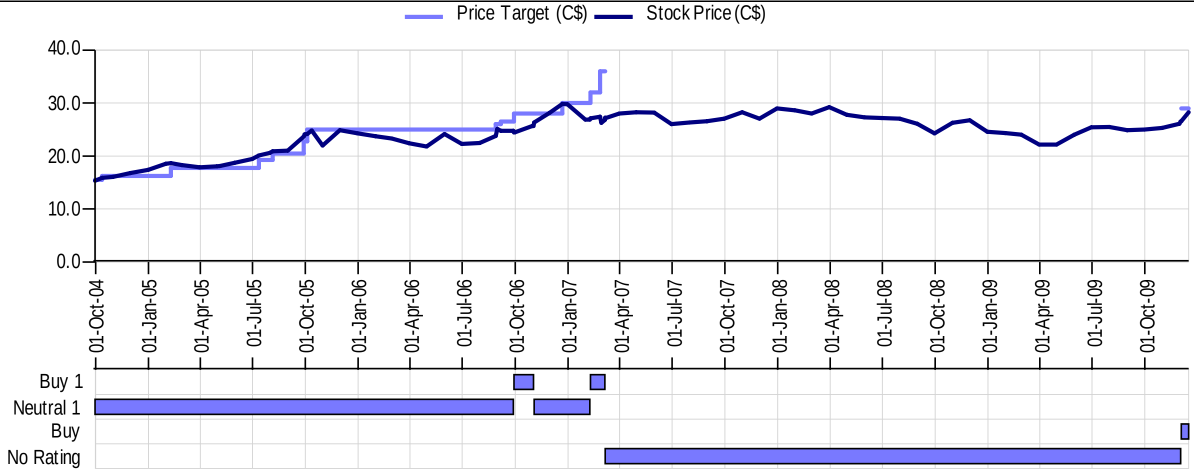
Ratings in this table are the most current published ratings prior to this report. They may be more recent than the stock pricing date

The analyst responsible for this report has reviewed the material operations of the issuer and/or met with senior management.

Unless otherwise indicated, please refer to the Valuation and Risk sections within the body of this report.

Fortis Inc. (C$)



Source: UBS; as of 16 Dec 2009

Note: On August 4, 2007 UBS revised its rating system. (See 'UBS Investment Research: Global Equity Rating Definitions' table for details). From September 9, 2006 through August 3, 2007 the UBS ratings and their definitions were: Buy 1 = FSR is > 6% above the MRA, higher degree of predictability; Buy 2 = FSR is > 6% above the MRA, lower degree of predictability; Neutral 1 = FSR is between -6% and 6% of the MRA, higher degree of predictability; Neutral 2 = FSR is between -6% and 6% of the MRA, lower degree of predictability; Reduce 1 = FSR is > 6% below the MRA, higher degree of predictability; Reduce 2 = FSR is > 6% below the MRA, lower degree of predictability. The predictability level indicates an analyst's conviction in the FSR. A predictability level of '1' means that the analyst's estimate of FSR is in the middle of a narrower, or smaller, range of possibilities. A predictability level of '2' means that the analyst's estimate of FSR is in the middle of a broader, or larger, range of possibilities. From October 13, 2003 through September 8, 2006 the percentage band criteria used in the rating system was 10%.

Global Disclaimer

This report has been prepared by UBS Securities Canada Inc, an affiliate of UBS AG. UBS AG, its subsidiaries, branches and affiliates are referred to herein as UBS. In certain countries, UBS AG is referred to as UBS SA.

This report is for distribution only under such circumstances as may be permitted by applicable law. Nothing in this report constitutes a representation that any investment strategy or recommendation contained herein is suitable or appropriate to a recipient's individual circumstances or otherwise constitutes a personal recommendation. It is published solely for information purposes, it does not constitute an advertisement and is not to be construed as a solicitation or an offer to buy or sell any securities or related financial instruments in any jurisdiction. No representation or warranty, either express or implied, is provided in relation to the accuracy, completeness or reliability of the information contained herein, except with respect to information concerning UBS AG, its subsidiaries and affiliates, nor is it intended to be a complete statement or summary of the securities, markets or developments referred to in the report. UBS does not undertake that investors will obtain profits, nor will it share with investors any investment profits nor accept any liability for any investment losses. Investments involve risks and investors should exercise prudence in making their investment decisions. The report should not be regarded by recipients as a substitute for the exercise of their own judgement. Any opinions expressed in this report are subject to change without notice and may differ or be contrary to opinions expressed by other business areas or groups of UBS as a result of using different assumptions and criteria. Research will initiate, update and cease coverage solely at the discretion of UBS Investment Bank Research Management. The analysis contained herein is based on numerous assumptions. Different assumptions could result in materially different results. The analyst(s) responsible for the preparation of this report may interact with trading desk personnel, sales personnel and other constituencies for the purpose of gathering, synthesizing and interpreting market information. UBS is under no obligation to update or keep current the information contained herein. UBS relies on information barriers to control the flow of information contained in one or more areas within UBS, into other areas, units, groups or affiliates of UBS. The compensation of the analyst who prepared this report is determined exclusively by research management and senior management (not including investment banking). Analyst compensation is not based on investment banking revenues, however, compensation may relate to the revenues of UBS Investment Bank as a whole, of which investment banking, sales and trading are a part.

The securities described herein may not be eligible for sale in all jurisdictions or to certain categories of investors. Options, derivative products and futures are not suitable for all investors, and trading in these instruments is considered risky. Mortgage and asset-backed securities may involve a high degree of risk and may be highly volatile in response to fluctuations in interest rates and other market conditions. Past performance is not necessarily indicative of future results. Foreign currency rates of exchange may adversely affect the value, price or income of any security or related instrument mentioned in this report. For investment advice, trade execution or other enquiries, clients should contact their local sales representative. Neither UBS nor any of its affiliates, nor any of UBS' or any of its affiliates, directors, employees or agents accepts any liability for any loss or damage arising out of the use of all or any part of this report. For financial instruments admitted to trading on an EU regulated market: UBS AG, its affiliates or subsidiaries (excluding UBS Securities LLC and/or UBS Capital Markets LP) acts as a market maker or liquidity provider (in accordance with the interpretation of these terms in the UK) in the financial instruments of the issuer save that where the activity of liquidity provider is carried out in accordance with the definition given to it by the laws and regulations of any other EU jurisdictions, such information is separately disclosed in this research report. UBS and its affiliates and employees may have long or short positions, trade as principal and buy and sell in instruments or derivatives identified herein.

Any prices stated in this report are for information purposes only and do not represent valuations for individual securities or other instruments. There is no representation that any transaction can or could have been effected at those prices and any prices do not necessarily reflect UBS's internal books and records or theoretical model-based valuations and may be based on certain assumptions. Different assumptions, by UBS or any other source, may yield substantially different results.

United Kingdom and the rest of Europe: Except as otherwise specified herein, this material is communicated by UBS Limited, a subsidiary of UBS AG, to persons who are eligible counterparties or professional clients and is only available to such persons.
