**2013-2014 capital program approved under PBR.** The Alberta Utilities Commission issued a decision that FortisAlberta's capital tracker programs in 2013-2015 met the required criteria as set out in the original PBR decision, and as such, the company's capital programs were approved as filed and approximately \$10 million was recognized in Q1/15 that related to 2013 and 2014 capital expenditures. The approved capital program was incorporated into FortisAlberta's capital tracker compliance filing, and a decision on the capital tracker compliance filing is expected in H2/15.

**Estimates Unchanged.** Although we made minor changes within the business segments to reflect the Q1/15 results and the sale of the small power facilities, we remain comfortable with our 2015 and 2016 EPS estimates of \$2.06 and \$2.22, respectively.

**Valuation.** Our \$44.00 price target (unchanged) is based on a P/E of 20x applied to the forward EPS. A 20x multiple is consistent with the regulated utility peer group.

## Target/Upside/Downside Scenarios

Exhibit 1: Fortis Inc.

Source: Bloomberg and RBC Capital Markets estimates for Upside/Downside/Target

### Target price/base case

Our \$44.00 price target is based on a P/E of 20x applied to the forward EPS. A 20x multiple is consistent with the regulated utility peer group. A 20x P/E would be at the high end, but not a record high, for valuation, and we see this multiple well supported by historically low 10-year bond yields and a growth outlook that is generally stronger than most periods over the past 10 years.

### Upside scenario

For our upside scenario of \$50.00, we assume that P/E valuations fully reflect the level of long-term interest rates, which we see as providing roughly 1.5x upside in the P/E multiple. Furthermore, our upside scenario includes the LNG-related rate base spending comes to fruition.

### Downside scenario

For our downside scenario of \$33.00, we assume a 200 basis point increase in interest rates, which we believe could translate into an almost 5x downside in the P/E multiple.

## Investment summary

We expect Fortis's shares to outperform other Energy Infrastructure companies in our coverage universe for the following reasons:

**Good defensive investment.** Against the backdrop of oil price weakness and general market volatility, we believe that the historically wide valuation discount will begin to narrow resulting in better-expected relative performance for the Regulated Utility stocks. With more than 90% of 2015 earnings expected to come from regulated and/or long-term contracted utility infrastructure, we believe that the stock is at an inflection point for EPS and dividend growth given the combination of continued above average rate base growth in its Western Canadian utilities, the accretive UNS acquisition, and a stabilization for regulated ROEs.

**Entering a period of significant rate base growth.** The company is entering a period of significant organic growth, with the expected 5-year CAGR in rate base through 2019 expected to be 6.5%. We like that the expected rate base is driven by organic growth and any M&A activities in the future would result in additional upside.

**Additional upside from LNG optionality.** We like the upside optionality from the potential LNG-related infrastructure projects that could unfold over the course of the coming year. If the LNG projects come to fruition, Fortis' 5-year CAGR in rate base through 2019 could be as high as 7.5%.

**Potential catalysts:** Positive regulatory decision for capital tracker, and support for LNG related projects.

**Key risks:** The risk of punitive regulatory or government decisions, economic/tourism conditions in its service territories, operational or financial issues at newly acquired businesses, and acquisitions or projects that fail to gain the confidence of investors.

## Q1/15 results modestly higher-than-forecast

Fortis' Q1/15 normalized EPS was \$0.65, compared to our estimate of \$0.61 and \$0.68 in Q1/14. Consensus for the quarter was \$0.62 (seven estimates in the range of \$0.57 and \$0.66). The modestly higher-than-forecast earnings were mainly due to Canadian Regulated Utilities (largely due to the seasonality/timing of recognition of costs and deferral accounts). In aggregate the two U.S. utilities posted earnings that were in line with our expectations, although Central Hudson was ahead of expectations (energy efficiency incentives booked), while UNS was below expectations (mostly attributable to seasonality). All of the other segments were within +/- \$2 million of our estimate.

A summary of the Q1/15 normalized earnings is detailed in Exhibit 2.

Exhibit 2: Normalized earnings (in \$MM except per share figures)

## Highlights from the quarter

**Fortis Properties' strategic review expected to wrap up in Q2/15.** Fortis' strategic review for its real estate business continues and management stated that it expects to complete the evaluation in Q2/15. Management noted that if a decision were made to dispose of the segment, the proceeds would be applied to the permanent financing for the UNS acquisition.

**Sale of small power assets in New York and Ontario.** In March 2015, Fortis entered into an agreement to sell its non-regulated generation assets in upstate New York and Ontario. The sale of the generation assets in upstate New York and Ontario is expected to close in Q2/15 and H2/15, respectively.

**Waneta expansion completed.** Subsequent to the quarter, Fortis completed the construction of the \$900 million, 335 MW Waneta expansion. The project was completed ahead of schedule and on-budget. Fortis has a 51% controlling interest in the project. Lastly, the facility will operate under its 40-year power purchase agreement with B.C. Hydro.

## Major regulatory and other items of note

**Central Hudson filed a Joint Settlement Proposal in February.** Central Hudson reached a settlement agreement for a three-year period beginning July 1, 2015 reflecting a 9% ROE and a 48% common equity component. The Joint Settlement Proposal (JRP) was filed in February and is expected to go in front of the regulator in June. The JRP includes the continuation of certain mechanisms in place such as revenue decoupling. While the stated ROE is set to decline from the current 10% level, Central Hudson's earnings should increase partly due to previous additions to rate base that are not currently being recovered due to a rate freeze associated with Fortis' acquisition of Central Hudson.

**Negative GCOC not expected to have a material impact.** Subsequent to the quarter, the Alberta Utilities Commission (AUC) issued its Generic Cost of Capital (GCOC) decision, whereby the allowed ROE was reduced to 8.3% (down from 8.75%), effective for 2013-2015. As part of the GCOC decision, the equity thickness of FortisAlberta was reduced by 1%. The AUC also decided not to return to an automatic ROE adjustment formula going forward. It is important to note that for utilities under the PBR mechanisms (e.g., FortisAlberta), the revised allowed ROE and capital structure only applies to the portion of the revenue associated with the capital tracker amounts. Alberta has commenced a process to determine the generic cost of capital for 2016.

**Positive PBR decision received.** In March, the AUC also issued a decision that FortisAlberta's capital tracker programs in 2013-2015 met the required criteria as set out in the original PBR decision, and as such, the company's capital programs were approved as filed and approximately \$10 million was recognized in Q1/15 that related to 2013 and 2014 capital expenditures. FortisAlberta completed its capital tracker compliance filing, requesting that the adjustments to the capital tracker revenue be considered in the 2016 annual rates application. A decision on the capital tracker compliance filing is expected in H2/15.

**Newfoundland Power filed an application to defer its GRA.** During the quarter, Newfoundland Power filed an application with the Newfoundland and Labrador Board of Commissioners of Public Utilities (PUB) to defer the filing of its next general rate application (GRA) to on or before June 1, 2016 (current GRA required by June 1, 2015) and to request a 2016 cost recovery deferral of \$4 million. The application is currently under review by the PUB.

## Estimates unchanged

Although we made minor changes within the business segments to reflect the Q1/15 results, and the sale of the small power facilities, we remain comfortable with our 2015 and 2016 EPS estimates of \$2.06 and \$2.22, respectively.

Exhibit 3: Financial forecast (in \$MM except per share figures)

## Valuation

Our \$44.00 price target is based on a P/E of 20x applied to the forward EPS. A 20x multiple is consistent with the regulated utility peer group. A 20x P/E would be at the high end, but not a record high, for valuation, and we see this multiple well supported by historically low 10-year bond yields and a growth outlook that is generally stronger than most periods over the past 10 years.

## Price target impediments

Rejection of the UNS deal, the risk of punitive regulatory or government decisions, economic/tourism conditions in its service territories, operational or financial issues at newly acquired businesses, and acquisitions or projects that fail to gain the confidence of investors may have implications for our price target.

## Company description

Fortis Inc. is a utility holding company with regulated utilities in Canada (Newfoundland & Labrador, PEI, Ontario, Alberta, and B.C.), the U.S. (Arizona and New York) and the Caribbean (Cayman Islands and Turks & Caicos). The company also has non-regulated operations in power (Canada, U.S., and Belize) and real estate (commercial and hospitality in Canada).

## Required disclosures

### Non-U.S. analyst disclosure

Robert Kwan;Kelsey Roste (i) are not registered/qualified as research analysts with the NYSE and/or FINRA and (ii) may not be associated persons of the RBC Capital Markets, LLC and therefore may not be subject to FINRA Rule 2711 and NYSE Rule 472 restrictions on communications with a subject company, public appearances and trading securities held by a research analyst account.

### Conflicts disclosures

The analyst(s) responsible for preparing this research report received compensation that is based upon various factors, including total revenues of the member companies of RBC Capital Markets and its affiliates, a portion of which are or have been generated by investment banking activities of the member companies of RBC Capital Markets and its affiliates.

Please note that current conflicts disclosures may differ from those as of the publication date on, and as set forth in, this report. To access current conflicts disclosures, clients should refer to <https://www.rbccm.com/GLDisclosure/PublicWeb/DisclosureLookup.aspx?entityId=1> or send a request to RBC CM Research Publishing, P.O. Box 50, 200 Bay Street, Royal Bank Plaza, 29th Floor, South Tower, Toronto, Ontario M5J 2W7.

A member company of RBC Capital Markets or one of its affiliates managed or co-managed a public offering of securities for Fortis Inc. in the past 12 months.

A member company of RBC Capital Markets or one of its affiliates received compensation for investment banking services from Fortis Inc. in the past 12 months.

Royal Bank of Canada, together with its affiliates, beneficially owns 1 percent or more of a class of common equity securities of Fortis Inc..

A member company of RBC Capital Markets or one of its affiliates received compensation for products or services other than investment banking services from Fortis Inc. during the past 12 months. During this time, a member company of RBC Capital Markets or one of its affiliates provided non-securities services to Fortis Inc..

RBC Capital Markets is currently providing Fortis Inc. with non-investment banking securities-related services.

RBC Capital Markets is currently providing Fortis Inc. with non-securities services.

RBC Capital Markets has provided Fortis Inc. with investment banking services in the past 12 months.

RBC Capital Markets has provided Fortis Inc. with non-securities services in the past 12 months.

### Explanation of RBC Capital Markets Equity rating system

An analyst's 'sector' is the universe of companies for which the analyst provides research coverage. Accordingly, the rating assigned to a particular stock represents solely the analyst's view of how that stock will perform over the next 12 months relative to the analyst's sector average. Although RBC Capital Markets' ratings of Top Pick (TP)/Outperform (O), Sector Perform (SP), and Underperform (U) most closely correspond to Buy, Hold/Neutral and Sell, respectively, the meanings are not the same because our ratings are determined on a relative basis.

#### Ratings

**Top Pick (TP):** Represents analyst's best idea in the sector; expected to provide significant absolute total return over 12 months with a favorable risk-reward ratio.

**Outperform (O):** Expected to materially outperform sector average over 12 months.

**Sector Perform (SP):** Returns expected to be in line with sector average over 12 months.

**Underperform (U):** Returns expected to be materially below sector average over 12 months.

#### Risk Rating

As of March 31, 2013, RBC Capital Markets suspends its Average and Above Average risk ratings. The **Speculative** risk rating reflects a security's lower level of financial or operating predictability, illiquid share trading volumes, high balance sheet leverage, or limited operating history that result in a higher expectation of financial and/or stock price volatility.

## Distribution of ratings

For the purpose of ratings distributions, regulatory rules require member firms to assign ratings to one of three rating categories - Buy, Hold/Neutral, or Sell - regardless of a firm's own rating categories. Although RBC Capital Markets' ratings of Top Pick(TP)/ Outperform (O), Sector Perform (SP), and Underperform (U) most closely correspond to Buy, Hold/Neutral and Sell, respectively, the meanings are not the same because our ratings are determined on a relative basis (as described below).

Distribution of ratings				
RBC Capital Markets, Equity Research				
As of 31-Mar-2015				
Rating	Count	Percent	Investment Banking	
			Serv./Past 12 Mos.	
			Count	Percent
BUY [Top Pick & Outperform]	909	52.33	280	30.80
HOLD [Sector Perform]	713	41.05	125	17.53
SELL [Underperform]	115	6.62	5	4.35

References to a Recommended List in the recommendation history chart may include one or more recommended lists or model portfolios maintained by RBC Wealth Management or one of its affiliates. RBC Wealth Management recommended lists include the Guided Portfolio: Prime Income (RL 6), the Guided Portfolio: Large Cap (RL 7), the Guided Portfolio: Dividend Growth (RL 8), the Guided Portfolio: Midcap 111 (RL 9), the Guided Portfolio: ADR (RL 10), and the Guided Portfolio: Global Equity (U.S.) (RL 11). RBC Capital Markets recommended lists include the Strategy Focus List and the Fundamental Equity Weightings (FEW) portfolios. The abbreviation 'RL On' means the date a security was placed on a Recommended List. The abbreviation 'RL Off' means the date a security was removed from a Recommended List.

## Equity valuation and risks

For valuation methods used to determine, and risks that may impede achievement of, price targets for covered companies, please see the most recent company-specific research report at <https://www.rbcinsight.com> or send a request to RBC Capital Markets Research Publishing, P.O. Box 50, 200 Bay Street, Royal Bank Plaza, 29th Floor, South Tower, Toronto, Ontario M5J 2W7.

## Conflicts policy

RBC Capital Markets Policy for Managing Conflicts of Interest in Relation to Investment Research is available from us on request. To access our current policy, clients should refer to

or send a request to RBC Capital Markets Research Publishing, P.O. Box 50, 200 Bay Street, Royal Bank Plaza, 29th Floor, South Tower, Toronto, Ontario M5J 2W7. We reserve the right to amend or supplement this policy at any time.

## Dissemination of research and short-term trade ideas

RBC Capital Markets endeavors to make all reasonable efforts to provide research simultaneously to all eligible clients, having regard to local time zones in overseas jurisdictions. RBC Capital Markets' equity research is posted to our proprietary website to ensure eligible clients receive coverage initiations and changes in ratings, targets and opinions in a timely manner. Additional distribution may be done by the sales personnel via email, fax, or other electronic means, or regular mail. Clients may also receive our research via third party vendors. RBC Capital Markets also provides eligible clients with access to SPARC on the Firms proprietary INSIGHT website, via email and via third-party vendors. SPARC contains market color and commentary regarding subject companies on which the Firm currently provides equity research coverage. Research Analysts may, from time to time, include short-term trade ideas in research reports and / or in SPARC. A short-term trade idea offers a short-term view on how a security may trade, based on market and trading events, and the resulting trading opportunity that may be available. A short-term trade idea may differ from the price targets and recommendations in our published research reports reflecting the research analyst's views of the longer-term (one year) prospects of the subject company, as a result of the differing time horizons, methodologies and/or other factors. Thus, it is possible that a subject company's common equity that is considered a long-term 'Sector Perform' or even an 'Underperform' might present a short-term buying opportunity as a result of temporary selling pressure in the market; conversely, a subject company's common equity rated a long-term 'Outperform' could be considered susceptible to a short-term downward price correction. Short-term trade ideas are not ratings, nor are they part of any ratings system, and the firm generally does not intend, nor undertakes any obligation, to maintain or update short-term trade ideas. Short-term trade ideas may not be suitable for all investors and have not been tailored to individual investor circumstances and objectives, and investors should make their own independent decisions regarding any securities or strategies discussed herein. Please contact your investment advisor or institutional salesperson for more information regarding RBC Capital Markets' research.

## Analyst certification

## Fortis Inc.

### Sale of Commercial Real Estate Portfolio for \$430 million

**Our view:** Neutral – With the release of its Q1/15 results, management stated that the strategic review of its real estate business was expected to be wrapped up in Q2, and we therefore believe that a sale was largely expected by the market.

#### Key points:

**Strategic review results in the sale of the commercial real estate portfolio.** Fortis announced the sale of its commercial real estate portfolio for total proceeds of \$430 million. The sale was a result of a strategic review process for Fortis's real estate business segment. Subject to customary closing conditions, management expects the transaction to close in late Q2/15 or early Q3/15.

**The transaction appears to be roughly neutral to our EPS estimate.** Based on the 2014 annual disclosures, Properties' net operating income was \$55 million, of which 42% was attributable to the commercial real estate portfolio. After taking into consideration the proportionate income taxes, we estimate that the sale would result in a reduction of approximately \$17 million in earnings. Roughly offsetting the divested earnings is expected interest savings based on the purchase price of \$430 million and the assumed repayment of debt.

**The hotel business continues to be evaluated.** Management noted that the strategic review for the hotel business is still ongoing. We expect that the company may also sell its hotel business portfolio, as it has been messaging that its focus is on the core utility business. However, management did not provide an updated time line for that strategic review to be completed.

**Estimates unchanged.** Given that we expect the sale to be roughly neutral to earnings, we remain comfortable with our 2015 and 2016 EPS estimates of \$2.06 and \$2.22, respectively.

**Valuation.** Our \$44.00 price target (unchanged) is based on a P/E of 20x applied to the forward EPS. A 20x multiple is consistent with the regulated utility peer group. A 20x P/E would be at the high end, but not a record high, for valuation, and we see this multiple well supported by historically low 10-year bond yields and a growth outlook that is generally stronger than most periods over the last 10 years.

## Target/Upside/Downside Scenarios

Exhibit 1: Fortis Inc.

Source: Bloomberg and RBC Capital Markets estimates for Upside/Downside/Target

### Target price/base case

Our \$44.00 price target is based on a P/E of 20x applied to the forward EPS. A 20x multiple is consistent with the regulated utility peer group. A 20x P/E would be at the high end, but not a record high, for valuation, and we see this multiple well supported by historically low 10-year bond yields and a growth outlook that is generally stronger than most periods over the last 10 years.

### Upside scenario

For our upside scenario of \$50.00, we assume that P/E valuations fully reflect the level of long-term interest rates, which we see as providing roughly 1.5x upside in the P/E multiple. Furthermore, our upside scenario includes the LNG-related rate base spending comes to fruition.

### Downside scenario

For our downside scenario of \$33.00, we assume a 200 basis point increase in interest rates, which we believe could translate into an almost 5x downside in the P/E multiple.

## Investment summary

We expect Fortis's shares to outperform other Energy Infrastructure companies in our coverage universe for the following reasons:

**Good defensive investment.** Against the backdrop of oil price weakness and general market volatility, we believe that the historically wide valuation discount will begin to narrow resulting in better-expected relative performance for the Regulated Utility stocks. With more than 90% of 2015 earnings expected to come from regulated and/or long-term contracted utility infrastructure, we believe that the stock is at an inflection point for EPS and dividend growth given the combination of continued above average rate base growth in its Western Canadian utilities, the accretive UNS acquisition, and a stabilization for regulated ROEs.

**Entering a period of significant rate base growth.** The company is entering a period of significant organic growth, with the expected 5-year CAGR in rate base through 2019 expected to be 6.5%. We like that the expected rate base is driven by organic growth and any M&A activities in the future would result in additional upside.

**Additional upside from LNG optionality.** We like the upside optionality from the potential LNG-related infrastructure projects that could unfold over the course of the coming year. If the LNG projects come to fruition, Fortis' 5-year CAGR in rate base through 2019 could be as high as 7.5%.

**Potential catalysts:** LNG related projects proceeding

**Key risks:** The risk of punitive regulatory or government decisions, economic/tourism conditions in its service territories, operational or financial issues at newly acquired businesses, and acquisitions or projects that fail to gain the confidence of investors.

### Valuation

Our \$44.00 price target is based on a P/E of 20x applied to the forward EPS. A 20x multiple is consistent with the regulated utility peer group. A 20x P/E would be at the high end, but not a record high, for valuation, and we see this multiple well supported by historically low 10-year bond yields and a growth outlook that is generally stronger than most periods over the last 10 years.

### Price target impediments

Rejection of the UNS deal, the risk of punitive regulatory or government decisions, economic/tourism conditions in its service territories, operational or financial issues at newly acquired businesses, and acquisitions or projects that fail to gain the confidence of investors may have implications for our price target.

### Company description

Fortis Inc. is a utility holding company with regulated utilities in Canada (Newfoundland & Labrador, PEI, Ontario, Alberta, and B.C.), the U.S. (Arizona and New York) and the Caribbean (Cayman Islands and Turks & Caicos). The company also has non-regulated operations in power (Canada, U.S., and Belize) and real estate (commercial and hospitality in Canada).

## Required disclosures

### Non-U.S. analyst disclosure

Robert Kwan and Kelsey Roste (i) are not registered/qualified as research analysts with the NYSE and/or FINRA and (ii) may not be associated persons of the RBC Capital Markets, LLC and therefore may not be subject to FINRA Rule 2711 and NYSE Rule 472 restrictions on communications with a subject company, public appearances and trading securities held by a research analyst account.

### Conflicts disclosures

The analyst(s) responsible for preparing this research report received compensation that is based upon various factors, including total revenues of the member companies of RBC Capital Markets and its affiliates, a portion of which are or have been generated by investment banking activities of the member companies of RBC Capital Markets and its affiliates.

Please note that current conflicts disclosures may differ from those as of the publication date on, and as set forth in, this report. To access current conflicts disclosures, clients should refer to <https://www.rbccm.com/GLDisclosure/PublicWeb/DisclosureLookup.aspx?entityId=1> or send a request to RBC CM Research Publishing, P.O. Box 50, 200 Bay Street, Royal Bank Plaza, 29th Floor, South Tower, Toronto, Ontario M5J 2W7.

A member company of RBC Capital Markets or one of its affiliates managed or co-managed a public offering of securities for Fortis Inc. in the past 12 months.

A member company of RBC Capital Markets or one of its affiliates received compensation for investment banking services from Fortis Inc. in the past 12 months.

Royal Bank of Canada, together with its affiliates, beneficially owns 1 percent or more of a class of common equity securities of Fortis Inc..

RBC Capital Markets is currently providing Fortis Inc. with non-investment banking securities-related services.

RBC Capital Markets is currently providing Fortis Inc. with non-securities services.

RBC Capital Markets has provided Fortis Inc. with investment banking services in the past 12 months.

### Explanation of RBC Capital Markets Equity rating system

An analyst's 'sector' is the universe of companies for which the analyst provides research coverage. Accordingly, the rating assigned to a particular stock represents solely the analyst's view of how that stock will perform over the next 12 months relative to the analyst's sector average. Although RBC Capital Markets' ratings of Top Pick (TP)/Outperform (O), Sector Perform (SP), and Underperform (U) most closely correspond to Buy, Hold/Neutral and Sell, respectively, the meanings are not the same because our ratings are determined on a relative basis.

#### Ratings

**Top Pick (TP):** Represents analyst's best idea in the sector; expected to provide significant absolute total return over 12 months with a favorable risk-reward ratio.

**Outperform (O):** Expected to materially outperform sector average over 12 months.

**Sector Perform (SP):** Returns expected to be in line with sector average over 12 months.

**Underperform (U):** Returns expected to be materially below sector average over 12 months.

#### Risk Rating

As of March 31, 2013, RBC Capital Markets suspends its Average and Above Average risk ratings. The **Speculative** risk rating reflects a security's lower level of financial or operating predictability, illiquid share trading volumes, high balance sheet leverage, or limited operating history that result in a higher expectation of financial and/or stock price volatility.

## Distribution of ratings

For the purpose of ratings distributions, regulatory rules require member firms to assign ratings to one of three rating categories - Buy, Hold/Neutral, or Sell - regardless of a firm's own rating categories. Although RBC Capital Markets' ratings of Top Pick(TP)/ Outperform (O), Sector Perform (SP), and Underperform (U) most closely correspond to Buy, Hold/Neutral and Sell, respectively, the meanings are not the same because our ratings are determined on a relative basis (as described below).

Distribution of ratings				
RBC Capital Markets, Equity Research				
As of 31-Mar-2015				
Rating	Count	Percent	Investment Banking	
			Serv./Past 12 Mos.	
			Count	Percent
BUY [Top Pick & Outperform]	909	52.33	280	30.80
HOLD [Sector Perform]	713	41.05	125	17.53
SELL [Underperform]	115	6.62	5	4.35

References to a Recommended List in the recommendation history chart may include one or more recommended lists or model portfolios maintained by RBC Wealth Management or one of its affiliates. RBC Wealth Management recommended lists include the Guided Portfolio: Prime Income (RL 6), the Guided Portfolio: Large Cap (RL 7), the Guided Portfolio: Dividend Growth (RL 8), the Guided Portfolio: Midcap 111 (RL 9), the Guided Portfolio: ADR (RL 10), and the Guided Portfolio: Global Equity (U.S.) (RL 11). RBC Capital Markets recommended lists include the Strategy Focus List and the Fundamental Equity Weightings (FEW) portfolios. The abbreviation 'RL On' means the date a security was placed on a Recommended List. The abbreviation 'RL Off' means the date a security was removed from a Recommended List.

## Equity valuation and risks

For valuation methods used to determine, and risks that may impede achievement of, price targets for covered companies, please see the most recent company-specific research report at <https://www.rbcinsight.com> or send a request to RBC Capital Markets Research Publishing, P.O. Box 50, 200 Bay Street, Royal Bank Plaza, 29th Floor, South Tower, Toronto, Ontario M5J 2W7.

## Conflicts policy

RBC Capital Markets Policy for Managing Conflicts of Interest in Relation to Investment Research is available from us on request. To access our current policy, clients should refer to

or send a request to RBC Capital Markets Research Publishing, P.O. Box 50, 200 Bay Street, Royal Bank Plaza, 29th Floor, South Tower, Toronto, Ontario M5J 2W7. We reserve the right to amend or supplement this policy at any time.

## Dissemination of research and short-term trade ideas

RBC Capital Markets endeavors to make all reasonable efforts to provide research simultaneously to all eligible clients, having regard to local time zones in overseas jurisdictions. RBC Capital Markets' equity research is posted to our proprietary website to ensure eligible clients receive coverage initiations and changes in ratings, targets and opinions in a timely manner. Additional distribution may be done by the sales personnel via email, fax, or other electronic means, or regular mail. Clients may also receive our research via third party vendors. RBC Capital Markets also provides eligible clients with access to SPARC on the Firms proprietary INSIGHT website, via email and via third-party vendors. SPARC contains market color and commentary regarding subject companies on which the Firm currently provides equity research coverage. Research Analysts may, from time to time, include short-term trade ideas in research reports and / or in SPARC. A short-term trade idea offers a short-term view on how a security may trade, based on market and trading events, and the resulting trading opportunity that may be available. A short-term trade idea may differ from the price targets and recommendations in our published research reports reflecting the research analyst's views of the longer-term (one year) prospects of the subject company, as a result of the differing time horizons, methodologies and/or other factors. Thus, it is possible that a subject company's common equity that is considered a long-term 'Sector Perform' or even an 'Underperform' might present a short-term buying opportunity as a result of temporary selling pressure in the market; conversely, a subject company's common equity rated a long-term 'Outperform' could be considered susceptible to a short-term downward price correction. Short-term trade ideas are not ratings, nor are they part of any ratings system, and the firm generally does not intend, nor undertakes any obligation, to maintain or update short-term trade ideas. Short-term trade ideas may not be suitable for all investors and have not been tailored to individual investor circumstances and objectives, and investors should make their own independent decisions regarding any securities or strategies discussed herein. Please contact your investment advisor or institutional salesperson for more information regarding RBC Capital Markets' research.

## Analyst certification

## Fortis Inc.

### Notes from the road; Central Hudson rate plan approved

**Our view:** We recently hosted meetings with Karl Smith (CFO), which reinforced our confidence in the organic utility rate base growth story with LNG-related upside, paired with an enhanced story around capital efficiency. We continue to favourably view Fortis's shares as a way to participate in what we consider to be attractive dividend growth driven by below average risk regulated utility rate base growth.

#### Key points:

**Organic rate base growth remains the key driver through 2019.** Fortis expects to spend \$9 billion between 2015 and 2019 in its regulated utility operations, which is expected to drive a 6.5% rate base CAGR. The components of the growth capex program are all relatively small projects, with the largest being Tilbury Phase 1A (\$328 million), which is already under construction and expected to be in service by the end of 2016.

#### LNG-related upside could drive rate base growth up to a 7.5% CAGR.

Tilbury Phase 1B (roughly \$450 million) to primarily serve Hawaiian Electric (conditional contract) and a pipeline (approximately \$600 million) to serve the proposed Woodfibre LNG terminal being pushed forward by a third-party would be additions to FortisBC Energy's regulated rate base.

**On track to exit the Properties business.** With the previously announced sale of the commercial real estate business being on track to close within the next several weeks, Fortis also appears to be poised to announce the divestiture of the hospitality portfolio in the relatively near term. A sale of the commercial and lodging real estate assets would mark the company's exit from the Properties segment and would result in almost all of the company's earnings being derived from regulated utilities and/or long-term contracts with utilities.

**We like the positive evolution of the capital efficiency story.** We like the decision to sell the real estate assets and use the proceeds to improve the credit metrics (repay UNS acquisition debt) rather than issuing more equity (common or preferred). Going forward, the company does not see a need for any common equity (outside of the DRIP) to finance the \$9 billion capex program.

**As expected, the Central Hudson 3-year rate settlement was approved by the regulator.** The New York State Public Service Commission approved the 3-year rate plan that includes US\$490 million of capital investments over the term, with a revenue requirement that also allows for the recovery of previously spent capital during the previous rate freeze following Fortis's acquisition. The equity thickness remains at 48% and the ROE declines to 9% (from 10%) per the settlement. Fortis can earn up to a 9.5% ROE and then share earnings with customers above that level based on specified thresholds. The rate order can be found [by clicking here](#).

## Target/Upside/Downside Scenarios

Exhibit 1: Fortis Inc.

Source: Bloomberg and RBC Capital Markets estimates for Upside/Downside/Target

### Target price/base case

Our \$44.00 price target is based on a P/E of 20x applied to the forward EPS. A 20x multiple is consistent with the regulated utility peer group. A 20x P/E would be at the high end, but not a record high, for valuation, and we see this multiple well supported by historically low 10-year bond yields and a growth outlook that is generally stronger than most periods over the last 10 years.

### Upside scenario

For our upside scenario of \$50.00, we assume that P/E valuations fully reflect the level of long-term interest rates, which we see as providing roughly 1.5x upside in the P/E multiple. Furthermore, our upside scenario includes the LNG-related rate base spending coming to fruition.

### Downside scenario

For our downside scenario of \$33.00, we assume a 200 basis point increase in interest rates, which we believe could translate into an almost 5x downside in the P/E multiple.

## Investment summary

We expect Fortis's shares to outperform other Energy Infrastructure companies in our coverage universe for the following reasons:

**Good defensive investment.** Against the backdrop of oil price weakness and general market volatility, we believe that the historically wide valuation discount will begin to narrow, resulting in better-expected relative performance for the Regulated Utility stocks. With more than 90% of 2015 earnings expected to come from regulated and/or long-term contracted utility infrastructure, we believe that the stock is at an inflection point for EPS and dividend growth given the combination of continued above average rate base growth in its Western Canadian utilities, the accretive UNS acquisition, and a stabilization for regulated ROEs.

**Entering a period of significant rate base growth.** The company is entering a period of significant organic growth, with the 5-year CAGR in rate base through 2019 expected to be 6.5%. We like that the expected rate base is driven by organic growth and any M&A activities in the future would result in additional upside.

**Additional upside from LNG optionality.** We like the upside optionality from the potential LNG-related infrastructure projects that could unfold over the course of the coming year. If the LNG projects come to fruition, Fortis's 5-year CAGR in rate base through 2019 could be as high as 7.5%.

**Potential catalysts:** LNG related projects proceeding

**Key risks:** The risk of punitive regulatory or government decisions, economic/tourism conditions in its service territories, operational or financial issues at newly acquired businesses, and acquisitions or projects that fail to gain the confidence of investors.

## Key messages

**Almost all of the assets are regulated (following the properties sale).** As shown in Exhibit 2, following the sale of the Properties division, almost all of the company's assets are regulated utilities.

**Geographic diversity reduces the risk of negative regulatory decisions.** As shown in Exhibit 3, no more than one-third of Fortis's assets are in any single jurisdiction, with the three largest segments being Arizona (31% of assets), B.C. (30%), and Alberta (14%). We see the geographic mix as diversifying against the risk of a negative decision from any one specific regulator.

**Solid rate base growth from regulated assets.** As shown in Exhibit 4, Fortis expects rate base to grow at a 6.5% CAGR through 2019, with the potential for a lift to a 7.5% CAGR if the Tilbury 1B project and the pipeline to serve Woodfibre LNG come to fruition.

Exhibit 2: Almost all of the assets are regulated (data as at March 31, 2015)

Source: Company reports

Exhibit 3: The geographic mix of assets is well-diversified (data as at March 31, 2015)

Source: Company reports

Exhibit 4: Attractive rate base growth forecast at a 6.5% CAGR for the base business with upside to a 7.5% CAGR with the LNG-related projects

(1) Rate base reflects midyear amounts and includes Waneta Expansion

Source: Company reports; RBC Capital Markets estimates

### Valuation

Our \$44.00 price target is based on a P/E of 20x applied to the forward EPS. A 20x multiple is consistent with the regulated utility peer group. A 20x P/E would be at the high end, but not a record high, for valuation, and we see this multiple well supported by historically low 10-year bond yields and a growth outlook that is generally stronger than most periods over the last 10 years.

### Price target impediments

Punitive regulatory or government decisions, economic/tourism conditions in its service territories, operational or financial issues at newly acquired businesses, and acquisitions or projects that fail to gain the confidence of investors may have implications for our price target.

### Company description

Fortis Inc. is a utility holding company with regulated utilities in Canada (Newfoundland & Labrador, PEI, Ontario, Alberta, and B.C.), the U.S. (Arizona and New York) and the Caribbean (Cayman Islands and Turks & Caicos). The company also has non-regulated operations in power (Canada, U.S., and Belize) and real estate (commercial and hospitality in Canada).

## Required disclosures

### Non-U.S. analyst disclosure

Robert Kwan (i) is not registered/qualified as a research analyst with the NYSE and/or FINRA and (ii) may not be associated persons of the RBC Capital Markets, LLC and therefore may not be subject to FINRA Rule 2711 and NYSE Rule 472 restrictions on communications with a subject company, public appearances and trading securities held by a research analyst account.

### Conflicts disclosures

The analyst(s) responsible for preparing this research report received compensation that is based upon various factors, including total revenues of the member companies of RBC Capital Markets and its affiliates, a portion of which are or have been generated by investment banking activities of the member companies of RBC Capital Markets and its affiliates.

Please note that current conflicts disclosures may differ from those as of the publication date on, and as set forth in, this report. To access current conflicts disclosures, clients should refer to <https://www.rbccm.com/GLDisclosure/PublicWeb/DisclosureLookup.aspx?entityId=1> or send a request to RBC CM Research Publishing, P.O. Box 50, 200 Bay Street, Royal Bank Plaza, 29th Floor, South Tower, Toronto, Ontario M5J 2W7.

A member company of RBC Capital Markets or one of its affiliates managed or co-managed a public offering of securities for Fortis Inc. in the past 12 months.

A member company of RBC Capital Markets or one of its affiliates received compensation for investment banking services from Fortis Inc. in the past 12 months.

Royal Bank of Canada, together with its affiliates, beneficially owns 1 percent or more of a class of common equity securities of Fortis Inc..

A member company of RBC Capital Markets or one of its affiliates received compensation for products or services other than investment banking services from Fortis Inc. during the past 12 months. During this time, a member company of RBC Capital Markets or one of its affiliates provided non-securities services to Fortis Inc..

RBC Capital Markets is currently providing Fortis Inc. with non-investment banking securities-related services.

RBC Capital Markets is currently providing Fortis Inc. with non-securities services.

RBC Capital Markets has provided Fortis Inc. with investment banking services in the past 12 months.

RBC Capital Markets has provided Fortis Inc. with non-investment banking securities-related services in the past 12 months.

RBC Capital Markets has provided Fortis Inc. with non-securities services in the past 12 months.

### Explanation of RBC Capital Markets Equity rating system

An analyst's 'sector' is the universe of companies for which the analyst provides research coverage. Accordingly, the rating assigned to a particular stock represents solely the analyst's view of how that stock will perform over the next 12 months relative to the analyst's sector average. Although RBC Capital Markets' ratings of Top Pick (TP)/Outperform (O), Sector Perform (SP), and Underperform (U) most closely correspond to Buy, Hold/Neutral and Sell, respectively, the meanings are not the same because our ratings are determined on a relative basis.

#### Ratings

**Top Pick (TP):** Represents analyst's best idea in the sector; expected to provide significant absolute total return over 12 months with a favorable risk-reward ratio.

**Outperform (O):** Expected to materially outperform sector average over 12 months.

**Sector Perform (SP):** Returns expected to be in line with sector average over 12 months.

**Underperform (U):** Returns expected to be materially below sector average over 12 months.

#### Risk Rating

As of March 31, 2013, RBC Capital Markets suspends its Average and Above Average risk ratings. The **Speculative** risk rating reflects a security's lower level of financial or operating predictability, illiquid share trading volumes, high balance sheet leverage, or limited operating history that result in a higher expectation of financial and/or stock price volatility.

## Distribution of ratings

For the purpose of ratings distributions, regulatory rules require member firms to assign ratings to one of three rating categories - Buy, Hold/Neutral, or Sell - regardless of a firm's own rating categories. Although RBC Capital Markets' ratings of Top Pick(TP)/Outperform (O), Sector Perform (SP), and Underperform (U) most closely correspond to Buy, Hold/Neutral and Sell, respectively, the meanings are not the same because our ratings are determined on a relative basis (as described below).

Distribution of ratings				
RBC Capital Markets, Equity Research				
As of 31-Mar-2015				
Rating	Count	Percent	Investment Banking	
			Serv./Past 12 Mos.	
			Count	Percent
BUY [Top Pick & Outperform]	909	52.33	280	30.80
HOLD [Sector Perform]	713	41.05	125	17.53
SELL [Underperform]	115	6.62	5	4.35

References to a Recommended List in the recommendation history chart may include one or more recommended lists or model portfolios maintained by RBC Wealth Management or one of its affiliates. RBC Wealth Management recommended lists include the Guided Portfolio: Prime Income (RL 6), the Guided Portfolio: Large Cap (RL 7), the Guided Portfolio: Dividend Growth (RL 8), the Guided Portfolio: Midcap 111 (RL 9), the Guided Portfolio: ADR (RL 10), and the Guided Portfolio: Global Equity (U.S.) (RL 11). RBC Capital Markets recommended lists include the Strategy Focus List and the Fundamental Equity Weightings (FEW) portfolios. The abbreviation 'RL On' means the date a security was placed on a Recommended List. The abbreviation 'RL Off' means the date a security was removed from a Recommended List.

## Equity valuation and risks

For valuation methods used to determine, and risks that may impede achievement of, price targets for covered companies, please see the most recent company-specific research report at <https://www.rbcinsight.com> or send a request to RBC Capital Markets Research Publishing, P.O. Box 50, 200 Bay Street, Royal Bank Plaza, 29th Floor, South Tower, Toronto, Ontario M5J 2W7.

## Conflicts policy

RBC Capital Markets Policy for Managing Conflicts of Interest in Relation to Investment Research is available from us on request. To access our current policy, clients should refer to

<https://www.rbccm.com/global/file-414164.pdf>

or send a request to RBC Capital Markets Research Publishing, P.O. Box 50, 200 Bay Street, Royal Bank Plaza, 29th Floor, South Tower, Toronto, Ontario M5J 2W7. We reserve the right to amend or supplement this policy at any time.

## Dissemination of research and short-term trade ideas

RBC Capital Markets endeavors to make all reasonable efforts to provide research simultaneously to all eligible clients, having regard to local time zones in overseas jurisdictions. RBC Capital Markets' equity research is posted to our proprietary website to ensure eligible clients receive coverage initiations and changes in ratings, targets and opinions in a timely manner. Additional distribution may be done by the sales personnel via email, fax, or other electronic means, or regular mail. Clients may also receive our research via third party vendors. RBC Capital Markets also provides eligible clients with access to SPARC on the Firms proprietary INSIGHT website, via email and via third-party vendors. SPARC contains market color and commentary regarding subject companies on which the Firm currently provides equity research coverage. Research Analysts may, from time to time, include short-term trade ideas in research reports and / or in SPARC. A short-term trade idea offers a short-term view on how a security may trade, based on market and trading events, and the resulting trading opportunity that may be available. A short-term trade idea may differ from the price targets and recommendations in our published research reports reflecting the research analyst's views of the longer-term (one year) prospects of the subject company, as a result of the differing time horizons, methodologies and/or other factors. Thus, it is possible that a subject company's common equity that is considered a long-term 'Sector Perform' or even an 'Underperform' might present a short-term buying opportunity as a result of temporary selling pressure in the market; conversely, a subject company's common equity rated a long-term 'Outperform' could be considered susceptible to a short-term downward price correction. Short-term trade ideas are not ratings, nor are they part of any ratings system, and the firm generally does not intend, nor undertakes any obligation, to maintain or update short-term trade ideas. Short-term trade ideas may not be suitable for all investors and have not been tailored to individual investor circumstances and objectives, and investors should make their own independent decisions regarding any securities or strategies discussed herein. Please contact your investment advisor or institutional salesperson for more information regarding RBC Capital Markets' research.

## Fortis (FTS): Sale of hotel assets marks the exit from real estate

Sentiment Indicator : neutral

Posted by Robert Kwan on Monday, July 06 2015, 5:26 PM ET

### Details

- Following the previous completion of the sale of the commercial real estate business, Fortis announced a deal to sell its hotel assets to a group of private investors for \$365 million.
- The sale is consistent with Fortis' previously-announced plan to reduce its real estate exposure. The implied valuation versus our estimated earnings is relatively close to the current trading multiple.
- The transaction is expected to close in the fall of 2015. Following the close of the sale, virtually all of Fortis' earnings will come from regulated utility assets and assets with long-term contracts.

### Our take: neutral

We view the transaction as neutral to Fortis' share price as the sale was directionally expected and the transaction is relatively small. Further, the sale appears to be done at an estimated valuation that is consistent with the current consolidated valuation, although we see an added benefit being the streamlining of the story to one of predominantly North American regulated utility assets.

## Fortis Inc.

### Steady results is the name of the (utility) game

**Our view:** As a predominantly regulated utility business, we expect Fortis to deliver steady earnings, which is what happened in Q2/15. With a forecast for a roughly 6.5% utility rate base CAGR through 2019 with the potential for growth to bump up to a 7.5% CAGR if two LNG-related projects move ahead in B.C., we continue to favour Fortis' low-risk utility offering.

#### Key points:

**Q2/15 results slightly ahead of our forecast.** Fortis' Q2/15 normalized EPS was \$0.44 compared to our estimate of \$0.42 and \$0.32 a year-ago. For the quarter, better-than-expected results at UNS and Waneta (seasonality likely a driver for both) were the primary differences between actual results and our forecast.

**Low-risk utility offering that marries a roughly 3.5% dividend yield with mid to high single digit expected dividend growth.** Following the pending sale of the hotel assets, virtually all of Fortis' businesses will be regulated utilities or long-term contracted infrastructure assets (e.g., Waneta hydro). We see the low-risk utility businesses as underpinning the dividend with annual growth roughly in line with the 6.5% CAGR for rate base growth through 2019.

**Major 5-year capital program reiterated.** The company plans to invest over \$9 billion from 2015 to 2019 on a variety of capital projects and expects these investments to increase the rate base by approximately 40% from \$14 billion in 2014 to approximately \$19.5 billion in 2019 and produce a five-year CAGR of 6.5%. Additionally, if the Tilbury 1B project and Woodfibre LNG pipeline expansion come to fruition, the company has stated that the five-year CAGR in rate base could further increase to 7.5%.

**Estimates remain unchanged.** Although we made minor changes within the business segments to reflect the Q2/15 results, and the sale of the properties division, we remain comfortable with our 2015 and 2016 EPS estimates of \$2.06 and \$2.22, respectively.

**New EPA rules on carbon dioxide - UNS is evaluating the impact, but to us, it appears to be directionally more realistic.** The Environmental Protection Agency (EPA) released new rules to limit carbon dioxide emissions from power plants. UNS (via Tucson Electric Power) issued a press release stating that it reviewing the new rules. However, the company noted that, "It appears from [its] initial analysis that the EPA has responded constructively to the coordinated outreach..." from Arizona stakeholders. We note that the initial targets appeared to be set on a top down basis without a bottom up analysis on physical energy flows.

## Target/Upside/Downside Scenarios

Exhibit 1: Fortis Inc.

Source: Bloomberg and RBC Capital Markets estimates for Upside/Downside/Target

### Target price/base case

Our \$44.00 price target is based on a P/E of 20x applied to the forward EPS. A 20x multiple is consistent with the regulated utility peer group. A 20x P/E would be at the high end, but not a record high, for valuation, and we see this multiple well supported by historically low 10-year bond yields and a growth outlook that is generally stronger than most periods over the last 10 years.

### Upside scenario

For our upside scenario of \$50.00, we assume that P/E valuations fully reflect the level of long-term interest rates, which we see as providing roughly 1.5x upside in the P/E multiple. Furthermore, our upside scenario includes the LNG-related rate base spending coming to fruition.

### Downside scenario

For our downside scenario of \$33.00, we assume a 200 basis point increase in interest rates, which we believe could translate into an almost 5x downside in the P/E multiple.

## Investment summary

We expect Fortis's shares to outperform other Energy Infrastructure companies in our coverage universe for the following reasons:

**Good defensive investment.** Against the backdrop of oil price weakness and general market volatility, we believe that the historically wide valuation discount will begin to narrow, resulting in better-expected relative performance for the Regulated Utility stocks. With more than 90% of 2015 earnings expected to come from regulated and/or long-term contracted utility infrastructure, we believe that the stock is at an inflection point for EPS and dividend growth given the combination of continued above average rate base growth in its Western Canadian utilities, the accretive UNS acquisition, and a stabilization for regulated ROEs.

**Entering a period of significant rate base growth.** The company is entering a period of significant organic growth, with the 5-year CAGR in rate base through 2019 expected to be 6.5%. We like that the expected rate base is driven by organic growth and any M&A activities in the future would result in additional upside.

**Additional upside from LNG optionality.** We like the upside optionality from the potential LNG-related infrastructure projects that could unfold over the course of the coming year. If the LNG projects come to fruition, Fortis's 5-year CAGR in rate base through 2019 could be as high as 7.5%.

**Potential catalysts:** LNG related projects proceeding

**Key risks:** The risk of punitive regulatory or government decisions, economic/tourism conditions in its service territories, operational or financial issues at newly acquired businesses, and acquisitions or projects that fail to gain the confidence of investors.

## Q2/15 results modestly higher-than-forecast

Fortis' Q2/15 normalized EPS was \$0.44, which compares to our estimate of \$0.42 and \$0.32 in Q2/14. The modestly higher-than-forecast earnings were mainly due to better-than-expected results at UNS and Waneta (seasonality likely a driver for both). This was partially offset by a timing difference in deferral accounts for FortisBC Energy as well as higher-than-expected corporate expenses (mostly due to likely non-recurring items).

A summary of the Q2/15 normalized earnings is detailed in Exhibit 2.

Exhibit 2: Normalized earnings (in \$MM except per share figures)

	RBC CM			Comments
	Q2/15	Q2/15E	Q2/14	
Eastern Canadian	\$15	\$17	\$16

## Highlights from the quarter

**Sale of commercial real estate and hotel assets to focus on the core utility business.** In June 2015, Fortis completed the sale of its commercial real estate assets for gross proceeds of \$430 million. The company also signed an agreement with a private investor group for the sale of its hotel assets for \$365 million in July 2015. These sales were a result of a strategic review for Fortis' real estate and hotel business portfolios and the company has decided to focus on its core utility business. The hotel transaction is expected to be completed in the fall of 2015. Following the close of the hotel transaction, virtually all of the company's assets will be comprised of regulated utilities and long-term contracted energy infrastructure.

**Sale of small power assets in New York and Ontario complete.** During the quarter, the company completed the sale of its non-regulated generation assets in upstate New York (gross proceeds of US\$63 million) and Ontario (gross proceeds of \$16 million).

**Waneta expansion completed.** In April 2015, Fortis completed the construction of the \$900 million, 335 MW Waneta expansion. The project was completed ahead of schedule, on-budget, and contributed \$12 million in Q2/15. Fortis has a 51% controlling interest in the project. Lastly, the facility will operate under its 40-year power purchase agreement with BC Hydro that is expected to generate \$20-25 million of annual earnings.

**Major 5-year capital program remains on track to generate attractive low-risk organic utility growth.** The company plans to invest over \$9 billion from 2015 to 2019 on a variety of capital projects. The company expects this investment in energy infrastructure to increase

mid-year rate base by approximately 40% from \$14 billion in 2014 to approximately \$19.5 billion in 2019 and produce a five-year compound annual growth rate (CAGR) of approximately 6.5%. Additionally, if the Tilbury 1B LNG storage project and Woodfibre LNG pipeline expansion come to fruition, the company has stated that the five-year CAGR in rate base could further increase to 7.5%.

## Major regulatory and other items of note

**Central Hudson rate plan approved.** The New York State Public Service Commission approved the 3-year rate plan in June 2015 that includes US\$490 million of capital investments over the term of the agreement, with a revenue requirement that also allows for the recovery of already spent capital during the previous rate freeze following Fortis' acquisition of Central Hudson. The equity thickness remains at 48% and the ROE declines to 9% (from 10%) per the settlement. Fortis can earn up to a 9.5% ROE and then share earnings with customers above that level based on specified thresholds.

**GCOC proceedings for 2016/2017 have been initiated in Alberta.** In April 2015, the AUC initiated a GCOC Proceeding to set the allowed ROE and capital structure for 2016 and 2017. The AUC will hold a pre-hearing conference in Q3/15 to establish scope and process matters. With the current PBR term expiring in 2017, the AUC has also initiated a generic proceeding to establish parameters for the next generation of PBR plans. Further information from the AUC with respect to this proceeding is expected in H2/15.

**Capital tracker application filed for 2016/2017.** In May 2015, FortisAlberta filed an application with the AUC seeking capital tracker revenue for 2016 and 2017, as well as a true-up to the 2014 capital tracker revenue for actual capital expenditures. As part of this application, the company provided additional information on the capital tracker components that were not fully approved in the capital tracker decision that occurred earlier in March, seeking approval of the related capital expenditures incurred in 2013 and 2014, and forecast for 2015. A hearing related to this proceeding is scheduled for October 2015, with a decision from the regulator expected in Q1/16.

**Newfoundland Power application to defer GRA filing denied.** In April 2015, Newfoundland Power filed an application with the Newfoundland and Labrador Board of Commissioners of Public Utilities (PUB) to defer the filing of its next general rate application to on or before June 1, 2016 and to request a 2016 cost recovery deferral of \$4 million. In July 2015, the PUB issued an order denying the company's application. As a result, Newfoundland Power will file its general rate application with the PUB on or before October 16, 2015 to establish customer rates for 2016.

**TEP to file a general rate application to set 2017 rates.** In June 2015, Tucson Electric Power (TEP), UNS Energy's largest utility, announced its plan to file a general rate application requesting new retail rates to be effective January 1, 2017, using June 30, 2015 as a historical test year. Since its last approved rate order in 2013, which used a 2011 historical test year, TEP's total rate base has increased by approximately US\$0.8 billion. The application is expected to be submitted before the end of the year. Since the rate plan has not yet been filed, management understandably did not want to discuss the specific aspects of what could be in the filing. However, we would expect TEP to seek a higher equity component, which would come closer to harmonizing TEP with other utilities in the state (including those owned by UNS Energy).

## Estimates unchanged

Although we have made minor changes within the business segments to reflect the Q2/15 results, the sale of the properties division and the sale of the smaller Ontario and New York power generation assets, we remain comfortable with our 2015 and 2016 EPS estimates of \$2.06 and \$2.22, respectively.

### Valuation

Our \$44.00 price target is based on a P/E of 20x applied to the forward EPS. A 20x multiple is consistent with the regulated utility peer group. A 20x P/E would be at the high end, but not a record high, for valuation, and we see this multiple well supported by historically low 10-year bond yields and a growth outlook that is generally stronger than most periods over the last 10 years.

### Price target impediments

Punitive regulatory or government decisions, economic/tourism conditions in its service territories, operational or financial issues at newly acquired businesses, and acquisitions or projects that fail to gain the confidence of investors may have implications for our price target.

### Company description

Fortis Inc. is a utility holding company with regulated utilities in Canada (Newfoundland & Labrador, PEI, Ontario, Alberta, and B.C.), the U.S. (Arizona and New York) and the Caribbean (Cayman Islands and Turks & Caicos). The company also has non-regulated operations in power (Canada, U.S., and Belize) and real estate (commercial and hospitality in Canada).

## Required disclosures

### Non-U.S. analyst disclosure

Robert Kwan and Tim Tong (i) are not registered/qualified as research analysts with the NYSE and/or FINRA and (ii) may not be associated persons of the RBC Capital Markets, LLC and therefore may not be subject to FINRA Rule 2711 and NYSE Rule 472 restrictions on communications with a subject company, public appearances and trading securities held by a research analyst account.

### Conflicts disclosures

The analyst(s) responsible for preparing this research report received compensation that is based upon various factors, including total revenues of the member companies of RBC Capital Markets and its affiliates, a portion of which are or have been generated by investment banking activities of the member companies of RBC Capital Markets and its affiliates.

Please note that current conflicts disclosures may differ from those as of the publication date on, and as set forth in, this report. To access current conflicts disclosures, clients should refer to <https://www.rbccm.com/GLDisclosure/PublicWeb/DisclosureLookup.aspx?entityId=1> or send a request to RBC CM Research Publishing, P.O. Box 50, 200 Bay Street, Royal Bank Plaza, 29th Floor, South Tower, Toronto, Ontario M5J 2W7.

A member company of RBC Capital Markets or one of its affiliates managed or co-managed a public offering of securities for Fortis Inc. in the past 12 months.

A member company of RBC Capital Markets or one of its affiliates received compensation for investment banking services from Fortis Inc. in the past 12 months.

Royal Bank of Canada, together with its affiliates, beneficially owns 1 percent or more of a class of common equity securities of Fortis Inc..

A member company of RBC Capital Markets or one of its affiliates received compensation for products or services other than investment banking services from Fortis Inc. during the past 12 months. During this time, a member company of RBC Capital Markets or one of its affiliates provided non-securities services to Fortis Inc..

RBC Capital Markets is currently providing Fortis Inc. with non-investment banking securities-related services.

RBC Capital Markets is currently providing Fortis Inc. with non-securities services.

RBC Capital Markets has provided Fortis Inc. with investment banking services in the past 12 months.

RBC Capital Markets has provided Fortis Inc. with non-investment banking securities-related services in the past 12 months.

RBC Capital Markets has provided Fortis Inc. with non-securities services in the past 12 months.

### Explanation of RBC Capital Markets Equity rating system

An analyst's 'sector' is the universe of companies for which the analyst provides research coverage. Accordingly, the rating assigned to a particular stock represents solely the analyst's view of how that stock will perform over the next 12 months relative to the analyst's sector average. Although RBC Capital Markets' ratings of Top Pick (TP)/Outperform (O), Sector Perform (SP), and Underperform (U) most closely correspond to Buy, Hold/Neutral and Sell, respectively, the meanings are not the same because our ratings are determined on a relative basis.

#### Ratings

**Top Pick (TP):** Represents analyst's best idea in the sector; expected to provide significant absolute total return over 12 months with a favorable risk-reward ratio.

**Outperform (O):** Expected to materially outperform sector average over 12 months.

**Sector Perform (SP):** Returns expected to be in line with sector average over 12 months.

**Underperform (U):** Returns expected to be materially below sector average over 12 months.

#### Risk Rating

As of March 31, 2013, RBC Capital Markets suspends its Average and Above Average risk ratings. The **Speculative** risk rating reflects a security's lower level of financial or operating predictability, illiquid share trading volumes, high balance sheet leverage, or limited operating history that result in a higher expectation of financial and/or stock price volatility.

## Distribution of ratings

For the purpose of ratings distributions, regulatory rules require member firms to assign ratings to one of three rating categories - Buy, Hold/Neutral, or Sell - regardless of a firm's own rating categories. Although RBC Capital Markets' ratings of Top Pick(TP)/ Outperform (O), Sector Perform (SP), and Underperform (U) most closely correspond to Buy, Hold/Neutral and Sell, respectively, the meanings are not the same because our ratings are determined on a relative basis (as described below).

Distribution of ratings RBC Capital Markets, Equity Research As of 30-Jun-2015				
Rating	Count	Percent	Investment Banking Serv./Past 12 Mos.	
			Count	Percent
BUY [Top Pick & Outperform]	935	53.15	293	31.34
HOLD [Sector Perform]	707	40.19	124	17.54
SELL [Underperform]	117	6.65	6	5.13

References to a Recommended List in the recommendation history chart may include one or more recommended lists or model portfolios maintained by RBC Wealth Management or one of its affiliates. RBC Wealth Management recommended lists include the Guided Portfolio: Prime Income (RL 6), the Guided Portfolio: Large Cap (RL 7), the Guided Portfolio: Dividend Growth (RL 8), the Guided Portfolio: Midcap 111 (RL 9), the Guided Portfolio: ADR (RL 10), and the Guided Portfolio: Global Equity (U.S.) (RL 11). RBC Capital Markets recommended lists include the Strategy Focus List and the Fundamental Equity Weightings (FEW) portfolios. The abbreviation 'RL On' means the date a security was placed on a Recommended List. The abbreviation 'RL Off' means the date a security was removed from a Recommended List.

## Equity valuation and risks

For valuation methods used to determine, and risks that may impede achievement of, price targets for covered companies, please see the most recent company-specific research report at <https://www.rbcinsight.com> or send a request to RBC Capital Markets Research Publishing, P.O. Box 50, 200 Bay Street, Royal Bank Plaza, 29th Floor, South Tower, Toronto, Ontario M5J 2W7.

## Conflicts policy

RBC Capital Markets Policy for Managing Conflicts of Interest in Relation to Investment Research is available from us on request. To access our current policy, clients should refer to

or send a request to RBC Capital Markets Research Publishing, P.O. Box 50, 200 Bay Street, Royal Bank Plaza, 29th Floor, South Tower, Toronto, Ontario M5J 2W7. We reserve the right to amend or supplement this policy at any time.

## Dissemination of research and short-term trade ideas

RBC Capital Markets endeavors to make all reasonable efforts to provide research simultaneously to all eligible clients, having regard to local time zones in overseas jurisdictions. RBC Capital Markets' equity research is posted to our proprietary website to ensure eligible clients receive coverage initiations and changes in ratings, targets and opinions in a timely manner. Additional distribution may be done by the sales personnel via email, fax, or other electronic means, or regular mail. Clients may also receive our research via third party vendors. RBC Capital Markets also provides eligible clients with access to SPARC on the Firms proprietary INSIGHT website, via email and via third-party vendors. SPARC contains market color and commentary regarding subject companies on which the Firm currently provides equity research coverage. Research Analysts may, from time to time, include short-term trade ideas in research reports and / or in SPARC. A short-term trade idea offers a short-term view on how a security may trade, based on market and trading events, and the resulting trading opportunity that may be available. A short-term trade idea may differ from the price targets and recommendations in our published research reports reflecting the research analyst's views of the longer-term (one year) prospects of the subject company, as a result of the differing time horizons, methodologies and/or other factors. Thus, it is possible that a subject company's common equity that is considered a long-term 'Sector Perform' or even an 'Underperform' might present a short-term buying opportunity as a result of temporary selling pressure in the market; conversely, a subject company's common equity rated a long-term 'Outperform' could be considered susceptible to a short-term downward price correction. Short-term trade ideas are not ratings, nor are they part of any ratings system, and the firm generally does not intend, nor undertakes any obligation, to maintain or update short-term trade ideas. Short-term trade ideas may not be suitable for all investors and have not been tailored to individual investor circumstances and objectives, and investors should make their own independent decisions regarding any securities or strategies discussed herein. Please contact your investment advisor or institutional salesperson for more information regarding RBC Capital Markets' research.

## Analyst certification

## Fortis (FTS): Annualized dividend increased by 10.3%; targeting 6% annual dividend growth through 2020

Sentiment Indicator : **positive**

Posted by Kwan, Robert on Tuesday, September 29, 2015, 21:24 PM ET

### Details

- 1 Fortis increased its fourth quarter 2015 dividend to \$0.375 per share from \$0.34 per share, representing a 10.3% increase in the quarterly dividend that is equivalent to an annualized dividend of \$1.50 (modestly higher than our forecast of \$1.44).
- 1 The company is targeting an annual dividend per share growth of approximately 6% through 2020, based on a 2016 dividend of \$1.50.
- 1 Management stated that the dividend guidance takes into account various factors including the expectation of reasonable outcomes for regulatory proceedings and the successful execution of the company's 5-year capital plan. The company also remains optimistic in securing additional opportunities, particularly in natural gas-related infrastructure.

### Our take: slightly positive

The modestly higher-than-expected dividend for 2016 should be a slight positive for the stock, particularly in the current weak stock market environment. Overall, the multi-year 6% dividend growth rate is in line with our previous expectations.

<b>Rating:</b> 3-Sector Underperform	<b>Target</b>	1-Yr: C\$34.50	<b>ROR</b>	1-Yr: 5.5%	<b>Est. NTM Div.</b>	C\$1.16
<b>Risk Ranking:</b> Low		2-Yr: C\$36.00		2-Yr: 13.3%	<b>Div. (Current)</b>	C\$1.16
<b>Valuation:</b> 10.25x EV/EBITDA on 2012E EBITDA						
<b>Key Risks to Target:</b> Interest rates, growth						<b>Yield</b> 3.4%

**Q4/10 Recurring EPS Mildly Misses****Event**

- Fortis reported Q4/10 EPS of \$0.49 that looked recurring, missing our estimate at \$0.55 and the Street at \$0.51 (\$0.47-\$0.55). Fortis also increased its dividend 3.6% to \$1.16 annualized, slightly behind our \$1.18 estimate.

**Implications**

- Q4/10 EPS mild miss was due to (1) poor Belize Electricity results due to regulatory challenges (\$1.5M in 2010 vs. \$10M expected) and related legal fees, (2) lower-than-average temperatures at FTS's Caribbean operations, and (3) higher-than-expected Q4 O&M costs.
- FTS' 2011E-2015E capital budget is unchanged at \$5.5B. FTS has guided to 6%/year organic EPS/dividend growth, not updated in its release. Most 2011 regulatory allowed ROE levels remain flat with 2010.
- We cut 2011E/2012E EPS by \$0.04/\$0.05 for lower Belize earnings and flatter Real Estate. FTS' guided 6%/year EPS accretion implies 2011/2012 EPS of \$1.74/\$1.84 based on \$1.64 recurring 2010 EPS vs. our estimate, now at \$1.76/\$1.85. Our one-year FTS target has dropped \$0.50/share to \$33.50; our recommendation has also been lowered to 3-Sector Underperform.

**Recommendation**

- We cut FTS to 3-SU from 2-SP. Our current rank energy utilities order is ATCO, Emera, Canadian Utilities, and then Fortis.

## Q4/10 EPS – 2011E/2012E EPS Forecasts – Stock & Sector Valuation

- **Fortis reported Q4/10 EPS** of \$0.49 that appears to be recurring, moderately missing our estimate at \$0.55 and mildly missing the Street at \$0.51 (\$0.47-\$0.55). Fortis also increased its dividend per share 3.6% to \$1.16 annualized, slightly behind our \$1.18 estimate. The Q4/10 EPS miss vs. our expectations was due to (1) poorer-than-expected performance at Belize Electricity due to regulatory challenges (contributed only \$1.5M in 2010 vs. \$10M expected) and associated legal fees, (2) lower-than-average temperatures at FTS's Caribbean operations, (3) higher-than-expected O&M costs due to a heavier allocation in Q4 vs. other quarters, and (4) a 170 bp decrease in occupancy rate at FTS' Real Estate division. See Exhibit 1 for Fortis' EPS contribution by segment.

Exhibit 1 - Fortis' EPS Contribution by Segment

		EPS Contribution			
		Q4/10	(%)	Q4/09	(%)

<b>EPS</b>		<b>\$0.49</b>		<b>\$0.48</b>	

Source: Company reports; Scotia Capital estimates.

- **2011E/2012E EPS forecasts lower:** Belize Electricity continues to underperform vs. FTS' expectations, contributing only \$1.5M in 2010 vs. \$10M expected (underperformance on a per share basis = \$0.04). FTS stated the poor financial performance was due to "regulatory challenges [that] continue to impede the utility's ability to earn a fair and reasonable return." We cut \$0.04/\$0.05 per share from 2011E/2012E for lower-than-expected Belize earnings as well as some other minor adjustments. FTS' guided 6%/year EPS accretion would imply 2011/2012 EPS of \$1.74/\$1.84 using 2010 recurring EPS of \$1.64 (reported = \$1.65) as the base year, vs. our estimate, now at \$1.76 and \$1.85. Our one-year FTS target has dropped \$0.50/share to \$33.50.
- **Sector valuation:** We cut our energy utilities recommendation from market weight in mid-December 2010 to underweight in late January 2011. This cut was due to better-than-expected U.S. and Canadian economic data and 2011-2012 GDP and interest rate forecasts. Long 10-year government bond interest rates have already backed up 80 and 130 basis points in Canada and the U.S., respectively, from their October 2010 bottoms. Our economists now forecast 4% 10-year Canada rates by Q4/12. We use 3.6% forecast 10-year Canada rates to help set our Q1/11 one-year out stock price targets.
- **FTS acquisition targets unchanged:** Last year, PPL won over a consortium that included Fortis' bid to buy E.ON's U.S. regulated utility assets for US\$6.7B. **Fortis' CEO previously**

guided to looking at \$3B-\$4B regulated utility acquisitions, likely in the U.S. In its Q4/10 release, FTS stated it **continues to pursue acquisitions** of regulated electric and natural gas utilities in the United States and Canada. We respect FTS' track record for making value added acquisitions but **do not put any premium in our FTS P/E multiple or earnings** until we see what transpires, if anything.

Exhibit 2 - Nature of FTS' Regulation

Regulated Utility	Allowed Common Equity (%)	Allowed Returns (%)

## Segmented Q4/10 Results

- **Q4/10 Terasen Gas:** Reported earnings of \$45M in Q4/10 were down 6% YOY due to: (1) higher operating expenses as 2010 expenses were more heavily weighted in Q4/10 and (2) increased amortization rates as a result of higher capital investment and higher rates resulting from a recent regulator-approved study. These increased costs were partially offset by higher delivery rates, a \$5M after-tax provision take in Q4/09, and lower finance charges due to lower borrowings. Net customer additions were 9,400 in 2010 vs. 8,200 in 2009. Terasen Gas is comprised of TGI (i.e., Vancouver), TGVI (i.e., Vancouver Island), and TGWI (i.e., Whistler area). TGI's allowed 2011 ROE is 9.5% on a deemed equity of 40%, **flat YOY**. TGVI's allowed ROE for 2011 is 10% on a deemed equity of 40% (see Exhibit 2), also **flat YOY**.
- **Q4/10 FortisAlberta:** Reported earnings were up \$2M YOY to \$17M due to AUC's previous approval (November 2009) of a material increase to FortisAlberta's ROE to 9% from 8.61% and allowed equity thickness to 41% from 37% for 2009/2010/2011. **Power deliveries rose 3% YOY**, due to increased oil and gas activities driving an increased customer base and higher deliveries.
- **Q4/10 FortisBC:** Reported Q4/10 net earnings of \$10M were up \$2M from Q4/09 due to a 6% increase in customer electricity rates effective January 1, 2010, partially offset by a 1.4% drop in electricity sales. In December 2009, the BCUC awarded an additional 103 bp to FortisBC's allowed 2010 ROE, to 9.9%, on an unchanged equity thickness of 41%, **both unchanged for 2011**.
- **Q4/10 Newfoundland Power:** Earnings were **up \$1M YOY to \$9M largely** due to 1% higher YOY electricity sales and a slightly higher 2010 allowed ROE of 9%, up 31 bp from

8.69% in 2009 and 8.95% in 2008. **Nfld Power's 2011 ROE is set at only 8.38% for 2011 by way of automatic adjustment formula.**

- **Q4/10 Other Canadian Electric Utilities:** Maritime Electric and FortisOntario are in this "other" category. Earnings were down \$2M YOY to \$5M but **up \$3M YOY on a recurring basis**. Increased YOY recurring earnings were driven by a \$0.8M earnings contribution from Algoma Power (\$nil in Q4/09) and lower finance charges on lower borrowing at a lower average rate. Partially offsetting were 0.7% lower electricity sales due to warmer temperatures. Maritime Electric's 2010 and 2011 ROE is 9.75% on deemed equity of 40%. FortisOntario's 2010 and 2011 ROE is at only 8.01%. The OEB approved Algoma Power's 2011 ROE at 9.85% on 40% deemed equity.
- **Q4/10 Regulated Utilities – Caribbean:** This group owns 59.5% of Caribbean Utilities, 70% of Belize Electricity, and 100% of Fortis Turks and Caicos. **Q4/10 earnings fell \$2M YOY to \$5M on a 7% sales decrease YOY to 270 GWh** mainly due to lower average temperatures, \$0.5M unfavourable foreign exchange, a depreciation change in Q4/09, and increased legal fees relating to continuing regulatory challenges. See EPS forecast section above for our 2011E/2012E EPS implications.
- **Belize Electricity ("BEL") 2008/2009 rate application:** On June 30, 2008, Fortis rejected a Belize government cut to 70.1%-owned BEL's regulated return to 8.5% from 12%. BEL eventually got 10% but the Government denied \$12.6M of retroactive diesel costs incurred for Belize power production net to FTS shareholders. The appeal hearing began in early October 2009, but the Belize trial judge postponed the case for a date still to be determined. In June 2010, the Supreme Court of Belize issued an order prohibiting the PUC from carrying out any rate-setting review proceedings or changing any rates for Belize Electricity until further order of the Supreme Court. The case was heard in October 2010 and closing arguments completed December 2010. A court decision is expected in Q1/11.
- **Q4/10 Fortis Non-Regulated Generation:** YOY earnings were **up \$3M YOY to \$5M** in Q4/10 due to higher hydro production in and higher prices per MWh in Upper New York State and Ontario.
- **Q4/10 Fortis Properties:** Earnings were up \$2M YOY due to lower effective taxes and rent/RevPAR increases that for now more than offset a 170 bp dip in occupancy rates and increased finance charges.
- **Corporate and other:** Overall net corporate and other expenses were down **\$1M YOY** to \$18M due to higher preferred share dividends that were more than offset by lower finance charges on higher-interest-paying debt that was retired. In April 2010, Terasen redeemed its 8% \$125M Capital Securities.
- **Unchanged strong capital expenditures:** Utility capital expenditures will be **\$1.2B** in 2011, mostly in B.C. and Alberta. FTS expects 2010-2014 capital expenditures to total \$5.5B, unchanged post the Waneta Dam announcement. **Some of the larger projects include:**
  - **\$900M** 335 MW Waneta Expansion hydro facility in B.C., of which FTS owns 51%, partnering with Columbia Power Corporation & Columbia Basin Trust (CBC/CBT, 100% owned by the B.C. government). Although non-regulated, the risk of this hydro project is reduced through fixed energy and capacity entitlements. 101 MW of the capacity will be sold to BC Hydro under a long-term PPA with the remaining 234 MW sold to FortisBC. Construction began in fall 2010 and is expected to come into service in 2015.
  - **\$210M** (was \$200M) liquefied natural gas facility on Vancouver Island, expected to be completed in Q2/11 and in service by late 2011.
  - **\$126M** (was \$141M) installation of automated meters at FortisAlberta, expected to be completed by the end of Mar. 2011.
  - **\$106M** (was \$139M) Okanagan Transmission Reinforcement Project at FortisBC, completion expected mid-2011
  - **\$110M** Customer Care Enhancement Project at Terasen Gas, expected to be completed in early 2012 (FTS has previously stated Jan. 2012).

- **Financial:** FTS' capital structure at Dec. 31/10 is 58.4% debt, 9.0% preferred equity, and 32.6% common equity, **in line with FTS' targets** and relatively unchanged from Q3/10. In May 2010, S&P confirmed FTS with an A- credit rating with a stable outlook. In June 2010, DBRS confirmed FTS with a BBB (high) but changed the trend to positive from stable citing broad diversification of FTS' asset base. In October 2010, DBRS raised FTS' credit rating to A- Stable. FTS stated it focuses on EPS as its final measure of financial performance.

## Definition of Scotia Capital Equity Research Ratings & Risk Rankings

We have a three-tiered rating system, with ratings of 1-Sector Outperform, 2-Sector Perform, and 3-Sector Underperform. Each analyst assigns a rating that is relative to his or her coverage universe.

Our risk ranking system provides transparency as to the underlying financial and operational risk of each stock covered. Statistical and judgmental factors considered are: historical financial results, share price volatility, liquidity of the shares, credit ratings, analyst forecasts, consistency and predictability of earnings, EPS growth, dividends, cash flow from operations, and strength of balance sheet. The Director of Research and the Supervisory Analyst jointly make the final determination of all risk rankings.

The rating assigned to each security covered in this report is based on the Scotia Capital research analyst's 12-month view on the security. Analysts may sometimes express to traders, salespeople and certain clients their shorter-term views on these securities that differ from their 12-month view due to several factors, including but not limited to the inherent volatility of the marketplace.

### Ratings

#### 1-Sector Outperform

The stock is expected to outperform the average 12-month total return of the analyst's coverage universe or an index identified by the analyst that includes, but is not limited to, stocks covered by the analyst.

#### 2-Sector Perform

The stock is expected to perform approximately in line with the average 12-month total return of the analyst's coverage universe or an index identified by the analyst that includes, but is not limited to, stocks covered by the analyst.

#### 3-Sector Underperform

The stock is expected to underperform the average 12-month total return of the analyst's coverage universe or an index identified by the analyst that includes, but is not limited to, stocks covered by the analyst.

#### Other Ratings

**Tender** – Investors are guided to tender to the terms of the takeover offer.

**Under Review** – The rating has been temporarily placed under review, until sufficient information has been received and assessed by the analyst.

### Risk Rankings

#### Low

Low financial and operational risk, high predictability of financial results, low stock volatility.

#### Medium

Moderate financial and operational risk, moderate predictability of financial results, moderate stock volatility.

#### High

High financial and/or operational risk, low predictability of financial results, high stock volatility.

#### Caution Warranted

Exceptionally high financial and/or operational risk, exceptionally low predictability of financial results, exceptionally high stock volatility. For risk-tolerant investors only.

#### Venture

Risk and return consistent with Venture Capital. For risk-tolerant investors only.

## Scotia Capital Equity Research Ratings Distribution\*

### Distribution by Ratings and Equity and Equity-Related Financings\*

\* As at January 31, 2011.

Source: Scotia Capital.

For the purposes of the ratings distribution disclosure the NASD requires members who use a ratings system with terms different than "buy," "hold/neutral" and "sell," to equate their own ratings into these categories. Our 1-Sector Outperform, 2-Sector Perform, and 3-Sector Underperform ratings are based on the criteria above, but for this purpose could be equated to buy, neutral and sell ratings, respectively.

## **General Disclosures**

## Fortis Luncheon Highlights - Consistent

### Event

- We hosted Fortis for an investor lunch yesterday. The investment message was overall consistent with unchanged \$5.5B of capital expenditures and a 6% organic rate base/EPS/dividend growth intact.

### Implications

- Future 6%/year EPS/dividend growth will be mostly driven by FTS' growing rate base. 80% of the growth will be in Western Canada.
- On potential acquisitions, FTS continues to target mostly U.S. electric utilities that are \$1B-\$5B in enterprise value. These U.S. utilities tend to have higher regulated equity thickness (45%-50% versus 40% in Canada) and ROE returns (10%-10.5% versus 9%-9.5% in Canada).
- FTS' Belize shareholder issues continue and an appeal is likely but Belize assets only generate 2.5% of earnings. On March 15, FTS announced the Supreme Court of Belize dismissed FTS' appeal.

### Recommendation

- We like FTS' low risk and steady growth proposition but view FTS' stock price as high at 20x P/E for 6% EPS growth. EMA dividend is 60 bp higher while TRP's is 80 bp higher with better EPS growth.

Qtly Adj EPS (Basic)	Q1	Q2	Q3	Q4	Year	P/E

Note: Indirect

**Investor Meeting Highlights**

- **Steady 6%/yr dividend growth:** Fortis has grown its dividends per share at 9.3% since 1972 and currently pays out 68% of its earnings with an unofficial 60%-70% targeted range. FTS's payout ratio was closer to 50% prior to buying Terasen Gas so that is why FTS' forecast EPS growth rate will likely match its dividend growth rate going forward. In 2011 FTS inferred its 2011 dividend payout will drop to ~65%. FTS' rate base at a 6% CAGR through 2015 will take overall regulated asset rate bases from \$7.7B to \$10.1B in 2015 (see Exhibit 1). Rate base growth is expected to be mainly driven by growth in FTS' Western Canada division (80%). FTS forecasts its 2011 capex spending at a steady \$1.2B, of which \$800M comes from Western Canada, including \$210M on an LNG Storage Facility on Vancouver Island, expected to be completed in May 2011. The LNG Storage Facility is regulated with a 40% equity thickness and 10% allowed ROE. FTS stated the likelihood of some fixed asset investment in the Kitimat LNG terminal as highly unlikely but observed that buying the Pacific Northern Gas Pipeline would be more logical but currently too expensive.

Exhibit 1 - Mid-Year Rate Base Projections

Source: Company reports.

- **Belize update:** FTS continues to have problems in Belize following the 2008 Annual Tariff Review Proceeding that disallowed FTS a valid increase in rates to pay for valid fuel costs incurred to make power on behalf of Belize residents. On March 15, FTS announced the Supreme Court of Belize dismissed FTS' appeal. There are two more courts to appeal to if FTS chooses (Belize Appeals Court and then a Caribbean court based in Trinidad). FTS does not expect any resolution prospect until the final appeal is made. FTS noted its **Belize assets are relatively immaterial** at less than 2% of total assets while Belize earnings are ~2.5% overall.
- **On potential acquisitions, FTS continues to target mostly U.S. electric utilities** (lack of Canadian regulated targets) that are \$1B-\$5B in enterprise value. Traditionally, the U.S. electric utility industry benefits from higher equity thickness (45%-50% or 52%-53% with generation) and ROE returns (10%-10.5%) relative to Canada. These relatively higher returns (vs. Canada) are partially/mostly offset by a greater regulatory lag on rate hike request approvals. This can vary greatly among the 50 states so FTS is careful when assessing targets as the regulatory construct can be the greatest investment variable. Also, FTS does not

believe in paying more than 30% premium over regulated book values as at that level, most takeovers of regulated assets would not be accretive.

- **On wind:** FTS is not a supporter of investing in wind development/acquisitions as FTS had a bad experience with an Alberta wind farm (Crowley) in the past. FTS also does not like wind power's reliance on government tax incentives but would consider wind developments/acquisitions within a regulatory rate base as EMA has in N.S.
- **On Waneta:** FTS gave more colour on its pro-forma investment (51% of \$900M) in the Waneta dam for 2015. FTS hopes to earn 12%-13% ROE on a 35%-40% equity thickness to compensate for taking financing and construction cost risks.

Fortis Inc.	FTS	G, I, S, U
TransCanada Corporation	TRP	G, I, S, U

I, Sam Kanes, certify that (1) the views expressed in this report in connection with securities or issuers that I analyze accurately reflect my personal views and (2) no part of my compensation was, is, or will be directly or indirectly, related to the specific recommendations or views expressed by me in this report.

This research report was prepared by employees of Scotia Capital Inc. who have the title of Analyst.

All pricing of securities in reports is based on the closing price of the securities' principal marketplace on the night before the publication date, unless otherwise explicitly stated.

All Equity Research Analysts report to the Head of Equity Research. The Head of Equity Research reports to the Managing Director, Head of Institutional Equity Sales, Trading and Research, who is not and does not report to the Head of the Investment Banking Department. The Supervisory Analyst, who reviews the report prior to publication, has a dual reporting line to the Head of Equity Research and the Head of Scotia Capital Compliance. Scotia Capital has policies that are reasonably designed to prevent or control the sharing of material non-public information across internal information barriers, such as between Investment Banking and Research.

The compensation of the research analyst who prepared this report is based on several factors, including but not limited to, the overall profitability of Scotia Capital and the revenues generated from its various departments, including investment banking. Furthermore, the research analyst's compensation is charged as an expense to various Scotia Capital departments, including investment banking. Research Analysts may not receive compensation from the companies they cover.

Non-U.S. analysts may not be associated persons of Scotia Capital (USA) Inc. and therefore may not be subject to NASD Rule 2711 restrictions on communications with subject company, public appearances and trading securities held by the analysts.

## Definition of Scotia Capital Equity Research Ratings & Risk Rankings

We have a three-tiered rating system, with ratings of 1-Sector Outperform, 2-Sector Perform, and 3-Sector Underperform. Each analyst assigns a rating that is relative to his or her coverage universe.

Our risk ranking system provides transparency as to the underlying financial and operational risk of each stock covered. Statistical and judgmental factors considered are: historical financial results, share price volatility, liquidity of the shares, credit ratings, analyst forecasts, consistency and predictability of earnings, EPS growth, dividends, cash flow from operations, and strength of balance sheet. The Director of Research and the Supervisory Analyst jointly make the final determination of all risk rankings.

The rating assigned to each security covered in this report is based on the Scotia Capital research analyst's 12-month view on the security. Analysts may sometimes express to traders, salespeople and certain clients their shorter-term views on these securities that differ from their 12-month view due to several factors, including but not limited to the inherent volatility of the marketplace.

### Ratings

#### 1-Sector Outperform

The stock is expected to outperform the average 12-month total return of the analyst's coverage universe or an index identified by the analyst that includes, but is not limited to, stocks covered by the analyst.

#### 2-Sector Perform

The stock is expected to perform approximately in line with the average 12-month total return of the analyst's coverage universe or an index identified by the analyst that includes, but is not limited to, stocks covered by the analyst.

#### 3-Sector Underperform

The stock is expected to underperform the average 12-month total return of the analyst's coverage universe or an index identified by the analyst that includes, but is not limited to, stocks covered by the analyst.

#### Other Ratings

**Tender** – Investors are guided to tender to the terms of the takeover offer.

**Under Review** – The rating has been temporarily placed under review, until sufficient information has been received and assessed by the analyst.

### Risk Rankings

#### Low

Low financial and operational risk, high predictability of financial results, low stock volatility.

#### Medium

Moderate financial and operational risk, moderate predictability of financial results, moderate stock volatility.

#### High

High financial and/or operational risk, low predictability of financial results, high stock volatility.

#### Caution Warranted

Exceptionally high financial and/or operational risk, exceptionally low predictability of financial results, exceptionally high stock volatility. For risk-tolerant investors only.

#### Venture

Risk and return consistent with Venture Capital. For risk-tolerant investors only.

## Scotia Capital Equity Research Ratings Distribution\*

### Distribution by Ratings and Equity and Equity-Related Financings\*

\* As at February 28, 2011.

Source: Scotia Capital.

For the purposes of the ratings distribution disclosure the NASD requires members who use a ratings system with terms different than "buy," "hold/neutral" and "sell," to equate their own ratings into these categories. Our 1-Sector Outperform, 2-Sector Perform, and 3-Sector Underperform ratings are based on the criteria above, but for this purpose could be equated to buy, neutral and sell ratings, respectively.

### Q1/11 EPS Mildly Beats Our Estimates/Street

#### Event

- FTS reported Q1/11 EPS of \$0.67/sh or \$0.65 recurring that mildly beat our estimate and the Street at \$0.62 (\$0.59-\$0.64). FTS' electric utilities and strong demand benefitted from colder YOY conditions in W. Cda.

#### Implications

- Q1/11 EPS was mild beat at \$0.65 adjusted. This offset Q4/10's mild miss on lower temperatures at FTS's Caribbean operations and higher-than-expected Q4 O&M costs. Strong Q1/11 electric utilities earnings of \$53M were up \$13M YOY on higher rate bases, cooler weather, and strong demand.
- FTS' 2011E-15E capital budget remains unchanged at \$5.5B as does its 6%/year organic EPS/dividend growth. Most 2011 regulatory allowed ROE levels remain flat with 2010.
- We decided to maintain all our 2011/12 EPS forecasts and valuation parameters.

#### Recommendation

- Our current rank energy utilities/IPP/Pipe order is TRP and ATCO (1-SO), Emera, CPX, CU and Enbridge, followed by Fortis. Relative stock performances have however, tightened this group considerably with Q1/11 FTS stock price performance the poorest in the group.

Qtly Adj EPS (Basic)	Q1	Q2	Q3	Q4	Year	P/E

## Q1/11 EPS/2011E/2012E EPS Forecasts/Stock & Sector Valuation

- **Fortis reported Q1/11 EPS** of \$0.67 (\$0.58 in Q1/10), recurring at \$0.65, moderately beating our estimate at \$0.62 and the Street at \$0.62 rounded (\$0.59-\$0.64). The mild Q1/11 EPS beat vs. our expectations was due to FortisBC Electric's and FortisAlberta's higher energy sales due partly to colder weather. The timing of revenue recognition in Q1/10 vs. Q1/11 was also a factor as well as higher Belize non-regulated hydroelectric generation. See Exhibit 1 for Fortis' EPS contribution by segment.

Exhibit 1 - Fortis' EPS Contribution by Segment

Source: Company reports; Scotia Capital estimates.

- **2011E/2012E EPS forecasts unchanged:** We conservatively decided to maintain all our 2011/12 EPS estimates and valuation parameters as is. Fortis beat our expectations after adjusting for non-recurring items partially due to colder weather. Therefore we left our 2011E/2012E EPS unchanged at \$1.76/\$1.85.
- **Sector valuation:** We cut our energy utilities recommendation from market weight in mid-December 2010 to underweight in late January 2011 due to better-than-expected U.S. and Canadian economic data, higher 2011-12 GDP and higher interest rate forecasts. Long 10-year government bond interest rates had backed up 80 and 130 basis points in Canada and the U.S., respectively from their October 2010 bottoms. While our economists still forecast 4% 10-year Canada rates by Q4/12, we use 3.6% forecast 10-year Canada rates to help set our Q1/11 one-year-out stock price targets versus 3.1% as of yesterday. Our bias is to move up to market weight again at the moment due to softer U.S. and Canadian economic growth data.
- **FTS US acquisition targets unchanged:** Last year, PPL won over a consortium that included Fortis' bid to buy E.ON's U.S. regulated utility assets for US\$6.7B. **Fortis' CEO previously guided to looking at US\$3B-\$4B regulated utility acquisitions.** In its Q1/11 release, FTS stated it **continues to pursue acquisitions** of regulated electric and natural gas utilities in the United States and Canada. We respect FTS' track record for making value added acquisitions but **do not put any premium in our FTS P/E multiple or earnings** until we see what transpires, if anything.

Exhibit 2 - Nature of FTS' Regulation

Nature of Regulation							
Regulated Utility	Allowed Common Equity (%)	Allowed Returns (%)

## Segmented Q1/11 Results

- **Q1/11 FortisBC Energy Companies (former Terasen Gas):** Reported earnings of \$76M in Q1/11 were up 4% YOY due to: (1) higher rate base from continuous investment in utility capital assets, (2) lower earnings in Q1/10 from the timing of recording Q1/10 profits in Q3/10, and (3) lower depreciation expense due to retirement of some plant assets in late 2010. There was also unfavourable timing of increase in operating expenses, driven by higher labour costs. Net customer additions decreased 12% YOY to 1,373 in Q1/11 vs. 1,566 in Q1/10. FortisBC (former TerasenGas) is comprised of FEI (former TGI) (i.e., Vancouver), FEVI (former TGVI) (i.e., Vancouver Island), and FEWI (former TGWI) (i.e., Whistler area). FEI's allowed 2011 ROE is 9.5% on a deemed equity of 40%, **flat YOY**. FEVI's allowed ROE for 2011 is 10% on a deemed equity of 40% (see Exhibit 2), also **flat YOY**.
- **Q1/11 FortisAlberta:** Reported earnings were up \$7M YOY to \$21M due to (1) continued investment into utility capital assets and higher energy deliveries, (2) one time \$1M gain on the sale of property (\$0.01/share non recurring), and (3) the timing of revenue recording in Q1/10. **Power deliveries rose 7% YOY to 4,402 GWh**, due to increased oil & gas activities driving an increased customer base and higher deliveries with cooler winter temperatures. The client base increased by 10,800 QOQ. **Revenue for Q1/10** included only a 7.5% interim customer rate increase, **while Q1/11 revenues reflect the final approved 20.1% impact of the 2010 rate increase**.
- **Q1/11 FortisBC Electric:** Reported Q1/11 net earnings of \$19M were up \$5M from Q1/10 due to (1) a 10.4% increase in electricity sales, (2) 6.6% increase in customer electricity rates effective January 1, 2011, and (3) higher cost of capital, 2.9% increase in rate base as of September 1, 2010 (flow through of increased power costs). FortisBC's allowed 2011 ROE is 9.9%, **on an unchanged equity thickness of 40%, flat YOY**.
- **Q1/11 Newfoundland Power:** Earnings were **flat YOY**. Electricity sales went up by 2% YOY, offset by a lower ROE in 2011 (2010's 9% vs. 2011's 8.38%), higher maintenance, and labour costs.

- **Q1/11 Other Canadian Electric Utilities:** Maritime Electric and FortisOntario are in this "other" category. Earnings were **up \$1M YOY to \$6M**. Increased YOY earnings were driven by increased allowed ROE at Algoma Power to 9.85% from 8.57%. Electric sales increased by 3.5% due to colder weather. Maritime Electric's 2010 and 2011 ROE is 9.75% on deemed equity of 40%. FortisOntario OEB Canadian Niagara Power's 2010 and 2011 ROE is at only 8.01%.
- **Q1/11 Regulated Utilities - Caribbean:** This group owns 59.5% of Caribbean Utilities, 70% of Belize Electricity, and 100% of Fortis Turks and Caicos. Q1/11 **earnings were flat YOY** at \$4M. Earnings from slightly higher Grand Cayman electricity sales (\$1M increase from \$256M YOY) were fully offset by higher provision for Belize Electricity bad debts and high interest expenses on regulatory liabilities.
- **Belize Electricity ("BEL") 2008/2009 rate application:** On June 30, 2008, Fortis rejected a Belize government cut to 70.1%-owned BEL's regulated return to 8.5% from 12%. BEL eventually got 10% but the Government denied \$12.6M of retroactive diesel costs incurred for Belize power production net to FTS shareholders. The appeal hearing began in early October 2009, but the Belize trial judge postponed the case for a date still to be determined. In June 2010 the Supreme Court of Belize issued an order prohibiting the PUC from carrying out any rate-setting review proceedings or changing any rates for Belize Electricity until further order of the Supreme Court. The case was heard in October 2010 and closing arguments completed December 2010. **In March 2011, the Supreme Court of Belize dismissed the Belize Electricity's appeal.** Currently Fortis is in the process of filing an appeal and has filed an application to restrain the regulator from any rate action, pending the hearing of the appeal.
- **Q1/11 Fortis Non-Regulated Generation:** YOY earnings were **up \$1M YOY to \$3M** in Q1/11 due to higher hydro production in Belize.
- **Q1/11 Fortis Properties:** Earnings **decreased by \$1M YOY** to \$1M due to a lower average occupancy rate of 94.3% (Q1/10 rate 95.8%) and higher amortization costs because of the higher investments in Hospitality and Real Estate Divisions. The loss was partially offset by \$0.5M gain resulting from the sale of the Viking Mall in Newfoundland.
- **Corporate and other expenses:** Overall net corporate and other expenses were down **\$1M YOY** to \$20M due to lower operating expenses, and lower finance charges related to \$125M 8% Capital Securities, redeemed April 2010, offset by higher preference share dividends due to the issuance of First Preference Shares, Series H in January 2010.
- **Unchanged strong capital expenditures:** Expected utility capital expenditures remain at **\$1.2B** in 2011, mostly in B.C. and Alberta. FTS expects 2011-15 capital expenditures will be \$5.5B, unchanged, with 63% to be incurred at the regulated electric utilities, 20% at the regulated gas utilities, and 17% at the non regulated operations. **Some of the larger projects include:**
  - **\$900M** 335 MW Waneta Expansion hydro facility in B.C. of which FTS owns 51%, partnering with Columbia Power Corporation & Columbia Basin Trust (CBC/CBT, 100% owned by the B.C. government). Although non-regulated, the risk of this hydro project is reduced through fixed energy and capacity entitlements. 101 MW of the capacity will be sold to BC Hydro under a long-term PPA with the remaining 234 MW sold to FortisBC. Construction began in fall/10 and is expected to come into service in spring 2015.
  - **\$214M** (was \$210M) liquefied natural gas facility on Vancouver Island, expected to be completed in the next several weeks and in service by January 2012.
  - **\$126M** installation of automated meters at FortisAlberta was substantially completed as of March 2011.
  - **\$106M** Okanagan Transmission Reinforcement Project at FortisBC, completion expected mid-2011.
  - **\$110M** Customer Care Enhancement Project at FortisBC, expected to be completed by January 2012.
  - **\$50M** 12-store office building in St. John's Newfoundland is expected to be completed in 2013. The project is subject to municipal government approval.

- **Financial:** FTS' capital structure at 3/31/11 is 57.5% debt, 9.0% preferred equity, and 33.5% common equity, **in line with FTS' targets except for certain debt at Belize Electricity and the Exploits River Hydro Partnership**, and relatively unchanged from Q4/10. In May 2010 S&P confirmed FTS with an A- credit rating with a stable outlook. In October/10, DBRS raised FTS' credit rating to A (low) Stable. FTS stated it focuses on EPS as its final measure of financial performance.

## Definition of Scotia Capital Equity Research Ratings & Risk Rankings

We have a three-tiered rating system, with ratings of 1-Sector Outperform, 2-Sector Perform, and 3-Sector Underperform. Each analyst assigns a rating that is relative to his or her coverage universe.

Our risk ranking system provides transparency as to the underlying financial and operational risk of each stock covered. Statistical and judgmental factors considered are: historical financial results, share price volatility, liquidity of the shares, credit ratings, analyst forecasts, consistency and predictability of earnings, EPS growth, dividends, cash flow from operations, and strength of balance sheet. The Director of Research and the Supervisory Analyst jointly make the final determination of all risk rankings.

The rating assigned to each security covered in this report is based on the Scotia Capital research analyst's 12-month view on the security. Analysts may sometimes express to traders, salespeople and certain clients their shorter-term views on these securities that differ from their 12-month view due to several factors, including but not limited to the inherent volatility of the marketplace.

### Ratings

#### 1-Sector Outperform

The stock is expected to outperform the average 12-month total return of the analyst's coverage universe or an index identified by the analyst that includes, but is not limited to, stocks covered by the analyst.

#### 2-Sector Perform

The stock is expected to perform approximately in line with the average 12-month total return of the analyst's coverage universe or an index identified by the analyst that includes, but is not limited to, stocks covered by the analyst.

#### 3-Sector Underperform

The stock is expected to underperform the average 12-month total return of the analyst's coverage universe or an index identified by the analyst that includes, but is not limited to, stocks covered by the analyst.

#### Other Ratings

**Tender** – Investors are guided to tender to the terms of the takeover offer.

**Under Review** – The rating has been temporarily placed under review, until sufficient information has been received and assessed by the analyst.

### Risk Rankings

#### Low

Low financial and operational risk, high predictability of financial results, low stock volatility.

#### Medium

Moderate financial and operational risk, moderate predictability of financial results, moderate stock volatility.

#### High

High financial and/or operational risk, low predictability of financial results, high stock volatility.

#### Caution Warranted

Exceptionally high financial and/or operational risk, exceptionally low predictability of financial results, exceptionally high stock volatility. For risk-tolerant investors only.

#### Venture

Risk and return consistent with Venture Capital. For risk-tolerant investors only.

## Scotia Capital Equity Research Ratings Distribution\*

### Distribution by Ratings and Equity and Equity-Related Financings\*

\* As at April 30, 2011.

Source: Scotia Capital.

For the purposes of the ratings distribution disclosure the NASD requires members who use a ratings system with terms different than "buy," "hold/neutral" and "sell," to equate their own ratings into these categories. Our 1-Sector Outperform, 2-Sector Perform, and 3-Sector Underperform ratings are based on the criteria above, but for this purpose could be equated to buy, neutral and sell ratings, respectively.

- FTS reported Q3/11 results. Adjusted EPS was \$0.25 (prior year \$0.26), in line with our estimate of \$0.24.

**Implications**

- The Q3 result demonstrates that business risk at FTS has declined since the relatively rocky events of the summer (Belize, Vermont). With the reduction in earnings from Caribbean and unregulated businesses, and growth in regulated Canadian utility, almost 90% of future earnings are expected to derive from low-volatility and mostly regulated sources.
- Any remaining risk relates primarily to changes in allowed Canadian returns for regulated utilities. We see potential for modest reductions, but are hopeful there will be no major adjustments.
- Acquisitions of U.S. utilities are still possible despite challenges in Vermont this past summer. Like other Canadian infrastructure, FTS maintains its cost of capital advantage and potential for accretive deals.

**Recommendation**

- Though earnings were in line and there are no changes to our estimates, the company's improved risk profile may attract a modestly higher valuation. We are raising our one-year target price by \$1 to \$35 and remain comfortable recommending investors hold the stock at these levels.

## **Appendix A: Important Disclosures**

<b>Company</b>	<b>Ticker</b>	<b>Disclosures (see legend below)*</b>
Fortis Inc.	FTS	G, I, S, U

I, Matthew Akman, certify that (1) the views expressed in this report in connection with securities or issuers that I analyze accurately reflect my personal views and (2) no part of my compensation was, is, or will be directly or indirectly, related to the specific recommendations or views expressed by me in this report.

This research report was prepared by employees of Scotia Capital Inc. who have the title of Analyst.

All pricing of securities in reports is based on the closing price of the securities' principal marketplace on the night before the publication date, unless otherwise explicitly stated.

All Equity Research Analysts report to the Head of Equity Research. The Head of Equity Research reports to the Managing Director, Head of Institutional Equity Sales, Trading and Research, who is not and does not report to the Head of the Investment Banking Department. Scotia Capital has policies that are reasonably designed to prevent or control the sharing of material non-public information across internal information barriers, such as between Investment Banking and Research.

The compensation of the research analyst who prepared this report is based on several factors, including but not limited to, the overall profitability of Scotia Capital and the revenues generated from its various departments, including investment banking. Furthermore, the research analyst's compensation is charged as an expense to various Scotia Capital departments, including investment banking. Research Analysts may not receive compensation from the companies they cover.

Non-U.S. analysts may not be associated persons of Scotia Capital (USA) Inc. and therefore may not be subject to NASD Rule 2711 restrictions on communications with subject company, public appearances and trading securities held by the analysts.

For Scotia Capital Research analyst standards and disclosure policies, please visit <http://www.scotiacapital.com/disclosures>

Scotia Capital Research, 40 King Street West, 33rd Floor, Toronto, Ontario, M5H 1H1.

### \* Legend

- G** Scotia Capital USA Inc. or its affiliates has managed or co-managed a public offering in the past 12 months.
- I** Scotia Capital USA Inc. or its affiliates has received compensation for investment banking services in the past 12 months.

## Definition of Scotia Capital Equity Research Ratings & Risk Rankings

We have a three-tiered rating system, with ratings of 1-Sector Outperform, 2-Sector Perform, and 3-Sector Underperform. Each analyst assigns a rating that is relative to his or her coverage universe or an index identified by the analyst that includes, but is not limited to, stocks covered by the analyst.

Our risk ranking system provides transparency as to the underlying financial and operational risk of each stock covered. Statistical and judgmental factors considered are: historical financial results, share price volatility, liquidity of the shares, credit ratings, analyst forecasts, consistency and predictability of earnings, EPS growth, dividends, cash flow from operations, and strength of balance sheet. The Director of Research and the Supervisory Analyst jointly make the final determination of all risk rankings.

The rating assigned to each security covered in this report is based on the Scotia Capital research analyst's 12-month view on the security. Analysts may sometimes express to traders, salespeople and certain clients their shorter-term views on these securities that differ from their 12-month view due to several factors, including but not limited to the inherent volatility of the marketplace.

### Ratings

#### 1-Sector Outperform

The stock is expected to outperform the average 12-month total return of the analyst's coverage universe or an index identified by the analyst that includes, but is not limited to, stocks covered by the analyst.

#### 2-Sector Perform

The stock is expected to perform approximately in line with the average 12-month total return of the analyst's coverage universe or an index identified by the analyst that includes, but is not limited to, stocks covered by the analyst.

#### 3-Sector Underperform

The stock is expected to underperform the average 12-month total return of the analyst's coverage universe or an index identified by the analyst that includes, but is not limited to, stocks covered by the analyst.

### Other Ratings

**Tender** – Investors are guided to tender to the terms of the takeover offer.

**Under Review** – The rating has been temporarily placed under review, until sufficient information has been received and assessed by the analyst.

### Risk Rankings

#### Low

Low financial and operational risk, high predictability of financial results, low stock volatility.

#### Medium

Moderate financial and operational risk, moderate predictability of financial results, moderate stock volatility.

#### High

High financial and/or operational risk, low predictability of financial results, high stock volatility.

#### Caution Warranted

Exceptionally high financial and/or operational risk, exceptionally low predictability of financial results, exceptionally high stock volatility. For risk-tolerant investors only.

#### Venture

Risk and return consistent with Venture Capital. For risk-tolerant investors only.

## Scotia Capital Equity Research Ratings Distribution\*

### Distribution by Ratings and Equity and Equity-Related Financings\*

\* As at October 31, 2011.

Source: Scotia Capital.

For the purposes of the ratings distribution disclosure the NASD requires members who use a ratings system with terms different than "buy," "hold/neutral" and "sell," to equate their own ratings into these categories. Our 1-Sector Outperform, 2-Sector Perform, and 3-Sector Underperform ratings are based on the criteria above, but for this purpose could be equated to buy, neutral and sell ratings, respectively.

**General Disclosures**

This report has been prepared by analysts who are employed by the Research Department of Scotia Capital™. The Scotia Capital trademark represents the corporate and investment banking businesses of the Scotiabank Group.

All other trademarks are acknowledged as belonging to their respective owners and the display of such trademarks is for informational use only.

Scotia Capital Research produces research reports under a single marketing identity referred to as "Globally-branded research" under U.S. rules. This research is produced on a single global research platform with one set of rules which meet the most stringent standards set by regulators in the various jurisdictions in which the research reports are produced. In addition, the analysts who produce the research reports, regardless of location, are subject to one set of policies designed to meet the most stringent rules established by regulators in the various jurisdictions where the research reports are produced.

This report is provided to you for informational purposes only. This report is not, and is not to be construed as, an offer to sell or solicitation of an offer to buy any securities and/or commodity futures contracts.

The securities mentioned in this report may neither be suitable for all investors nor eligible for sale in some jurisdictions where the report is distributed.

The information and opinions contained herein have been compiled or arrived at from sources believed reliable, however, Scotia Capital makes no representation or warranty, express or implied, as to their accuracy or completeness.

Scotia Capital has policies designed to make best efforts to ensure that the information contained in this report is current as of the date of this report, unless otherwise specified.

Any prices that are stated in this report are for informational purposes only. Scotia Capital makes no representation that any transaction may be or could have been effected at those prices.

Any opinions expressed herein are those of the author(s) and are subject to change without notice and may differ or be contrary from the opinions expressed by other departments of Scotia Capital or any of its affiliates.

Neither Scotia Capital nor its affiliates accepts any liability whatsoever for any direct or consequential loss arising from any use of this report or its contents.

Equity research reports published by Scotia Capital are available electronically via: Bloomberg, Thomson Financial/First Call - Research Direct, Reuters, Capital IQ, and FactSet. Institutional clients with questions regarding distribution of equity research should contact us at 1-800-208-7666.

This report and all the information, opinions, and conclusions contained in it are protected by copyright. This report may not be reproduced in whole or in part, or referred to in any manner whatsoever, nor may the information, opinions, and conclusions contained in it be referred to without the prior express consent of Scotia Capital.

**Additional Disclosures**

**Canada:** This report is distributed by Scotia Capital Inc., a subsidiary of The Bank of Nova Scotia. DWM Securities Inc. is a subsidiary of The Bank of Nova Scotia and an affiliate of Scotia Capital Inc. Scotia Capital Inc. and DWM Securities Inc. are members of the Canadian Investor Protection Fund and the Investment Industry Regulatory Organization of Canada. DWM Securities Inc. is not in the business of providing investment banking services.

**Hong Kong:** This report is distributed by The Bank of Nova Scotia Hong Kong Branch, which is authorized by the Securities and Future Commission to conduct Type 1, Type 4 and Type 6 regulated activities and regulated by the Hong Kong Monetary Authority.

**Mexico:** This report is distributed by Scotia Inverlat Casa de Bolsa S.A. de C.V., a subsidiary of the Bank of Nova Scotia.

**Singapore:** This report is distributed by The Bank of Nova Scotia Asia Limited, a subsidiary of The Bank of Nova Scotia. The Bank of Nova Scotia Asia Limited is authorised and regulated by the Monetary Authority of Singapore, and exempted under Section 99(1)(a), and (b), (c) and (d) of the Securities and Futures Act to conduct regulated activities.

**United Kingdom and the rest of Europe:** Except as otherwise specified herein, this report is distributed by Scotia Capital (Europe) Limited, a subsidiary of the Bank of Nova Scotia. Scotia Capital (Europe) Limited is authorized and regulated by the Financial Services Authority (FSA). Scotia Capital (Europe) Limited research complies with all the FSA requirements and laws concerning disclosures and these are indicated on the research where applicable. Scotia Capital Inc. is regulated by the FSA for the conduct of investment business in the UK.

**United States:** This report is distributed by Scotia Capital (USA) Inc., a subsidiary of Scotia Capital Inc., and a registered U.S. broker-dealer. All transactions by a U.S. investor of securities mentioned in this report must be effected through Scotia Capital (USA) Inc.

**Non-U.S. investors** wishing to effect a transaction in the securities discussed in this report should contact a Scotia Capital entity in their local jurisdiction unless governing law permits otherwise.

## BC to Review Regulated Returns

### Event

- The B.C. Utilities Commission (BCUC) announced it will initiate a generic cost of capital proceeding in early 2012.

### Implications

- The BCUC last reviewed cost of capital in early 2009. Given that government bond yields and credit spreads have come in significantly since that time, and given that the BCUC unilaterally initiated the proceeding, we have to assume allowed returns are going lower.
- Fortis is the only utility we cover with material exposure to allowed returns on equity in B.C. Allowed ROEs are 9.5%-10%. With about \$1.9B of 2013E regulated equity in the province, every 100 basis point reduction in allowed ROE decreases 2013E EPS by about \$0.10.
- We are therefore reducing our 2013E EPS estimate by \$0.10 and our one-year target price by \$1 to \$34. In a separate regulatory proceeding, the Alberta Utilities Commission is due to decide soon on a new generic ROE. Our estimates assume it is reduced to 8.5% from 9%.

### Recommendation

- It will be hard for FTS shares to move up given new uncertainty around allowed returns in a core jurisdiction. We maintain our 2-SP rating and would only accumulate aggressively closer to \$30.

Qtly Adj EPS (Basic)	Q1	Q2	Q3	Q4	Year	P/E

## Definition of Scotia Capital Equity Research Ratings & Risk Rankings

We have a three-tiered rating system, with ratings of 1-Sector Outperform, 2-Sector Perform, and 3-Sector Underperform. Each analyst assigns a rating that is relative to his or her coverage universe or an index identified by the analyst that includes, but is not limited to, stocks covered by the analyst.

Our risk ranking system provides transparency as to the underlying financial and operational risk of each stock covered. Statistical and judgmental factors considered are: historical financial results, share price volatility, liquidity of the shares, credit ratings, analyst forecasts, consistency and predictability of earnings, EPS growth, dividends, cash flow from operations, and strength of balance sheet. The Director of Research and the Supervisory Analyst jointly make the final determination of all risk rankings.

The rating assigned to each security covered in this report is based on the Scotia Capital research analyst's 12-month view on the security. Analysts may sometimes express to traders, salespeople and certain clients their shorter-term views on these securities that differ from their 12-month view due to several factors, including but not limited to the inherent volatility of the marketplace.

### Ratings

#### 1-Sector Outperform

The stock is expected to outperform the average 12-month total return of the analyst's coverage universe or an index identified by the analyst that includes, but is not limited to, stocks covered by the analyst.

#### 2-Sector Perform

The stock is expected to perform approximately in line with the average 12-month total return of the analyst's coverage universe or an index identified by the analyst that includes, but is not limited to, stocks covered by the analyst.

#### 3-Sector Underperform

The stock is expected to underperform the average 12-month total return of the analyst's coverage universe or an index identified by the analyst that includes, but is not limited to, stocks covered by the analyst.

### Other Ratings

**Tender** – Investors are guided to tender to the terms of the takeover offer.

**Under Review** – The rating has been temporarily placed under review, until sufficient information has been received and assessed by the analyst.

### Risk Rankings

#### Low

Low financial and operational risk, high predictability of financial results, low stock volatility.

#### Medium

Moderate financial and operational risk, moderate predictability of financial results, moderate stock volatility.

#### High

High financial and/or operational risk, low predictability of financial results, high stock volatility.

#### Caution Warranted

Exceptionally high financial and/or operational risk, exceptionally low predictability of financial results, exceptionally high stock volatility. For risk-tolerant investors only.

#### Venture

Risk and return consistent with Venture Capital. For risk-tolerant investors only.

## Scotia Capital Equity Research Ratings Distribution\*

### Distribution by Ratings and Equity and Equity-Related Financings\*

■ Percentage of companies covered by Scotia Capital Equity Research within each rating category.

■ Percentage of companies within each rating category for which Scotia Capital has undertaken an underwriting liability or has provided advice for a fee within the last 12 months.

## NEB 2012 Benchmark ROE Drags New Lows

### Event

- The National Energy Board (NEB) yesterday released a 7.58% 2012 benchmark ROE for certain long-haul pipelines.

### Implications

- The NEB benchmark does not apply to FTS (nor even to most Canadian pipelines any more) but establishes challenging optics going into the 2012 B.C. Utilities Commission (BCUC) hearing on cost of capital.
- As we wrote last week, the allowed ROE in B.C. is susceptible to a reduction as it sits at 9.5% - 10.15% depending on the asset.
- The NEB benchmark is only one data point and we are not suggesting the BCUC is going to 7.58%. Ontario's ROE is above 9% and comparable U.S. utility investments attract similar returns.
- Nevertheless, consumer advocates will no doubt highlight the NEB benchmark during the hearing process and it could influence the BCUC's decision.

### Recommendation

- As highlighted in our Dec. 1 comment, FTS faces a risk to 2013 earnings. Our estimate reflects a 100 basis point reduction in the B.C. allowed ROE (every 100 basis points is about \$0.11 in EPS). The stock could remain in a rut pending resolution of the matter.

## Definition of Scotia Capital Equity Research Ratings & Risk Rankings

We have a three-tiered rating system, with ratings of 1-Sector Outperform, 2-Sector Perform, and 3-Sector Underperform. Each analyst assigns a rating that is relative to his or her coverage universe or an index identified by the analyst that includes, but is not limited to, stocks covered by the analyst.

Our risk ranking system provides transparency as to the underlying financial and operational risk of each stock covered. Statistical and judgmental factors considered are: historical financial results, share price volatility, liquidity of the shares, credit ratings, analyst forecasts, consistency and predictability of earnings, EPS growth, dividends, cash flow from operations, and strength of balance sheet. The Director of Research and the Supervisory Analyst jointly make the final determination of all risk rankings.

The rating assigned to each security covered in this report is based on the Scotia Capital research analyst's 12-month view on the security. Analysts may sometimes express to traders, salespeople and certain clients their shorter-term views on these securities that differ from their 12-month view due to several factors, including but not limited to the inherent volatility of the marketplace.

### Ratings

#### 1-Sector Outperform

The stock is expected to outperform the average 12-month total return of the analyst's coverage universe or an index identified by the analyst that includes, but is not limited to, stocks covered by the analyst.

#### 2-Sector Perform

The stock is expected to perform approximately in line with the average 12-month total return of the analyst's coverage universe or an index identified by the analyst that includes, but is not limited to, stocks covered by the analyst.

#### 3-Sector Underperform

The stock is expected to underperform the average 12-month total return of the analyst's coverage universe or an index identified by the analyst that includes, but is not limited to, stocks covered by the analyst.

### Other Ratings

**Tender** – Investors are guided to tender to the terms of the takeover offer.

**Under Review** – The rating has been temporarily placed under review, until sufficient information has been received and assessed by the analyst.

### Risk Rankings

#### Low

Low financial and operational risk, high predictability of financial results, low stock volatility.

#### Medium

Moderate financial and operational risk, moderate predictability of financial results, moderate stock volatility.

#### High

High financial and/or operational risk, low predictability of financial results, high stock volatility.

#### Caution Warranted

Exceptionally high financial and/or operational risk, exceptionally low predictability of financial results, exceptionally high stock volatility. For risk-tolerant investors only.

#### Venture

Risk and return consistent with Venture Capital. For risk-tolerant investors only.

## Scotia Capital Equity Research Ratings Distribution\*

### Distribution by Ratings and Equity and Equity-Related Financings\*

\* As at November 30, 2011.

Source: Scotia Capital.

For the purposes of the ratings distribution disclosure the NASD requires members who use a ratings system with terms different than "buy," "hold/neutral" and "sell," to equate their own ratings into these categories. Our 1-Sector Outperform, 2-Sector Perform, and 3-Sector Underperform ratings are based on the criteria above, but for this purpose could be equated to buy, neutral and sell ratings, respectively.

## Churning Through a Soft Patch

### Event

- FTS reported Q4/11 EPS of \$0.46 vs. \$0.49 in Q4/10 (our est. - \$0.45).

### Implications

- Though full-year earnings were up, FTS growth is at least for now not what it used to be. Normalized 2011 EPS was \$1.69 vs. \$1.65 in 2010.
- The soft patch may continue for another year or two due to several factors including downward pressure on allowed ROEs, weak economic conditions in the Caribbean, and dilution from the 2011 equity issue.
- In particular, we remain concerned about the B.C. cost of capital review. The utilities commission has provided no update on a schedule but has stated an intention to hold a hearing "early in 2012."
- Goods news is regulated utility investments continue at a rapid pace, with a \$1.3B capital budget for this year. Given balance sheet strength due to recent equity issuance, growth should offset ROE compression.

### Recommendation

- Holding FTS shares may not hurt in 2012, but we see little potential for near-term capital appreciation. Despite an attractive investment program, the B.C. ROE proceeding casts uncertainty over earnings growth prospects and the stock is not cheap (free cash yield of 7.3% vs. group at 8.7%). We maintain our 2-SP rating and \$34 one-year target.

## Definition of Scotiabank, Global Banking and Markets Equity Research Ratings & Risk Rankings

We have a three-tiered rating system, with ratings of 1-Sector Outperform, 2-Sector Perform, and 3-Sector Underperform. Each analyst assigns a rating that is relative to his or her coverage universe or an index identified by the analyst that includes, but is not limited to, stocks covered by the analyst.

Our risk ranking system provides transparency as to the underlying financial and operational risk of each stock covered. Statistical and judgmental factors considered are: historical financial results, share price volatility, liquidity of the shares, credit ratings, analyst forecasts, consistency and predictability of earnings, EPS growth, dividends, cash flow from operations, and strength of balance sheet. The Director of Research and the Supervisory Analyst jointly make the final determination of all risk rankings.

The rating assigned to each security covered in this report is based on the Scotiabank, Global Banking and Markets research analyst's 12-month view on the security. Analysts may sometimes express to traders, salespeople and certain clients their shorter-term views on these securities that differ from their 12-month view due to several factors, including but not limited to the inherent volatility of the marketplace.

### Ratings

#### 1-Sector Outperform

The stock is expected to outperform the average 12-month total return of the analyst's coverage universe or an index identified by the analyst that includes, but is not limited to, stocks covered by the analyst.

#### 2-Sector Perform

The stock is expected to perform approximately in line with the average 12-month total return of the analyst's coverage universe or an index identified by the analyst that includes, but is not limited to, stocks covered by the analyst.

#### 3-Sector Underperform

The stock is expected to underperform the average 12-month total return of the analyst's coverage universe or an index identified by the analyst that includes, but is not limited to, stocks covered by the analyst.

### Other Ratings

*Tender* – Investors are guided to tender to the terms of the takeover offer.

*Under Review* – The rating has been temporarily placed under review, until sufficient information has been received and assessed by the analyst.

### Risk Rankings

#### Low

Low financial and operational risk, high predictability of financial results, low stock volatility.

#### Medium

Moderate financial and operational risk, moderate predictability of financial results, moderate stock volatility.

#### High

High financial and/or operational risk, low predictability of financial results, high stock volatility.

#### Caution Warranted

Exceptionally high financial and/or operational risk, exceptionally low predictability of financial results, exceptionally high stock volatility. For risk-tolerant investors only.

#### Venture

Risk and return consistent with Venture Capital. For risk-tolerant investors only.

## Scotiabank, Global Banking and Markets Equity Research Ratings Distribution\*

### Distribution by Ratings and Equity and Equity-Related Financings\*

\* As at January 31, 2012.

Source: Scotiabank GBM.

For the purposes of the ratings distribution disclosure the NASD requires members who use a ratings system with terms different than "buy," "hold/neutral" and "sell," to equate their own ratings into these categories. Our 1-Sector Outperform, 2-Sector Perform, and 3-Sector Underperform ratings are based on the criteria above, but for this purpose could be equated to buy, neutral and sell ratings, respectively.

## CH Energy - It's a Start

### Event

- FTS announced an agreement to acquire CH Energy Group (CHG-NYSE) for US\$1.5B in cash and assumed debt.

### Implications

- The CH Energy acquisition, in our view, is a logical starting point for FTS in its quest for U.S. utility growth. The asset is consistent with the FTS geography, business profile, and risk profile.
- However, the transaction is not in itself a means to any end. We see the proposed valuation as relatively high in comparison to recent historical utility acquisitions by Canadian companies. Furthermore, there are regulatory and other risks in the year-long closing process.
- In the medium term, further growth opportunities may arise from the deal. CH is growing at about 5%, and contiguous regulated utilities may come for sale as European conglomerates shed non-core assets.

### Recommendation

- The deal's short-term value remains uncertain due to transaction price and regulatory uncertainty. Meanwhile, earnings growth will likely be modest considering the potential for erosion of allowed ROEs in British Columbia. For these reasons, we still see the stock as range-bound in 2012 and maintain our 2-SP rating and \$34 one-year price target.

Qtly Adj EPS (Basic)	Q1	Q2	Q3	Q4	Year	P/E

## CH Energy - It's a Start

- Acquiring an almost fully regulated distribution utility in rural and small-town New York sounds like a dull prospect. Unless, of course, your business is running regulated distribution utilities in rural areas and small towns. And so, for FTS, the proposed US\$1.5B acquisition of CH Energy Group is not dull. On the contrary, it is the potential start of a broader U.S. growth initiative.
- The acquisition appears logical for FTS due to its consistency with the existing business. FTS had its start in running northeast electrical utilities with no generation assets, and CH Energy fits this bill with about 80% of its customers in electrical service and the rest in natural gas service. The target company fits the FTS low-risk profile, as it takes no commodity price risk and maintains variance accounts for potential expenditures on items like environmental remediation and pension benefits.
- But CH Energy is not in itself a means to an end for FTS because it is not meaningfully accretive at the proposed transaction price. Our preliminary analysis suggests FTS is proposing to pay about 1.5x closing rate base, 20.6x P/E, and 10.4x EBITDA<sup>1</sup>. These acquisition multiples sit toward the high end of the range for recent utility acquisitions by Canadian companies.

Exhibit 1 - Recent Utility Acquisitions by Canadian Companies

Announced Date	Target	Acquirer	EV (\$M)	Rate Base	Rate Base Multiple	Regulated Book Equity Multiple	Effective ROE
6/23/2011	Central Vermont Public Service	Gaz Metro	US\$702	US\$426	1.6x	2.1x	4.4%
2/21/2012	CH Energy Group	Fortis	US\$1,443	US\$957	1.5x	2.1x	4.9%
9/15/2003	Aquila Canada	Fortis	C\$1,394	C\$943	1.5x	2.2x	4.4%
2/26/2007	Terasen Inc. (B.C. Gas)	Fortis	C\$3,700	C\$3,000	1.2x	1.7x	5.1%
10/5/2011	Bristol Water (70% interest)	Capstone	C\$432	C\$354	1.2x	1.6x	6.2%
7/7/2011	Western Australia Gas Networks (WestNet)	ATCO	A\$1,000	A\$840	1.2x	1.5x	7.1%
12/9/2010	Granite State Electric Co. & EnergyNorth Natural Gas Inc.	Algonquin	US\$285	US\$251	1.1x	1.2x	7.7%
5/13/2011	Midwest Natural Gas Utilities (Atmos Energy)	Algonquin	US\$124	US\$112	1.1x	1.4x	6.8%

Source: Company reports; Scotiabank GBM estimates.

- There is no way for FTS to make up the premium, as there are no meaningful synergies available in the FTS decentralized operating model. Moreover, there is still some chance FTS has to raise its bid and/or that there is some rate reduction or mitigation required in the regulatory approval process. Finally, we believe appropriate long-term financing involves \$400M-\$500M of new equity. As a result, there are no changes to our 2013 EPS estimates (deal forecast to close in 1H/13).
- Companies can add shareholder value in the acquisition of regulated utilities even when they pay sizeable premiums, but generally only if there is significant organic growth. FTS grows EPS building utility assets at book value because its cost of capital is generally below the regulated returns (10% in the case of CH Energy). That is how FTS added value in the acquisition of Aquila, which was done at 1.6x rate base. The target in this case does not have the double-digit organic growth profile of Aquila, but it is not absent organic growth either. It appears the rate base grows at about 5%/year.

<sup>1</sup> P/E based on trailing 2011 adjusted EPS as disclosed by CHG and EV/EBITDA from a CHG press release.

Exhibit 2 - Central Hudson Gas & Electric Projected Rate Base Growth

Source: Company reports; Scotiabank GBM estimates.

- Contiguous acquisitions are another potential area for value-add going forward. The large utility owners in NY State (other than ConEd) are National Grid and Iberdrola, both of whom have been sellers of small non-core utility assets in recent years as they struggle with European operations and sub-par returns. On this basis, opportunities may emerge for FTS. Having said that, it appears the U.S. Northeast is still core to both European utility conglomerates - National Grid has 6.4 m customers and Iberdrola has 2.4 m customers in the region (not to mention transmission assets).
- The proposed CH Energy Group acquisition is a logical starting point for FTS in its U.S. acquisition strategy. Still, we see the stock as range-bound in 2012 for several reasons. The deal is not meaningfully accretive on its own and the regulatory approval process is lengthy and uncertain. Meanwhile, earnings growth will likely be modest considering the potential for erosion of allowed ROEs in British Columbia.
- We suggest monitoring progress on the CH Energy acquisition and potential follow-on transactions that may add shareholder value. FTS is a skilled operator and CH Energy could be the start of a more lucrative acquisition trend. However, there is no urgency to aggressively acquire FTS shares now in our opinion. Our 2-Sector Perform rating and \$34 one-year target price are unchanged following the acquisition announcement.

## Definition of Scotiabank, Global Banking and Markets Equity Research Ratings & Risk Rankings

We have a three-tiered rating system, with ratings of 1-Sector Outperform, 2-Sector Perform, and 3-Sector Underperform. Each analyst assigns a rating that is relative to his or her coverage universe or an index identified by the analyst that includes, but is not limited to, stocks covered by the analyst.

Our risk ranking system provides transparency as to the underlying financial and operational risk of each stock covered. Statistical and judgmental factors considered are: historical financial results, share price volatility, liquidity of the shares, credit ratings, analyst forecasts, consistency and predictability of earnings, EPS growth, dividends, cash flow from operations, and strength of balance sheet. The Director of Research and the Supervisory Analyst jointly make the final determination of all risk rankings.

The rating assigned to each security covered in this report is based on the Scotiabank, Global Banking and Markets research analyst's 12-month view on the security. Analysts may sometimes express to traders, salespeople and certain clients their shorter-term views on these securities that differ from their 12-month view due to several factors, including but not limited to the inherent volatility of the marketplace.

### Ratings

#### 1-Sector Outperform

The stock is expected to outperform the average 12-month total return of the analyst's coverage universe or an index identified by the analyst that includes, but is not limited to, stocks covered by the analyst.

#### 2-Sector Perform

The stock is expected to perform approximately in line with the average 12-month total return of the analyst's coverage universe or an index identified by the analyst that includes, but is not limited to, stocks covered by the analyst.

#### 3-Sector Underperform

The stock is expected to underperform the average 12-month total return of the analyst's coverage universe or an index identified by the analyst that includes, but is not limited to, stocks covered by the analyst.

### Other Ratings

*Tender* – Investors are guided to tender to the terms of the takeover offer.

*Under Review* – The rating has been temporarily placed under review, until sufficient information has been received and assessed by the analyst.

### Risk Rankings

#### Low

Low financial and operational risk, high predictability of financial results, low stock volatility.

#### Medium

Moderate financial and operational risk, moderate predictability of financial results, moderate stock volatility.

#### High

High financial and/or operational risk, low predictability of financial results, high stock volatility.

#### Caution Warranted

Exceptionally high financial and/or operational risk, exceptionally low predictability of financial results, exceptionally high stock volatility. For risk-tolerant investors only.

#### Venture

Risk and return consistent with Venture Capital. For risk-tolerant investors only.

## Scotiabank, Global Banking and Markets Equity Research Ratings Distribution\*

### Distribution by Ratings and Equity and Equity-Related Financings\*

\* As at January 31, 2012.

Source: Scotiabank GBM.

For the purposes of the ratings distribution disclosure the NASD requires members who use a ratings system with terms different than "buy," "hold/neutral" and "sell," to equate their own ratings into these categories. Our 1-Sector Outperform, 2-Sector Perform, and 3-Sector Underperform ratings are based on the criteria above, but for this purpose could be equated to buy, neutral and sell ratings, respectively.

**General Disclosures**

This report has been prepared by analysts who are employed by the Research Department of Scotiabank, Global Banking and Markets. Scotiabank, together with "Global Banking and Markets", is a marketing name for the global corporate and investment banking and capital markets businesses of The Bank of Nova Scotia and certain of its affiliates in the countries where they operate, including Scotia Capital Inc.

All other trademarks are acknowledged as belonging to their respective owners and the display of such trademarks is for informational use only.

Scotiabank, Global Banking and Markets Research produces research reports under a single marketing identity referred to as "Globally-branded research" under U.S. rules. This research is produced on a single global research platform with one set of rules which meet the most stringent standards set by regulators in the various jurisdictions in which the research reports are produced. In addition, the analysts who produce the research reports, regardless of location, are subject to one set of policies designed to meet the most stringent rules established by regulators in the various jurisdictions where the research reports are produced.

This report is provided to you for informational purposes only. This report is not, and is not to be construed as, an offer to sell or solicitation of an offer to buy any securities and/or commodity futures contracts.

The securities mentioned in this report may neither be suitable for all investors nor eligible for sale in some jurisdictions where the report is distributed.

The information and opinions contained herein have been compiled or arrived at from sources believed reliable, however, Scotiabank, Global Banking and Markets makes no representation or warranty, express or implied, as to their accuracy or completeness.

Scotiabank, Global Banking and Markets has policies designed to make best efforts to ensure that the information contained in this report is current as of the date of this report, unless otherwise specified.

Any prices that are stated in this report are for informational purposes only. Scotiabank, Global Banking and Markets makes no representation that any transaction may be or could have been effected at those prices.

Any opinions expressed herein are those of the author(s) and are subject to change without notice and may differ or be contrary from the opinions expressed by other departments of Scotiabank, Global Banking and Markets or any of its affiliates.

Neither Scotiabank, Global Banking and Markets nor its affiliates accepts any liability whatsoever for any direct or consequential loss arising from any use of this report or its contents.

Equity research reports published by Scotiabank, Global Banking and Markets are available electronically via: Bloomberg, Thomson Financial/First Call - Research Direct, Reuters, Capital IQ, and FactSet. ## Grinding Through a Soft Spot

### Event

- FTS reported adjusted Q1/12 EPS of \$0.66 vs. our estimate of \$0.69 and \$0.67 in Q1/11.

### Implications

- The Q1 report reinforces our view that FTS is going through a low-growth phase. While ratebase has grown, reductions in achieved returns are offsetting at this time.
- That trend probably continues through 2013 due to our forecast decline in allowed ROE in B.C. The BCUC has now commenced a proceeding that should conclude this year for Jan. 1, 2013 rates. We are assuming a 100 basis point reduction in allowed returns.
- Going forward from there, continued utility asset expansion and, to a lesser extent, the CH Energy acquisition (scheduled to close early next year) should bring some earnings growth back into the company. We are introducing a 2014 EPS estimate of \$1.85.

### Recommendation

- FTS is not cheap (20x P/E and free cash yield of 7.4%) and growth will likely remain slow for now. However, downside is limited as most of the key risks such as Belize have dissipated and earnings momentum should change in 2014. On this basis, we maintain our Sector Perform rating.

## Definition of Scotiabank, Global Banking and Markets Equity Research Ratings & Risk Rankings

We have a three-tiered rating system, with ratings of 1-Sector Outperform, 2-Sector Perform, and 3-Sector Underperform. Each analyst assigns a rating that is relative to his or her coverage universe or an index identified by the analyst that includes, but is not limited to, stocks covered by the analyst.

Our risk ranking system provides transparency as to the underlying financial and operational risk of each stock covered. Statistical and judgmental factors considered are: historical financial results, share price volatility, liquidity of the shares, credit ratings, analyst forecasts, consistency and predictability of earnings, EPS growth, dividends, cash flow from operations, and strength of balance sheet. The Director of Research and the Supervisory Analyst jointly make the final determination of all risk rankings.

The rating assigned to each security covered in this report is based on the Scotiabank, Global Banking and Markets research analyst's 12-month view on the security. Analysts may sometimes express to traders, salespeople and certain clients their shorter-term views on these securities that differ from their 12-month view due to several factors, including but not limited to the inherent volatility of the marketplace.

### Ratings

#### 1-Sector Outperform

The stock is expected to outperform the average 12-month total return of the analyst's coverage universe or an index identified by the analyst that includes, but is not limited to, stocks covered by the analyst.

#### 2-Sector Perform

The stock is expected to perform approximately in line with the average 12-month total return of the analyst's coverage universe or an index identified by the analyst that includes, but is not limited to, stocks covered by the analyst.

#### 3-Sector Underperform

The stock is expected to underperform the average 12-month total return of the analyst's coverage universe or an index identified by the analyst that includes, but is not limited to, stocks covered by the analyst.

### Other Ratings

*Tender* – Investors are guided to tender to the terms of the takeover offer.

*Under Review* – The rating has been temporarily placed under review, until sufficient information has been received and assessed by the analyst.

### Risk Rankings

#### Low

Low financial and operational risk, high predictability of financial results, low stock volatility.

#### Medium

Moderate financial and operational risk, moderate predictability of financial results, moderate stock volatility.

#### High

High financial and/or operational risk, low predictability of financial results, high stock volatility.

#### Caution Warranted

Exceptionally high financial and/or operational risk, exceptionally low predictability of financial results, exceptionally high stock volatility. For risk-tolerant investors only.

#### Venture

Risk and return consistent with Venture Capital. For risk-tolerant investors only.

## Scotiabank, Global Banking and Markets Equity Research Ratings Distribution\*

### Distribution by Ratings and Equity and Equity-Related Financings\*

\* As at April 30, 2012.

Source: Scotiabank GBM.

For the purposes of the ratings distribution disclosure the NASD requires members who use a ratings system with terms different than "buy," "hold/neutral" and "sell," to equate their own ratings into these categories. Our 1-Sector Outperform, 2-Sector Perform, and 3-Sector Underperform ratings are based on the criteria above, but for this purpose could be equated to buy, neutral and sell ratings, respectively.

**General Disclosures**

This report has been prepared by analysts who are employed by the Research Department of Scotiabank, Global Banking and Markets. Scotiabank, together with "Global Banking and Markets", is a marketing name for the global corporate and investment banking and capital markets businesses of The Bank of Nova Scotia and certain of its affiliates in the countries where they operate, including Scotia Capital Inc.

All other trademarks are acknowledged as belonging to their respective owners and the display of such trademarks is for informational use only.

Scotiabank, Global Banking and Markets Research produces research reports under a single marketing identity referred to as "Globally-branded research" under U.S. rules. This research is produced on a single global research platform with one set of rules which meet the most stringent standards set by regulators in the various jurisdictions in which the research reports are produced. In addition, the analysts who produce the research reports, regardless of location, are subject to one set of policies designed to meet the most stringent rules established by regulators in the various jurisdictions where the research reports are produced.

This report is provided to you for informational purposes only. This report is not, and is not to be construed as, an offer to sell or solicitation of an offer to buy any securities and/or commodity futures contracts.

The securities mentioned in this report may neither be suitable for all investors nor eligible for sale in some jurisdictions where the report is distributed.

The information and opinions contained herein have been compiled or arrived at from sources believed reliable, however, Scotiabank, Global Banking and Markets makes no representation or warranty, express or implied, as to their accuracy or completeness.

Scotiabank, Global Banking and Markets has policies designed to make best efforts to ensure that the information contained in this report is current as of the date of this report, unless otherwise specified.

Any prices that are stated in this report are for informational purposes only. Scotiabank, Global Banking and Markets makes no representation that any transaction may be or could have been effected at those prices.

Any opinions expressed herein are those of the author(s) and are subject to change without notice and may differ or be contrary from the opinions expressed by other departments of Scotiabank, Global Banking and Markets or any of its affiliates.

Neither Scotiabank, Global Banking and Markets nor its affiliates accepts any liability whatsoever for any direct or consequential loss arising from any use of this report or its contents.

Equity research reports published by Scotiabank, Global Banking and Markets are available electronically via: Bloomberg, Thomson Financial/First Call - Research Direct, Reuters, Capital IQ, and FactSet. Institutional clients with questions regarding distribution of equity research should contact us at 1-800-208-7666.

This report and all the information, opinions, and conclusions contained in it are protected by copyright. This report may not be reproduced in whole or in part, or referred to in any manner whatsoever, nor may the information, opinions, and conclusions contained in it be referred to without the prior express consent of Scotiabank, Global Banking and Markets.

**Additional Disclosures**

Canada: This report is distributed by Scotia Capital Inc., a subsidiary of The Bank of Nova Scotia. DWM Securities Inc. is a subsidiary of The Bank of Nova Scotia.

Nova Scotia and an affiliate of Scotia Capital Inc. Scotia Capital Inc. and DWM Securities Inc. are members of the Canadian Investor Protection Fund and the Investment Industry Regulatory Organization of Canada. DWM Securities Inc. does not provide investment banking services.

Hong Kong: This report is distributed by The Bank of Nova Scotia Hong Kong Branch, which is authorized by the Securities and Future Commission to conduct Type 1, Type 4 and Type 6 regulated activities and regulated by the Hong Kong Monetary Authority.

Mexico: This report is distributed by Scotia Inverlat Casa de Bolsa S.A. de C.V., a subsidiary of the Bank of Nova Scotia.

Peru: This report is distributed by Scotia Sociedad Agente de Bolsa S.A., a subsidiary of The Bank of Nova Scotia.

Singapore: This report is distributed by The Bank of Nova Scotia Asia Limited, a subsidiary of The Bank of Nova Scotia. The Bank of Nova Scotia Asia Limited is authorised and regulated by the Monetary Authority of Singapore, and exempted under Section 99(1)(a), and (b), (c) and (d) of the Securities and Futures Act to conduct regulated activities.

United Kingdom and the rest of Europe: Except as otherwise specified herein, this report is distributed by Scotiabank Europe PLC, a subsidiary of the Bank of Nova Scotia. Scotiabank Europe PLC is authorized and regulated by the Financial Services Authority (FSA). Scotiabank Europe PLC complies with all the FSA requirements concerning research and the associated disclosures and these are indicated on the research where applicable.

United States: This report is distributed by Scotia Capital (USA) Inc., a subsidiary of Scotia Capital Inc., and a registered U.S. broker-dealer. All transactions by a U.S. investor of securities mentioned in this report must be effected through Scotia Capital (USA) Inc.

Non-U.S. investors wishing to effect a transaction in the securities discussed in this report should contact a Scotiabank, Global Banking and Markets entity in their local jurisdiction unless governing law permits otherwise.

### If Anything, Too Steady

#### Event

- FTS reported adjusted Q2/12 EPS of \$0.33 vs. our estimate of \$0.32 and \$0.32 in Q2/11.

#### Implications

- In our view, the earnings report is neutral for the stock as the relatively low earnings growth scenario at FTS is now expected. Reported and "normalized" earnings are roughly the same. On the one hand there were some one-time transaction costs, but on the other hand some of the FTS Alberta earnings were attributable to a prior period (Q1).
- We remain concerned about a reduction in allowed ROE in British Columbia, though recent developments suggest there may be an effective limit to the downside. Consumer advocates and their experts across Canada have been reluctant to recommend ROEs below 8.5% (NL most recent precedent). The 100 basis point reduction (from 9.9% to 8.9%) we are modelling for 2013 seems reasonable in this context.
- The CH Energy Group acquisition faces one more meaningful regulatory hurdle with the NY PSC. Some net customer benefits (rate reduction) may be at stake, but the cost of financing remains low so the deal should still be modestly accretive when it closes in Q1/13.

#### Recommendation

- FTS remains a relatively low risk investment in challenging markets. However, growth may not accelerate until further acquisitions are announced. We maintain our target price and 2-Sector Perform rating.

## Definition of Scotiabank, Global Banking and Markets Equity Research Ratings & Risk Rankings

We have a three-tiered rating system, with ratings of 1-Sector Outperform, 2-Sector Perform, and 3-Sector Underperform. Each analyst assigns a rating that is relative to his or her coverage universe or an index identified by the analyst that includes, but is not limited to, stocks covered by the analyst.

Our risk ranking system provides transparency as to the underlying financial and operational risk of each stock covered. Statistical and judgmental factors considered are: historical financial results, share price volatility, liquidity of the shares, credit ratings, analyst forecasts, consistency and predictability of earnings, EPS growth, dividends, cash flow from operations, and strength of balance sheet. The Director of Research and the Supervisory Analyst jointly make the final determination of all risk rankings.

The rating assigned to each security covered in this report is based on the Scotiabank, Global Banking and Markets research analyst's 12-month view on the security. Analysts may sometimes express to traders, salespeople and certain clients their shorter-term views on these securities that differ from their 12-month view due to several factors, including but not limited to the inherent volatility of the marketplace.

### Ratings

#### 1-Sector Outperform

The stock is expected to outperform the average 12-month total return of the analyst's coverage universe or an index identified by the analyst that includes, but is not limited to, stocks covered by the analyst.

#### 2-Sector Perform

The stock is expected to perform approximately in line with the average 12-month total return of the analyst's coverage universe or an index identified by the analyst that includes, but is not limited to, stocks covered by the analyst.

#### 3-Sector Underperform

The stock is expected to underperform the average 12-month total return of the analyst's coverage universe or an index identified by the analyst that includes, but is not limited to, stocks covered by the analyst.

### Other Ratings

*Tender* – Investors are guided to tender to the terms of the takeover offer.

*Under Review* – The rating has been temporarily placed under review, until sufficient information has been received and assessed by the analyst.

### Risk Rankings

#### Low

Low financial and operational risk, high predictability of financial results, low stock volatility.

#### Medium

Moderate financial and operational risk, moderate predictability of financial results, moderate stock volatility.

#### High

High financial and/or operational risk, low predictability of financial results, high stock volatility.

#### Caution Warranted

Exceptionally high financial and/or operational risk, exceptionally low predictability of financial results, exceptionally high stock volatility. For risk-tolerant investors only.

#### Venture

Risk and return consistent with Venture Capital. For risk-tolerant investors only.

## Scotiabank, Global Banking and Markets Equity Research Ratings Distribution\*

Yield (Curr.) 3.5%

Key Risks to Target: Interest rates; Rate base growth; Regulated ROE; Acquisitions; Regulatory

### Event

- FTS reported adjusted Q3/12 EPS of \$0.24 vs. our estimate of \$0.25 and \$0.25 in Q3/11.

### Implications

- The acquisition of the Alberta regulated utility is still paying off for FTS as earnings were up strongly YOY (up about 15% YTD normalized). We remain optimistic the company will be able to earn fair returns under the new Alberta incentive regulatory framework.
- Unfortunately, a slow-down in other areas of the business is offsetting the Alberta growth to a large extent. Fortis Generation and Properties are slightly down despite YOY increases in their respective asset bases.
- Closing of the CH Energy acquisition is on track for Q1/13. There is still some uncertainty over the magnitude of customer benefits required but we are hopeful management can negotiate a solution.
- We believe FTS is nearing the end of its relatively slow-growth period. However, the company will likely still have to face one more challenging year in 2013 as regulatory return grind-down could again eat away at earnings growth from rate base additions.

### Recommendation

- Growth remains challenging but FTS is among the safest of the energy infrastructure companies in our coverage universe. Our 2-Sector Perform rating and \$35 1-yr TP are unchanged following the Q3 results (for more on FTS please see our full report "A Tale of Two Utes" dated October 1).

## Appendix A: Important Disclosures

Company	Ticker	Disclosures (see legend below)*
Fortis Inc.	FTS	G, I, S, U

I, Matthew Akman, certify that (1) the views expressed in this report in connection with securities or issuers that I analyze accurately reflect my personal views and (2) no part of my compensation was, is, or will be directly or indirectly, related to the specific recommendations or views expressed by me in this report.

This research report was prepared by employees of Scotia Capital Inc. and/or its affiliates who have the title of Analyst.

All pricing of securities in reports is based on the closing price of the securities' principal marketplace on the night before the publication date, unless otherwise explicitly stated.

All Equity Research Analysts report to the Head of Equity Research. The Head of Equity Research reports to the Managing Director, Head of Institutional Equity Sales, Trading and Research, who is not and does not report to the Head of the Investment Banking Department. Scotiabank, Global Banking and Markets has policies that are reasonably designed to prevent or control the sharing of material non-public information across internal information barriers, such as between Investment Banking and Research.

The compensation of the research analyst who prepared this report is based on several factors, including but not limited to, the overall profitability of Scotiabank, Global Banking and Markets and the revenues generated from its various departments, including investment banking. Furthermore, the research analyst's compensation is charged as an expense to various Scotiabank, Global Banking and Markets departments, including investment banking. Research Analysts may not receive compensation from the companies they cover.

Non-U.S. analysts may not be associated persons of Scotia Capital (USA) Inc. and therefore may not be subject to NASD Rule 2711 restrictions on communications with subject company, public appearances and trading securities held by the analysts.

For Scotiabank, Global Banking and Markets Research analyst standards and disclosure policies, please visit [gbm.scotiabank.com/disclosures](http://gbm.scotiabank.com/disclosures).  
Scotiabank, Global Banking and Markets Research, 40 King Street West, 33rd Floor, Toronto, Ontario, M5H 1H1.

### \* Legend

- G** Scotia Capital (USA) Inc. or its affiliates has managed or co-managed a public offering in the past 12 months.
- I** Scotia Capital (USA) Inc. or its affiliates has received compensation for investment banking services in the past 12 months.
- S** Scotia Capital Inc. and its affiliates collectively beneficially own in excess of 1% of one or more classes of the issued and outstanding equity securities of this issuer.
- U** Within the last 12 months, Scotia Capital Inc. and/or its affiliates have undertaken an underwriting liability with respect to equity or debt securities of, or have provided advice for a fee with respect to, this issuer.

Numbers are located to the left of the lines they represent.  
Numbers indicated with a plus sign (+) have more than one target or rating change in the given month.

## Definition of Scotiabank, Global Banking and Markets Equity Research Ratings & Risk Rankings

We have a three-tiered rating system, with ratings of 1-Sector Outperform, 2-Sector Perform, and 3-Sector Underperform. Each analyst assigns a rating that is relative to his or her coverage universe or an index identified by the analyst that includes, but is not limited to, stocks covered by the analyst.

Our risk ranking system provides transparency as to the underlying financial and operational risk of each stock covered. Statistical and judgmental factors considered are: historical financial results, share price volatility, liquidity of the shares, credit ratings, analyst forecasts, consistency and predictability of earnings, EPS growth, dividends, cash flow from operations, and strength of balance sheet. The Director of Research and the Supervisory Analyst jointly make the final determination of all risk rankings.

The rating assigned to each security covered in this report is based on the Scotiabank, Global Banking and Markets research analyst's 12-month view on the security. Analysts may sometimes express to traders, salespeople and certain clients their shorter-term views on these securities that differ from their 12-month view due to several factors, including but not limited to the inherent volatility of the marketplace.

### Ratings

#### 1-Sector Outperform

The stock is expected to outperform the average 12-month total return of the analyst's coverage universe or an index identified by the analyst that includes, but is not limited to, stocks covered by the analyst.

#### 2-Sector Perform

The stock is expected to perform approximately in line with the average 12-month total return of the analyst's coverage universe or an index identified by the analyst that includes, but is not limited to, stocks covered by the analyst.

#### 3-Sector Underperform

The stock is expected to underperform the average 12-month total return of the analyst's coverage universe or an index identified by the analyst that includes, but is not limited to, stocks covered by the analyst.

### Other Ratings

*Tender* – Investors are guided to tender to the terms of the takeover offer.

*Under Review* – The rating has been temporarily placed under review, until sufficient information has been received and assessed by the analyst.

### Risk Rankings

#### Low

Low financial and operational risk, high predictability of financial results, low stock volatility.

#### Medium

Moderate financial and operational risk, moderate predictability of financial results, moderate stock volatility.

#### High

High financial and/or operational risk, low predictability of financial results, high stock volatility.

#### Caution Warranted

Exceptionally high financial and/or operational risk, exceptionally low predictability of financial results, exceptionally high stock volatility. For risk-tolerant investors only.

#### Venture

Risk and return consistent with Venture Capital. For risk-tolerant investors only.

## Scotiabank, Global Banking and Markets Equity Research Ratings Distribution\*

### Distribution by Ratings and Equity and Equity-Related Financings\*

\* As at October 31, 2012.

Source: Scotiabank GBM.

For the purposes of the ratings distribution disclosure FINRA requires members who use a ratings system with terms different than "buy," "hold/neutral" and "sell," to equate their own ratings into these categories. Our 1-Sector Outperform, 2-Sector Perform, and 3-Sector Underperform ratings are based on the criteria above, but for this purpose could be equated to buy, neutral and sell ratings, respectively.

**General Disclosures**

This report has been prepared by analysts who are employed by the Research Department of Scotiabank, Global Banking and Markets. Scotiabank, together with "Global Banking and Markets," is a marketing name for the global corporate and investment banking and capital markets businesses of The Bank of Nova Scotia and certain of its affiliates in the countries where they operate, including Scotia Capital Inc.

All other trademarks are acknowledged as belonging to their respective owners and the display of such trademarks is for informational use only.

Scotiabank, Global Banking and Markets Research produces research reports under a single marketing identity referred to as "Globally-branded research" under U.S. rules. This research is produced on a single global research platform with one set of rules which meet the most stringent standards set by regulators in the various jurisdictions in which the research reports are produced. In addition, the analysts who produce the research reports, regardless of location, are subject to one set of policies designed to meet the most stringent rules established by regulators in the various jurisdictions where the research reports are produced.

This report is provided to you for informational purposes only. This report is not, and is not to be construed as, an offer to sell or solicitation of an offer to buy any securities and/or commodity futures contracts.

The securities mentioned in this report may neither be suitable for all investors nor eligible for sale in some jurisdictions where the report is distributed.

The information and opinions contained herein have been compiled or arrived at from sources believed reliable, however, Scotiabank, Global Banking and Markets makes no representation or warranty, express or implied, as to their accuracy or completeness.

Scotiabank, Global Banking and Markets has policies designed to make best efforts to ensure that the information contained in this report is current as of the date of this report, unless otherwise specified.

Any prices that are stated in this report are for informational purposes only. Scotiabank, Global Banking and Markets makes no representation that any transaction may be or could have been effected at those prices.

Any opinions expressed herein are those of the author(s) and are subject to change without notice and may differ or be contrary from the opinions expressed by other departments of Scotiabank, Global Banking and Markets or any of its affiliates.

Neither Scotiabank, Global Banking and Markets nor its affiliates accepts any liability whatsoever for any direct or consequential loss arising from any use of this report or its contents.

Yield (Curr.) 3.6%

Key Risks to Target: Interest rates; Rate base growth; Regulated ROE; Acquisitions; Regulatory

### Event

- FTS reported adjusted Q4/12 EPS of \$0.47 vs. our estimate of \$0.52 and \$0.46 in Q4/11.

### Implications

- The earnings were lower than we anticipated and, at the same time, earnings visibility is deteriorating due to regulatory uncertainty, in our opinion. In this sense, the Q4 report is slightly negative for the stock.
- Reported 2012 EPS of \$1.70 could have been flat to '11 at \$1.65 had we excluded certain items unlikely to recur, namely transmission revenue in Alberta and financing benefits in B.C. As a result, the earnings base for 2013 is significantly lower than the \$1.75/sh we had anticipated.
- On the regulatory front, there are now two key risks. First, allowed ROEs could be even lower than we thought. Consumer advocates are requesting 7.5% in B.C. and Newfoundland. Second, growth may be limited by Alberta's incentive regulatory framework. Interim rates are 5%-6% below those required to compensate for expansion plans.

### Recommendation

- FTS is normally a company with highly predictable and steadily (if at times slowly) growing earnings. However, our modelling suggests that the outcome of regulatory proceedings in 2013 has created unusually high variability of about 10%-20%. We maintain our Sector Perform rating but are trimming our 2013/2014 EPS estimates by \$0.05 and target price to \$34 (from \$35) in recognition of this challenging situation.

## Appendix A: Important Disclosures

Company	Ticker	Disclosures (see legend below)*
Fortis Inc.	FTS	G, I, S, U

I, Matthew Akman, certify that (1) the views expressed in this report in connection with securities or issuers that I analyze accurately reflect my personal views and (2) no part of my compensation was, is, or will be directly or indirectly, related to the specific recommendations or views expressed by me in this report.

This research report was prepared by employees of Scotia Capital Inc. and/or its affiliates who have the title of Analyst.

All pricing of securities in reports is based on the closing price of the securities' principal marketplace on the night before the publication date, unless otherwise explicitly stated.

All Equity Research Analysts report to the Head of Equity Research. The Head of Equity Research reports to the Managing Director, Head of Institutional Equity Sales, Trading and Research, who is not and does not report to the Head of the Investment Banking Department.

Scotiabank, Global Banking and Markets has policies that are reasonably designed to prevent or control the sharing of material non-public information across internal information barriers, such as between Investment Banking and Research.

The compensation of the research analyst who prepared this report is based on several factors, including but not limited to, the overall profitability of Scotiabank, Global Banking and Markets and the revenues generated from its various departments, including investment banking. Furthermore, the research analyst's compensation is charged as an expense to various Scotiabank, Global Banking and Markets departments, including investment banking. Research Analysts may not receive compensation from the companies they cover.

Non-U.S. analysts may not be associated persons of Scotia Capital (USA) Inc. and therefore may not be subject to NASD Rule 2711 restrictions on communications with subject company, public appearances and trading securities held by the analysts.

For Scotiabank, Global Banking and Markets Research analyst standards and disclosure policies, please visit [gbm.scotiabank.com/disclosures](http://gbm.scotiabank.com/disclosures).

Scotiabank, Global Banking and Markets Research, 40 King Street West, 33rd Floor, Toronto, Ontario, M5H 1H1.

## Definition of Scotiabank, Global Banking and Markets Equity Research Ratings & Risk Rankings

We have a four-tiered rating system, with ratings of Focus Stock, Sector Outperform, Sector Perform, and Sector Underperform. Each analyst assigns a rating that is relative to his or her coverage universe or an index identified by the analyst that includes, but is not limited to, stocks covered by the analyst.

Our risk ranking system provides transparency as to the underlying financial and operational risk of each stock covered. Statistical and judgmental factors considered are: historical financial results, share price volatility, liquidity of the shares, credit ratings, analyst forecasts, consistency and predictability of earnings, EPS growth, dividends, cash flow from operations, and strength of balance sheet. The Director of Research and the Supervisory Analyst jointly make the final determination of all risk rankings.

The rating assigned to each security covered in this report is based on the Scotiabank, Global Banking and Markets research analyst's 12-month view on the security. Analysts may sometimes express to traders, salespeople and certain clients their shorter-term views on these securities that differ from their 12-month view due to several factors, including but not limited to the inherent volatility of the marketplace.

### Ratings

#### Focus Stock (FS)

The stock represents an analyst's best idea(s); stocks in this category are expected to significantly outperform the average 12-month total return of the analyst's coverage universe or an index identified by the analyst that includes, but is not limited to, stocks covered by the analyst.

#### Sector Outperform (SO)

The stock is expected to outperform the average 12-month total return of the analyst's coverage universe or an index identified by the analyst that includes, but is not limited to, stocks covered by the analyst.

#### Sector Perform (SP)

The stock is expected to perform approximately in line with the average 12-month total return of the analyst's coverage universe or an index identified by the analyst that includes, but is not limited to, stocks covered by the analyst.

#### Sector Underperform (SU)

The stock is expected to underperform the average 12-month total return of the analyst's coverage universe or an index identified by the analyst that includes, but is not limited to, stocks covered by the analyst.

### Other Ratings

*Tender* – Investors are guided to tender to the terms of the takeover offer.

*Under Review* – The rating has been temporarily placed under review, until sufficient information has been received and assessed by the analyst.

### Risk Rankings

#### Low

Low financial and operational risk, high predictability of financial results, low stock volatility.

#### Medium

Moderate financial and operational risk, moderate predictability of financial results, moderate stock volatility.

#### High

High financial and/or operational risk, low predictability of financial results, high stock volatility.

#### Speculative

Exceptionally high financial and/or operational risk, exceptionally low predictability of financial results, exceptionally high stock volatility. For risk-tolerant investors only.

## Scotiabank, Global Banking and Markets Equity Research Ratings Distribution\*

### Distribution by Ratings and Equity and Equity-Related Financings\*

\* As at January 31, 2013.

Source: Scotiabank GBM.

For the purposes of the ratings distribution disclosure FINRA requires members who use a ratings system with terms different than "buy," "hold/neutral" and "sell," to equate their own ratings into these categories. Our Focus Stock, Sector Outperform, Sector Perform, and Sector Underperform ratings are based on the criteria above, but for this purpose could be equated to strong buy, buy, neutral and sell ratings, respectively.

**General Disclosures**

This report has been prepared by analysts who are employed by the Research Department of Scotiabank, Global Banking and Markets. Scotiabank, together with "Global Banking and Markets," is a marketing name for the global corporate and investment banking and capital markets businesses of The Bank of Nova Scotia and certain of its affiliates in the countries where they operate, including Scotia Capital Inc.

All other trademarks are acknowledged as belonging to their respective owners and the display of such trademarks is for informational use only.

Scotiabank, Global Banking and Markets Research produces research reports under a single marketing identity referred to as "Globally-branded research" under U.S. rules. This research is produced on a single global research platform with one set of rules which meet the most stringent standards set by regulators in the various jurisdictions in which the research reports are produced. In addition, the analysts who produce the research reports, regardless of location, are subject to one set of policies designed to meet the most stringent rules established by regulators in the various jurisdictions where the research reports are produced.

This report is provided to you for informational purposes only. This report is not, and is not to be construed as, an offer to sell or solicitation of an offer to buy any securities and/or commodity futures contracts.

The securities mentioned in this report may neither be suitable for all investors nor eligible for sale in some jurisdictions where the report is distributed.

The information and opinions contained herein have been compiled or arrived at from sources believed reliable, however, Scotiabank, Global Banking and Markets makes no representation or warranty, express or implied, as to their accuracy or completeness.

Scotiabank, Global Banking and Markets has policies designed to make best efforts to ensure that the information contained in this report is current as of the date of this report, unless otherwise specified.

Any prices that are stated in this report are for informational purposes only. Scotiabank, Global Banking and Markets makes no representation that any transaction may be or could have been effected at those prices.

Any opinions expressed herein are those of the author(s) and are subject to change without notice and may differ or be contrary from the opinions expressed by other departments of Scotiabank, Global Banking and Markets or any of its affiliates.

Neither Scotiabank, Global Banking and Markets nor its affiliates accepts any liability whatsoever for any direct or consequential loss arising from any use of this report or its contents.

Equity research reports published by Scotiabank, Global Banking and Markets are available electronically via: Bloomberg, Thomson Financial/First Call - Research Direct, Reuters, Capital IQ, and FactSet. Institutional clients with questions regarding distribution of equity research should contact us at 1-800-208-7666.

This report and all the information, opinions, and conclusions contained in it are protected by copyright. This report may not be reproduced in whole or in part, or referred to in any manner whatsoever, nor may the information, opinions, and conclusions contained in it be referred to without the prior express consent of Scotiabank, Global Banking and Markets.

**Additional Disclosures**

Canada: This report is distributed by Scotia Capital Inc., a subsidiary of The Bank of Nova Scotia. DWM Securities Inc. is a subsidiary of The Bank of Nova Scotia and an affiliate of Scotia Capital Inc. Scotia Capital Inc. and DWM Securities Inc. are members of the Canadian Investor Protection Fund and the Investment Industry Regulatory Organization of Canada. DWM Securities Inc. does not provide investment banking services.

Chile: This report is distributed by Scotia Corredora de Bolsa Chile S.A., a subsidiary of The Bank of Nova Scotia.

Hong Kong: This report is distributed by The Bank of Nova Scotia Hong Kong Branch, which is authorized by the Securities and Future Commission to conduct Type 1, Type 4 and Type 6 regulated activities and regulated by the Hong Kong Monetary Authority.

Mexico: This report is distributed by Scotia Inverlat Casa de Bolsa S.A. de C.V., a subsidiary of the Bank of Nova Scotia.

Peru: This report is distributed by Scotia Sociedad Agente de Bolsa S.A., a subsidiary of The Bank of Nova Scotia.

Singapore: This report is distributed by The Bank of Nova Scotia Asia Limited, a subsidiary of The Bank of Nova Scotia. The Bank of Nova Scotia Asia Limited is authorised and regulated by the Monetary Authority of Singapore, and exempted under Section 99(1)(a), and (b), (c) and (d) of the Securities and Futures Act to conduct regulated activities.

United Kingdom and the rest of Europe: Except as otherwise specified herein, this report is distributed by Scotiabank Europe PLC, a subsidiary of the Bank of Nova Scotia. Scotiabank Europe PLC is authorized and regulated by the Financial Services Authority (FSA). Scotiabank Europe PLC complies with all the FSA requirements concerning research and the associated disclosures and these are indicated on the research where applicable.

United States: This report is distributed by Scotia Capital (USA) Inc., a subsidiary of Scotia Capital Inc., and a registered U.S. broker-dealer. All transactions by a U.S. investor of securities mentioned in this report must be effected through Scotia Capital (USA) Inc.

Non-U.S. investors wishing to effect a transaction in the securities discussed in this report should contact a Scotiabank, Global Banking and Markets entity in their local jurisdiction unless governing law permits otherwise.

**Yield (Curr.)** 3.5%

### Event

- FTS reported adjusted Q1/13 adjusted EPS of \$0.67 vs. our estimate of \$0.66 and \$0.66 in Q1/12.

### Implications

- Last Friday's negative ALJ decision on the CH Energy acquisition was the key focus of an otherwise "in-line" quarter. A May 6th PSC staff response that the opposing parties "had not met its burden requiring an evidentiary hearing" was, however, welcome news.
- The staff response leaves the door open to an on-time closing with manageable financial impact on FTS. We believe the company may have to offer modest new benefits in the areas of employment and/or rates to avoid further opposition. Should it achieve broader support this month, it could still seek final PSC approval at the June 13 meeting.
- Meanwhile, regulatory developments in Canada are unfolding largely as we anticipated with modest headwinds. The April Newfoundland Power decision (8.8% ROE) supports our thesis that the B.C. allowed return could drop by ~100 basis points from levels of 9.5%-10%.

### Recommendation

- While FTS faces unusual regulatory uncertainty (NY, B.C.) and presently has lower growth than many of its peers, we are maintaining our SP rating because it remains a relatively low-risk investment, in our view. Despite the lack of any change in our estimates, we are raising our TP by \$1 to \$35 due to general sector valuation escalation with lower bond yields.

## Definition of Scotiabank, Global Banking and Markets Equity Research Ratings & Risk Rankings

We have a four-tiered rating system, with ratings of Focus Stock, Sector Outperform, Sector Perform, and Sector Underperform. Each analyst assigns a rating that is relative to his or her coverage universe or an index identified by the analyst that includes, but is not limited to, stocks covered by the analyst.

Our risk ranking system provides transparency as to the underlying financial and operational risk of each stock covered. Statistical and judgmental factors considered are: historical financial results, share price volatility, liquidity of the shares, credit ratings, analyst forecasts, consistency and predictability of earnings, EPS growth, dividends, cash flow from operations, and strength of balance sheet. The Director of Research and the Supervisory Analyst jointly make the final determination of all risk rankings.

The rating assigned to each security covered in this report is based on the Scotiabank, Global Banking and Markets research analyst's 12-month view on the security. Analysts may sometimes express to traders, salespeople and certain clients their shorter-term views on these securities that differ from their 12-month view due to several factors, including but not limited to the inherent volatility of the marketplace.

### Ratings

#### Focus Stock (FS)

The stock represents an analyst's best idea(s); stocks in this category are expected to significantly outperform the average 12-month total return of the analyst's coverage universe or an index identified by the analyst that includes, but is not limited to, stocks covered by the analyst.

#### Sector Outperform (SO)

The stock is expected to outperform the average 12-month total return of the analyst's coverage universe or an index identified by the analyst that includes, but is not limited to, stocks covered by the analyst.

#### Sector Perform (SP)

The stock is expected to perform approximately in line with the average 12-month total return of the analyst's coverage universe or an index identified by the analyst that includes, but is not limited to, stocks covered by the analyst.

#### Sector Underperform (SU)

The stock is expected to underperform the average 12-month total return of the analyst's coverage universe or an index identified by the analyst that includes, but is not limited to, stocks covered by the analyst.

### Other Ratings

*Tender* – Investors are guided to tender to the terms of the takeover offer.

*Under Review* – The rating has been temporarily placed under review, until sufficient information has been received and assessed by the analyst.

### Risk Rankings

#### Low

Low financial and operational risk, high predictability of financial results, low stock volatility.

#### Medium

Moderate financial and operational risk, moderate predictability of financial results, moderate stock volatility.

#### High

High financial and/or operational risk, low predictability of financial results, high stock volatility.

#### Speculative

Exceptionally high financial and/or operational risk, exceptionally low predictability of financial results, exceptionally high stock volatility. For risk-tolerant investors only.

## Scotiabank, Global Banking and Markets Equity Research Ratings Distribution\*

### Distribution by Ratings and Equity and Equity-Related Financings\*

\* As at April 30, 2013.

Source: Scotiabank GBM.

For the purposes of the ratings distribution disclosure FINRA requires members who use a ratings system with terms different than "buy," "hold/neutral" and "sell," to equate their own ratings into these categories. Our Focus Stock, Sector Outperform, Sector Perform, and Sector Underperform ratings are based on the criteria above, but for this purpose could be equated to strong buy, buy, neutral and sell ratings, respectively.

#### Event

- FTS shares have gone nowhere in three years while the Canadian energy infrastructure group has marched steadily higher (save for a near-term correction). Bad news is largely behind it now and the stock is attractively valued. We are upgrading from SP to SO.

#### Implications

- Historically, FTS has a superior track record of shareholder value creation through organic and acquisition growth. However, there has been a pause in growth between the years 2010-2013.
- Several factors contributed to the slow-down including falling allowed ROEs, the expropriation of assets in Belize, and a lack of success in M&A. But ROEs are probably bottoming and the vast majority of the remaining business mix is comprised of low-risk regulated utility.
- Meanwhile, growth prospects are again improving as the company completes a large hydro project, works on gas infrastructure in support of LNG, and continues expanding in Alberta.
- Partly due to lacklustre growth and partly due to a sell-off of defensive stocks, the shares are cheaper than they have been in the last ten years on key trading metrics related to bond yields.

#### Recommendation

- Solid, if not supernormal growth could come back into the company at a time when the shares are undervalued. We would accumulate the stock at these levels.

## The 'Lost Years' Are Almost Over

- Buying opportunities often arise from situations where bad things happen to good companies. That FTS is a good company was not at all in dispute a few short years ago after its stock went on a nearly 10-year run from 2001-2010. Management added more than its share of value through acquisitions that led to significant accretive organic growth opportunities. But in the past few years, growth has been surprisingly absent as earnings have flattened out and dividend growth has slowed.

Exhibit 1 - FTS 10-Year EPS and DPS Growth

Source: Company reports; Scotiabank GBM estimates.

- Falling Canadian utility returns and expropriation of Belize Electricity are the main factors accounting for the slow-down. Historically, FTS earned ROEs well above the nameplate allowed levels in Western Canada. Achieved ROEs are trending back toward allowed returns, which have in turn been reduced. At the same time, Belize Electricity, which used to contribute about \$10M in net income (\$0.05 in EPS) now contributes zero.
- Acquisitions have also proved more challenging than expected. When FTS acquired BC Gas in 2007, it espoused a consolidation strategy for Northwest utilities. But in the last six years, FTS has not managed to complete a single significant utility acquisition deal. That lack of success is partly due to management discipline and partly due to the political and valuation challenges involved in acquiring anything but small-scale regulated assets.
- As a result of these headwinds, the stock price has stagnated for almost three years while comparable companies' share prices have escalated dramatically. For example, ENB and ATCO/CU are up almost 80% in that same timeframe and EMA is up about 25%. This underperformance is almost exactly the opposite of the situation that evolved during the company's heady days of the previous decade when the stock tripled in value.
- Despite these negative developments, FTS is still a good company with reliable cash flow. One piece of good news is that it appears that Canadian utility allowed returns have bottomed out. The recent B.C. decision that established an 8.75% ROE for BC Gas is consistent with ROEs in Alberta and Newfoundland. It appears the provinces – which act independently of one another – are converging around a range no lower than 8.5%-9.0%.
- One risk to FTS remains that the BC Utilities Commission (BCUC) will reduce the allowed ROE on its electric utility by more than expected. Normally the change would track the 75 basis point reduction at BC Gas. However, the BCUC did not rule out eliminating the risk premium of electric utility over the gas utility, which is worth 40 basis points. On the other hand, and in the company's favour, we believe Alberta may slightly increase its allowed ROE due to increased risk associated with performance-based regulation. The net effect of an elimination of the BC electric utility risk premium and an increase in the Alberta ROE could be positive.

- Though FTS has lacked success in M&A, we believe it is poised to close its first major deal in years, namely CH Energy. An administrative law judge (ALJ) recommended against the deal but, in our opinion, its recommendation lacked sound logic and reason. In response to the ALJ recommendation, FTS shored up support of customer groups and regulatory staff. Subsequently, on May 30 it offered to extend the rate freeze by a year to July, 2015 and to provide four years of employee job security. These measures could nudge the deal toward New York Public Service Commission approval this summer.
- The Caribbean is never absent risk but exposure there has been minimized by the Belize expropriation and by expansion and acquisitions of regulated utilities. One risk remains outstanding, namely the potential for reduced earnings in the Belize hydroelectric business. It is effectively a creditor of the country now because it sells to Belize Electric (the utility that was expropriated). The risk is mitigated by the fact that locally produced electricity has always been much cheaper than electricity imported from Mexico. In any case, we believe the Belize hydro assets normally contribute only about \$0.05 in EPS.
- While risks are dissipating, growth prospects are improving. The flagship growth project is the \$459M (FTS' 51% share) Waneta hydroelectric dam expansion. That project alone should add \$0.05-\$0.10 to annual EPS. There are also opportunities in Alberta where FTS is still forecasting over 6% annual rate-base growth in the distribution business and where the company now has an opportunity to over-earn the nameplate allowed ROE under performance-based regulation. Additionally, as discussed in our May 22 research report "*Canadian LNG Race Heats Up*," we believe FTS has roughly \$0.5B in gas infrastructure expansion opportunities related to B.C. LNG exports.
- While earnings growth should return to FTS next year after a three-year lull, we also believe valuation on FTS is more attractive than it has been in a decade. Not that the P/E multiple is lower than any time in the past ten years – on the contrary, the 17.8x forward P/E significantly exceeds the 12x multiple it traded at a decade ago. More important, and perhaps surprisingly, though, the P/E multiple relative to bond yields is more attractive today than it was back then.
- The validity of P/E relative to bond yields is founded on the tight correlation between energy infrastructure free cash yields and high-quality corporate bond yields. We have observed that the correlation has been steady for over a decade, even while the correlation between free cash yield and government bond yields has broken down. Since earnings are often a good starting point as a proxy for free cash flow in regulated utility (in fact even for regulated utilities free cash is usually higher than earnings due to modest income tax timing differences), the earnings yield correlates well with corporate bond yields.

**Exhibit 2 - FTS Earnings Yield Relative to Corporate Bond Yields**

Source: Company reports; Scotiabank GBM estimates.

- This relative yield measure is indicating a “buy” signal as it is at a multi-year high. Not since the technology bubble, when utilities were completely out of favour, has the relative yield reached today’s level. Over the past 13 years, the FTS earnings yield relative to 10-year BBB corporate bond yields has averaged about 1.1x, has been as low as 0.8x, but now sits at just over 1.4x.
- Based on this analysis, it appears the stock valuation is reflecting significant further increases in bond yields (about 100 basis points). Even if that negative scenario does pan out, regulated utilities like FTS have more protection against rising bond yields than unregulated energy infrastructure companies. In an inflationary environment with rising bond yields, allowed returns on equity also rise and the rising cost of debt is a pass-through to customers. Even in B.C., where the allowed ROE is ostensibly fixed through 2015, there is an off-ramp and automatic upward adjustment if Long Canada Bond yields rise by more than about 100 basis points.
- Defensive stocks all over have sold off sharply in recent weeks on sector rotation and fears of rising interest rates. While some correction may have been warranted following a strong start to the year, we believe many of the high-quality companies with visible dividend growth are now over-sold. FTS, with its low-risk profile and improving EPS growth prospects, now falls into this category. We are upgrading FTS to Sector Outperform and recommend accumulating at this level.

## Definition of Scotiabank, Global Banking and Markets Equity Research Ratings & Risk Rankings

We have a four-tiered rating system, with ratings of Focus Stock, Sector Outperform, Sector Perform, and Sector Underperform. Each analyst assigns a rating that is relative to his or her coverage universe or an index identified by the analyst that includes, but is not limited to, stocks covered by the analyst.

Our risk ranking system provides transparency as to the underlying financial and operational risk of each stock covered. Statistical and judgmental factors considered are: historical financial results, share price volatility, liquidity of the shares, credit ratings, analyst forecasts, consistency and predictability of earnings, EPS growth, dividends, cash flow from operations, and strength of balance sheet. The Director of Research and the Supervisory Analyst jointly make the final determination of all risk rankings.

The rating assigned to each security covered in this report is based on the Scotiabank, Global Banking and Markets research analyst's 12-month view on the security. Analysts may sometimes express to traders, salespeople and certain clients their shorter-term views on these securities that differ from their 12-month view due to several factors, including but not limited to the inherent volatility of the marketplace.

### Ratings

#### Focus Stock (FS)

The stock represents an analyst's best idea(s); stocks in this category are expected to significantly outperform the average 12-month total return of the analyst's coverage universe or an index identified by the analyst that includes, but is not limited to, stocks covered by the analyst.

#### Sector Outperform (SO)

The stock is expected to outperform the average 12-month total return of the analyst's coverage universe or an index identified by the analyst that includes, but is not limited to, stocks covered by the analyst.

#### Sector Perform (SP)

The stock is expected to perform approximately in line with the average 12-month total return of the analyst's coverage universe or an index identified by the analyst that includes, but is not limited to, stocks covered by the analyst.

#### Sector Underperform (SU)

The stock is expected to underperform the average 12-month total return of the analyst's coverage universe or an index identified by the analyst that includes, but is not limited to, stocks covered by the analyst.

### Other Ratings

*Tender* – Investors are guided to tender to the terms of the takeover offer.

*Under Review* – The rating has been temporarily placed under review, until sufficient information has been received and assessed by the analyst.

### Risk Rankings

#### Low

Low financial and operational risk, high predictability of financial results, low stock volatility.

#### Medium

Moderate financial and operational risk, moderate predictability of financial results, moderate stock volatility.

#### High

High financial and/or operational risk, low predictability of financial results, high stock volatility.

#### Speculative

Exceptionally high financial and/or operational risk, exceptionally low predictability of financial results, exceptionally high stock volatility. For risk-tolerant investors only.

## Scotiabank, Global Banking and Markets Equity Research Ratings Distribution\*

### Distribution by Ratings and Equity and Equity-Related Financings\*

\* As at May 31, 2013.

Source: Scotiabank GBM.

For the purposes of the ratings distribution disclosure FINRA requires members who use a ratings system with terms different than "buy," "hold/neutral" and "sell," to equate their own ratings into these categories. Our Focus Stock, Sector Outperform, Sector Perform, and Sector Underperform ratings are based on the criteria above, but for this purpose could be equated to strong buy, buy, neutral and sell ratings, respectively.

**General Disclosures**

This report has been prepared by analysts who are employed by the Research Department of Scotiabank, Global Banking and Markets. Scotiabank, together with "Global Banking and Markets," is a marketing name for the global corporate and investment banking and capital markets businesses of The Bank of Nova Scotia and certain of its affiliates in the countries where they operate, including Scotia Capital Inc.

All other trademarks are acknowledged as belonging to their respective owners and the display of such trademarks is for informational use only.

Scotiabank, Global Banking and Markets Research produces research reports under a single marketing identity referred to as "Globally-branded research" under U.S. rules. This research is produced on a single global research platform with one set of rules which meet the most stringent standards set by regulators in the various jurisdictions in which the research reports are produced. In addition, the analysts who produce the research reports, regardless of location, are subject to one set of policies designed to meet the most stringent rules established by regulators in the various jurisdictions where the research reports are produced.

This report is provided to you for informational purposes only. This report is not, and is not to be construed as, an offer to sell or solicitation of an offer to buy any securities and/or commodity futures contracts.

The securities mentioned in this report may neither be suitable for all investors nor eligible for sale in some jurisdictions where the report is distributed.

The information and opinions contained herein have been compiled or arrived at from sources believed reliable, however, Scotiabank, Global Banking and Markets makes no representation or warranty, express or implied, as to their accuracy or completeness.

Scotiabank, Global Banking and Markets has policies designed to make best efforts to ensure that the information contained in this report is current as of the date of this report, unless otherwise specified.

Any prices that are stated in this report are for informational purposes only. Scotiabank, Global Banking and Markets makes no representation that any transaction may be or could have been effected at those prices.

Any opinions expressed herein are those of the author(s) and are subject to change without notice and may differ or be contrary from the opinions expressed by other departments of Scotiabank, Global Banking and Markets or any of its affiliates.

Neither Scotiabank, Global Banking and Markets nor its affiliates accepts any liability whatsoever for any direct or consequential loss arising from any use of this report or its contents.

Equity research reports published by Scotiabank, Global Banking and Markets are available electronically via: Bloomberg, Thomson Financial/First Call - Research Direct, Reuters, Capital IQ, and FactSet. Institutional clients with questions regarding distribution of equity research should contact us at 1-800-208-7666.

This report and all the information, opinions, and conclusions contained in it are protected by copyright. This report may not be reproduced in whole or in part, or referred to in any manner whatsoever, nor may the information, opinions, and conclusions contained in it be referred to without the prior express consent of Scotiabank, Global Banking and Markets.

**Additional Disclosures**

Canada: This report is distributed by Scotia Capital Inc., a subsidiary of The Bank of Nova Scotia. DWM Securities Inc. is a subsidiary of The Bank of Nova Scotia and an affiliate of Scotia Capital Inc. Scotia Capital Inc. and DWM Securities Inc. are members of the Canadian Investor Protection Fund and the Investment Industry Regulatory Organization of Canada. DWM Securities Inc. does not provide investment banking services.

Chile: This report is distributed by Scotia Corredora de Bolsa Chile S.A., a subsidiary of The Bank of Nova Scotia.

Hong Kong: This report is distributed by The Bank of Nova Scotia Hong Kong Branch, which is authorized by the Securities and Future Commission to conduct Type 1, Type 4 and Type 6 regulated activities and regulated by the Hong Kong Monetary Authority.

Mexico: This report is distributed by Scotia Inverlat Casa de Bolsa S.A. de C.V., a subsidiary of the Bank of Nova Scotia.

Peru: This report is distributed by Scotia Sociedad Agente de Bolsa S.A., a subsidiary of The Bank of Nova Scotia.

Singapore: This report is distributed by The Bank of Nova Scotia Asia Limited, a subsidiary of The Bank of Nova Scotia. The Bank of Nova Scotia Asia Limited is authorised and regulated by the Monetary Authority of Singapore, and exempted under Section 99(1)(a), and (b), (c) and (d) of the Securities and Futures Act to conduct regulated activities.

United Kingdom and the rest of Europe: Except as otherwise specified herein, this report is distributed by Scotiabank Europe PLC, a subsidiary of the Bank of Nova Scotia. Scotiabank Europe PLC is authorized and regulated by the Financial Services Authority (FSA). Scotiabank Europe PLC complies with all the FSA requirements concerning research and the associated disclosures and these are indicated on the research where applicable.

United States: This report is distributed by Scotia Capital (USA) Inc., a subsidiary of Scotia Capital Inc., and a registered U.S. broker-dealer. All transactions by a U.S. investor of securities mentioned in this report must be effected through Scotia Capital (USA) Inc.

Non-U.S. investors wishing to effect a transaction in the securities discussed in this report should contact a Scotiabank, Global Banking and Markets entity in their local jurisdiction unless governing law permits otherwise.

Valuation: 6.2% 2013E Free Cash Yield and 11.8x 2013E EV/EBITDA

Key Risks to Target: Interest rates; Rate base growth; Regulated ROE; Acquisitions; Regulatory

Div. (NTM) \$1.26

Div. (Curr.) \$1.24

Yield (Curr.) 3.9%

### Event

- FTS reported Q2/13 adjusted EPS of \$0.32 vs. our estimate and Q2/12 of \$0.33.

### Implications

- As expected, 2Q earnings were soft due to reductions in allowed returns in B.C. Hydrology in Belize is historically low and has exacerbated the weakness. However, we see Canadian returns as having bottomed out and believe EPS growth should resume next year.
- Just as FTS has been negatively impacted relative to its peers from falling bond yields (lower ROE), it should be positively impacted relative to peers as yields rise. The Alberta cost of capital review could boost returns next year and the recently lowered B.C. ROE automatically moves higher if bond yields rise in earnest.
- The combination of rising ROEs, solid utility rate base expansion and a return to normal hydrology in Belize should completely reverse negative earnings momentum in 2014. This momentum should be sustained in 2015 when the Waneta hydro project and accretion from CH Energy make positive contributions.

### Recommendation

- The unusual period of low/no EPS growth is drawing to a close and the company is better positioned than most to weather an era of rising rates. Valuation used to be at a premium but is now in line with the group. We recently upgraded the stock to SO and would accumulate at these levels.

## Definition of Scotiabank, Global Banking and Markets Equity Research Ratings & Risk Rankings

We have a four-tiered rating system, with ratings of Focus Stock, Sector Outperform, Sector Perform, and Sector Underperform. Each analyst assigns a rating that is relative to his or her coverage universe or an index identified by the analyst that includes, but is not limited to, stocks covered by the analyst.

Our risk ranking system provides transparency as to the underlying financial and operational risk of each stock covered. Statistical and judgmental factors considered are: historical financial results, share price volatility, liquidity of the shares, credit ratings, analyst forecasts, consistency and predictability of earnings, EPS growth, dividends, cash flow from operations, and strength of balance sheet. The Director of Research and the Supervisory Analyst jointly make the final determination of all risk rankings.

The rating assigned to each security covered in this report is based on the Scotiabank, Global Banking and Markets research analyst's 12-month view on the security. Analysts may sometimes express to traders, salespeople and certain clients their shorter-term views on these securities that differ from their 12-month view due to several factors, including but not limited to the inherent volatility of the marketplace.

### Ratings

#### Focus Stock (FS)

The stock represents an analyst's best idea(s); stocks in this category are expected to significantly outperform the average 12-month total return of the analyst's coverage universe or an index identified by the analyst that includes, but is not limited to, stocks covered by the analyst.

#### Sector Outperform (SO)

The stock is expected to outperform the average 12-month total return of the analyst's coverage universe or an index identified by the analyst that includes, but is not limited to, stocks covered by the analyst.

#### Sector Perform (SP)

The stock is expected to perform approximately in line with the average 12-month total return of the analyst's coverage universe or an index identified by the analyst that includes, but is not limited to, stocks covered by the analyst.

#### Sector Underperform (SU)

The stock is expected to underperform the average 12-month total return of the analyst's coverage universe or an index identified by the analyst that includes, but is not limited to, stocks covered by the analyst.

### Other Ratings

*Tender* – Investors are guided to tender to the terms of the takeover offer.

*Under Review* – The rating has been temporarily placed under review, until sufficient information has been received and assessed by the analyst.

### Risk Rankings

#### Low

Low financial and operational risk, high predictability of financial results, low stock volatility.

#### Medium

Moderate financial and operational risk, moderate predictability of financial results, moderate stock volatility.

#### High

High financial and/or operational risk, low predictability of financial results, high stock volatility.

#### Speculative

Exceptionally high financial and/or operational risk, exceptionally low predictability of financial results, exceptionally high stock volatility. For risk-tolerant investors only.

## Scotiabank, Global Banking and Markets Equity Research Ratings Distribution\*

### Distribution by Ratings and Equity and Equity-Related Financings\*

\* As at July 31, 2013.

Source: Scotiabank GBM.

For the purposes of the ratings distribution disclosure FINRA requires members who use a ratings system with terms different than "buy," "hold/neutral" and "sell," to equate their own ratings into these categories. Our Focus Stock, Sector Outperform, Sector Perform, and Sector Underperform ratings are based on the criteria above, but for this purpose could be equated to strong buy, buy, neutral and sell ratings, respectively.

## General Disclosures

This report has been prepared by analysts who are employed by the Research Department of Scotiabank, Global Banking and Markets. Scotiabank, together with "Global Banking and Markets," is a marketing name for the global corporate and investment banking and capital markets businesses of The Bank of Nova Scotia and certain of its affiliates in the countries where they operate, including Scotia Capital Inc.

All other trademarks are acknowledged as belonging to their respective owners and the display of such trademarks is for informational use only.

Scotiabank, Global Banking and Markets Research produces research reports under a single marketing identity referred to as "Globally-branded research" under U.S. rules. This research is produced on a single global research platform with one set of rules which meet the most stringent standards set by regulators in the various jurisdictions in which the research reports are produced. In addition, the analysts who produce the research reports, regardless of location, are subject to one set of policies designed to meet the most stringent rules established by regulators in the various jurisdictions where the research reports are produced.

Scotia Capital Inc. or an affiliate thereof owns or controls an equity interest in TMX Group Limited and in excess of 1% of the issued and outstanding equity securities thereof. In addition, an affiliate of Scotia Capital Inc. is a lender to TMX Group Limited under its credit facilities. As such, Scotia Capital Inc. may be considered to have an economic interest in TMX Group Limited.

This report is provided to you for informational purposes only. This report is not, and is not to be construed as, an offer to sell or solicitation of an offer to buy any securities and/or commodity futures contracts.

The securities mentioned in this report may neither be suitable for all investors nor eligible for sale in some jurisdictions where the report is distributed.

The information and opinions contained herein have been compiled or arrived at from sources believed reliable, however, Scotiabank, Global Banking and Markets makes no representation or warranty, express or implied, as to their accuracy or completeness.

Scotiabank, Global Banking and Markets has policies designed to make best efforts to ensure that the information contained in this report is current as of the date of this report, unless otherwise specified.

Any prices that are stated in this report are for informational purposes only. Scotiabank, Global Banking and Markets makes no representation that any transaction may be or could have been effected at those prices.

Any opinions expressed herein are those of the author(s) and are subject to change without notice and may differ or be contrary from the opinions expressed by other departments of Scotiabank, Global Banking and Markets or any of its affiliates.

Neither Scotiabank, Global Banking and Markets nor its affiliates accepts any liability whatsoever for any direct or consequential loss arising from any use of this report or its contents.

Equity research reports published by Scotiabank, Global Banking and Markets are available electronically via: Bloomberg, Thomson Financial/First Call - Research Direct, Reuters, Capital IQ, and FactSet. Institutional clients with questions regarding distribution of equity research should contact us at 1-800-208-7666.

Key Risks to Target: Interest rates; Rate base growth; Regulated ROE; Acquisitions; Regulatory

### Event

- We are hosting FTS management for investor meetings this week including CEO Stan Marshall and CFO Barry Perry.

### Implications

- FTS could be on the verge of a significant positive change in earnings momentum. After several years of minimal growth, trends are reversing and we are forecasting almost 15% growth from 2013 - 2015.
- Utility expansion has remained consistently strong but allowed ROEs fell and offset asset additions. However, we see opportunities for increased allowed and achieved returns especially in the key Western Canadian regions in the coming years.
- Meanwhile FTS is quietly developing renewable power assets that might not be fully valued in the stock. With a return to normal hydrology in Belize and the in-service of the Waneta dam in B.C., we estimate hydro could make up ~12% of company earnings.

### Recommendation

- FTS is trading below its historical valuation relative to bonds. Improvements in growth and the business mix could normalize that relationship. We recommend accumulating at this level.

Qtly Adj. EPS (Basic)	Q1	Q2	Q3	Q4	Year	P/E

## Hidden Hydros

- When Canadian investors think of renewable power FTS is probably one of the last companies that come to mind. Pure-play companies like Brookfield Renewable, Innergex and Boralex took centre stage initially when the investing theme emerged. Over time, others developing renewable power (ALA, NPI) were rewarded with premium valuations. And if the business went unrewarded it was monetized (ENB via ENF and TA via RNW). FTS might be the only company with significant renewable power assets in our coverage that has not been noticed yet.
- Not to exaggerate the extent of renewable power in the FTS business mix; in 2015 when the Waneta Hydroelectric Project in B.C. comes on line, we estimate only about 12% of company earnings will derive from hydroelectricity. But still, 12% is not insignificant and, given premium valuation for hydro even among renewable assets, can make a meaningful difference to share performance.
- Just as important, the hydro assets should make a strong positive contribution to the "renewed" growth we are projecting at FTS over the next two years. Having achieved very little EPS growth for several years now, our forecasts imply a nearly 15% improvement between 2013 and 2015. Drivers are the operating hydro assets in Belize and the development assets in B.C.
- The company has been involved in hydroelectricity in Belize for many years but has not really experienced a normal hydrology year since 2010. It was March of that year when FTS completed construction of the Vaca plant, which was the third in a collection of a total 50 MW that should normally produce about 240 GWh/year. The assets, together with others in New York and B.C. should generate about 370 GWh/year but produced only 138 GWh in 1H/13 and 306 GWh in 2012. Our modelling suggests the Belize assets should contribute at least another \$0.05 in EPS -- possibly more due to a strengthened US\$ -- in a normal hydrology year.
- Meanwhile the \$900m Waneta project (FTS ~\$460m) is on schedule and budget for a 2015 in-service. It will add another 171 net MW to the ~90 MW of hydro-power FTS already owns. We believe the investment could add \$0.10 in EPS in its first year of operation. Unlike some utility investments, FTS is not booking non-cash earnings from the project prior to its in-service date; so none of the Waneta revenues have yet been booked in earnings.
- The higher hydro earnings should complement utility expansion and a reversal in declining ROEs. In particular, we see potential for improvement in ROEs in Western Canada starting in 2014. That projection may seem optimistic because the B.C. Utilities Commission reduced the allowed ROE by 75 basis points just this year. But the Commission included an automatic adjustment up in allowed returns if Canadian long bond yields exceed 3.8%. Furthermore, in June FTS applied for performance-based regulation for the 2014 - 2018 time-frame.
- We are even more optimistic about the potential for higher ROEs in Alberta than in B.C. The Alberta Utilities Commission had established an 8.75% ROE but is reviewing it in light of its recent transition to performance-based regulation. We believe there is a much higher likelihood of an increase in the ROE than a decrease because incentive regulation increases risk and because bond yields have moved up.
- Hydro development and utility investment returns are not the only growth drivers at FTS. Surprisingly, even FTS might participate in and benefit from LNG export activities. With its BC Gas infrastructure footprint on the West Coast, FTS is well-positioned for niche projects. The company is quietly considering a \$200M-\$300M pipeline expansion to a proposed Pacific Oil & Gas project near Squamish. A small-scale (250 MMcf/d) export facility is under development there and could be in service by 2017-2018. In addition, FTS already owns a small liquefaction and LNG storage facility near Delta, B.C. that could be expanded. The Tilbury site has about 30 acres of spare land and is working on opportunities in the small-scale utility export business as well as LNG applications in the local transportation industry.

- With growth improving again, there is no apparent reason for the stock to trade at a discount to its historically normal trading range. Our normalized earnings data going back almost 20 years suggests that the earnings yield has correlated tightly with 10-year BBB corporate bond yields. In particular, we estimate the earnings yield has averaged about 1.07x the BBB yield but now sits at 1.24x, suggesting an attractive relative valuation.

**Exhibit 1 – Historical Relative Yield Relationship: FTS Earnings Yield vs. BBB 10Y Corporate Bonds**

Source: Company reports; Scotiabank GBM estimates.

- If anything, the emerging FTS business mix has potential to trade at a premium to historical norms. Many of the business risks have diminished -- the Caribbean utilities and properties segments make up a smaller proportion of earnings than ever. The vast majority of earnings are derived from low-risk regulated Canadian utilities and the emerging hydro business. On this basis, we upgraded the stock to Sector Outperform (\$34 TP) earlier this year (see our report titled *"The 'Lost Years' Are Almost Over"*, published June 7<sup>th</sup> 2013) and recommend accumulating at these levels.

## Definition of Scotiabank, Global Banking and Markets Equity Research Ratings & Risk Rankings

We have a four-tiered rating system, with ratings of Focus Stock, Sector Outperform, Sector Perform, and Sector Underperform. Each analyst assigns a rating that is relative to his or her coverage universe or an index identified by the analyst that includes, but is not limited to, stocks covered by the analyst.

Our risk ranking system provides transparency as to the underlying financial and operational risk of each stock covered. Statistical and judgmental factors considered are: historical financial results, share price volatility, liquidity of the shares, credit ratings, analyst forecasts, consistency and predictability of earnings, EPS growth, dividends, cash flow from operations, and strength of balance sheet. The Director of Research and the Supervisory Analyst jointly make the final determination of all risk rankings.

The rating assigned to each security covered in this report is based on the Scotiabank, Global Banking and Markets research analyst's 12-month view on the security. Analysts may sometimes express to traders, salespeople and certain clients their shorter-term views on these securities that differ from their 12-month view due to several factors, including but not limited to the inherent volatility of the marketplace.

### Ratings

#### Focus Stock (FS)

The stock represents an analyst's best idea(s); stocks in this category are expected to significantly outperform the average 12-month total return of the analyst's coverage universe or an index identified by the analyst that includes, but is not limited to, stocks covered by the analyst.

#### Sector Outperform (SO)

The stock is expected to outperform the average 12-month total return of the analyst's coverage universe or an index identified by the analyst that includes, but is not limited to, stocks covered by the analyst.

#### Sector Perform (SP)

The stock is expected to perform approximately in line with the average 12-month total return of the analyst's coverage universe or an index identified by the analyst that includes, but is not limited to, stocks covered by the analyst.

#### Sector Underperform (SU)

The stock is expected to underperform the average 12-month total return of the analyst's coverage universe or an index identified by the analyst that includes, but is not limited to, stocks covered by the analyst.

### Other Ratings

*Tender* – Investors are guided to tender to the terms of the takeover offer.

*Under Review* – The rating has been temporarily placed under review, until sufficient information has been received and assessed by the analyst.

### Risk Rankings

#### Low

Low financial and operational risk, high predictability of financial results, low stock volatility.

#### Medium

Moderate financial and operational risk, moderate predictability of financial results, moderate stock volatility.

#### High

High financial and/or operational risk, low predictability of financial results, high stock volatility.

#### Speculative

Exceptionally high financial and/or operational risk, exceptionally low predictability of financial results, exceptionally high stock volatility. For risk-tolerant investors only.

## Scotiabank, Global Banking and Markets Equity Research Ratings Distribution\*

### Distribution by Ratings and Equity and Equity-Related Financings\*

\* As at September 30, 2013.

Source: Scotiabank GBM.

For the purposes of the ratings distribution disclosure FINRA requires members who use a ratings system with terms different than "buy," "hold/neutral" and "sell," to equate their own ratings into these categories. Our Focus Stock, Sector Outperform, Sector Perform, and Sector Underperform ratings are based on the criteria above, but for this purpose could be equated to strong buy, buy, neutral and sell ratings, respectively.

**General Disclosures**

This report has been prepared by analysts who are employed by the Research Department of Scotiabank, Global Banking and Markets. Scotiabank, together with "Global Banking and Markets," is a marketing name for the global corporate and investment banking and capital markets businesses of The Bank of Nova Scotia and certain of its affiliates in the countries where they operate, including Scotia Capital Inc.

All other trademarks are acknowledged as belonging to their respective owners and the display of such trademarks is for informational use only.

Scotiabank, Global Banking and Markets Research produces research reports under a single marketing identity referred to as "Globally-branded research" under U.S. rules. This research is produced on a single global research platform with one set of rules which meet the most stringent standards set by regulators in the various jurisdictions in which the research reports are produced. In addition, the analysts who produce the research reports, regardless of location, are subject to one set of policies designed to meet the most stringent rules established by regulators in the various jurisdictions where the research reports are produced.

Scotia Capital Inc. or an affiliate thereof owns or controls an equity interest in TMX Group Limited and in excess of 1% of the issued and outstanding equity securities thereof. In addition, an affiliate of Scotia Capital Inc. is a lender to TMX Group Limited under its credit facilities. As such, Scotia Capital Inc. may be considered to have an economic interest in TMX Group Limited.

### Event

- FTS reported Q3/13 adj. EPS of \$0.23, in line with our est. of \$0.24.

### Implications

- As we anticipated, earnings remain soft in 2013, particularly in Q3 with CH Energy making a seasonally low contribution. However, we maintain our view that 2013 marks a bottom on financial performance and likely share price performance too.
- Regulated returns on distribution utilities will probably move gradually higher now due to the risk of rising bond yields. At a minimum, then, earnings growth should track utility expansion which is pegged at almost \$5B over the next four years.
- Removal of the rates freeze at CH Energy in mid-2015 should also help during our forecast period. We believe the subsidiary could be under-earning by up to 300 basis points next year. Even if allowed returns decline slightly, earnings should improve considerably.
- Unregulated businesses should improve or, if they don't, could be monetized. In particular, once the Waneta Dam (expected to enter service in 2015) provides significant unregulated revenues for tax planning, properties may be non-core.

### Recommendation

- FTS shares are picking up but are still trading at a 1-2 P/E-point discount to historical norms given today's bond yields. We maintain our SO rating and are tweaking our target price up to \$35/sh for the recent bond rally.

## Definition of Scotiabank, Global Banking and Markets Equity Research Ratings & Risk Rankings

We have a four-tiered rating system, with ratings of Focus Stock, Sector Outperform, Sector Perform, and Sector Underperform. Each analyst assigns a rating that is relative to his or her coverage universe or an index identified by the analyst that includes, but is not limited to, stocks covered by the analyst.

Our risk ranking system provides transparency as to the underlying financial and operational risk of each stock covered. Statistical and judgmental factors considered are: historical financial results, share price volatility, liquidity of the shares, credit ratings, analyst forecasts, consistency and predictability of earnings, EPS growth, dividends, cash flow from operations, and strength of balance sheet. The Director of Research and the Supervisory Analyst jointly make the final determination of all risk rankings.

The rating assigned to each security covered in this report is based on the Scotiabank, Global Banking and Markets research analyst's 12-month view on the security. Analysts may sometimes express to traders, salespeople and certain clients their shorter-term views on these securities that differ from their 12-month view due to several factors, including but not limited to the inherent volatility of the marketplace.

### Ratings

#### Focus Stock (FS)

The stock represents an analyst's best idea(s); stocks in this category are expected to significantly outperform the average 12-month total return of the analyst's coverage universe or an index identified by the analyst that includes, but is not limited to, stocks covered by the analyst.

#### Sector Outperform (SO)

The stock is expected to outperform the average 12-month total return of the analyst's coverage universe or an index identified by the analyst that includes, but is not limited to, stocks covered by the analyst.

#### Sector Perform (SP)

The stock is expected to perform approximately in line with the average 12-month total return of the analyst's coverage universe or an index identified by the analyst that includes, but is not limited to, stocks covered by the analyst.

#### Sector Underperform (SU)

The stock is expected to underperform the average 12-month total return of the analyst's coverage universe or an index identified by the analyst that includes, but is not limited to, stocks covered by the analyst.

### Other Ratings

*Tender* – Investors are guided to tender to the terms of the takeover offer.

*Under Review* – The rating has been temporarily placed under review, until sufficient information has been received and assessed by the analyst.

### Risk Rankings

#### Low

Low financial and operational risk, high predictability of financial results, low stock volatility.

#### Medium

Moderate financial and operational risk, moderate predictability of financial results, moderate stock volatility.

#### High

High financial and/or operational risk, low predictability of financial results, high stock volatility.

#### Speculative

Exceptionally high financial and/or operational risk, exceptionally low predictability of financial results, exceptionally high stock volatility. For risk-tolerant investors only.

## Scotiabank, Global Banking and Markets Equity Research Ratings Distribution\*

### Distribution by Ratings and Equity and Equity-Related Financings\*

\* As at October 31, 2013.

Source: Scotiabank GBM.

For the purposes of the ratings distribution disclosure FINRA requires members who use a ratings system with terms different than "buy," "hold/neutral" and "sell," to equate their own ratings into these categories. Our Focus Stock, Sector Outperform, Sector Perform, and Sector Underperform ratings are based on the criteria above, but for this purpose could be equated to strong buy, buy, neutral and sell ratings, respectively.

## General Disclosures

This report has been prepared by analysts who are employed by the Research Department of Scotiabank, Global Banking and Markets. Scotiabank, together with "Global Banking and Markets," is a marketing name for the global corporate and investment banking and capital markets businesses of The Bank of Nova Scotia and certain of its affiliates in the countries where they operate, including Scotia Capital Inc.

All other trademarks are acknowledged as belonging to their respective owners and the display of such trademarks is for informational use only.

Scotiabank, Global Banking and Markets Research produces research reports under a single marketing identity referred to as "Globally-branded research" under U.S. rules. This research is produced on a single global research platform with one set of rules which meet the most stringent standards set by regulators in the various jurisdictions in which the research reports are produced. In addition, the analysts who produce the research reports, regardless of location, are subject to one set of policies designed to meet the most stringent rules established by regulators in the various jurisdictions where the research reports are produced.

Scotia Capital Inc. or an affiliate thereof owns or controls an equity interest in TMX Group Limited and in excess of 1% of the issued and outstanding equity securities thereof. In addition, an affiliate of Scotia Capital Inc. is a lender to TMX Group Limited under its credit facilities. As such, Scotia Capital Inc. may be considered to have an economic interest in TMX Group Limited.

This report is provided to you for informational purposes only. This report is not, and is not to be construed as, an offer to sell or solicitation of an offer to buy any securities and/or commodity futures contracts.

The securities mentioned in this report may neither be suitable for all investors nor eligible for sale in some jurisdictions where the report is distributed.

The information and opinions contained herein have been compiled or arrived at from sources believed reliable, however, Scotiabank, Global Banking and Markets makes no representation or warranty, express or implied, as to their accuracy or completeness.

Scotiabank, Global Banking and Markets has policies designed to make best efforts to ensure that the information contained in this report is current as of the date of this report, unless otherwise specified.

Any prices that are stated in this report are for informational purposes only. Scotiabank, Global Banking and Markets makes no representation that any transaction may be or could have been effected at those prices.

### Event

- We are hosting FTS management for investor meetings this week including CEO Stan Marshall and CFO Barry Perry.

### Implications

- FTS could be on the verge of a significant positive change in earnings momentum. After several years of minimal growth, trends are reversing and we are forecasting almost 15% growth from 2013 - 2015.
- Utility expansion has remained consistently strong but allowed ROEs fell and offset asset additions. However, we see opportunities for increased allowed and achieved returns especially in the key Western Canadian regions in the coming years.
- Meanwhile FTS is quietly developing renewable power assets that might not be fully valued in the stock. With a return to normal hydrology in Belize and the in-service of the Waneta dam in B.C., we estimate hydro could make up ~12% of company earnings.

### Recommendation

- FTS is trading below its historical valuation relative to bonds. Improvements in growth and the business mix could normalize that relationship. We recommend accumulating at this level.

## Hidden Hydros

- When Canadian investors think of renewable power FTS is probably one of the last companies that come to mind. Pure-play companies like Brookfield Renewable, Innergex and Boralex took centre stage initially when the investing theme emerged. Over time, others developing renewable power (ALA, NPI) were rewarded with premium valuations. And if the business went unrewarded it was monetized (ENB via ENF and TA via RNW). FTS might be the only company with significant renewable power assets in our coverage that has not been noticed yet.
- Not to exaggerate the extent of renewable power in the FTS business mix; in 2015 when the Waneta Hydroelectric Project in B.C. comes on line, we estimate only about 12% of company earnings will derive from hydroelectricity. But still, 12% is not insignificant and, given premium valuation for hydro even among renewable assets, can make a meaningful difference to share performance.
- Just as important, the hydro assets should make a strong positive contribution to the "renewed" growth we are projecting at FTS over the next two years. Having achieved very little EPS growth for several years now, our forecasts imply a nearly 15% improvement between 2013 and 2015. Drivers are the operating hydro assets in Belize and the development assets in B.C.
- The company has been involved in hydroelectricity in Belize for many years but has not really experienced a normal hydrology year since 2010. It was March of that year when FTS completed construction of the Vaca plant, which was the third in a collection of a total 50 MW that should normally produce about 240 GWh/year. The assets, together with others in New York and B.C. should generate about 370 GWh/year but produced only 138 GWh in 1H/13 and 306 GWh in 2012. Our modelling suggests the Belize assets should contribute at least another \$0.05 in EPS -- possibly more due to a strengthened US\$ -- in a normal hydrology year.
- Meanwhile the \$900m Waneta project (FTS ~\$460m) is on schedule and budget for a 2015 in-service. It will add another 171 net MW to the ~90 MW of hydro-power FTS already owns. We believe the investment could add \$0.10 in EPS in its first year of operation. Unlike some utility investments, FTS is not booking non-cash earnings from the project prior to its in-service date; so none of the Waneta revenues have yet been booked in earnings.
- The higher hydro earnings should complement utility expansion and a reversal in declining ROEs. In particular, we see potential for improvement in ROEs in Western Canada starting in 2014. That projection may seem optimistic because the B.C. Utilities Commission reduced the allowed ROE by 75 basis points just this year. But the Commission included an automatic adjustment up in allowed returns if Canadian long bond yields exceed 3.8%. Furthermore, in June FTS applied for performance-based regulation for the 2014 - 2018 time-frame.
- We are even more optimistic about the potential for higher ROEs in Alberta than in B.C. The Alberta Utilities Commission had established an 8.75% ROE but is reviewing it in light of its recent transition to performance-based regulation. We believe there is a much higher likelihood of an increase in the ROE than a decrease because incentive regulation increases risk and because bond yields have moved up.
- Hydro development and utility investment returns are not the only growth drivers at FTS. Surprisingly, even FTS might participate in and benefit from LNG export activities. With its BC Gas infrastructure footprint on the West Coast, FTS is well-positioned for niche projects. The company is quietly considering a \$200M-\$300M pipeline expansion to a proposed Pacific Oil & Gas project near Squamish. A small-scale (250 MMcf/d) export facility is under development there and could be in service by 2017-2018. In addition, FTS already owns a small liquefaction and LNG storage facility near Delta, B.C. that could be expanded. The Tilbury site has about 30 acres of spare land and is working on opportunities in the small-scale utility export business as well as LNG applications in the local transportation industry.

- With growth improving again, there is no apparent reason for the stock to trade at a discount to its historically normal trading range. Our normalized earnings data going back almost 20 years suggests that the earnings yield has correlated tightly with 10-year BBB corporate bond yields. In particular, we estimate the earnings yield has averaged about 1.07x the BBB yield but now sits at 1.24x, suggesting an attractive relative valuation.

**Exhibit 1 – Historical Relative Yield Relationship: FTS Earnings Yield vs. BBB 10Y Corporate Bonds**

Source: Company reports; Scotiabank GBM estimates.

- If anything, the emerging FTS business mix has potential to trade at a premium to historical norms. Many of the business risks have diminished -- the Caribbean utilities and properties segments make up a smaller proportion of earnings than ever. The vast majority of earnings are derived from low-risk regulated Canadian utilities and the emerging hydro business. On this basis, we upgraded the stock to Sector Outperform (\$34 TP) earlier this year (see our report titled *"The 'Lost Years' Are Almost Over"*, published June 7<sup>th</sup> 2013) and recommend accumulating at these levels.

Exhibit 2 - Fortis Inc. Financial Statement Summary

## Definition of Scotiabank, Global Banking and Markets Equity Research Ratings & Risk Rankings

We have a four-tiered rating system, with ratings of Focus Stock, Sector Outperform, Sector Perform, and Sector Underperform. Each analyst assigns a rating that is relative to his or her coverage universe or an index identified by the analyst that includes, but is not limited to, stocks covered by the analyst.

Our risk ranking system provides transparency as to the underlying financial and operational risk of each stock covered. Statistical and judgmental factors considered are: historical financial results, share price volatility, liquidity of the shares, credit ratings, analyst forecasts, consistency and predictability of earnings, EPS growth, dividends, cash flow from operations, and strength of balance sheet. The Director of Research and the Supervisory Analyst jointly make the final determination of all risk rankings.

The rating assigned to each security covered in this report is based on the Scotiabank, Global Banking and Markets research analyst's 12-month view on the security. Analysts may sometimes express to traders, salespeople and certain clients their shorter-term views on these securities that differ from their 12-month view due to several factors, including but not limited to the inherent volatility of the marketplace.

### Ratings

#### Focus Stock (FS)

The stock represents an analyst's best idea(s); stocks in this category are expected to significantly outperform the average 12-month total return of the analyst's coverage universe or an index identified by the analyst that includes, but is not limited to, stocks covered by the analyst.

#### Sector Outperform (SO)

The stock is expected to outperform the average 12-month total return of the analyst's coverage universe or an index identified by the analyst that includes, but is not limited to, stocks covered by the analyst.

#### Sector Perform (SP)

The stock is expected to perform approximately in line with the average 12-month total return of the analyst's coverage universe or an index identified by the analyst that includes, but is not limited to, stocks covered by the analyst.

#### Sector Underperform (SU)

The stock is expected to underperform the average 12-month total return of the analyst's coverage universe or an index identified by the analyst that includes, but is not limited to, stocks covered by the analyst.

### Other Ratings

*Tender* – Investors are guided to tender to the terms of the takeover offer.

*Under Review* – The rating has been temporarily placed under review, until sufficient information has been received and assessed by the analyst.

### Risk Rankings

#### Low

Low financial and operational risk, high predictability of financial results, low stock volatility.

#### Medium

Moderate financial and operational risk, moderate predictability of financial results, moderate stock volatility.

#### High

High financial and/or operational risk, low predictability of financial results, high stock volatility.

#### Speculative

Exceptionally high financial and/or operational risk, exceptionally low predictability of financial results, exceptionally high stock volatility. For risk-tolerant investors only.

## Scotiabank, Global Banking and Markets Equity Research Ratings Distribution\*

### Distribution by Ratings and Equity and Equity-Related Financings\*

\* As at September 30, 2013.

Source: Scotiabank GBM.

For the purposes of the ratings distribution disclosure FINRA requires members who use a ratings system with terms different than "buy," "hold/neutral" and "sell," to equate their own ratings into these categories. Our Focus Stock, Sector Outperform, Sector Perform, and Sector Underperform ratings are based on the criteria above, but for this purpose could be equated to strong buy, buy, neutral and sell ratings, respectively.

## General Disclosures

This report has been prepared by analysts who are employed by the Research Department of Scotiabank, Global Banking and Markets. Scotiabank, together with "Global Banking and Markets," is a marketing name for the global corporate and investment banking and capital markets businesses of The Bank of Nova Scotia and certain of its affiliates in the countries where they operate, including Scotia Capital Inc.

All other trademarks are acknowledged as belonging to their respective owners and the display of such trademarks is for informational use only.

Scotiabank, Global Banking and Markets Research produces research reports under a single marketing identity referred to as "Globally-branded research" under U.S. rules. This research is produced on a single global research platform with one set of rules which meet the most stringent standards set by regulators in the various jurisdictions in which the research reports are produced. In addition, the analysts who produce the research reports, regardless of location, are subject to one set of policies designed to meet the most stringent rules established by regulators in the various jurisdictions where the research reports are produced.

Scotia Capital Inc. or an affiliate thereof owns or controls an equity interest in TMX Group Limited and in excess of 1% of the issued and outstanding equity securities thereof. In addition, an affiliate of Scotia Capital Inc. is a lender to TMX Group Limited under its credit facilities. As such, Scotia Capital Inc. may be considered to have an economic interest in TMX Group Limited.

Key Risks to Target: Interest rates; Rate base growth; Regulated ROE; Acquisitions; Regulatory

#### Event

- FTS announced the acquisition of UNS Energy for US\$4.3b and issued \$1.8b of convertible debentures to finance the equity portion of the deal.

#### Implications

- Due to the premium paid, we doubt the acquisition will add short-term shareholder value. But given the attractive ROE at UNS and its future investment opportunities, it has the potential to add value longer term.
- Even if UNS is a neutral event for shareholders, the stock is more attractive than it was before the deal, in our opinion. The share price is lower due to near-term oversupply of equity but not to any deterioration in earnings outlook. And bond yields have dropped back down.
- The environment for U.S. acquisitions has changed since FTS undertook the strategy after buying BC Gas in 2007. FTS no longer has the cost of capital advantage to make significantly accretive deals.
- In these circumstances, hopefully investors need not worry about further near-term dilution and large equity issuance. We believe the company will have to put any further M&A on pause and re-focus on what FTS does best, namely operating and organically growing regulated utilities safely and efficiently.

#### Recommendation

- FTS offers compelling low-risk value in today's bond yield environment. A re-acceleration of earnings and dividend growth by next year should move the stock price back up to fair value. We are raising our target price from \$35 to \$36 (bond yields) and reiterating our SO rating.

## Growth Dry Spell Ends in AZ Desert

- When the FTS share price hit \$30 at the end of 2006, investors were enthusiastic about the company's acquisition strategy. At that time, few would have bet that the stock would stagnate for seven years during one of the most robust yield markets in history. In fairness, several factors contributed to the multi-year underperformance including mean-reversion from super-normal performance in the preceding years, declining Canadian ROEs and political issues in Belize. But dilution, uncertainty and large equity issuance from acquisition activity has also been a significant contributor in our opinion.
- The acquisition of BC Gas in early 2007 signalled a move into multi-utility M&A for a company that had previously only owned electricity assets. It also raised hopes for consolidating combined gas-electrical regulated utilities in the Pacific Northwest that were contiguous with British Columbia. Political issues and robust private equity bids got in the company's way and FTS instead turned its attention to the rest of the U.S. Other M&A attempts almost came to fruition but for various reasons it took years to land the first deal which just recently closed (CH Energy).
- Unfortunately for FTS the window for significantly accretive U.S. utility acquisitions effectively closed while it unsuccessfully pursued targets over the past six years. A massive reduction in U.S. bond yields and then a narrowing of credit spreads caused U.S. utilities to come back into investor favour while the FTS stock stagnated. As a consequence, there has been a significant narrowing of the P/E premium FTS once held over its regulated utility counterparts.

Exhibit 1 - FTS P/E vs. Select Regulated U.S. Utility Holding Companies

Notes:

1. U.S. Utilities Avg P/E derived by averaging P/E's for Consolidated Edison Inc. (ED), Northeast Utilities (NU), Vectren Corporation (VVC) and WGL Holdings Inc. (WGL).
  2. Current forward P/E's for FTS (15.2x) and U.S. utility group (14.7x) are based on 2015E EPS since 2014 estimates are impacted by the one-time dilution of the UNS deal.
- Source: Company reports; Scotiabank GBM estimates.

- In the absence of a significant valuation advantage, acquiring regulated utilities at a premium isn't meaningfully accretive because returns are fixed and there are no synergies. To the credit of FTS, the corporation doesn't even strive for synergies – it appropriately operates each utility independently and locally without integrating operations or customer service into any larger corporate entity. Small accretion may be available through financing and tax planning (raising our 2015 EPS estimate by \$0.05 to \$2) but those benefits are limited.

- Not that UNS is an unattractive target – on the contrary we see a lot of attraction in its regulatory construct and potential investment opportunities. We believe Canadian allowed ROEs have bottomed out but likely in the area of 9% which is still considerably lower than the 10.7% allowed ROE at UNS. As a result, future investments at UNS will be more accretive than those in Canada. And we see up to \$2b of investments for the replacement of coal-fired plants with natural gas and also to achieve the medium-term Arizona renewable portfolio standard of 15%.
- Those investment prospects in addition to the already-robust organic utility growth profile in Canada should re-ignite EPS and dividend growth (Exhibit 3). The visible potential for renewed growth was in part behind our upgrade of the stock last summer. We remain confident that EPS growth will accelerate next year. So too should dividend growth given the company's long history of tying the dividend growth rate to earnings growth.
- Attractive valuation was the other driver behind our upgrade of the stock. We reasoned at the time that the P/E multiple relative to bond yields was at an historic low. Put another way, the earnings yield relative to the BBB Canada Bond Yield was at an historic high. That situation is even truer now than it was then because bond yields have crashed back down to lows while the share price has moved down almost \$2 on a short-term oversupply of equity from the UNS financing.

Exhibit 2 - FTS Earnings Yield Relative to BBB Corporate Bond Yield

<b>EPS</b>	<b>\$1.60</b>	<b>\$2.00</b>	<b>\$0.40</b>		

Source: Company reports; Scotiabank GBM estimates.

- The breakdown in long-term valuation trends is partly due to a build-out of its assets that created near-term dilution but should pay off in higher earnings growth as capital invested earns its normal return. Three examples stand out on this front. First, the Waneta hydroelectric project which unlike regulated utility investments, does not book earnings until it comes on line at the start of next year. Second, CH Energy which is operating under a guaranteed rates freeze and is therefore under-earning its allowed ROE until mid-2015. And now UNS which required an equity raise this year but may not close for up to 12-months.
- All by way of saying that achieving accelerated growth and getting valuation back to historical norms is more a matter of doing nothing new than having to do something special. Seven years is a long time to wait for share price appreciation so we believe management and the board will now seek to surface value from the existing assets rather than take any action that might further prolong the return of FTS share price to fair value.
- A lull in earnings growth that should soon reverse has created an attractive buying opportunity in FTS shares. The UNS deal doesn't detract from value but created an additional over-supply because of the relatively large financing for an acquisition that is only modestly accretive. Further equity issuance and short-term dilution from deals is unlikely in our opinion because FTS no longer carries a premium valuation to its peers. We maintain our Sector Outperform rating and recommend accumulating the stock.

## Appendix A: Important Disclosures

Company	Ticker	Disclosures (see legend below)*
Fortis Inc.	FTS	G, I, S, U

I, Matthew Akman, certify that (1) the views expressed in this report in connection with securities or issuers that I analyze accurately reflect my personal views and (2) no part of my compensation was, is, or will be directly or indirectly, related to the specific recommendations or views expressed by me in this report.

This research report was prepared by employees of Scotia Capital Inc. and/or its affiliates who have the title of Analyst.

All pricing of securities in reports is based on the closing price of the securities' principal marketplace on the night before the publication date, unless otherwise explicitly stated.

All Equity Research Analysts report to the Head of Equity Research. The Head of Equity Research reports to the Managing Director, Head of Institutional Equity Sales, Trading and Research, who is not and does not report to the Head of the Investment Banking Department. Scotiabank, Global Banking and Markets has policies that are reasonably designed to prevent or control the sharing of material non-public information across internal information barriers, such as between Investment Banking and Research.

The compensation of the research analyst who prepared this report is based on several factors, including but not limited to, the overall profitability of Scotiabank, Global Banking and Markets and the revenues generated from its various departments, including investment banking. Furthermore, the research analyst's compensation is charged as an expense to various Scotiabank, Global Banking and Markets departments, including investment banking. Research Analysts may not receive compensation from the companies they cover.

Non-U.S. analysts may not be associated persons of Scotia Capital (USA) Inc. and therefore may not be subject to FINRA Rule 2711 restrictions on communications with subject company, public appearances and trading securities held by the analysts.

## Definition of Scotiabank, Global Banking and Markets Equity Research Ratings & Risk Rankings

We have a four-tiered rating system, with ratings of Focus Stock, Sector Outperform, Sector Perform, and Sector Underperform. Each analyst assigns a rating that is relative to his or her coverage universe or an index identified by the analyst that includes, but is not limited to, stocks covered by the analyst.

Our risk ranking system provides transparency as to the underlying financial and operational risk of each stock covered. Statistical and judgmental factors considered are: historical financial results, share price volatility, liquidity of the shares, credit ratings, analyst forecasts, consistency and predictability of earnings, EPS growth, dividends, cash flow from operations, and strength of balance sheet. The Director of Research and the Supervisory Analyst jointly make the final determination of all risk rankings.

The rating assigned to each security covered in this report is based on the Scotiabank, Global Banking and Markets research analyst's 12-month view on the security. Analysts may sometimes express to traders, salespeople and certain clients their shorter-term views on these securities that differ from their 12-month view due to several factors, including but not limited to the inherent volatility of the marketplace.

### Ratings

#### Focus Stock (FS)

The stock represents an analyst's best idea(s); stocks in this category are expected to significantly outperform the average 12-month total return of the analyst's coverage universe or an index identified by the analyst that includes, but is not limited to, stocks covered by the analyst.

#### Sector Outperform (SO)

The stock is expected to outperform the average 12-month total return of the analyst's coverage universe or an index identified by the analyst that includes, but is not limited to, stocks covered by the analyst.

#### Sector Perform (SP)

The stock is expected to perform approximately in line with the average 12-month total return of the analyst's coverage universe or an index identified by the analyst that includes, but is not limited to, stocks covered by the analyst.

#### Sector Underperform (SU)

The stock is expected to underperform the average 12-month total return of the analyst's coverage universe or an index identified by the analyst that includes, but is not limited to, stocks covered by the analyst.

### Other Ratings

*Tender* – Investors are guided to tender to the terms of the takeover offer.

*Under Review* – The rating has been temporarily placed under review, until sufficient information has been received and assessed by the analyst.

### Risk Rankings

#### Low

Low financial and operational risk, high predictability of financial results, low stock volatility.

#### Medium

Moderate financial and operational risk, moderate predictability of financial results, moderate stock volatility.

#### High

High financial and/or operational risk, low predictability of financial results, high stock volatility.

#### Speculative

Exceptionally high financial and/or operational risk, exceptionally low predictability of financial results, exceptionally high stock volatility. For risk-tolerant investors only.

## Scotiabank, Global Banking and Markets Equity Research Ratings Distribution\*

### Distribution by Ratings and Equity and Equity-Related Financings\*

\* As at December 31, 2013.

Source: Scotiabank GBM.

For the purposes of the ratings distribution disclosure FINRA requires members who use a ratings system with terms different than "buy," "hold/neutral" and "sell," to equate their own ratings into these categories. Our Focus Stock, Sector Outperform, Sector Perform, and Sector Underperform ratings are based on the criteria above, but for this purpose could be equated to strong buy, buy, neutral and sell ratings, respectively.

## General Disclosures

This report has been prepared by analysts who are employed by the Research Department of Scotiabank, Global Banking and Markets. Scotiabank, together with "Global Banking and Markets," is a marketing name for the global corporate and investment banking and capital markets businesses of The Bank of Nova Scotia and certain of its affiliates in the countries where they operate, including Scotia Capital Inc.

All other trademarks are acknowledged as belonging to their respective owners and the display of such trademarks is for informational use only.

Scotiabank, Global Banking and Markets Research produces research reports under a single marketing identity referred to as "Globally-branded research" under U.S. rules. This research is produced on a single global research platform with one set of rules which meet the most stringent standards set by regulators in the various jurisdictions in which the research reports are produced. In addition, the analysts who produce the research reports, regardless of location, are subject to one set of policies designed to meet the most stringent rules established by regulators in the various jurisdictions where the research reports are produced.

Scotia Capital Inc. or an affiliate thereof owns or controls an equity interest in TMX Group Limited and in excess of 1% of the issued and outstanding equity securities thereof. In addition, an affiliate of Scotia Capital Inc. is a lender to TMX Group Limited under its credit facilities. As such, Scotia Capital Inc. may be considered to have an economic interest in TMX Group Limited.

This report is provided to you for informational purposes only. This report is not, and is not to be construed as, an offer to sell or solicitation of an offer to buy any securities and/or commodity futures contracts.

The securities mentioned in this report may neither be suitable for all investors nor eligible for sale in some jurisdictions where the report is distributed.

The information and opinions contained herein have been compiled or arrived at from sources believed reliable, however, Scotiabank, Global Banking and Markets makes no representation or warranty, express or implied, as to their accuracy or completeness.

Scotiabank, Global Banking and Markets has policies designed to make best efforts to ensure that the information contained in this report is current as of the date of this report, unless otherwise specified.

Any prices that are stated in this report are for informational purposes only. Scotiabank, Global Banking and Markets makes no representation that any transaction may be or could have been effected at those prices.

Any opinions expressed herein are those of the author(s) and are subject to change without notice and may differ or be contrary from the opinions expressed by other departments of Scotiabank, Global Banking and Markets or any of its affiliates.

Neither Scotiabank, Global Banking and Markets nor its affiliates accepts any liability whatsoever for any direct or consequential loss arising from any use of this report or its contents.

Equity research reports published by Scotiabank, Global Banking and Markets are available electronically via: Bloomberg, Thomson Financial/First Call - Research Direct, Reuters, Capital IQ, and FactSet. Institutional clients with questions regarding distribution of equity research should contact us at 1-800-208-7666.

This report and all the information, opinions, and conclusions contained in it are protected by copyright. This report may not be reproduced in whole or in part, or referred to in any manner whatsoever, nor may the information, opinions, and conclusions contained in it be referred to without the prior express consent of Scotiabank, Global Banking and Markets.

## Additional Disclosures

Canada: This report is distributed by Scotia Capital Inc., a subsidiary of The Bank of Nova Scotia. Scotia Capital Inc. is a member of the Canadian Investor Protection Fund and the Investment Industry Regulatory Organization of Canada.

Chile: This report is distributed by Scotia Corredora de Bolsa Chile S.A., a subsidiary of The Bank of Nova Scotia.

Hong Kong: This report is distributed by The Bank of Nova Scotia Hong Kong Branch, which is authorized by the Securities and Future Commission to conduct Type 1, Type 4 and Type 6 regulated activities and regulated by the Hong Kong Monetary Authority.

Mexico: This report is distributed by Scotia Inverlat Casa de Bolsa S.A. de C.V., a subsidiary of the Bank of Nova Scotia.

Peru: This report is distributed by Scotia Sociedad Agente de Bolsa S.A., a subsidiary of The Bank of Nova Scotia.

Singapore: This report is distributed by The Bank of Nova Scotia Asia Limited, a subsidiary of The Bank of Nova Scotia. The Bank of Nova Scotia Asia Limited is authorised and regulated by the Monetary Authority of Singapore, and exempted under Section 99(1)(a), and (b), (c) and (d) of the Securities and Futures Act to conduct regulated activities.

United Kingdom and the rest of Europe: Except as otherwise specified herein, this report is distributed by Scotiabank Europe plc, a subsidiary of The Bank of Nova Scotia. Scotiabank Europe plc is authorized by the Prudential Regulation Authority (PRA) and regulated by the PRA and the Financial Conduct Authority (FCA). Scotiabank Europe plc complies with all FCA requirements concerning research and the associated disclosures and these are indicated on the research where applicable.

United States: This report is distributed by Scotia Capital (USA) Inc., a subsidiary of Scotia Capital Inc., and a registered U.S. broker-dealer. All transactions by a U.S. investor of securities mentioned in this report must be effected through Scotia Capital (USA) Inc.

Non-U.S. investors wishing to effect a transaction in the securities discussed in this report should contact a Scotiabank, Global Banking and Markets entity in their local jurisdiction unless governing law permits otherwise.

## Fortis Inc.

Yield (Curr.) 4.2%

Key Risks to Target: Interest rates; Rate base growth; Regulated ROE; Acquisitions; Regulatory

### Event

- FTS reported adjusted Q4/13 EPS of \$0.48 vs. our estimate of \$0.48 and \$0.47 in Q4/12.

### Implications

- Our positive outlook into 2015 and beyond for FTS remains intact following the Q4 report. Organic growth projections are increasingly robust and major projects are on time and budget.
- Management guided to \$1.4B of organic growth this year (in line with our estimate) and >\$6.5B for the next 5 years. The Waneta Hydro Project remains on budget at \$900M. These expenditures combined with integration of acquisitions drives our \$2 EPS forecast for 2015.
- We believe attractive EPS and dividend growth will persist beyond 2015. Western Canada is the main driver with continued high-single digit annual expansion in AB and new opportunities in B.C. driven by LNG/CNG (at least \$400M in service by 2016).
- The recent sale of Griffith (subsidiary of CH Energy) for US\$70M is positive as it contributed little in the way of earnings, sale proceeds should offset recent negative Fx impacts, and it was non-core.

### Recommendation

- The stock has been lacklustre on short-term equity over-supply and near-term dilution. As a result, it is now cheap, in our opinion. Trading at only 15x our 2015 estimate, it would normally trade at 18x+ in today's bond yield environment. We would accumulate at these levels.

## Definition of Scotiabank, Global Banking and Markets Equity Research Ratings & Risk Rankings

We have a four-tiered rating system, with ratings of Focus Stock, Sector Outperform, Sector Perform, and Sector Underperform. Each analyst assigns a rating that is relative to his or her coverage universe or an index identified by the analyst that includes, but is not limited to, stocks covered by the analyst.

Our risk ranking system provides transparency as to the underlying financial and operational risk of each stock covered. Statistical and judgmental factors considered are: historical financial results, share price volatility, liquidity of the shares, credit ratings, analyst forecasts, consistency and predictability of earnings, EPS growth, dividends, cash flow from operations, and strength of balance sheet. The Director of Research and the Supervisory Analyst jointly make the final determination of all risk rankings.

The rating assigned to each security covered in this report is based on the Scotiabank, Global Banking and Markets research analyst's 12-month view on the security. Analysts may sometimes express to traders, salespeople and certain clients their shorter-term views on these securities that differ from their 12-month view due to several factors, including but not limited to the inherent volatility of the marketplace.

### Ratings

#### Focus Stock (FS)

The stock represents an analyst's best idea(s); stocks in this category are expected to significantly outperform the average 12-month total return of the analyst's coverage universe or an index identified by the analyst that includes, but is not limited to, stocks covered by the analyst.

#### Sector Outperform (SO)

The stock is expected to outperform the average 12-month total return of the analyst's coverage universe or an index identified by the analyst that includes, but is not limited to, stocks covered by the analyst.

#### Sector Perform (SP)

The stock is expected to perform approximately in line with the average 12-month total return of the analyst's coverage universe or an index identified by the analyst that includes, but is not limited to, stocks covered by the analyst.

#### Sector Underperform (SU)

The stock is expected to underperform the average 12-month total return of the analyst's coverage universe or an index identified by the analyst that includes, but is not limited to, stocks covered by the analyst.

### Other Ratings

*Tender* – Investors are guided to tender to the terms of the takeover offer.

*Under Review* – The rating has been temporarily placed under review, until sufficient information has been received and assessed by the analyst.

### Risk Rankings

#### Low

Low financial and operational risk, high predictability of financial results, low stock volatility.

#### Medium

Moderate financial and operational risk, moderate predictability of financial results, moderate stock volatility.

#### High

High financial and/or operational risk, low predictability of financial results, high stock volatility.

#### Speculative

Exceptionally high financial and/or operational risk, exceptionally low predictability of financial results, exceptionally high stock volatility. For risk-tolerant investors only.

## Scotiabank, Global Banking and Markets Equity Research Ratings Distribution\*

### Distribution by Ratings and Equity and Equity-Related Financings\*

\* As at January 31, 2014.

Source: Scotiabank GBM.

For the purposes of the ratings distribution disclosure FINRA requires members who use a ratings system with terms different than "buy," "hold/neutral" and "sell," to equate their own ratings into these categories. Our Focus Stock, Sector Outperform, Sector Perform, and Sector Underperform ratings are based on the criteria above, but for this purpose could be equated to strong buy, buy, neutral and sell ratings, respectively.

## General Disclosures

This report has been prepared by analysts who are employed by the Research Department of Scotiabank, Global Banking and Markets. Scotiabank, together with "Global Banking and Markets," is a marketing name for the global corporate and investment banking and capital markets businesses of The Bank of Nova Scotia and certain of its affiliates in the countries where they operate, including Scotia Capital Inc.

All other trademarks are acknowledged as belonging to their respective owners and the display of such trademarks is for informational use only.

Scotiabank, Global Banking and Markets Research produces research reports under a single marketing identity referred to as "Globally-branded research" under U.S. rules. This research is produced on a single global research platform with one set of rules which meet the most stringent standards set by regulators in the various jurisdictions in which the research reports are produced. In addition, the analysts who produce the research reports, regardless of location, are subject to one set of policies designed to meet the most stringent rules established by regulators in the various jurisdictions where the research reports are produced.

Scotia Capital Inc. or an affiliate thereof owns or controls an equity interest in TMX Group Limited and in excess of 1% of the issued and outstanding equity securities thereof. In addition, an affiliate of Scotia Capital Inc. is a lender to TMX Group Limited under its credit facilities. As such, Scotia Capital Inc. may be considered to have an economic interest in TMX Group Limited.

This report is provided to you for informational purposes only. This report is not, and is not to be construed as, an offer to sell or solicitation of an offer to buy any securities and/or commodity futures contracts.

The securities mentioned in this report may neither be suitable for all investors nor eligible for sale in some jurisdictions where the report is distributed.

The information and opinions contained herein have been compiled or arrived at from sources believed reliable, however, Scotiabank, Global Banking and Markets makes no representation or warranty, express or implied, as to their accuracy or completeness.

Scotiabank, Global Banking and Markets has policies designed to make best efforts to ensure that the information contained in this report is current as of the date of this report, unless otherwise specified.

Any prices that are stated in this report are for informational purposes only. Scotiabank, Global Banking and Markets makes no representation that any transaction may be or could have been effected at those prices.

Yield (Curr.) 4.0%

Key Risks to Target: Interest rates; Rate base growth; Regulated ROE; Acquisitions; Regulatory

### Event

- UNS Energy subsidiaries filed Integrated Resource Plans (IRPs) with the Arizona regulator detailing generation additions and fuel mix through 2028.

### Implications

- Based on the IRPs, it appears capital expenditures for generation at UNS could drive growth rates comparable to FTS's premium Western Canadian utilities.
- Key features of the IRPs were replacement of coal-fired power with gas-fired power, as well as construction of renewable power to meet Renewable Portfolio Standards (RPS) in Arizona.
- Our summary analysis suggests that the UNS rate-base could grow on average at 6%-8% annually through 2025 if the IRPs are accepted. This growth already nets off what UNS is forecasting for distributed generation (DG) that could eat into utility sales revenue.

### Recommendation

- FTS shares have started to perform better lately as equity overhang dissipates and sentiment toward interest-sensitive stocks improves. We still see meaningful, low-risk upside to a more normal level of valuation relative to bonds and peers. There are no changes to our Sector Outperform rating and \$36 target price.

## AZ Growth Outlook Taking Shape

- When FTS announced the UNS Energy acquisition late last year many investors were left shaking their heads in wonder why a utility so far away from Newfoundland (or anywhere in Canada for that matter) was such an attractive target. But this week's regulatory filing of IRPs starts to uncover what the company saw – and investors may not have – as potential for future value creation. In particular, the opportunity for power generation investment could drive premium utility growth.
- Reducing coal-fired resources in the fuel mix from 80% to 56% by the end of the decade while maintaining a sufficient reserve margin in a growing market drives that investment opportunity. Coal-fired power must be replaced with another form of reliable base-load power, namely gas-fired. Right now the company is seeking approval for the acquisition of a 550 MW plant for US\$219M (Gila River). Well over and above that, the IRPs call for the addition of about 950 MW of gas-fired power between 2018 and 2026. At today's cost, that addition could amount to a US\$1B-\$1.5B investment on a closing rate-base of only ~US\$3B.
- The IRPs also detail the utility-scale renewable power opportunity that we highlighted in research earlier this year. Arizona's RPS law requires renewable to rise from 4% of load to 15% by 2025. The utilities quantified required additions of 342 MW by 2028. Of that amount, the vast majority would be satisfied by solar and a minority of it by wind. We estimate those additions represent nearly a US\$1B investment opportunity for FTS.
- We can utilize the IRP filings to derive rate-base growth estimates into the future; detailed schedules for new generation capacity through 2028 were published. Our analysis applies today's cost estimates to each form and amount of generation. We derive a total potential investment of about ~US\$2.5B through 2025.

Source: Company reports; Scotiabank GBM estimates.

- That US\$2.5b investment potential translates into attractive rate-base growth. While most utilities grow at only 2%-3%/year, our analysis suggests the UNS assets could grow at rough 6%-8% annually. That premium growth rate is comparable to rate-base expansion in FTS's Alberta and B.C. regulated utilities.
- Distributed generation, particularly roof-top solar, has been identified as a competitive threat and deterred some investors from participating in the UNS acquisition financing. Indeed, when households add solar panels to their roof-tops in Arizona, they pay only a \$5/month "exit" fee and no longer contribute to utility grid fixed costs though they still use the grid for back-up power. As a result, it is a risk/threat we intend to monitor closely.
- Having said that, the IRP forecast indicates at this time that DG may have an immaterial impact. The utilities are forecasting a roughly 156 GWh increase in DG from 2015 to 2020. We understand that only about half of that (about 15-16 GWh/year) would be market penetration by competitive DG suppliers, primarily roof-top solar. At retail rates of US\$0.10/KWh, that competitive supply would only cost UNS about US\$1.6m in annual revenue, half of which would be recoverable under the regulator's "lost fixed cost recovery mechanism". On this basis, only if DG penetration accelerated dramatically would UNS face a material financial threat.

- Adding another relatively high-growth utility to the business mix reinforces the potential for a return to mid-high single digit EPS and dividend growth at FTS by next year. As discussed and substantiated in our recent research, at today's bond yields we believe FTS will trade at a high-teens P/E multiple if growth returns to these historically normal levels. Currently trading at ~16x our 2015 estimate, it is still discounted to fair value and to several of the peers trading at 18x+. We would continue accumulating the stock at these levels and maintain our Sector Outperform rating.

All pricing of securities in reports is based on the closing price of the securities' principal marketplace on the night before the publication date, unless otherwise explicitly stated.

All Equity Research Analysts report to the Head of Equity Research. The Head of Equity Research reports to the Managing Director, Head of Institutional Equity Sales, Trading and Research, who is not and does not report to the Head of the Investment Banking Department. Scotiabank, Global Banking and Markets has policies that are reasonably designed to prevent or control the sharing of material non-public information across internal information barriers, such as between Investment Banking and Research.

The compensation of the research analyst who prepared this report is based on several factors, including but not limited to, the overall profitability of Scotiabank, Global Banking and Markets and the revenues generated from its various departments, including investment banking. Furthermore, the research analyst's compensation is charged as an expense to various Scotiabank, Global Banking and Markets departments, including investment banking. Research Analysts may not receive compensation from the companies they cover.

Non-U.S. analysts may not be associated persons of Scotia Capital (USA) Inc. and therefore may not be subject to FINRA Rule 2711 restrictions on communications with subject company, public appearances and trading securities held by the analysts.

For Scotiabank, Global Banking and Markets Research analyst standards and disclosure policies, please visit [gbm.scotiabank.com/disclosures](http://gbm.scotiabank.com/disclosures). Scotiabank, Global Banking and Markets Research, 40 King Street West, 33rd Floor, Toronto, Ontario, M5H 1H1.

## Definition of Scotiabank, Global Banking and Markets Equity Research Ratings & Risk Rankings

We have a four-tiered rating system, with ratings of Focus Stock, Sector Outperform, Sector Perform, and Sector Underperform. Each analyst assigns a rating that is relative to his or her coverage universe or an index identified by the analyst that includes, but is not limited to, stocks covered by the analyst.

Our risk ranking system provides transparency as to the underlying financial and operational risk of each stock covered. Statistical and judgmental factors considered are: historical financial results, share price volatility, liquidity of the shares, credit ratings, analyst forecasts, consistency and predictability of earnings, EPS growth, dividends, cash flow from operations, and strength of balance sheet. The Director of Research and the Supervisory Analyst jointly make the final determination of all risk rankings.

The rating assigned to each security covered in this report is based on the Scotiabank, Global Banking and Markets research analyst's 12-month view on the security. Analysts may sometimes express to traders, salespeople and certain clients their shorter-term views on these securities that differ from their 12-month view due to several factors, including but not limited to the inherent volatility of the marketplace.

### Ratings

#### Focus Stock (FS)

The stock represents an analyst's best idea(s); stocks in this category are expected to significantly outperform the average 12-month total return of the analyst's coverage universe or an index identified by the analyst that includes, but is not limited to, stocks covered by the analyst.

#### Sector Outperform (SO)

The stock is expected to outperform the average 12-month total return of the analyst's coverage universe or an index identified by the analyst that includes, but is not limited to, stocks covered by the analyst.

#### Sector Perform (SP)

The stock is expected to perform approximately in line with the average 12-month total return of the analyst's coverage universe or an index identified by the analyst that includes, but is not limited to, stocks covered by the analyst.

#### Sector Underperform (SU)

The stock is expected to underperform the average 12-month total return of the analyst's coverage universe or an index identified by the analyst that includes, but is not limited to, stocks covered by the analyst.

### Other Ratings

*Tender* – Investors are guided to tender to the terms of the takeover offer.

*Under Review* – The rating has been temporarily placed under review, until sufficient information has been received and assessed by the analyst.

### Risk Rankings

#### Low

Low financial and operational risk, high predictability of financial results, low stock volatility.

#### Medium

Moderate financial and operational risk, moderate predictability of financial results, moderate stock volatility.

#### High

High financial and/or operational risk, low predictability of financial results, high stock volatility.

#### Speculative

Exceptionally high financial and/or operational risk, exceptionally low predictability of financial results, exceptionally high stock volatility. For risk-tolerant investors only.

## Scotiabank, Global Banking and Markets Equity Research Ratings Distribution\*

### Distribution by Ratings and Equity and Equity-Related Financings\*

\* As at March 31, 2014.

Source: Scotiabank GBM.

For the purposes of the ratings distribution disclosure FINRA requires members who use a ratings system with terms different than "buy," "hold/neutral" and "sell," to equate their own ratings into these categories. Our Focus Stock, Sector Outperform, Sector Perform, and Sector Underperform ratings are based on the criteria above, but for this purpose could be equated to strong buy, buy, neutral and sell ratings, respectively.

## General Disclosures

This report has been prepared by analysts who are employed by the Research Department of Scotiabank, Global Banking and Markets. Scotiabank, together with "Global Banking and Markets," is a marketing name for the global corporate and investment banking and capital markets businesses of The Bank of Nova Scotia and certain of its affiliates in the countries where they operate, including Scotia Capital Inc.

All other trademarks are acknowledged as belonging to their respective owners and the display of such trademarks is for informational use only.

Scotiabank, Global Banking and Markets Research produces research reports under a single marketing identity referred to as "Globally-branded research" under U.S. rules. This research is produced on a single global research platform with one set of rules which meet the most stringent standards set by regulators in the various jurisdictions in which the research reports are produced. In addition, the analysts who produce the research reports, regardless of location, are subject to one set of policies designed to meet the most stringent rules established by regulators in the various jurisdictions where the research reports are produced.

Scotia Capital Inc. or an affiliate thereof owns or controls an equity interest in TMX Group Limited and in excess of 1% of the issued and outstanding equity securities thereof. In addition, an affiliate of Scotia Capital Inc. is a lender to TMX Group Limited under its credit facilities. As such, Scotia Capital Inc. may be considered to have an economic interest in TMX Group Limited.

This report is provided to you for informational purposes only. This report is not, and is not to be construed as, an offer to sell or solicitation of an offer to buy any securities and/or commodity futures contracts.

The securities mentioned in this report may neither be suitable for all investors nor eligible for sale in some jurisdictions where the report is distributed.

The information and opinions contained herein have been compiled or arrived at from sources believed reliable, however, Scotiabank, Global Banking and Markets makes no representation or warranty, express or implied, as to their accuracy or completeness.

Scotiabank, Global Banking and Markets has policies designed to make best efforts to ensure that the information contained in this report is current as of the date of this report, unless otherwise specified.

Any prices that are stated in this report are for informational purposes only. Scotiabank, Global Banking and Markets makes no representation that any transaction may be or could have been effected at those prices.

Any opinions expressed herein are those of the author(s) and are subject to change without notice and may differ or be contrary from the opinions expressed by other departments of Scotiabank, Global Banking and Markets or any of its affiliates.

Neither Scotiabank, Global Banking and Markets nor its affiliates accepts any liability whatsoever for any direct or consequential loss arising from any use of this report or its contents.

Equity research reports published by Scotiabank, Global Banking and Markets are available electronically via: Bloomberg, Thomson Financial/First Call - Research Direct, Reuters, Capital IQ, and FactSet. Institutional clients with questions regarding distribution of equity research should contact us at 1-800-208-7666.

This report and all the information, opinions, and conclusions contained in it are protected by copyright. This report may not be reproduced in whole or in part, or referred to in any manner whatsoever, nor may the information, opinions, and conclusions contained in it be referred to without the prior express consent of Scotiabank, Global Banking and Markets.

## Additional Disclosures

Canada: This report is distributed by Scotia Capital Inc., a subsidiary of The Bank of Nova Scotia. Scotia Capital Inc. is a member of the Canadian Investor Protection Fund and the Investment Industry Regulatory Organization of Canada.

Chile: This report is distributed by Scotia Corredora de Bolsa Chile S.A., a subsidiary of The Bank of Nova Scotia.

Hong Kong: This report is distributed by The Bank of Nova Scotia Hong Kong Branch, which is authorized by the Securities and Future Commission to conduct Type 1, Type 4 and Type 6 regulated activities and regulated by the Hong Kong Monetary Authority.

Mexico: This report is distributed by Scotia Inverlat Casa de Bolsa S.A. de C.V., a subsidiary of the Bank of Nova Scotia.

Peru: This report is distributed by Scotia Sociedad Agente de Bolsa S.A., a subsidiary of The Bank of Nova Scotia.

Singapore: This report is distributed by The Bank of Nova Scotia Asia Limited, a subsidiary of The Bank of Nova Scotia. The Bank of Nova Scotia Asia Limited is authorised and regulated by the Monetary Authority of Singapore, and exempted under Section 99(1)(a), (b), (c) and (d) of the Securities and Futures Act to conduct regulated activities.

United Kingdom and the rest of Europe: Except as otherwise specified herein, this report is distributed by Scotiabank Europe plc, a subsidiary of The Bank of Nova Scotia. Scotiabank Europe plc is authorized by the Prudential Regulation Authority (PRA) and regulated by the PRA and the Financial Conduct Authority (FCA). Scotiabank Europe plc complies with all FCA requirements concerning research and the associated disclosures and these are indicated on the research where applicable.

United States: This report is distributed by Scotia Capital (USA) Inc., a subsidiary of Scotia Capital Inc., and a registered U.S. broker-dealer. All transactions by a U.S. investor of securities mentioned in this report must be effected through Scotia Capital (USA) Inc.

Non-U.S. investors wishing to effect a transaction in the securities discussed in this report should contact a Scotiabank, Global Banking and Markets entity in their local jurisdiction unless governing law permits otherwise.

**Key Risks to Target:** Interest rates; Rate base growth; Regulated ROE; Acquisitions; Regulatory

**Div. (NTM)** \$1.31  
**Div. (Curr.)** \$1.28  
**Yield (Curr.)** 4.0%

### Event

- FTS reported adjusted Q1/14 EPS of \$0.66 vs. our estimate of \$0.62 and \$0.67 in Q1/13.

### Implications

- The UNS deal appears on track for closing later this year. Regulatory staff has recommended approval with conditions. Some of the conditions would be unacceptable, in our view, but are not insurmountable in the normal negotiating process.
- Despite the proposed premium on UNS, the deal is still on track to deliver modest accretion to EPS next year. Financing costs are coming in below expectations with a recent U.S. debt deal done at an average term of 11 years for 3.84%.
- Visible organic growth should add significant value over time. Including UNS, there is \$8B of utility-type investment opportunities. Given recently-proposed utility transaction multiples of 1.5x+ rate-base (Pepco, AltaLink), these investments could add \$4B of value.
- Over and above that \$8B, we see meaningful potential for LNG-related investments. FTS has strategically-located properties and assets in B.C. that position the company as well or better than the competition in liquefaction as well as pipelines (Tilbury, Woodfibre).

### Recommendation

- We are raising our TP from \$36 to \$38 based on lower bond yield (~4.0% 10-Year BBB) assumptions we have been applying to the sector. Our SO rating is intact and we still recommend accumulating at these levels.

### Event

- On May 16, FTS and UNS filed a settlement with AZ regulatory staff and the consumer advocacy group.

### Implications

- The settlement on conditions for approval of the UNS acquisition happened quickly and on reasonable terms. It was only 16 days prior that regulatory staff recommended conditions, some of which, in our view, were draconian and most of which were significantly mitigated.
- The initial staff recommendations for restrictions on dividend payments from subsidiaries and for certain rates constraints were altered. Dividends from subs will now only be limited to 60% of earnings. And there is no burden to prove ongoing rates increases are lower post-deal.
- A US\$220M required equity injection by FTS post-closing relates to the acquisition of power assets (Gila River) and we believe was baked into the acquisition multiple. It also shows a willingness among stakeholders to increase equity thickness which increases earnings.

### Recommendation

- The only condition with a direct financial impact is that FTS deliver a one-time \$30M ratepayer benefit on closing (no impact to 2015 ests). We see this condition as in line with precedent and, taken in the context of the overall settlement, not onerous. An ALJ hearing on the terms is scheduled for June 16. Given the pace and productivity of negotiations, we now believe the deal could close as early as September 30. We would continue accumulating shares at these levels.

## Appendix A: Important Disclosures

Company	Ticker	Disclosures (see legend below)*
Fortis Inc.	FTS	G, I, S, U

I, Matthew Akman, certify that (1) the views expressed in this report in connection with securities or issuers that I analyze accurately reflect my personal views and (2) no part of my compensation was, is, or will be directly or indirectly, related to the specific recommendations or views expressed by me in this report.

This research report was prepared by employees of Scotia Capital Inc. and/or its affiliates who have the title of Analyst.

All pricing of securities in reports is based on the closing price of the securities' principal marketplace on the night before the publication date, unless otherwise explicitly stated.

All Equity Research Analysts report to the Head of Equity Research. The Head of Equity Research reports to the Managing Director, Head of Institutional Equity Sales, Trading and Research, who is not and does not report to the Head of the Investment Banking Department. Scotiabank, Global Banking and Markets has policies that are reasonably designed to prevent or control the sharing of material non-public information across internal information barriers, such as between Investment Banking and Research.

The compensation of the research analyst who prepared this report is based on several factors, including but not limited to, the overall profitability of Scotiabank, Global Banking and Markets and the revenues generated from its various departments, including investment banking. Furthermore, the research analyst's compensation is charged as an expense to various Scotiabank, Global Banking and Markets departments, including investment banking. Research Analysts may not receive compensation from the companies they cover.

Non-U.S. analysts may not be associated persons of Scotia Capital (USA) Inc. and therefore may not be subject to FINRA Rule 2711 restrictions on communications with subject company, public appearances and trading securities held by the analysts.

For Scotiabank, Global Banking and Markets Research analyst standards and disclosure policies, please visit [gbm.scotiabank.com/disclosures](http://gbm.scotiabank.com/disclosures).  
Scotiabank, Global Banking and Markets Research, 40 King Street West, 33rd Floor, Toronto, Ontario, M5H 1H1.

### \* Legend

- G** Scotia Capital (USA) Inc. or its affiliates has managed or co-managed a public offering in the past 12 months.
- I** Scotia Capital (USA) Inc. or its affiliates has received compensation for investment banking services in the past 12 months.
- S** Scotia Capital Inc. and its affiliates collectively beneficially own in excess of 1% of one or more classes of the issued and outstanding equity securities of this issuer.
- U** Within the last 12 months, Scotia Capital Inc. and/or its affiliates have undertaken an underwriting liability with respect to equity or debt securities of, or have provided advice for a fee with respect to, this issuer.

## Definition of Scotiabank, Global Banking and Markets Equity Research Ratings & Risk Rankings

We have a four-tiered rating system, with ratings of Focus Stock, Sector Outperform, Sector Perform, and Sector Underperform. Each analyst assigns a rating that is relative to his or her coverage universe or an index identified by the analyst that includes, but is not limited to, stocks covered by the analyst.

Our risk ranking system provides transparency as to the underlying financial and operational risk of each stock covered. Statistical and judgmental factors considered are: historical financial results, share price volatility, liquidity of the shares, credit ratings, analyst forecasts, consistency and predictability of earnings, EPS growth, dividends, cash flow from operations, and strength of balance sheet. The Director of Research and the Supervisory Analyst jointly make the final determination of all risk rankings.

The rating assigned to each security covered in this report is based on the Scotiabank, Global Banking and Markets research analyst's 12-month view on the security. Analysts may sometimes express to traders, salespeople and certain clients their shorter-term views on these securities that differ from their 12-month view due to several factors, including but not limited to the inherent volatility of the marketplace.

### Ratings

#### Focus Stock (FS)

The stock represents an analyst's best idea(s); stocks in this category are expected to significantly outperform the average 12-month total return of the analyst's coverage universe or an index identified by the analyst that includes, but is not limited to, stocks covered by the analyst.

#### Sector Outperform (SO)

The stock is expected to outperform the average 12-month total return of the analyst's coverage universe or an index identified by the analyst that includes, but is not limited to, stocks covered by the analyst.

#### Sector Perform (SP)

The stock is expected to perform approximately in line with the average 12-month total return of the analyst's coverage universe or an index identified by the analyst that includes, but is not limited to, stocks covered by the analyst.

#### Sector Underperform (SU)

The stock is expected to underperform the average 12-month total return of the analyst's coverage universe or an index identified by the analyst that includes, but is not limited to, stocks covered by the analyst.

### Other Ratings

*Tender* – Investors are guided to tender to the terms of the takeover offer.

*Under Review* – The rating has been temporarily placed under review, until sufficient information has been received and assessed by the analyst.

### Risk Rankings

#### Low

Low financial and operational risk, high predictability of financial results, low stock volatility.

#### Medium

Moderate financial and operational risk, moderate predictability of financial results, moderate stock volatility.

#### High

High financial and/or operational risk, low predictability of financial results, high stock volatility.

#### Speculative

Exceptionally high financial and/or operational risk, exceptionally low predictability of financial results, exceptionally high stock volatility. For risk-tolerant investors only.

## Scotiabank, Global Banking and Markets Equity Research Ratings Distribution\*

### Distribution by Ratings and Equity and Equity-Related Financings\*

\* As at April 30, 2014.

Source: Scotiabank GBM.

For the purposes of the ratings distribution disclosure FINRA requires members who use a ratings system with terms different than "buy," "hold/neutral" and "sell," to equate their own ratings into these categories. Our Focus Stock, Sector Outperform, Sector Perform, and Sector Underperform ratings are based on the criteria above, but for this purpose could be equated to strong buy, buy, neutral and sell ratings, respectively.

## General Disclosures

This report has been prepared by analysts who are employed by the Research Department of Scotiabank, Global Banking and Markets. Scotiabank, together with "Global Banking and Markets," is a marketing name for the global corporate and investment banking and capital markets businesses of The Bank of Nova Scotia and certain of its affiliates in the countries where they operate, including Scotia Capital Inc.

All other trademarks are acknowledged as belonging to their respective owners and the display of such trademarks is for informational use only.

Scotiabank, Global Banking and Markets Research produces research reports under a single marketing identity referred to as "Globally-branded research" under U.S. rules. This research is produced on a single global research platform with one set of rules which meet the most stringent standards set by regulators in the various jurisdictions in which the research reports are produced. In addition, the analysts who produce the research reports, regardless of location, are subject to one set of policies designed to meet the most stringent rules established by regulators in the various jurisdictions where the research reports are produced.

Scotia Capital Inc. or an affiliate thereof owns or controls an equity interest in TMX Group Limited and in excess of 1% of the issued and outstanding equity securities thereof. In addition, an affiliate of Scotia Capital Inc. is a lender to TMX Group Limited under its credit facilities. As such, Scotia Capital Inc. may be considered to have an economic interest in TMX Group Limited.

This report is provided to you for informational purposes only. This report is not, and is not to be construed as, an offer to sell or solicitation of an offer to buy any securities and/or commodity futures contracts.

The securities mentioned in this report may neither be suitable for all investors nor eligible for sale in some jurisdictions where the report is distributed.

The information and opinions contained herein have been compiled or arrived at from sources believed reliable, however, Scotiabank, Global Banking and Markets makes no representation or warranty, express or implied, as to their accuracy or completeness.

Scotiabank, Global Banking and Markets has policies designed to make best efforts to ensure that the information contained in this report is current as of the date of this report, unless otherwise specified.

**Div. (NTM)** \$1.31  
**Div. (Curr.)** \$1.28  
**Yield (Curr.)** 3.9%

### Event

- FTS reported Q2/14 adj. EPS of \$0.22 vs. our \$0.26 est. (\$0.32 Q2/13).

### Implications

- The quarter itself included several short-term impacts that mask what we see as a significant renewed growth phase. Corporate costs were higher due to unusual FX changes short-term dilution from financings. However, we see several catalysts for a major bounce-back in 2015/16.
- We have reasoned that, since CH Energy is under-earning, it can generate increased profit without requesting an unreasonable ROE. In fact, CH just filed in July for new rates that could result in a \$40M+ revenue increase while maintaining a conservative 9% ROE.
- Meanwhile growth in Alberta should resume once regulatory treatment of capital spending is resolved. The company is holding back ~\$27M in revenue pending a likely Q1/15 decision. Not to mention further incentive earnings likely available later next year and into 2016.
- At the same time, a more shareholder-friendly FTS is emerging with the new management changes which should help eliminate the valuation discount. A first-ever investor day is scheduled for October 1. Potential tangible actions include the sale of Properties at a multiple in excess of the forward trading EV/EBITDA multiple on the stock.

### Recommendation

- The shares have started to perform better but we still see attractive returns with deal closing and growth visibility. We maintain our Sector Outperform rating and \$38 target price.

## Appendix A: Important Disclosures

Company	Ticker	Disclosures (see legend below)*
Fortis Inc.	FTS	G, I, S, U

I, Matthew Akman, certify that (1) the views expressed in this report in connection with securities or issuers that I analyze accurately reflect my personal views and (2) no part of my compensation was, is, or will be directly or indirectly, related to the specific recommendations or views expressed by me in this report.

This research report was prepared by employees of Scotia Capital Inc. and/or its affiliates who have the title of Analyst.

All pricing of securities in reports is based on the closing price of the securities' principal marketplace on the night before the publication date, unless otherwise explicitly stated.

All Equity Research Analysts report to the Head of Equity Research. The Head of Equity Research reports to the Managing Director, Head of Institutional Equity Sales, Trading and Research, who is not and does not report to the Head of the Investment Banking Department. Scotiabank, Global Banking and Markets has policies that are reasonably designed to prevent or control the sharing of material non-public information across internal information barriers, such as between Investment Banking and Research.

The compensation of the research analyst who prepared this report is based on several factors, including but not limited to, the overall profitability of Scotiabank, Global Banking and Markets and the revenues generated from its various departments, including investment banking. Furthermore, the research analyst's compensation is charged as an expense to various Scotiabank, Global Banking and Markets departments, including investment banking. Research Analysts may not receive compensation from the companies they cover.

Non-U.S. analysts may not be associated persons of Scotia Capital (USA) Inc. and therefore may not be subject to FINRA Rule 2711 restrictions on communications with subject company, public appearances and trading securities held by the analysts.

For Scotiabank, Global Banking and Markets Research analyst standards and disclosure policies, please visit [gbm.scotiabank.com/disclosures](http://gbm.scotiabank.com/disclosures).  
Scotiabank, Global Banking and Markets Research, 40 King Street West, 33rd Floor, Toronto, Ontario, M5H 1H1.

### \* Legend

- G** Scotia Capital (USA) Inc. or its affiliates has managed or co-managed a public offering in the past 12 months.
- I** Scotia Capital (USA) Inc. or its affiliates has received compensation for investment banking services in the past 12 months.
- S** Scotia Capital Inc. and its affiliates collectively beneficially own in excess of 1% of one or more classes of the issued and outstanding equity securities of this issuer.
- U** Within the last 12 months, Scotia Capital Inc. and/or its affiliates have undertaken an underwriting liability with respect to equity or debt securities of, or have provided advice for a fee with respect to, this issuer.

Numbers are located to the left of the lines they represent.  
Numbers indicated with a plus sign (+) have more than one target or rating change in the given month.

## Definition of Scotiabank, Global Banking and Markets Equity Research Ratings & Risk Rankings

We have a four-tiered rating system, with ratings of Focus Stock, Sector Outperform, Sector Perform, and Sector Underperform. Each analyst assigns a rating that is relative to his or her coverage universe or an index identified by the analyst that includes, but is not limited to, stocks covered by the analyst.

Our risk ranking system provides transparency as to the underlying financial and operational risk of each stock covered. Statistical and judgmental factors considered are: historical financial results, share price volatility, liquidity of the shares, credit ratings, analyst forecasts, consistency and predictability of earnings, EPS growth, dividends, cash flow from operations, and strength of balance sheet. The Director of Research and the Supervisory Analyst jointly make the final determination of all risk rankings.

The rating assigned to each security covered in this report is based on the Scotiabank, Global Banking and Markets research analyst's 12-month view on the security. Analysts may sometimes express to traders, salespeople and certain clients their shorter-term views on these securities that differ from their 12-month view due to several factors, including but not limited to the inherent volatility of the marketplace.

### Ratings

#### Focus Stock (FS)

The stock represents an analyst's best idea(s); stocks in this category are expected to significantly outperform the average 12-month total return of the analyst's coverage universe or an index identified by the analyst that includes, but is not limited to, stocks covered by the analyst.

#### Sector Outperform (SO)

The stock is expected to outperform the average 12-month total return of the analyst's coverage universe or an index identified by the analyst that includes, but is not limited to, stocks covered by the analyst.

#### Sector Perform (SP)

The stock is expected to perform approximately in line with the average 12-month total return of the analyst's coverage universe or an index identified by the analyst that includes, but is not limited to, stocks covered by the analyst.

#### Sector Underperform (SU)

The stock is expected to underperform the average 12-month total return of the analyst's coverage universe or an index identified by the analyst that includes, but is not limited to, stocks covered by the analyst.

### Other Ratings

*Tender* – Investors are guided to tender to the terms of the takeover offer.

*Under Review* – The rating has been temporarily placed under review, until sufficient information has been received and assessed by the analyst.

### Risk Rankings

#### Low

Low financial and operational risk, high predictability of financial results, low stock volatility.

#### Medium

Moderate financial and operational risk, moderate predictability of financial results, moderate stock volatility.

#### High

High financial and/or operational risk, low predictability of financial results, high stock volatility.

#### Speculative

Exceptionally high financial and/or operational risk, exceptionally low predictability of financial results, exceptionally high stock volatility. For risk-tolerant investors only.

## Scotiabank, Global Banking and Markets Equity Research Ratings Distribution\*

### Distribution by Ratings and Equity and Equity-Related Financings\*

\* As at July 31, 2014.

Source: Scotiabank GBM.

For the purposes of the ratings distribution disclosure FINRA requires members who use a ratings system with terms different than "buy," "hold/neutral" and "sell," to equate their own ratings into these categories. Our Focus Stock, Sector Outperform, Sector Perform, and Sector Underperform ratings are based on the criteria above, but for this purpose could be equated to strong buy, buy, neutral and sell ratings, respectively.

## General Disclosures

This report has been prepared by analysts who are employed by the Research Department of Scotiabank, Global Banking and Markets. Scotiabank, together with "Global Banking and Markets," is a marketing name for the global corporate and investment banking and capital markets businesses of The Bank of Nova Scotia and certain of its affiliates in the countries where they operate, including Scotia Capital Inc.

All other trademarks are acknowledged as belonging to their respective owners and the display of such trademarks is for informational use only.

Scotiabank, Global Banking and Markets Research produces research reports under a single marketing identity referred to as "Globally-branded research" under U.S. rules. This research is produced on a single global research platform with one set of rules which meet the most stringent standards set by regulators in the various jurisdictions in which the research reports are produced. In addition, the analysts who produce the research reports, regardless of location, are subject to one set of policies designed to meet the most stringent rules established by regulators in the various jurisdictions where the research reports are produced.

Scotia Capital Inc. or an affiliate thereof owns or controls an equity interest in TMX Group Limited and in excess of 1% of the issued and outstanding equity securities thereof. In addition, an affiliate of Scotia Capital Inc. is a lender to TMX Group Limited under its credit facilities. As such, Scotia Capital Inc. may be considered to have an economic interest in TMX Group Limited.

This report is provided to you for informational purposes only. This report is not, and is not to be construed as, an offer to sell or solicitation of an offer to buy any securities and/or commodity futures contracts.

The securities mentioned in this report may neither be suitable for all investors nor eligible for sale in some jurisdictions where the report is distributed.

The information and opinions contained herein have been compiled or arrived at from sources believed reliable, however, Scotiabank, Global Banking and Markets makes no representation or warranty, express or implied, as to their accuracy or completeness.

Scotiabank, Global Banking and Markets has policies designed to make best efforts to ensure that the information contained in this report is current as of the date of this report, unless otherwise specified.

Any prices that are stated in this report are for informational purposes only. Scotiabank, Global Banking and Markets makes no representation that any transaction may be or could have been effected at those prices.

Any opinions expressed herein are those of the author(s) and are subject to change without notice and may differ or be contrary from the opinions expressed by other departments of Scotiabank, Global Banking and Markets or any of its affiliates.

Neither Scotiabank, Global Banking and Markets nor its affiliates accepts any liability whatsoever for any direct or consequential loss arising from any use of this report or its contents.

Equity research reports published by Scotiabank, Global Banking and Markets are available electronically via: Bloomberg, Thomson Financial/First Call - Research Direct, Reuters, Capital IQ, and FactSet. Institutional clients with questions regarding distribution of equity research should contact us at 1-800-208-7666.

This report and all the information, opinions, and conclusions contained in it are protected by copyright. This report may not be reproduced in whole or in part, or referred to in any manner whatsoever, nor may the information, opinions, and conclusions contained in it be referred to without the prior express consent of Scotiabank, Global Banking and Markets.

## Additional Disclosures

Canada: This report is distributed by Scotia Capital Inc., a subsidiary of The Bank of Nova Scotia. Scotia Capital Inc. is a member of the Canadian Investor Protection Fund and the Investment Industry Regulatory Organization of Canada.

Chile: This report is distributed by Scotia Corredora de Bolsa Chile S.A., a subsidiary of The Bank of Nova Scotia.

Hong Kong: This report is distributed by The Bank of Nova Scotia Hong Kong Branch, which is authorized by the Securities and Future Commission to conduct Type 1, Type 4 and Type 6 regulated activities and regulated by the Hong Kong Monetary Authority.

Mexico: This report is distributed by Scotia Inverlat Casa de Bolsa S.A. de C.V., a subsidiary of the Bank of Nova Scotia.

Peru: This report is distributed by Scotia Sociedad Agente de Bolsa S.A., a subsidiary of The Bank of Nova Scotia.

Singapore: This report is distributed by The Bank of Nova Scotia Asia Limited, a subsidiary of The Bank of Nova Scotia. The Bank of Nova Scotia Asia Limited is authorised and regulated by the Monetary Authority of Singapore, and exempted under Section 99(1)(a), (b), (c) and (d) of the Securities and Futures Act to conduct regulated activities.

United Kingdom and the rest of Europe: Except as otherwise specified herein, this report is distributed by Scotiabank Europe plc, a subsidiary of The Bank of Nova Scotia. Scotiabank Europe plc is authorized by the Prudential Regulation Authority (PRA) and regulated by the PRA and the Financial Conduct Authority (FCA). Scotiabank Europe plc complies with all FCA requirements concerning research and the associated disclosures and these are indicated on the research where applicable.

United States: This report is distributed by Scotia Capital (USA) Inc., a subsidiary of Scotia Capital Inc., and a registered U.S. broker-dealer. All transactions by a U.S. investor of securities mentioned in this report must be effected through Scotia Capital (USA) Inc.

Non-U.S. investors wishing to effect a transaction in the securities discussed in this report should contact a Scotiabank, Global Banking and Markets entity in their local jurisdiction unless governing law permits otherwise.

Yield (Curr.) 3.9%

Key Risks to Target: Interest rates; Rate base growth; Regulated ROE; Acquisitions; Regulatory

### Event

- FTS reported Q2/14 adj. EPS of \$0.22 vs. our \$0.26 est. (\$0.32 Q2/13).

### Implications

- The quarter itself included several short-term impacts that mask what we see as a significant renewed growth phase. Corporate costs were higher due to unusual FX changes short-term dilution from financings. However, we see several catalysts for a major bounce-back in 2015/16.
- We have reasoned that, since CH Energy is under-earning, it can generate increased profit without requesting an unreasonable ROE. In fact, CH just filed in July for new rates that could result in a \$40M+ revenue increase while maintaining a conservative 9% ROE.
- Meanwhile growth in Alberta should resume once regulatory treatment of capital spending is resolved. The company is holding back ~\$27M in revenue pending a likely Q1/15 decision. Not to mention further incentive earnings likely available later next year and into 2016.
- At the same time, a more shareholder-friendly FTS is emerging with the new management changes which should help eliminate the valuation discount. A first-ever investor day is scheduled for October 1. Potential tangible actions include the sale of Properties at a multiple in excess of the forward trading EV/EBITDA multiple on the stock.

### Recommendation

- The shares have started to perform better but we still see attractive returns with deal closing and growth visibility. We maintain our Sector Outperform rating and \$38 target price.

Fortis Inc.	FTS	G, I, S, U

I, Matthew Akman, certify that (1) the views expressed in this report in connection with securities or issuers that I analyze accurately reflect my personal views and (2) no part of my compensation was, is, or will be directly or indirectly, related to the specific recommendations or views expressed by me in this report.

This research report was prepared by employees of Scotia Capital Inc. and/or its affiliates who have the title of Analyst.

All pricing of securities in reports is based on the closing price of the securities' principal marketplace on the night before the publication date, unless otherwise explicitly stated.

All Equity Research Analysts report to the Head of Equity Research. The Head of Equity Research reports to the Managing Director, Head of Institutional Equity Sales, Trading and Research, who is not and does not report to the Head of the Investment Banking Department. Scotiabank, Global Banking and Markets has policies that are reasonably designed to prevent or control the sharing of material non-public information across internal information barriers, such as between Investment Banking and Research.

The compensation of the research analyst who prepared this report is based on several factors, including but not limited to, the overall profitability of Scotiabank, Global Banking and Markets and the revenues generated from its various departments, including investment banking. Furthermore, the research analyst's compensation is charged as an expense to various Scotiabank, Global Banking and Markets departments, including investment banking. Research Analysts may not receive compensation from the companies they cover.

Non-U.S. analysts may not be associated persons of Scotia Capital (USA) Inc. and therefore may not be subject to FINRA Rule 2711 restrictions on communications with subject company, public appearances and trading securities held by the analysts.

## Definition of Scotiabank, Global Banking and Markets Equity Research Ratings & Risk Rankings

We have a four-tiered rating system, with ratings of Focus Stock, Sector Outperform, Sector Perform, and Sector Underperform. Each analyst assigns a rating that is relative to his or her coverage universe or an index identified by the analyst that includes, but is not limited to, stocks covered by the analyst.

Our risk ranking system provides transparency as to the underlying financial and operational risk of each stock covered. Statistical and judgmental factors considered are: historical financial results, share price volatility, liquidity of the shares, credit ratings, analyst forecasts, consistency and predictability of earnings, EPS growth, dividends, cash flow from operations, and strength of balance sheet. The Director of Research and the Supervisory Analyst jointly make the final determination of all risk rankings.

The rating assigned to each security covered in this report is based on the Scotiabank, Global Banking and Markets research analyst's 12-month view on the security. Analysts may sometimes express to traders, salespeople and certain clients their shorter-term views on these securities that differ from their 12-month view due to several factors, including but not limited to the inherent volatility of the marketplace.

### Ratings

#### Focus Stock (FS)

The stock represents an analyst's best idea(s); stocks in this category are expected to significantly outperform the average 12-month total return of the analyst's coverage universe or an index identified by the analyst that includes, but is not limited to, stocks covered by the analyst.

#### Sector Outperform (SO)

The stock is expected to outperform the average 12-month total return of the analyst's coverage universe or an index identified by the analyst that includes, but is not limited to, stocks covered by the analyst.

#### Sector Perform (SP)

The stock is expected to perform approximately in line with the average 12-month total return of the analyst's coverage universe or an index identified by the analyst that includes, but is not limited to, stocks covered by the analyst.

#### Sector Underperform (SU)

The stock is expected to underperform the average 12-month total return of the analyst's coverage universe or an index identified by the analyst that includes, but is not limited to, stocks covered by the analyst.

### Other Ratings

*Tender* – Investors are guided to tender to the terms of the takeover offer.

*Under Review* – The rating has been temporarily placed under review, until sufficient information has been received and assessed by the analyst.

### Risk Rankings

#### Low

Low financial and operational risk, high predictability of financial results, low stock volatility.

#### Medium

Moderate financial and operational risk, moderate predictability of financial results, moderate stock volatility.

#### High

High financial and/or operational risk, low predictability of financial results, high stock volatility.

#### Speculative

Exceptionally high financial and/or operational risk, exceptionally low predictability of financial results, exceptionally high stock volatility. For risk-tolerant investors only.

## Scotiabank, Global Banking and Markets Equity Research Ratings Distribution\*

### Distribution by Ratings and Equity and Equity-Related Financings\*

\* As at July 31, 2014.

Source: Scotiabank GBM.

For the purposes of the ratings distribution disclosure FINRA requires members who use a ratings system with terms different than "buy," "hold/neutral" and "sell," to equate their own ratings into these categories. Our Focus Stock, Sector Outperform, Sector Perform, and Sector Underperform ratings are based on the criteria above, but for this purpose could be equated to strong buy, buy, neutral and sell ratings, respectively.

## General Disclosures

This report has been prepared by analysts who are employed by the Research Department of Scotiabank, Global Banking and Markets. Scotiabank, together with "Global Banking and Markets," is a marketing name for the global corporate and investment banking and capital markets businesses of The Bank of Nova Scotia and certain of its affiliates in the countries where they operate, including Scotia Capital Inc.

All other trademarks are acknowledged as belonging to their respective owners and the display of such trademarks is for informational use only.

Scotiabank, Global Banking and Markets Research produces research reports under a single marketing identity referred to as "Globally-branded research" under U.S. rules. This research is produced on a single global research platform with one set of rules which meet the most stringent standards set by regulators in the various jurisdictions in which the research reports are produced. In addition, the analysts who produce the research reports, regardless of location, are subject to one set of policies designed to meet the most stringent rules established by regulators in the various jurisdictions where the research reports are produced.

Scotia Capital Inc. or an affiliate thereof owns or controls an equity interest in TMX Group Limited and in excess of 1% of the issued and outstanding equity securities thereof. In addition, an affiliate of Scotia Capital Inc. is a lender to TMX Group Limited under its credit facilities. As such, Scotia Capital Inc. may be considered to have an economic interest in TMX Group Limited.

This report is provided to you for informational purposes only. This report is not, and is not to be construed as, an offer to sell or solicitation of an offer to buy any securities and/or commodity futures contracts.

The securities mentioned in this report may neither be suitable for all investors nor eligible for sale in some jurisdictions where the report is distributed.

Div. (NTM) \$1.33

Div. (Curr.) \$1.28

Yield (Curr.) 3.7%

#### Event

- FTS held its first Investor Day in Toronto.

#### Implications

- The focus was on the premium utility organic growth embedded within the existing asset footprint. The company highlighted at least \$4.2B of rate base expansion by 2018 and up to \$5.2B assuming certain LNG investments pan out. This expansion implies a CAGR of 7%-8.5%.
- Attractive and bite-sized LNG infrastructure opportunities are materializing. There is ~\$1B of visible investment in the 2015-16 timeframe alone (subject to final permitting/regulatory approval).
- Large utility M&A appears to be on the back-burner at least through 2015. Management indicated the focus is on maximizing the value of existing assets and the organic growth program.
- The proposed disposition of Properties should unlock tangible value and also signals a willingness to more proactively manage capital and the asset portfolio. We value the potential sale and re-deployment of funds into regulated utility at about \$1/share (target up to \$39).

#### Recommendation

- FTS shares have performed well lately but likely still have another leg up. Catalysts included a positive shift in earnings momentum and accelerated dividend growth. We maintain our Sector Outperform rating.

Qtly Adj. EPS (Basic)	Q1	Q2	Q3	Q4	Year	P/E

## 41 Years of Dividend Growth and Counting

- Any company with a 41-year track record of raising its dividend likely has a winning management team and corporate culture. In recent years, these winning ways at FTS seemed to temporarily fade. But with two major acquisitions out of the way, a visible slate of organic growth projects, and a refresh of the senior management team, we believe the company is returning to its normal prosperity.
- The primary driver for this view is a superior visible organic growth program. In an era where regulated utilities are transacting in a range of 1.5x-2.0x book value, the opportunity to invest billions of dollars at book value is unique. Excluding LNG infrastructure, management highlighted \$9.3B in utility investments over the next five years. The implied rate base CAGR of ~7% should translate into annual EPS growth of ~5% (the 7% net income increase minus cost of new equity).
- In addition to asset expansion, there is a potential opportunity to improve returns and further accelerate the growth rate. The Western Canadian utilities have all just recently entered into incentive regulatory frameworks. Given the company's track record of efficient operations and demonstrated capability of achieving productivity gains, we believe achieved ROEs can exceed allowed ROEs by 100-200 basis points. We anticipate that most of these improvements will be realized in the 2016-2017 timeframe.
- The company's strategic advantage in LNG is panning out in specific investment opportunities. We have written extensively on the ways in which FTS can lever its existing assets in and around the Vancouver area. There is at least \$1B of near-term potential investment with another \$1-\$2B behind that beyond our forecast period (for more detail, see our report dated July 15: "Small Is Beautiful When It Comes to Canadian LNG").
- Large-scale utility M&A is likely on the back-burner at least through 2015. Management stated that the primary objective at this time is surfacing value in the current portfolio. This direction involves a focus on managing regulatory issues and the organic capital expansion program. We believe the company would only make an acquisition if an attractive asset surfaced at a valuation close to book value – a highly unlikely scenario in today's utility M&A market.
- The proposed disposition of Properties should unlock tangible value and also signals a willingness to more proactively manage capital and the asset portfolio. Based on a preliminary review of the Properties portfolio, our real estate group believe it could sell in the range of 12x-13x EBITDA which would value it at ~\$1B. As the stock trades at ~9x forward 2016 EV/EBITDA, a 3-multiple turn on the cash flow would unlock about \$1/share in value (target price up \$1 on assumed sale).
- Re-directing the capital to regulated utility organic growth is another way to look at value creation from the sale of Properties. Assuming the assets sell for ~\$1B and that 40% of the proceeds are used for regulated utility equity investments at a ~10% ROE, the net income pick-up would be about \$20M (\$40M in utility earnings minus the foregone \$20M in Properties earnings). The full accretion as shown in the exhibit below would not occur until 2016/17 after the sale closes and capital is fully re-deployed. However, at a target 18x P/E multiple, the extra \$20M in earnings could be worth about \$1.25/share.

**Exhibit 1 - Summary Analysis of Value-Add From Properties Sale**

Source: Company reports; Scotiabank GBM estimates.

- The combination of renewed growth and improved investor perceptions should move the share valuation back to its normal historical relationship relative to bonds. We pointed out earlier this year that the dividend yield on FTS has for the past 20 years been below the BBB 10-Year bond yield. As the payout ratio of earnings has not changed much (still 60%-70% of forecast earnings), that relationship should resume. Yet, with a 3.8% BBB 10-Year Bond yield unless the stock moves up, the dividend yield would once again rise above the relevant corporate bond yield benchmark with the dividend increase we are anticipating during this quarter (assuming a 5% increase in December).
- FTS shares have performed well in the face of a large equity issuance and, lately, challenging equity market conditions. Nevertheless, we believe there is another leg up. As earnings momentum improves into next year, the stock should move toward our target price. We maintain our Sector Outperform rating and would still accumulate.

Fortis Inc.	FTS	G, I, S, U

I, Matthew Akman, certify that (1) the views expressed in this report in connection with securities or issuers that I analyze accurately reflect my personal views and (2) no part of my compensation was, is, or will be directly or indirectly, related to the specific recommendations or views expressed by me in this report.

This research report was prepared by employees of Scotia Capital Inc. and/or its affiliates who have the title of Analyst.

All pricing of securities in reports is based on the closing price of the securities' principal marketplace on the night before the publication date, unless otherwise explicitly stated.

All Equity Research Analysts report to the Head of Equity Research. The Head of Equity Research reports to the Managing Director, Head of Institutional Equity Sales, Trading and Research, who is not and does not report to the Head of the Investment Banking Department. Scotiabank, Global Banking and Markets has policies that are reasonably designed to prevent or control the sharing of material non-public information across internal information barriers, such as between Investment Banking and Research.

The compensation of the research analyst who prepared this report is based on several factors, including but not limited to, the overall profitability of Scotiabank, Global Banking and Markets and the revenues generated from its various departments, including investment banking. Furthermore, the research analyst's compensation is charged as an expense to various Scotiabank, Global Banking and Markets departments, including investment banking. Research Analysts may not receive compensation from the companies they cover.

Non-U.S. analysts may not be associated persons of Scotia Capital (USA) Inc. and therefore may not be subject to FINRA Rule 2711 restrictions on communications with subject company, public appearances and trading securities held by the analysts.

## Definition of Scotiabank, Global Banking and Markets Equity Research Ratings & Risk Rankings

We have a four-tiered rating system, with ratings of Focus Stock, Sector Outperform, Sector Perform, and Sector Underperform. Each analyst assigns a rating that is relative to his or her coverage universe or an index identified by the analyst that includes, but is not limited to, stocks covered by the analyst.

Our risk ranking system provides transparency as to the underlying financial and operational risk of each stock covered. Statistical and judgmental factors considered are: historical financial results, share price volatility, liquidity of the shares, credit ratings, analyst forecasts, consistency and predictability of earnings, EPS growth, dividends, cash flow from operations, and strength of balance sheet. The Director of Research and the Supervisory Analyst jointly make the final determination of all risk rankings.

The rating assigned to each security covered in this report is based on the Scotiabank, Global Banking and Markets research analyst's 12-month view on the security. Analysts may sometimes express to traders, salespeople and certain clients their shorter-term views on these securities that differ from their 12-month view due to several factors, including but not limited to the inherent volatility of the marketplace.

### Ratings

#### Focus Stock (FS)

The stock represents an analyst's best idea(s); stocks in this category are expected to significantly outperform the average 12-month total return of the analyst's coverage universe or an index identified by the analyst that includes, but is not limited to, stocks covered by the analyst.

#### Sector Outperform (SO)

The stock is expected to outperform the average 12-month total return of the analyst's coverage universe or an index identified by the analyst that includes, but is not limited to, stocks covered by the analyst.

#### Sector Perform (SP)

The stock is expected to perform approximately in line with the average 12-month total return of the analyst's coverage universe or an index identified by the analyst that includes, but is not limited to, stocks covered by the analyst.

#### Sector Underperform (SU)

The stock is expected to underperform the average 12-month total return of the analyst's coverage universe or an index identified by the analyst that includes, but is not limited to, stocks covered by the analyst.

### Other Ratings

*Tender* – Investors are guided to tender to the terms of the takeover offer.

*Under Review* – The rating has been temporarily placed under review, until sufficient information has been received and assessed by the analyst.

### Risk Rankings

#### Low

Low financial and operational risk, high predictability of financial results, low stock volatility.

#### Medium

Moderate financial and operational risk, moderate predictability of financial results, moderate stock volatility.

#### High

High financial and/or operational risk, low predictability of financial results, high stock volatility.

#### Speculative

Exceptionally high financial and/or operational risk, exceptionally low predictability of financial results, exceptionally high stock volatility. For risk-tolerant investors only.

## Scotiabank, Global Banking and Markets Equity Research Ratings Distribution\*

### Distribution by Ratings and Equity and Equity-Related Financings\*

\* As at September 30, 2014.

Source: Scotiabank GBM.

For the purposes of the ratings distribution disclosure FINRA requires members who use a ratings system with terms different than "buy," "hold/neutral" and "sell," to equate their own ratings into these categories. Our Focus Stock, Sector Outperform, Sector Perform, and Sector Underperform ratings are based on the criteria above, but for this purpose could be equated to strong buy, buy, neutral and sell ratings, respectively.

**General Disclosures**

This report has been prepared by analysts who are employed by the Research Department of Scotiabank, Global Banking and Markets. Scotiabank, together with "Global Banking and Markets," is a marketing name for the global corporate and investment banking and capital markets businesses of The Bank of Nova Scotia and certain of its affiliates in the countries where they operate, including Scotia Capital Inc.

All other trademarks are acknowledged as belonging to their respective owners and the display of such trademarks is for informational use only.

Scotiabank, Global Banking and Markets Research produces research reports under a single marketing identity referred to as "Globally-branded research" under U.S. rules. This research is produced on a single global research platform with one set of rules which meet the most stringent standards set by regulators in the various jurisdictions in which the research reports are produced. In addition, the analysts who produce the research reports, regardless of location, are subject to one set of policies designed to meet the most stringent rules established by regulators in the various jurisdictions where the research reports are produced.

Scotia Capital Inc. or an affiliate thereof owns or controls an equity interest in TMX Group Limited and in excess of 1% of the issued and outstanding equity securities thereof. In addition, an affiliate of Scotia Capital Inc. is a lender to TMX Group Limited under its credit facilities. As such, Scotia Capital Inc. may be considered to have an economic interest in TMX Group Limited.

This report is provided to you for informational purposes only. This report is not, and is not to be construed as, an offer to sell or solicitation of an offer to buy any securities and/or commodity futures contracts.

The securities mentioned in this report may neither be suitable for all investors nor eligible for sale in some jurisdictions where the report is distributed.

The information and opinions contained herein have been compiled or arrived at from sources believed reliable, however, Scotiabank, Global Banking and Markets makes no representation or warranty, express or implied, as to their accuracy or completeness.

Scotiabank, Global Banking and Markets has policies designed to make best efforts to ensure that the information contained in this report is current as of the date of this report, unless otherwise specified.

Any prices that are stated in this report are for informational purposes only. Scotiabank, Global Banking and Markets makes no representation that any transaction may be or could have been effected at those prices.

Any opinions expressed herein are those of the author(s) and are subject to change without notice and may differ or be contrary from the opinions expressed by other departments of Scotiabank, Global Banking and Markets or any of its affiliates.

Neither Scotiabank, Global Banking and Markets nor its affiliates accepts any liability whatsoever for any direct or consequential loss arising from any use of this report or its contents.

Equity research reports published by Scotiabank, Global Banking and Markets are available electronically via: Bloomberg, Thomson Financial/First Call - Research Direct, Reuters, Capital IQ, and FactSet. Institutional clients with questions regarding distribution of equity research should contact us at 1-800-208-7666.

This report and all the information, opinions, and conclusions contained in it are protected by copyright. This report may not be reproduced in whole or in part, or referred to in any manner whatsoever, nor may the information, opinions, and conclusions contained in it be referred to without the prior express consent of Scotiabank, Global Banking and Markets.

**Additional Disclosures**

Canada: This report is distributed by Scotia Capital Inc., a subsidiary of The Bank of Nova Scotia. Scotia Capital Inc. is a member of the Canadian Investor Protection Fund and the Investment Industry Regulatory Organization of Canada.

Chile: This report is distributed by Scotia Corredora de Bolsa Chile S.A., a subsidiary of The Bank of Nova Scotia.

Hong Kong: This report is distributed by The Bank of Nova Scotia Hong Kong Branch, which is authorized by the Securities and Future Commission to conduct Type 1, Type 4 and Type 6 regulated activities and regulated by the Hong Kong Monetary Authority.

Mexico: This report is distributed by Scotia Inverlat Casa de Bolsa S.A. de C.V., a subsidiary of the Bank of Nova Scotia.

Peru: This report is distributed by Scotia Sociedad Agente de Bolsa S.A., a subsidiary of The Bank of Nova Scotia.

Singapore: This report is distributed by The Bank of Nova Scotia Asia Limited, a subsidiary of The Bank of Nova Scotia. The Bank of Nova Scotia Asia Limited is authorised and regulated by the Monetary Authority of Singapore, and exempted under Section 99(1)(a), and (b), (c) and (d) of the Securities and Futures Act to conduct regulated activities.

United Kingdom and the rest of Europe: Except as otherwise specified herein, this report is distributed by Scotiabank Europe plc, a subsidiary of The Bank of Nova Scotia. Scotiabank Europe plc is authorized by the Prudential Regulation Authority (PRA) and regulated by the PRA and the Financial Conduct Authority (FCA). Scotiabank Europe plc complies with all FCA requirements concerning research and the associated disclosures and these are indicated on the research where applicable.

United States: This report is distributed by Scotia Capital (USA) Inc., a subsidiary of Scotia Capital Inc., and a registered U.S. broker-dealer. All transactions by a U.S. investor of securities mentioned in this report must be effected through Scotia Capital (USA) Inc.

Non-U.S. investors wishing to effect a transaction in the securities discussed in this report should contact a Scotiabank, Global Banking and Markets entity in their local jurisdiction unless governing law permits otherwise.

Yield (Curr.) 3.4%

Key Risks to Target: Interest rates; Rate base growth; Regulated ROE; Acquisitions; Regulatory

### Event

- FTS reported normalized (excluding one-time acquisition costs) Q3/14 EPS of \$0.33 vs. our estimate of \$0.34 and \$0.23 in Q3/13.

### Implications

- Regulatory decisions should provide positive earnings catalysts in the coming few quarters. FTS has been attempting to secure rate recovery of capital spent in Alberta ("capital tracker") that could add \$20M+ in annual revenue (decision expected Q1/15).
- We have reasoned that, since CH Energy is under-earning, it can generate increased profit without requesting an unreasonable ROE. In fact, CH just filed in July for new rates that could result in a \$40M+ revenue increase while maintaining a conservative 9% ROE (down from 10% currently). A decision is expected in 1H/15.
- A process has commenced for the disposition of Properties. This process should unlock value and also signals a willingness to more proactively manage capital. We value the potential sale and re-deployment of funds at about \$1/share (see comment dated October 2).
- Concerns over erosion of the UNS customer base due to distributed solar might be overblown. There was no evidence of erosion this past summer as sales were in fact up YOY in the quarter by 2.3%.

### Recommendation

- Management guidance for 7% growth with the potential for 8.5% if LNG projects pan out is consistent with our outlook. Given the combination of growth and safety, we maintain our SO rating, and increase TP to \$40.

#### Sector Underperform (SU)

The stock is expected to underperform the average 12-month total return of the analyst's coverage universe or an index identified by the analyst that includes, but is not limited to, stocks covered by the analyst.

### Other Ratings

*Tender* – Investors are guided to tender to the terms of the takeover offer.

*Under Review* – The rating has been temporarily placed under review, until sufficient information has been received and assessed by the analyst.

### Risk Rankings

#### Low

Low financial and operational risk, high predictability of financial results, low stock volatility.

#### Medium

Moderate financial and operational risk, moderate predictability of financial results, moderate stock volatility.

#### High

High financial and/or operational risk, low predictability of financial results, high stock volatility.

#### Speculative

Exceptionally high financial and/or operational risk, exceptionally low predictability of financial results, exceptionally high stock volatility. For risk-tolerant investors only.

## Scotiabank, Global Banking and Markets Equity Research Ratings Distribution\*

### Distribution by Ratings and Equity and Equity-Related Financings\*

\* As at October 31, 2014.

Source: Scotiabank GBM.

For the purposes of the ratings distribution disclosure FINRA requires members who use a ratings system with terms different than "buy," "hold/neutral" and "sell," to equate their own ratings into these categories. Our Focus Stock, Sector Outperform, Sector Perform, and Sector Underperform ratings are based on the criteria above, but for this purpose could be equated to strong buy, buy, neutral and sell ratings, respectively.

## General Disclosures

This report has been prepared by analysts who are employed by the Research Department of Scotiabank, Global Banking and Markets. Scotiabank, together with "Global Banking and Markets," is a marketing name for the global corporate and investment banking and capital markets businesses of The Bank of Nova Scotia and certain of its affiliates in the countries where they operate, including Scotia Capital Inc.

All other trademarks are acknowledged as belonging to their respective owners and the display of such trademarks is for informational use only.

Scotiabank, Global Banking and Markets Research produces research reports under a single marketing identity referred to as "Globally-branded research" under U.S. rules. This research is produced on a single global research platform with one set of rules which meet the most stringent standards set by regulators in the various jurisdictions in which the research reports are produced. In addition, the analysts who produce the research reports, regardless of location, are subject to one set of policies designed to meet the most stringent rules established by regulators in the various jurisdictions where the research reports are produced.

Scotia Capital Inc. or an affiliate thereof owns or controls an equity interest in TMX Group Limited and in excess of 1% of the issued and outstanding equity securities thereof. In addition, an affiliate of Scotia Capital Inc. is a lender to TMX Group Limited under its credit facilities. As such, Scotia Capital Inc. may be considered to have an economic interest in TMX Group Limited.

This report is provided to you for informational purposes only. This report is not, and is not to be construed as, an offer to sell or solicitation of an offer to buy any securities and/or commodity futures contracts.

The securities mentioned in this report may neither be suitable for all investors nor eligible for sale in some jurisdictions where the report is distributed.

The information and opinions contained herein have been compiled or arrived at from sources believed reliable, however, Scotiabank, Global Banking and Markets makes no representation or warranty, express or implied, as to their accuracy or completeness.

Scotiabank, Global Banking and Markets has policies designed to make best efforts to ensure that the information contained in this report is current as of the date of this report, unless otherwise specified.

Any prices that are stated in this report are for informational purposes only. Scotiabank, Global Banking and Markets makes no representation that any transaction may be or could have been effected at those prices.

Any opinions expressed herein are those of the author(s) and are subject to change without notice and may differ or be contrary from the opinions expressed by other departments of Scotiabank, Global Banking and Markets or any of its affiliates.

Neither Scotiabank, Global Banking and Markets nor its affiliates accepts any liability whatsoever for any direct or consequential loss arising from any use of this report or its contents.

Equity research reports published by Scotiabank, Global Banking and Markets are available electronically via: Bloomberg, Thomson Financial/First Call - Research Direct, Reuters, Capital IQ, and FactSet. Institutional clients with questions regarding distribution of equity research should contact us at 1-800-208-7666.

This report and all the information, opinions, and conclusions contained in it are protected by copyright. This report may not be reproduced in whole or in part, or referred to in any manner whatsoever, nor may the information, opinions, and conclusions contained in it be referred to without the prior express consent of Scotiabank, Global Banking and Markets.

## Additional Disclosures

Canada: This report is distributed by Scotia Capital Inc., a subsidiary of The Bank of Nova Scotia. Scotia Capital Inc. is a member of the Canadian Investor Protection Fund and the Investment Industry Regulatory Organization of Canada.

Chile: This report is distributed by Scotia Corredora de Bolsa Chile S.A., a subsidiary of The Bank of Nova Scotia.

Hong Kong: This report is distributed by The Bank of Nova Scotia Hong Kong Branch, which is authorized by the Securities and Future Commission to conduct Type 1, Type 4 and Type 6 regulated activities and regulated by the Hong Kong Monetary Authority.

Mexico: This report is distributed by Scotia Inverlat Casa de Bolsa S.A. de C.V., a subsidiary of the Bank of Nova Scotia.

Peru: This report is distributed by Scotia Sociedad Agente de Bolsa S.A., a subsidiary of The Bank of Nova Scotia.

Singapore: This report is distributed by The Bank of Nova Scotia Asia Limited, a subsidiary of The Bank of Nova Scotia. The Bank of Nova Scotia Asia Limited is authorised and regulated by the Monetary Authority of Singapore, and exempted under Section 99(1)(a), (b), (c) and (d) of the Securities and Futures Act to conduct regulated activities.

United Kingdom and the rest of Europe: Except as otherwise specified herein, this report is distributed by Scotiabank Europe plc, a subsidiary of The Bank of Nova Scotia. Scotiabank Europe plc is authorized by the Prudential Regulation Authority (PRA) and regulated by the PRA and the Financial Conduct Authority (FCA). Scotiabank Europe plc complies with all FCA requirements concerning research and the associated disclosures and these are indicated on the research where applicable.

United States: This report is distributed by Scotia Capital (USA) Inc., a subsidiary of Scotia Capital Inc., and a registered U.S. broker-dealer. All transactions by a U.S. investor of securities mentioned in this report must be effected through Scotia Capital (USA) Inc.

Non-U.S. investors wishing to effect a transaction in the securities discussed in this report should contact a Scotiabank, Global Banking and Markets entity in their local jurisdiction unless governing law permits otherwise.

**Div. (Curr.)** \$1.36  
**Yield (Curr.)** 3.5%

### Event

- FTS reported normalized Q4/14 EPS of \$0.46 vs. our estimate of \$0.49 and \$0.48 in Q4/13.

### Implications

- Now that the UNS deal has closed, adding value at FTS for the next few years is mostly about securing certain LNG-related and other growth projects and managing regulatory threats and opportunities.
- The LNG projects are progressing a lot better than large-scale efforts in B.C. A \$400M expansion of existing facilities is already underway and will earn a regulated return. The next phase which is \$450M is highly promising and is contracted mostly with Hawaii Electric. Pipeline expansions to Squamish (\$600M) and Vancouver Is. are live options.
- Regulatory proceedings are numerous and several are material to earnings targets. Good news in that CH Energy recently filed a robust settlement for rates. While the agreed-upon 9% ROE is not best-in-class, it far exceeds last year's achieved (~6%) and is accompanied by a 48% equity ratio, thereby supporting the FTS balance sheet.
- We see little change in AB's ROE (8.75%). Though bond yields have dropped, evidence filed should support the current 8.75% allowed. And we think there is upside to that from incentive regulation.

### Recommendation

- We are maintaining our EPS estimates with a slight upward bias (US\$ strength). Also, as we have for other high quality infrastructure stocks, we are bumping our target price for lower bond yields (to \$43 from \$40).

Fortis Inc.	FTS	G, I, S, U

I, Matthew Akman, certify that (1) the views expressed in this report in connection with securities or issuers that I analyze accurately reflect my personal views and (2) no part of my compensation was, is, or will be directly or indirectly, related to the specific recommendations or views expressed by me in this report.

This research report was prepared by employees of Scotia Capital Inc. and/or its affiliates who have the title of Analyst.

All pricing of securities in reports is based on the closing price of the securities' principal marketplace on the night before the publication date, unless otherwise explicitly stated.

All Equity Research Analysts report to the Head of Equity Research. The Head of Equity Research reports to the Managing Director, Head of Institutional Equity Sales, Trading and Research, who is not and does not report to the Head of the Investment Banking Department. Scotiabank, Global Banking and Markets has policies that are reasonably designed to prevent or control the sharing of material non-public information across internal information barriers, such as between Investment Banking and Research.

The compensation of the research analyst who prepared this report is based on several factors, including but not limited to, the overall profitability of Scotiabank, Global Banking and Markets and the revenues generated from its various departments, including investment banking. Furthermore, the research analyst's compensation is charged as an expense to various Scotiabank, Global Banking and Markets departments, including investment banking. Research Analysts may not receive compensation from the companies they cover.

Non-U.S. analysts may not be associated persons of Scotia Capital (USA) Inc. and therefore may not be subject to FINRA Rule 2711 restrictions on communications with subject company, public appearances and trading securities held by the analysts.

## Definition of Scotiabank, Global Banking and Markets Equity Research Ratings & Risk Rankings

We have a four-tiered rating system, with ratings of Focus Stock, Sector Outperform, Sector Perform, and Sector Underperform. Each analyst assigns a rating that is relative to his or her coverage universe or an index identified by the analyst that includes, but is not limited to, stocks covered by the analyst.

Our risk ranking system provides transparency as to the underlying financial and operational risk of each stock covered. Statistical and judgmental factors considered are: historical financial results, share price volatility, liquidity of the shares, credit ratings, analyst forecasts, consistency and predictability of earnings, EPS growth, dividends, cash flow from operations, and strength of balance sheet. The Director of Research and the Supervisory Analyst jointly make the final determination of all risk rankings.

The rating assigned to each security covered in this report is based on the Scotiabank, Global Banking and Markets research analyst's 12-month view on the security. Analysts may sometimes express to traders, salespeople and certain clients their shorter-term views on these securities that differ from their 12-month view due to several factors, including but not limited to the inherent volatility of the marketplace.

### Ratings

#### Focus Stock (FS)

The stock represents an analyst's best idea(s); stocks in this category are expected to significantly outperform the average 12-month total return of the analyst's coverage universe or an index identified by the analyst that includes, but is not limited to, stocks covered by the analyst.

#### Sector Outperform (SO)

The stock is expected to outperform the average 12-month total return of the analyst's coverage universe or an index identified by the analyst that includes, but is not limited to, stocks covered by the analyst.

#### Sector Perform (SP)

The stock is expected to perform approximately in line with the average 12-month total return of the analyst's coverage universe or an index identified by the analyst that includes, but is not limited to, stocks covered by the analyst.

#### Sector Underperform (SU)

The stock is expected to underperform the average 12-month total return of the analyst's coverage universe or an index identified by the analyst that includes, but is not limited to, stocks covered by the analyst.

### Other Ratings

*Tender* – Investors are guided to tender to the terms of the takeover offer.

*Under Review* – The rating has been temporarily placed under review, until sufficient information has been received and assessed by the analyst.

### Risk Rankings

#### Low

Low financial and operational risk, high predictability of financial results, low stock volatility.

#### Medium

Moderate financial and operational risk, moderate predictability of financial results, moderate stock volatility.

#### High

High financial and/or operational risk, low predictability of financial results, high stock volatility.

#### Speculative

Exceptionally high financial and/or operational risk, exceptionally low predictability of financial results, exceptionally high stock volatility. For risk-tolerant investors only.

## Scotiabank, Global Banking and Markets Equity Research Ratings Distribution\*

### Distribution by Ratings and Equity and Equity-Related Financings\*

\* As at January 31, 2015.

Source: Scotiabank GBM.

For the purposes of the ratings distribution disclosure FINRA requires members who use a ratings system with terms different than "buy," "hold/neutral" and "sell," to equate their own ratings into these categories. Our Focus Stock, Sector Outperform, Sector Perform, and Sector Underperform ratings are based on the criteria above, but for this purpose could be equated to strong buy, buy, neutral and sell ratings, respectively.

Div. (NTM) \$1.38

Div. (Curr.) \$1.36

Yield (Curr.) 3.5%

#### Event

- FTS reported normalized Q1/15 EPS of \$0.65 vs. our estimate of \$0.64 and \$0.66 in Q1/14.

#### Implications

- The Q1 result supports our thesis that the lower allowed Alberta ROE will be more than offset by savings under incentive regulation. Normalized earnings were \$31M vs. \$25M, which is tracking ahead of rate-base growth (~5%), despite the 45 basis point ROE reduction.
- Non-core asset sales continue as the Properties sale process is scheduled for completion this summer (we see ~\$1B value). In addition, FTS announced that it has entered into an agreement for the sale of small hydro assets (we estimate proceeds at \$50M+). We could also envisage an eventual sale of the Belize hydro assets (possible value \$200M+).
- We believe all of this capital can be re-allocated to the core regulated utility business on an accretive basis. Non-regulated assets trade on EBITDA multiples that imply P/Es in excess of the current FTS multiple (~18x). And there is ample use of proceeds with almost \$6B of capital spending through 2017.

#### Recommendation

- In the near term, US\$ exposure (every 5% move is \$0.04 in EPS) as well as incentive regulatory earnings in Alberta are tailwinds (estimates up \$0.06/year in 2015/16). In the medium term, accretive, low-risk utility expansion is the driver. We maintain our \$43 target price and Sector Outperform rating.

## Appendix A: Important Disclosures

Company	Ticker	Disclosures (see legend below)*
Fortis Inc.	FTS	G, I, S, U

I, Matthew Akman, certify that (1) the views expressed in this report in connection with securities or issuers that I analyze accurately reflect my personal views and (2) no part of my compensation was, is, or will be directly or indirectly, related to the specific recommendations or views expressed by me in this report.

This research report was prepared by employees of Scotia Capital Inc. and/or its affiliates who have the title of Analyst.

All pricing of securities in reports is based on the closing price of the securities' principal marketplace on the night before the publication date, unless otherwise explicitly stated.

All Equity Research Analysts report to the Head of Equity Research. The Head of Equity Research reports to the Managing Director, Head of Institutional Equity Sales, Trading and Research, who is not and does not report to the Head of the Investment Banking Department. Scotiabank, Global Banking and Markets has policies that are reasonably designed to prevent or control the sharing of material non-public information across internal information barriers, such as between Investment Banking and Research.

The compensation of the research analyst who prepared this report is based on several factors, including but not limited to, the overall profitability of Scotiabank, Global Banking and Markets and the revenues generated from its various departments, including investment banking. Furthermore, the research analyst's compensation is charged as an expense to various Scotiabank, Global Banking and Markets departments, including investment banking. Research Analysts may not receive compensation from the companies they cover.

Non-U.S. analysts may not be associated persons of Scotia Capital (USA) Inc. and therefore may not be subject to FINRA Rule 2711 restrictions on communications with subject company, public appearances and trading securities held by the analysts.

For Scotiabank, Global Banking and Markets Research analyst standards and disclosure policies, please visit [gbm.scotiabank.com/disclosures](http://gbm.scotiabank.com/disclosures).

Scotiabank, Global Banking and Markets Research, 40 King Street West, 33rd Floor, Toronto, Ontario, M5H 1H1.

## Definition of Scotiabank, Global Banking and Markets Equity Research Ratings & Risk Rankings

We have a four-tiered rating system, with ratings of Focus Stock, Sector Outperform, Sector Perform, and Sector Underperform. Each analyst assigns a rating that is relative to his or her coverage universe or an index identified by the analyst that includes, but is not limited to, stocks covered by the analyst.

Our risk ranking system provides transparency as to the underlying financial and operational risk of each stock covered. Statistical and judgmental factors considered are: historical financial results, share price volatility, liquidity of the shares, credit ratings, analyst forecasts, consistency and predictability of earnings, EPS growth, dividends, cash flow from operations, and strength of balance sheet. The Director of Research and the Supervisory Analyst jointly make the final determination of all risk rankings.

The rating assigned to each security covered in this report is based on the Scotiabank, Global Banking and Markets research analyst's 12-month view on the security. Analysts may sometimes express to traders, salespeople and certain clients their shorter-term views on these securities that differ from their 12-month view due to several factors, including but not limited to the inherent volatility of the marketplace.

### Ratings

#### Focus Stock (FS)

The stock represents an analyst's best idea(s); stocks in this category are expected to significantly outperform the average 12-month total return of the analyst's coverage universe or an index identified by the analyst that includes, but is not limited to, stocks covered by the analyst.

#### Sector Outperform (SO)

The stock is expected to outperform the average 12-month total return of the analyst's coverage universe or an index identified by the analyst that includes, but is not limited to, stocks covered by the analyst.

#### Sector Perform (SP)

The stock is expected to perform approximately in line with the average 12-month total return of the analyst's coverage universe or an index identified by the analyst that includes, but is not limited to, stocks covered by the analyst.

#### Sector Underperform (SU)

The stock is expected to underperform the average 12-month total return of the analyst's coverage universe or an index identified by the analyst that includes, but is not limited to, stocks covered by the analyst.

### Other Ratings

*Tender* – Investors are guided to tender to the terms of the takeover offer.

*Under Review* – The rating has been temporarily placed under review, until sufficient information has been received and assessed by the analyst.

### Risk Rankings

#### Low

Low financial and operational risk, high predictability of financial results, low stock volatility.

#### Medium

Moderate financial and operational risk, moderate predictability of financial results, moderate stock volatility.

#### High

High financial and/or operational risk, low predictability of financial results, high stock volatility.

#### Speculative

Exceptionally high financial and/or operational risk, exceptionally low predictability of financial results, exceptionally high stock volatility. For risk-tolerant investors only.

## Scotiabank, Global Banking and Markets Equity Research Ratings Distribution\*

### Distribution by Ratings and Equity and Equity-Related Financings\*

\* As at April 30, 2015.

Source: Scotiabank GBM.

For the purposes of the ratings distribution disclosure FINRA requires members who use a ratings system with terms different than "buy," "hold/neutral" and "sell," to equate their own ratings into these categories. Our Focus Stock, Sector Outperform, Sector Perform, and Sector Underperform ratings are based on the criteria above, but for this purpose could be equated to strong buy, buy, neutral and sell ratings, respectively.

## General Disclosures

This report has been prepared by analysts who are employed by the Research Department of Scotiabank, Global Banking and Markets. Scotiabank, together with "Global Banking and Markets," is a marketing name for the global corporate and investment banking and capital markets businesses of The Bank of Nova Scotia and certain of its affiliates in the countries where they operate, including Scotia Capital Inc.

All other trademarks are acknowledged as belonging to their respective owners and the display of such trademarks is for informational use only.

Scotiabank, Global Banking and Markets Research produces research reports under a single marketing identity referred to as "Globally-branded research" under U.S. rules. This research is produced on a single global research platform with one set of rules which meet the most stringent standards set by regulators in the various jurisdictions in which the research reports are produced. In addition, the analysts who produce the research reports, regardless of location, are subject to one set of policies designed to meet the most stringent rules established by regulators in the various jurisdictions where the research reports are produced.

Scotia Capital Inc. or an affiliate thereof owns or controls an equity interest in TMX Group Limited and in excess of 1% of the issued and outstanding equity securities thereof. In addition, an affiliate of Scotia Capital Inc. is a lender to TMX Group Limited under its credit facilities. As such, Scotia Capital Inc. may be considered to have an economic interest in TMX Group Limited.

This report is provided to you for informational purposes only. This report is not, and is not to be construed as, an offer to sell or solicitation of an offer to buy any securities and/or commodity futures contracts.

The securities mentioned in this report may neither be suitable for all investors nor eligible for sale in some jurisdictions where the report is distributed.

The information and opinions contained herein have been compiled or arrived at from sources believed reliable, however, Scotiabank, Global Banking and Markets makes no representation or warranty, express or implied, as to their accuracy or completeness.

Scotiabank, Global Banking and Markets has policies designed to make best efforts to ensure that the information contained in this report is current as of the date of this report, unless otherwise specified.

Any prices that are stated in this report are for informational purposes only. Scotiabank, Global Banking and Markets makes no representation that any transaction may be or could have been effected at those prices.

Any opinions expressed herein are those of the author(s) and are subject to change without notice and may differ or be contrary from the opinions expressed by other departments of Scotiabank, Global Banking and Markets or any of its affiliates.

Neither Scotiabank, Global Banking and Markets nor its affiliates accepts any liability whatsoever for any direct or consequential loss arising from any use of this report or its contents.

Equity research reports published by Scotiabank, Global Banking and Markets are available electronically via: Bloomberg, Thomson Financial/First Call - Research Direct, Reuters, Capital IQ, and FactSet. Valuation: 6.5% 2016E Free Cash Yield and 10.8x 2016E EV/EBITDA

Key Risks to Target: Interest rates; Rate base growth; Regulated ROE; Acquisitions; Regulatory

### Event

- FTS reported normalized Q2/15 EPS of \$0.44 vs. our estimate of \$0.48 and \$0.22 in Q2/14.

### Implications

- Though the quarter was slightly weaker than we anticipated due to seasonality (UNS) and one-time Corporate items, the company is on track to achieve our full-year and ongoing growth forecasts.
- Success has been achieved on several regulatory fronts. Following recent approval, the NY utility CH Energy will likely earn a 9%-10% ROE, up from the low-7% recently. And despite lower allowed ROE, FTS Alberta is showing meaningful earnings improvement due to the Capital Tracker decision and incentive savings (1H \$72M vs. \$51M).
- Further success is likely, in our opinion. The Tucson Arizona utility could generate meaningful earnings improvement through recognition of an additional ~\$800M in ratebase and ~7% increase in equity thickness (rates case to be filed this year).
- To raise funds for growth, the company continues achieving success in its asset sales. The final cumulative proceeds on Properties assets will be \$795M, in line with our expectations. In addition, there was a \$93M sale of non-core hydro assets and \$57M associated gain.

### Recommendation

- FTS management is capitalizing on core strengths: managing capital projects and regulatory risk/benefit. Acquisitions are on the backburner and organic growth is robust. We maintain our SO rating and \$43 TP.

Company	Ticker	Disclosures (see legend below)*
Fortis Inc.	FTS	G, I, S, U

I, Matthew Akman, certify that (1) the views expressed in this report in connection with securities or issuers that I analyze accurately reflect my personal views and (2) no part of my compensation was, is, or will be directly or indirectly, related to the specific recommendations or views expressed by me in this report.

This research report was prepared by employees of Scotia Capital Inc. and/or its affiliates who have the title of Analyst.

All pricing of securities in reports is based on the closing price of the securities' principal marketplace on the night before the publication date, unless otherwise explicitly stated.

All Equity Research Analysts report to the Head of Equity Research. The Head of Equity Research reports to the Managing Director, Head of Institutional Equity Sales, Trading and Research, who is not and does not report to the Head of the Investment Banking Department. Scotiabank, Global Banking and Markets has policies that are reasonably designed to prevent or control the sharing of material non-public information across internal information barriers, such as between Investment Banking and Research.

The compensation of the research analyst who prepared this report is based on several factors, including but not limited to, the overall profitability of Scotiabank, Global Banking and Markets and the revenues generated from its various departments, including investment banking. Furthermore, the research analyst's compensation is charged as an expense to various Scotiabank, Global Banking and Markets departments, including investment banking. Research Analysts may not receive compensation from the companies they cover.

Non-U.S. analysts may not be associated persons of Scotia Capital (USA) Inc. and therefore may not be subject to NASD Rule 2711 restrictions on communications with subject company, public appearances and trading securities held by the analysts.

## Definition of Scotiabank, Global Banking and Markets Equity Research Ratings

We have a four-tiered rating system, with ratings of Focus Stock, Sector Outperform, Sector Perform, and Sector Underperform. Each analyst assigns a rating that is relative to his or her coverage universe or an index identified by the analyst that includes, but is not limited to, stocks covered by the analyst.

The rating assigned to each security covered in this report is based on the Scotiabank, Global Banking and Markets research analyst's 12-month view on the security. Analysts may sometimes express to traders, salespeople and certain clients their shorter-term views on these securities that differ from their 12-month view due to several factors, including but not limited to the inherent volatility of the marketplace.

### Ratings

#### Focus Stock (FS)

The stock represents an analyst's best idea(s); stocks in this category are expected to significantly outperform the average 12-month total return of the analyst's coverage universe or an index identified by the analyst that includes, but is not limited to, stocks covered by the analyst.

#### Sector Outperform (SO)

The stock is expected to outperform the average 12-month total return of the analyst's coverage universe or an index identified by the analyst that includes, but is not limited to, stocks covered by the analyst.

#### Sector Perform (SP)

The stock is expected to perform approximately in line with the average 12-month total return of the analyst's coverage universe or an index identified by the analyst that includes, but is not limited to, stocks covered by the analyst.

#### Sector Underperform (SU)

The stock is expected to underperform the average 12-month total return of the analyst's coverage universe or an index identified by the analyst that includes, but is not limited to, stocks covered by the analyst.

### Other Ratings

*Tender* – Investors are guided to tender to the terms of the takeover offer.

*Under Review* – The rating has been temporarily placed under review, until sufficient information has been received and assessed by the analyst.

### Risk Ranking

As of June 22, 2015, Scotiabank, Global Banking and Markets discontinued its Low, Medium, and High risk rankings. The Speculative risk ranking reflects exceptionally high financial and/or operational risk, exceptionally low predictability of financial results, and exceptionally high stock volatility. The Director of Research and the Supervisory Analyst jointly make the final determination of the Speculative risk ranking.

## Scotiabank, Global Banking and Markets Equity Research Ratings Distribution\*

### Distribution by Ratings and Equity and Equity-Related Financings\*

\* As at July 31, 2015.

Source: Scotiabank GBM.

For the purposes of the ratings distribution disclosure FINRA requires members who use a ratings system with terms different than "buy," "hold/neutral" and "sell," to equate their own ratings into these categories. Our Focus Stock, Sector Outperform, Sector Perform, and Sector Underperform ratings are based on the criteria above, but for this purpose could be equated to strong buy, buy, neutral and sell ratings, respectively.

## General Disclosures

This report has been prepared by analysts who are employed by the Research Department of Scotiabank, Global Banking and Markets. Scotiabank, together with "Global Banking and Markets," is a marketing name for the global corporate and investment banking and capital markets businesses of The Bank of Nova Scotia and certain of its affiliates in the countries where they operate, including Scotia Capital Inc.

All other trademarks are acknowledged as belonging to their respective owners and the display of such trademarks is for informational use only.

Scotiabank, Global Banking and Markets Research produces research reports under a single marketing identity referred to as "Globally-branded research" under U.S. rules. This research is produced on a single global research platform with one set of rules which meet the most stringent standards set by regulators in the various jurisdictions in which the research reports are produced. In addition, the analysts who produce the research reports, regardless of location, are subject to one set of policies designed to meet the most stringent rules established by regulators in the various jurisdictions where the research reports are produced.

Scotia Capital Inc. or an affiliate thereof owns or controls an equity interest in TMX Group Limited and in excess of 1% of the issued and outstanding equity securities thereof. In addition, an affiliate of Scotia Capital Inc. is a lender to TMX Group Limited under its credit facilities. As such, Scotia Capital Inc. may be considered to have an economic interest in TMX Group Limited.

This report is provided to you for informational purposes only. This report is not, and is not to be construed as, an offer to sell or solicitation of an offer to buy any securities and/or commodity futures contracts.

The securities mentioned in this report may neither be suitable for all investors nor eligible for sale in some jurisdictions where the report is distributed.

The information and opinions contained herein have been compiled or arrived at from sources believed reliable, however, Scotiabank, Global Banking and Markets makes no representation or warranty, express or implied, as to their accuracy or completeness.

Scotiabank, Global Banking and Markets has policies designed to make best efforts to ensure that the information contained in this report is current as of the date of this report, unless otherwise specified.

Any prices that are stated in this report are for informational purposes only. Scotiabank, Global Banking and Markets makes no representation that any transaction may be or could have been effected at those prices.

Any opinions expressed herein are those of the author(s) and are subject to change without notice and may differ or be contrary from the opinions expressed by other departments of Scotiabank, Global Banking and Markets or any of its affiliates.

Neither Scotiabank, Global Banking and Markets nor its affiliates accepts any liability whatsoever for any direct or consequential loss arising from any use of this report or its contents.

Equity research reports published by Scotiabank, Global Banking and Markets are available electronically via: Bloomberg, Thomson Financial/First Call - Research Direct, Reuters, Capital IQ, and FactSet. ## Fortis Inc.

**(FTS-T) C\$33.81**

### Q4 Results a Solid End to 2010

#### Event

Fortis reported Q4/10 EPS (f.d.) of \$0.47, slightly lower than our \$0.48 estimate, recent consensus of \$0.51 but above Q4/09 normalized EPS (f.d.) of \$0.45.

#### Impact

**NEUTRAL.** We have made numerous adjustments to our model, which include updating our Newfoundland Power rate base model and a private debt placement. Our estimates decrease slightly as a result of these changes. However, our target price increases by one dollar to \$36.00 as we are rolling forward our target to be based 100% on our 2012 forecasts.

#### Details

**Regulated Gas Utilities (Terasen)** Q4/10 earnings of \$45 million were \$7 million below normalized Q4/09 results (Exhibit 1). The decrease was largely due to the timing of operating expenses, with a higher weighting of costs in Q4/10, increased labour and employee-benefit expenses, and higher maintenance and operating activities that were approved by the regulator as a result of the recent Negotiated Settlement Agreement.

**Regulated Electric Utilities – Canadian** Q4/10 earnings of \$41 million increased by \$10 million year over year.

- **FortisAlberta** earnings of \$17 million increased by \$5 million versus Q4/09 normalized results primarily from ongoing electrical infrastructure investment, customer growth, and higher regulator-approved expenses recoverable from customers.
- **FortisBC** earnings of \$10 million increased by \$2 million year over year driven largely by increased customer rates reflecting a higher allowed return and increased incentive adjustments.
- **Newfoundland Power** earnings of \$9 million were \$1 million higher than Q4/09 results. Increased electricity rates and sales were the main drivers for the increase.
- **Other Canadian Electric Utilities (Maritime Electric & FortisOntario)** earnings of \$5 million were \$2 million ahead of Q4/09 normalized results largely due to higher capitalized overhead expenses in Q4/10.

#### Company Profile

Fortis Inc. (FTS-T) is a diversified infrastructure holding company, primarily comprising of gas distribution utilities in B.C. and electric utilities in Canada, Belize, Turks and Caicos and the Cayman Islands. Fortis also owns a real estate and hotels subsidiary and has interests in electric generation ventures in Canada and the U.S.

**Please see the final pages of this document for important disclosure information.**

**Regulated Utilities – Caribbean** earnings of \$5 million were \$2 million lower year over year largely from increased legal expenses at Belize Electricity as a result of the regulatory challenges, in addition to lower electricity sales.

**Fortis Generation** earnings of \$5 million were \$2 million higher than Q4/09 results largely from increased generation production in all operating regions, and higher average electricity prices in Upper New York State and Ontario.

**Fortis Properties** reported earnings of \$7 million, \$2 million above Q4/09 results primarily due to lower effective income taxes, in addition to rent increases in the real estate division.

**Corporate** expenses decreased by \$1 million to \$18 million in Q4/10 largely due to lower financing costs.

Notes: Earnings have been normalized for the following items:

1) Q4/09 excludes \$5.0 million of costs associated with the conversion of customer appliances from propane to natural gas.

2) Q4/09 excludes \$1.5 million of earnings associated to prior periods.

3) Q4/09 excludes \$3.0 million of earnings associated to prior periods.

4) Q4/09 excludes a \$3.0 million favourable tax adjustment.

Source: Company Reports, TD Newcrest.

### **Outlook**

**MOU to Develop Transmission Projects in Ontario:** On February 2, 2011, FortisOntario announced that it had entered into a memorandum of understanding (MOU) with Lake Huron Anishinabek Transmission Company Inc. (LHATC) for the potential construction and operation of regulated electricity transmission projects in Ontario. FortisOntario will hold a minimum ownership of 51% and LHATC will have the right to acquire up to a 49% equity interest in the joint venture.

Given the increasing amount of renewable power projects coming on line in Ontario, the demand for transmission infrastructure to support this increase in generation has prompted the Ontario Energy Board (OEB) to issue a Framework for Transmission Project Development Plans, which could encourage new transmission investment in Ontario through a formal competitive process for projects identified by the Ontario Power Authority. Although it is still early days, we view this development positively as we believe Fortis'

strong expertise in transmission and its incumbency in Ontario will allow the company to potentially secure transmission project mandates in the province.

**Q1/11 Preview:** We are forecasting Q1/11 EPS of \$0.59, a \$0.03 increase over Q1/10 results largely due to rate base growth at the Company's Regulated Canadian Utilities and a full-quarter contribution from the Vaca hydroelectric generating facility.

Notes:

1) Averages exclude ATCO due to its holding company nature.

2) Capital Power's 2009A is a half-year actual.

Source: Company Reports, Thomson, TD Newcrest.

### **Justification of Target Price**

Our \$36.00 target price is predicated on our 2012 financial estimates as follows: 1) 25% EV / EBITDA multiple of 11.0x, 2) 25% relative dividend yield of 90%, and 3) 50% free cash flow yield of 7.0%. Our target price also incorporates a 3.5% 10-year Government of Canada bond yield assumption.

### **Key Risks to Target Price**

1) Higher than expected long bond yields, 2) operational disruptions, 3) regulatory surprises, 4) unexpected large acquisitions, 5) sovereign risk, and 6) escalating construction costs.

### **Investment Conclusion**

We expect capital investments in the Company's regulated utilities to continue to be the primary driver of EPS growth in the medium term, which we view positively given the low-risk and regulated nature of the assets.

Fortis is the largest investor-owned gas and electric distribution utility in Canada, and therefore we view it as a core holding. We believe that in the current environment, investors will find the Company's low risk, utility dominated business model attractive. Long-term, we expect the Company to be well positioned as an aggregator of regulated gas and electric utilities in the United States, Canada, and the Caribbean.

## Fortis Inc.

**(FTS-T) C\$32.29**

### Belize Electricity Receives Negative Court Decision

**Event**

The Supreme Court of Belize dismissed Belize Electricity Ltd.'s (70% owned by Fortis) appeal regarding the regulator's Final Decision following the 2008 Annual Tariff Review Proceeding.

**Impact****MILDLY NEGATIVE.**

We are reducing each of our 2011 and 2012 EPS estimates by three pennies to reflect lower expected Belize Electricity earnings as a result of the decision.

**Details**

**Belize Electricity Ltd. Overview:** An integrated electric utility and the principal distributor of electricity in Belize. The utility has approximately \$0.2 billion of assets and serves more than 77,000 customers. Fortis has a 70% ownership interest in Belize Electricity.

**Regulatory Overview:** Belize Electricity is regulated by the Public Utilities Commission (PUC). The PUC issued a decision in June 2008, which disallowed \$18 million of previously incurred power costs and lowered Belize Electricity's return on assets (ROA) to 10% from 12%. Fortis is of the view that the decision violated established regulatory practices and contractual obligations between the utility and the government. Belize Electricity challenged the decision in several proceedings during which time the PUC has been prohibited from carrying out any rate review proceedings and taking enforcement actions against the utility. We note that Belize Electricity has not been earning its 10% allowed ROA due to the aforementioned regulatory challenges.

**Company Profile**

Fortis Inc. (FTS-T) is a diversified infrastructure holding company, primarily comprising of gas distribution utilities in B.C. and electric utilities in Canada, Belize, Turks and Caicos and the Cayman Islands. Fortis also owns a real estate and hotels subsidiary and has interests in electric generation ventures in Canada and the U.S.

**Please see the final pages of this document for important disclosure information.**

**Overview of Decision:**

- **Decision:** The Supreme Court dismissed Belize Electricity's appeal of the regulator's Final Decision following the 2008 Annual Tariff Review Proceeding.
- **Earnings Impact:** Moving forward we expect earnings from Belize Electricity to be similar to the \$1.5 million that was generated in 2010. Fortis believes the utility should generate \$10 million of earnings under normal operations. We note that Belize Electricity represented less than 1% of Fortis' consolidated earnings in 2010.
- **Possible Next Steps:** Belize Electricity is reviewing the decision and its options. The company can appeal to the Belize Court of Appeal and following that, if required, the case could be brought to the Caribbean Court of Justice in Trinidad.

Notes:

1) Averages exclude ATCO due to its holding company nature.

Source: Company Reports, Thomson, TD Newcrest.

**Justification of Target Price**

Our \$36.00 target price is predicated on our 2012 financial estimates as follows: 1) 25% EV / EBITDA multiple of 11.0x, 2) 25% relative dividend yield of 90%, and 3) 50% free cash flow yield of 7.0%. Our target price also incorporates a 3.5% 10-year Government of Canada bond yield assumption.

**Key Risks to Target Price**

1) Higher than expected long bond yields, 2) operational disruptions, 3) regulatory surprises, 4) unexpected large acquisitions, 5) sovereign risk, and 6) escalating construction costs.

**Investment Conclusion**

We expect Belize Electricity to continue to challenge the decision. The decision, while mildly negative is largely immaterial to the company, although it does highlight the higher risk nature of Fortis' Caribbean investments relative to its Canadian regulated businesses.

We expect capital investments in the Company's regulated utilities to continue to be the primary driver of EPS growth in the medium term, which we view positively given the low-risk and regulated nature of the assets. Fortis is the largest investor-owned gas and electric distribution utility in Canada, and therefore we view it as a core holding. We believe that in the current environment, investors will find the Company's low risk, utility dominated business model attractive. Long-term, we expect the Company to be well positioned as an aggregator of regulated gas and electric utilities in the United States, Canada, and the Caribbean.

## Fortis Inc. (FTS-T) C\$32.35

### Regulated Canadian Utilities Drive Q1 Results

#### Event

Fortis reported Q1/11 normalized EPS (f.d.) of \$0.64, higher than our \$0.59 estimate, recent consensus of \$0.62, and Q1/10 EPS (f.d.) of \$0.56.

#### Impact

**SLIGHTLY POSITIVE.** We have made several changes to our model, the largest of which includes adjusting our FortisAlberta rate base model for increased capital spend in 2011-2013, along with refining our overall maintenance expenditure forecasts. Our estimates increase slightly as a result of these changes. We are maintaining our \$36.00 target price and BUY recommendation.

#### Details

**Regulated Gas Utilities** Q1/11 earnings of \$76 million were \$3 million above Q1/10 results (Exhibit 1). The increase was largely due to rate base growth from continued utility investments, the timing of the recorded impact of a rate decision received back in 2010, and lower amortization costs from retired assets.**Regulated Electric Utilities – Canadian** Q1/11 normalized earnings of \$52 million increased by \$12 million year over year.

- **FortisAlberta** normalized earnings of \$20 million increased by \$6 million versus Q1/10 results, primarily due to rate base growth from continued utility investments and the timing of the recorded impact of a rate decision received back in 2010.
- **FortisBC** earnings of \$19 million increased by \$5 million year over year, driven largely by increased electricity sales and rate base growth from capital investments.
- **Newfoundland Power** earnings of \$7 million were flat year over year.
- **Other Canadian Electric Utilities** earnings of \$6 million were \$1 million higher than Q1/10 results, largely due to an increase in ROE at Algoma Power and increased electricity sales.

#### Company Profile

Fortis Inc. (FTS-T) is a diversified infrastructure holding company, primarily comprising of gas distribution utilities in B.C. and electric utilities in Canada, Belize, Turks and Caicos and the Cayman Islands. Fortis also owns a real estate and hotels subsidiary and has interests in electric generation ventures in Canada and the U.S.

**Please see the final pages of this document for important disclosure information.**

**Regulated Utilities – Caribbean** earnings of \$4 million were unchanged from Q1/10 results.

**Fortis Generation** earnings of \$3 million were \$1 million higher than Q1/10 results, largely from increased generation production in Belize and higher average energy sales in Ontario.

**Fortis Properties** normalized earnings of \$1 million were \$1 million below Q1/10 results, primarily due to the impact of the economic downturn on hotel operations and increased amortization expenses from capital investments.

**Corporate** expenses decreased by \$1 million to \$20 million in Q1/11, largely due to lower operating and financing costs.

**Exhibit 1. Segmented Earnings Analysis (\$mm unless stated otherwise)**

Reported EPS (f.d)	\$0.65	\$0.56	\$0.09	15%

Notes: Reported earnings have been normalized for the following items:

1) Q1/11 excludes a \$1.0 million (after-tax) gain related to the sale of property.

2) Q1/11 excludes a \$0.5 million (pre-tax) gain related to the sale of the Viking Mall in Newfoundland.

Source: Company Reports, TD Newcrest.

## **Outlook**

### **Regulatory Updates:**

- **FortisAlberta:** In March 2011, FortisAlberta filed its 2012 and 2013 Distribution Tariff Application, which also included approximately \$776 million in forecasted gross capital expenditures over the two-year period. A final decision by the regulator is expected in Q1/12.
- **FortisBC:** FortisBC Electric intends to file a 2012-2013 Revenue Requirements Application (RRA) in the summer of 2011. Similarly, FortisBC Energy (previously known as the Terasen companies) expects to file a 2012-2013 RRA in May 2011.
- **Newfoundland Power:** A customer rate application is expected to be filed in May 2011, which proposes an increase in rates by approximately 8%, effective July 1, 2011.

**Future Acquisitions a Possibility:** Our growth outlook for Fortis incorporates an estimated \$5.5 billion capital program over the next five years. Management is also actively pursuing regulated electric and natural gas distribution utilities, and an acquisition could occur first in the U.S. over Canada, given our view of the potential candidates. We would not expect Fortis to form a joint venture with or take a partial interest in a smaller, high-cash yielding corporate affiliate, although, for a very large acquisition, a purely financial partner could play a role.

**Q2/11 Preview:** We are forecasting Q2/11 EPS of \$0.36, a \$0.04 increase over Q2/10 results, largely due to rate base growth at the Company's FortisAlberta and FortisBC regulated utilities.

Notes:

1) Averages exclude ATCO due to its holding company nature.

2) Capital Power's 2009A is a half-year actual.

Source: Company Reports, Thomson, TD Newcrest.

### **Justification of Target Price**

Our \$36.00 target price is predicated on our 2012 financial estimates as follows: 1) 25% EV/EBITDA multiple of 11.0x, 2) 25% relative dividend yield of 90%, and 3) 50% free cash flow yield of 7.0%. Our target price also incorporates a 3.5% 10-year Government of Canada bond-yield assumption.

### **Key Risks to Target Price**

1) Higher-than-expected long bond yields, 2) operational disruptions, 3) regulatory surprises, 4) unexpected large acquisitions, 5) sovereign risk, and 6) escalating construction costs.

### **Investment Conclusion**

Fortis' Q1/11 results were a strong start to the year. We expect capital investments in the Company's regulated utilities to continue to be the primary driver of EPS growth in the medium term, which we view positively given the low-risk and regulated nature of the assets. Fortis is the largest investor-owned gas and electric distribution utility in Canada, and, therefore, we view it as a core holding. We believe that in the current environment, investors will find the Company's low risk, utility-dominated business model attractive. Long term, we expect the Company to be well positioned as an aggregator of regulated gas and electric utilities in the U.S., Canada, and the Caribbean.

## Fortis Inc. (FTS-T) C\$31.77

### Resuming Coverage: Acquisition of Vermont Utility Announced

#### Event

- We are resuming coverage of Fortis after the completion of a \$300 million equity offering.
- On May 30, 2011, Fortis announced that it entered into an agreement to acquire Central Vermont Public Service Corporation (CVPS) for an aggregate purchase price of approximately US\$700 million.
- On June 10, 2011, the Government of Belize issued a statement announcing its interest in assuming control of Belize Electricity Ltd. (BEL).

#### Impact

**MIXED.** We have revised our estimates to include the successful acquisition of CVPS along with updating our financing assumptions, which includes the recent equity offering. However, given that Fortis has not received any formal offer from the Belize Government for its investment in BEL we are not incorporating a sale of the asset in our model. Our target remains \$36.00.

#### Details

##### CVPS Acquisition:

- Description:** CVPS is the largest integrated electric utility in Vermont, and consists of approximately 9,000 miles of distribution lines and over 600 miles of sub-transmission lines. CVPS also holds directly and indirectly approximately 41% of Vermont Transco LLC (Velco), which owns and operates the high-voltage transmission system in Vermont. CVPS serves approximately 160,000 customers in about two-thirds of the cities and towns in Vermont.
- Price:** US\$35.10 per share in cash for an aggregate purchase price of approximately US\$700 million, which includes approximately US\$230 million of debt. This represents a 1.4x price-to-total rate base multiple when including CVPS' total interest in Velco.
- Favourable Regulatory Framework:** For CVPS, the allowed rate of return on common equity for 2011 has been set at 9.45% and the equity thickness is currently 57%.

#### Company Profile

Fortis Inc. (FTS-T) is a diversified infrastructure holding company, primarily comprising of gas distribution utilities in B.C. and electric utilities in Canada, Belize, Turks and Caicos and the Cayman Islands. Fortis also owns a real estate and hotels subsidiary and has interests in electric generation ventures in Canada and the U.S.

Please see the final pages of this document for important disclosure information.

- **Rate Base Growth:** CVPS expects its rate base investment to reach approximately US\$650 million by 2015, representing a compound average annual growth rate of 8.7% from 2010 to 2015 (Exhibit 1). In 2010, total assets and rate base assets of CVPS were approximately US\$711 million and US\$426 million, respectively.
- **EPS Accretive:** The acquisition is expected to be accretive to Fortis' EPS in the first full year of ownership. Based on our assumptions we estimate an annual EPS accretion of \$0.04 in 2012.
- **Financing:** Upon the transaction close, Fortis expects to fund the acquisition by drawing on its committed term credit facility.
- **Higher Bid Unlikely:** Given our understanding that the sale process was thoroughly conducted (by Lazard Ltd.), we do not foresee a higher bid. The transaction break fee is \$17.5 million plus expenses (capped at \$2 million).
- **Approvals and Timing:** The transaction is subject to the receipt of approvals from CVPS shareholders, regulatory and other approvals, including those of the Vermont Public Service Board and the U.S. FERC, and customary closing conditions. Fortis expects to close the acquisition within 6 to 12 months. We have assumed an early 2012 closing.
- **In-Line With Strategy and Creates Further Opportunities in the U.S. Northeast:** We view the foray into the U.S. Northeast positively as it could build on Fortis' strategy of growing earnings through its regulated rate base investments, and potentially provide it with the foundation for growing its asset base in the U.S. Northeast. It is our understanding that Fortis sees other similar opportunities in the U.S., and a successful acquisition of CVPS could provide Fortis with the impetus to acquire other electric utilities in the region, in our view.

**Exhibit 1. CVPS Estimated Rate Base Growth (2009–2015)**

Note:

1) Includes Velco investments and VT Marble acquisition, net of stimulus funding.

Source: Company Reports, TD Newcrest.

## Equity Offering:

- On May 30, 2011, Fortis entered into an agreement to sell 9.1 million common shares on a bought deal basis at \$33.00 per share, for gross proceeds of approximately \$300 million (\$345.3 million with over-allotment). The underwriters have an option to purchase up to an additional 1.365 million common shares at the same price up to 30 days after the offering close.
- The net proceeds are expected to be used to repay the company's outstanding credit facility, finance additional equity injections into the company's western Canadian regulated utilities and the Waneta Expansion, and general corporate purposes.

## Government of Belize Announcement:

- On June 10, 2011, the Government of Belize issued a statement announcing its interest in assuming control of BEL through the purchase of a majority stake of its shares. The Government of Belize currently owns approximately 25% of BEL while Fortis owns approximately 70%.
- Offer Not Official:** No official offer has been made by the Belize Government for BEL but if a proposal is announced we would expect Fortis to prefer to sell either all or none of its stake in BEL.
- BEL Investment Largely Immaterial:** In 2010, BEL contributed approximately \$2 million of net earnings to Fortis (less than 1% of 2010 consolidated operating earnings) and the company's net investment in BEL is approximately C\$125 million.
- BECOL Investment Unaffected:** It is our understanding that the Government of Belize is not interested in Fortis' investment in Belize Electric Company Limited (BECOL), which operates three non-regulated generation assets in Belize and sells output to BEL under 50-year power purchase agreements (PPAs). We believe that the Belize Government intends to honour the PPAs with BECOL, and that there are strong mechanisms in place to ensure that those contracts are honoured.
- Timing:** It is our understanding that BEL has the cash to purchase electricity for just under a month using a cash advance from the Belize Government, and that the Government would like to reach a deal prior to this deadline.

Avg.					4.0%		1.8x					21.8x	20.5x	18.7x	17.9x		18.3x

Notes:

1) Averages exclude ATCO due to its holding company nature.

Source: Company Reports, Thomson, TD Newcrest.

## Justification of Target Price

Our \$36.00 target price is predicated on our 2012 financial estimates as follows: 1) 25% EV/EBITDA multiple of 11.0x, 2) 25% relative dividend yield of 90%, and 3) 50% free cash flow yield of 7.0%. Our target price also incorporates a 3.5% 10-year Government of Canada bond-yield assumption.

## Key Risks to Target Price

1) Higher-than-expected long bond yields, 2) operational disruptions, 3) regulatory surprises, 4) unexpected large acquisitions, 5) sovereign risk, and 6) escalating construction costs.

**Investment Conclusion**

If successful, we view the CVPS acquisition positively as we believe it would be mutually beneficial for both companies. The transaction should provide Fortis with a source of stable, regulated earnings, in a favourable regulatory jurisdiction with the potential to expand the company's footprint into the U.S. Northeast. CVPS is expected to gain the financial backing of a strong parent to help fund its future growth, receive benefits to improve its system reliability and efficiency for customers, and keep its operations autonomous in the Fortis fold.

Fortis is the largest investor-owned gas and electric distribution utility in Canada, and, therefore, we view it as a core holding. We believe that in the current environment, investors will find the Company's low risk, utility-dominated business model attractive. Long term, we expect the Company to be well positioned as an aggregator of regulated gas and electric utilities in the U.S. and Canada.

**Research Ratings**

**ACTION LIST BUY:** The stock's total return is expected to exceed a minimum of 15%, on a risk-adjusted basis, over the next 12 months and it is a top pick in the Analyst's sector.

**BUY:** The stock's total return is expected to exceed a minimum of 15%, on a risk-adjusted basis, over the next 12 months.

**SPECULATIVE BUY:** The stock's total return is expected to exceed 30% over the next 12 months; however, there is material event risk associated with the investment that could result in significant loss.

**HOLD:** The stock's total return is expected to be between 0% and 15%, on a risk-adjusted basis, over the next 12 months.

**TENDER:** Investors are advised to tender their shares to a specific offer for the company's securities or to support a proposed combination reflecting our view that a superior offer is not forthcoming.

**REDUCE:** The stock's total return is expected to be negative over the next 12 months.

**Overall Risk Rating in order of increasing risk:** Low (7.2% of coverage universe), Medium (33.8%), High (48.8%), Speculative (10.2%)

**Analyst Certification**

Each analyst of TD Securities Inc. whose name appears on page 1 of this research report hereby certifies that (i) the recommendations and opinions expressed in the research report accurately reflect the research analyst's personal views about any and all of the securities or issuers discussed herein that are within the analyst's coverage universe and (ii) no part of the research analyst's compensation was, is, or will be, directly or indirectly, related to the provision of specific recommendations or views expressed by the research analyst in the research report.

**(FTS-T) C\$32.01****Fortis' Electric Utility in Belize to be Expropriated****Event**

The Government of Belize has passed a legislation and issued an order to expropriate Fortis' 70% ownership interest in Belize Electricity Limited (BEL). Compensation for Fortis' interest remains to be determined.

**Impact****MILDLY NEGATIVE.**

We have updated our forecasts to remove the earnings contribution from BEL (approximately \$2 million per year, versus a fair return level of \$10 million). At this point, however, we have not written down the net investment from the company's balance sheet, as the final payment could take over a year to resolve.

While there is some risk to the earnings contribution from Fortis' non-regulated hydro generation assets in the country (BECOL), which we estimate to be \$12-13 million annually (approximately 4% of consolidated earnings), we believe that the contractual provisions in place are sufficient to protect the investment's value and cash flow.

We would view any weakness in the stock price, as a result of this announcement, to be a buying opportunity.

**Details**

- BEL Overview:** Fortis owned approximately 70% of BEL, which is the main distributor of electricity in the country. Prior to the expropriation, the Government effectively owned 25% of BEL, with the balance being held by approximately 1,100 Belizeans.
- BEL Investment Largely Immaterial to Fortis:** In 2010, BEL contributed approximately \$2 million of net earnings to Fortis (less than 1% of 2010 consolidated operating earnings) and the company's net investment in BEL was approximately \$125 million (less than 2% of Fortis' assets).

**Please see the final pages of this document for important disclosure information.**

**Company Profile**

Fortis Inc. (FTS-T) is a diversified infrastructure holding company, primarily comprising of gas distribution utilities in B.C. and electric utilities in Canada, Turks and Caicos and the Cayman Islands. Fortis also owns a real estate and hotels subsidiary and has interests in electric generation ventures in Canada and the U.S.

- **Expropriation was a Known Risk:** BEL had been unsuccessfully seeking a fair return for years through the courts of appeal as the regulator had kept electricity rates too low to allow direct operating costs to be recovered and the debt to be serviced. Last week, our understanding was that BEL had sufficient cash to purchase electricity for just under a month using a cash advance from the Belize Government, and that the Government was interested in purchasing a majority interest in BEL prior to the cash running out.
- **Foreign Investment Exiting Belize:** We continue to be hopeful that Fortis will be able to recover its net investment in BEL, although there is some risk to that scenario. Our understanding is that the water and telephone companies have already been taken over by the Government, with the water company acquired but the phone company expropriated.
- **Government Has No Plans to Nationalize BECOL:** Fortis also owns and operates three non-regulated hydro dams in Belize that sell electricity to BEL under 50-year power purchase agreements (PPAs). We estimate Fortis' investment in Belize Electric Company Limited (BECOL) to be \$160-175 million and the assets to generate \$12-13 million of earnings per year. We believe that the Belize Government intends to honour the PPAs with BECOL, and that there are strong mechanisms in place to ensure that those contracts are honoured. Local media has quoted Prime Minister Barrow as stating that *"...because BECOL is functioning well and there is no difficulty in its generation of electricity, there can be no reason to interfere with BECOL and Fortis' ownership...except for compelling, unavoidable public interest reasons, this Government observes the sanctity of contracts"*.
- **Other Caribbean Investments Appear Stable:** Other than potentially consolidating utilities in Turks & Caicos and the Cayman Islands in the future, we would not expect Fortis to expand its presence to new countries in the Caribbean. As Fortis has been growing, the Caribbean has continued to shrink as a percentage of the consolidated company, which we have always viewed to be a positive trend. Last year Utilities earnings in the Caribbean region contributed 8% to Fortis' operating earnings, versus 18% in 2007.

## Outlook

**Timing Could Take Years to Fully Resolve:** Our understanding is that while Fortis is required to file a claim within 30 days of expropriation, and have all final claims submitted within 12 months from expropriation. The Legislation does not set a timeline for actually paying out the claim beyond effectively stating that the reasonable payment is to be made in a reasonable time. Given our view of the weak financial state of the Government, it could take some time for any payment to be made. While Fortis could appeal the level of payment the Government establishes in the court system, to date Fortis has been unsuccessful in obtaining a fair return for BEL through the appeals process, suggesting that a significant write down of Fortis' BEL investment is a real risk. The Government does not appear to put much weight on the negative investment signal to foreigners that this move makes, especially since this is not the first infrastructure to be nationalized, increasing the risk of an investment write down for Fortis.

Notes:

1) Averages exclude ATCO due to its holding company nature.

2) Capital Power's 2009A is a half-year actual.

Source: Company Reports, Thomson, TD Newcrest.

**Justification of Target Price**

Our \$36.00 target price is predicated on our 2012 financial estimates as follows: 1) 25% EV/EBITDA multiple of 11.0x, 2) 25% relative dividend yield of 90%, and 3) 50% free-cash-flow yield of 7.0%. Our target price also incorporates a 3.5% 10-year Government of Canada bond yield assumption.

**Key Risks to Target Price**

1) Higher-than-expected long bond yields, 2) operational disruptions, 3) regulatory surprises, 4) unexpected large acquisitions, 5) sovereign risk, and 6) escalating construction costs.

**Investment Conclusion**

We view the expropriation of Fortis' 70% interest in BEL as largely immaterial, as its investments in Belize are relatively small and have never been a part of our core investment thesis. Fortis is the largest investor-owned gas and electric distribution utility in Canada, and, therefore, we view it as a core holding. We believe that in the current environment, investors will find the Company's low risk, utility-dominated business model attractive. Long term, we expect the Company to be well-positioned as an aggregator of regulated gas and electric utilities in the U.S. and Canada. We would view any weakness in the stock price, as a result of this announcement, as a buying opportunity.

## Gaz Metro's Bid for CVPS is Slightly Higher than Fortis'

### Event

Gaz Metro Limited Partnership has submitted an unsolicited bid to acquire all of the common shares of Central Vermont Public Service Corporation (CVPS) for US\$35.25 per share, in cash. This bid is slightly higher than the US\$35.10 per share, in cash offer included in Fortis' and CVPS' merger agreement, which was announced on May 30, 2011.

CVPS commented that its board of directors would review the offer in due course based on its fiduciary responsibilities and contractual commitments to Fortis.

As a reminder, Valener has a 29% ownership interest in Gaz Metro LP.

### Impact for Valener (VNR-T)

#### **POTENTIALLY POSITIVE.**

Given Gaz Metro's existing electric distribution utility operations in Vermont (Green Mountain Power), we believe the acquisition would make strategic sense. Based on our calculations, the acquisition of CVPS – as proposed – could add three cents of accretion to our Valener EPS estimates. However, due to the uncertainty surrounding the situation, we are leaving our estimates unchanged at this point.

### Impact for Fortis (FTS-T)

#### **POTENTIALLY NEGATIVE.**

The CVPS acquisition is included in our Fortis forecasts and we estimate the transaction would be four cents accretive to our EPS estimates. At this point, our Fortis forecasts remain unchanged and continue to include the contribution from CVPS.

For further details on Fortis' offer please refer to our June 15, 2011 Action Note titled, *Resuming Coverage: Acquisition of Vermont Utility Announced*

### Overview of CVPS

CVPS is the largest integrated electric utility in Vermont, and consists of approximately 9,000 miles of distribution lines and over 600 miles of sub-transmission lines. CVPS also holds directly and indirectly approximately 41% of Vermont Transco LLC (Velco), which owns and operates the high-voltage transmission system in Vermont. CVPS serves approximately 160,000 customers in about two-thirds of the cities and towns in Vermont.

CVPS is regulated by the Vermont Public Services Board (VPSB) and, for 2011, the allowed rate of return on common equity has been set at 9.45% and the equity thickness is currently 57%. CVPS expects its rate base investment to reach approximately US\$650 million by 2015, representing a compound average annual growth rate of 8.7% from 2010 to 2015. In 2010, total assets and rate base assets of CVPS were approximately US\$711 million and US\$426 million, respectively.

**Please see the final pages of this document for important disclosure information.**

**Overview of Gaz Metro's Offer**

- **Price:** US\$35.25 per share in cash for an aggregate purchase price of US\$702 million, which includes approximately US\$230 million in debt. This represents a 1.5x price-to-total rate base multiple when including CVPS' total interest in Velco in addition to the break fee payable by CVPS to Fortis.
- **Dividends:** Shareholders will continue to receive the current quarterly dividend of US\$0.23 per share. We note that under Fortis' offer, shareholders would receive dividends of US\$0.23 per share for two quarters followed by US\$0.01 per share for the remaining quarters until the transaction closes (Exhibit 1).

**Exhibit 1: Comparison of Gaz Metro's and Fortis' Offers (US\$)**

	<b>Gaz Metro</b>	<b>Fortis</b>	<b>% Delta</b>
Cash Offer Price	35.25	35.10	0.4%
Total Consideration - Dec 31, 2011 Closing	35.71	35.56	0.4%
Total Consideration - March 31, 2012 Closing	35.94	35.57	1.0%
Total Consideration - June 30, 2012 Closing	36.17	35.58	1.7%

Note: Total consideration includes dividends received.

Source: Company Reports, TD Newcrest.

- **Timing:** Management expects the transaction to close in 8-12 months, based on prior transactions (including its purchase of Green Mountain Power in 2007).
- **Approvals:** The transaction is subject to approval by CVPS shareholders, then regulatory and other approvals including the US FERC and VPSB. We note that Gaz Metro has significant experience in dealing with the Vermont regulator, due to its existing natural gas and electric distribution utilities in the state. Local Gaz Metro utility manager discussed an offer with regulators prior to making the offer public.
- **Gaz Metro Financing:** Gaz Metro expects to fund a purchase of CVPS' shares with 50% debt and 50% equity. The debt and equity would be in-place prior to closing, although the company does have a bridge facility available.
- **Valener Financing:** We expect Valener to participate in any equity offering by Gaz Metro to maintain its 29% ownership interest. We believe Valener would finance its acquisition of Gaz Metro shares through an equity offering of approximately \$70 million.
- **Strategic Rationale:** Gaz Metro has a sizable existing presence in Vermont including its ownership of Green Mountain Power, which is the second largest electric distribution utility in Vermont (next to CVPS). The company had stated in the past that it would be interested in consolidation opportunities in the state.

**Overview of Fortis' Offer**

- **Price:** US\$35.10 per share in cash for an aggregate purchase price of US\$700 million, which includes approximately US\$230 million of assumed debt. This represents a 1.4x price-to-total rate base multiple when including CVPS' total interest in Velco.
- **Dividends:** Shareholders would receive the current quarterly dividend of US\$0.23 per share for the next two quarters followed by \$0.01 per share for each subsequent quarter until closing.
- **Merger Agreement and Break Fee:** Fortis previously has entered into a merger agreement with CVPS. The agreement includes a break fee of US\$17.5 million, in addition to expenses which are capped at US\$2.0 million. Included in the agreement is a clause which allows Fortis to counter any superior offer.
- **Timing:** Fortis expects the transaction to close in 6-12 months.
- **Financing:** Upon the transaction close, Fortis expects to fund the acquisition by drawing on its committed term credit facility.
- **Strategic Rationale:** The acquisition would be Fortis' first foray into the U.S. Northeast. It is our understanding that Fortis sees other similar opportunities in the U.S., and a successful acquisition of CVPS could provide Fortis with the impetus to acquire other electric utilities in the region, in our view.

**Investment Conclusion**

Gaz Metro's offer was a surprise to us as it was our understanding that CVPS' merger agreement with Fortis was the result of a thorough sale process. We also point out that unsolicited bids for utility assets are a rare event given the importance and length of time required for regulatory approvals. Given the \$17.5 million break fee with Fortis, we do not believe that Gaz Metro's offer is high enough for CVPS' board to recommend the offer, as the cost of the break fee would be borne by CVPS shareholders in the event that the regulator does not approve a takeover. At this point, we believe that a likely scenario is that Fortis increases its bid slightly.

**Exhibit 3. Justification of Target Prices**

Stock Name	Ticker	Exch.	Rating	Target Price	Justification of Target Price
ATCO Ltd.	ACO.X	T	AL BUY	\$69.00	predicated on ATCO's estimated one-year forward NAV and applying a 20% discount to NAV. The company's estimated one-year forward NAV depends on our \$60.00 CU target price. Our target price implies a 1.8% dividend yield and a price-to-earnings ratio of 13.1x, based on our 2012 financial estimates.
Canadian Utilities Ltd.	CU	T	AL BUY	\$60.00	predicated on our 2012 financial estimates as follows: 1) 25% EV/EBITDA multiple of 9.5x, 2) 25% relative dividend yield of 90%, and 3) 50% free cash flow yield of 7.0%. Our target price also incorporates a 3.5% 10-year Government of Canada bond-yield assumption.
Capital Power Corp.	CPX	T	HOLD	\$27.00	predicated on our 2012 financial estimates as follows: 1) 25% EV/EBITDA multiple of 9.0x, 2) 25% relative dividend yield of 170%, and 3) 50% free-cash-flow yield of 10.5%. Our target incorporates a 3.5% 10-year Government of Canada bond yield.
Emera Inc.	EMA	T	HOLD	\$32.00	predicated on our 2012 financial estimates as follows: 1) 25% EV/EBITDA multiple of 11.0x, 2) 25% relative dividend yield of 90%, and 3) 50% free cash flow yield of 7.0%. Our target price also incorporates a 3.5% 10-year Government of Canada bond-yield assumption.
Enbridge Inc.	ENB	T, N	HOLD	\$30.00	predicated on our 2012 financial estimates as follows: 1) 25% EV / EBITDA multiple of 10.5x, 2) 25% relative dividend yield of 130%, and 3) 50% free cash flow yield of 8.5%. Our target price also incorporates a 3.5% 10-year Government of Canada bond yield assumption.
Fortis Inc.	FTS	T	BUY	\$36.00	predicated on our 2012 financial estimates as follows: 1) 25% EV/EBITDA multiple of 11.0x, 2) 25% relative dividend yield of 90%, and 3) 50% free cash flow yield of 7.0%. Our target price also incorporates a 3.5% 10-year Government of Canada bond-yield assumption.
TransAlta Corp.	TA, TAC	T, N	HOLD	\$20.00	predicated on our financial estimates as follows: 1) 25% EV to 2012E EBITDA multiple of 9.0x, 2) 25% relative 2012E dividend yield of 160%, and 3) 50% 2011E free cash flow yield of 10.0%. Given the unusually high maintenance capital scheduled for 2012, at this point we believe a 2011 free cash flow metric is more representative of a more normal business operation and, therefore, is the input to our target price derivation. Our target price also incorporates a 3.5% 10-year Government of Canada bond yield assumption.
TransCanada Corp.	TRP	T, N	BUY	\$43.00	predicated on 2012 financial estimates as follows: 1) 25% EV / EBITDA multiple of 9.5x, 2) 25% relative dividend yield of 140%, and 3) 50% free cash flow yield of 9.0%. Our target price also incorporates a 3.5% 10-year Government of Canada bond-yield assumption.
AltaGas Ltd.	ALA	T	BUY	\$26.00	predicated on our 2012 financial estimates as follows: 1) 25% EV/EBITDA multiple of 11.0x, 2) 25% relative dividend yield of 150%, and 3) 50% free cash flow yield of 9.0%. Our target price also incorporates a 3.5% 10-year Government of Canada bond-yield assumption.
Enbridge Income Fund Holdings Inc.	ENF	T	REDUCE	\$16.00	predicated on our 2012 financial estimates as follows: 1) 25% EV/EBITDA multiple of 10.0x, 2) 25% relative dividend yield of 180%, and 3) 50% free-cash-flow yield of 10.0%. Our target price also incorporates a 3.5% 10-year Government of Canada bond-yield assumption.
Veresen Inc.	VSN	T	HOLD	\$13.50	predicated on 2012 financial estimates as follows: 1) 25% EV / EBITDA multiple of 10.0x, 2) 25% relative dividend yield of 190%, and 3) 50% free-cash-flow yield of 10.5%. Our target price also incorporates a 3.5% 10-year Government of Canada bond yield assumption.
Valener Inc.	VNR	T	HOLD	\$16.50	predicated on 2012 financial estimates as follows: 1) 25% EV / EBITDA multiple of 9.0x, 2) 25% relative dividend yield of 175%, and 3) 50% free cash flow yield of 13.0%. Our target price also incorporates a 3.5% 10-year Government of Canada bond yield assumption.
Inter Pipeline Fund	IPL.UN	T	HOLD	\$15.50	predicated on our 2012 financial estimates as follows: 1) 25% EV/EBITDA multiple of 10.5x, 2) 25% relative dividend yield of 140%, and 3) 50% free-cash-flow yield of 9.0%. Our target price also incorporates a 3.5% 10-year Government of Canada bond-yield assumption.
Keyera Corp.	KEY	T	REDUCE	\$32.00	predicated on our 2012 financial estimates as follows: 1) 25% EV / EBITDA multiple of 10.0x, 2) 25% relative dividend yield of 140%, and 3) 50% free cash flow yield of 10.5%. Our target price also incorporates a 3.5% 10-year Government of Canada bond yield assumption.
Pembina Pipeline Corp.	PPL	T	REDUCE	\$18.00	predicated on 2012 financial estimates as follows: 1) 25% EV/EBITDA multiple of 10.0x, 2) 25% relative dividend yield of 180%, and 3) 50% free cash flow yield of 10.0%. Our target price also incorporates a 3.5% 10-year Government of Canada bond yield assumption.
Provident Energy Ltd.	PVE	T	HOLD	\$8.50	predicated on our 2012 financial estimates as follows: 1) 25% EV / EBITDA multiple of 9.5x, 2) 25% relative dividend yield of 150%, and 3) 50% free cash flow yield of 10.5%. Our target price also incorporates a 3.5% 10-year Government of Canada bond yield assumption.

## Fortis Inc. (FTS-T) C\$32.76

### Fortis Walks Away from CVPS Bid

#### Event

- Central Vermont Public Service Corporation (CVPS) and Gaz Metro Limited Partnership (Gaz Metro) announced a definitive agreement for the sale of CVPS to Gaz Metro.
- Fortis has effectively terminated its Merger Agreement with CVPS.

#### Impact

**SLIGHTLY NEGATIVE.** We have removed CVPS' contribution from our forecasts and added Fortis' receipt of the termination fee. We are also introducing our 2013 forecasts and rolling forward our target to be based 50% on each of our 2012 and 2013 estimates.

#### Details

- Timeline:** Fortis management received notice yesterday that the Board of Directors of CVPS deemed Gaz Metro's bid a superior proposal. Fortis waived its right to enter into further discussions with CVPS in exchange for the prompt payment of the break fee, which resulted in the termination of its Merger Agreement with CVPS.
- CVPS Contribution:** Our Fortis EPS forecasts previously included an accretion of approximately four cents from an assumed CVPS acquisition.
- Break-Fee Proceeds:** Fortis will receive a US\$17.5 million termination fee in addition to US\$2.0 million in expenses.
- Disciplined Management:** We believe an unwillingness to put in a higher bid demonstrates Fortis' disciplined approach to acquisitions.

Please see our July 13, 2011 Action Note on Valener titled, **Gaz Metro Wins Bid for CVPS** for more details on Gaz Metro's bid for CVPS.

**Please see the final pages of this document for important disclosure information.**

#### Company Profile

Fortis Inc. (FTS-T) is a diversified infrastructure holding company, primarily comprising of gas distribution utilities in B.C. and electric utilities in Canada, Turks and Caicos and the Cayman Islands. Fortis also owns a real estate and hotels subsidiary and has interests in electric generation ventures in Canada and the U.S.

Notes:

1) Averages exclude ATCO due to its holding company nature.

2) Capital Power's 2009A is a half-year actual.

Source: Thomson, TD Newcrest.

**Justification of Target Price**

Our \$36.00 target is predicated on 50% of each of our 2012 and 2013 financial estimates as follows: 1) 25% EV/EBITDA multiple of 10.5x, 2) 25% relative dividend yield of 90%, and 3) 50% free-cash-flow yield of 7.0%. Our target incorporates a 3.5% 10-year Government of Canada bond yield.

**Key Risks to Target Price**

1) Higher-than-expected long bond yields, 2) operational disruptions, 3) regulatory surprises, 4) unexpected large acquisitions, 5) sovereign risk, and 6) escalating construction costs.

**Investment Conclusion**

Fortis demonstrated discipline in its decision not to make a counter offer for CVPS, in our view. Management has indicated that it is working on a few other opportunities, and we believe that Fortis is well-positioned to make future acquisitions, as any smaller utility the Company might acquire would likely gain the financial backing of a strong parent to help fund its future growth, receive benefits to improve its system reliability and efficiency for customers, and keep its operations autonomous in the Fortis fold.

Fortis is the largest investor-owned gas and electric distribution utility in Canada, and, therefore, we view it as a core holding. We believe that in the current environment, investors will find the Company's low-risk, utility-dominated business model attractive.

**(FTS-T) C\$30.60****Q2/11 Results Slightly Miss - Favourable Outlook Remains****Event**

Fortis reported Q2/11 EPS (f.d.) of \$0.33, which was slightly below our \$0.36 estimate, recent consensus of \$0.35, but above Q2/10 EPS (f.d.) of \$0.32.

**Impact****NEUTRAL.**

We have made numerous changes to our financial model, primarily to reflect recent regulatory filings as well as more muted non-regulated generation and properties margins. The net result of these changes is that our 2011 EPS (f.d.) estimate decreases by a penny, while our 2012 and 2013 estimates each decrease by two pennies (Exhibit 1).

Source: Company Reports, TD Newcrest.

**Details**

**Regulated Gas Utilities** Q2/11 earnings of \$15 million were \$2 million below Q2/10 results (Exhibit 2). The decline was mainly attributable to the timing of operating expenses during the year partially offset by rate base growth from continued utility investments.

**Company Profile**

Fortis Inc. (FTS-T) is a diversified infrastructure holding company, primarily comprising of gas distribution utilities in B.C. and electric utilities in Canada, Turks and Caicos and the Cayman Islands. Fortis also owns a real estate and hotels subsidiary and has interests in electric generation ventures in Canada and the U.S.

**Please see the final pages of this document for important disclosure information.**

**Regulated Electric Utilities – Canadian** Q2/11 earnings of \$45 million increased by \$5 million year over year.

- **FortisAlberta** earnings of \$19 million increased \$2 million versus Q2/10 results, primarily due to rate base growth from continued utility investments. The increase was partially offset by lower transmission revenue as well as lower than expected customer growth and energy deliveries.
- **FortisBC** earnings of \$9 million increased by \$1 million year over year, driven largely by rate base growth from capital investments as well as lower than expected power costs.
- **Newfoundland Power** earnings of \$11 million were flat year over year. The effects of a lower allowed ROE and higher costs were offset by increased electricity sales growth and a lower effective tax rate.
- **Other Canadian Electric Utilities** earnings of \$6 million were \$2 million higher than Q2/10 results. The increase was largely due to Algoma Power ROE, increased electricity sales, the timing of costs during the year as well as a lower effective tax rate.

**Regulated Utilities – Caribbean** earnings of \$7 million were unchanged from Q2/10 results.

**Fortis Generation** earnings of \$2 million were \$1 million higher than Q2/10 results. The decrease was mainly attributable to lower production in Belize due to lower rainfall. Partially offsetting this was increased production in New York and Ontario due to higher rainfall.

**Fortis Properties** earnings of \$7 million were \$1 million below Q2/10 results, primarily due to the impact of the economic downturn on hotel operations as well as increased operating and amortization costs.

**Corporate** expenses decreased by \$2 million to \$18 million in Q2/11, largely due to lower business development and financing costs.

Source: Company Reports, TD Newcrest.

## **Outlook**

**Belize Update:** In late July Fortis initiated legal proceedings for compensation from the Government of Belize for the value of its previous investment in Belize Electricity, which recently had a book value of be \$112 million. As a reminder, on June 20, 2011 the Government of Belize expropriated Fortis' 70% ownership interest in Belize Electricity. For more information please refer to our June 22, 2011 note titled, "*Fortis' Electric Utility in Belize to be Expropriated.*" Fortis' non-regulated generating assets (BECOL) in the country have not been impacted, although Belize Electricity recently had US\$6.5 million of overdue energy purchases outstanding to BECOL.

**Regulatory Updates:**

- **FortisBC Energy Companies (Terasen Gas):** In May 2011 the FortisBC Energy companies filed their 2012-2013 Revenue Requirement Applications. FortisBC Energy's application includes forecast average rate bases of \$2,737 million and \$2,788 million for 2012 and 2013, respectively. The FortisBC Energy (Vancouver Island) application includes forecast average rate bases of \$788 million and \$814 million for 2012 and 2013, respectively.
- **FortisBC Electric:** In June 2011 FortisBC Electric filed a rate application that includes forecast average rate bases of \$1,145 million and \$1,212 million for 2012 and 2013, respectively.
- **FortisAlberta:** The Alberta regulator recently held a generic cost of capital hearing, which concluded on July 5, 2011. A decision is not expected until Q4/11 at the earliest. As a reminder, a number of Alberta utilities filed a joint submission in which they request: 1) an average ROE of 10.375% for 2011 and 2012, 2) a two percentage point increase to equity thickness, and 3) that a formula approach to establish the ROE not be implemented at this time.
- **Newfoundland Power:** In July 2011 the utility filed an application with the regulator requesting approval of its 2012 capital expenditures plan of \$77 million.
- **Fortis Turks and Caicos:** The Government plans to implement a carbon tax effective September 2011. The utility may not be permitted to pass the costs along to customers, which if implemented could affect earnings by \$2-3 million annually.

**Q3/11 Preview:** We are forecasting Q3/2011 EPS of \$0.23, a penny below comparable Q3/2010 EPS. We expect rate base growth in the Canadian regulated utilities segment to be more than offset by lower contribution from the regulated Caribbean utilities, continued softness in hotel revenues, and a higher number of shares outstanding.

**Justification of Target Price**

Our \$36.00 target price is predicated on 50% of our 2012 and 2013 financial estimates as follows: 1) 25% EV/EBITDA multiple of 10.5x, 2) 25% relative dividend yield of 90%, and 3) 50% free cash flow yield of 7.5%. Our target price also incorporates a 3.5% 10-year Government of Canada bond-yield assumption.

**Key Risks to Target Price**

1) Higher-than-expected long bond yields, 2) operational disruptions, 3) regulatory surprises, 4) unexpected large acquisitions, 5) sovereign risk, and 6) escalating construction costs.

**Investment Conclusion**

The quarter was slightly below our expectations, mainly as a result of weaker than expected earnings at the company's regulated gas utility, mainly as a result of the timing of expenses during the year, as well as lower hospitality earnings. Fortis is the largest investor-owned gas and electric distribution utility in Canada, and, therefore, we view it as a core holding. We believe that Fortis is well-positioned to make future acquisitions, as any smaller utility the Company might acquire would likely gain the financial backing of a strong parent to help fund its future growth, receive benefits to improve its system reliability and efficiency for customers, and

**(FTS-T) C\$34.06****Q3/11 Results Slightly Above Expectations****Event**

Fortis reported normalized Q3/11 EPS (f.d.) of \$0.25, slightly above our \$0.23 estimate, recent consensus of \$0.24, and normalized Q3/10 EPS (f.d.) of \$0.24.

**Impact****NEUTRAL.**

The results were better than our expectations largely due to timing of operating expenses in the Gas Distribution Utility in B.C. Corporate expenses were also lower than we were forecasting, partially a result of a favourable foreign exchange gain. We have updated our financial model primarily to reflect slightly lower returns in the unregulated businesses partially offset by increased earnings in Other Canadian Electric Utilities (Exhibit 1). We have also adjusted our maintenance capital assumptions.

We are rolling forward our target to be based 25% on our 2012 and 75% on our 2013 forecasts, and are maintaining our BUY recommendation and \$37 target price.

Source: Company Reports, TD Securities.

**Details**

**Regulated Gas Utilities** Q3/11 losses of \$3 million were \$6 million lower than Q3/10 results due to rate base growth from continued utility investments, lower than expected operating expenses from the timing of spending and capitalization of operating costs during the year, and lower effective income taxes.

**Company Profile**

Fortis Inc. (FTS-T) is a diversified infrastructure holding company, primarily comprising of gas distribution utilities in B.C. and electric utilities in Canada, Turks and Caicos and the Cayman Islands. Fortis also owns a real estate and hotels subsidiary and has interests in electric generation ventures in Canada and the U.S.

**Please see the final pages of this document for important disclosure information.**

**Regulated Electric Utilities – Canadian** Q3/11 earnings of \$43 million were flat year over year.

- **FortisAlberta** earnings of \$19 million were comparable to Q3/10 results. Rate base growth from continued utility investments along with higher customer growth and energy deliveries were offset by a positive 2010 revenue requirements decision, which was recorded in Q3/10.
- **FortisBC** earnings of \$10 million decreased by \$1 million year over year driven by lower capitalized allowance for funds used during construction (AFUDC) from fewer assets under construction, and higher effective income taxes.
- **Newfoundland Power** earnings of \$8 million were flat year over year. The effects of increased electricity sales, a lower effective tax rate, and hurricane costs recorded back in Q3/10 were offset by a lower allowed ROE and higher employee-related costs.
- **Other Canadian Electric Utilities** earnings of \$6 million were \$1 million higher than Q3/10 results. The increase was due to a higher Algoma Power ROE, increased electricity sales, and a lower effective tax rate at FortisOntario.

**Regulated Utilities – Caribbean** earnings of \$6 million were \$2 million lower year over year largely from lower electricity sales, and no earnings contribution from Belize Electricity.

**Fortis Generation** earnings of \$8 million were \$1 million lower than Q3/10 results. The decrease was mainly attributable to lower production in Belize due to lower rainfall and lower Upper New York State generation from a plant outage.

**Fortis Properties** earnings of \$9 million were flat year over year. Increased administrative expenses were offset by increased revenues at the hospitality division as a result of higher average room rates and hotel occupancy.

**Corporate** normalized expenses decreased by \$3 million to \$16 million in Q3/11, largely due to foreign exchange gains.

**Exhibit 2. Segmented Earnings Analysis (\$mm unless stated otherwise)**

<b>Reported EPS (f.d)</b>	<b>\$0.31</b>	<b>\$0.26</b>	<b>\$0.05</b>	<b>20%</b>

Notes: Earnings have been normalized for the following items:

1) In Q3/10, a \$4mm (after-tax) reversal of operating expenses related to project cost overruns previously expensed related to the Whistler conversion project.

2) In Q3/11, an \$11mm (after-tax) gain from the Central Vermont Public Service merger termination fee.

Source: Company Reports, TD Securities.

**Outlook****Belize Electricity Update:**

- On October 21, 2011, Fortis initiated actions in the Belize Supreme Court to challenge the expropriation of its investment in Belize Electricity. An independent valuation of Fortis' previous investment in Belize Electricity has been commissioned and Fortis expects to submit its claim to the Government of Belize (GOB) in Q4/11.
- On October 25, 2011, the GOB amended the Constitution of Belize to require majority government ownership of three public utilities, including Belize Electricity, but excluding Fortis' non-regulated Belizean generating assets (BECOL). The Prime Minister of Belize has stated that it is not the GOB's intention to expropriate BECOL.
- At September 30, 2011, the book values of Fortis' investments in Belize Electricity and BECOL were \$120 million and \$159 million, respectively. In addition, Belize Electricity recently had US\$8.0 million of overdue energy purchases outstanding to BECOL. It is our understanding that there are agreements in place such that the GOB guarantees the payment of Belize Electricity's obligations to BECOL.

**Regulatory Updates:**

- FortisBC Energy Companies:** In September 2011, the FortisBC Energy companies filed an update to their 2012-2013 Revenue Requirement Applications. FortisBC Energy Inc.'s application includes forecast average rate bases of \$2,754 million and \$2,811 million for 2012 and 2013, respectively. The FortisBC Energy (Vancouver Island) application includes forecast average rate bases of \$788 million and \$816 million for 2012 and 2013, respectively. The FortisBC Energy (Whistler) application includes forecast average rate bases of \$42 million and \$41 million for 2012 and 2013, respectively.
- FortisOntario:** In September 2011, Algoma Power filed its first Third-Generation IRM application for customer electricity distribution rates, effective January 1, 2012, which maintains the allowed ROE at 9.85% for 2012. During Q4/11, FortisOntario expects to file a Third-Generation IRM application for its operations in Port Colborne and a similar application for its Fort Erie and Gananoque operations, maintaining an allowed ROE at 8.01% for 2012.

**Continued Investment in Utilities:** Management's five-year capital expenditure plan to the end of 2015 has increased by \$0.2 billion to \$5.7 billion. The higher outlook for capital expenditures is largely in the FortisBC Energy companies in Canada, which supports our view that Fortis' growth outlook will be driven by strong utility investment in Canada.

**Q4/11 Preview:** We are forecasting Q4/11 EPS of \$0.47, in-line with Q4/10 results. We expect rate base growth in the Canadian regulated utilities to be offset by lower contribution from the regulated Caribbean utilities and a higher number of shares outstanding.

Source: Thomson, TD Securities.

**Justification of Target Price**

Our \$37.00 target price is predicated on 25% of our 2012 and 75% of our 2013 financial estimates as follows: 1) 25% EV/EBITDA multiple of 10.5x, 2) 25% relative dividend yield of 95%, and 3) 50% free cash flow yield of 7.5%. Our target price also incorporates a 2.75% 10-year Government of Canada bond-yield assumption.

**Key Risks to Target Price**

1) Higher-than-expected long bond yields, 2) operational disruptions, 3) regulatory surprises, 4) unexpected large acquisitions, 5) sovereign risk, and 6) escalating construction costs.

**Investment Conclusion**

The quarter was slightly ahead of our expectations largely related to the timing of operating expenses in the Gas Distribution Utility.

Fortis is the largest investor-owned gas and electric distribution utility in Canada, and, therefore, we view it as a core holding. The Company's future growth is largely driven by utility investment in Canada. However, we believe that Fortis is also well-positioned to make future acquisitions, as any smaller utility the Company might acquire would likely gain the financial backing of a strong parent to help fund its future growth, receive benefits to improve its system reliability and efficiency for customers, and keep its operations autonomous in the Fortis fold. We believe that in the current environment, investors will find the Company's low-risk, utility-dominated business model attractive.

## Fortis Inc.

(FTS-T) C\$33.89

### Q4/11 In-Line; Downgrading to HOLD on Valuation

#### Event

Fortis reported normalized Q4/11 EPS (f.d.) of \$0.46, which was in line with our estimate, recent consensus, and normalized Q4/10 EPS (f.d.) of \$0.47.

#### Impact

#### SLIGHTLY NEGATIVE.

Our 2012 and 2013 EPS (f.d.) estimates decline by \$0.02 and \$0.03, respectively, primarily to reflect lower expected returns from Fortis' non-regulated properties. Our target price declines \$1 to \$35 commensurate with our lower growth outlook.

#### Exhibit 1. Overview of Changes to Estimates

	2010A	2011A	2012E	2013E
EPS (basic)	1.63	1.68	1.69	1.76
EPS (basic) (old)	1.63	1.68	1.73	1.81
EPS (f.d)	1.60	1.67	1.67	1.74
EPS (f.d) (old)	1.60	1.65	1.69	1.77

Dividends per Share (DI)	1.12	1.16	1.20	1.26

Source: Company Reports, TD Securities.

#### Details

**Regulated Gas Utilities** Q4/11 earnings of \$51 million were \$6 million higher than Q4/10 results due to rate base growth from continued utility investments, lower-than-expected taxes and finance charges, and higher gas transportation volumes related to the forestry and mining sectors (Exhibit 2).

**Regulated Electric Utilities – Canadian** Q4/11 earnings of \$42 million increased slightly year over year.

- **FortisAlberta** normalized earnings of \$19 million increased \$2 million versus Q4/10 results as rate base growth from continued utility investments was partially offset by a lower allowed ROE.
- **FortisBC Electric** earnings of \$11 million increased by \$1 million year over year driven by rate base growth, lower-than-expected energy supply costs and increased non-regulated income.

#### Company Profile

Fortis Inc. (FTS-T) is a diversified infrastructure holding company, primarily comprising of gas distribution utilities in B.C. and electric utilities in Canada, Turks and Caicos and the Cayman Islands. Fortis also owns a real estate and hotels subsidiary and has interests in electric generation ventures in Canada and the U.S.

Please see the final pages of this document for important disclosure information.

- **Newfoundland Power** earnings of \$8 million were \$1 million lower year over year. The effects a lower allowed ROE, decreased earnings from a joint-use pole arrangement, higher effective tax rate and higher operating expenses were partially offset by electricity sales growth and lower energy supply costs.
- **Other Canadian Electric Utilities** earnings of \$5 million were \$1 million lower than Q4/10 results. The decrease was due to lower FortisOntario electricity sales, a \$2 million rate of return adjustment at Maritime Electric due to higher-than-expected electricity sales and higher operating expenses.

**Regulated Utilities – Caribbean** earnings of \$3 million were \$2 million lower year over year largely from higher operating expenses at Turks & Caicos related to inflationary pressures and consulting fees associated with ongoing regulatory matters.

**Fortis Generation** earnings of \$5 million were comparable with Q4/10. Lower New York energy prices, decreased interest income and higher business development costs were offset by increased production in Belize.

**Fortis Properties** earnings of \$5 million declined \$2 million versus Q4/10 primarily to reflect higher corporate income taxes partially offset by the incremental contribution from the Hilton Suites Winnipeg Airport hotel, which was acquired in October 2011.

**Corporate** expenses were flat year over year.

#### Exhibit 2. Segmented Earnings Analysis (\$mm unless stated otherwise)

	Q4/11	Q4/10	YOY Change	YOY % Change

Reported EPS (f.d)	\$0.45	\$0.47	(\$0.02)	-4%

Notes: Earnings have been normalized for the following items:

1) (\$1.5) million of earnings in Q4/11 related to a retroactive decision by the AUC in December 2011, which lowered FortisAlberta's allowed ROE to 8.75% from 9.00% for 2011.

Source: Company Reports, TD Securities.

Outlook**Belize Update:**

- **Belize Expropriation Update:** In June 2011, the Government of Belize (GOB) enacted legislation leading to the expropriation of Belize Electricity. The book value of Fortis' investment in Belize Electricity at the end of 2011 was \$106 million. In November 2011, Fortis commissioned an independent valuation of its investment and submitted its claim for compensation to the GOB. The GOB also commissioned an independent valuation and its estimated fair value was significantly below the Fortis' estimate. Fortis continues to pursue alternative options for obtaining fair compensation from the GOB.
- **BECOL Update:** At December 31, 2011, the book value of Fortis' investment in BECOL (non-regulated Belizean generating assets) was \$154 million. In addition, Belize Electricity recently had US\$7.4 million of overdue energy purchases outstanding to BECOL. It is our understanding that there are agreements in place such that the GOB is highly motivated to guarantee the payment of Belize Electricity's obligations to BECOL.

**Regulatory Updates:**

- **BC Generic Cost of Capital Proceeding:** The British Columbia Utilities Commission gave preliminary notice of its intention to initiate a Generic Cost of Capital proceeding in early 2012. Items to be reviewed include: 1) setting an appropriate cost of capital for a low-risk utility, 2) establishing an automatic ROE adjustment mechanism, and 3) establishing deemed capital structure and cost of capital methodology.
- **FortisAlberta:** Fortis and other utilities in Alberta have appealed an element of the regulator's December 2011 cost of capital decision related to the wording around unused assets, asking clarification about treatment of such assets in rate base, which we expect will ultimately be resolved in the utilities' favour (to uphold the regulatory compact).
- **FortisBC Electric:** In November 2011, the FortisBC Electric filed an updated 2012-2013 Revenue Requirement, which includes forecast average rate bases of \$1,146 million and \$1,215 million for 2012 and 2013, respectively.
- **Newfoundland Power:** In November 2011 the utility's allowed 2012 ROE was calculated to be 7.85% under the automatic adjustment formula, down from 8.38% in 2011. Use of the automatic formula has been suspended and a full cost of capital review is expected in 2012.

**Strong Capital Program:** In 2012, management expects capital expenditures of approximately \$1.3 billion. The company's five-year plan (2012-2016) forecasts gross capital expenditures of \$5.5 billion. Of this amount, 63% is expected to be related to regulated electric utilities, 23% to regulated gas utilities and 13% to non-regulated operations. The strong outlook for capital expenditures supports our view that Fortis' growth outlook will be driven by utility investment in Canada.

**Q1/12 Preview:** We are forecasting Q1/12 EPS of \$0.64, in line with Q1/11 results. We expect rate base growth in the Canadian regulated utilities to be offset by a higher number of shares outstanding.

Source: Thomson, TD Securities.

**Justification of Target Price**

Our \$35.00 target price is predicated on our 2013 financial estimates as follows: 1) 25% EV/EBITDA multiple of 10.5x, 2) 25% relative dividend yield of 125%, and 3) 50% free cash flow yield of 7.5%. Our target price also incorporates a 2.5% 10-year Government of Canada bond-yield assumption.

**Key Risks to Target Price**

1) Higher-than-expected long bond yields, 2) operational disruptions, 3) regulatory surprises, 4) unexpected large acquisitions, 5) sovereign risk, and 6) escalating construction costs.

**Investment Conclusion**

The quarter was largely in line with our expectations as stronger-than-expected Canadian Utilities earnings were offset by a weaker Properties contribution. During 2012, we expect Fortis to continue to benefit from strong growth from its regulated utilities, partially offset by continued Properties weakness.

Fortis is the largest investor-owned gas and electric distribution utility in Canada, and, therefore, we view it as a core holding. We expect the company's future growth to be largely driven by utility investment in Canada. However, we believe that Fortis is also well-positioned to make future acquisitions, as any smaller utility the company might acquire is likely gain the financial backing of a strong parent to help fund its future growth, and receive benefits to improve its system reliability and efficiency for customers. We believe that in the current environment, investors will find the company's low-risk, utility-dominated business model attractive. Given the relatively less compelling potential returns versus other investments in the sector, we are downgrading the shares to HOLD.

**(FTS-T) C\$32.38****Fortis Enters into Agreement to Acquire CH Energy****Event**

Fortis has entered into an agreement to acquire CH Energy Group (CHG-N) for US\$65.00 per common share in cash, for an aggregate purchase price of US\$1.5 billion, including the assumption of approximately US\$500 million of debt.

**Impact****POSITIVE.**

The acquisition is expected to be immediately accretive to Fortis' EPS (excluding one-time transaction costs of \$20 million-\$25 million). We calculate the acquisition to be approximately \$0.04 accretive to EPS on an annual basis, assuming that it is ultimately financed with approximately \$150 million of preferred shares, \$450 million of common equity and the remainder with debt. We have updated our financial model to assume the transaction closes at the end of February 2013 and to reflect other fine-tuning. (Exhibit 1). We note that our 2013 free cash flow estimate declines to reflect the on-time transactions costs associated with the acquisition. While we believe that this will add ballpark a dollar of value to Fortis' shares, this is dependent on the outcome of the regulatory approval process (e.g. concessions made to customers) and assumes no competing bids surface.

**Please see the final pages of this document for important disclosure information.**

**Company Profile**

Fortis Inc. (FTS-T) is a diversified infrastructure holding company, primarily comprising of gas distribution utilities in B.C. and electric utilities in Canada, Turks and Caicos and the Cayman Islands. Fortis also owns a real estate and hotels subsidiary and has interests in electric generation ventures in Canada and the U.S.

Details

- **Description:** CH Energy's main business (93% of total assets, 97% of 2011 net income) is a regulated transmission and distribution (T&D) utility, Central Hudson, serving approximately 300,000 electric and 75,000 natural gas customers in New York State's Mid-Hudson River Valley region. CH Energy also has a non-regulated subsidiary primarily involved in fuel delivery to 56,000 customers in the Mid-Atlantic Region.
- **Acquisition Price Appears Reasonable:** The US\$65.00 per share offer represents an approximate 10.5% premium above CH Energy's closing price on February 17, a 13% premium above the 20-day average share price of US\$57.49, and approximately 10.4x 2011 EBITDA. On a 2013E basis, we calculate the EV/EBITDA to be 9.4x, P/E to be 19.4x and price-to-total rate base to be 1.5x.
- **Timing:** Fortis expects to close the acquisition within 12 months.
- **Competing Offers Possible, but Unlikely:** The merger agreement was a result of negotiations, rather than an auction process. Given what we view to be a fair price, we do not expect any higher competing offers. We note, however, that CH Energy shares have traded through the offer price. The transaction includes a break fee of US\$19.7 million (US\$1.32 per CHG share) plus expenses that are capped at US\$4 million (US\$0.27 per CHG share).
- **Financing:** Fortis expects to use its multi-year committed credit facility to finance the purchase in the short term. Long term, Management intends to finance the acquisition consistent with the corporation's current capital structure.
- **Favourable Regulatory Environment:** Central Hudson is regulated by the New York Public Service Commission (NYPSC) under a traditional cost of service model. Current rates are based on a three-year settlement, expiring mid-2013 that includes an allowed rate of return on common equity of 10% and an equity thickness of 48%.
- **Rate Base Growth:** Management expects annual capital expenditures to exceed US\$100 million on average through 2016, which should result in rate base and earnings growth, in our view.
- **Regulatory approval risk Appears Low:** The transaction is subject to the receipt of approvals from CH Energy shareholders, the NYPSC, the U.S. FERC and Hart-Scott-Rodino, as well as customary closing conditions. We expect the NYPSC to approve the acquisition given Fortis' reputation and track record of successful utility acquisitions, and the potential customer benefits that could include any or all of the following: offsetting or deferring future rate increases, enhancing the quality of service to customers or making that service more affordable. Fortis will operate CH Energy as a standalone utility, keep the headquarters in Poughkeepsie, NY, and is also committed to maintaining existing wages and benefits to CH Energy employees.
- **Significant Strategic Thrust into U.S.:** We view the foray into the U.S. Northeast positively as it furthers Fortis' strategy of entering into the U.S. regulated electric and gas distribution business with what we view to be a good sized utility (material in size but not too large). Fortis has been looking for U.S. acquisitions for a number of years. We note that the company has a successful track record in acquiring utilities including Aquila Canada for \$1.5 billion in 2004 and Terasen Gas for \$3.7 billion in 2007.

Source: Thomson, TD Securities.

**Justification of Target Price**

Our \$35.00 target price is predicated on our 2013 financial estimates as follows: 1) 25% EV/EBITDA multiple of 10.5x, 2) 25% relative dividend yield of 125%, and 3) 50% free cash flow yield of 7.5%. Our target price also incorporates a 2.5% 10-year Government of Canada bond-yield assumption.

**Key Risks to Target Price**

1) Higher-than-expected long-bond yields, 2) operational disruptions, 3) regulatory surprises, 4) unexpected large acquisitions, 5) sovereign risk, and 6) escalating construction costs.

**Investment Conclusion**

If successful, we view the CH Energy acquisition positively as we believe that it will be mutually beneficial for both companies. The transaction should provide Fortis with a source of stable, regulated earnings, in a favourable regulatory jurisdiction with the potential to expand the company's footprint into the U.S. Northeast. CH Energy is expected to gain the financial backing of a strong parent to help fund its future growth, benefit from sharing of best practices across the Fortis group of utilities, and keep its operations autonomous in the Fortis fold.

Fortis is the largest investor-owned gas and electric distribution utility in Canada, and, therefore, we view it as a core holding. We expect the company's future growth to be largely driven by utility investment in Canada. However, we believe that Fortis is also well-positioned to make future acquisitions, as any smaller utility the company might acquire is likely gain the financial backing of a strong parent to help fund its future growth, and receive benefits to improve its system reliability and efficiency for customers. We believe that in the current environment, investors will find the company's low-risk, utility-dominated business model attractive.

## Fortis Inc.

(FTS-T) C\$34.55

### Q1 Results In-Line With Expectations; Upgrading to BUY

**Event**

Fortis reported normalized Q1/12 EPS (f.d.) of \$0.64, in line with our \$0.64 estimate and Q1/11 EPS (f.d.) of \$0.64 but slightly below recent consensus estimates of \$0.66.

**Impact****SLIGHTLY POSITIVE.**

We have updated our model and our estimates remain largely unchanged. Effective Q1/12, Fortis also began reporting under U.S. GAAP. The adoption of U.S. GAAP does not materially change our earnings estimates.

We are also rolling forward our target price to be based 75% on our 2013 and 25% on our 2014 estimates and, as a result, we are increasing our target by \$2 to \$37. Given the implied total returns to our target, we are upgrading the stock to BUY (from Hold).

**Details**

**Regulated Gas Utilities** Q1/12 earnings of \$82 million were \$7 million higher than Q1/11 results, largely due to rate base growth from utility investments, and higher gas transportation volumes to both the forestry and mining industries (Exhibit 2).

**Company Profile**

Fortis Inc. (FTS-T) is a diversified infrastructure holding company, primarily comprising of gas distribution utilities in B.C. and electric utilities in Canada, Turks and Caicos and the Cayman Islands. Fortis also owns a real estate and hotels subsidiary and has interests in electric generation ventures in Canada and the U.S.

**Regulated Electric Utilities – Canadian** Q1/12 earnings of \$51 million were comparable year over year.

- **FortisAlberta** earnings of \$21 million increased by \$1 million versus Q1/11 results as rate base growth from utility investments was partially offset by decreased energy consumption by residential customers and a lower allowed ROE.
- **FortisBC Electric** earnings of \$16 million decreased by \$3 million year over year, largely due to the expiration of the performance-based rate-setting (PBR) mechanism in December 2011. The decline was partially offset by rate base growth.
- **Newfoundland Power** earnings of \$7 million were \$1 million higher year over year as a result of increased electricity sales and lower effective income taxes. The increase was partially offset by decreased earnings from a joint-use pole arrangement that ended in October 2011.
- **Other Canadian Electric Utilities** earnings of \$7 million were \$1 million higher than Q1/11 results, largely from lower effective income taxes and increased electricity sales in PEI.

**Regulated Utilities – Caribbean** earnings of \$3 million were \$1 million lower year over year, largely from the expropriation of Belize Electricity.

**Fortis Generation** earnings of \$5 million were \$2 million higher year over year due to increased generation in Belize resulting from higher rainfall.

**Fortis Properties** earnings of \$1 million were comparable year over year.

**Corporate and Other** expenses decreased by \$2 million year over year, primarily due to increased capitalized interest related to the Waneta Expansion.

**Exhibit 2. Segmented Earnings Analysis (\$mm unless stated otherwise)**

Notes: Earnings have been normalized for the following items:

1) Q1/11 excludes a \$1.0 million gain related to the sale of property.

2) Q1/11 excludes a \$0.5 million gain related to the sale of the Viking Mall in Newfoundland.

3) Q1/12 excludes \$4.0 million of costs related to the pending CH Energy acquisition.

Source: Company Reports, TD Securities.

Outlook**Regulatory Updates:**

- **B.C. Generic Cost of Capital Proceeding:** The British Columbia Utilities Commission gave a final notice of the items to be reviewed in the Generic Cost of Capital proceeding, which include 1) setting an appropriate cost of capital for a low-risk utility, including capital structure, ROE and debt interest; 2) establishing whether an automatic ROE adjustment mechanism is warranted; and 3) establishing a generic methodology for each utility's cost of capital in reference to the benchmark low-risk utility.
- **FortisAlberta:** In April 2012 the AUC approved a negotiated settlement with respect to 2012 distribution revenue requirements using a forecast mid-year rate base of \$2.025 billion. The discussions regarding the PBR initiative for utilities in Alberta continues and a decision is expected by year-end.
- **Newfoundland Power:** In March 2012 Newfoundland Power filed a cost of capital application to discontinue the use of the current ROE adjustment mechanism and to approve a reasonable rate of return on rate base for 2012. A public hearing on the application is scheduled for June 2012.

**CH Energy Update:** In April 2012, applications were filed with the New York State Public Service Commission and FERC seeking approval of Fortis' acquisition of CH Energy. The CH Energy Group shareholder vote on the transaction is expected to occur in mid-2012, and management expects to close the acquisition by the end of Q1/13.

**Organic Capital Program Remains Unchanged:** In 2012, management expects gross capital expenditures of approximately \$1.3 billion. The company's five-year plan (2012-2016) forecasts gross capital expenditures of \$5.5 billion. Of this amount, 64% is expected to be related to regulated electric utilities, 23% to regulated gas utilities, and 13% to non-regulated operations. The B.C. Waneta Expansion project remains on track and has completed the intake, powerhouse, and power tunnel construction with \$290 million spent to date.

**Publishing Our 2014 Estimates and Q2/12 Preview:** Our 2014 EPS (f.d.) estimate increases by \$0.07 year over year to \$1.86, largely due to growth at the Canadian regulated utilities in addition to a full-year contribution from CH Energy. We are also forecasting Q2/12 EPS of \$0.33, in line with Q2/11 results. We expect rate base growth in the Canadian regulated utilities to be offset by the expiration of the PBR mechanism at FortisBC Electric and a higher number of shares outstanding.

Source: Thomson, TD Securities.

**Justification of Target Price**

Our \$37.00 target price is predicated 75% on our 2013 and 25% on our 2014 financial estimates as follows: 1) 25% EV/EBITDA multiple of 10.5x, 2) 25% relative dividend yield of 125%, and 3) 50% free cash flow yield of 7.5%. Our target price also incorporates a 2.5% 10-year Government of Canada bond yield assumption.

**Key Risks to Target Price**

1) higher-than-expected long bond yields, 2) operational disruptions, 3) regulatory surprises, 4) unexpected large acquisitions, 5) sovereign risk, 6) escalating construction costs, and 7) access to capital markets.

**Investment Conclusion**

Going forward, we view the pending CH Energy acquisition positively as we believe that it will be mutually beneficial for both companies if successful. The transaction should provide Fortis with a source of stable, regulated earnings, in a favourable regulatory jurisdiction, with the potential to expand the company's footprint into the U.S. Northeast. CH Energy is expected to gain the financial backing of a strong parent to help fund its future growth, benefit from sharing of best practices across the Fortis group of utilities, and keep its operations autonomous in the Fortis fold.

Fortis is the largest investor-owned gas and electric distribution utility in Canada and, therefore, we view it as a core holding. We expect the company's future growth to be largely driven by utility investment in Canada. However, we believe that Fortis is also well-positioned to make future acquisitions, as any smaller utility the company might acquire is likely gain the financial backing of a strong parent to fund its future growth, and receive benefits to improve its system reliability and efficiency for customers. We believe that in the current environment investors will find the company's low-risk, utility-dominated business model attractive, and given the total potential returns to our target, we are upgrading the stock to BUY.

## TD Securities Equity Research Disclosures

Company	Ticker	Disclosures
Fortis Inc.	FTS-T	1,2, 4, 9, 10

1. TD Securities Inc., TD Securities (USA) LLC or an affiliated company has managed or co-managed a public offering of securities within the last 12 months with respect to the subject company.
2. TD Securities Inc., TD Securities (USA) LLC or an affiliated company has received compensation for investment banking services within the last 12 months with respect to the subject company.
3. TD Securities Inc., TD Securities (USA) LLC or an affiliated company expects to receive compensation for investment banking services within the next three months with respect to the subject company.
4. TD Securities Inc. or TD Securities (USA) LLC has provided investment banking services within the last 12 months with respect to the subject company.
5. A long position in the securities of the subject company is held by the research analyst, by a member of the research analyst's household, or in an account over which the research analyst has discretion or control.
6. A short position in the securities of the subject company is held by the research analyst, by a member of the research analyst's household, or in an account over which the research analyst has discretion or control.
7. A long position in the derivative securities of the subject company is held by the research analyst, by a member of the research analyst's household, or in an account over which the research analyst has discretion or control.

## Distribution of Research Ratings

Investment Banking Services Provided<sup>B</sup>

Current as of April 3, 2012

<sup>A</sup> Percentage of subject companies under each rating category—BUY (covering Action List BUY, BUY and Spec. BUY ratings), HOLD and REDUCE (covering TENDER and REDUCE ratings).

<sup>B</sup> Percentage of subject companies within each of the three categories (BUY, HOLD and REDUCE) for which TD Securities Inc. has provided investment banking services within the last 12 months.

## Research Dissemination Policy

TD Securities makes its research products available in electronic and/or printed formats and simultaneously distributes them to its institutional clients who are entitled to receive them. The Action Notes are distributed by email, and are available in PDF form on First Call, Bloomberg, Reuters, Capital IQ, FactSet and TheMarkets.Com. Research Reports are distributed by email; they are also printed and distributed by courier to our entitled clients. PDFs of Reports are available on First Call, Bloomberg and Reuters. All research is available by password to entitled institutional clients at <https://www.tdsresearch.com/equities>

**Research Ratings**

**ACTION LIST BUY:** The stock's total return is expected to exceed a minimum of 15%, on a risk-adjusted basis, over the next 12 months and it is a top pick in the Analyst's sector.

**BUY:** The stock's total return is expected to exceed a minimum of 15%, on a risk-adjusted basis, over the next 12 months.

**SPECULATIVE BUY:** The stock's total return is expected to exceed 30% over the next 12 months; however, there is material event risk associated with the investment that could result in significant loss.

**HOLD:** The stock's total return is expected to be between 0% and 15%, on a risk-adjusted basis, over the next 12 months.

**TENDER:** Investors are advised to tender their shares to a specific offer for the company's securities or to support a proposed combination reflecting our view that a superior offer is not forthcoming.

**REDUCE:** The stock's total return is expected to be negative over the next 12 months.

**Overall Risk Rating in order of increasing risk:** Low (6.7% of coverage universe), Medium (31.5%), High (49.4%), Speculative (12.4%)

**Analyst Certification**

Each analyst of TD Securities Inc. whose name appears on page 1 of this research report hereby certifies that (i) the recommendations and opinions expressed in the research report accurately reflect the research analyst's personal views about any and all of the securities or issuers discussed herein that are within the analyst's coverage universe and (ii) no part of the research analyst's compensation was, is, or will be, directly or indirectly, related to the provision of specific recommendations or views expressed by the research analyst in the research report.

**(FTS-T) C\$32.14****Resuming Coverage Post Sub Receipt Offering****Event**

- We are resuming coverage of Fortis Inc. following the close of an 18.5 million subscription receipt offering for gross proceeds of \$601 million.
- On June 19, 2012, CH Energy Group (CH Energy) shareholders voted 92% in favour of the acquisition of the company by Fortis for US\$65.00 per common share in cash (US\$1.5 billion in aggregate).

For additional details on the CH Energy acquisition, please refer to our February 22, 2012, Action Note titled, "**Fortis Enters into Agreement to Acquire CH Energy**".

**Impact****SLIGHTLY POSITIVE.**

We view both the subscription receipt closing and the CH Energy shareholder approval as positive steps towards closing the acquisition. Given the recent volatility in the capital markets, we believe that the use of subscription receipts reduces the financing risk associated with the acquisition. However, the offering was slightly larger than we were modeling and as a result our 2013 forecasts decline slightly, partially offset by a positive regulatory decision at Newfoundland Power, which saw its regulated ROE increase slightly to 8.80% (from 8.38%).

**Company Profile**

Fortis Inc. (FTS-T) is a diversified infrastructure holding company, primarily comprising of gas distribution utilities in B.C. and electric utilities in Canada, Turks and Caicos and the Cayman Islands. Fortis also owns a real estate and hotels subsidiary and has interests in electric generation ventures in Canada and the U.S.

**Please see the final pages of this document for important disclosure information.**

**Details**

- **Approvals and Timing:** Regulatory approval is required from the New York State Public Service Commission (NYPSC), the U.S. FERC, and Hart-Scott-Rodino. In April 2012, Fortis and Central Hudson (the regulated electric utility owned by CH Energy) filed a joint petition to launch the regulatory review for approval of the acquisition. We expect the NYPSC to approve the acquisition given Fortis' reputation and track record of successful utility acquisitions, and the potential for customer benefits. The acquisition is expected to close by the end of Q1/13.
- **Favourable Regulatory Environment:** Central Hudson is regulated by the NYPSC under a traditional cost of service model. Current rates are based on a three-year settlement, expiring mid-2013 that includes an allowed ROE of 10% and an equity thickness of 48%. In our view, this compares favourably with Fortis' other large utilities as CH Energy offers slightly higher returns with a similar risk profile (Exhibit 2). CH Energy also has favourable regulatory mechanisms similar to those of Fortis' other large utilities (Exhibit 3).

**Exhibit 2. Comparison of Fortis' Large Utilities**

Utility	Customers (#000s) <sup>1</sup>	Rate Base (\$B) <sup>2</sup>	2012 Equity Thickness (%)	2012 Allowed ROE (%)
FortisBC Energy	939	3.6	40%	9.50% <sup>3</sup>
FortisBC (Electric)	162	1.1	40%	9.90%
FortisAlberta	501	2.0	41%	8.75%
Newfoundland Power	248	0.9	45%	8.80%
<b>Central Hudson<sup>4</sup></b>	<b>375</b>	<b>1.0</b>	<b>48%</b>	<b>10.00%</b>

Notes:

1) As at March 31, 2012.

2) Forecast mid-year 2012.

3) ROE is for FortisBC Energy Inc. ROE for FortisBC Energy (Vancouver Island) Inc. and FortisBC Energy (Whistler) Inc. is 50 bps higher.

4) CHEG acquisition announced on February 21, 2012. CHEG owns Central Hudson Gas &amp; Electric. Transaction is expected to close by March 31, 2013.

Notes:

1) CHEG acquisition announced on February 21, 2012. CHEG owns Central Hudson Gas &amp; Electric. Transaction is expected to close by March 31, 2013.

2) Deferral for future recovery from (refund to) customers of certain variances between actual and that forecast for rate setting.

3) Majority of power requirements met through the utility's own generation and long-term fixed-price contracts.

4) FortisBC Electric has requested commodity/energy supply cost and sales variance trackers for 2012 and 2013, subject to regulator approval.

5) Distribution utility only. No commodity or purchase power exposure.

6) Primarily has defined contribution pension plan.

Source: Company Reports, TD Securities.

- **Significant Strategic Thrust into the U.S.:** We view the pending foray into the U.S. Northeast as positive as it would further Fortis' strategy of entering into the U.S. regulated electric and gas distribution business with what we view to be a good-sized utility. Fortis has been looking for U.S. acquisitions for a number of years and we believe management has been disciplined in the process. For example, Fortis walked away from Central Vermont Public Service back in 2011 instead of increasing its original bid for the utility. We note that the company has a successful track record of acquiring utilities including Aquila Canada for \$1.5 billion in 2004 and Terasen Gas for \$3.7 billion in 2007.
- **Description of CH Energy Group:** CH Energy's main business (93% of total assets, 97% of 2011 net income) is a regulated transmission and distribution utility, Central Hudson, serving approximately 300,000 electric and 75,000 natural gas customers in New York State's Mid-Hudson River Valley region. CH Energy also has a non-regulated subsidiary primarily involved in fuel delivery to 56,000 customers in the Mid-Atlantic Region.

### Outlook

- **Highest Degree of Regulation and Lowest Risk Large-Cap Name in our Sector:** We expect Fortis will continue to have the highest degree of regulation of other power and utility companies under our coverage and we view it as the lowest risk, best defensive large-cap play in our universe (Exhibit 4).

### Exhibit 4. Degree of Regulation and Business Mix

	Fortis	ATCO	Canadian Utilities	Capital Power	Emera	TransAlta	Average
<b>Degree of Regulation</b>							
High	89%	39%	53%		62%		41%
Loose		12%	16%	36%	32%	13%	18%
Unregulated	11%	49%	31%	64%	6%	87%	41%
<b>Business Mix</b>							
Long-Haul Oil Transmission							
Long-Haul Natural Gas Transmission		7%	10%		11%		5%
Natural Gas Distribution	34%	11%	15%				10%
Electricity Transmission & Distribution	55%	21%	28%		73%		30%
Power Generation	5%	24%	33%	99%	12%	85%	43%
Oil Related Midstream							
Natural Gas Related Midstream		3%	4%				1%
Marketing and Other	6%	33%	10%	1%	4%	15%	12%

Notes:

1) Degree of regulation and business mix percentages are based off 2011A data, except for Fortis, which is based off 2013E.

2) ATCO and Canadian Utilities' debt values are adjusted for the companies' large cash balances.

Source: Company Reports, TD Securities.

- **Steady EPS and DPS Growth; No Further Need for Common Equity:** We are forecasting mid-single digit EPS and dividend per share CAGRs out to the end of 2014, largely on the back of rate base growth at the regulated utilities and the CH Energy acquisition. We believe Fortis could raise approximately \$250 million of preferred shares but we do not forecast any additional common equity financings out to 2015 (Exhibits 5-8).
- **Continued Appetite for Acquisitions:** We believe that Fortis' management will remain acquisitive and will continue to look at utility acquisitions. Our understanding is that there are some European based utility owners in New York and given the uncertainty surrounding the current situation in Europe, there is the possibility for these European players to shed assets in order to raise capital and strengthen their balance sheets. We believe that Fortis would be a potential bidder for any asset divestitures by these entities. That being said, given Fortis' utility acquisition strategy of keeping its subsidiaries autonomous and self-functioning, we believe that Fortis has the capability to acquire regulated utilities throughout the U.S. and would not limit itself to existing regions.

**Justification of Target Price**

Our \$37.00 target price is predicated 75% on our 2013 and 25% on our 2014 financial estimates as follows: 1) 25% EV/EBITDA multiple of 10.5x, 2) 25% relative dividend yield of 125%, and 3) 50% free cash flow yield of 7.5%. Our target price also incorporates a 2.5% 10-year Government of Canada bond yield assumption.

**Key Risks to Target Price**

1) Higher-than-expected long bond yields, 2) operational disruptions, 3) regulatory surprises, 4) unexpected large acquisitions, 5) sovereign risk, 6) escalating construction costs, 7) closing of pending acquisitions, and 8) access to capital markets.

**Investment Conclusion**

Going forward, we view the pending CH Energy acquisition positively as we believe that it will be mutually beneficial for both companies if successful. The transaction should provide Fortis with a source of stable, regulated earnings, in a favourable regulatory jurisdiction, with the potential to expand the company's footprint into the U.S. Northeast. CH Energy is expected to gain the financial backing of a strong parent to help fund its future growth, benefit from sharing of best practices across the Fortis group of utilities, realize customer benefits while maintaining steady rates, and keep its operations autonomous within Fortis.

Fortis is the largest highly-regulated investor-owned gas and electric distribution utility in Canada and, therefore, we view it as a core holding. We expect the company's future growth to be largely driven by utility investment in Canada. However, we believe that Fortis is also well-positioned to make future acquisitions, as any smaller utility the company might acquire is likely to gain the financial backing of a strong parent to fund its future growth, and receive benefits to improve its system reliability and efficiency for customers. We believe that in the current environment investors will find the company's low-risk, utility-dominated business model attractive, and given the total potential returns to our target, we reiterate our BUY recommendation.

[avery.haw@tdsecurities.com](mailto:avery.haw@tdsecurities.com)**Fortis Inc.**  
**(FTS-T) C\$33.41****Solid Q2; CH Energy Acquisition Remains On Track****Event**

Fortis reported adjusted Q2/12 EPS (f.d.) of \$0.34, slightly above our \$0.33 estimate, recent consensus and Q2/11 EPS (f.d.).

**Impact****NEUTRAL.**

We have revised our estimates slightly to reflect various regulatory updates and financing assumptions. We are rolling forward our target price to be based 50% on each of our 2013 and 2014 estimates. Our target remains \$37.

**Details****Regulated Gas Utilities** Q2/12 earnings of \$13 million declined by \$2 million year over year, largely due to lower-than-expected customer additions and decreased capitalized allowance for funds used during construction (AFUDC) from a lower capital program in 2012.**Regulated Electric Utilities – Canadian** Q2/12 earnings of \$52 million were \$9 million higher year over year.

- **FortisAlberta** earnings of \$26 million increased by \$8 million versus Q2/11 results, largely due to rate base growth from utility investments along with higher transmission revenue and lower depreciation deemed by the regulator. The increase was partially offset by a lower allowed ROE.
- **FortisBC Electric** earnings of \$9 million were comparable year over year, as the expiration of the performance-based rate-setting (PBR) mechanism in December 2011 and lower capitalized AFUDC were offset by rate base growth.
- **Newfoundland Power** earnings of \$12 million were \$2 million higher year over year, largely a result of lower effective income taxes and a higher allowed ROE. The increase was partially offset by lower earnings from a joint-use pole arrangement that ended in October 2011 and increased depreciation from new investments.
- **Other Canadian Electric Utilities** earnings of \$5 million were \$1 million lower than Q2/11 results, mainly from increased operating expenses at FortisOntario resulting from higher employee-related costs and timing of expenses.

**Company Profile**

Fortis Inc. (FTS-T) is a diversified infrastructure holding company, primarily comprising of gas distribution utilities in B.C. and electric utilities in Canada, Turks and Caicos and the Cayman Islands. Fortis also owns a real estate and hotels subsidiary and has interests in electric generation ventures in Canada and the U.S.

**Please see the final pages of this document for important disclosure information.**

**Regulated Utilities – Caribbean** earnings of \$6 million were in line with Q2/11 results.

**Fortis Generation** earnings of \$5 million were \$3 million higher year over, largely due to increased generation in Belize resulting from higher rainfall.

**Fortis Properties** earnings of \$8 million were comparable year over year.

**Corporate and Other** expenses increased by \$2 million year over year, largely due to lower income tax recovery in Q2/12.

Outlook**Regulatory Updates:**

- **B.C. Generic Cost of Capital Hearing:** The evidence portion of the proceeding will take place through to early-December 2012 with a potential oral hearing starting December 12, 2012. A decision is expected in early-2013. As a reminder, the British Columbia Utilities Commission gave a final notice of the items to be reviewed in the Generic Cost of Capital proceeding, which included 1) setting an appropriate cost of capital for a low-risk utility, including capital structure, ROE and debt interest; 2) establishing whether an automatic ROE adjustment mechanism is warranted; and 3) establishing a generic methodology for each utility's cost of capital in reference to the benchmark low-risk utility.
- **FortisAlberta:** In April 2012 the AUC approved a negotiated settlement with respect to 2012 distribution revenue requirements using a forecast mid-year rate base of \$2.025 billion. The discussions regarding the PBR initiative for distribution utilities in Alberta continues and a decision is expected in Q4/12.
- **Newfoundland Power:** In June 2012 Newfoundland Power received a positive regulatory decision, which saw its regulated ROE increase slightly to 8.80% from 8.38% for 2011. However, the regulator has requested that Newfoundland Power file a General Rate Application for 2013, which it will do in Q3/12.

**Acquisition and CH Energy Updates:**

- FortisBC Electric is in preliminary discussion to purchase the City of Kelowna's electricity distribution utility for approximately \$50 million-60 million. The utility serves 15,000 customers and FortisBC Electric has operated and maintained the assets since 2000. Both parties are working towards a close by the end of Q1/13.
- In July 2012 Fortis received regulatory approval for the CH Energy acquisition from the Federal Energy Regulatory Commission and the Committee on Foreign Investment in the U.S. Currently, the New York State Public Service Commission is reviewing the jointly filed Fortis and CH Energy application, and management remains on track to close the acquisition by the end of Q1/13.

**Organic Capital Program Remains Unchanged:** In 2012 management expects gross capital expenditures of approximately \$1.3 billion. The company's five-year plan (2012-2016) forecasts gross capital expenditures of \$5.5 billion. Of this amount, 65% is expected to be related to regulated electric utilities, 21% to regulated gas utilities, and 14% to non-regulated operations. The \$900-million B.C. Waneta Expansion project remains on schedule and on budget, with the excavation of the intake, powerhouse and power tunnel complete. Approximately \$345 million has been spent to date.

**Q3/12 Preview:** We are forecasting Q3/12 EPS of \$0.26, slightly above Q3/11 results. We expect rate base growth in the Canadian regulated utilities to offset the expiration of the PBR mechanism at FortisBC Electric and a higher number of shares outstanding.

Source: Thomson, TD Securities.

**Justification of Target Price**

Our \$37.00 target price is predicated 50% on each of our 2013 and 2014 financial estimates as follows: 1) 25% EV/EBITDA multiple of 11.0x, 2) 25% relative dividend yield of 125%, and 3) 50% free cash flow yield of 7.5%. Our target price also incorporates a 2.5% 10-year Government of Canada bond yield assumption.

**Key Risks to Target Price**

1) higher-than-expected long bond yields, 2) operational disruptions, 3) regulatory surprises, 4) unexpected large acquisitions, 5) sovereign risk, 6) escalating construction costs, and 7) access to capital markets.

**Investment Conclusion**

Fortis is the largest highly-regulated investor-owned gas and electric distribution utility in Canada. The pending CH Energy transaction should also provide Fortis with a source of stable and regulated earnings in a favourable regulatory jurisdiction, with the potential to expand the company's footprint into the U.S. Northeast.

We expect Fortis' future growth to be largely driven by utility investment in Canada. However, we believe that the company is also well-positioned to make future acquisitions, as any smaller utility it might acquire is likely to gain the financial backing of a strong parent to fund its future growth, and receive benefits to improve its system reliability and efficiency for customers. We believe that in the current environment investors will find Fortis' low-risk, utility-dominated business model attractive and, given the total potential returns to our target, we reiterate our BUY recommendation. We view it as a core holding in the sector.

[avery.haw@tdsecurities.com](mailto:avery.haw@tdsecurities.com)**Fortis Inc.**  
**(FTS-T) C\$33.90****Q3 Results a Bit Soft, Partially Due to Timing****Event**

Fortis reported adjusted Q3/12 EPS (f.d.) of \$0.24, slightly below our and consensus estimate of \$0.26, and Q3/11 EPS (f.d.) of \$0.25.

**Impact****NEUTRAL.**

Our forecasts have been updated to reflect several factors, including softer contributions from the regulated Caribbean utilities and Real Estate. We are rolling our target price forward by a quarter to be 75% based off our 2014 forecasts.

**Details****FortisBC Energy** Q3/12 loss of \$6 million increased \$3 million year over year – primarily due to the timing of recognition of revenue and certain expenses as well as lower allowance for funds used during construction, and lower-than-expected customer additions in 2012. This was partially offset by higher gas transportation volumes to industrial customers and the timing of O&M expenses.**Regulated Electric Utilities – Canadian** Q3/12 earnings of \$54 million were \$11 million higher year over year.

- **FortisAlberta** earnings of \$26 million grew \$7 million year over year due to a positive regulatory decision in April 2012, rate base growth and some timing of operating expenses, partially offset by a lower ROE.
- **FortisBC Electric** earnings of \$13 million grew \$3 million year over year, benefiting from rate base growth, higher pole-attachment revenue and lower financing charges.
- **Newfoundland Power** earnings of \$9 million increased from \$8 million in Q3/11 due to a combination of lower effective income taxes, higher allowed ROE and electricity sales growth, partially offset by the sale of joint-use poles with Bell Alliant in October 2011, O&M costs from Tropical Storm Leslie and higher depreciation expense.
- **Other Canadian Electric Utilities** earnings of \$6 million were flat year over year.

**Company Profile**

Fortis Inc. (FTS-T) is a diversified infrastructure holding company, primarily comprising of gas distribution utilities in B.C. and electric utilities in Canada, Turks and Caicos and the Cayman Islands. Fortis also owns a real estate and hotels subsidiary and has interests in electric generation ventures in Canada and the U.S.

**Please see the final pages of this document for important disclosure information.**

**Regulated Utilities – Caribbean** earnings of \$6 million were flat versus Q3/11 results, as lower finance charges at Caribbean Utilities and increased electricity sales at Fortis Turks and Caicos were offset by higher expenses at Turks and Caicos and decreased electricity sales at Caribbean Utilities.

**Fortis Generation** earnings of \$5 million declined \$3 million year over year, primarily due to lower rainfall affecting production in Belize.

**Fortis Properties** earnings of \$8 million declined \$1 million year over year as a result of decreased occupancy at hotel operations in Atlantic and Central Canada, as well as higher depreciation from capital additions. This was partially offset by a contribution from the Hilton Suites Hotel, which was acquired in October 2011. Excluding the impact of this acquisition, RevPAR in the Hospitality Division was \$80.80 year to date, up 0.3% year over year – driven by a 1.7% increase in average daily room rate, partially offset by a 1.4% decrease in hotel occupancy.

#### Exhibit 1. Segmented Earnings (\$mm unless stated otherwise)

<b>Reported EPS (f.d)</b>	<b>\$0.24</b>	<b>\$0.31</b>	<b>(\$0.07)</b>	<b>-23%</b>

Notes: Earnings have been normalized for the following items:

1) \$0.5mm of costs (after-tax) incurred in Q3/12 related to the pending CH Energy acquisition.

2) \$11mm (after-tax) gain in Q3/11 related to the CVPS merger termination fee.

**Outlook****Acquisition and Construction Updates:**

- **CH Energy:** It appears that Fortis' US\$1.5-billion acquisition of CH Energy is on track for a closing prior to the end of Q1/13. In July 2012, the FERC and Committee on Foreign Investments in U.S. approved the transaction. Another condition necessary to close the transaction was met in October 2012, when the waiting period under the Hart-Scott-Rodino Antitrust Improvements Act of 1976 expired. The main pending regulatory approval is from the New York Public Service Commission. For a complete discussion about CH Energy, please see our company note dated June 28, 2012 titled *Resuming Coverage Post Sub Receipt Offering* and our February 22, 2012 note titled *Fortis Enters into Agreement to Acquire CH Energy*.
- **Waneta Expansion on Track:** Approximately \$380 million has been spent on the \$900-million 335-MW Waneta Expansion in B.C. since construction began late in 2010, and the project is on budget and on schedule for a spring 2015 in-service date. For a complete discussion about the project, please see our company note dated August 27, 2010 titled *Waneta Expansion Hydro Project Announced*.
- **Other:** In August 2012, Fortis Turks & Caicos acquired Turks & Caicos Utilities Limited for US\$13 million. In October 2012, Fortis acquired the StationPark All Suite Hotel in London, Ontario for approximately \$13 million.
- **Five-Year Outlook:** From 2012 to 2016 inclusive, management expects gross capital expenditures to be \$5.5 billion (unchanged), with the addition of CH Energy Group adding approximately \$0.5 billion. Just under two-thirds is expected to be incurred at the regulated electric utilities, subject to regulatory approval.

**Significant Regulatory Updates:**

- **FortisAlberta** has sought leave to appeal the Alberta Utility Commission's (AUC) generic Performance Based Regulation (PBR) Decision, as it is concerned about the uncertainty regarding the treatment of certain capital expenditures. In November 2012, Fortis will also be seeking further clarification in the required compliance application to be filed with the AUC. For a more complete discussion about the PBR Decision, please see our industry note titled *Alberta Regulator Releases PBR Framework*, dated September 14, 2012. Within Alberta, a generic cost-of-capital proceeding is expected to commence in late-2012 or early-2013 to establish an ROE for 2013, which in the interim will continue to be 8.75%. The higher risk associated with the PBR should translate into a higher ROE and equity thickness.
- The **British Columbia Utilities Commission** initiated a Generic Cost of Capital proceeding in early-2012, and the oral hearing is scheduled to commence on December 12, 2012. Our forecasts for FortisBC Energy and FortisBC Electric assume no change in the benchmark ROE, currently set at 9.5%.

**Q4/12 Preview:** We are forecasting Q4/12 EPS of \$0.44, slightly below Q4/11 results. We expect timing of operating expenses to offset rate base growth in the Canadian regulated utilities and some recovery of earnings in the Caribbean regulated electric utilities. We do not forecast much growth in the Properties or Generation segments.

Average							4.9%						20.6x	18.7x	7.5%	8.5%

Source: Thomson, TD Securities.

**Justification of Target Price**

Our \$37.00 target price is predicated 25% and 75% on our 2013 and 2014 financial estimates, respectively, as follows: 1) 25% EV/EBITDA multiple of 12.0x, 2) 25% relative dividend yield of 125%, and 3) 50% free cash flow yield of 7.5%. Our target price also incorporates a 2.5% 10-year Government of Canada bond yield assumption.

**Key Risks to Target Price**

1) higher-than-expected long bond yields, 2) operational disruptions, 3) regulatory surprises, 4) unexpected large acquisitions, 5) sovereign risk, 6) escalating construction costs, and 7) access to capital markets.

**Investment Conclusion**

Fortis is the largest highly regulated investor-owned gas and electric distribution utility in Canada and, therefore, we view it as a core holding. We expect Fortis' future growth to be largely driven by utility investment in Canada. However, we believe that the company is also well positioned to make future acquisitions in North America as any smaller utility it might acquire is likely to gain the financial backing of a strong parent to fund its future growth, and receive benefits to improve its system reliability and efficiency for customers. We believe that in the current environment, investors will find Fortis' low-risk, utility-dominated business model attractive and, given the total potential returns to our target, we reiterate our BUY recommendation.

**(FTS-T) C\$34.58****Settlement Agreement With Central Hudson Filed****Event**

Fortis and Central Hudson Gas & Electric Corp. (Central Hudson) have filed a Settlement Agreement with the New York State Public Service Commission (the Commission), which recommends that Fortis' acquisition of Central Hudson be approved. As a reminder, Central Hudson is the utility subsidiary of CH Energy Group.

**Impact****SLIGHTLY POSITIVE.**

We have updated our forecasts for the settlement and revised timing of the CH Energy close (now expected in Q2/13 from Q1/13).

**Details**

The terms of the Settlement Agreement include:

- \$35 million by Fortis to cover expenses that would normally be recovered in customer rates, which include significant restoration expenses related to Superstorm Sandy, the October 2011 snowstorm and Tropical Storm Irene, and other similar expenses.
- \$9.25 million of cost savings over five years resulting from the elimination of costs Central Hudson currently incurs as a public company.
- A rate freeze for customers (both electric and natural gas) until July 1, 2014.
- One-time funding of \$5 million by Fortis to a Customer Benefit Fund for economic development and low income assistance programs within Mid-Hudson Valley.
- Other customer protections, including the continuation of Central Hudson as a stand-alone utility company.

**Closing Slightly Delayed:** Assuming the Commission approves the Settlement Agreement, closing of the transaction has been slightly delayed to Q2/13 (from Q1/13).

**Please see the final pages of this document for important disclosure information.**

**Company Profile**

Fortis Inc. (FTS-T) is a diversified infrastructure holding company, primarily comprising of gas distribution utilities in B.C. and electric utilities in Canada, Turks and Caicos and the Cayman Islands. Fortis also owns a real estate and hotels subsidiary and has interests in electric generation ventures in Canada and the U.S.

**Justification of Target Price**

Our \$37.00 target price is predicated 25% and 75% on our 2013 and 2014 financial estimates, respectively, as follows: 1) 25% EV/EBITDA multiple of 12.0x, 2) 25% relative dividend yield of 125%, and 3) 50% free cash flow yield of 7.5%. Our target price also incorporates a 2.5% 10-year Government of Canada bond yield assumption.

**Key Risks to Target Price**

1) higher-than-expected long-bond yields, 2) operational disruptions, 3) regulatory surprises, 4) unexpected large acquisitions, 5) sovereign risk, 6) escalating construction costs, and 7) access to capital markets.

**Investment Conclusion**

Given the Settlement Agreement is nearly unanimously supported by all stakeholders, Fortis' acquisition of CH Energy Group is likely to be approved by the Commission.

Fortis is the largest highly regulated investor-owned gas and electric distribution utility in Canada and, therefore, we view it as a core holding. We expect Fortis' future growth to be largely driven by utility investment in Canada. However, we believe that the company is also well-positioned to make future acquisitions in North America as any smaller utility it might acquire is likely to gain the financial backing of a strong parent to fund its future growth, and receive benefits to improve its system reliability and efficiency for customers. We believe that in the current environment, investors will find Fortis' low-risk, utility-dominated business model attractive and, given the total potential returns to our target, we reiterate our BUY recommendation.

[avery.haw@tdsecurities.com](mailto:avery.haw@tdsecurities.com)**Fortis Inc.****(FTS-T) C\$34.24****Q4/12 Results In Line; Focus Remains on CH Energy****Event**

Fortis reported adjusted Q4/12 EPS (f.d.) of \$0.45, slightly above our \$0.44 estimate, but below recent consensus of \$0.50. Q4/11 EPS (f.d.) (US GAAP) was \$0.44.

**Impact****NEUTRAL.**

We have updated our forecasts, largely to reflect softer contribution from the regulated Caribbean utilities and FortisBC Energy (Terasen Gas), along with lower unregulated earnings in the Real Estate and Generation segments.

We are rolling our target price forward by a quarter to be based 100% off our 2014 forecasts. We are maintaining our \$37 target and BUY recommendation.

**Details**

**FortisBC Energy** Q4/12 earnings of \$49 million declined by \$2 million year over year due to both timing of O&M expenses and lower-than-expected customer additions in 2012. The decrease was partially offset by rate base growth, higher gas transportation volumes to industrial customers and lower effective income taxes.

**Regulated Electric Utilities – Canadian** Q4/12 earnings of \$48 million were \$11 million higher year over year.

- **FortisAlberta** earnings of \$22 million grew \$4 million year over year due to rate base growth, a positive regulatory decision received in April 2012, and was partially offset by a lower ROE.
- **FortisBC Electric** earnings of \$12 million grew \$2 million year over year benefiting from rate base growth, lower-than-expected finance charges (which are no longer permitted deferral account treatment), and higher pole-attachment revenue.
- **Newfoundland Power** earnings of \$9 million increased from \$8 million in Q4/11 due to a higher allowed ROE (to 8.8% from 8.38%), electricity sales growth, and lower income tax and operating expenses.

**Company Profile**

Fortis Inc. (FTS-T) is a diversified infrastructure holding company, primarily comprising of gas distribution utilities in B.C. and electric utilities in Canada, Turks and Caicos and the Cayman Islands. Fortis also owns a real estate and hotels subsidiary and has interests in electric generation ventures in Canada and the U.S.

- **Other Canadian Electric Utilities** earnings of \$6 million increased by \$4 million year over year, largely due to lower effective income taxes at Maritime Electric, timing of certain expenses at FortisOntario, along with higher operating expenses at Maritime Electric in Q4/11 related to retirement costs.

**Regulated Utilities – Caribbean** earnings of \$3 million declined by \$1 million year over year, as a result of F/X impacts and higher depreciation largely at Caribbean Utilities.

**Fortis Generation** earnings of \$2 million declined from \$5 million in Q4/11, primarily due to decreased electricity production in Belize and Upstate New York.

**Fortis Properties** earnings of \$5 million were flat year over year. During the quarter, RevPAR increased slightly to \$73.94 from \$73.66 in Q4/11. The quarter also had contribution from the StationPark Hotel, which was acquired in October 2012.

#### Exhibit 1. Segmented Earnings (\$mm unless stated otherwise)

Notes: Earnings have been normalized for the following items:

- 1) \$1 million in Q4/12 as a result of a distribution revenue requirements decision received in April 2012 related to other periods.
- 2) (\$1.5) million in Q4/11 related to a retroactive decision by the AUC in December 2011.
- 3) \$0.5 million of earnings earned on capital investments related to prior years.
- 4) \$0.5 million gain recognized in Q4/12 on the disposition of assets.
- 5) \$3 million provision recognized in Q4/12 associated with the company's investment in CWLP.

Source: Company Reports, TD Securities.

**Outlook****Acquisition and Construction Updates:**

- **CH Energy Acquisition Set to Close in Q2/13:** In late January 2013, Fortis and Central Hudson filed a Settlement Agreement with the New York State Public Service Commission recommending the approval of Fortis' acquisition of CH Energy. We view this positively and given the Settlement Agreement is nearly unanimously supported by all stakeholders, Fortis' acquisition of CH Energy Group is likely to be approved by the Commission. For additional details on the Settlement please refer to our January 29, 2013, Action Note titled, *["Settlement Agreement With Central Hudson Filed"](#)*.
- **Waneta Expansion Proceeding Well:** Approximately \$436 million has been spent on the \$900 million 335 MW Waneta Expansion in B. C. since construction began late in 2010. The project is tracking on budget and on schedule for a spring 2015 in-service date.
- **2013 Capital Plan and Five-Year Outlook Remain Robust:** Fortis expects to spend approximately \$1.3 billion for its 2013 capital plan, excluding Central Hudson, which is expected to average more than \$125 million annually. From 2013 to 2017 inclusive, management expects gross capital expenditures to be \$6.0 billion, including expenditures from Central Hudson. This five-year plan is broken down, with 59% expected to be spent at the Canadian regulated electric utilities, 19% at the regulated gas utilities, 11% at Central Hudson, and the remaining 11% in the non-regulated businesses.

**Significant Regulatory Updates:**

- The **British Columbia Utilities Commission (BCUC)** held a public oral hearing for the first phase of the Generic Cost of Capital Proceeding in December 2012. The BCUC has determined that a second phase be added to determine an appropriate ROE and capital structure for all other regulated utilities in B.C. once phase one is completed. A decision for phase one is expected in mid-2013.
- **FortisAlberta** has sought leave to appeal the Alberta Utility Commission's (AUC) generic Performance Based Regulation (PBR) Decision, as it is concerned about the uncertainty regarding the treatment of certain capital expenditures. For a more complete discussion about the PBR Decision, please see our industry note titled, *["Alberta Regulator Releases PBR Framework"](#)*, dated September 14, 2012. Within Alberta, a generic cost-of-capital proceeding has commenced to establish an ROE for 2013, which in the interim will continue to be 8.75%. Our view is that the higher risk associated with the PBR should translate into a higher ROE and equity thickness.

**Q1/13 Preview:** We are forecasting Q1/13 EPS of \$0.65, slightly above Q1/13 results. We expect the increase to be largely generated by earnings growth due to rate base additions in the Canadian regulated electric utilities.

Source: Thomson, TD Securities.

**Justification of Target Price**

Our \$37.00 target price is predicated on our 2014 financial estimates as follows: 1) 25% EV/EBITDA multiple of 12.0x, 2) 25% relative dividend yield of 125%, and 3) 50% free-cash-flow yield of 8.0%. Our target price also incorporates a 2.5% 10-year Government of Canada bond-yield assumption.

**Key Risks to Target Price**

1) higher-than-expected long bond yields, 2) operational disruptions, 3) regulatory surprises, 4) unexpected large acquisitions, 5) sovereign risk, 6) escalating construction costs, and 7) access to capital markets.

**Investment Conclusion**

Fourth quarter results were a solid end to 2012 for Fortis, and we expect the focus in 2013 to be on integrating CH Energy. Fortis is the largest highly regulated investor-owned gas and electric distribution utility in Canada and, therefore, we view it as a core holding. We expect Fortis' future growth to be largely driven by utility investment in Canada. However, we believe that the company is also well-positioned to make future acquisitions in North America as any smaller utility it might acquire is likely to gain the financial backing of a strong parent to fund its future growth, and receive benefits to improve its system reliability and efficiency for customers. We believe that in the current environment, investors will find Fortis' low-risk, utility-dominated business model attractive and, given the total potential returns to our target, we reiterate our BUY recommendation.

<sup>B</sup> Percentage of subject companies within each of the three categories (BUY, HOLD and REDUCE) for which TD Securities Inc. has provided investment banking services within the last 12 months.

## Research Dissemination Policy

TD Securities makes its research products available in electronic and/or printed formats and simultaneously distributes them to its institutional clients who are entitled to receive them. The Action Notes are distributed by email, and are available in PDF form on First Call, Bloomberg, Reuters, Capital IQ, FactSet and TheMarkets.Com. Research Reports are distributed by email; they are also printed and distributed by courier to our entitled clients. PDFs of Reports are available on First Call, Bloomberg and Reuters. All research is available by password to entitled institutional clients at <https://www.tdsresearch.com/equities>

**Research Ratings**

**ACTION LIST BUY:** The stock's total return is expected to exceed a minimum of 15%, on a risk-adjusted basis, over the next 12 months and it is a top pick in the Analyst's sector.

**BUY:** The stock's total return is expected to exceed a minimum of 15%, on a risk-adjusted basis, over the next 12 months.

**SPECULATIVE BUY:** The stock's total return is expected to exceed 30% over the next 12 months; however, there is material event risk associated with the investment that could result in significant loss.

**HOLD:** The stock's total return is expected to be between 0% and 15%, on a risk-adjusted basis, over the next 12 months.

**TENDER:** Investors are advised to tender their shares to a specific offer for the company's securities or to support a proposed combination reflecting our view that a superior offer is not forthcoming.

**REDUCE:** The stock's total return is expected to be negative over the next 12 months.

**Overall Risk Rating in order of increasing risk:** Low (6.5% of coverage universe), Medium (32.4%), High (50.0%), Speculative (11.1%)

**Analyst Certification**

Each analyst of TD Securities Inc. whose name appears on page 1 of this research report hereby certifies that (i) the recommendations and opinions expressed in the research report accurately reflect the research analyst's personal views about any and all of the securities or issuers discussed herein that are within the analyst's coverage universe and (ii) no part of the research analyst's compensation was, is, or will be, directly or indirectly, related to the provision of specific recommendations or views expressed by the research analyst in the research report.

**Recommendation:****BUY***Unchanged***Risk:****LOW****12-Month Target Price:****C\$37.00***Unchanged***12-Month Total Return:****13.5%****Fortis Inc.  
(FTS-T) C\$33.70****A Utility Tried, Tested and Grew**

**Growth Through Discipline:** Fortis Inc. (FTS-T) is Canada's largest publicly traded highly regulated utility company, with approximately \$15 billion of total assets comprising approximately 90% regulated assets (of which 53% is electric and 37% is gas), 5% hydro generation assets, and 5% real estate (hotels and office buildings). The company's initial utility was Newfoundland Power, and over time it has expanded across Canada as well as the Caribbean to its current size of seven electric and one gas utility (Exhibit 1). With the pending acquisition of CH Energy Group in New York State, Fortis will have executed on its U.S. expansion strategy, and further U.S. acquisitions could become a growth accelerator for the company long term.

**Tried and Tested:** Given the company's size, track record and quality assets, we view it as a core holding. Fortis is well-positioned to continue growing its dividend, in our view. We believe that income-oriented investors especially will find Fortis' low-risk, utility-dominated business model attractive and reiterate our BUY recommendation.

## Exhibit 1. Fortis Overview

**Total Assets \$15 Billion** (as at December 31, 2012)

### Regulated Utilities

- 7 electric / 1 gas
- \$13.5 billion
- 2 million customers

### Non-Regulated

- Hydroelectric Generation (including Waneta Expansion)
- Hotels / Real Estate
- \$1.5 billion

Source: Company Reports.

## Exhibit 2. Comparison of Fortis' Large Utilities

Utility	Customers (#000s) <sup>1</sup>	Rate Base (\$B) <sup>2</sup>
FortisBC (Gas)	945	3.7
FortisBC (Electric)	163	1.2
FortisAlberta	508	2.3
Newfoundland Power	252	0.9
<b>Central Hudson<sup>3</sup></b>	<b>375</b>	<b>1.0</b>
All Other	179	1.0
<b>Total</b>	<b>2,422</b>	<b>10.1</b>

Notes:

1) As of December 31, 2012.

2) Forecast mid-year 2013.

3) CH Energy Group acquisition announced Feb. 21, 2012. Transaction is expected to close Q2/13.

Source: Company Reports, TD Securities.

### Focus on Closing CH Energy and Waneta Expansion Project:

Management is confident that the CH Energy acquisition will close and that it continues to track toward an anticipated Q2/13 closing. The construction on the Waneta Expansion is proceeding well with all high-risk items completed. At the end of 2012, approximately \$436 million had been spent on the \$900 million project and it is tracking slightly ahead of budget and schedule. As a reminder, we expect the Waneta Expansion to return 200-300 bps above a regulated ROE on a 35%-40% equity thickness.

**Robust Organic Capital Plan Represents Both Low-Risk Growth and High Quality of Service:** Management believes that Fortis' largest driver of growth remains its organic capital investments into rate base. This spend also satisfies its mandate of maintaining high quality of service and reliability to its customers and reinforces its commitment to maintaining the quality of its assets. We view growth through organic investments as the lowest-risk capital opportunity as it largely requires the approval of regulators and is virtually guaranteed a fair return on and of capital spent. In 2013, Fortis expects to spend approximately \$1.3 billion for its capital plan and its five-year program, including Central Hudson, is expected to total approximately \$6 billion, most of which is to be self-funded at the subsidiary level. This five-year plan is broken down, with 59% expected to be spent at the Canadian regulated electric utilities, 19% at the regulated gas utilities, 11% at Central Hudson, and the remaining 11% in the non-regulated businesses.

**Exhibit 3. Mid-Year Rate Base and Waneta Investment**

Notes:

1) CAGR excludes the initial approximate \$1 billion rate base addition forecast in 2013 related to the Central Hudson acquisition.

2) Includes approximately \$1 billion of rate base related to Central Hudson upon acquisition and expected rate base growth thereafter.

Source: Company Reports.

**Leveraging Existing Presence and Expertise for New Transmission Build Opportunities:** Alberta and Ontario are holding a competitive procurement process for new electric transmission infrastructure build. Management is optimistic that it can secure some of these project RFPs and build up a presence in electric transmission. In our view, the company's strong expertise in electric distribution, and its incumbency and ability to leverage its existing FortisAlberta and FortisOntario operations will give it a competitive advantage over other bidders and allow for it to potentially secure the project mandates mentioned below along with future electric infrastructure RFPs in these provinces.

- **Fort McMurray Area Transmission in Alberta:** The construction of 500 kV transmission lines extending approximately 500 km from Edmonton to Fort McMurray. Current cost estimates for this project range between \$1.6 billion and \$2.0 billion and Fortis could partner with a large construction and infrastructure company to help construct the project. Given that Fortis already operates an electric distribution utility and is well-respected in this jurisdiction, we believe that it has a good chance of winning this tender.
- **East/West Tie Line in Ontario:** The construction of a double-circuit 230 kV transmission line from Thunder Bay to Wawa, and connect to the bulk transmission system in Northern Ontario at transformer stations owned by Hydro One Networks Inc., and the capital cost could be approximately \$600 million. As a reminder, Fortis has signed an MOU with Lake Huron Anishinabek Transmission Company Inc. (LHATC) for the potential construction and operation of regulated electricity transmission projects in Ontario.

**Hydro Power Opportunities:** Fortis is also studying opportunities to leverage the work completed for its Waneta Expansion project. The company is looking at building a hydroelectric dam and generating facility, approximately 60 MW in capacity, potentially costing \$200 million-\$300 million. Fortis would structure an agreement similar to a long-term PPA with off-takers, with zero commodity exposure. The company has existing water licenses. Other benefits of the project would include providing water management and summer irrigation to downstream states like Washington and Oregon, which could also improve the project economics. The company could make a final decision on the project in a year.

**LNG Expansion:** Fortis owns an extensive gas network in B.C. and is looking at ways to expand its system capacity to accommodate high interest in using relatively cheap natural gas (e.g., fuel for trucks). There are also LNG Expansion projects that Fortis could look to explore. The company owns the Tilbury and Mount Hayes LNG facilities in B.C. and is looking at ways to expand the business to supply LNG to power boats and ferries and also potentially export smaller volumes of LNG to neighboring jurisdictions like Hawaii and Alaska. This could represent a few investments in the \$200 million-\$300 million range, also driving increased gas throughput on Fortis' system, lowering system costs for customers, which in turn could facilitate further investment. Fortis would look to make these investments regulated in nature. Another potential project would be to expand its Southern Crossing pipeline as part of a path for natural gas export.

**Additional CH Energy Investments Possible:** Management expects CH Energy rate base to grow approximately 6% annually over the next number of years, with its identified capital plan. In addition, low natural gas prices relative to heating oil costs could accelerate residential customer conversions, further bolstering growth prospects. If the Indian Point nuclear power plant is shut down as per certain political intentions, then the expectation is that this would be replaced with natural gas-fired power generation to service New York City, and any resulting additional natural gas transmission pipeline capacity required through CH Energy's territory could also be an investing opportunity for the utility. As a reminder, Central Hudson is forecasted to average approximately \$125 million annually of capital spend.

**Fortis is a Logical Buyer of AltaLink:** Management acknowledged that it is a logical buyer of AltaLink should SNC Lavalin Group Inc. (SNC-T) decide to divest the asset. Fortis already has a sizeable presence in Alberta as it owns electrical distribution assets in the province, knows the regulatory system in place in the province, and is in constant dialogue with AltaLink through system operations. Also, if a transaction was to be consummated, it would essentially be a reintegration of two former TransAlta Corp. (TA-T) utility assets into one. To provide some historical context, back in 2002, AltaLink purchased its Alberta electric transmission assets from TransAlta, and in 2004, FortisAlberta purchased TransAlta's old Alberta electric distribution assets through its acquisition of Aquila Networks Canada Ltd. Management also noted that any deal would likely get done quicker with it involved, and could result in some operational efficiencies and other cost synergies, which could be beneficial to customer rates. We believe that if Fortis was to successfully acquire AltaLink, it will be well-received by the province and regulators, given its existing presence and knowledge of the Alberta electrical system, and the potential benefits it could represent to ratepayers. That being said, any sale process would likely be highly competitive and we believe that Fortis' management will maintain its exceptional discipline when evaluating any acquisition opportunities. For a discussion on the potential valuation of AltaLink, please refer to our TD Industrial Products analyst Michael Tupholme's SNC Lavalin report titled, [\*"Where to From Here? We See Further Upside -- BUY"\*](#).

**Continued Appetite for Acquisitions:** We believe that Fortis' management will remain acquisitive and will continue to look at U.S. electric and gas utility acquisitions, particularly in New York State, and potentially other regions with reasonable regulatory jurisdictions like Texas, the U.S. Midwest, and the U.S. Southwest. Our understanding is that there are some European based utility owners in New York and given the uncertainty surrounding the current situation in Europe, there is the possibility for these European players to shed assets in order to raise capital and strengthen their balance sheets. We believe that Fortis will be a potential bidder for any asset divestitures by these entities and has identified utility acquisition opportunities totalling approximately \$4.0 billion in rate base in New York State alone.

**Looking for Growth and Geographic Diversification:** In terms of potential scale, management stated that a large U.S. acquisition down the road combined with CH Energy could eventually grow its presence in the U.S. to the same scale as its current B.C. presence, thus potentially effectively reducing B.C. down to approximately one-third from approximately one half of the company today. This would further diversify the company's geographic operations and make it less reliant on the regulatory risks associated with a single jurisdiction. We believe that this is a prudent strategy. Fortis' utility acquisition strategy remains focused on good utilities with strong management teams, similar risk profile, growth potential through follow-on capital investments, while keeping operations autonomous and self-functioning.

**Regulatory Updates:** Fortis management adds value with its strong regulatory expertise, in our view, both when acquiring utilities and operating them. In Alberta, the recent Decision on Fortis' compliance filing appears to be a step in the right direction with approximately 60% of the capital tracker revenue accepted on an interim basis with a capital tracker decision expected in Q3/13. We are hopeful that the regulator understands historic cost based customer rates alone would not adequately compensate shareholders for significant growth capital. With respect to a B.C. generic cost of capital decision, expected by mid 2013, we see some risk of slightly lower ROEs. Despite the denial of amalgamation of Fortis' B.C. gas utilities because of what appears to be regulatory philosophical aversion to postage stamp rates, we still believe that long-term pragmatic considerations will support eventual amalgamation (which would benefit customers more than shareholders). Exhibit 4 has a list of the upcoming regulatory decisions.

#### Exhibit 4. Upcoming Regulatory Decisions

Utility	Significant Proceedings	Filing	Expected Decision
FortisBC (Gas)	Generic Cost of Capital – 2013	March-12	Mid-2013
	GRA(1) (2014+)	H1/2013	TBD

**Notes:**

- 1) CH Energy Group acquisition announced February 21, 2012. Transaction is expected to close during Q2/2013.
- 2) Deferral for future recovery from (refund to) customers of certain variances between actual and forecast for rate setting.
- 3) Distribution utility only. No commodity or purchase power exposure.
- 4) No advance approval required for sustaining capex. Advance approval through capital expenditure tracker mechanism required for growth capex.
- 5) Primarily has defined contribution pension plan.
- 6) Applied for 2013 through 2017 and subject to approval by the regulator.

Source: Company Reports, TD Securities.

**Financing Update:** Given that almost all of Fortis' capital plan over the next five years is self-funding capital spent at the subsidiaries, Fortis does not see the need to raise common equity in the short term beyond its DRIP program. However, once CH Energy closes and the subscription receipts convert, we expect Fortis to finish permanently financing the acquisition using a combination of debt and preferred equity. This could involve coming to the market to raise approximately US\$300 million of debt and potentially \$200 million preferred shares. The company expects to maintain a capital structure in the 35% common equity, 10% preferred share, 55% debt range, which would adhere to its A(low) credit rating from S&P. Management also takes pride in the company's track record of 40 years of consecutive dividend increases (Exhibit 6), which is among the longest of any publicly traded Canadian company.

#### Exhibit 6. Four Decades of Dividend Growth

Source: Company Reports.

**Highest Degree of Regulation and Lowest Risk Large-Cap Name in our Sector:** We expect Fortis to continue to have the highest degree of regulation of other power and utility companies under our coverage and we view it as the lowest-risk, best defensive large-cap play in our universe.

## **Justification of Target Price**

Our \$37.00 target price is predicated on our 2014 financial estimates as follows: 1) 25% EV/EBITDA multiple of 12.0x, 2) 25% relative dividend yield of 125%, and 3) 50% free-cash-flow yield of 8.0%. Our target price also incorporates a 2.5% 10-year Government of Canada bond-yield assumption.

## **Key Risks to Target Price**

1) Higher-than-expected long bond yields, 2) operational disruptions, 3) regulatory surprises, 4) unexpected large acquisitions, 5) sovereign risk, 6) escalating construction costs, and 7) access to capital markets.

## **TD Investment Conclusion**

Fortis is the largest highly regulated investor-owned gas and electric distribution utility in Canada and, therefore, we view it as a core holding. We expect Fortis' future growth to be largely driven by utility investment in Canada. However, we believe that the company is also well-positioned to make future acquisitions in North America as any smaller utility it might acquire is likely to gain the financial backing of a strong parent to fund its future growth, and receive benefits to improve its system reliability and efficiency for customers. We believe that in the current environment, investors will find Fortis' low-risk, utility-dominated business model attractive and reiterate our BUY recommendation.

## APPENDIX A. IMPORTANT DISCLOSURES

Company	Ticker	Disclosures
Fortis Inc.	FTS-T	1,2, 4, 9

1. TD Securities Inc., TD Securities (USA) LLC or an affiliated company has managed or co-managed a public offering of securities within the last 12 months with respect to the subject company.
2. TD Securities Inc., TD Securities (USA) LLC or an affiliated company has received compensation for investment banking services within the last 12 months with respect to the subject company.
3. TD Securities Inc., TD Securities (USA) LLC or an affiliated company expects to receive compensation for investment banking services within the next three months with respect to the subject company.
4. TD Securities Inc. or TD Securities (USA) LLC has provided investment banking services within the last 12 months with respect to the subject company.
5. A long position in the securities of the subject company is held by the research analyst, by a member of the research analyst's household, or in an account over which the research analyst has discretion or control.
6. A short position in the securities of the subject company is held by the research analyst, by a member of the research analyst's household, or in an account over which the research analyst has discretion or control.
7. A long position in the derivative securities of the subject company is held by the research analyst, by a member of the research analyst's household, or in an account over which the research analyst has discretion or control.
8. A short position in the derivative securities of the subject company is held by the research analyst, by a member of the research analyst's household, or in an account over which the research analyst has discretion or control.
9. TD Securities Inc. and/or an affiliated company is a market maker, or is associated with the specialist that makes a market, in the securities of the subject company.
10. TD Securities Inc. and/or affiliated companies own 1% or more of the equity securities of the subject company.
11. A partner, director or officer of TD Securities Inc. or TD Securities (USA) LLC, or a research analyst involved in the preparation of this report has, during the preceding 12 months, provided services to the subject company for remuneration.
12. Subordinate voting shares.
13. Restricted voting shares.
14. Non-voting shares.
15. Variable voting shares.
16. Limited voting shares.

### Additional Important Disclosures

## Price Graphs

## Research Ratings

### Action List BUY:

The stock's total return is expected to exceed a minimum of 15%, on a risk-adjusted basis, over the next 12 months and it is a top pick in the Analyst's sector.

### BUY:

The stock's total return is expected to exceed a minimum of 15%, on a risk-adjusted basis, over the next 12 months.

### SPECULATIVE BUY:

The stock's total return is expected to exceed 30% over the next 12 months; however, there is material event risk associated with the investment that could result in significant loss.

### HOLD:

The stock's total return is expected to be between 0% and 15%, on a risk-adjusted basis, over the next 12 months.

### TENDER:

Investors are advised to tender their shares to a specific offer for the company's securities or to support a proposed combination reflecting our view that a superior offer is not forthcoming.

### REDUCE:

The stock's total return is expected to be negative over the next 12 months.

**Overall Risk Rating in order of increasing risk:** Low (6.5% of coverage universe), Medium (32.6%), High (50.0%), Speculative (10.9%)

## Distribution of Research Ratings

Distribution of Research Ratings<sup>^</sup>

Investment Banking Services Provided<sup>\*</sup>

Current as of March 4, 2013

<sup>^</sup> Percentage of subject companies under each rating category—BUY (covering Action List BUY, BUY and Spec. BUY ratings), HOLD and REDUCE (covering TENDER and REDUCE ratings).

<sup>\*</sup> Percentage of subject companies within each of the three categories (BUY, HOLD and REDUCE) for which TD Securities Inc. has provided investment banking services within the last 12 months.

## Research Dissemination Policy

TD Securities makes its research products available in electronic and/or printed formats and simultaneously distributes them to its institutional clients who are entitled to receive them. The Action Notes are distributed by email, and are available in PDF form on First Call, Bloomberg, Reuters, Capital IQ FactSet and TheMarkets.com. Research Reports are distributed by email; they are also printed and distributed by courier to our entitled clients. PDFs of Reports are available on First Call, Bloomberg and Reuters. ## Fortis Inc. (FTS-T) C\$33.70

### Growth Through Discipline - Takeaways From Management Meetings

#### Event

We recently hosted Fortis management for a number of investor meetings.

#### Impact

**SLIGHTLY POSITIVE.** Our meetings with management provided a solid update and, in our view, reaffirmed our positive thesis on the company. For a more detailed update, please see our concurrently published Fortis report titled *"A Utility Tried, Tested and Grew"*.

#### Details

**Focus on Closing CH Energy and Waneta Expansion:** Management is confident that the CH Energy acquisition will close in Q2/13. The construction on the Waneta Expansion is proceeding well with all high-risk items completed, and it is tracking slightly ahead of budget and schedule.

**Robust Organic Capital Plan Represents Both Low-Risk Growth and High Quality of Service:** Management believes that Fortis' largest driver of growth remains its organic capital investments into rate base. This spend also satisfies its mandate of maintaining high-quality of service and reliability to its customers and reinforces its commitment to maintaining the quality of its assets. Its five-year program is expected to total approximately \$6 billion.

**Leveraging Existing Presence and Expertise for New Transmission Build Opportunities:** Alberta and Ontario are holding a competitive procurement process for new electric transmission infrastructure build. Management is optimistic that it can secure some of these project RFPs and build up a presence in electric transmission. In our view, the company's strong expertise in electric distribution, and its incumbency and ability to leverage its existing FortisAlberta and FortisOntario operations will give it a competitive advantage over other bidders.

#### Company Profile

Fortis Inc. (FTS-T) is a diversified infrastructure holding company, primarily comprising of gas distribution utilities in B.C. and electric utilities in Canada, Turks and Caicos and the Cayman Islands. Fortis also owns a real estate and hotels subsidiary and has interests in electric generation ventures in Canada and the U.S.

**Hydro Power Opportunities:** Fortis is also studying opportunities to leverage the work completed for its Waneta Expansion project. The company is looking at building a hydroelectric dam and generating facility, approximately 60 MW in capacity, potentially costing \$200 million-\$300 million. The company could make a final decision on the project in a year.

**LNG Expansion:** Fortis owns an extensive gas network in B.C. and is looking at ways to expand its system capacity to accommodate high interest in using relatively cheap natural gas (e.g., fuel for trucks). There are also LNG Expansion projects that Fortis could look to explore. The company owns the Tilbury and Mount Hayes LNG facilities in B.C. and is looking at ways to supply LNG to power boats and ferries, and also potentially export smaller volumes of LNG to neighboring jurisdictions like Hawaii and Alaska.

**Additional CH Energy Investments Possible:** Low natural gas prices relative to heating oil costs could accelerate residential customer conversions to natural gas, further bolstering current 6% rate base growth expectations. If the Indian Point nuclear power plant is shut down as per certain political intentions, then the expectation is that this would be replaced with natural gas-fired power generation to service New York City, and any resulting additional natural gas transmission pipeline capacity required through CH Energy's territory could also be an investing opportunity for the utility.

**Fortis is a Logical Buyer of AltaLink:** Management acknowledged that it is a logical buyer of AltaLink should SNC Lavalin Group Inc. decide to divest the asset. Fortis already has a sizeable presence in Alberta as it owns electrical distribution assets in the province, knows the regulatory system in place in the province, and is in constant dialogue with AltaLink through system operations. Management also noted that any deal would likely get done quicker with them involved, and could result in some operational efficiencies and other cost synergies, which could be beneficial to customer rates. Any sale process would likely be highly competitive and we believe that Fortis' management will maintain its exceptional discipline when evaluating any acquisition opportunities.

**Continued Appetite for Acquisitions:** We believe that Fortis' management will remain acquisitive and will continue to look at U.S. electric and gas utility acquisitions, particularly in New York state, and potentially other regions with reasonable regulatory jurisdictions like Texas, the U.S. Midwest, and the U.S. Southwest.

**Looking for Growth and Geographic Diversification:** In terms of potential scale, management stated that a large U.S. acquisition down the road combined with CH Energy could eventually grow its presence in the U.S. to the same scale as its current B.C. presence, thus potentially effectively reducing B.C. businesses down to approximately one-third from approximately one half of the company today. This would further diversify the company's geographic operations and make it less reliant on the regulatory risks associated with a single jurisdiction. We believe that this is a prudent strategy.

**Regulatory Updates:** In Alberta, the recent Decision on Fortis' compliance filing appears a step in the right direction with approximately 60% of the capital tracker revenue accepted on an interim basis with a capital tracker decision expected in Q3/13. We are hopeful that the regulator understands historic cost-based customer rates alone would not adequately compensate shareholders for significant growth capital. With respect to a B.C. generic cost of capital decision, expected by mid 2013, we see some risk of slightly lower ROEs.

**Exhibit 1. Upcoming Regulatory Decisions**

Utility	Significant Proceedings	Filing	Expected Decision
FortisBC (Gas)	Generic Cost of Capital – 2013	March-12	Mid-2013
	GRA(1) (2014+)	H1/2013	TBD
FortisBC (Electric)	Generic Cost of Capital – 2013	March-12	Mid-2013
	Kelowna Utility Asset Acquisition	November-12	Q1/2013
	GRA (2014+)	H1/2013	TBD
FortisAlberta	Generic Cost of Capital – 2013	October-12	Late 2013
	2013 PBR(3) Compliance Filing	November-12	Q1/2013
	PBR Capital Tracker Filing	December-12	Q3/2013
NF Power	GRA & Cost of Capital – 2013 & 2014	September-12	Q2/2013
Central Hudson	Merger Application	April-12	Q2/2013

**Exhibit 3. Regulatory Mechanisms for Fortis' Large Utilities (2013)**

Utility	FortisBC (Gas)	FortisBC (Electric)	FortisAlberta	Newfoundland Power	Central Hudson (1)
Cost of service regulation	✓	✓	✓	✓	✓
Performance-based rate-setting mechanism	X	X	✓	X	X
Forward test year	✓	✓	X	✓	✓
Commodity/Energy supply cost trackers (2)	✓	✓	N/A (3)	✓	✓
Advance approval required for capital expenditures	✓	✓	x (4)	✓	✓
Weather (volume) normalization (2)	✓	✓	N/A (3)	✓	✓
Pension cost tracker (2)	✓	✓	N/A (5)	✓	✓
Interest expense tracker (2)	✓	✓	X	X	✓
Property tax tracker (2)	✓	✓	(6)	✓	✓
Capital expenditure tracker (2)	X	X	✓ (4)	X	X
Relief typically granted for major non-controllable expenses (including taxes, storm damage and accounting changes) (2)	✓	✓	✓	✓	✓

## Notes:

- 1) CH Energy Group acquisition announced February 21, 2012. Transaction is expected to close during Q2/2013.
- 2) Deferral for future recovery from (refund to) customers of certain variances between actual and forecast for rate setting.
- 3) Distribution utility only. No commodity or purchase power exposure.
- 4) No advance approval required for sustaining capex. Advance approval through capital expenditure tracker mechanism required for growth capex.
- 5) Primarily has defined contribution pension plan.
- 6) Applied for 2013 through 2017 and subject to approval by the regulator.

Source: Company Reports, TD Securities.

**Financing Update:** Given that almost all of Fortis' capital plan over the next five years is self-funding capital spent at the subsidiaries, Fortis does not see the need to raise common equity in the short term beyond its DRIP. However, once CH Energy closes, we expect Fortis to permanently finance the acquisition using a combination of debt and preferred equity. The company expects to maintain a capital structure in the 35% common equity, 10% preferred share, 55% debt range, which would adhere to its A(low) credit rating from S&P. Management also takes pride in the company's track record of 40 years of consecutive dividend increases, which is among the longest of any public traded Canadian company.

**Valuation****Exhibit 4. Valuation**

Notes:

1) Averages exclude ATCO Ltd.

Source: Thomson, TD Securities.

**Justification of Target Price**

Our \$37.00 target price is predicated on our 2014 financial estimates as follows: 1) 25% EV/EBITDA multiple of 12.0x, 2) 25% relative dividend yield of 125%, and 3) 50% free-cash-flow yield of 8.0%. Our target price also incorporates a 2.5% 10-year Government of Canada bond-yield assumption.

**Key Risks to Target Price**

1) Higher-than-expected long bond yields, 2) operational disruptions, 3) regulatory surprises, 4) unexpected large acquisitions, 5) sovereign risk, 6) escalating construction costs, and 7) access to capital markets.

**TD Investment Conclusion**

Our meetings with management provided a solid update and in our view reaffirmed our positive thesis on the company. Fortis is the largest highly regulated investor-owned gas and electric distribution utility in Canada and, therefore, we view it as a core holding. We expect Fortis' future growth to be largely driven by utility investment in Canada. However, we believe that the company is also well-positioned to make future acquisitions in North America as any smaller utility it might acquire is likely to gain the financial backing of a strong parent to fund its future growth, and receive benefits to improve its system reliability and efficiency for customers. We believe that in the current environment, investors will find Fortis' low-risk, utility-dominated business model attractive and reiterate our BUY recommendation.

## Fortis Inc.

(FTS-T) C\$35.01

### Proposed Acquisition of CH Energy Hits Regulatory Roadblock

#### Event

Administrative law judges (ALJs) have recommended to the New York State Public Service Commission (the Commission) that Fortis' proposed acquisition of CH Energy Group as laid out in the Joint Proposal not be approved (the Recommended Decision).

#### Impact

##### SLIGHTLY NEGATIVE.

Overall, we were surprised by the findings of the Recommended Decision and the amount of perceived public opposition toward Fortis' acquisition of CH Energy. However, to clarify, the ALJ's recommendation is an advisory opinion (not legally binding) that will be considered by the Commission in its final ruling on whether to approve the acquisition of CH Energy by Fortis.

Given the ongoing discussions between the parties and the Commission, we have not changed our financial estimates at this time as we await a final ruling by the Commission, and remain hopeful that a decision can be mutually agreed upon by all parties after some of the most recent concerns are mitigated. Our forecasts had assumed a Q2/13 acquisition close and that the public interest test required for the acquisition was met. We estimate that the acquisition could be \$0.02 accretive to EPS on an annual basis.

#### Details

**Some Uncertainty Over Approval; Exceptions to be Filed:** While the Recommended Decision suggests that the Commission could consider allowing the transaction to proceed, subject to modifications that would alter the transaction's balance of risks and benefits, in the form of more public benefit adjustments (PBAs), the ALJs also suggested that the "extraordinary intense degree of public opposition" might not be remediated by more PBAs. Fortis and CH Energy intend to file exceptions with a number of points raised in the Recommended Decision and will continue dialogue with all parties. Management has stated that a number of the issues of concern have already been addressed in the Joint Proposal, and is disappointed with the Recommended Decision not recognizing the nature and value of the stand-alone model in which CH Energy would operate under. Currently, the Joint Proposal outlines US\$49.25 million in payments and guaranteed saving for the benefits of customers. For additional details, please refer to our January

#### Company Profile

Fortis Inc. (FTS-T) is a diversified infrastructure holding company, primarily comprising of gas distribution utilities in B.C. and electric utilities in Canada, Turks and Caicos and the Cayman Islands. Fortis also owns a real estate and hotels subsidiary and has interests in electric generation ventures in Canada and the U.S.

29, 2013 Action Note titled, [\*"Settlement Agreement With Central Hudson Filed"\*](#).

**Timeline for Appeals and Final Decision:** Any parties can file exceptions to the Recommended Decision by May 17, 2013, and responses to these submissions are due by May 24, 2013. The next decision point would be in mid-June, where we expect the Commission might discuss the item on its agenda. With respect to the approximate \$600 million of subscription receipts issued in 2012 related to the acquisition, their conversion to common shares requires the transaction to close prior to 5 PM (EST) on June 30, 2013, otherwise, the sub-receipt holders will receive a refund together with earned interest. Our expectation is that Fortis could request an approval to extend the sub-receipt timeline if necessary (whereby at least two sub-receipt holders with a quorum of at least 25% of the total sub receipts would need to obtain at least two-thirds of the votes, in person or by proxy). Management has not made a final decision on whether to extend the timeline for the sub receipts, but will likely decide near the end of May (which would require approximately 21 days to set up a meeting of extraordinary resolution). Fortis also would have the option of not extending the sub-receipt timeline and issuing common equity to help finance the acquisition once all approvals have been obtained. A final decision by the Commission is expected in June 2013. The Fortis/CH Energy merger agreement will expire on August 20, 2013. In the event that the acquisition did not proceed, Fortis would be reimbursed for up to US\$4.0 million of expenses.

**Committed to its U.S. Expansion Strategy:** Despite the recent regulatory challenges, we believe that Fortis will remain committed to its U.S. growth strategy going forward. Given this could potentially be the second time the company has been derailed from consummating a large U.S. acquisition (the first time being Central Vermont Public Service Corporation in mid-2011), going forward, we believe that management will remain increasingly cautious when proceeding with any potential future U.S. acquisitions and maintain its measured approach to acquisitions. Fortis' utility acquisition strategy remains focused on good utilities with strong management teams, similar risk profile, growth potential through follow-on capital investments, while keeping operations autonomous and self-functioning.

**Decision Highlights Expertise Required to Acquire Utilities:** The regulatory hurdles presented with the acquisition, in our view, illustrate the relatively high barriers to entry to acquire utilities in certain jurisdictions. We continue to view Fortis management as best-in-class, with a history of being disciplined in acquisitions, and view its ability to execute on large-scale, utility acquisitions as well proven. We believe that Fortis has a solid historical track record of owning and operating utilities using a decentralized management model, and its mandate of maintaining high quality of service and reliability to its customers reinforces its commitment to all stakeholders, including that of ratepayers.

Average						4.9%							21.4x	20.3x	7.7%	9.0%

Notes:

1) Averages exclude ATCO Ltd.

Source: Thomson, TD Securities.

**Justification of Target Price**

Our \$37.00 target price is predicated on our 2014 financial estimates as follows: 1) 25% EV/EBITDA multiple of 12.0x, 2) 25% relative dividend yield of 125%, and 3) 50% free-cash-flow yield of 8.0%. Our target price also incorporates a 2.5% 10-year Government of Canada bond-yield assumption.

**Key Risks to Target Price**

1) Higher-than-expected long bond yields, 2) operational disruptions, 3) regulatory surprises, 4) unexpected large acquisitions, 5) sovereign risk, 6) escalating construction costs, and 7) access to capital markets.

**TD Investment Conclusion**

We are hopeful the CH Energy acquisition will close as we believe that it will be beneficial for all stakeholders. In our view, CH Energy and its rate payers are expected to gain the financial backing of a strong parent to help fund its future growth, benefit from the sharing of best practices across the Fortis group of utilities, receive benefits to improve its system reliability and efficiency for customers, while keeping its operations autonomous in the Fortis fold. In the event that management would find any additional potential concessions as diluting the acquisition value for Fortis shareholders to the point that it would make no economic sense to proceed, we are confident that management would be disciplined and walk away.

Fortis is the largest highly regulated investor-owned gas and electric distribution utility in Canada, and, therefore, we view it as a core holding. We expect the company's future growth to be largely driven by utility investments in Canada and the U.S. We believe that in the current environment, investors will find the company's low-risk, utility-dominated business model attractive.

## Fortis Inc.

(FTS-T) C\$34.97

### Q1 Results In-Line with Expectations; Introducing 2015 Forecasts

**Event**

Fortis reported normalized Q1/13 EPS (f.d.) of \$0.65, in line with our estimate, recent consensus of \$0.66 and above Q1/12 EPS (f.d.) of \$0.64.

**Impact****NEUTRAL.**

We have updated our forecasts largely to reflect a slight delay in our estimated closing for the CH Energy acquisition (which we now assume in late-Q2/13), along with small revisions to the contributions from the regulated Canadian utilities. We are also introducing our 2015 estimates, and rolling forward our target price by a quarter to be based 75% and 25% off our 2014 and 2015 forecasts, respectively. Our target price remains \$37.

**Details**

**FortisBC Energy** Q1/13 earnings of \$85 million increased by \$3 million year over year, due to rate base growth and increased transportation volumes to industrial customers.

**Regulated Electric Utilities – Canadian** Q1/13 earnings of \$55 million were \$4 million higher year over year.

- **FortisAlberta** normalized earnings of \$24 million grew \$3 million year over year, largely from lower depreciation rates, resulting from the 2012 distribution revenue requirements decision.
- **FortisBC Electric** earnings of \$18 million grew \$2 million year over year and benefited from rate base growth, lower operating expenses from the timing of capital expenditures, lower finance/depreciation charges, and higher allowance for funds used during construction.
- **Newfoundland Power** earnings of \$7 million were flat year over year.
- **Other Canadian Electric Utilities** earnings of \$6 million decreased by \$1 million year over year, largely from higher energy supply costs at Maritime Electric.

Please see the final pages of this document for important disclosure information.

**Company Profile**

Fortis Inc. (FTS-T) is a diversified infrastructure holding company, primarily comprising of gas distribution utilities in B.C. and electric utilities in Canada, Turks and Caicos and the Cayman Islands. Fortis also owns a real estate and hotels subsidiary and has interests in electric generation ventures in Canada and the U.S.

**Regulated Utilities – Caribbean** earnings of \$3 million were in line with Q1/12 results as lower operating expenses at Caribbean Utilities were offset by higher depreciation costs.

**Fortis Generation** normalized earnings of \$2 million declined from \$5 million in Q1/12, primarily due to decreased electricity production in Belize as a result of lower rainfall.

**Fortis Properties** earnings of \$0 million were down \$1 million year over year, largely due to lower occupancy levels in the Central Canadian hotels. During the quarter, RevPAR decreased slightly to \$66.04 from \$66.54 in Q1/12.

#### Exhibit 1. Segmented Earnings (\$mm, unless stated otherwise)

<b>Reported EPS (f.d)</b>	<b>\$0.76</b>	<b>\$0.62</b>	<b>\$0.14</b>	<b>23%</b>

Notes: Earnings have been normalized for the following items:

1) A \$2mm (after tax) adjustment recognized in Q1/13 related to the finalization of 2012 net transmission volume variances.

2) A \$22mm (after tax) gain in Q1/13 related to the settlement of the Exploits River Hydro Partnership.

3) \$0.5mm and \$4mm of costs (after tax) incurred in Q1/13 and Q1/12, respectively, related to the pending CH Energy acquisition.

Source: Company reports, TD Securities.

**Outlook****Acquisition and Construction Updates:**

- **CH Energy Update:** Administrative law judges have recommended to the New York State Public Service Commission that Fortis' proposed acquisition of CH Energy as laid out in the Joint Proposal not be approved. Overall, we were surprised by the findings of the decision and the amount of perceived public opposition toward the acquisition. For additional details, please refer to our May 7, 2013, Action Note titled, "[\*Proposed Acquisition of CH Energy Hits Regulatory Roadblock\*](#)".
- **Waneta Expansion Proceeding Well:** Approximately \$483 million has been spent on the \$900 million 335 MW Waneta Expansion in B.C. since construction began late in 2010. The project is tracking on budget and on schedule for a spring 2015 in-service date.
- **2013 Capital Plan and Five-Year Outlook Remain Robust:** Fortis expects to spend approximately \$1.3 billion for its 2013 capital plan. Management's five-year gross capital expenditure program (2013-2017) is unchanged at \$6.0 billion (including CH Energy) and is expected to translate into a combined utility rate base and hydroelectric generation investment CAGR of approximately 6%. This five-year plan is broken down with 54% expected to be spent at the Canadian regulated electric utilities, 20% at the regulated gas utilities, 11% at Central Hudson, 4% at the Caribbean regulated electric utilities, and the remaining 11% in the non-regulated businesses.

**Regulatory Update:** Management expects a mid-year decision on the British Columbia Utilities Commission (BCUC) benchmark cost-of-capital hearing (affecting FortisBC Energy), with the phase II Decision (affecting the Vancouver Island utility and FortisBC Electric) following later this year.

**Exploits Partnership Resolved:** Reported earnings included a \$0.12 per-share after tax (\$22 million) gain related to the settlement of the December 2008 expropriation by the provincial government of Fortis' ownership of non-regulated hydroelectric generating assets and water rights in central Newfoundland (via its 51% in the Exploits River Hydro Partnership).

**Introducing our 2015 Forecasts:** We are forecasting a 2015 EPS of \$1.87, 5% higher than our 2014 EPS, largely due to incremental contribution from the Waneta Expansion project along with earnings growth resulting from increased rate base at the Canadian utility businesses.

**Q2/13 Preview:** We are forecasting Q2/13 EPS of \$0.34, in line with Q2/12 results. Increased earnings, largely due to rate base additions in the Canadian regulated electric utilities, could be offset by lower non-regulated generation and properties contribution.

**Valuation****Exhibit 2. Valuation**

**Justification of Target Price**

Our \$37.00 target price is predicated 75% and 25% on our 2014 and 2015 financial estimates, respectively, as follows: 1) 25% EV/EBITDA multiple of 12.0x, 2) 25% relative dividend yield of 150%, and 3) 50% free-cash-flow yield of 8.0%. Our target price also incorporates a 2.5% 10-year Government of Canada bond-yield assumption.

**Key Risks to Target Price**

1) Higher-than-expected long-bond yields, 2) operational disruptions, 3) regulatory surprises, 4) unexpected large acquisitions, 5) sovereign risk, 6) escalating construction costs, 7) access to capital markets, and 8) pending acquisitions.

**TD Investment Conclusion**

First quarter results demonstrated the stability of the company's business model. Fortis is the largest highly regulated investor-owned gas and electric distribution utility in Canada, and, therefore, we view it as a core holding. We expect the company's future growth to be largely driven by utility investments in Canada and the U.S. We believe that in the current environment, investors will find the company's low-risk, utility-dominated business model attractive.

## Fortis Inc.

(FTS-T) C\$34.21

### Fortis Receives BC Regulatory Decision

#### Event

- The British Columbia Utilities Commission (BCUC) has released its Decision on the first phase of the generic cost of capital review.
- Effective January 1, 2013 through December 31, 2015, the rate of return on equity (ROE) for FortisBC Energy Inc. (FEI) has been set at 8.75% and the common equity component in its capital structure for rate-making purposes has been set at 38.5%.

#### Impact

##### SLIGHTLY NEGATIVE.

In our view, the decline in the ROE was expected as long bond yields have decreased over the past few years. However, we had been hopeful that the prior common equity thickness of 40% would not change, and view the 150 bps drop to be disappointing.

Our BC benchmark 2013+ ROE declines 25 bps to 8.75% from our prior 9.00% assumption and our BC Energy equity thickness has been updated with the 38.5% in the decision. We previously had assumed no change to the prior 40% equity thickness. On a year-over-year basis (2013E versus 2012A), the 75 bps drop in ROE and 150 bps drop in equity thickness has an approximate \$0.08 EPS impact. With the decline in our financial forecasts, our target price declines a dollar to \$36.00.

#### Details

**BCUC Changes Capital Structure:** The BCUC noted that with its decision, the FEI capital structure will become more aligned with other gas utilities in Canada. Now that the decision is out, we expect FEI to file for 2014/2015 rates in the near term.

**Automatic Adjustment Formula:** If the long-term Government of Canada bond yields exceed 3.8% prior to December 31, 2015, then an automatic adjustment mechanism (AAM) has been introduced to re-set the annual ROE. We view this as mildly positive, as it introduces an asymmetric return possibility – with the 8.75% ROE set as a floor but allowing for some upside if long bonds move up substantially.

#### Company Profile

Fortis Inc. (FTS-T) is a diversified infrastructure holding company, primarily comprising of gas distribution utilities in B.C. and electric utilities in Canada, Turks and Caicos and the Cayman Islands. Fortis also owns a real estate and hotels subsidiary and has interests in electric generation ventures in Canada and the U.S.

**Please see the final pages of this document for important disclosure information.**

**Risk Premiums for Other Utilities to be Established:** FEI (the old Terasen Gas) is the benchmark utility in the province, and Fortis' other affected utilities in the province (Vancouver Island, Whistler Island, and FortisBC Electric) will have their ROE set based off this benchmark ROE plus a risk premium. Phase two of the generic cost of capital hearing will now begin, and this phase will establish appropriate capital structures and risk premiums for other utilities in the province. We expect the 40% equity thickness to remain unchanged at FortisBC Electric as we believe its capital structure is in-line with other comparable electric utilities. In our view, Fortis' other BC gas utilities (FEVI and FEWI) should also maintain their equity thicknesses given our view of their smaller size and slightly higher risk profile. In the event that the Phase two decision differs from our expectations, we provide EPS sensitivities for potential changes in capital structure and risk premium for Fortis' other BC utilities in Exhibit 1.

### Exhibit 1. Estimated EPS Sensitivities to Changes in Capital Structure and Risk Premium for Fortis' Other BC Utilities (Excludes FEI)

	1 Percentage Point Equity Thickness Increase/(Decrease)		25 bps Risk Premium Increase/(Decrease)	
	\$	%	\$	%

Average							4.9%						21.2x	20.4x	7.8%	8.9%

Notes:

1) Averages exclude ATCO Ltd.

Source: Thomson, TD Securities.

### Justification of Target Price

Our \$36.00 target price is predicated 75% and 25% on our 2014 and 2015 financial estimates, respectively, as follows: 1) 25% EV/EBITDA multiple of 12.0x, 2) 25% relative dividend yield of 150%, and 3) 50% free-cash-flow yield of 8.0%. Our target price also incorporates a 2.5% 10-year Government of Canada bond-yield assumption.

**Key Risks to Target Price**

1) Higher-than-expected long-bond yields, 2) operational disruptions, 3) regulatory surprises, 4) unexpected large acquisitions, 5) sovereign risk, 6) escalating construction costs, 7) access to capital markets, and 8) pending acquisitions.

**TD Investment Conclusion**

Although we are slightly disappointed with the decision by the BCUC to reduce both the benchmark ROE and allowed equity thickness for FEI, the magnitude of the change is not material to our overall thesis on Fortis. In our view, there are some positives to the decision as it provides some certainty on regulated ROEs for utilities in BC over the medium term, and we view the adoption of an automatic adjustment mechanism as potentially positive as it could allow earnings upside if bond yields rise while maintaining a base ROE.

Fortis is the largest highly regulated investor-owned gas and electric distribution utility in Canada, and, therefore, we view it as a core holding. We expect the company's future growth to be largely driven by utility investments in Canada and the U.S. We believe that in the current environment, investors will find the company's low-risk, utility-dominated business model attractive.

## Distribution of Research Ratings

Investment Banking Services Provided<sup>\*</sup>

Current as of May 2, 2013

<sup>A</sup> Percentage of subject companies under each rating category—BUY (covering Action List BUY, BUY and Spec. BUY ratings), HOLD and REDUCE (covering TENDER and REDUCE ratings).

<sup>\*</sup> Percentage of subject companies within each of the three categories (BUY, HOLD and REDUCE) for which TD Securities Inc. has provided investment banking services within the last 12 months.

## Research Dissemination Policy

TD Securities makes its research products available in electronic and/or printed formats and simultaneously distributes them to its institutional clients who are entitled to receive them. The Action Notes are distributed by email, and are available in PDF form on Thomson Reuters, Bloomberg, S&P Capital IQ and FactSet. Research Reports are distributed by email; they are also printed and distributed by courier to our entitled clients. PDFs of Reports are available on Thomson Reuters, Bloomberg, S&P Capital IQ and FactSet. All research is available by password to entitled institutional clients at <https://www.tdsresearch.com/equities>

**Research Ratings**

**ACTION LIST BUY:** The stock's total return is expected to exceed a minimum of 15%, on a risk-adjusted basis, over the next 12 months and it is a top pick in the Analyst's sector.

**BUY:** The stock's total return is expected to exceed a minimum of 15%, on a risk-adjusted basis, over the next 12 months.

**SPECULATIVE BUY:** The stock's total return is expected to exceed 30% over the next 12 months; however, there is material event risk associated with the investment that could result in significant loss.

**HOLD:** The stock's total return is expected to be between 0% and 15%, on a risk-adjusted basis, over the next 12 months.

**TENDER:** Investors are advised to tender their shares to a specific offer for the company's securities or to support a proposed combination reflecting our view that a superior offer is not forthcoming.

**REDUCE:** The stock's total return is expected to be negative over the next 12 months.

**Overall Risk Rating in order of increasing risk:** Low (6.6% of coverage universe), Medium (31.3%), High (50.1%), Speculative (11.9%)

**Analyst Certification**

Each analyst of TD Securities Inc. whose name appears on page 1 of this research report hereby certifies that (i) the recommendations and opinions expressed in the research report accurately reflect the research analyst's personal views about any and all of the securities or issuers discussed herein that are within the analyst's coverage universe and (ii) no part of the research analyst's compensation was, is, or will be, directly or indirectly, related to the provision of specific recommendations or views expressed by the research analyst in the research report.

**(FTS-T) C\$31.80****Regulator Approves CH Energy Acquisition****Event**

The New York State Public Service Commission (the Commission / Regulator) has unanimously approved Fortis' acquisition of CH Energy Group (CH Energy).

**Impact****POSITIVE.**

We view the Regulators' decision positively and expect the acquisition to close in late Q2/13 or early Q3/13. As a reminder, we estimate that the acquisition could be \$0.02 accretive to EPS on an annual basis, and currently have the acquisition incorporated into our model.

**Details**

**A Unanimous Decision:** The Commission unanimously ruled in favour of the acquisition and that it had met the overall net-benefit condition. We believe that the final enhanced proposal presented by Fortis on May 30, 2013 was well received by stakeholders, and helped clarify their understanding of Fortis' intentions of operating the utility in an autonomous manner without lowering the level of service or its community involvement. It also provided additional enhancements to its previous offer that secured the support of labour unions and provided further customer benefits by freezing delivery rates by an additional year.

**Next Steps:** Fortis will convene a meeting for the subscription receipt holders on June 20, 2013 to extend the deadline for the expiry of the subscription receipts from June 30, 2013 to August 30, 2013. We believe that the subscription receipt holders will vote in favour of extending the deadline and believe this should provide sufficient time for Fortis and CH Energy to finalize the transaction.

**Committed to its U.S. Expansion Strategy:** Despite the recent regulatory challenges associated with the CH Energy acquisition, we believe that Fortis will remain committed to its U.S. growth strategy going forward. Fortis' utility acquisition strategy remains focused on good utilities with strong management teams, similar risk profile, growth potential through follow-on capital investments, while keeping operations autonomous and self-functioning.

**Company Profile**

Fortis Inc. (FTS-T) is a diversified infrastructure holding company, primarily comprising of gas distribution utilities in B.C. and electric utilities in Canada, Turks and Caicos and the Cayman Islands. Fortis also owns a real estate and hotels subsidiary and has interests in electric generation ventures in Canada and the U.S.

**Please see the final pages of this document for important disclosure information.**

**Decision Highlights Expertise Required to Acquire Utilities:** The regulatory hurdles presented during the CH Energy acquisition process, in our view, illustrate the relatively high barriers to entry to acquire utilities in certain jurisdictions. We continue to view Fortis management as best-in-class, with a history of being disciplined in acquisitions, and view its ability to execute on large-scale, utility acquisitions as well proven. We believe that Fortis has a solid historical track record of owning and operating utilities using a decentralized management model, and its mandate of maintaining high quality of service and reliability to its customers reinforces its commitment to all stakeholders, including that of ratepayers and the general public.

## Valuation

Source: Thomson, TD Securities.

### Justification of Target Price

Our \$36.00 target price is predicated 75% and 25% on our 2014 and 2015 financial estimates, respectively, as follows: 1) 25% EV/EBITDA multiple of 12.0x, 2) 25% relative dividend yield of 150%, and 3) 50% free-cash-flow yield of 8.0%. Our target price also incorporates a 2.5% 10-year Government of Canada bond-yield assumption.

### Key Risks to Target Price

1) Higher-than-expected long-bond yields, 2) operational disruptions, 3) regulatory surprises, 4) unexpected large acquisitions, 5) sovereign risk, 6) escalating construction costs, 7) access to capital markets, and 8) closing of pending acquisitions.

### TD Investment Conclusion

We view the decision by the Commission to approve Fortis' acquisition of CH Energy positively and believe that it will be beneficial for all stakeholders. In our view, CH Energy and its rate payers are expected to gain the financial backing of a strong parent to help fund its future growth, benefit from the sharing of best practices across the Fortis group of utilities, receive benefits to improve its system reliability and efficiency for customers, while keeping its operations autonomous in the Fortis fold.

Fortis is the largest highly regulated investor-owned gas and electric distribution utility in Canada, and, therefore, we view it as a core holding. We expect the company's future growth to be largely driven by utility investments in Canada and the U.S. We believe that in the current environment, investors will find the company's low-risk, utility-dominated business model attractive.

**(FTS-T) C\$32.01****Q2/13 Results In-Line; Focus Now On CH Energy****Event**

Fortis Q2/13 normalized EPS of \$0.33 was in line with our estimate, above recent consensus of \$0.32, and slightly below Q2/12 normalized EPS of \$0.34.

**Impact****NEUTRAL.**

The quarter was in line with our expectations and the integration of CH Energy is progressing well. We have revised our forecasts slightly to reflect small revisions in the Regulated Canadian and CH Energy utilities along with financing updates. We are also rolling forward our target price by a quarter to be based 50% on each of our 2014 and 2015 forecasts. Our target price remains \$36.

**Details**

**FortisBC Energy** Q2/13 normalized earnings of \$12 million decreased by \$1 million year-over-year, largely from the May 2013 regulatory decision that decreased the ROE and equity component of the capital structure along with lower gas transportation volumes to industrial customers, lower customer additions, and higher effective income taxes. The decline was partially offset by rate base growth.

**Regulated Electric Utilities — Canadian** Q2/13 normalized earnings of \$51 million were slightly lower year-over-year.

- **FortisAlberta** earnings of \$25 million decreased slightly year-over-year, largely from lower net transmission revenues and partially offset by timing of operating expenses, rate base growth, and an increase in customers.
- **FortisBC Electric** normalized earnings of \$10 million grew \$1 million year-over-year, largely from lower finance charges, rate base growth from investments and the acquisition of the City of Kelowna's electrical utility (March 2013). Partially offsetting the increase was the May 2013 regulatory decision that lowered the ROE and equity component for the utility.
- **Newfoundland Power** normalized earnings of \$11 million were relatively flat year-over-year.

**Company Profile**

Fortis Inc. (FTS-T) is a diversified infrastructure holding company, primarily comprising of gas distribution utilities in B.C. and electric utilities in Canada, Turks and Caicos and the Cayman Islands. Fortis also owns a real estate and hotels subsidiary and has interests in electric generation ventures in Canada and the U.S.

**Please see the final pages of this document for important disclosure information.**

- **Other Canadian Electric Utilities** normalized earnings of \$5 million were flat year-over-year.

**Regulated Utilities — Caribbean** earnings of \$6 million were in line with Q2/12 results as increased electricity sales and lower operating expenses at Caribbean Utilities were offset by higher overall depreciation expenses and lower FortisTCI sales.

**Fortis Generation** earnings of \$3 million declined from \$5 million in Q2/12, primarily due to lower electricity production in Belize as a result of lower rainfall. Since the end of Q2/13, the hydroelectric generating facilities in Belize are running at full capacity as a tropical depression has provided precipitation to fill the Chalillo reservoir.

**Fortis Properties** earnings of \$9 million were up \$1 million year-over-year, largely due to better performance at the Hospitality Division, primarily from the hotel operations in Western Canada.

2) \$2mm related to the BCUC decision for the decrease in ROE and equity component in Q2/13.

3) \$13mm of income tax recovery in Q2/13 due to the enactment of higher tax deductions.

4) \$4mm of income tax recovery in Q2/13 due to the enactment of higher tax deductions.

5) \$32mm and \$3mm of costs incurred in Q2/13 and Q2/12, respectively, related to the CH Energy acquisition.

6) \$13mm of recoveries related to income taxes in Q2/13.

Source: Company reports, TD Securities.

#### Outlook

**Opportunities Abound in B.C.:** Approximately \$513 million has been spent on the \$900 million 335 MW Waneta Expansion in B.C. since construction began late in 2010. The project appears to be proceeding well, tracking on budget and on schedule for a spring 2015 in-service date. Over the next year, we expect Fortis to make progress on a number of proposed initiatives in B.C. including: 1) providing natural gas pipeline capacity to the proposed Woodfibre LNG export project, 2) a 60 MW hydro plant in the interior of B.C., and 3) an expansion of its existing Tilbury LNG facility to service boats and trucks with LNG fuel.

**2013 Capital Plan and Five-Year Outlook Remain Robust:** Fortis expects to spend approximately \$1.3 billion for its 2013 capital plan, which includes approximately \$50 million at CH Energy and slightly lower capital for the Waneta project in 2013 due to timing of payments. Spending for alternative energy projects at FortisBC Alternative Energy Services Inc. (FAES) in 2013 has also been delayed and is expected to be lower than the estimated \$43 million. Management's five-year gross capital expenditure program (2013–2017) is

unchanged at \$6.0 billion. This five-year plan is broken down with 55% expected to be spent at the Canadian Regulated Electric Utilities, 20% at the regulated gas utilities, 11% at Central Hudson, 4% at the Caribbean regulated electric utilities, and the remaining 10% in the non-regulated businesses.

**Regulatory Update:** Management now expects Phase 2 of the B.C. cost-of-capital hearing (affecting the Vancouver Island and Whistler Island utilities, and FortisBC Electric) to conclude in H1/14.

**Q3/13 Preview:** We are forecasting Q3/13 EPS of \$0.24, in line with Q3/12 results. Increased earnings, largely due to contribution from CH Energy and rate base growth could be offset by lower Caribbean Utilities earnings, decreased non-regulated properties contribution, increased financing costs along with a higher number of shares outstanding.

Source: Thomson, TD Securities.

### Justification of Target Price

Our \$36.00 target price is predicated 50% on each of our 2014 and 2015 financial estimates as follows: 1) 25% EV/EBITDA multiple of 11.5x, 2) 25% relative dividend yield of 150%, and 3) 50% free-cash-flow yield of 8.0%. Our target price also incorporates a 2.5% 10-year Government of Canada bond-yield assumption.

### Key Risks to Target Price

1) Higher-than-expected long-bond yields, 2) operational disruptions, 3) regulatory surprises, 4) unexpected large acquisitions, 5) sovereign risk, 6) escalating construction costs, 7) access to capital markets, and 8) integration risk.

### TD Investment Conclusion

Q2 results were in line with expectations, and we expect the company to focus on the integration of CH Energy. In our view, CH Energy and its rate payers gain the financial backing of a strong parent to help fund its future growth, benefit from the sharing of best practices across the Fortis group of utilities, receive benefits to improve its system reliability and efficiency for customers, while keeping its operations autonomous in the Fortis fold.

Fortis is the largest highly regulated investor-owned gas and electric distribution utility in Canada, and, therefore, we view it as a core holding. We expect the company's future growth to be largely driven by utility investments in Canada and the U.S. We believe that income-oriented investors will find the company's low-risk, utility-dominated business model attractive.

## Fortis Inc.

(FTS-T) C\$32.47

### Q3 Results In Line; Downgrading to HOLD on Lower Growth Outlook

**Event**

Fortis Q3/13 normalized EPS of \$0.24 was in line with our estimate, below recent consensus of \$0.26, and flat versus Q3/12 normalized EPS of \$0.24.

**Impact****SLIGHTLY NEGATIVE.**

Although the quarterly results were in line, helped by CH Energy along with higher rainfall increasing hydroelectric production, contributions from the Canadian regulated utilities were a bit softer than expected. The outlook for Fortis's Canadian regulated utilities remains muted as lower ROEs and some timing uncertainty over future regulatory decisions will dampen the benefits of continued rate base investment. We have revised our forecasts to reflect this outlook and believe that consensus estimates are too high generally and will need to come down.

As a result of our lowered forecasts, including a more moderate outlook for dividend increases, and our view that valuations are unlikely to expand over the next year (resulting in a 50 bps increase in our target AFFO yield to 8.5%), our target price declines by \$2 to \$34, and we are downgrading our recommendation to HOLD.

**Details**

**FortisBC Energy** Q3/13 earnings of (\$14) million decreased by \$8 million year-over-year, largely from the timing of operating and maintenance expenses and the May 2013 regulatory decision that decreased the ROE and equity component of the capital structure, partially offset by rate base growth.

**Regulated Electric Utilities — Canadian** Q3/13 normalized earnings of \$52 million were \$3 million lower year-over-year.

- **FortisAlberta** normalized earnings of \$26 million decreased slightly year-over-year, largely from lower net transmission revenues and were partially offset by rate base growth, an increase in customers, and the timing of operating expenses.

**Company Profile**

Fortis Inc. (FTS-T) is a diversified infrastructure holding company, primarily comprising of gas distribution and electric utilities in Canada, U.S., Turks and Caicos and the Cayman Islands. Fortis also owns a real estate and hotels subsidiary and has interests in electric generation ventures in Canada and the U.S.

Please see the final pages of this document for important disclosure information.

- **FortisBC Electric** earnings of \$11 million declined by \$2 million year-over-year primarily from a May 2013 regulatory decision that lowered the ROE, decreased pole-attachment revenue, and higher effective income taxes. Partially offsetting the decline was rate base growth from investments and the acquisition of the City of Kelowna's electrical utility (March 2013).
- **Newfoundland Power** earnings of \$8 million decreased slightly year-over-year, largely due to higher effective income taxes and was partially offset by rate base growth.
- **Other Canadian Electric Utilities** earnings of \$7 million increased by \$1 million year-over-year.

**Central Hudson (Regulated Utilities — U.S.)** earnings for Q3/13 were \$12 million and were comparable with Q3/12 results despite a 34 GWh year-over-year decline in electricity sales to 1,420 GWh due to cooler temperatures. Fortis completed its acquisition of CH Energy in June 2013.

**Regulated Utilities — Caribbean** earnings of \$6 million were in line with Q3/12 results as increased electricity rates were offset by higher overall depreciation expenses.

**Non-Regulated Fortis Generation** earnings of \$8 million increased from \$5 million in Q3/12, primarily due to higher electricity production in Belize as a result of higher rainfall.

**Other Non-Regulated Businesses** now includes Griffith, which is the non-regulated operations of CH Energy. Year-over-year earnings were down \$2 million due to a net loss of \$2.5 million at Griffith resulting from seasonality. This was partially offset by better performance at Fortis Properties's Hospitality Division. As a reminder, Griffith's business involves selling petroleum products and related services to customers in the U.S. Mid-Atlantic region.

Notes: Earnings have been normalized for the following items:

- 1) \$1mm of costs related to flooding in southern Alberta in Q3/13.
- 2) \$2mm of costs related to the redemption of preferred shares in Q3/13.
- 3) \$0.5mm of costs related to the CH Energy acquisition in Q3/12.

Source: Company reports, TD Securities.

**Outlook**

**B.C. Projects Proceeding:** Approximately \$534 million has been spent on the \$900 million 335 MW Waneta Expansion in B.C. since construction began late in 2010. Over the next year, we also expect Fortis to make progress on a number of proposed initiatives in B.C., including a potential 60 MW hydro plant in the interior of B.C. The company will continue public consultations, discussion with First Nations and feasibility studies, and could be in a position to announce an investment decision in 2014. Other potential B.C. projects could involve providing natural gas pipeline capacity to the proposed Woodfibre LNG export project, and an expansion of its existing Tilbury LNG facility to service boats and trucks with LNG fuel.

**Updated Capital Guidance:** Fortis expects to spend approximately \$1.2 billion for its 2013 capital plan, down \$150 million due to timing of expenditures at the Waneta Expansion, labour disruptions at FortisBC Electric and uncertainty of the timing of alternative energy projects at FAES. There is no change to the five-year capital expenditure forecast (2013–2017) of \$6.0 billion with 53% expected to be spent at the Canadian Regulated Electric Utilities, 21% at the regulated gas utilities, 11% at Central Hudson, 4% at the Caribbean regulated electric utilities, and the remaining 11% in the non-regulated businesses.

**Regulatory Updates:** Management continues to expect Phase 2 of the B.C. Generic Cost-of-Capital hearing (affecting the Vancouver Island and Whistler Island utilities, and FortisBC Electric) to conclude in H1/14. With respect to the Alberta Generic Cost-of-Capital hearing, the proceedings are underway with a hearing scheduled for early 2014. Timing of a final decision on this front is currently unknown.

**Q4/13 Preview:** We are forecasting Q4/13 EPS of \$0.44, slightly lower than Q4/12 results. Increased earnings, largely due to contribution from CH Energy and rate base growth could be offset by lower non-regulated properties contribution, increased financing costs along with a higher number of shares outstanding.

Source: Thomson, TD Securities.

**Justification of Target Price**

Our \$34.00 target price is predicated 25% and 75% on our 2014 and 2015 financial estimates, respectively, as follows: 1) 25% EV/EBITDA multiple of 11.5x, 2) 25% relative dividend yield of 150%, and 3) 50% free-cash-flow yield of 8.5%. Our target price also incorporates a 2.5% 10-year Government of Canada bond-yield assumption.

**Key Risks to Target Price**

1) Higher-than-expected long-bond yields, 2) operational disruptions, 3) regulatory surprises, 4) unexpected large acquisitions, 5) sovereign risk, 6) escalating construction costs, and 7) access to capital markets.

**TD Investment Conclusion**

Although Q3 results were in line with our expectations, we see limited regulated earnings growth in the next year and also do not foresee much potential for valuation expansion over this time frame. Although our view of Fortis's high-quality assets and low-risk business model might cause it to remain a core holding in certain income-oriented portfolios, we believe that investors with some risk appetite will see better return potential over the next year in higher growth names.

Fortis is the largest highly regulated investor-owned gas and electric distribution utility in Canada, and, therefore, we view it as a core holding. We expect the company's future growth to be largely driven by utility investments in Canada and the U.S. and continue to believe that income-oriented investors will find the company's low-risk, utility-dominated business model attractive. However, given the total implied returns to our target, we are compelled to downgrade the stock to HOLD.

## Fortis Inc.

(FTS-T) C\$31.22

### BC Government Expedites Tilbury LNG Facility Investment

#### Event

FortisBC, a subsidiary of Fortis Inc., announced that it is proceeding with an approximate \$400 million expansion of its Tilbury LNG Facility.

#### Impact

#### SLIGHTLY POSITIVE.

The B.C. government announced changes that effectively exempted Fortis' Tilbury LNG Facility expansion from needing a certificate of public convenience and a necessity review by the British Columbia Utilities Commission (BCUC). We view the announcement positively as it expedites Fortis' ability to supply liquefied natural gas (LNG) to the B.C. marketplace. Based on our assumptions, we believe the investment could represent approximately \$0.02 of EPS accretion once in-service.

#### Details

- **Description:** The project is an expansion of the existing Tilbury LNG facility and will help to service the transportation sector with LNG fuel. The expansion project will include the construction of a second tank and a new liquefier, both of which are expected to be in service by mid-2016. The project will add approximately one million gigajoules of LNG storage, in addition to 30,000 - 60,000 gigajoules of liquefaction capacity per day.
- **Capital Cost:** Fortis expects an investment of up to \$400 million and the project will be a regulated gas investment within FortisBC. We expect approximately one-third of the total capital will be spent in each of 2014-2016.
- **Returns:** The company expects to earn AEDC (allowance for equity return during construction) for the project, with an 8.75% ROE and 38.5% equity thickness. As part of the BC Government's direction, the BCUC will set the LNG dispensing rate at \$4.35/gigajoule.
- **Financing:** The company expects to finance the expansion initially with debt as part of its natural gas regulated rate base.
- **Timing and Approvals:** The project is subject to FortisBC Board approval along with regulatory and environmental permits and approvals.

#### Company Profile

Fortis Inc. (FTS-T) is a diversified infrastructure holding company, primarily comprising of gas distribution and electric utilities in Canada, U.S., Turks and Caicos and the Cayman Islands. Fortis also owns a real estate and hotels subsidiary and has interests in electric generation ventures in Canada and the U.S.

**Please see the final pages of this document for important disclosure information.**

**Helps Stabilize Customer Rates:** FortisBC expects its gas utility customers to benefit from the additional gas volumes that move through the pipeline system as increased utilization of the infrastructure helps to keep natural gas delivery rates stable.

### Outlook

**Other Projects Updates:** Over the next year, we also expect Fortis to make progress on a number of proposed initiatives in B.C. These could include:

- **Regulated Gas Opportunities:** Fortis is evaluating potential B.C. opportunities that could involve providing natural gas pipeline capacity to the proposed Woodfibre LNG export project. The investment could be in the range of \$350 million and would be an expansion of its pipeline system through compression / twinning of pipelines. We expect a decision could be made over the next 6 – 12 months.
- **Power Generation Opportunities:** A potential 60 MW hydro plant in the interior of B.C., costing approximately \$200 million-\$300 million. The company will continue public consultations, discussion with First Nations and feasibility studies, and could be in a position to announce an investment decision in 2014.

**Regulatory Updates:** Management continues to expect Phase 2 of the B.C. Generic Cost-of-Capital hearing (affecting the Vancouver Island and Whistler Island utilities, and FortisBC Electric) to conclude in H1/14. With respect to the Alberta Generic Cost-of-Capital hearing, the proceedings are underway with a hearing scheduled for early 2014. Timing of a final decision on this front is currently unknown. With respect to the Alberta PBR Capital Tracker Filing, the Decision on Fortis' compliance filing appears to be a step in the right direction with approximately 60% of the capital tracker revenue accepted on an interim basis. A final capital tracker decision is expected in Q4/13.

### **Exhibit 1. Summary of Regulatory Decisions**

Utility	Significant Proceedings	Filing	Expected Decision
FortisBC (Gas)	Generic Cost of Capital – 2013 (Phase 1)	March-12	Released

Source: Thomson, TD Securities.

**Justification of Target Price**

Our \$34.00 target price is predicated 25% and 75% on our 2014 and 2015 financial estimates, respectively, as follows: 1) 25% EV/EBITDA multiple of 11.5x, 2) 25% relative dividend yield of 150%, and 3) 50% free-cash-flow yield of 8.5%. Our target price also incorporates a 2.5% 10-year Government of Canada bond-yield assumption.

**Key Risks to Target Price**

1) Higher-than-expected long-bond yields, 2) operational disruptions, 3) regulatory surprises, 4) unexpected large acquisitions, 5) sovereign risk, 6) escalating construction costs, and 7) access to capital markets.

**TD Investment Conclusion**

We view the announcement positively as it allows Fortis to move forward with the Tilbury LNG Facility expansion and could create momentum for its other infrastructure projects in B.C.

Fortis is the largest highly regulated investor-owned gas and electric distribution utility in Canada, and, therefore, we view it as a core holding. We expect the company's future growth to be largely driven by utility investments in Canada and the U.S. and continue to believe that income-oriented investors will find the company's low-risk, utility-dominated business model attractive.

## Fortis Inc.

(FTS-T) C\$30.21

### Resuming Coverage: UNS Acquisition a Platform for Future Growth

**Event**

- We are resuming coverage of Fortis after a \$1.8 billion convertible debenture offering to help finance the pending acquisition of UNS Energy Corp. (UNS-N).
- On December 11, 2013, Fortis announced that it entered into an agreement and plan of merger to acquire UNS Energy for US\$60.25 per common share in cash, for an aggregate purchase price of approximately US\$4.3 billion, including the assumption of approximately US\$1.8 billion of debt and capital leases.

**Impact****POSITIVE.**

We view the pending acquisition of UNS Energy positively as it is expected to be immediately accretive to Fortis' EPS once completed (excluding one-time transaction costs of approximately US\$30 million). The acquisition would also establish a platform in the US Southwest for future growth in a supportive regulatory environment. We calculate that the acquisition could be approximately \$0.10 accretive to EPS during its first full year of ownership (likely 2015) and should increase in future years as rate base investments are made. Based on this forecast accretion, we believe that the acquisition of UNS Energy should generate \$2 per share in incremental value for Fortis shareholders. We have updated our forecasts for a transaction close in late 2014. Our 2014 estimates decline largely due to interest costs associated with the convertible debenture offering, while our 2015 forecasts increase as they incorporate the acquisition.

**Upgrading to BUY:** Back on November 4, 2013 (after Q3/13 earnings), we downgraded Fortis based on our outlook calling for lower growth. Since then, Fortis' share price has fallen 6.9%, and has underperformed its comparable power and utility peers, which have declined by 1.3% on average. We believe the UNS Energy acquisition could bolster the growth pipeline and provide earnings accretion in 2015 and onwards by establishing a platform for future growth. Our target price increases with this transaction and updated forecasts by \$2. Given the implied returns to our target, we are raising our recommendation to BUY.

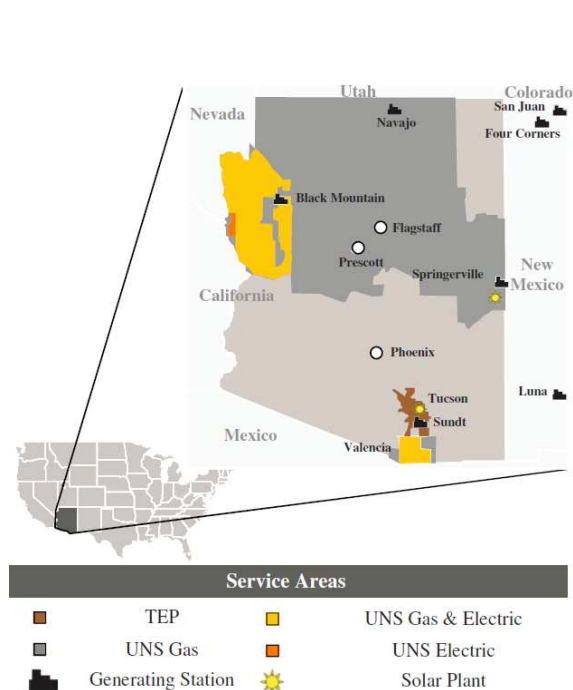

**Company Profile**

Fortis Inc. (FTS-T) is a diversified infrastructure holding company, primarily comprising of gas distribution and electric utilities in Canada, U.S., Turks and Caicos and the Cayman Islands. Fortis also owns a real estate and hotels subsidiary and has interests in electric generation ventures in Canada and the U.S.

**Details**

- **UNS Energy Description:** A vertically integrated regulated utility in Arizona serving approximately 505,000 electric and 149,000 gas customers. It owns or leases 2,420 MW of net generation capacity, and has a rate base expected to reach approximately US\$3 billion at the end of 2014.

**Exhibit 1. UNS Energy: Service Area and Description****Tucson Electric Power (TEP)**

- **Description:** Vertically integrated regulated electric utility
- **Customers & Service Territory:** Generates, transmits and distributes electricity to approximately 412,000 retail electric customers in southern Arizona. TEP's service territory covers 1,155 square miles (2,991 square kilometres) and includes a population of approximately 1,000,000 people in the greater Tucson metropolitan area in Pima County, as well as parts of Cochise County.
- **Size:** Represents approximately 84% of the total assets as at September 30, 2013 and approximately 81% of operating revenues for the nine months ended September 30, 2013.

**UNSGas**

- **Description:** Regulated gas distribution company
- **Customers & Service Territory:** Serves approximately 149,000 retail customers in northern Arizona's Mohave, Yavapai, Coconino and Navajo counties, as well as Santa Cruz County in southern Arizona. These counties, with a combined population of approximately 700,000, comprise approximately 50% of the territory in the State of Arizona.
- **Size:** Represents approximately 7% of the total assets as at September 30, 2013 and approximately 8% of operating revenues for the nine months ended September 30, 2013.

**UNSElectric**

- **Description:** Vertically integrated regulated electric utility
- **Customers & Service Territory:** Serves approximately 93,000 retail customers in Arizona's Mohave and Santa Cruz counties. These counties have a combined population of approximately 250,000.
- **Size:** Represents approximately 9% of the total assets as at September 30, 2013 and approximately 11% of operating revenues for the nine months ended September 30, 2013.

**Millennium and UniSource Energy Development Company (Non-Regulated)**

- **Description:** SES, a wholly owned subsidiary of Millennium provides electrical contracting and meter reading services in Arizona, as well as other services at Springerville.
- **Size:** Comprises less than 1% of total assets.

Source: Company Reports, TD Securities.

- **Purchase Price and Acquisition Metrics:** The US\$60.25 per share offer represents an approximate 31% premium above UNS Energy's closing price on December 11, 2013, resulting in a net purchase price of approximately US\$2.5 billion (EV of US\$4.3 billion), representing a P/E multiple of 18.1x 2014E EPS, and an EV/EBITDA multiple of 8.3x 2014E EBITDA.
- **Competing Offers Possible But Unlikely:** The merger agreement was a result of negotiations, rather than a full auction process. However, given what we view to be a fair price, we do not expect any higher competing offers. The transaction includes a break fee of US\$63.9 million (US\$1.52 per UNS share) plus acquisition related expenses up to US\$12.5 million (US\$0.30 per UNS share).
- **Financing:** Fortis expects to fund the approximate US\$2.5 billion cash portion by using the net proceeds of the \$1.8 billion convertible debenture financing, approximately \$500 - \$600 million in preferred shares, and the balance with corporate level debt.
- **Timing and Approvals:** The transaction is expected to close by the end of 2014, subject to UNS Energy common shareholder approval and certain regulatory and government approvals, including approval by the Arizona Corporation Commission (ACC) and Federal Energy Regulatory Commission, and the satisfaction of customary closing conditions. We believe the regulatory approval risk is low and expect the ACC to approve the acquisition given Fortis' reputation and track record of successful utility acquisitions, and its intention to operate UNS Energy as a standalone entity.

**Merits of the Transaction:**

- **Accretive Acquisition:** We estimate the acquisition could be approximately \$0.10 accretive to EPS during the first full year of ownership, excluding one-time acquisition-related expenses, and could grow as rate base investments are made over time.

Source: Company Reports, TD Securities.

- **Provides Diversification:** UNS Energy would increase the diversification of Fortis' regulated assets and earnings by geographic location and regulatory jurisdiction.

## Exhibit 3. Fortis: Segmented Earnings Breakdown (2013E and 2015E)

Source: Company Reports, TD Securities.

- **Supportive Regulatory Regime:** UNS Energy operates within a supportive regulatory environment regulated by the Arizona Corporation Commission (ACC) on a cost-of-service basis, with rate-design structures that pass through costs related to fuel, purchased power, environmental compliance, renewable resources, energy efficiency and distributed generation.

## Exhibit 4. UNS Energy: ROEs and Equity Thickness

	TEP	UNSElectric	UNSGas
ROE	10.0%	9.5%	9.75%
Equity Thickness	43.5%	52.6%	50.82%

Source: Company Reports, TD Securities.

- **Significant Rate Base Growth:** UNS Energy is forecasting capital investments totalling approximately US\$2.3 billion from 2013 through to 2018. Rate base is expected to grow at a CAGR of approximately 7% through 2018, which should result in similar earnings growth, in our view. Growth in the region should be supported by favourable local economic conditions, and should result in continued investment in UNS Energy's electric and gas businesses.

## Exhibit 5. UNS Energy: Capital Expenditures

Source: Company Reports.

- **Building a Significant Platform in the US Southwest:** UNS Energy will further Fortis' strategy of entering into the US regulated electric and gas distribution business with what we view to be a significant utility operating in a favourable jurisdiction.
- **Well Run Utility with an Experienced Management Team:** UNS Energy is a well-run utility with an experienced management team. Management has demonstrated strong regulatory expertise, completing each of the past three rate cases in approximately one year on average.

Source: Thomson, TD Securities.

## Justification of Target Price

Our \$36.00 target price is predicated 25% and 75% on our 2014 and 2015 financial estimates, respectively, as follows: 1) 25% EV/EBITDA multiple of 11.5x, 2) 25% relative dividend yield of 150%, and 3) 50% free-cash-flow yield of 8.5%. Our target price also incorporates a 2.5% 10-year Government of Canada bond-yield assumption.

## Key Risks to Target Price

1) Higher-than-expected long-bond yields, 2) operational disruptions, 3) regulatory decisions and surprises, 4) unexpected large acquisitions, 5) sovereign risk, 6) escalating construction costs, and 7) access to capital markets.

## TD Investment Conclusion

If successful, we view the UNS acquisition positively as the transaction should provide Fortis with a source of stable, regulated earnings, in a favourable regulatory jurisdiction with the potential to expand in the U.S. Southwest.

Fortis is the largest highly regulated investor-owned gas and electric distribution utility in Canada and we view it as a core holding. We expect the company's future growth to be largely driven by utility investment in Canada and the US. We believe investors will find the company's low-risk, utility-dominated business model attractive, and given the implied returns to our target, we are upgrading the stock to BUY.

## Fortis Inc.

(FTS-T) C\$30.65

### A Solid End to 2013: 2014 Capital Plan of \$1.4 Billion Announced

**Event**

Fortis Q4/13 normalized EPS of \$0.47 was in line with the recent consensus of \$0.48, but slightly above our \$0.44 estimate and Q4/12 normalized EPS of \$0.45.

**Impact****NEUTRAL.**

The results were slightly higher than our forecasts, primarily as a result of: 1) growth in the Caribbean regulated electric utilities earnings, and 2) lower corporate and other expenses. We have revised our forecasts to reflect the quarter's results, revised foreign exchange assumptions, and updated capital plan. We remain a BUY with a \$36 target price.

**Details**

**FortisBC Energy** Q4/13 earnings of \$50 million increased by \$1 million y/y, largely because of lower finance charges and rate base growth. This was partially offset by the impact of a lower allowed ROE and equity component of capital structure.

**Regulated Electric Utilities — Canadian** Q4/13 normalized earnings of \$44 million were \$4 million lower y/y.

- **FortisAlberta** earnings of \$18 million decreased by \$4 million y/y, largely because of the timing of depreciation and operating expenses, along with lower net transmission revenues. This decline was partially offset by rate base growth and an increase in customers.
- **FortisBC Electric** earnings of \$13 million increased by \$1 million y/y, primarily because of rate base growth from investments and the acquisition of the City of Kelowna's electrical utility (March 2013).
- **Newfoundland Power** normalized earnings of \$9 million were flat y/y.

Please see the final pages of this document for important disclosure information.

**Company Profile**

Fortis Inc. (FTS-T) is a diversified infrastructure holding company, primarily comprising of gas distribution and electric utilities in Canada, U.S., Turks and Caicos and the Cayman Islands. Fortis also owns a real estate and hotels subsidiary and has interests in electric generation ventures in Canada and the U.S.

- **Other Canadian Electric Utilities** earnings of \$4 million declined by \$2 million y/y, largely because of the impact of the cumulative return adjustment on smart meter investments at FortisOntario in 2012, partially offset by the timing of a regulatory adjustment at Maritime Electric in 2013.

**Central Hudson (Regulated Utilities — US)** earnings for Q4/13 were \$11 million and were consistent with expectations and comparable with Q4/12 results. Electricity sales in Q4/13 were 1,209 GWh, comparable to 1,210 GWh in Q4/12. Gas volumes in Q4/13 were 5 PJs versus 6 PJs in Q4/12, largely because of decreased volumes delivered to a power-generating facility as a result of lower facility operations and volumes for resale.

**Regulated Utilities — Caribbean** earnings of \$8 million were \$5 million higher than Q4/12, and were driven by the capitalization of overhead costs of \$3 million in Turks & Caicos, as approved by the government in December 2013. In addition, Caribbean Utilities earnings benefited from a 1.8% increase in base customer growth and higher electricity sales.

**Non-Regulated Fortis Generation** earnings of \$4 million increased by \$3 million y/y, primarily because of higher electricity production in Belize.

**Other Non-Regulated Businesses** earnings of \$3 million were \$2 million lower y/y. Fortis Properties earnings were \$5 million for the quarter, while seasonal net losses at the non-regulated operations at CH Energy (scheduled to be sold) were \$2 million.

Normalized **Corporate and Other Expenses** in Q4/13 of \$19 million were flat y/y, as a foreign exchange gain of \$3 million and an income tax recovery helped offset higher finance charges associated with the CH Energy Group acquisition.

#### Exhibit 1. Segmented Earnings (\$mm, unless stated otherwise)

<b>Operating EPS (f.d)</b>	<b>\$0.47</b>	<b>\$0.45</b>	<b>\$0.02</b>	<b>5%</b>
<b>Reported EPS (f.d)</b>	<b>\$0.47</b>	<b>\$0.45</b>	<b>\$0.02</b>	<b>4%</b>

Notes: Earnings have been normalized for the following items:

1) \$1 million in Q4/12 as a result of a distribution revenue requirements decision received in April 2012 related to other periods.

2) \$1 million gain on sale of land in Q4/13.

3) \$0.5 million gain recognized in Q4/12 on the disposition of assets.

4) \$2 million of expenses related to the UNS Energy acquisition in Q4/13 and a \$3 million provision recognized in Q4/12 associated with the company's investment in CWLP.

Source: Company reports, TD Securities.

**Outlook**

**Update on UNS Energy Acquisition:** Recently, the Arizona Corporation Commission's (ACC) approval process for the UNS Energy acquisition was released (Exhibit 2). It was in line with management's expectations. If the ALJ hearing commences as expected, Fortis still expects the transaction to close by the end of Q4/14. As a reminder, the acquisition is subject to UNS Energy common shareholder approval and certain regulatory and government approvals, including approval by the ACC and Federal Energy Regulatory Commission, and the satisfaction of customary closing conditions.

**Exhibit 2. Schedule of Key Regulatory Events**

Date	Event
22-Apr-14	ACC Staff / Intervenor Testimony
28-Apr-14	Settlement Discussions Begin
12-May-14	Settlement Agreement Filed
30-May-14	Testimony in Support of/ Opposition to Settlement Agreement
13-Jun-14	Settlement Agreement Responsive Testimony
7-May-14	Rebuttal Testimony (if No Settlement)
30-May-14	ACC Staff / Intervenor Rebuttal Testimony (if No Settlement)
13-Jun-14	UNSEnergy and Fortis Rejoinder Testimony (if No Settlement)
16-Jun-14	ALJ Hearing Commences

Source: Company reports.

**Capital Expenditure Update:** For 2014, management expects consolidated capital expenditures of \$1.4 billion, up from \$1.2 billion in 2013, with the y/y increase primarily coming from higher spending at FortisBC Energy, Central Hudson (full-year effect), and FortisBC Electric. Over the five-year period 2014 through 2018, consolidated gross capital expenditures (excluding UNS Energy) are expected to exceed \$6.5 billion. UNS Energy has forecast capex of approximately US\$1.4 billion during 2015–2018.

**Regulatory Outlook:** In 2014, PBR (performance-based regulation) and cost of capital proceedings continue in Alberta and BC. Central Hudson is scheduled to file a GRA (general rate application) in mid-2014 for rates effective mid-2015.

**Q1/14 Preview:** We are forecasting Q1/14 EPS of \$0.66, slightly above Q1/13 results of \$0.65. Increased earnings, largely as a result of contribution from the CH Energy acquisition and rate base growth could be offset by increased financing costs, along with a higher number of shares outstanding.

Source: Thomson, TD Securities.

**Justification of Target Price**

Our \$36.00 target price is predicated on our 2015 financial estimates as follows: 1) 25% EV/EBITDA multiple of 10.5x, 2) 25% relative dividend yield of 150%, and 3) 50% free-cash-flow yield of 9.0%. Our target price also incorporates a 2.5% 10-year Government of Canada bond-yield assumption.

**Key Risks to Target Price**

Key risks to our target price include: 1) Higher-than-expected long-bond yields, 2) operational disruptions, 3) regulatory surprises, 4) unexpected large acquisitions, 5) sovereign risk, 6) escalating construction costs, 7) access to capital markets, and 8) pending acquisitions.

**TD Investment Conclusion**

2014 will be another busy year for the company as it works towards closing the UNS Energy acquisition, along with executing its \$1.4 billion capital program.

Fortis is the largest highly regulated investor-owned gas and electric distribution utility in Canada and we view it as a core holding. We expect the company's growth to be largely driven by utility investment in Canada and the U.S. We believe that investors will find the company's low-risk, utility-dominated business model attractive, and given the implied returns to our target price, we are maintaining our BUY recommendation.

## Fortis Inc.

(FTS-T) C\$32.38

### Q1 Ahead of Expectations; BC Hydro and LNG Projects Progressing

**Event**

Fortis reported normalized Q1/14 EPS (f.d.) of \$0.70, above our \$0.66 estimate, recent consensus of \$0.64, and Q1/13 normalized EPS (f.d.) of \$0.65.

**Impact**

**SLIGHTLY POSITIVE.**

**Higher Rainfall in Belize and Load Growth in the Caribbean:** The Non-Regulated Generation segment benefited more than expected from higher rainfall in Belize increasing hydro sales, and increased production in Upstate New York (a generating unit returned to service in October 2013). In addition, the Caribbean Regulated Utilities' Q1/14 earnings increased by two-thirds y/y, driven by higher sales of electricity.

**Increase in Forecasts and Target Price; Introducing Estimates for 2016:**

We have updated our forecasts with a number of changes, including the quarter's results, revised financing assumptions, and updated capital spend in addition to introducing our forecasts for 2016. Our 2016E EPS of \$2.17 increases by 9% over our 2015E EPS, primarily a result of rate base growth in the Canadian and U.S. utilities, and a full-year contribution from the Waneta Expansion project. Our target price increases by \$2 to \$38 as a result of rolling forward our target price derivation by a quarter to be one-quarter based off 2016 estimates.

**TD Investment Conclusion**

2014 will be another busy year for the company as it works toward closing the UNS Energy acquisition, along with executing its \$1.4-billion capital program. Fortis is the largest highly regulated investor-owned gas and electricity distribution utility in Canada and we view it as a core holding. We expect the company's future growth to be largely driven by utility investment in Canada and the U.S., and believe that investors will find the company's low-risk, utility-dominated business model attractive.

**Please see the final pages of this document for important disclosure information.**

**Company Profile**

Fortis Inc. (FTS-T) is a diversified infrastructure holding company, primarily comprising gas distribution and electric utilities in Canada, the U.S., Turks and Caicos and the Cayman Islands. Fortis also owns a real estate and hotels subsidiary and has interests in electricity generation ventures in Canada and the U.S.

**Details**

**FortisBC Energy** Q1/14 earnings of \$79 million decreased y/y as a result of lower ROE and equity thickness resulting from the regulatory decision (stage one of the GCOC Proceeding) received in Q2/13. The cumulative effect of the decision was recognized in Q2/13.

**Regulated Electric Utilities — Canadian** Q1/14 earnings of \$60 million were \$6 million higher y/y.

- **FortisAlberta** earnings of \$25 million increased by \$1 million over adjusted Q1/13 results, largely as a result of rate base and customer growth.
- **FortisBC Electric** earnings of \$18 million were flat versus Q1/13.
- **Newfoundland Power** earnings of \$10 million were up \$3 million y/y, largely owing to rebasing of customer electricity rates, effective July 1, 2013.
- **Other Canadian Electric Utilities** earnings of \$7 million increased \$1 million y/y, primarily driven by growth in sales of electricity at FortisOntario.

**Central Hudson (Regulated Utilities — US)** (acquired in June 2013) earnings for Q1/14 were \$18 million and up slightly y/y. Electricity sales in Q1/14 were 1,407 GWh and gas volumes were 10 PJs, both of which increased versus Q1/13 because of colder weather.

**Regulated Utilities — Caribbean** earnings of \$5 million were \$2 million higher than Q1/13, largely because of the warmer temperature in Grand Cayman driving air conditioner load and an improvement in tourism and the number of customers in the Turks & Caicos Islands.

**Non-Regulated Fortis Generation** earnings of \$6 million increased by \$4 million y/y, primarily because of an increase in the production of electricity in Belize and Upstate New York.

Normalized **Corporate and Other expenses** of \$17 million in Q1/14 were in line with Q1/13 results.

**Exhibit 1. Segmented Earnings (\$mm, unless stated otherwise)**

<b>Reported EPS (f.d)</b>	<b>\$0.67</b>	<b>\$0.76</b>	<b>(\$0.09)</b>	<b>-12%</b>

Notes: Earnings have been normalized for the following items:

- 1) A \$2mm (after tax) adjustment recognized in Q1/13 related to the finalization of 2012 net transmission volume variances.
- 2) A \$22mm (after tax) gain in Q1/13 related to the settlement of the Exploits River Hydro Partnership.
- 3) \$11mm (after tax) of convertible debt interest related to the pending UNS Energy acquisition.
- 4) \$2mm (after tax) of costs related to the pending UNS Energy acquisition.
- 5) \$1mm (after tax) of costs incurred in Q1/13 related to the CH Energy acquisition.
- 6) \$5mm (after tax) of earnings from discontinued operations (Griffith Energy).

**Outlook**

**UNS Energy Update:** In March 2014, UNS Energy shareholders approved the acquisition of UNS Energy by Fortis, and in April 2014, the U.S. FERC approved the transaction. Also in April, the ACC (Arizona Corporation Commission) Staff and other Intervenor indicated in filings of direct testimony in the merger proceeding that they would support the merger subject to certain conditions. Management believes that the approval process is progressing well, and expects the acquisition to close by the end of 2014. Excluding one-time acquisition-related costs, the transaction is expected to be accretive to EPS in the first full year after closing.

**Exhibit 2. UNS Energy: Schedule of Key Regulatory Events**

Date	Event
16-May-14	Settlement Agreement Filed
2-Jun-14	Testimony in Support of/ Opposition to Settlement Agreement
13-Jun-14	Settlement Agreement Responsive Testimony
16-May-14	Rebuttal Testimony (if No Settlement)
2-Jun-14	ACC Staff / Intervenor Rebuttal Testimony (if No Settlement)
13-Jun-14	UNS Energy and Fortis Rejoinder Testimony (if No Settlement)
16-Jun-14	ALJ Hearing Commences

Source: Company reports.

**Regulatory Update:** The Alberta cost-of-capital proceeding is continuing in Alberta, and 2014-2018 PBR (performance-based regulation) applications are progressing in BC. In H2/14, Central Hudson will file a GRA (general rate application) for rates effective mid-2015.

**Exhibit 3. Regulatory Proceedings Underway**

Utility	Application / Proceeding	Filing Date	Expected Decision
FEI	Multi-Year PBR Plan (2014-2018)	June 2013	H2 / 2014
FortisBC Electric	Multi-Year PBR Plan (2014-2018)	July 2013	H2 / 2014
FortisAlberta	Generic Cost of Capital - 2013 and 2014	n.a.	Late 2014
	Capital Tracker Applications - 2013 to 2015	May 2014	TBD
Central Hudson	General Rate Application (for Mid-2015)	H2 / 2014	H1 / 2015

Source: Company reports.

**Project Updates:**

- **Waneta Expansion:** The \$900 million 335 MW expansion of the Waneta hydroelectric generating facility in BC is continuing on time and on budget, with \$603 million invested to date, and completion scheduled for spring 2015.
- **Tilbury LNG:** Fortis has commenced preliminary work related to the \$400-million expansion of its existing Tilbury LNG facility in B.C., which includes a second LNG tank and a new liquefier. The project is scheduled to be completed in 2016, subject to certain approvals.
- **Similkameen Hydro:** Fortis continues to develop other power generation opportunities, and is currently exploring a potential 50–60 MW hydroelectric dam and generating facility in B.C., costing approximately \$200 million–\$300 million. Fortis would likely structure an agreement similar to a long-term PPA with off-takers, with zero commodity exposure. Other benefits of the project would include providing water management and summer irrigation to downstream states, which could help to improve the project economics. The company will continue with its consultations and feasibility studies, and could be in a position to announce an investment decision in 2014.

- **Woodfibre LNG Gas Opportunity:** Fortis is also evaluating a potential project that could involve providing natural gas pipeline capacity to the proposed Woodfibre LNG export project. The investment would be in the range of \$400 million and could involve pipeline expansions or the addition of compression.

**2014 Capital Plan and Five-Year Outlook Remain Robust:** Fortis' consolidated capital forecast of \$1.4 billion for 2014 is unchanged. Over the five-year period from 2014 through 2018, consolidated gross capital expenditures (excluding UNS Energy) are expected to exceed \$6.5 billion. UNS Energy has a forecast capex of approximately US\$1.4 billion from 2015–2018.

**Q2/14 Preview:** We are forecasting Q2/14 EPS of \$0.34, slightly above the Q2/13 result of \$0.33. Increased earnings, largely driven by contribution from the CH Energy acquisition and rate base growth, could be offset by increased financing costs, along with a higher number of shares outstanding.

### Justification of Target Price

Our \$38.00 target price is predicated 75% and 25% on our financial estimates for 2015 and 2016, respectively, as follows: 1) 25% EV/EBITDA multiple of 10.5x, 2) 25% relative dividend yield of 150%, and 3) 50% free-cash-flow yield of 9.50%. Our target price also incorporates a 2.5% 10-year Government of Canada bond-yield assumption.

### Key Risks to Target Price

Key risks to target price include: 1) Higher-than-expected long-bond yields, 2) operational disruptions, 3) regulatory surprises, 4) unexpected large acquisitions, 5) sovereign risk, 6) escalating construction costs, 7) access to capital markets, and 8) closing of pending acquisitions.

## Fortis Inc.

(FTS-T) C\$32.40

### UNS Energy Settlement Agreement Filed With the ACC

**Event**

Fortis and UNS Energy (UNS-NYSE) have filed a Settlement Agreement with the Arizona Corporation Commission (ACC) requesting an approval of the proposed acquisition of UNS Energy by Fortis with certain conditions.

**Impact****SLIGHTLY POSITIVE.**

Given the Settlement Agreement was reviewed and agreed upon by key stakeholders, along with the transaction being deemed by the parties to be in the public's interest, we view the settlement as a positive step forward and an endorsement by the stakeholders that the ACC approve the acquisition of UNS Energy by Fortis.

**TD Investment Conclusion**

2014 will be another busy year for Fortis as it works toward closing the UNS Energy acquisition along with executing on its \$1.4 billion capital program. Fortis is the largest highly regulated investor-owned gas and electric distribution utility in Canada and we view it as a core holding. We expect the company's future growth to be largely driven by utility investment in Canada and the US, and believe investors will find the company's low-risk, utility-dominated business model attractive.

**Details**

**Filing Was Imminent:** In Fortis' Q1/14 release, management indicated that the Settlement Agreement was likely to be filed shortly, and that they viewed the approval process to be progressing well. On May 16, 2014, UNS Energy, Fortis, ACC Staff, the Residential Utility Consumer Office (RUCO) and other stakeholders entered into a settlement whereby the above parties agreed that the transaction was in the public's interest, and recommended approval by the ACC, subject to certain conditions. A summary of the conditions are below.

- **Customer Benefits:** UNS Energy will provide US\$30 million of direct customer benefits over five years, with \$10 million payable in year one, and \$5 million payable in each of years two through five. These benefits will be shared by the retail customers of Tucson Electric Power Company (TEP), UNS Electric, Inc. and UNS Gas, Inc. (the Regulated Utilities). In addition, the benefits from the sale of coal to third parties (otherwise used for TEP generation), will be passed onto TEP ratepayers.

**Company Profile**

Fortis Inc. (FTS-T) is a diversified infrastructure holding company, primarily comprising gas distribution and electric utilities in Canada, the U.S., Turks and Caicos and the Cayman Islands. Fortis also owns a real estate and hotels subsidiary and has interests in electricity generation ventures in Canada and the U.S.

Please see the final pages of this document for important disclosure information.

- **Ring-Fence Protection and Corporate Governance:** UNS Energy and the Regulated Utilities will establish appropriate ring fencing measures to protect the Regulated Utilities and its customers, along with establishing certain corporate governance provisions.
- **Dividend Restrictions at the Regulated Utilities:** The dividends paid from the Regulated Utilities to UNS Energy cannot exceed 60% of the Regulated Utilities' respective net income for a period of five years or until their respective equity capitalization reaches 50% of total capital (excluding goodwill). These dividend restrictions are contingent upon receiving consent from the lenders in UNS Energy's credit facility.
- **Equity Infusion Increased Slightly:** Fortis will make an equity infusion of US\$220 million (previously US\$200 million) through UNS Energy into the Regulated Utilities within 60 days of closing. However, if the acquisition closes after September 30, 2014, the equity infusion may be made into UNS Energy to retire debt.
- **Demonstrates Benefit to Customer Rates:** For all rate cases filed through 2020, with a test year after 2015, Fortis must demonstrate that the proposed rate increases are "demonstratively" lower than those that would have been proposed absent the acquisition of UNS Energy by Fortis.

### Outlook

**Process Remains On-Track; Next Steps:** Management noted that the process remains on-track for a closing prior to the end of 2014, with the next steps highlighted in Exhibit 1. Testimony with respect to the Settlement Agreement will occur in early June, and the Administrative Law Judge (ALJ) hearing should commence shortly thereafter. The ALJ's recommendation is an advisory opinion (not legally binding) that will be considered by the ACC in its final ruling on whether to approve the acquisition. If all goes well with the ALJ's recommendation, the matter could be placed on the docket for review by the ACC shortly thereafter as the committee meets once every month. In a very best case scenario, we believe Fortis would receive final ACC approval and the transaction could be completed as early as late September or early October. Once again, the ACC could approve, reject or require modifications as a condition of approval of the transaction. In addition to ACC approval, the merger is dependent on customary closing conditions and the following processes: 1) Hart-Scott Rodino, and 2) review by Committee on Foreign Investment in the United States.

### Exhibit 1. UNS Energy: Schedule of Key Regulatory Events

Date	Event
2-Jun-14	Testimony in Support of/ Opposition to Settlement Agreement
13-Jun-14	Settlement Agreement Responsive Testimony
16-Jun-14	ALJ Hearing Commences

**Justification of Target Price**

Our \$38.00 target price is predicated 75% and 25% on our 2015 and 2016 financial estimates, respectively, as follows:

**Exhibit 3. Target Derivation**

(25% Weight)			(25% Weight)			(50% Weight)			Blended Target Price
1. EV / EBITDA			2. Relative Dividend Yield			3. Free Cash Flow Yield			
EBITDA (\$ mln)	EV / EBITDA	Resultant Share Price	Dividend	Relative Dividend Yield	Resultant Share Price	AFFO/shr	FCF Yield	Resultant Share Price	
2,216	10.5x	\$ 38.86	\$ 1.36	150%	\$ 36.13	\$ 3.66	9.5%	\$ 38.52	\$ 38.01

10-Year Government of Canada Bond Yield Assumption **2.50%**

Source: TD Securities

**Key Risks to Target Price**

1) Higher-than-expected long-bond yields, 2) operational disruptions, 3) regulatory surprises, 4) unexpected large acquisitions, 5) sovereign risk, 6) escalating construction costs, 7) access to capital markets, and 8) closing of pending acquisitions.

## Fortis Inc.

(FTS-T) C\$33.09

### Q2 Below Expectations; UNS Energy Could Close by August End

#### Event

Fortis reported normalized Q2/14 EPS (f.d.) of \$0.30, below our \$0.34 estimate but above the recent consensus of \$0.28. Q2/13 normalized EPS (f.d.) was \$0.33.

#### Impact: SLIGHTLY NEGATIVE

- **Results Affected by Timing and F/X:** The results were below our expectations on lower FortisBC Electric earnings because of the timing of operating and maintenance expenses, and higher corporate expenses largely related to F/X losses.
- **Revising Forecasts:** We have updated our forecasts, largely to reflect an updated UNS Energy closing date (now assumed in late August), along with a slight increase in corporate costs. We are also rolling forward our target price derivation by a quarter to be based 50% on each of our forecasts for 2015 and 2016. We are maintaining our \$38.00 target price and BUY recommendation.

#### TD Investment Conclusion

2014 will be another busy year for the company as it works toward closing the UNS Energy acquisition, along with executing its \$1.4-billion capital program. Fortis is the largest highly regulated investor-owned gas and electricity distribution utility in Canada and we view it as a core holding. We expect the company's future growth to be largely driven by utility investment in Canada and the U.S., and believe that investors will find the company's low-risk, utility-dominated business model attractive.

Please see the final pages of this document for important disclosure information.

#### Company Profile

Fortis Inc. (FTS-T) is a diversified infrastructure holding company, primarily comprising gas distribution and electric utilities in Canada, the U.S., Turks and Caicos, and the Cayman Islands. Fortis also owns a real estate and hotels subsidiary and has interests in electricity generation ventures in Canada and the U.S.

**Details**

**FortisBC Energy** Q2/14 earnings of \$12 million were flat y/y versus normalized Q2/13 results.

**Regulated Electric Utilities — Canadian** Q2/14 earnings of \$49 million were \$2 million lower than Q2/13 normalized results.

- **FortisAlberta** earnings of \$26 million increased by \$1 million over Q2/13 results, largely a result of rate base and customer growth.
- **FortisBC Electric** earnings of \$7 million were \$3 million lower y/y versus Q2/13 normalized results, largely because of the timing of operating and maintenance expenses.
- **Newfoundland Power** earnings of \$11 million were consistent versus Q2/13 normalized results.
- **Other Canadian Electric Utilities** earnings of \$5 million were flat versus Q2/13 normalized results.

**Central Hudson (Regulated Utilities — U.S.)** (acquired in June 2013) earnings for Q2/14 were \$7 million. The results declined slightly versus Q2/13 because of higher depreciation and expenses.

**Regulated Utilities — Caribbean** earnings of \$8 million were \$2 million higher than that in Q2/13, largely driven by increased sales growth and favourable F/X.

**Non-Regulated Fortis Generation** earnings of \$6 million increased by \$3 million y/y, driven by increased production of electricity, mainly from Belize.

**Other Non-Regulated** business earnings of \$7 million decreased by \$2 million y/y because of lower Fortis Properties earnings, which declined as a result of lower Hospitality Division performance and higher depreciation expense.

**Corporate and Other** normalized expenses of \$25 million in Q2/14 were \$8 million higher than Q2/13 results, primarily as a result of \$4 million of F/X losses realized in Q2/14, along with increased finance charges and operating expenses.

- 2) \$2mm related to the BCUC decision for the decrease in ROE and equity component in Q2/13.
- 3) \$13mm of income tax recovery in Q2/13 due to the enactment of higher tax deductions.
- 4) \$4mm of income tax recovery in Q2/13 due to the enactment of higher tax deductions.
- 5) \$32mm of costs incurred in Q2/13 related to the CH Energy acquisition.
- 6) \$13mm of recoveries related to income taxes in Q2/13.
- 7) \$13mm of convertible debt interest related to the pending UNS Energy acquisition in Q2/14.
- 8) \$1mm of costs related to the pending UNS Energy acquisition in Q2/14.
- 9) \$3 million of retirement expenses recognized in Q2/14.

Source: Company reports, TD Securities Inc.

**Outlook**

**Acquisition of UNS Energy Could Close Earlier than Expected:** On July 29, 2014, the Administrative Law Judge issued an opinion and order recommending the approval of the UNS Energy acquisition, as conditioned by the settlement agreement. A final vote has tentatively been scheduled for the ACC's meeting to be held during August 12–13, 2014. If the transaction is approved at this meeting, the acquisition is expected to close by the end of August 2014. Previously, we had assumed that the earliest close could be the end of September 2014.

**2014 Capital Plan and Five-year Outlook Remain Robust:** The gross capex forecast of \$1.4 billion for 2014 remains unchanged. Over the next five years (2014–2018), gross consolidated capex is expected to exceed \$6.5 billion. Additionally, UNS Energy has a forecasted capital program (2015–2018) of approximately \$1.5 billion. Energy infrastructure investment to serve Fortis' customers is expected to grow by an average annual rate of 7% over the next five years.

**Project Updates:**

- **Waneta Expansion:** The \$900-million 335 MW expansion of the Waneta hydroelectric generating facility in BC is continuing on time and on budget, with \$633 million invested to date, and completion is scheduled for spring 2015.
- **Tilbury LNG:** Fortis has commenced preliminary work related to the \$400-million expansion of its existing Tilbury LNG facility in BC, which will include a second LNG tank and a new liquefier. The project is scheduled to be completed in H2/16. FortisBC is also exploring the potential for a further expansion of Tilbury, which could involve the export of LNG. Fortis would look to structure agreements without any commodity or logistics risk.

- **Woodfibre LNG Pipeline Project:** FortisBC is also pursuing a potential pipeline expansion for the proposed Woodfibre LNG site in BC. The project could consist of adding additional pipeline and compression, and could represent an investment of approximately \$600 million.
- **Similkameen Hydro:** Fortis continues to develop other power generation opportunities, and is currently exploring a potential 50–60 MW hydroelectric dam and generating facility in BC. Fortis would likely structure an agreement similar to a long-term PPA with off-takers, with zero commodity exposure.

**Regulatory Update:** The 2014–2018 performance based regulation (PBR) applications are progressing in BC, while an Alberta cost-of-capital decision is pending and FortisAlberta's Capital Tracker Applications are continuing. Central Hudson also filed a general rate application (GRA) in July 2014 for rates effective July 1, 2015.

## Exhibit 2. Regulatory Decisions

Utility	Application / Proceeding	Filing Date	Expected Decision
FEI	Multi-Year PBR Plan (2014-2018)	June 2013	H2 / 2014
FortisBC Electric	Multi-Year PBR Plan (2014-2018)	July 2013	H2 / 2014
FortisAlberta	Generic Cost of Capital - 2013 and 2014	n.a.	Q4 2014
	Capital Tracker Applications - 2013 to 2015	May 2014	Q1 2015
Central Hudson	General Rate Application (for Mid-2015)	July 2014	H1 / 2015

Source: Company reports, TD Securities Inc.

**Investor Day 2014:** Fortis is hosting an Investor Day on October 1, 2014, in Toronto. Barry Perry, President and incoming Chief Executive Officer, along with the company's executive vice presidents and members of the senior management team, will provide an update on operations, recent developments, and strategic outlook.

**Q3/14 Preview:** We are forecasting Q3/14 EPS of \$0.25, slightly above the Q3/13 result of \$0.24. Increased earnings, largely driven by a potential contribution from UNS Energy and rate base growth, could be offset by increased financing costs, along with a higher number of shares outstanding.

**Justification of Target Price**

Our \$38.00 target price is predicated 50% on each of our financial estimates for 2015 and 2016, as follows:

**Exhibit 4. Target Price Derivation**

(25% Weight) 1. EV / EBITDA			(25% Weight) 2. Relative Dividend Yield			(50% Weight) 3. Free Cash Flow Yield			Blended Target Price
EBITDA (\$ mln)	EV / EBITDA	Resultant Share Price	Dividend	Relative Dividend Yield	Resultant Share Price	AFFO/shr	FCF Yield	Resultant Share Price	
2,247	10.5x	\$ 38.92	\$ 1.37	150%	\$ 36.53	\$ 3.73	9.5%	\$ 39.31	\$ 38.52
10-Year Government of Canada Bond Yield Assumption						2.50%			

Source: TD Securities Inc.

**Key Risks to Target Price**

Key risks to target price include: 1) Higher-than-expected long-bond yields; 2) operational disruptions; 3) regulatory surprises; 4) unexpected large acquisitions; 5) sovereign risk; 6) escalating construction costs; 7) access to capital markets; and 8) closing of pending acquisitions.

## Fortis Inc.

(FTS-T) C\$34.33

### BCUC Releases PBR Decision for FEI and FBC

**Event**

The BC Utilities Commission (BCUC) released its decision on Fortis' performance-based regulation (PBR) application for its FortisBC Energy Inc. (FEI) and FortisBC Inc. (FBC) utilities.

**Impact: SLIGHTLY POSITIVE**

Our overall impression of the ruling is neutral as there were a number of puts and takes in the decision, and we believe that the BCUC's amendments are not onerous for the utilities to comply with. Both FEI and FBC will need to resubmit a compliance filing within 60 days of the Order.

The regulator also determined that a PBR decision could be rendered given the substantial evidence presented, and would not need a further process on the design of the PBR, which we view as a slight positive. The decision also likely dictates the regulatory framework for the utilities over the next several years. At this point, we do not believe this to be material to our financial forecasts and they remain unchanged. Our financial forecasts remain unchanged and our target price increases to \$39 from \$38 to reflect the passage of some regulatory risk.

As a reminder, on April 25, 2014, FEI and FBC filed a final joint application for a Multi-Year Performance Based Ratemaking Plan for 2014 through 2018.

**TD Investment Conclusion**

The BCUC's decision on FEI and FBC's multi-year PBR plan will likely dictate the regulatory framework for the utilities over the next several years, and even though there were a number of amendments in the decision, we believe that they are all minor in nature.

Fortis is the largest highly regulated investor-owned gas and electricity distribution utility in Canada and we view it as a core holding. We expect the company's future growth to be largely driven by utility investment in Canada and the U.S., and believe that investors will find the company's low-risk, utility-dominated business model attractive.

**Please see the final pages of this document for important disclosure information.**

**Company Profile**

Fortis Inc. (FTS-T) is a diversified infrastructure holding company, primarily comprising gas distribution and electric utilities in Canada, the U.S., Turks and Caicos, and the Cayman Islands. Fortis also owns a real estate and hotels subsidiary and has interests in electricity generation ventures in Canada and the U.S.

**Details**

**Overview of PBR Framework:** Under the PBR framework, utility rates will be set using a formula that adjusts for inflation, productivity, exogenous events, and capital invested. The PBR framework is designed to incentivize utilities to be more efficient while also reducing regulatory burden and cost. Key points of the PBR decision include:

- **Term:** The PBR is expected to have a six-year term extending through the end of 2019.
- **Inflation Factor (I-Factor):** The I-Factor represents an inflation factor that will be applied to adjust rates upwards each year. The BCUC determined that the CPI-BC as calculated by Statistics Canada and BC-AWE indexes are most appropriate for use in determining the I-Factor. In addition, the I-Factor used in the formula will be the actual index results of the previous year.
- **Productivity Factor (X-Factor):** Rates will be adjusted downwards by an expected productivity growth factor set by the regulator. The productivity factor will be initially set at 1.03 for FBC and 1.10 for FEI.

**Exhibit 1. X-Factor Derivation**

Utility	TFP	Stretch	
		Factor	X-Factor
FBC	0.93	0.1	1.03
FEI	0.90	0.2	1.10

Source: Company reports, TD Securities Inc.

- **Exogenous Events Factor (Z-Factor):** The use of a Z-Factor to adjust for exogenous events, and would need to meet the following criteria:
  - The costs/savings must be attributable entirely to events outside the control of a prudently operated utility
  - The costs/savings must be directly related to the exogenous event and clearly outside the base upon which the rates were originally derived
  - The impact of the event was unforeseen
  - The costs must be prudently incurred
  - The costs/savings related to each exogenous event must exceed the Commission-defined materiality threshold (0.5% of each utility's 2013 Base O&M)
- **Earnings Sharing Mechanism:** Under the decision, an earnings-sharing mechanism will be used, split 50/50 between shareholders and ratepayers.
- **Slight Changes to Flow-through Costs and Deferral Accounts:** The regulator has disallowed certain costs to be flow-through to ratepayers, along with the discontinuing of some deferral accounts. However, we view these to be within the range of expectations.
- **Inclusion of Service Quality Indicators:** The Commission has determined that penalties could be applied if the Service Quality Indicators are not met.
- **PBR Off-ramps Granted:** Under the decision, if a utility's achieved return lands sufficiently outside the allowed threshold, the PBR framework could be re-opened and reviewed. The two financial thresholds for consideration of a re-opening and review of the PBR are: 1) if earnings in any one year vary from the approved ROE by more than +/- 200 basis points (post sharing), and 2) if earnings average more than +/- 150 basis points (post sharing) from the approved ROE for two consecutive years. The first stage would involve amending or re-calibrating the PBR plan to allow it to continue. If a resolution is not met at this stage, reversion back to a cost of service mythology or a re-design of PBR would occur.

- **Introduction of a Comprehensive Annual Review:** An Annual Review process will be instated to build trust among all stakeholders and to ensure that PBR functions as intended.

### Outlook

**Regulatory Update:** The Alberta cost-of-capital decision is pending and FortisAlberta's Capital Tracker Applications are progressing. Central Hudson also filed a general rate application (GRA) in July 2014 for rates effective July 1, 2015.

### Exhibit 2. Upcoming Regulatory Decisions

Utility	Application / Proceeding	Filing Date	Expected Decision
FortisAlberta	Generic Cost of Capital - 2013 and 2014	n.a.	Q4 2014
	Capital Tracker Applications - 2013 to 2015	May 2014	Q1 2015

### Justification of Target Price

Our \$39.00 target price is predicated 50% on each of our financial estimates for 2015 and 2016 as follows:

### Exhibit 4. Target Price Derivation

(25% Weight) 1. EV / EBITDA			(25% Weight) 2. Relative Dividend Yield			(50% Weight) 3. Free Cash Flow Yield			Blended Target Price
EBITDA (\$ mln)	EV / EBITDA	Resultant Share Price	Dividend	Relative Dividend Yield	Resultant Share Price	AFFO/shr	FCF Yield	Resultant Share Price	
2,247	10.5x	\$ 38.92	\$ 1.37	150%	\$ 36.53	\$ 3.73	9.5%	\$ 39.31	\$ 38.52

10-Year Government of Canada Bond Yield Assumption **2.50%**

Source: TD Securities Inc.

### Key Risks to Target Price

Key risks to target price include: 1) Higher-than-expected long-bond yields; 2) operational disruptions; 3) regulatory surprises; 4) unexpected large acquisitions; 5) sovereign risk; 6) escalating construction costs; and 7) access to capital markets.

## Fortis Inc.

(FTS-T) C\$34.56

### Announces Strategic Review of Properties Business

#### Event

Fortis has announced a strategic review of its hotel and commercial real estate business.

#### Impact: POTENTIALLY POSITIVE

- **Re-focusing on Energy Infrastructure:** We believe that this announcement will be positively received by some shareholders who have historically viewed the Properties business as a non-core asset.
- **Tax Planning Less of a Factor:** Our understanding is that the Properties business was part of the company's historical consolidated tax planning strategy. However, with the Waneta Expansion project scheduled to provide taxable income (in-service in Spring 2015), the Properties division will likely become less important in Fortis' tax-planning initiatives.
- **Incoming CEO Busy:** In advance of the company's first ever investor day this coming Wednesday (October 1), it appears that the new incoming CEO is wasting no time in exploring investor-friendly ways to potentially surface value.
- **Potential Share Uplift of \$1.00:** Based on our calculations, we believe that a transaction involving the Properties division could surface up to a dollar per share for FTS shareholders based on the trading multiples for comparable REITs. Although we are not REIT experts, depending on the quality mix of the assets, we see an approximate 1.0x-4.0x multiple delta between the value of the Properties EBITDA stream and that of comparable publicly traded REITs. Given the discrepancy in current valuation between Fortis and that of comparable publicly trading REITs, we would be surprised to see the strategic review yield no results. We believe that private equity funds would also be interested in the assets.

#### TD Investment Conclusion

We believe that the strategic review of the Properties business could be a potential positive, assuming that any proceeds are redeployed into projects with higher returns and/or into utility acquisitions.

Fortis is the largest highly regulated investor-owned gas and electricity distribution utility in Canada and we view it as a core holding. We expect the company's future growth to be largely driven by utility investments in Canada and the U.S., and believe that investors will find the company's low-risk, utility-dominated business model attractive.

#### Company Profile

Fortis Inc. (FTS-T) is a diversified infrastructure holding company, primarily comprising gas distribution and electric utilities in Canada, the U.S., Turks and Caicos, and the Cayman Islands. Fortis also owns a real estate and hotels subsidiary and has interests in electricity generation ventures in Canada and the U.S.

Please see the final pages of this document for important disclosure information.

**Details**

**Fortis Properties Description:** The Properties business has been a part of Fortis since 1989, and consists of 23 hotels in eight Canadian provinces, representing over 4,400 rooms and 2.8 million square feet of commercial and retail real estate, primarily in Atlantic Canada. Its major hotel brands include Delta, Sheraton, Hilton, Holiday Inn, Ramada, and Best Western. Some of its prominent real estate holdings in Atlantic Canada include Cabot Place, Maritime Centre, and the Blue Cross Centre. See Exhibit 2 for a summary of the assets.

**Properties Contribution:** In 2013, Fortis Properties generated revenues of approximately \$250 million and EBITDA of approximately \$80 million. Approximately 58% of Fortis Properties' operating income in 2013 was derived from hotel investments (2012 – 57%). The assets currently comprise ~3% of the corporation's total assets.

**Timing:** The strategic options include, but are not limited to, a sale of all or a portion of the assets, a sale of shares of Fortis Properties, or an IPO. We believe that a sale of the assets presents the lowest risk option for the company. The process is expected to commence in the coming weeks and continue through the rest of 2014 and into 2015.

Source: Company reports, TD Securities Inc.

**Outlook**

**Redeployment of Capital toward Growth Plan:** We believe that any monetary proceeds resulting from the Properties' strategic review could be positively redeployed toward Fortis' capital growth plan. Over the next five years (2014–2018), gross consolidated capex is expected to exceed \$8.0 billion (including UNS Energy), and Energy infrastructure investment to serve Fortis' customers is expected to grow by an average annual rate of 7% over the next five years.

**Large Capital Projects under Development:**

- **Waneta Expansion:** The \$900-million 335 MW expansion of the Waneta hydroelectric generating facility in BC is continuing and ~\$633 million has been invested to-date. Completion is expected in spring 2015.
- **Tilbury LNG:** Fortis has commenced preliminary work related to the \$400-million expansion of its existing Tilbury LNG facility in BC, which will include a second LNG tank and a new liquefier. The project is scheduled to be completed in H2/16. FortisBC is also exploring the potential for a further expansion of Tilbury, which could involve the export of LNG.
- **Woodfibre LNG Pipeline Project:** FortisBC is also pursuing a potential pipeline expansion for the proposed Woodfibre LNG site in BC. The project could consist of adding more pipeline and compression, and could represent an investment of approximately \$600 million.

**Research Ratings**

**ACTION LIST BUY:** The stock's total return is expected to exceed a minimum of 15%, on a risk-adjusted basis, over the next 12 months and it is a top pick in the Analyst's sector.

**BUY:** The stock's total return is expected to exceed a minimum of 15%, on a risk-adjusted basis, over the next 12 months.

**SPECULATIVE BUY:** The stock's total return is expected to exceed 30% over the next 12 months; however, there is material event risk associated with the investment that could result in significant loss.

**HOLD:** The stock's total return is expected to be between 0% and 15%, on a risk-adjusted basis, over the next 12 months.

**TENDER:** Investors are advised to tender their shares to a specific offer for the company's securities or to support a proposed combination reflecting our view that a superior offer is not forthcoming.

**REDUCE:** The stock's total return is expected to be negative over the next 12 months.

**Overall Risk Rating in order of increasing risk:** Low (7% of coverage universe), Medium (33%), High (49%), Speculative (11%)

**Analyst Certification**

Each analyst of TD Securities Inc. whose name appears on page 1 of this research report hereby certifies that (i) the recommendations and opinions expressed in the research report accurately reflect the research analyst's personal views about any and all of the securities or issuers discussed herein that are within the analyst's coverage universe and (ii) no part of the research analyst's compensation was, is, or will be, directly or indirectly, related to the provision of specific recommendations or views expressed by the research analyst in the research report.

## Fortis Inc.

(FTS-T) C\$34.57

### Investor Day Takeaways

#### Event

Fortis held its inaugural Investor Day in Toronto.

#### Impact: POSITIVE

#### TD Investment Conclusion

Fortis is the largest highly regulated investor-owned gas and electricity distribution utility in Canada and we view it as a core holding. We expect the company's future growth to be largely driven by utility investments in Canada and the U.S., and believe that investors will find the company's low-risk, utility-dominated business model attractive.

#### Details

#### Strategy Takeaways:

- **Organic Growth is a Focus:** Executing on the organic growth plan appears to be the company's current priority, with a focus on delivering a strong 2015 to shareholders, and maintaining the company's 41-year track record of consecutive hikes in dividend. Growth through acquisitions could also be possible; however, the preference is to look to build assets in the company's existing footprint, leveraging its regional knowledge and positioning to find incremental investment opportunities where possible.
- **High Regulation is in the DNA:** With the recent announcement regarding the Properties business, the proportion of the company's regulated earnings could increase further. Unregulated generation through contracted renewable power (hydro, utility-scale solar, wind generation) could become ~10% of the company in the future. However, management is not targeting a certain mix between regulated and unregulated contribution, and would continue to look for regulated or low-risk, long-term contracted investment opportunities with strong counterparties to grow the company, even if this meant being 100% regulated.

Please see the final pages of this document for important disclosure information.

#### Company Profile

Fortis Inc. (FTS-T) is a diversified infrastructure holding company, primarily comprising gas distribution and electric utilities in Canada, the U.S., Turks and Caicos, and the Cayman Islands. Fortis also owns a real estate and hotels subsidiary and has interests in electricity generation ventures in Canada and the U.S.

**Western Canadian Operations Takeaways:**

- **Positive Capital Tracker Decision could Present Upside:** The AUC's interim approval regarding the capital tracker (currently set at 60% of the capital tracker) gives rise to revenue shortfalls in 2013 and 2014. If 100% of the capital tracker is granted, the capital shortfall would be put back into rate base. A decision is expected in Q1/15.

**Exhibit 1. Rate Revenue Associated with Capital Tracker (\$mm)**

	2013	2014	2015
100% (Capital Tracker Application)	23.2	48.1	68.9
60% (AUC Interim Approval)	14.6	29.2	TBD
Shortfall	8.6	18.9	TBD

Source: Company reports

- **LNG Development Stimulating Investment:** The development of an LNG industry off the west coast of BC is resulting in significant investment opportunities at FortisBC, which is well positioned given its existing footprint and infrastructure in the region. The company is progressing on its \$400-million Tilbury LNG (Phase 1A) project, which is expected to add 1 million GJ of storage capacity and up to 36,000 GJ/day of liquefaction capacity (Q4/16 in-service). The Tilbury site spans 35 acres (all zoned for LNG), which lends itself to significant potential expansions. A contemplated Tilbury LNG (Phase 1B) investment of \$450 million could add an additional 140,000 GJ/day of liquefaction and is currently underpinned by a conditional contract with Hawaiian Electric (awaiting final regulatory approvals). A full build-out of the site could yield 3 million metric tonnes per annum (MTPA) or 450,000 GJ/day of liquefaction and additional storage capacity.

**Exhibit 2. Tilbury Site**

Source: Company reports

- **Woodfibre LNG Pipeline Opportunity:** Fortis is also undergoing pipeline and design permitting for an approximate \$600-million project that could involve providing natural gas pipeline capacity to the proposed Woodfibre LNG export project near Squamish, BC. The Woodfibre LNG project (2.1 MTPA) is subject to various approvals and could be operational by Q1/17.

**UNS Energy Takeaways:**

- **Changing Supply Mix; EPA's CO<sub>2</sub> Regulations Harsh:** Tucson Electric Power (TEP) will continue to implement its resource diversification strategy by reducing its coal-fired generation reliance through unit retirements and fuel switching, while replacing coal capacity with gas-fired generation as the utility slowly migrates toward the EPA's carbon reduction targets for Arizona. The EPA's State-by-state goals put Arizona near the top of the list for CO<sub>2</sub> reduction targets (based on the calculation methodology), which the company believes poses an unfair burden on the utilities in the state.

**Exhibit 3. EPA Proposed Carbon Reduction by State (CO<sub>2</sub>lbs / MWh)**

State	2012 Rate	2020 Goal	2030 Goal	Reduction from 2012
Washington	756	264	215	72%
Arizona	1,453	735	702	52%
S. Carolina	1,587	840	772	51%
Oregon	717	407	372	48%
New Hampshire	905	546	486	46%
Arkansas	1,634	968	910	44%
Georgia	1,500	891	834	44%
.....				
Rhode Island	907	822	782	14%
Hawaii	1,540	1,378	1,306	15%

Source: Company reports

- **Revised Rate Design for Distributed Generation:** The utility is proposing a new rate design to include increased fixed and demand charges for distributed generation (DG) participants as a means to maintain revenue stability. Under the standard rate design, costs incurred by net metered DG users are shifted onto other customers.

**Exhibit 4. Rate Design for Distributed Generation**

Source: Company reports

**Central Hudson Takeaways:**

- **Rate Filing Decision:** The utility made a July 2014 rate filing for new rates effective July 1, 2015. The company intends to use the balance of the acquisition customer benefit fund to help reduce rates for customers and will seek to reach a multi-year settlement to achieve cost recovery certainty.
- **Reforming the Energy Vision and Other Potential Transmission Investments:** A priority will be participating in New York State's Reforming the Energy Vision proceeding, which is aimed at redefining the utilities' role and help them align with New York State policy goals. With respect to future investments, Central Hudson could contribute (through the formation of a New York Transco) a potential US\$50 million to help develop infrastructure to ease transmission congestion in the region. The utility is also looking to help bring Marcellus gas to southern New York by constructing a potential pipeline, which could represent a US\$250million–US\$500 million investment.

**Eastern Canadian and Caribbean Operations Takeaways:** In Eastern Canada, the top priorities will be to help manage customer rate pressures in Newfoundland, participate in the review of energy issues in Newfoundland and Labrador, executing on transmission and generation connections at Maritime Electric, and navigating through Ontario's regulatory framework. In the Caribbean, the company is pursuing additional electricity generation to reduce the reliance on high-cost diesel-fuelled generation with the intention of lowering the cost of electricity for customers.

**Financing Takeaways:**

- **Base Capital Program is Significant:** Over the next five years (2014–2018), gross consolidated capex is expected to be approximately \$9.3 billion (\$10.3 billion including the potential LNG projects). This translates into a rate base CAGR from 2014 year-end to 2018 of ~7.0% (~8.5% including the potential LNG projects).

**Exhibit 5. Fortis Inc.: Capital Expenditures and Rate Base**

Source: Company reports

- **Redeployment of Properties' Capital toward Acquisitions and Growth:** We believe that any cash proceeds resulting from the Properties' strategic review will likely be used toward helping to permanently finance the UNS Energy acquisition, in addition to being redeployed toward Fortis' consolidated capital program. After receiving proceeds from the final installment of the convertible debentures (expected in October 2014), approximately US\$500 million of the UNS Energy acquisition will need to be permanently financed. It was explicitly stated that no additional new common equity will be used for this funding. However, financing the potential LNG opportunities could require some additional new common equity, in addition to using any monetary proceeds from the Properties' strategic review.

**Justification of Target Price**

Our \$39.00 target price is predicated 50% on each of our financial estimates for 2015 and 2016 as follows:

**Exhibit 7. Target Price Derivation**

(25% Weight) 1. EV / EBITDA			(25% Weight) 2. Relative Dividend Yield			(50% Weight) 3. Free Cash Flow Yield			Blended Target Price
EBITDA (\$ mln)	EV / EBITDA	Resultant Share Price	Dividend	Relative Dividend Yield	Resultant Share Price	AFFO/shr	FCF Yield	Resultant Share Price	
2,247	10.5x	\$ 38.92	\$ 1.37	150%	\$ 36.53	\$ 3.73	9.5%	\$ 39.31	\$ 38.52
10-Year Government of Canada Bond Yield Assumption									2.50%

Source: TD Securities Inc.

**Key Risks to Target Price**

Key risks to target price include: 1) Higher-than-expected long-bond yields; 2) operational disruptions; 3) regulatory surprises; 4) unexpected large acquisitions; 5) sovereign risk; 6) escalating construction costs; and 7) access to capital markets.

## Fortis Inc.

(FTS-T) C\$37.63

### Q3 Benefits From UNS Energy; Capital Program Remains Robust

**Event**

Fortis reported normalized Q3/14 EPS (f.d.) of \$0.26, above our \$0.25 estimate, recent consensus of \$0.25, and Q3/13 normalized EPS (f.d.) of \$0.24.

**Impact**

**SLIGHTLY POSITIVE.**

- **Summer Demand for Electricity Strong in Arizona:** As expected, Fortis benefited from the closing of the UNS Energy acquisition on August 15, 2014. Stronger than expected contributions from the regulated utilities in the Caribbean was somewhat offset by lower rainfall in Belize affecting generation production and earnings.
- **Revising Forecasts and Target:** We have updated our forecasts to reflect revisions at the regulated utilities (largely at UNS Energy) along with a slight increase in corporate costs. We are also rolling forward our target price derivation by a quarter to be based 75% on our 2016 forecasts. As a result, we are increasing our target by \$1 to \$40.

**TD Investment Conclusion**

Fortis is the largest highly regulated investor-owned gas and electricity distribution utility in Canada and we view it as a core holding. We expect the company's future growth to be largely driven by utility investment in Canada and the U.S., and believe that investors will find the company's low-risk, utility-dominated business model attractive.

**Please see the final pages of this document for important disclosure information.**

**Company Profile**

Fortis Inc. (FTS-T) is a diversified infrastructure holding company, primarily comprising gas distribution and electric utilities in Canada, the U.S., Turks and Caicos, and the Cayman Islands. Fortis also owns a real estate and hotels subsidiary and has interests in electricity generation ventures in Canada and the U.S.

**Details**

**FortisBC Energy** Q3/14 earnings of (\$13) million increased slightly y/y versus normalized Q3/13 results.

**Regulated Electric Utilities — Canadian** Q3/14 earnings of \$49 million were \$3 million lower than Q3/13 normalized results.

- **FortisAlberta** earnings of \$27 million increased by \$1 million over Q3/13 normalized results largely as a result of higher income tax recoveries and growth in the rate base and number of customers, partially offset by the timing of certain expenses.
- **FortisBC Electric** earnings of \$9 million were \$2 million lower y/y versus Q3/13 results largely due to lower than expected finance charges in Q3/13 and the timing of operating expenses.
- **Eastern Canadian Electric Utilities** earnings of \$13 million were down \$2 million y/y versus Q3/13 normalized results. The decrease was mostly due to the rebasing of electricity rates at Newfoundland Power as a result of the 2013/2014 General Rate Application decision effective July 1, 2013.

**Central Hudson (Regulated Utilities — U.S.)** earnings for Q3/14 were \$8 million. The results declined \$4 million versus Q3/13 due to higher depreciation and operating expenses.

**UNS Energy (Regulated Utilities – U.S.)** earnings for Q3/14 were \$37 million from the date of acquisition.

**Regulated Utilities — Caribbean** earnings of \$8 million were \$2 million higher than Q3/13 largely as a result of increased electricity sales growth and favourable F/X.

**Non-Regulated Fortis Generation** earnings of \$4 million decreased by \$4 million y/y. This decrease was caused by lower electricity production, mainly from Belize.

**Other Non-Regulated** business earnings of \$9 million increased by \$3 million y/y due to a net loss of \$2.5 million from Griffith in Q3/13. Excluding this, the earnings from the other non-regulated business were consistent quarter to quarter.

**Corporate and Other** normalized expenses of \$45 million in Q3/14 were \$26 million higher than Q3/13 results primarily from increased financing costs from the UNS Energy acquisition.

**Exhibit 1. Segmented Earnings (\$mm, unless stated otherwise)**

	Q3/14	Q3/13	YOY Change	YOY % Change

Notes: Earnings have been normalized for the following items:

- 1) \$1mm of costs related to flooding in southern Alberta in Q3/13.
- 2) \$2mm of costs related to the redemption of preferred shares in Q3/13.
- 3) \$35mm of UNS Energy-related acquisition expenses and customer benefits in Q3/14.
- 4) \$8mm of after-tax retirement expenses and share-based compensation in Q3/14.

Source: Company reports, TD Securities.

**Outlook**

**Focus on Integrating UNS Energy; Accretion Tracking Above Previous Expectations:** With the transaction closed, Fortis is expected to now focus on the full integration of UNS Energy over the next 12-18 months. Management also commented that the earnings accretion from the acquisition is expected to surpass its previous expectations largely on the impact of F/X and lower costs associated with financing the transaction.

**Capital Plan Remains Robust; Incremental Investments Could Materialize:** The incoming CEO emphasized that Fortis is entering a period of significant organic growth following a decade of acquisitive growth. Over the next five years (2014–2018), gross consolidated capex is expected to exceed \$9.0 billion, which translates into a four-year rate base CAGR of ~7.0%. If Fortis proceeds with its Tilbury Phase 1B expansion, and the Woodfibre pipeline expansion, the 5-year capital plan would increase to over \$10.0 billion, which would translate into a rate base CAGR of ~8.5% over this timeframe.

**FortisAlberta Regulatory Updates:**

- **Capital Tracker Applications:** A hearing related to the combined 2013-2015 Capital Tracker Application was held in October 2014. FortisAlberta is currently recognizing capital tracker revenue based on the interim regulatory decision granting 60% of the applied for capital tracker amounts. Any upwards adjustment by the regulator to the interim decision could result in a positive adjustment to FortisAlberta's revenue.
- **2015 Rates Application:** FortisAlberta filed its 2015 Annual Rates Application in September 2014, which proposed an increase of approximately 10% to the distribution component of customer rates (effective on an interim basis starting January 1, 2015). The increase reflects a combined inflation and productivity factor of 1.49%, a K factor placeholder of approximately \$69 million (which is 100% of the 2015 depreciation and return associated with the rate base resulting from the 2013 actual, and 2014 and 2015 forecast capital tracker expenditures filed in the May 2014 Capital Tracker Application), and a net refund of Y factor balances of approximately \$1 million.

**Exhibit 2. Regulatory Decisions**

Utility	Application / Proceeding	Filing Date	Expected Decision
FortisAlberta	Generic Cost of Capital - 2013 and 2014	n.a.	Q4 2014
	Capital Tracker Applications - 2013 to 2015	May 2014	Q1 2015
	2015 Annual Rates Application	Sept 2015	Q4 2014
Central Hudson	General Rate Application (for Mid-2015)	July 2014	H1 / 2015

Source: Company reports, TD Securities.

**Project Updates:**

- **Waneta Expansion:** The \$900 million 335 MW expansion of the Waneta hydroelectric generating facility in BC is continuing with \$648 million invested to date, and completion scheduled for spring 2015 (April to May).
- **Tilbury LNG (1A) Project:** In October 2014, FortisBC commenced construction of its \$400 million expansion of the existing Tilbury LNG facility in BC, which will add over 1 million GJ of storage capacity and approximately 40,000 GJ/day of liquefaction capacity. The project is scheduled to be completed in H2/16.
- **Tilbury LNG (1B) Expansion:** A contemplated Tilbury LNG (Phase 1B) investment of \$450 million could add an 140,000+ GJ/day of liquefaction and is currently underpinned by a conditional contract with Hawaiian Electric (awaiting final regulatory approval from the Hawaiian Public Utility Commission).
- **Woodfibre LNG Pipeline Opportunity:** Fortis is working on a transmission services agreement that could involve providing natural gas pipeline capacity to the proposed Woodfibre LNG export project near Squamish, BC. The Woodfibre LNG project (2.1 MTPA) is subject to various approvals and could be operational by Q1/17. The investment could be approximately \$600 million.

**Q4/14 Preview:** We are forecasting Q4/14 EPS of \$0.48, above Q4/13 results of \$0.47. Increased earnings, largely driven by incremental contribution from UNS Energy and rate base growth, could be offset by increased financing costs, along with a higher number of shares outstanding.

### Justification of Target Price

Our \$40.00 target price is predicated 25% and 75% on our financial estimates for 2015 and 2016, respectively, as follows:

### Exhibit 4. Target Derivation

(25% Weight)			(25% Weight)			(50% Weight)			Blended Target Price
1. EV / EBITDA			2. Relative Dividend Yield			3. Free Cash Flow Yield			
EBITDA (\$ mln)	EV / EBITDA	Resultant Share Price	Dividend	Relative Dividend Yield	Resultant Share Price	AFFO/shr	FCF Yield	Resultant Share Price	
2,293	10.5x	\$ 40.23	\$ 1.39	150%	\$ 36.93	\$ 3.85	9.5%	\$ 40.47	

10-Year Government of Canada Bond Yield Assumption **2.50%**

Source: TD Securities.

### Key Risks to Target Price

Key risks to target price include: 1) Higher-than-expected long-bond yields, 2) operational disruptions, 3) regulatory surprises, 4) unexpected large acquisitions, 5) sovereign risk, 6) escalating construction costs, and 7) access to capital markets.

## Fortis Inc.

(FTS-T) C\$39.41

### Growing U.S. Operations Contribute to 2014

**Event**

Fortis reported normalized Q4/14 EPS (f.d.) of \$0.44, below our \$0.48 estimate, recent consensus of \$0.49, and Q4/13 normalized EPS (f.d.) of \$0.47.

**Impact: MIXED.**

We have made numerous changes to our financial model, including updated capital expenditures, a relatively higher value U.S. dollar versus the Canadian dollar, and slightly more conservative incentive earnings in B.C. We are also rolling forward our target by a quarter to be fully based on our 2016 forecasts, and our target price remains \$47.00.

**TD Investment Conclusion**

Fortis is the largest highly regulated investor-owned gas and electricity distribution utility in Canada, and we view it as a core holding. We expect the company's future growth to be largely driven by utility investment in Canada and the U.S., and we believe that investors will find the company's low-risk, utility-dominated business model attractive.

**Details**

**FortisBC Energy** Q4/14 earnings of \$49 million decreased slightly y/y versus normalized Q4/13 results, with limited benefit of cost sharing mechanisms in 2014.

**Regulated Electric Utilities — Canadian** Q4/14 earnings of \$51 million were \$7 million higher than Q4/13 normalized results.

- **FortisAlberta** earnings of \$25 million increased by \$7 million over Q4/13 normalized results largely as a result of a higher number of customers and the timing of certain expenses.
- **FortisBC Electric** earnings of \$12 million were \$1 million lower y/y versus Q4/13 results largely due to lower financing charges in 2013.
- **Eastern Canadian Electric Utilities** earnings of \$14 million were up slightly y/y versus Q4/13 normalized results, benefiting from electricity sales growth.

**Central Hudson (Regulated Utilities — US)** earnings for Q4/14 were \$4 million. These results declined \$7 million versus Q4/13 due to higher expenses as well as higher storm restoration cost and other non-recurring expenses.

**Company Profile**

Fortis Inc. (FTS-T) is a diversified infrastructure holding company, primarily comprising gas distribution and electric utilities in Canada, the U.S., Turks and Caicos, and the Cayman Islands. Fortis also owns a real estate and hotels subsidiary and has interests in electricity generation ventures in Canada and the U.S.

Please see the final pages of this document for important disclosure information.

**UNS Energy (Regulated Utilities – US)** earnings for Q4/14 were \$23 million. UNS Energy was acquired in 2014.

**Regulated Utilities — Caribbean** earnings of \$6 million were \$2 million lower than Q4/13, largely as a result of timing of higher operating expenses.

**Other Non-Regulated** business earnings of \$7 million increased by \$4 million y/y, primarily due to a net loss of \$2.5 million from Griffith in Q4/13.

**Corporate and Other** normalized expenses of \$30 million in Q4/14 were \$11 million higher than Q4/13 results, primarily from higher finance charges, preferred share dividends and convertible debentures interest expense, partially offset by higher income tax recovery.

### Outlook

**Capital Program Update:** Fortis' consolidated capital program is expected to be \$2.2 billion in 2015, nearly 30% larger than in 2014, and approach \$9 billion through 2019. Management expects the 5-year rate base CAGR through to 2019 to be approximately 6.5%, which potentially increases to 7.5% if further expansion of the Tilbury LNG facility and Woodfibre pipeline occurs. Management also indicated that there is the potential to have an expansion on the Southern Crossing pipeline with an estimated size of approximately \$400 million–\$500 million.

**Strategic Review:** Management expects to make a decision on the future of the Properties business (approximately 3% of Fortis' assets) in Q2/15. In September 2014, management had outlined that strategic options include a sale of all or a portion of the assets, a sale of shares of Fortis Properties or an IPO. Outside of Properties, management indicated that it sees very few assets that it would classify as non-core. In particular, management views the Caribbean assets as core and has a positive outlook on their future performance.

**Regulatory Updates:**

- **Capital Tracker Applications:** A generic cost of capital decision and the final decision on the capital tracker application are expected for FortisAlberta in Q1/15. The December 2014 interim capital tracker decision increased the rate to 90% from 60%. Per management, the difference between the revenue amounts applied for and the amounts received on an interim basis for 2013 and 2014 that would be recognized as a true-up in 2015 is approximately \$26 million.
- **Joint Settlement Proposal:** Central Hudson filed a Joint Settlement Proposal in February 2015 which provides new rates for a three-year period starting July 1, 2015. The proposal includes an ROE of 9.0% and a 48% common equity component of the capital structure. Earnings above a 9.5% ROE but less than or equal to 10% will be shared evenly with customers. Public statement hearings are expected in March/April with the proposal going to the regulator in June 2015.
- **General Rate Application:** Newfoundland Power is required to file a general rate application in the first half of 2015 in order to establish customer rates for 2016.

**Exhibit 2. Regulatory Decisions**

Utility	Application / Proceeding	Filing Date	Expected Decision
FEI	2015 Rates Approval (under PBR decision)	Jan 2015	H2 / 2015
FortisBC Electric	2015 Rates Approval (under PBR decision)	Feb 2015	H2 / 2015
FortisAlberta	Generic Cost of Capital - 2013 and 2014	n.a.	Q1 2015
	Capital Tracker Applications - 2013 to 2015	May 2014	Q1 2015
Central Hudson	Joint Settlement Proposal	Feb 2015	H2 / 2015
Newfoundland Power	General Rate Application (for 2016)	exp. H1 / 2015	TBD

Source: Company reports, TD Securities Inc.

**Project Updates:**

- **Waneta Expansion:** The \$900 million 335 MW expansion of the Waneta hydroelectric generating facility in B.C. is continuing on time and on-budget with completion scheduled for spring 2015 (April to May). Management expects Fortis' share of earnings for 2015 to be \$20 million to \$25 million.
- **Woodfibre LNG Pipeline Opportunity:** The Woodfibre LNG project (2.1 MTPA) is subject to various approvals and is expected to be operational by 2018. The investment could be approximately \$600 million. Fortis is currently negotiating a transportation services agreement with the owner.
- **Tilbury LNG (1B) Expansion:** A contemplated Tilbury LNG (Phase 1B) investment of \$450 million could add 140,000+ GJ/day of liquefaction and is currently underpinned by a 15-year conditional contract with Hawaiian Electric (awaiting final regulatory approval from the Hawaiian Public Utility Commission). In Q4/14, Fortis received an Order in Council from the B.C. government effectively providing approval for the estimated capital expenditures of over \$1 billion related to the Tilbury LNG (1B) expansion, Woodfibre LNG project and the upgrading of the existing coastal gas transmission system. The Tilbury approval is conditional on having 70% of the additional liquefaction capacity under long-term energy supply contracts. No further regulatory approval is required by the B.C. Utilities Commission.

**Foreign Exchange Exposure:** Management indicated that for each \$0.05 weakening of the Canadian dollar vs. the U.S. dollar would have an approximate \$0.04 positive impact on EPS on an annual basis.

**Q1/15 Preview:** We are forecasting Q1/15 EPS of \$0.66, below Q1/14 results of \$0.70. We expect increased financing costs, along with a higher number of shares outstanding, to more than offset the contribution from UNS Energy, acquired in H2/14.

Justification of Target Price

Our \$47.00 target price is predicated on our financial estimates for 2016 as follows:

**Exhibit 4. Target Price Derivation**

(25% Weight) 1. EV / EBITDA			(25% Weight) 2. Relative Dividend Yield			(50% Weight) 3. Free Cash Flow Yield			Blended Target Price
EBITDA (\$ mln)	EV / EBITDA	Resultant Share Price	Dividend	Relative Dividend Yield	Resultant Share Price	AFFO/shr	FCF Yield	Resultant Share Price	
2,471	11.0x	\$ 48.92	\$ 1.44	200%	\$ 48.00	\$ 3.01	6.5%	\$ 46.30	\$ 47.38
10-Year Government of Canada Bond Yield Assumption									1.50%

Source: TD Securities Inc.

Key Risks to Target Price

Key risks to target price include: 1) Higher-than-expected long-bond yields; 2) operational disruptions; 3) regulatory surprises; 4) unexpected large acquisitions; 5) sovereign risk; 6) escalating construction costs; and 7) access to capital markets.

**Research Ratings**

**ACTION LIST BUY:** The stock's total return is expected to exceed a minimum of 15%, on a risk-adjusted basis, over the next 12 months and it is a top pick in the Analyst's sector.

**BUY:** The stock's total return is expected to exceed a minimum of 15%, on a risk-adjusted basis, over the next 12 months.

**SPECULATIVE BUY:** The stock's total return is expected to exceed 30% over the next 12 months; however, there is material event risk associated with the investment that could result in significant loss.

**HOLD:** The stock's total return is expected to be between 0% and 15%, on a risk-adjusted basis, over the next 12 months.

**TENDER:** Investors are advised to tender their shares to a specific offer for the company's securities or to support a proposed combination reflecting our view that a superior offer is not forthcoming.

**REDUCE:** The stock's total return is expected to be negative over the next 12 months.

**Overall Risk Rating in order of increasing risk:** Low (6.6% of coverage universe), Medium (31.3%), High (50.1%), Speculative (11.9%)

**(FTS-T) C\$38.89****Q1/15 Results in Line; Waneta Expansion Up and Running****Event**

Fortis reported normalized EPS (f.d.) of \$0.68 in Q1/15, generally in line with our \$0.66 estimate and above the recent consensus of \$0.61, but below the normalized EPS (f.d.) of \$0.70 in Q1/14.

**Impact: NEUTRAL**

- **An In-line Quarter:** Despite the seasonally weak contribution from UNS Energy, the results were overall generally in line with expectations.
- **Revising Our Forecasts:** We have updated our estimates to reflect the regulatory decisions in Alberta, updated F/X assumptions, increased ownership in Caribbean Utilities, and revised financing assumptions.
- **Introducing Our Estimates for 2017; Rolling Forward Our Target Price Derivation:** We are introducing our EPS (f.d.) estimate of \$2.25 for 2017, which is 4% higher than our estimate for 2016, largely driven by growth in utility rate base. We are also rolling forward our target price derivation by one quarter to be based 25% on our forecasts for 2017. We are maintaining our \$47.00 target price and BUY rating.

**TD Investment Conclusion**

Fortis is the largest highly regulated investor-owned gas and electricity distribution utility in Canada and we view it as a core holding. We expect the company's future growth to be largely driven by utility investment in Canada and the U.S., and believe that investors will find the company's low-risk, utility-dominated business model attractive.

**Details**

**FortisBC Energy** — Earnings of \$88 million in Q1/15 increased \$9 million y/y, driven by the timing of regulatory flow-through deferral amounts, partially offset by a decrease in the allowed ROE.

**Regulated Electric Utilities — Canadian** Q1/15 earnings of \$73 million were \$13 million higher than the normalized results in Q1/14.

- **FortisAlberta** normalized earnings of \$31 million increased by \$6 million over Q1/14 results, largely a result of growth in rate base, 2015 capital tracker revenue, and an increase in the number of customers.

Please see the final pages of this document for important disclosure information.

**Company Profile**

Fortis Inc. (FTS-T) is a diversified infrastructure holding company, primarily comprising gas distribution and electric utilities in Canada, the U.S., Turks and Caicos, and the Cayman Islands. Fortis also owns a real estate and hotels subsidiary and has interests in electricity generation ventures in Canada and the U.S.

- **FortisBC Electric** earnings of \$23 million were \$5 million higher y/y, largely driven by the timing of power purchase costs, regulatory deferral mechanisms, and growth in rate base.
- **Eastern Canadian Electric Utilities** earnings of \$19 million were up \$2 million y/y, benefitting from growth in electricity sales and lower operating costs.

**Central Hudson (Regulated Utilities — U.S.)** earnings in Q1/15 were \$22 million. These results increased by \$4 million versus Q1/14, driven by favourable F/X, a new gas contract, and energy-efficiency incentives earned, partially offset by higher operating expenses.

**UNS Energy (Regulated Utilities — U.S.)** earnings in Q1/15 were \$20 million. UNS Energy started contributing in Q3/14.

**Regulated Utilities — Caribbean** earnings of \$5 million were flat y/y, as higher depreciation was offset by favourable F/X.

**Non-regulated Fortis Generation** earnings of \$3 million decreased by \$3 million y/y, primarily from decreased production in Belize, Upstate New York, and Ontario, partially offset by non-recurring business development costs of \$1 million in Q1/14. The Waneta Expansion project was completed six weeks ahead of schedule and on-budget.

**Other Non-regulated** business earnings of (\$2) million decreased by \$2 million y/y owing to the costs of the ongoing Properties strategic review and higher finance charges.

**Corporate and Other** normalized expenses of \$21 million in Q1/15 were \$4 million higher than the Q1/14 results, primarily from increased preferred share dividends and interest costs associated with the acquisition of UNS Energy.

#### Exhibit 1. Segmented Earnings (\$mm, unless stated otherwise)

<b>Reported EPS (f.d)</b>	<b>\$0.71</b>	<b>\$0.67</b>	<b>\$0.04</b>	<b>6%</b>

Notes: Earnings have been normalized for the following items:

- 1) In Q1/15, \$10mm (after tax) of capital tracker revenue related to 2013 and 2014.
- 2) \$5mm (after tax) of earnings from discontinued operations (Griffith Energy) in Q1/14.
- 3) (\$11)mm (after tax) of convertible debt interest incurred in Q1/14 related to the UNS Energy acquisition.
- 4) (\$2)mm (after tax) of costs incurred in Q1/14 related to the UNS Energy acquisition.

**Outlook**

**Capital Program Update:** Fortis' consolidated capital program is expected to be \$2.2 billion in 2015 and approach \$9 billion through 2019. Management expects the five-year rate base CAGR through to 2019 to be approximately 6.5%, which will potentially increase to 7.5% if further expansion of the Tilbury LNG facility (Phase 1B) and Woodfibre pipeline occur.

**Strategic Review of Properties Wrapping Up; Sale of Non-regulated Generation Assets:** Management expects to make a decision on the future of the Properties business by the end of Q2/15. In March 2015, Fortis agreed to sell its Upstate New York and Ontario non-regulated generation assets. The net book value of the assets is ~\$30 million and the sale is expected to close in Q2/15 (for the Upstate New York assets) and H2/15 (for the Ontario assets). A gain is expected to be recognized upon closing, with the proceeds to be used to pay down debt.

**Regulatory Updates:**

- **CH Energy Joint Settlement:** Regulatory hearings were held in March 2015 and a Final Joint Proposal was executed in April 2015, which included new rates for a three-year period from July 1, 2015, and an allowed ROE of 9.0% and a 48% equity thickness. Final approval is expected in Q2/15.
- **FEI and FortisBC Electric:** FEI and FortisBC Electric filed for 2015 rates under the PBR decisions, and a final ruling is expected in Q2/15. FEI is also expected to file an application (by November 30, 2015) to review the 2016 benchmark allowed ROE and equity thickness.
- **Alberta GCOC Decision:** In March 2015, the Alberta Utilities Commission (AUC) delivered its Generic Cost of Capital (GCOC) decision, which established the utility ROE and deemed common equity ratios for the 2013–2015 time period. The ROE was set at 8.3% for each of 2013, 2014, and 2015, which is a reduction from the 8.75% previously approved. Utility deemed common equity ratios were also reduced by 1% from what was previously approved. This decision will remain in place on an interim basis for 2016 and future years, unless changed by the AUC.
- **Capital Tracker Decision:** The AUC's final decision on FortisAlberta's 2013–2015 Capital Tracker applications was issued, with substantially all of the capital programs approved.
- **Additional Capital Tracker Filings:** FortisAlberta filed its Capital Tracker Compliance Filing in April 2015, which requested adjustments to the capital tracker revenue to be considered in the 2016 Annual Rates Application (expected to be filed in September 2015) to be reflected in customer rates beginning January 1, 2016. A decision is expected in H2/15. FortisAlberta will also file an AUC application for capital tracker revenue for 2016/2017 and a true-up to actual 2014 capital expenditures.
- **Newfoundland Power GRA:** Newfoundland Power is required to file a general rate application (GRA) before June 1, 2015 for 2016 rates barring any change by the regulator (PUB).

**Exhibit 2. Upcoming Regulatory Decisions**

Utility	Application / Proceeding	Filing Date	Expected Decision
Central Hudson	General Rate Application	July-14	Q2 / 2015
	Reforming the Energy Vision	n.a.	TBD
FEI	Annual Rates Application - 2015	Jan-15	Q2 / 2015
FortisBC Electric	Annual Rates Application - 2015	Feb-15	Q2 / 2015
FortisAlberta	Capital Tracker Compliance Filing	Apr-15	H2 / 2015
	Capital Tracker Application - 2016/2017	May-15	Q1 / 2016

Source: Company reports, TD Securities Inc.

**Preview for Q2/15:** We are forecasting EPS of \$0.45 in Q2/15, above the Q2/14 result of \$0.30, largely driven by earnings accretion from the acquisition of UNS Energy, along with the commissioning of the Waneta Expansion project.

**Justification of Target Price**

Our \$47.00 target price is predicated 75% and 25% on our financial estimates for 2016 and 2017, respectively, as follows:

**Exhibit 4. Target Price Derivation**

(25% Weight)			(25% Weight)			(50% Weight)			Blended Target Price
1. EV / EBITDA			2. Relative Dividend Yield			3. Free Cash Flow Yield			
EBITDA (\$ mln)	EV / EBITDA	Resultant Share Price	Dividend	Relative Dividend Yield	Resultant Share Price	AFFO/shr	FCF Yield	Resultant Share Price	
2,518	10.5x	\$ 46.15	\$ 1.46	200%	\$ 48.67	\$ 3.08	6.5%	\$ 47.37	

10-Year Government of Canada Bond Yield Assumption **1.50%**

Source: TD Securities Inc.

**Key Risks to Target Price**

Key risks to target price include: 1) higher-than-expected long-bond yields; 2) operational disruptions; 3) regulatory surprises; 4) acquisitions that do not create shareholder value; 5) sovereign risk; 6) escalating construction costs; 7) access to capital markets; and 8) foreign exchange.

Distribution of Research Ratings<sup>A</sup>Investment Banking Services Provided<sup>B</sup>

Current as of April 1, 2015

<sup>A</sup> Percentage of subject companies under each rating category—BUY (covering Action List BUY, BUY and Spec. BUY ratings), HOLD and REDUCE (covering TENDER and REDUCE ratings).

<sup>B</sup> Percentage of subject companies within each of the three categories (BUY, HOLD and REDUCE) for which TD Securities Inc. has provided investment banking services within the last 12 months.

## Research Dissemination Policy

TD Securities makes its research products available in electronic and/or printed formats and simultaneously distributes them to its institutional clients who are entitled to receive them. The Action Notes are distributed by email, and are available in PDF form on Thomson Reuters, Bloomberg, S&P Capital IQ and FactSet. Research Reports are distributed by email; they are also printed and distributed by courier to our entitled clients. PDFs of Reports are available on Thomson Reuters, Bloomberg, S&P Capital IQ and FactSet. All research is available by password to entitled institutional clients at <https://www.tdsresearch.com/equities>

**Research Ratings**

**ACTION LIST BUY:** The stock's total return is expected to exceed a minimum of 15%, on a risk-adjusted basis, over the next 12 months and it is a top pick in the Analyst's sector.

**BUY:** The stock's total return is expected to exceed a minimum of 15%, on a risk-adjusted basis, over the next 12 months.

**SPECULATIVE BUY:** The stock's total return is expected to exceed 30% over the next 12 months; however, there is material event risk associated with the investment that could result in significant loss.

**HOLD:** The stock's total return is expected to be between 0% and 15%, on a risk-adjusted basis, over the next 12 months.

**TENDER:** Investors are advised to tender their shares to a specific offer for the company's securities or to support a proposed combination reflecting our view that a superior offer is not forthcoming.

**REDUCE:** The stock's total return is expected to be negative over the next 12 months.

Overall Risk Rating in order of increasing risk: Low (6.6% of coverage universe), Medium (31.3%), High (50.1%), Speculative (11.9%)

**Analyst Certification**

Each analyst of TD Securities Inc. whose name appears on page 1 of this research report hereby certifies that (i) the recommendations and opinions expressed in the research report accurately reflect the research analyst's personal views about any and all of the securities or issuers discussed herein that are within the analyst's coverage universe and (ii) no part of the research analyst's compensation was, is, or will be, directly or indirectly, related to the provision of specific recommendations or views expressed by the research analyst in the research report.

## Fortis Inc.

(FTS-T) C\$37.45

**Strong Q2/15 Results****Event**

Fortis reported Q2/15 normalized EPS (f.d.) of \$0.44, generally in line with our \$0.45 estimate and the recent consensus of \$0.44, and above the Q2/14 normalized EPS (f.d.) of \$0.30.

**Impact: NEUTRAL**

We have updated our financial forecasts, primarily to reflect the recent asset sale announcements. Our target valuations compress slightly to reflect the slightly higher regulatory risk with some of the company's utilities pending regulatory processes, and we have rolled forward our target price derivation by a quarter to be half based off our 2017 estimates. The net result of these changes is a \$1.00 drop in our target price to \$46.00.

**TD Investment Conclusion**

Fortis is the largest highly regulated investor-owned gas and electricity distribution utility in Canada, and we view it as a core holding. We expect the company's future growth to be largely driven by utility investment in Canada and the U.S., and believe that investors will find the company's low-risk, utility-dominated business model attractive.

**Details**

**FortisBC Energy** Q2/15 earnings of \$7 million decreased \$5 million y/y, driven by the timing of regulatory flow-through deferral amounts and a decrease in the allowed ROE.

**Regulated Electric Utilities — Canadian** Q2/15 earnings of \$58 million were \$9 million higher than Q2/14 normalized results.

- **FortisAlberta** normalized earnings of \$32 million increased by \$6 million over Q2/14 results, largely a result of rate base growth, 2015 capital tracker revenue, and an increase in the number of customers.
- **FortisBC Electric** earnings of \$11 million were \$4 million higher y/y, largely driven by the timing of earnings as a result of regulatory deferral mechanisms.
- **Eastern Canadian Electric Utilities** earnings of \$15 million were down \$1 million y/y, primarily driven by business development costs in Ontario.

Please see the final pages of this document for important disclosure information.

**Company Profile**

Fortis Inc. (FTS-T) is a diversified infrastructure holding company, primarily comprising gas distribution and electric utilities in Canada, the U.S., Turks and Caicos, and the Cayman Islands. Fortis also owns a real estate and hotels subsidiary and has interests in electricity generation ventures in Canada and the U.S.

**Central Hudson (Regulated Utilities — U.S.)** earnings for Q2/15 were \$10 million. These results increased \$3 million versus Q2/14, driven by favourable F/X, a new gas contract in late-2014, and energy efficiency incentives earned, partially offset by higher operating expenses.

**UNS Energy (Regulated Utilities – U.S., acquired August 2014)** earnings for Q2/15 were \$52 million.

**Regulated Utilities — Caribbean** earnings of \$9 million were up \$1 million y/y as favourable F/X was mostly offset by higher depreciation.

**Non-regulated Fortis Generation** earnings of \$18 million increased by \$12 million y/y, primarily from contribution by the Waneta Expansion (in-service April 2015).

**Corporate and Other** normalized expenses of \$39 million in Q2/15 were \$15 million higher than Q2/14 results, primarily from increased preferred share dividends and finance charges associated with the UNS Energy acquisition.

**Exhibit 1. Segmented Earnings (\$mm, unless stated otherwise)**

	Q2/15	Q2/14	YOY Change	YOY % Change

<b>Reported EPS (f.d)</b>	<b>\$0.87</b>	<b>\$0.22</b>	<b>\$0.65</b>	<b>295%</b>

Notes: Earnings have been normalized for the following items:

- 1) (\$1)mm of capital tracker revenue related to 2013 and 2014 in Q2/15.
- 2) \$27mm of earnings from gain on sale of generation assets in Q2/15.
- 3) \$96mm of earnings from net gain on sale of real-estate assets in Q2/15.
- 4) (\$1)mm and (\$4)mm of foreign exchange loss in Q2/15 and Q2/14, respectively.
- 5) (\$13)mm of convertible debt interest related to the pending UNS Energy acquisition in Q2/14.
- 6) (\$1)mm of costs related to the pending UNS Energy acquisition in Q2/14.

Source: Company reports, TD Securities Inc.

**Outlook**

**Strategic Review of Properties Wrapping Up; Sale of Non-regulated Generation Assets:** As a result of activity in Q2/15, the divestiture of non-core assets (uncontracted merchant power and real estate) is substantially complete. The \$430-million sale of the commercial real-estate properties closed on June 30, 2015. The \$365-million sale of the hotel properties is expected to close sometime in Fall 2015. Finally, in June 2015, Fortis sold its non-regulated generation assets in Upstate New York and Ontario for combined proceeds of \$93 million. Subsequent to the closing of the hotel disposition, virtually all of Fortis' assets will comprise either regulated utilities or long-term contracted energy infrastructure.

**Target Geographic Mix:** Currently, U.S. assets make up approximately 40% of the total business. Management indicated that this is unlikely to change much and it is not actively looking at U.S. acquisitions at this time. Fortis' two large U.S. acquisitions were timely when the Canadian dollar was strong, in our view, and now its earnings should benefit from the recent strengthening of the U.S. dollar. Management would like to capitalize on its utility franchise regions by finding some incremental investments in non-regulated contracted energy infrastructure (e.g. Waneta expansion) and grow that asset class to approximately 10% of the company over time.

**Regulatory Updates:**

- **UNS Energy:** In June 2015, Tucson Electric Power Company ("TEP", UNS Energy's largest utility) announced its intention to file a general rate application (GRA) by Q4/15. In the GRA, TEP will be requesting new retail rates effective 2017 and reflect the US\$0.8-billion increase in rate base since the last rate order. In June 2015, management injected equity into TEP, increasing the equity thickness to 50% from 43%.
- **CH Energy Rate Order:** In June 2015, Central Hudson received a Rate Order for a three-year period effective July 1, 2015. A delivery rate freeze had been in place for two years following Fortis' acquisition of CH Energy during which time approximately US\$250 million was invested into energy infrastructure. The new Rate Order provides an allowed ROE of 9%, 48% equity thickness, and allows for approximately US\$490 million of additional capital investments. CH and customers will also equally split any excess return between 9.5% and 10% ROE. For context, the 12-month trailing ROE, pre-decision, was approximately 7.3%, according to management.
- **Cost-of-capital Hearings:** FEI is required to file an application (by November 30, 2015) to review the 2016 benchmark allowed ROE and equity thickness, which could also affect FortisBC Electric. In Alberta, a generic cost-of-capital (GCOC) proceeding has commenced for 2016–2017, and the next generation of performance based regulation (PBR) plan (the current PBR expires in 2017) will be established in another proceeding.
- **Newfoundland Power GRA:** The Newfoundland and Labrador regulator denied Fortis' request to defer the filing of its next GRA to on or before June 1, 2016, with a 2016 cost recovery deferral of \$4 million. Therefore, Fortis will file the GRA on or before October 16, 2015.

**Exhibit 2. Upcoming Regulatory Decisions**

Utility	Application / Proceeding	Filing Date	Expected Decision
TEP	GRA	Q4/15	TBD
Central Hudson	Reforming the Energy Vision	n.a.	TBD
FEI	2016 Cost of Capital Application	Q4/15	TBD
Newfoundland Power	GRA	Q4/15	TBD
FortisAlberta	Capital Tracker Compliance Filing	Apr-15	H2 / 2015
	Capital Tracker Application - 2016/2017	May-15	Q1 / 2016

Source: Company reports, TD Securities Inc.

**Q3/15 Preview:** We are forecasting Q3/15 EPS of \$0.43, above the Q3/14 EPS of \$0.26, largely driven by earnings accretion from a full contribution from the UNS Energy acquisition, along with the commissioning of the Waneta Expansion project.

## Research Dissemination Policy

TD Securities makes its research products available in electronic and/or printed formats and simultaneously distributes them to its institutional clients who are entitled to receive them. The Action Notes are distributed by email, and are available in PDF form on Thomson Reuters, Bloomberg, S&P Capital IQ and FactSet. Research Reports are distributed by email; they are also printed and distributed by courier to our entitled clients. PDFs of Reports are available on Thomson Reuters, Bloomberg, S&P Capital IQ and FactSet. All research is available by password to entitled institutional clients at <https://www.tdsresearch.com/equities>

**Research Ratings**

**ACTION LIST BUY:** The stock's total return is expected to exceed a minimum of 15%, on a risk-adjusted basis, over the next 12 months and it is a top pick in the Analyst's sector.

**BUY:** The stock's total return is expected to exceed a minimum of 15%, on a risk-adjusted basis, over the next 12 months.

**SPECULATIVE BUY:** The stock's total return is expected to exceed 30% over the next 12 months; however, there is material event risk associated with the investment that could result in significant loss.

**HOLD:** The stock's total return is expected to be between 0% and 15%, on a risk-adjusted basis, over the next 12 months.

**TENDER:** Investors are advised to tender their shares to a specific offer for the company's securities or to support a proposed combination reflecting our view that a superior offer is not forthcoming.

**REDUCE:** The stock's total return is expected to be negative over the next 12 months.

**Overall Risk Rating in order of increasing risk:** Low (6.7% of coverage universe), Medium (32.3%), High (50.0%), Speculative (11.0%)

**Analyst Certification**

Each analyst of TD Securities Inc. whose name appears on page 1 of this research report hereby certifies that (i) the recommendations and opinions expressed in the research report accurately reflect the research analyst's personal views about any and all of the securities or issuers discussed herein that are within the analyst's coverage universe and (ii) no part of the research analyst's compensation was, is, or will be, directly or indirectly, related to the provision of specific recommendations or views expressed by the research analyst in the research report.
