This report is issued and approved for distribution by (a) in Canada, CIBC World Markets Inc., a member of the Investment Industry Regulatory Organization of Canada ("IIROC"), the Toronto Stock Exchange, the TSX Venture Exchange and a Member of the Canadian Investor Protection Fund, (b) in the United Kingdom, CIBC World Markets plc, which is regulated by the Financial Services Authority ("FSA"), (c) in Australia to wholesale clients only, CIBC Australia Ltd, a company regulated by the ASIC with AFSL license number 240603 and ACN 000 067 256, and (d) in Japan, CIBC World Markets (Japan) Inc., a registered Type 1 Financial product provider with the registration number Director General of Kanto Finance Bureau #218 (collectively, "CIBC World Markets") and (e) in the United States either by (i) CIBC World Markets Inc. for distribution only to U.S. Major Institutional Investors ("MII") (as such term is defined in SEC Rule 15a-6) or (ii) CIBC World Markets Corp., a member of the Financial Industry Regulatory Authority ("FINRA"). U.S. MIIs receiving this report from CIBC World Markets Inc. (the Canadian broker-dealer) are required to effect transactions (other than negotiating their terms) in securities discussed in the report through CIBC World Markets Corp. (the U.S. broker-dealer).

This report is provided, for informational purposes only, to institutional investor and retail clients of CIBC World Markets in Canada, and does not constitute an offer or solicitation to buy or sell any securities discussed herein in any jurisdiction where such offer or solicitation would be prohibited. This document and any of the products and information contained herein are not intended for the use of private investors in the United Kingdom. Such investors will not be able to enter into agreements or purchase products mentioned herein from CIBC World Markets plc. The comments and views expressed in this document are meant for the general interests of wholesale clients of CIBC Australia Ltd.

This report has been prepared by the CIBC group and is issued in Hong Kong by Canadian Imperial Bank of Commerce, Hong Kong Branch, a registered institution under the Securities and Futures Ordinance, Cap 571 (the "SFO"). This report is intended for "professional investors" only (within the meaning of the SFO) and has been prepared for general circulation and does not take into account the objectives, financial situation or needs of any recipient. Any recipient in Hong Kong who has any questions or requires further information on any matter arising from or relating to this report should contact Canadian Imperial Bank of Commerce, Hong Kong Branch at Suite 3602, Cheung Kong Centre, 2 Queen's Road Central, Hong Kong (telephone number: +852 2841 6111). Orders for Hong Kong listed securities will be executed by Canadian Imperial Bank of Commerce, Hong Kong Branch. Canadian Imperial Bank of Commerce, Hong Kong Branch has entered into an arrangement with its broker-dealer affiliates worldwide to execute orders for securities listed outside of Hong Kong for Hong Kong clients.

This report is intended for distribution in Singapore solely to "institutional investors" (within the meanings of the Financial Advisers Act (Chapter 110 of Singapore)).

The securities mentioned in this report may not be suitable for all types of investors. This report does not take into account the investment objectives, financial situation or specific needs of any particular client of CIBC World Markets. Recipients should consider this report as only a single factor in making an investment decision and should not rely solely on investment recommendations contained herein, if any, as a substitution for the exercise of independent judgment of the merits and risks of investments. The analyst writing the report is not a person or company with actual, implied or apparent authority to act on behalf of any issuer mentioned in the report. Before making an investment decision with respect to any security recommended in this report, the recipient should consider whether such recommendation is appropriate given the recipient's particular investment needs, objectives and financial circumstances. CIBC World Markets suggests that, prior to acting on any of the recommendations herein, Canadian retail clients of CIBC World Markets contact one of our client advisers in your jurisdiction to discuss your particular circumstances. Non-client recipients of this report who are not institutional investor clients of CIBC World Markets should consult with an independent financial advisor prior to making any investment decision based on this report or for any necessary explanation of its contents. CIBC World Markets will not treat non-client recipients as its clients solely by virtue of their receiving this report.

Past performance is not a guarantee of future results, and no representation or warranty, express or implied, is made regarding future performance of any security mentioned in this report. The price of the securities mentioned in this report and the income they produce may fluctuate and/or be adversely affected by exchange rates, and investors may realize losses on investments in such securities, including the loss of investment principal. CIBC World Markets accepts no liability for any loss arising from the use of information contained in this report, except to the extent that liability may arise under specific statutes or regulations applicable to CIBC World Markets.

## Negative Alberta Cost Of Capital Decision; Modest Impact To EPS

### What's Changed

The Alberta Utilities Commission (AUC) released its 2013-2015 Generic Cost of Capital (GCOC) decision for utilities operating in Alberta. The AUC reduced its generic allowed return on equity (ROE) from 8.75% to 8.30%.

The AUC cited the improvement in global financial market and economic conditions since the prior GCOC proceeding (2011), along with the current environment of historically low interest rates as warranting a decline in the allowed ROE. The AUC stated that in the current environment, the expected return from the overall stock market may have declined, and hence the required return for low-risk utilities has also fallen below long-term averages. The AUC also reduced the common equity ratios for the majority of utilities in the province by 1% citing a lower equity requirement to maintain the targeted A-range credit metrics than previously observed. For FortisAlberta, the common equity ratio declines from 41% to 40%.

### Implications

We estimate that the AUC decision will reduce Fortis' annual EPS by ~\$0.025. The decision, however, is retroactive to 2013, meaning 2015 (specifically Q1) will see the impact of the previous two years (Fortis had been booking earnings at 8.75% ROE/41% equity pending the decision). As a result, we have reduced our 2015E and 2016E EPS from \$2.00/\$2.18 to \$1.93/\$2.15, respectively.

We also note that Fortis' BC utilities are scheduled for a review of their allowed ROE and common equity ratio (FortisBC Energy currently at 8.75% and 38.5%, respectively), with an application to be filed with the BCUC by November 30, 2015 to determine the benchmark for 2016. We estimate the impact of a 45 bps reduction in BC allowed ROEs would lower Fortis' EPS by ~\$0.03.

While lower allowed returns are an obvious negative for a regulated utility, we note that the annual impact on EPS from the AUC ruling is <2% of EPS. We continue to view Fortis as a well-managed, low-risk, modest-growth business, with good visibility into mid- to high-single-digit growth over the coming several years. Maintain SO rating and \$42 PT.

---

## Price Target Calculation

Our \$42 price target is based on a discounted cash flow analysis, which captures the expected cash flow growth from Fortis' ~\$9.5 billion capital spending program (including acquisitions, and risk-adjusted capital for LNG projects) through 2019. The cost of equity assigned to each segment varies depending on the risk profile of the business (i.e., Canadian utilities – lower risk; Fortis Generation, Caribbean utilities – higher risk). Our price target equates to a 2016E EV/EBITDA multiple of 10.2x (utilizing a 2016E net debt of \$12.5 billion) and 19.5x 2016E P/E.

---

## Key Risks To Price Target

- **Regulatory Issues:** Given that the majority of Fortis' business is regulated (over 90% as measured by revenues and assets), the company's results are highly sensitive to regulatory decisions – as illustrated by the performance based regulation (PBR) and generic cost of capital (GCOC) proceedings in Alberta and B.C.
- **Market Risks:** Under regulator-approved mechanisms, Fortis flows through the commodity cost of natural gas, fuel or purchased power to its customers. The company's non-regulated hydro generation assets are sensitive to localized rainfall levels, but are geographically dispersed and individually not meaningful to overall results. The Waneta Expansion will be more material, but hydrology risk is managed as part of the overall regional river system by BC Hydro, effectively reducing the risk to the project. Foreign exchange risk is relatively low: a 5% change in the Canadian/U.S. dollar exchange rate would impact earnings by \$0.01/share.
- **Acquisition Risks:** Fortis recently acquired UNS Energy and CH Energy, and it continues to pursue additional gas and electric distribution utilities in Canada and the United States. Acquisition risks include: deal risk (failure to close a transaction), operation and regulatory risks of the acquired organization.
- **Construction Risk:** Fortis primarily faces construction risk for its non-regulated generation assets where the company assumes the risk of cost overruns. Clearly, the Waneta Expansion project is the largest construction project that the company is undertaking (with the company funding 51% of the total \$900 million cost). Fortis and its partners have signed a fixed-price design-build contract with SNC-Lavalin (SNC-SP) in order to mitigate construction risk, but ultimate construction and financing risks lie with the Waneta Expansion consortium (i.e., Fortis and partners).

## IMPORTANT DISCLOSURES:

**Analyst Certification:** Each CIBC World Markets research analyst named on the front page of this research report, or at the beginning of any subsection hereof, hereby certifies that (i) the recommendations and opinions expressed herein accurately reflect such research analyst's personal views about the company and securities that are the subject of this report and all other companies and securities mentioned in this report that are covered by such research analyst and (ii) no part of the research analyst's compensation was, is, or will be, directly or indirectly, related to the specific recommendations or views expressed by such research analyst in this report.

**Potential Conflicts of Interest:** Equity research analysts employed by CIBC World Markets are compensated from revenues generated by various CIBC World Markets businesses, including the CIBC World Markets Investment Banking Department. Research analysts do not receive compensation based upon revenues from specific investment banking transactions. CIBC World Markets generally prohibits any research analyst and any member of his or her household from executing trades in the securities of a company that such research analyst covers. Additionally, CIBC World Markets generally prohibits any research analyst from serving as an officer, director or advisory board member of a company that such analyst covers.

In addition to 1% ownership positions in covered companies that are required to be specifically disclosed in this report, CIBC World Markets may have a long position of less than 1% or a short position or deal as principal in the securities discussed herein, related securities or in options, futures or other derivative instruments based thereon.

Recipients of this report are advised that any or all of the foregoing arrangements, as well as more specific disclosures set forth below, may at times give rise to potential conflicts of interest.

## CIBC World Markets Inc. Stock Rating System

Abbreviation	Rating	Description
<b>Stock Ratings</b>		
SO	Sector Outperformer	Stock is expected to outperform the sector during the next 12-18 months.
SP	Sector Performer	Stock is expected to perform in line with the sector during the next 12-18 months.
SU	Sector Underperformer	Stock is expected to underperform the sector during the next 12-18 months.
NR	Not Rated	CIBC World Markets does not maintain an investment recommendation on the stock.
R	Restricted	CIBC World Markets is restricted (due to potential conflict of interest) from rating the stock.
<b>Sector Weightings (note: Broader market averages refer to S&amp;P 500 in the U.S. and S&amp;P/TSX Composite in Canada.)</b>		
O	Overweight	Sector is expected to outperform the broader market averages.
M	Market Weight	Sector is expected to equal the performance of the broader market averages.
U	Underweight	Sector is expected to underperform the broader market averages.
NA	None	Sector rating is not applicable.

"Speculative" indicates that an investment in this security involves a high amount of risk due to volatility and/or liquidity issues.

# Fortis Inc.

## Q1 Beat On Positive AUC Decision And FX Gains

### What's The Event

Fortis released Q1/2015 adjusted EPS of \$0.65, ahead of consensus \$0.62 / CIBC \$0.57. Fortis' earnings exclude the retroactive impact/benefit of two regulatory decisions in Alberta - a positive Capital Tracker decision and a negative ROE/equity thickness decision - which combined would have had a \$10 million benefit in the quarter. The outperformance in the quarter versus our expectation reflects our Q1 estimate including the negative impact of the reduction in ROE/equity thickness (although not the benefit of the Capital Tracker decision) for the entire FortisAlberta rate base for the retroactive and current periods; in reality, the lower ROE/equity thickness only applied to ~5-10% of rate base governed by the Capital Tracker mechanism.

Otherwise, the company's results had a number of puts and takes but were roughly as expected: a lower-than-expected contribution from UNS given significant seasonality in the business (Q2/Q3 strongest); a higher-than-expected contribution from FortisBC Energy due to the termination of a revenue stabilization mechanism (Q1 stronger); a higher-than-expected contribution from FortisBC Electric due to timing of regulatory deferrals; lower contributions from non-regulated Generation (lower rainfall) and Properties (costs of strategic review).

### Implications

Q1 marked a solid start to what we view as a strong year for Fortis. The company is expected to benefit in 2015 from: a full year contribution from UNS, the end of the rate freeze at Central Hudson, the start-up of the Waneta Expansion, and \$2.2 billion in capex. Fortis has a 5-year capex program totalling \$9 billion, with a further \$1 billion from potential LNG-export related projects in BC which are expected to be sanctioned by year-end. This capex drives 6.5%-7.5% rate base CAGR through 2019.

We remain positive on Fortis given the company's solid growth outlook (with potential upside) and low-risk regulated business model. We see little material change to our outlook and maintain our Sector Outperformer rating and \$42 price target.

## Q1 Beat

Fortis (FTS-SO) reported Q1/2015 adjusted EPS of \$0.65, ahead of consensus \$0.62/CIBC \$0.57 estimates. The main variances from our estimate were as follows:

### AUC Decisions

- The company received a positive regulatory decision from the Alberta Utilities Commission (AUC) in March related to Fortis' Capital Tracker Applications. These Capital Tracker Applications were necessitated as Alberta's Performance Based Rate-setting (PBR) framework did not adequately compensate Fortis for the level of capex required in the province. The AUC issued a decision in March which now provides for Fortis to earn on "substantially all" of its allowed capex, and is also retroactive for 2013-2014.
- The benefit of the AUC decision on the Capital Tracker Application more than offset a negative decision from the AUC in March which reduced Fortis' allowed ROE from 8.75% to 8.3% and equity thickness from 41% to 40%, both retroactive to 2013. However, the negative impact of these lower returns/equity thickness is significantly limited by the PBR framework, with the company only seeing the full impact in 2018 when the PBR parameters are re-based.

The combination of these two decisions resulted in a \$10 million gain in the quarter related to retroactive periods (2013-2014), which Fortis excluded from its adjusted results. The outperformance in the quarter versus our expectation reflects our Q1 estimate including the negative impact of the reduction in ROE/equity thickness (although not the benefit of the Capital Tracker decision) for the entire FortisAlberta rate base for the retroactive and current periods; in reality, the lower ROE/equity thickness only applied to ~5-10% of rate base governed by the Capital Tracker mechanism.

### Cessation of BC Energy Rate Stabilization Mechanism

Following amalgamation of FortisBC Energy's three utilities [FortisBC Energy, FortisBC Energy (Vancouver Island) and FortisBC Energy (Whistler)] in December 2014, the combined utility no longer receives the benefit of a rate stabilization mechanism which historically smoothed revenues due to seasonal differences. As a result, FortisBC Energy is now expected to see more seasonal variation in its results (Q1/Q4 higher, Q2/Q3 lower), although should not be impacted on an annual basis.

### UNS Seasonality

UNS Energy, acquired in August 2014, despite generating \$20 million in earnings in Q1, had a \$0.13 negative impact on EPS when factoring in the financing costs (and equity dilution) associated with the acquisition. UNS, based in Arizona, is a highly seasonal utility, with ~75% of earnings generated in Q2/Q3. The acquisition is expected to be accretive on a full-year basis.

### FX Benefit

With the UNS and Central Hudson acquisitions, Fortis now has 40% of total assets in the US. The lower Canadian dollar resulted in Central Hudson generating ~\$3 million of incremental earnings y/y due to favourable FX. Across both US utilities each 5% change in the US/Canadian dollar exchange rate has an approximate \$0.04 EPS impact on annual earnings.

**Exhibit 1. Q1/15 Results (\$ mlns., except per share)**

Segmented Earnings	Q1/15A	Q1/15E	Q1/14A	Comments

Source: CIBC World Markets Inc. and company reports.

**Q1 A Solid Start To A Strong 2015**

While Q1 results beat estimates, we note that EPS were roughly flat y/y due to the headwind of UNS Energy this year (a \$0.13/share impact) which was not present last Q1 (acquired August 2014). However, on a full year basis, we expect strong y/y EPS growth in 2015 versus 2014 for the following reasons:

**Waneta Expansion In Service**

Fortis completed the Waneta Expansion project in April, on budget and six weeks ahead of schedule. Fortis owns 51% of the \$900 million / 335 MW expansion. All the energy and capacity from the expansion will be sold to BC Hydro and FortisBC Electric under 40 year contracts. As the project is non-regulated it generated no earnings until entering service.

**Full Year Benefit Of UNS Energy**

The acquisition of UNS was completed in August 2014, although Fortis issued \$1.8 billion in convertible debentures in January 2014 to pre-finance the transaction. This significantly impacted 2014 results. UNS is expected to be accretive to 2015 earnings.

## **End Of Rate Freeze At Central Hudson**

On acquisition of Central Hudson in mid-2013, Fortis committed to invest US\$215 million in capex during a two-year rate freeze ending June 30, 2015. Upon expiry of this rate freeze Fortis will be able to start earning returns on this capex. Fortis has filed a Joint Settlement Proposal that provides for new rates at Central Hudson for a three-year period starting July 1, 2015; the company is seeking 9% ROE on 48% equity. This is notionally down from current allowed 10% ROE, but given the rate freeze, Central Hudson is in effect earning closer to 9%. The new agreement also provides for earnings sharing in excess of the allowed 9% ROE under an incentive earnings mechanism.

## **Sale of Non-Regulated Assets**

Fortis announced it was initiating a strategic review of its non-regulated properties business in September 2014. The company owned these non-regulated assets at the corporate (i.e., holdco) level in order to generate taxable income with which it could offset the taxable losses from its corporate costs which otherwise would go unutilized. With the start-up of the non-regulated Waneta Expansion, Fortis now has an asset in a related business which generates taxable income, and no longer has a need to own assets in unrelated areas to its core business. As such, Fortis is looking to sell its properties business; the process continues, with management expecting to make an announcement on the outcome of the strategic review in Q2. The assets under review have a book value of ~\$700 million. Separately, in March, Fortis reached an agreement to sell its small non-regulated hydro facilities in New York and Ontario, with completion of the transactions expected in Q2 and H2, respectively. These facilities have a book value of ~\$30 million.

## **Headwinds From Regulatory Decisions**

The impact of the AUC decision on lower allowed ROE/equity thickness has a modest negative impact on FortisAlberta's operations. The impact, however, is effectively phased in over the coming years as the lower ROE/equity thickness applies only to new capital applied for since performance based regulation (PBR) came into effect in 2013, with only 10-15% of revenue expected to be impacted in 2015. The full impact of the decision (i.e. 8.3% ROE/40% equity thickness on the entire rate base) would apply after the end of the current PBR term at the end of 2017. We note, however, that the AUC has initiated a 2016 GCOC proceeding with the possibility of the allowed ROE and equity thickness changing again before 2018.

The changes to our estimates mainly reflect Q1 results, higher expectations for FortisAlberta given we had previously applied the new (lower) allowed ROE/equity ratio to the entire rate base versus a small portion now, partially offset by lower Fortis Generation earnings given the sale of the facilities in New York and Ontario. As a result of these changes, our 2015 and 2016 EPS estimates increase from \$1.93 and \$2.15 to \$1.97 and \$2.16, respectively.

**Maintain SO Rating**

Overall, despite the several puts and takes in the quarter, we see no material change to our outlook. We expect 2015 results to be up significantly versus 2014, and the company's \$9 billion capex program to drive rate base growth through 2019 (a 6.5% CAGR). Fortis is also pursuing a further \$1 billion of projects in BC related to LNG export facilities which are expected to be sanctioned by year-end (supporting upside to 7.5% rate base CAGR through 2019). We view the company's solid growth outlook, low risk, and potential upside (from LNG) as key drivers of the stock while valuations are in line with peers [18.0x 2016E EPS/9.9x 2016E EBITDA compared to Emera (EMA-SP) at 17.4x/12.2x and Canadian Utilities (CU-SP) at 16.5x/10.1x], and as such maintain our Sector Outperformer rating and \$42 price target.

**Price Target Calculation**

Our \$42 price target is based on a discounted cash flow analysis, which captures the expected cash flow growth from Fortis' ~\$9.5 billion capital spending program (including acquisitions, and risk adjusted capital for LNG projects) through 2019. The cost of equity assigned to each segment varies depending on the risk profile of the business (i.e., Canadian utilities – lower risk; Fortis Generation, Caribbean utilities – higher risk). Our price target equates to a 2016E EV/EBITDA multiple of 10.2x (utilizing a 2016E net debt of \$12.5 billion) and 19.5x 2016E P/E.

---

## Key Risks To Price Target

- **Regulatory Issues:** Given that the majority of Fortis' business is regulated (over 90% as measured by revenues and assets), the company's results are highly sensitive to regulatory decisions – as illustrated by the performance based regulation (PBR) and generic cost of capital (GCOC) proceedings in Alberta and B.C.
- **Market Risks:** Under regulator-approved mechanisms, Fortis flows through the commodity cost of natural gas, fuel or purchased power to its customers. The company's non-regulated hydro generation assets are sensitive to localized rainfall levels, but are geographically dispersed and individually not meaningful to overall results. The Waneta Expansion will be more material, but hydrology risk is managed as part of the overall regional river system by BC Hydro, effectively reducing the risk to the project. Foreign exchange risk is relatively low: a 5% change in the Canadian/U.S. dollar exchange rate would impact earnings by \$0.04/share.
- **Acquisition Risks:** Fortis recently acquired UNS Energy and CH Energy, and it continues to pursue additional gas and electric distribution utilities in Canada and the United States. Acquisition risks include: deal risk (failure to close a transaction), operation and regulatory risks of the acquired organization.
- **Construction Risk:** Fortis primarily faces construction risk for its non-regulated generation assets where the company assumes the risk of cost overruns.

## IMPORTANT DISCLOSURES:

**Analyst Certification:** Each CIBC World Markets research analyst named on the front page of this research report, or at the beginning of any subsection hereof, hereby certifies that (i) the recommendations and opinions expressed herein accurately reflect such research analyst's personal views about the company and securities that are the subject of this report and all other companies and securities mentioned in this report that are covered by such research analyst and (ii) no part of the research analyst's compensation was, is, or will be, directly or indirectly, related to the specific recommendations or views expressed by such research analyst in this report.

**Potential Conflicts of Interest:** Equity research analysts employed by CIBC World Markets are compensated from revenues generated by various CIBC World Markets businesses, including the CIBC World Markets Investment Banking Department. Research analysts do not receive compensation based upon revenues from specific investment banking transactions. CIBC World Markets generally prohibits any research analyst and any member of his or her household from executing trades in the securities of a company that such research analyst covers. Additionally, CIBC World Markets generally prohibits any research analyst from serving as an officer, director or advisory board member of a company that such analyst covers.

In addition to 1% ownership positions in covered companies that are required to be specifically disclosed in this report, CIBC World Markets may have a long position of less than 1% or a short position or deal as principal in the securities discussed herein, related securities or in options, futures or other derivative instruments based thereon.

Recipients of this report are advised that any or all of the foregoing arrangements, as well as more specific disclosures set forth below, may at times give rise to potential conflicts of interest.

## Important Disclosure Footnotes for Fortis Inc. (FTS)

- Fortis Inc. is a client for which a CIBC World Markets company has performed investment banking services in the past 12 months.
- CIBC World Markets Inc. has managed or co-managed a public offering of securities for Fortis Inc. in the past 12 months.
- CIBC World Markets Inc. has received compensation for investment banking services from Fortis Inc. in the past 12 months.
- CIBC World Markets Inc. expects to receive or intends to seek compensation for investment banking services from Fortis Inc. in the next 3 months.
- CIBC World Markets Corp., CIBC World Markets Inc., and their affiliates, in the aggregate, beneficially own 1% or more of a class of equity securities issued by Fortis Inc.
- CIBC World Markets Inc. is the adviser to Fortis Inc. in the review of strategic options for its hotel and commercial real estate business.

**EARNINGS UPDATE**

# Fortis Inc.

## Q2 Operationally In Line, F2015 Earnings Showing Strong Y/Y Growth

### What's The Event

Fortis (FTS-SO) reported Q2/15 adjusted EPS of \$0.44, in line with consensus / CIBC estimates of \$0.43. Earnings were up strongly vs. adjusted EPS of \$0.30 Y/Y due to the inclusion of UNS Energy, acquired in August 2014 (\$0.09 accretion after factoring in financing costs) and the Waneta Expansion (\$0.04) which entered service in early April, 6 weeks ahead of schedule.

Reported EPS of \$0.88 included gains on the sale of the company's commercial real estate portfolio (\$0.39 EPS) and non-regulated hydro generation assets in New York state (\$0.10), partially offset by a \$0.05 loss on the pending sale of the hotel portfolio.

### Implications

Fortis is seeing strong earnings growth in 2015 from a number of factors:

1. The inclusion of results from UNS Energy (whereas UNS was a drag on results in 2014 given it was pre-financed in January but only closed in August).
2. The lifting of the rate freeze at Central Hudson starting on July 1, with an allowed ROE of 9% down from prior 10%, but with CH actually achieving only 7.3% ROE on an LTM basis given the rate freeze.
3. Start-up of the Waneta Expansion in April, expected to contribute \$20-\$25M earnings on an annual run-rate basis (\$12M in Q2, the seasonally strongest quarter).
4. Planned 2015 capex of \$2.2B, up ~30% Y/Y.

Partially offsetting these factors, the company faces modest headwinds from lower allowed returns in BC and Alberta (with another round of cost of capital proceedings to come).

Nevertheless, the company continues to target a base case of 6.5% rate base CAGR through 2019, with equity needs financed through internal cash flow and with potential upside to growth from LNG projects in BC. We expect earnings and dividend per share growth to track roughly to rate base growth. Given all these dynamics, we see little change in our positive outlook and maintain our Sector Outperformer rating and \$42 price target.

**Company Profile**

Fortis owns a natural gas utility in British Columbia, electric distribution utilities in five Canadian provinces, the Caribbean, gas and electric utilities in New York State and Arizona, and non-regulated power generation assets.

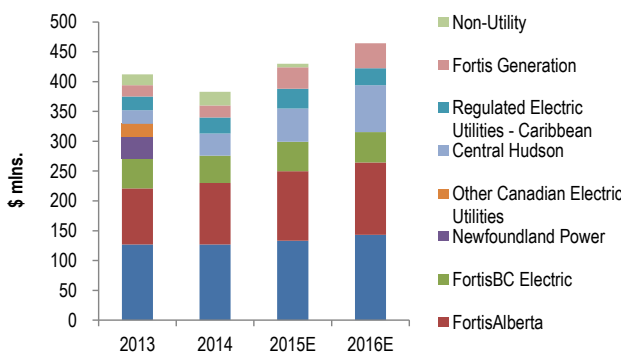

**Investment Thesis**

Fortis provides the benefits (stability) of a regulated utility, and is in a period of solid organic investment and growth as the company delivers on its 2015-2019 \$9 billion capital program which is expected to drive a 6.5% CAGR in rate base through 2019. Fortis has an additional ~\$1.1 billion in potential LNG projects in BC which could drive the rate base CAGR to ~7.5%.

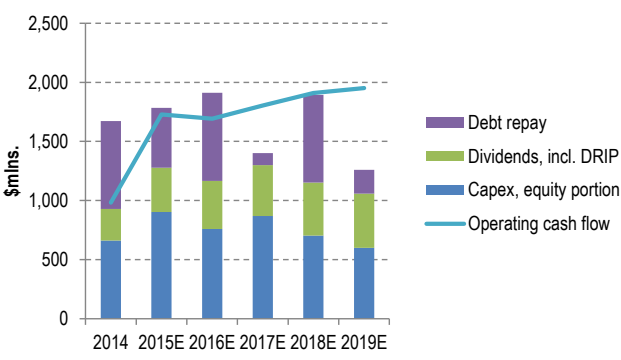

**Utility Rate Base (Mid-Year 2015E, Total \$25 Billion)**

**Segmented Earnings (Exc. Corporate)**

**Major Sources, Uses Of Cash**

Source: Company reports, Factset, and CIBC World Markets Inc.

Fortis is seeing strong earnings growth in 2015, from the factors we noted above. The outlook for 2016 and beyond is based on the company's base five-year capex plan of \$9 billion which drives a rate base CAGR over the same timeframe of 6.5%. With the sale of the company's real estate portfolio, Fortis will have paid off its revolving debt still outstanding from the acquisition of UNS, and we expect the equity portion of capex going forward to be funded from internally generated cash flow.

Potential upside exists from two LNG-related projects in BC (Tilbury 1B, Woodfibre) which could add a further \$1 billion capex, and drive a ~7.5% rate base CAGR. We recently noted that these LNG projects appear to have been delayed a year (or potentially more) from our initial expectation of 2015 investment decisions given commercial and regulatory issues. Our financial forecast reflects these expected delays.

We also see potential upside from Fortis' UNS Energy business. US President Obama has released an updated and more aggressive Clean Power Plan which requires a reduction in carbon emissions from the US power sector of 32% by 2030 (vs. original proposal of a 30% reduction). UNS Energy is transitioning its generation mix away from coal (~60% of its generation mix on acquisition in 2014), but the Clean Power Plan could accelerate this transition and increase associated capex. We have not built any upside to our forecast from potential incremental generation investment in Arizona from this.

Overall, we see little change to our outlook at present, and see potential upside to the base growth scenario as noted above. We maintain our Sector Outperformer rating and \$42 price target.

## Price Target Calculation

Our \$42 price target is based on a discounted cash flow analysis, which captures the expected cash flow growth from Fortis' ~\$9 billion capital spending program (including acquisitions, and risk adjusted capital for LNG projects) through 2019. The cost of equity assigned to each segment varies depending on the risk profile of the business (i.e., Canadian utilities – lower risk; Fortis Generation, Caribbean utilities – higher risk). Our price target equates to a 2016E EV/EBITDA multiple of 10.1x (utilizing a 2016E net debt of \$12.0 billion) and 19.8x 2016E P/E.

---

## Key Risks To Price Target

- **Regulatory Issues:** Given that the majority of Fortis' business is regulated (over 90% as measured by revenues and assets), the company's results are highly sensitive to regulatory decisions – as illustrated by the performance based regulation (PBR) and generic cost of capital (GCOC) proceedings in Alberta and B.C.
- **Market Risks:** Under regulator-approved mechanisms, Fortis flows through the commodity cost of natural gas, fuel or purchased power to its customers. The company's non-regulated hydro generation assets are sensitive to localized rainfall levels, but are geographically dispersed and individually not meaningful to overall results. The Waneta Expansion is more material, but hydrology risk is managed as part of the overall regional river system by BC Hydro, effectively reducing the risk to the project. Foreign exchange risk is relatively low: a \$0.10 change in the Canadian/U.S. dollar exchange rate would impact earnings by \$0.09/share.
- **Acquisition Risks:** Fortis recently acquired UNS Energy and CH Energy, and it continues to pursue additional gas and electric distribution utilities in Canada and the United States. Acquisition risks include: deal risk (failure to close a transaction), operation and regulatory risks of the acquired organization.
- **Construction Risk:** Fortis primarily faces construction risk for its non-regulated generation assets where the company assumes the risk of cost overruns.

## IMPORTANT DISCLOSURES:

**Analyst Certification:** Each CIBC World Markets research analyst named on the front page of this research report, or at the beginning of any subsection hereof, hereby certifies that (i) the recommendations and opinions expressed herein accurately reflect such research analyst's personal views about the company and securities that are the subject of this report and all other companies and securities mentioned in this report that are covered by such research analyst and (ii) no part of the research analyst's compensation was, is, or will be, directly or indirectly, related to the specific recommendations or views expressed by such research analyst in this report.

**Potential Conflicts of Interest:** Equity research analysts employed by CIBC World Markets are compensated from revenues generated by various CIBC World Markets businesses, including the CIBC World Markets Investment Banking Department. Research analysts do not receive compensation based upon revenues from specific investment banking transactions. CIBC World Markets generally prohibits any research analyst and any member of his or her household from executing trades in the securities of a company that such research analyst covers. Additionally, CIBC World Markets generally prohibits any research analyst from serving as an officer, director or advisory board member of a company that such analyst covers.

In addition to 1% ownership positions in covered companies that are required to be specifically disclosed in this report, CIBC World Markets may have a long position of less than 1% or a short position or deal as principal in the securities discussed herein, related securities or in options, futures or other derivative instruments based thereon.

Recipients of this report are advised that any or all of the foregoing arrangements, as well as more specific disclosures set forth below, may at times give rise to potential conflicts of interest.

## Important Disclosure Footnotes for Fortis Inc. (FTS)

- Fortis Inc. is a client for which a CIBC World Markets company has performed investment banking services in the past 12 months.
- CIBC World Markets Inc. has managed or co-managed a public offering of securities for Fortis Inc. in the past 12 months.
- CIBC World Markets Inc. has received compensation for investment banking services from Fortis Inc. in the past 12 months.
- CIBC World Markets Inc. expects to receive or intends to seek compensation for investment banking services from Fortis Inc. in the next 3 months.
- CIBC World Markets Corp., CIBC World Markets Inc., and their affiliates, in the aggregate, beneficially own 1% or more of a class of equity securities issued by Fortis Inc.

## CIBC World Markets Inc. Stock Rating System

Abbreviation	Rating	Description
<b>Stock Ratings</b>		
SO	Sector Outperformer	Stock is expected to outperform the sector during the next 12-18 months.
SP	Sector Performer	Stock is expected to perform in line with the sector during the next 12-18 months.
SU	Sector Underperformer	Stock is expected to underperform the sector during the next 12-18 months.
NR	Not Rated	CIBC World Markets does not maintain an investment recommendation on the stock.
R	Restricted	CIBC World Markets is restricted (due to potential conflict of interest) from rating the stock.
<b>Sector Weightings (note: Broader market averages refer to S&amp;P 500 in the U.S. and S&amp;P/TSX Composite in Canada.)</b>

### INCREASE TARGET PRICE

## Continuing capital control

- **Earnings review:** Fortis reported Q4 2010 headline EPS (FD) of C\$0.47 that missed our C\$0.54 estimate, the Street's C\$0.513 view and fell beneath the C\$0.48-C\$0.55 range. Against our numbers, the primary culprits looked to be timing issues at the regulated gas utilities, weakness at the Caribbean segment and our overly ambitious view on the Other Canadian Electric Utilities. In general, we believe Fortis continues to make steady progress in delivering relatively consistent financial results from a largely regulated asset base. We do not place undue emphasis on quarterly results in much of our universe as a result of the inherently long-cycle nature of many assets. For Fortis, we continue to focus on the ongoing significant regulated capital plan along with the potentially positive upward bias to regulated returns.
- **Significant organic growth continues:** As expected, Fortis continued to provide a robust outlook for its utility capital program. The company expects consolidated gross capital expenditures to be roughly C\$1.2bn for 2011 and about C\$5.5bn over the next five years with 83% of that total amount going to utility activity.
- **Improving capital market conditions:** Historically, Fortis has been very adept at acquisitions. Corporate growth has benefited from the company's ability to successfully acquire and integrate selected assets. In our view, the company is well positioned in the current market for acquisition opportunities.
- **Valuation:** Given the current interest rate environment and looking ahead to 2012 estimates, we boosted our target price to C\$34.00 from the previous C\$32.00. That target price is obtained from multiple valuation approaches, including: an 18.5x P/E multiple of 2012 earnings; a 1.8x book value multiple; and, a DCF based valuation. We reiterate our Neutral rating.

**DISCLOSURE APPENDIX CONTAINS IMPORTANT DISCLOSURES, ANALYST CERTIFICATIONS, INFORMATION ON TRADE ALERTS, ANALYST MODEL PORTFOLIOS AND THE STATUS OF NON-U.S. ANALYSTS.** U.S. Disclosure: Credit Suisse does and seeks to do business with companies covered in its research reports. As a result, investors should be aware that the Firm may have a conflict of interest that could affect the objectivity of this report. Investors should consider this report as only a single factor in making their investment decision.

Fortis reported Q4 2010 headline EPS (FD) of C\$0.47 that missed our C\$0.54 estimate, the Street's C\$0.513 view and fell beneath the C\$0.48-C\$0.55 range. Against our numbers, the primary culprits looked to be timing issues at the regulated gas utilities, weakness at the Caribbean segment and our overly ambitious view the Other Canadian Electric Utilities. In general, we believe Fortis continues to make steady progress in delivering relatively consistent financial results from a largely regulated asset base. For Fortis, we continue to focus on the ongoing significant regulated capital plan along with the potentially positive upward bias to regulated returns. This research note is divided into three parts: (a) results; (b) outlook; and, (c) valuation. Each of these areas will be addressed in greater detail below.

A modest miss

## Results

Exhibit 1 highlights the segmented unadjusted earnings contributions for the most recent quarter and for the comparable period one year ago. Our commentary for each segment appears under the various headings below.

### Exhibit 1: Segmented unadjusted earnings contribution

C\$ in millions, unless otherwise stated

	Q4 2010	Q4 2009	chg y/y
Regulated Gas Utilities - Canadian	45	48	-6%
Regulated Electric Utilities - Canadian	41	38	8%
Regulated Electric Utilities - Caribbean	5	7	-29%
Non-regulated - Fortis Generation	5	2	150%
Non-regulated - Fortis Properties	7	5	40%
Corporate and other	(18)	(19)	5%
Net earnings applicable to common shares	85	81	5%

Source: Company data and Credit Suisse

### Regulated Gas Utilities - Canadian

The unadjusted earnings for this segment decreased by roughly 6% year-over-year (see Exhibit 2). Some notable items for the regulated gas utilities, include:

- Net customer additions were 9,400 during 2010 versus net addition of 8,200 during the full year 2009;
- The amount of customer additions increased versus 2009 due to increased building activity; and,
- Sales volumes for the quarter decreased for both the Core-Residential and Commercial and for the Industrial segment. Transportation volumes increased.

### Exhibit 2: Regulated Gas Utilities (unadjusted)

	Q4 2010	Q4 2009	chg y/y
Terasen Gas	45.0	48.0	-6%

Source: Company data and Credit Suisse

### Regulated Electric Utilities – Canadian

This segment includes operating companies like FortisAlberta, FortisBC, Newfoundland Power and Other Canadian Electric Utilities, which includes Maritime Electric and FortisOntario. Detailed contributions for each of these divisions can be found in Exhibit 3.

**Exhibit 3: Regulated electric utilities – Canadian contribution (unadjusted)***C\$ in millions, unless otherwise stated*

	Q4 2010	Q4 2009	chg y/y
FortisAlberta	17	15	13%
FortisBC	10	8	25%
Newfoundland Power	9	8	13%
Other Cdn Electric Utilities	5	7	-29%
Earnings	41	38	8%

*Source: Company data and Credit Suisse***FortisAlberta**

Earnings at this regulated utility were up by roughly 13% comparing Q4 2010 versus the prior period. The increase was primarily due to increase in electricity distribution rates due to continued growth in the system, customer growth and higher regulator-approved expenses recoverable from customers. See Exhibit 4 for selected highlights.

Increase in energy delivery  
in Alberta

**Exhibit 4: Selected FortisAlberta performance highlights (unadjusted)**

	Q4 2010	Q4 2009	chg y/y
Energy deliveries (GWh)	4,255	4,129	3%
Revenue (C\$/MWh)	23.27	20.83	12%
Operating expenses (C\$/MWh)	8.70	8.23	6%
Gross margin (C\$/MWh)	14.57	12.59	16%
Earnings (C\$millions)	17	15	13%

*Source: Company data and Credit Suisse***FortisBC**

Segmented earnings at FortisBC increased by 25% compared to the same period last year. The increase was due to an increase in customer electricity rates starting in January 2010, increased in PBR incentive adjustments and lower corporate taxes. See Exhibit 5 for selected highlights.

Slight decrease in energy  
deliveries in BC

**Exhibit 5: Selected FortisBC performance highlights (unadjusted)**

	Q4 2010	Q4 2009	chg y/y
Energy deliveries (GWh)	847	859	-1%
Revenue (C\$/MWh)	86.19	80.33	7%
Energy supply costs (C\$/MWh)	27.15	25.61	6%
Operating expenses (C\$/MWh)	24.79	23.28	6%
Gross margin (C\$/MWh)	34.24	31.43	9%
Earnings (C\$millions)	10	8	25%

*Source: Company data and Credit Suisse***Newfoundland Power**

This segment's earnings generation was higher by roughly 13% when comparing Q4 2010 versus Q4 2009 due to increase in electricity rates starting January 1, 2010 and increased in electricity sales. Energy deliveries were up by approximately 1% (see Exhibit 6).

Slight increase in NP's  
energy deliveries

**Exhibit 6: Selected Newfoundland Power performance highlights (unadjusted)**

	Q4 2010	Q4 2009	chg y/y
Energy deliveries (GWh)	1,488	1,474	1%
Revenue (C\$/MWh)	102.15	99.05	3%
Energy supply costs (C\$/MWh)	68.55	67.16	2%
Operating expenses (C\$/MWh)	10.08	8.82	14%
Gross margin (C\$/MWh)	23.52	23.07	2%
Earnings (C\$millions)	9	8	13%

*Source: Company data, Credit Suisse estimates*

## Other Canadian Electric Utilities

The roughly 1% decrease in energy deliveries was primarily the result of lower average consumption in Ontario. Exhibit 7 contains selected highlights.

Slight decrease in energy deliveries

## Regulated Electric Utilities – Caribbean

This segment includes Belize Electricity, Caribbean Utilities, and Fortis Turks and Caicos. Earnings for this segment were down roughly 29% compared to the same quarter last year. Energy deliveries decreased by 7% on a year-over-year basis due to decreased air conditioning load because of lower average temperatures in the region. On the regulatory front, the ongoing situation with Belize Electricity requires a degree of monitoring. In brief, the utility received an adverse regulatory decision relating to a rate application. Moreover, there have been changes to the electricity legislation in Belize that have been challenged by the Fortis-owned utility. The company stated

Awaiting a decision in Belize

“The evidentiary portion of the trial of Belize Electricity’s appeal of the PUC’s June 2008 Final Decision was heard in October 2010 with closing arguments completed in December 2010. A court decision on the matter is expected in the first quarter of 2011.”

Fortis Turks and Caicos, received on September 2010 “draft proposals and terms of reference from the Governor of the Turks and Caicos Islands (the “Governor”) to review the Company’s Electricity Rate Review filing.” The company stated that “[m]anagement has acknowledged the Governor’s proposed terms of reference and objectives, and has proposed that a jointly funded and identified outside independent consultant be engaged to conduct a review of the filing and current rate-setting mechanism and make recommendations regarding both.”

See Exhibit 8 below for selected highlights.

### Exhibit 8: Caribbean - Regulated Electric Utilities performance highlights (unadjusted)

	Q4 2010	Q4 2009	chg y/y
Energy deliveries (GWh)	270	291	-7%
Revenue (C\$/MWh)	311.11	292.10	7%
Energy supply costs (C\$/MWh)	188.89	171.82	10%
Operating expenses (C\$/MWh)	48.15	44.67	8%
Gross margin (C\$/MWh)	74.07	75.60	-2%
Earnings (C\$millions)	5	7	-29%

Source: Company data and Credit Suisse

## Non-regulated – Fortis Generation

The non-regulated generation assets within this segment are located in Belize, British Columbia, Central Newfoundland, Ontario and Upper New York State. Earnings for the segment were up 150% from the current quarter compared to the same quarter last year. Energy deliveries increased by 57% from Q4 2009 to Q4 2010 due to higher rainfall and the commissioning of the Vaca hydroelectric facility in Belize. See the table below for selected highlights.

**Exhibit 9: Non-regulated generation – selected highlights**

	Q4 2010	Q4 2009	chg y/y
Energy deliveries (GWh)	137	87	57%
Revenue (C\$/MWh)	65.69	57.47	14%
Energy supply costs (C\$/MWh)	-	-	n/a
Operating expenses (C\$/MWh)	14.60	22.99	-36%
Gross margin (C\$/MWh)	51.09	34.48	48%
Earnings (C\$millions)	5	2	150%

Source: Company data and Credit Suisse

**Non-regulated – Fortis Properties**

Fortis Properties' net unadjusted earning contribution during the quarter was C\$7m which is higher than Q4 2009 earnings of C\$5m. REVPAR slightly increased to C\$70.76 from C\$68.87 for the comparable period last year. Additionally, the occupancy rate of the Real Estate Division was down at 94.5% versus last year's 96.2%.

**Corporate**

Corporate expenses decreased to C\$18 million in Q4 2010 from C\$19m in Q4 2009.

**Outlook**

We continue to believe investor, whether existing or prospective, should consider several major issues, including (a) funding organic growth; (b) rising returns; and, (c) acquisition trail. Each of these issues is addressed below.

**Funding organic growth**

In the most recent quarter the company's reported capital expenditures totaled C\$370 million, of which C\$288 million was spent at regulated utilities. Fortis guided that capital expenditures for 2011 will be roughly C\$1.2 billion. A majority of the total will be spent on Western Canadian assets (Terasen Gas, FortisAlberta, and FortisBC). The company's expectations continue to be for consolidated gross capital expenditures over 5 years (2011-2015) approaching C\$5.5bn with 63% of that total amount being allocated to regulated utilities. Both FortisAlberta and FortisBC will receive the vast majority of that amount; whereas, the regulated gas utilities are planned to receive 20% of the total capex amount, and 17% is allocated to non-regulated operations. Given the regulated rates of return with utility capital expenditures, the increases should be viewed as longer-term positives provided an appropriate financial balance is struck.

Ongoing organic growth

With the significant current relative valuation advantages, we believe that Fortis may become more motivated to explore possible capital efficiency initiatives. In our view, the company possesses ample opportunities to become much more capital efficient. One strategy involves divesting certain non-utility assets and redeploying capital into utility assets or funding the capital program. Another option would entail divesting partial interests in selected utility assets in an asset management model approach and receiving a management fee.

In fact, some of the media reports prior to the official announcement of PPL Corporation's acquisition of E.ON's Kentucky utility assets for US\$7.625 billion stated that a consortium led by Fortis Inc. was one of three finalists for those assets. We would regard that type of information in media reports as being something akin to an asset management style of approach. Ultimately, we believe that such a strategy would help Fortis generate a higher level of returns. Additionally, the use of an asset management type approach would make large acquisitions which could potentially further accelerate growth.

Opportunities for improved capital efficiency

Generally, we continue to prefer pure-play utility companies without an undue amount of non-core asset exposure. Historically, non-core assets (especially real estate) have been somewhat commonplace for many utilities. Fortis has been no exception to that approach.

Notably, the mix of commercial and hospitality real estate assets held by Fortis have been positive contributors and also provide the company a bit of financial flexibility for a selection of reasons. In light of current market conditions, we believe there is a much less compelling case for the monetization of these assets than as in the past. We note Fortis Properties continues to increase in scale and scope which may eventually make it more attractive for acquisition or monetization. Yet, for a number of reasons, we continue to believe there is a rather low probability of either of those events occurring.

Even discounting the potential monetization of assets that we would consider to be non-core, we believe Fortis possesses considerable potential to become much more capital efficient. Given the significant interest in infrastructure assets by many investors seeking long-dated types of return, Fortis could easily divest portions of its existing asset base to pension fund investors and charge a management fee for their operational and management expertise. This type of approach could significantly improve capital efficiency and returns on capital. In addition, this asset management approach could also free-up capital that could be used to fund the existing capital program or fund future acquisitions.

Capital efficiency initiatives could aid funding of acquisitions or the existing capital program funding

### Rising returns

Positively, Fortis has been successful in obtaining several favourable regulatory decisions. For example, the allowed equity at Terasen Gas Inc. (TGI) was boosted from 35% to 40% effective January 1, 2010. In addition to that positive move for the equity base, the allowed return on equity for TGI increased from 8.47% to 9.50%. In a related judgment, Terasen Gas (Vancouver Island) Inc. (TGV) and Terasen Gas Whistler Inc. (TGW) returns increased from 9.17% to 10%. Additionally, the British Columbia Utilities Commission (BCUC) held the former automatic adjustment mechanism for annual ROE determination would no longer apply. Also in BC, FortisBC obtained an increased allowed ROE from 8.87% to 9.90% that became effective on January 1, 2010. The upward bias in utility returns should be viewed positively. Clearly, many questions exist as to the methods for determining and predicting future return levels. Yet, we view the regulatory movement away from a very mechanical return approach work as a notable positive that should help ensure an appropriate level of returns over a period of time.

Similar to the BCUC, the Alberta Utilities Commission (AUC) issued a decision on the 2009 Generic Cost of Capital establishing a 9% ROE for utilities like FortisAlberta in 2009 and 2010. Under the previous formulaic approach, that utility would have been entitled to an 8.61% return. Moreover, the allowed equity within the regulated capital structure moved from 37% to 41% effective January 1, 2009. Notably, this return framework will be in effect for 2011 providing a level of certainty to FortisAlberta's future earnings.

Unfortunately, not every jurisdiction is proving to be as progressive as Alberta, BC and the National Energy Board regulated Trans-Quebec & Maritimes Pipeline decision (see file RH-1-2008 and our March 19, 2009 note "*Regulatory round-up*"). The Newfoundland and Labrador Board of Commissioners of Public Utilities (PUB) most recent decision increased the allowed ROE for Newfoundland Power from 8.95% in 2009 to 9% in 2010. Additionally, in the past, the PUB ordered Newfoundland Power's allowed ROEs for 2011 and 2012 would be determined by an automated formula that will be subject to review in Q1 2010. We do not need to belabour all of the regulatory developments, however, we note that returns are slowly biasing to the upside. The only challenge with the upward bias is that it comes at a time of potentially rising interest rates.

### Acquisition trail

In our view, Fortis continues to demonstrate a rather impressive ability to successfully integrate acquisitions. Additionally, we view acquisitions as somewhat central to the company's growth strategy. For instance, the company's most recent Management Discussion and Analysis stated "We will continue to pursue acquisitions of regulated electric and natural gas utilities in the United States and Canada that will add value for our shareholders". Given the success of Fortis in past transactions, as measured in terms of financials, share price and operationally, we believe the company's current valuation and

skill set may lead to some potentially value creating acquisition activity (see Exhibit 10 below for select Fortis M&A transactions).

#### Exhibit 10: Selected Fortis M&A transactions

\$ in millions, unless otherwise stated

Announced Date	Asset/Company	Deal value (\$m)	Comment
7/22/2009	Caribbean Utilities Co.	CAD 6.74	Acquired an additional 2.7% of Caribbean Utilities Co.
6/23/2009	Great Lakes Power Distribution	CAD 68.00	Acquired from Brookfield the utility that serves the District of Algoma in northern Ontario.
10/1/2008	Grimsbey Power Inc.	CAD 1.10	Acquired a 10% minority interest.
10/1/2008	Caribbean Utilities Co.	CAD 3.00	Acquired an additional 1% of Caribbean Utilities Co.
8/15/2008	Caribbean Utilities Co.	CAD 25.00	Acquired an additional 2% of Caribbean Utilities Co.
7/23/2007	Delta Regina	CAD 49.95	Delta hotel located in Regina, Saskatchewan.
2/26/2007	Terasen Inc.	CAD 3,700.00	Gas distribution in British Columbia.
11/7/2006	Caribbean Utilities Co.	CAD 55.70	Acquired an additional 16% of Caribbean Utilities Co.
10/19/2006	4 hotels in western Canada	CAD 51.60	4 hotels (Holiday Inn, Best Western and Ramada) located in BC and Alberta.
8/28/2006	PPC Ltd & Atlantic Equipment & Power (Turks & Caicos) Ltd.	CAD 97.70	Electric utility that services ~80% of the Turks and Caicos Islands.
1/25/2005	3 hotels in western Canada	CAD 62.60	3 hotels in Western Canada from Greenwood Inns (Calgary, Edmonton and Winnipeg).
12/15/2004	Princeton Light & Power	CAD 3.70	PLP is an electric utility that services Princeton, BC.
5/21/2004	Belize Electric Company Ltd.	USD 3.50	Acquired the remaining 5% interest of the company.
9/17/2003	4 hotels in Ontario	CAD 43.20	4 hotels located in Ontario (Cambridge, Kitchener, Sarnia and Peterborough).
9/15/2003	Alberta Utility & British Columbia Utility (from Aquila)	CAD 1,500.00	BC and Alberta units of Aquila Inc.
2/26/2003	Granite Power Corp	CAD 8.80	Company consist of Granite Power Distribution & Granite Power Generation.
1/30/2003	Caribbean Utilities Co.	CAD 71.00	Acquired additional 3,863,695 Class A Ordinary Shares, representing approximately 15.9 per cent of the outstanding shares of the company and increased Fortis' holding to roughly 38%.
12/1/2002	Delta St John's Hotel and conference centre	CAD 25.90	Hotel in downtown St. John's, Newfoundland
5/9/2002	Cornwall Street Railway Light	CAD 67.70	City of Cornwall electric transmission & distribution utility.
4/16/2002	Kings Place	CAD 27.70	Commercial property in Fredericton, NB.
3/13/2002	Caribbean Utilities Co.	CAD 12.90	Acquired additional ~2% of the company.
3/20/2002	Niagara Power Co.	CAD 49.00	Purchase remaining 50% of Niagara Power Co.
2/1/2002	Cabot palace I	CAD 14.30	133,327 Square feet premium office tower in St. John's, Newfoundland
9/18/2001	Portfolio of properties in St. John's	CAD 8.30	Purchased TD Place commercial bldg and 6 parcels of land.
9/14/2001	Aliant Poles	CAD 46.00	Purchased 102,000 poles and related infrastructure from Aliant Telecom.
1/26/2001	Belize Electric Company Ltd.	USD 62.00	Acquired 95% of company from Duke Energy.
12/19/2000	2 Hydro generating stations	CAD 6.90	2 generating stations (6.88MW) in upper New York state.
12/14/2000	Brunswick Square Ltd.	CAD 6.20	Acquired 50% of the company Fortis doesn't own.
12/1/2000	Fort William Building and Blue cross centre	CAD 52.70	Fort William building in St. John's, Newfoundland and Blue cross centre in Moncton, New Brunswick.
2/23/2000	Caribbean Utilities Co.	CAD 79.90	Acquired 20% of the company.
12/30/1999	2 Hydro generating stations	CAD 19.77	2 generating stations (16MW) in upper New York state (Moose River & Philadelphia)
10/28/1999	Belize Electricity Ltd.	CAD 36.80	Acquired 67% interest in the main commercial generator, transmitter & distributor of electricity in Belize.
8/31/1999	Brunswick Square Ltd.	CAD 10.12	Acquired 50% of the company by Fortis Properties.
1/31/1999	Mount Peyton	CAD 2.20	Acquired all common shares and notes payable.
	Total USD	USD 65.50	
	Total CAD	CAD 6,214.48	

Source: Bloomberg, Company data and Credit Suisse

In terms of acquisitions, we believe Fortis has a few advantages over others, including:

- Fortis has growing expertise with both electric and gas utilities;
- Larger size will allow it to look at a larger spectrum of potential target companies;
- A proven ability to effectively integrate acquisitions;
- A rather strong appetite for yield oriented securities in Canada;
- The potential ability to support a transaction with pension fund capital;
- Canada's rather benign interest rate environment; and,
- Bought deal financing commonly employed in Canada.

Fortis possesses a number of absolute and relative advantages over some other competitors

Historically, Fortis has been very adept at acquisitions. Corporate growth has benefited from the company's ability to successfully acquire and integrate selected assets. Capital market conditions are demonstrating signs of improved functioning. Therefore, the typical Fortis acquisition strategy is more palatable in current capital markets. For greater details, please refer to our 6 August 2009 note entitled "Pondering a Portland purchase?"

## Valuation

We continue to believe that Fortis has strong organic growth in key areas such as British Columbia, Alberta and the Caribbean. In our view, the company faces a delicate balance of capital investment opportunities and cash flow needs. From our perspective, the next big catalysts for the stock will likely revolve around capital efficiency initiatives or a large scale acquisition which will always lack predictability. At this time, we made several

Rating: Neutral

Target: C\$34, up from C\$32

adjustments to our financial model. As a result of the quarter, we slightly revised our EPS estimates for 2011 and 2012 to C\$1.76 and C\$1.86 from C\$1.79 and C\$1.87, respectively. Given the current interest rate environment and looking ahead to 2012 estimates, we boosted our target price to C\$34.00 from the previous C\$32.00. That target price is obtained from multiple valuation approaches, including: an 18.5x P/E multiple of 2012 earnings; a 1.8x book value multiple; and, a DCF based valuation. We reiterate our Neutral rating.

## Disclosure Appendix

### Important Global Disclosures

I, Andrew M. Kuske, certify that (1) the views expressed in this report accurately reflect my personal views about all of the subject companies and securities and (2) no part of my compensation was, is or will be directly or indirectly related to the specific recommendations or views expressed in this report.

See the Companies Mentioned section for full company names.

### 3-Year Price, Target Price and Rating Change History Chart for FTS.TO

The analyst(s) responsible for preparing this research report received compensation that is based upon various factors including Credit Suisse's total revenues, a portion of which are generated by Credit Suisse's investment banking activities.

### Analysts' stock ratings are defined as follows:

**Outperform (O):** The stock's total return is expected to outperform the relevant benchmark\* by at least 10-15% (or more, depending on perceived risk) over the next 12 months.

**Neutral (N):** The stock's total return is expected to be in line with the relevant benchmark\* (range of  $\pm 10-15\%$ ) over the next 12 months.

**Underperform (U):** The stock's total return is expected to underperform the relevant benchmark\* by 10-15% or more over the next 12 months.

\*Relevant benchmark by region: As of 29<sup>th</sup> May 2009, Australia, New Zealand, U.S. and Canadian ratings are based on (1) a stock's absolute total return potential to its current share price and (2) the relative attractiveness of a stock's total return potential within an analyst's coverage universe\*\*, with Outperforms representing the most attractive, Neutrals the less attractive, and Underperforms the least attractive investment opportunities. Some U.S. and Canadian ratings may fall outside the absolute total return ranges defined above, depending on market conditions and industry factors. For Latin American, Japanese, and non-Japan Asia stocks, ratings are based on a stock's total return relative to the average total return of the relevant country or regional benchmark; for European stocks, ratings are based on a stock's total return relative to the analyst's coverage universe\*\*. For Australian and New Zealand stocks a 22% and a 12% threshold replace the 10-15% level in the Outperform and Underperform stock rating definitions, respectively, subject to analysts' perceived risk. The 22% and 12% thresholds replace the +10-15% and -10-15% levels in the Neutral stock rating definition, respectively, subject to analysts' perceived risk.

\*\*An analyst's coverage universe consists of all companies covered by the analyst within the relevant sector.

**Restricted (R):** In certain circumstances, Credit Suisse policy and/or applicable law and regulations preclude certain types of communications, including an investment recommendation, during the course of Credit Suisse's engagement in an investment banking transaction and in certain other circumstances.

**Volatility Indicator [V]:** A stock is defined as volatile if the stock price has moved up or down by 20% or more in a month in at least 8 of the past 24 months or the analyst expects significant volatility going forward.

**Analysts' coverage universe weightings are distinct from analysts' stock ratings and are based on the expected performance of an analyst's coverage universe\* versus the relevant broad market benchmark\*\*:**

**Overweight:** Industry expected to outperform the relevant broad market benchmark over the next 12 months.

**Market Weight:** Industry expected to perform in-line with the relevant broad market benchmark over the next 12 months.

**Underweight:** Industry expected to underperform the relevant broad market benchmark over the next 12 months.

\*An analyst's coverage universe consists of all companies covered by the analyst within the relevant sector.

\*\*The broad market benchmark is based on the expected return of the local market index (e.g., the S&P 500 in the U.S.) over the next 12 months.

#### Credit Suisse's distribution of stock ratings (and banking clients) is:

	Global Ratings Distribution	
<b>Outperform/Buy*</b>	45%	(62% banking clients)
<b>Neutral/Hold*</b>	41%	(59% banking clients)
<b>Underperform/Sell*</b>	11%	(54% banking clients)
<b>Restricted</b>	2%	

\*For purposes of the NYSE and NASD ratings distribution disclosure requirements, our stock ratings of Outperform, Neutral, and Underperform most closely correspond to Buy, Hold, and Sell, respectively; however, the meanings are not the same, as our stock ratings are determined on a relative basis. (Please refer to definitions above.) An investor's decision to buy or sell a security should be based on investment objectives, current holdings, and other individual factors.

See the Companies Mentioned section for full company names.

**Price Target:** (12 months) for (FTS.TO)

**Method:** We obtain our C\$34.00 target price for Fortis Inc. by using multiple valuation methodologies, yield base analysis, and discounted cash flow, all of which produce the C\$34.00 target. Our target price implies a P/E (price/earnings) multiple of 18.5x our 2012 EPS (earnings per share) estimate of C\$1.86 and an EV/EBITDA (enterprise value/earnings before interest, taxes, depreciation, and amortization) multiple of 10.0x our EBITDA estimate.

**Risks:** There are a number of risks to Fortis' achievement of our C\$34.00 target price: commodity prices; weather; environmental; regulatory; access to capital markets; and, interest rates. Moreover, one should never underestimate the power of the regulator in any regulated business.

Please refer to the firm's disclosure website at [www.credit-suisse.com/researchdisclosures](http://www.credit-suisse.com/researchdisclosures) for the definitions of abbreviations typically used in the target price method and risk sections.

See the Companies Mentioned section for full company names.

The subject company (FTS.TO) currently is, or was during the 12-month period preceding the date of distribution of this report, a client of Credit Suisse.

Credit Suisse provided investment banking services to the subject company (FTS.TO) within the past 12 months.

Credit Suisse provided non-investment banking services, which may include Sales and Trading services, to the subject company (FTS.TO) within the past 12 months.

Credit Suisse expects to receive or intends to seek investment banking related compensation from the subject company (FTS.TO) within the next 3 months.

Credit Suisse has received compensation for products and services other than investment banking services from the subject company (FTS.TO) within the past 12 months.

#### Important Regional Disclosures

Singapore recipients should contact a Singapore financial adviser for any matters arising from this research report.

An analyst involved in the preparation of this report has visited certain material operations of the subject company (FTS.TO) within the past 12 months. The analyst may not have visited all material operations of the subject company. The travel expenses of the analyst in connection with such visits were not paid or reimbursed by the subject company, other than de minimus local travel expenses.

Restrictions on certain Canadian securities are indicated by the following abbreviations: NVS--Non-Voting shares; RVS--Restricted Voting Shares; SVS--Subordinate Voting Shares.

Individuals receiving this report from a Canadian investment dealer that is not affiliated with Credit Suisse should be advised that this report may not contain regulatory disclosures the non-affiliated Canadian investment dealer would be required to make if this were its own report.

For Credit Suisse Securities (Canada), Inc.'s policies and procedures regarding the dissemination of equity research, please visit [http://www.csfb.com/legal\\_terms/canada\\_research\\_policy.shtml](http://www.csfb.com/legal_terms/canada_research_policy.shtml).

As of the date of this report, Credit Suisse acts as a market maker or liquidity provider in the equities securities that are the subject of this report.

Principal is not guaranteed in the case of equities because equity prices are variable.

Commission is the commission rate or the amount agreed with a customer when setting up an account or at anytime after that.

CS may have issued a Trade Alert regarding this security. Trade Alerts are short term trading opportunities identified by an analyst on the basis of market events and catalysts, while stock ratings reflect an analyst's investment recommendations based on expected total return over a 12-month period relative to the relevant coverage universe. Because Trade Alerts and stock ratings reflect different assumptions and analytical methods, Trade Alerts may differ directionally from the analyst's stock rating.

The author(s) of this report maintains a CS Model Portfolio that he/she regularly adjusts. The security or securities discussed in this report may be a component of the CS Model Portfolio and subject to such adjustments (which, given the composition of the CS Model Portfolio as a whole, may differ from the recommendation in this report, as well as opportunities or strategies identified in Trading Alerts concerning the same security). The CS Model Portfolio and important disclosures about it are available at [www.credit-suisse.com/ti](http://www.credit-suisse.com/ti).

To the extent this is a report authored in whole or in part by a non-U.S. analyst and is made available in the U.S., the following are important disclosures regarding any non-U.S. analyst contributors:

The non-U.S. research analysts listed below (if any) are not registered/qualified as research analysts with FINRA. The non-U.S. research analysts listed below may not be associated persons of CSSU and therefore may not be subject to the NASD Rule 2711 and NYSE Rule 472 restrictions on communications with a subject company, public appearances and trading securities held by a research analyst account.

- Andrew M. Kuske, non-U.S. analyst, is a research analyst employed by Credit Suisse Securities (Canada), Inc..
- Paul Tan, non-U.S. analyst, is a research analyst employed by Credit Suisse Securities (Canada), Inc..

Where this research report is about a non-Taiwanese company, written by a Taiwan-based analyst, it is not a recommendation to buy or sell securities

Disclaimers continue on next page.

This report is not directed to, or intended for distribution to or use by, any person or entity who is a citizen or resident of or located in any locality, state, country or other jurisdiction where such distribution, publication, availability or use would be contrary to law or regulation or which would subject Credit Suisse AG, the Swiss bank, or its subsidiaries or its affiliates ("CS") to any registration or licensing requirement within such jurisdiction. All material presented in this report, unless specifically indicated otherwise, is under copyright to CS. None of the material, nor its content, nor any copy of it, may be altered in any way, transmitted to, copied or distributed to any other party, without the prior express written permission of CS. All trademarks, service marks and logos used in this report are trademarks or service marks or registered trademarks or service marks of CS or its affiliates.

The information, tools and material presented in this report are provided to you for information purposes only and are not to be used or considered as an offer or the solicitation of an offer to sell or to buy or subscribe for securities or other financial instruments. CS may not have taken any steps to ensure that the securities referred to in this report are suitable for any particular investor. CS will not treat recipients as its customers by virtue of their receiving the report. The investments or services contained or referred to in this report may not be suitable for you and it is recommended that you consult an independent investment advisor if you are in doubt about such investments or investment services. Nothing in this report constitutes investment, legal, accounting or tax advice or a representation that any investment or strategy is suitable or appropriate to your individual circumstances or otherwise constitutes a personal recommendation to you. CS does not offer advice on the tax consequences of investment and you are advised to contact an independent tax adviser. Please note in particular that the bases and levels of taxation may change.

CS believes the information and opinions in the Disclosure Appendix of this report are accurate and complete. Information and opinions presented in the other sections of the report were obtained or derived from sources CS believes are reliable, but CS makes no representations as to their accuracy or completeness. Additional information is available upon request. CS accepts no liability for loss arising from the use of the material presented in this report, except that this exclusion of liability does not apply to the extent that liability arises under specific statutes or regulations applicable to CS. This report is not to be relied upon in substitution for the exercise of independent judgment. CS may have issued, and may in the future issue, a trading call regarding this security. Trading calls are short term trading opportunities based on market events and catalysts, while stock ratings reflect investment recommendations based on expected total return over a 12-month period as defined in the disclosure section. Because trading calls and stock ratings reflect different assumptions and analytical methods, trading calls may differ directionally from the stock rating. In addition, CS may have issued, and may in the future issue, other reports that are inconsistent with, and reach different conclusions from, the information presented in this report. Those reports reflect the different assumptions, views and analytical methods of the analysts who prepared them and CS is under no obligation to ensure that such other reports are brought to the attention of any recipient of this report. CS is involved in many businesses that relate to companies mentioned in this report. These businesses include specialized trading, risk arbitrage, market making, and other proprietary trading.

Past performance should not be taken as an indication or guarantee of future performance, and no representation or warranty, express or implied, is made regarding future performance. Information, opinions and estimates contained in this report reflect a judgement at its original date of publication by CS and are subject to change without notice. The price, value of and income from any of the securities or financial instruments mentioned in this report can fall as well as rise. The value of securities and financial instruments is subject to exchange rate fluctuation that may have a positive or adverse effect on the price or income of such securities or financial instruments. Investors in securities such as ADR's, the values of which are influenced by currency volatility, effectively assume this risk.

Structured securities are complex instruments, typically involve a high degree of risk and are intended for sale only to sophisticated investors who are capable of understanding and assuming the risks involved. The market value of any structured security may be affected by changes in economic, financial and political factors (including, but not limited to, spot and forward interest and exchange rates), time to maturity, market conditions and volatility, and the credit quality of any issuer or reference issuer. Any investor interested in purchasing a structured product should conduct their own investigation and analysis of the product and consult with their own professional advisers as to the risks involved in making such a purchase.

Some investments discussed in this report have a high level of volatility. High volatility investments may experience sudden and large falls in their value causing losses when that investment is realised. Those losses may equal your original investment. Indeed, in the case of some investments the potential losses may exceed the amount of initial investment, in such circumstances you may be required to pay more money to support those losses. Income yields from investments may fluctuate and, in consequence, initial capital paid to make the investment may be used as part of that income yield. Some investments may not be readily realisable and it may be difficult to sell or realise those investments, similarly it may prove difficult for you to obtain reliable information about the value, or risks, to which such an investment is exposed.

This report may provide the addresses of, or contain hyperlinks to, websites. Except to the extent to which the report refers to website material of CS, CS has not reviewed the linked site and takes no responsibility for the content contained therein. Such address or hyperlink (including addresses or hyperlinks to CS's own website material) is provided solely for your convenience and information and the content of the linked site does not in any way form part of this document. Accessing such website or following such link through this report or CS's website shall be at your own risk.

This report is issued and distributed in Europe (except Switzerland) by Credit Suisse Securities (Europe) Limited, One Cabot Square, London E14 4QJ, England, which is regulated in the United Kingdom by The Financial Services Authority ("FSA"). This report is being distributed in Germany by Credit Suisse Securities (Europe) Limited Niederlassung Frankfurt am Main regulated by the Bundesanstalt fuer Finanzdienstleistungsaufsicht ("BaFin"). This report is being distributed in the United States by Credit Suisse Securities (USA) LLC ; in Switzerland by Credit Suisse AG; in Canada by Credit Suisse Securities (Canada), Inc.; in Brazil by Banco de Investimentos Credit Suisse (Brasil) S.A. or its affiliates; in Mexico by Banco Credit Suisse (México), S.A. (transactions related to the securities mentioned in this report will only be effected in compliance with applicable regulation); in Japan by Credit Suisse Securities (Japan) Limited, Financial Instrument Firm, Director-General of Kanto Local Finance Bureau (Kinsho) No. 66, a member of Japan Securities Dealers Association, The Financial Futures Association of Japan, Japan Securities Investment Advisers Association; elsewhere in Asia/Pacific by whichever of the following is the appropriately authorised entity in the relevant jurisdiction: Credit Suisse (Hong Kong) Limited, Credit Suisse Equities (Australia) Limited, Credit Suisse Securities (Thailand) Limited, Credit Suisse Securities (Malaysia) Sdn Bhd, Credit Suisse AG, Singapore Branch, Credit Suisse Securities (India) Private Limited, Credit Suisse Securities (Europe) Limited, Seoul Branch, Credit Suisse AG, Taipei Securities Branch, PT Credit Suisse Securities Indonesia, and elsewhere in the world by the relevant authorised affiliate of the above. Research on Taiwanese securities produced by Credit Suisse AG, Taipei Securities Branch has been prepared by a registered Senior Business Person. Research provided to residents of Malaysia is authorised by the Head of Research for Credit Suisse Securities (Malaysia) Sdn. Bhd., to whom they should direct any queries on +603 2723 2020.

In jurisdictions where CS is not already registered or licensed to trade in securities, transactions will only be effected in accordance with applicable securities legislation, which will vary from jurisdiction to jurisdiction and may require that the trade be made in accordance with applicable exemptions from registration or licensing requirements. Non-U.S. customers wishing to effect a transaction should contact a CS entity in their local jurisdiction unless governing law permits otherwise. U.S. customers wishing to effect a transaction should do so only by contacting a representative at Credit Suisse Securities (USA) LLC in the U.S.

Please note that this report was originally prepared and issued by CS for distribution to their market professional and institutional investor customers. Recipients who are not market professional or institutional investor customers of CS should seek the advice of their independent financial advisor prior to taking any investment decision based on this report or for any necessary explanation of its contents. This research may relate to investments or services of a person outside of the UK or to other matters which are not regulated by the FSA or in respect of which the protections of the FSA for private customers and/or the UK compensation scheme may not be available, and further details as to where this may be the case are available upon request in respect of this report.

### PRE RESULTS COMMENT

## Q1 earnings preview

- **Earnings revisions:** For several reasons, we made a number of revisions to our Fortis Inc. financial model. Our changes focused on several areas ahead of the forthcoming Q1 results. Specifically, our Q1 EPS estimate decreased from C\$0.70 to C\$0.64. Our full year EPS is unchanged at C\$1.76. For greater details, please refer to our Canadian Infrastructure Q1 2011 earnings preview entitled "*Starting the season: Q1 earnings preview*" (21 April 2011).

### Share price performance

## Disclosure Appendix

### Important Global Disclosures

I, Andrew M. Kuske, certify that (1) the views expressed in this report accurately reflect my personal views about all of the subject companies and securities and (2) no part of my compensation was, is or will be directly or indirectly related to the specific recommendations or views expressed in this report.

See the Companies Mentioned section for full company names.

### 3-Year Price, Target Price and Rating Change History Chart for FTS.TO

The analyst(s) responsible for preparing this research report received compensation that is based upon various factors including Credit Suisse's total revenues, a portion of which are generated by Credit Suisse's investment banking activities.

### Analysts' stock ratings are defined as follows:

**Outperform (O):** The stock's total return is expected to outperform the relevant benchmark\* by at least 10-15% (or more, depending on perceived risk) over the next 12 months.

**Neutral (N):** The stock's total return is expected to be in line with the relevant benchmark\* (range of  $\pm 10-15\%$ ) over the next 12 months.

**Underperform (U):** The stock's total return is expected to underperform the relevant benchmark\* by 10-15% or more over the next 12 months.

\*Relevant benchmark by region: As of 29<sup>th</sup> May 2009, Australia, New Zealand, U.S. and Canadian ratings are based on (1) a stock's absolute total return potential to its current share price and (2) the relative attractiveness of a stock's total return potential within an analyst's coverage universe\*\*, with Outperforms representing the most attractive, Neutrals the less attractive, and Underperforms the least attractive investment opportunities. Some U.S. and Canadian ratings may fall outside the absolute total return ranges defined above, depending on market conditions and industry factors. For Latin American, Japanese, and non-Japan Asia stocks, ratings are based on a stock's total return relative to the average total return of the relevant country or regional benchmark; for European stocks, ratings are based on a stock's total return relative to the analyst's coverage universe\*\*. For Australian and New Zealand stocks a 22% and a 12% threshold replace the 10-15% level in the Outperform and Underperform stock rating definitions, respectively, subject to analysts' perceived risk. The 22% and 12% thresholds replace the +10-15% and -10-15% levels in the Neutral stock rating definition, respectively, subject to analysts' perceived risk.

\*\*An analyst's coverage universe consists of all companies covered by the analyst within the relevant sector.

**Restricted (R):** In certain circumstances, Credit Suisse policy and/or applicable law and regulations preclude certain types of communications, including an investment recommendation, during the course of Credit Suisse's engagement in an investment banking transaction and in certain other circumstances.

**Volatility Indicator [V]:** A stock is defined as volatile if the stock price has moved up or down by 20% or more in a month in at least 8 of the past 24 months or the analyst expects significant volatility going forward.

### Analysts' coverage universe weightings are distinct from analysts' stock ratings and are based on the expected performance of an analyst's coverage universe\* versus the relevant broad market benchmark\*\*:

**Overweight:** Industry expected to outperform the relevant broad market benchmark over the next 12 months.

**Market Weight:** Industry expected to perform in-line with the relevant broad market benchmark over the next 12 months.

**Underweight:** Industry expected to underperform the relevant broad market benchmark over the next 12 months.

\*An analyst's coverage universe consists of all companies covered by the analyst within the relevant sector.

\*\*The broad market benchmark is based on the expected return of the local market index (e.g., the S&P 500 in the U.S.) over the next 12 months.

**Credit Suisse's distribution of stock ratings (and banking clients) is:**

Global Ratings Distribution		
<b>Outperform/Buy*</b>	47%	(63% banking clients)
<b>Neutral/Hold*</b>	41%	(58% banking clients)
<b>Underperform/Sell*</b>	11%	(51% banking clients)
<b>Restricted</b>	2%	

\*For purposes of the NYSE and NASD ratings distribution disclosure requirements, our stock ratings of Outperform, Neutral, and Underperform most closely correspond to Buy, Hold, and Sell, respectively; however, the meanings are not the same, as our stock ratings are determined on a relative basis. (Please refer to definitions above.) An investor's decision to buy or sell a security should be based on investment objectives, current holdings, and other individual factors.

Credit Suisse's policy is to update research reports as it deems appropriate, based on developments with the subject company, the sector or the market that may have a material impact on the research views or opinions stated herein.

Credit Suisse's policy is only to publish investment research that is impartial, independent, clear, fair and not misleading. Those reports reflect the different assumptions, views and analytical methods of the analysts who prepared them and CS is under no obligation to ensure that such other reports are brought to the attention of any recipient of this report. CS is involved in many businesses that relate to companies mentioned in this report. These businesses include specialized trading, risk arbitrage, market making, and other proprietary trading.

Past performance should not be taken as an indication or guarantee of future performance, and no representation or warranty, express or implied, is made regarding future performance. Information, opinions and estimates contained in this report reflect a judgement at its original date of publication by CS and are subject to change without notice. The price, value of and income from any of the securities or financial instruments mentioned in this report can fall as well as rise. The value of securities and financial instruments is subject to exchange rate fluctuation that may have a positive or adverse effect on the price or income of such securities or financial instruments. Investors in securities such as ADR's, the values of which are influenced by currency volatility, effectively assume this risk.

Structured securities are complex instruments, typically involve a high degree of risk and are intended for sale only to sophisticated investors who are capable of understanding and assuming the risks involved. The market value of any structured security may be affected by changes in economic, financial and political factors (including, but not limited to, spot and forward interest and exchange rates), time to maturity, market conditions and volatility, and the credit quality of any issuer or reference issuer. Any investor interested in purchasing a structured product should conduct their own investigation and analysis of the product and consult with their own professional advisers as to the risks involved in making such a purchase.

Some investments discussed in this report have a high level of volatility. High volatility investments may experience sudden and large falls in their value causing losses when that investment is realised. Those losses may equal your original investment. Indeed, in the case of some investments the potential losses may exceed the amount of initial investment, in such circumstances you may be required to pay more money to support those losses. Income yields from investments may fluctuate and, in consequence, initial capital paid to make the investment may be used as part of that income yield. Some investments may not be readily realisable and it may be difficult to sell or realise those investments, similarly it may prove difficult for you to obtain reliable information about the value, or risks, to which such an investment is exposed.

## Working the western front

- **Earnings review:** Fortis reported Q1 2011 headline EPS (FD) of C\$0.65 beating our C\$0.64 estimate, the Street's C\$0.624 view and exceeding the C\$0.59-C\$0.64 range. In general, we believe Fortis continues to make steady progress in delivering relatively consistent financial results from a largely regulated asset base. We do not place undue emphasis on quarterly results in much of our universe as a result of the inherently long-cycle nature of many assets. For Fortis, we continue to focus on the ongoing significant regulated capital plan along with the potentially positive upward bias to regulated returns.
- **Significant organic growth continues:** As expected, Fortis continued to provide a robust outlook for its utility capital program. The company expects consolidated gross capital expenditures to be roughly C\$1.2bn for 2011 and about C\$5.5bn over the next five years with 83% of that total amount going to utility activity.
- **Improving capital market conditions:** Historically, Fortis has been very adept at acquisitions. Corporate growth has benefited from the company's ability to successfully acquire and integrate selected assets. In our view, the company is well positioned in the current market for acquisition opportunities.
- **Valuation:** Our C\$34 target price and Neutral rating are obtained utilizing multiple valuation approaches, including: an 18.5x P/E multiple of 2012 earnings; a 1.8x book value multiple; and, a DCF based valuation. We reiterate our Neutral rating.

Fortis reported Q1 2011 headline EPS (FD) of C\$0.65 beating our C\$0.64 estimate, the Street's C\$0.624 view and exceeding the C\$0.59-C\$0.64 range. In general, we believe Fortis continues to make steady progress in delivering relatively consistent financial results from a largely regulated asset base. For Fortis, we continue to focus on the ongoing significant regulated capital plan along with the potentially positive upward bias to regulated returns. This research note is divided into three parts: (a) results; (b) outlook; and, (c) valuation. Each of these areas will be addressed in greater detail below.

A modest beat

## Results

Exhibit 1 highlights the segmented unadjusted earnings contributions for the most recent quarter and for the comparable period one year ago. Our commentary for each segment appears under the various headings below.

### Exhibit 1: Segmented unadjusted earnings contribution

C\$ in millions, unless otherwise stated

	Q1 2011	Q1 2010	chg y/y
Regulated Gas Utilities - Canadian	76	73	4%
Regulated Electric Utilities - Canadian	53	40	33%
Regulated Electric Utilities - Caribbean	4	4	0%
Non-regulated - Fortis Generation	3	2	50%
Non-regulated - Fortis Properties	1	2	-50%
Corporate and other	(20)	(21)	5%
Net earnings applicable to common shares	117	100	17%

Source: Company data and Credit Suisse

### Regulated Gas Utilities - Canadian

The unadjusted earnings for this segment increased by roughly 4% year-over-year (see Exhibit 2). Some notable items for the regulated gas utilities, include:

- Net customer additions were 1,373 during Q1 2011 versus net addition of 1,566 during the Q1 2010;
- The amount of customer additions decreased versus Q1 2010 due to lower building activity; and,
- Sales volumes for the quarter increased for all the segments (Core-Residential and Commercial, the Industrial segment and transportation volumes).

### Exhibit 2: Regulated Gas Utilities (unadjusted)

	Q1 2011	Q1 2010	chg y/y
FortisBC Energy	76.0	73.0	4%

Source: Company data and Credit Suisse

### Regulated Electric Utilities – Canadian

This segment includes operating companies like FortisAlberta, FortisBC Electric, Newfoundland Power and Other Canadian Electric Utilities, which includes Maritime Electric and FortisOntario. Detailed contributions for each of these divisions can be found in Exhibit 3.

**Exhibit 3: Regulated electric utilities – Canadian contribution (unadjusted)***C\$ in millions, unless otherwise stated*

	Q1 2011	Q1 2010	chg y/y
FortisAlberta	21	14	50%
FortisBC Electric	19	14	36%
Newfoundland Power	7	7	0%
Other Cdn Electric Utilities	6	5	20%
Earnings	53	40	33%

*Source: Company data and Credit Suisse***FortisAlberta**

Earnings at this regulated utility were up by roughly 50% comparing Q1 2011 versus the prior period. The increase was primarily due to increase in electricity distribution rates due to continued growth in the system, customer growth and higher volumes due to cooler-than-normal temperatures and increased economic activity in the province. See Exhibit 4 for selected highlights.

Increase in energy delivery  
in Alberta

**Exhibit 4: Selected FortisAlberta performance highlights (unadjusted)**

	Q1 2011	Q1 2010	chg y/y
Energy deliveries (GWh)	4,402	4,109	7%
Revenue (C\$/MWh)	23.40	21.17	11%
Operating expenses (C\$/MWh)	7.95	8.52	-7%
Gross margin (C\$/MWh)	15.45	12.66	22%
Earnings (C\$millions)	21	14	50%

*Source: Company data and Credit Suisse***FortisBC Electric**

Segmented earnings at FortisBC Electric increased by 36% compared to the same period last year. The increase was due to increase in electricity sales growth and rate base growth due to continued investment in utility capital assets. See Exhibit 5 for selected highlights.

Increase in energy  
deliveries in BC

**Exhibit 5: Selected FortisBC Electric performance highlights (unadjusted)**

	Q1 2011	Q1 2010	chg y/y
Energy deliveries (GWh)	905	820	10%
Revenue (C\$/MWh)	91.71	87.80	4%
Energy supply costs (C\$/MWh)	25.41	25.61	-1%
Operating expenses (C\$/MWh)	19.89	20.73	-4%
Gross margin (C\$/MWh)	46.41	41.46	12%
Earnings (C\$millions)	19	14	36%

*Source: Company data and Credit Suisse***Newfoundland Power**

This segment's earnings generation was flat when comparing Q1 2011 versus Q1 2010. Higher electricity sales were offset by timing of certain labour costs in Q1 2011, higher maintenance costs and lower allowed ROE. Energy deliveries were up by approximately 2% (see Exhibit 6).

Slight increase in NP's  
energy deliveries

**Exhibit 6: Selected Newfoundland Power performance highlights (unadjusted)**

	Q1 2011	Q1 2010	chg y/y
Energy deliveries (GWh)	1,834	1,795	2%
Revenue (C\$/MWh)	99.78	99.16	1%
Energy supply costs (C\$/MWh)	73.06	72.98	0%
Operating expenses (C\$/MWh)	10.91	8.91	22%
Gross margin (C\$/MWh)	15.81	17.27	-8%
Earnings (C\$millions)	7	7	0%

Source: Company data, Credit Suisse estimates

**Other Canadian Electric Utilities**

The roughly 3% increase in energy deliveries was primarily the result of higher average consumption due to colder temperatures in Ontario and Prince Edward Island. Exhibit 7 contains selected highlights.

Increase in energy deliveries

**Exhibit 7: Selected Other Canadian Electric Utilities performance highlights (unadjusted)**

	Q1 2011	Q1 2010	chg y/y
Energy deliveries (GWh)	654	632	3%
Revenue (C\$/MWh)	139.14	129.75	7%
Energy supply costs (C\$/MWh)	91.74	83.86	9%
Operating expenses (C\$/MWh)	18.35	17.41	5%
Gross margin (C\$/MWh)	29.05	28.48	2%
Earnings (C\$millions)	6	5	20%

**Regulated Electric Utilities – Caribbean**

This segment includes Belize Electricity, Caribbean Utilities, and Fortis Turks and Caicos. Earnings for this segment were flat when compared the same quarter last year at C\$4m. Energy deliveries were also flat on a year-over-year basis. On the regulatory front, the ongoing situation with Belize Electricity requires a degree of monitoring. In brief, the utility received an adverse regulatory decision relating to a rate application. Moreover, there have been changes to the electricity legislation in Belize that have been challenged by the Fortis-owned utility. The company stated

Awaiting a decision in Belize

“In March 2011 the Supreme Court of Belize dismissed Belize Electricity’s appeal of the regulator’s June 2008 Final Rate Decision. The Company is in the process of filing an appeal of the trial judgment with the Belize Court of Appeal and has filed an application to restrain the regulator from initiating any rate action pending the hearing and determination of the appeal.”

Fortis Turks and Caicos, in March 2011 submitted “its 2010 annual regulatory filing outlining the Company’s performance in 2010.” Fortis “intends to submit a new Rate Variation Application in 2011, which takes into account changes in the utility’s rate base and in the local business and regulatory environment since filing its 2010 application. The 2010 application was not accepted by the Governor of the Turks and Caicos Islands due to concern about the impact a proposed rate increase might have on key sectors of the local economy.”

See Exhibit 8 below for selected highlights.

**Exhibit 8: Caribbean - Regulated Electric Utilities performance highlights (unadjusted)**

	Q1 2011	Q1 2010	chg y/y
Energy deliveries (GWh)	257	256	0%
Revenue (C\$/MWh)	295.72	296.88	0%
Energy supply costs (C\$/MWh)	178.99	175.78	2%
Operating expenses (C\$/MWh)	42.80	46.88	-9%
Gross margin (C\$/MWh)	73.93	74.22	0%
Earnings (C\$millions)	4	4	0%

Source: Company data and Credit Suisse

**Non-regulated – Fortis Generation**

The non-regulated generation assets within this segment are located in Belize, British Columbia, Central Newfoundland, Ontario and Upper New York State. Earnings for the segment were up 50% from the current quarter compared to the same quarter last year. Energy deliveries increased by 13% from Q1 2010 to Q1 2011 due the commissioning of the Vaca hydroelectric facility in Belize in late March 2010. See the table below for selected highlights.

**Exhibit 9: Non-regulated generation – selected highlights**

	Q1 2011	Q1 2010	chg y/y
Energy deliveries (GWh)	76	67	13%
Revenue (C\$/MWh)	92.11	74.63	23%
Energy supply costs (C\$/MWh)	-	-	n/a
Operating expenses (C\$/MWh)	39.47	29.85	32%
Gross margin (C\$/MWh)	52.63	44.78	18%
Earnings (C\$millions)	3	2	50%

Source: Company data and Credit Suisse

**Non-regulated – Fortis Properties**

Fortis Properties' net unadjusted earning contribution during the quarter was C\$1m which is lower than Q1 2010 earnings of C\$2m. REVPAR slightly increased to C\$63.29 from C\$62.93 for the comparable period last year. Additionally, the occupancy rate of the Real Estate Division was down at 94.3% versus last year's 95.8%.

**Corporate**

Corporate expenses decreased to C\$20 million in Q1 2011 from C\$21m in Q4 2009.

**Outlook**

We continue to believe investor, whether existing or prospective, should consider several major issues, including (a) funding organic growth; (b) rising returns; and, (c) acquisition trail. Each of these issues is addressed below.

**Funding organic growth**

In the most recent quarter the company's reported capital expenditures totaled C\$233 million, of which C\$207 million was spent at regulated utilities. Fortis continues to guide that capital expenditures for 2011 will be roughly C\$1.2 billion. A majority of the total will be spent on Western Canadian assets (FortisBC Energy, FortisAlberta, and FortisBC Electric). The company's expectations continue to be for consolidated gross capital expenditures over 5 years (2011-2015) approaching C\$5.5bn with 63% of that total amount being allocated to regulated utilities. Both FortisAlberta and FortisBC Electric will receive the vast majority of that amount; whereas, the regulated gas utilities are planned to receive 20% of the total capex amount, and 17% is allocated to non-regulated operations. Given the regulated rates of return with utility capital expenditures, the increases should be viewed as longer-term positives provided an appropriate financial balance is struck.

Ongoing organic growth

With the significant current relative valuation advantages, we believe that Fortis may become more motivated to explore possible capital efficiency initiatives. In our view, the company possesses ample opportunities to become much more capital efficient. One strategy involves divesting certain non-utility assets and redeploying capital into utility assets or funding the capital program. Another option would entail divesting partial interests in selected utility assets in an asset management model approach and receiving a management fee.

In fact, some of the media reports prior to the official announcement of PPL Corporation's acquisition of E.ON's Kentucky utility assets for US\$7.625 billion stated that a consortium led by Fortis Inc. was one of three finalists for those assets. We would regard that type of information in media reports as being something akin to an asset management style of approach. Ultimately, we believe that such a strategy would help Fortis generate a higher level of returns. Additionally, the use of an asset management type approach would make large acquisitions which could potentially further accelerate growth.

Opportunities for improved capital efficiency

Generally, we continue to prefer pure-play utility companies without an undue amount of non-core asset exposure. Historically, non-core assets (especially real estate) have been somewhat commonplace for many utilities. Fortis has been no exception to that approach. Notably, the mix of commercial and hospitality real estate assets held by Fortis have been positive contributors and also provide the company a bit of financial flexibility for a selection of reasons. In light of current market conditions, we believe there is a much less compelling case for the monetization of these assets than as in the past. We note Fortis Properties continues to increase in scale and scope which may eventually make it more attractive for acquisition or monetization. Yet, for a number of reasons, we continue to believe there is a rather low probability of either of those events occurring.

Even discounting the potential monetization of assets that we would consider to be non-core, we believe Fortis possesses considerable potential to become much more capital efficient. Given the significant interest in infrastructure assets by many investors seeking long-dated types of return, Fortis could easily divest portions of its existing asset base to pension fund investors and charge a management fee for their operational and management expertise. This type of approach could significantly improve capital efficiency and returns on capital. In addition, this asset management approach could also free-up capital that could be used to fund the existing capital program or fund future acquisitions.

Capital efficiency initiatives could aid funding of acquisitions or the existing capital program funding

### Rising returns

Positively, Fortis has been successful in obtaining several favourable regulatory decisions. For example, the allowed equity at Terasen Gas Inc. (TGI) was boosted from 35% to 40% effective January 1, 2010. In addition to that positive move for the equity base, the allowed return on equity for TGI increased from 8.47% to 9.50%. In a related judgment, Terasen Gas (Vancouver Island) Inc. (TGVI) and Terasen Gas Whistler Inc. (TGWI) returns increased from 9.17% to 10%. Additionally, the British Columbia Utilities Commission (BCUC) held the former automatic adjustment mechanism for annual ROE determination would no longer apply. Also in BC, FortisBC obtained an increased allowed ROE from 8.87% to 9.90% that became effective on January 1, 2010. The upward bias in utility returns should be viewed positively. Clearly, many questions exist as to the methods for determining and predicting future return levels. Yet, we view the regulatory movement away from a very mechanical return approach work as a notable positive that should help ensure an appropriate level of returns over a period of time.

Similar to the BCUC, the Alberta Utilities Commission (AUC) issued a decision on the 2009 Generic Cost of Capital establishing a 9% ROE for utilities like FortisAlberta in 2009 and 2010. Under the previous formulaic approach, that utility would have been entitled to an 8.61% return. Moreover, the allowed equity within the regulated capital structure moved from 37% to 41% effective January 1, 2009. Notably, this return framework will be in effect for 2011 providing a level of certainty to FortisAlberta's future earnings.

Unfortunately, not every jurisdiction is proving to be as progressive as Alberta, BC and the National Energy Board in the regulated Trans-Quebec & Maritimes Pipeline decision (see file RH-1-2008 and our March 19, 2009 note "*Regulatory round-up*"). The Newfoundland and Labrador Board of Commissioners of Public Utilities (PUB) most recent decision increased the allowed ROE for Newfoundland Power from 8.95% in 2009 to 9% in 2010. Additionally, in the past, the PUB ordered Newfoundland Power's allowed ROEs for 2011 and 2012 would be determined by an automated formula that will be subject to review in Q1 2010. We do not need to belabour all of the regulatory developments, however, we note that returns are slowly biasing to the upside. The only challenge with the upward bias is that it comes at a time of potentially rising interest rates.

### Acquisition trail

In our view, Fortis continues to demonstrate a rather impressive ability to successfully integrate acquisitions. Additionally, we view acquisitions as somewhat central to the company's growth strategy. For instance, the company's most recent Management Discussion and Analysis stated "We will continue to pursue acquisitions of regulated electric and natural gas utilities in the United States and Canada that will add value for our shareholders". Given the success of Fortis in past transactions, as measured in terms of financials, share price and operationally, we believe the company's current valuation and skill set may lead to some potentially value creating acquisition activity (see Exhibit 10 below for select Fortis M&A transactions).

### Exhibit 10: Selected Fortis M&A transactions

\$ in millions, unless otherwise stated

Announced Date	Asset/Company	Deal value (\$m)	Comment

	Total USD	USD 65.50	
	Total CAD	CAD 6,214.48	

Source: Bloomberg, Company data and Credit Suisse

In terms of acquisitions, we believe Fortis has a few advantages over others, including:

- Fortis has growing expertise with both electric and gas utilities;

- Larger size will allow it to look at a larger spectrum of potential target companies;
- A proven ability to effectively integrate acquisitions;
- A rather strong appetite for yield oriented securities in Canada;
- The potential ability to support a transaction with pension fund capital;
- Canada's rather benign interest rate environment; and,
- Bought deal financing commonly employed in Canada.

Fortis possesses a number of absolute and relative advantages over some other competitors

Historically, Fortis has been very adept at acquisitions. Corporate growth has benefited from the company's ability to successfully acquire and integrate selected assets. Capital market conditions are demonstrating signs of improved functioning. Therefore, the typical Fortis acquisition strategy is more palatable in current capital markets. For greater details, please refer to our 6 August 2009 note entitled "*Pondering a Portland purchase?*"

## Valuation

We continue to believe that Fortis has strong organic growth in key areas such as British Columbia, Alberta and the Caribbean. In our view, the company faces a delicate balance of capital investment opportunities and cash flow needs. From our perspective, the next big catalysts for the stock will likely revolve around capital efficiency initiatives or a large scale acquisition which will always lack predictability. As a result of the quarter, we slightly revised our EPS estimates for 2011 to C\$1.77 from C\$1.76. Our Neutral rating and C\$34.00 target price is obtained from multiple valuation approaches, including: an 18.5x P/E multiple of 2012 earnings; a 1.8x book value multiple; and, a DCF based valuation. We reiterate our Neutral rating.

Rating: Neutral

Target: C\$34

### 3-Year Price, Target Price and Rating Change History Chart for FTS.TO

FTS.TO	Closing Price	Target Price	Initiation/
Date	(C\$)	(C\$)	Rating Assumption
10/24/08	24.75	28	
12/3/08	25.48	27.5	
1/25/10	28.5	30	
11/8/10	33.6	32	
2/10/11	33.81	34	

The analyst(s) responsible for preparing this research report received compensation that is based upon various factors including Credit Suisse's total revenues, a portion of which are generated by Credit Suisse's investment banking activities.

**Analysts' stock ratings are defined as follows:**

**Outperform (O):** The stock's total return is expected to outperform the relevant benchmark\* by at least 10-15% (or more, depending on perceived risk) over the next 12 months.

**Neutral (N):** The stock's total return is expected to be in line with the relevant benchmark\* (range of  $\pm 10-15\%$ ) over the next 12 months.

**Underperform (U):** The stock's total return is expected to underperform the relevant benchmark\* by 10-15% or more over the next 12 months.

*\*Relevant benchmark by region: As of 29<sup>th</sup> May 2009, Australia, New Zealand, U.S. and Canadian ratings are based on (1) a stock's absolute total return potential to its current share price and (2) the relative attractiveness of a stock's total return potential within an analyst's coverage universe\*\*, with Outperforms representing the most attractive, Neutrals the less attractive, and Underperforms the least attractive investment opportunities. Some U.S. and Canadian ratings may fall outside the absolute total return ranges defined above, depending on market conditions and industry factors. For Latin American, Japanese, and non-Japan Asia stocks, ratings are based on a stock's total return relative to the average total return of the relevant country or regional benchmark; for European stocks, ratings are based on a stock's total return relative to the analyst's coverage universe\*\*. For Australian and New Zealand stocks a 22% and a 12% threshold replace the 10-15% level in the Outperform and Underperform stock rating definitions, respectively, subject to analysts' perceived risk. The 22% and 12% thresholds replace the +10-15% and -10-15% levels in the Neutral stock rating definition, respectively, subject to analysts' perceived risk.*

*\*\*An analyst's coverage universe consists of all companies covered by the analyst within the relevant sector.*

**Restricted (R):** In certain circumstances, Credit Suisse policy and/or applicable law and regulations preclude certain types of communications, including an investment recommendation, during the course of Credit Suisse's engagement in an investment banking transaction and in certain other circumstances.

**Volatility Indicator [V]:** A stock is defined as volatile if the stock price has moved up or down by 20% or more in a month in at least 8 of the past 24 months or the analyst expects significant volatility going forward.

**Analysts' coverage universe weightings are distinct from analysts' stock ratings and are based on the expected performance of an analyst's coverage universe\* versus the relevant broad market benchmark\*\*:**

**Overweight:** Industry expected to outperform the relevant broad market benchmark over the next 12 months.

**Market Weight:** Industry expected to perform in-line with the relevant broad market benchmark over the next 12 months.

**Underweight:** Industry expected to underperform the relevant broad market benchmark over the next 12 months.

*\*An analyst's coverage universe consists of all companies covered by the analyst within the relevant sector.*

*\*\*The broad market benchmark is based on the expected return of the local market index (e.g., the S&P 500 in the U.S.) over the next 12 months.*

**Credit Suisse's distribution of stock ratings (and banking clients) is:**

Global Ratings Distribution		
Outperform/Buy*	47%	(62% banking clients)
Neutral/Hold*	40%	(57% banking clients)
Underperform/Sell*	11%	(50% banking clients)
Restricted	2%	

*\*For purposes of the NYSE and NASD ratings distribution disclosure requirements, our stock ratings of Outperform, Neutral, and Underperform most closely correspond to Buy, Hold, and Sell, respectively; however, the meanings are not the same, as our stock ratings are determined on a relative basis. (Please refer to definitions above.) An investor's decision to buy or sell a security should be based on investment objectives, current holdings, and other individual factors.*

Credit Suisse's policy is to update research reports as it deems appropriate, based on developments with the subject company, the sector or the market that may have a material impact on the research views or opinions stated herein.

Credit Suisse's policy is only to publish investment research that is impartial, independent, clear, fair and not misleading. *See the Companies Mentioned section for full company names.*

**Price Target:** (12 months) for (FTS.TO)

**Method:** We obtain our C\$34.00 target price for Fortis Inc. by using multiple valuation methodologies, yield base analysis, and discounted cash flow, all of which produce the C\$34.00 target. Our target price implies a P/E (price/earnings) multiple of 18.5x our 2012 EPS (earnings per share) estimate of C\$1.86 and an EV/EBITDA (enterprise value/earnings before interest, taxes, depreciation, and amortization) multiple of 10.5x our EBITDA estimate.

**Risks:** There are a number of risks to Fortis' achievement of our C\$34.00 target price: commodity prices; weather; environmental; regulatory; access to capital markets; and, interest rates. Moreover, one should never underestimate the power of the regulator in any regulated business.

Please refer to the firm's disclosure website at [www.credit-suisse.com/researchdisclosures](http://www.credit-suisse.com/researchdisclosures) for the definitions of abbreviations typically used in the target price method and risk sections.

*See the Companies Mentioned section for full company names.*

As of the date of this report, Credit Suisse acts as a market maker or liquidity provider in the equities securities that are the subject of this report.

Principal is not guaranteed in the case of equities because equity prices are variable.

Commission is the commission rate or the amount agreed with a customer when setting up an account or at anytime after that.

CS may have issued a Trade Alert regarding this security. Trade Alerts are short term trading opportunities identified by an analyst on the basis of market events and catalysts, while stock ratings reflect an analyst's investment recommendations based on expected total return over a 12-month period relative to the relevant coverage universe. Because Trade Alerts and stock ratings reflect different assumptions and analytical methods, Trade Alerts may differ directionally from the analyst's stock rating.

The author(s) of this report maintains a CS Model Portfolio that he/she regularly adjusts. The security or securities discussed in this report may be a component of the CS Model Portfolio and subject to such adjustments (which, given the composition of the CS Model Portfolio as a whole, may differ from the recommendation in this report, as well as opportunities or strategies identified in Trading Alerts concerning the same security). The CS Model Portfolio and important disclosures about it are available at [www.credit-suisse.com/ti](http://www.credit-suisse.com/ti).

Disclaimers continue on next page.

This report is not directed to, or intended for distribution to or use by, any person or entity who is a citizen or resident of or located in any locality, state, country or other jurisdiction where such distribution, publication, availability or use would be contrary to law or regulation or which would subject Credit Suisse AG, the Swiss bank, or its subsidiaries or its affiliates ("CS") to any registration or licensing requirement within such jurisdiction. All material presented in this report, unless specifically indicated otherwise, is under copyright to CS. None of the material, nor its content, nor any copy of it, may be altered in any way, transmitted to, copied or distributed to any other party, without the prior express written permission of CS. All trademarks, service marks and logos used in this report are trademarks or service marks or registered trademarks or service marks of CS or its affiliates.

The information, tools and material presented in this report are provided to you for information purposes only and are not to be used or considered as an offer or the solicitation of an offer to sell or to buy or subscribe for securities or other financial instruments. CS may not have taken any steps to ensure that the securities referred to in this report are suitable for any particular investor. CS will not treat recipients as its customers by virtue of their receiving the report. The investments or services contained or referred to in this report may not be suitable for you and it is recommended that you consult an independent investment advisor if you are in doubt about such investments or investment services. Nothing in this report constitutes investment, legal, accounting or tax advice or a representation that any investment or strategy is suitable or appropriate to your individual circumstances or otherwise constitutes a personal recommendation to you. CS does not offer advice on the tax consequences of investment and you are advised to contact an independent tax adviser. Please note in particular that the bases and levels of taxation may change.

CS believes the information and opinions in the Disclosure Appendix of this report are accurate and complete. Information and opinions presented in the other sections of the report were obtained or derived from sources CS believes are reliable, but CS makes no representations as to their accuracy or completeness. Additional information is available upon request. CS accepts no liability for loss arising from the use of the material presented in this report, except that this exclusion of liability does not apply to the extent that liability arises under specific statutes or regulations applicable to CS. This report is not to be relied upon in substitution for the exercise of independent judgment. CS may have issued, and may in the future issue, a trading call regarding this security. Trading calls are short term trading opportunities based on market events and catalysts, while stock ratings reflect investment recommendations based on expected total return over a 12-month period as defined in the disclosure section. Because trading calls and stock ratings reflect different assumptions and analytical methods, trading calls may differ directionally from the stock rating. In addition, CS may have issued, and may in the future issue, other reports that are inconsistent with, and reach different conclusions from, the information presented in this report. Those reports reflect the different assumptions, views and analytical methods of the analysts who prepared them and CS is under no obligation to ensure that such other reports are brought to the attention of any recipient of this report. CS is involved in many businesses that relate to companies mentioned in this report. These businesses include specialized trading, risk arbitrage, market making, and other proprietary trading.

Past performance should not be taken as an indication or guarantee of future performance, and no representation or warranty, express or implied, is made regarding future performance. Information, opinions and estimates contained in this report reflect a judgement at its original date of publication by CS and are subject to change without notice. The price, value of and income from any of the securities or financial instruments mentioned in this report can fall as well as rise. The value of securities and financial instruments is subject to exchange rate fluctuation that may have a positive or adverse effect on the price or income of such securities or financial instruments. Investors in securities such as ADR's, the values of which are influenced by currency volatility, effectively assume this risk.

Structured securities are complex instruments, typically involve a high degree of risk and are intended for sale only to sophisticated investors who are capable of understanding and assuming the risks involved. The market value of any structured security may be affected by changes in economic, financial and political factors (including, but not limited to, spot and forward interest and exchange rates), time to maturity, market conditions and volatility, and the credit quality of any issuer or reference issuer. Any investor interested in purchasing a structured product should conduct their own investigation and analysis of the product and consult with their own professional advisers as to the risks involved in making such a purchase.

Some investments discussed in this report have a high level of volatility. High volatility investments may experience sudden and large falls in their value causing losses when that investment is realised. Those losses may equal your original investment. Indeed, in the case of some investments the potential losses may exceed the amount of initial investment, in such circumstances you may be required to pay more money to support those losses. Income yields from investments may fluctuate and, in consequence, initial capital paid to make the investment may be used as part of that income yield. Some investments may not be readily realisable and it may be difficult to sell or realise those investments, similarly it may prove difficult for you to obtain reliable information about the value, or risks, to which such an investment is exposed.

### ACQUISITION

## Cross border connections

- **Accretive action:** Fortis plans to acquire Central Vermont Public Service (CV.N) for US\$700m (including the assumption of US\$230m in debt) for US\$35.10/share in cash representing a 44% premium to Friday's closing price of US\$24.32. FTS believes the deal will close in 6-12 months and will be EPS accretive in the first full year of ownership. We view this long-awaited initial FTS foray into the US as incrementally positive. From our perspective, we believe Fortis is very well positioned to consolidate the small to mid-cap US utility sector. Given Central Vermont's potential future rate base growth, we view this deal positively. Additionally, we believe Fortis is very well positioned for more US targeted deals.
- **Deal details:** Under simple assumptions, we believe this deal may result in more than C\$0.10/sh of earnings accretion for Fortis in the first full year after close. Similar to past FTS acquisitions, CV's large investment plan may result in 9% compound average annual growth from 2010 to 2015. Such growth should provide further financial upside, however, in the near-term, significant earnings accretion is possible largely the result of the wide valuation gap between Canadian and US utilities. Given the current appetite for yield in the Canadian market, we expect ongoing US targeted deals that are also aided by the level of the CAD/USD.
- **Improving capital market conditions:** Historically, Fortis is very adept at acquisitions and this transaction highlights long-term and low-risk growth.
- **Valuation:** We have not adjusted our numbers for this deal, but will do so over time. Our C\$34.target price and Neutral rating are obtained utilizing multiple valuation approaches, including: an 18.5x P/E multiple of 2012 earnings; a 1.8x book value multiple; and, a DCF based valuation. We reiterate our Neutral rating.

### 3-Year Price, Target Price and Rating Change History Chart for FTS.TO

The analyst(s) responsible for preparing this research report received compensation that is based upon various factors including Credit Suisse's total revenues, a portion of which are generated by Credit Suisse's investment banking activities.

### Analysts' stock ratings are defined as follows:

**Outperform (O):** The stock's total return is expected to outperform the relevant benchmark\* by at least 10-15% (or more, depending on perceived risk) over the next 12 months.

**Neutral (N):** The stock's total return is expected to be in line with the relevant benchmark\* (range of  $\pm 10-15\%$ ) over the next 12 months.

**Underperform (U):** The stock's total return is expected to underperform the relevant benchmark\* by 10-15% or more over the next 12 months.

\*Relevant benchmark by region: As of 29<sup>th</sup> May 2009, Australia, New Zealand, U.S. and Canadian ratings are based on (1) a stock's absolute total return potential to its current share price and (2) the relative attractiveness of a stock's total return potential within an analyst's coverage universe\*\*, with Outperforms representing the most attractive, Neutrals the less attractive, and Underperforms the least attractive investment opportunities. Some U.S. and Canadian ratings may fall outside the absolute total return ranges defined above, depending on market conditions and industry factors. For Latin American, Japanese, and non-Japan Asia stocks, ratings are based on a stock's total return relative to the average total return of the relevant country or regional benchmark; for European stocks, ratings are based on a stock's total return relative to the analyst's coverage universe\*\*. For Australian and New Zealand stocks a 22% and a 12% threshold replace the 10-15% level in the Outperform and Underperform stock rating definitions, respectively, subject to analysts' perceived risk. The 22% and 12% thresholds replace the +10-15% and -10-15% levels in the Neutral stock rating definition, respectively, subject to analysts' perceived risk.

\*\*An analyst's coverage universe consists of all companies covered by the analyst within the relevant sector.

**Restricted (R):** In certain circumstances, Credit Suisse policy and/or applicable law and regulations preclude certain types of communications, including an investment recommendation, during the course of Credit Suisse's engagement in an investment banking transaction and in certain other circumstances.

**Volatility Indicator [V]:** A stock is defined as volatile if the stock price has moved up or down by 20% or more in a month in at least 8 of the past 24 months or the analyst expects significant volatility going forward.

### Analysts' coverage universe weightings are distinct from analysts' stock ratings and are based on the expected performance of an analyst's coverage universe\* versus the relevant broad market benchmark\*\*:

**Overweight:** Industry expected to outperform the relevant broad market benchmark over the next 12 months.

**Market Weight:** Industry expected to perform in-line with the relevant broad market benchmark over the next 12 months.

**Underweight:** Industry expected to underperform the relevant broad market benchmark over the next 12 months.

\*An analyst's coverage universe consists of all companies covered by the analyst within the relevant sector.

\*\*The broad market benchmark is based on the expected return of the local market index (e.g., the S&P 500 in the U.S.) over the next 12 months.

**Credit Suisse's distribution of stock ratings (and banking clients) is:**

Global Ratings Distribution		
Outperform/Buy*	47%	(63% banking clients)
Neutral/Hold*	40%	(56% banking clients)
Underperform/Sell*	10%	(50% banking clients)
Restricted	2%	

\*For purposes of the NYSE and NASD ratings distribution disclosure requirements, our stock ratings of Outperform, Neutral, and Underperform most closely correspond to Buy, Hold, and Sell, respectively; however, the meanings are not the same, as our stock ratings are determined on a relative basis. (Please refer to definitions above.) An investor's decision to buy or sell a security should be based on investment objectives, current holdings, and other individual factors.

Credit Suisse's policy is to update research reports as it deems appropriate, based on developments with the subject company, the sector or the market that may have a material impact on the research views or opinions stated herein.

Credit Suisse's policy is only to publish investment research that is impartial, independent, clear, fair and not misleading. Credit Suisse does not provide any tax advice. Any statement herein regarding any US federal tax is not intended or written to be used, and cannot be used, by any taxpayer for the purposes of avoiding any penalties.

See the Companies Mentioned section for full company names.

**Price Target:** (12 months) for (FTS.TO)

**Method:** We obtain our C\$34.00 target price for Fortis Inc. by using multiple valuation methodologies, yield base analysis, and discounted cash flow, all of which produce the C\$34.00 target. Our target price implies a P/E (price/earnings) multiple of 18.5x our 2012 EPS (earnings per share) estimate of C\$1.86 and an EV/EBITDA (enterprise value/earnings before interest, taxes, depreciation, and amortization) multiple of 10.5x our EBITDA estimate.

**Risks:** There are a number of risks to Fortis' achievement of our C\$34.00 target price: commodity prices; weather; environmental; regulatory; access to capital markets; and, interest rates. Moreover, one should never underestimate the power of the regulator in any regulated business.

Please refer to the firm's disclosure website at [www.credit-suisse.com/researchdisclosures](http://www.credit-suisse.com/researchdisclosures) for the definitions of abbreviations typically used in the target price method and risk sections.

See the Companies Mentioned section for full company names.

The subject company (FTS.TO) currently is, or was during the 12-month period preceding the date of distribution of this report, a client of Credit Suisse.

Credit Suisse provided investment banking services to the subject company (FTS.TO) within the past 12 months.

Credit Suisse provided non-investment banking services, which may include Sales and Trading services, to the subject company (FTS.TO) within the past 12 months.

Credit Suisse expects to receive or intends to seek investment banking related compensation from the subject company (FTS.TO) within the next 3 months.

Credit Suisse has received compensation for products and services other than investment banking services from the subject company (FTS.TO) within the past 12 months.

**Important Regional Disclosures**

Singapore recipients should contact a Singapore financial adviser for any matters arising from this research report.

An analyst involved in the preparation of this report has visited certain material operations of the subject company (FTS.TO) within the past 12 months. The analyst may not have visited all material operations of the subject company. The travel expenses of the analyst in connection with such visits were not paid or reimbursed by the subject company, other than de minimus local travel expenses.

Restrictions on certain Canadian securities are indicated by the following abbreviations: NVS--Non-Voting shares; RVS--Restricted Voting Shares; SVS--Subordinate Voting Shares.

Individuals receiving this report from a Canadian investment dealer that is not affiliated with Credit Suisse should be advised that this report may not contain regulatory disclosures the non-affiliated Canadian investment dealer would be required to make if this were its own report.

For Credit Suisse Securities (Canada), Inc.'s policies and procedures regarding the dissemination of equity research, please visit [http://www.csfb.com/legal\\_terms/canada\\_research\\_policy.shtml](http://www.csfb.com/legal_terms/canada_research_policy.shtml).

As of the date of this report, Credit Suisse acts as a market maker or liquidity provider in the equities securities that are the subject of this report.

Principal is not guaranteed in the case of equities because equity prices are variable.

Commission is the commission rate or the amount agreed with a customer when setting up an account or at anytime after that.

CS may have issued a Trade Alert regarding this security. Trade Alerts are short term trading opportunities identified by an analyst on the basis of market events and catalysts, while stock ratings reflect an analyst's investment recommendations based on expected total return over a 12-month period relative to the relevant coverage universe. Because Trade Alerts and stock ratings reflect different assumptions and analytical methods, Trade Alerts may differ directionally from the analyst's stock rating.

The author(s) of this report maintains a CS Model Portfolio that he/she regularly adjusts. The security or securities discussed in this report may be a component of the CS Model Portfolio and subject to such adjustments (which, given the composition of the CS Model Portfolio as a whole, may differ from the recommendation in this report, as well as opportunities or strategies identified in Trading Alerts concerning the same security). The CS Model Portfolio and important disclosures about it are available at [www.credit-suisse.com/ti](http://www.credit-suisse.com/ti).

To the extent this is a report authored in whole or in part by a non-U.S. analyst and is made available in the U.S., the following are important disclosures regarding any non-U.S. analyst contributors:

The non-U.S. research analysts listed below (if any) are not registered/qualified as research analysts with FINRA. The non-U.S. research analysts listed below may not be associated persons of CSSU and therefore may not be subject to the NASD Rule 2711 and NYSE Rule 472 restrictions on communications with a subject company, public appearances and trading securities held by a research analyst account.

- Andrew M. Kuske, non-U.S. analyst, is a research analyst employed by Credit Suisse Securities (Canada), Inc..
- Paul Tan, non-U.S. analyst, is a research analyst employed by Credit Suisse Securities (Canada), Inc..

Taiwanese Disclosures: Reports written by Taiwan-based analysts on non-Taiwan listed companies are not considered recommendations to buy or sell securities under Taiwan Stock Exchange Operational Regulations Governing Securities Firms Recommending Trades in Securities to Customers.

Disclaimers continue on next page.

This report is not directed to, or intended for distribution to or use by, any person or entity who is a citizen or resident of or located in any locality, state, country or other jurisdiction where such distribution, publication, availability or use would be contrary to law or regulation or which would subject Credit Suisse AG, the Swiss bank, or its subsidiaries or its affiliates ("CS") to any registration or licensing requirement within such jurisdiction. All material presented in this report, unless specifically indicated otherwise, is under copyright to CS. None of the material, nor its content, nor any copy of it, may be altered in any way, transmitted to, copied or distributed to any other party, without the prior express written permission of CS. All trademarks, service marks and logos used in this report are trademarks or service marks or registered trademarks or service marks of CS or its affiliates.

The information, tools and material presented in this report are provided to you for information purposes only and are not to be used or considered as an offer or the solicitation of an offer to sell or to buy or subscribe for securities or other financial instruments. CS may not have taken any steps to ensure that the securities referred to in this report are suitable for any particular investor. CS will not treat recipients as its customers by virtue of their receiving the report. The investments or services contained or referred to in this report may not be suitable for you and it is recommended that you consult an independent investment advisor if you are in doubt about such investments or investment services. Nothing in this report constitutes investment, legal, accounting or tax advice or a representation that any investment or strategy is suitable or appropriate to your individual circumstances or otherwise constitutes a personal recommendation to you. CS does not offer advice on the tax consequences of investment and you are advised to contact an independent tax adviser. Please note in particular that the bases and levels of taxation may change.

CS believes the information and opinions in the Disclosure Appendix of this report are accurate and complete. Information and opinions presented in the other sections of the report were obtained or derived from sources CS believes are reliable, but CS makes no representations as to their accuracy or completeness. Additional information is available upon request. CS accepts no liability for loss arising from the use of the material presented in this report, except that this exclusion of liability does not apply to the extent that liability arises under specific statutes or regulations applicable to CS. This report is not to be relied upon in substitution for the exercise of independent judgment. CS may have issued, and may in the future issue, a trading call regarding this security. Trading calls are short term trading opportunities based on market events and catalysts, while stock ratings reflect investment recommendations based on expected total return over a 12-month period as defined in the disclosure section. Because trading calls and stock ratings reflect different assumptions and analytical methods, trading calls may differ directionally from the stock rating. In addition, CS may have issued, and may in the future issue, other reports that are inconsistent with, and reach different conclusions from, the information presented in this report. Those reports reflect the different assumptions, views and analytical methods of the analysts who prepared them and CS is under no obligation to ensure that such other reports are brought to the attention of any recipient of this report. CS is involved in many businesses that relate to companies mentioned in this report. These businesses include specialized trading, risk arbitrage, market making, and other proprietary trading.

Past performance should not be taken as an indication or guarantee of future performance, and no representation or warranty, express or implied, is made regarding future performance. Information, opinions and estimates contained in this report reflect a judgement at its original date of publication by CS and are subject to change without notice. The price, value of and income from any of the securities or financial instruments mentioned in this report can fall as well as rise. The value of securities and financial instruments is subject to exchange rate fluctuation that may have a positive or adverse effect on the price or income of such securities or financial instruments. Investors in securities such as ADR's, the values of which are influenced by currency volatility, effectively assume this risk.

Structured securities are complex instruments, typically involve a high degree of risk and are intended for sale only to sophisticated investors who are capable of understanding and assuming the risks involved. The market value of any structured security may be affected by changes in economic, financial and political factors (including, but not limited to, spot and forward interest and exchange rates), time to maturity, market conditions and volatility, and the credit quality of any issuer or reference issuer. Any investor interested in purchasing a structured product should conduct their own investigation and analysis of the product and consult with their own professional advisers as to the risks involved in making such a purchase.

Some investments discussed in this report have a high level of volatility. High volatility investments may experience sudden and large falls in their value causing losses when that investment is realised. Those losses may equal your original investment. Indeed, in the case of some investments the potential losses may exceed the amount of initial investment, in such circumstances you may be required to pay more money to support those losses. Income yields from investments may fluctuate and, in consequence, initial capital paid to make the investment may be used as part of that income yield. Some investments may not be readily realisable and it may be difficult to sell or realise those investments, similarly it may prove difficult for you to obtain reliable information about the value, or risks, to which such an investment is exposed.

This report may provide the addresses of, or contain hyperlinks to, websites. Except to the extent to which the report refers to website material of CS, CS has not reviewed the linked site and takes no responsibility for the content contained therein. Such address or hyperlink (including addresses or hyperlinks to CS's own website material) is provided solely for your convenience and information and the content of the linked site does not in any way form part of this document. Accessing such website or following such link through this report or CS's website shall be at your own risk.

### BUSINESS DISPOSAL

## Bye-bye Belize?

- **A government grab:** Fortis Inc. press released the Government of Belize's interest "...in purchasing majority shares in BEL so as to assume control of the company." Fortis has yet to receive a purchase proposal for the approximate 70% interest in Belize Electricity Limited (BEL). At this time, we view the prospects for BEL disposition as a potentially minor positive for FTS. We take that view for multiple reasons, including: (a) over the last few years, BEL experienced regulatory issues that led to a lengthy legal battle; (b) FTS would likely repatriate the BEL proceeds towards a combination of organic and acquisition oriented growth activities in North American; and, (c) clearly, we assume any BEL disposition will occur at a fair value. A future deal price is critical to assessing impact, but a potential dispute resolution is positive.
- **Some details:** Without delving into the history of Fortis in Belize, we believe selected points are pertinent, including: (a) FTS owns roughly 70% of Belize Electricity Limited which is an integrated electric utility in Belize; (b) FTS owns the Belize Electric Company Limited (BECOL), an unregulated hydroelectric generation company, in Belize; and, and, (c) for FTS less than 2% of total assets are exposed at BEL (~C\$259m) and the combination of BEL and BECOL amount to only 3% of the total assets as of March 31, 2011.
- **Improving capital market conditions:** Historically, Fortis has been very adept at acquisitions. Corporate growth has benefited from the company's ability to successfully acquire and integrate selected assets. In our view, the company is well positioned in the current market for acquisition opportunities.
- **Valuation:** Our C\$34.target price and Neutral rating are obtained utilizing multiple valuation approaches, including: an 18.5x P/E multiple of 2012 earnings; a 1.8x book value multiple; and, a DCF based valuation. We reiterate our Neutral rating.

### Share price performance

On 06/10/11 the Canada S&P/TSX Composite Index index closed at 13084.

## Disclosure Appendix

### Important Global Disclosures

I, Andrew M. Kuske, certify that (1) the views expressed in this report accurately reflect my personal views about all of the subject companies and securities and (2) no part of my compensation was, is or will be directly or indirectly related to the specific recommendations or views expressed in this report.

See the Companies Mentioned section for full company names.

### 3-Year Price, Target Price and Rating Change History Chart for FTS.TO

The analyst(s) responsible for preparing this research report received compensation that is based upon various factors including Credit Suisse's total revenues, a portion of which are generated by Credit Suisse's investment banking activities.

### Analysts' stock ratings are defined as follows:

**Outperform (O):** The stock's total return is expected to outperform the relevant benchmark\* by at least 10-15% (or more, depending on perceived risk) over the next 12 months.

**Neutral (N):** The stock's total return is expected to be in line with the relevant benchmark\* (range of  $\pm 10-15\%$ ) over the next 12 months.

**Underperform (U):** The stock's total return is expected to underperform the relevant benchmark\* by 10-15% or more over the next 12 months.

\*Relevant benchmark by region: As of 29<sup>th</sup> May 2009, Australia, New Zealand, U.S. and Canadian ratings are based on (1) a stock's absolute total return potential to its current share price and (2) the relative attractiveness of a stock's total return potential within an analyst's coverage universe\*\*, with Outperforms representing the most attractive, Neutrals the less attractive, and Underperforms the least attractive investment opportunities. Some U.S. and Canadian ratings may fall outside the absolute total return ranges defined above, depending on market conditions and industry factors. For Latin American, Japanese, and non-Japan Asia stocks, ratings are based on a stock's total return relative to the average total return of the relevant country or regional benchmark; for European stocks, ratings are based on a stock's total return relative to the analyst's coverage universe\*\*. For Australian and New Zealand stocks a 22% and a 12% threshold replace the 10-15% level in the Outperform and Underperform stock rating definitions, respectively, subject to analysts' perceived risk. The 22% and 12% thresholds replace the +10-15% and -10-15% levels in the Neutral stock rating definition, respectively, subject to analysts' perceived risk.

\*\*An analyst's coverage universe consists of all companies covered by the analyst within the relevant sector.

**Restricted (R):** In certain circumstances, Credit Suisse policy and/or applicable law and regulations preclude certain types of communications, including an investment recommendation, during the course of Credit Suisse's engagement in an investment banking transaction and in certain other circumstances.

**Volatility Indicator [V]:** A stock is defined as volatile if the stock price has moved up or down by 20% or more in a month in at least 8 of the past 24 months or the analyst expects significant volatility going forward.

**Analysts' coverage universe weightings are distinct from analysts' stock ratings and are based on the expected performance of an analyst's coverage universe\* versus the relevant broad market benchmark\*\*:**

**Overweight:** Industry expected to outperform the relevant broad market benchmark over the next 12 months.

**Market Weight:** Industry expected to perform in-line with the relevant broad market benchmark over the next 12 months.

**Underweight:** Industry expected to underperform the relevant broad market benchmark over the next 12 months.

\*An analyst's coverage universe consists of all companies covered by the analyst within the relevant sector.

\*\*The broad market benchmark is based on the expected return of the local market index (e.g., the S&P 500 in the U.S.) over the next 12 months.

**Credit Suisse's distribution of stock ratings (and banking clients) is:**

Global Ratings Distribution		
<b>Outperform/Buy*</b>	48%	(62% banking clients)
<b>Neutral/Hold*</b>	40%	(56% banking clients)
<b>Underperform/Sell*</b>	10%	(50% banking clients)
<b>Restricted</b>	2%	

\*For purposes of the NYSE and NASD ratings distribution disclosure requirements, our stock ratings of Outperform, Neutral, and Underperform most closely correspond to Buy, Hold, and Sell, respectively; however, the meanings are not the same, as our stock ratings are determined on a relative basis. (Please refer to definitions above.) An investor's decision to buy or sell a security should be based on investment objectives, current holdings, and other individual factors.

Credit Suisse's policy is to update research reports as it deems appropriate, based on developments with the subject company, the sector or the market that may have a material impact on the research views or opinions stated herein.

Credit Suisse's policy is only to publish investment research that is impartial, independent, clear, fair and not misleading. For more detail please refer to Credit Suisse's Policies for Managing Conflicts of Interest in connection with Investment Research: [http://www.csfb.com/research-and-analytics/disclaimer/managing\\_conflicts\\_disclaimer.html](http://www.csfb.com/research-and-analytics/disclaimer/managing_conflicts_disclaimer.html)

Credit Suisse does not provide any tax advice. Any statement herein regarding any US federal tax is not intended or written to be used, and cannot be used, by any taxpayer for the purposes of avoiding any penalties.

See the Companies Mentioned section for full company names.

**Price Target:** (12 months) for (FTS.TO)

**Method:** We obtain our C\$34.00 target price for Fortis Inc. by using multiple valuation methodologies, yield base analysis, and discounted cash flow, all of which produce the C\$34.00 target. Our target price implies a P/E (price/earnings) multiple of 18.5x our 2012 EPS (earnings per share) estimate of C\$1.86 and an EV/EBITDA (enterprise value/earnings before interest, taxes, depreciation, and amortization) multiple of 10.5x our EBITDA estimate.

**Risks:** There are a number of risks to Fortis' achievement of our C\$34.00 target price: commodity prices; weather; environmental; regulatory; access to capital markets; and, interest rates. Moreover, one should never underestimate the power of the regulator in any regulated business.

Please refer to the firm's disclosure website at [www.credit-suisse.com/researchdisclosures](http://www.credit-suisse.com/researchdisclosures) for the definitions of abbreviations typically used in the target price method and risk sections.

See the Companies Mentioned section for full company names.

The subject company (FTS.TO) currently is, or was during the 12-month period preceding the date of distribution of this report, a client of Credit Suisse.

Credit Suisse provided investment banking services to the subject company (FTS.TO) within the past 12 months.

Credit Suisse provided non-investment banking services, which may include Sales and Trading services, to the subject company (FTS.TO) within the past 12 months.

Credit Suisse expects to receive or intends to seek investment banking related compensation from the subject company (FTS.TO) within the next 3 months.

Credit Suisse has received compensation for products and services other than investment banking services from the subject company (FTS.TO) within the past 12 months.

**Important Regional Disclosures**

Singapore recipients should contact a Singapore financial adviser for any matters arising from this research report.

An analyst involved in the preparation of this report has visited certain material operations of the subject company (FTS.TO) within the past 12 months. The analyst may not have visited all material operations of the subject company. The travel expenses of the analyst in connection with such visits were not paid or reimbursed by the subject company, other than de minimus local travel expenses.

Restrictions on certain Canadian securities are indicated by the following abbreviations: NVS--Non-Voting shares; RVS--Restricted Voting Shares; SVS--Subordinate Voting Shares.

Individuals receiving this report from a Canadian investment dealer that is not affiliated with Credit Suisse should be advised that this report may not contain regulatory disclosures the non-affiliated Canadian investment dealer would be required to make if this were its own report.

For Credit Suisse Securities (Canada), Inc.'s policies and procedures regarding the dissemination of equity research, please visit [http://www.csfb.com/legal\\_terms/canada\\_research\\_policy.shtml](http://www.csfb.com/legal_terms/canada_research_policy.shtml).

As of the date of this report, Credit Suisse acts as a market maker or liquidity provider in the equities securities that are the subject of this report.

Principal is not guaranteed in the case of equities because equity prices are variable.

Commission is the commission rate or the amount agreed with a customer when setting up an account or at anytime after that.

CS may have issued a Trade Alert regarding this security. Trade Alerts are short term trading opportunities identified by an analyst on the basis of market events and catalysts, while stock ratings reflect an analyst's investment recommendations based on expected total return over a 12-month period relative to the relevant coverage universe. Because Trade Alerts and stock ratings reflect different assumptions and analytical methods, Trade Alerts may differ directionally from the analyst's stock rating.

The author(s) of this report maintains a CS Model Portfolio that he/she regularly adjusts. The security or securities discussed in this report may be a component of the CS Model Portfolio and subject to such adjustments (which, given the composition of the CS Model Portfolio as a whole, may differ

from the recommendation in this report, as well as opportunities or strategies identified in Trading Alerts concerning the same security). The CS Model Portfolio and important disclosures about it are available at [www.credit-suisse.com/ti](http://www.credit-suisse.com/ti).

To the extent this is a report authored in whole or in part by a non-U.S. analyst and is made available in the U.S., the following are important disclosures regarding any non-U.S. analyst contributors:

The non-U.S. research analysts listed below (if any) are not registered/qualified as research analysts with FINRA. The non-U.S. research analysts listed below may not be associated persons of CSSU and therefore may not be subject to the NASD Rule 2711 and NYSE Rule 472 restrictions on communications with a subject company, public appearances and trading securities held by a research analyst account.

- Andrew M. Kuske, non-U.S. analyst, is a research analyst employed by Credit Suisse Securities (Canada), Inc..
- Paul Tan, non-U.S. analyst, is a research analyst employed by Credit Suisse Securities (Canada), Inc..

Taiwanese Disclosures: Reports written by Taiwan-based analysts on non-Taiwan listed companies are not considered recommendations to buy or sell securities under Taiwan Stock Exchange Operational Regulations Governing Securities Firms Recommending Trades in Securities to Customers.

For Credit Suisse disclosure information on other companies mentioned in this report, please visit the website at [www.credit-suisse.com/researchdisclosures](http://www.credit-suisse.com/researchdisclosures) or call +1 (877) 291-2683.

Disclaimers continue on next page.

This report is not directed to, or intended for distribution to or use by, any person or entity who is a citizen or resident of or located in any locality, state, country or other jurisdiction where such distribution, publication, availability or use would be contrary to law or regulation or which would subject Credit Suisse AG, the Swiss bank, or its subsidiaries or its affiliates ("CS") to any registration or licensing requirement within such jurisdiction. All material presented in this report, unless specifically indicated otherwise, is under copyright to CS. None of the material, nor its content, nor any copy of it, may be altered in any way, transmitted to, copied or distributed to any other party, without the prior express written permission of CS. All trademarks, service marks and logos used in this report are trademarks or service marks or registered trademarks or service marks of CS or its affiliates.

The information, tools and material presented in this report are provided to you for information purposes only and are not to be used or considered as an offer or the solicitation of an offer to sell or to buy or subscribe for securities or other financial instruments. CS may not have taken any steps to ensure that the securities referred to in this report are suitable for any particular investor. CS will not treat recipients as its customers by virtue of their receiving the report. The investments or services contained or referred to in this report may not be suitable for you and it is recommended that you consult an independent investment advisor if you are in doubt about such investments or investment services. Nothing in this report constitutes investment, legal, accounting or tax advice or a representation that any investment or strategy is suitable or appropriate to your individual circumstances or otherwise constitutes a personal recommendation to you. CS does not offer advice on the tax consequences of investment and you are advised to contact an independent tax adviser. Please note in particular that the bases and levels of taxation may change.

CS believes the information and opinions in the Disclosure Appendix of this report are accurate and complete. Information and opinions presented in the other sections of the report were obtained or derived from sources CS believes are reliable, but CS makes no representations as to their accuracy or completeness. Additional information is available upon request. CS accepts no liability for loss arising from the use of the material presented in this report, except that this exclusion of liability does not apply to the extent that liability arises under specific statutes or regulations applicable to CS. This report is not to be relied upon in substitution for the exercise of independent judgment. CS may have issued, and may in the future issue, a trading call regarding this security. Trading calls are short term trading opportunities based on market events and catalysts, while stock ratings reflect investment recommendations based on expected total return over a 12-month period as defined in the disclosure section. Because trading calls and stock ratings reflect different assumptions and analytical methods, trading calls may differ directionally from the stock rating. In addition, CS may have issued, and may in the future issue, other reports that are inconsistent with, and reach different conclusions from, the information presented in this report. Those reports reflect the different assumptions, views and analytical methods of the analysts who prepared them and CS is under no obligation to ensure that such other reports are brought to the attention of any recipient of this report. CS is involved in many businesses that relate to companies mentioned in this report. These businesses include specialized trading, risk arbitrage, market making, and other proprietary trading.

Past performance should not be taken as an indication or guarantee of future performance, and no representation or warranty, express or implied, is made regarding future performance. Information, opinions and estimates contained in this report reflect a judgement at its original date of publication by CS and are subject to change without notice. The price, value of and income from any of the securities or financial instruments mentioned in this report can fall as well as rise. The value of securities and financial instruments is subject to exchange rate fluctuation that may have a positive or adverse effect on the price or income of such securities or financial instruments. Investors in securities such as ADR's, the values of which are influenced by currency volatility, effectively assume this risk.

Structured securities are complex instruments, typically involve a high degree of risk and are intended for sale only to sophisticated investors who are capable of understanding and assuming the risks involved. The market value of any structured security may be affected by changes in economic, financial and political factors (including, but not limited to, spot and forward interest and exchange rates), time to maturity, market conditions and volatility, and the credit quality of any issuer or reference issuer. Any investor interested in purchasing a structured product should conduct their own investigation and analysis of the product and consult with their own professional advisers as to the risks involved in making such a purchase.

Some investments discussed in this report have a high level of volatility. High volatility investments may experience sudden and large falls in their value causing losses when that investment is realised. Those losses may equal your original investment. Indeed, in the case of some investments the potential losses may exceed the amount of initial investment, in such circumstances you may be required to pay more money to support those losses. Income yields from investments may fluctuate and, in consequence, initial capital paid to make the investment may be used as part of that income yield. Some investments may not be readily realisable and it may be difficult to sell or realise those investments, similarly it may prove difficult for you to obtain reliable information about the value, or risks, to which such an investment is exposed.

This report may provide the addresses of, or contain hyperlinks to, websites. Except to the extent to which the report refers to website material of CS, CS has not reviewed the linked site and takes no responsibility for the content contained therein. Such address or hyperlink (including addresses or hyperlinks to CS's own website material) is provided solely for your convenience and information and the content of the linked site does not in any way form part of this document. Accessing such website or following such link through this report or CS's website shall be at your own risk.

This report is issued and distributed in Europe (except Switzerland) by Credit Suisse Securities (Europe) Limited, One Cabot Square, London E14 4QJ, England, which is regulated in the United Kingdom by The Financial Services Authority ("FSA"). This report is being distributed in Germany by Credit Suisse Securities (Europe) Limited Niederlassung Frankfurt am Main regulated by the Bundesanstalt fuer Finanzdienstleistungsaufsicht ("BaFin"). This report is being distributed in the United States by Credit Suisse Securities (USA) LLC ; in Switzerland by Credit Suisse AG; in Canada by Credit Suisse Securities (Canada), Inc.; in Brazil by Banco de Investimentos Credit Suisse (Brasil) S.A. or its affiliates; in Mexico by Banco Credit Suisse (México), S.A. (transactions related to the securities mentioned in this report will only be effected in compliance with applicable regulation); in Japan by Credit Suisse Securities (Japan) Limited, Financial Instrument Firm, Director-General of Kanto Local Finance Bureau (Kinsho) No. 66, a member of Japan Securities Dealers Association, The Financial Futures Association of Japan, Japan Securities Investment Advisers Association; elsewhere in Asia/Pacific by whichever of the following is the appropriately authorised entity in the relevant jurisdiction: Credit Suisse (Hong Kong) Limited, Credit Suisse Equities (Australia) Limited, Credit Suisse Securities (Thailand) Limited, Credit Suisse Securities (Malaysia) Sdn Bhd, Credit Suisse AG, Singapore Branch, Credit Suisse Securities (India) Private Limited regulated by the Securities and Exchange Board of India (registration Nos. ### COMPANY UPDATE

## Valuing Vermont

- **Competing bid:** Roughly three and a half weeks after Central Vermont Public Service Corporation (CVPS) agreed to be purchased by Fortis Inc. for US\$35.10 per share, Northern New England Energy Corp. (NNEEC), a wholly owned subsidiary of Gaz Métro Limited Partnership made an unsolicited offer for CVPS. CVPS announced its board of directors “will review the unsolicited offer in due course based on its fiduciary responsibilities and contractual commitments to Fortis.” We believe FTS is a very disciplined buyer of assets. The recent equity offering, CV deal and Belize issues have weighed on the stock.
- **Deal differences:** Selected differences between the NNEEC and FTS offers include: (a) NNEEC bid US\$35.25 per CVPS share vs. FTS at US\$35.10/sh; (b) under NNEEC’s bid, CVPS shareholders will receive quarterly dividend payments of US\$0.23/sh until closing versus FTS’s offer capping dividends at US\$0.46; (c) NNEEC stated the transaction will create roughly US\$144m over 10-year customer savings to CVPS and, wholly-owned subsidiary, Green Mountain Energy (GMP) rate payers versus US\$21m in the FTS transaction; and (d) the NNEEC deal will see CVPS and GMP contribute roughly 30% ownership interest in VELCO to a “permanent trust under public direction”. As with many utility transactions, the potential for greater customer benefits may be critical in the regulatory approval process.
- **Improving capital market conditions:** Historically, Fortis has been very adept at acquisitions. Corporate growth has benefited from the company’s ability to successfully acquire and integrate selected assets. In our view, the company is well positioned in the current market for acquisition opportunities.
- **Valuation:** Our C\$34 target price and Neutral rating are obtained utilizing multiple valuation approaches, including: an 18.5x P/E multiple of 2012 earnings; a 1.8x book value multiple; and, a DCF based valuation.

## Disclosure Appendix

### Important Global Disclosures

I, Andrew M. Kuske, certify that (1) the views expressed in this report accurately reflect my personal views about all of the subject companies and securities and (2) no part of my compensation was, is or will be directly or indirectly related to the specific recommendations or views expressed in this report.

See the Companies Mentioned section for full company names.

### 3-Year Price, Target Price and Rating Change History Chart for FTS.TO

FTS.TO	Closing Price	Target Price	Initiation/
Date	(C\$)	(C\$)	Rating Assumption
10/24/08	24.75	28	
12/3/08	25.48	27.5	
1/25/10	28.5	30	
11/8/10	33.6	32	
2/10/11	33.81	34	

O=Outperform; N=Neutral; U=Underperform; R=Restricted; NR=Not Rated; NC=Not Covered

The analyst(s) responsible for preparing this research report received compensation that is based upon various factors including Credit Suisse's total revenues, a portion of which are generated by Credit Suisse's investment banking activities.

### Analysts' stock ratings are defined as follows:

**Outperform (O):** The stock's total return is expected to outperform the relevant benchmark\* by at least 10-15% (or more, depending on perceived risk) over the next 12 months.

**Neutral (N):** The stock's total return is expected to be in line with the relevant benchmark\* (range of  $\pm 10-15\%$ ) over the next 12 months.

**Underperform (U):** The stock's total return is expected to underperform the relevant benchmark\* by 10-15% or more over the next 12 months.

\*Relevant benchmark by region: As of 29<sup>th</sup> May 2009, Australia, New Zealand, U.S. and Canadian ratings are based on (1) a stock's absolute total return potential to its current share price and (2) the relative attractiveness of a stock's total return potential within an analyst's coverage universe\*\*, with Outperforms representing the most attractive, Neutrals the less attractive, and Underperforms the least attractive investment opportunities. Some U.S. and Canadian ratings may fall outside the absolute total return ranges defined above, depending on market conditions and industry factors. For Latin American, Japanese, and non-Japan Asia stocks, ratings are based on a stock's total return relative to the average total return of the relevant country or regional benchmark; for European stocks, ratings are based on a stock's total return relative to the analyst's coverage universe\*\*. For Australian and New Zealand stocks a 22% and a 12% threshold replace the 10-15% level in the Outperform and Underperform stock rating definitions, respectively, subject to analysts' perceived risk. The 22% and 12% thresholds replace the +10-15% and -10-15% levels in the Neutral stock rating definition, respectively, subject to analysts' perceived risk.

\*\*An analyst's coverage universe consists of all companies covered by the analyst within the relevant sector.

**Restricted (R):** In certain circumstances, Credit Suisse policy and/or applicable law and regulations preclude certain types of communications, including an investment recommendation, during the course of Credit Suisse's engagement in an investment banking transaction and in certain other circumstances.

**Volatility Indicator [V]:** A stock is defined as volatile if the stock price has moved up or down by 20% or more in a month in at least 8 of the past 24 months or the analyst expects significant volatility going forward.

### Analysts' coverage universe weightings are distinct from analysts' stock ratings and are based on the expected performance of an analyst's coverage universe\* versus the relevant broad market benchmark\*\*:

**Overweight:** Industry expected to outperform the relevant broad market benchmark over the next 12 months.

**Market Weight:** Industry expected to perform in-line with the relevant broad market benchmark over the next 12 months.

**Underweight:** Industry expected to underperform the relevant broad market benchmark over the next 12 months.

\*An analyst's coverage universe consists of all companies covered by the analyst within the relevant sector.

\*\*The broad market benchmark is based on the expected return of the local market index (e.g., the S&P 500 in the U.S.) over the next 12 months.

**Credit Suisse's distribution of stock ratings (and banking clients) is:**

Global Ratings Distribution		
Outperform/Buy*	48%	(62% banking clients)
Neutral/Hold*	40%	(56% banking clients)
Underperform/Sell*	10%	(51% banking clients)
Restricted	3%	

\*For purposes of the NYSE and NASD ratings distribution disclosure requirements, our stock ratings of Outperform, Neutral, and Underperform most closely correspond to Buy, Hold, and Sell, respectively; however, the meanings are not the same, as our stock ratings are determined on a relative basis. (Please refer to definitions above.) An investor's decision to buy or sell a security should be based on investment objectives, current holdings, and other individual factors.

Credit Suisse's policy is to update research reports as it deems appropriate, based on developments with the subject company, the sector or the market that may have a material impact on the research views or opinions stated herein.

Credit Suisse's policy is only to publish investment research that is impartial, independent, clear, fair and not misleading. For more detail please refer to Credit Suisse's Policies for Managing Conflicts of Interest in connection with Investment Research: [http://www.csfb.com/research-and-analytics/disclaimer/managing\\_conflicts\\_disclaimer.html](http://www.csfb.com/research-and-analytics/disclaimer/managing_conflicts_disclaimer.html)

Credit Suisse does not provide any tax advice. Any statement herein regarding any US federal tax is not intended or written to be used, and cannot be used, by any taxpayer for the purposes of avoiding any penalties.

See the Companies Mentioned section for full company names.

**Price Target:** (12 months) for (FTS.TO)

**Method:** We obtain our C\$34.00 target price for Fortis Inc. by using multiple valuation methodologies, yield base analysis, and discounted cash flow, all of which produce the C\$34.00 target. Our target price implies a P/E (price/earnings) multiple of 18.5x our 2012 EPS (earnings per share) estimate of C\$1.86 and an EV/EBITDA (enterprise value/earnings before interest, taxes, depreciation, and amortization) multiple of 10.5x our EBITDA estimate.

**Risks:** There are a number of risks to Fortis' achievement of our C\$34.00 target price: commodity prices; weather; environmental; regulatory; access to capital markets; and, interest rates. Moreover, one should never underestimate the power of the regulator in any regulated business.

Please refer to the firm's disclosure website at [www.credit-suisse.com/researchdisclosures](http://www.credit-suisse.com/researchdisclosures) for the definitions of abbreviations typically used in the target price method and risk sections.

See the Companies Mentioned section for full company names.

The subject company (FTS.TO) currently is, or was during the 12-month period preceding the date of distribution of this report, a client of Credit Suisse.

Credit Suisse provided investment banking services to the subject company (FTS.TO) within the past 12 months.

Credit Suisse provided non-investment banking services, which may include Sales and Trading services, to the subject company (FTS.TO) within the past 12 months.

Credit Suisse expects to receive or intends to seek investment banking related compensation from the subject company (FTS.TO) within the next 3 months.

Credit Suisse has received compensation for products and services other than investment banking services from the subject company (FTS.TO) within the past 12 months.

**Important Regional Disclosures**

Singapore recipients should contact a Singapore financial adviser for any matters arising from this research report.

An analyst involved in the preparation of this report has visited certain material operations of the subject company (FTS.TO) within the past 12 months. The analyst may not have visited all material operations of the subject company. The travel expenses of the analyst in connection with such visits were not paid or reimbursed by the subject company, other than de minimus local travel expenses.

Restrictions on certain Canadian securities are indicated by the following abbreviations: NVS--Non-Voting shares; RVS--Restricted Voting Shares; SVS--Subordinate Voting Shares.

Individuals receiving this report from a Canadian investment dealer that is not affiliated with Credit Suisse should be advised that this report may not contain regulatory disclosures the non-affiliated Canadian investment dealer would be required to make if this were its own report.

For Credit Suisse Securities (Canada), Inc.'s policies and procedures regarding the dissemination of equity research, please visit [http://www.csfb.com/legal\\_terms/canada\\_research\\_policy.shtml](http://www.csfb.com/legal_terms/canada_research_policy.shtml).

As of the date of this report, Credit Suisse acts as a market maker or liquidity provider in the equities securities that are the subject of this report.

Principal is not guaranteed in the case of equities because equity prices are variable.

Commission is the commission rate or the amount agreed with a customer when setting up an account or at anytime after that.

CS may have issued a Trade Alert regarding this security. Trade Alerts are short term trading opportunities identified by an analyst on the basis of market events and catalysts, while stock ratings reflect an analyst's investment recommendations based on expected total return over a 12-month period relative to the relevant coverage universe. Because Trade Alerts and stock ratings reflect different assumptions and analytical methods, Trade Alerts may differ directionally from the analyst's stock rating.

The author(s) of this report maintains a CS Model Portfolio that he/she regularly adjusts. The security or securities discussed in this report may be a component of the CS Model Portfolio and subject to such adjustments (which, given the composition of the CS Model Portfolio as a whole, may differ from the recommendation in this report, as well as opportunities or strategies identified in Trading Alerts concerning the same security). The CS Model Portfolio and important disclosures about it are available at [www.credit-suisse.com/ti](http://www.credit-suisse.com/ti).

To the extent this is a report authored in whole or in part by a non-U.S. analyst and is made available in the U.S., the following are important disclosures regarding any non-U.S. analyst contributors:

The non-U.S. research analysts listed below (if any) are not registered/qualified as research analysts with FINRA. The non-U.S. research analysts listed below may not be associated persons of CSSU and therefore may not be subject to the NASD Rule 2711 and NYSE Rule 472 restrictions on communications with a subject company, public appearances and trading securities held by a research analyst account.

- Andrew M. Kuske, non-U.S. analyst, is a research analyst employed by Credit Suisse Securities (Canada), Inc..
- Paul Tan, non-U.S. analyst, is a research analyst employed by Credit Suisse Securities (Canada), Inc..

Taiwanese Disclosures: Reports written by Taiwan-based analysts on non-Taiwan listed companies are not considered recommendations to buy or sell securities under Taiwan Stock Exchange Operational Regulations Governing Securities Firms Recommending Trades in Securities to Customers.

For Credit Suisse disclosure information on other companies mentioned in this report, please visit the website at [www.credit-suisse.com/researchdisclosures](http://www.credit-suisse.com/researchdisclosures) or call +1 (877) 291-2683.

Disclaimers continue on next page.

This report is not directed to, or intended for distribution to or use by, any person or entity who is a citizen or resident of or located in any locality, state, country or other jurisdiction where such distribution, publication, availability or use would be contrary to law or regulation or which would subject Credit Suisse AG, the Swiss bank, or its subsidiaries or its affiliates ("CS") to any registration or licensing requirement within such jurisdiction. All material presented in this report, unless specifically indicated otherwise, is under copyright to CS. None of the material, nor its content, nor any copy of it, may be altered in any way, transmitted to, copied or distributed to any other party, without the prior express written permission of CS. All trademarks, service marks and logos used in this report are trademarks or service marks or registered trademarks or service marks of CS or its affiliates.

The information, tools and material presented in this report are provided to you for information purposes only and are not to be used or considered as an offer or the solicitation of an offer to sell or to buy or subscribe for securities or other financial instruments. CS may not have taken any steps to ensure that the securities referred to in this report are suitable for any particular investor. CS will not treat recipients as its customers by virtue of their receiving the report. The investments or services contained or referred to in this report may not be suitable for you and it is recommended that you consult an independent investment advisor if you are in doubt about such investments or investment services. Nothing in this report constitutes investment, legal, accounting or tax advice or a representation that any investment or strategy is suitable or appropriate to your individual circumstances or otherwise constitutes a personal recommendation to you. CS does not offer advice on the tax consequences of investment and you are advised to contact an independent tax adviser. Please note in particular that the bases and levels of taxation may change.

CS believes the information and opinions in the Disclosure Appendix of this report are accurate and complete. Information and opinions presented in the other sections of the report were obtained or derived from sources CS believes are reliable, but CS makes no representations as to their accuracy or completeness. Additional information is available upon request. CS accepts no liability for loss arising from the use of the material presented in this report, except that this exclusion of liability does not apply to the extent that liability arises under specific statutes or regulations applicable to CS. This report is not to be relied upon in substitution for the exercise of independent judgment. CS may have issued, and may in the future issue, a trading call regarding this security. Trading calls are short term trading opportunities based on market events and catalysts, while stock ratings reflect investment recommendations based on expected total return over a 12-month period as defined in the disclosure section. Because trading calls and stock ratings reflect different assumptions and analytical methods, trading calls may differ directionally from the stock rating. In addition, CS may have issued, and may in the future issue, other reports that are inconsistent with, and reach different conclusions from, the information presented in this report. Those reports reflect the different assumptions, views and analytical methods of the analysts who prepared them and CS is under no obligation to ensure that such other reports are brought to the attention of any recipient of this report. CS is involved in many businesses that relate to companies mentioned in this report. These businesses include specialized trading, risk arbitrage, market making, and other proprietary trading.

Past performance should not be taken as an indication or guarantee of future performance, and no representation or warranty, express or implied, is made regarding future performance. Information, opinions and estimates contained in this report reflect a judgement at its original date of publication by CS and are subject to change without notice. The price, value of and income from any of the securities or financial instruments mentioned in this report can fall as well as rise. The value of securities and financial instruments is subject to exchange rate fluctuation that may have a positive or adverse effect on the price or income of such securities or financial instruments. Investors in securities such as ADR's, the values of which are influenced by currency volatility, effectively assume this risk.

Structured securities are complex instruments, typically involve a high degree of risk and are intended for sale only to sophisticated investors who are capable of understanding and assuming the risks involved. The market value of any structured security may be affected by changes in economic, financial and political factors (including, but not limited to, spot and forward interest and exchange rates), time to maturity, market conditions and volatility, and the credit quality of any issuer or reference issuer. Any investor interested in purchasing a structured product should conduct their own investigation and analysis of the product and consult with their own professional advisers as to the risks involved in making such a purchase.

Some investments discussed in this report have a high level of volatility. High volatility investments may experience sudden and large falls in their value causing losses when that investment is realised. Those losses may equal your original investment. Indeed, in the case of some investments the potential losses may exceed the amount of initial investment, in such circumstances you may be required to pay more money to support those losses. Income yields from investments may fluctuate and, in consequence, initial capital paid to make the investment may be used as part of that income yield. Some investments may not be readily realisable and it may be difficult to sell or realise those investments, similarly it may prove difficult for you to obtain reliable information about the value, or risks, to which such an investment is exposed.

### COMPANY UPDATE

## A positive pass

- **Terminating transaction:** Fortis Inc. announced the Central Vermont Public Service Corporation's (CVPS) Board of Directors determined Gaz Métro Limited Partnership's acquisition proposal was a "Superior Proposal". Thus, CVPS terminated the Merger Agreement with Fortis Inc. As a result, Fortis will receive a termination fee of US\$17.5m plus US\$2.0m in expenses. We believe the transaction illustrates the company's traditional discipline by not engaging in a bidding war. Roughly concurrent with the initial bid for CV, Fortis raised more than C\$300m of gross proceeds from an equity issue. We believe the money gives more flexibility for Fortis to potentially accelerate the existing capital program, de-levering or engage in further acquisitions.
- **Positive pass:** We continue to believe Fortis is extremely well positioned to consolidate the small to mid-cap US utility sector. In our view, Fortis remains a disciplined buyer of assets with a view for longer-term rate base growth. In light of the difficulties around many utility transactions, we do not expect FTS to announce another deal in short order. Yet, we believe FTS will continue to be very active in the US market for the "right" utility deal. Despite the Street's potential lingering M&A concerns, we believe the shares rally on the CV deal termination.
- **Improving capital market conditions:** Historically, Fortis has been very adept at acquisitions. Corporate growth has benefited from the company's ability to successfully acquire and integrate selected assets. In our view, the company is well positioned in the current market for acquisition opportunities.
- **Valuation:** Our C\$34.target price and Neutral rating are obtained utilizing multiple valuation approaches, including: an 18.5x P/E multiple of 2012 earnings; a 1.8x book value multiple; and, a DCF based valuation. We reiterate our Neutral rating.

## Disclosure Appendix

### Important Global Disclosures

I, Andrew M. Kuske, certify that (1) the views expressed in this report accurately reflect my personal views about all of the subject companies and securities and (2) no part of my compensation was, is or will be directly or indirectly related to the specific recommendations or views expressed in this report.

See the Companies Mentioned section for full company names.

### 3-Year Price, Target Price and Rating Change History Chart for FTS.TO

The analyst(s) responsible for preparing this research report received compensation that is based upon various factors including Credit Suisse's total revenues, a portion of which are generated by Credit Suisse's investment banking activities.

### Analysts' stock ratings are defined as follows:

**Outperform (O):** The stock's total return is expected to outperform the relevant benchmark\* by at least 10-15% (or more, depending on perceived risk) over the next 12 months.

**Neutral (N):** The stock's total return is expected to be in line with the relevant benchmark\* (range of  $\pm 10-15\%$ ) over the next 12 months.

**Underperform (U):** The stock's total return is expected to underperform the relevant benchmark\* by 10-15% or more over the next 12 months.

\*Relevant benchmark by region: As of 29<sup>th</sup> May 2009, Australia, New Zealand, U.S. and Canadian ratings are based on (1) a stock's absolute total return potential to its current share price and (2) the relative attractiveness of a stock's total return potential within an analyst's coverage universe\*\*, with Outperforms representing the most attractive, Neutrals the less attractive, and Underperforms the least attractive investment opportunities. Some U.S. and Canadian ratings may fall outside the absolute total return ranges defined above, depending on market conditions and industry factors. For Latin American, Japanese, and non-Japan Asia stocks, ratings are based on a stock's total return relative to the average total return of the relevant country or regional benchmark; for European stocks, ratings are based on a stock's total return relative to the analyst's coverage universe\*\*. For Australian and New Zealand stocks a 22% and a 12% threshold replace the 10-15% level in the Outperform and Underperform stock rating definitions, respectively, subject to analysts' perceived risk. The 22% and 12% thresholds replace the +10-15% and -10-15% levels in the Neutral stock rating definition, respectively, subject to analysts' perceived risk.

\*\*An analyst's coverage universe consists of all companies covered by the analyst within the relevant sector.

**Restricted (R):** In certain circumstances, Credit Suisse policy and/or applicable law and regulations preclude certain types of communications, including an investment recommendation, during the course of Credit Suisse's engagement in an investment banking transaction and in certain other circumstances.

**Volatility Indicator [V]:** A stock is defined as volatile if the stock price has moved up or down by 20% or more in a month in at least 8 of the past 24 months or the analyst expects significant volatility going forward.

### Analysts' coverage universe weightings are distinct from analysts' stock ratings and are based on the expected performance of an analyst's coverage universe\* versus the relevant broad market benchmark\*\*:

**Overweight:** Industry expected to outperform the relevant broad market benchmark over the next 12 months.

**Market Weight:** Industry expected to perform in-line with the relevant broad market benchmark over the next 12 months.

**Underweight:** Industry expected to underperform the relevant broad market benchmark over the next 12 months.

\*An analyst's coverage universe consists of all companies covered by the analyst within the relevant sector.

\*\*The broad market benchmark is based on the expected return of the local market index (e.g., the S&P 500 in the U.S.) over the next 12 months.

**Credit Suisse's distribution of stock ratings (and banking clients) is:**

Global Ratings Distribution		
<b>Outperform/Buy*</b>	48%	(61% banking clients)
<b>Neutral/Hold*</b>	40%	(57% banking clients)
<b>Underperform/Sell*</b>	10%	(52% banking clients)
<b>Restricted</b>	2%	

\*For purposes of the NYSE and NASD ratings distribution disclosure requirements, our stock ratings of Outperform, Neutral, and Underperform most closely correspond to Buy, Hold, and Sell, respectively; however, the meanings are not the same, as our stock ratings are determined on a relative basis. (Please refer to definitions above.) An investor's decision to buy or sell a security should be based on investment objectives, current holdings, and other individual factors.

Credit Suisse's policy is to update research reports as it deems appropriate, based on developments with the subject company, the sector or the market that may have a material impact on the research views or opinions stated herein.

Credit Suisse's policy is only to publish investment research that is impartial, independent, clear, fair and not misleading. Credit Suisse does not provide any tax advice. Any statement herein regarding any US federal tax is not intended or written to be used, and cannot be used, by any taxpayer for the purposes of avoiding any penalties.

See the Companies Mentioned section for full company names.

**Price Target:** (12 months) for (FTS.TO)

**Method:** We obtain our C\$34.00 target price for Fortis Inc. by using multiple valuation methodologies, yield base analysis, and discounted cash flow, all of which produce the C\$34.00 target. Our target price implies a P/E (price/earnings) multiple of 18.5x our 2012 EPS (earnings per share) estimate of C\$1.86 and an EV/EBITDA (enterprise value/earnings before interest, taxes, depreciation, and amortization) multiple of 10.5x our EBITDA estimate.

**Risks:** There are a number of risks to Fortis' achievement of our C\$34.00 target price: commodity prices; weather; environmental; regulatory; access to capital markets; and, interest rates. Moreover, one should never underestimate the power of the regulator in any regulated business.

Please refer to the firm's disclosure website at [www.credit-suisse.com/researchdisclosures](http://www.credit-suisse.com/researchdisclosures) for the definitions of abbreviations typically used in the target price method and risk sections.

See the Companies Mentioned section for full company names.

The subject company (FTS.TO) currently is, or was during the 12-month period preceding the date of distribution of this report, a client of Credit Suisse.

Credit Suisse provided investment banking services to the subject company (FTS.TO) within the past 12 months.

Credit Suisse provided non-investment banking services, which may include Sales and Trading services, to the subject company (FTS.TO) within the past 12 months.

Credit Suisse expects to receive or intends to seek investment banking related compensation from the subject company (FTS.TO) within the next 3 months.

Credit Suisse has received compensation for products and services other than investment banking services from the subject company (FTS.TO) within the past 12 months.

**Important Regional Disclosures**

Singapore recipients should contact a Singapore financial adviser for any matters arising from this research report.

An analyst involved in the preparation of this report has visited certain material operations of the subject company (FTS.TO) within the past 12 months. The analyst may not have visited all material operations of the subject company. The travel expenses of the analyst in connection with such visits were not paid or reimbursed by the subject company, other than de minimus local travel expenses.

Restrictions on certain Canadian securities are indicated by the following abbreviations: NVS--Non-Voting shares; RVS--Restricted Voting Shares; SVS--Subordinate Voting Shares.

Individuals receiving this report from a Canadian investment dealer that is not affiliated with Credit Suisse should be advised that this report may not contain regulatory disclosures the non-affiliated Canadian investment dealer would be required to make if this were its own report.

For Credit Suisse Securities (Canada), Inc.'s policies and procedures regarding the dissemination of equity research, please visit [http://www.csfb.com/legal\\_terms/canada\\_research\\_policy.shtml](http://www.csfb.com/legal_terms/canada_research_policy.shtml).

As of the date of this report, Credit Suisse acts as a market maker or liquidity provider in the equities securities that are the subject of this report.

Principal is not guaranteed in the case of equities because equity prices are variable.

Commission is the commission rate or the amount agreed with a customer when setting up an account or at anytime after that.

CS may have issued a Trade Alert regarding this security. Trade Alerts are short term trading opportunities identified by an analyst on the basis of market events and catalysts, while stock ratings reflect an analyst's investment recommendations based on expected total return over a 12-month period relative to the relevant coverage universe. Because Trade Alerts and stock ratings reflect different assumptions and analytical methods, Trade Alerts may differ directionally from the analyst's stock rating.

The author(s) of this report maintains a CS Model Portfolio that he/she regularly adjusts. The security or securities discussed in this report may be a component of the CS Model Portfolio and subject to such adjustments (which, given the composition of the CS Model Portfolio as a whole, may differ from the recommendation in this report, as well as opportunities or strategies identified in Trading Alerts concerning the same security). The CS Model Portfolio and important disclosures about it are available at [www.credit-suisse.com/ti](http://www.credit-suisse.com/ti).

To the extent this is a report authored in whole or in part by a non-U.S. analyst and is made available in the U.S., the following are important disclosures regarding any non-U.S. analyst contributors:

The non-U.S. research analysts listed below (if any) are not registered/qualified as research analysts with FINRA. The non-U.S. research analysts listed below may not be associated persons of CSSU and therefore may not be subject to the NASD Rule 2711 and NYSE Rule 472 restrictions on communications with a subject company, public appearances and trading securities held by a research analyst account.

- Andrew M. Kuske, non-U.S. analyst, is a research analyst employed by Credit Suisse Securities (Canada), Inc..
- Paul Tan, non-U.S. analyst, is a research analyst employed by Credit Suisse Securities (Canada), Inc..

Taiwanese Disclosures: Reports written by Taiwan-based analysts on non-Taiwan listed companies are not considered recommendations to buy or sell securities under Taiwan Stock Exchange Operational Regulations Governing Securities Firms Recommending Trades in Securities to Customers.

**Upgrade to Outperform; acquisitions on the sidelines with CH Energy regulatory process**

- **Upgrade to Outperform:** We upgrade Fortis to Outperform from our prior Neutral rating and boost our target price to C\$38 from the previous C\$34. In historical terms, Fortis is trading more than 200 bps wide of the 10-year yield spread average. That value combined with completion of the CH Energy deal funding, along with other acquisitions being more distant in time, provides the rationale for the upgrade. Additionally, those factors are also supported by the prolonged low interest rate environment further benefitting the corporate valuation.
- **Transaction timing:** Fortis expects the CH Energy deal to close by the end of Q1 2013. In our view, Fortis will largely be on the sidelines from the M&A market until this deal officially closes with the necessary regulatory approvals. Therefore, we do not expect a typical acquisition overhang to surround the potential deal-making activities of the stock. Yet, we believe a greater focus on the potential of CH, among other prospects, will come into the stock over the next few quarters.
- **Improving capital market conditions:** Historically, Fortis has been very adept at acquisitions. After the closing of the CH deal, we believe FTS is well positioned for additional opportunities. Fortis recently stated, "We remain disciplined and patient in our pursuit of additional electric and gas utility acquisitions in the United States and Canada that will add value for Fortis shareholders".
- **Valuation:** We obtain our revised C\$38 target price (up from the prior C\$34) from multiple valuation methods, but we primarily rely upon a targeted dividend yield of 3.25%. We upgrade Fortis to Outperform.

### UPGRADE RATING

## Caught in the downdraft

- **Earnings review:** Fortis reported Q1 2011 headline EPS (FD) of C\$0.33 slightly below our C\$0.34 estimate, the Street's C\$0.347 view and at the bottom end of the C\$0.33-C\$0.36 range. Year-to-date, Fortis shares have been the weakest performer in the Canadian utility universe returning -9%. We believe Fortis delivers organic growth that is combined with a disciplined acquisition framework. In our view, the market remains somewhat concerned about deal potential and the Belize Electricity situation. Given the potential excess return, we upgrade FTS to Outperform from the previous Neutral. Our target is maintained at C\$34.
- **Significant organic growth continues:** Fortis continues to provide a rather robust capital expenditure outlook with a reiteration of the C\$1.2bn target for 2011. Additionally, Fortis increased the 5-year capex outlook to C\$5.7b from C\$5.5bn. Eighty-four percent of that total amount is expected to go towards utility activity that should deliver favourable risk adjusted returns.
- **Improving capital market conditions:** Historically, Fortis has been very adept at acquisitions. Corporate growth has benefited from the company's ability to successfully acquire and integrate selected assets. In our view, the company is well positioned in the current market for acquisition opportunities. The company stated, "We are disciplined and patient in our pursuit of electric and gas utility acquisitions in the United States and Canada that will add value for Fortis shareholders".
- **Valuation:** With the recent sell-off, we upgrade our FTS rating to Outperform from the previous Neutral. We also maintain our C\$34 that is obtained via multiple valuation approaches, including: an 18.5x P/E multiple of 2012 earnings; a 1.7x book value multiple; and, a DCF-based valuation. We introduce our Outperform rating.

### Share price performance

Largely inline results

## Results

Exhibit 1 highlights the segmented unadjusted earnings contributions for the most recent quarter and for the comparable period one year ago. Our commentary for each segment appears under the various headings below.

### Exhibit 1: Segmented unadjusted earnings contribution

C\$ in millions, unless otherwise stated

	Q2 2011	Q2 2010	chg y/y
Regulated Gas Utilities - Canadian	15	17	-12%
Regulated Electric Utilities - Canadian	45	40	13%
Regulated Electric Utilities - Caribbean	7	7	0%
Non-regulated - Fortis Generation	2	3	-33%
Non-regulated - Fortis Properties	7	8	-13%
Corporate and other	(18)	(20)	10%
Net earnings applicable to common shares	58	55	5%

Source: Company data and Credit Suisse

### Regulated Gas Utilities - Canadian

The unadjusted earnings for this segment decreased by roughly 12% year-over-year (see Exhibit 2). Some notable items for the regulated gas utilities, include:

- Net customer additions were 1,002 during H1 2011 versus net addition of 1,829 during the H1 2010;
- The amount of customer additions decreased versus H1 2010 due to lower building activity; and,
- Sales volumes for the quarter increased for all the segments (Core-Residential and Commercial, the Industrial segment and transportation volumes).

### Exhibit 2: Regulated Gas Utilities (unadjusted)

	Q2 2011	Q2 2010	chg y/y
FortisBC Energy	15.0	17.0	-12%

Source: Company data and Credit Suisse

### Regulated Electric Utilities – Canadian

This segment includes operating companies like FortisAlberta, FortisBC Electric, Newfoundland Power and Other Canadian Electric Utilities, which includes Maritime Electric and FortisOntario. Detailed contributions for each of these divisions can be found in Exhibit 3.

### Exhibit 3: Regulated electric utilities – Canadian contribution (unadjusted)

C\$ in millions, unless otherwise stated

	Q2 2011	Q2 2010	chg y/y
FortisAlberta	19	17	12%
FortisBC Electric	9	8	13%
Newfoundland Power	11	11	0%
Other Cdn Electric Utilities	6	4	50%
Earnings	45	40	13%

## FortisAlberta

Earnings at this regulated utility were up by roughly 12% comparing Q2 2011 versus the prior period. See Exhibit 4 for selected highlights.

Increase in energy delivery in Alberta

**Exhibit 4: Selected FortisAlberta performance highlights (unadjusted)**

	Q2 2011	Q2 2010	chg y/y
Energy deliveries (GWh)	3,822	3,784	1%
Revenue (C\$/MWh)	27.21	24.31	12%
Operating expenses (C\$/MWh)	9.42	9.51	-1%
Gross margin (C\$/MWh)	17.79	14.80	20%
Earnings (C\$millions)	19	17	12%

Source: Company data and Credit Suisse

## FortisBC Electric

Segmented earnings at FortisBC Electric increased by 13% compared to the same period last year. The increase was due rate base growth due to continued investment in utility capital assets and lower-than-expected average market priced purchase power costs. See Exhibit 5 for selected highlights.

Increase in energy deliveries in BC

**Exhibit 5: Selected FortisBC Electric performance highlights (unadjusted)**

	Q2 2011	Q2 2010	chg y/y
Energy deliveries (GWh)	682	671	2%
Revenue (C\$/MWh)	93.84	87.93	7%
Energy supply costs (C\$/MWh)	16.13	19.37	-17%
Operating expenses (C\$/MWh)	30.79	28.32	9%
Gross margin (C\$/MWh)	46.92	40.24	17%
Earnings (C\$millions)	9	8	13%

Source: Company data and Credit Suisse

## Newfoundland Power

This segment's earnings generation was flat when comparing Q2 2011 versus Q2 2010. Higher electricity sales and lower effective income taxes were offset by timing of certain labour costs in H1 2011, wage and inflationary increases and lower allowed ROE. Energy deliveries were up by approximately 4% (see Exhibit 6).

Increase in NP's energy deliveries

**Exhibit 6: Selected Newfoundland Power performance highlights (unadjusted)**

	Q2 2011	Q2 2010	chg y/y
Energy deliveries (GWh)	1,269	1,220	4%
Revenue (C\$/MWh)	104.81	103.28	1%
Energy supply costs (C\$/MWh)	63.04	61.48	3%
Operating expenses (C\$/MWh)	13.40	12.30	9%
Gross margin (C\$/MWh)	28.37	29.51	-4%
Earnings (C\$millions)	11	11	0%

Source: Company data, Credit Suisse estimates

## Other Canadian Electric Utilities

The roughly 5% increase in energy deliveries was primarily the result of higher average consumption due to colder temperatures in Ontario and Prince Edward Island. Exhibit 7 contains selected highlights.

Increase in energy deliveries

**Regulated Electric Utilities – Caribbean**

Awaiting a decision in Belize

This segment includes Belize Electricity (up to June 20, 2011), Caribbean Utilities, and Fortis Turks and Caicos. Earnings for this segment were flat when compared the same quarter last year at C\$7m. Energy deliveries declined 6% for several reasons. In our view, Belize Electricity was not overly material to Fortis. Additionally, we anticipate the dispute to be resolved in a rationale manner with Fortis recovering, at least, the rate base value. Yet, any such recovery may be over a period of time.

See Exhibit 8 below for selected highlights.

**Exhibit 8: Caribbean - Regulated Electric Utilities performance highlights (unadjusted)**

	Q2 2011	Q2 2010	chg y/y
Energy deliveries (GWh)	290	307	-6%
Revenue (C\$/MWh)	300.00	270.36	11%
Energy supply costs (C\$/MWh)	182.76	153.09	19%
Operating expenses (C\$/MWh)	37.93	35.83	6%
Gross margin (C\$/MWh)	79.31	81.43	-3%
Earnings (C\$millions)	7	7	0%

Source: Company data and Credit Suisse

**Non-regulated – Fortis Generation**

The non-regulated generation assets within this segment are located in Belize, British Columbia, Central Newfoundland, Ontario and Upper New York State. Earnings for the segment were down 33% from the current quarter compared to the same quarter last year. Energy deliveries increased by 3% from Q2 2010 to Q2 2011 due increased production New York and Ontario caused by higher rainfall. Exhibit 9 provides selected highlights.

**Exhibit 9: Non-regulated generation – selected highlights**

	Q2 2011	Q2 2010	chg y/y
Energy deliveries (GWh)	90	87	3%
Revenue (C\$/MWh)	77.78	91.95	-15%
Energy supply costs (C\$/MWh)	11.11	11.49	-3%
Operating expenses (C\$/MWh)	11.11	22.99	-52%
Gross margin (C\$/MWh)	55.56	57.47	-3%
Earnings (C\$millions)	2	3	-33%

Source: Company data and Credit Suisse

**Non-regulated – Fortis Properties**

Fortis Properties' net unadjusted earning contribution during the quarter was C\$7m which is lower than Q2 2010 earnings of C\$8m. REVPAR slightly decreased to C\$83.57 from C\$83.77 for the comparable period last year. Additionally, the occupancy rate of the Real Estate Division was down at 93.4% versus last year's 94.8%.

**Corporate**

Corporate expenses decreased to C\$18million in Q2 2011 from C\$20m in Q2 2010.

## Outlook

We continue to believe investor, whether existing or prospective, should consider several major issues, including (a) funding organic growth; (b) rising returns; and, (c) acquisition trail. Each of these issues is addressed below.

### Funding organic growth

In the most recent quarter the company's reported capital expenditures totaled C\$286 million, of which C\$221 million was spent at regulated utilities. Fortis continues to guide that capital expenditures for 2011 will be roughly C\$1.2 billion. A majority of the total will be spent on Western Canadian assets (FortisBC Energy, FortisAlberta, and FortisBC Electric). Fortis increased consolidated gross capital expenditures expectations over the 5 year plan (2011-2015) to C\$5.7bn from the previous guidance of C\$5.5bn with 84% of that total amount being allocated to regulated utilities. Both FortisAlberta and FortisBC Electric will receive the vast majority of that amount; whereas, the regulated gas utilities are planned to receive 23% of the total capex amount, and 16% is allocated to non-regulated operations. Given the regulated rates of return with utility capital expenditures, the increases should be viewed as longer-term positives provided an appropriate financial balance is struck.

With the significant current relative valuation advantages, we believe that Fortis may become more motivated to explore possible capital efficiency initiatives. In our view, the company possesses ample opportunities to become much more capital efficient. One strategy involves divesting certain non-utility assets and redeploying capital into utility assets or funding the capital program. Another option would entail divesting partial interests in selected utility assets in an asset management model approach and receiving a management fee.

In fact, some of the media reports prior to the official announcement of PPL Corporation's acquisition of E.ON's Kentucky utility assets for US\$7.625 billion stated that a consortium led by Fortis Inc. was one of three finalists for those assets. We would regard that type of information in media reports as being something akin to an asset management style of approach. Ultimately, we believe that such a strategy would help Fortis generate a higher level of returns. Additionally, the use of an asset management type approach would make large acquisitions which could potentially further accelerate growth.

Generally, we continue to prefer pure-play utility companies without an undue amount of non-core asset exposure. Historically, non-core assets (especially real estate) have been somewhat commonplace for many utilities. Fortis has been no exception to that approach. Notably, the mix of commercial and hospitality real estate assets held by Fortis have been positive contributors and also provide the company a bit of financial flexibility for a selection of reasons. In light of current market conditions, we believe there is a much less compelling case for the monetization of these assets than as in the past. We note Fortis Properties continues to increase in scale and scope which may eventually make it more attractive for acquisition or monetization. Yet, for a number of reasons, we continue to believe there is a rather low probability of either of those events occurring.

Even discounting the potential monetization of assets that we would consider to be non-core, we believe Fortis possesses considerable potential to become much more capital efficient. Given the significant interest in infrastructure assets by many investors seeking long-dated types of return, Fortis could easily divest portions of its existing asset base to pension fund investors and charge a management fee for their operational and management expertise. This type of approach could significantly improve capital efficiency and returns on capital. In addition, this asset management approach could also free-up capital that could be used to fund the existing capital program or fund future acquisitions.

Ongoing organic growth

Opportunities for improved capital efficiency

Capital efficiency initiatives could aid funding of acquisitions or the existing capital program funding

## Rising returns

Positively, Fortis has been successful in obtaining several favourable regulatory decisions. For example, the allowed equity at Terasen Gas Inc. (TGI) was boosted from 35% to 40% effective January 1, 2010. In addition to that positive move for the equity base, the allowed return on equity for TGI increased from 8.47% to 9.50%. In a related judgment, Terasen Gas (Vancouver Island) Inc. (TGVI) and Terasen Gas Whistler Inc. (TGWI) returns increased from 9.17% to 10%. Additionally, the British Columbia Utilities Commission (BCUC) held the former automatic adjustment mechanism for annual ROE determination would no longer apply. Also in BC, FortisBC obtained an increased allowed ROE from 8.87% to 9.90% that became effective on January 1, 2010. The upward bias in utility returns should be viewed positively. Clearly, many questions exist as to the methods for determining and predicting future return levels. Yet, we view the regulatory movement away from a very mechanical return approach work as a notable positive that should help ensure an appropriate level of returns over a period of time.

Similar to the BCUC, the Alberta Utilities Commission (AUC) issued a decision on the 2009 Generic Cost of Capital establishing a 9% ROE for utilities like FortisAlberta in 2009 and 2010. Under the previous formulaic approach, that utility would have been entitled to an 8.61% return. Moreover, the allowed equity within the regulated capital structure moved from 37% to 41% effective January 1, 2009. Notably, this return framework will be in effect for 2011 providing a level of certainty to FortisAlberta's future earnings.

Unfortunately, not every jurisdiction is proving to be as progressive as Alberta, BC and the National Energy Board in the regulated Trans-Quebec & Maritimes Pipeline decision (see file RH-1-2008 and our March 19, 2009 note "*Regulatory round-up*"). The Newfoundland and Labrador Board of Commissioners of Public Utilities (PUB) most recent decision increased the allowed ROE for Newfoundland Power from 8.95% in 2009 to 9% in 2010. Additionally, in the past, the PUB ordered Newfoundland Power's allowed ROEs for 2011 and 2012 would be determined by an automated formula that will be subject to review in Q1 2010. We do not need to belabour all of the regulatory developments, however, we note that returns are slowly biasing to the upside.

## Acquisition trail

In our view, Fortis continues to demonstrate a rather impressive ability to successfully integrate acquisitions. Additionally, we view acquisitions as somewhat central to the company's growth strategy. For instance, the company's most recent Management Discussion and Analysis stated "We will continue to pursue acquisitions of regulated electric and natural gas utilities in the United States and Canada that will add value for our shareholders". Given the success of Fortis in past transactions, as measured in terms of financials, share price and operationally, we believe the company's current valuation and skill set may lead to some potentially value creating acquisition activity (see Exhibit 10 below for select Fortis M&A transactions).

**Exhibit 10: Selected Fortis M&A transactions**

\$ in millions, unless otherwise stated

Announced Date	Asset/Company	Deal value (\$m)	Comment
7/22/2009	Caribbean Utilities Co.	CAD 6.74	Acquired an additional 2.7% of Caribbean Utilities Co.
6/23/2009	Great Lakes Power Distribution	CAD 68.00	Acquired from Brookfield the utility that serves the District of Algoma in northern Ontario.
10/1/2008	Grimsby Power Inc.	CAD 1.10	Acquired a 10% minority interest.
10/1/2008	Caribbean Utilities Co.	CAD 3.00	Acquired an additional 1% of Caribbean Utilities Co.
8/15/2008	Caribbean Utilities Co.	CAD 25.00	Acquired an additional 2% of Caribbean Utilities Co.
7/23/2007	Delta Regina	CAD 49.95	Delta hotel located in Regina, Saskatchewan.
2/26/2007	Terasen Inc.	CAD 3,700.00	Gas distribution in British Columbia.
11/7/2006	Caribbean Utilities Co.	CAD 55.70	Acquired an additional 16% of Caribbean Utilities Co.
10/19/2006	4 hotels in western Canada	CAD 51.60	4 hotels (Holiday Inn, Best Western and Ramada) located in BC and Alberta.
8/28/2006	PPC Ltd & Atlantic Equipment & Power (Turks & Caicos) Ltd.	CAD 97.70	Electric utility that services ~80% of the Turks and Caicos Islands.
1/25/2005	3 hotels in western Canada	CAD 62.60	3 hotels in Western Canada from Greenwood Inns (Calgary, Edmonton and Winnipeg).
12/15/2004	Princeton Light & Power	CAD 3.70	PLP is an electric utility that services Princeton, BC.
5/21/2004	Belize Electric Company Ltd.	USD 3.50	Acquired the remaining 5% interest of the company.
9/17/2003	4 hotels in Ontario	CAD 43.20	4 hotels located in Ontario (Cambridge, Kitchener, Sarnia and Peterborough).

2/26/2003	Granite Power Corp	CAD 8.80	Company consist of Granite Power Distribution & Granite Power Generation.
1/30/2003	Caribbean Utilities Co.	CAD 71.00	Acquired additional 3,863,695 Class A Ordinary Shares, representing approximately 15.9 per cent of the outstanding shares of the company and increased Fortis' holding to roughly 38%.
12/1/2002	Delta St John's Hotel and conference centre	CAD 25.90	Hotel in downtown St. John's, Newfoundland
5/9/2002	Cornwall Street Railway Light	CAD 67.70	City of Cornwall electric transmission & distribution utility.
4/16/2002	Kings Place	CAD 27.70	Commercial property in Fredericton, NB.
3/13/2002	Caribbean Utilities Co.	CAD 12.90	Acquired additional ~2% of the company.
3/20/2002	Niagara Power Co.	CAD 49.00	Purchase remaining 50% of Niagara Power Co.
2/1/2002	Cabot palace I	CAD 14.30	133,327 Square feet premium office tower in St. John's, Newfoundland
9/18/2001	Portfolio of properties in St. John's	CAD 8.30	Purchased TD Place commercial bldg and 6 parcels of land.
9/14/2001	Aliant Poles	CAD 46.00	Purchased 102,000 poles and related infrastructure from Aliant Telecom.
1/26/2001	Belize Electric Company Ltd.	USD 62.00	Acquired 95% of company from Duke Energy.
12/19/2000	2 Hydro generating stations	CAD 6.90	2 generating stations (6.88MW) in upper New York state.
12/14/2000	Brunswick Square Ltd.	CAD 6.20	Acquired 50% of the company Fortis doesn't own.
12/1/2000	Fort William Building and Blue cross centre	CAD 52.70	Fort William building in St. John's, Newfoundland and Blue cross centre in Moncton, New Brunswick.
2/23/2000	Caribbean Utilities Co.	CAD 79.90	Acquired 20% of the company.
12/30/1999	2 Hydro generating stations	CAD 19.77	2 generating stations (16MW) in upper New York state (Moose River & Philadelphia)
10/28/1999	Belize Electricity Ltd.	CAD 36.80	Acquired 67% interest in the main commercial generator, transmitter & distributor of electricity in Belize.
8/31/1999	Brunswick Square Ltd.	CAD 10.12	Acquired 50% of the company by Fortis Properties.
1/31/1999	Mount Peyton	CAD 2.20	Acquired all common shares and notes payable.
	Total USD	USD 65.50	
	Total CAD	CAD 6,214.48	

Source: Bloomberg, Company data and Credit Suisse

In terms of acquisitions, we believe Fortis has a few advantages over others, including:

- Fortis has growing expertise with both electric and gas utilities;
- Larger size will allow it to look at a larger spectrum of potential target companies;
- A proven ability to effectively integrate acquisitions;
- A rather strong appetite for yield oriented securities in Canada;
- The potential ability to support a transaction with pension fund capital;
- Canada's rather benign interest rate environment; and,
- Bought deal financing commonly employed in Canada.

Fortis possesses a number of absolute and relative advantages over some other competitors

Historically, Fortis has been very adept at acquisitions. Corporate growth has benefited from the company's ability to successfully acquire and integrate selected assets. Capital market conditions are demonstrating signs of improved functioning. Therefore, the typical Fortis acquisition strategy is more palatable in current capital markets. For greater details, please refer to our 6 August 2009 note entitled "Pondering a Portland purchase?"

## Valuation

We continue to believe that Fortis has strong organic growth in key areas such as British Columbia, Alberta and the Caribbean. In our view, the company faces a delicate balance of capital investment opportunities and cash flow needs. From our perspective, the next big catalysts for the stock will likely revolve around capital efficiency initiatives or a large scale acquisition which will always lack predictability.

Rating: Upgrade to Outperform from Neutral  
Target: C\$34

Year-to-date, Fortis shares have been the weakest performer in the Canadian utility universe returning -9%. We believe Fortis delivers organic growth that is combined with a

disciplined acquisition framework. In our view, the market remains somewhat concerned about deal potential and the Belize Electricity situation. Given the potential excess return, we upgrade FTS to Outperform from the previous Neutral. Our target is maintained at C\$34 and is obtained via multiple valuation approaches, including: an 18.5x P/E multiple of 2012 earnings; 10.2x EV/EBITDA; a 1.7x book value multiple; an implied 3.4% dividend yield; and, a DCF based valuation. We introduce our Outperform rating.

For greater valuation context, please see the series of historical valuations below.

The 10-year historical 2-year forward P/E is 15.8x, while the 1-year and 2-year averages are 17.9x and 16.9x, respectively. (see Exhibit 11)

#### Exhibit 11: FTS historical 2 year forward P/E

Source: FactSet and Credit Suisse

The 10-year historical EV/EBITDA multiple is 11.2x, while the 1-year and 2-year averages are 11.3x and 10.9x, respectively. (see Exhibit 12)

#### Exhibit 12: FTS historical EV/EBITDA

Source: FactSet and Credit Suisse

The 10-year historical dividend yield is 3.37%, while the 1-year and 2-year averages are 3.44% and 3.63%, respectively. (see Exhibit 13)

The analyst(s) responsible for preparing this research report received compensation that is based upon various factors including Credit Suisse's total revenues, a portion of which are generated by Credit Suisse's investment banking activities.

### Analysts' stock ratings are defined as follows:

**Outperform (O):** The stock's total return is expected to outperform the relevant benchmark\* by at least 10-15% (or more, depending on perceived risk) over the next 12 months.

**Neutral (N):** The stock's total return is expected to be in line with the relevant benchmark\* (range of  $\pm 10-15\%$ ) over the next 12 months.

**Underperform (U):** The stock's total return is expected to underperform the relevant benchmark\* by 10-15% or more over the next 12 months.

*\*Relevant benchmark by region: As of 29<sup>th</sup> May 2009, Australia, New Zealand, U.S. and Canadian ratings are based on (1) a stock's absolute total return potential to its current share price and (2) the relative attractiveness of a stock's total return potential within an analyst's coverage universe\*\*, with Outperforms representing the most attractive, Neutrals the less attractive, and Underperforms the least attractive investment opportunities. Some U.S. and Canadian ratings may fall outside the absolute total return ranges defined above, depending on market conditions and industry factors. For Latin American, Japanese, and non-Japan Asia stocks, ratings are based on a stock's total return relative to the average total return of the relevant country or regional benchmark; for European stocks, ratings are based on a stock's total return relative to the analyst's coverage universe\*\*. For Australian and New Zealand stocks, 12-month rolling yield is incorporated in the absolute total return calculation and a 15% and a 7.5% threshold replace the 10-15% level in the Outperform and Underperform stock rating definitions, respectively. The 15% and 7.5% thresholds replace the +10-15% and -10-15% levels in the Neutral stock rating definition, respectively.*

*\*\*An analyst's coverage universe consists of all companies covered by the analyst within the relevant sector.*

**Restricted (R):** In certain circumstances, Credit Suisse policy and/or applicable law and regulations preclude certain types of communications, including an investment recommendation, during the course of Credit Suisse's engagement in an investment banking transaction and in certain other circumstances.

**Volatility Indicator [V]:** A stock is defined as volatile if the stock price has moved up or down by 20% or more in a month in at least 8 of the past 24 months or the analyst expects significant volatility going forward.

**Analysts' coverage universe weightings are distinct from analysts' stock ratings and are based on the expected performance of an analyst's coverage universe\* versus the relevant broad market benchmark\*\*:**

**Overweight:** Industry expected to outperform the relevant broad market benchmark over the next 12 months.

**Market Weight:** Industry expected to perform in-line with the relevant broad market benchmark over the next 12 months.

**Underweight:** Industry expected to underperform the relevant broad market benchmark over the next 12 months.

*\*An analyst's coverage universe consists of all companies covered by the analyst within the relevant sector.*

*\*\*The broad market benchmark is based on the expected return of the local market index (e.g., the S&P 500 in the U.S.) over the next 12 months.*

**Credit Suisse's distribution of stock ratings (and banking clients) is:**

Global Ratings Distribution		
<b>Outperform/Buy*</b>	48%	(61% banking clients)
<b>Neutral/Hold*</b>	40%	(57% banking clients)
<b>Underperform/Sell*</b>	10%	(50% banking clients)
<b>Restricted</b>	2%	

*\*For purposes of the NYSE and NASD ratings distribution disclosure requirements, our stock ratings of Outperform, Neutral, and Underperform most closely correspond to Buy, Hold, and Sell, respectively; however, the meanings are not the same, as our stock ratings are determined on a relative basis. (Please refer to definitions above.) An investor's decision to buy or sell a security should be based on investment objectives, current holdings, and other individual factors.*

Credit Suisse's policy is to update research reports as it deems appropriate, based on developments with the subject company, the sector or the market that may have a material impact on the research views or opinions stated herein.

Credit Suisse's policy is only to publish investment research that is impartial, independent, clear, fair and not misleading. **Price Target:** (12 months) for (FTS.TO)

**Method:** We obtain our C\$34.00 target price for Fortis Inc. by using multiple valuation methodologies, yield base analysis, and discounted cash flow, all of which produce the C\$34.00 target. Our target price implies a P/E (price/earnings) multiple of 18.5x our 2012 EPS (earnings per share) estimate of C\$1.86 and an EV/EBITDA (enterprise value/earnings before interest, taxes, depreciation, and amortization) multiple of 10.2x our EBITDA estimate.

**Risks:** There are a number of risks to Fortis' achievement of our C\$34.00 target price: commodity prices; weather; environmental; regulatory; access to capital markets; and, interest rates. Moreover, one should never underestimate the power of the regulator in any regulated business.

Please refer to the firm's disclosure website at [www.credit-suisse.com/researchdisclosures](http://www.credit-suisse.com/researchdisclosures) for the definitions of abbreviations typically used in the target price method and risk sections.

*See the Companies Mentioned section for full company names.*

The subject company (FTS.TO) currently is, or was during the 12-month period preceding the date of distribution of this report, a client of Credit Suisse.

Credit Suisse provided investment banking services to the subject company (FTS.TO) within the past 12 months.

Credit Suisse provided non-investment banking services, which may include Sales and Trading services, to the subject company (FTS.TO) within the past 12 months.

Credit Suisse expects to receive or intends to seek investment banking related compensation from the subject company (FTS.TO) within the next 3 months.

Credit Suisse has received compensation for products and services other than investment banking services from the subject company (FTS.TO) within the past 12 months.

---

**Important Regional Disclosures**

Singapore recipients should contact a Singapore financial adviser for any matters arising from this research report.

An analyst involved in the preparation of this report has visited certain material operations of the subject company (FTS.TO) within the past 12 months. The analyst may not have visited all material operations of the subject company. The travel expenses of the analyst in connection with such visits were not paid or reimbursed by the subject company, other than de minimus local travel expenses.

Restrictions on certain Canadian securities are indicated by the following abbreviations: NVS--Non-Voting shares; RVS--Restricted Voting Shares; SVS--Subordinate Voting Shares.

Individuals receiving this report from a Canadian investment dealer that is not affiliated with Credit Suisse should be advised that this report may not contain regulatory disclosures the non-affiliated Canadian investment dealer would be required to make if this were its own report.

For Credit Suisse Securities (Canada), Inc.'s policies and procedures regarding the dissemination of equity research, please visit [http://www.csfb.com/legal/terms/canada\\_research\\_policy.shtml](http://www.csfb.com/legal/terms/canada_research_policy.shtml).

As of the date of this report, Credit Suisse acts as a market maker or liquidity provider in the equities securities that are the subject of this report.

Principal is not guaranteed in the case of equities because equity prices are variable.

Commission is the commission rate or the amount agreed with a customer when setting up an account or at anytime after that.

CS may have issued a Trade Alert regarding this security. Trade Alerts are short term trading opportunities identified by an analyst on the basis of market events and catalysts, while stock ratings reflect an analyst's investment recommendations based on expected total return over a 12-month period relative to the relevant coverage universe. Because Trade Alerts and stock ratings reflect different assumptions and analytical methods, Trade Alerts may differ directionally from the analyst's stock rating.

The author(s) of this report maintains a CS Model Portfolio that he/she regularly adjusts. The security or securities discussed in this report may be a component of the CS Model Portfolio and subject to such adjustments (which, given the composition of the CS Model Portfolio as a whole, may differ from the recommendation in this report, as well as opportunities or strategies identified in Trading Alerts concerning the same security). The CS Model Portfolio and important disclosures about it are available at [www.credit-suisse.com/ti](http://www.credit-suisse.com/ti).

Taiwanese Disclosures: Reports written by Taiwan-based analysts on non-Taiwan listed companies are not considered recommendations to buy or sell securities under Taiwan Stock Exchange Operational Regulations Governing Securities Firms Recommending Trades in Securities to Customers.

To the extent this is a report authored in whole or in part by a non-U.S. analyst and is made available in the U.S., the following are important disclosures regarding any non-U.S. analyst contributors:

The non-U.S. research analysts listed below (if any) are not registered/qualified as research analysts with FINRA. The non-U.S. research analysts listed below may not be associated persons of CSSU and therefore may not be subject to the NASD Rule 2711 and NYSE Rule 472 restrictions on communications with a subject company, public appearances and trading securities held by a research analyst account.

- Andrew M. Kuske, non-U.S. analyst, is a research analyst employed by Credit Suisse Securities (Canada), Inc..
- Paul Tan, non-U.S. analyst, is a research analyst employed by Credit Suisse Securities (Canada), Inc..

Disclaimers continue on next page.

This report is not directed to, or intended for distribution to or use by, any person or entity who is a citizen or resident of or located in any locality, state, country or other jurisdiction where such distribution, publication, availability or use would be contrary to law or regulation or which would subject Credit Suisse AG, the Swiss bank, or its subsidiaries or its affiliates ("CS") to any registration or licensing requirement within such jurisdiction. All material presented in this report, unless specifically indicated otherwise, is under copyright to CS. None of the material, nor its content, nor any copy of it, may be altered in any way, transmitted to, copied or distributed to any other party, without the prior express written permission of CS. All trademarks, service marks and logos used in this report are trademarks or service marks or registered trademarks or service marks of CS or its affiliates.

The information, tools and material presented in this report are provided to you for information purposes only and are not to be used or considered as an offer or the solicitation of an offer to sell or to buy or subscribe for securities or other financial instruments. CS may not have taken any steps to ensure that the securities referred to in this report are suitable for any particular investor. CS will not treat recipients as its customers by virtue of their receiving the report. The investments or services contained or referred to in this report may not be suitable for you and it is recommended that you consult an independent investment advisor if you are in doubt about such investments or investment services. Nothing in this report constitutes investment, legal, accounting or tax advice or a representation that any investment or strategy is suitable or appropriate to your individual circumstances or otherwise constitutes a personal recommendation to you. CS does not offer advice on the tax consequences of investment and you are advised to contact an independent tax adviser. Please note in particular that the bases and levels of taxation may change.

CS believes the information and opinions in the Disclosure Appendix of this report are accurate and complete. Information and opinions presented in the other sections of the report were obtained or derived from sources CS believes are reliable, but CS makes no representations as to their accuracy or completeness. Additional information is available upon request. CS accepts no liability for loss arising from the use of the material presented in this report, except that this exclusion of liability does not apply to the extent that liability arises under specific statutes or regulations applicable to CS. This report is not to be relied upon in substitution for the exercise of independent judgment. CS may have issued, and may in the future issue, a trading call regarding this security. Trading calls are short term trading opportunities based on market events and catalysts, while stock ratings reflect investment recommendations based on expected total return over a 12-month period as defined in the disclosure section. Because trading calls and stock ratings reflect different assumptions and analytical methods, trading calls may differ directionally from the stock rating. In addition, CS may have issued, and may in the future issue, other reports that are inconsistent with, and reach different conclusions from, the information presented in this report. Those reports reflect the different assumptions, views and analytical methods of the analysts who prepared them and CS is under no obligation to ensure that such other reports are brought to the attention of any recipient of this report. CS is involved in many businesses that relate to companies mentioned in this report. These businesses include specialized trading, risk arbitrage, market making, and other proprietary trading.

Past performance should not be taken as an indication or guarantee of future performance, and no representation or warranty, express or implied, is made regarding future performance. Information, opinions and estimates contained in this report reflect a judgement at its original date of publication by CS and are subject to change without notice. The price, value of and income from any of the securities or financial instruments mentioned in this report can fall as well as rise. The value of securities and financial instruments is subject to exchange rate fluctuation that may have a positive or adverse effect on the price or income of such securities or financial instruments. Investors in securities such as ADR's, the values of which are influenced by currency volatility, effectively assume this risk.

Structured securities are complex instruments, typically involve a high degree of risk and are intended for sale only to sophisticated investors who are capable of understanding and assuming the risks involved. The market value of any structured security may be affected by changes in economic, financial and political factors (including, but not limited to, spot and forward interest and exchange rates), time to maturity, market conditions and volatility, and the credit quality of any issuer or reference issuer. Any investor interested in purchasing a structured product should conduct their own investigation and analysis of the product and consult with their own professional advisers as to the risks involved in making such a purchase.

Some investments discussed in this report have a high level of volatility. High volatility investments may experience sudden and large falls in their value causing losses when that investment is realised. Those losses may equal your original investment. Indeed, in the case of some investments the potential losses may exceed the amount of initial investment, in such circumstances you may be required to pay more money to support those losses. Income yields from investments may fluctuate and, in consequence, initial capital paid to make the investment may be used as part of that income yield. Some investments may not be readily realisable and it may be difficult to sell or realise those investments, similarly it may prove difficult for you to obtain reliable information about the value, or risks, to which such an investment is exposed.

This report may provide the addresses of, or contain hyperlinks to, websites. Except to the extent to which the report refers to website material of CS, CS has not reviewed the linked site and takes no responsibility for the content contained therein. Such address or hyperlink (including addresses or hyperlinks to CS's own website material) is provided solely for your convenience and information and the content of the linked site does not in any way form part of this document. Accessing such website or following such link through this report or CS's website shall be at your own risk.

This report is issued and distributed in Europe (except Switzerland) by Credit Suisse Securities (Europe) Limited, One Cabot Square, London E14 4QJ, England, which is regulated in the United Kingdom by The Financial Services Authority ("FSA"). paul.tan@credit-suisse.com

- **Revising rating:** In a relatively short period of time following the Fortis Inc. Q2 results, the stock appreciated by more than 8% (not including dividends). Given this performance, the stock offers a total potential return of roughly 5%. We view that total potential return as being insufficient to justify our Outperform rating. Accordingly, we downgrade our rating to Neutral, however, we maintain our target price at C\$34.00.
- **Significant organic growth continues:** Fortis continues to provide a rather robust capital expenditure outlook with a reiteration of the C\$1.2bn target for 2011 in their Q2 results. Additionally, Fortis increased the 5-year capex outlook to C\$5.7b from C\$5.5bn in their Q2. Eighty-four percent of that total amount is expected to go towards utility activity that should deliver favourable risk adjusted returns over a period of time.
- **Improving capital market conditions:** Historically, Fortis has been very adept at acquisitions. Corporate growth has benefited from the company's ability to successfully acquire and integrate selected assets. In our view, the company is well positioned in the current market for acquisition opportunities. The company stated, "We are disciplined and patient in our pursuit of electric and gas utility acquisitions in the United States and Canada that will add value for Fortis shareholders".
- **Valuation:** With the recent stock performance, we downgrade our FTS rating to Neutral from the previous Outperform. We maintain our C\$34.00 that is obtained via multiple valuation approaches, including: an 18.5x P/E multiple of 2012 earnings; a 1.7x book value multiple; and, a DCF-based valuation. We introduce our Neutral rating.

#### Share price performance

Quarterly EPS	Q1	Q2	Q3	Q4
2010A	0.56	0.32	0.25	0.47
2011E	0.65	0.33	0.28	0.51

## Disclosure Appendix

### Important Global Disclosures

I, Andrew M. Kuske, certify that (1) the views expressed in this report accurately reflect my personal views about all of the subject companies and securities and (2) no part of my compensation was, is or will be directly or indirectly related to the specific recommendations or views expressed in this report.

See the Companies Mentioned section for full company names.

### 3-Year Price, Target Price and Rating Change History Chart for FTS.TO

The analyst(s) responsible for preparing this research report received compensation that is based upon various factors including Credit Suisse's total revenues, a portion of which are generated by Credit Suisse's investment banking activities.

### Analysts' stock ratings are defined as follows:

**Outperform (O):** The stock's total return is expected to outperform the relevant benchmark\* by at least 10-15% (or more, depending on perceived risk) over the next 12 months.

**Neutral (N):** The stock's total return is expected to be in line with the relevant benchmark\* (range of  $\pm 10-15\%$ ) over the next 12 months.

**Underperform (U):** The stock's total return is expected to underperform the relevant benchmark\* by 10-15% or more over the next 12 months.

\*Relevant benchmark by region: As of 29<sup>th</sup> May 2009, Australia, New Zealand, U.S. and Canadian ratings are based on (1) a stock's absolute total return potential to its current share price and (2) the relative attractiveness of a stock's total return potential within an analyst's coverage universe\*\*, with Outperforms representing the most attractive, Neutrals the less attractive, and Underperforms the least attractive investment opportunities. Some U.S. and Canadian ratings may fall outside the absolute total return ranges defined above, depending on market conditions and industry factors. For Latin American, Japanese, and non-Japan Asia stocks, ratings are based on a stock's total return relative to the average total return of the relevant country or regional benchmark; for European stocks, ratings are based on a stock's total return relative to the analyst's coverage universe\*\*. For Australian and New Zealand stocks, 12-month rolling yield is incorporated in the absolute total return calculation and a 15% and a 7.5% threshold replace the 10-15% level in the Outperform and Underperform stock rating definitions, respectively. The 15% and 7.5% thresholds replace the +10-15% and -10-15% levels in the Neutral stock rating definition, respectively.

\*\*An analyst's coverage universe consists of all companies covered by the analyst within the relevant sector.

**Restricted (R):** In certain circumstances, Credit Suisse policy and/or applicable law and regulations preclude certain types of communications, including an investment recommendation, during the course of Credit Suisse's engagement in an investment banking transaction and in certain other circumstances.

**Volatility Indicator [V]:** A stock is defined as volatile if the stock price has moved up or down by 20% or more in a month in at least 8 of the past 24 months or the analyst expects significant volatility going forward.

**Analysts' coverage universe weightings are distinct from analysts' stock ratings and are based on the expected performance of an analyst's coverage universe\* versus the relevant broad market benchmark\*\*:**

**Overweight:** Industry expected to outperform the relevant broad market benchmark over the next 12 months.

**Market Weight:** Industry expected to perform in-line with the relevant broad market benchmark over the next 12 months.

**Underweight:** Industry expected to underperform the relevant broad market benchmark over the next 12 months.

\*An analyst's coverage universe consists of all companies covered by the analyst within the relevant sector.

\*\*The broad market benchmark is based on the expected return of the local market index (e.g., the S&P 500 in the U.S.) over the next 12 months.

**Credit Suisse's distribution of stock ratings (and banking clients) is:**

Global Ratings Distribution		
<b>Outperform/Buy*</b>	49%	(61% banking clients)
<b>Neutral/Hold*</b>	39%	(56% banking clients)
<b>Underperform/Sell*</b>	9%	(54% banking clients)
<b>Restricted</b>	2%	

\*For purposes of the NYSE and NASD ratings distribution disclosure requirements, our stock ratings of Outperform, Neutral, and Underperform most closely correspond to Buy, Hold, and Sell, respectively; however, the meanings are not the same, as our stock ratings are determined on a relative basis. (Please refer to definitions above.) An investor's decision to buy or sell a security should be based on investment objectives, current holdings, and other individual factors.

Credit Suisse's policy is to update research reports as it deems appropriate, based on developments with the subject company, the sector or the market that may have a material impact on the research views or opinions stated herein.

Credit Suisse's policy is only to publish investment research that is impartial, independent, clear, fair and not misleading. For more detail please refer to Credit Suisse's Policies for Managing Conflicts of Interest in connection with Investment Research: [http://www.csfb.com/research-and-analytics/disclaimer/managing\\_conflicts\\_disclaimer.html](http://www.csfb.com/research-and-analytics/disclaimer/managing_conflicts_disclaimer.html)

Credit Suisse does not provide any tax advice. Any statement herein regarding any US federal tax is not intended or written to be used, and cannot be used, by any taxpayer for the purposes of avoiding any penalties.

See the Companies Mentioned section for full company names.

**Price Target:** (12 months) for (FTS.TO)

**Method:** We obtain our C\$34.00 target price for Fortis Inc. by using multiple valuation methodologies, yield base analysis, and discounted cash flow, all of which produce the C\$34.00 target. Our target price implies a P/E (price/earnings) multiple of 18.5x our 2012 EPS (earnings per share) estimate of C\$1.86 and an EV/EBITDA (enterprise value/earnings before interest, taxes, depreciation, and amortization) multiple of 10.2x our EBITDA estimate.

**Risks:** There are a number of risks to Fortis' achievement of our C\$34.00 target price: commodity prices; weather; environmental; regulatory; access to capital markets; and, interest rates. Moreover, one should never underestimate the power of the regulator in any regulated business.

Please refer to the firm's disclosure website at [www.credit-suisse.com/researchdisclosures](http://www.credit-suisse.com/researchdisclosures) for the definitions of abbreviations typically used in the target price method and risk sections.

See the Companies Mentioned section for full company names.

The subject company (FTS.TO) currently is, or was during the 12-month period preceding the date of distribution of this report, a client of Credit Suisse.

Credit Suisse provided investment banking services to the subject company (FTS.TO) within the past 12 months.

Credit Suisse provided non-investment banking services, which may include Sales and Trading services, to the subject company (FTS.TO) within the past 12 months.

Credit Suisse expects to receive or intends to seek investment banking related compensation from the subject company (FTS.TO) within the next 3 months.

Credit Suisse has received compensation for products and services other than investment banking services from the subject company (FTS.TO) within the past 12 months.

**Important Regional Disclosures**

Singapore recipients should contact a Singapore financial adviser for any matters arising from this research report.

An analyst involved in the preparation of this report has visited certain material operations of the subject company (FTS.TO) within the past 12 months. The analyst may not have visited all material operations of the subject company. The travel expenses of the analyst in connection with such visits were not paid or reimbursed by the subject company, other than de minimus local travel expenses.

Restrictions on certain Canadian securities are indicated by the following abbreviations: NVS--Non-Voting shares; RVS--Restricted Voting Shares; SVS--Subordinate Voting Shares.

Individuals receiving this report from a Canadian investment dealer that is not affiliated with Credit Suisse should be advised that this report may not contain regulatory disclosures the non-affiliated Canadian investment dealer would be required to make if this were its own report.

For Credit Suisse Securities (Canada), Inc.'s policies and procedures regarding the dissemination of equity research, please visit [http://www.csfb.com/legal\\_terms/canada\\_research\\_policy.shtml](http://www.csfb.com/legal_terms/canada_research_policy.shtml).

As of the date of this report, Credit Suisse acts as a market maker or liquidity provider in the equities securities that are the subject of this report.

Principal is not guaranteed in the case of equities because equity prices are variable.

Commission is the commission rate or the amount agreed with a customer when setting up an account or at anytime after that.

CS may have issued a Trade Alert regarding this security. Trade Alerts are short term trading opportunities identified by an analyst on the basis of market events and catalysts, while stock ratings reflect an analyst's investment recommendations based on expected total return over a 12-month period relative to the relevant coverage universe. Because Trade Alerts and stock ratings reflect different assumptions and analytical methods, Trade Alerts may differ directionally from the analyst's stock rating.

The author(s) of this report maintains a CS Model Portfolio that he/she regularly adjusts. The security or securities discussed in this report may be a component of the CS Model Portfolio and subject to such adjustments (which, given the composition of the CS Model Portfolio as a whole, may differ

from the recommendation in this report, as well as opportunities or strategies identified in Trading Alerts concerning the same security). The CS Model Portfolio and important disclosures about it are available at [www.credit-suisse.com/ti](http://www.credit-suisse.com/ti).

Taiwanese Disclosures: Reports written by Taiwan-based analysts on non-Taiwan listed companies are not considered recommendations to buy or sell securities under Taiwan Stock Exchange Operational Regulations Governing Securities Firms Recommending Trades in Securities to Customers.

To the extent this is a report authored in whole or in part by a non-U.S. analyst and is made available in the U.S., the following are important disclosures regarding any non-U.S. analyst contributors:

The non-U.S. research analysts listed below (if any) are not registered/qualified as research analysts with FINRA. The non-U.S. research analysts listed below may not be associated persons of CSSU and therefore may not be subject to the NASD Rule 2711 and NYSE Rule 472 restrictions on communications with a subject company, public appearances and trading securities held by a research analyst account.

- Andrew M. Kuske, non-U.S. analyst, is a research analyst employed by Credit Suisse Securities (Canada), Inc..
- Paul Tan, non-U.S. analyst, is a research analyst employed by Credit Suisse Securities (Canada), Inc..

This report is not directed to, or intended for distribution to or use by, any person or entity who is a citizen or resident of or located in any locality, state, country or other jurisdiction where such distribution, publication, availability or use would be contrary to law or regulation or which would subject Credit Suisse AG, the Swiss bank, or its subsidiaries or its affiliates ("CS") to any registration or licensing requirement within such jurisdiction. All material presented in this report, unless specifically indicated otherwise, is under copyright to CS. None of the material, nor its content, nor any copy of it, may be altered in any way, transmitted to, copied or distributed to any other party, without the prior express written permission of CS. All trademarks, service marks and logos used in this report are trademarks or service marks or registered trademarks or service marks of CS or its affiliates.

The information, tools and material presented in this report are provided to you for information purposes only and are not to be used or considered as an offer or the solicitation of an offer to sell or to buy or subscribe for securities or other financial instruments. CS may not have taken any steps to ensure that the securities referred to in this report are suitable for any particular investor. CS will not treat recipients as its customers by virtue of their receiving the report. The investments or services contained or referred to in this report may not be suitable for you and it is recommended that you consult an independent investment advisor if you are in doubt about such investments or investment services. Nothing in this report constitutes investment, legal, accounting or tax advice or a representation that any investment or strategy is suitable or appropriate to your individual circumstances or otherwise constitutes a personal recommendation to you. CS does not offer advice on the tax consequences of investment and you are advised to contact an independent tax adviser. Please note in particular that the bases and levels of taxation may change.

CS believes the information and opinions in the Disclosure Appendix of this report are accurate and complete. Information and opinions presented in the other sections of the report were obtained or derived from sources CS believes are reliable, but CS makes no representations as to their accuracy or completeness. Additional information is available upon request. CS accepts no liability for loss arising from the use of the material presented in this report, except that this exclusion of liability does not apply to the extent that liability arises under specific statutes or regulations applicable to CS. This report is not to be relied upon in substitution for the exercise of independent judgment. CS may have issued, and may in the future issue, a trading call regarding this security. Trading calls are short term trading opportunities based on market events and catalysts, while stock ratings reflect investment recommendations based on expected total return over a 12-month period as defined in the disclosure section. Because trading calls and stock ratings reflect different assumptions and analytical methods, trading calls may differ directionally from the stock rating. In addition, CS may have issued, and may in the future issue, other reports that are inconsistent with, and reach different conclusions from, the information presented in this report. Those reports reflect the different assumptions, views and analytical methods of the analysts who prepared them and CS is under no obligation to ensure that such other reports are brought to the attention of any recipient of this report. CS is involved in many businesses that relate to companies mentioned in this report. These businesses include specialized trading, risk arbitrage, market making, and other proprietary trading.

Past performance should not be taken as an indication or guarantee of future performance, and no representation or warranty, express or implied, is made regarding future performance. Information, opinions and estimates contained in this report reflect a judgement at its original date of publication by CS and are subject to change without notice. The price, value of and income from any of the securities or financial instruments mentioned in this report can fall as well as rise. The value of securities and financial instruments is subject to exchange rate fluctuation that may have a positive or adverse effect on the price or income of such securities or financial instruments. Investors in securities such as ADR's, the values of which are influenced by currency volatility, effectively assume this risk.

Structured securities are complex instruments, typically involve a high degree of risk and are intended for sale only to sophisticated investors who are capable of understanding and assuming the risks involved. The market value of any structured security may be affected by changes in economic, financial and political factors (including, but not limited to, spot and forward interest and exchange rates), time to maturity, market conditions and volatility, and the credit quality of any issuer or reference issuer. Any investor interested in purchasing a structured product should conduct their own investigation and analysis of the product and consult with their own professional advisers as to the risks involved in making such a purchase.

Some investments discussed in this report have a high level of volatility. High volatility investments may experience sudden and large falls in their value causing losses when that investment is realised. Those losses may equal your original investment. Indeed, in the case of some investments the potential losses may exceed the amount of initial investment, in such circumstances you may be required to pay more money to support those losses. Income yields from investments may fluctuate and, in consequence, initial capital paid to make the investment may be used as part of that income yield. Some investments may not be readily realisable and it may be difficult to sell or realise those investments, similarly it may prove difficult for you to obtain reliable information about the value, or risks, to which such an investment is exposed.

- **Earnings review:** Fortis reported Q3 2011 headline EPS (FD) of C\$0.31, adjusting for the termination fee paid to FTS by Central Vermont Public Service Corp. the adjusted figure is C\$0.26, which missed our C\$0.28 estimate but was higher than the Street's C\$0.244 view and within the C\$0.22-C\$0.28 range. In general, we believe Fortis is making steady progress in delivering consistent financial results from a largely regulated asset base. We do not place undue emphasis on quarterly results in much of our universe as a result of the inherently long-cycle nature of many assets. For Fortis, we continue to focus on the ongoing significant regulated capital plan along with the potentially positive upward bias to regulated returns.
- **Significant organic growth continues:** Fortis continues to provide a rather robust capital expenditure outlook with a reiteration of their C\$1.2bn target for 2011. Additionally, Fortis reiterated its 5-year capex outlook of C\$5.7bn. Eighty-four percent of that total amount is expected to go towards regulated utility activities that should deliver favourable risk adjusted returns.
- **Improving capital market conditions:** Historically, Fortis has been very adept at acquisitions. Corporate growth has benefited from the company's ability to successfully acquire and integrate selected assets. In our view, the company is well positioned in the current market for acquisition opportunities. The company stated, "We are disciplined and patient in our pursuit of electric and gas utility acquisitions in the United States and Canada that will add value for Fortis shareholders".
- **Valuation:** Our C\$34.target price and Neutral rating are obtained utilizing multiple valuation approaches, including: a 19.0x P/E multiple of 2012 earnings; a 1.7x book value multiple; and, a DCF-based valuation. We reiterate our Neutral rating.

Investors should consider this report as only a single factor in making their investment decision.

This research note is divided into three parts: (a) results; (b) outlook; and, (c) valuation. Each of these areas will be addressed in greater detail below.

Results missed our estimated but beat the Street's

## Results

Exhibit 1 highlights the segmented unadjusted earnings contributions for the most recent quarter and for the comparable period one year ago. Our commentary for each segment appears under the various headings below.

### Exhibit 1: Segmented unadjusted earnings contribution

C\$ in millions, unless otherwise stated

	Q3 2011	Q3 2010	chg y/y
Regulated Gas Utilities - Canadian	(3)	(5)	40%
Regulated Electric Utilities - Canadian	43	43	0%
Regulated Electric Utilities - Caribbean	6	8	-25%
Non-regulated - Fortis Generation	8	9	-11%
Non-regulated - Fortis Properties	9	9	0%
Corporate and other	(5)	(19)	74%
Net earnings applicable to common shares	58	45	29%

Source: Company data and Credit Suisse

### Regulated Gas Utilities - Canadian

The unadjusted earnings for this segment improved by roughly 40% year-over-year (see Exhibit 2). Some notable items for the regulated gas utilities include:

- Net customer additions were 1,965 during 9M 2011 versus net additions of 3,460 during the 9M 2010;
- The amount of customer additions decreased versus 9M 2010 due to lower building activity; and,
- Sales volumes for the quarter decreased for both the Core-residential and commercial and for the industrial segment while transportation volumes increased.

### Exhibit 2: Regulated Gas Utilities (unadjusted)

	Q3 2011	Q3 2010	chg y/y
FortisBC Energy	(3.0)	(5.0)	40%

Source: Company data and Credit Suisse

### Regulated Electric Utilities – Canadian

This segment includes operating companies like FortisAlberta, FortisBC Electric, Newfoundland Power and Other Canadian Electric Utilities, which includes Maritime Electric and FortisOntario. Detailed contributions for each of these divisions can be found in Exhibit 3.

### Exhibit 3: Regulated electric utilities – Canadian contribution (unadjusted)

C\$ in millions, unless otherwise stated

	Q3 2011	Q3 2010	chg y/y
FortisAlberta	19	19	0%
FortisBC Electric	10	11	-9%
Newfoundland Power	8	8	0%
Other Cdn Electric Utilities	6	5	20%
Earnings	43	43	0%

Source: Company data and Credit Suisse

**FortisAlberta**

Earnings at this regulated utility were flat comparing Q3 2011 versus the prior period. See Exhibit 4 for selected highlights.

Increase in energy delivery  
in Alberta

**Exhibit 4: Selected FortisAlberta performance highlights (unadjusted)**

	Q3 2011	Q3 2010	chg y/y
Energy deliveries (GWh)	3,911	3,778	4%
Revenue (C\$/MWh)	26.34	28.85	-9%
Operating expenses (C\$/MWh)	8.95	8.73	2%
Gross margin (C\$/MWh)	17.39	20.12	-14%
Earnings (C\$millions)	19	19	0%

Source: Company data and Credit Suisse

**FortisBC Electric**

Segmented earnings at FortisBC Electric decreased by 9% compared to the same period last year. The decrease was due to higher effective corporate income taxes, mainly due to lower deductions for income tax purposes compared to accounting purposes and lower capitalized AFUDC, due to fewer assets under construction during 2011.

Increase in energy  
deliveries in BC

See Exhibit 5 for selected highlights.

**Exhibit 5: Selected FortisBC Electric performance highlights (unadjusted)**

	Q3 2011	Q3 2010	chg y/y
Energy deliveries (GWh)	713	709	1%
Revenue (C\$/MWh)	93.97	87.45	7%
Energy supply costs (C\$/MWh)	21.04	22.57	-7%
Operating expenses (C\$/MWh)	26.65	23.98	11%
Gross margin (C\$/MWh)	46.28	40.90	13%
Earnings (C\$millions)	10	11	-9%

Source: Company data and Credit Suisse

**Newfoundland Power**

This segment's earnings generation was flat when comparing Q3 2011 versus Q3 2010. Higher electricity sales and lower effective income taxes were offset by wage and inflationary increases, higher employee-related operating expenses and lower allowed ROE. Energy deliveries were up by approximately 1% (see Exhibit 6).

Increase in NP's energy  
deliveries

**Exhibit 6: Selected Newfoundland Power performance highlights (unadjusted)**

	Q3 2011	Q3 2010	chg y/y
Energy deliveries (GWh)	923	916	1%
Revenue (C\$/MWh)	109.43	108.08	1%
Energy supply costs (C\$/MWh)	56.34	54.59	3%
Operating expenses (C\$/MWh)	18.42	17.47	5%
Gross margin (C\$/MWh)	34.67	36.03	-4%
Earnings (C\$millions)	8	8	0%

Source: Company data, Credit Suisse estimates

**Other Canadian Electric Utilities**

This segment's earning generation increased by 20% in Q3 2011 versus Q3 2010 primarily due to higher allowed ROE at Algoma Power and lower effective corporate income taxes at Fortis Ontario. The energy deliveries for the period remained flat. Exhibit 7 contains selected highlights.

Flat energy deliveries

**Exhibit 7: Selected Other Canadian Electric Utilities performance highlights (unadjusted)**

	Q3 2011	Q3 2010	chg y/y
Energy deliveries (GWh)	582	583	0%
Revenue (C\$/MWh)	151.20	149.23	1%
Energy supply costs (C\$/MWh)	96.22	97.77	-2%
Operating expenses (C\$/MWh)	20.62	18.87	9%
Gross margin (C\$/MWh)	34.36	32.59	5%
Earnings (C\$millions)	6	5	20%

Source: Company data and Credit Suisse

**Regulated Electric Utilities – Caribbean**

This segment includes Belize Electricity (up to June 20, 2011), Caribbean Utilities, and Fortis Turks and Caicos. Earnings for this segment declined by 25% in Q3 2011 versus the same quarter last year. Energy deliveries declined 38% for several reasons. In our view, Belize Electricity was not overly material to Fortis. Additionally, we anticipate the dispute to be resolved in a rationale manner with Fortis recovering, at least, the rate base value. Yet, any such recovery may be over a period of time. The company stated that it has “commissioned an independent valuation of its previous investment in Belize Electricity and expects to submit its claim for compensation to the GOB during the fourth quarter of 2011.”

Awaiting a decision in Belize

See Exhibit 8 below for selected highlights.

**Exhibit 8: Caribbean - Regulated Electric Utilities performance highlights (unadjusted)**

	Q3 2011	Q3 2010	chg y/y
Energy deliveries (GWh)	197	318	-38%
Revenue (C\$/MWh)	370.56	289.31	28%
Energy supply costs (C\$/MWh)	238.58	179.25	33%
Operating expenses (C\$/MWh)	40.61	37.74	8%
Gross margin (C\$/MWh)	91.37	72.33	26%
Earnings (C\$millions)	6	8	-25%

Source: Company data and Credit Suisse

**Non-regulated – Fortis Generation**

The non-regulated generation assets within this segment are located in Belize, British Columbia, Central Newfoundland, Ontario and Upper New York State. Earnings for the segment were down 11% from the current quarter compared to the same quarter last year. Energy deliveries decreased by 17% from Q3 2010 to Q3 2011 due to decreased production in Upper New York and Belize caused by generating plant being out of service and longer dry season in 2011, respectively. Exhibit 9 provides selected highlights.

**Exhibit 9: Non-regulated generation – selected highlights**

	Q3 2011	Q3 2010	chg y/y
Energy deliveries (GWh)	111	134	-17%
Revenue (C\$/MWh)	99.10	97.01	2%
Operating expenses (C\$/MWh)	18.02	14.93	21%
Gross margin (C\$/MWh)	81.08	82.09	-1%
Earnings (C\$millions)	8	9	-11%

Source: Company data and Credit Suisse

**Non-regulated – Fortis Properties**

Fortis Properties' net unadjusted earning contribution remained flat during the quarter at C\$9m. REVPAR increased to C\$94.83 from C\$89.54 for the comparable period last year. Additionally, the occupancy rate of the Real Estate Division was up at 94.2% versus last year's 93.7%.

## Corporate

Corporate expenses decreased to C\$5million in Q3 2011 from C\$19m in Q3 2010. The figures for Q3 2011 included the C\$17m (C\$11m after tax) fee paid to Fortis upon the termination of the merger agreement with Central Vermont Public Service Corp.

## Outlook

We continue to believe investor, whether existing or prospective, should consider several major issues, including (a) funding organic growth; (b) rising returns; and, (c) acquisition trail. Each of these issues is addressed below.

### Funding organic growth

In the most recent quarter the company's reported capital expenditures totaled C\$287 million, of which C\$227 million was spent at regulated utilities. Fortis continues to guide that capital expenditures for 2011 will be roughly C\$1.2 billion. A majority of the total will be spent on Western Canadian assets (FortisBC Energy, FortisAlberta, and FortisBC Electric). Fortis reiterated its consolidated gross capital expenditures expectations over the 5 year plan (2011-2015) at C\$5.7bn with 84% of that total amount being allocated to regulated utilities. Both FortisAlberta and FortisBC Electric will receive the vast majority of that amount; whereas, the regulated gas utilities are planned to receive 23% of the total capex amount, and 16% is allocated to non-regulated operations. Given the regulated rates of return with utility capital expenditures, the increases should be viewed as longer-term positives provided an appropriate financial balance is struck.

With the significant current relative valuation advantages, we believe that Fortis may become more motivated to explore possible capital efficiency initiatives. In our view, the company possesses ample opportunities to become much more capital efficient. One strategy involves divesting certain non-utility assets and redeploying capital into utility assets or funding the capital program. Another option would entail divesting partial interests in selected utility assets in an asset management model approach and receiving a management fee.

In fact, some of the media reports prior to the official announcement of PPL Corporation's acquisition of E.ON's Kentucky utility assets for US\$7.625 billion stated that a consortium led by Fortis Inc. was one of three finalists for those assets. We would regard that type of information in media reports as being something akin to an asset management style of approach. Ultimately, we believe that such a strategy would help Fortis generate a higher level of returns. Additionally, the use of an asset management type approach would make large acquisitions which could potentially further accelerate growth.

Generally, we continue to prefer pure-play utility companies without an undue amount of non-core asset exposure. Historically, non-core assets (especially real estate) have been somewhat commonplace for many utilities. Fortis has been no exception to that approach. Notably, the mix of commercial and hospitality real estate assets held by Fortis have been positive contributors and also provide the company a bit of financial flexibility for a selection of reasons. In light of current market conditions, we believe there is a much less compelling case for the monetization of these assets than as in the past. We note Fortis Properties continues to increase in scale and scope which may eventually make it more attractive for acquisition or monetization. Yet, for a number of reasons, we continue to believe there is a rather low probability of either of those events occurring.

Even discounting the potential monetization of assets that we would consider to be non-core, we believe Fortis possesses considerable potential to become much more capital efficient. Given the significant interest in infrastructure assets by many investors seeking long-dated types of return, Fortis could easily divest portions of its existing asset base to pension fund investors and charge a management fee for their operational and management expertise. This type of approach could significantly improve capital efficiency

Ongoing organic growth

Opportunities for improved capital efficiency

Capital efficiency initiatives could aid funding of acquisitions or the existing capital program funding

and returns on capital. In addition, this asset management approach could also free-up capital that could be used to fund the existing capital program or fund future acquisitions.

### Rising returns

Positively, Fortis has been successful in obtaining several favourable regulatory decisions. For example, the allowed equity at Terasen Gas Inc. (TGI) was boosted from 35% to 40% effective January 1, 2010. In addition to that positive move for the equity base, the allowed return on equity for TGI increased from 8.47% to 9.50%. In a related judgment, Terasen Gas (Vancouver Island) Inc. (TGVI) and Terasen Gas Whistler Inc. (TGWI) returns increased from 9.17% to 10%. Additionally, the British Columbia Utilities Commission (BCUC) held the former automatic adjustment mechanism for annual ROE determination would no longer apply. Also in BC, FortisBC obtained an increased allowed ROE from 8.87% to 9.90% that became effective on January 1, 2010. The upward bias in utility returns should be viewed positively. Clearly, many questions exist as to the methods for determining and predicting future return levels. Yet, we view the regulatory movement away from a very mechanical return approach work as a notable positive that should help ensure an appropriate level of returns over a period of time.

Similar to the BCUC, the Alberta Utilities Commission (AUC) issued a decision on the 2009 Generic Cost of Capital establishing a 9% ROE for utilities like FortisAlberta in 2009 and 2010. Under the previous formulaic approach, that utility would have been entitled to an 8.61% return. Moreover, the allowed equity within the regulated capital structure moved from 37% to 41% effective January 1, 2009. Notably, this return framework will be in effect for 2011 providing a level of certainty to FortisAlberta's future earnings.

Unfortunately, not every jurisdiction is proving to be as progressive as Alberta, BC and the National Energy Board in the regulated Trans-Quebec & Maritimes Pipeline decision (see file RH-1-2008 and our March 19, 2009 note "*Regulatory round-up*"). The Newfoundland and Labrador Board of Commissioners of Public Utilities (PUB) most recent decision increased the allowed ROE for Newfoundland Power from 8.95% in 2009 to 9% in 2010. Additionally, in the past, the PUB ordered Newfoundland Power's allowed ROEs for 2011 and 2012 would be determined by an automated formula that will be subject to review in Q1 2010. We do not need to belabour all of the regulatory developments, however, we note that returns are slowly biasing to the upside.

### Acquisition trail

In our view, Fortis continues to demonstrate a rather impressive ability to successfully integrate acquisitions. Additionally, we view acquisitions as somewhat central to the company's growth strategy. Fortis management has been reiterating this. For instance, the company's most recent Management Discussion and Analysis stated "We remain disciplined and patient in our pursuit of electric and gas utility acquisitions in the United States and Canada that will add value for Fortis shareholders". Fortis showed discipline in its acquisition strategy by not competing in a bidding war for Central Vermont Service Corp. The company received a C\$17m termination fee. For further details see "*A positive pass*" published on 12 July 2011.

Given the success of Fortis in past transactions, as measured in terms of financials, share price and operationally, we believe the company's current valuation and skill set may lead to some potentially value creating acquisition activity (see Exhibit 10 below for select Fortis M&A transactions).

**Exhibit 10: Selected Fortis M&A transactions**

\$ in millions, unless otherwise stated

Announced Date	Asset/Company	Deal value (\$m)	Comment
7/22/2009	Caribbean Utilities Co.	CAD 6.74	Acquired an additional 2.7% of Caribbean Utilities Co.
6/23/2009	Great Lakes Power Distribution	CAD 68.00	Acquired from Brookfield the utility that serves the District of Algoma in northern Ontario.
10/1/2008	Grimsby Power Inc.	CAD 1.10	Acquired a 10% minority interest.
10/1/2008	Caribbean Utilities Co.	CAD 3.00	Acquired an additional 1% of Caribbean Utilities Co.
8/15/2008	Caribbean Utilities Co.	CAD 25.00	Acquired an additional 2% of Caribbean Utilities Co.
7/23/2007	Delta Regina	CAD 49.95	Delta hotel located in Regina, Saskatchewan.
2/26/2007	Terasen Inc.	CAD 3,700.00	Gas distribution in British Columbia.
11/7/2006	Caribbean Utilities Co.	CAD 55.70	Acquired an additional 16% of Caribbean Utilities Co.
10/19/2006	4 hotels in western Canada	CAD 51.60	4 hotels (Holiday Inn, Best Western and Ramada) located in BC and Alberta.
8/28/2006	PPC Ltd & Atlantic Equipment & Power (Turks & Caicos) Ltd.	CAD 97.70	Electric utility that services ~80% of the Turks and Caicos Islands.
1/25/2005	3 hotels in western Canada	CAD 62.60	3 hotels in Western Canada from Greenwood Inns (Calgary, Edmonton and Winnipeg).
12/15/2004	Princeton Light & Power	CAD 3.70	PLP is an electric utility that services Princeton, BC.
5/21/2004	Belize Electric Company Ltd.	USD 3.50	Acquired the remaining 5% interest of the company.
9/17/2003	4 hotels in Ontario	CAD 43.20	4 hotels located in Ontario (Cambridge, Kitchener, Sarnia and Peterborough).
9/15/2003	Alberta Utility & British Columbia Utility (from Aquila)	CAD 1,500.00	BC and Alberta units of Aquila Inc.
2/26/2003	Granite Power Corp	CAD 8.80	Company consist of Granite Power Distribution & Granite Power Generation.
1/30/2003	Caribbean Utilities Co.	CAD 71.00	Acquired additional 3,863,695 Class A Ordinary Shares, representing approximately 15.9 per cent of the outstanding shares of the company and increased Fortis' holding to roughly 38%.
12/1/2002	Delta St John's Hotel and conference centre	CAD 25.90	Hotel in downtown St. John's, Newfoundland
5/9/2002	Cornwall Street Railway Light	CAD 67.70	City of Cornwall electric transmission & distribution utility.
4/16/2002	Kings Place	CAD 27.70	Commercial property in Fredericton, NB.
3/13/2002	Caribbean Utilities Co.	CAD 12.90	Acquired additional ~2% of the company.
3/20/2002	Niagara Power Co.	CAD 49.00	Purchase remaining 50% of Niagara Power Co.
2/1/2002	Cabot palace I	CAD 14.30	133,327 Square feet premium office tower in St. John's, Newfoundland
9/18/2001	Portfolio of properties in St. John's	CAD 8.30	Purchased TD Place commercial bldg and 6 parcels of land.
9/14/2001	Aliant Poles	CAD 46.00	Purchased 102,000 poles and related infrastructure from Aliant Telecom.
1/26/2001	Belize Electric Company Ltd.	USD 62.00	Acquired 95% of company from Duke Energy.
12/19/2000	2 Hydro generating stations	CAD 6.90	2 generating stations (6.88MW) in upper New York state.
12/14/2000	Brunswick Square Ltd.	CAD 6.20	Acquired 50% of the company Fortis doesn't own.
12/1/2000	Fort William Building and Blue cross centre	CAD 52.70	Fort William building in St. John's, Newfoundland and Blue cross centre in Moncton, New Brunswick.
2/23/2000	Caribbean Utilities Co.	CAD 79.90	Acquired 20% of the company.
12/30/1999	2 Hydro generating stations	CAD 19.77	2 generating stations (16MW) in upper New York state (Moose River & Philadelphia)
10/28/1999	Belize Electricity Ltd.	CAD 36.80	Acquired 67% interest in the main commercial generator, transmitter & distributor of electricity in Belize.
8/31/1999	Brunswick Square Ltd.	CAD 10.12	Acquired 50% of the company by Fortis Properties.
1/31/1999	Mount Peyton	CAD 2.20	Acquired all common shares and notes payable.
	Total USD	USD 65.50	
	Total CAD	CAD 6,214.48	

Source: Bloomberg, Company data and Credit Suisse

In terms of acquisitions, we believe Fortis has a few advantages over others, including:

- Fortis has growing expertise with both electric and gas utilities;
- Larger size will allow it to look at a larger spectrum of potential target companies;
- A proven ability to effectively integrate acquisitions;
- A rather strong appetite for yield oriented securities in Canada;
- The potential ability to support a transaction with pension fund capital;
- Canada's rather benign interest rate environment; and,
- Bought deal financing commonly employed in Canada.

Fortis possesses a number of absolute and relative advantages over some other competitors

Historically, Fortis has been very adept at acquisitions. Corporate growth has benefited from the company's ability to successfully acquire and integrate selected assets. Capital market conditions are demonstrating signs of improved functioning. Therefore, the typical Fortis acquisition strategy is more palatable in current capital markets. For greater details, please refer to our 6 August 2009 note entitled "Pondering a Portland purchase?"

## Valuation

We continue to believe that Fortis has strong organic growth in key areas such as British Columbia, Alberta and the Caribbean. In our view, the company faces a delicate balance of capital investment opportunities and cash flow needs. From our perspective, the next big catalysts for the stock will likely revolve around capital efficiency initiatives or a large scale acquisition which will always lack predictability. As a result of the quarter, we revised our EPS estimates for 2011, 2012 and 2013 to C\$1.74, C\$1.82 and C\$1.87 from C\$1.77, C\$1.86 and C\$1.91, respectively. Our Neutral rating and C\$34.00 target price is obtained

Rating: Neutral

Target: C\$34

from multiple valuation approaches, including: a 19.0x P/E multiple of 2012 earnings; a 1.7x book value multiple; and, a DCF-based valuation. We reiterate our Neutral rating. Some historical Fortis valuation parameters appear in Exhibit 11 below generated by Credit Suisse RAVE.

#### Exhibit 11: Fortis historical valuation

 Fortis Inc. (FTS.TO, C\$34.06, NEUTRAL, TP C\$34.00)

## Disclosure Appendix

### Important Global Disclosures

I, Andrew M. Kuske, certify that (1) the views expressed in this report accurately reflect my personal views about all of the subject companies and securities and (2) no part of my compensation was, is or will be directly or indirectly related to the specific recommendations or views expressed in this report.

See the Companies Mentioned section for full company names.

**3-Year Price, Target Price and Rating Change History Chart for FTS.TO**

The analyst(s) responsible for preparing this research report received compensation that is based upon various factors including Credit Suisse's total revenues, a portion of which are generated by Credit Suisse's investment banking activities.

**Analysts' stock ratings are defined as follows:**

**Outperform (O):** The stock's total return is expected to outperform the relevant benchmark\* by at least 10-15% (or more, depending on perceived risk) over the next 12 months.

**Neutral (N):** The stock's total return is expected to be in line with the relevant benchmark\* (range of  $\pm 10-15\%$ ) over the next 12 months.

**Underperform (U):** The stock's total return is expected to underperform the relevant benchmark\* by 10-15% or more over the next 12 months.

\*Relevant benchmark by region: As of 29<sup>th</sup> May 2009, Australia, New Zealand, U.S. and Canadian ratings are based on (1) a stock's absolute total return potential to its current share price and (2) the relative attractiveness of a stock's total return potential within an analyst's coverage universe\*\*, with Outperforms representing the most attractive, Neutrals the less attractive, and Underperforms the least attractive investment opportunities. Some U.S. and Canadian ratings may fall outside the absolute total return ranges defined above, depending on market conditions and industry factors. For Latin American, Japanese, and non-Japan Asia stocks, ratings are based on a stock's total return relative to the average total return of the relevant country or regional benchmark; for European stocks, ratings are based on a stock's total return relative to the analyst's coverage universe\*\*. For Australian and New Zealand stocks, 12-month rolling yield is incorporated in the absolute total return calculation and a 15% and a 7.5% threshold replace the 10-15% level in the Outperform and Underperform stock rating definitions, respectively. The 15% and 7.5% thresholds replace the +10-15% and -10-15% levels in the Neutral stock rating definition, respectively.

\*\*An analyst's coverage universe consists of all companies covered by the analyst within the relevant sector.

**Restricted (R):** In certain circumstances, Credit Suisse policy and/or applicable law and regulations preclude certain types of communications, including an investment recommendation, during the course of Credit Suisse's engagement in an investment banking transaction and in certain other circumstances.

**Volatility Indicator [V]:** A stock is defined as volatile if the stock price has moved up or down by 20% or more in a month in at least 8 of the past 24 months or the analyst expects significant volatility going forward.

**Analysts' coverage universe weightings are distinct from analysts' stock ratings and are based on the expected performance of an analyst's coverage universe\* versus the relevant broad market benchmark\*\*:**

**Overweight:** Industry expected to outperform the relevant broad market benchmark over the next 12 months.

**Market Weight:** Industry expected to perform in-line with the relevant broad market benchmark over the next 12 months.

**Underweight:** Industry expected to underperform the relevant broad market benchmark over the next 12 months.

\*An analyst's coverage universe consists of all companies covered by the analyst within the relevant sector.

\*\*The broad market benchmark is based on the expected return of the local market index (e.g., the S&P 500 in the U.S.) over the next 12 months.

**Credit Suisse's distribution of stock ratings (and banking clients) is:**

Global Ratings Distribution		
Outperform/Buy*	48%	(62% banking clients)
Neutral/Hold*	40%	(57% banking clients)
Underperform/Sell*	10%	(54% banking clients)
Restricted	2%	

\*For purposes of the NYSE and NASD ratings distribution disclosure requirements, our stock ratings of Outperform, Neutral, and Underperform most closely correspond to Buy, Hold, and Sell, respectively; however, the meanings are not the same, as our stock ratings are determined on a relative basis. (Please refer to definitions above.) An investor's decision to buy or sell a security should be based on investment objectives, current holdings, and other individual factors.

Credit Suisse's policy is to update research reports as it deems appropriate, based on developments with the subject company, the sector or the market that may have a material impact on the research views or opinions stated herein.

Credit Suisse's policy is only to publish investment research that is impartial, independent, clear, fair and not misleading. *See the Companies Mentioned section for full company names.*

**Price Target:** (12 months) for (FTS.TO)

**Method:** We obtain our C\$34.00 target price for Fortis Inc. by using multiple valuation methodologies, yield base analysis, and discounted cash flow, all of which produce the C\$34.00 target. Our target price implies a P/E (price/earnings) multiple of 19.0x our 2012 EPS (earnings per share) estimate of C\$1.82 and an EV/EBITDA (enterprise value/earnings before interest, taxes, depreciation, and amortization) multiple of 10.2x our EBITDA estimate.

**Risks:** There are a number of risks to Fortis' achievement of our C\$34.00 target price: commodity prices; weather; environmental; regulatory; access to capital markets; and, interest rates. Moreover, one should never underestimate the power of the regulator in any regulated business.

Please refer to the firm's disclosure website at [www.credit-suisse.com/researchdisclosures](http://www.credit-suisse.com/researchdisclosures) for the definitions of abbreviations typically used in the target price method and risk sections.

*See the Companies Mentioned section for full company names.*

The subject company (FTS.TO) currently is, or was during the 12-month period preceding the date of distribution of this report, a client of Credit Suisse.

Credit Suisse provided investment banking services to the subject company (FTS.TO) within the past 12 months.

Credit Suisse provided non-investment banking services, which may include Sales and Trading services, to the subject company (FTS.TO) within the past 12 months.

Credit Suisse expects to receive or intends to seek investment banking related compensation from the subject company (FTS.TO) within the next 3 months.

Credit Suisse has received compensation for products and services other than investment banking services from the subject company (FTS.TO) within the past 12 months.

### Important Regional Disclosures

Singapore recipients should contact a Singapore financial adviser for any matters arising from this research report.

An analyst involved in the preparation of this report has visited certain material operations of the subject company (FTS.TO) within the past 12 months. The analyst may not have visited all material operations of the subject company. The travel expenses of the analyst in connection with such visits were not paid or reimbursed by the subject company, other than de minimus local travel expenses.

Restrictions on certain Canadian securities are indicated by the following abbreviations: NVS--Non-Voting shares; RVS--Restricted Voting Shares; SVS--Subordinate Voting Shares.

Individuals receiving this report from a Canadian investment dealer that is not affiliated with Credit Suisse should be advised that this report may not contain regulatory disclosures the non-affiliated Canadian investment dealer would be required to make if this were its own report.

For Credit Suisse Securities (Canada), Inc.'s policies and procedures regarding the dissemination of equity research, please visit [http://www.csfb.com/legal\\_terms/canada\\_research\\_policy.shtml](http://www.csfb.com/legal_terms/canada_research_policy.shtml).

As of the date of this report, Credit Suisse acts as a market maker or liquidity provider in the equities securities that are the subject of this report.

Principal is not guaranteed in the case of equities because equity prices are variable.

Commission is the commission rate or the amount agreed with a customer when setting up an account or at anytime after that.

CS may have issued a Trade Alert regarding this security. Trade Alerts are short term trading opportunities identified by an analyst on the basis of market events and catalysts, while stock ratings reflect an analyst's investment recommendations based on expected total return over a 12-month period relative to the relevant coverage universe. Because Trade Alerts and stock ratings reflect different assumptions and analytical methods, Trade Alerts may differ directionally from the analyst's stock rating.

The author(s) of this report maintains a CS Model Portfolio that he/she regularly adjusts. The security or securities discussed in this report may be a component of the CS Model Portfolio and subject to such adjustments (which, given the composition of the CS Model Portfolio as a whole, may differ from the recommendation in this report, as well as opportunities or strategies identified in Trading Alerts concerning the same security). The CS Model Portfolio and important disclosures about it are available at [www.credit-suisse.com/ti](http://www.credit-suisse.com/ti).

Taiwanese Disclosures: Reports written by Taiwan-based analysts on non-Taiwan listed companies are not considered recommendations to buy or sell securities under Taiwan Stock Exchange Operational Regulations Governing Securities Firms Recommending Trades in Securities to Customers.

To the extent this is a report authored in whole or in part by a non-U.S. analyst and is made available in the U.S., the following are important disclosures regarding any non-U.S. analyst contributors:

The non-U.S. research analysts listed below (if any) are not registered/qualified as research analysts with FINRA. The non-U.S. research analysts listed below may not be associated persons of CSSU and therefore may not be subject to the NASD Rule 2711 and NYSE Rule 472 restrictions on communications with a subject company, public appearances and trading securities held by a research analyst account.

- Andrew M. Kuske, non-U.S. analyst, is a research analyst employed by Credit Suisse Securities (Canada), Inc..
- Paul Tan, non-U.S. analyst, is a research analyst employed by Credit Suisse Securities (Canada), Inc..

Disclaimers continue on next page.

This report is not directed to, or intended for distribution to or use by, any person or entity who is a citizen or resident of or located in any locality, state, country or other jurisdiction where such distribution, publication, availability or use would be contrary to law or regulation or which would subject Credit Suisse AG, the Swiss bank, or its subsidiaries or its affiliates ("CS") to any registration or licensing requirement within such jurisdiction. All material presented in this report, unless specifically indicated otherwise, is under copyright to CS. None of the material, nor its content, nor any copy of it, may be altered in any way, transmitted to, copied or distributed to any other party, without the prior express written permission of CS. All trademarks, service marks and logos used in this report are trademarks or service marks or registered trademarks or service marks of CS or its affiliates.

The information, tools and material presented in this report are provided to you for information purposes only and are not to be used or considered as an offer or the solicitation of an offer to sell or to buy or subscribe for securities or other financial instruments. CS may not have taken any steps to ensure that the securities referred to in this report are suitable for any particular investor. CS will not treat recipients as its customers by virtue of their receiving the report. The investments or services contained or referred to in this report may not be suitable for you and it is recommended that you consult an independent investment advisor if you are in doubt about such investments or investment services. Nothing in this report constitutes investment, legal, accounting or tax advice or a representation that any investment or strategy is suitable or appropriate to your individual circumstances or otherwise constitutes a personal recommendation to you. CS does not offer advice on the tax consequences of investment and you are advised to contact an independent tax adviser. Please note in particular that the bases and levels of taxation may change.

CS believes the information and opinions in the Disclosure Appendix of this report are accurate and complete. Information and opinions presented in the other sections of the report were obtained or derived from sources CS believes are reliable, but CS makes no representations as to their accuracy or completeness. Additional information is available upon request. CS accepts no liability for loss arising from the use of the material presented in this report, except that this exclusion of liability does not apply to the extent that liability arises under specific statutes or regulations applicable to CS. This report is not to be relied upon in substitution for the exercise of independent judgment. CS may have issued, and may in the future issue, a trading call regarding this security. Trading calls are short term trading opportunities based on market events and catalysts, while stock ratings reflect investment recommendations based on expected total return over a 12-month period as defined in the disclosure section. Because trading calls and stock ratings reflect different assumptions and analytical methods, trading calls may differ directionally from the stock rating. In addition, CS may have issued, and may in the future issue, other reports that are inconsistent with, and reach different conclusions from, the information presented in this report. Those reports reflect the different assumptions, views and analytical methods of the analysts who prepared them and CS is under no obligation to ensure that such other reports are brought to the attention of any recipient of this report. CS is involved in many businesses that relate to companies mentioned in this report. These businesses include specialized trading, risk arbitrage, market making, and other proprietary trading.

Past performance should not be taken as an indication or guarantee of future performance, and no representation or warranty, express or implied, is made regarding future performance. Information, opinions and estimates contained in this report reflect a judgement at its original date of publication by CS and are subject to change without notice. The price, value of and income from any of the securities or financial instruments mentioned in this report can fall as well as rise. The value of securities and financial instruments is subject to exchange rate fluctuation that may have a positive or adverse effect on the price or income of such securities or financial instruments. Investors in securities such as ADR's, the values of which are influenced by currency volatility, effectively assume this risk.

Structured securities are complex instruments, typically involve a high degree of risk and are intended for sale only to sophisticated investors who are capable of understanding and assuming the risks involved. The market value of any structured security may be affected by changes in economic, financial and political factors (including, but not limited to, spot and forward interest and exchange rates), time to maturity, market conditions and volatility, and the credit quality of any issuer or reference issuer. Any investor interested in purchasing a structured product should conduct their own investigation and analysis of the product and consult with their own professional advisers as to the risks involved in making such a purchase.

Some investments discussed in this report have a high level of volatility. High volatility investments may experience sudden and large falls in their value causing losses when that investment is realised. Those losses may equal your original investment. Indeed, in the case of some investments the potential losses may exceed the amount of initial investment, in such circumstances you may be required to pay more money to support those losses. Income yields from investments may fluctuate and, in consequence, initial capital paid to make the investment may be used as part of that income yield. Some investments may not be readily realisable and it may be difficult to sell or realise those investments, similarly it may prove difficult for you to obtain reliable information about the value, or risks, to which such an investment is exposed.

## MARKET COMMENTARY/STRATEGY

### Discerning demand - Alberta

- **Alberta in focus:** In Alberta, power demand and prices have moved in a rather erratic fashion. Yet, given the impact of outages in the Alberta market on pricing, we believe the demand data is more meaningful. Notably, over a forty three month period of time (June 2008 to Dec 2011), 29 of 43 months posted a positive year-on-year change in demand.
- **Assessing demand and pricing:** Alberta's power demand posted negative growth of 1.0% in December 2011 when compared against December 2010. The same data over sequential months (i.e. November to December) showed an increase in demand by 1.8%. In terms of pricing, the monthly comparisons posted a decline of 13.1% on a year-over-year basis and 53.2% on a sequential basis. From our perspective, the combination of outages especially the notice of termination of Sundance units 1 & 2 (see "*Sun setting on Sundance*" on 9 February 2011 for further details), extended unplanned outage at Genesee 3 and December's weather impacted demand and pricing.
- **Power statistics:** In the current economic environment, we believe there is utility to highlighting some of the more recent electricity demand and pricing statistics. We believe the data can provide a degree of insight into underlying economic activity. Obviously, many factors affect demand data including weather and outage patterns. Alberta's power market is indicating some notable strength. Power pricing has recently shown strength due primarily to TransAlta's notice of termination of Sundance 1 & 2. Over the longer-term, however, we continue to believe Alberta's power market fundamentals are rather attractive.
- **Selected investment themes:** In general, we continue to prefer low-cost power producers with exposure to structurally tight power markets. In our coverage universe, direct exposure to the Alberta power market can be achieved via Capital Power Corp., TransAlta and TransCanada. In terms of merchant exposure, TransCanada has the most profitable exposure in the current market environment as a result of the Power Purchase Agreements (PPAs). Notably, in a market with increased volatility due to the notice of termination on Sundance 1 & 2, we believe Capital Power offers the best exposure with the fast ramping Clover Bar Energy Centre. In the near-term Clover Bar will cover CPX's G3 position, so potential upside from pricing is more limited than normal. Discounting the impact of the Sundance and G3 issues, CPX and TA provide potentially better margin protection as a result of PPA plant ownership and partially contracted power portfolios. Finally, Fortis provides largely regulated utility exposure in Alberta and face rather limited impact from changes in demand.

**DISCLOSURE APPENDIX CONTAINS IMPORTANT DISCLOSURES, ANALYST CERTIFICATIONS, INFORMATION ON TRADE ALERTS, ANALYST MODEL PORTFOLIOS AND THE STATUS OF NON-U.S. ANALYSTS.** U.S. Disclosure: Credit Suisse does and seeks to do business with companies covered in its research reports. As a result, investors should be aware that the Firm may have a conflict of interest that could affect the objectivity of this report. Investors should consider this report as only a single factor in making their investment decision.

Electricity related demand and pricing information can provide a certain level of insight into underlying economic activity. Clearly, the information is beneficial for evaluating the performance of specific power generation facilities in the province of Alberta. Yet, power data may also help assess the relative health of the most significant portions of the province's economy such as the energy sector in Alberta. Our research note is divided into three parts: (a) Assessing Alberta; (b) Blame it on the weather; and, (c) Forward pricing.

## Assessing Alberta

The first step in our Alberta monthly demand analysis is the year-over-year comparison for each month appearing in Exhibit 1 below.

**Exhibit 1: Alberta monthly electricity demand and price percentage change (y-o-y)**

Source: Alberta Electric System Operator (AESO) and Credit Suisse

As evident from Exhibit 1, both Alberta's power demand and prices have moved in a rather erratic fashion. We believe the demand data is more meaningful than pricing as generation supply will significantly impact pricing. December showed a 1.0% demand decrease versus the prior year and an increase of 1.8% against November 2011. Notably, over the last 43 months (encompassing June 2008 to December 2011), 29 of 43 months posted a positive year-on-year change in demand.

More positive than negative year-on-year changes in demand over the last 43 months

**Exhibit 2: AB electricity demand and price y/y comparison**

Source: Alberta Electric System Operator (AESO) and Credit Suisse

**Exhibit 3: AB electricity demand and price m/m comparison**

Source: Alberta Electric System Operator (AESO) and Credit Suisse

Exhibit 2 and Exhibit 3 illustrate Alberta's hour-by-hour profile for demand and pricing. As changes in these exhibits can be rather subtle, we provide selected information in tabular form in Exhibit 4.

**Exhibit 4: Monthly AESO data**

Time Frame	Average Demand (MW)	Weighted Avg. Price (\$/MWh)	Demand chg. y/y	Price chg. y/y	Demand chg. m/m	Price chg. m/m
2011 Dec	8,926	53.20	-1.0%	-13.1%	1.8%	-53.2%
2011 Nov	8,772	113.72	1.4%	125.2%	6.9%	57.7%
2011 Oct	8,202	72.10	1.7%	129.9%	0.1%	-30.4%
2011 Sept	8,195	103.60	4.2%	258.5%	-1.9%	-22.3%
2011 Aug	8,354	133.39	3.9%	234.8%	0.9%	102.0%
2011 Jul	8,276	66.05	3.1%	58.5%	5.1%	-14.3%
2011 Jun	7,873	77.11	-0.1%	30.3%	3.5%	131.5%
2011 May	7,606	33.31	-1.3%	-76.2%	-6.1%	-37.7%
2011 Apr	8,100	53.49	4.3%	5.6%	-7.1%	7.6%
2011 Mar	8,720	49.70	6.9%	37.7%	-1.9%	-61.2%
2011 Feb	8,893	128.07	4.6%	188.8%	-0.5%	54.7%
2011 Jan	8,940	82.76	4.7%	87.6%	-0.9%	35.2%
2010 Dec	9,018	61.22	3.4%	10.7%	4.2%	21.3%

Source: Alberta Electric System Operator (AESO) and Credit Suisse

Finally, for certain power market participants, Alberta's 30-day rolling average pricing is a critical metric to watch. Exhibit 5 highlights the 30-day RAP.

**Exhibit 5: Alberta power pricing 30-day RAP**

Source: Alberta Electric System Operator (AESO) and Credit Suisse

**Blame it on the weather?**

Clearly, weather can play a meaningful role in power demand data. Therefore, we highlight weather statistics for both Edmonton and Calgary in Exhibit 6 and Exhibit 7.

**Exhibit 6: Edmonton area historical temperatures (in Celsius)**

Temperature	Jan	Feb	Mar	Apr	May	Jun	Jul	Aug	Sep	Oct	Nov	Dec

Source: Environment Canada and Credit Suisse

Based upon Environment Canada's December data, both Edmonton and Calgary recorded average temperature that was warmer than normal.

## Summary

December showed a year on year decrease in demand in Alberta. Many factors affect demand data including the weather. Pricing has posted negative numbers on a year-over-year basis and on a month-over-month basis which we believe were influenced by the weather and selected plant outages in December, most notably the termination of Sundance unit 1 & 2 and the extended unplanned outage at Genesee 3. In our view, Alberta's power market is indicating some signs of strength. The strength of demand may eventually translate into much stronger power pricing. Longer-term, we believe Alberta's power market fundamentals are rather attractive. In our coverage universe, direct exposure to the Alberta power market can be achieved via Capital Power Corp., TransAlta and TransCanada. In terms of merchant exposure, TransCanada has the most profitable exposure in the current market environment as a result of the Power Purchase Agreements (PPAs). Notably, in a market with increased volatility, Capital Power offers the best exposure with the fast ramping Clover Bar Energy Centre. In the near-term Clover

Bar will cover CPX's G3 position, so potential upside from pricing is more limited than normal. Discounting the impact of the Sundance and G3 issues, both CPX and TA provide potentially better margin protection as a result of PPA plant ownership and partially contracted power portfolios. Finally, Fortis provides largely regulated utility exposure in Alberta and is facing a somewhat limited impact from changes in demand.

The analyst(s) responsible for preparing this research report received compensation that is based upon various factors including Credit Suisse's total revenues, a portion of which are generated by Credit Suisse's investment banking activities.

**Analysts' stock ratings are defined as follows:**

**Outperform (O):** The stock's total return is expected to outperform the relevant benchmark\* by at least 10-15% (or more, depending on perceived risk) over the next 12 months.

**Neutral (N):** The stock's total return is expected to be in line with the relevant benchmark\* (range of  $\pm 10\text{-}15\%$ ) over the next 12 months.

**Underperform (U):** The stock's total return is expected to underperform the relevant benchmark\* by 10-15% or more over the next 12 months.

\*Relevant benchmark by region: As of 29<sup>th</sup> May 2009, Australia, New Zealand, U.S. and Canadian ratings are based on (1) a stock's absolute total return potential to its current share price and (2) the relative attractiveness of a stock's total return potential within an analyst's coverage universe\*\*, with Outperforms representing the most attractive, Neutrals the less attractive, and Underperforms the least attractive investment opportunities. Some U.S. and Canadian ratings may fall outside the absolute total return ranges defined above, depending on market conditions and industry factors. For Latin American, Japanese, and non-Japan Asia stocks, ratings are based on a stock's total return relative to the average total return of the relevant country or regional benchmark; for European stocks, ratings are based on a stock's total return relative to the analyst's coverage universe\*\*. For Australian and New Zealand stocks, 12-month rolling yield is incorporated in the absolute total return calculation and a 15% and a 7.5% threshold replace the 10-15% level in the Outperform and Underperform stock rating definitions, respectively. The 15% and 7.5% thresholds replace the +10-15% and -10-15% levels in the Neutral stock rating definition, respectively.

\*\*An analyst's coverage universe consists of all companies covered by the analyst within the relevant sector.

**Restricted (R):** In certain circumstances, Credit Suisse policy and/or applicable law and regulations preclude certain types of communications, including an investment recommendation, during the course of Credit Suisse's engagement in an investment banking transaction and in certain other circumstances.

**Volatility Indicator [V]:** A stock is defined as volatile if the stock price has moved up or down by 20% or more in a month in at least 8 of the past 24 months or the analyst expects significant volatility going forward.

**Analysts' coverage universe weightings are distinct from analysts' stock ratings and are based on the expected performance of an analyst's coverage universe\* versus the relevant broad market benchmark\*\*:**

**Overweight:** Industry expected to outperform the relevant broad market benchmark over the next 12 months.

**Market Weight:** Industry expected to perform in-line with the relevant broad market benchmark over the next 12 months.

**Underweight:** Industry expected to underperform the relevant broad market benchmark over the next 12 months.

\*An analyst's coverage universe consists of all companies covered by the analyst within the relevant sector.

\*\*The broad market benchmark is based on the expected return of the local market index (e.g., the S&P 500 in the U.S.) over the next 12 months.

---

**Credit Suisse's distribution of stock ratings (and banking clients) is:**

Global Ratings Distribution		
<b>Outperform/Buy*</b>	47%	(61% banking clients)
<b>Neutral/Hold*</b>	40%	(57% banking clients)
<b>Underperform/Sell*</b>	10%	(51% banking clients)
<b>Restricted</b>	2%	

\*For purposes of the NYSE and NASD ratings distribution disclosure requirements, our stock ratings of Outperform, Neutral, and Underperform most closely correspond to Buy, Hold, and Sell, respectively; however, the meanings are not the same, as our stock ratings are determined on a relative basis. (Please refer to definitions above.) An investor's decision to buy or sell a security should be based on investment objectives, current holdings, and other individual factors.

**Price Target:** (12 months) for (CPX.TO)

**Method:** Our C\$28.00 target price for Capital Power is obtained by using several valuation methodologies, all of which produce the C\$28 target. The methods are: a 17.0x P/E (price/earnings) multiple applied to our 2012 EPS estimate of C\$1.68; a target dividend yield of 4.5%; an adjusted 9.0x EV/EBITDA (enterprise value/earnings before interest, taxes, depreciation and amortization) multiple; and, a discounted cash flow.

**Risks:** Risks to Capital Power Corp's achievement of our C\$28.00 target price are commodity prices, weather, environmental, regulatory, portfolio optimization strategies, shareholder concentration, foreign exchange and interest rates. Also, the power of the regulator in any regulated business should never be underestimated.

**Price Target:** (12 months) for (FTS.TO)

**Method:** We obtain our C\$34.00 target price for Fortis Inc. by using multiple valuation methodologies, yield base analysis, and discounted cash flow, all of which produce the C\$34.00 target. Our target price implies a P/E (price/earnings) multiple of 19.0x our 2012 EPS (earnings per share) estimate of C\$1.82 and an EV/EBITDA (enterprise value/earnings before interest, taxes, depreciation, and amortization) multiple of 10.2x our EBITDA estimate.

**Risks:** There are a number of risks to Fortis' achievement of our C\$34.00 target price: commodity prices; weather; environmental; regulatory; access to capital markets; and, interest rates. Moreover, one should never underestimate the power of the regulator in any regulated business.

**Price Target:** (12 months) for (TA.TO)

**Method:** We obtain our C\$22.00 target price for TransAlta by using several valuation methodologies: a variety of multiples; comparable analysis; and discounted cash flow. In summary, our C\$22.00 target price implies an 18.0x P/E (price/earnings) multiple on our estimated 2012 earnings per share of C\$1.24, a 9.0x EV/EBITDA (enterprise value/earnings before interest, taxes, depreciation and amortization) multiple.

**Risks:** Risks to TransAlta's achievement of our C\$22.00 target price are commodity prices, weather, environmental, regulatory, and interest rates. Also, the power of the regulator in any regulated business should never be underestimated.

**Price Target:** (12 months) for (TRP.TO)

**Method:** We obtain our C\$44.00 target price for TransCanada by using multiple valuation methodologies, all of which produce the C\$44.00 target. The methods are yield based analysis, and discounted cash flow. We use a P/E (price/earnings) multiple of roughly 17.5x our 2012 EPS (earnings per share) estimate of C\$2.55. In addition, we use an EV/EBITDA (enterprise value/earnings before interest, taxes, depreciation, and amortization) of 10.5x. We also use the dividend method, based on 3.8%.

**Risks:** Our C\$44.00 target price for TransCanada is subject to a number of risks: interest rates; commodity prices; operating rates; electricity market volatility; and, pipeline volumes. In any regulated business, one should never underestimate the power of the regulator.

Please refer to the firm's disclosure website at [www.credit-suisse.com/researchdisclosures](http://www.credit-suisse.com/researchdisclosures) for the definitions of abbreviations typically used in the target price method and risk sections.

*See the Companies Mentioned section for full company names.*

The subject company (CPX.TO, FTS.TO, TRP.TO) currently is, or was during the 12-month period preceding the date of distribution of this report, a client of Credit Suisse.

Credit Suisse provided investment banking services to the subject company (CPX.TO, FTS.TO, TRP.TO) within the past 12 months.

Credit Suisse provided non-investment banking services, which may include Sales and Trading services, to the subject company (FTS.TO) within the past 12 months.

Credit Suisse has managed or co-managed a public offering of securities for the subject company (CPX.TO) within the past 12 months.

Credit Suisse has received investment banking related compensation from the subject company (CPX.TO, TRP.TO) within the past 12 months.

Credit Suisse expects to receive or intends to seek investment banking related compensation from the subject company (CPX.TO, FTS.TO, TRP.TO) within the next 3 months.

Credit Suisse has received compensation for products and services other than investment banking services from the subject company (FTS.TO) within the past 12 months.

As of the date of this report, Credit Suisse acts as a market maker or liquidity provider in the equities securities that are the subject of this report.

Principal is not guaranteed in the case of equities because equity prices are variable.

Commission is the commission rate or the amount agreed with a customer when setting up an account or at anytime after that.

CS may have issued a Trade Alert regarding this security. Trade Alerts are short term trading opportunities identified by an analyst on the basis of market events and catalysts, while stock ratings reflect an analyst's investment recommendations based on expected total return over a 12-month period relative to the relevant coverage universe. Because Trade Alerts and stock ratings reflect different assumptions and analytical methods, Trade Alerts may differ directionally from the analyst's stock rating.

The author(s) of this report maintains a CS Model Portfolio that he/she regularly adjusts. The security or securities discussed in this report may be a component of the CS Model Portfolio and subject to such adjustments (which, given the composition of the CS Model Portfolio as a whole, may differ from the recommendation in this report, as well as opportunities or strategies identified in Trading Alerts concerning the same security). The CS Model Portfolio and important disclosures about it are available at [www.credit-suisse.com/ti](http://www.credit-suisse.com/ti).

Taiwanese Disclosures: Reports written by Taiwan-based analysts on non-Taiwan listed companies are not considered recommendations to buy or sell securities under Taiwan Stock Exchange Operational Regulations Governing Securities Firms Recommending Trades in Securities to Customers.

To the extent this is a report authored in whole or in part by a non-U.S. analyst and is made available in the U.S., the following are important disclosures regarding any non-U.S. analyst contributors:

The non-U.S. research analysts listed below (if any) are not registered/qualified as research analysts with FINRA. The non-U.S. research analysts listed below may not be associated persons of CSSU and therefore may not be subject to the NASD Rule 2711 and NYSE Rule 472 restrictions on communications with a subject company, public appearances and trading securities held by a research analyst account.

- Andrew M. Kuske, non-U.S. analyst, is a research analyst employed by Credit Suisse Securities (Canada), Inc..
- Paul Tan, non-U.S. analyst, is a research analyst employed by Credit Suisse Securities (Canada), Inc..

This report is not directed to, or intended for distribution to or use by, any person or entity who is a citizen or resident of or located in any locality, state, country or other jurisdiction where such distribution, publication, availability or use would be contrary to law or regulation or which would subject Credit Suisse AG, the Swiss bank, or its subsidiaries or its affiliates ("CS") to any registration or licensing requirement within such jurisdiction. All material presented in this report, unless specifically indicated otherwise, is under copyright to CS. None of the material, nor its content, nor any copy of it, may be altered in any way, transmitted to, copied or distributed to any other party, without the prior express written permission of CS. All trademarks, service marks and logos used in this report are trademarks or service marks or registered trademarks or service marks of CS or its affiliates.

The information, tools and material presented in this report are provided to you for information purposes only and are not to be used or considered as an offer or the solicitation of an offer to sell or to buy or subscribe for securities or other financial instruments. CS may not have taken any steps to ensure that the securities referred to in this report are suitable for any particular investor. CS will not treat recipients as its customers by virtue of their receiving the report. The investments or services contained or referred to in this report may not be suitable for you and it is recommended that you consult an independent investment advisor if you are in doubt about such investments or investment services. Nothing in this report constitutes investment, legal, accounting or tax advice or a representation that any investment or strategy is suitable or appropriate to your individual circumstances or otherwise constitutes a personal recommendation to you. CS does not offer advice on the tax consequences of investment and you are advised to contact an independent tax adviser. Please note in particular that the bases and levels of taxation may change.

CS believes the information and opinions in the Disclosure Appendix of this report are accurate and complete. Information and opinions presented in the other sections of the report were obtained or derived from sources CS believes are reliable, but CS makes no representations as to their accuracy or completeness. Additional information is available upon request. CS accepts no liability for loss arising from the use of the material presented in this report, except that this exclusion of liability does not apply to the extent that liability arises under specific statutes or regulations applicable to CS. This report is not to be relied upon in substitution for the exercise of independent judgment. CS may have issued, and may in the future issue, a trading call regarding this security. Trading calls are short term trading opportunities based on market events and catalysts, while stock ratings reflect investment recommendations based on expected total return over a 12-month period as defined in the disclosure section. Because trading calls and stock ratings reflect different assumptions and analytical methods, trading calls may differ directionally from the stock rating. In addition, CS may have issued, and may in the future issue, other reports that are inconsistent with, and reach different conclusions from, the information presented in this report. Those reports reflect the different assumptions, views and analytical methods of the analysts who prepared them and CS is under no obligation to ensure that such other reports are brought to the attention of any recipient of this report. CS is involved in many businesses that relate to companies mentioned in this report. These businesses include specialized trading, risk arbitrage, market making, and other proprietary trading.

Past performance should not be taken as an indication or guarantee of future performance, and no representation or warranty, express or implied, is made regarding future performance. Information, opinions and estimates contained in this report reflect a judgement at its original date of publication by CS and are subject to change without notice. The price, value of and income from any of the securities or financial instruments mentioned in this report can fall as well as rise. The value of securities and financial instruments is subject to exchange rate fluctuation that may have a positive or adverse effect on the price or income of such securities or financial instruments. Investors in securities such as ADR's, the values of which are influenced by currency volatility, effectively assume this risk.

Structured securities are complex instruments, typically involve a high degree of risk and are intended for sale only to sophisticated investors who are capable of understanding and assuming the risks involved. The market value of any structured security may be affected by changes in economic, financial and political factors (including, but not limited to, spot and forward interest and exchange rates), time to maturity, market conditions and volatility, and the credit quality of any issuer or reference issuer. Any investor interested in purchasing a structured product should conduct their own investigation and analysis of the product and consult with their own professional advisers as to the risks involved in making such a purchase.

Some investments discussed in this report have a high level of volatility. High volatility investments may experience sudden and large falls in their value causing losses when that investment is realised. Those losses may equal your original investment. Indeed, in the case of some investments the potential losses may exceed the amount of initial investment, in such circumstances you may be required to pay more money to support those losses. Income yields from investments may fluctuate and, in consequence, initial capital paid to make the investment may be used as part of that income yield. Some investments may not be readily realisable and it may be difficult to sell or realise those investments, similarly it may prove difficult for you to obtain reliable information about the value, or risks, to which such an investment is exposed.

## Delivering on dividends

- **Earnings review:** Fortis reported Q4 2011 headline EPS (FD) of C\$0.45, which missed our C\$0.50 and the Street's C\$0.48 view and at the low end of the C\$0.45-C\$0.50 range. Positively, the company increased its quarterly dividend to C\$0.30 from the previous C\$0.29. The increase was inline with our estimate but slightly missed the Street's C\$1.21 annualized figure. In general, we believe Fortis is making steady progress in delivering consistent financial results from a largely regulated asset base. We do not place undue emphasis on quarterly results in much of our universe as a result of the inherently long-cycle nature of many assets. For Fortis, we continue to focus on the ongoing significant regulated capital plan.
- **Significant organic growth continues:** Fortis continues to provide a rather robust capital expenditure outlook with guidance of C\$1.3bn for 2012. Additionally, Fortis updated its 5-year capex outlook to C\$5.5bn. Eighty-seven percent of that total amount is expected to go towards regulated utility activities that should deliver favourable risk adjusted returns.
- **Improving capital market conditions:** Historically, Fortis has been very adept at acquisitions. Corporate growth has benefited from the company's ability to successfully acquire and integrate selected assets. In our view, the company is well positioned in the current market for acquisition opportunities. The company stated, "We remain disciplined and patient in our pursuit of electric and gas utility acquisitions in the United States and Canada that will add value for Fortis shareholders".
- **Valuation:** Our C\$34.target price and Neutral rating are obtained utilizing multiple valuation approaches, including: a 18.5x P/E multiple of 2013 earnings; a 1.7x book value multiple; and, a DCF based valuation. We reiterate our Neutral rating.

### Share price performance

Quarterly EPS	Q1	Q2	Q3	Q4

**DISCLOSURE APPENDIX CONTAINS IMPORTANT DISCLOSURES, ANALYST CERTIFICATIONS, INFORMATION ON TRADE ALERTS, ANALYST MODEL PORTFOLIOS AND THE STATUS OF NON-U.S. ANALYSTS.** U.S. Disclosure: Credit Suisse does and seeks to do business with companies covered in its research reports. As a result, investors should be aware that the Firm may have a conflict of interest that could affect the objectivity of this report. Investors should consider this report as only a single factor in making their investment decision.

This research note is divided into three parts: (a) results; (b) outlook; and, (c) valuation. Each of these areas will be addressed in greater detail below.

## Results

Exhibit 1 highlights the segmented unadjusted earnings contributions for the most recent quarter and for the comparable period one year ago. Our commentary for each segment appears under the various headings below.

Results missed our and the Street's estimate

### Exhibit 1: Segmented unadjusted earnings contribution

C\$ in millions, unless otherwise stated

	Q4 2011	Q4 2010	chg y/y
Regulated Gas Utilities - Canadian	51	45	13%
Regulated Electric Utilities - Canadian	40	41	-2%
Regulated Electric Utilities - Caribbean	3	4	-25%
Non-regulated - Fortis Generation	5	6	-17%
Non-regulated - Fortis Properties	5	7	-29%
Corporate and other	(18)	(18)	0%
Net earnings applicable to common shares	86	85	1%

Source: Company data and Credit Suisse

### Regulated Gas Utilities - Canadian

The unadjusted earnings for this segment improved by roughly 13% year-over-year (see Exhibit 2). Some notable items for the regulated gas utilities include:

- Net customer additions were 7,450 during 2011 versus net additions of 9,393 during 2010;
- The amount of customer additions decreased versus 2010 due to lower building activity; and,
- Sales volumes for the quarter increased for all the segments, which includes Core-residential, Commercial, Industrial and Transportation segment.

### Exhibit 2: Regulated Gas Utilities (unadjusted)

	Q4 2011	Q4 2010	chg y/y
FortisBC Energy	51.0	45.0	13%

Source: Company data and Credit Suisse

### Regulated Electric Utilities – Canadian

This segment includes operating companies like FortisAlberta, FortisBC Electric, Newfoundland Power and Other Canadian Electric Utilities, which includes Maritime Electric and FortisOntario. Detailed contributions for each of these divisions can be found in Exhibit 3.

### Exhibit 3: Regulated electric utilities – Canadian contribution (unadjusted)

C\$ in millions, unless otherwise stated

	Q4 2011	Q4 2010	chg y/y
FortisAlberta	17	17	0%
FortisBC Electric	11	10	10%
Newfoundland Power	8	9	-11%
Other Cdn Electric Utilities	4	5	-20%
Earnings	40	41	-2%

Source: Company data and Credit Suisse

**FortisAlberta**

Earnings at this regulated utility were flat comparing Q4 2011 versus the prior period. See Exhibit 4 for selected highlights.

Slight decrease in energy delivery in Alberta

**Exhibit 4: Selected FortisAlberta performance highlights (unadjusted)**

	Q4 2011	Q4 2010	chg y/y
Energy deliveries (GWh)	4,232	4,255	-1%
Revenue (C\$/MWh)	24.10	23.27	4%
Operating expenses (C\$/MWh)	8.74	8.70	1%
Gross margin (C\$/MWh)	15.36	14.57	5%
Earnings (C\$millions)	17	17	0%

Source: Company data and Credit Suisse

**FortisBC Electric**

Segmented earnings at FortisBC Electric increased by 10% compared to the same period last year. The increase was due to growth in rate base.

Flat energy deliveries in BC

See Exhibit 5 for selected highlights.

**Exhibit 5: Selected FortisBC Electric performance highlights (unadjusted)**

	Q4 2011	Q4 2010	chg y/y
Energy deliveries (GWh)	843	847	0%
Revenue (C\$/MWh)	96.09	86.19	11%
Energy supply costs (C\$/MWh)	26.10	27.15	-4%
Operating expenses (C\$/MWh)	29.66	24.79	20%
Gross margin (C\$/MWh)	40.33	34.24	18%
Earnings (C\$millions)	11	10	10%

Source: Company data and Credit Suisse

**Newfoundland Power**

This segment's earnings reduced by 11% when comparing Q4 2011 versus Q4 2010. Higher electricity sales and reduction in energy supply cost were offset by wage and inflationary increases, higher effective corporate taxes and lower allowed ROE. Energy deliveries were up by approximately 3% (see Exhibit 6).

Increase in NP's energy deliveries

**Exhibit 6: Selected Newfoundland Power performance highlights (unadjusted)**

	Q4 2011	Q4 2010	chg y/y
Energy deliveries (GWh)	1,527	1,488	3%
Revenue (C\$/MWh)	102.16	102.15	0%
Energy supply costs (C\$/MWh)	67.45	68.55	-2%
Operating expenses (C\$/MWh)	13.10	10.08	30%
Gross margin (C\$/MWh)	21.61	23.52	-8%
Earnings (C\$millions)	8	9	-11%

Source: Company data, Credit Suisse estimates

**Other Canadian Electric Utilities**

This segment's earning decreased by 20% in Q4 2011 versus Q4 2010 primarily due to lower electricity sales at FortisOntario and higher operating expense. The energy deliveries for the period declined by 2%, when compared Q4 2010. Exhibit 7 contains selected highlights.

Decrease in energy deliveries

**Exhibit 7: Selected Other Canadian Electric Utilities performance highlights (unadjusted)**

	Q4 2011	Q4 2010	chg y/y
Energy deliveries (GWh)	568	578	-2%
Revenue (C\$/MWh)	147.89	150.52	-2%
Energy supply costs (C\$/MWh)	96.83	102.08	-5%
Operating expenses (C\$/MWh)	26.41	20.76	27%
Gross margin (C\$/MWh)	24.65	27.68	-11%
Earnings (C\$millions)	4	5	-20%

Source: Company data and Credit Suisse

**Regulated Electric Utilities – Caribbean**

This segment includes Belize Electricity (up to June 20, 2011), Caribbean Utilities, and Fortis Turks and Caicos. Earnings for this segment declined by 25% in Q4 2011 versus the same quarter last year. Energy deliveries declined 21% for several reasons. In our view, Belize Electricity was not overly material to Fortis. Additionally, we anticipate the dispute to be resolved in a rationale manner with Fortis recovering, at least, the rate base value. Yet, any such recovery may be over a period of time. The company stated that it “commenced an action in the Belize Supreme Court to challenge the legality of the expropriation of its investment in Belize Electricity. Fortis commissioned an independent valuation of its expropriated investment in Belize Electricity and submitted its claim for compensation to the GOB in November 2011.”

Awaiting a decision in Belize

See Exhibit 8 below for selected highlights.

**Exhibit 8: Caribbean - Regulated Electric Utilities performance highlights (unadjusted)**

	Q4 2011	Q4 2010	chg y/y
Energy deliveries (GWh)	174	220	-21%
Revenue (C\$/MWh)	402.30	381.82	5%
Energy supply costs (C\$/MWh)	264.37	236.36	12%
Operating expenses (C\$/MWh)	51.72	59.09	-12%
Gross margin (C\$/MWh)	86.21	86.36	0%
Earnings (C\$millions)	3	4	-25%

Source: Company data and Credit Suisse

**Non-regulated – Fortis Generation**

The non-regulated generation assets within this segment are located in Belize, British Columbia, Central Newfoundland, Ontario and Upper New York State. Earnings for the segment were down 17% in Q4 2011 compared to the same quarter last year. Energy deliveries decreased by 18% from Q4 2010 to Q4 2011 due to decreased production in Upper New York and Belize. Exhibit 9 provides selected highlights.

**Exhibit 9: Non-regulated generation – selected highlights**

	Q4 2011	Q4 2010	chg y/y
Energy deliveries (GWh)	112	137	-18%
Revenue (C\$/MWh)	80.36	65.69	22%
Operating expenses (C\$/MWh)	17.86	7.30	145%
Gross margin (C\$/MWh)	62.50	58.39	7%
Earnings (C\$millions)	5	6	-17%

Source: Company data and Credit Suisse

**Non-regulated – Fortis Properties**

Fortis Properties' net unadjusted earning contribution decreased by 29% in the Q4 2011 compared to Q4 2010. REVPAR increased to C\$72.39 from C\$70.76 for the comparable period last year. While, the occupancy rate of the Real Estate Division was down at 93.2% versus last year's 94.5%.

## Corporate

Corporate expenses remained flat to C\$18million in Q4 2011, when compared to Q4 2010.

## Outlook

We continue to believe investor, whether existing or prospective, should consider several major issues, including (a) funding organic growth; and (b) acquisition trail. Each of these issues is addressed below.

### Funding organic growth

In the most recent quarter the company's reported capital expenditures totaled C\$368 million, of which C\$315 million was spent at regulated utilities. Fortis guided that capital expenditures for 2012 will be roughly C\$1.3 billion. A majority of the total will be spent on Western Canadian assets (FortisBC Energy, FortisAlberta, and FortisBC Electric). Fortis' consolidated gross capital expenditures expectations over the 5 year plan (2012-2016) stood at C\$5.5bn with 87% of that total amount being allocated to regulated utilities. Both FortisAlberta and FortisBC Electric will receive the vast majority of that amount; whereas, the regulated gas utilities are planned to receive 23% of the total capex amount, and 13% is allocated to non-regulated operations. Given the regulated rates of return with utility capital expenditures, the increases should be viewed as longer-term positives provided an appropriate financial balance is struck.

Ongoing organic growth

With the significant current relative valuation advantages, we believe that Fortis may become more motivated to explore possible capital efficiency initiatives. In our view, the company possesses ample opportunities to become much more capital efficient. One strategy involves divesting certain non-utility assets and redeploying capital into utility assets or funding the capital program. Another option would entail divesting partial interests in selected utility assets in an asset management model approach and receiving a management fee.

In fact, some of the media reports prior to the official announcement of PPL Corporation's acquisition of E.ON's Kentucky utility assets for US\$7.625 billion stated that a consortium led by Fortis Inc. was one of three finalists for those assets. We would regard that type of information in media reports as being something akin to an asset management style of approach. Ultimately, we believe that such a strategy would help Fortis generate a higher level of returns. Additionally, the use of an asset management type approach would make large acquisitions which could potentially further accelerate growth.

Opportunities for improved capital efficiency

Generally, we continue to prefer pure-play utility companies without an undue amount of non-core asset exposure. Historically, non-core assets (especially real estate) have been somewhat commonplace for many utilities. Fortis has been no exception to that approach. Notably, the mix of commercial and hospitality real estate assets held by Fortis have been positive contributors and also provide the company a bit of financial flexibility for a selection of reasons. In light of current market conditions, we believe there is a much less compelling case for the monetization of these assets than as in the past. We note Fortis Properties continues to increase in scale and scope which may eventually make it more attractive for acquisition or monetization. Yet, for a number of reasons, we continue to believe there is a rather low probability of either of those events occurring.

Even discounting the potential monetization of assets that we would consider to be non-core, we believe Fortis possesses considerable potential to become much more capital efficient. Given the significant interest in infrastructure assets by many investors seeking long-dated types of return, Fortis could easily divest portions of its existing asset base to pension fund investors and charge a management fee for their operational and management expertise. This type of approach could significantly improve capital efficiency and returns on capital. In addition, this asset management approach could also free-up capital that could be used to fund the existing capital program or fund future acquisitions.

Capital efficiency initiatives could aid funding of acquisitions or the existing capital program funding

## Acquisition trail

In our view, Fortis continues to demonstrate a rather impressive ability to successfully integrate acquisitions. Additionally, we view acquisitions as somewhat central to the company's growth strategy. Fortis management has been reiterating this. For instance, the company's most recent Management Discussion and Analysis stated "We remain disciplined and patient in our pursuit of electric and gas utility acquisitions in the United States and Canada that will add value for Fortis shareholders". Fortis showed discipline in its acquisition strategy by not competing in a bidding war for Central Vermont Service Corp. The company received a C\$17m termination fee. For further details see "A positive pass" published on 12 July 2011.

Given the success of Fortis in past transactions, as measured in terms of financials, share price and operationally, we believe the company's current valuation and skill set may lead to some potentially value creating acquisition activity (see Exhibit 10 below for select Fortis M&A transactions).

### Exhibit 10: Selected Fortis M&A transactions

\$ in millions, unless otherwise stated

Announced Date	Asset/Company	Deal value (\$m)	Comment

	Total USD	USD 65.50	
	Total CAD	CAD 6,214.48	

Source: Bloomberg, Company data and Credit Suisse

In terms of acquisitions, we believe Fortis has a few advantages over others, including:

- Fortis has growing expertise with both electric and gas utilities;
- Larger size will allow it to look at a larger spectrum of potential target companies;
- A proven ability to effectively integrate acquisitions;
- A rather strong appetite for yield oriented securities in Canada;
- The potential ability to support a transaction with pension fund capital;
- Canada's rather benign interest rate environment; and,
- Bought deal financing commonly employed in Canada.

Fortis possesses a number of absolute and relative advantages over some other competitors

Historically, Fortis has been very adept at acquisitions. Corporate growth has benefited from the company's ability to successfully acquire and integrate selected assets. Capital market conditions are demonstrating signs of improved functioning. Therefore, the typical Fortis acquisition strategy is more palatable in current capital markets. For greater details, please refer to our 6 August 2009 note entitled "*Pondering a Portland purchase?*"

## Valuation

We continue to believe that Fortis has strong organic growth in key areas such as British Columbia, Alberta and the Caribbean. In our view, the company faces a delicate balance of capital investment opportunities and cash flow needs. From our perspective, the next big catalysts for the stock will likely revolve around capital efficiency initiatives or a large scale acquisition which will always lack predictability. As a result of the quarter, we revised our EPS estimates for 2012 and 2013 to C\$1.79 and C\$1.85 from C\$1.82 and C\$1.87, respectively. Our Neutral rating and C\$34.00 target price is obtained from multiple valuation approaches, including: a 18.5x P/E multiple of 2013 earnings; a 1.7x book value multiple; and, a DCF based valuation. We reiterate our Neutral rating. Some historical Fortis valuation parameters appear in Exhibit 11 below generated by Credit Suisse RAVE.

Rating: Neutral

Target: C\$34

## Disclosure Appendix

### Important Global Disclosures

I, Andrew M. Kuske, certify that (1) the views expressed in this report accurately reflect my personal views about all of the subject companies and securities and (2) no part of my compensation was, is or will be directly or indirectly related to the specific recommendations or views expressed in this report.

See the *Companies Mentioned* section for full company names.

### 3-Year Price, Target Price and Rating Change History Chart for FTS.TO

FTS.TO	Closing Price	Target Price	Initiation/
Date	(C\$)	(C\$)	Assumption
1/25/10	28.5	30	
11/8/10	33.6	32	
2/10/11	33.81	34	
8/3/11	31.37		O
9/28/11	33.08		N

The analyst(s) responsible for preparing this research report received compensation that is based upon various factors including Credit Suisse's total revenues, a portion of which are generated by Credit Suisse's investment banking activities.

### Analysts' stock ratings are defined as follows:

**Outperform (O):** The stock's total return is expected to outperform the relevant benchmark\* by at least 10-15% (or more, depending on perceived risk) over the next 12 months.

**Neutral (N):** The stock's total return is expected to be in line with the relevant benchmark\* (range of  $\pm 10-15\%$ ) over the next 12 months.

**Underperform (U):** The stock's total return is expected to underperform the relevant benchmark\* by 10-15% or more over the next 12 months.

\*Relevant benchmark by region: As of 29<sup>th</sup> May 2009, Australia, New Zealand, U.S. and Canadian ratings are based on (1) a stock's absolute total return potential to its current share price and (2) the relative attractiveness of a stock's total return potential within an analyst's coverage universe\*\*, with Outperforms representing the most attractive, Neutrals the less attractive, and Underperforms the least attractive investment opportunities. Some U.S. and Canadian ratings may fall outside the absolute total return ranges defined above, depending on market conditions and industry factors. For Latin American, Japanese, and non-Japan Asia stocks, ratings are based on a stock's total return relative to the average total return of the relevant country or regional benchmark; for European stocks, ratings are based on a stock's total return relative to the analyst's coverage universe\*\*. For Australian and New Zealand stocks, 12-month rolling yield is incorporated in the absolute total return calculation and a 15% and a 7.5% threshold replace the 10-15% level in the Outperform and Underperform stock rating definitions, respectively. The 15% and 7.5% thresholds replace the +10-15% and -10-15% levels in the Neutral stock rating definition, respectively.

\*\*An analyst's coverage universe consists of all companies covered by the analyst within the relevant sector.

**Restricted (R):** In certain circumstances, Credit Suisse policy and/or applicable law and regulations preclude certain types of communications, including an investment recommendation, during the course of Credit Suisse's engagement in an investment banking transaction and in certain other circumstances.

**Volatility Indicator [V]:** A stock is defined as volatile if the stock price has moved up or down by 20% or more in a month in at least 8 of the past 24 months or the analyst expects significant volatility going forward.

### Analysts' coverage universe weightings are distinct from analysts' stock ratings and are based on the expected performance of an analyst's coverage universe\* versus the relevant broad market benchmark\*\*:

**Overweight:** Industry expected to outperform the relevant broad market benchmark over the next 12 months.

**Market Weight:** Industry expected to perform in-line with the relevant broad market benchmark over the next 12 months.

**Underweight:** Industry expected to underperform the relevant broad market benchmark over the next 12 months.

\*An analyst's coverage universe consists of all companies covered by the analyst within the relevant sector.

\*\*The broad market benchmark is based on the expected return of the local market index (e.g., the S&P 500 in the U.S.) over the next 12 months.

### Credit Suisse's distribution of stock ratings (and banking clients) is:

Global Ratings Distribution	
Outperform/Buy*	46% (60% banking clients)

<b>Neutral/Hold*</b>	42%	(56% banking clients)
<b>Underperform/Sell*</b>	10%	(50% banking clients)
<b>Restricted</b>	2%	

\*For purposes of the NYSE and NASD ratings distribution disclosure requirements, our stock ratings of Outperform, Neutral, and Underperform most closely correspond to Buy, Hold, and Sell, respectively; however, the meanings are not the same, as our stock ratings are determined on a relative basis. (Please refer to definitions above.) An investor's decision to buy or sell a security should be based on investment objectives, current holdings, and other individual factors.

Credit Suisse's policy is to update research reports as it deems appropriate, based on developments with the subject company, the sector or the market that may have a material impact on the research views or opinions stated herein.

Credit Suisse's policy is only to publish investment research that is impartial, independent, clear, fair and not misleading. See the Companies Mentioned section for full company names.

**Price Target:** (12 months) for (FTS.TO)

**Method:** We obtain our C\$34.00 target price for Fortis Inc. by using multiple valuation methodologies, yield base analysis, and discounted cash flow, all of which produce the C\$34.00 target. Our target price implies a P/E (price/earnings) multiple of 18.5x our 2013 EPS (earnings per share) estimate of C\$1.85 and an EV/EBITDA (enterprise value/earnings before interest, taxes, depreciation, and amortization) multiple of 10.3x our EBITDA estimate.

**Risks:** There are a number of risks to Fortis' achievement of our C\$34.00 target price: commodity prices; weather; environmental; regulatory; access to capital markets; and, interest rates. Moreover, one should never underestimate the power of the regulator in any regulated business.

Please refer to the firm's disclosure website at [www.credit-suisse.com/researchdisclosures](http://www.credit-suisse.com/researchdisclosures) for the definitions of abbreviations typically used in the target price method and risk sections.

See the Companies Mentioned section for full company names.

The subject company (FTS.TO) currently is, or was during the 12-month period preceding the date of distribution of this report, a client of Credit Suisse.

Credit Suisse provided investment banking services to the subject company (FTS.TO) within the past 12 months.

Credit Suisse provided non-investment banking services, which may include Sales and Trading services, to the subject company (FTS.TO) within the past 12 months.

Credit Suisse expects to receive or intends to seek investment banking related compensation from the subject company (FTS.TO) within the next 3 months.

Credit Suisse has received compensation for products and services other than investment banking services from the subject company (FTS.TO) within the past 12 months.

### Important Regional Disclosures

Singapore recipients should contact a Singapore financial adviser for any matters arising from this research report.

An analyst involved in the preparation of this report has visited certain material operations of the subject company (FTS.TO) within the past 12 months. The analyst may not have visited all material operations of the subject company. The travel expenses of the analyst in connection with such visits were not paid or reimbursed by the subject company, other than de minimus local travel expenses.

Restrictions on certain Canadian securities are indicated by the following abbreviations: NVS--Non-Voting shares; RVS--Restricted Voting Shares; SVS--Subordinate Voting Shares.

Individuals receiving this report from a Canadian investment dealer that is not affiliated with Credit Suisse should be advised that this report may not contain regulatory disclosures the non-affiliated Canadian investment dealer would be required to make if this were its own report.

For Credit Suisse Securities (Canada), Inc.'s policies and procedures regarding the dissemination of equity research, please visit [http://www.csfb.com/legal\\_terms/canada\\_research\\_policy.shtml](http://www.csfb.com/legal_terms/canada_research_policy.shtml).

As of the date of this report, Credit Suisse acts as a market maker or liquidity provider in the equities securities that are the subject of this report.

Principal is not guaranteed in the case of equities because equity prices are variable.

Commission is the commission rate or the amount agreed with a customer when setting up an account or at anytime after that.

CS may have issued a Trade Alert regarding this security. Trade Alerts are short term trading opportunities identified by an analyst on the basis of market events and catalysts, while stock ratings reflect an analyst's investment recommendations based on expected total return over a 12-month period relative to the relevant coverage universe. Because Trade Alerts and stock ratings reflect different assumptions and analytical methods, Trade Alerts may differ directionally from the analyst's stock rating.

The author(s) of this report maintains a CS Model Portfolio that he/she regularly adjusts. The security or securities discussed in this report may be a component of the CS Model Portfolio and subject to such adjustments (which, given the composition of the CS Model Portfolio as a whole, may differ from the recommendation in this report, as well as opportunities or strategies identified in Trading Alerts concerning the same security). The CS Model Portfolio and important disclosures about it are available at [www.credit-suisse.com/ti](http://www.credit-suisse.com/ti).

Taiwanese Disclosures: Reports written by Taiwan-based analysts on non-Taiwan listed companies are not considered recommendations to buy or sell securities under Taiwan Stock Exchange Operational Regulations Governing Securities Firms Recommending Trades in Securities to Customers.

To the extent this is a report authored in whole or in part by a non-U.S. analyst and is made available in the U.S., the following are important disclosures regarding any non-U.S. analyst contributors:

The non-U.S. research analysts listed below (if any) are not registered/qualified as research analysts with FINRA. The non-U.S. research analysts listed below may not be associated persons of CSSU and therefore may not be subject to the NASD Rule 2711 and NYSE Rule 472 restrictions on communications with a subject company, public appearances and trading securities held by a research analyst account.

- Andrew M. Kuske, non-U.S. analyst, is a research analyst employed by Credit Suisse Securities (Canada), Inc..
- Paul Tan, non-U.S. analyst, is a research analyst employed by Credit Suisse Securities (Canada), Inc..

Disclaimers continue on next page.

This report is not directed to, or intended for distribution to or use by, any person or entity who is a citizen or resident of or located in any locality, state, country or other jurisdiction where such distribution, publication, availability or use would be contrary to law or regulation or which would subject Credit Suisse AG, the Swiss bank, or its subsidiaries or its affiliates ("CS") to any registration or licensing requirement within such jurisdiction. All material presented in this report, unless specifically indicated otherwise, is under copyright to CS. None of the material, nor its content, nor any copy of it, may be altered in any way, transmitted to, copied or distributed to any other party, without the prior express written permission of CS. All trademarks, service marks and logos used in this report are trademarks or service marks or registered trademarks or service marks of CS or its affiliates.

The information, tools and material presented in this report are provided to you for information purposes only and are not to be used or considered as an offer or the solicitation of an offer to sell or to buy or subscribe for securities or other financial instruments. CS may not have taken any steps to ensure that the securities referred to in this report are suitable for any particular investor. CS will not treat recipients as its customers by virtue of their receiving the report. The investments or services contained or referred to in this report may not be suitable for you and it is recommended that you consult an independent investment advisor if you are in doubt about such investments or investment services. Nothing in this report constitutes investment, legal, accounting or tax advice or a representation that any investment or strategy is suitable or appropriate to your individual circumstances or otherwise constitutes a personal recommendation to you. CS does not offer advice on the tax consequences of investment and you are advised to contact an independent tax adviser. Please note in particular that the bases and levels of taxation may change.

CS believes the information and opinions in the Disclosure Appendix of this report are accurate and complete. Information and opinions presented in the other sections of the report were obtained or derived from sources CS believes are reliable, but CS makes no representations as to their accuracy or completeness. Additional information is available upon request. CS accepts no liability for loss arising from the use of the material presented in this report, except that this exclusion of liability does not apply to the extent that liability arises under specific statutes or regulations applicable to CS. This report is not to be relied upon in substitution for the exercise of independent judgment. CS may have issued, and may in the future issue, a trading call regarding this security. Trading calls are short term trading opportunities based on market events and catalysts, while stock ratings reflect investment recommendations based on expected total return over a 12-month period as defined in the disclosure section. Because trading calls and stock ratings reflect different assumptions and analytical methods, trading calls may differ directionally from the stock rating. In addition, CS may have issued, and may in the future issue, other reports that are inconsistent with, and reach different conclusions from, the information presented in this report. Those reports reflect the different assumptions, views and analytical methods of the analysts who prepared them and CS is under no obligation to ensure that such other reports are brought to the attention of any recipient of this report. CS is involved in many businesses that relate to companies mentioned in this report. These businesses include specialized trading, risk arbitrage, market making, and other proprietary trading.

Past performance should not be taken as an indication or guarantee of future performance, and no representation or warranty, express or implied, is made regarding future performance. Information, opinions and estimates contained in this report reflect a judgement at its original date of publication by CS and are subject to change without notice. The price, value of and income from any of the securities or financial instruments mentioned in this report can fall as well as rise. The value of securities and financial instruments is subject to exchange rate fluctuation that may have a positive or adverse effect on the price or income of such securities or financial instruments. Investors in securities such as ADR's, the values of which are influenced by currency volatility, effectively assume this risk.

Structured securities are complex instruments, typically involve a high degree of risk and are intended for sale only to sophisticated investors who are capable of understanding and assuming the risks involved. The market value of any structured security may be affected by changes in economic, financial and political factors (including, but not limited to, spot and forward interest and exchange rates), time to maturity, market conditions and volatility, and the credit quality of any issuer or reference issuer. Any investor interested in purchasing a structured product should conduct their own investigation and analysis of the product and consult with their own professional advisers as to the risks involved in making such a purchase.

Some investments discussed in this report have a high level of volatility. High volatility investments may experience sudden and large falls in their value causing losses when that investment is realised. Those losses may equal your original investment. Indeed, in the case of some investments the potential losses may exceed the amount of initial investment, in such circumstances you may be required to pay more money to support those losses. Income yields from investments may fluctuate and, in consequence, initial capital paid to make the investment may be used as part of that income yield. Some investments may not be readily realisable and it may be difficult to sell or realise those investments, similarly it may prove difficult for you to obtain reliable information about the value, or risks, to which such an investment is exposed.

## Fortis Inc. (FTS.TO)

### ACQUISITION

## Acquiring American assets

- **American acquisition:** Fortis Inc. announced that it has entered into an agreement to acquire CH Energy Group, Inc. (CHG) for US\$65 per share for a total consideration of roughly US\$1.5b. The purchase price is roughly a 10.5% premium above CHG's most recent stock price close. We calculate the transaction to be modestly accretive to FTS under conservative assumptions. Several reasons to like this deal include: (a) single state results in less complexity; (b) relatively smaller size of the transaction versus some other potential transactions; and, (c) good near to medium-term organic growth at CHG.
- **Deal details:** Selected details include: (a) FTS will be using debt to finance the transaction in the short-term; (b) 97% of CHG net income comes from regulated business; (c) FTS expects closing of the transaction within 12 months; (d) capex at the regulated business to "exceed" US\$100m on average through 2016; (e) CHG total asset roughly US\$1.7b; and (f) for the last three years, CHG regulated business has operated under 10% ROE with 48% common equity (both are higher than many equivalents in Canada).
- **Improving capital market conditions:** Historically, Fortis has been very adept at acquisitions. Corporate growth has benefited from the company's ability to successfully acquire and integrate selected assets. In our view, the company is well positioned in the current market for acquisition opportunities. The company stated, "We remain disciplined and patient in our pursuit of electric and gas utility acquisitions in the United States and Canada that will add value for Fortis shareholders".
- **Valuation:** Our C\$34.target price and Neutral rating are obtained utilizing multiple valuation approaches, including: a 18.5x P/E multiple of 2013 earnings; a 1.7x book value multiple; and, a DCF based valuation. We reiterate our Neutral rating.

**DISCLOSURE APPENDIX CONTAINS IMPORTANT DISCLOSURES, ANALYST CERTIFICATIONS, INFORMATION ON TRADE ALERTS, ANALYST MODEL PORTFOLIOS AND THE STATUS OF NON-U.S. ANALYSTS.** U.S. Disclosure: Credit Suisse does and seeks to do business with companies covered in its research reports. As a result, investors should be aware that the Firm may have a conflict of interest that could affect the objectivity of this report. Investors should consider this report as only a single factor in making their investment decision.

**Companies Mentioned** (Price as of 17 Feb 12)  
 Ch Energy Group, Inc. (CHG, \$58.77)  
 Fortis Inc. (FTS.TO, C\$32.85, NEUTRAL, TP C\$34.00)

## Disclosure Appendix

### Important Global Disclosures

I, Andrew M. Kuske, certify that (1) the views expressed in this report accurately reflect my personal views about all of the subject companies and securities and (2) no part of my compensation was, is or will be directly or indirectly related to the specific recommendations or views expressed in this report.

See the *Companies Mentioned* section for full company names.

### 3-Year Price, Target Price and Rating Change History Chart for FTS.TO

The analyst(s) responsible for preparing this research report received compensation that is based upon various factors including Credit Suisse's total revenues, a portion of which are generated by Credit Suisse's investment banking activities.

### Analysts' stock ratings are defined as follows:

**Outperform (O):** The stock's total return is expected to outperform the relevant benchmark\* by at least 10-15% (or more, depending on perceived risk) over the next 12 months.

**Neutral (N):** The stock's total return is expected to be in line with the relevant benchmark\* (range of  $\pm 10-15\%$ ) over the next 12 months.

**Underperform (U):** The stock's total return is expected to underperform the relevant benchmark\* by 10-15% or more over the next 12 months.

\*Relevant benchmark by region: As of 29<sup>th</sup> May 2009, Australia, New Zealand, U.S. and Canadian ratings are based on (1) a stock's absolute total return potential to its current share price and (2) the relative attractiveness of a stock's total return potential within an analyst's coverage universe\*\*, with Outperforms representing the most attractive, Neutrals the less attractive, and Underperforms the least attractive investment opportunities. Some U.S. and Canadian ratings may fall outside the absolute total return ranges defined above, depending on market conditions and industry factors. For Latin American, Japanese, and non-Japan Asia stocks, ratings are based on a stock's total return relative to the average total return of the relevant country or regional benchmark; for European stocks, ratings are based on a stock's total return relative to the analyst's coverage universe\*\*. For Australian and New Zealand stocks, 12-month rolling yield is incorporated in the absolute total return calculation and a 15% and a 7.5% threshold replace the 10-15% level in the Outperform and Underperform stock rating definitions, respectively. The 15% and 7.5% thresholds replace the +10-15% and -10-15% levels in the Neutral stock rating definition, respectively.

\*\*An analyst's coverage universe consists of all companies covered by the analyst within the relevant sector.

**Restricted (R):** In certain circumstances, Credit Suisse policy and/or applicable law and regulations preclude certain types of communications, including an investment recommendation, during the course of Credit Suisse's engagement in an investment banking transaction and in certain other circumstances.

**Volatility Indicator [V]:** A stock is defined as volatile if the stock price has moved up or down by 20% or more in a month in at least 8 of the past 24 months or the analyst expects significant volatility going forward.

### Analysts' coverage universe weightings are distinct from analysts' stock ratings and are based on the expected performance of an analyst's coverage universe\* versus the relevant broad market benchmark\*\*:

**Overweight:** Industry expected to outperform the relevant broad market benchmark over the next 12 months.

**Market Weight:** Industry expected to perform in-line with the relevant broad market benchmark over the next 12 months.

**Underweight:** Industry expected to underperform the relevant broad market benchmark over the next 12 months.

\*An analyst's coverage universe consists of all companies covered by the analyst within the relevant sector.

\*\*The broad market benchmark is based on the expected return of the local market index (e.g., the S&P 500 in the U.S.) over the next 12 months.

**Credit Suisse's distribution of stock ratings (and banking clients) is:**

Global Ratings Distribution		
<b>Outperform/Buy*</b>	46%	(60% banking clients)
<b>Neutral/Hold*</b>	42%	(56% banking clients)
<b>Underperform/Sell*</b>	10%	(50% banking clients)
<b>Restricted</b>	2%	

\*For purposes of the NYSE and NASD ratings distribution disclosure requirements, our stock ratings of Outperform, Neutral, and Underperform most closely correspond to Buy, Hold, and Sell, respectively; however, the meanings are not the same, as our stock ratings are determined on a relative basis. (Please refer to definitions above.) An investor's decision to buy or sell a security should be based on investment objectives, current holdings, and other individual factors.

Credit Suisse's policy is to update research reports as it deems appropriate, based on developments with the subject company, the sector or the market that may have a material impact on the research views or opinions stated herein.

Credit Suisse's policy is only to publish investment research that is impartial, independent, clear, fair and not misleading. Credit Suisse does not provide any tax advice. Any statement herein regarding any US federal tax is not intended or written to be used, and cannot be used, by any taxpayer for the purposes of avoiding any penalties.

See the *Companies Mentioned* section for full company names.

**Price Target:** (12 months) for (FTS.TO)

**Method:** We obtain our C\$34.00 target price for Fortis Inc. by using multiple valuation methodologies, yield base analysis, and discounted cash flow, all of which produce the C\$34.00 target. Our target price implies a P/E (price/earnings) multiple of 18.5x our 2013 EPS (earnings per share) estimate of C\$1.85 and an EV/EBITDA (enterprise value/earnings before interest, taxes, depreciation, and amortization) multiple of 10.3x our EBITDA estimate.

**Risks:** There are a number of risks to Fortis' achievement of our C\$34.00 target price: commodity prices; weather; environmental; regulatory; access to capital markets; and, interest rates. Moreover, one should never underestimate the power of the regulator in any regulated business.

Please refer to the firm's disclosure website at [www.credit-suisse.com/researchdisclosures](http://www.credit-suisse.com/researchdisclosures) for the definitions of abbreviations typically used in the target price method and risk sections.

See the *Companies Mentioned* section for full company names.

The subject company (FTS.TO) currently is, or was during the 12-month period preceding the date of distribution of this report, a client of Credit Suisse.

Credit Suisse provided investment banking services to the subject company (FTS.TO) within the past 12 months.

Credit Suisse provided non-investment banking services, which may include Sales and Trading services, to the subject company (FTS.TO) within the past 12 months.

Credit Suisse expects to receive or intends to seek investment banking related compensation from the subject company (FTS.TO) within the next 3 months.

Credit Suisse has received compensation for products and services other than investment banking services from the subject company (FTS.TO) within the past 12 months.

**Important Regional Disclosures**

Singapore recipients should contact a Singapore financial adviser for any matters arising from this research report.

An analyst involved in the preparation of this report has visited certain material operations of the subject company (FTS.TO) within the past 12 months. The analyst may not have visited all material operations of the subject company. The travel expenses of the analyst in connection with such visits were not paid or reimbursed by the subject company, other than de minimus local travel expenses.

Restrictions on certain Canadian securities are indicated by the following abbreviations: NVS--Non-Voting shares; RVS--Restricted Voting Shares; SVS--Subordinate Voting Shares.

Individuals receiving this report from a Canadian investment dealer that is not affiliated with Credit Suisse should be advised that this report may not contain regulatory disclosures the non-affiliated Canadian investment dealer would be required to make if this were its own report.

For Credit Suisse Securities (Canada), Inc.'s policies and procedures regarding the dissemination of equity research, please visit [http://www.csfb.com/legal\\_terms/canada\\_research\\_policy.shtml](http://www.csfb.com/legal_terms/canada_research_policy.shtml).

As of the date of this report, Credit Suisse acts as a market maker or liquidity provider in the equities securities that are the subject of this report.

Principal is not guaranteed in the case of equities because equity prices are variable.

Commission is the commission rate or the amount agreed with a customer when setting up an account or at anytime after that.

CS may have issued a Trade Alert regarding this security. Trade Alerts are short term trading opportunities identified by an analyst on the basis of market events and catalysts, while stock ratings reflect an analyst's investment recommendations based on expected total return over a 12-month period relative to the relevant coverage universe. Because Trade Alerts and stock ratings reflect different assumptions and analytical methods, Trade Alerts may differ directionally from the analyst's stock rating.

The author(s) of this report maintains a CS Model Portfolio that he/she regularly adjusts. The security or securities discussed in this report may be a component of the CS Model Portfolio and subject to such adjustments (which, given the composition of the CS Model Portfolio as a whole, may differ from the recommendation in this report, as well as opportunities or strategies identified in Trading Alerts concerning the same security). The CS Model Portfolio and important disclosures about it are available at [www.credit-suisse.com/ti](http://www.credit-suisse.com/ti).

Taiwanese Disclosures: Reports written by Taiwan-based analysts on non-Taiwan listed companies are not considered recommendations to buy or sell securities under Taiwan Stock Exchange Operational Regulations Governing Securities Firms Recommending Trades in Securities to Customers.

To the extent this is a report authored in whole or in part by a non-U.S. analyst and is made available in the U.S., the following are important disclosures regarding any non-U.S. analyst contributors:

The non-U.S. research analysts listed below (if any) are not registered/qualified as research analysts with FINRA. The non-U.S. research analysts listed below may not be associated persons of CSSU and therefore may not be subject to the NASD Rule 2711 and NYSE Rule 472 restrictions on communications with a subject company, public appearances and trading securities held by a research analyst account.

- Andrew M. Kuske, non-U.S. analyst, is a research analyst employed by Credit Suisse Securities (Canada), Inc..
- Paul Tan, non-U.S. analyst, is a research analyst employed by Credit Suisse Securities (Canada), Inc..

For Credit Suisse disclosure information on other companies mentioned in this report, please visit the website at [www.credit-suisse.com/researchdisclosures](http://www.credit-suisse.com/researchdisclosures) or call +1 (877) 291-2683.

Disclaimers continue on next page.

This report is not directed to, or intended for distribution to or use by, any person or entity who is a citizen or resident of or located in any locality, state, country or other jurisdiction where such distribution, publication, availability or use would be contrary to law or regulation or which would subject Credit Suisse AG, the Swiss bank, or its subsidiaries or its affiliates ("CS") to any registration or licensing requirement within such jurisdiction. All material presented in this report, unless specifically indicated otherwise, is under copyright to CS. None of the material, nor its content, nor any copy of it, may be altered in any way, transmitted to, copied or distributed to any other party, without the prior express written permission of CS. All trademarks, service marks and logos used in this report are trademarks or service marks or registered trademarks or service marks of CS or its affiliates.

The information, tools and material presented in this report are provided to you for information purposes only and are not to be used or considered as an offer or the solicitation of an offer to sell or to buy or subscribe for securities or other financial instruments. CS may not have taken any steps to ensure that the securities referred to in this report are suitable for any particular investor. CS will not treat recipients as its customers by virtue of their receiving the report. The investments or services contained or referred to in this report may not be suitable for you and it is recommended that you consult an independent investment advisor if you are in doubt about such investments or investment services. Nothing in this report constitutes investment, legal, accounting or tax advice or a representation that any investment or strategy is suitable or appropriate to your individual circumstances or otherwise constitutes a personal recommendation to you. CS does not offer advice on the tax consequences of investment and you are advised to contact an independent tax adviser. Please note in particular that the bases and levels of taxation may change.

CS believes the information and opinions in the Disclosure Appendix of this report are accurate and complete. Information and opinions presented in the other sections of the report were obtained or derived from sources CS believes are reliable, but CS makes no representations as to their accuracy or completeness. Additional information is available upon request. CS accepts no liability for loss arising from the use of the material presented in this report, except that this exclusion of liability does not apply to the extent that liability arises under specific statutes or regulations applicable to CS. This report is not to be relied upon in substitution for the exercise of independent judgment. CS may have issued, and may in the future issue, a trading call regarding this security. Trading calls are short term trading opportunities based on market events and catalysts, while stock ratings reflect investment recommendations based on expected total return over a 12-month period as defined in the disclosure section. Because trading calls and stock ratings reflect different assumptions and analytical methods, trading calls may differ directionally from the stock rating. In addition, CS may have issued, and may in the future issue, other reports that are inconsistent with, and reach different conclusions from, the information presented in this report. Those reports reflect the different assumptions, views and analytical methods of the analysts who prepared them and CS is under no obligation to ensure that such other reports are brought to the attention of any recipient of this report. CS is involved in many businesses that relate to companies mentioned in this report. These businesses include specialized trading, risk arbitrage, market making, and other proprietary trading.

Past performance should not be taken as an indication or guarantee of future performance, and no representation or warranty, express or implied, is made regarding future performance. Information, opinions and estimates contained in this report reflect a judgement at its original date of publication by CS and are subject to change without notice. The price, value of and income from any of the securities or financial instruments mentioned in this report can fall as well as rise. The value of securities and financial instruments is subject to exchange rate fluctuation that may have a positive or adverse effect on the price or income of such securities or financial instruments. Investors in securities such as ADR's, the values of which are influenced by currency volatility, effectively assume this risk.

Structured securities are complex instruments, typically involve a high degree of risk and are intended for sale only to sophisticated investors who are capable of understanding and assuming the risks involved. The market value of any structured security may be affected by changes in economic, financial and political factors (including, but not limited to, spot and forward interest and exchange rates), time to maturity, market conditions and volatility, and the credit quality of any issuer or reference issuer. Any investor interested in purchasing a structured product should conduct their own investigation and analysis of the product and consult with their own professional advisers as to the risks involved in making such a purchase.

Some investments discussed in this report have a high level of volatility. High volatility investments may experience sudden and large falls in their value causing losses when that investment is realised. Those losses may equal your original investment. Indeed, in the case of some investments the potential losses may exceed the amount of initial investment, in such circumstances you may be required to pay more money to support those losses. Income yields from investments may fluctuate and, in consequence, initial capital paid to make the investment may be used as part of that income yield. Some investments may not be readily realisable and it may be difficult to sell or realise those investments, similarly it may prove difficult for you to obtain reliable information about the value, or risks, to which such an investment is exposed.

This report may provide the addresses of, or contain hyperlinks to, websites. Except to the extent to which the report refers to website material of CS, CS has not reviewed the linked site and takes no responsibility for the content contained therein. Such address or hyperlink (including addresses or hyperlinks to CS's own website material) is provided solely for your convenience and information and the content of the linked site does not in any way form part of this document. Accessing such website or following such link through this report or CS's website shall be at your own risk.

## MARKET COMMENTARY/STRATEGY

### Discerning demand - Alberta

- **Alberta in focus:** In Alberta, power demand and prices have moved in a rather erratic fashion. Yet, given the impact of outages in the Alberta market on pricing, we believe the demand data is more meaningful. Notably, over a 45-month period of time (June 2008 to Feb 2012), 31 of 45 months posted a positive year-on-year change in demand.
- **Assessing demand and pricing:** Alberta's power demand posted positive growth of 0.5% in February 2012 when compared against February 2011. The same data over sequential months (i.e. January to February) showed a decline in demand by 1.8%. In terms of pricing, the monthly comparisons posted a decline of 65.1% on a year-over-year basis and 50.5% sequentially. In our view, the combination of outages especially the notice of termination of Sundance units 1 & 2 (see "*Sun setting on Sundance*" on 9 February 2011 for further details) and February's weather impacted demand and pricing.
- **Power statistics:** In the current economic environment, we believe there is utility to highlighting some of the more recent electricity demand and pricing statistics. We believe the data can provide a degree of insight into underlying economic activity. Obviously, many factors affect demand data including weather and outage patterns. Alberta's power market is indicating some notable strength. Clearly, power pricing strength is partially the result of TA's notice of termination of Sundance 1 & 2. Yet, over the longer-term, however, we continue to believe Alberta's power market fundamentals are rather attractive.
- **Selected investment themes:** In general, we continue to prefer low-cost power producers with exposure to structurally tight power markets. In our coverage universe, direct exposure to the Alberta power market can be achieved via Capital Power Corp., TransAlta and TransCanada. In terms of merchant exposure, TransCanada has the most profitable exposure in the current market environment as a result of the Power Purchase Agreements (PPAs). Notably, in a market with increased volatility due to the notice of termination on Sundance 1 & 2, we believe Capital Power offers the best exposure with the fast ramping Clover Bar Energy Centre. Discounting the impact of the Sundance issues, CPX and TA provide potentially better margin protection as a result of PPA plant ownership and partially contracted power portfolios. Finally, Fortis provides largely regulated utility exposure in Alberta and faces rather limited impact from changes in demand.

**DISCLOSURE APPENDIX CONTAINS IMPORTANT DISCLOSURES, ANALYST CERTIFICATIONS, INFORMATION ON TRADE ALERTS, ANALYST MODEL PORTFOLIOS AND THE STATUS OF NON-U.S. ANALYSTS.** U.S. Disclosure: Credit Suisse does and seeks to do business with companies covered in its research reports. As a result, investors should be aware that the Firm may have a conflict of interest that could affect the objectivity of this report. Investors should consider this report as only a single factor in making their investment decision.

Electricity related demand and pricing information can provide a certain level of insight into underlying economic activity. Clearly, the information is beneficial for evaluating the performance of specific power generation facilities in the province of Alberta. Yet, power data may also help assess the relative health of the most significant portions of the province's economy such as the energy sector in Alberta. Our research note is divided into three parts: (a) Assessing Alberta; (b) Blame it on the weather; and, (c) Forward pricing.

## Assessing Alberta

The first step in our Alberta monthly demand analysis is the year-over-year comparison for each month appearing in Exhibit 1 below.

**Exhibit 1: Alberta monthly electricity demand and price percentage change (y-o-y)**

Source: Alberta Electric System Operator (AESO) and Credit Suisse

As evident from Exhibit 1, both Alberta's power demand and prices have moved in a rather erratic fashion. We believe the demand data is more meaningful than pricing as generation supply will significantly impact pricing. February showed a 0.5% demand increase versus the prior year and a decline of 1.8% against January 2012. Notably, over the last 45 months (encompassing June 2008 to February 2012), 31 of 45 months posted a positive year-on-year change in demand.

More positive than negative year-on-year changes in demand over the last 45 months

**Exhibit 2: AB electricity demand and price y/y comparison**

Source: Alberta Electric System Operator (AESO) and Credit Suisse

**Exhibit 3: AB electricity demand and price m/m comparison**

Source: Alberta Electric System Operator (AESO) and Credit Suisse

Exhibit 2 and Exhibit 3 illustrate Alberta's hour-by-hour profile for demand and pricing. As changes in these exhibits can be rather subtle, we provide selected information in tabular form in Exhibit 4.

**Exhibit 4: Monthly AESO data**

Time Frame	Average Demand (MW)	Weighted Avg. Price (\$/MWh)	Demand chg. y/y	Price chg. y/y	Demand chg. m/m	Price chg. m/m
2012 Feb	8,935	44.71	0.5%	-65.1%	-1.8%	-50.5%
2012 Jan	9,096	90.29	1.7%	9.1%	1.9%	69.7%
2011 Dec	8,926	53.20	-1.0%	-13.1%	1.8%	-53.2%
2011 Nov	8,772	113.72	1.4%	125.2%	6.9%	57.7%
2011 Oct	8,202	72.10	1.7%	129.9%	0.1%	-30.4%
2011 Sept	8,195	103.60	4.2%	258.5%	-1.9%	-22.3%
2011 Aug	8,354	133.39	3.9%	234.8%	0.9%	102.0%
2011 Jul	8,276	66.05	3.1%	58.5%	5.1%	-14.3%
2011 Jun	7,873	77.11	-0.1%	30.3%	3.5%	131.5%
2011 May	7,606	33.31	-1.3%	-76.2%	-6.1%	-37.7%
2011 Apr	8,100	53.49	4.3%	5.6%	-7.1%	7.6%
2011 Mar	8,720	49.70	6.9%	37.7%	-1.9%	-61.2%
2011 Feb	8,893	128.07	4.6%	188.8%	-0.5%	54.7%

Source: Alberta Electric System Operator (AESO) and Credit Suisse

Finally, for certain power market participants, Alberta's 30-day rolling average pricing is a critical metric to watch. Exhibit 5 highlights the 30-day RAP.

**Exhibit 5: Alberta power pricing 30-day RAP**

Source: Alberta Electric System Operator (AESO) and Credit Suisse

**Blame it on the weather?**

Clearly, weather can play a meaningful role in power demand data. Therefore, we highlight weather statistics for both Edmonton and Calgary in Exhibit 6 and Exhibit 7.

**Exhibit 6: Edmonton area historical temperatures (in Celsius)**

Temperature	Jan	Feb	Mar	Apr	May	Jun	Jul	Aug	Sep	Oct	Nov	Dec
Historical Avg.	-13.5	-10.5	-4.5	4.3	10.4	14.1	15.9	15.1	10.1	4.3	-5.7	-11.0

Source: Environment Canada and Credit Suisse

Based upon Environment Canada's February data, both Edmonton and Calgary recorded average temperature that was warmer than normal.

## Summary

February showed a year on year increase in demand in Alberta. Many factors affect demand data including the weather. Pricing has posted negative numbers on a year-over-year basis and on a month-over-month basis which we believe were influenced by the weather. In our view, Alberta's power market is indicating some signs of strength. The strength of demand may eventually translate into much stronger power pricing. Longer-term, we believe Alberta's power market fundamentals are rather attractive. In our coverage universe, direct exposure to the Alberta power market can be achieved via Capital Power Corp., TransAlta and TransCanada. In terms of merchant exposure, TransCanada has the most profitable exposure in the current market environment as a

result of the Power Purchase Agreements (PPAs). Notably, in a market with increased volatility, Capital Power offers the best exposure with the fast ramping Clover Bar Energy Centre. Discounting the impact of the Sundance issues, both CPX and TA provide potentially better margin protection as a result of PPA plant ownership and partially contracted power portfolios. Finally, Fortis provides largely regulated utility exposure in Alberta and is facing a somewhat limited impact from changes in demand.

The analyst(s) responsible for preparing this research report received compensation that is based upon various factors including Credit Suisse's total revenues, a portion of which are generated by Credit Suisse's investment banking activities.

**Analysts' stock ratings are defined as follows:**

**Outperform (O):** The stock's total return is expected to outperform the relevant benchmark\* by at least 10-15% (or more, depending on perceived risk) over the next 12 months.

**Neutral (N):** The stock's total return is expected to be in line with the relevant benchmark\* (range of  $\pm 10-15\%$ ) over the next 12 months.

**Underperform (U):** The stock's total return is expected to underperform the relevant benchmark\* by 10-15% or more over the next 12 months.

\*Relevant benchmark by region: As of 29<sup>th</sup> May 2009, Australia, New Zealand, U.S. and Canadian ratings are based on (1) a stock's absolute total return potential to its current share price and (2) the relative attractiveness of a stock's total return potential within an analyst's coverage universe\*\*, with Outperforms representing the most attractive, Neutrals the less attractive, and Underperforms the least attractive investment opportunities. Some U.S. and Canadian ratings may fall outside the absolute total return ranges defined above, depending on market conditions and industry

factors. For Latin American, Japanese, and non-Japan Asia stocks, ratings are based on a stock's total return relative to the average total return of the relevant country or regional benchmark; for European stocks, ratings are based on a stock's total return relative to the analyst's coverage universe\*\*. For Australian and New Zealand stocks, 12-month rolling yield is incorporated in the absolute total return calculation and a 15% and a 7.5% threshold replace the 10-15% level in the Outperform and Underperform stock rating definitions, respectively. The 15% and 7.5% thresholds replace the +10-15% and -10-15% levels in the Neutral stock rating definition, respectively.

\*\*An analyst's coverage universe consists of all companies covered by the analyst within the relevant sector.

**Restricted (R):** In certain circumstances, Credit Suisse policy and/or applicable law and regulations preclude certain types of communications, including an investment recommendation, during the course of Credit Suisse's engagement in an investment banking transaction and in certain other circumstances.

**Volatility Indicator [V]:** A stock is defined as volatile if the stock price has moved up or down by 20% or more in a month in at least 8 of the past 24 months or the analyst expects significant volatility going forward.

**Analysts' coverage universe weightings are distinct from analysts' stock ratings and are based on the expected performance of an analyst's coverage universe\* versus the relevant broad market benchmark\*\*:**

**Overweight:** Industry expected to outperform the relevant broad market benchmark over the next 12 months.

**Market Weight:** Industry expected to perform in-line with the relevant broad market benchmark over the next 12 months.

**Underweight:** Industry expected to underperform the relevant broad market benchmark over the next 12 months.

\*An analyst's coverage universe consists of all companies covered by the analyst within the relevant sector.

\*\*The broad market benchmark is based on the expected return of the local market index (e.g., the S&P 500 in the U.S.) over the next 12 months.

**Credit Suisse's distribution of stock ratings (and banking clients) is:**

	Global Ratings Distribution	
<b>Outperform/Buy*</b>	46%	(60% banking clients)
<b>Neutral/Hold*</b>	42%	(57% banking clients)
<b>Underperform/Sell*</b>	10%	(47% banking clients)
<b>Restricted</b>	2%	

\*For purposes of the NYSE and NASD ratings distribution disclosure requirements, our stock ratings of Outperform, Neutral, and Underperform most closely correspond to Buy, Hold, and Sell, respectively; however, the meanings are not the same, as our stock ratings are determined on a relative basis. (Please refer to definitions above.) An investor's decision to buy or sell a security should be based on investment objectives, current holdings, and other individual factors.

Credit Suisse's policy is to update research reports as it deems appropriate, based on developments with the subject company, the sector or the market that may have a material impact on the research views or opinions stated herein.

Credit Suisse's policy is only to publish investment research that is impartial, independent, clear, fair and not misleading. **Price Target:** (12 months) for (CPX.TO)

**Method:** Our C\$28.00 target price for Capital Power is obtained by using several valuation methodologies, all of which produce the C\$28 target. The methods are: a 17.0x P/E (price/earnings) multiple applied to our 2012 EPS estimate of C\$1.68; a target dividend yield of 4.5%; an adjusted 9.0x EV/EBITDA (enterprise value/earnings before interest, taxes, depreciation and amortization) multiple; and, a discounted cash flow.

**Risks:** Risks to Capital Power Corp's achievement of our C\$28.00 target price are commodity prices, weather, environmental, regulatory, portfolio optimization strategies, shareholder concentration, foreign exchange and interest rates. Also, the power of the regulator in any regulated business should never be underestimated.

**Price Target:** (12 months) for (FTS.TO)

**Method:** We obtain our C\$34.00 target price for Fortis Inc. by using multiple valuation methodologies, yield base analysis, and discounted cash flow, all of which produce the C\$34.00 target. Our target price implies a P/E (price/earnings) multiple of 18.5x our 2013 EPS (earnings per share) estimate of C\$1.85 and an EV/EBITDA (enterprise value/earnings before interest, taxes, depreciation, and amortization) multiple of 10.3x our EBITDA estimate.

**Risks:** There are a number of risks to Fortis' achievement of our C\$34.00 target price: commodity prices; weather; environmental; regulatory; access to capital markets; and, interest rates. Moreover, one should never underestimate the power of the regulator in any regulated business.

**Price Target:** (12 months) for (TA.TO)

**Method:** We obtain our C\$22.00 target price for TransAlta by using several valuation methodologies: a variety of multiples; comparable analysis; and discounted cash flow. In summary, our C\$22.00 target price implies an 17.0x P/E (price/earnings) multiple on our estimated 2013 earnings per share of C\$1.31, a 9.2x EV/EBITDA (enterprise value/earnings before interest, taxes, depreciation and amortization) multiple.

**Risks:** Risks to TransAlta's achievement of our C\$22.00 target price are commodity prices, weather, environmental, regulatory, and interest rates. Also, the power of the regulator in any regulated business should never be underestimated.

**Price Target:** (12 months) for (TRP.TO)

**Method:** We obtain our C\$44.00 target price for TransCanada by using multiple valuation methodologies, all of which produce the C\$44.00 target. The methods are yield based analysis, and discounted cash flow. We use a P/E (price/earnings) multiple of roughly 17.5x our 2013 EPS (earnings

per share) estimate of C\$2.54. In addition, we use an EV/EBITDA (enterprise value/earnings before interest, taxes, depreciation, and amortization) of 10.4x. We also use the dividend method, based on 4.0%.

**Risks:** Our C\$44.00 target price for TransCanada is subject to a number of risks: interest rates; commodity prices; operating rates; electricity market volatility; and, pipeline volumes. In any regulated business, one should never underestimate the power of the regulator.

Please refer to the firm's disclosure website at [www.credit-suisse.com/researchdisclosures](http://www.credit-suisse.com/researchdisclosures) for the definitions of abbreviations typically used in the target price method and risk sections.

*See the Companies Mentioned section for full company names.*

The subject company (CPX.TO, FTS.TO, TRP.TO) currently is, or was during the 12-month period preceding the date of distribution of this report, a client of Credit Suisse.

Credit Suisse provided investment banking services to the subject company (CPX.TO, FTS.TO, TRP.TO) within the past 12 months.

Credit Suisse provided non-investment banking services, which may include Sales and Trading services, to the subject company (FTS.TO) within the past 12 months.

Credit Suisse has managed or co-managed a public offering of securities for the subject company (CPX.TO) within the past 12 months.

Credit Suisse has received investment banking related compensation from the subject company (CPX.TO, TRP.TO) within the past 12 months.

Credit Suisse expects to receive or intends to seek investment banking related compensation from the subject company (CPX.TO, FTS.TO, TRP.TO) within the next 3 months.

Credit Suisse has received compensation for products and services other than investment banking services from the subject company (FTS.TO) within the past 12 months.

### Important Regional Disclosures

Singapore recipients should contact a Singapore financial adviser for any matters arising from this research report.

An analyst involved in the preparation of this report has visited certain material operations of the subject company (CPX.TO, FTS.TO, TA.TO, TRP.TO) within the past 12 months. The analyst may not have visited all material operations of the subject company. The travel expenses of the analyst in connection with such visits were not paid or reimbursed by the subject company, other than de minimus local travel expenses.

Restrictions on certain Canadian securities are indicated by the following abbreviations: NVS--Non-Voting shares; RVS--Restricted Voting Shares; SVS--Subordinate Voting Shares.

Individuals receiving this report from a Canadian investment dealer that is not affiliated with Credit Suisse should be advised that this report may not contain regulatory disclosures the non-affiliated Canadian investment dealer would be required to make if this were its own report.

For Credit Suisse Securities (Canada), Inc.'s policies and procedures regarding the dissemination of equity research, please visit [http://www.csfb.com/legal\\_terms/canada\\_research\\_policy.shtml](http://www.csfb.com/legal_terms/canada_research_policy.shtml).

As of the date of this report, Credit Suisse acts as a market maker or liquidity provider in the equities securities that are the subject of this report.

Principal is not guaranteed in the case of equities because equity prices are variable.

Commission is the commission rate or the amount agreed with a customer when setting up an account or at anytime after that.

CS may have issued a Trade Alert regarding this security. Trade Alerts are short term trading opportunities identified by an analyst on the basis of market events and catalysts, while stock ratings reflect an analyst's investment recommendations based on expected total return over a 12-month period relative to the relevant coverage universe. Because Trade Alerts and stock ratings reflect different assumptions and analytical methods, Trade Alerts may differ directionally from the analyst's stock rating.

The author(s) of this report maintains a CS Model Portfolio that he/she regularly adjusts. The security or securities discussed in this report may be a component of the CS Model Portfolio and subject to such adjustments (which, given the composition of the CS Model Portfolio as a whole, may differ from the recommendation in this report, as well as opportunities or strategies identified in Trading Alerts concerning the same security). The CS Model Portfolio and important disclosures about it are available at [www.credit-suisse.com/ti](http://www.credit-suisse.com/ti).

Taiwanese Disclosures: Reports written by Taiwan-based analysts on non-Taiwan listed companies are not considered recommendations to buy or sell securities under Taiwan Stock Exchange Operational Regulations Governing Securities Firms Recommending Trades in Securities to Customers.

To the extent this is a report authored in whole or in part by a non-U.S. analyst and is made available in the U.S., the following are important disclosures regarding any non-U.S. analyst contributors:

The non-U.S. research analysts listed below (if any) are not registered/qualified as research analysts with FINRA. The non-U.S. research analysts listed below may not be associated persons of CSSU and therefore may not be subject to the NASD Rule 2711 and NYSE Rule 472 restrictions on communications with a subject company, public appearances and trading securities held by a research analyst account.

- Andrew M. Kuske, non-U.S. analyst, is a research analyst employed by Credit Suisse Securities (Canada), Inc..
- Paul Tan, non-U.S. analyst, is a research analyst employed by Credit Suisse Securities (Canada), Inc..

Disclaimers continue on next page.

This report is not directed to, or intended for distribution to or use by, any person or entity who is a citizen or resident of or located in any locality, state, country or other jurisdiction where such distribution, publication, availability or use would be contrary to law or regulation or which would subject Credit Suisse AG, the Swiss bank, or its subsidiaries or its affiliates ("CS") to any registration or licensing requirement within such jurisdiction. All material presented in this report, unless specifically indicated otherwise, is under copyright to CS. None of the material, nor its content, nor any copy of it, may be altered in any way, transmitted to, copied or distributed to any other party, without the prior express written permission of CS. All trademarks, service marks and logos used in this report are trademarks or service marks or registered trademarks or service marks of CS or its affiliates.

The information, tools and material presented in this report are provided to you for information purposes only and are not to be used or considered as an offer or the solicitation of an offer to sell or to buy or subscribe for securities or other financial instruments. CS may not have taken any steps to ensure that the securities referred to in this report are suitable for any particular investor. CS will not treat recipients as its customers by virtue of their receiving the report. The investments or services contained or referred to in this report may not be suitable for you and it is recommended that you consult an independent investment advisor if you are in doubt about such investments or investment services. Nothing in this report constitutes investment, legal, accounting or tax advice or a representation that any investment or strategy is suitable or appropriate to your individual circumstances or otherwise constitutes a personal recommendation to you. CS does not offer advice on the tax consequences of investment and you are advised to contact an independent tax adviser. Please note in particular that the bases and levels of taxation may change.

CS believes the information and opinions in the Disclosure Appendix of this report are accurate and complete. Information and opinions presented in the other sections of the report were obtained or derived from sources CS believes are reliable, but CS makes no representations as to their accuracy or completeness. Additional information is available upon request. CS accepts no liability for loss arising from the use of the material presented in this report, except that this exclusion of liability does not apply to the extent that liability arises under specific statutes or regulations applicable to CS. This report is not to be relied upon in substitution for the exercise of independent judgment. CS may have issued, and may in the future issue, a trading call regarding this security. Trading calls are short term trading opportunities based on market events and catalysts, while stock ratings reflect investment recommendations based on expected total return over a 12-month period as defined in the disclosure section. Because trading calls and stock ratings reflect different assumptions and analytical methods, trading calls may differ directionally from the stock rating. In addition, CS may have issued, and may in the future issue, other reports that are inconsistent with, and reach different conclusions from, the information presented in this report. Those reports reflect the different assumptions, views and analytical methods of the analysts who prepared them and CS is under no obligation to ensure that such other reports are brought to the attention of any recipient of this report. CS is involved in many businesses that relate to companies mentioned in this report. These businesses include specialized trading, risk arbitrage, market making, and other proprietary trading.

Past performance should not be taken as an indication or guarantee of future performance, and no representation or warranty, express or implied, is made regarding future performance. Information, opinions and estimates contained in this report reflect a judgement at its original date of publication by CS and are subject to change without notice. The price, value of and income from any of the securities or financial instruments mentioned in this report can fall as well as rise. The value of securities and financial instruments is subject to exchange rate fluctuation that may have a positive or adverse effect on the price or income of such securities or financial instruments. Investors in securities such as ADR's, the values of which are influenced by currency volatility, effectively assume this risk.

Structured securities are complex instruments, typically involve a high degree of risk and are intended for sale only to sophisticated investors who are capable of understanding and assuming the risks involved. The market value of any structured security may be affected by changes in economic, financial and political factors (including, but not limited to, spot and forward interest and exchange rates), time to maturity, market conditions and volatility, and the credit quality of any issuer or reference issuer. Any investor interested in purchasing a structured product should conduct their own investigation and analysis of the product and consult with their own professional advisers as to the risks involved in making such a purchase.

Some investments discussed in this report have a high level of volatility. High volatility investments may experience sudden and large falls in their value causing losses when that investment is realised. Those losses may equal your original investment. Indeed, in the case of some investments the potential losses may exceed the amount of initial investment, in such circumstances you may be required to pay more money to support those losses. Income yields from investments may fluctuate and, in consequence, initial capital paid to make the investment may be used as part of that income yield. Some investments may not be readily realisable and it may be difficult to sell or realise those investments, similarly it may prove difficult for you to obtain reliable information about the value, or risks, to which such an investment is exposed.

## Q1 earnings preview

- **Earnings revisions:** For several reasons, we made a number of revisions to our Fortis Inc. financial model. Our changes focused on several areas ahead of the forthcoming Q1 2012 results. Specifically, our Q1 EPS estimate declined from C\$0.71 to C\$0.68. Our annual estimate declines from C\$1.79 to C\$1.76. For greater details, please refer to our Canadian Infrastructure Q1 2012 earnings preview "Starting the season: Q1 earnings preview" (25 April 2012).

### Share price performance

## Disclosure Appendix

### Important Global Disclosures

I, Andrew M. Kuske, certify that (1) the views expressed in this report accurately reflect my personal views about all of the subject companies and securities and (2) no part of my compensation was, is or will be directly or indirectly related to the specific recommendations or views expressed in this report.

See the Companies Mentioned section for full company names.

### 3-Year Price, Target Price and Rating Change History Chart for FTS.TO

FTS.TO Date	Closing Price (C\$)	Target Price (C\$)	Initiation/ Rating Assumption
1/25/10	28.5	30	
11/8/10	33.6	32	
2/10/11	33.81	34	
8/3/11	31.37		O
9/28/11	33.08		N

The analyst(s) responsible for preparing this research report received compensation that is based upon various factors including Credit Suisse's total revenues, a portion of which are generated by Credit Suisse's investment banking activities.

### Analysts' stock ratings are defined as follows:

**Outperform (O):** The stock's total return is expected to outperform the relevant benchmark\* by at least 10-15% (or more, depending on perceived risk) over the next 12 months.

**Neutral (N):** The stock's total return is expected to be in line with the relevant benchmark\* (range of  $\pm 10-15\%$ ) over the next 12 months.

**Underperform (U):** The stock's total return is expected to underperform the relevant benchmark\* by 10-15% or more over the next 12 months.

\*Relevant benchmark by region: As of 29<sup>th</sup> May 2009, Australia, New Zealand, U.S. and Canadian ratings are based on (1) a stock's absolute total return potential to its current share price and (2) the relative attractiveness of a stock's total return potential within an analyst's coverage universe\*\*, with Outperforms representing the most attractive, Neutrals the less attractive, and Underperforms the least attractive investment opportunities. Some U.S. and Canadian ratings may fall outside the absolute total return ranges defined above, depending on market conditions and industry factors. For Latin American, Japanese, and non-Japan Asia stocks, ratings are based on a stock's total return relative to the average total return of the relevant country or regional benchmark; for European stocks, ratings are based on a stock's total return relative to the analyst's coverage universe\*\*. For Australian and New Zealand stocks, 12-month rolling yield is incorporated in the absolute total return calculation and a 15% and a 7.5% threshold replace the 10-15% level in the Outperform and Underperform stock rating definitions, respectively. The 15% and 7.5% thresholds replace the +10-15% and -10-15% levels in the Neutral stock rating definition, respectively.

\*\*An analyst's coverage universe consists of all companies covered by the analyst within the relevant sector.

**Restricted (R):** In certain circumstances, Credit Suisse policy and/or applicable law and regulations preclude certain types of communications, including an investment recommendation, during the course of Credit Suisse's engagement in an investment banking transaction and in certain other circumstances.

**Volatility Indicator [V]:** A stock is defined as volatile if the stock price has moved up or down by 20% or more in a month in at least 8 of the past 24 months or the analyst expects significant volatility going forward.

**Analysts' coverage universe weightings are distinct from analysts' stock ratings and are based on the expected performance of an analyst's coverage universe\* versus the relevant broad market benchmark\*\*:**

**Overweight:** Industry expected to outperform the relevant broad market benchmark over the next 12 months.

**Market Weight:** Industry expected to perform in-line with the relevant broad market benchmark over the next 12 months.

**Underweight:** Industry expected to underperform the relevant broad market benchmark over the next 12 months.

\*An analyst's coverage universe consists of all companies covered by the analyst within the relevant sector.

\*\*The broad market benchmark is based on the expected return of the local market index (e.g., the S&P 500 in the U.S.) over the next 12 months.

---

**Credit Suisse's distribution of stock ratings (and banking clients) is:**

Global Ratings Distribution		
<b>Outperform/Buy*</b>	46%	(60% banking clients)
<b>Neutral/Hold*</b>	42%	(58% banking clients)
<b>Underperform/Sell*</b>	10%	(51% banking clients)
<b>Restricted</b>	2%	

\*For purposes of the NYSE and NASD ratings distribution disclosure requirements, our stock ratings of Outperform, Neutral, and Underperform most closely correspond to Buy, Hold, and Sell, respectively; however, the meanings are not the same, as our stock ratings are determined on a relative basis. (Please refer to definitions above.) An investor's decision to buy or sell a security should be based on investment objectives, current holdings, and other individual factors.

Credit Suisse's policy is to update research reports as it deems appropriate, based on developments with the subject company, the sector or the market that may have a material impact on the research views or opinions stated herein.

Credit Suisse's policy is only to publish investment research that is impartial, independent, clear, fair and not misleading. For more detail please refer to Credit Suisse's Policies for Managing Conflicts of Interest in connection with Investment Research: [http://www.csfb.com/research-and-analytics/disclaimer/managing\\_conflicts\\_disclaimer.html](http://www.csfb.com/research-and-analytics/disclaimer/managing_conflicts_disclaimer.html)

Credit Suisse does not provide any tax advice. Any statement herein regarding any US federal tax is not intended or written to be used, and cannot be used, by any taxpayer for the purposes of avoiding any penalties.

See the Companies Mentioned section for full company names.

**Price Target:** (12 months) for (FTS.TO)

**Method:** We obtain our C\$34.00 target price for Fortis Inc. by using multiple valuation methodologies, yield base analysis, and discounted cash flow, all of which produce the C\$34.00 target. Our target price implies a P/E (price/earnings) multiple of 18.5x our 2013 EPS (earnings per share) estimate of C\$1.85 and an EV/EBITDA (enterprise value/earnings before interest, taxes, depreciation, and amortization) multiple of 10.3x our EBITDA estimate.

**Risks:** There are a number of risks to Fortis' achievement of our C\$34.00 target price: commodity prices; weather; environmental; regulatory; access to capital markets; and, interest rates. Moreover, one should never underestimate the power of the regulator in any regulated business.

Please refer to the firm's disclosure website at [www.credit-suisse.com/researchdisclosures](http://www.credit-suisse.com/researchdisclosures) for the definitions of abbreviations typically used in the target price method and risk sections.

See the Companies Mentioned section for full company names.

The subject company (FTS.TO) currently is, or was during the 12-month period preceding the date of distribution of this report, a client of Credit Suisse.

Credit Suisse provided investment banking services to the subject company (FTS.TO) within the past 12 months.

Credit Suisse provided non-investment banking services, which may include Sales and Trading services, to the subject company (FTS.TO) within the past 12 months.

Credit Suisse expects to receive or intends to seek investment banking related compensation from the subject company (FTS.TO) within the next 3 months.

Credit Suisse has received compensation for products and services other than investment banking services from the subject company (FTS.TO) within the past 12 months.

---

**Important Regional Disclosures**

Singapore recipients should contact a Singapore financial adviser for any matters arising from this research report.

An analyst involved in the preparation of this report has visited certain material operations of the subject company (FTS.TO) within the past 12 months. The analyst may not have visited all material operations of the subject company. The travel expenses of the analyst in connection with such visits were not paid or reimbursed by the subject company, other than de minimus local travel expenses.

Restrictions on certain Canadian securities are indicated by the following abbreviations: NVS--Non-Voting shares; RVS--Restricted Voting Shares; SVS--Subordinate Voting Shares.

Individuals receiving this report from a Canadian investment dealer that is not affiliated with Credit Suisse should be advised that this report may not contain regulatory disclosures the non-affiliated Canadian investment dealer would be required to make if this were its own report.

For Credit Suisse Securities (Canada), Inc.'s policies and procedures regarding the dissemination of equity research, please visit [http://www.csfb.com/legal\\_terms/canada\\_research\\_policy.shtml](http://www.csfb.com/legal_terms/canada_research_policy.shtml).

As of the date of this report, Credit Suisse acts as a market maker or liquidity provider in the equities securities that are the subject of this report.

Principal is not guaranteed in the case of equities because equity prices are variable.

Commission is the commission rate or the amount agreed with a customer when setting up an account or at anytime after that.

**Taiwanese Disclosures: This research report is for reference only. Investors should carefully consider their own investment risk. Investment results are the responsibility of the individual investor. Reports may not be reprinted without permission of CS. Reports written by Taiwan-based analysts on non-Taiwan listed companies are not considered recommendations to buy or sell securities under Taiwan Stock Exchange Operational Regulations Governing Securities Firms Recommending Trades in Securities to Customers.**

---

To the extent this is a report authored in whole or in part by a non-U.S. analyst and is made available in the U.S., the following are important disclosures regarding any non-U.S. analyst contributors:

Disclaimers continue on next page.

This report is not directed to, or intended for distribution to or use by, any person or entity who is a citizen or resident of or located in any locality, state, country or other jurisdiction where such distribution, publication, availability or use would be contrary to law or regulation or which would subject Credit Suisse AG, the Swiss bank, or its subsidiaries or its affiliates ("CS") to any registration or licensing requirement within such jurisdiction. All material presented in this report, unless specifically indicated otherwise, is under copyright to CS. None of the material, nor its content, nor any copy of it, may be altered in any way, transmitted to, copied or distributed to any other party, without the prior express written permission of CS. All trademarks, service marks and logos used in this report are trademarks or service marks or registered trademarks or service marks of CS or its affiliates.

The information, tools and material presented in this report are provided to you for information purposes only and are not to be used or considered as an offer or the solicitation of an offer to sell or to buy or subscribe for securities or other financial instruments. CS may not have taken any steps to ensure that the securities referred to in this report are suitable for any particular investor. CS will not treat recipients as its customers by virtue of their receiving the report. The investments or services contained or referred to in this report may not be suitable for you and it is recommended that you consult an independent investment advisor if you are in doubt about such investments or investment services. Nothing in this report constitutes investment, legal, accounting or tax advice or a representation that any investment or strategy is suitable or appropriate to your individual circumstances or otherwise constitutes a personal recommendation to you. CS does not offer advice on the tax consequences of investment and you are advised to contact an independent tax adviser. Please note in particular that the bases and levels of taxation may change.

CS believes the information and opinions in the Disclosure Appendix of this report are accurate and complete. Information and opinions presented in the other sections of the report were obtained or derived from sources CS believes are reliable, but CS makes no representations as to their accuracy or completeness. Additional information is available upon request. CS accepts no liability for loss arising from the use of the material presented in this report, except that this exclusion of liability does not apply to the extent that liability arises under specific statutes or regulations applicable to CS. This report is not to be relied upon in substitution for the exercise of independent judgment. CS may have issued, and may in the future issue, a trading call regarding this security. Trading calls are short term trading opportunities based on market events and catalysts, while stock ratings reflect investment recommendations based on expected total return over a 12-month period as defined in the disclosure section. Because trading calls and stock ratings reflect different assumptions and analytical methods, trading calls may differ directionally from the stock rating. In addition, CS may have issued, and may in the future issue, other reports that are inconsistent with, and reach different conclusions from, the information presented in this report. Those reports reflect the different assumptions, views and analytical methods of the analysts who prepared them and CS is under no obligation to ensure that such other reports are brought to the attention of any recipient of this report. CS is involved in many businesses that relate to companies mentioned in this report. These businesses include specialized trading, risk arbitrage, market making, and other proprietary trading.

Past performance should not be taken as an indication or guarantee of future performance, and no representation or warranty, express or implied, is made regarding future performance. Information, opinions and estimates contained in this report reflect a judgement at its original date of publication by CS and are subject to change without notice. The price, value of and income from any of the securities or financial instruments mentioned in this report can fall as well as rise. The value of securities and financial instruments is subject to exchange rate fluctuation that may have a positive or adverse effect on the price or income of such securities or financial instruments. Investors in securities such as ADR's, the values of which are influenced by currency volatility, effectively assume this risk.

Structured securities are complex instruments, typically involve a high degree of risk and are intended for sale only to sophisticated investors who are capable of understanding and assuming the risks involved. The market value of any structured security may be affected by changes in economic, financial and political factors (including, but not limited to, spot and forward interest and exchange rates), time to maturity, market conditions and volatility, and the credit quality of any issuer or reference issuer. Any investor interested in purchasing a structured product should conduct their own investigation and analysis of the product and consult with their own professional advisers as to the risks involved in making such a purchase.

Some investments discussed in this report have a high level of volatility. High volatility investments may experience sudden and large falls in their value causing losses when that investment is realised. Those losses may equal your original investment. Indeed, in the case of some investments the potential losses may exceed the amount of initial investment, in such circumstances you may be required to pay more money to support those losses. Income yields from investments may fluctuate and, in consequence, initial capital paid to make the investment may be used as part of that income yield. Some investments may not be readily realisable and it may be difficult to sell or realise those investments, similarly it may prove difficult for you to obtain reliable information about the value, or risks, to which such an investment is exposed.

This report may provide the addresses of, or contain hyperlinks to, websites. Except to the extent to which the report refers to website material of CS, CS has not reviewed the linked site and takes no responsibility for the content contained therein. Such address or hyperlink (including addresses or hyperlinks to CS's own website material) is provided solely for your convenience and information and the content of the linked site does not in any way form part of this document. Accessing such website or following such link through this report or CS's website shall be at your own risk.

This report is issued and distributed in Europe (except Switzerland) by Credit Suisse Securities (Europe) Limited, One Cabot Square, London E14 4QJ, England, which is regulated in the United Kingdom by The Financial Services Authority ("FSA"). ### FORECAST REDUCTION

## The regulatory march

- **Earnings review:** Fortis reported Q1 2012 headline EPS (FD) of C\$0.62, which missed our C\$0.68 and the Street's C\$0.67 view and at the low end of the C\$0.62-C\$0.69 range. In general, we believe Fortis is making steady progress in delivering consistent financial results from a largely regulated asset base. With the current regulatory process surrounding the CH Energy deal, we do not believe Fortis will be involved in major transactional activity until sometime after close. We do not place undue emphasis on quarterly results as a result of the inherently long-cycle nature of many assets.
- **Significant organic growth continues:** Fortis continues to provide a rather robust capital expenditure outlook with guidance of C\$1.3bn for 2012. Additionally, Fortis' 5-year capex outlook continues to stand at C\$5.5bn. Eighty-seven percent of that total amount is expected to go towards regulated utility activities that should deliver favourable risk adjusted returns.
- **Improving capital market conditions:** Historically, Fortis has been very adept at acquisitions. Corporate growth has benefited from the company's ability to successfully acquire and integrate selected assets. In our view, the company is well positioned in the current market for acquisition opportunities post completion of the CH Energy acquisition. The company stated, "We remain disciplined and patient in our pursuit of additional electric and gas utility acquisitions in the United States and Canada that will add value for Fortis shareholders".
- **Valuation:** Our C\$34 target price and Neutral rating are obtained utilizing multiple valuation approaches, including: an 18.5x P/E multiple of 2013 earnings; a 1.7x book value multiple; and, a DCF based valuation. We reiterate our Neutral rating.

### Share price performance

Quarterly EPS	Q1	Q2	Q3	Q4

**DISCLOSURE APPENDIX CONTAINS ANALYST CERTIFICATIONS AND THE STATUS OF NON-US ANALYSTS. U.S.**  
Disclosure: Credit Suisse does and seeks to do business with companies covered in its research reports. As a result, investors should be aware that the Firm may have a conflict of interest that could affect the objectivity of this report. Investors should consider this report as only a single factor in making their investment decision.

This research note is divided into three parts: (a) results; (b) outlook; and, (c) valuation. Each of these areas will be addressed in greater detail below.

## Results

Exhibit 1 highlights the segmented unadjusted earnings contributions for the most recent quarter and for the comparable period one year ago. Our commentary for each segment appears under the various headings below.

Results missed our and the Street's estimate

### Exhibit 1: Segmented unadjusted earnings contribution

C\$ in millions, unless otherwise stated

	Q1 2012	Q1 2011	chg y/y
Regulated Gas Utilities - Canadian	82	75	9%
Regulated Electric Utilities - Canadian	51	52	-2%
Regulated Electric Utilities - Caribbean	3	4	-25%
Non-regulated - Fortis Generation	5	3	67%
Non-regulated - Fortis Properties	1	1	0%
Corporate and other	(21)	(19)	-11%
Net earnings applicable to common shares	121	116	4%

Source: Company data and Credit Suisse

### Regulated Gas Utilities - Canadian

The unadjusted earnings for this segment improved by roughly 9% year-over-year (see Exhibit 2). Some notable items for the regulated gas utilities include:

- Net customer additions were 1,000 during Q1 2012 versus net additions of 1,400 in Q1 2011;
- The amount of customer additions decreased versus Q1 2012 due to lower building activity; and,
- Sales volumes for the quarter decreased for the residential and commercial, industrial segments, while increased for the transportation segment.

### Exhibit 2: Regulated Gas Utilities (unadjusted)

	Q1 2012	Q1 2011	chg y/y
FortisBC Energy	82.0	75.0	9%

Source: Company data and Credit Suisse

### Regulated Electric Utilities – Canadian

This segment includes operating companies like FortisAlberta, FortisBC Electric, Newfoundland Power and Other Canadian Electric Utilities, which includes Maritime Electric and FortisOntario. Detailed contributions for each of these divisions can be found in Exhibit 3.

### Exhibit 3: Regulated electric utilities – Canadian contribution (unadjusted)

C\$ in millions, unless otherwise stated

	Q1 2012	Q1 2011	chg y/y
FortisAlberta	21	21	0%
FortisBC Electric	16	19	-16%
Newfoundland Power	7	6	17%
Other Cdn Electric Utilities	7	6	17%
Earnings	51	52	-2%

Source: Company data and Credit Suisse

## FortisAlberta

Earnings at this regulated utility were flat comparing Q1 2012 versus the prior period. See Exhibit 4 for selected highlights.

Slight increase in energy delivery in Alberta

### Exhibit 4: Selected FortisAlberta performance highlights (unadjusted)

	Q1 2012	Q1 2011	chg y/y
Energy deliveries (GWh)	4,482	4,402	2%
Revenue (C\$/MWh)	24.10	22.72	6%
Operating expenses (C\$/MWh)	8.70	7.95	9%
Gross margin (C\$/MWh)	15.39	14.77	4%
Earnings (C\$millions)	21	21	0%

Source: Company data and Credit Suisse

## FortisBC Electric

Segmented earnings at FortisBC Electric decreased by 16% compared to the same period last year. The decrease was due to increased operating expense, lower capitalized AFUDC and expiry of PBR mechanism on December 31, 2011.

Flat energy deliveries in BC

See Exhibit 5 for selected highlights.

### Exhibit 5: Selected FortisBC Electric performance highlights (unadjusted)

	Q1 2012	Q1 2011	chg y/y
Energy deliveries (GWh)	909	905	0%
Revenue (C\$/MWh)	95.71	91.71	4%
Energy supply costs (C\$/MWh)	27.50	25.41	8%
Operating expenses (C\$/MWh)	23.10	19.89	16%
Gross margin (C\$/MWh)	45.10	46.41	-3%
Earnings (C\$millions)	16	19	-16%

Source: Company data and Credit Suisse

## Newfoundland Power

This segment's earnings gained by 17% when comparing Q1 2012 versus Q1 2011. Higher electricity sales and lower effective corporate taxes led to result in higher earnings. Energy deliveries were up by approximately 4% (see Exhibit 6).

Increase in NP's energy deliveries

### Exhibit 6: Selected Newfoundland Power performance highlights (unadjusted)

	Q1 2012	Q1 2011	chg y/y
Energy deliveries (GWh)	1,914	1,834	4%
Revenue (C\$/MWh)	100.31	99.78	1%
Energy supply costs (C\$/MWh)	74.19	73.06	2%
Operating expenses (C\$/MWh)	10.45	10.91	-4%
Gross margin (C\$/MWh)	15.67	15.81	-1%
Earnings (C\$millions)	7	6	17%

Source: Company data, Credit Suisse estimates

## Other Canadian Electric Utilities

This segment's earning increased by 17% in Q1 2012 versus Q1 2011 primarily due to increased electricity sales on PEI and lower effective corporate income taxes. The energy deliveries for the period declined by 1% compared to Q1 2011. Exhibit 7 contains selected highlights.

Decrease in energy deliveries

**Exhibit 7: Selected Other Canadian Electric Utilities performance highlights (unadjusted)**

	Q1 2012	Q1 2011	chg y/y
Energy deliveries (GWh)	645	654	-1%
Revenue (C\$/MWh)	141.09	139.14	1%
Energy supply costs (C\$/MWh)	89.92	91.74	-2%
Operating expenses (C\$/MWh)	18.60	18.35	1%
Gross margin (C\$/MWh)	32.56	29.05	12%
Earnings (C\$millions)	7	6	17%

Source: Company data and Credit Suisse

**Regulated Electric Utilities – Caribbean**

This segment includes Belize Electricity (up to June 20, 2011), Caribbean Utilities, and Fortis Turks and Caicos. Earnings for this segment declined by 25% in Q1 2012 versus the same quarter last year. Energy deliveries declined 35% for several reasons. In our view, Belize Electricity was not overly material to Fortis. Additionally, we anticipate the dispute to be resolved in a rationale manner with Fortis recovering, at least, the rate base value. Yet, any such recovery may be over a period of time.

See Exhibit 8 below for selected highlights.

**Exhibit 8: Caribbean - Regulated Electric Utilities performance highlights (unadjusted)**

	Q1 2012	Q1 2011	chg y/y
Energy deliveries (GWh)	166	257	-35%
Revenue (C\$/MWh)	379.52	291.83	30%
Energy supply costs (C\$/MWh)	240.96	178.99	35%
Operating expenses (C\$/MWh)	48.19	42.80	13%
Gross margin (C\$/MWh)	90.36	70.04	29%
Earnings (C\$millions)	3	4	-25%

Source: Company data and Credit Suisse

**Non-regulated – Fortis Generation**

The non-regulated generation assets within this segment are located in Belize, British Columbia, Central Newfoundland, Ontario and Upper New York State. Earnings for the segment were up 67% in Q1 2012 compared to the same quarter last year. Energy deliveries increased by 16% from Q1 2011 to Q1 2012 due to increased production in Belize. Exhibit 9 provides selected highlights.

**Exhibit 9: Non-regulated generation – selected highlights**

	Q1 2012	Q1 2011	chg y/y
Energy deliveries (GWh)	88	76	16%
Revenue (C\$/MWh)	102.27	92.11	11%
Operating expenses (C\$/MWh)	34.09	39.47	-14%
Gross margin (C\$/MWh)	68.18	52.63	30%
Earnings (C\$millions)	5	3	67%

Source: Company data and Credit Suisse

**Non-regulated – Fortis Properties**

Fortis Properties' net unadjusted earning contribution remained flat during the quarter. REVPAR increased by 5% to C\$66.54 on a year over year comparison. While, the occupancy rate of the Real Estate Division was down by 2.1%.

**Corporate**

Corporate expenses increase by C\$2 million to C\$10 million in Q1 2012, when compared with last quarter during the same period.

## Outlook

We continue to believe investor, whether existing or prospective, should consider several major issues, including (a) funding organic growth; and (b) acquisition trail. Each of these issues is addressed below.

### Funding organic growth

In the most recent quarter the company's reported capital expenditures totaled C\$229 million, of which C\$176 million was spent at regulated utilities. Fortis guided that capital expenditures for 2012 will be roughly C\$1.3 billion. A majority of the total will be spent on Western Canadian assets (FortisBC Energy, FortisAlberta, and FortisBC Electric). Fortis' consolidated gross capital expenditures expectations over the 5 year plan (2012-2016) stood at C\$5.5bn with 87% of that total amount being allocated to regulated utilities. Both FortisAlberta and FortisBC Electric will receive the vast majority of that amount; whereas, the regulated gas utilities are planned to receive 23% of the total capex amount, and 13% is allocated to non-regulated operations. Given the regulated rates of return with utility capital expenditures, the increases should be viewed as longer-term positives provided an appropriate financial balance is struck.

Ongoing organic growth

With the significant current relative valuation advantages, we believe that Fortis may become more motivated to explore possible capital efficiency initiatives. In our view, the company possesses ample opportunities to become much more capital efficient. One strategy involves divesting certain non-utility assets and redeploying capital into utility assets or funding the capital program. Another option would entail divesting partial interests in selected utility assets in an asset management model approach and receiving a management fee.

In fact, some of the media reports prior to the official announcement of PPL Corporation's acquisition of E.ON's Kentucky utility assets for US\$7.625 billion stated that a consortium led by Fortis Inc. was one of three finalists for those assets. We would regard that type of information in media reports as being something akin to an asset management style of approach. Ultimately, we believe that such a strategy would help Fortis generate a higher level of returns. Additionally, the use of an asset management type approach would make large acquisitions which could potentially further accelerate growth.

Opportunities for improved capital efficiency

Generally, we continue to prefer pure-play utility companies without an undue amount of non-core asset exposure. Historically, non-core assets (especially real estate) have been somewhat commonplace for many utilities. Fortis has been no exception to that approach. Notably, the mix of commercial and hospitality real estate assets held by Fortis have been positive contributors and also provide the company a bit of financial flexibility for a selection of reasons. In light of current market conditions, we believe there is a much less compelling case for the monetization of these assets than as in the past. We note Fortis Properties continues to increase in scale and scope which may eventually make it more attractive for acquisition or monetization. Yet, for a number of reasons, we continue to believe there is a rather low probability of either of those events occurring.

Even discounting the potential monetization of assets that we would consider to be non-core, we believe Fortis possesses considerable potential to become much more capital efficient. Given the significant interest in infrastructure assets by many investors seeking long-dated types of return, Fortis could easily divest portions of its existing asset base to pension fund investors and charge a management fee for their operational and management expertise. This type of approach could significantly improve capital efficiency and returns on capital. In addition, this asset management approach could also free-up capital that could be used to fund the existing capital program or fund future acquisitions.

Capital efficiency initiatives could aid funding of acquisitions or the existing capital program funding

### Acquisition trail

In our view, Fortis continues to demonstrate a rather impressive ability to successfully integrate acquisitions. Additionally, we view acquisitions as somewhat central to the

company's growth strategy. Fortis is currently working towards to complete its acquisition of CH Energy Group (see "Acquiring American assets" on 21 February 2012), which it expects to occur by the end of Q1 2013. We view Fortis management to continue to look to further grow in the US. The company's most recent Management Discussion and Analysis stated "We remain disciplined and patient in our pursuit of additional electric and gas utility acquisitions in the United States and Canada that will add value for Fortis shareholders". Fortis showed discipline in its acquisition strategy by not competing in a bidding war for Central Vermont Service Corp. The company received a C\$17m termination fee. For further details see "A positive pass" published on 12 July 2011.

Given the success of Fortis in past transactions, as measured in terms of financials, share price and operationally, we believe the company's current valuation and skill set may lead to some potentially value creating acquisition activity (see Exhibit 10 below for select Fortis M&A transactions).

#### Exhibit 10: Selected Fortis M&A transactions

\$ in millions, unless otherwise stated

Announced Date	Asset/Company	Deal value (\$m)	Comment
2/21/2012	CH Energy Group	USD 1,500.00	Pending acquisition of NY State electric utility
7/22/2009	Caribbean Utilities Co.	CAD 6.74	Acquired an additional 2.7% of Caribbean Utilities Co.
6/23/2009	Great Lakes Power Distribution	CAD 68.00	Acquired from Brookfield the utility that serves the District of Algoma in northern Ontario.
10/1/2008	Grimsby Power Inc.	CAD 1.10	Acquired a 10% minority interest.
10/1/2008	Caribbean Utilities Co.	CAD 3.00	Acquired an additional 1% of Caribbean Utilities Co.

10/28/1999	Belize Electricity Ltd.	CAD 36.80	Acquired 67% interest in the main commercial generator, transmitter & distributor of electricity in Belize.
8/31/1999	Brunswick Square Ltd.	CAD 10.12	Acquired 50% of the company by Fortis Properties.
1/31/1999	Mount Peyton	CAD 2.20	Acquired all common shares and notes payable.
	Total USD	USD 1,565.50	
	Total CAD	CAD 6,214.48	

Source: Bloomberg, Company data and Credit Suisse

In terms of acquisitions, we believe Fortis has a few advantages over others, including:

- Fortis has growing expertise with both electric and gas utilities;
- Larger size will allow it to look at a larger spectrum of potential target companies;
- A proven ability to effectively integrate acquisitions;
- A rather strong appetite for yield oriented securities in Canada;
- The potential ability to support a transaction with pension fund capital;
- Canada's rather benign interest rate environment; and,
- Bought deal financing commonly employed in Canada.

Fortis possesses a number of absolute and relative advantages over some other competitors

Historically, Fortis has been very adept at acquisitions. Corporate growth has benefited from the company's ability to successfully acquire and integrate selected assets.

## Valuation

We continue to believe that Fortis has strong organic growth in key areas such as British Columbia, Alberta and the Caribbean. In our view, the company faces a delicate balance of capital investment opportunities and cash flow needs. After the quarter, we revised our EPS estimates for 2012 to C\$1.72 from C\$1.76. Our Neutral rating and C\$34.00 target price is obtained from multiple valuation approaches, including: a 18.5x P/E multiple of 2013 earnings; a 1.7x book value multiple; and, a DCF based valuation. We reiterate our Neutral rating. Some historical Fortis valuation parameters appear in Exhibit 11 below generated by Credit Suisse RAVE.

Rating: Neutral

Target: C\$34

**Exhibit 11: Fortis historical valuation**

The author of this report wishes to acknowledge the contribution made by Setu Kumar Sharda, an employee of Irevna, a division of CRISIL Limited, a third-party provider of offshore research services to Credit Suisse.

## Disclosure Appendix

### Important Global Disclosures

I, Andrew M. Kuske, certify that (1) the views expressed in this report accurately reflect my personal views about all of the subject companies and securities and (2) no part of my compensation was, is or will be directly or indirectly related to the specific recommendations or views expressed in this report.

See the *Companies Mentioned* section for full company names.

### 3-Year Price, Target Price and Rating Change History Chart for FTS.TO

The analyst(s) responsible for preparing this research report received compensation that is based upon various factors including Credit Suisse's total revenues, a portion of which are generated by Credit Suisse's investment banking activities.

### Analysts' stock ratings are defined as follows:

**Outperform (O):** The stock's total return is expected to outperform the relevant benchmark\* by at least 10-15% (or more, depending on perceived risk) over the next 12 months.

**Neutral (N):** The stock's total return is expected to be in line with the relevant benchmark\* (range of  $\pm 10-15\%$ ) over the next 12 months.

**Underperform (U):** The stock's total return is expected to underperform the relevant benchmark\* by 10-15% or more over the next 12 months.

\*Relevant benchmark by region: As of 29<sup>th</sup> May 2009, Australia, New Zealand, U.S. and Canadian ratings are based on (1) a stock's absolute total return potential to its current share price and (2) the relative attractiveness of a stock's total return potential within an analyst's coverage universe\*\*, with Outperforms representing the most attractive, Neutrals the less attractive, and Underperforms the least attractive investment opportunities. Some U.S. and Canadian ratings may fall outside the absolute total return ranges defined above, depending on market conditions and industry factors. For Latin American, Japanese, and non-Japan Asia stocks, ratings are based on a stock's total return relative to the average total return of the relevant country or regional benchmark; for European stocks, ratings are based on a stock's total return relative to the analyst's coverage universe\*\*. For Australian and New Zealand stocks, 12-month rolling yield is incorporated in the absolute total return calculation and a 15% and a 7.5% threshold replace the 10-15% level in the Outperform and Underperform stock rating definitions, respectively. The 15% and 7.5% thresholds replace the +10-15% and -10-15% levels in the Neutral stock rating definition, respectively.

\*\*An analyst's coverage universe consists of all companies covered by the analyst within the relevant sector.

**Restricted (R):** In certain circumstances, Credit Suisse policy and/or applicable law and regulations preclude certain types of communications, including an investment recommendation, during the course of Credit Suisse's engagement in an investment banking transaction and in certain other circumstances.

**Volatility Indicator [V]:** A stock is defined as volatile if the stock price has moved up or down by 20% or more in a month in at least 8 of the past 24 months or the analyst expects significant volatility going forward.

### Analysts' coverage universe weightings are distinct from analysts' stock ratings and are based on the expected performance of an analyst's coverage universe\* versus the relevant broad market benchmark\*\*:

**Overweight:** Industry expected to outperform the relevant broad market benchmark over the next 12 months.

**Market Weight:** Industry expected to perform in-line with the relevant broad market benchmark over the next 12 months.

**Underweight:** Industry expected to underperform the relevant broad market benchmark over the next 12 months.

\*An analyst's coverage universe consists of all companies covered by the analyst within the relevant sector.

\*\*The broad market benchmark is based on the expected return of the local market index (e.g., the S&P 500 in the U.S.) over the next 12 months.

### Credit Suisse's distribution of stock ratings (and banking clients) is:

Global Ratings Distribution		
Outperform/Buy*	47%	(59% banking clients)
Neutral/Hold*	41%	(57% banking clients)
Underperform/Sell*	10%	(52% banking clients)

**Restricted**

2%

*\*For purposes of the NYSE and NASD ratings distribution disclosure requirements, our stock ratings of Outperform, Neutral, and Underperform most closely correspond to Buy, Hold, and Sell, respectively; however, the meanings are not the same, as our stock ratings are determined on a relative basis. (Please refer to definitions above.) An investor's decision to buy or sell a security should be based on investment objectives, current holdings, and other individual factors.*

**Price Target:** (12 months) for (FTS.TO)

**Method:** We obtain our C\$34.00 target price for Fortis Inc. by using multiple valuation methodologies, yield base analysis, and discounted cash flow, all of which produce the C\$34.00 target. Our target price implies a P/E (price/earnings) multiple of 18.5x our 2013 EPS (earnings per share) estimate of C\$1.85 and an EV/EBITDA (enterprise value/earnings before interest, taxes, depreciation, and amortization) multiple of 10.3x our EBITDA estimate.

**Risks:** There are a number of risks to Fortis' achievement of our C\$34.00 target price: commodity prices; weather; environmental; regulatory; access to capital markets; and, interest rates. Moreover, one should never underestimate the power of the regulator in any regulated business.

Please refer to the firm's disclosure website at [www.credit-suisse.com/researchdisclosures](http://www.credit-suisse.com/researchdisclosures) for the definitions of abbreviations typically used in the target price method and risk sections.

Disclaimers continue on next page.

This report is not directed to, or intended for distribution to or use by, any person or entity who is a citizen or resident of or located in any locality, state, country or other jurisdiction where such distribution, publication, availability or use would be contrary to law or regulation or which would subject Credit Suisse AG, the Swiss bank, or its subsidiaries or its affiliates ("CS") to any registration or licensing requirement within such jurisdiction. All material presented in this report, unless specifically indicated otherwise, is under copyright to CS. None of the material, nor its content, nor any copy of it, may be altered in any way, transmitted to, copied or distributed to any other party, without the prior express written permission of CS. All trademarks, service marks and logos used in this report are trademarks or service marks or registered trademarks or service marks of CS or its affiliates.

The information, tools and material presented in this report are provided to you for information purposes only and are not to be used or considered as an offer or the solicitation of an offer to sell or to buy or subscribe for securities or other financial instruments. CS may not have taken any steps to ensure that the securities referred to in this report are suitable for any particular investor. CS will not treat recipients as its customers by virtue of their receiving the report. The investments or services contained or referred to in this report may not be suitable for you and it is recommended that you consult an independent investment advisor if you are in doubt about such investments or investment services. Nothing in this report constitutes investment, legal, accounting or tax advice or a representation that any investment or strategy is suitable or appropriate to your individual circumstances or otherwise constitutes a personal recommendation to you. CS does not offer advice on the tax consequences of investment and you are advised to contact an independent tax adviser. Please note in particular that the bases and levels of taxation may change.

CS believes the information and opinions in the Disclosure Appendix of this report are accurate and complete. Information and opinions presented in the other sections of the report were obtained or derived from sources CS believes are reliable, but CS makes no representations as to their accuracy or completeness. Additional information is available upon request. CS accepts no liability for loss arising from the use of the material presented in this report, except that this exclusion of liability does not apply to the extent that liability arises under specific statutes or regulations applicable to CS. This report is not to be relied upon in substitution for the exercise of independent judgment. CS may have issued, and may in the future issue, a trading call regarding this security. Trading calls are short term trading opportunities based on market events and catalysts, while stock ratings reflect investment recommendations based on expected total return over a 12-month period as defined in the disclosure section. Because trading calls and stock ratings reflect different assumptions and analytical methods, trading calls may differ directionally from the stock rating. In addition, CS may have issued, and may in the future issue, other reports that are inconsistent with, and reach different conclusions from, the information presented in this report. Those reports reflect the different assumptions, views and analytical methods of the analysts who prepared them and CS is under no obligation to ensure that such other reports are brought to the attention of any recipient of this report. CS is involved in many businesses that relate to companies mentioned in this report. These businesses include specialized trading, risk arbitrage, market making, and other proprietary trading.

Past performance should not be taken as an indication or guarantee of future performance, and no representation or warranty, express or implied, is made regarding future performance. Information, opinions and estimates contained in this report reflect a judgement at its original date of publication by CS and are subject to change without notice. The price, value of and income from any of the securities or financial instruments mentioned in this report can fall as well as rise. The value of securities and financial instruments is subject to exchange rate fluctuation that may have a positive or adverse effect on the price or income of such securities or financial instruments. Investors in securities such as ADR's, the values of which are influenced by currency volatility, effectively assume this risk.

Structured securities are complex instruments, typically involve a high degree of risk and are intended for sale only to sophisticated investors who are capable of understanding and assuming the risks involved. The market value of any structured security may be affected by changes in economic, financial and political factors (including, but not limited to, spot and forward interest and exchange rates), time to maturity, market conditions and volatility, and the credit quality of any issuer or reference issuer. Any investor interested in purchasing a structured product should conduct their own investigation and analysis of the product and consult with their own professional advisers as to the risks involved in making such a purchase.

Some investments discussed in this report have a high level of volatility. High volatility investments may experience sudden and large falls in their value causing losses when that investment is realised. Those losses may equal your original investment. Indeed, in the case of some investments the potential losses may exceed the amount of initial investment, in such circumstances you may be required to pay more money to support those losses. Income yields from investments may fluctuate and, in consequence, initial capital paid to make the investment may be used as part of that income yield. Some investments may not be readily realisable and it may be difficult to sell or realise those investments, similarly it may prove difficult for you to obtain reliable information about the value, or risks, to which such an investment is exposed.

This report may provide the addresses of, or contain hyperlinks to, websites. Except to the extent to which the report refers to website material of CS, CS has not reviewed the linked site and takes no responsibility for the content contained therein. Such address or hyperlink (including addresses or hyperlinks to CS's own website material) is provided solely for your convenience and information and the content of the linked site does not in any way form part of this document. Accessing such website or following such link through this report or CS's website shall be at your own risk.

This report is issued and distributed in Europe (except Switzerland) by Credit Suisse Securities (Europe) Limited, One Cabot Square, London E14 4QJ, England, which is regulated in the United Kingdom by The Financial Services Authority ("FSA"). This report is being distributed in Germany by Credit Suisse Securities (Europe) Limited Niederlassung Frankfurt am Main regulated by the Bundesanstalt fuer Finanzdienstleistungsaufsicht ("BaFin"). This report is being distributed in the United States by Credit Suisse Securities (USA) LLC ; in Switzerland by Credit Suisse AG; in Canada by Credit Suisse Securities (Canada), Inc.; in Brazil by Banco de Investimentos Credit Suisse (Brasil) S.A. or its affiliates; in Mexico by Banco Credit Suisse (México), S.A. (transactions related to the securities mentioned in this report will only be effected in compliance with applicable regulation); in Japan by Credit Suisse Securities (Japan) Limited, Financial Instrument Firm, Director-General of Kanto Local Finance Bureau (Kinsho) No. 66, a member of Japan Securities Dealers Association, The Financial Futures Association of Japan, Japan Securities Investment Advisers Association, Type II Financial Instruments Firms Association; elsewhere in Asia/Pacific by whichever of the following is the appropriately authorised entity in the relevant jurisdiction: Credit Suisse (Hong Kong) Limited, Credit Suisse Equities (Australia) Limited, Credit Suisse Securities (Thailand) Limited, Credit Suisse Securities (Malaysia) Sdn Bhd, Credit Suisse AG, Singapore Branch, Credit Suisse Securities (India) Private Limited regulated by the Securities and Exchange Board of India (registration Nos. INB230970637; INF230970637; INB010970631; INF010970631), having registered address at 9th Floor, Ceejay House, Dr.A.B. Road, Worli, Mumbai - 18, India, T- +91-22 6777 3777, Credit Suisse Securities (Europe) Limited, Seoul Branch, Credit Suisse AG, Taipei Securities Branch, PT Credit Suisse Securities Indonesia, Credit Suisse Securities (Philippines) Inc., and elsewhere in the world by the relevant authorised affiliate of the above. Research on Taiwanese securities produced by Credit Suisse AG, Taipei Securities Branch has been prepared by a registered Senior Business Person. Research provided to residents of Malaysia is authorised by the Head of Research for Credit Suisse Securities (Malaysia) Sdn. Bhd., to whom they should direct any queries on +603 2723 2020.

In jurisdictions where CS is not already registered or licensed to trade in securities, transactions will only be effected in accordance with applicable securities legislation, which will vary from jurisdiction to jurisdiction and may require that the trade be made in accordance with applicable exemptions from registration or licensing requirements. Non-U.S. customers wishing to effect a transaction should contact a CS entity in their local jurisdiction unless governing law permits otherwise. U.S. customers wishing to effect a transaction should do so only by contacting a representative at Credit Suisse Securities (USA) LLC in the U.S.

Please note that this report was originally prepared and issued by CS for distribution to their market professional and institutional investor customers. Recipients who are not market professional or institutional investor customers of CS should seek the advice of their independent financial advisor prior to taking any investment decision based on this report or for any necessary explanation of its contents. This research may relate to investments or services of a person outside of the UK or to other matters which are not regulated by the FSA or in respect of which the protections of the FSA for private customers and/or the UK compensation scheme may not be available, and further details as to where this may be the case are available upon request in respect of this report.

Any Nielsen Media Research material contained in this report represents Nielsen Media Research's estimates and does not represent facts. NMR has neither reviewed nor approved this report and/or any of the statements made herein.

If this report is being distributed by a financial institution other than Credit Suisse AG, or its affiliates, that financial institution is solely responsible for distribution. Clients of that institution should contact that institution to effect a transaction in the securities mentioned in this report or require further information. This report does not constitute investment advice by Credit Suisse to the clients of the distributing financial institution, and neither Credit Suisse AG, its affiliates, and their respective officers, directors and employees accept any liability whatsoever for any direct or consequential loss arising from their use of this report or its content.

### COMPANY UPDATE

## Finalizing funding for CH

- **Funding announcement:** Fortis Inc. announced an underwriter agreement for an 18.5m subscription receipt bought deal at C\$32.50 (~1.8% discount to the share price prior to announcement). Gross proceeds equate to roughly C\$601m before the 2.775m over-allotment option (C\$691m with the exercise of that option). As largely expected, the net proceeds will be used to fund a portion of the previously announced CH Energy Group Inc. acquisition for roughly US\$1.5 billion. Unlike some other offerings in the market, we believe this deal is likely better placed for a variety of reasons. Given the offering and some other factors, we believe the stock is likely to be somewhat range-bound until the closing of the acquisition.
- **Transaction timing:** Fortis expects the offering to close on or about 27 June 2012. Additionally, the company continues to expect the CH deal closes by the end of Q1 2013. In our view, Fortis will continue to be acquisitive and is well positioned to benefit from potential North American asset sales from selected Spanish companies (see the 23 April note for details).
- **Improving capital market conditions:** Historically, Fortis has been very adept at acquisitions. After the closing of the CH deal, we believe FTS is well positioned for additional opportunities. Fortis stated, "We remain disciplined and patient in our pursuit of additional electric and gas utility acquisitions in the United States and Canada that will add value for Fortis shareholders."
- **Valuation:** Our C\$34 target price and Neutral rating are obtained utilizing multiple valuation approaches, including: an 18.5x P/E multiple of 2013 earnings; a 1.7x book value multiple; and, a DCF-based valuation. We reiterate our Neutral rating.

### Share price performance

On 06/19/12 the S&P/TSX COMPS INDEX closed at 11736.

Quarterly EPS	Q1	Q2	Q3	Q4
2011A	0.65	0.33	0.26	0.45
2012E	0.62	0.32	0.27	0.51
2013E	0.72	0.32	0.28	0.53

## Disclosure Appendix

### Important Global Disclosures

I, Andrew M. Kuske, certify that (1) the views expressed in this report accurately reflect my personal views about all of the subject companies and securities and (2) no part of my compensation was, is or will be directly or indirectly related to the specific recommendations or views expressed in this report.

See the Companies Mentioned section for full company names.

### 3-Year Price, Target Price and Rating Change History Chart for FTS.TO

FTS.TO	Closing Price	Target Price	Initiation/
Date	(C\$)	(C\$)	Rating Assumption
1/25/10	28.5	30	
11/8/10	33.6	32	
2/10/11	33.81	34	
8/3/11	31.37		O
9/28/11	33.08		N

The analyst(s) responsible for preparing this research report received compensation that is based upon various factors including Credit Suisse's total revenues, a portion of which are generated by Credit Suisse's investment banking activities.

### Analysts' stock ratings are defined as follows:

**Outperform (O):** The stock's total return is expected to outperform the relevant benchmark\* by at least 10-15% (or more, depending on perceived risk) over the next 12 months.

**Neutral (N):** The stock's total return is expected to be in line with the relevant benchmark\* (range of  $\pm 10-15\%$ ) over the next 12 months.

**Underperform (U):** The stock's total return is expected to underperform the relevant benchmark\* by 10-15% or more over the next 12 months.

\*Relevant benchmark by region: As of 29<sup>th</sup> May 2009, Australia, New Zealand, U.S. and Canadian ratings are based on (1) a stock's absolute total return potential to its current share price and (2) the relative attractiveness of a stock's total return potential within an analyst's coverage universe\*\*, with Outperforms representing the most attractive, Neutrals the less attractive, and Underperforms the least attractive investment opportunities. Some U.S. and Canadian ratings may fall outside the absolute total return ranges defined above, depending on market conditions and industry factors. For Latin American, Japanese, and non-Japan Asia stocks, ratings are based on a stock's total return relative to the average total return of the relevant country or regional benchmark; for European stocks, ratings are based on a stock's total return relative to the analyst's coverage universe\*\*. For Australian and New Zealand stocks, 12-month rolling yield is incorporated in the absolute total return calculation and a 15% and a 7.5% threshold replace the 10-15% level in the Outperform and Underperform stock rating definitions, respectively. The 15% and 7.5% thresholds replace the +10-15% and -10-15% levels in the Neutral stock rating definition, respectively.

\*\*An analyst's coverage universe consists of all companies covered by the analyst within the relevant sector.

**Restricted (R):** In certain circumstances, Credit Suisse policy and/or applicable law and regulations preclude certain types of communications, including an investment recommendation, during the course of Credit Suisse's engagement in an investment banking transaction and in certain other circumstances.

**Volatility Indicator [V]:** A stock is defined as volatile if the stock price has moved up or down by 20% or more in a month in at least 8 of the past 24 months or the analyst expects significant volatility going forward.

### Analysts' coverage universe weightings are distinct from analysts' stock ratings and are based on the expected performance of an analyst's coverage universe\* versus the relevant broad market benchmark\*\*:

**Overweight:** Industry expected to outperform the relevant broad market benchmark over the next 12 months.

**Market Weight:** Industry expected to perform in-line with the relevant broad market benchmark over the next 12 months.

**Underweight:** Industry expected to underperform the relevant broad market benchmark over the next 12 months.

\*An analyst's coverage universe consists of all companies covered by the analyst within the relevant sector.

\*\*The broad market benchmark is based on the expected return of the local market index (e.g., the S&P 500 in the U.S.) over the next 12 months.

**Credit Suisse's distribution of stock ratings (and banking clients) is:**

Global Ratings Distribution		
Outperform/Buy*	48%	(59% banking clients)
Neutral/Hold*	41%	(56% banking clients)
Underperform/Sell*	9%	(51% banking clients)
Restricted	2%	

\*For purposes of the NYSE and NASD ratings distribution disclosure requirements, our stock ratings of Outperform, Neutral, and Underperform most closely correspond to Buy, Hold, and Sell, respectively; however, the meanings are not the same, as our stock ratings are determined on a relative basis. (Please refer to definitions above.) An investor's decision to buy or sell a security should be based on investment objectives, current holdings, and other individual factors.

Credit Suisse's policy is to update research reports as it deems appropriate, based on developments with the subject company, the sector or the market that may have a material impact on the research views or opinions stated herein.

Credit Suisse's policy is only to publish investment research that is impartial, independent, clear, fair and not misleading. For more detail please refer to Credit Suisse's Policies for Managing Conflicts of Interest in connection with Investment Research: [http://www.csfb.com/research-and-analytics/disclaimer/managing\\_conflicts\\_disclaimer.html](http://www.csfb.com/research-and-analytics/disclaimer/managing_conflicts_disclaimer.html)

Credit Suisse does not provide any tax advice. Any statement herein regarding any US federal tax is not intended or written to be used, and cannot be used, by any taxpayer for the purposes of avoiding any penalties.

See the Companies Mentioned section for full company names.

**Price Target:** (12 months) for (FTS.TO)

**Method:** We obtain our C\$34.00 target price for Fortis Inc. by using multiple valuation methodologies, yield base analysis, and discounted cash flow, all of which produce the C\$34.00 target. Our target price implies a P/E (price/earnings) multiple of 18.5x our 2013 EPS (earnings per share) estimate of C\$1.85 and an EV/EBITDA (enterprise value/earnings before interest, taxes, depreciation, and amortization) multiple of 10.3x our EBITDA estimate.

**Risks:** There are a number of risks to Fortis' achievement of our C\$34.00 target price: commodity prices; weather; environmental; regulatory; access to capital markets; and, interest rates. Moreover, one should never underestimate the power of the regulator in any regulated business.

Please refer to the firm's disclosure website at [www.credit-suisse.com/researchdisclosures](http://www.credit-suisse.com/researchdisclosures) for the definitions of abbreviations typically used in the target price method and risk sections.

See the Companies Mentioned section for full company names.

The subject company (FTS.TO) currently is, or was during the 12-month period preceding the date of distribution of this report, a client of Credit Suisse.

Credit Suisse provided non-investment banking services, which may include Sales and Trading services, to the subject company (FTS.TO) within the past 12 months.

Credit Suisse expects to receive or intends to seek investment banking related compensation from the subject company (FTS.TO) within the next 3 months.

Credit Suisse has received compensation for products and services other than investment banking services from the subject company (FTS.TO) within the past 12 months.

**Important Regional Disclosures**

Singapore recipients should contact a Singapore financial adviser for any matters arising from this research report.

An analyst involved in the preparation of this report has visited certain material operations of the subject company (FTS.TO) within the past 12 months. The analyst may not have visited all material operations of the subject company. The travel expenses of the analyst in connection with such visits were not paid or reimbursed by the subject company, other than de minimus local travel expenses.

Restrictions on certain Canadian securities are indicated by the following abbreviations: NVS--Non-Voting shares; RVS--Restricted Voting Shares; SVS--Subordinate Voting Shares.

Individuals receiving this report from a Canadian investment dealer that is not affiliated with Credit Suisse should be advised that this report may not contain regulatory disclosures the non-affiliated Canadian investment dealer would be required to make if this were its own report.

For Credit Suisse Securities (Canada), Inc.'s policies and procedures regarding the dissemination of equity research, please visit [http://www.csfb.com/legal\\_terms/canada\\_research\\_policy.shtml](http://www.csfb.com/legal_terms/canada_research_policy.shtml).

As of the date of this report, Credit Suisse acts as a market maker or liquidity provider in the equities securities that are the subject of this report.

Principal is not guaranteed in the case of equities because equity prices are variable.

Commission is the commission rate or the amount agreed with a customer when setting up an account or at anytime after that.

**Taiwanese Disclosures: This research report is for reference only. Investors should carefully consider their own investment risk. Investment results are the responsibility of the individual investor. Reports may not be reprinted without permission of CS. Reports written by Taiwan-based analysts on non-Taiwan listed companies are not considered recommendations to buy or sell securities under Taiwan Stock Exchange Operational Regulations Governing Securities Firms Recommending Trades in Securities to Customers.**

To the extent this is a report authored in whole or in part by a non-U.S. analyst and is made available in the U.S., the following are important disclosures regarding any non-U.S. analyst contributors:

The non-U.S. research analysts listed below (if any) are not registered/qualified as research analysts with FINRA. The non-U.S. research analysts listed below may not be associated persons of CSSU and therefore may not be subject to the NASD Rule 2711 and NYSE Rule 472 restrictions on communications with a subject company, public appearances and trading securities held by a research analyst account.

- Andrew M. Kuske, non-U.S. analyst, is a research analyst employed by Credit Suisse Securities (Canada), Inc..
- Paul Tan, non-U.S. analyst, is a research analyst employed by Credit Suisse Securities (Canada), Inc..

### FORECAST INCREASE

## A British Columbia Bolt On

- **Earnings review:** Fortis reported Q2 2012 headline EPS (FD) of C\$0.33, which was ahead of our C\$0.32 and inline with the Street's C\$0.33 view and within the C\$0.32-C\$0.34 range. In general, we believe Fortis continues to deliver rather consistent financial results from a largely regulated asset base. With the current regulatory process surrounding the CH Energy deal, we do not believe Fortis will be involved in major transactional activity until sometime after close. Notably, FTS announced negotiations for the Kelowna, BC electricity utility's ownership that is already operated by the company's BC-based business. We do not place undue emphasis on quarterly results as a result of the inherently long-cycle nature of many assets.
- **Significant organic growth continues:** Fortis continues to provide a rather robust capital expenditure outlook with guidance of C\$1.3bn for 2012. Additionally, Fortis' 5-year capex outlook continues to stand at C\$5.5bn. Eighty-six percent of that total amount is expected to go towards regulated utility activities that should deliver favourable risk adjusted returns.
- **Improving capital market conditions:** A large part of corporate growth has come from successfully acquiring and integrating assets. In our view, Fortis is well positioned in the current market for acquisition opportunities post completion of the CH Energy acquisition. FTS stated, "[w]e remain disciplined and patient in our pursuit of additional electric and gas utility acquisitions in the United States and Canada that will add value for Fortis shareholders".
- **Valuation:** We obtain our C\$38 target price from multiple valuation methods, but primarily rely upon a targeted dividend yield of 3.25%. We maintain our Outperform rating.

This research note is divided into three parts: (a) results; (b) outlook; and, (c) valuation. Each of these areas will be addressed in greater detail below.

## Results

Exhibit 1 highlights the segmented unadjusted earnings contributions for the most recent quarter and for the comparable period one year ago. Our commentary for each segment appears under the various headings below.

Results surpassed our estimate

### Exhibit 1: Segmented unadjusted earnings contribution

C\$ in millions, unless otherwise stated

	Q2 2012	Q2 2011	chg y/y
Regulated Gas Utilities - Canadian	13	15	-13%
Regulated Electric Utilities - Canadian	52	43	21%
Regulated Electric Utilities - Caribbean	6	6	0%
Non-regulated - Fortis Generation	5	2	150%
Non-regulated - Fortis Properties	8	8	0%
Corporate and other	(22)	(17)	-29%
Net earnings applicable to common shares	62	57	9%

Source: Company data and Credit Suisse

### Regulated Gas Utilities - Canadian

The unadjusted earnings for this segment decreased by roughly 13% year-over-year (see Exhibit 2). Some notable items for the regulated gas utilities include:

- Sales volumes for the quarter decreased for the residential and commercial, industrial segments, while there was a slight increase for the transportation segment.

### Exhibit 2: Regulated Gas Utilities (unadjusted)

	Q2 2012	Q2 2011	chg y/y
FortisBC Energy	13.0	15.0	-13%

Source: Company data and Credit Suisse

### Regulated Electric Utilities – Canadian

This segment includes operating companies like FortisAlberta, FortisBC Electric, Newfoundland Power and Other Canadian Electric Utilities, which includes Maritime Electric and FortisOntario. Detailed contributions for each of these divisions can be found in Exhibit 3.

### Exhibit 3: Regulated electric utilities – Canadian contribution (unadjusted)

C\$ in millions, unless otherwise stated

	Q2 2012	Q2 2011	chg y/y
FortisAlberta	26	18	44%
FortisBC Electric	9	9	0%
Newfoundland Power	12	10	20%
Other Cdn Electric Utilities	5	6	-17%
Earnings	52	43	21%

Source: Company data and Credit Suisse

### FortisAlberta

Earnings at this regulated utility were up comparing Q2 2012 versus the prior period. See Exhibit 4 for selected highlights.

**Exhibit 4: Selected FortisAlberta performance highlights (unadjusted)**

	Q2 2012	Q2 2011	chg y/y
Energy deliveries (GWh)	3,853	3,822	1%
Revenue (C\$/MWh)	28.55	26.95	6%
Operating expenses (C\$/MWh)	9.60	9.42	2%
Gross margin (C\$/MWh)	18.95	17.53	8%
Earnings (C\$millions)	26	18	44%

Source: Company data and Credit Suisse

Slight increase in energy delivery in Alberta

**FortisBC Electric**

Segmented earnings at FortisBC Electric remained flat compared to the same period last year.

See Exhibit 5 for selected highlights.

Slight decrease in energy deliveries in BC

**Exhibit 5: Selected FortisBC Electric performance highlights (unadjusted)**

	Q2 2012	Q2 2011	chg y/y
Energy deliveries (GWh)	676	682	-1%
Revenue (C\$/MWh)	99.11	95.31	4%
Energy supply costs (C\$/MWh)	19.23	16.13	19%
Operating expenses (C\$/MWh)	31.07	30.79	1%
Gross margin (C\$/MWh)	48.82	48.39	1%
Earnings (C\$millions)	9	9	0%

Source: Company data and Credit Suisse

**Newfoundland Power**

This segment's earnings gained by 20% when comparing Q2 2012 versus Q2 2011. Higher ROE and lower effective corporate taxes led to result in higher earnings. Energy deliveries were down by approximately 1% (see Exhibit 6).

Slight decrease in NP's energy deliveries

**Exhibit 6: Selected Newfoundland Power performance highlights (unadjusted)**

	Q2 2012	Q2 2011	chg y/y
Energy deliveries (GWh)	1,259	1,269	-1%
Revenue (C\$/MWh)	103.26	104.81	-1%
Energy supply costs (C\$/MWh)	61.95	63.04	-2%
Operating expenses (C\$/MWh)	13.50	13.40	1%
Gross margin (C\$/MWh)	27.80	28.37	-2%
Earnings (C\$millions)	12	10	20%

Source: Company data, Credit Suisse estimates

**Other Canadian Electric Utilities**

This segment's earning decreased by roughly 17% in Q2 2012 versus Q2 2011 primarily due to increased operating expenses at FortisOntario. The energy deliveries for the period were flat compared to Q2 2011. Exhibit 7 contains selected highlights.

Flat energy deliveries

**Exhibit 7: Selected Other Canadian Electric Utilities performance highlights (unadjusted)**

	Q2 2012	Q2 2011	chg y/y
Energy deliveries (GWh)	563	562	0%
Revenue (C\$/MWh)	145.65	138.79	5%
Energy supply costs (C\$/MWh)	90.59	83.63	8%

Gross margin (C\$/MWh)	33.75	35.59	-5%
Earnings (C\$millions)	5	6	-17%

Source: Company data and Credit Suisse

## Regulated Electric Utilities – Caribbean

This segment includes Belize Electricity (up to June 20, 2011), Caribbean Utilities, and Fortis Turks and Caicos. Earnings for this segment were flat in Q2 2012 versus the same quarter last year. Energy deliveries declined 52% for several reasons. In our view, Belize Electricity was not overly material to Fortis. Additionally, we anticipate the dispute to be resolved in a rational manner with Fortis recovering, at least, the rate base value. Yet, any such recovery may be over a period of time.

See Exhibit 8 below for selected highlights.

### Exhibit 8: Caribbean - Regulated Electric Utilities performance highlights (unadjusted)

	Q2 2012	Q2 2011	chg y/y
Energy deliveries (GWh)	184	383	-52%
Revenue (C\$/MWh)	364.13	221.93	64%
Energy supply costs (C\$/MWh)	211.96	138.38	53%
Operating expenses (C\$/MWh)	48.91	28.72	70%
Gross margin (C\$/MWh)	103.26	54.83	88%
Earnings (C\$millions)	6	6	0%

Source: Company data and Credit Suisse

## Non-regulated – Fortis Generation

The non-regulated generation assets within this segment are located in Belize, British Columbia, Central Newfoundland, Ontario and Upper New York State. Earnings for the segment were up 150% in Q2 2012 compared to the same quarter last year. Energy deliveries decreased by 3% from Q2 2011 to Q2 2012 due to decreased production in Upstate New York and in Ontario. Exhibit 9 provides selected highlights.

### Exhibit 9: Non-regulated generation – selected highlights

	Q2 2012	Q2 2011	chg y/y
Energy deliveries (GWh)	87	90	-3%
Revenue (C\$/MWh)	103.45	77.78	33%
Energy supply costs (C\$/MWh)	11.49	11.11	n/a
Operating expenses (C\$/MWh)	11.49	11.11	3%
Gross margin (C\$/MWh)	80.46	55.56	45%
Earnings (C\$millions)	5	2	150%

Source: Company data and Credit Suisse

## Non-regulated – Fortis Properties

Fortis Properties' net unadjusted earning contribution remained flat during the quarter. REVPAR increased by 2.4% to C\$85.56 on a year over year comparison. While, the occupancy rate of the Real Estate Division was down by 2.0%.

## Corporate

Corporate expenses increase by C\$5 million to C\$22 million in Q2 2012, when compared with last quarter during the same period.

## Outlook

We continue to believe investors, whether existing or prospective, should consider several major issues, including (a) funding organic growth; and (b) acquisition trail. Each of these issues is addressed below.

### Funding organic growth

In the most recent quarter the company's reported capital expenditures totaled C\$282 million, of which C\$215 million was spent at regulated utilities. Fortis guided that capital expenditures for 2012 will be roughly C\$1.3 billion. A majority of the total will be spent on

Ongoing organic growth

Western Canadian assets (FortisBC Energy, FortisAlberta, and FortisBC Electric). Fortis' consolidated gross capital expenditures expectations over the 5 year plan (2012-2016) stood at C\$5.5bn with 86% of that total amount being allocated to regulated utilities. Both FortisAlberta and FortisBC Electric will receive the vast majority of that amount; whereas, the regulated gas utilities are planned to receive 21% of the total capex amount, and 14% is allocated to non-regulated operations. Given the regulated rates of return with utility capital expenditures, the increases should be viewed as longer-term positives provided an appropriate financial balance is struck.

With the significant current relative valuation advantages, we believe that Fortis may become more motivated to explore possible capital efficiency initiatives. In our view, the company possesses ample opportunities to become much more capital efficient. One strategy involves divesting certain non-utility assets and redeploying capital into utility assets or funding the capital program. Another option would entail divesting partial interests in selected utility assets in an asset management model approach and receiving a management fee.

In fact, some of the media reports prior to the official announcement of PPL Corporation's acquisition of E.ON's Kentucky utility assets for US\$7.625 billion stated that a consortium led by Fortis Inc. was one of three finalists for those assets. We would regard that type of information in media reports as being something akin to an asset management style of approach. Ultimately, we believe that such a strategy would help Fortis generate a higher level of returns. Additionally, the use of an asset management type approach would make large acquisitions which could potentially further accelerate growth.

Opportunities for improved capital efficiency

Generally, we continue to prefer pure-play utility companies without an undue amount of non-core asset exposure. Historically, non-core assets (especially real estate) have been somewhat commonplace for many utilities. Fortis has been no exception to that approach. Notably, the mix of commercial and hospitality real estate assets held by Fortis have been positive contributors and also provide the company a bit of financial flexibility for a selection of reasons. In light of current market conditions, we believe there is a much less compelling case for the monetization of these assets than as in the past. We note Fortis Properties continues to increase in scale and scope which may eventually make it more attractive for acquisition or monetization. Yet, for a number of reasons, we continue to believe there is a rather low probability of either of those events occurring.

Even discounting the potential monetization of assets that we would consider to be non-core, we believe Fortis possesses considerable potential to become much more capital efficient. Given the significant interest in infrastructure assets by many investors seeking long-dated types of return, Fortis could easily divest portions of its existing asset base to pension fund investors and charge a management fee for their operational and management expertise. This type of approach could significantly improve capital efficiency and returns on capital. In addition, this asset management approach could also free-up capital that could be used to fund the existing capital program or fund future acquisitions.

Capital efficiency initiatives could aid funding of acquisitions or the existing capital program funding

### Acquisition trail

In our view, Fortis continues to demonstrate a rather impressive ability to successfully integrate acquisitions. Additionally, we view acquisitions as somewhat central to the company's growth strategy. Fortis is currently working towards to complete its acquisition of CH Energy Group (see "*Acquiring American assets*" on 21 February 2012), which it expects to occur by the end of Q1 2013. On 31 July 2012, on the company's Q2 2012 results, announced that they are in discussion with the City of Kelowna (British Columbia) to acquire the city's electricity distribution utility. No details were given, however, we don't believe the amount to be meaningful to Fortis Inc. We view Fortis management to continue to look to further grow in the US. The company's most recent Management Discussion and Analysis stated "We remain disciplined and patient in our pursuit of additional electric and gas utility acquisitions in the United States and Canada that will add value for Fortis shareholders". Fortis showed discipline in its acquisition strategy by not competing in a

bidding war for Central Vermont Service Corp. The company received a C\$17m termination fee. For further details see “A positive pass” published on 12 July 2011.

Given the success of Fortis in past transactions, as measured in terms of financials, share price and operationally, we believe the company's current valuation and skill set may lead to some potentially value creating acquisition activity (see Exhibit 10 below for select Fortis M&A transactions).

#### Exhibit 10: Selected Fortis M&A transactions

\$ in millions, unless otherwise stated

Announced Date	Asset/Company	Deal value (\$m)	Comment
2/21/2012	CH Energy Group	USD 1,500.00	Pending acquisition of NY State electric utility
7/22/2009	Caribbean Utilities Co.	CAD 6.74	Acquired an additional 2.7% of Caribbean Utilities Co.
6/23/2009	Great Lakes Power Distribution	CAD 68.00	Acquired from Brookfield the utility that serves the District of Algoma in northern Ontario.

8/31/1999	Brunswick Square Ltd.	CAD 10.12	Acquired 50% of the company by Fortis Properties.
1/31/1999	Mount Peyton	CAD 2.20	Acquired all common shares and notes payable.
	Total USD	USD 1,565.50	
	Total CAD	CAD 6,214.48	

Source: Bloomberg, Company data and Credit Suisse

In terms of acquisitions, we believe Fortis has a few advantages over others, including:

- Fortis has growing expertise with both electric and gas utilities;
- Larger size will allow it to look at a larger spectrum of potential target companies;
- A proven ability to effectively integrate acquisitions;
- A rather strong appetite for yield oriented securities in Canada;
- The potential ability to support a transaction with pension fund capital;
- Canada's rather benign interest rate environment; and,
- Bought deal financing commonly employed in Canada.

Fortis possesses a number of absolute and relative advantages over some other competitors

Historically, Fortis has been very adept at acquisitions. Corporate growth has benefited from the company's ability to successfully acquire and integrate selected assets.

## Valuation

We continue to believe that Fortis has strong organic growth in key areas such as British Columbia, Alberta and the Caribbean. After the quarter, we revised our EPS estimates for 2012 to C\$1.73 from C\$1.72. Our Outperform rating and C\$38.00 target price is obtained

Rating: Outperform  
Target: C\$38

from multiple valuation methods, but primarily rely upon a targeted dividend yield of 3.25%. We reiterate our Outperform rating. Some historical Fortis valuation parameters appear in Exhibit 11 below generated by Credit Suisse RAVE.

## Disclosure Appendix

### Important Global Disclosures

I, Andrew M. Kuske, certify that (1) the views expressed in this report accurately reflect my personal views about all of the subject companies and securities and (2) no part of my compensation was, is or will be directly or indirectly related to the specific recommendations or views expressed in this report.

See the *Companies Mentioned* section for full company names.

### 3-Year Price, Target Price and Rating Change History Chart for FTS.TO

The analyst(s) responsible for preparing this research report received compensation that is based upon various factors including Credit Suisse's total revenues, a portion of which are generated by Credit Suisse's investment banking activities.

### Analysts' stock ratings are defined as follows:

**Outperform (O):** The stock's total return is expected to outperform the relevant benchmark\* by at least 10-15% (or more, depending on perceived risk) over the next 12 months.

**Neutral (N):** The stock's total return is expected to be in line with the relevant benchmark\* (range of  $\pm 10-15\%$ ) over the next 12 months.

**Underperform (U):** The stock's total return is expected to underperform the relevant benchmark\* by 10-15% or more over the next 12 months.

\*Relevant benchmark by region: As of 29<sup>th</sup> May 2009, Australia, New Zealand, U.S. and Canadian ratings are based on (1) a stock's absolute total return potential to its current share price and (2) the relative attractiveness of a stock's total return potential within an analyst's coverage universe\*\*, with Outperforms representing the most attractive, Neutrals the less attractive, and Underperforms the least attractive investment opportunities. Some U.S. and Canadian ratings may fall outside the absolute total return ranges defined above, depending on market conditions and industry factors. For Latin American, Japanese, and non-Japan Asia stocks, ratings are based on a stock's total return relative to the average total return of the relevant country or regional benchmark; for European stocks, ratings are based on a stock's total return relative to the analyst's coverage universe\*\*. For Australian and New Zealand stocks, 12-month rolling yield is incorporated in the absolute total return calculation and a 15% and a 7.5% threshold replace the 10-15% level in the Outperform and Underperform stock rating definitions, respectively. The 15% and 7.5% thresholds replace the +10-15% and -10-15% levels in the Neutral stock rating definition, respectively.

\*\*An analyst's coverage universe consists of all companies covered by the analyst within the relevant sector.

**Restricted (R):** In certain circumstances, Credit Suisse policy and/or applicable law and regulations preclude certain types of communications, including an investment recommendation, during the course of Credit Suisse's engagement in an investment banking transaction and in certain other circumstances.

**Volatility Indicator [V]:** A stock is defined as volatile if the stock price has moved up or down by 20% or more in a month in at least 8 of the past 24 months or the analyst expects significant volatility going forward.

### Analysts' coverage universe weightings are distinct from analysts' stock ratings and are based on the expected performance of an analyst's coverage universe\* versus the relevant broad market benchmark\*\*:

**Overweight:** Industry expected to outperform the relevant broad market benchmark over the next 12 months.

**Market Weight:** Industry expected to perform in-line with the relevant broad market benchmark over the next 12 months.

**Underweight:** Industry expected to underperform the relevant broad market benchmark over the next 12 months.

\*An analyst's coverage universe consists of all companies covered by the analyst within the relevant sector.

\*\*The broad market benchmark is based on the expected return of the local market index (e.g., the S&P 500 in the U.S.) over the next 12 months.

### Credit Suisse's distribution of stock ratings (and banking clients) is:

Global Ratings Distribution		
Outperform/Buy*	46%	(59% banking clients)
Neutral/Hold*	42%	(55% banking clients)
Underperform/Sell*	10%	(48% banking clients)

**Restricted**

2%

*\*For purposes of the NYSE and NASD ratings distribution disclosure requirements, our stock ratings of Outperform, Neutral, and Underperform most closely correspond to Buy, Hold, and Sell, respectively; however, the meanings are not the same, as our stock ratings are determined on a relative basis. (Please refer to definitions above.) An investor's decision to buy or sell a security should be based on investment objectives, current holdings, and other individual factors.*

Credit Suisse's policy is to update research reports as it deems appropriate, based on developments with the subject company, the sector or the market that may have a material impact on the research views or opinions stated herein.

Credit Suisse's policy is only to publish investment research that is impartial, independent, clear, fair and not misleading. **Price Target:** (12 months) for (FTS.TO)

**Method:** We obtain our C\$38.00 target price for Fortis Inc. by using multiple valuation methodologies, but primarily rely upon a targeted dividend yield of 3.25% and an imputed 125 bps spread over a 2% Canadian 10-year bond yield.

**Risks:** There are a number of risks to Fortis' achievement of our C\$38.00 target price: commodity prices; weather; environmental; regulatory; access to capital markets; and, interest rates. Moreover, one should never underestimate the power of the regulator in any regulated business.

Please refer to the firm's disclosure website at [www.credit-suisse.com/researchdisclosures](http://www.credit-suisse.com/researchdisclosures) for the definitions of abbreviations typically used in the target price method and risk sections.

*See the Companies Mentioned section for full company names.*

The subject company (FTS.TO) currently is, or was during the 12-month period preceding the date of distribution of this report, a client of Credit Suisse.

Credit Suisse provided non-investment banking services, which may include Sales and Trading services, to the subject company (FTS.TO) within the past 12 months.

Credit Suisse expects to receive or intends to seek investment banking related compensation from the subject company (FTS.TO) within the next 3 months.

Credit Suisse has received compensation for products and services other than investment banking services from the subject company (FTS.TO) within the past 12 months.

**Important Regional Disclosures**

Singapore recipients should contact a Singapore financial adviser for any matters arising from this research report.

An analyst involved in the preparation of this report has visited certain material operations of the subject company (FTS.TO) within the past 12 months. The analyst may not have visited all material operations of the subject company. The travel expenses of the analyst in connection with such visits were not paid or reimbursed by the subject company, other than de minimus local travel expenses.

Restrictions on certain Canadian securities are indicated by the following abbreviations: NVS--Non-Voting shares; RVS--Restricted Voting Shares; SVS--Subordinate Voting Shares.

Individuals receiving this report from a Canadian investment dealer that is not affiliated with Credit Suisse should be advised that this report may not contain regulatory disclosures the non-affiliated Canadian investment dealer would be required to make if this were its own report.

For Credit Suisse Securities (Canada), Inc.'s policies and procedures regarding the dissemination of equity research, please visit [http://www.csfb.com/legal\\_terms/canada\\_research\\_policy.shtml](http://www.csfb.com/legal_terms/canada_research_policy.shtml).

As of the date of this report, Credit Suisse acts as a market maker or liquidity provider in the equities securities that are the subject of this report.

Principal is not guaranteed in the case of equities because equity prices are variable.

Commission is the commission rate or the amount agreed with a customer when setting up an account or at anytime after that.

**Taiwanese Disclosures: This research report is for reference only. Investors should carefully consider their own investment risk. Investment results are the responsibility of the individual investor. Reports may not be reprinted without permission of CS. Reports written by Taiwan-based analysts on non-Taiwan listed companies are not considered recommendations to buy or sell securities under Taiwan Stock Exchange Operational Regulations Governing Securities Firms Recommending Trades in Securities to Customers.**

To the extent this is a report authored in whole or in part by a non-U.S. analyst and is made available in the U.S., the following are important disclosures regarding any non-U.S. analyst contributors:

Disclaimers continue on next page.

This report is not directed to, or intended for distribution to or use by, any person or entity who is a citizen or resident of or located in any locality, state, country or other jurisdiction where such distribution, publication, availability or use would be contrary to law or regulation or which would subject Credit Suisse AG, the Swiss bank, or its subsidiaries or its affiliates ("CS") to any registration or licensing requirement within such jurisdiction. All material presented in this report, unless specifically indicated otherwise, is under copyright to CS. None of the material, nor its content, nor any copy of it, may be altered in any way, transmitted to, copied or distributed to any other party, without the prior express written permission of CS. All trademarks, service marks and logos used in this report are trademarks or service marks or registered trademarks or service marks of CS or its affiliates.

The information, tools and material presented in this report are provided to you for information purposes only and are not to be used or considered as an offer or the solicitation of an offer to sell or to buy or subscribe for securities or other financial instruments. CS may not have taken any steps to ensure that the securities referred to in this report are suitable for any particular investor. CS will not treat recipients as its customers by virtue of their receiving the report. The investments or services contained or referred to in this report may not be suitable for you and it is recommended that you consult an independent investment advisor if you are in doubt about such investments or investment services. Nothing in this report constitutes investment, legal, accounting or tax advice or a representation that any investment or strategy is suitable or appropriate to your individual circumstances or otherwise constitutes a personal recommendation to you. CS does not offer advice on the tax consequences of investment and you are advised to contact an independent tax adviser. Please note in particular that the bases and levels of taxation may change.

CS believes the information and opinions in the Disclosure Appendix of this report are accurate and complete. Information and opinions presented in the other sections of the report were obtained or derived from sources CS believes are reliable, but CS makes no representations as to their accuracy or completeness. Additional information is available upon request. CS accepts no liability for loss arising from the use of the material presented in this report, except that this exclusion of liability does not apply to the extent that liability arises under specific statutes or regulations applicable to CS. This report is not to be relied upon in substitution for the exercise of independent judgment. CS may have issued, and may in the future issue, a trading call regarding this security. Trading calls are short term trading opportunities based on market events and catalysts, while stock ratings reflect investment recommendations based on expected total return over a 12-month period as defined in the disclosure section. Because trading calls and stock ratings reflect different assumptions and analytical methods, trading calls may differ directionally from the stock rating. In addition, CS may have issued, and may in the future issue, other reports that are inconsistent with, and reach different conclusions from, the information presented in this report. Those reports reflect the different assumptions, views and analytical methods of the analysts who prepared them and CS is under no obligation to ensure that such other reports are brought to the attention of any recipient of this report. CS is involved in many businesses that relate to companies mentioned in this report. These businesses include specialized trading, risk arbitrage, market making, and other proprietary trading.

Past performance should not be taken as an indication or guarantee of future performance, and no representation or warranty, express or implied, is made regarding future performance. Information, opinions and estimates contained in this report reflect a judgement at its original date of publication by CS and are subject to change without notice. The price, value of and income from any of the securities or financial instruments mentioned in this report can fall as well as rise. The value of securities and financial instruments is subject to exchange rate fluctuation that may have a positive or adverse effect on the price or income of such securities or financial instruments. Investors in securities such as ADR's, the values of which are influenced by currency volatility, effectively assume this risk.

Structured securities are complex instruments, typically involve a high degree of risk and are intended for sale only to sophisticated investors who are capable of understanding and assuming the risks involved. The market value of any structured security may be affected by changes in economic, financial and political factors (including, but not limited to, spot and forward interest and exchange rates), time to maturity, market conditions and volatility, and the credit quality of any issuer or reference issuer. Any investor interested in purchasing a structured product should conduct their own investigation and analysis of the product and consult with their own professional advisers as to the risks involved in making such a purchase.

Some investments discussed in this report have a high level of volatility. High volatility investments may experience sudden and large falls in their value causing losses when that investment is realised. Those losses may equal your original investment. Indeed, in the case of some investments the potential losses may exceed the amount of initial investment, in such circumstances you may be required to pay more money to support those losses. Income yields from investments may fluctuate and, in consequence, initial capital paid to make the investment may be used as part of that income yield. Some investments may not be readily realisable and it may be difficult to sell or realise those investments, similarly it may prove difficult for you to obtain reliable information about the value, or risks, to which such an investment is exposed.

### FORECAST REDUCTION

## Waiting for close

- **Earnings review:** Fortis reported Q3 2012 headline EPS (FD) of C\$0.24, which missed our C\$0.26 and the Street's C\$0.257 view and below the C\$0.25-C\$0.26 range. Versus our numbers, the miss was centered around some F/X moves and CH acquisition-related expenses totaling US\$3.5m. In general, we believe Fortis continues to deliver rather consistent financial results from a largely regulated asset base. With the current regulatory process surrounding the CH Energy deal, we do not believe Fortis will be involved in major transactional activity until well after close. We do not place undue emphasis on quarterly results as a result of the inherently long-cycle nature of many assets.
- **Significant organic growth continues:** Fortis continues to provide a rather robust capital expenditure outlook with guidance of C\$1.3bn for 2012. Additionally, Fortis' 5-year capex outlook continues to stand at C\$5.5bn. Of note, CH Energy could add another C\$0.5bn to that figure upon close. In our view, there is meaningful transmission upside from CH over the longer-term. Eighty-seven percent of the capex plan is expected to go towards regulated utility activities that should deliver favourable risk adjusted returns.
- **Improving capital market conditions:** A large part of corporate growth has come from successfully acquiring and integrating assets. In our view, Fortis is well positioned in the current market for acquisition opportunities post completion of the CH Energy acquisition.
- **Valuation:** We obtain our C\$38 target price from multiple valuation methods, but primarily rely upon a targeted dividend yield of 3.25%. We maintain our Outperform rating.

### Share price performance

**DISCLOSURE APPENDIX CONTAINS IMPORTANT DISCLOSURES, ANALYST CERTIFICATIONS, INFORMATION ON TRADE ALERTS, ANALYST MODEL PORTFOLIOS AND THE STATUS OF NON-U.S. ANALYSTS.** US Disclosure: Credit Suisse does and seeks to do business with companies covered in its research reports. As a result, investors should be aware that the Firm may have a conflict of interest that could affect the objectivity of this report. Investors should consider this report as only a single factor in making their investment decision.

This research note is divided into three parts: (a) results; (b) outlook; and, (c) valuation. Each of these areas will be addressed in greater detail below.

## Results

Exhibit 1 highlights the segmented unadjusted earnings contributions for the most recent quarter and for the comparable period one year ago. Our commentary for each segment appears under the various headings below.

Results missed our estimate

### Exhibit 1: Segmented unadjusted earnings contribution

C\$ in millions, unless otherwise stated

	Q3 2012	Q3 2011	chg y/y
Regulated Gas Utilities - Canadian	(6)	(4)	-50%
Regulated Electric Utilities - Canadian	54	43	26%
Regulated Electric Utilities - Caribbean	7	6	17%
Non-regulated - Fortis Generation	5	8	-38%
Non-regulated - Fortis Properties	8	9	-11%
Corporate and other	(23)	(6)	-283%
Net earnings applicable to common shares	45	56	-20%

Source: Company data and Credit Suisse

### Regulated Gas Utilities - Canadian

The unadjusted earnings for this segment decreased by roughly 50% year-over-year (see Exhibit 2). Some notable items for the regulated gas utilities include:

- Sales volumes for the quarter increased by roughly 13% due to higher gas transportation volumes to industrial customers, primarily from customers switching to natural gas from other fuel sources.

### Exhibit 2: Regulated Gas Utilities (unadjusted)

	Q3 2012	Q3 2011	chg y/y
FortisBC Energy	(6.0)	(4.0)	-50%

Source: Company data and Credit Suisse

### Regulated Electric Utilities – Canadian

This segment includes operating companies like FortisAlberta, FortisBC Electric, Newfoundland Power and Other Canadian Electric Utilities, which includes Maritime Electric and FortisOntario. Detailed contributions for each of these divisions can be found in Exhibit 3.

### Exhibit 3: Regulated electric utilities – Canadian contribution (unadjusted)

C\$ in millions, unless otherwise stated

	Q3 2012	Q3 2011	chg y/y
FortisAlberta	26	19	37%
FortisBC Electric	13	10	30%
Newfoundland Power	9	8	13%
Other Cdn Electric Utilities	6	6	0%
Earnings	54	43	26%

Source: Company data and Credit Suisse

### FortisAlberta

Earnings at this regulated utility were up comparing Q3 2012 versus the prior period due to the distribution revenue requirements decisions received in April 2012; rate base growth from continued investment in the asset; and timing of operating expenses in 2012. See Exhibit 4 for selected highlights.

**Exhibit 4: Selected FortisAlberta performance highlights (unadjusted)**

	Q3 2012	Q3 2011	chg y/y
Energy deliveries (GWh)	4,099	3,911	5%
Revenue (C\$/MWh)	28.54	26.34	8%
Operating expenses (C\$/MWh)	9.76	8.95	9%
Gross margin (C\$/MWh)	18.79	17.39	8%
Earnings (C\$millions)	26	19	37%

Source: Company data and Credit Suisse

Increase in energy delivery  
in Alberta

**FortisBC Electric**

Segmented earnings at FortisBC Electric increased compared to the same period last year due primarily to rate base growth; higher pole-attachment revenues and lower than expected finance charges.

Increase in energy  
deliveries in BC

See Exhibit 5 for selected highlights.

**Exhibit 5: Selected FortisBC Electric performance highlights (unadjusted)**

	Q3 2012	Q3 2011	chg y/y
Energy deliveries (GWh)	728	713	2%
Revenue (C\$/MWh)	97.53	93.97	4%
Energy supply costs (C\$/MWh)	21.98	21.04	4%
Operating expenses (C\$/MWh)	27.47	26.65	3%
Gross margin (C\$/MWh)	48.08	46.28	4%
Earnings (C\$millions)	13	10	30%

Source: Company data and Credit Suisse

**Newfoundland Power**

This segment's earnings gained by 13% when comparing Q3 2012 versus Q3 2011. Higher ROE, lower effective corporate taxes and electricity sales growth led to higher earnings. Energy deliveries were up by approximately 2% (see Exhibit 6).

Increase in NP's energy  
deliveries

**Exhibit 6: Selected Newfoundland Power performance highlights (unadjusted)**

	Q3 2012	Q3 2011	chg y/y
Energy deliveries (GWh)	940	923	2%
Revenue (C\$/MWh)	106.38	109.43	-3%
Energy supply costs (C\$/MWh)	57.45	56.34	2%
Operating expenses (C\$/MWh)	18.09	18.42	-2%
Gross margin (C\$/MWh)	30.85	34.67	-11%
Earnings (C\$millions)	9	8	13%

Source: Company data, Credit Suisse estimates

**Other Canadian Electric Utilities**

This segment's earnings were flat when comparing Q3 2012 versus Q3 2011. The energy deliveries for the period were up compared to Q3 2011. Exhibit 7 contains selected highlights.

Increased energy deliveries

**Exhibit 7: Selected Other Canadian Electric Utilities performance highlights (unadjusted)**

	Q3 2012	Q3 2011	chg y/y
Energy deliveries (GWh)	595	582	2%
Revenue (C\$/MWh)	152.94	149.48	2%
Energy supply costs (C\$/MWh)	99.16	96.22	3%
Operating expenses (C\$/MWh)	18.49	18.90	-2%
Gross margin (C\$/MWh)	35.29	34.36	3%
Earnings (C\$millions)	6	6	0%

Source: Company data and Credit Suisse

**Regulated Electric Utilities – Caribbean**

This segment includes Belize Electricity (up to June 20, 2011), Caribbean Utilities, and Fortis Turks and Caicos. Earnings for this segment were up in Q3 2012 versus the same quarter last year. Energy deliveries were flat. In our view, Belize Electricity was not overly material to Fortis. Additionally, we anticipate the dispute to be resolved in a rational manner with Fortis recovering, at least, the rate base value. Yet, any such recovery may be over a period of time. Notably, the company's MD&A contained a very useful account of the interaction with the Government of Belize and Fortis in relation to this utility asset.

Very useful account of the Belize situation in the MD&A

See Exhibit 8 below for selected highlights.

**Exhibit 8: Caribbean - Regulated Electric Utilities performance highlights (unadjusted)**

	Q3 2012	Q3 2011	chg y/y
Energy deliveries (GWh)	197	197	0%
Revenue (C\$/MWh)	365.48	375.63	-3%
Energy supply costs (C\$/MWh)	228.43	238.58	-4%
Operating expenses (C\$/MWh)	35.53	45.69	-22%
Gross margin (C\$/MWh)	101.52	91.37	11%
Earnings (C\$millions)	7	6	17%

Source: Company data and Credit Suisse

**Non-regulated – Fortis Generation**

The non-regulated generation assets within this segment are located in Belize, British Columbia, Central Newfoundland, Ontario and Upper New York State. Earnings for the segment were down 38% in Q3 2012 compared to the same quarter last year. Energy deliveries decreased by 27% from Q3 2011 to Q3 2012 due to decreased production in Upstate New York and in Belize from lower rainfall. Exhibit 9 provides selected highlights.

**Exhibit 9: Non-regulated generation – selected highlights**

	Q3 2012	Q3 2011	chg y/y
Energy deliveries (GWh)	81	111	-27%
Revenue (C\$/MWh)	98.77	99.10	0%
Operating expenses (C\$/MWh)	24.69	18.02	37%
Gross margin (C\$/MWh)	74.07	81.08	-9%
Earnings (C\$millions)	5	8	-38%

Source: Company data and Credit Suisse

**Non-regulated – Fortis Properties**

Fortis Properties' net unadjusted earning contribution was down 11.1% during the quarter. REVPAR decreased by 0.8% to C\$94.04 on a year over year comparison. While, the occupancy rate of the Real Estate Division was down by 2.5%.

**Corporate**

Corporate expenses increased by C\$17 million to C\$23 million in Q3 2012, when compared with last quarter during the same period.

## Outlook

We continue to believe investors, whether existing or prospective, should consider several major issues, including (a) funding organic growth; and (b) acquisition trail. Each of these issues is addressed below.

### Funding organic growth

In the most recent quarter the company's reported capital expenditures totaled C\$283 million, of which C\$235 million was spent at regulated utilities. Fortis guided that capital expenditures for 2012 will be roughly C\$1.3 billion. A majority of the total will be spent on Western Canadian assets (FortisBC Energy, FortisAlberta, and FortisBC Electric). Fortis' consolidated gross capital expenditures expectations over the 5 year plan (2012-2016) stood at C\$5.5bn with 87% of that total amount being allocated to regulated utilities. Both FortisAlberta and FortisBC Electric will receive the vast majority of that amount; whereas, the regulated gas utilities are planned to receive 23% of the total capex amount, and 13% is allocated to non-regulated operations. Given the regulated rates of return with utility capital expenditures, the increases should be viewed as longer-term positives provided an appropriate financial balance is struck.

Ongoing organic growth

With the significant current relative valuation advantages, we believe that Fortis may become more motivated to explore possible capital efficiency initiatives. In our view, the company possesses ample opportunities to become much more capital efficient. One strategy involves divesting certain non-utility assets and redeploying capital into utility assets or funding the capital program. Another option would entail divesting partial interests in selected utility assets in an asset management model approach and receiving a management fee.

In fact, some of the media reports prior to the official announcement of PPL Corporation's acquisition of E.ON's Kentucky utility assets for US\$7.625 billion stated that a consortium led by Fortis Inc. was one of three finalists for those assets. We would regard that type of information in media reports as being something akin to an asset management style of approach. Ultimately, we believe that such a strategy would help Fortis generate a higher level of returns. Additionally, the use of an asset management type approach would make large acquisitions which could potentially further accelerate growth.

Opportunities for improved capital efficiency

Generally, we continue to prefer pure-play utility companies without an undue amount of non-core asset exposure. Historically, non-core assets (especially real estate) have been somewhat commonplace for many utilities. Fortis has been no exception to that approach. Notably, the mix of commercial and hospitality real estate assets held by Fortis have been positive contributors and also provide the company a bit of financial flexibility for a selection of reasons. We note Fortis Properties continues to increase in scale and scope which may eventually make it more attractive for acquisition or monetization. Yet, for a number of reasons, we continue to believe there is a rather low probability of either of those events occurring.

Even discounting the potential monetization of assets that we would consider to be non-core, we believe Fortis possesses considerable potential to become much more capital efficient. Given the significant interest in infrastructure assets by many investors seeking long-dated types of return, Fortis could easily divest portions of its existing asset base to pension fund investors and charge a management fee for their operational and management expertise. This type of approach could significantly improve capital efficiency and returns on capital. In addition, this asset management approach could also free-up capital that could be used to fund the existing capital program or fund future acquisitions.

Capital efficiency initiatives could aid funding of acquisitions or the existing capital program funding

### Acquisition trail

In our view, Fortis continues to demonstrate a rather impressive ability to successfully integrate acquisitions. We view acquisitions as central to the company's growth strategy. Fortis is currently working towards to complete the acquisition of CH Energy Group (see

“Acquiring American assets” on 21 February 2012) by the end of Q1 2013. Several smaller scale acquisitions were also completed in the quarter, but we view Fortis management to continue to look to further grow in the US utility sector. That acquisition based strategy will come with a significant amount of discipline as exhibited on past deals. The company's most recent Management Discussion and Analysis stated “Fortis remains disciplined and patient in its pursuit of additional electric and gas utility acquisitions in the United States and Canada that will add value for Fortis shareholders. Fortis will also pursue growth in its non-regulated businesses in support of its regulated utility growth strategy.”

Given the success of Fortis in past transactions, as measured in terms of financials, share price and operationally, we believe the company's current valuation and skill set may lead to some potentially value creating acquisition activity (see Exhibit 10 below for select Fortis M&A transactions).

#### Exhibit 10: Selected Fortis M&A transactions

\$ in millions, unless otherwise stated

Announced Date	Asset/Company	Deal value (\$m)	Comment
10/1/2012	StationPark All Suite Hotel	CAD 13.00	Acquire 126-room hotel in London, Ontario
9/13/2012	Electric utility assets from City of Kelowna	CAD 55.00	Pending purchase electric utility assets that serve 15,000 customers expect close Q1'13
8/31/2012	Turks and Caicos Utilities Limited	CAD 13.00	Purchased regulated electric utility with a 50-year licence expiring in 2036
4/1/2012	Distribution asset of the City of Port Colborne	CAD 7.00	Purchased electricity distribution assets in Port Colborne
2/21/2012	CH Energy Group	USD 1,500.00	Pending acquisition of NY State electric utility
7/22/2009	Caribbean Utilities Co.	CAD 6.74	Acquired an additional 2.7% of Caribbean Utilities Co.
6/23/2009	Great Lakes Power Distribution	CAD 68.00	Acquired from Brookfield the utility that serves the District of Algoma in northern Ontario.
10/1/2008	Grimsby Power Inc.	CAD 1.10	Acquired a 10% minority interest.
10/1/2008	Caribbean Utilities Co.	CAD 3.00	Acquired an additional 1% of Caribbean Utilities Co.
8/15/2008	Caribbean Utilities Co.	CAD 25.00	Acquired an additional 2% of Caribbean Utilities Co.
7/23/2007	Delta Regina	CAD 49.95	Delta hotel located in Regina, Saskatchewan.
2/26/2007	Terasen Inc.	CAD 3,700.00	Gas distribution in British Columbia.
11/7/2006	Caribbean Utilities Co.	CAD 55.70	Acquired an additional 16% of Caribbean Utilities Co.
10/19/2006	4 hotels in western Canada	CAD 51.60	4 hotels (Holiday Inn, Best Western and Ramada) located in BC and Alberta.
8/28/2006	PPC Ltd & Atlantic Equipment & Power (Turks & Caicos) Ltd.	CAD 97.70	Electric utility that services ~80% of the Turks and Caicos Islands.
1/25/2005	3 hotels in western Canada	CAD 62.60	3 hotels in Western Canada from Greenwood Inns (Calgary, Edmonton and Winnipeg).
12/15/2004	Princeton Light & Power	CAD 3.70	PLP is an electric utility that services Princeton, BC.
5/21/2004	Belize Electric Company Ltd.	USD 3.50	Acquired the remaining 5% interest of the company.
9/17/2003	4 hotels in Ontario	CAD 43.20	4 hotels located in Ontario (Cambridge, Kitchener, Sarnia and Peterborough).
9/15/2003	Alberta Utility & British Columbia Utility (from Aquila)	CAD 1,500.00	BC and Alberta units of Aquila Inc.
2/26/2003	Granite Power Corp	CAD 8.80	Company consist of Granite Power Distribution & Granite Power Generation.
1/30/2003	Caribbean Utilities Co.	CAD 71.00	Acquired additional 3,863,695 Class A Ordinary Shares, representing approximately 15.9 per cent of the outstanding shares of the company and increased Fortis' holding to roughly 38%.
12/1/2002	Delta St John's Hotel and conference centre	CAD 25.90	Hotel in downtown St. John's, Newfoundland

4/16/2002	Kings Place	CAD 27.70	Commercial property in Fredericton, NB.
3/13/2002	Caribbean Utilities Co.	CAD 12.90	Acquired additional ~2% of the company.
3/20/2002	Niagara Power Co.	CAD 49.00	Purchase remaining 50% of Niagara Power Co.
2/1/2002	Cabot palace I	CAD 14.30	133,327 Square feet premium office tower in St. John's, Newfoundland
9/18/2001	Portfolio of properties in St. John's	CAD 8.30	Purchased TD Place commercial bldg and 6 parcels of land.
9/14/2001	Aliant Poles	CAD 46.00	Purchased 102,000 poles and related infrastructure from Aliant Telecom.
1/26/2001	Belize Electric Company Ltd.	USD 62.00	Acquired 95% of company from Duke Energy.
12/19/2000	2 Hydro generating stations	CAD 6.90	2 generating stations (6.88MW) in upper New York state.
12/14/2000	Brunswick Square Ltd.	CAD 6.20	Acquired 50% of the company Fortis doesn't own.
12/1/2000	Fort William Building and Blue cross centre	CAD 52.70	Fort William building in St. John's, Newfoundland and Blue cross centre in Moncton, New Brunswick.
2/23/2000	Caribbean Utilities Co.	CAD 79.90	Acquired 20% of the company.
12/30/1999	2 Hydro generating stations	CAD 19.77	2 generating stations (16MW) in upper New York state (Moose River & Philadelphia)
10/28/1999	Belize Electricity Ltd.	CAD 36.80	Acquired 67% interest in the main commercial generator, transmitter & distributor of electricity in Belize.
8/31/1999	Brunswick Square Ltd.	CAD 10.12	Acquired 50% of the company by Fortis Properties.
1/31/1999	Mount Peyton	CAD 2.20	Acquired all common shares and notes payable.
	Total USD	USD 1,565.50	
	Total CAD	CAD 6,234.48	

Source: Bloomberg, Company data and Credit Suisse

In terms of acquisitions, we believe Fortis has a few advantages over others, including:

- Fortis has growing expertise with both electric and gas utilities;
- Larger size will allow it to look at a larger spectrum of potential target companies;
- A proven ability to effectively integrate acquisitions;
- A rather strong appetite for yield oriented securities in Canada;
- The potential ability to support a transaction with pension fund capital;
- Canada's rather benign interest rate environment; and,

Fortis possesses a number of absolute and relative advantages over some other competitors

- Bought deal financing commonly employed in Canada.

Historically, Fortis has been very adept at acquisitions. Corporate growth has benefited from the company's ability to successfully acquire and integrate selected assets.

## Valuation

We continue to believe that Fortis has strong organic growth in key areas such as British Columbia, Alberta and the Caribbean. After the quarter, we revised our EPS estimates for 2012 to C\$1.72 from C\$1.73. Our Outperform rating and C\$38.00 target price is obtained from multiple valuation methods, but primarily rely upon a targeted dividend yield of 3.25%. We reiterate our Outperform rating. Some historical Fortis valuation parameters appear in Exhibit 11 below generated by Credit Suisse RAVE.

Rating: Outperform

Target: C\$38

\* Asterisk signifies initiation or assumption of coverage.

The analyst(s) responsible for preparing this research report received Compensation that is based upon various factors including Credit Suisse's total revenues, a portion of which are generated by Credit Suisse's investment banking activities

**As of October 2, 2012 Analysts' stock rating are defined as follows :**

**Outperform (O) :** The stock's total return is expected to outperform the relevant benchmark\* by at least 10-15% or more, (depending on perceived risk) over the next 12 months.

**Neutral (N) :** The stock's total return is expected to be in line with the relevant benchmark\* (range of  $\pm 10-15\%$ ) over the next 12 months.

**Underperform (U) :** The stock's total return is expected to underperform the relevant benchmark\* by 10-15% or more over the next 12 months.

\*Relevant benchmark by region: As of 2nd October 2012, U.S. and Canadian as well as European ratings are based on a stock's total return relative to the analyst's coverage universe which consists of all companies covered by the analyst within the relevant sector, with Outperforms representing the most attractive, Neutrals the less attractive, and Underperforms the least attractive investment opportunities. For Latin American, Japanese, and non-Japan Asia stocks, ratings are based on a stock's total return relative to the average total return of the relevant country or regional benchmark; Australia, New Zealand are, and prior to 2nd October 2012 U.S. and Canadian ratings were based on (1) a stock's absolute total return potential to its current share price and (2) the relative attractiveness of a stock's total return potential within an analyst's coverage universe. For Australian and New Zealand stocks, 12-month rolling yield is incorporated in the absolute total return calculation and a 15% and a 7.5% threshold replace the 10-15% level in the Outperform and Underperform stock rating definitions, respectively. The 15% and 7.5% thresholds replace the +10-15% and -10-15% levels in the Neutral stock rating definition, respectively.

**Restricted (R) :** In certain circumstances, Credit Suisse policy and/or applicable law and regulations preclude certain types of communications, including an investment recommendation, during the course of Credit Suisse's engagement in an investment banking transaction and in certain other circumstances.

**Volatility Indicator [V] :** A stock is defined as volatile if the stock price has moved up or down by 20% or more in a month in at least 8 of the past 24 months or the analyst expects significant volatility going forward.

Analysts' sector weightings are distinct from analysts' stock ratings and are based on the analyst's expectations for the fundamentals and/or valuation of the sector\* relative to the group's historic fundamentals and/or valuation::

**Overweight:** The analyst's expectation for the sector's fundamentals and/or valuation is favorable over the next 12 months.

**Market Weight:** The analyst's expectation for the sector's fundamentals and/or valuation is neutral over the next 12 months.

**Underweight:** The analyst's expectation for the sector's fundamentals and/or valuation is cautious over the next 12 months.

\*An analyst's coverage sector consists of all companies covered by the analyst within the relevant sector. An analyst may cover multiple sectors.

Credit Suisse's distribution of stock ratings (and banking clients) is:

### Global Ratings Distribution

Rating	Versus universe(%)	Of which banking clients (%)
Outperform/Buy*	43%	(52% banking clients)
Neutral/Hold*	39%	(48% banking clients)
Underperform/Sell*	15%	(40% banking clients)
Restricted	3%	

*\*For purposes of the NYSE and NASD ratings distribution disclosure requirements, our stock ratings of Outperform, Neutral, and Underperform most closely correspond to Buy, Hold, and Sell, respectively; however, the meanings are not the same, as our stock ratings are determined on a relative basis. (Please refer to definitions above.) An investor's decision to buy or sell a security should be based on investment objectives, current holdings, and other individual factors.*

### Price Target: (12 months) for Fortis Inc. (FTS.TO)

**Method:** We obtain our C\$38.00 target price for Fortis Inc. by using multiple valuation methodologies, but primarily rely upon a targeted dividend yield of 3.25% and an imputed 125 bps spread over a 2% Canadian 10-year bond yield.

**Risk:** There are a number of risks to Fortis' achievement of our C\$38.00 target price: commodity prices; weather; environmental; regulatory; access to capital markets; and, interest rates. Moreover, one should never underestimate the power of the regulator in any regulated business.

Please refer to the firm's disclosure website at [www.credit-suisse.com/researchdisclosures](http://www.credit-suisse.com/researchdisclosures) for the definitions of abbreviations typically used in the target price method and risk sections.

*See the Companies Mentioned section for full company names*

The subject company (FTS.TO) currently is, or was during the 12-month period preceding the date of distribution of this report, a client of Credit Suisse.

In addition, it may make markets in the securities mentioned in the material presented in this report. CS may have, within the last three years, served as manager or co-manager of a public offering of securities for, or currently may make a primary market in issues of, any or all of the entities mentioned in this report or may be providing, or have provided within the previous 12 months, significant advice or investment services in relation to the investment concerned or a related investment. Additional information is, subject to duties of confidentiality, available on request. Some investments referred to in this report will be offered solely by a single entity and in the case of some investments solely by CS, or an associate of CS or CS may be the only market maker in such investments. Past performance should not be taken as an indication or guarantee of future performance, and no representation or warranty, express or implied, is made regarding future performance. Information, opinions and estimates contained in this report reflect a judgment at its original date of publication by CS and are subject to change without notice. The price, value of and income from any of the securities or financial instruments mentioned in this report can fall as well as rise. The value of securities and financial instruments is subject to exchange rate fluctuation that may have a positive or adverse effect on the price or income of such securities or financial instruments. Investors in securities such as ADR's, the values of which are influenced by currency volatility, effectively assume this risk. Structured securities are complex instruments, typically involve a high degree of risk and are intended for sale only to sophisticated investors who are capable of understanding and assuming the risks involved. The market value of any structured security may be affected by changes in economic, financial and political factors (including, but not limited to, spot and forward interest and exchange rates), time to maturity, market conditions and volatility, and the credit quality of any issuer or reference issuer. Any investor interested in purchasing a structured product should conduct their own investigation and analysis of the product and consult with their own professional advisers as to the risks involved in making such a purchase. Some investments discussed in this report may have a high level of volatility. High volatility investments may experience sudden and large falls in their value causing losses when that investment is realised. Those losses may equal your original investment. Indeed, in the case of some investments the potential losses may exceed the amount of initial investment and, in such circumstances, you may be required to pay more money to support those losses. Income yields from investments may fluctuate and, in consequence, initial capital paid to make the investment may be used as part of that income yield. Some investments may not be readily realisable and it may be difficult to sell or realise those investments, similarly it may prove difficult for you to obtain reliable information about the value, or risks, to which such an investment is exposed. ### RESULTS

## CH closing countdown; thesis intact

- **Earnings review:** Fortis reported Q4 2012 headline EPS (FD) of C\$0.45 missing our C\$0.53 estimate and the Street's C\$0.48 view (C\$0.30-C\$0.54 range). Against our numbers, the miss came from several items, including: a smaller contribution from FortisBC Energy given warmer weather along with a C\$3m non-recurring provision from CWLP. Adjusted numbers were much closer to the Street's view. With the current regulatory process surrounding the CH Energy deal, we do not believe Fortis will be involved in major transactional activity until well after close (expected in Q2 2013). We do not place undue emphasis on quarterly results as a result of the inherently long-cycle nature of many assets.
- **Significant organic growth continues:** Fortis continues to provide a rather robust capital expenditure outlook with guidance of C\$1.3bn for 2013. In addition, Fortis' 5-year capex outlook continues to stand at around C\$6bn. In our view, there is meaningful transmission upside from CH over the longer-term that may become more clear post-closing. Of the planned capex, 89% of the capital is expected to target regulated utility activities that should deliver favourable risk adjusted returns.
- **Improving capital market conditions:** A large part of corporate growth has come from successfully acquiring and integrating assets. In our view, Fortis is well positioned in the current market for acquisition opportunities post completion of the CH Energy acquisition.
- **Valuation:** We obtain our C\$38 target price from multiple valuation methods, but primarily rely upon a targeted dividend yield of 3.25%. We maintain our Outperform rating.

## Results

Exhibit 1 highlights the segmented unadjusted earnings contributions for the most recent quarter and for the comparable period one year ago. Our commentary for each segment appears under the various headings below.

Results missed our estimate

### Exhibit 1: Segmented unadjusted earnings contribution

C\$ in millions, unless otherwise stated

	Q4 2012	Q4 2011	chg y/y
Regulated Gas Utilities - Canadian	49	51	-4%
Regulated Electric Utilities - Canadian	50	36	39%
Regulated Electric Utilities - Caribbean	3	4	-25%
Non-regulated - Fortis Generation	2	5	-60%
Non-regulated - Fortis Properties	5	5	0%
Corporate and other	(22)	(19)	-16%
Net earnings applicable to common shares	87	82	6%

Source: Company data and Credit Suisse

### Regulated Gas Utilities - Canadian

The unadjusted earnings for this segment decreased by roughly 4% year-over-year (see Exhibit 2). Some notable items for the regulated gas utilities include:

- Sales volumes for the quarter decreased by roughly 5% due to lower average consumption from residential and commercial because of warmer temperatures.

### Exhibit 2: Regulated Gas Utilities (unadjusted)

	Q4 2012	Q4 2011	chg y/y
FortisBC Energy	49.0	51.0	-4%

Source: Company data and Credit Suisse

### Regulated Electric Utilities – Canadian

This segment includes operating companies like FortisAlberta, FortisBC Electric, Newfoundland Power and Other Canadian Electric Utilities, which includes Maritime Electric and FortisOntario. Detailed contributions for each of these divisions can be found in Exhibit 3.

### Exhibit 3: Regulated electric utilities – Canadian contribution (unadjusted)

C\$ in millions, unless otherwise stated

	Q4 2012	Q4 2011	chg y/y
FortisAlberta	23	16	44%
FortisBC Electric	12	10	20%
Newfoundland Power	9	8	13%
Other Cdn Electric Utilities	6	2	200%
Earnings	50	36	39%

Source: Company data and Credit Suisse

### FortisAlberta

Earnings at this regulated utility were up comparing Q4 2012 versus the prior period due to the distribution revenue requirements decisions received in April 2012 and rate base growth from continued investment in the asset. See Exhibit 4 for selected highlights.

**Exhibit 4: Selected FortisAlberta performance highlights (unadjusted)**

	Q4 2012	Q4 2011	chg y/y
Energy deliveries (GWh)	4,365	4,232	3%
Revenue (C\$/MWh)	25.89	24.10	7%
Operating expenses (C\$/MWh)	9.62	8.98	7%
Gross margin (C\$/MWh)	16.27	15.12	8%
Earnings (C\$millions)	23	16	44%

Source: Company data and Credit Suisse

Increase in energy delivery in Alberta

**FortisBC Electric**

Segmented earnings at FortisBC Electric increased compared to the same period last year due primarily to rate base growth; higher pole-attachment revenues and lower than expected finance charges.

Decrease in energy deliveries in BC

See Exhibit 5 for selected highlights.

**Exhibit 5: Selected FortisBC Electric performance highlights (unadjusted)**

	Q4 2012	Q4 2011	chg y/y
Energy deliveries (GWh)	830	843	-2%
Revenue (C\$/MWh)	97.59	96.09	2%
Energy supply costs (C\$/MWh)	26.51	27.28	-3%
Operating expenses (C\$/MWh)	27.71	29.66	-7%
Gross margin (C\$/MWh)	43.37	39.15	11%
Earnings (C\$millions)	12	10	20%

Source: Company data and Credit Suisse

**Newfoundland Power**

This segment's earnings gained by 13% when comparing Q4 2012 versus Q4 2011. Higher ROE, lower effective income taxes and electricity sales growth led to higher earnings. Energy deliveries were up by approximately 1% (see Exhibit 6).

Increase in NP's energy deliveries

**Exhibit 6: Selected Newfoundland Power performance highlights (unadjusted)**

	Q4 2012	Q4 2011	chg y/y
Energy deliveries (GWh)	1,539	1,527	1%
Revenue (C\$/MWh)	103.31	102.16	1%
Energy supply costs (C\$/MWh)	68.88	67.45	2%
Operating expenses (C\$/MWh)	13.00	13.75	-6%
Gross margin (C\$/MWh)	21.44	20.96	2%
Earnings (C\$millions)	9	8	13%

Source: Company data, Credit Suisse estimates

**Other Canadian Electric Utilities**

This segment's earnings were higher when comparing Q4 2012 versus Q4 2011. The energy deliveries for the period were up compared to Q4 2011. Exhibit 7 contains selected highlights.

Increased energy deliveries

**Exhibit 7: Selected Other Canadian Electric Utilities performance highlights (unadjusted)**

## Regulated Electric Utilities – Caribbean

This segment includes Belize Electricity (up to June 20, 2011), Caribbean Utilities, and Fortis Turks and Caicos. Earnings for this segment were down in Q4 2012 versus the same quarter last year. Energy deliveries were higher. In our view, Belize Electricity was not overly material to Fortis. Additionally, we anticipate the dispute to be resolved in a rationale manner with Fortis recovering, at least, the rate base value. Yet, any such recovery may be over a period of time. Notably, the company's MD&A contained a very useful account of the interaction with the Government of Belize and Fortis in relation to this utility asset.

Very useful account of the Belize situation in the MD&A

See Exhibit 8 below for selected highlights.

**Exhibit 8: Caribbean - Regulated Electric Utilities performance highlights (unadjusted)**

	Q4 2012	Q4 2011	chg y/y
Energy deliveries (GWh)	181	174	4%
Revenue (C\$/MWh)	392.27	408.05	-4%
Energy supply costs (C\$/MWh)	254.14	264.37	-4%
Operating expenses (C\$/MWh)	55.25	51.72	7%
Gross margin (C\$/MWh)	82.87	91.95	-10%
Earnings (C\$millions)	3	4	-25%

Source: Company data and Credit Suisse

## Non-regulated – Fortis Generation

The non-regulated generation assets within this segment are located in Belize, British Columbia, Central Newfoundland, Ontario and Upper New York State. Earnings for the segment were down 60% in Q4 2012 compared to the same quarter last year. Energy deliveries decreased by 55% from Q4 2011 to Q4 2012 due to decreased production in Upstate New York and in Belize from lower rainfall. Exhibit 9 provides selected highlights.

**Exhibit 9: Non-regulated generation – selected highlights**

	Q4 2012	Q4 2011	chg y/y
Energy deliveries (GWh)	50	112	-55%
Revenue (C\$/MWh)	100.00	80.36	24%
Operating expenses (C\$/MWh)	60.00	17.86	236%
Gross margin (C\$/MWh)	40.00	62.50	-36%
Earnings (C\$millions)	2	5	-60%

Source: Company data and Credit Suisse

## Non-regulated – Fortis Properties

Fortis Properties' net unadjusted earning contribution was flat during the quarter. REVPAR increased by 0.4% to C\$73.94 on a year over year comparison. While, the occupancy rate of the Real Estate Division was down by 1.4%.

## Corporate

Corporate expenses increased from C\$19m to C\$22m in Q4 2012, when compared with last quarter during the same period.

## Outlook

We continue to believe investor, whether existing or prospective, should consider several major issues, including (a) funding organic growth; and (b) acquisition trail. Each of these issues is addressed below.

### Funding organic growth

In the most recent quarter the company's reported capital expenditures totaled C\$336m, of which C\$273m was spent at regulated utilities. Fortis guided that capital expenditures for

Ongoing organic growth

2013 will be roughly C\$1.3bn. A majority of the total will be spent on Western Canadian assets (FortisBC Energy, FortisAlberta, and FortisBC Electric). Fortis' consolidated gross capital expenditures expectations over the 5 year plan (2013-2017) stood at C\$6bn with 89% of that total amount being allocated to regulated utilities. Both FortisAlberta and FortisBC Electric will receive the vast majority of that amount; whereas, the regulated gas utilities are planned to receive 19% of the total capex amount, 11% at Central Hudson; and 11% is allocated to non-regulated operations. Given the regulated rates of return with utility capital expenditures, the increases should be viewed as longer-term positives provided an appropriate financial balance is struck.

With the significant current relative valuation advantages, we believe that Fortis may become more motivated to explore possible capital efficiency initiatives. In our view, the company possesses ample opportunities to become much more capital efficient. One strategy involves divesting certain non-utility assets and redeploying capital into utility assets or funding the capital program. Another option would entail divesting partial interests in selected utility assets in an asset management model approach and receiving a management fee. We believe Fortis explored this management fee approach with a past M&A deal that was not successfully won. This structure could be used for larger packages of assets in a more capital efficient fashion to potentially further accelerate growth.

Opportunities for improved capital efficiency

Generally, we continue to prefer pure-play utility companies without an undue amount of non-core asset exposure. Historically, non-core assets (especially real estate) have been somewhat commonplace for many utilities. Fortis has been no exception to that approach. Notably, the mix of commercial and hospitality real estate assets held by Fortis have been positive contributors and also provide the company a bit of financial flexibility for a selection of reasons. We note Fortis Properties continues to increase in scale and scope which may eventually make it more attractive for acquisition or monetization. Yet, for a number of reasons, we continue to believe there is a rather low probability of either of those events occurring.

Even discounting the potential monetization of assets that we would consider to be non-core, we believe Fortis possesses considerable potential to become much more capital efficient. Given the significant interest in infrastructure assets by many investors seeking long-dated types of return, Fortis could easily divest portions of its existing asset base to pension fund investors and charge a management fee for their operational and management expertise. This type of approach could significantly improve capital efficiency and returns on capital. In addition, this asset management approach could also free-up capital that could be used to fund the existing capital program or fund future acquisitions.

Capital efficiency initiatives could aid funding of acquisitions or the existing capital program funding

### Acquisition trail

In our view, Fortis continues to demonstrate a rather impressive ability to successfully integrate acquisitions. We view acquisitions as central to the company's growth strategy. Fortis is currently working towards to complete the acquisition of CH Energy Group (see "Acquiring American assets" on 21 February 2012) within Q2 2013. Several smaller scale acquisitions were also completed in the quarter, but we view Fortis management to continue to look to further grow in the US utility sector. That acquisition based strategy will come with a significant amount of discipline as exhibited on past deals. The company's most recent Management Discussion and Analysis stated "Fortis remains disciplined and patient in its pursuit of additional electric and gas utility acquisitions in the United States and Canada that will add value for Fortis shareholders. Fortis will also pursue growth in its non-regulated businesses in support of its regulated utility growth strategy."

Given the success of Fortis in past transactions, as measured in terms of financials, share price and operationally, we believe the company's current valuation and skill set may lead to some potentially value creating acquisition activity (see Exhibit 10 below for select Fortis M&A transactions).

**Exhibit 10: Selected Fortis M&A transactions**

Source: Bloomberg, Company data and Credit Suisse

In terms of acquisitions, we believe Fortis has a few advantages over others, including:

- Fortis has growing expertise with both electric and gas utilities;
- Larger size will allow it to look at a larger spectrum of potential target companies;
- A proven ability to effectively integrate acquisitions;
- A rather strong appetite for yield oriented securities in Canada;
- The potential ability to support a transaction with pension fund capital;
- Canada's rather benign interest rate environment; and,
- Bought deal financing commonly employed in Canada.

Fortis possesses a number of absolute and relative advantages over some other competitors

Historically, Fortis has been very adept at acquisitions. Corporate growth has benefited from the company's ability to successfully acquire and integrate selected assets.

## Valuation

We continue to believe that Fortis has strong organic growth in key areas such as British Columbia, Alberta and the Caribbean. After the quarter, we revised our EPS estimates to C\$1.84, C\$1.90 and C\$1.92 from the previous C\$1.85, C\$1.87 and C\$1.89 for 2013, 2014 and 2015 respectively. Our Outperform rating and C\$38.00 target price is obtained from multiple valuation methods, but primarily rely upon a targeted dividend yield of 3.25%. We reiterate our Outperform rating. Some historical Fortis valuation parameters appear in Exhibit 11 below generated by Credit Suisse RAVE.

Rating: Outperform  
Target: C\$38

**As of December 10, 2012 Analysts' stock rating are defined as follows:**

**Outperform (O) :** The stock's total return is expected to outperform the relevant benchmark\* over the next 12 months.

**Neutral (N) :** The stock's total return is expected to be in line with the relevant benchmark\* over the next 12 months.

**Underperform (U) :** The stock's total return is expected to underperform the relevant benchmark\* over the next 12 months.

\*Relevant benchmark by region: As of 10th December 2012, Japanese ratings are based on a stock's total return relative to the analyst's coverage universe which consists of all companies covered by the analyst within the relevant sector, with Outperforms representing the most attractive, Neutrals the less attractive, and Underperforms the least attractive investment opportunities. As of 2nd October 2012, U.S. and Canadian as well as European ratings are based on a stock's total return relative to the analyst's coverage universe which consists of all companies covered by the analyst within the relevant sector, with Outperforms representing the most attractive, Neutrals the less attractive, and Underperforms the least attractive investment opportunities. For Latin American and non-Japan Asia stocks, ratings are based on a stock's total return relative to the average total return of the relevant country or regional benchmark; Australia, New Zealand are, and prior to 2nd October 2012 U.S. and Canadian ratings were based on (1) a stock's absolute total return potential to its current share price and (2) the relative attractiveness of a stock's total return potential within an analyst's coverage universe. For Australian and New Zealand stocks, 12-month rolling yield is incorporated in the absolute total return calculation and a 15% and a 7.5% threshold replace the 10-15% level in the Outperform and Underperform stock rating definitions, respectively. The 15% and 7.5% thresholds replace the +10-15% and -10-15% levels in the Neutral stock rating definition, respectively. Prior to 10th December 2012, Japanese ratings were based on a stock's total return relative to the average total return of the relevant country or regional benchmark.

**Restricted (R) :** In certain circumstances, Credit Suisse policy and/or applicable law and regulations preclude certain types of communications, including an investment recommendation, during the course of Credit Suisse's engagement in an investment banking transaction and in certain other circumstances.

**Volatility Indicator [V] :** A stock is defined as volatile if the stock price has moved up or down by 20% or more in a month in at least 8 of the past 24 months or the analyst expects significant volatility going forward.

Analysts' sector weightings are distinct from analysts' stock ratings and are based on the analyst's expectations for the fundamentals and/or valuation of the sector\* relative to the group's historic fundamentals and/or valuation:

**Overweight :** The analyst's expectation for the sector's fundamentals and/or valuation is favorable over the next 12 months.

**Market Weight :** The analyst's expectation for the sector's fundamentals and/or valuation is neutral over the next 12 months.

**Underweight :** The analyst's expectation for the sector's fundamentals and/or valuation is cautious over the next 12 months.

\*An analyst's coverage sector consists of all companies covered by the analyst within the relevant sector. An analyst may cover multiple sectors.

Credit Suisse's distribution of stock ratings (and banking clients) is:

#### Global Ratings Distribution

Rating	Versus universe (%)	Of which banking clients (%)
Outperform/Buy*	42%	(53% banking clients)
Neutral/Hold*	38%	(47% banking clients)
Underperform/Sell*	16%	(41% banking clients)
Restricted	3%	

\*For purposes of the NYSE and NASD ratings distribution disclosure requirements, our stock ratings of Outperform, Neutral, and Underperform most closely correspond to Buy, Hold, and Sell, respectively; however, the meanings are not the same, as our stock ratings are determined on a relative basis. (Please refer to definitions above.) An investor's decision to buy or sell a security should be based on investment objectives, current holdings, and other individual factors.

Credit Suisse's policy is to update research reports as it deems appropriate, based on developments with the subject company, the sector or the market that may have a material impact on the research views or opinions stated herein.

Credit Suisse's policy is only to publish investment research that is impartial, independent, clear, fair and not misleading. #### Price Target: (12 months) for Fortis Inc. (FTS.TO)

**Method:** We obtain our C\$38.00 target price for Fortis Inc. by using multiple valuation methodologies, but primarily rely upon a targeted dividend yield of 3.25% and an imputed 125 bps spread over a 2% Canadian 10-year bond yield.

**Risk:** There are a number of risks to Fortis' achievement of our C\$38.00 target price: commodity prices; weather; environmental; regulatory; access to capital markets; and, interest rates. Moreover, one should never underestimate the power of the regulator in any regulated business.

Please refer to the firm's disclosure website at [www.credit-suisse.com/researchdisclosures](http://www.credit-suisse.com/researchdisclosures) for the definitions of abbreviations typically used in the target price method and risk sections.

See the Companies Mentioned section for full company names

The subject company (FTS.TO) currently is, or was during the 12-month period preceding the date of distribution of this report, a client of Credit Suisse.

Credit Suisse provided non-investment banking services to the subject company (FTS.TO) within the past 12 months

Credit Suisse expects to receive or intends to seek investment banking related compensation from the subject company (FTS.TO) within the next 3 months.

Credit Suisse has received compensation for products and services other than investment banking services from the subject company (FTS.TO) within the past 12 months

#### Important Regional Disclosures

Singapore recipients should contact Credit Suisse AG, Singapore Branch for any matters arising from this research report.

The analyst(s) involved in the preparation of this report have not visited the material operations of the subject company (FTS.TO) within the past 12 months

Restrictions on certain Canadian securities are indicated by the following abbreviations: NVS--Non-Voting shares; RVS--Restricted Voting Shares; SVS--Subordinate Voting Shares.

Individuals receiving this report from a Canadian investment dealer that is not affiliated with Credit Suisse should be advised that this report may not contain regulatory disclosures the non-affiliated Canadian investment dealer would be required to make if this were its own report.

For Credit Suisse Securities (Canada), Inc.'s policies and procedures regarding the dissemination of equity research, please visit [http://www.csfb.com/legal\\_terms/canada\\_research\\_policy.shtml](http://www.csfb.com/legal_terms/canada_research_policy.shtml).

As of the date of this report, Credit Suisse acts as a market maker or liquidity provider in the equities securities that are the subject of this report.

Principal is not guaranteed in the case of equities because equity prices are variable.

Commission is the commission rate or the amount agreed with a customer when setting up an account or at any time after that.

To the extent this is a report authored in whole or in part by a non-U.S. analyst and is made available in the U.S., the following are important disclosures regarding any non-U.S. analyst contributors: The non-U.S. research analysts listed below (if any) are not registered/qualified as research

analysts with FINRA. The non-U.S. research analysts listed below may not be associated persons of CSSU and therefore may not be subject to the NASD Rule 2711 and NYSE Rule 472 restrictions on communications with a subject company, public appearances and trading securities held by a research analyst account.

CS will not treat recipients of this report as its customers by virtue of their receiving this report. The investments and services contained or referred to in this report may not be suitable for you and it is recommended that you consult an independent investment advisor if you are in doubt about such investments or investment services. Nothing in this report constitutes investment, legal, accounting or tax advice, or a representation that any investment or strategy is suitable or appropriate to your individual circumstances, or otherwise constitutes a personal recommendation to you. CS does not advise on the tax consequences of investments and you are advised to contact an independent tax adviser. Please note in particular that the bases and levels of taxation may change. Information and opinions presented in this report have been obtained or derived from sources believed by CS to be reliable, but CS makes no representation as to their accuracy or completeness. CS accepts no liability for loss arising from the use of the material presented in this report, except that this exclusion of liability does not apply to the extent that such liability arises under specific statutes or regulations applicable to CS. This report is not to be relied upon in substitution for the exercise of independent judgment. CS may have issued, and may in the future issue, other communications that are inconsistent with, and reach different conclusions from, the information presented in this report. Those communications reflect the different assumptions, views and analytical methods of the analysts who prepared them and CS is under no obligation to ensure that such other communications are brought to the attention of any recipient of this report. CS may, to the extent permitted by law, participate or invest in financing transactions with the issuer(s) of the securities referred to in this report, perform services for or solicit business from such issuers, and/or have a position or holding, or other material interest, or effect transactions, in such securities or options thereon, or other investments related thereto. In addition, it may make markets in the securities mentioned in the material presented in this report. CS may have, within the last three years, served as manager or co-manager of a public offering of securities for, or currently may make a primary market in issues of, any or all of the entities mentioned in this report or may be providing, or have provided within the previous 12 months, significant advice or investment services in relation to the investment concerned or a related investment. Additional information is, subject to duties of confidentiality, available on request. Some investments referred to in this report will be offered solely by a single entity and in the case of some investments solely by CS, or an associate of CS or CS may be the only market maker in such investments. Past performance should not be taken as an indication or guarantee of future performance, and no representation or warranty, express or implied, is made regarding future performance. Information, opinions and estimates contained in this report reflect a judgment at its original date of publication by CS and are subject to change without notice. The price, value of and income from any of the securities or financial instruments mentioned in this report can fall as well as rise. The value of securities and financial instruments is subject to exchange rate fluctuation that may have a positive or adverse effect on the price or income of such securities or financial instruments. Investors in securities such as ADR's, the values of which are influenced by currency volatility, effectively assume this risk. Structured securities are complex instruments, typically involve a high degree of risk and are intended for sale only to sophisticated investors who are capable of understanding and assuming the risks involved. The market value of any structured security may be affected by changes in economic, financial and political factors (including, but not limited to, spot and forward interest and exchange rates), time to maturity, market conditions and volatility, and the credit quality of any issuer or reference issuer. Any investor interested in purchasing a structured product should conduct their own investigation and analysis of the product and consult with their own professional advisers as to the risks involved in making such a purchase. Some investments discussed in this report may have a high level of volatility. High volatility investments may experience sudden and large falls in their value causing losses when that investment is realised. Those losses may equal your original investment. Indeed, in the case of some investments the potential losses may exceed the amount of initial investment and, in such circumstances, you may be required to pay more money to support those losses. Income yields from investments may fluctuate and, in consequence, initial capital paid to make the investment may be used as part of that income yield. Some investments may not be readily realisable and it may be difficult to sell or realise those investments, similarly it may prove difficult for you to obtain reliable information about the value, or risks, to which such an investment is exposed. This report may provide the addresses of, or contain hyperlinks to, websites. Except to the extent to which the report refers to website material of CS, CS has not reviewed any such site and takes no responsibility for the content contained therein. This research may not conform to Canadian disclosure requirements. In jurisdictions where CS is not already registered or licensed to trade in securities, transactions will only be effected in accordance with applicable securities legislation, which will vary from jurisdiction to jurisdiction and may require that the trade be made in accordance with applicable exemptions from registration or licensing requirements. Non-U.S. customers wishing to effect a transaction should contact a CS entity in their local jurisdiction unless governing law permits otherwise. U.S. customers wishing to effect a transaction should do so only by contacting a representative at Credit Suisse Securities (USA) LLC in the U.S. Please note that this research was originally prepared and issued by CS for distribution to their market professional and institutional investor customers. Recipients who are not market professional or institutional investor customers of CS should seek the advice of their independent financial advisor prior to taking any investment decision based on this report or for any necessary explanation of its contents. This research may relate to investments or services of a person outside of the UK or to other matters which are not regulated by the FSA or in respect of which the protections of the FSA for private customers and/or the UK compensation scheme may not be available, and further details as to where this may be the case are available upon request in respect of this report. CS may provide various services to US municipal entities or obligated persons ("municipalities"), including suggesting individual transactions or trades and entering into such transactions. Any services CS provides to municipalities are not viewed as "advice" within the meaning of Section 975 of the Dodd-Frank Wall Street Reform and Consumer Protection Act. CS is providing any such services and related information solely on an arm's length basis and not as an advisor or fiduciary to the municipality. In connection with the provision of the any such services, there is no agreement, direct or indirect, between any municipality (including the officials, management, employees or agents thereof) and CS for CS to provide advice to the municipality. Municipalities should consult with their financial, accounting and legal advisors regarding any such services provided by CS. In addition, CS is not acting for direct or indirect compensation to solicit the municipality on behalf of an unaffiliated broker, dealer, municipal securities dealer, municipal advisor, or investment adviser for the purpose of obtaining or retaining an engagement by the municipality for or in connection with Municipal Financial Products, the issuance of municipal securities, or of an investment adviser to provide investment advisory services to or on behalf of the municipality. If this report is being distributed by a financial institution other than Credit Suisse AG, or its affiliates, that financial institution is solely responsible for distribution. Clients of that institution should contact that institution to effect a transaction in the securities mentioned in this report or require further information. This report does not constitute investment advice by Credit Suisse to the clients of the distributing financial institution, and neither Credit Suisse AG, its affiliates, and their respective officers, directors and employees accept any liability whatsoever for any direct or consequential loss arising from their use of this report or its content. Principal is not guaranteed. Commission is the commission rate or the amount agreed with a customer when setting up an account or at any time after that.

### RESULTS

## Coming closer to CH closing (likely June)

- **Earnings review:** Fortis reported Q1 2013 headline EPS (FD) of C\$0.76 and an adjusted figure of C\$0.66 (C\$22m of extraordinary gain from the settlement on the expropriation of Exploits River Hydro Partnership). The adjusted figure missed our C\$0.68 estimate and was in line with the Street's C\$0.66 view (C\$0.63-C\$0.68 range). Against our numbers, the miss came from several items, including: a smaller contribution from FortisBC Energy and Newfoundland Power and a higher diluted share count. With the current regulatory process surrounding the CH Energy deal, we do not believe Fortis will be involved in major transactional activity until well after close (expected in June 2013). We do not place undue emphasis on quarterly results as a result of the inherently long-cycle nature of many assets.
- **Significant organic growth continues:** Fortis continues to provide a rather robust capital expenditure outlook of C\$1.3bn for 2013. In addition, Fortis' 5-year capex outlook continues to stand at around C\$6bn. In our view, there is meaningful transmission upside from CH over the longer term that may have greater clarity post-closing. Of the existing planned capex, 89% of the capital is expected to target regulated utility activities that should deliver favorable risk-adjusted returns.
- **Improving capital market conditions:** A large part of corporate growth has come from successfully acquiring and integrating assets. In our view, Fortis is well positioned in the current market for acquisition opportunities post completion of the CH Energy acquisition.
- **Valuation:** We obtain our C\$38 target price from multiple valuation methods, but primarily rely upon a targeted dividend yield of 3.25%. We lower our 2013 EPS to C\$1.82 from C\$1.84. We maintain our Outperform rating.

This research note is divided into three parts: (a) results; (b) outlook; and, (c) valuation. Each of these areas will be addressed in greater detail below.

## Results

Exhibit 1 highlights the segmented unadjusted earnings contributions for the most recent quarter and for the comparable period one year ago. Our commentary for each segment appears under the various headings below.

Results missed our estimate

### Exhibit 1: Segmented unadjusted earnings contribution

C\$ in millions, unless otherwise stated

	Q1 2013	Q1 2012	chg y/y
Regulated Gas Utilities - Canadian	85	82	4%
Regulated Electric Utilities - Canadian	57	51	12%
Regulated Electric Utilities - Caribbean	3	3	0%
Non-regulated - Fortis Generation	24	5	380%
Non-regulated - Fortis Properties	-	1	-100%
Corporate and other	(18)	(21)	14%
Net earnings applicable to common shares	151	121	25%

Source: Company data and Credit Suisse

### Regulated Gas Utilities – Canadian

The unadjusted earnings for this segment increased by roughly 4% year-over-year (see Exhibit 2). Some notable items for the regulated gas utilities include the following:

- Sales volumes for the quarter decreased by roughly 1.4% due to lower average consumption from residential and commercial because of warmer temperatures.
- Earnings increased by roughly 4% primarily due to rate base growth from continued investment in energy infrastructure.

### Exhibit 2: Regulated Gas Utilities (unadjusted)

	Q1 2013	Q1 2012	chg y/y
FortisBC Energy	85.0	82.0	4%

Source: Company data and Credit Suisse

### Regulated Electric Utilities – Canadian

This segment includes operating companies like FortisAlberta, FortisBC Electric, Newfoundland Power and Other Canadian Electric Utilities, which includes Maritime Electric and FortisOntario. Detailed contributions for each of these divisions can be found in Exhibit 3.

### Exhibit 3: Regulated electric utilities – Canadian contribution (unadjusted)

C\$ in millions, unless otherwise stated

	Q1 2013	Q1 2012	chg y/y
FortisAlberta	26	21	24%
FortisBC Electric	18	16	13%
Newfoundland Power	7	7	0%
Other Cdn Electric Utilities	6	7	-14%
Earnings	57	51	12%

Source: Company data and Credit Suisse

### FortisAlberta

Earnings at this regulated utility were up comparing Q1 2013 versus the prior period due to the distribution revenue requirements decisions received in April 2012 and rate base growth from continued investment in the asset. See Exhibit 4 for selected highlights.

**Exhibit 4: Selected FortisAlberta performance highlights (unadjusted)**

	Q1 2013	Q1 2012	chg y/y
Energy deliveries (GWh)	4,491	4,482	0%
Revenue (C\$/MWh)	26.27	24.10	9%
Operating expenses (C\$/MWh)	8.91	8.70	2%
Gross margin (C\$/MWh)	17.37	15.39	13%
Earnings (C\$millions)	26	21	24%

Source: Company data and Credit Suisse

Slight increase in energy delivery in Alberta

**FortisBC Electric**

Segmented earnings at FortisBC Electric increased compared to the same period last year due primarily to rate base growth, lower operating costs due to timing and lower-than-expected finance charges.

See Exhibit 5 for selected highlights.

**Exhibit 5: Selected FortisBC Electric performance highlights (unadjusted)**

	Q1 2013	Q1 2012	chg y/y
Energy deliveries (GWh)	891	909	-2%
Revenue (C\$/MWh)	98.77	95.71	3%
Energy supply costs (C\$/MWh)	28.06	27.50	2%
Operating expenses (C\$/MWh)	22.45	23.10	-3%
Gross margin (C\$/MWh)	48.26	45.10	7%
Earnings (C\$millions)	18	16	13%

Source: Company data and Credit Suisse

Decrease in energy deliveries in BC

**Newfoundland Power**

This segment's earnings were flat when comparing Q1 2013 versus Q1 2012. Higher electricity sales growth was offset by increased operating expenses and higher depreciation. Energy deliveries were up by approximately 1% (see Exhibit 6).

**Exhibit 6: Selected Newfoundland Power performance highlights (unadjusted)**

	Q1 2013	Q1 2012	chg y/y
Energy deliveries (GWh)	1,942	1,914	1%
Revenue (C\$/MWh)	101.44	100.31	1%
Energy supply costs (C\$/MWh)	74.67	74.19	1%
Operating expenses (C\$/MWh)	11.84	10.45	13%
Gross margin (C\$/MWh)	14.93	15.67	-5%
Earnings (C\$millions)	7	7	0%

Source: Company data, Credit Suisse estimates

Increase in NP's energy deliveries

**Other Canadian Electric Utilities**

This segment's earnings were lower when comparing Q1 2013 versus Q1 2012, primarily due to higher supply costs at Maritime Electric. The energy deliveries for the period were up compared to Q1 2012. Exhibit 7 contains selected highlights.

**Exhibit 7: Selected Other Canadian Electric Utilities performance highlights (unadjusted)**

	Q1 2013	Q1 2012	chg y/y
Energy deliveries (GWh)	671	645	4%
Revenue (C\$/MWh)	143.07	141.09	1%
Energy supply costs (C\$/MWh)	92.40	89.92	3%
Operating expenses (C\$/MWh)	19.37	18.60	4%
Gross margin (C\$/MWh)	31.30	32.56	-4%
Earnings (C\$millions)	6	7	-14%

Source: Company data and Credit Suisse

Increased energy deliveries

## Regulated Electric Utilities – Caribbean

This segment includes Belize Electricity (up to June 20, 2011), Caribbean Utilities, and Fortis Turks and Caicos. Earnings for this segment were flat in Q1 2013 versus the same quarter last year. Energy deliveries were higher. In our view, Belize Electricity was not overly material to Fortis. Additionally, we anticipate the dispute to be resolved in a rational manner with Fortis recovering, at least, the rate base value. Yet, any such recovery may be over a period of time. Notably, the company's MD&A contained a very useful account of the interaction with the Government of Belize and Fortis in relation to this utility asset.

Very useful account of the Belize situation in the MD&A

See Exhibit 8 below for selected highlights.

**Exhibit 8: Caribbean – Regulated Electric Utilities performance highlights (unadjusted)**

	Q1 2013	Q1 2012	chg y/y
Energy deliveries (GWh)	170	166	2%
Revenue (C\$/MWh)	388.24	379.52	2%
Energy supply costs (C\$/MWh)	241.18	240.96	0%
Operating expenses (C\$/MWh)	47.06	48.19	-2%
Gross margin (C\$/MWh)	100.00	90.36	11%
Earnings (C\$millions)	3	3	0%

Source: Company data and Credit Suisse

## Non-regulated – Fortis Generation

The non-regulated generation assets within this segment are located in Belize, British Columbia, Central Newfoundland, Ontario and Upper New York State. Earnings for the segment were up 380% in Q1 2013 compared to the same quarter last year, primarily due to a C\$22m after-tax extraordinary gain from the settlement with the Government of Newfoundland and Labrador expropriation of Exploits River Hydro Partnership in December 2008. Energy deliveries decreased by 38% from Q1 2012 to Q1 2013 due to decreased production in Belize from lower rainfall. Exhibit 9 provides selected highlights.

**Exhibit 9: Non-regulated generation – selected highlights**

	Q1 2013	Q1 2012	chg y/y
Energy deliveries (GWh)	55	88	-38%
Revenue (C\$/MWh)	90.91	102.27	-11%
Operating expenses (C\$/MWh)	36.36	34.09	7%
Gross margin (C\$/MWh)	54.55	68.18	-20%
Earnings (C\$millions)	24	5	380%

Source: Company data and Credit Suisse

## Non-regulated – Fortis Properties

Fortis Properties' net unadjusted earning contribution was lower during the quarter. REVPAR decreased by 0.8% to C\$66.04 on a year-over-year comparison, while the occupancy rate of the Real Estate Division was down by 1.1%.

## Corporate

Net corporate expenses declined from C\$21m to C\$19m in Q1 2013, when compared with last quarter during the same period.

## Outlook

We continue to believe investors, whether existing or prospective, should consider several major issues, including (a) funding organic growth; and (b) acquisition trail. Each of these issues is addressed below.

## Funding organic growth

Ongoing organic growth

In the most recent quarter, the company's reported capital expenditures totaled C\$250m, of which C\$189m was spent at regulated utilities. Fortis guided that capital expenditures for 2013 will be roughly C\$1.3bn. A majority of the total will be spent on Western Canadian assets (FortisBC Energy, FortisAlberta, and FortisBC Electric). Fortis' consolidated gross capital expenditures expectations over the 5-year plan (2013-2017) stood at C\$6bn, with 89% of that total amount being allocated to regulated utilities. Both FortisAlberta and FortisBC Electric will receive the vast majority of that amount; whereas, the regulated gas utilities are planned to receive 20% of the total capex amount, 11% at Central Hudson; and 11% is allocated to non-regulated operations. Given the regulated rates of return with utility capital expenditures, the increases should be viewed as longer-term positives provided an appropriate financial balance is struck.

With the significant current relative valuation advantages, we believe that Fortis may become more motivated to explore possible capital efficiency initiatives. In our view, the company possesses ample opportunities to become much more capital efficient. One strategy involves divesting certain non-utility assets and redeploying capital into utility assets or funding the capital program. Another option would entail divesting partial interests in selected utility assets in an asset management model approach and receiving a management fee. We believe Fortis explored this management fee approach with a past M&A deal that was not successfully won. This structure could be used for larger packages of assets in a more capital efficient fashion potentially to accelerate growth further.

Opportunities for improved capital efficiency

Generally, we continue to prefer pure-play utility companies without an undue amount of non-core asset exposure. Historically, non-core assets (especially real estate) have been somewhat commonplace for many utilities. Fortis has been no exception to that approach. Notably, the mix of commercial and hospitality real estate assets held by Fortis has been a positive contributor and also provides the company a bit of financial flexibility for a variety of reasons. We note Fortis Properties continues to increase in scale and scope, which may eventually make it more attractive for acquisition or monetization. Yet, for a number of reasons, we continue to believe there is a rather low probability of either of those events occurring.

Even discounting the potential monetization of assets that we would consider to be non-core, we believe Fortis possesses considerable potential to become much more capital efficient. Given the significant interest in infrastructure assets by many investors seeking long-dated types of return, Fortis could easily divest portions of its existing asset base to pension fund investors and charge a management fee for their operational and management expertise. This type of approach could significantly improve capital efficiency and returns on capital. In addition, this asset management approach could also free-up capital that could be used to fund the existing capital program or fund future acquisitions.

Capital efficiency initiatives could aid funding of acquisitions or the existing capital program funding

### Acquisition trail

In our view, Fortis continues to demonstrate a rather impressive ability to successfully integrate acquisitions. We view acquisitions as central to the company's growth strategy. Fortis is currently working towards to complete the acquisition of CH Energy Group (see "*Acquiring American assets*" on 21 February 2012) around June 2013. Several smaller scale acquisitions were also completed in the quarter, but we expect Fortis management to continue to look to further grow in the US utility sector. That acquisition-based strategy will come with a significant amount of discipline, as exhibited on past deals. The company's most recent Management Discussion and Analysis stated "The Corporation also remains disciplined and patient in its pursuit of additional electric and gas utility acquisitions in the United States and Canada that will add value for its shareholders. Fortis will also pursue growth in its non-regulated businesses in support of its regulated utility growth strategy."

Given Fortis' success in past transactions, as measured in terms of financials, share price and operationally, we believe the company's current valuation and skill set may lead to

some potentially value-creating acquisition activity (see Exhibit 10 below for a selection of Fortis' M&A transactions).

#### Exhibit 10: Selected Fortis M&A transactions

\$ in millions, unless otherwise stated

Announced Date	Asset/Company	Deal value (\$m)	Comment
10/1/2012	StationPark All Suite Hotel	CAD 13.00	Acquire 126-room hotel in London, Ontario
9/13/2012	Electric utility assets from City of Kelowna	CAD 55.00	Pending purchase electric utility assets that serve 15,000 customers expect close Q1'13
8/31/2012	Turks and Caicos Utilities Limited	CAD 13.00	Purchased regulated electric utility with a 50-year licence expiring in 2036
4/1/2012	Distribution asset of the City of Port Colborne	CAD 7.00	Purchased electricity distribution assets in Port Colborne
2/21/2012	CH Energy Group	USD 1,500.00	Pending acquisition of NY State electric utility
7/22/2009	Caribbean Utilities Co.	CAD 6.74	Acquired an additional 2.7% of Caribbean Utilities Co.
6/23/2009	Great Lakes Power Distribution	CAD 68.00	Acquired from Brookfield the utility that serves the District of Algoma in northern Ontario.
10/1/2008	Grimsby Power Inc.	CAD 1.10	Acquired a 10% minority interest.
10/1/2008	Caribbean Utilities Co.	CAD 3.00	Acquired an additional 1% of Caribbean Utilities Co.
8/15/2008	Caribbean Utilities Co.	CAD 25.00	Acquired an additional 2% of Caribbean Utilities Co.
7/23/2007	Delta Regina	CAD 49.95	Delta hotel located in Regina, Saskatchewan.
2/26/2007	Terasen Inc.	CAD 3,700.00	Gas distribution in British Columbia.
11/7/2006	Caribbean Utilities Co.	CAD 55.70	Acquired an additional 16% of Caribbean Utilities Co.
10/19/2006	4 hotels in western Canada	CAD 51.60	4 hotels (Holiday Inn, Best Western and Ramada) located in BC and Alberta.
8/28/2006	PPC Ltd & Atlantic Equipment & Power (Turks & Caicos) Ltd.	CAD 97.70	Electric utility that services ~80% of the Turks and Caicos Islands.
1/25/2005	3 hotels in western Canada	CAD 62.60	3 hotels in Western Canada from Greenwood Inns (Calgary, Edmonton and Winnipeg).
12/15/2004	Princeton Light & Power	CAD 3.70	PLP is an electric utility that services Princeton, BC.
5/21/2004	Belize Electric Company Ltd.	USD 3.50	Acquired the remaining 5% interest of the company.
9/17/2003	4 hotels in Ontario	CAD 43.20	4 hotels located in Ontario (Cambridge, Kitchener, Sarnia and Peterborough).
9/15/2003	Alberta Utility & British Columbia Utility (from Aquila)	CAD 1,500.00	BC and Alberta units of Aquila Inc.
2/26/2003	Granite Power Corp	CAD 8.80	Company consist of Granite Power Distribution & Granite Power Generation.
1/30/2003	Caribbean Utilities Co.	CAD 71.00	Acquired additional 3,863,695 Class A Ordinary Shares, representing approximately 15.9 per cent of the outstanding shares of the company and increased Fortis' holding to roughly 38%.
12/1/2002	Delta St John's Hotel and conference centre	CAD 25.90	Hotel in downtown St. John's, Newfoundland
5/9/2002	Cornwall Street Railway Light	CAD 67.70	City of Cornwall electric transmission & distribution utility.
4/16/2002	Kings Place	CAD 27.70	Commercial property in Fredericton, NB.
3/13/2002	Caribbean Utilities Co.	CAD 12.90	Acquired additional ~2% of the company.
3/20/2002	Niagara Power Co.	CAD 49.00	Purchase remaining 50% of Niagara Power Co.
2/1/2002	Cabot palace I	CAD 14.30	133,327 Square feet premium office tower in St. John's, Newfoundland
9/18/2001	Portfolio of properties in St. John's	CAD 8.30	Purchased TD Place commercial bldg and 6 parcels of land.
9/14/2001	Aliant Poles	CAD 46.00	Purchased 102,000 poles and related infrastructure from Aliant Telecom.
1/26/2001	Belize Electric Company Ltd.	USD 62.00	Acquired 95% of company from Duke Energy.
12/19/2000	2 Hydro generating stations	CAD 6.90	2 generating stations (6.88MW) in upper New York state.
12/14/2000	Brunswick Square Ltd.	CAD 6.20	Acquired 50% of the company Fortis doesn't own.
12/1/2000	Fort William Building and Blue cross centre	CAD 52.70	Fort William building in St. John's, Newfoundland and Blue cross centre in Moncton, New Brunswick.
2/23/2000	Caribbean Utilities Co.	CAD 79.90	Acquired 20% of the company.

8/31/1999	Brunswick Square Ltd.	CAD 10.12	Acquired 50% of the company by Fortis Properties.
1/31/1999	Mount Peyton	CAD 2.20	Acquired all common shares and notes payable.
	Total USD	USD 1,565.50	
	Total CAD	CAD 6,234.48	

Source: Bloomberg, Company data, Credit Suisse

In terms of acquisitions, we believe Fortis has a few advantages over others, including the following:

- Fortis has growing expertise with both electric and gas utilities;
- Larger size will allow it to look at a larger spectrum of potential target companies;
- A proven ability to effectively integrate acquisitions;
- A rather strong appetite for yield-oriented securities in Canada;
- The potential ability to support a transaction with pension fund capital;
- Canada's rather benign interest rate environment; and,
- Bought deal financing commonly employed in Canada.

Fortis possesses a number of absolute and relative advantages over some other competitors

Historically, Fortis has been very adept at acquisitions. Corporate growth has benefited from the company's ability to successfully acquire and integrate selected assets.

## Valuation

We continue to believe that Fortis has strong organic growth in key areas such as British Columbia, Alberta and the Caribbean. After the quarter, we revised our EPS estimates to C\$1.82 from the previous C\$1.84 for 2013. Our Outperform rating and C\$38.00 target

Rating: Outperform

Target: C\$38

price are obtained from multiple valuation methods, but primarily rely upon a targeted dividend yield of 3.25%. We reiterate our Outperform rating. Some historical Fortis valuation parameters appear in Exhibit 11 below generated by Credit Suisse RAVE.

**Exhibit 11: Fortis historical valuation**

\* Asterisk signifies initiation or assumption of coverage.

The analyst(s) responsible for preparing this research report received Compensation that is based upon various factors including Credit Suisse's total revenues, a portion of which are generated by Credit Suisse's investment banking activities

**As of December 10, 2012 Analysts' stock rating are defined as follows:**

**Outperform (O) :** The stock's total return is expected to outperform the relevant benchmark\* over the next 12 months.

**Neutral (N) :** The stock's total return is expected to be in line with the relevant benchmark\* over the next 12 months.

**Underperform (U) :** The stock's total return is expected to underperform the relevant benchmark\* over the next 12 months.

\*Relevant benchmark by region: As of 10th December 2012, Japanese ratings are based on a stock's total return relative to the analyst's coverage universe which consists of all companies covered by the analyst within the relevant sector, with Outperforms representing the most attractive, Neutrals the less attractive, and Underperforms the least attractive investment opportunities. As of 2nd October 2012, U.S. and Canadian as well as European ratings are based on a stock's total return relative to the analyst's coverage universe which consists of all companies covered by the analyst within the relevant sector, with Outperforms representing the most attractive, Neutrals the less attractive, and Underperforms the least attractive investment opportunities. For Latin American and non-Japan Asia stocks, ratings are based on a stock's total return relative to the average total return of the relevant country or regional benchmark; Australia, New Zealand are, and prior to 2nd October 2012 U.S. and Canadian ratings were based on (1) a stock's absolute total return potential to its current share price and (2) the relative attractiveness of a stock's total return potential within an analyst's coverage universe. For Australian and New Zealand stocks, 12-month rolling yield is incorporated in the absolute total return calculation and a 15% and a 7.5% threshold replace the 10-15% level in the Outperform and Underperform stock rating definitions, respectively. The 15% and 7.5% thresholds replace the +10-15% and -10-15% levels in the Neutral stock rating definition, respectively. Prior to 10th December 2012, Japanese ratings were based on a stock's total return relative to the average total return of the relevant country or regional benchmark.

**Restricted (R) :** In certain circumstances, Credit Suisse policy and/or applicable law and regulations preclude certain types of communications, including an investment recommendation, during the course of Credit Suisse's engagement in an investment banking transaction and in certain other circumstances.

**Volatility Indicator [V] :** A stock is defined as volatile if the stock price has moved up or down by 20% or more in a month in at least 8 of the past 24 months or the analyst expects significant volatility going forward.

Analysts' sector weightings are distinct from analysts' stock ratings and are based on the analyst's expectations for the fundamentals and/or valuation of the sector\* relative to the group's historic fundamentals and/or valuation:

**Overweight :** The analyst's expectation for the sector's fundamentals and/or valuation is favorable over the next 12 months.

**Market Weight :** The analyst's expectation for the sector's fundamentals and/or valuation is neutral over the next 12 months.

**Underweight :** The analyst's expectation for the sector's fundamentals and/or valuation is cautious over the next 12 months.

\*An analyst's coverage sector consists of all companies covered by the analyst within the relevant sector. An analyst may cover multiple sectors.

Credit Suisse's distribution of stock ratings (and banking clients) is:

#### Global Ratings Distribution

Rating	Versus universe (%)	Of which banking clients (%)
Outperform/Buy*	42%	(53% banking clients)
Neutral/Hold*	39%	(47% banking clients)
Underperform/Sell*	15%	(39% banking clients)
Restricted	3%	

\*For purposes of the NYSE and NASD ratings distribution disclosure requirements, our stock ratings of Outperform, Neutral, and Underperform most closely correspond to Buy, Hold, and Sell, respectively; however, the meanings are not the same, as our stock ratings are determined on a relative basis. (Please refer to definitions above.) An investor's decision to buy or sell a security should be based on investment objectives, current holdings, and other individual factors.

#### Price Target: (12 months) for Fortis Inc. (FTS.TO)

**Method:** We obtain our C\$38.00 target price for Fortis Inc. by using multiple valuation methodologies, but primarily rely upon a targeted dividend yield of 3.25% and an imputed 125 bps spread over a 2% Canadian 10-year bond yield.

**Risk:** There are a number of risks to Fortis' achievement of our C\$38.00 target price: commodity prices; weather; environmental; regulatory; access to capital markets; and, interest rates. Moreover, one should never underestimate the power of the regulator in any regulated business.

Please refer to the firm's disclosure website at [www.credit-suisse.com/researchdisclosures](http://www.credit-suisse.com/researchdisclosures) for the definitions of abbreviations typically used in the target price method and risk sections.

See the *Companies Mentioned* section for full company names

The subject company (FTS.TO) currently is, or was during the 12-month period preceding the date of distribution of this report, a client of Credit Suisse.

In addition, it may make markets in the securities mentioned in the material presented in this report. CS may have, within the last three years, served as manager or co-manager of a public offering of securities for, or currently may make a primary market in issues of, any or all of the entities mentioned in this report or may be providing, or have provided within the previous 12 months, significant advice or investment services in relation to the investment concerned or a related investment. Additional information is, subject to duties of confidentiality, available on request. Some investments referred to in this report will be offered solely by a single entity and in the case of some investments solely by CS, or an associate of CS or CS may be the only market maker in such investments. Past performance should not be taken as an indication or guarantee of future performance, and no representation or warranty, express or implied, is made regarding future performance. Information, opinions and estimates contained in this report reflect a judgment at its original date of publication by CS and are subject to change without notice. The price, value of and income from any of the securities or financial instruments mentioned in this report can fall as well as rise. The value of securities and financial instruments is subject to exchange rate fluctuation that may have a positive or adverse effect on the price or income of such securities or financial instruments. Investors in securities such as ADRs, the values of which are influenced by currency volatility, effectively assume this risk. Structured securities are complex instruments, typically involve a high degree of risk and are intended for sale only to sophisticated investors who are capable of understanding and assuming the risks involved. The market value of any structured security may be affected by changes in economic, financial and political factors (including, but not limited to, spot and forward interest and exchange rates), time to maturity, market conditions and volatility, and the credit quality of any issuer or reference issuer. Any investor interested in purchasing a structured product should conduct their own investigation and analysis of the product and consult with their own professional advisers as to the risks involved in making such a purchase. Some investments discussed in this report may have a high level of volatility. High volatility investments may experience sudden and large falls in their value causing losses when that investment is realised. Those losses may equal your original investment. Indeed, in the case of some investments the potential losses may exceed the amount of initial investment and, in such circumstances, you may be required to pay more money to support those losses. Income yields from investments may fluctuate and, in consequence, initial capital paid to make the investment may be used as part of that income yield. Some investments may not be readily realisable and it may be difficult to sell or realise those investments, similarly it may prove difficult for you to obtain reliable information about the value, or risks, to which such an investment is exposed. Research provided to residents of Malaysia is authorised by the Head of Research for Credit Suisse Securities (Malaysia) Sdn Bhd, to whom they should direct any queries on +603 2723 2020. This report has been prepared and issued for distribution in Singapore to institutional investors, accredited investors and expert investors (each as defined under the Financial Advisers Regulations) only, and is also distributed by Credit Suisse AG, Singapore branch to overseas investors (as defined under the Financial Advisers Regulations). By virtue of your status as an institutional investor, accredited investor, expert investor or overseas investor, Credit Suisse AG, Singapore branch is exempted from complying with certain compliance requirements under the Financial Advisers Act, Chapter 110 of Singapore (the "FAA"), the Financial Advisers Regulations and the relevant Notices and Guidelines issued thereunder, in respect of any financial advisory service which Credit Suisse AG, Singapore branch may provide to you. This research may not conform to Canadian disclosure requirements. In jurisdictions where CS is not already registered or licensed to trade in securities, transactions will only be effected in accordance with applicable securities legislation, which will vary from jurisdiction to jurisdiction and may require that the trade be made in accordance with applicable exemptions from registration or licensing requirements. Non-U.S. customers wishing to effect a transaction should contact a CS entity in their local jurisdiction unless governing law permits otherwise. U.S. customers wishing to effect a transaction should do so only by contacting a representative at Credit Suisse Securities (USA) LLC in the U.S. Please note that this research was originally prepared and issued by CS for distribution to their market professional and institutional investor customers. Recipients who are not market professional or institutional investor customers of CS should seek the advice of their independent financial advisor prior to taking any investment decision based on this report or for any necessary explanation of its contents. This research may relate to investments or services of a person outside of the UK or to other matters which are not regulated by the FSA or in respect of which the protections of the FSA for private customers and/or the UK compensation scheme may not be available, and further details as to where this may be the case are available upon request in respect of this report. CS may provide various services to US municipal entities or obligated persons ("municipalities"), including suggesting individual transactions or trades and entering into such transactions. Any services CS provides to municipalities are not viewed as "advice" within the meaning of Section 975 of the Dodd-Frank Wall Street Reform and Consumer Protection Act. CS is providing any such services and related information solely on an arm's length basis and not as an advisor or fiduciary to the municipality. In connection with the provision of the any such services, there is no agreement, direct or indirect, between any municipality (including the officials, management, employees or agents thereof) and CS for CS to provide advice to the municipality. Municipalities should consult with their financial, accounting and legal advisors regarding any such services provided by CS. In addition, CS is not acting for direct or indirect compensation to solicit the municipality on behalf of an unaffiliated broker, dealer, municipal securities dealer, municipal advisor, or investment adviser for the purpose of obtaining or retaining an engagement by the municipality for or in connection with Municipal Financial Products, the issuance of municipal securities, or of an investment adviser to provide investment advisory services to or on behalf of the municipality. If this report is being distributed by a financial institution other than Credit Suisse AG, or its affiliates, that financial institution is solely responsible for distribution. Clients of that institution should contact that institution to effect a transaction in the securities mentioned in this report or require further information. This report does not constitute investment advice by Credit Suisse to the clients of the distributing financial institution, and neither Credit Suisse AG, its affiliates, and their respective officers, directors and employees accept any liability whatsoever for any direct or consequential loss arising from their use of this report or its content. Principal is not guaranteed. Commission is the commission rate or the amount agreed with a customer when setting up an account or at any time after that.

Copyright © 2013 CREDIT SUISSE AG and/or its affiliates. All rights reserved.

Investment principal on bonds can be eroded depending on sale price or market price. In addition, there are bonds on which investment principal can be eroded due to changes in redemption amounts. Care is required when investing in such instruments.

When you purchase non-listed Japanese fixed income securities (Japanese government bonds, Japanese municipal bonds, Japanese government guaranteed bonds, Japanese corporate bonds) from CS as a seller, you will be requested to pay the purchase price only.

## RESULTS

## Another American acquisition (eventually)

- **Earnings review:** Fortis reported Q2 2013 headline EPS (FD) of C\$0.28 and an adjusted figure of C\$0.32 (excluding acquisition-related costs and tax impacts). The adjusted figure missed our C\$0.35 estimate and inline with the Street's C\$0.32 view (C\$0.29-C\$0.35 range). Against our numbers, the miss came from several items, including: a smaller contribution from FortisBC Energy and Other Canadian Electric and a higher diluted share count. With the closing of the CH Energy deal and the large organic capex program, we do not believe Fortis will be involved in major transactional activity in the near future. We do not place undue emphasis on quarterly results as a result of the inherently long-cycle nature of many assets.
- **Significant organic growth continues:** Fortis continues to provide a rather robust capital expenditure outlook of C\$1.3bn for 2013. In addition, Fortis' 5-year capex outlook continues to stand at around C\$6bn. In our view, there is meaningful transmission upside from CH over the longer-term that may have greater clarity in the quarters ahead. Of the existing planned capex, 90% of the capital is expected to target regulated utility activities that should deliver favourable risk-adjusted returns.
- **Building book value:** A large part of FTS corporate growth has come from successfully acquiring and integrating assets. Notably, the FTS track record over time is one of significant book value creation – something that we view as necessary for longer-term share price appreciation. With a large capital program, we believe FTS is poised to continue BVPS growth in the future.
- **Valuation:** We obtain our C\$38 target price from multiple valuation methods, but primarily rely upon a targeted dividend yield of 3.25%. We maintain our Outperform rating.

**DISCLOSURE APPENDIX CONTAINS IMPORTANT DISCLOSURES, ANALYST CERTIFICATIONS, INFORMATION ON TRADE ALERTS, ANALYST MODEL PORTFOLIOS AND THE STATUS OF NON-U.S. ANALYSTS.** US Disclosure: Credit Suisse does and seeks to do business with companies covered in its research reports. As a result, investors should be aware that the Firm may have a conflict of interest that could affect the objectivity of this report. Investors should consider this report as only a single factor in making their investment decision.

Our commentary below was originally published in the July 22<sup>nd</sup> note entitled "[Considering: Building book value; Convexity and cyclical concerns; and, quarterly results](#)". From a FTS perspective, some of the key extracts are highlighted below.

We believe that book value per share is a useful metric for evaluating the efficiency and the productivity of capital allocation over time. FTS stands out among the utility companies for delivering very consistent BVPS growth.

Book value as a measure of capital allocation efficiency and productivity

As a caveat, we obtained all of the book value per share data from Bloomberg for these companies. That data is internally consistent in approach, however, we note some quality errors look to exist in selected numbers. Compounding the potential data issues is simple reality that accounting policies and corporate reorganizations can meaningfully impact the book value numbers. More specifically, the two pronounced issues relate to the conversion of income funds to corporate structures and changes from Canadian GAAP to either IFRS or to US GAAP. Generally, these issues make the data useful and internally consistent for comparisons. Yet, there are certain challenges naturally embedded within the numbers.

Some data and accounting distortions with book value

For the utility companies in our sample set, we provide the BVPS figures from 2000-2012 in Exhibit 1.

**Exhibit 1: Utilities - book value per share (C\$)**

Utilities	Ticker	2000	2001	2002	2003	2004	2005	2006	2007	2008	2009	2010	2011	2012

\* Asterisk signifies initiation or assumption of coverage.

The analyst(s) responsible for preparing this research report received Compensation that is based upon various factors including Credit Suisse's total revenues, a portion of which are generated by Credit Suisse's investment banking activities

**As of December 10, 2012 Analysts' stock rating are defined as follows:**

**Outperform (O)** : The stock's total return is expected to outperform the relevant benchmark\* over the next 12 months.

**Neutral (N)** : The stock's total return is expected to be in line with the relevant benchmark\* over the next 12 months.

**Underperform (U)** : The stock's total return is expected to underperform the relevant benchmark\* over the next 12 months.

\*Relevant benchmark by region: As of 10th December 2012, Japanese ratings are based on a stock's total return relative to the analyst's coverage universe which consists of all companies covered by the analyst within the relevant sector, with Outperforms representing the most attractive, Neutrals the less attractive, and Underperforms the least attractive investment opportunities. As of 2nd October 2012, U.S. and Canadian as well as European ratings are based on a stock's total return relative to the analyst's coverage universe which consists of all companies covered by the analyst within the relevant sector, with Outperforms representing the most attractive, Neutrals the less attractive, and Underperforms the least attractive investment opportunities. For Latin American and non-Japan Asia stocks, ratings are based on a stock's total return relative to the average total return of the relevant country or regional benchmark; Australia, New Zealand are, and prior to 2nd October 2012 U.S. and Canadian ratings were based on (1) a stock's absolute total return potential to its current share price and (2) the relative attractiveness of a stock's total return potential within an analyst's coverage universe. For Australian and New Zealand stocks, 12-month rolling yield is incorporated in the absolute total return calculation and a 15% and a 7.5% threshold replace the 10-15% level in the Outperform and Underperform stock rating definitions, respectively. The 15% and 7.5% thresholds replace the +10-15% and -10-15% levels in the Neutral stock rating definition, respectively. Prior to 10th December 2012, Japanese ratings were based on a stock's total return relative to the average total return of the relevant country or regional benchmark.

**Restricted (R)** : In certain circumstances, Credit Suisse policy and/or applicable law and regulations preclude certain types of communications, including an investment recommendation, during the course of Credit Suisse's engagement in an investment banking transaction and in certain other circumstances.

**Volatility Indicator [V]** : A stock is defined as volatile if the stock price has moved up or down by 20% or more in a month in at least 8 of the past 24 months or the analyst expects significant volatility going forward.

Analysts' sector weightings are distinct from analysts' stock ratings and are based on the analyst's expectations for the fundamentals and/or valuation of the sector\* relative to the group's historic fundamentals and/or valuation:

**Overweight** : The analyst's expectation for the sector's fundamentals and/or valuation is favorable over the next 12 months.

**Market Weight** : The analyst's expectation for the sector's fundamentals and/or valuation is neutral over the next 12 months.

**Underweight** : The analyst's expectation for the sector's fundamentals and/or valuation is cautious over the next 12 months.

\*An analyst's coverage sector consists of all companies covered by the analyst within the relevant sector. An analyst may cover multiple sectors.

Credit Suisse's distribution of stock ratings (and banking clients) is:

#### Global Ratings Distribution

Rating	Versus universe (%)	Of which banking clients (%)
Outperform/Buy*	42%	(53% banking clients)
Neutral/Hold*	40%	(49% banking clients)
Underperform/Sell*	15%	(39% banking clients)
Restricted	3%	

*\*For purposes of the NYSE and NASD ratings distribution disclosure requirements, our stock ratings of Outperform, Neutral, and Underperform most closely correspond to Buy, Hold, and Sell, respectively; however, the meanings are not the same, as our stock ratings are determined on a relative basis. (Please refer to definitions above.) An investor's decision to buy or sell a security should be based on investment objectives, current holdings, and other individual factors.*

Credit Suisse's policy is to update research reports as it deems appropriate, based on developments with the subject company, the sector or the market that may have a material impact on the research views or opinions stated herein.

Credit Suisse does not provide any tax advice. Any statement herein regarding any US federal tax is not intended or written to be used, and cannot be used, by any taxpayer for the purposes of avoiding any penalties.

#### Price Target: (12 months) for Fortis Inc. (FTS.TO)

**Method:** We obtain our C\$38.00 target price for Fortis Inc. by using multiple valuation methodologies, but primarily rely upon a targeted dividend yield of 3.25% and an imputed 125 bps spread over a 2% Canadian 10-year bond yield.

**Risk:** There are a number of risks to Fortis' achievement of our C\$38.00 target price: commodity prices; weather; environmental; regulatory; access to capital markets; and, interest rates. Moreover, one should never underestimate the power of the regulator in any regulated business.

Please refer to the firm's disclosure website at [www.credit-suisse.com/researchdisclosures](http://www.credit-suisse.com/researchdisclosures) for the definitions of abbreviations typically used in the target price method and risk sections.

See the *Companies Mentioned* section for full company names

The subject company (FTS.TO) currently is, or was during the 12-month period preceding the date of distribution of this report, a client of Credit Suisse.

Credit Suisse provided non-investment banking services to the subject company (FTS.TO) within the past 12 months

Credit Suisse expects to receive or intends to seek investment banking related compensation from the subject company (FTS.TO) within the next 3 months.

Credit Suisse has received compensation for products and services other than investment banking services from the subject company (FTS.TO) within the past 12 months

#### Important Regional Disclosures

Singapore recipients should contact Credit Suisse AG, Singapore Branch for any matters arising from this research report.

An analyst involved in the preparation of this report has visited certain material operations of the subject company (FTS.TO) within the past 12 months

The travel expenses of the analyst in connection with such visits were not paid or reimbursed by the subject company, other than de minimus local travel expenses.

Restrictions on certain Canadian securities are indicated by the following abbreviations: NVS--Non-Voting shares; RVS--Restricted Voting Shares; SVS--Subordinate Voting Shares.

Individuals receiving this report from a Canadian investment dealer that is not affiliated with Credit Suisse should be advised that this report may not contain regulatory disclosures the non-affiliated Canadian investment dealer would be required to make if this were its own report.

CS accepts no liability for loss arising from the use of the material presented in this report, except that this exclusion of liability does not apply to the extent that such liability arises under specific statutes or regulations applicable to CS. This report is not to be relied upon in substitution for the exercise of independent judgment. CS may have issued, and may in the future issue, other communications that are inconsistent with, and reach different conclusions from, the information presented in this report. Those communications reflect the different assumptions, views and analytical methods of the analysts who prepared them and CS is under no obligation to ensure that such other communications are brought to the attention of any recipient of this report. CS may, to the extent permitted by law, participate or invest in financing transactions with the issuer(s) of the securities referred to in this report, perform services for or solicit business from such issuers, and/or have a position or holding, or other material interest, or effect transactions, in such securities or options thereon, or other investments related thereto. In addition, it may make markets in the securities mentioned in the material presented in this report. CS may have, within the last three years, served as manager or co-manager of a public offering of securities for, or currently may make a primary market in issues of, any or all of the entities mentioned in this report or may be providing, or have provided within the previous 12 months, significant advice or investment services in relation to the investment concerned or a related investment. Additional information is, subject to duties of confidentiality, available on request. Some investments referred to in this report will be offered solely by a single entity and in the case of some investments solely by CS, or an associate of CS or CS may be the only market maker in such investments. Past performance should not be taken as an indication or guarantee of future performance, and no representation or warranty, express or implied, is made regarding future performance. Information, opinions and estimates contained in this report reflect a judgment at its original date of publication by CS and are subject to change without notice. The price, value of and income from any of the securities or financial instruments mentioned in this report can fall as well as rise. The value of securities and financial instruments is subject to exchange rate fluctuation that may have a positive or adverse effect on the price or income of such securities or financial instruments. Investors in securities such as ADR's, the values of which are influenced by currency volatility, effectively assume this risk. Structured securities are complex instruments, typically involve a high degree of risk and are intended for sale only to sophisticated investors who are capable of understanding and assuming the risks involved. The market value of any structured security may be affected by changes in economic, financial and political factors (including, but not limited to, spot and forward interest and exchange rates), time to maturity, market conditions and volatility, and the credit quality of any issuer or reference issuer. Any investor interested in purchasing a structured product should conduct their own investigation and analysis of the product and consult with their own professional advisers as to the risks involved in making such a purchase. Some investments discussed in this report may have a high level of volatility. High volatility investments may experience sudden and large falls in their value causing losses when that investment is realised. Those losses may equal your original investment. Indeed, in the case of some investments the potential losses may exceed the amount of initial investment and, in such circumstances, you may be required to pay more money to support those losses. Income yields from investments may fluctuate and, in consequence, initial capital paid to make the investment may be used as part of that income yield. Some investments may not be readily realisable and it may be difficult to sell or realise those investments, similarly it may prove difficult for you to obtain reliable information about the value, or risks, to which such an investment is exposed. This report may provide the addresses of, or contain hyperlinks to, websites. Except to the extent to which the report refers to website material of CS, CS has not reviewed any such site and takes no responsibility for the content contained therein. Non-U.S. customers wishing to effect a transaction should contact a CS entity in their local jurisdiction unless governing law permits otherwise. U.S. customers wishing to effect a transaction should do so only by contacting a representative at Credit Suisse Securities (USA) LLC in the U.S. Please note that this research was originally prepared and issued by CS for distribution to their market professional and institutional investor customers. Recipients who are not market professional or institutional investor customers of CS should seek the advice of their independent financial advisor prior to taking any investment decision based on this report or for any necessary explanation of its contents. This research may relate to investments or services of a person outside of the UK or to other matters which are not authorised by the PRA and regulated by the FCA and the PRA or in respect of which the protections of the PRA and FCA for private customers and/or the UK compensation scheme may not be available, and further details as to where this may be the case are available upon request in respect of this report. CS may provide various services to US municipal entities or obligated persons ("municipalities"), including suggesting individual transactions or trades and entering into such transactions. Any services CS provides to municipalities are not viewed as "advice" within the meaning of Section 975 of the Dodd-Frank Wall Street Reform and Consumer Protection Act. CS is providing any such services and related information solely on an arm's length basis and not as an advisor or fiduciary to the municipality. In connection with the provision of the any such services, there is no agreement, direct or indirect, between any municipality (including the officials, management, employees or agents thereof) and CS for CS to provide advice to the municipality. Municipalities should consult with their financial, accounting and legal advisors regarding any such services provided by CS. In addition, CS is not acting for direct or indirect compensation to solicit the municipality on behalf of an unaffiliated broker, dealer, municipal securities dealer, municipal advisor, or investment adviser for the purpose of obtaining or retaining an engagement by the municipality for or in connection with Municipal Financial Products, the issuance of municipal securities, or of an investment adviser to provide investment advisory services to or on behalf of the municipality. If this report is being distributed by a financial institution other than Credit Suisse AG, or its affiliates, that financial institution is solely responsible for distribution. Clients of that institution should contact that institution to effect a transaction in the securities mentioned in this report or require further information. This report does not constitute investment advice by Credit Suisse to the clients of the distributing financial institution, and neither Credit Suisse AG, its affiliates, and their respective officers, directors and employees accept any liability whatsoever for any direct or consequential loss arising from their use of this report or its content. Principal is not guaranteed. Commission is the commission rate or the amount agreed with a customer when setting up an account or at any time after that.

### RESULTS

## At a glance: A matter of timing; long-term capital allocation continues to be robust

- **Earnings review:** Fortis reported Q3 2013 headline EPS (FD) of C\$0.23 that missed our C\$0.30 estimate and the Street's C\$0.26 view (C\$0.22-C\$0.29 range). Against our numbers, the miss came from several items, including: certain seasonality impacts, a smaller contribution from FortisBC Energy, Central Hudson, FortisAlberta along with a higher diluted share count. We do not place undue emphasis on quarterly results as a result of the inherently long-cycle nature of many assets. In our view, potential exists for meaningful transactional activity – especially in Alberta transmission with funding help from longer-term institutional partners.
- **Significant organic growth continues:** Fortis continues to provide a rather robust capital expenditure outlook of C\$1.2bn for 2013. In addition, Fortis' 5-year capex outlook continues to stand at around C\$6bn. In our view, there is meaningful transmission upside from CH over the longer-term that may have greater clarity in the quarters ahead. Of the existing planned capex, 89% of the capital is expected to target regulated utility activities that should deliver favourable risk adjusted returns.
- **Building book value:** A large part of FTS corporate growth has come from successfully acquiring and integrating assets. Notably, the FTS track record over time is one of significant book value creation – something that we view as necessary for longer-term share price appreciation. With a large capital program, we believe FTS is poised to continue BVPS growth in the future.
- **Valuation:** Our target price of C\$36.00 is on an implied yield of 3.56% and a yield spread of roughly 81 bps on a 2.75% Canadian 10-year. We maintain our Outperform rating.

\* Asterisk signifies initiation or assumption of coverage.

The analyst(s) responsible for preparing this research report received Compensation that is based upon various factors including Credit Suisse's total revenues, a portion of which are generated by Credit Suisse's investment banking activities

**As of December 10, 2012 Analysts' stock rating are defined as follows:**

**Outperform (O)** : The stock's total return is expected to outperform the relevant benchmark\* over the next 12 months.

**Neutral (N)** : The stock's total return is expected to be in line with the relevant benchmark\* over the next 12 months.

**Underperform (U)** : The stock's total return is expected to underperform the relevant benchmark\* over the next 12 months.

*\*Relevant benchmark by region: As of 10th December 2012, Japanese ratings are based on a stock's total return relative to the analyst's coverage universe which consists of all companies covered by the analyst within the relevant sector, with Outperforms representing the most attractive, Neutrals the less attractive, and Underperforms the least attractive investment opportunities. As of 2nd October 2012, U.S. and Canadian as well as European ratings are based on a stock's total return relative to the analyst's coverage universe which consists of all companies covered by the analyst within the relevant sector, with Outperforms representing the most attractive, Neutrals the less attractive, and Underperforms the least attractive investment opportunities. For Latin American and non-Japan Asia stocks, ratings are based on a stock's total return relative to the average total return of the relevant country or regional benchmark; Australia, New Zealand are, and prior to 2nd October 2012 U.S. and Canadian ratings were based on (1) a stock's absolute total return potential to its current share price and (2) the relative attractiveness of a stock's total return potential within an analyst's coverage universe. For Australian and New Zealand stocks, 12-month rolling yield is incorporated in the absolute total return calculation and a 15% and a 7.5% threshold replace the 10-15% level in the Outperform and Underperform stock rating definitions, respectively. The 15% and 7.5% thresholds replace the +10-15% and -10-15% levels in the Neutral stock rating definition, respectively. Prior to 10th December 2012, Japanese ratings were based on a stock's total return relative to the average total return of the relevant country or regional benchmark.*

**Restricted (R)** : In certain circumstances, Credit Suisse policy and/or applicable law and regulations preclude certain types of communications, including an investment recommendation, during the course of Credit Suisse's engagement in an investment banking transaction and in certain other circumstances.

**Volatility Indicator [V]** : A stock is defined as volatile if the stock price has moved up or down by 20% or more in a month in at least 8 of the past 24 months or the analyst expects significant volatility going forward.

Analysts' sector weightings are distinct from analysts' stock ratings and are based on the analyst's expectations for the fundamentals and/or valuation of the sector\* relative to the group's historic fundamentals and/or valuation:

**Overweight** : The analyst's expectation for the sector's fundamentals and/or valuation is favorable over the next 12 months.

**Market Weight** : The analyst's expectation for the sector's fundamentals and/or valuation is neutral over the next 12 months.

**Underweight** : The analyst's expectation for the sector's fundamentals and/or valuation is cautious over the next 12 months.

*\*An analyst's coverage sector consists of all companies covered by the analyst within the relevant sector. An analyst may cover multiple sectors.*

Credit Suisse's distribution of stock ratings (and banking clients) is:

#### Global Ratings Distribution

Rating	Versus universe (%)	Of which banking clients (%)
Outperform/Buy*	42%	(55% banking clients)
Neutral/Hold*	41%	(49% banking clients)
Underperform/Sell*	15%	(40% banking clients)
Restricted	3%	

\*For purposes of the NYSE and NASD ratings distribution disclosure requirements, our stock ratings of Outperform, Neutral, and Underperform most closely correspond to Buy, Hold, and Sell, respectively; however, the meanings are not the same, as our stock ratings are determined on a relative basis. (Please refer to definitions above.) An investor's decision to buy or sell a security should be based on investment objectives, current holdings, and other individual factors.

Credit Suisse's policy is to update research reports as it deems appropriate, based on developments with the subject company, the sector or the market that may have a material impact on the research views or opinions stated herein.

#### Price Target: (12 months) for Fortis Inc. (FTS.TO)

**Method:** We obtain our C\$36.00 target price for Fortis Inc. by using multiple valuation methodologies, but primarily rely upon a targeted dividend yield of 3.56% and an imputed 81 bps spread over a 2.75% Canadian 10-year bond yield.

**Risk:** There are a number of risks to Fortis' achievement of our C\$36.00 target price: commodity prices; weather; environmental; regulatory; access to capital markets; and, interest rates. Moreover, one should never underestimate the power of the regulator in any regulated business.

Please refer to the firm's disclosure website at <https://rave.credit-suisse.com/disclosures> for the definitions of abbreviations typically used in the target price method and risk sections.

See the *Companies Mentioned* section for full company names

CS may not have taken any steps to ensure that the securities referred to in this report are suitable for any particular investor. CS will not treat recipients of this report as its customers by virtue of their receiving this report. The investments and services contained or referred to in this report may not be suitable for you and it is recommended that you consult an independent investment advisor if you are in doubt about such investments or investment services. Nothing in this report constitutes investment, legal, accounting or tax advice, or a representation that any investment or strategy is suitable or appropriate to your individual circumstances, or otherwise constitutes a personal recommendation to you. CS does not advise on the tax consequences of investments and you are advised to contact an independent tax adviser. Please note in particular that the bases and levels of taxation may change. Information and opinions presented in this report have been obtained or derived from sources believed by CS to be reliable, but CS makes no representation as to their accuracy or completeness. CS accepts no liability for loss arising from the use of the material presented in this report, except that this exclusion of liability does not apply to the extent that such liability arises under specific statutes or regulations applicable to CS. This report is not to be relied upon in substitution for the exercise of independent judgment. CS may have issued, and may in the future issue, other communications that are inconsistent with, and reach different conclusions from, the information presented in this report. Those communications reflect the different assumptions, views and analytical methods of the analysts who prepared them and CS is under no obligation to ensure that such other communications are brought to the attention of any recipient of this report. CS may, to the extent permitted by law, participate or invest in financing transactions with the issuer(s) of the securities referred to in this report, perform services for or solicit business from such issuers, and/or have a position or holding, or other material interest, or effect transactions, in such securities or options thereon, or other investments related thereto. In addition, it may make markets in the securities mentioned in the material presented in this report. CS may have, within the last three years, served as manager or co-manager of a public offering of securities for, or currently may make a primary market in issues of, any or all of the entities mentioned in this report or may be providing, or have provided within the previous 12 months, significant advice or investment services in relation to the investment concerned or a related investment. Additional information is, subject to duties of confidentiality, available on request. Some investments referred to in this report will be offered solely by a single entity and in the case of some investments solely by CS, or an associate of CS or CS may be the only market maker in such investments. Past performance should not be taken as an indication or guarantee of future performance, and no representation or warranty, express or implied, is made regarding future performance. Information, opinions and estimates contained in this report reflect a judgment at its original date of publication by CS and are subject to change without notice. The price, value of and income from any of the securities or financial instruments mentioned in this report can fall as well as rise. The value of securities and financial instruments is subject to exchange rate fluctuation that may have a positive or adverse effect on the price or income of such securities or financial instruments. Investors in securities such as ADR's, the values of which are influenced by currency volatility, effectively assume this risk. Structured securities are complex instruments, typically involve a high degree of risk and are intended for sale only to sophisticated investors who are capable of understanding and assuming the risks involved. The market value of any structured security may be affected by changes in economic, financial and political factors (including, but not limited to, spot and forward interest and exchange rates), time to maturity, market conditions and volatility, and the credit quality of any issuer or reference issuer. Any investor interested in purchasing a structured product should conduct their own investigation and analysis of the product and consult with their own professional advisers as to the risks involved in making such a purchase. Some investments discussed in this report may have a high level of volatility. High volatility investments may experience sudden and large falls in their value causing losses when that investment is realised. Those losses may equal your original investment. Indeed, in the case of some investments the potential losses may exceed the amount of initial investment and, in such circumstances, you may be required to pay more money to support those losses. Income yields from investments may fluctuate and, in consequence, initial capital paid to make the investment may be used as part of that income yield. Some investments may not be readily realisable and it may be difficult to sell or realise those investments, similarly it may prove difficult for you to obtain reliable information about the value, or risks, to which such an investment is exposed. This report may provide the addresses of, or contain hyperlinks to, websites. Except to the extent to which the report refers to website material of CS, CS has not reviewed any such site and takes no responsibility for the content contained therein. Such address or hyperlink (including addresses or hyperlinks to CS's own website material) is provided solely for your convenience and information and the content of any such website does not in any way form part of this document. This report has been prepared and issued for distribution in Singapore to institutional investors, accredited investors and expert investors (each as defined under the Financial Advisers Regulations) only, and is also distributed by Credit Suisse AG, Singapore branch to overseas investors (as defined under the Financial Advisers Regulations). By virtue of your status as an institutional investor, accredited investor, expert investor or overseas investor, Credit Suisse AG, Singapore branch is exempted from complying with certain compliance requirements under the Financial Advisers Act, Chapter 110 of Singapore (the "FAA"), the Financial Advisers Regulations and the relevant Notices and Guidelines issued thereunder, in respect of any financial advisory service which Credit Suisse AG, Singapore branch may provide to you. This research may not conform to Canadian disclosure requirements. In jurisdictions where CS is not already registered or licensed to trade in securities, transactions will only be effected in accordance with applicable securities legislation, which will vary from jurisdiction to jurisdiction and may require that the trade be made in accordance with applicable exemptions from registration or licensing requirements. Non-U.S. customers wishing to effect a transaction should contact a CS entity in their local jurisdiction unless governing law permits otherwise. U.S. customers wishing to effect a transaction should do so only by contacting a representative at Credit Suisse Securities (USA) LLC in the U.S. Please note that this research was originally prepared and issued by CS for distribution to their market professional and institutional investor customers. Recipients who are not market professional or institutional investor customers of CS should seek the advice of their independent financial advisor prior to taking any investment decision based on this report or for any necessary explanation of its contents. This research may relate to investments or services of a person outside of the UK or to other matters which are not authorised by the PRA and regulated by the FCA and the PRA or in respect of which the protections of the PRA and FCA for private customers and/or the UK compensation scheme may not be available, and further details as to where this may be the case are available upon request in respect of this report. CS may provide various services to US municipal entities or obligated persons ("municipalities"), including suggesting individual transactions or trades and entering into such transactions. Any services CS provides to municipalities are not viewed as "advice" within the meaning of Section 975 of the Dodd-Frank Wall Street Reform and Consumer Protection Act. CS is providing any such services and related information solely on an arm's length basis and not as an advisor or fiduciary to the municipality. In connection with the provision of the any such services, there is no agreement, direct or indirect, between any municipality (including the officials, management, employees or agents thereof) and CS for CS to provide advice to the municipality. Municipalities should consult with their financial, accounting and legal advisors regarding any such services provided by CS. In addition, CS is not acting for direct or indirect compensation to solicit the municipality on behalf of an unaffiliated broker, dealer, municipal securities dealer, municipal advisor, or investment adviser for the purpose of obtaining or retaining an engagement by the municipality for or in connection with Municipal Financial Products, the issuance of municipal securities, or of an investment adviser to provide investment advisory services to or on behalf of the municipality. If this report is being distributed by a financial institution other than Credit Suisse AG, or its affiliates, that financial institution is solely responsible for distribution. Clients of that institution should contact that institution to effect a transaction in the securities mentioned in this report or require further information. This report does not constitute investment advice by Credit Suisse to the clients of the distributing financial institution, and neither Credit Suisse AG, its affiliates, and their respective officers, directors and employees accept any liability whatsoever for any direct or consequential loss arising from their use of this report or its content. Principal is not guaranteed. Commission is the commission rate or the amount agreed with a customer when setting up an account or at any time after that.

Copyright © 2013 CREDIT SUISSE AG and/or its affiliates. All rights reserved.

Investment principal on bonds can be eroded depending on sale price or market price. In addition, there are bonds on which investment principal can be eroded due to changes in redemption amounts. Care is required when investing in such instruments.

When you purchase non-listed Japanese fixed income securities (Japanese government bonds, Japanese municipal bonds, Japanese government guaranteed bonds, Japanese corporate bonds) from CS as a seller, you will be requested to pay the purchase price only.

### M&A PROPOSAL

## Raising Arizona! FTS for UNS with converts; potential regulatory issues on the horizon

- **American asset acquisition:** Fortis Inc. (FTS) announced an agreement to acquire UNS Energy Corp. (UNS) for US\$60.25/sh with a total US\$4.3bn EV. That price presents a 31.5% premium to the UNS close. To help finance the deal, Fortis issued roughly C\$1.8bn of convertible debentures with a strike of C\$30.72/sh (a 1.5% discount to the close). FTS expects the deal to be "accretive to earnings per common share...in the first full year, excluding one-time Acquisition-related costs." With potential Arizona regulatory issues along with the deal's economics, our preliminary view of the transaction is somewhat muted versus past FTS deals.
- **Deal details:** Selected details include: (a) FTS expects deal closing by the end of 2014; (b) several approvals are required (UNS shareholders, Arizona Corporation Commission, HSR, FERC, CFIUS along with others); (c) the convertible debenture installments is creative; (d) on Street 2015 numbers, UNS trades at roughly 18x P/E versus FTS at 16.9x; and, (e) this deal comes less than six months after completing CH Energy.
- **Investment thesis:** Over the last decade, FTS made outsized deals that were transformative, but we do not necessarily view UNS in that category. Yet, FTS has a positive track record with such deals over a period of time.
- **Valuation:** At this time, our numbers remain unchanged for the UNS deal. Our target price of C\$36.00 is on an implied yield of 3.56% and a yield spread of roughly 81 bps on a 2.75% Canadian 10-year. We maintain our Outperform rating.

**DISCLOSURE APPENDIX AT THE BACK OF THIS REPORT CONTAINS IMPORTANT DISCLOSURES, ANALYST CERTIFICATIONS, AND THE STATUS OF NON-US ANALYSTS.** US Disclosure: Credit Suisse does and seeks to do business with companies covered in its research reports. As a result, investors should be aware that the Firm may have a conflict of interest that could affect the objectivity of this report. Investors should consider this report as only a single factor in making their investment decision.

We will more thoroughly review the transaction economics in a future note. Yet, Exhibit 1 and Exhibit 2 provide a basic analysis of the accretion on an illustrative basis for the transaction assuming the full dilution of the convertibles and no dilution for the convertibles.

**Exhibit 1: Accretion analysis (full dilution of convertibles)**
*in millions, unless otherwise stated*

FY 2015	CS	Consensus
Net income		
FTS	403	410
UNS	142	147
Subtotal	545	557
Tax impacted incremental Interest	19	19
Total combined	526	538
Combined share count (FD)	271	271
Combined EPS (FD)	1.94	1.98
Stand alone FTS EPS	1.89	1.90
Accretion/(Dilution)	2.6%	4.4%

**Exhibit 2: Accretion analysis (no dilution of convertibles)**
*in millions, unless otherwise stated*

FY 2015	CS	Consensus
Net income		
FTS	403	410
UNS	142	147
Subtotal	545	557
Tax impacted incremental Interest	68	68
Total combined	477	489
Combined share count (FD)	213	213
Combined EPS (FD)	2.24	2.30
Stand alone FTS EPS	1.89	1.90
Accretion/(Dilution)	18.7%	21.0%

Source: Company data, Credit Suisse estimates and FactSet

Given the FTS language of expecting the deal to be "accretive to earnings per common share...in the first full year, excluding one-time Acquisition-related costs," the illustrative assumptions in Exhibit 1 and Exhibit 2 may be slightly aggressive.

There are clear merits to the Arizona exposure and the UNS, however, we have a degree of concern regarding some potential regulatory issues in that state. Our regulatory views combined with a trend of somewhat lackluster stock performance after major deals creates a concern for near-term stock market performance. Exhibit 3 highlights FTS common stock performance after the major deals in the last decade from announcement to completion and for one-year after completion.

**Exhibit 3: Post-deal announcement performance**
*in billions, unless otherwise stated*

Target	Size (bn)	Announced Date	Completed Date	Stock Performance	
				Announcement to Completion	Completion + 1 Year
CH Energy Group, Inc.	US\$1.5	2/21/2012	6/27/2013	-2.0%	-1.7%
Terasen Inc.	C\$3.7	2/26/2007	5/17/2007	3.7%	-3.7%
Aquila Networks Canada	C\$1.5	9/15/2003	5/31/2004	1.5%	25.4%

Source: Company data, Credit Suisse estimates; Note: CH Energy deal performance is since completion

Clearly, for a variety of reasons, Aquila was a transformative transaction and faced a very favourable stock market reaction. Our preliminary view of the UNS deal is more muted in light of the economics and some potential regulatory issues. We will fine tune our views in a more formal fashion in due course. Finally, with this announcement, we believe FTS would be an unlikely bidder for part or all of AltaLink ([see our previous note](#)).

The analyst(s) responsible for preparing this research report received Compensation that is based upon various factors including Credit Suisse's total revenues, a portion of which are generated by Credit Suisse's investment banking activities

**As of December 10, 2012 Analysts' stock rating are defined as follows:**

**Outperform (O)** : The stock's total return is expected to outperform the relevant benchmark\* over the next 12 months.

**Neutral (N)** : The stock's total return is expected to be in line with the relevant benchmark\* over the next 12 months.

**Underperform (U)** : The stock's total return is expected to underperform the relevant benchmark\* over the next 12 months.

\*Relevant benchmark by region: As of 10th December 2012, Japanese ratings are based on a stock's total return relative to the analyst's coverage universe which consists of all companies covered by the analyst within the relevant sector, with Outperforms representing the most attractive, Neutrals the less attractive, and Underperforms the least attractive investment opportunities. As of 2nd October 2012, U.S. and Canadian as well as European ratings are based on a stock's total return relative to the analyst's coverage universe which consists of all companies covered by the analyst within the relevant sector, with Outperforms representing the most attractive, Neutrals the less attractive, and Underperforms the least attractive investment opportunities. For Latin American and non-Japan Asia stocks, ratings are based on a stock's total return relative to the average total return of the relevant country or regional benchmark; Australia, New Zealand are, and prior to 2nd October 2012 U.S. and Canadian ratings were based on (1) a stock's absolute total return potential to its current share price and (2) the relative attractiveness of a stock's total return potential within an analyst's coverage universe. For Australian and New Zealand stocks, 12-month rolling yield is incorporated in the absolute total return calculation and a 15% and a 7.5% threshold replace the 10-15% level in the Outperform and Underperform stock rating definitions, respectively. The 15% and 7.5% thresholds replace the +10-15% and -10-15% levels in the Neutral stock rating definition, respectively. Prior to 10th December 2012, Japanese ratings were based on a stock's total return relative to the average total return of the relevant country or regional benchmark.

**Restricted (R)** : In certain circumstances, Credit Suisse policy and/or applicable law and regulations preclude certain types of communications, including an investment recommendation, during the course of Credit Suisse's engagement in an investment banking transaction and in certain other circumstances.

**Volatility Indicator [V]** : A stock is defined as volatile if the stock price has moved up or down by 20% or more in a month in at least 8 of the past 24 months or the analyst expects significant volatility going forward.

Analysts' sector weightings are distinct from analysts' stock ratings and are based on the analyst's expectations for the fundamentals and/or valuation of the sector\* relative to the group's historic fundamentals and/or valuation:

**Overweight** : The analyst's expectation for the sector's fundamentals and/or valuation is favorable over the next 12 months.

**Market Weight** : The analyst's expectation for the sector's fundamentals and/or valuation is neutral over the next 12 months.

**Underweight** : The analyst's expectation for the sector's fundamentals and/or valuation is cautious over the next 12 months.

*\*An analyst's coverage sector consists of all companies covered by the analyst within the relevant sector. An analyst may cover multiple sectors.*

Credit Suisse's distribution of stock ratings (and banking clients) is:

#### Global Ratings Distribution

Rating	Versus universe (%)	Of which banking clients (%)
Outperform/Buy*	42%	(54% banking clients)
Neutral/Hold*	40%	(50% banking clients)
Underperform/Sell*	15%	(42% banking clients)
Restricted	3%	

*\*For purposes of the NYSE and NASD ratings distribution disclosure requirements, our stock ratings of Outperform, Neutral, and Underperform most closely correspond to Buy, Hold, and Sell, respectively; however, the meanings are not the same, as our stock ratings are determined on a relative basis. (Please refer to definitions above.) An investor's decision to buy or sell a security should be based on investment objectives, current holdings, and other individual factors.*

#### Price Target: (12 months) for Fortis Inc. (FTS.TO)

**Method:** We obtain our C\$36.00 target price for Fortis Inc. by using multiple valuation methodologies, but primarily rely upon a targeted dividend yield of 3.56% and an imputed 81 bps spread over a 2.75% Canadian 10-year bond yield.

**Risk:** There are a number of risks to Fortis' achievement of our C\$36.00 target price: commodity prices; weather; environmental; regulatory; access to capital markets; and, interest rates. Moreover, one should never underestimate the power of the regulator in any regulated business.

Please refer to the firm's disclosure website at <https://rave.credit-suisse.com/disclosures> for the definitions of abbreviations typically used in the target price method and risk sections.

*See the Companies Mentioned section for full company names*

The subject company (FTS.TO, UNS.N) currently is, or was during the 12-month period preceding the date of distribution of this report, a client of Credit Suisse.

Credit Suisse provided non-investment banking services to the subject company (FTS.TO, UNS.N) within the past 12 months

Credit Suisse expects to receive or intends to seek investment banking related compensation from the subject company (FTS.TO) within the next 3 months.

Credit Suisse has received compensation for products and services other than investment banking services from the subject company (FTS.TO, UNS.N) within the past 12 months

As of the date of this report, Credit Suisse makes a market in the following subject companies (UNS.N).

#### Important Regional Disclosures

Singapore recipients should contact Credit Suisse AG, Singapore Branch for any matters arising from this research report.

The analyst(s) involved in the preparation of this report have not visited the material operations of the subject company (UNS.N) within the past 12 months

An analyst involved in the preparation of this report has visited certain material operations of the subject company (FTS.TO) within the past 12 months

The travel expenses of the analyst in connection with such visits were not paid or reimbursed by the subject company, other than de minimus local travel expenses.

Restrictions on certain Canadian securities are indicated by the following abbreviations: NVS--Non-Voting shares; RVS--Restricted Voting Shares; SVS--Subordinate Voting Shares.

Individuals receiving this report from a Canadian investment dealer that is not affiliated with Credit Suisse should be advised that this report may not contain regulatory disclosures the non-affiliated Canadian investment dealer would be required to make if this were its own report.

Those communications reflect the different assumptions, views and analytical methods of the analysts who prepared them and CS is under no obligation to ensure that such other communications are brought to the attention of any recipient of this report. CS may, to the extent permitted by law, participate or invest in financing transactions with the issuer(s) of the securities referred to in this report, perform services for or solicit business from such issuers, and/or have a position or holding, or other material interest, or effect transactions, in such securities or options thereon, or other investments related thereto. In addition, it may make markets in the securities mentioned in the material presented in this report. CS may have, within the last three years, served as manager or co-manager of a public offering of securities for, or currently may make a primary market in issues of, any or all of the entities mentioned in this report or may be providing, or have provided within the previous 12 months, significant advice or investment services in relation to the investment concerned or a related investment. Additional information is, subject to duties of confidentiality, available on request. Some investments referred to in this report will be offered solely by a single entity and in the case of some investments solely by CS, or an associate of CS or CS may be the only market maker in such investments. Past performance should not be taken as an indication or guarantee of future performance, and no representation or warranty, express or implied, is made regarding future performance. Information, opinions and estimates contained in this report reflect a judgment at its original date of publication by CS and are subject to change without notice. The price, value of and income from any of the securities or financial instruments mentioned in this report can fall as well as rise. The value of securities and financial instruments is subject to exchange rate fluctuation that may have a positive or adverse effect on the price or income of such securities or financial instruments. Investors in securities such as ADR's, the values of which are influenced by currency volatility, effectively assume this risk. Structured securities are complex instruments, typically involve a high degree of risk and are intended for sale only to sophisticated investors who are capable of understanding and assuming the risks involved. The market value of any structured security may be affected by changes in economic, financial and political factors (including, but not limited to, spot and forward interest and exchange rates), time to maturity, market conditions and volatility, and the credit quality of any issuer or reference issuer. Any investor interested in purchasing a structured product should conduct their own investigation and analysis of the product and consult with their own professional advisers as to the risks involved in making such a purchase. Some investments discussed in this report may have a high level of volatility. High volatility investments may experience sudden and large falls in their value causing losses when that investment is realised. Those losses may equal your original investment. Indeed, in the case of some investments the potential losses may exceed the amount of initial investment and, in such circumstances, you may be required to pay more money to support those losses. Income yields from investments may fluctuate and, in consequence, initial capital paid to make the investment may be used as part of that income yield. Some investments may not be readily realisable and it may be difficult to sell or realise those investments, similarly it may prove difficult for you to obtain reliable information about the value, or risks, to which such an investment is exposed. This report may provide the addresses of, or contain hyperlinks to, websites. Except to the extent to which the report refers to website material of CS, CS has not reviewed any such site and takes no responsibility for the content contained therein. ## Downgrade to Neutral: favourable core growth outweighed by acquisition overhang

- **Reduced rating and target price:** With greater reflection on the Fortis Inc. (FTS) deal for UNS Energy Corp. (UNS), we downgrade the stock to Neutral from the prior Outperform and reduce our target price from C\$36 to C\$32. At this juncture, several factors support our reductions, including: (a) the near-term impact of acquisition related financing; (b) the type of financing; (c) the regulatory risks related to the UNS deal; and, (d) a future view of potential deal economics. We continue to view FTS as a savvy utility investor with a longer-term view that matches well with longer-term equity holders, but the financing volatility can be problematic for shorter-term investors.
- **On the horizon:** Industry participants understand the many challenges and the uniqueness of utility M&A compared to many other industries. The critical nature of utility assets often translates into greater regulatory scrutiny. From our view, that reality along with size of outright deals starts to position FTS in an almost perpetual state of acquisition overhang. Given the likely volatility of financing M&A activities and the normal course equity issues for balance sheet "tweaking," stock performance may be more associated with tactical positioning rather than the fundamentals.
- **Valuation:** Our EPS estimates change to C\$1.66, C\$1.57 and C\$1.95 from C\$1.68, C\$1.82 and C\$1.89 for 2013, 2014 and 2015 respectively. We downgrade our rating from Outperform to Neutral and lower our target price to C\$32 from C\$36. The revised target is obtained from multiple valuation methods, including: a targeted dividend yield of 4.13% (138bps spread on a forecast 2.75% Canadian 10-year) and a 16.4x P/E multiple on 2015 EPS.

**DISCLOSURE APPENDIX AT THE BACK OF THIS REPORT CONTAINS IMPORTANT DISCLOSURES, ANALYST CERTIFICATIONS, AND THE STATUS OF NON-US ANALYSTS.** US Disclosure: Credit Suisse does and seeks to do business with companies covered in its research reports. As a result, investors should be aware that the Firm may have a conflict of interest that could affect the objectivity of this report. Investors should consider this report as only a single factor in making their investment decision.

This research report is divided into three parts:

- Acquisition acumen;
- Revised financials; and,
- Valuation.

Each of these areas will be addressed in greater detail below.

## Acquisition acumen

In our view, Fortis continues to demonstrate a rather impressive ability to successfully integrate acquisitions. We view acquisitions as central to the company's growth strategy. In light of some specific dynamics in the Canadian utility market, we believe FTS will be increasingly focused on the US utility market. Despite this ability, track record and south of the 49<sup>th</sup> parallel focus, we viewed the UNS deal as surprising on multiple fronts, including:

- The CH Energy Group deal closed only on June 27, 2013.
- The UNS deal increases the FTS asset base by roughly one-third.
- UNS deal related funding was the largest amount in FTS in history.
- Clearly, synergies are somewhat rare in the utility industry given the standalone nature of the business. Yet, network benefits can often exist with roughly contiguous assets and, therefore, the Desert Southwest geography was at odds with some expectations.
- In light of the size of the deal, the funding was done with convertible debentures – an uncommon instrument in the Canadian infrastructure/utility landscape.

From our perspective, FTS truly takes a longer-term view towards utility M&A and, after the UNS deal closes, we expect an ongoing focus on US utility assets. In the most recent Management Discussion and Analysis (prior to the UNS deal announcement), the company stated "Fortis remains disciplined and patient in its pursuit of additional electric and gas utility acquisitions in the United States and Canada that will add value for Fortis shareholders. Fortis will also pursue growth in its non-regulated businesses in support of its regulated utility growth strategy."

In the UNS acquisition press release, Fortis provided a consistent view, in part, stating:

"The Acquisition of UNS Energy is consistent with our strategy of investing in high-quality regulated Canadian and U.S. utility assets and is expected to be accretive to earnings per common share in the first full year after closing, excluding one-time Acquisition-related costs. The Acquisition further mitigates business risk for Fortis by enhancing the geographic diversification of our businesses, resulting in no more than one-third of total assets being located in any one regulatory jurisdiction."

"The Fortis approach to utility management is based on creating value for customers that ultimately translates into long-term value for shareholders. Fortis structures its operations as separate operating companies in each jurisdiction. Focused local management teams have the benefit of access to utility management experience and expertise of Fortis. The senior management team of UNS Energy, which Fortis expects to retain, will add valuable operational expertise in electric generation, transmission and distribution and natural gas distribution to the existing expertise of Fortis in such areas. This approach allows local managers to continue to build relationships with, and be responsive to, both their customers and regulators while availing of the resources of a large utility

A southward looking focus

UNS deal done with a relatively uncommon financing structure

Acquisitions a mainstay of the FTS strategy

group. Fortis recognizes that regulation is a key aspect of its core business and has developed a disciplined, cost-conscious asset investment and operating philosophy which is responsive to regulation."

From our perspective, the UNS deal is very similar to other FTS acquisitions – except for the size of the transaction. As partly illustrated in Exhibit 1, FTS has a long history of M&A transactions.

UNS deal follows the typical FTS template

### Exhibit 1: Selected Fortis M&A transactions

\$ in millions, unless otherwise stated

Announced Date	Asset/Company	Deal value (\$m)	Comment
12/12/2013	UNS Energy Corp.	USD 4,300.00	Pending acquisition of AZ State electric and gas utility
10/1/2012	StationPark All Suite Hotel	CAD 13.00	Acquire 126-room hotel in London, Ontario
9/13/2012	Electric utility assets from City of Kelowna	CAD 55.00	Purchased electric utility assets that serve 15,000 customers expect close Q1'13
8/31/2012	Turks and Caicos Utilities Limited	CAD 13.00	Purchased regulated electric utility with a 50-year licence expiring in 2036
4/1/2012	Distribution asset of the City of Port Colborne	CAD 7.00	Purchased electricity distribution assets in Port Colborne
2/21/2012	CH Energy Group	USD 1,500.00	Acquired NY State electric and gas utility
7/22/2009	Caribbean Utilities Co.	CAD 6.74	Acquired an additional 2.7% of Caribbean Utilities Co.
6/23/2009	Great Lakes Power Distribution	CAD 68.00	Acquired from Brookfield the utility that serves the District of Algoma in northern Ontario.
10/1/2008	Grimsby Power Inc.	CAD 1.10	Acquired a 10% minority interest.
10/1/2008	Caribbean Utilities Co.	CAD 3.00	Acquired an additional 1% of Caribbean Utilities Co.
8/15/2008	Caribbean Utilities Co.	CAD 25.00	Acquired an additional 2% of Caribbean Utilities Co.
7/23/2007	Delta Regina	CAD 49.95	Delta hotel located in Regina, Saskatchewan.
2/26/2007	Terasen Inc.	CAD 3,700.00	Gas distribution in British Columbia.
11/7/2006	Caribbean Utilities Co.	CAD 55.70	Acquired an additional 16% of Caribbean Utilities Co.
10/19/2006	4 hotels in western Canada	CAD 51.60	4 hotels (Holiday Inn, Best Western and Ramada) located in BC and Alberta.
8/28/2006	PPC Ltd & Atlantic Equipment & Power (Turks & Caicos) Ltd.	CAD 97.70	Electric utility that services ~80% of the Turks and Caicos Islands.
1/25/2005	3 hotels in western Canada	CAD 62.60	3 hotels in Western Canada from Greenwood Inns (Calgary, Edmonton and Winnipeg).
12/15/2004	Princeton Light & Power	CAD 3.70	PLP is an electric utility that services Princeton, BC.
5/21/2004	Belize Electric Company Ltd.	USD 3.50	Acquired the remaining 5% interest of the company.
9/17/2003	4 hotels in Ontario	CAD 43.20	4 hotels located in Ontario (Cambridge, Kitchener, Sarnia and Peterborough).
9/15/2003	Alberta Utility & British Columbia Utility (from Aquila)	CAD 1,500.00	BC and Alberta units of Aquila Inc.
2/26/2003	Granite Power Corp	CAD 8.80	Company consist of Granite Power Distribution & Granite Power Generation.
1/30/2003	Caribbean Utilities Co.	CAD 71.00	Acquired additional 3,863,695 Class A Ordinary Shares, representing approximately 15.9 per cent of the outstanding shares of the company and increased Fortis' holding to roughly 38%.
12/1/2002	Delta St John's Hotel and conference centre	CAD 25.90	Hotel in downtown St. John's, Newfoundland
5/9/2002	Cornwall Street Railway Light	CAD 67.70	City of Cornwall electric transmission & distribution utility.
4/16/2002	Kings Place	CAD 27.70	Commercial property in Fredericton, NB.
3/13/2002	Caribbean Utilities Co.	CAD 12.90	Acquired additional ~2% of the company.
3/20/2002	Niagara Power Co.	CAD 49.00	Purchase remaining 50% of Niagara Power Co.
2/1/2002	Cabot palace I	CAD 14.30	133,327 Square feet premium office tower in St. John's, Newfoundland
9/18/2001	Portfolio of properties in St. John's	CAD 8.30	Purchased TD Place commercial bldg and 6 parcels of land.
9/14/2001	Aliant Poles	CAD 46.00	Purchased 102,000 poles and related infrastructure from Aliant Telecom.
1/26/2001	Belize Electric Company Ltd.	USD 62.00	Acquired 95% of company from Duke Energy.
12/19/2000	2 Hydro generating stations	CAD 6.90	2 generating stations (6.88MW) in upper New York state.
12/14/2000	Brunswick Square Ltd.	CAD 6.20	Acquired 50% of the company Fortis doesn't own.
12/1/2000	Fort William Building and Blue cross centre	CAD 52.70	Fort William building in St. John's, Newfoundland and Blue cross centre in Moncton, New Brunswick.
2/23/2000	Caribbean Utilities Co.	CAD 79.90	Acquired 20% of the company.
12/30/1999	2 Hydro generating stations	CAD 19.77	2 generating stations (16MW) in upper New York state (Moose River & Philadelphia)
10/28/1999	Belize Electricity Ltd.	CAD 36.80	Acquired 67% interest in the main commercial generator, transmitter & distributor of electricity in Belize.
8/31/1999	Brunswick Square Ltd.	CAD 10.12	Acquired 50% of the company by Fortis Properties.
1/31/1999	Mount Peyton	CAD 2.20	Acquired all common shares and notes payable.
	Total USD	USD 5,865.50	
	Total CAD	CAD 6,302.48	

Source: Bloomberg, Company data and Credit Suisse

In terms of acquisitions, we believe Fortis often possesses a few advantages over others, including:

- Fortis has growing expertise with both electric and gas utilities;
- Larger size will allow it to look at a broader spectrum of potential target companies;
- A proven ability to effectively integrate acquisitions;
- A rather strong appetite for yield oriented securities in Canada;
- The potential ability to support a transaction with pension fund capital;
- Canada's rather benign interest rate environment; and,
- Bought deal financing commonly employed in Canada.

Fortis possesses a number of absolute and relative advantages over some other competitors

Historically, Fortis has been very adept at acquisitions. Corporate growth has benefited from the company's ability to successfully acquire and integrate selected assets. There are clear merits to UNS Energy's Arizona exposure. Yet, we have some concerns regarding

potential regulatory issues in that state. Our regulatory views combined with a trend of somewhat lackluster stock performance after major deals creates a concern for near-term stock market performance. Exhibit 2 illustrates common stock performance for FTS after the major deals in the last decade from announcement to completion and for one-year after completion.

**Exhibit 2: Post-deal announcement performance**

*in billions, unless otherwise stated*

Target	Size (bn)	Announced Date	Completed Date	Stock Performance	
				Announcement to Completion	Completion + 1 Year
UNS Energy Corp.*	US\$4.3	12/11/2013	Q4 2014e	-2.8%	
CH Energy Group, Inc.	US\$1.5	2/21/2012	6/27/2013	-2.0%	-4.4%
Terasen Inc.	C\$3.7	2/26/2007	5/17/2007	3.7%	-3.7%
Aquila Networks Canada	C\$1.5	9/15/2003	5/31/2004	1.5%	25.4%

*Source: Company data, Credit Suisse estimates; Note:\* UNS acquisition is still pending. CH Energy deal performance is since completion.*

Clearly, for a variety of reasons, Aquila was a transformative transaction and faced a very favourable stock market reaction. As we stated in our initial note regarding this deal ([link](#)), our view of this deal is a bit more muted in light of the economics and potential regulatory issues. We will address some of the economics in the next section.

The Aquila deal delivered transformative returns

## Revised financials

Our starting point for considering the impact of the Fortis-UNS deal is the pro-forma total asset base as disclosed in the convertible debenture prospectus (Exhibit 3).

### Exhibit 3: Fortis asset base transformation

C\$ in billions, unless otherwise stated

UNS projected to be 25% of FTS consolidated assets

Note: (1) As at September 30, 2013. Source: Company data

In light of the nature of UNS Energy's potential returns (i.e. generally higher allowed ROEs and greater equity thickness than many existing FTS assets), the pro forma operating earnings contributions from the acquired assets outperform their asset weight as partially evidenced in Exhibit 4.

### Exhibit 4: FTS operating earnings (current and pro-forma)

C\$ in millions, unless otherwise stated

UNS greater equity thickness and ROE than many existing FTS assets

Note: (2) For the nine-month period ended September 30, 2013. Operating earnings of Fortis excludes the \$22 million extraordinary gain on settlement of expropriation matters associated with the Exploits River Hydro Partnership. Source: Company data

For the sake of simplicity, we chose to present the FTS numbers as per the prospectus. In our view, a more critical aspect of this transaction is the "going-in ROE" compared to the investment plan in the next few years. Clearly, the purchase of any utility for a premium to the rate base results in an effective decline on realized ROEs compared to the deployed capital. One method of justifying the premium is the pace of capital deployment at allowed ROEs that eventually help "average up" the realized ROE on the purchased assets.

In this context, we start this part of the analysis with the FTS disclosure of UNS Energy's capex in Exhibit 5.

Going in ROE versus pace of averaging up

**Exhibit 5: UNS Energy's capex**  
 US\$ in millions, unless otherwise stated

Source: Company data

A robust capital program

To provide a basic comparative of the return profiles for UNS Energy standalone and for the FTS acquisition, we made several assumptions that include:

- In terms of equity value, the FTS deal for UNS totals US\$2.5bn;
- UNS has a regulatory utility rate base of roughly US\$1.9bn for 2013;
- Year-end 2015 regulatory rate base to be roughly US\$3.0bn (FTS disclosure);
- On a blended basis, we assumed an allowed equity thickness of 43.5%;
- Across the utilities, we provided for an allowed ROE of 10%;
- Rate base depreciation of 4% per annum;
- We utilized the capex figures in Exhibit 5 along with the data from the UNS preliminary proxy statement;
- Collectively, these figures provide a baseline calculation for rate base earnings that is contrasted by CS forecasts and UNS Energy's own longer-term forecasts;
- The longer-term forecasts come from UNS Energy's preliminary proxy statement that provide enhanced perspective to the potential returns with their forecast earnings until 2024;
- As per FTS and UNS expectations, we forecast the transaction closing late at the end of 2014 with 2015 being the first full year of contribution.

Clearly, these figures don't perfectly correspond to some actuals, however, they are useful for illustrating future returns on equity. In terms of returns, there is a debate on the starting year for calculation purposes.

Exhibit 6 provides an illustrative view of the comparative returns on equity for UNS as a standalone entity and through the lens of the FTS acquisition. Given the deal value along with the timing of close, we believe the US\$3.13bn rate base forecast in 2015 (Exhibit 6) is the proper reference point for calculating returns on the acquisition capital. In that context, FTS would be forecast to earn a 6.3% without accounting for the clear capital drag of the financing activities that recently closed. Beyond 2015, we simply assume that UNS Energy is self-financing from a FTS perspective and, thus, no incremental capital contributions will be required.

Projecting a 6.3% ROE on deployed capital in 2015

As illustrated in Exhibit 6, the FTS returns on equity begin to reach levels comparable to some of their other utility investments by 2023. Clearly, this illustrative view does not take into account movements in the USD/CAD exchange rate, regulatory decisions along with a

considerable number of other factors. Yet, the illustrative view is fairly clear on the price of growth in terms of estimated future ROE generation.

#### Exhibit 6: Illustrative returns for FTS-UNS

\*Capex prior to 2019 from FTS prospectus and post 2019 from UNS proxy. Proxy figures are "Capital Expenditures & Other". Source: Company data and Credit Suisse estimates

One caveat on longer-term forecast numbers is the lack of visibility and certainty for capital allocation – even in the long-cycle infrastructure industry – may look to depress the overall returns in a somewhat fading rate base context. Even with those considerations, one may view 2023 as being the year comparable returns are generated from the FTS-UNS deal. A recent notable potential positive for FTS is the rather rapid decline of the CAD against the USD. In the near-term, this situation may exacerbate some financing issues, however, the structurally lower CAD translates into an effectively improved earnings stream from the US utility assets in CAD terms. These factors have not been taken into account in Exhibit 6.

Between deal announcement and projected close, UNS Energy's overall utility rate base is positioned to increase by nearly US\$1bn or more than 40%. That rate base growth can be considered in the context of the overall FTS enterprise as appears in Exhibit 7.

UNS rate base projected to increase by 40% from announcement to close

#### Exhibit 7: Mid-year rate base including Waneta expansion investment (Dec 20, 2013)

C\$ in billions, unless otherwise stated

Note: Rate base includes 100% of the Waneta Expansion Project investment (51% ownership) to be completed by Spring 2015 and Caribbean Utilities (~60% ownership). (2) CAGR excludes the initial ~\$1B rate base addition in 2013 related to the Central Hudson acquisition. (3) Assumes C\$/US\$ FX rate of 1.03. Source: Company data

These capex forecasts may be compared to FTS numbers disclosed at the Edison Electric Institute conference in November appearing in Exhibit 8.

**Exhibit 8: Mid-year rate base and Waneta investment (Nov 12, 2013)**

<sup>(1)</sup> CAGR excludes the initial approximate \$1B rate base addition in 2013 related to the Central Hudson acquisition

<sup>(2)</sup> Includes approximately \$1B of rate base related to Central Hudson upon acquisition and expected rate base growth thereafter

Source: Company data

Clearly, we view growth capex positively in the infrastructure and utility business. Yet, one issue facing any growth profile is the balancing act of funding from internal cash flows and maintaining a strong balance sheet. Fortis is similar to many other utility and infrastructure investors and occasionally needs to bolster the balance sheet with external equity issues. Exhibit 9 illustrates deal and non-deal related common equity and convertible issuance for more than 10 years (the DRIP program is not included in these figures).

A delicate balancing act

**Exhibit 9: Selected FTS equity issuance (Shaded are non-M&A related equity transactions)**

Announced Date	Offer Price (C\$/sh)	# of shares (m)	Amount C\$m		Shoe Exercised	Use of Proceeds
			Original	Green Shoe		
12/11/2013	30.72	58.6	1,800.0	239.1		Convertible debt for M&A financing.
6/19/2012	32.50	18.5	601.3	90.2	N	Subscription receipts for M&A financing.
5/30/2011	33.00	9.1	300.3	40.9	Y	General corporate purposes and repay loan.

1/3/2007	29.00	5.2	149.9	-		General corporate purposes, M&A financing and repay debt/loan.
2/10/2005	74.65	1.7	129.9	-		General corporate purposes and repay loan.
9/16/2003	55.50	6.3	350.2	-		Subscription receipts for M&A financing and replay loan.
9/29/2000	34.50	1.5	51.8	7.8	N	Replay loan.

Source: Company data, Bloomberg and Credit Suisse

For the sake of completeness, we provide a list of preference share issues in Exhibit 10.

**Exhibit 10: Selected FTS preference shares issuance**

Announced Date	Offer Price (C\$/sh)	# of shares (m)	Amount C\$m		Shoe Exercised	Use of Proceeds
			Original	Upsized		
7/9/2013	25.00	10.0	250.0	50.0	N	Repay debt, Waneta Expansion, equity injection to subsidiary and general corp. purposes.
11/1/2012	25.00	6.0	150.0	50.0	Y	Repay debt for Waneta Expansion and general corp. purposes.
1/11/2010	25.00	10.0	250.0	-		Repay debt and equity injection into regulated subsidiary.
5/6/2008	25.00	8.0	200.0	30.0	Y	Repay debt for acquisitions and general corp. purposes.
9/15/2006	25.00	5.0	125.0			Repay debt for acquisition, equity injection into subsidiary and general corp. purposes
1/20/2004	6.25	8.0	50.0			Repay debt for acquisitions and general corp. purposes.

Source: Company data and Bloomberg

Pulling these issues together, we rely upon the FTS capital structure disclosure from each Q4 MD&A document over the last 10 years.

#### Exhibit 11: FTS historical capital structure

	2003	2004	2005	2006	2007	2008	2009	2010	2011	2012	Q3 2013
Total debt and capital lease and finance obligations (net of cash)	60.0%	61.4%	58.7%	61.1%	64.3%	59.5%	60.2%	58.4%	57.1%	55.3%	55.9%
Preference Shares	6.7%	9.4%	8.6%	10.0%	5.2%	7.3%	6.9%	9.0%	8.3%	9.7%	9.2%
Common shareholder's equity	33.3%	29.2%	32.7%	28.9%	30.5%	33.2%	32.9%	32.6%	34.6%	35.0%	34.9%

Source: Company data

With greater equity thickness requirements at most US utilities versus those in Canada, we have some concerns about the need for FTS to more regularly tap the common equity market to maintain balance sheet integrity. These figures look to be manageable in light of a growing balance sheet and overall company. Yet, the potential for ongoing capital needs and FTS being in an almost perpetual state of acquisition may somewhat detract from the fundamental analysis and create a more tactical positioning for the stock.

A cross-border capital structure question

With that background and context, we turn to our financial forecasts. Our initial take on the FTS-UNS deal can be seen on the note titled "[Raising Arizona](#)". In that note, we provided a very basic accretion analysis with the full dilution of the convertibles appearing Exhibit 12.

#### Exhibit 12: Accretion analysis (full dilution of convertibles)

in millions, unless otherwise stated

FY 2015	CS	Consensus
Net income		
FTS	403	410
UNS	142	147
Subtotal	545	557
Tax impacted incremental Interest	19	19
Total combined	526	538
Combined share count (FD)	271	271
Combined EPS (FD)	1.94	1.98
Stand alone FTS EPS	1.89	1.90
Accretion/(Dilution)	2.6%	4.4%

Source: Company data, Credit Suisse estimates and FactSet

With the CS coverage of both FTS and UNS, we based this rather quick analysis on our team's actual coverage and provided the consensus figures at that time for addition 2015 perspective. Given the FTS language expecting the deal to be "accretive to earnings per common share... ..in the first full year, excluding one-time Acquisition-related costs", the illustrative assumptions in Exhibit 12 might be slightly aggressive.

After a more thorough review of various filings, we have more robust financial forecasts that appear in Exhibit 13, Exhibit 14 and Exhibit 15. We start with our income statement in Exhibit 13 with the following highlights:

- EPS changes to C\$1.66, C\$1.57 and C\$1.95 from the previous C\$1.68, C\$1.82 and C\$1.89 for 2013, 2014 and 2015 respectively;
- The significant 2014 EPS decline is the result of the convertible debenture financing costs of roughly C\$72m (pre-tax) without the revenue contribution from the acquisition as the UNS transaction is expected to close near the end of 2014;

- The 2015 share count significantly increased to account for the convertible debenture conversion to common equity; and,
- The dividend per share forecast is unchanged.

**Exhibit 13: Selected summary income statement***C\$ in millions, unless otherwise stated*

Summary IS	2013	2014	2015	2016
Revenue	4,129.6	4,707.1	5,809.5	6,172.3
Expenses	(3,243.5)	(3,604.4)	(4,355.9)	(4,638.5)
EBIT	886.1	1,102.6	1,453.6	1,533.8
Interest	(394.4)	(539.0)	(652.5)	(689.7)

EPS - growth	1%	-5%	24%	6%
DPS - growth rate	2%	3%	3%	3%

*Source: Company data and Credit Suisse estimates*

From our perspective, perhaps the major takeaway from our balance sheet forecast is the gradual creep in net debt to total cap (including preference shares). Precisely, that ratio is roughly 54.8%, 63.2%, 57.3% and 57.1% for 2013, 2014, 2015 and 2016, respectively, on our forecasts. Exhibit 14 illustrates the full forecasts.

## Valuation

With greater reflection on the FTS deal for UNS, we downgrade the stock to Neutral from the prior Outperform and reduce our target price from C\$36 to C\$32. At this juncture, a few reasons support our reductions, including:

Rating: Neutral (from OP)

Target: C\$32 (from C\$36)

- The near-term impact of acquisition related financing;
- The type of financing;
- The regulatory risks related to the UNS deal; and,
- A future view of potential deal economics.

We continue to view FTS is a savvy utility investor with a longer-term view that matches well with longer-term equity holders, but the financing volatility can be problematic for shorter-term investors. To help put these views into context, we reflected upon a variety of historical valuation metrics that included:

- Price-to-earnings;
- Price-to-book;
- Dividend yield;
- Dividend yield spread; and,
- Dividend discount model.

Each of these valuation approaches appears in greater detail below.

## Price-to-earnings

Using FactSet data, we provide multiple valuation analyses using 10-year historical forward P/E multiples (see Exhibit 16 and Exhibit 17).

- For 1-year forward P/E peak multiple stood at roughly 22.8x, mean at 18.1x, while the stock is currently trading at roughly 18.1x; and,
- For 2-year forward P/E peak multiple stood at roughly 21.6x, mean at 17.0x, while the stock is currently trading at roughly 17.0x.

**Exhibit 16: Historical forward 1-year P/E**

Source: FactSet

**Exhibit 17: Historical forward 2-year P/E**

Source: FactSet

Base on a range of EPS and P/E multiples, hypothetical FTS share prices are presented below (Exhibit 18).

**Exhibit 18: Hypothetical FTS share price based on P/E**

		Earnings per share (C\$)									
		1.50	1.60	1.70	1.80	1.90	2.00	2.10	2.20	2.30	2.40

Source: Credit Suisse estimates

Looking at our illustrative EPS figures for 2016 of C\$2.07 and a less than average 17x 2-year forward multiple results in a theoretical future share price of roughly C\$35.

## Price-to-book

Historically, Fortis Inc. has traded at a 10-year average price-to-book multiple of 1.7x and within a range of 1.2x-2.4x (Exhibit 19).

**Exhibit 19: Historical price-to-book ratio**

Source: Factset

Similar to the price-to-earnings table above, we provide a hypothetical FTS share price based on certain P/B multiple and book values (Exhibit 20).

**Exhibit 20: Hypothetical FTS share price based on P/B**

		Book Value per share (C\$)									
		20.00	21.00	22.00	23.00	24.00	25.00	26.00	27.00	28.00	29.00

Source: Credit Suisse estimates

**Dividend yield**

On a dividend yield basis FTS is currently trading near 10-year average of 3.52%, within the range of 2.46% to 4.81% (see Exhibit 21).

**Exhibit 21: FTS dividend yield**

Source: FactSet

Given various dividend per share assumptions as well as dividend yields, hypothetical FTS share price appears in Exhibit 22.

**Exhibit 22: Hypothetical share value based on future dividends at various dividend yields**

Dividend Yield (%)											
		Dividend per share (C\$)

Source: Credit Suisse estimates

**Dividend yield spread**

We believe that one should not solely rely upon dividend yield based metrics. In our view, many yield based metrics should be considered in the context of comparable nominal interest rates available in the marketplace. For a number of reasons, we have considered Fortis Inc.'s historic dividend yield against the Government of Canada 10-year bond yield on a spread basis. Exhibit 23 displays the historical FTS yield spread. The 10-year average is roughly 12bps with a range of -179bps to 209bps.

**Exhibit 23: FTS dividend yield spread (bps)**

Source: Bloomberg

**The dividend discount model**

The dividend discount model provides a very simplified discounted cash flow based valuation tool. As one would expect, there is a significant amount of valuation sensitivity with a dividend discount model analysis. We capture part of that sensitivity in the table below (Exhibit 24).

**Exhibit 24: Hypothetical share value under different dividend discount model assumptions**

		Cost of Equity (%)									
		5.5%	6.00%	6.5%	7.0%	7.5%	8.0%	8.5%	9.0%	9.5%	10.0%

**Valuation summary**

Industry participants understand the many challenges and the uniqueness of utility M&A compared to many other industries. The critical nature of utility assets often translates into greater regulatory scrutiny. From our view, that reality along with size of outright deals starts to position FTS in an almost perpetual state of acquisition overhang. Given the likely volatility of financing M&A activities and the normal course equity issues for balance sheet "tweaking", stock performance may be more associated with tactical positioning rather than the fundamental growth – especially at the current valuation.

We revised our EPS estimates to C\$1.66, C\$1.57 and C\$1.95 from the previous C\$1.68, C\$1.82 and C\$1.89 for 2013, 2014 and 2015 respectively. We downgrade our rating to

Neutral from the prior Outperform and lower our target price to C\$32.00 from C\$36.00. That revised target price is obtained from multiple valuation methods, but primarily relies upon a targeted dividend yield of 4.13% (reflecting a 138bps spread on a forecast 2.75% Canadian 10-year) along with a 16.4x P/E multiple on 2015 EPS.

\* Asterisk signifies initiation or assumption of coverage.

The analyst(s) responsible for preparing this research report received Compensation that is based upon various factors including Credit Suisse's total revenues, a portion of which are generated by Credit Suisse's investment banking activities

**As of December 10, 2012 Analysts' stock rating are defined as follows:**

**Outperform (O) :** The stock's total return is expected to outperform the relevant benchmark\* over the next 12 months.

**Neutral (N) :** The stock's total return is expected to be in line with the relevant benchmark\* over the next 12 months.

**Underperform (U) :** The stock's total return is expected to underperform the relevant benchmark\* over the next 12 months.

\*Relevant benchmark by region: As of 10th December 2012, Japanese ratings are based on a stock's total return relative to the analyst's coverage universe which consists of all companies covered by the analyst within the relevant sector, with Outperforms representing the most attractive, Neutrals the less attractive, and Underperforms the least attractive investment opportunities. As of 2nd October 2012, U.S. and Canadian as well as European ratings are based on a stock's total return relative to the analyst's coverage universe which consists of all companies covered by the analyst within the relevant sector, with Outperforms representing the most attractive, Neutrals the less attractive, and Underperforms the least attractive investment opportunities. For Latin American and non-Japan Asia stocks, ratings are based on a stock's total return relative to the average total return of the relevant country or regional benchmark; Australia, New Zealand are, and prior to 2nd October 2012 U.S. and Canadian ratings were based on (1) a stock's absolute total return potential to its current share price and (2) the relative attractiveness of a stock's total return potential within an analyst's coverage universe. For Australian and New Zealand stocks, 12-month rolling yield is incorporated in the absolute total return calculation and a 15% and a 7.5% threshold replace the 10-15% level in the Outperform and Underperform stock rating definitions, respectively. The 15% and 7.5% thresholds replace the +10-15% and -10-15% levels in the Neutral stock rating definition, respectively. Prior to 10th December 2012, Japanese ratings were based on a stock's total return relative to the average total return of the relevant country or regional benchmark.

**Restricted (R) :** In certain circumstances, Credit Suisse policy and/or applicable law and regulations preclude certain types of communications, including an investment recommendation, during the course of Credit Suisse's engagement in an investment banking transaction and in certain other circumstances.

**Volatility Indicator [V] :** A stock is defined as volatile if the stock price has moved up or down by 20% or more in a month in at least 8 of the past 24 months or the analyst expects significant volatility going forward.

Analysts' sector weightings are distinct from analysts' stock ratings and are based on the analyst's expectations for the fundamentals and/or valuation of the sector\* relative to the group's historic fundamentals and/or valuation:

**Overweight :** The analyst's expectation for the sector's fundamentals and/or valuation is favorable over the next 12 months.

**Market Weight :** The analyst's expectation for the sector's fundamentals and/or valuation is neutral over the next 12 months.

**Underweight :** The analyst's expectation for the sector's fundamentals and/or valuation is cautious over the next 12 months.

\*An analyst's coverage sector consists of all companies covered by the analyst within the relevant sector. An analyst may cover multiple sectors.

Credit Suisse's distribution of stock ratings (and banking clients) is:

### Global Ratings Distribution

Rating	Versus universe (%)	Of which banking clients (%)
Outperform/Buy*	43%	(54% banking clients)
Neutral/Hold*	41%	(48% banking clients)
Underperform/Sell*	14%	(43% banking clients)
Restricted	3%	

\*For purposes of the NYSE and NASD ratings distribution disclosure requirements, our stock ratings of Outperform, Neutral, and Underperform most closely correspond to Buy, Hold, and Sell, respectively; however, the meanings are not the same, as our stock ratings are determined on a relative basis. (Please refer to definitions above.) An investor's decision to buy or sell a security should be based on investment objectives, current holdings, and other individual factors.

Credit Suisse's policy is to update research reports as it deems appropriate, based on developments with the subject company, the sector or the market that may have a material impact on the research views or opinions stated herein.

Credit Suisse's policy is only to publish investment research that is impartial, independent, clear, fair and not misleading. Credit Suisse does not provide any tax advice. Any statement herein regarding any US federal tax is not intended or written to be used, and cannot be used, by any taxpayer for the purposes of avoiding any penalties.

### Price Target: (12 months) for Fortis Inc. (FTS.TO)

**Method:** We obtain our C\$32.00 target price for Fortis Inc. by using multiple valuation methodologies, but primarily rely upon a targeted dividend yield of 4.13% and an imputed 138 bps spread over a 2.75% Canadian 10-year bond yield.

**Risk:** There are a number of risks to Fortis' achievement of our C\$32.00 target price: commodity prices; weather; environmental; regulatory; access to capital markets; and, interest rates. Moreover, one should never underestimate the power of the regulator in any regulated business.

Please refer to the firm's disclosure website at <https://rave.credit-suisse.com/disclosures> for the definitions of abbreviations typically used in the target price method and risk sections.

See the *Companies Mentioned* section for full company names

The subject company (FTS.TO) currently is, or was during the 12-month period preceding the date of distribution of this report, a client of Credit Suisse.

Credit Suisse provided non-investment banking services to the subject company (FTS.TO) within the past 12 months

Credit Suisse expects to receive or intends to seek investment banking related compensation from the subject company (FTS.TO) within the next 3 months.

Credit Suisse has received compensation for products and services other than investment banking services from the subject company (FTS.TO) within the past 12 months

### Important Regional Disclosures

Singapore recipients should contact Credit Suisse AG, Singapore Branch for any matters arising from this research report.

An analyst involved in the preparation of this report has visited certain material operations of the subject company (FTS.TO) within the past 12 months

The travel expenses of the analyst in connection with such visits were not paid or reimbursed by the subject company, other than de minimus local travel expenses.

Restrictions on certain Canadian securities are indicated by the following abbreviations: NVS--Non-Voting shares; RVS--Restricted Voting Shares; SVS--Subordinate Voting Shares.

Individuals receiving this report from a Canadian investment dealer that is not affiliated with Credit Suisse should be advised that this report may not contain regulatory disclosures the non-affiliated Canadian investment dealer would be required to make if this were its own report.

The information, tools and material presented in this report are provided to you for information purposes only and are not to be used or considered as an offer or the solicitation of an offer to sell or to buy or subscribe for securities or other financial instruments. CS may not have taken any steps to ensure that the securities referred to in this report are suitable for any particular investor. CS will not treat recipients of this report as its customers by virtue of their receiving this report. The investments and services contained or referred to in this report may not be suitable for you and it is recommended that you consult an independent investment advisor if you are in doubt about such investments or investment services. Nothing in this report constitutes investment, legal, accounting or tax advice, or a representation that any investment or strategy is suitable or appropriate to your individual circumstances, or otherwise constitutes a personal recommendation to you. CS does not advise on the tax consequences of investments and you are advised to contact an independent tax adviser. Please note in particular that the bases and levels of taxation may change. Information and opinions presented in this report have been obtained or derived from sources believed by CS to be reliable, but CS makes no representation as to their accuracy or completeness. CS accepts no liability for loss arising from the use of the material presented in this report, except that this exclusion of liability does not apply to the extent that such liability arises under specific statutes or regulations applicable to CS. This report is not to be relied upon in substitution for the exercise of independent judgment. CS may have issued, and may in the future issue, other communications that are inconsistent with, and reach different conclusions from, the information presented in this report. Those communications reflect the different assumptions, views and analytical methods of the analysts who prepared them and CS is under no obligation to ensure that such other communications are brought to the attention of any recipient of this report. CS may, to the extent permitted by law, participate or invest in financing transactions with the issuer(s) of the securities referred to in this report, perform services for or solicit business from such issuers, and/or have a position or holding, or other material interest, or effect transactions, in such securities or options thereon, or other investments related thereto. In addition, it may make markets in the securities mentioned in the material presented in this report. CS may have, within the last three years, served as manager or co-manager of a public offering of securities for, or currently may make a primary market in issues of, any or all of the entities mentioned in this report or may be providing, or have provided within the previous 12 months, significant advice or investment services in relation to the investment concerned or a related investment. Additional information is, subject to duties of confidentiality, available on request. Some investments referred to in this report will be offered solely by a single entity and in the case of some investments solely by CS, or an associate of CS or CS may be the only market maker in such investments. Past performance should not be taken as an indication or guarantee of future performance, and no representation or warranty, express or implied, is made regarding future performance. Information, opinions and estimates contained in this report reflect a judgment at its original date of publication by CS and are subject to change without notice. The price, value of and income from any of the securities or financial instruments mentioned in this report can fall as well as rise. The value of securities and financial instruments is subject to exchange rate fluctuation that may have a positive or adverse effect on the price or income of such securities or financial instruments. Investors in securities such as ADR's, the values of which are influenced by currency volatility, effectively assume this risk. Structured securities are complex instruments, typically involve a high degree of risk and are intended for sale only to sophisticated investors who are capable of understanding and assuming the risks involved. The market value of any structured security may be affected by changes in economic, financial and political factors (including, but not limited to, spot and forward interest and exchange rates), time to maturity, market conditions and volatility, and the credit quality of any issuer or reference issuer. Any investor interested in purchasing a structured product should conduct their own investigation and analysis of the product and consult with their own professional advisers as to the risks involved in making such a purchase. Some investments discussed in this report may have a high level of volatility. High volatility investments may experience sudden and large falls in their value causing losses when that investment is realised. Those losses may equal your original investment. Indeed, in the case of some investments the potential losses may exceed the amount of initial investment and, in such circumstances, you may be required to pay more money to support those losses. Income yields from investments may fluctuate and, in consequence, initial capital paid to make the investment may be used as part of that income yield. Some investments may not be readily realisable and it may be difficult to sell or realise those investments, similarly it may prove difficult for you to obtain reliable information about the value, or risks, to which such an investment is exposed. This report may provide the addresses of, or contain hyperlinks to, websites. Except to the extent to which the report refers to website material of CS, CS has not reviewed any such site and takes no responsibility for the content contained therein. Such address or hyperlink (including addresses or hyperlinks to CS's own website material) is provided solely for your convenience and information and the content of any such website does not in any way form part of this document. Research provided to residents of Malaysia is authorised by the Head of Research for Credit Suisse Securities (Malaysia) Sdn Bhd, to whom they should direct any queries on +603 2723 2020. This report has been prepared and issued for distribution in Singapore to institutional investors, accredited investors and expert investors (each as defined under the Financial Advisers Regulations) only, and is also distributed by Credit Suisse AG, Singapore branch to overseas investors (as defined under the Financial Advisers Regulations). By virtue of your status as an institutional investor, accredited investor, expert investor or overseas investor, Credit Suisse AG, Singapore branch is exempted from complying with certain compliance requirements under the Financial Advisers Act, Chapter 110 of Singapore (the "FAA"), the Financial Advisers Regulations and the relevant Notices and Guidelines issued thereunder, in respect of any financial advisory service which Credit Suisse AG, Singapore branch may provide to you. This research may not conform to Canadian disclosure requirements. In jurisdictions where CS is not already registered or licensed to trade in securities, transactions will only be effected in accordance with applicable securities legislation, which will vary from jurisdiction to jurisdiction and may require that the trade be made in accordance with applicable exemptions from registration or licensing requirements. Non-U.S. customers wishing to effect a transaction should contact a CS entity in their local jurisdiction unless governing law permits otherwise. U.S. customers wishing to effect a transaction should do so only by contacting a representative at Credit Suisse Securities (USA) LLC in the U.S. Please note that this research was originally prepared and issued by CS for distribution to their market professional and institutional investor customers. Recipients who are not market professional or institutional investor customers of CS should seek the advice of their independent financial advisor prior to taking any investment decision based on this report or for any necessary explanation of its contents. This research may relate to investments or services of a person outside of the UK or to other matters which are not authorised by the Prudential Regulation Authority and regulated by the Financial Conduct Authority and the Prudential Regulation Authority or in respect of which the protections of the Prudential Regulation Authority and Financial Conduct Authority for private customers and/or the UK compensation scheme may not be available, and further details as to where this may be the case are available upon request in respect of this report. CS may provide various services to US municipal entities or obligated persons ("municipalities"), including suggesting individual transactions or trades and entering into such transactions. Any services CS provides to municipalities are not viewed as "advice" within the meaning of Section 975 of the Dodd-Frank Wall Street Reform and Consumer Protection Act. CS is providing any such services and related information solely on an arm's length basis and not as an advisor or fiduciary to the municipality. In connection with the provision of the any such services, there is no agreement, direct or indirect, between any municipality (including the officials, management, employees or agents thereof) and CS for CS to provide advice to the municipality. Municipalities should consult with their financial, accounting and legal advisors regarding any such services provided by CS. In addition, CS is not acting for direct or indirect compensation to solicit the municipality on behalf of an unaffiliated broker, dealer, municipal securities dealer, municipal advisor, or investment adviser for the purpose of obtaining or retaining an engagement by the municipality for or in connection with Municipal Financial Products, the issuance of municipal securities, or of an investment adviser to provide investment advisory services to or on behalf of the municipality. If this report is being distributed by a financial institution other than Credit Suisse AG, or its affiliates, that financial institution is solely responsible for distribution. Clients of that institution should contact that institution to effect a transaction in the securities mentioned in this report or require further information. This report does not constitute investment advice by Credit Suisse to the clients of the distributing financial institution, and neither Credit Suisse AG, its affiliates, and their respective officers, directors and employees accept any liability whatsoever for any direct or consequential loss arising from their use of this report or its content. Principal is not guaranteed. Commission is the commission rate or the amount agreed with a customer when setting up an account or at any time after that.

### RESULTS

## At a glance: Near-term UNS timeline and a likely longer-term M&A overhang

- **Earnings review:** Fortis reported Q4 2013 headline EPS (FD) of C\$0.47 a miss versus our C\$0.50 estimate and the Street's C\$0.483 view (range of C\$0.44-C\$0.50). The quarterly dividend increased to C\$0.32/sh from the previous C\$0.31/sh – meeting expectations. We view the performance of FTS shares this year to be largely tied to the UNS acquisition process and timeline rather than core business fundamentals. We do not place undue emphasis on quarterly results as a result of the inherently long-cycle nature of many assets.
- **Significant organic growth continues:** FTSs continues to provide a robust capital expenditure outlook of C\$1.4bn for 2014 (C\$1.2bn in 2013). The 5-year capex outlook increased to C\$6.5bn (ex-US\$1.4bn from UNS) from the previous C\$6bn. FTS stated, "Our capital program, which will be mostly funded with cash from operations and long-term debt at the regulated utility level, will support continuing growth in earnings and dividends". With the UNS deal pending, FTS did not discuss other acquisition opportunities.
- **Investment thesis:** We continue to believe FTS has a positive track record with acquisitions, however, the method of financing for UNS and the sheer size create some stock performance issues. Moreover, we have a degree of concern regarding the UNS return profile in the years ahead. Beyond UNS, we view the FTS stock as suffering from a longer-term M&A overhang.
- **Building book value: Valuation:** Our target price of C\$32.00 is on an implied yield of 4.13% and a yield spread of roughly 138 bps on a 2.75% Canadian 10-year. We maintain our Neutral rating.

\* Asterisk signifies initiation or assumption of coverage.

The analyst(s) responsible for preparing this research report received Compensation that is based upon various factors including Credit Suisse's total revenues, a portion of which are generated by Credit Suisse's investment banking activities

**As of December 10, 2012 Analysts' stock rating are defined as follows:**

**Outperform (O) :** The stock's total return is expected to outperform the relevant benchmark\* over the next 12 months.

**Neutral (N) :** The stock's total return is expected to be in line with the relevant benchmark\* over the next 12 months.

**Underperform (U) :** The stock's total return is expected to underperform the relevant benchmark\* over the next 12 months.

\*Relevant benchmark by region: As of 10th December 2012, Japanese ratings are based on a stock's total return relative to the analyst's coverage universe which consists of all companies covered by the analyst within the relevant sector, with Outperforms representing the most attractive, Neutrals the less attractive, and Underperforms the least attractive investment opportunities. As of 2nd October 2012, U.S. and Canadian as well as European ratings are based on a stock's total return relative to the analyst's coverage universe which consists of all companies covered by the analyst within the relevant sector, with Outperforms representing the most attractive, Neutrals the less attractive, and Underperforms the least attractive investment opportunities. For Latin American and non-Japan Asia stocks, ratings are based on a stock's total return relative to the average total return of the relevant country or regional benchmark; Australia, New Zealand are, and prior to 2nd October 2012 U.S. and Canadian ratings were based on (1) a stock's absolute total return potential to its current share price and (2) the relative attractiveness of a stock's total return potential within an analyst's coverage universe. For Australian and New Zealand stocks, 12-month rolling yield is incorporated in the absolute total return calculation and a 15% and a 7.5% threshold replace the 10-15% level in the Outperform and Underperform stock rating definitions, respectively. The 15% and 7.5% thresholds replace the +10-15% and -10-15% levels in the Neutral stock rating definition, respectively. Prior to 10th December 2012, Japanese ratings were based on a stock's total return relative to the average total return of the relevant country or regional benchmark.

**Restricted (R) :** In certain circumstances, Credit Suisse policy and/or applicable law and regulations preclude certain types of communications, including an investment recommendation, during the course of Credit Suisse's engagement in an investment banking transaction and in certain other circumstances.

**Volatility Indicator [V] :** A stock is defined as volatile if the stock price has moved up or down by 20% or more in a month in at least 8 of the past 24 months or the analyst expects significant volatility going forward.

Analysts' sector weightings are distinct from analysts' stock ratings and are based on the analyst's expectations for the fundamentals and/or valuation of the sector\* relative to the group's historic fundamentals and/or valuation:

**Overweight :** The analyst's expectation for the sector's fundamentals and/or valuation is favorable over the next 12 months.

**Market Weight :** The analyst's expectation for the sector's fundamentals and/or valuation is neutral over the next 12 months.

**Underweight :** The analyst's expectation for the sector's fundamentals and/or valuation is cautious over the next 12 months.

\*An analyst's coverage sector consists of all companies covered by the analyst within the relevant sector. An analyst may cover multiple sectors.

Credit Suisse's distribution of stock ratings (and banking clients) is:

#### Global Ratings Distribution

Rating	Versus universe (%)	Of which banking clients (%)
Outperform/Buy*	43%	(54% banking clients)
Neutral/Hold*	41%	(48% banking clients)
Underperform/Sell*	14%	(43% banking clients)
Restricted	2%	

\*For purposes of the NYSE and NASD ratings distribution disclosure requirements, our stock ratings of Outperform, Neutral, and Underperform most closely correspond to Buy, Hold, and Sell, respectively; however, the meanings are not the same, as our stock ratings are determined on a relative basis. (Please refer to definitions above.) An investor's decision to buy or sell a security should be based on investment objectives, current holdings, and other individual factors.

Credit Suisse's policy is to update research reports as it deems appropriate, based on developments with the subject company, the sector or the market that may have a material impact on the research views or opinions stated herein.

Credit Suisse's policy is only to publish investment research that is impartial, independent, clear, fair and not misleading. Credit Suisse does not provide any tax advice. Any statement herein regarding any US federal tax is not intended or written to be used, and cannot be used, by any taxpayer for the purposes of avoiding any penalties.

#### Price Target: (12 months) for Fortis Inc. (FTS.TO)

**Method:** We obtain our C\$32.00 target price for Fortis Inc. by using multiple valuation methodologies, but primarily rely upon a targeted dividend yield of 4.13% and an imputed 138 bps spread over a 2.75% Canadian 10-year bond yield.

**Risk:** There are a number of risks to Fortis' achievement of our C\$32.00 target price: commodity prices; weather; environmental; regulatory; access to capital markets; and, interest rates. Moreover, one should never underestimate the power of the regulator in any regulated business.

Please refer to the firm's disclosure website at <https://rave.credit-suisse.com/disclosures> for the definitions of abbreviations typically used in the target price method and risk sections.

See the *Companies Mentioned* section for full company names

The subject company (FTS.TO) currently is, or was during the 12-month period preceding the date of distribution of this report, a client of Credit Suisse.

Credit Suisse provided non-investment banking services to the subject company (FTS.TO) within the past 12 months

Credit Suisse expects to receive or intends to seek investment banking related compensation from the subject company (FTS.TO) within the next 3 months.

Credit Suisse has received compensation for products and services other than investment banking services from the subject company (FTS.TO) within the past 12 months

#### Important Regional Disclosures

Singapore recipients should contact Credit Suisse AG, Singapore Branch for any matters arising from this research report.

An analyst involved in the preparation of this report has visited certain material operations of the subject company (FTS.TO) within the past 12 months

The travel expenses of the analyst in connection with such visits were not paid or reimbursed by the subject company, other than de minimus local travel expenses.

Restrictions on certain Canadian securities are indicated by the following abbreviations: NVS--Non-Voting shares; RVS--Restricted Voting Shares; SVS--Subordinate Voting Shares.

Individuals receiving this report from a Canadian investment dealer that is not affiliated with Credit Suisse should be advised that this report may not contain regulatory disclosures the non-affiliated Canadian investment dealer would be required to make if this were its own report.

For Credit Suisse Securities (Canada), Inc.'s policies and procedures regarding the dissemination of equity research, please visit [http://www.csfb.com/legal\\_terms/canada\\_research\\_policy.shtml](http://www.csfb.com/legal_terms/canada_research_policy.shtml).

As of the date of this report, Credit Suisse acts as a market maker or liquidity provider in the equities securities that are the subject of this report.

Principal is not guaranteed in the case of equities because equity prices are variable.

Commission is the commission rate or the amount agreed with a customer when setting up an account or at any time after that.

To the extent this is a report authored in whole or in part by a non-U.S. analyst and is made available in the U.S., the following are important disclosures regarding any non-U.S. analyst contributors: The non-U.S. research analysts listed below (if any) are not registered/qualified as research analysts with FINRA. The non-U.S. research analysts listed below may not be associated persons of CSSU and therefore may not be subject to the NASD Rule 2711 and NYSE Rule 472 restrictions on communications with a subject company, public appearances and trading securities held by a research analyst account.

This report may contain material that is not directed to, or intended for distribution to or use by, any person or entity who is a citizen or resident of or located in any locality, state, country or other jurisdiction where such distribution, publication, availability or use would be contrary to law or regulation or which would subject Credit Suisse AG or its affiliates ("CS") to any registration or licensing requirement within such jurisdiction. All material presented in this report, unless specifically indicated otherwise, is under copyright to CS. None of the material, nor its content, nor any copy of it, may be altered in any way, transmitted to, copied or distributed to any other party, without the prior express written permission of CS. All trademarks, service marks and logos used in this report are trademarks or service marks or registered trademarks or service marks of CS or its affiliates. The information, tools and material presented in this report are provided to you for information purposes only and are not to be used or considered as an offer or the solicitation of an offer to sell or to buy or subscribe for securities or other financial instruments. CS may not have taken any steps to ensure that the securities referred to in this report are suitable for any particular investor. CS will not treat recipients of this report as its customers by virtue of their receiving this report. The investments and services contained or referred to in this report may not be suitable for you and it is recommended that you consult an independent investment advisor if you are in doubt about such investments or investment services. Nothing in this report constitutes investment, legal, accounting or tax advice, or a representation that any investment or strategy is suitable or appropriate to your individual circumstances, or otherwise constitutes a personal recommendation to you. CS does not advise on the tax consequences of investments and you are advised to contact an independent tax adviser. Please note in particular that the bases and levels of taxation may change. Information and opinions presented in this report have been obtained or derived from sources believed by CS to be reliable, but CS makes no representation as to their accuracy or completeness. CS accepts no liability for loss arising from the use of the material presented in this report, except that this exclusion of liability does not apply to the extent that such liability arises under specific statutes or regulations applicable to CS. This report is not to be relied upon in substitution for the exercise of independent judgment. CS may have issued, and may in the future issue, other communications that are inconsistent with, and reach different conclusions from, the information presented in this report. Those communications reflect the different assumptions, views and analytical methods of the analysts who prepared them and CS is under no obligation to ensure that such other communications are brought to the attention of any recipient of this report. CS may, to the extent permitted by law, participate or invest in financing transactions with the issuer(s) of the securities referred to in this report, perform services for or solicit business from such issuers, and/or have a position or holding, or other material interest, or effect transactions, in such securities or options thereon, or other investments related thereto. In addition, it may make markets in the securities mentioned in the material presented in this report. CS may have, within the last three years, served as manager or co-manager of a public offering of securities for, or currently may make a primary market in issues of, any or all of the entities mentioned in this report or may be providing, or have provided within the previous 12 months, significant advice or investment services in relation to the investment concerned or a related investment. Additional information is, subject to duties of confidentiality, available on request. Some investments referred to in this report will be offered solely by a single entity and in the case of some investments solely by CS, or an associate of CS or CS may be the only market maker in such investments. Past performance should not be taken as an indication or guarantee of future performance, and no representation or warranty, express or implied, is made regarding future performance. Information, opinions and estimates contained in this report reflect a judgment at its original date of publication by CS and are subject to change without notice. The price, value of and income from any of the securities or financial instruments mentioned in this report can fall as well as rise. The value of securities and financial instruments is subject to exchange rate fluctuation that may have a positive or adverse effect on the price or income of such securities or financial instruments. Investors in securities such as ADR's, the values of which are influenced by currency volatility, effectively assume this risk. Structured securities are complex instruments, typically involve a high degree of risk and are intended for sale only to sophisticated investors who are capable of understanding and assuming the risks involved. The market value of any structured security may be affected by changes in economic, financial and political factors (including, but not limited to, spot and forward interest and exchange rates), time to maturity, market conditions and volatility, and the credit quality of any issuer or reference issuer. Any investor interested in purchasing a structured product should conduct their own investigation and analysis of the product and consult with their own professional advisers as to the risks involved in making such a purchase. Some investments discussed in this report may have a high level of volatility. High volatility investments may experience sudden and large falls in their value causing losses when that investment is realised. Those losses may equal your original investment. Indeed, in the case of some investments the potential losses may exceed the amount of initial investment and, in such circumstances, you may be required to pay more money to support those losses. Income yields from investments may fluctuate and, in consequence, initial capital paid to make the investment may be used as part of that income yield. Some investments may not be readily realisable and it may be difficult to sell or realise those investments, similarly it may prove difficult for you to obtain reliable information about the value, or risks, to which such an investment is exposed. This report may provide the addresses of, or contain hyperlinks to, websites. Except to the extent to which the report refers to website material of CS, CS has not reviewed any such site and takes no responsibility for the content contained therein. Such address or hyperlink (including addresses or hyperlinks to CS's own website material) is provided solely for your convenience and information and the content of any such website does not in any way form part of this document. Accessing such website or following such link through this report or CS's website shall be at your own risk. This report is issued and distributed in Europe (except Switzerland) by Credit Suisse Securities (Europe) Limited, One Cabot Square, London E14 4QJ, England, which is authorised by the Prudential Regulation Authority and regulated by the Financial Conduct Authority and the Prudential Regulation Authority. Road, Worli, Mumbai - 18, India, T. +91-22 6777 3777, Credit Suisse Securities (Europe) Limited, Seoul Branch, Credit Suisse AG, Taipei Securities Branch, PT Credit Suisse Securities Indonesia, Credit Suisse Securities (Philippines) Inc., and elsewhere in the world by the relevant authorised affiliate of the above. Research on Taiwanese securities produced by Credit Suisse AG, Taipei Securities Branch has been prepared by a registered Senior Business Person. Research provided to residents of Malaysia is authorised by the Head of Research for Credit Suisse Securities (Malaysia) Sdn Bhd, to whom they should direct any queries on +603 2723 2020. This report has been prepared and issued for distribution in Singapore to institutional investors, accredited investors and expert investors (each as defined under the Financial Advisers Regulations) only, and is also distributed by Credit Suisse AG, Singapore branch to overseas investors (as defined under the Financial Advisers Regulations). By virtue of your status as an institutional investor, accredited investor, expert investor or overseas investor, Credit Suisse AG, Singapore branch is exempted from complying with certain compliance requirements under the Financial Advisers Act, Chapter 110 of Singapore (the "FAA"), the Financial Advisers Regulations and the relevant Notices and Guidelines issued thereunder, in respect of any financial advisory service which Credit Suisse AG, Singapore branch may provide to you. This research may not conform to Canadian disclosure requirements. In jurisdictions where CS is not already registered or licensed to trade in securities, transactions will only be effected in accordance with applicable securities legislation, which will vary from jurisdiction to jurisdiction and may require that the trade be made in accordance with applicable exemptions from registration or licensing requirements. Non-U.S. customers wishing to effect a transaction should contact a CS entity in their local jurisdiction unless governing law permits otherwise. U.S. customers wishing to effect a transaction should do so only by contacting a representative at Credit Suisse Securities (USA) LLC in the U.S. Please note that this research was originally prepared and issued by CS for distribution to their market professional and institutional investor customers. Recipients who are not market professional or institutional investor customers of CS should seek the advice of their independent financial advisor prior to taking any investment decision based on this report or for any necessary explanation of its contents. This research may relate to investments or services of a person outside of the UK or to other matters which are not authorised by the Prudential Regulation Authority and regulated by the Financial Conduct Authority and the Prudential Regulation Authority or in respect of which the protections of the Prudential Regulation Authority and Financial Conduct Authority for private customers and/or the UK compensation scheme may not be available, and further details as to where this may be the case are available upon request in respect of this report. CS may provide various services to US municipal entities or obligated persons ("municipalities"), including suggesting individual transactions or trades and entering into such transactions. Any services CS provides to municipalities are not viewed as "advice" within the meaning of Section 975 of the Dodd-Frank Wall Street Reform and Consumer Protection Act. CS is providing any such services and related information solely on an arm's length basis and not as an advisor or fiduciary to the municipality. In connection with the provision of the any such services, there is no agreement, direct or indirect, between any municipality (including the officials, management, employees or agents thereof) and CS for CS to provide advice to the municipality. Municipalities should consult with their financial, accounting and legal advisors regarding any such services provided by CS. In addition, CS is not acting for direct or indirect compensation to solicit the municipality on behalf of an unaffiliated broker, dealer, municipal securities dealer, municipal advisor, or investment adviser for the purpose of obtaining or retaining an engagement by the municipality for or in connection with Municipal Financial Products, the issuance of municipal securities, or of an investment adviser to provide investment advisory services to or on behalf of the municipality. If this report is being distributed by a financial institution other than Credit Suisse AG, or its affiliates, that financial institution is solely responsible for distribution. Clients of that institution should contact that institution to effect a transaction in the securities mentioned in this report or require further information. This report does not constitute investment advice by Credit Suisse to the clients of the distributing financial institution, and neither Credit Suisse AG, its affiliates, and their respective officers, directors and employees accept any liability whatsoever for any direct or consequential loss arising from their use of this report or its content. Principal is not guaranteed. Commission is the commission rate or the amount agreed with a customer when setting up an account or at any time after that.

## RESULTS

### At a glance: Awaiting Arizona action

- **Earnings review:** Fortis reported Q1 2014 headline EPS (FD) of C\$0.66 and an adjusted C\$0.70. Our view of the adjusted number is roughly C\$0.64; that excludes a C\$5m gain on sale of Griffith, but includes C\$11m interest on the convertible. That adjusted figure beat both our C\$0.61 view and the Street's C\$0.63 (range of C\$0.61-C\$0.67). We view the performance of FTS shares this year to be largely tied to the regulatory process for the UNS deal rather than core business fundamentals. We do not place undue emphasis on quarterly results as a result of the inherently long-cycle nature of many assets.
- **Significant organic growth continues:** FTS continues to provide a robust capital expenditure outlook of C\$1.4bn for 2014. The 5-year capex outlook is around C\$6.5bn (ex-C\$1.5bn from UNS). With the UNS deal pending, FTS did not focus upon any other acquisition opportunities. For context, Exelon's recent announcement to acquire Pepco and Berkshire's AltaLink deal are two good examples of relative utility asset valuations (see associated notes at ([EXC-POM](#), [AltaLink](#) and [FTS-UNS](#)) that highlight the UNS deal price.
- **Investment thesis:** We continue to believe FTS has a positive track record with acquisitions; however, the method of financing for UNS and the sheer size create some stock performance issues. Moreover, we have a degree of concern regarding the UNS return profile in the years ahead. Beyond UNS, we view the FTS stock as suffering from a longer-term M&A overhang until the organic growth transition is clear.
- **Valuation:** Our target price of C\$32.00 is on an implied yield of 4.13% and a yield spread of roughly 138 bps on a 2.75% Canadian 10-year. We maintain our Neutral rating.

28-Jan-14	29.99	32.00	N

\* Asterisk signifies initiation or assumption of coverage.

The analyst(s) responsible for preparing this research report received Compensation that is based upon various factors including Credit Suisse's total revenues, a portion of which are generated by Credit Suisse's investment banking activities

### As of December 10, 2012 Analysts' stock rating are defined as follows:

**Outperform (O)** : The stock's total return is expected to outperform the relevant benchmark\* over the next 12 months.

**Neutral (N)** : The stock's total return is expected to be in line with the relevant benchmark\* over the next 12 months.

**Underperform (U)** : The stock's total return is expected to underperform the relevant benchmark\* over the next 12 months.

\*Relevant benchmark by region: As of 10th December 2012, Japanese ratings are based on a stock's total return relative to the analyst's coverage universe which consists of all companies covered by the analyst within the relevant sector, with Outperforms representing the most attractive, Neutrals the less attractive, and Underperforms the least attractive investment opportunities. As of 2nd October 2012, U.S. and Canadian as well as European ratings are based on a stock's total return relative to the analyst's coverage universe which consists of all companies covered by the analyst within the relevant sector, with Outperforms representing the most attractive, Neutrals the less attractive, and Underperforms the least attractive investment opportunities. For Latin American and non-Japan Asia stocks, ratings are based on a stock's total return relative to the average total return of the relevant country or regional benchmark; prior to 2nd October 2012 U.S. and Canadian ratings were based on (1) a stock's absolute total return potential to its current share price and (2) the relative attractiveness of a stock's total return potential within an analyst's coverage universe. For Australian and New Zealand stocks, 12-month rolling yield is incorporated in the absolute total return calculation and a 15% and a 7.5% threshold replace the 10-15% level in the Outperform and Underperform stock rating definitions, respectively. The 15% and 7.5% thresholds replace the +10-15% and -10-15% levels in the Neutral stock rating definition, respectively. Prior to 10th December 2012, Japanese ratings were based on a stock's total return relative to the average total return of the relevant country or regional benchmark.

**Restricted (R)** : In certain circumstances, Credit Suisse policy and/or applicable law and regulations preclude certain types of communications, including an investment recommendation, during the course of Credit Suisse's engagement in an investment banking transaction and in certain other circumstances.

**Volatility Indicator [V]** : A stock is defined as volatile if the stock price has moved up or down by 20% or more in a month in at least 8 of the past 24 months or the analyst expects significant volatility going forward.

Analysts' sector weightings are distinct from analysts' stock ratings and are based on the analyst's expectations for the fundamentals and/or valuation of the sector\* relative to the group's historic fundamentals and/or valuation:

**Overweight** : The analyst's expectation for the sector's fundamentals and/or valuation is favorable over the next 12 months.

**Market Weight** : The analyst's expectation for the sector's fundamentals and/or valuation is neutral over the next 12 months.

**Underweight** : The analyst's expectation for the sector's fundamentals and/or valuation is cautious over the next 12 months.

\*An analyst's coverage sector consists of all companies covered by the analyst within the relevant sector. An analyst may cover multiple sectors.

Credit Suisse's distribution of stock ratings (and banking clients) is:

### Global Ratings Distribution

Rating	Versus universe (%)	Of which banking clients (%)
Outperform/Buy*	44%	(54% banking clients)
Neutral/Hold*	40%	(49% banking clients)
Underperform/Sell*	13%	(44% banking clients)
Restricted	3%	

*\*For purposes of the NYSE and NASD ratings distribution disclosure requirements, our stock ratings of Outperform, Neutral, and Underperform most closely correspond to Buy, Hold, and Sell, respectively; however, the meanings are not the same, as our stock ratings are determined on a relative basis. (Please refer to definitions above.) An investor's decision to buy or sell a security should be based on investment objectives, current holdings, and other individual factors.*

Credit Suisse's policy is to update research reports as it deems appropriate, based on developments with the subject company, the sector or the market that may have a material impact on the research views or opinions stated herein.

Credit Suisse's policy is only to publish investment research that is impartial, independent, clear, fair and not misleading. ### Price Target: (12 months) for Fortis Inc. (FTS.TO)

**Method:** We obtain our C\$32.00 target price for Fortis Inc. by using multiple valuation methodologies, but primarily rely upon a targeted dividend yield of 4.13% and an imputed 138 bps spread over a 2.75% Canadian 10-year bond yield.

**Risk:** There are a number of risks to Fortis' achievement of our C\$32.00 target price: commodity prices; weather; environmental; regulatory; access to capital markets; and, interest rates. Moreover, one should never underestimate the power of the regulator in any regulated business.

Please refer to the firm's disclosure website at <https://rave.credit-suisse.com/disclosures> for the definitions of abbreviations typically used in the target price method and risk sections.

See the *Companies Mentioned* section for full company names

The subject company (FTS.TO) currently is, or was during the 12-month period preceding the date of distribution of this report, a client of Credit Suisse.

For Credit Suisse disclosure information on other companies mentioned in this report, please visit the website at <https://rave.credit-suisse.com/disclosures> or call +1 (877) 291-2683.

References in this report to Credit Suisse include all of the subsidiaries and affiliates of Credit Suisse operating under its investment banking division. For more information on our structure, please use the following link: <https://www.credit-suisse.com/who-we-are/en>. This report may contain material that is not directed to, or intended for distribution to or use by, any person or entity who is a citizen or resident of or located in any locality, state, country or other jurisdiction where such distribution, publication, availability or use would be contrary to law or regulation or which would subject Credit Suisse AG or its affiliates ("CS") to any registration or licensing requirement within such jurisdiction. All material presented in this report, unless specifically indicated otherwise, is under copyright to CS. None of the material, nor its content, nor any copy of it, may be altered in any way, transmitted to, copied or distributed to any other party, without the prior express written permission of CS. All trademarks, service marks and logos used in this report are trademarks or service marks or registered trademarks or service marks of CS or its affiliates. The information, tools and material presented in this report are provided to you for information purposes only and are not to be used or considered as an offer or the solicitation of an offer to sell or to buy or subscribe for securities or other financial instruments. CS may not have taken any steps to ensure that the securities referred to in this report are suitable for any particular investor. CS will not treat recipients of this report as its customers by virtue of their receiving this report. The investments and services contained or referred to in this report may not be suitable for you and it is recommended that you consult an independent investment advisor if you are in doubt about such investments or investment services. Nothing in this report constitutes investment, legal, accounting or tax advice, or a representation that any investment or strategy is suitable or appropriate to your individual circumstances, or otherwise constitutes a personal recommendation to you. CS does not advise on the tax consequences of investments and you are advised to contact an independent tax adviser. Please note in particular that the bases and levels of taxation may change. Information and opinions presented in this report have been obtained or derived from sources believed by CS to be reliable, but CS makes no representation as to their accuracy or completeness. CS accepts no liability for loss arising from the use of the material presented in this report, except that this exclusion of liability does not apply to the extent that such liability arises under specific statutes or regulations applicable to CS. This report is not to be relied upon in substitution for the exercise of independent judgment. CS may have issued, and may in the future issue, other communications that are inconsistent with, and reach different conclusions from, the information presented in this report. Those communications reflect the different assumptions, views and analytical methods of the analysts who prepared them and CS is under no obligation to ensure that such other communications are brought to the attention of any recipient of this report. CS may, to the extent permitted by law, participate or invest in financing transactions with the issuer(s) of the securities referred to in this report, perform services for or solicit business from such issuers, and/or have a position or holding, or other material interest, or effect transactions, in such securities or options thereon, or other investments related thereto. In addition, it may make markets in the securities mentioned in the material presented in this report. CS may have, within the last three years, served as manager or co-manager of a public offering of securities for, or currently may make a primary market in issues of, any or all of the entities mentioned in this report or may be providing, or have provided within the previous 12 months, significant advice or investment services in relation to the investment concerned or a related investment. Additional information is, subject to duties of confidentiality, available on request. Some investments referred to in this report will be offered solely by a single entity and in the case of some investments solely by CS, or an associate of CS or CS may be the only market maker in such investments. Past performance should not be taken as an indication or guarantee of future performance, and no representation or warranty, express or implied, is made regarding future performance. Information, opinions and estimates contained in this report reflect a judgment at its original date of publication by CS and are subject to change without notice. The price, value of and income from any of the securities or financial instruments mentioned in this report can fall as well as rise. The value of securities and financial instruments is subject to exchange rate fluctuation that may have a positive or adverse effect on the price or income of such securities or financial instruments. Investors in securities such as ADR's, the values of which are influenced by currency volatility, effectively assume this risk. Structured securities are complex instruments, typically involve a high degree of risk and are intended for sale only to sophisticated investors who are capable of understanding and assuming the risks involved. The market value of any structured security may be affected by changes in economic, financial and political factors (including, but not limited to, spot and forward interest and exchange rates), time to maturity, market conditions and volatility, and the credit quality of any issuer or reference issuer. Any investor interested in purchasing a structured product should conduct their own investigation and analysis of the product and consult with their own professional advisers as to the risks involved in making such a purchase. Some investments discussed in this report may have a high level of volatility. High volatility investments may experience sudden and large falls in their value causing losses when that investment is realised. Those losses may equal your original investment. Indeed, in the case of some investments the potential losses may exceed the amount of initial investment and, in such circumstances, you may be required to pay more money to support those losses. Income yields from investments may fluctuate and, in consequence, initial capital paid to make the investment may be used as part of that income yield. Some investments may not be readily realisable and it may be difficult to sell or realise those investments, similarly it may prove difficult for you to obtain reliable information about the value, or risks, to which such an investment is exposed. This report may provide the addresses of, or contain hyperlinks to, websites. Except to the extent to which the report refers to website material of CS, CS has not reviewed any such site and takes no responsibility for the content contained therein. Such address or hyperlink (including addresses or hyperlinks to CS's own website material) is provided solely for your convenience and information and the content of any such website does not in any way form part of this document. Accessing such website or following such link through this report or CS's website shall be at your own risk. This report is issued and distributed in Europe (except Switzerland) by Credit Suisse Securities (Europe) Limited, One Cabot Square, London E14 4QJ, England, which is authorised by the Prudential Regulation Authority and regulated by the Financial Conduct Authority and the Prudential Regulation Authority. This report is being distributed in Germany by Credit Suisse Securities (Europe) Limited Niederlassung Frankfurt am Main regulated by the Bundesanstalt fuer Finanzdienstleistungsaufsicht ("BaFin"). This report is being distributed in the United States and Canada by Credit Suisse Securities (USA) LLC; in Switzerland by Credit Suisse AG; in Brazil by Banco de Investimentos Credit Suisse (Brasil) S.A. or its affiliates; in Mexico by Banco Credit Suisse (México), S.A. (transactions related to the securities mentioned in this report will only be effected in compliance with applicable regulation); in Japan by Credit Suisse Securities (Japan) Limited, Financial Instruments Firm, Director-General of Kanto Local Finance Bureau (*Kinsho*) No. 66, a member of Japan Securities Dealers Association, The Financial Futures Association of Japan, Japan Investment Advisers Association, Type II Financial Instruments Firms Association; elsewhere in Asia Pacific by whichever of the following is the appropriately authorised entity in the relevant jurisdiction: Credit Suisse (Hong Kong) Limited, Credit Suisse Equities (Australia) Limited, Credit Suisse Securities (Thailand) Limited, having registered address at 990 Abdulrahim Place, 27 Floor, Unit 2701, Rama IV Road, Silom, Bangkok, Bangkok 10500, Thailand, Tel. +66 2614 6000, Credit Suisse Securities (Malaysia) Sdn Bhd, Credit Suisse AG, Singapore Branch, Credit Suisse Securities (India) Private Limited regulated by the Securities and Exchange Board of India (registration Nos. INB230970637; INF230970637; INB010970631; INF010970631), having registered address at 9th Floor, Ceejay House, Dr.A.B. Road, Worli, Mumbai - 18, India, T. +91-22 6777 3777, Credit Suisse Securities (Europe) Limited, Seoul Branch, Credit Suisse AG, Taipei Securities Branch, PT Credit Suisse Securities Indonesia, Credit Suisse Securities (Philippines) Inc., and elsewhere in the world by the relevant authorised affiliate of the above. Research on Taiwanese securities produced by Credit Suisse AG, Taipei Securities Branch has been prepared by a registered Senior Business Person. Research provided to residents of Malaysia is authorised by the Head of Research for Credit Suisse Securities (Malaysia) Sdn Bhd, to whom they should direct any queries on +603 2723 2020. This report has been prepared and issued for distribution in Singapore to institutional investors, accredited investors and expert investors (each as defined under the Financial Advisers Regulations) only, and is also distributed by Credit Suisse AG, Singapore branch to overseas investors (as defined under the Financial Advisers Regulations). By virtue of your status as an institutional investor, accredited investor, expert investor or overseas investor, Credit Suisse AG, Singapore branch is exempted from complying with certain compliance requirements under the Financial Advisers Act, Chapter 110 of Singapore (the "FAA"), the Financial Advisers Regulations and the relevant Notices and Guidelines issued thereunder, in respect of any financial advisory service which Credit Suisse AG, Singapore branch may provide to you. This research may not conform to Canadian disclosure requirements. In jurisdictions where CS is not already registered or licensed to trade in securities, transactions will only be effected in accordance with applicable securities legislation, which will vary from jurisdiction to jurisdiction and may require that the trade be made in accordance with applicable exemptions from registration or licensing requirements. Non-U.S. customers wishing to effect a transaction should contact a CS entity in their local jurisdiction unless governing law permits otherwise. U.S. customers wishing to effect a transaction should do so only by contacting a representative at Credit Suisse Securities (USA) LLC in the U.S. Please note that this research was originally prepared and issued by CS for distribution to their market professional and institutional investor customers. Recipients who are not market professional or institutional investor customers of CS should seek the advice of their independent financial advisor prior to taking any investment decision based on this report or for any necessary explanation of its contents. This research may relate to investments or services of a person outside of the UK or to other matters which are not authorised by the Prudential Regulation Authority and regulated by the Financial Conduct Authority and the Prudential Regulation Authority or in respect of which the protections of the Prudential Regulation Authority and Financial Conduct Authority for private customers and/or the UK compensation scheme may not be available, and further details as to where this may be the case are available upon request in respect of this report. CS may provide various services to US municipal entities or obligated persons ("municipalities"), including suggesting individual transactions or trades and entering into such transactions. Any services CS provides to municipalities are not viewed as "advice" within the meaning of Section 975 of the Dodd-Frank Wall Street Reform and Consumer Protection Act. CS is providing any such services and related information solely on an arm's length basis and not as an advisor or fiduciary to the municipality. In connection with the provision of the any such services, there is no agreement, direct or indirect, between any municipality (including the officials, management, employees or agents thereof) and CS for CS to provide advice to the municipality. Municipalities should consult with their financial, accounting and legal advisors regarding any such services provided by CS. In addition, CS is not acting for direct or indirect compensation to solicit the municipality on behalf of an unaffiliated broker, dealer, municipal securities dealer, municipal advisor, or investment adviser for the purpose of obtaining or retaining an engagement by the municipality for or in connection with Municipal Financial Products, the issuance of municipal securities, or of an investment adviser to provide investment advisory services to or on behalf of the municipality. If this report is being distributed by a financial institution other than Credit Suisse AG, or its affiliates, that financial institution is solely responsible for distribution. Clients of that institution should contact that institution to effect a transaction in the securities mentioned in this report or require further information. This report does not constitute investment advice by Credit Suisse to the clients of the distributing financial institution, and neither Credit Suisse AG, its affiliates, and their respective officers, directors and employees accept any liability whatsoever for any direct or consequential loss arising from their use of this report or its content. Principal is not guaranteed. Commission is the commission rate or the amount agreed with a customer when setting up an account or at any time after that.

Copyright © 2014 CREDIT SUISSE AG and/or its affiliates. All rights reserved.

Investment principal on bonds can be eroded depending on sale price or market price. In addition, there are bonds on which investment principal can be eroded due to changes in redemption amounts. Care is required when investing in such instruments.

When you purchase non-listed Japanese fixed income securities (Japanese government bonds, Japanese municipal bonds, Japanese government guaranteed bonds, Japanese corporate bonds) from CS as a seller, you will be requested to pay the purchase price only.

## Fortis Inc. (FTS.TO)

Rating	<b>NEUTRAL*</b>
Price (31 Jul 14, C\$)	33.55
Target price (C\$)	32.00 <sup>1</sup>
52-week price range	33.76 - 29.76
Market cap. (C\$ m)	7,224.51

### RESULTS

## At a glance: August ACC Agenda

- **Earnings review:** Fortis reported Q2 2014 headline EPS (FD) of C\$0.22 and an adjusted C\$0.28. In our view, the adjusted number of roughly C\$0.24 excludes C\$4m F/X losses, but includes C\$13m interest on the convertible. The adjusted figure missed both our C\$0.27 view and the Street's C\$0.28 (range of C\$0.24-C\$0.34). FTS stock performance has been largely tied to the regulatory process for the UNS deal rather than core business fundamentals. Notably, the UNS deal looks to be coming to a close on a rather expedited timeline versus most utility M&A. Simply, FTS believes the UNS deal may close at the end of August. We do not place undue emphasis on quarterly results as a result of the inherently long-cycle nature of many assets.
- **Significant organic growth continues:** FTS continues to provide a robust capital expenditure outlook of C\$1.4bn for 2014. The 5-year capex outlook is around C\$6.5bn (ex-C\$1.5bn from UNS). With the UNS deal pending, FTS did not focus upon any other acquisition opportunities.
- **Investment thesis:** We continue to believe FTS has a positive track record with acquisitions, however, the method of financing for UNS and the sheer size create some stock performance issues. Moreover, we have a degree of concern regarding the UNS return profile in the years ahead. Beyond UNS, we view the FTS stock as suffering from a longer-term M&A overhang until the organic growth transition is clear.
- **Valuation:** Our target price of C\$32.00 is on an implied yield of 4.13% and a yield spread of roughly 138 bps on a 2.75% Canadian 10-year. We maintain our Neutral rating.

\* Asterisk signifies initiation or assumption of coverage.

The analyst(s) responsible for preparing this research report received Compensation that is based upon various factors including Credit Suisse's total revenues, a portion of which are generated by Credit Suisse's investment banking activities

**As of December 10, 2012 Analysts' stock rating are defined as follows:**

**Outperform (O)** : The stock's total return is expected to outperform the relevant benchmark\* over the next 12 months.

**Neutral (N)** : The stock's total return is expected to be in line with the relevant benchmark\* over the next 12 months.

**Underperform (U)** : The stock's total return is expected to underperform the relevant benchmark\* over the next 12 months.

\*Relevant benchmark by region: As of 10th December 2012, Japanese ratings are based on a stock's total return relative to the analyst's coverage universe which consists of all companies covered by the analyst within the relevant sector, with Outperforms representing the most attractive, Neutrals the less attractive, and Underperforms the least attractive investment opportunities. As of 2nd October 2012, U.S. and Canadian as well as European ratings are based on a stock's total return relative to the analyst's coverage universe which consists of all companies covered by the analyst within the relevant sector, with Outperforms representing the most attractive, Neutrals the less attractive, and Underperforms the least attractive investment opportunities. For Latin American and non-Japan Asia stocks, ratings are based on a stock's total return relative to the average total return of the relevant country or regional benchmark; prior to 2nd October 2012 U.S. and Canadian ratings were based on (1) a stock's absolute total return potential to its current share price and (2) the relative attractiveness of a stock's total return potential within an analyst's coverage universe. For Australian and New Zealand stocks, 12-month rolling yield is incorporated in the absolute total return calculation and a 15% and a 7.5% threshold replace the 10-15% level in the Outperform and Underperform stock rating definitions, respectively. The 15% and 7.5% thresholds replace the +10-15% and -10-15% levels in the Neutral stock rating definition, respectively. Prior to 10th December 2012, Japanese ratings were based on a stock's total return relative to the average total return of the relevant country or regional benchmark.

**Restricted (R)** : In certain circumstances, Credit Suisse policy and/or applicable law and regulations preclude certain types of communications, including an investment recommendation, during the course of Credit Suisse's engagement in an investment banking transaction and in certain other circumstances.

**Volatility Indicator [V]** : A stock is defined as volatile if the stock price has moved up or down by 20% or more in a month in at least 8 of the past 24 months or the analyst expects significant volatility going forward.

Analysts' sector weightings are distinct from analysts' stock ratings and are based on the analyst's expectations for the fundamentals and/or valuation of the sector\* relative to the group's historic fundamentals and/or valuation:

**Overweight** : The analyst's expectation for the sector's fundamentals and/or valuation is favorable over the next 12 months.

**Market Weight** : The analyst's expectation for the sector's fundamentals and/or valuation is neutral over the next 12 months.

**Underweight** : The analyst's expectation for the sector's fundamentals and/or valuation is cautious over the next 12 months.

\*An analyst's coverage sector consists of all companies covered by the analyst within the relevant sector. An analyst may cover multiple sectors.

Credit Suisse's distribution of stock ratings (and banking clients) is:

#### Global Ratings Distribution

Rating	Versus universe (%)	Of which banking clients (%)
Outperform/Buy*	44%	(53% banking clients)
Neutral/Hold*	40%	(50% banking clients)
Underperform/Sell*	13%	(47% banking clients)
Restricted	3%	

*\*For purposes of the NYSE and NASD ratings distribution disclosure requirements, our stock ratings of Outperform, Neutral, and Underperform most closely correspond to Buy, Hold, and Sell, respectively; however, the meanings are not the same, as our stock ratings are determined on a relative basis. (Please refer to definitions above.) An investor's decision to buy or sell a security should be based on investment objectives, current holdings, and other individual factors.*

Credit Suisse's policy is to update research reports as it deems appropriate, based on developments with the subject company, the sector or the market that may have a material impact on the research views or opinions stated herein.

Credit Suisse's policy is only to publish investment research that is impartial, independent, clear, fair and not misleading. Credit Suisse does not provide any tax advice. Any statement herein regarding any US federal tax is not intended or written to be used, and cannot be used, by any taxpayer for the purposes of avoiding any penalties.

#### Price Target: (12 months) for Fortis Inc. (FTS.TO)

**Method:** We obtain our C\$32.00 target price for Fortis Inc. by using multiple valuation methodologies, but primarily rely upon a targeted dividend yield of 4.13% and an imputed 138 bps spread over a 2.75% Canadian 10-year bond yield.

**Risk:** There are a number of risks to Fortis' achievement of our C\$32.00 target price: commodity prices; weather; environmental; regulatory; access to capital markets; and, interest rates. Moreover, one should never underestimate the power of the regulator in any regulated business.

Please refer to the firm's disclosure website at <https://rave.credit-suisse.com/disclosures> for the definitions of abbreviations typically used in the target price method and risk sections.

*See the Companies Mentioned section for full company names*

CS may not have taken any steps to ensure that the securities referred to in this report are suitable for any particular investor. CS will not treat recipients of this report as its customers by virtue of their receiving this report. The investments and services contained or referred to in this report may not be suitable for you and it is recommended that you consult an independent investment advisor if you are in doubt about such investments or investment services. Nothing in this report constitutes investment, legal, accounting or tax advice, or a representation that any investment or strategy is suitable or appropriate to your individual circumstances, or otherwise constitutes a personal recommendation to you. CS does not advise on the tax consequences of investments and you are advised to contact an independent tax adviser. Please note in particular that the bases and levels of taxation may change. Information and opinions presented in this report have been obtained or derived from sources believed by CS to be reliable, but CS makes no representation as to their accuracy or completeness. CS accepts no liability for loss arising from the use of the material presented in this report, except that this exclusion of liability does not apply to the extent that such liability arises under specific statutes or regulations applicable to CS. This report is not to be relied upon in substitution for the exercise of independent judgment. CS may have issued, and may in the future issue, other communications that are inconsistent with, and reach different conclusions from, the information presented in this report. Those communications reflect the different assumptions, views and analytical methods of the analysts who prepared them and CS is under no obligation to ensure that such other communications are brought to the attention of any recipient of this report. Some investments referred to in this report will be offered solely by a single entity and in the case of some investments solely by CS, or an associate of CS or CS may be the only market maker in such investments. Past performance should not be taken as an indication or guarantee of future performance, and no representation or warranty, express or implied, is made regarding future performance. Information, opinions and estimates contained in this report reflect a judgment at its original date of publication by CS and are subject to change without notice. The price, value of and income from any of the securities or financial instruments mentioned in this report can fall as well as rise. The value of securities and financial instruments is subject to exchange rate fluctuation that may have a positive or adverse effect on the price or income of such securities or financial instruments. Investors in securities such as ADRs, the values of which are influenced by currency volatility, effectively assume this risk. Structured securities are complex instruments, typically involve a high degree of risk and are intended for sale only to sophisticated investors who are capable of understanding and assuming the risks involved. The market value of any structured security may be affected by changes in economic, financial and political factors (including, but not limited to, spot and forward interest and exchange rates), time to maturity, market conditions and volatility, and the credit quality of any issuer or reference issuer. Any investor interested in purchasing a structured product should conduct their own investigation and analysis of the product and consult with their own professional advisers as to the risks involved in making such a purchase. Some investments discussed in this report may have a high level of volatility. High volatility investments may experience sudden and large falls in their value causing losses when that investment is realised. Those losses may equal your original investment. Indeed, in the case of some investments the potential losses may exceed the amount of initial investment and, in such circumstances, you may be required to pay more money to support those losses. Income yields from investments may fluctuate and, in consequence, initial capital paid to make the investment may be used as part of that income yield. Some investments may not be readily realisable and it may be difficult to sell or realise those investments, similarly it may prove difficult for you to obtain reliable information about the value, or risks, to which such an investment is exposed. Road, Worli, Mumbai - 18, India, T. +91-22 6777 3777, Credit Suisse Securities (Europe) Limited, Seoul Branch, Credit Suisse AG, Taipei Securities Branch, PT Credit Suisse Securities Indonesia, Credit Suisse Securities (Philippines) Inc., and elsewhere in the world by the relevant authorised affiliate of the above. Research on Taiwanese securities produced by Credit Suisse AG, Taipei Securities Branch has been prepared by a registered Senior Business Person. Research provided to residents of Malaysia is authorised by the Head of Research for Credit Suisse Securities (Malaysia) Sdn Bhd, to whom they should direct any queries on +603 2723 2020. This report has been prepared and issued for distribution in Singapore to institutional investors, accredited investors and expert investors (each as defined under the Financial Advisers Regulations) only, and is also distributed by Credit Suisse AG, Singapore branch to overseas investors (as defined under the Financial Advisers Regulations). By virtue of your status as an institutional investor, accredited investor, expert investor or overseas investor, Credit Suisse AG, Singapore branch is exempted from complying with certain compliance requirements under the Financial Advisers Act, Chapter 110 of Singapore (the "FAA"), the Financial Advisers Regulations and the relevant Notices and Guidelines issued thereunder, in respect of any financial advisory service which Credit Suisse AG, Singapore branch may provide to you. This research may not conform to Canadian disclosure requirements. In jurisdictions where CS is not already registered or licensed to trade in securities, transactions will only be effected in accordance with applicable securities legislation, which will vary from jurisdiction to jurisdiction and may require that the trade be made in accordance with applicable exemptions from registration or licensing requirements. Non-U.S. customers wishing to effect a transaction should contact a CS entity in their local jurisdiction unless governing law permits otherwise. U.S. customers wishing to effect a transaction should do so only by contacting a representative at Credit Suisse Securities (USA) LLC in the U.S. Please note that this research was originally prepared and issued by CS for distribution to their market professional and institutional investor customers. Recipients who are not market professional or institutional investor customers of CS should seek the advice of their independent financial advisor prior to taking any investment decision based on this report or for any necessary explanation of its contents. This research may relate to investments or services of a person outside of the UK or to other matters which are not authorised by the Prudential Regulation Authority and regulated by the Financial Conduct Authority and the Prudential Regulation Authority or in respect of which the protections of the Prudential Regulation Authority and Financial Conduct Authority for private customers and/or the UK compensation scheme may not be available, and further details as to where this may be the case are available upon request in respect of this report. CS may provide various services to US municipal entities or obligated persons ("municipalities"), including suggesting individual transactions or trades and entering into such transactions. Any services CS provides to municipalities are not viewed as "advice" within the meaning of Section 975 of the Dodd-Frank Wall Street Reform and Consumer Protection Act. CS is providing any such services and related information solely on an arm's length basis and not as an advisor or fiduciary to the municipality. In connection with the provision of the any such services, there is no agreement, direct or indirect, between any municipality (including the officials, management, employees or agents thereof) and CS for CS to provide advice to the municipality. Municipalities should consult with their financial, accounting and legal advisors regarding any such services provided by CS. In addition, CS is not acting for direct or indirect compensation to solicit the municipality on behalf of an unaffiliated broker, dealer, municipal securities dealer, municipal advisor, or investment adviser for the purpose of obtaining or retaining an engagement by the municipality for or in connection with Municipal Financial Products, the issuance of municipal securities, or of an investment adviser to provide investment advisory services to or on behalf of the municipality. If this report is being distributed by a financial institution other than Credit Suisse AG, or its affiliates, that financial institution is solely responsible for distribution. Clients of that institution should contact that institution to effect a transaction in the securities mentioned in this report or require further information. This report does not constitute investment advice by Credit Suisse to the clients of the distributing financial institution, and neither Credit Suisse AG, its affiliates, and their respective officers, directors and employees accept any liability whatsoever for any direct or consequential loss arising from their use of this report or its content. Principal is not guaranteed. Commission is the commission rate or the amount agreed with a customer when setting up an account or at any time after that.

### COMPANY UPDATE

## Realizing on Real Estate

- **Seeking strategy:** Fortis Inc. announced a "review of strategic options for its hotel and commercial real estate businesses" operating as Fortis Properties. We have long advocated for a pure play model with FTS monetizing the real estate and hospitality assets. Simply, the valuation delta between core utility and property assets is wide and shifting management thoughts look to seize attractive capital market asset segmentation. Exhibit 1 presents a wide range of applied multiples for selected comps albeit nothing is truly on point. Basic math points to FTS raising gross proceeds of more than C\$1bn. We believe any such monetization would result in capital being funneled into core utility operations across the existing portfolio rather than near-term potential acquisition activity (that seems much less likely).
- **Capital market segmentation:** As outlined in Exhibit 1, there does not appear to be a perfect comp for the FTS Properties' assets. In addition, the nature of the portfolio may constrain valuation to a certain degree and the manner of a potential monetization (e.g. trade sale, IPO, partial sale, etc.). On FTS data, a C\$1bn valuation would imply 12.5x EBTIDA and equate to a C\$200m gain against the identifiable assets and, among other factors, valuation accretion.
- **Investment thesis:** FTS is turning to life after the UNS acquisition issue that creates some stock market headwinds. In the near-term, we believe the FTS investor day will attempt to re-focus the Street on the internal capital visibility rather than acquisition oriented growth.
- **Valuation:** Our target price of C\$32.00 is on an implied yield of 4.13% and a yield spread of roughly 138 bps on a 2.75% Canadian 10-year. We maintain our NEUTRAL rating.

## Disclosure Appendix

**Important Global Disclosures**

I, Andrew M. Kuske, certify that (1) the views expressed in this report accurately reflect my personal views about all of the subject companies and securities and (2) no part of my compensation was, is or will be directly or indirectly related to the specific recommendations or views expressed in this report.

**3-Year Price and Rating History for Fortis Inc. (FTS.TO)**

FTS.TO	Closing Price	Target Price	
Date	(C\$)	(C\$)	Rating
28-Sep-11	33.08	34.00	N
20-Jul-12	33.14	38.00	O
18-Oct-13	32.01	36.00	
28-Jan-14	29.99	32.00	N

\* Asterisk signifies initiation or assumption of coverage.

The analyst(s) responsible for preparing this research report received Compensation that is based upon various factors including Credit Suisse's total revenues, a portion of which are generated by Credit Suisse's investment banking activities

**As of December 10, 2012 Analysts' stock rating are defined as follows:**

**Outperform (O) :** The stock's total return is expected to outperform the relevant benchmark\* over the next 12 months.

**Neutral (N) :** The stock's total return is expected to be in line with the relevant benchmark\* over the next 12 months.

**Underperform (U) :** The stock's total return is expected to underperform the relevant benchmark\* over the next 12 months.

\*Relevant benchmark by region: As of 10th December 2012, Japanese ratings are based on a stock's total return relative to the analyst's coverage universe which consists of all companies covered by the analyst within the relevant sector, with Outperforms representing the most attractive, Neutrals the less attractive, and Underperforms the least attractive investment opportunities. As of 2nd October 2012, U.S. and Canadian as well as European ratings are based on a stock's total return relative to the analyst's coverage universe which consists of all companies covered by the analyst within the relevant sector, with Outperforms representing the most attractive, Neutrals the less attractive, and Underperforms the least attractive investment opportunities. For Latin American and non-Japan Asia stocks, ratings are based on a stock's total return relative to the average total return of the relevant country or regional benchmark; prior to 2nd October 2012 U.S. and Canadian ratings were based on (1) a stock's absolute total return potential to its current share price and (2) the relative attractiveness of a stock's total return potential within an analyst's coverage universe. For Australian and New Zealand stocks, 12-month rolling yield is incorporated in the absolute total return calculation and a 15% and a 7.5% threshold replace the 10-15% level in the Outperform and Underperform stock rating definitions, respectively. The 15% and 7.5% thresholds replace the +10-15% and -10-15% levels in the Neutral stock rating definition, respectively. Prior to 10th December 2012, Japanese ratings were based on a stock's total return relative to the average total return of the relevant country or regional benchmark.

**Restricted (R) :** In certain circumstances, Credit Suisse policy and/or applicable law and regulations preclude certain types of communications, including an investment recommendation, during the course of Credit Suisse's engagement in an investment banking transaction and in certain other circumstances.

**Volatility Indicator [V] :** A stock is defined as volatile if the stock price has moved up or down by 20% or more in a month in at least 8 of the past 24 months or the analyst expects significant volatility going forward.

Analysts' sector weightings are distinct from analysts' stock ratings and are based on the analyst's expectations for the fundamentals and/or valuation of the sector\* relative to the group's historic fundamentals and/or valuation:

**Overweight :** The analyst's expectation for the sector's fundamentals and/or valuation is favorable over the next 12 months.

**Market Weight :** The analyst's expectation for the sector's fundamentals and/or valuation is neutral over the next 12 months.

**Underweight :** The analyst's expectation for the sector's fundamentals and/or valuation is cautious over the next 12 months.

\*An analyst's coverage sector consists of all companies covered by the analyst within the relevant sector. An analyst may cover multiple sectors.

Credit Suisse's distribution of stock ratings (and banking clients) is:

### Global Ratings Distribution

Rating	Versus universe (%)	Of which banking clients (%)
Outperform/Buy*	44%	(55% banking clients)
Neutral/Hold*	39%	(50% banking clients)
Underperform/Sell*	14%	(43% banking clients)
Restricted	3%	

*\*For purposes of the NYSE and NASD ratings distribution disclosure requirements, our stock ratings of Outperform, Neutral, and Underperform most closely correspond to Buy, Hold, and Sell, respectively; however, the meanings are not the same, as our stock ratings are determined on a relative basis. (Please refer to definitions above.) An investor's decision to buy or sell a security should be based on investment objectives, current holdings, and other individual factors.*

Credit Suisse's policy is to update research reports as it deems appropriate, based on developments with the subject company, the sector or the market that may have a material impact on the research views or opinions stated herein.

Credit Suisse's policy is only to publish investment research that is impartial, independent, clear, fair and not misleading. ### Price Target: (12 months) for Fortis Inc. (FTS.TO)

**Method:** We obtain our C\$32.00 target price for Fortis Inc. by using multiple valuation methodologies, but primarily rely upon a targeted dividend yield of 4.13% and an imputed 138 bps spread over a 2.75% Canadian 10-year bond yield.

**Risk:** There are a number of risks to Fortis' achievement of our C\$32.00 target price: commodity prices; weather; environmental; regulatory; access to capital markets; and, interest rates. Moreover, one should never underestimate the power of the regulator in any regulated business.

Please refer to the firm's disclosure website at <https://rave.credit-suisse.com/disclosures> for the definitions of abbreviations typically used in the target price method and risk sections.

*See the Companies Mentioned section for full company names*

CS may not have taken any steps to ensure that the securities referred to in this report are suitable for any particular investor. CS will not treat recipients of this report as its customers by virtue of their receiving this report. The investments and services contained or referred to in this report may not be suitable for you and it is recommended that you consult an independent investment advisor if you are in doubt about such investments or investment services. Nothing in this report constitutes investment, legal, accounting or tax advice, or a representation that any investment or strategy is suitable or appropriate to your individual circumstances, or otherwise constitutes a personal recommendation to you. CS does not advise on the tax consequences of investments and you are advised to contact an independent tax adviser. Please note in particular that the bases and levels of taxation may change. Information and opinions presented in this report have been obtained or derived from sources believed by CS to be reliable, but CS makes no representation as to their accuracy or completeness. CS accepts no liability for loss arising from the use of the material presented in this report, except that this exclusion of liability does not apply to the extent that such liability arises under specific statutes or regulations applicable to CS. This report is not to be relied upon in substitution for the exercise of independent judgment. CS may have issued, and may in the future issue, other communications that are inconsistent with, and reach different conclusions from, the information presented in this report. Those communications reflect the different assumptions, views and analytical methods of the analysts who prepared them and CS is under no obligation to ensure that such other communications are brought to the attention of any recipient of this report. Some investments referred to in this report will be offered solely by a single entity and in the case of some investments solely by CS, or an associate of CS or CS may be the only market maker in such investments. Past performance should not be taken as an indication or guarantee of future performance, and no representation or warranty, express or implied, is made regarding future performance. Information, opinions and estimates contained in this report reflect a judgment at its original date of publication by CS and are subject to change without notice. The price, value of and income from any of the securities or financial instruments mentioned in this report can fall as well as rise. The value of securities and financial instruments is subject to exchange rate fluctuation that may have a positive or adverse effect on the price or income of such securities or financial instruments. Investors in securities such as ADRs, the values of which are influenced by currency volatility, effectively assume this risk. Structured securities are complex instruments, typically involve a high degree of risk and are intended for sale only to sophisticated investors who are capable of understanding and assuming the risks involved. The market value of any structured security may be affected by changes in economic, financial and political factors (including, but not limited to, spot and forward interest and exchange rates), time to maturity, market conditions and volatility, and the credit quality of any issuer or reference issuer. Any investor interested in purchasing a structured product should conduct their own investigation and analysis of the product and consult with their own professional advisers as to the risks involved in making such a purchase. Some investments discussed in this report may have a high level of volatility. High volatility investments may experience sudden and large falls in their value causing losses when that investment is realised. Those losses may equal your original investment. Indeed, in the case of some investments the potential losses may exceed the amount of initial investment and, in such circumstances, you may be required to pay more money to support those losses. Income yields from investments may fluctuate and, in consequence, initial capital paid to make the investment may be used as part of that income yield. Some investments may not be readily realisable and it may be difficult to sell or realise those investments, similarly it may prove difficult for you to obtain reliable information about the value, or risks, to which such an investment is exposed. This report may provide the addresses of, or contain hyperlinks to, websites. Except to the extent to which the report refers to website material of CS, CS has not reviewed any such site and takes no responsibility for the content contained therein. Non-U.S. customers wishing to effect a transaction should contact a CS entity in their local jurisdiction unless governing law permits otherwise. U.S. customers wishing to effect a transaction should do so only by contacting a representative at Credit Suisse Securities (USA) LLC in the U.S. Please note that this research was originally prepared and issued by CS for distribution to their market professional and institutional investor customers. Recipients who are not market professional or institutional investor customers of CS should seek the advice of their independent financial advisor prior to taking any investment decision based on this report or for any necessary explanation of its contents. This research may relate to investments or services of a person outside of the UK or to other matters which are not authorised by the Prudential Regulation Authority and regulated by the Financial Conduct Authority and the Prudential Regulation Authority or in respect of which the protections of the Prudential Regulation Authority and Financial Conduct Authority for private customers and/or the UK compensation scheme may not be available, and further details as to where this may be the case are available upon request in respect of this report. CS may provide various services to US municipal entities or obligated persons ("municipalities"), including suggesting individual transactions or trades and entering into such transactions. Any services CS provides to municipalities are not viewed as "advice" within the meaning of Section 975 of the Dodd-Frank Wall Street Reform and Consumer Protection Act. CS is providing any such services and related information solely on an arm's length basis and not as an advisor or fiduciary to the municipality. In connection with the provision of the any such services, there is no agreement, direct or indirect, between any municipality (including the officials, management, employees or agents thereof) and CS for CS to provide advice to the municipality. Municipalities should consult with their financial, accounting and legal advisors regarding any such services provided by CS. In addition, CS is not acting for direct or indirect compensation to solicit the municipality on behalf of an unaffiliated broker, dealer, municipal securities dealer, municipal advisor, or investment adviser for the purpose of obtaining or retaining an engagement by the municipality for or in connection with Municipal Financial Products, the issuance of municipal securities, or of an investment adviser to provide investment advisory services to or on behalf of the municipality. If this report is being distributed by a financial institution other than Credit Suisse AG, or its affiliates, that financial institution is solely responsible for distribution. Clients of that institution should contact that institution to effect a transaction in the securities mentioned in this report or require further information. This report does not constitute investment advice by Credit Suisse to the clients of the distributing financial institution, and neither Credit Suisse AG, its affiliates, and their respective officers, directors and employees accept any liability whatsoever for any direct or consequential loss arising from their use of this report or its content. Principal is not guaranteed. Commission is the commission rate or the amount agreed with a customer when setting up an account or at any time after that.

## Pressures Escalating Within a Commodity Update and Catalyst Schedule Review; Revising Estimates and Target Prices

403 476 6023

- Commodity Update - Macro and Brent: Credit Suisse has reduced its Brent forecast for all periods, projecting US\$97/bbl and US\$93/bbl in 2015E and 2016E, respectively. There is a bias toward lower Brent prices as strong non-OPEC supply growth, largely driven by increased US production, has overwhelmed global demand growth. While global oil supply and demand balances remain manageable, we assume in our base case that the Saudis will cut production to stabilize prices. (For a more robust discussion, please see "Brent at a Tipping Point".)
- Sector Review - Cashflow and Target Price Changes: We decrease our average CFPS estimates in our coverage space by ~9% and ~11% for 2014E and 2015E respectively, largely owing to the lower Brent projections. There are no ratings changes concurrent with our price deck update, but we decrease the target prices for most of the names under our coverage.
- Pacific Rubiales (U/P, TP C\$11.50) - Pressures Escalating: Within our coverage space, we believe Pacific Rubiales is the most sensitive to downside risk on oil prices and we lower our target price to C\$11.50 (from C\$16). With July 2014 gross production slipping to 180 kbbls/d at the Rubiales field, continued underperformance here reinforces our concerns regarding the company's booked reserves and further escalates pressure to raise production levels in the near term. Failure to do so renders our valuation generous.
- Latin America - Positive Catalysts Upcoming: We continue to recommend Gran Tierra (O/P, TP US\$8) and Parex Resources (O/P, TP C\$17.50) for exposure to Latin America, given their strong balance sheets and expected positive catalysts. For Gran Tierra, we continue to expect first production in Q4/14 at Bretana in Peru, as well as spudding of Bretana Sur that could move meaningful 3P reserves to 2P. For Parex, we continue to look forward to the company's upcoming reserve report in early 2015 that could continue to the trend of rapid 2P reserves growth.
- Bankers Petroleum (N, TP C\$7.50) - Opportunity Knocks? Among our Neutral-rated names, we favor Bankers Petroleum and recommend investors increase exposure at current prices. We expect near term newsflow to include results from its first dual lateral well. If successful, it could imply lower development costs moving forward and lead to greater capital efficiencies.

## Agnico Eagle Mines Limited (AEM.N)

OUTPERFORM

A. Soni

CP: US\$ 29.26

TP: US\$ 49

CAP: US\$ 6236m

1 416 352 4587

## CM running well, CS seeing upside in 2015/16; Revising Estimates

- Outperform rating and US\$49 maintained, view unchanged: Our NAV is slightly trimmed to US\$24.19/sh from US\$24.36 and FY15/16 OpCFa to \$2.65/sh from \$2.69/sh. AEM remains a top pick for its operational consistency, strong FCF and solid growth over the next two years. In our view AEM's premium valuation is justified due to its favourable geopolitical exposure, flexibility assets and demonstrated ability to optimize operations to add incremental value to the NAV.
- AEM and AUY co-hosted a tour of the Canadian Malartic JV (CMJV) highlighted areas for optimization under evaluation. CMJV noted that the mill is now operating above the 48-50ktpd it was achieving on acquisition, and the next focus will be to ramp the Malartic mill up from 50.7ktpd in Q2 to 52ktpd without additional capital. Our Malartic NAV was trimmed by \$30M to \$1.03B from \$1.06B previously based on a 55ktpd ultimate throughput.
- CS now models 55ktpd (from 60ktpd) as ultimate throughput, maintains prior 55ktpd ramp up trajectory: of 51ktpd in 2015, 53ktpd in 2016 (from 54ktpd) and 55ktpd in 2017. We continue to see an expansion potential at Malartic (to 60ktpd though we are not modelling it at this time).
- CS production estimates for Malartic increased in 2015 on grade: to 572koz from 555koz based on a higher grade est. of 1.07g/t from 1.04g/t. Grade reconciliation has been 4% better than expected on better mining and inherent grade of the crown pillars, which could continue to benefit grades in 2015/2016, CS models 3% better grade vs. prior estimates.
- Cost estimates for Malartic revised slightly higher: We now model LOM unit costs of \$19.28/t, above our prior \$18.49/t estimate.
- EPS revised for 2014-2016 to \$0.97/\$1.14/\$1.37 from \$1.00/\$1.13/\$1.39.

## COMPANY UPDATES

<b>Fortis Inc. (FTS.TO)</b>	<b>NEUTRAL</b>	<b>A. M. Kuske</b>
<b>CP: C\$ 34.57</b>	<b>TP: C\$ 32</b>	<b>416 352 4561</b>

**Investor Day: Outlining an organic approach**

- Investor day highlights: The inaugural Fortis Investor day was very well attended by the Street. In our view, the day provided a reasonable balance of depth and breadth of the Fortis asset base. Perhaps, the major takeaway from the day was the focus on organic growth for the near-term and the downplaying of acquisitions. Given the recent announcement to review strategic options for Fortis Properties, we believe FTS has tremendous capital flexibility in the near-term to easily fund a fairly large organic growth program. Simply, Fortis believes the 4-year CAGR of rate base growth from 2014-2018 will be roughly 7% and could increase to approximately 8.5% with some higher option value projects. Given the size of the Fortis asset base and the nature of the industry, that level of growth is relatively compelling and should be viewed positively.
- An acquisition reprieve: Given some issues associated with UNS financing, we believe FTS will be very focused on organic activities for the foreseeable future. Obviously, acquisitions will remain a part of FTS playbook and game plan, but these areas are not likely to gain significant attention at this time.
- Investment thesis: FTS is turning to life after the UNS acquisition issue that created some stock market headwinds. With the financing well behind FTS and a large slate of organic growth ahead, we believe that FTS is now focused on avoiding deal distractions and delivering high value added organic capital growth.
- Valuation: Our target price of C\$32.00 is on an implied yield of 4.13% and a yield spread of roughly 138 bps on a 2.75% Canadian 10-year. We maintain our Neutral rating.

## HIGHLIGHTS FROM THE UNITED STATES

## FOCUS LIST

<b>Agrium Inc. (AGU)</b>	<b>OUTPERFORM</b>	<b>C. Parkinson</b>
<b>CP: US\$ 87.97</b>	<b>TP: US\$ 110</b>	<b>212 538 6286</b>

**3Q Pre-Announcement a Negative; On to '15; Lowering Estimates**

- Magnitude of 3Q Pre-Announcement Somewhat Disappointing: AGU pre-announced after the close that 3Q14 EPS will be in the \$0.45-\$0.55 range, versus current consensus of \$0.67. We believe the miss to our number (and likely consensus) is due to three items, including (i) lower fungicide/insecticide applications (crop in excellent condition coupled w/ low prices resulting in a low incentive to spray), (ii) higher than expected costs due to the planned 45-day turn around at Redwater, and (iii) greater degree of Vanscoy expenses in 3Q; total 2H cost likely to exceed our est. of \$40mm. We are adjusting our 3Q est to \$0.52, 4Q to \$0.90 and 2015 to \$8.00 (from \$8.31). We are lowering our 2014 EPS estimates to \$5.85 from \$6.28.
- '14 a Year NOT to Remember; '15 More Promising Despite Headwinds: While we believe 2014 has thus far been a difficult year for AGU (particularly 1H14), 2015 is poised to be much more promising. We base this comment on some key themes, including (i) less production disruptions and lower costs in nitrogen (meaningful offset to lower prices), (ii) full cost and production pendulum swing in the potash segment (expect ~60% volume increase on easy comp due to downtime), (iii) further cost management and execution within the retail segment. While we remain positive on AGU in the long term, we fully concede that negative ag sentiment will likely continue to keep the stock range bound over the near term.
- Investor Day on November 5th Integral to Long Term Thesis: We believe the upcoming investor day will likely be a positive catalyst for the stock, with management likely reinforcing Vanscoy's projected ramp-up time (on-time, but potentially more expensive), better execution in nitrogen, and further improvements in retail, including incremental opportunities with Viterra.

**ESTIMATE / TARGET PRICE CHANGES**

<b>Yamana Gold (AUY.N)</b>	<b>OUTPERFORM</b>	<b>A. Soni</b>
<b>CP: US\$ 5.91</b>	<b>TP: US\$ 10</b>	<b>1 416 352 4587</b>

**CM running well, CS seeing upside in 2015/16; Lowering Estimates**

- Outperform rating and US\$10 maintained, view unchanged: Our NAV is slightly trimmed to US\$5.02/sh from US\$5.06 and FY15/16 OpCFA to \$0.61/sh from \$0.62/sh. We are Outperform on AUY as we believe the company reached an inflection point in Q2 on operational performance and cash flow. We see AUY's operational performance improving due to H2 loaded production, reduced spending and refocus on the lower cost, higher quality mines given reduced market expectations for the recent start-ups.
- AEM and AUY co-hosted a tour of the Canadian Malartic mine on September 30. The asset is running well and in line with our expectations. The 50/50 Canadian Malartic JV (CMJV) highlighted areas for optimization under evaluation. CMJV noted that the mill is now operating above the 48-50ktpd it was achieving on acquisition, and the next focus will be to ramp the Malartic mill up from 50.7ktpd in Q2 to 52ktpd without additional capital. Our Malartic NAV was trimmed by \$30M to \$1.03B from \$1.06B previously based on a 55ktpd ultimate throughput.
- CS now models 55ktpd (from 60ktpd) as ultimate throughput, maintains prior 55ktpd ramp up trajectory: of 51ktpd in 2015, 53ktpd in 2016 (from 54ktpd) and 55ktpd in 2017. We continue to see an expansion potential at Malartic (to 60ktpd though we are not modelling it at this time).
- CS production estimates for Malartic increased in 2015 on grade: to 572koz from 555koz based on a higher grade est. of 1.07g/t from 1.04g/t. Grade reconciliation has been 4% better than expected on better mining and inherent grade of the crown pillars, which could continue to benefit grades in 2015/2016, CS models 3% better grade vs. prior estimates.
- Cost estimates for Malartic revised slightly higher: We now model LOM unit costs of \$19.28/t, above our prior \$18.49/t estimate.
- EPS revised to \$0.15/\$0.24/\$0.16 from \$0.18/\$0.24/\$0.17.

All headline prices are as of the previous day's close unless otherwise noted.

## Disclosure Appendix

### Important Global Disclosures

The analysts identified in this report each certify, with respect to the companies or securities that the individual analyzes, that (1) the views expressed in this report accurately reflect his or her personal views about all of the subject companies and securities and (2) no part of his or her compensation was, is or will be directly or indirectly related to the specific recommendations or views expressed in this report.

The analyst(s) responsible for preparing this research report received compensation that is based upon various factors including Credit Suisse's total revenues, a portion of which are generated by Credit Suisse's investment banking activities.

**As of December 10, 2012 Analysts' stock rating are defined as follows:**

**Outperform (O):** The stock's total return is expected to outperform the relevant benchmark\* over the next 12 months.

**Neutral (N):** The stock's total return is expected to be in line with the relevant benchmark\* over the next 12 months.

**Underperform (U):** The stock's total return is expected to underperform the relevant benchmark\* over the next 12 months.

*\*Relevant benchmark by region: As of 10th December 2012, Japanese ratings are based on a stock's total return relative to the analyst's coverage universe which consists of all companies covered by the analyst within the relevant sector, with Outperforms representing the most attractive, Neutrals the less attractive, and Underperforms the least attractive investment opportunities. As of 2nd October 2012, U.S. and Canadian as well as European ratings are based on a stock's total return relative to the analyst's coverage universe which consists of all companies covered by the analyst within the relevant sector, with Outperforms representing the most attractive, Neutrals the less attractive, and Underperforms the least attractive investment opportunities. For Latin American, Japanese, and non-Japan Asia stocks, ratings are based on a stock's total return relative to the average total return of the relevant country or regional benchmark; Australia, New Zealand are, and prior to 2nd October 2012 U.S. and Canadian ratings were based on (1) a stock's absolute total return potential to its current share price and (2) the relative attractiveness of a stock's total return potential within an analyst's coverage universe. For Australian and New Zealand stocks, 12-month rolling yield is incorporated in the absolute total return calculation and a 15% and a 7.5% threshold replace the 10-15% level in the Outperform and Underperform stock rating definitions, respectively. The 15% and 7.5% thresholds replace the +10-15% and -10-15% levels in the Neutral stock rating definition, respectively. Prior to 10th December 2012, Japanese ratings were based on a stock's total return relative to the average total return of the relevant country or regional benchmark.*

**Restricted (R):** In certain circumstances, Credit Suisse policy and/or applicable law and regulations preclude certain types of communications, including an investment recommendation, during the course of Credit Suisse's engagement in an investment banking transaction and in certain other circumstances.

**Volatility Indicator [V]:** A stock is defined as volatile if the stock price has moved up or down by 20% or more in a month in at least 8 of the past 24 months or the analyst expects significant volatility going forward.

**Analysts' sector weightings are distinct from analysts' stock ratings and are based on the analyst's expectations for the fundamentals and/or valuation of the sector\* relative to the group's historic fundamentals and/or valuation:**

**Overweight:** The analyst's expectation for the sector's fundamentals and/or valuation is favorable over the next 12 months.

**Market Weight:** The analyst's expectation for the sector's fundamentals and/or valuation is neutral over the next 12 months.

**Underweight:** The analyst's expectation for the sector's fundamentals and/or valuation is cautious over the next 12 months.

*\*An analyst's coverage sector consists of all companies covered by the analyst within the relevant sector. An analyst may cover multiple sectors.*

**Credit Suisse's distribution of stock ratings (and banking clients) is:**

<b>Global Rating Distribution*</b>		
<b>Outperform/Buy*</b>	44%	(55% banking clients)
<b>Neutral/Hold*</b>	39%	(50% banking clients)
<b>Underperform/Sell*</b>	14%	(43% banking clients)
<b>Restricted</b>	3%	

\*For purposes of the NYSE and NASD ratings distribution disclosure requirements, our stock ratings of Outperform, Neutral, and Underperform most closely correspond to Buy, Hold, and Sell respectively; however, the meanings are not the same, as our stock ratings are determined on a relative basis. (Please refer to definitions above.) An investor's decision to buy or sell a security should be based on investment objectives, current holdings, and other individual factors.

Credit Suisse's policy is to update research reports as it deems appropriate, based on developments with the subject company, the sector or the market that may have a material impact on the research views or opinions stated herein.

Credit Suisse's policy is only to publish investment research that is impartial, independent, clear, fair and not misleading. **Taiwanese Disclosures: This research report is for reference only. Investors should carefully consider their own investment risk. Investment results are the responsibility of the individual investor. Reports may not be reprinted without permission of CS. Reports written by Taiwan-based analysts on non-Taiwan listed companies are not considered recommendations to buy or sell securities under Taiwan Stock Exchange Operational Regulations Governing Securities Firms Recommending Trades in Securities to Customers.**

CS may have issued a Trade Alert regarding this security. Trade Alerts are short term trading opportunities identified by an analyst on the basis of market events and catalysts, while stock ratings reflect an analyst's investment recommendations based on expected total return over a 12-month period relative to the relevant coverage universe. Because Trade Alerts and stock ratings reflect different assumptions and analytical methods, Trade Alerts may differ directionally from the analyst's stock rating.

The author(s) of this report maintains a CS Model Portfolio that he/she regularly adjusts. The security or securities discussed in this report may be a component of the CS Model Portfolio and subject to such adjustments (which, given the composition of the CS Model Portfolio as a whole, may differ from the recommendation in this report, as well as opportunities or strategies identified in Trade Alerts concerning the same security). The CS Model Portfolio and important disclosures about it are available at [www.credit-suisse.com/ti](http://www.credit-suisse.com/ti).

**To the extent this is a report authored in whole or in part by a non-U.S. analyst and is made available in the U.S., the following are important disclosures regarding any non-U.S. analyst contributors:**

The non-U.S. research analysts listed below (if any) are not registered/qualified as research analysts with FINRA. The non-U.S. research analysts listed below may not be associated persons of CSSU and therefore may not be subject to the NASD Rule 2711 and NYSE Rule 472 restrictions on communications with a subject company, public appearances and trading securities held by a research analyst account.

- David Phung, non-U.S. analyst, is a research analyst employed by Credit Suisse Securities (Canada), Inc.
- Anita Soni, non-U.S. analyst, is a research analyst employed by Credit Suisse Securities (Canada), Inc.
- Andrew M. Kuske, non-U.S. analyst, is a research analyst employed by Credit Suisse Securities (Canada), Inc.

**Important Credit Suisse HOLT Disclosures**

With respect to the analysis in this report based on the Credit Suisse HOLT methodology, Credit Suisse certifies that (1) the views expressed in this report accurately reflect the Credit Suisse HOLT methodology and (2) no part of the Firm's compensation was, is, or will be directly related to the specific views disclosed in this report.

The Credit Suisse HOLT methodology does not assign ratings to a security. It is an analytical tool that involves use of a set of proprietary quantitative algorithms and warranted value calculations, collectively called the Credit Suisse HOLT valuation model, that are consistently applied to all the companies included in its database. Third-party data (including consensus earnings

estimates) are systematically translated into a number of default variables and incorporated into the algorithms available in the Credit Suisse HOLT valuation model. The source financial statement, pricing, and earnings data provided by outside data vendors are subject to quality control and may also be adjusted to more closely measure the underlying economics of firm performance. These adjustments provide consistency when analyzing a single company across time, or analyzing multiple companies across industries or national borders. The default scenario that is produced by the Credit Suisse HOLT valuation model establishes the baseline valuation for a security, and a user then may adjust the default variables to produce alternative scenarios, any of which could occur. Additional information about the Credit Suisse HOLT methodology is available on request.

The Credit Suisse HOLT methodology does not assign a price target to a security. The default scenario that is produced by the Credit Suisse HOLT valuation model establishes a warranted price for a security, and as the third-party data are updated, the warranted price may also change. The default variables may also be adjusted to produce alternative warranted prices, any of which could occur.

CFROI®, HOLT, HOLTfolio, HOLTSelect, ValueSearch, AggreGator, Signal Flag and “Powered by HOLT” are trademarks or service marks or registered trademarks or registered service marks of Credit Suisse or its affiliates in the United States and other countries. HOLT is a corporate performance and valuation advisory service of Credit Suisse.

Additional information about the Credit Suisse HOLT methodology is available on request.

Some investments referred to in this report will be offered solely by a single entity and in the case of some investments solely by CS, or an associate of CS or CS may be the only market maker in such investments. Past performance should not be taken as an indication or guarantee of future performance, and no representation or warranty, express or implied, is made regarding future performance. Information, opinions and estimates contained in this report reflect a judgment at its original date of publication by CS and are subject to change without notice. The price, value of and income from any of the securities or financial instruments mentioned in this report can fall as well as rise. The value of securities and financial instruments is subject to exchange rate fluctuation that may have a positive or adverse effect on the price or income of such securities or financial instruments. Investors in securities such as ADRs, the values of which are influenced by currency volatility, effectively assume this risk. Structured securities are complex instruments, typically involve a high degree of risk and are intended for sale only to sophisticated investors who are capable of understanding and assuming the risks involved. The market value of any structured security may be affected by changes in economic, financial and political factors (including, but not limited to, spot and forward interest and exchange rates), time to maturity, market conditions and volatility, and the credit quality of any issuer or reference issuer. Any investor interested in purchasing a structured product should conduct their own investigation and analysis of the product and consult with their own professional advisers as to the risks involved in making such a purchase. Some investments discussed in this report may have a high level of volatility. High volatility investments may experience sudden and large falls in their value causing losses when that investment is realised. Those losses may equal your original investment. Indeed, in the case of some investments the potential losses may exceed the amount of initial investment and, in such circumstances, you may be required to pay more money to support those losses. Income yields from investments may fluctuate and, in consequence, initial capital paid to make the investment may be used as part of that income yield. Some investments may not be readily realisable and it may be difficult to sell or realise those investments, similarly it may prove difficult for you to obtain reliable information about the value, or risks, to which such an investment is exposed. This report may provide the addresses of, or contain hyperlinks to, websites. Except to the extent to which the report refers to website material of CS, CS has not reviewed any such site and takes no responsibility for the content contained therein. Such address or hyperlink (including addresses or hyperlinks to CS's own website material) is provided solely for your convenience and information and the content of any such website does not in any way form part of this document. Accessing such website or following such link through this report or CS's website shall be at your own risk. Research provided to residents of Malaysia is authorised by the Head of Research for Credit Suisse Securities (Malaysia) Sdn Bhd, to whom they should direct any queries on +603 2723 2020. This report has been prepared and issued for distribution in Singapore to institutional investors, accredited investors and expert investors (each as defined under the Financial Advisers Regulations) only, and is also distributed by Credit Suisse AG, Singapore branch to overseas investors (as defined under the Financial Advisers Regulations). By virtue of your status as an institutional investor, accredited investor, expert investor or overseas investor, Credit Suisse AG, Singapore branch is exempted from complying with certain compliance requirements under the Financial Advisers Act, Chapter 110 of Singapore (the "FAA"), the Financial Advisers Regulations and the relevant Notices and Guidelines issued thereunder, in respect of any financial advisory service which Credit Suisse AG, Singapore branch may provide to you. This research may not conform to Canadian disclosure requirements. In jurisdictions where CS is not already registered or licensed to trade in securities, transactions will only be effected in accordance with applicable securities legislation, which will vary from jurisdiction to jurisdiction and may require that the trade be made in accordance with applicable exemptions from registration or licensing requirements. Non-U.S. customers wishing to effect a transaction should contact a CS entity in their local jurisdiction unless governing law permits otherwise. U.S. customers wishing to effect a transaction should do so only by contacting a representative at Credit Suisse Securities (USA) LLC in the U.S. Please note that this research was originally prepared and issued by CS for distribution to their market professional and institutional investor customers. Recipients who are not market professional or institutional investor customers of CS should seek the advice of their independent financial advisor prior to taking any investment decision based on this report or for any necessary explanation of its contents. This research may relate to investments or services of a person outside of the UK or to other matters which are not authorised by the Prudential Regulation Authority and regulated by the Financial Conduct Authority and the Prudential Regulation Authority or in respect of which the protections of the Prudential Regulation Authority and Financial Conduct Authority for private customers and/or the UK compensation scheme may not be available, and further details as to where this may be the case are available upon request in respect of this report. CS may provide various services to US municipal entities or obligated persons ("municipalities"), including suggesting individual transactions or trades and entering into such transactions. Any services CS provides to municipalities are not viewed as "advice" within the meaning of Section 975 of the Dodd-Frank Wall Street Reform and Consumer Protection Act. CS is providing any such services and related information solely on an arm's length basis and not as an advisor or fiduciary to the municipality. In connection with the provision of the any such services, there is no agreement, direct or indirect, between any municipality (including the officials, management, employees or agents thereof) and CS for CS to provide advice to the municipality. Municipalities should consult with their financial, accounting and legal advisors regarding any such services provided by CS. In addition, CS is not acting for direct or indirect compensation to solicit the municipality on behalf of an unaffiliated broker, dealer, municipal securities dealer, municipal advisor, or investment adviser for the purpose of obtaining or retaining an engagement by the municipality for or in connection with Municipal Financial Products, the issuance of municipal securities, or of an investment adviser to provide investment advisory services to or on behalf of the municipality. If this report is being distributed by a financial institution other than Credit Suisse AG, or its affiliates, that financial institution is solely responsible for distribution. Clients of that institution should contact that institution to effect a transaction in the securities mentioned in this report or require further information. This report does not constitute investment advice by Credit Suisse to the clients of the distributing financial institution, and neither Credit Suisse AG, its affiliates, and their respective officers, directors and employees accept any liability whatsoever for any direct or consequential loss arising from their use of this report or its content. Principal is not guaranteed. Commission is the commission rate or the amount agreed with a customer when setting up an account or at any time after that.

## COMPANY UPDATE

## Investor Day: Outlining an organic approach

- **Investor day highlights:** The inaugural Fortis Investor day was very well attended by the Street. In our view, the day provided a reasonable balance of depth and breadth of the Fortis asset base. Perhaps, the major takeaway from the day was the focus on organic growth for the near-term and the downplaying of acquisitions. Given the recent announcement to review strategic options for Fortis Properties ([link](#)), we believe FTS has tremendous capital flexibility in the near-term to easily fund a fairly large organic growth program. Simply, Fortis believes the 4-year CAGR of rate base growth from 2014-2018 will be roughly 7% and could increase to approximately 8.5% with some higher option value projects. Given the size of the Fortis asset base and the nature of the industry, that level of growth is relatively compelling and should be viewed positively.
- **An acquisition reprieve:** Given some issues associated with UNS financing, we believe FTS will be very focused on organic activities for the foreseeable future. Obviously, acquisitions will remain a part of FTS playbook and game plan, but these areas are not likely to gain significant attention at this time.
- **Investment thesis:** FTS is turning to life after the UNS acquisition issue that created some stock market headwinds. With the financing well behind FTS and a large slate of organic growth ahead, we believe that FTS is now focused on avoiding deal distractions and delivering high value added organic capital growth.
- **Valuation:** Our target price of C\$32.00 is on an implied yield of 4.13% and a yield spread of roughly 138 bps on a 2.75% Canadian 10-year. We maintain our Neutral rating.

**DISCLOSURE APPENDIX AT THE BACK OF THIS REPORT CONTAINS IMPORTANT DISCLOSURES, ANALYST CERTIFICATIONS, AND THE STATUS OF NON-US ANALYSTS.** US Disclosure: Credit Suisse does and seeks to do business with companies covered in its research reports. As a result, investors should be aware that the Firm may have a conflict of interest that could affect the objectivity of this report. Investors should consider this report as only a single factor in making their investment decision.

Obviously, we believe minimal value exists in summarizing an entire investor day. We view some of the notable items to highlight include:

- Ongoing organic growth; and,
- Financials.

Each of these areas is address in more detail below.

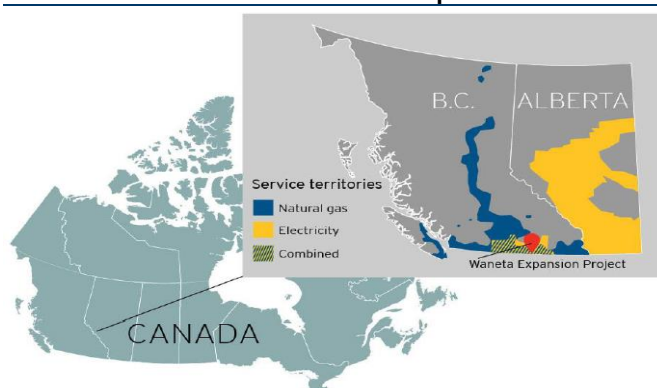

## Ongoing organic growth

In this section, as presented, we address the major Fortis business groups for coherence.

### Western Canada

Exhibit 1 and Exhibit 2 provide a perspective of location and the customer breakdown along with the 2014 mid-year rate base by asset group, respectively.

**Exhibit 1: Western Canadian asset map**

Source: Company data

**Exhibit 2: Western Canadian customer and rate base**

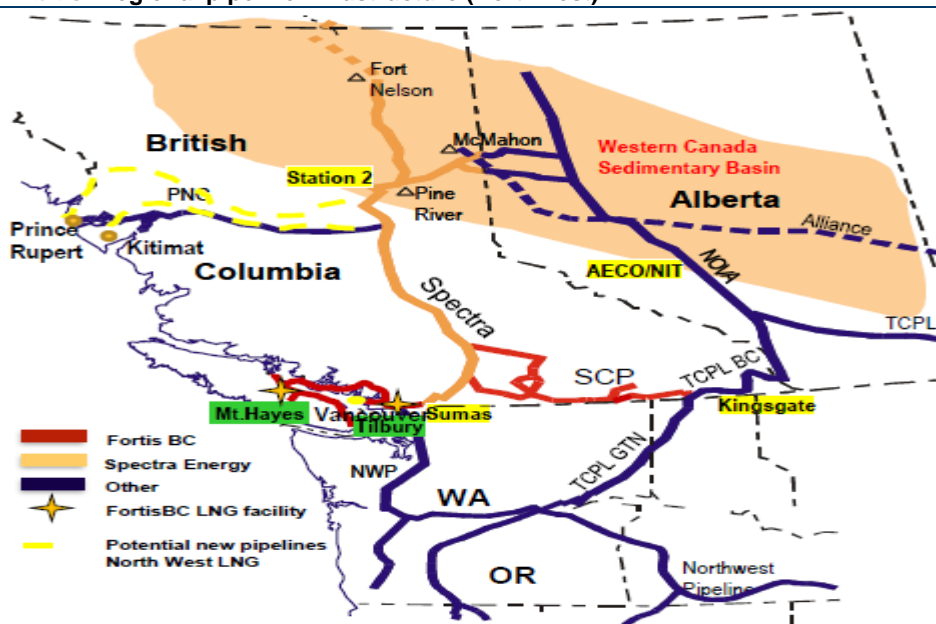

Source: Company data

In our view, there is very interesting potential for the Fortis BC natural gas assets to deliver some outsized growth in the future given the existing asset base and LNG related capital flowing into the Province. Exhibit 3 illustrates some of the regional pipeline infrastructure.

LNG related growth potential in the BC assets

**Exhibit 3: Regional pipeline infrastructure (Northwest)**

Source: Company data

A fairly robust amount of capex and rate base growth is captured in Exhibit 4 and Exhibit 5, respectively.

**Exhibit 4: 5-year capex plan (C\$4.5 billion)**  
in millions, unless otherwise stated

Source: Company data

**Exhibit 5: Rate base growth**  
in billions, unless otherwise stated

Source: Company data

Notably, the Woodfibre LNG pipeline expansion along with the Tilbury LNG projects may meaningfully add to this base capital program as shown in Exhibit 6 and Exhibit 7.

**Exhibit 6: 5-year capex plan w/ LNG (C\$5.6 billion)**  
in millions, unless otherwise stated

Source: Company data

**Exhibit 7: Rate base growth with potential LNG projects**  
in billions, unless otherwise stated

Source: Company data

## UNS Energy

Exhibit 8 highlights the service territory of UNS Energy that helps provide perspective on this potential platform for future growth.

**Exhibit 8: UNS Energy service territory**

Ample growth opportunities from the US asset base

Source: Company data, Credit Suisse estimates

These utility assets face considerable capital spend for more moderate rate base growth as is illustrated in Exhibit 9 and Exhibit 10, respectively.

**Exhibit 9: 5-year capex plan (US\$2.0 billion)**

Note: from the date of acquisition, August 15, 2014. Source: Company data

**Exhibit 10: Rate base growth**

Note: includes ACC and FERC jurisdictional rate base. Source: Company data

A future area to watch is the glide path to improved equity capitalization at UNS Energy as illustrated in Exhibit 11. Clearly, a greater level of equity may help with financing costs, total returns and regulatory relationships.

**Exhibit 11: UNS Energy Corp. equity/capitalization**

Improved equity capitalization at UNS

Source: Company data

One of the major factors helping drive rate base growth at the UNS business is the change in power generation dynamics in Arizona. The evolution of the power market, in part, is a function of environmental rules along with some other factors. Yet, the transition is very notable as appears in Exhibit 12.

Power generation dynamics a major issue to watch with UNS

**Exhibit 12: Tucson Electric Power (TEP) integrated resource plan**

Source: Company data

We believe a key UNS issue to watch is the actual core utility earnings against the allowed returns after the Gila and Springville purchases.

## Eastern Canada and Caribbean

Over the years, Fortis managed to significantly diversify away the core Newfoundland asset based as can be seen by the asset map and the rate base breakdown in Exhibit 13 and Exhibit 14, respectively.

**Exhibit 13: Eastern Canadian asset map**

Source: Company data

**Exhibit 14: Eastern Canadian customer and rate base**

Source: Company data

Exhibit 15 and Exhibit 16 illustrate this group's capex plan and rate base growth.

**Exhibit 15: 5-year capex plan (C\$1.3 billion)**

Source: Company data

**Exhibit 16: Rate base growth**

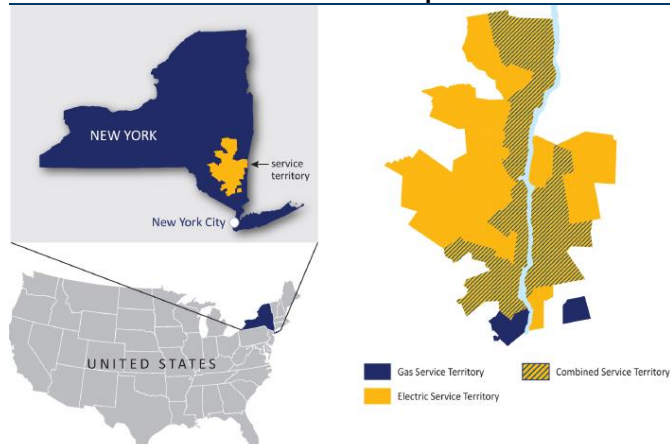

Source: Company data

## Central Hudson Gas and Electric

An overview of Central Hudson's geographic location, the customer base and rate base appear in Exhibit 17 and Exhibit 18.

**Exhibit 17: Central Hudson asset map**

Source: Company data

**Exhibit 18: Central Hudson customer and rate base**

Source: Company data

During the regulatory process associated with CH a number of concessions were made in order to complete the transaction. One of those concessions was a rate freeze that runs until June 30, 2015. Management stated that new rates to be in place after the rate freeze that ends would be a good indication for the run rate earnings of the business. Beyond that dynamic, CH growth opportunities through electric transmission with NY Transco (a utility consortium) and US\$250m-US\$500m of potential gas transmission projects for regional shale production from the Marcellus to southern New York.

Other growth opportunities beyond the core utilities

CH's 5-year capex plan and rate base appears in Exhibit 19 and Exhibit 20, respectively.

**Exhibit 19: 5-year capex plan (US\$0.7 billion)**

Source: Company data

**Exhibit 20: Rate base growth**

Source: Company data

## Financials

Fortis Inc. asset base consists of the following:

- Regulated Utilities
  - 9 utilities
  - C\$22.6 billion of assets

- Servicing 3.1 million customers (1.6m electric, 1.5m gas)
- Non-regulated
  - Hydroelectric generation
  - Non-utility (hotels and real estate)
  - C\$1.7 billion of assets

**Exhibit 21: FTS asset base (93% regulated assets)**

A regulated asset skew

Source: Company data

With the potential divestiture of the Fortis Properties division along with ongoing rate base growth from existing assets, we believe the regulated skew will continue to increase. This growth will come from organic activity rather than acquisitions that tended to have a big impact on the asset base over the years (Exhibit 22).

**Exhibit 22: Asset base growth**

Note: (1) Financial information 2010 through 2013 prepared under US GAAP; prior to 2010 prepared under previous Canadian GAAP (2) Compound annual growth rate (3) As at June 30, 2014, on a pro forma basis, including UNS Energy. Source: Company data

Fortis stated that equity financing is not required for the remaining funding associated with the UNS transaction as highlighted in Exhibit 23 totaling US\$500m. Given the potential for a significant amount of proceeds from the Fortis Properties divestiture, we do not envision any major issues with this funding requirement.

**Exhibit 23: Financing UNS Energy acquisition**

(US\$B)	2014
Cash required to fund UNS Energy Acquisition	2.6
Financing Plan:	
Cash on hand	0.5
Rate-reset preference share issue (Sept 2014)	0.5
Final installment of convertible debentures (Oct 2014)	1.1
	<u>2.1</u>
Balance to permanently finance	<u>0.5</u>

Source: Company data

Additionally, FTS stated that a meaningful amount of equity (beyond the DRIP program) will not be required to fund the 5-year capital program appearing in Exhibit 24. Yet, there may be a need for external common equity in the event the LNG projects proceed as per Exhibit 25.

**Exhibit 24: 5-year capex plan w/o LNG projects (C\$9.3bn)**

Note: (1) includes forecast capital expenditures for UNS Energy from the date of acquisition, August 15, 2014 Source: Company data

**Exhibit 25: 5-year capex plan w/ LNG projects (C\$10.3bn)**

Note: (1) includes forecast capital expenditures for UNS Energy from the date of acquisition, August 15, 2014 Source: Company data

On a consolidated basis, Exhibit 26 and Exhibit 27 highlight the rate base growth in both the "with" and "without" LNG project scenarios.

**Exhibit 26: Rate base growth & Waneta investment**

Source: Company data

**Exhibit 27: Rate base growth w/ Waneta and LNG projects**

Source: Company data

Positively, Fortis is very well positioned with value creating organic growth for the years to come.

**Companies Mentioned** (Price as of 01-Oct-2014)**Fortis Inc.** (FTS.TO, C\$34.57, NEUTRAL, TP C\$32.0)

## Disclosure Appendix

**Important Global Disclosures**

I, Andrew M. Kuske, certify that (1) the views expressed in this report accurately reflect my personal views about all of the subject companies and securities and (2) no part of my compensation was, is or will be directly or indirectly related to the specific recommendations or views expressed in this report.

**3-Year Price and Rating History for Fortis Inc. (FTS.TO)**

FTS.TO	Closing Price	Target Price	
Date	(C\$)	(C\$)	Rating
03-Nov-11	34.06	34.00	N
20-Jul-12	33.14	38.00	O
18-Oct-13	32.01	36.00	
28-Jan-14	29.99	32.00	N

\* Asterisk signifies initiation or assumption of coverage.

The analyst(s) responsible for preparing this research report received Compensation that is based upon various factors including Credit Suisse's total revenues, a portion of which are generated by Credit Suisse's investment banking activities

**As of December 10, 2012 Analysts' stock rating are defined as follows:**

**Outperform (O) :** The stock's total return is expected to outperform the relevant benchmark\* over the next 12 months.

**Neutral (N) :** The stock's total return is expected to be in line with the relevant benchmark\* over the next 12 months.

**Underperform (U) :** The stock's total return is expected to underperform the relevant benchmark\* over the next 12 months.

\*Relevant benchmark by region: As of 10th December 2012, Japanese ratings are based on a stock's total return relative to the analyst's coverage universe which consists of all companies covered by the analyst within the relevant sector, with Outperforms representing the most attractive, Neutrals the less attractive, and Underperforms the least attractive investment opportunities. As of 2nd October 2012, U.S. and Canadian as well as European ratings are based on a stock's total return relative to the analyst's coverage universe which consists of all companies covered by the analyst within the relevant sector, with Outperforms representing the most attractive, Neutrals the less attractive, and Underperforms the least attractive investment opportunities. For Latin American and non-Japan Asia stocks, ratings are based on a stock's total return relative to the average total return of the relevant country or regional benchmark; prior to 2nd October 2012 U.S. and Canadian ratings were based on (1) a stock's absolute total return potential to its current share price and (2) the relative attractiveness of a stock's total return potential within an analyst's coverage universe. For Australian and New Zealand stocks, 12-month rolling yield is incorporated in the absolute total return calculation and a 15% and a 7.5% threshold replace the 10-15% level in the Outperform and Underperform stock rating definitions, respectively. The 15% and 7.5% thresholds replace the +10-15% and -10-15% levels in the Neutral stock rating definition, respectively. Prior to 10th December 2012, Japanese ratings were based on a stock's total return relative to the average total return of the relevant country or regional benchmark.

**Restricted (R) :** In certain circumstances, Credit Suisse policy and/or applicable law and regulations preclude certain types of communications, including an investment recommendation, during the course of Credit Suisse's engagement in an investment banking transaction and in certain other circumstances.

**Volatility Indicator [V] :** A stock is defined as volatile if the stock price has moved up or down by 20% or more in a month in at least 8 of the past 24 months or the analyst expects significant volatility going forward.

Analysts' sector weightings are distinct from analysts' stock ratings and are based on the analyst's expectations for the fundamentals and/or valuation of the sector\* relative to the group's historic fundamentals and/or valuation:

**Overweight :** The analyst's expectation for the sector's fundamentals and/or valuation is favorable over the next 12 months.

**Market Weight :** The analyst's expectation for the sector's fundamentals and/or valuation is neutral over the next 12 months.

**Underweight :** The analyst's expectation for the sector's fundamentals and/or valuation is cautious over the next 12 months.

\*An analyst's coverage sector consists of all companies covered by the analyst within the relevant sector. An analyst may cover multiple sectors.

Credit Suisse's distribution of stock ratings (and banking clients) is:

### Global Ratings Distribution

Rating	Versus universe (%)	Of which banking clients (%)
Outperform/Buy*	44%	(55% banking clients)
Neutral/Hold*	39%	(50% banking clients)
Underperform/Sell*	14%	(43% banking clients)
Restricted	3%	

*\*For purposes of the NYSE and NASD ratings distribution disclosure requirements, our stock ratings of Outperform, Neutral, and Underperform most closely correspond to Buy, Hold, and Sell, respectively; however, the meanings are not the same, as our stock ratings are determined on a relative basis. (Please refer to definitions above.) An investor's decision to buy or sell a security should be based on investment objectives, current holdings, and other individual factors.*

Credit Suisse's policy is to update research reports as it deems appropriate, based on developments with the subject company, the sector or the market that may have a material impact on the research views or opinions stated herein.

### Price Target: (12 months) for Fortis Inc. (FTS.TO)

**Method:** We obtain our C\$32.00 target price for Fortis Inc. by using multiple valuation methodologies, but primarily rely upon a targeted dividend yield of 4.13% and an imputed 138 bps spread over a 2.75% Canadian 10-year bond yield.

**Risk:** There are a number of risks to Fortis' achievement of our C\$32.00 target price: commodity prices; weather; environmental; regulatory; access to capital markets; and, interest rates. Moreover, one should never underestimate the power of the regulator in any regulated business.

Please refer to the firm's disclosure website at <https://rave.credit-suisse.com/disclosures> for the definitions of abbreviations typically used in the target price method and risk sections.

*See the Companies Mentioned section for full company names*

The subject company (FTS.TO) currently is, or was during the 12-month period preceding the date of distribution of this report, a client of Credit Suisse.

Credit Suisse provided non-investment banking services to the subject company (FTS.TO) within the past 12 months

Credit Suisse expects to receive or intends to seek investment banking related compensation from the subject company (FTS.TO) within the next 3 months.

Credit Suisse has received compensation for products and services other than investment banking services from the subject company (FTS.TO) within the past 12 months

As of the end of the preceding month, Credit Suisse beneficially own 1% or more of a class of common equity securities of (FTS.TO).

This report may contain material that is not directed to, or intended for distribution to or use by, any person or entity who is a citizen or resident of or located in any locality, state, country or other jurisdiction where such distribution, publication, availability or use would be contrary to law or regulation or which would subject Credit Suisse AG or its affiliates ("CS") to any registration or licensing requirement within such jurisdiction. All material presented in this report, unless specifically indicated otherwise, is under copyright to CS. None of the material, nor its content, nor any copy of it, may be altered in any way, transmitted to, copied or distributed to any other party, without the prior express written permission of CS. All trademarks, service marks and logos used in this report are trademarks or service marks or registered trademarks or service marks of CS or its affiliates. The information, tools and material presented in this report are provided to you for information purposes only and are not to be used or considered as an offer or the solicitation of an offer to sell or to buy or subscribe for securities or other financial instruments. CS may not have taken any steps to ensure that the securities referred to in this report are suitable for any particular investor. CS will not treat recipients of this report as its customers by virtue of their receiving this report. The investments and services contained or referred to in this report may not be suitable for you and it is recommended that you consult an independent investment advisor if you are in doubt about such investments or investment services. Nothing in this report constitutes investment, legal, accounting or tax advice, or a representation that any investment or strategy is suitable or appropriate to your individual circumstances, or otherwise constitutes a personal recommendation to you. CS does not advise on the tax consequences of investments and you are advised to contact an independent tax adviser. Please note in particular that the bases and levels of taxation may change. Information and opinions presented in this report have been obtained or derived from sources believed by CS to be reliable, but CS makes no representation as to their accuracy or completeness. CS accepts no liability for loss arising from the use of the material presented in this report, except that this exclusion of liability does not apply to the extent that such liability arises under specific statutes or regulations applicable to CS. This report is not to be relied upon in substitution for the exercise of independent judgment. CS may have issued, and may in the future issue, other communications that are inconsistent with, and reach different conclusions from, the information presented in this report. Those communications reflect the different assumptions, views and analytical methods of the analysts who prepared them and CS is under no obligation to ensure that such other communications are brought to the attention of any recipient of this report. Some investments referred to in this report will be offered solely by a single entity and in the case of some investments solely by CS, or an associate of CS or CS may be the only market maker in such investments. Past performance should not be taken as an indication or guarantee of future performance, and no representation or warranty, express or implied, is made regarding future performance. Information, opinions and estimates contained in this report reflect a judgment at its original date of publication by CS and are subject to change without notice. The price, value of and income from any of the securities or financial instruments mentioned in this report can fall as well as rise. The value of securities and financial instruments is subject to exchange rate fluctuation that may have a positive or adverse effect on the price or income of such securities or financial instruments. Investors in securities such as ADRs, the values of which are influenced by currency volatility, effectively assume this risk. Structured securities are complex instruments, typically involve a high degree of risk and are intended for sale only to sophisticated investors who are capable of understanding and assuming the risks involved. The market value of any structured security may be affected by changes in economic, financial and political factors (including, but not limited to, spot and forward interest and exchange rates), time to maturity, market conditions and volatility, and the credit quality of any issuer or reference issuer. Any investor interested in purchasing a structured product should conduct their own investigation and analysis of the product and consult with their own professional advisers as to the risks involved in making such a purchase. Some investments discussed in this report may have a high level of volatility. High volatility investments may experience sudden and large falls in their value causing losses when that investment is realised. Those losses may equal your original investment. Indeed, in the case of some investments the potential losses may exceed the amount of initial investment and, in such circumstances, you may be required to pay more money to support those losses. Income yields from investments may fluctuate and, in consequence, initial capital paid to make the investment may be used as part of that income yield. Some investments may not be readily realisable and it may be difficult to sell or realise those investments, similarly it may prove difficult for you to obtain reliable information about the value, or risks, to which such an investment is exposed. This report may provide the addresses of, or contain hyperlinks to, websites. Except to the extent to which the report refers to website material of CS, CS has not reviewed any such site and takes no responsibility for the content contained therein. Such address or hyperlink (including addresses or hyperlinks to CS's own website material) is provided solely for your convenience and information and the content of any such website does not in any way form part of this document. Accessing such website or following such link through this report or CS's website shall be at your own risk. This report is issued and distributed in Europe (except Switzerland) by Credit Suisse Securities (Europe) Limited, One Cabot Square, London E14 4QJ, England, which is authorised by the Prudential Regulation Authority and regulated by the Financial Conduct Authority and the Prudential Regulation Authority. This report is being distributed in Germany by Credit Suisse Securities (Europe) Limited Niederlassung Frankfurt am Main regulated by the Bundesanstalt fuer Finanzdienstleistungsaufsicht ("BaFin"). This report is being distributed in the United States and Canada by Credit Suisse Securities (USA) LLC; in Switzerland by Credit Suisse AG; in Brazil by Banco de Investimentos Credit Suisse (Brasil) S.A. or its affiliates; in Mexico by Banco Credit Suisse (México), S.A. (transactions related to the securities mentioned in this report will only be effected in compliance with applicable regulation); in Japan by Credit Suisse Securities (Japan) Limited, Financial Instruments Firm, Director-General of Kanto Local Finance Bureau (*Kinsho*) No. 66, a member of Japan Securities Dealers Association, The Financial Futures Association of Japan, Japan Investment Advisers Association, Type II Financial Instruments Firms Association; elsewhere in Asia/ Pacific by whichever of the following is the appropriately authorised entity in the relevant jurisdiction: Credit Suisse (Hong Kong) Limited, Credit Suisse Equities (Australia) Limited, Credit Suisse Securities (Thailand) Limited, regulated by the Office of the Securities and Exchange Commission, Thailand, having registered address at 990 Abdulrahim Place, 27th Floor, Unit 2701, Rama IV Road, Silom, Bangkok, Bangkok 10500, Thailand, Tel. +66 2614 6000, Credit Suisse Securities (Malaysia) Sdn Bhd, Credit Suisse AG, Singapore Branch, Credit Suisse Securities (India) Private Limited (CIN no. U67120MH1996PTC104392) regulated by the Securities and Exchange Board of India (registration Nos. INB230970637; INF230970637; INB010970631; INF010970631), having registered address at 9th Floor, Ceejay House, Dr.A.B. Road, Worli, Mumbai - 18, India, T. +91-22 6777 3777, Credit Suisse Securities (Europe) Limited, Seoul Branch, Credit Suisse AG, Taipei Securities Branch, PT Credit Suisse Securities Indonesia, Credit Suisse Securities (Philippines) Inc., and elsewhere in the world by the relevant authorised affiliate of the above. Research on Taiwanese securities produced by Credit Suisse AG, Taipei Securities Branch has been prepared by a registered Senior Business Person. Research provided to residents of Malaysia is authorised by the Head of Research for Credit Suisse Securities (Malaysia) Sdn Bhd, to whom they should direct any queries on +603 2723 2020. This report has been prepared and issued for distribution in Singapore to institutional investors, accredited investors and expert investors (each as defined under the Financial Advisers Regulations) only, and is also distributed by Credit Suisse AG, Singapore branch to overseas investors (as defined under the Financial Advisers Regulations). By virtue of your status as an institutional investor, accredited investor, expert investor or overseas investor, Credit Suisse AG, Singapore branch is exempted from complying with certain compliance requirements under the Financial Advisers Act, Chapter 110 of Singapore (the "FAA"), the Financial Advisers Regulations and the relevant Notices and Guidelines issued thereunder, in respect of any financial advisory service which Credit Suisse AG, Singapore branch may provide to you. This research may not conform to Canadian disclosure requirements. In jurisdictions where CS is not already registered or licensed to trade in securities, transactions will only be effected in accordance with applicable securities legislation, which will vary from jurisdiction to jurisdiction and may require that the trade be made in accordance with applicable exemptions from registration or licensing requirements. Non-U.S. customers wishing to effect a transaction should contact a CS entity in their local jurisdiction unless governing law permits otherwise. U.S. customers wishing to effect a transaction should do so only by contacting a representative at Credit Suisse Securities (USA) LLC in the U.S. Please note that this research was originally prepared and issued by CS for distribution to their market professional and institutional investor customers. Recipients who are not market professional or institutional investor customers of CS should seek the advice of their independent financial advisor prior to taking any investment decision based on this report or for any necessary explanation of its contents. This research may relate to investments or services of a person outside of the UK or to other matters which are not authorised by the Prudential Regulation Authority and regulated by the Financial Conduct Authority and the Prudential Regulation Authority or in respect of which the protections of the Prudential Regulation Authority and Financial Conduct Authority for private customers and/or the UK compensation scheme may not be available, and further details as to where this may be the case are available upon request in respect of this report. CS may provide various services to US municipal entities or obligated persons ("municipalities"), including suggesting individual transactions or trades and entering into such transactions. Any services CS provides to municipalities are not viewed as "advice" within the meaning of Section 975 of the Dodd-Frank Wall Street Reform and Consumer Protection Act. CS is providing any such services and related information solely on an arm's length basis and not as an advisor or fiduciary to the municipality. In connection with the provision of the any such services, there is no agreement, direct or indirect, between any municipality (including the officials, management, employees or agents thereof) and CS for CS to provide advice to the municipality. Municipalities should consult with their financial, accounting and legal advisors regarding any such services provided by CS. In addition, CS is not acting for direct or indirect compensation to solicit the municipality on behalf of an unaffiliated broker, dealer, municipal securities dealer, municipal advisor, or investment adviser for the purpose of obtaining or retaining an engagement by the municipality for or in connection with Municipal Financial Products, the issuance of municipal securities, or of an investment adviser to provide investment advisory services to or on behalf of the municipality. If this report is being distributed by a financial institution other than Credit Suisse AG, or its affiliates, that financial institution is solely responsible for distribution. Clients of that institution should contact that institution to effect a transaction in the securities mentioned in this report or require further information. This report does not constitute investment advice by Credit Suisse to the clients of the distributing financial institution, and neither Credit Suisse AG, its affiliates, and their respective officers, directors and employees accept any liability whatsoever for any direct or consequential loss arising from their use of this report or its content. Principal is not guaranteed. Commission is the commission rate or the amount agreed with a customer when setting up an account or at any time after that.

## THEME

## Opening up the Ontario opportunities on the horizon; Fortis would be a front-runner

- **A political process:** In an ongoing process, Ed Clark, Chair of the Advisory Council on Government Assets delivered a speech foreshadowing the final report's direction to be released next year. Simply, radical changes for Ontario's electricity system owned by Ontario Power Generation and Hydro One are not in the plan. Yet, we believe some opportunities may exist for the currently exposed investor owned electric utility companies (FTS) along with potential for more partnership activities in the power and transmission realm. Potential opportunities may arise for various others, including: the Brookfield Group (BAM, BIP, BEP); Emera; Enbridge Inc., Fortis; and, TransCanada.
- **Speech highlights:** The title of the speech was "Retain and Gain: Making Ontario assets work better for ratepayers, taxpayers and consumers". That title's tone is clear for the Council's position on three assets: LCBO, H1 and OPG. The Council's mandate aims to provide options for these assets to help "maximizing their value to the people of Ontario". The Council's view is that roughly C\$2-C\$3bn could be freed up and invested in transportation assets without increasing the overall debt or deficit which would help solve the infrastructure issues in the Province. Ultimately, "[t]hese investments would create jobs directly and indirectly through removing impediments to economic growth." Currently, the Council has support in principle from the key management teams along with a Government go-ahead for the next phase. As stated by the Council, moving from framework to implementation and execution is challenging as "[t]he devil is often in the details."
- **Selected stocks:** Clearly, policy statements have wide interpretation at this point; however, issues around Ontario's electric distribution utilities may be most impactful. The consolidation of Ontario's municipal electric utilities is an interesting trend for many companies including: AQN, BIP, CU, EMA, ENB, FTS. Given the existing Ontario electric utility exposure, we view FTS as possibly the best positioned to benefit from a MEU consolidation. Beyond the MEUs, we believe some private sector expertise along with capital may be very beneficial for certain power investments along with new transmission projects. These trends could be helpful for BEP, CU, EMA, ENB, TRP.

**DISCLOSURE APPENDIX AT THE BACK OF THIS REPORT CONTAINS IMPORTANT DISCLOSURES, ANALYST CERTIFICATIONS, AND THE STATUS OF NON-US ANALYSTS.** US Disclosure: Credit Suisse does and seeks to do business with companies covered in its research reports. As a result, investors should be aware that the Firm may have a conflict of interest that could affect the objectivity of this report. Investors should consider this report as only a single factor in making their investment decision.

The full text of Mr. Clark's speech is available at:

<http://news.ontario.ca/mof/en/2014/10/remarks-delivered-by-ed-clark-chair-of-the-advisory-council-on-government-assets-at-the-metro-toront.html>

Some of the notable quotes setting the foundational elements include:

"We prefer a more measured approach - each step of which improves what we have and actually gets things done rather than adds to the list of reports never implemented."

"The Council was also guided by the government's desire to find the financial capacity to fund needed transit and transportation infrastructure in the Province."

"But we kept several things in mind."

"First - as mentioned, government's preference is to retain ownership of core assets. The Council also believes you should not rush to sell assets - rushed sales are not in the public interest. Any sale must be a carefully staged and competitive process."

"Second - we asked whether the government is, indeed, the best owner of these assets, and the purpose served by government ownership. Would a company - in private hands - be better able to serve the consumer or ratepayer? Would bringing in the private sector unlock a company which could grow and create jobs?"

"Third - these assets all earn income for the Ontario government - income which is important given its deficit position. But the proceeds of any divestiture aren't likely to be reinvested into new income-generating assets. The new infrastructure assets may add enormous value to the Province, and in turn, create income for the Province in the medium-term. But in the short-term, there is likely to be an income loss. The Council was very mindful of that impact. So, in order to offset any loss of income, it became all the more critical to improve the performance of the assets retained by the government."

"And finally, the Council members agreed that swapping ownership in infrastructure assets can make sense. But it is important that the funds raised are used to invest in assets that deliver high societal or economic returns to the Province. The government has made clear that funds raised in this process will be used to invest in transit and transportation infrastructure. Improved infrastructure will allow the economy to grow faster, create more jobs, and increase both competitiveness and productivity. In addition, of course, there are jobs directly created by undertaking the investments."

In relation to the timeline, the Council intends to provide a final report in the Spring to help inform the Provincial Government's budgeting process.

Specific to the power sector, we believe the following quotes are useful for context:

"We believe that OPG needs to focus on its major project - the Darlington refurbishment - and on improving its operations and lowering its costs. We also believe that Hydro One should concentrate on lowering its costs.... these improvements will reduce pressure on electricity rates"

"In the case of Hydro One, there is an opportunity to address a long-term problem in the electrical distribution system - the excess number of small players."

"...we would keep the core of Hydro One - its transmission business - but we would reduce the government's ownership in two assets forming part of Hydro One - Hydro One Brampton and the distribution business within Hydro One Networks. We suggest doing so in a manner which can spur needed consolidation in the electricity distribution industry. Such consolidation could reduce pressure on rising electricity rates from what they would have been, as well as improve the adaptability of the electricity distribution system."

"However, there are huge challenges related to Ontario's local electricity distribution system. We are locked into a system with too many entities, some of them highly inefficient, that cannot adapt to the changing environment and lack capital to modernize or consolidate....  
...Consolidation will facilitate efficiencies, reducing costs which will reduce electricity rates from what they would have been. It will also improve adaptability of the system and create companies which can grow and create jobs."

"In conjunction with using the distribution companies to encourage consolidation, we will review the current barriers and incentives that have been identified which impede consolidation, and suggest possible changes to them. We will undertake that in our next phase."

On OPG, the Council sees two very different businesses: nuclear and others. On the nuclear side of the business, the "core issue is the refurbishment of Darlington. This is a project which carries enormous risks.... We recommend a laser focus on making sure Darlington comes on line safely, on time, and on budget."

"There are a number of things that OPG management can do to save money and improve performance. They agree in principle with our initial findings and will explore modifying their business plans to incorporate them over time. Any savings will ultimately accrue to the ratepayers. This is a good thing."

In summary, the Council's approach is attempting to secure wins "for the ratepayers, consumers and taxpayers and the citizens of Ontario who need better infrastructure." We believe the Council's plans should be watched, in particular, for the potentially significant changes for Ontario's LDCs.

**Companies Mentioned** (Price as of 18-Oct-2014)

**Brookfield Asset Management** (BAM.N, \$45.38)

**TransCanada Corp.** (TRP.TO, C\$52.71)

## Disclosure Appendix

### Important Global Disclosures

I, Andrew M. Kuske, certify that (1) the views expressed in this report accurately reflect my personal views about all of the subject companies and securities and (2) no part of my compensation was, is or will be directly or indirectly related to the specific recommendations or views expressed in this report.

The analyst(s) responsible for preparing this research report received Compensation that is based upon various factors including Credit Suisse's total revenues, a portion of which are generated by Credit Suisse's investment banking activities

### As of December 10, 2012 Analysts' stock rating are defined as follows:

**Outperform (O)** : The stock's total return is expected to outperform the relevant benchmark\* over the next 12 months.

**Neutral (N)** : The stock's total return is expected to be in line with the relevant benchmark\* over the next 12 months.

**Underperform (U)** : The stock's total return is expected to underperform the relevant benchmark\* over the next 12 months.

*\*Relevant benchmark by region: As of 10th December 2012, Japanese ratings are based on a stock's total return relative to the analyst's coverage universe which consists of all companies covered by the analyst within the relevant sector, with Outperforms representing the most attractive, Neutrals the less attractive, and Underperforms the least attractive investment opportunities. As of 2nd October 2012, U.S. and Canadian as well as European ratings are based on a stock's total return relative to the analyst's coverage universe which consists of all companies covered by the analyst within the relevant sector, with Outperforms representing the most attractive, Neutrals the less attractive, and Underperforms the least attractive investment opportunities. For Latin American and non-Japan Asia stocks, ratings are based on a stock's total return relative to the average total return of the relevant country or regional benchmark; prior to 2nd October 2012 U.S. and Canadian ratings were based on (1) a stock's absolute total return potential to its current share price and (2) the relative attractiveness of a stock's total return potential within an analyst's coverage universe. For Australian and New Zealand stocks, 12-month rolling yield is incorporated in the absolute total return calculation and a 15% and a 7.5% threshold replace the 10-15% level in the Outperform and Underperform stock rating definitions, respectively. The 15% and 7.5% thresholds replace the +10-15% and -10-15% levels in the Neutral stock rating definition, respectively. Prior to 10th December 2012, Japanese ratings were based on a stock's total return relative to the average total return of the relevant country or regional benchmark.*

**Restricted (R)** : In certain circumstances, Credit Suisse policy and/or applicable law and regulations preclude certain types of communications, including an investment recommendation, during the course of Credit Suisse's engagement in an investment banking transaction and in certain other circumstances.

**Volatility Indicator [V]** : A stock is defined as volatile if the stock price has moved up or down by 20% or more in a month in at least 8 of the past 24 months or the analyst expects significant volatility going forward.

Analysts' sector weightings are distinct from analysts' stock ratings and are based on the analyst's expectations for the fundamentals and/or valuation of the sector\* relative to the group's historic fundamentals and/or valuation:

**Overweight** : The analyst's expectation for the sector's fundamentals and/or valuation is favorable over the next 12 months.

**Market Weight** : The analyst's expectation for the sector's fundamentals and/or valuation is neutral over the next 12 months.

**Underweight** : The analyst's expectation for the sector's fundamentals and/or valuation is cautious over the next 12 months.

*\*An analyst's coverage sector consists of all companies covered by the analyst within the relevant sector. An analyst may cover multiple sectors.*

Credit Suisse's distribution of stock ratings (and banking clients) is:

### Global Ratings Distribution

Rating	Versus universe (%)	Of which banking clients (%)
Outperform/Buy*	45%	(54% banking clients)
Neutral/Hold*	39%	(50% banking clients)
Underperform/Sell*	13%	(43% banking clients)
Restricted	3%	

*\*For purposes of the NYSE and NASD ratings distribution disclosure requirements, our stock ratings of Outperform, Neutral, and Underperform most closely correspond to Buy, Hold, and Sell, respectively; however, the meanings are not the same, as our stock ratings are determined on a relative basis. (Please refer to definitions above.) An investor's decision to buy or sell a security should be based on investment objectives, current holdings, and other individual factors.*

The price, value of and income from any of the securities or financial instruments mentioned in this report can fall as well as rise. The value of securities and financial instruments is subject to exchange rate fluctuation that may have a positive or adverse effect on the price or income of such securities or financial instruments. Investors in securities such as ADRs, the values of which are influenced by currency volatility, effectively assume this risk. Structured securities are complex instruments, typically involve a high degree of risk and are intended for sale only to sophisticated investors who are capable of understanding and assuming the risks involved. The market value of any structured security may be affected by changes in economic, financial and political factors (including, but not limited to, spot and forward interest and exchange rates), time to maturity, market conditions and volatility, and the credit quality of any issuer or reference issuer. Any investor interested in purchasing a structured product should conduct their own investigation and analysis of the product and consult with their own professional advisers as to the risks involved in making such a purchase. Some investments discussed in this report may have a high level of volatility. High volatility investments may experience sudden and large falls in their value causing losses when that investment is realised. Those losses may equal your original investment. Indeed, in the case of some investments the potential losses may exceed the amount of initial investment and, in such circumstances, you may be required to pay more money to support those losses. Income yields from investments may fluctuate and, in consequence, initial capital paid to make the investment may be used as part of that income yield. Some investments may not be readily realisable and it may be difficult to sell or realise those investments, similarly it may prove difficult for you to obtain reliable information about the value, or risks, to which such an investment is exposed. This report may provide the addresses of, or contain hyperlinks to, websites. Except to the extent to which the report refers to website material of CS, CS has not reviewed any such site and takes no responsibility for the content contained therein. Such address or hyperlink (including addresses or hyperlinks to CS's own website material) is provided solely for your convenience and information and the content of any such website does not in any way form part of this document. Accessing such website or following such link through this report or CS's website shall be at your own risk. This report is issued and distributed in Europe (except Switzerland) by Credit Suisse Securities (Europe) Limited, One Cabot Square, London E14 4QJ, England, which is authorised by the Prudential Regulation Authority and regulated by the Financial Conduct Authority and the Prudential Regulation Authority. This report is being distributed in Germany by Credit Suisse Securities (Europe) Limited Niederlassung Frankfurt am Main regulated by the Bundesanstalt fuer Finanzdienstleistungsaufsicht ("BaFin"). This report is being distributed in the United States and Canada by Credit Suisse Securities (USA) LLC; in Switzerland by Credit Suisse AG; in Brazil by Banco de Investimentos Credit Suisse (Brasil) S.A. or its affiliates; in Mexico by Banco Credit Suisse (México), S.A. (transactions related to the securities mentioned in this report will only be effected in compliance with applicable regulation); in Japan by Credit Suisse Securities (Japan) Limited, Financial Instruments Firm, Director-General of Kanto Local Finance Bureau (Kinsho) No. 66, a member of Japan Securities Dealers Association, The Financial Futures Association of Japan, Japan Investment Advisers Association, Type II Financial Instruments Firms Association; elsewhere in Asia/ Pacific by whichever of the following is the appropriately authorised entity in the relevant jurisdiction: Credit Suisse (Hong Kong) Limited, Credit Suisse Equities (Australia) Limited, Credit Suisse Securities (Thailand) Limited, regulated by the Office of the Securities and Exchange Commission, Thailand, having registered address at 990 Abdulrahman Place, 27th Floor, Unit 2701, Rama IV Road, Silom, Bangkok, Bangkok 10500, Thailand, Tel. +66 2614 6000, Credit Suisse Securities (Malaysia) Sdn Bhd, Credit Suisse AG, Singapore Branch, Credit Suisse Securities (India) Private Limited (CIN no. U67120MH1996PTC104392) regulated by the Securities and Exchange Board of India (registration Nos. Road, Worli, Mumbai - 18, India, T. +91-22 6777 3777, Credit Suisse Securities (Europe) Limited, Seoul Branch, Credit Suisse AG, Taipei Securities Branch, PT Credit Suisse Securities Indonesia, Credit Suisse Securities (Philippines) Inc., and elsewhere in the world by the relevant authorised affiliate of the above. Research on Taiwanese securities produced by Credit Suisse AG, Taipei Securities Branch has been prepared by a registered Senior Business Person. Research provided to residents of Malaysia is authorised by the Head of Research for Credit Suisse Securities (Malaysia) Sdn Bhd, to whom they should direct any queries on +603 2723 2020. This report has been prepared and issued for distribution in Singapore to institutional investors, accredited investors and expert investors (each as defined under the Financial Advisers Regulations) only, and is also distributed by Credit Suisse AG, Singapore branch to overseas investors (as defined under the Financial Advisers Regulations). By virtue of your status as an institutional investor, accredited investor, expert investor or overseas investor, Credit Suisse AG, Singapore branch is exempted from complying with certain compliance requirements under the Financial Advisers Act, Chapter 110 of Singapore (the "FAA"), the Financial Advisers Regulations and the relevant Notices and Guidelines issued thereunder, in respect of any financial advisory service which Credit Suisse AG, Singapore branch may provide to you. This research may not conform to Canadian disclosure requirements. In jurisdictions where CS is not already registered or licensed to trade in securities, transactions will only be effected in accordance with applicable securities legislation, which will vary from jurisdiction to jurisdiction and may require that the trade be made in accordance with applicable exemptions from registration or licensing requirements. Non-U.S. customers wishing to effect a transaction should contact a CS entity in their local jurisdiction unless governing law permits otherwise. U.S. customers wishing to effect a transaction should do so only by contacting a representative at Credit Suisse Securities (USA) LLC in the U.S. Please note that this research was originally prepared and issued by CS for distribution to their market professional and institutional investor customers. Recipients who are not market professional or institutional investor customers of CS should seek the advice of their independent financial advisor prior to taking any investment decision based on this report or for any necessary explanation of its contents. This research may relate to investments or services of a person outside of the UK or to other matters which are not authorised by the Prudential Regulation Authority and regulated by the Financial Conduct Authority and the Prudential Regulation Authority or in respect of which the protections of the Prudential Regulation Authority and Financial Conduct Authority for private customers and/or the UK compensation scheme may not be available, and further details as to where this may be the case are available upon request in respect of this report. CS may provide various services to US municipal entities or obligated persons ("municipalities"), including suggesting individual transactions or trades and entering into such transactions. Any services CS provides to municipalities are not viewed as "advice" within the meaning of Section 975 of the Dodd-Frank Wall Street Reform and Consumer Protection Act. CS is providing any such services and related information solely on an arm's length basis and not as an advisor or fiduciary to the municipality. In connection with the provision of the any such services, there is no agreement, direct or indirect, between any municipality (including the officials, management, employees or agents thereof) and CS for CS to provide advice to the municipality. Municipalities should consult with their financial, accounting and legal advisors regarding any such services provided by CS. In addition, CS is not acting for direct or indirect compensation to solicit the municipality on behalf of an unaffiliated broker, dealer, municipal securities dealer, municipal advisor, or investment adviser for the purpose of obtaining or retaining an engagement by the municipality for or in connection with Municipal Financial Products, the issuance of municipal securities, or of an investment adviser to provide investment advisory services to or on behalf of the municipality. If this report is being distributed by a financial institution other than Credit Suisse AG, or its affiliates, that financial institution is solely responsible for distribution. Clients of that institution should contact that institution to effect a transaction in the securities mentioned in this report or require further information. This report does not constitute investment advice by Credit Suisse to the clients of the distributing financial institution, and neither Credit Suisse AG, its affiliates, and their respective officers, directors and employees accept any liability whatsoever for any direct or consequential loss arising from their use of this report or its content. Principal is not guaranteed. Commission is the commission rate or the amount agreed with a customer when setting up an account or at any time after that.

Copyright © 2014 CREDIT SUISSE AG and/or its affiliates. All rights reserved.

Investment principal on bonds can be eroded depending on sale price or market price. In addition, there are bonds on which investment principal can be eroded due to changes in redemption amounts. Care is required when investing in such instruments.

When you purchase non-listed Japanese fixed income securities (Japanese government bonds, Japanese municipal bonds, Japanese government guaranteed bonds, Japanese corporate bonds) from CS as a seller, you will be requested to pay the purchase price only.

### RESULTS

## At a glance: Adjustments aplenty

- **Earnings review:** Fortis reported Q3 2014 headline EPS (FD) of C\$0.06 and an adjusted C\$0.33. In our view, an adjusted number of roughly C\$0.22 should exclude C\$16m one time acquisition related expenses and customer benefits, but should include C\$23m of convertible interest and make-whole. The approach is best compared to our C\$0.24 view and the Street's C\$0.25 estimate in a range of C\$0.17-C\$0.34, but clearly there is some dispersion and the potential for different methodologies. Rather positively, we believe the FTS focus for the next 12-18 months will be robust organic growth rather than M&A. In addition, the possible Fortis Properties sale should be viewed positively for funding and focus. Given the long-cycle nature of many assets, we do not place undue emphasis on quarterly results.
- **Selected notable items:** Highlights include: (a) FTS continues to provide a robust capital expenditure outlook of C\$1.8bn for 2014 (up from C\$1.4bn due mainly to an additional C\$450m from UNS); (b) the 5-year capex outlook (2014 to 2018) is expected to exceed C\$9bn and this figure is larger than the prior C\$6.5bn (ex-C\$1.5bn from UNS); and, (c) the Fortis Properties review process started in October and "is expected to continue through the balance of 2014 and into 2015".
- **Conference call:** FTS will hold an inaugural quarterly results conference call at 10:00 am (eastern). The call will be accessible via 1-877-223-4471 or at 647-788-4922.
- **Valuation:** Our target price of C\$32.00 is on an implied yield of 4.13% and a yield spread of roughly 138 bps on a 2.75% Canadian 10-year. We maintain our Neutral rating.

28-Jan-14	29.99	32.00	N

\* Asterisk signifies initiation or assumption of coverage.

The analyst(s) responsible for preparing this research report received Compensation that is based upon various factors including Credit Suisse's total revenues, a portion of which are generated by Credit Suisse's investment banking activities

**As of December 10, 2012 Analysts' stock rating are defined as follows:**

**Outperform (O)** : The stock's total return is expected to outperform the relevant benchmark\* over the next 12 months.

**Neutral (N)** : The stock's total return is expected to be in line with the relevant benchmark\* over the next 12 months.

**Underperform (U)** : The stock's total return is expected to underperform the relevant benchmark\* over the next 12 months.

\*Relevant benchmark by region: As of 10th December 2012, Japanese ratings are based on a stock's total return relative to the analyst's coverage universe which consists of all companies covered by the analyst within the relevant sector, with Outperforms representing the most attractive, Neutrals the less attractive, and Underperforms the least attractive investment opportunities. As of 2nd October 2012, U.S. and Canadian as well as European ratings are based on a stock's total return relative to the analyst's coverage universe which consists of all companies covered by the analyst within the relevant sector, with Outperforms representing the most attractive, Neutrals the less attractive, and Underperforms the least attractive investment opportunities. For Latin American and non-Japan Asia stocks, ratings are based on a stock's total return relative to the average total return of the relevant country or regional benchmark; prior to 2nd October 2012 U.S. and Canadian ratings were based on (1) a stock's absolute total return potential to its current share price and (2) the relative attractiveness of a stock's total return potential within an analyst's coverage universe. For Australian and New Zealand stocks, 12-month rolling yield is incorporated in the absolute total return calculation and a 15% and a 7.5% threshold replace the 10-15% level in the Outperform and Underperform stock rating definitions, respectively. The 15% and 7.5% thresholds replace the +10-15% and -10-15% levels in the Neutral stock rating definition, respectively. Prior to 10th December 2012, Japanese ratings were based on a stock's total return relative to the average total return of the relevant country or regional benchmark.

**Restricted (R)** : In certain circumstances, Credit Suisse policy and/or applicable law and regulations preclude certain types of communications, including an investment recommendation, during the course of Credit Suisse's engagement in an investment banking transaction and in certain other circumstances.

**Volatility Indicator [V]** : A stock is defined as volatile if the stock price has moved up or down by 20% or more in a month in at least 8 of the past 24 months or the analyst expects significant volatility going forward.

Analysts' sector weightings are distinct from analysts' stock ratings and are based on the analyst's expectations for the fundamentals and/or valuation of the sector\* relative to the group's historic fundamentals and/or valuation:

**Overweight** : The analyst's expectation for the sector's fundamentals and/or valuation is favorable over the next 12 months.

**Market Weight** : The analyst's expectation for the sector's fundamentals and/or valuation is neutral over the next 12 months.

**Underweight** : The analyst's expectation for the sector's fundamentals and/or valuation is cautious over the next 12 months.

\*An analyst's coverage sector consists of all companies covered by the analyst within the relevant sector. An analyst may cover multiple sectors.

Credit Suisse's distribution of stock ratings (and banking clients) is:

### Global Ratings Distribution

Rating	Versus universe (%)	Of which banking clients (%)
Outperform/Buy*	46%	(54% banking clients)
Neutral/Hold*	39%	(51% banking clients)
Underperform/Sell*	13%	(44% banking clients)
Restricted	3%	

\*For purposes of the NYSE and NASD ratings distribution disclosure requirements, our stock ratings of Outperform, Neutral, and Underperform most closely correspond to Buy, Hold, and Sell, respectively; however, the meanings are not the same, as our stock ratings are determined on a relative basis. (Please refer to definitions above.) An investor's decision to buy or sell a security should be based on investment objectives, current holdings, and other individual factors.

Credit Suisse's policy is to update research reports as it deems appropriate, based on developments with the subject company, the sector or the market that may have a material impact on the research views or opinions stated herein.

Credit Suisse's policy is only to publish investment research that is impartial, independent, clear, fair and not misleading. ### Price Target: (12 months) for Fortis Inc. (FTS.TO)

**Method:** We obtain our C\$32.00 target price for Fortis Inc. by using multiple valuation methodologies, but primarily rely upon a targeted dividend yield of 4.13% and an imputed 138 bps spread over a 2.75% Canadian 10-year bond yield.

**Risk:** There are a number of risks to Fortis' achievement of our C\$32.00 target price: commodity prices; weather; environmental; regulatory; access to capital markets; and, interest rates. Moreover, one should never underestimate the power of the regulator in any regulated business.

Please refer to the firm's disclosure website at <https://rave.credit-suisse.com/disclosures> for the definitions of abbreviations typically used in the target price method and risk sections.

See the Companies Mentioned section for full company names

CS may not have taken any steps to ensure that the securities referred to in this report are suitable for any particular investor. CS will not treat recipients of this report as its customers by virtue of their receiving this report. The investments and services contained or referred to in this report may not be suitable for you and it is recommended that you consult an independent investment advisor if you are in doubt about such investments or investment services. Nothing in this report constitutes investment, legal, accounting or tax advice, or a representation that any investment or strategy is suitable or appropriate to your individual circumstances, or otherwise constitutes a personal recommendation to you. CS does not advise on the tax consequences of investments and you are advised to contact an independent tax adviser. Please note in particular that the bases and levels of taxation may change. Information and opinions presented in this report have been obtained or derived from sources believed by CS to be reliable, but CS makes no representation as to their accuracy or completeness. CS accepts no liability for loss arising from the use of the material presented in this report, except that this exclusion of liability does not apply to the extent that such liability arises under specific statutes or regulations applicable to CS. This report is not to be relied upon in substitution for the exercise of independent judgment. CS may have issued, and may in the future issue, other communications that are inconsistent with, and reach different conclusions from, the information presented in this report. Those communications reflect the different assumptions, views and analytical methods of the analysts who prepared them and CS is under no obligation to ensure that such other communications are brought to the attention of any recipient of this report. Some investments referred to in this report will be offered solely by a single entity and in the case of some investments solely by CS, or an associate of CS or CS may be the only market maker in such investments. Past performance should not be taken as an indication or guarantee of future performance, and no representation or warranty, express or implied, is made regarding future performance. Information, opinions and estimates contained in this report reflect a judgment at its original date of publication by CS and are subject to change without notice. The price, value of and income from any of the securities or financial instruments mentioned in this report can fall as well as rise. The value of securities and financial instruments is subject to exchange rate fluctuation that may have a positive or adverse effect on the price or income of such securities or financial instruments. Investors in securities such as ADRs, the values of which are influenced by currency volatility, effectively assume this risk. Structured securities are complex instruments, typically involve a high degree of risk and are intended for sale only to sophisticated investors who are capable of understanding and assuming the risks involved. The market value of any structured security may be affected by changes in economic, financial and political factors (including, but not limited to, spot and forward interest and exchange rates), time to maturity, market conditions and volatility, and the credit quality of any issuer or reference issuer. Any investor interested in purchasing a structured product should conduct their own investigation and analysis of the product and consult with their own professional advisers as to the risks involved in making such a purchase. Some investments discussed in this report may have a high level of volatility. High volatility investments may experience sudden and large falls in their value causing losses when that investment is realised. Those losses may equal your original investment. Indeed, in the case of some investments the potential losses may exceed the amount of initial investment and, in such circumstances, you may be required to pay more money to support those losses. Income yields from investments may fluctuate and, in consequence, initial capital paid to make the investment may be used as part of that income yield. Some investments may not be readily realisable and it may be difficult to sell or realise those investments, similarly it may prove difficult for you to obtain reliable information about the value, or risks, to which such an investment is exposed. This report may provide the addresses of, or contain hyperlinks to, websites. Except to the extent to which the report refers to website material of CS, CS has not reviewed any such site and takes no responsibility for the content contained therein. Such address or hyperlink (including addresses or hyperlinks to CS's own website material) is provided solely for your convenience and information and the content of any such website does not in any way form part of this document. Accessing such website or following such link through this report or CS's website shall be at your own risk. ### UPGRADE RATING

## DDM delights; BIP, EMA, ENB, FTS, TRP to OP

- **Dividend appeal:** In most developed markets, the majority of market returns comes from dividends over a period of time. This report is a companion note to our *Ideas Engine* report entitled "*Yearning for Yield: Valuing Canada's Dividend-Focused Stocks*." Accordingly, as a companion note, we provide greater focus to some of our core stock views. That report used the dividend discount model to analyze valuations across much of the yield-oriented portions of the Canadian capital market. Based on this analysis and specifically in relation to our infrastructure coverage, we made several stock rating upgrades and a few material target price changes. A summary version of those changes appears in Exhibit 1.

### Exhibit 1: Major rating and target price changes

Company	Rating		Target Price	
	Old	New	Old	New
Brookfield Infrastructure Partners	Neutral	Outperform	US \$ 42.00	US \$ 46.00
Emera Inc.	Outperform	Outperform	C \$ 40.00	C \$ 44.00
Enbridge Inc.	Neutral	Outperform	C \$ 52.00	C \$ 70.00
Fortis Inc.	Neutral	Outperform	C \$ 32.00	C \$ 44.00
TransCanada Corp.	Neutral	Outperform	C \$ 58.00	C \$ 68.00

Source: Company data, Credit Suisse estimates.

- **Methodology:** Our analysis is supported by the dividend discount model in the simple form and covers many Canadian dividend oriented stocks. The use of consensus data helped reduce bias with our calculations of forward data. Essentially, we calculated the "g" along with dividend data to solve for "k" in the DDM formula. We tended to focus on stocks with high discount ("k") rates and stocks having rather lower rates and a lack of dividend growth.
- **Selected stocks:** Based on our analysis, the cheapest stocks on a discount rate basis ("k") were BIP, CU, and ENB. We regard EMA and TRP as re-rating stories given their future growth outlooks along with capital flexibility that is not captured in the historic data. Ultimately, we favour stocks with visible dividend growth that is not appropriately discounted in the stock price today. Such a view compelled upgrades of BIP, ENB, FTS, and TRP. In addition, we had a material target price change for EMA while reiterating our OP rating. Finally, we also note CU (already OP rated) screened well in our work. A major factor in our ratings and target price changes was a modest revision to the underlying expected Canadian 10-year bond yield. Simply, we revised our forward Canada 10-year expectation to 2.50% from 2.75% and that compares to the current 2.02%.

**DISCLOSURE APPENDIX AT THE BACK OF THIS REPORT CONTAINS IMPORTANT DISCLOSURES, ANALYST CERTIFICATIONS, AND THE STATUS OF NON-US ANALYSTS.** US Disclosure: Credit Suisse does and seeks to do business with companies covered in its research reports. As a result, investors should be aware that the Firm may have a conflict of interest that could affect the objectivity of this report. Investors should consider this report as only a single factor in making their investment decision.

This report is divided into three parts:

- A longer-term view of interest rates;
- Dividend delights; and
- Company-specific commentary.

Each of these areas is addressed in greater detail below.

## A longer-term view of interest rates

Clearly, interest rates are a critical part of valuation for infrastructure companies. Therefore, we start with a longer-term perspective of US long-term interest rates in Exhibit 2.

Longer-term interest rates at relatively benign levels

**Exhibit 2: US long-term interest rate (long series)**

Source: S. Homer, R.J. Shiller, Datastream, Credit Suisse / IDC.

The movements in underlying long-term sovereign rates are critical in our view for many valuation methodologies, including: discounted cash flows; dividend discount models; price-earnings ratios; EV/EBITDA; and, price to book. Relying upon the risk-free rate is a clear link with the capital pricing asset model and opens a debate around the cyclical nature of interest rates and spot valuations. With this backdrop, we believe the historical view of interest rates is extremely important.

Rate movements are critical for valuation impacts

Rates are relatively low at this juncture; however, the existing forward interest rate expectations are critical to appreciate. On a short-term basis, but with a forward view, we consider Exhibit 3 with cumulative interest rate expectations over the next 12-months that look fairly benign.

**Exhibit 3: Cumulative Interest Rate Expectations over Next 12 Months**

Source: Bloomberg, Credit Suisse / IDC.

Our US interest rate team continues to forecast a modestly rising rate environment across the term structure as appears in Exhibit 4 below.

**Exhibit 4: US Interest Rate Forecasts**

Forecasts	10/16/2014	12/31/14	3/31/15	6/30/15	9/30/15	12/31/15	3/31/16	6/30/16	9/30/16	12/31/16

To provide some Canadian perspective, Exhibit 5 illustrates various Canadian yields since 2000.

**Exhibit 5: Yields Canada: short and long rates since 2000**

Source: Bloomberg, Credit Suisse / IDC

## Dividend delights

There is considerable academic evidence about the importance of dividends on long-term returns. Depending on the market, the duration and, among other factors, the data set, the role of dividends on total returns ranges from 40-70% of total market returns. Clearly, there is a compounding nature of dividends in a total return analysis over a period. We believe this dynamic is partly captured in Exhibit 6.

Dividends deliver significant returns over time

**Exhibit 6: S&P 500 price vs. dividend returns**

Source: Credit Suisse .

At this time of historically low interest rates, the relative yield between a broad equity MSCI benchmark dividend yield is higher than on many fixed income assets. Exhibit 7 illustrates this dynamic.

**Exhibit 7: Dividend yields are higher than bond yields**

Dividend yields have a relative attraction

Source: Credit Suisse/IDC, Datastream, Credit Suisse / IDC.

Obviously, a spot comparison of various fixed income products against equities may not be a truly fair or sensible comparative. Yet, we believe there is a clear value in considering these dividend yields against bond yield spreads as appears in Exhibit 8.

**Exhibit 8: Yield spreads have increased**

A spread perspective

Source: Credit Suisse/IDC, Datastream, Credit Suisse / IDC.

Notably, the spreads between dividend yield and bond/corporate bond yields have risen significantly in recent years. From our vantage point, this dynamic illustrates both the relative valuation of equities/bonds as well as the historically high yield differential. One of the potential implications of the wider spread is the equity market is discounting the sustainability of the lower interest rate environment. There are clearly other factors to consider with this relationship. Yet, we wish to focus upon the attraction and allure of dividends in the current low interest rate environment.

Many factors behind the spread relationship

An interesting observation from the data is the difference between the compounded and average returns. Notably, a larger delta between those factors means the more significant an impact of market corrections on any one strategy. A higher beta strategy has a much lower compound return versus the 'average' return indicating the strategy struggles to

recover from drawdowns. For additional perspective, we put the Sharpe ratio comparison in Exhibit 9 below as a ratio of return to risk for multiple metrics.

**Exhibit 9: Sharpe ratio (ratio of return to risk)**

Yield strategies with leading 30-year Sharpe ratios

Source: Credit Suisse, Datastream

As discussed in our *Ideas Engine* report, over the long term, a dividend focused portfolio strategy has generated: (a) superior performance; (b) lower volatility; and, (c) additional diversification benefits.

## Company specific commentary

For a variety of reasons, the broadly defined infrastructure sector (including pipelines, power generation and, among others, utilities) has a high degree of interest rate sensitivity. We view yield related valuation methodologies as being a significant part of a multi-faceted framework. Ultimately, the question of the longer-term sustainable dividend growth rate is critical for infrastructure assets in our view. The *Ideas Engine* report contains considerable data regarding our DDM approach across a number of companies within and outside our coverage universe. That work should be consulted for more specific dividend discount model analytics. In this portion of the report, we address the following companies in more detail:

Significant rate sensitivity in the infrastructure sector

- Brookfield Infrastructure Partners;
- Emera;
- Enbridge Inc.;
- Enbridge Income Fund;
- Fortis; and,
- TransCanada.

Americas / Canada  
Multi Utilities

## Mispriced distribution growth with embedded organic development and M&A potential

- **Upgrading to Outperform:** Based on our analytics, we believe Brookfield Infrastructure Partners has mispriced distribution growth. That growth looks to be supported by ongoing organic development along with M&A potential. As per our Ideas Engine report, on a DDM basis, our calculated historical 5-year "k" is 17.8% for BIP with a 9.8% growth rate (2014-15 on consensus). In our view, that "k" value is undemanding and was clearly skewed upwards in the financial crisis along by a much smaller BIP at the time of the original Brookfield Asset Management spin. We view BIP as uniquely positioned in our coverage universe given a global platform, the BAM relationship, a mild degree of economic sensitivity and, among other things, the capital recycling potential to support an M&A program. Given the valuation comparative and outlook, we upgrade BIP to Outperform from Neutral and increase our target price to US\$46 from US\$42.
- **Positive progress:** BIP's US\$1.2bn self-stated backlog looks poised to grow with an expanding platform in terms of geography and business lines. As a result, we believe the LP is well positioned to deepen and extend the backlog. Clearly, some stocks in our universe have more robust growth plans with greater duration. Yet, we view BIP as uniquely positioned, with some economically sensitive assets that would benefit from global industrial production growth. Excluding the merchant power players, this sensitivity puts BIP in a different position from many others in our coverage universe.
- **Investment thesis:** Broadly, Brookfield's reputation for value investing with a duration bias has tended to create value. That potential value creation should drive DPU growth with a relatively low amount of risk.
- **Valuation:** Our target of US\$46 implies a distribution yield of 4.52% and a spread of 202 bps over an assumed 2.50% Canadian 10-year bond yield.

This portion of the BIP note addresses multiple valuation methods which is consistent with our past practice.

### Yield based approaches

Our yield based approaches focus on three related areas: (a) dividend discount model; (b) the dividend yield; and, (c) a dividend yield spread.

#### Dividend discount model

As per our recent Ideas Engine report, we assessed the current value of income-oriented stocks relative to some historical measures and future forecasts. There are many ways to consider yield-driven valuation, but we believe the dividend discount model is one of the preferred methodologies, in part, because of the simplicity of the approach. As a refresher, the simple dividend discount model formula is as follows:

$$P = D/(k-g)$$

Where:

P = price

D = dividend

K = required return

G = growth rate

There are multiple approaches for tackling the DDM analysis and using some values that we calculated in the Ideas Engine report, we consider the following key parameters for BIP:

- D = US\$2.10/share (2015 estimate)
- K = 17.8%
- G = 9.8% (2014/2015)

These figures solve for a theoretical price of US\$26.28/sh.

If one was to use the current share price of US\$40.75 and solve for "K", then that value would be 15.0%.

Another approach to consider is the cost of equity and the potential future dividend growth. The DDM assumptions in this case are:

- Current annual dividend: US\$1.92/share
- Cost of equity: 8.3% (Bloomberg)
- Growth rate: 9.8% (2014/2015)

DDM is hyper sensitive to small changes

A dividend discount model would produce share price value of roughly (US\$128.00). Very simply, these assumptions and approaches highlight the relatively extreme sensitivity of the DDM in practice. Therefore, to best capture the various assumptions, we provide a matrix approach to considering BIP's that appears in Exhibit 10.

**Exhibit 10: Share Value Under Different Dividend Discount Model Assumptions**

		Cost of equity								
		7.50%	8.00%	8.50%	9.00%	9.50%	10.00%	10.50%	11.00%	11.50%

Source: Credit Suisse estimates.

Our US\$46.00 target price is based upon an approximately 4.52% dividend yield.

### Dividend Yield Spread

We believe that one should not solely rely upon distribution yield-based metrics. In our view, many yield-based metrics should be considered in the context of comparable nominal interest rates available in the marketplace. For a number of reasons, we have considered BIP's historical dividend yield against the Government of Canada 10-year bond yield on a spread basis. Exhibit 15 and Exhibit 16 highlight this relationship.

**Exhibit 15: Historical Dividend Yield Spread versus the Canadian Ten Year (Bps)**

Source: Bloomberg and Credit Suisse.

**Exhibit 16: Historical Yield Spread**

Mean	273
Median	264
Min	-223
Max	931

Source: Bloomberg and Credit Suisse.

The yield spread relationship highlights the potential for meaningful sensitivity to interest rate movements. Many fundamental reasons exist for this relationship; however, we must note that interest rate-sensitive investments like BIP usually do not exhibit perfect correlations. Some near-term uncertainty has affected the valuation of many interest rate-sensitive investment vehicles. Yet, in historical terms, the interest rate environment remains accommodative, which underpins valuations for companies like BIP. We therefore apply 202bps spread to a moderate outlook on 10-year Canadian bond yield (2.50%) to obtain our US\$46 target price.

As discussed in our Ideas Engine report, we conducted a variety of DDM related analytics for BIP. Simply, on a mean or median basis, the spread relationships imply and BIP share prices of US\$40.15 and US\$40.94, respectively, on a forward 2.5% Canadian 10-year. At the current roughly 2.02% Canadian 10-year, those same spread relationships imply BIP unit prices of US\$44.21 and US\$45.16 on the 2015 distribution level. Arguably, BIP's short history along with the impact of the BAM spin and the financial crisis create some data distortions.

Credit Suisse's RAVE valuation summary for P/CF appears in Exhibit 17.

## Emera Inc. (EMA.TO)

### Naturally Nalcor is critical to the re-rating

- **Quickly approaching a tipping point:** We continue to believe that EMA's involvement in the Nalcor related transmission projects are a critical part of the stock's re-rating story. Additionally, in our view, another important area to watch is the potential for contractual uplift in terms of pricing and duration for the Northeast power portfolio ([link](#)). Notably, both of these business lines look to be progressing as planned and should translate into visible cash flow, earnings and dividend growth for the future. Confidence on that dividend growth was preannounced in September with an explicit range along with an out-of-cycle dividend bump ([link](#)). With the reassessment of the implied 10-year Canadian bond yield used in our valuation, we boost our target price to C\$44 from C\$40. We reiterate the Outperform rating.
- **Pricing dividend growth:** In light of historically poor growth, EMA does not necessarily screen as well as some other companies with our DDM analysis. Yet, we regard EMA's future dividend growth largely coming from the Nalcor related projects are clearly not captured in our analysis. In any event, EMA's calculated historical 5-year "k" is 11.3% for EMA with a 4.8% growth rate (2014-15 on consensus) looks to be relatively undemanding in our view. We don't believe that valuation along with capital flexibility coming from future preferred share issuance is fully appreciated by the Street. Recently, another example of EMA's capital flexibility came from the divestiture of the Northeast Wind interest.
- **Investment thesis:** We continue to believe that Emera is undergoing a fairly significant transformation with a substantial amount of future capital being allocated to highly visible transmission projects with a very long duration.
- **Valuation:** We reiterate our Outperform rating and increase our target price to C\$44 from C\$40. That target is obtained from multiple valuation approaches, including a dividend yield and yield spread methodology with 3.52% and a 102 bps yield spread, respectively.

#### Share price performance

On 11/17/14 the S&P/TSX Composite closed at 14933.88

Quarterly EPS	Q1	Q2	Q3	Q4
2013A	0.68	0.32	0.29	0.47
2014E	1.00	0.31	0.34	0.50
2015E	0.72	0.36	0.45	0.55

#### Financial and valuation metrics

Year	12/13A	12/14E	12/15E	12/16E

Consistent with our past practice, we address multiple valuation methods for EMA at this part of the report. Our methods are focused upon: (a) P/E; and, (b) yield based.

### P/E based approach

For many industries P/E multiples are somewhat challenging, but they do provide a quick comparative with other sectors and the overall market on a simple basis. Exhibit 20 and Exhibit 21 provide a historical view for EMA's Forward 1-year and 2-Year P/E multiple over the past 10 years.

**Exhibit 20: Historical 1-year forward P/E**

Source: Thomson One.

**Exhibit 21: Historical 2-year forward P/E**

Source: Thomson One.

Descriptive statistics for both EMA's 1-year and 2-year historical forward P/E multiples for are shown in Exhibit 22.

**Exhibit 22: Historical forward P/E descriptive statistics**

	1-Yr Forward	2-Yr Forward
Mean	17.7x	16.8x
Median	17.6x	16.8x
Min	13.4x	13.0x
Max	21.7x	20.5x

Source: Thomson One.

Exhibit 23 shows the past few years' forward 2-year P/E.

**Exhibit 23: Last 2-years of 2-year forward P/E multiples**

Source: Thomson One.

- Mean: 17.5
- Median: 17.3x
- Range: 15.4x to 20.5x

Our C\$44 target price implies a 18.7x multiple on our 2016 estimate which exceeds both the mean and median, but is less than the top end of the range. For additional perspective, a valuation matrix appears in Exhibit 24.

**Exhibit 24: Hypothetical share prices at different EPS and P/E multiples**

		Earnings per share (C\$)

### Yield based approaches

Our yield based approaches focus on three related areas: (a) dividend discount model; (b) the dividend yield; and, (c) a dividend yield spread.

### Dividend discount model

As per our recent Ideas Engine report, we assessed the current value of income-oriented stocks relative to some historical measures and future forecasts. There are many ways to consider yield-driven valuation, but we believe the dividend discount model is one of the preferred methodologies, in part, because of the simplicity of the approach. As a refresher, the simple dividend discount model formula is as follows:

$$P = D/(k-g)$$

Where:

P = price

D = dividend

K = required return

G = growth rate

One of the main tools in the process will be the dividend discount model and solving for "K" as the other elements are known, have historic reference points or metrics available from a consensus view to avoid more narrow distortions. With these parameters, EMA's valuation variables are:

$$D = \text{C\$}1.55/\text{share}$$

$$K = 11.3\%$$

$$G = 4.8\% (2014/2015)$$

$$P = \text{C\$}23.84$$

If one was to use the current share price of C\$37.60 and solve for "K," then that value would be 8.9%.

Another approach to consider is the cost of equity and the potential growth in dividend in the future. A dividend discount model would be a useful valuation tool for yield-oriented vehicles such as EMA. We used the following assumptions in our dividend discount model:

- Current annual dividend: C\$1.55/share
- Cost of equity: 8.1% (Bloomberg)
- Growth rate: 6.80% (2014/2015)

A dividend discount model would produce share price value of roughly C\$119.23.

Given different assumptions, we generated the following range of valuations highlighted in Exhibit 25.

**Exhibit 25: Share Value Under Different Dividend Discount Model Assumptions**

		Cost of Equity									
		6.0%	6.5%	7.0%	7.5%	8.0%	8.5%	9.0%	9.5%	10.0%	10.5%

### Dividend discount model

To provide some perspective on the valuation sensitivity of the DDM, Exhibit 26 contains a matrix to assess theoretical share values.

**Exhibit 26: Illustrative EMA stock prices at different discount rates and dividend growth rates**

		Discount Rate						
		5.0%	5.50%	6.00%	6.50%	7.00%	7.50%	8.00%
Dividend Growth rate	3.0%		61.28	51.07	43.77	38.30	34.04	30.64
	3.5%		76.60	61.28	51.07	43.77	38.30	34.04
	4.0%			76.60	61.28	51.07	43.77	38.30
	4.5%			102.13	76.60	61.28	51.07	43.77
	5.0%				102.13	76.60	61.28	51.07
	5.5%				153.20	102.13	76.60	61.28
	6.0%					153.20	102.13	76.60
	6.5%					306.40	153.20	102.13

Source: Company data, Credit Suisse estimates

On a mean or median basis, the spread relationships imply and EMA share prices of C\$41.58 and C\$43.10, respectively, on a forward 2.5% Canadian 10-year. At the current roughly 2.02% Canadian 10-year, those same spread relationships imply EMA share prices of C\$47.81 and C\$48.26 on the 2015 distribution level.

### Dividend Yield

According to Bloomberg data, Emera has traded at an average dividend yield of 4.40% over the past 10 years and within a range of 3.78-5.37%. (See Exhibit 27 and Exhibit 28.)

**Exhibit 27: Historical EMA Dividend Yield (%)**

Source: Bloomberg and Credit Suisse.

**Exhibit 28: Historical Dividend Yield (%)**

Mean	4.40
Median	4.36
Min	3.78
Max	5.38

Source: Bloomberg and Credit Suisse.

For several reasons, we believe that these metrics should be compared with movements in the Canadian 10-year bond yield. (See Exhibit 29.)

**Exhibit 29: Canadian 10-Year Bond Yield**

Source: Bloomberg and Credit Suisse.

The sensitivity of dividend yield valuation is clearly evident in Exhibit 30, with various distribution levels at various targeted yields.

**Exhibit 30: Share Value Based on Various Dividends at Various Yields**

	Dividend per share (C\$)									
	1.51	1.55	1.59	1.63	1.67	1.71	1.75	1.79	1.83	1.87

4.75%	31.79	32.63	33.47	34.32	35.16	36.00	36.84	37.68	38.53	39.37
5.00%	30.20	31.00	31.80	32.60	33.40	34.20	35.00	35.80	36.60	37.40
5.25%	28.76	29.52	30.29	31.05	31.81	32.57	33.33	34.10	34.86	35.62
5.50%	27.45	28.18	28.91	29.64	30.36	31.09	31.82	32.55	33.27	34.00
5.75%	26.26	26.96	27.65	28.35	29.04	29.74	30.43	31.13	31.83	32.52
6.00%	25.17	25.83	26.50	27.17	27.83	28.50	29.17	29.83	30.50	31.17

Source: Credit Suisse estimates.

Our C\$44 target price is based upon an approximately 3.52% dividend yield.

### Dividend Yield Spread

We believe that one should not solely rely upon distribution yield-based metrics. In our view, many yield-based metrics should be considered in the context of comparable nominal interest rates available in the marketplace. For a number of reasons, we have considered EMA's historical dividend yield against the Government of Canada 10-year bond yield on a spread basis. Exhibit 31 and Exhibit 32 highlight this relationship.

**Exhibit 31: Historical Dividend Yield Spread versus the Canadian Ten Year (Bps)**

Source: Bloomberg and Credit Suisse.

**Exhibit 32: Historical Yield Spread**

Mean	118
Median	113
Min	-47
Max	255

Source: Bloomberg and Credit Suisse.

The yield spread relationship highlights the potential for meaningful sensitivity to interest rate movements. Many fundamental reasons exist for this relationship; however, we must note that interest rate-sensitive investments like EMA usually do not exhibit perfect correlations. Some near-term uncertainty has affected the valuation of many interest rate-sensitive investment vehicles. Yet, in historical terms, the interest rate environment remains accommodative, which underpins valuations for companies like EMA. We therefore apply 102bps spread to a moderate outlook on 10-year Canadian bond yield (2.50%) to obtain our C\$44 target price.

## Best in class longer-term dividend growth supported by a unique asset network

- **Delightful dividends:** Enbridge Inc. is one of the most impressive dividend and total return stocks over an extended timeframe. In the foreseeable future, we do not see a change in that path of impressive dividend growth. ENB's guidance for dividend growth of 10-12% for 2013-18 likely has an upward bias given the tilting EPS profile on selected assets. Clearly, there are multiple limitations to our dividend discount model analysis. Yet, our calculated historical 5-year "k" is 16.7% for ENB with a growth rate (2014-15 on consensus) of 12%. We do not view that "k" as being demanding from a valuation perspective, in either absolute or relative terms. Accordingly, we upgrade ENB to Outperform from the prior Neutral rating and increase our target to C\$70 from C\$52.
- **Near-term versus longer-term:** Aside from a variety of regulatory delays on selected projects, we do not foresee major issues that look to de-rail ENB's near-term growth strategy. Naturally, the price of certain energy commodities may impact the pace of development. Yet, most of the ENB projects are in a very good relative positioning versus competitors on a near-term basis. Thus, we would regard the near-term impact in a downward moving oil market as less impactful to ENB versus some others. On a longer-term basis, ENB has some visible growth; however, the lack of significant natural gas exposure is an issue that should be rectified in a gradual process.
- **Investment thesis:** We continue to view ENB as a core holding with best-in-class infrastructure assets. Clearly more potential for capital efficiency exists, but we see that process as being evolutionary rather than revolutionary as is occurring with some in the industry).
- **Valuation:** Our revised target price of C\$70 (up from C\$52) is obtained from a variety of valuation approaches, largely a targeted dividend yield of 2.22% and an imputed -28-bps spread over a 2.50% Canadian 10-year bond yield.

### Share price performance

Consistent with our past practice, we address multiple valuation methods for ENB at this part of the report. Our methods are focused upon: (a) P/E; and, (b) yield based.

### P/E based approach

For many industries P/E multiples are somewhat challenging, but they do provide a quick comparative with other sectors and the overall market on a simple basis. Exhibit 36 and Exhibit 37 provide a historical view for ENB's Forward 1-year and 2-Year P/E multiple over the last 10 years.

**Exhibit 36: Historical 1-year forward P/E**

Source: Thomson One.

**Exhibit 37: Historical 2-year forward P/E**

Source: Thomson One.

Descriptive statistics for both ENB's 1-year and 2-year historical forward P/E multiples for are shown in Exhibit 38.

**Exhibit 38: Historical forward P/E descriptive statistics**

	1-Yr Forward	2-Yr Forward
Mean	22.0x	19.9x
Median	21.6x	20.0x
Min	15.9x	14.5x
Max	29.5x	25.2x

Source: Thomson One.

Exhibit 39 shows the past few years' forward 2-year P/E.

**Exhibit 39: Last 2-years of 2-year forward P/E multiples**

Source: Thomson One.

- Mean: 22.3x

- Median: 22.3x
- Range: 19.9x to 25.2x

Our C\$70.00 target price implies a 24.4x multiple on our 2016 estimate—slightly above the mean and median for the stock, but well within the top end of the range. A valuation matrix appears in Exhibit 40.

### Yield based approaches

Our yield based approaches focus on three related areas: (a) dividend discount model; (b) the dividend yield; and, (c) a dividend yield spread.

### Dividend discount model

As per our recent Ideas Engine report, we assessed the current value of income oriented stocks relative to some historical measures and future forecasts. There are many ways to consider yield driven valuation, but we believe the dividend discount model is one of the preferred methodologies, in part, because of the simplicity of the approach. As a refresher, the simple dividend discount model formula is as follows:

$$P = D/(k-g)$$

Where:

P = price

D = dividend

K = required return

G = growth rate

One of the main tools in the process will be the dividend discount model and solving for "K" as the other elements are known, have historic reference points or metrics available from a consensus view to avoid more narrow distortions. Using the following data points, ENB's DDM valuation equation includes:

$$D = \text{C\$1.57/share (2015 estimate)}$$

$$K = 16.7\%$$

$$G = 12.0\% \text{ (2014/2015)}$$

$$P = \text{C\$33.30}$$

If one was to use the current share price of C\$51.21 and solve for "K," then that value would be 15.1%.

Another approach to consider is the cost of equity and the potential growth in dividend in the future. A dividend discount model would be a useful valuation tool for yield-oriented vehicles such as ENB. We used the following assumptions in our dividend discount model:

- Current annual dividend: C\$1.40/share
- Cost of equity: 10.0% (Bloomberg)
- Growth rate: 12.0% (2014/2015)

A dividend discount model would produce share price value of roughly (C\$70).

Given different assumptions, we generated the following range of valuations highlighted in Exhibit 41.

**Exhibit 41: Share Value Under Different Dividend Discount Model Assumptions**

		Cost of Equity									
		6.0%	7.00%	8.0%	9.0%	10.0%	11.0%	12.0%	13.0%	14.0%	15.0%

Source: Company data and Credit Suisse estimates.

### Dividend Yield

According to Bloomberg data, Enbridge has traded at an average dividend yield of 3.16% over the past 10 years and within a range of 2.48%-4.16% (see Exhibit 42 and Exhibit 43).

**Exhibit 42: Historical ENB Dividend Yield (%)**

Source: Bloomberg and Credit Suisse.

**Exhibit 43: Historical Dividend Yield (%)**

Mean	3.16
Median	3.15
Min	2.48
Max	4.16

Source: Bloomberg and Credit Suisse.

For several reasons, we believe that these metrics should be compared with movements in the Canadian 10-year bond yield. (See Exhibit 44.)

**Exhibit 44: Canadian 10-Year Bond Yield**

Source: Credit Suisse estimates.

Our C\$70 target price is based upon an approximately 2.22% dividend yield.

### Dividend Yield Spread

We believe that one should not solely rely upon distribution yield-based metrics. In our view, many yield-based metrics should be considered in the context of comparable nominal interest rates available in the marketplace. For a number of reasons, we have considered ENB's historical dividend yield against the Government of Canada 10-year bond yield on a spread basis. Exhibit 46 and Exhibit 47 highlight this relationship.

**Exhibit 46: Historical Dividend Yield Spread versus the Canadian Ten Year (Bps)**

Source: Bloomberg and Credit Suisse.

**Exhibit 47: Historical Yield Spread**

Mean	-7
Median	11
Min	-142
Max	137

Source: Bloomberg and Credit Suisse.

The yield spread relationship highlights the potential for meaningful sensitivity to interest rate movements. Many fundamental reasons exist for this relationship; however, we must note that interest rate-sensitive investments like ENB usually do not exhibit perfect correlations. Some near-term uncertainty has affected the valuation of many interest rate-sensitive investment vehicles. Yet, in historical terms, the interest rate environment remains accommodative, which underpins valuations for companies like ENB. We therefore apply -28bps spread to a moderate outlook on 10-year Canadian bond yield (2.50%) to obtain our C\$70 target price.

Exhibit 48 contains our Credit Suisse RAVE valuation summary.

## Taking up target price after close of transaction

- **Target price increase:** We increase our target price for Enbridge Income Fund Holdings Inc. (ENF) to C\$30 from C\$26 after the closing of the transaction to acquire the 50% interest in the U.S. segment of the Alliance Pipeline and the purchase of Class A Units of the Southern Lights Pipeline. For further details on the acquisition see our note "[Enbridge Group – Dropdown double down](#)." With the closing of the transaction the company also increased its annual dividend by roughly 12% to ~C\$1.54/share from ~C\$1.37/share.
- **Investment Thesis:** We believe that ENF provides a stable dividend backed by a strong sponsor in Enbridge Inc. From our view, ENF has organic growth options largely in the Bakken-focused Saskatchewan System. Additionally, we view a number of potential acquisition opportunities from Enbridge Inc. and separate from the sponsor.
- **Valuation:** We maintain our Neutral rating and increase our target price to C\$30 from C\$26, which is based primarily on a yield-driven valuation approach that implies a 5.13% yield and roughly 263-bps yield spread against a forecast 2.50% Cdn 10-year on an annual dividend of ~C\$1.54/share.

## Yield-based approaches

Our yield based approaches focus on three related areas: (a) dividend discount model; (b) the dividend yield; and, (c) a dividend yield spread.

### Dividend discount model

As per our recent Ideas Engine report, we assessed the current value of income oriented stocks relative to some historic measures and future forecasts. There are many ways to consider yield driven valuation, but we believe the dividend discount model is one of the preferred methodologies, in part, because of the simplicity of the approach. As a refresher, the simple dividend discount model formula is as follows:

$$P = D/(k-g)$$

Where:

P = price

D = dividend

K = required return

G = growth rate

One of the main tools in the process will be the dividend discount model and solving for "K" as the other elements are known, have historical reference points or metrics available from a consensus view to avoid more narrow distortions. Using this approach, ENF's valuation now follows:

$$D = \text{C\$1.54/share (2015 guidance)}$$

$$K = 8.7\%$$

$$G = 12.0\% (2014/2015)$$

$$P = (\text{C\$46.67})$$

If one was to use the current share price of C\$30.86 and solve for "K", then that value would be 17.0%.

Another approach to consider is the cost of equity and the potential growth in dividend in the future. A dividend discount model would be a useful valuation tool for yield-oriented vehicles such as ENF. We used the following assumptions in our dividend discount model:

- Current annual dividend: C\$1.38/share
- Cost of equity: 8.2% (Bloomberg)
- Growth rate: 12.0% (2014/2015)

A dividend discount model would produce share price value of roughly (C\$36.32).

Given different assumptions, we generated the following range of valuations highlighted in Exhibit 51.

**Exhibit 51: Share Value Under Different Dividend Discount Model Assumptions**

		Cost of equity								
		7.00%	7.50%	8.00%	8.50%	9.00%	9.50%	10.00%	10.50%	11.00%

7.5%	16.53	17.87	19.20	20.53	21.87	23.20	24.53	25.87

Source: Credit Suisse estimates.

Our C\$30 target price is based upon an approximately 5.13% dividend yield.

### Dividend Yield Spread

We believe that one should not solely rely upon distribution yield-based metrics. In our view, many yield-based metrics should be considered in the context of comparable nominal interest rates available in the marketplace. For a number of reasons, we have considered ENF's historical dividend yield against the Government of Canada 10-year bond yield on a spread basis. Exhibit 56 and Exhibit 57 highlight this relationship.

**Exhibit 56: Historical Dividend Yield Spread versus the Canadian Ten Year (Bps)**

Source: Bloomberg and Credit Suisse.

**Exhibit 57: Historical Yield Spread**

Mean	404
Median	357
Min	203
Max	936

Source: Bloomberg and Credit Suisse.

The yield spread relationship highlights the potential for meaningful sensitivity to interest rate movements. Many fundamental reasons exist for this relationship; however, we must note that interest rate-sensitive investments like ENF usually do not exhibit perfect correlations. Some near-term uncertainty has affected the valuation of many interest rate-sensitive investment vehicles. Yet, in historical terms, the interest rate environment remains accommodative, which underpins valuations for companies like ENF. We therefore apply 263bps spread to a moderate outlook on 10-year Canadian bond yield (2.50%) to obtain our C\$30 target price.

The RAVE valuation summary for ENF appears in Exhibit 58.

**Oozing organic growth; real estate review is helpful and M&A on the backburner**

- **Upgrading to Outperform:** With the analysis appearing in our Ideas Engine report titled *Yearning for Yield: Valuing Canada's Dividend Focused Stocks*, we outlined the dividend discount model approach for the Fortis valuation. Our calculated historical 5-year "k" is 7.8% for FTS with a 4.6% growth rate (2014-15 on consensus). With a large capital program of regulated assets having considerable visibility, FTS is well positioned for an improved dividend growth rate. Given the recent announcement to review strategic options for Fortis Properties ([link](#)), we believe FTS has tremendous capital flexibility in the near-term to easily fund a fairly large organic growth program. Simply, Fortis believes the 4-year CAGR of rate base growth from 2014 to 2018 will be roughly 7% and could increase to approximately 8.5% with some higher option value projects. Given the size of the Fortis asset base and the nature of the industry, that level of growth is relatively compelling and should be viewed positively. With this view, we upgrade FTS to Outperform from Neutral and increase the target to C\$44 from C\$32.
- **An acquisition reprieve:** Given some issues associated with UNS financing, we believe FTS will be focused on organic activities for the foreseeable future. Obviously, acquisitions will remain a part of FTS playbook and game plan, but these areas are not likely to gain significant attention at this time.
- **Investment thesis:** FTS is turning to life after the UNS acquisition issue that created some stock market headwinds. With the financing well behind FTS and a large slate of organic growth ahead, we believe that FTS is now focused on avoiding deal distractions and delivering high value added organic capital growth.
- **Valuation:** Our target price of C\$44 is based on an implied yield of 3.00% and a yield spread of roughly 50 bps on a 2.50% Canadian 10-year. We upgrade our rating to Outperform from Neutral.

Consistent with our past practice, we address multiple valuation methods for FTS at this part of the report. Our methods are focused upon: (a) P/E; and, (b) yield based.

### P/E based approach

For many industries P/E multiples are somewhat challenging, but they do provide a quick comparative with other sectors and the overall market on a simple basis. Exhibit 61 and Exhibit 62 provide a historical view for FTS's Forward 1-year and 2-Year P/E multiple over the last 10 years.

**Exhibit 61: Historical 1-year forward P/E**

Source: Thomson One

**Exhibit 62: Historical 2-year forward P/E**

Source: Thomson One

Descriptive statistics for both FTS's 1-year and 2-year historical forward P/E multiples for are shown in Exhibit 63.

**Exhibit 63: Historical forward P/E descriptive statistics**

	1-Yr Forward	2-Yr Forward
Mean	18.5x	17.2x
Median	18.7x	17.3x
Min	13.8x	13.3x
Max	22.8x	21.1x

Source: Thomson One.

Exhibit 64 shows the past few years' forward 2-year P/E.

**Exhibit 64: Last 2-years of 2-year forward P/E multiples**

Source: Thomson One.

- Mean: 17.4
- Median: 17.4x
- Range: 15.4x to 19.3x

Our C\$44 target price implies a 21.6x multiple on our 2016 estimate—ahead of both the mean and median along with the top end of the range. A valuation matrix appears in Exhibit 65.

**Exhibit 65: Hypothetical share prices at different EPS and P/E multiples**

### Yield based approaches

Our yield based approaches focus on three related areas: (a) dividend discount model; (b) the dividend yield; and, (c) a dividend yield spread.

### Dividend discount model

As per our recent Ideas Engine report, we assessed the current value of income oriented stocks relative to some historical measures and future forecasts. There are many ways to consider yield driven valuation, but we believe the dividend discount model is one of the preferred methodologies, in part, because of the simplicity of the approach. As a refresher, the simple dividend discount model formula is as follows:

$$P = D / (k - g)$$

Where:

P = price

D = dividend

K = required return

G = growth rate

One of the main tools in the process will be the dividend discount model and solving for "K" as the other elements are known, have historical reference points or metrics available from a consensus view to avoid more narrow distortions. The Fortis valuation under these criteria includes:

$$D = \text{C\$1.34/share (2015 consensus estimate)}$$

$$K = 7.8\%$$

$$G = 4.6\% (2014/2015)$$

$$P = \text{C\$41.68}$$

If one was to use the current share price of C\$37.83 and solve for "K," then that value would be 8.1%.

Another approach to consider is the cost of equity and the potential growth in dividend in the future. A dividend discount model would be a useful valuation tool for yield-oriented vehicles such as EMA. We used the following assumptions in our dividend discount model:

- Current annual dividend: C\$1.28/share
- Cost of equity: 7.0% (Bloomberg)
- Growth rate: 4.6% (2014/2015)

A dividend discount model would produce share price value of roughly C\$53.33.

Given different assumptions, we generated the following range of valuations highlighted in Exhibit 66.

**Exhibit 66: Share Value Under Different Dividend Discount Model Assumptions**

	Cost of Equity (%)									
	5.5%	6.00%	6.5%	7.0%	7.5%	8.0%	8.5%	9.0%	9.5%	10.0%

### Dividend Yield

According to Bloomberg data, Fortis has traded at an average dividend yield of 3.55% over the past 10 years and within a range of 2.46-4.81%. (See Exhibit 67 and Exhibit 68.)

**Exhibit 67: Historical FTS Dividend Yield (%)**

Source: Bloomberg and Credit Suisse.

**Exhibit 68: Historical Dividend Yield (%)**

Mean	3.55
Median	3.61
Min	2.46
Max	4.81

Source: Bloomberg and Credit Suisse.

For several reasons, we believe that these metrics should be compared with movements in the Canadian 10-year bond yield. (See Exhibit 69.)

**Exhibit 69: Canadian 10-Year Bond Yield**

Source: Bloomberg and Credit Suisse.

The sensitivity of dividend yield valuation is clearly evident in Exhibit 70, with various distribution levels at various targeted yields.

5.50%	20.91	21.82	22.73	23.64	24.55	25.45	26.36	27.27	28.18	29.09

Source: Credit Suisse estimates.

Our C\$44 target price is based upon an approximately 3.0% dividend yield.

### Dividend Yield Spread

We believe that one should not solely rely upon distribution yield-based metrics. In our view, many yield-based metrics should be considered in the context of comparable nominal interest rates available in the marketplace. For a number of reasons, we have considered FTS's historical dividend yield against the Government of Canada 10-year bond yield on a spread basis. Exhibit 71 and Exhibit 72 highlight this relationship.

**Exhibit 71: Historical Dividend Yield Spread versus the Canadian Ten Year (Bps)**

Source: Bloomberg and Credit Suisse.

**Exhibit 72: Historical Yield Spread**

Mean	32
Median	53
Min	-179
Max	209

Source: Bloomberg and Credit Suisse.

The yield spread relationship highlights the potential for meaningful sensitivity to interest rate movements. Many fundamental reasons exist for this relationship; however, we must note that interest rate-sensitive investments like FTS usually do not exhibit perfect correlations. Some near-term uncertainty has affected the valuation of many interest rate-sensitive investment vehicles. Yet, in historical terms, the interest rate environment remains accommodative, which underpins valuations for companies like FTS. We therefore apply 50bps spread to a moderate outlook on 10-year Canadian bond yield (2.50%) to obtain our C\$44 target price.

The RAVE valuation summary for FTS appears in Exhibit 73.

## A plentiful pipeline of potential

- **Upgrading to Outperform:** With the analysis appearing in our Ideas Engine report, we outlined a dividend discount model approach for TRP's valuation. Our calculated historical 5-year "k" is 8.4% for TRP with a 6.3% growth rate (2014-15 on consensus). With our outlook for TRP's improving capital efficiency initiatives and ongoing organic growth, we believe TRP is well positioned for future dividend growth. In simple terms, TRP's self-stated capital program is C\$45.6bn until the end of the decade. A considerable part of that program involves mega projects with a lot of potential variability on approvals and timeline. In any event, we believe the core TRP growth will help re-rate the shares largely driven by higher future dividend expectations. Accordingly, we upgrade TRP to Outperform from Neutral and increase our target price to C\$68 from C\$58.
- **Steady progress:** In recent months, TRP has made clear progress with the improved use of TC Pipelines with announced drops totaling US\$215m of value. In light of the TCP's re-rating (year-to-date stock market performance of +50.9% versus the Alerian of 9.2%), that stock's currency makes the drops much more palatable for TRP. We continue to believe TRP's journey to a more capital efficient model will be evolutionary rather than revolutionary. In our view, the large-cap Canadian pipes approach to certain industry issues as being akin to Aesop's Tortoise and the Hare fable as discussed in past note ([link](#)). Beyond these actions, we continue to witness TRP making positive progress on a large capital program that is growing positively (i.e., incremental projects rather than project cost escalation outside of the understandable KXL).
- **Investment themes:** We believe the TRP's asset base is well positioned for several investment themes, including: Alberta's oil sands; west coast LNG; and, low cost generation exposure in structurally tight power markets.
- **Valuation:** Our C\$68 target price is primarily obtained from a yield-driven valuation approach that implies a 3.06% dividend yield with an 56 bps yield spread on a 2.50% Canadian 10-year. We upgrade our rating to Outperform.

Exhibit 79 shows the past few years' forward 2-year P/E.

**Exhibit 79: Last 2-years of 2-year forward P/E multiples**

Source: Thomson One.

- Mean: 19.6x
- Median: 19.4x
- Range: 17.5x to 24.2x

Our C\$68 target price implies a 25.4x multiple on our 2016 estimate which is above the mean and median historical values. Additionally, that value exceeds the top of the range. In our view, several justifications exist for this multiple. A valuation matrix appears in Exhibit 80.

**Exhibit 80: Hypothetical share prices at different EPS and P/E multiples**

### Yield based approaches

Our yield-based approaches focus on three related areas: (a) dividend discount model; (b) the dividend yield; and, (c) a dividend yield spread.

### Dividend discount model

As per our recent Ideas Engine report, we assessed the current value of income oriented stocks relative to some historical measures and future forecasts. There are many ways to consider yield driven valuation, but we believe the dividend discount model is one of the preferred methodologies, in part, because of the simplicity of the approach. As a refresher, the simple dividend discount model formula is as follows:

$$P = D / (k - g)$$

Where:

P = price

D = dividend

K = required return

G = growth rate

One of the main tools in the process will be the dividend discount model and solving for "K" as the other elements are known, have historical reference points or metrics available from a consensus view to avoid more narrow distortions. Using this approach, the figures for TRP's valuation appear below and include:

$$D = \text{C\$2.04/share (2015 consensus estimate)}$$

$$K = 8.4\%$$

$$G = 6.3\% \text{ (2014/2015)}$$

$$P = \text{C\$96.49}$$

If one was to use the current share price of C\$55.80 and solve for "K," then that value would be 10.0%.

Another approach to consider is the cost of equity and the potential growth in dividend in the future. A dividend discount model would be a useful valuation tool for yield-oriented vehicles such as TRP. We used the following assumptions in our dividend discount model:

- Current annual dividend: C\$1.92/share
- Cost of equity: 9.5% (Bloomberg)
- Growth rate: 6.3% (2014/2015)

A dividend discount model would produce share price value of roughly C\$60.

Given different assumptions, we generated the following range of valuations highlighted in Exhibit 81.

**Exhibit 81: Share Value Under Different Dividend Discount Model Assumptions**

		Discount Rate									
		3.0%	4.00%	5.0%	6.00%	7.0%	8.00%	9.0%	10.0%	11.0%	12.0%

### Dividend Yield

According to Bloomberg data, Fortis has traded at an average dividend yield of 3.95% over the past 10 years and within a range of 3.13-5.22%. (See Exhibit 82 and Exhibit 83.)

**Exhibit 82: Historical TRP Dividend Yield (%)**

Source: Bloomberg and Credit Suisse.

**Exhibit 83: Historical Dividend Yield (%)**

Mean	3.95
Median	3.92
Min	3.13
Max	5.22

Source: Bloomberg and Credit Suisse.

For several reasons, we believe that these metrics should be compared with movements in the Canadian 10-year bond yield. (See Exhibit 84.)

**Exhibit 84: Canadian 10-Year Bond Yield**

Source: Bloomberg and Credit Suisse.

The sensitivity of dividend yield valuation is clearly evident in Exhibit 85, with various distribution levels at various targeted yields.

Source: Credit Suisse estimates.

Our C\$68 target price is based upon an approximately 3.06% dividend yield.

### Dividend Yield Spread

We believe that one should not solely rely upon distribution yield-based metrics. In our view, many yield-based metrics should be considered in the context of comparable nominal interest rates available in the marketplace. For a number of reasons, we have considered TRP's historical dividend yield against the Government of Canada 10-year bond yield on a spread basis. Exhibit 86 and Exhibit 87 highlight this relationship.

**Exhibit 86: Historical Dividend Yield Spread versus the Canadian Ten-Year (Bps)**

Source: Bloomberg and Credit Suisse.

**Exhibit 87: Historical Yield Spread**

Mean	73
Median	104
Min	-115
Max	256

Source: Bloomberg and Credit Suisse.

The yield spread relationship highlights the potential for meaningful sensitivity to interest rate movements. Many fundamental reasons exist for this relationship; however, we must note that interest rate-sensitive investments like TRP usually do not exhibit perfect correlations. Some near-term uncertainty has affected the valuation of many interest rate-sensitive investment vehicles. Yet, in historical terms, the interest rate environment remains accommodative, which underpins valuations for companies like TRP. We therefore apply 56bps spread to a moderate outlook on 10-year Canadian bond yield (2.50%) to obtain our C\$68 target price.

TRP's RAVE valuation appears in Exhibit 88.

The analyst(s) responsible for preparing this research report received Compensation that is based upon various factors including Credit Suisse's total revenues, a portion of which are generated by Credit Suisse's investment banking activities

## As of December 10, 2012 Analysts' stock rating are defined as follows:

**Outperform (O)** : The stock's total return is expected to outperform the relevant benchmark\* over the next 12 months.

**Neutral (N)** : The stock's total return is expected to be in line with the relevant benchmark\* over the next 12 months.

**Underperform (U)** : The stock's total return is expected to underperform the relevant benchmark\* over the next 12 months.

\*Relevant benchmark by region: As of 10th December 2012, Japanese ratings are based on a stock's total return relative to the analyst's coverage universe which consists of all companies covered by the analyst within the relevant sector, with Outperforms representing the most attractive, Neutrals the less attractive, and Underperforms the least attractive investment opportunities. As of 2nd October 2012, U.S. and Canadian as well as European ratings are based on a stock's total return relative to the analyst's coverage universe which consists of all companies covered by the analyst within the relevant sector, with Outperforms representing the most attractive, Neutrals the less attractive, and Underperforms the least attractive investment opportunities. For Latin American and non-Japan Asia stocks, ratings are based on a stock's total return relative to the average total return of the relevant country or regional benchmark; prior to 2nd October 2012 U.S. and Canadian ratings were based on (1) a stock's absolute total return potential to its current share price and (2) the relative attractiveness of a stock's total return potential within an analyst's coverage universe. For Australian and New Zealand stocks, 12-month rolling yield is incorporated in the absolute total return calculation and a 15% and a 7.5% threshold replace the 10-15% level in the Outperform and Underperform stock rating definitions, respectively. The 15% and 7.5% thresholds replace the +10-15% and -10-15% levels in the Neutral stock rating definition, respectively. Prior to 10th December 2012, Japanese ratings were based on a stock's total return relative to the average total return of the relevant country or regional benchmark.

**Restricted (R)** : In certain circumstances, Credit Suisse policy and/or applicable law and regulations preclude certain types of communications, including an investment recommendation, during the course of Credit Suisse's engagement in an investment banking transaction and in certain other circumstances.

**Volatility Indicator [V]** : A stock is defined as volatile if the stock price has moved up or down by 20% or more in a month in at least 8 of the past 24 months or the analyst expects significant volatility going forward.

Analysts' sector weightings are distinct from analysts' stock ratings and are based on the analyst's expectations for the fundamentals and/or valuation of the sector\* relative to the group's historic fundamentals and/or valuation:

**Overweight** : The analyst's expectation for the sector's fundamentals and/or valuation is favorable over the next 12 months.

**Market Weight** : The analyst's expectation for the sector's fundamentals and/or valuation is neutral over the next 12 months.

**Underweight** : The analyst's expectation for the sector's fundamentals and/or valuation is cautious over the next 12 months.

\*An analyst's coverage sector consists of all companies covered by the analyst within the relevant sector. An analyst may cover multiple sectors.

Credit Suisse's distribution of stock ratings (and banking clients) is:

## Global Ratings Distribution

Rating	Versus universe (%)	Of which banking clients (%)
Outperform/Buy*	45%	(54% banking clients)
Neutral/Hold*	38%	(50% banking clients)
Underperform/Sell*	14%	(44% banking clients)
Restricted	2%	

\*For purposes of the NYSE and NASD ratings distribution disclosure requirements, our stock ratings of Outperform, Neutral, and Underperform most closely correspond to Buy, Hold, and Sell, respectively; however, the meanings are not the same, as our stock ratings are determined on a relative basis. (Please refer to definitions above.) An investor's decision to buy or sell a security should be based on investment objectives, current holdings, and other individual factors.

---

#### Price Target: (12 months) for Enbridge Inc. (ENB.TO)

**Method:** We obtain our C\$70 target price for Enbridge by using multiple valuation methodologies, primarily from a targetted dividend yield of 2.22% and an imputed -28 bps spread over a 2.50% Canadian 10-year bond yield. In terms of a few multiples, on P/E, that target reflects a nearly 24.4x multiple on 2016 earnings and a 13.7x EV/EBITDA multiple.

**Risk:** There are a number of risks to Enbridge's achievement of our C\$70 target price: an extensive capital program that requires access to capital markets; global and North American crude market dynamics may have a significant impact on underlying asset valuations; regulatory; commodity prices; and interest rates. Moreover, one should never underestimate the power of the regulator in any regulated business.

#### Price Target: (12 months) for Emera Inc. (EMA.TO)

**Method:** We obtain our C\$44 target price for Emera Inc. by using multiple valuation methodologies, but primarily relies upon a dividend yield and yield spread methodology. The implied dividend yield to our target is 3.52% and a roughly 102 bps yield spread on a 2.50% Canadian 10-year baseline assumption.

**Risk:** There are a number of risks to Emera's achievement of our C\$44.00 target price: commodity prices; weather; environmental; regulatory; access to capital markets; and, interest rates. Moreover, one should never underestimate the power of the regulator in any regulated business.

#### Price Target: (12 months) for TransCanada Corp. (TRP.TO)

**Method:** We obtain our C\$68.00 target price for TransCanada by using multiple valuation methodologies, but primarily rely upon targeted dividend yield of 3.06% and a roughly 56 bps yield spread on a 2.50% Canadian 10-year.

**Risk:** Our C\$68.00 target price for TransCanada is subject to a number of risks: interest rates; commodity prices; operating rates; electricity market volatility; and, pipeline volumes. In any regulated business, one should never underestimate the power of the regulator.

#### Price Target: (12 months) for Fortis Inc. (FTS.TO)

**Method:** We obtain our C\$44.00 target price for Fortis Inc. by using multiple valuation methodologies, but primarily rely upon a targeted dividend yield of 3.00% and an imputed 50 bps spread over a 2.50% Canadian 10-year bond yield.

**Risk:** There are a number of risks to Fortis' achievement of our C\$44.00 target price: commodity prices; weather; environmental; regulatory; access to capital markets; and, interest rates. Moreover, one should never underestimate the power of the regulator in any regulated business.

#### Price Target: (12 months) for Brookfield Infrastructure Partners LP (BIP.N)

**Method:** We obtain our 12-month US\$46.00 target price for Brookfield Infrastructure Partners LP by using multiple valuation methods, primarily: a targeted cash-on-cash distribution yield of 4.52% and a 202 bps spread.

**Risk:** There are a number of risk to Brookfield Infrastructure Partners LP's achievement of our US\$46.00 target price: increasing competitive environment for infrastructure assets; BAM dependency; interest rate movements; access to capital markets; regulatory; taxation; credit and counterparty risk; commodity prices; energy market dynamics; environmental legislation; foreign exchange; infestations and disease; weather; and, labour shortage/strikes.

#### Price Target: (12 months) for Enbridge Income (ENF.TO)

**Method:** Our C\$30.00 target price for Enbridge Income Fund Holdings Inc. is base on multiple yield valuation methodologies such as yield, yield spread and a dividend discount model. The target implies a 5.13% yield and roughly 263 yield spread against a 2.50% Canadian 10-year.

**Risk:** There are a number of risks to Enbridge Income Fund Holdings Inc.'s target price of C\$30.00: organic and acquisition growth strategy that requires access to capital markets; global and North American energy commodity market dynamics may have a significant impact on underlying asset valuations; regulatory; commodity prices; and interest rates. Moreover, one should never underestimate the power of the regulator in any regulated business.

Please refer to the firm's disclosure website at <https://rave.credit-suisse.com/disclosures> for the definitions of abbreviations typically used in the target price method and risk sections.

See the *Companies Mentioned* section for full company names

The subject company (ENB.TO, EMA.TO, TRP.TO, FTS.TO, BIP.N) currently is, or was during the 12-month period preceding the date of distribution of this report, a client of Credit Suisse.

Credit Suisse provided investment banking services to the subject company (ENB.TO, EMA.TO, TRP.TO, BIP.N) within the past 12 months.

Credit Suisse provided non-investment banking services to the subject company (FTS.TO) within the past 12 months

Credit Suisse has managed or co-managed a public offering of securities for the subject company (ENB.TO, EMA.TO, TRP.TO) within the past 12 months.

Credit Suisse has received investment banking related compensation from the subject company (ENB.TO, EMA.TO, TRP.TO, BIP.N) within the past 12 months

References in this report to Credit Suisse include all of the subsidiaries and affiliates of Credit Suisse operating under its investment banking division. For more information on our structure, please use the following link: <https://www.credit-suisse.com/who-we-are/en>. This report may contain material that is not directed to, or intended for distribution to or use by, any person or entity who is a citizen or resident of or located in any locality, state, country or other jurisdiction where such distribution, publication, availability or use would be contrary to law or regulation or which would subject Credit Suisse AG or its affiliates ("CS") to any registration or licensing requirement within such jurisdiction. All material presented in this report, unless specifically indicated otherwise, is under copyright to CS. None of the material, nor its content, nor any copy of it, may be altered in any way, transmitted to, copied or distributed to any other party, without the prior express written permission of CS. All trademarks, service marks and logos used in this report are trademarks or service marks or registered trademarks or service marks of CS or its affiliates. The information, tools and material presented in this report are provided to you for information purposes only and are not to be used or considered as an offer or the solicitation of an offer to sell or to buy or subscribe for securities or other financial instruments. CS may not have taken any steps to ensure that the securities referred to in this report are suitable for any particular investor. CS will not treat recipients of this report as its customers by virtue of their receiving this report. The investments and services contained or referred to in this report may not be suitable for you and it is recommended that you consult an independent investment advisor if you are in doubt about such investments or investment services. Nothing in this report constitutes investment, legal, accounting or tax advice, or a representation that any investment or strategy is suitable or appropriate to your individual circumstances, or otherwise constitutes a personal recommendation to you. CS does not advise on the tax consequences of investments and you are advised to contact an independent tax adviser. Please note in particular that the bases and levels of taxation may change. Information and opinions presented in this report have been obtained or derived from sources believed by CS to be reliable, but CS makes no representation as to their accuracy or completeness. CS accepts no liability for loss arising from the use of the material presented in this report, except that this exclusion of liability does not apply to the extent that such liability arises under specific statutes or regulations applicable to CS. This report is not to be relied upon in substitution for the exercise of independent judgment. CS may have issued, and may in the future issue, other communications that are inconsistent with, and reach different conclusions from, the information presented in this report. Those communications reflect the different assumptions, views and analytical methods of the analysts who prepared them and CS is under no obligation to ensure that such other communications are brought to the attention of any recipient of this report. Some investments referred to in this report will be offered solely by a single entity and in the case of some investments solely by CS, or an associate of CS or CS may be the only market maker in such investments. Past performance should not be taken as an indication or guarantee of future performance, and no representation or warranty, express or implied, is made regarding future performance. Information, opinions and estimates contained in this report reflect a judgment at its original date of publication by CS and are subject to change without notice. The price, value of and income from any of the securities or financial instruments mentioned in this report can fall as well as rise. The value of securities and financial instruments is subject to exchange rate fluctuation that may have a positive or adverse effect on the price or income of such securities or financial instruments. Investors in securities such as ADRs, the values of which are influenced by currency volatility, effectively assume this risk. Structured securities are complex instruments, typically involve a high degree of risk and are intended for sale only to sophisticated investors who are capable of understanding and assuming the risks involved. The market value of any structured security may be affected by changes in economic, financial and political factors (including, but not limited to, spot and forward interest and exchange rates), time to maturity, market conditions and volatility, and the credit quality of any issuer or reference issuer. Any investor interested in purchasing a structured product should conduct their own investigation and analysis of the product and consult with their own professional advisers as to the risks involved in making such a purchase. Some investments discussed in this report may have a high level of volatility. High volatility investments may experience sudden and large falls in their value causing losses when that investment is realised. Those losses may equal your original investment. Indeed, in the case of some investments the potential losses may exceed the amount of initial investment and, in such circumstances, you may be required to pay more money to support those losses. Income yields from investments may fluctuate and, in consequence, initial capital paid to make the investment may be used as part of that income yield. Some investments may not be readily realisable and it may be difficult to sell or realise those investments, similarly it may prove difficult for you to obtain reliable information about the value, or risks, to which such an investment is exposed. This report may provide the addresses of, or contain hyperlinks to, websites. Except to the extent to which the report refers to website material of CS, CS has not reviewed any such site and takes no responsibility for the content contained therein. Such address or hyperlink (including addresses or hyperlinks to CS's own website material) is provided solely for your convenience and information and the content of any such website does not in any way form part of this document. Accessing such website or following such link through this report or CS's website shall be at your own risk. This report is issued and distributed in Europe (except Switzerland) by Credit Suisse Securities (Europe) Limited, One Cabot Square, London E14 4QJ, England, which is authorised by the Prudential Regulation Authority and regulated by the Financial Conduct Authority and the Prudential Regulation Authority. Road, Worli, Mumbai - 18, India, T. +91-22 6777 3777, Credit Suisse Securities (Europe) Limited, Seoul Branch, Credit Suisse AG, Taipei Securities Branch, PT Credit Suisse Securities Indonesia, Credit Suisse Securities (Philippines) Inc., and elsewhere in the world by the relevant authorised affiliate of the above. Research on Taiwanese securities produced by Credit Suisse AG, Taipei Securities Branch has been prepared by a registered Senior Business Person. Research provided to residents of Malaysia is authorised by the Head of Research for Credit Suisse Securities (Malaysia) Sdn Bhd, to whom they should direct any queries on +603 2723 2020. This report has been prepared and issued for distribution in Singapore to institutional investors, accredited investors and expert investors (each as defined under the Financial Advisers Regulations) only, and is also distributed by Credit Suisse AG, Singapore branch to overseas investors (as defined under the Financial Advisers Regulations). By virtue of your status as an institutional investor, accredited investor, expert investor or overseas investor, Credit Suisse AG, Singapore branch is exempted from complying with certain compliance requirements under the Financial Advisers Act, Chapter 110 of Singapore (the "FAA"), the Financial Advisers Regulations and the relevant Notices and Guidelines issued thereunder, in respect of any financial advisory service which Credit Suisse AG, Singapore branch may provide to you. This information is being distributed by Credit Suisse AG, Dubai Branch, duly licensed and regulated by the Dubai Financial Services Authority (DFSA), and is directed at Professional Clients or Market Counterparties only, as defined by the DFSA. The financial products or financial services to which the information relates will only be made available to a client who meets the regulatory criteria to be a Professional Client or Market Counterparty only, as defined by the DFSA, and is not intended for any other person. This research may not conform to Canadian disclosure requirements. In jurisdictions where CS is not already registered or licensed to trade in securities, transactions will only be effected in accordance with applicable securities legislation, which will vary from jurisdiction to jurisdiction and may require that the trade be made in accordance with applicable exemptions from registration or licensing requirements. Non-U.S. customers wishing to effect a transaction should contact a CS entity in their local jurisdiction unless governing law permits otherwise. U.S. customers wishing to effect a transaction should do so only by contacting a representative at Credit Suisse Securities (USA) LLC in the U.S. Please note that this research was originally prepared and issued by CS for distribution to their market professional and institutional investor customers. Recipients who are not market professional or institutional investor customers of CS should seek the advice of their independent financial advisor prior to taking any investment decision based on this report or for any necessary explanation of its contents. This research may relate to investments or services of a person outside of the UK or to other matters which are not authorised by the Prudential Regulation Authority and regulated by the Financial Conduct Authority and the Prudential Regulation Authority or in respect of which the protections of the Prudential Regulation Authority and Financial Conduct Authority for private customers and/or the UK compensation scheme may not be available, and further details as to where this may be the case are available upon request in respect of this report. CS may provide various services to US municipal entities or obligated persons ("municipalities"), including suggesting individual transactions or trades and entering into such transactions. Any services CS provides to municipalities are not viewed as "advice" within the meaning of Section 975 of the Dodd-Frank Wall Street Reform and Consumer Protection Act. CS is providing any such services and related information solely on an arm's length basis and not as an advisor or fiduciary to the municipality. In connection with the provision of the any such services, there is no agreement, direct or indirect, between any municipality (including the officials, management, employees or agents thereof) and CS for CS to provide advice to the municipality. Municipalities should consult with their financial, accounting and legal advisors regarding any such services provided by CS. In addition, CS is not acting for direct or indirect compensation to solicit the municipality on behalf of an unaffiliated broker, dealer, municipal securities dealer, municipal advisor, or investment adviser for the purpose of obtaining or retaining an engagement by the municipality for or in connection with Municipal Financial Products, the issuance of municipal securities, or of an investment adviser to provide investment advisory services to or on behalf of the municipality. If this report is being distributed by a financial institution other than Credit Suisse AG, or its affiliates, that financial institution is solely responsible for distribution. Clients of that institution should contact that institution to effect a transaction in the securities mentioned in this report or require further information. This report does not constitute investment advice by Credit Suisse to the clients of the distributing financial institution, and neither Credit Suisse AG, its affiliates, and their respective officers, directors and employees accept any liability whatsoever for any direct or consequential loss arising from their use of this report or its content. Principal is not guaranteed. Commission is the commission rate or the amount agreed with a customer when setting up an account or at any time after that.

Copyright © 2014 CREDIT SUISSE AG and/or its affiliates. All rights reserved.

Investment principal on bonds can be eroded depending on sale price or market price. In addition, there are bonds on which investment principal can be eroded due to changes in redemption amounts. Care is required when investing in such instruments.

When you purchase non-listed Japanese fixed income securities (Japanese government bonds, Japanese municipal bonds, Japanese government guaranteed bonds, Japanese corporate bonds) from CS as a seller, you will be requested to pay the purchase price only.

## Fortis Inc. (FTS.TO)

Rating	<b>OUTPERFORM*</b>
Price (18 Feb 15, C\$)	39.30
Target price (C\$)	44.00 <sup>1</sup>
52-week price range	41.91 - 30.56
Market cap. (C\$ m)	10,851.68

### RESULTS

## At a glance: Favouring FX

- **Earnings at a glance:** Fortis reported Q4 2014 headline EPS of C\$0.44 and an adjusted C\$0.46. The adjusted compares to our C\$0.47 and the Street's C\$0.48 estimate (range of C\$0.45-C\$0.53). Rather positively, we believe the FTS focus for the next 12-18 months will be robust organic growth rather than M&A. In addition, the possible Fortis Properties sale should be viewed positively for funding and focus. With the completion of the UNS acquisition, FTS has 38% of assets in the US and they estimate a 5 cent change in USD/CAD exchange rate would impact EPS by roughly C\$0.04. All in all, the results are rather "utility like" and unlikely to be market moving. We view the focus should be on the real estate monetization potential, FX benefit, capex outlook and the M&A backburner. In our view, the Alberta exposure is not a major issue to the overall asset base. Given the long-cycle nature of many assets, we do not place undue emphasis on quarterly results.
- **Selected notable items:** Highlights include: (a) FTS continues to provide a robust capital expenditure outlook of over C\$2.0bn for 2015; (b) the 5-year capex outlook (2015 to 2019) is expected to approach C\$9bn; (c) the Fortis Properties review process started in October and "we expect to make a decision on the future of this business in the second quarter of 2015,"; and, (d) Waneta Expansion project is on time and on budget with completion expected to be in spring 2015.
- **Conference call:** The FTS results call will be at 10:00 am (eastern). The call will be accessible via 1-877-223-4471 or at 647-788-4922.
- **Valuation:** Our target price of C\$44.00 is on an implied yield of 3.09% and a yield spread of roughly 59 bps on a 2.50% Canadian 10-year. We maintain our Outperform rating.

\* Asterisk signifies initiation or assumption of coverage.

The analyst(s) responsible for preparing this research report received Compensation that is based upon various factors including Credit Suisse's total revenues, a portion of which are generated by Credit Suisse's investment banking activities

**As of December 10, 2012 Analysts' stock rating are defined as follows:**

**Outperform (O) :** The stock's total return is expected to outperform the relevant benchmark\* over the next 12 months.

**Neutral (N) :** The stock's total return is expected to be in line with the relevant benchmark\* over the next 12 months.

**Underperform (U) :** The stock's total return is expected to underperform the relevant benchmark\* over the next 12 months.

\*Relevant benchmark by region: As of 10th December 2012, Japanese ratings are based on a stock's total return relative to the analyst's coverage universe which consists of all companies covered by the analyst within the relevant sector, with Outperforms representing the most attractive, Neutrals the less attractive, and Underperforms the least attractive investment opportunities. As of 2nd October 2012, U.S. and Canadian as well as European ratings are based on a stock's total return relative to the analyst's coverage universe which consists of all companies covered by the analyst within the relevant sector, with Outperforms representing the most attractive, Neutrals the less attractive, and Underperforms the least attractive investment opportunities. For Latin American and non-Japan Asia stocks, ratings are based on a stock's total return relative to the average total return of the relevant country or regional benchmark; prior to 2nd October 2012 U.S. and Canadian ratings were based on (1) a stock's absolute total return potential to its current share price and (2) the relative attractiveness of a stock's total return potential within an analyst's coverage universe. For Australian and New Zealand stocks, 12-month rolling yield is incorporated in the absolute total return calculation and a 15% and a 7.5% threshold replace the 10-15% level in the Outperform and Underperform stock rating definitions, respectively. The 15% and 7.5% thresholds replace the +10-15% and -10-15% levels in the Neutral stock rating definition, respectively. Prior to 10th December 2012, Japanese ratings were based on a stock's total return relative to the average total return of the relevant country or regional benchmark.

**Restricted (R) :** In certain circumstances, Credit Suisse policy and/or applicable law and regulations preclude certain types of communications, including an investment recommendation, during the course of Credit Suisse's engagement in an investment banking transaction and in certain other circumstances.

**Volatility Indicator [V] :** A stock is defined as volatile if the stock price has moved up or down by 20% or more in a month in at least 8 of the past 24 months or the analyst expects significant volatility going forward.

Analysts' sector weightings are distinct from analysts' stock ratings and are based on the analyst's expectations for the fundamentals and/or valuation of the sector\* relative to the group's historic fundamentals and/or valuation:

**Overweight :** The analyst's expectation for the sector's fundamentals and/or valuation is favorable over the next 12 months.

**Market Weight :** The analyst's expectation for the sector's fundamentals and/or valuation is neutral over the next 12 months.

**Underweight :** The analyst's expectation for the sector's fundamentals and/or valuation is cautious over the next 12 months.

\*An analyst's coverage sector consists of all companies covered by the analyst within the relevant sector. An analyst may cover multiple sectors.

Credit Suisse's distribution of stock ratings (and banking clients) is:

#### Global Ratings Distribution

Rating	Versus universe (%)	Of which banking clients (%)
Outperform/Buy*	45%	(54% banking clients)
Neutral/Hold*	38%	(49% banking clients)
Underperform/Sell*	15%	(45% banking clients)
Restricted	2%	

*\*For purposes of the NYSE and NASD ratings distribution disclosure requirements, our stock ratings of Outperform, Neutral, and Underperform most closely correspond to Buy, Hold, and Sell, respectively; however, the meanings are not the same, as our stock ratings are determined on a relative basis. (Please refer to definitions above.) An investor's decision to buy or sell a security should be based on investment objectives, current holdings, and other individual factors.*

Credit Suisse's policy is to update research reports as it deems appropriate, based on developments with the subject company, the sector or the market that may have a material impact on the research views or opinions stated herein.

#### Price Target: (12 months) for Fortis Inc. (FTS.TO)

**Method:** We obtain our C\$44.00 target price for Fortis Inc. by using multiple valuation methodologies, but primarily rely upon a targeted dividend yield of 3.09% and an imputed 59 bps spread over a 2.50% Canadian 10-year bond yield.

**Risk:** There are a number of risks to Fortis' achievement of our C\$44.00 target price: commodity prices; weather; environmental; regulatory; access to capital markets; and, interest rates. Moreover, one should never underestimate the power of the regulator in any regulated business.

Please refer to the firm's disclosure website at <https://rave.credit-suisse.com/disclosures> for the definitions of abbreviations typically used in the target price method and risk sections.

See the *Companies Mentioned* section for full company names

CS does not advise on the tax consequences of investments and you are advised to contact an independent tax adviser. Please note in particular that the bases and levels of taxation may change. Information and opinions presented in this report have been obtained or derived from sources believed by CS to be reliable, but CS makes no representation as to their accuracy or completeness. CS accepts no liability for loss arising from the use of the material presented in this report, except that this exclusion of liability does not apply to the extent that such liability arises under specific statutes or regulations applicable to CS. This report is not to be relied upon in substitution for the exercise of independent judgment. CS may have issued, and may in the future issue, other communications that are inconsistent with, and reach different conclusions from, the information presented in this report. Those communications reflect the different assumptions, views and analytical methods of the analysts who prepared them and CS is under no obligation to ensure that such other communications are brought to the attention of any recipient of this report. Some investments referred to in this report will be offered solely by a single entity and in the case of some investments solely by CS, or an associate of CS or CS may be the only market maker in such investments. Past performance should not be taken as an indication or guarantee of future performance, and no representation or warranty, express or implied, is made regarding future performance. Information, opinions and estimates contained in this report reflect a judgment at its original date of publication by CS and are subject to change without notice. The price, value of and income from any of the securities or financial instruments mentioned in this report can fall as well as rise. The value of securities and financial instruments is subject to exchange rate fluctuation that may have a positive or adverse effect on the price or income of such securities or financial instruments. Investors in securities such as ADRs, the values of which are influenced by currency volatility, effectively assume this risk. Structured securities are complex instruments, typically involve a high degree of risk and are intended for sale only to sophisticated investors who are capable of understanding and assuming the risks involved. The market value of any structured security may be affected by changes in economic, financial and political factors (including, but not limited to, spot and forward interest and exchange rates), time to maturity, market conditions and volatility, and the credit quality of any issuer or reference issuer. Any investor interested in purchasing a structured product should conduct their own investigation and analysis of the product and consult with their own professional advisers as to the risks involved in making such a purchase. Some investments discussed in this report may have a high level of volatility. High volatility investments may experience sudden and large falls in their value causing losses when that investment is realised. Those losses may equal your original investment. Indeed, in the case of some investments the potential losses may exceed the amount of initial investment and, in such circumstances, you may be required to pay more money to support those losses. Income yields from investments may fluctuate and, in consequence, initial capital paid to make the investment may be used as part of that income yield. Some investments may not be readily realisable and it may be difficult to sell or realise those investments, similarly it may prove difficult for you to obtain reliable information about the value, or risks, to which such an investment is exposed. This report may provide the addresses of, or contain hyperlinks to, websites. Except to the extent to which the report refers to website material of CS, CS has not reviewed any such site and takes no responsibility for the content contained therein. Such address or hyperlink (including addresses or hyperlinks to CS's own website material) is provided solely for your convenience and information and the content of any such website does not in any way form part of this document. Accessing such website or following such link through this report or CS's website shall be at your own risk. This report is issued and distributed in Europe (except Switzerland) by Credit Suisse Securities (Europe) Limited, One Cabot Square, London E14 4QJ, England, which is authorised by the Prudential Regulation Authority and regulated by the Financial Conduct Authority and the Prudential Regulation Authority. This report is being distributed in Germany by Credit Suisse Securities (Europe) Limited Niederlassung Frankfurt am Main regulated by the Bundesanstalt fuer Finanzdienstleistungsaufsicht ("BaFin"). This report is being distributed in the United States and Canada by Credit Suisse Securities (USA) LLC; in Switzerland by Credit Suisse AG; in Brazil by Banco de Investimentos Credit Suisse (Brasil) S.A. or its affiliates; in Mexico by Banco Credit Suisse (México), S.A. (transactions related to the securities mentioned in this report will only be effected in compliance with applicable regulation); in Japan by Credit Suisse Securities (Japan) Limited, Financial Instruments Firm, Director-General of Kanto Local Finance Bureau (Kinsho) No. 66, a member of Japan Securities Dealers Association, The Financial Futures Association of Japan, Japan Investment Advisers Association, Type II Financial Instruments Firms Association; elsewhere in Asia/ Pacific by whichever of the following is the appropriately authorised entity in the relevant jurisdiction: Credit Suisse (Hong Kong) Limited, Credit Suisse Securities (Australia) Limited, Credit Suisse Securities (Thailand) Limited, regulated by the Office of the Securities and Exchange Commission, Thailand, having registered address at 990 Abdulrahim Place, 27th Floor, Unit 2701, Rama IV Road, Silom, Bangkok, Bangkok 10500, Thailand, Tel. +66 2614 6000, Credit Suisse Securities (Malaysia) Sdn Bhd, Credit Suisse AG, Singapore Branch, Credit Suisse Securities (India) Private Limited (CIN no. U67120MH1996PTC104392) regulated by the Securities and Exchange Board of India (registration Nos. INB230970637; INF230970637; INB010970631; INF010970631), having registered address at 9th Floor, Ceejay House, Dr.A.B. Road, Worli, Mumbai - 18, India, T. +91-22 6777 3777, Credit Suisse Securities (Europe) Limited, Seoul Branch, Credit Suisse AG, Taipei Securities Branch, PT Credit Suisse Securities Indonesia, Credit Suisse Securities (Philippines) Inc., and elsewhere in the world by the relevant authorised affiliate of the above. Research on Taiwanese securities produced by Credit Suisse AG, Taipei Securities Branch has been prepared by a registered Senior Business Person. Research provided to residents of Malaysia is authorised by the Head of Research for Credit Suisse Securities (Malaysia) Sdn Bhd, to whom they should direct any queries on +603 2723 2020. This report has been prepared and issued for distribution in Singapore to institutional investors, accredited investors and expert investors (each as defined under the Financial Advisers Regulations) only, and is also distributed by Credit Suisse AG, Singapore branch to overseas investors (as defined under the Financial Advisers Regulations). By virtue of your status as an institutional investor, accredited investor, expert investor or overseas investor, Credit Suisse AG, Singapore branch is exempted from complying with certain compliance requirements under the Financial Advisers Act, Chapter 110 of Singapore (the "FAA"), the Financial Advisers Regulations and the relevant Notices and Guidelines issued thereunder, in respect of any financial advisory service which Credit Suisse AG, Singapore branch may provide to you. This information is being distributed by Credit Suisse AG, Dubai Branch, duly licensed and regulated by the Dubai Financial Services Authority (DFSA), and is directed at Professional Clients or Market Counterparties only, as defined by the DFSA. The financial products or financial services to which the information relates will only be made available to a client who meets the regulatory criteria to be a Professional Client or Market Counterparty only, as defined by the DFSA, and is not intended for any other person. This research may not conform to Canadian disclosure requirements. In jurisdictions where CS is not already registered or licensed to trade in securities, transactions will only be effected in accordance with applicable securities legislation, which will vary from jurisdiction to jurisdiction and may require that the trade be made in accordance with applicable exemptions from registration or licensing requirements. Non-U.S. customers wishing to effect a transaction should contact a CS entity in their local jurisdiction unless governing law permits otherwise. U.S. customers wishing to effect a transaction should do so only by contacting a representative at Credit Suisse Securities (USA) LLC in the U.S. Please note that this research was originally prepared and issued by CS for distribution to their market professional and institutional investor customers. Recipients who are not market professional or institutional investor customers of CS should seek the advice of their independent financial advisor prior to taking any investment decision based on this report or for any necessary explanation of its contents. This research may relate to investments or services of a person outside of the UK or to other matters which are not authorised by the Prudential Regulation Authority and regulated by the Financial Conduct Authority and the Prudential Regulation Authority or in respect of which the protections of the Prudential Regulation Authority and Financial Conduct Authority for private customers and/or the UK compensation scheme may not be available, and further details as to where this may be the case are available upon request in respect of this report. CS may provide various services to US municipal entities or obligated persons ("municipalities"), including suggesting individual transactions or trades and entering into such transactions. Any services CS provides to municipalities are not viewed as "advice" within the meaning of Section 975 of the Dodd-Frank Wall Street Reform and Consumer Protection Act. CS is providing any such services and related information solely on an arm's length basis and not as an advisor or fiduciary to the municipality. In connection with the provision of the any such services, there is no agreement, direct or indirect, between any municipality (including the officials, management, employees or agents thereof) and CS for CS to provide advice to the municipality. Municipalities should consult with their financial, accounting and legal advisors regarding any such services provided by CS. In addition, CS is not acting for direct or indirect compensation to solicit the municipality on behalf of an unaffiliated broker, dealer, municipal securities dealer, municipal advisor, or investment adviser for the purpose of obtaining or retaining an engagement by the municipality for or in connection with Municipal Financial Products, the issuance of municipal securities, or of an investment adviser to provide investment advisory services to or on behalf of the municipality. If this report is being distributed by a financial institution other than Credit Suisse AG, or its affiliates, that financial institution is solely responsible for distribution. Clients of that institution should contact that institution to effect a transaction in the securities mentioned in this report or require further information. This report does not constitute investment advice by Credit Suisse to the clients of the distributing financial institution, and neither Credit Suisse AG, its affiliates, and their respective officers, directors and employees accept any liability whatsoever for any direct or consequential loss arising from their use of this report or its content. Principal is not guaranteed. Commission is the commission rate or the amount agreed with a customer when setting up an account or at any time after that.

Copyright © 2015 CREDIT SUISSE AG and/or its affiliates. All rights reserved.

Investment principal on bonds can be eroded depending on sale price or market price. In addition, there are bonds on which investment principal can be eroded due to changes in redemption amounts. Care is required when investing in such instruments.

When you purchase non-listed Japanese fixed income securities (Japanese government bonds, Japanese municipal bonds, Japanese government guaranteed bonds, Japanese corporate bonds) from CS as a seller, you will be requested to pay the purchase price only.

## Disclosure Appendix

**Important Global Disclosures**

I, Andrew M. Kuske, certify that (1) the views expressed in this report accurately reflect my personal views about all of the subject companies and securities and (2) no part of my compensation was, is or will be directly or indirectly related to the specific recommendations or views expressed in this report.

**3-Year Price and Rating History for Fortis Inc. (FTS.TO)**

FTS.TO	Closing Price	Target Price	
Date	(C\$)	(C\$)	Rating
25-Apr-12	33.46	34.00	N
20-Jul-12	33.14	38.00	O
18-Oct-13	32.01	36.00	
28-Jan-14	29.99	32.00	N
18-Nov-14	38.17	44.00	O

\* Asterisk signifies initiation or assumption of coverage.

The analyst(s) responsible for preparing this research report received Compensation that is based upon various factors including Credit Suisse's total revenues, a portion of which are generated by Credit Suisse's investment banking activities

**As of December 10, 2012 Analysts' stock rating are defined as follows:**

**Outperform (O) :** The stock's total return is expected to outperform the relevant benchmark\* over the next 12 months.

**Neutral (N) :** The stock's total return is expected to be in line with the relevant benchmark\* over the next 12 months.

**Underperform (U) :** The stock's total return is expected to underperform the relevant benchmark\* over the next 12 months.

\*Relevant benchmark by region: As of 10th December 2012, Japanese ratings are based on a stock's total return relative to the analyst's coverage universe which consists of all companies covered by the analyst within the relevant sector, with Outperforms representing the most attractive, Neutrals the less attractive, and Underperforms the least attractive investment opportunities. As of 2nd October 2012, U.S. and Canadian as well as European ratings are based on a stock's total return relative to the analyst's coverage universe which consists of all companies covered by the analyst within the relevant sector, with Outperforms representing the most attractive, Neutrals the less attractive, and Underperforms the least attractive investment opportunities. For Latin American and non-Japan Asia stocks, ratings are based on a stock's absolute total return potential to its current share price and (2) the relative attractiveness of a stock's total return potential within an analyst's coverage universe. For Australian and New Zealand stocks, 12-month rolling yield is incorporated in the absolute total return calculation and a 15% and a 7.5% threshold replace the 10-15% level in the Outperform and Underperform stock rating definitions, respectively. The 15% and 7.5% thresholds replace the +10-15% and -10-15% levels in the Neutral stock rating definition, respectively. Prior to 10th December 2012, Japanese ratings were based on a stock's total return relative to the average total return of the relevant country or regional benchmark.

**Restricted (R) :** In certain circumstances, Credit Suisse policy and/or applicable law and regulations preclude certain types of communications, including an investment recommendation, during the course of Credit Suisse's engagement in an investment banking transaction and in certain other circumstances.

**Volatility Indicator [V] :** A stock is defined as volatile if the stock price has moved up or down by 20% or more in a month in at least 8 of the past 24 months or the analyst expects significant volatility going forward.

Analysts' sector weightings are distinct from analysts' stock ratings and are based on the analyst's expectations for the fundamentals and/or valuation of the sector\* relative to the group's historic fundamentals and/or valuation:

**Overweight :** The analyst's expectation for the sector's fundamentals and/or valuation is favorable over the next 12 months.

**Market Weight :** The analyst's expectation for the sector's fundamentals and/or valuation is neutral over the next 12 months.

**Underweight :** The analyst's expectation for the sector's fundamentals and/or valuation is cautious over the next 12 months.

\*An analyst's coverage sector consists of all companies covered by the analyst within the relevant sector. An analyst may cover multiple sectors.

Credit Suisse's distribution of stock ratings (and banking clients) is:

### Global Ratings Distribution

Rating	Versus universe (%)	Of which banking clients (%)
Outperform/Buy*	43%	(53% banking clients)
Neutral/Hold*	38%	(50% banking clients)
Underperform/Sell*	16%	(44% banking clients)
Restricted	3%	

\*For purposes of the NYSE and NASD ratings distribution disclosure requirements, our stock ratings of Outperform, Neutral, and Underperform most closely correspond to Buy, Hold, and Sell, respectively; however, the meanings are not the same, as our stock ratings are determined on a relative basis. (Please refer to definitions above.) An investor's decision to buy or sell a security should be based on investment objectives, current holdings, and other individual factors.

Credit Suisse's policy is to update research reports as it deems appropriate, based on developments with the subject company, the sector or the market that may have a material impact on the research views or opinions stated herein.

Credit Suisse's policy is only to publish investment research that is impartial, independent, clear, fair and not misleading. For more detail please refer to Credit Suisse's Policies for Managing Conflicts of Interest in connection with Investment Research: [http://www.csfb.com/research-and-analytics/disclaimer/managing\\_conflicts\\_disclaimer.html](http://www.csfb.com/research-and-analytics/disclaimer/managing_conflicts_disclaimer.html)

Credit Suisse does not provide any tax advice. Any statement herein regarding any US federal tax is not intended or written to be used, and cannot be used, by any taxpayer for the purposes of avoiding any penalties.

### Price Target: (12 months) for Fortis Inc. (FTS.TO)

**Method:** We obtain our C\$44.00 target price for Fortis Inc. by using multiple valuation methodologies, but primarily rely upon a targeted dividend yield of 3.09% and an imputed 59 bps spread over a 2.50% Canadian 10-year bond yield.

**Risk:** There are a number of risks to Fortis' achievement of our C\$44.00 target price: commodity prices; weather; environmental; regulatory; access to capital markets; and, interest rates. Moreover, one should never underestimate the power of the regulator in any regulated business.

Please refer to the firm's disclosure website at <https://rave.credit-suisse.com/disclosures> for the definitions of abbreviations typically used in the target price method and risk sections.

See the Companies Mentioned section for full company names

The financial products or financial services to which the information relates will only be made available to a client who meets the regulatory criteria to be a Professional Client or Market Counterparty only, as defined by the DFSA, and is not intended for any other person. This research may not conform to Canadian disclosure requirements. In jurisdictions where CS is not already registered or licensed to trade in securities, transactions will only be effected in accordance with applicable securities legislation, which will vary from jurisdiction to jurisdiction and may require that the trade be made in accordance with applicable exemptions from registration or licensing requirements. Non-U.S. customers wishing to effect a transaction should contact a CS entity in their local jurisdiction unless governing law permits otherwise. U.S. customers wishing to effect a transaction should do so only by contacting a representative at Credit Suisse Securities (USA) LLC in the U.S. Please note that this research was originally prepared and issued by CS for distribution to their market professional and institutional investor customers. Recipients who are not market professional or institutional investor customers of CS should seek the advice of their independent financial advisor prior to taking any investment decision based on this report or for any necessary explanation of its contents. This research may relate to investments or services of a person outside of the UK or to other matters which are not authorised by the Prudential Regulation Authority and regulated by the Financial Conduct Authority and the Prudential Regulation Authority or in respect of which the protections of the Prudential Regulation Authority and Financial Conduct Authority for private customers and/or the UK compensation scheme may not be available, and further details as to where this may be the case are available upon request in respect of this report. CS may provide various services to US municipal entities or obligated persons ("municipalities"), including suggesting individual transactions or trades and entering into such transactions. Any services CS provides to municipalities are not viewed as "advice" within the meaning of Section 975 of the Dodd-Frank Wall Street Reform and Consumer Protection Act. CS is providing any such services and related information solely on an arm's length basis and not as an advisor or fiduciary to the municipality. In connection with the provision of the any such services, there is no agreement, direct or indirect, between any municipality (including the officials, management, employees or agents thereof) and CS for CS to provide advice to the municipality. Municipalities should consult with their financial, accounting and legal advisors regarding any such services provided by CS. In addition, CS is not acting for direct or indirect compensation to solicit the municipality on behalf of an unaffiliated broker, dealer, municipal securities dealer, municipal advisor, or investment adviser for the purpose of obtaining or retaining an engagement by the municipality for or in connection with Municipal Financial Products, the issuance of municipal securities, or of an investment adviser to provide investment advisory services to or on behalf of the municipality. If this report is being distributed by a financial institution other than Credit Suisse AG, or its affiliates, that financial institution is solely responsible for distribution. Clients of that institution should contact that institution to effect a transaction in the securities mentioned in this report or require further information. This report does not constitute investment advice by Credit Suisse to the clients of the distributing financial institution, and neither Credit Suisse AG, its affiliates, and their respective officers, directors and employees accept any liability whatsoever for any direct or consequential loss arising from their use of this report or its content. Principal is not guaranteed. Commission is the commission rate or the amount agreed with a customer when setting up an account or at any time after that.

Copyright © 2015 CREDIT SUISSE AG and/or its affiliates. All rights reserved.

Investment principal on bonds can be eroded depending on sale price or market price. In addition, there are bonds on which investment principal can be eroded due to changes in redemption amounts. Care is required when investing in such instruments.

When you purchase non-listed Japanese fixed income securities (Japanese government bonds, Japanese municipal bonds, Japanese government guaranteed bonds, Japanese corporate bonds) from CS as a seller, you will be requested to pay the purchase price only.

### RESULTS

## At a glance: Waneta Waterflows

- **Earnings at a glance:** Fortis reported Q1 2015 headline EPS of C\$0.72 and an adjusted C\$0.65. The adjusted compares to our C\$0.65 and the Street's C\$0.61 estimate (range of C\$0.57-C\$0.65). Positively, Fortis is focused on a "period of significant organic growth" tilting the bias away from acquisitions. The capex program until 2019 is projected to have an asset base CAGR of roughly 6.5% excluding Tilbury 1B and Woodfibre. With those two additional projects, the rate base CAGR could rise to 7.5%. From our perspective, the results are rather "utility like" and unlikely to be market moving. There may be some disappointment given the lack of a final determination of actions for FTS Properties. We view that timing as minor and the focus should be on FX benefits, capex outlook and the M&A backburner. In our view, the Alberta exposure is not a major issue to the overall asset base. Given the long-cycle nature of many assets, we do not place undue emphasis on quarterly results.
- **Selected notable items:** Highlights include: (a) FTS provided a capital view of C\$2.2bn for 2015; (b) the 5-year capex outlook (2015 to 2019) is expected to approach C\$9bn; (c) the Fortis Properties process continues and FTS "expects to make an announcement regarding the outcome of the strategic review... ..in the second quarter"; and, (d) the Waneta Expansion came online six weeks ahead of schedule and on budget.
- **Conference call:** The FTS results call will be at 10:00 am (eastern). The call will be accessible via 1-877-223-4471 or at 647-788-4922.
- **Valuation:** Our target price of C\$44.00 is on an implied yield of 3.09% and a yield spread of roughly 59 bps on a 2.50% Canadian 10-year. We maintain our Outperform rating.

18-Nov-14	38.17	44.00	O

\* Asterisk signifies initiation or assumption of coverage.

The analyst(s) responsible for preparing this research report received Compensation that is based upon various factors including Credit Suisse's total revenues, a portion of which are generated by Credit Suisse's investment banking activities

**As of December 10, 2012 Analysts' stock rating are defined as follows:**

**Outperform (O)** : The stock's total return is expected to outperform the relevant benchmark\* over the next 12 months.

**Neutral (N)** : The stock's total return is expected to be in line with the relevant benchmark\* over the next 12 months.

**Underperform (U)** : The stock's total return is expected to underperform the relevant benchmark\* over the next 12 months.

*\*Relevant benchmark by region: As of 10th December 2012, Japanese ratings are based on a stock's total return relative to the analyst's coverage universe which consists of all companies covered by the analyst within the relevant sector, with Outperforms representing the most attractive, Neutrals the less attractive, and Underperforms the least attractive investment opportunities. As of 2nd October 2012, U.S. and Canadian as well as European ratings are based on a stock's total return relative to the analyst's coverage universe which consists of all companies covered by the analyst within the relevant sector, with Outperforms representing the most attractive, Neutrals the less attractive, and Underperforms the least attractive investment opportunities. For Latin American and non-Japan Asia stocks, ratings are based on a stock's total return relative to the average total return of the relevant country or regional benchmark; prior to 2nd October 2012 U.S. and Canadian ratings were based on (1) a stock's absolute total return potential to its current share price and (2) the relative attractiveness of a stock's total return potential within an analyst's coverage universe. For Australian and New Zealand stocks, 12-month rolling yield is incorporated in the absolute total return calculation and a 15% and a 7.5% threshold replace the 10-15% level in the Outperform and Underperform stock rating definitions, respectively. The 15% and 7.5% thresholds replace the +10-15% and -10-15% levels in the Neutral stock rating definition, respectively. Prior to 10th December 2012, Japanese ratings were based on a stock's total return relative to the average total return of the relevant country or regional benchmark.*

**Restricted (R)** : In certain circumstances, Credit Suisse policy and/or applicable law and regulations preclude certain types of communications, including an investment recommendation, during the course of Credit Suisse's engagement in an investment banking transaction and in certain other circumstances.

**Volatility Indicator [V]** : A stock is defined as volatile if the stock price has moved up or down by 20% or more in a month in at least 8 of the past 24 months or the analyst expects significant volatility going forward.

Analysts' sector weightings are distinct from analysts' stock ratings and are based on the analyst's expectations for the fundamentals and/or valuation of the sector\* relative to the group's historic fundamentals and/or valuation:

**Overweight** : The analyst's expectation for the sector's fundamentals and/or valuation is favorable over the next 12 months.

**Market Weight** : The analyst's expectation for the sector's fundamentals and/or valuation is neutral over the next 12 months.

**Underweight** : The analyst's expectation for the sector's fundamentals and/or valuation is cautious over the next 12 months.

*\*An analyst's coverage sector consists of all companies covered by the analyst within the relevant sector. An analyst may cover multiple sectors.*

Credit Suisse's distribution of stock ratings (and banking clients) is:

#### Global Ratings Distribution

Rating	Versus universe (%)	Of which banking clients (%)
Outperform/Buy*	43%	(53% banking clients)
Neutral/Hold*	38%	(50% banking clients)
Underperform/Sell*	16%	(43% banking clients)
Restricted	3%	

*\*For purposes of the NYSE and NASD ratings distribution disclosure requirements, our stock ratings of Outperform, Neutral, and Underperform most closely correspond to Buy, Hold, and Sell, respectively; however, the meanings are not the same, as our stock ratings are determined on a relative basis. (Please refer to definitions above.) An investor's decision to buy or sell a security should be based on investment objectives, current holdings, and other individual factors.*

Credit Suisse's policy is to update research reports as it deems appropriate, based on developments with the subject company, the sector or the market that may have a material impact on the research views or opinions stated herein.

#### Price Target: (12 months) for Fortis Inc. (FTS.TO)

**Method:** We obtain our C\$44.00 target price for Fortis Inc. by using multiple valuation methodologies, but primarily rely upon a targeted dividend yield of 3.09% and an imputed 59 bps spread over a 2.50% Canadian 10-year bond yield.

**Risk:** There are a number of risks to Fortis' achievement of our C\$44.00 target price: commodity prices; weather; environmental; regulatory; access to capital markets; and, interest rates. Moreover, one should never underestimate the power of the regulator in any regulated business.

Please refer to the firm's disclosure website at <https://rave.credit-suisse.com/disclosures> for the definitions of abbreviations typically used in the target price method and risk sections.

See the *Companies Mentioned* section for full company names

CS may not have taken any steps to ensure that the securities referred to in this report are suitable for any particular investor. CS will not treat recipients of this report as its customers by virtue of their receiving this report. The investments and services contained or referred to in this report may not be suitable for you and it is recommended that you consult an independent investment advisor if you are in doubt about such investments or investment services. Nothing in this report constitutes investment, legal, accounting or tax advice, or a representation that any investment or strategy is suitable or appropriate to your individual circumstances, or otherwise constitutes a personal recommendation to you. CS does not advise on the tax consequences of investments and you are advised to contact an independent tax adviser. Please note in particular that the bases and levels of taxation may change. Information and opinions presented in this report have been obtained or derived from sources believed by CS to be reliable, but CS makes no representation as to their accuracy or completeness. CS accepts no liability for loss arising from the use of the material presented in this report, except that this exclusion of liability does not apply to the extent that such liability arises under specific statutes or regulations applicable to CS. This report is not to be relied upon in substitution for the exercise of independent judgment. CS may have issued, and may in the future issue, other communications that are inconsistent with, and reach different conclusions from, the information presented in this report. Those communications reflect the different assumptions, views and analytical methods of the analysts who prepared them and CS is under no obligation to ensure that such other communications are brought to the attention of any recipient of this report. Some investments referred to in this report will be offered solely by a single entity and in the case of some investments solely by CS, or an associate of CS or CS may be the only market maker in such investments. Past performance should not be taken as an indication or guarantee of future performance, and no representation or warranty, express or implied, is made regarding future performance. Information, opinions and estimates contained in this report reflect a judgment at its original date of publication by CS and are subject to change without notice. The price, value of and income from any of the securities or financial instruments mentioned in this report can fall as well as rise. The value of securities and financial instruments is subject to exchange rate fluctuation that may have a positive or adverse effect on the price or income of such securities or financial instruments. Investors in securities such as ADRs, the values of which are influenced by currency volatility, effectively assume this risk. Structured securities are complex instruments, typically involve a high degree of risk and are intended for sale only to sophisticated investors who are capable of understanding and assuming the risks involved. The market value of any structured security may be affected by changes in economic, financial and political factors (including, but not limited to, spot and forward interest and exchange rates), time to maturity, market conditions and volatility, and the credit quality of any issuer or reference issuer. Any investor interested in purchasing a structured product should conduct their own investigation and analysis of the product and consult with their own professional advisers as to the risks involved in making such a purchase. Some investments discussed in this report may have a high level of volatility. High volatility investments may experience sudden and large falls in their value causing losses when that investment is realised. Those losses may equal your original investment. Indeed, in the case of some investments the potential losses may exceed the amount of initial investment and, in such circumstances, you may be required to pay more money to support those losses. Income yields from investments may fluctuate and, in consequence, initial capital paid to make the investment may be used as part of that income yield. Some investments may not be readily realisable and it may be difficult to sell or realise those investments, similarly it may prove difficult for you to obtain reliable information about the value, or risks, to which such an investment is exposed. This report may provide the addresses of, or contain hyperlinks to, websites. Except to the extent to which the report refers to website material of CS, CS has not reviewed any such site and takes no responsibility for the content contained therein. Road, Worli, Mumbai - 18, India, T. +91-22 6777 3777, Credit Suisse Securities (Europe) Limited, Seoul Branch, Credit Suisse AG, Taipei Securities Branch, PT Credit Suisse Securities Indonesia, Credit Suisse Securities (Philippines) Inc., and elsewhere in the world by the relevant authorised affiliate of the above. Research on Taiwanese securities produced by Credit Suisse AG, Taipei Securities Branch has been prepared by a registered Senior Business Person. Research provided to residents of Malaysia is authorised by the Head of Research for Credit Suisse Securities (Malaysia) Sdn Bhd, to whom they should direct any queries on +603 2723 2020. This report has been prepared and issued for distribution in Singapore to institutional investors, accredited investors and expert investors (each as defined under the Financial Advisers Regulations) only, and is also distributed by Credit Suisse AG, Singapore branch to overseas investors (as defined under the Financial Advisers Regulations). By virtue of your status as an institutional investor, accredited investor, expert investor or overseas investor, Credit Suisse AG, Singapore branch is exempted from complying with certain compliance requirements under the Financial Advisers Act, Chapter 110 of Singapore (the "FAA"), the Financial Advisers Regulations and the relevant Notices and Guidelines issued thereunder, in respect of any financial advisory service which Credit Suisse AG, Singapore branch may provide to you. This information is being distributed by Credit Suisse AG, Dubai Branch, duly licensed and regulated by the Dubai Financial Services Authority (DFSA), and is directed at Professional Clients or Market Counterparties only, as defined by the DFSA. The financial products or financial services to which the information relates will only be made available to a client who meets the regulatory criteria to be a Professional Client or Market Counterparty only, as defined by the DFSA, and is not intended for any other person. This research may not conform to Canadian disclosure requirements. In jurisdictions where CS is not already registered or licensed to trade in securities, transactions will only be effected in accordance with applicable securities legislation, which will vary from jurisdiction to jurisdiction and may require that the trade be made in accordance with applicable exemptions from registration or licensing requirements. Non-U.S. customers wishing to effect a transaction should contact a CS entity in their local jurisdiction unless governing law permits otherwise. U.S. customers wishing to effect a transaction should do so only by contacting a representative at Credit Suisse Securities (USA) LLC in the U.S. Please note that this research was originally prepared and issued by CS for distribution to their market professional and institutional investor customers. Recipients who are not market professional or institutional investor customers of CS should seek the advice of their independent financial advisor prior to taking any investment decision based on this report or for any necessary explanation of its contents. This research may relate to investments or services of a person outside of the UK or to other matters which are not authorised by the Prudential Regulation Authority and regulated by the Financial Conduct Authority and the Prudential Regulation Authority or in respect of which the protections of the Prudential Regulation Authority and Financial Conduct Authority for private customers and/or the UK compensation scheme may not be available, and further details as to where this may be the case are available upon request in respect of this report. CS may provide various services to US municipal entities or obligated persons ("municipalities"), including suggesting individual transactions or trades and entering into such transactions. Any services CS provides to municipalities are not viewed as "advice" within the meaning of Section 975 of the Dodd-Frank Wall Street Reform and Consumer Protection Act. CS is providing any such services and related information solely on an arm's length basis and not as an advisor or fiduciary to the municipality. In connection with the provision of the any such services, there is no agreement, direct or indirect, between any municipality (including the officials, management, employees or agents thereof) and CS for CS to provide advice to the municipality. Municipalities should consult with their financial, accounting and legal advisors regarding any such services provided by CS. In addition, CS is not acting for direct or indirect compensation to solicit the municipality on behalf of an unaffiliated broker, dealer, municipal securities dealer, municipal advisor, or investment adviser for the purpose of obtaining or retaining an engagement by the municipality for or in connection with Municipal Financial Products, the issuance of municipal securities, or of an investment adviser to provide investment advisory services to or on behalf of the municipality. If this report is being distributed by a financial institution other than Credit Suisse AG, or its affiliates, that financial institution is solely responsible for distribution. Clients of that institution should contact that institution to effect a transaction in the securities mentioned in this report or require further information. This report does not constitute investment advice by Credit Suisse to the clients of the distributing financial institution, and neither Credit Suisse AG, its affiliates, and their respective officers, directors and employees accept any liability whatsoever for any direct or consequential loss arising from their use of this report or its content. Principal is not guaranteed. Commission is the commission rate or the amount agreed with a customer when setting up an account or at any time after that.

Copyright © 2015 CREDIT SUISSE AG and/or its affiliates. All rights reserved.

Investment principal on bonds can be eroded depending on sale price or market price. In addition, there are bonds on which investment principal can be eroded due to changes in redemption amounts. Care is required when investing in such instruments.

When you purchase non-listed Japanese fixed income securities (Japanese government bonds, Japanese municipal bonds, Japanese government guaranteed bonds, Japanese corporate bonds) from CS as a seller, you will be requested to pay the purchase price only.

## RESULTS

## At a glance: Corporate clean-up complete

- **Earnings at a glance:** Fortis reported Q2 2015 headline EPS of C\$0.88 and an adjusted C\$0.44. The adjusted compares to our C\$0.41 and the Street's C\$0.44 estimate (range of C\$0.41-C\$0.48). The capex program until 2019 is projected to an asset base CAGR of roughly 6.5% excluding Tilbury 1B and Woodfibre. With those two additional projects, a rate base CAGR could rise to 7.5%. FTS sold real estate assets along with non-regulated generation in Ontario and NY to generate an after-tax gain of C\$123m. The proceeds will be used to pay down a UNS acquisition related credit facility. After the FTS corporate clean-up, we believe a period of time exists to enhance the capital program prior to re-focusing on potential M&A. Yet, M&A that tends to have a US focus looks a bit more challenging at the current foreign exchange rate. Given the long-cycle nature of many assets, we do not place undue emphasis on quarterly results.
- **Selected notable items:** Highlights include: (a) FTS provided a capital view of C\$2.2bn for 2015; (b) the 5-year capex outlook (2015 to 2019) is expected to exceed C\$9bn; (c) expected gross proceeds from sale of commercial properties and non-regulated hydro to be C\$888m; and, (d) construction on Tilbury 1A is ongoing at a capital budget of C\$440m and expected in service at the end of 2016.
- **Conference call:** The FTS results call will be at 10:00 am (eastern). The call will be accessible via 1-877-223-4471 or at 647-788-4922.
- **Valuation:** Our target price of C\$44.00 is on an implied yield of 3.09% and a yield spread of roughly 59 bps on a 2.50% Canadian 10-year. We maintain our Outperform rating.

**DISCLOSURE APPENDIX AT THE BACK OF THIS REPORT CONTAINS IMPORTANT DISCLOSURES, ANALYST CERTIFICATIONS, AND THE STATUS OF NON-US ANALYSTS.** US Disclosure: Credit Suisse does and seeks to do business with companies covered in its research reports. As a result, investors should be aware that the Firm may have a conflict of interest that could affect the objectivity of this report. Investors should consider this report as only a single factor in making their investment decision.

**Companies Mentioned** (Price as of 30-Jul-2015)

Fortis Inc. (FTS.TO, C\$36.03, OUTPERFORM, TP C\$44.0)

## Disclosure Appendix

**Important Global Disclosures**

I, Andrew M. Kuske, certify that (1) the views expressed in this report accurately reflect my personal views about all of the subject companies and securities and (2) no part of my compensation was, is or will be directly or indirectly related to the specific recommendations or views expressed in this report.

**3-Year Price and Rating History for Fortis Inc. (FTS.TO)**

FTS.TO	Closing Price	Target Price	
Date	(C\$)	(C\$)	Rating
31-Jul-12	33.54	38.00	O
18-Oct-13	32.01	36.00	
28-Jan-14	29.99	32.00	N
18-Nov-14	38.17	44.00	O

\* Asterisk signifies initiation or assumption of coverage.

The analyst(s) responsible for preparing this research report received Compensation that is based upon various factors including Credit Suisse's total revenues, a portion of which are generated by Credit Suisse's investment banking activities

**As of December 10, 2012 Analysts' stock rating are defined as follows:**

**Outperform (O)** : The stock's total return is expected to outperform the relevant benchmark\* over the next 12 months.

**Neutral (N)** : The stock's total return is expected to be in line with the relevant benchmark\* over the next 12 months.

**Underperform (U)** : The stock's total return is expected to underperform the relevant benchmark\* over the next 12 months.

*\*Relevant benchmark by region: As of 10th December 2012, Japanese ratings are based on a stock's total return relative to the analyst's coverage universe which consists of all companies covered by the analyst within the relevant sector, with Outperforms representing the most attractive, Neutrals the less attractive, and Underperforms the least attractive investment opportunities. As of 2nd October 2012, U.S. and Canadian as well as European ratings are based on a stock's total return relative to the analyst's coverage universe which consists of all companies covered by the analyst within the relevant sector, with Outperforms representing the most attractive, Neutrals the less attractive, and Underperforms the least attractive investment opportunities. For Latin American and non-Japan Asia stocks, ratings are based on a stock's total return relative to the average total return of the relevant country or regional benchmark; prior to 2nd October 2012 U.S. and Canadian ratings were based on (1) a stock's absolute total return potential to its current share price and (2) the relative attractiveness of a stock's total return potential within an analyst's coverage universe. For Australian and New Zealand stocks, the expected total return (ETR) calculation includes 12-month rolling dividend yield. An Outperform rating is assigned where an ETR is greater than or equal to 7.5%; Underperform where an ETR less than or equal to 5%. A Neutral may be assigned where the ETR is between -5% and 15%. The overlapping rating range allows analysts to assign a rating that puts ETR in the context of associated risks. Prior to 18 May 2015, ETR ranges for Outperform and Underperform ratings did not overlap with Neutral thresholds between 15% and 7.5%, which was in operation from 7 July 2011.*

**Restricted (R)** : In certain circumstances, Credit Suisse policy and/or applicable law and regulations preclude certain types of communications, including an investment recommendation, during the course of Credit Suisse's engagement in an investment banking transaction and in certain other circumstances.

**Volatility Indicator [V]** : A stock is defined as volatile if the stock price has moved up or down by 20% or more in a month in at least 8 of the past 24 months or the analyst expects significant volatility going forward.

Analysts' sector weightings are distinct from analysts' stock ratings and are based on the analyst's expectations for the fundamentals and/or valuation of the sector\* relative to the group's historic fundamentals and/or valuation:

**Overweight** : The analyst's expectation for the sector's fundamentals and/or valuation is favorable over the next 12 months.

**Market Weight** : The analyst's expectation for the sector's fundamentals and/or valuation is neutral over the next 12 months.

**Underweight** : The analyst's expectation for the sector's fundamentals and/or valuation is cautious over the next 12 months.

*\*An analyst's coverage sector consists of all companies covered by the analyst within the relevant sector. An analyst may cover multiple sectors.*

Credit Suisse's distribution of stock ratings (and banking clients) is:

### Global Ratings Distribution

Rating	Versus universe (%)	Of which banking clients (%)
Outperform/Buy*	50%	(28% banking clients)
Neutral/Hold*	34%	(41% banking clients)
Underperform/Sell*	13%	(38% banking clients)
Restricted	3%	

*\*For purposes of the NYSE and NASD ratings distribution disclosure requirements, our stock ratings of Outperform, Neutral, and Underperform most closely correspond to Buy, Hold, and Sell, respectively; however, the meanings are not the same, as our stock ratings are determined on a relative basis. (Please refer to definitions above.) An investor's decision to buy or sell a security should be based on investment objectives, current holdings, and other individual factors.*

Credit Suisse's policy is to update research reports as it deems appropriate, based on developments with the subject company, the sector or the market that may have a material impact on the research views or opinions stated herein.

Credit Suisse's policy is only to publish investment research that is impartial, independent, clear, fair and not misleading. ### Price Target: (12 months) for Fortis Inc. (FTS.TO)

**Method:** We obtain our C\$44.00 target price for Fortis Inc. by using multiple valuation methodologies, but primarily rely upon a targeted dividend yield of 3.09% and an imputed 59 bps spread over a 2.50% Canadian 10-year bond yield.

**Risk:** There are a number of risks to Fortis' achievement of our C\$44.00 target price: commodity prices; weather; environmental; regulatory; access to capital markets; and, interest rates. Moreover, one should never underestimate the power of the regulator in any regulated business.

Please refer to the firm's disclosure website at <https://rave.credit-suisse.com/disclosures> for the definitions of abbreviations typically used in the target price method and risk sections.

See the *Companies Mentioned* section for full company names

The subject company (FTS.TO) currently is, or was during the 12-month period preceding the date of distribution of this report, a client of Credit Suisse.

Credit Suisse provided non-investment banking services to the subject company (FTS.TO) within the past 12 months

Credit Suisse expects to receive or intends to seek investment banking related compensation from the subject company (FTS.TO) within the next 3 months.

Credit Suisse has received compensation for products and services other than investment banking services from the subject company (FTS.TO) within the past 12 months

CS may not have taken any steps to ensure that the securities referred to in this report are suitable for any particular investor. CS will not treat recipients of this report as its customers by virtue of their receiving this report. The investments and services contained or referred to in this report may not be suitable for you and it is recommended that you consult an independent investment advisor if you are in doubt about such investments or investment services. Nothing in this report constitutes investment, legal, accounting or tax advice, or a representation that any investment or strategy is suitable or appropriate to your individual circumstances, or otherwise constitutes a personal recommendation to you. CS does not advise on the tax consequences of investments and you are advised to contact an independent tax adviser. Please note in particular that the bases and levels of taxation may change. Information and opinions presented in this report have been obtained or derived from sources believed by CS to be reliable, but CS makes no representation as to their accuracy or completeness. CS accepts no liability for loss arising from the use of the material presented in this report, except that this exclusion of liability does not apply to the extent that such liability arises under specific statutes or regulations applicable to CS. This report is not to be relied upon in substitution for the exercise of independent judgment. CS may have issued, and may in the future issue, other communications that are inconsistent with, and reach different conclusions from, the information presented in this report. Those communications reflect the different assumptions, views and analytical methods of the analysts who prepared them and CS is under no obligation to ensure that such other communications are brought to the attention of any recipient of this report. Some investments referred to in this report will be offered solely by a single entity and in the case of some investments solely by CS, or an associate of CS or CS may be the only market maker in such investments. Past performance should not be taken as an indication or guarantee of future performance, and no representation or warranty, express or implied, is made regarding future performance. Information, opinions and estimates contained in this report reflect a judgment at its original date of publication by CS and are subject to change without notice. The price, value of and income from any of the securities or financial instruments mentioned in this report can fall as well as rise. The value of securities and financial instruments is subject to exchange rate fluctuation that may have a positive or adverse effect on the price or income of such securities or financial instruments. Investors in securities such as ADRs, the values of which are influenced by currency volatility, effectively assume this risk. Structured securities are complex instruments, typically involve a high degree of risk and are intended for sale only to sophisticated investors who are capable of understanding and assuming the risks involved. The market value of any structured security may be affected by changes in economic, financial and political factors (including, but not limited to, spot and forward interest and exchange rates), time to maturity, market conditions and volatility, and the credit quality of any issuer or reference issuer. Any investor interested in purchasing a structured product should conduct their own investigation and analysis of the product and consult with their own professional advisers as to the risks involved in making such a purchase. Some investments discussed in this report may have a high level of volatility. High volatility investments may experience sudden and large falls in their value causing losses when that investment is realised. Those losses may equal your original investment. Indeed, in the case of some investments the potential losses may exceed the amount of initial investment and, in such circumstances, you may be required to pay more money to support those losses. Income yields from investments may fluctuate and, in consequence, initial capital paid to make the investment may be used as part of that income yield. Some investments may not be readily realisable and it may be difficult to sell or realise those investments, similarly it may prove difficult for you to obtain reliable information about the value, or risks, to which such an investment is exposed. This report may provide the addresses of, or contain hyperlinks to, websites. Except to the extent to which the report refers to website material of CS, CS has not reviewed any such site and takes no responsibility for the content contained therein. This report has been prepared and issued for distribution in Singapore to institutional investors, accredited investors and expert investors (each as defined under the Financial Advisers Regulations) only, and is also distributed by Credit Suisse AG, Singapore branch to overseas investors (as defined under the Financial Advisers Regulations). By virtue of your status as an institutional investor, accredited investor, expert investor or overseas investor, Credit Suisse AG, Singapore branch is exempted from complying with certain compliance requirements under the Financial Advisers Act, Chapter 110 of Singapore (the "FAA"), the Financial Advisers Regulations and the relevant Notices and Guidelines issued thereunder, in respect of any financial advisory service which Credit Suisse AG, Singapore branch may provide to you. This information is being distributed by Credit Suisse AG, Dubai Branch, duly licensed and regulated by the Dubai Financial Services Authority (DFSA), and is directed at Professional Clients or Market Counterparties only, as defined by the DFSA. The financial products or financial services to which the information relates will only be made available to a client who meets the regulatory criteria to be a Professional Client or Market Counterparty only, as defined by the DFSA, and is not intended for any other person. This research may not conform to Canadian disclosure requirements. In jurisdictions where CS is not already registered or licensed to trade in securities, transactions will only be effected in accordance with applicable securities legislation, which will vary from jurisdiction to jurisdiction and may require that the trade be made in accordance with applicable exemptions from registration or licensing requirements. Non-U.S. customers wishing to effect a transaction should contact a CS entity in their local jurisdiction unless governing law permits otherwise. U.S. customers wishing to effect a transaction should do so only by contacting a representative at Credit Suisse Securities (USA) LLC in the U.S. Please note that this research was originally prepared and issued by CS for distribution to their market professional and institutional investor customers. Recipients who are not market professional or institutional investor customers of CS should seek the advice of their independent financial advisor prior to taking any investment decision based on this report or for any necessary explanation of its contents. This research may relate to investments or services of a person outside of the UK or to other matters which are not authorised by the Prudential Regulation Authority and regulated by the Financial Conduct Authority and the Prudential Regulation Authority or in respect of which the protections of the Prudential Regulation Authority and Financial Conduct Authority for private customers and/or the UK compensation scheme may not be available, and further details as to where this may be the case are available upon request in respect of this report. CS may provide various services to US municipal entities or obligated persons ("municipalities"), including suggesting individual transactions or trades and entering into such transactions. Any services CS provides to municipalities are not viewed as "advice" within the meaning of Section 975 of the Dodd-Frank Wall Street Reform and Consumer Protection Act. CS is providing any such services and related information solely on an arm's length basis and not as an advisor or fiduciary to the municipality. In connection with the provision of the any such services, there is no agreement, direct or indirect, between any municipality (including the officials, management, employees or agents thereof) and CS for CS to provide advice to the municipality. Municipalities should consult with their financial, accounting and legal advisors regarding any such services provided by CS. In addition, CS is not acting for direct or indirect compensation to solicit the municipality on behalf of an unaffiliated broker, dealer, municipal securities dealer, municipal advisor, or investment adviser for the purpose of obtaining or retaining an engagement by the municipality for or in connection with Municipal Financial Products, the issuance of municipal securities, or of an investment adviser to provide investment advisory services to or on behalf of the municipality. If this report is being distributed by a financial institution other than Credit Suisse AG, or its affiliates, that financial institution is solely responsible for distribution. Clients of that institution should contact that institution to effect a transaction in the securities mentioned in this report or require further information. This report does not constitute investment advice by Credit Suisse to the clients of the distributing financial institution, and neither Credit Suisse AG, its affiliates, and their respective officers, directors and employees accept any liability whatsoever for any direct or consequential loss arising from their use of this report or its content. Principal is not guaranteed. Commission is the commission rate or the amount agreed with a customer when setting up an account or at any time after that.

Copyright © 2015 CREDIT SUISSE AG and/or its affiliates. All rights reserved.

Investment principal on bonds can be eroded depending on sale price or market price. In addition, there are bonds on which investment principal can be eroded due to changes in redemption amounts. Care is required when investing in such instruments.

When you purchase non-listed Japanese fixed income securities (Japanese government bonds, Japanese municipal bonds, Japanese government guaranteed bonds, Japanese corporate bonds) from CS as a seller, you will be requested to pay the purchase price only.

# Fortis

## Return roulette

### Event

- We are forecasting reductions in allowed returns between 2010 and 2012. Cost of capital filings have now been made in Alberta and British Columbia.

### Impact

- It is too early to judge the outcome of allowed return proceedings but we remain cautious on potential outcomes because credit spreads – a key driver of higher allowed returns on 2009/10 – have narrowed.
- In Alberta, a generic hearing has commenced in earnest with round 1 evidence filings this winter (hearing in May). In 2009, The AUC boosted FTS Alberta's allowed return from 8.51% ROE on 37% equity to 9.0% ROE on 41% equity.
- In BC, the regulator directed Terasen Gas (the FTS gas utility) to study alternative ROE formulae and report back. On 8 December, FTS recommended that the regulator not adopt a formula return nor re-examine cost of capital at this time. That is not totally surprising since the BCUC had boosted the company's allowed return from 8.47% ROE on 35% equity to 9.5% ROE on 40% equity.
- We believe that any potential reductions in allowed returns on Alberta and BC will be based on perceived changes in the cost of risk and corporate credit spreads between mid-2009 and now.
- The Alberta regulator's decision specifically cited uncertainty over whether credit spreads would normalize as a rationale for boosting allowed returns for the 2009 and 2010 periods. Since those spreads have indeed normalized, at least one rationale for having boosted returns is gone.
- The BC regulator's decision relied primarily on DCF-based cost of equity tests on US utilities whose stocks were depressed during the credit crisis. Re-doing those tests today would likely result in lower required returns on equity.

### Earnings and target price revision

- We are maintaining our estimates as we have already reduced them (on 5 November 2010) to factor our forecast reductions in allowed returns.

### Price catalyst

- 12-month price target: C\$31.00 based on an EV/EBITDA methodology.
- Catalyst: Regulatory decisions and growth project announcements

### Action and recommendation

- FTS management continues navigating well in its regulatory landscape, in our view. However, a reduction in allowed returns may be inescapable. At the same time, the stock has one of the lowest free cash yields in our coverage universe (6.2% on 2012). Therefore, we recommend reducing holdings at these levels.

## Analyst Certification:

The views expressed in this research accurately reflect the personal views of the analyst(s) about the subject securities or issuers and no part of the compensation of the analyst(s) was, is, or will be directly or indirectly related to the inclusion of specific recommendations or views in this research. The analyst principally responsible for the preparation of this research receives compensation based on overall revenues of Macquarie Group Ltd ABN 94 122 169 279 (AFSL No. 318062) (MGL) and its related entities (the Macquarie Group) and has taken reasonable care to achieve and maintain independence and objectivity in making any recommendations.

## General Disclaimers:

Macquarie Securities (Australia) Ltd; Macquarie Capital (Europe) Ltd; Macquarie Capital Markets Canada Ltd; Macquarie Capital Markets North America Ltd; Macquarie Capital (USA) Inc; Macquarie Capital Securities Ltd and its Taiwan branch; Macquarie Capital Securities (Singapore) Pte Ltd; Macquarie Securities (NZ) Ltd; Macquarie First South Securities (Pty) Limited; Macquarie Capital Securities (India) Pvt Ltd; Macquarie Capital Securities (Malaysia) Sdn Bhd; Macquarie Securities Korea Limited and Macquarie Securities (Thailand) Ltd are not authorized deposit-taking institutions for the purposes of the Banking Act 1959 (Commonwealth of Australia), and their obligations do not represent deposits or other liabilities of Macquarie Bank Limited ABN 46 008 583 542 (MBL) or MGL. MBL does not guarantee or otherwise provide assurance in respect of the obligations of any of the above mentioned entities. MGL provides a guarantee to the Monetary Authority of Singapore in respect of the obligations and liabilities of Macquarie Capital Securities (Singapore) Pte Ltd for up to SGD 35 million. This research has been prepared for the general use of the wholesale clients of the Macquarie Group and must not be copied, either in whole or in part, or distributed to any other person. If you are not the intended recipient you must not use or disclose the information in this research in any way. If you received it in error, please tell us immediately by return e-mail and delete the document. We do not guarantee the integrity of any e-mails or attached files and are not responsible for any changes made to them by any other person. MGL has established and implemented a conflicts policy at group level (which may be revised and updated from time to time) (the "Conflicts Policy") pursuant to regulatory requirements (including the FSA Rules) which sets out how we must seek to identify and manage all material conflicts of interest. Nothing in this research shall be construed as a solicitation to buy or sell any security or product, or to engage in or refrain from engaging in any transaction. In preparing this research, we did not take into account your investment objectives, financial situation or particular needs. Before making an investment decision on the basis of this research, you need to consider, with or without the assistance of an adviser, whether the advice is appropriate in light of your particular investment needs, objectives and financial circumstances. There are risks involved in securities trading. The price of securities can and does fluctuate, and an individual security may even become valueless. International investors are reminded of the additional risks inherent in international investments, such as currency fluctuations and international stock market or economic conditions, which may adversely affect the value of the investment. This research is based on information obtained from sources believed to be reliable but we do not make any representation or warranty that it is accurate, complete or up to date. We accept no obligation to correct or update the information or opinions in it. Opinions expressed are subject to change without notice. No member of the Macquarie Group accepts any liability whatsoever for any direct, indirect, consequential or other loss arising from any use of this research and/or further communication in relation to this research. Clients should contact analysts at, and execute transactions through, a Macquarie Group entity in their home jurisdiction unless governing law permits otherwise.

# Fortis

## Reliable but expensive

### Event

- FTS reported 4Q10 EPS of \$0.49 vs our estimate of \$0.48 and \$0.48 in 4Q09.

### Impact

- The earnings report may be slightly negative for the stock in that earnings came in below consensus (\$0.51) and the stock trades at a premium. Relative to our expectations, there were no real surprises though. The Canadian regulated assets are performing as they should as FTS usually manages to earn slightly above their allowed returns due to an efficient operating model. On the other hand, sales and earnings in the Caribbean continue to lag.
- Following the 4Q report, our view is unchanged. We believe that, given potential headwinds on allowed returns, there is insufficient growth in earnings and dividends to justify the share valuation premium.
- So far, ROE headwinds have cropped up only in Newfoundland. A hearing is underway in Alberta, though. Whether there will be any review in BC is still up in the air, so we only assume a 50 basis point reduction starting in 2012.
- In this context, FTS may need a recovery in Belize Electricity earnings to get EPS growth back up above 5%. With only \$1.5m in reported net income there last year, we believe the company has not been treated fairly. There may be \$0.05 upside to our estimates if the Belize courts and government implement a regulatory policy that is fair and balanced to customers and the company (court decision 1H11).
- The company's capital program continues marching on and up with about \$1.2bn of expenditure slated for 2011. Cashflow has strengthened and the DRIP take-up is strong (\$80m common shares issued through DRIP last year). Therefore, we are not building any equity issuance into our model over and above the DRIP.
- With that type of organic growth – most of which entails investing in safe Canadian regulated utilities at 1.0x BV – one wonders why FTS continues seeking acquisitions that would undoubtedly be done at a premium to BV.

### Earnings and target price revision

- We are maintaining our EPS estimates and introducing a 2013 estimate of \$1.80. Our target price is unchanged.

### Price catalyst

- 12-month price target: C\$31.00 based on an EV/EBITDA methodology.
- Catalyst: Regulatory decisions and growth project announcements.

### Action and recommendation

- We view FTS as a solid company. But given the growth profile (one of the slower dividend growers among its direct peers now) and premium valuation, we believe the shares will underperform on a relative basis in 2011.

**Fortis Inc. (FTS CN, Underperform, Target price: C\$31.00)**

## Upside surprise may not sustain

### Event

- FTS reported 1Q11 EPS of \$0.67 vs our estimate of \$0.61 and \$0.58 in 1Q10.

### Impact

- The earnings report could be positive for the stock in the near term, but we caution that upside surprises may not sustain. In particular, achieved returns on the fast-growing Alberta utility may compress over the next two years.
- FTS Alberta and all other Alberta electric utilities have experienced accelerated growth recently. Asset expansion is likely sustainable as oil production activity drives asset expansion and extension. Nevertheless, we remain concerned that achieved returns on that growing asset base are unsustainable.
- We have highlighted a risk that the Alberta regulator will reduce allowed returns in the current cost of capital proceeding. Though returns for comparable companies are not lower than the allowed return for FTS Alberta, risk-free rates and credit spreads have both come in since the last hearing on this issue.
- Regulators rarely grant consumer groups (or the companies) everything they are asking for but we note the consumer advocate has proposed an allowed return that could reduce EPS by about \$0.10 relative to reported results.
- Outside of the Canadian regulated utility growth, there is not a lot to get excited about in the earnings report. Other businesses such as Caribbean, generation and properties lack growth at this time (though we acknowledge management has wisely avoided significant capital investment in the Caribbean lately).
- Business development costs are down \$2m YoY in the quarter, which may just mean the company is looking at smaller deals than last year but we believe FTS remains active in seeking acquisition targets.

### Earnings and target price revision

- Despite the variance to our forecast in 1Q, we are maintaining our estimates and target price. We expect regulated utility earnings growth will decelerate through the year due to timing issues and a potential reduction in the Alberta allowed ROE.

### Price catalyst

- 12-month price target: C\$31.00 based on an EV/EBITDA methodology.
- Catalyst: Regulatory decisions and growth project announcements.

### Action and recommendation

- FTS management continues to achieve the best possible results from its utility assets. But given the risk of compression in ROEs combined with the company's relatively low free cash yield (7.5% vs group at 9.0%), and dividend yield, we believe the stock will continue to underperform in 2011.

## Company Specific Disclosures:

Macquarie Capital Markets North America Ltd., which is a registered broker-dealer and member of FINRA, accepts responsibility for the contents of reports issued by Macquarie Capital Markets Canada Ltd in the United States and sent to US persons. Any person wishing to effect transactions in the securities described in the reports issued by Macquarie Capital Markets Canada Ltd should do so with Macquarie Capital Markets North America Ltd. The Research Distribution Policy of Macquarie Capital Markets Canada Ltd is to allow all clients that are entitled to have equal access to our research. Important disclosure information regarding the subject companies covered in this report is available at [www.macquarie.com/disclosures](http://www.macquarie.com/disclosures).

## Analyst Certification:

The views expressed in this research accurately reflect the personal views of the analyst(s) about the subject securities or issuers and no part of the compensation of the analyst(s) was, is, or will be directly or indirectly related to the inclusion of specific recommendations or views in this research. The analyst principally responsible for the preparation of this research receives compensation based on overall revenues of Macquarie Group Ltd ABN 94 122 169 279 (AFSL No. 318062) (MGL) and its related entities (the Macquarie Group) and has taken reasonable care to achieve and maintain independence and objectivity in making any recommendations.

## General Disclaimers:

Macquarie Securities (Australia) Ltd; Macquarie Capital (Europe) Ltd; Macquarie Capital Markets Canada Ltd; Macquarie Capital Markets North America Ltd; Macquarie Capital (USA) Inc; Macquarie Capital Securities Ltd and its Taiwan branch; Macquarie Capital Securities (Singapore) Pte Ltd; Macquarie Securities (NZ) Ltd; Macquarie First South Securities (Pty) Limited; Macquarie Capital Securities (India) Pvt Ltd; Macquarie Capital Securities (Malaysia) Sdn Bhd; Macquarie Securities Korea Limited and Macquarie Securities (Thailand) Ltd are not authorized deposit-taking institutions for the purposes of the Banking Act 1959 (Commonwealth of Australia), and their obligations do not represent deposits or other liabilities of Macquarie Bank Limited ABN 46 008 583 542 (MBL) or MGL. MBL does not guarantee or otherwise provide assurance in respect of the obligations of any of the above mentioned entities. MGL provides a guarantee to the Monetary Authority of Singapore in respect of the obligations and liabilities of Macquarie Capital Securities (Singapore) Pte Ltd for up to SGD 35 million. This research has been prepared for the general use of the wholesale clients of the Macquarie Group and must not be copied, either in whole or in part, or distributed to any other person. If you are not the intended recipient you must not use or disclose the information in this research in any way. If you received it in error, please tell us immediately by return e-mail and delete the document. We do not guarantee the integrity of any e-mails or attached files and are not responsible for any changes made to them by any other person. MGL has established and implemented a conflicts policy at group level (which may be revised and updated from time to time) (the "Conflicts Policy") pursuant to regulatory requirements (including the FSA Rules) which sets out how we must seek to identify and manage all material conflicts of interest. Nothing in this research shall be construed as a solicitation to buy or sell any security or product, or to engage in or refrain from engaging in any transaction. In preparing this research, we did not take into account your investment objectives, financial situation or particular needs. Before making an investment decision on the basis of this research, you need to consider, with or without the assistance of an adviser, whether the advice is appropriate in light of your particular investment needs, objectives and financial circumstances. There are risks involved in securities trading. The price of securities can and does fluctuate, and an individual security may even become valueless. International investors are reminded of the additional risks inherent in international investments, such as currency fluctuations and international stock market or economic conditions, which may adversely affect the value of the investment. This research is based on information obtained from sources believed to be reliable but we do not make any representation or warranty that it is accurate, complete or up to date. We accept no obligation to correct or update the information or opinions in it. Opinions expressed are subject to change without notice. No member of the Macquarie Group accepts any liability whatsoever for any direct, indirect, consequential or other loss arising from any use of this research and/or further communication in relation to this research. Clients should contact analysts at, and execute transactions through, a Macquarie Group entity in their home jurisdiction unless governing law permits otherwise.

## Country-Specific Disclaimers:

**Australia:** In Australia, research is issued and distributed by Macquarie Securities (Australia) Ltd (AFSL No. 238947), a participating organisation of the Australian Securities Exchange. **New Zealand:** In New Zealand, research is issued and distributed by Macquarie Securities (NZ) Ltd, a NZX Firm. **Canada:** In Canada, research is prepared, approved and distributed by Macquarie Capital Markets Canada Ltd, a participating organisation of the Toronto Stock Exchange, TSX Venture Exchange & Montréal Exchange. ### Analyst's Perspective 03 Jan 2012

Fortis' predominant regulated revenue mix provides investors a stable earnings profile and support for the stock's consistent dividend growth. Significant capital expenditures will drive near-term earnings growth and set a base for future free cash flow generation. The company's Canadian regulated utilities operate in constructive regulatory jurisdictions, but with slightly lower allowed returns on equity than its U.S. counterparts. In addition to organic growth, company management has indicated a desire to expand in the U.S. We would view this positively given the similar regulatory structures, and it could be value-accretive given where Fortis' stock traded at year-end 2011 and the typically more favorable allowed returns in the U.S. We forecast normalized earnings can grow at 5% annually through 2015. At a 3.5% dividend yield and trading at 18 times our 2012 earnings forecast, we think Fortis is overvalued.

### Key Investment Considerations

- Fortis generates more than 90% of its profit from its regulated utility segment, providing a stable earnings base.
- Across all of its utilities, regulators allow Fortis a 9.5% weighted-average return on equity, which is about 100 basis points lower than regulators allow U.S. utilities on average.
- We think the stock is overvalued as of year-end 2011, with Fortis trading at 18 times our 2012 earnings estimate.

### Profile

Fortis primarily owns and operates utility transmission and distribution assets in Canada. It has smaller stakes in electricity generation, several Caribbean utilities, and Canadian hotel and commercial real estate. The firm's regulated natural gas operations serve 950,000 customers in British Columbia. Its regulated electric utility operations serve 1.1 million customers throughout Canada and in Grand Cayman and Turks and Caicos. Its Canadian operations accounted for 92% of its total assets as of 2010.

## Morningstar Analysis

Fortis' low-risk operations result in stable earnings and support its consistent dividend growth the last four decades.

### Thesis 03 Jan 2012

Fortis manages electric and gas regulated utilities in Canada and the Caribbean, resulting in stable operating results. The company's noncore generation and real estate holding operations account for 12% of operating earnings. While we are less excited by the distractions of these noncore operations, we are comforted that management continues to focus on electric and natural gas distribution in North America.

Fortis' main regulated Canadian operations reside in British Columbia, Alberta, and Newfoundland. These relatively low-risk operations result in stable earnings and fund the consistent dividend growth experienced the past four decades. Rate base additions should be significant through 2015, as the company plans to invest CAD 4.8 billion as the healthier Canadian economy drives usage and customer growth. This should allow the firm to increase its rate base at double-digit rates each year during this expansion period. On a weighted-average basis, Fortis' allowed returns on equity in its Canadian service territories are 9.25% after a series of rate increases in 2010. While this return is lower than that typically granted to comparable U.S. utilities, it does not seem unreasonable given the low-risk nature of Fortis' transmission and delivery operations.

The company also operates small utility operations in Belize and the Caribbean. While the allowed returns can be significantly higher than its Canadian operations, these operations also have a much higher risk profile than its Canadian operations. In the summer of 2011, the Government of Belize expropriated Fortis' 70% ownership in Belize Electricity Limited, resulting in an unknown recoverable asset representing 2% of Fortis' assets. While small in nature, the earnings of these operations are exposed to additional risks of economic instability, tenuous regulation, and weather events. Management has indicated it has little interest to expand operations in the Caribbean, which we see as a positive.

We are less enthusiastic about the firm's small presence in the cyclical hotel and commercial real estate industry. However, these holdings are held solely for tax strategy purposes and would likely be spun off should Canadian tax policy change. Currently, the Canadian government disallows entity tax consolidation, and the real estate asset revenues offset holding company expenses, mostly interest. While we believe the strategy behind these assets is sound, we worry they may distract management and drag on growth.

Fortis has expressed interest in expanding its operations through U.S. acquisitions and was outbid in June 2011 for the regulated Central Vermont Public Service Corporation. Strategically, we are encouraged by the similarity of regulatory jurisdictions and operations in the U.S. However, we were concerned by Fortis' relatively steep offer, but we like that management had the discipline to walk away when the price got too rich.

Given the high barriers to entry and regulated nature of Fortis' main operations, we award the company a narrow economic moat. The firm's exposure to noncore areas and foreign markets, though small, leads us to assign it a medium fair value uncertainty rating. We would consider lowering our uncertainty rating if Fortis were to divest the noncore assets.

### Valuation, Growth and Profitability 03 Jan 2012

We are reinitiating coverage of Fortis under a new analyst with a CAD 29 fair value estimate, taking into consideration planned rate base additions through 2015. After the significant share dilution that occurred during 2011, we forecast 5% earnings growth in 2012 adjusting for lower dilution and normalized weather conditions. Beyond 2013, we assume 1.5% annual energy use growth at the Canadian utilities and consistent allowed returns on equity. Based on management's guidance, we forecast total investments of

# Fortis, Inc. FTS (TSE) ★★

**Price/Fair Value** Morningstar data as of Jan 01 0001

CAD 4.6 billion at the utilities through 2015, leading to annualized rate base growth of 6%. We use a 10.0% cost of equity and a 7.5% weighted average cost of capital in our discounted cash flow model.

## Scenario Analysis

The most significant near-term driver of our earnings forecast is our annualized energy growth rate at the regulated utilities. If energy growth is 50 bps lower than our 2013 estimate, our earnings per share would fall by 2% and our fair value estimate would decrease by CAD 2. We expect similar changes in earnings per share and fair value if energy growth is 50 bps higher.

Allowed returns at the Canadian utilities are also a significant driver of our valuation estimates. If we assume a 100 bps decrease in allowed returns on equity in 2012 and beyond, our fair value estimate decreases to CAD 21. Better-than-expected allowed returns on equity drive similar upside results. Finally, a 50 bps change in our cost of equity assumption changes our fair value estimate by about CAD 3 per share.

## Economic Moat

Fortis owns a difficult-to-replicate network of regulated power generation, transmission, and distribution assets and provides an essential energy source: electricity. In exchange for its monopoly position, regulators set Fortis' returns at levels that aim to keep customer costs low while providing adequate returns for capital providers. This implicit contract between regulators and the utility should, in the long run, allow Fortis to earn its cost of capital, and leads us to assign Fortis' regulated utilities a narrow economic moat. As with all regulated utilities, we think regulatory caps on revenue and returns preclude Fortis from establishing a wide economic moat.

## Moat Trend

We assign Fortis a stable moat due to its monopoly position and stable regulatory environment that will continue to allow the firm to earn its cost of capital. We do not expect the regulatory relationship to change in the future. The regulatory framework that caps revenue and returns prevent the firm from attaining a wide moat, as with all regulated utilities that we cover.

### Bulls Say/Bears Say

#### Bulls Say

- ▶ The company operates a stable business profile, offering a strong base for consistent earnings.
- ▶ With an aggressive capital expenditure plan, rate base growth is forecast to grow at a 6% compound annual growth rate.
- ▶ Fortis has consistent dividend growth history, paying consecutive quarterly dividends for four decades and growing the dividend faster than most of its peers in recent years.
- ▶ Fortis operations are based in higher-growth regions within Canada, mainly in Alberta and British Columbia.

#### Bears Say

- ▶ The Canadian regulatory environment offers lower allowed returns than its U.S. peers.
- ▶ The recent Belize expropriation demonstrates how Caribbean operations offer higher growth opportunities but at a substantially higher risk.
- ▶ The company operates noncore hotel and commercial real estate assets, potentially distracting management from core regulated operations.

### Financial Health

With a debt/capital ratio of just under 60% and interest coverage of 2.1 times, Fortis' financial health looks reasonably sound, particularly in light of its stable, low-risk business model. Fortis undertook a significant equity offering of 9 million shares resulting in CAD 300 million of proceeds. We expect the company to be active in the capital markets consistent with its current capital structure throughout its capital expenditure plan.

### Capital Structure

Between 2011 and 2015, Fortis has CAD 5.5 billion of planned capital expenditures, which will require the company to access the debt and equity capital markets. We anticipate that Fortis will issue CAD 200 million in debt in 2012 and has manageable debt maturities through 2015. The company recently issued significant equity in July 2011 to help finance its capital expenditure plan, and we expect Fortis to issue minimal additional equity in 2012 to accommodate employee stock purchase plans and an executive DRIP plan.

### Enterprise Risk

Fortis' key risk to future earnings is regulation. The company faces regulatory risks that create uncertainties around costs and allowed returns, especially given the significant capital expenditure plan from 2011 to 2015. Fortis is also exposed to political and economic instability at its Caribbean operations. With an eye towards acquisitions, the company risks overpaying for regulated U.S. assets and must be mindful of the strategic benefits. As with all regulated utilities, Fortis faces the risk of an inflationary environment that would raise borrowing costs and make other investments more attractive for income-seeking investors.

### Stewardship: NA03 Jan 2012

Stanley Marshall has been president and CEO since 1995, leading a group of experienced utility executives. Total direct compensation was \$4.0 million for 2010, which we believe is in line with Fortis' industry group. Marshall's total compensation comprises base salary, annual incentives, stock options, and performance stock units, with 75% of total compensation at risk. We do not like that annual cash incentives are based on earnings per share targets, as EPS can be manipulated and may not be an indication of shareholder value creation. Marshall also has a significant ownership stake of 14 times his salary, which we believe aligns shareholder and management interests. From a corporate governance perspective, we like that the CEO and chairman positions are separated. While the board of directors has vast experience, we would prefer that members of the board have more direct utility experience.

# Research Methodology for Valuing Companies

## Components of Our Methodology

- ▶ Economic Moat™ Rating
- ▶ Moat Trend™ Rating
- ▶ Moat Valuation
- ▶ Three-Stage Discounted Cash Flow
- ▶ Weighted Average Cost of Capital
- ▶ Fair Value Estimate
- ▶ Scenario Analysis
- ▶ Uncertainty Ratings
- ▶ Margin of Safety
- ▶ Consider Buying/Selling
- ▶ Stewardship Grades
- ▶ Financial Health Grades

The Morningstar Rating for stocks identifies companies trading at a discount or premium to our analysts' assessment of their fair value. A number of components drive this rating: (1) our assessment of the firm's economic moat, (2) our estimate of the stock's intrinsic value based on a discounted cash-flow model, (3) the margin of safety bands we apply to our Fair Value Estimate, and (4) the current stock price relative to our fair value estimate.

The concept of the Morningstar Economic Moat™ Rating plays a vital role not only in our qualitative assessment of a firm's investment potential, but also in our valuation process. We assign three moat ratings—none, narrow, or wide—as well as the Morningstar Moat Trend™ Rating—positive, stable, or negative—to each company we cover. There are two major requirements for firms to earn either a narrow or wide moat rating: (1) the prospect of earning above-average returns on capital; and (2) some competitive edge that prevents these returns from quickly eroding. The assumptions we make about a firm's moat determine the length of “economic outperformance” that we assume in the latter stages

of our valuation model. We also quantify the value of each firm's moat, which represents the difference between a firm's enterprise value and the value of the firm if no future net investment were to occur. Said differently, moat value identifies the value generated by the firm as a result of any future net new investment. Our Moat Trend Rating reflects our assessment of whether each firm's competitive advantage is either getting stronger or weaker, since we think of moats as dynamic, rather than static.

At the heart of our valuation system is a detailed projection of a company's future cash flows. The first stage of our three-stage discounted cash flow model can last from 5 to 10 years and contains numerous detailed assumptions about various financial and operating items. The second stage of our model—where a firm's return on new invested capital (RONIC) and earnings growth rate implicitly fade until the perpetuity year—can last anywhere from 0 years (for no-moat firms) to 20 years (for wide-moat companies). In our third stage, we assume the firm's RONIC equals its weighted average cost of capital, and we calculate a continuing value using a standard

\* Please contact a sales representative for more information.

perpetuity formula. In deciding on the rate at which to discount future cash flows, we ignore stock-price volatility. Instead, we rely on a system that measures the estimated volatility of a firm's underlying future free cash flows, taking into account fundamental factors such as the diversity of revenue sources and the firm's fixed cost structure.

We also employ a number of other tools to augment our valuation process, including scenario analysis, where we assess the likelihood and performance of a business under different economic and firm-specific conditions. Our analysts typically model three to five scenarios for each company we cover, stress-testing the model and examining the distribution of resulting fair values.

The Morningstar Uncertainty Rating captures the range of these potential fair values, based on an assessment of a company's future sales range, the firm's operating and financial leverage, and any other contingent events that may impact the business. Our analysts use this range to assign an appropriate margin of safety—or the discount/premium

to a fair value we apply in setting our consider buying/consider selling prices. Firms trading below our consider-buying prices receive our highest rating of five stars, whereas firms trading above our consider-selling prices receive our lowest rating of one star.

Our Stewardship Grades show our assessment of a management's commitment to shareholders, and include an analysis of a firm's transparency, incentives and ownership. We also provide Financial Health Grades, which are quantitative measures based on firms' distance to default scores. Distance to default measures the distance between the market value of a company's assets and the book value of its liabilities (expressed in standard deviations of asset value). For our grades, A is equivalent to "Excellent," while F is "Very Poor."

### Morningstar Margin of Safety and Star Rating Bands

\* Occasionally a stock's uncertainty will be too high for us to estimate, in which case we label it Extreme.

# Morningstar's Approach to Rating Corporate Credit

- Offers a proprietary measure of the credit quality of companies on our coverage list.
- Encapsulates our in-depth modeling and quantitative work in one letter grade.
- Allows investors to rank companies by each of the four underlying components of our credit ratings, including both analyst-driven and quantitative measures.
- Provides access to all the underlying forecasts that go into the rating, available through our institutional service.

## Purpose

The Morningstar Corporate Credit Rating measures the ability of a firm to satisfy its debt and debt-like obligations. The higher the rating, the less likely we think the company is to default on these obligations.

The Morningstar Corporate Credit Rating builds on the modeling expertise of our securities research team. For each company, we publish:

- Five years of detailed pro-forma financial statements
- Annual estimates of free cash flow
- Annual forecasts of return on invested capital
- Scenario analyses, including upside and downside cases
- Forecasts of leverage, coverage, and liquidity ratios for five years
- Estimates of off balance sheet liabilities

These forecasts are key inputs into the Morningstar Corporate Credit Rating and are available to subscribers at [select.morningstar.com](http://select.morningstar.com).

## Methodology

We feel it's important to perform credit analysis through different lenses—qualitative and quantitative, as well as fundamental and market-driven. We therefore evaluate each company in four broad categories.

### Business Risk

Business Risk captures the fundamental uncertainty around a firm's business operations and the cash flow generated by those operations. Key components of the Business Risk rating include the Morningstar Economic Moat™ Rating and the Morningstar Uncertainty Rating.

### Cash Flow Cushion™

Morningstar's proprietary Cash Flow Cushion™ ratio is a fundamental indicator of a firm's future financial health. The measure reveals how many times a company's internal cash generation plus total excess liquid cash will cover its debt-like contractual commitments over the next five years. The Cash Flow Cushion acts as a predictor of financial distress, bringing to light potential refinancing, operational, and liquidity risks inherent to the firm.

## Morningstar Research Methodology for Determining Corporate Credit Ratings

## Morningstar's Approach to Rating Corporate Credit

The advantage of the Cash Flow Cushion ratio relative to other fundamental indicators of credit health is that the measure focuses on the future cash-generating performance of the firm derived from Morningstar's proprietary discounted cash flow model. By making standardized adjustments for certain expenses to reflect their debt-like characteristics, we can compare future projected free cash flows with debt-like cash commitments coming due in any particular year. The forward-looking nature of this metric allows us to anticipate changes in a firm's financial health and pinpoint periods where cash shortfalls are likely to occur.

### *Morningstar Solvency Score™*

The Morningstar Solvency Score™ is a quantitative score derived from both historical and forecasted financial ratios. It includes ratios that focus on liquidity (a company's ability to meet short term cash outflows), profitability (a company's ability to generate profit per unit of input), capital structure (how does the company finance its operations), and interest coverage (how much of profit is used up by interest payments).

### *Distance to Default*

The Distance to Default rating is a quantitative, market-based measure of a company's current financial health. (Distance to Default serves as the basis for Morningstar's Financial Health Grade.) The underlying model treats the equity of a firm as a call option on that firm's assets. Based on estimates of asset volatility and the Black-Scholes option-pricing model, we can estimate the likelihood that the value of the company's assets falls below the value of its liabilities, implying likely default.

For each of these four categories, we assign a score, which we then translate into a descriptive rating along the scale of Very Good / Good / Fair / Poor / Very Poor.

### **Overall Credit Rating**

The four component ratings roll up into a single preliminary credit rating. To determine the final credit rating, a credit committee of at least five senior research personnel reviews each preliminary rating.

We review credit ratings on a regular basis and as events warrant. Any change in rating must be approved by the Credit Rating Committee.

### **Investor Access**

Morningstar Corporate Credit Ratings are available on Morningstar.com. Our credit research, including detailed cash-flow models that contain all of the components of the Morningstar Corporate Credit Rating, is available to subscribers at [select.morningstar.com](http://select.morningstar.com).

### Analyst's Perspective 03 Jan 2012

Fortis' predominant regulated revenue mix provides investors a stable earnings profile and support for the stock's consistent dividend growth. Significant capital expenditures will drive near-term earnings growth and set a base for future free cash flow generation. The company's Canadian regulated utilities operate in constructive regulatory jurisdictions, but with slightly lower allowed returns on equity than its U.S. counterparts. In addition to organic growth, company management has indicated a desire to expand in the U.S. We would view this positively given the similar regulatory structures, and it could be value-accretive given where Fortis' stock traded at year-end 2011 and the typically more favorable allowed returns in the U.S. We forecast normalized earnings can grow at 5% annually through 2015. At a 3.5% dividend yield and trading at 18 times our 2012 earnings forecast, we think Fortis is overvalued.

### Key Investment Considerations

- Fortis generates more than 90% of its profit from its regulated utility segment, providing a stable earnings base.
- Across all of its utilities, regulators allow Fortis a 9.5% weighted-average return on equity, which is about 100 basis points lower than regulators allow U.S. utilities on average.
- We think the stock is overvalued as of year-end 2011, with Fortis trading at 18 times our 2012 earnings estimate.

### Profile

Fortis primarily owns and operates utility transmission and distribution assets in Canada. It has smaller stakes in electricity generation, several Caribbean utilities, and Canadian hotel and commercial real estate. The firm's regulated natural gas operations serve 950,000 customers in British Columbia. Its regulated electric utility operations serve 1.1 million customers throughout Canada and in Grand Cayman and Turks and Caicos. Its Canadian operations accounted for 92% of its total assets as of 2010.

## Morningstar Analysis

Fortis' low-risk operations result in stable earnings and support its consistent dividend growth the last four decades.

### Thesis 03 Jan 2012

Fortis manages electric and gas regulated utilities in Canada and the Caribbean, resulting in stable operating results. The company's noncore generation and real estate holding operations account for 12% of operating earnings. While we are less excited by the distractions of these noncore operations, we are comforted that management continues to focus on electric and natural gas distribution in North America.

Fortis' main regulated Canadian operations reside in British Columbia, Alberta, and Newfoundland. These relatively low-risk operations result in stable earnings and fund the consistent dividend growth experienced the past four decades. Rate base additions should be significant through 2015, as the company plans to invest CAD 4.8 billion as the healthier Canadian economy drives usage and customer growth. This should allow the firm to increase its rate base at double-digit rates each year during this expansion period. On a weighted-average basis, Fortis' allowed returns on equity in its Canadian service territories are 9.25% after a series of rate increases in 2010. While this return is lower than that typically granted to comparable U.S. utilities, it does not seem unreasonable given the low-risk nature of Fortis' transmission and delivery operations.

The company also operates small utility operations in Belize and the Caribbean. While the allowed returns can be significantly higher than its Canadian operations, these operations also have a much higher risk profile than its Canadian operations. In the summer of 2011, the Government of Belize expropriated Fortis' 70% ownership in Belize Electricity Limited, resulting in an unknown recoverable asset representing 2% of Fortis' assets. While small in nature, the earnings of these operations are exposed to additional risks of economic instability, tenuous regulation, and weather events. Management has indicated it has little interest to expand operations in the Caribbean, which we see as a positive.

We are less enthusiastic about the firm's small presence in the cyclical hotel and commercial real estate industry. However, these holdings are held solely for tax strategy purposes and would likely be spun off should Canadian tax policy change. Currently, the Canadian government disallows entity tax consolidation, and the real estate asset revenues offset holding company expenses, mostly interest. While we believe the strategy behind these assets is sound, we worry they may distract management and drag on growth.

Fortis has expressed interest in expanding its operations through U.S. acquisitions and was outbid in June 2011 for the regulated Central Vermont Public Service Corporation. Strategically, we are encouraged by the similarity of regulatory jurisdictions and operations in the U.S. However, we were concerned by Fortis' relatively steep offer, but we like that management had the discipline to walk away when the price got too rich.

Given the high barriers to entry and regulated nature of Fortis' main operations, we award the company a narrow economic moat. The firm's exposure to noncore areas and foreign markets, though small, leads us to assign it a medium fair value uncertainty rating. We would consider lowering our uncertainty rating if Fortis were to divest the noncore assets.

### Valuation, Growth and Profitability 03 Jan 2012

We are reinitiating coverage of Fortis under a new analyst with a CAD 29 fair value estimate, taking into consideration planned rate base additions through 2015. After the significant share dilution that occurred during 2011, we forecast 5% earnings growth in 2012 adjusting for lower dilution and normalized weather conditions. Beyond 2013, we assume 1.5% annual energy use growth at the Canadian utilities and consistent allowed returns on equity. Based on management's guidance, we forecast total investments of

# Fortis, Inc. FTS (TSE) ★★

**Price/Fair Value** Morningstar data as of Jan 03 2012

CAD 4.6 billion at the utilities through 2015, leading to annualized rate base growth of 6%. We use a 10.0% cost of equity and a 7.5% weighted average cost of capital in our discounted cash flow model.

## Scenario Analysis

The most significant near-term driver of our earnings forecast is our annualized energy growth rate at the regulated utilities. If energy growth is 50 bps lower than our 2013 estimate, our earnings per share would fall by 2% and our fair value estimate would decrease by CAD 2. We expect similar changes in earnings per share and fair value if energy growth is 50 bps higher.

Allowed returns at the Canadian utilities are also a significant driver of our valuation estimates. If we assume a 100 bps decrease in allowed returns on equity in 2012 and beyond, our fair value estimate decreases to CAD 21. Better-than-expected allowed returns on equity drive similar upside results. Finally, a 50 bps change in our cost of equity assumption changes our fair value estimate by about CAD 3 per share.

## Economic Moat

Fortis owns a difficult-to-replicate network of regulated power generation, transmission, and distribution assets and provides an essential energy source: electricity. In exchange for its monopoly position, regulators set Fortis' returns at levels that aim to keep customer costs low while providing adequate returns for capital providers. This implicit contract between regulators and the utility should, in the long run, allow Fortis to earn its cost of capital, and leads us to assign Fortis' regulated utilities a narrow economic moat. As with all regulated utilities, we think regulatory caps on revenue and returns preclude Fortis from establishing a wide economic moat.

## Moat Trend

We assign Fortis a stable moat due to its monopoly position and stable regulatory environment that will continue to allow the firm to earn its cost of capital. We do not expect the regulatory relationship to change in the future. The regulatory framework that caps revenue and returns prevent the firm from attaining a wide moat, as with all regulated utilities that we cover.

## Bulls Say/Bears Say

### Bulls Say

- ▶ The company operates a stable business profile, offering a strong base for consistent earnings.
- ▶ With an aggressive capital expenditure plan, rate base growth is forecast to grow at a 6% compound annual growth rate.
- ▶ Fortis has consistent dividend growth history, paying consecutive quarterly dividends for four decades and growing the dividend faster than most of its peers in recent years.
- ▶ Fortis operations are based in higher-growth regions within Canada, mainly in Alberta and British Columbia.

### Bears Say

- ▶ The Canadian regulatory environment offers lower allowed returns than its U.S. peers.
- ▶ The recent Belize expropriation demonstrates how Caribbean operations offer higher growth opportunities but at a substantially higher risk.
- ▶ The company operates noncore hotel and commercial real estate assets, potentially distracting management from core regulated operations.

### Financial Health

With a debt/capital ratio of just under 60% and interest coverage of 2.1 times, Fortis' financial health looks reasonably sound, particularly in light of its stable, low-risk business model. Fortis undertook a significant equity offering of 9 million shares resulting in CAD 300 million of proceeds. We expect the company to be active in the capital markets consistent with its current capital structure throughout its capital expenditure plan.

### Capital Structure

Between 2011 and 2015, Fortis has CAD 5.5 billion of planned capital expenditures, which will require the company to access the debt and equity capital markets. We anticipate that Fortis will issue CAD 200 million in debt in 2012 and has manageable debt maturities through 2015. The company recently issued significant equity in July 2011 to help finance its capital expenditure plan, and we expect Fortis to issue minimal additional equity in 2012 to accommodate employee stock purchase plans and an executive DRIP plan.

### Enterprise Risk

Fortis' key risk to future earnings is regulation. The company faces regulatory risks that create uncertainties around costs and allowed returns, especially given the significant capital expenditure plan from 2011 to 2015. Fortis is also exposed to political and economic instability at its Caribbean operations. With an eye towards acquisitions, the company risks overpaying for regulated U.S. assets and must be mindful of the strategic benefits. As with all regulated utilities, Fortis faces the risk of an inflationary environment that would raise borrowing costs and make other investments more attractive for income-seeking investors.

### Stewardship: NA03 Jan 2012

Stanley Marshall has been president and CEO since 1995, leading a group of experienced utility executives. Total direct compensation was \$4.0 million for 2010, which we believe is in line with Fortis' industry group. Marshall's total compensation comprises base salary, annual incentives, stock options, and performance stock units, with 75% of total compensation at risk. We do not like that annual cash incentives are based on earnings per share targets, as EPS can be manipulated and may not be an indication of shareholder value creation. Marshall also has a significant ownership stake of 14 times his salary, which we believe aligns shareholder and management interests. From a corporate governance perspective, we like that the CEO and chairman positions are separated. While the board of directors has vast experience, we would prefer that members of the board have more direct utility experience.

# Research Methodology for Valuing Companies

## Components of Our Methodology

- ▶ Economic Moat™ Rating
- ▶ Moat Trend™ Rating
- ▶ Moat Valuation
- ▶ Three-Stage Discounted Cash Flow
- ▶ Weighted Average Cost of Capital
- ▶ Fair Value Estimate
- ▶ Scenario Analysis
- ▶ Uncertainty Ratings
- ▶ Margin of Safety
- ▶ Consider Buying/Selling
- ▶ Stewardship Grades
- ▶ Financial Health Grades

The Morningstar Rating for stocks identifies companies trading at a discount or premium to our analysts' assessment of their fair value. A number of components drive this rating: (1) our assessment of the firm's economic moat, (2) our estimate of the stock's intrinsic value based on a discounted cash-flow model, (3) the margin of safety bands we apply to our Fair Value Estimate, and (4) the current stock price relative to our fair value estimate.

The concept of the Morningstar Economic Moat™ Rating plays a vital role not only in our qualitative assessment of a firm's investment potential, but also in our valuation process. We assign three moat ratings—none, narrow, or wide—as well as the Morningstar Moat Trend™ Rating—positive, stable, or negative—to each company we cover. There are two major requirements for firms to earn either a narrow or wide moat rating: (1) the prospect of earning above-average returns on capital; and (2) some competitive edge that prevents these returns from quickly eroding. The assumptions we make about a firm's moat determine the length of “economic outperformance” that we assume in the latter stages

of our valuation model. We also quantify the value of each firm's moat, which represents the difference between a firm's enterprise value and the value of the firm if no future net investment were to occur. Said differently, moat value identifies the value generated by the firm as a result of any future net new investment. Our Moat Trend Rating reflects our assessment of whether each firm's competitive advantage is either getting stronger or weaker, since we think of moats as dynamic, rather than static.

At the heart of our valuation system is a detailed projection of a company's future cash flows. The first stage of our three-stage discounted cash flow model can last from 5 to 10 years and contains numerous detailed assumptions about various financial and operating items. The second stage of our model—where a firm's return on new invested capital (RONIC) and earnings growth rate implicitly fade until the perpetuity year—can last anywhere from 0 years (for no-moat firms) to 20 years (for wide-moat companies). In our third stage, we assume the firm's RONIC equals its weighted average cost of capital, and we calculate a continuing value using a standard

## Morningstar Research Methodology for Valuing Companies

\* Please contact a sales representative for more information.

perpetuity formula. In deciding on the rate at which to discount future cash flows, we ignore stock-price volatility. Instead, we rely on a system that measures the estimated volatility of a firm's underlying future free cash flows, taking into account fundamental factors such as the diversity of revenue sources and the firm's fixed cost structure.

We also employ a number of other tools to augment our valuation process, including scenario analysis, where we assess the likelihood and performance of a business under different economic and firm-specific conditions. Our analysts typically model three to five scenarios for each company we cover, stress-testing the model and examining the distribution of resulting fair values.

The Morningstar Uncertainty Rating captures the range of these potential fair values, based on an assessment of a company's future sales range, the firm's operating and financial leverage, and any other contingent events that may impact the business. Our analysts use this range to assign an appropriate margin of safety—or the discount/premium

to a fair value we apply in setting our consider buying/consider selling prices. Firms trading below our consider-buying prices receive our highest rating of five stars, whereas firms trading above our consider-selling prices receive our lowest rating of one star.

Our Stewardship Grades show our assessment of a management's commitment to shareholders, and include an analysis of a firm's transparency, incentives and ownership. We also provide Financial Health Grades, which are quantitative measures based on firms' distance to default scores. Distance to default measures the distance between the market value of a company's assets and the book value of its liabilities (expressed in standard deviations of asset value). For our grades, A is equivalent to "Excellent," while F is "Very Poor."

### Morningstar Margin of Safety and Star Rating Bands

\* Occasionally a stock's uncertainty will be too high for us to estimate, in which case we label it Extreme.

# Morningstar's Approach to Rating Corporate Credit

- Offers a proprietary measure of the credit quality of companies on our coverage list.
- Encapsulates our in-depth modeling and quantitative work in one letter grade.
- Allows investors to rank companies by each of the four underlying components of our credit ratings, including both analyst-driven and quantitative measures.
- Provides access to all the underlying forecasts that go into the rating, available through our institutional service.

## Purpose

The Morningstar Corporate Credit Rating measures the ability of a firm to satisfy its debt and debt-like obligations. The higher the rating, the less likely we think the company is to default on these obligations.

The Morningstar Corporate Credit Rating builds on the modeling expertise of our securities research team. For each company, we publish:

- Five years of detailed pro-forma financial statements
- Annual estimates of free cash flow
- Annual forecasts of return on invested capital
- Scenario analyses, including upside and downside cases
- Forecasts of leverage, coverage, and liquidity ratios for five years
- Estimates of off balance sheet liabilities

These forecasts are key inputs into the Morningstar Corporate Credit Rating and are available to subscribers at [select.morningstar.com](http://select.morningstar.com).

## Methodology

We feel it's important to perform credit analysis through different lenses—qualitative and quantitative, as well as fundamental and market-driven. We therefore evaluate each company in four broad categories.

### Business Risk

Business Risk captures the fundamental uncertainty around a firm's business operations and the cash flow generated by those operations. Key components of the Business Risk rating include the Morningstar Economic Moat™ Rating and the Morningstar Uncertainty Rating.

### Cash Flow Cushion™

Morningstar's proprietary Cash Flow Cushion™ ratio is a fundamental indicator of a firm's future financial health. The measure reveals how many times a company's internal cash generation plus total excess liquid cash will cover its debt-like contractual commitments over the next five years. The Cash Flow Cushion acts as a predictor of financial distress, bringing to light potential refinancing, operational, and liquidity risks inherent to the firm.

## Morningstar Research Methodology for Determining Corporate Credit Ratings

## Morningstar's Approach to Rating Corporate Credit

The advantage of the Cash Flow Cushion ratio relative to other fundamental indicators of credit health is that the measure focuses on the future cash-generating performance of the firm derived from Morningstar's proprietary discounted cash flow model. By making standardized adjustments for certain expenses to reflect their debt-like characteristics, we can compare future projected free cash flows with debt-like cash commitments coming due in any particular year. The forward-looking nature of this metric allows us to anticipate changes in a firm's financial health and pinpoint periods where cash shortfalls are likely to occur.

### *Morningstar Solvency Score™*

The Morningstar Solvency Score™ is a quantitative score derived from both historical and forecasted financial ratios. It includes ratios that focus on liquidity (a company's ability to meet short term cash outflows), profitability (a company's ability to generate profit per unit of input), capital structure (how does the company finance its operations), and interest coverage (how much of profit is used up by interest payments).

### *Distance to Default*

The Distance to Default rating is a quantitative, market-based measure of a company's current financial health. (Distance to Default serves as the basis for Morningstar's Financial Health Grade.) The underlying model treats the equity of a firm as a call option on that firm's assets. Based on estimates of asset volatility and the Black-Scholes option-pricing model, we can estimate the likelihood that the value of the company's assets falls below the value of its liabilities, implying likely default.

For each of these four categories, we assign a score, which we then translate into a descriptive rating along the scale of Very Good / Good / Fair / Poor / Very Poor.

### **Overall Credit Rating**

The four component ratings roll up into a single preliminary credit rating. To determine the final credit rating, a credit committee of at least five senior research personnel reviews each preliminary rating.

We review credit ratings on a regular basis and as events warrant. Any change in rating must be approved by the Credit Rating Committee.

### **Investor Access**

Morningstar Corporate Credit Ratings are available on Morningstar.com. Our credit research, including detailed cash-flow models that contain all of the components of the Morningstar Corporate Credit Rating, is available to subscribers at [select.morningstar.com](http://select.morningstar.com).

### Analyst's Perspective 03 Jan 2012

Fortis' predominant regulated revenue mix provides investors a stable earnings profile and support for the stock's consistent dividend growth. Significant capital expenditures will drive near-term earnings growth and set a base for future free cash flow generation. The company's Canadian regulated utilities operate in constructive regulatory jurisdictions, but with slightly lower allowed returns on equity than its U.S. counterparts. In addition to organic growth, company management has indicated a desire to expand in the U.S. We would view this positively given the similar regulatory structures, and it could be value-accretive given where Fortis' stock traded at year-end 2011 and the typically more favorable allowed returns in the U.S. We forecast normalized earnings can grow at 5% annually through 2015. At a 3.5% dividend yield and trading at 18 times our 2012 earnings forecast, we think Fortis is overvalued.

### Key Investment Considerations

- Fortis generates more than 90% of its profit from its regulated utility segment, providing a stable earnings base.
- Across all of its utilities, regulators allow Fortis a 9.5% weighted-average return on equity, which is about 100 basis points lower than regulators allow U.S. utilities on average.
- We think the stock is overvalued as of year-end 2011, with Fortis trading at 18 times our 2012 earnings estimate.

### Profile

Fortis primarily owns and operates utility transmission and distribution assets in Canada. It has smaller stakes in electricity generation, several Caribbean utilities, and Canadian hotel and commercial real estate. The firm's regulated natural gas operations serve 950,000 customers in British Columbia. Its regulated electric utility operations serve 1.1 million customers throughout Canada and in Grand Cayman and Turks and Caicos. Its Canadian operations accounted for 92% of its total assets as of 2010.

## Morningstar Analysis

Fortis' low-risk operations result in stable earnings and support its consistent dividend growth the last four decades.

### Strong Customer Growth Generates Impressive 2011 Results at Fortis. 09 Feb 2012

Fortis Inc. FTS posted \$1.75 in EPS in 2011, higher than our own \$1.71 estimate and a 6% increase from 2010. Strong customer growth and higher energy deliveries at its regulated Canadian utilities drove results. We are reaffirming our fair value estimate and forecast 5% EPS growth through 2016 as \$5.5 billion in planned capital expenditures should drive earnings expansion. Fortis increased dividends 3.5% in mid-December to \$1.20, an implied 66% payout ratio, with a current yield of 3.5%. At our fair value estimate, Fortis would yield 4%.

In 2012, significant regulatory rulings at the company's Newfound Power and FortisBC subsidiaries could significantly impact future operating results. With the Alberta Utilities Commission ruling in December 2011, allowed returns at Fortis Alberta were decreased 25 basis points to just 8.75%. Similar cuts could be seen at the firm's other regulated Canadian operating companies, putting pressure on earnings growth. Management provided no EPS guidance for 2012.

### Thesis 03 Jan 2012

Fortis manages electric and gas regulated utilities in Canada and the Caribbean, resulting in stable operating results. The company's noncore generation and real estate holding operations account for 12% of operating earnings. While we are less excited by the distractions of these noncore operations, we are comforted that management continues to focus on electric and natural gas distribution in North America.

Fortis' main regulated Canadian operations reside in British Columbia, Alberta, and Newfoundland. These relatively low-risk operations result in stable earnings and fund the consistent dividend growth experienced the past four decades. Rate base additions should be significant through 2015, as the company plans to invest CAD 4.8 billion as the

healthier Canadian economy drives usage and customer growth. This should allow the firm to increase its rate base at double-digit rates each year during this expansion period. On a weighted-average basis, Fortis' allowed returns on equity in its Canadian service territories are 9.25% after a series of rate increases in 2010. While this return is lower than that typically granted to comparable U.S. utilities, it does not seem unreasonable given the low-risk nature of Fortis' transmission and delivery operations.

The company also operates small utility operations in Belize and the Caribbean. While the allowed returns can be significantly higher than its Canadian operations, these operations also have a much higher risk profile than its Canadian operations. In the summer of 2011, the Government of Belize expropriated Fortis' 70% ownership in Belize Electricity Limited, resulting in an unknown recoverable asset representing 2% of Fortis' assets. While small in nature, the earnings of these operations are exposed to additional risks of economic instability, tenuous regulation, and weather events. Management has indicated it has little interest to expand operations in the Caribbean, which we see as a positive.

We are less enthusiastic about the firm's small presence in the cyclical hotel and commercial real estate industry. However, these holdings are held solely for tax strategy purposes and would likely be spun off should Canadian tax policy change. Currently, the Canadian government disallows entity tax consolidation, and the real estate asset revenues offset holding company expenses, mostly interest. While we believe the strategy behind these assets is sound, we worry they may distract management and drag on growth.

Fortis has expressed interest in expanding its operations through U.S. acquisitions and was outbid in June 2011 for the regulated Central Vermont Public Service Corporation. Strategically, we are encouraged by the similarity of

**Price/Fair Value** Morningstar data as of Feb 08 2012

regulatory jurisdictions and operations in the U.S. However, we were concerned by Fortis' relatively steep offer, but we like that management had the discipline to walk away when the price got too rich.

Given the high barriers to entry and regulated nature of Fortis' main operations, we award the company a narrow economic moat. The firm's exposure to noncore areas and foreign markets, though small, leads us to assign it a medium fair value uncertainty rating. We would consider lowering our uncertainty rating if Fortis were to divest the noncore assets.

## Valuation, Growth and Profitability 03 Jan 2012

We are reinitiating coverage of Fortis under a new analyst with a CAD 29 fair value estimate, taking into consideration planned rate base additions through 2015. After the significant share dilution that occurred during 2011, we forecast 5% earnings growth in 2012 adjusting for lower dilution and normalized weather conditions. Beyond 2013, we assume 1.5% annual energy use growth at the Canadian utilities and consistent allowed returns on equity. Based on management's guidance, we forecast total investments of

CAD 4.6 billion at the utilities through 2015, leading to annualized rate base growth of 6%. We use a 10.0% cost of equity and a 7.5% weighted average cost of capital in our discounted cash flow model.

## Scenario Analysis

The most significant near-term driver of our earnings forecast is our annualized energy growth rate at the regulated utilities. If energy growth is 50 bps lower than our 2013 estimate, our earnings per share would fall by 2% and our fair value estimate would decrease by CAD 2. We expect similar changes in earnings per share and fair value if energy growth is 50 bps higher.

Allowed returns at the Canadian utilities are also a significant driver of our valuation estimates. If we assume a 100 bps decrease in allowed returns on equity in 2012 and beyond, our fair value estimate decreases to CAD 21. Better-than-expected allowed returns on equity drive similar upside results. Finally, a 50 bps change in our cost of equity assumption changes our fair value estimate by about CAD 3 per share.

## Economic Moat

Fortis owns a difficult-to-replicate network of regulated power generation, transmission, and distribution assets and provides an essential energy source: electricity. In exchange for its monopoly position, regulators set Fortis' returns at levels that aim to keep customer costs low while providing adequate returns for capital providers. This implicit contract between regulators and the utility should, in the long run, allow Fortis to earn its cost of capital, and leads us to assign Fortis' regulated utilities a narrow economic moat. As with all regulated utilities, we think regulatory caps on revenue and returns preclude Fortis from establishing a wide economic moat.

## Moat Trend

We assign Fortis a stable moat due to its monopoly position

and stable regulatory environment that will continue to allow the firm to earn its cost of capital. We do not expect the regulatory relationship to change in the future. The regulatory framework that caps revenue and returns prevent the firm from attaining a wide moat, as with all regulated utilities that we cover.

### Bulls Say/Bears Say

#### Bulls Say

- ▶ The company operates a stable business profile, offering a strong base for consistent earnings.
- ▶ With an aggressive capital expenditure plan, rate base growth is forecast to grow at a 6% compound annual growth rate.
- ▶ Fortis has consistent dividend growth history, paying consecutive quarterly dividends for four decades and growing the dividend faster than most of its peers in recent years.
- ▶ Fortis operations are based in higher-growth regions within Canada, mainly in Alberta and British Columbia.

#### Bears Say

- ▶ The Canadian regulatory environment offers lower allowed returns than its U.S. peers.
- ▶ The recent Belize expropriation demonstrates how Caribbean operations offer higher growth opportunities but at a substantially higher risk.
- ▶ The company operates noncore hotel and commercial real estate assets, potentially distracting management from core regulated operations.

### Financial Health

With a debt/capital ratio of just under 60% and interest coverage of 2.1 times, Fortis' financial health looks reasonably sound, particularly in light of its stable, low-risk business model. Fortis undertook a significant equity offering of 9 million shares resulting in CAD 300 million of proceeds. We expect the company to be active in the capital markets consistent with its current capital structure throughout its capital expenditure plan.

### Capital Structure

Between 2011 and 2015, Fortis has CAD 5.5 billion of planned capital expenditures, which will require the company to access the debt and equity capital markets. We anticipate that Fortis will issue CAD 200 million in debt in 2012 and has manageable debt maturities through 2015. The company recently issued significant equity in July 2011 to help finance its capital expenditure plan, and we expect Fortis to issue minimal additional equity in 2012 to accommodate employee stock purchase plans and an executive DRIP plan.

### Enterprise Risk

Fortis' key risk to future earnings is regulation. The company faces regulatory risks that create uncertainties around costs and allowed returns, especially given the significant capital expenditure plan from 2011 to 2015. Fortis is also exposed to political and economic instability at its Caribbean operations. With an eye towards acquisitions, the company risks overpaying for regulated U.S. assets and must be mindful of the strategic benefits. As with all regulated utilities, Fortis faces the risk of an inflationary environment that would raise borrowing costs and make other investments more attractive for income-seeking investors.

### Stewardship: NA 03 Jan 2012

Stanley Marshall has been president and CEO since 1995, leading a group of experienced utility executives. Total direct compensation was \$4.0 million for 2010, which we believe is in line with Fortis' industry group. Marshall's total compensation comprises base salary, annual incentives, stock options, and performance stock units, with 75% of total compensation at risk. We do not like that annual cash incentives are based on earnings per share targets, as EPS can be manipulated and may not be an indication of shareholder value creation. Marshall also has a significant ownership stake of 14 times his salary, which we believe aligns shareholder and management interests. From a corporate governance perspective, we like that the CEO and chairman positions are separated. While the board of directors has vast experience, we would prefer that members of the board have more direct utility experience.

# Research Methodology for Valuing Companies

## Components of Our Methodology

- ▶ Economic Moat™ Rating
- ▶ Moat Trend™ Rating
- ▶ Moat Valuation
- ▶ Three-Stage Discounted Cash Flow
- ▶ Weighted Average Cost of Capital
- ▶ Fair Value Estimate
- ▶ Scenario Analysis
- ▶ Uncertainty Ratings
- ▶ Margin of Safety
- ▶ Consider Buying/Selling
- ▶ Stewardship Grades
- ▶ Financial Health Grades

The Morningstar Rating for stocks identifies companies trading at a discount or premium to our analysts' assessment of their fair value. A number of components drive this rating: (1) our assessment of the firm's economic moat, (2) our estimate of the stock's intrinsic value based on a discounted cash-flow model, (3) the margin of safety bands we apply to our Fair Value Estimate, and (4) the current stock price relative to our fair value estimate.

The concept of the Morningstar Economic Moat™ Rating plays a vital role not only in our qualitative assessment of a firm's investment potential, but also in our valuation process. We assign three moat ratings—none, narrow, or wide—as well as the Morningstar Moat Trend™ Rating—positive, stable, or negative—to each company we cover. There are two major requirements for firms to earn either a narrow or wide moat rating: (1) the prospect of earning above-average returns on capital; and (2) some competitive edge that prevents these returns from quickly eroding. The assumptions we make about a firm's moat determine the length of “economic outperformance” that we assume in the latter stages

of our valuation model. We also quantify the value of each firm's moat, which represents the difference between a firm's enterprise value and the value of the firm if no future net investment were to occur. Said differently, moat value identifies the value generated by the firm as a result of any future net new investment. Our Moat Trend Rating reflects our assessment of whether each firm's competitive advantage is either getting stronger or weaker, since we think of moats as dynamic, rather than static.

At the heart of our valuation system is a detailed projection of a company's future cash flows. The first stage of our three-stage discounted cash flow model can last from 5 to 10 years and contains numerous detailed assumptions about various financial and operating items. The second stage of our model—where a firm's return on new invested capital (RONIC) and earnings growth rate implicitly fade until the perpetuity year—can last anywhere from 0 years (for no-moat firms) to 20 years (for wide-moat companies). In our third stage, we assume the firm's RONIC equals its weighted average cost of capital, and we calculate a continuing value using a standard

\* Please contact a sales representative for more information.

perpetuity formula. In deciding on the rate at which to discount future cash flows, we ignore stock-price volatility. Instead, we rely on a system that measures the estimated volatility of a firm's underlying future free cash flows, taking into account fundamental factors such as the diversity of revenue sources and the firm's fixed cost structure.

We also employ a number of other tools to augment our valuation process, including scenario analysis, where we assess the likelihood and performance of a business under different economic and firm-specific conditions. Our analysts typically model three to five scenarios for each company we cover, stress-testing the model and examining the distribution of resulting fair values.

The Morningstar Uncertainty Rating captures the range of these potential fair values, based on an assessment of a company's future sales range, the firm's operating and financial leverage, and any other contingent events that may impact the business. Our analysts use this range to assign an appropriate margin of safety—or the discount/premium

to a fair value we apply in setting our consider buying/consider selling prices. Firms trading below our consider-buying prices receive our highest rating of five stars, whereas firms trading above our consider-selling prices receive our lowest rating of one star.

Our Stewardship Grades show our assessment of a management's commitment to shareholders, and include an analysis of a firm's transparency, incentives and ownership. We also provide Financial Health Grades, which are quantitative measures based on firms' distance to default scores. Distance to default measures the distance between the market value of a company's assets and the book value of its liabilities (expressed in standard deviations of asset value). For our grades, A is equivalent to "Excellent," while F is "Very Poor."

## Morningstar Margin of Safety and Star Rating Bands

\* Occasionally a stock's uncertainty will be too high for us to estimate, in which case we label it Extreme.

# Morningstar's Approach to Rating Corporate Credit

- Offers a proprietary measure of the credit quality of companies on our coverage list.
- Encapsulates our in-depth modeling and quantitative work in one letter grade.
- Allows investors to rank companies by each of the four underlying components of our credit ratings, including both analyst-driven and quantitative measures.
- Provides access to all the underlying forecasts that go into the rating, available through our institutional service.

## Purpose

The Morningstar Corporate Credit Rating measures the ability of a firm to satisfy its debt and debt-like obligations. The higher the rating, the less likely we think the company is to default on these obligations.

The Morningstar Corporate Credit Rating builds on the modeling expertise of our securities research team. For each company, we publish:

- Five years of detailed pro-forma financial statements
- Annual estimates of free cash flow
- Annual forecasts of return on invested capital
- Scenario analyses, including upside and downside cases
- Forecasts of leverage, coverage, and liquidity ratios for five years
- Estimates of off balance sheet liabilities

These forecasts are key inputs into the Morningstar Corporate Credit Rating and are available to subscribers at [select.morningstar.com](http://select.morningstar.com).

## Methodology

We feel it's important to perform credit analysis through different lenses—qualitative and quantitative, as well as fundamental and market-driven. We therefore evaluate each company in four broad categories.

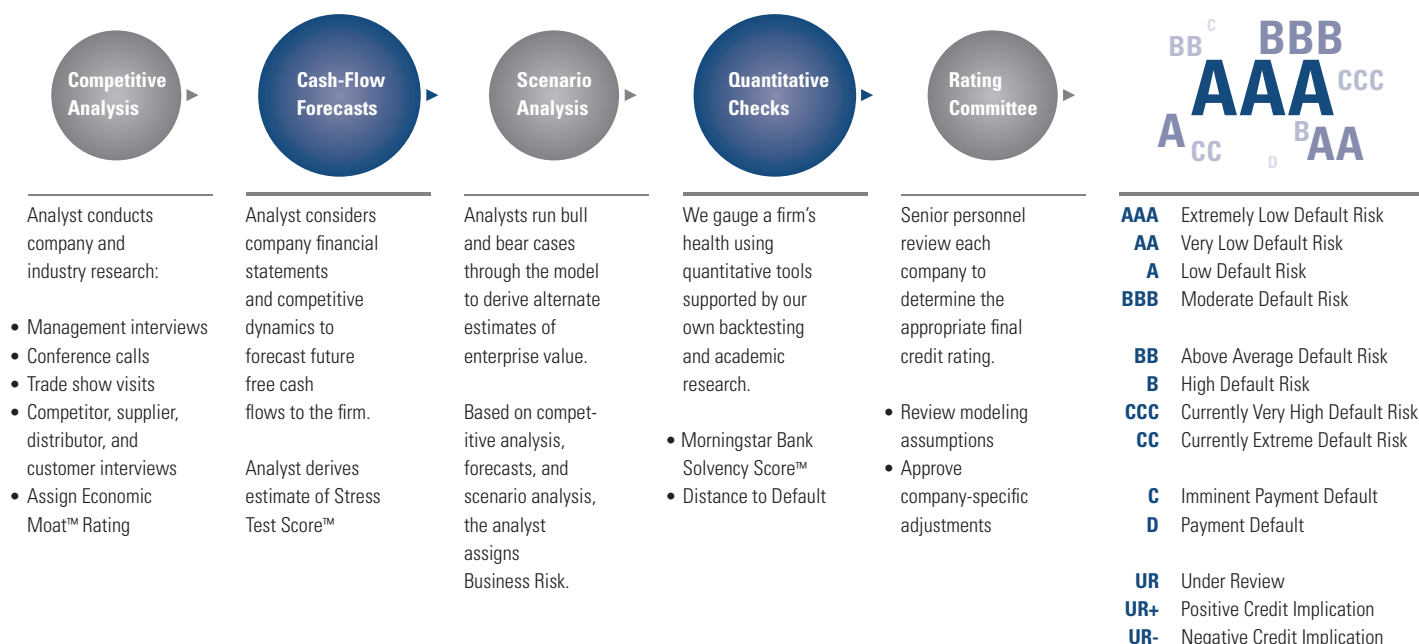

### Business Risk

Business Risk captures the fundamental uncertainty around a firm's business operations and the cash flow generated by those operations. Key components of the Business Risk rating include the Morningstar Economic Moat™ Rating and the Morningstar Uncertainty Rating.

### Cash Flow Cushion™

Morningstar's proprietary Cash Flow Cushion™ ratio is a fundamental indicator of a firm's future financial health. The measure reveals how many times a company's internal cash generation plus total excess liquid cash will cover its debt-like contractual commitments over the next five years. The Cash Flow Cushion acts as a predictor of financial distress, bringing to light potential refinancing, operational, and liquidity risks inherent to the firm.

## Morningstar Research Methodology for Determining Corporate Credit Ratings

# Morningstar's Approach to Rating Corporate Credit

The advantage of the Cash Flow Cushion ratio relative to other fundamental indicators of credit health is that the measure focuses on the future cash-generating performance of the firm derived from Morningstar's proprietary discounted cash flow model. By making standardized adjustments for certain expenses to reflect their debt-like characteristics, we can compare future projected free cash flows with debt-like cash commitments coming due in any particular year. The forward-looking nature of this metric allows us to anticipate changes in a firm's financial health and pinpoint periods where cash shortfalls are likely to occur.

## *Morningstar Solvency Score™*

The Morningstar Solvency Score™ is a quantitative score derived from both historical and forecasted financial ratios. It includes ratios that focus on liquidity (a company's ability to meet short term cash outflows), profitability (a company's ability to generate profit per unit of input), capital structure (how does the company finance its operations), and interest coverage (how much of profit is used up by interest payments).

## *Distance to Default*

The Distance to Default rating is a quantitative, market-based measure of a company's current financial health. (Distance to Default serves as the basis for Morningstar's Financial Health Grade.) The underlying model treats the equity of a firm as a call option on that firm's assets. Based on estimates of asset volatility and the Black-Scholes option-pricing model, we can estimate the likelihood that the value of the company's assets falls below the value of its liabilities, implying likely default.

For each of these four categories, we assign a score, which we then translate into a descriptive rating along the scale of Very Good / Good / Fair / Poor / Very Poor.

## **Overall Credit Rating**

The four component ratings roll up into a single preliminary credit rating. To determine the final credit rating, a credit committee of at least five senior research personnel reviews each preliminary rating.

We review credit ratings on a regular basis and as events warrant. Any change in rating must be approved by the Credit Rating Committee.

## **Investor Access**

Morningstar Corporate Credit Ratings are available on Morningstar.com. Our credit research, including detailed cash-flow models that contain all of the components of the Morningstar Corporate Credit Rating, is available to subscribers at [select.morningstar.com](http://select.morningstar.com).

### Analyst's Perspective 03 Jan 2012

Fortis' predominant regulated revenue mix provides investors a stable earnings profile and support for the stock's consistent dividend growth. Significant capital expenditures will drive near-term earnings growth and set a base for future free cash flow generation. The company's Canadian regulated utilities operate in constructive regulatory jurisdictions, but with slightly lower allowed returns on equity than its U.S. counterparts. In addition to organic growth, company management has indicated a desire to expand in the U.S. We would view this positively given the similar regulatory structures, and it could be value-accretive given where Fortis' stock traded at year-end 2011 and the typically more favorable allowed returns in the U.S. We forecast normalized earnings can grow at 5% annually through 2015. At a 3.5% dividend yield and trading at 18 times our 2012 earnings forecast, we think Fortis is overvalued.

### Key Investment Considerations

- Fortis generates more than 90% of its profit from its regulated utility segment, providing a stable earnings base.
- Across all of its utilities, regulators allow Fortis a 9.5% weighted-average return on equity, which is about 100 basis points lower than regulators allow U.S. utilities on average.
- We think the stock is overvalued as of year-end 2011, with Fortis trading at 18 times our 2012 earnings estimate.

Analyst Note:

### Profile

Fortis primarily owns and operates utility transmission and distribution assets in Canada. It has smaller stakes in electricity generation, several Caribbean utilities, and Canadian hotel and commercial real estate. The firm's regulated natural gas operations serve 950,000 customers in British Columbia. Its regulated electric utility operations serve 1.1 million customers throughout Canada and in Grand Cayman and Turks and Caicos. Its Canadian operations accounted for 92% of its total assets as of 2010.

## Morningstar Analysis

Fortis' low-risk operations result in stable earnings and support its consistent dividend growth the last four decades.

### Strong Customer Growth Generates Impressive 2011 Results at Fortis. 09 Feb 2012

Fortis Inc. FTS posted \$1.75 in EPS in 2011, higher than our own \$1.71 estimate and a 6% increase from 2010. Strong customer growth and higher energy deliveries at its regulated Canadian utilities drove results. We are reaffirming our fair value estimate and forecast 5% EPS growth through 2016 as \$5.5 billion in planned capital expenditures should drive earnings expansion. Fortis increased dividends 3.5% in mid-December to \$1.20, an implied 66% payout ratio, with a current yield of 3.5%. At our fair value estimate, Fortis would yield 4%.

In 2012, significant regulatory rulings at the company's Newfound Power and FortisBC subsidiaries could significantly impact future operating results. With the Alberta Utilities Commission ruling in December 2011, allowed returns at Fortis Alberta were decreased 25 basis points to just 8.75%. Similar cuts could be seen at the firm's other regulated Canadian operating companies, putting pressure on earnings growth. Management provided no EPS guidance for 2012.

### Thesis 03 Jan 2012

Fortis manages electric and gas regulated utilities in Canada and the Caribbean, resulting in stable operating results. The company's noncore generation and real estate holding operations account for 12% of operating earnings. While we are less excited by the distractions of these noncore operations, we are comforted that management continues to focus on electric and natural gas distribution in North America.

Fortis' main regulated Canadian operations reside in British Columbia, Alberta, and Newfoundland. These relatively low-risk operations result in stable earnings and fund the consistent dividend growth experienced the past four decades. Rate base additions should be significant through 2015, as the company plans to invest CAD 4.8 billion as the

healthier Canadian economy drives usage and customer growth. This should allow the firm to increase its rate base at double-digit rates each year during this expansion period. On a weighted-average basis, Fortis' allowed returns on equity in its Canadian service territories are 9.25% after a series of rate increases in 2010. While this return is lower than that typically granted to comparable U.S. utilities, it does not seem unreasonable given the low-risk nature of Fortis' transmission and delivery operations.

The company also operates small utility operations in Belize and the Caribbean. While the allowed returns can be significantly higher than its Canadian operations, these operations also have a much higher risk profile than its Canadian operations. In the summer of 2011, the Government of Belize expropriated Fortis' 70% ownership in Belize Electricity Limited, resulting in an unknown recoverable asset representing 2% of Fortis' assets. While small in nature, the earnings of these operations are exposed to additional risks of economic instability, tenuous regulation, and weather events. Management has indicated it has little interest to expand operations in the Caribbean, which we see as a positive.

We are less enthusiastic about the firm's small presence in the cyclical hotel and commercial real estate industry. However, these holdings are held solely for tax strategy purposes and would likely be spun off should Canadian tax policy change. Currently, the Canadian government disallows entity tax consolidation, and the real estate asset revenues offset holding company expenses, mostly interest. While we believe the strategy behind these assets is sound, we worry they may distract management and drag on growth.

Fortis has expressed interest in expanding its operations through U.S. acquisitions and was outbid in June 2011 for the regulated Central Vermont Public Service Corporation. Strategically, we are encouraged by the similarity of

regulatory jurisdictions and operations in the U.S. However, we were concerned by Fortis' relatively steep offer, but we like that management had the discipline to walk away when the price got too rich.

Given the high barriers to entry and regulated nature of Fortis' main operations, we award the company a narrow economic moat. The firm's exposure to noncore areas and foreign markets, though small, leads us to assign it a medium fair value uncertainty rating. We would consider lowering our uncertainty rating if Fortis were to divest the noncore assets.

## Valuation, Growth and Profitability 03 Jan 2012

We are reinitiating coverage of Fortis under a new analyst with a CAD 29 fair value estimate, taking into consideration planned rate base additions through 2015. After the significant share dilution that occurred during 2011, we forecast 5% earnings growth in 2012 adjusting for lower dilution and normalized weather conditions. Beyond 2013, we assume 1.5% annual energy use growth at the Canadian utilities and consistent allowed returns on equity. Based on management's guidance, we forecast total investments of

CAD 4.6 billion at the utilities through 2015, leading to annualized rate base growth of 6%. We use a 10.0% cost of equity and a 7.5% weighted average cost of capital in our discounted cash flow model.

## Scenario Analysis

The most significant near-term driver of our earnings forecast is our annualized energy growth rate at the regulated utilities. If energy growth is 50 bps lower than our 2013 estimate, our earnings per share would fall by 2% and our fair value estimate would decrease by CAD 2. We expect similar changes in earnings per share and fair value if energy growth is 50 bps higher.

Allowed returns at the Canadian utilities are also a significant driver of our valuation estimates. If we assume a 100 bps decrease in allowed returns on equity in 2012 and beyond, our fair value estimate decreases to CAD 21. Better-than-expected allowed returns on equity drive similar upside results. Finally, a 50 bps change in our cost of equity assumption changes our fair value estimate by about CAD 3 per share.

## Economic Moat

Fortis owns a difficult-to-replicate network of regulated power generation, transmission, and distribution assets and provides an essential energy source: electricity. In exchange for its monopoly position, regulators set Fortis' returns at levels that aim to keep customer costs low while providing adequate returns for capital providers. This implicit contract between regulators and the utility should, in the long run, allow Fortis to earn its cost of capital, and leads us to assign Fortis' regulated utilities a narrow economic moat. As with all regulated utilities, we think regulatory caps on revenue and returns preclude Fortis from establishing a wide economic moat.

## Moat Trend

We assign Fortis a stable moat due to its monopoly position

and stable regulatory environment that will continue to allow the firm to earn its cost of capital. We do not expect the regulatory relationship to change in the future. The regulatory framework that caps revenue and returns prevent the firm from attaining a wide moat, as with all regulated utilities that we cover.

## Bulls Say/Bears Say

### Bulls Say

- ▶ The company operates a stable business profile, offering a strong base for consistent earnings.
- ▶ With an aggressive capital expenditure plan, rate base growth is forecast to grow at a 6% compound annual growth rate.
- ▶ Fortis has consistent dividend growth history, paying consecutive quarterly dividends for four decades and growing the dividend faster than most of its peers in recent years.
- ▶ Fortis operations are based in higher-growth regions within Canada, mainly in Alberta and British Columbia.

### Bears Say

- ▶ The Canadian regulatory environment offers lower allowed returns than its U.S. peers.
- ▶ The recent Belize expropriation demonstrates how Caribbean operations offer higher growth opportunities but at a substantially higher risk.
- ▶ The company operates noncore hotel and commercial real estate assets, potentially distracting management from core regulated operations.

### Financial Health

With a debt/capital ratio of just under 60% and interest coverage of 2.1 times, Fortis' financial health looks reasonably sound, particularly in light of its stable, low-risk business model. Fortis undertook a significant equity offering of 9 million shares resulting in CAD 300 million of proceeds. We expect the company to be active in the capital markets consistent with its current capital structure throughout its capital expenditure plan.

### Capital Structure

Between 2011 and 2015, Fortis has CAD 5.5 billion of planned capital expenditures, which will require the company to access the debt and equity capital markets. We anticipate that Fortis will issue CAD 200 million in debt in 2012 and has manageable debt maturities through 2015. The company recently issued significant equity in July 2011 to help finance its capital expenditure plan, and we expect Fortis to issue minimal additional equity in 2012 to accommodate employee stock purchase plans and an executive DRIP plan.

### Enterprise Risk

Fortis' key risk to future earnings is regulation. The company faces regulatory risks that create uncertainties around costs and allowed returns, especially given the significant capital expenditure plan from 2011 to 2015. Fortis is also exposed to political and economic instability at its Caribbean operations. With an eye towards acquisitions, the company risks overpaying for regulated U.S. assets and must be mindful of the strategic benefits. As with all regulated utilities, Fortis faces the risk of an inflationary environment that would raise borrowing costs and make other investments more attractive for income-seeking investors.

### Stewardship: NA 03 Jan 2012

Stanley Marshall has been president and CEO since 1995, leading a group of experienced utility executives. Total direct compensation was \$4.0 million for 2010, which we believe is in line with Fortis' industry group. Marshall's total compensation comprises base salary, annual incentives, stock options, and performance stock units, with 75% of total compensation at risk. We do not like that annual cash incentives are based on earnings per share targets, as EPS can be manipulated and may not be an indication of shareholder value creation. Marshall also has a significant ownership stake of 14 times his salary, which we believe aligns shareholder and management interests. From a corporate governance perspective, we like that the CEO and chairman positions are separated. While the board of directors has vast experience, we would prefer that members of the board have more direct utility experience.

# Research Methodology for Valuing Companies

## Components of Our Methodology

- ▶ Economic Moat™ Rating
- ▶ Moat Trend™ Rating
- ▶ Moat Valuation
- ▶ Three-Stage Discounted Cash Flow
- ▶ Weighted Average Cost of Capital
- ▶ Fair Value Estimate
- ▶ Scenario Analysis
- ▶ Uncertainty Ratings
- ▶ Margin of Safety
- ▶ Consider Buying/Selling
- ▶ Stewardship Grades
- ▶ Financial Health Grades

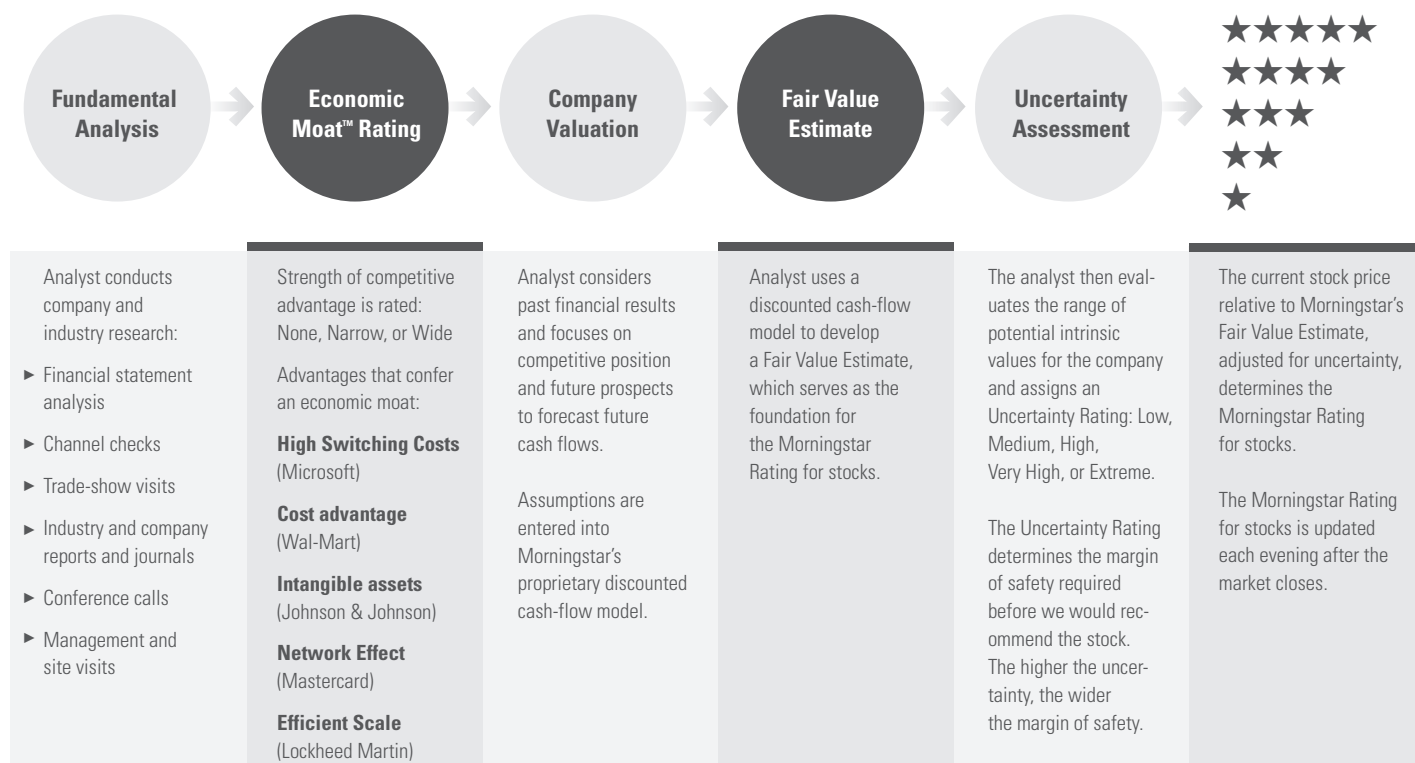

The Morningstar Rating for stocks identifies companies trading at a discount or premium to our analysts' assessment of their fair value. A number of components drive this rating: (1) our assessment of the firm's economic moat, (2) our estimate of the stock's intrinsic value based on a discounted cash-flow model, (3) the margin of safety bands we apply to our Fair Value Estimate, and (4) the current stock price relative to our fair value estimate.

The concept of the Morningstar Economic Moat™ Rating plays a vital role not only in our qualitative assessment of a firm's investment potential, but also in our valuation process. We assign three moat ratings—none, narrow, or wide—as well as the Morningstar Moat Trend™ Rating—positive, stable, or negative—to each company we cover. There are two major requirements for firms to earn either a narrow or wide moat rating: (1) the prospect of earning above-average returns on capital; and (2) some competitive edge that prevents these returns from quickly eroding. The assumptions we make about a firm's moat determine the length of “economic outperformance” that we assume in the latter stages

of our valuation model. We also quantify the value of each firm's moat, which represents the difference between a firm's enterprise value and the value of the firm if no future net investment were to occur. Said differently, moat value identifies the value generated by the firm as a result of any future net new investment. Our Moat Trend Rating reflects our assessment of whether each firm's competitive advantage is either getting stronger or weaker, since we think of moats as dynamic, rather than static.

At the heart of our valuation system is a detailed projection of a company's future cash flows. The first stage of our three-stage discounted cash flow model can last from 5 to 10 years and contains numerous detailed assumptions about various financial and operating items. The second stage of our model—where a firm's return on new invested capital (RONIC) and earnings growth rate implicitly fade until the perpetuity year—can last anywhere from 0 years (for no-moat firms) to 20 years (for wide-moat companies). In our third stage, we assume the firm's RONIC equals its weighted average cost of capital, and we calculate a continuing value using a standard

## Morningstar Research Methodology for Valuing Companies

\* Please contact a sales representative for more information.

perpetuity formula. In deciding on the rate at which to discount future cash flows, we ignore stock-price volatility. Instead, we rely on a system that measures the estimated volatility of a firm's underlying future free cash flows, taking into account fundamental factors such as the diversity of revenue sources and the firm's fixed cost structure.

We also employ a number of other tools to augment our valuation process, including scenario analysis, where we assess the likelihood and performance of a business under different economic and firm-specific conditions. Our analysts typically model three to five scenarios for each company we cover, stress-testing the model and examining the distribution of resulting fair values.

The Morningstar Uncertainty Rating captures the range of these potential fair values, based on an assessment of a company's future sales range, the firm's operating and financial leverage, and any other contingent events that may impact the business. Our analysts use this range to assign an appropriate margin of safety—or the discount/premium

to a fair value we apply in setting our consider buying/consider selling prices. Firms trading below our consider-buying prices receive our highest rating of five stars, whereas firms trading above our consider-selling prices receive our lowest rating of one star.

Our Stewardship Grades show our assessment of a management's commitment to shareholders, and include an analysis of a firm's transparency, incentives and ownership. We also provide Financial Health Grades, which are quantitative measures based on firms' distance to default scores. Distance to default measures the distance between the market value of a company's assets and the book value of its liabilities (expressed in standard deviations of asset value). For our grades, A is equivalent to "Excellent," while F is "Very Poor."

**Morningstar Margin of Safety and Star Rating Bands**

\* Occasionally a stock's uncertainty will be too high for us to estimate, in which case we label it Extreme.

# Morningstar's Approach to Rating Corporate Credit

- Offers a proprietary measure of the credit quality of companies on our coverage list.
- Encapsulates our in-depth modeling and quantitative work in one letter grade.
- Allows investors to rank companies by each of the four underlying components of our credit ratings, including both analyst-driven and quantitative measures.
- Provides access to all the underlying forecasts that go into the rating, available through our institutional service.

## Purpose

The Morningstar Corporate Credit Rating measures the ability of a firm to satisfy its debt and debt-like obligations. The higher the rating, the less likely we think the company is to default on these obligations.

The Morningstar Corporate Credit Rating builds on the modeling expertise of our securities research team. For each company, we publish:

- Five years of detailed pro-forma financial statements
- Annual estimates of free cash flow
- Annual forecasts of return on invested capital
- Scenario analyses, including upside and downside cases
- Forecasts of leverage, coverage, and liquidity ratios for five years
- Estimates of off balance sheet liabilities

These forecasts are key inputs into the Morningstar Corporate Credit Rating and are available to subscribers at [select.morningstar.com](http://select.morningstar.com).

## Methodology

We feel it's important to perform credit analysis through different lenses—qualitative and quantitative, as well as fundamental and market-driven. We therefore evaluate each company in four broad categories.

### Business Risk

Business Risk captures the fundamental uncertainty around a firm's business operations and the cash flow generated by those operations. Key components of the Business Risk rating include the Morningstar Economic Moat™ Rating and the Morningstar Uncertainty Rating.

### Cash Flow Cushion™

Morningstar's proprietary Cash Flow Cushion™ ratio is a fundamental indicator of a firm's future financial health. The measure reveals how many times a company's internal cash generation plus total excess liquid cash will cover its debt-like contractual commitments over the next five years. The Cash Flow Cushion acts as a predictor of financial distress, bringing to light potential refinancing, operational, and liquidity risks inherent to the firm.

## Morningstar Research Methodology for Determining Corporate Credit Ratings

# Morningstar's Approach to Rating Corporate Credit

The advantage of the Cash Flow Cushion ratio relative to other fundamental indicators of credit health is that the measure focuses on the future cash-generating performance of the firm derived from Morningstar's proprietary discounted cash flow model. By making standardized adjustments for certain expenses to reflect their debt-like characteristics, we can compare future projected free cash flows with debt-like cash commitments coming due in any particular year. The forward-looking nature of this metric allows us to anticipate changes in a firm's financial health and pinpoint periods where cash shortfalls are likely to occur.

## *Morningstar Solvency Score™*

The Morningstar Solvency Score™ is a quantitative score derived from both historical and forecasted financial ratios. It includes ratios that focus on liquidity (a company's ability to meet short term cash outflows), profitability (a company's ability to generate profit per unit of input), capital structure (how does the company finance its operations), and interest coverage (how much of profit is used up by interest payments).

## *Distance to Default*

The Distance to Default rating is a quantitative, market-based measure of a company's current financial health. (Distance to Default serves as the basis for Morningstar's Financial Health Grade.) The underlying model treats the equity of a firm as a call option on that firm's assets. Based on estimates of asset volatility and the Black-Scholes option-pricing model, we can estimate the likelihood that the value of the company's assets falls below the value of its liabilities, implying likely default.

For each of these four categories, we assign a score, which we then translate into a descriptive rating along the scale of Very Good / Good / Fair / Poor / Very Poor.

## **Overall Credit Rating**

The four component ratings roll up into a single preliminary credit rating. To determine the final credit rating, a credit committee of at least five senior research personnel reviews each preliminary rating.

We review credit ratings on a regular basis and as events warrant. Any change in rating must be approved by the Credit Rating Committee.

## **Investor Access**

Morningstar Corporate Credit Ratings are available on Morningstar.com. Our credit research, including detailed cash-flow models that contain all of the components of the Morningstar Corporate Credit Rating, is available to subscribers at [select.morningstar.com](http://select.morningstar.com).

### Analyst's Perspective 03 Jan 2012

Fortis' predominant regulated revenue mix provides investors a stable earnings profile and support for the stock's consistent dividend growth. Significant capital expenditures will drive near-term earnings growth and set a base for future free cash flow generation. The company's Canadian regulated utilities operate in constructive regulatory jurisdictions, but with slightly lower allowed returns on equity than its U.S. counterparts. In addition to organic growth, company management has indicated a desire to expand in the U.S. We would view this positively given the similar regulatory structures, and it could be value-accretive given where Fortis' stock traded at year-end 2011 and the typically more favorable allowed returns in the U.S. We forecast normalized earnings can grow at 5% annually through 2015. At a 3.5% dividend yield and trading at 18 times our 2012 earnings forecast, we think Fortis is overvalued.

### Key Investment Considerations

- Fortis generates more than 90% of its profit from its regulated utility segment, providing a stable earnings base.
- Across all of its utilities, regulators allow Fortis a 9.5% weighted-average return on equity, which is about 100 basis points lower than regulators allow U.S. utilities on average.
- We think the stock is overvalued as of year-end 2011, with Fortis trading at 18 times our 2012 earnings estimate.

Analyst Note:

### Profile

Fortis primarily owns and operates utility transmission and distribution assets in Canada. It has smaller stakes in electricity generation, several Caribbean utilities, and Canadian hotel and commercial real estate. The firm's regulated natural gas operations serve 950,000 customers in British Columbia. Its regulated electric utility operations serve 1.1 million customers throughout Canada and in Grand Cayman and Turks and Caicos. Its Canadian operations accounted for 92% of its total assets as of 2010.

## Morningstar Analysis

Fortis' low-risk operations result in stable earnings and support its consistent dividend growth the last four decades.

### Fortis Enters U.S. Market With Acquisition of CH Energy Group 21 Feb 2012

On Tuesday, Fortis FTS announced a \$1.5 billion cash and debt bid for CH Energy Group CHG, a regulated New York Mid-Hudson River Valley utility that would be Fortis' first based in the United States. Fortis offered \$65 per share for CH Energy, a 10.5% premium to the most recent close price.

The \$1 billion equity investment implies a pricey 1.9 times multiple on book- and rate-base equity. But that premium falls to 1.3 times book when we adjust for certain tax and regulatory balance sheet items. At this adjusted price, we believe the deal is slightly value-dilutive for Fortis, however we are reaffirming our fair value estimate given the relatively small size of the deal and regulatory approval uncertainty. New York state regulators and the Federal Energy Regulatory Commission must approve the deal.

We originally thought Fortis would make a larger splash into the U.S. market with an acquisition of \$3 billion to \$5 billion. The smaller deal for CH Energy indicates to us that there may be room for additional acquisitions in the future. Strategically, we think the acquisition is sound. The acquisition allows Fortis to enter the U.S.-regulated electric and gas distribution businesses in order to gain a better understanding of the U.S. market, with geographical proximity to its current Canadian operations.

N.Y. regulators allow CH Energy an industry average 10% return on its equity rate base through July 2013. With Fortis successfully integrating three utilities since 2004, we think the current management team is well-suited for the CH Energy Group acquisition. Our strategic enthusiasm for the merger is dampened by the price Fortis paid. To earn CH Energy's allowed return of 10%, significant synergy savings will be required to maintain current allowed returns.

### Thesis 03 Jan 2012

Fortis manages electric and gas regulated utilities in Canada

and the Caribbean, resulting in stable operating results. The company's noncore generation and real estate holding operations account for 12% of operating earnings. While we are less excited by the distractions of these noncore operations, we are comforted that management continues to focus on electric and natural gas distribution in North America.

Fortis' main regulated Canadian operations reside in British Columbia, Alberta, and Newfoundland. These relatively low-risk operations result in stable earnings and fund the consistent dividend growth experienced the past four decades. Rate base additions should be significant through 2015, as the company plans to invest CAD 4.8 billion as the healthier Canadian economy drives usage and customer growth. This should allow the firm to increase its rate base at double-digit rates each year during this expansion period. On a weighted-average basis, Fortis' allowed returns on equity in its Canadian service territories are 9.25% after a series of rate increases in 2010. While this return is lower than that typically granted to comparable U.S. utilities, it does not seem unreasonable given the low-risk nature of Fortis' transmission and delivery operations.

The company also operates small utility operations in Belize and the Caribbean. While the allowed returns can be significantly higher than its Canadian operations, these operations also have a much higher risk profile than its Canadian operations. In the summer of 2011, the Government of Belize expropriated Fortis' 70% ownership in Belize Electricity Limited, resulting in an unknown recoverable asset representing 2% of Fortis' assets. While small in nature, the earnings of these operations are exposed to additional risks of economic instability, tenuous regulation, and weather events. Management has indicated it has little interest to expand operations in the Caribbean, which we see as a positive.

We are less enthusiastic about the firm's small presence in

the cyclical hotel and commercial real estate industry. However, these holdings are held solely for tax strategy purposes and would likely be spun off should Canadian tax policy change. Currently, the Canadian government disallows entity tax consolidation, and the real estate asset revenues offset holding company expenses, mostly interest. While we believe the strategy behind these assets is sound, we worry they may distract management and drag on growth.

Fortis has expressed interest in expanding its operations through U.S. acquisitions and was outbid in June 2011 for the regulated Central Vermont Public Service Corporation. Strategically, we are encouraged by the similarity of regulatory jurisdictions and operations in the U.S. However, we were concerned by Fortis' relatively steep offer, but we like that management had the discipline to walk away when the price got too rich.

Given the high barriers to entry and regulated nature of Fortis' main operations, we award the company a narrow economic moat. The firm's exposure to noncore areas and foreign markets, though small, leads us to assign it a

medium fair value uncertainty rating. We would consider lowering our uncertainty rating if Fortis were to divest the noncore assets.

## Valuation, Growth and Profitability 03 Jan 2012

We are reinitiating coverage of Fortis under a new analyst with a CAD 29 fair value estimate, taking into consideration planned rate base additions through 2015. After the significant share dilution that occurred during 2011, we forecast 5% earnings growth in 2012 adjusting for lower dilution and normalized weather conditions. Beyond 2013, we assume 1.5% annual energy use growth at the Canadian utilities and consistent allowed returns on equity. Based on management's guidance, we forecast total investments of CAD 4.6 billion at the utilities through 2015, leading to annualized rate base growth of 6%. We use a 10.0% cost of equity and a 7.5% weighted average cost of capital in our discounted cash flow model.

## Scenario Analysis

The most significant near-term driver of our earnings forecast is our annualized energy growth rate at the regulated utilities. If energy growth is 50 bps lower than our 2013 estimate, our earnings per share would fall by 2% and our fair value estimate would decrease by CAD 2. We expect similar changes in earnings per share and fair value if energy growth is 50 bps higher.

Allowed returns at the Canadian utilities are also a significant driver of our valuation estimates. If we assume a 100 bps decrease in allowed returns on equity in 2012 and beyond, our fair value estimate decreases to CAD 21. Better-than-expected allowed returns on equity drive similar upside results. Finally, a 50 bps change in our cost of equity assumption changes our fair value estimate by about CAD 3 per share.

## Economic Moat

Fortis owns a difficult-to-replicate network of regulated

## Fortis, Inc. FTS (TSE) | ★★

power generation, transmission, and distribution assets and provides an essential energy source: electricity. In exchange for its monopoly position, regulators set Fortis' returns at levels that aim to keep customer costs low while providing adequate returns for capital providers. This implicit contract between regulators and the utility should, in the long run, allow Fortis to earn its cost of capital, and leads us to assign Fortis' regulated utilities a narrow economic moat. As with all regulated utilities, we think regulatory caps on revenue and returns preclude Fortis from establishing a wide economic moat.

### Moat Trend

We assign Fortis a stable moat due to its monopoly position and stable regulatory environment that will continue to allow the firm to earn its cost of capital. We do not expect the regulatory relationship to change in the future. The regulatory framework that caps revenue and returns prevent the firm from attaining a wide moat, as with all regulated utilities that we cover.

### Bulls Say/Bears Say

#### Bulls Say

- ▶ The company operates a stable business profile, offering a strong base for consistent earnings.
- ▶ With an aggressive capital expenditure plan, rate base growth is forecast to grow at a 6% compound annual growth rate.
- ▶ Fortis has consistent dividend growth history, paying consecutive quarterly dividends for four decades and growing the dividend faster than most of its peers in recent years.
- ▶ Fortis operations are based in higher-growth regions within Canada, mainly in Alberta and British Columbia.

#### Bears Say

- ▶ The Canadian regulatory environment offers lower allowed returns than its U.S. peers.
- ▶ The recent Belize expropriation demonstrates how Caribbean operations offer higher growth opportunities but at a substantially higher risk.
- ▶ The company operates noncore hotel and commercial real estate assets, potentially distracting management from core regulated operations.

### Financial Health

With a debt/capital ratio of just under 60% and interest coverage of 2.1 times, Fortis' financial health looks reasonably sound, particularly in light of its stable, low-risk business model. Fortis undertook a significant equity offering of 9 million shares resulting in CAD 300 million of proceeds. We expect the company to be active in the capital markets consistent with its current capital structure throughout its capital expenditure plan.

### Capital Structure

Between 2011 and 2015, Fortis has CAD 5.5 billion of planned capital expenditures, which will require the company to access the debt and equity capital markets. We anticipate that Fortis will issue CAD 200 million in debt in 2012 and has manageable debt maturities through 2015. The company recently issued significant equity in July 2011 to help finance its capital expenditure plan, and we expect Fortis to issue minimal additional equity in 2012 to accommodate employee stock purchase plans and an executive DRIP plan.

### Enterprise Risk

Fortis' key risk to future earnings is regulation. The company faces regulatory risks that create uncertainties around costs and allowed returns, especially given the significant capital expenditure plan from 2011 to 2015. Fortis is also exposed to political and economic instability at its Caribbean operations. With an eye towards acquisitions, the company risks overpaying for regulated U.S. assets and must be mindful of the strategic benefits. As with all regulated utilities, Fortis faces the risk of an inflationary environment that would raise borrowing costs and make other investments more attractive for income-seeking investors.

### Stewardship: NA 03 Jan 2012

Stanley Marshall has been president and CEO since 1995, leading a group of experienced utility executives. Total direct compensation was \$4.0 million for 2010, which we believe is in line with Fortis' industry group. Marshall's total compensation comprises base salary, annual incentives, stock options, and performance stock units, with 75% of total compensation at risk. We do not like that annual cash incentives are based on earnings per share targets, as EPS can be manipulated and may not be an indication of shareholder value creation. Marshall also has a significant ownership stake of 14 times his salary, which we believe aligns shareholder and management interests. From a corporate governance perspective, we like that the CEO and chairman positions are separated. While the board of directors has vast experience, we would prefer that members of the board have more direct utility experience.

### Analyst Notes

#### Strong Customer Growth Generates Impressive 2011

##### Results at Fortis. 09 Feb 2012

Fortis Inc. FTS posted \$1.75 in EPS in 2011, higher than our own \$1.71 estimate and a 6% increase from 2010. Strong customer growth and higher energy deliveries at its regulated Canadian utilities drove results. We are reaffirming our fair value estimate and forecast 5% EPS growth through 2016 as \$5.5 billion in planned capital expenditures should drive earnings expansion. Fortis increased dividends 3.5% in mid-December to \$1.20, an implied 66% payout ratio, with a current yield of 3.5%. At our fair value estimate, Fortis would yield 4%.

In 2012, significant regulatory rulings at the company's Newfoundland Power and FortisBC subsidiaries could significantly impact future operating results. With the Alberta Utilities Commission ruling in December 2011, allowed returns at Fortis Alberta were decreased 25 basis points to just 8.75%. Similar cuts could be seen at the firm's other regulated Canadian operating companies, putting pressure on earnings growth. Management provided no EPS guidance for 2012.

# Research Methodology for Valuing Companies

## Components of Our Methodology

- ▶ Economic Moat™ Rating
- ▶ Moat Trend™ Rating
- ▶ Moat Valuation
- ▶ Three-Stage Discounted Cash Flow
- ▶ Weighted Average Cost of Capital
- ▶ Fair Value Estimate
- ▶ Scenario Analysis
- ▶ Uncertainty Ratings
- ▶ Margin of Safety
- ▶ Consider Buying/Selling
- ▶ Stewardship Grades
- ▶ Financial Health Grades

The Morningstar Rating for stocks identifies companies trading at a discount or premium to our analysts' assessment of their fair value. A number of components drive this rating: (1) our assessment of the firm's economic moat, (2) our estimate of the stock's intrinsic value based on a discounted cash-flow model, (3) the margin of safety bands we apply to our Fair Value Estimate, and (4) the current stock price relative to our fair value estimate.

The concept of the Morningstar Economic Moat™ Rating plays a vital role not only in our qualitative assessment of a firm's investment potential, but also in our valuation process. We assign three moat ratings—none, narrow, or wide—as well as the Morningstar Moat Trend™ Rating—positive, stable, or negative—to each company we cover. There are two major requirements for firms to earn either a narrow or wide moat rating: (1) the prospect of earning above-average returns on capital; and (2) some competitive edge that prevents these returns from quickly eroding. The assumptions we make about a firm's moat determine the length of “economic outperformance” that we assume in the latter stages

of our valuation model. We also quantify the value of each firm's moat, which represents the difference between a firm's enterprise value and the value of the firm if no future net investment were to occur. Said differently, moat value identifies the value generated by the firm as a result of any future net new investment. Our Moat Trend Rating reflects our assessment of whether each firm's competitive advantage is either getting stronger or weaker, since we think of moats as dynamic, rather than static.

At the heart of our valuation system is a detailed projection of a company's future cash flows. The first stage of our three-stage discounted cash flow model can last from 5 to 10 years and contains numerous detailed assumptions about various financial and operating items. The second stage of our model—where a firm's return on new invested capital (RONIC) and earnings growth rate implicitly fade until the perpetuity year—can last anywhere from 0 years (for no-moat firms) to 20 years (for wide-moat companies). In our third stage, we assume the firm's RONIC equals its weighted average cost of capital, and we calculate a continuing value using a standard

## Morningstar Research Methodology for Valuing Companies

\* Please contact a sales representative for more information.

perpetuity formula. In deciding on the rate at which to discount future cash flows, we ignore stock-price volatility. Instead, we rely on a system that measures the estimated volatility of a firm's underlying future free cash flows, taking into account fundamental factors such as the diversity of revenue sources and the firm's fixed cost structure.

We also employ a number of other tools to augment our valuation process, including scenario analysis, where we assess the likelihood and performance of a business under different economic and firm-specific conditions. Our analysts typically model three to five scenarios for each company we cover, stress-testing the model and examining the distribution of resulting fair values.

The Morningstar Uncertainty Rating captures the range of these potential fair values, based on an assessment of a company's future sales range, the firm's operating and financial leverage, and any other contingent events that may impact the business. Our analysts use this range to assign an appropriate margin of safety—or the discount/premium

to a fair value we apply in setting our consider buying/consider selling prices. Firms trading below our consider-buying prices receive our highest rating of five stars, whereas firms trading above our consider-selling prices receive our lowest rating of one star.

Our Stewardship Grades show our assessment of a management's commitment to shareholders, and include an analysis of a firm's transparency, incentives and ownership. We also provide Financial Health Grades, which are quantitative measures based on firms' distance to default scores. Distance to default measures the distance between the market value of a company's assets and the book value of its liabilities (expressed in standard deviations of asset value). For our grades, A is equivalent to "Excellent," while F is "Very Poor."

### Morningstar Margin of Safety and Star Rating Bands

\* Occasionally a stock's uncertainty will be too high for us to estimate, in which case we label it Extreme.

# Morningstar's Approach to Rating Corporate Credit

- Offers a proprietary measure of the credit quality of companies on our coverage list.
- Encapsulates our in-depth modeling and quantitative work in one letter grade.
- Allows investors to rank companies by each of the four underlying components of our credit ratings, including both analyst-driven and quantitative measures.
- Provides access to all the underlying forecasts that go into the rating, available through our institutional service.

## Purpose

The Morningstar Corporate Credit Rating measures the ability of a firm to satisfy its debt and debt-like obligations. The higher the rating, the less likely we think the company is to default on these obligations.

The Morningstar Corporate Credit Rating builds on the modeling expertise of our securities research team. For each company, we publish:

- Five years of detailed pro-forma financial statements
- Annual estimates of free cash flow
- Annual forecasts of return on invested capital
- Scenario analyses, including upside and downside cases
- Forecasts of leverage, coverage, and liquidity ratios for five years
- Estimates of off balance sheet liabilities

These forecasts are key inputs into the Morningstar Corporate Credit Rating and are available to subscribers at [select.morningstar.com](http://select.morningstar.com).

## Methodology

We feel it's important to perform credit analysis through different lenses—qualitative and quantitative, as well as fundamental and market-driven. We therefore evaluate each company in four broad categories.

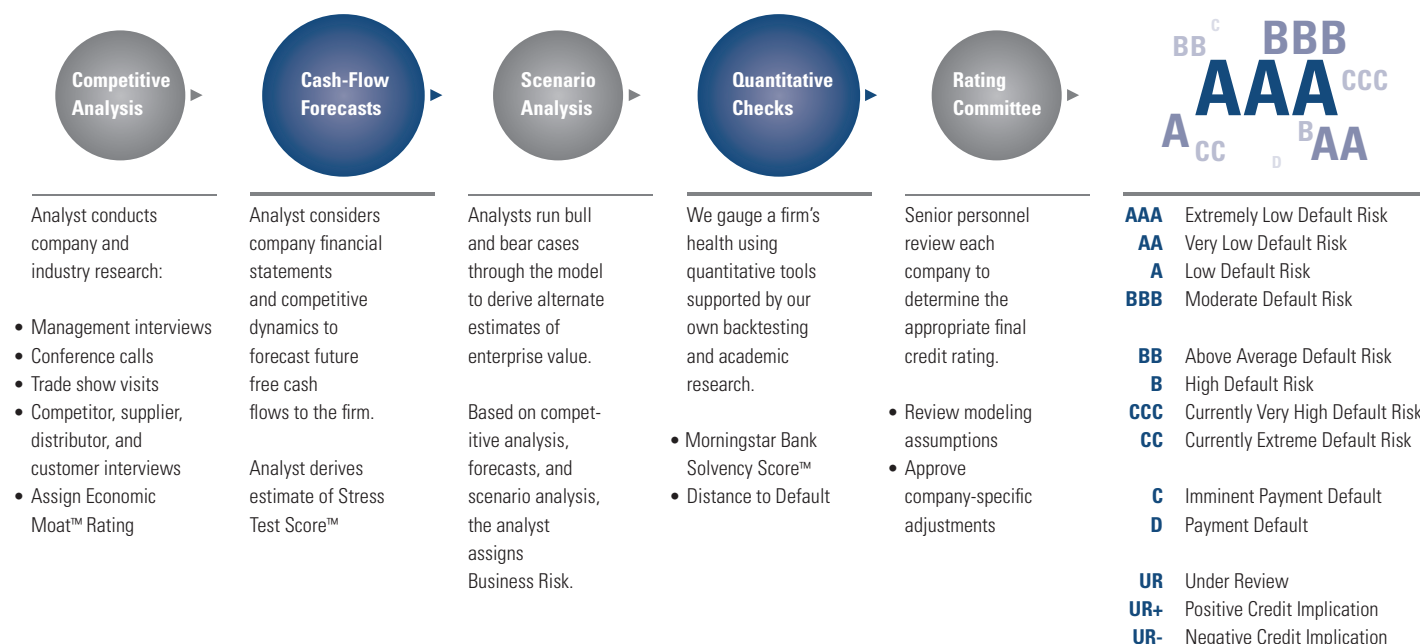

### Business Risk

Business Risk captures the fundamental uncertainty around a firm's business operations and the cash flow generated by those operations. Key components of the Business Risk rating include the Morningstar Economic Moat™ Rating and the Morningstar Uncertainty Rating.

### Cash Flow Cushion™

Morningstar's proprietary Cash Flow Cushion™ ratio is a fundamental indicator of a firm's future financial health. The measure reveals how many times a company's internal cash generation plus total excess liquid cash will cover its debt-like contractual commitments over the next five years. The Cash Flow Cushion acts as a predictor of financial distress, bringing to light potential refinancing, operational, and liquidity risks inherent to the firm.

## Morningstar Research Methodology for Determining Corporate Credit Ratings

# Morningstar's Approach to Rating Corporate Credit

The advantage of the Cash Flow Cushion ratio relative to other fundamental indicators of credit health is that the measure focuses on the future cash-generating performance of the firm derived from Morningstar's proprietary discounted cash flow model. By making standardized adjustments for certain expenses to reflect their debt-like characteristics, we can compare future projected free cash flows with debt-like cash commitments coming due in any particular year. The forward-looking nature of this metric allows us to anticipate changes in a firm's financial health and pinpoint periods where cash shortfalls are likely to occur.

## *Morningstar Solvency Score™*

The Morningstar Solvency Score™ is a quantitative score derived from both historical and forecasted financial ratios. It includes ratios that focus on liquidity (a company's ability to meet short term cash outflows), profitability (a company's ability to generate profit per unit of input), capital structure (how does the company finance its operations), and interest coverage (how much of profit is used up by interest payments).

## *Distance to Default*

The Distance to Default rating is a quantitative, market-based measure of a company's current financial health. (Distance to Default serves as the basis for Morningstar's Financial Health Grade.) The underlying model treats the equity of a firm as a call option on that firm's assets. Based on estimates of asset volatility and the Black-Scholes option-pricing model, we can estimate the likelihood that the value of the company's assets falls below the value of its liabilities, implying likely default.

For each of these four categories, we assign a score, which we then translate into a descriptive rating along the scale of Very Good / Good / Fair / Poor / Very Poor.

## **Overall Credit Rating**

The four component ratings roll up into a single preliminary credit rating. To determine the final credit rating, a credit committee of at least five senior research personnel reviews each preliminary rating.

We review credit ratings on a regular basis and as events warrant. Any change in rating must be approved by the Credit Rating Committee.

## **Investor Access**

Morningstar Corporate Credit Ratings are available on Morningstar.com. Our credit research, including detailed cash-flow models that contain all of the components of the Morningstar Corporate Credit Rating, is available to subscribers at [select.morningstar.com](http://select.morningstar.com).

### Analyst's Perspective 03 Jan 2012

Fortis' predominant regulated revenue mix provides investors a stable earnings profile and support for the stock's consistent dividend growth. Significant capital expenditures will drive near-term earnings growth and set a base for future free cash flow generation. The company's Canadian regulated utilities operate in constructive regulatory jurisdictions, but with slightly lower allowed returns on equity than its U.S. counterparts. In addition to organic growth, company management has indicated a desire to expand in the U.S. We would view this positively given the similar regulatory structures, and it could be value-accretive given where Fortis' stock traded at year-end 2011 and the typically more favorable allowed returns in the U.S. We forecast normalized earnings can grow at 5% annually through 2015. At a 3.5% dividend yield and trading at 18 times our 2012 earnings forecast, we think Fortis is overvalued.

### Key Investment Considerations

- Fortis generates more than 90% of its profit from its regulated utility segment, providing a stable earnings base.
- Across all of its utilities, regulators allow Fortis a 9.5% weighted-average return on equity, which is about 100 basis points lower than regulators allow U.S. utilities on average.
- We think the stock is overvalued as of year-end 2011, with Fortis trading at 18 times our 2012 earnings estimate.

Analyst Note:

### Profile

Fortis primarily owns and operates utility transmission and distribution assets in Canada. It has smaller stakes in electricity generation, several Caribbean utilities, and Canadian hotel and commercial real estate. The firm's regulated natural gas operations serve 950,000 customers in British Columbia. Its regulated electric utility operations serve 1.1 million customers throughout Canada and in Grand Cayman and Turks and Caicos. Its Canadian operations accounted for 92% of its total assets as of 2010.

## Morningstar Analysis

Fortis' low-risk operations result in stable earnings and support its consistent dividend growth the last four decades.

### Fortis Enters U.S. Market With Acquisition of CH Energy Group 21 Feb 2012

On Tuesday, Fortis FTS announced a \$1.5 billion cash and debt bid for CH Energy Group CHG, a regulated New York Mid-Hudson River Valley utility that would be Fortis' first based in the United States. Fortis offered \$65 per share for CH Energy, a 10.5% premium to the most recent close price.

The \$1 billion equity investment implies a pricey 1.9 times multiple on book- and rate-base equity. But that premium falls to 1.3 times book when we adjust for certain tax and regulatory balance sheet items. At this adjusted price, we believe the deal is slightly value-dilutive for Fortis, however we are reaffirming our fair value estimate given the relatively small size of the deal and regulatory approval uncertainty. New York state regulators and the Federal Energy Regulatory Commission must approve the deal.

We originally thought Fortis would make a larger splash into the U.S. market with an acquisition of \$3 billion to \$5 billion. The smaller deal for CH Energy indicates to us that there may be room for additional acquisitions in the future. Strategically, we think the acquisition is sound. The acquisition allows Fortis to enter the U.S.-regulated electric and gas distribution businesses in order to gain a better understanding of the U.S. market, with geographical proximity to its current Canadian operations.

N.Y. regulators allow CH Energy an industry average 10% return on its equity rate base through July 2013. With Fortis successfully integrating three utilities since 2004, we think the current management team is well-suited for the CH Energy Group acquisition. Our strategic enthusiasm for the merger is dampened by the price Fortis paid. To earn CH Energy's allowed return of 10%, significant synergy savings will be required to maintain current allowed returns.

### Thesis 03 Jan 2012

Fortis manages electric and gas regulated utilities in Canada

and the Caribbean, resulting in stable operating results. The company's noncore generation and real estate holding operations account for 12% of operating earnings. While we are less excited by the distractions of these noncore operations, we are comforted that management continues to focus on electric and natural gas distribution in North America.

Fortis' main regulated Canadian operations reside in British Columbia, Alberta, and Newfoundland. These relatively low-risk operations result in stable earnings and fund the consistent dividend growth experienced the past four decades. Rate base additions should be significant through 2015, as the company plans to invest CAD 4.8 billion as the healthier Canadian economy drives usage and customer growth. This should allow the firm to increase its rate base at double-digit rates each year during this expansion period. On a weighted-average basis, Fortis' allowed returns on equity in its Canadian service territories are 9.25% after a series of rate increases in 2010. While this return is lower than that typically granted to comparable U.S. utilities, it does not seem unreasonable given the low-risk nature of Fortis' transmission and delivery operations.

The company also operates small utility operations in Belize and the Caribbean. While the allowed returns can be significantly higher than its Canadian operations, these operations also have a much higher risk profile than its Canadian operations. In the summer of 2011, the Government of Belize expropriated Fortis' 70% ownership in Belize Electricity Limited, resulting in an unknown recoverable asset representing 2% of Fortis' assets. While small in nature, the earnings of these operations are exposed to additional risks of economic instability, tenuous regulation, and weather events. Management has indicated it has little interest to expand operations in the Caribbean, which we see as a positive.

We are less enthusiastic about the firm's small presence in

the cyclical hotel and commercial real estate industry. However, these holdings are held solely for tax strategy purposes and would likely be spun off should Canadian tax policy change. Currently, the Canadian government disallows entity tax consolidation, and the real estate asset revenues offset holding company expenses, mostly interest. While we believe the strategy behind these assets is sound, we worry they may distract management and drag on growth.

Fortis has expressed interest in expanding its operations through U.S. acquisitions and was outbid in June 2011 for the regulated Central Vermont Public Service Corporation. Strategically, we are encouraged by the similarity of regulatory jurisdictions and operations in the U.S. However, we were concerned by Fortis' relatively steep offer, but we like that management had the discipline to walk away when the price got too rich.

Given the high barriers to entry and regulated nature of Fortis' main operations, we award the company a narrow economic moat. The firm's exposure to noncore areas and foreign markets, though small, leads us to assign it a

medium fair value uncertainty rating. We would consider lowering our uncertainty rating if Fortis were to divest the noncore assets.

## Valuation, Growth and Profitability 03 Jan 2012

We are reinitiating coverage of Fortis under a new analyst with a CAD 29 fair value estimate, taking into consideration planned rate base additions through 2015. After the significant share dilution that occurred during 2011, we forecast 5% earnings growth in 2012 adjusting for lower dilution and normalized weather conditions. Beyond 2013, we assume 1.5% annual energy use growth at the Canadian utilities and consistent allowed returns on equity. Based on management's guidance, we forecast total investments of CAD 4.6 billion at the utilities through 2015, leading to annualized rate base growth of 6%. We use a 10.0% cost of equity and a 7.5% weighted average cost of capital in our discounted cash flow model.

## Scenario Analysis

The most significant near-term driver of our earnings forecast is our annualized energy growth rate at the regulated utilities. If energy growth is 50 bps lower than our 2013 estimate, our earnings per share would fall by 2% and our fair value estimate would decrease by CAD 2. We expect similar changes in earnings per share and fair value if energy growth is 50 bps higher.

Allowed returns at the Canadian utilities are also a significant driver of our valuation estimates. If we assume a 100 bps decrease in allowed returns on equity in 2012 and beyond, our fair value estimate decreases to CAD 21. Better-than-expected allowed returns on equity drive similar upside results. Finally, a 50 bps change in our cost of equity assumption changes our fair value estimate by about CAD 3 per share.

## Economic Moat

Fortis owns a difficult-to-replicate network of regulated

## Fortis, Inc. FTS (TSE) | ★★

power generation, transmission, and distribution assets and provides an essential energy source: electricity. In exchange for its monopoly position, regulators set Fortis' returns at levels that aim to keep customer costs low while providing adequate returns for capital providers. This implicit contract between regulators and the utility should, in the long run, allow Fortis to earn its cost of capital, and leads us to assign Fortis' regulated utilities a narrow economic moat. As with all regulated utilities, we think regulatory caps on revenue and returns preclude Fortis from establishing a wide economic moat.

### Moat Trend

We assign Fortis a stable moat due to its monopoly position and stable regulatory environment that will continue to allow the firm to earn its cost of capital. We do not expect the regulatory relationship to change in the future. The regulatory framework that caps revenue and returns prevent the firm from attaining a wide moat, as with all regulated utilities that we cover.

### Bulls Say/Bears Say

#### Bulls Say

- ▶ The company operates a stable business profile, offering a strong base for consistent earnings.
- ▶ With an aggressive capital expenditure plan, rate base growth is forecast to grow at a 6% compound annual growth rate.
- ▶ Fortis has consistent dividend growth history, paying consecutive quarterly dividends for four decades and growing the dividend faster than most of its peers in recent years.
- ▶ Fortis operations are based in higher-growth regions within Canada, mainly in Alberta and British Columbia.

#### Bears Say

- ▶ The Canadian regulatory environment offers lower allowed returns than its U.S. peers.
- ▶ The recent Belize expropriation demonstrates how Caribbean operations offer higher growth opportunities but at a substantially higher risk.
- ▶ The company operates noncore hotel and commercial real estate assets, potentially distracting management from core regulated operations.

### Financial Health

With a debt/capital ratio of just under 60% and interest coverage of 2.1 times, Fortis' financial health looks reasonably sound, particularly in light of its stable, low-risk business model. Fortis undertook a significant equity offering of 9 million shares resulting in CAD 300 million of proceeds. We expect the company to be active in the capital markets consistent with its current capital structure throughout its capital expenditure plan.

### Capital Structure

Between 2011 and 2015, Fortis has CAD 5.5 billion of planned capital expenditures, which will require the company to access the debt and equity capital markets. We anticipate that Fortis will issue CAD 200 million in debt in 2012 and has manageable debt maturities through 2015. The company recently issued significant equity in July 2011 to help finance its capital expenditure plan, and we expect Fortis to issue minimal additional equity in 2012 to accommodate employee stock purchase plans and an executive DRIP plan.

### Enterprise Risk

Fortis' key risk to future earnings is regulation. The company faces regulatory risks that create uncertainties around costs and allowed returns, especially given the significant capital expenditure plan from 2011 to 2015. Fortis is also exposed to political and economic instability at its Caribbean operations. With an eye towards acquisitions, the company risks overpaying for regulated U.S. assets and must be mindful of the strategic benefits. As with all regulated utilities, Fortis faces the risk of an inflationary environment that would raise borrowing costs and make other investments more attractive for income-seeking investors.

### Stewardship: NA 03 Jan 2012

Stanley Marshall has been president and CEO since 1995, leading a group of experienced utility executives. Total direct compensation was \$4.0 million for 2010, which we believe is in line with Fortis' industry group. Marshall's total compensation comprises base salary, annual incentives, stock options, and performance stock units, with 75% of total compensation at risk. We do not like that annual cash incentives are based on earnings per share targets, as EPS can be manipulated and may not be an indication of shareholder value creation. Marshall also has a significant ownership stake of 14 times his salary, which we believe aligns shareholder and management interests. From a corporate governance perspective, we like that the CEO and chairman positions are separated. While the board of directors has vast experience, we would prefer that members of the board have more direct utility experience.

### Analyst Notes

#### Strong Customer Growth Generates Impressive 2011 Results at Fortis. 09 Feb 2012

Fortis Inc. FTS posted \$1.75 in EPS in 2011, higher than our own \$1.71 estimate and a 6% increase from 2010. Strong customer growth and higher energy deliveries at its regulated Canadian utilities drove results. We are reaffirming our fair value estimate and forecast 5% EPS growth through 2016 as \$5.5 billion in planned capital expenditures should drive earnings expansion. Fortis increased dividends 3.5% in mid-December to \$1.20, an implied 66% payout ratio, with a current yield of 3.5%. At our fair value estimate, Fortis would yield 4%.

In 2012, significant regulatory rulings at the company's Newfoundland Power and FortisBC subsidiaries could significantly impact future operating results. With the Alberta Utilities Commission ruling in December 2011, allowed returns at Fortis Alberta were decreased 25 basis points to just 8.75%. Similar cuts could be seen at the firm's other regulated Canadian operating companies, putting pressure on earnings growth. Management provided no EPS guidance for 2012.

# Research Methodology for Valuing Companies

## Components of Our Methodology

- ▶ Economic Moat™ Rating
- ▶ Moat Trend™ Rating
- ▶ Moat Valuation
- ▶ Three-Stage Discounted Cash Flow
- ▶ Weighted Average Cost of Capital
- ▶ Fair Value Estimate
- ▶ Scenario Analysis
- ▶ Uncertainty Ratings
- ▶ Margin of Safety
- ▶ Consider Buying/Selling
- ▶ Stewardship Grades
- ▶ Financial Health Grades

The Morningstar Rating for stocks identifies companies trading at a discount or premium to our analysts' assessment of their fair value. A number of components drive this rating: (1) our assessment of the firm's economic moat, (2) our estimate of the stock's intrinsic value based on a discounted cash-flow model, (3) the margin of safety bands we apply to our Fair Value Estimate, and (4) the current stock price relative to our fair value estimate.

The concept of the Morningstar Economic Moat™ Rating plays a vital role not only in our qualitative assessment of a firm's investment potential, but also in our valuation process. We assign three moat ratings—none, narrow, or wide—as well as the Morningstar Moat Trend™ Rating—positive, stable, or negative—to each company we cover. There are two major requirements for firms to earn either a narrow or wide moat rating: (1) the prospect of earning above-average returns on capital; and (2) some competitive edge that prevents these returns from quickly eroding. The assumptions we make about a firm's moat determine the length of “economic outperformance” that we assume in the latter stages

of our valuation model. We also quantify the value of each firm's moat, which represents the difference between a firm's enterprise value and the value of the firm if no future net investment were to occur. Said differently, moat value identifies the value generated by the firm as a result of any future net new investment. Our Moat Trend Rating reflects our assessment of whether each firm's competitive advantage is either getting stronger or weaker, since we think of moats as dynamic, rather than static.

At the heart of our valuation system is a detailed projection of a company's future cash flows. The first stage of our three-stage discounted cash flow model can last from 5 to 10 years and contains numerous detailed assumptions about various financial and operating items. The second stage of our model—where a firm's return on new invested capital (RONIC) and earnings growth rate implicitly fade until the perpetuity year—can last anywhere from 0 years (for no-moat firms) to 20 years (for wide-moat companies). In our third stage, we assume the firm's RONIC equals its weighted average cost of capital, and we calculate a continuing value using a standard

\* Please contact a sales representative for more information.

perpetuity formula. In deciding on the rate at which to discount future cash flows, we ignore stock-price volatility. Instead, we rely on a system that measures the estimated volatility of a firm's underlying future free cash flows, taking into account fundamental factors such as the diversity of revenue sources and the firm's fixed cost structure.

We also employ a number of other tools to augment our valuation process, including scenario analysis, where we assess the likelihood and performance of a business under different economic and firm-specific conditions. Our analysts typically model three to five scenarios for each company we cover, stress-testing the model and examining the distribution of resulting fair values.

The Morningstar Uncertainty Rating captures the range of these potential fair values, based on an assessment of a company's future sales range, the firm's operating and financial leverage, and any other contingent events that may impact the business. Our analysts use this range to assign an appropriate margin of safety—or the discount/premium

to a fair value we apply in setting our consider buying/consider selling prices. Firms trading below our consider-buying prices receive our highest rating of five stars, whereas firms trading above our consider-selling prices receive our lowest rating of one star.

Our Stewardship Grades show our assessment of a management's commitment to shareholders, and include an analysis of a firm's transparency, incentives and ownership. We also provide Financial Health Grades, which are quantitative measures based on firms' distance to default scores. Distance to default measures the distance between the market value of a company's assets and the book value of its liabilities (expressed in standard deviations of asset value). For our grades, A is equivalent to "Excellent," while F is "Very Poor."

### Morningstar Margin of Safety and Star Rating Bands

\* Occasionally a stock's uncertainty will be too high for us to estimate, in which case we label it Extreme.

# Morningstar's Approach to Rating Corporate Credit

- Offers a proprietary measure of the credit quality of companies on our coverage list.
- Encapsulates our in-depth modeling and quantitative work in one letter grade.
- Allows investors to rank companies by each of the four underlying components of our credit ratings, including both analyst-driven and quantitative measures.
- Provides access to all the underlying forecasts that go into the rating, available through our institutional service.

## Purpose

The Morningstar Corporate Credit Rating measures the ability of a firm to satisfy its debt and debt-like obligations. The higher the rating, the less likely we think the company is to default on these obligations.

The Morningstar Corporate Credit Rating builds on the modeling expertise of our securities research team. For each company, we publish:

- Five years of detailed pro-forma financial statements
- Annual estimates of free cash flow
- Annual forecasts of return on invested capital
- Scenario analyses, including upside and downside cases
- Forecasts of leverage, coverage, and liquidity ratios for five years
- Estimates of off balance sheet liabilities

These forecasts are key inputs into the Morningstar Corporate Credit Rating and are available to subscribers at [select.morningstar.com](http://select.morningstar.com).

## Methodology

We feel it's important to perform credit analysis through different lenses—qualitative and quantitative, as well as fundamental and market-driven. We therefore evaluate each company in four broad categories.

### Business Risk

Business Risk captures the fundamental uncertainty around a firm's business operations and the cash flow generated by those operations. Key components of the Business Risk rating include the Morningstar Economic Moat™ Rating and the Morningstar Uncertainty Rating.

### Cash Flow Cushion™

Morningstar's proprietary Cash Flow Cushion™ ratio is a fundamental indicator of a firm's future financial health. The measure reveals how many times a company's internal cash generation plus total excess liquid cash will cover its debt-like contractual commitments over the next five years. The Cash Flow Cushion acts as a predictor of financial distress, bringing to light potential refinancing, operational, and liquidity risks inherent to the firm.

## Morningstar Research Methodology for Determining Corporate Credit Ratings

# Morningstar's Approach to Rating Corporate Credit

The advantage of the Cash Flow Cushion ratio relative to other fundamental indicators of credit health is that the measure focuses on the future cash-generating performance of the firm derived from Morningstar's proprietary discounted cash flow model. By making standardized adjustments for certain expenses to reflect their debt-like characteristics, we can compare future projected free cash flows with debt-like cash commitments coming due in any particular year. The forward-looking nature of this metric allows us to anticipate changes in a firm's financial health and pinpoint periods where cash shortfalls are likely to occur.

## *Morningstar Solvency Score™*

The Morningstar Solvency Score™ is a quantitative score derived from both historical and forecasted financial ratios. It includes ratios that focus on liquidity (a company's ability to meet short term cash outflows), profitability (a company's ability to generate profit per unit of input), capital structure (how does the company finance its operations), and interest coverage (how much of profit is used up by interest payments).

## *Distance to Default*

The Distance to Default rating is a quantitative, market-based measure of a company's current financial health. (Distance to Default serves as the basis for Morningstar's Financial Health Grade.) The underlying model treats the equity of a firm as a call option on that firm's assets. Based on estimates of asset volatility and the Black-Scholes option-pricing model, we can estimate the likelihood that the value of the company's assets falls below the value of its liabilities, implying likely default.

For each of these four categories, we assign a score, which we then translate into a descriptive rating along the scale of Very Good / Good / Fair / Poor / Very Poor.

## **Overall Credit Rating**

The four component ratings roll up into a single preliminary credit rating. To determine the final credit rating, a credit committee of at least five senior research personnel reviews each preliminary rating.

We review credit ratings on a regular basis and as events warrant. Any change in rating must be approved by the Credit Rating Committee.

## **Investor Access**

Morningstar Corporate Credit Ratings are available on Morningstar.com. Our credit research, including detailed cash-flow models that contain all of the components of the Morningstar Corporate Credit Rating, is available to subscribers at [select.morningstar.com](http://select.morningstar.com).

### Contents

Analyst Note	1
Morningstar Analyst Forecasts	2

### Analyst Note 04 May 2012

Fortis Inc FTS posted slightly lower earnings per share of \$0.64 compared with \$0.66 in the year-ago quarter. The results were down mostly due to a common stock offering in mid-2011. Excluding the share offering, results were flat from the prior year. In 2012, the company will pay \$1.20 per share in dividends, up from 3.4% from 2011. At our fair value estimate, the current dividend yield is 4%. We are reaffirming our fair value estimate and forecast 2% EPS growth in 2012.

The company's Canadian regulated gas utilities overall earnings increased 9%, mostly due to weather, continued infrastructure investment, and volume strength from certain industrial sectors. Conversely, the company's Canadian regulated utilities earnings were mostly flat, in large part to regulatory mechanisms and expense timing. The company received clarity with regulatory decisions at FortisBC Energy gas delivery and Fortis Alberta distribution rates, with pending regulatory outcomes expected in 2012 for FortisBC, Fortis Alberta, and Newfoundland Power. Finally, favorable weather increased production in Belize with a favorable \$3 million benefit to the company's bottom line.

Announced in February 2012, the company entered into a \$1.5 billion purchase agreement to acquire New York regulated utility CH Energy Group CHG. We believe the transaction is slightly value-dilutive for Fortis shareholders. Fortis is awaiting regulatory approval from New York regulators and the Federal Energy Regulatory Commission, and given the size and nature of the transaction, we forecast a relatively high 85% probability that the transaction closes. Company management expects the transaction to close in early 2013.

### Profile

Fortis primarily owns and operates utility transmission and distribution assets in Canada. It has smaller stakes in electricity generation, several Caribbean utilities, and Canadian hotel and commercial real estate. The firm's regulated natural gas operations serve 950,000 customers in British Columbia. Its regulated electric utility operations serve 1.1 million customers throughout Canada and in Grand Cayman and Turks and Caicos. Its Canadian operations accounted for 92% of its total assets as of 2010.

### Analyst's Perspective 03 May 2012

Fortis' predominant regulated revenue mix provides investors a stable earnings profile and support for the stock's consistent dividend growth. Significant capital expenditures will drive near-term earnings growth and set a base for future free cash flow generation. The company's Canadian regulated utilities operate in constructive regulatory jurisdictions but with slightly lower allowed returns on equity than its U.S. counterparts. In addition to organic growth, company management has expanded into the U.S. market with the announced acquisition of CHEnergy in February 2012. Given the small size of the transaction, we expect the company to continue U.S. expansion after the transaction is complete. We forecast normalized earnings can grow at 5% annually through 2015. At a 3.5% dividend yield and trading at 18 times our 2012 earnings forecast, we think Fortis is overvalued.

### Key Investment Considerations

- Fortis generates more than 90% of its profit from its regulated utility segment, providing a stable earnings base.
- Across all of its utilities, regulators allow Fortis a 9.5% weighted-average return on equity, which is about 100 basis points lower than regulators allow U.S. utilities on average.
- Trading at 18 times our 2012 earnings estimate as of May, we think the stock is overvalued.

### Profile

Fortis primarily owns and operates utility transmission and distribution assets in Canada. It has smaller stakes in electricity generation, several Caribbean utilities, and Canadian hotel and commercial real estate. The firm's regulated natural gas operations serve 950,000 customers in British Columbia. Its regulated electric utility operations serve 1.1 million customers throughout Canada and in Grand Cayman and Turks and Caicos. Its Canadian operations accounted for 92% of its total assets as of 2010.

## Morningstar Analysis

Fortis' low-risk operations result in stable earnings and support its consistent dividend growth the last four decades.

### Fortis Reports Flat First-Quarter Earnings 04 May 2012

Fortis Inc. FTS posted slightly lower earnings per share of \$0.64 compared with \$0.66 in the year-ago quarter. The results were down mostly due to a common stock offering in mid-2011. Excluding the share offering, results were flat from the prior year. In 2012, the company will pay \$1.20 per share in dividends, up from 3.4% from 2011. At our fair value estimate, the current dividend yield is 4%. We are reaffirming our fair value estimate and forecast 2% EPS growth in 2012.

The company's Canadian regulated gas utilities overall earnings increased 9%, mostly due to weather, continued infrastructure investment, and volume strength from certain industrial sectors. Conversely, the company's Canadian regulated utilities earnings were mostly flat, in large part to regulatory mechanisms and expense timing. The company received clarity with regulatory decisions at FortisBC Energy gas delivery and Fortis Alberta distribution rates, with pending regulatory outcomes expected in 2012 for FortisBC, Fortis Alberta, and Newfoundland Power. Finally, favorable weather increased production in Belize with a favorable \$3 million benefit to the company's bottom line.

Announced in February 2012, the company entered into a \$1.5 billion purchase agreement to acquire New York regulated utility CH Energy Group CHG. We believe the transaction is slightly value-dilutive for Fortis shareholders. Fortis is awaiting regulatory approval from New York regulators and the Federal Energy Regulatory Commission, and given the size and nature of the transaction, we forecast a relatively high 85% probability that the transaction closes. Company management expects the transaction to close in early 2013.

### Thesis 03 May 2012

Fortis manages electric and gas regulated utilities in Canada

and the Caribbean, resulting in stable operating results. The company's noncore generation and real estate holding operations account for 12% of operating earnings. While we are less excited by the distractions of these noncore operations, we are comforted that management continues to focus on electric and natural gas distribution in North America.

Fortis' main regulated Canadian operations reside in British Columbia, Alberta, and Newfoundland. These relatively low-risk operations result in stable earnings and fund the consistent dividend growth experienced the past four decades. Rate base additions should be significant through 2015, as the company plans to invest CAD 4.8 billion as the healthier Canadian economy drives usage and customer growth. This should allow the firm to increase its rate base at double-digit rates each year during this expansion period. On a weighted-average basis, Fortis' allowed returns on equity in its Canadian service territories are 9.25% after a series of rate increases in 2010. While this return is lower than that typically granted to comparable U.S. utilities, it does not seem unreasonable given the low-risk nature of Fortis' transmission and delivery operations.

The company also operates small utility operations in Belize and the Caribbean. While the allowed returns can be significantly higher than its Canadian operations, these operations also have a much higher risk profile than its Canadian operations. In the summer of 2011, the Government of Belize expropriated Fortis' 70% ownership in Belize Electricity Limited, resulting in an unknown recoverable asset representing 2% of Fortis' assets. While small in nature, the earnings of these operations are exposed to additional risks of economic instability, tenuous regulation, and weather events. Management has indicated it has little interest to expand operations in the Caribbean, which we see as a positive.

We are less enthusiastic about the firm's small presence in

# Fortis, Inc. FTS (TSE) ★★

**Price/Fair Value** Morningstar data as of May 03 2012

the cyclical hotel and commercial real estate industry. However, these holdings are held solely for tax strategy purposes and would likely be spun off should Canadian tax policy change. Currently, the Canadian government disallows entity tax consolidation, and the real estate asset revenues offset holding company expenses, mostly interest. While we believe the strategy behind these assets is sound, we worry they may distract management and drag on growth.

Fortis has long expressed interest in expanding its operations through U.S. acquisitions. In February 2012, Fortis announced a \$1.5 billion cash and debt bid for CH Energy Group CHG, a regulated New York Mid-Hudson River Valley utility. The acquisition allows Fortis to enter the U.S.-regulated electric and gas distribution businesses in order to gain a better understanding of the U.S. market, with geographical proximity to its current Canadian operations. Given the relatively small size of CH Energy, we would look for Fortis to continue expansion through acquisitions after the CH Energy transaction is complete.

Given the high barriers to entry and regulated nature of

Fortis' main operations, we award the company a narrow economic moat. The firm's exposure to noncore areas and foreign markets, though small, leads us to assign it a medium fair value uncertainty rating. We would consider lowering our uncertainty rating if Fortis were to divest the noncore assets.

## Valuation, Growth and Profitability 03 May 2012

We are increasing our fair value estimate to CAD 30 per share from CAD 29 per share after updating our five-year operating plan and incorporating the planned CH Energy merger. In accounting for the merger, we adjusted for certain tax and regulatory balance sheet items. We believe that the deal is only slightly value-dilutive for Fortis.

After the significant share dilution in 2011, we forecast 5% earnings growth in 2012 adjusting for lower dilution and normalized weather conditions. Beyond 2013, we assume 1.5% annual energy use growth at the Canadian utilities and consistent allowed returns on equity. Based on management's guidance, we forecast total investments of CAD 4.6 billion at the utilities through 2015, leading to annualized rate base growth of 6%.

We use a 10.0% cost of equity and current credit spreads to arrive at a 7.1% weighted average cost of capital in our discounted cash flow model.

## Scenario Analysis

The most significant near-term driver of our earnings forecast is our annualized energy growth rate at the regulated utilities. If energy growth is 50 bps lower than our 2013 estimate, our earnings per share would fall by 2% and our fair value estimate would decrease by CAD 2. We expect similar changes in EPS and fair value if energy growth is 50 bps higher.

Allowed returns at the Canadian utilities are also a significant driver of our valuation estimates. If we assume

## Fortis, Inc. FTS (TSE) | ★★

33.82 CAD	30.00 CAD	21.00 CAD	40.50 CAD	Medium	Narrow		Standard	—	Utilities - Regulated

a 100 bps decrease in allowed returns on equity in 2012 and beyond, our fair value estimate decreases to CAD 21. Better-than-expected allowed returns on equity drive similar upside results. Finally, a 50 bps change in our cost of equity assumption changes our fair value estimate by about CAD 3 per share.

### Economic Moat

Fortis owns a difficult-to-replicate network of regulated power generation, transmission, and distribution assets and provides an essential energy source: electricity. In exchange for its monopoly position, regulators set Fortis' returns at levels that aim to keep customer costs low while providing adequate returns for capital providers. This implicit contract between regulators and the utility should, in the long run, allow Fortis to earn its cost of capital, and leads us to assign Fortis' regulated utilities a narrow economic moat. As with all regulated utilities, we think regulatory caps on revenue and returns preclude Fortis from establishing a wide economic moat.

### Moat Trend

We assign Fortis a stable moat due to its monopoly position and stable regulatory environment that will continue to allow the firm to earn its cost of capital. We do not expect the regulatory relationship to change in the future. The regulatory framework that caps revenue and returns prevent the firm from attaining a wide moat, as with all regulated utilities that we cover.

### Bulls Say/Bears Say

#### Bulls Say

- ▶ The company operates a stable business profile, offering a strong base for consistent earnings and dividend growth.
- ▶ With an aggressive capital expenditure plan, rate base growth could increase at a 6% compound annual growth rate.
- ▶ Fortis has consistent dividend growth history, paying consecutive quarterly dividends for four decades and growing the dividend faster than most of its peers in recent years.
- ▶ Fortis operations are based in higher-growth regions within Canada, mainly in Alberta and British Columbia.

#### Bears Say

- ▶ The Canadian regulatory environment offers lower allowed returns than its U.S. peers.
- ▶ The recent Belize expropriation demonstrates how Caribbean operations offer higher growth opportunities but at a substantially higher risk.
- ▶ The company operates noncore hotel and commercial real estate assets, potentially distracting management from core regulated operations.

### Financial Health

With a debt/capital ratio of just under 60% and interest coverage of 3.0 times, Fortis' financial health looks reasonably sound, particularly in light of its stable, low-risk business model. Fortis undertook a significant equity offering of 9 million shares resulting in CAD 300 million of proceeds. We expect the company to be active in the capital markets consistent with its current capital structure throughout its capital expenditure plan.

### Capital Structure

Between 2012 and 2016, Fortis has CAD 6.0 billion of planned capital expenditures, which will require the company to access the debt and equity capital markets. We anticipate that Fortis will issue CAD 200 million in debt in 2012 and has manageable debt maturities through 2015. The company recently issued significant equity in July 2011 to help finance its capital expenditure plan, and we expect Fortis to issue minimal additional equity in 2012 to accommodate employee stock purchase plans and an executive DRIP plan.

### Enterprise Risk

Fortis' key risk to future earnings is regulation. The company faces regulatory risks that create uncertainties around costs and allowed returns, especially given the significant capital expenditure plan in 2012-16. Fortis is also exposed to political and economic instability at its Caribbean operations. With an eye towards acquisitions, the company risks overpaying for regulated U.S. assets and must be mindful of the strategic benefits. As with all regulated utilities, Fortis faces the risk of an inflationary environment that would raise borrowing costs and make other investments more attractive for income-seeking investors.

### Stewardship: 03 May 2012

Stanley Marshall has been president and CEO since 1995, leading a group of experienced utility executives. Total direct compensation is in line with Fortis' industry group. Marshall's total compensation comprises base salary, annual incentives, stock options, and performance stock units, with 75% of total compensation at risk. We do not like that annual cash incentives are based on earnings per share targets, as EPS can be manipulated and may not be an indication of shareholder value creation. Marshall also has a significant ownership stake of 14 times his salary, which we believe aligns shareholder and management interests. From a corporate governance perspective, we like that the CEO and chairman positions are separated. While the board of directors has vast experience, we would prefer that members of the board have more direct utility experience.

## Analyst Notes

### Fortis Reports Flat First-Quarter Earnings 04 May 2012

Fortis Inc. FTS posted slightly lower earnings per share of \$0.64 compared with \$0.66 in the year-ago quarter. The results were down mostly due to a common stock offering in mid-2011. Excluding the share offering, results were flat from the prior year. In 2012, the company will pay \$1.20 per share in dividends, up from 3.4% from 2011. At our fair value estimate, the current dividend yield is 4%. We are reaffirming our fair value estimate and forecast 2% EPS growth in 2012.

The company's Canadian regulated gas utilities overall earnings increased 9%, mostly due to weather, continued infrastructure investment, and volume strength from certain industrial sectors. Conversely, the company's Canadian regulated utilities earnings were mostly flat, in large part to regulatory mechanisms and expense timing. The company received clarity with regulatory decisions at FortisBC Energy gas delivery and Fortis Alberta distribution rates, with pending regulatory outcomes expected in 2012 for FortisBC, Fortis Alberta, and Newfoundland Power. Finally, favorable weather increased production in Belize with a favorable \$3 million benefit to the company's bottom line.

Announced in February 2012, the company entered into a \$1.5 billion purchase agreement to acquire New York regulated utility CH Energy Group CHG. We believe the transaction is slightly value-dilutive for Fortis shareholders. Fortis is awaiting regulatory approval from New York regulators and the Federal Energy Regulatory Commission, and given the size and nature of the transaction, we forecast a relatively high 85% probability that the transaction closes. Company management expects the transaction to close in early 2013.

### Fortis Enters U.S. Market With Acquisition of CH Energy Group 21 Feb 2012

On Tuesday, Fortis FTS announced a \$1.5 billion cash and debt bid for CH Energy Group CHG, a regulated New York Mid-Hudson River Valley utility that would be Fortis' first based in the United States. Fortis offered \$65 per share for CH Energy, a 10.5% premium to the most recent close price.

The \$1 billion equity investment implies a pricey 1.9 times multiple on book- and rate-base equity. But that premium falls to 1.3 times book when we adjust for certain tax and regulatory balance sheet items. At this adjusted price, we believe the deal is slightly value-dilutive for Fortis, however we are reaffirming our fair value estimate given the relatively small size of the deal and regulatory approval uncertainty. New York state regulators and the Federal Energy Regulatory Commission must approve the deal.

We originally thought Fortis would make a larger splash into the U.S. market with an acquisition of \$3 billion to \$5 billion. The smaller deal for CH Energy indicates to us that there may be room for additional acquisitions in the future. Strategically, we think the acquisition is sound. The acquisition allows Fortis to enter the U.S.-regulated electric and gas distribution businesses in order to gain a better understanding of the U.S. market, with geographical proximity to its current Canadian operations.

N.Y. regulators allow CH Energy an industry average 10% return on its equity rate base through July 2013. With Fortis successfully integrating three utilities since 2004, we think the current management team is well-suited for the CH Energy Group acquisition. Our strategic enthusiasm for the merger is dampened by the price Fortis paid. To earn CH Energy's allowed return of 10%, significant synergy savings will be required to maintain current allowed returns.

### Analyst Notes

#### Strong Customer Growth Generates Impressive 2011 Results at Fortis. 09 Feb 2012

Fortis Inc. FTS posted \$1.75 in EPS in 2011, higher than our own \$1.71 estimate and a 6% increase from 2010. Strong customer growth and higher energy deliveries at its regulated Canadian utilities drove results. We are reaffirming our fair value estimate and forecast 5% EPS growth through 2016 as \$5.5 billion in planned capital expenditures should drive earnings expansion. Fortis increased dividends 3.5% in mid-December to \$1.20, an implied 66% payout ratio, with a current yield of 3.5%. At our fair value estimate, Fortis would yield 4%.

In 2012, significant regulatory rulings at the company's Newfoundland Power and FortisBC subsidiaries could significantly impact future operating results. With the Alberta Utilities Commission ruling in December 2011, allowed returns at Fortis Alberta were decreased 25 basis points to just 8.75%. Similar cuts could be seen at the firm's other regulated Canadian operating companies, putting pressure on earnings growth. Management provided no EPS guidance for 2012.
