  - Veritas

## FORTIS INC.

### Results Lower on FX; Acquisition Expenses

**Lowering our Numbers:** We reiterate our EW rating on Fortis and lower our price target from CAD35 to CAD33, premised upon the sum-of-the-parts valuation methodology provided later in the report. We are lowering our FY12-14/EPS estimates from CAD1.73/1.83/1.95 to CAD1.73/1.78/1.89 on our updated share count. Our estimates do not include any contribution from CH Energy Group (CHG) which we calculated would be about \$0.02 accretive in the first year.

**Results Impacted by FX; CHG Acquisition Costs:** Fortis reported EPS of CAD0.24 vs CAD0.31 last year, consensus expectations of CAD0.26, and our estimates of CAD0.27. Results were significantly impacted by FX impacts and CHG acquisition costs. Improved performance at the western Canadian electric utilities was partially offset by decreased non-regulated hydroelectric generation, and a higher loss year-on-year at the regulated gas utilities.

**Capex Forecast:** Management projects 2012 capital expenditures at \$1.3bn and sees total capital expenditures at \$5.5bn through 2016. CH Energy Group would add approximately \$0.5bn for the period 2013-16, on our estimates.

**Acquisitions:** In August Fortis Turks & Caicos acquired Turks & Caicos Utilities Ltd. (TCU) for CAD13mn. TCU serves 2,000 customers on Grand Turk and Salt Cay and holds a 50-year license through 2036. In October, Fortis Properties acquired the 126-room StationPark All Suite Hotel in London, Ontario for approximately CAD13mn. FortisBC Electric remains in talks to acquire electric utility assets from the City of Kelowna, which serves 15,000 customers, for CAD55mn. The Kelowna transaction and the CH Energy Group transaction are both expected to close in 1Q 2013.

## Investment case

**Why Equal Weight?** We are Equal Weight as we see shares as fairly valued. Incremental upside could come from higher sales growth and execution of potential JV transmission project opportunities in Ontario. This upside potential is offset by potential for downside in growth and execution risk related to on time and on budget completion of large construction projects. We don't see a lot of downside risk from current levels given the quality of regulation in British Columbia.

## Upside case CAD 40.00

We increase sales growth by 1%, include the value of potential joint venture transmission projects in Ontario (NPV \$3/share), and value Canadian utility operations at a 25% premium. This leads to an indicative valuation of \$40.

## Downside case CAD 29.00

We decrease sales growth by 1%, do not include any transmission upside (similar to our base case), and value Canadian utility operations at a 15% premium. This leads to an indicative valuation of \$29.

## Upside/Downside scenarios

Source: Barclays Research

Source: Company data, Barclays Research

Note: FY End Dec

## Acquisition Strategy Continues to Move Forward

Fortis continues to execute effectively on its acquisition and rate base growth strategy. Two acquisitions were recently completed.

1. **Turk & Caicos Utilities Ltd:** Fortis Turks & Caicos acquired Turk & Caicos Utilities Ltd. (TCU) for approximately CAD13mn, inclusive of the assumption of CAD5mn in debt. TCU serves 2,000 residential and commercial customers on Grand Turk and Salt Cay, with a diesel generating capacity of 9MWs.
2. **StationPark All Suites hotel:** Fortis Properties acquired the StationPark All Suites hotel, a 126-room property in London, Ontario for approximately CAD13mn.

### Pending Deals

**Utility assets of the City of Kelowna:** FortisBC Electric is continuing negotiations to acquire the electric utility assets of the City of Kelowna. FortisBC Electric currently operates and maintains the city's electrical assets under a contract in existence since 2000. The company also currently provides the city with electricity under a wholesale contract arrangement. The city has approximately 55,000 customers and the price for the acquisition would be approximately CAD55mn. The transaction is subject to certain conditions and approvals, including regulatory approval. The parties expect the transaction to close by the end of the first quarter of next year.

**CH Energy Group (CHG):** Fortis is also currently involved in the pending acquisition of New York-based utility CH Energy Group (CHG). The acquisition still requires approval by the New York Public Service Commission. The acquisition was announced in February of this year for a purchase price of US\$65.00 per share for CHG, or an aggregate purchase price of US\$1.5bn including the assumption of US\$0.5bn in debt. The company expects the transaction to close by the end of the first quarter of next year and be immediately accretive to earnings per share. We estimate about \$0.02/share of accretion in the first year. In June 2012, the company issued 18.5mn subscription receipts at CAD32.50/share, in a bought deal offering raising proceeds of approximately CAD600mn. The proceeds are being held in escrow until the merger is completed. The subscription receipts trade on the Toronto Stock Exchange under the symbol FTS.R and will entitle the holder, upon satisfaction of the release conditions, the receipt of one share of Fortis common stock and common dividends eligible to be received between issuance of the subscription receipts and the closing of the transaction.

### Regulatory Update

- In October, FortisBC Energy (Gas) received approval in British Columbia under the Greenhouse Gas Reductions (Clean Energy) Regulation for rate treatment related to the provision of compressed and liquefied natural gas (CNG and LNG) for transportation vehicles. We see this as a potential growth area for the company in the future. Also in British Columbia, the generic cost of capital proceed in set to have oral hearings on December 12, and we continue to expect a decision in late 2012 or early 2013. We see some risk to allowed returns given the low interest rate environment.
- In August, the British Columbia Utilities Commission (BCUC) issued its decision in the 2012-13 rate application for FortisBC Electric. The decision left capital structure and allowed returns unchanged from 2011, pending the decision in the ongoing generic cost of capital proceeding. The decision incorporates a forecast mid-year rate base of CAD1,112mn for 2012 and CAD1,173 for 2013. The decision also approved capital

expenditures of CAD100mn for 2012 and CAD120mn for 2013. The decision incorporated a pass through related to purchase power variances vs forecasts, but denied a pass through related to finance costs variances vs forecasts. The company could benefit from not having a pass through related to finance costs if the low interest rate environment continues.

- FortisBC Electric filed its advanced metering infrastructure (AMI) application in July of this year and it is currently under review by the BCUC. The AMI project will replace all of the company's manual read meters with advanced meters, is projected to cost CAD48mn and be completed in 2015.
- In Alberta, the Alberta Utilities Commission (AUC) outlined a general framework for performance based ratemaking (PBR) in the province set to begin in 2013 for a five-year term. Under PBR a formula will be used to determine customer rates on an annual basis. The current structure proposed by the AUC has raised concerns around the treatment of certain capital expenditures, which the company will seek to clarify in its compliance application to be submitted in November 2012. The company has sought leave to appeal this decision to the Alberta Court of Appeal. We continue to view Alberta as a constructive regulatory environment but see decisions such as this one, even though only preliminary as showing some weakening in the regulatory construct on the margin.
- In Newfoundland & Labrador, Newfoundland Power filed a general rate application with the Public Utilities Board (PUB) for increased customer rates in 2013 and for a determination of cost of capital. Hearings are expected in the first quarter of 2013. Cost of capital could have downside risks if the PUB uses a formula mechanism in determining the appropriate cost of equity. In October the PUB approved Newfoundland Power's 2013 capital expenditure plan of CAD82mn.
- In the Caribbean, Caribbean Utilities on Grand Cayman submitted its 2013-2017 capital investment plan to the Electricity Regulation Authority (ERA) totalling US\$125mn.

## Valuation Methodology

Our \$33 price target is premised upon a sum-of-the-parts (SOTP) methodology. We apply a 20% premium to the 2014 US regulated utility multiple of 14.4x our Canadian utility operations '14E EPS of \$1.85. For Caribbean operations we use the publically traded Caribbean Utilities Corporation '14 multiple of 12.2x based upon consensus estimates. We apply this to our Caribbean '14E EPS of \$0.19. For unregulated generation we use a '14 power multiple of 14.4x our '14E EPS of \$0.07. For corporate and other we use the straight '14 US regulated utility multiple of 14.4x our (\$0.41) EPS for the segment. To this we add a valuation for the real estate operations based on a 5% cap rate (implying a 20x multiple) on our '14E EPS of \$0.14.

Our prior \$35 price target was premised upon a SOTP methodology. We applied a 20% premium to the then 2014 US regulated utility multiple of 14.6x our prior Canadian utility operations '14E EPS of \$1.95. For Caribbean operations we used the then publically traded Caribbean Utilities Corporation '14 multiple of 12.2x based upon consensus estimates. We applied this to our prior Caribbean '14E EPS of \$0.20. For unregulated generation we used the then '14 power multiple of 14.6x our prior '14E EPS of \$0.07. For corporate and other we used the then straight '14 US regulated utility multiple of 14.6x our (\$0.41) EPS for the segment. To this we added a valuation for the real estate operations based on a 5% cap rate (implying a 20x multiple) on our prior '14E EPS of \$0.15.

## Quarterly Results Hit by FX and Acquisition Costs

For the quarter the company reported earnings per share of CAD0.24 vs CAD0.31 last year, consensus expectations of CAD0.26 and our estimate of CAD0.27. Results were hit by adverse FX movements, and higher acquisition expenses related to the pending CHG transaction. Operationally, better results at the electric utilities in western Canada were partially offset by lower non-regulated hydroelectric generation and slightly higher losses at the regulated gas utilities.

### FortisBC Energy (Gas)

*CAD(6)mn vs CAD(4)mn*

Volumes increased at FortisBC energy due to industrial customers continuing to switch to natural gas from alternative fuel sources due to lower natural gas prices. Despite this higher volume related to more industrial customers, overall customer additions were lower than expected in the quarter. Rates were overall higher as a result of the 2012-13 revenue requirement decision received in April 2012. Timing of revenue and expenses in 2012 also impacted results, revenue is recognized on seasonal gas consumption while certain expenses are recognized evenly throughout the year. Approved increases in expenses have lowered earnings year over year in the third quarter. AFUDC was also lower due to lower assets under construction. Despite timing differences in expenses O&M expenses were lower in the quarter in 2012 vs 2011.

### FortisAlberta (Electric)

*CAD26mn vs CAD19mn*

Revenues were higher due to higher distribution rates that were effective January 1, 2012. Franchise fee revenues were CAD1mn higher y/y, and customer growth also contributed. Net transmission revenues were CAD3.5mn higher y/y/, due to the revenue requirement decision effective in April 2012. These positive factors were offset by a lower allowed return on equity to 8.75% for 2011 and 2012 vs 9.00% for 2010, which was recognized in the fourth quarter of 2011 when the decision was received.

### FortisBC Electric

*CAD13mn vs CAD10mn*

Results were higher, due to increased customer rates as a result of the 2012-13 revenue requirement decision received in August 2012 and higher pole attachment revenues. Electricity sales were up 2.1% in the quarter. Rate base growth continued due to continued investment in infrastructure. The company also benefited from lower financing costs than forecast in the 2012-2013 revenue requirement decision.

### Newfoundland Power

*CAD9mn vs CAD8mn*

Results were slightly higher as electricity sales grew by 1.8%, which was partially offset by the loss of joint-pole revenues, as joint-poles were sold in October 2011. Earnings were higher related to lower taxes, and a higher allowed return on equity. Return on Rate Base was reset from 8.38% to 8.80% in 2012. These positive impacts were partially offset by CAD1mn in costs related to Tropical Storm Leslie in September 2012 and higher D&A expense related to continued capital investments.

## Other Canadian Utilities

*CAD6mn vs CAD6mn*

Results were flat as higher consumption in Ontario and on Prince Edward Island, mainly driven by the agricultural sector led to 2.2% higher electricity sales. Customer rates also increased in Ontario as a result of regulatory decisions impacting 2012. These positive factors were offset by higher D&A expenses and finance charges at Maritime Electric due to increased levels of investment, and higher employee related operating costs at FortisOntario.

## Caribbean Utilities

*CAD7mn vs CAD6mn*

Customer growth and warmer temperatures in the Turks & Caicos increased air conditioning load and led to increased electric sales. Tourism activity also picked up in the Turks & Caicos vs 2011. Sales in the third quarter of 2011 were also abnormally depressed due to certain hotel and other commercial customer closures as a result of a hurricane. Air conditioning load was lower on Grand Cayman due to increased rainfall. Revenues were higher related to the higher rates for large hotel customers consistent with the regulatory decision received in February 2012. FX was also \$1mn better y/y. Base electricity rates also increased at Caribbean Utilities related to the RCAM mechanism effective at mid-year. This was offset by the discontinuance of government subsidies on Turks & Caicos for the South Caicos operations related to the February 2012 rate decision. Finance charges and D&A expense were higher at Fortis Turks & Caicos related to continuing capital investments, while finance charges were lower at Caribbean Utilities.

## Non-Regulated Generation

*CAD5mn vs CAD8mn*

Results were lower at unregulated generation due to lower rainfall impacting hydroelectric assets in upstate New York and Belize. The Moose River facility also remains offline since sustaining electrical damage in May 2011.

## Properties

*CAD8mn vs CAD9mn*

Results were lower due to lower occupancy rates in the hotel division of 2.0%, slightly offset by a 0.3% increase in average room rate. Revenues were however higher y/y, due to the acquisition of the Hilton Suites Hotel in October of last year. Overall occupancy was lower in Atlantic and Central Canada, while occupancy in Western Canada increased.

## Corporate & Other

*CAD(23)mn vs CAD(6)mn*

Corporate results were a greater loss, due to the absence of the US\$11mn after-tax fee paid to the company after the termination of the merger agreement with Central Vermont Public Service, CAD0.5mn in costs related to the pending acquisition of CHG, and FX losses of CAD3mn related to the translation of the US dollar denominated long-term other asset representing the book value of the expropriated investment in Belize Electricity.

## ANALYST(S) CERTIFICATION(S)

We, Ross A. Fowler, CFA and Daniel Ford, CFA, hereby certify (1) that the views expressed in this research report accurately reflect our personal views about any or all of the subject securities or issuers referred to in this research report and (2) no part of our compensation was, is or will be directly or indirectly related to the specific recommendations or views expressed in this research report.

## IMPORTANT DISCLOSURES

Barclays Research is a part of the Corporate and Investment Banking division of Barclays Bank PLC and its affiliates (collectively and each individually, "Barclays"). For current important disclosures regarding companies that are the subject of this research report, please send a written request to: Barclays Research Compliance, 745 Seventh Avenue, 17th Floor, New York, NY 10019 or refer to <http://publicresearch.barcap.com> or call 212-526-1072.

The analysts responsible for preparing this research report have received compensation based upon various factors including the firm's total revenues, a portion of which is generated by investment banking activities.

Analysts regularly conduct site visits to view the material operations of covered companies, but Barclays policy prohibits them from accepting payment or reimbursement by any covered company of their travel expenses for such visits.

The Corporate and Investment Banking division of Barclays produces a variety of research products including, but not limited to, fundamental analysis, equity-linked analysis, quantitative analysis, and trade ideas. Recommendations contained in one type of research product may differ from recommendations contained in other types of research products, whether as a result of differing time horizons, methodologies, or otherwise.

### Primary Stocks (Ticker, Date, Price)

Fortis Inc. (FTS.TO, 02-Nov-2012, CAD 33.96), Equal Weight/Positive

### Guide to the Barclays Fundamental Equity Research Rating System:

Our coverage analysts use a relative rating system in which they rate stocks as Overweight, Equal Weight or Underweight (see definitions below) relative to other companies covered by the analyst or a team of analysts that are deemed to be in the same industry (the "industry coverage universe").

In addition to the stock rating, we provide industry views which rate the outlook for the industry coverage universe as Positive, Neutral or Negative (see definitions below). A rating system using terms such as buy, hold and sell is not the equivalent of our rating system. Investors should carefully read the entire research report including the definitions of all ratings and not infer its contents from ratings alone.

### Stock Rating

**Overweight** - The stock is expected to outperform the unweighted expected total return of the industry coverage universe over a 12-month investment horizon.

**Equal Weight** - The stock is expected to perform in line with the unweighted expected total return of the industry coverage universe over a 12-month investment horizon.

**Underweight** - The stock is expected to underperform the unweighted expected total return of the industry coverage universe over a 12-month investment horizon.

**Rating Suspended** - The rating and target price have been suspended temporarily due to market events that made coverage impracticable or to comply with applicable regulations and/or firm policies in certain circumstances including where the Corporate and Investment Banking Division of Barclays is acting in an advisory capacity in a merger or strategic transaction involving the company.

### Industry View

**Positive** - industry coverage universe fundamentals/valuations are improving.

**Neutral** - industry coverage universe fundamentals/valuations are steady, neither improving nor deteriorating.

**Negative** - industry coverage universe fundamentals/valuations are deteriorating.

Below is the list of companies that constitute the "industry coverage universe":

#### North America Utilities

Alliant Energy (LNT)	American Electric Power (AEP)	American Water Works (AWK)
Aqua America (WTR)	Canadian Utilities Ltd. (CU.TO)	CenterPoint Energy Inc. (CNP)
CMS Energy (CMS)	Consolidated Edison (ED)	Dominion Resources (D)
DTE Energy (DTE)	Duke Energy (DUK)	Edison International (EIX)
Emera Inc. (EMA.TO)	Fortis Inc. (FTS.TO)	Great Plains Energy Inc. (GXP)
Hawaiian Electric Inds (HE)	ITC Holdings (ITC)	National Grid Plc (NGG)
NiSource, Inc. (NI)	Northeast Utilities (NU)	NV Energy, Inc. (NVE)

**IMPORTANT DISCLOSURES CONTINUED**

OGE Energy Corp. (OGE)	Pepco Holdings (POM)	PG&E Corp. (PCG)
Pinnacle West Capital (PNW)	PNM Resources (PNM)	Portland General Electric Co. (POR)
SCANA Corp. (SCG)	Sempra Energy (SRE)	Southern Co. (SO)
TECO Energy (TE)	Westar Energy (WR)	Wisconsin Energy (WEC)
Xcel Energy (XEL)		

**Distribution of Ratings:**

Barclays Equity Research has 2535 companies under coverage.

42% have been assigned an Overweight rating which, for purposes of mandatory regulatory disclosures, is classified as a Buy rating; 54% of companies with this rating are investment banking clients of the Firm.

43% have been assigned an Equal Weight rating which, for purposes of mandatory regulatory disclosures, is classified as a Hold rating; 48% of companies with this rating are investment banking clients of the Firm.

13% have been assigned an Underweight rating which, for purposes of mandatory regulatory disclosures, is classified as a Sell rating; 43% of companies with this rating are investment banking clients of the Firm.

**Guide to the Barclays Research Price Target:**

Each analyst has a single price target on the stocks that they cover. The price target represents that analyst's expectation of where the stock will trade in the next 12 months. Upside/downside scenarios, where provided, represent potential upside/potential downside to each analyst's price target over the same 12-month period.

[Link to Barclays Live for interactive charting](#)

J: Barclays Bank PLC and/or an affiliate trades regularly in the securities of Fortis Inc..

**Valuation Methodology:** Our \$33 price target for Fortis is premised upon a sum-of-the-parts (SOTP) methodology. We apply a 20% premium to the 2014 US regulated utility multiple of 14.4x our Canadian utility operations '14E EPS of \$1.85. For Caribbean operations we use the publically traded Caribbean Utilities Corporation '14 multiple of 12.2x based upon consensus estimates. We apply this to our Caribbean '14E EPS of \$0.19. For unregulated generation we use a '14 power multiple of 14.4x our '14E EPS of \$0.07. For corporate and other we use the straight '14 US regulated utility multiple of 14.4x our (\$0.41) EPS for the segment. To this we add a valuation for the real estate operations based on a 5% cap rate (implying a 20x multiple) on our '14E EPS of \$0.14.5.

**Risks which May Impede the Achievement of the Barclays Research Price Target:** Regulatory environments in several Canadian provinces including British Columbia, Alberta, Newfoundland & Labrador, Ontario, and Prince Edward Island. Overall economic and sales growth through the company's various service territories. Execution of large scale capital projects on time and on budget. Real estate valuations, especially in the Atlantic Provinces of Canada.

## DISCLAIMER:

Fortis Inc.

## Earnings in Line; Raising PT to CAD 35

**Earnings in Line; Upping PT:** We are reiterating our EW rating and updating our EPS forecast from CAD 1.78/1.89 to CAD 1.77/1.89 for '13/14, respectively, and introducing a '15 EPS estimate of CAD 1.96. We are raising our price target from CAD 33 to CAD 35 as a result of multiple expansion. Fully detailed valuation methodologies are provided below.

**2012 Earnings in Line:** For the year, Fortis reported ongoing EPS of \$1.70 vs. \$1.65 in 2011, net of merger & acquisition-related cost and benefits in each period. Results were in line with consensus estimates of CAD 1.71 and were driven by better results at the Canadian regulated utilities, partially offset by higher corporate level expenses, and higher average shares outstanding related to the equity issuance in mid-2011.

**CHG Energy Group Acquisition Settlement:** A settlement was filed in February with intervening parties, including the New York Public Service Commission staff, in the pending acquisition of CH Energy Group. Approval of the settlement agreement by the commission is the last significant regulatory item required to close the acquisition. The acquisition is expected to close in the second quarter of this year.

**Balanced Risks and Opportunities:** We see balanced opportunities and risks in the stock. We see potential upside related to high voltage transmission development in Ontario and a pick-up in top-line growth in Alberta and British Columbia related to oil and gas infrastructure development. We see risks related to the potential to acquire more US assets: management has stated it would like to grow the US rate base to about \$4 billion. There is also a significantly busy regulatory calendar over the course of the coming year with decisions that could impact earnings power.

Price Target CAD 35.00

**Why Equal Weight?** We are Equal Weight as we see shares as fairly valued. Incremental upside could come from higher sales growth and execution of potential JV transmission project opportunities in Ontario. This upside potential is offset by potential for downside in growth and execution risk related to on time and on budget completion of large construction projects. We don't see a lot of downside risk from current levels given the quality of regulation in British Columbia.

**Upside case** CAD 42.00

We increase sales growth by 1%, include the value of potential joint venture transmission projects in Ontario (NPV \$3/share), and value Canadian utility operations at a 25% premium. This leads to an indicative valuation of CAD 42.

**Downside case** CAD 31.00

We decrease sales growth by 1%, do not include any transmission upside (similar to our base case), and value Canadian utility operations at a 15% premium. This leads to an indicative valuation of CAD 31.

## Business Update; Forward Capital Plan

---

### Pending Acquisition of CH Energy Group

Regulatory approval by the New York State Public Service Commission (NY PSC) remains the only significant regulatory item remaining to close the CH Energy Group transaction. As a refresher, Fortis announced in early 2012 entering into an agreement to acquire CH Energy Group for US\$1.5 billion, or US\$65/share inclusive of the assumption of approximately US\$500 million in debt. The main subsidiary of CH Energy Group is Central Hudson Gas & Electric, a regulated T&D utility with about 300,000 electric and 75,000 natural gas customers in the Central Hudson Valley of New York State. Shareholder approval and approvals by the Federal Energy Regulatory Commission and the US Committee on Foreign Investment were all received by July of last year. The waiting period under the Hart-Scott-Rodino Antitrust Act of 1976 expired this past October.

The approval of the NY PSC had remained in question late last year as the company and intervening parties in the proceedings had debated the merits of the acquisition and the level of customer and community benefits and/or rate mitigation that the company could provide as part of the acquisition transaction. In January of this year the company and several intervening parties including the NY PSC staff filed a settlement agreement with the NY PSC. The settlement calls for:

- US\$35 million to cover expenses normally recovered in customer rates, such as storm restoration expenses
- Guaranteed savings of more than US\$9 million over five years as a result of cost eliminations from CH Energy Group no longer being a public company
- Establishment of a US\$5 million economic development and low-income assistance program fund
- An electric and gas delivery rate freeze through July 1<sup>st</sup>, 2014.

The parties to the settlement have agreed it is in the public interest and have recommended approval to the NY PSC. In our view, approval of the settlement is very likely and should be completed by the end of the second quarter of this year.

Based upon the new terms of the settlement agreement and an updated analysis of the acquisition we think there will be \$0.01 of accretion to earnings in 2013, which will grow to \$0.04 of EPS accretion by 2015. Our pro forma analysis is shown in Figure 1 below.

**Pending Acquisition of City of Kelowna's Electric Utility Assets**

In British Columbia the company is also engaged in a smaller pending acquisition of the electric utility assets of the City of Kelowna for approximately CAD 55 million. These assets serve approximately 15,000 customers. FortisBC Electric currently provides the City of Kelowna with electricity under a wholesale contract and has maintained the assets under a contract for the last twelve years. The transaction is expected to close by the end of March of this year.

**Waneta Hydroelectric Project**

The Waneta project, a CAD 900 million 335MW hydroelectric expansion project on the Pen d'Oreille river in British Columbia, remains on budget and on schedule for an in-service date in spring of 2015. Nearly CAD 440 million has been spent on the project since the commencement of construction in late 2010, with CAD 192 million spent last year. The excavations of the intake, powerhouse, and the power tunnels were all completed in 2012. In 2013 the company expects to spend nearly CAD 230 million on the project. Key project milestones for 2013 include completion of the powerhouse structural steel and building envelope, excavation of the intake approach channel, construction of the intake and tailrace structures, and removal of the rock plug. The coming year will also see continued progress on the installation of the stationary imbedded turbine and generator components.

**Fortis Properties Update**

In October of last year Fortis Properties acquired the 126 room StationPark All Suite Hotel in London, Ontario for approximately CAD 13 million, inclusive of assumed debt of CAD 6 million. The subsidiary is also in the process of constructing a 12 storey office building in downtown St. John's, Newfoundland for approximately CAD 47 million. About CAD 20

million was spent on this project in 2012 and construction is expected to be completed by the end of this year.

### Capital Expenditures

Capital Expenditures for 2012 came in at CAD 1.13 billion, which was CAD 161 million lower than projected at the beginning of the year. The main drivers behind this lower-than-projected total were:

- A shift in capital expenditures for 2012 to 2013 related to timing of payments for the Waneta Hydroelectric project
- A delay in capital expenditures at the British Columbia subsidiaries due to timing related to the receipt of regulatory approval of the 2012/2013 revenue requirements
- A shift out in the timing of spending related to the construction of the St. John, Newfoundland office building at Fortis Properties.
- These decreases in capex were offset by increases at FortisAlberta related to increasing customers in the oil and gas sector as well as the completion of a distribution control center, offset by lower transmission related capex in the province.

For the 2013 to 2017 period capital expenditures are expected to total approximately CAD 6 billion, which will drive rate base growth and hydroelectric generation development and in turn grow earnings per share at a compounded rate of approximately 6% per annum. Specifically for 2013, capital expenditures are forecast to be CAD 1.35 billion.

Capital forecast for 2013 and over the next five years are shown by segment in Figure 2.

**Regulatory Update: A Busy Regulatory Calendar in 2013**

The company faces a significantly busy regulatory calendar over the coming year. Details of several ongoing matters are provided below. Most importantly, we highlight the process to set the cost of capital in British Columbia and the processes in Alberta to finalize the metrics related to performance-based ratemaking and the treatment of certain capital expenditures under that new regulation.

**British Columbia***Cost of Capital Proceeding*

A public hearing in the first phase of the ongoing generic cost of capital proceeding was held before the British Columbia Utilities Commission (BCUC) in December of last year. The BCUC has determined that a second phase be added to the proceedings during which utilities will have their individual capital structures and returns determined vs. the reference utility, whose metrics will be determined in the first phase of the process. A decision on the benchmark utility is expected by mid-year, with the utilities in phase two to be determined thereafter. The main Fortis utility in the province FEI has been designated the reference utility. The company's smaller gas utilities at Whistler and on Vancouver Island as well as the company's electric utility, FortisBC Electric will have their cost of capital metrics determined in the second phase of the process.

*Alternative Energy Services*

The company had filed in May of 2011 for potential regulatory treatment of alternative energy services – namely compressed natural gas or liquefied natural gas refuelling services in the province of British Columbia. The BCUC ruled in December that such services are regulated when they are provided by a regulated utility in the province; however, it also determined that the company undertake such services in the future via an unregulated entity.

**FortisAlberta***Performance-based Ratemaking*

In September of last year the Alberta Utility Commission (AUC) issued a generic decision on performance-based ratemaking (PBR), which commenced for a five-year term beginning in January of this year. Put simply, the PBR mechanism applies a rate of inflation annually and assumes productivity improvements to determine customer rates on an annual basis. Ultimate performance of the utility will depend upon management's ability to perform better than the inflation-less-productivity factor escalator.

More importantly, the decision called into question the treatment of some capital expenditures as it did not provide a capital tracker for them. The company has filed a review

and variance application before the AUC and has sought leave to appeal the issue to the Alberta Court of Appeal to clarify capital expenditure treatment. In December of last year the company filed its 2013 capital tracker application for specific categories of capital expenditures and a decision is expected in the first quarter of this year. Decisions on the review and variance application and the appeal process are expected in the third quarter of this year.

### *Compliance Application for 2013*

In the compliance application for 2013, the utility requested a 1.71% rate increase in distribution rates using the PBR formula. Rate adjustments were also requested for pass-through costs and transitional adjustments between cost of service ratemaking and PBR. The AUC issued a decision setting interim rates for 2013 equivalent to rates in 2012 pending the outcome of the capital tracker and compliance filings.

### *Stranded Assets*

Also in Alberta, the AUC reinitiated a “Utility Asset Disposition” (UAD) process in November of last year which will address several issues including cost responsibility for stranded assets. A decision in the process is expected by mid-year.

## **Newfoundland Power**

### *2013/14 General Rate Application*

In September Newfoundland Power filed a general rate application (GRA) for 2013/2014 requesting a 6% average increase in customer rates effective on March 1<sup>st</sup>, 2013. The filing also requests the discontinuation of the automatic adjustment formula. Public hearings on the matter should conclude this month.

## **Maritime Electric**

### *Final Recommendations Report from PEI Energy Commission*

This month the final report of the PEI Energy Commission, *Charting Our Energy Future*, was released to the PEI Government. The recommendations to the Government of PEI included:

- Maritime Electric should continue as the island’s primary electric utility; however, the utility’s generation assets should be acquired by the PEI Energy Corporation (a government entity) over a reasonable period of time. This would significantly reduce the utility’s rate base and equity.
- The equity component of Maritime Electric’s capital structure should be 35%–40%.
- Cost of service regulation should be maintained but should be administered by a new panel of three commissioners dealing only with electric utility regulation and will operate independently of the current Island Regulatory Appeals Commission (IRAC).
- A consumer advocate for electricity should be appointed.
- The government of PEI should assume responsibility for financing the existing CAD 47.5 million of deferred incremental energy replacement costs related to the refurbishment of the Point Lepreau nuclear generating station in New Brunswick.
- A new cable interconnection with New Brunswick should be pursued immediately with the owner the Government of PEI.
- Responsibility for demand side management programs, currently with the Government of PEI should be transitioned to Maritime Electric.

Obviously we view the proposal as a bit of blow to the quality of regulation on Prince Edward Island. If the measures are adopted as proposed, they would limit rate base growth opportunities for the utility and turn ongoing cost of service regulation over to an untested body of unknown members.

#### *Continuation of PEI Energy Accord*

In December of last year the PEI Energy Accord was continued for three additional years, through February 29<sup>th</sup>, 2016. Over the three-year period increases in electricity costs for a typical residential customer have been capped at 2.2% per annum and the allowed return on equity for Maritime Electric has been capped at 9.75% each year.

### **FortisOntario**

#### *Fort Erie, Port Colborne, and Gananoque COS Application*

In November of last year the Ontario Energy Board (OEB) approved as filed the settlement agreement for FortisOntario, which called for a 8.93% return on equity (down from 9.12%) which led to a 6.8% increase in rates at Fort Erie, a 5.9% increase in rates at Gananoque, and a 7.4% increase in rates at Port Colborne.

#### *Algoma Power Incentive Rate Mechanism*

Algoma Power filed for its third generation incentive rate mechanism (IRM) before the OEB in October for rates effective January 1<sup>st</sup> of this year. Since Algoma falls under the rural and remote rate protection program and the disposition of smart meter costs is required, the filing has become complicated. The OEB has scheduled a written hearing on the application and has made 2012 rates the interim rates for 2013 until a final decision is reached.

### **Fortis Turks & Caicos**

#### *Interim Government Negotiations*

Negotiations with the interim government of Turks & Caicos occurred during the third quarter of last year. During these negotiations the utility presented a new regulatory framework to the interim government. The government has engaged a third party expert to review the utility's proposal. No agreement was reached with the interim government but negotiations are expected to continue with the newly elected government of the Islands.

## **2012 Earnings Results**

---

For the year the company reported ongoing earnings per share of \$1.70 vs. ongoing earnings per share of \$1.65 last year. Overall results were driven by better performance year-on-year at the Canadian utility operations, partially offset by higher expenses at the corporate level and higher overall share count related to the issuance of common equity in mid-year 2011.

Year-over-year earnings variances along with the variance per share are provided in Figure 4 below.

FIGURE 4

## Year-over-Year Annual Earnings Variances by Segment

CAD millions except per share data	2012	2011	Variance	EPS
FortisBC Energy Companies	138	137	1	\$ 0.01
FortisAlberta	96	74	22	\$ 0.12
FortisBC Electric	50	48	2	\$ 0.01
Newfoundland Power	37	32	5	\$ 0.03
Other Canadian Electric Utilities	24	20	4	\$ 0.02
Caribbean Regulated Electric Utilities	19	20	-1	\$ (0.01)
Fortis Generation	17	18	-1	\$ (0.01)
Fortis Properties	22	23	-1	\$ (0.01)

Ongoing Earnings	323	300	22.5	\$ 0.12
Shares Outstanding	190.0	181.6		\$ (0.08)
<b>Ongoing Earnings Per Share</b>	<b>\$ 1.70</b>	<b>\$ 1.65</b>		<b>\$ 0.05</b>

Source: Company's 2012 Earnings Release, Barclays Research Estimates

The majority of the variance on a year-over-year basis was driven by better results at FortisAlberta and a swing in merger and acquisition benefits and costs, which are not considered part of ongoing earnings. These positive drivers were partially offset mostly by higher share count.

FortisBC Energy companies saw slightly higher results due to higher industrial volumes as a result of fuel switching, rate base growth, and lower effective income taxes, partially offset by higher O&M expenses due to timing, lower AFUDC related to lower assets under construction year over year, and lower-than-expected customer additions in 2012.

FortisAlberta saw significantly higher results as a result of increasing rate base growth due to customer growth year over year, net transmission revenue of CAD 8.5 million as a result of the distribution revenue requirements decision in April 2012, lower-than-expected D&A in the year due to project completion timing, lower transmission related capital expenditures, and lower-than-expected finance charges in the year due to debt issuance timing and lower than expected interest rates.

FortisBC Electric saw slightly higher results year over year driven by rate base growth, higher pole attachment revenues, and lower-than-expected finance charges offset by the expiration of the PBR mechanism at the end of 2011 which impacted purchased power cost sharing favourably in 2011 but had no similar impact in 2012.

Newfoundland Power saw better results driven by lower effective income taxes, a higher allowed return on equity (8.80% in 2012 vs. 8.38% in 2011), and positive sales growth, which were offset by the impact of the pole sharing agreement with Bell Atlantic, higher purchased power costs, and higher depreciation.

Other Canadian Utilities saw marginally better results driven by lower effective income taxes at Maritime Electric, the accrual of the cumulative return on smart meter infrastructure at FortisOntario, higher earnings by FortisOntario in Cornwall due to increased base rates, and net cost savings resulting from the purchase of the formerly leased electric assets in Port Colborne.

Caribbean operations saw slightly lower earnings resulting from foreign exchange impacts, higher D&A expenses, and higher finance charges related to the acquisition of TCU which were offset by higher sales of electricity and lower energy supply costs due to more fuel efficient production from new generating facilities.

Fortis Generation saw slightly lower results driven by decreased production in upstate New York and Ontario as well as Belize, which were partially offset by lower finance charges in Belize and the gain on involuntary disposition of the generation assets at Moose River's hydroelectric facility in upstate New York.

Fortis Properties saw slightly lower results related to worse performance at the hospitality division, excluding the Hilton Suites Hotel, due to the impact of decreased occupancy rates in Central and Atlantic Canada offset by increased average room rates and occupancy in Western Canada. There was also a positive contribution due to the Hilton Suites Hotel contributing a full year of results in 2012 vs. 2011.

Corporate and Other saw higher expenses in 2012 vs. 2011 related to foreign exchange loss of CAD 2 million in 2012 vs. a gain of CAD 1 million in 2011, increased operating expenses mainly related to a CAD 3 million non-recurring provision associated with the corporation's investment in CWLP, lower income tax recoveries, and higher preference share dividends. These negative drivers were slightly offset by lower finance charges due to higher capitalized interest associated with the financing of the Waneta project.

### Valuation Methodologies

Our current price target of CAD 35 is premised on a sum-of-the-parts (SOTP) methodology. We apply a 25% premium to the 2014 US regulated utility multiple of 14.5x our Canadian utility operations '14E EPS of CAD 1.91. For Caribbean operations we use the publically traded Caribbean Utilities Corporation '14 multiple of 12.2x, based on consensus estimates. We apply this to our Caribbean '14E EPS of CAD 0.18. For unregulated generation we use a '14 power multiple of 14.5x our '14E EPS of CAD 0.06. For corporate and other we use the straight '14 US regulated utility multiple of 14.5x our CAD (0.39) EPS for the segment. To this we add a valuation for the real estate operations based on a 5% cap rate (implying a 20x multiple) on our '14E EPS of CAD 0.13.

Our prior price target of CAD 33 was premised on a sum-of-the-parts (SOTP) methodology. We applied a 20% premium to the then 2014 US regulated utility multiple of 14.4x our prior Canadian utility operations '14E EPS of CAD 1.85. For Caribbean operations we used the then publically traded Caribbean Utilities Corporation '14 multiple of 12.2x, based on consensus estimates. We applied this to our prior Caribbean '14E EPS of CAD 0.19. For unregulated generation we used the then '14 power multiple of 14.4x our prior '14E EPS of CAD 0.07. For corporate and other we used the straight '14 US regulated utility multiple of 14.4x our prior (\$0.41) EPS for the segment. To this we added a valuation for the real estate operations based on a 5% cap rate (implying a 20x multiple) on our prior '14E EPS of \$0.14.

## ANALYST(S) CERTIFICATION(S)

We, Ross A. Fowler, CFA and Daniel Ford, CFA, hereby certify (1) that the views expressed in this research report accurately reflect our personal views about any or all of the subject securities or issuers referred to in this research report and (2) no part of our compensation was, is or will be directly or indirectly related to the specific recommendations or views expressed in this research report.

The POINT® Quantitative Equity Scores (POINT Scores) referenced herein are produced by the firm's POINT quantitative model and Barclays hereby certifies that (1) the views expressed in this research report accurately reflect the firm's POINT Scores model and (2) no part of the firm's compensation was, is or will be directly or indirectly related to the specific recommendations or views expressed in this research report.

## IMPORTANT DISCLOSURES

Barclays Research is a part of the Corporate and Investment Banking division of Barclays Bank PLC and its affiliates (collectively and each individually, "Barclays"). For current important disclosures regarding companies that are the subject of this research report, please send a written request to: Barclays Research Compliance, 745 Seventh Avenue, 17th Floor, New York, NY 10019 or refer to <http://publicresearch.barcap.com> or call 212-526-1072.

The analysts responsible for preparing this research report have received compensation based upon various factors including the firm's total revenues, a portion of which is generated by investment banking activities.

Analysts regularly conduct site visits to view the material operations of covered companies, but Barclays policy prohibits them from accepting payment or reimbursement by any covered company of their travel expenses for such visits.

In order to access Barclays Statement regarding Research Dissemination Policies and Procedures, please refer to <https://live.barcap.com/publiccp/RSR/nyfipubs/disclaimer/disclaimer-research-dissemination.html>.

The Corporate and Investment Banking division of Barclays produces a variety of research products including, but not limited to, fundamental analysis, equity-linked analysis, quantitative analysis, and trade ideas. Recommendations contained in one type of research product may differ from recommendations contained in other types of research products, whether as a result of differing time horizons, methodologies, or otherwise.

### Primary Stocks (Ticker, Date, Price)

Fortis Inc. (FTS.TO, 06-Feb-2013, CAD 34.60), Equal Weight/Positive

### Guide to the Barclays Fundamental Equity Research Rating System:

Our coverage analysts use a relative rating system in which they rate stocks as Overweight, Equal Weight or Underweight (see definitions below) relative to other companies covered by the analyst or a team of analysts that are deemed to be in the same industry (the "industry coverage universe").

In addition to the stock rating, we provide industry views which rate the outlook for the industry coverage universe as Positive, Neutral or Negative (see definitions below). A rating system using terms such as buy, hold and sell is not the equivalent of our rating system. Investors should carefully read the entire research report including the definitions of all ratings and not infer its contents from ratings alone.

### Stock Rating

**Overweight** - The stock is expected to outperform the unweighted expected total return of the industry coverage universe over a 12-month investment horizon.

**Equal Weight** - The stock is expected to perform in line with the unweighted expected total return of the industry coverage universe over a 12-month investment horizon.

**Underweight** - The stock is expected to underperform the unweighted expected total return of the industry coverage universe over a 12-month investment horizon.

**Rating Suspended** - The rating and target price have been suspended temporarily due to market events that made coverage impracticable or to comply with applicable regulations and/or firm policies in certain circumstances including where the Corporate and Investment Banking Division of Barclays is acting in an advisory capacity in a merger or strategic transaction involving the company.

### Industry View

**Positive** - industry coverage universe fundamentals/valuations are improving.

**Neutral** - industry coverage universe fundamentals/valuations are steady, neither improving nor deteriorating.

**Negative** - industry coverage universe fundamentals/valuations are deteriorating.

Below is the list of companies that constitute the "industry coverage universe":

#### North America Utilities

Alliant Energy (LNT)	American Electric Power (AEP)	American Water Works (AWK)
Aqua America (WTR)	Canadian Utilities Ltd. (CU.TO)	CenterPoint Energy Inc. (CNP)
CMS Energy (CMS)	Consolidated Edison (ED)	Dominion Resources (D)
DTE Energy (DTE)	Duke Energy (DUK)	Edison International (EIX)

## IMPORTANT DISCLOSURES CONTINUED

Emera Inc. (EMA.TO)	Fortis Inc. (FTS.TO)	Great Plains Energy Inc. (GXP)
Hawaiian Electric Inds (HE)	ITC Holdings (ITC)	National Grid Plc (NGG)
NiSource, Inc. (NI)	Northeast Utilities (NU)	NV Energy, Inc. (NVE)
OGE Energy Corp. (OGE)	Pepco Holdings (POM)	PG&E Corp. (PCG)
Pinnacle West Capital (PNW)	PNM Resources (PNM)	Portland General Electric Co. (POR)
SCANA Corp. (SCG)	Sempra Energy (SRE)	Southern Co. (SO)
TECO Energy (TE)	Westar Energy (WR)	Wisconsin Energy (WEC)
Xcel Energy (XEL)		

---

### Distribution of Ratings:

Barclays Equity Research has 2540 companies under coverage.

43% have been assigned an Overweight rating which, for purposes of mandatory regulatory disclosures, is classified as a Buy rating; 54% of companies with this rating are investment banking clients of the Firm.

41% have been assigned an Equal Weight rating which, for purposes of mandatory regulatory disclosures, is classified as a Hold rating; 47% of companies with this rating are investment banking clients of the Firm.

14% have been assigned an Underweight rating which, for purposes of mandatory regulatory disclosures, is classified as a Sell rating; 44% of companies with this rating are investment banking clients of the Firm.

### Guide to the Barclays Research Price Target:

Each analyst has a single price target on the stocks that they cover. The price target represents that analyst's expectation of where the stock will trade in the next 12 months. Upside/downside scenarios, where provided, represent potential upside/potential downside to each analyst's price target over the same 12-month period.

### Guide to the POINT® Quantitative Equity Scores:

The POINT Quantitative Equity Scores (POINT Scores) are based on consensus historical data and are independent of the Barclays fundamental analysts' views. Each score is composed of a number of standard industry metrics.

A high/low Value score indicates attractive/unattractive valuation. Measures of value include P/E, EV/EBITDA and Free Cash Flow.

A high/low Quality score indicates financial statement strength/weakness. Measures of quality include ROIC and corporate default probability.

A high/low Sentiment score indicates bullish/bearish market sentiment. Measures of sentiment include price momentum and earnings revisions.

These scores are valid as of the date of this report. To view the latest scores, which are updated monthly, [click here](#).

For a more detailed description of the underlying methodology for each score, please [click here](#).

J: Barclays Bank PLC and/or an affiliate trades regularly in the securities of Fortis Inc..

**Valuation Methodology:** Our \$35 price target for Fortis is premised upon a sum-of-the-parts (SOTP) methodology. We apply a 25% premium to the 2014 US regulated utility multiple of 14.5x our Canadian utility operations '14E EPS of \$1.91. For Caribbean operations we use the publically traded Caribbean Utilities Corporation '14 multiple of 12.2x based upon consensus estimates. We apply this to our Caribbean '14E EPS of \$0.18. For unregulated generation we use a '14 power multiple of 14.5x our '14E EPS of \$0.06. For corporate and other we use the straight '14 US regulated utility multiple of 14.5x our (\$0.39) EPS for the segment. To this we add a valuation for the real estate operations based on a 5% cap rate (implying a 20x multiple) on our '14E EPS of \$0.13.

**Risks which May Impede the Achievement of the Barclays Research Price Target:** Regulatory environments in several Canadian provinces including British Columbia, Alberta, Newfoundland & Labrador, Ontario, and Prince Edward Island. Overall economic and sales growth through the company's various service territories. Execution of large scale capital projects on time and on budget. Real estate valuations, especially in the Atlantic Provinces of Canada.

Fortis Inc.

## Q1 \$0.67 Ex-Items; 2013 Remains a Busy Regulatory Year

**Reiterating Our View:** We are reiterating our Equal Weight rating, our CAD 37 price target and our EPS estimates of CAD 1.77/1.89/1.96 for '13/14/15, respectively. We continue to see the shares as fairly valued with potential upside related to continued deployment of the capital program and growth in Western Canada, while there are risks related to a busy regulatory decision year in 2013.

**Q1 EPS \$0.67:** The company reported ongoing EPS of CAD 0.67 vs. CAD 0.66 last year, consensus estimates of CAD 0.67, and our estimate of CAD 0.65. Results were mainly driven by increased earnings at FortisAlberta, up CAD 6 million from Q1 '12, on lower D&A expenses and higher transmission revenues. Growth in energy infrastructure led to better year-on-year results in British Columbia, although there were slower-than-expected customer additions for the gas utility in the province in the quarter.

**Regulatory Updates:** In the quarter, FortisBC Electric acquired the City of Kelowna's electric utility assets for CAD 55 million, which adds 15,000 customers to the utility and ongoing rate base vs. the previous wholesale tariff contract. FortisAlberta received a decision authorizing 60% or the revenue requirement for capex in 2013 that falls outside the performance-based ratemaking mechanism. A final decision on performance-based ratemaking and capital expenditure levels is expected in the second half. Also in April, Newfoundland Power received a decision that keeps the allowed ROE at 8.8% and the common equity ratio at 45% through 2015. Final capital structure and allowed ROEs remain still to be determined at FortisBC and FortisAlberta, and this should increase risk premium in the shares. The acquisition of CH Energy Group remains under review in New York with the Administrative Law Judges recommending the transaction be denied without further modifications of the settlement agreement.

Price (06-May-2013) CAD 35.01  
Price Target CAD 37.00

**Why Equal Weight?** We see shares as fairly valued. Upside can come from higher sales growth and potential JV transmission projects in Ontario. This is offset by growth and execution risk related to completion of large construction projects, which are mitigated by the quality of regulation in British Columbia.

**Upside case** CAD 44.00

We increase sales growth by 1%, include the value of potential joint venture transmission projects in Ontario (NPV \$3/share), and value Canadian utility operations at a 25% premium. This leads to an indicative valuation of CAD 44.

**Downside case** CAD 33.00

We decrease sales growth by 1%, do not include any transmission upside (similar to our base case), and value Canadian utility operations at a 15% premium. This leads to an indicative valuation of CAD 33.

## A Busy 2013 with the Regulators

---

We continue to be of the view that 2013 will be a busy regulatory year for the company and that there should be a higher risk premium priced into the shares as a result of return and capital structure uncertainty in the company's two largest utility jurisdictions. The first phase of the generic cost of capital proceeding in British Columbia will impact FortisBC Energy and a decision is expected by mid-2013. The second phase will impact the company's remaining utilities in British Columbia and commenced in the first quarter. The generic cost of capital proceeding for Alberta is scheduled to begin in the second quarter of this year.

We believe shares at current levels are pricing in a status quo outcome to regulation, especially with regard to the cost of capital proceedings. While we certainly believe that status quo or near to it is the most likely outcome, there is a tail risk related to lower allowed returns on equity may not be adequately accounted for in investor's perceptions.

### CH Energy Group Acquisition

There has been some recent contention in New York state over the proposed merger between Fortis and CH Energy Group. Earlier, the acquisition of CH Energy Group by Fortis seemed headed for New York Public Service Commission (NY PSC) approval with a settlement agreement filed. Since the parties to the settlement included CH Energy Group, the NY PSC Staff, and registered intervening parties it seemed like a constructive, balanced, and reasonable agreement had been struck to allow the merger to move forward. However, on May 3<sup>rd</sup> the administrative law judges (ALJs) in the case issued a recommended decision that would deny the acquisition without further modification to the terms of the settlement.

The recommended decision is not binding upon the NY PSC; the commission is expected to render a decision in June 2013. The ALJs recommendation, however, does open the door for the possibility that more ratepayer benefits need to be included in a modified settlement agreement for the acquisition to be approved. Our model shows \$0.04/share of accretion from the CH Energy Group acquisition by 2015; however, there could be downside risk to these earnings if customer benefits are modified.

### British Columbia

In addition to the generic cost of capital filing, the Fortis gas utilities in March filed leave to appeal the decision by the British Columbia Utilities Commission (BCUC) to deny amalgamation of rates of the three separate utilities. Further, an application for reconsideration of the amalgamation decision was filed with the BCUC in April. Hearings concluded on the CAD 52 million advanced metering infrastructure project in March and a decision on the application is anticipated in the second half of the year. The BCUC also ruled in favour of the acquisition of the electricity assets of the city of Kelowna, and allowed for CAD 38 million of the CAD 55 million purchase price be placed into rate base. The BCUC also ruled on the prudence hearing related to the Kettle Valley project and allowed for the full recovery of CAD 29 million related to it to be recovered.

### Alberta

In addition to the generic cost of capital filing, FortisAlberta reached a decision in March approving an interim revenue increase that will cover 60% of the capital expenditures forecast in 2013 that fall outside the performance based ratemaking K-Factor. A final decision to determine how much capital is included within the performance based rates structure, how much is included in the K-Factor for recovery and how much is potential

outside of those mechanisms is expected from the Alberta Utilities Commission in the second half of the year. A hearing is scheduled for June on this matter.

### **Newfoundland & Labrador**

In April the Public Utilities Board (PUB) in Newfoundland ruled that the allowed return on equity and equity ratio for Newfoundland Power will remain at 8.8% and 45% respectively through 2015. The PUB also ruled that pension expenses can be recovered from customers over 15 years, depreciation rates be lowered to 3.42% vs. 3.47%, and energy conservation costs would be deferred and subsequently recovered over the next seven years. The rate application decision will raise rates by about 5% beginning in July. This increase in concert with a power supply rate decrease will actually lower rates by 3% on a net basis in July. Newfoundland Power is required to file their next general rate application for the 2016 year on or before June 1<sup>st</sup>, 2015.

### **Caribbean**

In February the Electricity Regulatory Authority on Grand Cayman awarded the bid to develop, install and operate two new 18MW generation units to a third party. This denied Caribbean Utilities self-bid for the projects. However, in April of this year the ERA announced it was hiring an independent party to investigate reported irregularities in the bidding process, but the details of the investigation have not yet been disclosed. This could reopen the bidding process for potential award to Caribbean Utilities bid.

On Turks & Caicos in March the utilities submitted their 2012 annual regulatory filings to the Government. These filings indicated a rate base of US\$195 million for 2012 and a cumulative shortfall of US\$105 million as of December 31<sup>st</sup>, 2012.

### **Waneta Hydroelectric Expansion**

The Waneta Expansion project continues to be projected to be on time and on budget. The project is still projected to cost CAD 900 million and an additional CAD 47 million was spent in the quarter. In total CAD 483 million has been spent on the project, and in the first quarter concrete continued to be placed in the powerhouse and intake, work continued on the powerhouse roof and turbine units, and excavation work continued on the intake channel.

## **Q1 2013 Results**

For the quarter, the company reported ongoing earnings per share of CAD 0.67 vs. CAD 0.66 last year, consensus estimates of CAD 0.67, and our estimate of CAD 0.65. Results were driven by better performance at Fortis Alberta, as a result of lower depreciation expenses, and increased transmission revenue related to the finalization of 2012 transmission variances.

The results by segment are provided in the table below.

FIGURE 1

**Q1 2013 Year-over-Year Results by Segment, CAD Millions except per-share data**

Segment	Q1 2013	Q1 2012	Variance
FortisBC Energy	85	82	3
FortisAlberta	26	21	5
FortisBC Electric	18	16	2
Newfoundland Power	7	7	0
Other Cdn Electric Utilities	6	7	(1)
<i>Total Canadian Regulated</i>	57	51	6
Caribbean Utilities	3	3	0
Fortis Generation	24	5	19
Fortis Properties	0	1	(1)
Corporate and Other	(40)	(21)	(19)
<b>Total</b>	<b>129</b>	<b>121</b>	<b>8</b>

Note: Corporate and Other includes removal of \$22 net of tax extraordinary gain related to the settlement of water rights and hydroelectric generating assets from the 2008 expropriation of non-regulated assets in Newfoundland

Source: Fortis Q1 2013 MD&A, Barclays Research Estimates

FortisBC Energy results were better by CAD 3 million as a result of rate base growth and higher average gas transportation volumes to industrial customers. These positive factors were partially offset by lower than expected customer additions and higher effective income taxes.

FortisAlberta was the biggest driver of improvement quarter over quarter with results up CAD 5 million. Results were driven by lower depreciation rates in relation to the 2012 distribution revenue requirement decision received in April 2012. Results were also higher related to higher net transmission revenue associated with the finalization of 2012 net transmission variances.

FortisBC Electric results were slightly better as a result of rate base growth, lower expenses related to timing year over year. Depreciation expenses and financing costs were both lower year over year. Capitalized AFUDC was higher as approved by the regulators in British Columbia. These positive drivers were offset by higher effective income tax rates.

Newfoundland Power saw higher electricity rates and positive sales growth fully offset by increased regulatory amortization and higher expenses. Expenses increased as a result of costs associated with restoration efforts following the loss of energy supply from Newfoundland Hydro, and higher depreciation expenses.

Other Canadian Utilities in Ontario and on Prince Edward Island saw lower results year over year as a result of higher energy supply costs at Maritime Electric as energy supply costs from the Point Lepreau nuclear plant were expensed in the quarter as that facility came back online in the fourth quarter of 2012. These negative factors were partially offset by better sales growth on Prince Edward Island.

Caribbean Utilities results were flat as decreased employee related and maintenance costs were offset by higher depreciation expenses as a result of continued investment in energy infrastructure.

Unregulated Fortis Generation results were lower as a result of decreased energy production for the hydroelectric assets in Brazil as a result of lower rainfall year on year. The segment did record a \$22 million after tax gain which we reclassified to Corporate and Other in the

table above. The gain is related to the settlement of expropriation matters related to the Exploits partnership and hydroelectric assets in central Newfoundland that were expropriated by the provincial government.

Unregulated Fortis Properties showed a decrease in earnings year over year as a result of decreased occupancy at hotel operations in central Canada. There was a 2.6% decrease in occupancy in all regions and a 1.8% increase in average daily room rate mainly in the Atlantic and Western Canada geographies. The decrease in earnings was despite the increase in revenue related to the StationPark All Suite Hotel which was acquired in October of last year.

Corporate and Other, net of the reclassified \$22 net gain, was CAD 3 million better year over year as a result of foreign exchange gains in Q1 2013 vs. foreign exchange losses in Q1 2012, and lower costs related to the pending CH Energy Group transaction and lower finance charges related to higher capitalized interest associated with the construction of the Waneta Hydroelectric plant expansion. Offsetting these positive factors were higher preference share dividends due to a preferred share issuance completed in November 2012 and lower income tax recoveries.

## ANALYST(S) CERTIFICATION(S)

H: This issuer beneficially owns 5% or more of any class of common equity securities of Barclays Bank PLC.

I: Barclays Bank PLC and/or an affiliate has a significant financial interest in the securities of this issuer.

J: Barclays Bank PLC and/or an affiliate trades regularly in the securities of this issuer.

K: Barclays Bank PLC and/or an affiliate has received non-investment banking related compensation from this issuer within the past 12 months.

L: This issuer is, or during the past 12 months has been, an investment banking client of Barclays Bank PLC and/or an affiliate.

M: This issuer is, or during the past 12 months has been, a non-investment banking client (securities related services) of Barclays Bank PLC and/or an affiliate.

N: This issuer is, or during the past 12 months has been, a non-investment banking client (non-securities related services) of Barclays Bank PLC and/or an affiliate.

O: Barclays Capital Inc., through Barclays Market Makers, is a Designated Market Maker in this issuer's stock, which is listed on the New York Stock Exchange. At any given time, its associated Designated Market Maker may have "long" or "short" inventory position in the stock; and its associated Designated Market Maker may be on the opposite side of orders executed on the floor of the New York Stock Exchange in the stock.

P: A partner, director or officer of Barclays Capital Canada Inc. has, during the preceding 12 months, provided services to the subject company for remuneration, other than normal course investment advisory or trade execution services.

## IMPORTANT DISCLOSURES CONTINUED

**Q:** The Corporate and Investment Banking division of Barclays Bank PLC, is a Corporate Broker to this issuer.

**R:** Barclays Capital Canada Inc. and/or an affiliate has received compensation for investment banking services from this issuer in the past 12 months.

**S:** Barclays Capital Canada Inc. is a market-maker in an equity or equity related security issued by this issuer.

### Guide to the Barclays Fundamental Equity Research Rating System:

Our coverage analysts use a relative rating system in which they rate stocks as Overweight, Equal Weight or Underweight (see definitions below) relative to other companies covered by the analyst or a team of analysts that are deemed to be in the same industry (the "industry coverage universe").

In addition to the stock rating, we provide industry views which rate the outlook for the industry coverage universe as Positive, Neutral or Negative (see definitions below). A rating system using terms such as buy, hold and sell is not the equivalent of our rating system. Investors should carefully read the entire research report including the definitions of all ratings and not infer its contents from ratings alone.

### Stock Rating

**Overweight** - The stock is expected to outperform the unweighted expected total return of the industry coverage universe over a 12-month investment horizon.

**Equal Weight** - The stock is expected to perform in line with the unweighted expected total return of the industry coverage universe over a 12-month investment horizon.

**Underweight** - The stock is expected to underperform the unweighted expected total return of the industry coverage universe over a 12-month investment horizon.

**Rating Suspended** - The rating and target price have been suspended temporarily due to market events that made coverage impracticable or to comply with applicable regulations and/or firm policies in certain circumstances including where the Corporate and Investment Banking Division of Barclays is acting in an advisory capacity in a merger or strategic transaction involving the company.

### Industry View

**Positive** - industry coverage universe fundamentals/valuations are improving.

**Neutral** - industry coverage universe fundamentals/valuations are steady, neither improving nor deteriorating.

**Negative** - industry coverage universe fundamentals/valuations are deteriorating.

Below is the list of companies that constitute the "industry coverage universe":

### North America Utilities

Alliant Energy (LNT)	Ameren Corp. (AEE)	American Electric Power (AEP)
American Water Works (AWK)	Aqua America (WTR)	Canadian Utilities Ltd. (CU.TO)
CenterPoint Energy Inc. (CNP)	CMS Energy (CMS)	Consolidated Edison (ED)
Dominion Resources (D)	DTE Energy (DTE)	Duke Energy (DUK)
Edison International (EIX)	Emera Inc. (EMA.TO)	Fortis Inc. (FTS.TO)
Great Plains Energy Inc. (GXP)	Hawaiian Electric Inds (HE)	ITC Holdings (ITC)
National Grid Plc (NGG)	NiSource, Inc. (NI)	Northeast Utilities (NU)
NV Energy, Inc. (NVE)	OGE Energy Corp. (OGE)	Pepco Holdings (POM)
PG&E Corp. (PCG)	Pinnacle West Capital (PNW)	PNM Resources (PNM)
Portland General Electric Co. (POR)	SCANA Corp. (SCG)	Sempra Energy (SRE)
Southern Co. (SO)	TECO Energy (TE)	Westar Energy (WR)
Wisconsin Energy (WEC)	Xcel Energy (XEL)	

### Distribution of Ratings:

Barclays Equity Research has 2370 companies under coverage.

43% have been assigned an Overweight rating which, for purposes of mandatory regulatory disclosures, is classified as a Buy rating; 52% of companies with this rating are investment banking clients of the Firm.

41% have been assigned an Equal Weight rating which, for purposes of mandatory regulatory disclosures, is classified as a Hold rating; 49% of companies with this rating are investment banking clients of the Firm.

14% have been assigned an Underweight rating which, for purposes of mandatory regulatory disclosures, is classified as a Sell rating; 42% of companies with this rating are investment banking clients of the Firm.

### Guide to the Barclays Research Price Target:

## IMPORTANT DISCLOSURES CONTINUED

Each analyst has a single price target on the stocks that they cover. The price target represents that analyst's expectation of where the stock will trade in the next 12 months. Upside/downside scenarios, where provided, represent potential upside/potential downside to each analyst's price target over the same 12-month period.

### Guide to the POINT® Quantitative Equity Scores:

The POINT Quantitative Equity Scores (POINT Scores) are based on consensus historical data and are independent of the Barclays fundamental analysts' views. Each score is composed of a number of standard industry metrics.

A high/low Value score indicates attractive/unattractive valuation. Measures of value include P/E, EV/EBITDA and Free Cash Flow.

A high/low Quality score indicates financial statement strength/weakness. Measures of quality include ROIC and corporate default probability.

A high/low Sentiment score indicates bullish/bearish market sentiment. Measures of sentiment include price momentum and earnings revisions.

These scores are valid as of the date of this report. To view the latest scores, which are updated monthly, [click here](#).

J: Barclays Bank PLC and/or an affiliate trades regularly in the securities of Fortis Inc..

**Valuation Methodology:** Our CAD 37 price target for Fortis is premised upon a sum-of-the-parts (SOTP) methodology. We apply a 20% premium to the 2015 US regulated utility multiple of 15.3x our Canadian utility operations '15E EPS of CAD 1.94. For Caribbean operations we use the publically traded Caribbean Utilities Corporation '15 multiple of 11.2x based upon consensus estimates. We apply this to our Caribbean '15E EPS of CAD 0.21. For unregulated generation we use a '15 power multiple of 15.3x our '15E EPS of CAD 0.03. For corporate and other we use the straight '15 US regulated utility multiple of 15.3x our CAD (0.36) EPS for the segment. To this we add a valuation for the real estate operations based on a 5% cap rate (implying a 20x multiple) on our '15E EPS of CAD 0.14, and an implied value for CHG Energy of CAD 0.54/share premised upon CAD 0.04/share of accretion in 2015.

**Risks which May Impede the Achievement of the Barclays Research Price Target:** Regulatory environments in several Canadian provinces including British Columbia, Alberta, Newfoundland & Labrador, Ontario, and Prince Edward Island. Overall economic and sales growth through the company's various service territories. Execution of large scale capital projects on time and on budget. Real estate valuations, especially in the Atlantic Provinces of Canada.

## Lowering EPS and PT on BC ROE Ruling

**Lowering Estimates and PT on Lower BC ROE:** We are reiterating our Equal Weight rating and are lowering our earnings per share estimates from CAD 1.77/1.89/1.96 to CAD 1.71/1.84/1.93 to reflect the recently awarded lower allowed return on equity awarded by the British Columbia Utilities Commission (BCUC) for Fortis Energy. We are lowering our price target from CAD 37 to CAD 36 reflective of our new earnings estimates. Fully detailed valuation methodologies are provided below.

**BCUC Decides on Cost of Capital:** The BCUC rendered a decision in Phase 1 of the ongoing generic cost of capital decision. The Phase 1 reference utility, BC Fortis Energy Inc. was awarded an allowed ROE of 8.75% and an allowed capital structure of 38.5%. These will remain in effect through the end of 2015. This is phase 1 of the process and other utilities, including FortisBC Electric will have their metrics decided upon in phase 2. Typically the ROE is consistent across utilities and the equity ratio is adjusted to reflect a risk inherent in different utility businesses. The BCUC also introduced an automatic adjustment mechanism (AAM) to set ROEs on an annual basis. The AAM will take effect when long-term Canadian bond yields exceed 3.8%.

**Lowering EPS, FortisBC Electric's Earnings Power Could be Lower:** We are lowering our eps estimates as indicated above to reflect the lower ROE in the BCUC decision. Our model still implies a FortisBC Electric ROE of 9.9% going forward and a 44-45% equity ratio. We believe there is at least 100bps of risk to this assumption in light of the recent BCUC decision, and that there could be approximately CAD 0.03/share of earnings power risk at that subsidiary going forward.

Price (13-May-2013) CAD 34.21  
Price Target CAD 36.00

**Why Equal Weight?** We see shares as fairly valued. Upside can come from higher sales growth and potential JV transmission projects in Ontario. This is offset by growth and execution risk related to completion of large construction projects, which are mitigated by the quality of regulation in British Columbia.

**Upside case** CAD 43.00

We increase sales growth by 1%, include the value of potential joint venture transmission projects in Ontario (NPV \$3/share), and value Canadian utility operations at a 25% premium. This leads to an indicative valuation of CAD 43

**Downside case** CAD 32.00

We decrease sales growth by 1%, do not include any transmission upside (similar to our base case), and value Canadian utility operations at a 15% premium. This leads to an indicative valuation of CAD 32

## Valuation Methodologies

Our CAD 36 price target for Fortis is premised upon a sum-of-the-parts (SOTP) methodology. We apply a 20% premium to the 2015 US regulated utility multiple of 15.3x our Canadian utility operations '15E EPS of CAD 1.91. For Caribbean operations we use the publically traded Caribbean Utilities Corporation '15 multiple of 11.2x based upon consensus estimates. We apply this to our Caribbean '15E EPS of CAD 0.21. For unregulated generation we use a '15 power multiple of 15.3x our '15E EPS of CAD 0.03. For corporate and other we use the straight '15 US regulated utility multiple of 15.3x our CAD (0.36) EPS for the segment. To this we add a valuation for the real estate operations based on a 5% cap rate (implying a 20x multiple) on our '15E EPS of CAD 0.14, and an implied value for CHG Energy of CAD 0.60/share premised upon CAD 0.04/share of accretion in 2015.

Our prior CAD 37 price target for Fortis was premised upon a sum-of-the-parts (SOTP) methodology. We applied a 20% premium to the 2015 US regulated utility multiple of 15.3x our prior Canadian utility operations '15E EPS of CAD 1.94. For Caribbean operations we used the publically traded Caribbean Utilities Corporation '15 multiple of 11.2x based upon consensus estimates. We applied this to our Caribbean '15E EPS of CAD 0.21. For unregulated generation we used a '15 power multiple of 15.3x our '15E EPS of CAD 0.03. For corporate and other we used the straight '15 US regulated utility multiple of 15.3x our CAD (0.36) EPS for the segment. To this we added a valuation for the real estate operations based on a 5% cap rate (implying a 20x multiple) on our '15E EPS of CAD 0.14, and an implied value for CHG Energy of CAD 0.54/share premised upon CAD 0.04/share of accretion in 2015.

## ANALYST(S) CERTIFICATION(S)

We, Ross A. Fowler, CFA and Daniel Ford, CFA, hereby certify (1) that the views expressed in this research report accurately reflect our personal views about any or all of the subject securities or issuers referred to in this research report and (2) no part of our compensation was, is or will be directly or indirectly related to the specific recommendations or views expressed in this research report.

The POINT® Quantitative Equity Scores (POINT Scores) referenced herein are produced by the firm's POINT quantitative model and Barclays hereby certifies that (1) the views expressed in this research report accurately reflect the firm's POINT Scores model and (2) no part of the firm's compensation was, is or will be directly or indirectly related to the specific recommendations or views expressed in this research report.

## IMPORTANT DISCLOSURES

Barclays Research is a part of the Corporate and Investment Banking division of Barclays Bank PLC and its affiliates (collectively and each individually, "Barclays"). For current important disclosures regarding companies that are the subject of this research report, please send a written request to: Barclays Research Compliance, 745 Seventh Avenue, 17th Floor, New York, NY 10019 or refer to <http://publicresearch.barclays.com> or call 212-526-1072.

The analysts responsible for preparing this research report have received compensation based upon various factors including the firm's total revenues, a portion of which is generated by investment banking activities.

Analysts regularly conduct site visits to view the material operations of covered companies, but Barclays policy prohibits them from accepting payment or reimbursement by any covered company of their travel expenses for such visits.

In order to access Barclays Statement regarding Research Dissemination Policies and Procedures, please refer to <https://live.barcap.com/publiccp/RSR/nyfipubs/disclaimer/disclaimer-research-dissemination.html>.

The Corporate and Investment Banking division of Barclays produces a variety of research products including, but not limited to, fundamental analysis, equity-linked analysis, quantitative analysis, and trade ideas. Recommendations contained in one type of research product may differ from recommendations contained in other types of research products, whether as a result of differing time horizons, methodologies, or otherwise.

### Primary Stocks (Ticker, Date, Price)

**R:** Barclays Capital Canada Inc. and/or an affiliate has received compensation for investment banking services from this issuer in the past 12 months.

**S:** Barclays Capital Canada Inc. is a market-maker in an equity or equity related security issued by this issuer.

### Guide to the Barclays Fundamental Equity Research Rating System:

Our coverage analysts use a relative rating system in which they rate stocks as Overweight, Equal Weight or Underweight (see definitions below) relative to other companies covered by the analyst or a team of analysts that are deemed to be in the same industry (the "industry coverage universe").

In addition to the stock rating, we provide industry views which rate the outlook for the industry coverage universe as Positive, Neutral or Negative (see definitions below). A rating system using terms such as buy, hold and sell is not the equivalent of our rating system. Investors should carefully read the entire research report including the definitions of all ratings and not infer its contents from ratings alone.

### Stock Rating

**Overweight** - The stock is expected to outperform the unweighted expected total return of the industry coverage universe over a 12-month investment horizon.

**Equal Weight** - The stock is expected to perform in line with the unweighted expected total return of the industry coverage universe over a 12-month investment horizon.

**Underweight** - The stock is expected to underperform the unweighted expected total return of the industry coverage universe over a 12-month investment horizon.

**Rating Suspended** - The rating and target price have been suspended temporarily due to market events that made coverage impracticable or to comply with applicable regulations and/or firm policies in certain circumstances including where the Corporate and Investment Banking Division of Barclays is acting in an advisory capacity in a merger or strategic transaction involving the company.

### Industry View

**Positive** - industry coverage universe fundamentals/valuations are improving.

**Neutral** - industry coverage universe fundamentals/valuations are steady, neither improving nor deteriorating.

**Negative** - industry coverage universe fundamentals/valuations are deteriorating.

Below is the list of companies that constitute the "industry coverage universe":

### North America Utilities

Alliant Energy (LNT)	Ameren Corp. (AEE)	American Electric Power (AEP)
American Water Works (AWK)	Aqua America (WTR)	Canadian Utilities Ltd. (CU.TO)
CenterPoint Energy Inc. (CNP)	CMS Energy (CMS)	Consolidated Edison (ED)
Dominion Resources (D)	DTE Energy (DTE)	Duke Energy (DUK)
Edison International (EIX)	Emera Inc. (EMA.TO)	Fortis Inc. (FTS.TO)
Great Plains Energy Inc. (GXP)	Hawaiian Electric Inds (HE)	ITC Holdings (ITC)
National Grid Plc (NGG)	NiSource, Inc. (NI)	Northeast Utilities (NU)
NV Energy, Inc. (NVE)	OGE Energy Corp. (OGE)	Pepco Holdings (POM)
PG&E Corp. (PCG)	Pinnacle West Capital (PNW)	PNM Resources (PNM)
Portland General Electric Co. (POR)	SCANA Corp. (SCG)	Sempra Energy (SRE)
Southern Co. (SO)	TECO Energy (TE)	Westar Energy (WR)
Wisconsin Energy (WEC)	Xcel Energy (XEL)	

### Distribution of Ratings:

Barclays Equity Research has 2371 companies under coverage.

43% have been assigned an Overweight rating which, for purposes of mandatory regulatory disclosures, is classified as a Buy rating; 52% of companies with this rating are investment banking clients of the Firm.

41% have been assigned an Equal Weight rating which, for purposes of mandatory regulatory disclosures, is classified as a Hold rating; 48% of companies with this rating are investment banking clients of the Firm.

13% have been assigned an Underweight rating which, for purposes of mandatory regulatory disclosures, is classified as a Sell rating; 42% of companies with this rating are investment banking clients of the Firm.

## IMPORTANT DISCLOSURES CONTINUED

### Guide to the Barclays Research Price Target:

Each analyst has a single price target on the stocks that they cover. The price target represents that analyst's expectation of where the stock will trade in the next 12 months. Upside/downside scenarios, where provided, represent potential upside/potential downside to each analyst's price target over the same 12-month period.

### Guide to the POINT® Quantitative Equity Scores:

The POINT Quantitative Equity Scores (POINT Scores) are based on consensus historical data and are independent of the Barclays fundamental analysts' views. Each score is composed of a number of standard industry metrics.

A high/low Value score indicates attractive/unattractive valuation. Measures of value include P/E, EV/EBITDA and Free Cash Flow.

A high/low Quality score indicates financial statement strength/weakness. Measures of quality include ROIC and corporate default probability.

A high/low Sentiment score indicates bullish/bearish market sentiment. Measures of sentiment include price momentum and earnings revisions.

These scores are valid as of the date of this report. To view the latest scores, which are updated monthly, [click here](#).

For a more detailed description of the underlying methodology for each score, please [click here](#).

J: Barclays Bank PLC and/or an affiliate trades regularly in the securities of Fortis Inc..

**Valuation Methodology:** Our CAD 36 price target for Fortis is premised upon a sum-of-the-parts (SOTP) methodology. We apply a 20% premium to the 2015 US regulated utility multiple of 15.3x our Canadian utility operations '15E EPS of CAD 1.91. For Caribbean operations we use the publically traded Caribbean Utilities Corporation '15 multiple of 11.2x based upon consensus estimates. We apply this to our Caribbean '15E EPS of CAD 0.21. For unregulated generation we use a '15 power multiple of 15.3x our '15E EPS of CAD 0.03. For corporate and other we use the straight '15 US regulated utility multiple of 15.3x our CAD (0.36) EPS for the segment. To this we add a valuation for the real estate operations based on a 5% cap rate (implying a 20x multiple) on our '15E EPS of CAD 0.14, and an implied value for CHG Energy of CAD 0.60/share premised upon CAD 0.04/share of accretion in 2015.

**Risks which May Impede the Achievement of the Barclays Research Price Target:** Regulatory environments in several Canadian provinces including British Columbia, Alberta, Newfoundland & Labrador, Ontario, and Prince Edward Island. Overall economic and sales growth through the company's various service territories. Execution of large scale capital projects on time and on budget. Real estate valuations, especially in the Atlantic Provinces of Canada.

Fortis Inc.

## NY PSC Approves CHG Transaction, Increasing EPS, Lowering PT

**NY PSC Approves CHG Transaction:** Today the New York Public Service Commission approved the pending acquisition of CH Energy Group by Fortis Inc. on a 4-0 vote. The approval clears the way for the transaction to close and also validates Fortis's US acquisition strategy. The company has publically stated a desire to grow US rate base to approximately \$4 Billion through acquisitions. The CHG assets will constitute approximately \$1 Billion in US rate base. We expect Fortis to focus on closing the transaction and incorporating the CHG assets in the short term but to then turn attention to other potential US targets. We believe, based upon the CHG transaction as a template that Fortis would prefer all else equal, small to mid cap single state utilities.

**Increasing EPS estimates; Lowering PT on multiple compression:** We are increasing our eps estimates from CAD 1.71/1.84/1.93 to CAD 1.72/1.87/1.97 to account for accretion from the CHG transaction. We however are also lowering our price target from CAD 36 to CAD 34 due to multiple compression as a result of the recent underperformance of the regulated utility group due to rising interest rates. Price target methodologies are provided below.

**Risks to Acquisition Based Growth:** We continue to believe that acquisitions in the utility space are procedurally difficult and that Fortis would need to issue equity to pursue any further transactions. In the last few years it has attempted two acquisitions in the US – Central Vermont and CH Energy Group – closing one of those successfully. While this demonstrates an ability for management to execute on the strategy, the regulatory process involved in potential acquisitions is likely to increase the risk premium in the shares until it is completed.

Price (12-Jun-2013) CAD 31.77  
Price Target CAD 34.00

**Why Equal Weight?** We see shares as fairly valued. Upside can come from higher sales growth and potential JV transmission projects in Ontario. This is offset by growth and execution risk related to completion of large construction projects, which are mitigated by the quality of regulation in British Columbia.

**Upside case** CAD 41.00

We increase sales growth by 1%, include the value of potential joint venture transmission projects in Ontario (NPV \$3/share), and value Canadian utility operations at a 25% premium. This leads to an indicative valuation of CAD 41

**Downside case** CAD 30.00

We decrease sales growth by 1%, do not include any transmission upside (similar to our base case), and value Canadian utility operations at a 15% premium. This leads to an indicative valuation of CAD 30

### Price Target Methodologies

Our CAD 34 price target for Fortis is premised upon a sum-of-the-parts (SOTP) methodology. We apply a 20% premium to the 2015 US regulated utility multiple of 14.2x our Canadian utility operations '15E EPS of CAD 1.91. For Caribbean operations we use the publically traded Caribbean Utilities Corporation '15 multiple of 11.2x based upon consensus estimates. We apply this to our Caribbean operations '15E EPS of CAD 0.21. For unregulated generation we use a '15 power multiple of 14.2x our '15E EPS of CAD 0.03. For corporate and other we use the straight '15 US regulated utility multiple of 15.3x our CAD (0.32) EPS for the segment plus a CAD 0.04 contribution from CH Energy Group. To this we add a valuation for the real estate operations based on a 5% cap rate (implying a 20x multiple) on our '15E EPS of CAD 0.14.

Our prior CAD 36 price target for Fortis was premised upon a sum-of-the-parts (SOTP) methodology. We applied a 20% premium to the then 2015 US regulated utility multiple of 15.3x our Canadian utility operations '15E EPS of CAD 1.91. For Caribbean operations we used the publically traded Caribbean Utilities Corporation '15 multiple of 11.2x based upon consensus estimates. We applied this to our Caribbean '15E EPS of CAD 0.21. For unregulated generation we used the then '15 power multiple of 15.3x our '15E EPS of CAD 0.03. For corporate and other we used the then straight '15 US regulated utility multiple of 15.3x our CAD (0.36) EPS for the segment. To this we added a valuation for the real estate operations based on a 5% cap rate (implying a 20x multiple) on our '15E EPS of CAD 0.14, and an implied value for CHG Energy of CAD 0.60/share premised upon CAD 0.04/share of accretion in 2015.

**R:** Barclays Capital Canada Inc. and/or an affiliate has received compensation for investment banking services from this issuer in the past 12 months.

**S:** Barclays Capital Canada Inc. is a market-maker in an equity or equity related security issued by this issuer.

### Guide to the Barclays Fundamental Equity Research Rating System:

Our coverage analysts use a relative rating system in which they rate stocks as Overweight, Equal Weight or Underweight (see definitions below) relative to other companies covered by the analyst or a team of analysts that are deemed to be in the same industry (the "industry coverage universe").

In addition to the stock rating, we provide industry views which rate the outlook for the industry coverage universe as Positive, Neutral or Negative (see definitions below). A rating system using terms such as buy, hold and sell is not the equivalent of our rating system. Investors should carefully read the entire research report including the definitions of all ratings and not infer its contents from ratings alone.

### Stock Rating

**Overweight** - The stock is expected to outperform the unweighted expected total return of the industry coverage universe over a 12-month investment horizon.

**Equal Weight** - The stock is expected to perform in line with the unweighted expected total return of the industry coverage universe over a 12-month investment horizon.

**Underweight** - The stock is expected to underperform the unweighted expected total return of the industry coverage universe over a 12-month investment horizon.

**Rating Suspended** - The rating and target price have been suspended temporarily due to market events that made coverage impracticable or to comply with applicable regulations and/or firm policies in certain circumstances including where the Corporate and Investment Banking Division of Barclays is acting in an advisory capacity in a merger or strategic transaction involving the company.

### Industry View

**Positive** - industry coverage universe fundamentals/valuations are improving.

**Neutral** - industry coverage universe fundamentals/valuations are steady, neither improving nor deteriorating.

**Negative** - industry coverage universe fundamentals/valuations are deteriorating.

Below is the list of companies that constitute the "industry coverage universe":

#### North America Utilities

Alliant Energy (LNT)	Ameren Corp. (AEE)	American Electric Power (AEP)
American Water Works (AWK)	Aqua America (WTR)	Canadian Utilities Ltd. (CU.TO)
CenterPoint Energy Inc. (CNP)	CMS Energy (CMS)	Consolidated Edison (ED)

### Distribution of Ratings:

Barclays Equity Research has 2382 companies under coverage.

43% have been assigned an Overweight rating which, for purposes of mandatory regulatory disclosures, is classified as a Buy rating; 52% of companies with this rating are investment banking clients of the Firm.

41% have been assigned an Equal Weight rating which, for purposes of mandatory regulatory disclosures, is classified as a Hold rating; 48% of companies with this rating are investment banking clients of the Firm.

13% have been assigned an Underweight rating which, for purposes of mandatory regulatory disclosures, is classified as a Sell rating; 42% of companies with this rating are investment banking clients of the Firm.

## IMPORTANT DISCLOSURES CONTINUED

### Guide to the Barclays Research Price Target:

Each analyst has a single price target on the stocks that they cover. The price target represents that analyst's expectation of where the stock will trade in the next 12 months. Upside/downside scenarios, where provided, represent potential upside/potential downside to each analyst's price target over the same 12-month period.

### Guide to the POINT® Quantitative Equity Scores:

The POINT Quantitative Equity Scores (POINT Scores) are based on consensus historical data and are independent of the Barclays fundamental analysts' views. Each score is composed of a number of standard industry metrics.

A high/low Value score indicates attractive/unattractive valuation. Measures of value include P/E, EV/EBITDA and Free Cash Flow.

A high/low Quality score indicates financial statement strength/weakness. Measures of quality include ROIC and corporate default probability.

A high/low Sentiment score indicates bullish/bearish market sentiment. Measures of sentiment include price momentum and earnings revisions.

These scores are valid as of the date of this report. To view the latest scores, which are updated monthly, [click here](#).

For a more detailed description of the underlying methodology for each score, please [click here](#).

J: Barclays Bank PLC and/or an affiliate trades regularly in the securities of Fortis Inc..

**Valuation Methodology:** Our CAD 34 price target for Fortis is premised upon a sum-of-the-parts (SOTP) methodology. We apply a 20% premium to the 2015 US regulated utility multiple of 14.2x our Canadian utility operations '15E EPS of CAD 1.91. For Caribbean operations we use the publically traded Caribbean Utilities Corporation '15 multiple of 11.2x based upon consensus estimates. We apply this to our Caribbean '15E EPS of CAD 0.21. For unregulated generation we use a '15 power multiple of 14.2x our '15E EPS of CAD 0.03. For corporate and other we use the straight '15 US regulated utility multiple of 15.3x our CAD (0.32) EPS for the segment plus a CAD 0.04 contribution from CH Energy Group. To this we add a valuation for the real estate operations based on a 5% cap rate (implying a 20x multiple) on our '15E EPS of CAD 0.14.

**Risks which May Impede the Achievement of the Barclays Research Price Target:** Regulatory environments in several Canadian provinces including British Columbia, Alberta, Newfoundland & Labrador, Ontario, and Prince Edward Island. Overall economic and sales growth through the company's various service territories. Execution of large scale capital projects on time and on budget. Real estate valuations, especially in the Atlantic Provinces of Canada.

Fortis Inc.

## 2Q In-Line; Price Target to CAD 35

**Reiterating Equal Weight:** We reiterate our Equal Weight rating and increase our price target from CAD 34 to CAD 35 premised upon multiple expansion despite the reduction in our earnings per share forecast from CAD 1.72/1.87/1.96 to CAD 1.71/1.84/1.93. The reduction in our EPS forecast is driven by lower accretion assumptions related to the acquisition of CH Energy Group, which closed in late June.

**2Q In Line:** For the quarter the company reported ongoing earnings per share of \$0.32 vs. \$0.36 last year, consensus estimates of \$0.32, and our estimate of \$0.35. There were several non-recurring items in the quarter. Reported earnings were \$54 million (\$0.28/share), however, these included income tax recoveries of \$25 million (\$0.13/share) and CH Energy Group acquisition expenses of \$32 million (\$0.17/share).

**CH Energy Group Transaction Closed:** The acquisition of CH Energy Group closed on June 27 (see our note *NY PSC Approves CHG Transaction*, published on June 13). Management indicated in the press release for the quarter that the merger is not expected to be accretive until 2015. This is below the original expectations of accretion in 2013 or 2014 due to less favorable acquisition terms to ensure regulatory approval. As noted above, we have updated our EPS forecast pushing out accretion to '15.

**Lower ROEs in BC; More Regulatory Decisions to Come:** In May the British Columbia Utilities Commission ruled on Phase 1 of the general cost of capital proceeding lowering FortisBC Energy's ROE to 8.75% from 9.50% and the equity ratio from 40% to 38.5% (*Lowering EPS and PT on BC ROE*, published May 14). The BCUC will rule on final ROEs for FortisBC electric and the smaller gas utilities in the province in Phase 2 of the proceeding, which is underway. In April Newfoundland Power received a decision from the regulator maintaining ROEs and capital structure at 8.8% and 45%, respectively, through 2015. The Alberta Utilities Commission is currently in the process of deciding the allowed ROE and capital structure for 2013 for FortisAlberta.

Price Target CAD 35.00

**Why Equal Weight?** We see shares as fairly valued. Upside can come from higher sales growth and potential JV transmission projects in Ontario. This is offset by growth and execution risk related to completion of large construction projects, which are mitigated by the quality of regulation in British Columbia.

**Upside case** CAD 42.00

We increase sales growth by 1%, include the value of potential joint venture transmission projects in Ontario (NPV \$3/share), and value Canadian utility operations at a 25% premium. This leads to an indicative valuation of CAD 42

**Downside case** CAD 31.00

We decrease sales growth by 1%, do not include any transmission upside (similar to our base case), and value Canadian utility operations at a 15% premium. This leads to an indicative valuation of CAD 31

## Capital Forecast Maintained

In the press release for the quarter management maintained capital expenditure guidance for 2013 of CAD 1.3 Billion. Year to date as of the end of the second quarter CAD 548 million has been deployed. A breakdown of the spending so far this year is provided in the table below.

FIGURE 1  
Year to Date Capital Spending by Segment, CAD Millions

Segment	Amount
FortisBC Energy Companies	92
FortisAlberta	230
FortisBC Electric	33
Newfoundland Power	38
Other Canadian Utilities	28
<b>Total Regulated Canadian Utilities</b>	<b>421</b>
Caribbean Utilities	24
Fortis Generation	79
Fortis Properties & Other	24
<b>Total Capital Expenditures</b>	<b>548</b>

Source: 2Q 2013 Fortis Earnings Press Release, Barclays Research Estimates

Management continues to expect that capital expenditures through 2017 will total CAD 6 billion. Construction of the 335 MW Waneta Hydroelectric plant expansion continues to be forecast to be on time and on budget. The facility should enter service in the spring of 2015. The plant is projected to cost CAD 900 million and approximately CAD 513 million has been spent since the beginning of construction in 2010.

Capital expenditures related to the Waneta Expansion are expected to be lower in 2013 than the forecast of CAD 227 million, primarily due to timing. Capital expenditures are also expected to be lower at FortisBC Alternative Energy Services (FAES) than the original forecast of CAD 43 million due to the uncertainty of timing around alternative energy projects. The total capital expenditures for the year remain forecast at CAD 1.3 billion as a result of the inclusion of CAD 50 million of capital expenditures at recently acquired Central Hudson in the second half.

## Regulatory Decision Still to Come

Allowed returns on equity were adjusted 75bps lower for the smaller gas utilities and FortisBC Electric in conjunction with the May decision from the BCUC on the reference utility in the province. The final allowed returns and equity ratios for these utilities will be determined in Phase 2 of the process, which is currently underway. In Alberta, the Alberta Utilities Commission is currently reviewing the cost of capital for utilities in the province. Hearings are scheduled for early 2014 and the timing of a final outcome on this matter is currently unknown.

In June of this year the Electricity Regulatory Authority (ERA) approved Caribbean Utilities 2013 – 2017 capital plan of US\$123 million related to non-generation installation capital expenditures. As a reminder generation expenditures are approved separately by the ERA through a competitive bid process. In March, Fortis Turks & Caicos submitted their 2012 reports to the Government. These outlined a rate base of US\$195 million for 2012 and a cumulative shortfall in achieving allowable profits of US\$105 million as of the end of last year.

## Second Quarter Results

For the quarter the company reported ongoing earnings per share of \$0.32 vs. \$0.36 last year, consensus estimates of \$0.32 and our estimate of \$0.35. Results were driven by lower earnings from the gas utilities in British Columbia, reflective of the lower allowed return on equity as ruled by the British Columbia Utilities Commission in May.

There were two major one-time items in the quarter that needed to be adjusted out of reported results of \$0.28/share. First, acquisition costs for the CH Energy Group acquisition reduced reported earnings per share by \$0.17 and tax recoveries related to Part VI.1 tax impacts increased reported earnings per share by \$0.13. Adjusting reported earnings of \$0.28/share by these two items results in the reported ongoing earnings per share results for the quarter of \$0.32.

Results by segment are provided in the table below.

Source: 2Q 2013 Fortis Earnings Press Release, Barclays Research Estimates

Results at the FortisBC Energy companies reflected the BCUC decision lowering allowed ROEs and equity ratios in British Columbia. Newfoundland Power results were flat net of a tax recovery adjustment of CAD 13 million. Other Canadian Utilities also benefited slightly from tax adjustments. Fortis Generation results were lower as a result of lower hydroelectric output due to lower rainfall in Belize. Corporate & Other results were reported inclusive of CH Energy Group acquisition costs and some tax adjustment benefits.

## Valuation Methodologies

Our CAD 35 price target for Fortis is premised upon a sum-of-the-parts (SOTP) methodology. We apply a 20% premium to the 2015 US regulated utility multiple of 15.2x our Canadian utility operations '15E EPS of CAD 1.90. For Caribbean operations we use the publically traded Caribbean Utilities Corporation '15 multiple of 11.2x based upon consensus estimates. We apply this to our Caribbean '15E EPS of CAD 0.21. For unregulated generation we use a '15 power multiple of 15.2x our '15E EPS of CAD 0.03. For corporate and other we use the straight '15 US regulated utility multiple of 15.3x our CAD (0.34) EPS

for the segment. To this we add a valuation for the real estate operations based on a 5% cap rate (implying a 20x multiple) on our '15E EPS of CAD 0.13.

Our prior CAD 34 price target for Fortis was premised upon a sum-of-the-parts (SOTP) methodology. We applied a 20% premium to the then 2015 US regulated utility multiple of 14.2x our Canadian utility operations '15E EPS of CAD 1.91. For Caribbean operations we used the publically traded Caribbean Utilities Corporation '15 multiple of 11.2x based upon consensus estimates. We applied this to our Caribbean '15E EPS of CAD 0.21. For unregulated generation we used a '15 power multiple of 14.2x our '15E EPS of CAD 0.03. For corporate and other we used the straight '15 US regulated utility multiple of 14.2x our CAD (0.32) EPS for the segment plus a CAD 0.04 contribution from CH Energy Group. To this we added a valuation for the real estate operations based on a 5% cap rate (implying a 20x multiple) on our '15E EPS of CAD 0.14.

## ANALYST(S) CERTIFICATION(S)

We, Ross A. Fowler, CFA and Daniel Ford, CFA, hereby certify (1) that the views expressed in this research report accurately reflect our personal views about any or all of the subject securities or issuers referred to in this research report and (2) no part of our compensation was, is or will be directly or indirectly related to the specific recommendations or views expressed in this research report.

The POINT® Quantitative Equity Scores (POINT Scores) referenced herein are produced by the firm's POINT quantitative model and Barclays hereby certifies that (1) the views expressed in this research report accurately reflect the firm's POINT Scores model and (2) no part of the firm's compensation was, is or will be directly or indirectly related to the specific recommendations or views expressed in this research report.

## IMPORTANT DISCLOSURES

Barclays Research is a part of the Corporate and Investment Banking division of Barclays Bank PLC and its affiliates (collectively and each individually, "Barclays"). For current important disclosures regarding companies that are the subject of this research report, please send a written request to: Barclays Research Compliance, 745 Seventh Avenue, 17th Floor, New York, NY 10019 or refer to <http://publicresearch.barclays.com> or call 212-526-1072.

The analysts responsible for preparing this research report have received compensation based upon various factors including the firm's total revenues, a portion of which is generated by investment banking activities.

Analysts regularly conduct site visits to view the material operations of covered companies, but Barclays policy prohibits them from accepting payment or reimbursement by any covered company of their travel expenses for such visits.

In order to access Barclays Statement regarding Research Dissemination Policies and Procedures, please refer to <https://live.barcap.com/publiccp/RSR/nyfipubs/disclaimer/disclaimer-research-dissemination.html>.

The Corporate and Investment Banking division of Barclays produces a variety of research products including, but not limited to, fundamental analysis, equity-linked analysis, quantitative analysis, and trade ideas. Recommendations contained in one type of research product may differ from recommendations contained in other types of research products, whether as a result of differing time horizons, methodologies, or otherwise.

### Primary Stocks (Ticker, Date, Price)

Fortis Inc. (FTS.TO, 31-Jul-2013, CAD 32.29), Equal Weight/Positive, J

### Disclosure Legend:

A: Barclays Bank PLC and/or an affiliate has been lead manager or co-lead manager of a publicly disclosed offer of securities of the issuer in the previous 12 months.

B: An employee of Barclays Bank PLC and/or an affiliate is a director of this issuer.

At any given time, its associated Designated Market Maker may have "long" or "short" inventory position in the stock; and its associated Designated Market Maker may be on the opposite side of orders executed on the floor of the New York Stock Exchange in the stock.

P: A partner, director or officer of Barclays Capital Canada Inc. has, during the preceding 12 months, provided services to the subject company for remuneration, other than normal course investment advisory or trade execution services.

## IMPORTANT DISCLOSURES CONTINUED

**Q:** The Corporate and Investment Banking division of Barclays Bank PLC, is a Corporate Broker to this issuer.

**R:** Barclays Capital Canada Inc. and/or an affiliate has received compensation for investment banking services from this issuer in the past 12 months.

**S:** Barclays Capital Canada Inc. is a market-maker in an equity or equity related security issued by this issuer.

### Guide to the Barclays Fundamental Equity Research Rating System:

Our coverage analysts use a relative rating system in which they rate stocks as Overweight, Equal Weight or Underweight (see definitions below) relative to other companies covered by the analyst or a team of analysts that are deemed to be in the same industry (the "industry coverage universe").

In addition to the stock rating, we provide industry views which rate the outlook for the industry coverage universe as Positive, Neutral or Negative (see definitions below). A rating system using terms such as buy, hold and sell is not the equivalent of our rating system. Investors should carefully read the entire research report including the definitions of all ratings and not infer its contents from ratings alone.

### Stock Rating

**Overweight** - The stock is expected to outperform the unweighted expected total return of the industry coverage universe over a 12-month investment horizon.

**Equal Weight** - The stock is expected to perform in line with the unweighted expected total return of the industry coverage universe over a 12-month investment horizon.

**Underweight** - The stock is expected to underperform the unweighted expected total return of the industry coverage universe over a 12-month investment horizon.

**Rating Suspended** - The rating and target price have been suspended temporarily due to market events that made coverage impracticable or to comply with applicable regulations and/or firm policies in certain circumstances including where the Corporate and Investment Banking Division of Barclays is acting in an advisory capacity in a merger or strategic transaction involving the company.

### Industry View

**Positive** - industry coverage universe fundamentals/valuations are improving.

**Neutral** - industry coverage universe fundamentals/valuations are steady, neither improving nor deteriorating.

**Negative** - industry coverage universe fundamentals/valuations are deteriorating.

Below is the list of companies that constitute the "industry coverage universe":

#### North America Utilities

Alliant Energy (LNT)	Ameren Corp. (AEE)	American Electric Power (AEP)
American Water Works (AWK)	Aqua America (WTR)	Canadian Utilities Ltd. (CU.TO)
CenterPoint Energy Inc. (CNP)	CMS Energy (CMS)	Consolidated Edison (ED)
Dominion Resources (D)	DTE Energy (DTE)	Duke Energy (DUK)
Edison International (EIX)	Emera Inc. (EMA.TO)	Fortis Inc. (FTS.TO)
Great Plains Energy Inc. (GXP)	Hawaiian Electric Inds (HE)	ITC Holdings (ITC)
National Grid Plc (NGG)	NiSource, Inc. (NI)	Northeast Utilities (NU)
NV Energy, Inc. (NVE)	OGE Energy Corp. (OGE)	Pepco Holdings (POM)
PG&E Corp. (PCG)	Pinnacle West Capital (PNW)	PNM Resources (PNM)
Portland General Electric Co. (POR)	SCANA Corp. (SCG)	Sempra Energy (SRE)
Southern Co. (SO)	TECO Energy (TE)	Westar Energy (WR)
Wisconsin Energy (WEC)	Xcel Energy (XEL)	

### Distribution of Ratings:

Barclays Equity Research has 2390 companies under coverage.

44% have been assigned an Overweight rating which, for purposes of mandatory regulatory disclosures, is classified as a Buy rating; 51% of companies with this rating are investment banking clients of the Firm.

41% have been assigned an Equal Weight rating which, for purposes of mandatory regulatory disclosures, is classified as a Hold rating; 47% of companies with this rating are investment banking clients of the Firm.

13% have been assigned an Underweight rating which, for purposes of mandatory regulatory disclosures, is classified as a Sell rating; 42% of companies with this rating are investment banking clients of the Firm.

## IMPORTANT DISCLOSURES CONTINUED

### Guide to the Barclays Research Price Target:

Each analyst has a single price target on the stocks that they cover. The price target represents that analyst's expectation of where the stock will trade in the next 12 months. Upside/downside scenarios, where provided, represent potential upside/potential downside to each analyst's price target over the same 12-month period.

### Guide to the POINT® Quantitative Equity Scores:

The POINT Quantitative Equity Scores (POINT Scores) are based on consensus historical data and are independent of the Barclays fundamental analysts' views. Each score is composed of a number of standard industry metrics.

A high/low Value score indicates attractive/unattractive valuation. Measures of value include P/E, EV/EBITDA and Free Cash Flow.

A high/low Quality score indicates financial statement strength/weakness. Measures of quality include ROIC and corporate default probability.

A high/low Sentiment score indicates bullish/bearish market sentiment. Measures of sentiment include price momentum and earnings revisions.

These scores are valid as of the date of this report. To view the latest scores, which are updated monthly, [click here](#).

For a more detailed description of the underlying methodology for each score, please [click here](#).

J: Barclays Bank PLC and/or an affiliate trades regularly in the securities of Fortis Inc..

**Valuation Methodology:** Our CAD 35 price target for Fortis is premised upon a sum-of-the-parts (SOTP) methodology. We apply a 20% premium to the 2015 US regulated utility multiple of 15.2x our Canadian utility operations '15E EPS of CAD 1.90. For Caribbean operations we use the publically traded Caribbean Utilities Corporation '15 multiple of 11.2x based upon consensus estimates. We apply this to our Caribbean '15E EPS of CAD 0.21. For unregulated generation we use a '15 power multiple of 15.2x our '15E EPS of CAD 0.03. For corporate and other we use the straight '15 US regulated utility multiple of 15.3x our CAD (0.34) EPS for the segment. To this we add a valuation for the real estate operations based on a 5% cap rate (implying a 20x multiple) on our '15E EPS of CAD 0.13.

**Risks which May Impede the Achievement of the Barclays Research Price Target:** Regulatory environments in several Canadian provinces including British Columbia, Alberta, Newfoundland & Labrador, Ontario, and Prince Edward Island. Overall economic and sales growth through the company's various service territories. Execution of large scale capital projects on time and on budget. Real estate valuations, especially in the Atlantic Provinces of Canada.

Fortis Inc.

## Q3 Miss \$0.23; Numbers Unchanged

**Reiterating Equal Weight:** We are reiterating our Equal Weight rating and our CAD 35 price target as well as our earnings per share forecast of CAD 1.71/1.84/1.93 for '13/14/15 respectively.

**Q3 '13 EPS \$0.23:** For the quarter the company reported ongoing earnings per share of \$0.23 versus \$0.24 last year, consensus estimates of \$0.27 and our estimate of \$0.27. Results were driven by the inclusion of the recently acquired (end of Q2 '13) Central Hudson utilities in New York, and better results in the Generation segment as a result of better hydrology in Belize. These positive factors were more than offset by higher losses at FortisBC Energy as a result of higher O&M expenses and lower allowed returns on equity and equity ratios as well as lower than expected customer growth.

**Central Hudson in the Fold:** CH Energy Group was acquired in late June and management noted that the unit has successfully integrated into the Fortis family. The group was acquired for US\$1.5 Billion including the assumption of US\$518 million of debt on closing. Central Hudson contributed \$12 million in earnings for Q3 '13 comparable with Q3 '12. Due to the common share offering to fund the acquisition and financing costs associated with the transaction EPS in Q3 '13 was not materially impacted by the acquisition of CH Energy Group. Management still expects the acquisition to be accretive to earnings per share beginning in 2015.

**Regulatory Update:** The company expects a final decision in the British Columbia generic cost of capital proceeding in the first half of next year. In May, interim rates were approved using returns on equity of 8.75% for FEI, 9.25% for FEVI and FEWI, and 9.15% for BC Electric. Given that interest rates have risen since May, there could be upside to our modeled estimates if the BC regulator raises allowed returns in kind. In Alberta, final capital structure and allowed return on equity are yet to be determined, and final resolution of tracked capital expenditures outside of performance based ratemaking is also awaiting resolution. Currently rates reflect an interim decision to allow 60% of the amount filed for to be recovered.

Price (31-Oct-2013) CAD 32.43  
Price Target CAD 35.00

**Why Equal Weight?** We see shares as fairly valued. Upside can come from higher sales growth and potential JV transmission projects in Ontario. This is offset by growth and execution risk related to completion of large construction projects, which are mitigated by the quality of regulation in British Columbia.

**Upside case** CAD 42.00

We increase sales growth by 1%, include the value of potential joint venture transmission projects in Ontario (NPV \$3/share), and value Canadian utility operations at a 25% premium. This leads to an indicative valuation of CAD 42

**Downside case** CAD 31.00

We decrease sales growth by 1%, do not include any transmission upside (similar to our base case), and value Canadian utility operations at a 15% premium. This leads to an indicative valuation of CAD 31

## Waneta Expansion Construction Update

---

Construction of the 335MW, CAD 900 million Waneta hydroelectric expansion project continues on track for completion in the spring of 2015. The project remains on budget. About CAD 534 million has been invested as of the end of the third quarter since 2010 with CAD 98 million spent so far in 2013. Year to date in 2013 civil construction of the power house and intake have continued, installation of the turbine components and ancillary mechanical and electrical powerhouse services has been completed. The scroll case (the large spiral area surrounding the turbine) has also been encapsulated in concrete. In the quarter, the generator step-up transformers were delivered to the site for assembly. Offsite in the quarter the first turbine runner and turbine operating mechanism were completed.

## Regulatory Update

---

### British Columbia

In February, the British Columbia Utilities Commission (BCUC) denied the application of the company's gas utility subsidiaries to amalgamate into one utility and implement common rates across the service territory. The company filed for appeal and the reconsideration filing was taken up by the BCUC in June. The regulatory process for the reconsideration decision is expected to wrap up this month and a decision is expected from the BCUC in early 2014.

In May, the BCUC issued the order in the first phase of the generic cost of capital proceeding, which set allowed returns on equity at 8.75% with a 38.5% equity ratio. This benchmark is the allowed return and capital structure for FEI. FEVI, FEWI, and BC Electric will have their return metrics determined in the second phase of the process for which a decision is expected in early 2014. For now interim rates have been approved using allowed returns of 9.25%, 9.25%, and 9.15% respectively. Furthermore, the BCUC has reinstituted an automatic adjustment mechanism (AAM) for the cost of capital through the end of 2015. The AAM will commence when the long term Government of Canada bond yield exceeds 3.8%.

The two main utility subsidiaries in British Columbia also filed for the reinstitution of a performance based ratemaking plan for 2014 through 2018. FEI filed for a delivery rate increase of approximately 1.4% in 2014 premised upon a 2014 mid-year rate base of CAD 2,789 million. BC Electric filed for a 3.3% rate increase premised upon a 2014 mid-year rate base of 1.192 million. FEVI and FEWI have filed applications with the BCUC to hold rates flat in 2014. Decisions on the rate applications are expected in mid-2014.

### Alberta

In March, the Alberta Utilities Commission (AUC) issued an interim decision for performance based ratemaking using a productivity factor of 1.71% and a "K-factor" (capex outside of PBR) placeholder of 60% for the capital tracker. Approximately CAD 14.5 Billion of the CAD 24 million was approved in FortisAlberta's capital tracker application. The impact on rates from the interim decision was approximately 4%. A final decision around all performance based ratemaking placeholders is expected by the end of the year.

In September FortisAlberta filed with the AUC for adjustments for 2014 under performance based ratemaking. The filing called for a 5.36% increase to distribution rates, which incorporates a 1.59% productivity factor and a 60% placeholder for the capital tracker. A decision is expected on the filing by the end of the year.

## Newfoundland & Labrador

In September, the Public Utilities Board approved the 2014 capital plan as filed by Newfoundland Power totalling CAD 84 million in capital expenditures prior to customer contributions.

## Grand Cayman

In July, the Electricity Regulatory Authority (ERA) on Grand Cayman announced the cancellation of the solicitation process for new generation begun in November 2011 as a result of unavoidable and unforeseen delays. Caribbean Utilities believes that the generation need for mid-2014 remains, and with the cancellation of the solicitation process the company will now explore all cost effective options for generation capacity with the ERA.

In June, the ERA approved a base customer electricity rate increase of 1.8% under the normal annual rate adjustment process that takes account of inflation via consumer price indices and the utilities targeted return on assets of 6.50%-8.50%.

## Q3 2013 Results

For the quarter, the company reported ongoing earnings per share of \$0.23 versus \$0.24 last year, consensus estimates of \$0.27 and our estimate of \$0.27. Results were driven by the acquisition of CH Energy Group, mainly Central Hudson, and better results at Fortis Generation as a result of improved hydrology in Belize. Corporate costs were also lower year over year. These positive factors were more than offset by negative results at CH Energy Group's non-regulated petroleum product delivery subsidiary, a higher number of shares outstanding, slightly lower results at the Canadian electric utilities, and lower results for the FortisBC Energy companies. This was mainly driven by the BCUC regulatory decision on returns noted above.

Results by segment are provided in the table below.

FIGURE 1  
Q3 2013 Year over Year Earnings by Segment

### Disclosure Legend:

A: Barclays Bank PLC and/or an affiliate has been lead manager or co-lead manager of a publicly disclosed offer of securities of the issuer in the previous 12 months.

B: An employee of Barclays Bank PLC and/or an affiliate is a director of this issuer.

C: Barclays Bank PLC and/or an affiliate is a market-maker and/or liquidity provider in securities issued by this issuer or one of its affiliates.

D: Barclays Bank PLC and/or an affiliate has received compensation for investment banking services from this issuer in the past 12 months.

E: Barclays Bank PLC and/or an affiliate expects to receive or intends to seek compensation for investment banking services from this issuer within the next 3 months.

F: Barclays Bank PLC and/or an affiliate beneficially owned 1% or more of a class of equity securities of the issuer as of the end of the month prior to the research report's issuance.

G: One of the analysts on the coverage team (or a member of his or her household) owns shares of the common stock of this issuer.

H: This issuer beneficially owns 5% or more of any class of common equity securities of Barclays Bank PLC.

I: Barclays Bank PLC and/or an affiliate has a significant financial interest in the securities of this issuer.

J: Barclays Bank PLC and/or an affiliate trades regularly in the securities of this issuer.

K: Barclays Bank PLC and/or an affiliate has received non-investment banking related compensation from this issuer within the past 12 months.

L: This issuer is, or during the past 12 months has been, an investment banking client of Barclays Bank PLC and/or an affiliate.

M: This issuer is, or during the past 12 months has been, a non-investment banking client (securities related services) of Barclays Bank PLC and/or an affiliate.

N: This issuer is, or during the past 12 months has been, a non-investment banking client (non-securities related services) of Barclays Bank PLC and/or an affiliate.

O: Barclays Capital Inc., through Barclays Market Makers, is a Designated Market Maker in this issuer's stock, which is listed on the New York Stock Exchange. At any given time, its associated Designated Market Maker may have "long" or "short" inventory position in the stock; and its associated Designated Market Maker may be on the opposite side of orders executed on the floor of the New York Stock Exchange in the stock.

P: A partner, director or officer of Barclays Capital Canada Inc. has, during the preceding 12 months, provided services to the subject company for remuneration, other than normal course investment advisory or trade execution services.

Q: The Corporate and Investment Banking division of Barclays Bank PLC, is a Corporate Broker to this issuer.

R: Barclays Capital Canada Inc. and/or an affiliate has received compensation for investment banking services from this issuer in the past 12 months.

## IMPORTANT DISCLOSURES CONTINUED

S: Barclays Capital Canada Inc. is a market-maker in an equity or equity related security issued by this issuer.

### Guide to the Barclays Fundamental Equity Research Rating System:

Our coverage analysts use a relative rating system in which they rate stocks as Overweight, Equal Weight or Underweight (see definitions below) relative to other companies covered by the analyst or a team of analysts that are deemed to be in the same industry (the "industry coverage universe").

In addition to the stock rating, we provide industry views which rate the outlook for the industry coverage universe as Positive, Neutral or Negative (see definitions below). A rating system using terms such as buy, hold and sell is not the equivalent of our rating system. Investors should carefully read the entire research report including the definitions of all ratings and not infer its contents from ratings alone.

### Stock Rating

**Overweight** - The stock is expected to outperform the unweighted expected total return of the industry coverage universe over a 12-month investment horizon.

**Equal Weight** - The stock is expected to perform in line with the unweighted expected total return of the industry coverage universe over a 12-month investment horizon.

**Underweight** - The stock is expected to underperform the unweighted expected total return of the industry coverage universe over a 12-month investment horizon.

**Rating Suspended** - The rating and target price have been suspended temporarily due to market events that made coverage impracticable or to comply with applicable regulations and/or firm policies in certain circumstances including where the Corporate and Investment Banking Division of Barclays is acting in an advisory capacity in a merger or strategic transaction involving the company.

### Industry View

**Positive** - industry coverage universe fundamentals/valuations are improving.

**Neutral** - industry coverage universe fundamentals/valuations are steady, neither improving nor deteriorating.

**Negative** - industry coverage universe fundamentals/valuations are deteriorating.

Below is the list of companies that constitute the "industry coverage universe":

#### North America Utilities

Alliant Energy (LNT)	Ameren Corp. (AEE)	American Electric Power (AEP)
American Water Works (AWK)	Aqua America (WTR)	Canadian Utilities Ltd. (CU.TO)
CenterPoint Energy Inc. (CNP)	CMS Energy (CMS)	Consolidated Edison (ED)
Dominion Resources (D)	DTE Energy (DTE)	Duke Energy (DUK)
Edison International (EIX)	Emera Inc. (EMA.TO)	Fortis Inc. (FTS.TO)
Great Plains Energy Inc. (GXP)	Hawaiian Electric Inds (HE)	ITC Holdings (ITC)
National Grid Plc (NGG)	NiSource, Inc. (NI)	Northeast Utilities (NU)
NV Energy, Inc. (NVE)	OGE Energy Corp. (OGE)	Pepco Holdings (POM)
PG&E Corp. (PCG)	Pinnacle West Capital (PNW)	PNM Resources (PNM)
Portland General Electric Co. (POR)	SCANA Corp. (SCG)	Sempra Energy (SRE)
Southern Co. (SO)	TECO Energy (TE)	Westar Energy (WR)
Wisconsin Energy (WEC)	Xcel Energy (XEL)	

### Distribution of Ratings:

Barclays Equity Research has 2478 companies under coverage.

44% have been assigned an Overweight rating which, for purposes of mandatory regulatory disclosures, is classified as a Buy rating; 50% of companies with this rating are investment banking clients of the Firm.

39% have been assigned an Equal Weight rating which, for purposes of mandatory regulatory disclosures, is classified as a Hold rating; 44% of companies with this rating are investment banking clients of the Firm.

14% have been assigned an Underweight rating which, for purposes of mandatory regulatory disclosures, is classified as a Sell rating; 39% of companies with this rating are investment banking clients of the Firm.

### Guide to the Barclays Research Price Target:

Each analyst has a single price target on the stocks that they cover. The price target represents that analyst's expectation of where the stock will trade in the next 12 months. Upside/downside scenarios, where provided, represent potential upside/potential downside to each analyst's price target over the same 12-month period.

### Guide to the POINT® Quantitative Equity Scores:

The POINT Quantitative Equity Scores (POINT Scores) are based on consensus historical data and are independent of the Barclays fundamental

## IMPORTANT DISCLOSURES CONTINUED

analysts' views. Each score is composed of a number of standard industry metrics.

A high/low Value score indicates attractive/unattractive valuation. Measures of value include P/E, EV/EBITDA and Free Cash Flow.

A high/low Quality score indicates financial statement strength/weakness. Measures of quality include ROIC and corporate default probability.

A high/low Sentiment score indicates bullish/bearish market sentiment. Measures of sentiment include price momentum and earnings revisions.

J: Barclays Bank PLC and/or an affiliate trades regularly in the securities of Fortis Inc..

**Valuation Methodology:** Our CAD 35 price target for Fortis is premised upon a sum-of-the-parts (SOTP) methodology. We apply a 20% premium to the 2015 US regulated utility multiple of 15.2x our Canadian utility operations '15E EPS of CAD 1.90. For Caribbean operations we use the publically traded Caribbean Utilities Corporation '15 multiple of 11.2x based upon consensus estimates. We apply this to our Caribbean '15E EPS of CAD 0.21. For unregulated generation we use a '15 power multiple of 15.2x our '15E EPS of CAD 0.03. For corporate and other we use the straight '15 US regulated utility multiple of 15.3x our CAD (0.34) EPS for the segment. To this we add a valuation for the real estate operations based on a 5% cap rate (implying a 20x multiple) on our '15E EPS of CAD 0.13.

**Risks which May Impede the Achievement of the Barclays Research Price Target:** Regulatory environments in several Canadian provinces including British Columbia, Alberta, Newfoundland & Labrador, Ontario, and Prince Edward Island. Overall economic and sales growth through the company's various service territories. Execution of large scale capital projects on time and on budget. Real estate valuations, especially in the Atlantic Provinces of Canada.

Fortis Inc.

## Fortis to Acquire UNS Energy

**Fortis Inc. To Acquire UNS Energy:** After the close yesterday Fortis Inc. announced the acquisition of UNS Energy Corporation (UNS-NR) for approximately US\$4.3 Billion including the assumption of US\$1.8 Billion in debt. This equates to a purchase price of \$60.25/share, a 31% premium to yesterday's closing price of \$45.84/share. The acquisition requires the approval of UNS shareholders, and regulatory approval from the Arizona Corporation Commission (ACC), the Federal Energy Regulatory Commission (FERC), and compliance with the Hart-Scott-Rodino Antitrust Improvements Act of 1976. The management of Fortis expects the transaction to close by the end of 2014.

**Acquisition Valuation:** Based upon the announced purchase price UNS is valued at 17.9x 2015 consensus earnings per share, 8.2x 2015 consensus EBITDA, and 2.0x estimated rate base premised upon UNS's most recent regulatory filings. Based upon the current book value of \$27.09 per share, Fortis is paying 2.2x current book value. This price looks high versus the current average multiples for US mid-cap regulated utilities of 14.7x 2015E earnings per share, 8.3x 2015E EBITDA, and 1.6x book value. The recently announced acquisition of NV Energy (NVE-EW) by Berkshire Hathaway was at a 16.4x estimated 2015 earnings per share. A somewhat higher multiple might be justified by UNS's higher growth rate of 7%/year as estimated by Fortis's management. There is also a potential opportunity to raise the equity ratio at UNS's main subsidiary Tucson Electric from 43.5% to the low 50% range where other utilities in Arizona are regulated. This could be accretive to eps by approximately \$0.04/share in 2015 on a post-deal basis. There are also cross boarder tax benefits that could be accretive by \$0.01-\$0.02/share. We rate Arizona an average regulator as Tier 3.

**Getting to Accretion:** Based on our preliminary analysis, either the equity ratio needs to be moved to the low 50s or approximately US\$25 million (pre-tax) in synergies need to be delivered above what the regulator provides for ratepayers to achieve accretion in 2015 earnings per share. Cross boarder tax benefits will also be helpful. US\$25 million is approximately 2% of the companies combined O&M budgets for 2012.

Price (11-Dec-2013) CAD 31.19  
Price Target CAD 35.00

**Why Equal Weight?** We see shares as fairly valued. Upside can come from higher sales growth and potential JV transmission projects in Ontario. This is offset by growth and execution risk related to completion of large construction projects, which are mitigated by the quality of regulation in British Columbia.

**Upside case** CAD 42.00

We increase sales growth by 1%, include the value of potential joint venture transmission projects in Ontario (NPV \$3/share), and value Canadian utility operations at a 25% premium. This leads to an indicative valuation of CAD 42

**Downside case** CAD 31.00

We decrease sales growth by 1%, do not include any transmission upside (similar to our base case), and value Canadian utility operations at a 15% premium. This leads to an indicative valuation of CAD 31

## Fortis to Acquire UNS Energy for \$60.25/Share

### Acquisition Details

After the close yesterday Fortis Inc. announced the acquisition of UNS Energy Corporation (UNS-NR) for US\$60.25/share in cash, which represented a purchase price of US\$4.3 Billion, including the assumption of US\$1.8 Billion in debt. The acquisition is expected to close by the end of 2014 and requires the approval of UNS shareholders. The acquisition also requires regulatory approval of the Arizona Corporation Commission (ACC), the Federal Energy Regulatory Commission (FERC), and compliance under the Hart-Scott-Rodino Antitrust Improvements Act of 1976. UNS will continue to pay dividends until the transaction closes. The acquisition deal was achieved through a bilateral negotiation and Fortis had not yet informed the ACC of the deal prior to their press release although UNS may have. Fortis intends to, consistent with its model and the recent CHG Energy acquisition in New York, keep the UNS utilities management in place and UNS Energy as autonomous and ring fenced utility subsidiaries.

### Financing Details

Commensurate with the announcement of the acquisition, Fortis Inc. also announced a \$1.594 Billion aggregate principal amount of convertible debt with a coupon of 4%. In addition, there is a private placement amount of \$206 million and an overallotment option of \$239.1 million. The convertible debt will revert into equity upon the close of the Fortis Inc. and UNS transaction at a conversion price of \$30.72/share. If the full overallotment is used and all convertible bonds, including those private placed convert to shares, the share issuance to fund the transaction will equate to \$2,039 Billion and 77.4 million new shares.

### Sources & Uses and Accretion Analysis

Based upon the announced parameters of the acquisition, and assuming the full overallotment of convertible bonds is sold and \$125 million in cash from the balance sheet's current \$154 million is used, the company would have to issue new debt of approximately \$339 million in addition to the US\$1.8 Billion in debt assumed.

The analysis assumes a 1.0x Canadian to US\$ exchange rate for the purposes of simplicity.

FIGURE 1

#### Sources & Uses for Fortis Inc. Acquisition of UNS, US\$ millions

Debt	<u>\$1,800</u>
<b>TOTAL SOURCES</b>	<b>\$4,303</b>
<b>USES</b>	
Debt Assumed	\$1,800
Debt Issued (plug)	\$339
Cash (\$154 on BS as of 9/30/13)	\$125
Convertible Debt to Equity on Close	<u>\$2,039</u> (assumes full overallotment is issued)
<b>TOTAL USES</b>	<b>\$4,303</b>
New Shares at Convert Price of \$30.72/share	77.4 million

Source: Fortis Inc. Press Release and Presentation; Barclays Research Estimates

## Multiples High at First Blush; But There Are Risks and Opportunities

Using the current consensus estimates available for UNS and our own estimates for Fortis, we believe accretion can be achieved as guided to by management in the first full year post close (i.e., 2015) through a combination of several factors, all of which may or may not happen.

At the purchase price of \$60.25/share, Fortis Inc. is paying 17.9x 2015 consensus earnings per share, 8.2x 2015 consensus EBITDA, and 2.0x estimated rate base premised upon UNS's most recent regulatory filings. Based upon the current book value of \$27.09 per share, Fortis is paying 2.2x current book value. This price looks high versus the current average multiples for US mid-cap regulated utilities of 14.7x 2015E earnings per share, 8.3x 2015E EBITDA, and 1.6x book value. The recently announced acquisition of NV Energy (NVE-EW) by Berkshire Hathaway was at a 16.4x estimated 2015 earnings per share.

However, the deal can be accretive due to cross boarder tax benefits of \$0.01-\$0.02/share, the potential for the equity ratio for Tucson Electric to be raised from the current 43.5% to the low 50% range, which is more comparable with other utilities in the state, and/or the delivery of at least US\$25 million in synergies above what regulators provide to customers. Fortis management is not basing its accretion analysis on delivering any synergies to shareholders. US\$25 million pre-tax represents about 2% of the companies combined pro-forma O&M budget for 2012. A look at recent utility deals would estimate that synergies between 5-8% of O&M budgets are an achievable goal.

FIGURE 2

### Fortis Inc./UNS Combination Pro Forma Analysis US\$ millions, except EPS

PRO FORMA Accretion/Dilution Analysis	2013 E	2014 E	2015 E
UNS Consensus EPS	\$ 3.06	\$ 3.35	\$ 3.37
CHG Shares Outstanding	41.54	41.54	41.54
Projected Net Income	\$ 127	\$ 139	\$ 140
FTS Estimated EPS	\$ 1.71	\$ 1.84	\$ 1.93
FTS Estimated Shares Outstanding (mn)	190.0	197.6	203.1
FTS Estimated Net Income	\$ 325	\$ 363	\$ 393
Increased Interest Expense pretax (@4.5%)			\$ 15
Tax Shield Savings			\$ 2
Consolidated Net Income			\$ 520
Consolidated Shares Outstanding			280.5
Consolidated EPS			\$ 1.85
Dilution			\$ (0.08)
Cross Boarder Tax Savings			\$ 0.02
Downside Case Dilution			\$ (0.06)
Move to a 51% equity ratio			\$ 0.04
Synergies US\$25M pre-tax			\$ 0.09
Upside Case Accretion			\$ 0.07
US Average Utility Multiple			14.6
Downside Case Incremental Value per Share			\$ (1)
Upside Case Incremental Value per Share			\$ 1

Source: Fortis Inc. Press Release and Presentation; Barclays Research Estimates

As shown in the table above, our downside case, where additional interest expenses are offset only by the cross boarder tax savings leads to (\$0.06)/share of dilution and an indicative incremental value of \$1/share lower than our \$35 price target. Our upside case includes moving the equity ratio at Tucson Electric from 43.5% to 51% which adds \$0.04/share and pre-tax synergies to shareholders of \$25 million which adds \$0.09/share. This leads to an indicative incremental value of \$1/share higher than our \$35 price target.

For now we are not changing any of our numbers for Fortis Inc., as we will wait for the deal to close and to determine the impact of any terms imposed by the regulator. We believe that any overhang in the market in the shares that was present due to anticipation of a deal will now dissipate. That will likely be offset by perception of risks/opportunities around potential accretion and dilution related to the transaction. We believe the regulatory process of M&A could provide a new overhang to share performance in the near term until the transaction's terms are known from the regulator, and the likelihood of closure or a break of the deal becomes more readily apparent.

It should be noted that we view Arizona as an average Tier 3 regulatory jurisdiction in our latest rankings for 2013, as presented in the table below. It should also be noted that there has been some improvement in regulation in the state as we had rated Arizona a Tier 4 state in 2012. Arizona allows for the recovery of fuel and purchased power through a fuel adjustor clause, has a rider for environmental compliance costs, and allows the recovery of fixed costs associated with any sales lost to energy efficiency or distributed generation.

FIGURE 3

Source: SNL Financial, Barclays Research Estimates

Arizona is an elected commission and a tangible benefit state for merger reviews. In 2004, Arizona denied the acquisition of UNS by Saguaro Acquisition Corporation. The ACC at that time concluded that ratepayers would not receive a tangible benefit. The commission found in its ruling that the claimed benefits of an improved Tucson capital structure, increased liquidity, a continued local community presence, and the retention of current management did not outweigh the risks of the transaction which included increased leverage, potential for concentration of control with a general partner inexperienced in the utility sector, and uncertainties concerning commission oversight.

The Fortis Inc. acquisition will likely make similar benefit arguments but is likely to improve the equity at Tucson, reducing leverage, is a company with significant utility experience, and

there should be no uncertainties concerning continued commission oversight of the UNS assets.

## A Closer Look at UNS Energy and the Combination

---

### Fortis Stand Alone

Fortis Inc. today has \$17.6 Billion in total assets and \$10.3 Billion in mid-year 2013 rate base, approximately 90% of which are regulated. A large proportion of the assets are in Western Canada (61%), with a further 12% in Eastern Canada and the United States. Rate Base for Fortis Inc. is projected to grow at about a 7% CAGR through 2018 to \$13.7 Billion. This is a result of the current projected capital program of \$3.7 Billion over the next six years, which is inclusive of the Waneta hydroelectric expansion project which constitutes \$900 million of that total.

### UNS Energy Stand Alone

UNS Energy is a vertically integrated utility in Arizona, primarily serving the southeast of the state around the Tucson metro area. The company has approximately 505,000 electric and 149,000 gas customers. UNS Energy rate base is currently around \$2.1 Billion and is projected by Fortis Inc to reach \$3 Billion by 2015. UNS Energy Inc. has three regulated utility subsidiaries: Tucson Electric Power (~70% of rate base), UNS Electric, and UNS Gas. The company owns or leases 2,420MWs of regulated generating capacity including 19MWs of solar. The generating capacity is 59% coal, 34% natural gas, 6% dual fuel, and 1% solar.

From 2003 through 2012, UNS Energy has shown a dividend per share CAGR of 12.4%, a Total Asset CAGR of 3.1%, and a net income CAGR of 7.7%. Although we would note net income has been essentially flat from 2009 – 2012. Leverage has decreased from 84% debt to total capital in 2000 to 62% at the end of September which led to a four notch ratings upgrade to Baa2 over the same timeframe.

Tucson Electric's last rate case was decided at the end of 2011 with a rate base of \$1.5 Billion, a 43.5% equity ratio, and an allowed return on equity of 10%. UNS Gas's last rate case was decided in April of 2012 with a \$183.1 million rate base, a 50.8% equity ratio, and an allowed return on equity of 9.8%. UNS Electric is currently in a rate case before the ACC requesting a rate base of \$216.6 million, an equity ratio of 52.6%, and an allowed return on equity of 10.5%.

UNS Energy has forecast capital expenditures of \$2.3 Billion through 2018 and is expected to grow Tucson Electric's rate base from \$1.5 Billion to \$2.0 Billion by 2015. Overall rate base for the company is expected to reach \$3.0 Billion by 2015. Capital expenditures are forecast to be \$306 million in '13, \$627 million in '14, \$521 million in '15, \$271 million in '16, \$328 million in '17, and \$281 million in '18. These capital expenditures are driven by environmental controls, deployment of renewable , and a shift in the generation mix for Tucson Electric from predominately coal (53%) to predominately gas (49%) and renewable (from 6% to 14%). UNS Energy is purchasing leased interests in the Springerville Generating Station and at close with own 49.5% of the plant. In August of this year the company also agreed to purchase the Gila River Unit 3 power plant with a definitive acquisition agreement still pending. Gila River Unit 3 is a 550MW CCGT plant and the purchase is expected to close at the end of next year.

### Fortis Inc. Acquisition History

Fortis Inc. does have a history of growth through acquisition. The company acquired what is now known as FortisBC Electric and FortisAlberta from Aquila for \$1.5 Billion in enterprise value in May 2004. They acquired what is now known as FortisBC Energy (formerly Teresen) for \$3.7 Billion in enterprise value in May 2007. Recently they completed their first

acquisition in the United States, acquiring CH Energy Group in New York for \$1.5 Billion in enterprise value in June of this year. Prior to the CH Energy Group deal, they had tried to acquire Central Vermont but eventually were outbid by the Montreal-based private utility company Gaz Metro, which already owned Green Mountain Power in Vermont.

## Fortis's Strategies for the Deal

Fortis Inc. management believes the deal, if closed, would achieve several goals. It is accretive to earnings in the first full year (i.e., 2015) in their view, excluding one-time acquisition related expenses. It provides for diversification of regulated earnings, and management sees Arizona as a favorable regulatory environment with local economic conditions that support growth. The capital expenditure needs at UNS should drive significant rate base growth in Fortis's view, and there is an experienced management team that will stay in place.

Based upon financials as of the end of September, UNS Energy would represent 25% of the combined entity's assets and 28% of the combined entity's operating earnings. There should be diversification benefits for the combined entity as no subsidiary of the newly formed entity will account for more than 32% of total assets or 28% of total operating earnings. The combined entity will have more than 3,000,000 customers across Canada, the United States, and the Caribbean.

Fortis management sees an Arizona economic environment that is improving with job growth projected to increase from 2.1% in 2013 to 2.9% in 2018, retail sales growth improving from 4.1% in 2013 to 5.1% in 2018, and personal income growth projected to increase from 3.9% in 2013 to 6.0% in 2018.

We would add a note of caution concerning growth rates in electricity sales. Not only are there risks related to cannibalization of sales through distributed solar generation, we have also not observed electric sales growth in the US commensurate with the increased in economic growth, as shown in the figure below.

FIGURE 4

### New Normal Electric Sales Growth

Source: SNL Financial, EIA, BEA, Barclays Research Estimates

Historically, electricity sales growth ran at about 60% of Gross Domestic Product. However, since 2010, we have seen a relationship more akin to 50-60% of GDP less a factor of 1% for energy efficiency, distributed generation, and demand side management. While Arizona could well see a pick-up in economic conditions and a commensurate increase in load growth we would remain cautious and see any increase in electricity sales growth as back end loaded over the six year period being discussed by Fortis management.

## IMPORTANT DISCLOSURES CONTINUED

S: Barclays Capital Canada Inc. is a market-maker in an equity or equity related security issued by this issuer.

### Guide to the Barclays Fundamental Equity Research Rating System:

Our coverage analysts use a relative rating system in which they rate stocks as Overweight, Equal Weight or Underweight (see definitions below) relative to other companies covered by the analyst or a team of analysts that are deemed to be in the same industry (the "industry coverage universe").

In addition to the stock rating, we provide industry views which rate the outlook for the industry coverage universe as Positive, Neutral or Negative (see definitions below). A rating system using terms such as buy, hold and sell is not the equivalent of our rating system. Investors should carefully read the entire research report including the definitions of all ratings and not infer its contents from ratings alone.

### Stock Rating

**Overweight** - The stock is expected to outperform the unweighted expected total return of the industry coverage universe over a 12-month investment horizon.

**Equal Weight** - The stock is expected to perform in line with the unweighted expected total return of the industry coverage universe over a 12-month investment horizon.

**Underweight** - The stock is expected to underperform the unweighted expected total return of the industry coverage universe over a 12-month investment horizon.

**Rating Suspended** - The rating and target price have been suspended temporarily due to market events that made coverage impracticable or to comply with applicable regulations and/or firm policies in certain circumstances including where the Corporate and Investment Banking Division of Barclays is acting in an advisory capacity in a merger or strategic transaction involving the company.

### Industry View

**Positive** - industry coverage universe fundamentals/valuations are improving.

**Neutral** - industry coverage universe fundamentals/valuations are steady, neither improving nor deteriorating.

**Negative** - industry coverage universe fundamentals/valuations are deteriorating.

Below is the list of companies that constitute the "industry coverage universe":

#### North America Utilities

Alliant Energy (LNT)	Ameren Corp. (AEE)	American Electric Power (AEP)
American Water Works (AWK)	Aqua America (WTR)	Canadian Utilities Ltd. (CU.TO)
CenterPoint Energy Inc. (CNP)	CMS Energy (CMS)	Consolidated Edison (ED)
Dominion Resources (D)	DTE Energy (DTE)	Duke Energy (DUK)
Edison International (EIX)	Emera Inc. (EMA.TO)	Fortis Inc. (FTS.TO)
Great Plains Energy Inc. (GXP)	Hawaiian Electric Inds (HE)	Integrus Energy Group Inc. (TEG)
ITC Holdings (ITC)	National Grid Plc (NGG)	NiSource, Inc. (NI)
Northeast Utilities (NU)	NV Energy, Inc. (NVE)	OGE Energy Corp. (OGE)
Pepco Holdings (POM)	PG&E Corp. (PCG)	Pinnacle West Capital (PNW)
PNM Resources (PNM)	Portland General Electric Co. (POR)	SCANA Corp. (SCG)
Sempra Energy (SRE)	Southern Co. (SO)	TECO Energy (TE)
Westar Energy (WR)	Wisconsin Energy (WEC)	Xcel Energy (XEL)

### Distribution of Ratings:

Barclays Equity Research has 2589 companies under coverage.

44% have been assigned an Overweight rating which, for purposes of mandatory regulatory disclosures, is classified as a Buy rating; 48% of companies with this rating are investment banking clients of the Firm.

39% have been assigned an Equal Weight rating which, for purposes of mandatory regulatory disclosures, is classified as a Hold rating; 43% of companies with this rating are investment banking clients of the Firm.

15% have been assigned an Underweight rating which, for purposes of mandatory regulatory disclosures, is classified as a Sell rating; 39% of companies with this rating are investment banking clients of the Firm.

### Guide to the Barclays Research Price Target:

Each analyst has a single price target on the stocks that they cover. The price target represents that analyst's expectation of where the stock will trade in the next 12 months. Upside/downside scenarios, where provided, represent potential upside/potential downside to each analyst's price target over the same 12-month period.

### Guide to the POINT® Quantitative Equity Scores:

The POINT Quantitative Equity Scores (POINT Scores) are based on consensus historical data and are independent of the Barclays fundamental

## IMPORTANT DISCLOSURES CONTINUED

analysts' views. Each score is composed of a number of standard industry metrics.

A high/low Value score indicates attractive/unattractive valuation. Measures of value include P/E, EV/EBITDA and Free Cash Flow.

A high/low Quality score indicates financial statement strength/weakness. Measures of quality include ROIC and corporate default probability.

A high/low Sentiment score indicates bullish/bearish market sentiment. Measures of sentiment include price momentum and earnings revisions.

These scores are valid as of the date of this report. To view the latest scores, which are updated monthly, [click here](#).

J: Barclays Bank PLC and/or an affiliate trades regularly in the securities of Fortis Inc..

**Valuation Methodology:** Our CAD 35 price target for Fortis is premised upon a sum-of-the-parts (SOTP) methodology. We apply a 20% premium to the 2015 US regulated utility multiple of 14.6x our Canadian utility operations '15E EPS of CAD 1.90. For Caribbean operations we use the publically traded Caribbean Utilities Corporation '15 multiple of 16.8x based upon consensus estimates. We apply this to our Caribbean '15E EPS of CAD 0.21. For unregulated generation we use a '15 power multiple of 14.6x our '15E EPS of CAD 0.03. For corporate and other we use the straight '15 US regulated utility multiple of 14.6x our CAD (0.34) EPS for the segment. To this we add a valuation for the real estate operations based on a 5% cap rate (implying a 20x multiple) on our '15E EPS of CAD 0.13.

**Risks which May Impede the Achievement of the Barclays Research Price Target:** Regulatory environments in several Canadian provinces including British Columbia, Alberta, Newfoundland & Labrador, Ontario, and Prince Edward Island. Overall economic and sales growth through the company's various service territories. Execution of large scale capital projects on time and on budget. Real estate valuations, especially in the Atlantic Provinces of Canada.

Fortis Inc.

## Q4 In-line; Regulatory Schedule for Proposed UNS Acquisition Released

**Reiterating Equal Weight; Updating '14 EPS for Proposed UNS Deal:** We are reiterating our equal weight rating and our CAD 32 price target. We are updating our earnings per share forecast from CAD 1.83/1.86 to CAD 1.68/1.84 for '14/15, respectively. We have included the impacts from the proposed UNS deal into our estimates to put ourselves more in line with consensus estimates, although we would point out that there could be downside to our numbers depending on what conditions, if any, the regulator requires for deal approval.

**Schedule for Merger Proceeding Released:** In January 2014 the company and UNS Energy filed a joint petition before the Arizona Corporation Commission (ACC) seeking approval of the proposed acquisition. The ACC released a schedule which indicates staff testimony on April 22 and any potential settlement filing on May 12, 2014. The Administrative Law Judge would commence hearings on June 16. We would anticipate that this schedule would imply a final vote on the proposed acquisition by year-end.

**Q4'13 in Line:** For the quarter the company reported ongoing earnings per share of CAD 0.47 versus CAD 0.49 consensus and our estimate of CAD 0.49. Results were driven by the contribution from Central Hudson, better results at the Canadian utilities, save Fortis Alberta, and better results in the Caribbean. These positive factors were more than offset by lower earnings at Fortis Alberta, and higher share count.

**Capital Projects on Track; Merger Approval Process a Headwind:** Capital projects remain on track with the Waneta hydro project on budget and on schedule to go into service in spring 2015. The company projected capital expenditures of CAD 6.5 billion from 2014-2018 up from a projected CAD 6.0 billion from 2013 -2017. If the UNS acquisition is successfully closed it would add CAD 1.5 billion to the capex forecast. We believe that the regulatory approval process will create a headwind to share performance in the near to intermediate term.

Price (06-Feb-2014) CAD 30.65  
Price Target CAD 32.00

**Why Equal Weight?** We see shares as fairly valued. Upside can come from higher sales growth and potential JV transmission projects in Ontario. This is offset by growth and execution risk related to completion of large construction projects, which are mitigated by the quality of regulation in British Columbia.

**Upside case** CAD 39.00

We increase sales growth by 1%, include the value of potential joint venture transmission projects in Ontario (NPV \$3/share), and value Canadian utility operations at a 25% premium. This leads to an indicative valuation of CAD 39.

**Downside case** CAD 28.00

We decrease sales growth by 1%, do not include any transmission upside (similar to our base case), and value Canadian utility operations at a 15% premium. This leads to an indicative valuation of CAD 28.

## Proposed UNS Energy Acquisition

### Reviewing the Deal Terms

On December 11, 2013 the company announced the pending acquisition of UNS Energy Corporation (UNS-NR) for approximately US\$4.3 billion including the assumption of US\$1.8 billion in debt. This equates to a purchase price of US\$60.25/share for UNS. UNS will continue to pay dividends until the transaction closes. Commensurate with the announcement Fortis also announced a US\$1.594 billion aggregate principal amount convertible debt issuance with a coupon of 4%, with a private placement amount of US\$206 million and an overallotment portion of US\$239.1 million. The converts will revert to equity upon the close of the transaction at a conversion price of CAD 30.72/share.

Assumed sources and uses for the transaction are provided in the table below.

FIGURE 1

#### Assumed Sources & Uses for Fortis Inc. Acquisition of UNS, US\$ millions

Item	Amount
<b>SOURCES</b>	
UNS shares outstanding	41.5 million
Acquisition price per share	\$60.25/share
Equity	\$2,503
Debt	<u>\$1,800</u>
<b>TOTAL SOURCES</b>	<b>\$4,303</b>
<b>USES</b>	
Debt assumed	\$1,800
Debt issued (plug)	\$339
Cash (\$154 on BS as of 9/30/13)	\$125
Convertible debt to equity on close	<u>\$2,039</u>
<b>TOTAL USES</b>	<b>\$4,303</b>

New shares at convert price of CAD 30.72/share 77.4 million

Source: Fortis Inc. Press Release and Presentation, Barclays Research Estimates

At the purchase price of \$60.25/share, Fortis Inc. is paying 17.9x 2015 consensus earnings per share, 8.2x 2015 consensus EBITDA, and 2.0x estimated rate base premised upon UNS's most recent regulatory filings. Based upon the current book value of \$27.09 per share, Fortis is paying 2.2x current book value. This price looks high versus the current average multiples for US mid-cap regulated utilities of 14.7x 2015E earnings per share, 8.3x 2015E EBITDA, and 1.6x book value. The recently completed acquisition of NV Energy by Berkshire Hathaway was at a 16.4x estimated 2015 earnings per share.

We see the transaction as CAD 0.08 dilutive in 2014 including costs to close, the equity issuance required in 2014 to close the transaction, and a CAD 15 million placeholder for benefits to customers. There could be upside/downside to our numbers dependent upon the ultimate timing of the equity convert/closing, and on the ultimate benefit to ratepayers required by the ACC to approve the transaction.

### Arizona Regulator Releases Schedule for Merger Proceedings

On January 10, 2014 Fortis Inc. and UNS Energy filed a joint petition with the Arizona Corporation Commission (ACC) requesting that the ACC approve the proposed acquisition detailed above. On February 3, 2014 the ACC issued a procedural schedule for the approval process, which is provided below.

FIGURE 2  
ACC Merger Filing Procedural Schedule

Milestone	Date
ACC staff & intervening parties testimony	4/22/14
Settlement discussions begin	4/28/14
Settlement agreement, if reached, filed	5/12/14
Testimony per settlement agreement, if filed	5/30/14
Responsive testimony per settlement, if filed	6/13/14
Rebuttal testimony, if no settlement	5/7/14
ACC staff & intervening parties testimony, if no settlement	5/30/14
Filers rejoinder testimony, if no settlement	6/13/14
Administrative Law Judge hearing commences	6/16/14

Source: Fortis Inc. Press Release, Barclays Research Estimates

We believe that this schedule, if adhered to, will lead to a final decision on the transaction by the ACC before the end of the year. We would however point out, in light of the recent experience of Fortis in New York that concessions to ratepayers demanded by the regulator could lead to further negotiation and push the approval process into 2015.

## Update on Capital Projects and CapEx Forecast

### Capital Projects Update

Fortis Alberta spent CAD 22 million on the ongoing pole management program what will replace 110,000 poles through 2019. The company raised the total forecasted capital budget from CAD 327 million to CAD 353 million.

FortisBC Electric spent CAD 13 million through the end of 2013 on environmental compliance. The projects are expected to be completed this year for a total cost of CAD 27 million.

Fortis Properties is continuing construction of a 12 story office building in downtown St. John's, Newfoundland and Labrador, having spent CAD 45 million of a projected CAD 50 million budget in 2013. Construction is expected to be complete by the middle of this year.

The Waneta hydroelectric project continues with an additional CAD 143 million spend in 2013. Overall approximately CAD 579 million of the CAD 900 million budget (64%) has been spent through the end of last year. In 2013 key milestones included:

- Substantial completion of civil construction of the powerhouse and tailrace structure
- Significant progress on the intake structure
- Installation of the turbine components
- Ancillary mechanical and electrical powerhouse services
- Encapsulating the scrollcase in concrete
- Receipt of generator step up transformers and the first turbine runner on-site for assembly and installation
- Completion of the construction of the first turbine runner and turbine manufacturing system

The Waneta project remains on budget and on schedule with an expected in service date of spring 2015.

### Updated Capital Expenditure Forecast

Capital expenditures came in at CAD 1.175 million for 2013 or approximately CAD 155 million short of the forecast for the year. There were lower capital expenditures for the Waneta project due to the timing of payments. FortisBC Electric experiences lower capital expenditures than forecast in the year due to labour disruptions, which were resolved in the fourth quarter of last year. Fortis Properties capital spending was lower due to a shift in timing of spend from 2013 to 2014. Capital expenditures for the year do include CAD 57 million at Central Hudson from the date of the acquisition.

The capital expenditure forecasts for 2014 and for 2014–2018 by segment are provided in the table below.

FIGURE 3

<b>TOTAL</b>	<b>6,500</b>

Source: Fortis Inc. 2013 Earnings Release, Barclays Research Estimates

### Regulatory Update

#### Combination of the Three BC Gas Utilities

In February last year the British Columbia Utilities Commission (BCUC) denied the company's request to combine its three gas utilities in British Columbia to implement common rates. The company appealed this decision and the BCUC completed the reconsideration application process in November of last year. A decision on the reconsideration is expected in the first quarter of 2014.

## Performance Based Ratemaking

The application for FEI's performance based ratemaking mechanism for 2014-2018 assumes a 2014 mid-year rate base of approximately CAD 2,789 million. The application also requests a delivery rate increase of 1.4% and a continuation of the rate making methodology for four more years. As of the beginning of the year the BCUC approved a 1.4% interim refundable delivery rate increase, with a final decision on the requested expected in the third quarter.

FortisBC Electric's application assumed a 2014 mid-year rate base of approximately CAD 1,192 million and requested a base customer rate increase of 3.3%. Similar to the ruling for FEI, the BCUC approved a 3.3% interim refundable rate as of the beginning of the year, and a final decision is also expected in the third quarter.

## Utility Asset Disposition in Alberta

In November of last year the Alberta Utility Commission (AUC) issued an order indicating that Alberta utilities would be responsible for the gains and losses related to extraordinary retirement of utility assets, although the ruling was not clear on how those requirements would be determined. FortisAlberta has appealed this ruling along with other Alberta utilities, on the grounds that the AUC decision does not provide sufficient certainty around statutory rights of utilities in the province to recover prudently incurred costs and expenses of capital investments in the utilities.

## Alberta Capital Tracker Decision

The AUC has issued a decision requiring re-filing of FortisBC Electric's capital tracker application for 2013 in May of this year. The decision sets forth the following criteria for a project to be included in the capital tracker mechanism:

- The project is outside the normal course of ongoing operations
- The project is replacing existing assets or be required by an external party
- The project has a material impact on the company's finances

The AUC has directed the company to maintain interim rates of 60% of the applied for capital tracker amounts. A decision on the refilled 2013 capital tracker is expected by the end of the year. The utility will also file a combined 2014 and 2015 capital tracker application in March.

## Caribbean Overhead Costs

In December the Government of Turks and Caicos approved Fortis Turks and Caicos's (FortisTCI) application to capitalize overhead costs not directly attributable to specific utility capital assets, but which do relate to the overall capital expenditure program of the company. In the fourth quarter FortisTCI capitalized approximately CAD 3 million which was about 14% of overhead costs for the year.

## 2013 Q4 and Annual Results

---

For the quarter the company reported ongoing earnings per share of CAD 0.47 versus CAD 0.44 last year, consensus estimates of CAD 0.49, and our estimate of CAD 0.49. For the year the company reported ongoing earnings per share of CAD 1.69 versus CAD 1.70 last year, consensus estimates of CAD 1.71 and our estimate of CAD 1.71.

The CH Energy acquisition contributed CAD 11 million in the quarter from Central Hudson slightly offset by a CAD 2 million loss at the non-regulated operations, of which Griffith Energy is now being sold. Generation results were higher as a result of better hydrology in Belize partially offset by the taxes associated with the Exploits Partnership settlement. The

Caribbean segment showed better results due to the ruling allowing FortisTCI to capitalize 14% of overhead costs in 2013. The British Columbia utilities delivered marginally higher earnings as a result of lower finance charges and rate base growth that was almost completely offset by lower allowed ROEs and a lower equity ratio at FEI. Fortis Alberta's results were lower year on year as a result of the timing of certain D&A and operating expenses and lower net transmission revenues, partially offset by rate base and customer growth.

Drivers for the year are provided in the table below.

FIGURE 4

### Disclosure Legend:

A: Barclays Bank PLC and/or an affiliate has been lead manager or co-lead manager of a publicly disclosed offer of securities of the issuer in the previous 12 months.

B: An employee of Barclays Bank PLC and/or an affiliate is a director of this issuer.

C: Barclays Bank PLC and/or an affiliate is a market-maker and/or liquidity provider in equity securities issued by this issuer or one of its affiliates.

D: Barclays Bank PLC and/or an affiliate has received compensation for investment banking services from this issuer in the past 12 months.

E: Barclays Bank PLC and/or an affiliate expects to receive or intends to seek compensation for investment banking services from this issuer within the next 3 months.

F: Barclays Bank PLC and/or an affiliate beneficially owned 1% or more of a class of equity securities of the issuer as of the end of the month prior to the research report's issuance.

G: One of the analysts on the coverage team (or a member of his or her household) owns shares of the common stock of this issuer.

H: This issuer beneficially owns 5% or more of any class of common equity securities of Barclays Bank PLC.

I: Barclays Bank PLC and/or an affiliate has a significant financial interest in the securities of this issuer.

J: Barclays Bank PLC and/or an affiliate trades regularly in the securities of this issuer.

K: Barclays Bank PLC and/or an affiliate has received non-investment banking related compensation from this issuer within the past 12 months.

L: This issuer is, or during the past 12 months has been, an investment banking client of Barclays Bank PLC and/or an affiliate.

M: This issuer is, or during the past 12 months has been, a non-investment banking client (securities related services) of Barclays Bank PLC and/or an affiliate.

N: This issuer is, or during the past 12 months has been, a non-investment banking client (non-securities related services) of Barclays Bank PLC and/or an affiliate.

O: Barclays Capital Inc., through Barclays Market Makers, is a Designated Market Maker in this issuer's stock, which is listed on the New York Stock Exchange. At any given time, its associated Designated Market Maker may have "long" or "short" inventory position in the stock; and its associated Designated Market Maker may be on the opposite side of orders executed on the floor of the New York Stock Exchange in the stock.

P: A partner, director or officer of Barclays Capital Canada Inc. has, during the preceding 12 months, provided services to the subject company for remuneration, other than normal course investment advisory or trade execution services.

Q: The Corporate and Investment Banking division of Barclays Bank PLC, is a Corporate Broker to this issuer.

R: Barclays Capital Canada Inc. and/or an affiliate has received compensation for investment banking services from this issuer in the past 12 months.

## IMPORTANT DISCLOSURES CONTINUED

S: Barclays Capital Canada Inc. is a market-maker in an equity or equity related security issued by this issuer.

### Guide to the Barclays Fundamental Equity Research Rating System:

Our coverage analysts use a relative rating system in which they rate stocks as Overweight, Equal Weight or Underweight (see definitions below) relative to other companies covered by the analyst or a team of analysts that are deemed to be in the same industry (the "industry coverage universe").

In addition to the stock rating, we provide industry views which rate the outlook for the industry coverage universe as Positive, Neutral or Negative (see definitions below). A rating system using terms such as buy, hold and sell is not the equivalent of our rating system. Investors should carefully read the entire research report including the definitions of all ratings and not infer its contents from ratings alone.

### Stock Rating

**Overweight** - The stock is expected to outperform the unweighted expected total return of the industry coverage universe over a 12-month investment horizon.

**Equal Weight** - The stock is expected to perform in line with the unweighted expected total return of the industry coverage universe over a 12-month investment horizon.

**Underweight** - The stock is expected to underperform the unweighted expected total return of the industry coverage universe over a 12-month investment horizon.

**Rating Suspended** - The rating and target price have been suspended temporarily due to market events that made coverage impracticable or to comply with applicable regulations and/or firm policies in certain circumstances including where the Corporate and Investment Banking Division of Barclays is acting in an advisory capacity in a merger or strategic transaction involving the company.

### Industry View

**Positive** - industry coverage universe fundamentals/valuations are improving.

**Neutral** - industry coverage universe fundamentals/valuations are steady, neither improving nor deteriorating.

**Negative** - industry coverage universe fundamentals/valuations are deteriorating.

Below is the list of companies that constitute the "industry coverage universe":

#### North America Utilities

Alliant Energy (LNT)	Ameren Corp. (AEE)	American Electric Power (AEP)
American Water Works (AWK)	Aqua America (WTR)	Canadian Utilities Ltd. (CU.TO)
CenterPoint Energy Inc. (CNP)	CMS Energy (CMS)	Consolidated Edison (ED)
Dominion Resources (D)	DTE Energy (DTE)	Duke Energy (DUK)
Edison International (EIX)	Emera Inc. (EMA.TO)	Fortis Inc. (FTS.TO)
Great Plains Energy Inc. (GXP)	Hawaiian Electric Inds (HE)	Integrus Energy Group Inc. (TEG)
ITC Holdings (ITC)	National Grid Plc (NGG)	NiSource, Inc. (NI)
Northeast Utilities (NU)	OGE Energy Corp. (OGE)	Pepco Holdings (POM)
PG&E Corp. (PCG)	Pinnacle West Capital (PNW)	PNM Resources (PNM)
Portland General Electric Co. (POR)	PPL Corporation (PPL)	SCANA Corp. (SCG)
Sempra Energy (SRE)	Southern Co. (SO)	TECO Energy (TE)
Westar Energy (WR)	Wisconsin Energy (WEC)	Xcel Energy (XEL)

### Distribution of Ratings:

Barclays Equity Research has 2599 companies under coverage.

44% have been assigned an Overweight rating which, for purposes of mandatory regulatory disclosures, is classified as a Buy rating; 47% of companies with this rating are investment banking clients of the Firm.

38% have been assigned an Equal Weight rating which, for purposes of mandatory regulatory disclosures, is classified as a Hold rating; 43% of companies with this rating are investment banking clients of the Firm.

15% have been assigned an Underweight rating which, for purposes of mandatory regulatory disclosures, is classified as a Sell rating; 39% of companies with this rating are investment banking clients of the Firm.

### Guide to the Barclays Research Price Target:

Each analyst has a single price target on the stocks that they cover. The price target represents that analyst's expectation of where the stock will trade in the next 12 months. Upside/downside scenarios, where provided, represent potential upside/potential downside to each analyst's price target over the same 12-month period.

### Guide to the POINT® Quantitative Equity Scores:

The POINT Quantitative Equity Scores (POINT Scores) are based on consensus historical data and are independent of the Barclays fundamental

## IMPORTANT DISCLOSURES CONTINUED

analysts' views. Each score is composed of a number of standard industry metrics.

A high/low Value score indicates attractive/unattractive valuation. Measures of value include P/E, EV/EBITDA and Free Cash Flow.

A high/low Quality score indicates financial statement strength/weakness. Measures of quality include ROIC and corporate default probability.

A high/low Sentiment score indicates bullish/bearish market sentiment. Measures of sentiment include price momentum and earnings revisions.

J: Barclays Bank PLC and/or an affiliate trades regularly in the securities of Fortis Inc..

**Valuation Methodology:** Our CAD 32 price target for Fortis is premised upon a sum-of-the-parts (SOTP) methodology. We apply a 20% premium to the 2015 US regulated utility multiple of 14.2x our Canadian utility operations '15E EPS of CAD 1.89. For Caribbean operations we use the publically traded Caribbean Utilities Corporation '15 multiple of 12x based upon our estimates. We apply this to our Caribbean '15E EPS of CAD 0.21. For unregulated generation we use a '15 power multiple of 13.5x our '15E EPS of CAD 0.03. For corporate and other we use the straight '15 US regulated utility multiple of 14.2x our CAD (0.35) EPS for the segment. To this we add a valuation for the real estate operations based on a 5% cap rate (implying a 20x multiple) on our '15E EPS of CAD 0.13. We add \$0.06 of dilution from the UNS Energy acquisition and that impacts our valuation by CAD (1) per share.

**Risks which May Impede the Achievement of the Barclays Research Price Target:** Regulatory environments in several Canadian provinces including British Columbia, Alberta, Newfoundland & Labrador, Ontario, and Prince Edward Island. Overall economic and sales growth through the company's various service territories. Execution of large scale capital projects on time and on budget. Real estate valuations, especially in the Atlantic Provinces of Canada.

## Looking to 2016; Upping PT to C\$36

**Updating Earnings Forecast; PT to C\$36:** We are updating our eps forecast from C\$1.68/C\$1.84 to C\$1.62/C\$1.98 for '14/15 respectively and publishing a 2016 eps estimate of C\$2.14. Our '16 estimate fully incorporates the UNS Energy acquisition and a rate case at Central Hudson in 2015. We are increasing our price target from C\$32 to C\$36 as a result of moving to a 2016 valuation year and multiple expansion.

**Reiterating Equal Weight on Rate Case and Acquisition Risks:** Our C\$36 price target implies over 10% upside in the company's shares, however, we are reiterating our Equal Weight rating on risks related to our '16 estimate which presupposes a constructive outcome in the Central Hudson rate case and close of the proposed acquisition of UNS Energy. Further, given management's desire to be 50% U.S. on assets we would view another US acquisition as possible after the UNS deal is consummated.

**Q1 '14 C\$0.65:** For the qtr the company reported ongoing eps of C\$0.65 versus C\$0.67 last year, and consensus of C\$0.65. Results were driven by the earnings contribution from Central Hudson (acquired mid-year last year), better results at Newfoundland Power due to regulator approved adjustments that impacted the timing of quarterly earnings, and better results in the Caribbean driven by electricity sales growth. These positive results were offset by lower results at the British Columbia subsidiaries reflective of lower year on year allowed returns on equity and equity ratio.

**Moving Forward through UNS Process; Central Hudson Rate Case to Come:** The proposed UNS Energy acquisition continues to move through the regulatory process. We anticipate that the deal will be approved with conditions, by October, but a settlement in our view is unlikely. At Central Hudson, management expects to file a rate case in mid-2014 for rates effective mid-2015. Capital expenditures excluding UNS are expected to be C\$6.5 billion through 2018, and UNS could add C\$1.5 billion to that total. In Alberta the company continues to recover only 60% of the requested capital tracker amounts and intends to file a revised capital tracker application for 2013 -2015.

Price (07-May-2014) CAD 32.46  
Price Target CAD 36.00

**Why Equal Weight?** We see shares as fairly valued. Upside can come from higher sales growth and potential JV transmission projects in Ontario. This is offset by growth and execution risk related to completion of large construction projects, which are mitigated by the quality of regulation in British Columbia.

**Upside case** CAD 43.00

We increase sales growth by 1%, include the value of potential joint venture transmission projects in Ontario (NPV \$3/share), and value Canadian utility operations at a 25% premium. This leads to an indicative valuation of C\$43.

**Downside case** CAD 32.00

We decrease sales growth by 1%, do not include any transmission upside (similar to our base case), and value Canadian utility operations at a 15% premium. This leads to an indicative valuation of C\$32.

## Regulatory Update

---

### Proposed UNS Energy Acquisition

The company continues to be engaged in the regulatory process for potential approval of the proposed UNS Energy acquisition in Arizona before the Arizona Corporation Commission (ACC). The company and interveners and staff have all filed briefs in the case and scheduled settlement discussions are underway. If a settlement is reached it would be filed next Friday May 16<sup>th</sup>. UNS Energy shareholders and the U.S. Federal Energy Regulatory Commission approved the proposed transaction in March and April respectively.

As a reminder, Fortis has proposed to acquire UNS Energy for US\$60.25/share in cash which represents an aggregate purchase price of US\$4.3 billion, inclusive of the assumption of US\$1.8 billion in debt.

In April the ACC Staff and other interveners in the process filed direct testimony. Specifically the ACC Staff called for the following conditions to apply to the acquisition:

- Establishment of a \$60 million liability, including a one-time \$12 million bill credit for the benefit of ratepayers in future rate cases. This, in the opinion of the staff represents 90/10 sharing of the merger benefits between ratepayers and shareholders.
- Ringfencing of the utilities in Arizona from any financial distress that may be incurred by Fortis Inc. or any of its other subsidiaries. Establishment of a “golden share” to be held by an independent director whom resides in Arizona, restrictions on dividends, establishment of an independent Board of Directors for UNS Energy, and prohibition of intercompany loans and/or guarantees.
- Require ACC approval before distributing funds from UNS to Fortis for the first five years post transaction close. Also, a five year prohibition on selling or transferring ownership of any of the UNS Energy assets.
- Requirement to inform the ACC of any planned workforce reduction 120 days prior to such action
- Prohibition on allocation of any Fortis specific costs to UNS Energy for the purpose of recovery in a future rate proceeding for the first five years after transaction close.
- UNS Energy must maintain separate accounting records
- In all rate cases through 2020, the UNS regulated utilities must demonstrate that the requested increase in rates is materially lower than it otherwise would have been had the transaction not occurred.
- Fortis must hold the UNS Energy subsidiaries harmless from any impact related to fluctuations in exchange rates or incremental taxes arising from the international ownership structure.
- Fortis can infuse equity of \$357 million into UNS Energy for the purchase of Gila River Block 3 and Springville Unit 1, but this should not predetermine prudence of those investments.

The upcoming schedule is as shown below.

#### Settlement Track (if a settlement is reached and filed)

Settlement Agreement Filed

May 16, 2014

Testimony in support/opposition to Settlement	June 2, 2014
Settlement Agreement Responsive Testimony	June 13, 2014
<u>Non-Settlement Track (if no settlement is reached)</u>	
Rebuttal Testimony	May 16, 2014
ACC Staff/Intervener Rebuttal Testimony	June 2, 2014
Company Rejoinder Testimony	June 13, 2014
Administrative Law Judge Hearings Commence	June 16, 2014

### Central Hudson Rate Case

Management continues to expect to file a rate case in New York for the Central Hudson subsidiary at mid-year for rates effective mid-year of 2015. In our model we assume capital spending of C\$122 million per year, an allowed return on equity of 10.5% and a 48% equity ratio.

### Capital Tracker in Alberta

The FortisAlberta subsidiary is currently only recovering 60% of the requested amount related to growth capital expenditures within the performance based ratemaking structure approved by the Alberta Utilities Commission (AUC). The AUC will consider revised capital tracker applications this year. The company intends to file revised capital tracker applications for the years 2013 – 2015 this month. A decision is expected on the matter by the end of the year. Our model presupposes adequate recovery of growth capital expenditures, and an adverse ruling by the AUC could impact our 2016 earnings per share estimate by approximately C\$0.05/share.

### Amalgamation of Utilities in British Columbia

In February the BCUC approved the application of the company to amalgamate their regulated utility subsidiaries in British Columbia. There will be common rates for the vast majority of all natural gas customers that will be phased in over a three year period. The amalgamation still needs approval from the Lt. Governor in Council to become effective, and management expects it will be effective by the end of this year.

## Q1 Results and Capital Forecast

---

### Capital Expenditures

Capital expenditures totalled C\$237 million in the first quarter of 2014. The construction of the Waneta hydroelectric plant continued and the project continues to be on time and on budget. Expected in-service date for the 335 MW hydroelectric facility is expected in spring 2015. The project is expected to cost C\$900 million of which C\$603 million has been spent to date. The company has also begun work on the Tilbury LNG facility in British Columbia, which is estimated to cost C\$400 million and include a second LNG tank and a new liquefier and be in service by 2016. The company's capital program is expected to total C\$1.4 billion in 2014 and C\$6.5 billion through 2018. The UNS Energy acquisition would add a projected C\$1.5 billion in capital expenditures over the same time period.

### Q1 2014 Results

For the quarter the company reported earnings per share of C\$0.67 versus C\$0.79 last year. Earnings in the first quarter this year included C\$5 million of C\$0.02/share associated with Griffith Energy which was sold for US\$95 million in March. Also in this quarter earnings per share were reduced by C\$0.05 as a result of after-tax interest expenses associated with the convertible debentures issued to finance a portion of the proposed acquisition of UNS

Energy. In the first quarter of 2013 earnings included an after-tax extraordinary gain of C\$0.12/share related to the settlement of expropriation matters associated with the Exploits River Hydro Partnership in Newfoundland.

Ongoing earnings per share results were C\$0.65 for Q1 2014 versus C\$0.67 last year, and consensus estimates of C\$0.65. Results were driven by a C\$18 million contribution from Central Hudson which was acquired mid-year last year. Further, Newfoundland Power showed an increase of C\$ 3 million as a result of regulatory changes which impacted the timing of quarterly earnings. The Caribbean utilities also showed better results by C\$2 million as a result of favourable exchange rates and electricity sales growth. Excluding the charge related to the Exploits Partnership in Newfoundland non-regulated generation showed better results by C\$4 million as a result of increased production in Belize due to higher rainfall.

These positive drivers were offset by the interest expense on the convertible debentures related to the proposed UNS acquisition, and lower results by C\$6 million at the BC gas utilities related to lower allowed returns and equity ratios. The British Columbia Utility Commission (BCUC) issued an order in the second quarter of last year that lowered allowed returns to 8.75%. While the lower returns were retroactively applicable to the beginning of 2013, the earnings impacts were not booked until the second quarter, leading to the year on year lower earnings in the first quarter period.

## SOTP Valuation Methodologies

### Current Price Target

Our CAD 36 price target for Fortis is premised upon a sum-of-the-parts (SOTP) methodology. We apply a 20% premium to the 2015 US regulated utility multiple of 15x our Canadian utility operations '16E EPS of C\$1.89. We apply the straight '16E multiple of 15x

our Central Hudson '16E EPS of C\$0.13. For Caribbean operations we use the publically traded Caribbean Utilities Corporation '16 multiple of 14.8x based upon consensus estimates. We apply this to our Caribbean '16E EPS of C\$0.13. For unregulated generation we use a '16 power multiple of 12.7x our '16E EPS of C\$0.09. For corporate and other, inclusive of UNS Energy we use the straight '16EUS regulated utility multiple of 15x our C\$0.33 EPS for the segment. To this we add a valuation for the real estate operations based on a 5% cap rate (implying a 20x multiple) on our '16E EPS of C\$0.06.

### **Prior Price Target**

Our CAD 32 price target for Fortis is premised upon a sum-of-the-parts (SOTP) methodology. We apply a 20% premium to the 2015 US regulated utility multiple of 14.2x our Canadian utility operations '15E EPS of CAD 1.89. For Caribbean operations we use the publically traded Caribbean Utilities Corporation '15 multiple of 12x based upon our estimates. We apply this to our Caribbean '15E EPS of CAD 0.21. For unregulated generation we use a '15 power multiple of 13.5x our '15E EPS of CAD 0.03. For corporate and other we use the straight '15 US regulated utility multiple of 14.2x our CAD (0.35) EPS for the segment. To this we add a valuation for the real estate operations based on a 5% cap rate (implying a 20x multiple) on our '15E EPS of CAD 0.13. We add \$0.06 of dilution from the UNS Energy acquisition and that impacts our valuation by CAD (1) per share.

At any given time, its associated Designated Market Maker may have "long" or "short" inventory position in the stock; and its associated Designated Market Maker may be on the opposite side of orders executed on the floor of the New York Stock Exchange in the stock.

P: A partner, director or officer of Barclays Capital Canada Inc. has, during the preceding 12 months, provided services to the subject company for remuneration, other than normal course investment advisory or trade execution services.

Q: The Corporate and Investment Banking division of Barclays Bank PLC, is a Corporate Broker to this issuer.

R: Barclays Capital Canada Inc. and/or an affiliate has received compensation for investment banking services from this issuer in the past 12 months.

## IMPORTANT DISCLOSURES CONTINUED

S: Barclays Capital Canada Inc. is a market-maker in an equity or equity related security issued by this issuer.

### Guide to the Barclays Fundamental Equity Research Rating System:

Our coverage analysts use a relative rating system in which they rate stocks as Overweight, Equal Weight or Underweight (see definitions below) relative to other companies covered by the analyst or a team of analysts that are deemed to be in the same industry (the "industry coverage universe").

In addition to the stock rating, we provide industry views which rate the outlook for the industry coverage universe as Positive, Neutral or Negative (see definitions below). A rating system using terms such as buy, hold and sell is not the equivalent of our rating system. Investors should carefully read the entire research report including the definitions of all ratings and not infer its contents from ratings alone.

### Stock Rating

**Overweight** - The stock is expected to outperform the unweighted expected total return of the industry coverage universe over a 12-month investment horizon.

**Equal Weight** - The stock is expected to perform in line with the unweighted expected total return of the industry coverage universe over a 12-month investment horizon.

**Underweight** - The stock is expected to underperform the unweighted expected total return of the industry coverage universe over a 12-month investment horizon.

**Rating Suspended** - The rating and target price have been suspended temporarily due to market events that made coverage impracticable or to comply with applicable regulations and/or firm policies in certain circumstances including where the Corporate and Investment Banking Division of Barclays is acting in an advisory capacity in a merger or strategic transaction involving the company.

### Industry View

**Positive** - industry coverage universe fundamentals/valuations are improving.

**Neutral** - industry coverage universe fundamentals/valuations are steady, neither improving nor deteriorating.

**Negative** - industry coverage universe fundamentals/valuations are deteriorating.

Below is the list of companies that constitute the "industry coverage universe":

### North America Utilities

Alliant Energy (LNT)	Ameren Corp. (AEE)	American Electric Power (AEP)
American Water Works (AWK)	Aqua America (WTR)	Canadian Utilities Ltd. (CU.TO)
CenterPoint Energy Inc. (CNP)	CMS Energy (CMS)	Consolidated Edison (ED)
Dominion Resources (D)	DTE Energy (DTE)	Duke Energy (DUK)
Edison International (EIX)	Emera Inc. (EMA.TO)	Fortis Inc. (FTS.TO)
Great Plains Energy Inc. (GXP)	Hawaiian Electric Inds (HE)	Integrus Energy Group Inc. (TEG)
ITC Holdings (ITC)	National Grid Plc (NGG)	National Grid Plc (NG.L)
NiSource, Inc. (NI)	Northeast Utilities (NU)	OGE Energy Corp. (OGE)
Pepco Holdings (POM)	PG&E Corp. (PCG)	Pinnacle West Capital (PNW)
PNM Resources (PNM)	Portland General Electric Co. (POR)	PPL Corporation (PPL)
SCANA Corp. (SCG)	Sempra Energy (SRE)	Southern Co. (SO)
TECO Energy (TE)	Westar Energy (WR)	Wisconsin Energy (WEC)
Xcel Energy (XEL)		

### Distribution of Ratings:

Barclays Equity Research has 2629 companies under coverage.

45% have been assigned an Overweight rating which, for purposes of mandatory regulatory disclosures, is classified as a Buy rating; 45% of companies with this rating are investment banking clients of the Firm.

37% have been assigned an Equal Weight rating which, for purposes of mandatory regulatory disclosures, is classified as a Hold rating; 42% of companies with this rating are investment banking clients of the Firm.

14% have been assigned an Underweight rating which, for purposes of mandatory regulatory disclosures, is classified as a Sell rating; 38% of companies with this rating are investment banking clients of the Firm.

### Guide to the Barclays Research Price Target:

Each analyst has a single price target on the stocks that they cover. The price target represents that analyst's expectation of where the stock will trade in the next 12 months. Upside/downside scenarios, where provided, represent potential upside/potential downside to each analyst's price target over the same 12-month period.

### Guide to the POINT® Quantitative Equity Scores:

## IMPORTANT DISCLOSURES CONTINUED

The POINT Quantitative Equity Scores (POINT Scores) are based on consensus historical data and are independent of the Barclays fundamental analysts' views. Each score is composed of a number of standard industry metrics.

A high/low Value score indicates attractive/unattractive valuation. Measures of value include P/E, EV/EBITDA and Free Cash Flow.

A high/low Quality score indicates financial statement strength/weakness. Measures of quality include ROIC and corporate default probability.

A high/low Sentiment score indicates bullish/bearish market sentiment. Measures of sentiment include price momentum and earnings revisions.

These scores are valid as of the date of this report. To view the latest scores, which are updated monthly, [click here](#).

For a more detailed description of the underlying methodology for each score, please [click here](#).

J: Barclays Bank PLC and/or an affiliate trades regularly in the securities of Fortis Inc..

**Valuation Methodology:** Our CAD 36 price target for Fortis is premised upon a sum-of-the-parts (SOTP) methodology. We apply a 20% premium to the 2015 US regulated utility multiple of 15x our Canadian utility operations '16E EPS of C\$1.89. We apply the straight '16E multiple of 15x our Central Hudson '16E EPS of C\$0.13. For Caribbean operations we use the publically traded Caribbean Utilities Corporation '16 multiple of 14.8x based upon consensus estimates. We apply this to our Caribbean '16E EPS of C\$0.13. For unregulated generation we use a '16 power multiple of 12.7x our '16E EPS of C\$0.09. For corporate and other, inclusive of UNS Energy we use the straight '16EUS regulated utility multiple of 15x our C\$0.33 EPS for the segment. To this we add a valuation for the real estate operations based on a 5% cap rate (implying a 20x multiple) on our '16E EPS of C\$0.06.

**Risks which May Impede the Achievement of the Barclays Research Price Target:** Regulatory environments in several Canadian provinces including British Columbia, Alberta, Newfoundland & Labrador, Ontario, and Prince Edward Island. Overall economic and sales growth through the company's various service territories. Execution of large scale capital projects on time and on budget. Real estate valuations, especially in the Atlantic Provinces of Canada.

Fortis Inc.

## Q2 EPS \$0.28; Investor Day October 1

**Reiterating Equal Weight; Like UNS Deal Vote in mid-August:** We are reiterating our Equal Weight rating, our price target of C\$36 and our earnings per share estimates of C\$1.62/C\$2.02/C\$2.20 for '14/15/16, respectively. The company announced in its MD&A with the quarter that it will be holding an investor day in Toronto on October 1. As a reminder the company is pursuing the acquisition of Arizona based UNS Energy for US\$60.25/share, initiated in December of last year. The aggregate price is approximately US\$4.3 Billion including the assumption of approximately US\$1.8 Billion of debt on closing. On July 29 the administrative law judge in Arizona issued a recommended order approving the transaction which will now go to the Arizona Corporation Commission (ACC) for a vote. Consideration of the deal has been tentatively scheduled for the ACC open meeting on August 12 – 13, and if approved at that meeting management indicated an expected close by the end of August.

**Q2 EPS C\$0.28, Excluding Interest on Convertible Bond Issued for UNS Deal:** For the quarter the company reported ongoing earnings per share of C\$0.28 versus C\$0.32 last year, consensus estimates of C\$0.27, and our estimate of C\$0.29. The results do not include C\$13 post-tax, or C\$0.06/share of interest expenses associated with the convertible debentures issued to finance a portion of the pending acquisition of UNS Energy, discussed above.

**Waneta on Schedule; Tilbury LNG Commences:** Construction of the 335MW, C\$900million Waneta hydroelectric power plant remains on schedule for an in-service date in the spring of next year. Of the budget C\$633 million or approximately 70% has been spent to date. The Tilbury LNG project, which will constitute a C\$400 million capital investment commenced in the quarter and is expected to be in service in the second half of 2016. Capital expenditures for 2014 are expected to be C\$1.4 Billion and management continues to anticipate a total capital program through 2018 exceeding C\$6.5 Billion, not inclusive of the projected C\$1.5 Billion capital program over that same frame forecast by UNS Energy.

**Why Equal Weight?** We see shares as fairly valued. Upside can come from higher sales growth and potential JV transmission projects in Ontario. This is offset by growth and execution risk related to completion of large construction projects, which are mitigated by the quality of regulation in British Columbia.

<b>Upside case</b>	<b>CAD 43.00</b>
--------------------	------------------

We increase sales growth by 1%, include the value of potential joint venture transmission projects in Ontario (NPV \$3/share), and value Canadian utility operations at a 25% premium. This leads to an indicative valuation of C\$43.

<b>Downside case</b>	<b>CAD 32.00</b>
----------------------	------------------

We decrease sales growth by 1%, do not include any transmission upside (similar to our base case), and value Canadian utility operations at a 15% premium. This leads to an indicative valuation of C\$32.

## Pending UNS Energy Acquisition and Corporate Strategy

On July 29, the assigned administrative law judge at the Arizona Corporation Commission (ACC) issued a recommended order approving the acquisition of UNS Energy by Fortis, in line with the already issued to settlement agreement. Consideration of the recommended order has been scheduled for the ACC open meeting to be held on August 12 – 13 of this year. If the vote is held at that meeting, and the acquisition, as we expect, is approved, management indicated that they would be able to close the deal by the end of August.

Management believes this acquisition is consistent with their stated long term strategy of geographic diversification as post the UNS deal, should it be approved and close, the company's rate base will increase by US\$3 Billion and no more than one-third of the company's total asset base will be in any single regulatory jurisdiction. Over the intermediate to longer term we believe the company would prefer to get to a position where 50% of their asset base is in the US and 50% is in Canada. This, in our view, would require acquisition of US based assets in the US\$4 - US\$6 Billion range over time. In our view, if the company reached a half and half asset disposition pursuit of a US listing of the shares would potentially be a next logical step in management's strategic thought process.

## Capital Program and Project Updates

For the first half of the year consolidated capital expenditures were C\$535 million and management anticipates that the five year capital program through 2018 remains unchanged with a forecast of C\$6.5 Billion. This does not include the currently forecast C\$1.5 Billion over that same timeframe for UNS Energy. Management indicated that they expected this capital program to grow rate base by an annual rate of approximately 7% over the next five years. The composition of the C\$6.5 Billion plus capital program is expected to break down as: 50% Canadian regulated electric utilities, mostly at FortisAlberta; 26% at Canadian regulated gas utilities; 12% at Central Hudson; 5% at Caribbean utilities; and, 7% at non-regulated activities. Of the overall total 46% is expected to be sustaining capital, 37% will be to meet customer growth, and the remaining 17% will be for facilities, equipment, vehicles, IT, and other assets.

The Waneta hydroelectric plant construction project continues to come in on budget at C\$900 million and remains on schedule for an in service date in the spring of next year. Since construction commenced in 2010 approximately 70% of the budget has been spent to date (\$633 million). C\$54 million was invested in the first half of 2014. Key construction activities during the first half of the year included forming and casting on concrete at the intake structure, forming of the power tunnel transition and excavation of the tailrace channel. Equipment installation and assembly continued on generator components, powerhouse mechanical and electric auxiliary systems. Testing was performed on several systems and the construction of the 230kV transmission line was completed and is expected to be energized in September.

Meanwhile the company has commenced the first of potentially several investment projects related to LNG in British Columbia. The C\$400 million Tilbury LNG project will consist of construction of a second tank at the Tilbury site and a new liquefier. Both components of the project are expected to be in service in the second half of 2016. FortisBC is pursuing additional LNG related investment opportunities in British Columbia that are not included in the current capital plan. These include a further expansion at the Tilbury LNG site, and a potential pipeline expansion for the proposed Woodfibre LNG site. The pipeline for Woodfibre would scope to an approximate C\$400 million in capital project.

## Regulatory Updates

### Central Hudson Rate Case

In July the Central Hudson subsidiary filed a general rate case in New York seeking a rate increase in July 2015. The filing request a US\$40.1 million electric revenue increase and a US\$5.9 million gas revenue increase under docket numbers 14-E-0318 and 14-G-0319 respectively. The requested increases are premised upon a 9% allowed return on equity and a 48% equity ratio applied to average rate bases of US\$850.8 million for electric and \$282.8 million for gas based upon a fully forecasted test year ending mid-year 2016. We anticipate approval of an allowed return on equity range of approximately 150bps above/below the mid-point; therefore, in our model we assume capital spending of C\$122 million per year, an allowed return on equity of 10.5% and a 48% equity ratio.

### Capital Tracker in Alberta

The FortisAlberta subsidiary is currently only recovering 60% of the requested amount related to growth capital expenditures within the performance based ratemaking structure approved by the Alberta Utilities Commission (AUC). The company filed revised capital tracker applications for the years 2013 – 2015 requesting C\$23 million for 2013, C\$48 million for 2014, and C\$69 million for 2015. A hearing on the capital tracker application is scheduled for October. Our model presupposes adequate recovery of growth capital expenditures, and an adverse ruling by the AUC could impact our 2016 earnings per share estimate by approximately C\$0.05/share. The impacts of any decision by the AUC will be recognized in the consolidated financial statements in the quarter in which the decision is rendered.

### Amalgamation of Utilities in British Columbia

In February the BCUC approved the application of the company to amalgamate their regulated utility subsidiaries in British Columbia. There will be common rates for the vast majority of all natural gas customers that will be phased in over a three year period. The amalgamation received approval from the Lt. Governor in Council in May and is expected to become effective on December 31.

Ongoing regulatory proceedings are outlined in the table below.

FIGURE 1  
Ongoing Regulatory Proceedings

Regulated Utility	Application/Proceeding	Filing Date	Expected Decision
FEI	PBR Plan for 2014 – 18	June 2013	2H 2014

## Q2 2014 Results

For the quarter the company reported ongoing earnings per share of C\$0.28 versus C\$0.32 last year, consensus estimates of C\$0.27 and our estimates of C\$0.29. The quarterly results in both periods excluded several tax and acquisition related items.

The Q2 2014 excluded C\$13 post-tax, or \$C0.06 per share, related to C\$1.8 billion in convertible debentures with a 4% coupon issued to fund a portion of the pending UNS Energy acquisition. Earnings in the second quarter excluded a C\$32 million or C\$0.17/share in costs related to the acquisition of Central Hudson. There were C\$1 million of acquisition

related expenses in the Q2 2014 related to the pending acquisition of UNS Energy. Earnings in Q2 2013 also excluded a tax recovery of C\$25 million of C\$0.13/share related to the enactment of higher deductions associated with the Part VI.1 tax on preferred share dividends.

Earnings at the FortisBC energy companies were consistent with the second quarter of last year excluding a C\$5 million reduction in earnings in Q2 2013 related to the retroactive booking to the beginning of the 2013 in impact of the cost of capital decision in British Columbia. Central Hudson did not contribute to earnings in Q2 2013, however, on an apples to apples basis, earnings at Central Hudson were lower by C\$2 million related to higher D&A and other capital investment related expenses during the two year rate freeze period. In Alberta results were broadly consistent with last year as were results at the electric utility in British Columbia. Newfoundland Power results were lower by C\$13 million which was related to a tax recovery booked in Q2 2013. Other Canadian Utilities also saw a year over year decrease related to tax recovery bookings in the same quarter last year. Caribbean utilities saw better results be C\$2 million as a result of electricity sales growth and favorable exchange rate movements, as well as warmer temperatures and higher air conditioning load on Grand Cayman. Fortis Generation results increased by C\$2 million mainly due to higher volumes as a result of better hydrological conditions in Belize.

Segmented year over year results are provided in the table below.

FIGURE 2

**Segmented Results of Operations, C\$ Millions except per share data**

	Q2 2014	Q2 2013	Change

### Disclosure Legend:

A: Barclays Bank PLC and/or an affiliate has been lead manager or co-lead manager of a publicly disclosed offer of securities of the issuer in the previous 12 months.

B: An employee of Barclays Bank PLC and/or an affiliate is a director of this issuer.

C: Barclays Bank PLC and/or an affiliate is a market-maker and/or liquidity provider in equity securities issued by this issuer or one of its affiliates.

D: Barclays Bank PLC and/or an affiliate has received compensation for investment banking services from this issuer in the past 12 months.

E: Barclays Bank PLC and/or an affiliate expects to receive or intends to seek compensation for investment banking services from this issuer within the next 3 months.

F: Barclays Bank PLC and/or an affiliate beneficially owned 1% or more of a class of equity securities of the issuer as of the end of the month prior to the research report's issuance.

G: One of the analysts on the coverage team (or a member of his or her household) owns shares of the common stock of this issuer.

H: This issuer beneficially owns 5% or more of any class of common equity securities of Barclays Bank PLC.

I: Barclays Bank PLC and/or an affiliate has a significant financial interest in the securities of this issuer.

J: Barclays Bank PLC and/or an affiliate trades regularly in the securities of this issuer.

K: Barclays Bank PLC and/or an affiliate has received non-investment banking related compensation from this issuer within the past 12 months.

L: This issuer is, or during the past 12 months has been, an investment banking client of Barclays Bank PLC and/or an affiliate.

M: This issuer is, or during the past 12 months has been, a non-investment banking client (securities related services) of Barclays Bank PLC and/or an affiliate.

N: This issuer is, or during the past 12 months has been, a non-investment banking client (non-securities related services) of Barclays Bank PLC and/or an affiliate.

O: Barclays Capital Inc., through Barclays Market Makers, is a Designated Market Maker in this issuer's stock, which is listed on the New York Stock Exchange. At any given time, its associated Designated Market Maker may have "long" or "short" inventory position in the stock; and its associated Designated Market Maker may be on the opposite side of orders executed on the floor of the New York Stock Exchange in the stock.

P: A partner, director or officer of Barclays Capital Canada Inc. has, during the preceding 12 months, provided services to the subject company for remuneration, other than normal course investment advisory or trade execution services.

Q: The Corporate and Investment Banking division of Barclays Bank PLC, is a Corporate Broker to this issuer.

R: Barclays Capital Canada Inc. and/or an affiliate has received compensation for investment banking services from this issuer in the past 12 months.

**IMPORTANT DISCLOSURES CONTINUED**

S: Barclays Capital Canada Inc. is a market-maker in an equity or equity related security issued by this issuer.

**Guide to the Barclays Fundamental Equity Research Rating System:**

Our coverage analysts use a relative rating system in which they rate stocks as Overweight, Equal Weight or Underweight (see definitions below) relative to other companies covered by the analyst or a team of analysts that are deemed to be in the same industry (the "industry coverage universe").

In addition to the stock rating, we provide industry views which rate the outlook for the industry coverage universe as Positive, Neutral or Negative (see definitions below). A rating system using terms such as buy, hold and sell is not the equivalent of our rating system. Investors should carefully read the entire research report including the definitions of all ratings and not infer its contents from ratings alone.

**Stock Rating**

**Overweight** - The stock is expected to outperform the unweighted expected total return of the industry coverage universe over a 12-month investment horizon.

**Equal Weight** - The stock is expected to perform in line with the unweighted expected total return of the industry coverage universe over a 12-month investment horizon.

**Underweight** - The stock is expected to underperform the unweighted expected total return of the industry coverage universe over a 12-month investment horizon.

**Rating Suspended** - The rating and target price have been suspended temporarily due to market events that made coverage impracticable or to comply with applicable regulations and/or firm policies in certain circumstances including where the Corporate and Investment Banking Division of Barclays is acting in an advisory capacity in a merger or strategic transaction involving the company.

**Industry View**

**Positive** - industry coverage universe fundamentals/valuations are improving.

**Neutral** - industry coverage universe fundamentals/valuations are steady, neither improving nor deteriorating.

**Negative** - industry coverage universe fundamentals/valuations are deteriorating.

Below is the list of companies that constitute the "industry coverage universe":

**North America Utilities**

Alliant Energy (LNT)	Ameren Corp. (AEE)	American Electric Power (AEP)
American Water Works (AWK)	Aqua America (WTR)	Canadian Utilities Ltd. (CU.TO)
CenterPoint Energy Inc. (CNP)	CMS Energy (CMS)	Consolidated Edison (ED)
Dominion Resources (D)	DTE Energy (DTE)	Duke Energy (DUK)
Edison International (EIX)	Emera Inc. (EMA.TO)	Fortis Inc. (FTS.TO)
Great Plains Energy Inc. (GXP)	Hawaiian Electric Inds (HE)	Integrus Energy Group Inc. (TEG)
ITC Holdings (ITC)	National Grid Plc (NGG)	National Grid Plc (NG.L)
NiSource, Inc. (NI)	Northeast Utilities (NU)	OGE Energy Corp. (OGE)
Pepco Holdings (POM)	PG&E Corp. (PCG)	Pinnacle West Capital (PNW)
PNM Resources (PNM)	Portland General Electric Co. (POR)	PPL Corporation (PPL)
SCANA Corp. (SCG)	Sempra Energy (SRE)	Southern Co. (SO)
TECO Energy (TE)	Westar Energy (WR)	Wisconsin Energy (WEC)
Xcel Energy (XEL)		

**Distribution of Ratings:**

Barclays Equity Research has 2581 companies under coverage.

44% have been assigned an Overweight rating which, for purposes of mandatory regulatory disclosures, is classified as a Buy rating; 56% of companies with this rating are investment banking clients of the Firm.

39% have been assigned an Equal Weight rating which, for purposes of mandatory regulatory disclosures, is classified as a Hold rating; 46% of companies with this rating are investment banking clients of the Firm.

14% have been assigned an Underweight rating which, for purposes of mandatory regulatory disclosures, is classified as a Sell rating; 43% of companies with this rating are investment banking clients of the Firm.

**Guide to the Barclays Research Price Target:**

Each analyst has a single price target on the stocks that they cover. The price target represents that analyst's expectation of where the stock will trade in the next 12 months. Upside/downside scenarios, where provided, represent potential upside/potential downside to each analyst's price target over the same 12-month period.

**Guide to the POINT® Quantitative Equity Scores:**

## IMPORTANT DISCLOSURES CONTINUED

The POINT Quantitative Equity Scores (POINT Scores) are based on consensus historical data and are independent of the Barclays fundamental analysts' views. Each score is composed of a number of standard industry metrics.

A high/low Value score indicates attractive/unattractive valuation. Measures of value include P/E, EV/EBITDA and Free Cash Flow.

A high/low Quality score indicates financial statement strength/weakness. Measures of quality include ROIC and corporate default probability.

A high/low Sentiment score indicates bullish/bearish market sentiment. Measures of sentiment include price momentum and earnings revisions.

These scores are valid as of the date of this report. To view the latest scores, which are updated monthly, [click here](#).

For a more detailed description of the underlying methodology for each score, please [click here](#).

J: Barclays Bank PLC and/or an affiliate trades regularly in the securities of Fortis Inc..

**Valuation Methodology:** Our C\$36 price target for Fortis is premised upon a sum-of-the-parts (SOTP) methodology. We apply a 20% premium to the 2016 US regulated utility multiple of 14.4x our Canadian utility operations '16E EPS of C\$1.41. We apply the straight '16E multiple of 14.4x our US Utility operations '16E EPS of C\$0.13. For Caribbean operations we use the publically traded Caribbean Utilities Corporation '16 multiple of 15.3x based upon consensus estimates. We apply this to our Caribbean '16E EPS of C\$0.15. For unregulated generation we use a '16 power multiple of 15.6x our '16E EPS of C\$0.10. For corporate and other, we use the straight '16E US regulated utility multiple of 14.4x our C\$0.34 EPS for the segment. To this we add a valuation for the real estate operations based on a 5% cap rate (implying a 20x multiple) on our '16E EPS of C\$0.07.

**Risks which May Impede the Achievement of the Barclays Research Price Target:** Regulatory environments in several Canadian provinces including British Columbia, Alberta, Newfoundland & Labrador, Ontario, and Prince Edward Island. Overall economic and sales growth through the company's various service territories. Execution of large scale capital projects on time and on budget. Real estate valuations, especially in the Atlantic Provinces of Canada.

## PT to C\$40: A Shift from Acquisition to Organic Growth Going Forward

**Reiterating Equal Weight:** We are reiterating our Equal Weight rating and increasing our price target from C\$36 to C\$40 premised upon multiple expansion and inclusion of partial valuation of the upside related to potential LNG opportunities in British Columbia. We are updating our earnings per share forecast to C\$1.72/C\$1.99/C\$2.17 from C\$1.62/C\$2.02/C\$2.20.

**Shift to Organic Growth:** On the conference call management indicated a shift from acquisition driven growth to a focus on organic growth opportunities within the company's expanded geographic footprint. Most prominent of these are opportunities currently being explored for LNG in British Columbia and generation diversity investment in Arizona, inclusive of renewable resources. On an asset basis the company now has 32% of total assets in British Columbia and 57% of total assets in Canada. Management did not discount the potential for renewed acquisition growth to achieve its stated long-term goal of 50/50 Canadian/US asset distribution, but noted that the focus for the next 18-24 months would be on organic growth opportunities.

**3Q Beat of \$0.33 with Acquisition Cost Adjustments:** For the quarter the company reported earnings per share of C\$0.06 versus C\$0.23 last year. Adjusting for both one-time acquisition costs and the interest on convertible debentures related to the UNS acquisition completed in the quarter by adding back C\$0.16 and C\$0.11, respectively, yields the adjusted earnings per share number for the quarter of C\$0.33. Earnings were mostly driven by the inclusion of C\$37 million from the UNS subsidiary versus last year, offset by higher corporate costs. Management indicated on the conference call that it expects corporate costs to be higher going forward as a result of increased financing costs related to funding at the parent for the UNS acquisition.

**Why Equal Weight?** We see shares as fairly valued. Upside can come from higher sales growth and potential JV transmission projects in Ontario. This is offset by growth and execution risk related to completion of large construction projects, which are mitigated by the quality of regulation in British Columbia.

<b>Upside case</b>	<b>CAD 47.00</b>
--------------------	------------------

We increase sales growth by 1%, include the value of potential joint venture transmission projects in Ontario (NPV \$3/share), and value Canadian utility operations at a 25% premium. This leads to an indicative valuation of C\$47.

<b>Downside case</b>	<b>CAD 36.00</b>
----------------------	------------------

We decrease sales growth by 1%, do not include any transmission upside (similar to our base case), and value Canadian utility operations at a 15% premium. This leads to an indicative valuation of C\$36.

## Project and Regulatory Update

---

### Project Update

#### *Waneta Hydroelectric Facility*

The Waneta Hydroelectric facility remains on track and on budget for final completion in the spring of 2015. On the conference call management indicated a refined timeline of April – May of next year. Approximately slightly under \$650 million has been spent on the project to date since the commencement of construction activities in 2010. A total of \$69 million of this has been invested in 2014. The project is expected to cost \$900 million at completion, and the facilities' output will be sold through long-term purchased power agreements. So far this year major construction activity has focused on concrete work at the intake structure, civil construction of one of two power tunnel transitions, and excavation of the tailrace channel, all of which have been substantially completed.

#### *Tilbury LNG Expansion Phase 1A*

In October the company commenced construction of the C\$400 million project to expand the Tilbury LNG facility in British Columbia. The project will include a second LNG tank at the site as well as a new liquefier. The project is expected to be in service in the second half of 2016. The Tilbury site has thirty-five acres of LNG available land with ocean access and there are opportunities available for expansion. The project would go into rate base for recovery in British Columbia.

#### *Tilbury LNG Phase 1B and Woodfibre LNG Pipeline*

The company also provided an update to their opportunity for further capital deployment and organic growth related to LNG expansions in British Columbia. These opportunities allow for leveraging the existing infrastructure at the company to cost effectively and quickly bring LNG supplies to the marketplace. The next phase at the Tilbury site has been proposed and would expand in order to export LNG from British Columbia to Hawaii. This is called Phase 1B and constitutes a C\$450 million capital opportunity. Currently the import of LNG from the Tilbury site is awaiting approval from the Hawaii Public Service Commission.

The company is also currently negotiating a transfer agreement with the owner of the Woodfibre LNG facility in British Columbia. This project, if commenced would constitute building out pipeline capacity to transport natural gas for liquefaction to the facility. It is projected to cost C\$900 million.

Both projects would go into rate base for recovery in British Columbia. The British Columbian government did modify the taxes related to LNG exports, but we do not believe this significantly changes the economic dynamics for the company to invest in these projects. It is likely in our view that the management team contemplated potential tax changes when determining whether to invest in the projects. The changes essentially allow for a tier 1 tax to apply up through the company's capital costs are recovered after which a tier 2 tax would apply. Even with the additional taxes, it is likely that LNG from British Columbia would remain significantly competitive versus the low sulphur diesel alternative in Hawaii.

### Updated Capital Forecast

Management expects a capital budget for the current year of approximately C\$1.8 billion, and so far this year C\$875 million of that has been spent. Spending will be significantly weighted to the fourth quarter as a result of the close of the UNS transaction and no equivalent spending in the first three quarters for that unit, the commencement of the Tilbury LNG project, which will approximate \$100 million in spending in the fourth quarter

and the investment by UNS in the Gila River plant set to close in December for US\$219 million.

Overall management anticipates a capital budget, not inclusive of LNG expansion opportunities or additional renewable resources of C\$9 billion for the period 2014 through 2018 with the approximate breakdown of 37% at Canadian electric utilities, 33% at US electric and gas utilities, 22% at Canadian gas utilities, 5% in the Caribbean, and the remaining 3% at non-regulated operations. The breakdown will also be 46% for sustaining capital expenditures, 37% to meet customer growth, and 17% for facilities, equipment, vehicles, information technology, and other assets.

### **Properties Strategic Review Continues**

The review of the Fortis Properties segment which owns hotels throughout Canada and commercial property mostly in Atlantic Canada was announced in early October in conjunction with the company's Analyst Day in Toronto. That process is continuing and no results are expected until the middle of next year. Several options for the business remain on the table including but not limited to sale of all or a portion of the assets, a sale of shares of Fortis Properties, or an initial public offering.

### **Regulatory Activity Update**

#### *Central Hudson General Rate Increase*

In July the Central Hudson subsidiary in New York filed a general rate case for increased electric and gas delivery rates effective on July 1 next year. The rate case requests a US\$40.1 million rate increase (+14.8%) at the electric segment premised upon a average rate base of approximately US\$850 million, a 48% equity ratio, and an allowed return on equity of 9%. At the gas segment the filing requests a US\$5.9 million rate increase (+7.4%) premised upon a rate base of US\$282.8 million, a 48% equity ratio and an allowed return on equity of 9%. The utility is currently under a rate freeze ending on July 1 of next year and is regulated with an allowed return on equity of 10%.

New York regulators are also pursuing a complete review of regulatory structures in that state and are likely to change the regulatory construct going forward to encourage significantly more energy efficiency, demand side management, and distributed generation. Also in New York the companies in that state are likely to form a "NY TransCo" for go forward large scale transmission projects, in which Central Hudson will play a role.

#### *Alberta Regulatory Proceedings*

In Alberta, for electric utility subsidiary FortisAlberta there are ongoing regulatory proceedings underway regarding the generic cost of capital for 2013 and 2014 with a decision expected before year-end. Also the capital tracker applications are ongoing with a decision expected in the first quarter of next year. The company continues to book capital tracker revenues using the interim 60% factor, and will move to the newly approved 90% interim factor in 2015. When making the capital tracker filing for 2015 the company used a factor of 100% in their request. The subsidiary also filed a 2015 general rates application in September proposing rates effective on an interim basis on January 1 until an Alberta Utility Commission ruling, increasing the distribution component of rates by approximately 10%. This filing used a combined inflation and productivity factor of 1.49%, a 100% k-factor capital tracker request of approximately C\$69 million, and a net refund of Y factor balances of approximately C\$1 million.

#### *Generation Expansion in the Caribbean*

In October the Electric Regulatory Authority (ERA) on Grand Cayman indicated the Caribbean Utilities was the successful bidder in the open procurement for new generation. As a result this segment will spend US\$85 million on a new 39.7MW diesel power plant

composed of two 18.5MW diesel units and a 2.7MW waste heat recovery steam turbine on the island. The plant is expected to go into service no later than mid-2016.

## Third Quarter Results; Updating Our Numbers

For the quarter the company reported earnings per share of C\$0.06 versus C\$0.23 last year. When adding back for one-time acquisition related costs of C\$30 million related to customer benefits given to close the UNS deal, C\$23 million related to interest on the convertible debentures used to partially fund the UNS deal, and C\$5 million related to fees to close the UNS deal, reported earnings were C\$0.33 versus C\$0.23 last year.

FIGURE 1

### Q3 2014 Earnings Summary

(C\$M except per share)	Q3 2014	Q3 2013	Change
Basic EPS	\$0.06	\$0.23	(\$0.17)
Net Earnings	\$14	\$48	(\$34)
<u>Adjustments</u>			
Acquisition costs	\$35	\$0	\$35
Interest on Convertibles	\$23	\$0	\$23
Adjusted Net Earnings	\$72	\$48	\$24
Adjusted EPS	\$0.33	\$0.23	\$0.10

Source: Fortis Inc. Q3 2014 Earnings Conference Call Presentation, Barclays Research Estimates

### Updating our Numbers

For the current year we have increased our contribution from the UNS acquisition as well as increase our exchange rate assumptions related to the stronger US\$ leading to higher earnings contributions from the now larger US segment. We are updating our earnings per share forecast to C\$1.72/C\$1.99/C\$2.17 from C\$1.62/C\$2.02/C\$2.20.

We are reiterating our Equal Weight rating and are moving our price target from C\$36 to C\$40 as a result of multiple expansion and inclusion of a proportion of the upside related to potential LNG opportunities into our valuation.

### Valuation Methodologies

Current Price Target: Our C\$40 price target for Fortis is premised upon a sum-of-the-parts (SOTP) methodology. We apply a 16% premium to the 2016 US regulated utility multiple of 15.9x our Canadian utility operations '16E EPS of C\$1.47. We apply the straight '16E multiple of 15.9x our US Utility operations '16E EPS of C\$0.71. For Caribbean operations we use the publically traded Caribbean Utilities Corporation '16 multiple of 15.3x based upon consensus estimates. We apply this to our Caribbean '16E EPS of C\$0.15. For unregulated generation we use a '16 power multiple of 14.8x our '16E EPS of C\$0.09. For corporate and other, we use the straight '16E US regulated utility multiple of 15.9x our (C\$0.25) EPS for the segment. To this we add a valuation for the upside related to LNG opportunities of C\$0.23 in 2018 discounted to 2016 at a 10% discount rate and applying a 15.9x multiple and a 50% probability of completion.

Prior Target: Our C\$36 price target for Fortis was premised upon a sum-of-the-parts (SOTP) methodology. We apply a 20% premium to the 2016 US regulated utility multiple of 14.4x our Canadian utility operations '16E EPS of C\$1.41. We apply the straight '16E multiple of 14.4x our US Utility operations '16E EPS of C\$0.13. For Caribbean operations we use the publically traded Caribbean Utilities Corporation '16 multiple of 15.3x based upon consensus estimates. We apply this to our Caribbean '16E EPS of C\$0.15. For unregulated generation we use a '16 power multiple of 15.6x our '16E EPS of C\$0.10. For corporate and other, we use the straight '16E US regulated utility multiple of 14.4x our C\$0.34 EPS for the

segment. To this we add a valuation for the real estate operations based on a 5% cap rate (implying a 20x multiple) on our '16E EPS of C\$0.07.

### A Closer Look at Results by Segment

Exchange rates due to the strengthening US\$ versus the C\$ were a significant help to results in the quarter given the now larger US segment contribution after the close of the UNS deal. Management indicated they expect the accretion from the UNS deal to be greater than originally estimated as a result of a stronger US\$ and lower financing costs than originally assumed. The UNS deal also closed earlier in the year than originally anticipated. In the quarter the UNS subsidiary contributed C\$37 million to results. Results at Central Hudson were lower year over year by US\$4 million despite higher exchange rates of 1.09 USD/CAD versus 1.04 USD/CAD in the prior period. Consumption was lower as a result of cooler summer weather, while earnings were down as a result of higher depreciation and operating expenses during the rate freeze period.

In British Columbia results at the Energy companies in British Columbia were equivalent with the same period last year. Customer counts increased by 4,000 at the segment since year-end 2013. At the electric subsidiary results were lower by C\$2 million due to lower average consumption as a result of cooler summer weather. Earnings were also down as a result of lower than expected finance charges in the prior period as a result of them not being subject to regulatory deferral last year and the timing of operating expenses.

In Alberta results were higher by C\$2 million as a result of higher electricity volumes related to both customer growth as customer counts increased 12,000 year on year and as a result of higher usage. Revenues were up as a result of the rate increase effective on January 1 of this year and earnings were higher as a result of the non-recurring nature of C\$1.5 million in costs last period related to the floods in southern Alberta. For the normalized business higher income tax recoveries, customer growth and rate base growth were almost fully offset by the timing of certain operating expenses.

Results for the eastern Canadian utilities were down C\$1 million as sales were essentially flat, revenues were down as a result of lower energy supply cost pass-through in Ontario and earnings were lower primarily related to Newfoundland Power's lower earnings as a result of rebasing to a lower return on equity and the overall outcome of the 2013/14 general rate application in that province.

In the Caribbean results were better by US\$2 million as a result of higher exchange rates as sales were stronger related to warmer summer weather and increases in both customers and usage as the Caribbean economies continue to do better related to North American economic recovery and increased tourism. These positive impacts were partially offset by higher overall operating expenses net of higher capitalized overhead costs at Fortis Turks & Caicos.

At the non-regulated generation segment earnings were lower by C\$4 million as a result of lower output mostly resulting from significantly lower rainfall in Belize. Corporate and Other saw a significant increase in costs related to the UNS acquisition. Excluding those costs results were C\$35 million in the quarter compared to C\$21 million last year in the same period as a result of higher finance charges related to the funding at the corporate level of a portion of the UNS acquisition and higher employee related expenses including C\$8 million in non-recurring retirement expenses, and increase share based compensation expenses of C\$1 million as a result of share price appreciation. There were also higher legal and consulting fees and general inflationary increases in costs.

### Risk Disclosure(s)

Master limited partnerships (MLPs) are pass-through entities structured as publicly listed partnerships. For tax purposes, distributions to MLP unit holders may be treated as a return of principal. Investors should consult their own tax advisors before investing in MLP units.

### Guide to the Barclays Fundamental Equity Research Rating System:

Our coverage analysts use a relative rating system in which they rate stocks as Overweight, Equal Weight or Underweight (see definitions below) relative to other companies covered by the analyst or a team of analysts that are deemed to be in the same industry (the "industry coverage universe").

In addition to the stock rating, we provide industry views which rate the outlook for the industry coverage universe as Positive, Neutral or Negative (see definitions below). A rating system using terms such as buy, hold and sell is not the equivalent of our rating system. Investors should carefully read the entire research report including the definitions of all ratings and not infer its contents from ratings alone.

### Stock Rating

**Overweight** - The stock is expected to outperform the unweighted expected total return of the industry coverage universe over a 12-month investment horizon.

**Equal Weight** - The stock is expected to perform in line with the unweighted expected total return of the industry coverage universe over a 12-month investment horizon.

**Underweight** - The stock is expected to underperform the unweighted expected total return of the industry coverage universe over a 12-month investment horizon.

**Rating Suspended** - The rating and target price have been suspended temporarily due to market events that made coverage impracticable or to comply with applicable regulations and/or firm policies in certain circumstances including where the Corporate and Investment Banking Division of Barclays is acting in an advisory capacity in a merger or strategic transaction involving the company.

### Industry View

**Positive** - industry coverage universe fundamentals/valuations are improving.

**Neutral** - industry coverage universe fundamentals/valuations are steady, neither improving nor deteriorating.

**Negative** - industry coverage universe fundamentals/valuations are deteriorating.

Below is the list of companies that constitute the "industry coverage universe":

### North America Utilities

Alliant Energy (LNT)	Ameren Corp. (AEE)	American Electric Power (AEP)
American Water Works (AWK)	Aqua America (WTR)	Canadian Utilities Ltd. (CU.TO)
CenterPoint Energy Inc. (CNP)	CMS Energy (CMS)	Consolidated Edison (ED)
Dominion Resources (D)	DTE Energy (DTE)	Duke Energy (DUK)
Edison International (EIX)	Emera Inc. (EMA.TO)	Fortis Inc. (FTS.TO)
Great Plains Energy Inc. (GXP)	Hawaiian Electric Inds (HE)	Integrus Energy Group Inc. (TEG)
ITC Holdings (ITC)	National Grid Plc (NGG)	National Grid Plc (NG.L)
NiSource, Inc. (NI)	Northeast Utilities (NU)	OGE Energy Corp. (OGE)
Pepco Holdings (POM)	PG&E Corp. (PCG)	Pinnacle West Capital (PNW)
PNM Resources (PNM)	Portland General Electric Co. (POR)	PPL Corporation (PPL)
SCANA Corp. (SCG)	Sempra Energy (SRE)	Southern Co. (SO)
TECO Energy (TE)	Westar Energy (WR)	Wisconsin Energy (WEC)
Xcel Energy (XEL)		

### Distribution of Ratings:

Barclays Equity Research has 2602 companies under coverage.

45% have been assigned an Overweight rating which, for purposes of mandatory regulatory disclosures, is classified as a Buy rating; 54% of companies with this rating are investment banking clients of the Firm.

40% have been assigned an Equal Weight rating which, for purposes of mandatory regulatory disclosures, is classified as a Hold rating; 46% of companies with this rating are investment banking clients of the Firm.

13% have been assigned an Underweight rating which, for purposes of mandatory regulatory disclosures, is classified as a Sell rating; 41% of companies with this rating are investment banking clients of the Firm.

### Guide to the Barclays Research Price Target:

Each analyst has a single price target on the stocks that they cover. The price target represents that analyst's expectation of where the stock will trade in the next 12 months. Upside/downside scenarios, where provided, represent potential upside/potential downside to each analyst's price target over the same 12-month period.

### Guide to the POINT® Quantitative Equity Scores:

The POINT Quantitative Equity Scores (POINT Scores) are based on consensus historical data and are independent of the Barclays fundamental analysts' views. Each score is composed of a number of standard industry metrics.

A high/low Value score indicates attractive/unattractive valuation. Measures of value include P/E, EV/EBITDA and Free Cash Flow.

A high/low Quality score indicates financial statement strength/weakness. Measures of quality include ROIC and corporate default probability.

A high/low Sentiment score indicates bullish/bearish market sentiment. Measures of sentiment include price momentum and earnings revisions.

These scores are valid as of the date of this report. To view the latest scores, which are updated monthly, [click here](#).

For a more detailed description of the underlying methodology for each score, please [click here](#).

J: Barclays Bank PLC and/or an affiliate trades regularly in the securities of Fortis Inc..

**Valuation Methodology:** Our C\$40 price target for Fortis is premised upon a sum-of-the-parts (SOTP) methodology. We apply a 16% premium to the 2016 US regulated utility multiple of 15.9x our Canadian utility operations '16E EPS of C\$1.47. We apply the straight '16E multiple of 15.9x our US Utility operations '16E EPS of C\$0.71. For Caribbean operations we use the publically traded Caribbean Utilities Corporation '16 multiple of 15.3x based upon consensus estimates. We apply this to our Caribbean '16E EPS of C\$0.15. For unregulated generation we use a '16 power multiple of 14.8x our '16E EPS of C\$0.09. For corporate and other, we use the straight '16E US regulated utility multiple of 15.9x our (C\$0.25) EPS for the segment. To this we add a valuation for the upside related to LNG opportunities of C\$0.23 in 2018 discounted to 2016 at a 10% discount rate and applying a 15.9x multiple and a 50% probability of completion.

**Risks which May Impede the Achievement of the Barclays Research Price Target:** Regulatory environments in several Canadian provinces including British Columbia, Alberta, Newfoundland & Labrador, Ontario, and Prince Edward Island. Overall economic and sales growth through the company's various service territories. Execution of large scale capital projects on time and on budget. Real estate valuations, especially in the Atlantic Provinces of Canada.

# Canadian Regulated Utilities

## 2015 Year Ahead

**Remain Neutral Utilities; Canada Could See More Defense in 2015 than US:** As we look forward into 2015 we remain Neutral on North American Utilities, with plays for value being our favorite names for the coming year (see our *North American Utilities Year Ahead* report, also published this morning). From a more narrow Canadian perspective we see the economic headwinds from low oil prices weighing on any potential economic recovery. As the economy potentially remains more sluggish than that in the U.S. it is also probable that interest rate policies between the Federal Reserve and the Bank of Canada could diverge. If the Fed raises rates in 2015 it is likely, in our view, that the Bank of Canada might not follow that move higher. In this scenario, Canadian regulated utilities are poised for potential outperformance versus their U.S. counterparts as defensive fund flows predominate, and lower relative interest rates keep return spreads higher. Another dynamic to consider is the likelihood of a strengthening \$/C\$ exchange rate in this environment. All else equal this would favor C\$ reporters with significant assets in the U.S. and Caribbean such as Emera and Fortis versus companies without U.S. \$ exposure such as Canadian Utilities.

**Initiating Coverage of Brookfield's Yield Co's:** We are expanding our Canadian utility coverage universe by initiating coverage of Brookfield Renewable Energy Partners LP (Overweight; BEP, BEP\_u.TO), and Brookfield Infrastructure Partners LP (Equal Weight; BIP, BIP\_u.TO) under a separate report, also published this morning.

### Revising Price Targets, Introducing 2017 Estimates:

- We remain **Overweight Emera** and set a 2017 EPS estimate of C\$2.35. We see meaningful potential upside in 2017-19 to earnings power related to leverage to increasing pricing in New England capacity markets and continued execution of the Maritime Link project. We raise our price target to C\$44 from C\$42.
- We remain **Equal Weight Fortis** and are rolling out a 2017 EPS estimate of C\$2.34. We see potential upside to earnings power in 2017-18 from execution of the small-scale LNG projects at the Tilbury and Woodfibre sites. Further LNG opportunity at Tilbury may be pushed out in 2015 given the current global growth environment and the potential for curtailment in drilling activity. We increase our price target to C\$41 from C\$40.
- We remain **Underweight Canadian Utilities** as we believe that lower oil prices will continue to have significant knock-on effects to CU's business in Alberta (see our report, *Downgrading to Underweight*, published 10/31/14). We roll out our 2017 EPS estimate of C\$2.47, which is inclusive of the likely shutdown of a unit at the Battle River generating facility. We raise our price target to C\$42 from C\$40.

The increases in all of our price targets are a result of multiple expansion in the comparable group from 15.4x to 16.5x 2016 EPS estimates.

Barclays Capital Inc. and/or one of its affiliates does and seeks to do business with companies covered in its research reports. As a result, investors should be aware that the firm may have a conflict of interest that could affect the objectivity of this report.

Investors should consider this report as only a single factor in making their investment decision.

## Valuation Methodology and Risks

## North America Utilities

## Canadian Utilities Ltd. (CU CN / CU.TO)

**Valuation Methodology:** Our current price target of C\$42 is premised upon a sum of the parts valuation. This valuation uses a 16% premium to the 2016 US regulated utility multiple of 16.7x our Canadian utility operations '16E eps of C\$1.67, our Australian utility operations '16E eps of C\$0.15 and our other segment '16E eps of (C\$0.05). We value the midstream operations using a comp group '16E multiple of 17.2x our '16E midstream eps of C\$0.02. For power we use the US comparable power '16E eps multiple of 15x '16E eps of C\$0.64.

**Risks which May Impede the Achievement of the Barclays Research Price Target:** Risks include economic growth in Alberta and Western Australia, execution risks related to capital deployment, levels of the demand for power in the UK and Alberta and their impact on spark spreads, and the Alberta regulatory environment.

## Emera Inc. (EMA CN / EMA.TO)

**Valuation Methodology:** Our C\$44 price target is premised upon a sum of the parts approach. We value Canadian utility operations at a 16% premium to the '16E US regulated utility multiple of 16.7x our '16 EPS of C\$1.34. US regulated utility operations use the '16E 50/50 blended distribution/transmission multiple of 17.8x our '16 EPS of C\$0.34. For Caribbean operations we use a '16E multiple of 15.4x based upon the current multiple of publically traded Caribbean Utilities Corporation. We apply this to our '16 Caribbean EPS of C\$0.30. We use a '16E pipeline comp multiple of 19.1x our '16 pipeline EPS of C\$0.30. For corporate and other earnings of C\$(0.08) in '16 we use the straight US regulated multiple of 16.7x. To all this we added the NPV for capacity from the New England plants in the 2018 year. This adds C\$3/share to our valuation.

**Risks which May Impede the Achievement of the Barclays Research Price Target:** Economic growth and regulatory environment in Nova Scotia. Execution of large scale capital projects. Government environmental policy in Nova Scotia. Regulation by the Federal Energy Regulatory Commission and state regulators in Maine. Execution on capital deployment projects in joint ventures to achieve appropriate hurdle rates.

## Fortis Inc. (FTS CN / FTS.TO)

**Valuation Methodology:** Our C\$41 price target for Fortis is premised upon a sum-of-the-parts (SOTP) methodology. We apply a 16% premium to the 2016 US regulated utility multiple of 16.7x our Canadian utility operations '16E EPS of C\$1.48. We apply the straight '16E multiple of 16.7x our US Utility operations '16E EPS of C\$0.72. For Caribbean operations we use the publically traded Caribbean Utilities Corporation '16 multiple of 15.4x based upon consensus estimates. We apply this to our Caribbean '16E EPS of C\$0.14. For unregulated generation we use a '16 power multiple of 13.0x our '16E EPS of C\$0.10. For corporate and other, we use the straight '16E US regulated utility multiple of 16.7x our (C\$0.26) EPS for the segment. To this we add a valuation for the upside related to LNG opportunities of C\$0.23 in 2018 discounted to 2016 at a 10% discount rate and applying a 16.7x multiple and a 50% probability of completion.

**Risks which May Impede the Achievement of the Barclays Research Price Target:** Regulatory environments in several Canadian provinces including British Columbia, Alberta, Newfoundland & Labrador, Ontario, and Prince Edward Island. Overall economic and sales growth through the company's various service territories. Execution of large scale capital projects on time and on budget. Real estate valuations, especially in the Atlantic Provinces of Canada.

Price (02-Jan-2015)	CAD 41.21
Price Target	CAD 42.00

**Why Underweight?** We see significant headwinds to stock performance in 2015 including lower oil prices driving slower growth, lower power margins, and lower capital needs in Alberta. We also see the company shifting to riskier unregulated growth in Mexico, having challenges for new business at the Structures unit and a lower than average yield.

Upside case	CAD 47.00
-------------	-----------

Increasing top line sales growth by 1% per year, expanding both Alberta spark spreads by \$3/MWh, and valuing shares using a 20% premium to US regulated utilities indicates a valuation of C\$47.

Downside case	CAD 38.00
---------------	-----------

Decreasing top line sales growth by 1% per year, compressing Alberta spark spreads by \$3/MWh, and valuing shares using a 10% premium to US regulated utilities indicates a valuation of C\$38.

**Why Overweight?** We believe Emera offers a potential 20% total shareholder return opportunity at relatively lower risk than peers. Growth is dependent upon infrastructure deployment that is driven by Nova Scotia's environmental policy in a constructive regulatory environment. Execution risk of these capital projects on time and on budget is essential to achieving our CAGR.

<b>Upside case</b>	<b>CAD 51.00</b>
--------------------	------------------

We increase estimated growth rates by 1%/year, assume a 100% probability of completion for the Northeast Energy Link (vs. 65% in our base case) and value Canadian utility operations at a 30% premium. This leads to an indicative valuation of C\$51.

<b>Downside case</b>	<b>CAD 38.00</b>
----------------------	------------------

We decrease estimated growth rates by 1%/year, assume a 0% probability of completion for the Northeast Energy Link (vs. 65% in our base case) and value Canadian utility operations at a 15% premium. This leads to an indicative valuation of C\$38.

Price (02-Jan-2015) CAD 39.22  
Price Target CAD 41.00

**Why Equal Weight?** We see shares as fairly valued. Upside can come from higher sales growth and potential JV transmission projects in Ontario. This is offset by growth and execution risk related to completion of large construction projects, which are mitigated by the quality of regulation in British Columbia.

**Upside case** CAD 48.00

We increase sales growth by 1%, include the value of potential joint venture transmission projects in Ontario (NPV \$3/share), and value Canadian utility operations at a 25% premium. This leads to an indicative valuation of C\$48.

**Downside case** CAD 37.00

We decrease sales growth by 1%, do not include any transmission upside (similar to our base case), and value Canadian utility operations at a 15% premium. This leads to an indicative valuation of C\$37.

## Canada Could Be More Defensive than the U.S. in 2015

As we look forward into 2015 we see the potential for an economic slowdown in Canada, or, at the least, economic growth not keeping pace with that of the United States. Barclays Economics' forecasts for Canadian and U.S. GDP growth are shown in the table below.

FIGURE 1

### GDP Growth (%) Forecasts for the US and Canada

	2010A	2011A	2012A	2013A	2014E	2015E
US	2.5	1.6	2.3	2.2	2.3	2.9
Canada	3.4	3.0	1.9	2.0	2.4	2.6

Source: Barclays Research Estimates

We believe that the Canadian GDP has more downside risks related to the headwinds created by low oil prices and potential for downward move in property prices. We would also be biased to more upside potential in the U.S. economy than downside risks related to strong consumer spending driving 5% GDP growth in the third quarter of 2015, and lower oil prices having a net positive effect on the overall economy related to greater disposable income leading to an acceleration of consumer spending going forward.

On December 10, 2014, in their semi-annual Financial System Review, the Bank of Canada (BoC) warned that Canadian housing prices could be overvalued by as little as 10% and as much as 30%. The bank went on to predict a soft landing from this overvaluation. BoC Governor Stephen Poloz noted that the estimated overvaluation raises the risks that a shock to the economy could trigger a housing price correction. The low oil price environment, in our view, has the potential to deliver that shock in 2015. Mr. Poloz went on to say that he believes the risk of such a correction to be low, but that if it did occur the economic effects would be severe. The BoC did note strengthening in areas of the economy related to exports to the strengthening US, but also noted that the lower oil price environment could impact 2015 GDP by 0.3%.

If our more sanguine view of the Canadian economy and more optimistic view of the U.S. economy is correct for 2015 we would expect three main macro impacts to move utility stocks in the relative markets. First, the U.S. Federal Reserve would be more likely to raise U.S. interest rates sooner and faster than the Bank of Canada. Current options pricing around a U.S. rate hike actually show a 57% probability of a rate hike in June 2015 with the predicted fed funds rate about evenly split between 25bp and 50bp. By October 2015 the probability of a rate hike is 89% with the predicted fed funds rate between 50bp and 100bp. The BoC may follow suit with the Fed to forestall continued build-up of a potential housing price bubble, but if low oil keeps economic growth and inflation in check, rates in Canada may decouple from those in the United States.

A strong U.S. dollar versus Canadian dollar could also continue into 2015 and as rates decouple, the U.S. dollar would get stronger, all else equal. This would potentially help the segment of the Canadian economy exporting goods to the US, but the BoC may set policy to allow that to continue to outweigh any negative impacts of lower oil prices.

The question becomes what will dominate the landscape in 2015. If low oil prices are the main feature and interest rates do not decouple, Canadian regulated utility premiums are likely to stay low versus their U.S. counterparts similar to the period from 2003 to 2004. We think the risks to the downside in the Canadian regulated names to this scenario are limited given that the current premium to their U.S. counterparts is only 6%. Alternatively, if rates do decouple between the two countries, the Canadian regulated utilities will likely trade to a significant premium versus their U.S. counterparts, as seen in 2005, when they traded to a premium of 44%.

FIGURE 2

## Canadian Regulated Utilities versus U.S. Regulated Utilities FY2 P/E Ratio Premium

Source: Thomson Reuters, Barclays Research Estimates

Looking at the last time rates decoupled between the two countries the U.S. Federal Reserve raised rates by 316bp between December 2003 and December 2005 while the Bank of Canada only raised rates by 50bp over the same timeframe. The Canadian to U.S. regulatory premium then fell from the peak of 44% to 4% as, subsequently the BoC raised rates by 125bp to the Fed's 33bp from December 2005 to November 2007.

FIGURE 3

## Relative Rates and FY2 P/E Ratio Premium of Canadian to US Regulated Utilities

	Cdn vs. US	Bank of Canada	US Fed Funds		
	FY2 P/E Premium	Rates	Change	Rate	Change
December '03	0%	3%		1%	
December '05	44%	3.50%	0.50%	4.16%	3.16%
November '07	4%	4.75%	1.25%	4.49%	0.33%

Source: US Federal Reserve, Bank of Canada, Barclays Research Estimates

## In 2015 Play for Value

As noted in our North American Power & Utilities year ahead publication, also published this morning, our favorite names reflect a play for value in a year with potentially significant headwinds. Looking at the subset of Canadian regulated utilities we see significant value related to a current premium of only 5.9% versus the long run average, since 2002, premium of approximately 16%. The premium could stay low due to depressed oil prices as seen in 2003-04, but given that the premium is already low we see little downside risk should this scenario materialize. Further, there is significant upside opportunity for an increase in the premium should interest rates in both countries diverge in 2015.

Lastly, looking through an even finer lens into the Canadian regulated utility universe, low oil prices and their knock-on effects will have significantly greater impacts on Canadian Utilities than Emera and Fortis, by our analysis. Further, even if rates don't diverge, a strong US\$/C\$ exchange rate will be beneficial, all else equal, to Emera and Fortis, which own assets in the US and Caribbean where the U.S. dollar is the local currency. Lastly, we do see some risk related to potential delays in Fortis's potential LNG projects in 2015, and as a result continue to believe Emera offers the best overall return opportunity at lower relative risks of the Canadian Regulated names. We go through expectations for the upcoming year

for each company below as well as a review of capital expenditure and growth assumptions embedded in our 2017 earnings per share estimates.

## Thoughts on 2015 and Introducing 2017 Forecasts

---

### Canadian Utilities

In 2015 we anticipate the finalization of the Economic Regulatory Authority's decision on rates of return for the company's assets in Western Australia. The current return on equity is a 10.4% rate; however, the draft decision issued by the ERA called for an allowed return on equity of only 6.8%. Our model incorporates a rate of 8.9%, and comments are due on January 12, 2015.

In 2015 we also anticipate increased clarity on the first investments in Mexico, and how long Battle River Unit 3 will be able to run economically in a currently depressed Alberta power market. We also anticipate that management will provide updates throughout the year on the lower potential earnings at the structures & logistics business related to continued sluggish global growth.

On the positive side we anticipate finalization of the capital tracker mechanism in Alberta, where currently the company is recovering 90% of their request on an interim basis. We believe that Alberta has a solid track record related to incorporating interim decisions as final orders, and therefore anticipate a 90% recovery rate going forward. We would also expect management to continue to provide details on the progress of storage, water, and pipeline replacement investments in the province.

Our 2017 EPS estimate incorporates a similar capital expenditure profile to 2016, although there is potential for an uptick in capital expenditures related to the recent award to the company of the C\$1.43 billion Fort McMurray West project that will commence construction in 2017, pending Alberta Utility Commission approval and be in service by 2019. Our forecast also incorporates current Alberta power and gas forwards, and assumes top-line growth at the utilities between 1.50% and 1.75%.

The Fort McMurray West project is a 500km 500kV transmission line that will be 80% owned by Canadian Utilities and 20% owned by Quanta Services. The project was awarded by the Alberta Electric System Operator (AESO) after a worldwide competitive open bidding process. Valard Construction, a subsidiary of Quanta will provide turnkey construction under an EPC contract, while CU subsidiary ATCO Electric will be responsible for route planning and operations and maintenance of the line. The proposed route, substations, and design of the transmission line are subject to approval by the Alberta Utilities Commission. The company will begin the process of talking to landowners along the proposed route in the coming months.

### Emera Inc.

For Emera we expect a rather busy 2015, but with no requested rate increase in Nova Scotia for 2015 we expect a relatively less active regulatory and political environment to reduce risk in the coming year. We anticipate updates from management around the awarding of the transmission construction contract for the Maritime Link in 1Q15, and the construction of the Nova Scotia portion of the HVDC transmission line and connection to be completed by the end of the year. We also expect the decision from the U.S. Department of Energy on the company's proposed export of CNG from Florida to Grand Bahama in the first quarter. Capacity values are also likely to continue to increase in New England which will hold the auction related to 2018-19 capacity, or FCA 9, in the first quarter with the result available in March of next year. As a reminder, FCA 8 cleared at \$7.025/kW-month in 2014, up from a clearing price of \$2.950/kW-month for the FCA 7 in 2013. We also anticipate that the

company will deploy the first new tidal power test units as a 4MW array (two 2MW units) into the Bay of Fundy and hopefully have initial results of this potential opportunity by the end of the year.

Our 2017 EPS estimate includes the potential upside related to the FCA 8 capacity auction results and their impact on the earnings power of the New England gas plant assets which Emera acquired at the end of 2013. Our capital expenditure forecast for 2017 falls to C\$720 million to be in line with current management forecasts, which do not include any potential capital opportunities related to several growth opportunities. These include CNG in the Caribbean, investments through their ownership stake in Algonquin Power & Light, further geothermal or renewable investments in the Caribbean, potential for more gas plant or gas pipeline asset acquisitions or expansions in the U.S. or on the Maritime & NE pipeline, and any investments related to transmission interconnections in Maine under the memorandum of understanding agreement with Central Maine Power. We assume relatively conservative load growth of 1% in Maine and Nova Scotia in 2017, and 1.5% in the Caribbean. The earnings related to the U.S. and Caribbean subsidiaries are forecast at constant currency exchange rates.

*Barclays is providing investment banking services to SunEdison (SUNE) and Terraform Power (TERP) relating to their definitive agreement to acquire First Wind Energy. Our estimates for Emera Inc., which sold its stake to First Wind to allow First Wind Energy to sell itself to SunEdison (SUNE) and Terraform Power (TERP), do not reflect the impact of that transaction.*

### **Fortis Inc.**

In 2015 we expect clarity around the potential smaller scale LNG export investments being explored by the company. We include the approved \$400 million Tilbury Phase 1A project in our model as well as the potential \$600 million Woodfibre project. We do not currently include the potential \$450 million Tilbury Phase 1B project with export to Hawaii in our numbers. We see some risk related to push-out of schedules to both potential projects as continued slower growth in China could push back the Woodfibre project, although we view this as unlikely. The Tilbury Phase 1B project could also face delays in approval as the Hawaii Public Utilities Commission is likely to adjudicate the proposed acquisition of Hawaiian Electric Utilities by NextEra Energy before approval of LNG imports to the state.

The coming year will be one where management's focus, in our view, will be on integration of the UNS Energy acquisition and demonstration of the earnings power of both recently acquired U.S. based subsidiaries. The exchange rate move of a strengthening US\$ versus C\$ has made those acquisitions accretive sooner than we modelled or anticipated at the time they were announced.

In July the rate case filed by Central Hudson in New York will reach a final decision as long as the New York Public Service Commission remains on schedule. Other regulatory matters that will be settled in 2015 include the 2014-19 performance based ratemaking proposal in British Columbia, and three items in Alberta: the capital tracker mechanism, similar to that discussed for Canadian Utilities above, the application by the company for 2015 general rates, and the 2013-14 generic cost of capital proceeding. We would expect risk premium in the shares to decrease as these regulatory items and the risk associated with them mitigates with final orders over the course of the year. We also anticipate finalization of the sale of the properties business in 2015 as well as the completion and placement in service of the Waneta hydroelectric project.

Our 2017 estimate uses approximately C\$1.3 billion in capital expenditures in 2017 and excludes execution of any LNG opportunities beyond Tilbury 1A and Woodfibre. We also estimate the sale of the properties business is completed in 2015 for a cap rate of 10% for

the hotels segment and 5% for the commercial segment which generates a sale price of approximately C\$1 billion. This sale price could be at risk if the Canadian economy slows and real estate prices move lower.

**S:** Barclays Capital Canada Inc. is a market-maker in an equity or equity related security issued by this issuer.

**T:** Barclays Bank PLC and/or an affiliate is providing equity advisory services to this issuer.

### Risk Disclosure(s)

Master limited partnerships (MLPs) are pass-through entities structured as publicly listed partnerships. For tax purposes, distributions to MLP unit holders may be treated as a return of principal. Investors should consult their own tax advisors before investing in MLP units.

### Guide to the Barclays Fundamental Equity Research Rating System:

Our coverage analysts use a relative rating system in which they rate stocks as Overweight, Equal Weight or Underweight (see definitions below) relative to other companies covered by the analyst or a team of analysts that are deemed to be in the same industry (the "industry coverage universe").

In addition to the stock rating, we provide industry views which rate the outlook for the industry coverage universe as Positive, Neutral or Negative (see definitions below). A rating system using terms such as buy, hold and sell is not the equivalent of our rating system. Investors should carefully read the entire research report including the definitions of all ratings and not infer its contents from ratings alone.

### Stock Rating

**Overweight** - The stock is expected to outperform the unweighted expected total return of the industry coverage universe over a 12-month investment horizon.

**Equal Weight** - The stock is expected to perform in line with the unweighted expected total return of the industry coverage universe over a 12-month investment horizon.

**Underweight** - The stock is expected to underperform the unweighted expected total return of the industry coverage universe over a 12-month investment horizon.

**Rating Suspended** - The rating and target price have been suspended temporarily due to market events that made coverage impracticable or to comply with applicable regulations and/or firm policies in certain circumstances including where the Corporate and Investment Banking Division of Barclays is acting in an advisory capacity in a merger or strategic transaction involving the company.

### Industry View

**Positive** - industry coverage universe fundamentals/valuations are improving.

**Neutral** - industry coverage universe fundamentals/valuations are steady, neither improving nor deteriorating.

**Negative** - industry coverage universe fundamentals/valuations are deteriorating.

Below is the list of companies that constitute the "industry coverage universe":

### North America Utilities

Alliant Energy (LNT)	Ameren Corp. (AEE)	American Electric Power (AEP)
American Water Works (AWK)	Aqua America (WTR)	Brookfield Infrastructure Partners LP (BIP)
Brookfield Infrastructure Partners LP (BIP_u.TO)	Brookfield Renewable Energy Partners LP (BEP_u.TO)	Brookfield Renewable Energy Partners LP (BEP)
Canadian Utilities Ltd. (CU.TO)	CenterPoint Energy Inc. (CNP)	CMS Energy (CMS)
Consolidated Edison (ED)	Dominion Resources (D)	DTE Energy (DTE)
Duke Energy (DUK)	Edison International (EIX)	Emera Inc. (EMA.TO)
Fortis Inc. (FTS.TO)	Great Plains Energy Inc. (GXP)	Hawaiian Electric Inds (HE)
Integrus Energy Group Inc. (TEG)	ITC Holdings (ITC)	National Grid Plc (NGG)
National Grid Plc (NG.L)	NiSource, Inc. (NI)	Northeast Utilities (NU)
OGE Energy Corp. (OGE)	Pepco Holdings (POM)	PG&E Corp. (PCG)
Pinnacle West Capital (PNW)	PNM Resources (PNM)	Portland General Electric Co. (POR)
PPL Corporation (PPL)	SCANA Corp. (SCG)	Sempra Energy (SRE)
Southern Co. (SO)	TECO Energy (TE)	Westar Energy (WR)

Xcel Energy (XEL)

### Distribution of Ratings:

Barclays Equity Research has 2638 companies under coverage.

44% have been assigned an Overweight rating which, for purposes of mandatory regulatory disclosures, is classified as a Buy rating; 54% of companies with this rating are investment banking clients of the Firm.

40% have been assigned an Equal Weight rating which, for purposes of mandatory regulatory disclosures, is classified as a Hold rating; 45% of companies with this rating are investment banking clients of the Firm.

13% have been assigned an Underweight rating which, for purposes of mandatory regulatory disclosures, is classified as a Sell rating; 40% of companies with this rating are investment banking clients of the Firm.

### Guide to the Barclays Research Price Target:

Each analyst has a single price target on the stocks that they cover. The price target represents that analyst's expectation of where the stock will trade in the next 12 months. Upside/downside scenarios, where provided, represent potential upside/potential downside to each analyst's price target over the same 12-month period.

### Guide to the POINT® Quantitative Equity Scores:

The POINT Quantitative Equity Scores (POINT Scores) are based on consensus historical data and are independent of the Barclays fundamental analysts' views. Each score is composed of a number of standard industry metrics.

A high/low Value score indicates attractive/unattractive valuation. Measures of value include P/E, EV/EBITDA and Free Cash Flow.

A high/low Quality score indicates financial statement strength/weakness. Measures of quality include ROIC and corporate default probability.

A high/low Sentiment score indicates bullish/bearish market sentiment. Measures of sentiment include price momentum and earnings revisions.

These scores are valid as of the date of this report. To view the latest scores, which are updated monthly, [click here](#).

For a more detailed description of the underlying methodology for each score, please [click here](#).

J: Barclays Bank PLC and/or an affiliate trades regularly in the securities of Canadian Utilities Ltd..

K: Barclays Bank PLC and/or an affiliate has received non-investment banking related compensation from Canadian Utilities Ltd. within the past 12 months.

M: Canadian Utilities Ltd. is, or during the past 12 months has been, a non-investment banking client (securities related services) of Barclays Bank PLC and/or an affiliate.

**Valuation Methodology:** Our current price target of C\$42 is premised upon a sum of the parts valuation. This valuation uses a 16% premium to the 2016 US regulated utility multiple of 16.7x our Canadian utility operations '16E eps of C\$1.67, our Australian utility operations '16E eps of C\$0.15 and our other segment '16E eps of (C\$0.05). We value the midstream operations using a comp group '16E multiple of 17.2x our '16E midstream eps of C\$0.02. For power we use the US comparable power '16E eps multiple of 15x '16E eps of C\$0.64.

**Risks which May Impede the Achievement of the Barclays Research Price Target:** Risks include economic growth in Alberta and Western Australia, execution risks related to capital deployment, levels of the demand for power in the UK and Alberta and their impact on spark spreads, and the Alberta regulatory environment.

A: Barclays Bank PLC and/or an affiliate has been lead manager or co-lead manager of a publicly disclosed offer of securities of Emera Inc. in the previous 12 months.

D: Barclays Bank PLC and/or an affiliate has received compensation for investment banking services from Emera Inc. in the past 12 months.

J: Barclays Bank PLC and/or an affiliate trades regularly in the securities of Emera Inc..

L: Emera Inc. is, or during the past 12 months has been, an investment banking client of Barclays Bank PLC and/or an affiliate.

R: Barclays Capital Canada Inc. and/or an affiliate has received compensation for investment banking services from Emera Inc. in the past 12 months.

**Valuation Methodology:** Our C\$44 price target is premised upon a sum of the parts approach. We value Canadian utility operations at a 16% premium to the '16E US regulated utility multiple of 16.7x our '16 EPS of C\$1.34. US regulated utility operations use the '16E 50/50 blended distribution/transmission multiple of 17.8x our '16 EPS of C\$0.34. For Caribbean operations we use a '16E multiple of 15.4x based upon the current multiple of publically traded Caribbean Utilities Corporation. We apply this to our '16 Caribbean EPS of C\$0.30. We use a '16E pipeline comp multiple of 19.1x our '16 pipeline EPS of C\$0.30. For corporate and other earnings of C\$(0.08) in '16 we use the straight US regulated multiple of 16.7x. To all this we added the NPV for capacity from the New England plants in the 2018 year. This adds C\$3/share to our valuation.

**Risks which May Impede the Achievement of the Barclays Research Price Target:** Economic growth and regulatory environment in Nova Scotia. Execution of large scale capital projects. Government environmental policy in Nova Scotia. Regulation by the Federal Energy Regulatory Commission and state regulators in Maine. Execution on capital deployment projects in joint ventures to achieve appropriate hurdle rates.

J: Barclays Bank PLC and/or an affiliate trades regularly in the securities of Fortis Inc..

**Valuation Methodology:** Our C\$41 price target for Fortis is premised upon a sum-of-the-parts (SOTP) methodology. We apply a 16% premium to the 2016 US regulated utility multiple of 16.7x our Canadian utility operations '16E EPS of C\$1.48. We apply the straight '16E multiple of 16.7x our US Utility operations '16E EPS of C\$0.72. For Caribbean operations we use the publically traded Caribbean Utilities Corporation '16 multiple of 15.4x based upon consensus estimates. We apply this to our Caribbean '16E EPS of C\$0.14. For unregulated generation we use a '16 power multiple of 13.0x our '16E EPS of C\$0.10. For corporate and other, we use the straight '16E US regulated utility multiple of 16.7x our (C\$0.26) EPS for the segment. To this we add a valuation for the upside related to LNG opportunities of C\$0.23 in 2018 discounted to 2016 at a 10% discount rate and applying a 16.7x multiple and a 50% probability of completion.

**Risks which May Impede the Achievement of the Barclays Research Price Target:** Regulatory environments in several Canadian provinces including British Columbia, Alberta, Newfoundland & Labrador, Ontario, and Prince Edward Island. Overall economic and sales growth through the company's various service territories. Execution of large scale capital projects on time and on budget. Real estate valuations, especially in the Atlantic Provinces of Canada.

Fortis Inc.

## New York Analyst Day April 1

**Reiterating Equal Weight:** We are reiterating our Equal Weight rating and are increasing our price target from C\$41 to C\$42 premised upon multiple expansion and our SOTP valuation methodology detailed below. Our earnings per share estimates remain C\$2.01/C\$2.18/C\$2.34 for '15/16/17 respectively. Our price target of C\$42 offers a total shareholder return of approximately 10.5% inclusive of the 3.5% dividend yield however it is inclusive of current LNG opportunities we believe will go forward. Further upside to shares will have to come via execution of further Tilbury LNG expansion and/or regulatory outcomes and operating leverage at the utilities.

**Solid Q4 and 2014 Results, Dividend Increased:** For the quarter the company reported adjusted ongoing earnings per share of C\$0.46 versus C\$0.47 last year. For the year results were C\$1.72 on an adjusted basis versus C\$1.66 last year. Management also announced a dividend increase to C\$0.34/share from C\$0.32/share commencing with the Q1 '15 dividend payable on March 1. This raises the annualized dividend to C\$1.36/share from C\$1.32/share. Results were driven by increased contribution from regulated utilities as a result of the UNS Energy acquisition and a full-year contribution from Central Hudson. Earnings in Alberta were higher as a result of higher rate base and customer growth while results in the Caribbean were better year on year as a result of higher sales. These gains were partially offset by lower results in Eastern Canada and higher financing costs at FortisBC Electric.

**Analyst Day in New York City on April 1:** The company will hold their first US-based Analyst Day for investors on Wednesday April 1 in New York City. Attending from management will be CEO Barry Perry, CFO Karl Smith, EVP Western Canada John Walker, EVP Eastern Canada/Caribbean Earl Ludlow, CEO of UNS Energy David Hutchens, and CEO of Central Hudson James Laurito. US-based investors should be particularly interested in the upcoming catalysts discussed in greater detail below as well as an update on utility operations and overall LNG opportunities.

**Why Equal Weight?** We see shares as fairly valued. Upside can come from higher sales growth and potential JV transmission projects in Ontario. This is offset by growth and execution risk related to completion of large construction projects, which are mitigated by the quality of regulation in British Columbia.

<b>Upside case</b>	<b>CAD 49.00</b>
--------------------	------------------

We increase sales growth by 1%, include the value of potential joint venture transmission projects in Ontario (NPV \$3/share), and value Canadian utility operations at a 25% premium. This leads to an indicative valuation of C\$49.

<b>Downside case</b>	<b>CAD 38.00</b>
----------------------	------------------

We decrease sales growth by 1%, do not include any transmission upside (similar to our base case), and value Canadian utility operations at a 15% premium. This leads to an indicative valuation of C\$38.

#### Upside/Downside scenarios

Note: FY End Dec

## 2015 Outlook and Regulatory Update

Strategically the company remains focused on the integration of the recently acquired UNS Energy subsidiary in Arizona. Going forward key drivers in 2015 include completion of the Waneta hydroelectric expansion, a full year contribution from the UNS Energy segment, a mid-year rate increase at Central Hudson, and a decision on the capital tracker in Alberta. Waneta remains on track for a spring 2015 completion date and management sees earnings of C\$20 – C\$25 million for their 51% share of the project in 2015.

The focus for the company over the next year to year and a half remains the full integration of Central Hudson and UNS Energy, execution of the capital expenditure program, making progress on the LNG opportunities in British Columbia, and completing the strategic review of the Fortis Properties unit. As a result, despite management's stated goal of achieving an eventual 50/50 Canadian/US balance we do not see any further strategic forays into the United States within this 12 – 18 month period.

### LNG Opportunities

In late 2013 the Government of British Columbia approved an Order in Council exempting the Tilbury Phase 1A expansion from normal regulatory review and imposing a limit of C\$400 million in capital expenditures associated with the exemption. The Tilbury Phase 1A expansion associated with this ruling is now underway and is expected to be in service by the end of 2016. Related to the expansion of the Tilbury LNG site, the company executed an agreement with BC Ferries in the quarter to supply LNG for three new mid-size Ferries to be placed into service in the BC Ferry system. This continues to demonstrate the existence of domestic LNG demand within Western Canada.

In late 2014 the Government of British Columbia approved a second Order in Council amending the original Tilbury expansion exemption to now total C\$850 million in capital investments. This Order in Council also approved an additional C\$200 million related to improving coastal access to the site. This incorporated the Tilbury Phase 1B part of the project expected to cost C\$450 million and currently under agreement to be supplied to Hawaii, pending approval of the Hawaii Public Service Commission. The pending agreement is for 140 GJ/day and is a 15 year conditional contract. If Hawaii does not approve the LNG imports from the Tilbury Phase 1B expansion, management expressed confidence in both the local, including Alaska, and international demand for the LNG that would be available from this second expansion.

The company is also pursuing a C\$600 million pipeline expansion project to supply natural gas to the proposed and privately owned Woodfibre LNG facility in British Columbia. The Woodfibre site is a former paper mill near Squamish. Both applications by FortisBC and Woodfibre LNG were accepted by the Environmental Assessment Office (EAO) in early January. The first step in the environmental approval process is a 45 day comment period set for January 26 – March 4 for the pipeline project and January 22 – March 9 for the Woodfibre LNG project. The full review is expected to take six months and conclude in July. Management is currently negotiating a transport contract with the owner of the Woodfibre site.

### Capital Expenditure Update and Guidance

The completion of the Waneta hydroelectric expansion remains on schedule and on budget. The C\$900 million 335MW expansion is expected to be completed in the spring of this year. So far approximately C\$679 million has been invested in the project since construction began in 2010.

The Tilbury Phase 1A expansion in British Columbia, expected to cost C\$400 million and reach completion by the end of 2016 was begun in the fourth quarter. The project will be

included within the company's rate base in British Columbia once completed. The company also purchased, at the UNS Energy subsidiary the 550MW Gila River plant as anticipated in Q4 '14 for C\$252 million (US\$219 million).

The five year go forward capital expenditure program is forecast by management to total C\$2.2 billion in 2015 and approximately C\$9 billion for the five year period through 2019. This will drive rate base growth of approximately 6.5% per annum from approximately C\$14 billion to approximately C\$19 billion by 2019. Inclusive of future LNG opportunities related to the Tilbury Phase 1B expansion and the Woodfibre site, the rate base growth per annum would approximate 7.5%.

Anticipated capital expenditures for 2015 by subsidiary and function are provided in the table below.

	Waneta Expansion	579	100	76	72	2015

Source: Company Filings, Barclays Research Estimates

The Pinal transmission project is the construction of a transmission line in Pinal County Arizona that will increase import capacity from Gila River Unit 3 and the Palo Verde trading hub. The pole management program in Alberta is a program to replace 110,000 vintage

poles that were not chemically treated to prevent risk of failure due to age. Caribbean Utilities was the successful bidder for a 39.7MW capacity diesel power plant on Grand Cayman which is to be constructed as two 18.5MW units and a 2.7MW heat recovery steam turbine. The project is expected to be completed mid-year 2016.

## Regulatory Update and Matters Outstanding

### *British Columbia*

The British Columbia Utilities Commission (BCUC) approved the performance based ratemaking in September 2014 and the ruling did not have a significant impact on the current year.

### *Alberta*

A generic cost of capital proceeding is continuing before the Alberta Utilities Commission (AUC) and a final decision is expected in the first quarter of this year. Our model incorporates 8.75% allowed returns on equity in Alberta. The AUC is also expected to decide the recovery amounts related to the capital expenditure tracker mechanism within performance based ratemaking this quarter. The AUC approved interim rates that recovered 60% of the applied for revenue in 2013 and 2014, and 90% of the applied for revenue in 2015. As a reminder, FortisAlberta originally filed for revenue of approximately C\$23/C\$48/C\$69 million related to the capital tracker mechanism for '13/14/15 respectively. Based upon the 60% recovery within the interim decision the company recorded revenues of C\$15/C\$30 million for '13/14 respectively. The revenue true-up at 90% recovery for '13/14 versus 60% recovery would be approximately C\$26 million.

### *New York*

A joint settlement was filed on February 6 related to the ongoing general rate case in New York for the Central Hudson subsidiary. The settlement would call for a three year rate plan beginning on July 1, 2015 reflecting a 48% equity ratio and a 9% allowed return on equity. Public hearings are expected to be held before the New York Public Service Commission (NY PSC) in March and/or April and a final decision from the NY PSC is anticipated in June. We do not view there being significant opposition to the settlement and expect it to be approved by the Commission.

### *Fortis Properties*

The strategic review of Fortis Properties continues and management expects to make a decision regarding the disposition of the non-core asset in the second quarter of this year. Earnings for Fortis Properties in 2013 were C\$23 million which is comparable with 2013. Several options remain open for the unit and could include sale of all or part of the assets, a sale of the shares of Fortis Properties, or an initial public offering. We continue to model a sale at a 10% cap rate for the hotels business and a 5% cap rate for the commercial property business for a total estimated sale price of approximately C\$1.1 billion. In our view the proceeds would be used to fund future utility capital investments and potential future LNG expansion opportunities.

## 2014 Results

For the quarter the company reported earnings per share of C\$0.44 versus C\$0.47 last year. For the year the company reported earnings per share of C\$1.39 versus C\$1.74 last year. On an adjusted and fully diluted basis earnings per share were, for the fourth quarter C\$0.46 versus C\$0.47 last year, and annually C\$1.72 versus C\$1.66 last year.

Reported versus adjusted fully diluted earnings are provided in the tables below for both 2013 and 2014.

Regulated utilities contributed C\$460 million in earnings in 2014 versus C\$392 million in 2013, which was inclusive of C\$60 million in earnings from UNS Energy from the date of acquisition and a full year contribution from Central Hudson, which was acquired in June 2013. FortisAlberta contributed C\$9 million in higher earnings as a result of higher rate base and customer growth. Results in the Caribbean on Grand Cayman and Turks & Caicos were better by C\$4 million as a result of better sales growth year on year. These positive drivers were offset by lower results at the Eastern Canadian utilities, and higher finance costs at FortisBC Electric. Net reported earnings by segment for the year and the quarter are provided in the table below.

FIGURE 5

**Reported Earnings by Segment Full Year and Q4 2014**

<i>C\$ Millions</i>	ANNUAL			QUARTERLY		
	2014	2013	Variance	2014	2013	Variance

Corporate & Other	-191	-96	-95	-31	-21	-10

Source: Company Filings, Barclays Research Estimates

Results at UNS Energy were C\$60 million (US\$54 million) for the period since the acquisition. Annualized earnings were US\$144 million in 2014 versus US\$132 million for 2013 excluding the impact of one-time acquisition related expenses. The increase was primarily due to the impact of higher rates related to a rate case outcome at Tucson Electric Power effective in mid-2013, and at UNS Electric effective on January 1 2014.

Central Hudson reported US\$34 million versus US\$ 44 million in 2013. The decrease was a result of higher D&A and O&M during the two-year rate freeze agreed to upon acquisition of the utility by Fortis in 2013. New rates are expected to go into effect in line with the settlement agreement in New York described above at mid-year.

FortisBC Energy reported flat earnings year on year as the positive drivers related to the outcome of the second phase of the generic cost of capital proceeding in British Columbia and higher AFUDC balances were completely offset by regulatory flow through deferrals and greater sharing under the performance based ratemaking mechanism that went into effect at the beginning of 2014.

FortisAlberta results were C\$9 million higher related to greater energy deliveries as a result of customer growth and increased rate base on a year over year basis. At FortisBC electric results were lower as a result of a more normal level of finance charges versus a lower than expected level in 2013.

At the Eastern Canadian utilities results were lower as a result of the tax recoveries realized in 2013. Excluding these one-time tax recoveries results were C\$2 million higher year on year as sales growth was partially offset by higher operating costs at Newfoundland Power related to the loss of energy supply from Newfoundland & Labrador Hydro and related power interruptions in January of last year.

In the Caribbean results were higher related to increased sales growth and the impact of foreign exchange which helped results by approximately C\$1.5 million year on year. These positive factors were partially offset by higher operating expenses.

Excluding the expropriation gain recorded in 2013, results at Fortis Generation were higher by C\$1 million year on year related to favorable foreign exchange rates offset by project development costs related to investigating a possible hydroelectric opportunity in British Columbia.

Corporate & Other saw results lower by C\$95 million, although net of one-time adjustments, expenses were only C\$17 million higher year on year. This increase was related to higher finance charges, preferred dividends, and operating expenses partially offset by higher income tax recovery and interest income. Going forward post the UNS Energy acquisition, as a larger entity with greater preference shares management expects corporate and other costs between C\$125 – C\$130 million on a full year basis.

### *Valuation Methodology*

Our C\$42 price target for Fortis is premised upon a sum-of-the-parts (SOTP) methodology. We apply a 16% premium to the 2017 US regulated utility multiple of 15.7x our Canadian utility operations '16E EPS of C\$1.57. We apply the straight '16E multiple of 15.7x our US Utility operations '16E EPS of C\$0.77. For Caribbean operations we use the publically traded Caribbean Utilities Corporation '17 multiple of 15.7x based upon consensus estimates. We apply this to our Caribbean '16E EPS of C\$0.17. For unregulated generation we use a '17 power multiple of 17.2x our '17E EPS of C\$0.10. For corporate and other, we use the straight '17E US regulated utility multiple of 15.7x our (C\$0.26) EPS for the segment. To this we add a valuation for the upside related to LNG opportunities of C\$0.23 in 2018 discounted to 2017 at a 10% discount rate and applying a 15.7x multiple and a 50% probability of completion.

Our prior C\$41 price target for Fortis was premised upon a sum-of-the-parts (SOTP) methodology. We applied a 16% premium to the then 2016 US regulated utility multiple of 16.7x our Canadian utility operations '16E EPS of C\$1.48. We applied the straight '16E multiple of 16.7x our US Utility operations '16E EPS of C\$0.72. For Caribbean operations we use the then publically traded Caribbean Utilities Corporation '16 multiple of 15.4x based upon consensus estimates. We applied this to our Caribbean '16E EPS of C\$0.14. For unregulated generation we used a '16 power multiple of 13.0x our '16E EPS of C\$0.10. For corporate and other, we used the then straight '16E US regulated utility multiple of 16.7x our (C\$0.26) EPS for the segment. To this we added a valuation for the upside related to LNG opportunities of C\$0.23 in 2018 discounted to 2016 at a 10% discount rate and applied a 16.7x multiple and a 50% probability of completion.

## ANALYST(S) CERTIFICATION(S):

We, Ross A. Fowler, CFA and Daniel Ford, CFA, hereby certify (1) that the views expressed in this research report accurately reflect our personal views about any or all of the subject securities or issuers referred to in this research report and (2) no part of our compensation was, is or will be directly or indirectly related to the specific recommendations or views expressed in this research report.

## IMPORTANT DISCLOSURES

Barclays Research is a part of the Corporate and Investment Banking division of Barclays Bank PLC and its affiliates (collectively and each individually, "Barclays"). For current important disclosures regarding companies that are the subject of this research report, please send a written request to: Barclays Research Compliance, 745 Seventh Avenue, 14th Floor, New York, NY 10019 or refer to <http://publicresearch.barclays.com> or call 212-526-1072.

The analysts responsible for preparing this research report have received compensation based upon various factors including the firm's total revenues, a portion of which is generated by investment banking activities.

Analysts regularly conduct site visits to view the material operations of covered companies, but Barclays policy prohibits them from accepting payment or reimbursement by any covered company of their travel expenses for such visits.

Fortis Inc. (FTS.TO, 18-Feb-2015, CAD 39.30), Equal Weight/Neutral, J

### Disclosure Legend:

A: Barclays Bank PLC and/or an affiliate has been lead manager or co-lead manager of a publicly disclosed offer of securities of the issuer in the previous 12 months.

B: An employee of Barclays Bank PLC and/or an affiliate is a director of this issuer.

C: Barclays Bank PLC and/or an affiliate is a market-maker and/or liquidity provider in equity securities issued by this issuer or one of its affiliates.

D: Barclays Bank PLC and/or an affiliate has received compensation for investment banking services from this issuer in the past 12 months.

E: Barclays Bank PLC and/or an affiliate expects to receive or intends to seek compensation for investment banking services from this issuer within the next 3 months.

F: Barclays Bank PLC and/or an affiliate beneficially owned 1% or more of a class of equity securities of the issuer as of the end of the month prior to the research report's issuance.

G: One of the analysts on the coverage team (or a member of his or her household) owns shares of the common stock of this issuer.

H: This issuer beneficially owns 5% or more of any class of common equity securities of Barclays Bank PLC.

I: Barclays Bank PLC and/or an affiliate has a significant financial interest in the securities of this issuer.

J: Barclays Bank PLC and/or an affiliate trades regularly in the securities of this issuer.

K: Barclays Bank PLC and/or an affiliate has received non-investment banking related compensation from this issuer within the past 12 months.

L: This issuer is, or during the past 12 months has been, an investment banking client of Barclays Bank PLC and/or an affiliate.

M: This issuer is, or during the past 12 months has been, a non-investment banking client (securities related services) of Barclays Bank PLC and/or an affiliate.

N: This issuer is, or during the past 12 months has been, a non-investment banking client (non-securities related services) of Barclays Bank PLC and/or an affiliate.

O: Barclays Capital Inc., through Barclays Market Makers, is a Designated Market Maker in this issuer's stock, which is listed on the New York Stock Exchange. At any given time, its associated Designated Market Maker may have "long" or "short" inventory position in the stock; and its associated Designated Market Maker may be on the opposite side of orders executed on the floor of the New York Stock Exchange in the stock.

P: A partner, director or officer of Barclays Capital Canada Inc. has, during the preceding 12 months, provided services to the subject company for remuneration, other than normal course investment advisory or trade execution services.

Q: Barclays Bank PLC and/or an affiliate is a Corporate Broker to this issuer.

R: Barclays Capital Canada Inc. and/or an affiliate has received compensation for investment banking services from this issuer in the past 12 months.

S: Barclays Capital Canada Inc. is a market-maker in an equity or equity related security issued by this issuer.

**IMPORTANT DISCLOSURES CONTINUED**

T: Barclays Bank PLC and/or an affiliate is providing equity advisory services to this issuer.

**Risk Disclosure(s)**

Master limited partnerships (MLPs) are pass-through entities structured as publicly listed partnerships. For tax purposes, distributions to MLP unit holders may be treated as a return of principal. Investors should consult their own tax advisors before investing in MLP units.

**Guide to the Barclays Fundamental Equity Research Rating System:**

Our coverage analysts use a relative rating system in which they rate stocks as Overweight, Equal Weight or Underweight (see definitions below) relative to other companies covered by the analyst or a team of analysts that are deemed to be in the same industry (the "industry coverage universe").

In addition to the stock rating, we provide industry views which rate the outlook for the industry coverage universe as Positive, Neutral or Negative (see definitions below). A rating system using terms such as buy, hold and sell is not the equivalent of our rating system. Investors should carefully read the entire research report including the definitions of all ratings and not infer its contents from ratings alone.

**Stock Rating**

**Overweight** - The stock is expected to outperform the unweighted expected total return of the industry coverage universe over a 12-month investment horizon.

**Equal Weight** - The stock is expected to perform in line with the unweighted expected total return of the industry coverage universe over a 12-month investment horizon.

**Underweight** - The stock is expected to underperform the unweighted expected total return of the industry coverage universe over a 12-month investment horizon.

**Rating Suspended** - The rating and target price have been suspended temporarily due to market events that made coverage impracticable or to comply with applicable regulations and/or firm policies in certain circumstances including where the Corporate and Investment Banking Division of Barclays is acting in an advisory capacity in a merger or strategic transaction involving the company.

**Industry View**

**Positive** - industry coverage universe fundamentals/valuations are improving.

**Neutral** - industry coverage universe fundamentals/valuations are steady, neither improving nor deteriorating.

**Negative** - industry coverage universe fundamentals/valuations are deteriorating.

Below is the list of companies that constitute the "industry coverage universe":

**North America Utilities**

Alliant Energy (LNT)	Ameren Corp. (AEE)	American Electric Power (AEP)
American Water Works (AWK)	Aqua America (WTR)	Brookfield Infrastructure Partners LP (BIP)
Brookfield Infrastructure Partners LP (BIP_u.TO)	Brookfield Renewable Energy Partners LP (BEP_u.TO)	Brookfield Renewable Energy Partners LP (BEP)
Canadian Utilities Ltd. (CU.TO)	CenterPoint Energy Inc. (CNP)	CMS Energy (CMS)
Consolidated Edison (ED)	Dominion Resources (D)	DTE Energy (DTE)
Duke Energy (DUK)	Edison International (EIX)	Emera Inc. (EMA.TO)
Eversource Energy (ES)	Fortis Inc. (FTS.TO)	Great Plains Energy Inc. (GXP)
Hawaiian Electric Inds (HE)	Integrus Energy Group Inc. (TEG)	ITC Holdings (ITC)
National Grid Plc (NGG)	National Grid Plc (NG.L)	NiSource, Inc. (NI)
OGE Energy Corp. (OGE)	Pepco Holdings (POM)	PG&E Corp. (PCG)
Pinnacle West Capital (PNW)	PNM Resources (PNM)	Portland General Electric Co. (POR)
PPL Corporation (PPL)	SCANA Corp. (SCG)	Sempra Energy (SRE)
Southern Co. (SO)	TECO Energy (TE)	Westar Energy (WR)
Wisconsin Energy (WEC)	Xcel Energy (XEL)	

**Distribution of Ratings:**

Barclays Equity Research has 2681 companies under coverage.

43% have been assigned an Overweight rating which, for purposes of mandatory regulatory disclosures, is classified as a Buy rating; 55% of companies with this rating are investment banking clients of the Firm.

41% have been assigned an Equal Weight rating which, for purposes of mandatory regulatory disclosures, is classified as a Hold rating; 46% of companies with this rating are investment banking clients of the Firm.

14% have been assigned an Underweight rating which, for purposes of mandatory regulatory disclosures, is classified as a Sell rating; 43% of companies with this rating are investment banking clients of the Firm.

## IMPORTANT DISCLOSURES CONTINUED

### Guide to the Barclays Research Price Target:

Each analyst has a single price target on the stocks that they cover. The price target represents that analyst's expectation of where the stock will trade in the next 12 months. Upside/downside scenarios, where provided, represent potential upside/potential downside to each analyst's price target over the same 12-month period.

### Top Picks:

Barclays Equity Research's "Top Picks" represent the single best alpha-generating investment idea within each industry (as defined by the relevant "industry coverage universe"), taken from among the Overweight-rated stocks within that industry. Barclays Equity Research publishes global and regional "Top Picks" reports every quarter and analysts may also publish intra-quarter changes to their Top Picks, as necessary. While analysts may highlight other Overweight-rated stocks in their published research in addition to their Top Pick, there can only be one "Top Pick" for each industry. The current list of Top Picks is available on <https://live.barcap.com/go/RSL/servlets/dv.search?pubType=4526&contentType=latest>.

To see a list of companies that comprise a particular industry coverage universe, please go to <http://publicresearch.barclays.com>.

J: Barclays Bank PLC and/or an affiliate trades regularly in the securities of Fortis Inc..

**Valuation Methodology:** Our C\$42 price target for Fortis is premised upon a sum-of-the-parts (SOTP) methodology. We apply a 16% premium to the 2017 US regulated utility multiple of 15.7x our Canadian utility operations '16E EPS of C\$1.57. We apply the straight '16E multiple of 15.7x our US Utility operations '16E EPS of C\$0.77. For Caribbean operations we use the publically traded Caribbean Utilities Corporation '17 multiple of 15.7x based upon consensus estimates. We apply this to our Caribbean '16E EPS of C\$0.17. For unregulated generation we use a '17 power multiple of 17.2x our '17E EPS of C\$0.10. For corporate and other, we use the straight '17E US regulated utility multiple of 15.7x our (C\$0.26) EPS for the segment. To this we add a valuation for the upside related to LNG opportunities of C\$0.23 in 2018 discounted to 2017 at a 10% discount rate and applying a 15.7x multiple and a 50% probability of completion.

**Risks which May Impede the Achievement of the Barclays Research Price Target:** Regulatory environments in several Canadian provinces including British Columbia, Alberta, Newfoundland & Labrador, Ontario, and Prince Edward Island. Overall economic and sales growth through the company's various service territories. Execution of large scale capital projects on time and on budget. Real estate valuations, especially in the Atlantic Provinces of Canada.

# FORTIS INC.

## Reports 11<sup>th</sup> Consecutive Record Annual Earnings

### Highlights

- Fortis reported record annual earnings of \$285 million, or \$1.65 per common share, for the year ended December 31, 2010, compared to \$262 million, or \$1.54 per share, in 2009. The 8.8% y/y growth in earnings was boosted by the strong performance of the regulated electric utilities in Canada, and the Company's non-regulated hydroelectric generation segment.
- The Canadian Regulated Electric Utilities (primarily FortisAlberta, FortisBC and Newfoundland Power) delivered \$164 million of the year's overall earnings, a year-over-year improvement of more than 10%. The strong results in that segment were helped by an increase in electrical infrastructure investment and the increase in allowable ROE at FortisBC effective January 1, 2010.
- We are confident the Company's management remains disciplined and patient in its pursuit of an accretive acquisition opportunity to add a regulated utility, in the United States or Canada, to its portfolio.
- We are maintaining our 12-month target price of \$34.00 and our HOLD rating on the name.** Our valuation is based on analysis of P/E and EV/EBITDA multiples and our dividend discount model. Our target equates to 19.6x 2011E EPS and 10.2x 2011E EV/EBITDA. Including dividends, there is a potential return of approximately 4% over the next year, which justifies our HOLD rating. The shares currently yield 3.3%.

### Company Description

Fortis Inc. is Canada's largest investor-owned distribution utility, with more than two million gas and electricity customers. The Company is headquartered in St. John's, NL. Its main focus is the ownership and operation of regulated utilities, with operations in five provinces and three Caribbean countries. Fortis also owns and operates non-regulated generation assets and commercial real estate and hotel assets.

\*Please view the disclaimer at the end of this report

## Financial Results

**Fortis Inc. reported a 4.9% y/y growth in Q4/10 consolidated net earnings attributable to common equity of \$85 million, or \$0.49 per share, compared to \$81 million, or \$0.48 per share in Q4/09**

- **Fortis Inc. reported record annual results for fiscal 2010 with consolidated net earnings attributable to common equity shareholders of \$285 million, or \$1.65 per share, compared to \$262 million, or \$1.54 per share, in 2009.** This represents the 11<sup>th</sup> consecutive year of record earnings for the Company. The 8.8% y/y growth in 2010 earnings was supported by strength in the Canadian Regulated Utilities and non-regulated hydroelectric generation segments, which more than offset pressures in the Caribbean Regulated Electric Utilities and higher corporate expenses. Fortis also delivered good Q4 results with a 4.9% y/y growth in earnings to reach \$85 million in the quarter. Below is a summary of the key drivers in each of the Company's businesses.

### Exhibit 1: Results Summary (in Canadian dollars)

	Q4 2010	Q4 2009	2010	2009
Net Earnings Applicable to Common Shares (\$M)	\$85	\$81	\$285	\$262
Reported Basic EPS	\$0.49	\$0.48	\$1.65	\$1.54
Reported Diluted EPS	\$0.47	\$0.46	\$1.62	\$1.51

Source: Company reports, Beacon Securities.

**The Canadian Regulated Electric Utilities (primarily FortisAlberta, FortisBC and Newfoundland Power) delivered \$164 million of the year's overall earnings, a year-over-year improvement of more than 10%**

- The **Terasen Gas** companies reported an 11% y/y growth in earnings to reach \$130 million for the year. However, almost \$9 million of the \$13 million in earnings growth was attributed to a reversal of a provision taken in Q4/09 for project cost overruns. The reversal was approved by the regulator. The Company also saw a boost to earnings due to an increase to the allowable ROE at Terasen Gas effective July 1, 2009 and an increase in the common equity thickness effective January 1, 2010.
- The Canadian Regulated Electric Utilities (primarily FortisAlberta, FortisBC and Newfoundland Power) delivered \$164 million of the year's overall earnings, a year-over-year improvement of more than 10%. The strong results in that segment were helped by an increase in electrical infrastructure investment and the increase in allowable ROE at FortisBC effective January 1, 2010.
- **FortisAlberta** reported 2010 earnings of \$68 million, almost 13% higher than last year's \$60 million. The improved results at the Western Canada utility were primarily driven by higher allowed ROE, higher energy deliveries and an increase in customers. These were partially offset by slightly lower than average consumption in the residential customer base.
- **FortisBC** improved its earnings by 14% y/y to reach \$42 million for the year compared to \$37 million in 2009. The

increase was primarily due to a 6% increase in customer electricity rates, effective January 1, 2010, reflecting increased allowed ROE of 9.90% for 2010, compared to 8.87% in 2009. This was slightly offset by a 3.5% decrease in annual electricity sales.

- **Newfoundland Power** also improved its earnings by more than 9% to reach \$35 million for the year, compared to \$32 million in 2009. Customer growth drove the improved results, however lower average consumption due to milder temperatures and lower activity in the commercial sector offset some of that growth.
- **Regulated Electric Utilities-Caribbean** delivered weaker earnings of \$23 million for the year, compared to \$27 million in 2009. This segment was the key drag on overall results, primarily due to lower consumption driven by lower average temperatures experienced on Grand Cayman and Turks and Caicos Islands and Belize. This was offset slightly by some customer growth in Belize and Turks and Caicos Islands.
- Earnings from **Fortis Generation** were up 25% to reach \$20 million for the year, compared to \$16 million in 2009. The results were boosted by higher rainfall and the commissioning of Vaca hydroelectric generating facility in Belize in March 2010. Higher production in Upper New York State, Ontario and British Columbia was also experienced due to higher rainfall.
- **Fortis Properties** earnings came at \$26 million, compared to \$24 million in 2009. The results were primarily due to higher revenue from hotel properties in Atlantic Canada and offset by slightly lower occupancy rates in the Real Estate division.
- **Corporate and other expenses** came in at \$78 million for the year, compared to \$71 million in 2009. The increase in dividends associated with the First Preference Shares, Series H issued in January 2010 was partially offset by lower finance charges.

**Exhibit 2:** Segmented Results (in Canadian dollars)

	Q4 2010	Q4 2009	2010	2009
Terasen Gas Companies	\$45	\$48	\$130	\$117
FortisAlberta	\$17	\$15	\$68	\$60
FortisBC	\$10	\$8	\$42	\$37
Newfoundland Power	\$9	\$8	\$35	\$32
Other Canadian Electric Utils	\$5	\$7	\$19	\$20
Regulated Electric Utils - Caribbean	\$5	\$7	\$23	\$27
Non-Regulated - Fortis Generation	\$5	\$2	\$20	\$16
Non-Regulated - Fortis Properties	\$7	\$5	\$26	\$24
Corporate and Other	-\$18	-\$19	-\$78	-\$71
<b>Total</b>	<b>\$85</b>	<b>\$81</b>	<b>\$285</b>	<b>\$262</b>

Source: Company reports, Beacon Securities.

- Cash flow from operations grew almost 23% y/y to reach \$783 million in 2010, largely driven by the strong earnings, increased amortization costs and improved working capital management. Gross capital expenditures reached almost \$1.1 billion in 2010 as the Company continues to aggressively invest in its infrastructure assets.

### **Outlook and Financial Forecast**

We have updated our model to better reflect results from FortisAlberta, FortisBC and Newfoundland Power. We have tempered our expectation for the Caribbean utilities slightly and increase our estimates for Fortis Generation and maintained our forecasts for Fortis Properties. Exhibit 3 shows our updated forecast for overall EBITDA, net income and EPS.

**Exhibit 3:** Beacon Securities' Updated Forecast (in Canadian dollars)

	2010A	2011E - New	2011E - Old
EBITDA (\$M)	\$1,150	\$1,191	\$1,233
<b>Net Income (\$M)</b>	<b>\$285</b>	<b>\$302</b>	<b>\$311</b>
EPS ( <i>basic</i> )	\$1.65	\$1.74	\$1.80
<b>EPS (<i>diluted</i>)</b>	<b>\$1.62</b>	<b>\$1.68</b>	<b>\$1.79</b>

Source: Company reports, Beacon Securities.

Long-term debt increased slightly to end 2010 at \$5.6 billion, compared to \$5.3 billion at the end of 2009. Fortis continues to have strong access to capital markets, to finance its future capital programs. We expect the Company to continue to invest in infrastructure and estimated gross capital expenditures for 2011 to reach nearly \$1.2 billion. Management also plans to spend almost \$5.5 billion on further capex projects over the next five years, including the work related to the Waneta Expansion Project.

### **Valuation and Recommendation**

***We are maintaining our 12-month target price of \$34.00 and our HOLD rating on the name***

**We are maintaining our 12-month target price of \$34.00 and our HOLD rating on the name.** Our valuation is based on analysis of P/E and EV/EBITDA multiples and our dividend discount model. Our target equates to 19.6x 2011E EPS and 10.2x 2011E EV/EBITDA. Including dividends, there is a potential return of approximately 4% over the next year, which justifies our HOLD rating. The dividend currently yields 3.3%.

We are confident the Company's management remains disciplined and patient in its pursuit of an accretive acquisition opportunity to add a regulated utility, in the United States or Canada, to its portfolio. We have not included any acquisitions in our numbers, primarily due to the uncertainty on the timing of such an acquisition.

**Key Risks**

- **Interest Rate Risk** – The capital requirements outlined by the Company will likely require additional debt financing.
- **International Risk** – With operations in Belize, the Cayman Islands, and the Turks and Caicos, Fortis is subject to currency risk, sovereign risk, and the risk of hurricanes.
- **Regulatory Risk** – Regulated assets consist of 92% of Fortis' total assets, with each of the regulated utilities subject to some form of regulation which can impact future revenue and earnings. Each operating utility must ensure compliance with current regulations and proactive measures towards regulatory issues.
- **Risk of Fluctuating Bond Yields** – The share price of Fortis is inversely related to bond yields. Furthermore, lower bond yields may result in Fortis having to lower the rates for certain subsidiaries, thereby hampering earnings.

# FORTIS INC.

## Healthy Economic Activity in Western Canada Driving Fortis' Performance

### Highlights

- **Fortis reported strong Q1/2011 earnings of \$117 million, or \$0.65 per common share, compared to \$100 million, or \$0.58 per share, in Q1/2010.** The 17.0% y/y growth in earnings was driven by the Company's regulated utilities in Western Canada.
- **FortisAlberta grew its quarterly earnings by 50% y/y.** Results were primarily driven by customer electricity rate growth and growth in electricity sales. FortisBC also delivered strong quarterly earnings which grew 34% y/y largely due to increased electricity rates and continued investment in utility infrastructure. **The Company also maintained its expectation to invest \$5.5 billion on capex initiatives over the next five years.**
- We believe the Company's management remains disciplined and patient in its pursuit of an accretive regulated utility acquisition, in the United States or Canada. We believe current valuations dictate additional patience in order to prevent overpayment for desired targets. We have not included any acquisitions in our numbers, primarily due to the uncertainty on the timing of such an acquisition.
- **We are maintaining our 12-month target price of \$34.00 and our HOLD rating on the name.** Our valuation is based on analysis of P/E and EV/EBITDA multiples and our dividend discount model. Our target equates to 19.4x 2011E EPS and 10.3x 2011E EV/EBITDA. Including dividends, there is a potential return of approximately 8.7% over the next year, which justifies our HOLD rating. The shares currently yield 3.6%.

2012E: new

### Company Description

Fortis Inc. is Canada's largest investor-owned distribution utility, with more than two million gas and electricity customers. The Company is headquartered in St. John's, NL. Its main focus is the ownership and operation of regulated utilities, with operations in five provinces and three Caribbean countries. Fortis also owns and operates non-regulated generation assets and commercial real estate and hotel assets.

\*Please view the disclaimer at the end of this report

## Financial Results

*Fortis Inc. reported a 17.0% y/y growth in Q1/2011 consolidated net earnings attributable to common equity of \$117 million, or \$0.67 per share, compared to \$100 million, or \$0.58 per share in Q1/2010*

- Fortis Inc. reported strong Q1/2011 results with consolidated net earnings attributable to common equity shareholders of \$117 million, or \$0.67 per common share, compared to \$100 million, or \$0.58 per share, in Q1/2010. The 17.0% y/y growth in Q1 earnings was largely driven by strength in the Company's regulated utilities in western Canada. Below is a summary of the contribution from each of the Company's business segments in the quarter compared to the same period last year.

### Exhibit 1: Consolidated net earnings summary

(in millions of Canadian dollars, except per share data)	Q1 2011	Q1 2010
<b>Net Earnings Applicable to Common Shares (\$M)</b>	<b>\$117</b>	<b>\$100</b>
<b>Reported Basic EPS</b>	<b>\$0.67</b>	<b>\$0.58</b>
<b>Reported Diluted EPS</b>	<b>\$0.65</b>	<b>\$0.56</b>

*Effective March 1, 2011, the Company's Canadian Regulated Gas Utilities, the Terasen Gas companies, were renamed FortisBC Energy Inc.*

- Effective March 1, 2011, the Company's Canadian Regulated Gas Utilities, the **Terasen Gas** companies, were renamed **FortisBC Energy Inc.** These Gas Utilities grew earnings by 4.1% y/y to reach \$76 million in the first quarter. The strength was driven by growth in utility infrastructure investment, reduced amortization costs and higher capitalized finance charges. This was partially offset by an increase in operating expenses. Management also commented positively on the heightened focus on natural gas and its potential use for transportation in North America. Key contributors to FortisBC Energy's strong performance in the quarter were higher average consumption by residential and commercial customers driven by cooler weather, and higher transportation volumes driven by increased economic activity, especially in the forestry sector.

*FortisBC Energy's strong performance in the quarter was supported by higher transportation volumes driven by increased economic activity, especially in the forestry sector*

### Exhibit 2: Segmented net earnings

(in millions of Canadian dollars)	Q1 2011	Q1 2010
<b>FortisBC Energy Inc. (formerly Terasen Gas)</b>	<b>\$76</b>	<b>\$73</b>
<b>FortisAlberta</b>	<b>\$21</b>	<b>\$14</b>
<b>FortisBC Electric</b>	<b>\$19</b>	<b>\$14</b>
<b>Newfoundland Power</b>	<b>\$7</b>	<b>\$7</b>
<b>Other Canadian Electric Utils</b>	<b>\$6</b>	<b>\$5</b>
<b>Electric Caribbean</b>	<b>\$4</b>	<b>\$4</b>
<b>Non-Regulated - Fortis Generation</b>	<b>\$3</b>	<b>\$2</b>
<b>Non-Regulated - Fortis Properties</b>	<b>\$1</b>	<b>\$2</b>
<b>Corporate and Other</b>	<b>-\$20</b>	<b>-\$21</b>
<b>Total</b>	<b>\$117</b>	<b>\$100</b>

Source: Company reports, Beacon Securities.

- The Canadian Regulated Electric Utilities delivered 32% y/y growth in earnings, to reach \$53 million (primarily driven by FortisAlberta, and FortisBC Electric.)

***FortisAlberta's performance was largely supported by a 4.7% increase in base customer electricity distribution rates over final approved 2010 rates, growth in customer base and higher energy deliveries***

- **FortisAlberta's** quarterly earnings grew by 50% y/y, to reach \$21 million. The improvements were largely supported by a 4.7% increase in base customer electricity distribution rates over final approved 2010 rates, growth in customer base and higher energy deliveries. The segment's results were also boosted by a \$1 million gain from the sale of property.
- **FortisBC Electric** quarterly earnings grew 36% y/y, to reach \$19 million. The improvements were largely supported by a 6.6% increase in customer electricity rates and a 10.4% increase in electricity sales as well as continued investment in utility infrastructure. This was slightly offset by lower pole attachment revenue and an increase in incentive adjustments owed to customers.
- **Newfoundland Power** delivered flat y/y growth with quarterly earnings of \$7 million. The growth in the number of customers and higher average consumption were offset by the decrease in allowed ROE and higher maintenance costs and higher labour costs in the quarter.
- **Regulated Electric Utilities-Caribbean** quarterly earnings of \$4 million were also flat on a year-over-year basis. Key contributors to the segment's performance were increased electricity sales in Grand Cayman and lower maintenance costs at Caribbean Utilities in the quarter. These were offset by higher provisions for bad debt at Belize Electricity and higher finance charges at that same utility, due to interest expense on regulatory liabilities.

***Fortis Generation grew to \$3 million in the quarter, compared to \$2 million in Q1/2010, mainly due to higher production in Belize and higher average energy sales rates in Ontario.***

- Earnings from **Fortis Generation** grew to \$3 million in the quarter, compared to \$2 million in Q1/2010, mainly due to higher production in Belize and higher average energy sales rates in Ontario. Higher finance charges dampened earnings slightly.
- **Fortis Properties** earned \$1 million in the quarter, compared to \$2 million in Q1/2010, primarily due to the negative impact of economy on hotel operations and higher amortization costs driven by capital investments in Hospitality and Real Estate divisions. The segment benefited, however, from a gain on the sale of the Viking Mall.
- **Corporate and other expenses** came in at \$20 million for the quarter, compared to \$21 million in Q1/2010. The increase in dividends associated with the First Preference Shares, Series H issued in January 2010 and lower corporate tax recovery in the quarter, was partially offset by reduced operating expenses, lower finance charges and lower amortization costs.
- Cash flow from operations, before changes in non-cash operating working capital, also grew nearly 19% y/y to reach

**The Company is continuing work on the \$126 million Automated Meter Project at FortisAlberta and the \$106 million Okanagan Transmission Reinforcement Project at FortisBC Electric**

**Fortis' \$900 million Waneta Expansion Project is expected to be completed in the spring of 2015**

\$242 million in Q1/2010 largely driven by strong net earnings. Gross capital expenditures reached almost \$233 million in Q1/2010 as the Company continues to aggressively invest in its infrastructure assets, including the construction of the \$214 million liquefied natural gas (LNG) storage facility on Vancouver Island, which is expected to be completed in the next several weeks. The Company is also continuing work on the \$126 million Automated Meter Project at FortisAlberta and the \$106 million Okanagan Transmission Reinforcement Project at FortisBC Electric. Work is also continuing on the \$900 million Waneta Expansion Project which is expected to be completed in the spring of 2015.

### **Outlook and Financial Forecast**

We have updated our model to reflect the strong Q1/2010 performance. We expect the Company's operation in western Canada, namely its regulated utilities FortisAlberta, and FortisBC Electric to continue to benefit from the region's healthy economic activity. We have tempered our expectation for the Caribbean utilities slightly and increase our estimates for Fortis Generation but maintained our forecasts for Fortis Properties. Exhibit 3 shows our updated forecast for overall EBITDA, net income and EPS.

**Exhibit 3: Beacon Securities' Updated Forecast (in Canadian dollars)**

	2010A	2011E - New	2011E - Old	2012E - New
EBITDA (\$M)	\$1,150	\$1,172	\$1,191	\$1,251
<b>Net Income (\$M)</b>	<b>\$285</b>	<b>\$307</b>	<b>\$302</b>	<b>\$320</b>
EPS (basic)	\$1.65	\$1.75	\$1.74	\$1.83
<b>EPS (diluted)</b>	<b>\$1.62</b>	<b>\$1.70</b>	<b>\$1.68</b>	<b>\$1.78</b>

Source: Company reports, Beacon Securities.

Long-term debt remained flat q/q at \$5.6 billion, but increase from \$5.1 billion at the end of Q1/2010. We believe Fortis continues to have strong access to capital markets, to finance its future capital programs. The Company maintained its expectation to continue to invest in its infrastructure and reiterated its \$5.5 billion estimate of gross capital expenditures on various projects over the next five years, including the work related to the Waneta Expansion Project.

### **Valuation and Recommendation**

***We are maintaining our 12-month target price of \$34.00 and our HOLD rating on the name***

**We are maintaining our 12-month target price of \$34.00 and our HOLD rating on the name.** Our valuation is based on analysis of P/E and EV/EBITDA multiples and our dividend discount model. Our target equates to 19.4x 2011E EPS and 10.3x 2011E EV/EBITDA. Including dividends, there is a potential return of approximately 8.7% over the next year, which justifies our HOLD rating. The shares currently yield 3.6%.

We believe the Company's management remains disciplined and patient in its pursuit of an accretive regulated utility acquisition, in the United States or Canada. We believe current valuations dictate additional patience in order to prevent overpayment for desired targets. We have not included any acquisitions in our numbers, primarily due to the uncertainty on the timing of such an acquisition.

### **Key Risks**

- **Interest Rate Risk** – The capital requirements outlined by the Company will likely require additional debt financing.
- **International Risk** – With operations in Belize, the Cayman Islands, and the Turks and Caicos, Fortis is subject to currency risk, sovereign risk, and the risk of hurricanes.
- **Regulatory Risk** – Regulated assets consist of 92% of Fortis' total assets, with each of the regulated utilities subject to some form of regulation which can impact future revenue and earnings. Each operating utility must ensure compliance with current regulations and proactive measures towards regulatory issues.
- **Risk of Fluctuating Bond Yields** – The share price of Fortis is inversely related to bond yields. Furthermore, lower bond yields may result in Fortis having to lower the rates for certain subsidiaries, thereby hampering earnings.

# FORTIS INC.

## Infrastructure Investments Keep Performance Strong in Q2/2011

### Highlights

- Fortis Inc. reported another strong quarter with the release of its Q2/2011 results today. Consolidated net earnings attributable to common equity shareholders were \$58 million, or \$0.33 per common share, compared to \$55 million, or \$0.32 per share, in Q2/2010. Overall EBITDA margins also improved to 32.8%, up 90 bps from the same quarter, a year ago. **Fortis also generated impressive cash flow from operations in the first half of 2011, reaching \$527 million, up \$122 million or 30% from the first half of 2010.**
- We continue to expect the Company's operation in western Canada, namely its regulated utilities FortisBC Electric and FortisAlberta to continue to benefit from the region's sound fundamentals and healthy customer demand.
- Capital expenditures totaled \$519 million in first half of 2011 as the Company continues to aggressively invest in its infrastructure assets. **The Company is on track to invest over \$1.2 billion in 2011.** By the end of 2015, we expect the Company to have invested close to \$5.7 billion on its capex program.
- We are maintaining our 12-month target price of \$34.00 and our HOLD rating on the name.** Our valuation is based on analysis of P/E and EV/EBITDA multiples and our dividend discount model. Our target equates to 19.1x 2012E EPS and 9.8x 2012E EV/EBITDA. Including dividends, there is a potential return of approximately 14% over the next year, which justifies our HOLD rating. The shares currently yield 3.8%.

## Financial Results

*Fortis Inc. reported another strong quarter with the release of its Q2/2011 results today. Consolidated net earnings attributable to common equity shareholders were \$58 million, or \$0.33 per common share, compared to \$55 million, or \$0.32 per share, in Q2/2010*

- **Fortis Inc. reported another strong quarter with the release of its Q2/2011 results today. Consolidated net earnings attributable to common equity shareholders were \$58 million, or \$0.33 per common share, compared to \$55 million, or \$0.32 per share, in Q2/2010, and slightly below our \$0.36 EPS estimate.** Net earnings growth in the quarter was primarily driven by 1) the strong results in the Company's regulated utilities in western Canada, primarily related to overall growth in the utility infrastructure investments, 2) lower market-priced purchased power costs at FortisBC, and 3) additional return earned on FortisAlberta's investment in automated meters. Overall EBITDA margins also improved to 32.8%, up 90 bps from the same quarter a year ago. Fortis also generated impressive cash flow from operations in the first half of 2011, reaching \$527 million, up \$122 million or 30% from the first half of 2010. In addition to higher earnings, the growth in cash flows was largely driven by the collection from customers of higher amortization costs and favourable changes in working capital and regulatory deferral accounts. Exhibit 1 shows a summary of Fortis' consolidated net earnings for the quarter.

### Exhibit 1: Consolidated net earnings summary

(in millions of Canadian dollars, except per share data)	Q2 2011	Q2 2010
<b>Net Earnings Applicable to Common Shares (\$M)</b>	<b>\$58</b>	<b>\$55</b>

<b>Reported Diluted EPS</b>	<b>\$0.33</b>	<b>\$0.32</b>

Source: Company reports, Beacon Securities.

*FortisBC Energy Inc. results were slightly negatively impacted by lower natural gas volumes under fixed contracts, mainly due to higher precipitation and lower natural gas pricing charged to customers*

Below is a summary of the contribution from each of the Company's business segments in the quarter compared to the same period last year.

- **FortisBC Energy Inc.** results were slightly negatively impacted by lower natural gas volumes under fixed contracts, mainly due to higher precipitation and lower natural gas pricing charged to customers. Revenues and net earnings in the segment were \$320 million and \$15 million, respectively, in Q2/2011, compared to revenues of \$336 million and net earnings of \$17 million in Q2/2010.
- The Company's Canadian Regulated Electric Utilities delivered 12.5% y/y growth in earnings, to reach \$45 million, again driven by FortisAlberta, and FortisBC Electric, similar to Q1/2011.
- **FortisAlberta's** quarterly earnings grew to reach \$19 million in Q2/2011, compared to \$17 million in Q2/2011. The

**FortisAlberta's quarterly earnings grew to reach \$19 million in Q2/2011, compared to \$17 million in Q2/2010. Meanwhile, FortisBC Electric quarterly earnings grew 12.5% y/y, to reach \$9 million**

improvements in the quarter were largely due to growth in the number of total customers by approximately 9,400 over the same quarter last year.

- **FortisBC Electric** quarterly earnings grew 12.5% y/y, to reach \$9 million. The improvements were largely supported by the 6.6% increase in customer electricity rates and a 1.4% increase in electricity sales in the quarter. This was slightly offset by lower pole attachment revenue and an increase in incentive adjustments owed to customers.
- **Newfoundland Power** delivered flat y/y growth with quarterly earnings of \$11 million. The growth in the number of customers and higher average consumption were offset by the decrease in allowed ROE and wage increases.
- **Other Canadian Electric Utilities** grew quarterly earnings to reach \$6 million in Q2/2011, compared to \$4 million in Q2/2010. The growth was driven primarily by an average 3.8% increase in customer electricity rates, and higher allowed ROE at Algoma Power.

#### Exhibit 2: Segmented net earnings

(in millions of Canadian dollars)	Q2 2011	Q2 2010
<b>FortisBC Energy Inc.</b> (formerly Terasen Gas)	\$15	\$17
<b>FortisAlberta</b>	\$19	\$17
<b>FortisBC Electric</b>	\$9	\$8
<b>Newfoundland Power</b>	\$11	\$11
<b>Other Canadian Electric Utils</b>	\$6	\$4
<b>Electric Caribbean</b>	\$7	\$7
<b>Non-Regulated - Fortis Generation</b>	\$2	\$3
<b>Non-Regulated - Fortis Properties</b>	\$7	\$8
<b>Corporate and Other</b>	-\$18	-\$20
<b>Total</b>	<b>\$58</b>	<b>\$55</b>

Source: Company reports, Beacon Securities.

**Fortis Properties earned \$7 million in the quarter, compared to \$8 million in Q2/2010, primarily due to a 2.2% decrease in hotel occupancy, mainly in Western Canada**

- **Regulated Electric Utilities-Caribbean** quarterly earnings of \$7 million were flat on a year-over-year basis. This was primarily driven by lower electricity sales in Grand Cayman, and the discontinuance of consolidation method accounting for financial results of Belize Electricity, effective June 20, 2011. These were offset by lower corporate taxes at Belize Electricity and a commercial customer billing adjustment at Caribbean Utilities.
- Earnings from **Fortis Generation** declined to \$2 million in the quarter, compared to \$3 million in Q2/2010, mainly due to decreased production in Belize and higher finance charges in the quarter.
- **Fortis Properties** earned \$7 million in the quarter, compared to \$8 million in Q2/2010, primarily due to a 2.2% decrease in hotel occupancy, mainly in Western Canada. This was slightly

offset by an overall 2.0% increase in the average daily room rate. The Real Estate division's occupancy rate decreased to 93.4% as at June 30, 2011, from 94.8% at the end of the same period last year.

**FortisBC Energy**  
substantially completed  
the construction of its  
\$214 million liquefied  
natural gas (LNG)  
storage facility on  
Vancouver Island

**FortisAlberta**  
substantially completed  
its \$126 million  
Automated Meter  
Project, including the  
replacement of 466,000  
conventional meters

**Fortis' \$900 million  
Waneta Expansion  
Project is expected to be  
completed in the spring  
of 2015**

- **Corporate and other expenses** came in at \$18 million for the quarter, compared to \$20 million in Q2/2010. Last year, the Company incurred higher business development costs in Q2. In the quarter, the Company also incurred lower finance charges, largely due to the redemption of the \$125 million 8% Capital Securities in April 2010 and a favourable foreign exchange impact, which were slightly offset by lower corporate tax recoveries.
- Gross capital expenditures totaled \$519 million in first half of 2011 as the Company continues to aggressively invest in its infrastructure assets. In the quarter, FortisBC Energy substantially completed the construction of its \$214 million liquefied natural gas (LNG) storage facility on Vancouver Island. At the same time, FortisAlberta substantially completed its \$126 million Automated Meter Project, including the replacement of 466,000 conventional meters. In the meantime, work continues to progress on the \$900 million Waneta Expansion Project, which is expected to be completed in the spring of 2015.
- The Company's merger agreement with Central Vermont Public Service Corporation (CVPS) was terminated in July, subsequent to quarter end. According to the terms of the agreement, CVPS paid Fortis a US\$17.5 million termination fee plus US\$2 million for expenses.

### **Outlook and Financial Forecast**

We believe Fortis Inc. is on track to complete \$1.2 billion in capital expenditures in 2011, primarily in infrastructure projects across its Western Canada businesses. By the end of 2015, we expect the Company to have invested close to \$5.7 billion on its capex program. We continue to expect the Company's operation in western Canada, namely its regulated FortisBC Electric and FortisAlberta utilities to continue to benefit from the region's sound fundamentals and healthy customer demand. Our updated model reflects the latest Q2/2011 results. Exhibit 3 shows our updated forecast for overall EBITDA, net income and EPS.

**Exhibit 3:** Beacon Securities' Updated Forecast (in Canadian dollars)

	2011E - New	2011E - Old	2012E - New	2012E - Old
EBITDA (\$M)	\$1,170	\$1,172	\$1,249	\$1,251
Net Income (\$M)	\$298	\$307	\$314	\$320

### **Valuation and Recommendation**

***We are maintaining our 12-month target price of \$34.00 and our HOLD rating on the name***

**We are maintaining our 12-month target price of \$34.00 and our HOLD rating on the name.** Our valuation is based on analysis of P/E and EV/EBITDA multiples and our dividend discount model. Our target equates to 19.1x 2012E EPS and 9.8x 2012E EV/EBITDA. Including dividends, there is a potential return of approximately 14% over the next year, which justifies our HOLD rating. The shares currently yield 3.8%.

The Company continues to remain disciplined and patient in its pursuit of an accretive regulated utility acquisition, in the United States or Canada. Current valuations seem to be making it difficult to not overpay for desired targets. We have not included any acquisitions in our numbers, primarily due to the uncertainty on the timing of such an acquisition.

### **Key Risks**

- **Interest Rate Risk** – The capital requirements outlined by the Company will likely require additional debt financing.
- **International Risk** – With operations in Belize, the Cayman Islands, and the Turks and Caicos, Fortis is subject to currency risk, sovereign risk, and the risk of hurricanes.
- **Regulatory Risk** – Regulated assets consist of 92% of Fortis' total assets, with each of the regulated utilities subject to some form of regulation which can impact future revenue and earnings. Each operating utility must ensure compliance with current regulations and proactive measures towards regulatory issues.
- **Risk of Fluctuating Bond Yields** – The share price of Fortis is inversely related to bond yields. Furthermore, lower bond yields may result in Fortis having to lower the rates for certain subsidiaries, thereby hampering earnings.

## Q4/10 Below Slightly Below Expectations; Long-Term Growth Profile Remains Intact

### Event

Fortis reported Q4/10 EPS of \$0.49, which was slightly below our estimate of \$0.53 and the First Call Mean estimate of \$0.51. The difference between actual and expected results largely stemmed from lower-than-expected earnings at FortisAlberta, Terasen Gas and FortisCaribbean, partially offset by lower-than-expected corporate costs. Capital spending for 2010 of \$1.1 billion was in line with our forecast. For 2011, Fortis is forecasting capital expenditures of \$1.2 billion and expects to invest \$5.5 billion in capital projects over the next five years.

### Impact

Neutral. Overall, this appeared to be a very clean quarter. Although Q4/10 results were slightly lower than expected, full-year adjusted 2010 earnings of \$281 million increased by 7.3% compared to adjusted earnings of \$262 million in 2009. This represents fairly significant earnings growth for a company whose primary business is the ownership and operation of regulated utilities.

### Forecasts

We have updated our model to reflect Q4/10 results. Our diluted EPS estimates of \$1.77 in 2011E and \$1.84 in 2012E are unchanged.

### Valuation

Our \$35.50 target price is based on a weighted valuation approach: 18x 2012E diluted EPS of \$1.84 (12.5%), 1.75x 2012E BVPS of \$20.86 (12.5%) and a target yield of 3.50%, assuming 2012E dividends per share of \$1.22 (75%).

### Recommendation

We believe Fortis's shares are attractively valued, considering the company's relatively low-risk, diversified business model. Our rating is Outperform.

## Q4/10 Results Below Expectations; Long-Term Growth Profile Remains Intact

Fortis reported Q4/10 EPS of \$0.49, which was slightly below our estimate of \$0.53 and the First Call Mean estimate of \$0.51. The difference between actual and expected results largely stemmed from lower-than-expected earnings at FortisAlberta, Terasen Gas and FortisCaribbean, partially offset by lower-than-expected corporate costs. Capital spending for 2010 of \$1.1 billion was in line with our forecast. For 2011, Fortis is forecasting capital expenditures of \$1.2 billion and the company expects to invest \$5.5 billion in capital projects over the next five years.

Although Q4/10 results were slightly lower than expected, full-year adjusted 2010 earnings of \$281 million increased by 7.3% compared to adjusted earnings of \$262 million in 2009. This represents fairly significant earnings growth for a company whose primary business is the ownership and operation of regulated utilities.

Our \$35.50 target price is based on a weighted valuation approach: 18x 2012E diluted EPS of \$1.84 (12.5%), 1.75x 2012E BVPS of \$20.82 (12.5%) and a target yield of 3.50%, assuming 2012E dividends per share of \$1.22 (75%).

Although Fortis' shares have appreciated recently, we believe that the company remains a compelling long-term investment. Fortis has shown an ability to consistently deliver relatively low-risk earnings and dividend growth. While the company's organic growth prospects are relatively well known, there are a number of potential catalysts that could positively impact Fortis' shares, including: (1) the potential acquisition of additional regulated utilities, either in the U.S. or Canada; and (2) the prospect of developing regulated transmission assets in Ontario. Accordingly, we are maintaining our Outperform rating.

## Where Do We Go From Here?

Fortis historically has grown through acquisition and its last major transaction was the acquisition of the Terasen Gas utilities, which was completed in May 2007. We expect Fortis to continue to review potential acquisition candidates, with the most likely targets regulated utilities operating in the U.S. Absent an acquisition, we believe that Fortis will continue to advance its capital expenditure program and seek out accretive greenfield/brownfield development opportunities. The company's announcement in late August that it had acquired a 51% interest in the partnership responsible for constructing the 335 MW Wanteta Dam expansion in Trail, B.C., is a good example of Fortis developing projects that complement its regulated utility operations.

Another potential area of growth is transmission investment in Ontario. In coming years, the transmission grid in Ontario will likely need reinforcement and require additional capacity in certain areas as additional renewable energy facilities are added to the grid. At the present time most transmission capacity in Ontario is owned by Hydro One (100% Government of Ontario); however, in August, the Ontario Energy Board issued the Framework for Transmission Project Development Plans (EB-2010-059), which sought to establish a competitive process for developing new transmission assets in Ontario. In advance of the possibility of large-scale

transmission development in Ontario being put out for tender, Fortis has entered into a joint venture with the First Nations' Lake Huron Anishinabek Transmission Company Inc. ("LHATC") to pursue the development of transmission assets in Ontario. Fortis will hold a minimum 51% interest in the joint venture and LHATC will have the opportunity to acquire up to a 49% interest in the joint venture. We expect the joint venture will bid on the following projects, should tenders be solicited: (1) a new 500 kV line that would run from Algoma/Sault Ste. Marie to Sudbury; and (2) reinforcement of the 500 kV line that runs from Sudbury to Barrie. While it remains to be seen whether Fortis will be successful in its quest to build out transmission in Ontario, we believe that the announcement of the joint venture is a positive development for the company.

## Revised Capital Expenditure Budget

Consistent with prior years, Fortis' fourth-quarter results contained a capital expenditure forecast. In 2011, Fortis expects to invest \$1.2 billion, with the majority of spending occurring at its regulated electric utilities. A comparison of forecast capital expenditures in 2011 and historical capital spending is set out in Table 1.

**Table 1: Capital Expenditure Forecast (\$mm)**

	2009A	2010A	2011E
<b>Regulated Gas Utilities - Canadian</b>			
Terasen Gas Companies	246	253	281
<b>Regulated Electric Utilities - Canadian</b>			
FortisAlberta	407	379	420
FortisBC	115	139	99
Newfoundland Power	74	78	73
Other Canadian	46	48	46
<b>Regulated Electric Utilities - Caribbean</b>	92	72	83
<b>Non-Regulated - Fortis Generation &amp; Corporate</b>	18	85	183
<b>Non-Regulated - Fortis Properties</b>	26	19	27
<b>Total</b>	<b>1,024</b>	<b>1,073</b>	<b>1,212</b>

Source: Company Reports

Fortis maintained capital expenditure guidance of \$5.5 billion over the next five years. The breakdown of this anticipated spending is as follows: 63% is expected to be spent at the regulated electric utilities, driven by FortisAlberta and Fortis BC; approximately 20% is expected to be spent by the Terasen entities; and 17% is expected to be incurred at the non-regulated entities.

## Regulatory Update

After a lull in 2010, we expect regulatory activity to increase in 2011. The Alberta Utilities Commission will hold two separate proceedings: (1) a generic cost of capital proceeding, including a full review of cost of capital and deemed capital structure; and (2) a review process designed to determine whether Alberta will adopt performance-based regulation. The 2011

Generic Cost of Capital Hearing is scheduled to begin on May 30, 2011. Utilities have been asked to file submissions regarding the potential implementation of Performance Based Regulation by March 31, 2011. A review process related to PBR is expected to begin after the submissions have been received by individual utilities.

In addition to the formal regulatory proceedings outlined above, a number of Fortis' utilities are expected to make rate or other filings in 2011:

- The Terasen entities are expected to pursue an amalgamation
- The Terasen entities may file a rate application for the years 2012–2013
- FortisAlberta is expected to submit a cost of service application for the years 2012–2013 by the end of Q1/2011
- Newfoundland Power may file an application to increase customer rates, effective for 2012.

## Q4/10 Results

As set out in Table 2, on a comparable basis, net income increased by 2.4% in Q4/10 versus Q4/09. In order to present results on a comparable basis, Q4/09 GAAP income was adjusted to reverse a \$5 million expense recorded regarding the cost of converting portions of the distribution system at Terasen Gas Whistler to utilize natural gas instead of propane. Terasen subsequently recovered \$4 million of this amount in Q3/10. Q4/09 GAAP earnings were also adjusted for a \$3 million non-recurring tax benefit recorded at the Other Canadian segment related to a future income tax recovery at FortisOntario.

**Table 2: Historical Q4 Income by Business Segment**

	Q4/10 GAAP Earnings (\$mm)	Adj. (\$mm)	Q4/10 Adjusted Earnings (\$mm)	Q4/09 GAAP	Adj. (\$mm)	Q4/09 Adjusted Earnings (\$mm)	Variance Q4/10 Adj vs. Q4/09 Adj	Variance %

Source: BMO Capital Markets, Company Reports

A discussion of the operating performance of each business segment follows.

## Regulated Gas Utilities – Terasen Gas Companies

Q4/10 net income of \$45 million was less than our estimate of \$50.9 million and Q4/09 adjusted net income of \$53 million. We attribute the majority of the variance to seasonality, as timing differences resulted in a higher proportion of expenses recorded in Q4/10 compared to

Q4/09. On an annual basis, adjusted net income increased by 3.3% to \$126 million in 2010 from \$122 million in 2009.

### **Regulated Electric Utilities – FortisAlberta**

Q4/10 net income of \$17 million was lower than our estimate of \$19.3 million but greater than Q4/09 net income of \$15 million.

Earnings in Q4/10 benefitted from an increase in customer distribution rates arising from the 2009 Alberta Utilities Commission (AUC) Generic Cost of Capital Hearing, which increased FortisAlberta's allowed ROE to 9% from 8.51% and increased the company's deemed equity thickness to 41% from 37%.

On an annual basis, net income increased by 13.3% to \$68 million in 2010 from \$60 million in 2009.

### **Regulated Electric Utilities – FortisBC**

Q4/10 net income of \$10 million was greater than Q4/09 net income of \$8 million but consistent with our estimate of \$9.9 million. The increase in earnings was largely driven by an increase in FortisBC's allowed ROE to 9.9% in 2010 from 8.87% in 2009 and additional performance-based rate setting adjustments recorded in 2010 compared to 2009.

On an annual basis, net income increased by 13.5% in 2010 to \$42 million from \$37 million in 2009.

### **Regulated Electric Utilities – Newfoundland Power**

Q4/10 net income of \$9 million was consistent with our estimate of \$8.8 million and slightly greater than Q4/09 net income of \$8 million. The increase in earnings was largely the result of a 3.5% increase in electricity rates and lower effective corporate tax rates.

On an annual basis, net income increased by 9.4% to \$35 million in 2010 from \$32 million in 2009.

### **Regulated Electric Utilities – Other Canadian**

Q4/10 net income of \$5 million was consistent with our estimate of \$4.5 million and greater than Q4/09 adjusted net income of net income of \$3 million. The increase in earnings was partially driven by lower financing charges at Maritime Electric, and a 3.8% rate increase at Algoma Power that became effective on December 1, 2010.

On an annual basis, adjusted net income increased by 11.8% to \$19 million in 2010 from \$17 million in 2009.

## Regulated Electric Utilities – Caribbean

The earnings contribution from the Caribbean business segment was \$5 million in Q4/10 versus our estimate of \$8.5 million and Q4/09 net income of \$7 million. The decrease in Q4/10 earnings reflects higher administrative expenses regarding the ongoing legal dispute between Belize Electricity and its regulator. Q4/09 results also benefitted from a change in amortization estimates, which increased earnings at Fortis Turks and Caicos by \$1.5 million.

On an annual basis, adjusted net income decreased by 8% to \$23 million in 2010 from \$25 million in 2009. During 2010, Belize Electricity contributed only \$1.5 million to consolidated earnings. Fortis believes that in the normal course of business, Belize Electricity's annual earnings contribution should be closer to \$10 million.

## Unregulated – Fortis Generation

Fortis Generation reported net income of \$5 million, which was consistent with our estimate of \$5.1 million and greater than Q4/09 net income of \$3 million. The difference between actual and expected results was due to a combination of increased production and higher average realized power prices during the quarter.

On an annual basis, adjusted net income increased by 25% to \$20 million in 2010 from \$16 million in 2009.

## Unregulated – Fortis Properties

Fortis properties reported net income of \$7 million, which exceeded both our estimate of \$5.2 million and Q4/09 net income of \$5 million. Rent increases and lower effective corporate income taxes drove the increase. Occupancy decreased to 94.5% at the end of the quarter versus 96.2% at the end of Q4/09. Revenue per available room increased to \$70.76 during Q4/10 versus \$68.87 during Q4/09.

On an annual basis, adjusted net income increased by 8.3% to \$26 million in 2010 from \$24 million in 2009.

## Other Items

### Fortis Now Likely to Adopt U.S. GAAP in 2012 Instead of IFRS

Disclosure in the release stated that due to the uncertainty surrounding the treatment of regulatory assets and liabilities under IFRS, Fortis is planning to adopt U.S. GAAP, effective January 1, 2012. Fortis will continue to report under Canadian GAAP in 2011, pursuant to an exception granted by the Accounting and Standards Board, which allowed qualifying entities with rate regulated operations to defer the adoption of IFRS until reporting periods beginning on or after January 1, 2012.

## **Support Structure Agreement Between Bell Aliant and Newfoundland Power**

In December 2010, Newfoundland Power and Bell Aliant announced a new Support Structure Agreement. Pursuant to this agreement, Bell Aliant will acquire 40% of all shared-use poles and related infrastructure for approximately \$46 million. The acquisition will reduce Newfoundland Power's rate base by approximately 5%, and Newfoundland Power is expected to use a portion of the proceeds to repay debt. As a result of the reduction in rate base, recurring earnings from Newfoundland Power are expected to decline by approximately \$1 million.

## **Estimates**

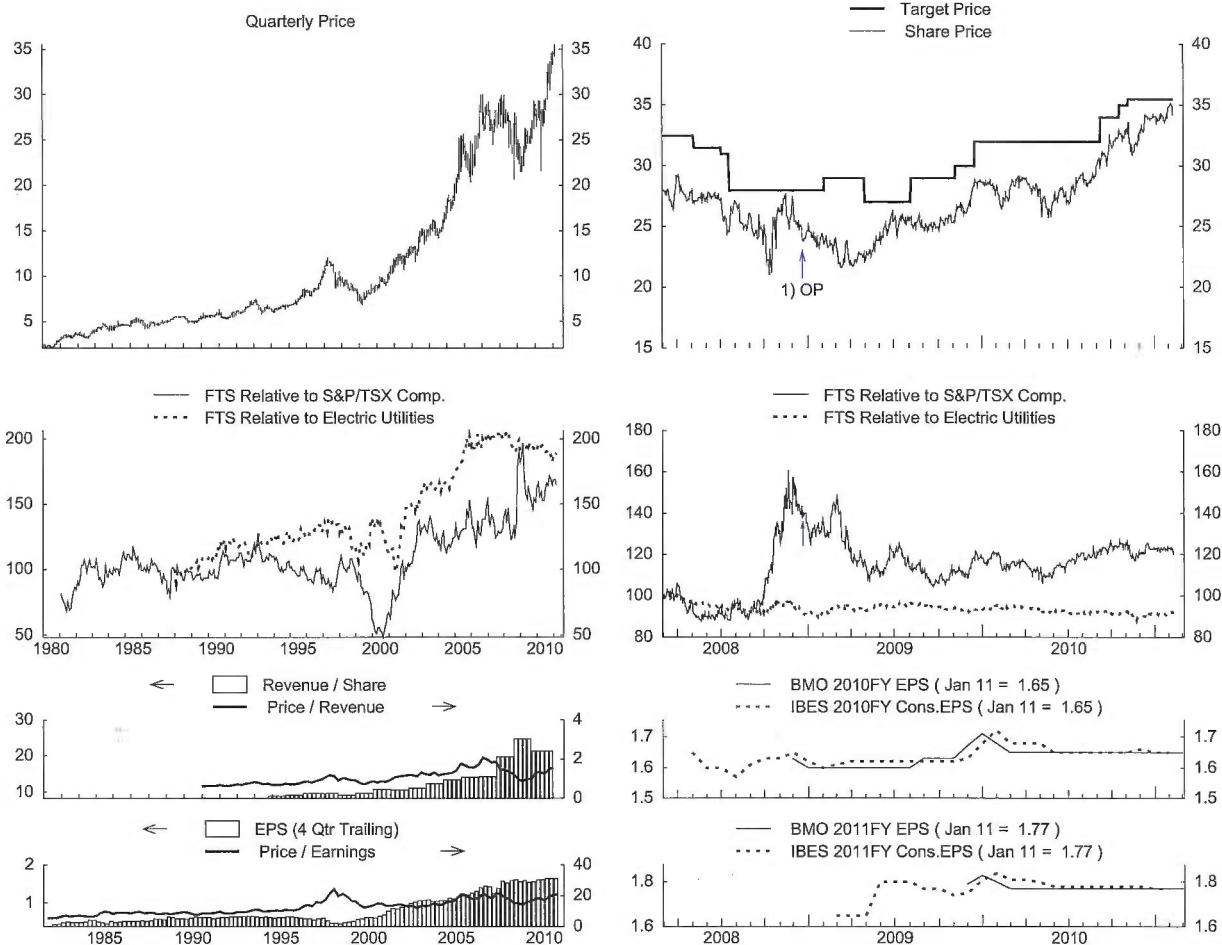

We have updated our model to reflect Q4/10 results. Our diluted EPS estimates of \$1.77 in 2011E and \$1.84 in 2012E are unchanged.

## IMPORTANT DISCLOSURES

### Analyst's Certification

I, Michael McGowan, CA, CFA, hereby certify that the views expressed in this report accurately reflect my personal views about the subject securities or issuers. I also certify that no part of my compensation was, is, or will be, directly or indirectly, related to the specific recommendations or views expressed in this report.

Analysts who prepared this report are compensated based upon (among other factors) the overall profitability of BMO Capital Markets and their affiliates, which includes the overall profitability of investment banking services. Compensation for research is based on effectiveness in generating new ideas and in communication of ideas to clients, performance of recommendations, accuracy of earnings estimates, and service to clients.

### Company Specific Disclosure

Disclosure 1: BMO Capital Markets has undertaken an underwriting liability with respect to this issuer within the past 12 months.

Disclosure 2: BMO Capital Markets has provided investment banking services with respect to this issuer within the past 12 months.

Disclosure 4: BMO Capital Markets or an affiliate has received compensation for investment banking services from this issuer within the past 12 months.

Disclosure 5: BMO Capital Markets or an affiliate received compensation for products or services other than investment banking services within the past 12 months.

Disclosure 6: This issuer is a client (or was a client) of BMO NB, BMO Capital Markets Corp., BMO CM Ltd. or an affiliate within the past 12 months: Investment Banking Services & Non-Securities Related Services.

### Methodology and Risks to Price Target/Valuation

**Methodology:** Our target price is based on a weighted valuation approach: 18x diluted 2012E EPS (12.5%); 1.75x 2012E BVPS (12.5%) and a target yield of 3.50% based on 2012E dividends per share (75%).

**Risks:** Operations are subject to complex regulation by a variety of provincial, state and federal (Canada, Cayman Islands & Belize) agencies. Changes in regulation may adversely affect performance.

### Ratings and Sector Key

We use the following ratings system definitions:

OP = Outperform - Forecast to outperform the market;

Mkt = Market Perform - Forecast to perform roughly in line with the market;

Und = Underperform - Forecast to underperform the market;

(S) = speculative investment;

NR = No rating at this time;

R = Restricted – Dissemination of research is currently restricted.

Market performance is measured by a benchmark index such as the S&P/TSX Composite Index, S&P 500, Nasdaq Composite, as appropriate for each company. BMO Capital Markets eight Top 15 lists guide investors to our best ideas according to different objectives (Canadian large, small, growth, value, income, quantitative; and US large, US small) have replaced the Top Pick rating.

## Q4/10 Results Slightly Below Expectations

---

### Impact

Neutral

---

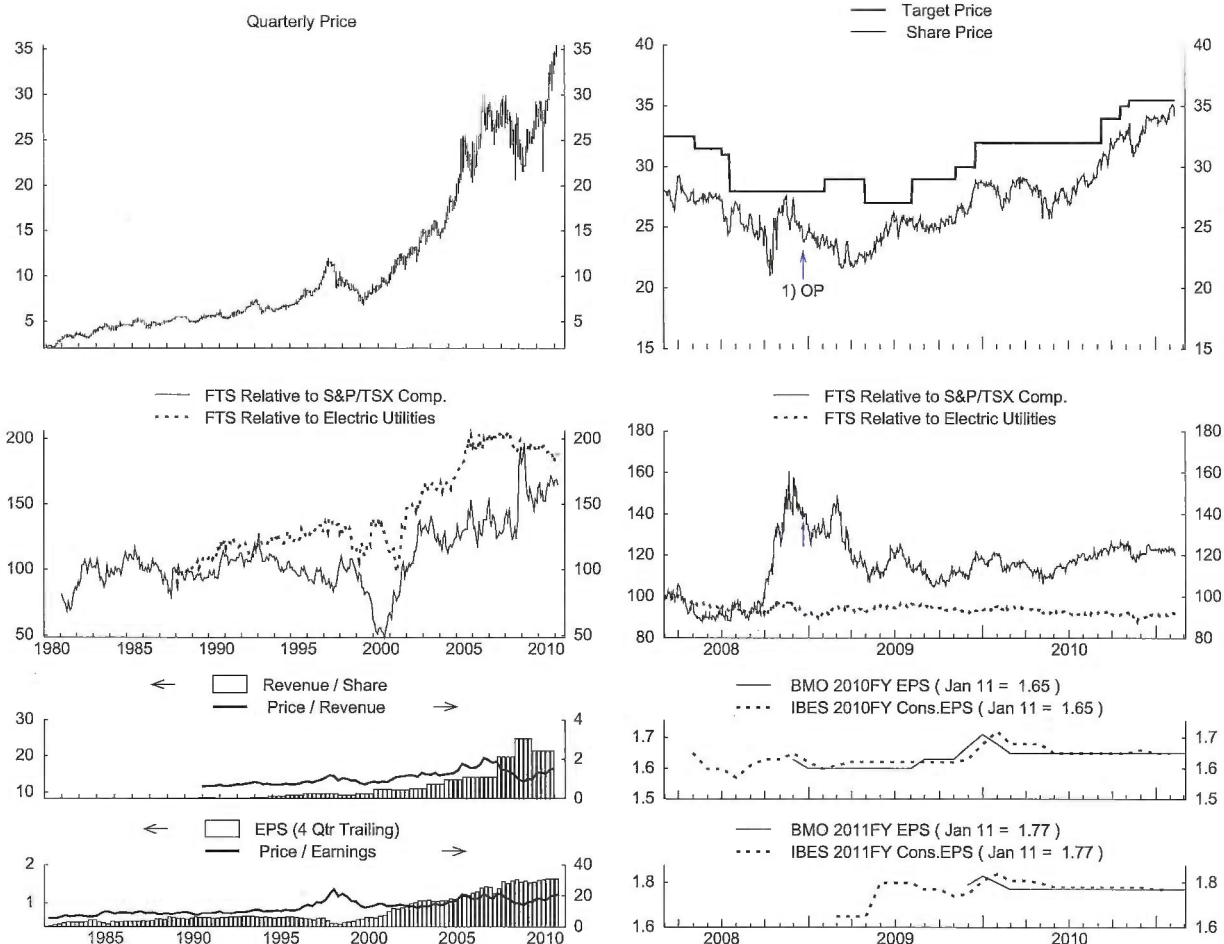

### Details & Analysis

Fortis reported Q4/10 EPS of \$0.49, which was slightly below our estimate of \$0.53 and the First Call Mean estimate of \$0.51. The difference between actual and expected results largely stemmed from lower-than-expected earnings at Fortis Alberta, Terasen Gas, and FortisCaribbean, partially offset by lower-than-expected corporate costs. Capital spending for 2010 of \$1.1 billion was in line with our forecast. For 2011, Fortis is forecasting capital expenditures of \$1.2 billion and the company expects to invest \$5.5 billion in capital projects over the next five years. Disclosure in the release stated that due to the uncertainty surrounding the treatment of regulatory assets and liabilities under IFRS, Fortis is planning to adopt U.S. GAAP in 2012. Overall, this appeared to be a very clean quarter. Although Q4/10 results were slightly lower than expected, full-year adjusted 2010 earnings of \$281 million increased by 7.3% compared to adjusted earnings of \$262 million in 2009. This represents fairly significant earnings growth for a company whose primary business is the ownership and operation of regulated utilities.

This report was prepared by an analyst(s) employed by BMO Nesbitt Burns Inc., and who is (are) not registered as a research analyst(s) under FINRA rules. For disclosure statements, including the Analyst's Certification, please refer to pages 2 to 5.

**Ratings and Sector Key**

We use the following ratings system definitions:

OP = Outperform - Forecast to outperform the market;

Mkt = Market Perform - Forecast to perform roughly in line with the market;

Und = Underperform - Forecast to underperform the market;

(S) = speculative investment;

NR = No rating at this time;

R = Restricted – Dissemination of research is currently restricted.

Market performance is measured by a benchmark index such as the S&P/TSX Composite Index, S&P 500, Nasdaq Composite, as appropriate for each company. BMO Capital Markets eight Top 15 lists guide investors to our best ideas according to different objectives (Canadian large, small, growth, value, income, quantitative; and US large, US small) have replaced the Top Pick rating.

**Company Description** – Fortis Inc. (Fortis) is a publicly listed holding company with four key businesses: electric utility operations, regulated natural gas distribution, non-regulated electric power generation and non-utility property activities. Gas and electric utility operations include Newfoundland Power (100%), Maritime Electric (100%, PEI), Fortis Ontario (100%), Belize Electricity (70.1%), Caribbean Utilities (59.5%, Grand Cayman Island), Turks

and Caicos (100%), FortisAlberta (100%), FortisBC (100%) and the Terasen Gas Companies (100%, British Columbia).  
*Website: fortisinc.com*

**Recent Results** – Fortis reported Q4/10 GAAP EPS of \$0.49, slightly below our estimate of \$0.53 and the First Call Mean of \$0.51. The difference between actual and expected results largely stemmed from lower-than-expected earnings at FortisAlberta, Terasen Gas and FortisCaribbean,

This report was prepared by an analyst(s) employed by BMO Nesbitt Burns Inc., and who is (are) not registered as a research analyst(s) under FINRA rules. For disclosure statements, including the Analyst's Certification, please refer to pages 3 to 5.

partially offset by lower-than-expected corporate costs. Capital spending for 2010 of \$1.1 billion was in line with our forecast. For 2011, Fortis forecasts capital expenditures of \$1.2 billion and expects to invest \$5.5 billion in capital projects over the next five years.

**Corporate Developments** – Disclosure in the Q4/10 release stated that due to the uncertainty surrounding the treatment of regulatory assets and liabilities under IFRS, Fortis is planning to adopt U.S. GAAP, effective January 1, 2012. Fortis will continue to report under Canadian GAAP in 2011, pursuant to an exception granted by the Accounting Standards Board, which allowed qualifying entities with rate regulated operations to defer the adoption of IFRS until reporting periods beginning on or after January 1, 2012.

On February 2, 2011, FortisOntario (100% Fortis Inc.) announced that it and the First Nations' Lake Huron Anishinabek Transmission Company Inc. ("LHATC") have entered into a memorandum of understanding to create a joint venture to pursue the development of regulated

transmission projects in Ontario. FortisOntario will hold a minimum 51% interest in the joint venture and LHATC will have the opportunity to acquire up to a 49% interest in the joint venture.

On December 14, 2010, Fortis announced a 3.6% increase in its annual dividend to \$1.16/share from \$1.12/share.

**Forecasts** – Our diluted EPS estimates are \$1.77 in 2011 and \$1.84 in 2012.

**Valuation** – Our target price of \$35.50 is based on a weighted valuation approach: 18x diluted 2012E EPS of \$1.84 (12.5%); 1.75x 2012E BVPS of \$20.86 (12.5%); and a target yield of 3.50%, assuming 2012E dividends per share of \$1.22 (75%).

**Recommendation** – We believe that Fortis' shares are attractively valued, considering the company's relatively low-risk, diversified business model. Our rating is Outperform. Member of Top 15 Income and Large Cap stock selections.

## A Strong Start to the Year: Q1/11 Results Exceed Expectations

### Event

Fortis reported Q1/11 EPS of \$0.67 versus our estimate of \$0.62 and the First Call Mean estimate of \$0.62 (range \$0.61-0.63). The difference between actual and estimated earnings was primarily the result of strong results at the western utilities: FortisAlberta, FortisBC and FortisBC Energy Inc. (formerly Terasen Gas).

### Impact

Slightly Positive. While we attribute the majority of the variance between actual and estimated results to seasonality (energy sales at the western utilities increased anywhere from 8% to 25%), we nonetheless believe that Q1/11 earnings represent a strong start to 2011.

### Forecasts

There are no changes to our annual EPS estimates; however, we have adjusted our quarterly estimates to reflect Q1/11 results.

### Valuation

Our \$35.50 target price is based on a weighted valuation approach: 18x 2012E diluted EPS of \$1.84 (12.5%), 1.75x 2012E BVPS of \$20.85 (12.5%) and a target yield of 3.50%, assuming 2012E dividends per share of \$1.22 (75%).

### Recommendation

At current levels, we believe the shares are attractively valued. Our rating is Outperform.

 Q3/11E \$0.25 to \$0.26  
 Q4/11E \$0.58 to \$0.52

## A Strong Start to the Year: Q1/11 Results Exceed Expectations

Fortis reported Q1/11 EPS of \$0.67 versus our estimate of \$0.62 and the First Call Mean estimate of \$0.62 (range \$0.61–0.63). The difference between actual and estimated earnings was primarily the result of strong earnings at the western utilities: FortisAlberta, FortisBC and FortisBC Energy Inc. (formerly Terasen Gas).

While we attribute the majority of the variance between actual and estimated results to seasonality (energy sales at the western utilities increased anywhere from 8% to 25%), we nonetheless believe that Q1/11 results represent a strong start to 2011.

With respect to growth, we expect Fortis to continue to evaluate the potential acquisition of regulated natural gas or electric utilities in the U.S. Regardless of whether an acquisition occurs, Fortis will continue to advance its capital expenditure program (which calls for investment of \$5.5 billion over the next five years) in order to drive organic growth. Fortis also continues to evaluate a number of other opportunities to grow rate base, such as investments in new natural gas infrastructure. For example, the company is considering seeking regulatory approval to invest in fuelling stations that would be used by large industrial/commercial vehicles that rely on natural gas as fuel, as opposed to more traditional fuels such as diesel or gasoline. We understand that Fortis also continues to pursue the development of large-scale transmission infrastructure in Ontario, although the company acknowledges that this may be a longer-term initiative.

Our \$35.50 target price is based on a weighted valuation approach: 18x 2012E diluted EPS of \$1.84 (12.5%), 1.75x 2012E BVPS of \$20.85 (12.5%) and a target yield of 3.50%, assuming 2012E dividends per share of \$1.22 (75%).

We are maintaining our Outperform rating, as we believe the company's shares are attractively valued, especially in light of its relatively low-risk business model.

## Regulatory Update

After a lull in 2010, we expect 2011 to be relatively busy from a regulatory perspective. The Alberta Utilities Commission (AUC) is currently moving forward with a Generic Cost of Capital proceeding. The formal hearing is scheduled to begin on May 30, 2011, and the AUC is expected to issue a cost of capital decision by the end of the year. The AUC is also exploring the implementation of Performance Based Regulation; however, we understand that a final decision on PBR is not expected until mid-2012.

In addition to the broad regulatory initiatives outlined above, a number of Fortis' utilities are expected to make rate or other filings in 2011:

- The FortisBC Energy utilities (formerly the Terasen companies) are expected to pursue an amalgamation;
- The FortisBC Energy utilities may file a rate application for the years 2012–2013;

- FortisAlberta has filed cost-of-service application for the years 2012–2013, in which it is seeking a return on estimated mid-year net rate bases of \$1,760 million in 2011E, \$2,013 million in 2012E and \$2,224 million in 2013E; and
- Newfoundland Power may file an application to increase customer rates, effective for 2012.

## Q1/11 Results

Fortis reported Q1/11 GAAP net income of \$117 million, which was \$10.1 million greater than our estimate of \$106.9 million and \$17 million greater than Q1/10 GAAP net income of \$100 million. A comparison of Q1/11 and Q1/10 results by business segment is set out in Table 1.

A discussion of the operating performance of each business segment follows.

### Regulated Gas Utilities – Fortis BC Energy Companies

Q1/11 net income of \$76 million from FortisBC Energy exceeded our estimate of \$72.2 million and Q1/10 net income of \$73 million. We attribute the majority of the variance to seasonality, as cooler weather during the quarter and improved economic conditions in the forest sector led to much higher sales volumes (52,336 GJ in Q1/11 vs. 42,106 GJ in Q1/10).

### Regulated Electric Utilities – FortisAlberta

Q1/11 net income of \$21 million was significantly greater than our estimate of \$14.8 million and Q1/10 net income of \$14 million. The increase in earnings in Q1/11 versus Q1/10 was primarily due to higher energy deliveries (4,402 GWh in Q1/11 vs. 4,109 GWh in Q1/10) and timing with respect to the recording in 2010 of the cumulative impact of the 2010–2011 regulatory rate decision. During Q3/10, Fortis recorded a revenue accrual of \$22 million (with \$14 million of the total relating to H1/10) to reflect higher approved rates. In addition, Q1/11 results benefitted from a \$1 million gain on the sale of property.

### **Regulated Electric Utilities – FortisBC**

Q1/11 net income of \$19 million was greater than Q1/10 net income of \$14 million and our estimate of \$16.2 million. The increase in earnings was largely driven by higher electricity sales during the quarter (905 GWh in Q1/11 vs. 820 GWh in Q1/10) and rate base growth, due to infrastructure investments.

### **Regulated Electric Utilities – Newfoundland Power**

Q1/11 net income of \$7 million was generally consistent with our estimate of \$6.6 million and Q1/10 net income of \$7 million.

### **Regulated Electric Utilities – Caribbean**

The earnings contribution from the Caribbean business segment was \$4 million in Q1/11 versus our estimate of \$4.2 million and Q1/10 net income of \$4 million.

### **Unregulated – Fortis Generation**

Fortis Generation reported Q1/11 net income of \$3 million, lower than our estimate of \$5 million and \$1 million greater than Q1/10 net income of \$2 million. The variance between Q1/11 and Q1/10 results was largely due to a combination of increased production and higher average realized power prices.

### **Unregulated – Fortis Properties**

Fortis Properties reported net income of \$1 million, which was lower than our estimate of \$2.3 million and Q1/10 net income of \$2 million. Lower performance at the hotel operations, primarily due to the continued unfavourable impact of the economic downturn, caused the decrease. Occupancy at the real estate division decreased to 94.3% at the end of the quarter versus 95.8% at the end of Q1/10. At the hospitality division, revenue per available room increased slightly to \$63.29 during Q1/11 versus \$62.93 during Q1/10.

### **Estimates**

There are no changes to our annual EPS estimates; however, we have adjusted our quarterly estimates to reflect Q1/11 results.

**IMPORTANT DISCLOSURES****Analyst's Certification**

I, Michael McGowan, CA, CFA, hereby certify that the views expressed in this report accurately reflect my personal views about the subject securities or issuers. I also certify that no part of my compensation was, is, or will be, directly or indirectly, related to the specific recommendations or views expressed in this report.

Analysts who prepared this report are compensated based upon (among other factors) the overall profitability of BMO Capital Markets and their affiliates, which includes the overall profitability of investment banking services. Compensation for research is based on effectiveness in generating new ideas and in communication of ideas to clients, performance of recommendations, accuracy of earnings estimates, and service to clients.

**Company Specific Disclosure**

Disclosure 5: BMO Capital Markets or an affiliate received compensation for products or services other than investment banking services within the past 12 months.

Disclosure 6: This issuer is a client (or was a client) of BMO NB, BMO Capital Markets Corp., BMO CM Ltd. or an affiliate within the past 12 months: Non-Securities Related Services.

**Methodology and Risks to Price Target/Valuation**

**Methodology:** Our target price is based on a weighted valuation approach: 18x diluted 2012E EPS (12.5%); 1.75x 2012E BVPS (12.5%) and a target yield of 3.50% based on 2012E dividends per share (75%).

**Risks:** Operations are subject to complex regulation by a variety of provincial, state and federal (Canada, Cayman Islands & Belize) agencies. Changes in regulation may adversely affect performance.

**Distribution of Ratings (March 31, 2011)**

**Ratings and Sector Key**

We use the following ratings system definitions:

OP = Outperform - Forecast to outperform the market;

Mkt = Market Perform - Forecast to perform roughly in line with the market;

Und = Underperform - Forecast to underperform the market;

(S) = speculative investment;

NR = No rating at this time;

R = Restricted – Dissemination of research is currently restricted.

Market performance is measured by a benchmark index such as the S&P/TSX Composite Index, S&P 500, Nasdaq Composite, as appropriate for each company. BMO Capital Markets eight Top 15 lists guide investors to our best ideas according to different objectives (Canadian large, small, growth, value, income, quantitative; and US large, US small) have replaced the Top Pick rating.

Brief Research Note  
Gas & Electric Utilities

**Michael McGowan, CA, CFA**  
(416) 359-5807  
Michael.McGowan@bmo.com  
Assoc: Mark Laing, CA, CFA

## Q1/11 Results: A Strong Start to the Year

---

### Impact

Slightly Positive

---

### Details & Analysis

Fortis reported Q1/11 EPS of \$0.67 vs. our estimate of \$0.62 and the First Call Mean of \$0.62 (range \$0.61-0.63). The difference between actual and expected earnings was primarily the result of strong earnings at the western utilities: FortisAlberta, FortisBC, and FortisBC Energy Inc. (formerly Terasen Gas). As energy sales at the western utilities (both electricity and natural gas) appear to have increased significantly during Q1/11 vs. Q1/10, we attribute the majority of the earnings increase to seasonality. There was no change to the company's capital budget guidance. Fortis continues to expect to invest \$5.5 billion in its business segments over the next five years. Overall, this appeared to be fairly clean quarter and we would characterize it as a strong start to the year.

This report was prepared by an analyst(s) employed by BMO Nesbitt Burns Inc., and who is (are) not registered as a research analyst(s) under FINRA rules. For disclosure statements, including the Analyst's Certification, please refer to pages 2 to 5.

## Resuming Coverage After \$300 Million Equity Issuance; Proposed CVPS Acquisition

### Event

We are resuming coverage of Fortis following the completion of an offering of 9.1 million common shares for gross proceeds of \$300 million that was announced on May 30, 2011. Concurrently, Fortis announced that it had agreed to acquire Central Vermont Public Service Corporation (CVPS) for US\$700 million, including the assumption of US\$230 million of debt.

### Impact

Slightly Positive. We had expected Fortis to issue equity by late 2011 in order to finance its ongoing capital expenditure program, although the amount of the issuance (\$300 million) was slightly greater than what we had forecast (\$260 million) and occurred earlier than expected. With respect to the acquisition of CVPS, Fortis has long stated that it intended to expand through the acquisition of a U.S.-based utility. At a multiple of approximately 1.49x anticipated regulatory rate base, the acquisition is not cheap; however, CVPS's rate base is expected to grow by an annual CAGR of 9% during the next five years.

### Forecasts

We have updated our estimates to reflect: (1) the \$300 million equity issuance; (2) the CVPS acquisition; and (3) a reduction in earnings from the Caribbean business segment to be consistent with net income reported in 2010.

### Valuation

Our \$35.50 target price is based on a weighted valuation approach: 18x 2012E diluted EPS of \$1.86 (12.5%), 1.75x 2012E BVPS of \$20.92 (12.5%) and a target yield of 3.50%, assuming 2012E dividends per share of \$1.22 (75%).

### Recommendation

At current levels, we believe that Fortis's shares are attractively valued. Our rating is Outperform.

## **Resuming Coverage After \$300 Million Equity Issuance; Proposed Acquisition of Central Vermont Public Service Co.**

We are resuming coverage of Fortis following the completion of an offering of 9.1 million common shares for gross proceeds of \$300 million that was announced on May 30, 2011. Concurrently, Fortis announced that it had agreed to acquire Central Vermont Public Service Corporation (CVPS) for US\$700 million, including the assumption of US\$230 million of debt.

With respect to the equity issuance, we expected Fortis to issue common shares by late 2011 in order to finance its ongoing capital expenditure program, although the amount of the issuance (\$300 million) was slightly greater than what we had forecast (\$260 million) and occurred earlier than expected.

With respect to the acquisition of CVPS, Fortis has long stated that it intended to expand into the U.S. through the acquisition of a U.S.-based utility. At a multiple of approximately 1.49x anticipated regulatory rate base, the acquisition is not cheap, and we estimate that CVPS will only be approximately \$0.05/share accretive to EPS in the first full year of ownership. The acquisition is, however, consistent with a strategy that Fortis has successfully employed in the past. CVPS is expected to grow its rate base by a CAGR of 9% per year, and this growth rate should translate into additional earnings accretion over time.

CVPS may also present Fortis with incidental acquisition opportunities. CVPS holds a 41% ownership interest in Vermont Transco, LLC, the entity that owns and operates the high-voltage transmission system in Vermont. It is possible that as the demand for green energy in the U.S. increases, the capacity of the transmission line owned by Vermont Transco could be expanded in order to accommodate additional imports of electricity from Quebec.

Although we view the acquisition positively, we are maintaining our \$35.50 price target, based on the relatively limited amount of accretion initially expected from the acquisition.

Our \$35.50 target price is based on a weighted valuation approach: 18x 2012E diluted EPS of \$1.86 (12.5%), 1.75x 2012E BVPS of \$20.92 (12.5%) and a target yield of 3.50%, assuming 2012E dividends per share of \$1.22 (75%).

## About Central Vermont Public Service Corp.

Fortis has agreed to acquire all of the issued and outstanding common shares of Central Vermont Public Service Corp. ("CVPS"), a regulated integrated electric utility located in Vermont, for US\$35.10/share, resulting in aggregate purchase price of US\$700 million, including the assumption of US\$230 million of debt.

CVPS is the largest electric utility in Vermont, and is principally engaged in the purchase, production, transmission, distribution and sale of electricity.

CVPS serves nearly 160,000 customers in about two-thirds of the cities and towns throughout the state of Vermont. Its electric system consists of approximately 9,000 miles of distribution lines and more than 600 miles of sub-transmission lines. In addition, CVPS holds a 41% ownership interest in Vermont Transco, LLC, the entity that owns and operates the high-voltage transmission system in Vermont. Additional details about CVPS are set out below:

- The \$35.10/share offer represented a premium of 44.3% to CVPS's closing price of \$24.32, the day before the transaction was announced. The implied acquisition P/E multiplies based on 2011E guidance provided by CVPS are 21.9–20.0x 2011E earnings.
- Fortis has stated that in 2010, total assets and rate base assets of CVPS were approximately US\$711 million and US\$426 million, respectively.
- 2011E rate base has been forecast at US\$471 million. CVPS expects rate base to reach approximately US\$650 million by 2015, representing a compound average annual growth rate of approximately 9% from 2010 to 2015. A breakdown of historical and projected rate base for CVPS is provided in Table 1.

**Table 1: Historical and Projected Rate Base (US\$mm)**

	2005	2006	2007	2008	2009	2010	2011E	2012E	2013E	2014E	2015E
Rate Base	236	236	302	344	385	426	471	518	574	602	646

Source: Company Reports, BMO Capital Markets

- CVPS's allowed rate of return on common equity for 2011 has been set at 9.45% with a deemed equity thickness of 57%. Although CVPS's deemed ROE is similar to that earned by Canadian-domiciled utilities, the equity thickness of 57% is very high by Canadian standards (most regulated utilities in Canada do not have equity thicknesses that exceed 40%).

We believe that the discrepancy between CVPS's capital structure (57% equity) and Fortis's capital structure (approximately 32% common equity, 9% preferred equity) is one of the reasons why the CVPS acquisition is accretive.

- CVPS operates principally under cost-of-service regulation. The regulatory framework at CVPS enables the company to recover fuel, purchased power and transmission costs, along with capital program costs with minimal lag.
- Consistent with Fortis's other subsidiaries, CVPS will continue to operate as a separate company with its own board of directors and local management team. In addition, Fortis

will provide approximately \$21 million for the benefit of CVPS customers, in a manner to be determined through the regulatory approval process.

- If the acquisition does not proceed, Fortis is entitled to a termination fee of US\$17.5 million, along with the reimbursement of up to US\$2 million for prudently incurred expenses.
- Regulatory approvals are expected within 6–12 months.

## **An Update on Belize Electricity Limited**

On June 13, Fortis issued a press release to communicate that the Government of Belize issued a media release on Friday, June 10, announcing that the government desired to purchase a majority interest in Belize Electricity Limited (“BEL”; 70% Fortis) in order to assume control of the company. Fortis has indicated that it has not yet received a proposal from the Government of Belize.

The government’s announcement is the latest development in the acrimonious relationship between BEL and the Government of Belize, which began in May 2008, when the Belize Public Utilities Commission (“PUC”) issued a preliminary decision on BEL’s 2008 rate application. At that time, the PUC denied BEL’s request to increase rates in response to rising commodity prices. Fortis subsequently commenced a legal challenge against the PUC’s decision. On March 15, 2011 the Supreme Court of Belize upheld the PUC’s jurisdiction to set rates, and noted in its ruling that “Good Utility Practice as defined by [the Independent Expert appointed by the Court] in his Report is not applicable to Belize.”

Unsurprisingly, Fortis has not been able to earn a fair return from its investment in BEL in over three years. In 2010, the earnings contribution from BEL was only \$1.5 million, whereas in previous years, it had been as high as \$10 million.

During follow-up conversations, Fortis management stated that while it would be willing to divest its investment in BEL, any sale would have to be completed at a reasonable price and Fortis would not be willing to sell anything less than its entire investment in BEL. At the time of writing, BEL had a book value of \$125 million (\$0.68/share). Fortis is also exposed to Belize through its investment in BECOL (a company that owns unregulated power generation in Belize), which has a current book value of approximately \$160 million (\$0.88/share).

We expect continued uncertainty with respect to Fortis’s Belizean investments in the coming months. In our view, we believe a best-case scenario would involve Fortis divesting both BEL and BECOL for cash proceeds at prices that exceed book value. A worst-case scenario would involve some sort of expropriation of these assets by the Government of Belize.

Although we believe the uncertainty with respect to Fortis’s Belizean operations is negative, we note that these assets represent a relatively small proportion of the company’s consolidated operations. We estimate that income from both BEL and BECOL represent approximately 6% of our 2012E EPS estimate.

## Estimates

We have updated our estimates to reflect: (1) the \$300 million equity issuance; (2) the CVPS acquisition; and (3) a reduction in earnings from the Caribbean business segment to be consistent with net income reported in 2010.

Our 2011E diluted EPS estimate declines to \$1.71 from \$1.77 due to a combination of dilution from the \$300 million common share issuance, and reduced net income expectations from Fortis's Caribbean investments.

Our 2012E diluted EPS estimate increases slightly to \$1.86 from \$1.84, as expected accretion from the CVPS estimate is partially offset by a reduction in earnings from the Caribbean segment.

## IMPORTANT DISCLOSURES

### Analyst's Certification

I, Michael McGowan, CA, CFA, hereby certify that the views expressed in this report accurately reflect my personal views about the subject securities or issuers. I also certify that no part of my compensation was, is, or will be, directly or indirectly, related to the specific recommendations or views expressed in this report.

Analysts who prepared this report are compensated based upon (among other factors) the overall profitability of BMO Capital Markets and their affiliates, which includes the overall profitability of investment banking services. Compensation for research is based on effectiveness in generating new ideas and in communication of ideas to clients, performance of recommendations, accuracy of earnings estimates, and service to clients.

### Company Specific Disclosure

Disclosure 1: BMO Capital Markets has undertaken an underwriting liability with respect to this issuer within the past 12 months.

Disclosure 2: BMO Capital Markets has provided investment banking services with respect to this issuer within the past 12 months.

Disclosure 3: BMO Capital Markets has managed or co-managed a public offering of securities with respect to this issuer within the past 12 months.

Disclosure 4: BMO Capital Markets or an affiliate has received compensation for investment banking services from this issuer within the past 12 months.

Disclosure 5: BMO Capital Markets or an affiliate received compensation for products or services other than investment banking services within the past 12 months.

Disclosure 6: This issuer is a client (or was a client) of BMO NB, BMO Capital Markets Corp., BMO CM Ltd. or an affiliate within the past 12 months: Investment Banking Services & Non-Securities Related Services.

### Methodology and Risks to Price Target/Valuation

**Methodology:** Our target price is based on a weighted valuation approach: 18x diluted 2012E EPS (12.5%); 1.75x 2012E BVPS (12.5%) and a target yield of 3.50% based on 2012E dividends per share (75%).

**Risks:** Operations are subject to complex regulation by a variety of provincial, state and federal (Canada, Cayman Islands & Belize) agencies. Changes in regulation may adversely affect performance.

### Distribution of Ratings (March 31, 2011)

### Ratings and Sector Key

We use the following ratings system definitions:

OP = Outperform - Forecast to outperform the market;

Mkt = Market Perform - Forecast to perform roughly in line with the market;

Und = Underperform - Forecast to underperform the market;

(S) = speculative investment;

NR = No rating at this time;

R = Restricted – Dissemination of research is currently restricted.

Market performance is measured by a benchmark index such as the S&P/TSX Composite Index, S&P 500, Nasdaq Composite, as appropriate for each company. BMO Capital Markets eight Top 15 lists guide investors to our best ideas according to different objectives (Canadian large, small, growth, value, income, quantitative; and US large, US small) have replaced the Top Pick rating.

## Government of Belize Expropriates Fortis's 70% Ownership Interest in Belize Electricity Ltd.

### Event

Fortis has announced that on Monday, June 20, the Government of Belize passed legislation and issued an order to expropriate Fortis's 70% interest in Belize Electricity Limited ("BEL") and dismiss BEL's board of directors.

### Impact

Negative. In our research comment dated June 15 ([link](#)), we provided an update regarding BEL, specifically concerning comments made by the Government of Belize regarding its desire to acquire a majority interest in BEL and highlighted the possibility of government expropriation. Fortis is also exposed to Belize through its investment in BECOL, which owns unregulated power generation in the country. Although the government has not passed legislation to expropriate BECOL, BECOL may now experience difficulty collecting amounts billed to BEL for energy sales. We understand that BEL has a book value of \$125 million (\$0.68/share) and BECOL has a book value of \$160 million (\$0.88/share). Given this development, we believe Fortis may be required to record an impairment charge against its Belizean investments; however, its exposure to the country is relatively limited as BEL and BECOL represent less than 3% of total assets.

### Forecasts

We removed the earnings contribution from BEL from our model on June 15. In order to be conservative, for periods after Q1/11 we have now eliminated all earnings contributions from BECOL.

### Valuation

Our \$35 price target is based on a weighted valuation approach: 18x 2012E diluted EPS of \$1.86 (12.5%), 1.75x 2012E BVPS of \$20.92 (12.5%) and a target yield of 3.50%, assuming 2012E dividends per share of \$1.22 (75%).

### Recommendation

While this development is unfortunate, we continue to believe that Fortis represents a compelling long-term investment. Our rating is Outperform.

## IMPORTANT DISCLOSURES

## Analyst's Certification

I, Michael McGowan, CA, CFA, hereby certify that the views expressed in this report accurately reflect my personal views about the subject securities or issuers. I also certify that no part of my compensation was, is, or will be, directly or indirectly, related to the specific recommendations or views expressed in this report.

Analysts who prepared this report are compensated based upon (among other factors) the overall profitability of BMO Capital Markets and their affiliates, which includes the overall profitability of investment banking services. Compensation for research is based on effectiveness in generating new ideas and in communication of ideas to clients, performance of recommendations, accuracy of earnings estimates, and service to clients.

## Company Specific Disclosure

Disclosure 1: BMO Capital Markets has undertaken an underwriting liability with respect to this issuer within the past 12 months.

Disclosure 2: BMO Capital Markets has provided investment banking services with respect to this issuer within the past 12 months.

Disclosure 3: BMO Capital Markets has managed or co-managed a public offering of securities with respect to this issuer within the past 12 months.

Disclosure 4: BMO Capital Markets or an affiliate has received compensation for investment banking services from this issuer within the past 12 months.

Disclosure 5: BMO Capital Markets or an affiliate received compensation for products or services other than investment banking services within the past 12 months.

Disclosure 6: This issuer is a client (or was a client) of BMO NB, BMO Capital Markets Corp., BMO CM Ltd. or an affiliate within the past 12 months: Investment Banking Services & Non-Securities Related Services.

## Methodology and Risks to Price Target/Valuation

**Methodology:** Our target price is based on a weighted valuation approach: 18x diluted 2012E EPS (12.5%); 1.75x 2012E BVPS (12.5%) and a target yield of 3.50% based on 2012E dividends per share (75%).

**Risks:** Operations are subject to complex regulation by a variety of provincial, state and federal (Canada, Cayman Islands & Belize) agencies. Changes in regulation may adversely affect performance.

## Ratings and Sector Key

We use the following ratings system definitions:

OP = Outperform - Forecast to outperform the market;

Mkt = Market Perform - Forecast to perform roughly in line with the market;

Und = Underperform - Forecast to underperform the market;

(S) = speculative investment;

NR = No rating at this time;

R = Restricted – Dissemination of research is currently restricted.

Market performance is measured by a benchmark index such as the S&P/TSX Composite Index, S&P 500, Nasdaq Composite, as appropriate for each company. BMO Capital Markets eight Top 15 lists guide investors to our best ideas according to different objectives (Canadian large, small, growth, value, income, quantitative; and US large, US small) have replaced the Top Pick rating.

The information in this report is not intended to be used as the primary basis of investment decisions, and because of individual client objectives, should not be construed as advice designed to meet the particular investment needs of any investor. This material is for information purposes only and is not an offer to sell or the solicitation of an offer to buy any security. BMO Capital Markets or its affiliates will buy from or sell to customers the securities of issuers mentioned in this report on a principal basis. BMO Capital Markets or its affiliates, officers, directors or employees have a long or short position in many of the securities discussed herein, related securities or in options, futures or other derivative instruments based thereon. The reader should assume that BMO Capital Markets or its affiliates may have a conflict of interest and should not rely solely on this report in evaluating whether or not to buy or sell securities of issuers discussed herein.

**Additional Matters**

To Canadian Residents: BMO Nesbitt Burns Inc. and BMO Nesbitt Burns Ltée./Ltd., affiliates of BMO Capital Markets Corp., furnish this report to Canadian residents and accept responsibility for the contents herein subject to the terms set out above. Any Canadian person wishing to effect transactions in any of the securities included in this report should do so through BMO Nesbitt Burns Inc. and/or BMO Nesbitt Burns Ltée./Ltd.

To U.S. Residents: BMO Capital Markets Corp. and/or BMO Nesbitt Burns Securities Ltd., affiliates of BMO NB, furnish this report to U.S. residents and accept responsibility for the contents herein, except to the extent that it refers to securities of Bank of Montreal. Any U.S. person wishing to effect transactions in any security discussed herein should do so through BMO Capital Markets Corp. and/or BMO Nesbitt Burns Securities Ltd.

To U.K. Residents: In the UK this document is published by BMO Capital Markets Limited which is authorised and regulated by the Financial Services Authority. The contents hereof are intended solely for the use of, and may only be issued or passed on to, (I) persons who have professional experience in matters relating to investments falling within Article 19(5) of the Financial Services and Markets Act 2000 (Financial Promotion) Order 2005 (the "Order") or (II) high net worth entities falling within Article 49(2)(a) to (d) of the Order (all such persons together referred to as "relevant persons"). The contents hereof are not intended for the use of and may not be issued or passed on to, retail clients.

**ADDITIONAL INFORMATION IS AVAILABLE UPON REQUEST**

BMO Financial Group (NYSE, TSX: BMO) is an integrated financial services provider offering a range of retail banking, wealth management, and investment and corporate banking products. ## Updating Model to Reflect Termination of CVPS Merger Agreement and Overallotment Option

### Event

We are updating our estimates to reflect: (1) Fortis's decision to terminate the Central Vermont Public Service Corp. (CVPS) merger agreement; and (2) the issuance of an additional 1.24 million common shares priced at \$33/share pursuant to the exercise of an overallotment option that was granted to underwriters on May 30, when the company announced it was issuing \$300.3 million of equity.

### Impact

Slightly negative. The additional share issuance and decision to terminate the CVPS merger agreement has led to a reduction in our 2011E and 2012E EPS estimates. Somewhat positively, Fortis will receive a termination fee of US\$17.5 million from CVPS and a reimbursement of US\$2 million for expenses related to the proposed transaction.

### Forecasts

Our EPS estimates decline to \$1.63 from \$1.64 in 2011E and to \$1.70 from \$1.78 in 2012E. We have not included the merger termination fee in our 2011E estimates as it represents a non-recurring gain.

### Valuation

Our \$35 price target is based on a weighted valuation approach: 18x 2012E diluted EPS of \$1.70 (12.5%); 1.75x 2012E BVPS of \$20.66 (12.5%); and a target yield of 3.50%, assuming 2012E dividends per share of \$1.22 (75%).

### Recommendation

At current levels, we believe the shares are attractively valued. Our rating is Outperform.

## IMPORTANT DISCLOSURES

### Analyst's Certification

I, Michael McGowan, CA, CFA, hereby certify that the views expressed in this report accurately reflect my personal views about the subject securities or issuers. I also certify that no part of my compensation was, is, or will be, directly or indirectly, related to the specific recommendations or views expressed in this report.

Analysts who prepared this report are compensated based upon (among other factors) the overall profitability of BMO Capital Markets and their affiliates, which includes the overall profitability of investment banking services. Compensation for research is based on effectiveness in generating new ideas and in communication of ideas to clients, performance of recommendations, accuracy of earnings estimates, and service to clients.

### Company Specific Disclosure

Disclosure 1: BMO Capital Markets has undertaken an underwriting liability with respect to this issuer within the past 12 months.

Disclosure 2: BMO Capital Markets has provided investment banking services with respect to this issuer within the past 12 months.

Disclosure 3: BMO Capital Markets has managed or co-managed a public offering of securities with respect to this issuer within the past 12 months.

Disclosure 4: BMO Capital Markets or an affiliate has received compensation for investment banking services from this issuer within the past 12 months.

Disclosure 5: BMO Capital Markets or an affiliate received compensation for products or services other than investment banking services within the past 12 months.

Disclosure 6: This issuer is a client (or was a client) of BMO NB, BMO Capital Markets Corp., BMO CM Ltd. or an affiliate within the past 12 months: Investment Banking Services & Non-Securities Related Services.

### Methodology and Risks to Price Target/Valuation

**Methodology:** Our target price is based on a weighted valuation approach: 18x diluted 2012E EPS (12.5%); 1.75x 2012E BVPS (12.5%) and a target yield of 3.50% based on 2012E dividends per share (75%).

**Risks:** Operations are subject to complex regulation by a variety of provincial, state and federal (Canada, Cayman Islands & Belize) agencies. Changes in regulation may adversely affect performance.

### Ratings and Sector Key

We use the following ratings system definitions:

OP = Outperform - Forecast to outperform the market;

Mkt = Market Perform - Forecast to perform roughly in line with the market;

Und = Underperform - Forecast to underperform the market;

(S) = speculative investment;

NR = No rating at this time;

R = Restricted – Dissemination of research is currently restricted.

Market performance is measured by a benchmark index such as the S&P/TSX Composite Index, S&P 500, Nasdaq Composite, as appropriate for each company. BMO Capital Markets eight Top 15 lists guide investors to our best ideas according to different objectives (Canadian large, small, growth, value, income, quantitative; and US large, US small) have replaced the Top Pick rating.

## Q2/11 Slightly Below Expectations; Outperform Rating Maintained

### Event

Fortis reported Q2/11 EPS of \$0.33. After adjusting for \$2 million in revenue related to the implementation of a smart meter program at FortisAlberta in 2010, we believe recurring EPS were \$0.32 or slightly lower than our estimate of \$0.34 and the First Call Mean estimate of \$0.35 (range \$0.34–0.36).

### Impact

Neutral. We view the Q2/11 results as neutral to our outlook. Although reported EPS was slightly below our estimate and consensus, due to the nature of Fortis's business we attribute the majority of the variance to seasonality. For example, Q1/11 results exceeded consensus by \$0.05/share, while Q2/11 earnings were approximately \$0.02/share below consensus.

### Forecasts

We have updated our model to reflect Q2/11 results and the estimated rate base balances set out in the revenue requirement applications for the FortisBC Energy and FortisBC Electricity companies. There is no change to our 2011E EPS estimate and our 2012E EPS estimate increases to \$1.71 from \$1.70.

### Valuation

Our \$35 target price is based on a weighted valuation approach: 18x 2012E diluted EPS of \$1.71 (12.5%), 1.75x 2012E BVPS of \$20.61 (12.5%) and a target yield of 3.50%, assuming 2012E dividends per share of \$1.22 (75%).

### Recommendation

Due to its track record of earnings and dividend growth, combined with the company's large capital expenditure plan, we continue to believe that Fortis represents a good long-term investment, especially at current valuation levels. Our rating is Outperform.

## Q2/11 Slightly Below Expectations; Likely Due to Seasonality

Fortis reported Q2/11 EPS of \$0.33. After adjusting for \$2 million in revenue related to the implementation of a smart meter program at FortisAlberta in 2010, we believe recurring EPS were \$0.32 or slightly lower than our estimate of \$0.34 and the First Call Mean estimate of \$0.35 (range \$0.34–0.36).

We view the Q2/11 results as neutral to our outlook. Although reported EPS was slightly below our estimate and consensus, due to the nature of Fortis's businesses, we attribute the majority of the variance to seasonality. For example, Q1/11 results exceeded consensus by \$0.05/share, while Q2/11 earnings were approximately \$0.02/share below consensus.

With respect to growth, we expect Fortis to continue to evaluate the potential acquisition of regulated natural gas or electric utilities in the U.S. Although Fortis was not successful in its attempt to acquire Central Vermont Public Service Corp. ("CVPS"), Fortis management believes that the proposed acquisition has raised the company's profile among U.S. utilities contemplating a transaction.

Notwithstanding acquisitions, Fortis will continue to advance its capital expenditure program in order to drive organic growth. The company has maintained 2011E capital expenditure guidance of \$1.2 billion; however, it has increased its five-year capital expenditure guidance to \$5.7 billion from \$5.5 billion. The majority of this spending is expected to occur at the company's regulated utilities. Fortis also continues to evaluate a number of other opportunities to grow rate base, such as investments in new natural gas infrastructure. For example, the company is considering seeking regulatory approval to invest in fuelling stations that would be used by large industrial/commercial vehicles that rely on natural gas as fuel, as opposed to more traditional fuels such as diesel or gasoline. We understand that Fortis also continues to pursue the development of large-scale transmission infrastructure in Ontario, although the company acknowledges that this may be a longer-term initiative.

Although the company has experienced two significant developments recently (the termination of the CVPS merger agreement, and the decision by the Government of Belize to expropriate Fortis's investment in Belize Electricity Limited), we believe that Fortis is ready to move forward. With respect to CVPS, pursuant to the terms of the merger agreement, Fortis received a break fee of \$17.5 million and will be reimbursed for \$2 million of expenses. In addition, when the expropriation of BEL was announced, we removed all contributions from Belize Electricity Limited and BECOL from our estimates. In our view, any incremental earnings combined with subsequent collection of accounts receivable related to unregulated generation at BECOL should be viewed positively.

Due to its track record of earnings and dividend growth, combined with the company's large capital expenditure plan, we continue to believe that Fortis represents a good long-term investment, especially at current valuation levels. Our \$35 price target is based on a weighted valuation approach: 18x 2012E diluted EPS of \$1.71 (12.5%), 1.75x 2012E BVPS of \$20.61 (12.5%) and a target yield of 3.50%, assuming 2012E dividends per share of \$1.22 (75%).

At current levels, we believe the company's shares are attractively valued. Our rating is Outperform.

## Q2/11 Results

As set out in Table 1, on a comparable basis, net income increased by 1.8% in Q2/11 versus Q2/10. In order to present results on a comparable basis, Q2/11 GAAP income was adjusted for the recognition of \$2 million of accrued revenue, which relates to the implementation of a smart metering program at FortisAlberta in 2010.

Source: BMO Capital Markets, Company Reports

A discussion of the operating performance of each business segment follows.

### Regulated Gas Utilities – FortisBC Energy Companies

Q2/11 net income of \$15 million from FortisBC Energy was less than our estimate of \$17 million and Q2/10 net income of \$17 million. We attribute the majority of the variance to seasonality, as timing differences resulted in a higher proportion of expenses recorded in Q2/11 compared to Q2/10.

### Regulated Electric Utilities – FortisAlberta

Adjusted Q2/11 net income of \$17 million was less than our estimate of \$18.6 million and consistent with Q2/10 net income of \$17 million.

### Regulated Electric Utilities – FortisBC

Q2/11 net income of \$9 million was consistent with our estimate of \$9 million and slightly greater than Q2/10 net income of \$8 million. The increase in earnings was largely driven by higher electricity sales during the quarter (682 GWh in Q2/11 vs. 671 GWh in Q2/10) and rate base growth, due to infrastructure investments.

### **Regulated Electric Utilities – Newfoundland Power**

Q2/11 net income of \$11 million was consistent with our estimate of \$10.9 million and Q2/10 net income of \$11 million.

### **Regulated Electric Utilities – Other Canadian**

Q2/11 net income of \$6 million was greater than our estimate of \$4.5 million and Q2/10 net income of \$4 million. The increase in earnings was primarily due to electricity sales growth (562 GWh in Q2/11 vs. 535 GWh in Q2/10), and a 3.8% rate increase at Algoma Power that became effective on December 1, 2010.

### **Regulated Utilities – Caribbean**

The earnings contribution from the Caribbean business segment was \$7 million in Q2/11 versus our estimate of \$6.8 million and Q2/10 net income of \$7 million.

### **Unregulated – Fortis Generation**

Fortis Generation reported Q2/11 net income of \$2 million, which was greater than our estimate of \$1.4 million and Q2/10 net income of \$3 million. The difference between Q2/11 and Q2/10 results was largely due to decreased production in Belize. In order to be conservative, we removed all earnings contribution from BECOL from our estimates after Q1/11, following the announcement on June 20 that the Government of Belize had expropriated Fortis's 70% interest in Belize Electricity Limited ("BEL"). As at July 31, BEL owed BECOL US\$6.5 million for overdue energy purchases. The last payment that BECOL received for overdue energy purchases was for US\$0.5 million on July 11. Disclosure in the earnings release suggests that the Government of Belize does not intend to expropriate BECOL, and that BECOL continues to deliver electricity to BEL and invoice BEL for deliveries. Due to our conservative outlook, our model does not anticipate earnings future earnings from BECOL; however, we believe that any incremental earnings, combined with subsequent collection of accounts receivable related to unregulated generation at BECOL should be viewed positively.

### **Unregulated – Fortis Properties**

Fortis Properties reported net income of \$7 million, which was lower than our estimate of \$9 million and Q2/10 net income of \$8 million. Decreased occupancy at hospitality properties in Western Canada was responsible for the decline. Occupancy at the real estate division decreased to 93.4% at the end of the quarter versus 94.8% at the end of Q2/10. At the hospitality division, revenue per available room decreased slightly to \$83.57 during Q2/11 versus \$83.77 during Q2/10.

## Revised Capital Expenditure Forecast

There was no change to the company's 2011E capital expenditure of \$1.2 billion; however, the company has increased its five-year capital expenditure estimate to \$5.7 billion from \$5.5 billion previously. Approximately 61% of the total relates to the regulated electric utilities, 23% relates to the regulated gas utilities and 16% relates to Fortis's non-regulated businesses.

## Regulatory Update

After a lull in 2010, we expect 2011 to be relatively busy from a regulatory perspective. The Alberta Utilities Commission (AUC) is currently moving forward with a Generic Cost of Capital proceeding. The formal hearing began on June 20, 2011 and the AUC is expected to issue a cost of capital decision by the end of the year. The AUC is also exploring the implementation of Performance Based Regulation; however, we understand that a final decision on PBR is not expected until mid-2012.

In addition to the broad regulatory initiatives outlined above, a number of Fortis's utilities are expected to make rate or other filings in 2011:

- The FortisBC Energy utilities (formerly the Terasen companies) are expected to pursue an amalgamation during Q3/11;
- In May 2011, the FortisBC Energy utilities filed revenue requirements applications for 2012–2013. FortisBC Energy Inc. is seeking a return on estimated mid-year rate bases of \$2,737 million in 2012E and \$2,788 million in 2013E, and FortisBC Energy Inc. Vancouver Island is seeking a return on estimated mid-year rate bases of \$788 million in 2012E and \$814 million in 2013E;
- In June 2011, FortisBC Electric filed a Revenue Requirement Application and Integrated System Plan for 2012 – 2013, in which it is seeking a return on estimated mid-year net rate bases of \$1,145 million in 2012E, and \$1,212 million in 2013E;
- Effective September 2011, the interim Government of the Turks and Caicos Islands plans to implement a carbon tax, which will be applicable to Fortis Turks and Caicos. In the event that this tax is not permitted to be passed onto Fortis Turks and Caicos' customers, the potential impact to earnings would be approximately \$1 million in 2011 and \$2–3 million on an annual basis.

## Estimates

We have updated our model to reflect Q2/11 results and the estimated rate base balances set out in the revenue requirement applications for the FortisBC Energy and FortisBC Electricity companies. There is no change to our 2011E EPS estimate and our 2012E EPS estimate increases to \$1.71 from \$1.70.

## IMPORTANT DISCLOSURES

### Analyst's Certification

I, Michael McGowan, CA, CFA, hereby certify that the views expressed in this report accurately reflect my personal views about the subject securities or issuers. I also certify that no part of my compensation was, is, or will be, directly or indirectly, related to the specific recommendations or views expressed in this report.

Analysts who prepared this report are compensated based upon (among other factors) the overall profitability of BMO Capital Markets and their affiliates, which includes the overall profitability of investment banking services. Compensation for research is based on effectiveness in generating new ideas and in communication of ideas to clients, performance of recommendations, accuracy of earnings estimates, and service to clients.

### Company Specific Disclosure

Disclosure 1: BMO Capital Markets has undertaken an underwriting liability with respect to this issuer within the past 12 months.

Disclosure 2: BMO Capital Markets has provided investment banking services with respect to this issuer within the past 12 months.

Disclosure 3: BMO Capital Markets has managed or co-managed a public offering of securities with respect to this issuer within the past 12 months.

Disclosure 4: BMO Capital Markets or an affiliate has received compensation for investment banking services from this issuer within the past 12 months.

Disclosure 5: BMO Capital Markets or an affiliate received compensation for products or services other than investment banking services within the past 12 months.

Disclosure 6: This issuer is a client (or was a client) of BMO NB, BMO Capital Markets Corp., BMO CM Ltd. or an affiliate within the past 12 months: Investment Banking Services & Non-Securities Related Services.

### Methodology and Risks to Price Target/Valuation

**Methodology:** Our target price is based on a weighted valuation approach: 18x diluted 2012E EPS (12.5%); 1.75x 2012E BVPS (12.5%) and a target yield of 3.50% based on 2012E dividends per share (75%).

**Risks:** Operations are subject to complex regulation by a variety of provincial, state and federal (Canada, Cayman Islands & Belize) agencies. Changes in regulation may adversely affect performance.

\*\* Reflects rating distribution of all companies from which BMO Capital Markets Corp. has received compensation for Investment Banking services as percentage within ratings category.

\*\*\* Reflects rating distribution of all companies from which BMO Capital Markets Corp. has received compensation for Investment Banking services as percentage of Investment Banking clients.

\*\*\*\* Reflects rating distribution of all companies covered by BMO Capital Markets equity research analysts.

\*\*\*\*\* Reflects rating distribution of all companies from which BMO Capital Markets has received compensation for Investment Banking services as percentage of Investment Banking clients.

### Ratings and Sector Key

We use the following ratings system definitions:

OP = Outperform - Forecast to outperform the market;

Mkt = Market Perform - Forecast to perform roughly in line with the market;

Und = Underperform - Forecast to underperform the market;

(S) = speculative investment;

NR = No rating at this time;

R = Restricted – Dissemination of research is currently restricted.

Market performance is measured by a benchmark index such as the S&P/TSX Composite Index, S&P 500, Nasdaq Composite, as appropriate for each company. BMO Capital Markets eight Top 15 lists guide investors to our best ideas according to different objectives (Canadian large, small, growth, value, income, quantitative; and US large, US small) have replaced the Top Pick rating.

## Q2/11 Earnings in Line

---

**Impact**

Neutral

---

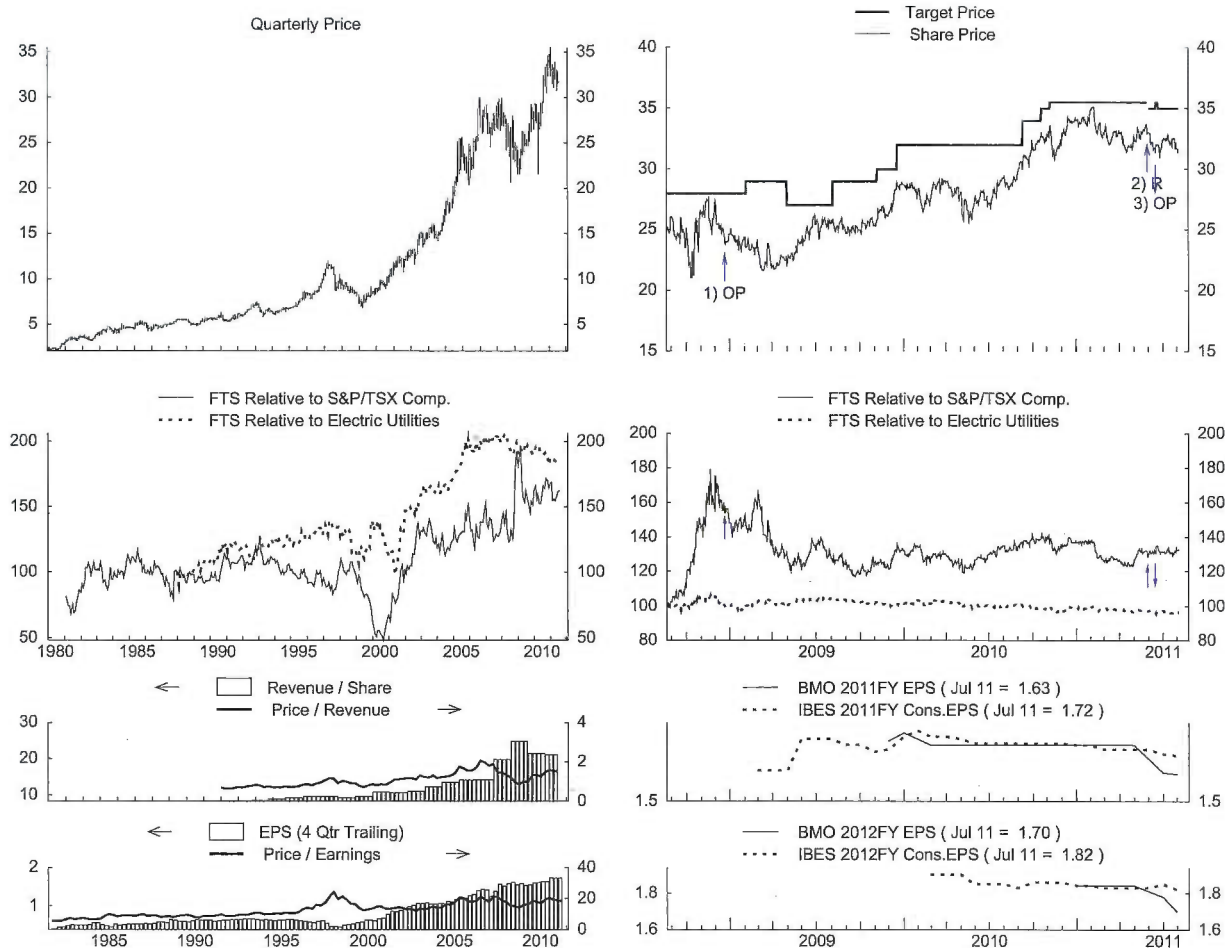

**Details & Analysis**

Fortis reported Q2/11 EPS of \$0.33, which was consistent with our estimate of \$0.34 and the First Call Mean estimate of \$0.35 (range \$0.34–0.36). Earnings from the majority of the company's business segments were generally in line with our estimates, with slightly stronger-than-expected results at the "Other Canadian" utilities (FortisOntario and Maritime Electric) offsetting slightly weaker-than-expected results at the FortisBC Energy companies (formerly the Terasen Companies). Disclosure in the earnings release noted that Fortis's investment in BECOL, the non-regulated entity that sells electricity to Belize Electricity Limited, has not been affected by the Government of Belize's decision to expropriate the assets of Belize Electricity Limited at this time. There was no change to the company's 2011E capital expenditure estimate of \$1.2 billion; however, the company has increased its five-year capital expenditure estimate to \$5.7 billion from \$5.5 billion previously.

This report was prepared by an analyst(s) employed by BMO Nesbitt Burns Inc., and who is (are) not registered as a research analyst(s) under FINRA rules. For disclosure statements, including the Analyst's Certification, please refer to pages 2 to 5.

**Company Description** – Fortis Inc. (Fortis) is a publicly listed holding company with four key businesses: electric utility operations, regulated natural gas distribution, non-regulated electric power generation and non-utility property activities. Gas and electric utility operations include Newfoundland Power (100%), Maritime Electric (100%, PEI), Fortis Ontario (100%), Belize Electricity (70.1%), Caribbean Utilities (59.5%, Grand Cayman Island), Turks

and Caicos (100%), FortisAlberta (100%), FortisBC (100%) and the Terasen Gas Companies (100%, British Columbia).  
 Website: [fortisinc.com](http://fortisinc.com)

**Recent Results** – Fortis reported Q2/11 EPS of \$0.33. After adjusting for \$2 million in revenue related to the implementation of a smart meter program at FortisAlberta in 2010, we believe recurring EPS were \$0.32 or slightly lower

This report was prepared by an analyst(s) employed by BMO Nesbitt Burns Inc., and who is (are) not registered as a research analyst(s) under FINRA rules. For disclosure statements, including the Analyst's Certification, please refer to pages 3 to 5.

than our estimate of \$0.34 and the First Call Mean estimate of \$0.35 (range \$0.34–0.36).

**Corporate Developments** – The company has maintained 2011E capital expenditure guidance of \$1.2 billion; however, it has increased its five-year capital expenditure guidance to \$5.7 billion from \$5.5 billion. Approximately 61% of the total relates to the regulated electric utilities, 23% relates to the regulated gas utilities and 16% relates to Fortis' non-regulated businesses.

On July 12, 2011, Fortis announced its decision to terminate the Central Vermont Public Service Corp. (CVPS) merger following the determination by the board of directors that the unsolicited proposal received from Gaz Metro Limited Partnership was a "superior proposal." Fortis received a termination fee of US\$17.5 million from CVPS and a reimbursement of US\$2 million for expenses.

On June 20, 2011, the Government of Belize passed legislation and issued an order to expropriate Fortis's 70% interest in Belize Electricity Limited ("BEL") and dismiss BEL's board of directors.

**Forecasts** – Our diluted EPS estimates are \$1.63 in 2011, \$1.71 in 2012 and \$1.78 in 2013.

**Valuation** – Our \$35.50 target price is based on a weighted valuation approach: 18x 2013E diluted EPS of \$1.78 (12.5%), 1.75x 2013E BVPS of \$21.59 (12.5%) and a target yield of 3.50%, assuming 2013E dividends per share of \$1.26 (75%).

**Recommendation** – Due to its track record of earnings and dividend growth, combined with the company's large capital expenditure plan, we continue to believe that Fortis represents a good long-term investment, especially at current valuation levels. Our rating is Outperform. Member of Top 15 Large Cap and Income stock selections.

**IMPORTANT DISCLOSURES****Analyst's Certification**

I, Michael McGowan, CA, CFA, hereby certify that the views expressed in this report accurately reflect my personal views about the subject securities or issuers. I also certify that no part of my compensation was, is, or will be, directly or indirectly, related to the specific recommendations or views expressed in this report.

Analysts who prepared this report are compensated based upon (among other factors) the overall profitability of BMO Capital Markets and their affiliates, which includes the overall profitability of investment banking services. Compensation for research is based on effectiveness in generating new ideas and in communication of ideas to clients, performance of recommendations, accuracy of earnings estimates, and service to clients.

**Methodology and Risks to Price Target/Valuation**

**Methodology:** Our target price is based on a weighted valuation approach: 18x diluted 2012E EPS (12.5%); 1.75x 2012E BVPS (12.5%) and a target yield of 3.50% based on 2012E dividends per share (75%).

**Risks:** Operations are subject to complex regulation by a variety of provincial, state and federal (Canada, Cayman Islands & Belize) agencies. Changes in regulation may adversely affect performance.

**Company Specific Disclosure**

Disclosure 1: BMO Capital Markets has undertaken an underwriting liability with respect to this issuer within the past 12 months.

Disclosure 2: BMO Capital Markets has provided investment banking services with respect to this issuer within the past 12 months.

Disclosure 3: BMO Capital Markets has managed or co-managed a public offering of securities with respect to this issuer within the past 12 months.

Disclosure 4: BMO Capital Markets or an affiliate has received compensation for investment banking services from this issuer within the past 12 months.

Disclosure 5: BMO Capital Markets or an affiliate received compensation for products or services other than investment banking services within the past 12 months.

Disclosure 6: This issuer is a client (or was a client) of BMO NB, BMO Capital Markets Corp., BMO CM Ltd. or an affiliate within the past 12 months: Investment Banking Services & Non-Securities Related Services.

**Ratings and Sector Key**

We use the following ratings system definitions:

OP = Outperform - Forecast to outperform the market;

Mkt = Market Perform - Forecast to perform roughly in line with the market;

Und = Underperform - Forecast to underperform the market;

(S) = speculative investment;

NR = No rating at this time;

R = Restricted – Dissemination of research is currently restricted.

Market performance is measured by a benchmark index such as the S&P/TSX Composite Index, S&P 500, Nasdaq Composite, as appropriate for each company. BMO Capital Markets eight Top 15 lists guide investors to our best ideas according to different objectives (Canadian large, small, growth, value, income, quantitative; and US large, US small) have replaced the Top Pick rating.

## Introducing 2013E Estimates; Outperform Rating Maintained

### Event

We are introducing our 2013E estimates.

### Impact

Slightly Positive.

### Forecasts

We are introducing 2013E diluted EPS and DPS of \$1.78 and \$1.26 respectively. EPS and DPS growth is largely driven by Fortis's capital expenditure program, through which the company plans to invest \$5.7 billion in its business during the next five years. Our 2011E and 2012E diluted EPS and DPS estimates remain unchanged.

### Valuation

Our revised \$35.50 target price (previously \$35) is based on a weighted valuation approach: 18x 2013E EPS of \$1.78 (12.5%); 1.75x 2013E BVPS of \$21.59 (12.5%); and a target yield of 3.50%, assuming 2013E dividends per share of \$1.26.

### Recommendation

Due to its track record of earnings and dividend growth, combined with the company's large capital expenditure program, we continue to believe Fortis represents a good long-term investment, especially at current valuation levels. Our rating is Outperform.

## IMPORTANT DISCLOSURES

### Analyst's Certification

I, Michael McGowan, CA, CFA, hereby certify that the views expressed in this report accurately reflect my personal views about the subject securities or issuers. I also certify that no part of my compensation was, is, or will be, directly or indirectly, related to the specific recommendations or views expressed in this report.

Analysts who prepared this report are compensated based upon (among other factors) the overall profitability of BMO Capital Markets and their affiliates, which includes the overall profitability of investment banking services. Compensation for research is based on effectiveness in generating new ideas and in communication of ideas to clients, performance of recommendations, accuracy of earnings estimates, and service to clients.

### Company Specific Disclosure

Disclosure 1: BMO Capital Markets has undertaken an underwriting liability with respect to this issuer within the past 12 months.

Disclosure 2: BMO Capital Markets has provided investment banking services with respect to this issuer within the past 12 months.

Disclosure 3: BMO Capital Markets has managed or co-managed a public offering of securities with respect to this issuer within the past 12 months.

Disclosure 4: BMO Capital Markets or an affiliate has received compensation for investment banking services from this issuer within the past 12 months.

Disclosure 5: BMO Capital Markets or an affiliate received compensation for products or services other than investment banking services within the past 12 months.

Disclosure 6: This issuer is a client (or was a client) of BMO NB, BMO Capital Markets Corp., BMO CM Ltd. or an affiliate within the past 12 months: Investment Banking Services & Non-Securities Related Services.

### Methodology and Risks to Price Target/Valuation

**Methodology:** Our target price is based on a weighted valuation approach: 18x diluted 2012E EPS (12.5%); 1.75x 2012E BVPS (12.5%) and a target yield of 3.50% based on 2012E dividends per share (75%).

**Risks:** Operations are subject to complex regulation by a variety of provincial, state and federal (Canada, Cayman Islands & Belize) agencies. Changes in regulation may adversely affect performance.

### Distribution of Ratings (June 30, 2011)

### Ratings and Sector Key

We use the following ratings system definitions:

OP = Outperform - Forecast to outperform the market;

Mkt = Market Perform - Forecast to perform roughly in line with the market;

Und = Underperform - Forecast to underperform the market;

(S) = speculative investment;

NR = No rating at this time;

R = Restricted – Dissemination of research is currently restricted.

Market performance is measured by a benchmark index such as the S&P/TSX Composite Index, S&P 500, Nasdaq Composite, as appropriate for each company. BMO Capital Markets eight Top 15 lists guide investors to our best ideas according to different objectives (Canadian large, small, growth, value, income, quantitative; and US large, US small) have replaced the Top Pick rating.

## Q3/11 Results Slightly Greater Than Expected; Outperform Rating Maintained

### Event

Fortis reported Q3/11 EPS of \$0.30. After adjusting for the receipt of an \$11 million (after-tax) break fee related to the termination of the CVPS merger agreement and a \$2.5 million (after-tax) net foreign exchange gain associated with the company's investment in Belize Electricity Limited, which was expropriated by the Government of Belize on June 20, 2011, we believe that recurring EPS were \$0.24. Recurring EPS were slightly greater than our estimate of \$0.22 and the First Call Mean estimate of \$0.23 (range \$0.22–0.24). The difference between actual and expected EPS was largely due to stronger-than-anticipated earnings at Fortis Generation. Earnings from the company's other business segments were generally consistent with our estimates.

### Impact

Neutral.

### Forecasts

We have updated our estimates to reflect Q3 results. Our 2011E EPS increases to \$1.65. There are no changes to our 2012E and 2013E EPS estimates.

### Valuation

Our \$35.50 target price is based on a weighted valuation approach: 18x 2013E EPS of \$1.78 (12.5%); 1.75x 2013E BVPS of \$21.53 (12.5%); and a target yield of 3.50%, assuming 2013E dividends per share of \$1.26 (75%).

### Recommendation

Due to its track record of earnings and dividend growth, combined with the company's large capital expenditure program, we continue to believe Fortis represents a good long-term investment. Our rating is Outperform.

	2011E \$1.63 to \$1.65

## Q3/11 Results Slightly Greater Than Expected

Fortis reported Q3/11 EPS of \$0.30. After adjusting for the receipt of an \$11 million (after-tax) break fee related to the termination of the CVPS merger agreement and a \$2.5 million (after-tax) net foreign exchange gain associated with the company's investment in Belize Electricity Limited, which was expropriated by the Government of Belize on June 20, 2011, we believe that recurring EPS were \$0.24. Recurring EPS were slightly greater than our estimate of \$0.22 and the First Call Mean estimate of \$0.23 (range \$0.22–0.24). The difference between actual and expected EPS was largely due to stronger-than-anticipated earnings at Fortis Generation. Earnings from the company's other business segments were generally consistent with our estimates.

With respect to growth, we expect Fortis to continue to evaluate the potential acquisition of regulated natural gas or electric utilities in the U.S. Notwithstanding an acquisition, Fortis will continue to advance its capital expenditure program in order to drive organic growth. The company has maintained 2011E capital expenditure guidance of \$1.2 billion and five-year capital expenditure guidance of \$5.7 billion. The majority of this spending is expected to occur at the company's regulated utilities.

Our \$35.50 target price is based on a weighted valuation approach: 18x 2013E EPS of \$1.78 (12.5%); 1.75x 2013E BVPS of \$21.53 (12.5%); and a target yield of 3.50%, assuming 2013E dividends per share of \$1.26 (75%).

At current levels, we believe the company's shares are attractively valued. Our rating is Outperform.

## Q3/11 Results

As set out in Table 1, on a comparable basis, net income increased by 8.5% in Q3/11 versus Q3/10. In order to present results on a comparable basis, Q3/11 GAAP income was adjusted to reverse an \$11 million (after-tax) break fee related to the termination of the CVPS merger agreement and a \$2.5 million (after-tax) net foreign exchange gain associated with the company's previous investment in Belize Electricity Limited. Q3/10 earnings were also adjusted for the reversal of a \$4 million expense originally recorded in Q4/09 related to the cost of converting portions of the distribution system at Terasen Gas Whistler to utilize natural gas instead of propane.

Source: BMO Capital Markets, Company Reports

A discussion of the operating performance of each business segment follows.

### Regulated Gas Utilities – FortisBC Energy Companies

Q3/11 net loss of \$3 million was lower than our estimate of a \$7.5 million loss and an adjusted net loss of \$9 million in Q3/10. We attribute the majority of the variance to seasonality, as timing differences resulted in a lower proportion of expenses recorded in Q3/11 compared to Q3/10.

### Regulated Electric Utilities – FortisAlberta

Q3/11 net income of \$19 million was lower than our estimate of \$20.2 million and consistent with Q3/10 earnings of \$19 million.

### Regulated Electric Utilities – FortisBC

Q3/11 net income of \$10 million was consistent with our estimate of \$10 million and slightly less than Q3/10 net income of \$11 million. The decrease in earnings was largely driven by lower capitalized AFUDC, due to fewer assets under construction during 2011, and higher effective corporate income taxes.

### Regulated Electric Utilities – Newfoundland Power

Q3/11 net income \$8 million was consistent with our estimate of \$7.8 million and Q3/10 net income of \$8 million.

### Regulated Electric Utilities – Other Canadian

Q3/11 net income of \$6 million was greater than our estimate of \$5.4 million and Q3/10 net income of \$5 million. The increase in earning was primarily due to a 3.8% rate increase at Algoma Power that became effective on December 1, 2010.

## Regulated Utilities – Caribbean

The earnings contribution from the Caribbean business segment was \$6 million in Q3/11 versus our estimate of \$7.1 million and Q3/10 net income of \$8 million. The decrease in Q3/11 earnings reflects the lost contribution from Belize Electricity, which contributed approximately \$2 million to earnings during Q3/10.

## Unregulated – Fortis Generation

Fortis Generation reported Q3/11 net income of \$8 million, which was greater than our estimate of \$4.6 million and slightly lower than Q3/10 net income of \$9 million. The difference between actual and expected results was due to the exclusion of earnings from BECOL in our estimates. In order to be conservative, we removed all earnings contributions from BECOL from our estimates after Q1/11, following the announcement on June 20 that the Government of Belize had expropriated Fortis's 70% interest in Belize Electricity Limited ("BEL"). As at October 31, BEL owed BECOL US\$8 million for overdue energy purchases, which represents about one-third of BECOL's annual sales to Belize electricity. Disclosure in the release suggests that the Government of Belize does not intend to expropriate BECOL, and that BECOL continues to deliver electricity to BEL and invoice BEL for deliveries.

## Unregulated – Fortis Properties

Fortis Properties reported Q3/11 net income of \$9 million, which was lower than our estimate of \$10.2 million and consistent with Q3/10 net income of \$9 million. Occupancy at the real estate division increased to 94.2% at the end of the quarter versus 93.7% at the end of Q3/10. At the hospitality division, revenue per available room increased to \$94.83 during Q3/11 versus \$89.54 during Q3/10.

## Regulatory Update

After a lull in 2010, we expect the end of 2011 to be relatively busy from a regulatory perspective. The Alberta Utilities Commission (AUC) is currently moving forward with a Generic Cost of Capital proceeding. The formal hearing began on June 20, 2011 and the AUC is expected to issue a cost of capital decision by the end of the year. The AUC is also exploring the implementation of Performance Based Regulation ("PBR"); however, we understand that a final decision on PBR is not expected until mid-2012. In addition to the broad regulatory initiatives outlined above, a number of Fortis's utilities have submitted rate or other filings in 2011:

- In November 2011, the FortisBC Energy utilities (formerly the Terasen companies) filed an application with the BCUC to amalgamate into one legal entity, effective January 1, 2013. In addition to BCUC approval, the amalgamation requires the consent of the Government of British Columbia;
- In May 2011, the FortisBC Energy utilities filed revenue requirements applications for 2012–2013. FortisBC Energy Inc. is seeking a return on estimated mid-year rate bases of

\$2,754 million in 2012E and \$2,811 million in 2013E, and FortisBC Energy Inc. Vancouver Island is seeking a return on estimated mid-year rate bases of \$788 million in 2012E and \$816 million in 2013E. A decision on the rate application is expected in late Q1/12;

- In June 2011, FortisBC Electric filed a Revenue Requirement Application and Integrated System Plan for 2012–2013, in which it is seeking a return on estimated mid-year net rate bases of \$1,145 million in 2012E, and \$1,212 million in 2013E. A decision on the rate application is expected in late 2011 or early 2012;
- In March 2011, FortisAlberta filed its 2012 and 2013 Distribution Tariff Application (“DTA”). The company requested approval of revenue requirements of \$410 million for 2012 and \$447 million for 2013, for rate increases of 8.2% and 6.9%, respectively. The DTA also proposes approximately \$776 million in gross capital expenditures over the two-year period. We understand that the AUC is only allowing FortisAlberta to settle the DTA through negotiation for 2012 rates in light of the ongoing discussions regarding PBR;
- Earlier in 2011, the interim Government of the Turks and Caicos Islands stated its intention to implement a carbon tax, which would have been applicable to Fortis Turks and Caicos, effective September 2011. To date, no carbon tax has been implemented. In the event that this tax is implemented and is not permitted to be passed onto Fortis Turks and Caicos’ customers, the potential impact to earnings would be approximately \$2–3 million on an annual basis.

## Belize Electricity Update

Fortis has commissioned an independent valuation of its previous investment in Belize Electricity Limited and expects to submit for compensation to the Government of Belize during the fourth quarter of 2011. We also understand that the Government of Belize has commissioned a similar independent valuation of its own. In addition, on October 21, Fortis commenced an action in the Belize Supreme Court to challenge the legality of the expropriation of its investment in Belize Electricity and on October 25, the Government of Belize amended the constitution of Belize to require majority government ownership of three public utility providers, including Belize Electricity, but excluding BECOL.

At this time, it is unclear as to when this situation will be resolved. As at September 30, the Belize Electricity assets (recorded as a long-term other assets), including foreign exchange impacts, totalled \$120 million.

## Estimates

We have updated our model to reflect Q3/11 results.

## IMPORTANT DISCLOSURES

### Analyst's Certification

I, Michael McGowan, CA, CFA, hereby certify that the views expressed in this report accurately reflect my personal views about the subject securities or issuers. I also certify that no part of my compensation was, is, or will be, directly or indirectly, related to the specific recommendations or views expressed in this report.

Analysts who prepared this report are compensated based upon (among other factors) the overall profitability of BMO Capital Markets and their affiliates, which includes the overall profitability of investment banking services. Compensation for research is based on effectiveness in generating new ideas and in communication of ideas to clients, performance of recommendations, accuracy of earnings estimates, and service to clients.

### Company Specific Disclosure

Disclosure 1: BMO Capital Markets has undertaken an underwriting liability with respect to this issuer within the past 12 months.

Disclosure 2: BMO Capital Markets has provided investment banking services with respect to this issuer within the past 12 months.

Disclosure 3: BMO Capital Markets has managed or co-managed a public offering of securities with respect to this issuer within the past 12 months.

Disclosure 4: BMO Capital Markets or an affiliate has received compensation for investment banking services from this issuer within the past 12 months.

Disclosure 5: BMO Capital Markets or an affiliate received compensation for products or services other than investment banking services within the past 12 months.

Disclosure 6: This issuer is a client (or was a client) of BMO NB, BMO Capital Markets Corp., BMO CM Ltd. or an affiliate within the past 12 months: Investment Banking Services & Non-Securities Related Services.

### Methodology and Risks to Price Target/Valuation

**Methodology:** Our target price is based on a weighted valuation approach: 18x diluted 2013E EPS (12.5%); 1.75x 2013E BVPS (12.5%) and a target yield of 3.50% based on 2013E dividends per share (75%).

**Risks:** Operations are subject to complex regulation by a variety of provincial, state and federal (Canada, Cayman Islands & Belize) agencies. Changes in regulation may adversely affect performance.

## Q3/11 Results Slightly Greater Than Expected

---

### Impact

Neutral

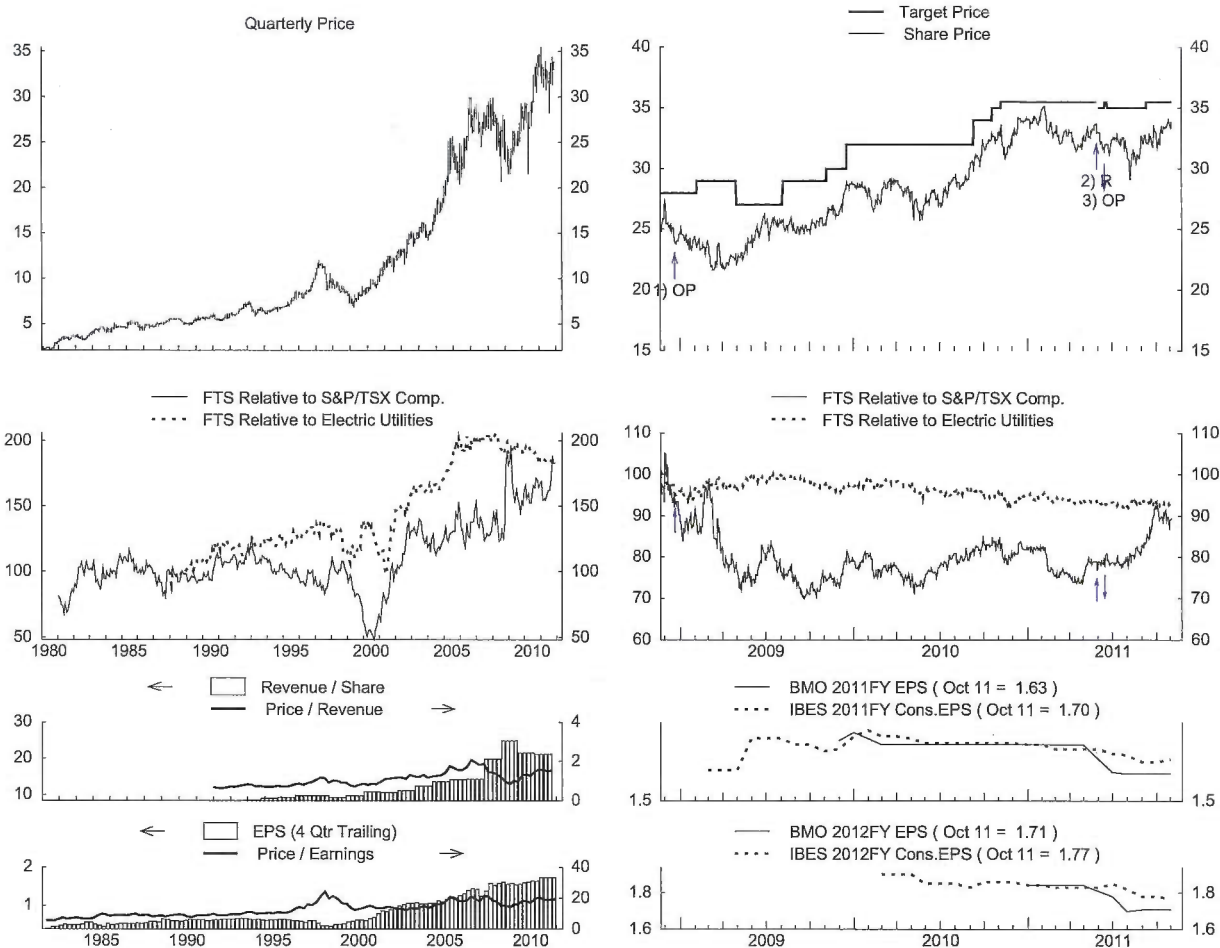

---

### Details & Analysis

Fortis reported Q3/11 GAAP EPS of \$0.30. After adjusting for the receipt of an \$11 million (after-tax) break fee related to the termination of the CVPS merger agreement, and a \$2.5 million (after-tax) net foreign exchange gain associated with the company's investment in Belize Electricity Limited, which was expropriated by the Government of Belize on June 20, 2011, we believe that recurring EPS were \$0.24. Recurring EPS were slightly greater than our estimate of \$0.22 and the First Call Mean estimate of \$0.23 (range \$0.22–0.24). The difference between actual and expected EPS was largely due to stronger-than-anticipated earnings at Fortis Generation. Earnings from the company's other business segments were generally consistent with our estimates. There were no changes to the company's long-term capital expenditure program. Fortis continues to forecast 2011E capital expenditures of \$1.2 billion and capital expenditures of \$5.7 billion during the next five years. Overall, this appears to have been a steady quarter.

This report was prepared by an analyst(s) employed by BMO Nesbitt Burns Inc., and who is (are) not registered as a research analyst(s) under FINRA rules. For disclosure statements, including the Analyst's Certification, please refer to pages 2 to 5.

**IMPORTANT DISCLOSURES****Analyst's Certification**

I, Michael McGowan, CA, CFA, hereby certify that the views expressed in this report accurately reflect my personal views about the subject securities or issuers. I also certify that no part of my compensation was, is, or will be, directly or indirectly, related to the specific recommendations or views expressed in this report.

Analysts who prepared this report are compensated based upon (among other factors) the overall profitability of BMO Capital Markets and their affiliates, which includes the overall profitability of investment banking services. Compensation for research is based on effectiveness in generating new ideas and in communication of ideas to clients, performance of recommendations, accuracy of earnings estimates, and service to clients.

**Company Specific Disclosure**

Disclosure 1: BMO Capital Markets has undertaken an underwriting liability with respect to this issuer within the past 12 months.

Disclosure 2: BMO Capital Markets has provided investment banking services with respect to this issuer within the past 12 months.

Disclosure 3: BMO Capital Markets has managed or co-managed a public offering of securities with respect to this issuer within the past 12 months.

Disclosure 4: BMO Capital Markets or an affiliate has received compensation for investment banking services from this issuer within the past 12 months.

Disclosure 5: BMO Capital Markets or an affiliate received compensation for products or services other than investment banking services within the past 12 months.

Disclosure 6: This issuer is a client (or was a client) of BMO NB, BMO Capital Markets Corp., BMO CM Ltd. or an affiliate within the past 12 months: Investment Banking Services & Non-Securities Related Services.

**Methodology and Risks to Price Target/Valuation**

**Methodology:** Our target price is based on a weighted valuation approach: 18x diluted 2012E EPS (12.5%); 1.75x 2012E BVPS (12.5%) and a target yield of 3.50% based on 2012E dividends per share (75%).

**Risks:** Operations are subject to complex regulation by a variety of provincial, state and federal (Canada, Cayman Islands & Belize) agencies. Changes in regulation may adversely affect performance.

## Updating Model to Reflect 3.4% Dividend Increase; Outperform Rating Maintained

### Event

On December 14, 2010, Fortis announced that it is increasing its annual dividend by 3.4% to \$1.20/share from \$1.16/share. The revised quarterly dividend of \$0.30/share will be payable on March 1 to shareholders of record as of February 15, 2012.

### Impact

Neutral. The annual dividend of \$1.20/share is slightly lower than the FY2012E DPS forecast of \$1.22/share that we had set out in our model.

### Forecasts

We have updated our estimates to reflect FY 2012E dividends of \$1.20. We have also trimmed our FY 2013E dividend estimate to \$1.24 from \$1.26.

### Valuation

Our \$35.50 target price is based on a weighted valuation approach: 18x 2012E diluted EPS of \$1.78 (12.5%), 1.75x 2012E BVPS of \$21.57 (12.5%) and a target yield of 3.50%, assuming 2012E dividends per share of \$1.24 (75%).

### Recommendation

We believe Fortis's shares are attractively valued, considering the company's relatively low-risk, diversified business model. Our rating is Outperform.

**IMPORTANT DISCLOSURES****Analyst's Certification**

I, Michael McGowan, CA, CFA, hereby certify that the views expressed in this report accurately reflect my personal views about the subject securities or issuers. I also certify that no part of my compensation was, is, or will be, directly or indirectly, related to the specific recommendations or views expressed in this report.

Analysts who prepared this report are compensated based upon (among other factors) the overall profitability of BMO Capital Markets and their affiliates, which includes the overall profitability of investment banking services. Compensation for research is based on effectiveness in generating new ideas and in communication of ideas to clients, performance of recommendations, accuracy of earnings estimates, and service to clients.

**Company Specific Disclosure**

Disclosure 1: BMO Capital Markets has undertaken an underwriting liability with respect to this issuer within the past 12 months.

Disclosure 2: BMO Capital Markets has provided investment banking services with respect to this issuer within the past 12 months.

Disclosure 3: BMO Capital Markets has managed or co-managed a public offering of securities with respect to this issuer within the past 12 months.

Disclosure 4: BMO Capital Markets or an affiliate has received compensation for investment banking services from this issuer within the past 12 months.

Disclosure 5: BMO Capital Markets or an affiliate received compensation for products or services other than investment banking services within the past 12 months.

Disclosure 6: This issuer is a client (or was a client) of BMO NB, BMO Capital Markets Corp., BMO CM Ltd. or an affiliate within the past 12 months: Investment Banking Services & Non-Securities Related Services.

**Methodology and Risks to Price Target/Valuation**

**Methodology:** Our target price is based on a weighted valuation approach: 18x diluted 2012E EPS (12.5%); 1.75x 2012E BVPS (12.5%) and a target yield of 3.50% based on 2012E dividends per share (75%).

**Risks:** Operations are subject to complex regulation by a variety of provincial, state and federal (Canada, Cayman Islands & Belize) agencies. Changes in regulation may adversely affect performance.

**Ratings and Sector Key**

We use the following ratings system definitions:

OP = Outperform - Forecast to outperform the market;

Mkt = Market Perform - Forecast to perform roughly in line with the market;

Und = Underperform - Forecast to underperform the market;

(S) = speculative investment;

NR = No rating at this time;

R = Restricted – Dissemination of research is currently restricted.

Market performance is measured by a benchmark index such as the S&P/TSX Composite Index, S&P 500, Nasdaq Composite, as appropriate for each company. BMO Capital Markets eight Top 15 lists guide investors to our best ideas according to different objectives (Canadian large, small, growth, value, income, quantitative; and US large, US small) have replaced the Top Pick rating.

## Q4/11 Results in Line; Outperform Rating Maintained

### Event

Fortis reported Q4/11 EPS of \$0.46 vs. our estimate of \$0.45 and the First Call Mean estimate of \$0.47 (range \$0.45-0.50). In general, the majority of the company's business segments appeared to perform well and earnings from the individual segments were generally consistent with our estimates.

### Impact

Neutral. We expect that earnings and dividend growth will continue to be driven by rate base investment. Fortis's capital expenditure budget is \$1.3 billion in 2012 (up from \$1.2 billion in 2011) and \$5.5 billion during the next five years. The company also continues to evaluate the acquisition of U.S. gas or electric utilities. Overall, we believe that Q4 results represented a solid end to 2011.

### Forecasts

There are no changes to our estimates.

### Valuation

Our \$35.50 target price is based on a weighted valuation approach: 18x 2012E diluted EPS of \$1.78 (12.5%), 1.75x 2012E BVPS of \$22.23 (12.5%) and a target yield of 3.50%, assuming 2012E dividends per share of \$1.24 (75%).

### Recommendation

We believe Fortis's shares are attractively valued, considering the company's relatively low-risk, diversified business model. Our rating is Outperform.

## Q4 Results in Line; Expect Continued Investment in Rate Base to Drive Earnings Growth

Fortis reported Q4/11 EPS of \$0.46 vs. our estimate of \$0.45 and the First Call Mean estimate of \$0.47 (range \$0.45-0.50). In general, the majority of the company's business segments appeared to perform well and earnings from the individual segments were generally consistent with our estimates.

With respect to growth initiatives, although the company was unsuccessful last year with its offer to acquire Central Vermont Public Service, Fortis will continue to evaluate the acquisition of gas and electric utilities in the U.S. Until the company is able to acquire a U.S.-based utility, it will focus on growing through additions to rate base. The company's 2012 capital budget has been set at \$1.3 billion (up from \$1.2 billion in 2011) and it continues to target total investment of \$5.5 billion during the next five years.

Overall, we viewed the Q4 results as a solid end to 2011. We are maintaining our \$35.50 price target, which is based on a weighted valuation approach: 18x 2012E diluted EPS of \$1.78 (12.5%), 1.75x 2012E BVPS of \$222.23 (12.5%) and a target yield of 3.50%, assuming 2012E dividends per share of \$1.24 (75%).

We believe Fortis's shares are attractively valued, considering the company's relatively low-risk, diversified business model. Our rating is Outperform.

### Q4/11 Results

Fortis reported Q4/11 GAAP net income of \$86 million, which was \$1.4 million greater than our estimate of \$84.6 million and \$1 million greater than Q4/10 GAAP net income of \$85 million. A comparison of Q4/11 and Q4/10 results by business segment is set out in Table 1.

A discussion of the operating performance of each business segment follows.

## Regulated Gas Utilities – FortisBC Energy Companies

Q4/11 net income of \$51 million was greater than our estimate of \$48.1 million and Q4/10 net income of \$45 million. We attribute the majority of the variance to seasonality, improved economic conditions in the forestry and mining sectors and increased residential consumption, which led to much higher sales volumes (43,809 GJ in Q4/11 vs. 38,586 GJ in Q4/10).

On an annual basis, adjusted net income increased by 10.3% to \$139 million in 2011 from \$126 million in 2010.

## Regulated Electric Utilities – FortisAlberta

Q4/11 net income of \$17 million was slightly lower than our estimate of \$17.9 million and consistent with Q4/10 earnings of \$17 million.

On an annual basis, adjusted net income increased by 7.4% to \$73 million in 2011 from \$68 million in 2010. The increase to adjusted net income was primarily driven by rate base growth.

## Regulated Electric Utilities – Newfoundland Power

Q4/11 net income of \$8 million was consistent with our estimate of \$7.9 million and slightly lower than Q4/10 net income of \$9 million.

On an annual basis, net income decreased by 2.9% to \$34 million in 2011 from \$35 million in 2010.

## Regulated Electric Utilities – Other Canadian

Q4/11 net income of \$4 million was slightly less than our estimate of \$4.5 million and Q4/10 net income of \$5 million. The decrease in earnings was primarily due to a rate of return adjustment at Maritime Electric, which reduced Q4/11 revenue by approximately \$2 million as a result of higher-than-expected electricity sales during 2011.

On an annual basis, net income increased by 15.8% to \$22 million in 2011 from \$19 million in 2010.

## Regulated Utilities – Caribbean

The earnings contribution from the Caribbean business segment was \$3 million in Q4/11 versus our estimate of \$4.2 million and Q4/10 net income of \$4 million. The decrease in earnings reflects higher operating expenses at Fortis Turks and Caicos, which were largely due to consulting fees associated with ongoing regulatory matters and inflationary cost increases.

On an annual basis, net income decreased by 13.0% to \$20 million in 2011 from \$23 million in 2010.

## Unregulated – Fortis Generation

Fortis Generation reported net income of \$5 million, which was greater than our estimate of \$2.1 million and less than Q4/10 net income of \$6 million. The difference between actual and expected results was due to the exclusion of earnings from BECOL in our estimates. In order to be conservative, we removed all earnings contributions from BECOL from our estimates after Q1/11, following the announcement on June 20, 2011, that the Government of Belize had expropriated Fortis's 70% interest in Belize Electricity Limited ("BEL"). Disclosure in the release suggests that the Government of Belize does not intend to expropriate BECOL, and that BECOL continues to deliver electricity to BEL and invoice BEL for deliveries.

On an annual basis, net income decreased by 10.0% to \$18 million in 2011 from \$20 million in 2010.

## Unregulated – Fortis Properties

Fortis Properties reported Q4/11 net income of \$5 million, which was lower than our estimate of \$7.9 million and Q4/10 net income of \$7 million. Decreased occupancy at the hospitality properties in Western Canada and higher corporate income taxes were responsible for the decline. Occupancy at the real estate division decreased to 93.2% at the end of the quarter versus 94.5% at the end of Q4/10. Revenue per available room increased to \$72.39 during Q4/11 versus \$70.76 during Q4/10.

On an annual basis, net income decreased by 11.5% to \$23 million in 2011 from \$26 million in 2010.

## Other Items

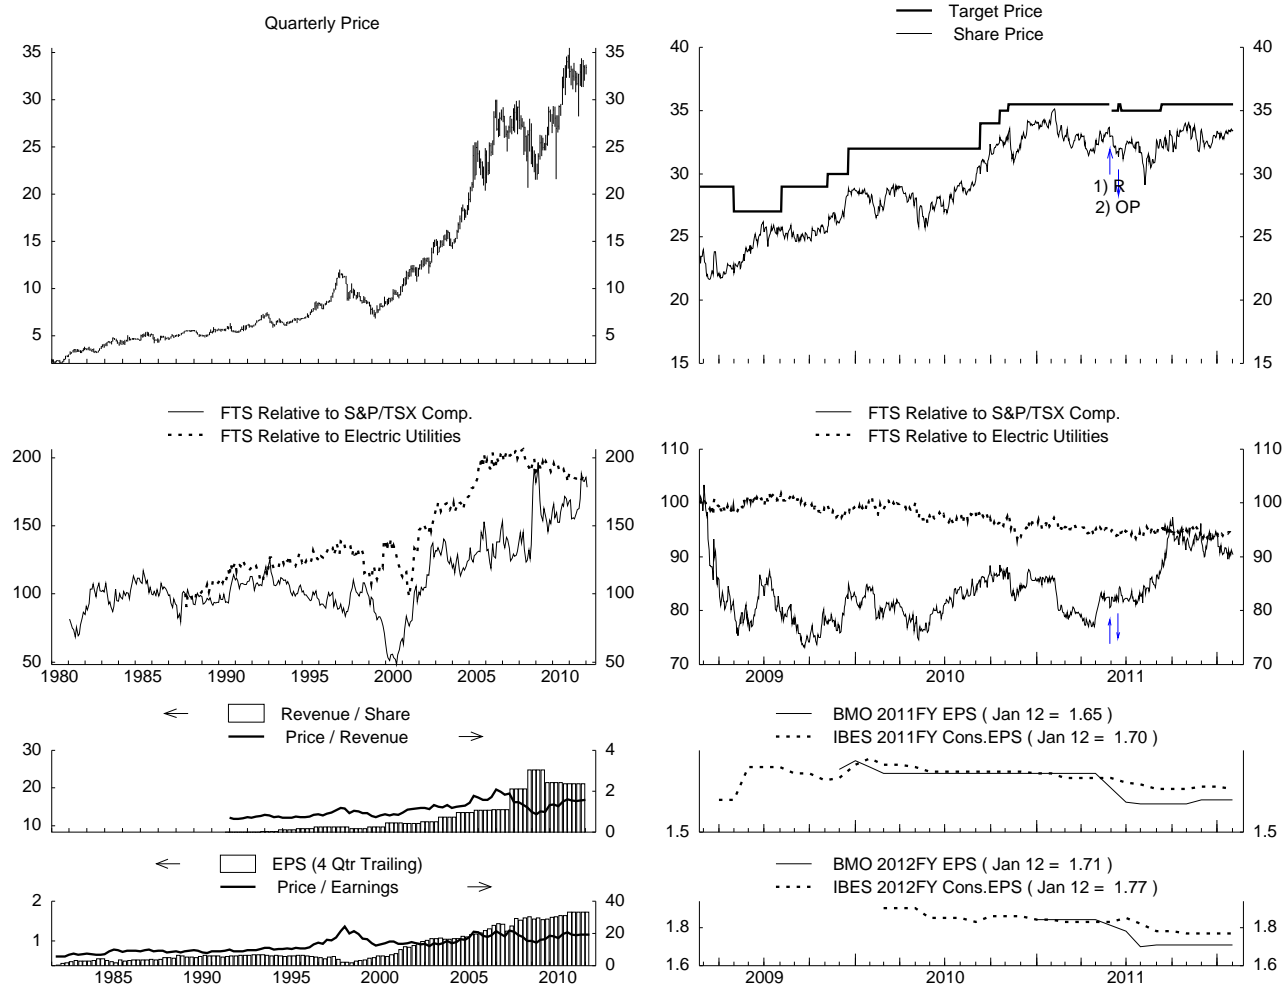

- Fortis continues to receive payments for electricity sales made by BECOL to BEL. As at December 31, 2011, BEL had an accounts receivable balance of US\$7.4 million, which is consistent with a receivable of US\$8 million that was outstanding at September 30, 2011.
- Little update was provided about the cost of capital review requested by the British Columbia Utilities Commission. The review is expected to occur in 2012, and will affect the FortisBC gas and electric utilities.

**IMPORTANT DISCLOSURES****Analyst's Certification**

I, Michael McGowan, CA, CFA, hereby certify that the views expressed in this report accurately reflect my personal views about the subject securities or issuers. I also certify that no part of my compensation was, is, or will be, directly or indirectly, related to the specific recommendations or views expressed in this report.

Analysts who prepared this report are compensated based upon (among other factors) the overall profitability of BMO Capital Markets and their affiliates, which includes the overall profitability of investment banking services. Compensation for research is based on effectiveness in generating new ideas and in communication of ideas to clients, performance of recommendations, accuracy of earnings estimates, and service to clients.

**Company Specific Disclosure**

Disclosure 1: BMO Capital Markets has undertaken an underwriting liability with respect to this issuer within the past 12 months.

Disclosure 2: BMO Capital Markets has provided investment banking services with respect to this issuer within the past 12 months.

Disclosure 3: BMO Capital Markets has managed or co-managed a public offering of securities with respect to this issuer within the past 12 months.

Disclosure 4: BMO Capital Markets or an affiliate has received compensation for investment banking services from this issuer within the past 12 months.

Disclosure 5: BMO Capital Markets or an affiliate received compensation for products or services other than investment banking services within the past 12 months.

Disclosure 6: This issuer is a client (or was a client) of BMO NB, BMO Capital Markets Corp., BMO CM Ltd. or an affiliate within the past 12 months: Investment Banking Services & Non-Securities Related Services.

**Methodology and Risks to Price Target/Valuation**

**Methodology:** Our target price is based on a weighted valuation approach: 18x diluted 2012E EPS (12.5%); 1.75x 2012E BVPS (12.5%) and a target yield of 3.50% based on 2012E dividends per share (75%).

**Risks:** Operations are subject to complex regulation by a variety of provincial, state and federal (Canada, Cayman Islands, and Belize) agencies. Changes in regulation may adversely affect performance.

**Distribution of Ratings (December 30, 2011)**

**Ratings and Sector Key**

We use the following ratings system definitions:

OP = Outperform - Forecast to outperform the market;

Mkt = Market Perform - Forecast to perform roughly in line with the market;

Und = Underperform - Forecast to underperform the market;

(S) = speculative investment;

NR = No rating at this time;

R = Restricted – Dissemination of research is currently restricted.

Market performance is measured by a benchmark index such as the S&P/TSX Composite Index, S&P 500, Nasdaq Composite, as appropriate for each company. BMO Capital Markets eight Top 15 lists guide investors to our best ideas according to different objectives (Canadian large, small, growth, value, income, quantitative; and US large, US small) have replaced the Top Pick rating.

## Q4/11 Results in Line

---

### Impact

Neutral

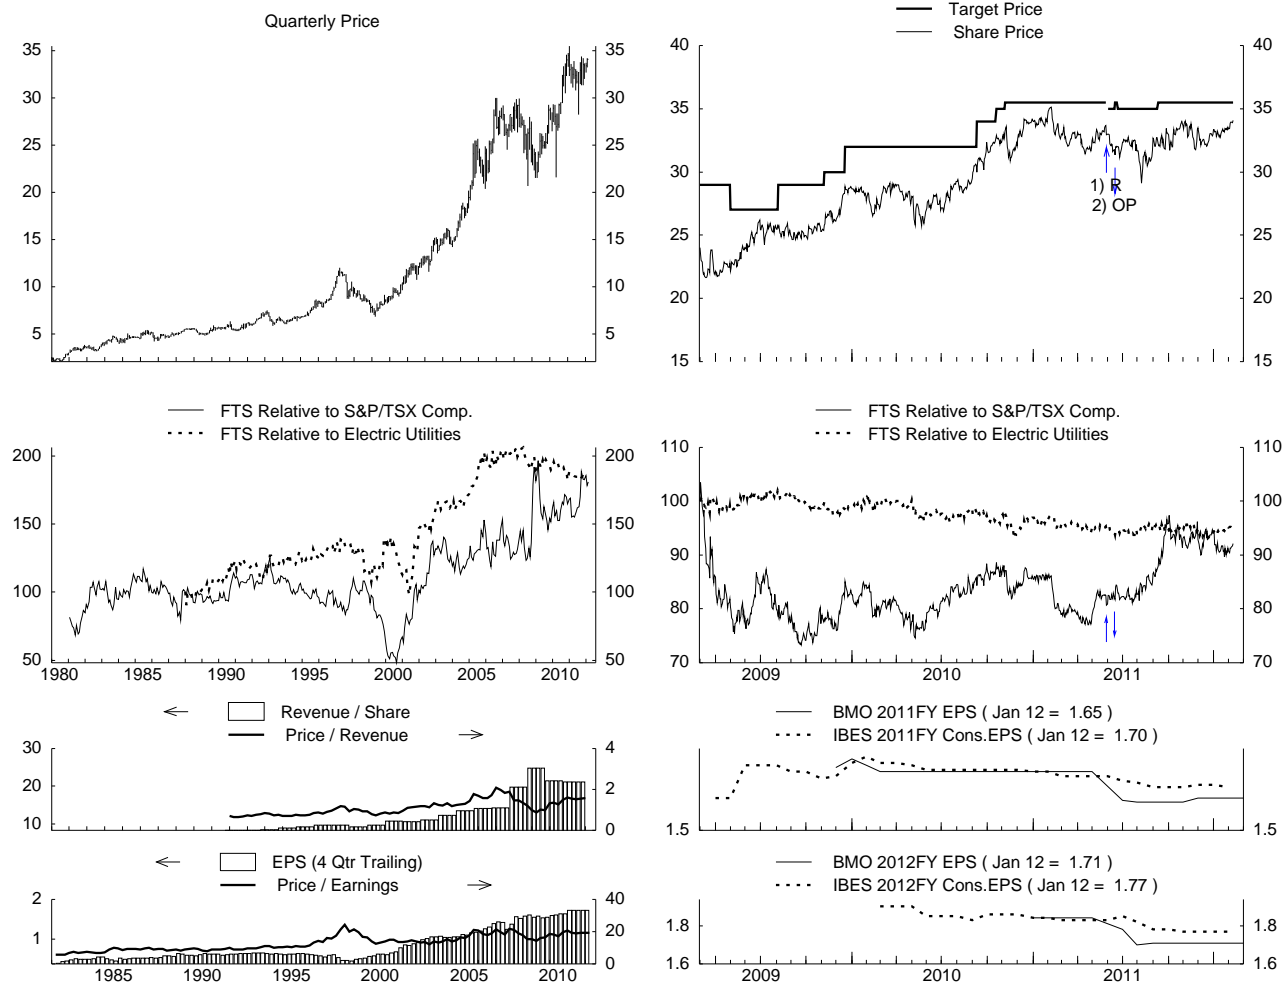

---

### Details & Analysis

Fortis reported Q4/11 EPS of \$0.46 vs. our estimate of \$0.45 and the First Call Mean estimate of \$0.47 (range \$0.45–0.50). In general, the majority of the company's business segments appeared to perform well and earnings from the individual segments were generally consistent with our estimates. Earnings and dividend growth in 2012 should be driven by the company's capital program. Fortis's capital expenditure budget is \$1.3 billion in 2012 (up from \$1.2 billion in 2011) and \$5.5 billion during the next five years. The company continues to evaluate expanding in the United States through the potential acquisition of a regulated gas or electric utility. In summary, the Q4/11 results appear to represent a solid end to 2011.

This report was prepared by an analyst(s) employed by BMO Nesbitt Burns Inc., and who is (are) not registered as a research analyst(s) under FINRA rules. For disclosure statements, including the Analyst's Certification, please refer to pages 2 to 5.

### **Ratings and Sector Key**

We use the following ratings system definitions:

OP = Outperform - Forecast to outperform the market;

Mkt = Market Perform - Forecast to perform roughly in line with the market;

Und = Underperform - Forecast to underperform the market;

(S) = speculative investment;

NR = No rating at this time;

R = Restricted – Dissemination of research is currently restricted.

Market performance is measured by a benchmark index such as the S&P/TSX Composite Index, S&P 500, Nasdaq Composite, as appropriate for each company. BMO Capital Markets eight Top 15 lists guide investors to our best ideas according to different objectives (Canadian large, small, growth, value, income, quantitative; and US large, US small) have replaced the Top Pick rating.

## Acquisition of CH Energy Group Proposed

---

### Impact

Potentially Positive

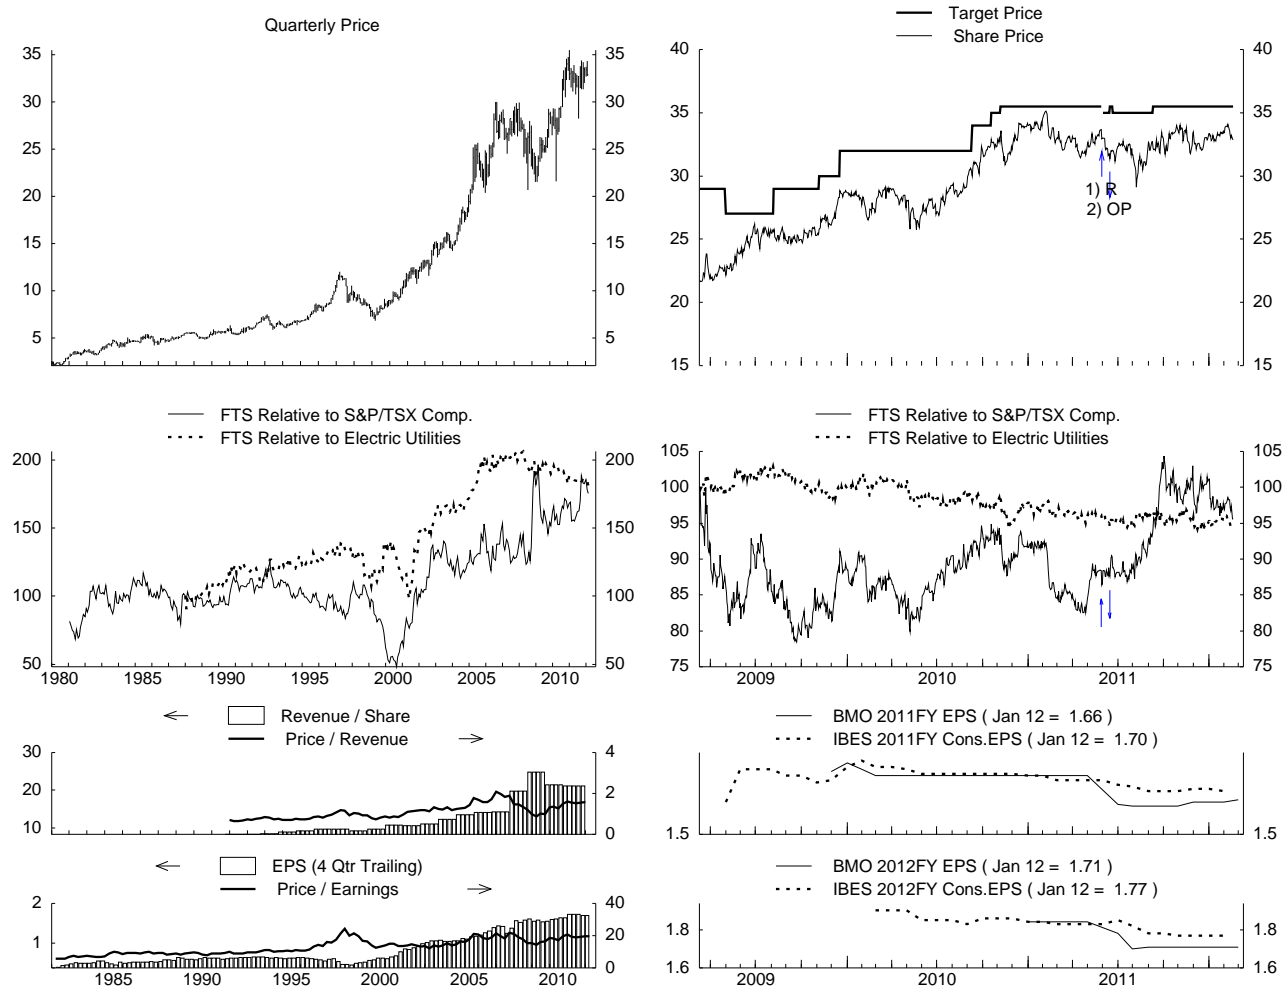

---

### Details & Analysis

Fortis announced that it has entered into an agreement to acquire CH Energy Group Inc. for US\$65/share, which translates into a total purchase price of approximately US\$1.5 billion, including the assumption of approximately US\$500 million of debt. The purchase price represents a premium of approximately 10.5% over the most recent closing price of CH Energy Group's common shares, and values CH at approximately 20.2x 2012E EPS, based on estimates provided by Bloomberg. We believe the following points regarding the proposed acquisition are relevant: (1) Approximately 97% of CH Energy Group's earnings are derived from CH Hudson Gas and Electric Corporation, which is a regulated natural gas and electric utility located in New York State; (2) For the three-year period beginning on July 1, 2010, CH Hudson's rates have been established using a 10% ROE and a capital structure of 48% common equity; (3) We estimate that the acquisition could be approximately \$0.05/share accretive to Fortis' EPS once it closes; and (4) The transaction will initially be funded through the use of credit lines; however, we expect that Fortis could issue approximately C\$400 million of equity to permanently finance the transaction. Closing of the transaction is expected to occur within 12 months, and is subject to customary regulatory and shareholder approvals.

This report was prepared by an analyst(s) employed by BMO Nesbitt Burns Inc., and who is (are) not registered as a research analyst(s) under FINRA rules. For disclosure statements, including the Analyst's Certification, please refer to pages 2 to 5.

**Methodology and Risks to Price Target/Valuation**

**Methodology:** Our target price is based on a weighted valuation approach: 18x diluted 2012E EPS (12.5%); 1.75x 2012E BVPS (12.5%) and a target yield of 3.50% based on 2012E dividends per share (75%).

**Risks:** Operations are subject to complex regulation by a variety of provincial, state and federal (Canada, Cayman Islands & Belize) agencies. Changes in regulation may adversely affect performance.

**Ratings and Sector Key**

We use the following ratings system definitions:

OP = Outperform - Forecast to outperform the market;

Mkt = Market Perform - Forecast to perform roughly in line with the market;

Und = Underperform - Forecast to underperform the market;

(S) = speculative investment;

NR = No rating at this time;

R = Restricted – Dissemination of research is currently restricted.

Market performance is measured by a benchmark index such as the S&P/TSX Composite Index, S&P 500, Nasdaq Composite, as appropriate for each company. BMO Capital Markets eight Top 15 lists guide investors to our best ideas according to different objectives (Canadian large, small, growth, value, income, quantitative; and US large, US small) have replaced the Top Pick rating.

**Company Description** – Fortis Inc. (Fortis) is a publicly listed holding company with four key businesses: electric utility operations, regulated natural gas distribution, non-regulated electric power generation and non-utility property activities. Gas and electric utility operations include Newfoundland Power (100%), Maritime Electric (100%, PEI), Fortis Ontario (100%), Caribbean Utilities (59.5%, Grand Cayman Island), Turks and Caicos (100%),

FortisAlberta (100%), FortisBC (100%) and the FortisBC Energy Companies (100%, British Columbia). *Website:* fortisinc.com

**Recent Results** – Fortis reported Q4/11 EPS of \$0.46 versus the First Call Mean estimate of \$0.47 (range \$0.45–\$0.50) and Q4/10 EPS of \$0.49.

This report was prepared by an analyst(s) employed by BMO Nesbitt Burns Inc., and who is (are) not registered as a research analyst(s) under FINRA rules. For disclosure statements, including the Analyst's Certification, please refer to the back pages.

**Corporate Developments** – On February 21, 2012, Fortis announced that it had entered into an agreement to acquire CH Energy Group Inc. for US\$65/share, which translates into a total purchase price of approximately US\$1.5 billion, including the assumption of approximately US\$500 million of debt. The purchase price represents a premium of approximately 10.5% over the most recent closing price of CH Energy Group's common shares, and values CH at approximately 20.2x 2012E EPS, based on estimates provided by Bloomberg.

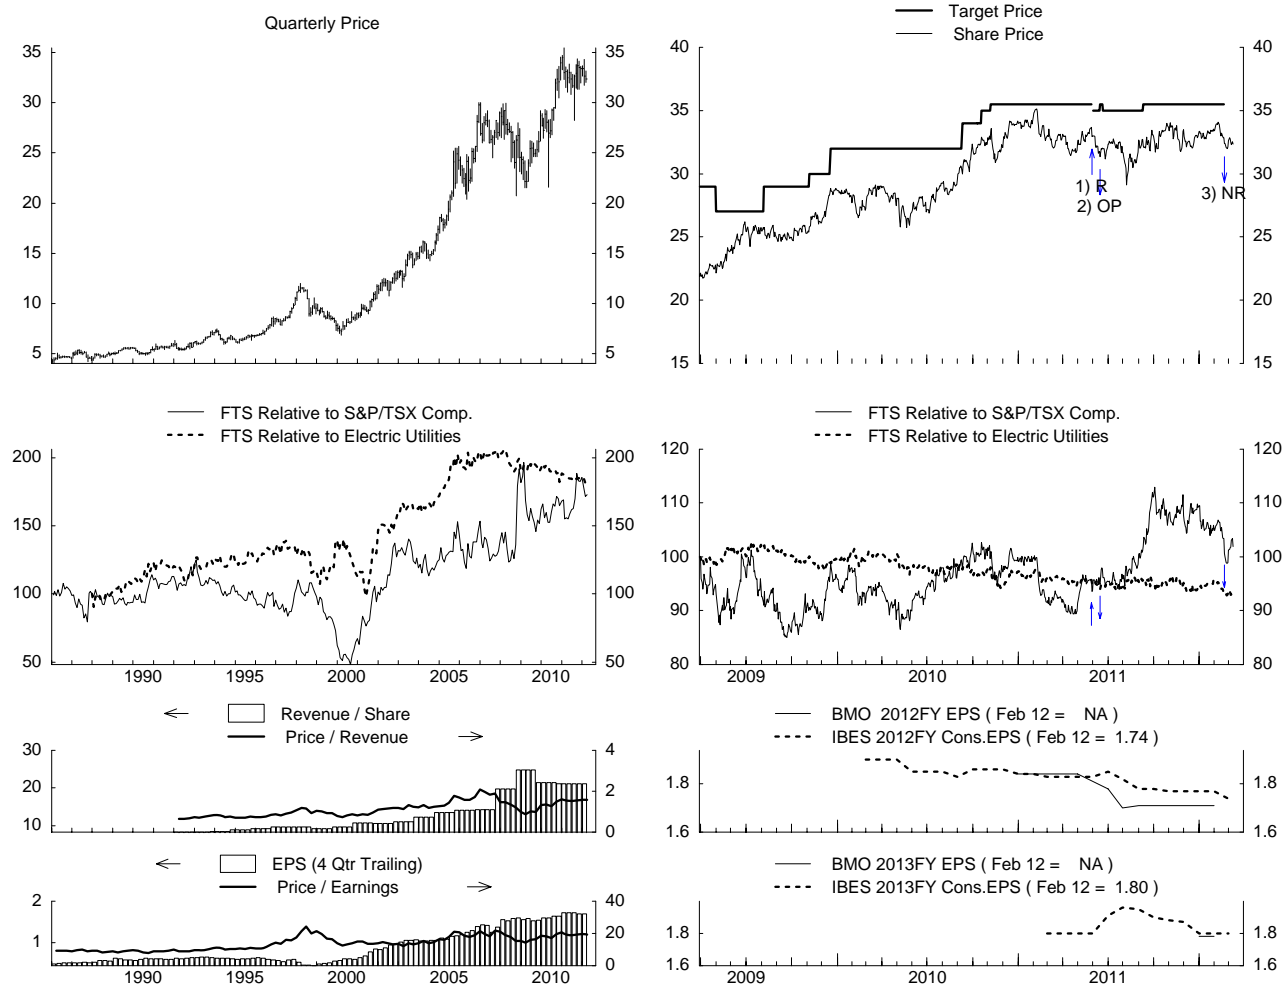

The company's 2012 capital budget has been set at \$1.3 billion and it continues to target total investment of \$5.5

billion during the next five years. Approximately 64% of the total relates to the regulated electric utilities, 23% relates to the regulated gas utilities and 13% relates to Fortis' non-regulated businesses.

Fortis continues to receive payments for electricity sales made by Belize Electricity Company Limited ("BECOL") to Belize Electricity Limited ("BEL"). As at December 31, 2011, BECOL had an accounts receivable balance of US\$7.4 million, which is consistent with a receivable of US\$8 million that was outstanding at September 30, 2011.

**Recommendation** – Fortis is not rated. Member of Top 15 Income stock selections.

**IMPORTANT DISCLOSURES****Analyst's Certification**

I, BMO CM Research, hereby certify that the views expressed in this report accurately reflect my personal views about the subject securities or issuers. I also certify that no part of my compensation was, is, or will be, directly or indirectly, related to the specific recommendations or views expressed in this report.

Analysts who prepared this report are compensated based upon (among other factors) the overall profitability of BMO Capital Markets and their affiliates, which includes the overall profitability of investment banking services. Compensation for research is based on effectiveness in generating new ideas and in communication of ideas to clients, performance of recommendations, accuracy of earnings estimates, and service to clients.

**Methodology and Risks to Price Target/Valuation**

**Methodology:** Our target price is based on a weighted valuation approach: 18x diluted 2012E EPS (12.5%); 1.75x 2012E BVPS (12.5%) and a target yield of 3.50% based on 2012E dividends per share (75%).

**Risks:** Operations are subject to complex regulation by a variety of provincial, state and federal (Canada, Cayman Islands & Belize) agencies. Changes in regulation may adversely affect performance.

**Company Specific Disclosure**

Disclosure 1: BMO Capital Markets has undertaken an underwriting liability with respect to this issuer within the past 12 months.

Disclosure 2: BMO Capital Markets has provided investment banking services with respect to this issuer within the past 12 months.

Disclosure 3: BMO Capital Markets has managed or co-managed a public offering of securities with respect to this issuer within the past 12 months.

Disclosure 4: BMO Capital Markets or an affiliate has received compensation for investment banking services from this issuer within the past 12 months.

Disclosure 5: BMO Capital Markets or an affiliate received compensation for products or services other than investment banking services within the past 12 months.

Disclosure 6: This issuer is a client (or was a client) of BMO NB, BMO Capital Markets Corp., BMO CM Ltd. or an affiliate within the past 12 months: Investment Banking Services & Non-Securities Related Services.

Disclosure 8: BMO Capital Markets or an affiliate has a financial interest in 1% or more of any class of the equity securities of this issuer.

**Ratings and Sector Key**

We use the following ratings system definitions:

OP = Outperform - Forecast to outperform the market;

Mkt = Market Perform - Forecast to perform roughly in line with the market;

Und = Underperform - Forecast to underperform the market;

(S) = speculative investment;

NR = No rating at this time;

R = Restricted – Dissemination of research is currently restricted.

Market performance is measured by a benchmark index such as the S&P/TSX Composite Index, S&P 500, Nasdaq Composite, as appropriate for each company. BMO Capital Markets eight Top 15 lists guide investors to our best ideas according to different objectives (Canadian large, small, growth, value, income, quantitative; and US large, US small) have replaced the Top Pick rating.

## Initiating Coverage at Outperform; Your All-Weather Stock

### The Company

Fortis is Canada's largest and most diversified regulated distribution utility company, with over 2,000,000 natural gas and electricity customers across the country. The company also has a small portfolio of real estate holdings and interests in two Caribbean regulated electricity distribution companies. In addition, the company is developing the 335 MW Waneta Dam expansion, a \$900 million contracted hydro project (51% owned) that is expected to be commissioned by spring 2015.

### Forecasts

We are introducing EPS (f.d) forecasts of \$1.74 in 2012 and \$1.81 in 2013.

### Valuation

Our target price of \$34.50 represents a 19x 2013E EPS, which is a premium to its peer group and toward the upper end of its five-year historical trading range. We believe the premium is justified given its superior earnings visibility (~90% of earnings are derived from regulated operations)

### Recommendation

We are initiating coverage of Fortis with an Outperform rating. Fortis is hardly a market darling these days amid less robust earnings growth and uncertainty regarding its unregulated hydro assets in Belize. We have heard this song before, and while we recognize the market is waiting anxiously for a full resolution of these issues, we would argue that these issues are already priced in. In the meantime, we believe the market should return its attention to the company's sizable \$5.5 billion relatively low-risk organic growth initiatives through 2016, which should ultimately bear fruit. Aside from its organic growth execution scorecard, another key driver for Fortis' share price in the near term is the successful consummation of NY-based utility CH Energy, which still requires approval from CH Energy shareholders (likely summer 2012) and regulators (Q1/13). Please refer to our [report](#) for further details.

**Ratings and Sector Key**

We use the following ratings system definitions:

OP = Outperform - Forecast to outperform the market;

Mkt = Market Perform - Forecast to perform roughly in line with the market;

Und = Underperform - Forecast to underperform the market;

(S) = speculative investment;

NR = No rating at this time;

R = Restricted – Dissemination of research is currently restricted.

Market performance is measured by a benchmark index such as the S&P/TSX Composite Index, S&P 500, Nasdaq Composite, as appropriate for each company. BMO Capital Markets eight Top 15 lists guide investors to our best ideas according to different objectives (Canadian large, small, growth, value, income, quantitative; and US large, US small) have replaced the Top Pick rating.

## Q1/12 Results Slightly Lower Than Expected

---

### Impact

Neutral

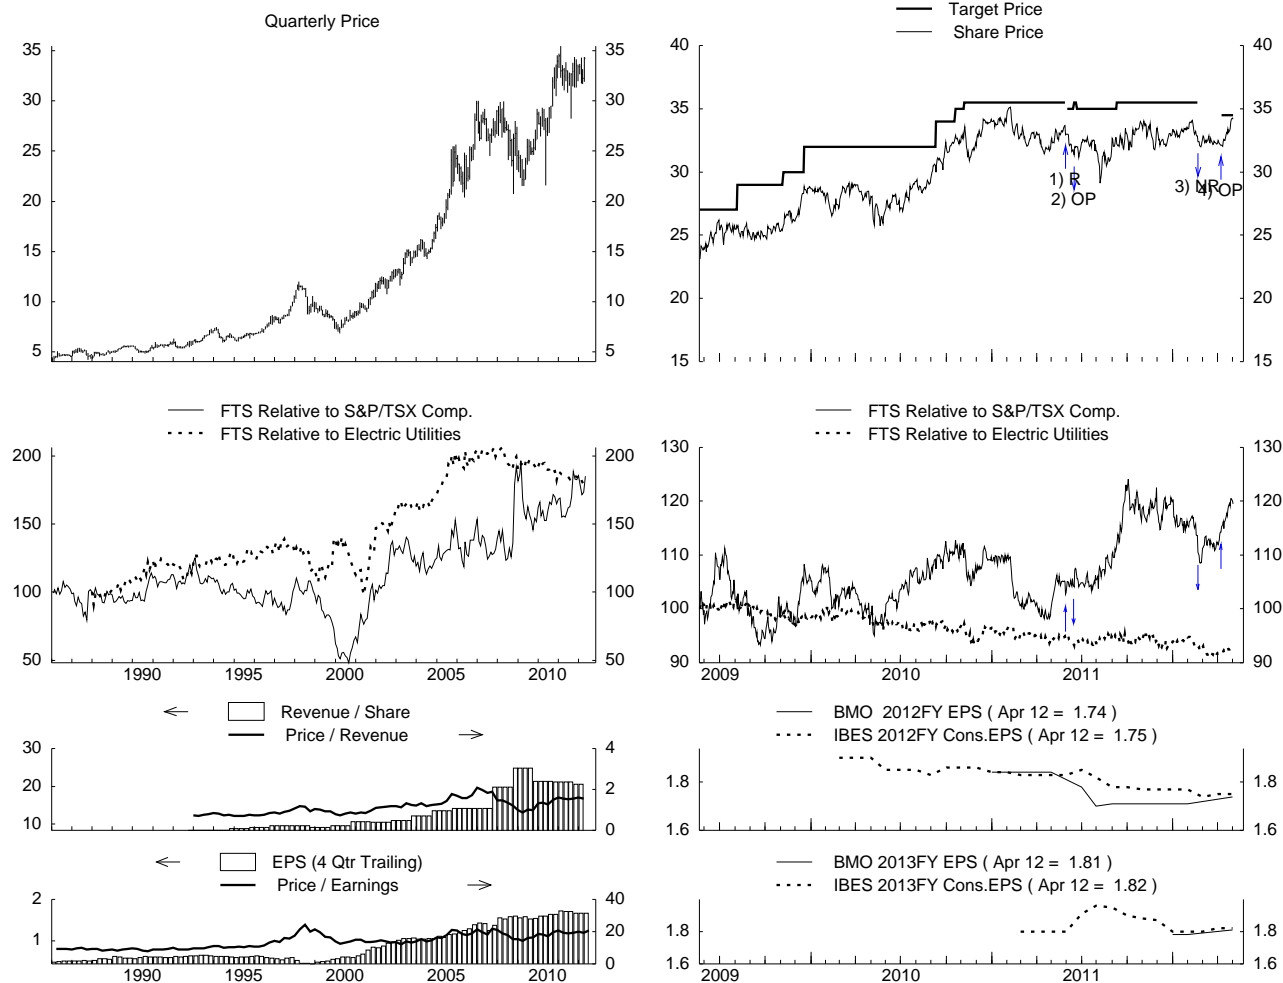

---

### Details & Analysis

Fortis reported Q1/12 results that were slightly lower than our estimates but in line with consensus. The company reported headline earnings of \$0.64 and comparable earnings of \$0.66 after adjusting for one-time acquisition costs associated with the proposed CH Energy transaction. The variance vs. our estimate was largely due to lower-than expected earnings contribution from FortisAlberta and FortisBC. Key highlights: (1) the company reaffirmed capital expenditures of \$1.3 billion in 2012 and ~\$5.5 billion over the five-year period of 2012-2016. Notably, its 335 MW expansion of the Waneta Dam (50% Fortis) is on track for an expected in-service date of spring 2015; (2) regulatory filings were made recently with the New York State Public Service Commission (April 20) and the Federal Energy Regulatory Commission (April 23) in connection with its proposed acquisition of CH Energy Group. A CH Energy shareholder vote is expected in mid-2012, with closing expected at the end of Q1/13; and (3) the British Columbia Utilities Commission is currently moving forward with a Cost of Capital proceeding regarding the appropriate allowed ROE and deemed capital structure for utilities subject to its review, effective January 1, 2013. A return to an ROE automatic adjustment (effective for 2014) will also be examined. We estimate that a 50 bps change in allowed ROE at Fortis' B.C.-based utilities will impact its consolidated EPS by ~\$0.05.

This report was prepared by an analyst(s) employed by BMO Nesbitt Burns Inc., and who is (are) not registered as a research analyst(s) under FINRA rules. For disclosure statements, including the Analyst's Certification, please refer to pages 2 to 5.

## Q1 – Onward and Upward

### Event

Fortis reported Q1/12 results that were slightly lower than our estimates but in line with consensus. The company reported headline earnings of \$0.64 and comparable earnings of \$0.66 after adjusting for one-time acquisition costs associated with the proposed CH Energy transaction. Comparable EPS were slightly lower than our estimate of \$0.69, but generally consistent with Street consensus of \$0.67 per share. The variance vs. our estimate was largely due to lower-than-expected earnings contribution from FortisAlberta, FortisBC Electric and Fortis Properties, partially offset by higher-than-expected results from Other Canadian and its gas utility.

### Impact

Neutral.

### Forecasts

We have updated our financial model to reflect Q1/12 results and revised assumptions. We are lowering our 2012 EPS estimate (f.d.) to \$1.71 from \$1.74 but increasing our 2013 estimate (f.d.) to \$1.84 from \$1.81.

### Valuation

We have raised our 12-month target price by \$1 to \$35.50. Our target price of \$35.50 represents 19.2x 2013E EPS (from 19.0x previously) our revised 2013 EPS forecast, which is a premium to its peer group and towards the upper end of its five-year historical trading range. We believe the premium is justified given its superior earnings visibility and the secular reduction observed in 10-year government of Canada bond yields.

### Recommendation

We continue to rate the shares of Fortis Outperform.

## Q1 – Onward and Upward

- **We are maintaining an Outperform rating on Fortis shares and increasing our 12-month target price by \$1 (~3%) to \$35.50 in connection with our revised estimate and target multiple.** Despite bottom-line results that fell shy of our expectations, Fortis' first-quarter results reinforced the positive earnings momentum that the company has put in place via ownership of several utility distribution businesses across Canada that possess strong growth prospects. In our view, Fortis is well positioned to grow its EPS to ~\$2.00 by 2015 while its significant exposure to low-risk utility operations should afford it shelter from ongoing global macroeconomic headwinds. We are maintaining our Outperform rating and increasing our 12-month target price by \$1 to \$35.50. Our target price of \$35.50 represents 19.2x 2013E EPS (from 19.0x previously) our revised 2013 EPS forecast, which is a premium to its peer group and towards the upper end of its five-year historical trading range. We believe the premium is justified given its superior earnings visibility (~90% of Fortis' earnings arise from utility operations, the highest among its peers) and the secular reduction observed in 10-year government of Canada bond yields.
- **Reaffirming capital spending guidance.** Against the backdrop of \$229 million of capital spending for the first quarter of 2012, the company reaffirmed its \$1.3 billion capital budget for 2012. The company's 2012–2016 capital spending outlook of \$5.5 billion is also unchanged with 64% expected to be incurred at the regulated electric utilities, 23% at regulated gas utilities and 13% at its non-regulated operations.
- **CH Energy:** Regulatory filings were made recently with the New York State Public Service Commission (April 20) and the Federal Energy Regulatory Commission (April 23) in connection with its proposed acquisition of CH Energy Group. A CH Energy shareholder vote is planned in mid-2012, with closing expected at the end of Q1/13. Our outlook continues to assume a \$500 million common equity issue in early 2013.
- **Waneta – on track:** Fortis's \$900 million Waneta dam expansion (51% interest) remains on track for start-up in spring 2015. The company has completed the excavation of the intake, powerhouse and power tunnels and has spent \$290 million since construction began in late 2010. Assuming that this project is financed with 35% equity and is capable of generating a 10.5% ROE, it could contribute up to \$16.9 million in incremental earnings when it is commissioned.
- **Regulatory update:** We expect 2012 to be relatively busy from a regulatory perspective. The British Columbia Utilities Commission (BCUC) is currently moving forward with a Cost of Capital proceeding regarding: (i) the appropriate allowed ROE and deemed capital structure for a benchmark low-risk utility, effective January 1, 2013; (ii) the determination of whether a return to an ROE automatic adjustment (effective for 2014) is warranted; (iii) a generic methodology on how to establish each utility's cost of capital in reference to the cost of capital for a benchmark low-risk utility; and (iv) a methodology to establish a deemed capital structure and deemed cost of capital. The BCUC also issued in April its decision on FortisBC Energy's 2012–2013 rate application. In addition to the above regulatory initiatives, a number of Fortis' utilities have submitted rate filings or are expecting rate decisions this year:

- In April 2012, the FortisBC Energy utilities re-filed their application with the BCUC to amalgamate into one legal entity. In late 2011, the utilities suspended their application in order to provide additional information to the BCUC, as requested. In addition to BCUC approval, the amalgamation requires the consent of the Government of British Columbia.
  - In November 2011, FortisBC Electric filed an updated 2012–2013 Revenue Requirement Application, reflecting a return on estimated mid-year net rate base of \$1,146 million in 2012 and \$1,215 million in 2013. An oral hearing occurred in March 2012 and a decision on the rate application is expected in mid-2012.
  - In April 2012, the Alberta Utilities Commission (AUC) approved FortisAlberta's negotiated settlement for 2012 distribution revenue requirements, reflecting a forecast mid-year rate base of \$2,025 million. The AUC continues to explore the implementation of Performance Based Regulation. A hearing commenced in April 2012 and a decision is expected in 2012.
  - In March 2012, Newfoundland Power filed a Cost of Capital Application with the PUB to discontinue the use of the current ROE adjustment mechanism and to approve a reasonable rate of return on average rate base for 2012. A public hearing on the application is currently scheduled for June 2012.
  - Maritime Electric plans to file an application with the Regulatory & Appeals Commission in fall 2012 for 2013 rates and allowed ROE.
- **Liquidity and resources:** At quarter-end, the company had \$110 million of cash and consolidated credit facilities of roughly \$2.2 billion, of which \$2.0 billion was available, including \$769 million unused under its \$800 million corporate committed revolving credit facility. Moreover, Fortis has requested an increase in the amount available for borrowing under its corporate credit facility to \$1 billion from \$800 million, which will enhance its liquidity position. Fortis expects the increase to be available in May 2012.
  - **Revised estimates:** We have updated our financial model to reflect Q1/12 results and revised assumptions. We are lowering our 2012 EPS estimate (f.d.) to \$1.71 from \$1.74 but increasing our 2013 estimate (f.d.) to \$1.84 from \$1.81 (reflecting a lower run-rate for corporate costs).
  - **Valuation:** We are maintaining an Outperform rating on Fortis shares and increasing our target price by \$1 (~3%) to \$35.50. At current prices, we believe that Fortis shares are reasonably valued, trading at a P/E multiple of 18.7x our 2013 estimate, which is a premium to its peer group and towards the upper end of its five-year historical trading range. We believe the premium is justified given its superior earnings visibility (~90% of Fortis' earnings arise from utility operations, the highest among its peers) and the secular reduction observed in 10-year government of Canada bond yields.

- First-quarter results:** Fortis reported Q1/12 results that were slightly lower than our estimates but in line with consensus. The company reported headline earnings of \$0.64 and comparable earnings of \$0.66 after adjusting for one-time acquisition costs associated with the proposed CH Energy transaction. Comparable EPS were slightly lower than our estimate of \$0.69, but generally consistent with Street consensus of \$0.67 per share. The variance vs. our estimate was largely due to lower-than expected earnings contribution from FortisAlberta, FortisBC Electric and Fortis Properties, partially offset by higher-than-expected results from Other Canadian and its gas utility. (Table 1). Our annual estimates are set out in Table 2.

**IMPORTANT DISCLOSURES****Analyst's Certification**

I, Ben Pham, CFA, hereby certify that the views expressed in this report accurately reflect my personal views about the subject securities or issuers. I also certify that no part of my compensation was, is, or will be, directly or indirectly, related to the specific recommendations or views expressed in this report.

Analysts who prepared this report are compensated based upon (among other factors) the overall profitability of BMO Capital Markets and their affiliates, which includes the overall profitability of investment banking services. Compensation for research is based on effectiveness in generating new ideas and in communication of ideas to clients, performance of recommendations, accuracy of earnings estimates, and service to clients.

Analysts employed by BMO Nesbitt Burns Inc. and/or BMO Capital Markets Ltd. are not registered as research analysts with FINRA. These analysts may not be associated persons of BMO Capital Markets Corp. and therefore may not be subject to the NASD Rule 2711 and NYSE Rule 472 restrictions on communications with a subject company, public appearances and trading securities held by a research analyst account.

**Company Specific Disclosure**

Disclosure 1: BMO Capital Markets has undertaken an underwriting liability with respect to this issuer within the past 12 months.

Disclosure 2: BMO Capital Markets has provided investment banking services with respect to this issuer within the past 12 months.

Disclosure 3: BMO Capital Markets has managed or co-managed a public offering of securities with respect to this issuer within the past 12 months.

Disclosure 4: BMO Capital Markets or an affiliate has received compensation for investment banking services from this issuer within the past 12 months.

Disclosure 5: BMO Capital Markets or an affiliate received compensation for products or services other than investment banking services within the past 12 months.

Disclosure 6: This issuer is a client (or was a client) of BMO NB, BMO Capital Markets Corp., BMO CM Ltd. or an affiliate within the past 12 months: Investment Banking Services & Non-Securities Related Services.

Disclosure 8: BMO Capital Markets or an affiliate has a financial interest in 1% or more of any class of the equity securities of this issuer.

**Methodology and Risks to Price Target/Valuation**

**Methodology:** Our target price is approximately 19.2x our 2013E EPS estimate.

**Risks:** Operations are subject to complex regulation by a variety of provincial, state and federal (Canada, Cayman Islands & Belize) agencies. Changes in regulation may adversely affect performance.

**Distribution of Ratings (March 31, 2012)**

\*\*\*\*\* Reflects rating distribution of all companies from which BMO Capital Markets has received compensation for Investment Banking services as percentage of Investment Banking clients.

**Ratings and Sector Key**

We use the following ratings system definitions:

OP = Outperform - Forecast to outperform the market;

Mkt = Market Perform - Forecast to perform roughly in line with the market;

Und = Underperform - Forecast to underperform the market;

(S) = speculative investment;

NR = No rating at this time;

R = Restricted – Dissemination of research is currently restricted.

Market performance is measured by a benchmark index such as the S&P/TSX Composite Index, S&P 500, Nasdaq Composite, as appropriate for each company. BMO Capital Markets eight Top 15 lists guide investors to our best ideas according to different objectives (Canadian large, small, growth, value, income, quantitative; and US large, US small) have replaced the Top Pick rating.

## S&P Affirms Credit Rating, but More Equity Needed

### Event

On May 23, S&P affirmed Fortis' A- credit rating and revised the outlook to Stable from CreditWatch with negative implications, on the assumption that the company will finance the previously announced CH Energy acquisition with at least \$600 million in common equity and \$250 million in preferred shares (vs. our initial estimates of \$500 million and \$200 million, respectively). Management has confirmed that it will finance the CH Energy transaction in conformance with S&P's assumptions in order to keep its A- credit rating intact, but noted that a portion of the proceeds will also be used to finance the company's 51% interest in the Waneta Dam hydro project, which is currently under development and is expected to be commissioned in spring 2015.

### Impact

Slightly Negative. While more equity will be required to permanently finance the proposed CH Energy acquisition, the transaction remains slightly accretive and allows for geographical expansion in a low-risk utility operation while maintaining the company's A- credit rating.

### Forecasts

We have updated our model to reflect the higher equity and preferred share issues. There is no change to our 2012 EPS estimate (fd) of \$1.71, but we are decreasing our 2013 EPS estimate (fd) to \$1.82 from \$1.84.

### Valuation

We have reduced our price target to \$35.00 from \$35.50 in connection with our revised estimates. Our target price is based on 19.2x 2013E EPS.

### Recommendation

We continue to rate the shares of Fortis Outperform.

**Ratings and Sector Key**

We use the following ratings system definitions:

OP = Outperform - Forecast to outperform the market;

Mkt = Market Perform - Forecast to perform roughly in line with the market;

Und = Underperform - Forecast to underperform the market;

(S) = speculative investment;

NR = No rating at this time;

R = Restricted – Dissemination of research is currently restricted.

Market performance is measured by a benchmark index such as the S&P/TSX Composite Index, S&P 500, Nasdaq Composite, as appropriate for each company. BMO Capital Markets eight Top 15 lists guide investors to our best ideas according to different objectives (Canadian large, small, growth, value, income, quantitative; and US large, US small) have replaced the Top Pick rating.

## FORTIS (FTS-TSX)

BEN PHAM, CFA

**Rating:** Outperform  
**Price:** \$33.55  
**Target:** \$35.00 ↓  
**2011A EPS:** \$1.66  
**2012E EPS:** \$1.71  
**2013E EPS:** \$1.82 ↓

All values in C\$; EPS estimates are diluted; Quarterly numbers are basic

**Title:** S&P Affirms Credit Rating, but More Equity Needed

**Event:** On May 23, S&P affirmed Fortis' A- credit rating and revised the outlook to Stable from CreditWatch with negative implications, on the assumption that the company will finance the previously announced CH Energy acquisition with at least \$600 million in common equity and \$250 million in preferred shares (vs. our initial estimates of \$500 million and \$200 million, respectively). Management has confirmed that it will finance the CH Energy transaction in conformance with S&P's assumptions in order to keep its A- credit rating intact, but noted that a portion of the proceeds will also be used to finance the company's 51% interest in the Waneta Dam hydro project, which is currently under development and is expected to be commissioned in spring 2015.

**Impact:** Slightly Negative. While more equity will be required to permanently finance the proposed CH Energy acquisition, the transaction remains slightly accretive and allows for geographical expansion in a low-risk utility operation while maintaining the company's A- credit rating.

**Forecasts:** We have updated our model to reflect the higher equity and preferred share issues. There is no change to our 2012 EPS estimate (fd) of \$1.71, but we are decreasing our 2013 EPS estimate (fd) to \$1.82 from \$1.84.

**Valuation:** We have reduced our price target to \$35.00 from \$35.50 in connection with our revised estimates. Our target price is based on 19.2x 2013E EPS.

**Recommendation:** We continue to rate the shares of Fortis Outperform.

**Company Description** – Fortis Inc. (Fortis) is a publicly listed holding company with four key businesses: electric utility operations, regulated natural gas distribution, non-regulated electric power generation and non-utility property activities. Gas and electric utility operations include Newfoundland Power (100%), Maritime Electric (100%, PEI), Fortis Ontario (100%), Caribbean Utilities (59.5%, Grand Cayman Island), Turks and Caicos (100%),

FortisAlberta (100%), FortisBC (100%) and the FortisBC Energy Companies (100%, British Columbia). *Website:* fortisinc.com

**Recent Results** – Fortis reported Q1/12 results that were slightly lower than our estimates but in line with consensus (adjusted EPS of \$0.66 vs. our estimate of \$0.69 and consensus of \$0.67).

This report was prepared by an analyst(s) employed by BMO Nesbitt Burns Inc., and who is (are) not registered as a research analyst(s) under FINRA rules. For disclosure statements, including the Analyst's Certification, please refer to the back pages.

**Corporate Developments** – Regulatory filings were made with the New York State Public Service Commission (April 20) and the Federal Energy Regulatory Commission (April 23) regarding the company's previously announced proposed acquisition of CH Energy Group, an energy delivery company whose main business is an electric and natural gas transmission and distribution utility in New York's Mid-Hudson Valley region. Pending regulatory approval and a shareholder vote in June 2012, the transaction is expected to close in Q1/13.

On May 23, S&P affirmed Fortis's A- credit rating and revised its outlook on the company to Stable from CreditWatch with negative implications. S&P's outlook assumes that Fortis will finance the CH Energy Group acquisition with at least \$600 million in common shares and \$250 million in preferred shares. Management has confirmed that it will finance the transaction in conformance with S&P's assumptions in order to keep its A- credit rating

intact, but noted that a portion of the proceeds will also be used to finance the company's 51% interest in the Waneta Dam hydro project, which is currently under development and is expected to be commissioned in spring 2015.

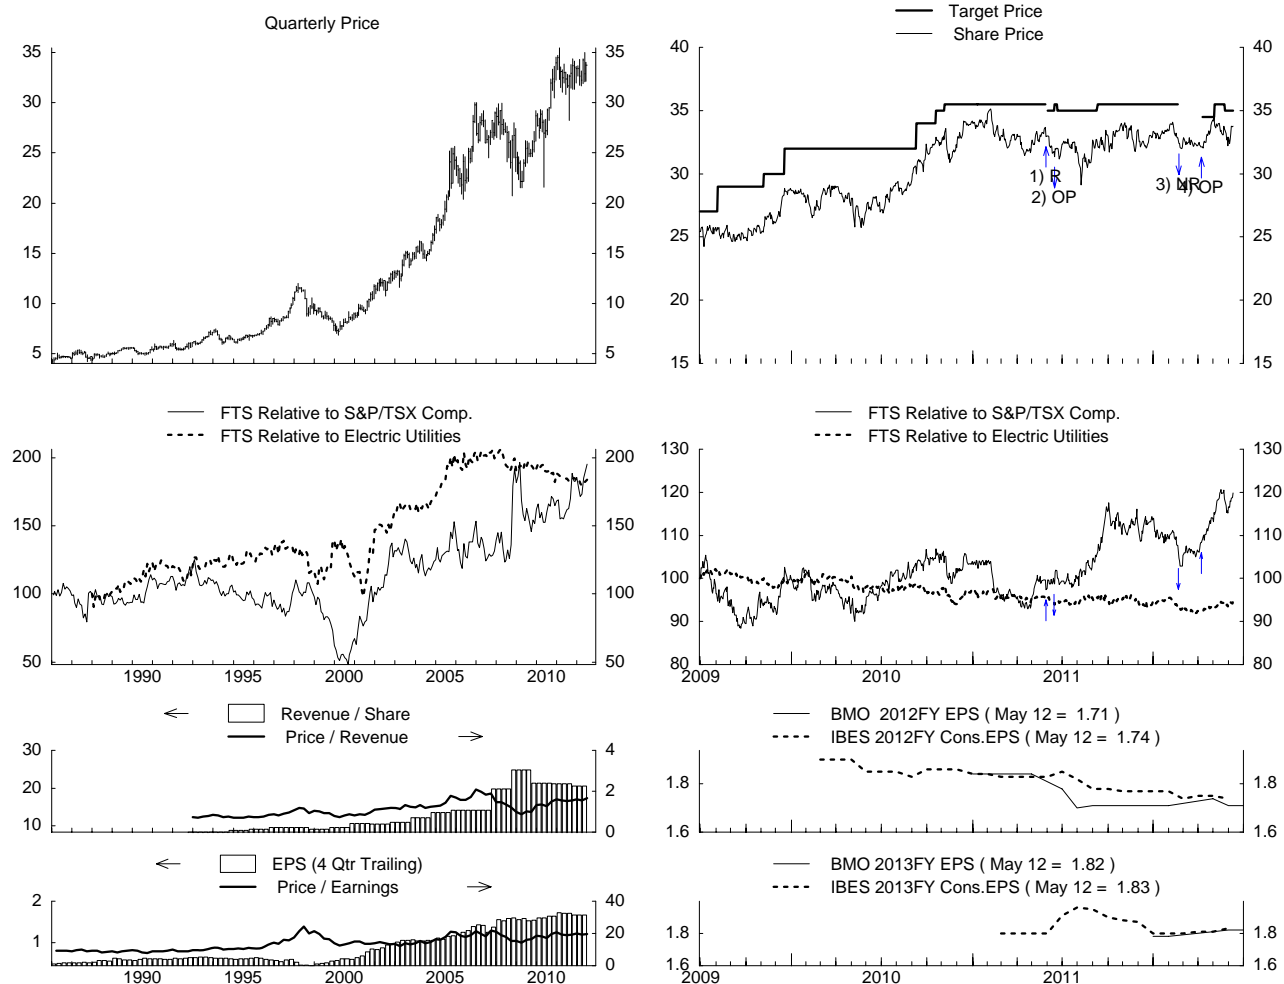

The company reaffirmed its 2012 capital budget at \$1.3 billion and it continues to target total investment of \$5.5 billion during the next five years. Approximately 64% of the total relates to the regulated electric utilities, 23% relates to the regulated gas utilities and 13% relates to Fortis' non-regulated businesses.

**Forecasts** – We are forecasting EPS (f.d.) of \$1.71 and \$1.82 for 2012 and 2013, respectively.

**Valuation** – Our target price of \$35 is based 19.2x 2013E EPS.

**Recommendation** – At current levels, we believe the shares of Fortis are attractively valued. Our rating is Outperform.

## CH Energy Shareholders Approve Acquisition

---

### Impact

Neutral

---

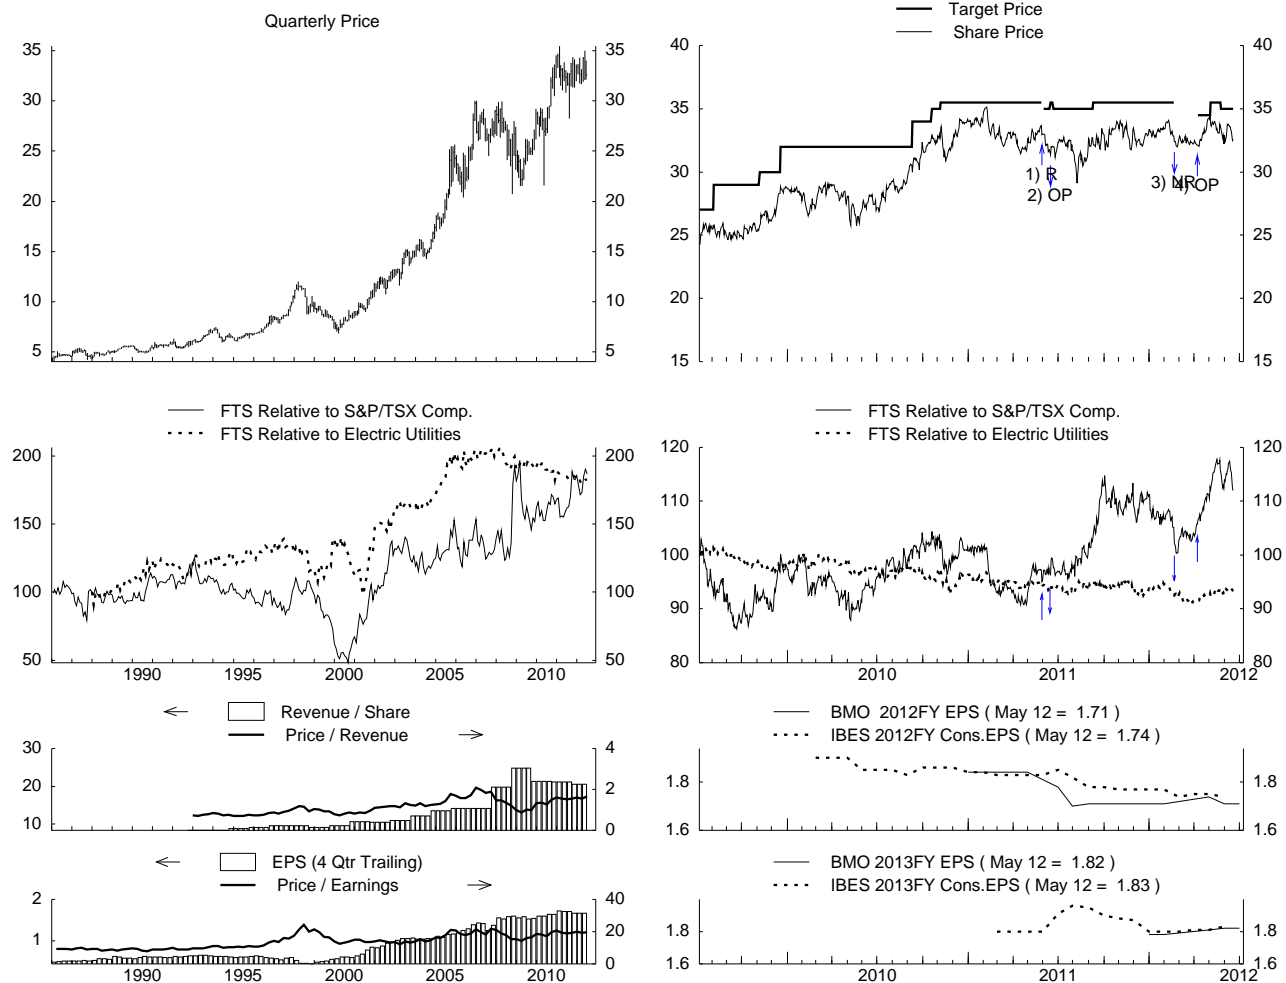

### Details & Analysis

Fortis has announced that the shareholders of CH Energy Group have voted in favour of the merger agreement under which Fortis will acquire 100% of CH Energy for US\$65.00 per share, for an aggregate purchase consideration of ~US\$1.5 billion (including assumed debt of US\$500 million). The transaction remains subject to regulatory approvals from the New York State Public Service Commission and the Federal Energy Regulatory Commission. (Fortis previously submitted filings to launch the regulatory review process with these bodies in April.) Shareholder approval was in line with expectations and we continue to assume new common equity in the amount of \$600 million in order to complete the transaction, which, pending approvals and closing conditions, is expected to close by the end of Q1/13.

This report was prepared by an analyst(s) employed by BMO Nesbitt Burns Inc., and who is (are) not registered as a research analyst(s) under FINRA rules. For disclosure statements, including the Analyst's Certification, please refer to pages 2 to 5.

**Ratings and Sector Key**

We use the following ratings system definitions:

OP = Outperform - Forecast to outperform the market;

Mkt = Market Perform - Forecast to perform roughly in line with the market;

Und = Underperform - Forecast to underperform the market;

(S) = speculative investment;

NR = No rating at this time;

R = Restricted – Dissemination of research is currently restricted.

Market performance is measured by a benchmark index such as the S&P/TSX Composite Index, S&P 500, Nasdaq Composite, as appropriate for each company. BMO Capital Markets eight Top 15 lists guide investors to our best ideas according to different objectives (Canadian large, small, growth, value, income, quantitative; and US large, US small) have replaced the Top Pick rating.

## Coverage Resumed With Outperform Rating

### Event

We are resuming coverage of FTS with an Outperform rating after coming off restriction after closing of its \$601 million subscription receipts offering. The offering of 18.5 million subscription receipts (9.8% to share count) will be used, subsequent to receipt of all required approvals (expected by the end of Q1/13), to finance a portion of the previously announced acquisition of CH Energy Group for US\$1.5 billion. The offering was largely expected, although we had assumed a Q1/13 time frame. While the offering is a bit sooner than expected, and thus leading to dilution to our 2012 outlook, this removes the equity overhang that we believe has largely placed a damper on recent stock price performance, and has returned FTS closer to breakeven YTD. We believe FTS remains well positioned to grow its EPS to \$2.00 by 2015 while its ~90% exposure to low-risk utility operations should afford it shelter from ongoing global macroeconomic headwinds.

### Impact

Neutral.

### Forecasts

Our 2012 EPS (fd) is tweaked down two pennies owing to differences in expected timing, while our 2013E EPS (fd) increases to \$1.83 from \$1.82.

### Valuation

Our target price of \$35 is unchanged and represents 19.2x our 2013E EPS.

### Recommendation

With the recent stock price weakness coupled with a sizable unchanged \$5.5 billion organic growth program through 2016, our bias on the stock remains positive. We are maintaining our Outperform rating with over 12% total return potential.

**IMPORTANT DISCLOSURES****Analyst's Certification**

I, Ben Pham, CFA, hereby certify that the views expressed in this report accurately reflect my personal views about the subject securities or issuers. I also certify that no part of my compensation was, is, or will be, directly or indirectly, related to the specific recommendations or views expressed in this report.

Analysts who prepared this report are compensated based upon (among other factors) the overall profitability of BMO Capital Markets and their affiliates, which includes the overall profitability of investment banking services. Compensation for research is based on effectiveness in generating new ideas and in communication of ideas to clients, performance of recommendations, accuracy of earnings estimates, and service to clients.

Analysts employed by BMO Nesbitt Burns Inc. and/or BMO Capital Markets Ltd. are not registered as research analysts with FINRA. These analysts may not be associated persons of BMO Capital Markets Corp. and therefore may not be subject to the NASD Rule 2711 and NYSE Rule 472 restrictions on communications with a subject company, public appearances and trading securities held by a research analyst account.

**Company Specific Disclosure**

Disclosure 1: BMO Capital Markets has undertaken an underwriting liability with respect to this issuer within the past 12 months.

Disclosure 2: BMO Capital Markets has provided investment banking services with respect to this issuer within the past 12 months.

Disclosure 3: BMO Capital Markets has managed or co-managed a public offering of securities with respect to this issuer within the past 12 months.

Disclosure 4: BMO Capital Markets or an affiliate has received compensation for investment banking services from this issuer within the past 12 months.

Disclosure 5: BMO Capital Markets or an affiliate received compensation for products or services other than investment banking services within the past 12 months.

Disclosure 6: This issuer is a client (or was a client) of BMO NB, BMO Capital Markets Corp., BMO CM Ltd. or an affiliate within the past 12 months: Investment Banking Services & Non-Securities Related Services.

Disclosure 8: BMO Capital Markets or an affiliate has a financial interest in 1% or more of any class of the equity securities of this issuer.

**Methodology and Risks to Price Target/Valuation**

**Methodology:** Our target price is approximately 19.2x our 2013E EPS estimate.

**Risks:** Operations are subject to complex regulation by a variety of provincial, state and federal (Canada, Cayman Islands & Belize) agencies. Changes in regulation may adversely affect performance.

**Ratings and Sector Key**

We use the following ratings system definitions:

OP = Outperform - Forecast to outperform the market;

Mkt = Market Perform - Forecast to perform roughly in line with the market;

Und = Underperform - Forecast to underperform the market;

(S) = speculative investment;

NR = No rating at this time;

R = Restricted – Dissemination of research is currently restricted.

Market performance is measured by a benchmark index such as the S&P/TSX Composite Index, S&P 500, Nasdaq Composite, as appropriate for each company. BMO Capital Markets' seven Top 15 lists guide investors to our best ideas according to different objectives (CDN Large Cap, CDN Small Cap, US Large Cap, US Small cap, Income, CDN Quant, and US Quant) have replaced the Top Pick rating.

## Q2/12 Results in Line With Expectations

---

### Impact

Neutral

---

### Details & Analysis

Fortis reported Q2/12 EPS of \$0.33, generally in line with our estimate of \$0.34 and square on with Street consensus of \$0.33. Earnings from the majority of the company's business segments were generally in line with our estimates, with stronger-than-expected results at FortisAlberta offsetting slightly higher-than-expected corporate costs (largely due to CH Energy acquisition-related expenses). Key highlights: (1) There are no changes to the company's capital expenditure program. Fortis expects to invest \$1.3 billion of capital in 2012 and approximately \$5.5 billion during 2012–2016. Notably, its \$900mm Waneta hydroelectric project (51% Fortis) in British Columbia is still on track for an expected in-service date of spring 2015. (2) Fortis still expects the US\$1.5 billion CH Energy Group acquisition to close by the end of Q1/13. The transaction received CH Energy shareholder approval in June 2012, and regulatory approval from the Federal Energy Regulatory Commission and the Committee on Foreign Investment in July 2012. The New York Public Service Commission is currently reviewing the application for transaction approval that FTS submitted in April; and (3) on the regulatory front, a decision on FortisBC's 2012/13 rate application is expected in Q3/12. Also, Newfoundland Power recently received approval of an increase in its allowed ROE to 8.80% in 2012 from 8.38% in 2011. We continue to review the release.

This report was prepared by an analyst(s) employed by BMO Nesbitt Burns Inc., and who is (are) not registered as a research analyst(s) under FINRA rules. For disclosure statements, including the Analyst's Certification, please refer to pages 2 to 5.

### **Ratings and Sector Key**

We use the following ratings system definitions:

OP = Outperform - Forecast to outperform the market;

Mkt = Market Perform - Forecast to perform roughly in line with the market;

Und = Underperform - Forecast to underperform the market;

(S) = speculative investment;

NR = No rating at this time;

R = Restricted – Dissemination of research is currently restricted.

Market performance is measured by a benchmark index such as the S&P/TSX Composite Index, S&P 500, Nasdaq Composite, as appropriate for each company. BMO Capital Markets' seven Top 15 lists guide investors to our best ideas according to different objectives (CDN Large Cap, CDN Small Cap, US Large Cap, US Small cap, Income, CDN Quant, and US Quant) have replaced the Top Pick rating.

## Q2 – It's Business as Usual at FTS

### Event

Fortis' second-quarter performance was solid as usual (Q2/12 EPS of \$0.33 vs. BMO Research at \$0.34 and consensus of \$0.33), reflective of stronger-than-expected results at FortisAlberta, which offset higher-than-expected corporate costs. Earnings from the majority of the company's other business segments were generally in line with our estimates. One of the things we like the most about FTS is its longer-term earnings visibility. Indeed, the company reaffirmed its capex guidance of \$1.3 billion for 2012 and \$5.5 billion spending from 2012–2016. Against that backdrop, Fortis is well positioned to grow its EPS to ~\$2.00 by 2015E while its significant exposure to low-risk utility operations should afford it shelter from ongoing global macroeconomic headwinds.

### Impact

Neutral.

### Forecasts

We have updated our financial model to reflect Q2/12 results. Our 2012E EPS estimate (f.d.) of \$1.69 and 2013E EPS estimate (f.d.) of \$1.83 is unchanged.

### Valuation

We are maintaining our target price of \$35.50, which represents 19.4x our 2013E EPS forecast.

### Recommendation

We continue to rate the shares of Fortis Outperform.

**Price (31-Jul)** \$33.54 **52-Week High** \$34.98

 Q3/12E \$0.25 to \$0.26  
 Q4/12E \$0.48 to \$0.46

## Q2 – It's Business As Usual at FTS

- **We are maintaining an Outperform rating and 12-month target price of \$35.50 on Fortis shares.** Fortis' second-quarter performance was solid as usual, reflective of stronger-than-expected results at FortisAlberta, which offset higher-than-expected corporate costs. Earnings from the majority of the company's other business segments were generally in line with our estimates. One of the things we like the most about FTS is its longer-term earnings visibility. Indeed, the company reaffirmed its capex guidance of \$1.3 billion for 2012 and \$5.5 billion spending from 2012–2016. Against that backdrop, Fortis is well positioned to grow its EPS to ~\$2.00 by 2015E while its significant exposure to low-risk utility operations should afford it shelter from ongoing global macroeconomic headwinds. We are maintaining our Outperform rating and \$35.50 target price. Our target price of \$35.50 represents 19.4x our 2013E EPS forecast.
- **No changes to \$5.5 billion capital expenditure program.** Consolidated capital expenditures totalled ~\$282 million in Q2/12 (~\$511 million for the first half of 2012). The company's full-year outlook for capital spending remains unchanged (\$1.3 billion) as is its estimate of ~\$5.5 billion in total capital spending between 2012 and 2016. Over this five-year period, Fortis plans to deploy ~65% of the total capital spending to regulated activities (driven by FortisAlberta and FortisBC Electric), ~21% to regulated gas utilities and ~14% to non-regulated operations.
- **CH Energy acquisition on track for end of Q1/13 close:** Several key advancements in the proposed CH Energy acquisition took place during the quarter. The transaction received approval from CH Energy's shareholders (June 19) and regulatory approval from both the Federal Energy Regulatory Commission and the Committee on Foreign Investment in the United States in July. Fortis issued ~\$600 million in subscription receipts at the end of June in order to finance the required equity component of the transaction price; the completion of this offering alleviates any concern related to an equity overhang and should ensure the preservation of the company's A-rated balance sheet. Approval for the CH Energy acquisition still needs to be obtained from the New York State Public Service Commission, which is currently reviewing the application filed on April 23. The company maintains its expectation that the transaction will close by the end of Q1/13.
- **Waneta expansion:** Construction activities continued for the \$900 million Waneta dam expansion, a project in which Fortis holds a 51% interest. A total of \$345 million has been spent to date since construction began in late 2010. The company has reported that the project is still on track for completion on budget and on time, with a target in-service date of spring 2015.
- **Key regulatory updates:**
  - The company expects that the British Columbia Utilities Commission (BCUC) will reach a decision on the 2012/2013 Revenue Requirements Application (RRA) filed by FortisBC Electric during Q3/12. The RRA, updated in November 2011, calls for rate increases of 1.5% and 6.5% in 2012 and 2013, respectively.

- The preliminary timetable for the Generic Cost of Capital review by the BCUC calls for evidence proceedings through to early December 2012; if necessary, an oral hearing will commence on December 12, 2012. As set out the final scoping document released by the BCUC in April, the commission will review several issues with respect to the determination of an appropriate cost of capital for regulated utilities. The outcome of these proceedings remains uncertain and could have a material impact on the future earnings of the FortisBC Energy Companies as well as FortisBC Electric.
  - The AUC continued its assessment of the potential implementation of performance-based regulation (PBR) for Alberta-based distribution utilities beginning in 2013. A hearing took place during April and May 2012, and in July 2012 FortisAlberta submitted its final argument with respect to how PBR should be implemented. A final decision from the AUC is expected in Q4/12.
  - In July 2012, the AUC issued a decision that reaffirmed FortisAlberta as the primary electricity distributor within its service territory, in response to an application from the Central Alberta Rural Electrification Association (CAREA) requesting service rights to new customers in certain areas where FortisAlberta and CAREA territories overlap.
  - After filing a Cost of Capital Application with the Board of Commissioners of Public Utilities of Newfoundland (PUB) in March 2012, Newfoundland Power was awarded an increase in its allowed ROE from 8.38% (2011) to 8.80% (2012). Effective July 1, the PUB approved an overall average increase in electricity rates for Newfoundland Power's customers of 6.6%. Newfoundland Power will be filing a general rate application for 2013 with the PUB during Q3/12.
  - Maritime Electric intends to file an application for 2013 customer rates and allowed return with the Island Regulatory and Appeals Commission in fall 2012.
- **Possible small tuck-in acquisition in B.C.:** FortisBC Electric has entered into preliminary discussions with the City of Kelowna, British Columbia to purchase its electricity distribution assets (15,000 customers), to which FortisBC has provided electricity and has operated and maintained since 2000. Subject to negotiation of definitive agreements and municipal and regulatory approvals, the transaction is expected to close by the end of Q1/13. For more details, please see a [press release](#) issued by the City of Kelowna on July 19.
  - **Liquidity and resources:** Available liquidity improved from the first quarter after Fortis secured a limit increase on its corporate credit facility from \$800 million to \$1 billion in May 2012. As of June 30, the company had \$231 million of cash and consolidated credit facilities of roughly \$2.5 billion, of which ~\$2.0 billion was available.
  - **No change to our estimates:** We have updated our financial model to reflect Q2/12 results. Our 2012 EPS estimate (f.d.) of \$1.69 and 2013 EPS estimate (f.d.) of \$1.83 is unchanged.
  - **Valuation:** We are maintaining an Outperform rating and 12-month target price of \$35.50 on Fortis shares. At current prices, we believe that Fortis shares are reasonably valued,

trading at a P/E multiple of 18.4x our 2013 estimate, which is towards the upper end of its five-year historical trading range. We believe the premium is justified given its superior earnings visibility (~90% of Fortis' earnings arise from utility operations, the highest among its peers) and the secular reduction observed in 10-year government of Canada bond yields.

- Second-quarter results:** Fortis reported Q2/12 EPS of \$0.33, generally in line with our estimate of \$0.34 and square on with Street consensus of \$0.33. Earnings from the majority of the company's business segments were generally in line with our estimates, with stronger-than-expected results at FortisAlberta offsetting higher-than-expected corporate costs. Quarterly earnings variances for each business segment are set out in Exhibit 3, while our annual estimates are set out in Exhibit 4.

**IMPORTANT DISCLOSURES****Analyst's Certification**

I, Ben Pham, CFA, hereby certify that the views expressed in this report accurately reflect my personal views about the subject securities or issuers. I also certify that no part of my compensation was, is, or will be, directly or indirectly, related to the specific recommendations or views expressed in this report.

Analysts who prepared this report are compensated based upon (among other factors) the overall profitability of BMO Capital Markets and their affiliates, which includes the overall profitability of investment banking services. Compensation for research is based on effectiveness in generating new ideas and in communication of ideas to clients, performance of recommendations, accuracy of earnings estimates, and service to clients.

Analysts employed by BMO Nesbitt Burns Inc. and/or BMO Capital Markets Ltd. are not registered as research analysts with FINRA. These analysts may not be associated persons of BMO Capital Markets Corp. and therefore may not be subject to the NASD Rule 2711 and NYSE Rule 472 restrictions on communications with a subject company, public appearances and trading securities held by a research analyst account.

**Company Specific Disclosure**

Disclosure 1: BMO Capital Markets has undertaken an underwriting liability with respect to this issuer within the past 12 months.

Disclosure 2: BMO Capital Markets has provided investment banking services with respect to this issuer within the past 12 months.

Disclosure 3: BMO Capital Markets has managed or co-managed a public offering of securities with respect to this issuer within the past 12 months.

Disclosure 4: BMO Capital Markets or an affiliate has received compensation for investment banking services from this issuer within the past 12 months.

Disclosure 5: BMO Capital Markets or an affiliate received compensation for products or services other than investment banking services within the past 12 months.

Disclosure 6: This issuer is a client (or was a client) of BMO NB, BMO Capital Markets Corp., BMO CM Ltd. or an affiliate within the past 12 months: Investment Banking Services & Non-Securities Related Services.

Disclosure 8: BMO Capital Markets or an affiliate has a financial interest in 1% or more of any class of the equity securities of this issuer.

**Methodology and Risks to Price Target/Valuation**

**Methodology:** Our target price is approximately 19.4x our 2013E EPS estimate.

**Risks:** Operations are subject to complex regulation by a variety of provincial, state and federal (Canada, Cayman Islands & Belize) agencies. Changes in regulation may adversely affect performance.

**Ratings and Sector Key**

We use the following ratings system definitions:

OP = Outperform - Forecast to outperform the market;

Mkt = Market Perform - Forecast to perform roughly in line with the market;

Und = Underperform - Forecast to underperform the market;

(S) = speculative investment;

NR = No rating at this time;

R = Restricted – Dissemination of research is currently restricted.

Market performance is measured by a benchmark index such as the S&P/TSX Composite Index, S&P 500, Nasdaq Composite, as appropriate for each company. BMO Capital Markets' seven Top 15 lists guide investors to our best ideas according to different objectives (CDN Large Cap, CDN Small Cap, US Large Cap, US Small cap, Income, CDN Quant, and US Quant) have replaced the Top Pick rating.

**Dissemination of Research**

Our research publications are available via our web site <http://www.bmocm.com/research/>. Institutional clients may also receive our research via FIRST CALL, FIRST CALL Research Direct, Reuters, Bloomberg, FactSet, Capital IQ, and TheMarkets.com. All of our research is made widely available at the same time to all BMO Capital Markets client groups entitled to our research. Additional dissemination may occur via email or regular mail. Please contact your investment advisor or institutional salesperson for more information.

**Conflict Statement**

A general description of how BMO Financial Group identifies and manages conflicts of interest is contained in our public facing policy for managing conflicts of interest in connection with investment research which is available at [http://researchglobal.bmocapitalmarkets.com/Public/Conflict\\_Statement\\_Public.aspx](http://researchglobal.bmocapitalmarkets.com/Public/Conflict_Statement_Public.aspx).

**General Disclaimer**

“BMO Capital Markets” is a trade name used by the BMO Investment Banking Group, which includes the wholesale arm of Bank of Montreal and its subsidiaries BMO Nesbitt Burns Inc. and BMO Nesbitt Burns Ltée./Ltd., BMO Capital Markets Ltd. in the U.K. and BMO Capital Markets Corp. in the U.S. BMO Nesbitt Burns Inc., BMO Capital Markets Ltd. and BMO Capital Markets Corp are affiliates. Bank of Montreal or its subsidiaries (“BMO Financial Group”) has lending arrangements with, or provide other remunerated services to, many issuers covered by BMO Capital Markets. The opinions, estimates and projections contained in this report are those of BMO Capital Markets as of the date of this report and are subject to change without notice. BMO Capital Markets endeavours to ensure that the contents have been compiled or derived from sources that we believe are reliable and contain information and opinions that are accurate and complete. However, BMO Capital Markets makes no representation or warranty, express or implied, in respect thereof, takes no responsibility for any errors and omissions contained herein and accepts no liability whatsoever for any loss arising from any use of, or reliance on, this report or its contents. Information may be available to BMO Capital Markets or its affiliates that is not reflected in this report. The information in this report is not intended to be used as the primary basis of investment decisions, and because of individual client objectives, should not be construed as advice designed to meet the particular investment needs of any investor. This material is for information purposes only and is not an offer to sell or the solicitation of an offer to buy any security. BMO Capital Markets or its affiliates will buy from or sell to customers the securities of issuers mentioned in this report on a principal basis. BMO Capital Markets or its affiliates, officers, directors or employees have a long or short position in many of the securities discussed herein, related securities or in options, futures or other derivative instruments based thereon. The reader should assume that BMO Capital Markets or its affiliates may have a conflict of interest and should not rely solely on this report in evaluating whether or not to buy or sell securities of issuers discussed herein.

**Additional Matters**

To Canadian Residents: BMO Nesbitt Burns Inc. and BMO Nesbitt Burns Ltée./Ltd., affiliates of BMO Capital Markets Corp., furnish this report to Canadian residents and accept responsibility for the contents herein subject to the terms set out above. Any Canadian person wishing to effect transactions in any of the securities included in this report should do so through BMO Nesbitt Burns Inc. and/or BMO Nesbitt Burns Ltée./Ltd.

The following applies if this research was prepared in whole or in part by Andrew Breichmanas, Tony Robson, or Edward Sterck: This research is not prepared subject to Canadian disclosure requirements. This research is prepared by BMO Capital Markets Limited and subject to the regulations of the Financial Services Authority (FSA) in the United Kingdom. FSA regulations require that a firm providing research disclose its ownership interest in the issuer that is the subject of the research if it and its affiliates own 5% or more of the equity of the issuer. Canadian regulations require that a firm providing research disclose its ownership interest in the issuer that is the subject of the research if it and its affiliates own 1% or more of the equity of the issuer that is the subject of the research. Therefore BMO Capital Markets Limited will only disclose its and its’ affiliates ownership interest in the subject issuer if such ownership exceeds 5% of the equity of the issuer.

To U.S. Residents: BMO Capital Markets Corp. and/or BMO Nesbitt Burns Securities Ltd., affiliates of BMO NB, furnish this report to U.S. residents and accept responsibility for the contents herein, except to the extent that it refers to securities of Bank of Montreal. Any U.S. person wishing to effect transactions in any security discussed herein should do so through BMO Capital Markets Corp. and/or BMO Nesbitt Burns Securities Ltd.

To U.K. Residents: In the UK this document is published by BMO Capital Markets Limited which is authorised and regulated by the Financial Services Authority. The contents hereof are intended solely for the use of, and may only be issued or passed on to, (I) persons who have professional experience in matters relating to investments falling within Article 19(5) of the Financial Services and Markets Act 2000 (Financial Promotion) Order 2005 (the “Order”) or (II) high net worth entities falling within Article 49(2)(a) to (d) of the Order (all such persons together referred to as “relevant persons”). The contents hereof are not intended for the use of and may not be issued or passed on to, retail clients.

**Company Description** – Fortis Inc. (Fortis) is a publicly listed holding company with four key businesses: electric utility operations, regulated natural gas distribution, non-regulated electric power generation and non-utility property activities. Gas and electric utility operations include Newfoundland Power (100%), Maritime Electric (100%, PEI), Fortis Ontario (100%), Caribbean Utilities (59.5%,

Grand Cayman Island), Turks and Caicos (100%), FortisAlberta (100%), FortisBC (100%) and the FortisBC Energy Companies (100%, British Columbia). *Website:* fortisinc.com

**Recent Results** – Fortis reported Q2/12 financial results that were generally in line with expectations (EPS of \$0.33 vs. our estimate of \$0.34 and consensus of \$0.33), reflective of

This report was prepared by an analyst(s) employed by BMO Nesbitt Burns Inc., and who is (are) not registered as a research analyst(s) under FINRA rules. For disclosure statements, including the Analyst's Certification, please refer to the back pages.

stronger-than-expected results at FortisAlberta, which offset higher-than-expected corporate costs.

**Corporate Developments** – The company's proposed acquisition of CH Energy received approval from CH Energy's shareholders (June 19) and regulatory approval from both the Federal Energy Regulatory Commission and the Committee on Foreign Investment in the United States in July. Fortis issued ~\$600 million in subscription receipts at the end of June in order to finance the required equity component of the transaction price. Approval for the acquisition still needs to be obtained from the New York State Public Service Commission; the company maintains its expectation that the transaction will close by the end of Q1/13.

Effective July 1, the Board of Commissioners of Public Utilities of Newfoundland awarded an overall average increase in electricity rates for Newfoundland Power of 6.6%, reflecting an increase in allowed ROE from 8.38% (2011) to 8.80% (2012). FortisBC Electric and the FortisBC Energy Companies are awaiting the outcome of the British Columbia Utilities Commission's Generic Cost of Capital hearing (evidence proceedings currently taking place through December 2012). Also, FortisAlberta filed its final

argument with the Alberta Utilities Commission with respect to how performance-based regulation should be implemented in the province. A final decision is expected in Q4/12.

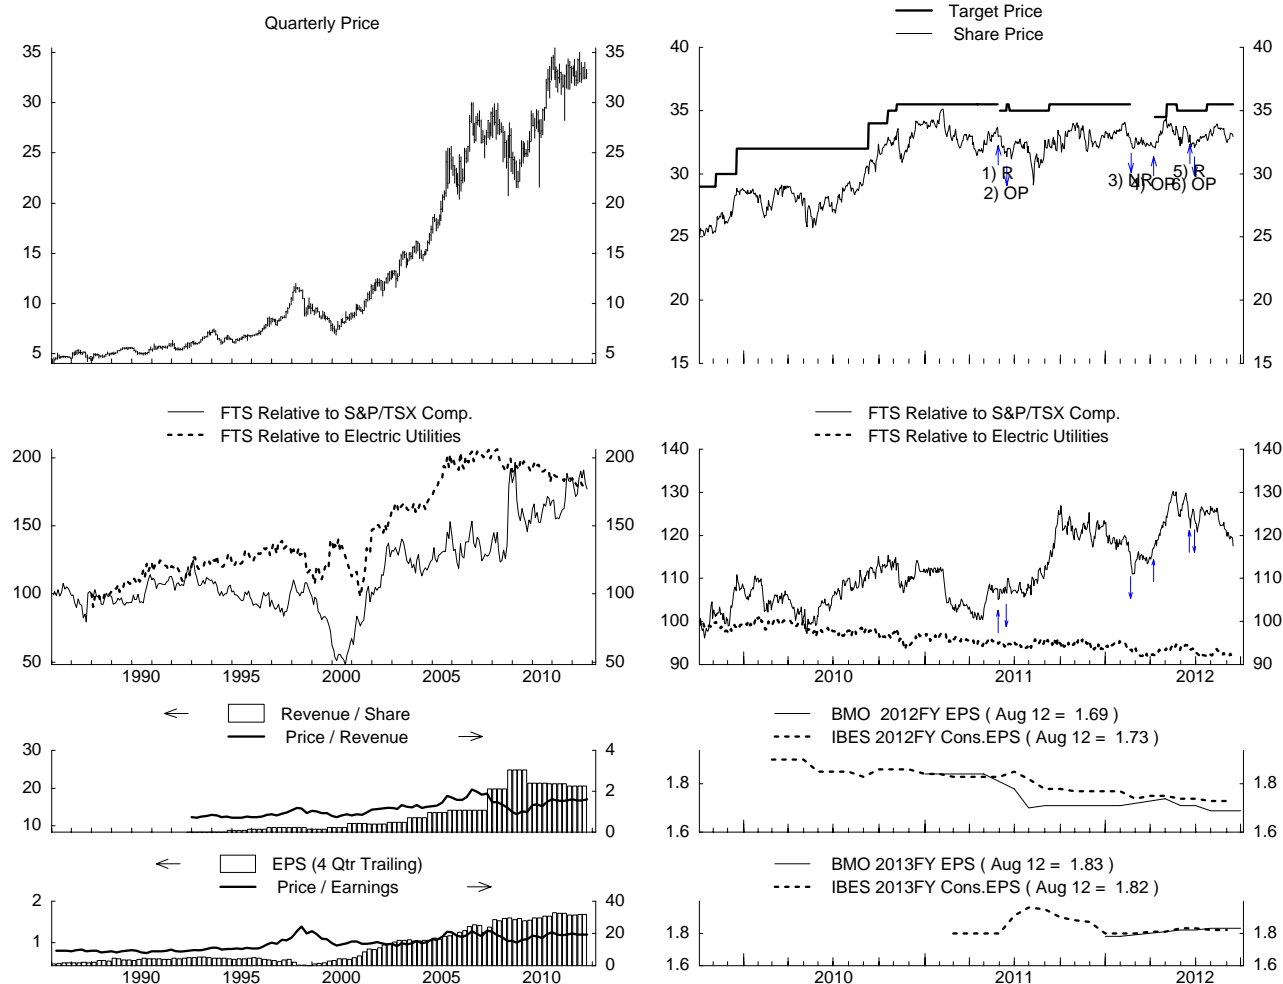

FortisBC Electric entered into preliminary discussions with the City of Kelowna to purchase its electricity distribution assets (~15,000 customers); subject to negotiation of definitive agreements and municipal and regulatory approvals, this transaction is expected to close by the end of Q1/13.

**Forecasts** – We are forecasting EPS (f.d.) of \$1.69 and \$1.83 for 2012 and 2013, respectively.

**Valuation** – Our target price of \$35.50 is based 19.4x 2013E EPS.

**Recommendation** – At current levels, we believe the shares of Fortis are attractively valued. We rate Fortis Outperform. Member of Top 15 Income stock selections.

**IMPORTANT DISCLOSURES****Analyst's Certification**

I, Ben Pham, CFA, hereby certify that the views expressed in this report accurately reflect my personal views about the subject securities or issuers. I also certify that no part of my compensation was, is, or will be, directly or indirectly, related to the specific recommendations or views expressed in this report.

Analysts who prepared this report are compensated based upon (among other factors) the overall profitability of BMO Capital Markets and their affiliates, which includes the overall profitability of investment banking services. Compensation for research is based on effectiveness in generating new ideas and in communication of ideas to clients, performance of recommendations, accuracy of earnings estimates, and service to clients.

Analysts employed by BMO Nesbitt Burns Inc. and/or BMO Capital Markets Ltd. are not registered as research analysts with FINRA. These analysts may not be associated persons of BMO Capital Markets Corp. and therefore may not be subject to the NASD Rule 2711 and NYSE Rule 472 restrictions on communications with a subject company, public appearances and trading securities held by a research analyst account.

**Methodology and Risks to Price Target/Valuation**

**Methodology:** Our target price is approximately 19.4x our 2013E EPS estimate.

**Risks:** Operations are subject to complex regulation by a variety of provincial, state and federal (Canada, Cayman Islands & Belize) agencies. Changes in regulation may adversely affect performance.

**Company Specific Disclosure**

Disclosure 1: BMO Capital Markets has undertaken an underwriting liability with respect to this issuer within the past 12 months.

Disclosure 2: BMO Capital Markets has provided investment banking services with respect to this issuer within the past 12 months.

Disclosure 3: BMO Capital Markets has managed or co-managed a public offering of securities with respect to this issuer within the past 12 months.

Disclosure 4: BMO Capital Markets or an affiliate has received compensation for investment banking services from this issuer within the past 12 months.

Disclosure 5: BMO Capital Markets or an affiliate received compensation for products or services other than investment banking services within the past 12 months.

Disclosure 6: This issuer is a client (or was a client) of BMO NB, BMO Capital Markets Corp., BMO CM Ltd. or an affiliate within the past 12 months: Investment Banking Services & Non-Securities Related Services.

Disclosure 8: BMO Capital Markets or an affiliate has a financial interest in 1% or more of any class of the equity securities of this issuer.

**Ratings and Sector Key**

We use the following ratings system definitions:

OP = Outperform - Forecast to outperform the market;

Mkt = Market Perform - Forecast to perform roughly in line with the market;

Und = Underperform - Forecast to underperform the market;

(S) = speculative investment;

NR = No rating at this time;

R = Restricted – Dissemination of research is currently restricted.

Market performance is measured by a benchmark index such as the S&P/TSX Composite Index, S&P 500, Nasdaq Composite, as appropriate for each company. BMO Capital Markets' seven Top 15 lists guide investors to our best ideas according to different objectives (CDN Large Cap, CDN Small Cap, US Large Cap, US Small cap, Income, CDN Quant, and US Quant) have replaced the Top Pick rating.

**Dissemination of Research**

Our research publications are available via our web site <http://www.bmocm.com/research/>. Institutional clients may also receive our research via FIRST CALL, FIRST CALL Research Direct, Reuters, Bloomberg, FactSet, Capital IQ, and TheMarkets.com. All of our research is made widely available at the same time to all BMO Capital Markets client groups entitled to our research. Additional dissemination may occur via email or regular mail. Please contact your investment advisor or institutional salesperson for more information.

**Conflict Statement**

A general description of how BMO Financial Group identifies and manages conflicts of interest is contained in our public facing policy for managing conflicts of interest in connection with investment research which is available at [http://researchglobal.bmocapitalmarkets.com/Public/Conflict\\_Statement\\_Public.aspx](http://researchglobal.bmocapitalmarkets.com/Public/Conflict_Statement_Public.aspx).

**General Disclaimer**

"BMO Capital Markets" is a trade name used by the BMO Investment Banking Group, which includes the wholesale arm of Bank of Montreal and its subsidiaries BMO Nesbitt Burns Inc. and BMO Nesbitt Burns Ltée./Ltd., BMO Capital Markets Ltd. in the U.K. and BMO Capital Markets Corp. in the U.S. BMO Nesbitt Burns Inc., BMO Capital Markets Ltd. and BMO Capital Markets Corp are affiliates. Bank of Montreal or its subsidiaries ("BMO Financial Group") has lending arrangements with, or provide other remunerated services to, many issuers covered by BMO Capital Markets. The opinions, estimates and projections contained in this report are those of BMO Capital Markets as of the date of this report and are subject to change without notice. BMO Capital Markets endeavours to ensure that the contents have been compiled or derived from sources that we believe are reliable and contain information and opinions that are accurate and complete. However, BMO Capital Markets makes no representation or warranty, express or implied, in respect thereof, takes no responsibility for any errors and omissions contained herein and accepts no liability whatsoever for any loss arising from any use of, or reliance on, this report or its contents. Information may be available to BMO Capital Markets or its affiliates that is not reflected in this report. The information in this report is not intended to be used as the primary basis of investment decisions, and because of individual client objectives, should not be construed as advice designed to meet the particular investment needs of any investor. This material is for information purposes only and is not an offer to sell or the solicitation of an offer to buy any security. BMO Capital Markets or its affiliates will buy from or sell to customers the securities of issuers mentioned in this report on a principal basis. BMO Capital Markets or its affiliates, officers, directors or employees have a long or short position in many of the securities discussed herein, related securities or in options, futures or other derivative instruments based thereon. The reader should assume that BMO Capital Markets or its affiliates may have a conflict of interest and should not rely solely on this report in evaluating whether or not to buy or sell securities of issuers discussed herein.

**Additional Matters**

To Canadian Residents: BMO Nesbitt Burns Inc. and BMO Nesbitt Burns Ltée./Ltd., affiliates of BMO Capital Markets Corp., furnish this report to Canadian residents and accept responsibility for the contents herein subject to the terms set out above. Any Canadian person wishing to effect transactions in any of the securities included in this report should do so through BMO Nesbitt Burns Inc. and/or BMO Nesbitt Burns Ltée./Ltd.

The following applies if this research was prepared in whole or in part by Andrew Breichmanas, Tony Robson, or Edward Sterck: This research is not prepared subject to Canadian disclosure requirements. This research is prepared by BMO Capital Markets Limited and subject to the regulations of the Financial Services Authority (FSA) in the United Kingdom. FSA regulations require that a firm providing research disclose its ownership interest in the issuer that is the subject of the research if it and its affiliates own 5% or more of the equity of the issuer. Canadian regulations require that a firm providing research disclose its ownership interest in the issuer that is the subject of the research if it and its affiliates own 1% or more of the equity of the issuer that is the subject of the research. Therefore BMO Capital Markets Limited will only disclose its and its' affiliates ownership interest in the subject issuer if such ownership exceeds 5% of the equity of the issuer.

To U.S. Residents: BMO Capital Markets Corp. and/or BMO Nesbitt Burns Securities Ltd., affiliates of BMO NB, furnish this report to U.S. residents and accept responsibility for the contents herein, except to the extent that it refers to securities of Bank of Montreal. Any U.S. person wishing to effect transactions in any security discussed herein should do so through BMO Capital Markets Corp. and/or BMO Nesbitt Burns Securities Ltd.

To U.K. Residents: In the UK this document is published by BMO Capital Markets Limited which is authorised and regulated by the Financial Services Authority. The contents hereof are intended solely for the use of, and may only be issued or passed on to, (I) persons who have professional experience in matters relating to investments falling within Article 19(5) of the Financial Services and Markets Act 2000 (Financial Promotion)

Order 2005 (the “Order”) or (II) high net worth entities falling within Article 49(2)(a) to (d) of the Order (all such persons together referred to as “relevant persons”). The contents hereof are not intended for the use of and may not be issued or passed on to, retail clients.

## Q3/12 EPS Largely in Line With Expectations

---

### Impact

Neutral

---

### Details & Analysis

Fortis reported Q3/12 EPS of \$0.24, largely in line with our estimate and Street consensus of \$0.26. Higher-than-expected corporate costs more than offset stronger-than-expected performance from its western Canadian regulated electric utilities, FortisAlberta and FortisBC. Key-takeaways: (1) There were no changes to the company's long-term capital expenditure program. Fortis continues to forecast 2012E capital expenditures of \$1.3 billion and capital expenditures of \$5.5 billion through the end of 2016. Notably, its \$900 million Waneta hydroelectric project (51% Fortis) in British Columbia is still on track for an expected in-service date of spring 2015; (2) Fortis still expects to close the CH Energy Group acquisition by the end of Q1/13, subject to approval by the New York Public Service Commission (application submitted in April); and (3) On the regulatory front, the Alberta Utilities Commission issued a generic decision in September 2012 outlining the performance-based regulation framework applicable to distribution utilities in Alberta for a five-year term starting January 1, 2013. A generic cost of capital proceeding to finalize 2013 cost of capital for Alberta-based distribution utilities is expected to commence in late 2012 or early 2013. Also, Newfoundland Power filed a general rate application in September 2012 for 2013 revenue requirements and cost of capital. A hearing on the application is expected in Q1/13.

This report was prepared by an analyst(s) employed by BMO Nesbitt Burns Inc., and who is (are) not registered as a research analyst(s) under FINRA rules. For disclosure statements, including the Analyst's Certification, please refer to pages 2 to 5.

## Q3 – What's Not to Like?

### Event

Fortis's financial performance in the third quarter was largely in line with our expectations as well as those of the Street. Results from the regulated electric utilities FortisAlberta and FortisBC were above our expectations; however, higher-than-expected corporate costs weighed, resulting in EPS to come in two cents below our estimate (\$0.24 vs. \$0.26). All in all, results were solid across virtually all of the company's business segments, and major growth initiatives continued to progress as planned, providing support for visible and stable earnings growth through at least 2016.

### Impact

Neutral.

### Forecasts

We are maintaining our Q4/12 basic EPS estimate of \$0.46. We have lowered our 2012E EPS to \$1.67 (fd) from \$1.69 (fd) to reflect Q3/12 results. Our 2013E EPS of \$1.83 (fd) and 2014E EPS of \$1.91 (fd) are unchanged.

### Valuation

We are maintaining our target price of \$35.50, which represents 18.5x our 2014E EPS forecast.

### Recommendation

We continue to rate the shares of Fortis Outperform.

**Price (1-Nov)** \$33.90 **52-Week High** \$34.98

### Changes

**Annual EPS**  
 2012E \$1.69 to \$1.67

### Q3 – What's Not to Like?

- **We are maintaining an Outperform rating and 12-month target price of \$35.50 on Fortis shares.** Fortis's financial performance in the third quarter was largely in line with our expectations as well as those of the Street. Results from the company's western Canadian regulated electric utilities, FortisAlberta and FortisBC, were above our expectations; however, higher-than-expected corporate costs weighed, resulting in EPS to come in two cents below our estimate (\$0.24 vs. \$0.26). All in all, results were solid across the company's business segments, and major growth initiatives continued to progress as planned, providing support for visible and stable earnings growth through at least 2016. As global macroeconomic uncertainties persist, we maintain our belief that Fortis's superior earnings stability (through high exposure to rate-regulated operations) makes its shares an attractive vehicle in which to ride the storm. We are maintaining our Outperform rating and \$35.50 target price, which reflects 18.5x our 2014E EPS forecast.
- **Plans for \$5.5 billion in capital expenditure programs through 2016 are unchanged.** Consolidated capital expenditures totalled ~\$283 million in Q3/12 (~\$794 million for the nine months of 2012). The company's full-year outlook for capital spending is unchanged (\$1.3 billion) as is its estimate of ~\$5.5 billion in total capital spending between 2012 and 2016. Over this five-year period, Fortis plans to deploy ~64% of the total capital spending to regulated electric activities (driven by FortisAlberta and FortisBC Electric), ~23% to regulated gas utilities, and ~13% to non-regulated operations.
- **CH Energy acquisition on track for end of Q1/13 close:** Subsequent to the quarter-end, another milestone was attained in the proposed CH Energy acquisition as the required waiting period under the *Hart-Scott-Rodino Antitrust Improvements Act of 1976* was satisfied in October 2012. The transaction continues to await approval from the New York State Public Service Commission; the company maintains its expectation for the transaction to close by the end of Q1/13. Recall that this acquisition is fully-funded given the company's issuance of ~\$600 million in subscription receipts at the end of June.
- **Waneta expansion:** Construction activities continued for the \$900 million Waneta dam expansion, a project in which Fortis holds a 51% interest. A total of \$380 million has been spent to date since construction began in late 2010. The company has reported that the project is still on track for completion on budget and on time, with a target in-service date of spring 2015.
- **Recent financing activities show continued access to capital at attractive rates:** In October 2012, FortisAlberta raised \$125 million in 40-year unsecured debentures at 3.98%. Subsequent to the earnings release, Fortis also announced an offering of \$150 million in Series J preferred shares (up to \$200 million including an over-allotment option) at 4.75%; this transaction is expected to close on November 13, 2012. The company continues to demonstrate an ability to effectively manage its capital structure and secure relatively low-cost financing, which should support future value creation from its large-scale capital spending program.

- **Key regulatory updates:**

- In September 2012, the Alberta Utilities Commission (AUC) issued a generic decision outlining a new Performance-Based Regulation (PBR) framework which will be applicable to all distribution utilities (gas and electric) in Alberta over a five-year period commencing January 1, 2013. FortisAlberta will file its PBR compliance application in November 2012; however, the company believes that PBR poses a “greater risk that FortisAlberta’s earnings will be negatively impacted given the length of the PBR term and the uncertainty of resulting rate adjustments,” and has sought leave to appeal the September PBR decision with the Alberta Court of Appeal. Given that this is the AUC’s first attempt at this type of PBR implementation, the mechanics remain somewhat of an unknown to utility players in Alberta. We expect more insight with respect to the company-specific impacts of PBR to become available in early 2013 after the filing of compliance applications.
- The company expects that the AUC will hold a Generic Cost of Capital proceeding to finalize 2013 cost of capital rates either in late 2012 or early 2013.
- The British Columbia Utilities Commission (BCUC) issued its decision with respect to FortisBC’s 2012/2013 Revenue Requirements Application (RRA) as well as its 2012/2013 Capital Expenditure Plan (CEP) and its 2012/2013 Integrated Systems Plan. The final revenue requirements for 2012 and 2013 are based on the same ROE and capital structure as was used in 2011, pending the outcome of the BCUC’s 2013 Generic Cost of Capital review (see below). The decision on the CEP will result in a mid-year rate base of ~\$1.112 billion for 2012 and \$1.173 billion for 2013 (vs. \$1.146 billion and \$1.215 billion for 2012 and 2013 as requested). Fortis has reported that the cumulative impact of this rate decision has been recorded in Q3/12.
- Evidence proceedings for the BCUC’s 2013 Generic Cost of Capital review are expected to continue through December 2012, with an oral hearing expected to commence on December 12, 2012. The outcome of these proceedings remains uncertain and could have a material impact on the future earnings of the FortisBC Energy Companies as well as FortisBC Electric.
- In September 2012, Newfoundland Power filed a General Rate Application with the Board of Commissioners of Public Utilities of Newfoundland (PUB) for its 2013 electricity rates and allowed cost of capital. FTS expects that the PUB will hold a hearing on this application in Q1/13.

- **Smaller acquisition opportunities not to be counted out:** During the quarter, the company pursued several small-scale acquisitions across its different platforms. These acquisitions took place largely under the radar due to their size, but we highlight them here: (1) FortisBC Electric made an offer to purchase electrical utility assets from the City of Kelowna for \$55 million and is currently working with the City to close the transaction by the end of Q1/13; (2) Fortis Turks and Caicos acquired Turks and Caicos Utilities Limited in August 2012 for US\$13 million. This business includes 9 MW in diesel generating

capacity and serves over 2,000 electrical customers; (3) In October 2012, Fortis Properties acquired the 126-room StationPark All Suite Hotel in London, Ontario for ~\$13 million.

- **Liquidity and resources:** As of September 30, the company had \$147 million of cash and consolidated credit facilities of roughly \$2.5 billion, of which ~\$2.0 billion was available.
- **Estimate revisions:** We are maintaining our Q4/12 basic EPS estimate of \$0.46. We have lowered our 2012E EPS to \$1.67 (fd) from \$1.69 (fd) to reflect Q3/12 results. Our 2013E EPS of \$1.83 (fd) and 2014E EPS of \$1.91 (fd) are unchanged. Our consolidated estimates are set out in Exhibit 4.
- **Valuation:** We are maintaining an Outperform rating and 12-month target price of \$35.50 on Fortis shares. Fortis shares currently trade at a P/E multiple of 17.7x our 2014 EPS estimate, which is towards the upper end of its five-year historical trading range. We reiterate our belief that this valuation premium is justified, given the company's superior earnings visibility (~90% of Fortis's earnings arise from utility operations, the highest among its peers) and the persistence of historically low 10-year government of Canada bond yields.

**Ratings and Sector Key**

We use the following ratings system definitions:

OP = Outperform - Forecast to outperform the market;

Mkt = Market Perform - Forecast to perform roughly in line with the market;

Und = Underperform - Forecast to underperform the market;

(S) = speculative investment;

NR = No rating at this time;

R = Restricted – Dissemination of research is currently restricted.

Market performance is measured by a benchmark index such as the S&P/TSX Composite Index, S&P 500, Nasdaq Composite, as appropriate for each company. BMO Capital Markets' seven Top 15 lists guide investors to our best ideas according to different objectives (CDN Large Cap, CDN Small Cap, US Large Cap, US Small cap, Income, CDN Quant, and US Quant) have replaced the Top Pick rating.

Please contact your investment advisor or institutional salesperson for more information.

#### Conflict Statement

A general description of how BMO Financial Group identifies and manages conflicts of interest is contained in our public facing policy for managing conflicts of interest in connection with investment research which is available at [http://researchglobal.bmocapitalmarkets.com/Public/Conflict\\_Statement\\_Public.aspx](http://researchglobal.bmocapitalmarkets.com/Public/Conflict_Statement_Public.aspx).

#### General Disclaimer

"BMO Capital Markets" is a trade name used by the BMO Investment Banking Group, which includes the wholesale arm of Bank of Montreal and its subsidiaries BMO Nesbitt Burns Inc. and BMO Nesbitt Burns Ltée./Ltd., BMO Capital Markets Ltd. in the U.K. and BMO Capital Markets Corp. in the U.S. BMO Nesbitt Burns Inc., BMO Capital Markets Ltd. and BMO Capital Markets Corp are affiliates. Bank of Montreal or its subsidiaries ("BMO Financial Group") has lending arrangements with, or provide other remunerated services to, many issuers covered by BMO Capital Markets. The opinions, estimates and projections contained in this report are those of BMO Capital Markets as of the date of this report and are subject to change without notice. BMO Capital Markets endeavours to ensure that the contents have been compiled or derived from sources that we believe are reliable and contain information and opinions that are accurate and complete. However, BMO Capital Markets makes no representation or warranty, express or implied, in respect thereof, takes no responsibility for any errors and omissions contained herein and accepts no liability whatsoever for any loss arising from any use of, or reliance on, this report or its contents. Information may be available to BMO Capital Markets or its affiliates that is not reflected in this report. The information in this report is not intended to be used as the primary basis of investment decisions, and because of individual client objectives, should not be construed as advice designed to meet the particular investment needs of any investor. This material is for information purposes only and is not an offer to sell or the solicitation of an offer to buy any security. BMO Capital Markets or its affiliates will buy from or sell to customers the securities of issuers mentioned in this report on a principal basis. BMO Capital Markets or its affiliates, officers, directors or employees have a long or short position in many of the securities discussed herein, related securities or in options, futures or other derivative instruments based thereon. The reader should assume that BMO Capital Markets or its affiliates may have a conflict of interest and should not rely solely on this report in evaluating whether or not to buy or sell securities of issuers discussed herein.

#### Additional Matters

To Canadian Residents: BMO Nesbitt Burns Inc. and BMO Nesbitt Burns Ltée./Ltd., affiliates of BMO Capital Markets Corp., furnish this report to Canadian residents and accept responsibility for the contents herein subject to the terms set out above. Any Canadian person wishing to effect transactions in any of the securities included in this report should do so through BMO Nesbitt Burns Inc. and/or BMO Nesbitt Burns Ltée./Ltd.

The following applies if this research was prepared in whole or in part by Andrew Breichmanas, Tony Robson, or Edward Sterck: This research is not prepared subject to Canadian disclosure requirements. This research is prepared by BMO Capital Markets Limited and subject to the regulations of the Financial Services Authority (FSA) in the United Kingdom. FSA regulations require that a firm providing research disclose its ownership interest in the issuer that is the subject of the research if it and its affiliates own 5% or more of the equity of the issuer. Canadian regulations require that a firm providing research disclose its ownership interest in the issuer that is the subject of the research if it and its affiliates own 1% or more of the equity of the issuer that is the subject of the research. Therefore BMO Capital Markets Limited will only disclose its and its' affiliates ownership interest in the subject issuer if such ownership exceeds 5% of the equity of the issuer.

To U.S. Residents: BMO Capital Markets Corp. and/or BMO Nesbitt Burns Securities Ltd., affiliates of BMO NB, furnish this report to U.S. residents and accept responsibility for the contents herein, except to the extent that it refers to securities of Bank of Montreal. Any U.S. person wishing to effect transactions in any security discussed herein should do so through BMO Capital Markets Corp. and/or BMO Nesbitt Burns Securities Ltd.

To U.K. Residents: In the UK this document is published by BMO Capital Markets Limited which is authorised and regulated by the Financial Services Authority. The contents hereof are intended solely for the use of, and may only be issued or passed on to, (I) persons who have professional experience in matters relating to investments falling within Article 19(5) of the Financial Services and Markets Act 2000 (Financial Promotion) Order 2005 (the "Order") or (II) high net worth entities falling within Article 49(2)(a) to (d) of the Order (all such persons together referred to as "relevant persons"). The contents hereof are not intended for the use of and may not be issued or passed on to, retail clients.

**Company Description** – Fortis Inc. (Fortis) is a publicly listed holding company with four key businesses: electric utility operations, regulated natural gas distribution, non-regulated electric power generation and non-utility property activities. Gas and electric utility operations include Newfoundland Power (100%), Maritime Electric (100%), Fortis Ontario (100%), Caribbean Utilities (59.5%), Turks

and Caicos (100%), FortisAlberta (100%), FortisBC (100%) and the FortisBC Energy Companies (100%). *Website:* fortisinc.com

**Recent Results** – Fortis reported Q3/12 financial results that were generally in line with expectations and those of the Street (EPS of \$0.24 vs. our estimate and consensus of \$0.26), reflective of higher-than-expected corporate costs,

This report was prepared by an analyst(s) employed by BMO Nesbitt Burns Inc., and who is (are) not registered as a research analyst(s) under FINRA rules. For disclosure statements, including the Analyst's Certification, please refer to the back pages.

which more than offset strong performance from regulated electric utilities FortisAlberta and FortisBC.

**Corporate Developments** – On November 13, Fortis closed an offering of \$200 million in Series J preferred shares at 4.75%. The funds will be used to repay borrowings under the company's credit facility as well as for the construction of the Waneta dam expansion project, which has a target in-service date of 2015.

The company announced that another milestone was attained in the proposed CH Energy acquisition as the required waiting period under the Hart-Scott-Rodino Antitrust Improvements Act of 1976 was satisfied in October. The transaction continues to await approval from the New York State Public Service Commission; the company maintains its expectation for the transaction to close by the end of Q1/13.

In September 2012, the Alberta Utilities Commission (AUC) issued a generic decision outlining a new

Performance-Based Regulation (PBR) framework, which will be applicable to all distribution utilities (gas and electric) in Alberta over a five-year period commencing January 1, 2013. PBR proceedings continue in Alberta with the company filing its compliance application in November. We expect that more insight with respect to the company-specific impacts of PBR will become available in early 2013.

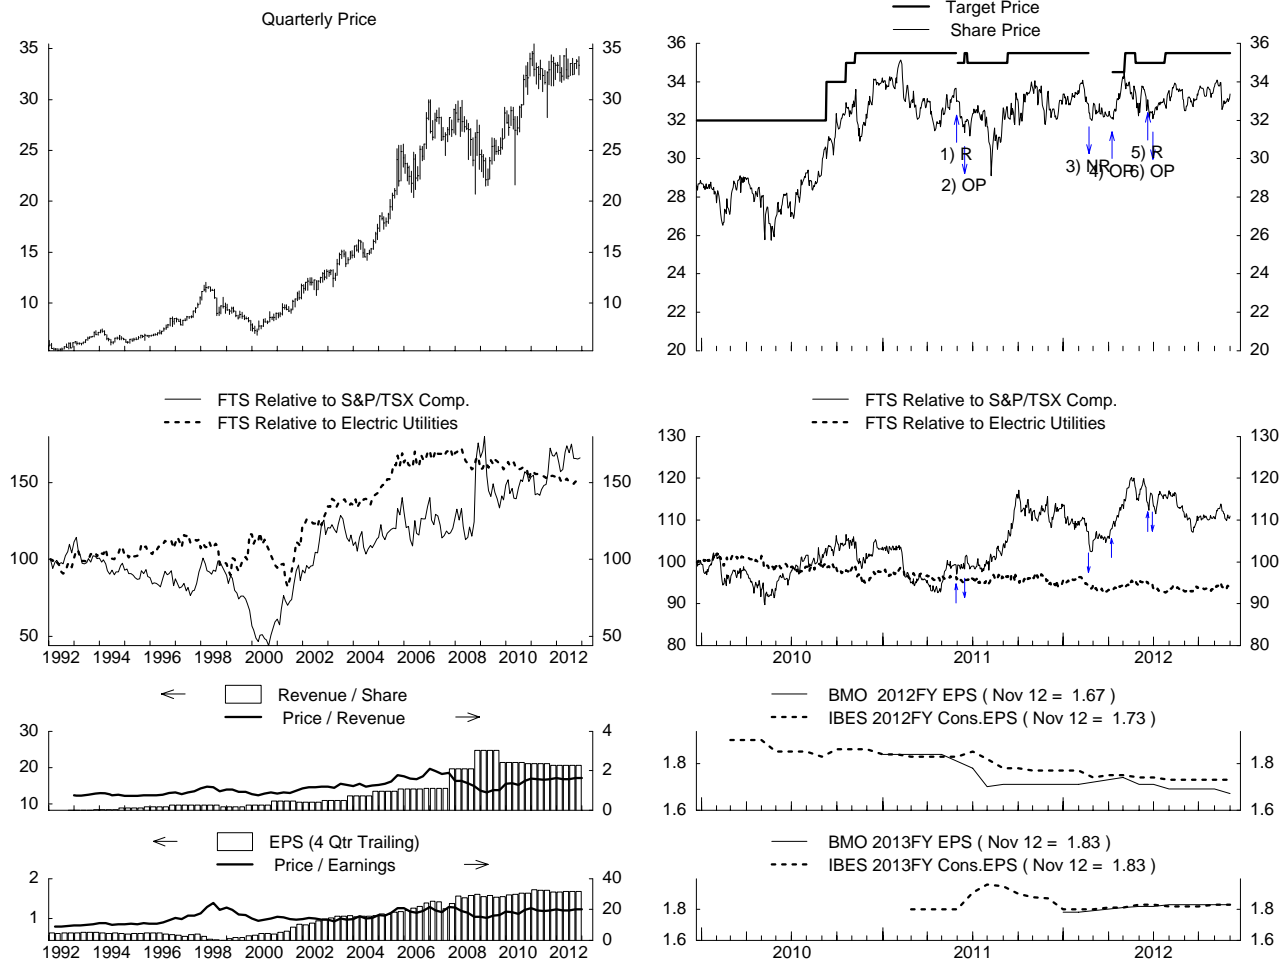

**Forecasts** – We are forecasting EPS (f.d.) of \$1.67, \$1.83 and \$1.91 for 2012, 2013 and 2014, respectively.

**Valuation** – Our target price of \$35.50 is based on 18.5x 2014E EPS.

**Recommendation** – At current levels, we believe the shares of Fortis are attractively valued. We rate Fortis Outperform.

A general description of how BMO Financial Group identifies and manages conflicts of interest is contained in our public facing policy for managing conflicts of interest in connection with investment research which is available at [http://researchglobal.bmocapitalmarkets.com/Public/Conflict\\_Statement\\_Public.aspx](http://researchglobal.bmocapitalmarkets.com/Public/Conflict_Statement_Public.aspx).

**General Disclaimer**

"BMO Capital Markets" is a trade name used by the BMO Investment Banking Group, which includes the wholesale arm of Bank of Montreal and its subsidiaries BMO Nesbitt Burns Inc., BMO Capital Markets Ltd. in the U.K. and BMO Capital Markets Corp. in the U.S. BMO Nesbitt Burns Inc., BMO Capital Markets Ltd. and BMO Capital Markets Corp are affiliates. Bank of Montreal or its subsidiaries ("BMO Financial Group") has lending arrangements with, or provide other remunerated services to, many issuers covered by BMO Capital Markets. The opinions, estimates and projections contained in this report are those of BMO Capital Markets as of the date of this report and are subject to change without notice. BMO Capital Markets endeavours to ensure that the contents have been compiled or derived from sources that we believe are reliable and contain information and opinions that are accurate and complete. However, BMO Capital Markets makes no representation or warranty, express or implied, in respect thereof, takes no responsibility for any errors and omissions contained herein and accepts no liability whatsoever for any loss arising from any use of, or reliance on, this report or its contents. Information may be available to BMO Capital Markets or its affiliates that is not reflected in this report. The information in this report is not intended to be used as the primary basis of investment decisions, and because of individual client objectives, should not be construed as advice designed to meet the particular investment needs of any investor. This material is for information purposes only and is not an offer to sell or the solicitation of an offer to buy any security. BMO Capital Markets or its affiliates will buy from or sell to customers the securities of issuers mentioned in this report on a principal basis. BMO Capital Markets or its affiliates, officers, directors or employees have a long or short position in many of the securities discussed herein, related securities or in options, futures or other derivative instruments based thereon. The reader should assume that BMO Capital Markets or its affiliates may have a conflict of interest and should not rely solely on this report in evaluating whether or not to buy or sell securities of issuers discussed herein.

**Additional Matters**

To Canadian Residents: BMO Nesbitt Burns Inc., affiliate of BMO Capital Markets Corp., furnishes this report to Canadian residents and accepts responsibility for the contents herein subject to the terms set out above. Any Canadian person wishing to effect transactions in any of the securities included in this report should do so through BMO Nesbitt Burns Inc.

The following applies if this research was prepared in whole or in part by Andrew Breichmanas, Tony Robson, or Edward Sterck: This research is not prepared subject to Canadian disclosure requirements. This research is prepared by BMO Capital Markets Limited and subject to the regulations of the Financial Services Authority (FSA) in the United Kingdom. FSA regulations require that a firm providing research disclose its ownership interest in the issuer that is the subject of the research if it and its affiliates own 5% or more of the equity of the issuer. Canadian regulations require that a firm providing research disclose its ownership interest in the issuer that is the subject of the research if it and its affiliates own 1% or more of the equity of the issuer that is the subject of the research. Therefore BMO Capital Markets Limited will only disclose its and its' affiliates ownership interest in the subject issuer if such ownership exceeds 5% of the equity of the issuer.

To U.S. Residents: BMO Capital Markets Corp. and/or BMO Nesbitt Burns Securities Ltd., affiliates of BMO NB, furnish this report to U.S. residents and accept responsibility for the contents herein, except to the extent that it refers to securities of Bank of Montreal. Any U.S. person wishing to effect transactions in any security discussed herein should do so through BMO Capital Markets Corp. and/or BMO Nesbitt Burns Securities Ltd.

To U.K. Residents: In the UK this document is published by BMO Capital Markets Limited which is authorised and regulated by the Financial Services Authority. The contents hereof are intended solely for the use of, and may only be issued or passed on to, (I) persons who have professional experience in matters relating to investments falling within Article 19(5) of the Financial Services and Markets Act 2000 (Financial Promotion)

Order 2005 (the “Order”) or (II) high net worth entities falling within Article 49(2)(a) to (d) of the Order (all such persons together referred to as “relevant persons”). The contents hereof are not intended for the use of and may not be issued or passed on to, retail clients.

## Quarterly Dividend Increased by 3.3%

---

### Impact

Neutral

---

### Details & Analysis

Fortis Inc. announced that its board of directors has approved an increase in the company's quarterly common share dividend to \$0.31/share from the current quarterly rate of \$0.30/share (~3.3% increase), marking the company's 40th consecutive year of dividend increases. As a result of this announcement, the new annualized common share dividend will be \$1.24 (vs. \$1.20 previously). The dividend is payable on March 1, 2013, to common shareholders of record at the close of business on February 14, 2013. The dividend increase is consistent with our estimates and, as such, we view the impact of the announcement as neutral.

This report was prepared by an analyst(s) employed by BMO Nesbitt Burns Inc., and who is (are) not registered as a research analyst(s) under FINRA rules. For disclosure statements, including the Analyst's Certification, please refer to pages 2 to 5.

**Ratings and Sector Key**

We use the following ratings system definitions:

OP = Outperform - Forecast to outperform the market;

Mkt = Market Perform - Forecast to perform roughly in line with the market;

Und = Underperform - Forecast to underperform the market;

(S) = speculative investment;

NR = No rating at this time;

R = Restricted – Dissemination of research is currently restricted.

Market performance is measured by a benchmark index such as the S&P/TSX Composite Index, S&P 500, Nasdaq Composite, as appropriate for each company. BMO Capital Markets' seven Top 15 lists guide investors to our best ideas according to different objectives (CDN Large Cap, CDN Small Cap, US Large Cap, US Small cap, Income, CDN Quant, and US Quant) have replaced the Top Pick rating.

**Conflict Statement**

A general description of how BMO Financial Group identifies and manages conflicts of interest is contained in our public facing policy for managing conflicts of interest in connection with investment research which is available at [http://researchglobal.bmocapitalmarkets.com/Public/Conflict\\_Statement\\_Public.aspx](http://researchglobal.bmocapitalmarkets.com/Public/Conflict_Statement_Public.aspx)

**General Disclaimer**

“BMO Capital Markets” is a trade name used by the BMO Investment Banking Group, which includes the wholesale arm of Bank of Montreal and its subsidiaries BMO Nesbitt Burns Inc., BMO Capital Markets Ltd. in the U.K. and BMO Capital Markets Corp. in the U.S. BMO Nesbitt Burns Inc., BMO Capital Markets Ltd. and BMO Capital Markets Corp are affiliates. Bank of Montreal or its subsidiaries (“BMO Financial Group”) has lending arrangements with, or provide other remunerated services to, many issuers covered by BMO Capital Markets. The opinions, estimates and projections contained in this report are those of BMO Capital Markets as of the date of this report and are subject to change without notice. BMO Capital Markets endeavours to ensure that the contents have been compiled or derived from sources that we believe are reliable and contain information and opinions that are

accurate and complete. However, BMO Capital Markets makes no representation or warranty, express or implied, in respect thereof, takes no responsibility for any errors and omissions contained herein and accepts no liability whatsoever for any loss arising from any use of, or reliance on, this report or its contents. Information may be available to BMO Capital Markets or its affiliates that is not reflected in this report. The information in this report is not intended to be used as the primary basis of investment decisions, and because of individual client objectives, should not be construed as advice designed to meet the particular investment needs of any investor. This material is for information purposes only and is not an offer to sell or the solicitation of an offer to buy any security. BMO Capital Markets or its affiliates will buy from or sell to customers the securities of issuers mentioned in this report on a principal basis. BMO Capital Markets or its affiliates, officers, directors or employees have a long or short position in many of the securities discussed herein, related securities or in options, futures or other derivative instruments based thereon. The reader should assume that BMO Capital Markets or its affiliates may have a conflict of interest and should not rely solely on this report in evaluating whether or not to buy or sell securities of issuers discussed herein.

**Additional Matters**

To Canadian Residents: BMO Nesbitt Burns Inc., affiliate of BMO Capital Markets Corp., furnishes this report to Canadian residents and accepts responsibility for the contents herein subject to the terms set out above. Any Canadian person wishing to effect transactions in any of the securities included in this report should do so through BMO Nesbitt Burns Inc.

The following applies if this research was prepared in whole or in part by Andrew Breichmanas, Tony Robson, or Edward Sterck: This research is not prepared subject to Canadian disclosure requirements. This research is prepared by BMO Capital Markets Limited and subject to the regulations of the Financial Services Authority (FSA) in the United Kingdom. FSA regulations require that a firm providing research disclose its ownership interest in the issuer that is the subject of the research if it and its affiliates own 5% or more of the equity of the issuer. Canadian regulations require that a firm providing research disclose its ownership interest in the issuer that is the subject of the research if it and its affiliates own 1% or more of the equity of the issuer that is the subject of the research. Therefore BMO Capital Markets Limited will only disclose its and its' affiliates ownership interest in the subject issuer if such ownership exceeds 5% of the equity of the issuer.

To U.S. Residents: BMO Capital Markets Corp. and/or BMO Nesbitt Burns Securities Ltd., affiliates of BMO NB, furnish this report to U.S. residents and accept responsibility for the contents herein, except to the extent that it refers to securities of Bank of Montreal. Any U.S. person wishing to effect transactions in any security discussed herein should do so through BMO Capital Markets Corp. and/or BMO Nesbitt Burns Securities Ltd.

To U.K. Residents: In the UK this document is published by BMO Capital Markets Limited which is authorised and regulated by the Financial Services Authority. The contents hereof are intended solely for the use of, and may only be issued or passed on to, (I) persons who have professional experience in matters relating to investments falling within Article 19(5) of the Financial Services and Markets Act 2000 (Financial Promotion) Order 2005 (the "Order") or (II) high net worth entities falling within Article 49(2)(a) to (d) of the Order (all such persons together referred to as "relevant persons"). The contents hereof are not intended for the use of and may not be issued or passed on to, retail clients.

## Could Be a Range-Bound Year; Downgrading to Market Perform

### Event

We are downgrading our rating on Fortis to Market Perform from Outperform.

### Impact

Neutral.

### Forecasts

There are no changes to our EPS forecast (f.d.) of \$1.67 in 2012E, \$1.83 in 2013E, and \$1.91 in 2014E.

### Valuation

Our unchanged target price of \$35.50 reflects 18.5x our 2014E EPS forecast.

### Recommendation

We believe owning FTS in the long-term should pay off due to robust rate base expansion and consistent dividend growth. Nevertheless, the stock has performed relatively well, is facing near-term regulatory headwinds, and in our view, has limited M&A catalysts this year. As a result, we now think it will trade in line with the group over the next 12 months. There is no change to our target price of \$35.50, but we are downgrading our rating to Market Perform.

**Price (7-Jan)** \$34.52      **52-Week High** \$34.98

### Changes

**Rating**  
 OP to Mkt

## Could Be a Range-Bound Year; Downgrading to Market Perform

- **There is no change to our target price but we are downgrading the shares of Fortis to Market Perform.** Fortis has performed well relative to our coverage universe since April 2012 (10.2% total return vs. 5.3% for the S&P/TSX Utility Index) in recognition of its solid growth prospects, high quality management team and a track record of dividend growth. Low interest rates have also supported the stock, in our view. We do not envision any meaningful change in interest rates to move the stock's valuation sharply higher or lower, while we doubt EPS growth will accelerate beyond 5%. We believe owning FTS in the long-term should pay off due to robust rate base expansion and consistent dividend growth. Nevertheless, the stock has performed relatively well, is facing near-term regulatory headwinds, and in our view, has limited M&A catalysts this year. As a result, we now think it will trade in line with the group over the next 12 months. There is no change to our target price of \$35.50, but we are downgrading our rating to Market Perform.
- **In the spring of 2012, Fortis shares were suffering from a lack of appreciation of its growth profile and from an overhang of an equity issue to finance the proposed acquisition of CH Energy Group.** Concerns also lingered over downside to B.C. regulated returns. Steady progress on its organic capital program and the 3.3% dividend increase in December removed the overhang, in our view. Furthermore, although B.C.-regulated returns will likely move lower for 2013E, there will not be a retroactive adjustment to allowed returns for 2012 as initially feared.
- **Acquisition upside is still possible, but we see limited M&A catalysts this year.** In the United States, Fortis is well positioned to grow through acquisitions. Having said that, should Fortis pay 50%+ premiums for rate base, we believe it may be more difficult for the company to execute on further U.S. acquisitions in an accretive manner (Exhibit 1). For example, the pending CH Energy acquisition was probably at least initially \$0.05/sh accretive, but is now likely more \$0.02–0.03/sh accretive in light of the revised financing structure (more common equity than planned).

**Exhibit 1: Accretion Sensitivity of a Potential U.S. Utility Transaction**

		Multiple of Rate Base				
		1.1x	1.2x	1.3x	1.4x	1.5x
Acquired Rate Base (\$mm)	1,000	\$0.08	\$0.06	\$0.04	\$0.02	\$0.00
	1,500	\$0.11	\$0.08	\$0.06	\$0.03	\$0.00
	2,000	\$0.14	\$0.11	\$0.07	\$0.04	\$0.00
	2,500	\$0.18	\$0.13	\$0.09	\$0.05	\$0.00
	3,000	\$0.21	\$0.15	\$0.10	\$0.05	\$0.01

Note: Assumes similar financing structure as pending CH Energy acquisition, allowed ROE of 10%, and deemed equity of 50%

Source: BMO Capital Markets

- **We maintain our view that the company's organic growth initiatives will continue to drive earnings and dividend increases.** In its Q3/12 earnings report, Fortis reaffirmed a 2012–2016 capital spending program of \$5.5 billion. In particular, the company's flagship 335 MW Waneta dam expansion (51% FTS) is proceeding on time and on budget and is

anticipated to be in-service in spring 2015. FTS's investment in Waneta of about \$459 million is relatively small as a percentage of its overall capital program, but is still meaningful. We believe it could add ~\$0.10 in EPS in 2015E. Our outlook assumes a dividend increase in December 2013 to \$1.30 per annum from \$1.24, which equates to a reasonable 67.4% payout ratio.

- **Fortis is the most vulnerable in our coverage universe to a reduction in the B.C.-allowed ROE.** It has been widely known for some time that there could be downside to 2013 B.C.-regulated returns, but the degree of the decline remains uncertain. Our view has been for a roughly 50 bps decline in the benchmark ROE to ~9% (or \$0.05 EPS impact). The 2013 generic cost of capital hearing recently ended and we expect a cost of capital decision within the next three months.
- **Regulatory risk could be emerging in Alberta.** In September 2012, the Alberta Utilities Commission issued its decision on distribution performance-based regulation (PBR) over a five-year period commencing January 1, 2013. Our view is that PBR is more risky than cost-of-service regulation and could result in capex deferral at FortisAlberta (~23% of Fortis's earnings). That is because this form of regulation limits annual rate increases to a fixed formula that is linked largely to inflation escalators. For a utility with no growth (or growing at inflation), this is generally not a concern; however, for a company with above-average rate base growth like FortisAlberta, there is a risk that should capital spending exceed what is incorporated in performance-based rates, it would be shareholders and not ratepayers that would absorb the cost overruns. The good news is Fortis could mitigate this risk via a capital tracker or through cost efficiencies and productivity enhancements, or simply defer capex. Moreover, FortisAlberta could receive regulatory relief either through higher deemed equity ratios (we see this as more likely) or a higher allowed ROE (8.75% currently), as part of the Commission's 2013 Generic Cost of Capital proceeding. Whatever the outcome, we think it should be acknowledged that there is higher risk to FortisAlberta's capital program and earnings profile than previously; our preliminary view is for a potential \$0.03/\$0.04 per share drag to 2013E/2014E earnings.
- **Valuation:** There is no change to our target price of \$35.50, but we are downgrading our recommendation to Market Perform. Our target price reflects 18.5x our 2014E EPS (Exhibit 2). Fortis shares currently trade at a P/E multiple of 18.1x our 2014 EPS estimate, which is towards the upper end of its five-year historical trading range. We maintain our belief that this valuation premium is currently justified, given the company's superior earnings visibility (~90% of Fortis's earnings arise from utility operations, the highest among its peers) and the persistence of historically low 10-year government of Canada bond yields.

**Exhibit 2: FTS – P/E, Share Price and Target P/E**

Source: Thomson One, Bloomberg

**Exhibit 3: Upcoming Events/Catalysts**

Early 2013	Expected New York Commission approval of CH Energy transaction
Early 2013	Expected decision on BCUC Cost of Capital Proceeding
Early 2013	Commencement of AUC 2013 Generic Cost of Capital
Feb/Mar 2013	Expected release of 2012 year-end financial results
During Q1/13	Expected hearing on Newfoundland Power 2013 general rate application
End of Q1/13	Expected closing of CH Energy transaction
End of Q1/13	Expected closing of Kelowna distribution asset acquisition
2H/2013	Expected completion of Newfoundland office building
Spring 2015	Expected commissioning of Waneta hydro facility

**Ratings and Sector Key**

We use the following ratings system definitions:

OP = Outperform - Forecast to outperform the market;

Mkt = Market Perform - Forecast to perform roughly in line with the market;

Und = Underperform - Forecast to underperform the market;

(S) = speculative investment;

NR = No rating at this time;

R = Restricted – Dissemination of research is currently restricted.

Market performance is measured by a benchmark index such as the S&P/TSX Composite Index, S&P 500, Nasdaq Composite, as appropriate for each company. BMO Capital Markets' seven Top 15 lists guide investors to our best ideas according to different objectives (CDN Large Cap, CDN Small Cap, US Large Cap, US Small cap, Income, CDN Quant, and US Quant) have replaced the Top Pick rating.

The information in this report is not intended to be used as the primary basis of investment decisions, and because of individual client objectives, should not be construed as advice designed to meet the particular investment needs of any investor. This material is for information purposes only and is not an offer to sell or the solicitation of an offer to buy any security. BMO Capital Markets or its affiliates will buy from or sell to customers the securities of issuers mentioned in this report on a principal basis. BMO Capital Markets or its affiliates, officers, directors or employees have a long or short position in many of the securities discussed herein, related securities or in options, futures or other derivative instruments based thereon. The reader should assume that BMO Capital Markets or its affiliates may have a conflict of interest and should not rely solely on this report in evaluating whether or not to buy or sell securities of issuers discussed herein.

**Additional Matters**

To Canadian Residents: BMO Nesbitt Burns Inc., affiliate of BMO Capital Markets Corp., furnishes this report to Canadian residents and accepts responsibility for the contents herein subject to the terms set out above. Any Canadian person wishing to effect transactions in any of the securities included in this report should do so through BMO Nesbitt Burns Inc.

The following applies if this research was prepared in whole or in part by Andrew Breichmanas, Tony Robson, or Edward Sterck: This research is not prepared subject to Canadian disclosure requirements. This research is prepared by BMO Capital Markets Limited and subject to the regulations of the Financial Services Authority (FSA) in the United Kingdom. FSA regulations require that a firm providing research disclose its ownership interest in the issuer that is the subject of the research if it and its affiliates own 5% or more of the equity of the issuer. Canadian regulations require that a firm providing research disclose its ownership interest in the issuer that is the subject of the research if it and its affiliates own 1% or more of the equity of the issuer that is the subject of the research. Therefore BMO Capital Markets Limited will only disclose its and its' affiliates ownership interest in the subject issuer if such ownership exceeds 5% of the equity of the issuer.

To U.S. Residents: BMO Capital Markets Corp. and/or BMO Nesbitt Burns Securities Ltd., affiliates of BMO NB, furnish this report to U.S. residents and accept responsibility for the contents herein, except to the extent that it refers to securities of Bank of Montreal. Any U.S. person wishing to effect transactions in any security discussed herein should do so through BMO Capital Markets Corp. and/or BMO Nesbitt Burns Securities Ltd.

To U.K. Residents: In the UK this document is published by BMO Capital Markets Limited which is authorised and regulated by the Financial Services Authority. The contents hereof are intended solely for the use of, and may only be issued or passed on to, (I) persons who have professional experience in matters relating to investments falling within Article 19(5) of the Financial Services and Markets Act 2000 (Financial Promotion) Order 2005 (the "Order") or (II) high net worth entities falling within Article 49(2)(a) to (d) of the Order (all such persons together referred to as "relevant persons"). The contents hereof are not intended for the use of and may not be issued or passed on to, retail clients.

## CH Acquisition Now Expected to Close in Q2/13

---

### Impact

Slightly Negative

---

### Details & Analysis

Fortis and Central Hudson Gas & Electric Corporation (100% CH Energy Group) have jointly filed a [settlement agreement](#) with the New York State Public Service Commission with respect to the proposed acquisition of CH Energy by Fortis. Among the key elements of the settlement agreement include nearly US\$50 million in customer and community benefits (vs. US\$20 million as was proposed previously); a freeze on electric and natural gas distribution rates for customers until July 1, 2014 (as expected); and certain provisions protecting Central Hudson's autonomy to continue as a stand-alone utility company (as expected). The settlement agreement indicates that the acquisition is in the public interest under New York State Public Service Law, and has support from Fortis and CH Energy as well as the Staff of the New York State Department of Public Service and the Utility Intervention Unit of the New York State Department of State. Subject to Commission approval, Fortis now expects that the acquisition of CH Energy will close during Q2/13 (vs. its prior expectation that the acquisition would close by the end of Q1/13).

This report was prepared by an analyst(s) employed by BMO Nesbitt Burns Inc., and who is (are) not registered as a research analyst(s) under FINRA rules. For disclosure statements, including the Analyst's Certification, please refer to pages 2 to 5.

**Ratings and Sector Key**

We use the following ratings system definitions:

OP = Outperform - Forecast to outperform the market;

Mkt = Market Perform - Forecast to perform roughly in line with the market;

Und = Underperform - Forecast to underperform the market;

(S) = speculative investment;

NR = No rating at this time;

R = Restricted – Dissemination of research is currently restricted.

Market performance is measured by a benchmark index such as the S&P/TSX Composite Index, S&P 500, Nasdaq Composite, as appropriate for each company. BMO Capital Markets' seven Top 15 lists guide investors to our best ideas according to different objectives (CDN Large Cap, CDN Small Cap, US Large Cap, US Small cap, Income, CDN Quant, and US Quant) have replaced the Top Pick rating.

**Dissemination of Research**

Our research publications are available via our web site <http://www.bmocm.com/research/>. Institutional clients may also receive our research via FIRST CALL, FIRST CALL Research Direct, Reuters, Bloomberg, FactSet, Capital IQ, and TheMarkets.com. All of our research is made widely available at the same time to all BMO Capital Markets client groups entitled to our research. Additional dissemination may occur via email or regular mail. Please contact your investment advisor or institutional salesperson for more information.

**Conflict Statement**

A general description of how BMO Financial Group identifies and manages conflicts of interest is contained in our public facing policy for managing conflicts of interest in connection with investment research which is available at [http://researchglobal.bmocapitalmarkets.com/Public/Conflict\\_Statement\\_Public.aspx](http://researchglobal.bmocapitalmarkets.com/Public/Conflict_Statement_Public.aspx)

**General Disclaimer**

“BMO Capital Markets” is a trade name used by the BMO Investment Banking Group, which includes the wholesale arm of Bank of Montreal and its subsidiaries BMO Nesbitt Burns Inc., BMO Capital Markets Ltd. in the U.K. and BMO Capital Markets Corp. in the U.S. BMO Nesbitt Burns Inc., BMO Capital Markets Ltd. and BMO Capital Markets Corp are affiliates. Bank of Montreal or its subsidiaries (“BMO Financial Group”) has lending arrangements with, or provide other remunerated services to, many issuers covered by BMO Capital Markets. The opinions, estimates and projections contained in this report are those of BMO Capital Markets as of the date of this report and are subject to change without notice. BMO Capital Markets endeavours to ensure that the contents have been compiled or derived from sources that we believe are reliable and contain information and opinions that are

accurate and complete. However, BMO Capital Markets makes no representation or warranty, express or implied, in respect thereof, takes no responsibility for any errors and omissions contained herein and accepts no liability whatsoever for any loss arising from any use of, or reliance on, this report or its contents. Information may be available to BMO Capital Markets or its affiliates that is not reflected in this report. The information in this report is not intended to be used as the primary basis of investment decisions, and because of individual client objectives, should not be construed as advice designed to meet the particular investment needs of any investor. This material is for information purposes only and is not an offer to sell or the solicitation of an offer to buy any security. BMO Capital Markets or its affiliates will buy from or sell to customers the securities of issuers mentioned in this report on a principal basis. BMO Capital Markets or its affiliates, officers, directors or employees have a long or short position in many of the securities discussed herein, related securities or in options, futures or other derivative instruments based thereon. The reader should assume that BMO Capital Markets or its affiliates may have a conflict of interest and should not rely solely on this report in evaluating whether or not to buy or sell securities of issuers discussed herein.

**Additional Matters**

To Canadian Residents: BMO Nesbitt Burns Inc., affiliate of BMO Capital Markets Corp., furnishes this report to Canadian residents and accepts responsibility for the contents herein subject to the terms set out above. Any Canadian person wishing to effect transactions in any of the securities included in this report should do so through BMO Nesbitt Burns Inc.

The following applies if this research was prepared in whole or in part by Andrew Breichmanas, Tony Robson, or Edward Sterck: This research is not prepared subject to Canadian disclosure requirements. This research is prepared by BMO Capital Markets Limited and subject to the regulations of the Financial Services Authority (FSA) in the United Kingdom. FSA regulations require that a firm providing research disclose its ownership interest in the issuer that is the subject of the research if it and its affiliates own 5% or more of the equity of the issuer. Canadian regulations require that a firm providing research disclose its ownership interest in the issuer that is the subject of the research if it and its affiliates own 1% or more of the equity of the issuer that is the subject of the research. Therefore BMO Capital Markets Limited will only disclose its and its' affiliates ownership interest in the subject issuer if such ownership exceeds 5% of the equity of the issuer.

To U.S. Residents: BMO Capital Markets Corp. and/or BMO Nesbitt Burns Securities Ltd., affiliates of BMO NB, furnish this report to U.S. residents and accept responsibility for the contents herein, except to the extent that it refers to securities of Bank of Montreal. Any U.S. person wishing to effect transactions in any security discussed herein should do so through BMO Capital Markets Corp. and/or BMO Nesbitt Burns Securities Ltd.

To U.K. Residents: In the UK this document is published by BMO Capital Markets Limited which is authorised and regulated by the Financial Services Authority. The contents hereof are intended solely for the use of, and may only be issued or passed on to, (I) persons who have professional experience in matters relating to investments falling within Article 19(5) of the Financial Services and Markets Act 2000 (Financial Promotion) Order 2005 (the "Order") or (II) high net worth entities falling within Article 49(2)(a) to (d) of the Order (all such persons together referred to as "relevant persons"). The contents hereof are not intended for the use of and may not be issued or passed on to, retail clients.

## Q4/12 Results Slightly Lower Than Expected; Capital Program of \$1.3B in 2013

---

### Impact

Neutral

---

### Details & Analysis

Fortis reported Q4/12 EPS of \$0.46, slightly lower than our estimate of \$0.48 and consensus of \$0.49 per share. The variance vs. our estimate was largely due to lower-than-expected earnings from FortisBC Energy and lower non-regulated hydroelectric power generation, partially offset by stronger-than-expected performance from FortisAlberta. Key-takeaways: (1) FTS's capital expenditure budget is \$1.3 billion in 2013 (vs. \$1.1 billion in 2012) and \$6.0 billion during 2013-2017. Notably, its \$900 million 335 MW Waneta hydroelectric project (51% Fortis) in B.C. is still on track for an expected in-service date of spring 2015; (2) as previously disclosed, the US\$1.5 billion CH Energy Group acquisition is now expected to close during Q2/13 (vs. end of Q1/13 previously), subject to approval by the New York Public Service Commission; and (3) on the regulatory front, the BCUC has determined that a second phase will be added to the 2013 Generic Cost of Capital Hearing to determine an appropriate allowed ROE and capital structure for all other regulated utilities in B.C. once the benchmark utility has been established in the first phase. A decision on the benchmark utility (FortisBC Energy) is expected mid-2013. In Alberta, FortisAlberta has filed a 2013 Capital Tracker Application with the AUC for specific categories of capital expenditures; a decision is expected in Q3/13. We continue to review the release.

This report was prepared by an analyst(s) employed by BMO Nesbitt Burns Inc., and who is (are) not registered as a research analyst(s) under FINRA rules. For disclosure statements, including the Analyst's Certification, please refer to pages 2 to 5.

### **Ratings and Sector Key**

We use the following ratings system definitions:

OP = Outperform - Forecast to outperform the market;

Mkt = Market Perform - Forecast to perform roughly in line with the market;

Und = Underperform - Forecast to underperform the market;

(S) = speculative investment;

NR = No rating at this time;

R = Restricted – Dissemination of research is currently restricted.

Market performance is measured by a benchmark index such as the S&P/TSX Composite Index, S&P 500, Nasdaq Composite, as appropriate for each company. BMO Capital Markets' seven Top 15 lists guide investors to our best ideas according to different objectives (CDN Large Cap, CDN Small Cap, US Large Cap, US Small cap, Income, CDN Quant, and US Quant) have replaced the Top Pick rating.

## Q4 – Regaining Momentum

### Event

Fortis' fourth-quarter results were a few pennies shy of our expectations amid weaker-than-expected earnings from its B.C. regulated gas utility and lower non-regulated hydroelectric power generation, partially offset by higher-than-expected earnings contribution from its Alberta regulated utility. While growth was slow during 2012, continued rate base expansion and, to a lesser extent, the pending CH Energy acquisition should bring some earnings growth back into the company for 2013 and beyond. It is unfortunate a slowdown in other areas of the enterprise is partially offsetting the regulated utility growth, such as Fortis Generation and its real estate segment. Furthermore, potentially lower allowed returns in B.C. should further pressure earnings growth at its regulated gas utility. As a result, we continue to believe the stock will perform in line but may deliver modest total returns pending approval of CH Energy and outcome of regulatory proceedings.

### Impact

Neutral.

### Forecasts

Our 2013 EPS estimate was lowered to \$1.80 (f.d.) from \$1.83 (f.d.), while our 2014E EPS of \$1.91 (f.d.) is unchanged.

### Valuation

We are maintaining our target price of \$35.50, which represents 18.5x our 2014E EPS forecast.

### Recommendation

We continue to rate the shares of Fortis Market Perform.

**Price (7-Feb)** \$34.24 **52-Week High** \$34.98

## Q4 – Regaining Momentum

- **We are maintaining a Market Perform rating and 12-month target price of \$35.50 on Fortis shares.** Fortis' fourth-quarter results were a few pennies shy of our expectations amid weaker-than-expected earnings from its B.C regulated gas utility and lower non-regulated hydroelectric power generation, partially offset by higher-than-expected earnings contribution from its Alberta regulated utility. While growth was slow during 2012, continued rate base expansion and, to a lesser extent, the pending CH Energy acquisition should bring some earnings growth back into the company for 2013 and beyond. It is unfortunate a slowdown in other areas of the enterprise is partially offsetting the regulated utility growth, such as Fortis Generation and its real estate segment. Furthermore, potentially lower allowed returns in B.C. should further pressure earnings growth at its regulated gas utility. As a result, we continue to believe the stock will perform in line but may deliver modest total returns pending approval of CH Energy and outcome of regulatory proceedings. We are maintaining our Market Perform rating and \$35.50 target price, which reflects 18.5x our 2014E EPS forecast.
- **2013 capital spending guidance.** Our capital spending outlook of \$1.3 billion in 2013 (vs. our prior estimate of \$1.1 billion) is now consistent with Fortis' guidance, with \$1.2 billion in 2014 and 2015. Over the five years 2013–2017, the company's capital program (including Central Hudson) is expected to be ~\$6 billion, with ~59% of the total capital spending to Canadian regulated electric activities, ~11% to Central Hudson; ~19% to Canadian regulated gas utilities and the remaining ~11% to non-regulated operations. Fortis also reaffirmed its intention to pursue additional electric and natural gas utility acquisitions in the U.S. and Canada as well as grow its non-regulated businesses to support its regulated utility growth strategy.

**Exhibit 1: Actual and Forecast Capital Expenditures - 2012A and 2013E (\$mm)**

	2012A	2013E	Change (%)
<b>Regulated Gas Utilities - Canadian</b>			
Fortis BC Energy Companies	206.0	229.0	11.2%
<b>Regulated Electric Utilities - Canadian</b>			
FortisAlberta	442.0	437.0	-1.1%
FortisBC	69.0	133.0	92.8%
Newfoundland Power	86.0	86.0	0.0%
Other Canadian	48.0	54.0	12.5%
<b>Regulated Electric Utilities - Caribbean</b>	48.0	69.0	43.8%
<b>Non-Regulated - Fortis Generation</b>	196.0	229.0	16.8%
<b>Non-Regulated - Fortis Properties</b>	35.0	113.0	222.9%
<b>Total</b>	<b>1,130.0</b>	<b>1,350.0</b>	<b>19.5%</b>

Source: Company Reports

- **Waneta expansion:** Fortis remains on track for first production at its \$900 million 335 MW Waneta dam expansion (51% interest) in spring 2015. As it stands now, excavation of the intake, powerhouse and power tunnels have been completed, with construction of the intake and tailrace structures and installation of the stationary imbedded turbine and generator components under way. Overall, the project is ~50% complete at this juncture. A total of \$436 million has been spent to date since construction began in late 2010, with

\$227 million planned for 2013 (\$192 million was spent in 2012). We believe the project could add \$0.10/sh in EPS in 2015E.

- **CH Energy acquisition expected to close during Q2/13:** As previously disclosed, Fortis expects the acquisition of CH Energy to close during Q2/13 (vs. end of Q1/13 prior). A settlement agreement was filed in January 2013 with the New York State Public Service Commission, which include nearly US\$50 million in customer and community benefits, a freeze on electric and natural gas distribution rates for customers until July 1, 2014, and certain provisions protecting Central Hudson's autonomy to continue as a stand-alone utility company. While timing risk remains, we believe the New York State Public Service Commission (last remaining significant hurdle) will approve the settlement agreement. Recall that this acquisition is fully funded given the company's issuance of ~\$600 million in subscription receipts at the end of June 2012.
- **Key regulatory updates:**
  - In December 2012, the BCUC held a public oral hearing for the first phase of its 2013 Generic Cost of Capital proceeding. The first phase of the proceeding will establish an allowed ROE and capital structure for FortisBC Energy Inc. (FEI), which will serve as a benchmark utility for the allowed rates of return and capital structures of other regulated utility companies in B.C. The BCUC has decided to hold a second phase of the proceeding to determine ROEs and capital structures for the other utility companies after it reaches a decision on the first phase, which is not expected until mid-2013. In the meantime, the Commission has ordered that the current allowed ROE and capital structures are to be maintained and made interim.
  - In November 2012, FortisBC Electric filed an application with the BCUC requesting approval to acquire electrical utility assets owned by the City of Kelowna for \$55 million and to include these assets in its rate base. Regulatory approval is expected end of Q1/13.
  - A decision with respect to FortisAlberta's compliance application to the AUC with respect to its performance-based regulation (PBR) framework is expected in Q1/13. In the meantime, FortisAlberta has also filed a review and variance application as well as a 2013 capital tracker application for specific categories of capital expenses to be allowed. The company expects a decision for both the review and variance application and the capital tracker application to be made during Q3/13.
  - In November 2012, the AUC reopened the Utility Asset Disposition Proceeding, which will address the issue of the sharing of cost responsibility between utilities and customers for stranded assets. FortisAlberta is "fully participating" in the proceeding, having filed common-utility evidence and retained experts. A decision is expected by the end of Q2/13.
  - A public hearing currently being held on Newfoundland Power's 2013/2014 General Rate Application is expected to conclude in February 2013. The rate

application filed by Newfoundland Power requested an increase in customer electricity rates of 6% effective March 1, 2013.

- In November 2012, the OEB approved, as filed, a settlement agreement regarding FortisOntario's cost of service application for electricity rates effective January 1, 2013 in Fort Erie, Port Colborne and Gananoque. The agreement provides for an allowed ROE of 8.93% (vs. 9.12% initially requested). As a result of the decisions, customers in Fort Erie, Gananoque and Port Colborne will receive average rate increases of 6.8%, 5.9% and 7.4%, respectively.
- **Liquidity and capital resources:** Fortis has an A-rated balance sheet and possesses a strong liquidity position heading into 2013: As of December 31, 2012, the company had \$154 million of cash and consolidated credit facilities of roughly \$2.5 billion, of which ~\$2.1 billion was available. The company's capital structure (excluding capital lease and finance obligations) at year-end 2012 was 53.6% debt, 10.1% preferred shares and 36.3% common equity vs. 55.3% debt, 8.6% preferred shares and 36.1% common equity at year-end 2011. The improvement in the capital structure was largely due to the issuance of \$194 million of preferred shares in November 2012 that were used to repay short-term debt and the issuance of common shares under the company's dividend reinvestment program.
- **Revised estimates:** We have updated our outlook to reflect 2012 financial performance and the information contained in the quarterly release. Our 2013 EPS estimate was lowered to \$1.80 (f.d.) from \$1.83 (f.d.) largely reflecting the delay in closing of the pending CH Energy acquisition and lower revenue growth at FTS Properties, partially offset by lower corporate expenses and higher growth at FortisAlberta. Our 2014E EPS of \$1.91 (f.d.) is unchanged.
- **Valuation premium warranted:** We are maintaining a Market Perform rating and 12-month target price of \$35.50 on Fortis shares. Fortis shares currently trade at a P/E multiple of 18x our 2014 EPS estimate, which is towards the upper end of its five-year historical trading range. We reiterate our belief that this valuation premium is justified, given the company's superior earnings visibility (~90% of Fortis' earnings arise from utility operations, the highest among its peers) and the persistence of historically low 10-year government of Canada bond yields.

**IMPORTANT DISCLOSURES****Analyst's Certification**

I, Ben Pham, CFA, hereby certify that the views expressed in this report accurately reflect my personal views about the subject securities or issuers. I also certify that no part of my compensation was, is, or will be, directly or indirectly, related to the specific recommendations or views expressed in this report.

Analysts who prepared this report are compensated based upon (among other factors) the overall profitability of BMO Capital Markets and their affiliates, which includes the overall profitability of investment banking services. Compensation for research is based on effectiveness in generating new ideas and in communication of ideas to clients, performance of recommendations, accuracy of earnings estimates, and service to clients.

Analysts employed by BMO Nesbitt Burns Inc. and/or BMO Capital Markets Ltd. are not registered as research analysts with FINRA. These analysts may not be associated persons of BMO Capital Markets Corp. and therefore may not be subject to the NASD Rule 2711 and NYSE Rule 472 restrictions on communications with a subject company, public appearances and trading securities held by a research analyst account.

**Company Specific Disclosure**

Disclosure 1: BMO Capital Markets has undertaken an underwriting liability with respect to this issuer within the past 12 months.

Disclosure 2: BMO Capital Markets has provided investment banking services with respect to this issuer within the past 12 months.

Disclosure 3: BMO Capital Markets has managed or co-managed a public offering of securities with respect to this issuer within the past 12 months.

Disclosure 4: BMO Capital Markets or an affiliate has received compensation for investment banking services from this issuer within the past 12 months.

Disclosure 5: BMO Capital Markets or an affiliate received compensation for products or services other than investment banking services within the past 12 months.

Disclosure 6: This issuer is a client (or was a client) of BMO NB, BMO Capital Markets Corp., BMO CM Ltd. or an affiliate within the past 12 months: Investment Banking Services & Non-Securities Related Services.

Disclosure 8: BMO Capital Markets or an affiliate has a financial interest in 1% or more of any class of the equity securities of this issuer.

**Methodology and Risks to Price Target/Valuation**

**Methodology:** Our target price is approximately 18.5x our 2014E EPS estimate.

**Risks:** Operations are subject to complex regulation by a variety of provincial, state and federal (Canada, Cayman Islands & Belize) agencies. Changes in regulation may adversely affect performance.

**Ratings and Sector Key**

We use the following ratings system definitions:

OP = Outperform - Forecast to outperform the market;

Mkt = Market Perform - Forecast to perform roughly in line with the market;

Und = Underperform - Forecast to underperform the market;

(S) = speculative investment;

NR = No rating at this time;

R = Restricted – Dissemination of research is currently restricted.

Market performance is measured by a benchmark index such as the S&P/TSX Composite Index, S&P 500, Nasdaq Composite, as appropriate for each company. BMO Capital Markets' seven Top 15 lists guide investors to our best ideas according to different objectives (CDN Large Cap, CDN Small Cap, US Large Cap, US Small cap, Income, CDN Quant, and US Quant) have replaced the Top Pick rating.

**Conflict Statement**

A general description of how BMO Financial Group identifies and manages conflicts of interest is contained in our public facing policy for managing conflicts of interest in connection with investment research which is available at [http://researchglobal.bmocapitalmarkets.com/Public/Conflict\\_Statement\\_Public.aspx](http://researchglobal.bmocapitalmarkets.com/Public/Conflict_Statement_Public.aspx).

**General Disclaimer**

"BMO Capital Markets" is a trade name used by the BMO Investment Banking Group, which includes the wholesale arm of Bank of Montreal and its subsidiaries BMO Nesbitt Burns Inc., BMO Capital Markets Ltd. in the U.K. and BMO Capital Markets Corp. in the U.S. BMO Nesbitt Burns Inc., BMO Capital Markets Ltd. and BMO Capital Markets Corp are affiliates. Bank of Montreal or its subsidiaries ("BMO Financial Group") has lending arrangements with, or provide other remunerated services to, many issuers covered by BMO Capital Markets. The opinions, estimates and projections contained in this report are those of BMO Capital Markets as of the date of this report and are subject to change without notice. BMO Capital Markets endeavours to ensure that the contents have been compiled or derived from sources that we believe are reliable and contain information and opinions that are accurate and complete. However, BMO Capital Markets makes no representation or warranty, express or implied, in respect thereof, takes no responsibility for any errors and omissions contained herein and accepts no liability whatsoever for any loss arising from any use of, or reliance on, this report or its contents. Information may be available to BMO Capital Markets or its affiliates that is not reflected in this report. The information in this report is not intended to be used as the primary basis of investment decisions, and because of individual client objectives, should not be construed as advice designed to meet the particular investment needs of any investor. This material is for information purposes only and is not an offer to sell or the solicitation of an offer to buy any security. BMO Capital Markets or its affiliates will buy from or sell to customers the securities of issuers mentioned in this report on a principal basis. BMO Capital Markets or its affiliates, officers, directors or employees have a long or short position in many of the securities discussed herein, related securities or in options, futures or other derivative instruments based thereon. The reader should assume that BMO Capital Markets or its affiliates may have a conflict of interest and should not rely solely on this report in evaluating whether or not to buy or sell securities of issuers discussed herein.

**Additional Matters**

To Canadian Residents: BMO Nesbitt Burns Inc., affiliate of BMO Capital Markets Corp., furnishes this report to Canadian residents and accepts responsibility for the contents herein subject to the terms set out above. Any Canadian person wishing to effect transactions in any of the securities included in this report should do so through BMO Nesbitt Burns Inc.

The following applies if this research was prepared in whole or in part by Andrew Breichmanas, Tony Robson, or Edward Sterck: This research is not prepared subject to Canadian disclosure requirements. This research is prepared by BMO Capital Markets Limited and subject to the regulations of the Financial Services Authority (FSA) in the United Kingdom. FSA regulations require that a firm providing research disclose its ownership interest in the issuer that is the subject of the research if it and its affiliates own 5% or more of the equity of the issuer. Canadian regulations require that a firm providing research disclose its ownership interest in the issuer that is the subject of the research if it and its affiliates own 1% or more of the equity of the issuer that is the subject of the research. Therefore BMO Capital Markets Limited will only disclose its and its' affiliates ownership interest in the subject issuer if such ownership exceeds 5% of the equity of the issuer.

To U.S. Residents: BMO Capital Markets Corp. and/or BMO Nesbitt Burns Securities Ltd., affiliates of BMO NB, furnish this report to U.S. residents and accept responsibility for the contents herein, except to the extent that it refers to securities of Bank of Montreal. Any U.S. person wishing to effect transactions in any security discussed herein should do so through BMO Capital Markets Corp. and/or BMO Nesbitt Burns Securities Ltd.

To U.K. Residents: In the UK this document is published by BMO Capital Markets Limited which is authorised and regulated by the Financial Services Authority. The contents hereof are intended solely for the use of, and may only be issued or passed on to, (I) persons who have professional experience in matters relating to investments falling within Article 19(5) of the Financial Services and Markets Act 2000 (Financial Promotion) Order 2005 (the "Order") or (II) high net worth entities falling within Article 49(2)(a) to (d) of the Order (all such persons together referred to as "relevant persons"). The contents hereof are not intended for the use of and may not be issued or passed on to, retail clients.

**Company Description** – Fortis Inc. (Fortis) is a publicly listed holding company with four key businesses: electric utility operations, regulated natural gas distribution, non-regulated electric power generation and non-utility property activities. Gas and electric utility operations include Newfoundland Power (100%), Maritime Electric (100%), FortisOntario (100%), Caribbean Utilities (59.5%), Turks

and Caicos (100%), FortisAlberta (100%), FortisBC (100%) and the FortisBC Energy Companies (100%). *Website:* fortisinc.com

**Recent Results** – Fortis reported Q4/12 earnings that were a few pennies shy of our expectations (\$0.46 vs. \$0.48) amid weaker-than-expected earnings from its B.C. regulated gas utility and lower non-regulated hydroelectric power

This report was prepared by an analyst(s) employed by BMO Nesbitt Burns Inc., and who is (are) not registered as a research analyst(s) under FINRA rules. For disclosure statements, including the Analyst's Certification, please refer to the back pages.

generation, partially offset by higher-than-expected earnings from its Alberta regulated utility.

**Corporate Developments** – On January 28, 2013, Fortis filed a settlement agreement with the New York State Public Service Commission regarding its previously announced acquisition of CH Energy. Subject to the proposed settlement agreement receiving approval from the Commission, Fortis now expects that this transaction will close in Q2/13 (vs. end of Q1/13 previously).

In December 2012, the BC Utilities Commission held a public oral hearing for the first phase of its Generic Cost of Capital Proceeding, the outcome of which is not expected until at least mid-2013. The BCUC has ordered that the current allowed ROE and capital structures are to be maintained in the interim.

On November 13, 2012, Fortis closed an offering of \$200 million in Series J preferred shares at 4.75%. The funds will be used to repay borrowings under the company's credit facility as well as for the construction of the Waneta dam expansion project, which has a target in-service date of 2015.

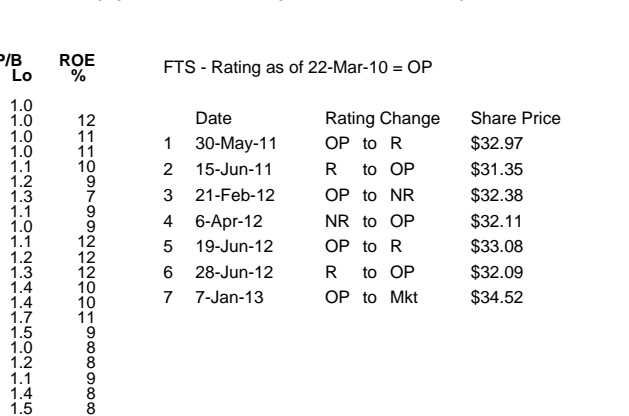

In September 2012, the Alberta Utilities Commission issued a generic decision outlining a new Performance-Based Regulation (PBR) framework, which will be applicable to all distribution utilities (gas and electric) in Alberta over a five-year period commencing January 1, 2013. As required, FortisAlberta has filed a compliance application, for which a decision is expected in Q1/13. A review and variance application and capital tracker application (for specific categories of capex) have also been filed, with a decision expected to be made during Q3/13.

**Forecasts** – We are forecasting EPS (f.d.) of \$1.80 and \$1.91 for 2013 and 2014, respectively.

**Valuation** – Our target price of \$35.50 is based on 18.5x 2014E EPS.

**Recommendation** – At current levels, we believe the shares of Fortis are reasonably valued. Our rating is Market Perform.

## Administrative Law Judges Recommend Against Fortis-CH Energy Transaction; Commission Decision Expected June 2013

---

### Impact

Potentially Negative

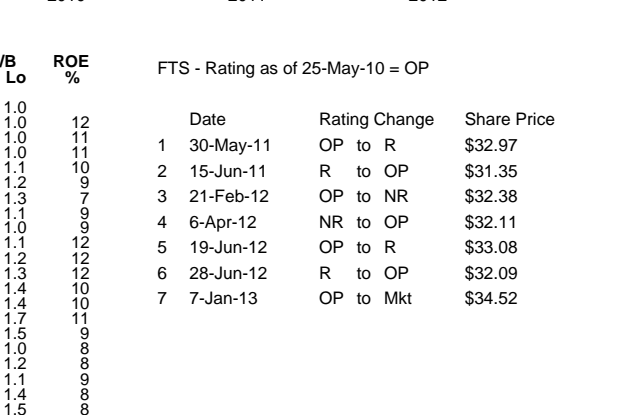

---

### Details & Analysis

On May 3, two administrative law judges (ALJ) wrote in a [recommended decision](#) to the New York State Public Service Commission that the benefits of Fortis' proposed takeover of CH Energy Group "are outweighed by the detriments". The judges noted "an extraordinarily intense degree of public opposition to change in Central Hudson's ownership among customers, their elected officials, and labor representatives and other public organizations in the service territory". While the judges held open an option that the Commission may want to approve the deal with modifications that would improve the balance of risks and benefits, they suggested that requiring more economic benefits still might not make the deal palatable to the public. Keep in mind that the recommended decision is an advisory opinion only and it will be up to the Commission to determine whether to approve or deny the transaction. Next steps: submissions responding to the recommended decision are due by May 17, 2013 with responses to submissions due by May 24, 2013. Fortis expects the Commission to issue its decision in June 2013. We still assume transaction approval will not be unreasonably withheld and that it will be received in such time for a mid-year transaction close, but the risk of delay/cancellation is no doubt escalating.

This report was prepared by an analyst(s) employed by BMO Nesbitt Burns Inc., and who is (are) not registered as a research analyst(s) under FINRA rules. For disclosure statements, including the Analyst's Certification, please refer to pages 2 to 5.

**General Disclaimer**

“BMO Capital Markets” is a trade name used by the BMO Investment Banking Group, which includes the wholesale arm of Bank of Montreal and its subsidiaries BMO Nesbitt Burns Inc., BMO Capital Markets Ltd. in the U.K. and BMO Capital Markets Corp. in the U.S. BMO Nesbitt Burns Inc., BMO Capital Markets Ltd. and BMO Capital Markets Corp are affiliates. Bank of Montreal or its subsidiaries (“BMO Financial Group”) has lending arrangements with, or provide other remunerated services to, many issuers covered by BMO Capital Markets. The opinions, estimates and projections contained in this report are those of BMO Capital Markets as of the date of this report and are subject to change without notice. BMO Capital Markets endeavours to ensure that the contents have been compiled or derived from sources that we believe are reliable and contain information and opinions that are

accurate and complete. However, BMO Capital Markets makes no representation or warranty, express or implied, in respect thereof, takes no responsibility for any errors and omissions contained herein and accepts no liability whatsoever for any loss arising from any use of, or reliance on, this report or its contents. Information may be available to BMO Capital Markets or its affiliates that is not reflected in this report. The information in this report is not intended to be used as the primary basis of investment decisions, and because of individual client objectives, should not be construed as advice designed to meet the particular investment needs of any investor. This material is for information purposes only and is not an offer to sell or the solicitation of an offer to buy any security. BMO Capital Markets or its affiliates will buy from or sell to customers the securities of issuers mentioned in this report on a principal basis. BMO Capital Markets or its affiliates, officers, directors or employees have a long or short position in many of the securities discussed herein, related securities or in options, futures or other derivative instruments based thereon. The reader should assume that BMO Capital Markets or its affiliates may have a conflict of interest and should not rely solely on this report in evaluating whether or not to buy or sell securities of issuers discussed herein.

**Additional Matters**

To Canadian Residents: BMO Nesbitt Burns Inc., affiliate of BMO Capital Markets Corp., furnishes this report to Canadian residents and accepts responsibility for the contents herein subject to the terms set out above. Any Canadian person wishing to effect transactions in any of the securities included in this report should do so through BMO Nesbitt Burns Inc.

The following applies if this research was prepared in whole or in part by Andrew Breichmanas, Tony Robson, or Edward Sterck: This research is not prepared subject to Canadian disclosure requirements. This research is prepared by BMO Capital Markets Limited and subject to the regulations of the Financial Conduct Authority (FCA) in the United Kingdom. FCA regulations require that a firm providing research disclose its ownership interest in the issuer that is the subject of the research if it and its affiliates own 5% or more of the equity of the issuer. Canadian regulations require that a firm providing research disclose its ownership interest in the issuer that is the subject of the research if it and its affiliates own 1% or more of the equity of the issuer that is the subject of the research. Therefore BMO Capital Markets Limited will only disclose its and its' affiliates ownership interest in the subject issuer if such ownership exceeds 5% of the equity of the issuer.

To U.S. Residents: BMO Capital Markets Corp. and/or BMO Nesbitt Burns Securities Ltd., affiliates of BMO NB, furnish this report to U.S. residents and accept responsibility for the contents herein, except to the extent that it refers to securities of Bank of Montreal. Any U.S. person wishing to effect transactions in any security discussed herein should do so through BMO Capital Markets Corp. and/or BMO Nesbitt Burns Securities Ltd.

To U.K. Residents: In the UK this document is published by BMO Capital Markets Limited which is authorised and regulated by the Financial Conduct Authority. The contents hereof are intended solely for the use of, and may only be issued or passed on to, (I) persons who have professional experience in matters relating to investments falling within Article 19(5) of the Financial Services and Markets Act 2000 (Financial Promotion) Order 2005 (the "Order") or (II) high net worth entities falling within Article 49(2)(a) to (d) of the Order (all such persons together referred to as "relevant persons"). The contents hereof are not intended for the use of and may not be issued or passed on to, retail clients.

## Q1/13 Results in Line

---

### Impact

Neutral

---

### Details & Analysis

Fortis reported in-line Q1/13 results. After normalizing for a \$0.12 after-tax gain relating to the settlement of a 2008 expropriation of hydro assets in Newfoundland, EPS were \$0.67 vs. our estimate of \$0.68 and spot on with Street consensus of \$0.67. Key highlights: (1) Fortis maintains its expectation to close the acquisition of CH Energy in June 2013. Approval authority ultimately rests with the New York State Public Service Commission; while an unfavourable recommended decision was issued by administrative law judges on May 3 based on the current terms of the transaction, this represents an “advisory decision” only and is among several factors the Commission will consider in its final decision. (2) Fortis Alberta received a decision from the AUC in March 2013 permitting an interim rate increase on distribution rates, which includes approval of 60% of the revenue requirement of certain capex in 2013 not otherwise recovered under performance-based rates (PBR). A final PBR decision is expected in H2/13. (3) FortisBC Electric completed its acquisition of the City of Kelowna’s electrical utility assets during Q1/13, for \$55 million, as planned. (4) The company’s outlook for \$1.3 billion in capital spending for 2013 and \$6 billion over the five years 2013–2017 is unchanged. Construction of the \$900 million, 335-MW Waneta hydro expansion project remains on track for on-time and on-budget commissioning during spring 2015. We continue to review the release.

This report was prepared by an analyst(s) employed by BMO Nesbitt Burns Inc., and who is (are) not registered as a research analyst(s) under FINRA rules. For disclosure statements, including the Analyst's Certification, please refer to pages 2 to 5.

### Rating and Sector Key (as of April 5, 2013):

We use the following ratings system definitions:

OP = Outperform - Forecast to outperform the analyst's coverage universe on a total return basis

Mkt = Market Perform - Forecast to perform roughly in line with the analyst's coverage universe on a total return basis

Und = Underperform - Forecast to underperform the analyst's coverage universe on a total return basis on a total return basis

(S) = speculative investment;

NR = No rating at this time;

R = Restricted – Dissemination of research is currently restricted.

BMO Capital Markets' seven Top 15 lists guide investors to our best ideas according to different objectives (CDN Large Cap, CDN Small Cap, US Large Cap, US Small cap, Income, CDN Quant, and US Quant have replaced the Top Pick rating).

### General Disclaimer

“BMO Capital Markets” is a trade name used by the BMO Investment Banking Group, which includes the wholesale arm of Bank of Montreal and its subsidiaries BMO Nesbitt Burns Inc., BMO Capital Markets Ltd. in the U.K. and BMO Capital Markets Corp. in the U.S. BMO Nesbitt Burns Inc., BMO Capital Markets Ltd. and BMO Capital Markets Corp are affiliates. Bank of Montreal or its subsidiaries (“BMO Financial Group”) has lending arrangements with, or provide other remunerated services to, many issuers covered by BMO Capital Markets. The opinions, estimates and projections contained in this report are those of BMO Capital Markets as of the date of this report and are subject to change without notice. BMO Capital Markets endeavours to ensure that the contents have been compiled or derived from sources that we believe are reliable and contain information and opinions that are

accurate and complete. However, BMO Capital Markets makes no representation or warranty, express or implied, in respect thereof, takes no responsibility for any errors and omissions contained herein and accepts no liability whatsoever for any loss arising from any use of, or reliance on, this report or its contents. Information may be available to BMO Capital Markets or its affiliates that is not reflected in this report. The information in this report is not intended to be used as the primary basis of investment decisions, and because of individual client objectives, should not be construed as advice designed to meet the particular investment needs of any investor. This material is for information purposes only and is not an offer to sell or the solicitation of an offer to buy any security. BMO Capital Markets or its affiliates will buy from or sell to customers the securities of issuers mentioned in this report on a principal basis. BMO Capital Markets or its affiliates, officers, directors or employees have a long or short position in many of the securities discussed herein, related securities or in options, futures or other derivative instruments based thereon. The reader should assume that BMO Capital Markets or its affiliates may have a conflict of interest and should not rely solely on this report in evaluating whether or not to buy or sell securities of issuers discussed herein.

#### **Additional Matters**

To Canadian Residents: BMO Nesbitt Burns Inc., affiliate of BMO Capital Markets Corp., furnishes this report to Canadian residents and accepts responsibility for the contents herein subject to the terms set out above. Any Canadian person wishing to effect transactions in any of the securities included in this report should do so through BMO Nesbitt Burns Inc.

The following applies if this research was prepared in whole or in part by Andrew Breichmanas, Tony Robson, or Edward Sterck: This research is not prepared subject to Canadian disclosure requirements. This research is prepared by BMO Capital Markets Limited and subject to the regulations of the Financial Conduct Authority (FCA) in the United Kingdom. FCA regulations require that a firm providing research disclose its ownership interest in the issuer that is the subject of the research if it and its affiliates own 5% or more of the equity of the issuer. Canadian regulations require that a firm providing research disclose its ownership interest in the issuer that is the subject of the research if it and its affiliates own 1% or more of the equity of the issuer that is the subject of the research. Therefore BMO Capital Markets Limited will only disclose its and its' affiliates ownership interest in the subject issuer if such ownership exceeds 5% of the equity of the issuer.

To U.S. Residents: BMO Capital Markets Corp. and/or BMO Nesbitt Burns Securities Ltd., affiliates of BMO NB, furnish this report to U.S. residents and accept responsibility for the contents herein, except to the extent that it refers to securities of Bank of Montreal. Any U.S. person wishing to effect transactions in any security discussed herein should do so through BMO Capital Markets Corp. and/or BMO Nesbitt Burns Securities Ltd.

To U.K. Residents: In the UK this document is published by BMO Capital Markets Limited which is authorised and regulated by the Financial Conduct Authority. The contents hereof are intended solely for the use of, and may only be issued or passed on to, (I) persons who have professional experience in matters relating to investments falling within Article 19(5) of the Financial Services and Markets Act 2000 (Financial Promotion) Order 2005 (the "Order") or (II) high net worth entities falling within Article 49(2)(a) to (d) of the Order (all such persons together referred to as "relevant persons"). The contents hereof are not intended for the use of and may not be issued or passed on to, retail clients.

## Q1 – Smooth Sailing

### Event

Fortis reported Q1/13 adjusted EPS of \$0.67 vs. our estimate of \$0.68 and consensus of \$0.67. Capital spending guidance was reaffirmed.

### Impact

Neutral. With its 2013 capital spending outlook generally intact, FTS's major catalysts revolve around: (1) regulatory approval of its CH Energy acquisition; (2) the outcomes of regulatory proceedings (i.e., B.C. ROE, Alberta PBR); and (3) a potential dividend increase in Q4/13. Despite more challenged growth prospects in its real estate and non-regulated power generation segments, FTS's outlook for its regulated utilities businesses remains in great shape (especially Alberta).

### Forecasts

We have updated our outlook to reflect Q1/13 financial performance and the information contained in the quarterly release. Our 2013 EPS estimate was lowered to \$1.78 (f.d.) from \$1.80 (f.d.), while our 2014E EPS of \$1.91 (f.d.) is unchanged.

### Valuation

We are maintaining our target price of \$35.50, which represents 18.5x our 2014E EPS forecast.

### Recommendation

We continue to rate the shares of Fortis Market Perform.

**Price (7-May)** \$34.97 **52-Week High** \$35.14  
**Target Price** \$35.50 **52-Week Low** \$32.03

### Quarterly EPS

Q2/13E \$0.36 to \$0.35  
 Q3/13E \$0.27 to \$0.25  
 Q4/13E \$0.56 to \$0.54

## Q1 – Smooth Sailing

- **We are maintaining a Market Perform rating and 12-month target price of \$35.50 on Fortis shares.** Fortis' first quarter results were largely in line with our expectations (adjusted EPS of \$0.67 vs. our estimate of \$0.68 and consensus of \$0.67). With its 2013 capital spending outlook generally intact, FTS's major catalysts revolve around: (1) regulatory approval of its CH Energy acquisition; (2) the outcomes of regulatory proceedings (i.e., B.C. ROE, Alberta PBR); and (3) a potential dividend increase in Q4/13. Despite more challenged growth prospects in its real estate and non-regulated power generation segments, FTS's outlook for its regulated utilities businesses remains in great shape (especially Alberta). We are maintaining our Market Perform rating and \$35.50 target price, which reflects 18.5x our 2014E EPS forecast.
- **2013 capital spending guidance remains unchanged at \$1.3 billion.** Over the five years 2013–2017, the company's capital program is expected to be \$6 billion, with ~54% of the total capital spending to Canadian regulated electric activities, ~11% to Central Hudson; ~20% to Canadian regulated gas utilities; 4% to Caribbean regulated electric utilities; and the remaining ~11% to non-regulated operations.
- **Management still targeting a June 2013 close for the CH Energy acquisition:** the pending US\$1.5 billion acquisition of CH Energy, an electric utility in the Hudson Valley region in central New York, continues to await final approval from the New York State Public Service Commission (PSC) before it can be completed. A settlement agreement was filed in January 2013, which was signed by Fortis and CH Energy, and was supported by PSC Staff and the Utility Intervention Unit of the New York State Department of State. However, there has been an intense degree of opposition to the deal from ratepayers, elected officials, labour representatives and other public organizations. Moreover, on May 3, two administrative law judges issued a recommended decision opposing the current terms of the transaction. It is important to note that this recommended decision is non-binding and serves as an advisory decision only, and will be one of several factors that the PSC considers in its final decision. Comments responding to this recommended decision are due by May 17, with responses to such submissions due by May 24. Fortis has indicated that it "intends to engage in further discussions to obtain PSC approval of the transaction" and still expects to close the transaction in June.
- **Waneta expansion:** Fortis remains on track for first production at its \$900-million 335 MW Waneta dam expansion (51% interest) in spring 2015. Construction activities during Q1/13 included ongoing placement of concrete in the powerhouse and intake, ongoing installation of the powerhouse roof and turbine components, and intake-channel excavation work. A total of \$483 million has been spent to date since construction began in late 2010. We believe the project could add \$0.10 in EPS in 2015E.
- **Key regulatory updates:**
  - A decision on the first phase of the BCUC's Generic Cost of Capital (GCOC) proceeding is still expected to occur in mid-2013; this phase will establish an allowed ROE and capital structure for FortisBC Energy Inc. (FEI), which will serve as a benchmark utility for determining the allowed rates of return and capital

structures of other regulated utility companies in B.C. (which will take place under the second phase of the proceeding that commenced in April 2013).

- In March 2013, the BCUC approved FortisBC Electric's acquisition of \$55 million of electrical utility assets from the City of Kelowna. However, only \$38 million was approved for inclusion in the company's rate base.
  - In March 2013, the AUC issued an interim decision on the first compliance applications filed by Fortis' distribution utility in Alberta. The decision approved, among other items, a combined inflation and productivity factor of 1.71% and 60% of the revenue requirement associated with the utilities' 2013 capital tracker application (which allows recovery of capex not otherwise included in performance-based rates). A hearing for the capital tracker application will be held in June 2013; Fortis expects the AUC to rule on this matter in the second half of 2013. Meanwhile, a final decision on the compliance application is expected in Q3/13.
  - In April 2013, the AUC recommenced its 2013 GCOC proceeding, the purpose of which will be to establish allowed ROE and capital structures for Alberta utilities for 2013–2014 (and 2015, on an interim basis). The AUC has indicated that it does not, at this point in time, intend to re-establish a formulaic automatic adjustment mechanism to determine allowed ROE. The 2013 GCOC proceeding is set to commence in Q2/13 with a hearing in early 2014.
  - FortisAlberta will file reply arguments in the Utility Asset Distribution ("stranded cost") proceeding in June 2013. A decision from the AUC is expected during Q3/13.
  - The Board of Commissioners of Public Utilities of Newfoundland and Labrador (PUB) issued a decision on Newfoundland Power's 2013/2014 General Rate Application in April 2013. The decision sets Newfoundland Power's allowed ROE and deemed common equity component at 8.8% and 45%, respectively, for 2013–2015.
- **Revised estimates:** We have updated our outlook to reflect Q1/13 financial performance and the information contained in the quarterly release. Our 2013 EPS estimate was lowered to \$1.78 (f.d.) from \$1.80 (f.d.), while our 2014E EPS of \$1.91 (f.d.) is unchanged.
  - **Valuation premium warranted:** We are maintaining a Market Perform rating and 12-month target price of \$35.50 on Fortis shares. Fortis shares currently trade at a P/E multiple of 18.3x our 2014 EPS estimate, which is towards the upper end of its five-year historical trading range. We reiterate our belief that this valuation premium is justified, given the company's superior earnings visibility (~90% of Fortis' earnings arise from utility operations, the highest among its peers) and the persistence of historically low 10-year government of Canada bond yields.

**Exhibit 2: Upcoming Events/Catalysts**

Jul-13	Q2/13 results
June 2013	Expected closing of CH Energy transaction
Mid-2013	Expected decision on first phase of BCUC 2013 GCOC
Q3/13	Expected decision on Alberta PBR compliance filing
Q3/13	Expected decision on Utility Asset Disposition (UAD) proceeding
2H/13	Expected decision on Alberta PBR review and variance application/capital tracker application
Early 2014	Planned hearing for AUC 2013 GCOC (2013, 2014 and 2015 interim)
Spring 2015	Expected commissioning of Waneta hydro facility

Source: BMO Capital Markets, Company Reports

- First quarter results:** Fortis reported in-line Q1/13 results. After normalizing for a \$0.12 after-tax gain relating to the settlement of a 2008 expropriation of hydro assets in Newfoundland, EPS were \$0.67 vs. our estimate of \$0.68 and spot on with Street consensus of \$0.67. Please see Exhibit 3 for a further run down of Fortis' first quarter results. Our quarterly and annual estimates are set out in Exhibit 4 and 5.

## Exhibit 3: Earnings by Business Segment – Q1/13

	Q1/13 (\$mm)	Q1/13E (\$mm)	Q1/12 (\$mm)
<b>Regulated Gas Utilities - Canadian</b>			
Fortis BC Energy Companies	85.0	81.4	82.0
<b>Regulated Electric Utilities - Canadian</b>			
FortisAlberta	26.0	25.9	21.0

**General Disclaimer**

“BMO Capital Markets” is a trade name used by the BMO Investment Banking Group, which includes the wholesale arm of Bank of Montreal and its subsidiaries BMO Nesbitt Burns Inc., BMO Capital Markets Ltd. in the U.K. and BMO Capital Markets Corp. in the U.S. BMO Nesbitt Burns Inc., BMO Capital Markets Ltd. and BMO Capital Markets Corp are affiliates. Bank of Montreal or its subsidiaries (“BMO Financial Group”) has lending arrangements with, or provide other remunerated services to, many issuers covered by BMO Capital Markets. The opinions, estimates and projections contained in this report are those of BMO Capital Markets as of the date of this report and are subject to change without notice. BMO Capital Markets endeavours to ensure that the contents have been compiled or derived from sources that we believe are reliable and contain information and opinions that are accurate and complete. However, BMO Capital Markets makes no representation or warranty, express or implied, in respect thereof, takes no responsibility for any errors and omissions contained herein and accepts no liability whatsoever for any loss arising from any use of, or reliance on, this report or its contents. Information may be available to BMO Capital Markets or its affiliates that is not reflected in this report. The information in this report is not intended to be used as the primary basis of investment decisions, and because of individual client objectives, should not be construed as advice designed to meet the particular investment needs of any investor. This material is for information purposes only and is not an offer to sell or the solicitation of an offer to buy any security. BMO Capital Markets or its affiliates will buy from or sell to customers the securities of issuers mentioned in this report on a principal basis. BMO Capital Markets or its affiliates, officers, directors or employees have a long or short position in many of the securities discussed herein, related securities or in options, futures or other derivative instruments based thereon. The reader should assume that BMO Capital Markets or its affiliates may have a conflict of interest and should not rely solely on this report in evaluating whether or not to buy or sell securities of issuers discussed herein.

**Additional Matters**

To Canadian Residents: BMO Nesbitt Burns Inc., affiliate of BMO Capital Markets Corp., furnishes this report to Canadian residents and accepts responsibility for the contents herein subject to the terms set out above. Any Canadian person wishing to effect transactions in any of the securities included in this report should do so through BMO Nesbitt Burns Inc.

The following applies if this research was prepared in whole or in part by Andrew Breichmanas, Tony Robson, or Edward Sterck: This research is not prepared subject to Canadian disclosure requirements. This research is prepared by BMO Capital Markets Limited and subject to the regulations of the Financial Conduct Authority (FCA) in the United Kingdom. FCA regulations require that a firm providing research disclose its ownership interest in the issuer that is the subject of the research if it and its affiliates own 5% or more of the equity of the issuer. Canadian regulations require that a firm providing research disclose its ownership interest in the issuer that is the subject of the research if it and its affiliates own 1% or more of the equity of the issuer that is the subject of the research. Therefore BMO Capital Markets Limited will only disclose its and its’ affiliates ownership interest in the subject issuer if such ownership exceeds 5% of the equity of the issuer.

To U.S. Residents: BMO Capital Markets Corp. and/or BMO Nesbitt Burns Securities Ltd., affiliates of BMO NB, furnish this report to U.S. residents and accept responsibility for the contents herein, except to the extent that it refers to securities of Bank of Montreal. Any U.S. person wishing to effect transactions in any security discussed herein should do so through BMO Capital Markets Corp. and/or BMO Nesbitt Burns Securities Ltd.

To U.K. Residents: In the UK this document is published by BMO Capital Markets Limited which is authorised and regulated by the Financial Services Authority. The contents hereof are intended solely for the use of, and may only be issued or passed on to, (I) persons who have professional experience in matters relating to investments falling within Article 19(5) of the Financial Services and Markets Act 2000 (Financial Promotion) Order 2005 (the “Order”) or (II) high net worth entities falling within Article 49(2)(a) to (d) of the Order (all such persons together referred to as “relevant persons”). The contents hereof are not intended for the use of and may not be issued or passed on to, retail clients.

## BCUC Issues Stage 1 Decision in Generic Cost of Capital Proceeding

---

### Impact

Slightly Negative

---

### Details & Analysis

The British Columbia Utilities Commission (BCUC) issued a decision on the first phase of its Generic Cost of Capital (GCOC) proceeding. The decision set out the allowed ROE and deemed equity component of total capital structure for FortisBC Energy Inc. at 8.75% and 38.5%, effective from January 1, 2013, to December 31, 2015, which are down from 9.5% and 40.0% in 2012. The allowed ROE of 8.75% was slightly below our expectation of 9%, but is comparable to current allowed returns in other provinces within Canada, such as Alberta. As well, the BCUC's decision also includes the reintroduction of an automatic adjustment mechanism (AAM) that takes effect on January 1, 2014, which enables the resetting of the ROE on an annual basis when the actual long-term Government of Canada bond yield exceeds 3.8%; accordingly, this mechanism provides for incremental upside in allowed returns in the event of rising interest rates. A second phase of the GCOC proceeding is now under way which will determine an appropriate risk premium and deemed capital structure for other regulated utility companies in B.C. (i.e., FortisBC), using the decision from Phase 1 as a benchmark. We estimate a \$0.02–0.03 EPS drag relative to our current 2013/2014 EPS estimates as a result of the Stage 1 decision.

This report was prepared by an analyst(s) employed by BMO Nesbitt Burns Inc., and who is (are) not registered as a research analyst(s) under FINRA rules. For disclosure statements, including the Analyst's Certification, please refer to pages 2 to 5.

## BCUC Decreases Benchmark ROE

### Event

The British Columbia Utilities Commission (BCUC) issued a [decision](#) on the first phase of its Generic Cost of Capital (GCOC) proceeding.

### Impact

Slightly Negative. The decision set out the allowed ROE and deemed equity component of total capital structure for FortisBC Energy at 8.75% and 38.5%, effective from January 1, 2013, to December 31, 2015, which are down from 9.5% and 40.0% in 2012. The allowed ROE of 8.75% was slightly below our expectation of 9%, but is comparable to current allowed returns in other provinces within Canada. As well, the BCUC's decision also includes the reintroduction of an automatic adjustment mechanism that takes effect on January 1, 2014, which enables the resetting of the ROE on an annual basis but only when the actual long-term GoC bond yield exceeds 3.8%. A second phase of the GCOC proceeding is now under way which will determine an appropriate risk premium and deemed equity for other regulated utility companies in B.C. (i.e., FortisBC), using the decision from Phase 1 as a benchmark.

### Forecasts

We have updated our model to reflect the change in B.C. ROE and deemed equity. Our diluted 2013 and 2014 EPS estimates decrease to \$1.75 and \$1.89, respectively, from \$1.78 and \$1.91 previously.

### Valuation

We have reduced our target price to \$35 from \$35.50/sh in connection with our revised estimates. Our target price is still based on 18.5x 2014E EPS.

### Recommendation

We continue to rate the Fortis shares Market Perform.

**Price (10-May)** \$34.48  
**Target Price** \$35.00↓  
**52-Week High** \$35.14  
**52-Week Low** \$32.03

 Q3/13E \$0.25 to \$0.24  
 Q4/13E \$0.54 to \$0.53

#### Target

\$35.50 to \$35.00

## BCUC Decreases Benchmark ROE

- We are maintaining our Market Perform rating on Fortis shares and decreasing our target price by \$0.50 to \$35 in connection with our revised estimates as a result of the lower ROE and deemed equity ratio in B.C.
- Key highlights from the decision:
  - The decision set out the allowed ROE and deemed equity component of total capital structure for FortisBC Energy Inc. (benchmark utility) at 8.75% and 38.5%, effective from January 1, 2013, to December 31, 2015, which are down from 9.5% and 40.0% in 2012. The allowed ROE of 8.75% was slightly below our expectation of 9%, but is comparable to current allowed returns in other provinces within Canada, such as Alberta (Exhibit 1). The Commission noted that a lower common equity ratio was warranted as it believes there has been some reduction in the company's level of business risk due to the improved competitive position of natural gas relative to electricity and that the revised ratio falls within the upper end of the range of 36–39% for comparable gas utilities in our Canadian jurisdictions (i.e., Enbridge Gas, Union Gas, Gaz Metro).

### Exhibit 1: 2010-2013E ROE and Deemed Equity Across Canada

Company	Regulator	Return on Equity				Deemed Equity

Source: BMO Capital Markets, Regulatory Documents

- The BCUC's decision also includes the reintroduction of an automatic adjustment mechanism (AAM) that takes effect on January 1, 2014, which enables the resetting of the ROE on an annual basis but only when the actual long-term Government of Canada bond yield exceeds 3.8%. Following in the foot steps of Ontario and Quebec, the Commission has decided to adopt a two variable AAM (vs. the previous one-factor model) that will link the ROE to changes in utility bond spreads and the "risk-free" long-term Canada bond yield. Accordingly, this mechanism provides for incremental upside in allowed returns in the event of rising interest rates and/or utility credit spreads, although we note that current bond yields are at ~2.5% (below the 3.8% threshold). The formula as set out in the BCUC stage 1 decision is set out below:

$$ROE_t = \text{Base ROE (8.75\%)} + 0.50 \times (LCBF_t - \text{BaseLCBF}) + 0.50 \times (\text{UtilBondSpread}_t - \text{BaseUtilBondSpread})$$

Where:

$LCBF_t$  is the Long Canada Bond Forecast for the test year, with a floor of 3.8 percent. The Base LCBF is 3.8%.

$UtilBondSpread_t$  is the average spread of 30 year A-rated Canadian Utility bond yields over 30 year Government of Canada bond yields and BaseUtilBondSpread will be determined.

- A second phase of the GCOC proceeding is now under way which will determine an appropriate risk premium and deemed capital structure for all other regulated utility companies in B.C. (i.e., FortisBC), using the decision from Phase 1 as a benchmark. The BCUC held a procedural conference for the second phase on April 25; we expect a decision in early 2014. In connection with the Commission's reaffirmation of the stand-alone principle, we believe a 40 bps premium for FortisBC (9.15%) and 50 bps for FortisBC (Vancouver Island) (9.25%) relative to the benchmark utility is still warranted but have lowered our deemed equity assumption to 38.5% vs. 40% previously to be consistent with FortisBC Energy.
- The Commission asserted "that there is sufficient evidence to conclude that the maintenance of an "A" category credit rating is desirable, but not at all costs." This is a negative development, in our view - if we are interpreting it right, while the Commission believes that continued access to debt capital at an attractive price is an important element which benefits shareholders and ratepayers, it appears to be placing less importance on credit ratings in its determination of allowed ROE and deemed equity. We would not be surprised to see marginally negative commentary about this decision from the credit rating agencies in the near term: FortisBC Energy is rated "A" by DBRS and A3 by Moody's.

**General Disclaimer**

"BMO Capital Markets" is a trade name used by the BMO Investment Banking Group, which includes the wholesale arm of Bank of Montreal and its subsidiaries BMO Nesbitt Burns Inc., BMO Capital Markets Ltd. in the U.K. and BMO Capital Markets Corp. in the U.S. BMO Nesbitt Burns Inc., BMO Capital Markets Ltd. and BMO Capital Markets Corp are affiliates. Bank of Montreal or its subsidiaries ("BMO Financial Group") has lending arrangements with, or provide other remunerated services to, many issuers covered by BMO Capital Markets. The opinions, estimates and projections contained in this report are those of BMO Capital Markets as of the date of this report and are subject to change without notice. BMO Capital Markets endeavours to ensure that the contents have been compiled or derived from sources that we believe are reliable and contain information and opinions that are accurate and complete. However, BMO Capital Markets makes no representation or warranty, express or implied, in respect thereof, takes no responsibility for any errors and omissions contained herein and accepts no liability whatsoever for any loss arising from any use of, or reliance on, this report or its contents. Information may be available to BMO Capital Markets or its affiliates that is not reflected in this report. The information in this report is not intended to be used as the primary basis of investment decisions, and because of individual client objectives, should not be construed as advice designed to meet the particular investment needs of any investor. This material is for information purposes only and is not an offer to sell or the solicitation of an offer to buy any security. BMO Capital Markets or its affiliates will buy from or sell to customers the securities of issuers mentioned in this report on a principal basis. BMO Capital Markets or its affiliates, officers, directors or employees have a long or short position in many of the securities discussed herein, related securities or in options, futures or other derivative instruments based thereon. The reader should assume that BMO Capital Markets or its affiliates may have a conflict of interest and should not rely solely on this report in evaluating whether or not to buy or sell securities of issuers discussed herein.

**Additional Matters**

To Canadian Residents: BMO Nesbitt Burns Inc., affiliate of BMO Capital Markets Corp., furnishes this report to Canadian residents and accepts responsibility for the contents herein subject to the terms set out above. Any Canadian person wishing to effect transactions in any of the securities included in this report should do so through BMO Nesbitt Burns Inc.

The following applies if this research was prepared in whole or in part by Andrew Breichmanas, Tony Robson, or Edward Sterck: This research is not prepared subject to Canadian disclosure requirements. This research is prepared by BMO Capital Markets Limited and subject to the regulations of the Financial Conduct Authority (FCA) in the United Kingdom. FCA regulations require that a firm providing research disclose its ownership interest in the issuer that is the subject of the research if it and its affiliates own 5% or more of the equity of the issuer. Canadian regulations require that a firm providing research disclose its ownership interest in the issuer that is the subject of the research if it and its affiliates own 1% or more of the equity of the issuer that is the subject of the research. Therefore BMO Capital Markets Limited will only disclose its and its' affiliates ownership interest in the subject issuer if such ownership exceeds 5% of the equity of the issuer.

To U.S. Residents: BMO Capital Markets Corp. and/or BMO Nesbitt Burns Securities Ltd., affiliates of BMO NB, furnish this report to U.S. residents and accept responsibility for the contents herein, except to the extent that it refers to securities of Bank of Montreal. Any U.S. person wishing to effect transactions in any security discussed herein should do so through BMO Capital Markets Corp. and/or BMO Nesbitt Burns Securities Ltd.

To U.K. Residents: In the UK this document is published by BMO Capital Markets Limited which is authorised and regulated by the Financial Conduct Authority. The contents hereof are intended solely for the use of, and may only be issued or passed on to, (I) persons who have professional experience in matters relating to investments falling within Article 19(5) of the Financial Services and Markets Act 2000 (Financial Promotion) Order 2005 (the "Order") or (II) high net worth entities falling within Article 49(2)(a) to (d) of the Order (all such persons together referred to as "relevant persons"). The contents hereof are not intended for the use of and may not be issued or passed on to, retail clients.

## Additional Enhancements Improve the Odds of CH Energy Commission Approval

---

### Impact

Slightly Positive

---

### Details & Analysis

In response to public input and the Judges Recommended Decision (May 3), Fortis today filed a [letter](#) with the Commission offering additional enhancements to its proposed acquisition of CH Energy. In addition to ~\$50mm of “hard-dollar” benefits that were already on the table, FTS is also offering: (1) an additional one-year rate freeze, implying that rates will not change for a 3-year period from July 1, 2012 through July 1, 2015; (2) a 1-year labour agreement extension to April 1, 2017 that provides four years of job security and creation of additional 35 jobs. The 4-year “no layoff” commitment has also been offered to non-unionized employees. IBEW Local 320 membership has recently ratified the contract extension and now supports the transaction; (3) to maintain strong community relations support for a minimum of 10 years vs. 5 years previously; and (4) to increase the minimum number of independent directors who reside or do business in the service territory from one to two members. The letter requests the Commission to approve the transaction at its next scheduled meeting on June 13, 2013. Bottom line, nothing is certain in a regulatory approval process, but we remain convinced of transaction approval especially following these additional enhancements and continue to expect full value recognition for CH Energy -- eventually - even if the exact timing remains in flux.

This report was prepared by an analyst(s) employed by BMO Nesbitt Burns Inc., and who is (are) not registered as a research analyst(s) under FINRA rules. For disclosure statements, including the Analyst's Certification, please refer to pages 2 to 5.

**IMPORTANT DISCLOSURES****Analyst's Certification**

I, Ben Pham, CFA, hereby certify that the views expressed in this report accurately reflect my personal views about the subject securities or issuers. I also certify that no part of my compensation was, is, or will be, directly or indirectly, related to the specific recommendations or views expressed in this report.

Analysts who prepared this report are compensated based upon (among other factors) the overall profitability of BMO Capital Markets and their affiliates, which includes the overall profitability of investment banking services. Compensation for research is based on effectiveness in generating new ideas and in communication of ideas to clients, performance of recommendations, accuracy of earnings estimates, and service to clients.

Analysts employed by BMO Nesbitt Burns Inc. and/or BMO Capital Markets Ltd. are not registered as research analysts with FINRA. These analysts may not be associated persons of BMO Capital Markets Corp. and therefore may not be subject to the NASD Rule 2711 and NYSE Rule 472 restrictions on communications with a subject company, public appearances and trading securities held by a research analyst account.

**Company Specific Disclosure**

Disclosure 1: BMO Capital Markets has undertaken an underwriting liability with respect to this issuer within the past 12 months.

Disclosure 2: BMO Capital Markets has provided investment banking services with respect to this issuer within the past 12 months.

Disclosure 3: BMO Capital Markets has managed or co-managed a public offering of securities with respect to this issuer within the past 12 months.

Disclosure 4: BMO Capital Markets or an affiliate has received compensation for investment banking services from this issuer within the past 12 months.

Disclosure 5: BMO Capital Markets or an affiliate received compensation for products or services other than investment banking services within the past 12 months.

Disclosure 6: This issuer is a client (or was a client) of BMO NB, BMO Capital Markets Corp., BMO CM Ltd. or an affiliate within the past 12 months: Investment Banking Services & Non-Securities Related Services.

Disclosure 8: BMO Capital Markets or an affiliate has a financial interest in 1% or more of any class of the equity securities of this issuer.

**Methodology and Risks to Price Target/Valuation**

**Methodology:** Our target price is approximately 18.5x our 2014E EPS estimate.

**Risks:** Operations are subject to complex regulation by a variety of provincial, state and federal (Canada, Cayman Islands & Belize) agencies. Changes in regulation may adversely affect performance.

**Conflict Statement**

A general description of how BMO Financial Group identifies and manages conflicts of interest is contained in our public facing policy for managing conflicts of interest in connection with investment research which is available at [http://researchglobal.bmocapitalmarkets.com/Public/Conflict\\_Statement\\_Public.aspx](http://researchglobal.bmocapitalmarkets.com/Public/Conflict_Statement_Public.aspx)

**General Disclaimer**

“BMO Capital Markets” is a trade name used by the BMO Investment Banking Group, which includes the wholesale arm of Bank of Montreal and its subsidiaries BMO Nesbitt Burns Inc., BMO Capital Markets Ltd. in the U.K. and BMO Capital Markets Corp. in the U.S. BMO Nesbitt Burns Inc., BMO Capital Markets Ltd. and BMO Capital Markets Corp are affiliates. Bank of Montreal or its subsidiaries (“BMO Financial Group”) has lending arrangements with, or provide other remunerated services to, many issuers covered by BMO Capital Markets. The opinions, estimates and projections contained in this report are those of BMO Capital Markets as of the date of this report and are subject to change without notice. BMO Capital Markets endeavours to ensure that the contents have been compiled or derived from sources that we believe are reliable and contain information and opinions that are

accurate and complete. However, BMO Capital Markets makes no representation or warranty, express or implied, in respect thereof, takes no responsibility for any errors and omissions contained herein and accepts no liability whatsoever for any loss arising from any use of, or reliance on, this report or its contents. Information may be available to BMO Capital Markets or its affiliates that is not reflected in this report. The information in this report is not intended to be used as the primary basis of investment decisions, and because of individual client objectives, should not be construed as advice designed to meet the particular investment needs of any investor. This material is for information purposes only and is not an offer to sell or the solicitation of an offer to buy any security. BMO Capital Markets or its affiliates will buy from or sell to customers the securities of issuers mentioned in this report on a principal basis. BMO Capital Markets or its affiliates, officers, directors or employees have a long or short position in many of the securities discussed herein, related securities or in options, futures or other derivative instruments based thereon. The reader should assume that BMO Capital Markets or its affiliates may have a conflict of interest and should not rely solely on this report in evaluating whether or not to buy or sell securities of issuers discussed herein.

**Additional Matters**

To Canadian Residents: BMO Nesbitt Burns Inc., affiliate of BMO Capital Markets Corp., furnishes this report to Canadian residents and accepts responsibility for the contents herein subject to the terms set out above. Any Canadian person wishing to effect transactions in any of the securities included in this report should do so through BMO Nesbitt Burns Inc.

The following applies if this research was prepared in whole or in part by Andrew Breichmanas, Tony Robson, or Edward Sterck: This research is not prepared subject to Canadian disclosure requirements. This research is prepared by BMO Capital Markets Limited and subject to the regulations of the Financial Conduct Authority (FCA) in the United Kingdom. FCA regulations require that a firm providing research disclose its ownership interest in the issuer that is the subject of the research if it and its affiliates own 5% or more of the equity of the issuer. Canadian regulations require that a firm providing research disclose its ownership interest in the issuer that is the subject of the research if it and its affiliates own 1% or more of the equity of the issuer that is the subject of the research. Therefore BMO Capital Markets Limited will only disclose its and its' affiliates ownership interest in the subject issuer if such ownership exceeds 5% of the equity of the issuer.

To U.S. Residents: BMO Capital Markets Corp. and/or BMO Nesbitt Burns Securities Ltd., affiliates of BMO NB, furnish this report to U.S. residents and accept responsibility for the contents herein, except to the extent that it refers to securities of Bank of Montreal. Any U.S. person wishing to effect transactions in any security discussed herein should do so through BMO Capital Markets Corp. and/or BMO Nesbitt Burns Securities Ltd.

To U.K. Residents: In the UK this document is published by BMO Capital Markets Limited which is authorised and regulated by the Financial Conduct Authority. The contents hereof are intended solely for the use of, and may only be issued or passed on to, (I) persons who have professional experience in matters relating to investments falling within Article 19(5) of the Financial Services and Markets Act 2000 (Financial Promotion) Order 2005 (the "Order") or (II) high net worth entities falling within Article 49(2)(a) to (d) of the Order (all such persons together referred to as "relevant persons"). The contents hereof are not intended for the use of and may not be issued or passed on to, retail clients.

## Acquisition of CH Energy Approved by New York State Public Service Commission

---

### Impact

Positive

---

### Details & Analysis

The New York State Public Service Commission (NYSPSC) has unanimously approved Fortis' proposed acquisition of CH Energy Group, Inc., the parent company of Central Hudson Gas & Electric Corporation, after concluding that the net public benefits of the acquisition outweighed the risks to ratepayers. Fortis will pay US\$65.00/sh for CH Energy, representing an aggregate purchase price of US\$1.5 billion, including the assumption of US\$500 million of debt at closing. This transaction was previously announced on February 21, 2012; NYSPSC approval is the last significant regulatory hurdle needed to complete the deal. Fortis now expects that the acquisition will close shortly after the receipt, review and acceptance of the official written order of the NYSPSC. Our current financial estimates assume that the transaction will be completed by the end of June.

This report was prepared by an analyst(s) employed by BMO Nesbitt Burns Inc., and who is (are) not registered as a research analyst(s) under FINRA rules. For disclosure statements, including the Analyst's Certification, please refer to pages 2 to 5.

This material is for information purposes only and is not an offer to sell or the solicitation of an offer to buy any security. BMO Capital Markets or its affiliates will buy from or sell to customers the securities of issuers mentioned in this report on a principal basis. BMO Capital Markets or its affiliates, officers, directors or employees have a long or short position in many of the securities discussed herein, related securities or in options, futures or other derivative instruments based thereon. The reader should assume that BMO Capital Markets or its affiliates may have a conflict of interest and should not rely solely on this report in evaluating whether or not to buy or sell securities of issuers discussed herein.

**Additional Matters**

To Canadian Residents: BMO Nesbitt Burns Inc., affiliate of BMO Capital Markets Corp., furnishes this report to Canadian residents and accepts responsibility for the contents herein subject to the terms set out above. Any Canadian person wishing to effect transactions in any of the securities included in this report should do so through BMO Nesbitt Burns Inc.

The following applies if this research was prepared in whole or in part by Andrew Breichmanas, Tony Robson, or Edward Sterck: This research is not prepared subject to Canadian disclosure requirements. This research is prepared by BMO Capital Markets Limited and subject to the regulations of the Financial Conduct Authority (FCA) in the United Kingdom. FCA regulations require that a firm providing research disclose its ownership interest in the issuer that is the subject of the research if it and its affiliates own 5% or more of the equity of the issuer. Canadian regulations require that a firm providing research disclose its ownership interest in the issuer that is the subject of the research if it and its affiliates own 1% or more of the equity of the issuer that is the subject of the research. Therefore BMO Capital Markets Limited will only disclose its and its' affiliates ownership interest in the subject issuer if such ownership exceeds 5% of the equity of the issuer.

To U.S. Residents: BMO Capital Markets Corp. and/or BMO Nesbitt Burns Securities Ltd., affiliates of BMO NB, furnish this report to U.S. residents and accept responsibility for the contents herein, except to the extent that it refers to securities of Bank of Montreal. Any U.S. person wishing to effect transactions in any security discussed herein should do so through BMO Capital Markets Corp. and/or BMO Nesbitt Burns Securities Ltd.

To U.K. Residents: In the UK this document is published by BMO Capital Markets Limited which is authorised and regulated by the Financial Conduct Authority. The contents hereof are intended solely for the use of, and may only be issued or passed on to, (I) persons who have professional experience in matters relating to investments falling within Article 19(5) of the Financial Services and Markets Act 2000 (Financial Promotion) Order 2005 (the "Order") or (II) high net worth entities falling within Article 49(2)(a) to (d) of the Order (all such persons together referred to as "relevant persons"). The contents hereof are not intended for the use of and may not be issued or passed on to, retail clients.

## Q2/13 Results in Line; Busy Regulatory Calendar Ahead

---

### Impact

Neutral

---

### Details & Analysis

Fortis reported adjusted EPS of \$0.32, largely in line with our estimate of \$0.33 and consensus of \$0.32. Reported EPS of \$0.28 included a \$25 million income tax recovery (\$0.13/share) along with \$32 million (\$0.17/share) of acquisition-related expenses and customer and community benefits offered to close the acquisition of CH Energy. Overall, results from Canadian Regulated Utilities were slightly below expectations, mostly driven by FortisBC Energy and FortisAlberta, and partially offset by lower-than-expected corporate costs. Key takeaways: (1) FTS' capital expenditure budget remains at \$1.3 billion in 2013 (\$548 million spent in H1/13) and \$6 billion during 2013-2017. Notably, its \$900 million Waneta hydroelectric project (51% FTS) in B.C. is still on track for an expected in-service date of spring 2015; (2) on June 27, FTS closed the acquisition of CH Energy for ~US\$1.5 billion, including the assumption of US\$518 million of debt. The company signalled that the acquisition is expected to be accretive to EPS beginning in 2015; (3) on the regulatory front, the second phase of the BCUC's Generic Cost of Capital Hearing is under way, with a decision expected in H1/14. Also, FortisBC Energy and FortisBC Electric recently filed applications for multi-year performance-based ratemaking plans for 2014-2018. In Alberta, a decision on FortisAlberta's capital tracker application is expected in H2/13, while a hearing for the AUC's cost of capital proceeding is scheduled for early 2014.

This report was prepared by an analyst(s) employed by BMO Nesbitt Burns Inc., and who is (are) not registered as a research analyst(s) under FINRA rules. For disclosure statements, including the Analyst's Certification, please refer to pages 2 to 5.

## Q2 – Life After CH

### Event

Fortis reported an in-line second quarter (adjusted EPS of \$0.32 compared to our estimate of \$0.33 and consensus of \$0.32/sh). \$1.3 billion capital budget for 2013 was reaffirmed.

### Impact

Neutral. With the CH Energy acquisition now in the rear-view mirror, Fortis' \$6 billion in growth initiatives (including Waneta) through 2017 should move into sharper focus. To be sure, integration costs (related to CH Energy) and lower allowed returns at its B.C.-based utilities should weigh on earnings in the near term; however, earnings growth should accelerate in 2014 and beyond with rate base growth at its core utility franchises, a return to normal hydrology levels in Belize, and the commissioning of the Waneta expansion in early 2015.

### Forecasts

We have updated our outlook to reflect Q2/13 financial performance, higher corporate/integration costs, and lower realized returns at its B.C. utilities (both natural gas and electric). Our EPS estimates (f.d.) are now \$1.71 (vs. \$1.75) in 2013 and \$1.82 (vs. \$1.89) in 2014. We are introducing 2015 EPS (f.d.) of \$1.93/sh.

### Valuation

Our unchanged target price of \$35 is based on 18.5x our blended two-year forward EPS estimates.

### Recommendation

We continue to rate the shares of Fortis Market Perform.

## Q2 – Life After CH

- **We maintain a Market Perform rating and \$35 target price on Fortis shares.** Fortis' second quarter results were generally in line with expectations (adjusted EPS of \$0.32 vs. our estimate of \$0.33 and consensus of \$0.32), reflective of softer results at FortisBC Energy and FortisAlberta, and partially offset by lower-than-expected corporate costs. With the CH Energy acquisition now in the rear-view mirror, Fortis' \$6 billion in growth initiatives (including Waneta) through 2017 should move into sharper focus. To be sure, integration costs (related to CH Energy) and lower allowed returns at its B.C.-based utilities should weigh on earnings in the near term; however, earnings growth should accelerate in 2014 and beyond with rate base growth at its core utility franchises, a return to normal hydrology levels in Belize, and the commissioning of the Waneta expansion in early 2015. We maintain our Market Perform rating and \$35 target price, which reflects 18.5x our blended two-year forward EPS estimates.
- **Growth plans unchanged.** With gross capital expenditures of \$548 million spent in the first six months of the year, Fortis continues to expect \$1.3 billion of capex in 2013. The company also expects a five-year capex program of \$6 billion through to the end of 2017, of which ~55% relates Canadian regulated electric activities, ~11% to Central Hudson; ~20% to Canadian regulated gas utilities; 4% to Caribbean regulated electric utilities; and the remaining ~10% to non-regulated operations.
- **CH Energy acquisition not expected to be accretive until 2015:** On June 27, 2013, FTS closed the acquisition of CH Energy for ~US\$1.5 billion, including the assumption of US\$518 million of debt. The net purchase price was financed through net proceeds of \$567 million of common shares (subscription receipts), with the balance funded through its credit facility. To permanently finance the remaining net purchase price, FTS plans to issue US\$325 million of private unsecured notes on October 1, 2013 to pay off a portion of the credit facility. The company does not expect the transaction to be accretive to EPS until 2015 (likely neutral in 2014), largely due to higher integration costs and the extended rate freeze through June 30, 2015.
- **Waneta expansion on track:** Fortis remains on track for first production at its \$900 million 335 MW Waneta dam expansion (51% interest) in spring 2015. Construction activities during 2013 included ongoing civil construction of the powerhouse and intake, ongoing installation of the powerhouse roof and turbine components, and substantial completion of the intake-channel excavation work. A total of \$513 million has been spent to date since construction began in late 2010.
- **Key regulatory updates:**
  - In May 2013, the BCUC issued its decision on the first phase of the Generic Cost of Capital (GCOC) proceeding, which set out an allowed ROE and capital structure for FortisBC Energy Inc. (designated as the benchmark utility for ratemaking purposes). Effective January 1, 2013, the BCUC's decision set out an ROE for the benchmark utility at 8.75% (vs. 9.50% for 2012) and a deemed equity component of 38.5% (vs. 40% in 2012). The BCUC is introducing an automatic adjustment mechanism, effective January 1, 2014, which will reset the allowed ROE when the long-term Government of

Canada bond yield exceeds 3.8%. Both the automatic adjustment mechanism and the allowed capital structure will remain in effect until the end of 2015.

- Following the first phase of the BCUC GCOC proceeding, the allowed ROE for each of FortisBC Energy (Vancouver Island) Inc., FortisBC Energy (Whistler) Inc., and FortisBC Electric Inc. decreased by 75 bps effective January 1, 2013, to 9.25%, 9.25%, and 9.15%, respectively, while the allowed capital structures remained unchanged. The allowed ROE or capital structure could change for any of these companies under the second phase of the GCOC proceeding, which is now under way, and for which a decision is expected in H1/14.
- In June, FortisBC Energy Inc. filed a multi-year Performance-Based Ratemaking (PBR) Plan for 2014 through 2018. The application requests a delivery rate increase of ~1% for 2014, with rate increases for subsequent years determined under a formulaic rate-setting methodology for the remaining years. In July, FortisBC Electric filed its own multi-year PBR application for 2014-2018, which includes a request to increase rates by ~3.3% for 2014. Both applications remain under review by the BCUC throughout 2013.
- The AUC's hearing on FortisAlberta's Capital Tracker Application commenced in June 2013, with a decision expected in H2/13. A decision from the AUC regarding the Utility Asset Disposition ("stranded cost") proceeding is now expected in Q4/13 (vs. Q3/13 previously).
- In June, Newfoundland Power filed an application regarding its 2014 capital expenditure plan, requesting total expenditures of ~\$85 million. Similarly, in July, Maritime Electric filed its 2014 capital budget application for ~\$28 million in expenditures.
- Caribbean Utilities (~60% interest) received approval in June from the Electricity Regulatory Authority for its 2013-2017 capital investment plan, totalling US\$123 million, related to non-generation installation capital expenditures.
- **Reduced estimates:** We have updated our outlook to reflect Q2/13 financial performance, higher corporate/integration costs, and lower realized returns at its B.C. utilities (both natural gas and electric). Our EPS estimates (f.d.) are now \$1.71 (vs. \$1.75) in 2013 and \$1.82 (vs. \$1.89) in 2014. We are introducing 2015 EPS (f.d.) of \$1.93/sh.
- **Valuation:** We maintain a Market Perform rating and \$35 target price on Fortis shares. Our target price is based on a forward P/E multiple of 18.5x (unchanged) our blended two-year forward EPS estimates (vs. 2014E EPS previously). The roll-forward of our valuation largely offsets the reduction in our forward estimates. We believe our target multiple is consistent with the company's superior earnings visibility (~90% of Fortis' earnings arise from utility operations, the highest among its peers) and the persistence of historically low 10-year government of Canada bond yields.

**Exhibit 2: Upcoming Events**

Nov-13	Q3/13 Results
Q4/13	Expected decision on Utility Asset Disposition (UAD) proceeding
2H/13	Expected decision on Alberta PBR capital tracker application
Early 2014	Planned hearing for AUC 2013 GCOC (2013, 2014 and 2015 interim)
1H/14	Expected decision on second phase of BCUC 2013 GCOC
Spring 2015	Expected commissioning of Waneta hydro facility
During 2015	Expected filing of Newfoundland Power's 2016 GRA

Source: BMO Capital Markets, Company Reports

- Second quarter results:** Fortis reported adjusted EPS of \$0.32, largely in line with our estimate of \$0.33 and consensus of \$0.32. Reported EPS of \$0.28 included a \$25 million income tax recovery (\$0.13/share) along with \$32 million (\$0.17/share) of acquisition-related expenses and customer and community benefits offered to close the acquisition of CH Energy. Overall, results from Canadian Regulated Utilities were slightly below expectations, mostly driven by FortisBC Energy and FortisAlberta, and partially offset by lower-than-expected corporate costs. Please see Exhibit 3 for a further run-down of Fortis' second-quarter results. Our quarterly and annual estimates are set out in Exhibits 4 and 5.

## Exhibit 3: Q2/13 Results vs. BMOCM Expectations

Please contact your investment advisor or institutional salesperson for more information.

**Conflict Statement**

A general description of how BMO Financial Group identifies and manages conflicts of interest is contained in our public facing policy for managing conflicts of interest in connection with investment research which is available at [http://researchglobal.bmocapitalmarkets.com/Public/Conflict\\_Statement\\_Public.aspx](http://researchglobal.bmocapitalmarkets.com/Public/Conflict_Statement_Public.aspx).

**General Disclaimer**

“BMO Capital Markets” is a trade name used by the BMO Investment Banking Group, which includes the wholesale arm of Bank of Montreal and its subsidiaries BMO Nesbitt Burns Inc., BMO Capital Markets Ltd. in the U.K. and BMO Capital Markets Corp. in the U.S. BMO Nesbitt Burns Inc., BMO Capital Markets Ltd. and BMO Capital Markets Corp are affiliates. Bank of Montreal or its subsidiaries (“BMO Financial Group”) has lending arrangements with, or provide other remunerated services to, many issuers covered by BMO Capital Markets. The opinions, estimates and projections contained in this report are those of BMO Capital Markets as of the date of this report and are subject to change without notice. BMO Capital Markets endeavours to ensure that the contents have been compiled or derived from sources that we believe are reliable and contain information and opinions that are accurate and complete. However, BMO Capital Markets makes no representation or warranty, express or implied, in respect thereof, takes no responsibility for any errors and omissions contained herein and accepts no liability whatsoever for any loss arising from any use of, or reliance on, this report or its contents. Information may be available to BMO Capital Markets or its affiliates that is not reflected in this report. The information in this report is not intended to be used as the primary basis of investment decisions, and because of individual client objectives, should not be construed as advice designed to meet the particular investment needs of any investor. This material is for information purposes only and is not an offer to sell or the solicitation of an offer to buy any security. BMO Capital Markets or its affiliates will buy from or sell to customers the securities of issuers mentioned in this report on a principal basis. BMO Capital Markets or its affiliates, officers, directors or employees have a long or short position in many of the securities discussed herein, related securities or in options, futures or other derivative instruments based thereon. The reader should assume that BMO Capital Markets or its affiliates may have a conflict of interest and should not rely solely on this report in evaluating whether or not to buy or sell securities of issuers discussed herein.

**Additional Matters**

To Canadian Residents: BMO Nesbitt Burns Inc., affiliate of BMO Capital Markets Corp., furnishes this report to Canadian residents and accepts responsibility for the contents herein subject to the terms set out above. Any Canadian person wishing to effect transactions in any of the securities included in this report should do so through BMO Nesbitt Burns Inc.

The following applies if this research was prepared in whole or in part by Andrew Breichmanas, Tony Robson, or Edward Sterck: This research is not prepared subject to Canadian disclosure requirements. This research is prepared by BMO Capital Markets Limited and subject to the regulations of the Financial Conduct Authority (FCA) in the United Kingdom. FCA regulations require that a firm providing research disclose its ownership interest in the issuer that is the subject of the research if it and its affiliates own 5% or more of the equity of the issuer. Canadian regulations require that a firm providing research disclose its ownership interest in the issuer that is the subject of the research if it and its affiliates own 1% or more of the equity of the issuer that is the subject of the research. Therefore BMO Capital Markets Limited will only disclose its and its' affiliates ownership interest in the subject issuer if such ownership exceeds 5% of the equity of the issuer.

To U.S. Residents: BMO Capital Markets Corp. and/or BMO Nesbitt Burns Securities Ltd., affiliates of BMO NB, furnish this report to U.S. residents and accept responsibility for the contents herein, except to the extent that it refers to securities of Bank of Montreal. Any U.S. person wishing to effect transactions in any security discussed herein should do so through BMO Capital Markets Corp. and/or BMO Nesbitt Burns Securities Ltd.

To U.K. Residents: In the UK this document is published by BMO Capital Markets Limited which is authorised and regulated by the Financial Conduct Authority. The contents hereof are intended solely for the use of, and may only be issued or passed on to, (I) persons who have professional experience in matters relating to investments falling within Article 19(5) of the Financial Services and Markets Act 2000 (Financial Promotion) Order 2005 (the “Order”) or (II) high net worth entities falling within Article 49(2)(a) to (d) of the Order (all such persons together referred to as “relevant persons”). The contents hereof are not intended for the use of and may not be issued or passed on to, retail clients.

**Company Description** – Fortis Inc. (Fortis) is a publicly listed holding company with four key businesses: electric utility operations, regulated natural gas distribution, non-regulated electric power generation and non-utility property activities. Gas and electric utility operations include Newfoundland Power (100%), Maritime Electric (100%), FortisOntario (100%), Caribbean Utilities (59.5%), Turks

and Caicos (100%), FortisAlberta (100%), FortisBC (100%), the FortisBC Energy Companies (100%), and CH Energy Group (100%). Its regulated utilities account for 90% of the company's total assets and serve ~2.4 million customers. Website: [fortisinc.com](http://fortisinc.com)

This report was prepared by an analyst(s) employed by BMO Nesbitt Burns Inc., and who is (are) not registered as a research analyst(s) under FINRA rules. For disclosure statements, including the Analyst's Certification, please refer to the back pages.

**Recent Results** – Fortis reported Q2/13 results that were in line with expectations (adjusted EPS of \$0.32 vs. our estimate of \$0.33 and Street consensus of \$0.32).

**Corporate Developments** – On June 27, 2013, FTS closed the acquisition of CH Energy Group, Inc. for ~US\$1.5 billion, including the assumption of US\$518 million in debt. The net purchase price was financed through net proceeds of \$567 million of common shares (from subscription receipts issued in June 2012), with the balance funded through the company's credit facility. Fortis plans to issue US\$325 million of private unsecured notes on October 1, 2013, to pay off a portion of the credit facility. Approximately 93% of the assets acquired from CH Energy are rate-regulated, serving ~300,000 electric and ~77,000 natural gas customers. The company does not expect the transaction to be accretive to EPS until 2015 due to higher integration costs and an extended rate freeze through June 30, 2015.

In May 2013, the B.C. Utilities Commission (BCUC) issued its decision on the first phase of the Generic Cost of Capital (GCOC) proceeding. The decision set out an allowed ROE (8.75%) and capital structure (38.5% equity component) effective January 1, 2013, for FortisBC Energy Inc.

(designated as the benchmark utility for ratemaking purposes). The second phase of the GCOC is now under way for the remaining utilities, with a decision expected in H1/14.

In June 2013 and July 2013, respectively, FortisBC Energy Inc. and FortisBC Electric filed their multi-year performance-based ratemaking (PBR) applications for 2014. Both applications remain under review by the BCUC throughout 2013.

**Forecasts** – We are forecasting EPS (fully diluted) of \$1.71, \$1.82 and \$1.93 for 2013, 2014 and 2015, respectively.

**Valuation** – Our target price of \$33.00 is based on 17.5x our blended two-year forward EPS estimates.

**Recommendation** – At current levels, we believe the shares of Fortis are reasonably valued. Our rating is Market Perform.

**IMPORTANT DISCLOSURES****Analyst's Certification**

I, Ben Pham, CFA, hereby certify that the views expressed in this report accurately reflect my personal views about the subject securities or issuers. I also certify that no part of my compensation was, is, or will be, directly or indirectly, related to the specific recommendations or views expressed in this report.

Analysts who prepared this report are compensated based upon (among other factors) the overall profitability of BMO Capital Markets and their affiliates, which includes the overall profitability of investment banking services. Compensation for research is based on effectiveness in generating new ideas and in communication of ideas to clients, performance of recommendations, accuracy of earnings estimates, and service to clients.

Analysts employed by BMO Nesbitt Burns Inc. and/or BMO Capital Markets Ltd. are not registered as research analysts with FINRA. These analysts may not be associated persons of BMO Capital Markets Corp. and therefore may not be subject to the NASD Rule 2711 and NYSE Rule 472 restrictions on communications with a subject company, public appearances and trading securities held by a research analyst account.

**Methodology and Risks to Price Target/Valuation**

**Methodology:** Our target price is approximately 17.5x our blended two-year forward adjusted EPS estimates.

**Risks:** Operations are subject to complex regulation by a variety of provincial, state and federal (Canada, Cayman Islands & Belize) agencies. Changes in regulation may adversely affect performance.

**Company Specific Disclosure**

Disclosure 1: BMO Capital Markets has undertaken an underwriting liability with respect to this issuer within the past 12 months.

Disclosure 2: BMO Capital Markets has provided investment banking services with respect to this issuer within the past 12 months.

Disclosure 3: BMO Capital Markets has managed or co-managed a public offering of securities with respect to this issuer within the past 12 months.

Disclosure 4: BMO Capital Markets or an affiliate has received compensation for investment banking services from this issuer within the past 12 months.

Disclosure 5: BMO Capital Markets or an affiliate received compensation for products or services other than investment banking services within the past 12 months.

Disclosure 6: This issuer is a client (or was a client) of BMO NB, BMO Capital Markets Corp., BMO CM Ltd. or an affiliate within the past 12 months: Investment Banking Services & Non-Securities Related Services.

Disclosure 8: BMO Capital Markets or an affiliate has a financial interest in 1% or more of any class of the equity securities of this issuer.

## Q3/13 Results Below Expectations

Fortis reported EPS of \$0.23, below our estimate of \$0.28 and Thomson One consensus of \$0.27. The variance versus our estimate was driven primarily by weaker-than-expected results from the FortisBC Energy Companies (largely due to a decrease in the allowed ROE for these companies). Corporate costs were also slightly higher than we expected, at \$21 million (vs. \$19 million) and include \$2 million in costs related to the redemption of preference shares.

### Our View:

- We view this as slightly negative.
- FTS expects total capex of \$1.2 billion for 2013 (down slightly from previous guidance of \$1.3 billion, largely due to changes in expected timing of payments); ~\$809 million has been spent YTD. However, the company has maintained its outlook for \$6 billion in total capital spending from 2013 to 2017. Notably, its \$900 million Waneta hydroelectric project (51% FTS) in B.C. is still on track for an expected in-service date of spring 2015. This provides us with confidence in our expectation of a ~4.8% dividend increase to be announced in late 2013.
- Results for the first full quarter from CH Energy were largely in line with our expectations (\$12 million vs. our ~\$11 million estimate). FTS continues to expect to achieve earnings accretion from the acquisition (which closed on June 27) in 2015.
- On the regulatory front, FortisAlberta filed its 2014 Annual Rates Filing (under PBR) in September 2013, for which a decision is expected in Q4/13. Decisions are also expected on the 2014-2018 Multi-Year PBR plans for FortisBC Electric and the FortisBC Energy Companies in mid-2014.
- At current levels, FTS is trading at 17.8x our 2014E EPS (vs. peer range of 16.4-16.6x) and 16.8x our 2015E EPS (vs. peer range of 15.5-16.1x). We believe a premium valuation is warranted given high regulated exposure, low-risk growth and strong management.

This report was prepared by an analyst(s) employed by BMO Nesbitt Burns Inc., and who is (are) not registered as a research analyst(s) under FINRA rules. For disclosure statements, including the Analyst's Certification, please refer to pages 2 to 5.

## Q3 – Brighter Days Ahead

### Event

Fortis' third-quarter bottom-line results fell below expectations (reported EPS of \$0.23 vs. our estimate of \$0.28 and Thomson One consensus of \$0.27) amid weaker-than-expected results from the B.C. gas utility (largely due to seasonality) combined with higher-than-expected corporate costs.

### Impact & Analysis

Key implications: (1) Fortis revised downward its 2013 capex guidance to ~\$1.2 billion from ~\$1.3 billion, primarily due to timing. As a result, the company maintained its capital spending outlook for \$6 billion from 2013–2017. (2) Results for Central Hudson came in roughly in line with our expectations (\$12 million vs. our ~\$11 million estimate). Management reaffirmed achieving accretion from the recent NY acquisition beginning in 2015. (3) We have reduced our 2013E EPS estimate (f.d.) for FTS to \$1.69 from \$1.71 previously to reflect weaker-than-expected Q3 results, partially offset by an increase in our Q4/13E EPS estimate to \$0.50 from \$0.46 owing to lower corporate costs and higher estimated contribution from the B.C. gas utilities and Griffith Energy Services due to seasonality. Our EPS estimates for 2014E and 2015E are unchanged.

### Valuation & Recommendation

At current levels, FTS is trading at 17.9x our 2014E EPS (vs. peer range of 16.4–16.6x) and 16.8x our 2015E EPS (vs. peer range of 15.5–16.0x). Our target price of \$33 is based on 17.5x our blended 2014E/15E EPS estimates. This multiple is above the peer average, reflecting FTS's high regulated exposure, low-risk growth and strong management. Based on FTS's relative return to our price target compared to the other companies in our coverage space, we continue to rate FTS shares Market Perform.

**Price (1-Nov)** \$32.47 **52-Week High** \$35.14

### Changes

**Annual EPS**  
 2013E \$1.71 to \$1.69

**Quarterly EPS**  
 Q4/13E \$0.46 to \$0.50

## Q3 – Brighter Days Ahead

- **Maintaining Market Perform rating and \$33 target price.** Fortis' third-quarter bottom-line results fell below expectations (reported EPS of \$0.23 vs. our estimate of \$0.28 and Thomson One consensus of \$0.27) amid weaker-than-expected results from the B.C. gas utility combined with higher-than-expected corporate costs. However, after our discussions with management, we understand that the \$8 million Y/Y decline in earnings at FortisBC Energy was largely due to seasonality that will likely reverse in future periods. As a result, we have raised our Q4/13E EPS to \$0.50 from \$0.46, while our 2013E EPS estimate (f.d.) lowers to \$1.69 to \$1.71. Although we are maintaining a neutral stance on Fortis, we believe earnings trends should improve beginning in 2014 on rate base growth, a return to normal hydrology at Belize and the commissioning of the Waneta expansion in early 2015. In the meantime, investors are being paid to wait via a 3.8% common share dividend that we believe is quite safe.
- **Five-year capital expenditure program unchanged in aggregate, but timing changes will see some capex deferred beyond 2013.** Having already spent ~\$809 million so far in 2013, Fortis has revised downward its 2013 capex guidance to ~\$1.2 billion from ~\$1.3 billion; however, the ~\$150 million decrease from the company's original 2013 forecast is primarily due to later-than-expected timing of certain expenditures for the Waneta Dam expansion (see below), FortisBC Electric and the FortisBC Energy Companies, partially offset by Central Hudson. Management has reiterated its outlook for \$6 billion in total capital spending over the five-year period from 2013 to 2017, of which 53% relates to Canadian regulated electric utilities, 11% to Central Hudson, 4% to Caribbean regulated electric utilities and the remaining 11% to non-regulated operations.
- **CH Energy on track to achieving accretion in 2015:** Q3 was the first full quarter of results for CH Energy since Fortis completed its acquisition on June 27, 2013. Results for Central Hudson (regulated gas and electric utility) came in roughly in line with our expectations (\$12 million vs. our ~\$11 million estimate). Following the acquisition, Fortis now also owns Griffith Energy Services, Inc. – the non-regulated petroleum supply operations of CH Energy – which we expect will generate earnings of ~\$4 million per year in the Non-Utility Operations reporting segment. We expect the seasonality of this business to result in higher contribution in Q1 and Q4, with lower or negative earnings contribution during the summer months (Griffith contributed a \$2.5 million loss for Q3/13). Looking at CH Energy as a whole, management has reiterated its view that the acquisition should result in accretion for FTS beginning in 2015.
- **Waneta expansion progresses toward spring 2015 completion:** Despite the likelihood of some capex for this project being delayed from 2013 into 2014, the project still remains on budget and on track for a spring 2015 in-service date. Recall that FTS owns 51% of the 335-MW hydroelectric dam expansion. Since construction began in late 2010, ~\$534 million has been spent to date (vs. a total budget of \$900 million). During Q3, generator step-up transformers were received onsite for assembly, while the first turbine runner and turbine operating mechanism were successfully completed offsite.

- **Key regulatory updates:**
  - **FortisBC Energy Companies' 2014-2018 PBR plans currently under review:** all three entities have filed their multi-year ratemaking plans for which proceedings are currently under way. FEI filed its application in June 2013 requesting a 1.4% increase in rates for 2014; a decision on the application is expected in mid-2014. Both FEVI and FEWI filed their applications in September and October, respectively, requesting that 2014 rates be held at current rates; in each case, a decision is expected in early 2014.
  - **Decision on FortisBC Electric's 2014-2018 PBR plan expected in mid-2014:** the application, which was filed in October and requests a basic customer rate increase of 3.3% for 2014, continues to be reviewed.
  - **Stage 2 of BCUC GCOC remains under way:** recall that this proceeding will decide the allowed ROE and capital structure for FEVI, FEWI and FortisBC Electric. The expected decision date remains in H1/14.
  - **FortisAlberta: proceedings on 2014 Annual Rates Filing and the 2013 GCOC remain under way.** In September, FortisAlberta filed its 2014 Annual Rates Filing (under PBR), which proposes a 5.36% increase to the distribution component of customer rates, effective January 1, 2014. A decision on this application is expected in Q4/13. Meanwhile, the 2013 GCOC proceeding continues after commencing in Q2/13; it is our view that a decision will not come on this proceeding until the later part of 2014.
  - **Newfoundland Power's 2014 Capital Expenditure Plan approved in September 2013.** The PUB approved the plan, which totals ~\$85 million before customer contributions.
- **Reducing 2013 estimates:** We have reduced our EPS estimate (f.d.) for FTS to \$1.69 from \$1.71 previously to reflect weaker-than-expected Q3 results partially offset by an increase in our Q4/13E EPS estimate to \$0.50 from \$0.46 owing to lower corporate costs and higher est. contribution from the B.C. gas utilities and Griffith Energy Services due to seasonality. Our EPS estimates for 2014E and 2015E are unchanged, but we have re-calibrated estimated segment contribution (mainly stronger hydro generation at Belize offset by higher corporate costs).
- **Valuation:** At current levels, FTS is trading at 17.9x our 2014E EPS (vs. peer range of 16.4–16.6x) and 16.8x our 2015E EPS (vs. peer range of 15.5–16.0x). Our target price of \$33 is based on 17.5x our blended 14/15 EPS estimates. This multiple is above the peer average, reflecting FTS's high regulated exposure, low-risk growth and strong management. Based on FTS's relative return to our price target compared to the other companies in our coverage space, we continue to rate FTS shares Market Perform.

**Exhibit 1: FTS – P/E, Share Price and Target P/E**

Source: Thomson One

- Third-quarter results:** Fortis reported EPS of \$0.23, below our estimate of \$0.28 and Thomson One consensus of \$0.27. The variance versus our estimate was driven primarily by weaker-than-expected results from the FortisBC Energy Companies (largely due to seasonality). Corporate costs were also slightly higher than we expected, at \$21 million (vs. \$19 million) and include \$2 million in costs related to the redemption of preference shares. Our quarterly and annual estimates are set out in Exhibit 4 and 5.

**IMPORTANT DISCLOSURES****Analyst's Certification**

I, Ben Pham, CFA, hereby certify that the views expressed in this report accurately reflect my personal views about the subject securities or issuers. I also certify that no part of my compensation was, is, or will be, directly or indirectly, related to the specific recommendations or views expressed in this report.

Analysts who prepared this report are compensated based upon (among other factors) the overall profitability of BMO Capital Markets and their affiliates, which includes the overall profitability of investment banking services. Compensation for research is based on effectiveness in generating new ideas and in communication of ideas to clients, performance of recommendations, accuracy of earnings estimates, and service to clients.

Analysts employed by BMO Nesbitt Burns Inc. and/or BMO Capital Markets Ltd. are not registered as research analysts with FINRA. These analysts may not be associated persons of BMO Capital Markets Corp. and therefore may not be subject to the NASD Rule 2711 and NYSE Rule 472 restrictions on communications with a subject company, public appearances and trading securities held by a research analyst account.

**Company Specific Disclosure**

Disclosure 1: BMO Capital Markets has undertaken an underwriting liability with respect to this issuer within the past 12 months.

Disclosure 2: BMO Capital Markets has provided investment banking services with respect to this issuer within the past 12 months.

Disclosure 3: BMO Capital Markets has managed or co-managed a public offering of securities with respect to this issuer within the past 12 months.

Disclosure 4: BMO Capital Markets or an affiliate has received compensation for investment banking services from this issuer within the past 12 months.

Disclosure 5: BMO Capital Markets or an affiliate received compensation for products or services other than investment banking services within the past 12 months.

Disclosure 6: This issuer is a client (or was a client) of BMO NB, BMO Capital Markets Corp., BMO CM Ltd. or an affiliate within the past 12 months: Investment Banking Services & Non-Securities Related Services.

Disclosure 8: BMO Capital Markets or an affiliate has a financial interest in 1% or more of any class of the equity securities of this issuer.

**Methodology and Risks to Price Target/Valuation**

**Methodology:** Our target price is approximately 17.5x our blended two-year forward adjusted EPS estimates.

**Risks:** Operations are subject to complex regulation by a variety of provincial, state and federal (Canada, Cayman Islands & Belize) agencies. Changes in regulation may adversely affect performance.

**General Disclaimer**

“BMO Capital Markets” is a trade name used by the BMO Investment Banking Group, which includes the wholesale arm of Bank of Montreal and its subsidiaries BMO Nesbitt Burns Inc., BMO Capital Markets Ltd. in the U.K. and BMO Capital Markets Corp. in the U.S. BMO Nesbitt Burns Inc., BMO Capital Markets Ltd. and BMO Capital Markets Corp are affiliates. Bank of Montreal or its subsidiaries (“BMO Financial Group”) has lending arrangements with, or provide other remunerated services to, many issuers covered by BMO Capital Markets. The opinions, estimates and projections contained in this report are those of BMO Capital Markets as of the date of this report and are subject to change without notice. BMO Capital Markets endeavours to ensure that the contents have been compiled or derived from sources that we believe are reliable and contain information and opinions that are accurate and complete. However, BMO Capital Markets makes no representation or warranty, express or implied, in respect thereof, takes no responsibility for any errors and omissions contained herein and accepts no liability whatsoever for any loss arising from any use of, or reliance on, this report or its contents. Information may be available to BMO Capital Markets or its affiliates that is not reflected in this report. The information in this report is not intended to be used as the primary basis of investment decisions, and because of individual client objectives, should not be construed as advice designed to meet the particular investment needs of any investor. This material is for information purposes only and is not an offer to sell or the solicitation of an offer to buy any security. BMO Capital Markets or its affiliates will buy from or sell to customers the securities of issuers mentioned in this report on a principal basis. BMO Capital Markets or its affiliates, officers, directors or employees have a long or short position in many of the securities discussed herein, related securities or in options, futures or other derivative instruments based thereon. The reader should assume that BMO Capital Markets or its affiliates may have a conflict of interest and should not rely solely on this report in evaluating whether or not to buy or sell securities of issuers discussed herein.

**Additional Matters**

To Canadian Residents: BMO Nesbitt Burns Inc., affiliate of BMO Capital Markets Corp., furnishes this report to Canadian residents and accepts responsibility for the contents herein subject to the terms set out above. Any Canadian person wishing to effect transactions in any of the securities included in this report should do so through BMO Nesbitt Burns Inc.

The following applies if this research was prepared in whole or in part by Andrew Breichmanas, Tony Robson, or Edward Sterck: This research is not prepared subject to Canadian disclosure requirements. This research is prepared by BMO Capital Markets Limited and subject to the regulations of the Financial Conduct Authority (FCA) in the United Kingdom. FCA regulations require that a firm providing research disclose its ownership interest in the issuer that is the subject of the research if it and its affiliates own 5% or more of the equity of the issuer. Canadian regulations require that a firm providing research disclose its ownership interest in the issuer that is the subject of the research if it and its affiliates own 1% or more of the equity of the issuer that is the subject of the research. Therefore BMO Capital Markets Limited will only disclose its and its’ affiliates ownership interest in the subject issuer if such ownership exceeds 5% of the equity of the issuer.

To U.S. Residents: BMO Capital Markets Corp. and/or BMO Nesbitt Burns Securities Ltd., affiliates of BMO NB, furnish this report to U.S. residents and accept responsibility for the contents herein, except to the extent that it refers to securities of Bank of Montreal. Any U.S. person wishing to effect transactions in any security discussed herein should do so through BMO Capital Markets Corp. and/or BMO Nesbitt Burns Securities Ltd.

To U.K. Residents: In the UK this document is published by BMO Capital Markets Limited which is authorised and regulated by the Financial Conduct Authority. The contents hereof are intended solely for the use of, and may only be issued or passed on to, (I) persons who have professional experience in matters relating to investments falling within Article 19(5) of the Financial Services and Markets Act 2000 (Financial Promotion) Order 2005 (the “Order”) or (II) high net worth entities falling within Article 49(2)(a) to (d) of the Order (all such persons together referred to as “relevant persons”). The contents hereof are not intended for the use of and may not be issued or passed on to, retail clients.

## Quarterly Dividend Increased 3.2%

### Event

Fortis Inc. announced that its board of directors has approved an increase in the company's quarterly common share dividend to \$0.32/share from the current quarterly rate of \$0.31/share (~3.2% increase), marking the company's 41st consecutive year of dividend increases. The dividend is payable on March 1, 2014, to common shareholders of record at the close of business on February 14, 2014.

### Impact & Analysis

As a result of the announcement, the new annualized common share dividend for 2014 will be \$1.28 (vs. \$1.24 for 2013). This is \$0.02 lower on an annual basis for 2014 vs. our previous expectation. Our 2014/15 EPS (fd) estimates are unchanged at \$1.82 and \$1.93, respectively. We have reduced our 2014/15 dividend per share estimates to \$1.28 and \$1.34, from \$1.30 and \$1.36, respectively, reflecting dividend growth of ~3.2% in 2014 and ~4.7% in 2015.

### Valuation & Recommendation

At current levels, FTS is trading at 17.3x our 2014E EPS (vs. peer range of 15.6-16.0x) and 16.2x our 2015E EPS (vs. peer range of 14.7-15.5x). Our target price of \$33 is based on 17.5x our blended 2014E/15E EPS estimates. The multiple is above the peer average, reflecting FTS's high regulated exposure, low-risk growth and strong management team. Based on FTS's relative return to our target price compared to other companies in our coverage space, we continue to rate FTS shares Market Perform.

## Going Big; Resuming Coverage With a Market Perform Rating

### Event

Resuming coverage with a Market Perform rating following \$1.8B convertible debentures offering and UNS acquisition announcement.

### Impact & Analysis

Key implications: (1) Strategic rationale of the transaction is clear: UNS will provide Fortis with a larger U.S. presence immediately, diversify its earnings profile, and provide significant longer-term rate base growth prospects. Total assets are expected to increase by ~34%+ to \$23.5B pro-forma. (2) The US\$4.3B price represents ~16.7x 2015E EPS or a 43%+ premium to 2015E rate base (or ~18.0x 2015E EPS or a 50%+ premium to 2015E rate base including a required US\$200M injection upon close). The acquisition is expected to close before the end of 2014, subject to regulatory and UNS shareholders' approvals. (3) We estimate initial deal accretion of ~\$0.04/share or ~2%+ to our pre-acquisition 2015E EPS, with additional earnings accretion over time given 7%+ rate base growth at UNS through 2018E. (4) Our 2013E EPS (f.d.) estimate is unchanged at \$1.69, but our 2014E EPS (f.d.) declines to \$1.54 from \$1.82 due to the dilution from the \$1.8 billion convertible debenture issuance. Our 2015E EPS (f.d.) increases to \$1.97 from \$1.93 owing to the expected deal accretion.

### Valuation & Recommendation

While we have rolled forward our valuation to F15 (vs. average of F14/F15) and estimate modest deal accretion, we have left our target price unchanged at \$33/sh as we are applying a lower target multiple of 16.75x (vs. 17.5x) reflecting FTS' increased exposure to U.S. utilities (which have tended to trade at lower valuations than Canadian-domiciled utilities) and a higher long-term bond yield assumption in F15 vs. F14. Based on FTS' relative return to our target price compared to the other regulated utility companies we cover in our coverage space, we continue to rate FTS shares Market Perform.

**Price (23-Jan)** \$30.11 **52-Week High** \$35.14  
**Target Price** \$33.00 **52-Week Low** \$29.51

 Q2/14E \$0.31 to \$0.23  
 Q3/14E \$0.29 to \$0.22  
 Q4/14E \$0.52 to \$0.45

## Going Big; Resuming Coverage With Market Perform Rating

**Maintaining Market Perform rating and \$33/sh target price.** The US\$4.3 billion acquisition of UNS Energy Corporation is Fortis' largest acquisition to date and illustrates that large-scale acquisition opportunities in the U.S. are still available for the company. Fortis is utilizing a combination of convertible debentures (which we expect to convert into common shares upon acquisition close expected end of 2014) and additional holdco debt and preferred shares to finance the deal. While we have rolled forward our valuation to F15 (vs. average of F14/15) and estimate ~\$0.04/sh accretion (or 2%+) from the UNS deal, we have left our target price unchanged at \$33/sh as we are applying a lower target multiple of 16.75x (vs. 17.5x) reflecting FTS' increased exposure to U.S. utilities (which have tended to trade at lower valuations than Canadian-domiciled utilities) and a higher bond yield assumption in F15 vs. F14. Based on FTS' relative return to our target price compared to the other regulated utility companies we cover in our coverage space, we continue to rate FTS shares Market Perform.

## A Strategic Transaction That Would Be Modestly Accretive Initially

**Driving further growth in the U.S.** Strategic rationale of the transaction is clear: UNS will provide Fortis with a larger U.S. presence immediately, diversify its earnings profile (which currently skew to Canada), and provide significant longer-term rate base growth prospects underpinned by relatively attractive local economic conditions. The UNS acquisition follows on the heels of FTS' recent US\$1.5B acquisition of CH Energy (New York utility) which closed on June 27, 2013.

### Exhibit 1: Current and Pro Forma Geographical Earning Split

Source: BMO Capital Markets

**Headline enterprise value of US\$4.3 billion for UNS' assets, including assumed debt.** This represents the US\$2.5 billion in consideration for UNS shares and US\$1.8 billion in assumed debt. However, if we include FTS' expected US\$200 million injection into UNS upon transaction close to help finance its purchase of the Gila River natural gas plant (Unit 3) and strengthen its balance sheet, the implied total consideration for UNS is approximately US\$4.5 billion.

**FTS has raised \$1.8 billion in subordinated convertible debentures to finance the purchase.** The company has raised \$1.8 billion in subordinated convertible debentures bearing

an interest rate of 4%, of which \$1.6 billion was publicly raised. We assume that all of the convertible debentures are converted to common equity at a price of \$30.72/sh at the beginning of 2015, implying an additional ~58.6 million of common shares (or 27.6% of current common stock outstanding). In our view, FTS will raise holdco debt and preferred shares to finance the balance (Exhibit 2).

### Exhibit 2: Forecast Sources & Uses for the UNS Acquisition (C\$m)

Uses:		Sources:	
Consideration for UNS Assets	(2,625)	Convertible Debentures	1,800
Equity Injection Upon Close	(210)	Holdco Debt	435
		Preferred Shares	600
<b>Total</b>	<b>(2,835)</b>	<b>Total</b>	<b>2,835</b>

Note: Assumes CAD/USD exchange rate of 1.05

Source: BMO Capital Markets, Company Reports

**We estimate that FTS will pay ~16.7x 2015E EPS (consensus) for UNS or a 43%+ premium to 2015E rate base, a rich price in light of recent comparable transactions.** This does not include the impact of the expected US\$200 million injection upon close. Including this injection, the transaction looks to be ~18.0x 2015E EPS (consensus) or a 50%+ premium to 2015E rate base. The UNS purchase multiple certainly exceeded FTS' trading multiple at the time of the announcement; however, we still estimate modest EPS accretion from the deal (see Exhibit 4).

### Exhibit 3: The Purchase Price Values UNS at ~16.7x 2015E P/E (or ~18.0x Including Injection Upon Close)

Implied Valuation for UNS (USD millions)		
	Base Consideration	Plus: Injection Upon Close
Consideration for UNS Shares	\$2,500	\$2,500
Expected injection upon close		\$200
<b>Total Equity Value</b>	<b>\$2,500</b>	<b>\$2,700</b>
2015E Earnings (Consensus)	\$150	\$150
<b>Implied P/E Multiple</b>	<b>16.7x</b>	<b>18.0x</b>
Add: Assumed Debt	\$1,800	\$1,800
<b>Total Enterprise Value</b>	<b>\$4,300</b>	<b>\$4,500</b>
2015E Rate Base	\$3,000	\$3,000
<b>Implied Premium to Rate Base</b>	<b>43.3%</b>	<b>50.0%</b>

Source: BMO Capital Markets, Company Reports

**We estimate EPS accretion of ~\$0.04/sh in 2015E.** Fortis stated that it expects the acquisition to be immediately accretive to EPS excluding one-time transaction costs. The total assets of Fortis are expected to increase by ~34%+ to \$23.5 billion following the completion of the transaction. Incorporating Thomson One consensus of 2015E earnings of ~US\$150 million for UNS and factoring FTS' incremental holdco carrying costs and cross-border tax benefits suggests initial accretion of ~\$0.04/share or ~2%+ to our pre-acquisition 2015E EPS. UNS is expected to grow its rate base by a CAGR of 7%+ per year through 2018E, and this growth rate should translate into additional earnings accretion over time.

**Exhibit 4: UNS Acquisition Expected to Be Accretive Initially**

		<b>Notes</b>
Acquisition price (US\$mm)	4,500.0	Includes US\$200M injection at closing
UNS 2015E Earnings (C\$mm)	157.5	Assumes 1.05 CAD/USD exchange rate
Add: tax benefits specific to FTS	11.0	Cross-border tax benefit
Less: additional interest expense (net of tax)	(16.3)	\$435M holdco debt at 5%; 25% effective tax rate
Less: preferred share dividends	(27.0)	\$600M prefs at 4.5%
Incremental net earnings (2015E)	125.2	
Pre-acquisition net income (2015E)	432.2	
<b>2015E combined net income (C\$mm)</b>	<b>557.4</b>	
Average Shares O/S (Pre-Acquisition)	224.0	
Average Shares O/S (Post-Acquisition)	282.6	58.6M new shares from convertibles conversion
2015E EPS - pre-acquisition (diluted)	\$1.93	
2015E EPS - post-acquisition (diluted)	\$1.97	
<b>EPS accretion</b>	<b>\$0.04</b>	

Source: BMO Capital Markets

**The transaction is expected to close by end of 2014, subject to regulatory and UNS shareholders' approvals.** The proposed acquisition will be submitted early this year for the approval of UNS shareholders. The transaction is also subject to the approval of regulators, including the Arizona Corporation Commission (ACC) and the Federal Energy Regulatory Commission (FERC).

**Key risks to the acquisition, in our view, include:**

**1) Credit ratings.** While we do not expect FTS' post-acquisition leverage to change significantly (we estimate 57.5% adj. debt/capital (preferred shares treated as 50% debt) from 57.6% pre-acquisition), credit rating risk is heightened in the near term: on December 11, 2013, DBRS placed FTS' A (low) rating Under Review – Developing; also on December 13, 2013, S&P revised its outlook on FTS A- credit rating to Negative from Stable. Should a credit rating downgrade occur, this could increase the company's cost of capital and/or result in FTS issuing more common equity for the UNS deal than expected.

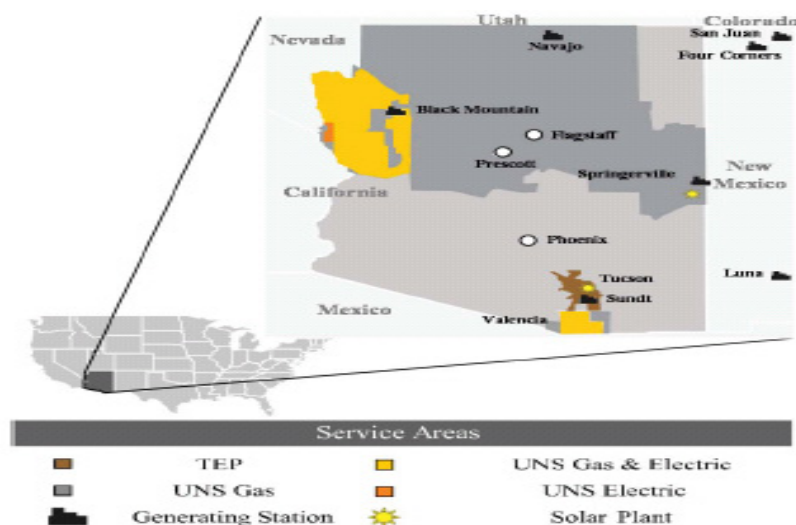

**2) Regulatory.** The most significant gating factor to this transaction, in our view, is ACC regulatory approval. A delay in regulatory approval further dilutes near-term EPS given carrying costs associated with the subordinated convertible debentures. Moreover, our research turned up lengthy rate cases in Arizona (close to two years) and a highly politicized regulatory environment historically. However, over the last few years, the regulatory environment in Arizona has improved with timelier rate case reviews, the adoption of partial decoupling mechanisms, and flow-through mechanisms for purchased power costs, fuel, environmental compliance costs, energy efficiency and distributed generation.

**3) Execution.** At a purchase price of approximately US\$4.3 billion, UNS represents a sizable capital investment with a lengthy regulatory approval process. FTS is also integrating its recently acquired New York utility. Neither of these tasks is small, which in our view could restrain near-term M&A momentum, such as a potential acquisition of AltaLink. More cautious investors may not see the immediate timing of the Arizona deal as ideal.

## An Overview of UNS Energy Corporation

**UNS Energy is a vertically integrated regulated utility operating in Arizona.** UNS's main subsidiary Tucson Electric Power Company (TEP) delivers electric power to ~412,000 customers in a service territory covering 1,155 square miles in Southern Arizona. UNS also owns and operates two smaller subsidiaries: (1) UNS Electric, which serves approximately 93,000 electric customers in the Mohave and Santa Cruz Counties; (2) UNS Gas, which serves ~149,000 natural gas customers in northern Arizona (Mohave, Yavapai, Coconino and Navajo) as well as southern Arizona (Santa Cruz). As at September 30 2013, TEP, UNS Electric, and UNS Gas represented 84%, 9%, and 7% of UNS' total assets, respectively. UNS Energy stock trades on the New York Stock Exchange under the ticker UNS.

### Exhibit 5: UNS Arizona Service Area

Source: Company Presentations

**Higher regulatory metrics than FTS' existing Canadian utilities.** TEP, UNS Electric, and UNS Gas are regulated by the Arizona Corporation Commission on a cost-of-service basis. TEP is currently allowed to earn a ROE of 10% and 43.5% deemed common equity; UNS Electric is allowed to earn a ROE of 9.5% and common equity of 52.6%; UNS Gas is approved for an ROE of 9.75% and common equity of 50.82%. Similar to other U.S. utilities, regulatory metrics for UNS are higher than FTS' existing Canadian utilities, where ROEs are in the ~9% area with deemed equity metrics of ~40%.

**UNS' history shows earnings growth.** FTS noted that over the past 10 years, UNS has increased its net income by a CAGR of 7.7%+. During 2012, UNS Energy generated net income of US\$91 million vs. US\$47 million in 2003.

**Fast growing utility.** Fortis expects annual capital expenditures at UNS to exceed US\$2.3 billion on average from 2013-2018, which translates into ~7%+ average growth. UNS' rate base is expected to increase to US\$3 billion by 2015, primarily driven by generation capital investments to reduce reliance from coal, including the purchase of the natural gas facility Gila River Unit 3 as well as utility scale renewable generation. Currently, UNS owns or leases a

total of 2,420 MW of generation capacity, consisting of 59% coal, 34% natural gas, 6% dual fuel, and 1% solar. Coal is expected to decrease to ~30% of TEP's generation capacity by 2020E.

#### Exhibit 6: UNS – Expected Rate Base Growth of 7%+

### Revising Estimates; Maintaining Market Perform Rating and \$33 TP

**Revised estimates.** Our 2013E EPS (f.d.) estimate is unchanged at \$1.69, but our 2014E EPS (f.d.) estimate declines to \$1.54 from \$1.82 due to the dilution from the \$1.8 billion convertible debenture issuance. Our 2015E diluted EPS estimate increases to \$1.97 from \$1.93 owing to the expected accretion from the UNS deal.

**Valuation.** At current levels, FTS is trading at 19.6x our 2014E EPS (vs. peer range of 15.7-17.7x) and 15.4x our 2015E EPS (vs. peer range of 14.8-16.7x) compared to its 10-year average forward P/E multiple of 18.1x. While we have rolled forward our valuation to F15 (vs. average of F14/15) and estimate at least ~\$0.04/sh accretion (or 2%+) from the UNS deal, we have left our target price unchanged at \$33/sh as we are applying a lower target multiple of 16.75x (vs. 17.5x) reflecting FTS' increased exposure to U.S. utilities (which have tended to trade at lower valuations than Canadian-domiciled utilities) and a higher bond yield assumption in F15 vs. F14. Based on FTS' relative return to our target price compared to the other regulated utility companies we cover in our coverage space, we continue to rate FTS shares Market Perform.

#### Exhibit 7: Calculation of Our Target Price

**General Disclaimer**

“BMO Capital Markets” is a trade name used by the BMO Investment Banking Group, which includes the wholesale arm of Bank of Montreal and its subsidiaries BMO Nesbitt Burns Inc., BMO Capital Markets Ltd. in the U.K. and BMO Capital Markets Corp. in the U.S. BMO Nesbitt Burns Inc., BMO Capital Markets Ltd. and BMO Capital Markets Corp are affiliates. Bank of Montreal or its subsidiaries (“BMO Financial Group”) has lending arrangements with, or provide other remunerated services to, many issuers covered by BMO Capital Markets. The opinions, estimates and projections contained in this report are those of BMO Capital Markets as of the date of this report and are subject to change without notice. BMO Capital Markets endeavours to ensure that the contents have been compiled or derived from sources that we believe are reliable and contain information and opinions that are accurate and complete. However, BMO Capital Markets makes no representation or warranty, express or implied, in respect thereof, takes no responsibility for any errors and omissions contained herein and accepts no liability whatsoever for any loss arising from any use of, or reliance on, this report or its contents. Information may be available to BMO Capital Markets or its affiliates that is not reflected in this report. The information in this report is not intended to be used as the primary basis of investment decisions, and because of individual client objectives, should not be construed as advice designed to meet the particular investment needs of any investor. This material is for information purposes only and is not an offer to sell or the solicitation of an offer to buy any security. BMO Capital Markets or its affiliates will buy from or sell to customers the securities of issuers mentioned in this report on a principal basis. BMO Capital Markets or its affiliates, officers, directors or employees have a long or short position in many of the securities discussed herein, related securities or in options, futures or other derivative instruments based thereon. The reader should assume that BMO Capital Markets or its affiliates may have a conflict of interest and should not rely solely on this report in evaluating whether or not to buy or sell securities of issuers discussed herein.

**Additional Matters**

To Canadian Residents: BMO Nesbitt Burns Inc. furnishes this report to Canadian residents and accepts responsibility for the contents herein subject to the terms set out above. Any Canadian person wishing to effect transactions in any of the securities included in this report should do so through BMO Nesbitt Burns Inc.

The following applies if this research was prepared in whole or in part by Andrew Breichmanas, Tony Robson, or Edward Sterck: This research is not prepared subject to Canadian disclosure requirements. This research is prepared by BMO Capital Markets Limited and subject to the regulations of the Financial Conduct Authority (FCA) in the United Kingdom. FCA regulations require that a firm providing research disclose its ownership interest in the issuer that is the subject of the research if it and its affiliates own 5% or more of the equity of the issuer. Canadian regulations require that a firm providing research disclose its ownership interest in the issuer that is the subject of the research if it and its affiliates own 1% or more of the equity of the issuer that is the subject of the research. Therefore BMO Capital Markets Limited will only disclose its and its’ affiliates ownership interest in the subject issuer if such ownership exceeds 5% of the equity of the issuer.

To U.S. Residents: BMO Capital Markets Corp. furnishes this report to U.S. residents and accepts responsibility for the contents herein, except to the extent that it refers to securities of Bank of Montreal. Any U.S. person wishing to effect transactions in any security discussed herein should do so through BMO Capital Markets Corp.

To U.K. Residents: In the UK this document is published by BMO Capital Markets Limited which is authorised and regulated by the Financial Conduct Authority. The contents hereof are intended solely for the use of, and may only be issued or passed on to, (I) persons who have professional experience in matters relating to investments falling within Article 19(5) of the Financial Services and Markets Act 2000 (Financial Promotion) Order 2005 (the “Order”) or (II) high net worth entities falling within Article 49(2)(a) to (d) of the Order (all such persons together referred to as “relevant persons”). The contents hereof are not intended for the use of and may not be issued or passed on to, retail clients.

Unauthorized reproduction, distribution, transmission or publication without the prior written consent of BMO Capital Markets is strictly prohibited.

## First Glance - Q4/13 Results Modestly Below Expectations

Fortis reported EPS of \$0.47, below our estimate of \$0.50 and the Thomson One consensus of \$0.49. The variance versus our estimate was driven primarily by weaker-than-expected results from FortisAlberta (timing of depreciation and lower net transmission revenue) and Non-Utility Operations (income tax expenses associated with the pending sale of Griffith), partially offset by stronger-than-expected earnings contribution from its B.C. gas utility.

### Our View:

- FTS still expects the US\$4.3 billion UNS Energy acquisition to close by the end of 2014, subject to UNS common shareholder approval and certain regulatory and government approvals (i.e., Arizona Corporation Commission, FERC). A settlement agreement is expected to be filed on May 12, 2014, with a hearing currently scheduled for June 16, 2014.
- The company's capital expenditure budget is \$1.4 billion in 2014 (vs. our outlook of \$1.2 billion and up from \$1.2 billion in 2013) and \$6.5 billion during 2014-2018 excluding an expected capital program of \$1.5 billion at UNS from 2015 to 2018. This program should support continued growth in earnings and dividends. Notably, FTS' 335 MW Waneta hydroelectric project in B.C. (largest capital investment under way) is on budget (\$900 million gross) and still on track for an expected in-service date of spring 2015.
- On the regulatory front, Central Hudson expects to file a general rate application in mid-2014 to establish rates effective mid-2015 when the rate freeze ends, while a decision to determine final allowed ROEs and capital structures for FortisBC Electric and FortisBC Energy (Vancouver Island) is expected in H1/14. Decisions are also expected on the 2014-2018 Multi-Year PBR plans for FortisBC Electric and the FortisBC Energy Companies in Q3/14.
- At current levels, FTS is trading at 19.7x our 2014E EPS (vs. peer range of 16.1-17.5x) and 15.5x our 2015E EPS (vs. peer range of 15.2-16.5x).

This report was prepared by an analyst(s) employed by BMO Nesbitt Burns Inc., and who is (are) not registered as a research analyst(s) under FINRA rules. For disclosure statements, including the Analyst's Certification, please refer to pages 2 to 5.

**Rating and Sector Key (as of April 5, 2013):**

We use the following ratings system definitions:

OP = Outperform - Forecast to outperform the analyst's coverage universe on a total return basis

Mkt = Market Perform - Forecast to perform roughly in line with the analyst's coverage universe on a total return basis

Und = Underperform - Forecast to underperform the analyst's coverage universe on a total return basis on a total return basis

(S) = speculative investment;

NR = No rating at this time;

R = Restricted – Dissemination of research is currently restricted.

BMO Capital Markets' seven Top 15 lists guide investors to our best ideas according to different objectives (CDN Large Cap, CDN Small Cap, US Large Cap, US Small cap, Income, CDN Quant, and US Quant have replaced the Top Pick rating).

## Q4 – Hang in There

### Event

Fortis' fourth-quarter results were a few pennies shy of expectations (EPS of \$0.47 vs. our estimate of \$0.50 and consensus of \$0.49) amid lower-than-expected earnings at FortisAlberta and Non-Utility Operations, partially offset by stronger contribution from its B.C. gas utility.

### Impact & Analysis

Key implications: (1) The company's capital expenditure budget is \$1.4 billion in 2014, up from \$1.2 billion in 2013. Over the five-year period 2014–2018, the company's capital program is expected to be \$6.5 billion (excluding \$1.5 billion at UNS from 2015 to 2018). (2) The company maintains its expectation for the UNS Energy acquisition to close by the end of 2014. In January 2014, Fortis and UNS Energy filed a joint application with the Arizona Corporation Commission seeking approval of the acquisition. (3) In connection with a lower earnings outlook at FTSA Alberta and higher corporate expense, we have reduced our 2014 EPS estimate (f.d.) for FTS to \$1.46 from \$1.54 and our 2015 EPS estimate to \$1.94 from \$1.97. Note that our 2014 estimate includes the convertible debenture cost associated with the UNS Energy acquisition (~\$0.24/sh).

### Valuation & Recommendation

While a negative PBR decision at FortisAlberta during 2014 should not be completely ruled out, solid utility rate base expansion and a return to normal hydrology in Belize should more than offset. Furthermore, positive earnings momentum should be sustained in 2015 when the Waneta expansion and accretion from CH and UNS make positive contributions. Given sustainable yield and consistent earnings/dividend growth, we remain comfortable holding the stock and are maintaining our Market Perform rating and \$33 target price, which reflects 17.0x (vs. 16.75x previously) our revised 2015E EPS of \$1.94.

 Q4/14E \$0.45 to \$0.42

## Q4 – Hang in There

- Maintaining Market Perform rating and \$33 target price.** Fortis' fourth-quarter bottom-line results fell below expectations (EPS of \$0.47 vs. our estimate of \$0.50 and Thomson One consensus of \$0.49) amid weaker-than-expected results from FortisAlberta and Non-Utility Operations, partially offset by stronger-than-expected earnings contribution from its B.C. gas utility. As one of the largest and most liquid regulated utilities on the board, Fortis' relative valuation compression during 2013 has reflected a multitude of market concerns ranging from rising bond yields and flat/limited earnings growth driven by regulatory headwinds (primarily lower allowed ROEs) and pre-financings associated with pending acquisitions. While these are legitimate considerations, FTS's improving earnings outlook has largely gone unnoticed in our view. While a negative PBR decision at FortisAlberta during 2014 should not be completely ruled out (potential 5c impact we think), solid utility rate base expansion and a return to normal hydrology in Belize should more than offset. Furthermore, positive earnings momentum should be sustained come 2015 when the Waneta expansion and accretion from CH and UNS make positive contributions. Given sustainable yield and consistent earnings/dividend growth, we remain comfortable holding the stock and are maintaining our Market Perform rating and \$33 target price.
- 2014 capital spending – \$1.4 billion.** The company's capital expenditure budget is \$1.4 billion in 2014 (vs. our prior estimate of \$1.2 billion and up from \$1.2 billion in 2013), largely driven by the continued construction of the Waneta expansion and regulated infrastructure spending at its Western-based utilities. Over the five-year period 2014–2018, the company's capital program is expected to be \$6.5 billion (excluding \$1.5 billion at UNS from 2015 to 2018), of which 50% relates to Canadian regulated electric utilities, 27% at Canadian regulated gas utilities, 11% to Central Hudson, 5% to Caribbean regulated electric utilities, and the remaining 7% to non-regulated operations.

### Exhibit 1: Capital Expenditure Outlook

Business Segment	2014E	2013A	YoY % Change
FortisBC Energy	329.0	215.0	53.0%
Central Hudson	122.0	57.0	114.0%
FortisAlberta	413.0	429.0	-3.7%
FortisBC	130.0	69.0	88.4%
Newfoundland Power	105.0	92.0	14.1%
Other Canadian	56.0	56.0	0.0%
Caribbean	61.0	52.0	17.3%
Fortis Generation	131.0	146.0	-10.3%
Non-Utility	83.0	59.0	40.7%
<b>Total</b>	<b>1,430.0</b>	<b>1,175.0</b>	<b>21.7%</b>

Source: Company Reports

- Waneta expansion.** Construction activities continued for the \$900 million Waneta dam expansion in B.C., a project in which Fortis holds a 51% interest. A total of \$579 million has been spent to date since construction began in late 2010, with \$143 million incurred in

2013. The company has reported that the project is still on track for completion on budget and on time, with a target in-service date of spring 2015.

- **UNS Energy acquisition still expected to close by the end of 2014.** The company maintains its expectation for the UNS Energy acquisition to close by the end of 2014 and that the transaction is expected to be accretive in the first full year after closing (excluding one-time acquisition-related costs). In January 2014, Fortis and UNS Energy filed a joint application with the Arizona Corporation Commission seeking approval of the acquisition. Next milestones to look for: (1) UNS shareholder approval (possibly end of Q1/14/early Q2/14; (2) filing of a settlement agreement expected May 12, 2014; and (3) a June 2014 hearing. The company recently raised \$1.8 billion of convertible debentures to partially finance the transaction. For further views on the UNS acquisition, please see our recent comment “[Going Big; Resuming Coverage With a Market Perform Rating](#)” dated January 24, 2014.
- **Tilbury LNG expansion.** FortisBC Energy has initiated the expansion of the Tilbury LNG facility in B.C., which involves adding a second LNG tank and a new liquefier, both to be in-service mid-2016. The expansion is expected to cost \$400 million, of which \$100 million is planned for 2014. We believe the project could add at least 5c to EPS (AFUDC will be recorded during construction).
- **Reducing estimates.** In connection with a lower earnings outlook at FTSA Alberta and higher corporate expense, we have reduced our 2014 EPS estimate (f.d.) for FTS to \$1.46 from \$1.54 and our 2015 EPS estimate to \$1.94 from \$1.97. Note that our 2014 estimate includes the convertible debenture cost associated with the UNS Energy acquisition (\$0.24/sh).
- **Valuation.** At current levels, FTS is trading at 21.0x our 2014E EPS (vs. peer range of 16.4–17.8x) and 15.8x our 2015E EPS (vs. peer range of 15.5–16.7x). Our target price of \$33 is based on 17.0x (vs. 16.75x previously) our 2015E EPS (f.d.) estimate, which is below its 10-year historical average of 18.0x reflecting FTS’s increased exposure to U.S. utilities (which have tended to trade at lower valuations than Canadian-domiciled utilities) and uncertainty over regulatory approval and timing of the UNS acquisition. Based on FTS’s relative return to our price target compared to the other companies we cover in the regulated utility segment of our coverage space, we continue to rate FTS shares Market Perform.

## Exhibit 2: Calculation of Our Target Price

FTS Valuation	Multiple	2013E	2014E	2015E
Adj. EPS (f.d.)		\$1.66	\$1.46	\$1.94
Equity value/sh	17.0x	\$28.26	\$24.82	\$32.97

2015E Equity Value \$33.00

### P/E Sensitivity

16.0x	16.5x	17.0x	17.5x	18.0x
\$31.00	\$32.00	\$33.00	\$34.00	\$35.00

Source: BMO Capital Markets

- **Fourth-quarter results:** Fortis reported EPS of \$0.47, below our estimate of \$0.50 and the Thomson One consensus of \$0.49. The variance versus our estimate was driven primarily by weaker-than-expected results from FortisAlberta (timing of depreciation and lower net transmission revenue) and Non-Utility Operations (income tax expenses associated with the pending sale of Griffith), partially offset by stronger-than-expected earnings contribution from its B.C. gas utility. Our quarterly and annual estimates are set out in Exhibit 5 and 6.

## IMPORTANT DISCLOSURES

### Analyst's Certification

I, Ben Pham, CFA, hereby certify that the views expressed in this report accurately reflect my personal views about the subject securities or issuers. I also certify that no part of my compensation was, is, or will be, directly or indirectly, related to the specific recommendations or views expressed in this report.

Analysts who prepared this report are compensated based upon (among other factors) the overall profitability of BMO Capital Markets and their affiliates, which includes the overall profitability of investment banking services. Compensation for research is based on effectiveness in generating new ideas and in communication of ideas to clients, performance of recommendations, accuracy of earnings estimates, and service to clients.

Analysts employed by BMO Nesbitt Burns Inc. and/or BMO Capital Markets Ltd. are not registered as research analysts with FINRA. These analysts may not be associated persons of BMO Capital Markets Corp. and therefore may not be subject to the NASD Rule 2711 and NYSE Rule 472 restrictions on communications with a subject company, public appearances and trading securities held by a research analyst account.

### Company Specific Disclosure

Disclosure 1: BMO Capital Markets has undertaken an underwriting liability with respect to this issuer within the past 12 months.

Disclosure 2: BMO Capital Markets has provided investment banking services with respect to this issuer within the past 12 months.

Disclosure 3: BMO Capital Markets has managed or co-managed a public offering of securities with respect to this issuer within the past 12 months.

Disclosure 4: BMO Capital Markets or an affiliate has received compensation for investment banking services from this issuer within the past 12 months.

Disclosure 5: BMO Capital Markets or an affiliate received compensation for products or services other than investment banking services within the past 12 months.

Disclosure 6: This issuer is a client (or was a client) of BMO NB, BMO Capital Markets Corp., BMO CM Ltd. or an affiliate within the past 12 months: Investment Banking Services & Non-Securities Related Services.

Disclosure 8: BMO Capital Markets or an affiliate has a financial interest in 1% or more of any class of the equity securities of this issuer.

### Methodology and Risks to Price Target/Valuation

**Methodology:** Our target price is approximately 16.75x our F15 adjusted EPS estimates.

**Risks:** Key risks include interest rates, management execution, construction, capital markets, and regulatory risk.

**General Disclaimer**

“BMO Capital Markets” is a trade name used by the BMO Investment Banking Group, which includes the wholesale arm of Bank of Montreal and its subsidiaries BMO Nesbitt Burns Inc., BMO Capital Markets Ltd. in the U.K. and BMO Capital Markets Corp. in the U.S. BMO Nesbitt Burns Inc., BMO Capital Markets Ltd. and BMO Capital Markets Corp are affiliates. Bank of Montreal or its subsidiaries (“BMO Financial Group”) has lending arrangements with, or provide other remunerated services to, many issuers covered by BMO Capital Markets. The opinions, estimates and projections contained in this report are those of BMO Capital Markets as of the date of this report and are subject to change without notice. BMO Capital Markets endeavours to ensure that the contents have been compiled or derived from sources that we believe are reliable and contain information and opinions that are accurate and complete. However, BMO Capital Markets makes no representation or warranty, express or implied, in respect thereof, takes no responsibility for any errors and omissions contained herein and accepts no liability whatsoever for any loss arising from any use of, or reliance on, this report or its contents. Information may be available to BMO Capital Markets or its affiliates that is not reflected in this report. The information in this report is not intended to be used as the primary basis of investment decisions, and because of individual client objectives, should not be construed as advice designed to meet the particular investment needs of any investor. This material is for information purposes only and is not an offer to sell or the solicitation of an offer to buy any security. BMO Capital Markets or its affiliates will buy from or sell to customers the securities of issuers mentioned in this report on a principal basis. BMO Capital Markets or its affiliates, officers, directors or employees have a long or short position in many of the securities discussed herein, related securities or in options, futures or other derivative instruments based thereon. The reader should assume that BMO Capital Markets or its affiliates may have a conflict of interest and should not rely solely on this report in evaluating whether or not to buy or sell securities of issuers discussed herein.

**Additional Matters**

To Canadian Residents: BMO Nesbitt Burns Inc. furnishes this report to Canadian residents and accepts responsibility for the contents herein subject to the terms set out above. Any Canadian person wishing to effect transactions in any of the securities included in this report should do so through BMO Nesbitt Burns Inc.

The following applies if this research was prepared in whole or in part by Andrew Breichmanas, Tony Robson, or Edward Sterck: This research is not prepared subject to Canadian disclosure requirements. This research is prepared by BMO Capital Markets Limited and subject to the regulations of the Financial Conduct Authority (FCA) in the United Kingdom. FCA regulations require that a firm providing research disclose its ownership interest in the issuer that is the subject of the research if it and its affiliates own 5% or more of the equity of the issuer. Canadian regulations require that a firm providing research disclose its ownership interest in the issuer that is the subject of the research if it and its affiliates own 1% or more of the equity of the issuer that is the subject of the research. Therefore BMO Capital Markets Limited will only disclose its and its’ affiliates ownership interest in the subject issuer if such ownership exceeds 5% of the equity of the issuer.

To U.S. Residents: BMO Capital Markets Corp. furnishes this report to U.S. residents and accepts responsibility for the contents herein, except to the extent that it refers to securities of Bank of Montreal. Any U.S. person wishing to effect transactions in any security discussed herein should do so through BMO Capital Markets Corp.

To U.K. Residents: In the UK this document is published by BMO Capital Markets Limited which is authorised and regulated by the Financial Conduct Authority. The contents hereof are intended solely for the use of, and may only be issued or passed on to, (I) persons who have professional experience in matters relating to investments falling within Article 19(5) of the Financial Services and Markets Act 2000 (Financial Promotion) Order 2005 (the “Order”) or (II) high net worth entities falling within Article 49(2)(a) to (d) of the Order (all such persons together referred to as “relevant persons”). The contents hereof are not intended for the use of and may not be issued or passed on to, retail clients.

Unauthorized reproduction, distribution, transmission or publication without the prior written consent of BMO Capital Markets is strictly prohibited.

**Company Description** – Fortis Inc. (Fortis) is a publicly listed holding company with four key businesses: electric utility operations, regulated natural gas distribution, non-regulated electric power generation and non-utility property activities. Gas and electric utility operations include Newfoundland Power (100%), Maritime Electric (100%),

FortisOntario (100%), Caribbean Utilities (59.5%), Turks and Caicos (100%), FortisAlberta (100%), FortisBC (100%), the FortisBC Energy Companies (100%), and CH Energy Group (100%). Its regulated utilities account for 90% of the company's total assets and serve ~2.4 million customers. *Website:* fortisinc.com

This report was prepared by an analyst(s) employed by BMO Nesbitt Burns Inc., and who is (are) not registered as a research analyst(s) under FINRA rules. For disclosure statements, including the Analyst's Certification, please refer to the back pages.

**Recent Results** – Fortis reported Q4/13 results that were below expectations (adjusted EPS of \$0.47 vs. our estimate of \$0.50 and consensus of \$0.49).

**Corporate Developments** – In conjunction with Fortis' Q4/13 results, the company announced that its capital expenditure in 2014 is \$1.4B (up from \$1.2B in 2013) and \$6.5B during 2014–2018, excluding an expected capital program of \$1.5B at UNS from 2015 to 2018. FTS' 335MW Waneta hydroelectric project in B.C. (largest capital investment under way) is on budget (\$900 million gross) and on track for an expected in-service date of spring 2015.

On December 11, 2013, FTS announced that it had entered into an agreement to acquire UNS Energy Corporation for ~US\$4.3B, including the assumption of ~US\$1.8B in debt. The net purchase price was financed through net proceeds of \$1.8B from a new debt issuance (\$1.6B convertible unsecured subordinated debentures and \$206 million private placement). Total assets are expected to increase by ~34%+ to \$23.5B pro forma. The company expects the transaction to be accretive to EPS in the first year after closing (expected end of 2014).

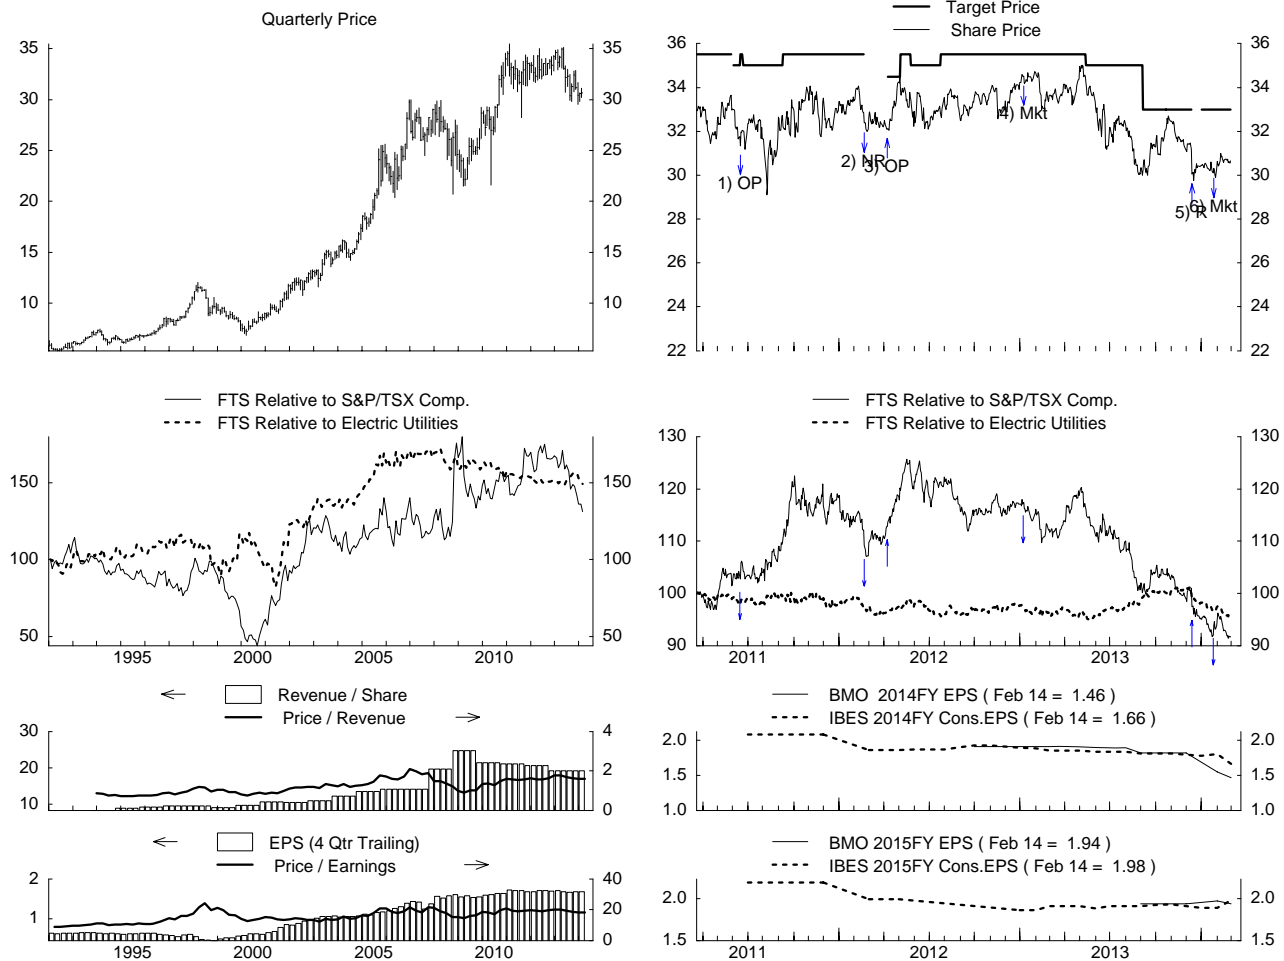

On October 2, 2013, the company announced it closed a private placement of US\$325 million in Senior Unsecured Notes to repay a portion of the U.S. dollar-denominated credit facility borrowings incurred to finance a portion of the CH Energy Group acquisition and for general purposes. The notes were issued in two tranches: US\$285 million 10-year notes maturing October 1, 2023 with a coupon rate of 3.84% and US\$40 million 30-year notes maturing October 1, 2043 at a coupon rate of 5.08%.

**Forecasts** – We are forecasting EPS (fully diluted) of \$1.46 and \$1.94 for 2014 and 2015, respectively.

**Valuation** – Our target price of \$33.00 is based on 17.0x our 2015E EPS (f.d.) estimate.

**Recommendation** – At current levels, we believe the shares of Fortis are reasonably valued. Our rating is Market Perform.

**General Disclaimer**

“BMO Capital Markets” is a trade name used by the BMO Investment Banking Group, which includes the wholesale arm of Bank of Montreal and its subsidiaries BMO Nesbitt Burns Inc., BMO Capital Markets Ltd. in the U.K. and BMO Capital Markets Corp. in the U.S. BMO Nesbitt Burns Inc., BMO Capital Markets Ltd. and BMO Capital Markets Corp are affiliates. Bank of Montreal or its subsidiaries (“BMO Financial Group”) has lending arrangements with, or provide other remunerated services to, many issuers covered by BMO Capital Markets. The opinions, estimates and projections contained in this report are those of BMO Capital Markets as of the date of this report and are subject to change without notice. BMO Capital Markets endeavours to ensure that the contents have been compiled or derived from sources that we believe are reliable and contain information and opinions that are accurate and complete. However, BMO Capital Markets makes no representation or warranty, express or implied, in respect thereof, takes no responsibility for any errors and omissions contained herein and accepts no liability whatsoever for any loss arising from any use of, or reliance on, this report or its contents. Information may be available to BMO Capital Markets or its affiliates that is not reflected in this report. The information in this report is not intended to be used as the primary basis of investment decisions, and because of individual client objectives, should not be construed as advice designed to meet the particular investment needs of any investor. This material is for information purposes only and is not an offer to sell or the solicitation of an offer to buy any security. BMO Capital Markets or its affiliates will buy from or sell to customers the securities of issuers mentioned in this report on a principal basis. BMO Capital Markets or its affiliates, officers, directors or employees have a long or short position in many of the securities discussed herein, related securities or in options, futures or other derivative instruments based thereon. The reader should assume that BMO Capital Markets or its affiliates may have a conflict of interest and should not rely solely on this report in evaluating whether or not to buy or sell securities of issuers discussed herein.

**Additional Matters**

To Canadian Residents: BMO Nesbitt Burns Inc. furnishes this report to Canadian residents and accepts responsibility for the contents herein subject to the terms set out above. Any Canadian person wishing to effect transactions in any of the securities included in this report should do so through BMO Nesbitt Burns Inc.

The following applies if this research was prepared in whole or in part by Andrew Breichmanas, Tony Robson, or Edward Sterck: This research is not prepared subject to Canadian disclosure requirements. This research is prepared by BMO Capital Markets Limited and subject to the regulations of the Financial Conduct Authority (FCA) in the United Kingdom. FCA regulations require that a firm providing research disclose its ownership interest in the issuer that is the subject of the research if it and its affiliates own 5% or more of the equity of the issuer. Canadian regulations require that a firm providing research disclose its ownership interest in the issuer that is the subject of the research if it and its affiliates own 1% or more of the equity of the issuer that is the subject of the research. Therefore BMO Capital Markets Limited will only disclose its and its’ affiliates ownership interest in the subject issuer if such ownership exceeds 5% of the equity of the issuer.

To U.S. Residents: BMO Capital Markets Corp. furnishes this report to U.S. residents and accepts responsibility for the contents herein, except to the extent that it refers to securities of Bank of Montreal. Any U.S. person wishing to effect transactions in any security discussed herein should do so through BMO Capital Markets Corp.

To U.K. Residents: In the UK this document is published by BMO Capital Markets Limited which is authorised and regulated by the Financial Conduct Authority. The contents hereof are intended solely for the use of, and may only be issued or passed on to, (I) persons who have professional experience in matters relating to investments falling within Article 19(5) of the Financial Services and Markets Act 2000 (Financial Promotion) Order 2005 (the “Order”) or (II) high net worth entities falling within Article 49(2)(a) to (d) of the Order (all such persons together referred to as “relevant persons”). The contents hereof are not intended for the use of and may not be issued or passed on to, retail clients.

Unauthorized reproduction, distribution, transmission or publication without the prior written consent of BMO Capital Markets is strictly prohibited.

## B.C. Cost of Capital Decision (Stage 2) Largely in Line With Our Outlook

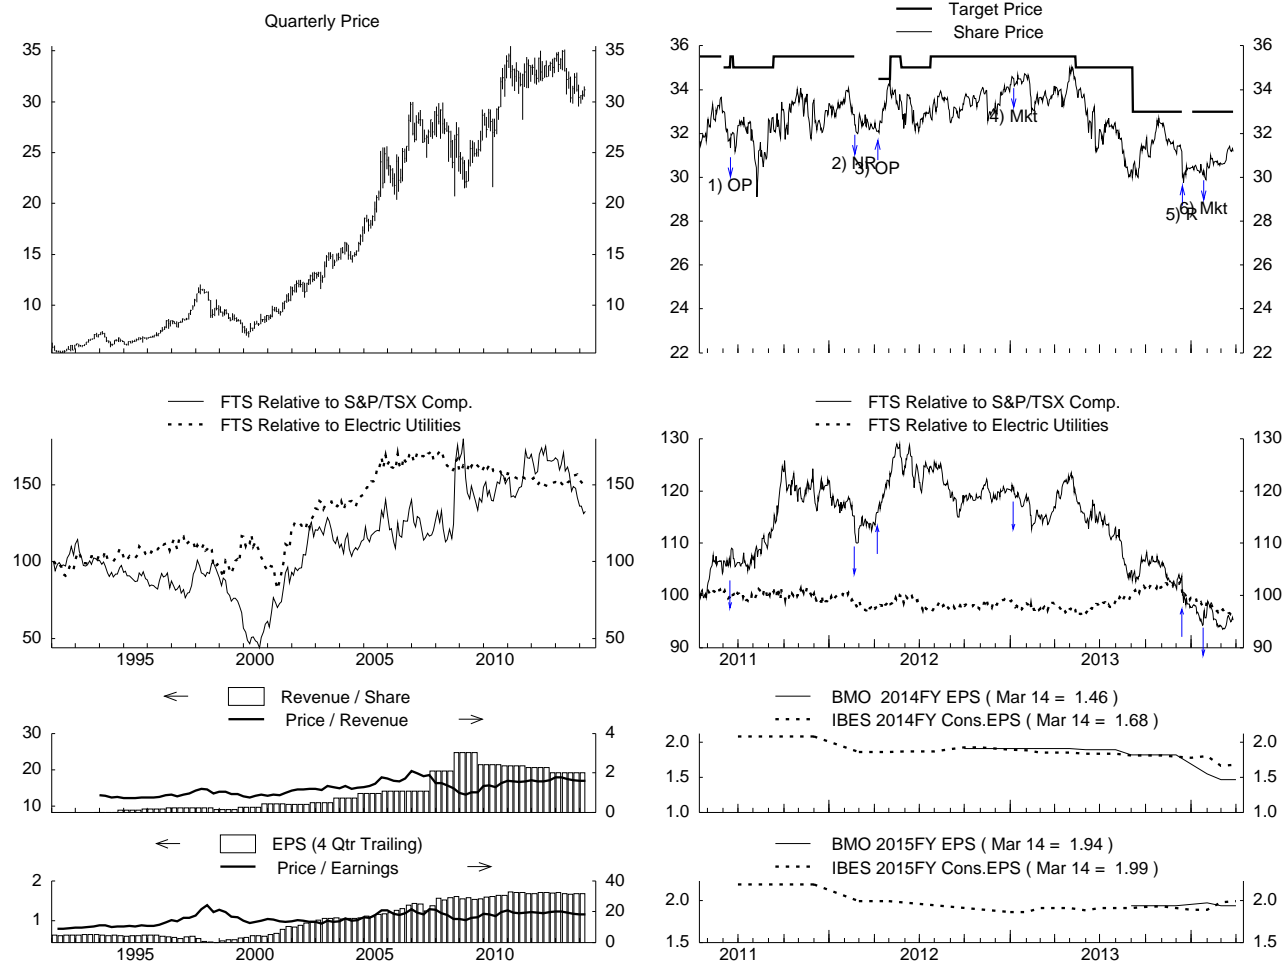

On March 25, 2014, the British Columbia Utilities Commission (BCUC) issued a [decision](#) on Stage 2 of its Generic Cost of Capital proceeding. Last year, Stage 1 established the allowed ROE and capital structure for FortisBC Energy (benchmark utility in B.C.) at 8.75% and 38.5%, respectively (effective January 1, 2013, to December 31, 2015). The Stage 1 decision also included the reintroduction of an automatic adjustment mechanism. Stage 2 effectively establishes cost of capital and deemed equity for other smaller utilities in B.C. relative to the benchmark utility, such as FortisBC Electric, FortisBC (Vancouver Island), and FortisBC Energy (Whistler).

### Our View:

- For FortisBC Electric, the BCUC has set an equity ratio of 40% and an equity risk premium of 40 bps (9.15%) effective January 1, 2013. As FortisBC Electric represents ~10% of Fortis's 2015E earnings, we view the in-line regulatory metrics as a modest positive given lingering risk following the negative Stage 1 decision that the metrics could decline.
- For FortisBC (Vancouver Island), the BCUC has set an equity ratio of 41.5% and an equity risk premium of 50 bps (9.25%) effective January 1, 2013. While the established equity ratio was higher than our estimate of 38.5% (the risk premium was in line), we estimate limited earnings upside (less than \$0.01/sh).
- Similarly, for FortisBC Energy (Whistler), the BCUC set out higher deemed equity (41.5%) and risk premium (75 bps) compared to our outlook (38.5% and 50 bps), but the expected earnings impact is immaterial given the relatively small size of the franchise.

This report was prepared by an analyst(s) employed by BMO Nesbitt Burns Inc., and who is (are) not registered as a research analyst(s) under FINRA rules. For disclosure statements, including the Analyst's Certification, please refer to pages 2 to 5.

**Dissemination of Research**

BMO Capital Markets Equity Research is available via our website <https://research-ca.bmocapitalmarkets.com/Public/Secure/Login.aspx?ReturnUrl=/Member/Home/ResearchHome.aspx>

Institutional clients may also receive our research via Thomson Reuters, Bloomberg, FactSet, and Capital IQ.

Research reports and other commentary are required to be simultaneously disseminated internally and externally to our clients.

**General Disclaimer**

"BMO Capital Markets" is a trade name used by the BMO Investment Banking Group, which includes the wholesale arm of Bank of Montreal and its subsidiaries BMO Nesbitt Burns Inc., BMO Capital Markets Ltd. in the U.K. and BMO Capital Markets Corp. in the U.S. BMO Nesbitt Burns Inc., BMO Capital Markets Ltd. and BMO Capital Markets Corp are affiliates. Bank of Montreal or its subsidiaries ("BMO Financial Group") has lending arrangements with, or provide other remunerated services to, many issuers covered by BMO Capital Markets. The opinions, estimates and projections contained in this report are those of BMO Capital Markets as of the date of this report and are subject to change without notice. BMO Capital Markets endeavours to ensure that the contents have been compiled or derived from sources that we believe are reliable and contain information and opinions that are accurate and complete. However, BMO Capital Markets makes no representation or warranty, express or implied, in respect thereof, takes no responsibility for any errors and omissions contained herein and accepts no liability whatsoever for any loss arising from any use of, or reliance on, this report or its contents. Information may be available to BMO Capital Markets or its affiliates that is not reflected in this report. The information in this report is not intended to be used as the primary basis of investment decisions, and because of individual client objectives, should not be construed as advice designed to meet the particular investment needs of any investor. This material is for information purposes only and is not an offer to sell or the solicitation of an offer to buy any security. BMO Capital Markets or its affiliates will buy from or sell to customers the securities of issuers mentioned in this report on a principal basis. BMO Capital Markets or its affiliates, officers, directors or employees have a long or short position in many of the securities discussed herein, related securities or in options, futures or other derivative instruments based thereon. The reader should assume that BMO Capital Markets or its affiliates may have a conflict of interest and should not rely solely on this report in evaluating whether or not to buy or sell securities of issuers discussed herein.

**Additional Matters**

To Canadian Residents: BMO Nesbitt Burns Inc. furnishes this report to Canadian residents and accepts responsibility for the contents herein subject to the terms set out above. Any Canadian person wishing to effect transactions in any of the securities included in this report should do so through BMO Nesbitt Burns Inc.

The following applies if this research was prepared in whole or in part by Andrew Breichmanas, Tony Robson, or Edward Sterck: This research is not prepared subject to Canadian disclosure requirements. This research is prepared by BMO Capital Markets Limited and subject to the regulations of the Financial Conduct Authority (FCA) in the United Kingdom. FCA regulations require that a firm providing research disclose its ownership interest in the issuer that is the subject of the research if it and its affiliates own 5% or more of the equity of the issuer. Canadian regulations require that a firm providing research disclose its ownership interest in the issuer that is the subject of the research if it and its affiliates own 1% or more of the equity of the issuer that is the subject of the research. Therefore BMO Capital

Markets Limited will only disclose its and its' affiliates ownership interest in the subject issuer if such ownership exceeds 5% of the equity of the issuer.

To U.S. Residents: BMO Capital Markets Corp. furnishes this report to U.S. residents and accepts responsibility for the contents herein, except to the extent that it refers to securities of Bank of Montreal. Any U.S. person wishing to effect transactions in any security discussed herein should do so through BMO Capital Markets Corp.

To U.K. Residents: In the UK this document is published by BMO Capital Markets Limited which is authorised and regulated by the Financial Conduct Authority. The contents hereof are intended solely for the use of, and may only be issued or passed on to, (I) persons who have professional experience in matters relating to investments falling within Article 19(5) of the Financial Services and Markets Act 2000 (Financial Promotion) Order 2005 (the "Order") or (II) high net worth entities falling within Article 49(2)(a) to (d) of the Order (all such persons together referred to as "relevant persons"). The contents hereof are not intended for the use of and may not be issued or passed on to, retail clients.

Unauthorized reproduction, distribution, transmission or publication without the prior written consent of BMO Capital Markets is strictly prohibited.

## First Glance: Q1/14 Results Higher Than Expected

Fortis reported EPS of \$0.67, above Thomson One consensus of \$0.65 and our estimate of \$0.61. Results included \$5M (\$0.02/sh) in discontinued operations associated with Griffith Energy Services, which was sold in March 2014.

### Our View:

- The EPS variance versus our estimate was driven primarily by stronger-than-expected results from Central Hudson (colder temperatures; \$0.02), non-regulated generation (higher rainfall in Belize; \$0.01) and lower corporate expense (foreign exchange gains; \$0.03).
- FTS' US\$4.3 billion acquisition of UNS Energy was approved by shareholders in March 2014 and the Federal Energy Regulatory Commission in April 2014. In April 2014, Commission Staff and other intervenors filed direct testimony that indicated that they would support the merger subject to a number of conditions. A settlement agreement is expected to be filed on May 16, 2014, with a hearing currently scheduled for June 16, 2014. Assuming Arizona Corporation Commission approval, FTS expects the UNS Energy acquisition to close by the end of 2014.
- The company reaffirmed a capital expenditure budget of \$1.4 billion in 2014 (\$237M has been spent YTD) and \$6.5 billion during 2014-2018 (excluding an expected capital program of \$1.5 billion at UNS from 2015 to 2018). Notably, FTS' 335 MW Waneta hydroelectric project in B.C. is on budget (\$603M has been invested of the \$900M gross) and still on track for an expected in-service date of spring 2015. Preliminary work has also begun on the \$400M expansion of the Tilbury LNG facility in B.C., which is expected to be in service in 2016.
- On the regulatory front, Central Hudson expects to file a general rate application in the second half of 2014 to establish rates effective mid-2015 when the rate freeze ends (decision expected H1/15), while FortisAlberta plans to file a combined capital tracker application for 2013-2015. Decisions are also expected on the 2014-2018 Multi-Year PBR plans for FortisBC Electric and the FortisBC Energy Companies in the second half of 2014.
- At current levels, FTS is trading at 22.3x our 2014E EPS (vs. peer range of 16.8-17.8x) and 16.8x our 2015E EPS (vs. peer range of 16.2-18.3x).

This report was prepared by an analyst(s) employed by BMO Nesbitt Burns Inc., and who is (are) not registered as a research analyst(s) under FINRA rules. For disclosure statements, including the Analyst's Certification, please refer to pages 2 to 5.

## Q1 – Back in the Groove

### Event

Fortis' first-quarter bottom-line results were above expectations (basic EPS of \$0.67 vs. our estimate of \$0.61 and Thomson One consensus of \$0.65) amid stronger contributions from Central Hudson (colder temperatures), above-average hydrology conditions in Belize and lower corporate expense.

### Impact & Analysis

Key implications: (1) The company reaffirmed a capex budget of \$1.4B in 2014 and \$6.5B during 2014-2018. (2) Notably, FTS' Waneta hydroelectric project in B.C. is on budget and still on track for an expected in-service date of spring 2015. (3) Preliminary work has begun on the \$400M expansion of the Tilbury LNG facility in B.C., which is expected to be in service in 2016. In passing, the company noted that it is pursuing additional LNG opportunities that are not currently reflected in the company's capital program, including a pipeline expansion for the proposed Woodfibre LNG site in B.C. (4) FTS' US\$4.3 billion acquisition of UNS Energy was approved by shareholders in March and the FERC in April. In April, Commission Staff and other intervenors filed direct testimony that indicated that they would support the merger subject to a number of conditions. Assuming Commission approval, FTS expects the acquisition to close by the end of 2014. (5) We have increased our 2014 EPS estimate (fd) for FTS to \$1.53 (vs. \$1.46) and our 2015 EPS estimate (fd) to \$1.97 (vs. \$1.94).

### Valuation & Recommendation

With an earnings profile that has been largely lacklustre the last few years, Fortis notably made strides on several fronts in Q1/14, not the least of which involves delivering consistent and stable earnings growth. Although we are maintaining a neutral stance on FTS, valuation levels could become more appealing in the near term as we are gaining increasing conviction that the pending UNS acquisition will close and earnings momentum should accelerate beginning in 2015. In the meantime, investors are being paid to wait via a ~4% common share dividend that we believe is quite safe. We are maintaining our Market Perform rating and increasing our price target to \$33.50 (from \$33.00).

## Changes

**Annual EPS**  
2014E \$1.46 to \$1.53  
2015E \$1.94 to \$1.97

## Quarterly EPS

Q3/14E \$0.20 to \$0.19  
Q4/14E \$0.42 to \$0.43

## Target

\$33.00 to \$33.50

## Q1 – Back in the Groove

- **Maintaining Market Perform rating and increasing target price to \$33.50 (from \$33.00).** Fortis' first-quarter bottom-line results were above expectations (basic EPS of \$0.67 vs. our estimate of \$0.61 and Thomson One consensus of \$0.65) amid stronger contributions from Central Hudson (colder temperatures), above-average hydrology conditions in Belize, and lower corporate expense. With an earnings profile that has been largely lacklustre the last few years, Fortis has notably made strides on several fronts in Q1/14, not the least of which involves delivering consistent and stable earnings growth. Although we are maintaining a neutral stance on FTS, we believe the time to accumulate the stock is approaching as we are gaining increasing conviction that the pending UNS acquisition will close and that earnings momentum should accelerate beginning in 2015. In the meantime, investors are being paid to wait via a ~4% common share dividend that we believe is quite safe. We are maintaining our Market Perform rating and increasing our price target to \$33.50 (vs. \$33.00).
- **Capital program intact and should support continued dividend growth.** The company reaffirmed a capital expenditure budget of \$1.4 billion in 2014 (\$237M has been spent YTD) and \$6.5 billion during 2014-2018 (excluding an expected capital program of \$1.5 billion at UNS from 2015 to 2018). Notably, FTS' 335 MW Waneta hydroelectric project in B.C. (51% FTS) is on budget (\$603M of the \$900M gross has been invested) and still on track for an expected in-service date of spring 2015. Preliminary work has begun on the \$400M expansion of the Tilbury LNG facility in B.C. (adding a second LNG tank and a new liquefier), which is expected to be in service in 2016. In passing, the company noted that it is pursuing additional LNG opportunities that are not currently reflected in the company's capital program, including a pipeline expansion (rate base investment) for the proposed Woodfibre LNG site in B.C.
- **UNS Energy acquisition still expected to close by the end of 2014.** FTS' US\$4.3 billion acquisition of UNS Energy was approved by shareholders in March 2014 and the Federal Energy Regulatory Commission in April 2014. In April 2014, Commission Staff and other intervenors filed direct testimony that indicated that they would support the merger subject to a number of conditions. A settlement agreement is expected to be filed on May 16, 2014, with a hearing currently scheduled for June 16, 2014. Assuming Arizona Corporation Commission approval, FTS expects the UNS Energy acquisition to close by the end of 2014.
- **Key regulatory updates:**
  - **Proposed Performance-Based Regulation plans in B.C. expected to be approved in H2/14:** A decision on FortisBC Energy and FortisBC Electric's 2014-2018 PBR plans are expected in H2/14.
  - **Regulatory approval received for amalgamation of FortisBC Energy Utilities:** Regulatory approval was received in February 2014, but the amalgamation must obtain the consent of the Lieutenant Governor in Council to be effective on December 31, 2014. Upon amalgamation, the allowed ROE and equity component of capital structure for the amalgamated entity will be set the same as Fortis BC Energy (allowed ROE of 8.75% and deemed equity of 38.5%).

- **2013 Alberta Generic Cost of Capital Review:** It is our understanding that a hearing has been set for late May, while a decision is not expected until the end of 2014.
- **FortisAlberta 2013-2015 Capital Tracker Applications expected for May:** The re-filing of FortisAlberta's 2013 Capital Tracker Application and the filing of 2014/15 Capital Tracker Applications are expected to take place in May 2014. It is unclear when a decision will be received on the combined multi-year capital tracker applications.
- **Central Hudson General Rate Application slated for H2/14:** Central Hudson plans to file its rate application during the second half of 2014, while a decision is expected during the first half of 2015.
- **Raising estimates.** We have updated our estimates to reflect Q1/14 results, the assumption of a higher USD (vs. CAD), and the information contained in the quarterly release. We have increased our 2014 EPS estimate (fd) for FTS to \$1.53 (vs. \$1.46) and our 2015 EPS estimate (fd) to \$1.97 (vs. \$1.94). Note that our 2014 estimate includes the convertible debenture cost (after-tax) associated with the UNS Energy acquisition (~\$0.23/sh).
- **Valuation.** At current levels, FTS is trading at 21.2x our 2014E EPS (vs. peer range of 16.7-17.6x) and 16.4x our 2015E EPS (vs. peer range of 16.1-18.1x). Our revised target price of \$33.50 (from \$33.00) is still based on 17.0x our 2015E EPS (fd) estimate, which is below its 10-year historical average of ~18.3x, reflecting FTS' increased exposure to U.S. utilities (which have tended to trade at lower valuations than Canadian-domiciled utilities) and uncertainty over regulatory approval and timing of the UNS acquisition. Based on FTS' relative return to our target price compared to the other companies we cover in the regulated utility segment of our coverage space, we continue to rate FTS shares Market Perform.

#### Exhibit 1: Calculation of Our Target Price

FTS Valuation	Multiple	2013E	2014E	2015E	
Adj. EPS (f.d)		\$1.66	\$1.53	\$1.97

	\$31.50	\$32.50	\$33.50	\$34.50	\$35.50

Source: BMO Capital Markets

- **First-quarter results.** Fortis reported basic EPS of \$0.67, above Thomson One consensus of \$0.65 and our estimate of \$0.61. Results included \$5M (\$0.02/sh) in discontinued operations associated with Griffith Energy Services, which was sold in March 2014. The EPS variance versus our estimate was driven primarily by stronger-than-expected results from Central Hudson (colder temperatures; \$0.02), non-regulated generation (higher rainfall in Belize; \$0.01) and lower corporate expense (foreign exchange gains; \$0.03). For a further run-down of FTS' first-quarter results, please see Exhibit 2. Our quarterly and annual estimates are set out in Exhibit 4 and 5.

**General Disclaimer**

BMO Capital Markets” is a trade name used by the BMO Investment Banking Group, which includes the wholesale arm of Bank of Montreal and its subsidiaries BMO Nesbitt Burns Inc., BMO Capital Markets Ltd. in the U.K. and BMO Capital Markets Corp. in the U.S. BMO Nesbitt Burns Inc., BMO Capital Markets Ltd. and BMO Capital Markets Corp are affiliates. Bank of Montreal or its subsidiaries (“BMO Financial Group”) has lending arrangements with, or provide other remunerated services to, many issuers covered by BMO Capital Markets. The opinions, estimates and projections contained in this report are those of BMO Capital Markets as of the date of this report and are subject to change without notice. BMO Capital Markets endeavours to ensure that the contents have been compiled or derived from sources that we believe are reliable and contain information and opinions that are accurate and complete. However, BMO Capital Markets makes no representation or warranty, express or implied, in respect thereof, takes no responsibility for any errors and omissions contained herein and accepts no liability whatsoever for any loss arising from any use of, or reliance on, this report or its contents. Information may be available to BMO Capital Markets or its affiliates that is not reflected in this report. The information in this report is not intended to be used as the primary basis of investment decisions, and because of individual client objectives, should not be construed as advice designed to meet the particular investment needs of any investor. This material is for information purposes only and is not an offer to sell or the solicitation of an offer to buy any security. BMO Capital Markets or its affiliates will buy from or sell to customers the securities of issuers mentioned in this report on a principal basis. BMO Capital Markets or its affiliates, officers, directors or employees have a long or short position in many of the securities discussed herein, related securities or in options, futures or other derivative instruments based thereon. The reader should assume that BMO Capital Markets or its affiliates may have a conflict of interest and should not rely solely on this report in evaluating whether or not to buy or sell securities of issuers discussed herein.

**Additional Matters**

To Canadian Residents: BMO Nesbitt Burns Inc. furnishes this report to Canadian residents and accepts responsibility for the contents herein subject to the terms set out above. Any Canadian person wishing to effect transactions in any of the securities included in this report should do so through BMO Nesbitt Burns Inc.

The following applies if this research was prepared in whole or in part by Andrew Breichmanas, Iain Reid, Tony Robson, David Round, Edward Sterck or Brendan Warn: This research is not prepared subject to Canadian disclosure requirements. This research is prepared by BMO Capital Markets Limited and subject to the regulations of the Financial Conduct Authority (FCA) in the United Kingdom. FCA regulations require that a firm providing research disclose its ownership interest in the issuer that is the subject of the research if it and its affiliates own 5% or more of the equity of the issuer. Canadian regulations require that a firm providing research disclose its ownership interest in the issuer that is the subject of the research if it and its affiliates own 1% or more of the equity of the issuer that is the subject of the research. Therefore BMO Capital Markets Limited will only disclose its and its affiliates ownership interest in the subject issuer if such ownership exceeds 5% of the equity of the issuer.

To U.S. Residents: BMO Capital Markets Corp. furnishes this report to U.S. residents and accepts responsibility for the contents herein, except to the extent that it refers to securities of Bank of Montreal. Any U.S. person wishing to effect transactions in any security discussed herein should do so through BMO Capital Markets Corp.

To U.K. Residents: In the UK this document is published by BMO Capital Markets Limited which is authorised and regulated by the Financial Conduct Authority. The contents hereof are intended solely for the use of, and may only be issued or passed on to, (I) persons who have professional experience in matters relating to investments falling within Article 19(5) of the Financial Services and Markets Act 2000 (Financial Promotion) Order 2005 (the “Order”) or (II) high net worth entities falling within Article 49(2)(a) to (d) of the Order (all such persons together referred to as “relevant persons”). The contents hereof are not intended for the use of and may not be issued or passed on to, retail clients.

Unauthorized reproduction, distribution, transmission or publication without the prior written consent of BMO Capital Markets is strictly prohibited.

## CEO Stanley Marshall to Retire; CFO Barry Perry to Take the Lead

Stanley Marshall will retire on December 31, 2014. Barry Perry has been appointed as his successor.

### Our View:

- We see this development as neutral for the FTS shares. Although we did not expect an imminent announcement, the retirement of Stanley Marshall, age 63, is not a surprise, in our opinion. We view Barry Perry as a very capable leader, having served as vice president, finance and chief financial officer of Fortis since January 2004 and previously vice president, finance and CFO of Newfoundland Power (100% Fortis) since April 2000, when he joined the firm.
- We expect a smooth CEO transition. Mr. Perry is well known to the investment community and was frequently in front of investors through non-deal road shows and conferences, and was highly involved with his investor relations team. In our minds, Mr. Perry constitutes a seasoned leader with a safe pair of hands and we have strong confidence in his ability to execute and deliver continued consistent and predictable earnings growth at FTS.
- In terms of timing, Mr. Marshall will retire as president and chief executive officer on December 31, 2014, and will remain on the board of directors until his retirement. As part of the transition, Mr. Marshall will relinquish his role as president to Mr. Perry on June 30, 2014. We wish all the best to Mr. Marshall in his next phase of personal and business endeavours.
- At current levels, FTS is trading at 21.3x our 2014E EPS (vs. peer range of 16.6-17.5x) and 16.5x our 2015E EPS (vs. peer range of 15.9-18.0x).

This report was prepared by an analyst(s) employed by BMO Nesbitt Burns Inc., and who is (are) not registered as a research analyst(s) under FINRA rules. For disclosure statements, including the Analyst's Certification, please refer to pages 2 to 5.

"BMO Capital Markets" is a trade name used by the BMO Investment Banking Group, which includes the wholesale arm of Bank of Montreal and its subsidiaries BMO Nesbitt Burns Inc., BMO Capital Markets Ltd. in the U.K. and BMO Capital Markets Corp. in the U.S. BMO Nesbitt Burns Inc., BMO Capital Markets Ltd. and BMO Capital Markets Corp are affiliates. Bank of Montreal or its subsidiaries ("BMO Financial Group") has lending arrangements with, or provide other remunerated services to, many issuers covered by BMO Capital Markets. The opinions, estimates and projections contained in this report are those of BMO Capital Markets as of the date of this report and are subject to change without notice. BMO Capital Markets endeavours to ensure that the contents have been compiled or derived from sources that we believe are reliable and contain information and opinions that are accurate and complete. However, BMO Capital Markets makes no representation or warranty, express or implied, in respect thereof, takes no responsibility for any errors and omissions contained herein and accepts no liability whatsoever for any loss arising from any use of, or reliance on, this report or its contents. Information may be available to BMO Capital Markets or its affiliates that is not reflected in this report. The information in this report is not intended to be used as the primary basis of investment decisions, and because of individual client objectives, should not be construed as advice designed to meet the particular investment needs of any investor. This material is for information purposes only and is not an offer to sell or the solicitation of an offer to buy any security. BMO Capital Markets or its affiliates will buy from or sell to customers the securities of issuers mentioned in this report on a principal basis. BMO Capital Markets or its affiliates, officers, directors or employees have a long or short position in many of the securities discussed herein, related securities or in options, futures or other derivative instruments based thereon. The reader should assume that BMO Capital Markets or its affiliates may have a conflict of interest and should not rely solely on this report in evaluating whether or not to buy or sell securities of issuers discussed herein.

**Additional Matters**

To Canadian Residents: BMO Nesbitt Burns Inc. furnishes this report to Canadian residents and accepts responsibility for the contents herein subject to the terms set out above. Any Canadian person wishing to effect transactions in any of the securities included in this report should do so through BMO Nesbitt Burns Inc.

The following applies if this research was prepared in whole or in part by Andrew Breichmanas, Iain Reid, Tony Robson, David Round, Edward Sterck or Brendan Warn: This research is not prepared subject to Canadian disclosure requirements. This research is prepared by BMO Capital Markets Limited and subject to the regulations of the Financial Conduct Authority (FCA) in the United Kingdom. FCA regulations require that a firm providing research disclose its ownership interest in the issuer that is the subject of the research if it and its affiliates own 5% or more of the equity of the issuer. Canadian regulations require that a firm providing research disclose its ownership interest in the issuer that is the subject of the research if it and its affiliates own 1% or more of the equity of the issuer that is the subject of the research. Therefore BMO Capital Markets Limited will only disclose its and its affiliates ownership interest in the subject issuer if such ownership exceeds 5% of the equity of the issuer.

To U.S. Residents: BMO Capital Markets Corp. furnishes this report to U.S. residents and accept responsibility for the contents herein, except to the extent that it refers to securities of Bank of Montreal. Any U.S. person wishing to effect transactions in any security discussed herein should do so through BMO Capital Markets Corp.

To U.K. Residents: In the UK this document is published by BMO Capital Markets Limited which is authorised and regulated by the Financial Conduct Authority. The contents hereof are intended solely for the use of, and may only be issued or passed on to, (I) persons who have professional experience in matters relating to investments falling within Article 19(5) of the Financial Services and Markets Act 2000 (Financial Promotion) Order 2005 (the "Order") or (II) high net worth entities falling within Article 49(2)(a) to (d) of the Order (all such persons together referred to as "relevant persons"). The contents hereof are not intended for the use of and may not be issued or passed on to, retail clients.

Unauthorized reproduction, distribution, transmission or publication without the prior written consent of BMO Capital Markets is strictly prohibited.

## Settlement Agreement Filed for Proposed UNS Energy Acquisition

On May 16, UNS Energy, Fortis, Arizona Public Corporation (ACC) Staff, the Residential Utility Consumer Office and other interested parties entered into a [settlement agreement](#) for the proposed UNS Energy acquisition by Fortis. The parties agreed that the acquisition would be in the public interest and recommended the ACC Commission approve the transaction, subject to certain conditions. These conditions include, but are not limited to the following: (i) US\$30 million of customer benefits over five years; (ii) a US\$220M equity injection into UNS Energy upon transaction close; (iii) the adoption of certain ring-fencing and corporate governance provisions; and (iv) maintaining the current level of UNS utility employees for at least four years following transaction close.

### Our View:

- Overall, the settlement agreement did not reveal any earth-shattering revelations in our opinion and largely mirrored the recommended conditions (with some adjustments to the level of customer benefits) highlighted during the intervener testimony period. We also believe the conditions to merger approval appear reasonable and are manageable by Fortis.
- The next steps in the merger review process include testimony in support/opposition to the settlement, a June 16 hearing, an administrative law judge decision, and finally a Commission decision.
- Aside from Commission approval, the acquisition is subject to the expiration or termination of the applicable waiting period under the Hart-Scott-Rodino Antitrust Improvements Act of 1976, the review of the Merger by the Committee on Foreign Investment in the United States, and the satisfaction of other customary closing conditions. Fortis still expects the acquisition of UNS Energy to close by the end of 2014.

This report was prepared by an analyst(s) employed by BMO Nesbitt Burns Inc., and who is (are) not registered as a research analyst(s) under FINRA rules. For disclosure statements, including the Analyst's Certification, please refer to pages 2 to 5.
