# Research Methodology for Valuing Companies

## Components of Our Methodology

- ▶ Economic Moat™ Rating
- ▶ Moat Trend™ Rating
- ▶ Moat Valuation
- ▶ Three-Stage Discounted Cash Flow
- ▶ Weighted Average Cost of Capital
- ▶ Fair Value Estimate
- ▶ Scenario Analysis
- ▶ Uncertainty Ratings
- ▶ Margin of Safety
- ▶ Consider Buying/Selling
- ▶ Stewardship Rating

The Morningstar Rating for stocks identifies companies trading at a discount or premium to our analysts' assessment of their fair value. A number of components drive this rating: (1) our assessment of the firm's economic moat, (2) our estimate of the stock's intrinsic value based on a discounted cash-flow model, (3) the margin of safety bands we apply to our Fair Value Estimate, and (4) the current stock price relative to our fair value estimate.

The concept of the Morningstar Economic Moat™ Rating plays a vital role not only in our qualitative assessment of a firm's investment potential, but also in our valuation process. We assign three moat ratings—none, narrow, or wide—as well as the Morningstar Moat Trend™ Rating—positive, stable, or negative—to each company we cover. There are two major requirements for firms to earn either a narrow or wide moat rating: (1) the prospect of earning above-average returns on capital; and (2) some competitive edge that prevents these returns from quickly eroding. The assumptions we make about a firm's moat determine the length of "economic outperformance" that we assume in the latter stages

of our valuation model. We also quantify the value of each firm's moat, which represents the difference between a firm's enterprise value and the value of the firm if no future net investment were to occur. Said differently, moat value identifies the value generated by the firm as a result of any future net new investment. Our Moat Trend Rating reflects our assessment of whether each firm's competitive advantage is either getting stronger or weaker, since we think of moats as dynamic, rather than static.

At the heart of our valuation system is a detailed projection of a company's future cash flows. The first stage of our three-stage discounted cash flow model can last from 5 to 10 years and contains numerous detailed assumptions about various financial and operating items. The second stage of our model—where a firm's return on new invested capital (RONIC) and earnings growth rate implicitly fade until the perpetuity year—can last anywhere from 0 years (for no-moat firms) to 20 years (for wide-moat companies). In our third stage, we assume the firm's RONIC equals its weighted average cost of capital, and we calculate a continuing value using a standard

\* Please contact a sales representative for more information.

perpetuity formula. In deciding on the rate at which to discount future cash flows, we ignore stock-price volatility. Instead, we rely on a system that measures the estimated volatility of a firm's underlying future free cash flows, taking into account fundamental factors such as the diversity of revenue sources and the firm's fixed cost structure.

We also employ a number of other tools to augment our valuation process, including scenario analysis, where we assess the likelihood and performance of a business under different economic and firm-specific conditions. Our analysts typically model three to five scenarios for each company we cover, stress-testing the model and examining the distribution of resulting fair values.

The Morningstar Uncertainty Rating captures the range of these potential fair values, based on an assessment of a company's future sales range, the firm's operating and financial leverage, and any other contingent events that may impact the business. Our analysts use this range to assign an appropriate margin of safety—or the discount/premium

to a fair value we apply in setting our consider buying/consider selling prices. Firms trading below our consider-buying prices receive our highest rating of five stars, whereas firms trading above our consider-selling prices receive our lowest rating of one star.

Our corporate Stewardship Rating represents our assessment of management's stewardship of shareholder capital, with particular emphasis on capital allocation decisions. Analysts consider companies' investment strategy and valuation, financial leverage, dividend and share buyback policies, execution, compensation, related party transactions, and accounting practices. Corporate governance practices are only considered if they've had a demonstrated impact on shareholder value. Analysts assign one of three ratings: "Exemplary," "Standard," and "Poor." Analysts judge stewardship from an equity holder's perspective. Ratings are determined on an absolute basis. Most companies will receive a Standard rating, and this is the default rating in the absence of evidence that managers have made exceptionally strong or poor capital allocation decisions.

### Morningstar Margin of Safety and Star Rating Bands

\* Occasionally a stock's uncertainty will be too high for us to estimate, in which case we label it Extreme.

# Morningstar's Approach to Rating Corporate Credit

- Offers a proprietary measure of the credit quality of companies on our coverage list.
- Encapsulates our in-depth modeling and quantitative work in one letter grade.
- Allows investors to rank companies by each of the four underlying components of our credit ratings, including both analyst-driven and quantitative measures.
- Provides access to all the underlying forecasts that go into the rating, available through our institutional service.

## Purpose

The Morningstar Corporate Credit Rating measures the ability of a firm to satisfy its debt and debt-like obligations. The higher the rating, the less likely we think the company is to default on these obligations.

The Morningstar Corporate Credit Rating builds on the modeling expertise of our securities research team. For each company, we publish:

- Five years of detailed pro-forma financial statements
- Annual estimates of free cash flow
- Annual forecasts of return on invested capital
- Scenario analyses, including upside and downside cases
- Forecasts of leverage, coverage, and liquidity ratios for five years
- Estimates of off balance sheet liabilities

These forecasts are key inputs into the Morningstar Corporate Credit Rating and are available to subscribers at [select.morningstar.com](http://select.morningstar.com).

## Methodology

We feel it's important to perform credit analysis through different lenses—qualitative and quantitative, as well as fundamental and market-driven. We therefore evaluate each company in four broad categories.

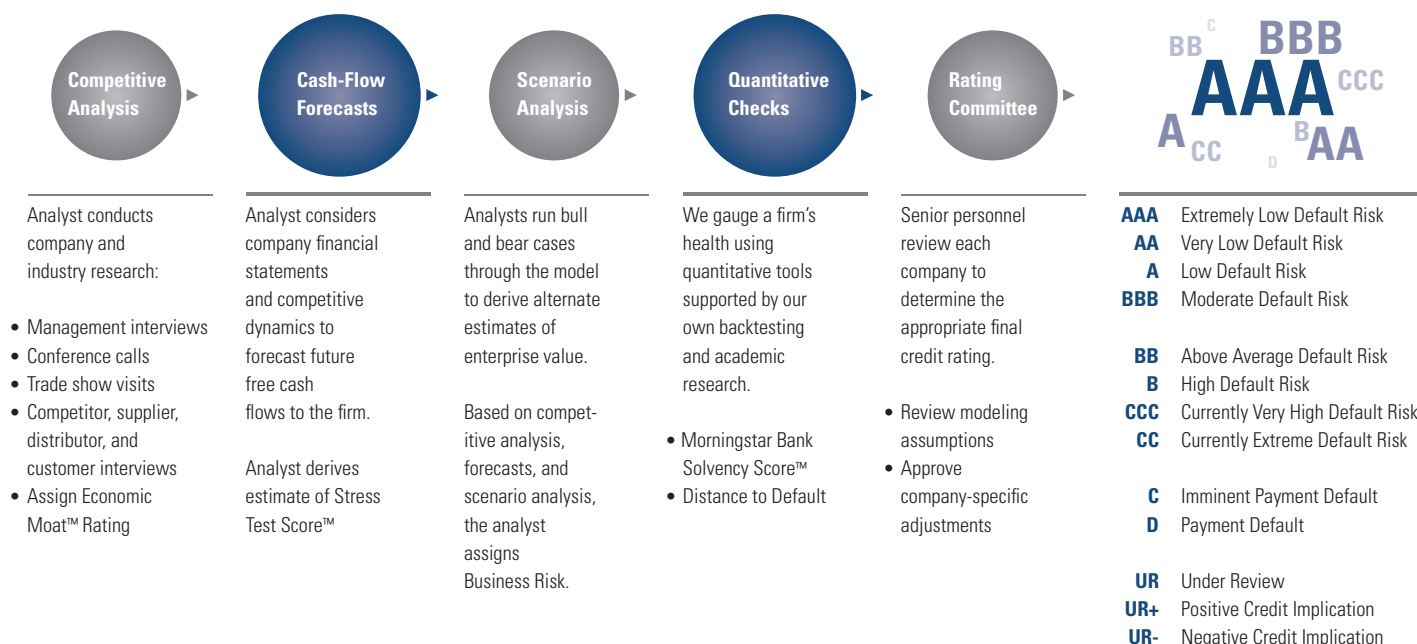

### Business Risk

Business Risk captures the fundamental uncertainty around a firm's business operations and the cash flow generated by those operations. Key components of the Business Risk rating include the Morningstar Economic Moat™ Rating and the Morningstar Uncertainty Rating.

### Cash Flow Cushion™

Morningstar's proprietary Cash Flow Cushion™ ratio is a fundamental indicator of a firm's future financial health. The measure reveals how many times a company's internal cash generation plus total excess liquid cash will cover its debt-like contractual commitments over the next five years. The Cash Flow Cushion acts as a predictor of financial distress, bringing to light potential refinancing, operational, and liquidity risks inherent to the firm.

## Morningstar Research Methodology for Determining Corporate Credit Ratings

# Morningstar's Approach to Rating Corporate Credit

The advantage of the Cash Flow Cushion ratio relative to other fundamental indicators of credit health is that the measure focuses on the future cash-generating performance of the firm derived from Morningstar's proprietary discounted cash flow model. By making standardized adjustments for certain expenses to reflect their debt-like characteristics, we can compare future projected free cash flows with debt-like cash commitments coming due in any particular year. The forward-looking nature of this metric allows us to anticipate changes in a firm's financial health and pinpoint periods where cash shortfalls are likely to occur.

## *Morningstar Solvency Score™*

The Morningstar Solvency Score™ is a quantitative score derived from both historical and forecasted financial ratios. It includes ratios that focus on liquidity (a company's ability to meet short term cash outflows), profitability (a company's ability to generate profit per unit of input), capital structure (how does the company finance its operations), and interest coverage (how much of profit is used up by interest payments).

## *Distance to Default*

The Distance to Default rating is a quantitative, market-based measure of a company's current financial health. (Distance to Default serves as the basis for Morningstar's Financial Health Grade.) The underlying model treats the equity of a firm as a call option on that firm's assets. Based on estimates of asset volatility and the Black-Scholes option-pricing model, we can estimate the likelihood that the value of the company's assets falls below the value of its liabilities, implying likely default.

For each of these four categories, we assign a score, which we then translate into a descriptive rating along the scale of Very Good / Good / Fair / Poor / Very Poor.

## **Overall Credit Rating**

The four component ratings roll up into a single preliminary credit rating. To determine the final credit rating, a credit committee of at least five senior research personnel reviews each preliminary rating.

We review credit ratings on a regular basis and as events warrant. Any change in rating must be approved by the Credit Rating Committee.

## **Investor Access**

Morningstar Corporate Credit Ratings are available on Morningstar.com. Our credit research, including detailed cash-flow models that contain all of the components of the Morningstar Corporate Credit Rating, is available to subscribers at [select.morningstar.com](http://select.morningstar.com).

### Analyst Note 02 Aug 2012

Fortis, Inc FTS posted slightly higher EPS of \$0.33 compared with \$0.32 in the year-ago quarter. The comparison is complicated by the mid-2011 equity issuance offering, which increased outstanding shares 7%. The company will pay \$1.20 per share in dividends, up 3.4% from 2011. At our fair value estimate, the current dividend yield is 4%. We are reaffirming our \$30 per share fair value estimate and forecast 4% EPS growth in 2012.

The company's regulated electric utilities earnings increased \$9 million, up 20% from the year-ago quarter. Fortis Alberta accounted for the majority of the increase as the company continues to expand energy infrastructure and began to reap the benefits from prior transmission investments. Pending regulatory decisions are expected for Fortis BC Electric in the third quarter.

Earnings at the company's regulated gas utilities declined \$2 million, down 13% from the comparable 2011 quarter. A decline in customer additions and lower allowance for funds during construction negatively affected earnings. At the company's Belize unit, higher rainfall increased production with a favorable \$3 million benefit to the company's bottom line. Earnings were flat at Fortis' nonregulated generation and property units.

The company continues to progress through regulatory approvals for its announced \$1.5 billion acquisition of CH Energy CHG. To date, the company has received approval from the U.S. Federal Energy Regulatory Commission and the Committee on Foreign Investment. An application was filed in April 2012 with the New York State Public Service Commission, with a decision forecast in the third quarter. Shareholders approved the transaction in June 2012. Company management is targeting closing the transaction in the first quarter of 2013, and expects CH Energy to be

### Profile

Fortis primarily owns and operates utility transmission and distribution assets in Canada. It has smaller stakes in electricity generation, several Caribbean utilities, and Canadian hotel and commercial real estate. The firm's regulated natural gas operations serve 950,000 customers in British Columbia. Its regulated electric utility operations serve 1.1 million customers throughout Canada and in Grand Cayman and Turks and Caicos. Its Canadian operations accounted for 92% of its total assets as of 2011.

### Analyst's Perspective 31 Jul 2012

Fortis' predominant regulated revenue mix provides investors a stable earnings profile and support for the stock's consistent dividend growth. Significant capital expenditures will drive near-term earnings growth and set a base for future free cash flow generation. The company's Canadian regulated utilities operate in constructive regulatory jurisdictions but with slightly lower allowed returns on equity than its U.S. counterparts. In addition to organic growth, company management has expanded into the U.S. market with the announced acquisition of CH Energy in February 2012. Given the small size of the transaction, we expect the company to continue U.S. expansion after the transaction is complete. We forecast normalized earnings can grow at 5% annually through 2016. At a 3.5% dividend yield and trading at 18 times our 2012 earnings forecast, we think Fortis is overvalued.

### Key Investment Considerations

- Fortis generates more than 90% of its profit from its regulated utility segment, providing a stable earnings base.
- Across all of its utilities, regulators allow Fortis a 9.5% weighted-average return on equity, which is about 100 basis points lower than regulators allow U.S. utilities on average.
- Trading at 18 times our 2012 earnings estimate as of early August, we think the stock is overvalued.

### Profile

Fortis primarily owns and operates utility transmission and distribution assets in Canada. It has smaller stakes in electricity generation, several Caribbean utilities, and Canadian hotel and commercial real estate. The firm's regulated natural gas operations serve 950,000 customers in British Columbia. Its regulated electric utility operations serve 1.1 million customers throughout Canada and in Grand Cayman and Turks and Caicos. Its Canadian operations accounted for 92% of its total assets as of 2011.

### Morningstar Analysis

Fortis' low-risk operations result in stable earnings and support its consistent dividend growth the last four decades.

#### Regulated Electric Utilities Drive Fortis' Second-Quarter Results 02 Aug 2012

Fortis, Inc FTS posted slightly higher EPS of \$0.33 compared with \$0.32 in the year-ago quarter. The comparison is complicated by the mid-2011 equity issuance offering, which increased outstanding shares 7%. The company will pay \$1.20 per share in dividends, up 3.4% from 2011. At our fair value estimate, the current dividend yield is 4%. We are reaffirming our \$30 per share fair value estimate and forecast 4% EPS growth in 2012.

The company's regulated electric utilities earnings increased \$9 million, up 20% from the year-ago quarter. Fortis Alberta accounted for the majority of the increase as the company continues to expand energy infrastructure and began to reap the benefits from prior transmission investments. Pending regulatory decisions are expected for Fortis BC Electric in the third quarter.

Earnings at the company's regulated gas utilities declined \$2 million, down 13% from the comparable 2011 quarter. A decline in customer additions and lower allowance for funds during construction negatively affected earnings. At the company's Belize unit, higher rainfall increased production with a favorable \$3 million benefit to the company's bottom line. Earnings were flat at Fortis' nonregulated generation and property units.

The company continues to progress through regulatory approvals for its announced \$1.5 billion acquisition of CH Energy CHG. To date, the company has received approval from the U.S. Federal Energy Regulatory Commission and the Committee on Foreign Investment. An application was filed in April 2012 with the New York State Public Service Commission, with a decision forecast in the third quarter. Shareholders approved the transaction in June 2012. Company management is targeting closing the transaction in the first quarter of 2013, and expects CH Energy to be accretive to earnings immediately. We continue to believe

the transaction is slightly value-dilutive for Fortis shareholders, and estimate an 85% probability of the transaction closing.

#### Thesis 31 Jul 2012

Fortis manages electric and gas regulated utilities in Canada and the Caribbean, resulting in stable operating results. The company's noncore generation and real estate holding operations account for 12% of operating earnings. While we are less excited by the distractions of these noncore operations, we are comforted that management continues to focus on electric and natural gas distribution in North America.

Fortis' main regulated Canadian operations reside in British Columbia, Alberta, and Newfoundland. These relatively low-risk operations result in stable earnings and fund the consistent dividend growth experienced the past four decades. Rate base additions should be significant through 2016, as the healthier Canadian economy drives usage and customer growth to support its CAD 6.0 billion investment plans. This should allow the firm to increase its rate base at double-digit rates each year during this expansion period.

On a weighted-average basis, Fortis' allowed return on equity in its Canadian service territories is 9.25% after a series of rate increases in 2011. While this return is lower than that typically granted to comparable U.S. utilities, it does not seem unreasonable given the low-risk nature of Fortis' transmission and delivery operations.

The company also operates small utility operations in Belize and the Caribbean. While the allowed returns can be significantly higher than its Canadian operations, these operations also have a much higher risk profile than its Canadian operations. In the summer of 2011, the Government of Belize expropriated Fortis' 70% ownership in Belize Electricity Limited, resulting in an unknown

# Fortis, Inc. FTS (TSE) ★★

Last Price	Fair Value	Consider Buy	Consider Sell	Uncertainty	Economic Moat™	Moat Trend™	Stewardship	Morningstar Credit Rating	Industry Group
33.17 CAD	30.00 CAD	21.00 CAD	40.50 CAD	Medium	Narrow		Standard	—	Utilities - Regulated

recoverable asset representing 2% of Fortis' assets. While small in nature, the earnings of these operations are exposed to additional risks of economic instability, tenuous regulation, and weather events. Management has indicated it has little interest to expand operations in the Caribbean, which we see as a positive.

We are less enthusiastic about the firm's small presence in the cyclical hotel and commercial real estate industry. However, these holdings are held solely for tax strategy purposes and would likely be spun off should Canadian tax policy change. Currently, the Canadian government disallows entity tax consolidation, and the real estate asset revenues offset holding company expenses, mostly interest. While we believe the strategy behind these assets is sound, we worry they may distract management and drag on growth.

Fortis has long expressed interest in expanding its operations through U.S. acquisitions. In February 2012, Fortis announced a \$1.5 billion cash and debt bid for CH Energy Group CHG, a regulated New York Mid-Hudson River Valley utility. The acquisition allows Fortis to enter the

U.S.-regulated electric and gas distribution businesses in order to gain a better understanding of the U.S. market, with geographical proximity to its current Canadian operations.

To date, the company has received approval from the U.S. Federal Energy Regulatory Commission and the Committee on Foreign Investment. An application was filed in April 2012 with the New York State Public Service Commission, with a decision forecast in the third quarter. Shareholders approved the transaction in June 2012.

Company management is targeting closing the transaction in the first quarter of 2013, and expects CH Energy to be accretive to earnings immediately. We forecast the transaction is slightly dilutive for Fortis shareholders, and estimate a high 85% probability of the transaction closing. Given the relatively small size of CH Energy, we would look for Fortis to continue expansion through acquisitions after the CH Energy transaction is complete.

Given the high barriers to entry and regulated nature of Fortis' main operations, we award the company a narrow economic moat. The firm's exposure to noncore areas and foreign markets, though small, leads us to assign it a medium fair value uncertainty rating. We would consider lowering our uncertainty rating if Fortis were to divest the noncore assets.

## Valuation, Growth and Profitability 31 Jul 2012

We are reaffirming our CAD 30 per share fair value estimate after updating our five-year forecasts following the company's second-quarter earnings release. In accounting for the CH Energy acquisition, we adjusted for certain tax and regulatory balance sheet items. We believe the deal is slightly value-dilutive for Fortis.

After the significant share dilution in 2011, we forecast 4% earnings growth in 2012 adjusting for lower dilution and normalized weather conditions. Beyond 2013, we assume

# Fortis, Inc. FTS (TSE) ★★

Last Price	Fair Value	Consider Buy	Consider Sell	Uncertainty	Economic Moat™	Moat Trend™	Stewardship	Morningstar Credit Rating	Industry Group
33.17 CAD	30.00 CAD	21.00 CAD	40.50 CAD	Medium	Narrow		Standard	—	Utilities - Regulated

1.5% annual energy use growth at the Canadian utilities and consistent allowed returns on equity. Based on management's guidance, we forecast total investments of CAD 4.6 billion at the utilities through 2015, leading to annualized rate base growth of 6%.

We use a 10.0% cost of equity and current credit spreads to arrive at a 7.1% weighted average cost of capital in our discounted cash flow model.

## Scenario Analysis

The most significant near-term driver of our earnings forecast is our annualized energy growth rate at the regulated utilities. If energy growth is 50 bps lower than our 2013 estimate, our earnings per share would fall by 2% and our fair value estimate would decrease by CAD 2. We expect similar changes in EPS and fair value if energy growth is 50 bps higher.

Allowed returns at the Canadian utilities are also a significant driver of our valuation estimates. If we assume a 100 bps decrease in allowed returns on equity in 2012 and beyond, our fair value estimate decreases to CAD 21. Better-than-expected allowed returns on equity drive similar upside results. Finally, a 50 bps change in our cost of equity assumption changes our fair value estimate by about CAD 3 per share.

## Economic Moat

Fortis owns a difficult-to-replicate network of regulated power generation, transmission, and distribution assets and provides an essential energy source: electricity. In exchange for its monopoly position, regulators set Fortis' returns at levels that aim to keep customer costs low while providing adequate returns for capital providers. This implicit contract between regulators and the utility should, in the long run, allow Fortis to earn its cost of capital, and leads us to assign Fortis' regulated utilities a narrow economic moat. As with

all regulated utilities, we think regulatory caps on revenue and returns preclude Fortis from establishing a wide economic moat.

## Moat Trend

We assign Fortis a stable moat due to its monopoly position and stable regulatory environment that will continue to allow the firm to earn its cost of capital. We do not expect the regulatory relationship to change in the future. The regulatory framework that caps revenue and returns prevent the firm from attaining a wide moat, as with all regulated utilities that we cover.

### Bulls Say/Bears Say

#### Bulls Say

- ▶ The company operates a stable business profile, offering a strong base for consistent earnings and dividend growth.
- ▶ With an aggressive capital expenditure plan, Fortis' rate base could grow 6% annually.
- ▶ Fortis has consistent dividend growth history, paying consecutive quarterly dividends for four decades and growing the dividend faster than most of its peers in recent years.
- ▶ Fortis operations are based in higher-growth regions within Canada, mainly in Alberta and British Columbia.

#### Bears Say

- ▶ The Canadian regulatory environment offers lower allowed returns than its U.S. peers.
- ▶ The recent Belize expropriation demonstrates how Caribbean operations offer higher growth opportunities but at a substantially higher risk.
- ▶ The company operates noncore hotel and commercial real estate assets, potentially distracting management from core regulated operations.

Note: Scoring is on a scale 1-10, 1 being Best, 10 being Worst

### Financial Health

With a debt/capital ratio of just under 60% and interest coverage of 3.0 times, Fortis' financial health looks reasonably sound, particularly in light of its stable, low-risk business model. Fortis undertook a significant equity offering of 9 million shares resulting in CAD 300 million of proceeds. We expect the company to be active in the capital markets consistent with its current capital structure throughout its capital expenditure plan.

### Capital Structure

Between 2012 and 2016, Fortis has CAD 6.0 billion of planned capital expenditures, which will require the company to access the debt and equity capital markets. We anticipate that Fortis will issue CAD 200 million in debt in 2012 and has manageable debt maturities through 2015. The company recently issued significant equity in July 2011 to help finance its capital expenditure plan, and we expect Fortis to issue additional equity in 2012 to accommodate employee stock purchase plans and the CH Energy acquisition.

### Enterprise Risk

Fortis' key risk to future earnings is regulation. The company faces regulatory risks that create uncertainties around costs and allowed returns, especially given the significant capital expenditure plan in 2012-16. Fortis is also exposed to political and economic instability at its Caribbean operations. With an eye towards acquisitions, the company risks overpaying for regulated U.S. assets and must be mindful of the strategic benefits. As with all regulated utilities, Fortis faces the risk of an inflationary environment that would raise borrowing costs and make other investments more attractive for income-seeking investors.

### Stewardship: 31 Jul 2012

Stanley Marshall has been president and CEO since 1995, leading a group of experienced utility executives. Total direct compensation is in line with Fortis' industry group. Marshall's total compensation comprises base salary, annual incentives, stock options, and performance stock units, with 75% of total compensation at risk. We do not like that annual cash incentives are based on earnings per share targets, as EPS can be manipulated and may not be an indication of shareholder value creation. Marshall also has a significant ownership stake of 14 times his salary, which we believe aligns shareholder and management interests. From a corporate governance perspective, we like that the CEO and chairman positions are separated. While the board of directors has vast experience, we would prefer that members of the board have more direct utility experience.

## Analyst Notes

### Regulated Electric Utilities Drive Fortis' Second-Quarter Results 02 Aug 2012

Fortis, Inc FTS posted slightly higher EPS of \$0.33 compared with \$0.32 in the year-ago quarter. The comparison is complicated by the mid-2011 equity issuance offering, which increased outstanding shares 7%. The company will pay \$1.20 per share in dividends, up 3.4% from 2011. At our fair value estimate, the current dividend yield is 4%. We are reaffirming our \$30 per share fair value estimate and forecast 4% EPS growth in 2012.

The company's regulated electric utilities earnings increased \$9 million, up 20% from the year-ago quarter. Fortis Alberta accounted for the majority of the increase as the company continues to expand energy infrastructure and began to reap the benefits from prior transmission investments. Pending regulatory decisions are expected for Fortis BC Electric in the third quarter.

Earnings at the company's regulated gas utilities declined \$2 million, down 13% from the comparable 2011 quarter. A decline in customer additions and lower allowance for funds during construction negatively affected earnings. At the company's Belize unit, higher rainfall increased production with a favorable \$3 million benefit to the company's bottom line. Earnings were flat at Fortis' nonregulated generation and property units.

The company continues to progress through regulatory approvals for its announced \$1.5 billion acquisition of CH Energy CHG. To date, the company has received approval from the U.S. Federal Energy Regulatory Commission and the Committee on Foreign Investment. An application was filed in April 2012 with the New York State Public Service Commission, with a decision forecast in the third quarter. Shareholders approved the transaction in June 2012. Company management is targeting closing the transaction in the first quarter of 2013, and expects CH Energy to be

accretive to earnings immediately. We continue to believe the transaction is slightly value-dilutive for Fortis shareholders, and estimate an 85% probability of the transaction closing.

### Fortis Reports Flat First-Quarter Earnings 04 May 2012

Fortis Inc FTS posted slightly lower earnings per share of \$0.64 compared with \$0.66 in the year-ago quarter. The results were down mostly due to a common stock offering in mid-2011. Excluding the share offering, results were flat from the prior year. In 2012, the company will pay \$1.20 per share in dividends, up from 3.4% from 2011. At our fair value estimate, the current dividend yield is 4%. We are reaffirming our fair value estimate and forecast 2% EPS growth in 2012.

The company's Canadian regulated gas utilities overall earnings increased 9%, mostly due to weather, continued infrastructure investment, and volume strength from certain industrial sectors. Conversely, the company's Canadian regulated utilities earnings were mostly flat, in large part to regulatory mechanisms and expense timing. The company received clarity with regulatory decisions at FortisBC Energy gas delivery and Fortis Alberta distribution rates, with pending regulatory outcomes expected in 2012 for FortisBC, Fortis Alberta, and Newfoundland Power. Finally, favorable weather increased production in Belize with a favorable \$3 million benefit to the company's bottom line.

Announced in February 2012, the company entered into a \$1.5 billion purchase agreement to acquire New York regulated utility CH Energy Group CHG. We believe the transaction is slightly value-dilutive for Fortis shareholders. Fortis is awaiting regulatory approval from New York regulators and the Federal Energy Regulatory Commission, and given the size and nature of the transaction, we forecast

## Analyst Notes

a relatively high 85% probability that the transaction closes. Company management expects the transaction to close in early 2013.

merger is dampened by the price Fortis paid. To earn CH Energy's allowed return of 10%, significant synergy savings will be required to maintain current allowed returns.

### Fortis Enters U.S. Market With Acquisition of CH Energy Group 21 Feb 2012

On Tuesday, Fortis FTS announced a \$1.5 billion cash and debt bid for CH Energy Group CHG, a regulated New York Mid-Hudson River Valley utility that would be Fortis' first based in the United States. Fortis offered \$65 per share for CH Energy, a 10.5% premium to the most recent close price.

The \$1 billion equity investment implies a pricey 1.9 times multiple on book- and rate-base equity. But that premium falls to 1.3 times book when we adjust for certain tax and regulatory balance sheet items. At this adjusted price, we believe the deal is slightly value-dilutive for Fortis, however we are reaffirming our fair value estimate given the relatively small size of the deal and regulatory approval uncertainty. New York state regulators and the Federal Energy Regulatory Commission must approve the deal.

We originally thought Fortis would make a larger splash into the U.S. market with an acquisition of \$3 billion to \$5 billion. The smaller deal for CH Energy indicates to us that there may be room for additional acquisitions in the future. Strategically, we think the acquisition is sound. The acquisition allows Fortis to enter the U.S.-regulated electric and gas distribution businesses in order to gain a better understanding of the U.S. market, with geographical proximity to its current Canadian operations.

N.Y. regulators allow CH Energy an industry average 10% return on its equity rate base through July 2013. With Fortis successfully integrating three utilities since 2004, we think the current management team is well-suited for the CH Energy Group acquisition. Our strategic enthusiasm for the

### Strong Customer Growth Generates Impressive 2011 Results at Fortis. 09 Feb 2012

Fortis Inc. FTS posted \$1.75 in EPS in 2011, higher than our own \$1.71 estimate and a 6% increase from 2010. Strong customer growth and higher energy deliveries at its regulated Canadian utilities drove results. We are reaffirming our fair value estimate and forecast 5% EPS growth through 2016 as \$5.5 billion in planned capital expenditures should drive earnings expansion. Fortis increased dividends 3.5% in mid-December to \$1.20, an implied 66% payout ratio, with a current yield of 3.5%. At our fair value estimate, Fortis would yield 4%.

In 2012, significant regulatory rulings at the company's Newfound Power and FortisBC subsidiaries could significantly impact future operating results. With the Alberta Utilities Commission ruling in December 2011, allowed returns at Fortis Alberta were decreased 25 basis points to just 8.75%. Similar cuts could be seen at the firm's other regulated Canadian operating companies, putting pressure on earnings growth. Management provided no EPS guidance for 2012.

# Research Methodology for Valuing Companies

## Components of Our Methodology

- ▶ Economic Moat™ Rating
- ▶ Moat Trend™ Rating
- ▶ Moat Valuation
- ▶ Three-Stage Discounted Cash Flow
- ▶ Weighted Average Cost of Capital
- ▶ Fair Value Estimate
- ▶ Scenario Analysis
- ▶ Uncertainty Ratings
- ▶ Margin of Safety
- ▶ Consider Buying/Selling
- ▶ Stewardship Rating

The Morningstar Rating for stocks identifies companies trading at a discount or premium to our analysts' assessment of their fair value. A number of components drive this rating: (1) our assessment of the firm's economic moat, (2) our estimate of the stock's intrinsic value based on a discounted cash-flow model, (3) the margin of safety bands we apply to our Fair Value Estimate, and (4) the current stock price relative to our fair value estimate.

The concept of the Morningstar Economic Moat™ Rating plays a vital role not only in our qualitative assessment of a firm's investment potential, but also in our valuation process. We assign three moat ratings—none, narrow, or wide—as well as the Morningstar Moat Trend™ Rating—positive, stable, or negative—to each company we cover. There are two major requirements for firms to earn either a narrow or wide moat rating: (1) the prospect of earning above-average returns on capital; and (2) some competitive edge that prevents these returns from quickly eroding. The assumptions we make about a firm's moat determine the length of “economic outperformance” that we assume in the latter stages

of our valuation model. We also quantify the value of each firm's moat, which represents the difference between a firm's enterprise value and the value of the firm if no future net investment were to occur. Said differently, moat value identifies the value generated by the firm as a result of any future net new investment. Our Moat Trend Rating reflects our assessment of whether each firm's competitive advantage is either getting stronger or weaker, since we think of moats as dynamic, rather than static.

At the heart of our valuation system is a detailed projection of a company's future cash flows. The first stage of our three-stage discounted cash flow model can last from 5 to 10 years and contains numerous detailed assumptions about various financial and operating items. The second stage of our model—where a firm's return on new invested capital (RONIC) and earnings growth rate implicitly fade until the perpetuity year—can last anywhere from 0 years (for no-moat firms) to 20 years (for wide-moat companies). In our third stage, we assume the firm's RONIC equals its weighted average cost of capital, and we calculate a continuing value using a standard

\* Please contact a sales representative for more information.

perpetuity formula. In deciding on the rate at which to discount future cash flows, we ignore stock-price volatility. Instead, we rely on a system that measures the estimated volatility of a firm's underlying future free cash flows, taking into account fundamental factors such as the diversity of revenue sources and the firm's fixed cost structure.

We also employ a number of other tools to augment our valuation process, including scenario analysis, where we assess the likelihood and performance of a business under different economic and firm-specific conditions. Our analysts typically model three to five scenarios for each company we cover, stress-testing the model and examining the distribution of resulting fair values.

The Morningstar Uncertainty Rating captures the range of these potential fair values, based on an assessment of a company's future sales range, the firm's operating and financial leverage, and any other contingent events that may impact the business. Our analysts use this range to assign an appropriate margin of safety—or the discount/premium

to a fair value we apply in setting our consider buying/consider selling prices. Firms trading below our consider-buying prices receive our highest rating of five stars, whereas firms trading above our consider-selling prices receive our lowest rating of one star.

Our corporate Stewardship Rating represents our assessment of management's stewardship of shareholder capital, with particular emphasis on capital allocation decisions. Analysts consider companies' investment strategy and valuation, financial leverage, dividend and share buyback policies, execution, compensation, related party transactions, and accounting practices. Corporate governance practices are only considered if they've had a demonstrated impact on shareholder value. Analysts assign one of three ratings: "Exemplary," "Standard," and "Poor." Analysts judge stewardship from an equity holder's perspective. Ratings are determined on an absolute basis. Most companies will receive a Standard rating, and this is the default rating in the absence of evidence that managers have made exceptionally strong or poor capital allocation decisions.

## Morningstar Margin of Safety and Star Rating Bands

\* Occasionally a stock's uncertainty will be too high for us to estimate, in which case we label it Extreme.

# Morningstar's Approach to Rating Corporate Credit

- Offers a proprietary measure of the credit quality of companies on our coverage list.
- Encapsulates our in-depth modeling and quantitative work in one letter grade.
- Allows investors to rank companies by each of the four underlying components of our credit ratings, including both analyst-driven and quantitative measures.
- Provides access to all the underlying forecasts that go into the rating, available through our institutional service.

## Purpose

The Morningstar Corporate Credit Rating measures the ability of a firm to satisfy its debt and debt-like obligations. The higher the rating, the less likely we think the company is to default on these obligations.

The Morningstar Corporate Credit Rating builds on the modeling expertise of our securities research team. For each company, we publish:

- Five years of detailed pro-forma financial statements
- Annual estimates of free cash flow
- Annual forecasts of return on invested capital
- Scenario analyses, including upside and downside cases
- Forecasts of leverage, coverage, and liquidity ratios for five years
- Estimates of off balance sheet liabilities

These forecasts are key inputs into the Morningstar Corporate Credit Rating and are available to subscribers at [select.morningstar.com](http://select.morningstar.com).

## Methodology

We feel it's important to perform credit analysis through different lenses—qualitative and quantitative, as well as fundamental and market-driven. We therefore evaluate each company in four broad categories.

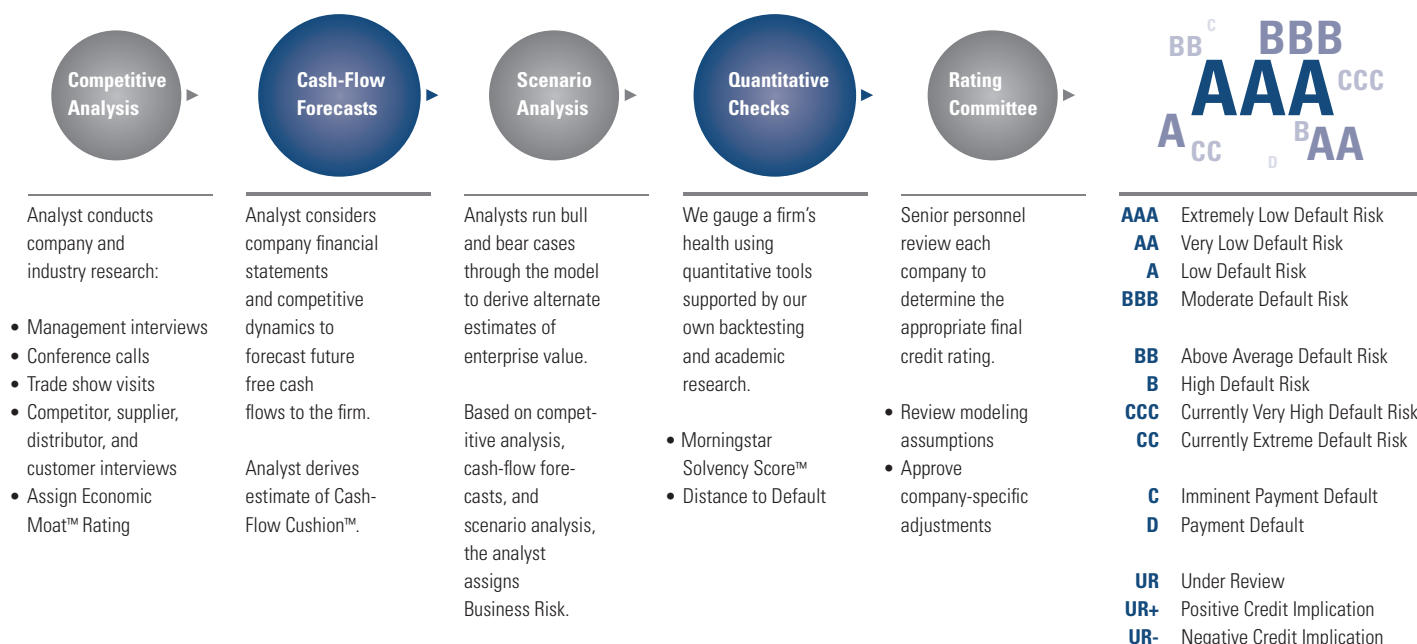

### Business Risk

Business Risk captures the fundamental uncertainty around a firm's business operations and the cash flow generated by those operations. Key components of the Business Risk rating include the Morningstar Economic Moat™ Rating and the Morningstar Uncertainty Rating.

### Cash Flow Cushion™

Morningstar's proprietary Cash Flow Cushion™ ratio is a fundamental indicator of a firm's future financial health. The measure reveals how many times a company's internal cash generation plus total excess liquid cash will cover its debt-like contractual commitments over the next five years. The Cash Flow Cushion acts as a predictor of financial distress, bringing to light potential refinancing, operational, and liquidity risks inherent to the firm.

## Morningstar Research Methodology for Determining Corporate Credit Ratings

# Morningstar's Approach to Rating Corporate Credit

The advantage of the Cash Flow Cushion ratio relative to other fundamental indicators of credit health is that the measure focuses on the future cash-generating performance of the firm derived from Morningstar's proprietary discounted cash flow model. By making standardized adjustments for certain expenses to reflect their debt-like characteristics, we can compare future projected free cash flows with debt-like cash commitments coming due in any particular year. The forward-looking nature of this metric allows us to anticipate changes in a firm's financial health and pinpoint periods where cash shortfalls are likely to occur.

## *Morningstar Solvency Score™*

The Morningstar Solvency Score™ is a quantitative score derived from both historical and forecasted financial ratios. It includes ratios that focus on liquidity (a company's ability to meet short term cash outflows), profitability (a company's ability to generate profit per unit of input), capital structure (how does the company finance its operations), and interest coverage (how much of profit is used up by interest payments).

## *Distance to Default*

Morningstar's quantitative Distance to Default measure ranks companies on the likelihood that they will tumble into financial distress. The measure is a linear model of the percentile of a firm's leverage (ratio of Enterprise Value to Market Value), the percentile of a firm's equity volatility relative to the rest of the universe and the interaction of these two percentiles. This is a proxy methodology for the common definition of Distance to Default which relies on option-based pricing models. The proxy has the benefit of increased breadth of coverage, greater simplicity of calculation, and more predictive power.

For each of these four categories, we assign a score, which we then translate into a descriptive rating along the scale of Very Good / Good / Fair / Poor / Very Poor.

## **Overall Credit Rating**

The four component ratings roll up into a single preliminary credit rating. To determine the final credit rating, a credit committee of at least five senior research personnel reviews each preliminary rating.

We review credit ratings on a regular basis and as events warrant. Any change in rating must be approved by the Credit Rating Committee.

## **Investor Access**

Morningstar Corporate Credit Ratings are available on Morningstar.com. Our credit research, including detailed cash-flow models that contain all of the components of the Morningstar Corporate Credit Rating, is available to subscribers at [select.morningstar.com](http://select.morningstar.com).

Analyst Note	1
Morningstar Analyst Forecasts	3

The company incurred \$10 million in acquisition-related expenses for its \$1.5 billion CH Energy Group purchase, which it announced in February 2012. Fortis awaits New York State Public Service Commission approval. It already has received approvals from shareholders, the Federal Energy Commission, and the Committee on Foreign Investment. We continue to estimate an 85% probability of closing and forecast the transaction will be slightly value-dilutive for Fortis shareholders, included in our fair value estimate.

The company's regulated Canadian Electric Utilities increased earnings 26% from the year-ago quarter, aided by stronger transmission revenue and returns from infrastructure investments offset by lower allowed returns on equity. In a low-usage quarter for gas, the company's regulated gas unit lost \$6 million compared to a \$4 million loss in the year-ago period primarily related to revenue recognition for seasonal gas consumption and lower customer additions. The company's non-regulated generation unit showed weakness from lower hydroelectric generation from reduced water levels.

The company has continued to progress through a busy 2012 regulatory calendar, receiving regulatory decisions at FortisBC Energy, Fortis Alberta, and FortisBC Electric. We expect the company will receive additional decisions at Fortis Alberta and Newfoundland Power before year's end. Allowed revenue increases are vital in allowing the company to earn competitive returns on the company's

### Profile

Fortis primarily owns and operates utility transmission and distribution assets in Canada. It has smaller stakes in electricity generation, several Caribbean utilities, and Canadian hotel and commercial real estate. The firm's regulated natural gas operations serve 950,000 customers in British Columbia. Its regulated electric utility operations serve 1.1 million customers throughout Canada and in Grand Cayman and Turks and Caicos. Its Canadian operations accounted for 92% of its total assets as of 2011.

### Analyst's Perspective 23 Jan 2013

Fortis' predominant regulated revenue mix provides investors a stable earnings profile and support for the stock's consistent dividend growth. Significant capital expenditures will drive near-term earnings growth and set a base for future free cash flow generation. The company's Canadian regulated utilities operate in constructive regulatory jurisdictions but with slightly lower allowed returns on equity than their U.S. counterparts. In addition to organic growth, company management expanded into the U.S. market with the announced acquisition of CH Energy in February 2012. Given the small size of the transaction, we expect the company to continue U.S. expansion after the transaction is complete. We forecast normalized earnings can grow at 5% annually through 2016. At a 2.6% dividend yield and trading at 18 times our 2013 earnings forecast, Fortis looks overvalued to us.

### Key Investment Considerations

- Fortis generates more than 90% of its profit from its regulated utility segment, providing a stable earnings base.
- Across all of its utilities, regulators allow Fortis a 9.5% weighted average return on equity, which is about 100 basis points lower than regulators allow U.S. utilities on average.
- Trading at 18 times our 2013 earnings estimate as of mid-January, the stock looks overvalued to us.

### Profile

Fortis primarily owns and operates utility transmission and distribution assets in Canada. It has smaller stakes in electricity generation, several Caribbean utilities, and Canadian hotel and commercial real estate. The firm's regulated natural gas operations serve 950,000 customers in British Columbia. Its regulated electric utility operations serve 1.1 million customers throughout Canada and in Grand Cayman and Turks and Caicos. Its Canadian operations accounted for 92% of its total assets as of 2011.

## Morningstar Analysis

Fortis' low-risk operations result in stable earnings and support its consistent dividend growth the past four decades.

### Thesis 23 Jan 2013

Fortis manages electric and gas regulated utilities in Canada and the Caribbean, resulting in stable operating results. The company's noncore generation and real estate holding operations account for 12% of operating earnings. While we are less excited about the distractions of these noncore operations, we are comforted that management continues to focus on electric and natural gas distribution in North America.

Fortis' main regulated Canadian operations are in British Columbia, Alberta, and Newfoundland. These relatively low-risk operations result in stable earnings and fund the consistent dividend growth of the past four decades. Rate base additions should be significant through 2016, as the healthier Canadian economy drives usage and customer growth to support the firm's CAD 6.0 billion investment plans. This should allow the firm to increase its rate base at double-digit rates each year during this expansion period.

On a weighted-average basis, Fortis' allowed return on equity in its Canadian service territories is 9.25%. While this return is lower than that typically granted to comparable U.S. utilities, it seems reasonable given the low-risk nature of Fortis' transmission and delivery operations.

The company also operates small utilities in Belize and the Caribbean. While the allowed returns can be significantly higher than for the Canadian operations, these operations have a much higher risk profile as well. In the summer of 2011, the government of Belize expropriated Fortis' 70% ownership in Belize Electricity Limited, resulting in an unknown recoverable asset representing 2% of Fortis' assets. While small in nature, the earnings of these operations are exposed to additional risks of economic instability, tenuous regulation, and weather events. Management has indicated it has little interest in expanding operations in the Caribbean, which we see as a positive.

We are less enthusiastic about the firm's small presence in the cyclical hotel and commercial real estate industry. However, these holdings are held solely for tax strategy purposes and would probably be spun off should Canadian tax policy change. Currently, the Canadian government disallows entity tax consolidation, and the real estate asset revenue offsets holding company expenses, mostly interest. While we believe the strategy behind these assets is sound, we worry they may distract management and drag on growth.

Fortis has long expressed interest in expanding its operations through U.S. acquisitions. In 2012, Fortis announced a \$1.5 billion cash and debt bid for CH Energy Group CHG, a regulated New York Mid-Hudson River Valley utility. The acquisition allows Fortis to enter the U.S.-regulated electric and gas distribution businesses in order to gain a better understanding of the U.S. market, with geographical proximity to its current Canadian operations.

To date, the company has received approval from shareholders, the U.S. Federal Energy Regulatory Commission, the Committee on Foreign Investment, and the New York Public Service Commission. Management is targeting closing the transaction in March and expects CH Energy to be accretive to earnings immediately. We forecast the transaction will be slightly dilutive for Fortis shareholders and estimate a high 85% probability of the transaction closing. Given the relatively small size of CH Energy, we would look for Fortis to continue expansion through acquisitions after this transaction is complete.

Given the high barriers to entry and regulated nature of Fortis' main operations, we award the company a narrow economic moat. The firm's exposure to noncore areas and foreign markets, though small, leads us to assign it a medium fair value uncertainty rating. We would consider lowering our uncertainty rating if Fortis were to sell its noncore assets.

# Fortis, Inc. FTS (TSE) | ★★

Last Price	Fair Value	Consider Buy	Consider Sell	Uncertainty	Economic Moat™	Moat Trend™	Stewardship	Morningstar Credit Rating	Industry Group
34.26 CAD	31.00 CAD	21.70 CAD	41.85 CAD	Medium	Narrow	Stable	Standard	—	Utilities - Regulated

## Valuation, Growth and Profitability 23 Jan 2013

We are increasing our fair value estimate to CAD 31 per share from CAD 30 to account for time-value appreciation. We also lowered our cost of capital assumption from 7.1% to 6.2% to reflect current market conditions but cut our perpetuity growth rate assumption, resulting in no net impact on our fair value estimate. In accounting for the CH Energy acquisition, we adjusted for certain tax and regulatory balance sheet items. We believe the deal is slightly value-dilutive for Fortis.

We forecast 6% annual earnings growth through 2016 accounting for normalized weather conditions. We assume 1.5% annual energy use growth at the Canadian utilities and consistent allowed returns on equity. Based on management's guidance, we forecast total investments of CAD 6.0 billion at the utilities through 2016, leading to annualized rate base growth of 6%.

We use an 8.0% cost of equity and current credit spreads to arrive at a 6.2% weighted average cost of capital in our discounted cash flow model.

## Scenario Analysis

The most significant near-term driver of our earnings forecast is our annualized energy growth rate at the regulated utilities. If energy growth is 50 basis points lower than our 2013 estimate, our earnings per share would fall 2% and our fair value estimate would decrease by CAD 2. We expect similar changes in EPS and fair value if energy growth is 50 basis points higher.

Allowed returns at the Canadian utilities are also a significant driver of our valuation estimates. If we assume a 100-basis-point decrease in allowed returns on equity in 2012 and beyond, our fair value estimate decreases to CAD 21. Better-than-expected allowed returns on equity drive similar upside results. Finally, a 50-basis-point change in our cost of equity assumption changes our fair value estimate by about CAD 3.

## Economic Moat

Fortis owns a difficult-to-replicate network of regulated power generation, transmission, and distribution assets and provides an essential energy source: electricity. In exchange for its monopoly position, regulators set Fortis' returns at levels that aim to keep customer costs low while providing adequate returns for capital providers. This implicit contract between regulators and the utility should, in the long run, allow Fortis to earn its cost of capital and leads us to assign Fortis' regulated utilities a narrow economic moat. As with all regulated utilities, we think regulatory caps on revenue and returns preclude Fortis from establishing a wide economic moat.

## Moat Trend

We assign Fortis a stable moat because of its monopoly position and stable regulatory environment, which will continue to allow the firm to earn its cost of capital. We do not expect the regulatory relationship to change. The regulatory framework that caps revenue and returns

### Bulls Say/Bears Say

#### Bulls Say

- ▶ The company operates a stable business profile, offering a strong base for consistent earnings and dividend growth.
- ▶ With an aggressive capital expenditure plan, Fortis' rate base could grow 6% annually.
- ▶ Fortis has consistent dividend growth history, paying consecutive quarterly dividends for four decades and increasing the dividend faster than most of its peers in recent years.
- ▶ Fortis operations are based in higher-growth regions in Canada, mainly in Alberta and British Columbia.

#### Bears Say

- ▶ The Canadian regulatory environment offers lower allowed returns than the U.S. does.
- ▶ The recent Belize expropriation demonstrates how Caribbean operations offer higher growth opportunities but at a substantially higher risk.
- ▶ The company operates noncore hotel and commercial real estate assets, potentially distracting management from core regulated operations.

Note: Scoring is on a scale 1-10, 1 being Best, 10 being Worst

### Financial Health

With a debt/capital ratio of just under 60% and interest coverage of 3.0 times, Fortis' financial health looks reasonably sound, particularly in light of its stable, low-risk business model. Fortis undertook a significant equity offering of 9 million shares resulting in CAD 300 million of proceeds. We expect the company to be active in the capital markets consistent with its current capital structure throughout its capital expenditure plan.

### Capital Structure

Through 2016, Fortis has CAD 6.0 billion of planned capital expenditures, which will require it to access the debt and equity capital markets. Fortis has manageable debt maturities through 2016. The company issued significant equity in 2011 to help finance its capital expenditure plan, and we expect it to issue additional equity in 2013 to accommodate employee stock purchase plans and to support its capital expenditure plan.

### Enterprise Risk

Fortis' key risk to future earnings is regulation. The company faces regulatory risks that create uncertainties around costs and allowed returns, especially given the significant capital expenditure plan through 2016. Fortis is also exposed to political and economic instability at its Caribbean operations. With an eye toward acquisitions, the company risks overpaying for regulated U.S. assets and must be mindful of the strategic benefits. As with all regulated utilities, Fortis faces the risk of an inflationary environment that would raise borrowing costs and make other investments more attractive for income-seeking investors.

### Stewardship: 23 Jan 2013

Stanley Marshall has been president and CEO since 1995, leading a group of experienced utility executives. Total direct compensation is in line with Fortis' industry group. Marshall's total compensation comprises base salary, annual incentives, stock options, and performance stock units, with 75% of total compensation at risk. We do not like that annual cash incentives are based on earnings per share targets, as EPS can be manipulated and may not be an indication of shareholder value creation. Marshall has a significant ownership stake of 14 times his salary, which we believe aligns shareholder and management interests. From a corporate governance perspective, we like that the CEO and chairman positions are separated. While the board of directors has vast experience, we would prefer that its members have more direct utility experience.

## Analyst Notes

### Fortis Reports Lower Third-Quarter Earnings on Acquisition Expenses 01 Nov 2012

Fortis, Inc. FTS posted EPS of \$0.24 in the third quarter, down from \$0.30 in the year-ago quarter. The company will pay \$1.20 per share in dividends in 2012, up 3.4% from 2011. We are reaffirming our \$30 per share fair value estimate and 2012 EPS estimate.

The company incurred \$10 million in acquisition-related expenses for its \$1.5 billion CH Energy Group purchase, which it announced in February 2012. Fortis awaits New York State Public Service Commission approval. It already has received approvals from shareholders, the Federal Energy Commission, and the Committee on Foreign Investment. We continue to estimate an 85% probability of closing and forecast the transaction will be slightly value-dilutive for Fortis shareholders, included in our fair value estimate.

The company's regulated Canadian Electric Utilities increased earnings 26% from the year-ago quarter, aided by stronger transmission revenue and returns from infrastructure investments offset by lower allowed returns on equity. In a low-usage quarter for gas, the company's regulated gas unit lost \$6 million compared to a \$4 million loss in the year-ago period primarily related to revenue recognition for seasonal gas consumption and lower customer additions. The company's non-regulated generation unit showed weakness from lower hydroelectric generation from reduced water levels.

The company has continued to progress through a busy 2012 regulatory calendar, receiving regulatory decisions at FortisBC Energy, Fortis Alberta, and FortisBC Electric. We expect the company will receive additional decisions at Fortis Alberta and Newfoundland Power before year's end. Allowed revenue increases are vital in allowing the company to earn competitive returns on the company's

planned five-year \$5.5 billion capital program through 2016, of which it plans to spend \$1.3 billion in 2012.

### Regulated Electric Utilities Drive Fortis' Second-Quarter Results 02 Aug 2012

Fortis, Inc FTS posted slightly higher EPS of \$0.33 compared with \$0.32 in the year-ago quarter. The comparison is complicated by the mid-2011 equity issuance offering, which increased outstanding shares 7%. The company will pay \$1.20 per share in dividends, up 3.4% from 2011. At our fair value estimate, the current dividend yield is 4%. We are reaffirming our \$30 per share fair value estimate and forecast 4% EPS growth in 2012.

The company's regulated electric utilities earnings increased \$9 million, up 20% from the year-ago quarter. Fortis Alberta accounted for the majority of the increase as the company continues to expand energy infrastructure and began to reap the benefits from prior transmission investments. Pending regulatory decisions are expected for Fortis BC Electric in the third quarter.

Earnings at the company's regulated gas utilities declined \$2 million, down 13% from the comparable 2011 quarter. A decline in customer additions and lower allowance for funds during construction negatively affected earnings. At the company's Belize unit, higher rainfall increased production with a favorable \$3 million benefit to the company's bottom line. Earnings were flat at Fortis' nonregulated generation and property units.

The company continues to progress through regulatory approvals for its announced \$1.5 billion acquisition of CH Energy CHG. To date, the company has received approval from the U.S. Federal Energy Regulatory Commission and the Committee on Foreign Investment. An application was filed in April 2012 with the New York State Public Service

### Analyst Notes

Commission, with a decision forecast in the third quarter. Shareholders approved the transaction in June 2012. Company management is targeting closing the transaction in the first quarter of 2013, and expects CH Energy to be accretive to earnings immediately. We continue to believe the transaction is slightly value-dilutive for Fortis shareholders, and estimate an 85% probability of the transaction closing.

# Research Methodology for Valuing Companies

## Components of Our Methodology

- ▶ Economic Moat™ Rating
- ▶ Moat Trend™ Rating
- ▶ Moat Valuation
- ▶ Three-Stage Discounted Cash Flow
- ▶ Weighted Average Cost of Capital
- ▶ Fair Value Estimate
- ▶ Scenario Analysis
- ▶ Uncertainty Ratings
- ▶ Margin of Safety
- ▶ Consider Buying/Selling
- ▶ Stewardship Rating

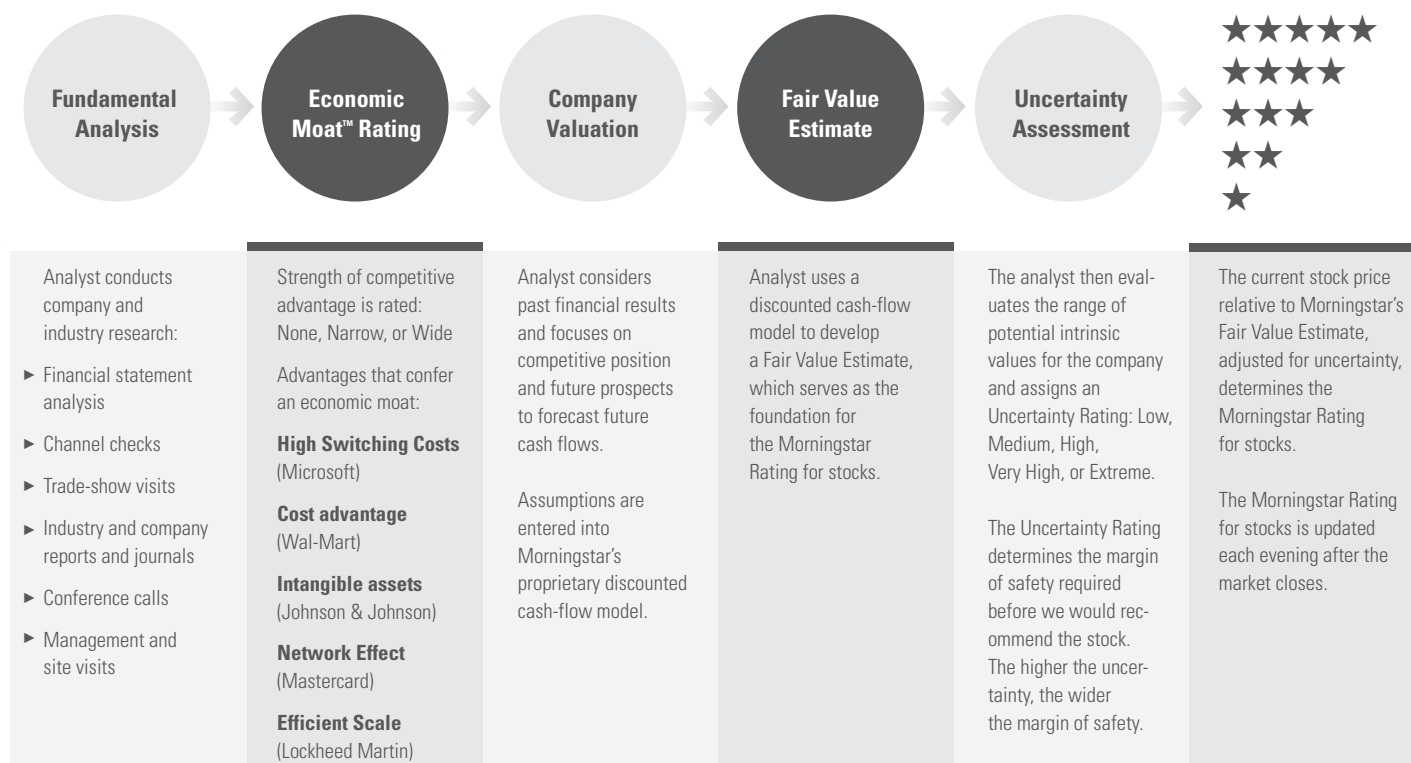

The Morningstar Rating for stocks identifies companies trading at a discount or premium to our analysts' assessment of their fair value. A number of components drive this rating: (1) our assessment of the firm's economic moat, (2) our estimate of the stock's intrinsic value based on a discounted cash-flow model, (3) the margin of safety bands we apply to our Fair Value Estimate, and (4) the current stock price relative to our fair value estimate.

The concept of the Morningstar Economic Moat™ Rating plays a vital role not only in our qualitative assessment of a firm's investment potential, but also in our valuation process. We assign three moat ratings—none, narrow, or wide—as well as the Morningstar Moat Trend™ Rating—positive, stable, or negative—to each company we cover. There are two major requirements for firms to earn either a narrow or wide moat rating: (1) the prospect of earning above-average returns on capital; and (2) some competitive edge that prevents these returns from quickly eroding. The assumptions we make about a firm's moat determine the length of "economic outperformance" that we assume in the latter stages

of our valuation model. We also quantify the value of each firm's moat, which represents the difference between a firm's enterprise value and the value of the firm if no future net investment were to occur. Said differently, moat value identifies the value generated by the firm as a result of any future net new investment. Our Moat Trend Rating reflects our assessment of whether each firm's competitive advantage is either getting stronger or weaker, since we think of moats as dynamic, rather than static.

At the heart of our valuation system is a detailed projection of a company's future cash flows. The first stage of our three-stage discounted cash flow model can last from 5 to 10 years and contains numerous detailed assumptions about various financial and operating items. The second stage of our model—where a firm's return on new invested capital (RONIC) and earnings growth rate implicitly fade until the perpetuity year—can last anywhere from 0 years (for no-moat firms) to 20 years (for wide-moat companies). In our third stage, we assume the firm's RONIC equals its weighted average cost of capital, and we calculate a continuing value using a standard

\* Please contact a sales representative for more information.

perpetuity formula. In deciding on the rate at which to discount future cash flows, we ignore stock-price volatility. Instead, we rely on a system that measures the estimated volatility of a firm's underlying future free cash flows, taking into account fundamental factors such as the diversity of revenue sources and the firm's fixed cost structure.

We also employ a number of other tools to augment our valuation process, including scenario analysis, where we assess the likelihood and performance of a business under different economic and firm-specific conditions. Our analysts typically model three to five scenarios for each company we cover, stress-testing the model and examining the distribution of resulting fair values.

The Morningstar Uncertainty Rating captures the range of these potential fair values, based on an assessment of a company's future sales range, the firm's operating and financial leverage, and any other contingent events that may impact the business. Our analysts use this range to assign an appropriate margin of safety—or the discount/premium

to a fair value we apply in setting our consider buying/consider selling prices. Firms trading below our consider-buying prices receive our highest rating of five stars, whereas firms trading above our consider-selling prices receive our lowest rating of one star.

Our corporate Stewardship Rating represents our assessment of management's stewardship of shareholder capital, with particular emphasis on capital allocation decisions. Analysts consider companies' investment strategy and valuation, financial leverage, dividend and share buyback policies, execution, compensation, related party transactions, and accounting practices. Corporate governance practices are only considered if they've had a demonstrated impact on shareholder value. Analysts assign one of three ratings: "Exemplary," "Standard," and "Poor." Analysts judge stewardship from an equity holder's perspective. Ratings are determined on an absolute basis. Most companies will receive a Standard rating, and this is the default rating in the absence of evidence that managers have made exceptionally strong or poor capital allocation decisions.

### Morningstar Margin of Safety and Star Rating Bands

\* Occasionally a stock's uncertainty will be too high for us to estimate, in which case we label it Extreme.

# Morningstar's Approach to Rating Corporate Credit

- Offers a proprietary measure of the credit quality of companies on our coverage list.
- Encapsulates our in-depth modeling and quantitative work in one letter grade.
- Allows investors to rank companies by each of the four underlying components of our credit ratings, including both analyst-driven and quantitative measures.
- Provides access to all the underlying forecasts that go into the rating, available through our institutional service.

## Purpose

The Morningstar Corporate Credit Rating measures the ability of a firm to satisfy its debt and debt-like obligations. The higher the rating, the less likely we think the company is to default on these obligations.

The Morningstar Corporate Credit Rating builds on the modeling expertise of our securities research team. For each company, we publish:

- Five years of detailed pro-forma financial statements
- Annual estimates of free cash flow
- Annual forecasts of return on invested capital
- Scenario analyses, including upside and downside cases
- Forecasts of leverage, coverage, and liquidity ratios for five years
- Estimates of off balance sheet liabilities

These forecasts are key inputs into the Morningstar Corporate Credit Rating and are available to subscribers at [select.morningstar.com](http://select.morningstar.com).

## Methodology

We feel it's important to perform credit analysis through different lenses—qualitative and quantitative, as well as fundamental and market-driven. We therefore evaluate each company in four broad categories.

### Business Risk

Business Risk captures the fundamental uncertainty around a firm's business operations and the cash flow generated by those operations. Key components of the Business Risk rating include the Morningstar Economic Moat™ Rating and the Morningstar Uncertainty Rating.

### Cash Flow Cushion™

Morningstar's proprietary Cash Flow Cushion™ ratio is a fundamental indicator of a firm's future financial health. The measure reveals how many times a company's internal cash generation plus total excess liquid cash will cover its debt-like contractual commitments over the next five years. The Cash Flow Cushion acts as a predictor of financial distress, bringing to light potential refinancing, operational, and liquidity risks inherent to the firm.

## Morningstar Research Methodology for Determining Corporate Credit Ratings

## Morningstar's Approach to Rating Corporate Credit

The advantage of the Cash Flow Cushion ratio relative to other fundamental indicators of credit health is that the measure focuses on the future cash-generating performance of the firm derived from Morningstar's proprietary discounted cash flow model. By making standardized adjustments for certain expenses to reflect their debt-like characteristics, we can compare future projected free cash flows with debt-like cash commitments coming due in any particular year. The forward-looking nature of this metric allows us to anticipate changes in a firm's financial health and pinpoint periods where cash shortfalls are likely to occur.

### *Morningstar Solvency Score™*

The Morningstar Solvency Score™ is a quantitative score derived from both historical and forecasted financial ratios. It includes ratios that focus on liquidity (a company's ability to meet short term cash outflows), profitability (a company's ability to generate profit per unit of input), capital structure (how does the company finance its operations), and interest coverage (how much of profit is used up by interest payments).

### *Distance to Default*

Morningstar's quantitative Distance to Default measure ranks companies on the likelihood that they will tumble into financial distress. The measure is a linear model of the percentile of a firm's leverage (ratio of Enterprise Value to Market Value), the percentile of a firm's equity volatility relative to the rest of the universe and the interaction of these two percentiles. This is a proxy methodology for the common definition of Distance to Default which relies on option-based pricing models. The proxy has the benefit of increased breadth of coverage, greater simplicity of calculation, and more predictive power.

For each of these four categories, we assign a score, which we then translate into a descriptive rating along the scale of Very Good / Good / Fair / Poor / Very Poor.

### **Overall Credit Rating**

The four component ratings roll up into a single preliminary credit rating. To determine the final credit rating, a credit committee of at least five senior research personnel reviews each preliminary rating.

We review credit ratings on a regular basis and as events warrant. Any change in rating must be approved by the Credit Rating Committee.

### **Investor Access**

Morningstar Corporate Credit Ratings are available on Morningstar.com. Our credit research, including detailed cash-flow models that contain all of the components of the Morningstar Corporate Credit Rating, is available to subscribers at [select.morningstar.com](http://select.morningstar.com).

Analyst Note	1
Morningstar Analyst Forecasts	2

### Analyst Note 19 Feb 2013

Fortis Inc. FTS reported full-year ongoing EPS of \$1.70, compared with \$1.65 in the same year-ago period. Earnings were negatively affected by the 5% increase in shares outstanding due to the company's equity share issuance for the company's CH Energy Acquisition. The company will pay CAD 1.24 per share dividend in 2013, a 3.3% increase from 2012. We are reaffirming our CAD 31 per share fair value estimate, 2013 EPS estimate, narrow moat, and stable moat trend.

In January, Fortis filed a settlement agreement reached with the New York State Public Service Commission staff. Approval by the commission, which we expect, is the last regulatory hurdle to complete the company's announced \$1.5 billion acquisition of CH Energy Group. Management expects the transaction to close in the second quarter, and we continue to forecast the transaction will be slightly value-dilutive for Fortis shareholders. The company's regulated earnings continued to perform well, registering 11% growth in regulated earnings attributed to higher regulated infrastructure investments and allowed revenue increases.

### Profile

Fortis primarily owns and operates utility transmission and distribution assets in Canada. It has smaller stakes in electricity generation, several Caribbean utilities, and Canadian hotel and commercial real estate. The firm's regulated natural gas operations serve 950,000 customers in British Columbia. Its regulated electric utility operations serve 1.1 million customers throughout Canada and in Grand Cayman and Turks and Caicos. Its Canadian operations accounted for 92% of its total assets as of 2011.

### Analyst's Perspective 03 Apr 2013

Fortis' FTS predominant regulated revenue mix provides investors a stable earnings profile and support for the stock's consistent dividend growth. Significant capital expenditures will drive near-term earnings growth and set a base for future free cash flow generation. The company's Canadian regulated utilities operate in constructive regulatory jurisdictions but with slightly lower allowed returns on equity than their U.S. counterparts. In addition to organic growth, company management expanded into the U.S. market with the announced acquisition of CH Energy in February 2012. Given the small size of the transaction, we expect the company to continue U.S. expansion after the transaction is complete. We forecast normalized earnings can grow at 6% annually through 2017. At a 3.6% dividend yield and trading at 19 times our 2013 earnings forecast, Fortis looks overvalued to us.

### Key Investment Considerations

- Fortis generates more than 90% of its profit from its regulated utility segment, providing a stable earnings base.
- Across all of its utilities, regulators allow Fortis a 9.5% weighted average return on equity, which is about 100 basis points lower than regulators allow U.S. utilities on average.
- Trading at 19 times our 2013 earnings estimate as of early April, the stock looks overvalued to us.

### Profile

Fortis primarily owns and operates utility transmission and distribution assets in Canada. It has smaller stakes in electricity generation, several Caribbean utilities, and Canadian hotel and commercial real estate. The firm's regulated natural gas operations serve 950,000 customers in British Columbia. Its regulated electric utility operations serve 1.1 million customers throughout Canada and in Grand Cayman and Turks and Caicos. Its Canadian operations accounted for 94% of its total assets as of 2012.

### Morningstar Analysis

Fortis' low-risk operations result in stable earnings and support its consistent dividend growth the past four decades.

#### Thesis 04 Apr 2013

Fortis manages electric and gas regulated utilities in Canada and the Caribbean, resulting in stable operating results. The company's noncore generation and real estate holding operations account for 14% of operating earnings. While we are less excited about the distractions of these noncore operations, we are comforted that management continues to focus on electric and natural gas distribution in North America.

Fortis' main regulated Canadian operations are in British Columbia, Alberta, and Newfoundland. These relatively low-risk operations result in stable earnings and fund the consistent dividend growth of the past four decades. Rate base additions should be significant through 2017, as the healthier Canadian economy drives usage and customer growth to support the firm's CAD 5.3 billion investment plans. This should allow the firm to increase its rate base at double-digit rates each year during this expansion period.

On a weighted-average basis, Fortis' allowed return on equity in its Canadian service territories is 9.25%. While this return is lower than that typically granted to comparable U.S. utilities, it seems reasonable given the low-risk nature of Fortis' transmission and delivery operations.

The company also operates small utilities in Belize and the Caribbean. While the allowed returns can be significantly higher than for the Canadian operations, these operations have a much higher risk profile as well. In the summer of 2011, the government of Belize expropriated Fortis' 70% ownership in Belize Electricity Limited, resulting in an unknown recoverable asset representing 2% of Fortis' assets. While small in nature, the earnings of these operations are exposed to additional risks of economic instability, tenuous regulation, and weather events. Management has indicated it has little interest in expanding operations in the Caribbean, which we see as a positive.

We are less enthusiastic about the firm's small presence in the cyclical hotel and commercial real estate industry. However, these holdings are held solely for tax strategy purposes and would probably be spun off should Canadian tax policy change. Currently, the Canadian government disallows entity tax consolidation, and the real estate asset revenue offsets holding company expenses, mostly interest. While we believe the strategy behind these assets is sound, we worry they may distract management and drag on growth.

Fortis has long expressed interest in expanding its operations through U.S. acquisitions. In 2012, Fortis announced a \$1.5 billion cash and debt bid for CH Energy Group CHG, a regulated New York Mid-Hudson River Valley utility. The acquisition allows Fortis to enter the U.S.-regulated electric and gas distribution businesses in order to gain a better understanding of the U.S. market, with geographical proximity to its current Canadian operations.

To date, the company has received approval from shareholders, the U.S. Federal Energy Regulatory Commission, the Committee on Foreign Investment, and the New York Public Service Commission. Management is targeting closing the transaction in the second quarter and expects CH Energy to be accretive to earnings immediately. We forecast the transaction will be slightly value-dilutive for Fortis shareholders and estimate a high 85% probability of the transaction closing. Given the relatively small size of CH Energy, we think Fortis will continue to look for acquisition opportunities after this transaction is complete.

Given the high barriers to entry and regulated nature of Fortis' main operations, we award the company a narrow economic moat. The firm's exposure to noncore areas and foreign markets, though small, leads us to assign it a medium fair value uncertainty rating. We would consider lowering our uncertainty rating if Fortis were to sell its noncore assets.

# Fortis, Inc. FTS (TSE) ★★★

Last Price	Fair Value	Consider Buy	Consider Sell	Uncertainty	Economic Moat™	Moat Trend™	Stewardship	Morningstar Credit Rating	Industry Group
34.06 CAD	31.00 CAD	21.70 CAD	41.85 CAD	Medium	Narrow	Stable	Standard	—	Utilities - Regulated

## Valuation, Growth and Profitability 04 Apr 2013

We are reaffirming our fair value estimate of CAD 31 per share after updating our five-year operating outlook to reflect 2012 results. In accounting for the CH Energy acquisition, we adjusted for certain tax and regulatory balance sheet items. We believe the deal is slightly value-dilutive for Fortis shareholders. We expect the transaction to close in the second quarter.

We forecast 6% annual earnings growth through 2017 accounting for normalized weather conditions. We assume 1.5% annual energy use growth at the Canadian utilities and consistent allowed returns on equity. Based on management's guidance, we forecast total investments of CAD 6.3 billion at the utilities through 2017, leading to annualized rate base growth of 6%.

We use an 8.0% cost of equity and current credit spreads to arrive at a 6.7% weighted average cost of capital in our discounted cash flow model.

## Scenario Analysis

The most significant near-term driver of our earnings forecast is our annualized energy growth rate at the regulated utilities. If energy growth is 50 basis points lower than our 2013 estimate, our earnings per share would fall 2% and our fair value estimate would decrease by CAD 2. We expect similar changes in EPS and fair value if energy growth is 50 basis points higher.

Allowed returns at the Canadian utilities are also a significant driver of our valuation estimates. If we assume a 100-basis-point decrease in allowed returns on equity in 2013 and beyond, our fair value estimate decreases to CAD 21. Better-than-expected allowed returns on equity drive similar upside results. Finally, a 50-basis-point change in our cost of equity assumption changes our fair value estimate by about CAD 3.

## Economic Moat

Fortis owns a difficult-to-replicate network of regulated power generation, transmission, and distribution assets and provides an essential energy source: electricity. In exchange for its monopoly position, regulators set Fortis' returns at levels that aim to keep customer costs low while providing adequate returns for capital providers. This implicit contract between regulators and the utility should, in the long run, allow Fortis to earn its cost of capital and leads us to assign Fortis' regulated utilities a narrow economic moat. As with all regulated utilities, we think regulatory caps on revenue and returns preclude Fortis from establishing a wide economic moat.

## Moat Trend

We assign Fortis a stable moat because of its monopoly position and stable regulatory environment, which will continue to allow the firm to earn its cost of capital. We do not expect the regulatory relationship to change. The regulatory framework that caps revenue and returns prevents the firm from attaining a wide moat, as with all regulated utilities we cover.

### Bulls Say/Bears Say

#### Bulls Say

- ▶ The company operates a stable business profile, offering a strong base for consistent earnings and dividend growth.
- ▶ With an aggressive capital expenditure plan, Fortis' rate base could grow 6% annually.
- ▶ Fortis has consistent dividend growth history, paying consecutive quarterly dividends for four decades and increasing the dividend faster than most of its peers in recent years.
- ▶ Fortis operations are based in higher-growth regions in Canada, mainly in Alberta and British Columbia.

#### Bears Say

- ▶ The Canadian regulatory environment offers lower allowed returns than the U.S. does.
- ▶ The recent Belize expropriation demonstrates how Caribbean operations offer higher growth opportunities but at a substantially higher risk.
- ▶ The company operates noncore hotel and commercial real estate assets, potentially distracting management from core regulated operations.

Note: Scoring is on a scale 1-10, 1 being Best, 10 being Worst

### Financial Health

With a debt/capital ratio of 54% and interest coverage of 3.5 times, Fortis' financial health looks reasonably sound, particularly in light of its stable, low-risk business model. We expect the company to be active in the capital markets consistent with its current capital structure throughout its capital expenditure plan.

### Capital Structure

Through 2017, Fortis has CAD 5.3 billion of planned capital expenditures, which will require it to access the debt and equity capital markets. Fortis has manageable debt maturities through 2017. The company issued significant equity in 2011 to help finance its capital expenditure plan, and we expect it to issue additional equity in 2013 to accommodate employee stock purchase plans and to support its capital expenditure plan.

### Enterprise Risk

Fortis' key risk to future earnings is regulation. The company faces regulatory risks that create uncertainties around costs and allowed returns, especially given the significant capital expenditure plan through 2017. Fortis is also exposed to political and economic instability at its Caribbean operations. With an eye toward acquisitions, the company risks overpaying for regulated U.S. assets and must be mindful of the strategic benefits. As with all regulated utilities, Fortis faces the risk of an inflationary environment that would raise borrowing costs and make other investments more attractive for income-seeking investors.

### Stewardship: 04 Apr 2013

Stanley Marshall has been president and CEO since 1995, leading a group of experienced utility executives. Total direct compensation is in line with Fortis' industry group. Marshall's total compensation comprises base salary, annual incentives, stock options, and performance stock units, with 75% of total compensation at risk. We do not like that annual cash incentives are based on earnings per share targets, as EPS can be manipulated and may not be an indication of shareholder value creation. Marshall has a significant ownership stake, which we believe aligns shareholder and management interests. From a corporate governance perspective, we like that the CEO and chairman positions are separated. While the board of directors has vast experience, we would prefer that its members have more direct utility experience.

### Analyst Notes

#### Fortis Reports Full-Year Earnings, Announces Settlement Agreement with New York Regulators 19 Feb 2013

Fortis Inc. FTS reported full-year ongoing EPS of \$1.70, compared with \$1.65 in the same year-ago period. Earnings were negatively affected by the 5% increase in shares outstanding due to the company's equity share issuance for the company's CH Energy Acquisition. The company will pay CAD 1.24 per share dividend in 2013, a 3.3% increase from 2012. We are reaffirming our CAD 31 per share fair value estimate, 2013 EPS estimate, narrow moat, and stable moat trend.

In January, Fortis filed a settlement agreement reached with the New York State Public Service Commission staff. Approval by the commission, which we expect, is the last regulatory hurdle to complete the company's announced \$1.5 billion acquisition of CH Energy Group. Management expects the transaction to close in the second quarter, and we continue to forecast the transaction will be slightly value-dilutive for Fortis shareholders. The company's regulated earnings continued to perform well, registering 11% growth in regulated earnings attributed to higher regulated infrastructure investments and allowed revenue increases.

#### Fortis Reports Lower Third-Quarter Earnings on Acquisition Expenses 01 Nov 2012

Fortis, Inc. FTS posted EPS of \$0.24 in the third quarter, down from \$0.30 in the year-ago quarter. The company will pay \$1.20 per share in dividends in 2012, up 3.4% from 2011. We are reaffirming our \$30 per share fair value estimate and 2012 EPS estimate.

The company incurred \$10 million in acquisition-related expenses for its \$1.5 billion CH Energy Group purchase, which it announced in February 2012. Fortis awaits New York State Public Service Commission approval. It already

has received approvals from shareholders, the Federal Energy Commission, and the Committee on Foreign Investment. We continue to estimate an 85% probability of closing and forecast the transaction will be slightly value-dilutive for Fortis shareholders, included in our fair value estimate.

The company's regulated Canadian Electric Utilities increased earnings 26% from the year-ago quarter, aided by stronger transmission revenue and returns from infrastructure investments offset by lower allowed returns on equity. In a low-usage quarter for gas, the company's regulated gas unit lost \$6 million compared to a \$4 million loss in the year-ago period primarily related to revenue recognition for seasonal gas consumption and lower customer additions. The company's non-regulated generation unit showed weakness from lower hydroelectric generation from reduced water levels.

The company has continued to progress through a busy 2012 regulatory calendar, receiving regulatory decisions at FortisBC Energy, Fortis Alberta, and FortisBC Electric. We expect the company will receive additional decisions at Fortis Alberta and Newfoundland Power before year's end. Allowed revenue increases are vital in allowing the company to earn competitive returns on the company's planned five-year \$5.5 billion capital program through 2016, of which it plans to spend \$1.3 billion in 2012.

# Research Methodology for Valuing Companies

## Components of Our Methodology

- ▶ Economic Moat™ Rating
- ▶ Moat Trend™ Rating
- ▶ Moat Valuation
- ▶ Three-Stage Discounted Cash Flow
- ▶ Weighted Average Cost of Capital
- ▶ Fair Value Estimate
- ▶ Scenario Analysis
- ▶ Uncertainty Ratings
- ▶ Margin of Safety
- ▶ Consider Buying/Selling
- ▶ Stewardship Rating

The Morningstar Rating for stocks identifies companies trading at a discount or premium to our analysts' assessment of their fair value. A number of components drive this rating: (1) our assessment of the firm's economic moat, (2) our estimate of the stock's intrinsic value based on a discounted cash-flow model, (3) the margin of safety bands we apply to our Fair Value Estimate, and (4) the current stock price relative to our fair value estimate.

The concept of the Morningstar Economic Moat™ Rating plays a vital role not only in our qualitative assessment of a firm's investment potential, but also in our valuation process. We assign three moat ratings—none, narrow, or wide—as well as the Morningstar Moat Trend™ Rating—positive, stable, or negative—to each company we cover. There are two major requirements for firms to earn either a narrow or wide moat rating: (1) the prospect of earning above-average returns on capital; and (2) some competitive edge that prevents these returns from quickly eroding. The assumptions we make about a firm's moat determine the length of “economic outperformance” that we assume in the latter stages

of our valuation model. We also quantify the value of each firm's moat, which represents the difference between a firm's enterprise value and the value of the firm if no future net investment were to occur. Said differently, moat value identifies the value generated by the firm as a result of any future net new investment. Our Moat Trend Rating reflects our assessment of whether each firm's competitive advantage is either getting stronger or weaker, since we think of moats as dynamic, rather than static.

At the heart of our valuation system is a detailed projection of a company's future cash flows. The first stage of our three-stage discounted cash flow model can last from 5 to 10 years and contains numerous detailed assumptions about various financial and operating items. The second stage of our model—where a firm's return on new invested capital (RONIC) and earnings growth rate implicitly fade until the perpetuity year—can last anywhere from 0 years (for no-moat firms) to 20 years (for wide-moat companies). In our third stage, we assume the firm's RONIC equals its weighted average cost of capital, and we calculate a continuing value using a standard

\* Please contact a sales representative for more information.

perpetuity formula. In deciding on the rate at which to discount future cash flows, we ignore stock-price volatility. Instead, we rely on a system that measures the estimated volatility of a firm's underlying future free cash flows, taking into account fundamental factors such as the diversity of revenue sources and the firm's fixed cost structure.

We also employ a number of other tools to augment our valuation process, including scenario analysis, where we assess the likelihood and performance of a business under different economic and firm-specific conditions. Our analysts typically model three to five scenarios for each company we cover, stress-testing the model and examining the distribution of resulting fair values.

The Morningstar Uncertainty Rating captures the range of these potential fair values, based on an assessment of a company's future sales range, the firm's operating and financial leverage, and any other contingent events that may impact the business. Our analysts use this range to assign an appropriate margin of safety—or the discount/premium

to a fair value we apply in setting our consider buying/consider selling prices. Firms trading below our consider-buying prices receive our highest rating of five stars, whereas firms trading above our consider-selling prices receive our lowest rating of one star.

Our corporate Stewardship Rating represents our assessment of management's stewardship of shareholder capital, with particular emphasis on capital allocation decisions. Analysts consider companies' investment strategy and valuation, financial leverage, dividend and share buyback policies, execution, compensation, related party transactions, and accounting practices. Corporate governance practices are only considered if they've had a demonstrated impact on shareholder value. Analysts assign one of three ratings: "Exemplary," "Standard," and "Poor." Analysts judge stewardship from an equity holder's perspective. Ratings are determined on an absolute basis. Most companies will receive a Standard rating, and this is the default rating in the absence of evidence that managers have made exceptionally strong or poor capital allocation decisions.

### Morningstar Margin of Safety and Star Rating Bands

\* Occasionally a stock's uncertainty will be too high for us to estimate, in which case we label it Extreme.

# Morningstar's Approach to Rating Corporate Credit

- Offers a proprietary measure of the credit quality of companies on our coverage list.
- Encapsulates our in-depth modeling and quantitative work in one letter grade.
- Allows investors to rank companies by each of the four underlying components of our credit ratings, including both analyst-driven and quantitative measures.
- Provides access to all the underlying forecasts that go into the rating, available through our institutional service.

## Purpose

The Morningstar Corporate Credit Rating measures the ability of a firm to satisfy its debt and debt-like obligations. The higher the rating, the less likely we think the company is to default on these obligations.

The Morningstar Corporate Credit Rating builds on the modeling expertise of our securities research team. For each company, we publish:

- Five years of detailed pro-forma financial statements
- Annual estimates of free cash flow
- Annual forecasts of return on invested capital
- Scenario analyses, including upside and downside cases
- Forecasts of leverage, coverage, and liquidity ratios for five years
- Estimates of off balance sheet liabilities

These forecasts are key inputs into the Morningstar Corporate Credit Rating and are available to subscribers at [select.morningstar.com](http://select.morningstar.com).

## Methodology

We feel it's important to perform credit analysis through different lenses—qualitative and quantitative, as well as fundamental and market-driven. We therefore evaluate each company in four broad categories.

### Business Risk

Business Risk captures the fundamental uncertainty around a firm's business operations and the cash flow generated by those operations. Key components of the Business Risk rating include the Morningstar Economic Moat™ Rating and the Morningstar Uncertainty Rating.

### Cash Flow Cushion™

Morningstar's proprietary Cash Flow Cushion™ ratio is a fundamental indicator of a firm's future financial health. The measure reveals how many times a company's internal cash generation plus total excess liquid cash will cover its debt-like contractual commitments over the next five years. The Cash Flow Cushion acts as a predictor of financial distress, bringing to light potential refinancing, operational, and liquidity risks inherent to the firm.

## Morningstar Research Methodology for Determining Corporate Credit Ratings

## Morningstar's Approach to Rating Corporate Credit

The advantage of the Cash Flow Cushion ratio relative to other fundamental indicators of credit health is that the measure focuses on the future cash-generating performance of the firm derived from Morningstar's proprietary discounted cash flow model. By making standardized adjustments for certain expenses to reflect their debt-like characteristics, we can compare future projected free cash flows with debt-like cash commitments coming due in any particular year. The forward-looking nature of this metric allows us to anticipate changes in a firm's financial health and pinpoint periods where cash shortfalls are likely to occur.

### *Morningstar Solvency Score™*

The Morningstar Solvency Score™ is a quantitative score derived from both historical and forecasted financial ratios. It includes ratios that focus on liquidity (a company's ability to meet short term cash outflows), profitability (a company's ability to generate profit per unit of input), capital structure (how does the company finance its operations), and interest coverage (how much of profit is used up by interest payments).

### *Distance to Default*

Morningstar's quantitative Distance to Default measure ranks companies on the likelihood that they will tumble into financial distress. The measure is a linear model of the percentile of a firm's leverage (ratio of Enterprise Value to Market Value), the percentile of a firm's equity volatility relative to the rest of the universe and the interaction of these two percentiles. This is a proxy methodology for the common definition of Distance to Default which relies on option-based pricing models. The proxy has the benefit of increased breadth of coverage, greater simplicity of calculation, and more predictive power.

For each of these four categories, we assign a score, which we then translate into a descriptive rating along the scale of Very Good / Good / Fair / Poor / Very Poor.

### **Overall Credit Rating**

The four component ratings roll up into a single preliminary credit rating. To determine the final credit rating, a credit committee of at least five senior research personnel reviews each preliminary rating.

We review credit ratings on a regular basis and as events warrant. Any change in rating must be approved by the Credit Rating Committee.

### **Investor Access**

Morningstar Corporate Credit Ratings are available on Morningstar.com. Our credit research, including detailed cash-flow models that contain all of the components of the Morningstar Corporate Credit Rating, is available to subscribers at [select.morningstar.com](http://select.morningstar.com).

Analyst Note	1
Morningstar Analyst Forecasts	2

### Analyst Note 07 May 2013

Fortis reported first-quarter earnings per share of \$0.79, compared with \$0.64 in the year-ago period. Earnings were boosted \$0.12 from an extraordinary gain relating to a settlement with the government of Newfoundland over the 2008 expropriation of nonregulated hydroelectric assets. The company will pay a CAD 1.24 per share dividend in 2013, a 3.3% increase from 2012. We are reaffirming our CAD 31 fair value estimate, 2013 EPS estimate, narrow moat, and stable moat trend.

The company's regulated utilities performed well, particularly the FortisAlberta and FortisBC Electric subsidiaries. FortisAlberta reached approval for an interim distribution revenue increase effective Jan. 1 until a final decision is made in late 2013. The subsidiary also benefited from higher transmission revenue and lower depreciation. FortisBC Electric benefited from increased infrastructure investments, lower interest expense, and an increase in allowance for funds used during construction.

In January, Fortis reached a settlement agreement with the New York State Public Service Commission staff related to its \$1.5 billion CH Energy Group acquisition proposal. On Friday, an advisory opinion issued by administrative law judges recommended approval of the acquisition. The commission will consider the opinion in determining its final order, expected in June. Commission approval, which we expect, is the last regulatory hurdle to complete the deal. We continue to forecast the transaction will be slightly value-dilutive for Fortis shareholders.

### Profile

Fortis primarily owns and operates utility transmission and distribution assets in Canada. It has smaller stakes in electricity generation, several Caribbean utilities, and Canadian hotel and commercial real estate. The firm's regulated natural gas operations serve 950,000 customers in British Columbia. Its regulated electric utility operations serve 1.1 million customers throughout Canada and in Grand Cayman and Turks and Caicos. Its Canadian operations accounted for 94% of its total assets as of 2012.

### Analyst Note 01 Aug 2013

Fortis reported second-quarter earnings per share of \$0.28, compared with \$0.33 in the year-ago period. Earnings were negatively affected by \$32 million in acquisition-related expenses, or \$0.17 per share, partially offset by a \$25 million, or \$0.13 per share, income tax recovery. Excluding the effects of both the acquisition and tax items, earnings were \$0.32 compared with \$0.36 per share. The company will pay a CAD 1.24 per share dividend in 2013, a 3.3% increase from 2012. We are reaffirming our CAD 31 fair value estimate, 2013 EPS estimate, narrow moat, and stable moat trend.

In late June, Fortis closed its \$1.5 billion CH Energy Group acquisition after receiving regulatory approval from the New York State Public Service Commission. Management expects the transaction to be EPS accretive beginning in 2015. Infrastructure investments aided the company's Canadian regulated gas utilities, offset by lower volumes, fewer customer additions and an unfavorable regulatory decision. Fortis' regulated Canadian electric utilities earnings grew 23%, aided by income tax recoveries and customer growth.

### Investment Thesis 23 Aug 2013

Fortis manages electric and gas regulated utilities in Canada and the Caribbean, resulting in stable operating results. The company's noncore generation and real estate holding operations account for 14% of operating earnings. While we are less excited about the distractions of these noncore operations, management continues to focus on electric and natural gas distribution in North America.

Fortis' main regulated Canadian operations are in British Columbia, Alberta, and Newfoundland. These relatively low-risk operations result in stable earnings and fund the consistent dividend growth of the past four decades. Rate-base additions should be significant through 2017, as the healthier Canadian economy drives usage and customer growth to support the firm's CAD 5.3 billion investment plans. This should allow the firm to increase its rate base at double-digit rates each year during this expansion period.

On a weighted-average basis, Fortis' allowed return on equity in its Canadian service territories is 9.25%. While this return is lower than that typically granted to comparable U.S. utilities, it seems reasonable given the low-risk nature of Fortis' transmission and delivery operations.

Fortis has long expressed interest in expanding its operations through U.S. acquisitions. In 2012, Fortis announced a \$1.5 billion cash and debt bid for CH Energy Group, a regulated New York Mid-Hudson River Valley utility. The acquisition allows Fortis to enter the U.S.-regulated electric and gas distribution businesses in order to gain a better understanding of the U.S. market, with geographical proximity to its current Canadian operations. Given the relatively small size of CH Energy, we think Fortis will continue to look for acquisition opportunities after this transaction is complete.

### Morningstar Analysis

#### Valuation, Growth and Profitability 23 Aug 2013

We are reaffirming our CAD 31 per share fair value estimate after incorporating second-quarter earnings that were in line with our expectations. In accounting for the CH Energy acquisition, we adjusted for certain tax and regulatory balance sheet items. We believe the deal is slightly value-dilutive for Fortis shareholders. We expect the transaction to close in the second quarter.

We forecast 6% annual earnings growth through 2017 accounting for normalized weather conditions. We assume 1.5% annual energy use growth at the Canadian utilities and consistent allowed returns on equity. Based on management's guidance, we forecast total investments of CAD 6.3 billion at the utilities through 2017, leading to 6% annualized rate base growth.

We use an 8.0% cost of equity to arrive at a 6.7% weighted average cost of capital in our discounted cash flow valuation.

#### Scenario Analysis

Allowed returns at the Canadian utilities are a significant driver of our valuation estimates. If we assume a 100-basis-point decrease in allowed returns on equity in 2013 and beyond, our fair value estimate decreases to CAD 21 per share. Better-than-expected allowed returns on equity drive similar upside results.

Finally, a 50-basis-point change in our cost of equity assumption changes our fair value estimate by CAD 3 per share.

#### Economic Moat

Fortis owns a difficult-to-replicate network of regulated power generation, transmission, and distribution assets and provides essential energy sources: natural gas and electricity. In exchange for its monopoly position, regulators set Fortis' returns at levels that aim to keep customer costs

low while providing adequate returns for capital providers. This implicit contract between regulators and the utility should allow Fortis to earn its cost of capital in the long run and leads us to assign Fortis' regulated utilities a narrow economic moat.

#### Moat Trend

We assign Fortis a stable moat because of its monopoly position and stable regulatory environment, which should continue to allow the firm to earn its cost of capital. We do not expect the regulatory relationship to change. The regulatory framework that caps revenue and returns prevents the firm from attaining a wide moat, as with all regulated utilities we cover.

### Bulls Say/Bears Say

#### Bulls Say

- ▶ Fortis operates a stable business profile, offering a strong base for consistent earnings and dividend growth.
- ▶ With an aggressive capital expenditure plan, we forecast Fortis' rate base to grow 6% annually.
- ▶ Fortis has a consistent dividend growth history, paying consecutive quarterly dividends for four decades and increasing the dividend faster than most of its peers in recent years.

#### Bears Say

- ▶ The Canadian regulatory environment offers lower allowed returns than in the U.S.
- ▶ The Belize expropriation demonstrates how Caribbean operations offer higher growth opportunities but substantially higher risk.
- ▶ Fortis operates noncore hotel and commercial real estate assets, potentially distracting management from core regulated operations.

### Financial Health & Capital Structure

Through 2017, Fortis has CAD 5.3 billion of planned capital expenditures, which will require it to access the debt and equity capital markets. Fortis has manageable debt maturities through 2017. The company issued significant equity in 2011 to help finance its capital expenditure plan, and we expect it to issue additional equity in 2013 to accommodate employee stock purchase plans and to support its capital expenditure plan.

With a 54% debt/capital ratio and 3.5 times interest coverage, Fortis' financial health looks reasonably sound, particularly in light of its stable, low-risk business model. We expect the company to maintain a capital structure in line with regulatory targets throughout its current investment cycle.

### Enterprise Risk

Fortis' key risk to future earnings is regulatory uncertainty. The company faces regulatory risks that create uncertainties around costs and allowed returns, especially given the significant capital expenditure plan through 2017. Fortis is also exposed to political and economic instability at its Caribbean operations. With an eye toward acquisitions, the company risks overpaying for regulated U.S. assets and must be mindful of the strategic benefits. As with all regulated utilities, Fortis faces the risk of an inflationary environment that would raise borrowing costs and make other investments more attractive for income-seeking investors.

### Stewardship: 23 Aug 2013

Stanley Marshall has been president and CEO since 1995, leading a group of experienced utility executives. Total direct compensation is in line with Fortis' industry group. Marshall's total compensation comprises base salary, annual incentives, stock options, and performance stock units, with 75% of total compensation at risk. We do not like that annual cash incentives are based on earnings per share targets, as EPS can be manipulated and may not be an indication of shareholder value creation. Marshall has a significant ownership stake, which we believe aligns shareholder and management interests. From a corporate governance perspective, we like that the CEO and chairman positions are separated. Additionally, we would prefer the board of directors have more direct utility experience.

### Analyst Notes

#### Fortis Reports Second-Quarter Earnings, Closes CH Energy Acquisition 01 Aug 2013

Fortis reported second-quarter earnings per share of \$0.28, compared with \$0.33 in the year-ago period. Earnings were negatively affected by \$32 million in acquisition-related expenses, or \$0.17 per share, partially offset by a \$25 million, or \$0.13 per share, income tax recovery. Excluding the effects of both the acquisition and tax items, earnings were \$0.32 compared with \$0.36 per share. The company will pay a CAD 1.24 per share dividend in 2013, a 3.3% increase from 2012. We are reaffirming our CAD 31 fair value estimate, 2013 EPS estimate, narrow moat, and stable moat trend.

In late June, Fortis closed its \$1.5 billion CH Energy Group acquisition after receiving regulatory approval from the New York State Public Service Commission. Management expects the transaction to be EPS accretive beginning in 2015. Infrastructure investments aided the company's Canadian regulated gas utilities, offset by lower volumes, fewer customer additions and an unfavorable regulatory decision. Fortis' regulated Canadian electric utilities earnings grew 23%, aided by income tax recoveries and customer growth.

The company's regulated utilities performed well, particularly the FortisAlberta and FortisBC Electric subsidiaries. FortisAlberta reached approval for an interim distribution revenue increase effective Jan. 1 until a final decision is made in late 2013. The subsidiary also benefited from higher transmission revenue and lower depreciation. FortisBC Electric benefited from increased infrastructure investments, lower interest expense, and an increase in allowance for funds used during construction.

In January, Fortis reached a settlement agreement with the New York State Public Service Commission staff related to its \$1.5 billion CH Energy Group acquisition proposal. On Friday, an advisory opinion issued by administrative law judges recommended approval of the acquisition. The commission will consider the opinion in determining its final order, expected in June. Commission approval, which we expect, is the last regulatory hurdle to complete the deal. We continue to forecast the transaction will be slightly value-dilutive for Fortis shareholders.

#### Fortis Posts Solid 1Q Results; Awaiting Approval for CH Energy Acquisition 07 May 2013

Fortis reported first-quarter earnings per share of \$0.79, compared with \$0.64 in the year-ago period. Earnings were boosted \$0.12 from an extraordinary gain relating to a settlement with the government of Newfoundland over the 2008 expropriation of nonregulated hydroelectric assets. The company will pay a CAD 1.24 per share dividend in 2013, a 3.3% increase from 2012. We are reaffirming our CAD 31 fair value estimate, 2013 EPS estimate, narrow moat, and stable moat trend.

# Research Methodology for Valuing Companies

## Components of Our Methodology

- ▶ Economic Moat™ Rating
- ▶ Moat Trend™ Rating
- ▶ Moat Valuation
- ▶ Three-Stage Discounted Cash Flow
- ▶ Weighted Average Cost of Capital
- ▶ Fair Value Estimate
- ▶ Scenario Analysis
- ▶ Uncertainty Ratings
- ▶ Margin of Safety
- ▶ Consider Buying/Selling
- ▶ Stewardship Rating

The Morningstar Rating for stocks identifies companies trading at a discount or premium to our analysts' assessment of their fair value. A number of components drive this rating: (1) our assessment of the firm's economic moat, (2) our estimate of the stock's intrinsic value based on a discounted cash-flow model, (3) the margin of safety bands we apply to our Fair Value Estimate, and (4) the current stock price relative to our fair value estimate.

The concept of the Morningstar Economic Moat™ Rating plays a vital role not only in our qualitative assessment of a firm's investment potential, but also in our valuation process. We assign three moat ratings—none, narrow, or wide—as well as the Morningstar Moat Trend™ Rating—positive, stable, or negative—to each company we cover. There are two major requirements for firms to earn either a narrow or wide moat rating: (1) the prospect of earning above-average returns on capital; and (2) some competitive edge that prevents these returns from quickly eroding. The assumptions we make about a firm's moat determine the length of "economic outperformance" that we assume in the latter stages

of our valuation model. We also quantify the value of each firm's moat, which represents the difference between a firm's enterprise value and the value of the firm if no future net investment were to occur. Said differently, moat value identifies the value generated by the firm as a result of any future net new investment. Our Moat Trend Rating reflects our assessment of whether each firm's competitive advantage is either getting stronger or weaker, since we think of moats as dynamic, rather than static.

At the heart of our valuation system is a detailed projection of a company's future cash flows. The first stage of our three-stage discounted cash flow model can last from 5 to 10 years and contains numerous detailed assumptions about various financial and operating items. The second stage of our model—where a firm's return on new invested capital (RONIC) and earnings growth rate implicitly fade until the perpetuity year—can last anywhere from 0 years (for no-moat firms) to 20 years (for wide-moat companies). In our third stage, we assume the firm's RONIC equals its weighted average cost of capital, and we calculate a continuing value using a standard

\* Please contact a sales representative for more information.

perpetuity formula. In deciding on the rate at which to discount future cash flows, we ignore stock-price volatility. Instead, we rely on a system that measures the estimated volatility of a firm's underlying future free cash flows, taking into account fundamental factors such as the diversity of revenue sources and the firm's fixed cost structure.

We also employ a number of other tools to augment our valuation process, including scenario analysis, where we assess the likelihood and performance of a business under different economic and firm-specific conditions. Our analysts typically model three to five scenarios for each company we cover, stress-testing the model and examining the distribution of resulting fair values.

The Morningstar Uncertainty Rating captures the range of these potential fair values, based on an assessment of a company's future sales range, the firm's operating and financial leverage, and any other contingent events that may impact the business. Our analysts use this range to assign an appropriate margin of safety—or the discount/premium

to a fair value we apply in setting our consider buying/consider selling prices. Firms trading below our consider-buying prices receive our highest rating of five stars, whereas firms trading above our consider-selling prices receive our lowest rating of one star.

Our corporate Stewardship Rating represents our assessment of management's stewardship of shareholder capital, with particular emphasis on capital allocation decisions. Analysts consider companies' investment strategy and valuation, financial leverage, dividend and share buyback policies, execution, compensation, related party transactions, and accounting practices. Corporate governance practices are only considered if they've had a demonstrated impact on shareholder value. Analysts assign one of three ratings: "Exemplary," "Standard," and "Poor." Analysts judge stewardship from an equity holder's perspective. Ratings are determined on an absolute basis. Most companies will receive a Standard rating, and this is the default rating in the absence of evidence that managers have made exceptionally strong or poor capital allocation decisions.

## Morningstar Margin of Safety and Star Rating Bands

\* Occasionally a stock's uncertainty will be too high for us to estimate, in which case we label it Extreme.

# Morningstar's Approach to Rating Corporate Credit

- Offers a proprietary measure of the credit quality of companies on our coverage list.
- Encapsulates our in-depth modeling and quantitative work in one letter grade.
- Allows investors to rank companies by each of the four underlying components of our credit ratings, including both analyst-driven and quantitative measures.
- Provides access to all the underlying forecasts that go into the rating, available through our institutional service.

## Purpose

The Morningstar Corporate Credit Rating measures the ability of a firm to satisfy its debt and debt-like obligations. The higher the rating, the less likely we think the company is to default on these obligations.

The Morningstar Corporate Credit Rating builds on the modeling expertise of our securities research team. For each company, we publish:

- Five years of detailed pro-forma financial statements
- Annual estimates of free cash flow
- Annual forecasts of return on invested capital
- Scenario analyses, including upside and downside cases
- Forecasts of leverage, coverage, and liquidity ratios for five years
- Estimates of off balance sheet liabilities

These forecasts are key inputs into the Morningstar Corporate Credit Rating and are available to subscribers at [select.morningstar.com](http://select.morningstar.com).

## Methodology

We feel it's important to perform credit analysis through different lenses—qualitative and quantitative, as well as fundamental and market-driven. We therefore evaluate each company in four broad categories.

### Business Risk

Business Risk captures the fundamental uncertainty around a firm's business operations and the cash flow generated by those operations. Key components of the Business Risk rating include the Morningstar Economic Moat™ Rating and the Morningstar Uncertainty Rating.

### Cash Flow Cushion™

Morningstar's proprietary Cash Flow Cushion™ ratio is a fundamental indicator of a firm's future financial health. The measure reveals how many times a company's internal cash generation plus total excess liquid cash will cover its debt-like contractual commitments over the next five years. The Cash Flow Cushion acts as a predictor of financial distress, bringing to light potential refinancing, operational, and liquidity risks inherent to the firm.

## Morningstar Research Methodology for Determining Corporate Credit Ratings

## Morningstar's Approach to Rating Corporate Credit

The advantage of the Cash Flow Cushion ratio relative to other fundamental indicators of credit health is that the measure focuses on the future cash-generating performance of the firm derived from Morningstar's proprietary discounted cash flow model. By making standardized adjustments for certain expenses to reflect their debt-like characteristics, we can compare future projected free cash flows with debt-like cash commitments coming due in any particular year. The forward-looking nature of this metric allows us to anticipate changes in a firm's financial health and pinpoint periods where cash shortfalls are likely to occur.

### *Morningstar Solvency Score™*

The Morningstar Solvency Score™ is a quantitative score derived from both historical and forecasted financial ratios. It includes ratios that focus on liquidity (a company's ability to meet short term cash outflows), profitability (a company's ability to generate profit per unit of input), capital structure (how does the company finance its operations), and interest coverage (how much of profit is used up by interest payments).

### *Distance to Default*

Morningstar's quantitative Distance to Default measure ranks companies on the likelihood that they will tumble into financial distress. The measure is a linear model of the percentile of a firm's leverage (ratio of Enterprise Value to Market Value), the percentile of a firm's equity volatility relative to the rest of the universe and the interaction of these two percentiles. This is a proxy methodology for the common definition of Distance to Default which relies on option-based pricing models. The proxy has the benefit of increased breadth of coverage, greater simplicity of calculation, and more predictive power.

For each of these four categories, we assign a score, which we then translate into a descriptive rating along the scale of Very Good / Good / Fair / Poor / Very Poor.

### **Overall Credit Rating**

The four component ratings roll up into a single preliminary credit rating. To determine the final credit rating, a credit committee of at least five senior research personnel reviews each preliminary rating.

We review credit ratings on a regular basis and as events warrant. Any change in rating must be approved by the Credit Rating Committee.

### **Investor Access**

Morningstar Corporate Credit Ratings are available on Morningstar.com. Our credit research, including detailed cash-flow models that contain all of the components of the Morningstar Corporate Credit Rating, is available to subscribers at [select.morningstar.com](http://select.morningstar.com).

Analyst Note	1
Morningstar Analyst Forecasts	2

### Analyst Note 01 Nov 2013

Fortis reported third-quarter earnings per share of \$0.23, compared with \$0.24 in the year-ago period. Year-to-date EPS were \$1.27, compared to \$1.20 in the same period. The company will pay a CAD 1.24 per share dividend in 2013, a 3.3% increase from 2012. We are reaffirming our CAD 31 per share fair value estimate, 2013 EPS estimate, narrow moat, and stable moat trend.

Fortis recently completed its \$1.5 billion CH Energy Group acquisition. Management expects the transaction to be accretive to EPS in 2015. CH Energy Group contributed \$12 million in the quarter, which was offset by the common share offering and financing costs related to the transaction. We suspect management continues to look for additional regulated opportunities in the U.S.

Fortis' Canadian Regulated Gas Utilities notched a \$14 million loss compared to a \$6 million loss in the year-ago quarter, in a period of low demand from warmer temperatures. Higher operating expenses and lower allowed rates of return attributed to the larger loss. Earnings from capital projects partially offset segment weakness. The company's Canadian Regulated Electric Utilities also showed weakness, earning \$51 million in the third quarter compared to \$55 million in the year-ago quarter. In general, across the segment earnings from completion of infrastructure projects were offset from lower allowed rates of return. Management continues to work towards completing \$1.2 billion in capital projects in 2013, part of a larger \$6 billion program, which will drive future earnings and dividend growth.

### Profile

Fortis owns and operates utility transmission and distribution assets in Canada. It has smaller stakes in electricity generation, several Caribbean utilities, and Canadian hotel and commercial real estate. The firm's regulated natural gas operations serve 950,000 customers in British Columbia. Its regulated electric utility operations serve 1.1 million customers throughout Canada and in Grand Cayman and Turks and Caicos. Its Canadian operations accounted for 94% of its total assets as of 2012.

## Management Meeting: Acquisitive Fortis Management Seeks Further U.S. Expansion

Andrew Bischof, CFA  
Equity Analyst  
andrew.bischof@morningstar.com  
+1 (312) 696-6433

**Analyst Note** 14 Nov 2013

Fortis' appetite for further expansion in the U.S. was evident during our executive management meeting at the 48th Edison Electric Institute Financial Conference in Orlando, Fla. We are reaffirming our CAD 31 per share fair value estimate, narrow moat and stable moat trend ratings.

The primary analyst covering this company does not own its stock.

### Contents

Analyst Note	1
Morningstar Analyst Forecasts	2

Management indicated that the integration of the \$1.5 billion acquisition of Central Hudson Energy was complete. A prolonged regulatory approval process, which ultimately led to \$3 million in annual concessions, hasn't deterred management from seeking additional U.S. opportunities. Fortis sees multiple transactions in the U.S. during the next 10 years, indicating a desire for transactions \$5 billion and under. Management prefers regulated transmission and distribution assets but would consider combining with generation assets given the right asset mix. Fortis would not consider merchant assets. Since 2004, Fortis has acquired four regulated Canadian and U.S. utilities (Fortis Alberta, Fortis BCElectric, FortisBC Gas, Central Hudson Energy) for a combined \$6.7 billion. We caution management's enthusiasm for acquisitions as we currently view regulated utilities 6% overvalued, not accounting for a likely 20%-30% takeover premium.

At its regulated Canadian operations, management expects to invest \$1.0 billion-\$1.2 billion annually, with the largest allocation to Fortis Alberta, the company's fastest-growing utility. Build-out of Alberta's oil sand production should support 7%-8% near-term growth and \$400 million of annual capital spend. Fortis Alberta, the company's largest utility, will account for \$250 million in annual investment. Fortis has managed its Wanetta hydro expansion well, with construction on time and on budget for the \$900-million, 335 MW facility.

### Profile

Fortis owns and operates utility transmission and distribution assets in Canada. It has smaller stakes in electricity generation, several Caribbean utilities, and Canadian hotel and commercial real estate. The firm's regulated natural gas operations serve 950,000 customers in British Columbia. Its regulated electric utility operations serve 1.1 million customers throughout Canada and in Grand Cayman and Turks and Caicos. Its Canadian operations accounted for 94% of its total assets as of 2012.

### Investment Thesis 20 Nov 2013

Fortis manages electric and gas regulated utilities in Canada and the Caribbean, resulting in stable operating results. The company's noncore generation and real estate holding operations account for 14% of operating earnings. While we are less excited about the distractions of these noncore operations, management continues to focus on electric and natural gas distribution in North America.

Fortis' main regulated Canadian operations are in British Columbia, Alberta, and Newfoundland. These relatively low-risk operations result in stable earnings and fund the consistent dividend growth of the past four decades. Rate-base additions should be significant through 2017, as the healthier Canadian economy drives usage and customer growth to support the firm's CAD 5.3 billion investment plans. This should allow the firm to increase its rate base at double-digit rates each year during this expansion period.

On a weighted-average basis, Fortis' allowed return on equity in its Canadian service territories is 9.25%. While this return is lower than that typically granted to comparable U.S. utilities, it seems reasonable given the low-risk nature of Fortis' transmission and delivery operations.

Fortis has long expressed interest in expanding its operations through U.S. acquisitions. In 2012, Fortis announced a \$1.5 billion cash and debt bid for CH Energy Group, a regulated New York Mid-Hudson River Valley utility. The acquisition allows Fortis to enter the U.S.-regulated electric and gas distribution businesses in order to gain a better understanding of the U.S. market, with geographical proximity to its current Canadian operations. Given the relatively small size of CH Energy, we think Fortis will continue to look for acquisition opportunities after this transaction is complete.

### Profile

Fortis owns and operates utility transmission and distribution assets in Canada. It has smaller stakes in electricity generation, several Caribbean utilities, and Canadian hotel and commercial real estate. The firm's regulated natural gas operations serve 950,000 customers in British Columbia. Its regulated electric utility operations serve 1.1 million customers throughout Canada and in Grand Cayman and Turks and Caicos. Its Canadian operations accounted for 94% of its total assets as of 2012.

### Morningstar Analysis

#### Valuation, Growth and Profitability 23 Aug 2013

We are reaffirming our CAD 31 per share fair value estimate after incorporating second-quarter earnings that were in line with our expectations. In accounting for the CH Energy acquisition, we adjusted for certain tax and regulatory balance sheet items. We believe the deal is slightly value-dilutive for Fortis shareholders. We expect the transaction to close in the second quarter.

We forecast 6% annual earnings growth through 2017 accounting for normalized weather conditions. We assume 1.5% annual energy use growth at the Canadian utilities and consistent allowed returns on equity. Based on management's guidance, we forecast total investments of CAD 6.3 billion at the utilities through 2017, leading to 6% annualized rate base growth.

We use an 8.0% cost of equity to arrive at a 6.7% weighted average cost of capital in our discounted cash flow valuation.

#### Scenario Analysis

Allowed returns at the Canadian utilities are a significant driver of our valuation estimates. If we assume a 100-basis-point decrease in allowed returns on equity in 2013 and beyond, our fair value estimate decreases to CAD 21 per share. Better-than-expected allowed returns on equity drive similar upside results.

Finally, a 50-basis-point change in our cost of equity assumption changes our fair value estimate by CAD 3 per share.

#### Economic Moat

Fortis owns a difficult-to-replicate network of regulated power generation, transmission, and distribution assets and provides essential energy sources: natural gas and electricity. In exchange for its monopoly position, regulators set Fortis' returns at levels that aim to keep customer costs

low while providing adequate returns for capital providers. This implicit contract between regulators and the utility should allow Fortis to earn its cost of capital in the long run and leads us to assign Fortis' regulated utilities a narrow economic moat.

#### Moat Trend

We assign Fortis a stable moat because of its monopoly position and stable regulatory environment, which should continue to allow the firm to earn its cost of capital. We do not expect the regulatory relationship to change. The regulatory framework that caps revenue and returns prevents the firm from attaining a wide moat, as with all regulated utilities we cover.

### Bulls Say/Bears Say

#### Bulls Say

- ▶ Fortis operates a stable business profile, offering a strong base for consistent earnings and dividend growth.
- ▶ With an aggressive capital expenditure plan, we forecast Fortis' rate base to grow 6% annually.
- ▶ Fortis has a consistent dividend growth history, paying consecutive quarterly dividends for four decades and increasing the dividend faster than most of its peers in recent years.

#### Bears Say

- ▶ The Canadian regulatory environment offers lower allowed returns than in the U.S.
- ▶ The Belize expropriation demonstrates how Caribbean operations offer higher growth opportunities but substantially higher risk.
- ▶ Fortis operates noncore hotel and commercial real estate assets, potentially distracting management from core regulated operations.

### Financial Health & Capital Structure

Through 2017, Fortis has CAD 5.3 billion of planned capital expenditures, which will require it to access the debt and equity capital markets. Fortis has manageable debt maturities through 2017. The company issued significant equity in 2011 to help finance its capital expenditure plan, and we expect it to issue additional equity in 2013 to accommodate employee stock purchase plans and to support its capital expenditure plan.

With a 54% debt/capital ratio and 3.5 times interest coverage, Fortis' financial health looks reasonably sound, particularly in light of its stable, low-risk business model. We expect the company to maintain a capital structure in line with regulatory targets throughout its current investment cycle.

### Enterprise Risk

Fortis' key risk to future earnings is regulatory uncertainty. The company faces regulatory risks that create uncertainties around costs and allowed returns, especially given the significant capital expenditure plan through 2017. Fortis is also exposed to political and economic instability at its Caribbean operations. With an eye toward acquisitions, the company risks overpaying for regulated U.S. assets and must be mindful of the strategic benefits. As with all regulated utilities, Fortis faces the risk of an inflationary environment that would raise borrowing costs and make other investments more attractive for income-seeking investors.

### Management

23 Aug 2013

Stanley Marshall has been president and CEO since 1995, leading a group of experienced utility executives. Total direct compensation is in line with Fortis' industry group. Marshall's total compensation comprises base salary, annual incentives, stock options, and performance stock units, with 75% of total compensation at risk. We do not like that annual cash incentives are based on earnings per share targets, as EPS can be manipulated and may not be an indication of shareholder value creation. Marshall has a significant ownership stake, which we believe aligns shareholder and management interests. From a corporate governance perspective, we like that the CEO and chairman positions are separated. Additionally, we would prefer the board of directors have more direct utility experience.

## Analyst Notes

### Management Meeting: Acquisitive Fortis Management Seeks Further U.S. Expansion 14 Nov 2013

Fortis' appetite for further expansion in the U.S. was evident during our executive management meeting at the 48th Edison Electric Institute Financial Conference in Orlando, Fla. We are reaffirming our CAD 31 per share fair value estimate, narrow moat and stable moat trend ratings.

Management indicated that the integration of the \$1.5 billion acquisition of Central Hudson Energy was complete. A prolonged regulatory approval process, which ultimately led to \$3 million in annual concessions, hasn't deterred management from seeking additional U.S. opportunities. Fortis sees multiple transactions in the U.S. during the next 10 years, indicating a desire for transactions \$5 billion and under. Management prefers regulated transmission and distribution assets but would consider combining with generation assets given the right asset mix. Fortis would not consider merchant assets. Since 2004, Fortis has acquired four regulated Canadian and U.S. utilities (Fortis Alberta, Fortis BCElectric, FortisBC Gas, Central Hudson Energy) for a combined \$6.7 billion. We caution management's enthusiasm for acquisitions as we currently view regulated utilities 6% overvalued, not accounting for a likely 20%-30% takeover premium.

At its regulated Canadian operations, management expects to invest \$1.0 billion-\$1.2 billion annually, with the largest allocation to Fortis Alberta, the company's fastest-growing utility. Build-out of Alberta's oil sand production should support 7%-8% near-term growth and \$400 million of annual capital spend. Fortis Alberta, the company's largest utility, will account for \$250 million in annual investment. Fortis has managed its Wanetta hydro expansion well, with construction on time and on budget for the \$900-million, 335 MW facility.

### Fortis' Earnings Reflect Lower Allowed Returns and Higher Capital Additions 01 Nov 2013

Fortis reported third-quarter earnings per share of \$0.23, compared with \$0.24 in the year-ago period. Year-to-date EPS were \$1.27, compared to \$1.20 in the same period. The company will pay a CAD 1.24 per share dividend in 2013, a 3.3% increase from 2012. We are reaffirming our CAD 31 per share fair value estimate, 2013 EPS estimate, narrow moat, and stable moat trend.

Fortis recently completed its \$1.5 billion CH Energy Group acquisition. Management expects the transaction to be accretive to EPS in 2015. CH Energy Group contributed \$12 million in the quarter, which was offset by the common share offering and financing costs related to the transaction. We suspect management continues to look for additional regulated opportunities in the U.S.

Fortis' Canadian Regulated Gas Utilities notched a \$14 million loss compared to a \$6 million loss in the year-ago quarter, in a period of low demand from warmer temperatures. Higher operating expenses and lower allowed rates of return attributed to the larger loss. Earnings from capital projects partially offset segment weakness. The company's Canadian Regulated Electric Utilities also showed weakness, earning \$51 million in the third quarter compared to \$55 million in the year-ago quarter. In general, across the segment earnings from completion of infrastructure projects were offset from lower allowed rates of return. Management continues to work towards completing \$1.2 billion in capital projects in 2013, part of a larger \$6 billion program, which will drive future earnings and dividend growth.

### Fortis Reports Second-Quarter Earnings, Closes CH Energy Acquisition 01 Aug 2013

Fortis reported second-quarter earnings per share of \$0.28,

## Analyst Notes

compared with \$0.33 in the year-ago period. Earnings were negatively affected by \$32 million in acquisition-related expenses, or \$0.17 per share, partially offset by a \$25 million, or \$0.13 per share, income tax recovery. Excluding the effects of both the acquisition and tax items, earnings were \$0.32 compared with \$0.36 per share. The company will pay a CAD 1.24 per share dividend in 2013, a 3.3% increase from 2012. We are reaffirming our CAD 31 fair value estimate, 2013 EPS estimate, narrow moat, and stable moat trend.

In late June, Fortis closed its \$1.5 billion CH Energy Group acquisition after receiving regulatory approval from the New York State Public Service Commission. Management expects the transaction to be EPS accretive beginning in 2015. Infrastructure investments aided the company's Canadian regulated gas utilities, offset by lower volumes, fewer customer additions and an unfavorable regulatory decision. Fortis' regulated Canadian electric utilities earnings grew 23%, aided by income tax recoveries and customer growth.

# Research Methodology for Valuing Companies

## Components of Our Methodology

- ▶ Economic Moat™ Rating
- ▶ Moat Trend™ Rating
- ▶ Moat Valuation
- ▶ Three-Stage Discounted Cash Flow
- ▶ Weighted Average Cost of Capital
- ▶ Fair Value Estimate
- ▶ Scenario Analysis
- ▶ Uncertainty Ratings
- ▶ Margin of Safety
- ▶ Consider Buying/Selling
- ▶ Stewardship Rating

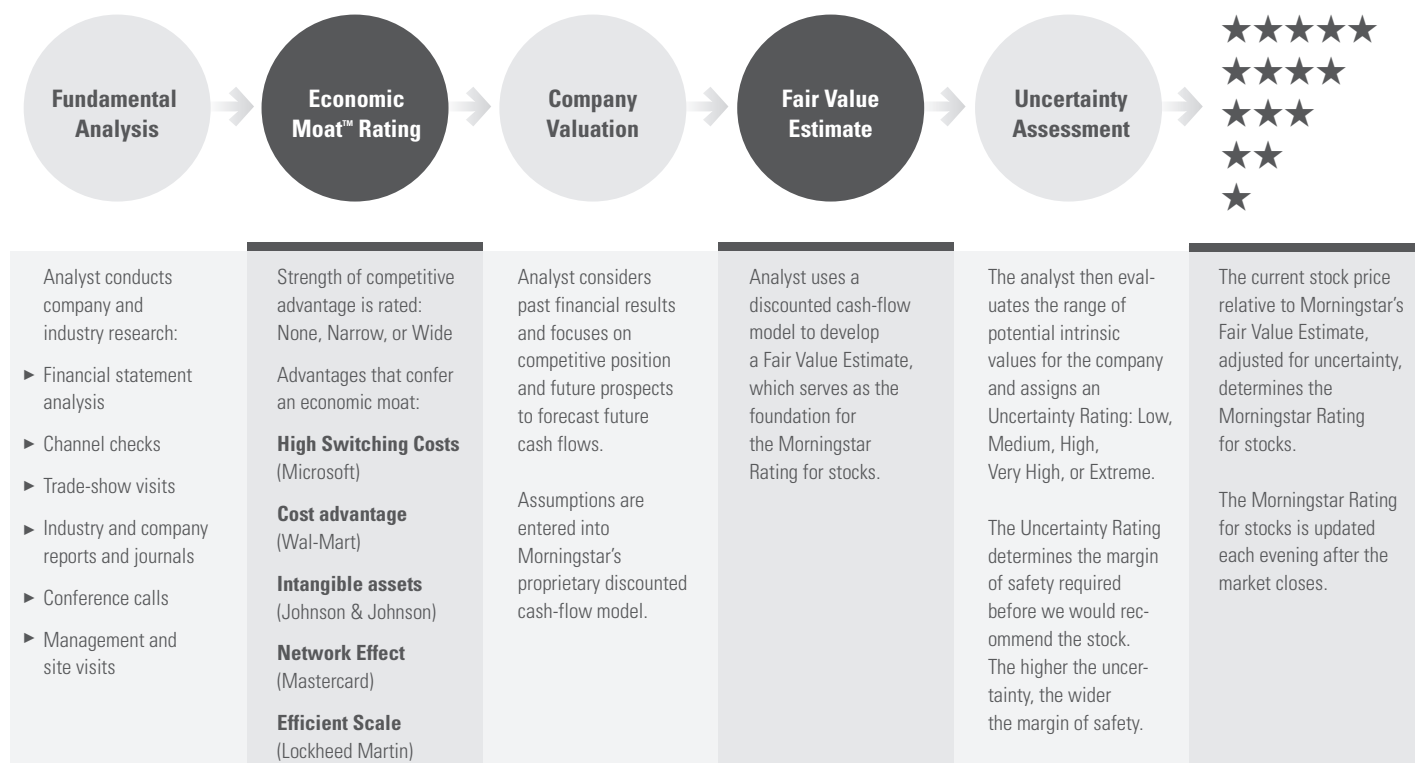

The Morningstar Rating for stocks identifies companies trading at a discount or premium to our analysts' assessment of their fair value. A number of components drive this rating: (1) our assessment of the firm's economic moat, (2) our estimate of the stock's intrinsic value based on a discounted cash-flow model, (3) the margin of safety bands we apply to our Fair Value Estimate, and (4) the current stock price relative to our fair value estimate.

The concept of the Morningstar Economic Moat™ Rating plays a vital role not only in our qualitative assessment of a firm's investment potential, but also in our valuation process. We assign three moat ratings—none, narrow, or wide—as well as the Morningstar Moat Trend™ Rating—positive, stable, or negative—to each company we cover. There are two major requirements for firms to earn either a narrow or wide moat rating: (1) the prospect of earning above-average returns on capital; and (2) some competitive edge that prevents these returns from quickly eroding. The assumptions we make about a firm's moat determine the length of “economic outperformance” that we assume in the latter stages

of our valuation model. We also quantify the value of each firm's moat, which represents the difference between a firm's enterprise value and the value of the firm if no future net investment were to occur. Said differently, moat value identifies the value generated by the firm as a result of any future net new investment. Our Moat Trend Rating reflects our assessment of whether each firm's competitive advantage is either getting stronger or weaker, since we think of moats as dynamic, rather than static.

At the heart of our valuation system is a detailed projection of a company's future cash flows. The first stage of our three-stage discounted cash flow model can last from 5 to 10 years and contains numerous detailed assumptions about various financial and operating items. The second stage of our model—where a firm's return on new invested capital (RONIC) and earnings growth rate implicitly fade until the perpetuity year—can last anywhere from 0 years (for no-moat firms) to 20 years (for wide-moat companies). In our third stage, we assume the firm's RONIC equals its weighted average cost of capital, and we calculate a continuing value using a standard

\* Please contact a sales representative for more information.

perpetuity formula. In deciding on the rate at which to discount future cash flows, we ignore stock-price volatility. Instead, we rely on a system that measures the estimated volatility of a firm's underlying future free cash flows, taking into account fundamental factors such as the diversity of revenue sources and the firm's fixed cost structure.

We also employ a number of other tools to augment our valuation process, including scenario analysis, where we assess the likelihood and performance of a business under different economic and firm-specific conditions. Our analysts typically model three to five scenarios for each company we cover, stress-testing the model and examining the distribution of resulting fair values.

The Morningstar Uncertainty Rating captures the range of these potential fair values, based on an assessment of a company's future sales range, the firm's operating and financial leverage, and any other contingent events that may impact the business. Our analysts use this range to assign an appropriate margin of safety—or the discount/premium

to a fair value we apply in setting our consider buying/consider selling prices. Firms trading below our consider-buying prices receive our highest rating of five stars, whereas firms trading above our consider-selling prices receive our lowest rating of one star.

Our corporate Stewardship Rating represents our assessment of management's stewardship of shareholder capital, with particular emphasis on capital allocation decisions. Analysts consider companies' investment strategy and valuation, financial leverage, dividend and share buyback policies, execution, compensation, related party transactions, and accounting practices. Corporate governance practices are only considered if they've had a demonstrated impact on shareholder value. Analysts assign one of three ratings: "Exemplary," "Standard," and "Poor." Analysts judge stewardship from an equity holder's perspective. Ratings are determined on an absolute basis. Most companies will receive a Standard rating, and this is the default rating in the absence of evidence that managers have made exceptionally strong or poor capital allocation decisions.

## Morningstar Margin of Safety and Star Rating Bands

\* Occasionally a stock's uncertainty will be too high for us to estimate, in which case we label it Extreme.

# Morningstar's Approach to Rating Corporate Credit

- Offers a proprietary measure of the credit quality of companies on our coverage list.
- Encapsulates our in-depth modeling and quantitative work in one letter grade.
- Allows investors to rank companies by each of the four underlying components of our credit ratings, including both analyst-driven and quantitative measures.
- Provides access to all the underlying forecasts that go into the rating, available through our institutional service.

## Purpose

The Morningstar Corporate Credit Rating measures the ability of a firm to satisfy its debt and debt-like obligations. The higher the rating, the less likely we think the company is to default on these obligations.

The Morningstar Corporate Credit Rating builds on the modeling expertise of our securities research team. For each company, we publish:

- Five years of detailed pro-forma financial statements
- Annual estimates of free cash flow
- Annual forecasts of return on invested capital
- Scenario analyses, including upside and downside cases
- Forecasts of leverage, coverage, and liquidity ratios for five years
- Estimates of off balance sheet liabilities

These forecasts are key inputs into the Morningstar Corporate Credit Rating and are available to subscribers at [select.morningstar.com](http://select.morningstar.com).

## Methodology

We feel it's important to perform credit analysis through different lenses—qualitative and quantitative, as well as fundamental and market-driven. We therefore evaluate each company in four broad categories.

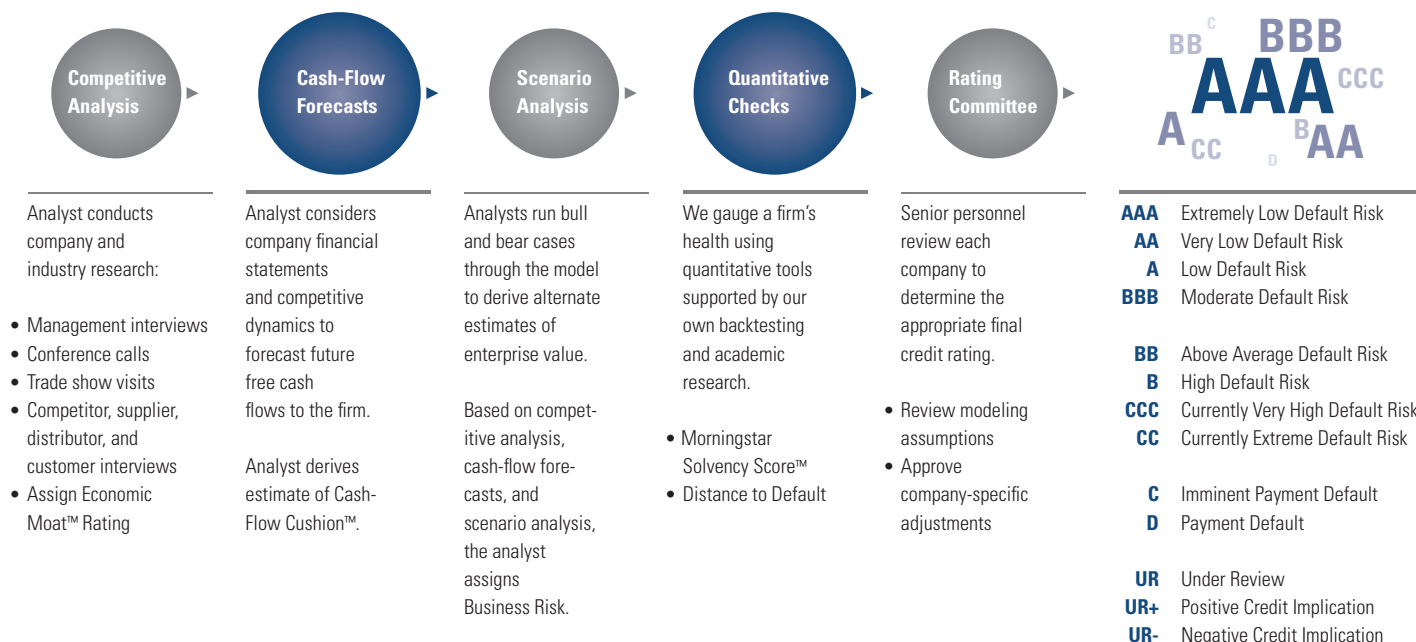

### Business Risk

Business Risk captures the fundamental uncertainty around a firm's business operations and the cash flow generated by those operations. Key components of the Business Risk rating include the Morningstar Economic Moat™ Rating and the Morningstar Uncertainty Rating.

### Cash Flow Cushion™

Morningstar's proprietary Cash Flow Cushion™ ratio is a fundamental indicator of a firm's future financial health. The measure reveals how many times a company's internal cash generation plus total excess liquid cash will cover its debt-like contractual commitments over the next five years. The Cash Flow Cushion acts as a predictor of financial distress, bringing to light potential refinancing, operational, and liquidity risks inherent to the firm.

## Morningstar Research Methodology for Determining Corporate Credit Ratings

## Morningstar's Approach to Rating Corporate Credit

The advantage of the Cash Flow Cushion ratio relative to other fundamental indicators of credit health is that the measure focuses on the future cash-generating performance of the firm derived from Morningstar's proprietary discounted cash flow model. By making standardized adjustments for certain expenses to reflect their debt-like characteristics, we can compare future projected free cash flows with debt-like cash commitments coming due in any particular year. The forward-looking nature of this metric allows us to anticipate changes in a firm's financial health and pinpoint periods where cash shortfalls are likely to occur.

### *Morningstar Solvency Score™*

The Morningstar Solvency Score™ is a quantitative score derived from both historical and forecasted financial ratios. It includes ratios that focus on liquidity (a company's ability to meet short term cash outflows), profitability (a company's ability to generate profit per unit of input), capital structure (how does the company finance its operations), and interest coverage (how much of profit is used up by interest payments).

### *Distance to Default*

Morningstar's quantitative Distance to Default measure ranks companies on the likelihood that they will tumble into financial distress. The measure is a linear model of the percentile of a firm's leverage (ratio of Enterprise Value to Market Value), the percentile of a firm's equity volatility relative to the rest of the universe and the interaction of these two percentiles. This is a proxy methodology for the common definition of Distance to Default which relies on option-based pricing models. The proxy has the benefit of increased breadth of coverage, greater simplicity of calculation, and more predictive power.

For each of these four categories, we assign a score, which we then translate into a descriptive rating along the scale of Very Good / Good / Fair / Poor / Very Poor.

### **Overall Credit Rating**

The four component ratings roll up into a single preliminary credit rating. To determine the final credit rating, a credit committee of at least five senior research personnel reviews each preliminary rating.

We review credit ratings on a regular basis and as events warrant. Any change in rating must be approved by the Credit Rating Committee.

### **Investor Access**

Morningstar Corporate Credit Ratings are available on Morningstar.com. Our credit research, including detailed cash-flow models that contain all of the components of the Morningstar Corporate Credit Rating, is available to subscribers at [select.morningstar.com](http://select.morningstar.com).

### Analyst Note 11 Dec 2013

Fortis management made good on its outspoken desire to add to its U.S. utilities holdings with a \$4.3 billion offer to acquire UNS Energy, a predominantly regulated electric and gas utility in Arizona. Management has told us repeatedly in recent meetings it would like to make multiple acquisitions of \$5 billion or less in the U.S. during the next decade. The UNS deal comes less than six months after Fortis closed its \$1.5 billion acquisition of Central Hudson Energy, its first U.S. acquisition.

We are reaffirming our CAD 31 per share fair value estimate, narrow economic moat, and stable moat trend ratings, although we think the price it is paying for UNS is rich relative to where its U.S. regulated utilities peers are trading. Fortis is offering \$60.25 per share, a 31% premium to UNS Energy's closing price on Dec. 11. The \$2.5 billion equity value offer implies a 2.3 price-to-book multiple, well above the median 1.7 price-to-book multiple for 60 U.S.-based regulated utilities as of November. The gross deal value including \$1.8 billion of assumed debt is approximately 1.5 times UNS' consolidated rate base.

We expect Fortis to issue additional debt at the holding company level to fund a portion of the equity, easing some of the equity dilution from the premium price it is paying. The deal will have to receive approval from UNS shareholders, the Arizona Corporation Commission, and the Federal Energy Regulatory Commission. We expect regulatory approvals to take until late 2014. Management said it expects the UNS deal to be accretive to earnings in the first full year after closing, likely in 2015. They expect the CH Energy deal to be accretive in 2015 as well.

### Profile

Fortis owns and operates utility transmission and distribution assets in Canada. It has smaller stakes in electricity generation, several Caribbean utilities, and Canadian hotel and commercial real estate. The firm's regulated natural gas operations serve 950,000 customers in British Columbia. Its regulated electric utility operations serve 1.1 million customers throughout Canada and in Grand Cayman and Turks and Caicos. Its Canadian operations accounted for 94% of its total assets as of 2012.

### Investment Thesis 16 Dec 2013

Fortis manages electric and gas regulated utilities in Canada, the U.S., and the Caribbean, resulting in stable operating results. Regulated operations make up 90% of the company's asset base, and noncore generation and real estate holding operations account for the remainder. While we are less excited about the distractions of these noncore operations, management continues to focus on electric and natural gas distribution in North America.

Fortis' main regulated Canadian operations are in British Columbia, Alberta, and Newfoundland. These relatively low-risk operations result in stable earnings and fund the consistent dividend growth of the past four decades. Rate-base additions should be significant through 2017, as the healthier Canadian economy drives usage and customer growth to support the firm's CAD 5.3 billion investment plans. This should allow the firm to increase its rate base at double-digit rates each year during this expansion period.

On a weighted-average basis, Fortis' allowed return on equity in its Canadian service territories is 9.25%. While this return is lower than that typically granted to comparable U.S. utilities, it seems reasonable given the low-risk nature of Fortis' transmission and delivery operations. In the U.S., CH Energy's allowed return on equity is 10%.

Fortis has long expressed interest in expanding its operations through U.S. acquisitions. In addition to its 2012 \$1.5 billion cash and debt bid for CH Energy Group, Fortis recently announced a \$4.3 billion cash and debt offer for Tucson, AZ based UNS Energy. If the UNS Energy transaction closes, 31% of Fortis' operating earnings will come from U.S. regulated utilities. Management continues to be outspoken about their desire for further U.S. transactions, which increases shareholder risk that management overpay for future acquisitions.

### Profile

Fortis owns and operates utility transmission and distribution assets in Canada and in the United States, serving more than 2.4 million electricity and gas customers. Regulated operations comprise roughly 90% of total assets. It has smaller stakes in electricity generation, several Caribbean utilities, and Canadian hotel and commercial real estate.

### Morningstar Analysis

#### Fortis Management's Zeal for Acquisitions Leads to Pricey UNS Energy Offer 16 Dec 2013

We think Fortis management's enthusiasm for regulated acquisitions led them to offer a pricey \$4.3 billion for UNS Energy, a 31% premium to UNS Energy's close price before the announcement and a lofty 18 times UNS Energy management's 2014 midpoint earnings estimate. The \$2.5 billion equity value offer implies a 2.3 price/book multiple, well above the median 1.7 price/book multiple for 60 U.S.-based regulated utilities as of November. The gross deal value includes \$1.8 billion of assumed debt and is approximately 1.5 times UNS Energy's consolidated rate base.

We view the transaction negatively for Fortis shareholders, resulting in a CAD 1 per share dilution. We estimate a 75% probability of the deal closing and assume no synergy savings. Offsetting the transaction impact is the time-value appreciation since our last update, and thus we are maintaining our CAD 31 per share fair value estimate, narrow moat and stable trend. Fortis will finance the acquisition with \$1.8 billion in convertible debentures, comprising \$1.6 billion in deal and \$200 million private placement debentures.

The transaction is in line with the price MidAmerican Energy offered in May for NV Energy, which we also viewed as rich. Fortis management recently indicated to us that they would like to make multiple acquisitions of \$5 billion or less in the U.S. during the next decade, increasing shareholder risk that management might overpay for future U.S. acquisitions.

The appeal of a strong economic recovery, above-average demand growth and constructive regulatory environment has recently lured other utilities to the Southwest. In addition to MidAmerican Energy's offer for NV Energy, TECO Energy in May offered to acquire New Mexico Gas Company. We highlight Pinnacle West Capital (PNW) as another potential target in the Southwest. Valuing PNW at 18 times

our 2014 earnings estimate implies a \$66 per share takeout price, well above our \$55 per share fair value estimate

#### Valuation, Growth and Profitability 16 Dec 2013

We are reaffirming our CAD 31 per share fair value estimate after incorporating the company's bid for UNS Energy. We view the transaction negatively, resulting in CAD 1 per share dilution. Offsetting the transaction impact is the time-value appreciation since our last update. In accounting for the UNS Energy acquisition, we adjusted for certain tax and regulatory balance sheet items and assign a 75% probability the deal closes. We expect the transaction to close in the fourth quarter of 2014.

We forecast 6% annual earnings growth through 2017 accounting for normalized weather conditions. We assume 1.5% annual energy use growth at the Canadian utilities and consistent allowed returns on equity. Based on management's guidance, we forecast total investments of CAD 6.3 billion at the utilities through 2017, leading to 6% annualized rate base growth.

We use an 8.0% cost of equity to arrive at a 6.7% weighted average cost of capital in our discounted cash flow valuation.

#### Scenario Analysis

Allowed returns at the Canadian utilities are a significant driver of our valuation estimates. If we assume a 100-basis-point decrease in allowed returns on equity in 2013 and beyond, our fair value estimate decreases to CAD 28 per share. Better-than-expected allowed returns on equity drive similar upside results.

Finally, a 50-basis-point change in our cost of equity assumption changes our fair value estimate by CAD 3 per share.

Last Price	Fair Value	Consider Buy	Consider Sell	Uncertainty	Economic Moat™	Moat Trend™	Stewardship	Morningstar Credit Rating	Industry Group
29.76 CAD	31.00 CAD	21.70 CAD	41.85 CAD	Medium	Narrow	Stable	Standard	—	Utilities - Regulated

## Economic Moat

Fortis owns a difficult-to-replicate network of regulated power generation, transmission, and distribution assets and provides essential energy sources: natural gas and electricity. In exchange for its monopoly position, regulators set Fortis' returns at levels that aim to keep customer costs low while providing adequate returns for capital providers. This implicit contract between regulators and the utility should allow Fortis to earn its cost of capital in the long run and leads us to assign Fortis' regulated utilities a narrow economic moat.

## Moat Trend

We assign Fortis a stable moat because of its monopoly position and stable regulatory environment, which should continue to allow the firm to earn its cost of capital. We do not expect the regulatory relationship to change. The regulatory framework that caps revenue and returns prevents the firm from attaining a wide moat, as with all regulated utilities we cover.

### Bulls Say/Bears Say

#### Bulls Say

- ▶ Fortis operates a stable business profile, offering a strong base for consistent earnings and dividend growth.
- ▶ With an aggressive capital expenditure plan, we forecast Fortis' rate base to grow 6% annually.
- ▶ Fortis has a consistent dividend growth history, paying consecutive quarterly dividends for four decades and increasing the dividend faster than most of its peers in recent years.

#### Bears Say

- ▶ The Canadian regulatory environment offers lower allowed returns than in the U.S.
- ▶ Management's zeal for U.S. diversification increases the risk the company overpay for acquisitions.
- ▶ Fortis operates noncore hotel and commercial real estate assets, potentially distracting management from core regulated operations.

### Financial Health & Capital Structure

Through 2017, Fortis has CAD 5.3 billion of planned capital expenditures, which will require it to access the debt and equity capital markets. Fortis has manageable debt maturities through 2017. The company issued significant equity in 2011 to help finance its capital expenditure plan, and we expect it to issue additional equity in 2013 to accommodate employee stock purchase plans, support its capital expenditure plan and pay for its proposed UNS Energy acquisition.

With a 54% debt/capital ratio and 3.5 times interest coverage, Fortis' financial health looks reasonably sound, particularly in light of its stable, low-risk business model. We expect the company to maintain a capital structure in line with regulatory targets throughout its current investment cycle.

### Enterprise Risk

Fortis' key risk to future earnings is regulatory uncertainty. The company faces regulatory risks that create uncertainties around costs and allowed returns, especially given the significant capital expenditure plan through 2017. Fortis is also exposed to political and economic instability at its Caribbean operations. With an eye toward acquisitions, the company risks overpaying for regulated U.S. assets and must be mindful of the strategic benefits. As with all regulated utilities, Fortis faces the risk of an inflationary environment that would raise borrowing costs and make other investments more attractive for income-seeking investors.

### Management 16 Dec 2013

Overall, we think Fortis' management team has been fair stewards of shareholder capital. Management has earned at or nears its allowed returns and managed regulatory relationships well, particularly in Canada. What concerns us the most, and would cause us to revisit our view of Fortis' management team, is management's enthusiasm for U.S. acquisitions leading to further pricey acquisitions, much like the bid for UNS Energy, in our view. We think shareholders would be better off if management reinvested its capital to fund growth investments or returned it to shareholders through share repurchases or a higher dividend payout ratio.

Stanley Marshall has been president and CEO since 1995, leading a group of experienced utility executives. Total direct compensation is in line with Fortis' industry group. Marshall's total compensation comprises base salary, annual incentives, stock options, and performance stock units, with 75% of total compensation at risk. We do not like that annual cash incentives are based on earnings per share targets, as EPS can be manipulated and may not be an indication of shareholder value creation. Marshall has a significant ownership stake, which we believe aligns shareholder and management interests. From a corporate governance perspective, we like that the CEO and chairman positions are separated. Additionally, we would prefer the board of directors have more direct utility experience.

### Analyst Notes

#### Fortis Management's Zeal for Acquisitions Leads to Pricey UNS Energy Offer 16 Dec 2013

We think Fortis management's enthusiasm for regulated acquisitions led them to offer a pricey \$4.3 billion for UNS Energy, a 31% premium to UNS Energy's close price before the announcement and a lofty 18 times UNS Energy management's 2014 midpoint earnings estimate. The \$2.5 billion equity value offer implies a 2.3 price/book multiple, well above the median 1.7 price/book multiple for 60 U.S.-based regulated utilities as of November. The gross deal value includes \$1.8 billion of assumed debt and is approximately 1.5 times UNS Energy's consolidated rate base.

We view the transaction negatively for Fortis shareholders, resulting in a CAD 1 per share dilution. We estimate a 75% probability of the deal closing and assume no synergy savings. Offsetting the transaction impact is the time-value appreciation since our last update, and thus we are maintaining our CAD 31 per share fair value estimate, narrow moat and stable trend. Fortis will finance the acquisition with \$1.8 billion in convertible debentures, comprising \$1.6 billion in deal and \$200 million private placement debentures.

The transaction is in line with the price MidAmerican Energy offered in May for NV Energy, which we also viewed as rich. Fortis management recently indicated to us that they would like to make multiple acquisitions of \$5 billion or less in the U.S. during the next decade, increasing shareholder risk that management might overpay for future U.S. acquisitions.

The appeal of a strong economic recovery, above-average demand growth and constructive regulatory environment has recently lured other utilities to the Southwest. In addition to MidAmerican Energy's offer for NV Energy, TECO Energy in May offered to acquire New Mexico Gas Company. We highlight Pinnacle West Capital (PNW) as another

potential target in the Southwest. Valuing PNW at 18 times our 2014 earnings estimate implies a \$66 per share takeout price, well above our \$55 per share fair value estimate

#### Fortis Makes Pricey Offer for UNS Energy 11 Dec 2013

Fortis management made good on its outspoken desire to add to its U.S. utilities holdings with a \$4.3 billion offer to acquire UNS Energy, a predominantly regulated electric and gas utility in Arizona. Management has told us repeatedly in recent meetings it would like to make multiple acquisitions of \$5 billion or less in the U.S. during the next decade. The UNS deal comes less than six months after Fortis closed its \$1.5 billion acquisition of Central Hudson Energy, its first U.S. acquisition.

We are reaffirming our CAD 31 per share fair value estimate, narrow economic moat, and stable moat trend ratings, although we think the price it is paying for UNS is rich relative to where its U.S. regulated utilities peers are trading. Fortis is offering \$60.25 per share, a 31% premium to UNS Energy's closing price on Dec. 11. The \$2.5 billion equity value offer implies a 2.3 price-to-book multiple, well above the median 1.7 price-to-book multiple for 60 U.S.-based regulated utilities as of November. The gross deal value including \$1.8 billion of assumed debt is approximately 1.5 times UNS' consolidated rate base.

We expect Fortis to issue additional debt at the holding company level to fund a portion of the equity, easing some of the equity dilution from the premium price it is paying. The deal will have to receive approval from UNS shareholders, the Arizona Corporation Commission, and the Federal Energy Regulatory Commission. We expect regulatory approvals to take until late 2014. Management said it expects the UNS deal to be accretive to earnings in the first full year after closing, likely in 2015. They expect the CH Energy deal to be accretive in 2015 as well.

## Analyst Notes

### Management Meeting: Acquisitive Fortis Management Seeks Further U.S. Expansion 14 Nov 2013

Fortis' appetite for further expansion in the U.S. was evident during our executive management meeting at the 48th Edison Electric Institute Financial Conference in Orlando, Fla. We are reaffirming our CAD 31 per share fair value estimate, narrow moat and stable moat trend ratings.

Management indicated that the integration of the \$1.5 billion acquisition of Central Hudson Energy was complete. A prolonged regulatory approval process, which ultimately led to \$3 million in annual concessions, hasn't deterred management from seeking additional U.S. opportunities. Fortis sees multiple transactions in the U.S. during the next 10 years, indicating a desire for transactions \$5 billion and under. Management prefers regulated transmission and distribution assets but would consider combining with generation assets given the right asset mix. Fortis would not consider merchant assets. Since 2004, Fortis has acquired four regulated Canadian and U.S. utilities (Fortis Alberta, Fortis BCElectric, FortisBC Gas, Central Hudson Energy) for a combined \$6.7 billion. We caution management's enthusiasm for acquisitions as we currently view regulated utilities 6% overvalued, not accounting for a likely 20%-30% takeover premium.

At its regulated Canadian operations, management expects to invest \$1.0 billion-\$1.2 billion annually, with the largest allocation to Fortis Alberta, the company's fastest-growing utility. Build-out of Alberta's oil sand production should support 7%-8% near-term growth and \$400 million of annual capital spend. Fortis Alberta, the company's largest utility, will account for \$250 million in annual investment. Fortis has managed its Wanetta hydro expansion well, with construction on time and on budget for the \$900-million, 335 MW facility.

### Fortis' Earnings Reflect Lower Allowed Returns and Higher Capital Additions 01 Nov 2013

Fortis reported third-quarter earnings per share of \$0.23, compared with \$0.24 in the year-ago period. Year-to-date EPS were \$1.27, compared to \$1.20 in the same period. The company will pay a CAD 1.24 per share dividend in 2013, a 3.3% increase from 2012. We are reaffirming our CAD 31 per share fair value estimate, 2013 EPS estimate, narrow moat, and stable moat trend.

Fortis recently completed its \$1.5 billion CH Energy Group acquisition. Management expects the transaction to be accretive to EPS in 2015. CH Energy Group contributed \$12 million in the quarter, which was offset by the common share offering and financing costs related to the transaction. We suspect management continues to look for additional regulated opportunities in the U.S.

Fortis' Canadian Regulated Gas Utilities notched a \$14 million loss compared to a \$6 million loss in the year-ago quarter, in a period of low demand from warmer temperatures. Higher operating expenses and lower allowed rates of return attributed to the larger loss. Earnings from capital projects partially offset segment weakness. The company's Canadian Regulated Electric Utilities also showed weakness, earning \$51 million in the third quarter compared to \$55 million in the year-ago quarter. In general, across the segment earnings from completion of infrastructure projects were offset from lower allowed rates of return. Management continues to work towards completing \$1.2 billion in capital projects in 2013, part of a larger \$6 billion program, which will drive future earnings and dividend growth.

### Analyst Notes

#### Fortis Reports Second-Quarter Earnings, Closes CH Energy Acquisition 01 Aug 2013

Fortis reported second-quarter earnings per share of \$0.28, compared with \$0.33 in the year-ago period. Earnings were negatively affected by \$32 million in acquisition-related expenses, or \$0.17 per share, partially offset by a \$25 million, or \$0.13 per share, income tax recovery. Excluding the effects of both the acquisition and tax items, earnings were \$0.32 compared with \$0.36 per share. The company will pay a CAD 1.24 per share dividend in 2013, a 3.3% increase from 2012. We are reaffirming our CAD 31 fair value estimate, 2013 EPS estimate, narrow moat, and stable moat trend.

In late June, Fortis closed its \$1.5 billion CH Energy Group acquisition after receiving regulatory approval from the New York State Public Service Commission. Management expects the transaction to be EPS accretive beginning in 2015. Infrastructure investments aided the company's Canadian regulated gas utilities, offset by lower volumes, fewer customer additions and an unfavorable regulatory decision. Fortis' regulated Canadian electric utilities earnings grew 23%, aided by income tax recoveries and customer growth.

# Research Methodology for Valuing Companies

## Components of Our Methodology

- ▶ Economic Moat™ Rating
- ▶ Moat Trend™ Rating
- ▶ Moat Valuation
- ▶ Three-Stage Discounted Cash Flow
- ▶ Weighted Average Cost of Capital
- ▶ Fair Value Estimate
- ▶ Scenario Analysis
- ▶ Uncertainty Ratings
- ▶ Margin of Safety
- ▶ Consider Buying/Selling
- ▶ Stewardship Rating

The Morningstar Rating for stocks identifies companies trading at a discount or premium to our analysts' assessment of their fair value. A number of components drive this rating: (1) our assessment of the firm's economic moat, (2) our estimate of the stock's intrinsic value based on a discounted cash-flow model, (3) the margin of safety bands we apply to our Fair Value Estimate, and (4) the current stock price relative to our fair value estimate.

The concept of the Morningstar Economic Moat™ Rating plays a vital role not only in our qualitative assessment of a firm's investment potential, but also in our valuation process. We assign three moat ratings—none, narrow, or wide—as well as the Morningstar Moat Trend™ Rating—positive, stable, or negative—to each company we cover. There are two major requirements for firms to earn either a narrow or wide moat rating: (1) the prospect of earning above-average returns on capital; and (2) some competitive edge that prevents these returns from quickly eroding. The assumptions we make about a firm's moat determine the length of "economic outperformance" that we assume in the latter stages

of our valuation model. We also quantify the value of each firm's moat, which represents the difference between a firm's enterprise value and the value of the firm if no future net investment were to occur. Said differently, moat value identifies the value generated by the firm as a result of any future net new investment. Our Moat Trend Rating reflects our assessment of whether each firm's competitive advantage is either getting stronger or weaker, since we think of moats as dynamic, rather than static.

At the heart of our valuation system is a detailed projection of a company's future cash flows. The first stage of our three-stage discounted cash flow model can last from 5 to 10 years and contains numerous detailed assumptions about various financial and operating items. The second stage of our model—where a firm's return on new invested capital (RONIC) and earnings growth rate implicitly fade until the perpetuity year—can last anywhere from 0 years (for no-moat firms) to 20 years (for wide-moat companies). In our third stage, we assume the firm's RONIC equals its weighted average cost of capital, and we calculate a continuing value using a standard

perpetuity formula. In deciding on the rate at which to discount future cash flows, we ignore stock-price volatility. Instead, we rely on a system that measures the estimated volatility of a firm's underlying future free cash flows, taking into account fundamental factors such as the diversity of revenue sources and the firm's fixed cost structure.

We also employ a number of other tools to augment our valuation process, including scenario analysis, where we assess the likelihood and performance of a business under different economic and firm-specific conditions. Our analysts typically model three to five scenarios for each company we cover, stress-testing the model and examining the distribution of resulting fair values.

The Morningstar Uncertainty Rating captures the range of these potential fair values, based on an assessment of a company's future sales range, the firm's operating and financial leverage, and any other contingent events that may impact the business. Our analysts use this range to assign an appropriate margin of safety—or the discount/premium

to a fair value we apply in setting our consider buying/consider selling prices. Firms trading below our consider-buying prices receive our highest rating of five stars, whereas firms trading above our consider-selling prices receive our lowest rating of one star.

Our corporate Stewardship Rating represents our assessment of management's stewardship of shareholder capital, with particular emphasis on capital allocation decisions. Analysts consider companies' investment strategy and valuation, financial leverage, dividend and share buyback policies, execution, compensation, related party transactions, and accounting practices. Corporate governance practices are only considered if they've had a demonstrated impact on shareholder value. Analysts assign one of three ratings: "Exemplary," "Standard," and "Poor." Analysts judge stewardship from an equity holder's perspective. Ratings are determined on an absolute basis. Most companies will receive a Standard rating, and this is the default rating in the absence of evidence that managers have made exceptionally strong or poor capital allocation decisions.

## Morningstar Margin of Safety and Star Rating Bands

\* Occasionally a stock's uncertainty will be too high for us to estimate, in which case we label it Extreme.

# Morningstar's Approach to Rating Corporate Credit

- Offers a proprietary measure of the credit quality of companies on our coverage list.
- Encapsulates our in-depth modeling and quantitative work in one letter grade.
- Allows investors to rank companies by each of the four underlying components of our credit ratings, including both analyst-driven and quantitative measures.
- Provides access to all the underlying forecasts that go into the rating, available through our institutional service.

## Purpose

The Morningstar Corporate Credit Rating measures the ability of a firm to satisfy its debt and debt-like obligations. The higher the rating, the less likely we think the company is to default on these obligations.

The Morningstar Corporate Credit Rating builds on the modeling expertise of our securities research team. For each company, we publish:

- Five years of detailed pro-forma financial statements
- Annual estimates of free cash flow
- Annual forecasts of return on invested capital
- Scenario analyses, including upside and downside cases
- Forecasts of leverage, coverage, and liquidity ratios for five years
- Estimates of off balance sheet liabilities

These forecasts are key inputs into the Morningstar Corporate Credit Rating and are available to subscribers at [select.morningstar.com](http://select.morningstar.com).

## Methodology

We feel it's important to perform credit analysis through different lenses—qualitative and quantitative, as well as fundamental and market-driven. We therefore evaluate each company in four broad categories.

### Business Risk

Business Risk captures the fundamental uncertainty around a firm's business operations and the cash flow generated by those operations. Key components of the Business Risk rating include the Morningstar Economic Moat™ Rating and the Morningstar Uncertainty Rating.

### Cash Flow Cushion™

Morningstar's proprietary Cash Flow Cushion™ ratio is a fundamental indicator of a firm's future financial health. The measure reveals how many times a company's internal cash generation plus total excess liquid cash will cover its debt-like contractual commitments over the next five years. The Cash Flow Cushion acts as a predictor of financial distress, bringing to light potential refinancing, operational, and liquidity risks inherent to the firm.

## Morningstar Research Methodology for Determining Corporate Credit Ratings

## Morningstar's Approach to Rating Corporate Credit

The advantage of the Cash Flow Cushion ratio relative to other fundamental indicators of credit health is that the measure focuses on the future cash-generating performance of the firm derived from Morningstar's proprietary discounted cash flow model. By making standardized adjustments for certain expenses to reflect their debt-like characteristics, we can compare future projected free cash flows with debt-like cash commitments coming due in any particular year. The forward-looking nature of this metric allows us to anticipate changes in a firm's financial health and pinpoint periods where cash shortfalls are likely to occur.

### *Morningstar Solvency Score™*

The Morningstar Solvency Score™ is a quantitative score derived from both historical and forecasted financial ratios. It includes ratios that focus on liquidity (a company's ability to meet short term cash outflows), profitability (a company's ability to generate profit per unit of input), capital structure (how does the company finance its operations), and interest coverage (how much of profit is used up by interest payments).

### *Distance to Default*

Morningstar's quantitative Distance to Default measure ranks companies on the likelihood that they will tumble into financial distress. The measure is a linear model of the percentile of a firm's leverage (ratio of Enterprise Value to Market Value), the percentile of a firm's equity volatility relative to the rest of the universe and the interaction of these two percentiles. This is a proxy methodology for the common definition of Distance to Default which relies on option-based pricing models. The proxy has the benefit of increased breadth of coverage, greater simplicity of calculation, and more predictive power.

For each of these four categories, we assign a score, which we then translate into a descriptive rating along the scale of Very Good / Good / Fair / Poor / Very Poor.

### **Overall Credit Rating**

The four component ratings roll up into a single preliminary credit rating. To determine the final credit rating, a credit committee of at least five senior research personnel reviews each preliminary rating.

We review credit ratings on a regular basis and as events warrant. Any change in rating must be approved by the Credit Rating Committee.

### **Investor Access**

Morningstar Corporate Credit Ratings are available on Morningstar.com. Our credit research, including detailed cash-flow models that contain all of the components of the Morningstar Corporate Credit Rating, is available to subscribers at [select.morningstar.com](http://select.morningstar.com).

## Fortis Management's Zeal for Acquisitions Leads to Pricey UNS Energy Offer

### Analyst Note 16 Dec 2013

We think Fortis management's enthusiasm for regulated acquisitions led them to offer a pricey \$4.3 billion for UNS Energy, a 31% premium to UNS Energy's close price before the announcement and a lofty 18 times UNS Energy management's 2014 midpoint earnings estimate. The \$2.5 billion equity value offer implies a 2.3 price/book multiple, well above the median 1.7 price/book multiple for 60 U.S.-based regulated utilities as of November. The gross deal value includes \$1.8 billion of assumed debt and is approximately 1.5 times UNS Energy's consolidated rate base.

We view the transaction negatively for Fortis shareholders, resulting in a CAD 1 per share dilution. We estimate a 75% probability of the deal closing and assume no synergy savings. Offsetting the transaction impact is the time-value appreciation since our last update, and thus we are maintaining our CAD 31 per share fair value estimate, narrow moat and stable trend. Fortis will finance the acquisition with \$1.8 billion in convertible debentures, comprising \$1.6 billion in deal and \$200 million private placement debentures.

The transaction is in line with the price MidAmerican Energy offered in May for NV Energy, which we also viewed as rich. Fortis management recently indicated to us that they would like to make multiple acquisitions of \$5 billion or less in the U.S. during the next decade, increasing shareholder risk that management might overpay for future U.S. acquisitions.

The appeal of a strong economic recovery, above-average demand growth and constructive regulatory environment has recently lured other utilities to the Southwest. In addition to MidAmerican Energy's offer for NV Energy, TECO Energy in May offered to acquire New Mexico Gas Company. We highlight Pinnacle West Capital (PNW) as another

### Profile

Fortis owns and operates utility transmission and distribution assets in Canada. It has smaller stakes in electricity generation, several Caribbean utilities, and Canadian hotel and commercial real estate. The firm's regulated natural gas operations serve 950,000 customers in British Columbia. Its regulated electric utility operations serve 1.1 million customers throughout Canada and in Grand Cayman and Turks and Caicos. Its Canadian operations accounted for 94% of its total assets as of 2012.

### Contents

Analyst Note	1
Morningstar Analyst Forecasts	2

### Analyst Note 06 Feb 2014

Fortis reported CAD 1.74 of earnings per share for the full year 2013 compared to CAD 1.66 in 2012. The company will pay a CAD 1.28 per share dividend in 2014, a 3.2% increase from 2013. We are reaffirming our CAD 31 per share fair value estimate, 2014 EPS estimate, narrow moat, and stable moat trend.

In December, Fortis management announced a pricey \$4.3 billion acquisition of UNS Energy. In January, Fortis and UNS Energy filed for regulatory approval with the Arizona Corporation Commission, or ACC. Management expects the deal to close by year-end, with regulatory approvals from the ACC and FERC required before closing. When the acquisition closes, one third of Fortis' assets will be located in the U.S., including the company's CH Energy Group acquisition that closed last June. Management has suggested it will continue to look for additional opportunities to acquire regulated utilities in the U.S.

Fortis' Canadian Regulated Utilities reported roughly flat earnings from 2012. Higher operating expenses and lower allowed rates of return were offset by earnings from \$1.2 billion in capital additions. The company plans to invest \$6.5 billion in 2014-18, not including UNS Energy's planned \$1.4 billion spend from 2015-18. Capital projects should continue to drive future earnings and dividend growth.

### Investment Thesis 03 Apr 2014

Fortis manages electric and gas regulated utilities in Canada, the United States, and the Caribbean, resulting in stable operating results. Regulated operations make up 90% of the company's asset base; noncore generation and real estate holding operations account for the remainder. While we are less excited about the distractions of these noncore operations, management continues to focus on electric and natural gas distribution in North America.

Fortis' main regulated Canadian operations are in British Columbia, Alberta, and Newfoundland. These relatively low-risk operations result in stable earnings and fund the consistent dividend growth of the past four decades. Rate base additions should be significant through 2017, as the healthier Canadian economy drives usage and customer growth to support the firm's CAD 5.3 billion investment plans. This should allow the firm to increase its rate base at double-digit rates each year during this expansion period.

On a weighted average basis, Fortis' allowed return on equity in its Canadian service territories is 9.25%. While this return is lower than that typically granted to comparable U.S. utilities, it seems reasonable, given the low-risk nature of Fortis' transmission and delivery operations. In the U.S., CH Energy's allowed return on equity is 10%.

Fortis' management has long expressed interest in expanding its operations through U.S. acquisitions. In addition to its 2012 \$1.5 billion cash and debt bid for CH Energy, Fortis recently announced a \$4.3 billion cash and debt offer for Tucson, Ariz.-based UNS Energy. If the UNS Energy transaction closes, 31% of Fortis' operating earnings will come from U.S. regulated utilities. Management continues to be outspoken about its desire for further U.S. transactions, which increases shareholder risk that management could overpay for future acquisitions.

## Morningstar Analysis

### Valuation, Growth and Profitability 03 Apr 2014

We are increasing our fair value estimate to CAD 33 per share from CAD 31 after incorporating year-end 2013 results that were in line with our expectations. About half of our fair value increase relates to minor adjustments to our five-year outlook, including minor changes in our operating expense outlook and regulated rate adjustments. The remaining increase is due to time value appreciation since our last update.

In accounting for the UNS Energy acquisition, we adjusted for certain tax and regulatory balance sheet items and assign a 75% probability the deal closes. We expect the transaction to close in the fourth quarter.

We forecast 6% annual earnings growth through 2018 accounting for normalized weather conditions. We assume 1.5% annual energy use growth at the Canadian utilities and consistent allowed returns on equity. We forecast 1.0% annual energy growth at the U.S. utilities. Based on management's guidance, we forecast total investments of CAD 6.5 billion at the utilities through 2018, leading to 6% annualized rate base growth.

We use an 8.0% cost of equity to arrive at a 6.7% weighted average cost of capital in our discounted cash flow valuation.

### Scenario Analysis

If we assume a 100-basis-point decrease in allowed returns on equity at the Canadian utilities in 2013 and beyond, our fair value estimate would drop CAD 2 per share. Better-than-expected allowed returns on equity drive similar upside results.

Finally, a 50-basis-point change in our cost of equity assumption changes our fair value estimate by CAD 3 per share.

### Economic Moat

Fortis owns a difficult-to-replicate network of regulated power generation, transmission, and distribution assets and provides essential energy sources: natural gas and electricity. In exchange for its monopoly position, regulators set Fortis' returns at levels that aim to keep customer costs low while providing adequate returns for capital providers. This implicit contract between regulators and the utility should allow Fortis to earn its cost of capital in the long run and leads us to assign Fortis' regulated utilities a narrow economic moat.

### Moat Trend

We assign Fortis a stable moat because of its monopoly position and stable regulatory environment, which should continue to allow the firm to earn its cost of capital. We do not expect the regulatory relationship to change. The regulatory framework that caps revenue and returns prevents the firm from attaining a wide moat, as with all regulated utilities we cover.

## Bulls Say/Bears Say

### Bulls Say

- ▶ Fortis operates a stable business profile, offering a strong base for consistent earnings and dividend growth.
- ▶ With an aggressive capital expenditure plan, we forecast Fortis' rate base to grow 6% annually.
- ▶ Fortis has a consistent dividend growth history, paying consecutive quarterly dividends for four decades and increasing the dividend faster than most of its peers in recent years.

### Bears Say

- ▶ The Canadian regulatory environment offers lower allowed returns than in the U.S.
- ▶ Management's zeal for U.S. diversification increases the risk that the company will overpay for acquisitions.
- ▶ Fortis operates noncore hotel and commercial real estate assets, potentially distracting management from the core regulated operations.

### Financial Health & Capital Structure

Through 2018, Fortis has CAD 6.5 billion of planned capital expenditures, which will require it to access the debt and equity capital markets. It has manageable debt maturities through 2018. The company issued significant equity in 2013 to help finance its capital expenditure plan, and we expect it to issue additional equity in 2014 to accommodate employee stock-purchase plans, support its capital expenditure plan, and pay for its proposed UNS Energy acquisition.

With a 56% debt/capital ratio and 3.5 times interest coverage, Fortis' financial health looks reasonably sound, particularly in light of its stable, low-risk business model. We expect the company to maintain a capital structure in line with regulatory targets throughout its current investment cycle.

### Enterprise Risk

Fortis' key risk to future earnings is regulatory uncertainty. The company faces regulatory risks that create uncertainties around costs and allowed returns, especially given the significant capital expenditure plan through 2018. Fortis is also exposed to political and economic instability at its Caribbean operations. With an eye toward acquisitions, the company risks overpaying for regulated U.S. assets and must be mindful of the strategic benefits. As with all regulated utilities, Fortis faces the risk of an inflationary environment that would raise borrowing costs and make other investments more attractive for income-seeking investors.

### Management

03 Apr 2014

Overall, we think Fortis' management team has been fair stewards of shareholder capital. Management has earned at or nears its allowed returns and managed regulatory relationships well, particularly in Canada. What concerns us the most, and would cause us to revisit our view of the management team, is management's enthusiasm for U.S. acquisitions leading to further pricey acquisitions, much like the bid for UNS Energy, in our view. We think shareholders would be better off if management reinvested its capital to fund growth investments or returned it to shareholders through share repurchases or a higher dividend payout ratio.

Stanley Marshall has been president and CEO since 1995, leading a group of experienced utility executives. Total direct compensation is in line with Fortis' industry group. Marshall's total compensation comprises base salary, annual incentives, stock options, and performance stock units, with 75% of total compensation at risk. We do not like that annual cash incentives are based on earnings per share targets, as EPS can be manipulated and may not be an indication of shareholder value creation. Marshall has a significant ownership stake, which we believe aligns shareholder and management interests. From a corporate governance perspective, we like that the CEO and chairman positions are separated. Additionally, we would prefer the board of directors have more direct utility experience.

### Analyst Notes

#### Fortis Reports Full-Year Earnings, Increases Dividend 06 Feb 2014

Fortis reported CAD 1.74 of earnings per share for the full year 2013 compared to CAD 1.66 in 2012. The company will pay a CAD 1.28 per share dividend in 2014, a 3.2% increase from 2013. We are reaffirming our CAD 31 per share fair value estimate, 2014 EPS estimate, narrow moat, and stable moat trend.

In December, Fortis management announced a pricey \$4.3 billion acquisition of UNS Energy. In January, Fortis and UNS Energy filed for regulatory approval with the Arizona Corporation Commission, or ACC. Management expects the deal to close by year-end, with regulatory approvals from the ACC and FERC required before closing. When the acquisition closes, one third of Fortis' assets will be located in the U.S., including the company's CH Energy Group acquisition that closed last June. Management has suggested it will continue to look for additional opportunities to acquire regulated utilities in the U.S.

Fortis' Canadian Regulated Utilities reported roughly flat earnings from 2012. Higher operating expenses and lower allowed rates of return were offset by earnings from \$1.2 billion in capital additions. The company plans to invest \$6.5 billion in 2014-18, not including UNS Energy's planned \$1.4 billion spend from 2015-18. Capital projects should continue to drive future earnings and dividend growth.

#### Fortis Management's Zeal for Acquisitions Leads to Pricey UNS Energy Offer 16 Dec 2013

We think Fortis management's enthusiasm for regulated acquisitions led them to offer a pricey \$4.3 billion for UNS Energy, a 31% premium to UNS Energy's close price before the announcement and a lofty 18 times UNS Energy management's 2014 midpoint earnings estimate. The \$2.5 billion equity value offer implies a 2.3 price/book multiple,

well above the median 1.7 price/book multiple for 60 U.S.-based regulated utilities as of November. The gross deal value includes \$1.8 billion of assumed debt and is approximately 1.5 times UNS Energy's consolidated rate base.

We view the transaction negatively for Fortis shareholders, resulting in a CAD 1 per share dilution. We estimate a 75% probability of the deal closing and assume no synergy savings. Offsetting the transaction impact is the time-value appreciation since our last update, and thus we are maintaining our CAD 31 per share fair value estimate, narrow moat and stable trend. Fortis will finance the acquisition with \$1.8 billion in convertible debentures, comprising \$1.6 billion in deal and \$200 million private placement debentures.

The transaction is in line with the price MidAmerican Energy offered in May for NV Energy, which we also viewed as rich. Fortis management recently indicated to us that they would like to make multiple acquisitions of \$5 billion or less in the U.S. during the next decade, increasing shareholder risk that management might overpay for future U.S. acquisitions.

The appeal of a strong economic recovery, above-average demand growth and constructive regulatory environment has recently lured other utilities to the Southwest. In addition to MidAmerican Energy's offer for NV Energy, TECO Energy in May offered to acquire New Mexico Gas Company. We highlight Pinnacle West Capital (PNW) as another potential target in the Southwest. Valuing PNW at 18 times our 2014 earnings estimate implies a \$66 per share takeout price, well above our \$55 per share fair value estimate

#### Fortis Makes Pricey Offer for UNS Energy 11 Dec 2013

Fortis management made good on its outspoken desire to add to its U.S. utilities holdings with a \$4.3 billion offer to

## Fortis, Inc. FTS (TSE) ★★★

Last Price	Fair Value	Consider Buy	Consider Sell	Uncertainty	Economic Moat™	Moat Trend™	Stewardship	Morningstar Credit Rating	Industry Group

### Analyst Notes

acquire UNS Energy, a predominantly regulated electric and gas utility in Arizona. Management has told us repeatedly in recent meetings it would like to make multiple acquisitions of \$5 billion or less in the U.S. during the next decade. The UNS deal comes less than six months after Fortis closed its \$1.5 billion acquisition of Central Hudson Energy, its first U.S. acquisition.

We are reaffirming our CAD 31 per share fair value estimate, narrow economic moat, and stable moat trend ratings, although we think the price it is paying for UNS is rich relative to where its U.S. regulated utilities peers are trading. Fortis is offering \$60.25 per share, a 31% premium to UNS Energy's closing price on Dec. 11. The \$2.5 billion equity value offer implies a 2.3 price-to-book multiple, well above the median 1.7 price-to-book multiple for 60 U.S.-based regulated utilities as of November. The gross deal value including \$1.8 billion of assumed debt is approximately 1.5 times UNS' consolidated rate base.

We expect Fortis to issue additional debt at the holding company level to fund a portion of the equity, easing some of the equity dilution from the premium price it is paying. The deal will have to receive approval from UNS shareholders, the Arizona Corporation Commission, and the Federal Energy Regulatory Commission. We expect regulatory approvals to take until late 2014. Management said it expects the UNS deal to be accretive to earnings in the first full year after closing, likely in 2015. They expect the CH Energy deal to be accretive in 2015 as well.

#### Management Meeting: Acquisitive Fortis Management Seeks Further U.S. Expansion 14 Nov 2013

Fortis' appetite for further expansion in the U.S. was evident during our executive management meeting at the 48th Edison Electric Institute Financial Conference in Orlando, Fla. We are reaffirming our CAD 31 per share fair value

estimate, narrow moat and stable moat trend ratings.

Management indicated that the integration of the \$1.5 billion acquisition of Central Hudson Energy was complete. A prolonged regulatory approval process, which ultimately led to \$3 million in annual concessions, hasn't deterred management from seeking additional U.S. opportunities. Fortis sees multiple transactions in the U.S. during the next 10 years, indicating a desire for transactions \$5 billion and under. Management prefers regulated transmission and distribution assets but would consider combining with generation assets given the right asset mix. Fortis would not consider merchant assets. Since 2004, Fortis has acquired four regulated Canadian and U.S. utilities (Fortis Alberta, Fortis BCElectric, FortisBC Gas, Central Hudson Energy) for a combined \$6.7 billion. We caution management's enthusiasm for acquisitions as we currently view regulated utilities 6% overvalued, not accounting for a likely 20%-30% takeover premium.

At its regulated Canadian operations, management expects to invest \$1.0 billion-\$1.2 billion annually, with the largest allocation to Fortis Alberta, the company's fastest-growing utility. Build-out of Alberta's oil sand production should support 7%-8% near-term growth and \$400 million of annual capital spend. Fortis Alberta, the company's largest utility, will account for \$250 million in annual investment. Fortis has managed its Wanetta hydro expansion well, with construction on time and on budget for the \$900-million, 335 MW facility.

#### Fortis' Earnings Reflect Lower Allowed Returns and Higher Capital Additions 01 Nov 2013

Fortis reported third-quarter earnings per share of \$0.23, compared with \$0.24 in the year-ago period. Year-to-date EPS were \$1.27, compared to \$1.20 in the same period. The company will pay a CAD 1.24 per share dividend in 2013, a

### Analyst Notes

3.3% increase from 2012. We are reaffirming our CAD 31 per share fair value estimate, 2013 EPS estimate, narrow moat, and stable moat trend.

Fortis recently completed its \$1.5 billion CH Energy Group acquisition. Management expects the transaction to be accretive to EPS in 2015. CH Energy Group contributed \$12 million in the quarter, which was offset by the common share offering and financing costs related to the transaction. We suspect management continues to look for additional regulated opportunities in the U.S.

Fortis' Canadian Regulated Gas Utilities notched a \$14 million loss compared to a \$6 million loss in the year-ago quarter, in a period of low demand from warmer temperatures. Higher operating expenses and lower allowed rates of return attributed to the larger loss. Earnings from capital projects partially offset segment weakness. The company's Canadian Regulated Electric Utilities also showed weakness, earning \$51 million in the third quarter compared to \$55 million in the year-ago quarter. In general, across the segment earnings from completion of infrastructure projects were offset from lower allowed rates of return. Management continues to work towards completing \$1.2 billion in capital projects in 2013, part of a larger \$6 billion program, which will drive future earnings and dividend growth.

# Research Methodology for Valuing Companies

## Components of Our Methodology

- ▶ Economic Moat™ Rating
- ▶ Moat Trend™ Rating
- ▶ Moat Valuation
- ▶ Three-Stage Discounted Cash Flow
- ▶ Weighted Average Cost of Capital
- ▶ Fair Value Estimate
- ▶ Scenario Analysis
- ▶ Uncertainty Ratings
- ▶ Margin of Safety
- ▶ Consider Buying/Selling
- ▶ Stewardship Rating

The Morningstar Rating for stocks identifies companies trading at a discount or premium to our analysts' assessment of their fair value. A number of components drive this rating: (1) our assessment of the firm's economic moat, (2) our estimate of the stock's intrinsic value based on a discounted cash-flow model, (3) the margin of safety bands we apply to our Fair Value Estimate, and (4) the current stock price relative to our fair value estimate.

The concept of the Morningstar Economic Moat™ Rating plays a vital role not only in our qualitative assessment of a firm's investment potential, but also in our valuation process. We assign three moat ratings—none, narrow, or wide—as well as the Morningstar Moat Trend™ Rating—positive, stable, or negative—to each company we cover. There are two major requirements for firms to earn either a narrow or wide moat rating: (1) the prospect of earning above-average returns on capital; and (2) some competitive edge that prevents these returns from quickly eroding. The assumptions we make about a firm's moat determine the length of “economic outperformance” that we assume in the latter stages

of our valuation model. We also quantify the value of each firm's moat, which represents the difference between a firm's enterprise value and the value of the firm if no future net investment were to occur. Said differently, moat value identifies the value generated by the firm as a result of any future net new investment. Our Moat Trend Rating reflects our assessment of whether each firm's competitive advantage is either getting stronger or weaker, since we think of moats as dynamic, rather than static.

At the heart of our valuation system is a detailed projection of a company's future cash flows. The first stage of our three-stage discounted cash flow model can last from 5 to 10 years and contains numerous detailed assumptions about various financial and operating items. The second stage of our model—where a firm's return on new invested capital (RONIC) and earnings growth rate implicitly fade until the perpetuity year—can last anywhere from 0 years (for no-moat firms) to 20 years (for wide-moat companies). In our third stage, we assume the firm's RONIC equals its weighted average cost of capital, and we calculate a continuing value using a standard

\* Please contact a sales representative for more information.

perpetuity formula. In deciding on the rate at which to discount future cash flows, we ignore stock-price volatility. Instead, we rely on a system that measures the estimated volatility of a firm's underlying future free cash flows, taking into account fundamental factors such as the diversity of revenue sources and the firm's fixed cost structure.

We also employ a number of other tools to augment our valuation process, including scenario analysis, where we assess the likelihood and performance of a business under different economic and firm-specific conditions. Our analysts typically model three to five scenarios for each company we cover, stress-testing the model and examining the distribution of resulting fair values.

The Morningstar Uncertainty Rating captures the range of these potential fair values, based on an assessment of a company's future sales range, the firm's operating and financial leverage, and any other contingent events that may impact the business. Our analysts use this range to assign an appropriate margin of safety—or the discount/premium

to a fair value we apply in setting our consider buying/consider selling prices. Firms trading below our consider-buying prices receive our highest rating of five stars, whereas firms trading above our consider-selling prices receive our lowest rating of one star.

Our corporate Stewardship Rating represents our assessment of management's stewardship of shareholder capital, with particular emphasis on capital allocation decisions. Analysts consider companies' investment strategy and valuation, financial leverage, dividend and share buyback policies, execution, compensation, related party transactions, and accounting practices. Corporate governance practices are only considered if they've had a demonstrated impact on shareholder value. Analysts assign one of three ratings: "Exemplary," "Standard," and "Poor." Analysts judge stewardship from an equity holder's perspective. Ratings are determined on an absolute basis. Most companies will receive a Standard rating, and this is the default rating in the absence of evidence that managers have made exceptionally strong or poor capital allocation decisions.

## Morningstar Margin of Safety and Star Rating Bands

\* Occasionally a stock's uncertainty will be too high for us to estimate, in which case we label it Extreme.

## Morningstar's Approach to Rating Corporate Credit

- Offers a proprietary measure of the credit quality of companies on our coverage list.
- Encapsulates our in-depth modeling and quantitative work in one letter grade.
- Allows investors to rank companies by each of the four underlying components of our credit ratings, including both analyst-driven and quantitative measures.
- Provides access to all the underlying forecasts that go into the rating, available through our institutional service.

### Purpose

The Morningstar Corporate Credit Rating measures the ability of a firm to satisfy its debt and debt-like obligations. The higher the rating, the less likely we think the company is to default on these obligations.

The Morningstar Corporate Credit Rating builds on the modeling expertise of our securities research team. For each company, we publish:

- Five years of detailed pro-forma financial statements
- Annual estimates of free cash flow
- Annual forecasts of return on invested capital
- Scenario analyses, including upside and downside cases
- Forecasts of leverage, coverage, and liquidity ratios for five years
- Estimates of off balance sheet liabilities

These forecasts are key inputs into the Morningstar Corporate Credit Rating and are available to subscribers at [select.morningstar.com](http://select.morningstar.com).

### Methodology

We feel it's important to perform credit analysis through different lenses—qualitative and quantitative, as well as fundamental and market-driven. We therefore evaluate each company in four broad categories.

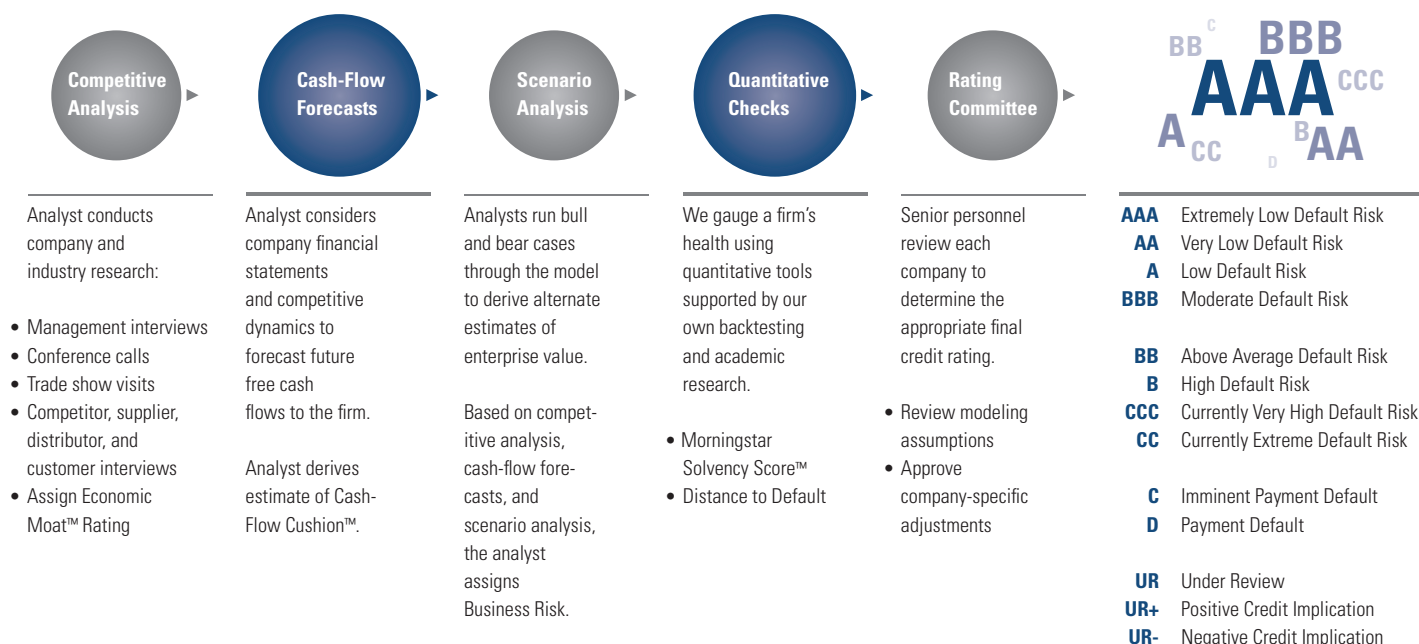

#### Business Risk

Business Risk captures the fundamental uncertainty around a firm's business operations and the cash flow generated by those operations. Key components of the Business Risk rating include the Morningstar Economic Moat™ Rating and the Morningstar Uncertainty Rating.

#### Cash Flow Cushion™

Morningstar's proprietary Cash Flow Cushion™ ratio is a fundamental indicator of a firm's future financial health. The measure reveals how many times a company's internal cash generation plus total excess liquid cash will cover its debt-like contractual commitments over the next five years. The Cash Flow Cushion acts as a predictor of financial distress, bringing to light potential refinancing, operational, and liquidity risks inherent to the firm.

## Morningstar Research Methodology for Determining Corporate Credit Ratings

## Morningstar's Approach to Rating Corporate Credit

The advantage of the Cash Flow Cushion ratio relative to other fundamental indicators of credit health is that the measure focuses on the future cash-generating performance of the firm derived from Morningstar's proprietary discounted cash flow model. By making standardized adjustments for certain expenses to reflect their debt-like characteristics, we can compare future projected free cash flows with debt-like cash commitments coming due in any particular year. The forward-looking nature of this metric allows us to anticipate changes in a firm's financial health and pinpoint periods where cash shortfalls are likely to occur.

### *Morningstar Solvency Score™*

The Morningstar Solvency Score™ is a quantitative score derived from both historical and forecasted financial ratios. It includes ratios that focus on liquidity (a company's ability to meet short term cash outflows), profitability (a company's ability to generate profit per unit of input), capital structure (how does the company finance its operations), and interest coverage (how much of profit is used up by interest payments).

### *Distance to Default*

Morningstar's quantitative Distance to Default measure ranks companies on the likelihood that they will tumble into financial distress. The measure is a linear model of the percentile of a firm's leverage (ratio of Enterprise Value to Market Value), the percentile of a firm's equity volatility relative to the rest of the universe and the interaction of these two percentiles. This is a proxy methodology for the common definition of Distance to Default which relies on option-based pricing models. The proxy has the benefit of increased breadth of coverage, greater simplicity of calculation, and more predictive power.

For each of these four categories, we assign a score, which we then translate into a descriptive rating along the scale of Very Good / Good / Fair / Poor / Very Poor.

### **Overall Credit Rating**

The four component ratings roll up into a single preliminary credit rating. To determine the final credit rating, a credit committee of at least five senior research personnel reviews each preliminary rating.

We review credit ratings on a regular basis and as events warrant. Any change in rating must be approved by the Credit Rating Committee.

### **Investor Access**

Morningstar Corporate Credit Ratings are available on Morningstar.com. Our credit research, including detailed cash-flow models that contain all of the components of the Morningstar Corporate Credit Rating, is available to subscribers at [select.morningstar.com](http://select.morningstar.com).

The Morningstar Rating for stocks identifies stocks trading at a discount or premium to their intrinsic value. Five-star stocks sell for the biggest risk-adjusted discount whereas one-star stocks trade at premiums to their intrinsic value. Based on a fundamentally focused methodology and a robust, standardized set of procedures and core valuation tools used by Morningstar's Equity Analysts, four key components drive the Morningstar Rating: 1. Assessment of the firm's economic moat, 2. Estimate of the stock's fair value, 3. Uncertainty around that fair value estimate and 4. Current market price. Further information on Morningstar's methodology is available from <http://global.morningstar.com/equitydisclosures>.

It has not been determined in advance whether and in what intervals this document will be updated. ### Investment Thesis 03 Apr 2014

Fortis manages electric and gas regulated utilities in Canada, the United States, and the Caribbean, resulting in stable operating results. Regulated operations make up 90% of the company's asset base; noncore generation and real estate holding operations account for the remainder. While we are less excited about the distractions of these noncore operations, management continues to focus on electric and natural gas distribution in North America.

Fortis' main regulated Canadian operations are in British Columbia, Alberta, and Newfoundland. These relatively low-risk operations result in stable earnings and fund the consistent dividend growth of the past four decades. Rate base additions should be significant through 2017, as the healthier Canadian economy drives usage and customer growth to support the firm's CAD 5.3 billion investment plans. This should allow the firm to increase its rate base at double-digit rates each year during this expansion period.

On a weighted average basis, Fortis' allowed return on equity in its Canadian service territories is 9.25%. While this return is lower than that typically granted to comparable U.S. utilities, it seems reasonable, given the low-risk nature of Fortis' transmission and delivery operations. In the U.S., CH Energy's allowed return on equity is 10%.

Fortis' management has long expressed interest in expanding its operations through U.S. acquisitions. In addition to its 2012 \$1.5 billion cash and debt bid for CH Energy, Fortis recently announced a \$4.3 billion cash and debt offer for Tucson, Ariz.-based UNS Energy. If the UNS Energy transaction closes, 31% of Fortis' operating earnings will come from U.S. regulated utilities. Management continues to be outspoken about its desire for further U.S. transactions, which increases shareholder risk that management could overpay for future acquisitions.

### Profile

Fortis owns and operates utility transmission and distribution assets in Canada and the United States, serving more than 2.5 million electricity and gas customers. Regulated operations constitute roughly 90% of total assets. The company has smaller stakes in electricity generation, several Caribbean utilities, and Canadian hotel and commercial real estate.

## Morningstar Analysis

### Valuation, Growth and Profitability 03 Apr 2014

We are increasing our fair value estimate to CAD 33 per share from CAD 31 after incorporating year-end 2013 results that were in line with our expectations. About half of our fair value increase relates to minor adjustments to our five-year outlook, including minor changes in our operating expense outlook and regulated rate adjustments. The remaining increase is due to time value appreciation since our last update.

In accounting for the UNS Energy acquisition, we adjusted for certain tax and regulatory balance sheet items and assign a 75% probability the deal closes. We expect the transaction to close in the fourth quarter.

We forecast 6% annual earnings growth through 2018 accounting for normalized weather conditions. We assume 1.5% annual energy use growth at the Canadian utilities and consistent allowed returns on equity. We forecast 1.0% annual energy growth at the U.S. utilities. Based on management's guidance, we forecast total investments of CAD 6.5 billion at the utilities through 2018, leading to 6% annualized rate base growth.

We use an 8.0% cost of equity to arrive at a 6.7% weighted average cost of capital in our discounted cash flow valuation.

### Scenario Analysis

If we assume a 100-basis-point decrease in allowed returns on equity at the Canadian utilities in 2013 and beyond, our fair value estimate would drop CAD 2 per share. Better-than-expected allowed returns on equity drive similar upside results.

Finally, a 50-basis-point change in our cost of equity assumption changes our fair value estimate by CAD 3 per share.

### Economic Moat

Fortis owns a difficult-to-replicate network of regulated power generation, transmission, and distribution assets and provides essential energy sources: natural gas and electricity. In exchange for its monopoly position, regulators set Fortis' returns at levels that aim to keep customer costs low while providing adequate returns for capital providers. This implicit contract between regulators and the utility should allow Fortis to earn its cost of capital in the long run and leads us to assign Fortis' regulated utilities a narrow economic moat.

### Moat Trend

We assign Fortis a stable moat because of its monopoly position and stable regulatory environment, which should continue to allow the firm to earn its cost of capital. We do not expect the regulatory relationship to change. The regulatory framework that caps revenue and returns prevents the firm from attaining a wide moat, as with all regulated utilities we cover.

## Bulls Say/Bears Say

### Bulls Say

- ▶ Fortis operates a stable business profile, offering a strong base for consistent earnings and dividend growth.
- ▶ With an aggressive capital expenditure plan, we forecast Fortis' rate base to grow 6% annually.
- ▶ Fortis has a consistent dividend growth history, paying consecutive quarterly dividends for four decades and increasing the dividend faster than most of its peers in recent years.

### Bears Say

- ▶ The Canadian regulatory environment offers lower allowed returns than in the U.S.
- ▶ Management's zeal for U.S. diversification increases the risk that the company will overpay for acquisitions.
- ▶ Fortis operates noncore hotel and commercial real estate assets, potentially distracting management from the core regulated operations.

### Financial Health & Capital Structure

Through 2018, Fortis has CAD 6.5 billion of planned capital expenditures, which will require it to access the debt and equity capital markets. It has manageable debt maturities through 2018. The company issued significant equity in 2013 to help finance its capital expenditure plan, and we expect it to issue additional equity in 2014 to accommodate employee stock-purchase plans, support its capital expenditure plan, and pay for its proposed UNS Energy acquisition.

With a 56% debt/capital ratio and 3.5 times interest coverage, Fortis' financial health looks reasonably sound, particularly in light of its stable, low-risk business model. We expect the company to maintain a capital structure in line with regulatory targets throughout its current investment cycle.

### Enterprise Risk

Fortis' key risk to future earnings is regulatory uncertainty. The company faces regulatory risks that create uncertainties around costs and allowed returns, especially given the significant capital expenditure plan through 2018. Fortis is also exposed to political and economic instability at its Caribbean operations. With an eye toward acquisitions, the company risks overpaying for regulated U.S. assets and must be mindful of the strategic benefits. As with all regulated utilities, Fortis faces the risk of an inflationary environment that would raise borrowing costs and make other investments more attractive for income-seeking investors.

### Management

03 Apr 2014

Overall, we think Fortis' management team has been fair stewards of shareholder capital. Management has earned at or nears its allowed returns and managed regulatory relationships well, particularly in Canada. What concerns us the most, and would cause us to revisit our view of the management team, is management's enthusiasm for U.S. acquisitions leading to further pricey acquisitions, much like the bid for UNS Energy, in our view. We think shareholders would be better off if management reinvested its capital to fund growth investments or returned it to shareholders through share repurchases or a higher dividend payout ratio.

Stanley Marshall has been president and CEO since 1995, leading a group of experienced utility executives. Total direct compensation is in line with Fortis' industry group. Marshall's total compensation comprises base salary, annual incentives, stock options, and performance stock units, with 75% of total compensation at risk. We do not like that annual cash incentives are based on earnings per share targets, as EPS can be manipulated and may not be an indication of shareholder value creation. Marshall has a significant ownership stake, which we believe aligns shareholder and management interests. From a corporate governance perspective, we like that the CEO and chairman positions are separated. Additionally, we would prefer the board of directors have more direct utility experience.

### Analyst Notes

#### Fortis Reports Full-Year Earnings, Increases Dividend 06 Feb 2014

Fortis reported CAD 1.74 of earnings per share for the full year 2013 compared to CAD 1.66 in 2012. The company will pay a CAD 1.28 per share dividend in 2014, a 3.2% increase from 2013. We are reaffirming our CAD 31 per share fair value estimate, 2014 EPS estimate, narrow moat, and stable moat trend.

In December, Fortis management announced a pricey \$4.3 billion acquisition of UNS Energy. In January, Fortis and UNS Energy filed for regulatory approval with the Arizona Corporation Commission, or ACC. Management expects the deal to close by year-end, with regulatory approvals from the ACC and FERC required before closing. When the acquisition closes, one third of Fortis' assets will be located in the U.S., including the company's CH Energy Group acquisition that closed last June. Management has suggested it will continue to look for additional opportunities to acquire regulated utilities in the U.S.

Fortis' Canadian Regulated Utilities reported roughly flat earnings from 2012. Higher operating expenses and lower allowed rates of return were offset by earnings from \$1.2 billion in capital additions. The company plans to invest \$6.5 billion in 2014-18, not including UNS Energy's planned \$1.4 billion spend from 2015-18. Capital projects should continue to drive future earnings and dividend growth.

#### Fortis Management's Zeal for Acquisitions Leads to Pricey UNS Energy Offer 16 Dec 2013

We think Fortis management's enthusiasm for regulated acquisitions led them to offer a pricey \$4.3 billion for UNS Energy, a 31% premium to UNS Energy's close price before the announcement and a lofty 18 times UNS Energy management's 2014 midpoint earnings estimate. The \$2.5 billion equity value offer implies a 2.3 price/book multiple,

well above the median 1.7 price/book multiple for 60 U.S.-based regulated utilities as of November. The gross deal value includes \$1.8 billion of assumed debt and is approximately 1.5 times UNS Energy's consolidated rate base.

We view the transaction negatively for Fortis shareholders, resulting in a CAD 1 per share dilution. We estimate a 75% probability of the deal closing and assume no synergy savings. Offsetting the transaction impact is the time-value appreciation since our last update, and thus we are maintaining our CAD 31 per share fair value estimate, narrow moat and stable trend. Fortis will finance the acquisition with \$1.8 billion in convertible debentures, comprising \$1.6 billion in deal and \$200 million private placement debentures.

The transaction is in line with the price MidAmerican Energy offered in May for NV Energy, which we also viewed as rich. Fortis management recently indicated to us that they would like to make multiple acquisitions of \$5 billion or less in the U.S. during the next decade, increasing shareholder risk that management might overpay for future U.S. acquisitions.

The appeal of a strong economic recovery, above-average demand growth and constructive regulatory environment has recently lured other utilities to the Southwest. In addition to MidAmerican Energy's offer for NV Energy, TECO Energy in May offered to acquire New Mexico Gas Company. We highlight Pinnacle West Capital (PNW) as another potential target in the Southwest. Valuing PNW at 18 times our 2014 earnings estimate implies a \$66 per share takeout price, well above our \$55 per share fair value estimate

#### Fortis Makes Pricey Offer for UNS Energy 11 Dec 2013

Fortis management made good on its outspoken desire to add to its U.S. utilities holdings with a \$4.3 billion offer to

### Analyst Notes

acquire UNS Energy, a predominantly regulated electric and gas utility in Arizona. Management has told us repeatedly in recent meetings it would like to make multiple acquisitions of \$5 billion or less in the U.S. during the next decade. The UNS deal comes less than six months after Fortis closed its \$1.5 billion acquisition of Central Hudson Energy, its first U.S. acquisition.

We are reaffirming our CAD 31 per share fair value estimate, narrow economic moat, and stable moat trend ratings, although we think the price it is paying for UNS is rich relative to where its U.S. regulated utilities peers are trading. Fortis is offering \$60.25 per share, a 31% premium to UNS Energy's closing price on Dec. 11. The \$2.5 billion equity value offer implies a 2.3 price-to-book multiple, well above the median 1.7 price-to-book multiple for 60 U.S.-based regulated utilities as of November. The gross deal value including \$1.8 billion of assumed debt is approximately 1.5 times UNS' consolidated rate base.

We expect Fortis to issue additional debt at the holding company level to fund a portion of the equity, easing some of the equity dilution from the premium price it is paying. The deal will have to receive approval from UNS shareholders, the Arizona Corporation Commission, and the Federal Energy Regulatory Commission. We expect regulatory approvals to take until late 2014. Management said it expects the UNS deal to be accretive to earnings in the first full year after closing, likely in 2015. They expect the CH Energy deal to be accretive in 2015 as well.

#### Management Meeting: Acquisitive Fortis Management Seeks Further U.S. Expansion 14 Nov 2013

Fortis' appetite for further expansion in the U.S. was evident during our executive management meeting at the 48th Edison Electric Institute Financial Conference in Orlando, Fla. We are reaffirming our CAD 31 per share fair value

estimate, narrow moat and stable moat trend ratings.

Management indicated that the integration of the \$1.5 billion acquisition of Central Hudson Energy was complete. A prolonged regulatory approval process, which ultimately led to \$3 million in annual concessions, hasn't deterred management from seeking additional U.S. opportunities. Fortis sees multiple transactions in the U.S. during the next 10 years, indicating a desire for transactions \$5 billion and under. Management prefers regulated transmission and distribution assets but would consider combining with generation assets given the right asset mix. Fortis would not consider merchant assets. Since 2004, Fortis has acquired four regulated Canadian and U.S. utilities (Fortis Alberta, Fortis BCElectric, FortisBC Gas, Central Hudson Energy) for a combined \$6.7 billion. We caution management's enthusiasm for acquisitions as we currently view regulated utilities 6% overvalued, not accounting for a likely 20%-30% takeover premium.

At its regulated Canadian operations, management expects to invest \$1.0 billion-\$1.2 billion annually, with the largest allocation to Fortis Alberta, the company's fastest-growing utility. Build-out of Alberta's oil sand production should support 7%-8% near-term growth and \$400 million of annual capital spend. Fortis Alberta, the company's largest utility, will account for \$250 million in annual investment. Fortis has managed its Wanetta hydro expansion well, with construction on time and on budget for the \$900-million, 335 MW facility.

#### Fortis' Earnings Reflect Lower Allowed Returns and Higher Capital Additions 01 Nov 2013

Fortis reported third-quarter earnings per share of \$0.23, compared with \$0.24 in the year-ago period. Year-to-date EPS were \$1.27, compared to \$1.20 in the same period. The company will pay a CAD 1.24 per share dividend in 2013, a

### Analyst Notes

3.3% increase from 2012. We are reaffirming our CAD 31 per share fair value estimate, 2013 EPS estimate, narrow moat, and stable moat trend.

Fortis recently completed its \$1.5 billion CH Energy Group acquisition. Management expects the transaction to be accretive to EPS in 2015. CH Energy Group contributed \$12 million in the quarter, which was offset by the common share offering and financing costs related to the transaction. We suspect management continues to look for additional regulated opportunities in the U.S.

Fortis' Canadian Regulated Gas Utilities notched a \$14 million loss compared to a \$6 million loss in the year-ago quarter, in a period of low demand from warmer temperatures. Higher operating expenses and lower allowed rates of return attributed to the larger loss. Earnings from capital projects partially offset segment weakness. The company's Canadian Regulated Electric Utilities also showed weakness, earning \$51 million in the third quarter compared to \$55 million in the year-ago quarter. In general, across the segment earnings from completion of infrastructure projects were offset from lower allowed rates of return. Management continues to work towards completing \$1.2 billion in capital projects in 2013, part of a larger \$6 billion program, which will drive future earnings and dividend growth.

# Research Methodology for Valuing Companies

## Components of Our Methodology

- ▶ Economic Moat™ Rating
- ▶ Moat Trend™ Rating
- ▶ Moat Valuation
- ▶ Three-Stage Discounted Cash Flow
- ▶ Weighted Average Cost of Capital
- ▶ Fair Value Estimate
- ▶ Scenario Analysis
- ▶ Uncertainty Ratings
- ▶ Margin of Safety
- ▶ Consider Buying/Selling
- ▶ Stewardship Rating

The Morningstar Rating for stocks identifies companies trading at a discount or premium to our analysts' assessment of their fair value. A number of components drive this rating: (1) our assessment of the firm's economic moat, (2) our estimate of the stock's intrinsic value based on a discounted cash-flow model, (3) the margin of safety bands we apply to our Fair Value Estimate, and (4) the current stock price relative to our fair value estimate.

The concept of the Morningstar Economic Moat™ Rating plays a vital role not only in our qualitative assessment of a firm's investment potential, but also in our valuation process. We assign three moat ratings—none, narrow, or wide—as well as the Morningstar Moat Trend™ Rating—positive, stable, or negative—to each company we cover. There are two major requirements for firms to earn either a narrow or wide moat rating: (1) the prospect of earning above-average returns on capital; and (2) some competitive edge that prevents these returns from quickly eroding. The assumptions we make about a firm's moat determine the length of "economic outperformance" that we assume in the latter stages

of our valuation model. We also quantify the value of each firm's moat, which represents the difference between a firm's enterprise value and the value of the firm if no future net investment were to occur. Said differently, moat value identifies the value generated by the firm as a result of any future net new investment. Our Moat Trend Rating reflects our assessment of whether each firm's competitive advantage is either getting stronger or weaker, since we think of moats as dynamic, rather than static.

At the heart of our valuation system is a detailed projection of a company's future cash flows. The first stage of our three-stage discounted cash flow model can last from 5 to 10 years and contains numerous detailed assumptions about various financial and operating items. The second stage of our model—where a firm's return on new invested capital (RONIC) and earnings growth rate implicitly fade until the perpetuity year—can last anywhere from 0 years (for no-moat firms) to 20 years (for wide-moat companies). In our third stage, we assume the firm's RONIC equals its weighted average cost of capital, and we calculate a continuing value using a standard

\* Please contact a sales representative for more information.

perpetuity formula. In deciding on the rate at which to discount future cash flows, we ignore stock-price volatility. Instead, we rely on a system that measures the estimated volatility of a firm's underlying future free cash flows, taking into account fundamental factors such as the diversity of revenue sources and the firm's fixed cost structure.

We also employ a number of other tools to augment our valuation process, including scenario analysis, where we assess the likelihood and performance of a business under different economic and firm-specific conditions. Our analysts typically model three to five scenarios for each company we cover, stress-testing the model and examining the distribution of resulting fair values.

The Morningstar Uncertainty Rating captures the range of these potential fair values, based on an assessment of a company's future sales range, the firm's operating and financial leverage, and any other contingent events that may impact the business. Our analysts use this range to assign an appropriate margin of safety—or the discount/premium

to a fair value we apply in setting our consider buying/consider selling prices. Firms trading below our consider-buying prices receive our highest rating of five stars, whereas firms trading above our consider-selling prices receive our lowest rating of one star.

Our corporate Stewardship Rating represents our assessment of management's stewardship of shareholder capital, with particular emphasis on capital allocation decisions. Analysts consider companies' investment strategy and valuation, financial leverage, dividend and share buyback policies, execution, compensation, related party transactions, and accounting practices. Corporate governance practices are only considered if they've had a demonstrated impact on shareholder value. Analysts assign one of three ratings: "Exemplary," "Standard," and "Poor." Analysts judge stewardship from an equity holder's perspective. Ratings are determined on an absolute basis. Most companies will receive a Standard rating, and this is the default rating in the absence of evidence that managers have made exceptionally strong or poor capital allocation decisions.

## Morningstar Margin of Safety and Star Rating Bands

\* Occasionally a stock's uncertainty will be too high for us to estimate, in which case we label it Extreme.

# Morningstar's Approach to Rating Corporate Credit

- Offers a proprietary measure of the credit quality of companies on our coverage list.
- Encapsulates our in-depth modeling and quantitative work in one letter grade.
- Allows investors to rank companies by each of the four underlying components of our credit ratings, including both analyst-driven and quantitative measures.
- Provides access to all the underlying forecasts that go into the rating, available through our institutional service.

## Purpose

The Morningstar Corporate Credit Rating measures the ability of a firm to satisfy its debt and debt-like obligations. The higher the rating, the less likely we think the company is to default on these obligations.

The Morningstar Corporate Credit Rating builds on the modeling expertise of our securities research team. For each company, we publish:

- Five years of detailed pro-forma financial statements
- Annual estimates of free cash flow
- Annual forecasts of return on invested capital
- Scenario analyses, including upside and downside cases
- Forecasts of leverage, coverage, and liquidity ratios for five years
- Estimates of off balance sheet liabilities

These forecasts are key inputs into the Morningstar Corporate Credit Rating and are available to subscribers at [select.morningstar.com](http://select.morningstar.com).

## Methodology

We feel it's important to perform credit analysis through different lenses—qualitative and quantitative, as well as fundamental and market-driven. We therefore evaluate each company in four broad categories.

### Business Risk

Business Risk captures the fundamental uncertainty around a firm's business operations and the cash flow generated by those operations. Key components of the Business Risk rating include the Morningstar Economic Moat™ Rating and the Morningstar Uncertainty Rating.

### Cash Flow Cushion™

Morningstar's proprietary Cash Flow Cushion™ ratio is a fundamental indicator of a firm's future financial health. The measure reveals how many times a company's internal cash generation plus total excess liquid cash will cover its debt-like contractual commitments over the next five years. The Cash Flow Cushion acts as a predictor of financial distress, bringing to light potential refinancing, operational, and liquidity risks inherent to the firm.

## Morningstar Research Methodology for Determining Corporate Credit Ratings

## Morningstar's Approach to Rating Corporate Credit

The advantage of the Cash Flow Cushion ratio relative to other fundamental indicators of credit health is that the measure focuses on the future cash-generating performance of the firm derived from Morningstar's proprietary discounted cash flow model. By making standardized adjustments for certain expenses to reflect their debt-like characteristics, we can compare future projected free cash flows with debt-like cash commitments coming due in any particular year. The forward-looking nature of this metric allows us to anticipate changes in a firm's financial health and pinpoint periods where cash shortfalls are likely to occur.

### *Morningstar Solvency Score™*

The Morningstar Solvency Score™ is a quantitative score derived from both historical and forecasted financial ratios. It includes ratios that focus on liquidity (a company's ability to meet short term cash outflows), profitability (a company's ability to generate profit per unit of input), capital structure (how does the company finance its operations), and interest coverage (how much of profit is used up by interest payments).

### *Distance to Default*

Morningstar's quantitative Distance to Default measure ranks companies on the likelihood that they will tumble into financial distress. The measure is a linear model of the percentile of a firm's leverage (ratio of Enterprise Value to Market Value), the percentile of a firm's equity volatility relative to the rest of the universe and the interaction of these two percentiles. This is a proxy methodology for the common definition of Distance to Default which relies on option-based pricing models. The proxy has the benefit of increased breadth of coverage, greater simplicity of calculation, and more predictive power.

For each of these four categories, we assign a score, which we then translate into a descriptive rating along the scale of Very Good / Good / Fair / Poor / Very Poor.

### **Overall Credit Rating**

The four component ratings roll up into a single preliminary credit rating. To determine the final credit rating, a credit committee of at least five senior research personnel reviews each preliminary rating.

We review credit ratings on a regular basis and as events warrant. Any change in rating must be approved by the Credit Rating Committee.

### **Investor Access**

Morningstar Corporate Credit Ratings are available on Morningstar.com. Our credit research, including detailed cash-flow models that contain all of the components of the Morningstar Corporate Credit Rating, is available to subscribers at [select.morningstar.com](http://select.morningstar.com).

The Morningstar Rating for stocks identifies stocks trading at a discount or premium to their intrinsic value. Five-star stocks sell for the biggest risk-adjusted discount whereas one-star stocks trade at premiums to their intrinsic value. Based on a fundamentally focused methodology and a robust, standardized set of procedures and core valuation tools used by Morningstar's Equity Analysts, four key components drive the Morningstar Rating: 1. Assessment of the firm's economic moat, 2. Estimate of the stock's fair value, 3. Uncertainty around that fair value estimate and 4. Current market price. Further information on Morningstar's methodology is available from <http://global.morningstar.com/equitydisclosures>.

It has not been determined in advance whether and in what intervals this document will be updated. No material interests are held by Morningstar or the Equity Analyst in the financial products that are the subject of the research reports or the product issuer. Regarding Morningstar's conflicts of interest: 1) Equity Analysts are required to

comply with the CFA Institute's Code of Ethics and Standards of Professional Conduct and 2) Equity Analysts' compensation is derived from Morningstar's overall earning and consists of salary, bonus and in some cases restricted stock; however Equity Analysts are neither allowed to participate directly or try to influence Morningstar's investment management group's business arrangements nor allow employees from the investment management group to participate or influence the analysis or opinion prepared by them. Further information on Morningstar's conflict of interest policies is available from <http://global.morningstar.com/equitydisclosures>.

Morningstar Analyst Forecasts	2

### Analyst Note 08 May 2014

Fortis reported CAD 0.67 of earnings per share for the first quarter compared with CAD 0.79 in the year-ago quarter. Quarter-over-quarter comparison includes \$0.02 per share related to Griffith Energy Services, which was acquired as part of CH Energy and sold in March 2014, and a \$0.12 aftertax extraordinary gain related to the expropriation of the Exploits River Hydro Partnership. The company will pay a CAD 1.28 per share dividend in 2014, a 3.2% increase from 2013. We are reaffirming our CAD 33 per share fair value estimate, 2014 EPS estimate, narrow moat, and stable moat trend.

In late 2013, Fortis management announced what we think is a pricey \$4.3 billion acquisition of UNS Energy. In March UNS Energy shareholders approved the acquisition, and in April, Fortis received approval from the Federal Energy Regulatory Commission. Regulatory approval from the Arizona Corporation Commission is pending. The ACC has indicated early support of the merger, subject to certain conditions. Management targets a year-end transaction close. We continue to believe that Fortis will actively be looking for additional opportunities to acquire regulated U.S. utilities.

Regulated utility earnings for the quarter increased \$17 million to \$162 million. Earnings benefited \$18 million from the inclusion of Central Hudson Gas & Electric, which Fortis acquired in June 2013. Newfoundland Power benefited from regulated rate increases and the Caribbean regulated utilities benefited from strong electricity sales. FortisBC Energy was negatively affected by lower rates set in 2013. In the quarter, Fortis invested \$237 million as part of the full-year \$1.4 billion in planned investments.

### Profile

Fortis owns and operates utility transmission and distribution assets in Canada and the United States, serving more than 2.5 million electricity and gas customers. Regulated operations constitute roughly 90% of total assets. The company has smaller stakes in electricity generation, several Caribbean utilities, and Canadian hotel and commercial real estate.

© 2014 Morningstar. All Rights Reserved. Unless stated otherwise, this report was prepared by the person(s) noted in their capacity as Equity Analysts employed by Morningstar, Inc., including its global affiliates. It has not been made available to the issuer prior to publication.

The Morningstar Rating for stocks identifies stocks trading at a discount or premium to their intrinsic value. Five-star stocks sell for the biggest risk-adjusted discount whereas one-star stocks trade at premiums to their intrinsic value. Based on a fundamentally focused methodology and a robust, standardized set of procedures and core valuation tools used by Morningstar's Equity Analysts, four key components drive the Morningstar Rating: 1. Assessment of the firm's economic moat, 2. Estimate of the stock's fair value, 3. Uncertainty around that fair value estimate and 4. Current market price. Further information on Morningstar's methodology is available from <http://global.morningstar.com/equitydisclosures>.

It has not been determined in advance whether and in what intervals this document will be updated. No material interests are held by Morningstar or the Equity Analyst in the financial products that are the subject of the research reports or the product issuer. Regarding Morningstar's conflicts of interest: 1) Equity Analysts are required to

comply with the CFA Institute's Code of Ethics and Standards of Professional Conduct and 2) Equity Analysts' compensation is derived from Morningstar's overall earning and consists of salary, bonus and in some cases restricted stock; however Equity Analysts are neither allowed to participate directly or try to influence Morningstar's investment management group's business arrangements nor allow employees from the investment management group to participate or influence the analysis or opinion prepared by them. Further information on Morningstar's conflict of interest policies is available from <http://global.morningstar.com/equitydisclosures>.

### Contents

Analyst Note	1
Morningstar Analyst Forecasts	2

### Analyst Note 01 Aug 2014

Fortis reported CAD 0.22 in earnings per share for the second quarter, down from CAD 0.28 in the year-ago quarter. On an adjusted basis, second-quarter earnings were CAD 0.28 compared with CAD 0.32 in the year-ago quarter. Earnings per share were affected by the 18.5 million common share issuance related to the Central Hudson acquisition. We are reaffirming our CAD 33 fair value estimate, 2014 EPS estimate and narrow moat stable moat trend ratings.

Fortis' \$4.3 billion UNS Energy acquisition continues to progress, with the company awaiting approval of the Arizona Corporation Commission. We expect approval from ACC, given a settlement agreement reached in May. Fortis has received approvals from shareholders and the Federal Energy Regulatory Commission. The acquisition is now expected to close by the end of August, pending ACC approval. To fund the transaction, Fortis completed CAD 1.8 billion in convertible unsecured debentures.

Excluding the effect of favorable regulatory outcomes in the second quarter of 2013, core regulated earnings grew CAD 9 million. Earnings benefited CAD 7 million from the inclusion of Central Hudson Gas & Electric, which Fortis acquired in June 2013. Electricity growth at the company's Caribbean regulated utilities accounted for the remaining CAD 2 million in earnings growth. For the first half of the year, Fortis invested CAD 535 million as part of the full-year CAD 1.4 billion in planned investments. Management's five-year plan calls for CAD 8.0 billion in total capital expenditures, including UNS Energy, which is expected to increase the rate base 7.0%.

### Profile

Fortis owns and operates utility transmission and distribution assets in Canada and the United States, serving more than 2.5 million electricity and gas customers. Regulated operations constitute roughly 90% of total assets. The company has smaller stakes in electricity generation, several Caribbean utilities, and Canadian hotel and commercial real estate.

The Morningstar Rating for stocks identifies stocks trading at a discount or premium to their intrinsic value. Five-star stocks sell for the biggest risk-adjusted discount whereas one-star stocks trade at premiums to their intrinsic value. Based on a fundamentally focused methodology and a robust, standardized set of procedures and core valuation tools used by Morningstar's Equity Analysts, four key components drive the Morningstar Rating: 1. Assessment of the firm's economic moat, 2. Estimate of the stock's fair value, 3. Uncertainty around that fair value estimate and 4. Current market price. Further information on Morningstar's methodology is available from <http://global.morningstar.com/equitydisclosures>.

It has not been determined in advance whether and in what intervals this document will be updated. No material interests are held by Morningstar or the Equity Analyst in the financial products that are the subject of the research reports or the product issuer. ### Investment Thesis 29 Sep 2014

Fortis manages electric and gas regulated utilities in Canada, the United States, and the Caribbean, resulting in stable operating results. Regulated operations make up more than 95% of the company's asset base; noncore generation and real estate holding operations account for the remainder. While we are less excited about the distractions of these noncore operations, management continues to focus on electric and natural gas distribution in North America.

Fortis' main regulated Canadian operations are in British Columbia, Alberta, and Newfoundland. These relatively low-risk operations result in stable earnings and fund the consistent dividend growth of the past four decades. Rate base additions should be significant through 2018, as the healthier Canadian economy drives usage and customer growth to support the firm's CAD 8.0 billion investment plans. This should allow the firm to increase its rate base at double-digit rates each year during this expansion period.

On a weighted average basis, Fortis' allowed return on equity in its Canadian service territories is near 9.25%. While this return is lower than that typically granted to comparable U.S. utilities, it seems reasonable, given the low-risk nature of Fortis' transmission and delivery operations.

Fortis' management has long expressed interest in expanding its operations through U.S. acquisitions. In addition to its 2012 \$1.5 billion cash and debt bid for CH Energy, Fortis recently announced a \$4.3 billion cash and debt offer for Tucson, Arizona-based UNS Energy. After the transaction's close, about one third of Fortis' operating earnings now come from U.S. regulated utilities. Management continues to be outspoken about its desire for further U.S. transactions, which increases shareholder risk that it could overpay for future acquisitions.

### Profile

Fortis owns and operates utility transmission and distribution assets in Canada and the United States, serving more than 2.5 million electricity and gas customers. Regulated operations constitute more than 95% of total assets. The company has smaller stakes in electricity generation, several Caribbean utilities, and Canadian hotel and commercial real estate.

## Morningstar Analysis

### Valuation, Growth and Profitability 29 Sep 2014

We are maintaining our CAD 33 fair value estimate. We forecast 6% annual earnings growth through 2018, accounting for normalized weather conditions and excluding unannounced acquisitions.

We assume 1.5% annual energy use growth at the Canadian utilities and consistent allowed returns on equity. We forecast 1.0% annual energy growth at the U.S. utilities. Based on management's guidance, we forecast total investments of CAD 6.5 billion at the utilities through 2018, leading to 6% annualized rate base growth.

We use an 8.0% cost of equity to arrive at a 6.7% weighted average cost of capital in our discounted cash flow valuation.

### Scenario Analysis

If we assume a 100-basis-point decrease in allowed returns on equity at the Canadian utilities in 2014 and beyond, our fair value estimate would drop CAD 2 per share. Better-than-expected allowed returns on equity drive similar upside results.

A 50-basis-point change in our cost of equity assumption changes our fair value estimate by CAD 3 per share.

### Economic Moat

Service territory monopolies and efficient scale advantages are the primary sources of an economic moat for regulated utilities such as Fortis. Regulators typically grant regulated utilities exclusive rights to charge customers rates that allow the utilities to earn a fair return on and return of the capital they invest to build, operate, and maintain their distribution networks. In exchange for regulated utilities' service territory monopolies, regulators set returns at levels that aim to minimize customer costs while offering fair returns for capital providers.

This implicit contract between regulators and capital providers should, on balance, allow regulated utilities to achieve at least their costs of capital, though observable returns might vary in the short run based on demand trends, investment cycles, operating costs, and access to financing. Intuitively, utilities should have an economic moat based on efficient scale, but in some cases regulation offsets this advantage, preventing excess returns on capital. The risk of adverse regulatory decisions precludes regulated utilities from earning wide economic moat ratings. However, the threat of material value destruction is low, and normalized returns exceed costs of capital in most cases, leaving us comfortable assigning narrow moats to many regulated utilities.

### Moat Trend

We assign Fortis a stable moat because of its monopoly position and stable regulatory environment, which should continue to allow the firm to earn its cost of capital. Fortis has a history of constructive relationships across its North American presence, and we do not expect the regulatory relationship to change. The bulk of its capital plan is toward the moaty regulated assets, which should strengthen Fortis' narrow moat. The regulatory framework that caps revenue and returns prevents the firm from attaining a wide moat, as with all regulated utilities we cover.

For regulated utilities like Fortis, our moat trends consider changes in the regulatory environment, near-term investment requirements and growth opportunities, energy demand trends, and management's strategic direction. In assessing the changing regulatory environment, we consider the level of automatic rate mechanisms, allowed returns on equity versus interest rates, fuel cost recovery mechanisms, and the history of regulatory relations. Using these factors, we assess whether fundamental changes will give a utility a better opportunity to earn or overearn its cost of capital in the near term, or whether fundamental changes will make it more difficult for a utility to earn its cost of

## Bulls Say/Bears Say

### Bulls Say

- ▶ Fortis operates a stable business profile, offering a strong base for consistent earnings and dividend growth.
- ▶ With an aggressive capital expenditure plan, we forecast Fortis' rate base to grow 6% annually.
- ▶ Fortis has a consistent dividend growth history, paying consecutive quarterly dividends for four decades and increasing the dividend faster than most of its peers in recent years.

### Bears Say

- ▶ The Canadian regulatory environment offers lower allowed returns than in the U.S.
- ▶ Management's zeal for U.S. diversification increases the risk that the company will overpay for acquisitions.
- ▶ Fortis operates noncore hotel and commercial real estate assets, potentially distracting management from the core regulated operations.

### Financial Health & Capital Structure

Through 2018, Fortis has CAD 8.0 billion of planned capital expenditures, which will require it to access the debt and equity capital markets. It has manageable debt maturities through 2018. The company issued significant equity in 2013 to help finance its capital expenditure plan and has issued additional equity in 2014 to accommodate employee stock-purchase plans, support its capital expenditure plan, and pay for its proposed UNS Energy acquisition.

With a 56% debt/capital ratio and 3.5 times interest coverage, Fortis' financial health looks reasonably sound, particularly in light of its stable, low-risk business model. We expect the company to maintain a capital structure in line with regulatory targets throughout its current investment cycle.

### Enterprise Risk

Fortis' key risk to future earnings is regulatory uncertainty. The company faces regulatory risks that create uncertainties around costs and allowed returns, especially given the significant capital expenditure plan through 2018. Fortis is also exposed to political and economic instability at its Caribbean operations. With an eye toward acquisitions, the company risks overpaying for regulated U.S. assets and must be mindful of the strategic benefits. As with all regulated utilities, Fortis faces the risk of an inflationary environment that would raise borrowing costs and make other investments more attractive for income-seeking investors.

### Management 29 Sep 2014

Overall, we think Fortis' management team has been fair stewards of shareholder capital. Management has earned at or near its allowed returns and managed regulatory relationships well, particularly in Canada. What concerns us the most, and would cause us to revisit our view of the management team, is management's enthusiasm for U.S. acquisitions leading to further pricey acquisitions, much like the bid for UNS Energy, in our view. We think shareholders would be better off if management reinvested its capital to fund growth investments or returned it to shareholders through share repurchases or a higher dividend payout ratio.

Stanley Marshall had been president and CEO since 1995, leading a group of experienced utility executives. Marshall recently relinquished his role of president to Barry Perry, who plans to replace Marshall as CEO when Marshall retires in December. We think Perry is a suitable replacement, given his previous experience as Fortis' CFO and as CFO of Newfoundland Power.

Total direct compensation is in line with Fortis' industry group. Management's total compensation comprises base salary, annual incentives, stock options, and performance stock units, with 75% of total compensation at risk. We do not like that annual cash incentives are based on earnings per share targets, as EPS can be manipulated and may not be an indication of shareholder value creation. Management has a significant ownership stake, which we believe aligns shareholder and management interests.

## Analyst Notes

### Fortis Reports 2Q Results 01 Aug 2014

Fortis reported CAD 0.22 in earnings per share for the second quarter, down from CAD 0.28 in the year-ago quarter. On an adjusted basis, second-quarter earnings were CAD 0.28 compared with CAD 0.32 in the year-ago quarter. Earnings per share were affected by the 18.5 million common share issuance related to the Central Hudson acquisition. We are reaffirming our CAD 33 fair value estimate, 2014 EPS estimate and narrow moat stable moat trend ratings.

Fortis' \$4.3 billion UNS Energy acquisition continues to progress, with the company awaiting approval of the Arizona Corporation Commission. We expect approval from ACC, given a settlement agreement reached in May. Fortis has received approvals from shareholders and the Federal Energy Regulatory Commission. The acquisition is now expected to close by the end of August, pending ACC approval. To fund the transaction, Fortis completed CAD 1.8 billion in convertible unsecured debentures.

Excluding the effect of favorable regulatory outcomes in the second quarter of 2013, core regulated earnings grew CAD 9 million. Earnings benefited CAD 7 million from the inclusion of Central Hudson Gas & Electric, which Fortis acquired in June 2013. Electricity growth at the company's Caribbean regulated utilities accounted for the remaining CAD 2 million in earnings growth. For the first half of the year, Fortis invested CAD 535 million as part of the full-year CAD 1.4 billion in planned investments. Management's five-year plan calls for CAD 8.0 billion in total capital expenditures, including UNS Energy, which is expected to increase the rate base 7.0%.

### Fortis Reports First-Quarter Results; UNS Energy Acquisition on Track 08 May 2014

Fortis reported CAD 0.67 of earnings per share for the first quarter compared with CAD 0.79 in the year-ago quarter.

Quarter-over-quarter comparison includes \$0.02 per share related to Griffith Energy Services, which was acquired as part of CH Energy and sold in March 2014, and a \$0.12 aftertax extraordinary gain related to the expropriation of the Exploits River Hydro Partnership. The company will pay a CAD 1.28 per share dividend in 2014, a 3.2% increase from 2013. We are reaffirming our CAD 33 per share fair value estimate, 2014 EPS estimate, narrow moat, and stable moat trend.

In late 2013, Fortis management announced what we think is a pricey \$4.3 billion acquisition of UNS Energy. In March UNS Energy shareholders approved the acquisition, and in April, Fortis received approval from the Federal Energy Regulatory Commission. Regulatory approval from the Arizona Corporation Commission is pending. The ACC has indicated early support of the merger, subject to certain conditions. Management targets a year-end transaction close. We continue to believe that Fortis will actively be looking for additional opportunities to acquire regulated U. S. utilities.

Regulated utility earnings for the quarter increased \$17 million to \$162 million. Earnings benefited \$18 million from the inclusion of Central Hudson Gas & Electric, which Fortis acquired in June 2013. Newfoundland Power benefited from regulated rate increases and the Caribbean regulated utilities benefited from strong electricity sales. FortisBC Energy was negatively affected by lower rates set in 2013. In the quarter, Fortis invested \$237 million as part of the full-year \$1.4 billion in planned investments.

# Research Methodology for Valuing Companies

## Components of Our Methodology

- ▶ Economic Moat™ Rating
- ▶ Moat Trend™ Rating
- ▶ Moat Valuation
- ▶ Three-Stage Discounted Cash Flow
- ▶ Weighted Average Cost of Capital
- ▶ Fair Value Estimate
- ▶ Scenario Analysis
- ▶ Uncertainty Ratings
- ▶ Margin of Safety
- ▶ Consider Buying/Selling
- ▶ Stewardship Rating

The Morningstar Rating for stocks identifies companies trading at a discount or premium to our analysts' assessment of their fair value. A number of components drive this rating: (1) our assessment of the firm's economic moat, (2) our estimate of the stock's intrinsic value based on a discounted cash-flow model, (3) the margin of safety bands we apply to our Fair Value Estimate, and (4) the current stock price relative to our fair value estimate.

The concept of the Morningstar Economic Moat™ Rating plays a vital role not only in our qualitative assessment of a firm's investment potential, but also in our valuation process. We assign three moat ratings—none, narrow, or wide—as well as the Morningstar Moat Trend™ Rating—positive, stable, or negative—to each company we cover. There are two major requirements for firms to earn either a narrow or wide moat rating: (1) the prospect of earning above-average returns on capital; and (2) some competitive edge that prevents these returns from quickly eroding. The assumptions we make about a firm's moat determine the length of “economic outperformance” that we assume in the latter stages

of our valuation model. We also quantify the value of each firm's moat, which represents the difference between a firm's enterprise value and the value of the firm if no future net investment were to occur. Said differently, moat value identifies the value generated by the firm as a result of any future net new investment. Our Moat Trend Rating reflects our assessment of whether each firm's competitive advantage is either getting stronger or weaker, since we think of moats as dynamic, rather than static.

At the heart of our valuation system is a detailed projection of a company's future cash flows. The first stage of our three-stage discounted cash flow model can last from 5 to 10 years and contains numerous detailed assumptions about various financial and operating items. The second stage of our model—where a firm's return on new invested capital (RONIC) and earnings growth rate implicitly fade until the perpetuity year—can last anywhere from 0 years (for no-moat firms) to 20 years (for wide-moat companies). In our third stage, we assume the firm's RONIC equals its weighted average cost of capital, and we calculate a continuing value using a standard

\* Please contact a sales representative for more information.

perpetuity formula. In deciding on the rate at which to discount future cash flows, we ignore stock-price volatility. Instead, we rely on a system that measures the estimated volatility of a firm's underlying future free cash flows, taking into account fundamental factors such as the diversity of revenue sources and the firm's fixed cost structure.

We also employ a number of other tools to augment our valuation process, including scenario analysis, where we assess the likelihood and performance of a business under different economic and firm-specific conditions. Our analysts typically model three to five scenarios for each company we cover, stress-testing the model and examining the distribution of resulting fair values.

The Morningstar Uncertainty Rating captures the range of these potential fair values, based on an assessment of a company's future sales range, the firm's operating and financial leverage, and any other contingent events that may impact the business. Our analysts use this range to assign an appropriate margin of safety—or the discount/premium

to a fair value we apply in setting our consider buying/consider selling prices. Firms trading below our consider-buying prices receive our highest rating of five stars, whereas firms trading above our consider-selling prices receive our lowest rating of one star.

Our corporate Stewardship Rating represents our assessment of management's stewardship of shareholder capital, with particular emphasis on capital allocation decisions. Analysts consider companies' investment strategy and valuation, financial leverage, dividend and share buyback policies, execution, compensation, related party transactions, and accounting practices. Corporate governance practices are only considered if they've had a demonstrated impact on shareholder value. Analysts assign one of three ratings: "Exemplary," "Standard," and "Poor." Analysts judge stewardship from an equity holder's perspective. Ratings are determined on an absolute basis. Most companies will receive a Standard rating, and this is the default rating in the absence of evidence that managers have made exceptionally strong or poor capital allocation decisions.

## Morningstar Margin of Safety and Star Rating Bands

\* Occasionally a stock's uncertainty will be too high for us to estimate, in which case we label it Extreme.

# Morningstar's Approach to Rating Corporate Credit

- Offers a proprietary measure of the credit quality of companies on our coverage list.
- Encapsulates our in-depth modeling and quantitative work in one letter grade.
- Allows investors to rank companies by each of the four underlying components of our credit ratings, including both analyst-driven and quantitative measures.
- Provides access to all the underlying forecasts that go into the rating, available through our institutional service.

## Purpose

The Morningstar Corporate Credit Rating measures the ability of a firm to satisfy its debt and debt-like obligations. The higher the rating, the less likely we think the company is to default on these obligations.

The Morningstar Corporate Credit Rating builds on the modeling expertise of our securities research team. For each company, we publish:

- Five years of detailed pro-forma financial statements
- Annual estimates of free cash flow
- Annual forecasts of return on invested capital
- Scenario analyses, including upside and downside cases
- Forecasts of leverage, coverage, and liquidity ratios for five years
- Estimates of off balance sheet liabilities

These forecasts are key inputs into the Morningstar Corporate Credit Rating and are available to subscribers at [select.morningstar.com](http://select.morningstar.com).

## Methodology

We feel it's important to perform credit analysis through different lenses—qualitative and quantitative, as well as fundamental and market-driven. We therefore evaluate each company in four broad categories.

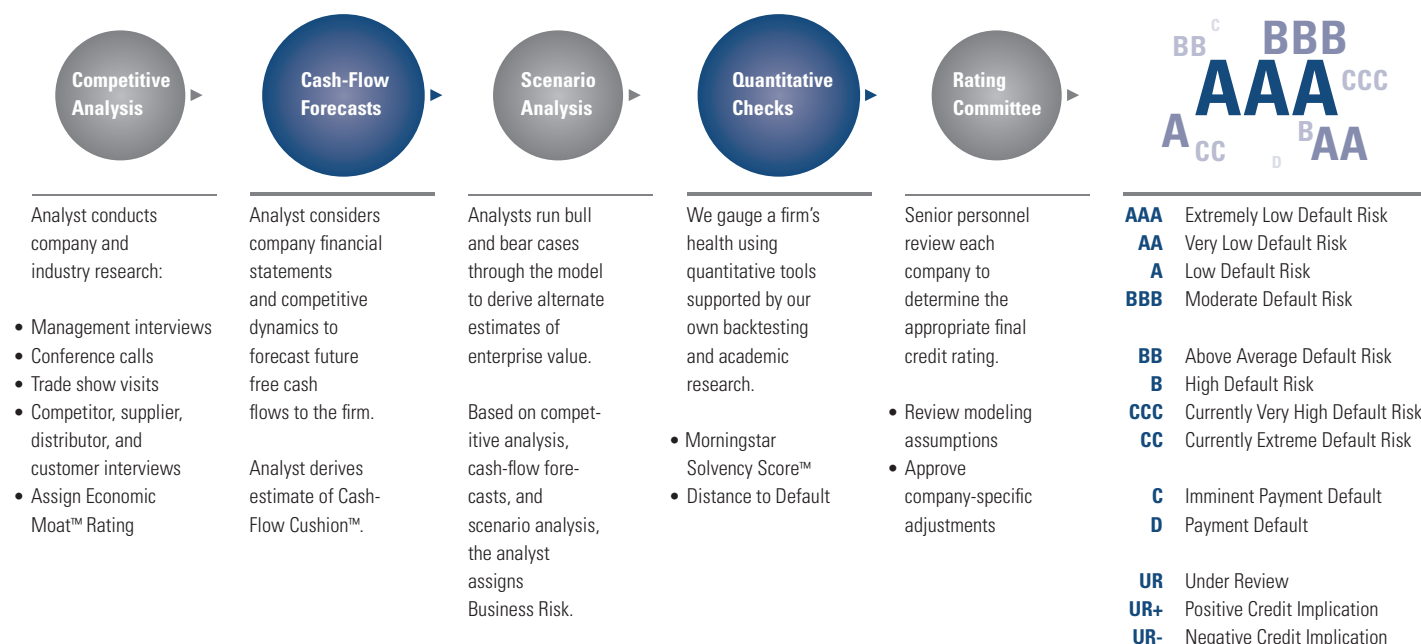

### Business Risk

Business Risk captures the fundamental uncertainty around a firm's business operations and the cash flow generated by those operations. Key components of the Business Risk rating include the Morningstar Economic Moat™ Rating and the Morningstar Uncertainty Rating.

### Cash Flow Cushion™

Morningstar's proprietary Cash Flow Cushion™ ratio is a fundamental indicator of a firm's future financial health. The measure reveals how many times a company's internal cash generation plus total excess liquid cash will cover its debt-like contractual commitments over the next five years. The Cash Flow Cushion acts as a predictor of financial distress, bringing to light potential refinancing, operational, and liquidity risks inherent to the firm.

## Morningstar Research Methodology for Determining Corporate Credit Ratings

## Morningstar's Approach to Rating Corporate Credit

The advantage of the Cash Flow Cushion ratio relative to other fundamental indicators of credit health is that the measure focuses on the future cash-generating performance of the firm derived from Morningstar's proprietary discounted cash flow model. By making standardized adjustments for certain expenses to reflect their debt-like characteristics, we can compare future projected free cash flows with debt-like cash commitments coming due in any particular year. The forward-looking nature of this metric allows us to anticipate changes in a firm's financial health and pinpoint periods where cash shortfalls are likely to occur.

### *Morningstar Solvency Score™*

The Morningstar Solvency Score™ is a quantitative score derived from both historical and forecasted financial ratios. It includes ratios that focus on liquidity (a company's ability to meet short term cash outflows), profitability (a company's ability to generate profit per unit of input), capital structure (how does the company finance its operations), and interest coverage (how much of profit is used up by interest payments).

### *Distance to Default*

Morningstar's quantitative Distance to Default measure ranks companies on the likelihood that they will tumble into financial distress. The measure is a linear model of the percentile of a firm's leverage (ratio of Enterprise Value to Market Value), the percentile of a firm's equity volatility relative to the rest of the universe and the interaction of these two percentiles. This is a proxy methodology for the common definition of Distance to Default which relies on option-based pricing models. The proxy has the benefit of increased breadth of coverage, greater simplicity of calculation, and more predictive power.

For each of these four categories, we assign a score, which we then translate into a descriptive rating along the scale of Very Good / Good / Fair / Poor / Very Poor.

### **Overall Credit Rating**

The four component ratings roll up into a single preliminary credit rating. To determine the final credit rating, a credit committee of at least five senior research personnel reviews each preliminary rating.

We review credit ratings on a regular basis and as events warrant. Any change in rating must be approved by the Credit Rating Committee.

### **Investor Access**

Morningstar Corporate Credit Ratings are available on Morningstar.com. Our credit research, including detailed cash-flow models that contain all of the components of the Morningstar Corporate Credit Rating, is available to subscribers at [select.morningstar.com](http://select.morningstar.com).

The Morningstar Rating for stocks identifies stocks trading at a discount or premium to their intrinsic value. Five-star stocks sell for the biggest risk-adjusted discount whereas one-star stocks trade at premiums to their intrinsic value. Based on a fundamentally focused methodology and a robust, standardized set of procedures and core valuation tools used by Morningstar's Equity Analysts, four key components drive the Morningstar Rating: 1. Assessment of the firm's economic moat, 2. Estimate of the stock's fair value, 3. Uncertainty around that fair value estimate and 4. Current market price. Further information on Morningstar's methodology is available from <http://global.morningstar.com/equitydisclosures>.

It has not been determined in advance whether and in what intervals this document will be updated. Analyst Note	1
Morningstar Analyst Forecasts	2

### Analyst Note 07 Nov 2014

Fortis reported CAD 0.06 in ongoing earnings per share for the third quarter, down from CAD 0.23 in the year-ago quarter. We are reaffirming our CAD 33 per share fair value estimate, 2014 EPS estimate, and narrow moat and stable moat trend ratings. On an adjusted basis, which included several nonrecurring items related to the company's UNS Energy acquisition, third-quarter earnings were CAD 0.33 compared with CAD 0.23 in the year-ago quarter.

During the quarter, the company completed several strategic objectives. The company closed on its \$4.3 billion UNS Energy acquisition, which completes the company's initial push into the U.S. market after purchasing Central Hudson Gas & Electric in June 2013. We are also encouraged by management's announcement in the quarter to seek strategic alternatives in 2015 for its no-moat Fortis Properties subsidiary as the company seeks to focus on regulated assets. Finally, management continues to progress on the company's CAD 9.0 billion capital program, which should drive 7% annual rate base growth. Additional opportunities at Tilbury Phase 1B and Woodfire could drive rate base growth up to 8.5%.

In the quarter, the acquisition of UNS Energy boosted earnings. Strength at the company's FortisAlberta and Caribbean segments were partially offset by a rate freeze at CH Energy. The upcoming regulatory calendar includes a rate case at CH Energy with rates effective in July 2015, a decision on British Columbia 2014-18 PBR and annual rates application at FortisAlberta.

The Morningstar Rating for stocks identifies stocks trading at a discount or premium to their intrinsic value. Five-star stocks sell for the biggest risk-adjusted discount whereas one-star stocks trade at premiums to their intrinsic value. Based on a fundamentally focused methodology and a robust, standardized set of procedures and core valuation tools used by Morningstar's Equity Analysts, four key components drive the Morningstar Rating: 1. Assessment of the firm's economic moat, 2. Estimate of the stock's fair value, 3. Uncertainty around that fair value estimate and 4. Current market price. Further information on Morningstar's methodology is available from <http://global.morningstar.com/equitydisclosures>.

It has not been determined in advance whether and in what intervals this document will be updated. No material interests are held by Morningstar or the Equity Analyst in the financial products that are the subject of the research reports or the product issuer. Analyst Note	1
Morningstar Analyst Forecasts	2

### Analyst Note 12 Nov 2014

We are reaffirming our CAD 33 per share fair value estimate, narrow economic moat, and stable moat trend ratings for Fortis after discussing the company's outlook with senior management during the Edison Electric Institute Financial Conference in Dallas, Texas.

Management has diversified its regulated operations through the acquisitions of UNS Energy this year and CH Energy in 2013, which now account for 40% of regulated rate base. Fortis is also currently seeking strategic alternatives for its no-moat Fortis Properties business, with bids expected in early 2015. Management likes its current portfolio mix, and we welcome the focus on its narrow moat regulated businesses.

Management has indicated that it will take a pause from acquisitions in 2015 and focus on organic growth opportunities and earning allowed returns at its regulated utilities. Longer-term management views the U.S. attractively and we continue to believe management will look for additional regulated U.S. opportunities. Management is not interested in merchant assets. We caution management's enthusiasm for acquisitions as we currently view regulated utilities 9% overvalued, not accounting for a likely 20% to 30% takeover premium.

Driving rate base growth opportunities are the company's current CAD 9.0 billion capital program, which should drive 7% annual rate base growth. Additional opportunities at Tilbury Phase 1B and Woodfire could drive rate base growth up to 8.5%. An upcoming rate case at CH Energy will be instrumental in earning allowed returns at the subsidiary, after an agreed-upon rate freeze.

### Profile

Fortis owns and operates utility transmission and distribution assets in Canada and the United States, serving more than 2.5 million electricity and gas customers. Regulated operations constitute more than 95% of total assets. The company has smaller stakes in electricity generation, several Caribbean utilities, and Canadian hotel and commercial real estate.

© 2014 Morningstar. All Rights Reserved. Unless stated otherwise, this report was prepared by the person(s) noted in their capacity as Equity Analysts employed by Morningstar, Inc., including its global affiliates. It has not been made available to the issuer prior to publication.

The Morningstar Rating for stocks identifies stocks trading at a discount or premium to their intrinsic value. Five-star stocks sell for the biggest risk-adjusted discount whereas one-star stocks trade at premiums to their intrinsic value. Based on a fundamentally focused methodology and a robust, standardized set of procedures and core valuation tools used by Morningstar's Equity Analysts, four key components drive the Morningstar Rating: 1. Assessment of the firm's economic moat, 2. Estimate of the stock's fair value, 3. Uncertainty around that fair value estimate and 4. Current market price. Further information on Morningstar's methodology is available from <http://global.morningstar.com/equitydisclosures>.

It has not been determined in advance whether and in what intervals this document will be updated. No material interests are held by Morningstar or the Equity Analyst in the financial products that are the subject of the research reports or the product issuer. Regarding Morningstar's conflicts of interest: 1) Equity Analysts are required to

comply with the CFA Institute's Code of Ethics and Standards of Professional Conduct and 2) Equity Analysts' compensation is derived from Morningstar's overall earning and consists of salary, bonus and in some cases restricted stock; however Equity Analysts are neither allowed to participate directly or try to influence Morningstar's investment management group's business arrangements nor allow employees from the investment management group to participate or influence the analysis or opinion prepared by them. Further information on Morningstar's conflict of interest policies is available from <http://global.morningstar.com/equitydisclosures>.

### Contents

Analyst Note	1
Morningstar Analyst Forecasts	2

### Analyst Note 19 Feb 2015

We are reaffirming our CAD 33 per share fair value estimate, narrow economic moat rating, and stable moat trend after Fortis reported full-year ongoing operating earnings of \$1.81 per share, compared with \$1.70 in the same year-ago period.

During the year, management closed its \$4.3 billion acquisition of UNS Energy, transitioning the company to a diversified North American utility with nearly 40% of total regulated assets in the U.S. We like that management has stated its intent to take a pause from further acquisitions, instead focusing on acquisition integration and its \$2.2 billion in attractive growth projects in 2015 alone. Management will also look to complete its divestiture of its no-moat Fortis Properties, which we view positively as allowing management to focus on its core regulated utilities.

Major capital projects at the Waneta hydroelectric generating facility and the Tilbury liquefied natural gas facility expansion should help boost rate base an annualized 6.5% through 2019. Additional investment opportunities at the Tilbury and Woodfire LNG projects could boost rate-base growth to 7.5% annually. New rates effective July 2015 at Fortis' Central Hudson subsidiary will be key to the unit earning allowed returns after a two-year rate freeze. We will also keep a watchful eye on FortisAlberta's upcoming capital tracker and cost of capital proceedings.

### Profile

Fortis owns and operates utility transmission and distribution assets in Canada and the United States, serving more than 2.5 million electricity and gas customers. Regulated operations constitute more than 95% of total assets. The company has smaller stakes in electricity generation, several Caribbean utilities, and Canadian hotel and commercial real estate.

The Morningstar Rating for stocks identifies stocks trading at a discount or premium to their intrinsic value.

Five-star stocks sell for the biggest risk-adjusted discount whereas one-star stocks trade at premiums to their intrinsic value. Based on a fundamentally focused methodology and a robust, standardized set of procedures and core valuation tools used by Morningstar's Equity Analysts, four key components drive the Morningstar Rating: 1. Assessment of the firm's economic moat, 2. Estimate of the stock's fair value, 3. Uncertainty around that fair value estimate and 4. Current market price. Further information on Morningstar's methodology is available from <http://global.morningstar.com/equitydisclosures>.

This Research Report is current as of the date on the report until it is replaced, updated or withdrawn. This report may be withdrawn or changed at any time as other information becomes available to us. This report will be updated if events affecting the report materially change.

### Investment Thesis 23 Feb 2015

Fortis manages electric and gas regulated utilities in Canada, the United States, and the Caribbean, resulting in stable operating results. Regulated operations make up more than 95% of the company's asset base; noncore generation and real estate holding operations account for the remainder. While we are less excited about the distractions of these noncore operations, management continues to focus on electric and natural gas distribution in North America.

Fortis' main regulated Canadian operations are in British Columbia, Alberta, and Newfoundland. These relatively low-risk operations result in stable earnings and fund the consistent dividend growth of the past four decades. Rate base additions should be significant through 2018, as the healthier Canadian economy drives usage and customer growth to support the firm's CAD 8.0 billion investment plans. This should allow the firm to increase its rate base at double-digit rates each year during this expansion period.

On a weighted average basis, Fortis' allowed return on equity in its Canadian service territories is near 9.25%. While this return is lower than that typically granted to comparable U.S. utilities, it seems reasonable, given the low-risk nature of Fortis' transmission and delivery operations.

Fortis' management has long expressed interest in expanding its operations through U.S. acquisitions. In addition to its 2012 \$1.5 billion cash and debt bid for CH Energy, Fortis acquired Tucson, AZ-based UNS Energy for \$4.3 billion in cash and debt. After the transaction's close, about one third of Fortis' operating earnings now come from U.S. regulated utilities. Management continues to be outspoken about its desire for further U.S. transactions, which increases shareholder risk that it could overpay for future acquisitions.

### Profile

Fortis owns and operates utility transmission and distribution assets in Canada and the United States, serving more than 2.5 million electricity and gas customers. Regulated operations constitute more than 95% of total assets. The company has smaller stakes in electricity generation, several Caribbean utilities, and Canadian hotel and commercial real estate.

## Morningstar Analysis

### Valuation, Growth and Profitability 23 Feb 2015

We are raising our fair value estimate to CAD 37 per share from CAD 33 per share after recalibrating our capital cost assumptions to better align with the returns equity and debt investors are likely to demand over the long run. We now assume a 7.5% cost of equity, down from 8%. This is lower than the 9% rate of return we expect investors will demand of a diversified equity portfolio. Our pre-tax cost of debt assumption falls to 5.8% from 6.3% as we incorporate a normalized long-term real rate environment and normalized credit spreads. A 2.25% long-term inflation outlook underpins our capital cost assumptions.

We forecast 6% annual earnings growth through 2018, accounting for normalized weather conditions and excluding unannounced acquisitions.

We assume 1.5% annual energy use growth at the Canadian utilities and consistent allowed returns on equity. We forecast 1.0% annual energy growth at the U.S. utilities. Based on management's guidance, we forecast total investments of CAD 6.5 billion at the utilities through 2018, leading to 6% annualized rate base growth.

We use an 7.5% cost of equity to arrive at a 6.1% weighted average cost of capital in our discounted cash flow valuation.

### Scenario Analysis

Our uncertainty rating for Fortis is low. In our bull-case scenario, we assume rate case outcomes are 25% higher and operating expenses are 5% less than in our base-case scenario, increasing our fair value estimate \$5 per share. In our bear-case scenario, a similar decline in rate case outcomes and increase in operating expense results in a \$5 per share decrease in our fair value estimate.

If we assume a 100-basis-point decrease in allowed returns on equity at the Canadian utilities in 2014 and beyond, our

fair value estimate would drop CAD 2 per share. Better-than-expected allowed returns on equity drive similar upside results.

A 50-basis-point change in our cost of equity assumption changes our fair value estimate by CAD 3 per share.

### Economic Moat

Service territory monopolies and efficient scale advantages are the primary sources of an economic moat for regulated utilities such as Fortis. Regulators typically grant regulated utilities exclusive rights to charge customers rates that allow the utilities to earn a fair return on and return of the capital they invest to build, operate, and maintain their distribution networks. In exchange for regulated utilities' service territory monopolies, regulators set returns at levels that aim to minimize customer costs while offering fair returns for capital providers.

This implicit contract between regulators and capital providers should, on balance, allow regulated utilities to achieve at least their costs of capital, though observable returns might vary in the short run based on demand trends, investment cycles, operating costs, and access to financing. Intuitively, utilities should have an economic moat based on efficient scale, but in some cases regulation offsets this advantage, preventing excess returns on capital. The risk of adverse regulatory decisions precludes regulated utilities from earning wide economic moat ratings. However, the threat of material value destruction is low, and normalized returns exceed costs of capital in most cases, leaving us comfortable assigning narrow moats to many regulated utilities.

### Moat Trend

We assign Fortis a stable moat because of its monopoly position and stable regulatory environment, which should continue to allow the firm to earn its cost of capital. Fortis has a history of constructive relationships across its North

# Fortis Inc FTS (TSE) ★★

Price/Fair Value Morningstar data as of Feb 20, 2015

American presence, and we do not expect the regulatory relationship to change. The bulk of its capital plan is toward the moaty regulated assets, which should strengthen Fortis' narrow moat. The regulatory framework that caps revenue and returns prevents the firm from attaining a wide moat, as with all regulated utilities we cover.

For regulated utilities like Fortis, our moat trends consider changes in the regulatory environment, near-term investment requirements and growth opportunities, energy demand trends, and management's strategic direction. In assessing the changing regulatory environment, we consider the level of automatic rate mechanisms, allowed returns on equity versus interest rates, fuel cost recovery mechanisms, and the history of regulatory relations. Using these factors, we assess whether fundamental changes will give a utility a better opportunity to earn or overearn its cost of capital in the near term, or whether fundamental changes will make it more difficult for a utility to earn its cost of capital.

## Bulls Say/Bears Say

### Bulls Say

- ▶ Fortis operates a stable business profile of regulated utilities, offering a strong base for consistent earnings and dividend growth.
- ▶ With an aggressive capital expenditure plan in the coming years, we forecast Fortis' rate base to grow 6% annually.
- ▶ Fortis has paid consecutive quarterly dividends for four decades and raised the dividend faster than most of its peers in recent years.

### Bears Say

- ▶ The Canadian regulatory environment offers lower allowed returns than in the U.S.
- ▶ Management's zeal for U.S. diversification increases the risk that the company will overpay for acquisitions.
- ▶ Fortis operates noncore hotel and commercial real estate assets, potentially distracting management from the core regulated operations.

### Financial Health & Capital Structure

Through 2018, Fortis has CAD 8.0 billion of planned capital expenditures, which will require it to access the debt and equity capital markets. It has manageable debt maturities through 2018. The company issued significant equity in 2013 to help finance its capital expenditure plan and has issued additional equity in 2014 to accommodate employee stock-purchase plans, support its capital expenditure plan, and pay for its proposed UNS Energy acquisition.

With a 56% debt/capital ratio and 3.5 times interest coverage, Fortis' financial health looks reasonably sound, particularly in light of its stable, low-risk business model. We expect the company to maintain a capital structure in line with regulatory targets throughout its current investment cycle.

### Enterprise Risk

Fortis' key risk to future earnings is regulatory uncertainty. The company faces regulatory risks that create uncertainties around costs and allowed returns, especially given the significant capital expenditure plan through 2018. Fortis is also exposed to political and economic instability at its Caribbean operations. With an eye toward acquisitions, the company risks overpaying for regulated U.S. assets and must be mindful of the strategic benefits. As with all regulated utilities, Fortis faces the risk of an inflationary environment that would raise borrowing costs and make other investments more attractive for income-seeking investors.

### Management 23 Feb 2015

Overall, we think Fortis' management team has been fair stewards of shareholder capital. Management has earned at or near its allowed returns and managed regulatory relationships well, particularly in Canada. What concerns us the most, and would cause us to revisit our view of the management team, is management's enthusiasm for U.S. acquisitions leading to further pricey acquisitions, much like the bid for UNS Energy, in our view. We think Fortis' shareholders would be better off if management reinvested its capital to fund growth investments or returned it to shareholders through share repurchases or a higher dividend payout ratio.

Stanley Marshall had been president and CEO since 1995, leading a group of experienced utility executives. Marshall recently relinquished his role of president to Barry Perry, who plans to replace Marshall as CEO when Marshall retires in December. We think Perry is a suitable replacement, given his previous experience as Fortis' CFO and as CFO of Newfoundland Power.

Total direct compensation is in line with Fortis' industry group. Management's total compensation comprises base salary, annual incentives, stock options, and performance stock units, with 75% of total compensation at risk. We do not like that annual cash incentives are based on earnings per share targets, as EPS can be manipulated and may not be an indication of shareholder value creation. Management has a significant ownership stake, which we believe aligns shareholder and management interests.

## Analyst Notes

### Fortis Focuses on Asset Integration and Capital Plan in 2015 19 Feb 2015

We are reaffirming our CAD 33 per share fair value estimate, narrow economic moat rating, and stable moat trend after Fortis reported full-year ongoing operating earnings of \$1.81 per share, compared with \$1.70 in the same year-ago period.

During the year, management closed its \$4.3 billion acquisition of UNS Energy, transitioning the company to a diversified North American utility with nearly 40% of total regulated assets in the U.S. We like that management has stated its intent to take a pause from further acquisitions, instead focusing on acquisition integration and its \$2.2 billion in attractive growth projects in 2015 alone. Management will also look to complete its divestiture of its no-moat Fortis Properties, which we view positively as allowing management to focus on its core regulated utilities.

Major capital projects at the Waneta hydroelectric generating facility and the Tilbury liquefied natural gas facility expansion should help boost rate base an annualized 6.5% through 2019. Additional investment opportunities at the Tilbury and Woodfire LNG projects could boost rate-base growth to 7.5% annually. New rates effective July 2015 at Fortis' Central Hudson subsidiary will be key to the unit earning allowed returns after a two-year rate freeze. We will also keep a watchful eye on FortisAlberta's upcoming capital tracker and cost of capital proceedings.

### Management Meeting: Attractive Rate Base Growth Opportunities for Fortis 12 Nov 2014

We are reaffirming our CAD 33 per share fair value estimate, narrow economic moat, and stable moat trend ratings for Fortis after discussing the company's outlook with senior management during the Edison Electric Institute Financial

Conference in Dallas, Texas.

Management has diversified its regulated operations through the acquisitions of UNS Energy this year and CH Energy in 2013, which now account for 40% of regulated rate base. Fortis is also currently seeking strategic alternatives for its no-moat Fortis Properties business, with bids expected in early 2015. Management likes its current portfolio mix, and we welcome the focus on its narrow moat regulated businesses.

Management has indicated that it will take a pause from acquisitions in 2015 and focus on organic growth opportunities and earning allowed returns at its regulated utilities. Longer-term management views the U.S. attractively and we continue to believe management will look for additional regulated U.S. opportunities. Management is not interested in merchant assets. We caution management's enthusiasm for acquisitions as we currently view regulated utilities 9% overvalued, not accounting for a likely 20% to 30% takeover premium.

Driving rate base growth opportunities are the company's current CAD 9.0 billion capital program, which should drive 7% annual rate base growth. Additional opportunities at Tilbury Phase 1B and Woodfire could drive rate base growth up to 8.5%. An upcoming rate case at CH Energy will be instrumental in earning allowed returns at the subsidiary, after an agreed-upon rate freeze.

### Fortis Regulated Business Additions Drive Earnings Growth 07 Nov 2014

Fortis reported CAD 0.06 in ongoing earnings per share for the third quarter, down from CAD 0.23 in the year-ago quarter. We are reaffirming our CAD 33 per share fair value estimate, 2014 EPS estimate, and narrow moat and stable moat trend ratings. On an adjusted basis, which included

several nonrecurring items related to the company's UNS Energy acquisition, third-quarter earnings were CAD 0.33 compared with CAD 0.23 in the year-ago quarter.

During the quarter, the company completed several strategic objectives. The company closed on its \$4.3 billion UNS Energy acquisition, which completes the company's initial push into the U.S. market after purchasing Central Hudson Gas & Electric in June 2013. We are also encouraged by management's announcement in the quarter to seek strategic alternatives in 2015 for its no-moat Fortis Properties subsidiary as the company seeks to focus on regulated assets. Finally, management continues to progress on the company's CAD 9.0 billion capital program, which should drive 7% annual rate base growth. Additional opportunities at Tilbury Phase 1B and Woodfire could drive rate base growth up to 8.5%.

In the quarter, the acquisition of UNS Energy boosted earnings. Strength at the company's FortisAlberta and Caribbean segments were partially offset by a rate freeze at CH Energy. The upcoming regulatory calendar includes a rate case at CH Energy with rates effective in July 2015, a decision on British Columbia 2014-18 PBR and annual rates application at FortisAlberta.

# Research Methodology for Valuing Companies

## Components of Our Methodology

- ▶ Economic Moat™ Rating
- ▶ Moat Trend™ Rating
- ▶ Moat Valuation
- ▶ Three-Stage Discounted Cash Flow
- ▶ Weighted Average Cost of Capital
- ▶ Fair Value Estimate
- ▶ Scenario Analysis
- ▶ Uncertainty Ratings
- ▶ Margin of Safety
- ▶ Consider Buying/Selling
- ▶ Stewardship Rating

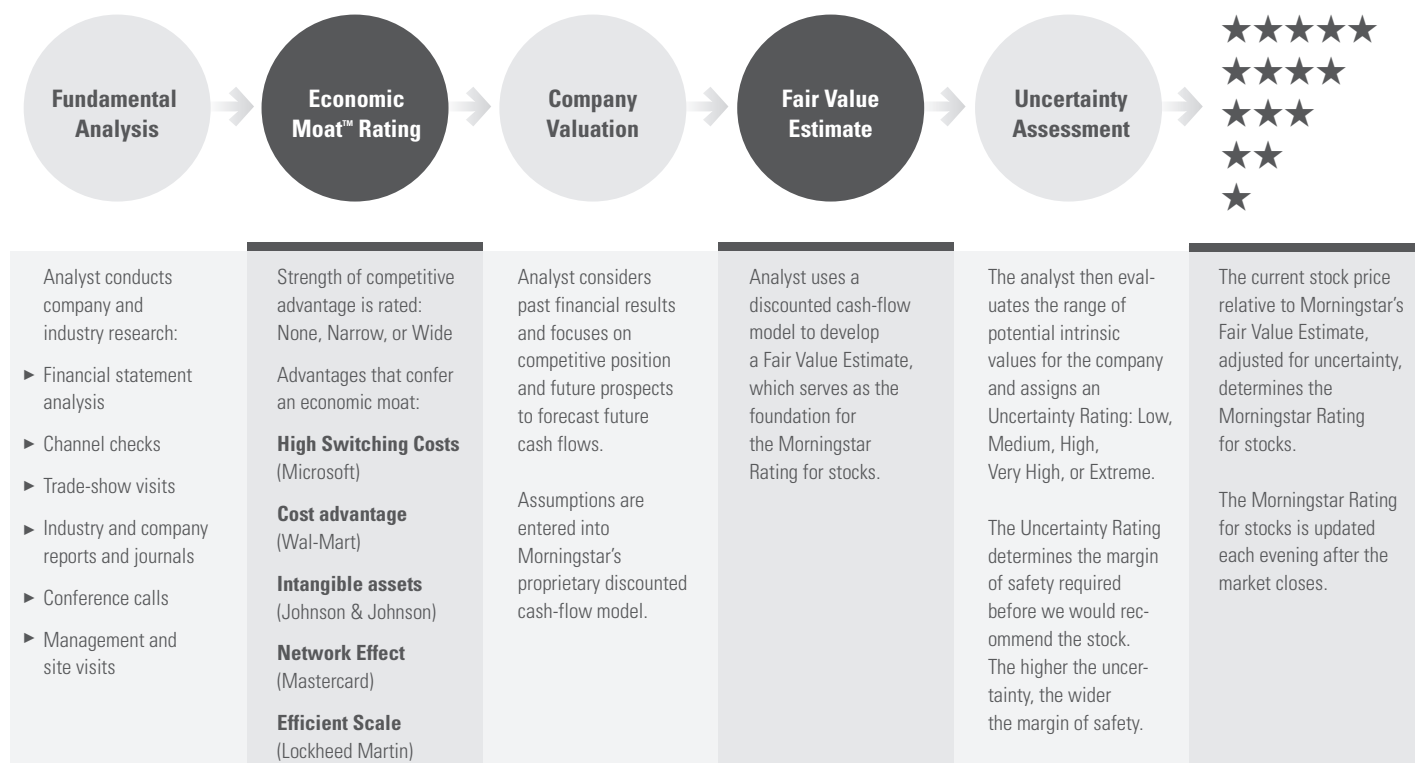

The Morningstar Rating for stocks identifies companies trading at a discount or premium to our analysts' assessment of their fair value. A number of components drive this rating: (1) our assessment of the firm's economic moat, (2) our estimate of the stock's intrinsic value based on a discounted cash-flow model, (3) the margin of safety bands we apply to our Fair Value Estimate, and (4) the current stock price relative to our fair value estimate.

The concept of the Morningstar Economic Moat™ Rating plays a vital role not only in our qualitative assessment of a firm's investment potential, but also in our valuation process. We assign three moat ratings—none, narrow, or wide—as well as the Morningstar Moat Trend™ Rating—positive, stable, or negative—to each company we cover. There are two major requirements for firms to earn either a narrow or wide moat rating: (1) the prospect of earning above-average returns on capital; and (2) some competitive edge that prevents these returns from quickly eroding. The assumptions we make about a firm's moat determine the length of “economic outperformance” that we assume in the latter stages

of our valuation model. We also quantify the value of each firm's moat, which represents the difference between a firm's enterprise value and the value of the firm if no future net investment were to occur. Said differently, moat value identifies the value generated by the firm as a result of any future net new investment. Our Moat Trend Rating reflects our assessment of whether each firm's competitive advantage is either getting stronger or weaker, since we think of moats as dynamic, rather than static.

At the heart of our valuation system is a detailed projection of a company's future cash flows. The first stage of our three-stage discounted cash flow model can last from 5 to 10 years and contains numerous detailed assumptions about various financial and operating items. The second stage of our model—where a firm's return on new invested capital (RONIC) and earnings growth rate implicitly fade until the perpetuity year—can last anywhere from 0 years (for no-moat firms) to 20 years (for wide-moat companies). In our third stage, we assume the firm's RONIC equals its weighted average cost of capital, and we calculate a continuing value using a standard

\* Please contact a sales representative for more information.

perpetuity formula. In deciding on the rate at which to discount future cash flows, we ignore stock-price volatility. Instead, we rely on a system that measures the estimated volatility of a firm's underlying future free cash flows, taking into account fundamental factors such as the diversity of revenue sources and the firm's fixed cost structure.

We also employ a number of other tools to augment our valuation process, including scenario analysis, where we assess the likelihood and performance of a business under different economic and firm-specific conditions. Our analysts typically model three to five scenarios for each company we cover, stress-testing the model and examining the distribution of resulting fair values.

The Morningstar Uncertainty Rating captures the range of these potential fair values, based on an assessment of a company's future sales range, the firm's operating and financial leverage, and any other contingent events that may impact the business. Our analysts use this range to assign an appropriate margin of safety—or the discount/premium

to a fair value we apply in setting our consider buying/consider selling prices. Firms trading below our consider-buying prices receive our highest rating of five stars, whereas firms trading above our consider-selling prices receive our lowest rating of one star.

Our corporate Stewardship Rating represents our assessment of management's stewardship of shareholder capital, with particular emphasis on capital allocation decisions. Analysts consider companies' investment strategy and valuation, financial leverage, dividend and share buyback policies, execution, compensation, related party transactions, and accounting practices. Corporate governance practices are only considered if they've had a demonstrated impact on shareholder value. Analysts assign one of three ratings: "Exemplary," "Standard," and "Poor." Analysts judge stewardship from an equity holder's perspective. Ratings are determined on an absolute basis. Most companies will receive a Standard rating, and this is the default rating in the absence of evidence that managers have made exceptionally strong or poor capital allocation decisions.

## Morningstar Margin of Safety and Star Rating Bands

\* Occasionally a stock's uncertainty will be too high for us to estimate, in which case we label it Extreme.

# Morningstar's Approach to Rating Corporate Credit

- Offers a proprietary measure of the credit quality of companies on our coverage list.
- Encapsulates our in-depth modeling and quantitative work in one letter grade.
- Allows investors to rank companies by each of the four underlying components of our credit ratings, including both analyst-driven and quantitative measures.
- Provides access to all the underlying forecasts that go into the rating, available through our institutional service.

## Purpose

The Morningstar Corporate Credit Rating measures the ability of a firm to satisfy its debt and debt-like obligations. The higher the rating, the less likely we think the company is to default on these obligations.

The Morningstar Corporate Credit Rating builds on the modeling expertise of our securities research team. For each company, we publish:

- Five years of detailed pro-forma financial statements
- Annual estimates of free cash flow
- Annual forecasts of return on invested capital
- Scenario analyses, including upside and downside cases
- Forecasts of leverage, coverage, and liquidity ratios for five years
- Estimates of off balance sheet liabilities

These forecasts are key inputs into the Morningstar Corporate Credit Rating and are available to subscribers at [select.morningstar.com](http://select.morningstar.com).

## Methodology

We feel it's important to perform credit analysis through different lenses—qualitative and quantitative, as well as fundamental and market-driven. We therefore evaluate each company in four broad categories.

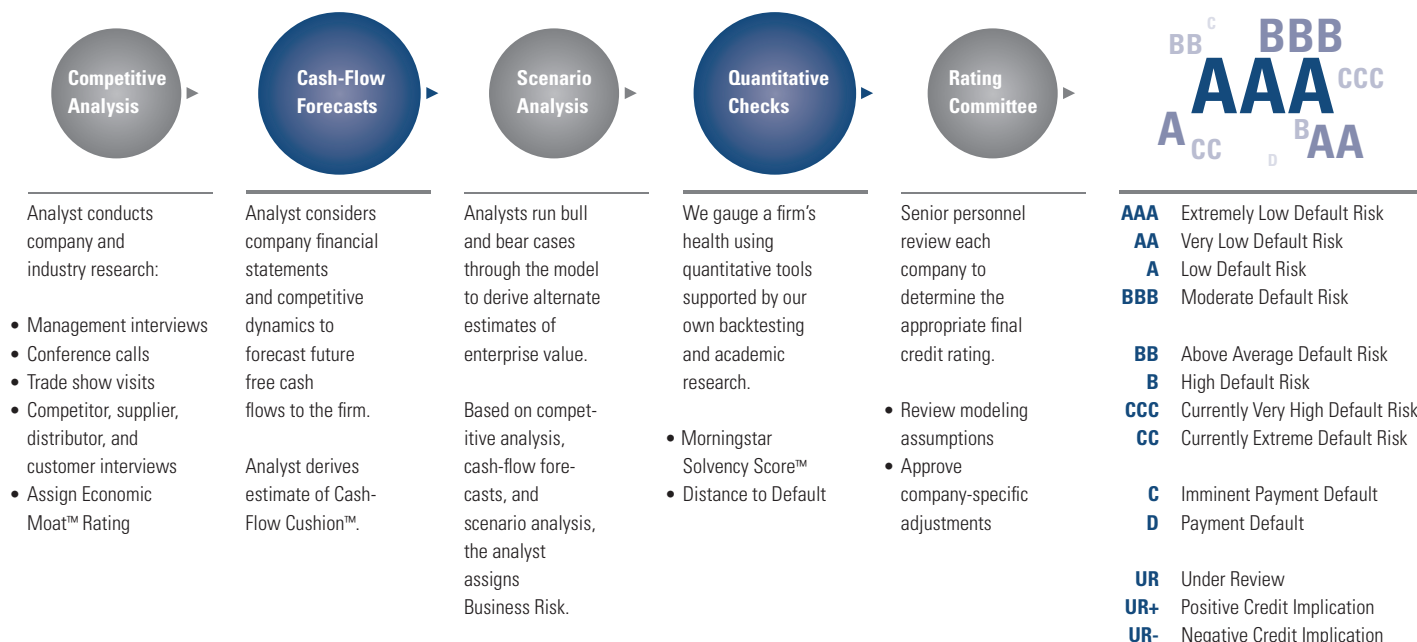

### Business Risk

Business Risk captures the fundamental uncertainty around a firm's business operations and the cash flow generated by those operations. Key components of the Business Risk rating include the Morningstar Economic Moat™ Rating and the Morningstar Uncertainty Rating.

### Cash Flow Cushion™

Morningstar's proprietary Cash Flow Cushion™ ratio is a fundamental indicator of a firm's future financial health. The measure reveals how many times a company's internal cash generation plus total excess liquid cash will cover its debt-like contractual commitments over the next five years. The Cash Flow Cushion acts as a predictor of financial distress, bringing to light potential refinancing, operational, and liquidity risks inherent to the firm.

## Morningstar Research Methodology for Determining Corporate Credit Ratings

# Morningstar's Approach to Rating Corporate Credit

The advantage of the Cash Flow Cushion ratio relative to other fundamental indicators of credit health is that the measure focuses on the future cash-generating performance of the firm derived from Morningstar's proprietary discounted cash flow model. By making standardized adjustments for certain expenses to reflect their debt-like characteristics, we can compare future projected free cash flows with debt-like cash commitments coming due in any particular year. The forward-looking nature of this metric allows us to anticipate changes in a firm's financial health and pinpoint periods where cash shortfalls are likely to occur.

## *Morningstar Solvency Score™*

The Morningstar Solvency Score™ is a quantitative score derived from both historical and forecasted financial ratios. It includes ratios that focus on liquidity (a company's ability to meet short term cash outflows), profitability (a company's ability to generate profit per unit of input), capital structure (how does the company finance its operations), and interest coverage (how much of profit is used up by interest payments).

## *Distance to Default*

Morningstar's quantitative Distance to Default measure ranks companies on the likelihood that they will tumble into financial distress. The measure is a linear model of the percentile of a firm's leverage (ratio of Enterprise Value to Market Value), the percentile of a firm's equity volatility relative to the rest of the universe and the interaction of these two percentiles. This is a proxy methodology for the common definition of Distance to Default which relies on option-based pricing models. The proxy has the benefit of increased breadth of coverage, greater simplicity of calculation, and more predictive power.

For each of these four categories, we assign a score, which we then translate into a descriptive rating along the scale of Very Good / Good / Fair / Poor / Very Poor.

## **Overall Credit Rating**

The four component ratings roll up into a single preliminary credit rating. To determine the final credit rating, a credit committee of at least five senior research personnel reviews each preliminary rating.

We review credit ratings on a regular basis and as events warrant. Any change in rating must be approved by the Credit Rating Committee.

## **Investor Access**

Morningstar Corporate Credit Ratings are available on Morningstar.com. Our credit research, including detailed cash-flow models that contain all of the components of the Morningstar Corporate Credit Rating, is available to subscribers at [select.morningstar.com](http://select.morningstar.com).

The Morningstar Rating for stocks identifies stocks trading at a discount or premium to their intrinsic value.

Five-star stocks sell for the biggest risk-adjusted discount whereas one-star stocks trade at premiums to their intrinsic value. Based on a fundamentally focused methodology and a robust, standardized set of procedures and core valuation tools used by Morningstar's Equity Analysts, four key components drive the Morningstar Rating: 1. Assessment of the firm's economic moat, 2. Estimate of the stock's fair value, 3. Uncertainty around that fair value estimate and 4. Current market price. Further information on Morningstar's methodology is available from <http://global.morningstar.com/equitydisclosures>.

This Research Report is current as of the date on the report until it is replaced, updated or withdrawn. This report may be withdrawn or changed at any time as other information becomes available to us. This report will be updated if events affecting the report materially change.

### Investment Thesis 07 Apr 2015

Fortis manages electric and gas regulated utilities in Canada, the United States, and the Caribbean, resulting in stable operating results. Regulated operations make up more than 95% of the company's asset base; noncore generation and real estate holding operations account for the remainder. While we are less excited about the distractions of these noncore operations, management continues to focus on electric and natural gas distribution in North America. Fortis is currently seeking strategic alternatives for its no-moat Fortis Properties business.

Fortis' main regulated Canadian operations are in British Columbia, Alberta, and Newfoundland. These relatively low-risk operations result in stable earnings and fund the consistent dividend growth of the past four decades. Rate base additions should be significant through 2018, as the healthier Canadian economy drives usage and customer growth to support the firm's CAD 9.0 billion investment plans. This should allow the firm to increase its rate base a projected 7% annually during this expansion period.

On a weighted-average basis, Fortis' allowed return on equity in its Canadian service territories is near 9.25%. While this return is lower than that typically granted to comparable U.S. utilities, it seems reasonable, given the low-risk nature of Fortis' transmission and delivery operations.

Fortis' management has long expressed interest in expanding its operations through U.S. acquisitions. In addition to its 2012 \$1.5 billion cash and debt bid for CH Energy, Fortis recently acquired Tucson, AZ-based UNS Energy for \$4.3 billion in cash and debt. After the transaction's close, about 40% of Fortis' operating assets are U.S. regulated utilities. Management has indicated that it will take a pause from acquisitions in 2015 and focus on organic growth opportunities and earning allowed returns at its regulated utilities. Longer-term, management views the U.S. attractively and we continue to believe they will look for additional regulated U.S. opportunities.

### Profile

Fortis owns and operates utility transmission and distribution assets in Canada and the United States, serving more than 2.5 million electricity and gas customers. Regulated operations constitute more than 95% of total assets. The company has smaller stakes in electricity generation, several Caribbean utilities, and Canadian hotel and commercial real estate.

## Morningstar Analysis

### Valuation, Growth and Profitability 07 Apr 2015

We are maintaining our CAD 37 per share fair value estimate after incorporating full-year results that were in line with our expectations. We forecast 6% annual earnings growth through 2018, accounting for normalized weather conditions and excluding unannounced acquisitions.

We assume 1.5% annual energy use growth at the Canadian utilities and consistent allowed returns on equity. We forecast 1.0% annual energy growth at the U.S. utilities. Based on management's guidance, we forecast total investments of CAD 8.5 billion at the utilities through 2019, leading to 7% annualized rate base growth.

We use an 7.5% cost of equity to arrive at a 6.1% weighted average cost of capital in our discounted cash flow valuation.

### Scenario Analysis

Our uncertainty rating for Fortis is low. In our bull-case scenario, we assume rate case outcomes are 25% higher and operating expenses are 5% less than in our base-case scenario, increasing our fair value estimate \$5 per share. In our bear-case scenario, a similar decline in rate case outcomes and increase in operating expense results in a \$5 per share decrease in our fair value estimate.

If we assume a 100-basis-point decrease in allowed returns on equity at the Canadian utilities in 2015 and beyond, our fair value estimate would drop CAD 2 per share. Better-than-expected allowed returns on equity drive similar upside results.

A 50-basis-point change in our cost of equity assumption changes our fair value estimate by CAD 3 per share.

### Economic Moat

Service territory monopolies and efficient scale advantages are the primary sources of an economic moat for regulated

utilities such as Fortis. Regulators typically grant regulated utilities exclusive rights to charge customers rates that allow the utilities to earn a fair return on and return of the capital they invest to build, operate, and maintain their distribution networks. In exchange for regulated utilities' service territory monopolies, regulators set returns at levels that aim to minimize customer costs while offering fair returns for capital providers.

This implicit contract between regulators and capital providers should, on balance, allow regulated utilities to achieve at least their costs of capital, though observable returns might vary in the short run based on demand trends, investment cycles, operating costs, and access to financing. Intuitively, utilities should have an economic moat based on efficient scale, but in some cases regulation offsets this advantage, preventing excess returns on capital. The risk of adverse regulatory decisions precludes regulated utilities from earning wide economic moat ratings. However, the threat of material value destruction is low, and normalized returns exceed costs of capital in most cases, leaving us comfortable assigning narrow moats to many regulated utilities.

### Moat Trend

We assign Fortis a stable moat because of its monopoly position and stable regulatory environment, which should continue to allow the firm to earn its cost of capital. Fortis has a history of constructive relationships across its North American presence, and we do not expect the regulatory relationship to change. The bulk of its capital plan is toward the moaty regulated assets, which should strengthen Fortis' narrow moat. The regulatory framework that caps revenue and returns prevents the firm from attaining a wide moat, as with all regulated utilities we cover.

For regulated utilities like Fortis, our moat trends consider changes in the regulatory environment, near-term investment requirements and growth opportunities, energy

demand trends, and management's strategic direction. In assessing the changing regulatory environment, we consider the level of automatic rate mechanisms, allowed returns on equity versus interest rates, fuel cost recovery mechanisms, and the history of regulatory relations. Using these factors, we assess whether fundamental changes will give a utility a better opportunity to earn or overearn its cost of capital in the near term, or whether fundamental changes will make it more difficult for a utility to earn its cost of capital.

## Bulls Say/Bears Say

### Bulls Say

- ▶ Fortis operates a stable business profile of regulated utilities, offering a strong base for consistent earnings and dividend growth.
- ▶ With an aggressive capital expenditure plan in the coming years, we forecast Fortis' rate base to grow 7% annually.
- ▶ Fortis has paid consecutive quarterly dividends for four decades and raised the dividend faster than most of its peers in recent years.

### Bears Say

- ▶ The Canadian regulatory environment offers lower allowed returns than in the U.S.
- ▶ Management's zeal for U.S. diversification increases the risk that the company will overpay for acquisitions.
- ▶ Fortis operates noncore hotel and commercial real estate assets, potentially distracting management from the core regulated operations.

Asset Adjusted Borrowings (Repayment)	—	—
Sum of Cash, 5-Year Cash Generation, Revolver and Adjustments	1,773	36.9
Sum of 5-Year Cash Commitments	-4,804	—

## Financial Health

Through 2019, Fortis has CAD 9.0 billion of planned capital expenditures, which will require it to access the debt and equity capital markets. It has manageable debt maturities through 2018. The company issued significant equity in 2013 and 2014 to help finance employee stock-purchase plans, support its capital expenditure plan, and pay for its U.S. acquisitions.

With a 57% debt/capital ratio and 3.5 times interest coverage, Fortis' financial health looks reasonably sound, particularly in light of its stable, low-risk business model. We expect the company to maintain a capital structure in line with regulatory targets throughout its current investment cycle.

## Enterprise Risk

Fortis' key risk to future earnings is regulatory uncertainty. The company faces regulatory risks that create uncertainties around costs and allowed returns, especially given the significant capital expenditure plan through 2019. Fortis is also exposed to political and economic instability at its Caribbean operations. With an eye toward acquisitions, the company risks overpaying for regulated U.S. assets and must be mindful of the strategic benefits. As with all regulated utilities, Fortis faces the risk of an inflationary environment that would raise borrowing costs and make other investments more attractive for income-seeking investors.

### Management

23 Feb 2015

Overall, we think Fortis' management team has been fair stewards of shareholder capital. Management has earned at or near its allowed returns and managed regulatory relationships well, particularly in Canada. What concerns us the most, and would cause us to revisit our view of the management team, is management's enthusiasm for U.S. acquisitions leading to further pricey acquisitions, much like the bid for UNS Energy, in our view. We think Fortis' shareholders would be better off if management reinvested its capital to fund growth investments or returned it to shareholders through share repurchases or a higher dividend payout ratio.

Stanley Marshall had been president and CEO since 1995, leading a group of experienced utility executives. Marshall recently relinquished his role of president to Barry Perry, who plans to replace Marshall as CEO when Marshall retires in December. We think Perry is a suitable replacement, given his previous experience as Fortis' CFO and as CFO of Newfoundland Power.

Total direct compensation is in line with Fortis' industry group. Management's total compensation comprises base salary, annual incentives, stock options, and performance stock units, with 75% of total compensation at risk. We do not like that annual cash incentives are based on earnings per share targets, as EPS can be manipulated and may not be an indication of shareholder value creation. Management has a significant ownership stake, which we believe aligns shareholder and management interests.

## Analyst Notes

### Fortis Focuses on Asset Integration and Capital Plan in 2015 19 Feb 2015

We are reaffirming our CAD 33 per share fair value estimate, narrow economic moat rating, and stable moat trend after Fortis reported full-year ongoing operating earnings of \$1.81 per share, compared with \$1.70 in the same year-ago period.

During the year, management closed its \$4.3 billion acquisition of UNS Energy, transitioning the company to a diversified North American utility with nearly 40% of total regulated assets in the U.S. We like that management has stated its intent to take a pause from further acquisitions, instead focusing on acquisition integration and its \$2.2 billion in attractive growth projects in 2015 alone. Management will also look to complete its divestiture of its no-moat Fortis Properties, which we view positively as allowing management to focus on its core regulated utilities.

Major capital projects at the Waneta hydroelectric generating facility and the Tilbury liquefied natural gas facility expansion should help boost rate base an annualized 6.5% through 2019. Additional investment opportunities at the Tilbury and Woodfire LNG projects could boost rate-base growth to 7.5% annually. New rates effective July 2015 at Fortis' Central Hudson subsidiary will be key to the unit earning allowed returns after a two-year rate freeze. We will also keep a watchful eye on FortisAlberta's upcoming capital tracker and cost of capital proceedings.

### Management Meeting: Attractive Rate Base Growth Opportunities for Fortis 12 Nov 2014

We are reaffirming our CAD 33 per share fair value estimate, narrow economic moat, and stable moat trend ratings for Fortis after discussing the company's outlook with senior management during the Edison Electric Institute Financial

Conference in Dallas, Texas.

Management has diversified its regulated operations through the acquisitions of UNS Energy this year and CH Energy in 2013, which now account for 40% of regulated rate base. Fortis is also currently seeking strategic alternatives for its no-moat Fortis Properties business, with bids expected in early 2015. Management likes its current portfolio mix, and we welcome the focus on its narrow moat regulated businesses.

Management has indicated that it will take a pause from acquisitions in 2015 and focus on organic growth opportunities and earning allowed returns at its regulated utilities. Longer-term management views the U.S. attractively and we continue to believe management will look for additional regulated U.S. opportunities. Management is not interested in merchant assets. We caution management's enthusiasm for acquisitions as we currently view regulated utilities 9% overvalued, not accounting for a likely 20% to 30% takeover premium.

Driving rate base growth opportunities are the company's current CAD 9.0 billion capital program, which should drive 7% annual rate base growth. Additional opportunities at Tilbury Phase 1B and Woodfire could drive rate base growth up to 8.5%. An upcoming rate case at CH Energy will be instrumental in earning allowed returns at the subsidiary, after an agreed-upon rate freeze.

### Fortis Regulated Business Additions Drive Earnings Growth 07 Nov 2014

Fortis reported CAD 0.06 in ongoing earnings per share for the third quarter, down from CAD 0.23 in the year-ago quarter. We are reaffirming our CAD 33 per share fair value estimate, 2014 EPS estimate, and narrow moat and stable moat trend ratings. On an adjusted basis, which included

### Analyst Notes

several nonrecurring items related to the company's UNS Energy acquisition, third-quarter earnings were CAD 0.33 compared with CAD 0.23 in the year-ago quarter.

During the quarter, the company completed several strategic objectives. The company closed on its \$4.3 billion UNS Energy acquisition, which completes the company's initial push into the U.S. market after purchasing Central Hudson Gas & Electric in June 2013. We are also encouraged by management's announcement in the quarter to seek strategic alternatives in 2015 for its no-moat Fortis Properties subsidiary as the company seeks to focus on regulated assets. Finally, management continues to progress on the company's CAD 9.0 billion capital program, which should drive 7% annual rate base growth. Additional opportunities at Tilbury Phase 1B and Woodfire could drive rate base growth up to 8.5%.

In the quarter, the acquisition of UNS Energy boosted earnings. Strength at the company's FortisAlberta and Caribbean segments were partially offset by a rate freeze at CH Energy. The upcoming regulatory calendar includes a rate case at CH Energy with rates effective in July 2015, a decision on British Columbia 2014-18 PBR and annual rates application at FortisAlberta.

# Research Methodology for Valuing Companies

## Components of Our Methodology

- ▶ Economic Moat™ Rating
- ▶ Moat Trend™ Rating
- ▶ Moat Valuation
- ▶ Three-Stage Discounted Cash Flow
- ▶ Weighted Average Cost of Capital
- ▶ Fair Value Estimate
- ▶ Scenario Analysis
- ▶ Uncertainty Ratings
- ▶ Margin of Safety
- ▶ Consider Buying/Selling
- ▶ Stewardship Rating

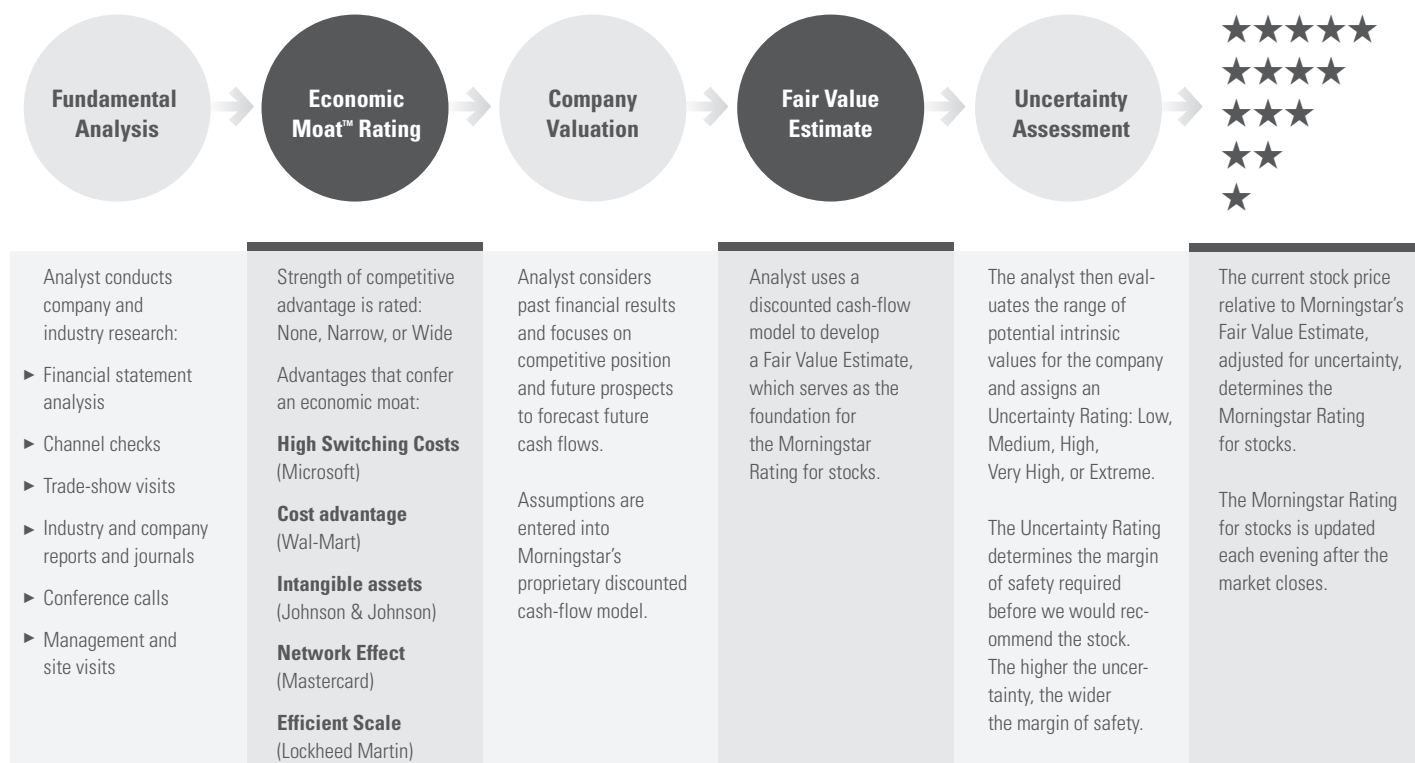

The Morningstar Rating for stocks identifies companies trading at a discount or premium to our analysts' assessment of their fair value. A number of components drive this rating: (1) our assessment of the firm's economic moat, (2) our estimate of the stock's intrinsic value based on a discounted cash-flow model, (3) the margin of safety bands we apply to our Fair Value Estimate, and (4) the current stock price relative to our fair value estimate.

The concept of the Morningstar Economic Moat™ Rating plays a vital role not only in our qualitative assessment of a firm's investment potential, but also in our valuation process. We assign three moat ratings—none, narrow, or wide—as well as the Morningstar Moat Trend™ Rating—positive, stable, or negative—to each company we cover. There are two major requirements for firms to earn either a narrow or wide moat rating: (1) the prospect of earning above-average returns on capital; and (2) some competitive edge that prevents these returns from quickly eroding. The assumptions we make about a firm's moat determine the length of "economic outperformance" that we assume in the latter stages

of our valuation model. We also quantify the value of each firm's moat, which represents the difference between a firm's enterprise value and the value of the firm if no future net investment were to occur. Said differently, moat value identifies the value generated by the firm as a result of any future net new investment. Our Moat Trend Rating reflects our assessment of whether each firm's competitive advantage is either getting stronger or weaker, since we think of moats as dynamic, rather than static.

At the heart of our valuation system is a detailed projection of a company's future cash flows. The first stage of our three-stage discounted cash flow model can last from 5 to 10 years and contains numerous detailed assumptions about various financial and operating items. The second stage of our model—where a firm's return on new invested capital (RONIC) and earnings growth rate implicitly fade until the perpetuity year—can last anywhere from 0 years (for no-moat firms) to 20 years (for wide-moat companies). In our third stage, we assume the firm's RONIC equals its weighted average cost of capital, and we calculate a continuing value using a standard

\* Please contact a sales representative for more information.

perpetuity formula. In deciding on the rate at which to discount future cash flows, we ignore stock-price volatility. Instead, we rely on a system that measures the estimated volatility of a firm's underlying future free cash flows, taking into account fundamental factors such as the diversity of revenue sources and the firm's fixed cost structure.

We also employ a number of other tools to augment our valuation process, including scenario analysis, where we assess the likelihood and performance of a business under different economic and firm-specific conditions. Our analysts typically model three to five scenarios for each company we cover, stress-testing the model and examining the distribution of resulting fair values.

The Morningstar Uncertainty Rating captures the range of these potential fair values, based on an assessment of a company's future sales range, the firm's operating and financial leverage, and any other contingent events that may impact the business. Our analysts use this range to assign an appropriate margin of safety—or the discount/premium

to a fair value we apply in setting our consider buying/consider selling prices. Firms trading below our consider-buying prices receive our highest rating of five stars, whereas firms trading above our consider-selling prices receive our lowest rating of one star.

Our corporate Stewardship Rating represents our assessment of management's stewardship of shareholder capital, with particular emphasis on capital allocation decisions. Analysts consider companies' investment strategy and valuation, financial leverage, dividend and share buyback policies, execution, compensation, related party transactions, and accounting practices. Corporate governance practices are only considered if they've had a demonstrated impact on shareholder value. Analysts assign one of three ratings: "Exemplary," "Standard," and "Poor." Analysts judge stewardship from an equity holder's perspective. Ratings are determined on an absolute basis. Most companies will receive a Standard rating, and this is the default rating in the absence of evidence that managers have made exceptionally strong or poor capital allocation decisions.

## Morningstar Margin of Safety and Star Rating Bands

\* Occasionally a stock's uncertainty will be too high for us to estimate, in which case we label it Extreme.

The Morningstar Rating for stocks identifies stocks trading at a discount or premium to their intrinsic value.

Five-star stocks sell for the biggest risk-adjusted discount whereas one-star stocks trade at premiums to their intrinsic value. Based on a fundamentally focused methodology and a robust, standardized set of procedures and core valuation tools used by Morningstar's Equity Analysts, four key components drive the Morningstar Rating: 1. Assessment of the firm's economic moat, 2. Estimate of the stock's fair value, 3. Uncertainty around that fair value estimate and 4. Current market price. Further information on Morningstar's methodology is available from <http://global.morningstar.com/equitydisclosures>.

This Research Report is current as of the date on the report until it is replaced, updated or withdrawn. This report may be withdrawn or changed at any time as other information becomes available to us. This report will be updated if events affecting the report materially change.

### Contents

Analyst Note	1
Morningstar Analyst Forecasts	2

Management is now focused on building organic growth opportunities, a stark change from the company's acquisitive path. We applaud this strategic shift as the company has an attractive lineup of growth opportunities supporting management's five-year, \$9 billion capital plan. In the quarter, the company's Waneta hydroelectric facility entered into service and will begin contributing to earnings in the second quarter. Additional opportunities at the Tilbury and Woodfibre LNG project should support 7.5% annual rate base growth. Management plans to wrap up its strategic review of the no-moat Fortis Properties unit in the second quarter.

During the first quarter, the company received some key regulatory decisions. In Fortis Alberta, the company received support for the majority of its capital programs through its capital tracker. Its allowed return on equity fell to 8.30% from 8.75% for 2013-15, but we continue to appreciate the constructive Alberta regulatory environment. Future decisions related to its cost of capital for trackers will be key to determining constructiveness. At Central Hudson, the company entered into a joint settlement agreement for proposed rates with a 9.0% allowed return on equity.

During the quarter, dilution from the UNS Energy acquisition depressed earnings. We expect a significant earnings benefit from the acquisition in the second and third quarters due to the seasonality of UNS' operations. Fortis recently announced a strong 6.25% dividend increase.

### Profile

Fortis owns and operates utility transmission and distribution assets in Canada and the United States, serving more than 2.5 million electricity and gas customers. Regulated operations constitute more than 95% of total assets. The company has smaller stakes in electricity generation, several Caribbean utilities, and Canadian hotel and commercial real estate.

The Morningstar Rating for stocks identifies stocks trading at a discount or premium to their intrinsic value.

Five-star stocks sell for the biggest risk-adjusted discount whereas one-star stocks trade at premiums to their intrinsic value. Based on a fundamentally focused methodology and a robust, standardized set of procedures and core valuation tools used by Morningstar's Equity Analysts, four key components drive the Morningstar Rating: 1. Assessment of the firm's economic moat, 2. Estimate of the stock's fair value, 3. Uncertainty around that fair value estimate and 4. Current market price. Further information on Morningstar's methodology is available from <http://global.morningstar.com/equitydisclosures>.

This Research Report is current as of the date on the report until it is replaced, updated or withdrawn. This report may be withdrawn or changed at any time as other information becomes available to us. This report will be updated if events affecting the report materially change.

### Investment Thesis 03 Aug 2015

Fortis manages electric and gas regulated utilities in Canada, the United States, and the Caribbean, resulting in stable operating results. Regulated operations will make up nearly all of the company's asset base after management recently divested noncore New York hydro generation and is under contract to sell the company's real estate holdings. We like that management has divested these operations, allowing it to focus on electric and natural gas distribution in North America and acquisition integration.

Fortis' main regulated Canadian operations are in British Columbia, Alberta, and Newfoundland. These relatively low-risk operations result in stable earnings and fund the consistent dividend growth of the past four decades. Rate base additions should be significant through 2018, as the healthier Canadian economy drives usage and customer growth to support the firm's CAD 9.0 billion investment plans. This should allow the firm to increase its rate base a projected 7% annually during this expansion period.

On a weighted average basis, Fortis' allowed return on equity in its Canadian service territories is near 9.25%. While this return is lower than that typically granted to comparable U.S. utilities, it seems reasonable, given the low-risk nature of Fortis' transmission and delivery operations.

Management has long expressed interest in expanding its operations through U.S. acquisitions. In addition to its 2012 \$1.5 billion cash and debt bid for CH Energy, Fortis recently acquired Tucson, Arizona-based UNS Energy for \$4.3 billion in cash and debt. Now 40% of Fortis' operating assets are U.S. regulated utilities. Management has indicated that it will take a pause from acquisitions and focus on organic growth opportunities and earning allowed returns at its regulated utilities. Longer term, management views the U.S. attractively, and we believe it will look for additional regulated U.S. opportunities.

### Profile

Fortis owns and operates utility transmission and distribution assets in Canada and the United States, serving more than 2.5 million electricity and gas customers. Regulated operations constitute more than 95% of total assets. The company has smaller stakes in electricity generation, several Caribbean utilities, and Canadian hotel and commercial real estate.

## Morningstar Analysis

### Valuation, Growth and Profitability 03 Aug 2015

We are maintaining our CAD 37 fair value estimate after incorporating second-quarter results that were in line with our expectations. We forecast 6% annual earnings growth through 2018, accounting for normalized weather conditions and excluding unannounced acquisitions.

We assume 1.5% annual energy use growth at the Canadian utilities and consistent allowed returns on equity. We forecast 1.0% annual energy growth at the U.S. utilities. Based on management's guidance, we forecast total investments of CAD 8.5 billion at the utilities through 2019, leading to 7% annualized rate base growth.

We use a 7.5% cost of equity to arrive at a 6.1% weighted average cost of capital in our discounted cash flow valuation.

### Scenario Analysis

Our uncertainty rating for Fortis is low. In our bull-case scenario, we assume rate case outcomes are 25% higher and operating expenses are 5% less than in our base-case scenario, increasing our fair value estimate by \$5 per share. In our bear-case scenario, a similar decline in rate case outcomes and increase in operating expense results in a \$5 per share decrease in our fair value estimate.

If we assume a 100-basis-point decrease in allowed returns on equity at the Canadian utilities in 2015 and beyond, our fair value estimate would drop CAD 2 per share. Better-than-expected allowed returns on equity drive similar upside results.

A 50-basis-point change in our cost of equity assumption changes our fair value estimate by CAD 3 per share.

### Economic Moat

Service territory monopolies and efficient scale advantages are the primary sources of an economic moat for regulated

utilities such as Fortis. Regulators typically grant regulated utilities exclusive rights to charge customers rates that allow the utilities to earn a fair return on and return of the capital they invest to build, operate, and maintain their distribution networks. In exchange for regulated utilities' service territory monopolies, regulators set returns at levels that aim to minimize customer costs while offering fair returns for capital providers.

This implicit contract between regulators and capital providers should, on balance, allow regulated utilities to achieve at least their costs of capital, though observable returns might vary in the short run based on demand trends, investment cycles, operating costs, and access to financing. Intuitively, utilities should have an economic moat based on efficient scale, but in some cases regulation offsets this advantage, preventing excess returns on capital. The risk of adverse regulatory decisions precludes regulated utilities from earning wide economic moat ratings. However, the threat of material value destruction is low, and normalized returns exceed costs of capital in most cases, leaving us comfortable assigning narrow moats to many regulated utilities.

### Moat Trend

We assign Fortis a stable moat because of its monopoly position and stable regulatory environment, which should continue to allow the firm to earn its cost of capital. Fortis has a history of constructive relationships across its North American presence, and we do not expect the regulatory relationship to change. The bulk of its capital plan is toward the moaty regulated assets, which should strengthen Fortis' narrow moat. The regulatory framework that caps revenue and returns prevents the firm from attaining a wide moat, as with all regulated utilities we cover.

For regulated utilities like Fortis, our moat trends consider changes in the regulatory environment, near-term investment requirements and growth opportunities, energy

demand trends, and management's strategic direction. In assessing the changing regulatory environment, we consider the level of automatic rate mechanisms, allowed returns on equity versus interest rates, fuel cost recovery mechanisms, and the history of regulatory relations. Using these factors, we assess whether fundamental changes will give a utility a better opportunity to earn or overearn its cost of capital in the near term, or whether fundamental changes will make it more difficult for a utility to earn its cost of capital.

## Bulls Say/Bears Say

### Bulls Say

- ▶ Fortis operates a stable business profile of regulated utilities, offering a strong base for consistent earnings and dividend growth.
- ▶ With an aggressive capital expenditure plan in the coming years, we forecast Fortis' rate base to grow 7% annually.
- ▶ Fortis has paid consecutive quarterly dividends for four decades and raised the dividend faster than most of its peers in recent years.

### Bears Say

- ▶ The Canadian regulatory environment offers lower allowed returns than in the U.S.
- ▶ Management's zeal for U.S. diversification increases the risk that the company will overpay for acquisitions.

## Cumulative Annual Cash Flow Cushion

## Adjusted Cash Flow Summary

	USD Millions	% of Commitments
Beginning Cash Balance	5	0.1
Sum of 5-Year Adjusted Free Cash Flow	6,330	87.7
Sum of Cash and 5-Year Cash Generation	6,335	87.8
Revolver Availability	1,937	26.9
Asset Adjusted Borrowings (Repayment)	—	—
Sum of Cash, 5-Year Cash Generation, Revolver and Adjustments	8,272	114.7
Sum of 5-Year Cash Commitments	-7,214	—

## Financial Health

Through 2019, Fortis has CAD 9.0 billion of planned capital expenditures, which will require it to access the debt and equity capital markets. It has manageable debt maturities through 2018. The company issued significant equity in 2013 and 2014 to help finance employee stock-purchase plans, support its capital expenditure plan, and pay for its U.S. acquisitions.

With a 57% debt/capital ratio and 3.5 times interest coverage, Fortis' financial health looks reasonably sound, particularly in light of its stable, low-risk business model. We expect the company to maintain a capital structure in line with regulatory targets throughout its current investment cycle.

## Enterprise Risk

Fortis' key risk to future earnings is regulatory uncertainty. The company faces regulatory risks that create uncertainties around costs and allowed returns, especially given the significant capital expenditure plan through 2019. Fortis is also exposed to political and economic instability at its Caribbean operations. With an eye toward acquisitions, the company risks overpaying for regulated U.S. assets and must be mindful of the strategic benefits. As with all regulated utilities, Fortis faces the risk of an inflationary environment that would raise borrowing costs and make other investments more attractive for income-seeking investors.

### Management 03 Aug 2015

Overall, we think management has been fair stewards of shareholder capital. Fortis has earned at or near its allowed returns, and management has established good regulatory relationships, particularly in Canada. What concerns us the most, and would cause us to revisit our view of the management team, is management's enthusiasm for U.S. acquisitions leading to further pricey acquisitions, much like the bid for UNS Energy. We think Fortis' shareholders would be better off if management reinvested its capital to fund growth investments or returned it to shareholders through share repurchases or a higher dividend payout ratio.

Stanley Marshall had been president and CEO since 1995, leading a group of experienced utility executives. He was recently placed by Barry Perry, who we think is a suitable replacement, given his previous experience as Fortis' CFO and as CFO of Newfoundland Power.

Total direct compensation is in line with Fortis' industry group. Management's total compensation comprises base salary, annual incentives, stock options, and performance stock units, with 75% of total compensation at risk. We do not like that annual cash incentives are based on earnings per share targets, as earnings per share can be manipulated and may not be an indication of shareholder value creation. Management has a significant ownership stake, which we believe aligns shareholder and management interests.

## Analyst Notes

### Divestitures During Quarter Move Fortis Toward Fully Regulated Utility 31 Jul 2015

We are reaffirming our CAD 37 fair value estimate and narrow economic moat and stable moat trend ratings after Fortis reported second-quarter GAAP earnings of \$0.88 per share, compared with \$0.22 in the year-ago period. Earnings were boosted by significant one-time gains. Excluding nonoperating items, earnings per share were \$0.44 in the quarter compared with \$0.30 in the same year-ago period.

Management made significant progress in the quarter divesting no-moat units and focusing on delivering value from its recent acquisitions. We continue to applaud this strategic shift by management. During the quarter, Fortis agreed to the sale of its Fortis Properties commercial real estate portfolio for \$430 million and plans to close the transaction in fall 2015. The sale of nonregulated hydro assets in New York was completed for \$77 million. Management marked sale proceeds mainly to pay down credit facility borrowings used to fund the UNS Energy acquisition.

Organic growth opportunities also continue to progress well. One of the company's larger projects, the \$900 million 335 MW Wanetta expansion was completed in the quarter. The \$440 million FortisBC Tilbury expansion is on time and expected to be completed in late 2016. The company's \$9 billion, five-year capital plan should support 6.5% rate base growth. Additional capital opportunities could push rate base growth to 7.5%. Capital and earnings growth has also equated to robust dividend growth, with a recent 6.25% dividend increase.

During the quarter, the UNS Energy acquisition significantly added to earnings, given the differentiated earnings profile from its other operations. In the quarter, New York regulators approved Central Hudson's three-year rate request, allowing a 9% allowed return on equity, below the

U.S. average.

### Fortis Management Focusing on Regulated Utilities and Organic Growth Opportunities 05 May 2015

We are reaffirming our CAD 37 fair value estimate and narrow economic moat and stable moat trend ratings after Fortis reported first-quarter ongoing operating earnings of \$0.65 per share, compared with \$0.68 in the year-ago period.

Management is now focused on building organic growth opportunities, a stark change from the company's acquisitive path. We applaud this strategic shift as the company has an attractive lineup of growth opportunities supporting management's five-year, \$9 billion capital plan. In the quarter, the company's Waneta hydroelectric facility entered into service and will begin contributing to earnings in the second quarter. Additional opportunities at the Tilbury and Woodfibre LNG project should support 7.5% annual rate base growth. Management plans to wrap up its strategic review of the no-moat Fortis Properties unit in the second quarter.

During the first quarter, the company received some key regulatory decisions. In Fortis Alberta, the company received support for the majority of its capital programs through its capital tracker. Its allowed return on equity fell to 8.30% from 8.75% for 2013-15, but we continue to appreciate the constructive Alberta regulatory environment. Future decisions related to its cost of capital for trackers will be key to determining constructiveness. At Central Hudson, the company entered into a joint settlement agreement for proposed rates with a 9.0% allowed return on equity.

During the quarter, dilution from the UNS Energy acquisition depressed earnings. We expect a significant earnings benefit from the acquisition in the second and third quarters due to the seasonality of UNS' operations. Fortis recently

# Research Methodology for Valuing Companies

## Components of Our Methodology

- ▶ Economic Moat™ Rating
- ▶ Moat Trend™ Rating
- ▶ Moat Valuation
- ▶ Three-Stage Discounted Cash Flow
- ▶ Weighted Average Cost of Capital
- ▶ Fair Value Estimate
- ▶ Scenario Analysis
- ▶ Uncertainty Ratings
- ▶ Margin of Safety
- ▶ Consider Buying/Selling
- ▶ Stewardship Rating

We believe that a company's intrinsic worth results from the future cash flows it can generate.

The Morningstar Rating for stocks identifies stocks trading at a discount or premium to their intrinsic worth—or fair value estimate, in Morningstar terminology. Five-star stocks sell for the biggest risk-adjusted discount to their fair values, whereas 1-star stocks trade at premiums to their intrinsic worth. Four key components drive the Morningstar rating: our assessment of the firm's economic moat, our estimate of the stock's fair value, our uncertainty around that fair value estimate and the current market price. This process ultimately culminates in our single-point star rating. Underlying this rating is a fundamentally focused methodology and a robust, standardized set of procedures and core valuation tools used by Morningstar's equity analysts.

The concept of the Morningstar Economic Moat™ Rating plays a vital role not only in our qualitative assessment of a firm's investment potential, but also in our actual calculation of our fair value estimates. We assign three moat ratings—none, narrow, or wide—as well as the Morningstar Moat Trend™ Rating—positive, stable, or negative—to each company we cover. Companies with a narrow moat are those we believe are more likely than not to achieve normalized excess returns on invested capital over at least the next 10 years. Wide-moat companies are those in which we have very high confidence that excess returns will remain for

10 years, with excess returns more likely than not to remain for at least 20 years. The longer a firm generates economic profits, the higher its intrinsic value. The assumptions that we make about a firm's economic moat play a vital role in determining the length of “economic outperformance” that we assume in the terminal sections of our valuation model. To assess the sustainability of excess profits, analysts perform ongoing assessments of what we call the moat trend. A firm's moat trend is positive in cases where we think its sources of competitive advantage are growing stronger; stable where we don't anticipate changes to competitive advantages over the next several years; or negative when we see signs of deterioration.

At the heart of our valuation system is a detailed projection of a company's future cash flows. The first stage of our three-stage discounted cash flow model can last from 5 to 10 years and contains numerous detailed assumptions about various financial and operating items. The second stage of our model—where a firm's return on new invested capital (RONIC) and earnings growth rate implicitly fade until the perpetuity year—can last anywhere from one year (for companies with no economic moat) to 10-15 years (for wide-moat companies). In our third stage, we assume the firm's RONIC equals its weighted average cost of capital, and we calculate a continuing value using a standard perpetuity formula. In deciding on the rate at which to discount future cash flows, we use a building block approach,

\*Please contact a sales representative for more information.

which takes into account expectations for market real return, inflation, country risk premia, corporate credit spread, and any additional systematic risk.

We also employ a number of other tools to augment our valuation process, including scenario analysis, where we assess the likelihood and performance of a business under different economic and firm-specific conditions. Our analysts model three scenarios for each company we cover, stress-testing the model and examining the distribution of resulting fair values.

The Morningstar Uncertainty Rating captures the range of likely potential fair values and uses it to assign the margin of safety required before investing, which in turn explicitly drives our stock star rating system. The Uncertainty Rating represents the analysts’ ability to bound the estimated value of the shares in a company around the Fair Value Estimate, based on the characteristics of the business underlying the stock, including

operating and financial leverage, sales sensitivity to the overall economy, product concentration, pricing power, and other company-specific factors.

Our corporate Stewardship Rating represents our assessment of management’s stewardship of shareholder capital, with particular emphasis on capital allocation decisions. Analysts consider companies’ investment strategy and valuation, financial leverage, dividend and share buyback policies, execution, compensation, related party transactions, and accounting practices. Corporate governance practices are only considered if they’ve had a demonstrated impact on shareholder value. Analysts assign one of three ratings: “Exemplary,” “Standard,” and “Poor.” Analysts judge stewardship from an equity holder’s perspective. Ratings are determined on an absolute basis. Most companies will receive a Standard rating, and this is the default rating in the absence of evidence that managers have made exceptionally strong or poor capital allocation decisions. ■■

Morningstar Margin of Safety and Star Rating Bands

\* Occasionally a stock’s uncertainty will be too high for us to estimate, in which case we label it Extreme.

### Investment Thesis 03 Aug 2015

Fortis manages electric and gas regulated utilities in Canada, the United States, and the Caribbean, resulting in stable operating results. Regulated operations will make up nearly all of the company's asset base after management recently divested noncore New York hydro generation and is under contract to sell the company's real estate holdings. We like that management has divested these operations, allowing it to focus on electric and natural gas distribution in North America and acquisition integration.

Fortis' main regulated Canadian operations are in British Columbia, Alberta, and Newfoundland. These relatively low-risk operations result in stable earnings and fund the consistent dividend growth of the past four decades. Rate base additions should be significant through 2018, as the healthier Canadian economy drives usage and customer growth to support the firm's CAD 9.0 billion investment plans. This should allow the firm to increase its rate base a projected 7% annually during this expansion period.

On a weighted average basis, Fortis' allowed return on equity in its Canadian service territories is near 9.25%. While this return is lower than that typically granted to comparable U.S. utilities, it seems reasonable, given the low-risk nature of Fortis' transmission and delivery operations.

Management has long expressed interest in expanding its operations through U.S. acquisitions. In addition to its 2012 \$1.5 billion cash and debt bid for CH Energy, Fortis recently acquired Tucson, Arizona-based UNS Energy for \$4.3 billion in cash and debt. Now 40% of Fortis' operating assets are U.S. regulated utilities. Management has indicated that it will take a pause from acquisitions and focus on organic growth opportunities and earning allowed returns at its regulated utilities. Longer term, management views the U.S. attractively, and we believe it will look for additional regulated U.S. opportunities.

### Profile

Fortis owns and operates utility transmission and distribution assets in Canada and the United States, serving more than 2.5 million electricity and gas customers. Regulated operations constitute more than 95% of total assets. The company has smaller stakes in electricity generation, several Caribbean utilities, and Canadian hotel and commercial real estate.

## Morningstar Analysis

### Valuation, Growth and Profitability 03 Aug 2015

We are maintaining our CAD 37 fair value estimate after incorporating second-quarter results that were in line with our expectations. We forecast 6% annual earnings growth through 2018, accounting for normalized weather conditions and excluding unannounced acquisitions.

We assume 1.5% annual energy use growth at the Canadian utilities and consistent allowed returns on equity. We forecast 1.0% annual energy growth at the U.S. utilities. Based on management's guidance, we forecast total investments of CAD 8.5 billion at the utilities through 2019, leading to 7% annualized rate base growth.

We use a 7.5% cost of equity to arrive at a 6.1% weighted average cost of capital in our discounted cash flow valuation.

### Scenario Analysis

Our uncertainty rating for Fortis is low. In our bull-case scenario, we assume rate case outcomes are 25% higher and operating expenses are 5% less than in our base-case scenario, increasing our fair value estimate by \$5 per share. In our bear-case scenario, a similar decline in rate case outcomes and increase in operating expense results in a \$5 per share decrease in our fair value estimate.

If we assume a 100-basis-point decrease in allowed returns on equity at the Canadian utilities in 2015 and beyond, our fair value estimate would drop CAD 2 per share. Better-than-expected allowed returns on equity drive similar upside results.

A 50-basis-point change in our cost of equity assumption changes our fair value estimate by CAD 3 per share.

### Economic Moat

Service territory monopolies and efficient scale advantages are the primary sources of an economic moat for regulated

utilities such as Fortis. Regulators typically grant regulated utilities exclusive rights to charge customers rates that allow the utilities to earn a fair return on and return of the capital they invest to build, operate, and maintain their distribution networks. In exchange for regulated utilities' service territory monopolies, regulators set returns at levels that aim to minimize customer costs while offering fair returns for capital providers.

This implicit contract between regulators and capital providers should, on balance, allow regulated utilities to achieve at least their costs of capital, though observable returns might vary in the short run based on demand trends, investment cycles, operating costs, and access to financing. Intuitively, utilities should have an economic moat based on efficient scale, but in some cases regulation offsets this advantage, preventing excess returns on capital. The risk of adverse regulatory decisions precludes regulated utilities from earning wide economic moat ratings. However, the threat of material value destruction is low, and normalized returns exceed costs of capital in most cases, leaving us comfortable assigning narrow moats to many regulated utilities.

### Moat Trend

We assign Fortis a stable moat because of its monopoly position and stable regulatory environment, which should continue to allow the firm to earn its cost of capital. Fortis has a history of constructive relationships across its North American presence, and we do not expect the regulatory relationship to change. The bulk of its capital plan is toward the moaty regulated assets, which should strengthen Fortis' narrow moat. The regulatory framework that caps revenue and returns prevents the firm from attaining a wide moat, as with all regulated utilities we cover.

For regulated utilities like Fortis, our moat trends consider changes in the regulatory environment, near-term investment requirements and growth opportunities, energy

demand trends, and management's strategic direction. In assessing the changing regulatory environment, we consider the level of automatic rate mechanisms, allowed returns on equity versus interest rates, fuel cost recovery mechanisms, and the history of regulatory relations. Using these factors, we assess whether fundamental changes will give a utility a better opportunity to earn or overearn its cost of capital in the near term, or whether fundamental changes will make it more difficult for a utility to earn its cost of capital.

## Bulls Say/Bears Say

### Bulls Say

- ▶ Fortis operates a stable business profile of regulated utilities, offering a strong base for consistent earnings and dividend growth.
- ▶ With an aggressive capital expenditure plan in the coming years, we forecast Fortis' rate base to grow 7% annually.
- ▶ Fortis has paid consecutive quarterly dividends for four decades and raised the dividend faster than most of its peers in recent years.

### Bears Say

- ▶ The Canadian regulatory environment offers lower allowed returns than in the U.S.
- ▶ Management's zeal for U.S. diversification increases the risk that the company will overpay for acquisitions.

Asset Adjusted Borrowings (Repayment)	—	—
Sum of Cash, 5-Year Cash Generation, Revolver and Adjustments	1,773	36.9
Sum of 5-Year Cash Commitments	-4,804	—

## Financial Health

Through 2019, Fortis has CAD 9.0 billion of planned capital expenditures, which will require it to access the debt and equity capital markets. It has manageable debt maturities through 2018. The company issued significant equity in 2013 and 2014 to help finance employee stock-purchase plans, support its capital expenditure plan, and pay for its U.S. acquisitions.

With a 57% debt/capital ratio and 3.5 times interest coverage, Fortis' financial health looks reasonably sound, particularly in light of its stable, low-risk business model. We expect the company to maintain a capital structure in line with regulatory targets throughout its current investment cycle.

## Enterprise Risk

Fortis' key risk to future earnings is regulatory uncertainty. The company faces regulatory risks that create uncertainties around costs and allowed returns, especially given the significant capital expenditure plan through 2019. Fortis is also exposed to political and economic instability at its Caribbean operations. With an eye toward acquisitions, the company risks overpaying for regulated U.S. assets and must be mindful of the strategic benefits. As with all regulated utilities, Fortis faces the risk of an inflationary environment that would raise borrowing costs and make other investments more attractive for income-seeking investors.

### Management 03 Aug 2015

Overall, we think management has been fair stewards of shareholder capital. Fortis has earned at or near its allowed returns, and management has established good regulatory relationships, particularly in Canada. What concerns us the most, and would cause us to revisit our view of the management team, is management's enthusiasm for U.S. acquisitions leading to further pricey acquisitions, much like the bid for UNS Energy. We think Fortis' shareholders would be better off if management reinvested its capital to fund growth investments or returned it to shareholders through share repurchases or a higher dividend payout ratio.

Stanley Marshall had been president and CEO since 1995, leading a group of experienced utility executives. He was recently placed by Barry Perry, who we think is a suitable replacement, given his previous experience as Fortis' CFO and as CFO of Newfoundland Power.

Total direct compensation is in line with Fortis' industry group. Management's total compensation comprises base salary, annual incentives, stock options, and performance stock units, with 75% of total compensation at risk. We do not like that annual cash incentives are based on earnings per share targets, as earnings per share can be manipulated and may not be an indication of shareholder value creation. Management has a significant ownership stake, which we believe aligns shareholder and management interests.

## Analyst Notes

### Divestures During Quarter Move Fortis Toward Fully Regulated Utility 31 Jul 2015

We are reaffirming our CAD 37 fair value estimate and narrow economic moat and stable moat trend ratings after Fortis reported second-quarter GAAP earnings of \$0.88 per share, compared with \$0.22 in the year-ago period. Earnings were boosted by significant one-time gains. Excluding nonoperating items, earnings per share were \$0.44 in the quarter compared with \$0.30 in the same year-ago period.

Management made significant progress in the quarter divesting no-moat units and focusing on delivering value from its recent acquisitions. We continue to applaud this strategic shift by management. During the quarter, Fortis agreed to the sale of its Fortis Properties commercial real estate portfolio for \$430 million and plans to close the transaction in fall 2015. The sale of nonregulated hydro assets in New York was completed for \$77 million. Management marked sale proceeds mainly to pay down credit facility borrowings used to fund the UNS Energy acquisition.

Organic growth opportunities also continue to progress well. One of the company's larger projects, the \$900 million 335 MW Wanetta expansion was completed in the quarter. The \$440 million FortisBC Tilbury expansion is on time and expected to be completed in late 2016. The company's \$9 billion, five-year capital plan should support 6.5% rate base growth. Additional capital opportunities could push rate base growth to 7.5%. Capital and earnings growth has also equated to robust dividend growth, with a recent 6.25% dividend increase.

During the quarter, the UNS Energy acquisition significantly added to earnings, given the differentiated earnings profile from its other operations. In the quarter, New York regulators approved Central Hudson's three-year rate request, allowing a 9% allowed return on equity, below the

U.S. average.

### Fortis Management Focusing on Regulated Utilities and Organic Growth Opportunities 05 May 2015

We are reaffirming our CAD 37 fair value estimate and narrow economic moat and stable moat trend ratings after Fortis reported first-quarter ongoing operating earnings of \$0.65 per share, compared with \$0.68 in the year-ago period.

Management is now focused on building organic growth opportunities, a stark change from the company's acquisitive path. We applaud this strategic shift as the company has an attractive lineup of growth opportunities supporting management's five-year, \$9 billion capital plan. In the quarter, the company's Waneta hydroelectric facility entered into service and will begin contributing to earnings in the second quarter. Additional opportunities at the Tilbury and Woodfibre LNG project should support 7.5% annual rate base growth. Management plans to wrap up its strategic review of the no-moat Fortis Properties unit in the second quarter.

During the first quarter, the company received some key regulatory decisions. In Fortis Alberta, the company received support for the majority of its capital programs through its capital tracker. Its allowed return on equity fell to 8.30% from 8.75% for 2013-15, but we continue to appreciate the constructive Alberta regulatory environment. Future decisions related to its cost of capital for trackers will be key to determining constructiveness. At Central Hudson, the company entered into a joint settlement agreement for proposed rates with a 9.0% allowed return on equity.

During the quarter, dilution from the UNS Energy acquisition depressed earnings. We expect a significant earnings benefit from the acquisition in the second and third quarters due to the seasonality of UNS' operations. Fortis recently

# Research Methodology for Valuing Companies

## Components of Our Methodology

- ▶ Economic Moat™ Rating
- ▶ Moat Trend™ Rating
- ▶ Moat Valuation
- ▶ Three-Stage Discounted Cash Flow
- ▶ Weighted Average Cost of Capital
- ▶ Fair Value Estimate
- ▶ Scenario Analysis
- ▶ Uncertainty Ratings
- ▶ Margin of Safety
- ▶ Consider Buying/Selling
- ▶ Stewardship Rating

We believe that a company's intrinsic worth results from the future cash flows it can generate.

The Morningstar Rating for stocks identifies stocks trading at a discount or premium to their intrinsic worth—or fair value estimate, in Morningstar terminology. Five-star stocks sell for the biggest risk-adjusted discount to their fair values, whereas 1-star stocks trade at premiums to their intrinsic worth. Four key components drive the Morningstar rating: our assessment of the firm's economic moat, our estimate of the stock's fair value, our uncertainty around that fair value estimate and the current market price. This process ultimately culminates in our single-point star rating. Underlying this rating is a fundamentally focused methodology and a robust, standardized set of procedures and core valuation tools used by Morningstar's equity analysts.

The concept of the Morningstar Economic Moat™ Rating plays a vital role not only in our qualitative assessment of a firm's investment potential, but also in our actual calculation of our fair value estimates. We assign three moat ratings—none, narrow, or wide—as well as the Morningstar Moat Trend™ Rating—positive, stable, or negative—to each company we cover. Companies with a narrow moat are those we believe are more likely than not to achieve normalized excess returns on invested capital over at least the next 10 years. Wide-moat companies are those in which we have very high confidence that excess returns will remain for

10 years, with excess returns more likely than not to remain for at least 20 years. The longer a firm generates economic profits, the higher its intrinsic value. The assumptions that we make about a firm's economic moat play a vital role in determining the length of “economic outperformance” that we assume in the terminal sections of our valuation model. To assess the sustainability of excess profits, analysts perform ongoing assessments of what we call the moat trend. A firm's moat trend is positive in cases where we think its sources of competitive advantage are growing stronger; stable where we don't anticipate changes to competitive advantages over the next several years; or negative when we see signs of deterioration.

At the heart of our valuation system is a detailed projection of a company's future cash flows. The first stage of our three-stage discounted cash flow model can last from 5 to 10 years and contains numerous detailed assumptions about various financial and operating items. The second stage of our model—where a firm's return on new invested capital (RONIC) and earnings growth rate implicitly fade until the perpetuity year—can last anywhere from one year (for companies with no economic moat) to 10-15 years (for wide-moat companies). In our third stage, we assume the firm's RONIC equals its weighted average cost of capital, and we calculate a continuing value using a standard perpetuity formula. In deciding on the rate at which to discount future cash flows, we use a building block approach,

- Stewardship Rating Methodology

\*Please contact a sales representative for more information.

which takes into account expectations for market real return, inflation, country risk premia, corporate credit spread, and any additional systematic risk.

We also employ a number of other tools to augment our valuation process, including scenario analysis, where we assess the likelihood and performance of a business under different economic and firm-specific conditions. Our analysts model three scenarios for each company we cover, stress-testing the model and examining the distribution of resulting fair values.

The Morningstar Uncertainty Rating captures the range of likely potential fair values and uses it to assign the margin of safety required before investing, which in turn explicitly drives our stock star rating system. The Uncertainty Rating represents the analysts’ ability to bound the estimated value of the shares in a company around the Fair Value Estimate, based on the characteristics of the business underlying the stock, including

operating and financial leverage, sales sensitivity to the overall economy, product concentration, pricing power, and other company-specific factors.

Our corporate Stewardship Rating represents our assessment of management’s stewardship of shareholder capital, with particular emphasis on capital allocation decisions. Analysts consider companies’ investment strategy and valuation, financial leverage, dividend and share buyback policies, execution, compensation, related party transactions, and accounting practices. Corporate governance practices are only considered if they’ve had a demonstrated impact on shareholder value. Analysts assign one of three ratings: “Exemplary,” “Standard,” and “Poor.” Analysts judge stewardship from an equity holder’s perspective. Ratings are determined on an absolute basis. Most companies will receive a Standard rating, and this is the default rating in the absence of evidence that managers have made exceptionally strong or poor capital allocation decisions. ■■

Morningstar Margin of Safety and Star Rating Bands

\* Occasionally a stock’s uncertainty will be too high for us to estimate, in which case we label it Extreme.

Unless stated otherwise, this Research Report was prepared by the person(s) noted in their capacity as Equity Analysts employed by Morningstar, Inc., or one of its affiliates. This Report has not been made available to the issuer of the relevant financial products prior to publication.

The Morningstar Rating for stocks identifies stocks trading at a discount or premium to their intrinsic value. Five-star stocks sell for the biggest risk-adjusted discount whereas one-star stocks trade at premiums to their intrinsic value. Based on a fundamentally focused methodology and a robust, standardized set of procedures and core valuation tools used by Morningstar's Equity Analysts, four key components drive the Morningstar Rating: 1. Assessment of the firm's economic moat, 2. Estimate of the stock's fair value, 3. Uncertainty around that fair value estimate, and 4. Current market price. Further information on Morningstar's methodology is available from <http://global.morningstar.com/equitydisclosures>.

This Report is current as of the date on the Report until it is replaced, updated or withdrawn. This Report may be withdrawn or changed at any time as other information becomes available to us. This Report will be updated if events affecting the Report materially change.

## Conflicts of Interest:

-No material interests are held by Morningstar or the Equity Analyst in the financial products that are the subject of the Reports.

### Investment Thesis 03 Aug 2015

Fortis manages electric and gas regulated utilities in Canada, the United States, and the Caribbean, resulting in stable operating results. Regulated operations will make up nearly all of the company's asset base after management recently divested noncore New York hydro generation and is under contract to sell the company's real estate holdings. We like that management has divested these operations, allowing it to focus on electric and natural gas distribution in North America and acquisition integration.

Fortis' main regulated Canadian operations are in British Columbia, Alberta, and Newfoundland. These relatively low-risk operations result in stable earnings and fund the consistent dividend growth of the past four decades. Rate base additions should be significant through 2018, as the healthier Canadian economy drives usage and customer growth to support the firm's CAD 9.0 billion investment plans. This should allow the firm to increase its rate base a projected 7% annually during this expansion period.

On a weighted average basis, Fortis' allowed return on equity in its Canadian service territories is near 9.25%. While this return is lower than that typically granted to comparable U.S. utilities, it seems reasonable, given the low-risk nature of Fortis' transmission and delivery operations.

Management has long expressed interest in expanding its operations through U.S. acquisitions. In addition to its 2012 \$1.5 billion cash and debt bid for CH Energy, Fortis recently acquired Tucson, Arizona-based UNS Energy for \$4.3 billion in cash and debt. Now 40% of Fortis' operating assets are U.S. regulated utilities. Management has indicated that it will take a pause from acquisitions and focus on organic growth opportunities and earning allowed returns at its regulated utilities. Longer term, management views the U.S. attractively, and we believe it will look for additional regulated U.S. opportunities.

### Profile

Fortis owns and operates utility transmission and distribution assets in Canada and the United States, serving more than 2.5 million electricity and gas customers. Regulated operations constitute more than 95% of total assets. The company has smaller stakes in electricity generation, several Caribbean utilities, and Canadian hotel and commercial real estate.

## Morningstar Analysis

### Valuation, Growth and Profitability 03 Aug 2015

We are maintaining our CAD 37 fair value estimate after incorporating second-quarter results that were in line with our expectations. We forecast 6% annual earnings growth through 2018, accounting for normalized weather conditions and excluding unannounced acquisitions.

We assume 1.5% annual energy use growth at the Canadian utilities and consistent allowed returns on equity. We forecast 1.0% annual energy growth at the U.S. utilities. Based on management's guidance, we forecast total investments of CAD 8.5 billion at the utilities through 2019, leading to 7% annualized rate base growth.

We use a 7.5% cost of equity to arrive at a 6.1% weighted average cost of capital in our discounted cash flow valuation.

### Scenario Analysis

Our uncertainty rating for Fortis is low. In our bull-case scenario, we assume rate case outcomes are 25% higher and operating expenses are 5% less than in our base-case scenario, increasing our fair value estimate by \$5 per share. In our bear-case scenario, a similar decline in rate case outcomes and increase in operating expense results in a \$5 per share decrease in our fair value estimate.

If we assume a 100-basis-point decrease in allowed returns on equity at the Canadian utilities in 2015 and beyond, our fair value estimate would drop CAD 2 per share. Better-than-expected allowed returns on equity drive similar upside results.

A 50-basis-point change in our cost of equity assumption changes our fair value estimate by CAD 3 per share.

### Economic Moat

Service territory monopolies and efficient scale advantages are the primary sources of an economic moat for regulated

utilities such as Fortis. Regulators typically grant regulated utilities exclusive rights to charge customers rates that allow the utilities to earn a fair return on and return of the capital they invest to build, operate, and maintain their distribution networks. In exchange for regulated utilities' service territory monopolies, regulators set returns at levels that aim to minimize customer costs while offering fair returns for capital providers.

This implicit contract between regulators and capital providers should, on balance, allow regulated utilities to achieve at least their costs of capital, though observable returns might vary in the short run based on demand trends, investment cycles, operating costs, and access to financing. Intuitively, utilities should have an economic moat based on efficient scale, but in some cases regulation offsets this advantage, preventing excess returns on capital. The risk of adverse regulatory decisions precludes regulated utilities from earning wide economic moat ratings. However, the threat of material value destruction is low, and normalized returns exceed costs of capital in most cases, leaving us comfortable assigning narrow moats to many regulated utilities.

### Moat Trend

We assign Fortis a stable moat because of its monopoly position and stable regulatory environment, which should continue to allow the firm to earn its cost of capital. Fortis has a history of constructive relationships across its North American presence, and we do not expect the regulatory relationship to change. The bulk of its capital plan is toward the moaty regulated assets, which should strengthen Fortis' narrow moat. The regulatory framework that caps revenue and returns prevents the firm from attaining a wide moat, as with all regulated utilities we cover.

For regulated utilities like Fortis, our moat trends consider changes in the regulatory environment, near-term investment requirements and growth opportunities, energy

demand trends, and management's strategic direction. In assessing the changing regulatory environment, we consider the level of automatic rate mechanisms, allowed returns on equity versus interest rates, fuel cost recovery mechanisms, and the history of regulatory relations. Using these factors, we assess whether fundamental changes will give a utility a better opportunity to earn or overearn its cost of capital in the near term, or whether fundamental changes will make it more difficult for a utility to earn its cost of capital.

## Bulls Say/Bears Say

### Bulls Say

- ▶ Fortis operates a stable business profile of regulated utilities, offering a strong base for consistent earnings and dividend growth.
- ▶ With an aggressive capital expenditure plan in the coming years, we forecast Fortis' rate base to grow 7% annually.
- ▶ Fortis has paid consecutive quarterly dividends for four decades and raised the dividend faster than most of its peers in recent years.

### Bears Say

- ▶ The Canadian regulatory environment offers lower allowed returns than in the U.S.
- ▶ Management's zeal for U.S. diversification increases the risk that the company will overpay for acquisitions.

## Cumulative Annual Cash Flow Cushion

## Adjusted Cash Flow Summary

	USD Millions	% of Commitments
Beginning Cash Balance	5	0.1
Sum of 5-Year Adjusted Free Cash Flow	6,330	87.7
Sum of Cash and 5-Year Cash Generation	6,335	87.8
Revolver Availability	1,937	26.9
Asset Adjusted Borrowings (Repayment)	—	—
Sum of Cash, 5-Year Cash Generation, Revolver and Adjustments	8,272	114.7
Sum of 5-Year Cash Commitments	-7,214	—

## Financial Health

Through 2019, Fortis has CAD 9.0 billion of planned capital expenditures, which will require it to access the debt and equity capital markets. It has manageable debt maturities through 2018. The company issued significant equity in 2013 and 2014 to help finance employee stock-purchase plans, support its capital expenditure plan, and pay for its U.S. acquisitions.

With a 57% debt/capital ratio and 3.5 times interest coverage, Fortis' financial health looks reasonably sound, particularly in light of its stable, low-risk business model. We expect the company to maintain a capital structure in line with regulatory targets throughout its current investment cycle.

## Enterprise Risk

Fortis' key risk to future earnings is regulatory uncertainty. The company faces regulatory risks that create uncertainties around costs and allowed returns, especially given the significant capital expenditure plan through 2019. Fortis is also exposed to political and economic instability at its Caribbean operations. With an eye toward acquisitions, the company risks overpaying for regulated U.S. assets and must be mindful of the strategic benefits. As with all regulated utilities, Fortis faces the risk of an inflationary environment that would raise borrowing costs and make other investments more attractive for income-seeking investors.

### Management 03 Aug 2015

Overall, we think management has been fair stewards of shareholder capital. Fortis has earned at or near its allowed returns, and management has established good regulatory relationships, particularly in Canada. What concerns us the most, and would cause us to revisit our view of the management team, is management's enthusiasm for U.S. acquisitions leading to further pricey acquisitions, much like the bid for UNS Energy. We think Fortis' shareholders would be better off if management reinvested its capital to fund growth investments or returned it to shareholders through share repurchases or a higher dividend payout ratio.

Stanley Marshall had been president and CEO since 1995, leading a group of experienced utility executives. He was recently placed by Barry Perry, who we think is a suitable replacement, given his previous experience as Fortis' CFO and as CFO of Newfoundland Power.

Total direct compensation is in line with Fortis' industry group. Management's total compensation comprises base salary, annual incentives, stock options, and performance stock units, with 75% of total compensation at risk. We do not like that annual cash incentives are based on earnings per share targets, as earnings per share can be manipulated and may not be an indication of shareholder value creation. Management has a significant ownership stake, which we believe aligns shareholder and management interests.

## Analyst Notes

### Divestitures During Quarter Move Fortis Toward Fully Regulated Utility 31 Jul 2015

We are reaffirming our CAD 37 fair value estimate and narrow economic moat and stable moat trend ratings after Fortis reported second-quarter GAAP earnings of \$0.88 per share, compared with \$0.22 in the year-ago period. Earnings were boosted by significant one-time gains. Excluding nonoperating items, earnings per share were \$0.44 in the quarter compared with \$0.30 in the same year-ago period.

Management made significant progress in the quarter divesting no-moat units and focusing on delivering value from its recent acquisitions. We continue to applaud this strategic shift by management. During the quarter, Fortis agreed to the sale of its Fortis Properties commercial real estate portfolio for \$430 million and plans to close the transaction in fall 2015. The sale of nonregulated hydro assets in New York was completed for \$77 million. Management marked sale proceeds mainly to pay down credit facility borrowings used to fund the UNS Energy acquisition.

Organic growth opportunities also continue to progress well. One of the company's larger projects, the \$900 million 335 MW Wanetta expansion was completed in the quarter. The \$440 million FortisBC Tilbury expansion is on time and expected to be completed in late 2016. The company's \$9 billion, five-year capital plan should support 6.5% rate base growth. Additional capital opportunities could push rate base growth to 7.5%. Capital and earnings growth has also equated to robust dividend growth, with a recent 6.25% dividend increase.

During the quarter, the UNS Energy acquisition significantly added to earnings, given the differentiated earnings profile from its other operations. In the quarter, New York regulators approved Central Hudson's three-year rate request, allowing a 9% allowed return on equity, below the

U.S. average.

### Fortis Management Focusing on Regulated Utilities and Organic Growth Opportunities 05 May 2015

We are reaffirming our CAD 37 fair value estimate and narrow economic moat and stable moat trend ratings after Fortis reported first-quarter ongoing operating earnings of \$0.65 per share, compared with \$0.68 in the year-ago period.

Management is now focused on building organic growth opportunities, a stark change from the company's acquisitive path. We applaud this strategic shift as the company has an attractive lineup of growth opportunities supporting management's five-year, \$9 billion capital plan. In the quarter, the company's Waneta hydroelectric facility entered into service and will begin contributing to earnings in the second quarter. Additional opportunities at the Tilbury and Woodfibre LNG project should support 7.5% annual rate base growth. Management plans to wrap up its strategic review of the no-moat Fortis Properties unit in the second quarter.

During the first quarter, the company received some key regulatory decisions. In Fortis Alberta, the company received support for the majority of its capital programs through its capital tracker. Its allowed return on equity fell to 8.30% from 8.75% for 2013-15, but we continue to appreciate the constructive Alberta regulatory environment. Future decisions related to its cost of capital for trackers will be key to determining constructiveness. At Central Hudson, the company entered into a joint settlement agreement for proposed rates with a 9.0% allowed return on equity.

During the quarter, dilution from the UNS Energy acquisition depressed earnings. We expect a significant earnings benefit from the acquisition in the second and third quarters due to the seasonality of UNS' operations. Fortis recently

# Research Methodology for Valuing Companies

## Components of Our Methodology

- ▶ Economic Moat™ Rating
- ▶ Moat Trend™ Rating
- ▶ Moat Valuation
- ▶ Three-Stage Discounted Cash Flow
- ▶ Weighted Average Cost of Capital
- ▶ Fair Value Estimate
- ▶ Scenario Analysis
- ▶ Uncertainty Ratings
- ▶ Margin of Safety
- ▶ Consider Buying/Selling
- ▶ Stewardship Rating

We believe that a company's intrinsic worth results from the future cash flows it can generate.

The Morningstar Rating for stocks identifies stocks trading at a discount or premium to their intrinsic worth—or fair value estimate, in Morningstar terminology. Five-star stocks sell for the biggest risk-adjusted discount to their fair values, whereas 1-star stocks trade at premiums to their intrinsic worth. Four key components drive the Morningstar rating: our assessment of the firm's economic moat, our estimate of the stock's fair value, our uncertainty around that fair value estimate and the current market price. This process ultimately culminates in our single-point star rating. Underlying this rating is a fundamentally focused methodology and a robust, standardized set of procedures and core valuation tools used by Morningstar's equity analysts.

The concept of the Morningstar Economic Moat™ Rating plays a vital role not only in our qualitative assessment of a firm's investment potential, but also in our actual calculation of our fair value estimates. We assign three moat ratings—none, narrow, or wide—as well as the Morningstar Moat Trend™ Rating—positive, stable, or negative—to each company we cover. Companies with a narrow moat are those we believe are more likely than not to achieve normalized excess returns on invested capital over at least the next 10 years. Wide-moat companies are those in which we have very high confidence that excess returns will remain for

10 years, with excess returns more likely than not to remain for at least 20 years. The longer a firm generates economic profits, the higher its intrinsic value. The assumptions that we make about a firm's economic moat play a vital role in determining the length of “economic outperformance” that we assume in the terminal sections of our valuation model. To assess the sustainability of excess profits, analysts perform ongoing assessments of what we call the moat trend. A firm's moat trend is positive in cases where we think its sources of competitive advantage are growing stronger; stable where we don't anticipate changes to competitive advantages over the next several years; or negative when we see signs of deterioration.

At the heart of our valuation system is a detailed projection of a company's future cash flows. The first stage of our three-stage discounted cash flow model can last from 5 to 10 years and contains numerous detailed assumptions about various financial and operating items. The second stage of our model—where a firm's return on new invested capital (RONIC) and earnings growth rate implicitly fade until the perpetuity year—can last anywhere from one year (for companies with no economic moat) to 10-15 years (for wide-moat companies). In our third stage, we assume the firm's RONIC equals its weighted average cost of capital, and we calculate a continuing value using a standard perpetuity formula. In deciding on the rate at which to discount future cash flows, we use a building block approach,

- Stewardship Rating Methodology

\*Please contact a sales representative for more information.

which takes into account expectations for market real return, inflation, country risk premia, corporate credit spread, and any additional systematic risk.

We also employ a number of other tools to augment our valuation process, including scenario analysis, where we assess the likelihood and performance of a business under different economic and firm-specific conditions. Our analysts model three scenarios for each company we cover, stress-testing the model and examining the distribution of resulting fair values.

The Morningstar Uncertainty Rating captures the range of likely potential fair values and uses it to assign the margin of safety required before investing, which in turn explicitly drives our stock star rating system. The Uncertainty Rating represents the analysts’ ability to bound the estimated value of the shares in a company around the Fair Value Estimate, based on the characteristics of the business underlying the stock, including

operating and financial leverage, sales sensitivity to the overall economy, product concentration, pricing power, and other company-specific factors.

Our corporate Stewardship Rating represents our assessment of management’s stewardship of shareholder capital, with particular emphasis on capital allocation decisions. Analysts consider companies’ investment strategy and valuation, financial leverage, dividend and share buyback policies, execution, compensation, related party transactions, and accounting practices. Corporate governance practices are only considered if they’ve had a demonstrated impact on shareholder value. Analysts assign one of three ratings: “Exemplary,” “Standard,” and “Poor.” Analysts judge stewardship from an equity holder’s perspective. Ratings are determined on an absolute basis. Most companies will receive a Standard rating, and this is the default rating in the absence of evidence that managers have made exceptionally strong or poor capital allocation decisions. ■■

Morningstar Margin of Safety and Star Rating Bands

\* Occasionally a stock’s uncertainty will be too high for us to estimate, in which case we label it Extreme.

**Price/Fair Value** Morningstar data as of Sep 15, 2015

Unless stated otherwise, this Research Report was prepared by the person(s) noted in their capacity as Equity Analysts employed by Morningstar, Inc., or one of its affiliates. This Report has not been made available to the issuer of the relevant financial products prior to publication.

The Morningstar Rating for stocks identifies stocks trading at a discount or premium to their intrinsic value. Five-star stocks sell for the biggest risk-adjusted discount whereas one-star stocks trade at premiums to their intrinsic value. Based on a fundamentally focused methodology and a robust, standardized set of procedures and core valuation tools used by Morningstar's Equity Analysts, four key components drive the Morningstar Rating: 1. Assessment of the firm's economic moat, 2. Estimate of the stock's fair value, 3. Uncertainty around that fair value estimate, and 4. Current market price. Further information on Morningstar's methodology is available from <http://global.morningstar.com/equitydisclosures>.

This Report is current as of the date on the Report until it is replaced, updated or withdrawn. This Report may be withdrawn or changed at any time as other information becomes available to us. This Report will be updated if events affecting the Report materially change.

## Conflicts of Interest:

-No material interests are held by Morningstar or the Equity Analyst in the financial products that are the subject of the Reports.

-Equity Analysts are required to comply with the CFA Institute's Code of Ethics and Standards of Professional Conduct.

-Equity Analysts' compensation is derived from Morningstar's overall earnings and consists of salary, bonus and in some cases restricted stock.

-Equity Analysts do not have authority over Morningstar's investment management group's business arrangements nor allow employees from the investment management group to participate or influence the analysis or opinion prepared by them. Morningstar will not receive any direct benefit from the publication of this Report.

- Morningstar does not receive commissions for providing research and does not charge companies to be rated.

-Equity Analysts use publicly available information.

For Recipients in India: This research on securities [as defined in clause (h) of Section 2 of the Securities Contracts (Regulation) Act, 1956], such research being referred to for the purpose of this document as “Investment Research”, is issued by Morningstar Investment Adviser India Private Limited.

Morningstar Investment Adviser India Private Limited is registered with the Securities and Exchange Board of India under the SEBI (Investment Advisers) Regulations, 2013, vide Registration number INA000001357, dated March 27, 2014, and in compliance of the aforesaid regulations and the SEBI (Research Analysts) Regulations, 2014, it carries on the business activities of investment advice and research. Morningstar Investment Adviser India Private Limited has not been the subject of any disciplinary action by SEBI or any other legal/regulatory body. Morningstar Investment Adviser India Private Limited is a wholly owned subsidiary of Morningstar Associates LLC, which is a part of the Morningstar Investment Management group of Morningstar, Inc., and Morningstar, Inc. is a leading provider of independent investment research that offers an extensive line of products and services for individual investors, financial advisors, asset managers, and retirement plan providers and sponsors. In India, Morningstar Investment Adviser India Private Limited has only one associate, viz., Morningstar India Private Limited, and this company predominantly carries on the business activities of providing data input, data transmission and other data related services, financial data analysis, software development etc.

The author/creator of this Investment Research (“Research Analyst”) or his/her associates or his/her relatives does/do not have (i) any financial interest in the subject company; (ii) any actual/beneficial ownership of one per cent or more securities of the subject company, at the end of the month immediately preceding the date of publication of this Investment Research; and (iii) any other material conflict of interest at the time of publication of this Investment

Research.

The Research Analyst or his/her associates or his/her relatives has/have not received any (i) compensation from the subject company in the past twelve months; (ii) compensation for products or services from the subject company in the past twelve months; and (iii) compensation or other material benefits from the subject company or third party in connection with this Investment Research. Also, the Research Analyst has not served as an officer, director or employee of the subject company.

The terms and conditions on which Morningstar Investment Adviser India Private Limited offers Investment Research to clients, varies from client to client, and are spelt out in detail in the respective client agreement.

## PRICE TARGET REVISION | COMMENT

FEBRUARY 11, 2011

## Fortis Inc. (TSX: FTS)

## Q4/10 Results in Line with Expectations

Sector Perform  
Average Risk

Price:	33.81	Price Target:	34.00 ↑ 33.00
Shares O/S (MM):	174.4	Implied All-In Return:	4%
Dividend:	1.16	Market Cap (MM):	5,896
Float (MM):	174.4	Yield:	3.4%
Debt to Cap:	58%		

## Event

Fortis reported Q4/10 results.

## Investment Opinion

- **Q4/10 Results in Line with Expectations.** Normalized Q4/10 EPS was \$0.49, matching our estimate of \$0.49 and slightly up from \$0.48 in Q4/09. During the quarter, the performance of the Canadian regulated utilities was in line with our expectations. Weaker-than-forecast results from the Caribbean regulated utilities were broadly offset by good performance from the Properties division.
- **Growth Expected to Continue in the Core Canadian Utility Franchise.** Fortis expects to spend \$1.2 billion on capex in 2011 with \$919 million of that amount forecast for the Canadian regulated utilities. The estimated capital for 2011 is a modest increase from the \$1.1 billion spent in 2010.
- **Headwinds in the Caribbean.** 2010 was a disappointing year for the segment, primarily driven by the ongoing situation in Belize although issues have popped up in Turks & Caicos along with Grand Cayman. Fortis hopes that it will be able to settle the rate issues in both Belize and Turks & Caicos in 2011, along with improving operational results in Grand Cayman.
- **Still Upbeat on the Potential for a U.S. Acquisition.** Fortis remains upbeat about the potential for a U.S. utility acquisition. We continue to believe that management will take a disciplined approach (Fortis has been looking to acquire a U.S. utility for years), although we continue to be cautious due to the potential size of the transaction (up to \$5 billion enterprise value) in addition to investor familiarity with the asset and regulatory regime that will be lower than previous acquisitions (e.g., Terasen, Aquila Canada).
- **Valuation: Nudging Up Price Target to \$34.00 (from \$33.00).** Our price target of \$34.00 is based on a forward P/E of 18x 2012E EPS. Although we remain cautious on the prospects for a large U.S. acquisition, we are incrementally more comfortable with the financing strategy based on our recent discussions with the company. Our selected P/E multiple is at the upper end of the five-year range, reflecting the low interest rate environment, good growth from the core Canadian regulated utilities, and the Waneta Dam expansion that will not contribute to earnings until 2015.

## Q4/10 Results in Line with Expectations

Fortis' normalized Q4/10 EPS was \$0.49, matching our estimate of \$0.49 and slightly up from \$0.48 in Q4/09. During the quarter, the performance of the Canadian regulated utilities was in line with our expectations. Weaker-than-forecast results from the Caribbean regulated utilities were mostly offset by good performance from the Properties division. The Q4/10 and full-year results are set out in Exhibit 1.

## Highlights of the Quarter

- **Caribbean Regulated Utilities Impacted by Higher Expenses.** Lower-than-expected earnings from Caribbean Regulated Utilities in Q4/10 were partly attributable to higher operating expenses at Belize Electricity due to legal fees associated with continued regulatory challenges, and weaker customer demand. Management noted that while Belize Electricity contributed only about \$1.5 million of earnings in 2010, it expects the utility to earn roughly \$10 million annually under normal operations.
- **Non-Regulated Fortis Properties Positively Impacted by Lower Taxes.** Higher-than-expected earnings from non-regulated Fortis Properties were primarily attributable to lower corporate taxes and an improvement in results from hotel operations (i.e., Atlantic Canada and central Canada) and rental properties.
- **US\$200 Million Private Placement Completed.** On December 22, 2010, Fortis closed a private placement of US\$200 million in senior unsecured notes, which were issued to institutional investors in the U.S. in two tranches (US\$125 million of 10-year at a coupon rate of 3.53% and US\$75 million of 30-year notes at a coupon rate of 5.26%).
- **Long-Term Utility Growth Plan Remains Intact.** With roughly \$1.1 billion of gross capex in 2010 and \$1.2 billion expected in 2011 (please refer to Exhibit 2), planned capex over the next five years is expected to approach \$5.5 billion. As the majority of Fortis' planned capital investment is in regulated electric utilities (about 63%), rate base is expected to grow at a roughly 6% compound annual growth rate, which should translate into similar earnings growth. Approximately 20% and 17% of the five-year capex program will be incurred at Terasen and at non-regulated operations, respectively.
- **Construction Under Way for Waneta Expansion.** In October 2010, construction began on the \$900 million Waneta Expansion, a 335 MW hydro project in B.C that is expected to be in service in the spring of 2015. With a controlling interest of 51%, Fortis will operate and maintain the facility which will sell energy and capacity to BC Hydro and FortisBC (Fortis' regulated electric utility), under 40-year power sales contracts.

### Minor Changes within the Segments but Overall Estimates Remain Unchanged

We have made minor changes within some of our segment forecasts, but have left our overall EPS estimates unchanged through 2012. We have lowered our forecast for Terasen (about \$3 million and \$6 million lower in 2011 and 2012, respectively) which is offset by a higher forecast for Properties (about \$3 million in both 2011 and 2012) and other minor changes for other segments. Our revised estimates are set out in Exhibit 3.

## Exhibit 3: Revised Financial Forecast (In \$MM except per share figures)

**Increasing Price Target to \$34.00 (from \$33.00)**

We have increased our price target to \$34.00 (from \$33.00) to reflect a forward P/E of 18.0x 2012E EPS (previously 17.5x). Although we remain cautious on the prospects for a large U.S. acquisition, we are incrementally more comfortable with the financing strategy based on our recent discussions with management. As shown in Exhibit 4, Fortis' forward P/E over the past five years mostly ranged from about 14x to 19x (excluding the peak in 2007 due to EPS dilution from the Terasen transaction as the deal closed in May, which is after Terasen's seasonally strong months). Our selected P/E multiple is at the upper end of the five-year range, reflecting the low interest rate environment and good growth from the core Canadian regulated utilities.

Exhibit 4: Forward P/E

Source: Company reports; RBC Capital Markets estimates

## Valuation

Our price target of \$34.00 is based on a forward P/E of 18x 2012E EPS. Our selected P/E multiple is at the upper end of the five-year range, reflecting the low interest rate environment, good growth from the core Canadian regulated utilities, and the Waneta Dam expansion that will not contribute to earnings until 2015.

## Price Target Impediment

The political environment in Belize, the risk of punitive regulatory decisions, economic/tourism conditions in its service territories, operational or financial issues at newly acquired businesses, and acquisitions or projects that fail to gain the confidence of investors may have implications for our price target.

## Company Description

Fortis Inc. is a utility holding company for Newfoundland Power, FortisAlberta, FortisBC, Terasen Inc., Maritime Electric, Canadian Niagara Power, Cornwall Electric, BECOL, two electric utilities in the Turks and Caicos, and 70%-owned Belize Electricity. It also holds a 100% interest in Fortis Properties and a 59.5% interest in Caribbean Utilities.

## Required Disclosures

### Non-U.S. Analyst Disclosure

Danny Hung and Nelson Ng (i) are not registered/qualified as research analysts with the NYSE and/or FINRA and (ii) may not be associated persons of the RBC Capital Markets, LLC and therefore may not be subject to FINRA Rule 2711 and NYSE Rule 472 restrictions on communications with a subject company, public appearances and trading securities held by a research analyst account.

### Conflicts Disclosures

The analyst(s) responsible for preparing this research report received compensation that is based upon various factors, including total revenues of the member companies of RBC Capital Markets and its affiliates, a portion of which are or have been generated by investment banking activities of the member companies of RBC Capital Markets and its affiliates.

A member company of RBC Capital Markets or one of its affiliates received compensation for investment banking services from Fortis Inc. in the past 12 months.

Royal Bank of Canada, together with its affiliates, beneficially owns 1 percent or more of a class of common equity securities of Fortis Inc..

A member company of RBC Capital Markets or one of its affiliates received compensation for products or services other than investment banking services from Fortis Inc. during the past 12 months. During this time, a member company of RBC Capital Markets or one of its affiliates provided non-investment banking securities-related services to Fortis Inc..

A member company of RBC Capital Markets or one of its affiliates received compensation for products or services other than investment banking services from Fortis Inc. during the past 12 months. During this time, a member company of RBC Capital Markets or one of its affiliates provided non-securities services to Fortis Inc..

RBC Capital Markets is currently providing Fortis Inc. with non-investment banking securities-related services.

RBC Capital Markets is currently providing Fortis Inc. with non-securities services.

RBC Capital Markets has provided Fortis Inc. with investment banking services in the past 12 months.

RBC Capital Markets has provided Fortis Inc. with non-investment banking securities-related services in the past 12 months.

RBC Capital Markets has provided Fortis Inc. with non-securities services in the past 12 months.

The author is employed by RBC Dominion Securities Inc., a securities broker-dealer with principal offices located in Toronto, Canada.

### Explanation of RBC Capital Markets Equity Rating System

An analyst's 'sector' is the universe of companies for which the analyst provides research coverage. Accordingly, the rating assigned to a particular stock represents solely the analyst's view of how that stock will perform over the next 12 months relative to the analyst's sector average.

#### Ratings

**Top Pick (TP):** Represents best in Outperform category; analyst's best ideas; expected to significantly outperform the sector over 12 months; provides best risk-reward ratio; approximately 10% of analyst's recommendations.

**Outperform (O):** Expected to materially outperform sector average over 12 months.

**Sector Perform (SP):** Returns expected to be in line with sector average over 12 months.

**Underperform (U):** Returns expected to be materially below sector average over 12 months.

#### Risk Qualifiers (any of the following criteria may be present):

**Average Risk (Avg):** Volatility and risk expected to be comparable to sector; average revenue and earnings predictability; no significant cash flow/financing concerns over coming 12-24 months; fairly liquid.

**Above Average Risk (AA):** Volatility and risk expected to be above sector; below average revenue and earnings predictability; may not be suitable for a significant class of individual equity investors; may have negative cash flow; low market cap or float.

**Speculative (Spec):** Risk consistent with venture capital; low public float; potential balance sheet concerns; risk of being delisted.

### Distribution of Ratings

For the purpose of ratings distributions, regulatory rules require member firms to assign ratings to one of three rating categories - Buy, Hold/Neutral, or Sell - regardless of a firm's own rating categories. Although RBC Capital Markets' ratings of Top Pick/Outperform, Sector Perform and Underperform most closely correspond to Buy, Hold/Neutral and Sell, respectively, the meanings are not the same because our ratings are determined on a relative basis (as described above).

Distribution of Ratings RBC Capital Markets, Equity Research				
Rating	Count	Percent	Investment Banking Serv./Past 12 Mos.	
			Count	Percent
BUY[TP/O]	694	50.70	189	27.23
HOLD[SP]	613	44.70	136	22.19
SELL[U]	64	4.70	9	14.06

References to a Recommended List in the recommendation history chart may include one or more recommended lists or model portfolios maintained by a business unit of the Wealth Management Division of RBC Capital Markets, LLC. These Recommended Lists include the Prime Opportunity List (RL 3), a former list called the Private Client Prime Portfolio (RL 4), the Guided Portfolio: Prime Income (RL 6), the Guided Portfolio: Large Cap (RL 7), the Guided Portfolio: Dividend Growth (RL 8), and the Guided Portfolio: Midcap 111 (RL9). The abbreviation 'RL On' means the date a security was placed on a Recommended List. The abbreviation 'RL Off' means the date a security was removed from a Recommended List.

## Conflicts Policy

RBC Capital Markets Policy for Managing Conflicts of Interest in Relation to Investment Research is available from us on request. To access our current policy, clients should refer to

<https://www.rbccm.com/global/file-414164.pdf>

or send a request to RBC CM Research Publishing, P.O. Box 50, 200 Bay Street, Royal Bank Plaza, 29th Floor, South Tower, Toronto, Ontario M5J 2W7. We reserve the right to amend or supplement this policy at any time.

## Dissemination of Research and Short-Term Trading Calls

RBC Capital Markets endeavors to make all reasonable efforts to provide research simultaneously to all eligible clients, having regard to local time zones in overseas jurisdictions. RBC Capital Markets' equity research is posted to our proprietary websites to ensure eligible clients receive coverage initiations and changes in ratings, targets and opinions in a timely manner. Additional distribution may be done by the sales personnel via email, fax or regular mail. Clients may also receive our research via third-party vendors. Please contact your investment advisor or institutional salesperson for more information regarding RBC Capital Markets' research. RBC Capital Markets also provides eligible clients with access to SPARC on the Firm's proprietary INSIGHT website. SPARC contains market color and commentary, and may also contain Short-Term Trade Ideas regarding the publicly-traded common equity of subject companies on which the Firm currently provides equity research coverage. SPARC may be accessed via the following hyperlink: <https://www.rbcinsight.com>. A Short-Term Trade Idea reflects the research analyst's directional view regarding the price of the subject company's publicly-traded common equity in the coming days or weeks, based on market and trading events. A Short-Term Trade Idea may differ from the price targets and recommendations in our published research reports reflecting the research analyst's views of the longer-term (one year) prospects of the subject company, as a result of the differing time horizons, methodologies and/or other factors. Thus, it is possible that a subject company's common equity that is considered a long-term 'sector perform' or even an

'underperform' might be a short-term buying opportunity as a result of temporary selling pressure in the market; conversely, a subject company's common equity rated a long-term 'outperform' could be considered susceptible to a short-term downward price correction. Short-Term Trade Ideas are not ratings, nor are they part of any ratings system, and the Firm generally does not intend, nor undertakes any obligation, to maintain or update Short-Term Trade Ideas. Securities and Short-Term Trade Ideas discussed in SPARC may not be suitable for all investors and have not been tailored to individual investor circumstances and objectives, and investors should make their own independent decisions regarding any securities or strategies discussed herein.

## Analyst Certification

All of the views expressed in this report accurately reflect the personal views of the responsible analyst(s) about any and all of the subject securities or issuers. No part of the compensation of the responsible analyst(s) named herein is, or will be, directly or indirectly, related to the specific recommendations or views expressed by the responsible analyst(s) in this report.

## Disclaimer

RBC Capital Markets is the business name used by certain subsidiaries of Royal Bank of Canada, including RBC Dominion Securities Inc., RBC Capital Markets, LLC, Royal Bank of Canada Europe Limited and Royal Bank of Canada - Sydney Branch. The information contained in this report has been compiled by RBC Capital Markets from sources believed to be reliable, but no representation or warranty, express or implied, is made by Royal Bank of Canada, RBC Capital Markets, its affiliates or any other person as to its accuracy, completeness or correctness. All opinions and estimates contained in this report constitute RBC Capital Markets' judgement as of the date of this report, are subject to change without notice and are provided in good faith but without legal responsibility. Nothing in this report constitutes legal, accounting or tax advice or individually tailored investment advice. This material is prepared for general circulation to clients and has been prepared without regard to the individual financial circumstances and objectives of persons who receive it. The investments or services contained in this report may not be suitable for you and it is recommended that you consult an independent investment advisor if you are in doubt about the suitability of such investments or services. This report is not an offer to sell or a solicitation of an offer to buy any securities. Past performance is not a guide to future performance, future returns are not guaranteed, and a loss of original capital may occur. RBC Capital Markets research analyst compensation is based in part on the overall profitability of RBC Capital Markets, which includes profits attributable to investment banking revenues. Every province in Canada, state in the U.S., and most countries throughout the world have their own laws regulating the types of securities and other investment products which may be offered to their residents, as well as the process for doing so. As a result, the securities discussed in this report may not be eligible for sale in some jurisdictions. This report is not, and under no circumstances should be construed as, a solicitation to act as securities broker or dealer in any jurisdiction by any person or company that is not legally permitted to carry on the business of a securities broker or dealer in that jurisdiction. ## COMPANY UPDATE | COMMENT

MARCH 16, 2011

## Fortis Inc. (TSX: FTS)

## Supreme Court of Belize Dismisses Belize Electricity's Appeal

Sector Perform  
Average Risk

Price:	32.13	Price Target:	34.00
Shares O/S (MM):	174.4	Implied All-In Return:	9%
Dividend:	1.16	Market Cap (MM):	5,603
Float (MM):	174.4	Yield:	3.6%
Debt to Cap:	58%		

## Event

The Supreme Court of Belize released its decision on the 2008 Annual Tariff Review Proceeding.

## Investment Opinion

- Belize Electricity's Appeal Dismissed.** The Supreme Court of Belize dismissed Belize Electricity Limited's appeal (BEL is 70% owned by Fortis) of the Public Utilities Commission's Final Decision, following the 2008 Annual Tariff Review Proceeding. The Supreme Court judge found that among other things, "Good Utility Practice as defined by [the Independent Expert appointed by the Court] in his Report is not applicable to Belize."
- What Comes Next?** Fortis and Belize Electricity will continue to further assess their options and legal remedies, including appeal. It is our understanding that the next highest court is a pan-Caribbean court and although the politics of the dispute may be one step removed, it is possible that BEL will need to appeal to the highest court, which is the Privy Council that sits in the United Kingdom where we believe the appeal has the best chance of succeeding.
- BEL is Not a Material Contributor to Earnings.** Despite the headlines regarding Fortis' troubles in Belize, BEL contributed only \$2 million to earnings in 2010 (less than 1% of total earnings). As such, we do not view the ongoing dispute as material to Fortis' earnings or our outlook.
- Background on Fight with Belize Regulator.** In its June 2008 Final Decision on Belize Electricity's 2008/2009 rate application, the PUC allowed a greater fuel cost/purchased power "recovery", which was offset by a lower return on assets (10% vs. the previous 12%) combined with BZ\$36 million (C\$18 million) of retroactive disallowances for Belize Electricity. For further details, please refer to our *Research Comment* on June 30, 2008.
- Valuation.** Our price target of \$34.00 (unchanged) is based on a forward P/E of 18x 2012E EPS. Our selected P/E multiple is at the upper end of the five-year range, reflecting the low interest rate environment, good growth from the core Canadian regulated utilities, and the Waneta Dam expansion that will not contribute to earnings until 2015.

Priced as of prior trading day's market close, EST (unless otherwise noted).

## Explanation of RBC Capital Markets Equity Rating System

An analyst's 'sector' is the universe of companies for which the analyst provides research coverage. Accordingly, the rating assigned to a particular stock represents solely the analyst's view of how that stock will perform over the next 12 months relative to the analyst's sector average.

### Ratings

**Top Pick (TP):** Represents best in Outperform category; analyst's best ideas; expected to significantly outperform the sector over 12 months; provides best risk-reward ratio; approximately 10% of analyst's recommendations.

**Outperform (O):** Expected to materially outperform sector average over 12 months.

**Sector Perform (SP):** Returns expected to be in line with sector average over 12 months.

**Underperform (U):** Returns expected to be materially below sector average over 12 months.

### Risk Qualifiers (any of the following criteria may be present):

**Average Risk (Avg):** Volatility and risk expected to be comparable to sector; average revenue and earnings predictability; no significant cash flow/financing concerns over coming 12-24 months; fairly liquid.

**Above Average Risk (AA):** Volatility and risk expected to be above sector; below average revenue and earnings predictability; may not be suitable for a significant class of individual equity investors; may have negative cash flow; low market cap or float.

**Speculative (Spec):** Risk consistent with venture capital; low public float; potential balance sheet concerns; risk of being delisted.

## Distribution of Ratings

For the purpose of ratings distributions, regulatory rules require member firms to assign ratings to one of three rating categories - Buy, Hold/Neutral, or Sell - regardless of a firm's own rating categories. Although RBC Capital Markets' ratings of Top Pick/Outperform, Sector Perform and Underperform most closely correspond to Buy, Hold/Neutral and Sell, respectively, the meanings are not the same because our ratings are determined on a relative basis (as described above).

Distribution of Ratings RBC Capital Markets, Equity Research				
Rating	Count	Percent	Investment Banking Serv./Past 12 Mos.	
			Count	Percent
BUY[TP/O]	693	51.30	200	28.86
HOLD[SP]	596	44.10	134	22.48
SELL[U]	61	4.50	11	18.03

References to a Recommended List in the recommendation history chart may include one or more recommended lists or model portfolios maintained by a business unit of the Wealth Management Division of RBC Capital Markets, LLC. These Recommended Lists include the Prime Opportunity List (RL 3), a former list called the Private Client Prime Portfolio (RL 4), the Guided Portfolio: Prime Income (RL 6), the Guided Portfolio: Large Cap (RL 7), the Guided Portfolio: Dividend Growth (RL 8), and the Guided Portfolio: Midcap 111 (RL9). The abbreviation 'RL On' means the date a security was placed on a Recommended List. The abbreviation 'RL Off' means the date a security was removed from a Recommended List.

## Conflicts Policy

RBC Capital Markets Policy for Managing Conflicts of Interest in Relation to Investment Research is available from us on request. To access our current policy, clients should refer to

<https://www.rbccm.com/global/file-414164.pdf>

or send a request to RBC CM Research Publishing, P.O. Box 50, 200 Bay Street, Royal Bank Plaza, 29th Floor, South Tower, Toronto, Ontario M5J 2W7. We reserve the right to amend or supplement this policy at any time.

## Dissemination of Research and Short-Term Trading Calls

RBC Capital Markets endeavors to make all reasonable efforts to provide research simultaneously to all eligible clients, having regard to local time zones in overseas jurisdictions. RBC Capital Markets' equity research is posted to our proprietary websites to ensure eligible clients receive coverage initiations and changes in ratings, targets and opinions in a timely manner. Additional distribution may be done by the sales personnel via email, fax or regular mail. Clients may also receive our research via third-party vendors. Please contact your investment advisor or institutional salesperson for more information regarding RBC Capital Markets' research. RBC Capital Markets also provides eligible clients with access to SPARC on the Firm's proprietary INSIGHT website. SPARC contains market color and commentary, and may also contain Short-Term Trade Ideas regarding the publicly-traded common equity of subject companies on which the Firm currently provides equity research coverage. SPARC may be accessed via the following hyperlink: <https://www.rbcinsight.com>. A Short-Term Trade Idea reflects the research analyst's directional view regarding the price of the subject company's publicly-traded common equity in the coming days or weeks, based on market and trading events. A Short-Term Trade Idea may differ from the price targets and recommendations in our published research reports reflecting the research analyst's views of the longer-term (one year) prospects of the subject company, as a result of the differing time horizons, methodologies and/or other factors. Thus, it is possible that a subject company's common equity that is considered a long-term 'sector perform' or even an

'underperform' might be a short-term buying opportunity as a result of temporary selling pressure in the market; conversely, a subject company's common equity rated a long-term 'outperform' could be considered susceptible to a short-term downward price correction. Short-Term Trade Ideas are not ratings, nor are they part of any ratings system, and the Firm generally does not intend, nor undertakes any obligation, to maintain or update Short-Term Trade Ideas. Securities and Short-Term Trade Ideas discussed in SPARC may not be suitable for all investors and have not been tailored to individual investor circumstances and objectives, and investors should make their own independent decisions regarding any securities or strategies discussed herein.

## Analyst Certification

All of the views expressed in this report accurately reflect the personal views of the responsible analyst(s) about any and all of the subject securities or issuers. No part of the compensation of the responsible analyst(s) named herein is, or will be, directly or indirectly, related to the specific recommendations or views expressed by the responsible analyst(s) in this report.

## Disclaimer

RBC Capital Markets is the business name used by certain subsidiaries of Royal Bank of Canada, including RBC Dominion Securities Inc., RBC Capital Markets, LLC, Royal Bank of Canada Europe Limited and Royal Bank of Canada - Sydney Branch. The information contained in this report has been compiled by RBC Capital Markets from sources believed to be reliable, but no representation or warranty, express or implied, is made by Royal Bank of Canada, RBC Capital Markets, its affiliates or any other person as to its accuracy, completeness or correctness. All opinions and estimates contained in this report constitute RBC Capital Markets' judgement as of the date of this report, are subject to change without notice and are provided in good faith but without legal responsibility. Nothing in this report constitutes legal, accounting or tax advice or individually tailored investment advice. This material is prepared for general circulation to clients and has been prepared without regard to the individual financial circumstances and objectives of persons who receive it. The investments or services contained in this report may not be suitable for you and it is recommended that you consult an independent investment advisor if you are in doubt about the suitability of such investments or services. This report is not an offer to sell or a solicitation of an offer to buy any securities. Past performance is not a guide to future performance, future returns are not guaranteed, and a loss of original capital may occur. RBC Capital Markets research analyst compensation is based in part on the overall profitability of RBC Capital Markets, which includes profits attributable to investment banking revenues. Every province in Canada, state in the U.S., and most countries throughout the world have their own laws regulating the types of securities and other investment products which may be offered to their residents, as well as the process for doing so. As a result, the securities discussed in this report may not be eligible for sale in some jurisdictions. This report is not, and under no circumstances should be construed as, a solicitation to act as securities broker or dealer in any jurisdiction by any person or company that is not legally permitted to carry on the business of a securities broker or dealer in that jurisdiction. ## COMPANY UPDATE | COMMENT

MAY 5, 2011

## Fortis Inc. (TSX: FTS)

### 2011 Off to a Good Start

### Sector Perform

### Average Risk

Price:	32.35	Price Target:	34.00
Shares O/S (MM):	175.5	Implied All-In Return:	9%
Dividend:	1.16	Market Cap (MM):	5,677
Float (MM):	175.5	Yield:	3.6%
Debt to Cap:	58%		

### Event

Fortis reported Q1/11 results.

### Investment Opinion

- **Good Q1/11 Results.** EPS for the quarter was \$0.67 compared to our estimate of \$0.63 and \$0.58 in Q1/10. The Canadian Regulated Utilities turned in solid results, which were due to a combination of good underlying fundamentals in the businesses, quarterly timing differences related to costs and the timing of rate increases, and a small gain on sale in FortisAlberta (less than \$0.01/share).
- **Modestly Bumping Up 2011 EPS Estimate.** We have increased our 2011 EPS estimate to \$1.80 (from \$1.78) to reflect better results from the Canadian Regulated Utilities (in particular FortisBC Electric), partially offset by weaker estimated earnings from the utilities in the Caribbean (Belize and also a stronger C\$).
- **U.S. Utility Acquisition: Still Working Away, but We Expect Management to Continue to Show Lots of Discipline.** Fortis continues to evaluate U.S. utility acquisition opportunities and the parameters remain the same (i.e., up to \$5 billion EV and single state preferred). One trend that could provide acquisition opportunities is the possible sale of U.S. utilities owned by foreign companies.
- **Funding Plan is Solid.** Despite a heavy capex plan (about \$1.2 billion for 2011), the balance sheet is in good shape, which affords the company flexibility. Equity needs are expected to be modest with the potential for a relatively small issuance late in 2011 or in 2012. Optimally, any equity issuance would coincide with acquisition financing.
- **Overall Views Unchanged.** We view the shares as fairly valued despite trading at a premium to other large cap regulated utility stocks in our coverage. We see a premium P/E valuation as warranted due to the attractive group of Canadian regulated utility assets (particularly the western Canadian utilities) and a disciplined management team.
- **Valuation.** Our price target of \$34.00 is based on a forward P/E of 18x 2012E EPS. Our selected P/E multiple is at the upper end of the five-year range, reflecting the low interest rate environment, good growth from the core Canadian regulated utilities, and the Waneta Dam expansion that will not contribute to earnings until 2015.

## Q1/11 Results Higher Than Expectations

Fortis' normalized Q1/11 EPS was \$0.67, compared to our estimate of \$0.63 and \$0.58 in Q1/10. The higher-than-expected earnings were mainly due to results from FortisAlberta and FortisBC Electric, which benefited from a combination of low purchased power costs (strong hydrology driving down prices in BC/PacNW) for FortisBC Electric, and quarterly timing differences (costs and rate implementation) along with a gain on sale for FortisAlberta. The quarterly results compared to our estimate are set out in Exhibit 1.

### Exhibit 1: Normalized Earnings (In \$MM except per share figures)

## Highlights of the Quarter and Outlook

- **Strong Q1/11 Mainly Due to Canadian Regulated Utilities.** Higher-than-forecast earnings were mainly attributable to strong results from FortisAlberta and FortisBC Electric, and to a lesser extent, FortisBC Energy (formerly Terasen) due to a combination of strong underlying business fundamentals and quarterly timing differences. FortisAlberta also benefited from a roughly \$1 million gain (after-tax) on the sale of land in Q1/11.
- **Belize Update: Appeal of Trial Judgment to be Filed.** In March 2011, the Supreme Court of Belize dismissed Belize Electricity Limited's appeal (BEL is 70% owned by Fortis) of the Public Utilities Commission's Final Decision, following the 2008 Annual Tariff Reviewing Proceeding. Fortis is in the process of filing an appeal of the trial judgment, which is required prior to filing an appeal to the Caribbean Court of Justice. As BEL is not a material contributor to Fortis' earnings (it contributed \$2 million of earnings in 2010), we do not view the ongoing dispute as material to the share price.
- **Long-Term Utility Growth Plan Remains Intact.** With roughly \$1.2 billion of capex expected in 2011 and over the \$5.5 billion over the five-year period 2011 through 2015, the majority of Fortis' planned capital investment remains in regulated electric utilities (about 63%) driven by FortisAlberta and FortisBC Electric. Approximately 20% and 17% of the five-year capex program will be incurred at FortisBC Energy and at non-regulated operations, respectively.
- **Construction Work Continues on Waneta Expansion.** Construction work continued on the \$900 million Waneta Expansion, a 335 MW hydro project in B.C. that is expected to be in service in the spring of 2015. With a controlling interest of 51%, Fortis will operate and maintain the facility, which will sell energy and capacity to BC Hydro and FortisBC Electric under 40-year power sales contracts.
- **Potential U.S. Utility Acquisition: Still Active, But Not Much New to Report.** Fortis remains interested in acquiring a U.S. utility. We believe that the company will remain disciplined with respect to acquisition parameters, evidenced by the fact that management has been talking about a U.S. utility acquisition for many years, but has yet to pull the trigger. The following is a recap of the parameters that management has discussed with respect to a U.S. utility acquisition.
  - **Potential for a Scale Changing Acquisition.** The company continues to seek out regulated electric and/or gas utilities with a preference for businesses in a single state (i.e. one regulator). Fortis is comfortable with an integrated

electric utility as long as the generation assets are in regulated rate base. The target size is US\$1 billion to US\$5 billion of enterprise value with a utility in the US\$3 billion enterprise value range as being optimal.

- **Going Solo is Preferred.** Similar to comments made throughout the years, management continues to prefer to acquire 100% of assets without any partners. The company feels this reduces the complexity of a transaction and allows the company to proceed with an acquisition more expeditiously.
- **Will Partner if Necessary, but Not a Consortium.** To the extent an acquisition target is too large for Fortis to complete on its own, the company would consider taking on one partner (e.g. a Canadian pension fund) where the company would have at least a 50% interest.

## 2011 EPS Estimate Modestly Increased

We have increased our 2011 EPS estimate to \$1.80 (from \$1.78) to reflect better results from the Canadian Regulated Utilities (in particular FortisBC Electric), partially offset by weaker estimated earnings from the utilities in the Caribbean (Belize in particular, but also a stronger C\$). Our revised estimates are set out in Exhibit 2.

## Valuation

Our price target of \$34.00 is based on a forward P/E of 18x 2012E EPS. Our selected P/E multiple is at the upper end of the five-year range, reflecting the low interest rate environment, good growth from the core Canadian regulated utilities and the Waneta Dam expansion, which will not contribute to earnings until 2015.

## Price Target Impediment

The political environment in Belize, the risk of punitive regulatory decisions, economic/tourism conditions in its service territories, operational or financial issues at newly acquired businesses, and acquisitions or projects that fail to gain the confidence of investors may have implications for our price target.

## Company Description

Fortis Inc. is a utility holding company for Newfoundland Power, FortisAlberta, FortisBC, Terasen Inc., Maritime Electric, Canadian Niagara Power, Cornwall Electric, BECOL, two electric utilities in the Turks and Caicos, and 70%-owned Belize Electricity. It also holds a 100% interest in Fortis Properties and a 59.5% interest in Caribbean Utilities.

## Required Disclosures

### Non-U.S. Analyst Disclosure

Danny Hung and Nelson Ng (i) are not registered/qualified as research analysts with the NYSE and/or FINRA and (ii) may not be associated persons of the RBC Capital Markets, LLC and therefore may not be subject to FINRA Rule 2711 and NYSE Rule 472 restrictions on communications with a subject company, public appearances and trading securities held by a research analyst account.

### Conflicts Disclosures

The analyst(s) responsible for preparing this research report received compensation that is based upon various factors, including total revenues of the member companies of RBC Capital Markets and its affiliates, a portion of which are or have been generated by investment banking activities of the member companies of RBC Capital Markets and its affiliates.

A member company of RBC Capital Markets or one of its affiliates received compensation for investment banking services from Fortis Inc. in the past 12 months.

Royal Bank of Canada, together with its affiliates, beneficially owns 1 percent or more of a class of common equity securities of Fortis Inc..

A member company of RBC Capital Markets or one of its affiliates received compensation for products or services other than investment banking services from Fortis Inc. during the past 12 months. During this time, a member company of RBC Capital Markets or one of its affiliates provided non-investment banking securities-related services to Fortis Inc..

A member company of RBC Capital Markets or one of its affiliates received compensation for products or services other than investment banking services from Fortis Inc. during the past 12 months. During this time, a member company of RBC Capital Markets or one of its affiliates provided non-securities services to Fortis Inc..

RBC Capital Markets is currently providing Fortis Inc. with non-investment banking securities-related services.

RBC Capital Markets is currently providing Fortis Inc. with non-securities services.

RBC Capital Markets has provided Fortis Inc. with investment banking services in the past 12 months.

RBC Capital Markets has provided Fortis Inc. with non-securities services in the past 12 months.

The author is employed by RBC Dominion Securities Inc., a securities broker-dealer with principal offices located in Toronto, Canada.

### Explanation of RBC Capital Markets Equity Rating System

An analyst's 'sector' is the universe of companies for which the analyst provides research coverage. Accordingly, the rating assigned to a particular stock represents solely the analyst's view of how that stock will perform over the next 12 months relative to the analyst's sector average.

#### Ratings

**Top Pick (TP):** Represents best in Outperform category; analyst's best ideas; expected to significantly outperform the sector over 12 months; provides best risk-reward ratio; approximately 10% of analyst's recommendations.

**Outperform (O):** Expected to materially outperform sector average over 12 months.

**Sector Perform (SP):** Returns expected to be in line with sector average over 12 months.

**Underperform (U):** Returns expected to be materially below sector average over 12 months.

#### Risk Qualifiers (any of the following criteria may be present):

**Average Risk (Avg):** Volatility and risk expected to be comparable to sector; average revenue and earnings predictability; no significant cash flow/financing concerns over coming 12-24 months; fairly liquid.

**Above Average Risk (AA):** Volatility and risk expected to be above sector; below average revenue and earnings predictability; may not be suitable for a significant class of individual equity investors; may have negative cash flow; low market cap or float.

**Speculative (Spec):** Risk consistent with venture capital; low public float; potential balance sheet concerns; risk of being delisted.

### Distribution of Ratings

For the purpose of ratings distributions, regulatory rules require member firms to assign ratings to one of three rating categories - Buy, Hold/Neutral, or Sell - regardless of a firm's own rating categories. Although RBC Capital Markets' ratings of Top Pick/Outperform, Sector Perform and Underperform most closely correspond to Buy, Hold/Neutral and Sell, respectively, the meanings are not the same because our ratings are determined on a relative basis (as described above).

Distribution of Ratings RBC Capital Markets, Equity Research				
Rating	Count	Percent	Investment Banking Serv./Past 12 Mos.	
			Count	Percent
BUY[TP/O]	706	52.30	211	29.89
HOLD[SP]	587	43.40	129	21.98
SELL[U]	58	4.30	12	20.69

References to a Recommended List in the recommendation history chart may include one or more recommended lists or model portfolios maintained by a business unit of the Wealth Management Division of RBC Capital Markets, LLC. These Recommended Lists include the Prime Opportunity List (RL 3), a former list called the Private Client Prime Portfolio (RL 4), the Guided Portfolio: Prime Income (RL 6), the Guided Portfolio: Large Cap (RL 7), the Guided Portfolio: Dividend Growth (RL 8), and the Guided Portfolio: Midcap 111 (RL9). The abbreviation 'RL On' means the date a security was placed on a Recommended List. The abbreviation 'RL Off' means the date a security was removed from a Recommended List.

## Conflicts Policy

RBC Capital Markets Policy for Managing Conflicts of Interest in Relation to Investment Research is available from us on request. To access our current policy, clients should refer to

<https://www.rbccm.com/global/file-414164.pdf>

or send a request to RBC CM Research Publishing, P.O. Box 50, 200 Bay Street, Royal Bank Plaza, 29th Floor, South Tower, Toronto, Ontario M5J 2W7. We reserve the right to amend or supplement this policy at any time.

## Dissemination of Research and Short-Term Trading Calls

RBC Capital Markets endeavors to make all reasonable efforts to provide research simultaneously to all eligible clients, having regard to local time zones in overseas jurisdictions. RBC Capital Markets' equity research is posted to our proprietary websites to ensure eligible clients receive coverage initiations and changes in ratings, targets and opinions in a timely manner. Additional distribution may be done by the sales personnel via email, fax or regular mail. Clients may also receive our research via third-party vendors. Please contact your investment advisor or institutional salesperson for more information regarding RBC Capital Markets' research. RBC Capital Markets also provides eligible clients with access to SPARC on the Firm's proprietary INSIGHT website. SPARC contains market color and commentary, and may also contain Short-Term Trade Ideas regarding the publicly-traded common equity of subject companies on which the Firm currently provides equity research coverage. SPARC may be accessed via the following hyperlink: <https://www.rbcinsight.com>. A Short-Term Trade Idea reflects the research analyst's directional view regarding the price of the subject company's publicly-traded common equity in the coming days or weeks, based on market and trading events. A Short-Term Trade Idea may differ from the price targets and recommendations in our published research reports reflecting the research analyst's views of the longer-term (one year) prospects of the subject company, as a result of the differing time horizons, methodologies and/or other factors. Thus, it is possible that a subject company's common equity that is considered a long-term 'sector perform' or even an

'underperform' might be a short-term buying opportunity as a result of temporary selling pressure in the market; conversely, a subject company's common equity rated a long-term 'outperform' could be considered susceptible to a short-term downward price correction. Short-Term Trade Ideas are not ratings, nor are they part of any ratings system, and the Firm generally does not intend, nor undertakes any obligation, to maintain or update Short-Term Trade Ideas. Securities and Short-Term Trade Ideas discussed in SPARC may not be suitable for all investors and have not been tailored to individual investor circumstances and objectives, and investors should make their own independent decisions regarding any securities or strategies discussed herein.

## Analyst Certification

All of the views expressed in this report accurately reflect the personal views of the responsible analyst(s) about any and all of the subject securities or issuers. No part of the compensation of the responsible analyst(s) named herein is, or will be, directly or indirectly, related to the specific recommendations or views expressed by the responsible analyst(s) in this report.

## Disclaimer

RBC Capital Markets is the business name used by certain subsidiaries of Royal Bank of Canada, including RBC Dominion Securities Inc., RBC Capital Markets, LLC, Royal Bank of Canada Europe Limited and Royal Bank of Canada - Sydney Branch. ## COMPANY UPDATE | COMMENT

JUNE 15, 2011

Fortis Inc. (TSX: FTS)  
Cross-Border ShoppingSector Perform  
Average Risk

Price:	31.77	Price Target:	34.00
Shares O/S (MM):	184.6	Implied All-In Return:	11%
Dividend:	1.16	Market Cap (MM):	5,865
Float (MM):	184.6	Yield:	3.7%
Debt to Cap:	58%		

## Event

Fortis closed its \$300 million equity offering; publishing our views on the Central Vermont Public Service (CVPS) acquisition.

## Investment Opinion

- **CVPS Acquisition is Incrementally Positive.** We view the pending CVPS acquisition as modestly positive as it: (1) is a smaller transaction at US\$700 million enterprise value compared to the previously-stated US\$3 billion to US\$5 billion target-size (enterprise value) that can help prove-up the U.S. expansion strategy; (2) the utility is fairly close geographically to Fortis' utilities in eastern Canada; (3) CVPS is geographically close to other potential utility targets, particularly those owned by European companies that might eventually be sold; and (4) the transaction is expected to deliver modest EPS accretion in its first full year, which should increase over time as CVPS' annual rate base growth is forecast to be 9% (faster than the roughly 6% average growth for Fortis' other utilities).
- **Fortis Paid a Full Price for CVPS.** The purchase price P/E valuation is 21x the mid-point of CVPS' 2011 EPS guidance. As a multiple to rate base (adjusted for debt at Vermont Transco), Fortis paid approximately 1.4x 2011E mid-year rate base.
- **Modest Expected Accretion Should Increase Over Time.** Based on CVPS' 2011 EPS guidance range, we estimate that the transaction could add between \$0.01/share and \$0.03/share to EPS in the first full-year. We expect EPS accretion to increase over time as rate base growth at CVPS is forecast to exceed that of Fortis' other utilities.
- **Colour Coding the Dollars: The Recent Equity Issue is Not Earmarked for the CVPS Transaction.** Fortis needed roughly \$300 million of common equity in late 2011 or early 2012 to fund the existing capital plan. While it is hard to resist tying the equity deal to the CVPS announcement, the equity deal is an acceleration of the existing need that also reduces financing risk when the CVPS deal closes (Fortis is likely to issue preferred shares at that time).
- **Valuation.** Our price target of \$34.00 is based on a forward P/E of 18x 2012E EPS. Our selected P/E multiple is at the upper end of the five-year range, reflecting the low interest rate environment, good growth from the core Canadian regulated utilities and the Waneta Dam expansion, which will not contribute to earnings until 2015.

Priced as of prior trading day's market close, EST (unless otherwise noted).

## CVPS Transaction: Incrementally Positive

We view the Central Vermont Public Service (CVPS) acquisition as a modest positive for the stock for the following reasons:

- (1) **Relatively Small Size Allows Fortis to “Prove” the U.S. Acquisition Strategy to the Market.** Fortis has long discussed a desire to acquire a US\$3 billion to US\$5 billion enterprise value utility. However, we believe that the market was cautious on a transaction of that size and the CVPS deal at roughly US\$700 million enterprise value is a more manageable size that will allow the company to prove to the market that it can navigate U.S. state regulation. Further, it demonstrates that management is taking a methodical approach to U.S. expansion and will not “force” a larger deal if the fit (strategic and financial) is not right.
- (2) **Geographically Attractive Footprint to Further Grow the U.S. Business.** The U.S. northeast is a region that is fairly close to Fortis’ central and eastern Canadian operations, but is also well situated for potential future acquisitions, which may include utilities that are currently owned by larger European-based companies.
- (3) **Modest Expected EPS Accretion That Will Grow Over Time.** As shown in Exhibit 1, we expect the transaction to contribute between \$0.01/share and \$0.03/share to annual EPS. Despite a significant premium paid for CVPS’ shares, we expect accretion to initially be driven by double-leverage (CVPS equity thickness of 57% compared to Fortis’ overall structure at 40%) and a “double-dip” cross-border financing that will result in a lower effective tax rate. Over time, CVPS’ rate base is expected to grow at roughly 9% annually (please see Exhibit 2), which is faster than the 6% estimated annual growth in rate base for the rest of Fortis’ utilities.
- (4) **Other Than the Smaller Size, the Acquisition Fits Everything That Management Has Discussed.** In looking at U.S. acquisitions, management has expressed a preference for an electric utility with single state regulation, minimal unregulated assets and good prospects for rate base growth. CVPS meets each of these factors.
- (5) **A Larger Acquisition is Likely Not Imminent.** We believe that Fortis executing a US\$700 million deal, while preferring to target a utility in the US\$3 billion to US\$5 billion range, is a sign that there is nothing of that size on the front burner that is likely to be announced in the near future.

## Our Thoughts on Other Recent Events

### Equity Financing: An Acceleration of Future Needs and De-Risking the Pending CVPS Requirement

Previous to the CVPS announcement, we estimated that Fortis had a need for roughly \$300 million in equity in late 2011 or early 2012 to finance the growth in its existing utilities (in particular western Canada) and the Waneta hydro expansion. Although it is convenient to link the \$300 million equity financing that just closed with the CVPS transaction, the acquisition is expected to close in six to 12 months and will be fully financed closer to that date. As such, we view the recently-closed equity financing as an acceleration of the forecast equity requirement to take advantage of supportive equity markets in addition to reducing the future equity needs (i.e. internal growth plus the CVPS acquisition).

Management expects to finance the equity for the CVPS acquisition with preferred shares although this will be dependent on the state of the preferred share market at the time. As such, it remains a possibility that common shares could be issued in six to 12 months time.

### Belize: Government Interested in Acquiring Fortis' 70% Stake in Belize Electricity Limited (BEL)

As a result of the ongoing issues at Belize Electricity Limited (BEL), the electric distribution utility in the country that is 70%-owned by Fortis, the government has expressed an interest in acquiring Fortis' stake. Overall, we believe that the ongoing dispute will continue to create negative headlines, although we believe that the financial impact is not particularly material.

- **BEL Does Not Materially Contribute to Earnings.** BEL generated \$2 million (\$0.01/share) of net income in 2010 and \$4 million in 2009 (\$0.02/share). From an asset perspective, BEL makes up 2% of Fortis' assets.
- **Appears to be Confined to BEL, but an Expansion to the Unregulated Power Business Could Increase the Exposure.** Fortis owns three unregulated hydro facilities in the country, which are not part of BEL. However, there is the potential that these assets could become swept up as part of the ongoing dispute. We estimate that the assets contribute roughly \$12 million to \$14 million of annual earnings (about \$0.06/share to \$0.07/share).
- **Mitigating Factor #1: It Appears that the Government is Willing to Pay (Some Concept of) Fair Value.** As far as we can tell, the government of Belize is not contemplating trying to seize the asset. There are various statements regarding the acquisition based on "fair value". If this were the case, Fortis would receive proceeds that it could either use to repay debt, or redeploy, thereby offsetting any negative impact from lost earnings.
- **Mitigating Factor #2: The Ultimate Court of Appeal is Not in Belize.** BEL lost its case in front of the Belize Supreme Court with respect to its rate dispute with the Belize Public Utilities Commission. The case is being heard by the court of appeal in Belize, which is unlikely to yield results. However, the ultimate court of appeal is a pan-Caribbean court, which should be more independent from Belize with a greater likelihood that BEL's arguments will resonate with respect to "good utility practices".

## Overview of Central Vermont Public Service (CVPS)

- **Service Territory and Customers.** CVPS is an electric utility with almost 160,000 customers in a service territory that covers about two-thirds of Vermont. In addition, CVPS owns a 41% interest in Vermont Transco, which owns and operates a high-voltage electric transmission system in the state.
- **Rate Base Expected to Grow at a 9% CAGR.** The historical rate base in addition to CVPS management's forecast is shown in Exhibit 2.
- **Capital Structure and ROE.** CVPS' allowed ROE for 2011 is 9.45%, which is broadly comparable to many of Fortis' existing utilities. However, the 57% equity thickness is quite a bit higher than Fortis' other utilities, although we see that as a compensating factor for a higher level of risk at CVPS compared to Fortis' Canadian regulated businesses (e.g., lower protection against customer usage).
- **Power Supply Expected to Shift.** Currently, about 50% of energy supply is sourced from nuclear (Vermont Yankee; owned by a third-party), about 40% from hydroelectric production (mostly Hydro-Quebec) and 10% from other sources. Going forward, CVPS has locked up additional supply from Hydro-Quebec and other sources to proactively replace the potential for lost power from the Vermont Yankee nuclear facility in 2012.

## Exhibit 2: Forecast Rate Base Growth (CVPS Management)

## Estimates Revised

We have revised our 2011 and 2012 EPS estimates to reflect the recent equity issuance in addition to the pending CVPS transaction. In 2011, our EPS estimate modestly declines to \$1.78 (down from \$1.80) to reflect dilution from the equity issued, partially offset by lower interest expense (at the Corporate level) on the repayment of debt. For 2012, our EPS estimate increases to \$1.91 (up from \$1.89) to reflect earnings from CVPS, partially offset by higher interest expense on debt used to partially finance the CVPS transaction (recorded at the CVPS level) and dilution from the recent equity issuance. Our revised estimates are set out in Exhibit 3.

## Valuation

Our price target of \$34.00 is based on a forward P/E of 18x 2012E EPS. Our selected P/E multiple is at the upper end of the five-year range, reflecting the low interest rate environment, good growth from the core Canadian regulated utilities and the Waneta Dam expansion, which will not contribute to earnings until 2015.

## Price Target Impediment

The political environment in Belize, the risk of punitive regulatory decisions, economic/tourism conditions in its service territories, operational or financial issues at newly acquired businesses, and acquisitions or projects that fail to gain the confidence of investors may have implications for our price target.

## Company Description

Fortis Inc. is a utility holding company for Newfoundland Power, FortisAlberta, FortisBC, Terasen Inc., Maritime Electric, Canadian Niagara Power, Cornwall Electric, BECOL, two electric utilities in the Turks and Caicos, and 70%-owned Belize Electricity. It also holds a 100% interest in Fortis Properties and a 59.5% interest in Caribbean Utilities. The company is in the process of acquiring Central Vermont Public Service.

## Required Disclosures

### Non-U.S. Analyst Disclosure

Danny Hung and Nelson Ng (i) are not registered/qualified as research analysts with the NYSE and/or FINRA and (ii) may not be associated persons of the RBC Capital Markets, LLC and therefore may not be subject to FINRA Rule 2711 and NYSE Rule 472 restrictions on communications with a subject company, public appearances and trading securities held by a research analyst account.

### Conflicts Disclosures

The analyst(s) responsible for preparing this research report received compensation that is based upon various factors, including total revenues of the member companies of RBC Capital Markets and its affiliates, a portion of which are or have been generated by investment banking activities of the member companies of RBC Capital Markets and its affiliates.

A member company of RBC Capital Markets or one of its affiliates received compensation for investment banking services from Fortis Inc. in the past 12 months.

A member company of RBC Capital Markets or one of its affiliates expects to receive or intends to seek compensation for investment banking services from Fortis Inc. in the next three months.

Royal Bank of Canada, together with its affiliates, beneficially owns 1 percent or more of a class of common equity securities of Fortis Inc..

A member company of RBC Capital Markets or one of its affiliates received compensation for products or services other than investment banking services from Fortis Inc. during the past 12 months. During this time, a member company of RBC Capital Markets or one of its affiliates provided non-investment banking securities-related services to Fortis Inc..

A member company of RBC Capital Markets or one of its affiliates received compensation for products or services other than investment banking services from Fortis Inc. during the past 12 months. During this time, a member company of RBC Capital Markets or one of its affiliates provided non-securities services to Fortis Inc..

### Explanation of RBC Capital Markets Equity Rating System

An analyst's 'sector' is the universe of companies for which the analyst provides research coverage. Accordingly, the rating assigned to a particular stock represents solely the analyst's view of how that stock will perform over the next 12 months relative to the analyst's sector average.

#### Ratings

**Top Pick (TP):** Represents best in Outperform category; analyst's best ideas; expected to significantly outperform the sector over 12 months; provides best risk-reward ratio; approximately 10% of analyst's recommendations.

**Outperform (O):** Expected to materially outperform sector average over 12 months.

**Sector Perform (SP):** Returns expected to be in line with sector average over 12 months.

**Underperform (U):** Returns expected to be materially below sector average over 12 months.

#### Risk Qualifiers (any of the following criteria may be present):

**Average Risk (Avg):** Volatility and risk expected to be comparable to sector; average revenue and earnings predictability; no significant cash flow/financing concerns over coming 12-24 months; fairly liquid.

**Above Average Risk (AA):** Volatility and risk expected to be above sector; below average revenue and earnings predictability; may not be suitable for a significant class of individual equity investors; may have negative cash flow; low market cap or float.

**Speculative (Spec):** Risk consistent with venture capital; low public float; potential balance sheet concerns; risk of being delisted.

### Distribution of Ratings

For the purpose of ratings distributions, regulatory rules require member firms to assign ratings to one of three rating categories - Buy, Hold/Neutral, or Sell - regardless of a firm's own rating categories. Although RBC Capital Markets' ratings of Top Pick/Outperform, Sector Perform and Underperform most closely correspond to Buy, Hold/Neutral and Sell, respectively, the meanings are not the same because our ratings are determined on a relative basis (as described above).

Distribution of Ratings RBC Capital Markets, Equity Research				
Rating	Count	Percent	Investment Banking Serv./Past 12 Mos.	
			Count	Percent
BUY[TP/O]	738	52.90	217	29.40
HOLD[SP]	595	42.70	135	22.69
SELL[U]	61	4.40	11	18.03

References to a Recommended List in the recommendation history chart may include one or more recommended lists or model portfolios maintained by a business unit of the Wealth Management Division of RBC Capital Markets, LLC. These Recommended Lists include the Prime Opportunity List (RL 3), a former list called the Private Client Prime Portfolio (RL 4), the Guided Portfolio: Prime Income (RL 6), the Guided Portfolio: Large Cap (RL 7), the Guided Portfolio: Dividend Growth (RL 8), and the Guided Portfolio: Midcap 111 (RL9). The abbreviation 'RL On' means the date a security was placed on a Recommended List. The abbreviation 'RL Off' means the date a security was removed from a Recommended List.

## Conflicts Policy

RBC Capital Markets Policy for Managing Conflicts of Interest in Relation to Investment Research is available from us on request. To access our current policy, clients should refer to

<https://www.rbccm.com/global/file-414164.pdf>

or send a request to RBC CM Research Publishing, P.O. Box 50, 200 Bay Street, Royal Bank Plaza, 29th Floor, South Tower, Toronto, Ontario M5J 2W7. We reserve the right to amend or supplement this policy at any time.

## Dissemination of Research and Short-Term Trading Calls

RBC Capital Markets endeavors to make all reasonable efforts to provide research simultaneously to all eligible clients, having regard to local time zones in overseas jurisdictions. RBC Capital Markets' equity research is posted to our proprietary websites to ensure eligible clients receive coverage initiations and changes in ratings, targets and opinions in a timely manner. Additional distribution may be done by the sales personnel via email, fax or regular mail. Clients may also receive our research via third-party vendors. Please contact your investment advisor or institutional salesperson for more information regarding RBC Capital Markets' research. RBC Capital Markets also provides eligible clients with access to SPARC on the Firm's proprietary INSIGHT website. SPARC contains market color and commentary, and may also contain Short-Term Trade Ideas regarding the publicly-traded common equity of subject

companies on which the Firm currently provides equity research coverage. SPARC may be accessed via the following hyperlink: <https://www.rbcinsight.com>. A Short-Term Trade Idea reflects the research analyst's directional view regarding the price of the subject company's publicly-traded common equity in the coming days or weeks, based on market and trading events. A Short-Term Trade Idea may differ from the price targets and recommendations in our published research reports reflecting the research analyst's views of the longer-term (one year) prospects of the subject company, as a result of the differing time horizons, methodologies and/or other factors. Thus, it is possible that a subject company's common equity that is considered a long-term 'sector perform' or even an 'underperform' might be a short-term buying opportunity as a result of temporary selling pressure in the market; conversely, a subject company's common equity rated a long-term 'outperform' could be considered susceptible to a short-term downward price correction. Short-Term Trade Ideas are not ratings, nor are they part of any ratings system, and the Firm generally does not intend, nor undertakes any obligation, to maintain or update Short-Term Trade Ideas. Securities and Short-Term Trade Ideas discussed in SPARC may not be suitable for all investors and have not been tailored to individual investor circumstances and objectives, and investors should make their own independent decisions regarding any securities or strategies discussed herein.

## Analyst Certification

All of the views expressed in this report accurately reflect the personal views of the responsible analyst(s) about any and all of the subject securities or issuers. No part of the compensation of the responsible analyst(s) named herein is, or will be, directly or indirectly, related to the specific recommendations or views expressed by the responsible analyst(s) in this report.

## The North West Company Inc. (TSX: NWC; 19.97)

Rating: Sector Perform  
Risk Qualifier: Average Risk  
Price Target: 22.00 ▼ 23.00

### Q1 Results Slightly Softer Than Expected; Tweaking Target To \$22

- Consolidated Q1 results were below our forecast on lower sales and slightly lower margins.** NWC delivered total Q1 revenue of \$346.3 million, up +1.8%, below our \$355.1 million estimate. Arctic and Alaska results continued to show top-line growth, but this was muted by declines at the discount banners. Consolidated EBITDA of \$28.4 million was slightly below our \$29.7 million forecast. Slightly lower taxes offset the lower EBITDA, driving EPS of \$0.26, versus our and consensus forecast of \$0.27.
- Northern markets are expected to show continued momentum, while southern markets should gradually pick up steam.** Retail activity in the northern markets remains quite healthy and is expected to deliver continued gains. Giant Tiger sales and margins will remain pressured: competition, while moderating, remains intense in food and execution in general merchandise categories, particularly apparel, needs to improve to drive margins.
- Tweaking target to \$22 from \$23, maintaining Sector Perform.**

## First Glance Notes

All values in CAD unless otherwise noted.

## Fortress Paper Ltd. (TSX: FTP; 29.38)

Rating: Outperform  
Risk Qualifier: Above Average Risk

### Q111 Results Lower than Expected

- Q111 results lower than expected – Fortress reported normalized EPS of (\$0.42) in Q111 compared to our estimate of \$0.08 and consensus of (\$0.05). Normalized EBITDA was \$1.0MM, compared to our \$6.1MM forecast and consensus of \$4.1MM. Strong performance in the wallpaper business was offset by a weak quarter for the bank note business and higher costs in specialty cellulose. Paper shipments of 15.5k mt were unchanged q/q but down 5.6% y/y.**
- The dissolving pulp conversion at Thurso will result in the mill shutting down in late Q3 to implement the modifications.**

### Fortis Inc. (TSX: FTS; 31.77)

Rating: Sector Perform  
Risk Qualifier: Average Risk  
Price Target: 34.00

#### Cross-Border Shopping

- **CVPS Acquisition is Incrementally Positive.** Our note highlights four key reasons why we view the pending CVPS acquisition as modestly positive.
- **Modest Expected Accretion Should Increase Over Time.** Based on CVPS' 2011 EPS guidance range, we estimate that the transaction could add between \$0.01/share and \$0.03/share to EPS in the first full-year. We expect EPS accretion to increase over time as rate base growth at CVPS is forecast to exceed that of Fortis' other utilities.
- **The Recent Equity Issue is Not Earmarked for the CVPS Transaction.** Fortis needed roughly \$300 million of common equity in late 2011 or early 2012 to fund the existing capital plan. While it is hard to resist tying the equity deal to the CVPS announcement, the equity deal is an acceleration of the existing need that also reduces financing risk when the CVPS deal close.

### Glacier Media Inc. (TSX: GVC; 2.30)

Rating: Outperform  
Risk Qualifier: Average Risk  
Price Target: 3.50

#### Value Still To Be Realized This Cycle

- **No change to \$3.50 target price.** Following in-line Q1/11 results, we have made modest changes to our forecast to reflect: (i) Q2/11 acquisitions including the trade publications from Rogers Publishing (\$11MM total cost); (ii) lower revenue growth in Business and professional; and (iii) IFRS.
- **Valuation premium justified but not without re-rating risk.** The TSX Media Index has declined -11% since reaching a cycle-high on February 8th, which we attribute to both cyclical and secular factors. Glacier is one of five media stocks that have outperformed the broader market over this period. Glacier trades at 5.8x FTM EV/EBITDA versus averages of 4.5x and 4.7x for Canadian and U.S. publishers, respectively. While rising secular concerns for media companies among investors is a risk to valuation, we continue to believe this premium is justified given: (i) minimal cash taxes; (ii) exposure to higher-growth Western Canada; and (iii) accretive acquisition opportunities.

## Global Mining Trends & Values

June 15, 2011

### Commodity Price Performance:

- Metal prices were up on average 0.7% last week. Lead was the best performer up 6.2%, followed by nickel up 1.5%, zinc up 1.4%, and silver up 0.1%. Uranium was the worst performer down 2.6%, followed by gold down 0.6%, aluminium down 0.2%, and copper down 0.2%.

### Mining Share Price Performance:

- Mining shares were down on average 4.3% last week. The best performing group was mineral sands up 6.4%, followed by coal down 2.6%, aluminium down 4.0%, the diversified group down 4.3%, copper down 4.4%, molybdenum down 5.9%, iron ore down 5.9%, uranium down 6.1%, and nickel down 6.8%.

### Valuation:

- Mining shares are now trading at a 28.0% discount to NAV at forward curve prices, versus a 27.7% discount one week ago.

### Long/Short Metal Positions:

- RBC CM's proprietary data for the LME shows that the net short positions in copper, zinc, and nickel decreased last week, while net long positions in aluminium and lead increased last week.

### Exchange Inventories:

- Total exchange inventories of aluminium and nickel decreased last week, while total inventories of copper and zinc increased last week.

## Required Disclosures

### Non-U.S. Analyst Disclosure

Adam Schatzker, Geoff Breen, Chris Drew, Steuart McIntyre, Leon Esterhuizen, Timothy Huff, Des Kilalea, Tal Woolley, Valerie Blume, Danny Hung, Nelson Ng, Haran Posner, Paul C. Quinn and Hamir Patel (i) are not registered/qualified as research analysts with the NYSE and/or FINRA and (ii) may not be associated persons of the RBC Capital Markets, LLC and therefore may not be subject to FINRA Rule 2711 and NYSE Rule 472 restrictions on communications with a subject company, public appearances and trading securities held by a research analyst account.

### Conflicts Disclosures

This product constitutes a compendium report (covers six or more subject companies). As such, RBC Capital Markets chooses to provide specific disclosures for the subject companies by reference. To access current disclosures for the subject companies, clients should refer to <https://www.rbccm.com/GLDisclosure/PublicWeb/DisclosureLookup.aspx?entityId=1> or send a request to RBC CM Research Publishing, P.O. Box 50, 200 Bay Street, Royal Bank Plaza, 29th Floor, South Tower, Toronto, Ontario M5J 2W7.

The analyst(s) responsible for preparing this research report received compensation that is based upon various factors, including total revenues of the member companies of RBC Capital Markets and its affiliates, a portion of which are or have been generated by investment banking activities of the member companies of RBC Capital Markets and its affiliates.

### Distribution of Ratings

For the purpose of ratings distributions, regulatory rules require member firms to assign ratings to one of three rating categories - Buy, Hold/Neutral, or Sell - regardless of a firm's own rating categories. Although RBC Capital Markets' ratings of Top Pick/Outperform, Sector Perform and Underperform most closely correspond to Buy, Hold/Neutral and Sell, respectively, the meanings are not the same because our ratings are determined on a relative basis (as described above).

Distribution of Ratings RBC Capital Markets, Equity Research				
Rating	Count	Percent	Investment Banking Serv./Past 12 Mos.	
			Count	Percent
BUY[TP/O]	738	52.90	217	29.40
HOLD[SP]	595	42.70	135	22.69
SELL[U]	61	4.40	11	18.03

### Conflicts Policy

RBC Capital Markets Policy for Managing Conflicts of Interest in Relation to Investment Research is available from us on request. To access our current policy, clients should refer to

<https://www.rbccm.com/global/file-414164.pdf>

or send a request to RBC CM Research Publishing, P.O. Box 50, 200 Bay Street, Royal Bank Plaza, 29th Floor, South Tower, Toronto, Ontario M5J 2W7. We reserve the right to amend or supplement this policy at any time.

### Dissemination of Research and Short-Term Trading Calls

RBC Capital Markets endeavors to make all reasonable efforts to provide research simultaneously to all eligible clients, having regard to local time zones in overseas jurisdictions. RBC Capital Markets' equity research is posted to our proprietary websites to ensure eligible clients receive coverage initiations and changes in ratings, targets and opinions in a timely manner. Additional distribution may be done by the sales personnel via email, fax or regular mail. Clients may also receive our research via third-party vendors. Please contact your investment advisor or institutional salesperson for more information regarding RBC Capital Markets' research. RBC Capital Markets also provides eligible clients with access to SPARC on the Firm's proprietary INSIGHT website. SPARC contains market color and commentary, and may also contain Short-Term Trade Ideas regarding the publicly-traded common equity of subject companies on which the Firm currently provides equity research coverage. SPARC may be accessed via the following hyperlink: <https://www.rbccm.com>. A Short-Term Trade Idea reflects the research analyst's directional view regarding the price of the subject company's publicly-traded common equity in the coming days or weeks, based on market and trading events. A Short-Term Trade Idea may differ from the price targets and recommendations in our published research reports reflecting the research analyst's views of the longer-term (one year) prospects of the subject company, as a result of the differing time horizons, methodologies and/or other factors. Thus, it is possible that a subject company's common equity that is considered a long-term 'sector

RBC Capital Markets®

perform' or even an 'underperform' might be a short-term buying opportunity as a result of temporary selling pressure in the market; conversely, a subject company's common equity rated a long-term 'outperform' could be considered susceptible to a short-term downward price correction. Short-Term Trade Ideas are not ratings, nor are they part of any ratings system, and the Firm generally does not intend, nor undertakes any obligation, to maintain or update Short-Term Trade Ideas. Securities and Short-Term Trade Ideas discussed in SPARC may not be suitable for all investors and have not been tailored to individual investor circumstances and objectives, and investors should make their own independent decisions regarding any securities or strategies discussed herein.

## Analyst Certification

All of the views expressed in this report accurately reflect the personal views of the responsible analyst(s) about any and all of the subject securities or issuers. No part of the compensation of the responsible analyst(s) named herein is, or will be, directly or indirectly, related to the specific recommendations or views expressed by the responsible analyst(s) in this report.

## Disclaimer

RBC Capital Markets is the business name used by certain subsidiaries of Royal Bank of Canada, including RBC Dominion Securities Inc., RBC Capital Markets, LLC, Royal Bank of Canada Europe Limited and Royal Bank of Canada - Sydney Branch. ## FIRST GLANCE | COMMENT

JUNE 21, 2011

**Fortis Inc. (TSX: FTS; 32.04)****News Reports That Belize Government Seizes BEL****Sector Perform  
Average Risk****Impact**

Negative (for investor sentiment)

**First Impression**

- **Belize Government Takes Over BEL.** Channel 7 News in Belize is reporting on its website that the government has signed a law that allows it to take over Belize Electricity Limited, which is 70%-owned by Fortis. A link to the story can be found by [clicking here](#).
- **The Next Steps are Unclear at this Point.** Fortis has not issued a press release as of yet and there is no official statement available on the Belize government's website.
- **Negative to Investor Sentiment, but Limited Financial Impact.** We believe that the negative headlines could put some pressure on Fortis' stock. However, we note that BEL is not material to earnings or assets, having contributed only \$2 million to earnings in 2010 (less than 1%) and making up about 2% of total assets. We see the potential for this dispute to end up including Fortis' unregulated hydro assets in Belize and the impact could become a bit more meaningful. We estimate that the unregulated hydro assets generated about \$12 million to \$14 million of earnings (just under 5% of earnings).
- **What Do You Do?** We believe that any material downward pressure on the share price in the 5% to 10% range would represent an attractive entry point.

Priced as of prior trading day's market close, EST (unless otherwise noted).

For Required Non-U.S. Analyst and Conflicts Disclosures, see page 3.

## Company Description

Fortis Inc. is a utility holding company for Newfoundland Power, FortisAlberta, FortisBC, Terasen Inc., Maritime Electric, Canadian Niagara Power, Cornwall Electric, BECOL, two electric utilities in the Turks and Caicos, and 70%-owned Belize Electricity. It also holds a 100% interest in Fortis Properties and a 59.5% interest in Caribbean Utilities. The company is in the process of acquiring Central Vermont Public Service.

## Required Disclosures

### Non-U.S. Analyst Disclosure

Danny Hung and Nelson Ng (i) are not registered/qualified as research analysts with the NYSE and/or FINRA and (ii) may not be associated persons of the RBC Capital Markets, LLC and therefore may not be subject to FINRA Rule 2711 and NYSE Rule 472 restrictions on communications with a subject company, public appearances and trading securities held by a research analyst account.

### Conflicts Disclosures

The analyst(s) responsible for preparing this research report received compensation that is based upon various factors, including total revenues of the member companies of RBC Capital Markets and its affiliates, a portion of which are or have been generated by investment banking activities of the member companies of RBC Capital Markets and its affiliates.

A member company of RBC Capital Markets or one of its affiliates managed or co-managed a public offering of securities for Fortis Inc. in the past 12 months.

A member company of RBC Capital Markets or one of its affiliates received compensation for investment banking services from Fortis Inc. in the past 12 months.

Royal Bank of Canada, together with its affiliates, beneficially owns 1 percent or more of a class of common equity securities of Fortis Inc..

A member company of RBC Capital Markets or one of its affiliates received compensation for products or services other than investment banking services from Fortis Inc. during the past 12 months. ### Explanation of RBC Capital Markets Equity Rating System

An analyst's 'sector' is the universe of companies for which the analyst provides research coverage. Accordingly, the rating assigned to a particular stock represents solely the analyst's view of how that stock will perform over the next 12 months relative to the analyst's sector average.

#### Ratings

**Top Pick (TP):** Represents best in Outperform category; analyst's best ideas; expected to significantly outperform the sector over 12 months; provides best risk-reward ratio; approximately 10% of analyst's recommendations.

**Outperform (O):** Expected to materially outperform sector average over 12 months.

**Sector Perform (SP):** Returns expected to be in line with sector average over 12 months.

**Underperform (U):** Returns expected to be materially below sector average over 12 months.

#### Risk Qualifiers (any of the following criteria may be present):

**Average Risk (Avg):** Volatility and risk expected to be comparable to sector; average revenue and earnings predictability; no significant cash flow/financing concerns over coming 12-24 months; fairly liquid.

**Above Average Risk (AA):** Volatility and risk expected to be above sector; below average revenue and earnings predictability; may not be suitable for a significant class of individual equity investors; may have negative cash flow; low market cap or float.

**Speculative (Spec):** Risk consistent with venture capital; low public float; potential balance sheet concerns; risk of being delisted.

### Distribution of Ratings

For the purpose of ratings distributions, regulatory rules require member firms to assign ratings to one of three rating categories - Buy, Hold/Neutral, or Sell - regardless of a firm's own rating categories. Although RBC Capital Markets' ratings of Top Pick/Outperform,

Sector Perform and Underperform most closely correspond to Buy, Hold/Neutral and Sell, respectively, the meanings are not the same because our ratings are determined on a relative basis (as described above).

Distribution of Ratings RBC Capital Markets, Equity Research				
Rating	Count	Percent	Investment Banking Serv./Past 12 Mos.	
			Count	Percent
BUY[TP/O]	741	52.90	218	29.42
HOLD[SP]	599	42.80	137	22.87
SELL[U]	60	4.30	11	18.33

References to a Recommended List in the recommendation history chart may include one or more recommended lists or model portfolios maintained by a business unit of the Wealth Management Division of RBC Capital Markets, LLC. These Recommended Lists include the Prime Opportunity List (RL 3), a former list called the Private Client Prime Portfolio (RL 4), the Guided Portfolio: Prime Income (RL 6), the Guided Portfolio: Large Cap (RL 7), the Guided Portfolio: Dividend Growth (RL 8), and the Guided Portfolio: Midcap 111 (RL9). The abbreviation 'RL On' means the date a security was placed on a Recommended List. The abbreviation 'RL Off' means the date a security was removed from a Recommended List.

## Conflicts Policy

RBC Capital Markets Policy for Managing Conflicts of Interest in Relation to Investment Research is available from us on request. To access our current policy, clients should refer to

<https://www.rbccm.com/global/file-414164.pdf>

or send a request to RBC CM Research Publishing, P.O. Box 50, 200 Bay Street, Royal Bank Plaza, 29th Floor, South Tower, Toronto, Ontario M5J 2W7. We reserve the right to amend or supplement this policy at any time.

## Dissemination of Research and Short-Term Trading Calls

RBC Capital Markets endeavors to make all reasonable efforts to provide research simultaneously to all eligible clients, having regard to local time zones in overseas jurisdictions. RBC Capital Markets' equity research is posted to our proprietary websites to ensure eligible clients receive coverage initiations and changes in ratings, targets and opinions in a timely manner. Additional distribution may be done by the sales personnel via email, fax or regular mail. Clients may also receive our research via third-party vendors. Please contact your investment advisor or institutional salesperson for more information regarding RBC Capital Markets' research. RBC Capital Markets also provides eligible clients with access to SPARC on the Firm's proprietary INSIGHT website. SPARC contains market color and commentary, and may also contain Short-Term Trade Ideas regarding the publicly-traded common equity of subject companies on which the Firm currently provides equity research coverage. SPARC may be accessed via the following hyperlink: <https://www.rbcinsight.com>. A Short-Term Trade Idea reflects the research analyst's directional view regarding the price of the subject

company's publicly-traded common equity in the coming days or weeks, based on market and trading events. A Short-Term Trade Idea may differ from the price targets and recommendations in our published research reports reflecting the research analyst's views of the longer-term (one year) prospects of the subject company, as a result of the differing time horizons, methodologies and/or other factors. Thus, it is possible that a subject company's common equity that is considered a long-term 'sector perform' or even an 'underperform' might be a short-term buying opportunity as a result of temporary selling pressure in the market; conversely, a subject company's common equity rated a long-term 'outperform' could be considered susceptible to a short-term downward price correction. Short-Term Trade Ideas are not ratings, nor are they part of any ratings system, and the Firm generally does not intend, nor undertakes any obligation, to maintain or update Short-Term Trade Ideas. Securities and Short-Term Trade Ideas discussed in SPARC may not be suitable for all investors and have not been tailored to individual investor circumstances and objectives, and investors should make their own independent decisions regarding any securities or strategies discussed herein.

## Analyst Certification

All of the views expressed in this report accurately reflect the personal views of the responsible analyst(s) about any and all of the subject securities or issuers. No part of the compensation of the responsible analyst(s) named herein is, or will be, directly or indirectly, related to the specific recommendations or views expressed by the responsible analyst(s) in this report.

## Disclaimer

## COMPANY UPDATE | COMMENT

JUNE 23, 2011

## Fortis Inc. (TSX: FTS)

## Examining the Options in Light of a Competing Bid for CVPS

Sector Perform  
Average Risk

Price:	32.00	Price Target:	34.00
Shares O/S (MM):	184.6	Implied All-In Return:	10%
Dividend:	1.16	Market Cap (MM):	5,907
Float (MM):	184.6	Yield:	3.6%
Debt to Cap:	58%		

## Event

Following Fortis' outstanding US\$35.10/share bid for CVPS, Gaz Metro launched a US\$35.25/share unsolicited offer for CVPS.

## Investment Opinion

- **Competing Bid for CVPS.** Gaz Metro made a US\$35.25/share bid for Central Vermont Public Service (CVPS), which is slightly higher than Fortis' existing US\$35.10/share offer that was supported by CVPS' board. Gaz Metro has agreed to allow the regular US\$0.23/share dividend to be paid through closing, while Fortis' offer is for the next two dividends at the current rate and then US\$0.01/share until closing.
- **Gaz Metro's Offer Focuses on Benefits to Vermont.** In our opinion, both offers for CVPS are fair from a financial point of view and Gaz Metro's offer seems to be focusing on gaining public and regulatory support for its transaction. Gaz Metro, which owns Green Mountain Power (the other major electric distribution company in Vermont), is offering a combination of cost synergies and rate payer inducements to win support.
- **What Will CVPS Do?** In light of the US\$17.5 million break fee and up to \$2 million expense reimbursement that could be payable to Fortis (about US\$1.50/share), we expect that CVPS' board will announce its continued support for Fortis' offer.
- **We Do Not Expect an Imminent Bidding War.** Regardless of CVPS' response, we do not expect either company to raise their bid in the near-term. It seems clear to us that this transaction has become more about gaining regulatory approval.
- **In Fact, We Think it is Possible That Any Extra Value Could Largely be Conferred to Rate Payers.** Our analysis indicates that both companies could afford to pay roughly US\$5/share more (about US\$70 million) and eke out EPS accretion (please see Exhibits 1 & 2). However, we believe that it is possible that the majority of any extra value could come in the form of benefits to rate payers (e.g. lower rates, additional VELCO contributions, etc.) with very little in the form of an increased offer for CVPS.
- **Valuation.** In our June 15, 2011 *Research Comment*, we did not increase our price target to reflect this transaction and therefore we remain comfortable with our existing \$34.00/share price target, which is based on a forward P/E of 18x 2012E EPS.

Priced as of prior trading day's market close, EST (unless otherwise noted).

## Estimated EPS Accretion

In Exhibit 1, we set out the estimated EPS accretion based on the current US\$35.10/share offer. In Exhibit 2, we examine the economics if the offer were increased by \$5/share.

### Why is the Deal Accretive?

We have received a number of questions as to how a company can pay a roughly 40% premium to regulated rate base and still generate EPS accretion, particularly since premiums to rate base are almost never recoverable in customer rates and cost synergies are usually for the benefit of rate payers. Two factors that help drive the accretion include:

- **Double-Leverage.** CVPS' equity thickness is 57% for rate making purposes, which combined with a relatively low 9.45% allowed ROE results in an overall return framework that seems fair from a risk perspective. However, since CVPS is fairly small in the grand scope of Fortis, the company is able to finance the overall transaction with only 40% equity and the rest with debt.
- **Cross-Border Tax Benefits.** CVPS has guided to a 36.77% effective tax rate for 2011. A structure that we commonly see for Canadian companies with U.S. operations is a financing structure that results in a reduction in the effective tax rate (we have seen similar structures for U.S. companies with Canadian operations). Although the exact details of what will be put in place are not known, we have assumed a 25% effective rate, which is similar to what we have observed for many companies in our coverage universe.

### Exhibit 1: No Increase in the Offer (In US\$MM except per share figures)

Source: Company reports; RBC Capital Markets estimates

**Overview of Central Vermont Public Service (CVPS)**

- **Service Territory and Customers.** CVPS is an electric utility with almost 160,000 customers in a service territory that covers about two-thirds of Vermont. In addition, CVPS owns a 41% interest in Vermont Transco, which owns and operates a high-voltage electric transmission system in the state.
- **Rate Base Expected to Grow at a 9% CAGR.** The historical rate base in addition to CVPS management's forecast is shown in Exhibit 2.
- **Capital Structure and ROE.** CVPS' allowed ROE for 2011 is 9.45%, which is broadly comparable to many of Fortis' existing utilities. However, the 57% equity thickness is quite a bit higher than Fortis' other utilities, which we see as a compensating factor for a higher level of risk at CVPS compared to Fortis' Canadian regulated businesses (e.g., lower protection against customer usage).
- **Power Supply Expected to Shift.** Currently, about 50% of energy supply is sourced from nuclear (Vermont Yankee; owned by a third-party), about 40% from hydroelectric production (mostly Hydro-Quebec) and 10% from other sources. Going forward, CVPS has locked up additional supply from Hydro-Quebec and other sources to proactively replace the potential for lost power from the Vermont Yankee nuclear facility in 2012.

Exhibit 3: Forecast Rate Base Growth (CVPS Management)

Source: Company reports; RBC Capital Markets

## Valuation

Our price target of \$34.00 is based on a forward P/E of 18x 2012E EPS. Our selected P/E multiple is at the upper end of the five-year range, reflecting the low interest rate environment, good growth from the core Canadian regulated utilities and the Waneta Dam expansion, which will not contribute to earnings until 2015.

## Price Target Impediment

The political environment in Belize, the risk of punitive regulatory decisions, economic/tourism conditions in its service territories, operational or financial issues at newly acquired businesses, and acquisitions or projects that fail to gain the confidence of investors may have implications for our price target.

## Company Description

Fortis Inc. is a utility holding company for Newfoundland Power, FortisAlberta, FortisBC, Terasen Inc., Maritime Electric, Canadian Niagara Power, Cornwall Electric, BECOL, two electric utilities in the Turks and Caicos, and 70%-owned Belize Electricity. It also holds a 100% interest in Fortis Properties and a 59.5% interest in Caribbean Utilities. The company is in the process of acquiring Central Vermont Public Service.

## Required Disclosures

### Non-U.S. Analyst Disclosure

Danny Hung and Nelson Ng (i) are not registered/qualified as research analysts with the NYSE and/or FINRA and (ii) may not be associated persons of the RBC Capital Markets, LLC and therefore may not be subject to FINRA Rule 2711 and NYSE Rule 472 restrictions on communications with a subject company, public appearances and trading securities held by a research analyst account.

### Conflicts Disclosures

The analyst(s) responsible for preparing this research report received compensation that is based upon various factors, including total revenues of the member companies of RBC Capital Markets and its affiliates, a portion of which are or have been generated by investment banking activities of the member companies of RBC Capital Markets and its affiliates.

A member company of RBC Capital Markets or one of its affiliates managed or co-managed a public offering of securities for Fortis Inc. in the past 12 months.

A member company of RBC Capital Markets or one of its affiliates received compensation for investment banking services from Fortis Inc. in the past 12 months.

Royal Bank of Canada, together with its affiliates, beneficially owns 1 percent or more of a class of common equity securities of Fortis Inc..

A member company of RBC Capital Markets or one of its affiliates received compensation for products or services other than investment banking services from Fortis Inc. during the past 12 months. During this time, a member company of RBC Capital Markets or one of its affiliates provided non-investment banking securities-related services to Fortis Inc..

A member company of RBC Capital Markets or one of its affiliates received compensation for products or services other than investment banking services from Fortis Inc. during the past 12 months. ### Explanation of RBC Capital Markets Equity Rating System

An analyst's 'sector' is the universe of companies for which the analyst provides research coverage. Accordingly, the rating assigned to a particular stock represents solely the analyst's view of how that stock will perform over the next 12 months relative to the analyst's sector average.

#### Ratings

**Top Pick (TP):** Represents best in Outperform category; analyst's best ideas; expected to significantly outperform the sector over 12 months; provides best risk-reward ratio; approximately 10% of analyst's recommendations.

**Outperform (O):** Expected to materially outperform sector average over 12 months.

**Sector Perform (SP):** Returns expected to be in line with sector average over 12 months.

**Underperform (U):** Returns expected to be materially below sector average over 12 months.

#### Risk Qualifiers (any of the following criteria may be present):

**Average Risk (Avg):** Volatility and risk expected to be comparable to sector; average revenue and earnings predictability; no significant cash flow/financing concerns over coming 12-24 months; fairly liquid.

**Above Average Risk (AA):** Volatility and risk expected to be above sector; below average revenue and earnings predictability; may not be suitable for a significant class of individual equity investors; may have negative cash flow; low market cap or float.

**Speculative (Spec):** Risk consistent with venture capital; low public float; potential balance sheet concerns; risk of being delisted.

### Distribution of Ratings

For the purpose of ratings distributions, regulatory rules require member firms to assign ratings to one of three rating categories - Buy, Hold/Neutral, or Sell - regardless of a firm's own rating categories. Although RBC Capital Markets' ratings of Top Pick/Outperform,

Sector Perform and Underperform most closely correspond to Buy, Hold/Neutral and Sell, respectively, the meanings are not the same because our ratings are determined on a relative basis (as described above).

Distribution of Ratings RBC Capital Markets, Equity Research				
Rating	Count	Percent	Investment Banking Serv./Past 12 Mos.	
			Count	Percent
BUY[TP/O]	744	53.10	220	29.57
HOLD[SP]	598	42.70	135	22.58
SELL[U]	60	4.30	11	18.33

References to a Recommended List in the recommendation history chart may include one or more recommended lists or model portfolios maintained by a business unit of the Wealth Management Division of RBC Capital Markets, LLC. These Recommended Lists include the Prime Opportunity List (RL 3), a former list called the Private Client Prime Portfolio (RL 4), the Guided Portfolio: Prime Income (RL 6), the Guided Portfolio: Large Cap (RL 7), the Guided Portfolio: Dividend Growth (RL 8), and the Guided Portfolio: Midcap 111 (RL9). The abbreviation 'RL On' means the date a security was placed on a Recommended List. The abbreviation 'RL Off' means the date a security was removed from a Recommended List.

or send a request to RBC CM Research Publishing, P.O. Box 50, 200 Bay Street, Royal Bank Plaza, 29th Floor, South Tower, Toronto, Ontario M5J 2W7. We reserve the right to amend or supplement this policy at any time.

## Dissemination of Research and Short-Term Trading Calls

RBC Capital Markets endeavors to make all reasonable efforts to provide research simultaneously to all eligible clients, having regard to local time zones in overseas jurisdictions. RBC Capital Markets' equity research is posted to our proprietary websites to ensure eligible clients receive coverage initiations and changes in ratings, targets and opinions in a timely manner. Additional distribution may be done by the sales personnel via email, fax or regular mail. Clients may also receive our research via third-party vendors. Please contact your investment advisor or institutional salesperson for more information regarding RBC Capital Markets' research. RBC Capital Markets also provides eligible clients with access to SPARC on the Firm's proprietary INSIGHT website. SPARC contains market color and commentary, and may also contain Short-Term Trade Ideas regarding the publicly-traded common equity of subject companies on which the Firm currently provides equity research coverage. SPARC may be accessed via the following hyperlink: <https://www.rbcinsight.com>. A Short-Term Trade Idea reflects the research analyst's directional view regarding the price of the subject

company's publicly-traded common equity in the coming days or weeks, based on market and trading events. A Short-Term Trade Idea may differ from the price targets and recommendations in our published research reports reflecting the research analyst's views of the longer-term (one year) prospects of the subject company, as a result of the differing time horizons, methodologies and/or other factors. Thus, it is possible that a subject company's common equity that is considered a long-term 'sector perform' or even an 'underperform' might be a short-term buying opportunity as a result of temporary selling pressure in the market; conversely, a subject company's common equity rated a long-term 'outperform' could be considered susceptible to a short-term downward price correction. Short-Term Trade Ideas are not ratings, nor are they part of any ratings system, and the Firm generally does not intend, nor undertakes any obligation, to maintain or update Short-Term Trade Ideas. Securities and Short-Term Trade Ideas discussed in SPARC may not be suitable for all investors and have not been tailored to individual investor circumstances and objectives, and investors should make their own independent decisions regarding any securities or strategies discussed herein.

## Analyst Certification

All of the views expressed in this report accurately reflect the personal views of the responsible analyst(s) about any and all of the subject securities or issuers. No part of the compensation of the responsible analyst(s) named herein is, or will be, directly or indirectly, related to the specific recommendations or views expressed by the responsible analyst(s) in this report.

## Disclaimer

RBC Capital Markets is the business name used by certain subsidiaries of Royal Bank of Canada, including RBC Dominion Securities Inc., RBC Capital Markets, LLC, Royal Bank of Canada Europe Limited and Royal Bank of Canada - Sydney Branch. The information contained in this report has been compiled by RBC Capital Markets from sources believed to be reliable, but no representation or warranty, express or implied, is made by Royal Bank of Canada, RBC Capital Markets, its affiliates or any other person as to its accuracy, completeness or correctness. All opinions and estimates contained in this report constitute RBC Capital Markets' judgement as of the date of this report, are subject to change without notice and are provided in good faith but without legal responsibility. Nothing in this report constitutes legal, accounting or tax advice or individually tailored investment advice. This material is prepared for general circulation to clients and has been prepared without regard to the individual financial circumstances and objectives of persons who receive it. The investments or services contained in this report may not be suitable for you and it is recommended that you consult an independent investment advisor if you are in doubt about the suitability of such investments or services. This report is not an offer to sell or a solicitation of an offer to buy any securities. Past performance is not a guide to future performance, future returns are not guaranteed, and a loss of original capital may occur. RBC Capital Markets research analyst compensation is based in part on the overall profitability of RBC Capital Markets, which includes profits attributable to investment banking revenues. Every province in Canada, state in the U.S., and most countries throughout the world have their own laws regulating the types of securities and other investment products which may be offered to their residents, as well as the process for doing so. As a result, the securities discussed in this report may not be eligible for sale in some jurisdictions. This report is not, and under no circumstances should be construed as, a solicitation to act as securities broker or dealer in any jurisdiction by any person or company that is not legally permitted to carry on the business of a securities broker or dealer in that jurisdiction. To the full extent permitted by law neither RBC Capital Markets nor any of its affiliates, nor any other person, accepts any liability whatsoever for any direct or consequential loss arising from any use of this report or the information contained herein. No matter contained in this document may be reproduced or copied by any means without the prior consent of RBC Capital Markets.

### To U.S. Residents:

This publication has been approved by RBC Capital Markets, LLC (member FINRA, NYSE), which is a U.S. registered broker-dealer and which accepts responsibility for this report and its dissemination in the United States. Any U.S. recipient of this report that is not a registered broker-dealer or a bank acting in a broker or dealer capacity and that wishes further information regarding, or to effect any transaction in, any of the securities discussed in this report, should contact and place orders with RBC Capital Markets, LLC.

### To Canadian Residents:

This publication has been approved by RBC Dominion Securities Inc. (member IIROC). Any Canadian recipient of this report that is not a Designated Institution in Ontario, an Accredited Investor in British Columbia or Alberta or a Sophisticated Purchaser in Quebec (or similar permitted purchaser in any other province) and that wishes further information regarding, or to effect any transaction in, any of the securities discussed in this report should contact and place orders with RBC Dominion Securities Inc., which, without in any way limiting the foregoing, accepts responsibility for this report and its dissemination in Canada.

### To U.K. Residents:

This publication has been approved by Royal Bank of Canada Europe Limited ('RBCCEL') which is authorized and regulated by Financial Services Authority ('FSA'), in connection with its distribution in the United Kingdom. This material is not for general distribution in the United Kingdom to retail clients, as defined under the rules of the FSA. However, targeted distribution may be made to selected retail clients of RBC and its affiliates. RBCCEL accepts responsibility for this report and its dissemination in the United Kingdom.

### To Persons Receiving This Advice in Australia:

This material has been distributed in Australia by Royal Bank of Canada - Sydney Branch (ABN 86 076 940 880, AFSL No. 246521). This material has been prepared for general circulation and does not take into account the objectives, financial situation or needs of any recipient. Accordingly, any recipient should, before acting on this material, consider the appropriateness of this material having regard to their objectives, financial situation and needs. If this material relates to the acquisition or possible acquisition of a particular financial product, a recipient in Australia should obtain any relevant disclosure document prepared in respect of that product and consider that document before making any decision about whether to acquire the product.

### To Hong Kong Residents:

This publication is distributed in Hong Kong by RBC Investment Services (Asia) Limited and RBC Investment Management (Asia) Limited, licensed corporations under the Securities and Futures Ordinance or, by Royal Bank of Canada, Hong Kong Branch, a registered institution under the Securities and Futures Ordinance. This material has been prepared for general circulation and does not take into account the objectives, financial situation, or needs of any recipient. Hong Kong persons wishing to obtain further information on any of the securities mentioned in this publication should contact RBC Investment Services (Asia) Limited, RBC Investment Management (Asia) Limited or Royal Bank of Canada, Hong Kong Branch at 17/Floor, Cheung Kong Center, 2 Queen's Road Central, Hong Kong (telephone number is 2848-1388).

### To Singapore Residents:

This publication is distributed in Singapore by RBC (Singapore Branch) and RBC (Asia) Limited, registered entities granted offshore bank status by the Monetary Authority of Singapore. This material has been prepared for general circulation and does not take into account the objectives, financial situation, or needs of any recipient. You are advised to seek independent advice from a financial adviser before purchasing any product. If you do not obtain independent advice, you should consider whether the product is suitable for you. Past performance is not indicative of future performance.

## COMPANY UPDATE | COMMENT

JULY 13, 2011

## Fortis Inc. (TSX: FTS) CVPS Acquisition Terminated

### Sector Perform Average Risk

Price:	32.76	Price Target:	34.00
Shares O/S (MM):	184.6	Implied All-In Return:	7%
Dividend:	1.16	Market Cap (MM):	6,047
Float (MM):	184.6	Yield:	3.5%
Debt to Cap:	58%		

### Event

CVPS deemed Gaz Metro's offer a "superior proposal" and terminated the previous merger agreement with Fortis.

### Investment Opinion

- **CVPS Merger Agreement Terminated.** Central Vermont Public Service (CVPS) has deemed Gaz Metro's US\$35.25/share offer a "superior proposal" and therefore its previous merger agreement with Fortis has been terminated. On June 23, 2011, Gaz Metro made a competing bid for CVPS, following Fortis' US\$35.10/share offer that was announced on May 30, 2011.
- **Fortis Will Receive a Break Fee and Expenses.** Fortis will immediately receive a US\$17.5 million break fee plus US\$2.0 million in expense reimbursement, which is roughly \$0.10/share.
- **Acquisition Loss Disappointing but Shows Discipline.** While the CVPS acquisition loss is disappointing, we believe that walking away from CVPS rather than getting involved in a bidding war shows tremendous discipline, which should serve to demonstrate that Fortis will take a measured approach with its U.S. acquisition strategy.
- **What About the Equity Issue?** While there will be negative carry through 2011 from the recent equity issue (already in our numbers), the equity would have been needed, albeit in late 2011/early 2012 to finance the significant capex plan, mostly related to the Western Canadian assets.
- **Fortis' Stock Could Be a Place to "Hide Out".** While we have hesitated to recommend Fortis as a good name in which to "hide out" during these uncertain times due to the potential negative headlines related to CVPS, we believe that defensive investors should consider the stock as a good place to park money now that the CVPS saga is over.
- **Modest Revision to 2012 Estimate.** We have modestly revised our 2012 EPS estimate to \$1.88 (from \$1.91) to reflect the impact of the CVPS acquisition termination (i.e., removing the expected EPS accretion from the transaction).
- **Valuation.** Since we did not previously increase our price target to reflect the transaction, we remain comfortable with our existing \$34.00/share price target, which is based on a forward P/E of 18x 2012E EPS.

Priced as of prior trading day's market close, EST (unless otherwise noted).

For Required Non-U.S. Analyst and Conflicts Disclosures, see page 4.

Source: Company reports; RBC Capital Markets estimates

## Valuation

Our price target of \$34.00 is based on a forward P/E of 18x 2012E EPS. Our selected P/E multiple is at the upper end of the five-year range, reflecting the low interest rate environment, good growth from the core Canadian regulated utilities, and the Waneta Dam expansion, which will not contribute to earnings until 2015.

## Price Target Impediment

The political environment in Belize, the risk of punitive regulatory decisions, economic/tourism conditions in its service territories, operational or financial issues at newly acquired businesses, and acquisitions or projects that fail to gain the confidence of investors may have implications for our price target.

## Company Description

Fortis Inc. is a utility holding company for Newfoundland Power, FortisAlberta, FortisBC, Terasen Inc., Maritime Electric, Canadian Niagara Power, Cornwall Electric, BECOL, two electric utilities in the Turks and Caicos, and 70%-owned Belize Electricity. It also holds a 100% interest in Fortis Properties and a 59.5% interest in Caribbean Utilities. The company is in the process of acquiring Central Vermont Public Service.

## Required Disclosures

### Non-U.S. Analyst Disclosure

Danny Hung and Nelson Ng (i) are not registered/qualified as research analysts with the NYSE and/or FINRA and (ii) may not be associated persons of the RBC Capital Markets, LLC and therefore may not be subject to FINRA Rule 2711 and NYSE Rule 472 restrictions on communications with a subject company, public appearances and trading securities held by a research analyst account.

### Conflicts Disclosures

The analyst(s) responsible for preparing this research report received compensation that is based upon various factors, including total revenues of the member companies of RBC Capital Markets and its affiliates, a portion of which are or have been generated by investment banking activities of the member companies of RBC Capital Markets and its affiliates.

A member company of RBC Capital Markets or one of its affiliates managed or co-managed a public offering of securities for Fortis Inc. in the past 12 months.

A member company of RBC Capital Markets or one of its affiliates received compensation for investment banking services from Fortis Inc. in the past 12 months.

Royal Bank of Canada, together with its affiliates, beneficially owns 1 percent or more of a class of common equity securities of Fortis Inc..

A member company of RBC Capital Markets or one of its affiliates received compensation for products or services other than investment banking services from Fortis Inc. during the past 12 months. During this time, a member company of RBC Capital Markets or one of its affiliates provided non-investment banking securities-related services to Fortis Inc..

A member company of RBC Capital Markets or one of its affiliates received compensation for products or services other than investment banking services from Fortis Inc. during the past 12 months. During this time, a member company of RBC Capital Markets or one of its affiliates provided non-securities services to Fortis Inc..

RBC Capital Markets is currently providing Fortis Inc. with non-investment banking securities-related services.

RBC Capital Markets is currently providing Fortis Inc. with non-securities services.

RBC Capital Markets has provided Fortis Inc. with investment banking services in the past 12 months.

RBC Capital Markets has provided Fortis Inc. with non-investment banking securities-related services in the past 12 months.

RBC Capital Markets has provided Fortis Inc. with non-securities services in the past 12 months.

The author is employed by RBC Dominion Securities Inc., a securities broker-dealer with principal offices located in Toronto, Canada.

### Explanation of RBC Capital Markets Equity Rating System

An analyst's 'sector' is the universe of companies for which the analyst provides research coverage. Accordingly, the rating assigned to a particular stock represents solely the analyst's view of how that stock will perform over the next 12 months relative to the analyst's sector average.

#### Ratings

**Top Pick (TP):** Represents best in Outperform category; analyst's best ideas; expected to significantly outperform the sector over 12 months; provides best risk-reward ratio; approximately 10% of analyst's recommendations.

**Outperform (O):** Expected to materially outperform sector average over 12 months.

**Sector Perform (SP):** Returns expected to be in line with sector average over 12 months.

**Underperform (U):** Returns expected to be materially below sector average over 12 months.

#### Risk Qualifiers (any of the following criteria may be present):

**Average Risk (Avg):** Volatility and risk expected to be comparable to sector; average revenue and earnings predictability; no significant cash flow/financing concerns over coming 12-24 months; fairly liquid.

**Above Average Risk (AA):** Volatility and risk expected to be above sector; below average revenue and earnings predictability; may not be suitable for a significant class of individual equity investors; may have negative cash flow; low market cap or float.

**Speculative (Spec):** Risk consistent with venture capital; low public float; potential balance sheet concerns; risk of being delisted.

### Distribution of Ratings

For the purpose of ratings distributions, regulatory rules require member firms to assign ratings to one of three rating categories - Buy, Hold/Neutral, or Sell - regardless of a firm's own rating categories. Although RBC Capital Markets' ratings of Top Pick/Outperform,

Sector Perform and Underperform most closely correspond to Buy, Hold/Neutral and Sell, respectively, the meanings are not the same because our ratings are determined on a relative basis (as described above).

Distribution of Ratings RBC Capital Markets, Equity Research				
Rating	Count	Percent	Investment Banking Serv./Past 12 Mos.	
			Count	Percent
BUY[TP/O]	751	52.70	229	30.49
HOLD[SP]	612	43.00	136	22.22
SELL[U]	60	4.20	11	18.33

References to a Recommended List in the recommendation history chart may include one or more recommended lists or model portfolios maintained by a business unit of the Wealth Management Division of RBC Capital Markets, LLC. These Recommended Lists include the Prime Opportunity List (RL 3), a former list called the Private Client Prime Portfolio (RL 4), the Guided Portfolio: Prime Income (RL 6), the Guided Portfolio: Large Cap (RL 7), the Guided Portfolio: Dividend Growth (RL 8), and the Guided Portfolio: Midcap 111 (RL9). The abbreviation 'RL On' means the date a security was placed on a Recommended List. The abbreviation 'RL Off' means the date a security was removed from a Recommended List.

**Fortis Inc. (TSX: FTS; 31.37)****First Glance: Q2/11 Results Modestly Below Expectations****Sector Perform  
Average Risk****Impact**

Neutral

**First Impression**

- **Q2/11 Results Slightly Below Expectations.** Q2/11 normalized EPS was \$0.33 compared to our estimate of \$0.36 and \$0.32 in Q2/10. Consensus was \$0.35 (four estimates, range of \$0.34 to \$0.36). There were small negative variances in most of the segments with nothing major causing the modestly lower-than-forecast earnings. With most utility businesses that are regulated on an annual basis, some of the variances within the quarter could be due to timing differences that will reverse themselves throughout the rest of the year. A table showing the segment earnings compared to our estimates is set out in Exhibit 1.
- **Update on Belize Situation.** Due to the expropriation of Belize Electricity Limited (BEL), Fortis has deconsolidated the results of BEL effective June 20, 2011. The book value of the BEL investment was \$112 million as at June 30, 2011. Fortis has initiated proceedings for compensation from the Government of Belize. With respect to BECOL, the company's unregulated power generation assets in Belize, the Government of Belize has publicly indicated that it does not intend to expropriate these assets.
- **\$1.2 Billion Capex Program On Track.** Gross capex for H1/11 was \$519 million and the \$1.2 billion capex program for 2011 remains on track.
- **No Conference Call.** Fortis does not hold a conference call to discuss the Q2/11 results. We will follow up with management later today to discuss the quarter and the outlook.
- **Neutral View on the Quarter.** Based on our initial review of the quarterly results and pending a discussion with management on the quarter and outlook, we view the Q2/11 results as neutral for the share price.

Priced as of prior trading day's market close, EST (unless otherwise noted).

For Required Non-U.S. Analyst and Conflicts Disclosures, see page 4.

## Company Description

Fortis Inc. is a utility holding company for Newfoundland Power, FortisAlberta, FortisBC, Terasen Inc., Maritime Electric, Canadian Niagara Power, Cornwall Electric, BECOL, two electric utilities in the Turks and Caicos, and 70%-owned Belize Electricity. It also holds a 100% interest in Fortis Properties and a 59.5% interest in Caribbean Utilities. The company is in the process of acquiring Central Vermont Public Service.

## Required Disclosures

### Non-U.S. Analyst Disclosure

Danny Hung and Nelson Ng (i) are not registered/qualified as research analysts with the NYSE and/or FINRA and (ii) may not be associated persons of the RBC Capital Markets, LLC and therefore may not be subject to FINRA Rule 2711 and NYSE Rule 472 restrictions on communications with a subject company, public appearances and trading securities held by a research analyst account.

### Conflicts Disclosures

The analyst(s) responsible for preparing this research report received compensation that is based upon various factors, including total revenues of the member companies of RBC Capital Markets and its affiliates, a portion of which are or have been generated by investment banking activities of the member companies of RBC Capital Markets and its affiliates.

A member company of RBC Capital Markets or one of its affiliates managed or co-managed a public offering of securities for Fortis Inc. in the past 12 months.

A member company of RBC Capital Markets or one of its affiliates received compensation for investment banking services from Fortis Inc. in the past 12 months.

Royal Bank of Canada, together with its affiliates, beneficially owns 1 percent or more of a class of common equity securities of Fortis Inc..

A member company of RBC Capital Markets or one of its affiliates received compensation for products or services other than investment banking services from Fortis Inc. during the past 12 months. During this time, a member company of RBC Capital Markets or one of its affiliates provided non-investment banking securities-related services to Fortis Inc..

A member company of RBC Capital Markets or one of its affiliates received compensation for products or services other than investment banking services from Fortis Inc. during the past 12 months. During this time, a member company of RBC Capital Markets or one of its affiliates provided non-securities services to Fortis Inc..

RBC Capital Markets is currently providing Fortis Inc. with non-investment banking securities-related services.

RBC Capital Markets is currently providing Fortis Inc. with non-securities services.

RBC Capital Markets has provided Fortis Inc. with investment banking services in the past 12 months.

RBC Capital Markets has provided Fortis Inc. with non-investment banking securities-related services in the past 12 months.

RBC Capital Markets has provided Fortis Inc. with non-securities services in the past 12 months.

The author is employed by RBC Dominion Securities Inc., a securities broker-dealer with principal offices located in Toronto, Canada.

### Explanation of RBC Capital Markets Equity Rating System

An analyst's 'sector' is the universe of companies for which the analyst provides research coverage. Accordingly, the rating assigned to a particular stock represents solely the analyst's view of how that stock will perform over the next 12 months relative to the analyst's sector average.

#### Ratings

**Top Pick (TP):** Represents best in Outperform category; analyst's best ideas; expected to significantly outperform the sector over 12 months; provides best risk-reward ratio; approximately 10% of analyst's recommendations.

**Outperform (O):** Expected to materially outperform sector average over 12 months.

**Sector Perform (SP):** Returns expected to be in line with sector average over 12 months.

**Underperform (U):** Returns expected to be materially below sector average over 12 months.

#### Risk Qualifiers (any of the following criteria may be present):

**Average Risk (Avg):** Volatility and risk expected to be comparable to sector; average revenue and earnings predictability; no significant cash flow/financing concerns over coming 12-24 months; fairly liquid.

**Above Average Risk (AA):** Volatility and risk expected to be above sector; below average revenue and earnings predictability; may not be suitable for a significant class of individual equity investors; may have negative cash flow; low market cap or float.

**Speculative (Spec):** Risk consistent with venture capital; low public float; potential balance sheet concerns; risk of being delisted.

### Distribution of Ratings

For the purpose of ratings distributions, regulatory rules require member firms to assign ratings to one of three rating categories - Buy, Hold/Neutral, or Sell - regardless of a firm's own rating categories. Although RBC Capital Markets' ratings of Top Pick/Outperform,

Sector Perform and Underperform most closely correspond to Buy, Hold/Neutral and Sell, respectively, the meanings are not the same because our ratings are determined on a relative basis (as described above).

Distribution of Ratings RBC Capital Markets, Equity Research				
Rating	Count	Percent	Investment Banking Serv./Past 12 Mos.	
			Count	Percent
BUY[TP/O]	749	52.30	217	28.97
HOLD[SP]	623	43.50	134	21.51
SELL[U]	60	4.20	9	15.00

References to a Recommended List in the recommendation history chart may include one or more recommended lists or model portfolios maintained by a business unit of the Wealth Management Division of RBC Capital Markets, LLC. These Recommended Lists include the Prime Opportunity List (RL 3), a former list called the Private Client Prime Portfolio (RL 4), the Guided Portfolio: Prime Income (RL 6), the Guided Portfolio: Large Cap (RL 7), the Guided Portfolio: Dividend Growth (RL 8), and the Guided Portfolio: Midcap 111 (RL9). The abbreviation 'RL On' means the date a security was placed on a Recommended List. The abbreviation 'RL Off' means the date a security was removed from a Recommended List.

## Conflicts Policy

RBC Capital Markets Policy for Managing Conflicts of Interest in Relation to Investment Research is available from us on request. To access our current policy, clients should refer to

<https://www.rbccm.com/global/file-414164.pdf>

or send a request to RBC CM Research Publishing, P.O. Box 50, 200 Bay Street, Royal Bank Plaza, 29th Floor, South Tower, Toronto, Ontario M5J 2W7. We reserve the right to amend or supplement this policy at any time.

## Dissemination of Research and Short-Term Trading Calls

RBC Capital Markets endeavors to make all reasonable efforts to provide research simultaneously to all eligible clients, having regard to local time zones in overseas jurisdictions. RBC Capital Markets' equity research is posted to our proprietary websites to ensure eligible clients receive coverage initiations and changes in ratings, targets and opinions in a timely manner. Additional distribution may be done by the sales personnel via email, fax or regular mail. Clients may also receive our research via third-party vendors. Please contact your investment advisor or institutional salesperson for more information regarding RBC Capital Markets' research. RBC Capital Markets also provides eligible clients with access to SPARC on the Firm's proprietary INSIGHT website. SPARC contains market color and commentary, and may also contain Short-Term Trade Ideas regarding the publicly-traded common equity of subject companies on which the Firm currently provides equity research coverage. SPARC may be accessed via the following hyperlink: <https://www.rbcinsight.com>. A Short-Term Trade Idea reflects the research analyst's directional view regarding the price of the subject

company's publicly-traded common equity in the coming days or weeks, based on market and trading events. A Short-Term Trade Idea may differ from the price targets and recommendations in our published research reports reflecting the research analyst's views of the longer-term (one year) prospects of the subject company, as a result of the differing time horizons, methodologies and/or other factors. Thus, it is possible that a subject company's common equity that is considered a long-term 'sector perform' or even an 'underperform' might be a short-term buying opportunity as a result of temporary selling pressure in the market; conversely, a subject company's common equity rated a long-term 'outperform' could be considered susceptible to a short-term downward price correction. Short-Term Trade Ideas are not ratings, nor are they part of any ratings system, and the Firm generally does not intend, nor undertakes any obligation, to maintain or update Short-Term Trade Ideas. Securities and Short-Term Trade Ideas discussed in SPARC may not be suitable for all investors and have not been tailored to individual investor circumstances and objectives, and investors should make their own independent decisions regarding any securities or strategies discussed herein.

## Analyst Certification

All of the views expressed in this report accurately reflect the personal views of the responsible analyst(s) about any and all of the subject securities or issuers. No part of the compensation of the responsible analyst(s) named herein is, or will be, directly or indirectly, related to the specific recommendations or views expressed by the responsible analyst(s) in this report.

## Disclaimer

## COMPANY UPDATE | COMMENT

AUGUST 4, 2011

## Fortis Inc. (TSX: FTS)

### Q2/11 Results Modestly Below Expectations

### Sector Perform Average Risk

Price:	30.87	Price Target:	34.00
Shares O/S (MM):	186.3	Implied All-In Return:	14%
Dividend:	1.16	Market Cap (MM):	5,751
Float (MM):	186.3	Yield:	3.8%
Debt to Cap:	55%		

### Event

Fortis reported Q2/11 results.

### Investment Opinion

- Q2/11 Results Modestly Below Expectations.** Fortis' Q2/11 normalized EPS was \$0.33 compared to our estimate of \$0.36 and \$0.32 in Q2/10. There were small negative variances in most of the segments with nothing major causing the modestly lower-than-forecast earnings.
- Still on the Hunt for a U.S. Utility Acquisition, but the CVPS Process Shows Fortis Will Be Disciplined.** Fortis remains interested in acquiring a U.S. utility, despite the recent Central Vermont Public Service (CVPS) agreement that was scuttled by a hostile bid by Gaz Metro. As evidenced by the company's walking away from CVPS rather than getting involved in a bidding war, we continue to believe that Fortis will remain very disciplined.
- Capex Plan Nudged Up.** With gross capital expenditures of \$519 million spent in H1/11, Fortis continues to expect \$1.2 billion of capex in 2011. The company also expects a five-year capex program of \$5.7 billion through to the end of 2015, which is up from the \$5.5 billion capex plan stated in previous guidance.
- Update on Belize.** Due to the expropriation of Belize Electricity Limited (BEL), Fortis has deconsolidated the results of BEL effective June 20, 2011. The book value of the BEL investment was \$112 million as at June 30, 2011. Fortis has initiated proceedings for compensation from the Government of Belize, and from our discussion with management, the company plans to file a formal proposal in the next several months. With respect to Belize Electric Company Limited (BECOL), the company's unregulated power generation assets in Belize, the Government of Belize has publicly indicated that it does not intend to expropriate these assets.
- Reducing Estimates.** We have reduced our 2011 and 2012 EPS estimates to \$1.74 and \$1.82, respectively (from \$1.78 and \$1.88) to primarily reflect the Q2/11 results in addition to modest changes to a number of the segments.
- Valuation.** We have left our \$34.00/share price target unchanged with a modest increase in the forward P/E to 18.5x (from 18.0x) offsetting the lower 2012 EPS estimate. We believe that a higher P/E valuation is supported by declining long bond yields and an overall rise in infrastructure valuations.

Priced as of prior trading day's market close, EST (unless otherwise noted).

Average shares outstanding (MM)	177	177	172
---------------------------------	-----	-----	-----

Source: Company reports; RBC Capital Markets estimates

## Highlights of the Quarter and Outlook

- **Slightly Lower Q1/11 Results Due to Small Segment Variances.** Lower-than-forecast earnings were mainly attributable to lower results from FortisBC Energy (timing of approved cost recovery), FortisAlberta (lower transmission revenue and customer growth), and Non-regulated Fortis Generation (lower hydrology in Belize), partially offset by higher earnings from FortisOntario & Maritime Electric (lower effective tax rate due to higher Q2/11 deductions at FortisOntario).
- **Update on Belize Situation.** Due to the expropriation of Belize Electricity Limited (BEL), Fortis has deconsolidated the results of BEL effective June 20, 2011. The book value of the BEL investment was \$112 million as at June 30, 2011. Fortis has initiated proceedings for compensation from the Government of Belize, and our discussion with management indicates the company plans to file a formal proposal in the next several months. With respect to Belize Electric Company Limited (BECOL), the company's unregulated power generation assets in Belize, the Government of Belize has publicly indicated that it does not intend to expropriate these assets.
- **Search for U.S. Utility Goes On Despite CVPS Acquisition That Fell Through.** Fortis remains interested in acquiring a U.S. utility, despite the recent Central Vermont Public Service (CVPS) agreement that was scuttled by a hostile bid by Gaz Metro (for additional details, please refer to our *Research Comment* dated July 13, 2011). As evidenced by the company's walking away from CVPS rather than getting involved in a bidding war, we continue to believe that Fortis will remain very disciplined with respect to its previously stated acquisition parameters.
  - **Potential for a Scale-Changing Acquisition.** The company continues to seek out regulated electric and/or gas utilities with a preference for businesses in a single state (i.e., one regulator). Fortis is comfortable with an integrated electric utility as long as the generation assets are in regulated rate base. The target size is US\$1 billion to US\$5 billion of enterprise value with a utility in the US\$3 billion enterprise value range as being optimal.
  - **Going Solo is Preferred.** Similar to comments made throughout the years, management continues to prefer to acquire 100% of assets without any partners. The company feels this reduces the complexity of a transaction and allows it to proceed with an acquisition more expeditiously.
  - **Will Partner if Necessary, but Not a Consortium.** To the extent an acquisition target is too large for Fortis to complete on its own, the company would consider taking on one partner (e.g., a Canadian pension fund) where the company would have at least a 50% interest.

- **Long-Term Utility Growth Plan Remains on Track.** With gross capital expenditures of \$519 million spent in H1/11, Fortis continues to expect \$1.2 billion of capex in 2011. The company also expects a five-year capex program of \$5.7 billion through to the end of 2015, which is up from the \$5.5 billion capex plan stated in previous guidance.
- **Construction Work Continues on Waneta Expansion.** Construction work continued on the \$900 million Waneta Expansion, a 335 MW hydro project in B.C. that is expected to be in service in the spring of 2015. With a controlling interest of 51%, Fortis will operate and maintain the facility, which will sell energy and capacity to BC Hydro and FortisBC Electric under 40-year power sales contracts.
- **\$341 Million Equity Issuance Completed.** Fortis recently completed its roughly \$341 million equity offering (including approximately \$41 million from the exercise of the over-allotment option). We had previously forecast Fortis' need for roughly \$300 million of common equity in late 2011 or early 2012 to finance the growth in its existing utilities (in particular western Canada) and the Waneta hydro expansion.

## Reducing 2011 and 2012 Estimates

We have reduced our 2011 and 2012 EPS estimates to \$1.74 and \$1.82, respectively (from \$1.78 and \$1.88) to primarily reflect the Q2/11 results in addition to modest changes to a number of the segments. Our revised estimates are set out in Exhibit 2.

**Exhibit 2: Revised Financial Forecast (In \$MM except per share figures)**

Source: Company reports; RBC Capital Markets estimates

## Valuation

Our price target of \$34.00 is based on a forward P/E of 18.5x 2012E EPS. Our selected P/E multiple is at the upper end of the five-year range, reflecting the low interest rate environment, good growth from the core Canadian regulated utilities, and the Waneta Dam expansion, which will not contribute to earnings until 2015.

## Price Target Impediment

The political environment in Belize, the risk of punitive regulatory decisions, economic/tourism conditions in its service territories, operational or financial issues at newly acquired businesses, and acquisitions or projects that fail to gain the confidence of investors may have implications for our price target.

## Company Description

Fortis Inc. is a utility holding company for Newfoundland Power, FortisAlberta, FortisBC, Terasen Inc., Maritime Electric, Canadian Niagara Power, Cornwall Electric, BECOL, two electric utilities in the Turks and Caicos, and 70%-owned Belize Electricity. It also holds a 100% interest in Fortis Properties and a 59.5% interest in Caribbean Utilities. The company is in the process of acquiring Central Vermont Public Service.

## Required Disclosures

### Non-U.S. Analyst Disclosure

Danny Hung (i) is not registered/qualified as a research analyst with the NYSE and/or FINRA and (ii) may not be associated persons of the RBC Capital Markets, LLC and therefore may not be subject to FINRA Rule 2711 and NYSE Rule 472 restrictions on communications with a subject company, public appearances and trading securities held by a research analyst account.

### Conflicts Disclosures

The analyst(s) responsible for preparing this research report received compensation that is based upon various factors, including total revenues of the member companies of RBC Capital Markets and its affiliates, a portion of which are or have been generated by investment banking activities of the member companies of RBC Capital Markets and its affiliates.

A member company of RBC Capital Markets or one of its affiliates managed or co-managed a public offering of securities for Fortis Inc. in the past 12 months.

A member company of RBC Capital Markets or one of its affiliates received compensation for investment banking services from Fortis Inc. in the past 12 months.

Royal Bank of Canada, together with its affiliates, beneficially owns 1 percent or more of a class of common equity securities of Fortis Inc..

A member company of RBC Capital Markets or one of its affiliates received compensation for products or services other than investment banking services from Fortis Inc. during the past 12 months. During this time, a member company of RBC Capital Markets or one of its affiliates provided non-investment banking securities-related services to Fortis Inc..

A member company of RBC Capital Markets or one of its affiliates received compensation for products or services other than investment banking services from Fortis Inc. during the past 12 months. During this time, a member company of RBC Capital Markets or one of its affiliates provided non-securities services to Fortis Inc..

RBC Capital Markets is currently providing Fortis Inc. with non-investment banking securities-related services.

RBC Capital Markets is currently providing Fortis Inc. with non-securities services.

RBC Capital Markets has provided Fortis Inc. with investment banking services in the past 12 months.

RBC Capital Markets has provided Fortis Inc. with non-investment banking securities-related services in the past 12 months.

RBC Capital Markets has provided Fortis Inc. with non-securities services in the past 12 months.

The author is employed by RBC Dominion Securities Inc., a securities broker-dealer with principal offices located in Toronto, Canada.

## Explanation of RBC Capital Markets Equity Rating System

An analyst's 'sector' is the universe of companies for which the analyst provides research coverage. Accordingly, the rating assigned to a particular stock represents solely the analyst's view of how that stock will perform over the next 12 months relative to the analyst's sector average.

### Ratings

**Top Pick (TP):** Represents best in Outperform category; analyst's best ideas; expected to significantly outperform the sector over 12 months; provides best risk-reward ratio; approximately 10% of analyst's recommendations.

**Outperform (O):** Expected to materially outperform sector average over 12 months.

**Sector Perform (SP):** Returns expected to be in line with sector average over 12 months.

**Underperform (U):** Returns expected to be materially below sector average over 12 months.

### Risk Qualifiers (any of the following criteria may be present):

**Average Risk (Avg):** Volatility and risk expected to be comparable to sector; average revenue and earnings predictability; no significant cash flow/financing concerns over coming 12-24 months; fairly liquid.

**Above Average Risk (AA):** Volatility and risk expected to be above sector; below average revenue and earnings predictability; may not be suitable for a significant class of individual equity investors; may have negative cash flow; low market cap or float.

**Speculative (Spec):** Risk consistent with venture capital; low public float; potential balance sheet concerns; risk of being delisted.

## Distribution of Ratings

For the purpose of ratings distributions, regulatory rules require member firms to assign ratings to one of three rating categories - Buy, Hold/Neutral, or Sell - regardless of a firm's own rating categories. Although RBC Capital Markets' ratings of Top Pick/Outperform,

Sector Perform and Underperform most closely correspond to Buy, Hold/Neutral and Sell, respectively, the meanings are not the same because our ratings are determined on a relative basis (as described above).

Distribution of Ratings RBC Capital Markets, Equity Research				
Rating	Count	Percent	Investment Banking Serv./Past 12 Mos.	
			Count	Percent
BUY[TP/O]	750	52.40	217	28.93
HOLD[SP]	622	43.40	134	21.54
SELL[U]	60	4.20	9	15.00

References to a Recommended List in the recommendation history chart may include one or more recommended lists or model portfolios maintained by a business unit of the Wealth Management Division of RBC Capital Markets, LLC. These Recommended Lists include the Prime Opportunity List (RL 3), a former list called the Private Client Prime Portfolio (RL 4), the Guided Portfolio: Prime Income (RL 6), the Guided Portfolio: Large Cap (RL 7), the Guided Portfolio: Dividend Growth (RL 8), and the Guided Portfolio: Midcap 111 (RL9). The abbreviation 'RL On' means the date a security was placed on a Recommended List. The abbreviation 'RL Off' means the date a security was removed from a Recommended List.

## Conflicts Policy

RBC Capital Markets Policy for Managing Conflicts of Interest in Relation to Investment Research is available from us on request. To access our current policy, clients should refer to

<https://www.rbccm.com/global/file-414164.pdf>

or send a request to RBC CM Research Publishing, P.O. Box 50, 200 Bay Street, Royal Bank Plaza, 29th Floor, South Tower, Toronto, Ontario M5J 2W7. We reserve the right to amend or supplement this policy at any time.

## Dissemination of Research and Short-Term Trading Calls

RBC Capital Markets endeavors to make all reasonable efforts to provide research simultaneously to all eligible clients, having regard to local time zones in overseas jurisdictions. RBC Capital Markets' equity research is posted to our proprietary websites to ensure eligible clients receive coverage initiations and changes in ratings, targets and opinions in a timely manner. Additional distribution may be done by the sales personnel via email, fax or regular mail. Clients may also receive our research via third-party vendors. Please contact your investment advisor or institutional salesperson for more information regarding RBC Capital Markets' research. RBC Capital Markets also provides eligible clients with access to SPARC on the Firm's proprietary INSIGHT website. SPARC contains market color and commentary, and may also contain Short-Term Trade Ideas regarding the publicly-traded common equity of subject companies on which the Firm currently provides equity research coverage. SPARC may be accessed via the following hyperlink: <https://www.rbcinsight.com>. A Short-Term Trade Idea reflects the research analyst's directional view regarding the price of the subject

company's publicly-traded common equity in the coming days or weeks, based on market and trading events. A Short-Term Trade Idea may differ from the price targets and recommendations in our published research reports reflecting the research analyst's views of the longer-term (one year) prospects of the subject company, as a result of the differing time horizons, methodologies and/or other factors. Thus, it is possible that a subject company's common equity that is considered a long-term 'sector perform' or even an 'underperform' might be a short-term buying opportunity as a result of temporary selling pressure in the market; conversely, a subject company's common equity rated a long-term 'outperform' could be considered susceptible to a short-term downward price correction. Short-Term Trade Ideas are not ratings, nor are they part of any ratings system, and the Firm generally does not intend, nor undertakes any obligation, to maintain or update Short-Term Trade Ideas. Securities and Short-Term Trade Ideas discussed in SPARC may not be suitable for all investors and have not been tailored to individual investor circumstances and objectives, and investors should make their own independent decisions regarding any securities or strategies discussed herein.

## Analyst Certification

All of the views expressed in this report accurately reflect the personal views of the responsible analyst(s) about any and all of the subject securities or issuers. No part of the compensation of the responsible analyst(s) named herein is, or will be, directly or indirectly, related to the specific recommendations or views expressed by the responsible analyst(s) in this report.

## Disclaimer

## COMPANY UPDATE | COMMENT

NOVEMBER 4, 2011

## Fortis Inc. (TSX: FTS)

## Regulated Utilities Drive a Solid Quarter

Sector Perform  
Average Risk

Price:	34.06	Price Target:	34.00
Shares O/S (MM):	186.9	Implied All-In Return:	3%
Dividend:	1.16	Market Cap (MM):	6,366
Float (MM):	186.9	Yield:	3.4%
Debt to Cap:	55%		

## Event

Fortis reported Q3/11 results.

## Investment Opinion

- **Normalized Results In-Line.** The Q3/11 normalized EPS was \$0.25 compared to our estimate of \$0.24 and \$0.24 in Q3/10. Consensus for the quarter was \$0.24 (four estimates with a range of \$0.22 to \$0.24). Reported EPS was \$0.31 and included a \$0.06/share gain from the termination fee from the CVPS transaction.
- **No Major Surprises.** Overall, Canadian regulated utilities posted a good quarter with \$40 million of earnings (our estimate was \$38 million). All of the other segments were within +/- \$1 million of our estimate.
- **Growth Plan Remains Unchanged.** With gross capital expenditures of \$806 million spent in the first nine months of the year, Fortis continues to expect \$1.2 billion of capex in 2011. The company also expects a five-year capex program of \$5.7 billion through to the end of 2015.
- **Update on Belize Situation.** Fortis has commissioned an independent valuation of its previous investment in BEL and expects to submit a claim for compensation to the Government of Belize during Q4/11.
- **Estimates Unchanged.** Based on an in-line quarter, we have left our 2011–2013 annual EPS estimates unchanged.
- **A Good Stock for Investors Looking to Play Defense.** With roughly 75% of earnings derived from Canadian cost-of-service regulated utilities, we believe that Fortis' stock is a good choice for investors looking for a defensive business to protect against both market and economic weakness.
- **Valuation.** Our price target of \$34.00 (unchanged) is based on a forward P/E of 18.0x 2013E EPS. Our selected P/E multiple is at the upper end of the five-year range, reflecting the low interest rate environment, good growth from the core Canadian regulated utilities, and the Waneta Dam expansion, which will not contribute to earnings until 2015.

## Q3/11 Results in Line with Expectations after One-Time Adjustment

Fortis' Q3/11 normalized EPS was \$0.25 compared to our estimate of \$0.24 and \$0.24 in Q3/10. Reported EPS was \$0.31 and included a \$0.06/share gain from the termination fee from the CVPS transaction. There were no major surprises in the segment results. Overall, Canadian regulated utilities posted a good quarter with \$40 million of earnings (our estimate was \$38 million). All of the other segments were within +/- \$1 million of our estimate. A table showing the segment earnings compared to our estimates is set out in Exhibit 1.

## Highlights of the Quarter and Outlook

- **Newfoundland Power Sells 40% of Joint-Use Poles to Bell Aliant.** In September, 2011, Newfoundland Power received regulatory approval for the sale of 40% of the utility's joint-use poles to Bell Aliant. The transaction closed on October 5, 2011 and the proceeds were approximately \$46 million.
- **\$25 Million Acquisition Made by Fortis Properties.** On October 19, 2011, Fortis Properties acquired the 160-room, full-service Hilton Suites Winnipeg Airport Hotel for approximately \$25 million.
- **Update on Belize Situation.** Due to the expropriation of Belize Electricity Limited (BEL), Fortis deconsolidated the results of BEL effective June 20, 2011. The book value of the BEL investment was \$112 million as at June 30, 2011. Fortis has commissioned an independent valuation of its previous investment in BEL and expects to submit a claim for compensation to the Government of Belize during Q4/11.
- **Long-Term Utility Growth Plan Remains Unchanged.** With gross capital expenditures of \$806 million spent in the first nine months of the year, Fortis continues to expect \$1.2 billion of capex in 2011. The company also expects a five-year capex program of \$5.7 billion through to the end of 2015.
- **Construction Work Continues on Waneta Expansion.** Construction work continued on the \$900 million Waneta Expansion, a 335 MW hydro project in B.C. that is expected to be in service in the spring of 2015. With a controlling interest of 51%, Fortis will operate and maintain the facility, which will sell energy and capacity to BC Hydro and FortisBC Electric under 40-year power sales contracts.
- **Still Looking for U.S. Acquisitions, but Nothing Appears Imminent.** Fortis continues to look in the U.S. for utilities to acquire, although we do not get the impression that anything meaningful is in the works at this time. We continue to expect management to

remain patient (the acquisition hunt in the U.S. has been going on for years). The preference has been for a utility in the US\$3 billion to US\$5 billion range (enterprise value), operating in a single state with no material unregulated assets. Fortis would prefer to be the sole owner and operator but would consider a partnership with a Canadian pension fund if Fortis maintained control (i.e., not a minority position or part of a consortium).

- **Moose River Hydroelectric Facility Expected to Be Operational in February 2012.** In May 2011, the Moose River generator (part of Fortis Generation segment) in Upper New York State sustained electrical damage and is expected to be operational again in February 2012. In the meantime, equipment and business interruption insurance claims have been made.

## Overall Estimates Remain Unchanged

We have made minor changes to our Q4/11 estimate, but have left our overall EPS estimates unchanged through 2013. Our revised estimates are set out in Exhibit 2.

**Exhibit 2: Revised Financial Forecast (In \$MM except per share figures)**

## Valuation

Our price target of \$34.00 is based on a forward P/E of 18.0x 2013E EPS. Our selected P/E multiple is at the upper end of the five-year range, reflecting the low interest rate environment, good growth from the core Canadian regulated utilities, and the Waneta Dam expansion, which will not contribute to earnings until 2015.

## Price Target Impediment

The political environment in Belize, the risk of punitive regulatory decisions, economic/tourism conditions in its service territories, operational or financial issues at newly acquired businesses, and acquisitions or projects that fail to gain the confidence of investors may have implications for our price target.

## Company Description

Fortis Inc. is a utility holding company for Newfoundland Power, FortisAlberta, FortisBC, Terasen Inc., Maritime Electric, Canadian Niagara Power, Cornwall Electric, BECOL, two electric utilities in the Turks and Caicos, and 70%-owned Belize Electricity. It also holds a 100% interest in Fortis Properties and a 59.5% interest in Caribbean Utilities. The company is in the process of acquiring Central Vermont Public Service.

## Required Disclosures

### Non-U.S. Analyst Disclosure

Kelsey Roste and Danny Hung (i) are not registered/qualified as research analysts with the NYSE and/or FINRA and (ii) may not be associated persons of the RBC Capital Markets, LLC and therefore may not be subject to FINRA Rule 2711 and NYSE Rule 472 restrictions on communications with a subject company, public appearances and trading securities held by a research analyst account.

### Conflicts Disclosures

The analyst(s) responsible for preparing this research report received compensation that is based upon various factors, including total revenues of the member companies of RBC Capital Markets and its affiliates, a portion of which are or have been generated by investment banking activities of the member companies of RBC Capital Markets and its affiliates.

A member company of RBC Capital Markets or one of its affiliates managed or co-managed a public offering of securities for Fortis Inc. in the past 12 months.

A member company of RBC Capital Markets or one of its affiliates received compensation for investment banking services from Fortis Inc. in the past 12 months.

Royal Bank of Canada, together with its affiliates, beneficially owns 1 percent or more of a class of common equity securities of Fortis Inc..

A member company of RBC Capital Markets or one of its affiliates received compensation for products or services other than investment banking services from Fortis Inc. during the past 12 months. During this time, a member company of RBC Capital Markets or one of its affiliates provided non-investment banking securities-related services to Fortis Inc..

A member company of RBC Capital Markets or one of its affiliates received compensation for products or services other than investment banking services from Fortis Inc. during the past 12 months. RBC Capital Markets has provided Fortis Inc. with investment banking services in the past 12 months.

RBC Capital Markets has provided Fortis Inc. with non-investment banking securities-related services in the past 12 months.

RBC Capital Markets has provided Fortis Inc. with non-securities services in the past 12 months.

The author is employed by RBC Dominion Securities Inc., a securities broker-dealer with principal offices located in Toronto, Canada.

## Explanation of RBC Capital Markets Equity Rating System

An analyst's 'sector' is the universe of companies for which the analyst provides research coverage. Accordingly, the rating assigned to a particular stock represents solely the analyst's view of how that stock will perform over the next 12 months relative to the analyst's sector average.

### Ratings

**Top Pick (TP):** Represents best in Outperform category; analyst's best ideas; expected to significantly outperform the sector over 12 months; provides best risk-reward ratio; approximately 10% of analyst's recommendations.

**Outperform (O):** Expected to materially outperform sector average over 12 months.

**Sector Perform (SP):** Returns expected to be in line with sector average over 12 months.

**Underperform (U):** Returns expected to be materially below sector average over 12 months.

### Risk Qualifiers (any of the following criteria may be present):

**Average Risk (Avg):** Volatility and risk expected to be comparable to sector; average revenue and earnings predictability; no significant cash flow/financing concerns over coming 12-24 months; fairly liquid.

**Above Average Risk (AA):** Volatility and risk expected to be above sector; below average revenue and earnings predictability; may not be suitable for a significant class of individual equity investors; may have negative cash flow; low market cap or float.

**Speculative (Spec):** Risk consistent with venture capital; low public float; potential balance sheet concerns; risk of being delisted.

## Distribution of Ratings

For the purpose of ratings distributions, regulatory rules require member firms to assign ratings to one of three rating categories - Buy, Hold/Neutral, or Sell - regardless of a firm's own rating categories. Although RBC Capital Markets' ratings of Top Pick/Outperform, Sector Perform and Underperform most closely correspond to Buy, Hold/Neutral and Sell, respectively, the meanings are not the same because our ratings are determined on a relative basis (as described above).

Distribution of Ratings RBC Capital Markets, Equity Research				
Rating	Count	Percent	Investment Banking Serv./Past 12 Mos.	
			Count	Percent
BUY[TP/O]	775	52.80	230	29.68
HOLD[SP]	628	42.80	137	21.82
SELL[U]	64	4.40	6	9.38

References to a Recommended List in the recommendation history chart may include one or more recommended lists or model portfolios maintained by a business unit of the Wealth Management Division of RBC Capital Markets, LLC. These Recommended Lists include the Prime Opportunity List (RL 3), a former list called the Private Client Prime Portfolio (RL 4), the Guided Portfolio: Prime Income (RL 6), the Guided Portfolio: Large Cap (RL 7), the Guided Portfolio: Dividend Growth (RL 8), and the Guided Portfolio: Midcap 111 (RL9). The abbreviation 'RL On' means the date a security was placed on a Recommended List. The abbreviation 'RL Off' means the date a security was removed from a Recommended List.

or send a request to RBC CM Research Publishing, P.O. Box 50, 200 Bay Street, Royal Bank Plaza, 29th Floor, South Tower, Toronto, Ontario M5J 2W7. We reserve the right to amend or supplement this policy at any time.

## Dissemination of Research and Short-Term Trade Ideas

RBC Capital Markets endeavors to make all reasonable efforts to provide research simultaneously to all eligible clients, having regard to local time zones in overseas jurisdictions. RBC Capital Markets' research is posted to our proprietary websites to ensure eligible clients receive coverage initiations and changes in ratings, targets and opinions in a timely manner. Additional distribution may be done by the sales personnel via email, fax or regular mail. Clients may also receive our research via third-party vendors. Please contact your investment advisor or institutional salesperson for more information regarding RBC Capital Markets' research. RBC Capital Markets also provides eligible clients with access to SPARC on its proprietary INSIGHT website. SPARC contains market color and commentary, and may also contain Short-Term Trade Ideas regarding the securities of subject companies discussed in this or other research reports. SPARC may be accessed via the following hyperlink: <https://www.rbcinsight.com>. A Short-Term Trade Idea reflects the research analyst's directional view regarding the price of the security of a subject company in the coming days or weeks, based on market and trading events. A Short-Term Trade Idea may differ from the price targets and/or recommendations in our published research reports reflecting the research analyst's views of the longer-term (one year) prospects of the subject company, as a result of the differing time horizons, methodologies and/or other factors. Thus, it is possible that the security of a subject company that is considered a long-term 'Sector Perform' or even an 'Underperform' might be a short-term buying opportunity as a result of temporary

selling pressure in the market; conversely, the security of a subject company that is rated a long-term 'Outperform' could be considered susceptible to a short-term downward price correction. Short-Term Trade Ideas are not ratings, nor are they part of any ratings system, and RBC Capital Markets generally does not intend, nor undertakes any obligation, to maintain or update Short-Term Trade Ideas. Short-Term Trade Ideas discussed in SPARC may not be suitable for all investors and have not been tailored to individual investor circumstances and objectives, and investors should make their own independent decisions regarding any Short-Term Trade Ideas discussed therein.

## Analyst Certification

All of the views expressed in this report accurately reflect the personal views of the responsible analyst(s) about any and all of the subject securities or issuers. No part of the compensation of the responsible analyst(s) named herein is, or will be, directly or indirectly, related to the specific recommendations or views expressed by the responsible analyst(s) in this report.

## Disclaimer

RBC Capital Markets is the business name used by certain branches and subsidiaries of the Royal Bank of Canada, including RBC Dominion Securities Inc., RBC Capital Markets, LLC, RBC Europe Limited, RBC Capital Markets (Hong Kong) Limited, Royal Bank of Canada, Hong Kong Branch and Royal Bank of Canada, Sydney Branch. ## COMPANY UPDATE | COMMENT

FEBRUARY 10, 2012

## Fortis Inc. (TSX: FTS)

### Q4/11 Earnings Slightly Short of Expectations

### Sector Perform Average Risk

Price:	33.89	Price Target:	34.00
Shares O/S (MM):	189.0	Implied All-In Return:	4%
Dividend:	1.20	Market Cap (MM):	6,405
Float (MM):	189.0	Yield:	3.5%
Debt to Cap:	55%		

### Event

Fortis reported Q4/11 results.

### Investment Opinion

- Q4/11 Results Slightly Short of Expectations.** Normalized Q4/11 EPS was \$0.46, compared to our estimate of \$0.49 and \$0.49 in Q4/10. The core Canadian Regulated Utilities segment was in line with expectations with the shortfall coming from the utilities in the Caribbean and the Properties division.
- Utility Spending Continues to Drive the Organic Growth Story.** After spending \$900 million to grow rate base in its Canadian regulated utilities in 2011, Fortis expects to spend a similar amount in 2012 as part of the 5-year \$5.5 billion capex plan with almost 90% directed to the utilities in Canada.
- Nothing New on Potential U.S. Acquisitions.** The directional strategy of trying to grow in the U.S. has not changed, but there is nothing to update on strategy or likelihood of an acquisition coming to fruition. We continue to expect management to exercise patience and discipline given this strategy has existed for several years with Fortis walking away from various targets, some which have been high profile, given high valuations.
- Modestly Reducing Estimates to Primarily Reflect Headwinds in the Caribbean and Properties.** Our new 2012 and 2013 EPS estimates are \$1.76 and \$1.87, respectively (down from \$1.81 and \$1.91, respectively). The estimates for the core Canadian Regulated Utilities remain largely unchanged. We would note that our forecast does not include any impact from a possible reduction in ROE for the B.C.-based utilities given the pending review by the BCUC. We estimate that a 50 basis point change in allowed ROE would impact EPS by roughly \$0.05/share.
- Valuation.** Our price target of \$34.00 (unchanged) is based on forward P/E of 18.0x 2013E EPS. Our selected P/E multiple is at the upper end of the five-year range, reflecting the low interest rate environment, good growth from the core Canadian regulated utilities, and the Waneta Dam expansion, which will not contribute to earnings until 2015.

## Q4/11 Results Slightly Lower-Than-Expected

Fortis' Q4/11 normalized EPS was \$0.46 compared to our estimate of \$0.49 and \$0.49 in Q4/10. The lower-than-expected results were primarily driven by Caribbean Regulated Utilities (\$0.02/share) and Fortis Properties (\$0.02/share). All of the other segments were within +/- \$1 million of our estimate. A table showing the segment earnings compared to our estimates is set out in Exhibit 1.

### Exhibit 1: Normalized Earnings (In \$MM except per share figures)

## Highlights of the Quarter and Outlook

- Regulatory Reviews on ROE: One Down, Two to Go.** With the Alberta Utilities Commission (AUC) modestly reducing the allowed ROE to 8.75% (from 9.00%), the focus shifts to the British Columbia Utilities Commission (BCUC), which will review allowed ROEs and capital structures this year. Further, the Newfoundland and Labrador Board of Commissioners of Public Utilities provided relief on the 2012 ROE by suspending the formula and maintaining the 8.38% ROE (it would have dropped to 7.85%) with a full cost of capital review also likely to occur this year. We estimate that a 50 basis point change in allowed ROE in B.C. would impact EPS by roughly \$0.05/share. A similar change in Newfoundland and Labrador would impact EPS by about \$0.01/share.
- Government's Belize Valuation Significantly Lower-Than-Expected.** During Q4/11, Fortis commissioned an independent valuation of its investment in Belize Electricity Limited (BEL) and submitted a claim for compensation to the Government of Belize (GOB). In response to Fortis' claim, the GOB also commissioned an independent valuation of BEL, resulting in a significantly lower fair value than was estimated by the Fortis valuation. The company is pursuing alternative options for obtaining fair compensation from the GOB.
- 5-year Capex Plan Continues To Remain Strong.** The company's updated 5-year capex plan through 2016 has not significantly changed from the 2011 plan. In summary, over the next five years (2012 to 2016), Fortis' planned capex is expected to approximate \$5.5 billion. The majority of Fortis' planned capital investment is in Canadian regulated electric utilities (approximately 64%) and Canadian regulated gas utilities (approximately 23%), subject to regulatory approval.
- \$244 Million Invested To Date In The Waneta Dam Expansion.** Construction work continues on the \$900 million Waneta Expansion, a 335 MW hydro project in B.C. that is expected to be in service in the spring of 2015. The project is on schedule and budget, with approximately \$244 million invested since construction started in late 2010. With a controlling interest of 51%, Fortis will operate and maintain the facility, which will sell energy and capacity to BC Hydro and FortisBC Electric under 40-year power sales contracts.

- **Mount Hayes Storage Facility Brought On-Line In Late 2011.** The 1.5 billion-cubic foot LNG storage facility, located on Vancouver Island, was completed during Q2/11 and brought on-line in late 2011. The project costs were approximately \$212 million and are included in FortisBC Energy's rate base (Vancouver Island).
- **Customer Care Enhancement Project in Service in January 2012.** The \$110 million project at FortisBC Energy was put into service in January 2012. The company estimates that approximately \$30 million of the project costs will be incurred in H1/12, as they relate to final contractor payments. Total costs for the project are expected to come in under budget.

### Modestly Reducing Estimates to Reflect Headwinds in Caribbean and Properties

We have slightly reduced our 2012 and 2013 EPS estimates \$1.76 and \$1.87, respectively (from \$1.81 and \$1.91, respectively). The estimates for the core Canadian Regulated Utilities remain largely unchanged. We would note that our forecast does not include any impact from a reduction in ROE for the B.C.-based utilities. We estimate that a 50 basis point change in allowed ROE would impact EPS by roughly \$0.05/share. Due to our lower EPS forecast, we have also modified our dividend estimate for 2013 to an annual increase of \$0.06/share (down from \$0.08/share). Our revised estimates are set out in Exhibit 2.

Source: Company reports; RBC Capital Markets estimates

## Valuation

Our price target of \$34.00 is based on a forward P/E of 18.0x 2013E EPS. Our selected P/E multiple is at the upper end of the five-year range, reflecting the low interest rate environment, good growth from the core Canadian regulated utilities, and the Waneta Dam expansion, which will not contribute to earnings until 2015.

## Price Target Impediment

The political environment in Belize, the risk of punitive regulatory decisions, economic/tourism conditions in its service territories, operational or financial issues at newly acquired businesses, and acquisitions or projects that fail to gain the confidence of investors may have implications for our price target.

## Company Description

Fortis Inc. is a utility holding company for Newfoundland Power, FortisAlberta, FortisBC, Terasen Inc., Maritime Electric, Canadian Niagara Power, Cornwall Electric, BECOL, and two electric utilities in the Turks and Caicos. It also holds a 100% interest in Fortis Properties and a 59.5% interest in Caribbean Utilities.

## Required Disclosures

### Non-U.S. Analyst Disclosure

Kelsey Roste and Danny Hung (i) are not registered/qualified as research analysts with the NYSE and/or FINRA and (ii) may not be associated persons of the RBC Capital Markets, LLC and therefore may not be subject to FINRA Rule 2711 and NYSE Rule 472 restrictions on communications with a subject company, public appearances and trading securities held by a research analyst account.

### Conflicts Disclosures

The analyst(s) responsible for preparing this research report received compensation that is based upon various factors, including total revenues of the member companies of RBC Capital Markets and its affiliates, a portion of which are or have been generated by investment banking activities of the member companies of RBC Capital Markets and its affiliates.

A member company of RBC Capital Markets or one of its affiliates managed or co-managed a public offering of securities for Fortis Inc. in the past 12 months.

A member company of RBC Capital Markets or one of its affiliates received compensation for investment banking services from Fortis Inc. in the past 12 months.

Royal Bank of Canada, together with its affiliates, beneficially owns 1 percent or more of a class of common equity securities of Fortis Inc..

A member company of RBC Capital Markets or one of its affiliates received compensation for products or services other than investment banking services from Fortis Inc. during the past 12 months. During this time, a member company of RBC Capital Markets or one of its affiliates provided non-investment banking securities-related services to Fortis Inc..

A member company of RBC Capital Markets or one of its affiliates received compensation for products or services other than investment banking services from Fortis Inc. during the past 12 months. During this time, a member company of RBC Capital Markets or one of its affiliates provided non-securities services to Fortis Inc..

RBC Capital Markets has provided Fortis Inc. with investment banking services in the past 12 months.

RBC Capital Markets has provided Fortis Inc. with non-investment banking securities-related services in the past 12 months.

RBC Capital Markets has provided Fortis Inc. with non-securities services in the past 12 months.

The author is employed by RBC Dominion Securities Inc., a securities broker-dealer with principal offices located in Toronto, Canada.

## Explanation of RBC Capital Markets Equity Rating System

An analyst's 'sector' is the universe of companies for which the analyst provides research coverage. Accordingly, the rating assigned to a particular stock represents solely the analyst's view of how that stock will perform over the next 12 months relative to the analyst's sector average.

### Ratings

**Top Pick (TP):** Represents analyst's best idea in the sector; expected to provide significant absolute total return over 12 months with a favorable risk-reward ratio.

**Outperform (O):** Expected to materially outperform sector average over 12 months.

**Sector Perform (SP):** Returns expected to be in line with sector average over 12 months.

**Underperform (U):** Returns expected to be materially below sector average over 12 months.

### Risk Qualifiers (any of the following criteria may be present):

**Average Risk (Avg):** Volatility and risk expected to be comparable to sector; average revenue and earnings predictability; no significant cash flow/financing concerns over coming 12-24 months; fairly liquid.

**Above Average Risk (AA):** Volatility and risk expected to be above sector; below average revenue and earnings predictability; may not be suitable for a significant class of individual equity investors; may have negative cash flow; low market cap or float.

**Speculative (Spec):** Risk consistent with venture capital; low public float; potential balance sheet concerns; risk of being delisted.

## Distribution of Ratings

For the purpose of ratings distributions, regulatory rules require member firms to assign ratings to one of three rating categories - Buy, Hold/Neutral, or Sell - regardless of a firm's own rating categories. Although RBC Capital Markets' ratings of Top Pick/Outperform, Sector Perform and Underperform most closely correspond to Buy, Hold/Neutral and Sell, respectively, the meanings are not the same because our ratings are determined on a relative basis (as described above).

Distribution of Ratings RBC Capital Markets, Equity Research				
Rating	Count	Percent	Investment Banking Serv./Past 12 Mos.	
			Count	Percent
BUY[TP/O]	774	51.90	224	28.94
HOLD[SP]	648	43.40	146	22.53
SELL[U]	71	4.80	5	7.04

References to a Recommended List in the recommendation history chart may include one or more recommended lists or model portfolios maintained by a business unit of the Wealth Management Division of RBC Capital Markets, LLC. These Recommended Lists include a former list called the Prime Opportunity List (RL 3), a former list called the Private Client Prime Portfolio (RL 4), the Guided Portfolio: Prime Income (RL 6), the Guided Portfolio: Large Cap (RL 7), Guided Portfolio: Dividend Growth (RL 8), the Guided Portfolio: Midcap 111 (RL9), and the Guided Portfolio: ADR (RL 10). The abbreviation 'RL On' means the date a security was placed on a Recommended List. The abbreviation 'RL Off' means the date a security was removed from a Recommended List.

## Conflicts Policy

RBC Capital Markets Policy for Managing Conflicts of Interest in Relation to Investment Research is available from us on request. To access our current policy, clients should refer to

<https://www.rbcm.com/global/file-414164.pdf>

or send a request to RBC CM Research Publishing, P.O. Box 50, 200 Bay Street, Royal Bank Plaza, 29th Floor, South Tower, Toronto, Ontario M5J 2W7. We reserve the right to amend or supplement this policy at any time.

## Dissemination of Research and Short-Term Trade Ideas

RBC Capital Markets endeavors to make all reasonable efforts to provide research simultaneously to all eligible clients, having regard to local time zones in overseas jurisdictions. RBC Capital Markets' research is posted to our proprietary websites to ensure eligible clients receive coverage initiations and changes in ratings, targets and opinions in a timely manner. Additional distribution may be done by the sales personnel via email, fax or regular mail. Clients may also receive our research via third-party vendors. Please contact your investment advisor or institutional salesperson for more information regarding RBC Capital Markets' research. RBC Capital Markets also provides eligible clients with access to SPARC on its proprietary INSIGHT website. SPARC contains market color and commentary, and may also contain Short-Term Trade Ideas regarding the securities of subject companies discussed in this or other research reports. SPARC may be accessed via the following hyperlink: <https://www.rbcinsight.com>. A Short-Term Trade Idea reflects the research analyst's directional view regarding the price of the security of a subject company in the coming days or weeks, based on market and trading events. A Short-Term Trade Idea may differ from the price targets and/or recommendations in our published research reports reflecting the research analyst's views of the longer-term (one year) prospects of the subject company, as a result of the differing time horizons, methodologies and/or other factors. Thus, it is possible that the security of a subject company that is considered a long-term 'Sector Perform' or even an 'Underperform' might be a short-term buying opportunity as a result of temporary

selling pressure in the market; conversely, the security of a subject company that is rated a long-term 'Outperform' could be considered susceptible to a short-term downward price correction. Short-Term Trade Ideas are not ratings, nor are they part of any ratings system, and RBC Capital Markets generally does not intend, nor undertakes any obligation, to maintain or update Short-Term Trade Ideas. Short-Term Trade Ideas discussed in SPARC may not be suitable for all investors and have not been tailored to individual investor circumstances and objectives, and investors should make their own independent decisions regarding any Short-Term Trade Ideas discussed therein.

## Analyst Certification

All of the views expressed in this report accurately reflect the personal views of the responsible analyst(s) about any and all of the subject securities or issuers. No part of the compensation of the responsible analyst(s) named herein is, or will be, directly or indirectly, related to the specific recommendations or views expressed by the responsible analyst(s) in this report.

## Disclaimer

RBC Capital Markets is the business name used by certain branches and subsidiaries of the Royal Bank of Canada, including RBC Dominion Securities Inc., RBC Capital Markets, LLC, RBC Europe Limited, RBC Capital Markets (Hong Kong) Limited, Royal Bank of Canada, Hong Kong Branch and Royal Bank of Canada, Sydney Branch. The information contained in this report has been compiled by RBC Capital Markets from sources believed to be reliable, but no representation or warranty, express or implied, is made by Royal Bank of Canada, RBC Capital Markets, its affiliates or any other person as to its accuracy, completeness or correctness. All opinions and estimates contained in this report constitute RBC Capital Markets' judgement as of the date of this report, are subject to change without notice and are provided in good faith but without legal responsibility. Nothing in this report constitutes legal, accounting or tax advice or individually tailored investment advice. This material is prepared for general circulation to clients and has been prepared without regard to the individual financial circumstances and objectives of persons who receive it. The investments or services contained in this report may not be suitable for you and it is recommended that you consult an independent investment advisor if you are in doubt about the suitability of such investments or services. This report is not an offer to sell or a solicitation of an offer to buy any securities. Past performance is not a guide to future performance, future returns are not guaranteed, and a loss of original capital may occur. RBC Capital Markets research analyst compensation is based in part on the overall profitability of RBC Capital Markets, which includes profits attributable to investment banking revenues. Every province in Canada, state in the U.S., and most countries throughout the world have their own laws regulating the types of securities and other investment products which may be offered to their residents, as well as the process for doing so. As a result, the securities discussed in this report may not be eligible for sale in some jurisdictions. This report is not, and under no circumstances should be construed as, a solicitation to act as securities broker or dealer in any jurisdiction by any person or company that is not legally permitted to carry on the business of a securities broker or dealer in that jurisdiction. To the full extent permitted by law neither RBC Capital Markets nor any of its affiliates, nor any other person, accepts any liability whatsoever for any direct or consequential loss arising from any use of this report or the information contained herein. No matter contained in this document may be reproduced or copied by any means without the prior consent of RBC Capital Markets.

**Additional information is available on request.**

### To U.S. Residents:

This publication has been approved by RBC Capital Markets, LLC (member FINRA, NYSE, SIPC), which is a U.S. registered broker-dealer and which accepts responsibility for this report and its dissemination in the United States. Any U.S. recipient of this report that is not a registered broker-dealer or a bank acting in a broker or dealer capacity and that wishes further information regarding, or to effect any transaction in, any of the securities discussed in this report, should contact and place orders with RBC Capital Markets, LLC.

### To Canadian Residents:

This publication has been approved by RBC Dominion Securities Inc. (member IIROC). Any Canadian recipient of this report that is not a Designated Institution in Ontario, an Accredited Investor in British Columbia or Alberta or a Sophisticated Purchaser in Quebec (or similar permitted purchaser in any other province) and that wishes further information regarding, or to effect any transaction in, any of the securities discussed in this report should contact and place orders with RBC Dominion Securities Inc., which, without in any way limiting the foregoing, accepts responsibility for this report and its dissemination in Canada.

### To U.K. Residents:

This publication has been approved by RBC Europe Limited ('RBCEL') which is authorized and regulated by Financial Services Authority ('FSA'), in connection with its distribution in the United Kingdom. This material is not for general distribution in the United Kingdom to retail clients, as defined under the rules of the FSA. However, targeted distribution may be made to selected retail clients of RBC and its affiliates. RBCEL accepts responsibility for this report and its dissemination in the United Kingdom.

### To Persons Receiving This Advice in Australia:

This material has been distributed in Australia by Royal Bank of Canada - Sydney Branch (ABN 86 076 940 880, AFSL No. 246521). This material has been prepared for general circulation and does not take into account the objectives, financial situation or needs of any recipient. Accordingly, any recipient should, before acting on this material, consider the appropriateness of this material having regard to their objectives, financial situation and needs. If this material relates to the acquisition or possible acquisition of a particular financial product, a recipient in Australia should obtain any relevant disclosure document prepared in respect of that product and consider that document before making any decision about whether to acquire the product.

### To Hong Kong Residents:

This publication is distributed in Hong Kong by RBC Investment Services (Asia) Limited, RBC Investment Management (Asia) Limited and RBC Capital Markets (Hong Kong) Limited, licensed corporations under the Securities and Futures Ordinance or, by the Royal Bank of Canada, Hong Kong Branch, a registered institution under the Securities and Futures Ordinance. This material has been prepared for general circulation and does not take into account the objectives, financial situation, or needs of any recipient. Hong Kong persons wishing to obtain further information on any of the securities mentioned in this publication should contact RBC Investment Services (Asia) Limited, RBC Investment Management (Asia) Limited, RBC Capital Markets (Hong Kong) Limited or Royal Bank of Canada, Hong Kong Branch at 17/Floor, Cheung Kong Center, 2 Queen's Road Central, Hong Kong (telephone number is 2848-1388).

### To Singapore Residents:

This publication is distributed in Singapore by the Royal Bank of Canada, Singapore Branch and Royal Bank of Canada (Asia) Limited, registered entities granted offshore bank and merchant bank status by the Monetary Authority of Singapore, respectively. This material has been prepared for general circulation and does not take into account the objectives, financial situation, or needs of any recipient. You are advised to seek independent advice from a financial adviser before purchasing any product. If you do not obtain independent advice, you should consider whether the product is suitable for you. Past performance is not indicative of future performance. If you have any questions related to this publication, please contact the Royal Bank of Canada, Singapore Branch or Royal Bank of Canada (Asia) Limited.

### To Japanese Residents:

Unless otherwise exempted by Japanese law, this publication is distributed in Japan by or through RBC Capital Markets (Japan) Ltd., a registered type one financial instruments firm and/or Royal Bank of Canada, Tokyo Branch, a licensed foreign bank.

## FIRST GLANCE | COMMENT

FEBRUARY 21, 2012

## RBC Dominion Securities Inc.

Robert Kwan, CFA (Analyst)  
(604) 257-7611; robert.kwan@rbccm.com

Kelsey Roste (Associate)  
(604) 257-7383; kelsey.roste@rbccm.com

Danny Hung, CA (Associate)  
(604) 257-7064; danny.hung@rbccm.com

All values in CAD unless otherwise noted.

## Fortis Inc. (TSX: FTS; 32.85)

## Agrees to Acquire U.S. Regulated Utility

Sector Perform  
Average Risk

## Impact

Modestly Positive

## First Impression

- **Acquires CH Energy Group for US\$1.5 Billion.** Fortis has entered into an agreement to acquire CH Energy Group (NYSE: CHG, US\$58.77; not rated) for an aggregate purchase price of approximately US\$1.5 billion (including US\$500 million of debt). CH Energy's main business segment is a regulated transmission and distribution utility in New York State (97% of net income). CH Energy also owns and operates a non-regulated fuel delivery business.
- **Purchase Price Represents 10.5% Premium.** The US\$65/share purchase price represents a 10.5% premium above CHG's most recent closing price. We note that the acquisition is subject to shareholder and other regulatory approvals including, the New York Public Service Commission and the Federal Energy Regulatory Commission.
- **Transaction Expected to Be Immediately Accretive to EPS.** Fortis stated that it expects the acquisition to be immediately accretive to EPS excluding one-time transaction costs. The total assets of Fortis are expected to increase by approximately 16% to \$17 billion following the completion of the transaction.
- **Initial Financing Will Be the Credit Facility.** Fortis will use its multi-year committed credit facility to finance the acquisition in the short term. However, we note that any need for common equity would be reduced by the \$341 million equity issuance in mid-2011 with proceeds that were partly intended to finance the CVPS acquisition that did not proceed.
- **Fast Growing Utility.** Fortis expects annual capital expenditures at Central Hudson to exceed US\$100 million on average through 2016. The increase in rate base should drive above-average EPS growth.
- **Low Risk Utility.** Central Hudson operates under cost-of-service regulation with a framework that provides full recovery and deferral provisions for pension and fuel costs. Furthermore, rates are de-coupled, which provides increased protection against changes in customer usage.
- **Attractive ROE for Now.** Central Hudson's current rates having been established using a 10% return on equity and a 48% equity thickness for three years beginning on July 1, 2010. We note that ROEs in New York have recently been pegged below 9.5%.
- **Overall, We View the Transaction as a Modest Positive.** Similar to our thoughts on the CVPS approach, we view the CH Energy transaction as a modest positive as: (1) it is a smaller transaction that can help prove-up the U.S. expansion strategy; (2) the utility is fairly close geographically to Fortis' utilities in Eastern Canada; (3) Central Hudson is geographically close to other potential utility targets, particularly those owned by European companies; and (4) the transaction is expected to be immediately accretive to EPS.

Priced as of prior trading day's market close, EST (unless otherwise noted).

For Required Non-U.S. Analyst and Conflicts Disclosures, see page 3.

## Company Description

Fortis Inc. is a utility holding company for Newfoundland Power, FortisAlberta, FortisBC, Terasen Inc., Maritime Electric, Canadian Niagara Power, Cornwall Electric, BECOL, and two electric utilities in the Turks and Caicos. It also holds a 100% interest in Fortis Properties and a 59.5% interest in Caribbean Utilities.

## Required Disclosures

### Non-U.S. Analyst Disclosure

Kelsey Roste and Danny Hung (i) are not registered/qualified as research analysts with the NYSE and/or FINRA and (ii) may not be associated persons of the RBC Capital Markets, LLC and therefore may not be subject to FINRA Rule 2711 and NYSE Rule 472 restrictions on communications with a subject company, public appearances and trading securities held by a research analyst account.

### Conflicts Disclosures

The analyst(s) responsible for preparing this research report received compensation that is based upon various factors, including total revenues of the member companies of RBC Capital Markets and its affiliates, a portion of which are or have been generated by investment banking activities of the member companies of RBC Capital Markets and its affiliates.

A member company of RBC Capital Markets or one of its affiliates managed or co-managed a public offering of securities for Fortis Inc. in the past 12 months.

A member company of RBC Capital Markets or one of its affiliates received compensation for investment banking services from Fortis Inc. in the past 12 months.

Royal Bank of Canada, together with its affiliates, beneficially owns 1 percent or more of a class of common equity securities of Fortis Inc..

A member company of RBC Capital Markets or one of its affiliates received compensation for products or services other than investment banking services from Fortis Inc. during the past 12 months. During this time, a member company of RBC Capital Markets or one of its affiliates provided non-investment banking securities-related services to Fortis Inc..

A member company of RBC Capital Markets or one of its affiliates received compensation for products or services other than investment banking services from Fortis Inc. during the past 12 months. During this time, a member company of RBC Capital Markets or one of its affiliates provided non-securities services to Fortis Inc..

RBC Capital Markets is currently providing Fortis Inc. with non-securities services.

RBC Capital Markets has provided Fortis Inc. with investment banking services in the past 12 months.

RBC Capital Markets has provided Fortis Inc. with non-investment banking securities-related services in the past 12 months.

RBC Capital Markets has provided Fortis Inc. with non-securities services in the past 12 months.

The author is employed by RBC Dominion Securities Inc., a securities broker-dealer with principal offices located in Toronto, Canada.

## Explanation of RBC Capital Markets Equity Rating System

An analyst's 'sector' is the universe of companies for which the analyst provides research coverage. Accordingly, the rating assigned to a particular stock represents solely the analyst's view of how that stock will perform over the next 12 months relative to the analyst's sector average.

### Ratings

**Top Pick (TP):** Represents analyst's best idea in the sector; expected to provide significant absolute total return over 12 months with a favorable risk-reward ratio.

**Outperform (O):** Expected to materially outperform sector average over 12 months.

**Sector Perform (SP):** Returns expected to be in line with sector average over 12 months.

**Underperform (U):** Returns expected to be materially below sector average over 12 months.

### Risk Qualifiers (any of the following criteria may be present):

**Average Risk (Avg):** Volatility and risk expected to be comparable to sector; average revenue and earnings predictability; no significant cash flow/financing concerns over coming 12-24 months; fairly liquid.

**Above Average Risk (AA):** Volatility and risk expected to be above sector; below average revenue and earnings predictability; may not be suitable for a significant class of individual equity investors; may have negative cash flow; low market cap or float.

**Speculative (Spec):** Risk consistent with venture capital; low public float; potential balance sheet concerns; risk of being delisted.

## Distribution of Ratings

For the purpose of ratings distributions, regulatory rules require member firms to assign ratings to one of three rating categories - Buy, Hold/Neutral, or Sell - regardless of a firm's own rating categories. Although RBC Capital Markets' ratings of Top Pick/Outperform, Sector Perform and Underperform most closely correspond to Buy, Hold/Neutral and Sell, respectively, the meanings are not the same because our ratings are determined on a relative basis (as described above).

Distribution of Ratings RBC Capital Markets, Equity Research				
Rating	Count	Percent	Investment Banking Serv./Past 12 Mos.	
			Count	Percent
BUY[TP/O]	779	52.00	226	29.01
HOLD[SP]	649	43.30	147	22.65
SELL[U]	71	4.70	5	7.04

References to a Recommended List in the recommendation history chart may include one or more recommended lists or model portfolios maintained by a business unit of the Wealth Management Division of RBC Capital Markets, LLC. These Recommended Lists include a former list called the Prime Opportunity List (RL 3), a former list called the Private Client Prime Portfolio (RL 4), the Guided Portfolio: Prime Income (RL 6), the Guided Portfolio: Large Cap (RL 7), Guided Portfolio: Dividend Growth (RL 8), the Guided Portfolio: Midcap 111 (RL9), and the Guided Portfolio: ADR (RL 10). The abbreviation 'RL On' means the date a security was placed on a Recommended List. The abbreviation 'RL Off' means the date a security was removed from a Recommended List.

## Conflicts Policy

RBC Capital Markets Policy for Managing Conflicts of Interest in Relation to Investment Research is available from us on request. To access our current policy, clients should refer to

<https://www.rbcm.com/global/file-414164.pdf>

or send a request to RBC CM Research Publishing, P.O. Box 50, 200 Bay Street, Royal Bank Plaza, 29th Floor, South Tower, Toronto, Ontario M5J 2W7. We reserve the right to amend or supplement this policy at any time.

## Dissemination of Research and Short-Term Trade Ideas

RBC Capital Markets endeavors to make all reasonable efforts to provide research simultaneously to all eligible clients, having regard to local time zones in overseas jurisdictions. RBC Capital Markets' research is posted to our proprietary websites to ensure eligible clients receive coverage initiations and changes in ratings, targets and opinions in a timely manner. Additional distribution may be done by the sales personnel via email, fax or regular mail. Clients may also receive our research via third-party vendors. Please contact your investment advisor or institutional salesperson for more information regarding RBC Capital Markets' research. RBC Capital Markets also provides eligible clients with access to SPARC on its proprietary INSIGHT website. SPARC contains market color and commentary, and may also contain Short-Term Trade Ideas regarding the securities of subject companies discussed in this or other research reports. SPARC may be accessed via the following hyperlink: <https://www.rbcinsight.com>. A Short-Term Trade Idea reflects the research analyst's directional view regarding the price of the security of a subject company in the coming days or weeks, based on market and trading events. A Short-Term Trade Idea may differ from the price targets and/or recommendations in our published research reports reflecting the research analyst's views of the longer-term (one year) prospects of the subject company, as a result of the differing time horizons, methodologies and/or other factors. Thus, it is possible that the security of a subject company that is considered a long-term 'Sector Perform' or even an 'Underperform' might be a short-term buying opportunity as a result of temporary

selling pressure in the market; conversely, the security of a subject company that is rated a long-term 'Outperform' could be considered susceptible to a short-term downward price correction. Short-Term Trade Ideas are not ratings, nor are they part of any ratings system, and RBC Capital Markets generally does not intend, nor undertakes any obligation, to maintain or update Short-Term Trade Ideas. Short-Term Trade Ideas discussed in SPARC may not be suitable for all investors and have not been tailored to individual investor circumstances and objectives, and investors should make their own independent decisions regarding any Short-Term Trade Ideas discussed therein.

## Analyst Certification

All of the views expressed in this report accurately reflect the personal views of the responsible analyst(s) about any and all of the subject securities or issuers. No part of the compensation of the responsible analyst(s) named herein is, or will be, directly or indirectly, related to the specific recommendations or views expressed by the responsible analyst(s) in this report.

## COMPANY UPDATE | COMMENT

FEBRUARY 22, 2012

## Fortis Inc. (TSX: FTS) Fortis Loves New York

### Sector Perform Average Risk

Price:	32.38	Price Target:	34.00
Shares O/S (MM):	189.0	Implied All-In Return:	9%
Dividend:	1.20	Market Cap (MM):	6,120
Float (MM):	189.0	Yield:	3.7%
Debt to Cap:	55%		

### Event

Fortis agreed to acquire CH Energy, which owns a New York utility, for US\$1.5 billion (includes US\$500 million of debt).

### Investment Opinion

- **Strategic and Accretive.** Similar to the CVPS approach, we view the CH Energy transaction as a modest positive as: (1) it is a smaller transaction that can help prove-up the U.S. expansion strategy; (2) Central Hudson is in New York State, which is where other potential utility targets are (particularly those held by European companies); and (3) the transaction is expected to be immediately accretive to EPS, which should increase over time due to expected 6% to 7% annual rate base growth through 2016.
- **Should Be EPS Accretive Regardless of ROE Outcome.** Our analysis in Exhibit 1 (on page 2) indicates that the acquisition should be mildly accretive to EPS even if the allowed ROE declines toward 9% (from 10%) as part of the upcoming rate case. Central Hudson's rate decision in mid-2010 runs through mid-2013 and includes an ROE of 10%. However, a rate decision for Orange & Rockland in mid-2011 pegged the ROE at 9.2%.
- **Equity Could Be Issued in Mid/Late 2012.** Fortis has the ability to fund the transaction using its credit facilities. At a minimum, the company will probably wait until the outcome of the CH Energy shareholder vote (likely summer 2012) before moving forward on financing. We have assumed that \$500 million of common shares are issued in our analysis.
- **Feels Like Home: New York State Regulation a Lot Like Canada.** New York State regulation has many similarities to the low-risk, cost-of-service framework prevalent in Canada, including those for Fortis' existing utility assets. Specifically, fuel pass-through mechanisms, rate de-coupling (to protect against declines in customer usage), and the use of deferral accounts are part of Central Hudson's regulated framework.
- **Increasing 2013 Estimate.** Assuming the transaction closes in Q1/13, we have increased our 2013 EPS estimate to \$1.89 (from \$1.87). Our revised estimate assumes that the ROE in mid-2013 declines to 9.25% (from 10%), which is more in line with a recent ROE decision.
- **Valuation: No Change in Price Target.** Reflecting the modest expected accretion, we have left our \$34.00/share price target unchanged. If the ultimate ROE decision for Central Hudson is closer to 10%, we see roughly \$1/share of upside.

Priced as of prior trading day's market close, EST (unless otherwise noted).

For Required Non-U.S. Analyst and Conflicts Disclosures, see page 6.

## CH Energy Acquisition Slightly Accretive

Similar to the CVPS transaction, we view the CH Energy acquisition as a modest positive for the stock for the following reasons:

- (1) Relatively Small Size Allows Fortis to Test U.S. Waters.** Although the acquisition is larger than the CVPS proposed transaction, we believe that the CH Energy acquisition at roughly US\$1.5 billion enterprise value is a more manageable size than the US\$3 billion to US\$5 billion transaction range that Fortis has previously discussed. Since we believe that the market is cautious on the U.S. acquisition strategy, the CH Energy acquisition should allow the company to prove to the market that it can navigate U.S. state regulation.
- (2) Good Fit Geographically.** Central Hudson is in New York State, a state where there is the potential for future utility acquisitions (particularly from European owners). Furthermore, New York is relatively close geographically to Fortis' eastern Canadian utility assets.
- (3) Expected to Be Accretive to EPS Regardless of the ROE Scenario.** As shown in Exhibit 1, we expect the transaction to contribute \$0.02/share to \$0.04/share to annual EPS, depending on whether in the upcoming rate case the allowed ROE declines toward 9% (from 10%). We have set out a sensitivity analysis in Exhibit 2, which shows that under a range of ROEs and equity pricing, the transaction is expected to be accretive to EPS regardless of the assumption.

## Transaction Mechanics

- **Purchase Price.** Fortis entered into an agreement to acquire CH Energy Group (NYSE: CHG; US\$66.22; not rated) for US\$65.00 in cash. The total purchase price is an approximately 10.5% premium to the previous close.
- **Transaction Approvals and Timing.** The transaction requires shareholder approval (meeting in summer of 2012) and regulatory approvals including the New York Public Service Commission (NYPSC), the Federal Regulatory Energy Commission (FERC), and the expiration of the waiting period under the Hart-Scott-Rodino (HSR) Act. We do not expect FERC or HSR approval to be an issue. However, for the NYPSC, Fortis must demonstrate a net tangible benefit to rate payers, and although no specifics were given, it appears that Fortis may have some tools at its discretion to help deliver value to rate payers without a material change in earnings. Fortis expects to close the acquisition within 12 months.
- **Financing.** The company expects to use its credit facilities in the short term, although we believe permanent financing will come in the form of common equity, additional debt, and potentially preferred shares. In terms of the timing of common equity, it appears that Fortis will wait at least until shareholder approval before reviewing the timing of its equity requirements.

## Overview of CH Energy

- **Primarily Acquiring a Single-State, Regulated Electric and Gas Transmission & Distribution Business.** CH Energy's main business segment is Central Hudson Gas & Electric Corporation (Central Hudson), a regulated transmission and distribution utility in New York State (97% of net income) serving 300,000 electric and 75,000 natural gas customers. CH Energy also owns and operates a non-regulated fuel delivery business (Griffith Energy Services) with this business contributing only about 3% to annual earnings.
- **Fast-Growing Utility.** Fortis expects annual capital expenditures at Central Hudson to exceed US\$100 million on average through 2016. The increase in rate base should be about 6% to 7% per year, which will help drive attractive EPS growth.
- **Capital Structure and ROE.** Central Hudson's current rates were established using a 10% return on equity and a 48% equity thickness for three years beginning on July 1, 2010. We note that ROEs in New York have recently been pegged below 9.5%.

## Exhibit 3: Map of Business Operations

Source: Company reports; RBC Capital Markets

## 2013 EPS Estimate Increased

Assuming the transaction closes in Q1/13, we have increased our 2013 EPS estimate to \$1.89 (from \$1.87). Our revised estimate assumes that the ROE in mid-2013 declines to 9.25% (from 10%), which is more in line with a recent ROE decision in New York for Orange & Rockland, another utility in the state. Our revised estimates are set out in Exhibit 4.

## Valuation

Our price target of \$34.00 is based on a forward P/E of 18.0x 2013E EPS. Our selected P/E multiple is at the upper end of the five-year range, reflecting the low interest rate environment, good growth from the core Canadian regulated utilities, and the Waneta Dam expansion, which will not contribute to earnings until 2015.

## Price Target Impediment

The political environment in Belize, the risk of punitive regulatory decisions, economic/tourism conditions in its service territories, operational or financial issues at newly acquired businesses, and acquisitions or projects that fail to gain the confidence of investors may have implications for our price target.

## Company Description

Fortis Inc. is a utility holding company for Newfoundland Power, FortisAlberta, FortisBC, Terasen Inc., Maritime Electric, Canadian Niagara Power, Cornwall Electric, BECOL, and two electric utilities in the Turks and Caicos. It also holds a 100% interest in Fortis Properties and a 59.5% interest in Caribbean Utilities.

## Required Disclosures

### Non-U.S. Analyst Disclosure

Kelsey Roste and Danny Hung (i) are not registered/qualified as research analysts with the NYSE and/or FINRA and (ii) may not be associated persons of the RBC Capital Markets, LLC and therefore may not be subject to FINRA Rule 2711 and NYSE Rule 472 restrictions on communications with a subject company, public appearances and trading securities held by a research analyst account.

### Conflicts Disclosures

The analyst(s) responsible for preparing this research report received compensation that is based upon various factors, including total revenues of the member companies of RBC Capital Markets and its affiliates, a portion of which are or have been generated by investment banking activities of the member companies of RBC Capital Markets and its affiliates.

A member company of RBC Capital Markets or one of its affiliates managed or co-managed a public offering of securities for Fortis Inc. in the past 12 months.

A member company of RBC Capital Markets or one of its affiliates received compensation for investment banking services from Fortis Inc. in the past 12 months.

Royal Bank of Canada, together with its affiliates, beneficially owns 1 percent or more of a class of common equity securities of Fortis Inc..

A member company of RBC Capital Markets or one of its affiliates received compensation for products or services other than investment banking services from Fortis Inc. during the past 12 months. During this time, a member company of RBC Capital Markets or one of its affiliates provided non-investment banking securities-related services to Fortis Inc..

A member company of RBC Capital Markets or one of its affiliates received compensation for products or services other than investment banking services from Fortis Inc. during the past 12 months. During this time, a member company of RBC Capital Markets or one of its affiliates provided non-securities services to Fortis Inc..

RBC Capital Markets is currently providing Fortis Inc. with non-securities services.

RBC Capital Markets has provided Fortis Inc. with investment banking services in the past 12 months.

RBC Capital Markets has provided Fortis Inc. with non-investment banking securities-related services in the past 12 months.

RBC Capital Markets has provided Fortis Inc. with non-securities services in the past 12 months.

The author is employed by RBC Dominion Securities Inc., a securities broker-dealer with principal offices located in Toronto, Canada.

## Explanation of RBC Capital Markets Equity Rating System

An analyst's 'sector' is the universe of companies for which the analyst provides research coverage. Accordingly, the rating assigned to a particular stock represents solely the analyst's view of how that stock will perform over the next 12 months relative to the analyst's sector average.

### Ratings

**Top Pick (TP):** Represents analyst's best idea in the sector; expected to provide significant absolute total return over 12 months with a favorable risk-reward ratio.

**Outperform (O):** Expected to materially outperform sector average over 12 months.

**Sector Perform (SP):** Returns expected to be in line with sector average over 12 months.

**Underperform (U):** Returns expected to be materially below sector average over 12 months.

### Risk Qualifiers (any of the following criteria may be present):

**Average Risk (Avg):** Volatility and risk expected to be comparable to sector; average revenue and earnings predictability; no significant cash flow/financing concerns over coming 12-24 months; fairly liquid.

**Above Average Risk (AA):** Volatility and risk expected to be above sector; below average revenue and earnings predictability; may not be suitable for a significant class of individual equity investors; may have negative cash flow; low market cap or float.

**Speculative (Spec):** Risk consistent with venture capital; low public float; potential balance sheet concerns; risk of being delisted.

## Distribution of Ratings

For the purpose of ratings distributions, regulatory rules require member firms to assign ratings to one of three rating categories - Buy, Hold/Neutral, or Sell - regardless of a firm's own rating categories. Although RBC Capital Markets' ratings of Top Pick/Outperform, Sector Perform and Underperform most closely correspond to Buy, Hold/Neutral and Sell, respectively, the meanings are not the same because our ratings are determined on a relative basis (as described above).

Distribution of Ratings RBC Capital Markets, Equity Research				
Rating	Count	Percent	Investment Banking Serv./Past 12 Mos.	
			Count	Percent
BUY[TP/O]	780	52.10	227	29.10
HOLD[SP]	648	43.20	148	22.84
SELL[U]	71	4.70	5	7.04

References to a Recommended List in the recommendation history chart may include one or more recommended lists or model portfolios maintained by a business unit of the Wealth Management Division of RBC Capital Markets, LLC. These Recommended Lists include a former list called the Prime Opportunity List (RL 3), a former list called the Private Client Prime Portfolio (RL 4), the Guided Portfolio: Prime Income (RL 6), the Guided Portfolio: Large Cap (RL 7), Guided Portfolio: Dividend Growth (RL 8), the Guided Portfolio: Midcap 111 (RL9), and the Guided Portfolio: ADR (RL 10). The abbreviation 'RL On' means the date a security was placed on a Recommended List. The abbreviation 'RL Off' means the date a security was removed from a Recommended List.

## Conflicts Policy

RBC Capital Markets Policy for Managing Conflicts of Interest in Relation to Investment Research is available from us on request. To access our current policy, clients should refer to

<https://www.rbcm.com/global/file-414164.pdf>

or send a request to RBC CM Research Publishing, P.O. Box 50, 200 Bay Street, Royal Bank Plaza, 29th Floor, South Tower, Toronto, Ontario M5J 2W7. We reserve the right to amend or supplement this policy at any time.

## Dissemination of Research and Short-Term Trade Ideas

RBC Capital Markets endeavors to make all reasonable efforts to provide research simultaneously to all eligible clients, having regard to local time zones in overseas jurisdictions. RBC Capital Markets' research is posted to our proprietary websites to ensure eligible clients receive coverage initiations and changes in ratings, targets and opinions in a timely manner. Additional distribution may be done by the sales personnel via email, fax or regular mail. Clients may also receive our research via third-party vendors. Please contact your investment advisor or institutional salesperson for more information regarding RBC Capital Markets' research. RBC Capital Markets also provides eligible clients with access to SPARC on its proprietary INSIGHT website. SPARC contains market color and commentary, and may also contain Short-Term Trade Ideas regarding the securities of subject companies discussed in this or other research reports. SPARC may be accessed via the following hyperlink: <https://www.rbcinsight.com>. A Short-Term Trade Idea reflects the research analyst's directional view regarding the price of the security of a subject company in the coming days or weeks, based on market and trading events. A Short-Term Trade Idea may differ from the price targets and/or recommendations in our published research reports reflecting the research analyst's views of the longer-term (one year) prospects of the subject company, as a result of the differing time horizons, methodologies and/or other factors. Thus, it is possible that the security of a subject company that is considered a long-term 'Sector Perform' or even an 'Underperform' might be a short-term buying opportunity as a result of temporary

selling pressure in the market; conversely, the security of a subject company that is rated a long-term 'Outperform' could be considered susceptible to a short-term downward price correction. Short-Term Trade Ideas are not ratings, nor are they part of any ratings system, and RBC Capital Markets generally does not intend, nor undertakes any obligation, to maintain or update Short-Term Trade Ideas. Short-Term Trade Ideas discussed in SPARC may not be suitable for all investors and have not been tailored to individual investor circumstances and objectives, and investors should make their own independent decisions regarding any Short-Term Trade Ideas discussed therein.

## Analyst Certification

All of the views expressed in this report accurately reflect the personal views of the responsible analyst(s) about any and all of the subject securities or issuers. No part of the compensation of the responsible analyst(s) named herein is, or will be, directly or indirectly, related to the specific recommendations or views expressed by the responsible analyst(s) in this report.

## Disclaimer

## PRICE TARGET REVISION | COMMENT

MAY 3, 2012

## Fortis Inc. (TSX: FTS)

## Utilities Performing Well; Busy Year on the Regulatory Front

Sector Perform  
Average Risk

Price:	34.55	Price Target:	35.00 ↑ 34.00
Shares O/S (MM):	189.3	Implied All-In Return:	5%
Dividend:	1.20	Market Cap (MM):	6,540
Float (MM):	189.3	Yield:	3.5%
Debt to Cap:	56%		

## Event

Fortis reported Q1/12 results; increasing price target to \$35.00 (from \$34.00).

## Investment Opinion

- **Q1/12 Results Generally in Line with Expectations.** Q1/12 normalized EPS was \$0.66 compared to our estimate of \$0.65 and \$0.66 (restated) in Q1/11. All of the segments were roughly in line with our expectations. Non-Regulated Generation and FortisBC Energy were slightly ahead of expectations, whereas FortisAlberta and FortisBC Electric were slightly below expectations.
- **Various Regulatory Decisions Pending.** The generic cost of capital proceeding in B.C. to determine the cost of capital (effective January 1, 2013) and a PBR rate-regulation initiative in Alberta are in progress. Further, a cost of capital application was filed for Newfoundland Power in March 2012. We estimate that a 50 basis point change in allowed ROE in B.C. would impact EPS by roughly \$0.05/share, whereas a similar change in Newfoundland and Labrador would impact EPS by approximately \$0.01/share.
- **CH Energy Acquisition Continuing to Progress.** On April 20, 2012, Fortis filed for state regulatory approval and management expects the CH Energy shareholder transaction approval vote to be scheduled in mid to late June. Management is targeting to close the transaction during Q4/12 or Q1/13.
- **Equity Issuance Expected During H2/12.** Management indicated that the company's financing plan to issue approximately \$500 million in common equity has not materially changed. However, the equity issuance may be slightly higher, depending on discussions with the credit rating agencies, as management wants to maintain its A- credit rating. We believe that the company will not issue equity until it has greater visibility on shareholder and regulatory approval.
- **Valuation: Increasing Price Target to \$35.00 (from \$34.00).** Our new price target of \$35.00 is based on a forward P/E of 18.0x applied to the 2013E EPS plus a present value of approximately \$1.00/share for the Waneta Dam expansion that is expected to contribute to earnings in 2015. The P/E multiple is consistent with other Canadian utility valuations.

## Q1/12 Generally in Line with Expectations

Fortis' Q1/12 normalized EPS was \$0.66 compared to our estimate of \$0.65 and \$0.66 (restated) in Q1/11. All of the segments were roughly in line with our expectations. Non-Regulated Generation (good hydrology in Belize) and FortisBC Energy (quarterly timing of operating costs) were slightly ahead of expectations, whereas FortisAlberta (lower consumption) and FortisBC Electric (higher-than-expected operating expenses) were slightly below expectations.

A table showing the segment earnings compared to our estimates is set out in Exhibit 1.

### Exhibit 1: Normalized Earnings (In \$MM except per share figures)

	Q1/12	RBC CM Q1/12E	Q1/11 (Restated)	Comments
Newfoundland Power	\$7	\$7	\$6	
FortisOntario & Maritime Electric	7	7	6	
FortisBC Energy	82	79	75	Quarterly timing of operating costs
FortisAlberta	21	23	21	Lower-than-average consumption due to warm weather
FortisBC Electric	16	18	19	Higher operating expenses due to timing of expenditures

## Highlights of the Quarter and Outlook

- **Various Regulatory Decisions Received During the Quarter.** In April 2012, regulatory decisions were received for 2012/2013 customer gas delivery rates for FortisBC Energy and 2012 customer electricity distribution rates for FortisAlberta. A decision on the 2012/2013 customer electricity rates at FortisBC is expected in mid-2012.
- **Regulatory Processes Under Way for FortisBC, FortisAlberta and Newfoundland Power.** The generic cost of capital proceeding in British Columbia to determine the cost of capital as of January 1, 2013 (and an ROE automatic adjustment mechanism) is currently under way and a cost of capital application was filed by Newfoundland Power in March 2012. We estimate that a 50 basis point change in allowed ROE in B.C. would impact EPS by roughly \$0.05/share, whereas a similar change in Newfoundland and Labrador would impact EPS by approximately \$0.01/share. Lastly, the Alberta Utilities Commission is currently reviewing a PBR rate-regulation initiative.
- **Waneta Dam Expansion Continues to Progress.** Management indicated that the project is still on schedule and budget. Since construction started in late 2010, the company has invested approximately \$290 million into the \$900 million Waneta Expansion, a 335 MW hydro project in B.C. that is expected to be in service in the spring of 2015.
- **2012 Capex Plan Remains Unchanged.** Fortis' capital expenditure plan of \$1.3 billion for 2012 is unchanged from Q4/11 guidance. Fortis spent approximately \$229 million in capital expenditures during the quarter.

## CH Energy Transaction Is Moving Along As Expected

- **CH Energy Acquisition Expected to Close by Q1/13.** In April 2012, Fortis filed for New York state regulatory approval, which management is confident it will receive. The CH Energy shareholder vote is expected to be scheduled for mid to late June. Management's target is for the transaction to close in Q4/12, but depending on the timing of approvals, the transaction could close in Q1/13. We note that our 2013 EPS estimates include a full year contribution from CH Energy, but a delay to Q1/13 would not have a material impact on our estimates.
- **CH Energy Financing Plans Virtually Unchanged.** Management indicated that the company still intends to issue approximately \$500 million in common equity. However, management wants to ensure that the A- credit rating is maintained, and depending on discussions with the credit rating agencies, the equity issuance may be slightly higher.

## Overall Estimates Remain Unchanged

We have made minor changes within the segments to our 2012 forecast, and since Q1/12 was generally in line with our estimate, we have left our overall EPS estimates unchanged through 2013. A summary of our segment forecast is set out in Exhibit 2.

Exhibit 2: Financial Forecast (In \$MM except per share figures)

	Cdn. GAAP						2012E	2013E
	2010	2011	Q1/12	Q2/12E	Q3/12E	Q4/12E

## Increasing Price Target to \$35.00 (from \$34.00)

We have increased our price target to \$35.00 (from \$34.00) to reflect a forward P/E of 18.0x (previously 17.5x) applied to the 2013 EPS estimate plus a present value of approximately \$1.00/share for the Waneta Dam expansion (applying a 18.0x P/E to the estimated \$0.06/share of EPS accretion on a present value basis). The P/E multiple of 18.0x is consistent with other Canadian utility valuations.

## Valuation

Our price target of \$35.00 is based on a forward P/E of 18.0x applied to the 2013E EPS plus a present value of approximately \$1.00/share for the Waneta Dam expansion that is expected to contribute to earnings in 2015. The P/E multiple is consistent with other Canadian utility valuations.

## Price Target Impediment

The political environment in Belize, the risk of punitive regulatory decisions, economic/tourism conditions in its service territories, operational or financial issues at newly acquired businesses, and acquisitions or projects that fail to gain the confidence of investors may have implications for our price target.

## Company Description

Fortis Inc. is a utility holding company for Newfoundland Power, FortisAlberta, FortisBC, Terasen Inc., Maritime Electric, Canadian Niagara Power, Cornwall Electric, BECOL, and two electric utilities in the Turks and Caicos. It also holds a 100% interest in Fortis Properties and a 59.5% interest in Caribbean Utilities.

## Required Disclosures

### Non-U.S. Analyst Disclosure

Kelsey Roste and Danny Hung (i) are not registered/qualified as research analysts with the NYSE and/or FINRA and (ii) may not be associated persons of the RBC Capital Markets, LLC and therefore may not be subject to FINRA Rule 2711 and NYSE Rule 472 restrictions on communications with a subject company, public appearances and trading securities held by a research analyst account.

### Conflicts Disclosures

The analyst(s) responsible for preparing this research report received compensation that is based upon various factors, including total revenues of the member companies of RBC Capital Markets and its affiliates, a portion of which are or have been generated by investment banking activities of the member companies of RBC Capital Markets and its affiliates.

A member company of RBC Capital Markets or one of its affiliates managed or co-managed a public offering of securities for Fortis Inc. in the past 12 months.

A member company of RBC Capital Markets or one of its affiliates received compensation for investment banking services from Fortis Inc. in the past 12 months.

Royal Bank of Canada, together with its affiliates, beneficially owns 1 percent or more of a class of common equity securities of Fortis Inc..

A member company of RBC Capital Markets or one of its affiliates received compensation for products or services other than investment banking services from Fortis Inc. during the past 12 months. During this time, a member company of RBC Capital Markets or one of its affiliates provided non-investment banking securities-related services to Fortis Inc..

A member company of RBC Capital Markets or one of its affiliates received compensation for products or services other than investment banking services from Fortis Inc. during the past 12 months. During this time, a member company of RBC Capital Markets or one of its affiliates provided non-securities services to Fortis Inc..

RBC Capital Markets is currently providing Fortis Inc. with non-investment banking securities-related services.

RBC Capital Markets is currently providing Fortis Inc. with non-securities services.

RBC Capital Markets has provided Fortis Inc. with investment banking services in the past 12 months.

RBC Capital Markets has provided Fortis Inc. with non-investment banking securities-related services in the past 12 months.

RBC Capital Markets has provided Fortis Inc. with non-securities services in the past 12 months.

The author is employed by RBC Dominion Securities Inc., a securities broker-dealer with principal offices located in Toronto, Canada.

## Explanation of RBC Capital Markets Equity Rating System

An analyst's 'sector' is the universe of companies for which the analyst provides research coverage. Accordingly, the rating assigned to a particular stock represents solely the analyst's view of how that stock will perform over the next 12 months relative to the analyst's sector average.

### Ratings

**Top Pick (TP):** Represents analyst's best idea in the sector; expected to provide significant absolute total return over 12 months with a favorable risk-reward ratio.

**Outperform (O):** Expected to materially outperform sector average over 12 months.

**Sector Perform (SP):** Returns expected to be in line with sector average over 12 months.

**Underperform (U):** Returns expected to be materially below sector average over 12 months.

### Risk Qualifiers (any of the following criteria may be present):

**Average Risk (Avg):** Volatility and risk expected to be comparable to sector; average revenue and earnings predictability; no significant cash flow/financing concerns over coming 12-24 months; fairly liquid.

**Above Average Risk (AA):** Volatility and risk expected to be above sector; below average revenue and earnings predictability; may not be suitable for a significant class of individual equity investors; may have negative cash flow; low market cap or float.

**Speculative (Spec):** Risk consistent with venture capital; low public float; potential balance sheet concerns; risk of being delisted.

## Distribution of Ratings

For the purpose of ratings distributions, regulatory rules require member firms to assign ratings to one of three rating categories - Buy, Hold/Neutral, or Sell - regardless of a firm's own rating categories. Although RBC Capital Markets' ratings of Top Pick/Outperform,

Sector Perform and Underperform most closely correspond to Buy, Hold/Neutral and Sell, respectively, the meanings are not the same because our ratings are determined on a relative basis (as described above).

Distribution of Ratings RBC Capital Markets, Equity Research				
Rating	Count	Percent	Investment Banking Serv./Past 12 Mos.	
			Count	Percent
BUY[TP/O]	769	51.64	226	29.39
HOLD[SP]	653	43.85	154	23.58
SELL[U]	67	4.50	3	4.48

References to a Recommended List in the recommendation history chart may include one or more recommended lists or model portfolios maintained by a business unit of the Wealth Management Division of RBC Capital Markets, LLC. These Recommended Lists include a former list called the Prime Opportunity List (RL 3), the Guided Portfolio: Prime Income (RL 6), the Guided Portfolio: Large Cap (RL 7), Guided Portfolio: Dividend Growth (RL 8), the Guided Portfolio: Midcap 111 (RL9), and the Guided Portfolio: ADR (RL 10). The abbreviation 'RL On' means the date a security was placed on a Recommended List. The abbreviation 'RL Off' means the date a security was removed from a Recommended List.

## Conflicts Policy

RBC Capital Markets Policy for Managing Conflicts of Interest in Relation to Investment Research is available from us on request. To access our current policy, clients should refer to

<https://www.rbccm.com/global/file-414164.pdf>

or send a request to RBC CM Research Publishing, P.O. Box 50, 200 Bay Street, Royal Bank Plaza, 29th Floor, South Tower, Toronto, Ontario M5J 2W7. We reserve the right to amend or supplement this policy at any time.

## Dissemination of Research and Short-Term Trade Ideas

RBC Capital Markets endeavors to make all reasonable efforts to provide research simultaneously to all eligible clients, having regard to local time zones in overseas jurisdictions. RBC Capital Markets' research is posted to our proprietary websites to ensure eligible clients receive coverage initiations and changes in ratings, targets and opinions in a timely manner. Additional distribution may be done by the sales personnel via email, fax or regular mail. Clients may also receive our research via third-party vendors. Please contact your investment advisor or institutional salesperson for more information regarding RBC Capital Markets' research. RBC Capital Markets also provides eligible clients with access to SPARC on its proprietary INSIGHT website. SPARC contains market color and commentary, and may also contain Short-Term Trade Ideas regarding the securities of subject companies discussed in this or other research reports. SPARC may be accessed via the following hyperlink: <https://www.rbcinsight.com>. A Short-Term Trade Idea reflects the research analyst's directional view regarding the price of the security of a subject company in the coming days or weeks, based on

market and trading events. A Short-Term Trade Idea may differ from the price targets and/or recommendations in our published research reports reflecting the research analyst's views of the longer-term (one year) prospects of the subject company, as a result of the differing time horizons, methodologies and/or other factors. Thus, it is possible that the security of a subject company that is considered a long-term 'Sector Perform' or even an 'Underperform' might be a short-term buying opportunity as a result of temporary selling pressure in the market; conversely, the security of a subject company that is rated a long-term 'Outperform' could be considered susceptible to a short-term downward price correction. Short-Term Trade Ideas are not ratings, nor are they part of any ratings system, and RBC Capital Markets generally does not intend, nor undertakes any obligation, to maintain or update Short-Term Trade Ideas. Short-Term Trade Ideas discussed in SPARC may not be suitable for all investors and have not been tailored to individual investor circumstances and objectives, and investors should make their own independent decisions regarding any Short-Term Trade Ideas discussed therein.

## Analyst Certification

All of the views expressed in this report accurately reflect the personal views of the responsible analyst(s) about any and all of the subject securities or issuers. No part of the compensation of the responsible analyst(s) named herein is, or will be, directly or indirectly, related to the specific recommendations or views expressed by the responsible analyst(s) in this report.

## Disclaimer

RBC Capital Markets is the business name used by certain branches and subsidiaries of the Royal Bank of Canada, including RBC Dominion Securities Inc., RBC Capital Markets, LLC, RBC Europe Limited, RBC Capital Markets (Hong Kong) Limited, Royal Bank of Canada, Hong Kong Branch and Royal Bank of Canada, Sydney Branch. ## COMPANY UPDATE | COMMENT

JUNE 18, 2012

## Fortis Inc. (TSX: FTS)

### In a New York State of Mind

### Sector Perform

### Average Risk

Price:	32.50	Price Target:	35.00
Shares O/S (MM):	189.3	Implied All-In Return:	11%
Dividend:	1.20	Market Cap (MM):	6,152
Float (MM):	189.3	Yield:	3.7%
Debt to Cap:	56%		

### Event

We recently hosted investor meetings with Barry Perry, CFO of Fortis.

### Investment Opinion

- **Central Hudson is Both Strategic and Accretive.** We continue to view the transaction as strategic, while delivering modest EPS accretion (\$0.02/share). With a similar regulatory framework to Canada's low-risk provincial utility structures, Central Hudson is an attractive way for Fortis to enter the U.S. and demonstrate that its success with acquisitions in Canada can be applied to the U.S., particularly other utilities in New York that may come up for sale over the next several years.
- **A Big Week for the Central Hudson Transaction.** CH Energy's shareholders will vote on the takeover bid by Fortis on Tuesday, June 19. A nice positive last week was the support for the transaction from proxy firms ISS and Glass Lewis. A positive shareholder vote (50% plus one of all shareholders) will open the window for the roughly \$600 million of common equity financing. The major hurdle following the shareholder vote is New York State Public Service Commission approval, which continues to progress well. The company anticipates closing the transaction by the end of Q1/13.
- **Good Progress on the Waneta Dam Expansion.** The company is making good progress on the \$900 million Waneta Dam expansion project (51%-owned by Fortis) with both costs and timing slightly ahead of plan. The 335 MW hydro project is expected to be completed in the spring of 2015 and is underpinned by 40-year contracts.
- **An Attractive Total Return Story, Although We Would Wait for the Equity Issuance.** Based on expected regulated rate base growth along with the Waneta Dam expansion project, EPS growth should be in the mid-single digits and dividends are expected to grow at a similar rate with upside depending on acquisition activity. The expected total return profile is in the 10%-range (dividend yield 3.6%), which we see as attractive for yield-oriented investors seeking businesses with below average risk profiles. While we believe investors should look to accumulate shares on weakness, we would wait for the pending equity issuance to finance the CH Energy acquisition to build larger positions.
- **Valuation.** Our price target of \$35.00 is based on a forward P/E of 18x applied to the 2013E EPS plus a present value of approximately \$1.00/share for the Waneta Dam expansion.

Priced as of prior trading day's market close, EST (unless otherwise noted).

## CH Energy Acquisition is Both Strategic and Accretive

- **A Low-Risk Way to Enter the U.S.** After over five years of patiently pursuing a U.S. regulated utility acquisition, we see CH Energy, which owns Central Hudson (electric transmission and distribution in New York), as the most strategic target of the utilities that Fortis has been reported to have pursued. Specifically, we like the low-risk regulatory framework that matches up very well with Canadian provincial regulation, the relatively small size of the transaction, the ability to demonstrate a relationship with the New York State Public Service Commission (NYSPSC) ahead of potential follow-on deals in the state.
- **Similar Regulatory Framework to Canadian Provincial Regulation.** As shown in Exhibit 1, we have reproduced a slide from Fortis' presentation that shows how Central Hudson's regulatory framework compares to Canadian provincial regulation. Specifically, we note that Central Hudson's framework matches up with FortisBC Energy (formerly Terasen Gas) and has some risk-mitigation features that other utilities owned by Fortis do not have.

### Exhibit 1: Central Hudson's Regulatory Framework Matches Up Well With What Fortis' Investors Have Come to Expect

	FortisBC Energy	FortisBC Electric	Fortis Alberta	Nfld Power	Central Hudson	Comments/What This Means
Regulator	BCUC	BCUC	AUC	PUB	NYSPSC	
Cost of Service Regulation	✓	✓	✓	✓	✓	
Fwd Test Year/Neg. Rate Settlement	✓	✓	✓	✓	✓	Forecast (vs. historical) costs recovered in rates; low reg. lag
Energy Supply Cost Trackers	✓	Note 1 & 2	N/A; note 3	✓	✓	Changes in commodity costs do not impact earnings
Advance Approval for Capex	✓	✓	✓	✓	✓	Reduces risk of disallowances
Weather (Volume) Normalization	✓	Note 2	N/A; note 3	✓	✓	Warm/cold weather does not impact earnings

Equity Thickness (2012)	40%	40%	41%	45%	48%	
Allowed ROE (2012)	9.50%	9.90%	8.75%	8.80%	10.00%	Please see note (5)
Customers (000s)	939	162	501	248	375	As at March 31, 2012
Rate Base (\$ billion)	\$3.6	\$1.1	\$2.0	\$0.9	\$1.0	Mid-year 2012 forecast

#### Notes:

- (1) Majority of power requirements met through the utility's own generation and long-term fixed-price contracts.
- (2) FortisBC Electric has requested energy supply cost trackers for 2012 and 2013, subject to regulatory approval.
- (3) Distribution utility only. No commodity or purchased power exposure.
- (4) Primarily has a defined contribution pension plan.
- (5) ROE is for FortisBC Energy. The ROE for FortisBC Energy (Vancouver Island) and FortisBC Energy (Whistler) is 50 bps higher.

Source: Company reports; RBC Capital Markets

- **Forecast EPS Accretion Under a Range of Scenarios (Including a Lower Allowed ROE).** As shown in Exhibit 2 and Exhibit 3, our analysis indicates that the CH Energy acquisition should be modestly accretive to EPS under a range of scenarios including the cost of financing in addition to the potential for a lower allowed ROE. The most recent ROE decision from the NYSPSC was 9.5% (Orange and Rockland; June 2012).

Source: Company reports; RBC Capital Markets estimates

## Valuation

Our price target of \$35.00 is based on a forward P/E of 18.0x applied to the 2013E EPS plus a present value of approximately \$1.00/share for the Waneta Dam expansion that is expected to contribute to earnings in 2015. The P/E multiple is consistent with other Canadian utility valuations.

## Price Target Impediment

The political environment in Belize, the risk of punitive regulatory decisions, economic/tourism conditions in its service territories, operational or financial issues at newly acquired businesses, and acquisitions or projects that fail to gain the confidence of investors may have implications for our price target.

## Company Description

Fortis Inc. is a utility holding company for Newfoundland Power, FortisAlberta, FortisBC, Terasen Inc., Maritime Electric, Canadian Niagara Power, Cornwall Electric, BECOL, and two electric utilities in the Turks and Caicos. It also holds a 100% interest in Fortis Properties and a 59.5% interest in Caribbean Utilities.

## Required Disclosures

### Non-U.S. Analyst Disclosure

Kelsey Roste and Danny Hung (i) are not registered/qualified as research analysts with the NYSE and/or FINRA and (ii) may not be associated persons of the RBC Capital Markets, LLC and therefore may not be subject to FINRA Rule 2711 and NYSE Rule 472 restrictions on communications with a subject company, public appearances and trading securities held by a research analyst account.

### Conflicts Disclosures

The analyst(s) responsible for preparing this research report received compensation that is based upon various factors, including total revenues of the member companies of RBC Capital Markets and its affiliates, a portion of which are or have been generated by investment banking activities of the member companies of RBC Capital Markets and its affiliates.

A member company of RBC Capital Markets or one of its affiliates received compensation for investment banking services from Fortis Inc. in the past 12 months.

Royal Bank of Canada, together with its affiliates, beneficially owns 1 percent or more of a class of common equity securities of Fortis Inc..

A member company of RBC Capital Markets or one of its affiliates received compensation for products or services other than investment banking services from Fortis Inc. during the past 12 months. During this time, a member company of RBC Capital Markets or one of its affiliates provided non-investment banking securities-related services to Fortis Inc..

A member company of RBC Capital Markets or one of its affiliates received compensation for products or services other than investment banking services from Fortis Inc. during the past 12 months. During this time, a member company of RBC Capital Markets or one of its affiliates provided non-securities services to Fortis Inc..

RBC Capital Markets is currently providing Fortis Inc. with non-securities services.

RBC Capital Markets has provided Fortis Inc. with investment banking services in the past 12 months.

RBC Capital Markets has provided Fortis Inc. with non-investment banking securities-related services in the past 12 months.

RBC Capital Markets has provided Fortis Inc. with non-securities services in the past 12 months.

The author is employed by RBC Dominion Securities Inc., a securities broker-dealer with principal offices located in Toronto, Canada.

### Explanation of RBC Capital Markets Equity Rating System

An analyst's 'sector' is the universe of companies for which the analyst provides research coverage. Accordingly, the rating assigned to a particular stock represents solely the analyst's view of how that stock will perform over the next 12 months relative to the analyst's sector average.

#### Ratings

**Top Pick (TP):** Represents analyst's best idea in the sector; expected to provide significant absolute total return over 12 months with a favorable risk-reward ratio.

**Outperform (O):** Expected to materially outperform sector average over 12 months.

**Sector Perform (SP):** Returns expected to be in line with sector average over 12 months.

**Underperform (U):** Returns expected to be materially below sector average over 12 months.

#### Risk Qualifiers (any of the following criteria may be present):

**Average Risk (Avg):** Volatility and risk expected to be comparable to sector; average revenue and earnings predictability; no significant cash flow/financing concerns over coming 12-24 months; fairly liquid.

**Above Average Risk (AA):** Volatility and risk expected to be above sector; below average revenue and earnings predictability; may not be suitable for a significant class of individual equity investors; may have negative cash flow; low market cap or float.

**Speculative (Spec):** Risk consistent with venture capital; low public float; potential balance sheet concerns; risk of being delisted.

### Distribution of Ratings

For the purpose of ratings distributions, regulatory rules require member firms to assign ratings to one of three rating categories - Buy, Hold/Neutral, or Sell - regardless of a firm's own rating categories. Although RBC Capital Markets' ratings of Top Pick/Outperform, Sector Perform and Underperform most closely correspond to Buy, Hold/Neutral and Sell, respectively, the meanings are not the same because our ratings are determined on a relative basis (as described above).

Distribution of Ratings RBC Capital Markets, Equity Research				
Rating	Count	Percent	Investment Banking Serv./Past 12 Mos.	
			Count	Percent
BUY[TP/O]	782	52.23	230	29.41
HOLD[SP]	650	43.42	163	25.08
SELL[U]	65	4.34	2	3.08

References to a Recommended List in the recommendation history chart may include one or more recommended lists or model portfolios maintained by a business unit of the Wealth Management Division of RBC Capital Markets, LLC. These Recommended Lists include a former list called the Prime Opportunity List (RL 3), the Guided Portfolio: Prime Income (RL 6), the Guided Portfolio: Large Cap (RL 7), Guided Portfolio: Dividend Growth (RL 8), the Guided Portfolio: Midcap 111 (RL9), and the Guided Portfolio: ADR (RL 10). The abbreviation 'RL On' means the date a security was placed on a Recommended List. The abbreviation 'RL Off' means the date a security was removed from a Recommended List.

## Conflicts Policy

RBC Capital Markets Policy for Managing Conflicts of Interest in Relation to Investment Research is available from us on request. To access our current policy, clients should refer to <https://www.rbccm.com/global/file-414164.pdf>

or send a request to RBC CM Research Publishing, P.O. Box 50, 200 Bay Street, Royal Bank Plaza, 29th Floor, South Tower, Toronto, Ontario M5J 2W7. We reserve the right to amend or supplement this policy at any time.

## Dissemination of Research and Short-Term Trade Ideas

RBC Capital Markets endeavors to make all reasonable efforts to provide research simultaneously to all eligible clients, having regard to local time zones in overseas jurisdictions. RBC Capital Markets' research is posted to our proprietary websites to ensure eligible clients receive coverage initiations and changes in ratings, targets and opinions in a timely manner. Additional distribution may be done by the sales personnel via email, fax or regular mail. Clients may also receive our research via third-party vendors. Please contact your investment advisor or institutional salesperson for more information regarding RBC Capital Markets' research. RBC Capital Markets also provides eligible clients with access to SPARC on its proprietary INSIGHT website. SPARC contains market color and commentary, and may also contain Short-Term Trade Ideas regarding the securities of subject companies discussed in this or other research reports. SPARC may be accessed via the following hyperlink: <https://www.rbcinsight.com>. A Short-Term Trade Idea reflects the research analyst's directional view regarding the price of the security of a subject company in the coming days or weeks, based on market and trading events. A Short-Term Trade Idea may differ from the price targets and/or recommendations in our published research reports reflecting the research analyst's views of the longer-term (one year) prospects of the subject company, as a result of the differing time horizons, methodologies and/or other factors. Thus, it is possible that the security of a subject company that is considered a long-term 'Sector Perform' or even an 'Underperform' might be a short-term buying opportunity as a result of temporary

selling pressure in the market; conversely, the security of a subject company that is rated a long-term 'Outperform' could be considered susceptible to a short-term downward price correction. Short-Term Trade Ideas are not ratings, nor are they part of any ratings system, and RBC Capital Markets generally does not intend, nor undertakes any obligation, to maintain or update Short-Term Trade Ideas. Short-Term Trade Ideas discussed in SPARC may not be suitable for all investors and have not been tailored to individual investor circumstances and objectives, and investors should make their own independent decisions regarding any Short-Term Trade Ideas discussed therein.

## Analyst Certification

All of the views expressed in this report accurately reflect the personal views of the responsible analyst(s) about any and all of the subject securities or issuers. No part of the compensation of the responsible analyst(s) named herein is, or will be, directly or indirectly, related to the specific recommendations or views expressed by the responsible analyst(s) in this report.

## Disclaimer

RBC Capital Markets is the business name used by certain branches and subsidiaries of the Royal Bank of Canada, including RBC Dominion Securities Inc., RBC Capital Markets, LLC, RBC Europe Limited, RBC Capital Markets (Hong Kong) Limited, Royal Bank of Canada, Hong Kong Branch and Royal Bank of Canada, Sydney Branch. The information contained in this report has been compiled by RBC Capital Markets from sources believed to be reliable, but no representation or warranty, express or implied, is made by Royal Bank of Canada, RBC Capital Markets, its affiliates or any other person as to its accuracy, completeness or correctness. ## COMPANY UPDATE | COMMENT

AUGUST 1, 2012

**Fortis Inc. (TSX: FTS)****Making Good Progress on Rate Base Growth and Closing CH Energy Transaction****Sector Perform  
Average Risk**

Price:	33.54	Price Target:	35.00
Shares O/S (MM):	190.0	Implied All-In Return:	8%
Dividend:	1.20	Market Cap (MM):	6,373
Float (MM):	190.0	Yield:	3.6%
Debt to Cap:	56%		

**Event**

Fortis reported its Q2/12 results.

**Investment Opinion**

- **Q2/12 Results in Line with Expectations.** Fortis' Q2/12 normalized EPS was \$0.33 compared to our estimate of \$0.34 and \$0.32 (restated) in Q2/11. Most of the segments were roughly in line with our expectations. We note that normalized EPS has been adjusted for offsetting one-time items (about \$0.02/share of acquisition-related costs related to the CH Energy deal and about \$0.02/share of positive adjustments related to Q1/12 booked at FortisAlberta).
- **Waneta Dam Expansion Continues to Make Good Progress.** The company is making good progress on the \$900 million Waneta Dam expansion project (51%-owned by Fortis) with both costs and timing appearing to be slightly ahead of plan. The Waneta Expansion is a 335 MW hydro project in B.C. that is expected to be in service in the spring of 2015 and is underpinned by a 40-year contract with BC Hydro and FortisBC Electric.
- **CH Energy Shareholders Approved the Transaction.** In June 2012, the transaction received shareholder approval and regulatory approval from the Federal Energy Regulatory Commission and the Committee on Foreign Investment in the U.S. The New York State Public Service Commission is currently reviewing the application for approval of the transaction. The company expects to close the acquisition by the end of Q1/13 and we continue to view this transaction as strategic and modestly accretive to EPS in the first full year.
- **The B.C. Generic Cost of Capital Hearing the Last Major Decision on Allowed ROE.** Following decisions in Alberta and Newfoundland & Labrador, the remaining material ROE decision is in B.C. The oral hearings, if necessary, are not scheduled to begin until December 2012 and any changes to ROE will impact 2013 results. We estimate that a 50 basis point change in allowed ROE in B.C. would impact earnings by \$0.05/share.
- **Valuation.** Our price target of \$35.00 (unchanged) is based on a forward P/E of 18.0x applied to the 2013E EPS plus a present value of approximately \$1.00/share for the Waneta Dam expansion that is expected to contribute to earnings in 2015.

Priced as of prior trading day's market close, EST (unless otherwise noted).

For Required Non-U.S. Analyst and Conflicts Disclosures, see page 5.

## Q2/12 Generally in Line with Expectations

Fortis' Q2/12 normalized EPS was \$0.33 compared to our estimate of \$0.34 and \$0.32 (restated) in Q2/11. Most of the segments were roughly in line with our expectations. FortisAlberta (higher-than-average consumption) was ahead of expectations, whereas FortisBC Energy (quarterly timing of operating costs) was slightly below expectations. We note that normalized EPS has been adjusted for offsetting one-time items (about \$0.02/share of acquisition-related costs related to the CH Energy deal in the Corporate segment and about \$0.02/share of positive adjustments related to Q1/12 at FortisAlberta).

A table showing the segment earnings compared to our estimates is set out in Exhibit 1.

### Exhibit 1: Normalized Earnings (In \$MM except per share figures)

	Q2/12	RBC CM Q2/12E	Q2/11 (Restated)	Comments

Source: Company reports; RBC Capital Markets estimates

## Highlights of the Quarter and Outlook

- **Allowed ROE for Newfoundland Power Increases.** In June 2012, Newfoundland Power received regulatory approval of an increase in its allowed ROE to 8.80% for 2012, up from 8.38% for 2011. The company expects to file a general rate application during the quarter.
- **Regulatory Processes Under Way for FortisBC and FortisAlberta.** The generic cost of capital proceeding in British Columbia to determine the cost of capital as of January 1, 2013 (and an ROE automatic adjustment mechanism) and the Alberta Utilities Commission (PBR rate-regulation initiative) are currently under review. On the B.C. cost of capital proceeding, we estimate that a 50 basis point change in ROE in B.C. would impact Fortis' earnings by about \$0.05/share.
- **Equity Issuance to Fund CH Energy.** Fortis issued 18.5 million subscription receipts at \$32.50/share (gross proceeds of \$601 million) to finance a portion of the purchase price of CH Energy. The proceeds are being held in escrow pending the close of the transaction.
- **Waneta Dam Expansion Continues to Progress.** Management indicated that the project is still on schedule and budget. Since construction started in late 2010, the company has invested approximately \$345 million into the \$900 million Waneta Expansion, a 335 MW hydro project in B.C. that is expected to be in service in the spring of 2015.
- **2012 Capex Plan Remains Unchanged.** Fortis' capital expenditure plan of \$1.3 billion for 2012 is unchanged from Q1/12 guidance. Fortis spent approximately \$511 million in capital expenditures during the H1/12. The company continues to expect a

total of \$5.5 billion of capex as part of its five-year plan with CH Energy, adding \$0.5 billion to that plan following the close of the transaction.

### CH Energy Transaction Expected to Close in Q1/13

In June, 92% of the CH Energy's shareholders who voted on the transaction voted to approve Fortis' acquisition of 100% of CH Energy. Furthermore, the transaction received regulatory approval from the Federal Energy Regulatory Commission and the Committee on Foreign Investment in the U.S. in June. The New York State Public Service Commission (NYSPSC) is currently reviewing the application for approval of the transaction. Management expects the transaction to close by the end of Q1/13, depending on the timing of receiving approval from NYSPSC. We note that our 2013 EPS estimates include a full-year contribution from CH Energy, but a delay in closing to the end of Q1/13 would not have a material impact on our estimates.

### Overall Estimates Remain Unchanged

We have made minor changes within the segments to our 2012 forecast, and since Q2/12 was generally in line with our estimate, we remain comfortable with our overall EPS estimates and have left them unchanged. A summary of our segment forecast is set out in Exhibit 2.

Exhibit 2: Financial Forecast (In \$MM except per share figures)

Source: Company reports; RBC Capital Markets estimates

## Valuation

Our price target of \$35.00 is based on a forward P/E of 18.0x applied to the 2013E EPS plus a present value of approximately \$1.00/share for the Waneta Dam expansion that is expected to contribute to earnings in 2015. The P/E multiple is consistent with other Canadian utility valuations.

## Price Target Impediment

The political environment in Belize, the risk of punitive regulatory decisions, economic/tourism conditions in its service territories, operational or financial issues at newly acquired businesses, and acquisitions or projects that fail to gain the confidence of investors may have implications for our price target.

## Company Description

Fortis Inc. is a utility holding company for Newfoundland Power, FortisAlberta, FortisBC, Terasen Inc., Maritime Electric, Canadian Niagara Power, Cornwall Electric, BECOL, and two electric utilities in the Turks and Caicos. It also holds a 100% interest in Fortis Properties and a 59.5% interest in Caribbean Utilities.

## Required Disclosures

### Non-U.S. Analyst Disclosure

Kelsey Roste and Danny Hung (i) are not registered/qualified as research analysts with the NYSE and/or FINRA and (ii) may not be associated persons of the RBC Capital Markets, LLC and therefore may not be subject to FINRA Rule 2711 and NYSE Rule 472 restrictions on communications with a subject company, public appearances and trading securities held by a research analyst account.

### Conflicts Disclosures

The analyst(s) responsible for preparing this research report received compensation that is based upon various factors, including total revenues of the member companies of RBC Capital Markets and its affiliates, a portion of which are or have been generated by investment banking activities of the member companies of RBC Capital Markets and its affiliates.

A member company of RBC Capital Markets or one of its affiliates managed or co-managed a public offering of securities for Fortis Inc. in the past 12 months.

A member company of RBC Capital Markets or one of its affiliates received compensation for investment banking services from Fortis Inc. in the past 12 months.

A member company of RBC Capital Markets or one of its affiliates expects to receive or intends to seek compensation for investment banking services from Fortis Inc. in the next three months.

Royal Bank of Canada, together with its affiliates, beneficially owns 1 percent or more of a class of common equity securities of Fortis Inc..

A member company of RBC Capital Markets or one of its affiliates received compensation for products or services other than investment banking services from Fortis Inc. during the past 12 months. During this time, a member company of RBC Capital Markets or one of its affiliates provided non-investment banking securities-related services to Fortis Inc..

A member company of RBC Capital Markets or one of its affiliates received compensation for products or services other than investment banking services from Fortis Inc. during the past 12 months. RBC Capital Markets has provided Fortis Inc. with non-securities services in the past 12 months.

The author is employed by RBC Dominion Securities Inc., a securities broker-dealer with principal offices located in Toronto, Canada.

### Explanation of RBC Capital Markets Equity Rating System

An analyst's 'sector' is the universe of companies for which the analyst provides research coverage. Accordingly, the rating assigned to a particular stock represents solely the analyst's view of how that stock will perform over the next 12 months relative to the analyst's sector average.

#### Ratings

**Top Pick (TP):** Represents analyst's best idea in the sector; expected to provide significant absolute total return over 12 months with a favorable risk-reward ratio.

**Outperform (O):** Expected to materially outperform sector average over 12 months.

**Sector Perform (SP):** Returns expected to be in line with sector average over 12 months.

**Underperform (U):** Returns expected to be materially below sector average over 12 months.

#### Risk Qualifiers (any of the following criteria may be present):

**Average Risk (Avg):** Volatility and risk expected to be comparable to sector; average revenue and earnings predictability; no significant cash flow/financing concerns over coming 12-24 months; fairly liquid.

**Above Average Risk (AA):** Volatility and risk expected to be above sector; below average revenue and earnings predictability; may not be suitable for a significant class of individual equity investors; may have negative cash flow; low market cap or float.

**Speculative (Spec):** Risk consistent with venture capital; low public float; potential balance sheet concerns; risk of being delisted.

## Distribution of Ratings

For the purpose of ratings distributions, regulatory rules require member firms to assign ratings to one of three rating categories - Buy, Hold/Neutral, or Sell - regardless of a firm's own rating categories. Although RBC Capital Markets' ratings of Top Pick/Outperform, Sector Perform and Underperform most closely correspond to Buy, Hold/Neutral and Sell, respectively, the meanings are not the same because our ratings are determined on a relative basis (as described above).

Distribution of Ratings RBC Capital Markets, Equity Research

References to a Recommended List in the recommendation history chart may include one or more recommended lists or model portfolios maintained by a business unit of the Wealth Management Division of RBC Capital Markets, LLC. These Recommended Lists include a former list called the Prime Opportunity List (RL 3), the Guided Portfolio: Prime Income (RL 6), the Guided Portfolio: Large Cap (RL 7), Guided Portfolio: Dividend Growth (RL 8), the Guided Portfolio: Midcap 111 (RL9), and the Guided Portfolio: ADR (RL 10). The abbreviation 'RL On' means the date a security was placed on a Recommended List. The abbreviation 'RL Off' means the date a security was removed from a Recommended List.

## Conflicts Policy

RBC Capital Markets Policy for Managing Conflicts of Interest in Relation to Investment Research is available from us on request. To access our current policy, clients should refer to

<https://www.rbccm.com/global/file-414164.pdf>

or send a request to RBC CM Research Publishing, P.O. Box 50, 200 Bay Street, Royal Bank Plaza, 29th Floor, South Tower, Toronto, Ontario M5J 2W7. We reserve the right to amend or supplement this policy at any time.

## Dissemination of Research and Short-Term Trade Ideas

RBC Capital Markets endeavors to make all reasonable efforts to provide research simultaneously to all eligible clients, having regard to local time zones in overseas jurisdictions. RBC Capital Markets' research is posted to our proprietary websites to ensure eligible clients receive coverage initiations and changes in ratings, targets and opinions in a timely manner. Additional distribution may be done by the sales personnel via email, fax or regular mail. Clients may also receive our research via third-party vendors. Please contact your investment advisor or institutional salesperson for more information regarding RBC Capital Markets' research. RBC Capital Markets also provides eligible clients with access to SPARC on its proprietary INSIGHT website. SPARC contains market color and

commentary, and may also contain Short-Term Trade Ideas regarding the securities of subject companies discussed in this or other research reports. SPARC may be accessed via the following hyperlink: <https://www.rbcinsight.com>. A Short-Term Trade Idea reflects the research analyst's directional view regarding the price of the security of a subject company in the coming days or weeks, based on market and trading events. A Short-Term Trade Idea may differ from the price targets and/or recommendations in our published research reports reflecting the research analyst's views of the longer-term (one year) prospects of the subject company, as a result of the differing time horizons, methodologies and/or other factors. Thus, it is possible that the security of a subject company that is considered a long-term 'Sector Perform' or even an 'Underperform' might be a short-term buying opportunity as a result of temporary selling pressure in the market; conversely, the security of a subject company that is rated a long-term 'Outperform' could be considered susceptible to a short-term downward price correction. Short-Term Trade Ideas are not ratings, nor are they part of any ratings system, and RBC Capital Markets generally does not intend, nor undertakes any obligation, to maintain or update Short-Term Trade Ideas. Short-Term Trade Ideas discussed in SPARC may not be suitable for all investors and have not been tailored to individual investor circumstances and objectives, and investors should make their own independent decisions regarding any Short-Term Trade Ideas discussed therein.

## COMPANY UPDATE | COMMENT

NOVEMBER 2, 2012

## Fortis Inc. (TSX: FTS)

### A Busy Regulatory Calendar Ahead

#### Sector Perform

#### Average Risk

Price:	33.90	Price Target:	36.00
Shares O/S (MM):	190.7	Implied All-In Return:	10%
Dividend:	1.20	Market Cap (MM):	6,465
Float (MM):	190.7	Yield:	3.5%
Debt to Cap:	57%		

#### Event

Fortis reported Q3/12 results.

#### Investment Opinion

- Q3/12 Results Slightly Below Expectations.** Fortis' normalized Q3/12 EPS was \$0.24 compared to our estimate of \$0.26 and \$0.24 in Q3/11. Good results from FortisAlberta were more than offset by higher Corporate costs and lower-than-forecast results from FortisBC Energy.
- A Busy Regulatory Calendar Ahead.** The company faces the following major regulatory proceedings: (1) ROE reviews in B.C., Alberta and Newfoundland; (2) approval of the CH Energy transaction; and (3) a pending review and variance application and court appeal of the Alberta Utilities Commission's Performance-Based Regulation decision.
- Working to Close the CH Energy Acquisition.** Recently, Fortis received U.S. anti-trust clearance and the only major hurdle remains the approval by the New York State Public Service Commission. Fortis continues to work with commission staff with the expectation that the transaction will close by the end of Q1/13.
- Modest Reduction to Estimates.** We have reduced our 2012 EPS estimate to \$1.74 (from \$1.76) to reflect Q3/12 results and anticipated higher corporate costs in Q4/12. We have lowered our 2013 and 2014 EPS estimates to \$1.87 and \$1.98, respectively (down from \$1.89 and \$2.00, respectively) to primarily reflect higher anticipated corporate cost.
- Small Acquisitions Announced.** In August, Fortis acquired another utility in Turks & Caicos for \$13 million and in October, the company acquired a hotel in London, Ontario for \$13 million. Further, the company is working towards closing the acquisition of the City of Kelowna's electric utility assets for \$55 million.
- Valuation.** Our price target of \$36.00 is based on a forward P/E of 18.5x applied to the forward EPS, which includes approximately \$1.00/share of value for the Waneta Dam expansion that is expected to contribute to earnings in 2015. The P/E multiple is consistent with other Canadian utility valuations.

## Q3/12 Slightly Short of Expectations

Fortis' Q3/12 normalized EPS was \$0.24 compared to our estimate of \$0.26 and \$0.24 (restated) in Q3/11. Good results from FortisAlberta (higher-than-expected transmission revenue) were more than offset by FortisBC Energy (mostly timing differences for revenues and costs) and higher-than-forecast Corporate costs.

A table showing the segment earnings compared to our estimates is set out in Exhibit 1.

### Exhibit 1: Normalized Earnings (In \$MM except per share figures)

	Q3/12	RBC CM Q3/12E	Q3/11 (Restated)	Comments
Newfoundland Power	\$7	\$9	\$8

	(1)		11	
<b>Reported Earnings</b>	<b>\$45</b>		<b>\$56</b>	

Source: Company reports; RBC Capital Markets estimates

## Highlights of the Quarter and Outlook

- Alberta PBR Framework Announced.** During the quarter, the Alberta Utilities Commission issued a generic decision for the Performance-Based Regulation (PBR) framework. FortisAlberta will file a required PBR-compliance application in November 2012. The generic cost of capital proceeding is expected to commence late 2012 or early 2013.
- Regulatory Processes to Review ROEs are Underway For Newfoundland Power and FortisBC.** In September, Fortis filed Newfoundland Power's general rate application for 2013 customer rates and cost of capital. The generic cost of capital proceeding in B.C. is scheduled to begin in December 2012. On the B.C. cost of capital proceeding, we note that a 50 basis point change in ROE in B.C. would impact Fortis' earnings by about \$0.05/share.
- Small Acquisitions.** In August, Fortis Turks and Caicos acquired Turks and Caicos Utilities Ltd., a regulated utility with a 50-year license expiring in 2036. The utility serves more than 2,000 residential and commercial customers and was acquired for approximately \$13 million. In October, the company acquired the 126-room StationPark hotel in London, Ontario for \$13 million. Last, FortisBC Electric has offered to purchase the City of Kelowna's electrical utility assets, which serve roughly 15,000 customers, for approximately \$55 million. The purchase is subject to regulatory approval and is expected to close in Q1/13.
- One More Approval Required For CH Energy.** Fortis has received the majority of the required approvals, and is now waiting for the New York State Public Service Commission (NYSPSC) to approve the transaction. The NYSPSC is currently reviewing the application for approval of the transaction. Management expects the transaction to close by the end of Q1/13.
- Waneta Dam Expansion Continues to Progress.** Management indicated that the project is still on schedule and based on our discussions, we see the potential for the project to come in under budget. Since construction started in late 2010, the company has invested approximately \$380 million into the \$900 million Waneta Expansion, a 335 MW hydro project in B.C. that is expected to be in service in the spring of 2015.

## Modest Reduction to Estimates

We have reduced our 2012 EPS estimate to \$1.74 (from \$1.76) to reflect Q3/12 results and anticipated higher corporate costs in Q4/12. We have lowered our 2013 and 2014 EPS estimates to \$1.87 and \$1.98, respectively (down from \$1.89 and \$2.00, respectively) to primarily reflect higher anticipated corporate costs. Of note, we have pushed back the expected close of the CH Energy transaction to the end of Q1/13, although we see that change as largely being offset by a reduction in the forecast shares outstanding (i.e., subscription receipts will not convert until the close of the transaction).

A summary of our segment forecast is set out in Exhibit 2.

**Exhibit 2: Financial Forecast (In \$MM except per share figures)**

Source: Company reports; RBC Capital Markets estimates

## Valuation

Our price target of \$36.00 is based on a forward P/E of 18.5x applied to the forward EPS, which includes approximately \$1.00/share of value for the Waneta Dam expansion that is expected to contribute to earnings in 2015. The P/E multiple is consistent with other Canadian utility valuations.

## Price Target Impediment

The political environment in Belize, the risk of punitive regulatory decisions, economic/tourism conditions in its service territories, operational or financial issues at newly acquired businesses, and acquisitions or projects that fail to gain the confidence of investors may have implications for our price target.

## Company Description

Fortis Inc. is a utility holding company for Newfoundland Power, FortisAlberta, FortisBC, Terasen Inc., Maritime Electric, Canadian Niagara Power, Cornwall Electric, BECOL, and two electric utilities in the Turks and Caicos. It also holds a 100% interest in Fortis Properties and a 59.5% interest in Caribbean Utilities.

## Required Disclosures

### Non-U.S. Analyst Disclosure

Kelsey Roste and Danny Hung (i) are not registered/qualified as research analysts with the NYSE and/or FINRA and (ii) may not be associated persons of the RBC Capital Markets, LLC and therefore may not be subject to FINRA Rule 2711 and NYSE Rule 472 restrictions on communications with a subject company, public appearances and trading securities held by a research analyst account.

### Conflicts Disclosures

The analyst(s) responsible for preparing this research report received compensation that is based upon various factors, including total revenues of the member companies of RBC Capital Markets and its affiliates, a portion of which are or have been generated by investment banking activities of the member companies of RBC Capital Markets and its affiliates.

A member company of RBC Capital Markets or one of its affiliates managed or co-managed a public offering of securities for Fortis Inc. in the past 12 months.

A member company of RBC Capital Markets or one of its affiliates received compensation for investment banking services from Fortis Inc. in the past 12 months.

A member company of RBC Capital Markets or one of its affiliates expects to receive or intends to seek compensation for investment banking services from Fortis Inc. in the next three months.

Royal Bank of Canada, together with its affiliates, beneficially owns 1 percent or more of a class of common equity securities of Fortis Inc..

A member company of RBC Capital Markets or one of its affiliates received compensation for products or services other than investment banking services from Fortis Inc. during the past 12 months. During this time, a member company of RBC Capital Markets or one of its affiliates provided non-investment banking securities-related services to Fortis Inc..

A member company of RBC Capital Markets or one of its affiliates received compensation for products or services other than investment banking services from Fortis Inc. during the past 12 months. During this time, a member company of RBC Capital Markets or one of its affiliates provided non-securities services to Fortis Inc..

RBC Capital Markets is currently providing Fortis Inc. with non-investment banking securities-related services.

RBC Capital Markets is currently providing Fortis Inc. with non-securities services.

RBC Capital Markets has provided Fortis Inc. with investment banking services in the past 12 months.

RBC Capital Markets has provided Fortis Inc. with non-investment banking securities-related services in the past 12 months.

RBC Capital Markets has provided Fortis Inc. with non-securities services in the past 12 months.

The author is employed by RBC Dominion Securities Inc., a securities broker-dealer with principal offices located in Toronto, Canada.

## Explanation of RBC Capital Markets Equity Rating System

An analyst's 'sector' is the universe of companies for which the analyst provides research coverage. Accordingly, the rating assigned to a particular stock represents solely the analyst's view of how that stock will perform over the next 12 months relative to the analyst's sector average.

### Ratings

**Top Pick (TP):** Represents analyst's best idea in the sector; expected to provide significant absolute total return over 12 months with a favorable risk-reward ratio.

**Outperform (O):** Expected to materially outperform sector average over 12 months.

**Sector Perform (SP):** Returns expected to be in line with sector average over 12 months.

**Underperform (U):** Returns expected to be materially below sector average over 12 months.

### Risk Qualifiers (any of the following criteria may be present):

**Average Risk (Avg):** Volatility and risk expected to be comparable to sector; average revenue and earnings predictability; no significant cash flow/financing concerns over coming 12-24 months; fairly liquid.

**Above Average Risk (AA):** Volatility and risk expected to be above sector; below average revenue and earnings predictability; may not be suitable for a significant class of individual equity investors; may have negative cash flow; low market cap or float.

**Speculative (Spec):** Risk consistent with venture capital; low public float; potential balance sheet concerns; risk of being delisted.

## Distribution of Ratings

For the purpose of ratings distributions, regulatory rules require member firms to assign ratings to one of three rating categories - Buy, Hold/Neutral, or Sell - regardless of a firm's own rating categories. Although RBC Capital Markets' ratings of Top Pick/Outperform, Sector Perform and Underperform most closely correspond to Buy, Hold/Neutral and Sell, respectively, the meanings are not the same because our ratings are determined on a relative basis (as described above).

Distribution of Ratings RBC Capital Markets, Equity Research				
Rating	Count	Percent	Investment Banking Serv./Past 12 Mos.	
			Count	Percent
BUY[TP/O]	770	49.94	250	32.47
HOLD[SP]	693	44.94	175	25.25
SELL[U]	79	5.12	8	10.13

References to a Recommended List in the recommendation history chart may include one or more recommended lists or model portfolios maintained by a business unit of the Wealth Management Division of RBC Capital Markets, LLC. These Recommended Lists include a former list called the Prime Opportunity List (RL 3), the Guided Portfolio: Prime Income (RL 6), the Guided Portfolio: Large Cap (RL 7), Guided Portfolio: Dividend Growth (RL 8), the Guided Portfolio: Midcap 111 (RL9), and the Guided Portfolio: ADR (RL 10). The abbreviation 'RL On' means the date a security was placed on a Recommended List. The abbreviation 'RL Off' means the date a security was removed from a Recommended List.

or send a request to RBC CM Research Publishing, P.O. Box 50, 200 Bay Street, Royal Bank Plaza, 29th Floor, South Tower, Toronto, Ontario M5J 2W7. We reserve the right to amend or supplement this policy at any time.

## Dissemination of Research and Short-Term Trade Ideas

RBC Capital Markets endeavors to make all reasonable efforts to provide research simultaneously to all eligible clients, having regard to local time zones in overseas jurisdictions. RBC Capital Markets' research is posted to our proprietary websites to ensure eligible clients receive coverage initiations and changes in ratings, targets and opinions in a timely manner. Additional distribution may be done by the sales personnel via email, fax or regular mail. Clients may also receive our research via third-party vendors. Please contact

your investment advisor or institutional salesperson for more information regarding RBC Capital Markets' research. RBC Capital Markets also provides eligible clients with access to SPARC on its proprietary INSIGHT website. SPARC contains market color and commentary, and may also contain Short-Term Trade Ideas regarding the securities of subject companies discussed in this or other research reports. SPARC may be accessed via the following hyperlink: <https://www.rbcinsight.com>. A Short-Term Trade Idea reflects the research analyst's directional view regarding the price of the security of a subject company in the coming days or weeks, based on market and trading events. A Short-Term Trade Idea may differ from the price targets and/or recommendations in our published research reports reflecting the research analyst's views of the longer-term (one year) prospects of the subject company, as a result of the differing time horizons, methodologies and/or other factors. Thus, it is possible that the security of a subject company that is considered a long-term 'Sector Perform' or even an 'Underperform' might be a short-term buying opportunity as a result of temporary selling pressure in the market; conversely, the security of a subject company that is rated a long-term 'Outperform' could be considered susceptible to a short-term downward price correction. Short-Term Trade Ideas are not ratings, nor are they part of any ratings system, and RBC Capital Markets generally does not intend, nor undertakes any obligation, to maintain or update Short-Term Trade Ideas. Short-Term Trade Ideas discussed in SPARC may not be suitable for all investors and have not been tailored to individual investor circumstances and objectives, and investors should make their own independent decisions regarding any Short-Term Trade Ideas discussed therein.

## PRICE TARGET REVISION | COMMENT

FEBRUARY 8, 2013

## Fortis Inc. (TSX: FTS)

### Heading into a Noisy Regulatory Calendar

### Sector Perform

### Average Risk

Price:	34.24	Price Target:	35.00 ↓ 36.00
Shares O/S (MM):	191.6	Implied All-In Return:	6%
Dividend:	1.24	Market Cap (MM):	6,560
Float (MM):	191.6	Yield:	3.6%
Debt to Cap:	55%		

### Event

Fortis reported Q4/12 results; reducing price target to \$35.00 (from \$36.00).

### Investment Opinion

- Q4/12 Results Below Expectations.** Q4/12 normalized EPS was \$0.47 compared to our estimate of \$0.52 and \$0.44 a year ago. The vast majority of the variance was from the unregulated segments. Overall, Canadian regulated utilities were in line with expectations.
- Noisy Regulatory Calendar.** Fortis has a number of regulatory processes ongoing, which could have a fairly material impact on earnings. The processes include the ROE proceeding in B.C. (decision expected in May/June), the ROE proceeding in Alberta (decision expected mid-year), and various issues related to the implementation of performance-based rates (PBR) in Alberta (decisions throughout the year).
- CH Energy Acquisition on Track to Close in April or May.** Following the broad-based settlement agreement, Fortis is poised to close the acquisition of CH Energy in either late April or late May following the hearing in front of the commissioners of the New York State Public Service Commission.
- Reducing EPS Estimates.** Our new 2013 and 2014 EPS estimates are \$1.81 and \$1.92, respectively (down from \$1.87 and \$1.98), with the reductions primarily driven by lower forecasts across a number of the businesses including FortisBC Energy (reflecting the 2012 baseline) along with economic headwinds in the Caribbean and for the Properties segments. Of note, our estimates do not include any downside as part of the ongoing ROE reviews. We note that a 50 basis point decrease in the ROE in B.C. would translate to a roughly \$0.05/share decline in our EPS estimate.
- Maintaining Our Neutral View for the Stock.** With 2013 likely proving to be "noisy" due to the numerous regulatory decisions, we reiterate our neutral view for the stock, particularly against the backdrop of our overall view that investors should tilt away from the ultra-defensive regulated utility names (please [click here](#) for our sector note discussing this).
- Valuation: Reducing Price Target to \$35.00 (from \$36.00) to Reflect Lower EPS Outlook.** We continue to use an 18.5x forward P/E plus an additional \$1/share reflecting value for the Waneta Dam expansion that is expected to contribute to earnings in 2015. The P/E multiple is a slight discount to the peers, reflecting the risk with respect to a lower ROE in B.C.

Priced as of prior trading day's market close, EST (unless otherwise noted).

## Target/Upside/Downside Scenarios

Exhibit 1: Fortis Scenario Analysis

Source: RBC Capital Markets

### Price Target / Base Case: \$35.00

Our \$35.00 price target is based on a forward P/E of 18.5x applied to the forward EPS, which includes approximately \$1.00/share of value for the Waneta Dam expansion that is expected to contribute to earnings in 2015. The P/E multiple is at a slight discount to its peers, reflecting the risk with respect to a lower ROE in B.C.

### Upside Scenario: \$39.00

For our upside analysis, we assume that P/E valuations fully reflect the level of long-term interest rates, which we see as providing roughly 2x upside in the P/E multiple. Further, our upside case assumes that ROEs in B.C. remain unchanged as part of the upcoming regulatory decision for the generic cost of capital proceeding.

### Downside Scenario: \$31.00

For our downside analysis, we assumed a 100 basis point increase in interest rates, which we believe could translate into an almost 2x downside in the P/E multiple. Further, our downside scenario reflects a 100 basis point decrease in allowed ROE in B.C. (i.e., an incremental 50 basis points over and above what we have factored into our base case valuation), resulting in a low-risk benchmark ROE of 8.5%.

## Q4/12 Results Below Expectations Mostly Due to Unregulated Segments

<b>Reported Earnings</b>	<b>\$87</b>	<b>\$100</b>	<b>\$82</b>	<b>\$315</b>	<b>\$311</b>	

Source: Company reports; RBC Capital Markets estimates

Fortis' Q4/12 normalized EPS was \$0.47 compared to our estimate of \$0.52 and \$0.44 in Q4/11. The vast majority of the variance was from the unregulated segments. Overall, Canadian regulated utilities were in line with expectations, with lower-than-forecast results from FortisBC Energy (formerly Terasen), partially offset by strong results from FortisAlberta.

## Highlights of the Quarter and Outlook

- **B.C. Generic Cost of Capital Decision Expected in April or May.** The generic cost of capital hearing to determine the low-risk benchmark ROE in the province is in the final stages and is expected to wrap up in the coming weeks. A decision from the B.C. Utilities Commission (BCUC) is expected in April or May of this year. In terms of sensitivity to earnings, a 50 basis point decline in ROE (from the current rate of 9.5%) is expected to negatively impact EPS by \$0.05/share. Following this decision, the BCUC will hold another hearing to evaluate the risk premiums for other utilities in the province including FortisBC Energy (Vancouver Island), FortisBC Energy (Whistler), and FortisBC Electric.
- **Alberta PBR Framework and Generic Cost of Capital Proceeding Update.** In September 2012, the Alberta Utilities Commission (AUC) issued a generic decision for a Performance-Based Regulation (PBR) framework. FortisAlberta filed the required PBR-compliance application in November 2012 and a 2013 Capital Tracker application in December 2012. A decision on the PBR-compliance application is expected in Q1/13, while a decision on the 2013 Capital Tracker application is expected in Q3/13. Further, the AUC is holding a generic cost of capital proceeding with a decision expected sometime closer to mid-2013 or into Q3/13. Since the AUC fairly recently reduced the allowed ROE, we see less downside potential for Alberta as compared to B.C. In our opinion, the decision is more likely to address whether a formula-based ROE is appropriate in addition to whether there should be any adjustments to ROEs and/or regulated capital structures as part of the PBR decision (i.e., support for the current 8.75% ROE with a case to be made that increased risk under the PBR could support a higher ROE).
- **CH Energy Transaction Expected to Close Q2/13.** Subsequent to the quarter, Fortis filed a settlement agreement with the New York State Public Service Commission (NYSPSC) for the previously announced acquisition of CH Energy. Fortis expects the acquisition to close in Q2/13 (likely the end of April), subject to receiving approval from the NYSPSC. Highlights of the settlement agreement include a one-year customer rate freeze (until July 1, 2014) and a write-off of roughly \$35 million in storm costs.
- **Waneta Dam Expansion Continues to Make Good Progress.** Management indicated that the project is still on schedule. Since construction started in late 2010, the company has invested approximately \$436 million into the \$900 million Waneta Expansion, a 335 MW hydro project in B.C. that is expected to be in service in the spring of 2015. Management anticipates spending approximately \$227 million on the project during 2013. Fortis has a 51% interest in the project.

## Modestly Reducing Estimates to Reflect 2012 Actual Results and Economic Headwinds

We have reduced our 2013 and 2014 EPS estimates to \$1.81 and \$1.92, respectively (from \$1.87 and \$1.98), with the reductions primarily driven by lower forecasts across various business segments. The most significant changes encompass FortisBC Energy (reflecting a new baseline using the 2012 actual results), along with the Caribbean and Properties segments, due to economic headwinds. Furthermore, we have revised our 2013 estimated earnings contribution from CH Energy to reflect the timing of the close of the acquisition (now the end of April versus the end of March). We note that our estimates do not include any downside as part of the ongoing ROE reviews and that a 50 basis point decline in ROE (i.e., what we have reflected in our price target) would reduce our EPS estimates by roughly \$0.05/share. Our revised estimates are set out in Exhibit 2.

Source: Company reports; RBC Capital Markets estimates

## Valuation

Our price target of \$35.00 is based on a forward P/E of 18.5x our 2014E EPS (adjusted for the estimated capitalized interest related to the Waneta expansion), which includes approximately \$1.00/share of value for the Waneta Dam expansion that is expected to contribute to earnings in 2015. The P/E multiple is a slight discount to the peers, reflecting the risk with respect to a lower ROE in B.C.

## Price Target Impediment

The political environment in Belize, the risk of punitive regulatory decisions, economic/tourism conditions in its service territories, operational or financial issues at newly acquired businesses, and acquisitions or projects that fail to gain the confidence of investors may have implications for our price target.

## Company Description

Fortis Inc. is a utility holding company for Newfoundland Power, FortisAlberta, FortisBC, Terasen Inc., Maritime Electric, Canadian Niagara Power, Cornwall Electric, BECOL, and two electric utilities in the Turks and Caicos. It also holds a 100% interest in Fortis Properties and a 59.5% interest in Caribbean Utilities.

## Required Disclosures

### Conflicts Disclosures

The analyst(s) responsible for preparing this research report received compensation that is based upon various factors, including total revenues of the member companies of RBC Capital Markets and its affiliates, a portion of which are or have been generated by investment banking activities of the member companies of RBC Capital Markets and its affiliates.

A member company of RBC Capital Markets or one of its affiliates managed or co-managed a public offering of securities for Fortis Inc. in the past 12 months.

A member company of RBC Capital Markets or one of its affiliates received compensation for investment banking services from Fortis Inc. in the past 12 months.

Royal Bank of Canada, together with its affiliates, beneficially owns 1 percent or more of a class of common equity securities of Fortis Inc..

A member company of RBC Capital Markets or one of its affiliates received compensation for products or services other than investment banking services from Fortis Inc. during the past 12 months. During this time, a member company of RBC Capital Markets or one of its affiliates provided non-investment banking securities-related services to Fortis Inc..

A member company of RBC Capital Markets or one of its affiliates received compensation for products or services other than investment banking services from Fortis Inc. during the past 12 months. During this time, a member company of RBC Capital Markets or one of its affiliates provided non-securities services to Fortis Inc..

RBC Capital Markets is currently providing Fortis Inc. with non-investment banking securities-related services.

RBC Capital Markets is currently providing Fortis Inc. with non-securities services.

RBC Capital Markets has provided Fortis Inc. with investment banking services in the past 12 months.

RBC Capital Markets has provided Fortis Inc. with non-investment banking securities-related services in the past 12 months.

RBC Capital Markets has provided Fortis Inc. with non-securities services in the past 12 months.

The author is employed by RBC Dominion Securities Inc., a securities broker-dealer with principal offices located in Toronto, Canada.

## Explanation of RBC Capital Markets Equity Rating System

An analyst's 'sector' is the universe of companies for which the analyst provides research coverage. Accordingly, the rating assigned to a particular stock represents solely the analyst's view of how that stock will perform over the next 12 months relative to the analyst's sector average.

### Ratings

**Top Pick (TP):** Represents analyst's best idea in the sector; expected to provide significant absolute total return over 12 months with a favorable risk-reward ratio.

**Outperform (O):** Expected to materially outperform sector average over 12 months.

**Sector Perform (SP):** Returns expected to be in line with sector average over 12 months.

**Underperform (U):** Returns expected to be materially below sector average over 12 months.

### Risk Qualifiers (any of the following criteria may be present):

**Average Risk (Avg):** Volatility and risk expected to be comparable to sector; average revenue and earnings predictability; no significant cash flow/financing concerns over coming 12-24 months; fairly liquid.

**Above Average Risk (AA):** Volatility and risk expected to be above sector; below average revenue and earnings predictability; may not be suitable for a significant class of individual equity investors; may have negative cash flow; low market cap or float.

**Speculative (Spec):** Risk consistent with venture capital; low public float; potential balance sheet concerns; risk of being delisted.

## Distribution of Ratings

For the purpose of ratings distributions, regulatory rules require member firms to assign ratings to one of three rating categories - Buy,

Hold/Neutral, or Sell - regardless of a firm's own rating categories. Although RBC Capital Markets' ratings of Top Pick/Outperform, Sector Perform and Underperform most closely correspond to Buy, Hold/Neutral and Sell, respectively, the meanings are not the same because our ratings are determined on a relative basis (as described above).

Distribution of Ratings RBC Capital Markets, Equity Research				
Rating	Count	Percent	Investment Banking Serv./Past 12 Mos.	
			Count	Percent
BUY[TP/O]	787	50.32	280	35.58
HOLD[SP]	705	45.08	180	25.53
SELL[U]	72	4.60	9	12.50

References to a Recommended List in the recommendation history chart may include one or more recommended lists or model portfolios maintained by a business unit of the Wealth Management Division of RBC Capital Markets, LLC. These Recommended Lists include a former list called the Prime Opportunity List (RL 3), the Guided Portfolio: Prime Income (RL 6), the Guided Portfolio: Large Cap (RL 7), Guided Portfolio: Dividend Growth (RL 8), the Guided Portfolio: Midcap 111 (RL9), and the Guided Portfolio: ADR (RL 10). The abbreviation 'RL On' means the date a security was placed on a Recommended List. The abbreviation 'RL Off' means the date a security was removed from a Recommended List.

## Conflicts Policy

RBC Capital Markets Policy for Managing Conflicts of Interest in Relation to Investment Research is available from us on request. To access our current policy, clients should refer to <https://www.rbccm.com/global/file-414164.pdf>

or send a request to RBC Capital Markets Research Publishing, P.O. Box 50, 200 Bay Street, Royal Bank Plaza, 29th Floor, South Tower, Toronto, Ontario M5J 2W7. We reserve the right to amend or supplement this policy at any time.

## Dissemination of Research and Short-Term Trade Ideas

RBC Capital Markets endeavors to make all reasonable efforts to provide research simultaneously to all eligible clients, having regard to local time zones in overseas jurisdictions. RBC Capital Markets' research is posted to our proprietary websites to ensure eligible clients receive coverage initiations and changes in ratings, targets and opinions in a timely manner. Additional distribution may be done by the sales personnel via email, fax or regular mail. Clients may also receive our research via third-party vendors. Please contact your investment advisor or institutional salesperson for more information regarding RBC Capital Markets' research. RBC Capital Markets also provides eligible clients with access to SPARC on its proprietary INSIGHT website. SPARC contains market color and commentary, and may also contain Short-Term Trade Ideas regarding the securities of subject companies discussed in this or other research reports. SPARC may be accessed via the following hyperlink: <https://www.rbcinsight.com>. A Short-Term Trade Idea reflects

the research analyst's directional view regarding the price of the security of a subject company in the coming days or weeks, based on market and trading events. A Short-Term Trade Idea may differ from the price targets and/or recommendations in our published research reports reflecting the research analyst's views of the longer-term (one year) prospects of the subject company, as a result of the differing time horizons, methodologies and/or other factors. Thus, it is possible that the security of a subject company that is considered a long-term 'Sector Perform' or even an 'Underperform' might be a short-term buying opportunity as a result of temporary selling pressure in the market; conversely, the security of a subject company that is rated a long-term 'Outperform' could be considered susceptible to a short-term downward price correction. Short-Term Trade Ideas are not ratings, nor are they part of any ratings system, and RBC Capital Markets generally does not intend, nor undertakes any obligation, to maintain or update Short-Term Trade Ideas. Short-Term Trade Ideas discussed in SPARC may not be suitable for all investors and have not been tailored to individual investor circumstances and objectives, and investors should make their own independent decisions regarding any Short-Term Trade Ideas discussed therein.

## Analyst Certification

All of the views expressed in this report accurately reflect the personal views of the responsible analyst(s) about any and all of the subject securities or issuers. No part of the compensation of the responsible analyst(s) named herein is, or will be, directly or indirectly, related to the specific recommendations or views expressed by the responsible analyst(s) in this report.

The Global Industry Classification Standard ("GICS") was developed by and is the exclusive property and a service mark of MSCI Inc. ("MSCI") and Standard & Poor's Financial Services LLC ("S&P") and is licensed for use by RBC. Neither MSCI, S&P, nor any other party involved in making or compiling the GICS or any GICS classifications makes any express or implied warranties or representations with respect to such standard or classification (or the results to be obtained by the use thereof), and all such parties hereby expressly disclaim all warranties of originality, accuracy, completeness, merchantability and fitness for a particular purpose with respect to any of such standard or classification. Without limiting any of the foregoing, in no event shall MSCI, S&P, any of their affiliates or any third party involved in making or compiling the GICS or any GICS classifications have any liability for any direct, indirect, special, punitive, consequential or any other damages (including lost profits) even if notified of the possibility of such damages.

## Disclaimer

RBC Capital Markets is the business name used by certain branches and subsidiaries of the Royal Bank of Canada, including RBC Dominion Securities Inc., RBC Capital Markets, LLC, RBC Europe Limited, RBC Capital Markets (Hong Kong) Limited, Royal Bank of Canada, Hong Kong Branch and Royal Bank of Canada, Sydney Branch. The information contained in this report has been compiled by RBC Capital Markets from sources believed to be reliable, but no representation or warranty, express or implied, is made by Royal Bank of Canada, RBC Capital Markets, its affiliates or any other person as to its accuracy, completeness or correctness. All opinions and estimates contained in this report constitute RBC Capital Markets' judgement as of the date of this report, are subject to change without notice and are provided in good faith but without legal responsibility. Nothing in this report constitutes legal, accounting or tax advice or individually tailored investment advice. This material is prepared for general circulation to clients and has been prepared without regard to the individual financial circumstances and objectives of persons who receive it. The investments or services contained in this report may not be suitable for you and it is recommended that you consult an independent investment advisor if you are in doubt about the suitability of such investments or services. This report is not an offer to sell or a solicitation of an offer to buy any securities. Past performance is not a guide to future performance, future returns are not guaranteed, and a loss of original capital may occur. RBC Capital Markets research analyst compensation is based in part on the overall profitability of RBC Capital Markets, which includes profits attributable to investment banking revenues. Every province in Canada, state in the U.S., and most countries throughout the world have their own laws regulating the types of securities and other investment products which may be offered to their residents, as well as the process for doing so. As a result, the securities discussed in this report may not be eligible for sale in some jurisdictions. RBC Capital Markets may be restricted from publishing research reports, from time to time, due to regulatory restrictions and/or internal compliance policies. If this is the case, the latest published research reports available to clients may not reflect recent material changes in the applicable industry and/or applicable subject companies. RBC Capital Markets research reports are current only as of the date set forth on the research reports. This report is not, and under no circumstances should be construed as, a solicitation to act as securities broker or dealer in any jurisdiction by any person or company that is not legally permitted to carry on the business of a securities broker or dealer in that jurisdiction. To the full extent permitted by law neither RBC Capital Markets nor any of its affiliates, nor any other person, accepts any liability whatsoever for any direct or consequential loss arising from any use of this report or the information contained herein. No matter contained in this document may be reproduced or copied by any means without the prior consent of RBC Capital Markets.

**Additional information is available on request.**

### To U.S. Residents:

This publication has been approved by RBC Capital Markets, LLC (member FINRA, NYSE, SIPC), which is a U.S. registered broker-dealer and which accepts responsibility for this report and its dissemination in the United States. Any U.S. recipient of this report that is not a registered broker-dealer or a bank acting in a broker or dealer capacity and that wishes further information regarding, or to effect any transaction in, any of the securities discussed in this report, should contact and place orders with RBC Capital Markets, LLC.

### To Canadian Residents:

This publication has been approved by RBC Dominion Securities Inc. (member IIROC). Any Canadian recipient of this report that is not a Designated Institution in Ontario, an Accredited Investor in British Columbia or Alberta or a Sophisticated Purchaser in Quebec (or similar permitted purchaser in any other province) and that wishes further information regarding, or to effect any transaction in, any of the securities discussed in this report should contact and place orders with RBC Dominion Securities Inc., which, without in any way limiting the foregoing, accepts responsibility for this report and its dissemination in Canada.

### To U.K. Residents:

This publication has been approved by RBC Europe Limited ('RBCEL') which is authorized and regulated by Financial Services Authority ('FSA'), in connection with its distribution in the United Kingdom. This material is not for general distribution in the United Kingdom to retail clients, as defined under the rules of the FSA. However, targeted distribution may be made to selected retail clients of RBC and its affiliates. RBCEL accepts responsibility for this report and its dissemination in the United Kingdom.

### To Persons Receiving This Advice in Australia:

This material has been distributed in Australia by Royal Bank of Canada - Sydney Branch (ABN 86 076 940 880, AFSL No. 246521). This material has been prepared for general circulation and does not take into account the objectives, financial situation or needs of any recipient. Accordingly, any recipient should, before acting on this material, consider the appropriateness of this material having regard to their objectives, financial situation and needs. If this material relates to the acquisition or possible acquisition of a particular financial product, a recipient in Australia should obtain any relevant disclosure document prepared in respect of that product and consider that document before making any decision about whether to acquire the product.

### To Hong Kong Residents:

This publication is distributed in Hong Kong by RBC Investment Services (Asia) Limited, RBC Investment Management (Asia) Limited and RBC Capital Markets (Hong Kong) Limited, licensed corporations under the Securities and Futures Ordinance or, by the Royal Bank of Canada, Hong Kong Branch, a registered institution

under the Securities and Futures Ordinance. This material has been prepared for general circulation and does not take into account the objectives, financial situation, or needs of any recipient. Hong Kong persons wishing to obtain further information on any of the securities mentioned in this publication should contact RBC Investment Services (Asia) Limited, RBC Investment Management (Asia) Limited, RBC Capital Markets (Hong Kong) Limited or Royal Bank of Canada, Hong Kong Branch at 17/Floor, Cheung Kong Center, 2 Queen's Road Central, Hong Kong (telephone number is 2848-1388).

**To Singapore Residents:**

This publication is distributed in Singapore by the Royal Bank of Canada, Singapore Branch and Royal Bank of Canada (Asia) Limited, registered entities granted offshore bank and merchant bank status by the Monetary Authority of Singapore, respectively. This material has been prepared for general circulation and does not take into account the objectives, financial situation, or needs of any recipient. You are advised to seek independent advice from a financial adviser before purchasing any product. If you do not obtain independent advice, you should consider whether the product is suitable for you. Past performance is not indicative of future performance. If you have any questions related to this publication, please contact the Royal Bank of Canada, Singapore Branch or Royal Bank of Canada (Asia) Limited.

**To Japanese Residents:**

Unless otherwise exempted by Japanese law, this publication is distributed in Japan by or through RBC Capital Markets (Japan) Ltd., a registered type one financial instruments firm and/or Royal Bank of Canada, Tokyo Branch, a licensed foreign bank.

### Fortis Inc.

#### Does New York Not Love Fortis Back?

**Impact: Mildly Negative**

#### First Impression

**CH Energy Acquisition Under Fire.** On May 3, two Administrative Law Judges (ALJ) submitted their Recommended Decision, which will be considered by the New York State Public Service Commission with respect to Fortis' proposed acquisition of CH Energy. In the decision, the ALJs stated, "We find it relatively easy to conclude that the benefits of the merger transaction...are outweighed by the detriments remaining after mitigation." The Recommended Decision can be found by [clicking here](#).

**Fortis Intends to Work for an Approval.** The commission holds the final decision and Fortis stated that it intends to engage in further discussions to obtain the commission's approval. Fortis expects the commission to issue a decision in June 2013. The ALJs recommended that the commission consider potential changes to the proposed benefits to rate payers that "would alter the transaction's balance of risks and benefits."

**Financial Impact Not Likely to Be Material, Although a Denial Would Be a Strategic Setback.** Our initial analysis concluded that the transaction is expected to be mildly accretive to EPS (i.e., less than \$0.05/share). However, Fortis has long had its eye on expansion into the U.S., and we felt that the acquisition of CH Energy was a good step in executing that strategy as it was relatively small, had a regulatory framework that was comparable to Canadian provincial utility regulation, and occurred in a state where Fortis would have future acquisition opportunities (namely larger utilities from European owners).

**The Stock May Trade Modestly Weaker than Its Peers, Reflecting Uncertainty About the Success of the Acquisition.** We believe that the shares could be weaker than the peer group due to uncertainty regarding the closing of the CH Energy acquisition. With respect to the roughly \$600 million of subscription receipts that were issued in June 2012 to finance the CH Energy deal, the "release conditions" deadline is June 30, 2013 (note: one of the "release conditions" is the receipt of regulatory approval).

RBC Capital Markets has provided Fortis Inc. with non-investment banking securities-related services in the past 12 months.

RBC Capital Markets has provided Fortis Inc. with non-securities services in the past 12 months.

The author is employed by RBC Dominion Securities Inc., a securities broker-dealer with principal offices located in Toronto, Canada.

#### Explanation of RBC Capital Markets Equity Rating System

An analyst's 'sector' is the universe of companies for which the analyst provides research coverage. Accordingly, the rating assigned to a particular stock represents solely the analyst's view of how that stock will perform over the next 12 months relative to the analyst's sector average.

##### Ratings

**Top Pick (TP):** Represents analyst's best idea in the sector; expected to provide significant absolute total return over 12 months with a favorable risk-reward ratio.

**Outperform (O):** Expected to materially outperform sector average over 12 months.

**Sector Perform (SP):** Returns expected to be in line with sector average over 12 months.

**Underperform (U):** Returns expected to be materially below sector average over 12 months.

##### Risk Rating

As of March 31, 2013, RBC Capital Markets suspends its Average and Above Average risk ratings. The **Speculative** risk rating reflects a security's lower level of financial or operating predictability, illiquid share trading volumes, high balance sheet leverage, or limited operating history that result in a higher expectation of financial and/or stock price volatility.

## Distribution of Ratings

For the purpose of ratings distributions, regulatory rules require member firms to assign ratings to one of three rating categories - Buy, Hold/Neutral, or Sell - regardless of a firm's own rating categories. Although RBC Capital Markets' ratings of Top Pick/Outperform, Sector Perform and Underperform most closely correspond to Buy, Hold/Neutral and Sell, respectively, the meanings are not the same because our ratings are determined on a relative basis (as described above).

Distribution of Ratings RBC Capital Markets, Equity Research				
Rating	Count	Percent	Investment Banking Serv./Past 12 Mos.	
			Count	Percent
BUY[TP/O]	760	50.39	294	38.68
HOLD[SP]	672	44.56	170	25.30
SELL[U]	76	5.04	8	10.53

References to a Recommended List in the recommendation history chart may include one or more recommended lists or model portfolios maintained by a business unit of the Wealth Management Division of RBC Capital Markets, LLC. These Recommended Lists include a former list called the Prime Opportunity List (RL 3), the Guided Portfolio: Prime Income (RL 6), the Guided Portfolio: Large Cap (RL 7), Guided Portfolio: Dividend Growth (RL 8), the Guided Portfolio: Midcap 111 (RL9), and the Guided Portfolio: ADR (RL 10). The abbreviation 'RL On' means the date a security was placed on a Recommended List. The abbreviation 'RL Off' means the date a security was removed from a Recommended List.

## Conflicts Policy

RBC Capital Markets Policy for Managing Conflicts of Interest in Relation to Investment Research is available from us on request. To access our current policy, clients should refer to

or send a request to RBC Capital Markets Research Publishing, P.O. Box 50, 200 Bay Street, Royal Bank Plaza, 29th Floor, South Tower, Toronto, Ontario M5J 2W7. We reserve the right to amend or supplement this policy at any time.

## Dissemination of Research and Short-Term Trade Ideas

RBC Capital Markets endeavors to make all reasonable efforts to provide research simultaneously to all eligible clients, having regard to local time zones in overseas jurisdictions. RBC Capital Markets' research is posted to our proprietary websites to ensure

eligible clients receive coverage initiations and changes in ratings, targets and opinions in a timely manner. Additional distribution may be done by the sales personnel via email, fax or regular mail. Clients may also receive our research via third-party vendors. Please contact your investment advisor or institutional salesperson for more information regarding RBC Capital Markets' research. RBC Capital Markets also provides eligible clients with access to SPARC on its proprietary INSIGHT website. SPARC contains market color and commentary, and may also contain Short-Term Trade Ideas regarding the securities of subject companies discussed in this or other research reports. SPARC may be accessed via the following hyperlink: <https://www.rbcinsight.com>. A Short-Term Trade Idea reflects the research analyst's directional view regarding the price of the security of a subject company in the coming days or weeks, based on market and trading events. A Short-Term Trade Idea may differ from the price targets and/or recommendations in our published research reports reflecting the research analyst's views of the longer-term (one year) prospects of the subject company, as a result of the differing time horizons, methodologies and/or other factors. Thus, it is possible that the security of a subject company that is considered a long-term 'Sector Perform' or even an 'Underperform' might be a short-term buying opportunity as a result of temporary selling pressure in the market; conversely, the security of a subject company that is rated a long-term 'Outperform' could be considered susceptible to a short-term downward price correction. Short-Term Trade Ideas are not ratings, nor are they part of any ratings system, and RBC Capital Markets generally does not intend, nor undertakes any obligation, to maintain or update Short-Term Trade Ideas. Short-Term Trade Ideas discussed in SPARC may not be suitable for all investors and have not been tailored to individual investor circumstances and objectives, and investors should make their own independent decisions regarding any Short-Term Trade Ideas discussed therein.

## Analyst Certification

## RBC Capital Markets

May 8, 2013

### Fortis Inc.

#### Q1/13 Earnings In-Line; All Eyes Remain on New York

**Our View:** Neutral - The Q1/13 results were in-line with expectations.

#### Key Points:

**Normalized Q1/13 Results In-Line With Expectations.** Q1/13 normalized EPS was \$0.66, which matched our estimate of \$0.66 and compared to \$0.67 in Q1/12. Modestly better-than-expected results at FortisAlberta were offset by higher Corporate costs. Reported EPS of \$0.79 included a \$22 million gain (\$0.22/share) from the settlement of the Exploits River Hydro expropriation in Newfoundland along with FX gains (\$0.01/share).

**The Focus Remains on the New York Regulatory Process to Approve the CH Energy Acquisition.** As discussed in our *First Glance Note* dated May 5, 2013, two Administrative Law Judges (ALJ) submitted their Recommended Decision, which stated that, "We find it relatively easy to conclude that the benefits of the merger transaction...are outweighed by the detriments remaining after mitigation." The Recommended Decision will be considered by the New York State Public Service Commission and Fortis intends to engage in further discussions on ways to obtain the commission's approval. The transaction already has the support of numerous parties, including the staff of the commission.

**CH Energy: A Strategic Acquisition With Mild Expected Accretion.** Our initial analysis concluded that the transaction is expected to be mildly accretive to EPS (i.e., less than \$0.05/share). However, Fortis has long had its eye on expansion into the U.S., and we feel that the acquisition of CH Energy is a good step in executing that strategy as it's relatively small, has a regulatory framework that is comparable to Canadian provincial utility regulation, and is in a state where Fortis has future acquisition opportunities (namely larger utilities from European owners).

**Busy Regulatory Calendar Ahead.** Fortis continues to have a number of potentially impactful regulatory proceedings ongoing. Specifically, key processes include the ROE hearing in B.C. (decision expected in mid-2013), the ROE proceeding in Alberta (hearing scheduled for early 2014), and various proceedings related to the performance-based rates (PBR) in Alberta.

**Valuation.** Our price target of \$35.00 is based on a forward P/E of 18.5x our 2014E EPS (adjusted for the estimated capitalized interest related to the Waneta expansion), which includes approximately \$1.00/share of value for the Waneta Dam expansion that is expected to contribute to earnings in 2015. The P/E multiple is a slight discount to the peers, reflecting the risk with respect to a lower ROE in B.C.

### Target/Upside/Downside Scenarios

Exhibit 1: Fortis Inc.

Source: RBC Capital Markets estimates

#### Target Price/ Base Case

Our \$35.00 price target is based on a forward P/E of 18.5x applied to the forward EPS, which includes approximately \$1.00/share of value for the Waneta Dam expansion that is expected to contribute to earnings in 2015. The P/E multiple is at a slight discount to its peers, reflecting the risk with respect to a lower ROE in B.C.

#### Upside Scenario

For our upside analysis, we assume that P/E valuations fully reflect the level of long-term interest rates, which we see as providing roughly 2x upside in the P/E multiple. Further, our upside case assumes that ROEs in B.C. remain unchanged as part of the upcoming regulatory decision for the generic cost of capital proceeding.

#### Downside Scenario

For our downside analysis, we assumed a 100 basis point increase in interest rates, which we believe could translate into an almost 2x downside in the P/E multiple. Further, our downside scenario reflects a 100 basis point decrease in allowed ROE in B.C. (i.e., an incremental 50 basis points over and above what we have factored into our base case valuation), resulting in a low-risk benchmark ROE of 8.5%.

### Investment Thesis

We expect Fortis' shares to perform in line with other Energy Infrastructure companies in our coverage universe for the following reasons:

- **Shares Appear Fairly Valued in Light of Regulatory Headwinds.** While we like the existing asset base, and in particular the growth in the western Canadian utilities, the shares appear to be fairly valued, particularly in light of the regulatory headwinds that the company faces in 2013.
- **Good Defensive Investment.** We believe Fortis' utility assets provide a good combination of equity market, credit market, and economic defensiveness. The company has the highest percentage of earnings derived from Canadian regulated utility assets, which should provide strong returns in uncertain markets.

## Q1/13 Results In Line With Expectations

Fortis' normalized EPS was \$0.66 compared to our estimate of \$0.66 and \$0.67 in Q1/12. Consensus for the quarter was \$0.67 (six estimates with a range of \$0.65 to \$0.70). Reported EPS during the quarter was \$0.79, but included a \$22 million (\$0.12/share) gain related to the settlement of the December 2008 expropriation of a hydro facility in Newfoundland along with a \$2 million (\$0.01/share) FX gain. Overall, earnings from Canadian Regulated Utilities were slightly ahead of expectations mostly driven by FortisAlberta (2012 transmission variances booked in Q1/13), partially offset by higher-than-expected corporate costs. All other segments were generally in line with expectations. A summary of our normalized earnings is detailed in Exhibit 2.

## Highlights of the Quarter and Outlook

- B.C. Generic Cost of Capital Decision Expected in Mid-2013.** The generic cost of capital hearing to determine the low-risk benchmark ROE in the province is in the final stages. A decision from the B.C. Utilities Commission (BCUC) is expected in the coming months. In terms of sensitivity to earnings, a 50 basis point decline in ROE (from the current rate of 9.5%) is expected to negatively impact EPS by \$0.05/share. Following this decision, the BCUC will hold another hearing to evaluate the risk premiums for other utilities in the province including FortisBC Energy (Vancouver Island), FortisBC Energy (Whistler) and FortisBC Electric.
- Alberta PBR Framework and Generic Cost of Capital Proceeding Update.** In March 2013, the Alberta Utilities Commission (AUC) denied FortisAlberta's Review and Variance application for the PBR decision and subsequently, FortisAlberta has filed a leave to appeal the decision. Further, the AUC set rates on an interim basis, allowing 60% of the recovery of the revenue requirement (\$14.5 million of the \$24 million) associated with the 2013 Capital Tracker application, leaving approximately \$9.5 million subject to approval. The final utility's rates are expected in H2/13.
- CH Energy Transaction Expected to Close By The End of June.** As discussed in our *First Glance Note*, dated May 5, 2013, two Administrative Law Judges (ALJ) submitted their

Recommended Decision, which stated that, "We find it relatively easy to conclude that the benefits of the merger transaction...are outweighed by the detriments remaining after mitigation." The Recommended Decision will be considered by the New York State Public Service Commission (PSC) and a final decision by the PSC is expected in June. Fortis intends to engage in further discussions on ways to obtain the commission's approval. The transaction already has the support of numerous parties, including the staff of the commission.

- **Subscription Receipts May Need to be Extended.** Fortis is expected to fund a portion of the CH Energy transaction with the proceeds from the \$601 million subscription receipts issued in June 2012 that expire at the end of June 2013. If it is determined that the PSC decision may not be received in time to close the transaction on or before June 30, the company may seek an extension. In order to receive an extension, a special resolution must be approved by at least two-thirds of the subscription receipt holders at a meeting with a quorum for the meeting representing at least 25% of the subscription receipts.
- **Newfoundland Power ROE Remains Unchanged.** In April 2013, Newfoundland Power, 100%-owned by Fortis, received a decision from the Newfoundland and Labrador Board of Commissioners of Public Utilities on its 2013-2014 General Rate Application (GRA). As part of that decision, the regulated ROE will remain at 8.80% from 2013 through 2015, which is a level that is unchanged from what was embedded in 2012 rates.
- **Waneta Dam Expansion Continues to Make Good Progress.** Management indicated that the project is still on schedule and budget. Since construction started in late 2010, the company has invested approximately \$483 million into the \$900 million Waneta Expansion, a 335 MW hydro project in B.C. that is expected to be in service in the spring of 2015.

## Estimates Remain Unchanged

Given the in line Q1/13 results, we remain comfortable with our 2013 and 2014 EPS estimates of \$1.81 and \$1.92, respectively, but we have made changes within the business segments. We note that our estimates do not include any downside as part of the ongoing ROE reviews and that a 50 basis point decline in ROE in B.C. (i.e., what we have reflected in our price target) would reduce our EPS estimates by roughly \$0.05/share. Our revised estimates are set out in Exhibit 3.

Source: Company reports; RBC Capital Markets estimates

### Valuation

Our price target of \$35.00 is based on a forward P/E of 18.5x our 2014E EPS (adjusted for the estimated capitalized interest related to the Waneta expansion), which includes approximately \$1.00/share of value for the Waneta Dam expansion that is expected to contribute to earnings in 2015. The P/E multiple is a slight discount to the peers, reflecting the risk with respect to a lower ROE in B.C.

### Price Target Impediments

The political environment in Belize, the risk of punitive regulatory decisions, economic/tourism conditions in its service territories, operational or financial issues at newly acquired businesses, and acquisitions or projects that fail to gain the confidence of investors may have implications for our price target.

### Company Description

Fortis Inc. is a utility holding company for Newfoundland Power, FortisAlberta, FortisBC, Terasen Inc., Maritime Electric, Canadian Niagara Power, Cornwall Electric, BECOL, and two electric utilities in the Turks and Caicos. It also holds a 100% interest in Fortis Properties and a 59.5% interest in Caribbean Utilities.

### Required Disclosures

#### Non-U.S. Analyst Disclosure

RBC Capital Markets has provided Fortis Inc. with non-securities services in the past 12 months.

The author is employed by RBC Dominion Securities Inc., a securities broker-dealer with principal offices located in Toronto, Canada.

#### Explanation of RBC Capital Markets Equity Rating System

An analyst's 'sector' is the universe of companies for which the analyst provides research coverage. Accordingly, the rating assigned to a particular stock represents solely the analyst's view of how that stock will perform over the next 12 months relative to the analyst's sector average.

##### Ratings

**Top Pick (TP):** Represents analyst's best idea in the sector; expected to provide significant absolute total return over 12 months with a favorable risk-reward ratio.

**Outperform (O):** Expected to materially outperform sector average over 12 months.

**Sector Perform (SP):** Returns expected to be in line with sector average over 12 months.

**Underperform (U):** Returns expected to be materially below sector average over 12 months.

##### Risk Rating

As of March 31, 2013, RBC Capital Markets suspends its Average and Above Average risk ratings. The **Speculative** risk rating reflects a security's lower level of financial or operating predictability, illiquid share trading volumes, high balance sheet leverage, or limited operating history that result in a higher expectation of financial and/or stock price volatility.

## Distribution of Ratings

For the purpose of ratings distributions, regulatory rules require member firms to assign ratings to one of three rating categories - Buy, Hold/Neutral, or Sell - regardless of a firm's own rating categories. Although RBC Capital Markets' ratings of Top Pick/Outperform, Sector Perform and Underperform most closely correspond to Buy, Hold/Neutral and Sell, respectively, the meanings are not the same because our ratings are determined on a relative basis (as described above).

Distribution of Ratings RBC Capital Markets, Equity Research				
Rating	Count	Percent	Investment Banking Serv./Past 12 Mos.	
			Count	Percent
BUY[TP/O]	762	50.49	283	37.14
HOLD[SP]	670	44.40	161	24.03
SELL[U]	77	5.10	10	12.99

References to a Recommended List in the recommendation history chart may include one or more recommended lists or model portfolios maintained by a business unit of the Wealth Management Division of RBC Capital Markets, LLC. These Recommended Lists include a former list called the Prime Opportunity List (RL 3), the Guided Portfolio: Prime Income (RL 6), the Guided Portfolio: Large Cap (RL 7), Guided Portfolio: Dividend Growth (RL 8), the Guided Portfolio: Midcap 111 (RL9), and the Guided Portfolio: ADR (RL 10). The abbreviation 'RL On' means the date a security was placed on a Recommended List. The abbreviation 'RL Off' means the date a security was removed from a Recommended List.

## Conflicts Policy

RBC Capital Markets Policy for Managing Conflicts of Interest in Relation to Investment Research is available from us on request. To access our current policy, clients should refer to

<https://www.rbccm.com/global/file-414164.pdf>

or send a request to RBC Capital Markets Research Publishing, P.O. Box 50, 200 Bay Street, Royal Bank Plaza, 29th Floor, South Tower, Toronto, Ontario M5J 2W7. We reserve the right to amend or supplement this policy at any time.

## Dissemination of Research and Short-Term Trade Ideas

RBC Capital Markets endeavors to make all reasonable efforts to provide research simultaneously to all eligible clients, having regard to local time zones in overseas jurisdictions. RBC Capital Markets' research is posted to our proprietary websites to ensure

eligible clients receive coverage initiations and changes in ratings, targets and opinions in a timely manner. Additional distribution may be done by the sales personnel via email, fax or regular mail. Clients may also receive our research via third-party vendors. Please contact your investment advisor or institutional salesperson for more information regarding RBC Capital Markets' research. RBC Capital Markets also provides eligible clients with access to SPARC on its proprietary INSIGHT website. SPARC contains market color and commentary, and may also contain Short-Term Trade Ideas regarding the securities of subject companies discussed in this or other research reports. SPARC may be accessed via the following hyperlink: <https://www.rbcinsight.com>. A Short-Term Trade Idea reflects the research analyst's directional view regarding the price of the security of a subject company in the coming days or weeks, based on market and trading events. A Short-Term Trade Idea may differ from the price targets and/or recommendations in our published research reports reflecting the research analyst's views of the longer-term (one year) prospects of the subject company, as a result of the differing time horizons, methodologies and/or other factors. Thus, it is possible that the security of a subject company that is considered a long-term 'Sector Perform' or even an 'Underperform' might be a short-term buying opportunity as a result of temporary selling pressure in the market; conversely, the security of a subject company that is rated a long-term 'Outperform' could be considered susceptible to a short-term downward price correction. Short-Term Trade Ideas are not ratings, nor are they part of any ratings system, and RBC Capital Markets generally does not intend, nor undertakes any obligation, to maintain or update Short-Term Trade Ideas. Short-Term Trade Ideas discussed in SPARC may not be suitable for all investors and have not been tailored to individual investor circumstances and objectives, and investors should make their own independent decisions regarding any Short-Term Trade Ideas discussed therein.

## Analyst Certification

## Fortis Inc.

### First Glance: BCUC Reduces ROE and Equity Component

**Impact: Modestly Negative**

#### First Impression

**ROE Reduction Not Surprising, Although Slightly More Than We Had Expected.** As part of its generic cost of capital review, the British Columbia Utilities Commission (BCUC) reduced the return on equity for FortisBC Energy to 8.75% (down from 9.50%) effective January 1, 2013 (i.e., there will be a retroactive adjustment). While a reduction in the allowed ROE was not surprising and within the range of our expectations of up to 100 basis points, it was slightly lower than our base case reduction of 50 bps to 9.00%.

**Equity Component Reduction a Surprise.** The BCUC reduced FortisBC Energy's equity component to 38.5% (down from 40%) effective January 1, 2013. The new equity component, along with the ROE, will remain in effect until the end of 2015. We did not expect a reduction in the equity component.

**New Automatic Adjustment Formula Kicks In Only If Long Bond Yields Rise Above 3.8%.** The BCUC has instituted an automatic adjustment mechanism to the ROE if long bond yields rise materially from current levels. If the 3.8% threshold is met, the new formula will adjust ROEs upwards based on a combination of changes in the long bond yield in addition to changes in the A-rated utility bond spreads over 30-year Government of Canada bond yields.

**Phase II Will Review the Risk Premiums and Capital Structures for Other Utilities.** The ROE component of the decision also applies to Fortis' other utilities in the province including FortisBC Inc., FortisBC Energy (Vancouver Island), and FortisBC Energy (Whistler) effective January 1, 2013. The BCUC has commenced a second phase to determine the appropriate risk premiums and capital structures for these utilities.

**Earnings Outlook Moderates as Part of the Decision.** Based on our previously disclosed sensitivity that a 50 basis point move equates to a \$0.05/share earnings impact, the BCUC decision should negatively impact earnings by about \$0.07-\$0.08/share annually. Further, the reduction in FortisBC Energy's equity component is expected to reduce earnings by another \$0.02/share.

#### Explanation of RBC Capital Markets Equity Rating System

An analyst's 'sector' is the universe of companies for which the analyst provides research coverage. Accordingly, the rating assigned to a particular stock represents solely the analyst's view of how that stock will perform over the next 12 months relative to the analyst's sector average.

##### Ratings

**Top Pick (TP):** Represents analyst's best idea in the sector; expected to provide significant absolute total return over 12 months with a favorable risk-reward ratio.

**Outperform (O):** Expected to materially outperform sector average over 12 months.

**Sector Perform (SP):** Returns expected to be in line with sector average over 12 months.

**Underperform (U):** Returns expected to be materially below sector average over 12 months.

##### Risk Rating

As of March 31, 2013, RBC Capital Markets suspends its Average and Above Average risk ratings. The **Speculative** risk rating reflects a security's lower level of financial or operating predictability, illiquid share trading volumes, high balance sheet leverage, or limited operating history that result in a higher expectation of financial and/or stock price volatility.

## Distribution of Ratings

For the purpose of ratings distributions, regulatory rules require member firms to assign ratings to one of three rating categories - Buy, Hold/Neutral, or Sell - regardless of a firm's own rating categories. Although RBC Capital Markets' ratings of Top Pick/Outperform, Sector Perform and Underperform most closely correspond to Buy, Hold/Neutral and Sell, respectively, the meanings are not the same because our ratings are determined on a relative basis (as described above).

Distribution of Ratings RBC Capital Markets, Equity Research				
Rating	Count	Percent	Investment Banking Serv./Past 12 Mos.	
			Count	Percent
BUY[TP/O]	757	50.16	281	37.12
HOLD[SP]	673	44.60	161	23.92
SELL[U]	79	5.24	10	12.66

References to a Recommended List in the recommendation history chart may include one or more recommended lists or model portfolios maintained by a business unit of the Wealth Management Division of RBC Capital Markets, LLC. These Recommended Lists include a former list called the Prime Opportunity List (RL 3), the Guided Portfolio: Prime Income (RL 6), the Guided Portfolio: Large Cap (RL 7), Guided Portfolio: Dividend Growth (RL 8), the Guided Portfolio: Midcap 111 (RL9), and the Guided Portfolio: ADR (RL 10). The abbreviation 'RL On' means the date a security was placed on a Recommended List. The abbreviation 'RL Off' means the date a security was removed from a Recommended List.

## Conflicts Policy

RBC Capital Markets Policy for Managing Conflicts of Interest in Relation to Investment Research is available from us on request. To access our current policy, clients should refer to

<https://www.rbccm.com/global/file-414164.pdf>

or send a request to RBC Capital Markets Research Publishing, P.O. Box 50, 200 Bay Street, Royal Bank Plaza, 29th Floor, South Tower, Toronto, Ontario M5J 2W7. We reserve the right to amend or supplement this policy at any time.

## Dissemination of Research and Short-Term Trade Ideas

RBC Capital Markets endeavors to make all reasonable efforts to provide research simultaneously to all eligible clients, having regard to local time zones in overseas jurisdictions. RBC Capital Markets' research is posted to our proprietary websites to ensure

eligible clients receive coverage initiations and changes in ratings, targets and opinions in a timely manner. Additional distribution may be done by the sales personnel via email, fax or regular mail. Clients may also receive our research via third-party vendors. Please contact your investment advisor or institutional salesperson for more information regarding RBC Capital Markets' research. RBC Capital Markets also provides eligible clients with access to SPARC on its proprietary INSIGHT website. SPARC contains market color and commentary, and may also contain Short-Term Trade Ideas regarding the securities of subject companies discussed in this or other research reports. SPARC may be accessed via the following hyperlink: <https://www.rbcinsight.com>. A Short-Term Trade Idea reflects the research analyst's directional view regarding the price of the security of a subject company in the coming days or weeks, based on market and trading events. A Short-Term Trade Idea may differ from the price targets and/or recommendations in our published research reports reflecting the research analyst's views of the longer-term (one year) prospects of the subject company, as a result of the differing time horizons, methodologies and/or other factors. Thus, it is possible that the security of a subject company that is considered a long-term 'Sector Perform' or even an 'Underperform' might be a short-term buying opportunity as a result of temporary selling pressure in the market; conversely, the security of a subject company that is rated a long-term 'Outperform' could be considered susceptible to a short-term downward price correction. Short-Term Trade Ideas are not ratings, nor are they part of any ratings system, and RBC Capital Markets generally does not intend, nor undertakes any obligation, to maintain or update Short-Term Trade Ideas. Short-Term Trade Ideas discussed in SPARC may not be suitable for all investors and have not been tailored to individual investor circumstances and objectives, and investors should make their own independent decisions regarding any Short-Term Trade Ideas discussed therein.

## RBC Capital Markets

May 14, 2013

### Fortis Inc.

#### BCUC ROE Decision Slightly More Negative than Anticipated

**Our View:** While the decision was more negative than we had anticipated, the upside is that the uncertainty regarding the decision has been eliminated. We believe that the relative underperformance of the shares yesterday was reasonable in the context of the BCUC's decision.

#### Key Points:

**ROE Reduction Slightly More than We Had Expected.** As part of its generic cost of capital review, the British Columbia Utilities Commission (BCUC) reduced the return on equity for FortisBC Energy to 8.75% (from 9.50%) effective January 1, 2013 (i.e., there will be a retroactive adjustment). While a reduction in the allowed ROE was not surprising and within the range of our expectations of up to 100 basis points, it was slightly lower than our base case reduction of 50 bps to 9.00%.

**Equity Component Reduction Was a Surprise.** The BCUC reduced FortisBC Energy's equity component to 38.5% (from 40%) effective January 1, 2013. The new equity component, along with the ROE, will remain in effect until the end of 2015. We did not expect a reduction in the equity component.

**If Long-Term Bond Yields Rise Above 3.8%, a New Automatic Adjustment Formula Applies.** The BCUC has instituted an automatic adjustment mechanism to the ROE if long bond yields rise materially from current levels. If the 3.8% yield threshold is met, the new formula will adjust ROEs upwards based on 50% of the change in the long-term bond yield and 50% of the change in the A-rated utility bond spreads over 30-year Government of Canada bond yields.

**Stage Two Will Review the Risk Premiums and Capital Structures for Fortis' Other Utilities.** The ROE component of the decision also applies to Fortis' other utilities in the province including FortisBC Inc., FortisBC Energy (Vancouver Island), and FortisBC Energy (Whistler) effective January 1, 2013. The BCUC has commenced a second phase to determine the appropriate risk premiums and capital structures for these utilities.

**Reducing Estimates to Reflect the Decision.** Pending the decision, our previous estimates reflected a constant return framework. As a result of the decision, we have reduced our 2013 and 2014 EPS estimates to \$1.72 and \$1.83 (from \$1.81 and \$1.92), respectively, to reflect stage one of the BCUC's decision.

**Valuation.** Our price target of \$35.00 is based on a forward P/E of 19.5x our 2014E EPS (adjusted for the estimated capitalized interest related to the Waneta expansion), which includes approximately \$1.00/share of value for the Waneta Dam expansion that is expected to contribute to earnings in 2015.

### Target/Upside/Downside Scenarios

Exhibit 1: Fortis Inc.

Source: RBC Capital Markets estimates

#### Target Price/ Base Case

Our \$35.00 price target is based on a forward P/E of 19.5x applied to the forward EPS, which includes approximately \$1.00/share of value for the Waneta Dam expansion that is expected to contribute to earnings in 2015.

#### Upside Scenario

For our upside analysis, we assume that P/E valuations fully reflect the level of long-term interest rates, which we see as providing roughly 2x upside in the P/E multiple.

#### Downside Scenario

For our downside analysis, we assume a 100 basis point increase in interest rates, which we believe could translate into an almost 2x downside in the P/E multiple.

### Investment Thesis

We expect Fortis' shares to perform in line with other Energy Infrastructure companies in our coverage universe for the following reasons:

- **Shares Appear Fairly Valued in Light of Regulatory Headwinds.** While we like the existing asset base, and in particular the growth in the western Canadian utilities, the shares appear to be fairly valued, particularly in light of the regulatory headwinds that the company faces in 2013.
- **Good Defensive Investment.** We believe Fortis' utility assets provide a good combination of equity market, credit market, and economic defensiveness. The company has the highest percentage of earnings derived from Canadian regulated utility assets, which should provide strong returns in uncertain markets.

## BCUC Decision Modestly More Negative Than Expected

Exhibit 2 below sets out the total EPS impact on Fortis' shares from the BCUC decision. We estimate the total impact to be roughly \$0.09/share for 2013 and 2014, reflecting the lower ROE for all of the utilities and the lower equity component for FortisBC Energy. We note that the equity thickness for FortisBC Energy (Vancouver Island), FortisBC Energy (Whistler) and FortisBC Inc. is unchanged at 40%, pending the decision from Stage 2 of the Generic Cost of Capital proceeding. If the BCUC reduces the equity thickness for those three utilities to 38.5% (from 40%), we estimate that the impact on EPS would be approximately \$0.01.

The decision can be found at: [BCUC Generic Cost of Capital Decision \(Stage 1\)](#)

Exhibit 2: Impact of the Decision on Fortis (In \$ billions except per share figures)

	Estimated Rate Base	ROE		Equity Component		Est. EPS Impact

<b>BCUC Decision Impact (Stage 1)</b>						<b><u>(\$0.09)</u></b>

Source: Company reports; RBC Capital Markets estimates

## Reducing Estimates to Reflect the Decision

We lower our 2013 and 2014 EPS estimates to \$1.72 and \$1.83 (from \$1.81 and \$1.92), respectively, to reflect the BCUC's 2013 generic cost of capital decision. Our revised estimates are set out in Exhibit 3.

Exhibit 3: Financial Forecast (In \$MM except per share figures)

RBC Capital Markets has provided Fortis Inc. with non-securities services in the past 12 months.

The author is employed by RBC Dominion Securities Inc., a securities broker-dealer with principal offices located in Toronto, Canada.

#### Explanation of RBC Capital Markets Equity Rating System

An analyst's 'sector' is the universe of companies for which the analyst provides research coverage. Accordingly, the rating assigned to a particular stock represents solely the analyst's view of how that stock will perform over the next 12 months relative to the analyst's sector average.

##### Ratings

**Top Pick (TP):** Represents analyst's best idea in the sector; expected to provide significant absolute total return over 12 months with a favorable risk-reward ratio.

**Outperform (O):** Expected to materially outperform sector average over 12 months.

**Sector Perform (SP):** Returns expected to be in line with sector average over 12 months.

**Underperform (U):** Returns expected to be materially below sector average over 12 months.

##### Risk Rating

As of March 31, 2013, RBC Capital Markets suspends its Average and Above Average risk ratings. The **Speculative** risk rating reflects a security's lower level of financial or operating predictability, illiquid share trading volumes, high balance sheet leverage, or limited operating history that result in a higher expectation of financial and/or stock price volatility.

## Distribution of Ratings

For the purpose of ratings distributions, regulatory rules require member firms to assign ratings to one of three rating categories - Buy, Hold/Neutral, or Sell - regardless of a firm's own rating categories. Although RBC Capital Markets' ratings of Top Pick/Outperform, Sector Perform and Underperform most closely correspond to Buy, Hold/Neutral and Sell, respectively, the meanings are not the same because our ratings are determined on a relative basis (as described above).

Distribution of Ratings RBC Capital Markets, Equity Research				
Rating	Count	Percent	Investment Banking Serv./Past 12 Mos.	
			Count	Percent
BUY[TP/O]	759	50.30	280	36.89
HOLD[SP]	671	44.47	163	24.29
SELL[U]	79	5.24	10	12.66

References to a Recommended List in the recommendation history chart may include one or more recommended lists or model portfolios maintained by a business unit of the Wealth Management Division of RBC Capital Markets, LLC. These Recommended Lists include a former list called the Prime Opportunity List (RL 3), the Guided Portfolio: Prime Income (RL 6), the Guided Portfolio: Large Cap (RL 7), Guided Portfolio: Dividend Growth (RL 8), the Guided Portfolio: Midcap 111 (RL9), and the Guided Portfolio: ADR (RL 10). The abbreviation 'RL On' means the date a security was placed on a Recommended List. The abbreviation 'RL Off' means the date a security was removed from a Recommended List.

or send a request to RBC Capital Markets Research Publishing, P.O. Box 50, 200 Bay Street, Royal Bank Plaza, 29th Floor, South Tower, Toronto, Ontario M5J 2W7. We reserve the right to amend or supplement this policy at any time.

## Dissemination of Research and Short-Term Trade Ideas

RBC Capital Markets endeavors to make all reasonable efforts to provide research simultaneously to all eligible clients, having regard to local time zones in overseas jurisdictions. RBC Capital Markets' research is posted to our proprietary websites to ensure

eligible clients receive coverage initiations and changes in ratings, targets and opinions in a timely manner. Additional distribution may be done by the sales personnel via email, fax or regular mail. Clients may also receive our research via third-party vendors. Please contact your investment advisor or institutional salesperson for more information regarding RBC Capital Markets' research. RBC Capital Markets also provides eligible clients with access to SPARC on its proprietary INSIGHT website. SPARC contains market color and commentary, and may also contain Short-Term Trade Ideas regarding the securities of subject companies discussed in this or other research reports. SPARC may be accessed via the following hyperlink: <https://www.rbcinsight.com>. A Short-Term Trade Idea reflects the research analyst's directional view regarding the price of the security of a subject company in the coming days or weeks, based on market and trading events. A Short-Term Trade Idea may differ from the price targets and/or recommendations in our published research reports reflecting the research analyst's views of the longer-term (one year) prospects of the subject company, as a result of the differing time horizons, methodologies and/or other factors. Thus, it is possible that the security of a subject company that is considered a long-term 'Sector Perform' or even an 'Underperform' might be a short-term buying opportunity as a result of temporary selling pressure in the market; conversely, the security of a subject company that is rated a long-term 'Outperform' could be considered susceptible to a short-term downward price correction. Short-Term Trade Ideas are not ratings, nor are they part of any ratings system, and RBC Capital Markets generally does not intend, nor undertakes any obligation, to maintain or update Short-Term Trade Ideas. Short-Term Trade Ideas discussed in SPARC may not be suitable for all investors and have not been tailored to individual investor circumstances and objectives, and investors should make their own independent decisions regarding any Short-Term Trade Ideas discussed therein.

June 14, 2013

### Fortis Inc.

#### New York Loves Fortis Back

**Our View:** We view clarity, and successful regulatory approval, of the CH Energy acquisition as positive for the Fortis story. However, we note that the impact of the acquisition was already included in our estimates, valuation and outlook for the stock.

#### Key Points:

**CH Energy Acquisition Finally Approved.** After over a year long wait, the New York State Public Service Commission (NYSPSC) voted to approve Fortis' agreement to acquire CH Energy Group. Since NYSPSC approval was the final regulatory requirement, closing of the acquisition is expected to occur shortly after the review and acceptance of the official written order from the NYSPSC.

**Central Hudson is a Strategic Acquisition.** We continue to view the transaction as strategic, even though we see the financial impact resulting in modest initial EPS accretion (i.e., about \$0.02/share). With New York state having a similar regulatory framework to Canada's low-risk provincial utility structures, Central Hudson is an attractive way for Fortis to enter the U.S. and demonstrate that its success with acquisitions in Canada can be applied south of the border. In particular, we see the potential for significant follow-on acquisitions of utility assets in New York state over time.

**Estimates Remain Unchanged.** Management filed a letter with the NYSPSC on May 30, 2013 offering additional enhancements for the transaction, which we do not expect to materially impact the earnings accretion for the acquisition. As such, we remain comfortable with our 2013 and 2014 estimates of \$1.72 and \$1.83, respectively. For additional details on our financial forecast, please refer to Exhibit 2 on page 3.

**Valuation.** Our price target of \$35.00 is based on a forward P/E of 19.5x our 2014E EPS (adjusted for the estimated capitalized interest related to the Waneta expansion), which includes approximately \$1.00/share of value for the Waneta Dam expansion that is expected to contribute to earnings in 2015.

## Target/Upside/Downside Scenarios

Exhibit 1: Fortis Inc.

Source: RBC Capital Markets estimates

### Target Price/ Base Case

Our \$35.00 price target is based on a forward P/E of 19.5x applied to the forward EPS, which includes approximately \$1.00/share of value for the Waneta Dam expansion that is expected to contribute to earnings in 2015.

### Upside Scenario

For our upside analysis, we assume that P/E valuations fully reflect the level of long-term interest rates, which we see as providing roughly 2x upside in the P/E multiple.

### Downside Scenario

For our downside analysis, we assume a 100 basis point increase in interest rates, which we believe could translate into an almost 2x downside in the P/E multiple.

## Investment Thesis

We expect Fortis' shares to perform in line with other Energy Infrastructure companies in our coverage universe for the following reasons:

- **Shares Appear Fairly Valued in Light of Regulatory Headwinds.** While we like the existing asset base, and in particular the growth in the western Canadian utilities, the shares appear to be fairly valued, particularly in light of the regulatory headwinds and downward pressure on ROEs (as we saw with the B.C. generic cost of capital decision).
- **Good Defensive Investment Although Market Sentiment has Shifted Away From Ultra-Defensiveness.** We believe Fortis' utility assets provide a good combination of equity market, credit market, and economic defensiveness. The company has the highest percentage of earnings derived from Canadian regulated utility assets, which should provide strong returns in uncertain markets. However, we note that investor preferences have largely shifted away from the ultra-defensive regulated utility names towards stocks with higher growth, albeit with moderately higher risk profiles.

Source: Company reports; RBC Capital Markets estimates

## **Valuation**

Our price target of \$35.00 is based on a forward P/E of 19.5x our 2014E EPS (adjusted for the estimated capitalized interest related to the Waneta expansion), which includes approximately \$1.00/share of value for the Waneta Dam expansion that is expected to contribute to earnings in 2015.

## **Price Target Impediments**

The political environment in Belize, the risk of punitive regulatory decisions, economic/tourism conditions in its service territories, operational or financial issues at newly acquired businesses, and acquisitions or projects that fail to gain the confidence of investors may have implications for our price target.

## **Company Description**

Fortis Inc. is a utility holding company for Newfoundland Power, FortisAlberta, FortisBC, Terasen Inc., Maritime Electric, Canadian Niagara Power, Cornwall Electric, BECOL, CH Energy and two electric utilities in the Turks and Caicos. It also holds a 100% interest in Fortis Properties and a 59.5% interest in Caribbean Utilities.

## Required Disclosures

### Non-U.S. Analyst Disclosure

Kelsey Roste and Michelle Zuliani (i) are not registered/qualified as research analysts with the NYSE and/or FINRA and (ii) may not be associated persons of the RBC Capital Markets, LLC and therefore may not be subject to FINRA Rule 2711 and NYSE Rule 472 restrictions on communications with a subject company, public appearances and trading securities held by a research analyst account.

### Conflicts Disclosures

The analyst(s) responsible for preparing this research report received compensation that is based upon various factors, including total revenues of the member companies of RBC Capital Markets and its affiliates, a portion of which are or have been generated by investment banking activities of the member companies of RBC Capital Markets and its affiliates.

A member company of RBC Capital Markets or one of its affiliates managed or co-managed a public offering of securities for Fortis Inc. in the past 12 months.

A member company of RBC Capital Markets or one of its affiliates received compensation for investment banking services from Fortis Inc. in the past 12 months.

Royal Bank of Canada, together with its affiliates, beneficially owns 1 percent or more of a class of common equity securities of Fortis Inc..

A member company of RBC Capital Markets or one of its affiliates received compensation for products or services other than investment banking services from Fortis Inc. during the past 12 months. During this time, a member company of RBC Capital Markets or one of its affiliates provided non-investment banking securities-related services to Fortis Inc..

A member company of RBC Capital Markets or one of its affiliates received compensation for products or services other than investment banking services from Fortis Inc. during the past 12 months. During this time, a member company of RBC Capital Markets or one of its affiliates provided non-securities services to Fortis Inc..

RBC Capital Markets is currently providing Fortis Inc. with non-investment banking securities-related services.

RBC Capital Markets is currently providing Fortis Inc. with non-securities services.

RBC Capital Markets has provided Fortis Inc. with investment banking services in the past 12 months.

RBC Capital Markets has provided Fortis Inc. with non-investment banking securities-related services in the past 12 months.

RBC Capital Markets has provided Fortis Inc. with non-securities services in the past 12 months.

The author is employed by RBC Dominion Securities Inc., a securities broker-dealer with principal offices located in Toronto, Canada.

## Explanation of RBC Capital Markets Equity Rating System

An analyst's 'sector' is the universe of companies for which the analyst provides research coverage. Accordingly, the rating assigned to a particular stock represents solely the analyst's view of how that stock will perform over the next 12 months relative to the analyst's sector average.

### Ratings

**Top Pick (TP):** Represents analyst's best idea in the sector; expected to provide significant absolute total return over 12 months with a favorable risk-reward ratio.

**Outperform (O):** Expected to materially outperform sector average over 12 months.

**Sector Perform (SP):** Returns expected to be in line with sector average over 12 months.

**Underperform (U):** Returns expected to be materially below sector average over 12 months.

## Risk Rating

As of March 31, 2013, RBC Capital Markets suspends its Average and Above Average risk ratings. The **Speculative** risk rating reflects a security's lower level of financial or operating predictability, illiquid share trading volumes, high balance sheet leverage, or limited operating history that result in a higher expectation of financial and/or stock price volatility.

## Distribution of Ratings

For the purpose of ratings distributions, regulatory rules require member firms to assign ratings to one of three rating categories - Buy, Hold/Neutral, or Sell - regardless of a firm's own rating categories. Although RBC Capital Markets' ratings of Top Pick/Outperform, Sector Perform and Underperform most closely correspond to Buy, Hold/Neutral and Sell, respectively, the meanings are not the same because our ratings are determined on a relative basis (as described above).

Distribution of Ratings RBC Capital Markets, Equity Research				
Rating	Count	Percent	Investment Banking Serv./Past 12 Mos.	
			Count	Percent
BUY[TP/O]	763	50.93	283	37.09
HOLD[SP]	657	43.86	168	25.57
SELL[U]	78	5.21	10	12.82

References to a Recommended List in the recommendation history chart may include one or more recommended lists or model portfolios maintained by a business unit of the Wealth Management Division of RBC Capital Markets, LLC. These Recommended Lists include a former list called the Prime Opportunity List (RL 3), the Guided Portfolio: Prime Income (RL 6), the Guided Portfolio: Large Cap (RL 7), Guided Portfolio: Dividend Growth (RL 8), the Guided Portfolio: Midcap 111 (RL9), and the Guided Portfolio: ADR (RL 10). The abbreviation 'RL On' means the date a security was placed on a Recommended List. The abbreviation 'RL Off' means the date a security was removed from a Recommended List.

## Conflicts Policy

RBC Capital Markets Policy for Managing Conflicts of Interest in Relation to Investment Research is available from us on request. To access our current policy, clients should refer to

or send a request to RBC Capital Markets Research Publishing, P.O. Box 50, 200 Bay Street, Royal Bank Plaza, 29th Floor, South Tower, Toronto, Ontario M5J 2W7. We reserve the right to amend or supplement this policy at any time.

## Dissemination of Research and Short-Term Trade Ideas

RBC Capital Markets endeavors to make all reasonable efforts to provide research simultaneously to all eligible clients, having regard to local time zones in overseas jurisdictions. RBC Capital Markets' research is posted to our proprietary websites to ensure eligible clients receive coverage initiations and changes in ratings, targets and opinions in a timely manner. Additional distribution may be done by the sales personnel via email, fax or regular mail. Clients may also receive our research via third-party vendors. Please contact your investment advisor or institutional salesperson for more information regarding RBC Capital Markets' research. RBC Capital Markets also provides eligible clients with access to SPARC on its proprietary INSIGHT website. SPARC contains market color and commentary, and may also contain Short-Term Trade Ideas regarding the securities of subject companies discussed in this or other research reports. SPARC may be accessed via the following hyperlink: <https://www.rbcinsight.com>. A Short-Term Trade Idea reflects the research analyst's directional view regarding the price of the security of a subject company in the coming days or weeks, based on market and trading events. A Short-Term Trade Idea may differ from the price targets and/or recommendations in our published research reports reflecting the research analyst's views of the longer-term (one year) prospects of the subject company, as a result of the differing time horizons, methodologies and/or other factors. Thus, it is possible that the security of a subject company that is considered a long-term 'Sector Perform' or even an 'Underperform' might be a short-term buying opportunity as a result of temporary selling pressure in the market; conversely, the security of a subject company that is rated a long-term 'Outperform' could be considered susceptible to a short-term downward price correction. Short-Term Trade Ideas are not ratings, nor are they part of any ratings system, and RBC Capital Markets generally does not intend, nor undertakes any obligation, to maintain or update Short-Term Trade Ideas. Short-Term Trade Ideas discussed in SPARC may not be suitable for all investors and have not been tailored to individual investor circumstances and objectives, and investors should make their own independent decisions regarding any Short-Term Trade Ideas discussed therein.

## Analyst Certification

## RBC Capital Markets

August 2, 2013

### Fortis Inc.

#### Noisy Quarter on the Surface but Utility-Like After Adjustments

**Our View:** Cutting through a number of sizable non-recurring adjustments reveals a quarter that was fairly close to our expectations with almost all of the business segments coming in close to our forecast.

#### Key Points:

**Cutting Through the Adjustments Reveals Q2/13 Results that Were Fairly Close to Our Expectations.** Normalized EPS was \$0.27 compared to our estimate of \$0.29 and \$0.33 in Q2/12. Reported EPS was \$0.28 and included a \$32 million (\$0.17/share) of acquisition-related expenses and customer benefits offered to obtain regulatory approval of CH Energy, \$25 million (\$0.13/share) favourable income tax recovery due to the enactment of higher deductions associated with Part VI.1 tax, a \$5 million (\$0.03/share) tax provision reversal from a prior period, and a \$3 million foreign exchange gain (\$0.02/share).

**Completion of the Long-Awaited CH Energy Acquisition.** On June 27, 2013, Fortis closed the CH Energy acquisition for approximately US\$1.5 billion, including the assumption of US\$518 million of debt. In order to obtain regulatory approval of the acquisition, Fortis committed to provide CH Energy's customers with approximately US\$50 million in financial benefits (of which US\$40 million were recognized in Q2/13). In addition, Fortis agreed to a rate freeze through to June 30, 2015, which is a contributing factor to management's guidance that the acquisition is not expected to be accretive to EPS until 2015.

**Are Additional U.S. Acquisitions on the Horizon?** While the company may take some time to digest the CH Energy acquisition after a year-long plus process to receive regulatory approval, we expect the company to continue to pursue utility acquisitions in the U.S. as a key part of the growth strategy.

**Estimates Unchanged.** We remain comfortable with our 2013 and 2014 EPS estimates of \$1.72 and \$1.83, respectively.

**Valuation.** Our price target of \$33.00 (unchanged) is based on a forward P/E of 18x applied to the forward EPS, which includes approximately \$1.00/share of value for the Waneta Dam expansion that is expected to contribute to earnings in 2015.

## Target/Upside/Downside Scenarios

Exhibit 1: Fortis Inc.

Source: RBC Capital Markets estimates

### Target Price/ Base Case

Our \$33.00 price target is based on a forward P/E of 18x applied to the forward EPS, which includes approximately \$1.00/share of value for the Waneta Dam expansion that is expected to contribute to earnings in 2015.

### Upside Scenario

For our upside scenario of \$36.00, we assume that P/E valuations fully reflect the level of long-term interest rates, which we see as providing roughly 1.5x upside in the P/E multiple.

### Downside Scenario

For our downside scenario of \$29.00, we assume a 100 basis point increase in interest rates, which we believe could translate into an almost 2.5x downside in the P/E multiple.

## Investment Thesis

We expect Fortis' shares to perform in line with other Energy Infrastructure companies in our coverage universe for the following reasons:

**Shares Appear Fairly Valued in Light of Regulatory Headwinds.** While we like the existing asset base, and in particular the growth in the western Canadian utilities, the shares appear to be fairly valued, particularly in light of the regulatory headwinds and downward pressure on ROEs (as we saw with the B.C. generic cost of capital decision).

**Good Defensive Investment Although Market Sentiment Has Shifted Away from Ultra-Defensiveness.** We believe Fortis' utility assets provide a good combination of equity market, credit market, and economic defensiveness. The company has the highest percentage of earnings derived from Canadian regulated utility assets, which should provide strong returns in uncertain markets. However, we note that investor preferences have largely shifted away from the ultra-defensive regulated utility names toward stocks with higher growth, albeit with moderately higher risk profiles.

## Q2/13 Results Modestly Below Expectations

Fortis' Q2/13 normalized EPS was \$0.27 compared to our estimate of \$0.29 and \$0.33 in Q2/12. Consensus for the quarter was \$0.32 (seven estimates with a range of \$0.29 to \$0.35). Reported EPS was \$0.28 and included a \$32 million (\$0.17/share) of acquisition-related expenses and customer benefits offered to obtain regulatory approval of CH Energy, \$25 million (\$0.13/share) favourable income tax recovery due to the enactment of higher deductions associated with Part VI.1 tax, a \$5 million (\$0.03/share) tax provision reversal from a prior period and a \$3 million foreign exchange gain (\$0.02/share). Overall, the Canadian Regulated segment was in line with expectations and all of the unregulated segments were within +/- \$1 million of our forecast.

A summary of our normalized earnings is detailed in Exhibit 2.

## Highlights of the Quarter and Outlook

- Phase 2 of B.C.'s Generic Cost of Capital Decision Is Under Way.** In May, as part of its generic cost of capital review, the British Columbia Utilities Commission (BCUC) reduced the return on equity for FortisBC Energy to 8.75% (from 9.50%) effective January 1, 2013. The ROE component of the decision also applies to Fortis' other utilities in the province including FortisBC Inc., FortisBC Energy (Vancouver Island), and FortisBC Energy (Whistler). The BCUC is currently in the second phase of its review, whereby it will determine the appropriate risk premiums and capital structures for these other utilities.
- CH Energy Acquisition Closed; No Material Contribution to EPS Expected Until 2015.** On June 27, 2013, Fortis closed the acquisition of CH Energy for approximately US\$1.5 billion, including the assumption of US\$518 million of debt. In order to obtain regulatory approval of the acquisition, Fortis committed to provide CH Energy customers with approximately US\$50 million in financial benefits (of which US\$40 million were

recognized in Q2/13). Fortis agreed to a rate freeze through to June 30, 2015, which is a contributing factor to management's guidance that the acquisition is not expected to be accretive to EPS until 2015.

- **Waneta Dam Expansion Continues to Make Good Progress.** Management indicated that the project is still on-schedule and on-budget. Since construction started in late 2010, the company has invested approximately \$513 million into the \$900 million Waneta Expansion, a 335 MW hydro project in B.C. that is expected to be in service in the spring of 2015.

## Estimates Remain Unchanged

We remain comfortable with our 2013 and 2014 EPS estimates of \$1.72 and \$1.83, respectively. We note that we have made changes within the business segments. Our financial forecast is set out in Exhibit 3.

Exhibit 3: Financial Forecast (In \$MM except per share figures)

Source: Company reports; RBC Capital Markets estimates

## **Valuation**

Our price target of \$33.00 is based on a forward P/E of 18x our 2014E EPS (adjusted for the estimated capitalized interest related to the Waneta expansion), which includes approximately \$1.00/share of value for the Waneta Dam expansion that is expected to contribute to earnings in 2015.

## **Price Target Impediments**

The political environment in Belize, the risk of punitive regulatory decisions, economic/tourism conditions in its service territories, operational or financial issues at newly acquired businesses, and acquisitions or projects that fail to gain the confidence of investors may have implications for our price target.

## **Company Description**

Fortis Inc. is a utility holding company for Newfoundland Power, FortisAlberta, FortisBC, Terasen Inc., Maritime Electric, Canadian Niagara Power, Cornwall Electric, BECOL, CH Energy and two electric utilities in the Turks and Caicos. It also holds a 100% interest in Fortis Properties and a 59.5% interest in Caribbean Utilities.

## Required Disclosures

### Non-U.S. Analyst Disclosure

Kelsey Roste and Michelle Zuliani (i) are not registered/qualified as research analysts with the NYSE and/or FINRA and (ii) may not be associated persons of the RBC Capital Markets, LLC and therefore may not be subject to FINRA Rule 2711 and NYSE Rule 472 restrictions on communications with a subject company, public appearances and trading securities held by a research analyst account.

### Conflicts Disclosures

The analyst(s) responsible for preparing this research report received compensation that is based upon various factors, including total revenues of the member companies of RBC Capital Markets and its affiliates, a portion of which are or have been generated by investment banking activities of the member companies of RBC Capital Markets and its affiliates.

A member company of RBC Capital Markets or one of its affiliates managed or co-managed a public offering of securities for Fortis Inc. in the past 12 months.

A member company of RBC Capital Markets or one of its affiliates received compensation for investment banking services from Fortis Inc. in the past 12 months.

A member company of RBC Capital Markets or one of its affiliates expects to receive or intends to seek compensation for investment banking services from Fortis Inc. in the next three months.

Royal Bank of Canada, together with its affiliates, beneficially owns 1 percent or more of a class of common equity securities of Fortis Inc..

A member company of RBC Capital Markets or one of its affiliates received compensation for products or services other than investment banking services from Fortis Inc. during the past 12 months. During this time, a member company of RBC Capital Markets or one of its affiliates provided non-investment banking securities-related services to Fortis Inc..

A member company of RBC Capital Markets or one of its affiliates received compensation for products or services other than investment banking services from Fortis Inc. during the past 12 months. During this time, a member company of RBC Capital Markets or one of its affiliates provided non-securities services to Fortis Inc..

RBC Capital Markets has provided Fortis Inc. with non-investment banking securities-related services in the past 12 months.

RBC Capital Markets has provided Fortis Inc. with non-securities services in the past 12 months.

The author is employed by RBC Dominion Securities Inc., a securities broker-dealer with principal offices located in Toronto, Canada.

## Explanation of RBC Capital Markets Equity Rating System

An analyst's 'sector' is the universe of companies for which the analyst provides research coverage. Accordingly, the rating assigned to a particular stock represents solely the analyst's view of how that stock will perform over the next 12 months relative to the analyst's sector average. Although RBC Capital Markets' ratings of Top Pick (TP)/Outperform (O), Sector Perform (SP), and Underperform (U) most closely correspond to Buy, Hold/Neutral and Sell, respectively, the meanings are not the same because our ratings are determined on a relative basis.

## Ratings

**Top Pick (TP):** Represents analyst's best idea in the sector; expected to provide significant absolute total return over 12 months with a favorable risk-reward ratio.

**Outperform (O):** Expected to materially outperform sector average over 12 months.

**Sector Perform (SP):** Returns expected to be in line with sector average over 12 months.

**Underperform (U):** Returns expected to be materially below sector average over 12 months.

## Risk Rating

As of March 31, 2013, RBC Capital Markets suspends its Average and Above Average risk ratings. The **Speculative** risk rating reflects a security's lower level of financial or operating predictability, illiquid share trading volumes, high balance sheet leverage, or limited operating history that result in a higher expectation of financial and/or stock price volatility.

## Distribution of Ratings

For the purpose of ratings distributions, regulatory rules require member firms to assign ratings to one of three rating categories - Buy, Hold/Neutral, or Sell - regardless of a firm's own rating categories. Although RBC Capital Markets' ratings of Top Pick(TP)/ Outperform (O), Sector Perform (SP), and Underperform (U) most closely correspond to Buy, Hold/Neutral and Sell, respectively, the meanings are not the same because our ratings are determined on a relative basis (as described above).

Distribution of Ratings RBC Capital Markets, Equity Research				
Rating	Count	Percent	Investment Banking Serv./Past 12 Mos.	
			Count	Percent
BUY[TP/O]	762	51.07	276	36.22
HOLD[SP]	646	43.30	159	24.61
SELL[U]	84	5.63	12	14.29

References to a Recommended List in the recommendation history chart may include one or more recommended lists or model portfolios maintained by a business unit of the Wealth Management Division of RBC Capital Markets, LLC. These Recommended Lists include a former list called the Prime Opportunity List (RL 3), the Guided Portfolio: Prime Income (RL 6), the Guided Portfolio: Large Cap (RL 7), Guided Portfolio: Dividend Growth (RL 8), the Guided Portfolio: Midcap 111 (RL9), and the Guided Portfolio: ADR (RL 10). The abbreviation 'RL On' means the date a security was placed on a Recommended List. The abbreviation 'RL Off' means the date a security was removed from a Recommended List.

## Conflicts Policy

RBC Capital Markets Policy for Managing Conflicts of Interest in Relation to Investment Research is available from us on request. To access our current policy, clients should refer to

<https://www.rbccm.com/global/file-414164.pdf>

or send a request to RBC Capital Markets Research Publishing, P.O. Box 50, 200 Bay Street, Royal Bank Plaza, 29th Floor, South Tower, Toronto, Ontario M5J 2W7. We reserve the right to amend or supplement this policy at any time.

## Dissemination of Research and Short-Term Trade Ideas

RBC Capital Markets endeavors to make all reasonable efforts to provide research simultaneously to all eligible clients, having regard to local time zones in overseas jurisdictions. RBC Capital Markets' research is posted to our proprietary websites to ensure eligible clients receive coverage initiations and changes in ratings, targets and opinions in a timely manner. Additional distribution may be done by the sales personnel via email, fax or regular mail. Clients may also receive our research via third-party vendors. Please contact your investment advisor or institutional salesperson for more information regarding RBC Capital Markets' research. RBC Capital Markets also provides eligible clients with access to SPARC on its proprietary INSIGHT website. SPARC contains market color and commentary, and may also contain Short-Term Trade Ideas regarding the securities of subject companies discussed in this or other research reports. SPARC may be accessed via the following hyperlink: <https://www.rbcinsight.com>. A Short-Term Trade Idea reflects the research analyst's directional view regarding the price of the security of a subject company in the coming days or weeks, based on market and trading events. A Short-Term Trade Idea may differ from the price targets and/or recommendations in our published research reports reflecting the research analyst's views of the longer-term (one year) prospects of the subject company, as a result of the differing time horizons, methodologies and/or other factors. Thus, it is possible that the security of a subject company that is considered a long-term 'Sector Perform' or even an 'Underperform' might be a short-term buying opportunity as a result of temporary selling pressure in the market; conversely, the security of a subject company that is rated a long-term 'Outperform' could be considered susceptible to a short-term downward price correction. Short-Term Trade Ideas are not ratings, nor are they part of any ratings system, and RBC Capital Markets generally does not intend, nor undertakes any obligation, to maintain or update Short-Term Trade Ideas. Short-Term Trade Ideas discussed in SPARC may not be suitable for all investors and have not been tailored to individual investor circumstances and objectives, and investors should make their own independent decisions regarding any Short-Term Trade Ideas discussed therein.

## Analyst Certification

## Fortis Inc. (FTS): Normalized Q3/13 Results Below Expectations

Sentiment Indicator : neutral

Posted by Robert Kwan on Friday, November 01 2013, 7:24 AM ET

### Details

- Q3/13 normalized EPS was \$0.24 compared to our estimate of \$0.29 and \$0.24 in Q3/12. Consensus for the quarter was \$0.27 (six estimates with a range of \$0.24 to \$0.29). The variance was primarily due to lower-than-forecast results from FortisBC Energy and a higher-than-expected share count.
- With the exception of FortisBC Energy, all of the North American regulated utility segments were close to our forecast. FortisBC Energy's results were worse than expected with a loss of \$14 million compared to our estimate of a loss of \$7 million and a loss of \$6 million in Q3/12. Given the tight cost-of-service nature of the gas utility, we will look to management for colour as to whether this was a quarterly timing difference and/or a change in the underlying earnings trend.
- Management continues to expect capital spending through 2017 of \$6 billion, with the majority of that spending directed towards the lower-risk North American regulated utilities.
- The company does not hold a quarterly conference call.

### Our Take: Slightly Negative

We believe that the modestly lower-than-expected results may slightly weigh on the share price today.

## Fortis Inc.

### Soft Q3/13 Results Although No Major Implications for the Future

**Our View:** Neutral - While the Q3/13 results fell short of expectations (our's and consensus), our discussion with management leaves us with the impression that there are no material changes to the underlying business prospects.

#### Key Points:

**Q3/13 Results Below Expectations.** Normalized EPS in Q3/13 was \$0.24 compared to our estimate of \$0.29 and \$0.24 in Q3/12. The major drivers behind the variance to our estimate were lower-than-expected earnings at FortisBC Energy (higher costs) and higher shares outstanding. This was the first quarter that Fortis reported results from CH Energy and earnings were in line with expectations.

**Organic Mid-Single Digit EPS Growth Plus Upside From Acquisitions.** We continue to expect the core North American regulated utility business to be the major driver behind EPS growth, and management re-affirmed its expectation that capital spending for the company through 2017 is expected to total \$6 billion (with the majority directed towards the regulated utilities). We expect acquisitions to continue to be part of the growth story with the focus on North American regulated utility businesses.

**Waneta Dam Remains On-Budget.** Construction of the \$900 million Waneta hydro project in B.C. remains on-time and on-budget and the company expects the 335 MW facility to be completed in the spring of 2015. Fortis has a 51% ownership interest in the Waneta expansion.

**A Steady Stream of Regulatory Decisions.** Major regulatory processes that we are watching include the Alberta Utilities Commission (AUC) ruling on the capital tracker under performance-based rates (likely Q4/13), the British Columbia Utilities Commission (BCUC) process to determine the ROEs and capital structures for the smaller utilities in B.C. (likely H1/14), and the AUC's generic cost of capital proceeding that may result in the re-implementation of an ROE formula in Alberta (hearings to start in early 2014).

**Minor Reductions to Estimates.** We have reduced our 2013-2015 EPS estimates to \$1.67, \$1.81 and \$1.94, respectively (down from \$1.72, \$1.83 and \$1.96, respectively). The primary driver behind the slight reduction in our EPS estimates is lower forecast earnings from FortisBC Energy and the utilities in the Caribbean.

**Valuation: Increasing Price Target to \$35.00 (up from \$33.00).** Based on a roll-forward of our valuation using our 2015 EPS estimate, we have increased our price target to \$35.00, which continues to be based on an 18x forward P/E multiple.

## Target/Upside/Downside Scenarios

Exhibit 1: Fortis Inc.

Source: RBC Capital Markets estimates

### Target Price/ Base Case

Our \$35.00 price target is based on a P/E of 18x applied to the forward EPS. An 18x multiple is consistent with the regulated utility peer group.

### Upside Scenario

For our upside scenario of \$38.00, we assume that P/E valuations fully reflect the level of long-term interest rates, which we see as providing roughly 1.5x upside in the P/E multiple.

### Downside Scenario

For our downside scenario of \$29.00, we assume a 100 basis point increase in interest rates, which we believe could translate into an almost 3x downside in the P/E multiple.

## Investment Summary

We expect Fortis' shares to perform in line with other Energy Infrastructure companies in our coverage universe for the following reasons:

**Shares Appear Fairly Valued.** While we like the existing asset base, and in particular the growth in the western Canadian utilities, the shares appear to be fairly valued. While we expect the company to continue its long-standing trend of regular annual dividend growth, modest EPS growth is likely to limit annual dividend growth in the mid-single digits. In general, we see the market gravitating to stocks with dividend growth (or at least underlying earnings/cash flow growth closer to 10%).

**Good Defensive Investment Although Market Sentiment Has Shifted Away from Ultra-Defensiveness.** We believe Fortis' utility assets provide a good combination of equity market, credit market, and economic defensiveness. The company has the highest percentage of earnings derived from Canadian regulated utility assets, which should provide strong returns in uncertain markets. However, we note that investor preferences have largely shifted away from the ultra-defensive regulated utility names toward stocks with higher growth, albeit with moderately higher risk profiles.

**Potential Catalysts:** an Alberta Utilities Commission decision that allows for 100% recovery of capital under the PBR framework; a North American utility acquisition with immediate and meaningful EPS accretion; and a materially higher-than-expected increase in the annual dividend.

**Key Risks:** the risk of punitive regulatory or government decisions, economic/tourism conditions in its service territories, operational or financial issues at newly acquired businesses, and acquisitions or projects that fail to gain the confidence of investors.

## Q3/13 Results Modestly Below Expectations

Normalized EPS in Q3/13 was \$0.24 compared to our estimate of \$0.29 and \$0.24 in Q3/12. The major drivers behind the variance to our estimate were lower-than-expected earnings at FortisBC Energy (higher costs) and higher shares outstanding. Consensus for the quarter was \$0.27 (six estimates with a range of \$0.24 to \$0.29). With the exception of FortisBC Energy, all of the North American regulated utility segments were close to our forecast.

A summary of our normalized earnings is detailed in Exhibit 2.

## Highlights of the Quarter and Outlook

- Alberta PBR Framework and Generic Cost of Capital Proceeding Update.** In March 2013, the AUC set rates on an interim basis, allowing 60% of the recovery of the revenue requirement (\$14.5 million of the \$24 million) associated with the 2013 Capital Tracker application, leaving approximately \$9.5 million subject to approval. Management indicated that it expects the finalization of rates by the end of November.
- Phase 2 of B.C.'s Generic Cost of Capital Decision is Underway.** In May, as part of its generic cost of capital review, the British Columbia Utilities Commission (BCUC) reduced the return on equity for FortisBC Energy to 8.75% (from 9.50%) effective January 1, 2013. The ROE component of the decision also applies to Fortis' other utilities in the province including FortisBC Inc., FortisBC Energy (Vancouver Island), and FortisBC Energy (Whistler). The BCUC is currently in the second phase of its review, whereby it will determine the appropriate risk premiums and capital structures for these other utilities. A decision on the proceeding is expected in the first half of 2014.
- Waneta Dam Expansion Continues to Make Good Progress.** Management indicated that the project is still on-schedule and on-budget. Since construction started in late

2010, the company has invested approximately \$534 million into the \$900 million Waneta Expansion, a 335 MW hydro project in B.C. that is expected to be in service in the spring of 2015. Fortis has a 51% interest in the project.

## Reducing Estimates to Reflect Q3/13 Results

We are reducing our 2013 EPS estimate to \$1.67 (down from \$1.72) to primarily reflect the 'miss' this quarter. Also, we are reducing our 2014 and 2015 EPS estimates to \$1.81 and \$1.94, respectively (down from \$1.83 and \$1.96, respectively) to reflect modestly higher costs for FortisBC Energy and a slower recovery for the utilities in the Caribbean. Our financial forecast is set out in Exhibit 3.

Source: Company reports; RBC Capital Markets estimates

## **Valuation**

Our price target of \$35.00 is based on a forward P/E of 18x our 2015E EPS. An 18x multiple is consistent with the regulated utility peer group.

## **Price Target Impediments**

The risk of punitive regulatory or government decisions, economic/tourism conditions in its service territories, operational or financial issues at newly acquired businesses, and acquisitions or projects that fail to gain the confidence of investors may have implications for our price target.

## **Company Description**

Fortis Inc. is a utility holding company for Newfoundland Power, FortisAlberta, FortisBC, Terasen Inc., Maritime Electric, Canadian Niagara Power, Cornwall Electric, BECOL, CH Energy and two electric utilities in the Turks and Caicos. It also holds a 100% interest in Fortis Properties and a 59.5% interest in Caribbean Utilities.

## Required Disclosures

### Non-U.S. Analyst Disclosure

Kelsey Roste (i) is not registered/qualified as a research analyst with the NYSE and/or FINRA and (ii) may not be associated persons of the RBC Capital Markets, LLC and therefore may not be subject to FINRA Rule 2711 and NYSE Rule 472 restrictions on communications with a subject company, public appearances and trading securities held by a research analyst account.

### Conflicts Disclosures

The analyst(s) responsible for preparing this research report received compensation that is based upon various factors, including total revenues of the member companies of RBC Capital Markets and its affiliates, a portion of which are or have been generated by investment banking activities of the member companies of RBC Capital Markets and its affiliates.

Please note that current conflicts disclosures may differ from those as of the publication date on, and as set forth in, this report. ### Explanation of RBC Capital Markets Equity Rating System

An analyst's 'sector' is the universe of companies for which the analyst provides research coverage. Accordingly, the rating assigned to a particular stock represents solely the analyst's view of how that stock will perform over the next 12 months relative to the analyst's sector average. Although RBC Capital Markets' ratings of Top Pick (TP)/Outperform (O), Sector Perform (SP), and Underperform (U) most closely correspond to Buy, Hold/Neutral and Sell, respectively, the meanings are not the same because our ratings are determined on a relative basis.

#### Ratings

**Top Pick (TP):** Represents analyst's best idea in the sector; expected to provide significant absolute total return over 12 months with a favorable risk-reward ratio.

**Outperform (O):** Expected to materially outperform sector average over 12 months.

**Sector Perform (SP):** Returns expected to be in line with sector average over 12 months.

**Underperform (U):** Returns expected to be materially below sector average over 12 months.

## Risk Rating

As of March 31, 2013, RBC Capital Markets suspends its Average and Above Average risk ratings. The **Speculative** risk rating reflects a security's lower level of financial or operating predictability, illiquid share trading volumes, high balance sheet leverage, or limited operating history that result in a higher expectation of financial and/or stock price volatility.

## Distribution of Ratings

For the purpose of ratings distributions, regulatory rules require member firms to assign ratings to one of three rating categories - Buy, Hold/Neutral, or Sell - regardless of a firm's own rating categories. Although RBC Capital Markets' ratings of Top Pick(TP)/Outperform (O), Sector Perform (SP), and Underperform (U) most closely correspond to Buy, Hold/Neutral and Sell, respectively, the meanings are not the same because our ratings are determined on a relative basis (as described above).

Distribution of Ratings RBC Capital Markets, Equity Research As of 30-Sep-2013				
Rating	Count	Percent	Investment Banking Serv./Past 12 Mos.	
			Count	Percent
BUY [Top Pick & Outperform]	769	51.00	271	35.24
HOLD [Sector Perform]	656	43.50	179	27.29
SELL [Underperform]	83	5.50	13	15.66

References to a Recommended List in the recommendation history chart may include one or more recommended lists or model portfolios maintained by RBC Wealth Management or one of its affiliates. RBC Wealth Management recommended lists include a former list called the Prime Opportunity List (RL 3), the Guided Portfolio: Prime Income (RL 6), the Guided Portfolio: Large Cap (RL 7), the Guided Portfolio: Dividend Growth (RL 8), the Guided Portfolio: Midcap 111 (RL 9), the Guided Portfolio: ADR (RL 10), and the Guided Portfolio: Global Equity (U.S.) (RL 11). RBC Capital Markets recommended lists include the Strategy Focus List and the Fundamental Equity Weightings (FEW) portfolios. The abbreviation 'RL On' means the date a security was placed on a Recommended List. The abbreviation 'RL Off' means the date a security was removed from a Recommended List.

## Equity Valuation and Risks

For valuation methods used to determine, and risks that may impede achievement of, price targets for covered companies, please see the most recent company-specific research report at <https://www.rbcinsight.com> or send a request to RBC Capital Markets Research Publishing, P.O. Box 50, 200 Bay Street, Royal Bank Plaza, 29th Floor, South Tower, Toronto, Ontario M5J 2W7.

## Conflicts Policy

RBC Capital Markets Policy for Managing Conflicts of Interest in Relation to Investment Research is available from us on request. To access our current policy, clients should refer to

or send a request to RBC Capital Markets Research Publishing, P.O. Box 50, 200 Bay Street, Royal Bank Plaza, 29th Floor, South Tower, Toronto, Ontario M5J 2W7. We reserve the right to amend or supplement this policy at any time.

## Dissemination of Research and Short-Term Trade Ideas

RBC Capital Markets endeavors to make all reasonable efforts to provide research simultaneously to all eligible clients, having regard to local time zones in overseas jurisdictions. RBC Capital Markets' research is posted to our proprietary websites to ensure eligible clients receive coverage initiations and changes in ratings, targets and opinions in a timely manner. Additional distribution may be done by the sales personnel via email, fax or regular mail. Clients may also receive our research via third-party vendors. Please contact your investment advisor or institutional salesperson for more information regarding RBC Capital Markets' research. RBC Capital Markets also provides eligible clients with access to SPARC on its proprietary INSIGHT website. SPARC contains market color and commentary, and may also contain Short-Term Trade Ideas regarding the securities of subject companies discussed in this or other research reports. SPARC may be accessed via the following hyperlink: <https://www.rbcinsight.com>. A Short-Term Trade Idea reflects the research analyst's directional view regarding the price of the security of a subject company in the coming days or weeks, based on market and trading events. A Short-Term Trade Idea may differ from the price targets and/or recommendations in our published research reports reflecting the research analyst's views of the longer-term (one year) prospects of the subject company, as a result of the differing time horizons, methodologies and/or other factors. Thus, it is possible that the security of a subject company that is considered a long-term 'Sector Perform' or even an 'Underperform' might be a short-term buying opportunity as a result of temporary selling pressure in the market; conversely, the security of a subject company that is rated a long-term 'Outperform' could be considered susceptible to a short-term downward price correction. Short-Term Trade Ideas are not ratings, nor are they part of any ratings system, and RBC Capital Markets generally does not intend, nor undertakes any obligation, to maintain or update Short-Term Trade Ideas. Short-Term Trade Ideas discussed in SPARC may not be suitable for all investors and have not been tailored to individual investor circumstances and objectives, and investors should make their own independent decisions regarding any Short-Term Trade Ideas discussed therein.

## Fortis (FTS): Dividend Increase In Line With Expectations

**Sentiment Indicator :** neutral

Posted by Robert Kwan on Monday, December 09 2013, 10:20 AM ET

### Details:

- FTS declared a common share dividend of \$0.32 per share for Q1/14 payable on March 1, 2014 to common shareholders of record at the close of business on February 14, 2014.
- The quarterly dividend of \$0.32 (up from \$0.31) represents approximately a 3.2% increase.
- The new annualized dividend of \$1.28/share is in line with our estimate.

### Our Take: Neutral

The timing and magnitude of the increase was in line with our expectations; as such, we do not believe the dividend increase will have a material impact on the stock price.

## Fortis Inc.

### Stepping into the Southwest

**Our view:** Modestly positive - We view the pending acquisition of UNS as a positive development for the share price due to: (1) EPS accretion, (2) projected accretion to Fortis' underlying growth rate, and (3) diversification of regulatory exposure.

#### Key points:

**Moving into Arizona.** Recently, Fortis agreed to acquire UNS Energy, which owns electric & gas utilities in Arizona, for US\$2.5 billion plus the assumption of roughly US\$1.8 billion in debt. The acquisition is subject to UNS shareholder approval and customary regulatory approvals including the Arizona Corporation Commission (ACC), and is expected to close by the end of 2014.

**Accretive to EPS.** Fortis stated that it expects the transaction to be accretive in the first full-year excluding one-time transaction costs. Based on our analysis (please see Exhibit 2), we estimate that the acquisition could be \$0.08 accretive to EPS in 2015. As such, we have increased our 2015 EPS estimate to \$2.02 (up from \$1.94).

**Expected accretion to Fortis' long-term growth rate.** The company expects UNS' rate base to reach US\$3 billion by 2015 and grow at a 7% CAGR through 2018. While Fortis also expects its own rate base (ex-UNS) to grow at a 7% CAGR through 2018, we note that growth is front-end loaded due to the Waneta expansion and from 2015-2018, rate base is forecast to grow at closer to 5%. As such, it appears that the acquisition of UNS is likely to be accretive to Fortis' long-term growth rate. Further, there is potential EPS upside in the range of \$0.06/share if Fortis can increase the regulated equity component for Tucson Electric, the largest of UNS' utilities, from 43.5% to 50% (or higher), which would be in line with UNS' other two utilities.

**Financed in essence via a common equity issuance.** Concurrent with the announced acquisition, Fortis issued \$1.8 billion of convertible unsecured subordinated debentures. Although the form of the issuance is a convertible debenture, effectively the security addresses the shortcomings of the common equity subscription receipts that were used as part of the CH Energy acquisition (i.e., these converts will pay cash quarterly approximating the underlying common dividend; dividends are paid even if the deal does not go through).

**Valuation.** While we believe that the acquisition will likely be accretive value in the medium to longer-term, we expect the market to take a wait-and-see approach to the integration of UNS and the ultimate impact on earnings. As such, we remain comfortable with our \$35.00/share price target and have left it unchanged.

## Target/Upside/Downside Scenarios

Exhibit 1: Fortis Inc.

Source: RBC Capital Markets estimates

### Target price/ base case

Our \$35.00 price target is based on a P/E of 17x applied to the forward EPS. A 17x multiple is consistent with the regulated utility peer group.

### Upside scenario

For our upside scenario of \$38.00, we assume that P/E valuations fully reflect the level of long-term interest rates, which we see as providing roughly 1.5x upside in the P/E multiple.

### Downside scenario

For our downside scenario of \$29.00, we assume a 100 basis point increase in interest rates, which we believe could translate into an almost 3x downside in the P/E multiple.

## Investment summary

We expect Fortis' shares to perform in line with other Energy Infrastructure companies in our coverage universe for the following reasons:

**Shares appear fairly valued.** While we like the existing asset base, and in particular the growth in the western Canadian utilities, the shares appear to be fairly valued. While we expect the company to continue its long-standing trend of regular annual dividend growth, modest EPS growth is likely to limit annual dividend growth in the mid-single digits. In general, we see the market gravitating to stocks with dividend growth (or at least underlying earnings/cash flow growth closer to 10%).

**Good defensive investment although market sentiment has shifted away from ultra-defensiveness.** We believe Fortis' utility assets provide a good combination of equity market, credit market, and economic defensiveness. The company has the highest percentage of earnings derived from Canadian regulated utility assets, which should provide strong returns in uncertain markets. However, we note that investor preferences have largely shifted away from the ultra-defensive regulated utility names toward stocks with higher growth, albeit with moderately higher risk profiles.

**Potential catalysts:** UNS shareholder approval of the transaction; news that provides a line of sight with respect to ACC approval of the UNS acquisition; and a materially higher-than-expected increase in the annual dividend.

**Key risks:** the risk of punitive regulatory or government decisions, economic/tourism conditions in its service territories, operational or financial issues at newly acquired businesses, and acquisitions or projects that fail to gain the confidence of investors.

### 3 things that you should know about the UNS deal

Based on our conversations to date, the top three topics that we have been asked about have focused on: (1) the financial impact and the strategic nature of the acquisition; (2) the risk to the deal closing given the CH Energy experience; and (3) the rationale for using the convertible security.

#### **UNS expected to be financially accretive while providing a platform for growth**

We believe that the UNS acquisition is a positive development for the stock given a forecast for immediate EPS accretion (we estimate \$0.08 per share in 2015—please refer to Exhibit 2), but more importantly (at least to us) is the expectation that UNS will be accretive to Fortis' medium to long-term growth rate. Specifically, UNS' rate base is forecast to grow at a 7% CAGR from 2015-2018 compared to approximately 5% for Fortis (pre-UNS) over that same time period. Another potential for earnings upside would be moving the equity component for Tucson Electric Power, the largest of the three utilities owned by UNS, in line with the other two utilities (i.e., north of 50%). A lift from the current 43.5% to 50% has the potential to almost double the estimated EPS accretion from the deal by adding about \$0.06/share to earnings. Furthermore, management sees a number of potential utility acquisition targets in the U.S. west, which could add to EPS growth.

#### **Regulatory approval should be smoother than it was for CH Energy**

The key regulatory approval will be the Arizona Corporation Commission (ACC). In general, Fortis' approach to managing utilities by affording significant autonomy and retaining local management is generally viewed positively from a regulatory and political perspective. We believe that the ACC will favourably view Fortis' main business being the operation of electric and gas utilities, its well-demonstrated track record for being able to access capital and Fortis' stronger credit ratings (i.e., key aspects that the ACC felt were not met as part of its decision to reject the private equity takeover of UniSource in 2004).

The current regulatory schedule includes the potential for a settlement with commission staff and the Residential Utility Consumer Office (RUCO) with direct testimony being filed shortly, settlement discussions beginning in late April and a hearing commencing in mid-June. The schedule provides for the ability for the commission to consider the matter prior to the end of Q3/14.

The ACC has five elected commissioners, who are all Republican, with two commissioners' terms expiring in early 2015 with the other three (including the Chairman) expiring in early 2017.

The merger application can be found by [clicking here](#).

#### **We view the convert as a common equity subscription receipt in disguise**

When Fortis financed the CH Energy acquisition, it used a subscription receipt structure that had been commonly used by Canadian companies. The convert structure being used as part of the UNS acquisition addresses two key issues that many investors had with the subscription receipts that Fortis used for the CH Energy deal: (1) the convert pays a cash amount approximating the dividend during the regulatory review period (under the subscription receipt structure, dividends were accrued, but not paid, until closing); and (2) investors receive cash whether or not the deal closes (only nominal interest would be accrued and paid if the CH Energy acquisition did not close and we note that as the CH Energy process wore on, investors were increasingly worried that the New York regulator would deny the transaction).

In our view, the convert is basically an enhanced version of the common equity subscription receipt. While confusing to some, the “instalment receipt” structure is a sweetener in that the purchaser of the convert only has to put up one-third of the cash prior to closing, yet is paid an interest rate on the full amount (i.e., the cash on cash yield at the original purchase price was about triple the dividend yield on the common shares).

## Transaction metrics

**Purchase price.** Fortis entered into an agreement to acquire UNS Energy (NYSE: UNS; US\$59.69; not rated) for US\$60.25 per share in cash. The takeover offer is approximately a 31% premium to the close immediately prior to the announcement of the transaction.

**Premium to rate base looks expensive, but it is not meaningful.** Premium to rate base is a commonly cited metric for utility acquisitions and the UNS acquisition is pricey at 1.4x on this metric. However, this metric ignores earnings and cash flow dynamics that we believe acquirors, like Fortis, focus on as part of their acquisition analysis. Specifically, the ability to use preferred shares and modest amounts of additional debt, along with tax efficient structures result in expected earnings and cash flow accretion despite what appears to be a high multiple to rate base being paid. Further, growth at the utility being acquired helps “amortize” the premium over time.

**Multiple of earnings a bit more reasonable, but remember that Fortis will likely use a tax efficient structure along with a modest amount of double leverage to drive accretion.** Based on UNS management's previously published 2015 outlook, Fortis is paying about 17.5x earnings. While this is a modest premium to Fortis' multiple of our 2015 EPS estimate (i.e., about 15.5x), we view the valuation as reasonable with immediate EPS accretion ultimately being driven by tax efficiencies and a modest amount of double leverage. With UNS expected to grow faster than Fortis, we expect the EPS accretion to increase over time.

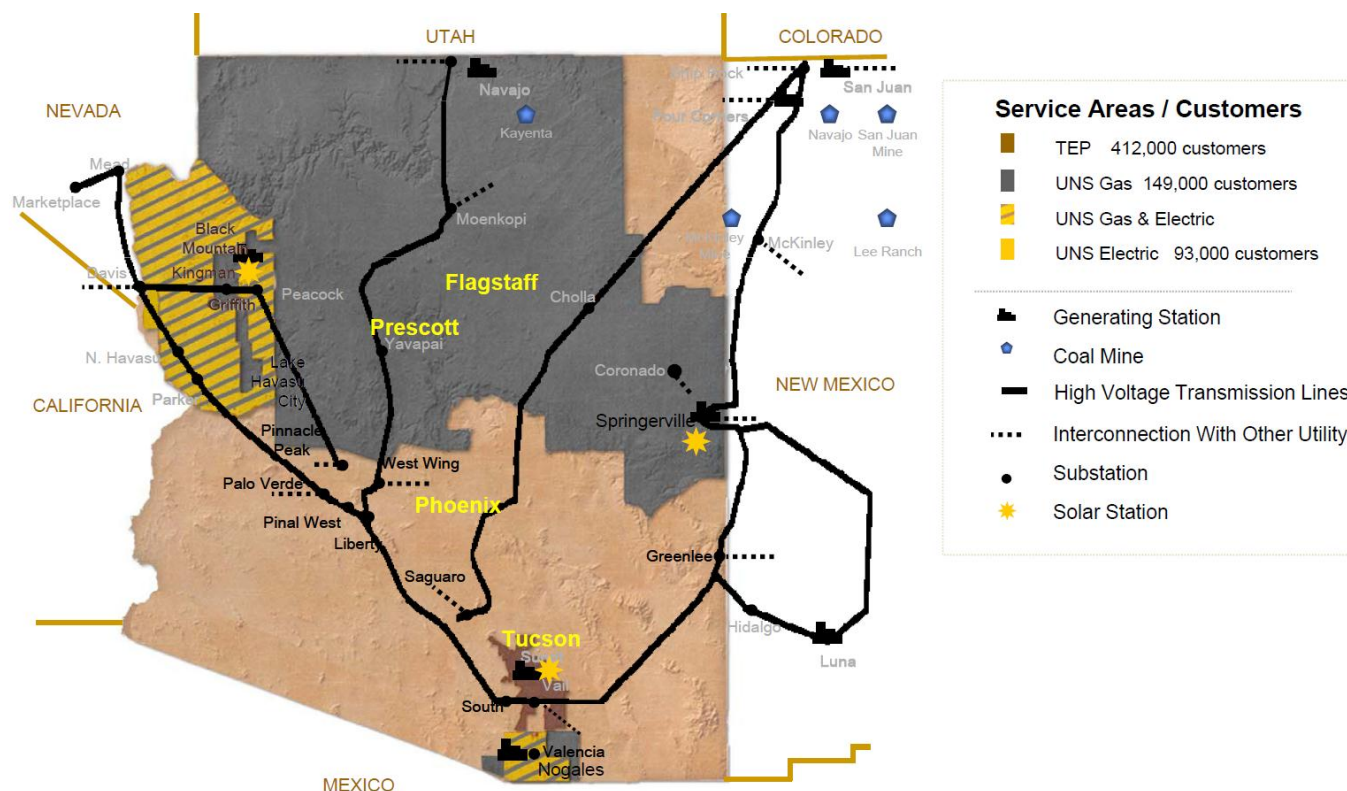

### Overview of UNS Energy

**Vertically integrated regulated utility in Arizona.** UNS Energy operates three regulated utilities: 1) Tucson Electric Power (TEP), 2) UNS Gas, and 3) UNS Electric, which combine to serve roughly 505,000 electric and 149,000 gas customers in Arizona. TEP comprises the majority of the assets (84% as at September 30, 2013) with a similar level of net income (85% year-to-date).

**Attractive organic growth outlook.** Capex for UNS over the next five years is expected to total US\$2.3 billion with rate base reaching US\$3 billion by 2015 and growing at an approximate 7% CAGR, which is fairly similar to the growth in UNS' net income over the past 10 years.

**Attractive capital structure and ROE compared to Fortis' Canadian utility assets.** The 2013 rate order for TEP, the largest of UNS' utilities, allows for a 10% ROE on a 43.5% equity component. For UNS Energy's two smaller utilities, UNS Electric and UNS Gas have current ROEs of 9.5% and 9.75%, respectively, based on an equity thickness of 52.6% and 50.8%, respectively (UNS Electric's cost of capital framework is embedded in a settlement agreement that is currently in front of the ACC). The cost of capital framework compares favourably to an 8.75% ROE in B.C. and Alberta on common equity components that are 41% or lower (depending on the utility).

Exhibit 3: Map of UNS' utility service areas

Source: Company reports

## Increasing estimates to reflect forecast EPS accretion

We have increased our 2015 EPS estimate to \$2.02 (up from \$1.94) to reflect the UNS acquisition, which is expected to close at the end of 2014. We remain comfortable with our 2013 and 2014 EPS estimates of \$1.67 and \$1.81, respectively. Our estimates ignore transaction costs and any mis-matches between the carrying costs of the convertible debentures versus the interest expense and tax savings associated with the converts until the transaction is completed.

Also, due to the forecast EPS accretion from the transaction combined with the anticipated commissioning of the Waneta hydro project, we have increased our forecast dividend for 2015 to \$1.36 (up from \$1.32). Our financial forecast is set out in Exhibit 4.

## **Valuation**

Our price target of \$35.00 is based on a forward P/E of 17x our 2015E EPS. A 17x multiple is consistent with the regulated utility peer group.

## **Price target impediments**

The risk of punitive regulatory or government decisions, economic/tourism conditions in its service territories, operational or financial issues at newly acquired businesses, and acquisitions or projects that fail to gain the confidence of investors may have implications for our price target.

## **Company description**

Fortis Inc. is a utility holding company for Newfoundland Power, FortisAlberta, FortisBC, Terasen Inc., Maritime Electric, Canadian Niagara Power, Cornwall Electric, BECOL, CH Energy and two electric utilities in the Turks and Caicos. It also holds a 100% interest in Fortis Properties and a 59.5% interest in Caribbean Utilities.

### Explanation of RBC Capital Markets Equity rating system

An analyst's 'sector' is the universe of companies for which the analyst provides research coverage. Accordingly, the rating assigned to a particular stock represents solely the analyst's view of how that stock will perform over the next 12 months relative to

the analyst's sector average. Although RBC Capital Markets' ratings of Top Pick (TP)/Outperform (O), Sector Perform (SP), and Underperform (U) most closely correspond to Buy, Hold/Neutral and Sell, respectively, the meanings are not the same because our ratings are determined on a relative basis.

## Ratings

**Top Pick (TP):** Represents analyst's best idea in the sector; expected to provide significant absolute total return over 12 months with a favorable risk-reward ratio.

**Outperform (O):** Expected to materially outperform sector average over 12 months.

**Sector Perform (SP):** Returns expected to be in line with sector average over 12 months.

**Underperform (U):** Returns expected to be materially below sector average over 12 months.

## Risk Rating

As of March 31, 2013, RBC Capital Markets suspends its Average and Above Average risk ratings. The **Speculative** risk rating reflects a security's lower level of financial or operating predictability, illiquid share trading volumes, high balance sheet leverage, or limited operating history that result in a higher expectation of financial and/or stock price volatility.

## Distribution of ratings

For the purpose of ratings distributions, regulatory rules require member firms to assign ratings to one of three rating categories - Buy, Hold/Neutral, or Sell - regardless of a firm's own rating categories. Although RBC Capital Markets' ratings of Top Pick(TP)/ Outperform (O), Sector Perform (SP), and Underperform (U) most closely correspond to Buy, Hold/Neutral and Sell, respectively, the meanings are not the same because our ratings are determined on a relative basis (as described below).

Distribution of ratings RBC Capital Markets, Equity Research As of 31-Dec-2013				
Rating	Count	Percent	Investment Banking Serv./Past 12 Mos.	
			Count	Percent
BUY [Top Pick & Outperform]	791	51.13	274	34.64
HOLD [Sector Perform]	666	43.05	179	26.88
SELL [Underperform]	90	5.82	14	15.56

References to a Recommended List in the recommendation history chart may include one or more recommended lists or model portfolios maintained by RBC Wealth Management or one of its affiliates. RBC Wealth Management recommended lists include

a former list called the Prime Opportunity List (RL 3), the Guided Portfolio: Prime Income (RL 6), the Guided Portfolio: Large Cap (RL 7), the Guided Portfolio: Dividend Growth (RL 8), the Guided Portfolio: Midcap 111 (RL 9), the Guided Portfolio: ADR (RL 10), and the Guided Portfolio: Global Equity (U.S.) (RL 11). RBC Capital Markets recommended lists include the Strategy Focus List and the Fundamental Equity Weightings (FEW) portfolios. The abbreviation 'RL On' means the date a security was placed on a Recommended List. The abbreviation 'RL Off' means the date a security was removed from a Recommended List.

## Equity valuation and risks

For valuation methods used to determine, and risks that may impede achievement of, price targets for covered companies, please see the most recent company-specific research report at <https://www.rbcinsight.com> or send a request to RBC Capital Markets Research Publishing, P.O. Box 50, 200 Bay Street, Royal Bank Plaza, 29th Floor, South Tower, Toronto, Ontario M5J 2W7.

## Conflicts policy

RBC Capital Markets Policy for Managing Conflicts of Interest in Relation to Investment Research is available from us on request. To access our current policy, clients should refer to

<https://www.rbccm.com/global/file-414164.pdf>

or send a request to RBC Capital Markets Research Publishing, P.O. Box 50, 200 Bay Street, Royal Bank Plaza, 29th Floor, South Tower, Toronto, Ontario M5J 2W7. We reserve the right to amend or supplement this policy at any time.

## Dissemination of research and short-term trade ideas

RBC Capital Markets endeavors to make all reasonable efforts to provide research simultaneously to all eligible clients, having regard to local time zones in overseas jurisdictions. RBC Capital Markets' research is posted to our proprietary websites to ensure eligible clients receive coverage initiations and changes in ratings, targets and opinions in a timely manner. Additional distribution may be done by the sales personnel via email, fax or regular mail. Clients may also receive our research via third-party vendors. Please contact your investment advisor or institutional salesperson for more information regarding RBC Capital Markets' research. RBC Capital Markets also provides eligible clients with access to SPARC on its proprietary INSIGHT website. SPARC contains market color and commentary, and may also contain Short-Term Trade Ideas regarding the securities of subject companies discussed in this or other research reports. SPARC may be accessed via the following hyperlink: <https://www.rbcinsight.com>. A Short-Term Trade Idea reflects the research analyst's directional view regarding the price of the security of a subject company in the coming days or weeks, based on market and trading events. A Short-Term Trade Idea may differ from the price targets and/or recommendations in our published research reports reflecting the research analyst's views of the longer-term (one year) prospects of the subject company, as a result of the differing time horizons, methodologies and/or other factors. Thus, it is possible that the security of a subject company that is considered a long-term 'Sector Perform' or even an 'Underperform' might be a short-term buying opportunity as a result of temporary selling pressure in the market; conversely, the security of a subject company that is rated a long-term 'Outperform' could be considered susceptible to a short-term downward price correction. Short-Term Trade Ideas are not ratings, nor are they part of any ratings system, and RBC Capital Markets generally does not intend, nor undertakes any obligation, to maintain or update Short-Term Trade Ideas. Short-Term Trade Ideas discussed in SPARC may not be suitable for all investors and have not been tailored to individual investor circumstances and objectives, and investors should make their own independent decisions regarding any Short-Term Trade Ideas discussed therein.

## Fortis (FTS): UNS regulatory approval timeline set

Sentiment Indicator : neutral

Posted by Robert Kwan on Monday, February 03 2014, 9:24 AM ET

### Details

- The Arizona Corporation Commission (ACC) issued a procedural order setting a schedule that is consistent with what was filed with the ACC by Fortis/UNS on January 23, 2014.
- The timeline has two potential tracks depending on whether a settlement agreement is reached. The two timelines are as follows:

#### • Settlement timeline

- Fortis/UNS testimony has already been filed
- April 22, 2014: ACC Staff/Intervenor testimony
- April 28, 2014: Settlement discussions begin
- May 12, 2014: Settlement agreement filed
- May 30, 2014: Testimony in support of/opposition to the settlement agreement
- June 13, 2014: Settlement agreement responsive testimony
- June 16, 2014: Administrative Law Judge (ALJ) hearing commences

#### No settlement timeline

- Fortis/UNS testimony has already been filed
- April 22, 2014: ACC Staff/Intervenor testimony
- May 7, 2014: Rebuttal testimony
- May 30, 2014: ACC Staff/Intervenor rebuttal testimony
- June 13, 2014: UNS Energy and Fortis rejoinder testimony
- June 16, 2014: ALJ hearing commences

As further detailed in our January 24th note (attached) summarizing our views on the UNS acquisition, we continue to expect a smoother regulatory approval process than what Fortis experienced for CH Energy and ultimately, we expect Fortis to be able to achieve approval from the ACC.

#### Our take: Neutral

Since the regulatory process timeline is similar to what was previously filed by Fortis/UNS (as part of a settlement with the ACC Staff and the Residential Utility Consumer Office), we do not expect the press release to materially impact the share price.

## Fortis Inc. (FTS): Q4/13 results slightly short of expectations

Sentiment Indicator : neutral

Posted by Robert Kwan on Thursday, February 06 2014, 7:42 AM ET

### Details

- Q4/13 headline EPS was \$0.47, although our initial pass through the results looks like normalized EPS is closer to \$0.48 after adjusting for tax losses related to Griffith (now divested) offset by an upward adjustment in Corporate costs (FX gain). This compares to our estimate of \$0.50 and \$0.47 in Q4/12. Consensus for the quarter was \$0.49 (six estimates with a range of \$0.46 to \$0.50).
- There was variation in a number of the segments with the major differences being FortisBC Energy (+\$6 million in earnings; timing of O&M) and FortisAlberta (-\$5 million; timing of O&M, lower transmission revenue).
- Management expects capital spending from 2014 to 2018 in excess of \$6.5 billion with a forecast for UNS capital spending of \$1.5 billion from 2015 through 2018.
- On dividends, we would note that there are some news service headlines that the dividend has been increased. However, this is not new (the dividend increase was originally announced in December 2013).
- The company does not hold a quarterly conference call.

### Our take: neutral

Despite results that were mildly short of consensus and our expectations, we do not expect the results to materially impact the share price.

## Fortis Inc.

### From one transition year to the next, but 2015 looks brighter

**Our view:** Neutral - Although Q4/13 results were mildly short of expectations, we believe that the market will continue to focus on the steps to close the UNS acquisition. While we see an inflection point for dividend and EPS growth ahead with expected stronger results in 2015, we expect the shares to be rangebound, likely until we get closer to the closing of the UNS transaction.

#### Key points:

**Q4/13 slightly short of expectations.** Normalized EPS in Q4/13 was \$0.48 compared to our estimate of \$0.50 and \$0.47 in Q4/12. There were a number of segment variances, although in aggregate we see no major implications for the run-rate of consolidated earnings.

**Transition years leading to an uplift in 2015.** In 2013, earnings were hurt by a negative cost-of-capital decision in British Columbia (utilities there contributed over half of 2013 earnings) while we expect actual earnings in 2014 to be depressed due to the negative carry associated with pre-financing the UNS deal (we estimate financing charges in the range of \$0.25/share would depress our \$1.81/share earnings estimate).

**UNS acquisition remains on track.** Based on the approved regulatory timeline that contemplates both a settlement and no-settlement track, an Administrative Law Judge hearing is expected to commence on June 16. If that timeline holds, there is the potential to have the merger application reviewed at the September commission hearing with a positive ruling possibly paving the way for an October close.

**Estimates unchanged.** We remain comfortable with our 2014 and 2015 EPS estimates of \$1.81 and \$2.02, respectively. We note that our 2014 EPS estimate excludes charges related to the pending UNS acquisition, including the negative cost of carry of the converts (including the interest expense would result in 2014E EPS of \$1.55).

**Time to be patient.** We expect the shares to be rangebound, likely until we get closer to the closing of the UNS transaction. As such, we believe that investors have time to be patient and pick attractive entry points based on any undue weakness in the stock. Overall, we believe that the UNS deal is a positive development due to the expected EPS accretion that we expect to result in acceleration of dividend growth, accretion to Fortis' long-term growth rate (as we see UNS growing faster than Fortis) and, to a lesser extent, regulatory diversification. For additional details on the UNS acquisition, [please click here](#).

**Valuation.** Our \$35.00 price target is based on a P/E of 17x applied to the 2015 EPS estimate. We note that a 17x multiple is consistent with the regulated utility peer group.

## Target/Upside/Downside Scenarios

Exhibit 1: Fortis Inc.

Source: Bloomberg and RBC Capital Markets estimates for Upside/Downside/Target

### Target price/ base case

Our \$35.00 price target is based on a P/E of 17x applied to the forward EPS. A 17x multiple is consistent with the regulated utility peer group.

### Upside scenario

For our upside scenario of \$38.00, we assume that P/E valuations fully reflect the level of long-term interest rates, which we see as providing roughly 1.5x upside in the P/E multiple.

### Downside scenario

For our downside scenario of \$27.00, we assume a 100 basis point increase in interest rates, which we believe could translate into an almost 3x downside in the P/E multiple in addition to the UNS acquisition not closing (i.e., foregone EPS accretion).

## Investment summary

We expect Fortis' shares to perform in line with other Energy Infrastructure companies in our coverage universe for the following reasons:

**Shares appear fairly valued.** While we like the existing asset base, and in particular the growth in the western Canadian utilities, the shares appear to be fairly valued. Although we expect the company to continue its long-standing trend of regular annual dividend growth, modest EPS growth is likely to limit annual dividend growth in the mid-single digits. In general, we see the market gravitating to stocks with dividend growth (or at least underlying earnings/cash flow growth) closer to 10%.

**Good defensive investment although market sentiment has shifted away from ultra-defensiveness.** We believe Fortis' utility assets provide a good combination of equity market, credit market, and economic defensiveness. The company has a high percentage of earnings derived from Canadian regulated utility assets, which should provide strong returns in uncertain markets. However, we note that investor preferences have largely shifted away from the ultra-defensive regulated utility names toward stocks with higher growth, albeit with moderately higher risk profiles.

**Potential catalysts:** UNS shareholder approval of the transaction; news that provides a line of sight with respect to ACC approval of the UNS acquisition; and a materially higher-than-expected increase in the annual dividend.

**Key risks:** rejection of the UNS deal, the risk of punitive regulatory or government decisions, economic/tourism conditions in its service territories, operational or financial issues at newly acquired businesses, and acquisitions or projects that fail to gain the confidence of investors.

## Q4/13 results mildly short of expectations

Normalized EPS in Q4/13 was \$0.48 compared to our estimate of \$0.50 and \$0.47 in Q4/12. There were a number of segment variances, although in aggregate we see no major implications for the run-rate of consolidated earnings.

A summary of our normalized earnings is detailed in Exhibit 2, which sets out each segment's results for the quarter and the year along with comments on selected drivers of the quarter and normalizations.

Exhibit 2: Normalized Earnings (In \$MM except per share figures)

Source: Company reports; RBC Capital Markets estimates

## Thoughts coming out of the quarter

- **Still early days, but the UNS acquisition continues to make progress.** Based on the approved regulatory timeline that contemplates both a settlement and no-settlement track, an Administrative Law Judge hearing is expected to commence on June 16. If that timeline holds, there is the potential to have the merger application reviewed at the September commission hearing with a positive ruling possibly paving the way for an October close. It appears that the approval process will not be as contentious as the CH Energy acquisition.
- **Weaker Canadian dollar will help earnings translation.** Pre-UNS, a \$0.10 move in the US\$/C\$ exchange rate is expected to impact EPS by roughly \$0.02/share. Following the UNS transaction, a \$0.10 move in the exchange rate is expected to impact EPS by roughly \$0.08/share.
- **In the mix for AltaLink.** As the process remains ongoing, the company could not provide much colour with respect to its involvement in the AltaLink process. While we do not think the company would have been overly aggressive in its pursuit of AltaLink, we believe that the UNS acquisition, and the related accretion, has taken some pressure off the company from a growth perspective. That being said, we believe that Fortis has the potential to be a successful bidder should it be able to retain a portion of the synergies that could be realized by merging AltaLink into its own Alberta wires business.

- **Waneta making good progress.** Construction continues on the \$900 million Waneta expansion project, which is 51%-owned by Fortis. The project remains on-schedule and on-budget with an expected commissioning in the spring of 2015.
- **Updated capital plan projects over \$6.5 billion of spending through 2018 (excluding UNS).** Fortis expects to spend over \$6.5 billion over the five-year period from 2014 through 2018. In 2014, \$1.4 billion is expected to be spent with 85% of that amount earmarked for the regulated utilities. On top of that, UNS has forecast that its capital plan will be roughly \$1.5 billion from 2015 through 2018. To compare, the previous five-year plan (2013-2017) projected spending of \$6 billion. We see spending that drives increases in regulated utility rate base resulting in low-risk earnings growth.

### Comfortable with existing EPS estimates

We remain comfortable with our 2014 and 2015 EPS estimates of \$1.81 and \$2.02, respectively, although we have made a number of changes to the segment forecasts to reflect the Q4/13 results and the outlook for the businesses.

Our estimates reflect the following key assumptions:

- **UNS pre-financing not in our base estimates.** Using a thought process along the lines of capitalizing interest for projects that are under construction (e.g., Waneta), our 2014 EPS estimate of \$1.81 excludes the negative carry associated with the converts that have been issued to finance the UNS acquisition. Our 2014E EPS would be \$1.55 if the after-tax interest expense was included as shown in Exhibit 3.
- **We assume FortisAlberta will recover the full capital tracker in late 2014.** Our estimates for 2014 and 2015 assume a positive Alberta Utilities Commission (AUC) decision with respect to the recovery of uncollected amounts associated with the capital tracker under performance-based regulation. We estimate the annual amount to be roughly \$7 million after-tax (or about \$0.03/share). While a positive decision would also likely include amounts for 2013, our 2014 estimate does not include the retroactive booking.
- **UNS acquisition expected to close at the end of 2014.** We have not recorded any earnings from UNS in 2014, with 2015 representing the first full-year of earnings from that business along with recognizing the associated financing.

Our financial forecast is set out in Exhibit 3.

## **Valuation**

Our price target of \$35.00 is based on a forward P/E of 17x our 2015E EPS. A 17x multiple is consistent with the regulated utility peer group.

## **Price target impediments**

Rejection of the UNS deal, the risk of punitive regulatory or government decisions, economic/tourism conditions in its service territories, operational or financial issues at newly acquired businesses, and acquisitions or projects that fail to gain the confidence of investors may have implications for our price target.

## **Company description**

Fortis Inc. is a utility holding company with regulated utilities in Canada (Newfoundland & Labrador, PEI, Ontario, Alberta and B.C.), the U.S. (New York) and the Caribbean (Cayman Islands and Turks & Caicos). The company also has non-regulated operations in power (Canada, U.S. and Belize) and real estate (commercial and hospitality in Canada).

All values in CAD unless otherwise noted. C\$MM except per share data.

### Explanation of RBC Capital Markets Equity rating system

An analyst's 'sector' is the universe of companies for which the analyst provides research coverage. Accordingly, the rating assigned to a particular stock represents solely the analyst's view of how that stock will perform over the next 12 months relative to

the analyst's sector average. Although RBC Capital Markets' ratings of Top Pick (TP)/Outperform (O), Sector Perform (SP), and Underperform (U) most closely correspond to Buy, Hold/Neutral and Sell, respectively, the meanings are not the same because our ratings are determined on a relative basis.

## Ratings

**Top Pick (TP):** Represents analyst's best idea in the sector; expected to provide significant absolute total return over 12 months with a favorable risk-reward ratio.

**Outperform (O):** Expected to materially outperform sector average over 12 months.

**Sector Perform (SP):** Returns expected to be in line with sector average over 12 months.

**Underperform (U):** Returns expected to be materially below sector average over 12 months.

## Risk Rating

As of March 31, 2013, RBC Capital Markets suspends its Average and Above Average risk ratings. The **Speculative** risk rating reflects a security's lower level of financial or operating predictability, illiquid share trading volumes, high balance sheet leverage, or limited operating history that result in a higher expectation of financial and/or stock price volatility.

## Distribution of ratings

For the purpose of ratings distributions, regulatory rules require member firms to assign ratings to one of three rating categories - Buy, Hold/Neutral, or Sell - regardless of a firm's own rating categories. Although RBC Capital Markets' ratings of Top Pick(TP)/Outperform (O), Sector Perform (SP), and Underperform (U) most closely correspond to Buy, Hold/Neutral and Sell, respectively, the meanings are not the same because our ratings are determined on a relative basis (as described below).

Distribution of ratings RBC Capital Markets, Equity Research As of 31-Dec-2013				
Rating	Count	Percent	Investment Banking Serv./Past 12 Mos.	
			Count	Percent
BUY [Top Pick & Outperform]	791	51.13	274	34.64
HOLD [Sector Perform]	666	43.05	179	26.88
SELL [Underperform]	90	5.82	14	15.56

References to a Recommended List in the recommendation history chart may include one or more recommended lists or model portfolios maintained by RBC Wealth Management or one of its affiliates. RBC Wealth Management recommended lists include

a former list called the Prime Opportunity List (RL 3), the Guided Portfolio: Prime Income (RL 6), the Guided Portfolio: Large Cap (RL 7), the Guided Portfolio: Dividend Growth (RL 8), the Guided Portfolio: Midcap 111 (RL 9), the Guided Portfolio: ADR (RL 10), and the Guided Portfolio: Global Equity (U.S.) (RL 11). RBC Capital Markets recommended lists include the Strategy Focus List and the Fundamental Equity Weightings (FEW) portfolios. The abbreviation 'RL On' means the date a security was placed on a Recommended List. The abbreviation 'RL Off' means the date a security was removed from a Recommended List.

## Equity valuation and risks

For valuation methods used to determine, and risks that may impede achievement of, price targets for covered companies, please see the most recent company-specific research report at <https://www.rbcinsight.com> or send a request to RBC Capital Markets Research Publishing, P.O. Box 50, 200 Bay Street, Royal Bank Plaza, 29th Floor, South Tower, Toronto, Ontario M5J 2W7.

## Conflicts policy

RBC Capital Markets Policy for Managing Conflicts of Interest in Relation to Investment Research is available from us on request. To access our current policy, clients should refer to

<https://www.rbccm.com/global/file-414164.pdf>

or send a request to RBC Capital Markets Research Publishing, P.O. Box 50, 200 Bay Street, Royal Bank Plaza, 29th Floor, South Tower, Toronto, Ontario M5J 2W7. We reserve the right to amend or supplement this policy at any time.

## Dissemination of research and short-term trade ideas

RBC Capital Markets endeavors to make all reasonable efforts to provide research simultaneously to all eligible clients, having regard to local time zones in overseas jurisdictions. RBC Capital Markets' research is posted to our proprietary websites to ensure eligible clients receive coverage initiations and changes in ratings, targets and opinions in a timely manner. Additional distribution may be done by the sales personnel via email, fax or regular mail. Clients may also receive our research via third-party vendors. Please contact your investment advisor or institutional salesperson for more information regarding RBC Capital Markets' research. RBC Capital Markets also provides eligible clients with access to SPARC on its proprietary INSIGHT website. SPARC contains market color and commentary, and may also contain Short-Term Trade Ideas regarding the securities of subject companies discussed in this or other research reports. SPARC may be accessed via the following hyperlink: <https://www.rbcinsight.com>. A Short-Term Trade Idea reflects the research analyst's directional view regarding the price of the security of a subject company in the coming days or weeks, based on market and trading events. A Short-Term Trade Idea may differ from the price targets and/or recommendations in our published research reports reflecting the research analyst's views of the longer-term (one year) prospects of the subject company, as a result of the differing time horizons, methodologies and/or other factors. Thus, it is possible that the security of a subject company that is considered a long-term 'Sector Perform' or even an 'Underperform' might be a short-term buying opportunity as a result of temporary selling pressure in the market; conversely, the security of a subject company that is rated a long-term 'Outperform' could be considered susceptible to a short-term downward price correction. Short-Term Trade Ideas are not ratings, nor are they part of any ratings system, and RBC Capital Markets generally does not intend, nor undertakes any obligation, to maintain or update Short-Term Trade Ideas. Short-Term Trade Ideas discussed in SPARC may not be suitable for all investors and have not been tailored to individual investor circumstances and objectives, and investors should make their own independent decisions regarding any Short-Term Trade Ideas discussed therein.

## Analyst certification

## Fortis (FTS) and AltaGas (ALA): Stage 2 of the BCUC Generic Cost of Capital Decision; FTS Receives UNS Shareholder Approval

Sentiment Indicator : neutral

Posted by Robert Kwan on Wednesday, March 26 2014, 6:15 PM ET

### Details: BCUC generic cost of capital decision

- In May 2013, the British Columbia Utilities Commission (BCUC) issued its decision on the first stage of the 2013 generic cost of capital (GCOC) decision for the BC benchmark utility, FortisBC Energy (FEI), whereby the return on capital was set at 8.75%, with a common equity thickness of 38.5%, effective January 1, 2013.
- As part of the first stage, the BCUC introduced an Automatic Adjustment Mechanism (AAM), effective January 2014, to set the ROE on an annual basis for the benchmark utility. In January 2014, the BCUC determined that the AAM was not triggered and the 2014 GCOC would remain unchanged for the benchmark utility.
- Today the BCUC issued the second stage of the 2013 GCOC review for BC utilities, whereby the BCUC recognized various risk premiums over the benchmark utility.

### Fortis:

- Pursuant to the second stage of the GCOC review, the ROEs for FortisBC Inc., FortisBC Vancouver Island (FEVI) and FortisBC Whistler (FEW) have been set to 9.15%, 9.25% and 9.50%, respectively (previously 9.15%, 9.25% and 9.25%, respectively), with allowed equity thickness of 40.0%, 41.5% and 41.5%, respectively (previously 40% for all). Effective January 1, 2015, Fortis expects to amalgamate FEI, FEVI and FEW, and then the common equity return and capital structure would be the same as the benchmark utility.
- In addition to the second stage of the GCOC review, Fortis announced that 97% of UNS Energy shareholders voted favourably for Fortis' proposed acquisition of UNS Energy for approximately US\$4.3 billion. The acquisition is still subject to regulatory approval and is expected to close by the end of 2014.

### AltaGas:

- The Commission Panel has also determined appropriate equity thicknesses and risk premiums for Pacific Northern Gas (PNG), a wholly owned subsidiary of AltaGas. The equity thickness for PNG West, PNG North East (Fort St. John/Dawson Creek) and PNG North East (Tumbler Ridge) have been set at 46.5%, 41.0% and 46.5%, respectively (previously 45%, 40% and 40%, respectively) with equity risk premiums of 75 bps, 50 bps and 75 bps, respectively (previously 65 bps, 40 bps and 65 bps, respectively).

### Our take: neutral

Given the minor changes to both ROEs and equity thickness, coupled with the changes being applied to utilities with modest rate bases compared to their parent companies, we do not view the BCUC changes as material to both AltaGas and Fortis' share prices.

While a good step forward in the process, we expected UNS' shareholders to approve the transaction.

## Fortis (FTS): Q1/14 results slightly ahead of expectations

Sentiment Indicator : neutral

Posted by Robert Kwan on Thursday, May 08 2014, 7:31 AM ET

### Details

- Q1/14 EPS was \$0.70 (company-calculated) and compares to our estimate of \$0.67 and \$0.66 in Q1/13. In calculating the \$0.70/share figure, management excluded the interest on the convertible debentures used to pre-finance the UNS acquisition along with earnings from Griffith Energy, which was sold during the quarter. That basis is directly comparable with our estimate for the quarter. Of note, the interest expense on the converts was \$11 million (about \$0.05/share) and Griffith contributed earnings of \$5 million in Q1/14 (about \$0.02/share).
- Better-than-expected results came from CH Energy (appears to be seasonality), Non-regulated Generation (good production in Belize and New York) and Newfoundland Power (timing).
- Management continues to expect capital spending from 2014 to 2018 to be in excess of \$6.5 billion with a forecast for UNS capital spending of \$1.5 billion from 2015 through 2018.
- Progress on the Waneta Expansion continues to be on time and on budget with completion expected in the spring of 2015.
- The company does not hold a quarterly conference call.

### Our take: neutral

Overall, with the results fairly close to our estimates, we do not expect the Q1/14 release to have a material impact on the share price.

Robert Kwan | | [robert.kwan@rbccm.com](mailto:robert.kwan@rbccm.com)

May 8, 2014

## Fortis Inc.

### Good start to 2014; UNS remains the key focus for the year

**Our view:** The Q1/14 results represent a good start to the year, but we think the market will continue to focus on the closing of the UNS acquisition.

#### Key points:

**The stock is looking more interesting, but it is still a bit early.** We are maintaining our Sector Perform ranking as we see the stock as more of a late 2014 or 2015 story at this point. We see the UNS acquisition, and associated EPS accretion, supporting our view that we are coming to an inflection point for accelerating EPS and dividend growth. Further, we think the stock's relative valuation is reasonable, trading at 16x next year's EPS versus the peers at 15x to 17x. While investors should consider accumulating positions on days of undue weakness, we believe that it is still a bit early to jump in given the ongoing UNS approval process and uncertainty with respect to the recycling of shares following the close of the transaction (including conversion of the debentures).

**Q1/14 results slightly ahead of expectations.** Normalized Q1/14 EPS was \$0.69 compared to our estimate of \$0.67 and \$0.66 in Q1/13. Good results from CH Energy and Non-Regulated Generation (above average water flow in Belize) were the primary contributors to the quarterly variance.

**So far, so good for the UNS regulatory proceeding.** For the US\$4.3 billion acquisition of UNS in Arizona, the company is working towards a settlement agreement that has to be filed by May 16 and if an agreement is not reached, a litigated regulatory process would proceed in front of the Arizona Corporation Commission. Regardless of the process, the final decision could possibly be made at a September hearing, which could result in a September or October close.

**Increasing 2014 estimate.** We have increased our 2014 EPS estimate to \$1.83 (up from \$1.81) to reflect the Q1/14 results. We remain comfortable with our 2015 EPS estimate of \$2.02.

**Valuation unchanged.** Our \$35.00 price target is based on a P/E of 17.5x applied to the forward EPS. A 17.5x multiple is consistent with the regulated utility peer group.

## Target/Upside/Downside Scenarios

Exhibit 1: Fortis Inc.

Source: Bloomberg and RBC Capital Markets estimates for Upside/Downside/Target

### Target price/ base case

Our \$35.00 price target is based on a P/E of 17.5x applied to the forward EPS. A 17.5x multiple is consistent with the regulated utility peer group.

### Upside scenario

For our upside scenario of \$38.00, we assume that P/E valuations fully reflect the level of long-term interest rates, which we see as providing roughly 1.5x upside in the P/E multiple.

### Downside scenario

For our downside scenario of \$29.00, we assume a 100 basis point increase in interest rates, which we believe could translate into an almost 3x downside in the P/E multiple in addition to the UNS acquisition not closing (i.e., foregone EPS accretion).

## Investment summary

We expect Fortis' shares to perform in line with other Energy Infrastructure companies in our coverage universe for the following reasons:

**Shares appear fairly valued.** While we like the existing asset base, and in particular the growth in the western Canadian utilities, the shares appear to be fairly valued. Although we expect the company to continue its long-standing trend of regular annual dividend growth, modest EPS growth is likely to limit annual dividend growth in the mid-single digits. In general, we see the market gravitating to stocks with dividend growth (or at least underlying earnings/cash flow growth) closer to 10%.

**Good defensive investment although market sentiment has shifted away from ultra-defensiveness.** We believe Fortis' utility assets provide a good combination of equity market, credit market, and economic defensiveness. The company has a high percentage of earnings derived from Canadian regulated utility assets, which should provide strong returns in uncertain markets. However, we note that investor preferences have largely shifted away from the ultra-defensive regulated utility names toward stocks with higher growth, albeit with moderately higher risk profiles.

**Potential catalysts:** UNS shareholder approval of the transaction; news that provides a line of sight with respect to ACC approval of the UNS acquisition; and a materially higher-than-expected increase in the annual dividend.

**Key risks:** rejection of the UNS deal, the risk of punitive regulatory or government decisions, economic/tourism conditions in its service territories, operational or financial issues at newly acquired businesses, and acquisitions or projects that fail to gain the confidence of investors.

## Q1/14 results modestly ahead of expectations

Normalized EPS in Q1/14 was \$0.69 compared to our estimate of \$0.67 and \$0.66 in Q1/13. There were a number of segment variances, and with the exception of CH Energy and the Caribbean Utilities, we see no major implications for the run-rate of consolidated earnings.

A summary of our normalized earnings is detailed in Exhibit 2, which sets out each segment's results for the quarter and the year along with comments on selected drivers of the quarter and normalizations.

Exhibit 2: Normalized earnings (in \$MM except per share figures)

## Thoughts coming out of the quarter

**UNS acquisition continues to make progress.** In December, Fortis announced the US\$4.3 billion acquisition of UNS in Arizona. The company is working towards a settlement agreement that has to be filed by May 16. If a settlement agreement is not reached, a litigated regulatory process would proceed in front of the Arizona Corporation Commission (ACC). A final decision could be made at a September ACC hearing, which could result in a late September or early October close.

**FortisAlberta re-filing of its 2013 capital tracker application.** In December 2013, the Alberta Utilities Commission (AUC) approved the continuing use of interim rates based on 60% of the estimated revenue requirement for 2013 and 2014. As part of the interim rate approval, the company will be re-filing its 2013 Capital Tracker Application (as well as its 2014 and 2015 Capital Tracker Applications), by May 2014. Given the prolonged regulatory process, management does not expect a final decision until late 2014/early 2015.

**Sale of Griffith Completed.** During the quarter, Fortis completed the sale of Griffith Energy Services for proceeds of approximately \$105 million (US\$95 million). It is important to note that the Q1/14 earnings of \$5 million from Griffith were excluded from the calculation of normalized earnings.

**Stage 2 of GCOC decision has no material impact.** Pursuant to the second stage of the 2013 generic cost of capital (GCOC) review, the return on equity for FortisBC Electric, FortisBC Vancouver Island (FEVI) and FortisBC Whistler (FEW) has been set to 9.15%, 9.25% and 9.50%, respectively (previously 9.15%, 9.25% and 9.25%, respectively), with an allowed equity thickness of 40.0%, 41.5% and 41.5%, respectively (previously 40% for all). Effective January 1, 2015, Fortis expects to amalgamate Fortis BC Energy, FEVI and FEW, and then the common equity return and capital structure will be the same as the benchmark utility (i.e., 8.75% ROE on a 38.5% equity component).

**Capital plan for \$6.5 billion of spending through 2018 (excluding UNS) is unchanged.** Fortis expects to spend over \$6.5 billion over the five-year period from 2014 through 2018. The approximate breakdown of the capital spending expected to be incurred is as follows: 50% at Canadian Regulated Electric Utilities, 27% at Canadian Regulated Gas Utilities; 11% at Central Hudson; 5% at Caribbean Regulated Electric Utilities; and the remaining 7% at non-regulated operations. Furthermore, UNS has forecast that its capital plan will be roughly \$1.5 billion from 2015 through 2018.

**Tilbury LNG facility expansion commenced.** FortisBC has begun preliminary work related to the expansion of its Tilbury liquefied natural gas (LNG) facility in British Columbia. The Tilbury expansion, which remains subject to certain approvals, is estimated to cost approximately \$400 million. The expansion is expected to include a second LNG tank and a new liquefier, both with an in-service date of 2016. We note that FortisBC is pursuing additional LNG investment opportunities, including a pipeline expansion for the proposed Woodfibre LNG site in British Columbia.

**Waneta hydro project making good progress.** Construction continues on the \$900 million Waneta expansion project, which is 51%-owned by Fortis. The project remains on-schedule and on-budget with an expected commissioning in April or May 2015.

## Increasing 2014 estimate to reflect the quarter

We have increased our 2014 EPS estimate to \$1.83 (up from \$1.81) primarily to reflect the quarter. We remain comfortable with our 2015 EPS estimate of \$2.02, although we have made various changes within the business segments.

Please note that we have not included the UNS pre-financing in our base estimates. Given that the company would capitalize interest for projects that are under construction (e.g., Waneta), we have treated the acquisition similarly by excluding the negative carry amount (i.e., interest expense) associated with the converts that were issued to finance the acquisition. Lastly on the UNS acquisition, we have not recorded any earnings from UNS in 2014, so if the acquisition closes in September/October there is upside to our estimates.

Our financial forecast is set out in Exhibit 3.

Source: Company reports; RBC Capital Markets estimates

## **Valuation**

Our price target of \$35.00 is based on a forward P/E of 17.5x our 2015E EPS. A 17.5x multiple is consistent with the regulated utility peer group.

## **Price target impediments**

Rejection of the UNS deal, the risk of punitive regulatory or government decisions, economic/tourism conditions in its service territories, operational or financial issues at newly acquired businesses, and acquisitions or projects that fail to gain the confidence of investors may have implications for our price target.

## **Company description**

Fortis Inc. is a utility holding company with regulated utilities in Canada (Newfoundland & Labrador, PEI, Ontario, Alberta and B.C.), the U.S. (New York) and the Caribbean (Cayman Islands and Turks & Caicos). The company also has non-regulated operations in power (Canada, U.S. and Belize) and real estate (commercial and hospitality in Canada).

All values in CAD unless otherwise noted. C\$MM except per share data.

RBC Capital Markets has provided Fortis Inc. with non-investment banking securities-related services in the past 12 months.

RBC Capital Markets has provided Fortis Inc. with non-securities services in the past 12 months.

The author is employed by RBC Dominion Securities Inc., a securities broker-dealer with principal offices located in Toronto, Canada.

### Explanation of RBC Capital Markets Equity rating system

An analyst's 'sector' is the universe of companies for which the analyst provides research coverage. Accordingly, the rating assigned to a particular stock represents solely the analyst's view of how that stock will perform over the next 12 months relative to the analyst's sector average. Although RBC Capital Markets' ratings of Top Pick (TP)/Outperform (O), Sector Perform (SP), and Underperform (U) most closely correspond to Buy, Hold/Neutral and Sell, respectively, the meanings are not the same because our ratings are determined on a relative basis.

## Ratings

**Top Pick (TP):** Represents analyst's best idea in the sector; expected to provide significant absolute total return over 12 months with a favorable risk-reward ratio.

**Outperform (O):** Expected to materially outperform sector average over 12 months.

**Sector Perform (SP):** Returns expected to be in line with sector average over 12 months.

**Underperform (U):** Returns expected to be materially below sector average over 12 months.

## Risk Rating

As of March 31, 2013, RBC Capital Markets suspends its Average and Above Average risk ratings. The **Speculative** risk rating reflects a security's lower level of financial or operating predictability, illiquid share trading volumes, high balance sheet leverage, or limited operating history that result in a higher expectation of financial and/or stock price volatility.

## Distribution of ratings

For the purpose of ratings distributions, regulatory rules require member firms to assign ratings to one of three rating categories - Buy, Hold/Neutral, or Sell - regardless of a firm's own rating categories. Although RBC Capital Markets' ratings of Top Pick(TP)/ Outperform (O), Sector Perform (SP), and Underperform (U) most closely correspond to Buy, Hold/Neutral and Sell, respectively, the meanings are not the same because our ratings are determined on a relative basis (as described below).

Distribution of ratings RBC Capital Markets, Equity Research As of 31-Mar-2014				
Rating	Count	Percent	Investment Banking Serv./Past 12 Mos.	
			Count	Percent
BUY [Top Pick & Outperform]	822	52.49	303	36.86
HOLD [Sector Perform]	654	41.76	170	25.99
SELL [Underperform]	90	5.75	11	12.22

References to a Recommended List in the recommendation history chart may include one or more recommended lists or model portfolios maintained by RBC Wealth Management or one of its affiliates. RBC Wealth Management recommended lists include a former list called the Prime Opportunity List (RL 3), the Guided Portfolio: Prime Income (RL 6), the Guided Portfolio: Large Cap (RL 7), the Guided Portfolio: Dividend Growth (RL 8), the Guided Portfolio: Midcap 111 (RL 9), the Guided Portfolio: ADR (RL 10), and the Guided Portfolio: Global Equity (U.S.) (RL 11). RBC Capital Markets recommended lists include the Strategy Focus List

and the Fundamental Equity Weightings (FEW) portfolios. The abbreviation 'RL On' means the date a security was placed on a Recommended List. The abbreviation 'RL Off' means the date a security was removed from a Recommended List.

## Equity valuation and risks

For valuation methods used to determine, and risks that may impede achievement of, price targets for covered companies, please see the most recent company-specific research report at <https://www.rbcinsight.com> or send a request to RBC Capital Markets Research Publishing, P.O. Box 50, 200 Bay Street, Royal Bank Plaza, 29th Floor, South Tower, Toronto, Ontario M5J 2W7.

## Conflicts policy

RBC Capital Markets Policy for Managing Conflicts of Interest in Relation to Investment Research is available from us on request. To access our current policy, clients should refer to

<https://www.rbccm.com/global/file-414164.pdf>

or send a request to RBC Capital Markets Research Publishing, P.O. Box 50, 200 Bay Street, Royal Bank Plaza, 29th Floor, South Tower, Toronto, Ontario M5J 2W7. We reserve the right to amend or supplement this policy at any time.

## Dissemination of research and short-term trade ideas

RBC Capital Markets endeavours to make all reasonable efforts to provide research simultaneously to all eligible clients, having regard to local time zones in overseas jurisdictions. Subject to any applicable regulatory considerations, "eligible clients" may include RBC Capital Markets institutional clients globally, the retail divisions of RBC Dominion Securities Inc. and RBC Capital Markets LLC, and affiliates. RBC Capital Markets' equity research is posted to our proprietary websites to ensure eligible clients receive coverage initiations and changes in rating, targets and opinions in a timely manner. Additional distribution may be done by the sales personnel via email, fax or regular mail. Clients may also receive our research via third party vendors. Please contact your investment advisor or institutional salesperson for more information regarding RBC Capital Markets research. RBC Capital Markets also provides eligible clients with access to SPARC on its proprietary INSIGHT website. SPARC contains market color and commentary, and may also contain Short-Term Trade Ideas regarding the securities of subject companies discussed in this or other research reports. SPARC may be accessed via the following hyperlink: <https://www.rbcinsight.com>. A Short-Term Trade Idea reflects the research analyst's directional view regarding the price of the security of a subject company in the coming days or weeks, based on market and trading events. A Short-Term Trade Idea may differ from the price targets and/or recommendations in our published research reports reflecting the research analyst's views of the longer-term (one year) prospects of the subject company, as a result of the differing time horizons, methodologies and/or other factors. Thus, it is possible that the security of a subject company that is considered a long-term 'Sector Perform' or even an 'Underperform' might be a short-term buying opportunity as a result of temporary selling pressure in the market; conversely, the security of a subject company that is rated a long-term 'Outperform' could be considered susceptible to a short-term downward price correction. Short-Term Trade Ideas are not ratings, nor are they part of any ratings system, and RBC Capital Markets generally does not intend, nor undertakes any obligation, to maintain or update Short-Term Trade Ideas. Short-Term Trade Ideas discussed in SPARC may not be suitable for all investors and have not been tailored to individual investor circumstances and objectives, and investors should make their own independent decisions regarding any Short-Term Trade Ideas discussed therein.

## Fortis (FTS): Stan Marshall to retire as CEO; Barry Perry (CFO) appointed as his successor

Sentiment Indicator : neutral

Posted by Robert Kwan on Monday, May 12 2014, 7:48 AM ET

### Details:

- Stan Marshall current President and CEO, will retire from the company, including his seat on the board of directors, as of December 31, 2014. As part of the transition, he will relinquish his role as President on June 30, 2014.
- Barry Perry, VP Finance and CFO, will succeed Stan Marshall as CEO. Barry has been CFO of Fortis since 2004 and he has been with the company since 2000.

### Our take: neutral

While the specific timing was unexpected, we do not expect the announcement to have a material impact on the share price. Barry is well-known to the investment community and his role as CFO through the company's transformational growth should be viewed as a sign that the strategy is not likely going to materially change.

## Fortis Inc.

### Settlement agreement filed for UNS acquisition

**Impact: positive**

**First impression**

**Settlement agreement a positive step forward.** Fortis, UNS Energy, staff of the Arizona Corporation Commission (ACC), the Residential Utility Consumer Office (RUCO) and other parties to the merger proceedings entered into a settlement agreement. The parties agree that the merger is in the public interest and recommend approval by the ACC subject to certain conditions, which include:

**Customer benefits totalling US\$30 million over five years.** Retail customers of Tucson Electric, UNS Electric and UNS Gas will receive credits to customer bills totalling US\$10 million in year one and US\$5 million in years two through five. We view these benefits as reasonable for both Fortis and UNS customers.

**UNS will be ringfenced.** The utilities will adopt certain ringfencing and corporate governance provisions. This is effectively how Fortis operates its existing utilities, so we do not view this as material.

**Dividends cannot exceed 60% of UNS net income for five years or until UNS equity capitalization reaches 50%; US\$220 million equity infusion.** While Fortis' payout ratio is modestly higher than the 60% threshold, we do not expect there to be any issues with funding Fortis Inc. dividends due to the size of UNS relative to the other utilities. We also do not view the equity infusion as onerous.

**A positive step forward for the UNS acquisition process.** The approval process was expected to be much less contentious than CH Energy due to what appeared to be a realization that Fortis could bring material benefits to Arizona and a more constructive regulatory environment. Nonetheless, a settlement agreement paves the way for a smoother, and possibly quicker, regulatory process.

**Closing could possibly occur at the end of September or early October if the ACC hearing is in September.** In addition to ACC approval, the merger requires HSR (anti-trust) expiration or termination of the waiting period, review by the Committee on Foreign Investment and other customary closing conditions.

**We continue to view the UNS acquisition positively.** We continue to positively view the acquisition of UNS due to: (1) immediate EPS accretion that we expect to be in the \$0.05-\$0.10/share range; (2) accretion to Fortis' overall growth rate as UNS' rate base is expected to grow modestly faster than Fortis' existing businesses in aggregate; and (3) regulatory diversification against the backdrop of recent challenging decisions in both British Columbia and Alberta.

### Explanation of RBC Capital Markets Equity rating system

An analyst's 'sector' is the universe of companies for which the analyst provides research coverage. Accordingly, the rating assigned to a particular stock represents solely the analyst's view of how that stock will perform over the next 12 months relative to the analyst's sector average. Although RBC Capital Markets' ratings of Top Pick (TP)/Outperform (O), Sector Perform (SP), and Underperform (U) most closely correspond to Buy, Hold/Neutral and Sell, respectively, the meanings are not the same because our ratings are determined on a relative basis.

## Ratings

**Top Pick (TP):** Represents analyst's best idea in the sector; expected to provide significant absolute total return over 12 months with a favorable risk-reward ratio.

**Outperform (O):** Expected to materially outperform sector average over 12 months.

**Sector Perform (SP):** Returns expected to be in line with sector average over 12 months.

**Underperform (U):** Returns expected to be materially below sector average over 12 months.

## Risk Rating

As of March 31, 2013, RBC Capital Markets suspends its Average and Above Average risk ratings. The **Speculative** risk rating reflects a security's lower level of financial or operating predictability, illiquid share trading volumes, high balance sheet leverage, or limited operating history that result in a higher expectation of financial and/or stock price volatility.

## Distribution of ratings

For the purpose of ratings distributions, regulatory rules require member firms to assign ratings to one of three rating categories - Buy, Hold/Neutral, or Sell - regardless of a firm's own rating categories. Although RBC Capital Markets' ratings of Top Pick(TP)/ Outperform (O), Sector Perform (SP), and Underperform (U) most closely correspond to Buy, Hold/Neutral and Sell, respectively, the meanings are not the same because our ratings are determined on a relative basis (as described below).

Distribution of ratings RBC Capital Markets, Equity Research As of 31-Mar-2014				
Rating	Count	Percent	Investment Banking Serv./Past 12 Mos.	
			Count	Percent
BUY [Top Pick & Outperform]	822	52.49	303	36.86
HOLD [Sector Perform]	654	41.76	170	25.99
SELL [Underperform]	90	5.75	11	12.22

References to a Recommended List in the recommendation history chart may include one or more recommended lists or model portfolios maintained by RBC Wealth Management or one of its affiliates. RBC Wealth Management recommended lists include a former list called the Prime Opportunity List (RL 3), the Guided Portfolio: Prime Income (RL 6), the Guided Portfolio: Large Cap (RL 7), the Guided Portfolio: Dividend Growth (RL 8), the Guided Portfolio: Midcap 111 (RL 9), the Guided Portfolio: ADR (RL 10), and the Guided Portfolio: Global Equity (U.S.) (RL 11). RBC Capital Markets recommended lists include the Strategy Focus List

and the Fundamental Equity Weightings (FEW) portfolios. The abbreviation 'RL On' means the date a security was placed on a Recommended List. The abbreviation 'RL Off' means the date a security was removed from a Recommended List.

## Equity valuation and risks

For valuation methods used to determine, and risks that may impede achievement of, price targets for covered companies, please see the most recent company-specific research report at <https://www.rbcinsight.com> or send a request to RBC Capital Markets Research Publishing, P.O. Box 50, 200 Bay Street, Royal Bank Plaza, 29th Floor, South Tower, Toronto, Ontario M5J 2W7.

## Conflicts policy

RBC Capital Markets Policy for Managing Conflicts of Interest in Relation to Investment Research is available from us on request. To access our current policy, clients should refer to

<https://www.rbccm.com/global/file-414164.pdf>

or send a request to RBC Capital Markets Research Publishing, P.O. Box 50, 200 Bay Street, Royal Bank Plaza, 29th Floor, South Tower, Toronto, Ontario M5J 2W7. We reserve the right to amend or supplement this policy at any time.

## Dissemination of research and short-term trade ideas

RBC Capital Markets endeavours to make all reasonable efforts to provide research simultaneously to all eligible clients, having regard to local time zones in overseas jurisdictions. Subject to any applicable regulatory considerations, "eligible clients" may include RBC Capital Markets institutional clients globally, the retail divisions of RBC Dominion Securities Inc. and RBC Capital Markets LLC, and affiliates. RBC Capital Markets' equity research is posted to our proprietary websites to ensure eligible clients receive coverage initiations and changes in rating, targets and opinions in a timely manner. Additional distribution may be done by the sales personnel via email, fax or regular mail. Clients may also receive our research via third party vendors. Please contact your investment advisor or institutional salesperson for more information regarding RBC Capital Markets research. RBC Capital Markets also provides eligible clients with access to SPARC on its proprietary INSIGHT website. SPARC contains market color and commentary, and may also contain Short-Term Trade Ideas regarding the securities of subject companies discussed in this or other research reports. SPARC may be accessed via the following hyperlink: <https://www.rbcinsight.com>. A Short-Term Trade Idea reflects the research analyst's directional view regarding the price of the security of a subject company in the coming days or weeks, based on market and trading events. A Short-Term Trade Idea may differ from the price targets and/or recommendations in our published research reports reflecting the research analyst's views of the longer-term (one year) prospects of the subject company, as a result of the differing time horizons, methodologies and/or other factors. Thus, it is possible that the security of a subject company that is considered a long-term 'Sector Perform' or even an 'Underperform' might be a short-term buying opportunity as a result of temporary selling pressure in the market; conversely, the security of a subject company that is rated a long-term 'Outperform' could be considered susceptible to a short-term downward price correction. Short-Term Trade Ideas are not ratings, nor are they part of any ratings system, and RBC Capital Markets generally does not intend, nor undertakes any obligation, to maintain or update Short-Term Trade Ideas. Short-Term Trade Ideas discussed in SPARC may not be suitable for all investors and have not been tailored to individual investor circumstances and objectives, and investors should make their own independent decisions regarding any Short-Term Trade Ideas discussed therein.

## Analyst certification

## Fortis (FTS): Announced early termination of Hart-Scott-Rodino waiting period

Sentiment Indicator : neutral

Posted by Robert Kwan on Friday, June 13 2014, 4:02 PM ET

### Details:

- Fortis and UNS Energy announced the receipt of early termination of the waiting period under the Hart-Scott-Rodino Antitrust Improvements Act (HSR Act), in connection with the previously announced acquisition of UNS Energy by Fortis.
- We note that transaction received UNS Energy shareholder approval in March 2014 and approval from the Federal Energy Regulatory Commission and the Committee on Foreign Investment in the United States in April and May, respectively. As such, review by the Arizona Corporation Commission (ACC) is the only significant approval remaining.

### Our take: neutral

Although this is a positive step for the transaction to move forward, it still requires approval from the ACC, which is expected to occur in September. We expect the transaction to close shortly after ACC approval.

## Fortis (FTS): UNS deal approval in good shape; could close by the end of August

Sentiment Indicator : **positive**

Posted by Robert Kwan on Wednesday, July 30 2014, 1:47 PM ET

### Details

- The Administrative Law Judge (ALJ) assigned by the Arizona Corporation Commission (ACC) recommends the approval by the ACC of Fortis' acquisition of UNS Energy per the conditions outlined in the May 16, 2014 Settlement Agreement.
- Consideration of the recommended order has been tentatively scheduled for the ACC's meeting scheduled for August 12 and 13, 2014.
- If the ACC approves the acquisition at the August meeting, Fortis expects the acquisition to close by the end of August 2014. This is one month sooner than our previously expected closing date if all went smoothly.

### Our take: positive

While we did not expect there to be any issues, we still view the ALJ's recommendation as a positive. Further, we also think the potential to close the transaction at the end of August is a positive for holders of the converts due to the ability to receive the make-whole payment in addition to receiving the Q4 dividend.

## Fortis (FTS): Q2/14 results slightly below expectations

Sentiment Indicator : neutral

Posted by Robert Kwan on Friday, August 01 2014, 7:39 AM ET

### Details

- Q2/14 normalized EPS was \$0.32 compared to our estimate of \$0.34 and \$0.27 in Q2/13. In calculating the \$0.32/share figure, we have excluded the interest on the convertible debentures used to pre-finance the UNS acquisition (\$0.06/share) along with other smaller items such as FX translation on balance sheet items run through the income statement. The primary variance compared to our estimate was CH Energy as the rate freeze appears to be having a greater impact on earnings than we had forecast. All of the other segments were within \$2 million of our forecast.
- The company also announced that it will hold an Investor Day on October 1 in Toronto.
- Management continues to expect capital spending from 2014 to 2018 to be in excess of \$6.5 billion with a forecast for UNS capital spending of \$1.5 billion from 2015 through 2018.
- Progress on the Waneta Expansion continues to be on time and on budget with completion expected in the spring of 2015.
- The company does not hold a quarterly conference call.

### Our take: neutral

Overall, the results are modestly below our expectations, but we believe that investors will remain focused on the recent announcement that the UNS Energy acquisition is scheduled to go in front of the ACC in August and the approval process for the transaction appears to be in good shape.

August 4, 2014

## Fortis Inc.

### August in Arizona

**Our view:** Neutral – Although the results were slightly below our expectations, we believe that investors will remain focused on the recent announcement that the UNS Energy acquisition will likely go in front of the ACC in August, and the approval process for the transaction appears to be in good shape for a Q3/14 close.

#### Key points:

**UNS acquisition expected to close in late August.** In July, the Administrative Law Judge (ALJ) assigned by the Arizona Corporation Commission (ACC) recommended that the ACC approve Fortis's acquisition of UNS Energy per the conditions outlined in the May 16, 2014 Settlement Agreement. The approval of the UNS acquisition is tentatively scheduled for the August meetings (August 12–13), and if approved, Fortis expects to close the acquisition by the end of the month.

**No double dividend for convert holders?** While we have previously discussed the potential for convert holders to receive the "make whole" provision and potentially receive the Q4/14 dividend, we note that Fortis can set the final installment date between 15 and 90 days following the approval of the UNS transaction. As such, if Fortis receives ACC approval in August, it has the right to elect a final installment date for the converts after October 24, which is the tentative record date for the Q4/14 dividend payment.

**Q2/14 results slightly shy of expectations.** Normalized EPS in Q2/14 was \$0.32 compared to our estimate of \$0.34 and \$0.27 in Q2/13. The primary variance compared to our estimate was Central Hudson, as the rate freeze appears to be having a greater impact on earnings than we had forecast. All of the other segments were within \$2 million of our forecast.

**Tweaking estimates to reflect the quarter and UNS acquisition.** We have reduced our 2014 EPS estimate to \$1.79 (from \$1.83) to primarily reflect anticipated higher expenses that will temporarily not be recovered at Central Hudson from the two-year rate freeze (new rates expected for mid-2015). We also adjusted our 2014 EPS estimate to reflect the earlier-than-expected closing of the UNS acquisition, which has also put downward pressure on the estimate due to the seasonality of earnings. We remain comfortable with our 2015 EPS estimate of \$2.02.

**Valuation: Increasing price target to \$36.00/share (from \$35.00/share).** Our new price target is based on a 18.0x P/E multiple (previously 17.5x) applied to our 2015 EPS estimate. An 18.0x multiple is consistent with the regulated utility peer group and the increase in our valuation multiple is driven by higher valuations for the sector.

## Target/Upside/Downside Scenarios

Exhibit 1: Fortis Inc.

Source: Bloomberg and RBC Capital Markets estimates for Upside/Downside/Target

### Target price/ base case

Our \$36.00 price target is based on a P/E of 18.0x applied to the forward EPS. An 18.0x multiple is consistent with the regulated utility peer group.

### Upside scenario

For our upside scenario of \$39.00, we assume that P/E valuations fully reflect the level of long-term interest rates, which we see as providing roughly 1.5x upside in the P/E multiple.

### Downside scenario

For our downside scenario of \$30.00, we assume a 100 basis point increase in interest rates, which we believe could translate into an almost 3x downside in the P/E multiple in addition to the UNS acquisition not closing (i.e., foregone EPS accretion).

## Investment summary

We expect Fortis's shares to perform in line with other Energy Infrastructure companies in our coverage universe for the following reasons:

**Shares appear fairly valued.** While we like the existing asset base, and in particular the growth in the western Canadian utilities, the shares appear to be fairly valued. Although we expect the company to continue its long-standing trend of regular annual dividend growth, modest EPS growth is likely to limit annual dividend growth in the mid-single digits. In general, we see the market gravitating to stocks with dividend growth (or at least underlying earnings/cash flow growth) closer to 10%.

**Good defensive investment although market sentiment has shifted away from ultra-defensiveness.** We believe Fortis's utility assets provide a good combination of equity market, credit market, and economic defensiveness. The company has a high percentage of earnings derived from Canadian regulated utility assets, which should provide strong returns in uncertain markets. However, we note that investor preferences have largely shifted away from the ultra-defensive regulated utility names toward stocks with higher growth, albeit with moderately higher risk profiles.

**Potential catalysts:** Positive regulatory decision for capital tracker and a materially higher-than-expected increase in the annual dividend.

**Key risks:** the risk of punitive regulatory or government decisions, economic/tourism conditions in its service territories, operational or financial issues at newly acquired businesses, and acquisitions or projects that fail to gain the confidence of investors.

## Q2/14 results slightly shy of expectations

Normalized EPS in Q2/14 was \$0.32 compared to our estimate of \$0.34 and \$0.27 in Q2/13. The primary variance compared to our estimate was Central Hudson, as the rate freeze appears to be having a greater impact on earnings than we had forecast. All of the other segments were within \$2 million of our forecast.

A summary of the Q2/14 normalized earnings is detailed in Exhibit 2.

Exhibit 2: Normalized earnings (in \$MM except per share figures)

## Thoughts coming out of the quarter

**UNS acquisition approval may occur later this month.** In December, Fortis announced the US\$4.3 billion acquisition of UNS in Arizona. In July, the Administrative Law Judge (ALJ) assigned by the Arizona Corporation Commission (ACC) recommended the approval by the ACC of Fortis's acquisition of UNS Energy per the conditions outlined in the May 16, 2014 Settlement Agreement. The approval of the UNS acquisition is expected to be on the agenda for the ACC's meeting scheduled for August 12 and 13, 2014. If the ACC approves the acquisition at the August meeting, Fortis expects the acquisition to close shortly thereafter. We note that the company has between 15 and 90 days after the ACC approval to set the final installment date for the convertible debentures, which could place the final installment date after the record date for the fourth quarter dividend (October 24).

**Central Hudson files general rate application.** In July, Central Hudson filed a general rate application seeking to increase electricity and natural gas delivery rates effective July 1,

2015. A delivery rate freeze was implemented for electricity and natural gas delivery rates through to June 30, 2015 as part of the regulatory approval of the acquisition of CH Energy by Fortis. Furthermore, Central Hudson committed to investing US\$215 million in capital expenditures during the two-year delivery rate freeze period. We note that in its general rate application, the company requested an allowed ROE of 9.0% with a 48% common equity component of capital structure. The current rate order includes an allowed ROE of 10.0% with a 48% common equity component of capital structure. Management expects a decision on the general rate application in H1/15. While the ROE will likely decline, we expect overall earnings to increase due to the new rates capturing returns on rate base growth to date that were not directly recoverable due to the rate freeze.

**2013, 2014, and 2015 capital tracker application filed.** In May 2014, FortisAlberta filed a combined 2013, 2014, and 2015 capital tracker application as required by the regulator. The application requested capital tracker revenue of approximately \$23 million for 2013, \$48 million for 2014, and \$69 million for 2015. A hearing related to the combined capital tracker application is scheduled for October 2014. It is important to note that FortisAlberta continues to recognize 60% of capital tracker revenue based on the interim rate order and any adjustment by the regulator to the interim decision will result in an adjustment to FortisAlberta's revenue. Management expects a decision on the capital tracker application in Q1/15.

**Waneta hydro project making good progress.** Construction continues on the \$900 million Waneta expansion project, which is 51% owned by Fortis. The project remains on schedule and on budget, with an expected commissioning in April or May 2015.

**Investor Day: October 1 in Toronto.** Fortis announced that it will hold an investor day on October 1, 2014 in Toronto, where it will provide an update on its operations, recent developments, and strategic outlook.

## Tweaking estimates for the quarter and timing of the UNS acquisition

We have reduced our 2014 EPS estimate to \$1.79 (from \$1.83) to primarily reflect temporarily unrecoverable costs at Central Hudson due to the two-year rate freeze and the fact that the company is not achieving its allowed ROE, partly because of the US\$215 million of capital expenditures it agreed to spend as part of the acquisition approval. Furthermore, we adjusted our 2014 EPS estimate to reflect the earlier-than-expected closing of the UNS acquisition, which has also put downward pressure on the estimate due to the seasonality of earnings.

Our financial forecast is set out in Exhibit 3.

Exhibit 3: Financial forecast (in \$MM except per share figures)

Source: Company reports; RBC Capital Markets estimates

## **Valuation**

Our price target of \$36.00 is based on a forward P/E of 18.0x our 2015E EPS. A 18.0x multiple is consistent with the regulated utility peer group.

## **Price target impediments**

Rejection of the UNS deal, the risk of punitive regulatory or government decisions, economic/tourism conditions in its service territories, operational or financial issues at newly acquired businesses, and acquisitions or projects that fail to gain the confidence of investors may have implications for our price target.

## **Company description**

Fortis Inc. is a utility holding company with regulated utilities in Canada (Newfoundland & Labrador, PEI, Ontario, Alberta and B.C.), the U.S. (New York) and the Caribbean (Cayman Islands and Turks & Caicos). The company also has non-regulated operations in power (Canada, U.S. and Belize) and real estate (commercial and hospitality in Canada).

## Required disclosures

### Non-U.S. analyst disclosure

Robert Kwan and Kelsey Roste (i) are not registered/qualified as research analysts with the NYSE and/or FINRA and (ii) may not be associated persons of the RBC Capital Markets, LLC and therefore may not be subject to FINRA Rule 2711 and NYSE Rule 472 restrictions on communications with a subject company, public appearances and trading securities held by a research analyst account.

### Conflicts disclosures

The analyst(s) responsible for preparing this research report received compensation that is based upon various factors, including total revenues of the member companies of RBC Capital Markets and its affiliates, a portion of which are or have been generated by investment banking activities of the member companies of RBC Capital Markets and its affiliates.

Please note that current conflicts disclosures may differ from those as of the publication date on, and as set forth in, this report. ### Explanation of RBC Capital Markets Equity rating system

An analyst's 'sector' is the universe of companies for which the analyst provides research coverage. Accordingly, the rating assigned to a particular stock represents solely the analyst's view of how that stock will perform over the next 12 months relative to the analyst's sector average. Although RBC Capital Markets' ratings of Top Pick (TP)/Outperform (O), Sector Perform (SP), and Underperform (U) most closely correspond to Buy, Hold/Neutral and Sell, respectively, the meanings are not the same because our ratings are determined on a relative basis.

## Ratings

**Top Pick (TP):** Represents analyst's best idea in the sector; expected to provide significant absolute total return over 12 months with a favorable risk-reward ratio.

**Outperform (O):** Expected to materially outperform sector average over 12 months.

**Sector Perform (SP):** Returns expected to be in line with sector average over 12 months.

**Underperform (U):** Returns expected to be materially below sector average over 12 months.

## Risk Rating

As of March 31, 2013, RBC Capital Markets suspends its Average and Above Average risk ratings. The **Speculative** risk rating reflects a security's lower level of financial or operating predictability, illiquid share trading volumes, high balance sheet leverage, or limited operating history that result in a higher expectation of financial and/or stock price volatility.

## Distribution of ratings

For the purpose of ratings distributions, regulatory rules require member firms to assign ratings to one of three rating categories - Buy, Hold/Neutral, or Sell - regardless of a firm's own rating categories. Although RBC Capital Markets' ratings of Top Pick(TP)/ Outperform (O), Sector Perform (SP), and Underperform (U) most closely correspond to Buy, Hold/Neutral and Sell, respectively, the meanings are not the same because our ratings are determined on a relative basis (as described below).

Distribution of ratings RBC Capital Markets, Equity Research As of 30-Jun-2014				
Rating	Count	Percent	Investment Banking Serv./Past 12 Mos.	
			Count	Percent
BUY [Top Pick & Outperform]	845	53.24	299	35.38
HOLD [Sector Perform]	658	41.46	159	24.16
SELL [Underperform]	84	5.29	10	11.90

References to a Recommended List in the recommendation history chart may include one or more recommended lists or model portfolios maintained by RBC Wealth Management or one of its affiliates. RBC Wealth Management recommended lists include a former list called the Prime Opportunity List (RL 3), the Guided Portfolio: Prime Income (RL 6), the Guided Portfolio: Large Cap (RL 7), the Guided Portfolio: Dividend Growth (RL 8), the Guided Portfolio: Midcap 111 (RL 9), the Guided Portfolio: ADR (RL 10), and the Guided Portfolio: Global Equity (U.S.) (RL 11). RBC Capital Markets recommended lists include the Strategy Focus List

and the Fundamental Equity Weightings (FEW) portfolios. The abbreviation 'RL On' means the date a security was placed on a Recommended List. The abbreviation 'RL Off' means the date a security was removed from a Recommended List.

## Equity valuation and risks

For valuation methods used to determine, and risks that may impede achievement of, price targets for covered companies, please see the most recent company-specific research report at <https://www.rbcinsight.com> or send a request to RBC Capital Markets Research Publishing, P.O. Box 50, 200 Bay Street, Royal Bank Plaza, 29th Floor, South Tower, Toronto, Ontario M5J 2W7.

## Conflicts policy

RBC Capital Markets Policy for Managing Conflicts of Interest in Relation to Investment Research is available from us on request. To access our current policy, clients should refer to

<https://www.rbccm.com/global/file-414164.pdf>

or send a request to RBC Capital Markets Research Publishing, P.O. Box 50, 200 Bay Street, Royal Bank Plaza, 29th Floor, South Tower, Toronto, Ontario M5J 2W7. We reserve the right to amend or supplement this policy at any time.

## Dissemination of research and short-term trade ideas

RBC Capital Markets endeavours to make all reasonable efforts to provide research simultaneously to all eligible clients, having regard to local time zones in overseas jurisdictions. Subject to any applicable regulatory considerations, "eligible clients" may include RBC Capital Markets institutional clients globally, the retail divisions of RBC Dominion Securities Inc. and RBC Capital Markets LLC, and affiliates. RBC Capital Markets' equity research is posted to our proprietary websites to ensure eligible clients receive coverage initiations and changes in rating, targets and opinions in a timely manner. Additional distribution may be done by the sales personnel via email, fax or regular mail. Clients may also receive our research via third party vendors. Please contact your investment advisor or institutional salesperson for more information regarding RBC Capital Markets research. RBC Capital Markets also provides eligible clients with access to SPARC on its proprietary INSIGHT website. SPARC contains market color and commentary, and may also contain Short-Term Trade Ideas regarding the securities of subject companies discussed in this or other research reports. SPARC may be accessed via the following hyperlink: <https://www.rbcinsight.com>. A Short-Term Trade Idea reflects the research analyst's directional view regarding the price of the security of a subject company in the coming days or weeks, based on market and trading events. A Short-Term Trade Idea may differ from the price targets and/or recommendations in our published research reports reflecting the research analyst's views of the longer-term (one year) prospects of the subject company, as a result of the differing time horizons, methodologies and/or other factors. Thus, it is possible that the security of a subject company that is considered a long-term 'Sector Perform' or even an 'Underperform' might be a short-term buying opportunity as a result of temporary selling pressure in the market; conversely, the security of a subject company that is rated a long-term 'Outperform' could be considered susceptible to a short-term downward price correction. Short-Term Trade Ideas are not ratings, nor are they part of any ratings system, and RBC Capital Markets generally does not intend, nor undertakes any obligation, to maintain or update Short-Term Trade Ideas. Short-Term Trade Ideas discussed in SPARC may not be suitable for all investors and have not been tailored to individual investor circumstances and objectives, and investors should make their own independent decisions regarding any Short-Term Trade Ideas discussed therein.

## Analyst certification

## Fortis (FTS): UNS acquisition approved by the ACC

Sentiment Indicator : neutral

Posted by Robert Kwan on Tuesday, August 12 2014, 3:54 PM ET

### Details:

- Fortis announced the issuance of the final written approval by the Arizona Corporation Commission (ACC) for its acquisition of UNS Energy. ACC approval was the last remaining approval required for the transaction and as such, the completion of the transaction is expected to be soon.
- Fortis will issue shortly a final instalment notice, notifying holders of its 4% convertible unsecured subordinated debentures of the date on which payment of the final instalment is due, which date shall be not less than 15 days nor more than 90 days after the completion of the transaction. As previously noted in our *Research Comment* dated August 4, 2014, Fortis has the ability to set the final instalment date after October 24, which is the tentative record date for the Q4/14 dividend payment.

### Our take: neutral

Given that we believe the ACC approval was widely anticipated, we believe the announcement of the approval is not likely to materially impact Fortis' share price.

## Fortis (FTS): Upcoming investor day likely to focus on rate base growth, particularly in the U.S. and from LNG

Sentiment Indicator : neutral

Posted by Robert Kwan on Wednesday, September 24 2014, 12:06 PM ET

### Details

- Fortis is holding an investor day in Toronto on Wednesday, October 1.
- As the company has not held investor days in the past, we expect the session to be a combination of: (1) articulating the company's strategy; (2) educating the investment community on the two recently-acquired U.S. utilities with the CEOs of both entities presenting at the investor day (i.e., Central Hudson and UNS); (3) highlighting the rate base growth potential for the company's utility businesses; and (4) highlighting the potential for LNG-driven growth in B.C. that could positively impact the FortisBC Energy business.
- With Fortis having been acquisitive, particularly recently in the U.S. (e.g., CH Energy, UNS Energy), we expect management to outline the M&A strategy going forward. However, we continue to believe that 2015 is more likely to be a year without material M&A where Fortis can demonstrate the earnings power of its existing businesses, particularly in the U.S.

### Event details

- The investor day will begin at 8:30 AM (ET) and run until approximately 12:30 PM on Wednesday, October 1.
- A live audio webcast will be available on Fortis' website ([www.fortisinc.com](http://www.fortisinc.com)).
- Senior executives presenting at the event will be:
  - Barry Perry, President and incoming CEO
  - Karl Smith, EVP and CFO
  - John Walker, EVP (Western Canadian Operations)
  - Earl Ludlow, EVP (Eastern Canadian and Caribbean Operations)
  - Steven Lant, President and CEO (CH Energy)
  - David Hutchens, President and CEO (UNS Energy)

### Our take: neutral

While we expect the session to be informative, particularly with respect to the U.S. businesses and potential LNG-related infrastructure investments, we do not expect any major announcements and as such, we do not expect the investor day to materially impact the share price.

Robert Kwan | [robert.kwan@rbccm.com](mailto:robert.kwan@rbccm.com)

## Fortis Inc. (FTS): Announced the strategic review of Fortis Properties

Sentiment Indicator : neutral

Posted by Robert Kwan on Monday, September 29 2014, 11:34 AM ET

### Details:

- Fortis announced that the company will engage in a review of strategic options for its hotel and commercial real estate business, operating under its wholly owned subsidiary Fortis Properties.
- Fortis has engaged financial advisors and the process is expected to commence in the coming weeks and continue through the balance of 2014 and into 2015. The review of Fortis Properties will explore various strategic options for this non-utility business segment, which currently represents approximately 3% of the company's total assets. Management noted that strategic options may include, but are not limited to, a sale of all or a portion of the assets, a sale of shares of Fortis Properties or an initial public offering.
- Fortis Properties owns and operates twenty-three hotels in eight Canadian provinces, primarily in Atlantic Canada. Its major hotel brands include Delta, Sheraton, Hilton, Holiday Inn, Ramada and Best Western, and some of its prominent real estate holdings in Atlantic Canada include Cabot Place, Maritime Centre and the Blue Cross Centre.
- The company has stated that it does not currently intend to disclose further developments with respect to this process unless and until its Board of Directors approves a specific transaction or otherwise concludes the review of strategic options. However at Fortis Investor Day in Toronto on October 1, we expect questions to be asked about the rationale for the strategic review and how it ties into the company's overall outlook going forward.

### Our take: neutral

Given that Fortis Properties only represents approximately 3% of the company's total assets, we do not expect this announcement to have a material impact of the shares of Fortis.

## Fortis Inc.

### Investor Day: Rate base growth the name of the game

**Our view:** We see the Investor Day focusing the market on organic utility rate base growth opportunities rather than an M&A strategy. We see the organic utility growth strategy as being positively received in the market in addition to the upside optionality for LNG-related infrastructure. With that in mind, we have raised our price target to \$37.00 (up from \$36.00).

#### Key points:

**Rate base growth driven organically in the near-term.** The company highlighted that it is entering a period of significant organic growth, with the expected 4-year CAGR in rate base through 2018 expected to be 7% (and possibly as high as 8.5% if some LNG-related projects come through in B.C.). The company set out a 5-year capital expenditure program of \$9.3 billion, which could increase to \$10.3 billion, if the potential LNG-related infrastructure projects move forward.

#### Capital recycling through non-core assets sales should help fund growth.

On September 29, Fortis announced that it was undertaking a strategic review of Fortis Properties, which owns and operates various hotels and commercial real estate. The strategic options could include the sale of all or a portion of the assets, the sale of shares in the entire business, or an IPO. We believe that if a monetization occurs, the proceeds will be used to fund the company's \$9.3 billion 5-year capital plan. We believe that the recycling of capital from a non-core business into the core regulated utility business will be viewed favourably amongst investors.

#### M&A part of the longer-term strategy, but likely on hold for 2015.

As the company has previously stated, management expects to focus on integrating the two U.S. acquisitions and providing investors with a "clean" year to demonstrate its organic growth and earnings power of the regulated utility assets. However, we believe that showcasing 2015 earnings, and accretion from the U.S. acquisitions, will be a way of "earning the right" to do further M&A deals, which we believe will continue to be part of the company's longer-term growth strategy.

**\$1.1 billion in LNG-related potential growth.** Management sees the potential for an additional \$1.1 billion in utility rate base spending in B.C. related to liquefied natural gas. One of the projects would expand the existing Tilbury LNG facility (estimated to cost \$450 million) with the other project involving a gas pipeline connection to a proposed third-party liquefaction terminal (estimated to cost \$600 million).

**Increasing price target to \$37.00 (up from \$36.00).** We have increased our price target to \$37.00 to reflect the strong rate base growth and upside optionality from the potential LNG-related infrastructure investments. Our price target reflects a 17.5x multiple applied to our 2016E EPS, which is generally in line with what we use for other regulated utilities.

## Target/Upside/Downside Scenarios

Exhibit 1: Fortis Inc.

Source: Bloomberg and RBC Capital Markets estimates for Upside/Downside/Target

### Target price/ base case

Our \$37.00 price target is based on a P/E of 17.5x applied to the forward EPS. An 17.5x multiple is consistent with the regulated utility peer group.

### Upside scenario

For our upside scenario of \$40.00, we assume that P/E valuations fully reflect the level of long-term interest rates, which we see as providing roughly 1.5x upside in the P/E multiple.

### Downside scenario

For our downside scenario of \$31.00, we assume a 100 basis point increase in interest rates, which we believe could translate into an almost 3x downside in the P/E multiple in addition to the UNS acquisition not closing (i.e., foregone EPS accretion).

## Investment summary

We expect Fortis's shares to perform in line with other Energy Infrastructure companies in our coverage universe for the following reasons:

**Shares appear fairly valued.** While we like the existing asset base, and in particular the growth in the western Canadian utilities, the shares appear to be fairly valued. Although we expect the company to continue its long-standing trend of regular annual dividend growth, modest EPS growth is likely to limit annual dividend growth in the mid-single digits. In general, we see the market gravitating to stocks with dividend growth (or at least underlying earnings/cash flow growth) closer to 10%.

**Good defensive investment although market sentiment has shifted away from ultra-defensiveness.** We believe Fortis's utility assets provide a good combination of equity market, credit market, and economic defensiveness. The company has a high percentage of earnings derived from Canadian regulated utility assets, which should provide strong returns in uncertain markets. However, we note that investor preferences have largely shifted away from the ultra-defensive regulated utility names toward stocks with higher growth, albeit with moderately higher risk profiles.

**Potential catalysts:** Positive regulatory decision for capital tracker and a materially higher-than-expected increase in the annual dividend.

**Key risks:** the risk of punitive regulatory or government decisions, economic/tourism conditions in its service territories, operational or financial issues at newly acquired businesses, and acquisitions or projects that fail to gain the confidence of investors.

## Organic growth the key driver over the next five years

Fortis held its first investor day in Toronto that highlighted how the company is entering a period of significant organic growth, with the expected 4-year CAGR in rate base through 2018 to be 7% (and possibly as high as 8.5% if some LNG-related projects come through in B.C.). The session served to provide an update on recent developments in the Canadian regulated utility business along with showcasing the more recently acquired U.S. regulated utility businesses (UNS in Arizona and Central Hudson in New York). Further, the investor day also gave incoming CEO, Barry Perry, an opportunity to articulate his strategic view for the company, including the M&A strategy. Our five key takeaways from the day were as follows:

- 1. Expected robust 5-year rate base growth.** The company set out a 5-year capital expenditure program of \$9.3 billion, which indicates an annual average spend of \$1.8 billion. The annual average capital spend could increase to \$2.0 billion, if the potential LNG-related infrastructure projects move forward. The 5-year capital expenditure program would translate to a 4-year rate base CAGR of 7% (8.5% with the potential LNG projects). Exhibit 2 summarizes management's expected 5-year rate base growth.

Exhibit 2: 5-year consolidated rate base growth with and without the potential LNG projects (in \$ billions)

Source: Company reports

- 2. Sale of Fortis Properties would help recycle capital into the 5-year regulated utility capital expenditure program.** On September 29, Fortis announced that it was undertaking a strategic review of Fortis Properties, which owns and operates 23 hotels and 2.8 million square feet of commercial real estate. The strategic options could include the sale of all or a portion of the assets, the sale of shares in the entire business, or an IPO. We believe that the proceeds, if any, will be used to fund the company's \$9.3 billion 5-year capital plan and represent an efficient recycling of capital out of non-core assets and into the core regulated utility business.
- 3. M&A activity not expected in 2015.** As the company has previously stated, management expects to focus on integrating the two U.S. acquisitions and providing investors with a "clean" year to demonstrate the organic growth and the earnings power of the regulated utility assets. However, we believe that showcasing 2015 earnings, and accretion from the U.S. acquisitions, would be a way of "earning the right" to do further M&A deals, which we believe will continue to form part of the longer-term growth strategy.
- 4. Focused on maintaining the A credit rating.** Management reiterated that Fortis' capital structure target is 55% debt, 35% equity and 10% preferred equity. Currently

the credit ratings for the various utilities range between BBB (positive outlook) and A, but management is committed to maintaining an “A” credit rating at the Fortis Inc. level.

- LNG-related growth provides upside optionality; utility rate base projects would underpin common equity financing.** Management sees the potential for an additional \$1.1 billion in utility rate base spending in B.C. related to liquefied natural gas. One of the projects would expand the existing Tilbury LNG facility with the other project involving a gas pipeline connection to a proposed third-party liquefaction terminal. We believe that if both LNG projects move forward, the company will likely have to issue common equity.

## Western Canada: Robust growth with potential LNG projects

Management highlighted that Fortis expects to see robust growth in Western Canada and has a 5-year capital expenditure plan of approximately \$4.5 billion, of which FortisAlberta and FortisBC Energy (gas utility) would make up a large portion of the spending. In addition to the \$4.5 billion capital expenditure plan, management sees the potential for an additional \$1.1 billion of capital expenditures for potential LNG-related projects. As shown in Exhibit 3, management estimates the rate base for Western Canada to grow to approximately \$9.3 billion by 2018 (\$10.3 billion including the potential LNG projects).

Exhibit 3: 5-year rate base growth with and without the potential LNG projects (in \$ billions)

Source: Company reports

**FortisAlberta decision on capital tracker expected in Q1/15.** FortisAlberta filed a combined 2013, 2014, and 2015 capital tracker application and is expecting a decision from the Alberta Utilities Commission (AUC) in Q1/15. The AUC has approved an interim rate to recover 60% of revenues subject to the capital tracker. Based on the current capital expenditure plan, the potential revenue shortfall in 2013 and 2014 if 100% of the capital tracker is not approved is \$8.6 million and \$18.9 million, respectively.

**\$450 million potential Tilbury LNG expansion.** Construction has started on the \$400 million Phase I expansion at Tilbury, which includes a one million gigajoule (GJ) storage tank and up to 36,000 GJ/day of liquefaction capacity. In addition, management highlighted the potential for an additional expansion at the Tilbury LNG terminal, which would add 140,000 GJ/day of liquefaction capacity, for an estimated cost of \$450 million. The second phase of the

expansion is not currently included in the capital expenditure forecast, however, the project has a conditional contract with Hawaiian Electric.

**\$600 million Woodfibre LNG pipeline expansion.** Management discussed Fortis' opportunity to expand compression and pipeline capacity from Eagle Mountain to the Woodfibre LNG site near Squamish in B.C. that is being proposed by a third party. The Woodfibre LNG facility is expected to be operational by Q1/17, subject to various approvals. The pipeline expansion design and permitting is currently underway, and should cost approximately \$600 million (not in management's utility rate base forecast).

**\$900 million Waneta expansion project continues to be on time and budget.** Management stated that the \$900 million hydro project continues to progress well and is expected to contribute to earnings beginning in Q2/15, with the first unit scheduled for water-up in Q4/14. Fortis has a 51% interest in the project, which is supported by a 40-year PPA with BC Hydro and FortisBC Electric.

### UNS Energy: The newest addition to the portfolio

Fortis recently received approval from the Arizona Corporation Commission (ACC) to acquire UNS Energy for total consideration of approximately US\$4.3 billion. UNS Energy owns regulated gas and electric assets in Arizona, with a rate base of roughly US\$3.0 billion. For additional details on the background of the UNS Energy acquisition, please refer to our *Research Comment* dated January 24, 2014 ([please click here for the report](#)).

**Constructive regulatory environment supports increased equity capitalization.** In addition to the \$2 billion 5-year capital expenditure plan, the company expects the equity thickness to gradually increase to 49% by 2018 (up from 41% in 2014). Management stated that the increased equity capitalization plan was proposed by the parties to the merger settlement and a 49% equity thickness is in line with many of the utilities in the state.

**UNS Energy is focused on coal reduction.** As part of the U.S. Environmental Protection Agency's (EPA) proposed clean power plan, a nationwide 30% reduction in CO<sub>2</sub> emissions from existing power plants from 2005 levels is expected by 2030. Goals were made state-by-state, with Arizona's reduction goal being a 52% reduction from 2012 levels. We note that progress on the reduction goals will be measured beginning in 2020. UNS Energy's coal reduction strategy includes, i) the shutdown of San Juan Unit 2 by 2018, as part of the New Mexico Regional Haze Settlement, ii) the use of natural gas only at the dual-fuel Sundt Unit 4 by 2017, as part of the Arizona Regional Haze Settlement and iii) the acquisition of an additional interest in Springerville Unit 1, bringing its total interest to 49.5%. Further the company has lined up replacement capacity from the acquisition of Gila River unit 3, which is expected to close in December 2014.

**Distributed generation rate design in progress.** Currently, fixed costs are largely recovered through volumetric charges. However, with distributed generation being adopted by some customers (e.g., customers building roof-top solar), UNS Energy is unable to collect its fixed costs from these customers through the volumetric charges, as customers significantly reduce consumption because less energy is being sourced from the grid. The company is currently working through the rate design to take distributed generation into consideration. Exhibit 4 illustrates the current rate design and the company's three part rate design for distributed generation users, which would ultimately result in a larger fixed charge to be connected to the grid with a comparatively smaller volumetric charge.

Exhibit 4: Proposed rate design for distributed generation

Source: Company reports

## Central Hudson: Rate freeze almost over and growth expected

**2015 rate application filed.** As part of the CH Energy acquisition, Central Hudson agreed to freeze customer rates for a 2-year period. In July 2014, the company filed for new rates, which are expected to become effective July 1, 2015 (end of the rate freeze). The filing includes an incremental revenue request of US\$46 million, an ROE of 9.0% and a 48% equity thickness while management is hoping to receive a multi-year settlement. We note that the company is expecting to mitigate 60% of the calculated revenue requirement, and as a result customer bills are only expected to increase by US\$5/month and US\$1/month for electric and gas customers, respectively.

**Additional transmission opportunities not included in forecast.** In addition to Central Hudson's US\$0.7 billion 5-year capital expenditure program, management sees opportunities for US\$250-US\$500 million of transmission growth including a \$50 million potential investment in electric transmission in New York and additional gas transmission to bring Marcellus gas into the region. In particular, the location of Central Hudson's service territory is uniquely positioned in the north to south electric transmission corridor to connect supply in northern New York to load pockets in the southern part of the state.

**Reforming the energy vision in New York.** Management noted that a generic proceeding to redefine distribution utilities' roles and align utilities' investments with earnings has been scheduled. The focus will be to increase customer knowledge, system-wide efficiencies, resource diversity and reliability along with reducing CO<sub>2</sub> emissions.

## Eastern Canada and Caribbean: Modest rate base growth

The Eastern Canadian and Caribbean segment is comprised of five regulated electric utilities and Fortis expects to spend approximately \$1.3 billion over the next five years, which would increase the combined rate base to \$2.7 billion (\$2.2 billion in 2014). The top priority for Eastern Canada is managing expected customer rate pressure, while pursuing additional generation will be the top priority for the Caribbean. Exhibit 5 breaks out the company's

expected capital plan by utility, with the majority of spending expected to be at Newfoundland Power.

Source: Company reports; RBC Capital Markets estimates

## **Valuation**

Our price target of \$37.00 is based on a forward P/E of 17.5x our 2016E EPS. A 17.5x multiple is consistent with the regulated utility peer group.

## **Price target impediments**

Rejection of the UNS deal, the risk of punitive regulatory or government decisions, economic/tourism conditions in its service territories, operational or financial issues at newly acquired businesses, and acquisitions or projects that fail to gain the confidence of investors may have implications for our price target.

## **Company description**

Fortis Inc. is a utility holding company with regulated utilities in Canada (Newfoundland & Labrador, PEI, Ontario, Alberta and B.C.), the U.S. (New York) and the Caribbean (Cayman Islands and Turks & Caicos). The company also has non-regulated operations in power (Canada, U.S. and Belize) and real estate (commercial and hospitality in Canada).

### Explanation of RBC Capital Markets Equity rating system

An analyst's 'sector' is the universe of companies for which the analyst provides research coverage. Accordingly, the rating assigned to a particular stock represents solely the analyst's view of how that stock will perform over the next 12 months relative to the analyst's sector average. Although RBC Capital Markets' ratings of Top Pick (TP)/Outperform (O), Sector Perform (SP), and

Underperform (U) most closely correspond to Buy, Hold/Neutral and Sell, respectively, the meanings are not the same because our ratings are determined on a relative basis.

## Ratings

**Top Pick (TP):** Represents analyst's best idea in the sector; expected to provide significant absolute total return over 12 months with a favorable risk-reward ratio.

**Outperform (O):** Expected to materially outperform sector average over 12 months.

**Sector Perform (SP):** Returns expected to be in line with sector average over 12 months.

**Underperform (U):** Returns expected to be materially below sector average over 12 months.

## Risk Rating

As of March 31, 2013, RBC Capital Markets suspends its Average and Above Average risk ratings. The **Speculative** risk rating reflects a security's lower level of financial or operating predictability, illiquid share trading volumes, high balance sheet leverage, or limited operating history that result in a higher expectation of financial and/or stock price volatility.

## Distribution of ratings

For the purpose of ratings distributions, regulatory rules require member firms to assign ratings to one of three rating categories - Buy, Hold/Neutral, or Sell - regardless of a firm's own rating categories. Although RBC Capital Markets' ratings of Top Pick(TP)/ Outperform (O), Sector Perform (SP), and Underperform (U) most closely correspond to Buy, Hold/Neutral and Sell, respectively, the meanings are not the same because our ratings are determined on a relative basis (as described below).

Distribution of ratings RBC Capital Markets, Equity Research As of 30-Sep-2014				
Rating	Count	Percent	Investment Banking Serv./Past 12 Mos.	
			Count	Percent
BUY [Top Pick & Outperform]	858	52.35	308	35.90
HOLD [Sector Perform]	683	41.67	151	22.11
SELL [Underperform]	98	5.98	8	8.16

References to a Recommended List in the recommendation history chart may include one or more recommended lists or model portfolios maintained by RBC Wealth Management or one of its affiliates. RBC Wealth Management recommended lists include a former list called the Prime Opportunity List (RL 3), the Guided Portfolio: Prime Income (RL 6), the Guided Portfolio: Large Cap

(RL 7), the Guided Portfolio: Dividend Growth (RL 8), the Guided Portfolio: Midcap 111 (RL 9), the Guided Portfolio: ADR (RL 10), and the Guided Portfolio: Global Equity (U.S.) (RL 11). RBC Capital Markets recommended lists include the Strategy Focus List and the Fundamental Equity Weightings (FEW) portfolios. The abbreviation 'RL On' means the date a security was placed on a Recommended List. The abbreviation 'RL Off' means the date a security was removed from a Recommended List.

## Equity valuation and risks

## Dissemination of research and short-term trade ideas

RBC Capital Markets endeavours to make all reasonable efforts to provide research simultaneously to all eligible clients, having regard to local time zones in overseas jurisdictions. Subject to any applicable regulatory considerations, "eligible clients" may include RBC Capital Markets institutional clients globally, the retail divisions of RBC Dominion Securities Inc. and RBC Capital Markets LLC, and affiliates. RBC Capital Markets' equity research is posted to our proprietary websites to ensure eligible clients receive coverage initiations and changes in rating, targets and opinions in a timely manner. Additional distribution may be done by the sales personnel via email, fax or regular mail. Clients may also receive our research via third party vendors. Please contact your investment advisor or institutional salesperson for more information regarding RBC Capital Markets research. RBC Capital Markets also provides eligible clients with access to SPARC on its proprietary INSIGHT website. SPARC contains market color and commentary, and may also contain Short-Term Trade Ideas regarding the securities of subject companies discussed in this or other research reports. SPARC may be accessed via the following hyperlink: <https://www.rbcinsight.com>. A Short-Term Trade Idea reflects the research analyst's directional view regarding the price of the security of a subject company in the coming days or weeks, based on market and trading events. A Short-Term Trade Idea may differ from the price targets and/or recommendations in our published research reports reflecting the research analyst's views of the longer-term (one year) prospects of the subject company, as a result of the differing time horizons, methodologies and/or other factors. Thus, it is possible that the security of a subject company that is considered a long-term 'Sector Perform' or even an 'Underperform' might be a short-term buying opportunity as a result of temporary selling pressure in the market; conversely, the security of a subject company that is rated a long-term 'Outperform' could be considered susceptible to a short-term downward price correction. Short-Term Trade Ideas are not ratings, nor are they part of any ratings system, and RBC Capital Markets generally does not intend, nor undertakes any obligation, to maintain or update Short-Term Trade Ideas. Short-Term Trade Ideas discussed in SPARC may not be suitable for all investors and have not been tailored to individual investor circumstances and objectives, and investors should make their own independent decisions regarding any Short-Term Trade Ideas discussed therein.

## Fortis Inc.

### Utilities lead an inflection point for EPS growth; upgrading to Outperform

**Our view:** We are upgrading Fortis shares to Outperform (from Sector Perform) and increasing our price target to \$40.00 (from \$37.00). We believe the shares are poised to benefit from an inflection point in EPS and dividend growth due to a combination of core utility rate base investment (especially Western Canada), the accretive UNS acquisition in Arizona, and regulated allowed ROEs that have stopped declining.

#### Key points:

**Core regulated utility growth is the 2015 strategy.** Currently, the North American regulated utility businesses represent approximately 85% of our forecast earnings. Management has emphasized that its focus is on core utility growth over the next several years. Specifically, we believe that core regulated utility growth will be the dominant theme in 2015, as the company is looking to showcase the earnings from its two recent U.S. acquisitions. Therefore, we believe that M&A activities will be put on the back burner for at least 2015.

**Rate base growth driven organically in the near term.** During the company's investor day earlier this month, management highlighted that the company is entering a period of significant organic growth, with the expected 4-year CAGR in rate base through 2018 expected to be 7% (and possibly as high as 8.5% if some LNG-related projects come through in B.C.). The company set out a 5-year capital expenditure program of \$9.3 billion, which could increase to \$10.3 billion if the potential LNG-related infrastructure projects move forward.

**A focus on organic growth over M&A activity should be well received by the market.** A year without M&A would provide a full year of "clean" results, such that the earnings power of the company can be showcased after its two recent U.S. acquisitions. We are positive on this strategy as it reduces the risk of a capital overhang that is typically associated with M&A activity. Furthermore, we believe that the company is able to fund its current 5-year rate base capital plan (excluding LNG-related activities) without issuing common equity.

**Valuation: increasing price target to \$40.00 (from \$37.00); conversion of debentures could provide a nice entry point.** Our \$40.00 price target is based on 18.5x (previously 17.5x) our 2016 EPS. The increase in our P/E multiple brings the valuation in line with the 5-year and 10-year averages. With the conversion of the debentures used to finance the UNS acquisition, we believe that any softness in the share price would represent an attractive entry point.

## Target/Upside/Downside Scenarios

Exhibit 1: Fortis Inc.

Source: Bloomberg and RBC Capital Markets estimates for Upside/Downside/Target

### Target price/ base case

Our \$40.00 price target is based on a P/E of 18.5x applied to the forward EPS. An 18.5x multiple is consistent with the regulated utility peer group.

### Upside scenario

For our upside scenario of \$46.00, we assume that P/E valuations fully reflect the level of long-term interest rates, which we see as providing roughly 1.5x upside in the P/E multiple. Furthermore, our upside scenario includes the LNG-related rate base spending comes to fruition.

### Downside scenario

For our downside scenario of \$33.00, we assume a 100 basis point increase in interest rates, which we believe could translate into an almost 3x downside in the P/E multiple.

## Investment summary

We expect Fortis's shares to outperform other Energy Infrastructure companies in our coverage universe for the following reasons:

**Good defensive investment.** Against the backdrop of oil price weakness and general market volatility, we believe that the historically wide valuation discount will begin to narrow resulting in better-expected relative performance for the Regulated Utility stocks. With more than 90% of 2015 earnings expected to come from regulated and/or long-term contracted utility infrastructure, we believe that the stock is at an inflection point for EPS and dividend growth given the combination of continued above average rate base growth in its Western Canadian utilities, the accretive UNS acquisition and a stabilization for regulated ROEs.

**Entering a period of significant rate base growth.** The company is entering a period of significant organic growth, with the expected 4-year CAGR in rate base through 2018 expected to be 7%. We like that the expected rate base is driven by organic growth and any M&A activities in the future would result in additional upside.

**Additional upside from LNG optionality.** We like the upside optionality from the potential LNG-related infrastructure projects that could unfold over the course of the coming year. If the LNG projects come to fruition, Fortis' 4-year CAGR in rate base through 2018 expected to be as high as 8.5%.

**Potential catalysts:** Positive regulatory decision for capital tracker; a materially higher-than-expected increase in the annual dividend; and support for LNG related projects.

**Key risks:** The risk of punitive regulatory or government decisions, economic/tourism conditions in its service territories, operational or financial issues at newly acquired businesses, and acquisitions or projects that fail to gain the confidence of investors.

## Organic growth is the key driver over the next five years

We upgrade Fortis shares to Outperform (up from Sector Perform), as the company is entering a period of significant organic growth, with the expected 4-year CAGR in rate base through 2018 expected to be 7% (and possibly as high as 8.5% if some LNG-related projects come through in B.C.). Furthermore, as highlighted in our *Industry Comment* also published today, we believe that the valuation gap between the regulated utilities and the broader Canadian Energy Infrastructure group will narrow, as volatile markets focus investors' attention on the utility names.

### Robust organic 5-year rate base growth expected

During the company's investor day earlier this month (please refer to our [Research Comment](#), dated October 1, 2014), management set out a 5-year capital expenditure program of \$9.3 billion, which indicates an annual average spend of \$1.8 billion. The annual average capital spend could increase to roughly \$2 billion if the potential LNG-related infrastructure projects move forward. The 5-year capital expenditure program would translate to a 4-year rate base CAGR of 7% (8.5% with the potential LNG projects).

Exhibit 2: Five-year consolidated rate base growth with and without the potential LNG projects (in \$ billions)

Source: Company reports

### No capital overhang with M&A activity expected to move to the back burner

We are positive on management's strategy to focus on integrating the two U.S. acquisitions and providing investors with a "clean" year to demonstrate the organic growth and the earnings power of the regulated utility assets. Although we believe that M&A will continue to form part of Fortis' longer-term growth strategy, focusing on organic growth in the coming year will reduce the risk of a capital overhang, as we believe the company will be able to fund its current rate base growth (excluding LNG-related activity) without the need to issue common equity.

### LNG-related growth provides upside optionality

Management sees the potential for an additional \$1.1 billion in utility rate base spending in B.C. related to liquefied natural gas. One of the projects would expand the existing Tilbury LNG facility, with the other project involving a gas pipeline connection to a proposed third-party liquefaction terminal. We believe that if both LNG projects move forward, the company may have to issue common equity.

Source: Company reports; RBC Capital Markets estimates

## **Valuation**

Our price target of \$40.00 is based on a forward P/E of 18.5x our 2016E EPS. An 18.5x multiple is consistent with the regulated utility peer group.

## **Price target impediments**

Rejection of the UNS deal, the risk of punitive regulatory or government decisions, economic/tourism conditions in its service territories, operational or financial issues at newly acquired businesses, and acquisitions or projects that fail to gain the confidence of investors may have implications for our price target.

## **Company description**

Fortis Inc. is a utility holding company with regulated utilities in Canada (Newfoundland & Labrador, PEI, Ontario, Alberta, and B.C.), the U.S. (Arizona and New York) and the Caribbean (Cayman Islands and Turks & Caicos). The company also has non-regulated operations in power (Canada, U.S., and Belize) and real estate (commercial and hospitality in Canada).

### Explanation of RBC Capital Markets Equity rating system

An analyst's 'sector' is the universe of companies for which the analyst provides research coverage. Accordingly, the rating assigned to a particular stock represents solely the analyst's view of how that stock will perform over the next 12 months relative to the analyst's sector average. Although RBC Capital Markets' ratings of Top Pick (TP)/Outperform (O), Sector Perform (SP), and Underperform (U) most closely correspond to Buy, Hold/Neutral and Sell, respectively, the meanings are not the same because our ratings are determined on a relative basis.

## Ratings

**Top Pick (TP):** Represents analyst's best idea in the sector; expected to provide significant absolute total return over 12 months with a favorable risk-reward ratio.

**Outperform (O):** Expected to materially outperform sector average over 12 months.

**Sector Perform (SP):** Returns expected to be in line with sector average over 12 months.

**Underperform (U):** Returns expected to be materially below sector average over 12 months.

## Risk Rating

As of March 31, 2013, RBC Capital Markets suspends its Average and Above Average risk ratings. The **Speculative** risk rating reflects a security's lower level of financial or operating predictability, illiquid share trading volumes, high balance sheet leverage, or limited operating history that result in a higher expectation of financial and/or stock price volatility.

## Distribution of ratings

For the purpose of ratings distributions, regulatory rules require member firms to assign ratings to one of three rating categories - Buy, Hold/Neutral, or Sell - regardless of a firm's own rating categories. Although RBC Capital Markets' ratings of Top Pick(TP)/ Outperform (O), Sector Perform (SP), and Underperform (U) most closely correspond to Buy, Hold/Neutral and Sell, respectively, the meanings are not the same because our ratings are determined on a relative basis (as described below).

Distribution of ratings RBC Capital Markets, Equity Research As of 30-Sep-2014				
Rating	Count	Percent	Investment Banking Serv./Past 12 Mos.	
			Count	Percent
BUY [Top Pick & Outperform]	858	52.35	308	35.90
HOLD [Sector Perform]	683	41.67	151	22.11
SELL [Underperform]	98	5.98	8	8.16

References to a Recommended List in the recommendation history chart may include one or more recommended lists or model portfolios maintained by RBC Wealth Management or one of its affiliates. RBC Wealth Management recommended lists include a former list called the Prime Opportunity List (RL 3), the Guided Portfolio: Prime Income (RL 6), the Guided Portfolio: Large Cap (RL 7), the Guided Portfolio: Dividend Growth (RL 8), the Guided Portfolio: Midcap 111 (RL 9), the Guided Portfolio: ADR (RL 10),

and the Guided Portfolio: Global Equity (U.S.) (RL 11). RBC Capital Markets recommended lists include the Strategy Focus List and the Fundamental Equity Weightings (FEW) portfolios. The abbreviation 'RL On' means the date a security was placed on a Recommended List. The abbreviation 'RL Off' means the date a security was removed from a Recommended List.

## Equity valuation and risks

For valuation methods used to determine, and risks that may impede achievement of, price targets for covered companies, please see the most recent company-specific research report at <https://www.rbcinsight.com> or send a request to RBC Capital Markets Research Publishing, P.O. Box 50, 200 Bay Street, Royal Bank Plaza, 29th Floor, South Tower, Toronto, Ontario M5J 2W7.

## Conflicts policy

RBC Capital Markets Policy for Managing Conflicts of Interest in Relation to Investment Research is available from us on request. To access our current policy, clients should refer to

or send a request to RBC Capital Markets Research Publishing, P.O. Box 50, 200 Bay Street, Royal Bank Plaza, 29th Floor, South Tower, Toronto, Ontario M5J 2W7. We reserve the right to amend or supplement this policy at any time.

## Dissemination of research and short-term trade ideas

RBC Capital Markets endeavours to make all reasonable efforts to provide research simultaneously to all eligible clients, having regard to local time zones in overseas jurisdictions. Subject to any applicable regulatory considerations, "eligible clients" may include RBC Capital Markets institutional clients globally, the retail divisions of RBC Dominion Securities Inc. and RBC Capital Markets LLC, and affiliates. RBC Capital Markets' equity research is posted to our proprietary websites to ensure eligible clients receive coverage initiations and changes in rating, targets and opinions in a timely manner. Additional distribution may be done by the sales personnel via email, fax or regular mail. Clients may also receive our research via third party vendors. Please contact your investment advisor or institutional salesperson for more information regarding RBC Capital Markets research. RBC Capital Markets also provides eligible clients with access to SPARC on its proprietary INSIGHT website. SPARC contains market color and commentary, and may also contain Short-Term Trade Ideas regarding the securities of subject companies discussed in this or other research reports. SPARC may be accessed via the following hyperlink: <https://www.rbcinsight.com>. A Short-Term Trade Idea reflects the research analyst's directional view regarding the price of the security of a subject company in the coming days or weeks, based on market and trading events. A Short-Term Trade Idea may differ from the price targets and/or recommendations in our published research reports reflecting the research analyst's views of the longer-term (one year) prospects of the subject company, as a result of the differing time horizons, methodologies and/or other factors. Thus, it is possible that the security of a subject company that is considered a long-term 'Sector Perform' or even an 'Underperform' might be a short-term buying opportunity as a result of temporary selling pressure in the market; conversely, the security of a subject company that is rated a long-term 'Outperform' could be considered susceptible to a short-term downward price correction. Short-Term Trade Ideas are not ratings, nor are they part of any ratings system, and RBC Capital Markets generally does not intend, nor undertakes any obligation, to maintain or update Short-Term Trade Ideas. Short-Term Trade Ideas discussed in SPARC may not be suitable for all investors and have not been tailored to individual investor circumstances and objectives, and investors should make their own independent decisions regarding any Short-Term Trade Ideas discussed therein.

## Fortis (FTS): Messy transition quarter due to the close of the UNS acquisition

Sentiment Indicator : neutral

Posted by Robert Kwan on Friday, November 07 2014, 7:27 AM ET

### Details

- Q3/14 normalized EPS (company-calculated) was \$0.33 compared to our estimate of \$0.25 and \$0.24 in Q3/13. The reported EPS of \$0.06 was adjusted for costs due to the closing of the UNS transaction. Nevertheless, the higher-than-expected results for the quarter are almost entirely due to the timing/seasonality of UNS' earnings. Absent of UNS, the remaining results appear to be modestly short of expectations.
- Canadian regulated utility earnings were \$36 million compared to our estimate of \$40 million with the shortfall almost entirely being attributable to FortisBC Electric, which we believe is mostly due to the timing of the booking of earnings.
- The other major variance for the quarter was Fortis Generation (non-regulated), which posted earnings of \$4 million compared to our estimate of \$8 million and \$8 million a year-ago. Lower hydro production in Belize was cited as a key driver behind the lower results.
- Management continues to expect capital spending from 2014 to 2018 to exceed \$9 billion. Gross consolidated capex for 2014 is expected to be roughly \$1.8 billion with the increase from the \$1.4 billion figure in the Q2/14 disclosure primarily representing spending at UNS now that the acquisition has closed.

Conference call: today 10:00 AM (ET)

1-877-223-4471

### Our take: neutral

With the quarterly results representing a transition quarter related to the closing of the UNS transaction, we believe that the market should look past the quarter and focus on 2015 being an inflection point for earnings and dividend growth with a full-year of UNS' results and a lack of noise related to the financing of UNS (i.e., convertible debentures) and costs related to the acquisition of UNS that were booked in Q3/14.

## Fortis Inc.

### Looking past the messy quarter to a bright future

**Our view:** While the solid headline adjusted EPS figure helps our positive call, we think that investors should look through the transition quarter due to the closing of the UNS acquisition toward a bright 2015, where the story should be core utility growth free of M&A noise. After four years of \$0.04/share dividend increases (3% CAGR), we expect more meaningful dividend growth to unfold for 2015.

#### Key points:

**Q3/14 results ahead of our expectations although the results were messy.** Adjusted EPS was \$0.35, which compared to our estimate of \$0.25 and \$0.24 in Q3/13. During the quarter, Fortis closed the acquisition of UNS, and we note that our estimate was structurally low due to the timing of the booking of UNS earnings in addition to the seasonality of the UNS earnings. Trying to sift through the UNS "noise", the quarter appeared to be slightly short of expectations.

**More meaningful dividend growth is on the horizon.** After four years of raising the dividend by \$0.04/share annually (about a 3% CAGR), we expect Fortis to announce a 6% increase in roughly a month's time (mid-December is typically when Fortis raises the annual dividend). We believe a larger increase than the last four years would be a sign of management's confidence in the growth profile for the company. We note that based on our earnings forecast, our 6% dividend increase could prove to be a bit conservative if Fortis decides to pay out 70% of EPS.

**Modest changes to our forecast.** Our new 2014 and 2015 EPS estimates are \$1.87 and \$2.00 (from \$1.79 and \$2.02), respectively. The change in 2014 primarily reflects the Q3/14 results and a higher expected recovery of capital tracker revenues for FortisAlberta, while the slight decline in 2015 is driven by modestly higher Corporate costs (net of a re-allocation between UNS and Corporate in our segment forecast). We remain comfortable with our 2016 EPS estimate of \$2.13 and have left it unchanged.

**A solid defensive stock with an attractive regulated utility growth story and an inflection point for dividend growth.** Following our upgrade of the shares to Outperform on October 27, our positive thesis remains intact post Q3/14 results. We continue to like Fortis's regulated utility focus with above-average growth (7% forecast rate base CAGR) that we see as driving an inflection point for dividend growth.

**Valuation.** Our \$40.00 price target is based on a P/E of 18.5x applied to the forward EPS. An 18.5x multiple is consistent with the regulated utility peer group.

## Target/Upside/Downside Scenarios

Exhibit 1: Fortis Inc.

Source: Bloomberg and RBC Capital Markets estimates for Upside/Downside/Target

### Target price/base case

Our \$40.00 price target is based on a P/E of 18.5x applied to the forward EPS. An 18.5x multiple is consistent with the regulated utility peer group.

### Upside scenario

For our upside scenario of \$46.00, we assume that P/E valuations fully reflect the level of long-term interest rates, which we see as providing roughly 1.5x upside in the P/E multiple. Furthermore, our upside scenario includes the LNG-related rate base spending comes to fruition.

### Downside scenario

For our downside scenario of \$33.00, we assume a 100 basis point increase in interest rates, which we believe could translate into an almost 3x downside in the P/E multiple.

## Investment summary

We expect Fortis's shares to outperform other Energy Infrastructure companies in our coverage universe for the following reasons:

**Good defensive investment.** Against the backdrop of oil price weakness and general market volatility, we believe that the historically wide valuation discount will begin to narrow resulting in better-expected relative performance for the Regulated Utility stocks. With more than 90% of 2015 earnings expected to come from regulated and/or long-term contracted utility infrastructure, we believe that the stock is at an inflection point for EPS and dividend growth given the combination of continued above average rate base growth in its Western Canadian utilities, the accretive UNS acquisition and a stabilization for regulated ROEs.

**Entering a period of significant rate base growth.** The company is entering a period of significant organic growth, with the expected 4-year CAGR in rate base through 2018 expected to be 7%. We like that the expected rate base is driven by organic growth and any M&A activities in the future would result in additional upside.

**Additional upside from LNG optionality.** We like the upside optionality from the potential LNG-related infrastructure projects that could unfold over the course of the coming year. If the LNG projects come to fruition, Fortis' 4-year CAGR in rate base through 2018 expected to be as high as 8.5%.

**Potential catalysts:** Positive regulatory decision for capital tracker; a materially higher-than-expected increase in the annual dividend; and support for LNG related projects.

**Key risks:** The risk of punitive regulatory or government decisions, economic/tourism conditions in its service territories, operational or financial issues at newly acquired businesses, and acquisitions or projects that fail to gain the confidence of investors.

## A messy quarter with the UNS acquisition

Normalized EPS for Q3/14 was \$0.35 compared to our estimate of \$0.25 and \$0.24 in Q3/13. Although the results were ahead of our expectations, the results were impacted by the timing and seasonality of the UNS acquisition closing. During the quarter, Fortis closed the acquisition of UNS, and we note that our estimate was structurally low due to the timing of the booking of UNS earnings in addition to the seasonality of the UNS earnings. Trying to sift through the UNS “noise”, the quarter appeared to be slightly short of expectations. Furthermore, we note that FortisBC Electric and Non-regulated generation results were both shy of our expectations. However, we do not see the quarterly results as having a material impact on our outlook for the company.

A summary of the Q3/14 normalized earnings is detailed in Exhibit 2.

## Highlights during the quarter

For commentary on the recent investor day, [please click here](#).

**UNS acquisition completed.** During the quarter, Fortis completed the US\$4.3 billion acquisition of UNS in Arizona. The company financed a portion of the acquisition with the sale of \$1.8 billion of convertible debentures, with the first installment proceeds of \$600 million received in January. Proceeds from the final installment of approximately \$1.2 billion were received on October 28. Furthermore, in September, Fortis issued \$600 million in preferred shares to finance the “equity” component of the UNS acquisition.

**FortisAlberta capital tracker application decision expected in Q1/15.** In May 2014, FortisAlberta filed a combined 2013, 2014, and 2015 capital tracker application as required by the Alberta Utilities Commission. A hearing related to the combined capital tracker application was held in October 2014, and management expects a decision on the capital tracker application in Q1/15. We note that FortisAlberta continues to recognize capital tracker revenue based on the interim rate of 60% and any adjustment by the regulator to the interim decision will result in an adjustment to FortisAlberta's revenues/earnings at the time of the decision. We note that Fortis has filed for approval to include 90% of the capital tracker revenues as part of its 2015 rate application, and based on prior AUC approvals for other utilities, we believe it is likely that Fortis will receive approval to include at least 90% of capital tracker revenue in customer rates.

**Waneta hydro project making good progress.** Construction continues on the \$900 million Waneta expansion project, which is 51%-owned by Fortis. The project remains on schedule and on budget, with an expected commissioning in the spring 2015.

**Commenced construction on the Tilbury LNG facility.** Fortis began construction on the Tilbury liquified natural gas facility in October. The expansion, which includes a second LNG tank and a new liquefier, is expected to cost \$400 million and will be included in the company's regulated rate base. The expansion is expected to be in service in H2/16.

## Tweaking estimates for the quarter and corporate costs

We have revised our 2014 and 2015 EPS estimates to \$1.87 and \$2.00 (from \$1.79 and \$2.02), respectively. The change in 2014 primarily reflects the Q3/14 results and a higher expected recovery of capital tracker revenues for FortisAlberta (assumes a rate application decision received prior to reporting Q4/14 results), while the slight decline in 2015 is driven by modestly higher Corporate costs (higher costs net of a re-allocation between UNS and Corporate in our segment forecast). We remain comfortable with our 2016 EPS estimate of \$2.13 and it remains unchanged.

Source: Company reports; RBC Capital Markets estimates

## **Valuation**

Our price target of \$40.00 is based on a forward P/E of 18.5x our 2016E EPS. An 18.5x multiple is consistent with the regulated utility peer group.

## **Price target impediments**

Rejection of the UNS deal, the risk of punitive regulatory or government decisions, economic/tourism conditions in its service territories, operational or financial issues at newly acquired businesses, and acquisitions or projects that fail to gain the confidence of investors may have implications for our price target.

## **Company description**

Fortis Inc. is a utility holding company with regulated utilities in Canada (Newfoundland & Labrador, PEI, Ontario, Alberta, and B.C.), the U.S. (Arizona and New York) and the Caribbean (Cayman Islands and Turks & Caicos). The company also has non-regulated operations in power (Canada, U.S., and Belize) and real estate (commercial and hospitality in Canada).

### Explanation of RBC Capital Markets Equity rating system

An analyst's 'sector' is the universe of companies for which the analyst provides research coverage. Accordingly, the rating assigned to a particular stock represents solely the analyst's view of how that stock will perform over the next 12 months relative to the analyst's sector average. Although RBC Capital Markets' ratings of Top Pick (TP)/Outperform (O), Sector Perform (SP), and Underperform (U) most closely correspond to Buy, Hold/Neutral and Sell, respectively, the meanings are not the same because our ratings are determined on a relative basis.

## Ratings

**Top Pick (TP):** Represents analyst's best idea in the sector; expected to provide significant absolute total return over 12 months with a favorable risk-reward ratio.

**Outperform (O):** Expected to materially outperform sector average over 12 months.

**Sector Perform (SP):** Returns expected to be in line with sector average over 12 months.

**Underperform (U):** Returns expected to be materially below sector average over 12 months.

## Risk Rating

As of March 31, 2013, RBC Capital Markets suspends its Average and Above Average risk ratings. The **Speculative** risk rating reflects a security's lower level of financial or operating predictability, illiquid share trading volumes, high balance sheet leverage, or limited operating history that result in a higher expectation of financial and/or stock price volatility.

## Distribution of ratings

For the purpose of ratings distributions, regulatory rules require member firms to assign ratings to one of three rating categories - Buy, Hold/Neutral, or Sell - regardless of a firm's own rating categories. Although RBC Capital Markets' ratings of Top Pick(TP)/ Outperform (O), Sector Perform (SP), and Underperform (U) most closely correspond to Buy, Hold/Neutral and Sell, respectively, the meanings are not the same because our ratings are determined on a relative basis (as described below).

Distribution of ratings RBC Capital Markets, Equity Research As of 30-Sep-2014				
Rating	Count	Percent	Investment Banking Serv./Past 12 Mos.	
			Count	Percent
BUY [Top Pick & Outperform]	858	52.35	308	35.90
HOLD [Sector Perform]	683	41.67	151	22.11
SELL [Underperform]	98	5.98	8	8.16

References to a Recommended List in the recommendation history chart may include one or more recommended lists or model portfolios maintained by RBC Wealth Management or one of its affiliates. RBC Wealth Management recommended lists include a former list called the Prime Opportunity List (RL 3), the Guided Portfolio: Prime Income (RL 6), the Guided Portfolio: Large Cap (RL 7), the Guided Portfolio: Dividend Growth (RL 8), the Guided Portfolio: Midcap 111 (RL 9), the Guided Portfolio: ADR (RL 10),

and the Guided Portfolio: Global Equity (U.S.) (RL 11). RBC Capital Markets recommended lists include the Strategy Focus List and the Fundamental Equity Weightings (FEW) portfolios. The abbreviation 'RL On' means the date a security was placed on a Recommended List. The abbreviation 'RL Off' means the date a security was removed from a Recommended List.

## Equity valuation and risks

For valuation methods used to determine, and risks that may impede achievement of, price targets for covered companies, please see the most recent company-specific research report at <https://www.rbcinsight.com> or send a request to RBC Capital Markets Research Publishing, P.O. Box 50, 200 Bay Street, Royal Bank Plaza, 29th Floor, South Tower, Toronto, Ontario M5J 2W7.

## Conflicts policy

RBC Capital Markets Policy for Managing Conflicts of Interest in Relation to Investment Research is available from us on request. To access our current policy, clients should refer to

<https://www.rbccm.com/global/file-414164.pdf>

or send a request to RBC Capital Markets Research Publishing, P.O. Box 50, 200 Bay Street, Royal Bank Plaza, 29th Floor, South Tower, Toronto, Ontario M5J 2W7. We reserve the right to amend or supplement this policy at any time.

## Dissemination of research and short-term trade ideas

RBC Capital Markets endeavours to make all reasonable efforts to provide research simultaneously to all eligible clients, having regard to local time zones in overseas jurisdictions. Subject to any applicable regulatory considerations, "eligible clients" may include RBC Capital Markets institutional clients globally, the retail divisions of RBC Dominion Securities Inc. and RBC Capital Markets LLC, and affiliates. RBC Capital Markets' equity research is posted to our proprietary websites to ensure eligible clients receive coverage initiations and changes in rating, targets and opinions in a timely manner. Additional distribution may be done by the sales personnel via email, fax or regular mail. Clients may also receive our research via third party vendors. Please contact your investment advisor or institutional salesperson for more information regarding RBC Capital Markets research. RBC Capital Markets also provides eligible clients with access to SPARC on its proprietary INSIGHT website. SPARC contains market color and commentary, and may also contain Short-Term Trade Ideas regarding the securities of subject companies discussed in this or other research reports. SPARC may be accessed via the following hyperlink: <https://www.rbcinsight.com>. A Short-Term Trade Idea reflects the research analyst's directional view regarding the price of the security of a subject company in the coming days or weeks, based on market and trading events. A Short-Term Trade Idea may differ from the price targets and/or recommendations in our published research reports reflecting the research analyst's views of the longer-term (one year) prospects of the subject company, as a result of the differing time horizons, methodologies and/or other factors. Thus, it is possible that the security of a subject company that is considered a long-term 'Sector Perform' or even an 'Underperform' might be a short-term buying opportunity as a result of temporary selling pressure in the market; conversely, the security of a subject company that is rated a long-term 'Outperform' could be considered susceptible to a short-term downward price correction. Short-Term Trade Ideas are not ratings, nor are they part of any ratings system, and RBC Capital Markets generally does not intend, nor undertakes any obligation, to maintain or update Short-Term Trade Ideas. Short-Term Trade Ideas discussed in SPARC may not be suitable for all investors and have not been tailored to individual investor circumstances and objectives, and investors should make their own independent decisions regarding any Short-Term Trade Ideas discussed therein.

## Analyst certification

## Fortis (FTS): Dividend increase and timing in line with expectations

Sentiment Indicator : neutral

Posted by Robert Kwan on Wednesday, December 17 2014, 12:07 PM ET

### Details

- Fortis announced an \$0.08/share (+6.25%) increase in the dividend to a new annualized rate of \$1.36/share (previously, \$1.28/share). The quarterly dividend will be payable on March 1, 2015 to shareholders of record at the close of business on February 17, 2015.
- The new dividend matched our forecast and the timing is in line with when Fortis has historically announced dividend increases for the upcoming year.
- The stepped up dividend growth is a function of core growth in the underlying utility business coupled with the expected accretion from the recently-closed UNS regulated utility acquisition in Arizona. Fortis has a long track record of annual dividend increases that now totals 42 consecutive years.

### Our take : neutral

While a good development on an absolute basis, we believe the timing and the magnitude of the dividend increase was anticipated by the market. As such, we do not expect this announcement to materially impact the share price.

## Fortis (FTS): Q4/14 results modestly below expectations

Sentiment Indicator : neutral

Posted by Robert Kwan on Thursday, February 19 2015, 6:59 AM ET

### Details

- Q4/14 EPS (company-calculated) was \$0.44, compared to our estimate of \$0.51 and \$0.48 in Q4/13. Consensus for the quarter was \$0.49.
- Based on our preliminary review, it appears that the shortfall was due to a combination of the capital tracker recovery decision not having been received in Alberta (i.e., the positive impact not being booked in Q4/14 results per our estimate) along with modestly lower-than-expected results for FortisBC Energy, FortisBC Electric, Central Hudson and the utilities in the Caribbean. Of note, Central Hudson's results were impacted by storm and other non-recurring costs in Q4/14.
- Management expects capital spending to approach \$9 billion from 2015 to 2019, in line with previous guidance of capex in excess of \$9 billion from 2014 to 2018. Gross consolidated capex for 2015 is expected to exceed \$2 billion, with the increase from 2014 primarily representing a full year of spending at UNS, which was acquired in Q3/14.
- On the strategic review of the Properties business, management stated that it expects to make a decision on the future of the business in Q2/15.
- The construction of the Waneta hydro projects remains on-time and on-budget with an expected in-service date in the spring of 2015.

### Conference call: today at 10:00 AM (ET)

1-877-223-4471

### Our take: neutral

We believe that the market will look past the quarter and focus on 2015 being an inflection point for earnings and dividend growth, with a full year of UNS' results and a lack of noise in the numbers relating to M&A activity (i.e., UNS costs and a partial year in 2014).

February 20, 2015

## Fortis Inc.

### Onwards to what we see as a solid 2015

**Our view:** While Q4/14 earnings fell modestly short of our expectations, we maintain our positive outlook for the shares. We are looking forward to a bright 2015, where the core utility organic growth story should be free of M&A noise, showcasing core earnings and accretion from the U.S. acquisitions.

#### Key points:

**Q4/14 results modestly below our forecast, but mostly due to timing related to a regulatory decision.** Normalized EPS was \$0.45, below our estimate of \$0.51 and \$0.48 in Q4/13. The shortfall was due to a combination of the capital tracker recovery decision for 2014 not having been received in Alberta (i.e., the positive impact not being booked in Q4/14 results per our estimate) and modestly lower-than-expected results for FortisBC Energy, FortisBC Electric, Central Hudson, and the utilities in the Caribbean. Of note, Central Hudson's results were impacted by storm and other non-recurring costs in Q4/14. Please see Exhibit 2 on page 3 for additional details.

**FX is a nice tailwind.** The two major assets with U.S. dollar exposure are UNS, the regulated utility in Arizona, and Central Hudson, the regulated utility in New York state. On the conference call, management noted that a \$0.05 change in the exchange rate translates to a roughly \$0.04/share EPS impact.

**Modest increase to our EPS estimates.** Our new 2015 and 2016 EPS estimates are \$2.06 and \$2.22 (up from \$2.00 and \$2.13), respectively. The higher forecast primarily relates to a combination of slightly higher-than-expected rate base growth and a weaker Canadian dollar (i.e., positive for translation of UNS and Central Hudson earnings).

**A solid defensive stock with an attractive regulated utility growth story.** Following our upgrade of the shares to Outperform in October 2014, our positive thesis remains intact post the Q4/14 results. We continue to like Fortis's regulated utility focus with above-average growth (6.5% forecast rate base CAGR) and further upside growth optionality, mostly via projects in the B.C. natural gas utility.

**Valuation: increasing price target to \$44.00 (from \$40.00).** Our new price target is driven by a combination of the increase in our 2016 EPS estimate and a higher P/E valuation of 20x (up from 18.5x). The new P/E valuation is in line with what we use for similar regulated utility stocks and is supported by the historically low 10-year bond yields.

## Target/Upside/Downside Scenarios

Exhibit 1: Fortis Inc.

Source: Bloomberg and RBC Capital Markets estimates for Upside/Downside/Target

### Target price/base case

Our \$44.00 price target is based on a P/E of 20x applied to the forward EPS. A 20x multiple is consistent with the regulated utility peer group. A 20x P/E would be at the high end, but not a record high, for valuation, and we see this multiple well supported by historically low 10-year bond yields and a growth outlook that is generally stronger than most periods over the past 10 years.

### Upside scenario

For our upside scenario of \$50.00, we assume that P/E valuations fully reflect the level of long-term interest rates, which we see as providing roughly 1.5x upside in the P/E multiple. Furthermore, our upside scenario includes the LNG-related rate base spending comes to fruition.

### Downside scenario

For our downside scenario of \$33.00, we assume a 200 basis point increase in interest rates, which we believe could translate into an almost 5x downside in the P/E multiple.

## Investment summary

We expect Fortis's shares to outperform other Energy Infrastructure companies in our coverage universe for the following reasons:

**Good defensive investment.** Against the backdrop of oil price weakness and general market volatility, we believe that the historically wide valuation discount will begin to narrow resulting in better-expected relative performance for the Regulated Utility stocks. With more than 90% of 2015 earnings expected to come from regulated and/or long-term contracted utility infrastructure, we believe that the stock is at an inflection point for EPS and dividend growth given the combination of continued above average rate base growth in its Western Canadian utilities, the accretive UNS acquisition, and a stabilization for regulated ROEs.

**Entering a period of significant rate base growth.** The company is entering a period of significant organic growth, with the expected 5-year CAGR in rate base through 2019 expected to be 6.5%. We like that the expected rate base is driven by organic growth and any M&A activities in the future would result in additional upside.

**Additional upside from LNG optionality.** We like the upside optionality from the potential LNG-related infrastructure projects that could unfold over the course of the coming year. If the LNG projects come to fruition, Fortis' 5-year CAGR in rate base through 2019 expected to be as high as 7.5%.

**Potential catalysts:** Positive regulatory decision for capital tracker, and support for LNG related projects.

**Key risks:** The risk of punitive regulatory or government decisions, economic/tourism conditions in its service territories, operational or financial issues at newly acquired businesses, and acquisitions or projects that fail to gain the confidence of investors.

## Q4/14 results modestly below our forecast mostly due to regulatory timing

Normalized EPS was \$0.45, which was below our estimate of \$0.51 and \$0.48 in Q4/13. The shortfall was due to a combination of the capital tracker recovery decision for 2014 not having been received in Alberta (i.e., the positive impact not being booked in Q4/14 results per our estimate) and modestly lower-than-expected results for FortisBC Energy, FortisBC Electric, Central Hudson, and the utilities in the Caribbean. Of note, Central Hudson's results were impacted by storm and other non-recurring costs in Q4/14.

A summary of the Q4/14 normalized earnings is detailed in Exhibit 2.

Exhibit 2: Normalized earnings (in \$MM except per share figures)

Source: Company reports; RBC Capital Markets estimates

## Major regulatory and other items of note

- **Fortis Properties strategic review expected to wrap up in Q2/15.** Fortis's strategic review for its real estate business continues and management stated that it expects to complete the evaluation in Q2/15. Management noted that if a decision is made to dispose of the segment, the proceeds would be applied to the permanent financing for the UNS acquisition.
- **Central Hudson rate settlement appears to be well supported and consistent with prior guidance.** Central Hudson reached a settlement agreement for a three-year period beginning July 1, 2015, reflecting a 9% ROE and a 48% common equity component. The settlement agreement appears to be well supported by intervenors including regulatory commission staff. While the stated ROE is set to decline from the current 10% level, Central Hudson's earnings are expected to increase due to a combination of: previous additions to rate base that are not currently being recovered due to a rate freeze associated with Fortis's acquisition of Central Hudson; and the tailwind of translating the U.S. dollar earnings into Canadian dollars.

- **FortisAlberta set for two decisions in Q1/15.** The Alberta Utilities Commission (AUC) is expected to make a decision as part of its Generic Cost of Capital (GCOC) proceeding to set the ROE and capital structures for utilities in Alberta for 2013, 2014, and possibly 2015. The AUC is expected to also consider whether to re-introduce an ROE automatic adjustment formula going forward. With the allowed ROE already fairly low at 8.75%, we see limited downside from current levels, particularly compared to ROEs that are set by other provincial regulators. FortisAlberta is also expecting a decision from the AUC with respect to its capital tracker application to recover additional revenues for 2013 and 2014. Based on previous AUC decisions for other utilities in the province, we expect FortisAlberta to receive approval to increase the recovery to 90% of capital tracker revenues (up from 60% per the interim rates).
- **Projects in B.C. making headway.** The \$900 million Waneta hydro expansion remains on-time and on-budget, with an expected commissioning this spring. On the LNG side, the \$400 million Phase 1A of the Tilbury project has commenced and Fortis has approval to proceed with the \$450 million expansion of Tilbury Phase 1B although it is waiting for Hawaiian Electric to receive regulatory approval for the 15-year conditional LNG supply contract.

### Modestly increasing estimates

Our new 2015 and 2016 EPS estimates are \$2.06 and \$2.22 (up from \$2.00 and \$2.13), respectively. The higher forecast primarily relates to a combination of slightly higher-than-expected rate base growth and a weaker Canadian dollar (i.e., positive for translation of UNS and Central Hudson earnings). Corporate costs have also been increased, with the 2015 segment forecast consistent with Fortis's guidance of \$125–130 million of Corporate costs for the year.

We note that FortisAlberta is expected to receive a decision in Q1/15 from the Alberta Utilities Commission (AUC) related to the recovery of revenues related to the capital tracker for 2013 and 2014. The application seeks to collect 90% of the revenues (up from 60% in interim rates), and based on previous AUC decisions for other utilities in the province, we expect Fortis's application to be approved. If this is the case, Fortis is likely to book the related earnings (we estimate about \$0.05/share) in Q1/15, but this will all relate to prior periods. While the decision is important, we have not reflected this in our forecast for "normalized" EPS in 2015 as shown below in Exhibit 3.

## Exhibit 3: Financial forecast (in \$MM except per share figures)

	2013	2014	Q1/15E	Q2/15E	Q3/15E	Q4/15E	2015E	2016E	<i>Old</i>

Source: Company reports; RBC Capital Markets estimates

### Valuation

Our \$44.00 price target is based on a P/E of 20x applied to the forward EPS. A 20x multiple is consistent with the regulated utility peer group. A 20x P/E would be at the high end, but not a record high, for valuation, and we see this multiple well supported by historically low 10-year bond yields and a growth outlook that is generally stronger than most periods over the past 10 years.

### Price target impediments

Rejection of the UNS deal, the risk of punitive regulatory or government decisions, economic/tourism conditions in its service territories, operational or financial issues at newly acquired businesses, and acquisitions or projects that fail to gain the confidence of investors may have implications for our price target.

### Company description

Fortis Inc. is a utility holding company with regulated utilities in Canada (Newfoundland & Labrador, PEI, Ontario, Alberta, and B.C.), the U.S. (Arizona and New York) and the Caribbean (Cayman Islands and Turks & Caicos). The company also has non-regulated operations in power (Canada, U.S., and Belize) and real estate (commercial and hospitality in Canada).

## Required disclosures

### Non-U.S. analyst disclosure

Robert Kwan;Melissa Oliphant;Kelsey Roste (i) are not registered/qualified as research analysts with the NYSE and/or FINRA and (ii) may not be associated persons of the RBC Capital Markets, LLC and therefore may not be subject to FINRA Rule 2711 and NYSE Rule 472 restrictions on communications with a subject company, public appearances and trading securities held by a research analyst account.

### Conflicts disclosures

The analyst(s) responsible for preparing this research report received compensation that is based upon various factors, including total revenues of the member companies of RBC Capital Markets and its affiliates, a portion of which are or have been generated by investment banking activities of the member companies of RBC Capital Markets and its affiliates.

Please note that current conflicts disclosures may differ from those as of the publication date on, and as set forth in, this report. To access current conflicts disclosures, clients should refer to <https://www.rbccm.com/GLDisclosure/PublicWeb/DisclosureLookup.aspx?entityId=1> or send a request to RBC CM Research Publishing, P.O. Box 50, 200 Bay Street, Royal Bank Plaza, 29th Floor, South Tower, Toronto, Ontario M5J 2W7.

A member company of RBC Capital Markets or one of its affiliates managed or co-managed a public offering of securities for Fortis Inc. in the past 12 months.

A member company of RBC Capital Markets or one of its affiliates received compensation for investment banking services from Fortis Inc. in the past 12 months.

Royal Bank of Canada, together with its affiliates, beneficially owns 1 percent or more of a class of common equity securities of Fortis Inc..

A member company of RBC Capital Markets or one of its affiliates received compensation for products or services other than investment banking services from Fortis Inc. during the past 12 months. During this time, a member company of RBC Capital Markets or one of its affiliates provided non-securities services to Fortis Inc..

RBC Capital Markets is currently providing Fortis Inc. with non-investment banking securities-related services.

RBC Capital Markets is currently providing Fortis Inc. with non-securities services.

RBC Capital Markets has provided Fortis Inc. with investment banking services in the past 12 months.

RBC Capital Markets has provided Fortis Inc. with non-securities services in the past 12 months.

The author is employed by RBC Dominion Securities Inc., a securities broker-dealer with principal offices located in Toronto, Canada.

### Explanation of RBC Capital Markets Equity rating system

An analyst's 'sector' is the universe of companies for which the analyst provides research coverage. Accordingly, the rating assigned to a particular stock represents solely the analyst's view of how that stock will perform over the next 12 months relative to the analyst's sector average. Although RBC Capital Markets' ratings of Top Pick (TP)/Outperform (O), Sector Perform (SP), and Underperform (U) most closely correspond to Buy, Hold/Neutral and Sell, respectively, the meanings are not the same because our ratings are determined on a relative basis.

#### Ratings

**Top Pick (TP):** Represents analyst's best idea in the sector; expected to provide significant absolute total return over 12 months with a favorable risk-reward ratio.

**Outperform (O):** Expected to materially outperform sector average over 12 months.

**Sector Perform (SP):** Returns expected to be in line with sector average over 12 months.

**Underperform (U):** Returns expected to be materially below sector average over 12 months.

#### Risk Rating

As of March 31, 2013, RBC Capital Markets suspends its Average and Above Average risk ratings. The **Speculative** risk rating reflects a security's lower level of financial or operating predictability, illiquid share trading volumes, high balance sheet leverage, or limited operating history that result in a higher expectation of financial and/or stock price volatility.

## Distribution of ratings

For the purpose of ratings distributions, regulatory rules require member firms to assign ratings to one of three rating categories - Buy, Hold/Neutral, or Sell - regardless of a firm's own rating categories. Although RBC Capital Markets' ratings of Top Pick(TP)/ Outperform (O), Sector Perform (SP), and Underperform (U) most closely correspond to Buy, Hold/Neutral and Sell, respectively, the meanings are not the same because our ratings are determined on a relative basis (as described below).

Distribution of ratings RBC Capital Markets, Equity Research As of 31-Dec-2014				
Rating	Count	Percent	Investment Banking Serv./Past 12 Mos.	
			Count	Percent
BUY [Top Pick & Outperform]	897	52.92	290	32.33
HOLD [Sector Perform]	686	40.47	137	19.97
SELL [Underperform]	112	6.61	6	5.36

References to a Recommended List in the recommendation history chart may include one or more recommended lists or model portfolios maintained by RBC Wealth Management or one of its affiliates. RBC Wealth Management recommended lists include the Guided Portfolio: Prime Income (RL 6), the Guided Portfolio: Large Cap (RL 7), the Guided Portfolio: Dividend Growth (RL 8), the Guided Portfolio: Midcap 111 (RL 9), the Guided Portfolio: ADR (RL 10), and the Guided Portfolio: Global Equity (U.S.) (RL 11). RBC Capital Markets recommended lists include the Strategy Focus List and the Fundamental Equity Weightings (FEW) portfolios. The abbreviation 'RL On' means the date a security was placed on a Recommended List. The abbreviation 'RL Off' means the date a security was removed from a Recommended List.

## Equity valuation and risks

For valuation methods used to determine, and risks that may impede achievement of, price targets for covered companies, please see the most recent company-specific research report at <https://www.rbcinsight.com> or send a request to RBC Capital Markets Research Publishing, P.O. Box 50, 200 Bay Street, Royal Bank Plaza, 29th Floor, South Tower, Toronto, Ontario M5J 2W7.

## Conflicts policy

RBC Capital Markets Policy for Managing Conflicts of Interest in Relation to Investment Research is available from us on request. To access our current policy, clients should refer to

or send a request to RBC Capital Markets Research Publishing, P.O. Box 50, 200 Bay Street, Royal Bank Plaza, 29th Floor, South Tower, Toronto, Ontario M5J 2W7. We reserve the right to amend or supplement this policy at any time.

## Dissemination of research and short-term trade ideas

RBC Capital Markets endeavors to make all reasonable efforts to provide research simultaneously to all eligible clients, having regard to local time zones in overseas jurisdictions. RBC Capital Markets' equity research is posted to our proprietary website to ensure eligible clients receive coverage initiations and changes in ratings, targets and opinions in a timely manner. Additional distribution may be done by the sales personnel via email, fax, or other electronic means, or regular mail. Clients may also receive our research via third party vendors. RBC Capital Markets also provides eligible clients with access to SPARC on the Firms proprietary INSIGHT website, via email and via third-party vendors. SPARC contains market color and commentary regarding subject companies on which the Firm currently provides equity research coverage. Research Analysts may, from time to time, include short-term trade ideas in research reports and / or in SPARC. A short-term trade idea offers a short-term view on how a security may trade, based on market and trading events, and the resulting trading opportunity that may be available. A short-term trade idea may differ from the price targets and recommendations in our published research reports reflecting the research analyst's views of the longer-term (one year) prospects of the subject company, as a result of the differing time horizons, methodologies and/or other factors. Thus, it is possible that a subject company's common equity that is considered a long-term 'Sector Perform' or even an 'Underperform' might present a short-term buying opportunity as a result of temporary selling pressure in the market; conversely, a subject company's common equity rated a long-term 'Outperform' could be considered susceptible to a short-term downward price correction. Short-term trade ideas are not ratings, nor are they part of any ratings system, and the firm generally does not intend, nor undertakes any obligation, to maintain or update short-term trade ideas. Short-term trade ideas may not be suitable for all investors and have not been tailored to individual investor circumstances and objectives, and investors should make their own independent decisions regarding any securities or strategies discussed herein. Please contact your investment advisor or institutional salesperson for more information regarding RBC Capital Markets' research.

## Fortis Inc.

### Laying out the story south of the border

**Our view:** While the basic premise of the Investor Day in New York was to convey the story to U.S. investors, we still came away from the event with a number of interesting slides and updates. We believe that Fortis has a good story to tell involving below average risk utility growth and an ability to manage regulatory processes better than many utilities in North America.

#### Key points:

**Reiterating the core utility growth story.** Fortis continues to expect the roughly \$9 billion capital plan from 2015-2019 to deliver average rate base growth (including Waneta) of 6.5% on a compound annual basis with the potential for the growth rate to rise to 7.5% CAGR if the two LNG-related projects in B.C. move forward.

**Solid history of earning its allowed ROEs (and then some).** Fortis provided a history for each of its utilities comparing the allowed ROE to the achieved ROE. As shown in the exhibit, Fortis has consistently earned its allowed ROE while delivering upside in a number of years. The charts for each of Fortis' utilities is shown in Exhibit 3 beginning on page 4 of this note.

**No update on the Properties strategic alternatives process.** While the company specifically addressed the review, it continues to target completing the review process in Q2/15. Proceeds, if any, will be used to repay debt and bring the capital structure back in line with the long-term target of 55% debt (currently 57%).

**Alberta GCOC impact in line with our initial thoughts.** Although the Alberta Utilities Commission reduced the allowed ROE to 8.3% (down from 8.75%) while also reducing the equity component to 40% (down from 41%), Fortis does not see a material impact on the business under the current PBR structure. As we initially expected, the lower cost of capital parameters will negatively impact the capital tracker portion of revenues, but the base business which comprises roughly 75% of revenue is not expected to be directly impacted.

**Valuation.** Our \$44.00 price target is based on a P/E of 20x applied to the forward EPS. A 20x multiple is consistent with the regulated utility peer group. A 20x P/E would be at the high end, but not a record high, for valuation, and we see this multiple well supported by historically low 10-year bond yields and a growth outlook that is generally stronger than most periods over the past 10 years.

## Target/Upside/Downside Scenarios

Exhibit 1: Fortis Inc.

Source: Bloomberg and RBC Capital Markets estimates for Upside/Downside/Target

### Target price/base case

Our \$44.00 price target is based on a P/E of 20x applied to the forward EPS. A 20x multiple is consistent with the regulated utility peer group. A 20x P/E would be at the high end, but not a record high, for valuation, and we see this multiple well supported by historically low 10-year bond yields and a growth outlook that is generally stronger than most periods over the past 10 years.

### Upside scenario

For our upside scenario of \$50.00, we assume that P/E valuations fully reflect the level of long-term interest rates, which we see as providing roughly 1.5x upside in the P/E multiple. Furthermore, our upside scenario includes the LNG-related rate base spending comes to fruition.

### Downside scenario

For our downside scenario of \$33.00, we assume a 200 basis point increase in interest rates, which we believe could translate into an almost 5x downside in the P/E multiple.

## Investment summary

We expect Fortis's shares to outperform other Energy Infrastructure companies in our coverage universe for the following reasons:

**Good defensive investment.** Against the backdrop of oil price weakness and general market volatility, we believe that the historically wide valuation discount will begin to narrow resulting in better-expected relative performance for the Regulated Utility stocks. With more than 90% of 2015 earnings expected to come from regulated and/or long-term contracted utility infrastructure, we believe that the stock is at an inflection point for EPS and dividend growth given the combination of continued above average rate base growth in its Western Canadian utilities, the accretive UNS acquisition, and a stabilization for regulated ROEs.

**Entering a period of significant rate base growth.** The company is entering a period of significant organic growth, with the expected 5-year CAGR in rate base through 2019 expected to be 6.5%. We like that the expected rate base is driven by organic growth and any M&A activities in the future would result in additional upside.

**Additional upside from LNG optionality.** We like the upside optionality from the potential LNG-related infrastructure projects that could unfold over the course of the coming year. If the LNG projects come to fruition, Fortis' 5-year CAGR in rate base through 2019 expected to be as high as 7.5%.

**Potential catalysts:** Positive regulatory decision for capital tracker, and support for LNG related projects.

**Key risks:** The risk of punitive regulatory or government decisions, economic/tourism conditions in its service territories, operational or financial issues at newly acquired businesses, and acquisitions or projects that fail to gain the confidence of investors.

## Things we found interesting from the U.S. Investor Day

Fortis held its first U.S. Investor Day in New York, which allowed the company to get the story out to the U.S. investor base, particularly given the significant expansion in recent years into the U.S. via the acquisitions of Central Hudson and UNS. While premium valuations for Canadian utility stocks generally have been an impediment to greater U.S. (and international) investor interest, we believe that Fortis has a good story to tell involving below average risk utility growth and an ability to manage regulatory processes better than many utilities in North America.

The following are some of the key items from the Investor Day:

- **Fortis remains upbeat on the core utility growth story with LNG upside (Exhibit 2).** Fortis reiterated its expectation for a 6.5% CAGR for rate base through 2019 while also highlighting the potential for the growth rate to rise to a 7.5% CAGR if both LNG related projects in B.C. move forward. The company also provided capital spending by project and by year as shown in Exhibit 2 and noted that most of the discrete projects are of relatively small size (i.e., no one project would materially impact the growth rate) with the vast majority of the spending being normal utility capex that was described by management as being “a low risk capital program with a high degree of execution probability.”
- **Solid history of earning the allowed ROE and then some (Exhibit 3).** Fortis provided a history for each of its utilities comparing the allowed ROE to the achieved ROE. As shown in the exhibit, Fortis has consistently earned its allowed ROE while delivering upside in a number of years.
- **Decision on a U.S. listing could come by year-end.** Given the audience, there was a focus on the U.S. and specifically with respect to a U.S. listing, Fortis anticipates making a decision on whether to list on the NYSE by the end of 2015.
- **No decision for Properties yet.** Fortis continues to evaluate the strategic alternatives for its real estate division with the company continuing to guide to a Q2/15 decision. Any proceeds would likely be used to repay debt and bring the capital structure back to 55% debt (down from 57% currently).
- **Acquisitions still part of the mix.** Although we expect 2015 to be a year where Fortis focuses on demonstrating the earnings power of the business and the organic growth profile (i.e., no major acquisitions), we continue to expect utility M&A to be part of the strategy over the longer-term. With little in Canada left to acquire, the focus continues to be on the U.S. with management noting that while it does not drive the strategic plan, it is not unreasonable that the mix between Canada and the U.S. could trend to 50/50 over time.

### Valuation

Our \$44.00 price target is based on a P/E of 20x applied to the forward EPS. A 20x multiple is consistent with the regulated utility peer group. A 20x P/E would be at the high end, but not a record high, for valuation, and we see this multiple well supported by historically low 10-year bond yields and a growth outlook that is generally stronger than most periods over the past 10 years.

### Price target impediments

Rejection of the UNS deal, the risk of punitive regulatory or government decisions, economic/tourism conditions in its service territories, operational or financial issues at newly acquired businesses, and acquisitions or projects that fail to gain the confidence of investors may have implications for our price target.

### Company description

Fortis Inc. is a utility holding company with regulated utilities in Canada (Newfoundland & Labrador, PEI, Ontario, Alberta, and B.C.), the U.S. (Arizona and New York) and the Caribbean (Cayman Islands and Turks & Caicos). The company also has non-regulated operations in power (Canada, U.S., and Belize) and real estate (commercial and hospitality in Canada).

## Required disclosures

### Non-U.S. analyst disclosure

Robert Kwan;Kelsey Roste (i) are not registered/qualified as research analysts with the NYSE and/or FINRA and (ii) may not be associated persons of the RBC Capital Markets, LLC and therefore may not be subject to FINRA Rule 2711 and NYSE Rule 472 restrictions on communications with a subject company, public appearances and trading securities held by a research analyst account.

### Conflicts disclosures

The analyst(s) responsible for preparing this research report received compensation that is based upon various factors, including total revenues of the member companies of RBC Capital Markets and its affiliates, a portion of which are or have been generated by investment banking activities of the member companies of RBC Capital Markets and its affiliates.

Please note that current conflicts disclosures may differ from those as of the publication date on, and as set forth in, this report. To access current conflicts disclosures, clients should refer to <https://www.rbccm.com/GLDisclosure/PublicWeb/DisclosureLookup.aspx?entityId=1> or send a request to RBC CM Research Publishing, P.O. Box 50, 200 Bay Street, Royal Bank Plaza, 29th Floor, South Tower, Toronto, Ontario M5J 2W7.

A member company of RBC Capital Markets or one of its affiliates managed or co-managed a public offering of securities for Fortis Inc. in the past 12 months.

A member company of RBC Capital Markets or one of its affiliates received compensation for investment banking services from Fortis Inc. in the past 12 months.

Royal Bank of Canada, together with its affiliates, beneficially owns 1 percent or more of a class of common equity securities of Fortis Inc..

During this time, a member company of RBC Capital Markets or one of its affiliates provided non-securities services to Fortis Inc..

RBC Capital Markets is currently providing Fortis Inc. with non-investment banking securities-related services.

RBC Capital Markets is currently providing Fortis Inc. with non-securities services.

RBC Capital Markets has provided Fortis Inc. with investment banking services in the past 12 months.

RBC Capital Markets has provided Fortis Inc. with non-securities services in the past 12 months.

### Explanation of RBC Capital Markets Equity rating system

An analyst's 'sector' is the universe of companies for which the analyst provides research coverage. Accordingly, the rating assigned to a particular stock represents solely the analyst's view of how that stock will perform over the next 12 months relative to the analyst's sector average. Although RBC Capital Markets' ratings of Top Pick (TP)/Outperform (O), Sector Perform (SP), and Underperform (U) most closely correspond to Buy, Hold/Neutral and Sell, respectively, the meanings are not the same because our ratings are determined on a relative basis.

#### Ratings

**Top Pick (TP):** Represents analyst's best idea in the sector; expected to provide significant absolute total return over 12 months with a favorable risk-reward ratio.

**Outperform (O):** Expected to materially outperform sector average over 12 months.

**Sector Perform (SP):** Returns expected to be in line with sector average over 12 months.

**Underperform (U):** Returns expected to be materially below sector average over 12 months.

#### Risk Rating

As of March 31, 2013, RBC Capital Markets suspends its Average and Above Average risk ratings. The **Speculative** risk rating reflects a security's lower level of financial or operating predictability, illiquid share trading volumes, high balance sheet leverage, or limited operating history that result in a higher expectation of financial and/or stock price volatility.

## Distribution of ratings

For the purpose of ratings distributions, regulatory rules require member firms to assign ratings to one of three rating categories - Buy, Hold/Neutral, or Sell - regardless of a firm's own rating categories. Although RBC Capital Markets' ratings of Top Pick(TP)/Outperform (O), Sector Perform (SP), and Underperform (U) most closely correspond to Buy, Hold/Neutral and Sell, respectively, the meanings are not the same because our ratings are determined on a relative basis (as described below).

Distribution of ratings				
RBC Capital Markets, Equity Research				
As of 31-Mar-2015				
Rating	Count	Percent	Investment Banking	
			Serv./Past 12 Mos.	
			Count	Percent
BUY [Top Pick & Outperform]	909	52.33	280	30.80
HOLD [Sector Perform]	713	41.05	125	17.53
SELL [Underperform]	115	6.62	5	4.35

References to a Recommended List in the recommendation history chart may include one or more recommended lists or model portfolios maintained by RBC Wealth Management or one of its affiliates. RBC Wealth Management recommended lists include the Guided Portfolio: Prime Income (RL 6), the Guided Portfolio: Large Cap (RL 7), the Guided Portfolio: Dividend Growth (RL 8), the Guided Portfolio: Midcap 111 (RL 9), the Guided Portfolio: ADR (RL 10), and the Guided Portfolio: Global Equity (U.S.) (RL 11). RBC Capital Markets recommended lists include the Strategy Focus List and the Fundamental Equity Weightings (FEW) portfolios. The abbreviation 'RL On' means the date a security was placed on a Recommended List. The abbreviation 'RL Off' means the date a security was removed from a Recommended List.

## Equity valuation and risks

For valuation methods used to determine, and risks that may impede achievement of, price targets for covered companies, please see the most recent company-specific research report at <https://www.rbcinsight.com> or send a request to RBC Capital Markets Research Publishing, P.O. Box 50, 200 Bay Street, Royal Bank Plaza, 29th Floor, South Tower, Toronto, Ontario M5J 2W7.

## Conflicts policy

RBC Capital Markets Policy for Managing Conflicts of Interest in Relation to Investment Research is available from us on request. To access our current policy, clients should refer to

<https://www.rbccm.com/global/file-414164.pdf>

or send a request to RBC Capital Markets Research Publishing, P.O. Box 50, 200 Bay Street, Royal Bank Plaza, 29th Floor, South Tower, Toronto, Ontario M5J 2W7. We reserve the right to amend or supplement this policy at any time.

## Dissemination of research and short-term trade ideas

RBC Capital Markets endeavors to make all reasonable efforts to provide research simultaneously to all eligible clients, having regard to local time zones in overseas jurisdictions. RBC Capital Markets' equity research is posted to our proprietary website to ensure eligible clients receive coverage initiations and changes in ratings, targets and opinions in a timely manner. Additional distribution may be done by the sales personnel via email, fax, or other electronic means, or regular mail. Clients may also receive our research via third party vendors. RBC Capital Markets also provides eligible clients with access to SPARC on the Firms proprietary INSIGHT website, via email and via third-party vendors. SPARC contains market color and commentary regarding subject companies on which the Firm currently provides equity research coverage. Research Analysts may, from time to time, include short-term trade ideas in research reports and / or in SPARC. A short-term trade idea offers a short-term view on how a security may trade, based on market and trading events, and the resulting trading opportunity that may be available. A short-term trade idea may differ from the price targets and recommendations in our published research reports reflecting the research analyst's views of the longer-term (one year) prospects of the subject company, as a result of the differing time horizons, methodologies and/or other factors. Thus, it is possible that a subject company's common equity that is considered a long-term 'Sector Perform' or even an 'Underperform' might present a short-term buying opportunity as a result of temporary selling pressure in the market; conversely, a subject company's common equity rated a long-term 'Outperform' could be considered susceptible to a short-term downward price correction. Short-term trade ideas are not ratings, nor are they part of any ratings system, and the firm generally does not intend, nor undertakes any obligation, to maintain or update short-term trade ideas. Short-term trade ideas may not be suitable for all investors and have not been tailored to individual investor circumstances and objectives, and investors should make their own independent decisions regarding any securities or strategies discussed herein. Please contact your investment advisor or institutional salesperson for more information regarding RBC Capital Markets' research.

## Analyst certification

## Fortis (FTS): Q1/15 results slightly ahead of expectations

Sentiment Indicator : neutral

Posted by Robert Kwan on Tuesday, May 05 2015, 6:58 AM ET

### Details

- Q1/15 normalized EPS (company-calculated) was \$0.65, compared to our estimate of \$0.61 and \$0.68 in Q1/14. Consensus for the quarter was \$0.62 (7 estimates between \$0.57 and \$0.66). During the quarter, Fortis normalized for the positive net effect of regulatory decisions related to prior periods in Alberta (\$10 million) and the impact of FX rates on balance sheet translation (\$9 million).
- Based on our preliminary review, earnings from the Utilities in Canada were ahead of our expectations (all segments ahead; most by 5-10%). The two U.S. utilities in aggregate posted earnings that were in line with our expectations (\$42 million vs. our estimate of \$44 million; Central Hudson ahead of expectations and UNS below expectations). All of the other segments were within +/- \$2 million of our estimate.
- Management expects capital spending to approach \$9 billion from 2015 to 2019, which is in line with previous guidance.
- The Waneta hydro expansion was completed on April 1, 2015, ahead of schedule and on budget (\$900 million). Fortis holds a 51% interest in the facility.
- In March 2015, Fortis agreed to sell its non-regulated power generation assets in upstate New York and Ontario.
- No update on the strategic review process for the Properties business was provided. The company expects to make an announcement with respect to the review by the end of Q2/15.

**Conference call: today at 10:00 AM (ET)**

1-877-223-4471

### Our take: neutral

With the Q1/15 results being generally close to our forecast and consensus, we do not expect the results to materially impact the share price.

**Robert Kwan** | [robert.kwan@rbccm.com](mailto:robert.kwan@rbccm.com)

May 5, 2015

## Fortis Inc.

### Solid quarter, positive outlook remains intact

**Our view:** Despite the 'beat' being mostly due to seasonality, the Q1/15 results represent a good start to the year. We maintain our positive outlook for the shares, as we believe the company will continue to showcase its core organic utility growth in 2015.

#### Key points:

**Q1/15 results modestly ahead of expectations, mostly due to timing.** Normalized EPS was \$0.65 compared to our estimate of \$0.61 and \$0.68 in Q1/14. The modestly higher-than-forecast earnings were mainly due to Canadian Regulated Utilities (largely due to the seasonality/timing of recognition of costs and deferral accounts). In aggregate, the two U.S. utilities posted earnings that were in line with our expectations, although Central Hudson was ahead of expectations (including the booking of incentives), while UNS was below expectations (mostly attributable to seasonality). All of the other segments were within +/- \$2 million of our estimate.

**Sale of non-core assets should modestly reduce leverage.** Fortis entered into an agreement to sell its non-regulated power generation assets in upstate New York and Ontario, with both asset sales expected to close in 2015. While there was no update on the strategic review process for Properties, the company continues to expect to make an announcement with respect to the review by the end of Q2/15. We believe the proceeds from both the small power assets sale and the potential divestiture of Properties will be used to repay debt, which would help bring the capital structure back in line with the long-term target of 55% debt (currently 57%).
