BMO Capital Markets Equity Research is available via our website <https://research-ca.bmocapitalmarkets.com/Public/Secure/Login.aspx?ReturnUrl=/Member/Home/ResearchHome.aspx>

Institutional clients may also receive our research via Thomson Reuters, Bloomberg, FactSet, and Capital IQ.

Research reports and other commentary are required to be simultaneously disseminated internally and externally to our clients.

**Conflict Statement**

A general description of how BMO Financial Group identifies and manages conflicts of interest is contained in our public facing policy for managing conflicts of interest in connection with investment research which is available at [http://researchglobal.bmocapitalmarkets.com/Public/Conflict\\_Statement\\_Public.aspx](http://researchglobal.bmocapitalmarkets.com/Public/Conflict_Statement_Public.aspx)

**General Disclaimer**

"BMO Capital Markets" is a trade name used by the BMO Investment Banking Group, which includes the wholesale arm of Bank of Montreal and its subsidiaries BMO Nesbitt Burns Inc., BMO Capital Markets Ltd. in the U.K. and BMO Capital Markets Corp. in the U.S. BMO Nesbitt Burns Inc., BMO Capital Markets Ltd. and BMO Capital Markets Corp are affiliates. Bank of Montreal or its subsidiaries ("BMO Financial Group") has lending arrangements with, or provide other remunerated services to, many issuers covered by BMO Capital Markets. The opinions, estimates and projections contained in this report are those of BMO Capital Markets as of the date of this report and are subject to change without notice. BMO Capital Markets endeavours to ensure that the contents have been compiled or derived from sources that we believe are reliable and contain information and opinions that are accurate and complete. However, BMO Capital Markets makes no representation or warranty, express or implied, in respect thereof, takes no responsibility for any errors and omissions contained herein and accepts no liability whatsoever for any loss arising from any use of, or reliance on, this report or its contents. Information may be available to BMO Capital Markets or its affiliates that is not reflected in this report. The information in this report is not intended to be used as the primary basis of investment decisions, and because of individual client objectives, should not be construed as advice designed to meet the particular investment needs of any investor. This material is for information purposes only and is not an offer to sell or the solicitation of an offer to buy any security. BMO Capital Markets or its affiliates will buy from or sell to customers the securities of issuers mentioned in this report on a principal basis. BMO Capital Markets or its affiliates, officers, directors or employees have a long or short position in many of the securities discussed herein, related securities or in options, futures or other derivative instruments based thereon. The reader should assume that BMO Capital Markets or its affiliates may have a conflict of interest and should not rely solely on this report in evaluating whether or not to buy or sell securities of issuers discussed herein.

**Additional Matters**

To Canadian Residents: BMO Nesbitt Burns Inc. furnishes this report to Canadian residents and accepts responsibility for the contents herein subject to the terms set out above. Any Canadian person wishing to effect transactions in any of the securities included in this report should do so through BMO Nesbitt Burns Inc.

The following applies if this research was prepared in whole or in part by Andrew Breichmanas, Iain Reid, Tony Robson, David Round, Edward Sterck or Brendan Warn: This research is not prepared subject to Canadian disclosure requirements. This research is prepared by BMO Capital Markets Limited and subject to the regulations of the Financial Conduct Authority (FCA) in the United Kingdom. FCA regulations require that a firm providing research disclose its ownership interest in the issuer that is the subject of the research if it and its affiliates own 5% or more of the equity of the issuer. Canadian regulations require that a firm providing research disclose its ownership interest in the issuer that is the subject of the research if it and its affiliates own 1% or more of the equity of the issuer that is the subject of the research. Therefore BMO Capital Markets Limited will only disclose its and its affiliates ownership interest in the subject issuer if such ownership exceeds 5% of the equity of the issuer.

To U.S. Residents: BMO Capital Markets Corp. furnishes this report to U.S. residents and accept responsibility for the contents herein, except to the extent that it refers to securities of Bank of Montreal. Any U.S. person wishing to effect transactions in any security discussed herein should do so through BMO Capital Markets Corp.

To U.K. Residents: In the UK this document is published by BMO Capital Markets Limited which is authorised and regulated by the Financial Conduct Authority. The contents hereof are intended solely for the use of, and may only be issued or passed on to, (I) persons who have professional experience in matters relating to investments falling within Article 19(5) of the Financial Services and Markets Act 2000 (Financial Promotion) Order 2005 (the "Order") or (II) high net worth entities falling within Article 49(2)(a) to (d) of the Order (all such persons together referred to as "relevant persons"). The contents hereof are not intended for the use of and may not be issued or passed on to, retail clients.

Unauthorized reproduction, distribution, transmission or publication without the prior written consent of BMO Capital Markets is strictly prohibited.

## Administrative Law Judge Supports Proposed UNS Acquisition

On July 29, Administrative Law Judge (ALJ) Jane Rodda concluded that FTS' proposed acquisition of UNS meets the "no harm" standard and believes that the merger transaction is in the public interest. To access the ALJ Opinion and Order, search for docket number E-04230A-14-0011 (<http://edocket.azcc.gov>).

### Our View:

- Keep in mind that the ALJ's recommendation is an advisory opinion only and it will be up to the Commission to determine whether to approve or deny the transaction. Given support from Staff and Interveners via a conditioned Settlement Agreement and limited opposition from the public, we believe that transaction approval will not be reasonably withheld by the Commission.
- Next steps: submissions responding to the recommended decision are due by August 7 and consideration of the proposed acquisition has tentatively been scheduled for the Commission's Open meeting to be held on August 12 and 13. Accordingly, we now believe that the acquisition of UNS Energy (assuming regulatory approval) could close as early as September and we now see upside to our 2014E estimates, as we had expected a year-end 2014 transaction close.

This report was prepared by an analyst(s) employed by BMO Nesbitt Burns Inc., and who is (are) not registered as a research analyst(s) under FINRA rules. For disclosure statements, including the Analyst's Certification, please refer to pages 2 to 5.

A general description of how BMO Financial Group identifies and manages conflicts of interest is contained in our public facing policy for managing conflicts of interest in connection with investment research which is available at [http://researchglobal.bmocapitalmarkets.com/Public/Conflict\\_Statement\\_Public.aspx](http://researchglobal.bmocapitalmarkets.com/Public/Conflict_Statement_Public.aspx)

**General Disclaimer**

"BMO Capital Markets" is a trade name used by the BMO Investment Banking Group, which includes the wholesale arm of Bank of Montreal and its subsidiaries BMO Nesbitt Burns Inc., BMO Capital Markets Ltd. in the U.K. and BMO Capital Markets Corp. in the U.S. BMO Nesbitt Burns Inc., BMO Capital Markets Ltd. and BMO Capital Markets Corp are affiliates. Bank of Montreal or its subsidiaries ("BMO Financial Group") has lending arrangements with, or provide other remunerated services to, many issuers covered by BMO Capital Markets. The opinions, estimates and projections contained in this report are those of BMO Capital Markets as of the date of this report and are subject to change without notice. BMO Capital Markets endeavours to ensure that the contents have been compiled or derived from sources that we believe are reliable and contain information and opinions that are accurate and complete. However, BMO Capital Markets makes no representation or warranty, express or implied, in respect thereof, takes no responsibility for any errors and omissions contained herein and accepts no liability whatsoever for any loss arising from any use of, or reliance on, this report or its contents. Information may be available to BMO Capital Markets or its affiliates that is not reflected in this report. The information in this report is not intended to be used as the primary basis of investment decisions, and because of individual client objectives, should not be construed as advice designed to meet the particular investment needs of any investor. This material is for information purposes only and is not an offer to sell or the solicitation of an offer to buy any security. BMO Capital Markets or its affiliates will buy from or sell to customers the securities of issuers mentioned in this report on a principal basis. BMO Capital Markets or its affiliates, officers, directors or employees have a long or short position in many of the securities discussed herein, related securities or in options, futures or other derivative instruments based thereon. The reader should assume that BMO Capital Markets or its affiliates may have a conflict of interest and should not rely solely on this report in evaluating whether or not to buy or sell securities of issuers discussed herein.

**Additional Matters**

To Canadian Residents: BMO Nesbitt Burns Inc. furnishes this report to Canadian residents and accepts responsibility for the contents herein subject to the terms set out above. Any Canadian person wishing to effect transactions in any of the securities included in this report should do so through BMO Nesbitt Burns Inc.

The following applies if this research was prepared in whole or in part by Andrew Breichmanas, Iain Reid, Tony Robson, David Round, Edward Sterck or Brendan Warn: This research is not prepared subject to Canadian disclosure requirements. This research is prepared by BMO Capital Markets Limited and subject to the regulations of the Financial Conduct Authority (FCA) in the United Kingdom. FCA regulations require that a firm providing research disclose its ownership interest in the issuer that is the subject of the research if it and its affiliates own 5% or more of the equity of the issuer. Canadian regulations require that a firm providing research disclose its ownership interest in the issuer that is the subject of the research if it and its affiliates own 1% or more of the equity of the issuer that is the subject of the research. Therefore BMO Capital Markets Limited will only disclose its and its affiliates ownership interest in the subject issuer if such ownership exceeds 5% of the equity of the issuer.

To U.S. Residents: BMO Capital Markets Corp. furnishes this report to U.S. residents and accepts responsibility for the contents herein, except to the extent that it refers to securities of Bank of Montreal. Any U.S. person wishing to effect transactions in any security discussed herein should do so through BMO Capital Markets Corp.

To U.K. Residents: In the UK this document is published by BMO Capital Markets Limited which is authorised and regulated by the Financial Conduct Authority. The contents hereof are intended solely for the use of, and may only be issued or passed on to, (I) persons who have professional experience in matters relating to investments falling within Article 19(5) of the Financial Services and Markets Act 2000 (Financial Promotion) Order 2005 (the "Order") or (II) high net worth entities falling within Article 49(2)(a) to (d) of the Order (all such persons together referred to as "relevant persons"). The contents hereof are not intended for the use of and may not be issued or passed on to, retail clients.

## Q2 – Stay Tuned for Catalysts

### Event

Fortis' Q2 results were modestly below our expectations (EPS of \$0.22 vs. our \$0.24) due to higher-than-expected corporate and softer results at Central Hudson, partially offset by a better-than-expected showing at FortisBC Energy.

### Impact & Analysis

Key implications: (1) FTS now believes it could consummate UNS by the end of August (vs. YE 2014 previously) following a positive recommendation from the Administrative Law Judge on July 29. (2) The company reiterated a capital program of \$1.4B in 2014. Notably, FTS' Waneta hydroelectric dam expansion in B.C. still remains on budget and on track for a spring 2015 in-service date. Preliminary work has also begun on the \$400M Tilbury LNG expansion in B.C. (expected in-service in H2/16). (3) Central Hudson filed a general rate application in July for rates effective mid-2015 which incorporates a proposed reduction in the allowed ROE to 9% (vs. 10% currently), but no change in deemed equity of 48%; a Commission decision is expected in H1/15. (4) We have updated our estimates to reflect Q2 actuals, the closing of the UNS acquisition end of August and other fine-tuning adjustments. Our 2014 EPS estimate (f.d) increases to \$1.55 (vs. \$1.53) while our 2015E decreases slightly to \$1.96 (vs. \$1.97). We are introducing 2016E EPS (f.d) of \$2.01.

### Valuation & Recommendation

Despite softer Q2 results, we remain of the view that the direction of the FTS shares in the near term ultimately lies with successful regulatory approval of the UNS acquisition. In particular, the next milestone is Commission consideration of the transaction at open meetings in mid-August which is not only fast approaching, but represents one of the last remaining hurdles to acquisition close. Should FTS secure approval and we get further confirmation of a step-up function change in earnings, we believe we could see a significant boost in sentiment and a nice positive catalyst to the shares. The roll-forward of our valuation brings our target price to \$34 (from \$33.50), representing a +6.6% total return. Based on relative returns across the regulated utility complex, we continue to rate FTS shares Market Perform.

## Q2 – Stay Tuned for Catalysts

- **Maintaining Market Perform rating and increasing target price to \$34 (vs. \$33.50).** Fortis' second-quarter bottom-line results were modestly below our expectations (EPS of \$0.22 vs. our estimate of \$0.24 per share) due to higher-than-expected corporate expense and softer results at Central Hudson, partially offset by a better-than-expected showing at FortisBC Energy. Despite softer Q2 results, we remain of the view that the direction of the FTS shares in the near term ultimately lies with successful regulatory approval of the UNS acquisition. In particular, the next milestone is Commission consideration of the transaction at open meetings in mid-August which is not only fast approaching, but represents one of the last remaining hurdles to acquisition close. Should FTS secure regulatory approval and we get further confirmation of a step-up function change in earnings, we believe we could see a significant boost in sentiment and a nice positive catalyst to the shares. The roll-forward of our valuation brings our target price up \$0.50 (+1.5%) to \$34 (from \$33.50), representing a +6.6% total return. Based on relative returns across the regulated utility complex, we continue to rate FTS shares Market Perform.
- **Capital program unchanged.** The company reiterated a capital program of \$1.4B in 2014 after spending \$535M H1. FTS also reaffirmed its outlook for \$6.5B in total capital spending over the five-year period from 2014 to 2018 (excluding an expected capital program of \$1.5B at UNS from 2015 to 2018). Notably, FTS' Waneta hydroelectric dam expansion in B.C. still remains on budget (\$633M spent out of \$900M gross; FTS owns 51%) and on track for a spring 2015 in-service date. Preliminary work has also begun on the \$400M Tilbury LNG expansion in B.C. (expected in-service in H2/16), while additional LNG-related opportunities are being pursued such as an additional expansion of Tilbury and a pipeline expansion for the proposed Woodfibre LNG site in B.C. We believe these additional opportunities could offer significant upside to the company's five-year capital program should they cross into commercial viability.
- **UNS Energy acquisition now expected to close by the end of August (vs. year-end).** On July 29, the Administrative Law Judge (ALJ) conducting the UNS proceeding recommended the Arizona Commission to approve the transaction subject to certain conditions set out in the May 16 Settlement Agreement. Consideration of the ALJ recommendation has tentatively been scheduled by the Commission at its Open Meeting to be held on August 12 and 13, 2014. As Commission approval is the last significant hurdle to the transaction, FTS now believes it could consummate UNS by the end of August 2014 (vs. year-end 2014 previously). We believe the revised UNS timeline is achievable and accordingly our 2014 estimate is aligned with that schedule.
- **Key regulatory updates:**
  - **Central Hudson General Rate Application recently filed:** Central Hudson filed a general rate application in July for rates effective mid-2015 which incorporates a proposed reduction in the allowed ROE to 9% (vs. 10% currently and our prior 9.5% estimate) but no change in deemed equity of 48%; a decision from the New York Public Service Commission is expected in H1/15.

- **Proposed Performance-Based Regulation plans in B.C. expected to be approved in H2/14:** A decision on FortisBC Energy and FortisBC Electric's 2014-2018 PBR plans is expected in 2H/14.
- **Alberta Generic Cost of Capital Review:** Hearings have now concluded; a decision is not expected until the end of 2014.
- **FortisAlberta 2013-2015 Capital Tracker Applications:** In May, FortisAlberta filed a combined 2013-2015 capital tracker application requesting capital tracker revenue of \$23M in 2013, \$48M in 2014, and \$69M in 2015. A hearing related to the combined application has been set for October 2014 and a decision is expected the first quarter of 2015.
- **Revised estimates.** We have updated our estimates to reflect Q2 actuals, the closing of the UNS acquisition end of August, lower allowed ROEs at Central Hudson, and other fine-tuning adjustments. The net effect of these changes results in our 2014 EPS estimate (f.d) increasing to \$1.55 (vs. \$1.53) and our 2015 EPS estimate (f.d) decreasing slightly to \$1.96 (vs. \$1.97). Note that our 2014 estimate includes the convertible debenture cost (after-tax) associated with the UNS Energy acquisition (~\$0.23/sh).
- **Introducing 2016 estimates.** Along with our revisions, we are rolling out our FY16 estimates: adj. EPS of \$2.01 (vs. \$1.96 in 2015E or +2.5% y/y). Our FY16 anticipates earnings growth from all of FTS' regulated utilities (other than Central Hudson who faces lower regulated ROEs) and a full-year contribution from the Waneta dam expansion (three-quarters in 2015E). Partially offsetting that positive trend in 2016E is higher y/y corporate costs.
- **Maintaining Market Perform rating and increasing target price to \$34.** At current levels, FTS is trading at 21.4x our 2014E EPS (vs. peer range of 14.9-17.9x) and 16.9x our 2015E EPS (vs. peer range of 13.4-17.7x). With the introduction of our 2016 estimates, we are rolling forward our valuation with a price target more reflective of a 12-to-18-month time frame (targeting 2H/15 vs. 2015). This results in our target price increasing by \$0.50 (+1.5%) to \$34 (vs. \$33.50) reflecting a P/E multiple of 17.0x applied to the average of our FY15/16E estimates (vs. 17.0x 2015E previously). The multiple is below its 10-year historical average of ~18.4x reflecting FTS' increased exposure to U.S. utilities (which have tended to trade at lower valuations than Canadian-domiciled utilities) and uncertainty over regulatory approval and timing of the UNS acquisition (though the risks are clearly waning). Based on FTS' relative return to our price target compared to the other companies we cover in the regulated utility complex, we continue to rate FTS shares Market Perform.

#### Exhibit 1: Calculation of Our Target Price

FTS Valuation	Multiple	2014E	2015E	2016E
Adj. EPS (f.d)		\$1.55	\$1.96	\$2.01
Equity value/sh	17.0x	\$26.31	\$33.34	\$34.18
Avg. of FY15/16E			\$34.00	
<u>P/E Sensitivity</u>				
16.0x	16.5x	17.0x	17.5x	18.0x
\$32.00	\$33.00	\$34.00	\$35.00	\$36.00

Source: BMO Capital Markets

- **Second-quarter results.** Fortis reported headline EPS of \$0.22 (-29% year over year), modestly lower than our estimate of \$0.24. Results include ~\$0.06 of interest expense associated with the convertible debentures issued to finance a portion of the pending UNS acquisition (EPS would have been \$0.28 ex. the interest). We note that Street consensus of \$0.27 (range of \$0.24-0.34) may not be comparable to the Q2 print as we believe that some estimates include the convertible interest and some do not (our estimate includes it). The EPS variance vs. our estimate was primarily driven by higher-than-expected corporate expense and softer results at Central Hudson (NY utility), partially offset by a better-than-expected showing at FortisBC Energy (B.C. gas utility). For a further run-down of FTS' second-quarter results, please see Exhibit 2. Our quarterly and annual estimates are set out in Exhibits 4 and 5.

**General Disclaimer**

BMO Capital Markets” is a trade name used by the BMO Investment Banking Group, which includes the wholesale arm of Bank of Montreal and its subsidiaries BMO Nesbitt Burns Inc., BMO Capital Markets Ltd. in the U.K. and BMO Capital Markets Corp. in the U.S. BMO Nesbitt Burns Inc., BMO Capital Markets Ltd. and BMO Capital Markets Corp are affiliates. Bank of Montreal or its subsidiaries (“BMO Financial Group”) has lending arrangements with, or provide other remunerated services to, many issuers covered by BMO Capital Markets. The opinions, estimates and projections contained in this report are those of BMO Capital Markets as of the date of this report and are subject to change without notice. BMO Capital Markets endeavours to ensure that the contents have been compiled or derived from sources that we believe are reliable and contain information and opinions that are accurate and complete. However, BMO Capital Markets makes no representation or warranty, express or implied, in respect thereof, takes no responsibility for any errors and omissions contained herein and accepts no liability whatsoever for any loss arising from any use of, or reliance on, this report or its contents. Information may be available to BMO Capital Markets or its affiliates that is not reflected in this report. The information in this report is not intended to be used as the primary basis of investment decisions, and because of individual client objectives, should not be construed as advice designed to meet the particular investment needs of any investor. This material is for information purposes only and is not an offer to sell or the solicitation of an offer to buy any security. BMO Capital Markets or its affiliates will buy from or sell to customers the securities of issuers mentioned in this report on a principal basis. BMO Capital Markets or its affiliates, officers, directors or employees have a long or short position in many of the securities discussed herein, related securities or in options, futures or other derivative instruments based thereon. The reader should assume that BMO Capital Markets or its affiliates may have a conflict of interest and should not rely solely on this report in evaluating whether or not to buy or sell securities of issuers discussed herein.

**Additional Matters**

To Canadian Residents: BMO Nesbitt Burns Inc. furnishes this report to Canadian residents and accepts responsibility for the contents herein subject to the terms set out above. Any Canadian person wishing to effect transactions in any of the securities included in this report should do so through BMO Nesbitt Burns Inc.

The following applies if this research was prepared in whole or in part by Andrew Breichmanas, Iain Reid, Tony Robson, David Round, Edward Sterck or Brendan Warn: This research is not prepared subject to Canadian disclosure requirements. This research is prepared by BMO Capital Markets Limited and subject to the regulations of the Financial Conduct Authority (FCA) in the United Kingdom. FCA regulations require that a firm providing research disclose its ownership interest in the issuer that is the subject of the research if it and its affiliates own 5% or more of the equity of the issuer. Canadian regulations require that a firm providing research disclose its ownership interest in the issuer that is the subject of the research if it and its affiliates own 1% or more of the equity of the issuer that is the subject of the research. Therefore BMO Capital Markets Limited will only disclose its and its affiliates ownership interest in the subject issuer if such ownership exceeds 5% of the equity of the issuer.

To U.S. Residents: BMO Capital Markets Corp. furnishes this report to U.S. residents and accepts responsibility for the contents herein, except to the extent that it refers to securities of Bank of Montreal. Any U.S. person wishing to effect transactions in any security discussed herein should do so through BMO Capital Markets Corp.

To U.K. Residents: In the UK this document is published by BMO Capital Markets Limited which is authorised and regulated by the Financial Conduct Authority. The contents hereof are intended solely for the use of, and may only be issued or passed on to, (I) persons who have professional experience in matters relating to investments falling within Article 19(5) of the Financial Services and Markets Act 2000 (Financial Promotion) Order 2005 (the “Order”) or (II) high net worth entities falling within Article 49(2)(a) to (d) of the Order (all such persons together referred to as “relevant persons”). The contents hereof are not intended for the use of and may not be issued or passed on to, retail clients.

Unauthorized reproduction, distribution, transmission or publication without the prior written consent of BMO Capital Markets is strictly prohibited.

## First Glance: Q2/14 Modestly Lower Than Expected; Capital Program Unchanged

Fortis reported headline EPS of \$0.22 (-29% year over year), modestly lower than our estimate of \$0.24. Results include ~\$0.06 of interest expense associated with the convertible debentures issued to finance a portion of the pending UNS acquisition (EPS would have been \$0.28 ex. the interest). We note that Street consensus of \$0.27 (range of \$0.24-0.34) may not be comparable to the Q2 print as we believe that some estimates include the convertible interest and some do not (our estimate includes it).

## Our View:

- The EPS variance vs. our estimate was primarily driven by higher-than-expected corporate expense and softer results at Central Hudson (NY utility), partially offset by a better-than-expected showing at FortisBC Energy (B.C. gas utility).
- On July 29, the Administrative Law Judge (ALJ) conducting the UNS proceeding recommended the Arizona Commission to approve the transaction subject to certain conditions set out in the May 16 Settlement Agreement. Consideration of the ALJ recommendation has tentatively been scheduled by the Commission at its Open Meeting to be held on August 12 and 13, 2014. As Commission approval is the last significant hurdle to the transaction, FTS now believes it could consummate UNS by the end of August 2014 (vs. year-end 2014 previously).
- The company reiterated a capital program of \$1.4B in 2014 after spending \$535M H1. FTS also reaffirmed its outlook for \$6.5B in total capital spending over the five-year period from 2014 to 2018 (excluding an expected capital program of \$1.5B at UNS from 2015 to 2018). Notably, FTS' Waneta hydroelectric dam expansion in B.C. still remains on budget (\$900M gross; FTS owns 51%) and on track for a spring 2015 in-service date. Preliminary work has also begun on the \$400M Tilbury LNG expansion in B.C., which is expected to be in-service in H2/16.
- On the regulatory front, Central Hudson filed a general rate application in July for rates effective mid-2015 which incorporates a proposed reduction in the allowed ROE to 9% (vs. 10% currently and our 9.5% estimate; ~\$0.01 expected negative impact to our 2015E EPS) but no change in deemed equity of 48%; a decision from the New York Public Service Commission is expected in H1/15. Decisions are also expected on the 2014-2018 Multi-Year PBR plans for the B.C. gas and electric utilities in H2/14.
- At current levels, FTS is trading at 22.0x our 2014E EPS (vs. peer range of 15.1-18.0x) and 17.0x our 2015E EPS (vs. peer range of 13.6-17.8x).

This report was prepared by an analyst(s) employed by BMO Nesbitt Burns Inc., and who is (are) not registered as a research analyst(s) under FINRA rules. For disclosure statements, including the Analyst's Certification, please refer to pages 3 to 6.

**Conflict Statement**

A general description of how BMO Financial Group identifies and manages conflicts of interest is contained in our public facing policy for managing conflicts of interest in connection with investment research which is available at [http://researchglobal.bmocapitalmarkets.com/Public/Conflict\\_Statement\\_Public.aspx](http://researchglobal.bmocapitalmarkets.com/Public/Conflict_Statement_Public.aspx)

**General Disclaimer**

"BMO Capital Markets" is a trade name used by the BMO Investment Banking Group, which includes the wholesale arm of Bank of Montreal and its subsidiaries BMO Nesbitt Burns Inc., BMO Capital Markets Ltd. in the U.K. and BMO Capital Markets Corp. in the U.S. BMO Nesbitt Burns Inc., BMO Capital Markets Ltd. and BMO Capital Markets Corp are affiliates. Bank of Montreal or its subsidiaries ("BMO Financial Group") has lending arrangements with, or provide other remunerated services to, many issuers covered by BMO Capital Markets. The opinions, estimates and projections contained in this report are those of BMO Capital Markets as of the date of this report and are subject to change without notice. BMO Capital Markets endeavours to ensure that the contents have been compiled or derived from sources that we believe are reliable and contain information and opinions that are accurate and complete. However, BMO Capital Markets makes no representation or warranty, express or implied, in respect thereof, takes no responsibility for any errors and omissions contained herein and accepts no liability whatsoever for any loss arising from any use of, or reliance on, this report or its contents. Information may be available to BMO Capital Markets or its affiliates that is not reflected in this report. The information in this report is not intended to be used as the primary basis of investment decisions, and because of individual client objectives, should not be construed as advice designed to meet the particular investment needs of any investor. This material is for information purposes only and is not an offer to sell or the solicitation of an offer to buy any security. BMO Capital Markets or its affiliates will buy from or sell to customers the securities of issuers mentioned in this report on a principal basis. BMO Capital Markets or its affiliates, officers, directors or employees have a long or short position in many of the securities discussed herein, related securities or in options, futures or other derivative instruments based thereon. The reader should assume that BMO Capital Markets or its affiliates may have a conflict of interest and should not rely solely on this report in evaluating whether or not to buy or sell securities of issuers discussed herein.

**Additional Matters**

To Canadian Residents: BMO Nesbitt Burns Inc. furnishes this report to Canadian residents and accepts responsibility for the contents herein subject to the terms set out above. Any Canadian person wishing to effect transactions in any of the securities included in this report should do so through BMO Nesbitt Burns Inc.

The following applies if this research was prepared in whole or in part by Andrew Breichmanas, Iain Reid, Tony Robson, David Round, Edward Sterck or Brendan Warn: This research is not prepared subject to Canadian disclosure requirements. This research is prepared by BMO Capital Markets Limited and subject to the regulations of the Financial Conduct Authority (FCA) in the United Kingdom. FCA regulations require that a firm providing research disclose its ownership interest in the issuer that is the subject of the research if it and its affiliates own 5% or more of the equity of the issuer. Canadian regulations require that a firm providing research disclose its ownership interest in the issuer that is the subject of the research if it and its affiliates own 1% or more of the equity of the issuer that is the subject of the research. Therefore BMO Capital Markets Limited will only disclose its and its affiliates ownership interest in the subject issuer if such ownership exceeds 5% of the equity of the issuer.

To U.S. Residents: BMO Capital Markets Corp. furnishes this report to U.S. residents and accepts responsibility for the contents herein, except to the extent that it refers to securities of Bank of Montreal. Any U.S. person wishing to effect transactions in any security discussed herein should do so through BMO Capital Markets Corp.

To U.K. Residents: In the UK this document is published by BMO Capital Markets Limited which is authorised and regulated by the Financial Conduct Authority. The contents hereof are intended solely for the use of, and may only be issued or passed on to, (I) persons who have professional experience in matters relating to investments falling within Article 19(5) of the Financial Services and Markets Act 2000 (Financial Promotion) Order 2005 (the "Order") or (II) high net worth entities falling within Article 49(2)(a) to (d) of the Order (all such persons together referred to as "relevant persons"). The contents hereof are not intended for the use of and may not be issued or passed on to, retail clients.

Unauthorized reproduction, distribution, transmission or publication without the prior written consent of BMO Capital Markets is strictly prohibited.

## Commission Approves UNS Acquisition as Expected

On August 12, the Arizona Corporation Commission approved Fortis' proposed acquisition of UNS Energy Corporation. This is the last significant hurdle needed to complete the deal. To access the Order, search for docket number E-04230A-14-0011 (<http://edocket.azcc.gov>).

### Our View:

- The approval is in line with our expectation that the acquisition of UNS Energy could close as early as the end of August.
- Recall, we had increased our FY14 estimate in conjunction with Q2 results to account for the earlier close of the UNS acquisition, with expected earnings contribution of \$22M for 2014E. In addition, our model assumes all convertibles (\$1.8B) issued to finance the UNS deal would convert to common shares in mid-November increasing the total share count by ~58.6M (27.2% increase from current common stock outstanding).

This report was prepared by an analyst(s) employed by BMO Nesbitt Burns Inc., and who is (are) not registered as a research analyst(s) under FINRA rules. For disclosure statements, including the Analyst's Certification, please refer to pages 2 to 5.

**General Disclaimer**

"BMO Capital Markets" is a trade name used by the BMO Investment Banking Group, which includes the wholesale arm of Bank of Montreal and its subsidiaries BMO Nesbitt Burns Inc., BMO Capital Markets Ltd. in the U.K. and BMO Capital Markets Corp. in the U.S. BMO Nesbitt Burns Inc., BMO Capital Markets Ltd. and BMO Capital Markets Corp are affiliates. Bank of Montreal or its subsidiaries ("BMO Financial Group") has lending arrangements with, or provide other remunerated services to, many issuers covered by BMO Capital Markets. The opinions, estimates and projections contained in this report are those of BMO Capital Markets as of the date of this report and are subject to change without notice. BMO Capital Markets endeavours to ensure that the contents have been compiled or derived from sources that we believe are reliable and contain information and opinions that are accurate and complete. However, BMO Capital Markets makes no representation or warranty, express or implied, in respect thereof, takes no responsibility for any errors and omissions contained herein and accepts no liability whatsoever for any loss arising from any use of, or reliance on, this report or its contents. Information may be available to BMO Capital Markets or its affiliates that is not reflected in this report. The information in this report is not intended to be used as the primary basis of investment decisions, and because of individual client objectives, should not be construed as advice designed to meet the particular investment needs of any investor. This material is for information purposes only and is not an offer to sell or the solicitation of an offer to buy any security. BMO Capital Markets or its affiliates will buy from or sell to customers the securities of issuers mentioned in this report on a principal basis. BMO Capital Markets or its affiliates, officers, directors or employees have a long or short position in many of the securities discussed herein, related securities or in options, futures or other derivative instruments based thereon. The reader should assume that BMO Capital Markets or its affiliates may have a conflict of interest and should not rely solely on this report in evaluating whether or not to buy or sell securities of issuers discussed herein.

**Additional Matters**

To Canadian Residents: BMO Nesbitt Burns Inc. furnishes this report to Canadian residents and accepts responsibility for the contents herein subject to the terms set out above. Any Canadian person wishing to effect transactions in any of the securities included in this report should do so through BMO Nesbitt Burns Inc.

The following applies if this research was prepared in whole or in part by Andrew Breichmanas, Iain Reid, Tony Robson, David Round, Edward Sterck or Brendan Warn: This research is not prepared subject to Canadian disclosure requirements. This research is prepared by BMO Capital Markets Limited and subject to the regulations of the Financial Conduct Authority (FCA) in the United Kingdom. FCA regulations require that a firm providing research disclose its ownership interest in the issuer that is the subject of the research if it and its affiliates own 5% or more of the equity of the issuer. Canadian regulations require that a firm providing research disclose its ownership interest in the issuer that is the subject of the research if it and its affiliates own 1% or more of the equity of the issuer that is the subject of the research. Therefore BMO Capital Markets Limited will only disclose its and its affiliates ownership interest in the subject issuer if such ownership exceeds 5% of the equity of the issuer.

To U.S. Residents: BMO Capital Markets Corp. furnishes this report to U.S. residents and accepts responsibility for the contents herein, except to the extent that it refers to securities of Bank of Montreal. Any U.S. person wishing to effect transactions in any security discussed herein should do so through BMO Capital Markets Corp.

To U.K. Residents: In the UK this document is published by BMO Capital Markets Limited which is authorised and regulated by the Financial Conduct Authority. The contents hereof are intended solely for the use of, and may only be issued or passed on to, (I) persons who have professional experience in matters relating to investments falling within Article 19(5) of the Financial Services and Markets Act 2000 (Financial Promotion) Order 2005 (the "Order") or (II) high net worth entities falling within Article 49(2)(a) to (d) of the Order (all such persons together referred to as "relevant persons"). The contents hereof are not intended for the use of and may not be issued or passed on to, retail clients.

Unauthorized reproduction, distribution, transmission or publication without the prior written consent of BMO Capital Markets is strictly prohibited.

## Hawaii LNG Contract Paves the Way for Potential Second Expansion at Tilbury

On August 26, Hawaii Electric Power (HEP) filed its “Power Supply Plan” outlining the execution of a LNG supply agreement with FortisBC (100% Fortis) on August 8. Key features of the supply plan were the replacement of oil with LNG and higher level of renewables to reduce overall power costs and improve environmental quality.

### Our View:

- **Agreement paves the way for a potential second expansion at Tilbury.** Fortis is currently in the process of a \$400M initial expansion at the Tilbury LNG facility, which involves installing a second tank and a new liquefier that will add ~1.2M GJ of LNG storage, as well as 34,000 G/J of liquefaction capacity per day (from 5,000) by late 2016. Due to the supply agreement, FortisBC will need to augment its initial Tilbury expansion plans. We believe Phase II will cost a further \$400M, be eligible for rate base inclusion (FortisBC), and could be placed in-service roughly six months after completion of the initial expansion (mid-2017). Note that HEP still needs to secure transportation arrangements for the LNG supplied from Tilbury and the supply agreement requires regulatory approval from B.C. and Hawaii.
- **Potential stock upside of \$1.** While we believe it’s too early to ascribe any value from a second Tilbury expansion to the stock today, investors could begin to impart a risk-adjusted weighting to valuation as further project milestones move into sharper focus over the next year. We believe the second expansion could be ~\$0.05 accretive to EPS. This in turn translates into ~\$1/sh of incremental net present value on top of our \$34 target price. Our calculation assumes an allowed ROE of 8.75% on deemed equity of 37.5%; every 100bps change in ROE moves our expected accretion by ~\$0.01.
- **Well positioned for further LNG-related developments.** With its gas infrastructure footprint on the Canadian West Coast, FTS is well-positioned for further projects related to B.C. LNG exports, in our opinion. The Tilbury site will still have spare land that could be utilized for future capacity adds beyond the potential second expansion. In addition, FTS is proposing a natural gas pipeline expansion to the proposed Woodfibre LNG project near Squamish. This small-scale LNG export project (2M tonnes a year) is expected to be placed in-service as early as 2017.

This report was prepared by an analyst(s) employed by BMO Nesbitt Burns Inc., and who is (are) not registered as a research analyst(s) under FINRA rules. For disclosure statements, including the Analyst's Certification, please refer to pages 2 to 5.

**Company Description** – Fortis Inc. (Fortis) is a publicly listed holding company with four key businesses: electric utility operations, regulated natural gas distribution, non-regulated electric power generation and non-utility property activities. Gas and electric utility operations include Newfoundland Power (100%), Maritime Electric (100%),

FortisOntario (100%), Caribbean Utilities (59.5%), Turks and Caicos (100%), FortisAlberta (100%), FortisBC (100%), the FortisBC Energy Companies (100%), CH Energy Group (100%) and UNS Energy Corporation (100%). Its regulated utilities account for approximately

This report was prepared by an analyst(s) employed by BMO Nesbitt Burns Inc., and who is (are) not registered as a research analyst(s) under FINRA rules. For disclosure statements, including the Analyst's Certification, please refer to the back pages.

93% of the company's total assets and serve more than 3 million customers. *Website:* fortisinc.com

**Recent Results** – Fortis reported Q2/14 results that were modestly below our expectations (adjusted EPS of \$0.22 vs. our estimate of \$0.24) due to higher-than-expected corporate and softer results at Central Hudson, partially offset by a better-than-expected showing at FortisBC Energy.

**Corporate Developments** – On September 3, 2014, Fortis announced a \$600M bought deal offering of Series M First Preference Share.

On August 26, 2014, Hawaii Electric Power filed its “Power Supply Plan” outlining the execution of a LNG supply agreement with FortisBC on August 8. The agreement calls for the delivery of up to 800,000 tons of LNG per year for a term of up to 15 years.

On August 15, 2014, Fortis completed its acquisition of UNS Energy for a total transaction value of US\$4.5B. The transaction added approximately 657,000 electricity and gas customer to Fortis’ regulated portfolio.

On July 28, 2014, FortisBC announced the selection of Bechtel Canada Co. as the contractor for the Tilbury LNG Facility Expansion Project in Delta, BC.

On June 30, 2014, Fortis closed the issuance of US\$213M of Senior Unsecured Notes at an average rate of 3.51%.

On June 24, 2014, Fortis appointed Karl Smith as EVP, Chief Financial Officer, Fortis, effective June 30, 2014.

On March 28, 2014, Fortis announced the pricing of US\$500M of Senior Unsecured Notes with US\$213M issued on June 30, 2014 and US\$287M issued on September 15, 2014.

**Forecasts** – We are forecasting EPS (f.d) of \$1.55, \$1.96 and \$2.01 for 2014, 2015 and 2016, respectively.

**Valuation** – Our target price of \$34 is based on 17.0x our blended FY15/16E EPS (f.d) estimates.

**Recommendation** – At current levels, we believe the shares of Fortis are reasonably valued. Our rating is Market Perform.

## Recent Positive Trends Warrant Multiple Re-Rating

### Event

FTS has initiated a strategic review of its real estate portfolio.

### Impact & Analysis

Key implications: (1) With the Waneta project poised to generate similar earnings as Fortis Properties beginning in early 2015, FTS likely no longer sees any further significant tax benefits from retaining a real estate portfolio. Taking advantage of favourable real estate valuations and providing FTS with increased financial flexibility to invest in and grow its business are likely other reasons driving the strategic review. (2) Though the strategic review includes consideration of an initial public offering or a partial sale of its real estate portfolio, we believe an outright sale is the preferred outcome for FTS. (3) On a consolidated basis, we estimate a total enterprise value of \$820-1,050M for FTS's real estate portfolio. This implies an EV/EBITDA multiple of 10.5-13.5x (blended cap rates of 7.5-9.5%), below the Canadian publicly traded REIT average of 15x but higher than FTS's multiple of 10x. This translates into potential EPS accretion of \$0.04-0.07 assuming the net proceeds are used to repay debt or to reinvest in future growth. (4) As uncertainty remains on the strategic review outcome for the real estate portfolio, we have maintained our forward estimates pending further additional details, which are expected sometime during 2015.

### Valuation & Recommendation

Our preliminary analysis of FTS's initiation of a strategic review of its real estate portfolio is a positive development in our books and warrants an upward multiple re-rating. Coupled with the recent close of the UNS acquisition and an expected step-function change in the company's dividend/growth profile beginning in 2015, we see a positive shift in investor sentiment on the FTS shares. Accordingly, we are increasing our target multiple to 18.0x (from 17.0x), with our target price increasing to \$36 from \$34. Based on FTS's relative return to our price target compared to the other companies we cover in the regulated utility complex, we continue to rate FTS shares Market Perform.

Changes

**Target**  
 \$34.00 to \$36.00

## Recent Positive Trends Warrant Multiple Re-Rating

- **Maintaining Market Perform rating and increasing target price to \$36 (vs. \$34).** FTS's announcement that it has initiated a strategic review of its real estate portfolio has begun to focus investor attention on the underlying value of the company, with ~\$100M increase in the company's market capitalization yesterday. The strategic review is a positive development in our books and warrants an upward multiple re-rating. Accordingly, we have raised our target price to \$36 from \$34. Based on relative returns across the regulated utility complex, we continue to rate FTS shares Market Perform.
- **Initiates strategic review process for non-core real estate portfolio.** Although Fortis management had previously downplayed the possibility of monetizing its real estate portfolio, yesterday morning the company announced its intention to do just that. The initiation of a strategic review for its hotel and commercial real estate business (Fortis Properties segment) will involve the exploration of a sale of all or a portion of the assets, a sale of shares of Fortis Properties or an initial public offering. The review is expected to continue through the balance of 2014 and into 2015.
- **Why now?** FTS has long stated that its non-utility real estate operations support its utility growth and acquisition strategy – specifically that Fortis Properties provides flexibility in financial and tax planning not generally possible with respect to utilities because of regulatory constraints. That constraint involves the inability to recover financing costs associated with premiums paid on utility acquisitions through the regulatory compact. By generating taxable income from real estate assets, those financings costs are effectively utilized in the most tax efficient manner. With the Waneta hydro project poised to generate similar earnings as Fortis Properties beginning in early 2015 (~\$20M), the company likely no longer sees any further significant tax benefits from retaining a real estate portfolio. Taking advantage of favourable real estate valuations and providing FTS with increased financial flexibility to invest in and grow its business are likely other reasons driving the strategic review.
- **Framing Fortis Properties.** Established in 1989, Fortis Properties owns and operates 23 hotels (4,400 rooms) in eight Canadian provinces and 2.8 million sq. ft. of commercial and retail real estate (largely in Atlantic Canada). The hotel division competes in the mid-to-upper mid-market segments and includes major brands like Delta, Sheraton, Hilton, Holiday Inn, Ramada, and Best Western. The commercial real estate division is anchored by high quality tenants under long-term leases and sports a 93% occupancy compared to the national average of 90%. Fortis Properties only represents ~3% of FTS's asset base; during 2013, it generated EBITDA of \$78M, where 58% of operating income is derived from hotel operations (\$45M), with the remaining 42% (\$33M) from commercial real estate. Please see Exhibit 1 for more details on FTS's real estate portfolio.

Source: 2013 AIF, Company Reports

- **We believe FTS prefers an outright sale of the real estate portfolio rather than a spin-out via initial public offering.** Though the strategic review includes consideration of an initial public offering or a partial sale of its real estate portfolio, we believe an outright sale is the preferred outcome for FTS. Even though a sale would result in tax leakage, an IPO would introduce corporate complexity, management distraction, and higher corporate costs. There also are challenges with selling or IPO'ing the entire real estate portfolio as a package. We have observed quite a number of hotel and commercial real estate transactions over the last year, but none involving a mix of both. We also understand that there are no Canadian publicly traded entities with a portfolio consisting both hotels and commercial real estate and thus a publicly traded FTS real estate vehicle would likely trade at a meaningful discount to

public market comps especially given the current choppy market context. As a result, we believe an outright sale of its hotel and commercial portfolio as two separate packages to pension plans, smaller private real estate players and/or publicly traded REITs would deliver the most value to FTS shareholders.

- **FTS's real estate assets will likely transact at the lower end of the valuation range.** The cap rate of hotel transactions we observed during 2013 ranged from 6% to 13% (Exhibit 2), with an average cap rate of 8.2%. The CBRE Q2/14 Cap Rate Survey (Exhibit 3) pegged downtown hotel cap rates at 6.5–9.75% across Canada with suburban hotels at 7.5–10.5%. The CBRE survey also notes that commercial real estate transacts at more favourable valuations, with expected cap rates of 5–8%, with Eastern Canadian cap rates at the higher end of the range (or lower valuation) compared to Toronto and Western Canada (i.e., Vancouver, Calgary).

**Exhibit 2: Select List of Private Hotel Transactions During 2013**

Source: CBRE Q2/14 Cap Rate Survey

- **We peg Fortis Properties at an enterprise value of \$820–1,050M.** Applying cap rates of 6–8% on \$33M of estimated commercial operating income gets us to a value of \$400–550M or ~\$150–200 per sq. ft. for FTS's commercial real estate assets. For FTS's hotel operations, we apply a cap rate range of 9–11% due to the hotels being mostly located in suburban areas; this gets us to an EV of \$400–500M for the hotel segment. On a consolidated basis, we estimate a total enterprise value of \$820–1,050M for the entire real estate assets (Exhibit 4). This implies an EV/EBITDA multiple of 10.5–13.4x, below the Canadian publicly traded REIT average of 15x but higher than FTS's corporate EV/EBITDA multiple of 10x. This translates into potential EPS accretion of \$0.04–0.07 assuming the net proceeds are used to repay debt or to reinvest in future growth (i.e., limiting future preferred share and/or debt issuances).

**Exhibit 4: We Peg Fortis Real Estate at an EV of \$820-1,050M; See \$0.04-0.07 Accretion**

- **Unchanged estimates.** As uncertainty remains on the strategic review outcome for the real estate portfolio, we have maintained our forward estimates pending further additional details: EPS (f.d.) of \$1.55 in 2014E, \$1.96 in 2015E, and \$2.01 in 2016E.
- **Maintaining Market Perform rating and increasing target price to \$36 (prior \$34).** Our preliminary analysis of FTS's initiation of a strategic review of its real estate portfolio is a positive development in our books and warrants an upward multiple re-rating. Coupled with the recent close of the UNS acquisition and an expected step-function change in the company's dividend/growth profile beginning in 2015, we see a positive shift in investor sentiment on the FTS shares. Accordingly, we are increasing our target multiple to 18.0x (from 17.0x), with our target price increasing by \$2 (+5.9%) to \$36 from \$34. The target multiple is below its 10-year historical average of ~18.5x reflecting the company's higher exposure to U.S.-domiciled utilities, which tend to trade at a discount to Canadian utility franchises. Based on FTS's relative return to our price target compared to the other companies we cover in the regulated utility complex, we continue to rate FTS shares Market Perform.

## Investor Day Drives Home Message of Visible Five-Year Growth

### Event

Fortis hosted its inaugural Toronto investor day yesterday.

### Impact & Analysis

Key implications: (1) On the heels of closing the UNS acquisition, FTS's 2015-2018E capital spending program increases to ~\$6.9B from ~\$5.3B. Should the entirety of this growth capital be deployed, management expects that by 2018 not only would it achieve a ~7% CAGR in rate base (including Waneta), its earnings quality would also modestly improve, whereby the stable regulated-based businesses increase to 92% vs. 90% in 2013. (2) Management expressed a high degree of confidence in additional opportunities associated with B.C. LNG totalling over \$1B, or a potential 27% increase in FortisBC's existing rate base. This in turn would lift the company's four-year CAGR guidance to ~8.5% vs. the much-discussed ~7%. (3) In terms of its organic growth program from 2015-2018 (\$6.9B in capex), management sees ample liquidity and balance sheet capacity to fund the capital plan without issuing new common equity. However, any meaningful acquisitions or additional LNG opportunities will likely need external funding. (4) As we came out of the investor day with largely neutral expectations at the margin with the capital expenditure guidance in line with our outlook, our EPS (f.d.) estimates are unchanged: \$1.55 in 2014E, \$1.96 in 2015E, and \$2.01 in 2016E (implying a three-year EPS CAGR of 6.6%).

### Valuation & Recommendation

While the aforementioned ~7% growth guidance was largely expected, there was greater emphasis on the prospective development opportunities mainly related to B.C. LNG could elevate that growth rate to ~8.5%. Earlier this week, we raised our target price to \$36 (vs. \$34) to reflect our expectation of a positive shift in investor sentiment driven by optimism regarding the company's growth profile and the planned sale of real estate; the more fulsome 77-page investor day presentation effectively reaffirmed that earlier thinking. Based on relative returns across the regulated utility complex, we continue to rate FTS shares Market Perform.

**Price (1-Oct)** \$34.57 **52-Week High** \$34.81

## Investor Day Drives Home Message of Visible Five-Year Growth

- Maintaining Market Perform rating and \$36 target price.** Fortis delivered a series of crisp presentations at its well-attended inaugural Toronto investor day yesterday, the net of which reaffirmed our view that Fortis provides a beacon of visible, utility-driven growth at attractive levels approaching ~7%. While the aforementioned growth profile was largely expected, there was greater emphasis on the prospective development opportunities mainly related to B.C. LNG, with \$1B+ in active projects under development that could elevate that growth rate to ~8.5% – a level well above the company’s historical norms. Earlier this week, we raised our target price to \$36 (vs. \$34) to reflect our expectation of a positive shift in investor sentiment driven by our optimism regarding the company’s growth profile and the planned sale of real estate; the more fulsome 77-page investor day presentation effectively reaffirmed that earlier thinking. Based on relative returns across the regulated utility complex, we continue to rate FTS shares Market Perform.
- Reaffirms ~7% rate base growth through 2018.** On the heels of closing the UNS acquisition, FTS’s capital spending program increases to ~\$6.9B from ~\$5.3B (2015–2018E). Should the entirety of this growth capital be deployed, management expects that by 2018 not only would it achieve a ~7% CAGR in rate base (including Waneta), its earnings quality would also modestly improve, whereby the stable regulated-based businesses will increase to 92% vs. 90% in 2013.

### Exhibit 1: Multi-Year Capital Program Supports ~7% CAGR Through 2018

Source: 2014 Investor Day Presentation

- Further LNG-related opportunities could elevate growth to ~8.5%.** Management expressed a high degree of confidence in additional opportunities associated with B.C. LNG beyond its Tilbury LNG Phase 1A project (expansion of capacity to 36,000 GJ/d vs. 5,000 GJ/d at a cost of \$400M included in rate base). These prospective opportunities include an additional expansion at the 35-acre Tilbury site (Phase 1B to add 140,000 GJ/d) and existing natural gas infrastructure to service a proposed brownfield LNG export facility (Woodfibre) near Squamish, B.C. Should these developments move forward, management sees \$1B+

capital opportunity, or a 27% increase in FortisBC's existing rate base. This in turn would lift the company's four-year CAGR guidance to ~8.5% vs. the much-discussed ~7%. Longer term, there could be further staged expansions at Tilbury with a full design build out to 3 million tonnes per year (450,000 GJ/day of liquefaction), with the difference being that the capital would likely be recovered on a non-regulated basis.

## Exhibit 2: \$1B of Potential LNG-Related Opportunities Not Reflected in Our Outlook

	Tilbury Phase 1B	Woodfibre LNG Pipeline	Future Tilbury Expansions
<b>Production Capacity</b>	140,000 GJ/day liquefaction	Supports 2.1 million tonnes/annum of LNG production	Full design build to 450,000 GJ/day
<b>Estimated Capital</b>	\$450M	\$600M	TBD
<b>Status</b>	Contingent on conditional LNG contract with Hawaiian Electric	Contingent on Pacific Oil & Gas' Woodfibre LNG export facility which is still subject to various approvals	Early-stage prospective
<b>Expected COD</b>	Late 2017	Q1/2017	TBD

Source: 2014 Investor Day Presentation

- **Strong funding position.** We expect a portion of the proceeds of the sale of its real estate portfolio (we assume the assets fetch \$0.8–1B) will be utilized to permanently finance the US\$0.5B remaining balance associated with the UNS acquisition. In terms of its organic growth program from 2015–2018 (\$6.9B in capex), management sees ample liquidity (\$2.5B available on credit lines) and balance sheet capacity (including DRIP of \$100M annually) to fund the capital plan without issuing new common equity. However, any meaningful acquisitions or additional LNG opportunities will likely need external funding.
- **Unchanged estimates.** As we came out of the investor day with largely neutral expectations at the margin with the capital expenditure guidance in-line with our outlook, our EPS (f.d.) estimates are unchanged: \$1.55 in 2014E, \$1.96 in 2015E, and \$2.01 in 2016E (implying a three-year EPS CAGR of 6.6%).
- **Maintaining Market Perform rating and \$36 target price.** Fortis's inaugural investor day was successful in reaffirming our thesis for Fortis, in that the company is a beacon for visible, utility-driven growth at attractive levels approaching ~7%. While we came out of the investor day with largely neutral expectations at the margin, there was a good level of details offered and an overall credible strategy communicated. Earlier this week, we raised our target price to \$36 (vs. \$34) to reflect our expectation of a positive shift in investor sentiment driven by our optimism regarding the company's growth profile and the planned sale of real estate; the more fulsome 77-page investor day presentation effectively reaffirmed that earlier thinking. Based on relative returns across the regulated utility complex, we continue to rate FTS shares Market Perform.

**IMPORTANT DISCLOSURES****Analyst's Certification**

I, Ben Pham, CFA, hereby certify that the views expressed in this report accurately reflect my personal views about the subject securities or issuers. I also certify that no part of my compensation was, is, or will be, directly or indirectly, related to the specific recommendations or views expressed in this report.

Analysts who prepared this report are compensated based upon (among other factors) the overall profitability of BMO Capital Markets and their affiliates, which includes the overall profitability of investment banking services. Compensation for research is based on effectiveness in generating new ideas and in communication of ideas to clients, performance of recommendations, accuracy of earnings estimates, and service to clients.

Analysts employed by BMO Nesbitt Burns Inc. and/or BMO Capital Markets Limited are not registered as research analysts with FINRA (exception: Alex Arfaei). These analysts may not be associated persons of BMO Capital Markets Corp. and therefore may not be subject to the NASD Rule 2711 and NYSE Rule 472 restrictions on communications with a subject company, public appearances and trading securities held by a research analyst account.

**Company Specific Disclosure**

Disclosure 1: BMO Capital Markets has undertaken an underwriting liability with respect to this issuer within the past 12 months.

Disclosure 2: BMO Capital Markets has provided investment banking services with respect to this issuer within the past 12 months.

Disclosure 3: BMO Capital Markets has managed or co-managed a public offering of securities with respect to this issuer within the past 12 months.

Disclosure 4: BMO Capital Markets or an affiliate has received compensation for investment banking services from this issuer within the past 12 months.

Disclosure 5: BMO Capital Markets or an affiliate received compensation for products or services other than investment banking services within the past 12 months.

Disclosure 6: This issuer is a client (or was a client) of BMO NB, BMO Capital Markets Corp., BMO CM Ltd. or an affiliate within the past 12 months: Investment Banking Services & Non-Securities Related Services.

Disclosure 8: BMO Capital Markets or an affiliate has a financial interest in 1% or more of any class of the equity securities of this issuer.

**Methodology and Risks to Price Target/Valuation**

**Methodology:** Our target price is based on a P/E multiple of 18.0x the average of our FY15/16E estimates.

**Risks:** Key risks include interest rates, management execution, construction, capital markets, and regulatory risk.

**General Disclaimer**

BMO Capital Markets” is a trade name used by the BMO Investment Banking Group, which includes the wholesale arm of Bank of Montreal and its subsidiaries BMO Nesbitt Burns Inc., BMO Capital Markets Limited in the U.K. and BMO Capital Markets Corp. in the U.S. BMO Nesbitt Burns Inc., BMO Capital Markets Limited and BMO Capital Markets Corp are affiliates. Bank of Montreal or its subsidiaries (“BMO Financial Group”) has lending arrangements with, or provide other remunerated services to, many issuers covered by BMO Capital Markets. The opinions, estimates and projections contained in this report are those of BMO Capital Markets as of the date of this report and are subject to change without notice. BMO Capital Markets endeavours to ensure that the contents have been compiled or derived from sources that we believe are reliable and contain information and opinions that are accurate and complete. However, BMO Capital Markets makes no representation or warranty, express or implied, in respect thereof, takes no responsibility for any errors and omissions contained herein and accepts no liability whatsoever for any loss arising from any use of, or reliance on, this report or its contents. Information may be available to BMO Capital Markets or its affiliates that is not reflected in this report. The information in this report is not intended to be used as the primary basis of investment decisions, and because of individual client objectives, should not be construed as advice designed to meet the particular investment needs of any investor. This material is for information purposes only and is not an offer to sell or the solicitation of an offer to buy any security. BMO Capital Markets or its affiliates will buy from or sell to customers the securities of issuers mentioned in this report on a principal basis. BMO Capital Markets or its affiliates, officers, directors or employees have a long or short position in many of the securities discussed herein, related securities or in options, futures or other derivative instruments based thereon. The reader should assume that BMO Capital Markets or its affiliates may have a conflict of interest and should not rely solely on this report in evaluating whether or not to buy or sell securities of issuers discussed herein.

**Additional Matters**

To Canadian Residents: BMO Nesbitt Burns Inc. furnishes this report to Canadian residents and accepts responsibility for the contents herein subject to the terms set out above. Any Canadian person wishing to effect transactions in any of the securities included in this report should do so through BMO Nesbitt Burns Inc.

The following applies if this research was prepared in whole or in part by Andrew Breichmanas, Iain Reid, Tony Robson, David Round, Edward Sterck or Brendan Warn: This research is not prepared subject to Canadian disclosure requirements. This research is prepared by BMO Capital Markets Limited and subject to the regulations of the Financial Conduct Authority (FCA) in the United Kingdom. FCA regulations require that a firm providing research disclose its ownership interest in the issuer that is the subject of the research if it and its affiliates own 5% or more of the equity of the issuer. Canadian regulations require that a firm providing research disclose its ownership interest in the issuer that is the subject of the research if it and its affiliates own 1% or more of the equity of the issuer that is the subject of the research. Therefore BMO Capital Markets Limited will only disclose its and its affiliates’ ownership interest in the subject issuer if such ownership exceeds 5% of the equity of the issuer.

To U.S. Residents: BMO Capital Markets Corp. furnishes this report to U.S. residents and accepts responsibility for the contents herein, except to the extent that it refers to securities of Bank of Montreal. Any U.S. person wishing to effect transactions in any security discussed herein should do so through BMO Capital Markets Corp.

To U.K. Residents: In the UK this document is published by BMO Capital Markets Limited which is authorised and regulated by the Financial Conduct Authority. The contents hereof are intended solely for the use of, and may only be issued or passed on to, (I) persons who have professional experience in matters relating to investments falling within Article 19(5) of the Financial Services and Markets Act 2000 (Financial Promotion) Order 2005 (the “Order”) or (II) high net worth entities falling within Article 49(2)(a) to (d) of the Order (all such persons together referred to as “relevant persons”). The contents hereof are not intended for the use of and may not be issued or passed on to, retail clients.

Unauthorized reproduction, distribution, transmission or publication without the prior written consent of BMO Capital Markets is strictly prohibited.

## First Glance: Q3/14 Adj. EPS in Line With Our Expectations

After normalizing for non-recurring expenses (\$0.16/sh) related to the UNS Energy acquisition, Fortis' adj. EPS (fd) were \$0.23 in Q3/14 (\$0.23 in Q3/13), in line with our outlook of \$0.23. We did not normalize for ~\$0.11 of additional interest expense associated with the convertible debentures issued to finance UNS, as we already had it in our numbers (EPS would have been \$0.33 per share excluding the interest). The company reiterated a capital program of ~\$1.8B in 2014 and ~\$9.0B in 2014-2018, which would translate to a rate base CAGR of +7% over that time period. Conference call today, November 7, at 10:00 a.m. ET; Tel: 1-877-223-4471 or 647-788-4922.

### Our View:

- The quarter itself was messy and included several short-term impacts that detract from the recurring earnings power of the business. Corporate costs were higher than expected due to short-term dilution from financings and retirement expenses. Low rainfall in Belize and the under-earning CH Energy utility both exacerbated the weakness. However, UNS posted a strong first showing since being acquired in August (\$37M vs. our \$12M estimate) while its legacy regulated utilities are still delivering steady rate base growth.
- As non-recurring expenses and near-term dilution move into the rear-view mirror, we see several developments that could lead to a significant earnings bounce-back in 2015 and 2016. For example, FTS' Waneta hydroelectric dam expansion in B.C. remains on budget (\$900M gross; FTS owns 51%) and on track for a spring 2015 in-service date; this project could add at least \$20M in high-quality earnings once commissioned. In addition, construction has begun on the \$400M Tilbury LNG expansion in B.C., which is expected to contribute to earnings in H2/16.
- Upcoming regulatory decisions should also benefit the company's bottom line. For example, CH Energy filed in July for new rates that could result in a significant revenue increase beginning in mid-2015 and a Canadian-like allowed ROE of 9% (decision expected H1/15). In Alberta, FTS is recognizing only 60% of revenues associated with capital trackers, while other utilities have recently been approved for 90%; Alberta profits should improve once regulatory treatment of capital trackers are resolved, pending a Q1/15 decision. Also, incentive earnings are now available in B.C. following approval of multi-year performance-based regulation plans in September.

This report was prepared by an analyst(s) employed by BMO Nesbitt Burns Inc., and who is (are) not registered as a research analyst(s) under FINRA rules. For disclosure statements, including the Analyst's Certification, please refer to pages 3 to 6.

## Q3 – The Last of the Down Quarters

### Event

Fortis's third quarter results were in line with our expectations (adj. EPS of \$0.23 vs. our estimate of \$0.23), but they reflected several short-term impacts that masked the true earning power of the business.

### Impact & Analysis

Key implications: (1) FTS reiterated a capital spending program of ~\$1.8B in 2014 and ~\$9.0B in 2014-2018; this would translate to a rate base CAGR of +7% over that time period. (2) Following several years of lackluster growth, we see several developments that could kick-start earnings growth in 2015 and 2016. For example, FTS's Waneta hydroelectric project in B.C. remains on budget and on track for a spring 2015 in-service date; this project should add at least \$20M in earnings. In addition, construction has begun on the \$400M Tilbury LNG expansion in B.C., which is expected to contribute to earnings in H2/16. (3) Regulatory decisions should also benefit the company's bottom line. For example, CH Energy filed in July for new rates that could result in a significant revenue increase beginning in mid-2015. In Alberta, FTS is only recognizing 60% of revenues associated with capital trackers, while other utilities have recently been approved for 90%. Also, incentive earnings are now available in B.C. following approval of multi-year PBR programs. (4) We have updated our estimates to reflect Q3 actuals and lower corporate expenses in Q4/14 due to timing. As a result, our 2014 EPS estimate (f.d.) is now \$1.59 (vs. \$1.55) while our 2015/16 estimates are unchanged at \$1.96/\$2.01.

### Valuation & Recommendation

Overall, we were encouraged to see the strong underlying demand trends at recently acquired UNS Energy as well as management's ability to execute on its growth initiatives. As non-recurring expenses and near-term dilution are finally moving into the rear-view mirror, we see a bounce back in earnings in 2015E and 2016E and a continued improvement in investor sentiment on the FTS shares. We are increasing our target price to \$38 (vs. \$36) on the back of that improvement and to reflect recent positive sentiment towards defensive-oriented investments and the low bond yield environment. Based on relative returns across the regulated utility complex, we continue to rate FTS shares Market Perform.

### Q3 – The Last of the Down Quarters

- **Maintaining Market Perform rating and increasing target price to \$38 (vs. \$36).** Fortis's third quarter results were in line with our expectations (adj. EPS of \$0.23 vs. our estimate of \$0.23), but they reflected several short-term impacts that masked the true earning power of the business. Overall, we were encouraged to see the strong underlying demand trends at recently acquired UNS Energy as well as management's ability to execute on its growth initiatives. As non-recurring expenses and near-term dilution are finally moving into the rear-view mirror, we see a bounce back in earnings in 2015E and 2016E and a continued improvement in investor sentiment on the FTS shares. We are increasing our target price to \$38 (vs. \$36) on the back of that improvement and to reflect recent positive sentiment towards defensive-oriented investments and the low bond yield environment. Based on relative returns across the regulated utility complex, we continue to rate FTS shares Market Perform.
- **Earnings should improve in 2015E and 2016E.** As non-recurring expenses and near-term dilution move into the rear-view mirror, we see several developments that could lead to a significant earnings improvement in 2015E and 2016E. For example, FTS's Waneta hydroelectric dam expansion in B.C. remains on budget (\$900M gross; FTS owns 51%) and on track for a spring 2015 in-service date; this project should add at least \$20M in high-quality earnings once commissioned. In addition, construction has begun on the \$400M Tilbury LNG expansion in B.C., which is expected to contribute to earnings in H2/16. Overall, FTS plans to invest ~\$1.8B of capital in 2014 and ~\$9.0B in 2014–2018; this would translate to a rate base CAGR of +7% over that time period.
- **Upcoming regulatory decisions should also benefit the company's bottom line.** For example, CH Energy filed in July for new rates that could result in a significant revenue increase beginning in mid-2015 and a Canadian-like allowed ROE of 9% (decision expected H1/15). In Alberta, FTS is only recognizing 60% of revenues associated with capital trackers, while other utilities have recently been approved for 90%; Alberta profits should improve once regulatory treatment of capital trackers are resolved pending a Q1/15 decision. Also, incentive earnings are now available in B.C. following approval of multi-year performance-based regulation plans in September.
- **Revised estimates.** We have updated our estimates to reflect Q3 actuals and lower corporate expenses in Q4/14 due to timing. As a result, our 2014 EPS estimate (f.d.) is now \$1.59 (vs. \$1.55) while our 2015/16 estimates are unchanged at \$1.96/\$2.01. Note that our 2014 estimate includes the convertible debenture cost (after-tax) associated with the UNS Energy acquisition (~\$0.22/sh).
- **Maintaining Market Perform rating and increasing target price to \$38 (vs. \$36).** We are raising our target to \$38 (from \$36) on the back of an increase in our target P/E multiple to 19.0x (vs. 18.0x) as sentiment towards defensive investments have improved and bond yields have remained low. The multiple is above its 10-year historical average of ~18.5x. Based on FTS's relative return to our target price compared to the other companies we cover in the regulated utility complex, we continue to rate FTS shares Market Perform.

## Exhibit 1: Calculation of Our Target Price

FTS Valuation	Multiple	2014E	2015E	2016E
Adj. EPS (f.d.)		\$1.59	\$1.96	\$2.01
Equity value/sh	19.0x	\$30.22	\$37.26	\$38.15

Avg. of FY15/16E	\$38.00
------------------	---------

## P/E Sensitivity

18.0x	18.5x	19.0x	19.5x	20.0x
\$35.72	\$36.72	\$37.71	\$38.70	\$39.69

Source: BMO Capital Markets

- **Messy third quarter print.** After normalizing for non-recurring expenses (\$0.16/sh) related to the UNS Energy acquisition, Fortis's adj. EPS (f.d.) was \$0.23 in Q3/14 (\$0.23 in Q3/13), in line with our outlook of \$0.23. We did not normalize for ~\$0.11 per share of additional interest expense associated with the convertible debentures issued to finance UNS as we already had it in our numbers (EPS would have been \$0.33 ex. the interest). The quarter itself was messy and included several short-term impacts that detract from the recurring earning power of the business. Corporate costs were higher than expected due to short-term dilution from financings and retirement expenses. Rainfall in Belize was low and the under-earning CH Energy utility both exacerbated the weakness. However, UNS posted a strong first showing since being acquired in August (\$37M vs. our \$12M estimate) while the company's legacy regulated utilities are still delivering steady rate base growth.

**General Disclaimer**

BMO Capital Markets™ is a trade name used by the BMO Investment Banking Group, which includes the wholesale arm of Bank of Montreal and its subsidiaries BMO Nesbitt Burns Inc., BMO Capital Markets Limited in the U.K. and BMO Capital Markets Corp. in the U.S. BMO Nesbitt Burns Inc., BMO Capital Markets Limited and BMO Capital Markets Corp are affiliates. Bank of Montreal or its subsidiaries ("BMO Financial Group") has lending arrangements with, or provide other remunerated services to, many issuers covered by BMO Capital Markets. The opinions, estimates and projections contained in this report are those of BMO Capital Markets as of the date of this report and are subject to change without notice. BMO Capital Markets endeavours to ensure that the contents have been compiled or derived from sources that we believe are reliable and contain information and opinions that are accurate and complete. However, BMO Capital Markets makes no representation or warranty, express or implied, in respect thereof, takes no responsibility for any errors and omissions contained herein and accepts no liability whatsoever for any loss arising from any use of, or reliance on, this report or its contents. Information may be available to BMO Capital Markets or its affiliates that is not reflected in this report. The information in this report is not intended to be used as the primary basis of investment decisions, and because of individual client objectives, should not be construed as advice designed to meet the particular investment needs of any investor. This material is for information purposes only and is not an offer to sell or the solicitation of an offer to buy any security. BMO Capital Markets or its affiliates will buy from or sell to customers the securities of issuers mentioned in this report on a principal basis. BMO Capital Markets or its affiliates, officers, directors or employees have a long or short position in many of the securities discussed herein, related securities or in options, futures or other derivative instruments based thereon. The reader should assume that BMO Capital Markets or its affiliates may have a conflict of interest and should not rely solely on this report in evaluating whether or not to buy or sell securities of issuers discussed herein.

**Additional Matters**

To Canadian Residents: BMO Nesbitt Burns Inc. furnishes this report to Canadian residents and accepts responsibility for the contents herein subject to the terms set out above. Any Canadian person wishing to effect transactions in any of the securities included in this report should do so through BMO Nesbitt Burns Inc.

The following applies if this research was prepared in whole or in part by Andrew Breichmanas, Iain Reid, Tony Robson, David Round, Edward Sterck or Brendan Warn: This research is not prepared subject to Canadian disclosure requirements. This research is prepared by BMO Capital Markets Limited and subject to the regulations of the Financial Conduct Authority (FCA) in the United Kingdom. FCA regulations require that a firm providing research disclose its ownership interest in the issuer that is the subject of the research if it and its affiliates own 5% or more of the equity of the issuer. Canadian regulations require that a firm providing research disclose its ownership interest in the issuer that is the subject of the research if it and its affiliates own 1% or more of the equity of the issuer that is the subject of the research. Therefore BMO Capital Markets Limited will disclose its and its affiliates' ownership interest in the subject issuer only if such ownership exceeds 5% of the equity of the issuer.

To U.S. Residents: BMO Capital Markets Corp. furnishes this report to U.S. residents and accepts responsibility for the contents herein, except to the extent that it refers to securities of Bank of Montreal. Any U.S. person wishing to effect transactions in any security discussed herein should do so through BMO Capital Markets Corp.

To U.K. Residents: In the UK this document is published by BMO Capital Markets Limited which is authorised and regulated by the Financial Conduct Authority. The contents hereof are intended solely for the use of, and may only be issued or passed on to, (I) persons who have professional experience in matters relating to investments falling within Article 19(5) of the Financial Services and Markets Act 2000 (Financial Promotion) Order 2005 (the "Order") or (II) high net worth entities falling within Article 49(2)(a) to (d) of the Order (all such persons together referred to as "relevant persons"). The contents hereof are not intended for the use of and may not be issued or passed on to retail clients.

Unauthorized reproduction, distribution, transmission or publication without the prior written consent of BMO Capital Markets is strictly prohibited.

## 6.25% Dividend Increase

Fortis' board of directors has approved a 6.25% increase in the company's quarterly common share dividend to \$0.34/sh from the current quarterly rate of \$0.32/sh. As a result of this announcement, the new annualized common share dividend will be \$1.36/sh (vs. \$1.28/sh previously), implying a 3.5% yield at current prices. The first quarterly payment of \$0.34 per common share is payable on and after March 1, 2015, to common shareholders of record at the close of business on February 17, 2015.

### Our View:

- We see the dividend increase as a positive development for the stock. Although the increase was largely in line with expectations (\$0.34 vs. consensus of \$0.3375 and our estimate of \$0.345), we believe the market is ascribing premium value to stocks with above-average dividend growth profiles underpinned by low-risk regulated utility projects. We note that the forecast payout ratio for 2015 is expected to remain under 70% versus the 2010-2014E average of ~73.6%.
- In our view, the higher dividend is supported by strong underlying demand trends at recently acquired UNS Energy as well as management's ability to execute on its growth initiatives. In addition, the company's Waneta hydroelectric dam expansion in B.C. is on track for a spring 2015 in-service date; we believe this project should add at least \$20M in high-quality earnings once commissioned.
- The company has had a long-term track record of raising the dividend annually and we expect this trend to continue. In the last quarterly conference call, management reiterated rate base growth of ~7% on average through 2018. Though we see the stock trading at full valuation levels (P/E of 19.1x our 2016E estimate) in the context of forward bond yield expectations of 3%, we note that the stock offers consistent earnings/dividend growth that should result in modest stock price appreciation over time.

This report was prepared by an analyst(s) employed by BMO Nesbitt Burns Inc., and who is (are) not registered as a research analyst(s) under FINRA rules. For disclosure statements, including the Analyst's Certification, please refer to pages 2 to 5.

## First Glance: Q4/14 Results Lower Than Expected; Initiates 2015 Capex Budget of \$2.2B

Fortis' adj. EPS (basic) were \$0.44 in Q4/14 (\$0.47 in Q4/13), lower than our outlook of \$0.47 and consensus of \$0.49 (range of \$0.44-0.53). Liquidity position is strong with \$2.2B of credit facility room as at year-end 2014. Conference call today, February 19, at 10:00 a.m. ET; Tel: 1-877-223-4471 or 647-788-4922.

### Our View:

- Relative to our model, the EPS variance was largely driven by lower-than-expected earnings contribution from Central Hudson (higher costs during the current two-year rate freeze), partially offset by a strong showing at UNS Energy, which was acquired in August 2014. Earnings from FTS' remaining business segments were largely in line with our expectations. Please see Exhibit 1 for more details of the variance.
- The company initiated a 2015 capital budget of \$2.2B, consistent with our current estimate of \$2.2B and up from \$1.7B in 2014. Spending this year is expected to be primarily driven by UNS Energy and its Western Canadian Utilities (Waneta hydro facility, Tilbury LNG expansion, FortisAlberta). Over the five-year period 2015-2019, the company's capital program is expected to be ~\$9.0B, of which 38% relates to Canadian regulated electric utilities, 20% at Canadian regulated gas utilities, 35% in the U.S., 5% to Caribbean regulated electric utilities, and the remaining 2% to non-regulated operations. This capital spending program should support +6.5% rate base growth on average over the next five years.
- Significant regulatory processes are ongoing in Alberta and New York. In Alberta, decisions with respect to the generic cost of capital and FortisAlberta's combined capital tracker application (2013-2015) are both expected in Q1/15. In New York, a joint settlement proposal was filed in February that provides for new rates at Central Hudson (NY) which reflect an allowed ROE of 9% and deemed equity of 48% beginning July 1, 2015, for a three-year period. We understand that public hearings are slated for March/April 2015, with a regulatory decision expected as early as June 2015.
- FTS highlighted that a decision on strategic options (full or partial sale or IPO) for its hotel and real estate business (previously announced in September 2014) is expected to be made in the second quarter of 2015.

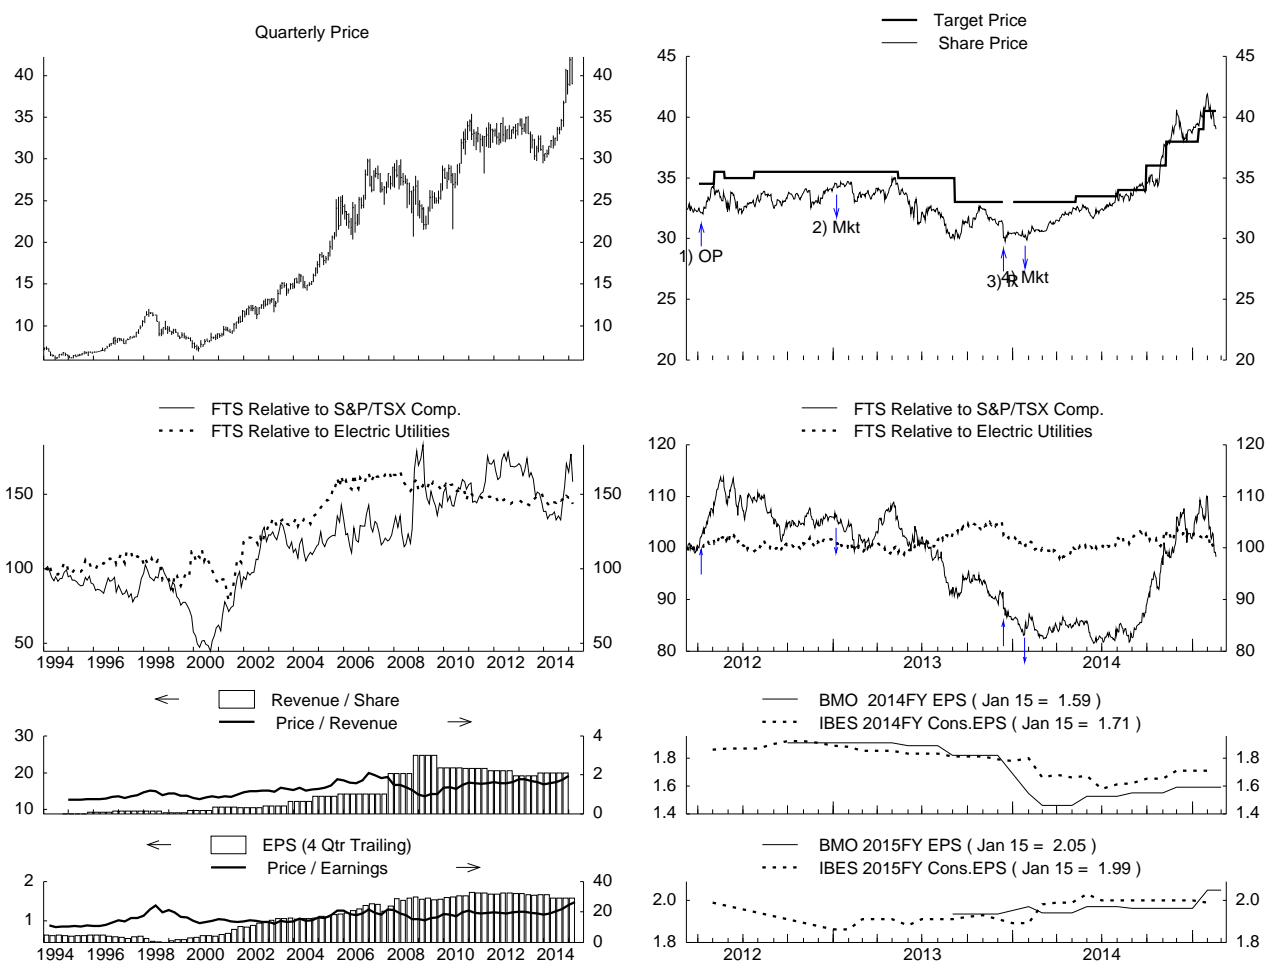

This report was prepared by an analyst(s) employed by BMO Nesbitt Burns Inc., and who is (are) not registered as a research analyst(s) under FINRA rules. For disclosure statements, including the Analyst's Certification, please refer to pages 3 to 6.

## Q4 – Multi-Year Positive Growth Trends on Track

### Event

Fortis' fourth quarter results were lower than expected (adj. EPS of \$0.44/sh vs. consensus of \$0.49 and our estimate of \$0.48) as Central Hudson continues to under-earn (~7% ROE) due to a two-year rate freeze. The key here is that this is a temporary headwind that should normalize by H2/15 and therefore should have no impact on FTS's favourable long-term growth trends. Furthermore, management noted on the call that 38% of their assets are located in the U.S., with the stronger US\$ providing a nice tailwind for future EPS (every 5% move is worth \$0.04).

### Impact & Analysis

Key implications: (1) The company initiated a 2015 capital budget of \$2.2B consistent with our current estimate of \$2.2B and up from \$1.7B in 2014. Over the five-year period 2015-2019, the company's capital program is expected to reach ~\$9.0B. This capital spending program should support +6.5% rate base growth on average over the next five years. (2) In Alberta, decisions with respect to the cost of capital and FortisAlberta's combined capital tracker application are both expected in Q1/15. In NY, a joint settlement proposal was filed in February that provides for new rates at Central Hudson that reflect an allowed ROE of 9% and deemed equity of 48% beginning July 1, 2015 for a three-year period. (3) FTS highlighted that a decision on strategic options for its hotel and real estate business is expected to be made in Q2/15. We believe the most likely outcome is an outright sale of the portfolio and estimate potential net proceeds of \$755-955M. (4) We have updated our estimates, largely to reflect Q4 actuals, higher corporate expense, and to dial back overly optimistic estimates at Central Hudson. This results in our 2015E EPS (f.d.) decreasing to \$2.00 (vs. \$2.05) and 2016E to \$2.06 (vs. \$2.07).

### Valuation & Recommendation

Our capital spending assumptions are consistent with management guidance and we are making no major change to our 2016E EPS estimate (\$2.06), which sits below consensus of \$2.14. Accordingly, we maintain our \$40.50 target price and Market Perform rating on the FTS shares.

## Q4 – Multi-Year Positive Growth Trends on Track

- **Maintain Market Perform rating and \$40.50 target price.** Fortis' fourth quarter results were lower than expected (adj. EPS of \$0.44/sh vs. consensus of \$0.49 and our estimate of \$0.48) as Central Hudson continues to under-earn (~7% ROE) due to a two-year rate freeze. The key here is that this is a temporary headwind that should normalize by H2/15 when rates are re-based and therefore should have no impact to FTS's favourable long-term growth trends. Furthermore, management noted on the call that 38% of their assets are located in the U.S., with the stronger US\$ providing a nice tailwind for future EPS (every 5% move is worth 4c). Our capital spending assumptions are consistent with management guidance and we are making no major change to our 2016E EPS estimate (\$2.06), which sits below consensus of \$2.14. Accordingly, we maintain our \$40.50 target price and Market Perform rating on the FTS shares.
- **2015 capital spending outlook – \$2.2B.** The company initiated a 2015 capital budget of \$2.2B (includes non-utility capex), consistent with our current estimate of \$2.2B and up from \$1.7B in 2014. Spending this year is expected to be primarily driven by UNS Energy and Western Canadian projects (Waneta hydro facility, Tilbury LNG expansion, FortisAlberta). Over the five-year period 2015-2019, the company's capital program is expected to reach ~\$9.0B, of which 38% relates to Canadian regulated electric utilities, 20% at Canadian regulated gas utilities, 35% in the U.S., 5% to Caribbean regulated electric utilities, and the remaining 2% to non-regulated operations. This capital spending program should support +6.5% rate base growth on average over the next five years.

### Exhibit 1: Capital Expenditure Outlook

Capital Expenditures (\$M)	2015E	2014A
FortisBC Energy	385	332
FortisAlberta	417	348
FortisBC Electric	103	92
Eastern Canadian	159	166
Electric Caribbean	125	71
Central Hudson	165	126
UNS Energy	684	444
<b>Subtotal - Regulated Utilities</b>	<b>\$2,038</b>	<b>\$1,579</b>
FortisGeneration	78	102
Non-Utility	36	44
<b>Subtotal - Non-Regulated</b>	<b>\$114</b>	<b>\$146</b>
<b>Total</b>	<b>\$2,152</b>	<b>\$1,725</b>

Source: Company Report

- **Significant regulatory processes are currently ongoing in Alberta and New York.** In Alberta, decisions with respect to the generic cost of capital and FortisAlberta's combined capital tracker application (2013-2015) are both expected in Q1/15. In New York, a joint settlement proposal was filed in February that provides for new rates at Central Hudson (NY) that reflect an allowed ROE of 9% and deemed equity of 48% beginning July 1, 2015 for a

three-year period. We understand that public hearings are slated for March/April 2015, with a regulatory decision expected as early as June 2015.

- **Decision on real estate strategic review expected in Q2/15.** FTS highlighted that a decision on strategic options (full or partial sale or IPO) for its hotel and real estate business (previously announced in September 2014) is expected to be made in the second quarter of 2015. We believe the most likely outcome is an outright sale of the portfolio and estimate potential net proceeds of \$755-955M, implying cap rates of 7.5-9.5% overall.
- **Revised estimates.** We have updated our estimates, largely to reflect Q4 actuals, higher corporate expense, and to dial back overly optimistic estimates at Central Hudson. This results in our 2015 EPS estimate (f.d.) decreasing to \$2.00 (vs. \$2.05) and 2016 to \$2.06 (vs. \$2.07).
- **Reiterate \$40.50 target price and Market Perform rating.** Our \$40.50 target price is based on a P/E multiple of 19.5x our 2016E EPS (f.d.) estimate. The multiple is above its 10-year historical average of ~18.7x, reflecting higher-than-average rate base growth prospects, increased diversification and optionality, and support from low bond yields. Based on FTS' relative return to our target price compared to the other companies we cover in the regulated utility complex, we continue to rate FTS shares Market Perform.

#### Exhibit 2: Calculation of Our Target Price

FTS Valuation	Multiple	2014	2015E	2016E
Adj. EPS (f.d.)		\$1.57	\$2.00	\$2.06
Equity value/sh	19.5x	\$30.70	\$38.94	\$40.23

2016E	\$40.50

- **Fourth quarter results.** Fortis' adj. EPS (basic) was \$0.44/sh in Q4/14 (\$0.47 in Q4/13), lower than our outlook of \$0.48 per share and consensus of \$0.49 (range of \$0.44-0.53). Liquidity position is strong with \$2.2B of credit facility room as at year-end 2014. Relative to our model, the EPS variance was largely driven by lower-than-expected earnings contribution from Central Hudson (higher costs during current two-year rate freeze), partially offset by a strong showing at UNS Energy which was acquired in August 2014. Earnings from FTS' remaining business segments were largely in line with our expectations.

**Dissemination of Research**

BMO Capital Markets Equity Research is available via our website <https://research-ca.bmocapitalmarkets.com/Public/Secure/Login.aspx?ReturnUrl=/Member/Home/ResearchHome.aspx>. Institutional clients may also receive our research via Thomson Reuters, Bloomberg, FactSet, and Capital IQ. Research reports and other commentary are required to be simultaneously disseminated internally and externally to our clients.

**General Disclaimer**

BMO Capital Markets” is a trade name used by the BMO Investment Banking Group, which includes the wholesale arm of Bank of Montreal and its subsidiaries BMO Nesbitt Burns Inc., BMO Capital Markets Limited in the U.K. and BMO Capital Markets Corp. in the U.S. BMO Nesbitt Burns Inc., BMO Capital Markets Limited and BMO Capital Markets Corp are affiliates. Bank of Montreal or its subsidiaries (“BMO Financial Group”) has lending arrangements with, or provide other remunerated services to, many issuers covered by BMO Capital Markets. The opinions, estimates and projections contained in this report are those of BMO Capital Markets as of the date of this report and are subject to change without notice. BMO Capital Markets endeavours to ensure that the contents have been compiled or derived from sources that we believe are reliable and contain information and opinions that are accurate and complete. However, BMO Capital Markets makes no representation or warranty, express or implied, in respect thereof, takes no responsibility for any errors and omissions contained herein and accepts no liability whatsoever for any loss arising from any use of, or reliance on, this report or its contents. Information may be available to BMO Capital Markets or its affiliates that is not reflected in this report. The information in this report is not intended to be used as the primary basis of investment decisions, and because of individual client objectives, should not be construed as advice designed to meet the particular investment needs of any investor. This material is for information purposes only and is not an offer to sell or the solicitation of an offer to buy any security. BMO Capital Markets or its affiliates will buy from or sell to customers the securities of issuers mentioned in this report on a principal basis. BMO Capital Markets or its affiliates, officers, directors or employees have a long or short position in many of the securities discussed herein, related securities or in options, futures or other derivative instruments based thereon. The reader should assume that BMO Capital Markets or its affiliates may have a conflict of interest and should not rely solely on this report in evaluating whether or not to buy or sell securities of issuers discussed herein.

**Additional Matters**

To Canadian Residents: BMO Nesbitt Burns Inc. furnishes this report to Canadian residents and accepts responsibility for the contents herein subject to the terms set out above. Any Canadian person wishing to effect transactions in any of the securities included in this report should do so through BMO Nesbitt Burns Inc.

The following applies if this research was prepared in whole or in part by Iain Reid, Tony Robson, David Round, Edward Sterck or Brendan Warn: This research is not prepared subject to Canadian disclosure requirements. This research is prepared by BMO Capital Markets Limited and subject to the regulations of the Financial Conduct Authority (FCA) in the United Kingdom. FCA regulations require that a firm providing research disclose its ownership interest in the issuer that is the subject of the research if it and its affiliates own 5% or more of the equity of the issuer. Canadian regulations require that a firm providing research disclose its ownership interest in the issuer that is the subject of the research if it and its affiliates own 1% or more of the equity of the issuer that is the subject of the research. Therefore BMO Capital Markets Limited will disclose its and its affiliates’ ownership interest in the subject issuer only if such ownership exceeds 5% of the equity of the issuer.

To U.S. Residents: BMO Capital Markets Corp. furnishes this report to U.S. residents and accepts responsibility for the contents herein, except to the extent that it refers to securities of Bank of Montreal. Any U.S. person wishing to effect transactions in any security discussed herein should do so through BMO Capital Markets Corp.

To U.K. Residents: In the UK this document is published by BMO Capital Markets Limited which is authorised and regulated by the Financial Conduct Authority. The contents hereof are intended solely for the use of, and may only be issued or passed on to, (I) persons who have professional experience in matters relating to investments falling within Article 19(5) of the Financial Services and Markets Act 2000 (Financial Promotion) Order 2005 (the “Order”) or (II) high net worth entities falling within Article 49(2)(a) to (d) of the Order (all such persons together referred to as “relevant persons”). The contents hereof are not intended for the use of and may not be issued or passed on to retail clients.

Unauthorized reproduction, distribution, transmission or publication without the prior written consent of BMO Capital Markets is strictly prohibited.

**Company Description** – Fortis Inc. (Fortis) is a publicly listed holding company with four key businesses: electric utility operations, regulated natural gas distribution, non-regulated electric power generation and non-utility property activities. Gas and electric utility operations include Newfoundland Power, Maritime Electric, FortisOntario, Caribbean Utilities (59.5%), Turks and Caicos, FortisAlberta, FortisBC, the FortisBC Energy Companies, CH Energy Group and UNS Energy Corporation. Its

This report was prepared by an analyst(s) employed by BMO Nesbitt Burns Inc., and who is (are) not registered as a research analyst(s) under FINRA rules. For disclosure statements, including the Analyst's Certification, please refer to the back pages.

regulated utilities account for approximately 93% of the company's total assets and serve more than 3 million customers. *Website:* fortisinc.com

**Recent Results** – Fortis' adjusted EPS (basic) was \$0.44/sh in Q4/14, lower than our outlook of \$0.48 per share and consensus of \$0.49. Relative to our model, the EPS variance was largely driven by lower-than-expected earnings contribution from Central Hudson (higher costs during current two-year rate freeze), partially offset by a strong

showing at UNS Energy, which was acquired in August 2014.

**Corporate Developments** – On February 9, 2015, Fortis announced that it would host its inaugural U.S. Investor Day on April 1, 2015 in New York.

On February 2, 2015, FortisBC finalized a 10-year LNG supply agreement with BC Ferries to fuel new vessels. FortisBC will supply up to 300,000 GJ of LNG per year from its Tilbury facility located in Delta, B.C.

On December 17, 2014, Fortis increased its annual dividend by 6.25% to \$1.36/sh from \$1.28/sh.

On October 28, 2014, Fortis issued 58.2M common shares at a price of \$30.72/sh upon conversion of \$1.8B of its 4% convertible unsecured subordinated debentures. The convertible debentures were previously issued as part of the financing for the UNS Energy acquisition.

On October 21, 2014, FortisBC started construction of its \$400M Tilbury LNG facility expansion project in Delta, BC. The expansion is expected to be completed by Q4/16

and would add 1.1M GJ of LNG to storage and 34,000 GJ per day of liquefaction capacity.

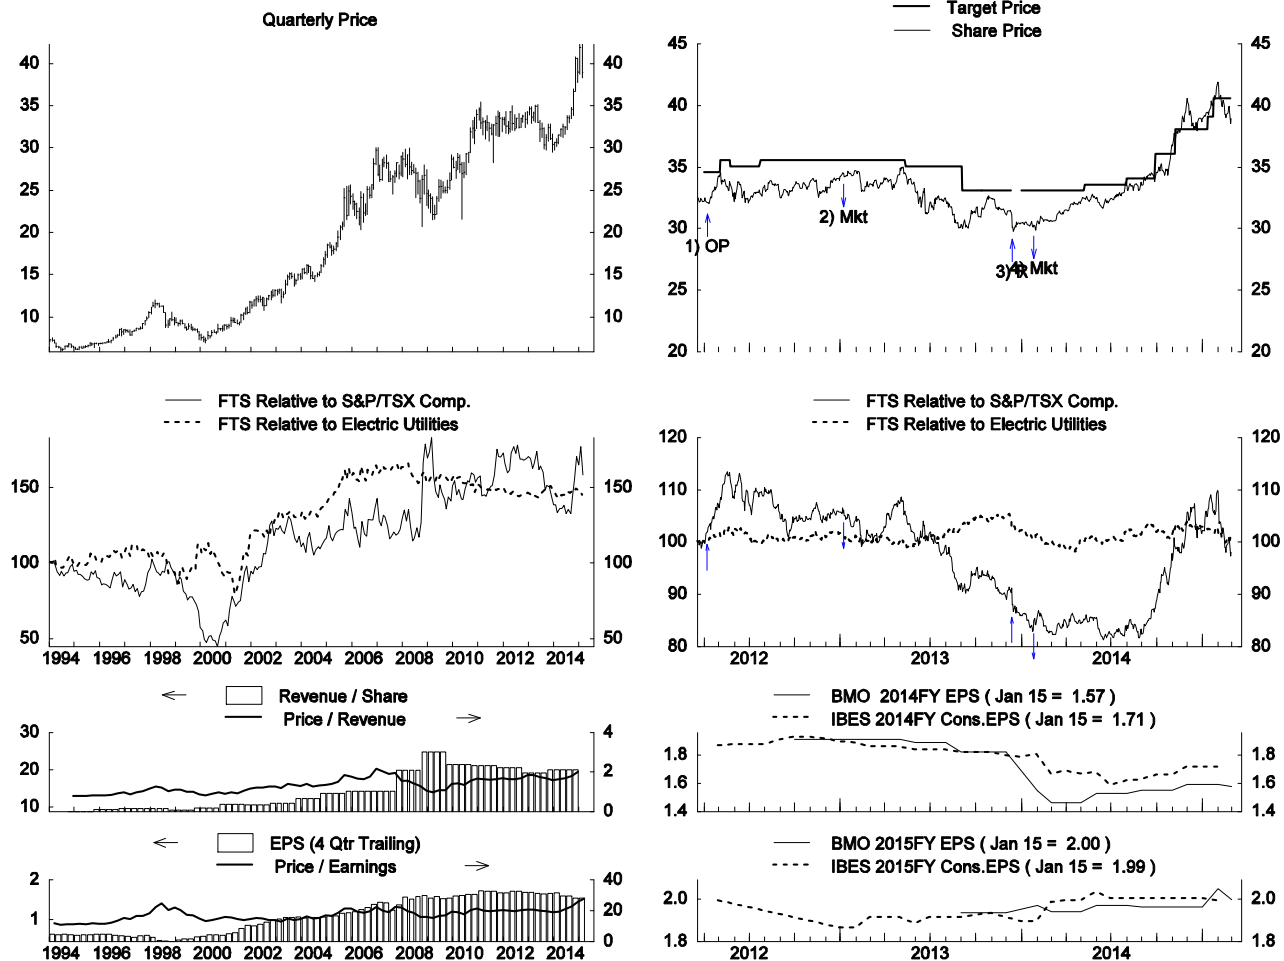

On September 29, 2014, Fortis initiated a review of strategic options for its hotels and commercial real estate business under its wholly owned subsidiary, Fortis Properties. Fortis Properties owned and operated 23 hotels and 2.8 million square feet of commercial and retail real estate in Canada.

**Forecasts** – We are forecasting adjusted EPS (fully diluted) of \$2.00 and \$2.06 for 2015 and 2016, respectively.

**Valuation** – Our target price of \$40.50 is based on 19.5x our 2016E adjusted EPS (f.d.) estimate.

**Recommendation** – At current levels, we believe the shares of Fortis are reasonably valued. We rate Fortis Market Perform.

However, BMO Capital Markets makes no representation or warranty, express or implied, in respect thereof, takes no responsibility for any errors and omissions contained herein and accepts no liability whatsoever for any loss arising from any use of, or reliance on, this report or its contents. Information may be available to BMO Capital Markets or its affiliates that is not reflected in this report. The information in this report is not intended to be used as the primary basis of investment decisions, and because of individual client objectives, should not be construed as advice designed to meet the particular investment needs of any investor. This material is for information purposes only and is not an offer to sell or the solicitation of an offer to buy any security. BMO Capital Markets or its affiliates will buy from or sell to customers the securities of issuers mentioned in this report on a principal basis. BMO Capital Markets or its affiliates, officers, directors or employees have a long or short position in many of the securities discussed herein, related securities or in options, futures or other derivative instruments based thereon. The reader should assume that BMO Capital Markets or its affiliates may have a conflict of interest and should not rely solely on this report in evaluating whether or not to buy or sell securities of issuers discussed herein.

**Additional Matters**

To Canadian Residents: BMO Nesbitt Burns Inc. furnishes this report to Canadian residents and accepts responsibility for the contents herein subject to the terms set out above. Any Canadian person wishing to effect transactions in any of the securities included in this report should do so through BMO Nesbitt Burns Inc.

The following applies if this research was prepared in whole or in part by Iain Reid, Tony Robson, David Round, Edward Sterck or Brendan Warn: This research is not prepared subject to Canadian disclosure requirements. This research is prepared by BMO Capital Markets Limited and subject to the regulations of the Financial Conduct Authority (FCA) in the United Kingdom. FCA regulations require that a firm providing research disclose its ownership interest in the issuer that is the subject of the research if it and its affiliates own 5% or more of the equity of the issuer. Canadian regulations require that a firm providing research disclose its ownership interest in the issuer that is the subject of the research if it and its affiliates own 1% or more of the equity of the issuer that is the subject of the research. Therefore BMO Capital Markets Limited will disclose its and its affiliates' ownership interest in the subject issuer only if such ownership exceeds 5% of the equity of the issuer.

To U.S. Residents: BMO Capital Markets Corp. furnishes this report to U.S. residents and accepts responsibility for the contents herein, except to the extent that it refers to securities of Bank of Montreal. Any U.S. person wishing to effect transactions in any security discussed herein should do so through BMO Capital Markets Corp.

To U.K. Residents: In the UK this document is published by BMO Capital Markets Limited which is authorised and regulated by the Financial Conduct Authority. The contents hereof are intended solely for the use of, and may only be issued or passed on to, (I) persons who have professional experience in matters relating to investments falling within Article 19(5) of the Financial Services and Markets Act 2000 (Financial Promotion) Order 2005 (the “Order”) or (II) high net worth entities falling within Article 49(2)(a) to (d) of the Order (all such persons together referred to as “relevant persons”). The contents hereof are not intended for the use of and may not be issued or passed on to retail clients.

Unauthorized reproduction, distribution, transmission or publication without the prior written consent of BMO Capital Markets is strictly prohibited.

## Key Highlights From U.S. Investor Day

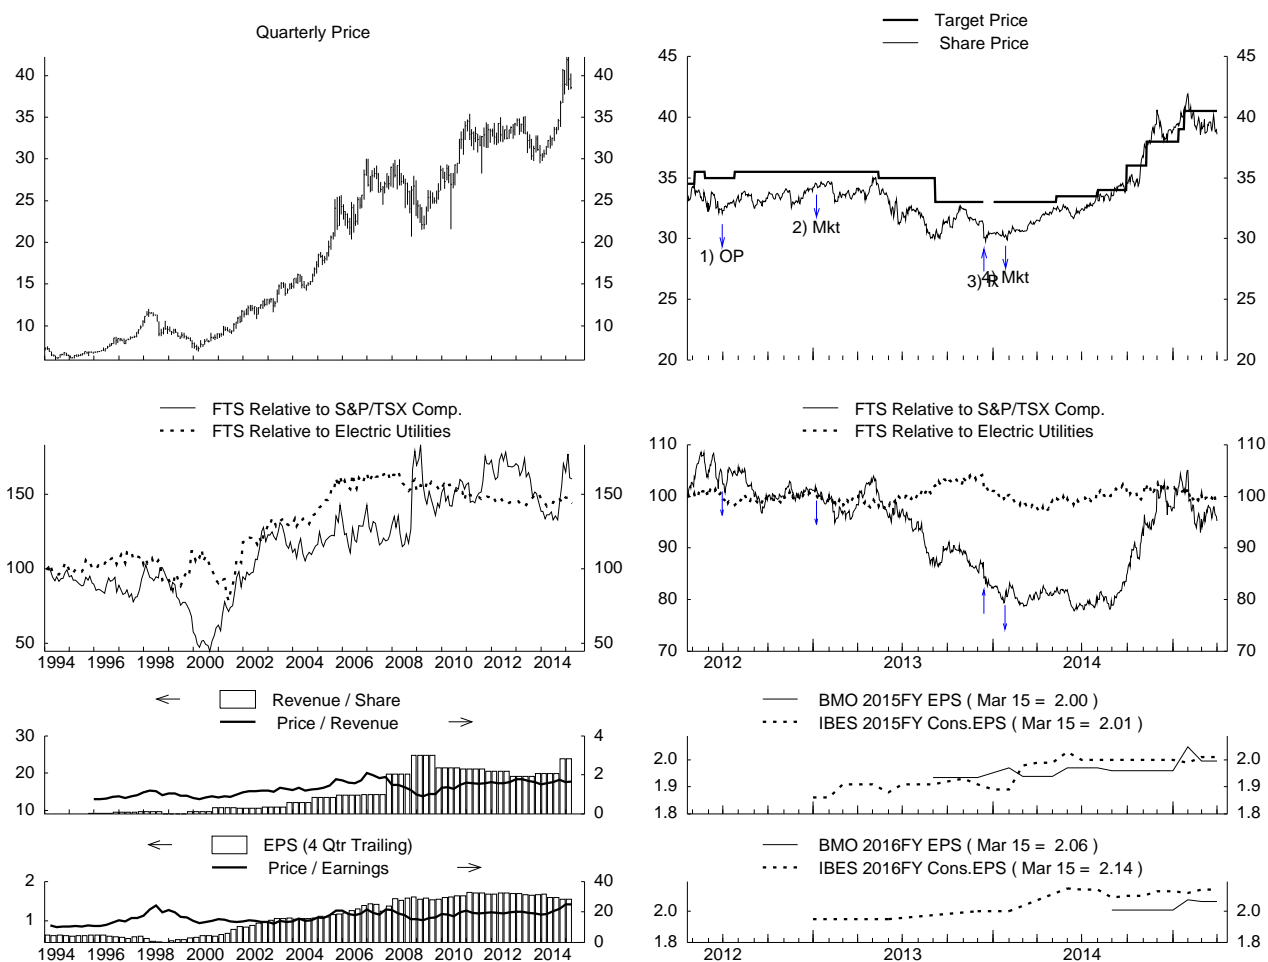

Fortis delivered a series of detailed presentations at its New York investor day yesterday, the net of which reaffirmed our view that the company provides a beacon of visible, utility-driven growth at attractive levels of ~6.5%. While the capital spending trends and growth guidance was largely unchanged from past disclosures, there was more detail with respect to some of the utility projects underpinning its five-year capital program. The decision from Fortis's strategic review of its hotel and real estate business is still expected to be announced in Q2/15.

### Our View:

- FTS reiterated a capital spending program of \$2.2B in 2015 and \$9B through 2019. Should the entirety of this growth capital be deployed, management expects that by 2019 it would achieve a ~6.5% CAGR in rate base. More importantly, management sees ample liquidity and balance sheet capacity to fund this capital plan without issuing new common shares (other than the DRIP which provides \$100M per annum). On top of that, we believe the expected proceeds from the real estate and hotels business could be used for shareholder-friendly initiatives in the near term, such as debt repayment, share buybacks, and/or dividend increases.
- What rang loud and clear during the session is that management is focused on organic growth and execution of the aforementioned capital program during 2015, while acquisitions have taken a back seat. Though we would not be surprised to see an opportunistic acquisition materialize in the U.S. of a smaller scale than UNS Energy, we note that currency and relative valuations are now less favourable while the pool of potential U.S. acquisitions has shrunk following last year's M&A utility frenzy.
- Management expressed a high degree of confidence in additional infrastructure opportunities associated with B.C. LNG that are not incorporated in its capital spending forecasts, or our estimates. These prospective opportunities include further expansion of the Tilbury LNG facility, and Woodfibre gas pipeline expansion. Should these developments move forward, management sees its 5-year capex increasing to \$10.1B (vs. ~\$9.1B), which would elevate its rate base CAGR to ~7.5% (vs. ~6.5%). We understand that regulatory approval of an LNG export contract with Hawaii Electric (Tilbury) will likely not be forthcoming until mid-2016, while proponents of the Woodfibre LNG export project are not expected to make a final investment decision until end of this year.
- Management highlighted that it is considering a U.S. listing, with a decision likely before end of 2015. With over ~40% of its asset base currently in the U.S., this would be a logical move in our books. Every 5% increase in the USD (vs CAD) benefits EPS by \$0.04.

This report was prepared by an analyst(s) employed by BMO Nesbitt Burns Inc., and who is (are) not registered as a research analyst(s) under FINRA rules. For disclosure statements, including the Analyst's Certification, please refer to pages 2 to 5.

## First Glance: Q1/15 Above Expectations on Seasonality

Fortis' adj. EPS (basic) were \$0.65/sh in Q1/15 (\$0.63 in Q1/14), higher than our outlook of \$0.64 per share and consensus of \$0.62 per share (range of \$0.57–0.66). Beats mainly occurred in regulated utilities on seasonality, with the partial offsetting deltas primarily being non-regulated generation and real estate.

### Our View:

- **UNS Energy: Miss** - \$20M vs. our \$22M on seasonality offset by a stronger USD supporting segment results. Recall, ~75% of UNS earnings are generated in Q2 and Q3. In January 2015, UNS Energy closed the purchase of an additional ownership interest in the Springerville Unit 1 for US\$46M (in line).
- **Central Hudson: Beat** - \$22M vs. our \$19M on favourable F/X (\$3M benefit) and energy-efficiency incentives. With respect to the General Rate Application, a final joint proposal that was completed in April is expected to go to the regulator in June for consideration and approval (decision expected in Q2/15).
- **FortisAlberta: Miss** - \$31M (after adjusting for a positive \$10M capital tracker regulatory adjustment) vs. our \$35M, but up 24% y/y.
- **FortisBC Energy: Beat** - \$88M vs. our \$83M and up 11% from last year on greater seasonality due to end of the rate stabilization mechanism. The \$440M Tilbury 1A project is still expected to be completed end of 2016.
- **FortisBC Electric: Beat** - \$23M vs. our \$19M on seasonality (deferral mechanisms, timing of power purchase costs).
- **Fortis Generation: Miss** - \$3M vs. our estimate of \$6M due to weak hydrology conditions in Belize. The 335MW Waneta hydro expansion project (51% FTS) in B.C. came online six weeks earlier than expected (early April) and on budget (\$900M gross).
- **Non-utility: Miss** - Loss of \$2M compared to our estimate of \$6M primarily due to costs associated with the ongoing strategic review, which is still expected to be completed in Q2/15.
- **Other:** The Caribbean was inline, with a beat in Eastern Canadian.
- **Guidance.** 2015 capex of \$2.2B reiterated (\$550M was invested in Q1/15). We are currently modelling for ~\$2.15B.
- Please see Exhibit 1 on the following page for more details of the variance.
- **Earnings call today at 10:00 a.m. ET.** The dial-in number is 1-877-223-4471 or 647-788-4922.

## Q1 – Results Demonstrate Solid Momentum for 2015

### Event

FTS' first quarter results were higher than expected (adj. EPS basic of \$0.65 vs. our estimate of \$0.64 and consensus of \$0.62) due to strength in regulated utility on seasonality, partially offset by softer results in non-regulated.

### Impact & Analysis

Key implications: (1) FTS reaffirmed its 2015 capital spending outlook of \$2.2B, after having spent \$550M in Q1/15. Looking out over the next five-year period 2015-2019, the company's capital program is expected to reach ~\$9.0B. This capex should support +6.5% rate base growth, while potential upside to +7.5% is possible should further LNG-related opportunities (~\$1B) come to fruition. (2) In terms of major growth initiatives, the 335MW Waneta hydro expansion project (51% FTS) in B.C. was completed on April 1 – six weeks earlier than expected – and came in on budget (\$900M gross). The \$440M Tilbury 1A expansion is still expected to be completed by end of 2016. (3) On the regulatory front, a 2016 cost of capital review in Alberta has commenced, while one in B.C. is expected to be initiated later in the year. A final joint proposal for Central Hudson's rate application was completed in April and is expected to go to the regulator in June for approval. (4) We have updated our estimates, largely to reflect Q1 actuals, revised seasonality, lower corporate costs, and to assume sale of FTS Properties mid-year. Our 2015 EPS estimate (f.d.) is unchanged at \$2.01 while our 2016 estimate is increased to \$2.07 (vs. \$2.06).

### Valuation & Recommendation

While the earnings beat appeared to be largely driven by seasonality, it was otherwise a solid quarter with robust capital spending and rate base growth trends. Regulatory headwinds have surfaced in many of FTS' core markets, with regulated ROEs more likely to surprise to the downside rather than the upside as we head through 2016. However, earnings fundamentals continue to improve and management remains focused on realizing the value of its real estate portfolio. Based on FTS' relative return to our unchanged target price (\$40.50) compared to the other companies we cover in the regulated utility complex, we continue to rate FTS shares Market Perform.

**Price (5-May)** \$38.89 **52-Week High** \$42.23

 Q3/15E \$0.48 to \$0.44  
 Q4/15E \$0.51 to \$0.50

## Q1 – Results Demonstrate Solid Momentum for 2015

- **First quarter results above expectations.** Fortis' adj. EPS (basic) was \$0.65/sh in Q1/15 (\$0.63 in Q1/14), higher than our outlook of \$0.64 per share and consensus of \$0.62 per share (range of \$0.57-0.66). Beats mainly occurred in regulated utilities on seasonality, with the partial offsetting deltas primarily being non-regulated generation and real estate. Please see Exhibit 1 for more details of the variance.

Notes:

(1) Excludes \$10M GCOC and capital tracker revenue adjustment associated with 2013 and 2014 in Q1/15

(2) Adjusted for \$5M related to earnings from discontinued operations (Griffith) in Q1/14

(3) Corporate for Q1/14 exclude approximately \$1M in acquisition-related expenses relating to the UNS acquisition

(4) Excludes foreign exchange gain of \$9M in Q1/15 and \$4M in Q1/14

(5) Corporate expenses include \$11M related to interest expense on convertible debentures in Q1/14

Source: BMO Capital Markets, Company Reports

- **Strong capital spending outlook.** FTS reaffirmed its 2015 capital spending outlook of \$2.2B, after having spent \$550M in Q1/15 (we are currently modelling for ~\$2.15B). Looking out over the next five-year period 2015-2019, the company's capital program is expected to reach ~\$9.0B, of which 36% relates to Canadian regulated electric utilities, 20% at Canadian regulated gas utilities, 37% in the U.S., 5% to Caribbean regulated electric utilities, and the remaining 2% to non-regulated operations. This capital spending program should support +6.5% rate base growth on average over the next five years, with potential upside to +7.5% should further LNG-related opportunities (~\$1B) come to fruition (i.e., Woodfibre pipeline expansion, Tilbury 1B).
- **Waneta expansion project completed.** The 335MW Waneta hydro expansion project (51% FTS) in B.C. was completed on April 1 – six weeks earlier than expected – and came in on budget (\$900M gross). All of the power is being sold to B.C. Hydro (100% Government of B.C.) and FortisBC Electric under 40-year contracts.

- **Tilbury 1A expansion on track.** The \$440M Tilbury LNG 1A expansion (second LNG tank and a new liquefier) is still expected to be completed by end of 2016. The LNG tank concrete foundation is complete and construction of the tank wall and bottom steel plate has commenced.
- **On to the next round of cost of capital reviews.** After having gone through a lengthy cost of capital review process in Alberta (2013-2015), management is now turning its attention to 2016 cost of capital reviews in Alberta and B.C. In passing, management noted that a final joint proposal for Central Hudson's rate application (effective July 1, 2015 for three years) was completed in April and is expected to go to the regulator in June for consideration and approval (decision expected in Q2/15).
- **Decision on real estate strategic review expected in Q2/15.** A decision on strategic options (full or partial sale or IPO) for its hotel and real estate business (previously announced in September 2014) is expected to be made in Q2/15. We now model for mid-year transaction close, with potential net proceeds of \$755-955M.
- **Revised estimates.** We have updated our estimates, largely to reflect Q1 actuals, revised seasonality, lower corporate costs, and to assume sale of FTS Properties mid-year. Our 2015 EPS estimate (f.d.) is unchanged at \$2.01 while our 2016 est. is increased to \$2.07 (vs. \$2.06).
- **Reiterate \$40.50 target price.** As there is only a slight change in our 2016 EPS estimate, our target price remains at \$40.50 (based on a forward P/E multiple of 19.5x). The multiple is above its 10-year historical average of ~18.8x, reflecting higher-than-average rate base growth prospects, increased diversification and optionality, and support from low bond yields.
- **Maintain Market Perform rating.** While the earnings beat appeared to be largely driven by seasonality, it was otherwise a solid quarter with robust capital spending and rate base growth trends. Regulatory headwinds have surfaced in many of FTS' core markets (i.e., Alberta), with regulated ROEs more likely to surprise to the downside rather than the upside as we head through 2016. However, earnings fundamentals continue to improve and management remains focused on realizing the value of its real estate portfolio. Based on FTS' relative return to our price target compared to the other companies we cover in the regulated utility complex, we continue to rate FTS shares Market Perform.

### Exhibit 2: Calculation of Our Target Price

FTS Valuation	Multiple	2014	2015E	2016E
Adj. EPS (f.d)		\$1.57	\$2.01	\$2.07
Equity value/sh	19.5x	\$30.70	\$39.19	\$40.30
2016E				\$40.50
<u>P/E Sensitivity</u>				
18.5x	19.0x	19.5x	20.0x	20.5x
\$38.23	\$39.26	\$40.30	\$41.33	\$42.36

**IMPORTANT DISCLOSURES****Analyst's Certification**

I, Ben Pham, CFA, hereby certify that the views expressed in this report accurately reflect my personal views about the subject securities or issuers. I also certify that no part of my compensation was, is, or will be, directly or indirectly, related to the specific recommendations or views expressed in this report.

Analysts who prepared this report are compensated based upon (among other factors) the overall profitability of BMO Capital Markets and their affiliates, which includes the overall profitability of investment banking services. Compensation for research is based on effectiveness in generating new ideas and in communication of ideas to clients, performance of recommendations, accuracy of earnings estimates, and service to clients.

Analysts employed by BMO Nesbitt Burns Inc. and/or BMO Capital Markets Limited are not registered as research analysts with FINRA (exceptions: Alex Arfaei and Brodie Woods). These analysts may not be associated persons of BMO Capital Markets Corp. and therefore may not be subject to the NASD Rule 2711 and NYSE Rule 472 restrictions on communications with a subject company, public appearances and trading securities held by a research analyst account.

**Company Specific Disclosure**

Disclosure 1: BMO Capital Markets has undertaken an underwriting liability with respect to this issuer within the past 12 months.

Disclosure 2: BMO Capital Markets has provided investment banking services with respect to this issuer within the past 12 months.

Disclosure 3: BMO Capital Markets has managed or co-managed a public offering of securities with respect to this issuer within the past 12 months.

Disclosure 4: BMO Capital Markets or an affiliate has received compensation for investment banking services from this issuer within the past 12 months.

Disclosure 5: BMO Capital Markets or an affiliate received compensation for products or services other than investment banking services within the past 12 months.

Disclosure 6: This issuer is a client (or was a client) of BMO NB, BMO Capital Markets Corp., BMO CM Ltd. or an affiliate within the past 12 months: Investment Banking Services & Non-Securities Related Services.

Disclosure 8: BMO Capital Markets or an affiliate has a financial interest in 1% or more of any class of the equity securities of this issuer.

**Methodology and Risks to Price Target/Valuation**

**Methodology:** Our target price is based on a P/E multiple of 19.5x our FY16E estimates.

**Risks:** Key risks include interest rates, management execution, construction, capital markets, and regulatory risk.

**Distribution of Ratings (March 31, 2015)**

\* Reflects rating distribution of all companies covered by BMO Capital Markets Corp. equity research analysts.

\*\* Reflects rating distribution of all companies from which BMO Capital Markets Corp. has received compensation for Investment Banking services as percentage within ratings category.

\*\*\* Reflects rating distribution of all companies from which BMO Capital Markets Corp. has received compensation for Investment Banking services as percentage of Investment Banking clients.

\*\*\*\* Reflects rating distribution of all companies covered by BMO Capital Markets equity research analysts.

\*\*\*\*\* Reflects rating distribution of all companies from which BMO Capital Markets has received compensation for Investment Banking services as percentage of Investment Banking clients.

**Rating and Sector Key (as of April 5, 2013):**

We use the following ratings system definitions:

OP = Outperform - Forecast to outperform the analyst's coverage universe on a total return basis

Mkt = Market Perform - Forecast to perform roughly in line with the analyst's coverage universe on a total return basis

Und = Underperform - Forecast to underperform the analyst's coverage universe on a total return basis

(S) = speculative investment;

NR = No rating at this time;

R = Restricted – Dissemination of research is currently restricted.

BMO Capital Markets' seven Top 15 lists guide investors to our best ideas according to different objectives (CDN Large Cap, CDN Small Cap, US Large Cap, US Small cap, Income, CDN Quant, and US Quant have replaced the Top Pick rating).

**Prior BMO Capital Markets Ratings System (January 4, 2010–April 4, 2013):**

Institutional clients may also receive our research via Thomson Reuters, Bloomberg, FactSet, and Capital IQ. Research reports and other commentary are required to be simultaneously disseminated internally and externally to our clients.

**General Disclaimer**

BMO Capital Markets” is a trade name used by the BMO Investment Banking Group, which includes the wholesale arm of Bank of Montreal and its subsidiaries BMO Nesbitt Burns Inc., BMO Capital Markets Limited in the U.K. and BMO Capital Markets Corp. in the U.S. BMO Nesbitt Burns Inc., BMO Capital Markets Limited and BMO Capital Markets Corp are affiliates. Bank of Montreal or its subsidiaries (“BMO Financial Group”) has lending arrangements with, or provide other remunerated services to, many issuers covered by BMO Capital Markets. The opinions, estimates and projections contained in this report are those of BMO Capital Markets as of the date of this report and are subject to change without notice. BMO Capital Markets endeavours to ensure that the contents have been compiled or derived from sources that we believe are reliable and contain information and opinions that are accurate and complete. However, BMO Capital Markets makes no representation or warranty, express or implied, in respect thereof, takes no responsibility for any errors and omissions contained herein and accepts no liability whatsoever for any loss arising from any use of, or reliance on, this report or its contents. Information may be available to BMO Capital Markets or its affiliates that is not reflected in this report. The information in this report is not intended to be used as the primary basis of investment decisions, and because of individual client objectives, should not be construed as advice designed to meet the particular investment needs of any investor. This material is for information purposes only and is not an offer to sell or the solicitation of an offer to buy any security. BMO Capital Markets or its affiliates will buy from or sell to customers the securities of issuers mentioned in this report on a principal basis. BMO Capital Markets or its affiliates, officers, directors or employees have a long or short position in many of the securities discussed herein, related securities or in options, futures or other derivative instruments based thereon. The reader should assume that BMO Capital Markets or its affiliates may have a conflict of interest and should not rely solely on this report in evaluating whether or not to buy or sell securities of issuers discussed herein.

**Additional Matters**

To Canadian Residents: BMO Nesbitt Burns Inc. furnishes this report to Canadian residents and accepts responsibility for the contents herein subject to the terms set out above. Any Canadian person wishing to effect transactions in any of the securities included in this report should do so through BMO Nesbitt Burns Inc.

The following applies if this research was prepared in whole or in part by David Round, Edward Sterck or Brendan Warn: This research is not prepared subject to Canadian disclosure requirements. This research is prepared by BMO Capital Markets Limited and subject to the regulations of the Financial Conduct Authority (FCA) in the United Kingdom. FCA regulations require that a firm providing research disclose its ownership interest in the issuer that is the subject of the research if it and its affiliates own 5% or more of the equity of the issuer. Canadian regulations require that a firm providing research disclose its ownership interest in the issuer that is the subject of the research if it and its affiliates own 1% or more of the equity of the issuer that is the subject of the research. Therefore BMO Capital Markets Limited will disclose its and its affiliates’ ownership interest in the subject issuer only if such ownership exceeds 5% of the equity of the issuer.

To U.S. Residents: BMO Capital Markets Corp. furnishes this report to U.S. residents and accepts responsibility for the contents herein, except to the extent that it refers to securities of Bank of Montreal. Any U.S. person wishing to effect transactions in any security discussed herein should do so through BMO Capital Markets Corp.

To U.K. Residents: In the UK this document is published by BMO Capital Markets Limited which is authorised and regulated by the Financial Conduct Authority. The contents hereof are intended solely for the use of, and may only be issued or passed on to, (I) persons who have professional experience in matters relating to investments falling within Article 19(5) of the Financial Services and Markets Act 2000 (Financial Promotion) Order 2005 (the “Order”) or (II) high net worth entities falling within Article 49(2)(a) to (d) of the Order (all such persons together referred to as “relevant persons”). The contents hereof are not intended for the use of and may not be issued or passed on to retail clients.

## Q2 – An in-Line Quarter With Strong Earnings and Capital Spending Trends

### Event

Fortis' adj. EPS (basic) were \$0.44 in Q2/15, spot on with our consensus-aligned estimate of \$0.44.

### Impact & Analysis

Key implications: (1) FTS reaffirmed its 2015 capital spending outlook of \$2.2B, after having spent \$1.2B in H1. The company also reiterated its longer-term expectations: rate base growth of 6.5% and \$9B capex through 2019. (2) Following the sale of its commercial real estate portfolio in June for \$430M, FTS sold its non-regulated power plants in New York and Ontario (\$93M). The hotels business was also sold in July for \$365M with closing expected in the fall. The proceeds are expected to be used for debt reduction and equity injections into UNS. (3) Construction continues on the \$440M Tilbury LNG 1A expansion with timing unchanged (in-service end of 2016). On the call, FTS highlighted that a final investment decision from the proponents of the Woodfibre LNG project is expected by year-end, while the long-term contract for further expansion of Tilbury still requires regulatory approval. (4) In April 2015, the Alberta regulator initiated a cost of capital proceeding to determine 2016 and 2017 allowed ROE and capital structure. In B.C., FortisBC Energy is planning to file an application to review the 2016 metrics by year-end. We will be looking for whether allowed ROEs have potential for further downside, especially in the current low bond yield environment in Canada and significant reductions observed globally. (5) Our 2015 EPS estimate (f.d) is now \$1.97 (vs. \$2.01), while our 2016 estimate is unchanged at \$2.07. We introduce our 2017 adj. EPS of \$2.16.

(FY-Dec.)	2014A	2015E	2016E	2017E
EPS	\$1.57	\$1.97↓	\$2.07	\$2.16
P/E		18.3x	17.4x	16.7x
Div.	\$1.28	\$1.36	\$1.44	\$1.52

Net Debt (\$mm)	\$10,881			Next Rep. Date Nov (E)

**Notes:** All values in C\$  
**Major Shareholders:** Widely held  
**First Call Mean Estimates:** FORTIS INC (C\$) 2015E: \$2.08; 2016E: \$2.17

### Valuation & Recommendation

FTS remains our favorite stock among the utility complex given strong earnings growth and capital spending trends (even after accounting for beneficial impact of USD), but we see more compelling alternatives in the power subsector. We reiterate our Market Perform rating and \$40.50 target price.

#### Changes

**Annual EPS**  
 2015E \$2.01 to \$1.97

**Quarterly EPS**  
 Q3/15E \$0.44 to \$0.40

## Q2 – In-Line Quarter With Strong Earnings and Capital Spending Trends

- **Second-quarter results in line with expectations.** Fortis' adj. EPS (basic) were \$0.44 in Q2/15 (\$0.24 in Q2/14), largely in line with our consensus-aligned estimate of \$0.44 (range of \$0.41–0.48). Higher-than-expected contribution from the newly commissioned Waneta expansion project more than offset higher corporate costs and softer results in B.C. utility. Please see Exhibit 1 for more details of the variance.

### Exhibit 1: Q2/15 Results vs. BMO Capital Markets Expectations

	Q2/15A	BMOCM Q2/15E	% Variance	Q2/14A	Y/Y Chg. %	BMOCM Notes
<b>Regulated Gas Utilities - Canadian</b>						
FortisBC Energy Companies	\$7.0	\$13.0	-46%	\$12.0	-42%	Greater seasonality due to end of rate stabilization mechanism

Average Shares (basic)	277.9	277.8		214.8		
Average Shares (diluted)	284.2	284.2		215.3		
<b>Adjusted EPS (basic)</b>	<b>\$0.44</b>	<b>\$0.44</b>	<b>2%</b>	<b>\$0.24</b>	<b>83%</b>	
Adjusted EPS (diluted)	\$0.44	\$0.43	2%	\$0.24	84%	

Notes:

(1) Includes \$1M positive adjustment in Q2/15 related to capital tracker revenue adjustment for 2013 and 2014

(2) Excludes \$27M after-tax gain on sale of generation assets in Q2/15

(3) Excludes \$109M after-tax gain on sale of commercial real estate assets and \$13M after-tax loss on pending sale of hotel assets in Q2/15

(4) Corporate expenses for Q2/14 exclude approximately \$1M in acquisition costs relating to the UNS acquisitions but includes \$13M in interest expense on related convertible debentures

(5) Excludes foreign exchange after-tax loss of \$1M in Q2/15 and \$4M in Q2/14

Source: BMO Capital Markets, Company Reports

- **Reiterates \$2.2B capital spending in 2015 and \$9B through 2019.** FTS reaffirmed its 2015 capital spending outlook of \$2.2B, after having spent \$1.2B in H1. The company also reiterated its longer-term expectations: rate base growth of 6.5% and \$9B capex through 2019, of which 36% relates to Canadian regulated electric utilities, 19% to Canadian regulated gas utilities, 38% to the U.S., 5% to Caribbean regulated electric utilities, and the remaining 2% to non-regulated operations.
- **Major growth initiatives progressing to plan.** The \$900M 335MW Waneta hydro expansion project (51% FTS) in B.C. achieved first production on April 2 (six weeks earlier than expected) and contributed \$12M to Q2 results. Construction continues on the \$440M Tilbury LNG 1A expansion (\$223M invested to date) with timing unchanged (in-service end of 2016). The company continues to advance a further expansion of Tilbury and the Woodfibre LNG site, where total capital investment could amount to \$1B (not included in

capex guidance). On the call, FTS highlighted that the a final investment decision from the proponents of the Woodfibre LNG project is expected by year-end, while the Tilbury expansion still requires regulatory approval of the conditional long-term contract with Hawaiian Electric Company.

- **Canadian cost of capital proceedings under way.** In April 2015, the Alberta regulator initiated a cost of capital proceeding to determine 2016 and 2017 allowed ROE and capital structure for Alberta-based utilities; a pre-hearing conference is expected in Q3/15 and final decision will likely not be forthcoming until H1/16. This follows the March 2015 decision where the Commission lowered the 2013–2015 ROE to 8.3% from 8.75%. In B.C., FortisBC Energy is planning to file an application to review the 2016 benchmark allowed ROE and common equity ratio by no later than November 30, 2015. We will be looking for whether allowed ROEs have potential for further downside, especially in the current low bond yield environment in Canada and significant reductions observed globally.
- **Non-core asset sales on track.** Following the sale of its commercial real estate portfolio in June 2015 for \$430M, FTS further sold its non-regulated power plants in New York (\$77M) and Ontario (\$16M). The hotels business was also sold in July 2015 for \$365M with closing expected in the fall. Pro forma the sales, almost 100% of the company's assets will consist of regulated utility and long-term contracted energy infrastructure.
- **Revised estimates.** We have updated our estimates to reflect Q2 actuals, revised seasonality for Waneta (strongest in Q2), and slower pace of growth at Central Hudson. Our 2015 EPS estimate (f.d) is now \$1.97 (vs. \$2.01), while our 2016 estimate is unchanged at \$2.07.
- **Introducing 2017 estimates.** Along with our revisions, we are rolling out our FY17 estimates: adj. EPS of \$2.16 (vs. \$2.07 in 2016E or +4.2% y/y). Our FY17E anticipates earnings growth from all of FTS's regulated utilities (with primary drivers being Western Canada and the U.S.), which is further supported by favorable F/X translation.
- **Reiterate \$40.50 target price.** Due to no change in our 2016 estimate, our target price remains at \$40.50 (based on a forward P/E multiple of 19.5x applied to our 2016 estimate). The multiple is above its 10-year historical average of ~18.8x, reflecting higher-than-average rate base growth prospects, increased diversification and optionality, and support from low bond yields.

#### Exhibit 2: Calculation of Our Target Price

FTS Valuation	Multiple	2015E	2016E	2017E
Adj. EPS (f.d)		\$1.97	\$2.07	\$2.16
Equity value/sh	19.5x	\$38.48	\$40.42	\$42.11

2016E \$40.42

#### P/E Sensitivity

18.5x	19.0x	19.5x	20.0x	20.5x
\$38.35	\$39.39	\$40.42	\$41.46	\$42.50

Source: BMO Capital Markets

- **Maintaining Market Perform rating.** FTS remains our favorite stock among the utility complex given strong earnings growth and capital spending trends (even after accounting for beneficial impact of USD), but we see more compelling alternatives in the power subsector. We reiterate our Market Perform rating.

## Exhibit 3: Upcoming Events

2H15	Expected decision on FortisAlberta 2013-2015 Capital Tracker Compliance filing
By Oct 16, 2015	Newfoundland Power to file 2016 general rate application
By Nov. 30, 2015	FEI to file application for 2016 ROE and common equity
End of 2015	Expected commissioning of the Pinal transmission line (UNS Energy)
End of 2015	Expected FID on Woodfibre LNG facility (3rd party)
End of 2015	Tucson Electric Power to file general rate application requesting new rates effective January 1, 2017
Q1/16	Expected decision on FortisAlberta 2016/2017 Capital Tracker Application
Late 2016	In-service of Tilbury LNG facility expansion

**IMPORTANT DISCLOSURES****Analyst's Certification**

I, Ben Pham, CFA, hereby certify that the views expressed in this report accurately reflect my personal views about the subject securities or issuers. I also certify that no part of my compensation was, is, or will be, directly or indirectly, related to the specific recommendations or views expressed in this report.

Analysts who prepared this report are compensated based upon (among other factors) the overall profitability of BMO Capital Markets and their affiliates, which includes the overall profitability of investment banking services. Compensation for research is based on effectiveness in generating new ideas and in communication of ideas to clients, performance of recommendations, accuracy of earnings estimates, and service to clients.

Analysts employed by BMO Nesbitt Burns Inc. and/or BMO Capital Markets Limited are not registered as research analysts with FINRA (exceptions: Alex Arfaei and Brodie Woods). These analysts may not be associated persons of BMO Capital Markets Corp. and therefore may not be subject to the NASD Rule 2711 and NYSE Rule 472 restrictions on communications with a subject company, public appearances and trading securities held by a research analyst account.

**Company Specific Disclosure**

Disclosure 1: BMO Capital Markets has undertaken an underwriting liability with respect to this issuer within the past 12 months.

Disclosure 2: BMO Capital Markets has provided investment banking services with respect to this issuer within the past 12 months.

Disclosure 3: BMO Capital Markets has managed or co-managed a public offering of securities with respect to this issuer within the past 12 months.

Disclosure 4: BMO Capital Markets or an affiliate has received compensation for investment banking services from this issuer within the past 12 months.

Disclosure 5: BMO Capital Markets or an affiliate received compensation for products or services other than investment banking services within the past 12 months.

Disclosure 6: This issuer is a client (or was a client) of BMO NB, BMO Capital Markets Corp., BMO CM Ltd. or an affiliate within the past 12 months: Investment Banking Services & Non-Securities Related Services.

Disclosure 8: BMO Capital Markets or an affiliate has a financial interest in 1% or more of any class of the equity securities of this issuer.

**Methodology and Risks to Price Target/Valuation**

**Methodology:** Our target price is based on a P/E multiple of 19.5x our FY16E estimates.

**Risks:** Key risks include interest rates, management execution, construction, capital markets, and regulatory risk.

BMO Capital Markets Equity Research is available via our website <https://research-ca.bmocapitalmarkets.com/Public/Secure/Login.aspx?ReturnUrl=/Member/Home/ResearchHome.aspx>. Institutional clients may also receive our research via Thomson Reuters, Bloomberg, FactSet, and Capital IQ. Research reports and other commentary are required to be simultaneously disseminated internally and externally to our clients.

**General Disclaimer**

BMO Capital Markets” is a trade name used by the BMO Investment Banking Group, which includes the wholesale arm of Bank of Montreal and its subsidiaries BMO Nesbitt Burns Inc., BMO Capital Markets Limited in the U.K. and BMO Capital Markets Corp. in the U.S. BMO Nesbitt Burns Inc., BMO Capital Markets Limited and BMO Capital Markets Corp are affiliates. Bank of Montreal or its subsidiaries (“BMO Financial Group”) has lending arrangements with, or provide other remunerated services to, many issuers covered by BMO Capital Markets. The opinions, estimates and projections contained in this report are those of BMO Capital Markets as of the date of this report and are subject to change without notice. BMO Capital Markets endeavours to ensure that the contents have been compiled or derived from sources that we believe are reliable and contain information and opinions that are accurate and complete. However, BMO Capital Markets makes no representation or warranty, express or implied, in respect thereof, takes no responsibility for any errors and omissions contained herein and accepts no liability whatsoever for any loss arising from any use of, or reliance on, this report or its contents. Information may be available to BMO Capital Markets or its affiliates that is not reflected in this report. The information in this report is not intended to be used as the primary basis of investment decisions, and because of individual client objectives, should not be construed as advice designed to meet the particular investment needs of any investor. This material is for information purposes only and is not an offer to sell or the solicitation of an offer to buy any security. BMO Capital Markets or its affiliates will buy from or sell to customers the securities of issuers mentioned in this report on a principal basis. BMO Capital Markets or its affiliates, officers, directors or employees have a long or short position in many of the securities discussed herein, related securities or in options, futures or other derivative instruments based thereon. The reader should assume that BMO Capital Markets or its affiliates may have a conflict of interest and should not rely solely on this report in evaluating whether or not to buy or sell securities of issuers discussed herein.

**Additional Matters**

To Canadian Residents: BMO Nesbitt Burns Inc. furnishes this report to Canadian residents and accepts responsibility for the contents herein subject to the terms set out above. Any Canadian person wishing to effect transactions in any of the securities included in this report should do so through BMO Nesbitt Burns Inc.

The following applies if this research was prepared in whole or in part by David Round, Edward Sterck or Brendan Warn: This research is not prepared subject to Canadian disclosure requirements. This research is prepared by BMO Capital Markets Limited and subject to the regulations of the Financial Conduct Authority (FCA) in the United Kingdom. FCA regulations require that a firm providing research disclose its ownership interest in the issuer that is the subject of the research if it and its affiliates own 5% or more of the equity of the issuer. Canadian regulations require that a firm providing research disclose its ownership interest in the issuer that is the subject of the research if it and its affiliates own 1% or more of the equity of the issuer that is the subject of the research. Therefore BMO Capital Markets Limited will disclose its and its affiliates’ ownership interest in the subject issuer only if such ownership exceeds 5% of the equity of the issuer.

To U.S. Residents: BMO Capital Markets Corp. furnishes this report to U.S. residents and accepts responsibility for the contents herein, except to the extent that it refers to securities of Bank of Montreal. Any U.S. person wishing to effect transactions in any security discussed herein should do so through BMO Capital Markets Corp.

To U.K. Residents: In the UK this document is published by BMO Capital Markets Limited which is authorised and regulated by the Financial Conduct Authority. The contents hereof are intended solely for the use of, and may only be issued or passed on to, (I) persons who have professional experience in matters relating to investments falling within Article 19(5) of the Financial Services and Markets Act 2000 (Financial Promotion) Order 2005 (the “Order”) or (II) high net worth entities falling within Article 49(2)(a) to (d) of the Order (all such persons together referred to as “relevant persons”). The contents hereof are not intended for the use of and may not be issued or passed on to retail clients.

Unauthorized reproduction, distribution, transmission or publication without the prior written consent of BMO Capital Markets is strictly prohibited.

## Q2 – An in-Line Quarter With Strong Earnings and Capital Spending Trends

### Event

Fortis' adj. EPS (basic) were \$0.44 in Q2/15, spot on with our consensus-aligned estimate of \$0.44.

### Impact & Analysis

Key implications: (1) FTS reaffirmed its 2015 capital spending outlook of \$2.2B, after having spent \$1.2B in H1. The company also reiterated its longer-term expectations: rate base growth of 6.5% and \$9B capex through 2019. (2) Following the sale of its commercial real estate portfolio in June for \$430M, FTS sold its non-regulated power plants in New York and Ontario (\$93M). The hotels business was also sold in July for \$365M with closing expected in the fall. The proceeds are expected to be used for debt reduction and equity injections into UNS. (3) Construction continues on the \$440M Tilbury LNG 1A expansion with timing unchanged (in-service end of 2016). On the call, FTS highlighted that a final investment decision from the proponents of the Woodfibre LNG project is expected by year-end, while the long-term contract for further expansion of Tilbury still requires regulatory approval. (4) In April 2015, the Alberta regulator initiated a cost of capital proceeding to determine 2016 and 2017 allowed ROE and capital structure. In B.C., FortisBC Energy is planning to file an application to review the 2016 metrics by year-end. We will be looking for whether allowed ROEs have potential for further downside, especially in the current low bond yield environment in Canada and significant reductions observed globally. (5) Our 2015 EPS estimate (f.d) is now \$1.97 (vs. \$2.01), while our 2016 estimate is unchanged at \$2.07. We introduce our 2017 adj. EPS of \$2.16.

(FY-Dec.)	2014A	2015E	2016E	2017E

**First Call Mean Estimates:** FORTIS INC (C\$) 2015E: \$2.08; 2016E: \$2.17

### Valuation & Recommendation

FTS remains our favorite stock among the utility complex given strong earnings growth and capital spending trends (even after accounting for beneficial impact of USD), but we see more compelling alternatives in the power subsector. We reiterate our Market Perform rating and \$40.50 target price.

#### Changes

**Annual EPS**  
 2015E \$2.01 to \$1.97

**Quarterly EPS**  
 Q3/15E \$0.44 to \$0.40

## Q2 – In-Line Quarter With Strong Earnings and Capital Spending Trends

- **Second-quarter results in line with expectations.** Fortis' adj. EPS (basic) were \$0.44 in Q2/15 (\$0.24 in Q2/14), largely in line with our consensus-aligned estimate of \$0.44 (range of \$0.41–0.48). Higher-than-expected contribution from the newly commissioned Waneta expansion project more than offset higher corporate costs and softer results in B.C. utility. Please see Exhibit 1 for more details of the variance.

### Exhibit 1: Q2/15 Results vs. BMO Capital Markets Expectations

Notes:

(1) Includes \$1M positive adjustment in Q2/15 related to capital tracker revenue adjustment for 2013 and 2014

(2) Excludes \$27M after-tax gain on sale of generation assets in Q2/15

(3) Excludes \$109M after-tax gain on sale of commercial real estate assets and \$13M after-tax loss on pending sale of hotel assets in Q2/15

(4) Corporate expenses for Q2/14 exclude approximately \$1M in acquisition costs relating to the UNS acquisitions but includes \$13M in interest expense on related convertible debentures

(5) Excludes foreign exchange after-tax loss of \$1M in Q2/15 and \$4M in Q2/14

Source: BMO Capital Markets, Company Reports

- **Reiterates \$2.2B capital spending in 2015 and \$9B through 2019.** FTS reaffirmed its 2015 capital spending outlook of \$2.2B, after having spent \$1.2B in H1. The company also reiterated its longer-term expectations: rate base growth of 6.5% and \$9B capex through 2019, of which 36% relates to Canadian regulated electric utilities, 19% to Canadian regulated gas utilities, 38% to the U.S., 5% to Caribbean regulated electric utilities, and the remaining 2% to non-regulated operations.
- **Major growth initiatives progressing to plan.** The \$900M 335MW Waneta hydro expansion project (51% FTS) in B.C. achieved first production on April 2 (six weeks earlier than expected) and contributed \$12M to Q2 results. Construction continues on the \$440M Tilbury LNG 1A expansion (\$223M invested to date) with timing unchanged (in-service end of 2016). The company continues to advance a further expansion of Tilbury and the Woodfibre LNG site, where total capital investment could amount to \$1B (not included in

capex guidance). On the call, FTS highlighted that the a final investment decision from the proponents of the Woodfibre LNG project is expected by year-end, while the Tilbury expansion still requires regulatory approval of the conditional long-term contract with Hawaiian Electric Company.

- **Canadian cost of capital proceedings under way.** In April 2015, the Alberta regulator initiated a cost of capital proceeding to determine 2016 and 2017 allowed ROE and capital structure for Alberta-based utilities; a pre-hearing conference is expected in Q3/15 and final decision will likely not be forthcoming until H1/16. This follows the March 2015 decision where the Commission lowered the 2013–2015 ROE to 8.3% from 8.75%. In B.C., FortisBC Energy is planning to file an application to review the 2016 benchmark allowed ROE and common equity ratio by no later than November 30, 2015. We will be looking for whether allowed ROEs have potential for further downside, especially in the current low bond yield environment in Canada and significant reductions observed globally.
- **Non-core asset sales on track.** Following the sale of its commercial real estate portfolio in June 2015 for \$430M, FTS further sold its non-regulated power plants in New York (\$77M) and Ontario (\$16M). The hotels business was also sold in July 2015 for \$365M with closing expected in the fall. Pro forma the sales, almost 100% of the company's assets will consist of regulated utility and long-term contracted energy infrastructure.
- **Revised estimates.** We have updated our estimates to reflect Q2 actuals, revised seasonality for Waneta (strongest in Q2), and slower pace of growth at Central Hudson. Our 2015 EPS estimate (f.d) is now \$1.97 (vs. \$2.01), while our 2016 estimate is unchanged at \$2.07.
- **Introducing 2017 estimates.** Along with our revisions, we are rolling out our FY17 estimates: adj. EPS of \$2.16 (vs. \$2.07 in 2016E or +4.2% y/y). Our FY17E anticipates earnings growth from all of FTS's regulated utilities (with primary drivers being Western Canada and the U.S.), which is further supported by favorable F/X translation.
- **Reiterate \$40.50 target price.** Due to no change in our 2016 estimate, our target price remains at \$40.50 (based on a forward P/E multiple of 19.5x applied to our 2016 estimate). The multiple is above its 10-year historical average of ~18.8x, reflecting higher-than-average rate base growth prospects, increased diversification and optionality, and support from low bond yields.

#### Exhibit 2: Calculation of Our Target Price

FTS Valuation	Multiple	2015E	2016E	2017E
Adj. EPS (f.d)		\$1.97	\$2.07	\$2.16
Equity value/sh	19.5x	\$38.48	\$40.42	\$42.11

2016E \$40.42

#### P/E Sensitivity

18.5x	19.0x	19.5x	20.0x	20.5x
\$38.35	\$39.39	\$40.42	\$41.46	\$42.50

- **Maintaining Market Perform rating.** FTS remains our favorite stock among the utility complex given strong earnings growth and capital spending trends (even after accounting for beneficial impact of USD), but we see more compelling alternatives in the power subsector. We reiterate our Market Perform rating.

## Exhibit 3: Upcoming Events

2H15	Expected decision on FortisAlberta 2013-2015 Capital Tracker Compliance filing
By Oct 16, 2015	Newfoundland Power to file 2016 general rate application
By Nov. 30, 2015	FEI to file application for 2016 ROE and common equity
End of 2015	Expected commissioning of the Pinal transmission line (UNS Energy)
End of 2015	Expected FID on Woodfibre LNG facility (3rd party)
End of 2015	Tucson Electric Power to file general rate application requesting new rates effective January 1, 2017
Q1/16	Expected decision on FortisAlberta 2016/2017 Capital Tracker Application
Late 2016	In-service of Tilbury LNG facility expansion

**General Disclaimer**

BMO Capital Markets” is a trade name used by the BMO Investment Banking Group, which includes the wholesale arm of Bank of Montreal and its subsidiaries BMO Nesbitt Burns Inc., BMO Capital Markets Limited in the U.K. and BMO Capital Markets Corp. in the U.S. BMO Nesbitt Burns Inc., BMO Capital Markets Limited and BMO Capital Markets Corp are affiliates. Bank of Montreal or its subsidiaries (“BMO Financial Group”) has lending arrangements with, or provide other remunerated services to, many issuers covered by BMO Capital Markets. The opinions, estimates and projections contained in this report are those of BMO Capital Markets as of the date of this report and are subject to change without notice. BMO Capital Markets endeavours to ensure that the contents have been compiled or derived from sources that we believe are reliable and contain information and opinions that are accurate and complete. However, BMO Capital Markets makes no representation or warranty, express or implied, in respect thereof, takes no responsibility for any errors and omissions contained herein and accepts no liability whatsoever for any loss arising from any use of, or reliance on, this report or its contents. Information may be available to BMO Capital Markets or its affiliates that is not reflected in this report. The information in this report is not intended to be used as the primary basis of investment decisions, and because of individual client objectives, should not be construed as advice designed to meet the particular investment needs of any investor. This material is for information purposes only and is not an offer to sell or the solicitation of an offer to buy any security. BMO Capital Markets or its affiliates will buy from or sell to customers the securities of issuers mentioned in this report on a principal basis. BMO Capital Markets or its affiliates, officers, directors or employees have a long or short position in many of the securities discussed herein, related securities or in options, futures or other derivative instruments based thereon. The reader should assume that BMO Capital Markets or its affiliates may have a conflict of interest and should not rely solely on this report in evaluating whether or not to buy or sell securities of issuers discussed herein.

**Additional Matters**

To Canadian Residents: BMO Nesbitt Burns Inc. furnishes this report to Canadian residents and accepts responsibility for the contents herein subject to the terms set out above. Any Canadian person wishing to effect transactions in any of the securities included in this report should do so through BMO Nesbitt Burns Inc.

The following applies if this research was prepared in whole or in part by David Round, Edward Sterck or Brendan Warn: This research is not prepared subject to Canadian disclosure requirements. This research is prepared by BMO Capital Markets Limited and subject to the regulations of the Financial Conduct Authority (FCA) in the United Kingdom. FCA regulations require that a firm providing research disclose its ownership interest in the issuer that is the subject of the research if it and its affiliates own 5% or more of the equity of the issuer. Canadian regulations require that a firm providing research disclose its ownership interest in the issuer that is the subject of the research if it and its affiliates own 1% or more of the equity of the issuer that is the subject of the research. Therefore BMO Capital Markets Limited will disclose its and its affiliates’ ownership interest in the subject issuer only if such ownership exceeds 5% of the equity of the issuer.

To U.S. Residents: BMO Capital Markets Corp. furnishes this report to U.S. residents and accepts responsibility for the contents herein, except to the extent that it refers to securities of Bank of Montreal. Any U.S. person wishing to effect transactions in any security discussed herein should do so through BMO Capital Markets Corp.

To U.K. Residents: In the UK this document is published by BMO Capital Markets Limited which is authorised and regulated by the Financial Conduct Authority. The contents hereof are intended solely for the use of, and may only be issued or passed on to, (I) persons who have professional experience in matters relating to investments falling within Article 19(5) of the Financial Services and Markets Act 2000 (Financial Promotion) Order 2005 (the “Order”) or (II) high net worth entities falling within Article 49(2)(a) to (d) of the Order (all such persons together referred to as “relevant persons”). The contents hereof are not intended for the use of and may not be issued or passed on to retail clients.

Unauthorized reproduction, distribution, transmission or publication without the prior written consent of BMO Capital Markets is strictly prohibited.

## Initiates 6% Dividend Growth Guidance Through 2020 Following 10% Increase

Fortis' Board of Directors has approved a 10.3% increase in the company's quarterly common share dividend to \$0.375/sh from the current quarterly rate of \$0.34/sh, one quarter sooner than expected and higher than consensus (\$0.36). As a result of this announcement, the new annualized common share dividend will be \$1.50/sh (vs. \$1.36/sh previously), implying a 4.1% yield at current prices. The first quarterly payment of \$0.375 per common share is payable on December 1, 2015 to common shareholders of record at the close of business on November 18, 2015. The company also initiated a dividend growth target of ~6% through 2020, off of the new higher base of \$1.50.

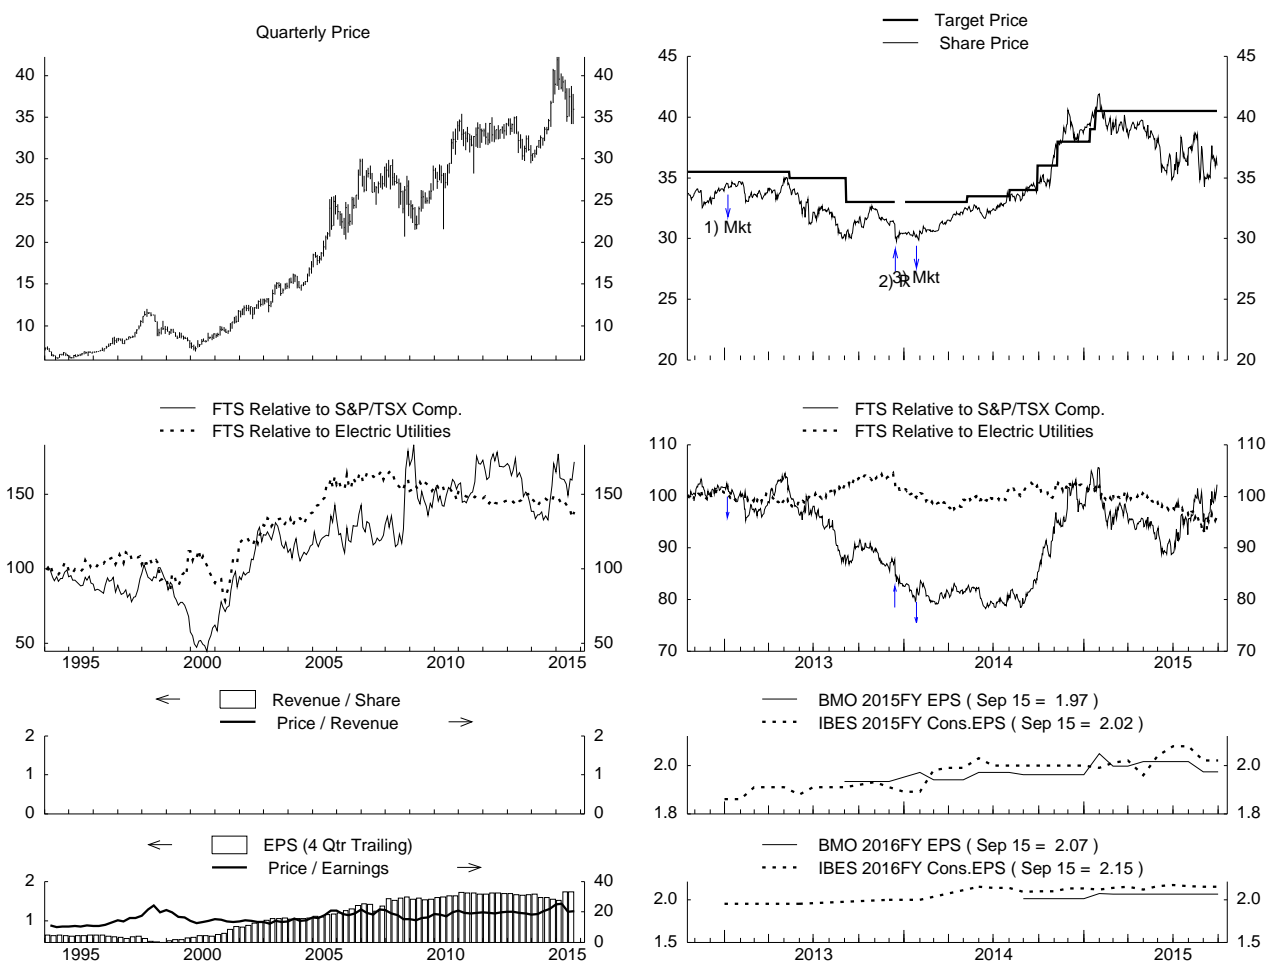

### Our View:

- **We see the dividend increase and the new guidance as a positive development for the FTS shares.** In a market where investors continue to chase yield, companies that can deliver attractive visible dividend growth should garner premium sector valuations in our opinion. We note that FTS's payout ratio for 2016 is still expected to remain under 72%, in line with the 2011–2015E average of ~72.8%. Should the company deliver to this new five-year guidance, the FTS dividend could reach ~\$1.90 by the end of the decade.
- **We see the guidance as achievable.** The dividend guidance is underpinned by the recent successful commissioning of the 335MW Waneta hydroelectric dam expansion in B.C. and a five-year organic growth program of \$9B through 2018 (6.5% growth CAGR). Given that largely dialled-in growth backlog combined with a strong USD tailwind, we see the FTS guidance as realistic and achievable and see rising dividends and cash flows leading to higher share price appreciation over time. Reiterate Market Perform rating.

This report was prepared by an analyst(s) employed by BMO Nesbitt Burns Inc., and who is (are) not registered as a research analyst(s) under FINRA rules. For disclosure statements, including the Analyst's Certification, please refer to pages 2 to 5.

BMO Capital Markets or its affiliates will buy from or sell to customers the securities of issuers mentioned in this report on a principal basis. BMO Capital Markets or its affiliates, officers, directors or employees have a long or short position in many of the securities discussed herein, related securities or in options, futures or other derivative instruments based thereon. The reader should assume that BMO Capital Markets or its affiliates may have a conflict of interest and should not rely solely on this report in evaluating whether or not to buy or sell securities of issuers discussed herein.

**Additional Matters**

To Canadian Residents: BMO Nesbitt Burns Inc. furnishes this report to Canadian residents and accepts responsibility for the contents herein subject to the terms set out above. Any Canadian person wishing to effect transactions in any of the securities included in this report should do so through BMO Nesbitt Burns Inc.

The following applies if this research was prepared in whole or in part by David Round, Edward Sterck or Brendan Warn: This research is not prepared subject to Canadian disclosure requirements. This research is prepared by BMO Capital Markets Limited and subject to the regulations of the Financial Conduct Authority (FCA) in the United Kingdom. FCA regulations require that a firm providing research disclose its ownership interest in the issuer that is the subject of the research if it and its affiliates own 5% or more of the equity of the issuer. Canadian regulations require that a firm providing research disclose its ownership interest in the issuer that is the subject of the research if it and its affiliates own 1% or more of the equity of the issuer that is the subject of the research. Therefore BMO Capital Markets Limited will disclose its and its affiliates' ownership interest in the subject issuer only if such ownership exceeds 5% of the equity of the issuer.

To U.S. Residents: BMO Capital Markets Corp. furnishes this report to U.S. residents and accepts responsibility for the contents herein, except to the extent that it refers to securities of Bank of Montreal. Any U.S. person wishing to effect transactions in any security discussed herein should do so through BMO Capital Markets Corp.

To U.K. Residents: In the UK this document is published by BMO Capital Markets Limited which is authorised and regulated by the Financial Conduct Authority. The contents hereof are intended solely for the use of, and may only be issued or passed on to, (I) persons who have professional experience in matters relating to investments falling within Article 19(5) of the Financial Services and Markets Act 2000 (Financial Promotion) Order 2005 (the "Order") or (II) high net worth entities falling within Article 49(2)(a) to (d) of the Order (all such persons together referred to as "relevant persons"). The contents hereof are not intended for the use of and may not be issued or passed on to retail clients.

Unauthorized reproduction, distribution, transmission or publication without the prior written consent of BMO Capital Markets is strictly prohibited.

## BC to Review Regulated Returns

### Event

- The B.C. Utilities Commission (BCUC) announced it will initiate a generic cost of capital proceeding in early 2012.

### Implications

- The BCUC last reviewed cost of capital in early 2009. Given that government bond yields and credit spreads have come in significantly since that time, and given that the BCUC unilaterally initiated the proceeding, we have to assume allowed returns are going lower.
- Fortis is the only utility we cover with material exposure to allowed returns on equity in B.C. Allowed ROEs are 9.5%-10%. With about \$1.9B of 2013E regulated equity in the province, every 100 basis point reduction in allowed ROE decreases 2013E EPS by about \$0.10.
- We are therefore reducing our 2013E EPS estimate by \$0.10 and our one-year target price by \$1 to \$34. In a separate regulatory proceeding, the Alberta Utilities Commission is due to decide soon on a new generic ROE. Our estimates assume it is reduced to 8.5% from 9%.

### Recommendation

- It will be hard for FTS shares to move up given new uncertainty around allowed returns in a core jurisdiction. We maintain our 2-SP rating and would only accumulate aggressively closer to \$30.

Qtly Adj EPS (Basic)	Q1	Q2	Q3	Q4	Year	P/E

## Definition of Scotia Capital Equity Research Ratings & Risk Rankings

We have a three-tiered rating system, with ratings of 1-Sector Outperform, 2-Sector Perform, and 3-Sector Underperform. Each analyst assigns a rating that is relative to his or her coverage universe or an index identified by the analyst that includes, but is not limited to, stocks covered by the analyst.

Our risk ranking system provides transparency as to the underlying financial and operational risk of each stock covered. Statistical and judgmental factors considered are: historical financial results, share price volatility, liquidity of the shares, credit ratings, analyst forecasts, consistency and predictability of earnings, EPS growth, dividends, cash flow from operations, and strength of balance sheet. The Director of Research and the Supervisory Analyst jointly make the final determination of all risk rankings.

The rating assigned to each security covered in this report is based on the Scotia Capital research analyst's 12-month view on the security. Analysts may sometimes express to traders, salespeople and certain clients their shorter-term views on these securities that differ from their 12-month view due to several factors, including but not limited to the inherent volatility of the marketplace.

### Ratings

#### 1-Sector Outperform

The stock is expected to outperform the average 12-month total return of the analyst's coverage universe or an index identified by the analyst that includes, but is not limited to, stocks covered by the analyst.

#### 2-Sector Perform

The stock is expected to perform approximately in line with the average 12-month total return of the analyst's coverage universe or an index identified by the analyst that includes, but is not limited to, stocks covered by the analyst.

#### 3-Sector Underperform

The stock is expected to underperform the average 12-month total return of the analyst's coverage universe or an index identified by the analyst that includes, but is not limited to, stocks covered by the analyst.

### Other Ratings

**Tender** – Investors are guided to tender to the terms of the takeover offer.

**Under Review** – The rating has been temporarily placed under review, until sufficient information has been received and assessed by the analyst.

### Risk Rankings

#### Low

Low financial and operational risk, high predictability of financial results, low stock volatility.

#### Medium

Moderate financial and operational risk, moderate predictability of financial results, moderate stock volatility.

#### High

High financial and/or operational risk, low predictability of financial results, high stock volatility.

#### Caution Warranted

Exceptionally high financial and/or operational risk, exceptionally low predictability of financial results, exceptionally high stock volatility. For risk-tolerant investors only.

#### Venture

Risk and return consistent with Venture Capital. For risk-tolerant investors only.

## Scotia Capital Equity Research Ratings Distribution\*

### Distribution by Ratings and Equity and Equity-Related Financings\*

■ Percentage of companies covered by Scotia Capital Equity Research within each rating category.

■ Percentage of companies within each rating category for which Scotia Capital has undertaken an underwriting liability or has provided advice for a fee within the last 12 months.

\* As at October 31, 2011.

Source: Scotia Capital.

For the purposes of the ratings distribution disclosure the NASD requires members who use a ratings system with terms different than "buy," "hold/neutral" and "sell," to equate their own ratings into these categories. Our 1-Sector Outperform, 2-Sector Perform, and 3-Sector Underperform ratings are based on the criteria above, but for this purpose could be equated to buy, neutral and sell ratings, respectively.

**SHARE PRICE PERFORMANCE:****COMPANY DESCRIPTION:**

Fortis Inc. is a diversified, international electric utility holding company with assets over \$12.5 billion. Regulated holdings include electric distribution utilities in Alberta, BC, Ontario, Newfoundland, PEI and three Caribbean countries and a natural gas utility in BC. Fortis owns non-regulated generation assets across Canada and in Belize and New York State. It also owns and operates hotels and commercial real estate in Canada.

All amounts in C\$ unless otherwise noted.

**Infrastructure -- Utilities****NO SURPRISES IN Q4; STEADY GROWTH AHEAD****Investment recommendation**

Fortis reported fourth-quarter recurring earnings generally in line with expectations. The company continues to deliver stable earnings growth stemming mainly from its regulated utility operations in Canada. With \$5.5 billion of planned capital expenditures over the next five years (83% in regulated operations) we expect the company to deliver measured earnings growth. We maintain our HOLD rating and C\$32.00 target price.

**Investment highlights**

- Maintain HOLD rating and C\$32.00 target
- Q4 recurring earnings \$0.49, below \$0.51 consensus
- 2010 recurring earnings \$1.61, in line with our \$1.60 estimate
- Steady growth - \$5.5 billion capex program over next five years
- Continues to actively seek utility acquisitions

**Valuation**

Our target price is derived from a combination of valuation metrics that include earnings and dividend yields relative to long-term interest rates, dividend discount models, and earnings and cash flow multiples relative to both historical valuation and its utility and pipeline peers.

**Outlook**

We are maintaining our 2011 and 2012 EPS estimates of \$1.75 and \$1.80, respectively. The company is well positioned to achieve stable earnings growth through its planned \$5.5 billion capital expenditure program. Approximately ~\$4.6 billion of spending is targeted within Fortis' regulated operations, driven mainly by investments in FortisAlberta and FortisBC and about \$1.1 billion at Terasen Gas.

Canaccord Genuity is the global capital markets group of Canaccord Financial Inc. (CF : TSX | CF : AIM)

The recommendations and opinions expressed in this Investment Research accurately reflect the Investment Analyst's personal, independent and objective views about any and all the Designated Investments and Relevant Issuers discussed herein. For important information, please see the Important Disclosures section in the appendix of this document or visit Canaccord Genuity's [Online Disclosure Database](#).

In addition, the company has begun construction on the 335 MW Waneta Expansion hydro project where it holds a 51% interest (~\$460 million Fortis portion of the estimated capital cost). The company continues to seek acquisitions and is focused primarily on electric and gas utilities in the United States or Canada. We believe the company has the financial capability to integrate an acquisition of up to \$4 billion in enterprise value but would consider larger acquisitions with the assistance of a financial partner. However, we expect management will remain prudent and wait for the right opportunity.

Fortis' Caribbean operations have been earning a lower-than-expected return on its investments and we expect earnings to gradually improve. A decision on its regulated return in Belize is expected in the first quarter this year and the electricity rate review filing at Fortis Turks and Caicos is advancing.

### **Earnings summary**

Fortis reported fourth-quarter and full-year earnings that were essentially in line with our expectations but slightly below the consensus. Recurring earnings for the company's fourth quarter was \$0.49 per share versus \$0.46 last year. The increase was due mainly to higher earnings from regulated operations in Canada due to the company's significant capital expenditure program coupled with higher allowed ROE. In addition, higher non-regulated electric generation (mainly in Belize from above average hydrology) and lower effective corporate taxes also helped add incremental earnings. This was partly offset by higher operating expenses at Terasen Gas related to quarterly timing issues.

For the full year, Fortis reported recurring earnings per share of \$1.61 versus \$1.53 last year, below the \$1.66 consensus estimate. Higher allowed ROEs and increased rate bases within the Canadian regulated business in addition to above average hydrology in Belize more than offset reduced earnings at the regulated Caribbean operations and the expiration of the Rankine water rights in Ontario.

### **Noteworthy**

- Construction on \$900 M, 335 MW, Waneta Expansion project began Fall/10
    - Fortis owns 51%
      - 40-year PPA with BC Hydro and FortisBC
      - Commissioning targeted for Spring 2015
  - 2011 ROE (vs. 2010):
    - Terasen Gas – 9.5% (unchanged)
    - FortisBC – 9.9% (unchanged)
    - FortisAlberta – 9.0% (interim rate; unchanged)
    - Newfoundland Power 8.38% (down from 9.0%)
  - Credit ratings
    - S&P A-
    - DBRS raised rating to A(low) from BBB(high)
  - Raised \$525 M in long-term debt in 2010 at lower rates
  - Capital program
    - Spent \$1.1 B in 2010, \$25 M lower than forecast in 2009 MD&A
    - \$5.5 B budgeted over next five years
      - 2011: \$1.2 B
      - 2012: \$1.1 B
      - 2013: \$1.2 B
      - 2014: \$1.0 B
      - 2015: \$1.0 B
  - Expects decision on Belize Electricity appeal in Q1/11
-

**Investment risks**

Some of the specific risk factors that pertain to the projected 6- to 12-month stock price target for Fortis are as follows: (1) price movement in electricity rates and commodities used for electricity generation could impact profitability; (2) international operations have currency rate exposure and liquidity risks associated with those currencies; (3) credit risk of contract counterparties could improve or deteriorate; (4) debt refinancing at different interest rates could impact the income of the company; (5) equipment failure or extreme weather conditions could adversely affect operating facilities; (6) change in public policy on environmental health and safety risk could impose unexpected costs on Fortis; (7) change in regulatory or political climate could impact profitability and future growth and development of Fortis; (8) the inability to maintain, or to renew, the collective bargaining agreements with unionized workers on acceptable terms could result in increased labour costs or service interruptions arising from labour disputes; (9) economic conditions which may impact demand for products and services, peer group valuation, access to capital and share trading liquidity; (10) Fortis holds investments in commercial real estate and hotel properties which are subject to operating risks associated with the industry.

**Canaccord Ratings System:**

**BUY:** The stock is expected to generate risk-adjusted returns of over 10% during the next 12 months.

**HOLD:** The stock is expected to generate risk-adjusted returns of 0-10% during the next 12 months.

**SELL:** The stock is expected to generate negative risk-adjusted returns during the next 12 months.

**NOT RATED:** Canaccord Genuity does not provide research coverage of the relevant issuer.

"Risk-adjusted return" refers to the expected return in relation to the amount of risk associated with the designated investment or the relevant issuer.

**Risk Qualifier:**

**SPECULATIVE:** Stocks bear significantly higher risk that typically cannot be valued by normal fundamental criteria. Investments in the stock may result in material loss.

## Canaccord Research Disclosures as of 10 February 2011

Company	Disclosure
Fortis Inc.	7
1	The relevant issuer currently is, or in the past 12 months was, a client of Canaccord Genuity or its affiliated companies. During this period, Canaccord Genuity or its affiliated companies provided the following services to the relevant issuer: A. investment banking services. B. non-investment banking securities-related services. C. non-securities related services.
2	In the past 12 months, Canaccord Genuity or its affiliated companies have received compensation for Corporate Finance/Investment Banking services from the relevant issuer.
3	In the past 12 months, Canaccord Genuity or any of its affiliated companies have been lead manager, co-lead manager or co-manager of a public offering of securities of the relevant issuer or any publicly disclosed offer of securities of the relevant issuer or in any related derivatives.
4	Canaccord Genuity acts as corporate broker for the relevant issuer and/or Canaccord Genuity or any of its affiliated companies may have an agreement with the relevant issuer relating to the provision of Corporate Finance/Investment Banking services.
5	Canaccord Genuity or any of its affiliated companies is a market maker or liquidity provider in the securities of the relevant issuer or in any related derivatives.
6	In the past 12 months, Canaccord Genuity, its partners, affiliated companies, officers or directors, or any authoring analyst involved in the preparation of this investment research has provided services to the relevant issuer for remuneration, other than normal course investment advisory or trade execution services.
7	Canaccord Genuity intends to seek or expects to receive compensation for Corporate Finance/Investment Banking services from the relevant issuer in the next six months.
8	The authoring analyst, a member of the authoring analyst's household, or any individual directly involved in the preparation of this investment research, has a long position in the shares or derivatives, or has any other financial interest in the relevant issuer, the value of which increases as the value of the underlying equity increases.
9	The authoring analyst, a member of the authoring analyst's household, or any individual directly involved in the preparation of this investment research, has a short position in the shares or derivatives, or has any other financial interest in the relevant issuer, the value of which increases as the value of the underlying equity decreases.
10	Those persons identified as the author(s) of this investment research, or any individual involved in the preparation of this investment research, have purchased/received shares in the relevant issuer prior to a public offering of those shares, and such person's name and details are disclosed above.
11	A partner, director, officer, employee or agent of Canaccord Genuity and its affiliated companies, or a member of his/her household, is an officer, or director, or serves as an advisor or board member of the relevant issuer and/or one of its subsidiaries, and such person's name is disclosed above.
12	As of the month end immediately preceding the date of publication of this investment research, or the prior month end if publication is within 10 days following a month end, Canaccord Genuity or its affiliate companies, in the aggregate, beneficially owned 1% or more of any class of the total issued share capital or other common equity securities of the relevant issuer or held any other financial interests in the relevant issuer which are significant in relation to the investment research (as disclosed above).
13	As of the month end immediately preceding the date of publication of this investment research, or the prior month end if publication is within 10 days following a month end, the relevant issuer owned 1% or more of any class of the total issued share capital in Canaccord Genuity or any of its affiliated companies.
14	Other specific disclosures as described above.

Canaccord Genuity is the business name used by certain subsidiaries of Canaccord Financial Inc., including Canaccord Genuity Inc., Canaccord Genuity Limited, and Canaccord Genuity Corp.

The authoring analysts who are responsible for the preparation of this investment research are employed by Canaccord Genuity Corp. a Canadian broker-dealer with principal offices located in Vancouver, Calgary, Toronto, Montreal, or Canaccord Genuity Inc., a US broker-dealer with principal offices located in Boston, New York, San Francisco and Houston or Canaccord Genuity Limited., a UK broker-dealer with principal offices located in London and Edinburgh (UK).

In the event that this is compendium investment research (covering six or more relevant issuers), Canaccord Genuity and its affiliated companies may choose to provide specific disclosures of the subject companies by reference, as well as its policies and procedures regarding the dissemination of investment research. To access this material or for more information, please send a request to Canaccord Genuity Research, Attn:

Disclosures, P.O. Box 10337 Pacific Centre, 2200-609 Granville Street, Vancouver, BC, Canada V7Y 1H2 or [disclosures@canaccordgenuity.com](mailto:disclosures@canaccordgenuity.com).

The authoring analysts who are responsible for the preparation of this investment research have received (or will receive) compensation based upon (among other factors) the Corporate Finance/Investment Banking revenues and general profits of Canaccord Genuity. However, such authoring analysts have not received, and will not receive, compensation that is directly based upon or linked to one or more specific Corporate Finance/Investment Banking activities, or to recommendations contained in the investment research.

Canaccord Genuity and its affiliated companies may have a Corporate Finance/Investment Banking or other relationship with the company that is the subject of this investment research and may trade in any of the designated investments mentioned herein either for their own account or the accounts of their customers, in good faith or in the normal course of market making. Accordingly, Canaccord Genuity or their affiliated companies, principals or employees (other than the authoring analyst(s) who prepared this investment research) may at any time have a long or short position in any such designated investments, related designated investments or in options, futures or other derivative instruments based thereon.

Some regulators require that a firm must establish, implement and make available a policy for managing conflicts of interest arising as a result of publication or distribution of investment research. This investment research has been prepared in accordance with Canaccord Genuity's policy on managing conflicts of interest, and information barriers or firewalls have been used where appropriate. Canaccord Genuity's policy is available upon request.

The information contained in this investment research has been compiled by Canaccord Genuity from sources believed to be reliable, but (with the exception of the information about Canaccord Genuity) no representation or warranty, express or implied, is made by Canaccord Genuity, its affiliated companies or any other person as to its fairness, accuracy, completeness or correctness. Canaccord Genuity has not independently verified the facts, assumptions, and estimates contained herein. All estimates, opinions and other information contained in this investment research constitute Canaccord Genuity's judgement as of the date of this investment research, are subject to change without notice and are provided in good faith but without legal responsibility or liability.

Canaccord Genuity's salespeople, traders, and other professionals may provide oral or written market commentary or trading strategies to our clients and our proprietary trading desk that reflect opinions that are contrary to the opinions expressed in this investment research. Canaccord Genuity's affiliates, principal trading desk, and investing businesses may make investment decisions that are inconsistent with the recommendations or views expressed in this investment research.

This investment research is provided for information purposes only and does not constitute an offer or solicitation to buy or sell any designated investments discussed herein in any jurisdiction where such offer or solicitation would be prohibited. As a result, the designated investments discussed in this investment research may not be eligible for sale in some jurisdictions. This investment research is not, and under no circumstances should be construed as, a solicitation to act as a securities broker or dealer in any jurisdiction by any person or company that is not legally permitted to carry on the business of a securities broker or dealer in that jurisdiction. This material is prepared for general circulation to clients and does not have regard to the investment objectives, financial situation or particular needs of any particular person. Investors should obtain advice based on their own individual circumstances before making an investment decision. To the fullest extent permitted by law, none of Canaccord Genuity, its affiliated companies or any other person accepts any liability whatsoever for any direct or consequential loss arising from or relating to any use of the information contained in this investment research.

**For Canadian Residents:** This Investment Research has been approved by Canaccord Genuity Corp., which accepts sole responsibility for this Investment Research and its dissemination in Canada. Canadian clients wishing to effect transactions in any Designated Investment discussed should do so through a qualified salesperson of Canaccord Genuity Corp. in their particular jurisdiction.

**For United Kingdom Residents:** This investment research is distributed in the United Kingdom, as third party research by Canaccord Genuity Limited, which is authorized and regulated by the Financial Services Authority. This research is for distribution only to persons who are Eligible Counterparties or Professional Clients only and is exempt from the general restrictions in section 21 of the Financial Services and Markets Act 2000 on the communication of invitations or inducements to engage in investment activity on the grounds that it is being distributed in the United Kingdom only to persons of a kind described in Article 19(5) (Investment Professionals) and 49(2) (High Net Worth companies, unincorporated associations etc) of the Financial Services and Markets Act 2000 (Financial Promotion) Order 2005 (as amended). It is not intended to be distributed or passed on, directly or indirectly, to any other class of persons. This material is not for distribution in the United Kingdom to retail clients, as defined under the rules of the Financial Services Authority.

**For United States Residents:** Canaccord Genuity Inc., a US registered broker-dealer, accepts responsibility for this Investment Research and its dissemination in the United States. This Investment Research is intended for distribution in the United States only to certain US institutional investors. US clients wishing to effect transactions in any Designated

Investment discussed should do so through a qualified salesperson of Canaccord Genuity Inc. Analyst(s) preparing this report that are not employed by Canaccord Genuity Inc are resident outside the United States and are not associated persons or employees of any US regulated broker-dealer. Such analyst(s) may not be subject to Rule 2711 restrictions on communications with a subject company, public appearances and trading securities held by a research analyst account.

**For European Residents:** If this Investment Research is intended for disclosure in any jurisdiction other than the United Kingdom, the US or Canada, then the relevant rules and regulatory requirements of that jurisdiction will apply.

**SHARE PRICE PERFORMANCE:****COMPANY DESCRIPTION:**

Fortis Inc. is a diversified, international electric utility holding company with assets over \$12.5 billion. Regulated holdings include electric distribution utilities in Alberta, BC, Ontario, Newfoundland, PEI and three Caribbean countries and a natural gas utility in BC. Fortis owns non-regulated generation assets across Canada and in Belize and New York State. It also owns and operates hotels and commercial real estate in Canada.

All amounts in C\$ unless otherwise noted.

**Infrastructure -- Utilities****NEGATIVE BELIZE DECISION NOT MATERIAL****Investment recommendation**

Fortis received unfavourable determinations from the Belize Supreme Court regarding its 70%-owned Belize Electricity Limited for appeals made against certain regulatory decisions related to a 2008 rate case with the Belize regulator. The regulatory decisions in dispute have resulted in the company not earning a sufficient return on the assets since 2008 and, while they are disappointing, we do not expect the recent findings to have a material impact on future earnings. However, the company may be required to incur a writedown on the assets at some point in the future. The Belize regulatory assets represent only around \$100-125 million (~\$0.57-0.72 per share) and we believe that if a writedown is incurred, it would be for a portion of these assets and would not be material to the stock. Fortis is the epitome of a utility, achieving stable earnings growth stemming mainly from its regulated operations in Canada. The company has \$5.5 billion of planned capital expenditures over the next five years and we continue to expect delivery of measured earnings growth.

**Investment highlights**

- No changes to 2011 and 2012 earnings estimates
  - Belize assets under-earning for past two and a half years
  - No assumptions for positive decision going forward
- Maintain HOLD rating and \$32 target price
- Supreme Court determination immaterial to company
  - Total Belize assets represent \$0.57-0.72 in value per share

**Valuation**

Our target price is derived from a combination of valuation metrics that include earnings and dividend yields relative to long-term interest rates, dividend discount models, and earnings and cash flow multiples relative to both historical valuation and its utility and pipeline peers.

**Summary**

In 2008, the Public Utilities Commission (PUC) in Belize issued a Final Decision on Belize Electric Limited's (70 % Fortis-owned) Annual Review Proceedings that resulted in a reduced rate of return by way of disallowing previously approved expenses and lowering the value of the rate base. Belize Electric then appealed the decisions to the Belize Supreme Court on the basis that the PUC decisions were unlawful and did not follow Good Utility Practice. In its determination, the Supreme Court sided with the PUC on all regulatory decisions in dispute and found the PUC to have acted in the interest of consumers and the utility.

Fortis has not been earning a positive return on its Belize operations since 2008. Although it is disappointing, we believe the outcome is not significantly meaningful to Fortis's earnings going forward. In total, the Belize regulatory assets are estimated at \$100-125 million (\$0.57-0.72 per share), and are not substantial relative to the total value of the company. We suspect the company may have to write down the assets at some point in the future if it is not able to derive additional value from the assets but believe any potential writedown would be a portion of the total value of the assets and would not be a significant to the stock.

**Investment risks**

Some of the specific risk factors that pertain to the projected 6- to 12-month stock price target for Fortis are as follows: (1) price movement in electricity rates and commodities used for electricity generation could impact profitability; (2) international operations have currency rate exposure and liquidity risks associated with those currencies; (3) credit risk of contract counterparties could improve or deteriorate; (4) debt refinancing at different interest rates could impact the income of the company; (5) equipment failure or extreme weather conditions could adversely affect operating facilities; (6) change in public policy on environmental health and safety risk could impose unexpected costs on Fortis; (7) change in regulatory or political climate could impact profitability and future growth and development of Fortis; (8) the inability to maintain, or to renew, the collective bargaining agreements with unionized workers on acceptable terms could result in increased labour costs or service interruptions arising from labour disputes; (9) economic conditions which may impact demand for products and services, peer group valuation, access to capital and share trading liquidity; (10) Fortis holds investments in commercial real estate and hotel properties which are subject to operating risks associated with the industry.

5	Canaccord Genuity or any of its affiliated companies is a market maker or liquidity provider in the securities of the relevant issuer or in any related derivatives.
6	In the past 12 months, Canaccord Genuity, its partners, affiliated companies, officers or directors, or any authoring analyst involved in the preparation of this investment research has provided services to the relevant issuer for remuneration, other than normal course investment advisory or trade execution services.
7	Canaccord Genuity intends to seek or expects to receive compensation for Corporate Finance/Investment Banking services from the relevant issuer in the next six months.
8	The authoring analyst, a member of the authoring analyst's household, or any individual directly involved in the preparation of this investment research, has a long position in the shares or derivatives, or has any other financial interest in the relevant issuer, the value of which increases as the value of the underlying equity increases.
9	The authoring analyst, a member of the authoring analyst's household, or any individual directly involved in the preparation of this investment research, has a short position in the shares or derivatives, or has any other financial interest in the relevant issuer, the value of which increases as the value of the underlying equity decreases.
10	Those persons identified as the author(s) of this investment research, or any individual involved in the preparation of this investment research, have purchased/received shares in the relevant issuer prior to a public offering of those shares, and such person's name and details are disclosed above.
11	A partner, director, officer, employee or agent of Canaccord Genuity and its affiliated companies, or a member of his/her household, is an officer, or director, or serves as an advisor or board member of the relevant issuer and/or one of its subsidiaries, and such person's name is disclosed above.
12	As of the month end immediately preceding the date of publication of this investment research, or the prior month end if publication is within 10 days following a month end, Canaccord Genuity or its affiliate companies, in the aggregate, beneficially owned 1% or more of any class of the total issued share capital or other common equity securities of the relevant issuer or held any other financial interests in the relevant issuer which are significant in relation to the investment research (as disclosed above).
13	As of the month end immediately preceding the date of publication of this investment research, or the prior month end if publication is within 10 days following a month end, the relevant issuer owned 1% or more of any class of the total issued share capital in Canaccord Genuity or any of its affiliated companies.
14	Other specific disclosures as described above.

Canaccord Genuity is the business name used by certain subsidiaries of Canaccord Financial Inc., including Canaccord Genuity Inc., Canaccord Genuity Limited, and Canaccord Genuity Corp.

The authoring analysts who are responsible for the preparation of this investment research are employed by Canaccord Genuity Corp. a Canadian broker-dealer with principal offices located in Vancouver, Calgary, Toronto, Montreal, or Canaccord Genuity Inc., a US broker-dealer with principal offices located in Boston, New York, San Francisco and Houston or Canaccord Genuity Limited., a UK broker-dealer with principal offices located in London and Edinburgh (UK).

In the event that this is compendium investment research (covering six or more relevant issuers), Canaccord Genuity and its affiliated companies may choose to provide specific disclosures of the subject companies by reference, as well as its policies and procedures regarding the dissemination of investment research. To access this material or for more information, please send a request to Canaccord Genuity Research, Attn:

Disclosures, P.O. Box 10337 Pacific Centre, 2200-609 Granville Street, Vancouver, BC, Canada V7Y 1H2 or disclosures@canaccordgenuity.com.

The authoring analysts who are responsible for the preparation of this investment research have received (or will receive) compensation based upon (among other factors) the Corporate Finance/Investment Banking revenues and general profits of Canaccord Genuity. However, such authoring analysts have not received, and will not receive, compensation that is directly based upon or linked to one or more specific Corporate Finance/Investment Banking activities, or to recommendations contained in the investment research.

Canaccord Genuity and its affiliated companies may have a Corporate Finance/Investment Banking or other relationship with the company that is the subject of this investment research and may trade in any of the designated investments mentioned herein either for their own account or the accounts of their customers, in good faith or in the normal course of market making. Accordingly, Canaccord Genuity or their affiliated companies, principals or employees (other than the authoring analyst(s) who prepared this investment research) may at any time have a long or short position in any such designated investments, related designated investments or in options, futures or other derivative instruments based thereon.

Some regulators require that a firm must establish, implement and make available a policy for managing conflicts of interest arising as a result of publication or distribution of investment research. This investment research has been prepared in accordance with Canaccord Genuity's policy on managing conflicts of interest, and information barriers or firewalls have been used where appropriate. Canaccord Genuity's policy is available upon request.

The information contained in this investment research has been compiled by Canaccord Genuity from sources believed to be reliable, but (with the exception of the information about Canaccord Genuity) no representation or warranty, express or implied, is made by Canaccord Genuity, its affiliated companies or any other person as to its fairness, accuracy, completeness or correctness. Canaccord Genuity has not independently verified the facts, assumptions, and estimates contained herein. All estimates, opinions and other information contained in this investment research constitute Canaccord Genuity's judgement as of the date of this investment research, are subject to change without notice and are provided in good faith but without legal responsibility or liability.

Canaccord Genuity's salespeople, traders, and other professionals may provide oral or written market commentary or trading strategies to our clients and our proprietary trading desk that reflect opinions that are contrary to the opinions expressed in this investment research. Canaccord Genuity's affiliates, principal trading desk, and investing businesses may make investment decisions that are inconsistent with the recommendations or views expressed in this investment research.

This investment research is provided for information purposes only and does not constitute an offer or solicitation to buy or sell any designated investments discussed herein in any jurisdiction where such offer or solicitation would be prohibited. As a result, the designated investments discussed in this investment research may not be eligible for sale in some jurisdictions. This investment research is not, and under no circumstances should be construed as, a solicitation to act as a securities broker or dealer in any jurisdiction by any person or company that is not legally permitted to carry on the business of a securities broker or dealer in that jurisdiction. This material is prepared for general circulation to clients and does not have regard to the investment objectives, financial situation or particular needs of any particular person. Investors should obtain advice based on their own individual circumstances before making an investment decision. To the fullest extent permitted by law, none of Canaccord Genuity, its affiliated companies or any other person accepts any liability whatsoever for any direct or consequential loss arising from or relating to any use of the information contained in this investment research.

**For Canadian Residents:** This Investment Research has been approved by Canaccord Genuity Corp., which accepts sole responsibility for this Investment Research and its dissemination in Canada. Canadian clients wishing to effect transactions in any Designated Investment discussed should do so through a qualified salesperson of Canaccord Genuity Corp. in their particular jurisdiction.

**For United Kingdom Residents:** This investment research is distributed in the United Kingdom, as third party research by Canaccord Genuity Limited, which is authorized and regulated by the Financial Services Authority. This research is for distribution only to persons who are Eligible Counterparties or Professional Clients only and is exempt from the general restrictions in section 21 of the Financial Services and Markets Act 2000 on the communication of invitations or inducements to engage in investment activity on the grounds that it is being distributed in the United Kingdom only to persons of a kind described in Article 19(5) (Investment Professionals) and 49(2) (High Net Worth companies, unincorporated associations etc) of the Financial Services and Markets Act 2000 (Financial Promotion) Order 2005 (as amended). It is not intended to be distributed or passed on, directly or indirectly, to any other class of persons. This material is not for distribution in the United Kingdom to retail clients, as defined under the rules of the Financial Services Authority.

**For United States Residents:** Canaccord Genuity Inc., a US registered broker-dealer, accepts responsibility for this Investment Research and its dissemination in the United States. This Investment Research is intended for distribution in the United States only to certain US institutional investors. US clients wishing to effect transactions in any Designated

Investment discussed should do so through a qualified salesperson of Canaccord Genuity Inc. Analyst(s) preparing this report that are not employed by Canaccord Genuity Inc are resident outside the United States and are not associated persons or employees of any US regulated broker-dealer. Such analyst(s) may not be subject to Rule 2711 restrictions on communications with a subject company, public appearances and trading securities held by a research analyst account.

**For European Residents:** If this Investment Research is intended for disclosure in any jurisdiction other than the United Kingdom, the US or Canada, then the relevant rules and regulatory requirements of that jurisdiction will apply.

**SHARE PRICE PERFORMANCE:****COMPANY DESCRIPTION:**

Fortis Inc. is a diversified, international electric utility holding company with assets over \$12.5 billion. Regulated holdings include electric distribution utilities in Alberta, BC, Ontario, Newfoundland, PEI and three Caribbean countries and a natural gas utility in BC. Fortis owns non-regulated generation assets across Canada and in Belize and New York State. It also owns and operates hotels and commercial real estate in Canada.

All amounts in C\$ unless otherwise noted.

**Infrastructure -- Utilities****RATE BASE GROWTH FUELS STRONG Q1****Investment recommendation**

Fortis reported first quarter recurring earnings of \$0.66 per share, above the consensus estimate. The company consistently delivers stable results, as earnings are almost entirely generated from rate regulated utility operations. Over the next five years, earnings are set for stable and consistent growth. The company plans to spend approximately \$5.5 billion in capital expenditures, 83% of which will be applied to its utility operations in western Canada. We continue to rate the stock a HOLD and maintain our C\$32.00 target price.

**Investment highlights**

- Q1 recurring EPS of \$0.66, above consensus
  - Growth from capital additions in western Canadian utility operations
- \$5.5 billion capital program to fuel future growth
- Maintain HOLD rating and C\$32.00 target price
  - 2011 and 2012 EPS estimates unchanged

**Valuation**

Our target price is derived from a combination of valuation metrics that include earnings and dividend yields relative to long-term interest rates, dividend discount models, and earnings and cash flow multiples relative to both historical valuation and its utility and pipeline peers.

**Outlook**

We are making no changes to our 2011 and 2012 earnings estimates of \$1.75 and \$1.80, respectively. The nature of Fortis' business, energy delivery, usually leads to strong results in the first and fourth quarters when energy demand is at its peak and temperatures are the coldest. We expect to see a strong start to the year offset by comparatively weaker second and third quarters. Earnings, however, continue to grow year-over-year, mainly due to capital additions in the company's regulated operations in western Canada. Fortis is seeking to spend an additional \$5.5 billion of growth capex from 2011 through 2015. Approximately \$4.6 billion of that will be towards regulated operations, mainly FortisBC and FortisAlberta.

Growth can be further enhanced if Fortis were to acquire additional utility assets. The company has a successful track record of acquisitions in the past and is always on the lookout for assets that fit its strategy and meet its investment criteria. Management has indicated that it will consider acquiring assets with up to \$4 billion in enterprise value, and will consider partnering with another investor for larger purchases.

The company is still facing headwinds at its Caribbean operations with an unfavourable decision at Belize Electricity and a rate application that was not accepted by the Governor of Turks and Caicos. The company is working hard to resolve these issues, which could result in improved earnings in the future. However, we remain conservative on our expectations for earnings from this business division.

**First quarter earnings summary**

Fortis reported first quarter recurring earnings of \$0.66 per share, above the \$0.62 consensus estimate and \$0.59 in the first quarter last year. Strong rate base growth at the company's regulated utilities in western Canada contributed to the bulk of the increased earnings in the quarter. Earnings improved in its non-regulated generation segment as a result of increased power generation in Belize and higher average power prices in Ontario. Fortis Properties' earnings decreased modestly year-over-year due to higher amortization costs and lower performance as a result of continued effects of the economic downturn. However, the first quarter is typically the seasonally low quarter of the year, and we expect the Properties division to deliver a contribution in 2011 similar to last year. For additional details on the first quarter results, please see Figure 1.

**Noteworthy items**

- Rate applications
    - FortisAlberta 2012-2013 rate application filed in March 2011
      - Effective rate increases of 8.2% in 2012 and 6.9% in 2013
      - Hearing expected late October 2011 and final decision in Q1/12
-

- FortisBC Energy (formerly known as Terasen) expects to file 2012-2013 rate application in May 2011
    - FortisBC Electric expects to file 2012-2013 rate application in summer 2011
    - Newfoundland Power expects to file rate application in May 2011
      - 8% rate increase effective July 1, 2011
  - Considering amalgamation of three FortisBC Energy companies (formerly Terasen Gas companies)
    - FortisBC Inc., FortisBC Vancouver Island, and FortisBC Whistler
    - Application expected sometime in 2011
  - FortisBC natural gas storage facility expected to be complete in next several weeks
    - Estimated cost of \$214 million; \$80 million equity portion
    - Facility to be filled in Q2/11
  - Fortis Properties' application to construct 12-storey office building in St. John's, Newfoundland
    - Subject to municipal government approval
    - Estimated cost of \$50 million and expected completion in 2013
-

**Investment risks**

Some of the specific risk factors that pertain to the projected 6- to 12-month stock price target for Fortis are as follows: (1) price movement in electricity rates and commodities used for electricity generation could impact profitability; (2) international operations have currency rate exposure and liquidity risks

associated with those currencies; (3) credit risk of contract counterparties could improve or deteriorate; (4) debt refinancing at different interest rates could impact the income of the company; (5) equipment failure or extreme weather conditions could adversely affect operating facilities; (6) change in public policy on environmental health and safety risk could impose unexpected costs on Fortis; (7) change in regulatory or political climate could impact profitability and future growth and development of Fortis; (8) the inability to maintain, or to renew, the collective bargaining agreements with unionized workers on acceptable terms could result in increased labour costs or service interruptions arising from labour disputes; (9) economic conditions which may impact demand for products and services, peer group valuation, access to capital, and share trading liquidity; and (10) Fortis holds investments in commercial real estate and hotel properties, which are subject to operating risks associated with the industry.

Hold	234	29.8%	17.5%	
Sell	18	2.3%	11.1%	
	785	100.0%		

**Canaccord Ratings System:**

**BUY:** The stock is expected to generate risk-adjusted returns of over 10% during the next 12 months.

**HOLD:** The stock is expected to generate risk-adjusted returns of 0-10% during the next 12 months.

**SELL:** The stock is expected to generate negative risk-adjusted returns during the next 12 months.

**NOT RATED:** Canaccord Genuity does not provide research coverage of the relevant issuer.

"Risk-adjusted return" refers to the expected return in relation to the amount of risk associated with the designated investment or the relevant issuer.

**Risk Qualifier:**

**SPECULATIVE:** Stocks bear significantly higher risk that typically cannot be valued by normal fundamental criteria. Investments in the stock may result in material loss.

## Canaccord Research Disclosures as of 4 May 2011

Company	Disclosure
Fortis Inc.	7
1	The relevant issuer currently is, or in the past 12 months was, a client of Canaccord Genuity or its affiliated companies. During this period, Canaccord Genuity or its affiliated companies provided the following services to the relevant issuer: A. investment banking services. B. non-investment banking securities-related services. C. non-securities related services.
2	In the past 12 months, Canaccord Genuity or its affiliated companies have received compensation for Corporate Finance/Investment Banking services from the relevant issuer.
3	In the past 12 months, Canaccord Genuity or any of its affiliated companies have been lead manager, co-lead manager or co-manager of a public offering of securities of the relevant issuer or any publicly disclosed offer of securities of the relevant issuer or in any related derivatives.
4	Canaccord Genuity acts as corporate broker for the relevant issuer and/or Canaccord Genuity or any of its affiliated companies may have an agreement with the relevant issuer relating to the provision of Corporate Finance/Investment Banking services.
5	Canaccord Genuity or any of its affiliated companies is a market maker or liquidity provider in the securities of the relevant issuer or in any related derivatives.
6	In the past 12 months, Canaccord Genuity, its partners, affiliated companies, officers or directors, or any authoring analyst involved in the preparation of this investment research has provided services to the relevant issuer for remuneration, other than normal course investment advisory or trade execution services.
7	Canaccord Genuity intends to seek or expects to receive compensation for Corporate Finance/Investment Banking services from the relevant issuer in the next six months.
8	The authoring analyst, a member of the authoring analyst's household, or any individual directly involved in the preparation of this investment research, has a long position in the shares or derivatives, or has any other financial interest in the relevant issuer, the value of which increases as the value of the underlying equity increases.
9	The authoring analyst, a member of the authoring analyst's household, or any individual directly involved in the preparation of this investment research, has a short position in the shares or derivatives, or has any other financial interest in the relevant issuer, the value of which increases as the value of the underlying equity decreases.
10	Those persons identified as the author(s) of this investment research, or any individual involved in the preparation of this investment research, have purchased/received shares in the relevant issuer prior to a public offering of those shares, and such person's name and details are disclosed above.
11	A partner, director, officer, employee or agent of Canaccord Genuity and its affiliated companies, or a member of his/her household, is an officer, or director, or serves as an advisor or board member of the relevant issuer and/or one of its subsidiaries, and such person's name is disclosed above.
12	As of the month end immediately preceding the date of publication of this investment research, or the prior month end if publication is within 10 days following a month end, Canaccord Genuity or its affiliate companies, in the aggregate, beneficially owned 1% or more of any class of the total issued share capital or other common equity securities of the relevant issuer or held any other financial interests in the relevant issuer which are significant in relation to the investment research (as disclosed above).
13	As of the month end immediately preceding the date of publication of this investment research, or the prior month end if publication is within 10 days following a month end, the relevant issuer owned 1% or more of any class of the total issued share capital in Canaccord Genuity or any of its affiliated companies.
14	Other specific disclosures as described above.

Canaccord Genuity is the business name used by certain subsidiaries of Canaccord Financial Inc., including Canaccord Genuity Inc., Canaccord Genuity Limited, and Canaccord Genuity Corp.

The authoring analysts who are responsible for the preparation of this investment research are employed by Canaccord Genuity Corp. a Canadian broker-dealer with principal offices located in Vancouver, Calgary, Toronto, Montreal, or Canaccord Genuity Inc., a US broker-dealer with principal offices located in Boston, New York, San Francisco and Houston or Canaccord Genuity Limited., a UK broker-dealer with principal offices located in London and Edinburgh (UK).

In the event that this is compendium investment research (covering six or more relevant issuers), Canaccord Genuity and its affiliated companies may choose to provide specific disclosures of the subject companies by reference, as well as its policies and procedures regarding the dissemination of investment research. To access this material or for more information, please send a request to Canaccord Genuity Research, Attn:

Disclosures, P.O. Box 10337 Pacific Centre, 2200-609 Granville Street, Vancouver, BC, Canada V7Y 1H2 or disclosures@canaccordgenuity.com.

The authoring analysts who are responsible for the preparation of this investment research have received (or will receive) compensation based upon (among other factors) the Corporate Finance/Investment Banking revenues and general profits of Canaccord Genuity. However, such authoring analysts have not received, and will not receive, compensation that is directly based upon or linked to one or more specific Corporate Finance/Investment Banking activities, or to recommendations contained in the investment research.

Canaccord Genuity and its affiliated companies may have a Corporate Finance/Investment Banking or other relationship with the company that is the subject of this investment research and may trade in any of the designated investments mentioned herein either for their own account or the accounts of their customers, in good faith or in the normal course of market making. Accordingly, Canaccord Genuity or their affiliated companies, principals or employees (other than the authoring analyst(s) who prepared this investment research) may at any time have a long or short position in any such designated investments, related designated investments or in options, futures or other derivative instruments based thereon.

Some regulators require that a firm must establish, implement and make available a policy for managing conflicts of interest arising as a result of publication or distribution of investment research. This investment research has been prepared in accordance with Canaccord Genuity's policy on managing conflicts of interest, and information barriers or firewalls have been used where appropriate. Canaccord Genuity's policy is available upon request.

### SHARE PRICE PERFORMANCE:

### COMPANY DESCRIPTION:

Fortis Inc. is a diversified, international electric utility holding company with assets over \$12.5 billion. Regulated holdings include electric distribution utilities in Alberta, BC, Ontario, Newfoundland, PEI and three Caribbean countries and a natural gas utility in BC. Fortis owns non-regulated generation assets across Canada and in Belize and New York State. It also owns and operates hotels and commercial real estate in Canada.

All amounts in C\$ unless otherwise noted.

### Infrastructure -- Utilities

## ACQUIRES U.S. UTILITY AND ISSUES COMMON EQUITY

### Investment recommendation

Fortis announced the acquisition of Central Vermont Public Service (CV : NYSE : US\$24.32 | Not rated) for US\$35.10/share or US\$700 million including the assumption of US\$230 million of associated debt. We believe the acquisition will contribute up to \$0.05 to full-year EPS once it closes and we are raising our target price modestly to C\$33.00 from C\$32.00 to reflect the positive impact of the purchase. The company also announced an equity financing of up to \$345 million to finance the equity portion of rate base growth in its western Canadian utility operations and for its share in the development of the Waneta Dam. While we had modelled an equity financing into our 2011 earnings estimate, we had assumed a smaller financing. As a result, the larger equity issue dilutes our 2011 EPS by a few cents per share and we are lowering our 2011 EPS estimate to \$1.70 from \$1.75.

### Investment highlights

- Acquiring Central Vermont Public Service for US\$700 million
  - 1.41x rate base (including interest in VELCO debt)
  - Expected to close in 6-12 months
  - Accretive to EPS by as much as \$0.05 per share after close
- Raising target price by C\$1.00 to C\$33.00
  - Maintain HOLD rating

Canaccord Genuity is the global capital markets group of Canaccord Financial Inc. (CF : TSX | CF. : AIM)

The recommendations and opinions expressed in this Investment Research accurately reflect the Investment Analyst's personal, independent and objective views about any and all the Designated Investments and Relevant Issuers discussed herein. For important information, please see the Important Disclosures section in the appendix of this document or visit Canaccord Genuity's [Online Disclosure Database](#).

- Announced \$300 - \$345 million common equity issue (larger than anticipated)
  - 9.1 – 10.465 million shares @ \$33/share
- Lowering 2011 EPS estimate to \$1.70 from \$1.75; 2012 EPS estimate unchanged at \$1.80

**Valuation**

Our target price is derived from a combination of valuation metrics that include earnings and dividend yields relative to long-term interest rates, dividend discount models, and earnings and cash flow multiples relative to both historical valuation and its utility and pipeline peers.

**Summary**

Fortis announced the US\$700 million acquisition of Central Vermont Public Service (CVPS). The regulatory assets of CVPS were US\$426 million in 2010 which represents a 64% premium to regulatory assets. On the surface, the price appears rich; however, we note several factors. First, the rate base on the balance sheet does not take into consideration an additional US\$155 million of debt from a minority holding of Vermont Electric Power Company (VELCO). Considering this proportional interest in the debt of VELCO, the acquisition cost including assumed debt is about US\$855 million, representing a 40% premium to rate base. Second, while still somewhat higher than recent transactions (Algonquin Power & Utilities paid a 15%, 13% and 11% premium, respectively for its recent Granite State, Energy North and Midwest utilities acquisitions) we point out that CVPS generates a 9.45% return on an attractive 57% equity component on a rate base of US\$426 million (around ~43% equity component inclusive of VELCO debt). Third, CVPS is a growing utility with rate base expected to reach over US\$800 million by 2015 (including debt of VELCO), representing around ~8.5% average annual growth rate from 2010. We expect the acquisition to contribute up to ~\$0.05 per share to full year earnings per share depending on financing terms. The acquisition is expected to close within the next 6-12 months, subject to approval by CVPS shareholders, FERC and the Vermont Public Service Board.

While Fortis is very familiar with regulated assets, with almost 90% of its earnings generated from regulated operations in Canada and the Caribbean, the acquisition of CVPS is Fortis' first foray into the U.S. utility arena. Fortis' management has long indicated that it was seeking to expand into the United States and we suspect that the purchase of CVPS establishes a beachhead for additional U.S. utility purchases in the future.

The company also announced that it will issue 9.1 million common shares at \$33 per share for gross proceeds of \$300 million. If the overallotment of 1.365 million shares is exercised, total proceeds will rise to \$345 million. We had expected the company to issue equity in 2011 and in 2012 to fund the growth of its western Canadian utility operations and the development of its interest in the non-

---

regulated Waneta Dam; however, the announced equity issue is larger than we had anticipated. Consequently, the larger-than-expected common share issue will dilute our anticipated earnings and we are lowering our 2011 EPS estimate by \$0.05 to \$1.70. Our 2012 EPS estimate remains unchanged at \$1.80.

**Acquisition details**

- Purchasing CVPS for US\$700 million; US\$855 million including US\$155 million of VELCO debt
  - Purchasing CV:NYSE shares for US\$35.10/share
    - Represents 44% premium to last closing price
  - Assuming US\$385 million debt
- Rate base of ~US\$600 million
  - Includes debt attributed to VELCO investment
  - 57% equity component on rate base of US\$426 million
    - ~43% inclusive of VELCO debt
  - 9.45% ROE
    - Based on automatic adjustment formula approach using 10-year treasury yield
- CVPS purchases, produces, distributes, transmits and sells power
  - Serves 160,000 customers
  - Owns 9,000 miles of distribution lines
  - Owns 600 miles of transmission lines
  - Holds a 41% interest in Vermont Transco LLC, an electric transmission business
  - Holds a 47% interest in Vermont Electric Power Company (VELCO), an electric transmission business
  - Holds a 59% interest in Vermont Yankee Nuclear Power Corp, which holds a PPA for nuclear power from the Vermont Yankee Nuclear Power Plant
- Closing of the acquisition to occur within the next 6-12 months, subject to approval of:
  - CVPS shareholders
  - U.S. Federal Energy Regulatory Commission (FERC)
  - Vermont Public Service Board
  - Other customary closing conditions

**Financing details**

- Issuing 9.1 million shares at \$33/share for gross proceeds of \$300 million
    - 1.365 million share overallotment for \$45 million
  - To fund:
    - Growing rate base in western Canadian utility operations
    - Development of Waneta Dam
    - Outstanding debt on credit facilities
    - General corporate purposes
-

- Expected to close on or about June 15, 2011

**Investment risks**

Some of the specific risk factors that pertain to the projected 6- to 12-month stock price target for Fortis are as follows: (1) price movement in electricity rates and commodities used for electricity generation could impact profitability; (2) international operations have currency rate exposure and liquidity risks associated with those currencies; (3) credit risk of contract counterparties could improve or deteriorate; (4) debt refinancing at different interest rates could impact the income of the company; (5) equipment failure or extreme weather conditions could adversely affect operating facilities; (6) change in public policy on environmental health and safety risk could impose unexpected costs on Fortis; (7) change in regulatory or political climate could impact profitability and future growth and development of Fortis; (8) the inability to maintain, or to renew, the collective bargaining agreements with unionized workers on acceptable terms could result in increased labour costs or service interruptions arising from labour disputes; (9) economic conditions which may impact demand for products and services, peer group valuation, access to capital and share trading liquidity; (10) Fortis holds investments in commercial real estate and hotel properties which are subject to operating risks associated with the industry.

---

**APPENDIX: IMPORTANT DISCLOSURES****Analyst Certification:**

Each authoring analyst of Canaccord Genuity whose name appears on the front page of this investment research hereby certifies that (i) the recommendations and opinions expressed in this investment research accurately reflect the authoring analyst's personal, independent and objective views about any and all of the designated investments or relevant issuers discussed herein that are within such authoring analyst's coverage universe and (ii) no part of the authoring analyst's compensation was, is, or will be, directly or indirectly, related to the specific recommendations or views expressed by the authoring analyst in the investment research.

**Site Visit:**

An analyst has visited Fortis's material operations in BC. No payment or reimbursement was received from the issuer for related travel costs.

**Price Chart:\*****Distribution of Ratings:**

**Canaccord Ratings System:**

**BUY:** The stock is expected to generate risk-adjusted returns of over 10% during the next 12 months.

**HOLD:** The stock is expected to generate risk-adjusted returns of 0-10% during the next 12 months.

**SELL:** The stock is expected to generate negative risk-adjusted returns during the next 12 months.

**NOT RATED:** Canaccord Genuity does not provide research coverage of the relevant issuer.

"Risk-adjusted return" refers to the expected return in relation to the amount of risk associated with the designated investment or the relevant issuer.

**Risk Qualifier:**

**SPECULATIVE:** Stocks bear significantly higher risk that typically cannot be valued by normal fundamental criteria. Investments in the stock may result in material loss.

## Canaccord Research Disclosures as of 31 May 2011

Company	Disclosure
Fortis Inc.	7
1	The relevant issuer currently is, or in the past 12 months was, a client of Canaccord Genuity or its affiliated companies. During this period, Canaccord Genuity or its affiliated companies provided the following services to the relevant issuer: A. investment banking services. B. non-investment banking securities-related services. C. non-securities related services.
2	In the past 12 months, Canaccord Genuity or its affiliated companies have received compensation for Corporate Finance/Investment Banking services from the relevant issuer.
3	In the past 12 months, Canaccord Genuity or any of its affiliated companies have been lead manager, co-lead manager or co-manager of a public offering of securities of the relevant issuer or any publicly disclosed offer of securities of the relevant issuer or in any related derivatives.
4	Canaccord Genuity acts as corporate broker for the relevant issuer and/or Canaccord Genuity or any of its affiliated companies may have an agreement with the relevant issuer relating to the provision of Corporate Finance/Investment Banking services.
5	Canaccord Genuity or any of its affiliated companies is a market maker or liquidity provider in the securities of the relevant issuer or in any related derivatives.
6	In the past 12 months, Canaccord Genuity, its partners, affiliated companies, officers or directors, or any authoring analyst involved in the preparation of this investment research has provided services to the relevant issuer for remuneration, other than normal course investment advisory or trade execution services.
7	Canaccord Genuity intends to seek or expects to receive compensation for Corporate Finance/Investment Banking services from the relevant issuer in the next six months.
8	The authoring analyst, a member of the authoring analyst's household, or any individual directly involved in the preparation of this investment research, has a long position in the shares or derivatives, or has any other financial interest in the relevant issuer, the value of which increases as the value of the underlying equity increases.
9	The authoring analyst, a member of the authoring analyst's household, or any individual directly involved in the preparation of this investment research, has a short position in the shares or derivatives, or has any other financial interest in the relevant issuer, the value of which increases as the value of the underlying equity decreases.
10	Those persons identified as the author(s) of this investment research, or any individual involved in the preparation of this investment research, have purchased/received shares in the relevant issuer prior to a public offering of those shares, and such person's name and details are disclosed above.
11	A partner, director, officer, employee or agent of Canaccord Genuity and its affiliated companies, or a member of his/her household, is an officer, or director, or serves as an advisor or board member of the relevant issuer and/or one of its subsidiaries, and such person's name is disclosed above.
12	As of the month end immediately preceding the date of publication of this investment research, or the prior month end if publication is within 10 days following a month end, Canaccord Genuity or its affiliate companies, in the aggregate, beneficially owned 1% or more of any class of the total issued share capital or other common equity securities of the relevant issuer or held any other financial interests in the relevant issuer which are significant in relation to the investment research (as disclosed above).
13	As of the month end immediately preceding the date of publication of this investment research, or the prior month end if publication is within 10 days following a month end, the relevant issuer owned 1% or more of any class of the total issued share capital in Canaccord Genuity or any of its affiliated companies.
14	Other specific disclosures as described above.

Canaccord Genuity is the business name used by certain subsidiaries of Canaccord Financial Inc., including Canaccord Genuity Inc., Canaccord Genuity Limited, and Canaccord Genuity Corp.

The authoring analysts who are responsible for the preparation of this investment research are employed by Canaccord Genuity Corp. a Canadian broker-dealer with principal offices located in Vancouver, Calgary, Toronto, Montreal, or Canaccord Genuity Inc., a US broker-dealer with principal offices located in Boston, New York, San Francisco and Houston or Canaccord Genuity Limited., a UK broker-dealer with principal offices located in London and Edinburgh (UK).

In the event that this is compendium investment research (covering six or more relevant issuers), Canaccord Genuity and its affiliated companies may choose to provide specific disclosures of the subject companies by reference, as well as its policies and procedures regarding the dissemination of investment research. To access this material or for more information, please send a request to Canaccord Genuity Research, Attn:

Disclosures, P.O. Box 10337 Pacific Centre, 2200-609 Granville Street, Vancouver, BC, Canada V7Y 1H2 or [disclosures@canaccordgenuity.com](mailto:disclosures@canaccordgenuity.com).

The authoring analysts who are responsible for the preparation of this investment research have received (or will receive) compensation based upon (among other factors) the Corporate Finance/Investment Banking revenues and general profits of Canaccord Genuity. However, such authoring analysts have not received, and will not receive, compensation that is directly based upon or linked to one or more specific Corporate Finance/Investment Banking activities, or to recommendations contained in the investment research.

Canaccord Genuity and its affiliated companies may have a Corporate Finance/Investment Banking or other relationship with the company that is the subject of this investment research and may trade in any of the designated investments mentioned herein either for their own account or the accounts of their customers, in good faith or in the normal course of market making. Accordingly, Canaccord Genuity or their affiliated companies, principals or employees (other than the authoring analyst(s) who prepared this investment research) may at any time have a long or short position in any such designated investments, related designated investments or in options, futures or other derivative instruments based thereon.

Some regulators require that a firm must establish, implement and make available a policy for managing conflicts of interest arising as a result of publication or distribution of investment research. This investment research has been prepared in accordance with Canaccord Genuity's policy on managing conflicts of interest, and information barriers or firewalls have been used where appropriate. Canaccord Genuity's policy is available upon request.

The information contained in this investment research has been compiled by Canaccord Genuity from sources believed to be reliable, but (with the exception of the information about Canaccord Genuity) no representation or warranty, express or implied, is made by Canaccord Genuity, its affiliated companies or any other person as to its fairness, accuracy, completeness or correctness. Canaccord Genuity has not independently verified the facts, assumptions, and estimates contained herein. All estimates, opinions and other information contained in this investment research constitute Canaccord Genuity's judgement as of the date of this investment research, are subject to change without notice and are provided in good faith but without legal responsibility or liability.

**SHARE PRICE PERFORMANCE:****COMPANY DESCRIPTION:**

Fortis Inc. is a diversified, international electric utility holding company with assets over \$12.5 billion. Regulated holdings include electric distribution utilities in Alberta, BC, Ontario, Newfoundland, PEI and three Caribbean countries and a natural gas utility in BC. Fortis owns non-regulated generation assets across Canada and in Belize and New York State. It also owns and operates hotels and commercial real estate in Canada.

All amounts in C\$ unless otherwise noted.

**Infrastructure -- Utilities****BELIZE GOVERNMENT EXPRESSES INTEREST TO CONTROL BEL; NOT MATERIAL TO VALUE****Investment recommendation**

The Government of Belize publicly expressed its interest in purchasing majority shares in Belize Electricity Company (BEL) to assume control of the company. BEL is 70%-owned by Fortis and 25%-owned by the Government of Belize. As at this time, no purchase offer has been made to Fortis for shares of BEL. Fortis has stated in the past that it is not interested in holding a minority position in assets controlled by any government entity; this would also apply in this case. While we remain concerned that the Government may not offer a fair price for the assets, or may not purchase the entirety of Fortis' shares in BEL, we note that the Belize regulatory assets represent only around \$100-125 million or \$0.54-0.67 per share. Given the uncertainties stemming from a negative 2008 regulatory decision, we believe the market has already placed a significant discount on the BEL assets, which has been reflected in the stock. Consequently, we do not expect this issue to have a material impact on Fortis' stock price.

**Investment highlights**

- Maintain HOLD rating and C\$33.00 target price
- Total Belize Electricity Limited assets represent ~\$0.60 in value per share
  - Belize assets under-earning for past three years
  - No assumptions for positive decision going forward
  - Much of BEL value likely already discounted in current share price
- Potential Government control of BEL not very significant to value

Canaccord Genuity is the global capital markets group of Canaccord Financial Inc. (CF : TSX | CF. : AIM)

The recommendations and opinions expressed in this Investment Research accurately reflect the Investment Analyst's personal, independent and objective views about any and all the Designated Investments and Relevant Issuers discussed herein. For important information, please see the Important Disclosures section in the appendix of this document or visit Canaccord Genuity's [Online Disclosure Database](#).

**Valuation**

Our target price is derived from a combination of valuation metrics that include earnings and dividend yields relative to long-term interest rates, dividend discount models, and earnings and cash flow multiples relative to both historical valuation and its utility and pipeline peers.

**Summary**

The Government of Belize has stated its desire to own a controlling interest in BEL, a regulated utility 70%-owned by Fortis. As yet, Fortis has not received a proposal by the Government. While the Government has publicly announced its intention to 'purchase' majority shares in BEL, we remain concerned that Fortis may not receive a fair price. On previous occasions, Fortis has stated that it does not participate in minority holding of government-controlled assets, which further complicates the issue. We understand that the Belizean Government has already taken ownership of the telecommunications and water utility operations within the country, and has now set its sights on BEL. That said, we point out that Fortis' investment in BEL is ~\$100-125 million (\$0.54-0.67 per share). We also believe the market has placed a significant discount on the value of Fortis' investment in BEL. In 2008, the Belize Public Utilities Commission (PUC) issued a regulatory decision that resulted in a reduced rate of return by disallowing previously approved expenses and lowering the value of the rate base. BEL filed appeals, but the Belize Supreme Court has sided with the PUC. Since 2008, BEL has not been earning an appropriate return on its regulated Belizean assets.

We expect that the issues surrounding BEL will not be resolved in the near term, and an ultimate resolution may still be years away. The impact on the change in ownership at BEL should not be material to Fortis' stock. We note that Fortis has an additional ~\$160 million investment in non-regulated power assets in Belize. These assets are not in question, and to our knowledge the Government has been satisfied with Fortis' ownership and has never made an expression of interest regarding these assets. However, should these assets become a target of Government interest, it could potentially have a modestly negative impact on the value of the stock.

**Investment risks**

Some of the specific risk factors that pertain to the projected 6- to 12-month stock price target for Fortis are as follows: (1) price movement in electricity rates and commodities used for electricity generation could impact profitability; (2) international operations have currency rate exposure and liquidity risks associated with those currencies; (3) credit risk of contract counterparties could improve or deteriorate; (4) debt refinancing at different interest rates could impact the income of the company; (5) equipment failure or extreme weather conditions could adversely affect operating facilities; (6) change in public policy on

---

environmental health and safety risk could impose unexpected costs on Fortis; (7) change in regulatory or political climate could impact profitability and future growth and development of Fortis; (8) the inability to maintain, or to renew, the collective bargaining agreements with unionized workers on acceptable terms could result in increased labour costs or service interruptions arising from labour disputes; (9) economic conditions, which may impact demand for products and services, peer group valuation, access to capital, and share trading liquidity; and (10) Fortis holds investments in commercial real estate and hotel properties that are subject to operating risks associated with the industry.

---

**APPENDIX: IMPORTANT DISCLOSURES****Analyst Certification:**

"Risk-adjusted return" refers to the expected return in relation to the amount of risk associated with the designated investment or the relevant issuer.

**Risk Qualifier:**

**SPECULATIVE:** Stocks bear significantly higher risk that typically cannot be valued by normal fundamental criteria. Investments in the stock may result in material loss.

## Canaccord Research Disclosures as of 13 June 2011

Company	Disclosure
Fortis Inc.	7
1	The relevant issuer currently is, or in the past 12 months was, a client of Canaccord Genuity or its affiliated companies. During this period, Canaccord Genuity or its affiliated companies provided the following services to the relevant issuer: A. investment banking services. B. non-investment banking securities-related services. C. non-securities related services.
2	In the past 12 months, Canaccord Genuity or its affiliated companies have received compensation for Corporate Finance/Investment Banking services from the relevant issuer.
3	In the past 12 months, Canaccord Genuity or any of its affiliated companies have been lead manager, co-lead manager or co-manager of a public offering of securities of the relevant issuer or any publicly disclosed offer of securities of the relevant issuer or in any related derivatives.
4	Canaccord Genuity acts as corporate broker for the relevant issuer and/or Canaccord Genuity or any of its affiliated companies may have an agreement with the relevant issuer relating to the provision of Corporate Finance/Investment Banking services.
5	Canaccord Genuity or any of its affiliated companies is a market maker or liquidity provider in the securities of the relevant issuer or in any related derivatives.
6	In the past 12 months, Canaccord Genuity, its partners, affiliated companies, officers or directors, or any authoring analyst involved in the preparation of this investment research has provided services to the relevant issuer for remuneration, other than normal course investment advisory or trade execution services.
7	Canaccord Genuity intends to seek or expects to receive compensation for Corporate Finance/Investment Banking services from the relevant issuer in the next six months.
8	The authoring analyst, a member of the authoring analyst's household, or any individual directly involved in the preparation of this investment research, has a long position in the shares or derivatives, or has any other financial interest in the relevant issuer, the value of which increases as the value of the underlying equity increases.
9	The authoring analyst, a member of the authoring analyst's household, or any individual directly involved in the preparation of this investment research, has a short position in the shares or derivatives, or has any other financial interest in the relevant issuer, the value of which increases as the value of the underlying equity decreases.
10	Those persons identified as the author(s) of this investment research, or any individual involved in the preparation of this investment research, have purchased/received shares in the relevant issuer prior to a public offering of those shares, and such person's name and details are disclosed above.
11	A partner, director, officer, employee or agent of Canaccord Genuity and its affiliated companies, or a member of his/her household, is an officer, or director, or serves as an advisor or board member of the relevant issuer and/or one of its subsidiaries, and such person's name is disclosed above.
12	As of the month end immediately preceding the date of publication of this investment research, or the prior month end if publication is within 10 days following a month end, Canaccord Genuity or its affiliate companies, in the aggregate, beneficially owned 1% or more of any class of the total issued share capital or other common equity securities of the relevant issuer or held any other financial interests in the relevant issuer which are significant in relation to the investment research (as disclosed above).
13	As of the month end immediately preceding the date of publication of this investment research, or the prior month end if publication is within 10 days following a month end, the relevant issuer owned 1% or more of any class of the total issued share capital in Canaccord Genuity or any of its affiliated companies.
14	Other specific disclosures as described above.

Canaccord Genuity is the business name used by certain subsidiaries of Canaccord Financial Inc., including Canaccord Genuity Inc., Canaccord Genuity Limited, and Canaccord Genuity Corp.

The authoring analysts who are responsible for the preparation of this investment research are employed by Canaccord Genuity Corp. a Canadian broker-dealer with principal offices located in Vancouver, Calgary, Toronto, Montreal, or Canaccord Genuity Inc., a US broker-dealer with principal offices located in Boston, New York, San Francisco and Houston or Canaccord Genuity Limited., a UK broker-dealer with principal offices located in London and Edinburgh (UK).

In the event that this is compendium investment research (covering six or more relevant issuers), Canaccord Genuity and its affiliated companies may choose to provide specific disclosures of the subject companies by reference, as well as its policies and procedures regarding the dissemination of investment research. To access this material or for more information, please send a request to Canaccord Genuity Research, Attn:

Disclosures, P.O. Box 10337 Pacific Centre, 2200-609 Granville Street, Vancouver, BC, Canada V7Y 1H2 or [disclosures@canaccordgenuity.com](mailto:disclosures@canaccordgenuity.com).

The authoring analysts who are responsible for the preparation of this investment research have received (or will receive) compensation based upon (among other factors) the Corporate Finance/Investment Banking revenues and general profits of Canaccord Genuity. However, such authoring analysts have not received, and will not receive, compensation that is directly based upon or linked to one or more specific Corporate Finance/Investment Banking activities, or to recommendations contained in the investment research.

Canaccord Genuity and its affiliated companies may have a Corporate Finance/Investment Banking or other relationship with the company that is the subject of this investment research and may trade in any of the designated investments mentioned herein either for their own account or the accounts of their customers, in good faith or in the normal course of market making. Accordingly, Canaccord Genuity or their affiliated companies, principals or employees (other than the authoring analyst(s) who prepared this investment research) may at any time have a long or short position in any such designated investments, related designated investments or in options, futures or other derivative instruments based thereon.

Some regulators require that a firm must establish, implement and make available a policy for managing conflicts of interest arising as a result of publication or distribution of investment research. This investment research has been prepared in accordance with Canaccord Genuity's policy on managing conflicts of interest, and information barriers or firewalls have been used where appropriate. Canaccord Genuity's policy is available upon request.

The information contained in this investment research has been compiled by Canaccord Genuity from sources believed to be reliable, but (with the exception of the information about Canaccord Genuity) no representation or warranty, express or implied, is made by Canaccord Genuity, its affiliated companies or any other person as to its fairness, accuracy, completeness or correctness. Canaccord Genuity has not independently verified the facts, assumptions, and estimates contained herein. All estimates, opinions and other information contained in this investment research constitute Canaccord Genuity's judgement as of the date of this investment research, are subject to change without notice and are provided in good faith but without legal responsibility or liability.

Canaccord Genuity's salespeople, traders, and other professionals may provide oral or written market commentary or trading strategies to our clients and our proprietary trading desk that reflect opinions that are contrary to the opinions expressed in this investment research. Canaccord Genuity's affiliates, principal trading desk, and investing businesses may make investment decisions that are inconsistent with the recommendations or views expressed in this investment research.

This investment research is provided for information purposes only and does not constitute an offer or solicitation to buy or sell any designated investments discussed herein in any jurisdiction where such offer or solicitation would be prohibited. As a result, the designated investments discussed in this investment research may not be eligible for sale in some jurisdictions. This investment research is not, and under no circumstances should be construed as, a solicitation to act as a securities broker or dealer in any jurisdiction by any person or company that is not legally permitted to carry on the business of a securities broker or dealer in that jurisdiction. This material is prepared for general circulation to clients and does not have regard to the investment objectives, financial situation or particular needs of any particular person. Investors should obtain advice based on their own individual circumstances before making an investment decision. To the fullest extent permitted by law, none of Canaccord Genuity, its affiliated companies or any other person accepts any liability whatsoever for any direct or consequential loss arising from or relating to any use of the information contained in this investment research.

**For Canadian Residents:** This Investment Research has been approved by Canaccord Genuity Corp., which accepts sole responsibility for this Investment Research and its dissemination in Canada. Canadian clients wishing to effect transactions in any Designated Investment discussed should do so through a qualified salesperson of Canaccord Genuity Corp. in their particular jurisdiction.

**For United Kingdom Residents:** This investment research is distributed in the United Kingdom, as third party research by Canaccord Genuity Limited, which is authorized and regulated by the Financial Services Authority. This research is for distribution only to persons who are Eligible Counterparties or Professional Clients only and is exempt from the general restrictions in section 21 of the Financial Services and Markets Act 2000 on the communication of invitations or inducements to engage in investment activity on the grounds that it is being distributed in the United Kingdom only to persons of a kind described in Article 19(5) (Investment Professionals) and 49(2) (High Net Worth companies, unincorporated associations etc) of the Financial Services and Markets Act 2000 (Financial Promotion) Order 2005 (as amended). It is not intended to be distributed or passed on, directly or indirectly, to any other class of persons. This material is not for distribution in the United Kingdom to retail clients, as defined under the rules of the Financial Services Authority.

**For United States Residents:** Canaccord Genuity Inc., a US registered broker-dealer, accepts responsibility for this Investment Research and its dissemination in the United States. This Investment Research is intended for distribution in the United States only to certain US institutional investors. US clients wishing to effect transactions in any Designated

Investment discussed should do so through a qualified salesperson of Canaccord Genuity Inc. Analyst(s) preparing this report that are not employed by Canaccord Genuity Inc are resident outside the United States and are not associated persons or employees of any US regulated broker-dealer. Such analyst(s) may not be subject to Rule 2711 restrictions on communications with a subject company, public appearances and trading securities held by a research analyst account.

**For European Residents:** If this Investment Research is intended for disclosure in any jurisdiction other than the United Kingdom, the US or Canada, then the relevant rules and regulatory requirements of that jurisdiction will apply.

## SHARE PRICE PERFORMANCE:

## COMPANY DESCRIPTION:

Fortis Inc. is a diversified, international electric utility holding company with assets over \$12.5 billion. Regulated holdings include electric distribution utilities in Alberta, BC, Ontario, Newfoundland, PEI and three Caribbean countries and a natural gas utility in BC. Fortis owns non-regulated generation assets across Canada and in Belize and New York State. It also owns and operates hotels and commercial real estate in Canada.

All amounts in C\$ unless otherwise noted.

## Infrastructure -- Utilities

## GAZ METRO OFFER FOR CVPS PUTS KINK IN FORTIS' ACQUISITION PLANS

## Investment recommendation

Gaz Métro LP made an unsolicited bid of US\$35.25 per share for Central Vermont Public Service Corporation (CV : NYSE : US\$35.62 | Not rated), just above Fortis' recent offer of US\$35.10 per share. Despite Fortis' offer being more attractive for shareholders after accounting for the \$17.5-19.5 million break fee (~\$1.30-1.45 per CVPS share), stakeholders including the Vermont regulator may view the Gaz Métro bid more favourably as the company has existing operations in Vermont and has stated it can realize \$144 million in savings for ratepayers through the transaction. Fortis will await a decision from CVPS before indicating any further actions.

Separately, Fortis has received an order of expropriation from the Government of Belize for its 70% ownership in Belize Electric Ltd (BEL). The government has not yet presented Fortis with a price. Fortis' investment in BEL is ~\$125 million or \$0.67 per share. We note there is a possibility the company incurs a loss by not receiving full value for its investment. Given the uncertainty surrounding the outcomes of the BEL expropriation and the proposed acquisition of CVPS, we are taking a more conservative view. Consequently, we are lowering our target price modestly to \$32.00 from \$33.00 until we see more clarity on the current issues. We are maintaining our HOLD rating.

Canaccord Genuity is the global capital markets group of Canaccord Financial Inc. (CF : TSX | CF. : AIM)

The recommendations and opinions expressed in this Investment Research accurately reflect the Investment Analyst's personal, independent and objective views about any and all the Designated Investments and Relevant Issuers discussed herein. For important information, please see the Important Disclosures section in the appendix of this document or visit Canaccord Genuity's [Online Disclosure Database](#).

**Investment highlights**

- Gaz Métro made unsolicited bid for CVPS
  - Less attractive to CVPS shareholders
    - After accounting for \$1.30-1.45/share break fee and dividend considerations
  - But more attractive to ratepayers and regulators
    - Gaz Métro providing \$144 million of benefits over ten years to ratepayers vs. Fortis' US\$21 million
- Fortis awaiting decision from CVPS before any further action
- Government of Belize to expropriate BEL
  - Uncertainty over compensation to be received
  - Fortis' investment in BEL represents ~\$0.67 per share value
- Lowering target price \$1 to \$32 due to uncertainty revolving issues

**Valuation**

Our target price is derived from a combination of valuation metrics that include earnings and dividend yields relative to long-term interest rates, dividend discount models, and earnings and cash flow multiples relative to both historical valuation and Fortis' utility and pipeline peers.

**A tale of two offers and a lot of uncertainty**

Gaz Métro's hostile bid (the unsolicited offer) of \$35.25 per CVPS share is a slight increase to Fortis' original \$35.10 offer price on May 30, 2011 of which the CVPS Board supported. We note the \$0.15 premium is less than a 0.5% increase to Fortis' per share offer and does not compensate for the \$17.5 - \$19.5 million break fee CVPS shareholders would be required to pay (~\$1.30-1.45 per share). In its conference call, Gaz Métro's management stated that the company would not pay the break fee as part of their offer. Gaz Métro's bid includes the payment of the \$0.23 CVPS quarterly dividend through the close of the offer compared to the Fortis bid which would include dividend payments for two quarters plus an additional \$0.01 per share for each subsequent quarter until close. Both companies have indicated they expect the transaction to close within 6-12 months. In order for the higher dividends proposed by Gaz Métro to offset the break fee, the approval process would have to take approximately 21 months or more. We believe this is unlikely. Consequently, we believe the Fortis bid to be a better option for the CVPS shareholders.

That being said, Gaz Métro's unsolicited offer includes some sweeteners which may be attractive to other stakeholders. Gaz Métro is already invested in Vermont through its wholly-owned Green Mountain Power (Vermont's second largest utility). It intends to provide savings for rate payers through investment and synergies of US\$144 million over a ten year period after the acquisition. A majority of those savings will likely be passed on to ratepayers, although a

---

sharing mechanism may be negotiated through the regulator. Fortis has not provided matching concessions. Even if the Fortis offer is accepted by shareholders, there exists a risk that the regulator could deny the approval of the transaction, or may limit the recovery of some costs to mimic the synergies the Gaz Métro accomplishes and could potentially cause CVPS to generate a lower return for Fortis.

What the final outcome will be is uncertain. The Board of CVPS is now reviewing the Gaz Métro offer and Fortis has indicated it will monitor the situation and respond in due course to decisions made after the CVPS review.

#### **The Belize Electric expropriation**

Not surprisingly, on June 20, 2011 the Government of Belize issued an order to expropriate Fortis' 70% interest in BEL. Note, that a week earlier the government had expressed interest in acquiring control of the assets (see *Daily Letter*, June 13, 2011). As of yet, compensation for the assets remain in question as no offer or agreement has been announced. We remain concerned that Fortis may not receive a fair price on the assets. We highlight however, the company's total equity investment in BEL is approximately \$100-125 million and that BEL's debt is non-recourse to Fortis. This represents a small portion of the enterprise and at worst case the company stands to lose ~\$0.67 per share.

In addition, Fortis owns the non-regulated Belize Electric Company which consists of three hydroelectric generating facilities. The company's total investment in these assets is approximately ~\$160 million. There has been no indication from the government on the expropriation of these assets. However, we note there may be an additional overhang on the stock due to the uncertainty regarding the situation.

#### **Investment risks**

Some of the specific risk factors that pertain to the projected 6- to 12-month stock price target for Fortis are as follows: (1) price movement in electricity rates and commodities used for electricity generation could impact profitability; (2) international operations have currency rate exposure and liquidity risks associated with those currencies; (3) credit risk of contract counterparties could improve or deteriorate; (4) debt refinancing at different interest rates could impact the income of the company; (5) equipment failure or extreme weather conditions could adversely affect operating facilities; (6) change in public policy on environmental health and safety risk could impose unexpected costs on Fortis; (7) change in regulatory or political climate could impact profitability and future growth and development of Fortis; (8) the inability to maintain, or to renew, the collective bargaining agreements with unionized workers on acceptable terms could result in increased labour costs or service interruptions arising from labour disputes; (9) economic conditions which may impact demand for products and

---

services, peer group valuation, access to capital and share trading liquidity; (10) Fortis holds investments in commercial real estate and hotel properties which are subject to operating risks associated with the industry.

---

**APPENDIX: IMPORTANT DISCLOSURES****Analyst Certification:**

Each authoring analyst of Canaccord Genuity whose name appears on the front page of this investment research hereby certifies that (i) the recommendations and opinions expressed in this investment research accurately reflect the authoring analyst's personal, independent and objective views about any and all of the designated investments or relevant issuers discussed herein that are within such authoring analyst's coverage universe and (ii) no part of the authoring analyst's compensation was, is, or will be, directly or indirectly, related to the specific recommendations or views expressed by the authoring analyst in the investment research.

**Site Visit:**

An analyst has visited Fortis's material operations in BC. No payment or reimbursement was received from the issuer for related travel costs.

## Infrastructure -- Utilities

## CVPS ACQUISITION TERMINATED

## Investment recommendation

Fortis announced that its merger agreement with Central Vermont Public Service (CVPS) has been terminated. The Board of CVPS has deemed that the unsolicited bid by Gaz Métro LP is a superior proposal and has terminated the merger agreement between Fortis and CVPS. Fortis has opted not to increase its offer and has instead elected to receive the \$17.5 million termination fee and \$2 million of associated expenses.

## Investment highlights

- Merger agreement between Fortis and CVPS has been terminated
  - Fortis will not improve its offer for CVPS
  - Fortis will receive \$19.5 million in fees and expenses (\$0.11 per share)
- No change to C\$32.00 target or HOLD rating

## Valuation

Our target price is derived from a combination of valuation metrics that include earnings and dividend yields relative to long-term interest rates, dividend discount models, and earnings and cash flow multiples relative to both historical valuation and Fortis' utility and pipeline peers.

## Summary

Fortis announced that it will not sweeten its bid for Central Vermont Public Service (CVPS) following the Gaz Métro LP offer, and the merger agreement between Fortis and CVPS will be terminated. The Board of CVPS has determined that the proposal from Gaz Metro was a superior proposal. Originally, Fortis had five business days to change its offer before the

agreement was terminated under the terms of the merger agreement, but instead, decided to waive the five-day period and to immediately receive its \$17.5 million termination fee and \$2 million of associated expenses.

We commend the management of Fortis for its disciplined acquisition approach. The initial bid of \$700 million represented about a 40% premium to rate base, which we viewed as a significant premium. However, this was partly offset by the high rate base growth profile of CVPS for the next several years, which could shrink the premium over time. We did not believe a sweetened bid would make sense for Fortis. While we did not believe Gaz Métro's offer was superior from a shareholder perspective, it provides savings for rate payers through investment and synergies of US\$144 million over a 10- year period following the acquisition. A majority of those savings will likely be passed on to ratepayers, although a sharing mechanism may be negotiated through the regulator. We suspect that the Gaz Métro bid would have been favoured by the regulator, which raised the regulatory risk had Fortis won. Consequently, we believe Fortis's decision to withdraw from the process was the right thing to do. We previously reduced our target by \$1.00 to \$32.00, in part due to the uncertainty surrounding the acquisition, and at this point are making no further change to our target price.

#### **Investment risks**

Some of the specific risk factors that pertain to the projected 6- to 12-month stock price target for Fortis are as follows: (1) price movement in electricity rates and commodities used for electricity generation could impact profitability; (2) international operations have currency rate exposure and liquidity risks associated with those currencies; (3) credit risk of contract counterparties could improve or deteriorate; (4) debt refinancing at different interest rates could impact the income of the company; (5) equipment failure or extreme weather conditions could adversely affect operating facilities; (6) change in public policy on environmental health and safety risk could impose unexpected costs on Fortis; (7) change in regulatory or political climate could impact profitability and future growth and development of Fortis; (8) the inability to maintain, or to renew, the collective bargaining agreements with unionized workers on acceptable terms could result in increased labour costs or service interruptions arising from labour disputes; (9) economic conditions, which may impact demand for products and services, peer group valuation, access to capital, and share trading liquidity; (10) Fortis holds investments in commercial real estate and hotel properties, which are subject to operating risks associated with the industry.

**Canaccord Ratings System:**

**BUY:** The stock is expected to generate risk-adjusted returns of over 10% during the next 12 months.

**HOLD:** The stock is expected to generate risk-adjusted returns of 0-10% during the next 12 months.

**SELL:** The stock is expected to generate negative risk-adjusted returns during the next 12 months.

**NOT RATED:** Canaccord Genuity does not provide research coverage of the relevant issuer.

"Risk-adjusted return" refers to the expected return in relation to the amount of risk associated with the designated investment or the relevant issuer.

**Risk Qualifier:**

**SPECULATIVE:** Stocks bear significantly higher risk that typically cannot be valued by normal fundamental criteria. Investments in the stock may result in material loss.

## Canaccord Research Disclosures as of 12 July 2011

Company	Disclosure
Fortis Inc.	7
1	The relevant issuer currently is, or in the past 12 months was, a client of Canaccord Genuity or its affiliated companies. During this period, Canaccord Genuity or its affiliated companies provided the following services to the relevant issuer: A. investment banking services. B. non-investment banking securities-related services. C. non-securities related services.
2	In the past 12 months, Canaccord Genuity or its affiliated companies have received compensation for Corporate Finance/Investment Banking services from the relevant issuer.
3	In the past 12 months, Canaccord Genuity or any of its affiliated companies have been lead manager, co-lead manager or co-manager of a public offering of securities of the relevant issuer or any publicly disclosed offer of securities of the relevant issuer or in any related derivatives.
4	Canaccord Genuity acts as corporate broker for the relevant issuer and/or Canaccord Genuity or any of its affiliated companies may have an agreement with the relevant issuer relating to the provision of Corporate Finance/Investment Banking services.
5	Canaccord Genuity or any of its affiliated companies is a market maker or liquidity provider in the securities of the relevant issuer or in any related derivatives.
6	In the past 12 months, Canaccord Genuity, its partners, affiliated companies, officers or directors, or any authoring analyst involved in the preparation of this investment research has provided services to the relevant issuer for remuneration, other than normal course investment advisory or trade execution services.
7	Canaccord Genuity intends to seek or expects to receive compensation for Corporate Finance/Investment Banking services from the relevant issuer in the next six months.
8	The authoring analyst, a member of the authoring analyst's household, or any individual directly involved in the preparation of this investment research, has a long position in the shares or derivatives, or has any other financial interest in the relevant issuer, the value of which increases as the value of the underlying equity increases.
9	The authoring analyst, a member of the authoring analyst's household, or any individual directly involved in the preparation of this investment research, has a short position in the shares or derivatives, or has any other financial interest in the relevant issuer, the value of which increases as the value of the underlying equity decreases.
10	Those persons identified as the author(s) of this investment research, or any individual involved in the preparation of this investment research, have purchased/received shares in the relevant issuer prior to a public offering of those shares, and such person's name and details are disclosed above.
11	A partner, director, officer, employee or agent of Canaccord Genuity and its affiliated companies, or a member of his/her household, is an officer, or director, or serves as an advisor or board member of the relevant issuer and/or one of its subsidiaries, and such person's name is disclosed above.
12	As of the month end immediately preceding the date of publication of this investment research, or the prior month end if publication is within 10 days following a month end, Canaccord Genuity or its affiliate companies, in the aggregate, beneficially owned 1% or more of any class of the total issued share capital or other common equity securities of the relevant issuer or held any other financial interests in the relevant issuer which are significant in relation to the investment research (as disclosed above).
13	As of the month end immediately preceding the date of publication of this investment research, or the prior month end if publication is within 10 days following a month end, the relevant issuer owned 1% or more of any class of the total issued share capital in Canaccord Genuity or any of its affiliated companies.
14	Other specific disclosures as described above.

Canaccord Genuity is the business name used by certain subsidiaries of Canaccord Financial Inc., including Canaccord Genuity Inc., Canaccord Genuity Limited, and Canaccord Genuity Corp.

The authoring analysts who are responsible for the preparation of this investment research are employed by Canaccord Genuity Corp. a Canadian broker-dealer with principal offices located in Vancouver, Calgary, Toronto, Montreal, or Canaccord Genuity Inc., a US broker-dealer with principal offices located in Boston, New York, San Francisco and Houston or Canaccord Genuity Limited., a UK broker-dealer with principal offices located in London and Edinburgh (UK).

In the event that this is compendium investment research (covering six or more relevant issuers), Canaccord Genuity and its affiliated companies may choose to provide specific disclosures of the subject companies by reference, as well as its policies and procedures regarding the dissemination of investment research. ### SHARE PRICE PERFORMANCE:

### COMPANY DESCRIPTION:

Fortis Inc. is a diversified, international electric utility holding company with assets over \$12.5 billion. Regulated holdings include electric distribution utilities in Alberta, BC, Ontario, Newfoundland, PEI and three Caribbean countries and a natural gas utility in BC. Fortis owns non-regulated generation assets across Canada and in Belize and New York State. It also owns and operates hotels and commercial real estate in Canada.

All amounts in C\$ unless otherwise noted.

### Infrastructure -- Utilities

## Q2 A BIT LIGHT; CARIBBEAN OPERATIONS REMAIN AN OVERHANG

### Investment recommendation

Fortis reported second-quarter recurring earnings of \$0.32 per share, a few cents below the consensus estimate. For the first half of the year, recurring earnings per share were \$0.98 and are on track to meet our \$1.70 EPS estimate. The company has a \$5.7 billion capital spending program for the 2011-2015 timeframe, which should provide earnings growth in its Canadian regulated utility operations. However, due to anticipated lower Caribbean earnings contributions and issues surrounding the company's Belizean assets, we are lowering our target price by \$1 to C\$31.00. We continue to rate the stock a HOLD.

### Investment highlights

- Lowering target to C\$31.00 from C\$32.00, but maintain HOLD rating
- 2012 EPS estimate lowered by \$0.05 to \$1.75
- Q2 recurring EPS of \$0.32, modestly below expectations
  - Lower contribution from Caribbean regulated and Properties divisions; low hydrology at Belize non-regulated, offset by growth from capital additions in western Canadian utility operations
- Five year capital program up \$200 million to \$5.7 billion

Canaccord Genuity is the global capital markets group of Canaccord Financial Inc. (CF : TSX | CF. : AIM)

The recommendations and opinions expressed in this Investment Research accurately reflect the Investment Analyst's personal, independent and objective views about any and all the Designated Investments and Relevant Issuers discussed herein. For important information, please see the Important Disclosures section in the appendix of this document or visit Canaccord Genuity's [Online Disclosure Database](#).

**Valuation**

We are lowering our target price on the shares of Fortis to C\$31.00 from C\$32.00. Our target price is derived from a combination of valuation metrics that include earnings and dividend yields relative to long-term interest rates, dividend discount models, and earnings and cash flow multiples relative to both historical valuation and Fortis' utility and pipeline peers.

**Outlook**

We are maintaining our 2011 EPS estimate of \$1.70 but are lowering our 2012 EPS estimate modestly to \$1.75 from \$1.80. While earnings in the second quarter were slightly lower than our expectations, earnings in the first half of the year are on track to meet our \$1.70 per share estimate. However, the company continues to face some pushback at its Caribbean operations. The Government of Belize recently expropriated the company's investment in Belize Electricity (net assets of \$112 million, or \$0.60 per share) Fortis has initiated proceedings to receive compensation from the Government of Belize for its investment and the associated loss is likely well less than its \$0.60 investment. The recent move by the Government of Belize raises the possibility of further expropriation of the company's Belize Electric Company Limited (BECOL). However, we note that the Government of Belize has publicly indicated that it does not intend to expropriate BECOL and that Fortis is limited to its \$150 million (or \$0.80 per share) investment in BECOL. Also in the Caribbean, the Government of the Turks & Caicos plans to implement a carbon tax which is not recoverable in rates. The impact on Fortis's earnings is estimated at \$1 million in 2011 and \$2-3 million in 2012 if the carbon tax is implemented.

While we expect the company's earnings to benefit from the \$1.2 billion of capital expenditures in 2011 (mostly spent on western Canada regulated operations) and \$4.5 billion expected to be spent in the 2012-2015 period, 2012 earnings may experience a slightly lower contribution from regulated Caribbean operations (due to no earnings in 2012 from Belize Electricity versus a half year in 2011) and the dilutive impact of the 10.3 million common share issuance that closed in June.

We believe earnings growth could be further enhanced if Fortis were to acquire additional utility assets. The company continues to look for electric and gas utility acquisitions in Canada and the United States, and as evidenced by its refusal to increase its offer for Central Vermont Public Services last month, has a track record of remaining disciplined in achieving its required investment criteria.

**Second-quarter earnings summary**

Fortis reported second-quarter recurring earnings per share of \$0.32 compared to \$0.32 the year before, a couple of cents shy of our \$0.34 estimate and the \$0.35 consensus estimate. The slight miss was mainly attributed to lower contributions from the company's non-regulated operations. Non-regulated power generation provided lower earnings as a result of decreased production in Belize owing to less rainfall compared to the previous year. In addition, Fortis Properties experienced lower occupancy rates at its hotels combined with higher operating expenses. On the regulated side, earnings from the company's gas operations in BC declined year over year due to the timing of expenses, likely to be recovered in the second half of the year. This was offset by additional earnings at FortisAlberta driven by a growing rate base and a higher allowable return at Algoma Power in the 'Other Canadian Regulated Utilities' segment. Year-to-date recurring earnings

---

per share is \$0.98, above the \$0.91 reported in the first half of 2010. For additional details on the second quarter results please refer to Figure 1.

**Noteworthy items**

- BEL expropriation
    - Assets represent \$112 million (\$0.60 per share)
    - No indication from Government of Belize to expropriate non-regulated BECOL
      - Wholly owned by Fortis
      - \$150 million of assets (\$0.80 per share)
  - Turks and Caicos government plans to implement carbon tax in Sept 2011
    - Not a flow through cost to rate payers
    - ~\$1 M unfavourable earnings impact for 2011; ~\$2-3 M annually
  - Received US\$19.5 M (\$18.8 M) for termination of Merger Agreement between Central Vermont Public Service.
    - \$17.5 M break fee - to be recognized in Q3
    - \$2 M recovery of associated expenses
  - Expected capex of \$5.7 B over five-year period (2011-2015)
    - Previously \$5.5 B
      - Change reflects increase at Fortis BC Energy companies and exclusion of previously planned BEL capex
    - \$3.5 B (61%) for regulated electric utilities
    - \$1.3 B (23%) for regulated gas utilities
    - \$0.9 B (16%) for non-regulated operations
  - Will report according to US GAAP beginning January 2012
-

**COMPANY DESCRIPTION:**

Fortis Inc. is a diversified, international electric utility holding company with assets over \$12.5 billion. Regulated holdings include electric distribution utilities in Alberta, BC, Ontario, Newfoundland, PEI and three Caribbean countries and a natural gas utility in BC. Fortis owns non-regulated generation assets across Canada and in Belize and New York State. It also owns and operates hotels and commercial real estate in Canada.

All amounts in C\$ unless otherwise noted.

Our C\$33.00 target price is derived from a combination of valuation metrics that include earnings and dividend yields relative to long-term interest rates, dividend discount models and earnings and cash flow multiples relative to both historical valuation and Fortis' utility and pipeline peers.

**Infrastructure -- Utilities****STEADY AND STABLE -- Q3 RESULTS IN-LINE****Investment recommendation**

Fortis Inc. reported third quarter earnings of \$0.24 per share versus \$0.23 reported in Q3/10, in line with expectations. The company's earnings have benefited from ~\$600 million of capital expenditures in the utility businesses this year, which has mainly been invested in western Canadian utility operations. In total, capex is forecast to reach \$1.2 billion for 2011 across all segments (\$806 million spent to date), and \$5.7 billion budgeted for the five-year period, 2011 through 2015. With approximately 90% of the company's earnings generated from utility operations, rate base additions within the utility segments are expected to be the primary drivers of earnings growth. As a result, we expect to see consistent and stable growth in earnings and dividends going forward. However, we note that the company continues to pursue acquisitions of U.S.-based utility assets which could potentially have an impact on future earnings growth. We are maintaining our HOLD rating and 12-month C\$33.00 target price.

**Investment highlights**

- Reported Q3 recurring EPS of \$0.24, in line with consensus
- Maintaining HOLD rating and C\$33.00 target price
- No changes to 2011 and 2012 EPS estimates
  - 2011 EPS estimate: \$1.70
  - 2012 EPS estimate: \$1.75
- Received a C\$18.8 million (\$11 million after-tax) termination fee for the unsuccessful Central Vermont Public Service (CVPS) acquisition bid
- Belize Electricity expropriation compensation proceedings are ongoing with the Belize government
  - \$112 million book value
  - No earnings recorded this quarter; \$2 million contribution in Q3 last year

Canaccord Genuity is the global capital markets group of Canaccord Financial Inc. (CF : TSX | CF. : AIM)

**Valuation**

We are maintaining our 12-month target price for Fortis at C\$33.00. Our target price is derived from a combination of valuation metrics that include earnings and dividend yields relative to long-term interest rates, dividend discount models and earnings and cash flow multiples relative to both historical valuation and Fortis' utility and pipeline peers.

**Outlook**

We are making no changes to our 2011 and 2012 earnings per share estimates of \$1.70 and \$1.75, respectively. The company's capex program in the utilities segment, primarily in western Canada, has been the driving force of earnings growth this year, and should continue to do so through 2015. Fortis' capital expenditure budget remains unchanged with the company planning to spend \$5.7 billion from 2011 through 2015, of which \$4.8 billion is toward its electric and gas utilities (mainly in BC and Alberta). This should help provide relatively steady growth in earnings throughout the period. The company's Caribbean operations continue to face challenges which have limited the segment's contribution in recent years. Fortis has not received compensation for the Belize Electric assets expropriated in June this year. Proceedings to determine a value are ongoing and we note that the potential loss is limited to its book value (\$112 million net asset value or \$0.60 per share). While we believe the company will receive some compensation for Belize Electric, we do not expect a resolution in the near-term.

In addition to organic growth projects, the company continues to seek potential acquisitions. Although the company's recent offer for Central Vermont Public Service was not consummated, earnings and cash flow benefited from the \$18.8 million (US\$17.5 million) termination fee. More important, we were pleased to see management remain focused and disciplined and withdraw from the process when the transaction price was bid higher. Management continues to look for regulated natural gas and electric operations in the United States and believes it has the capability to finance up to a \$5 billion acquisition (enterprise value) on its balance sheet, but would consider a financial partner for larger acquisitions.

**Third quarter earnings summary**

Fortis reported third quarter recurring earnings per share of \$0.24, in line with both our and the consensus estimate of \$0.23. Regulated earnings were \$5 million (\$0.03 per share) higher compared to the same period last year. A bulk of the improvement was driven by rate base capital expenditures at FortisBC Energy (formerly Terasen) and Fortis Alberta. The increases were partially offset by the loss of ~\$2 million (\$0.01 per share) of earnings from the expropriation of Belize Electric. The company's non-regulated operations performed in line with last year during the same period. Note that we removed the one-time \$18.8 million (\$11 million after-tax) payment received from the termination of the CVPS Merger Agreement and \$2.5 million on unrealized non-cash foreign exchange gains. For the third quarter, the company reported net earnings per share of \$0.31 versus \$0.26 last year. For the first nine months of the year, the recurring earnings per share was \$1.30, ahead of the \$1.16 recorded last year. For additional details on third quarter results, please refer to Figure 1.

---

**Noteworthy items**

- CVPS termination fee CAD\$18.8 million
    - US\$17.5 million
    - Also received US\$2 million for transaction expenses
  - Acquired 160-room full-service Hilton Suites Winnipeg Airport hotel for \$25 million
  - Received municipal approval to construct \$50 million office building
    - 12-storeys in downtown St. John
    - Construction expected to be complete in 2H/13
  - Regulatory
    - Fortis BC Energy gas companies
      - Filed updated 2012-2013 rate applications in September 2011
        - Decision expected in late Q1/12
      - Filed application to amalgamate the three FortisBC Energy gas companies
    - Newfoundland Power completed the sale of joint-use poles back to Bell Aliant (BA : TSX | HOLD)
      - Will use funds to pay down debt
    - Caribbean Utilities
      - Expects to file 2012-2016 capital investment plan in Q4/11
      - Will sign PPAs to accept up to 13 MW of renewable power from IPPs
    - Fortis Turks and Caicos
      - Filed a request for a change in the rate structure and a 6% increase in base rates
      - Carbon tax expected to be implemented September 2011
        - Has not yet been implemented
-

The authoring analysts who are responsible for the preparation of this investment research have received (or will receive) compensation based upon (among other factors) the Corporate Finance/Investment Banking

revenues and general profits of Canaccord Genuity. However, such authoring analysts have not received, and will not receive, compensation that is directly based upon or linked to one or more specific Corporate Finance/Investment Banking activities, or to recommendations contained in the investment research. Canaccord Genuity and its affiliated companies may have a Corporate Finance/Investment Banking or other relationship with the company that is the subject of this investment research and may trade in any of the designated investments mentioned herein either for their own account or the accounts of their customers, in good faith or in the normal course of market making. Accordingly, Canaccord Genuity or their affiliated companies, principals or employees (other than the authoring analyst(s) who prepared this investment research) may at any time have a long or short position in any such designated investments, related designated investments or in options, futures or other derivative instruments based thereon.

Some regulators require that a firm must establish, implement and make available a policy for managing conflicts of interest arising as a result of publication or distribution of investment research. This investment research has been prepared in accordance with Canaccord Genuity's policy on managing conflicts of interest, and information barriers or firewalls have been used where appropriate. Canaccord Genuity's policy is available upon request.

The information contained in this investment research has been compiled by Canaccord Genuity from sources believed to be reliable, but (with the exception of the information about Canaccord Genuity) no representation or warranty, express or implied, is made by Canaccord Genuity, its affiliated companies or any other person as to its fairness, accuracy, completeness or correctness. Canaccord Genuity has not independently verified the facts, assumptions, and estimates contained herein. All estimates, opinions and other information contained in this investment research constitute Canaccord Genuity's judgement as of the date of this investment research, are subject to change without notice and are provided in good faith but without legal responsibility or liability.

Canaccord Genuity's salespeople, traders, and other professionals may provide oral or written market commentary or trading strategies to our clients and our proprietary trading desk that reflect opinions that are contrary to the opinions expressed in this investment research. Canaccord Genuity's affiliates, principal trading desk, and investing businesses may make investment decisions that are inconsistent with the recommendations or views expressed in this investment research.

This investment research is provided for information purposes only and does not constitute an offer or solicitation to buy or sell any designated investments discussed herein in any jurisdiction where such offer or solicitation would be prohibited. As a result, the designated investments discussed in this investment research may not be eligible for sale in some jurisdictions. This investment research is not, and under no circumstances should be construed as, a solicitation to act as a securities broker or dealer in any jurisdiction by any person or company that is not legally permitted to carry on the business of a securities broker or dealer in that jurisdiction. This material is prepared for general circulation to clients and does not have regard to the investment objectives, financial situation or particular needs of any particular person. Investors should obtain advice based on their own individual circumstances before making an investment decision. To the fullest extent permitted by law, none of Canaccord Genuity, its affiliated companies or any other person accepts any liability whatsoever for any direct or consequential loss arising from or relating to any use of the information contained in this investment research.

**For Canadian Residents:** This Investment Research has been approved by Canaccord Genuity Corp., which accepts sole responsibility for this Investment Research and its dissemination in Canada. Canadian clients wishing to effect transactions in any Designated Investment discussed should do so through a qualified salesperson of Canaccord Genuity Corp. in their particular jurisdiction.

**For United Kingdom Residents:** This investment research is distributed in the United Kingdom, as third party research by Canaccord Genuity Limited, which is authorized and regulated by the Financial Services Authority. This research is for distribution only to persons who are Eligible Counterparties or Professional Clients only and is exempt from the general restrictions in section 21 of the Financial Services and Markets Act 2000 on the communication of invitations or inducements to engage in investment activity on the grounds that it is being distributed in the United Kingdom only to persons of a kind described in Article 19(5) (Investment Professionals) and 49(2) (High Net Worth companies, unincorporated associations etc) of the Financial Services and Markets Act 2000 (Financial Promotion) Order 2005 (as amended). It is not intended to be distributed or passed on, directly or indirectly, to any other class of persons. This material is not for distribution in the United Kingdom to retail clients, as defined under the rules of the Financial Services Authority.

**For United States Residents:** Canaccord Genuity Inc., a US registered broker-dealer, accepts responsibility for this Investment Research and its dissemination in the United States. This Investment Research is intended for distribution in the United States only to certain US institutional investors. US clients wishing to effect transactions in any Designated Investment discussed should do so through a qualified salesperson of Canaccord Genuity Inc. Analyst(s) preparing this report that are not employed by Canaccord Genuity Inc are resident outside the United States and are not associated persons or employees of any US regulated broker-dealer. Such analyst(s) may not be subject to Rule 2711 restrictions on communications with a subject company, public appearances and trading

securities held by a research analyst account.

**For European Residents:** If this Investment Research is intended for disclosure in any jurisdiction other than the United Kingdom, the US or Canada, then the relevant rules and regulatory requirements of that jurisdiction will apply.

**SHARE PRICE PERFORMANCE:**

Source: Interactive Data Corporation

**COMPANY DESCRIPTION:**

Fortis Inc. is a diversified, international electric utility holding company with assets over \$12.5 billion. Regulated holdings include electric distribution utilities in Alberta, BC, Ontario, Newfoundland, PEI and three Caribbean countries and a natural gas utility in BC. Fortis owns non-regulated generation assets across Canada and in Belize and New York State. It also owns and operates hotels and commercial real estate in Canada.

All amounts in C\$ unless otherwise noted.

Our C\$33.00 target price is derived from a combination of valuation metrics that include earnings and dividend yields relative to long-term interest rates, dividend discount models and earnings and cash flow multiples relative to both historical valuation and Fortis' utility and pipeline peers.

**Infrastructure -- Utilities****STEADY AND STABLE -- Q3 RESULTS IN-LINE****Investment recommendation**

Fortis Inc. reported third quarter earnings of \$0.24 per share versus \$0.23 reported in Q3/10, in line with expectations. The company's earnings have benefited from ~\$600 million of capital expenditures in the utility businesses this year, which has mainly been invested in western Canadian utility operations. In total, capex is forecast to reach \$1.2 billion for 2011 across all segments (\$806 million spent to date), and \$5.7 billion budgeted for the five-year period, 2011 through 2015. With approximately 90% of the company's earnings generated from utility operations, rate base additions within the utility segments are expected to be the primary drivers of earnings growth. As a result, we expect to see consistent and stable growth in earnings and dividends going forward. However, we note that the company continues to pursue acquisitions of U.S.-based utility assets which could potentially have an impact on future earnings growth. We are maintaining our HOLD rating and 12-month C\$33.00 target price.

**Investment highlights**

- Reported Q3 recurring EPS of \$0.24, in line with consensus
- Maintaining HOLD rating and C\$33.00 target price
- No changes to 2011 and 2012 EPS estimates
  - 2011 EPS estimate: \$1.70
  - 2012 EPS estimate: \$1.75
- Received a C\$18.8 million (\$11 million after-tax) termination fee for the unsuccessful Central Vermont Public Service (CVPS) acquisition bid
- Belize Electricity expropriation compensation proceedings are ongoing with the Belize government
  - \$112 million book value
  - No earnings recorded this quarter; \$2 million contribution in Q3 last year

Canaccord Genuity is the global capital markets group of Canaccord Financial Inc. (CF : TSX | CF. : AIM)

The recommendations and opinions expressed in this Investment Research accurately reflect the Investment Analyst's personal, independent and objective views about any and all the Designated Investments and Relevant Issuers discussed herein. For important information, please see the Important Disclosures section in the appendix of this document or visit Canaccord Genuity's [Online Disclosure Database](#).

**Valuation**

We are maintaining our 12-month target price for Fortis at C\$33.00. Our target price is derived from a combination of valuation metrics that include earnings and dividend yields relative to long-term interest rates, dividend discount models and earnings and cash flow multiples relative to both historical valuation and Fortis' utility and pipeline peers.

**Outlook**

We are making no changes to our 2011 and 2012 earnings per share estimates of \$1.70 and \$1.75, respectively. The company's capex program in the utilities segment, primarily in western Canada, has been the driving force of earnings growth this year, and should continue to do so through 2015. Fortis' capital expenditure budget remains unchanged with the company planning to spend \$5.7 billion from 2011 through 2015, of which \$4.8 billion is toward its electric and gas utilities (mainly in BC and Alberta). This should help provide relatively steady growth in earnings throughout the period. The company's Caribbean operations continue to face challenges which have limited the segment's contribution in recent years. Fortis has not received compensation for the Belize Electric assets expropriated in June this year. Proceedings to determine a value are ongoing and we note that the potential loss is limited to its book value (\$112 million net asset value or \$0.60 per share). While we believe the company will receive some compensation for Belize Electric, we do not expect a resolution in the near-term.

In addition to organic growth projects, the company continues to seek potential acquisitions. Although the company's recent offer for Central Vermont Public Service was not consummated, earnings and cash flow benefited from the \$18.8 million (US\$17.5 million) termination fee. More important, we were pleased to see management remain focused and disciplined and withdraw from the process when the transaction price was bid higher. Management continues to look for regulated natural gas and electric operations in the United States and believes it has the capability to finance up to a \$5 billion acquisition (enterprise value) on its balance sheet, but would consider a financial partner for larger acquisitions.

**Third quarter earnings summary**

Fortis reported third quarter recurring earnings per share of \$0.24, in line with both our and the consensus estimate of \$0.23. Regulated earnings were \$5 million (\$0.03 per share) higher compared to the same period last year. A bulk of the improvement was driven by rate base capital expenditures at FortisBC Energy (formerly Terasen) and Fortis Alberta. The increases were partially offset by the loss of ~\$2 million (\$0.01 per share) of earnings from the expropriation of Belize Electric. The company's non-regulated operations performed in line with last year during the same period. Note that we removed the one-time \$18.8 million (\$11 million after-tax) payment received from the termination of the CVPS Merger Agreement and \$2.5 million on unrealized non-cash foreign exchange gains. For the third quarter, the company reported net earnings per share of \$0.31 versus \$0.26 last year. For the first nine months of the year, the recurring earnings per share was \$1.30, ahead of the \$1.16 recorded last year. For additional details on third quarter results, please refer to Figure 1.

---

**Noteworthy items**

- CVPS termination fee CAD\$18.8 million
    - US\$17.5 million
    - Also received US\$2 million for transaction expenses
  - Acquired 160-room full-service Hilton Suites Winnipeg Airport hotel for \$25 million
  - Received municipal approval to construct \$50 million office building
    - 12-storeys in downtown St. John
    - Construction expected to be complete in 2H/13
  - Regulatory
    - Fortis BC Energy gas companies
      - Filed updated 2012-2013 rate applications in September 2011
        - Decision expected in late Q1/12
      - Filed application to amalgamate the three FortisBC Energy gas companies
    - Newfoundland Power completed the sale of joint-use poles back to Bell Aliant (BA : TSX | HOLD)
      - Will use funds to pay down debt
    - Caribbean Utilities
      - Expects to file 2012-2016 capital investment plan in Q4/11
      - Will sign PPAs to accept up to 13 MW of renewable power from IPPs
    - Fortis Turks and Caicos
      - Filed a request for a change in the rate structure and a 6% increase in base rates
      - Carbon tax expected to be implemented September 2011
        - Has not yet been implemented
-

Company	Disclosure
Fortis Inc.	7
Bell Aliant Inc.	1A, 2, 7

- 1 The relevant issuer currently is, or in the past 12 months was, a client of Canaccord Genuity or its affiliated companies. During this period, Canaccord Genuity or its affiliated companies provided the following services to the relevant issuer:
  - A. investment banking services.
  - B. non-investment banking securities-related services.
  - C. non-securities related services.
- 2 In the past 12 months, Canaccord Genuity or its affiliated companies have received compensation for Corporate Finance/Investment Banking services from the relevant issuer.
- 3 In the past 12 months, Canaccord Genuity or any of its affiliated companies have been lead manager, co-lead manager or co-manager of a public offering of securities of the relevant issuer or any publicly disclosed offer of securities of the relevant issuer or in any related derivatives.
- 4 Canaccord Genuity acts as corporate broker for the relevant issuer and/or Canaccord Genuity or any of its affiliated companies may have an agreement with the relevant issuer relating to the provision of Corporate Finance/Investment Banking services.
- 5 Canaccord Genuity or any of its affiliated companies is a market maker or liquidity provider in the securities of the relevant issuer or in any related derivatives.
- 6 In the past 12 months, Canaccord Genuity, its partners, affiliated companies, officers or directors, or any authoring analyst involved in the preparation of this investment research has provided services to the relevant issuer for remuneration, other than normal course investment advisory or trade execution services.
- 7 Canaccord Genuity intends to seek or expects to receive compensation for Corporate Finance/Investment Banking services from the relevant issuer in the next six months.
- 8 The authoring analyst, a member of the authoring analyst's household, or any individual directly involved in the preparation of this investment research, has a long position in the shares or derivatives, or has any other financial interest in the relevant issuer, the value of which increases as the value of the underlying equity increases.
- 9 The authoring analyst, a member of the authoring analyst's household, or any individual directly involved in the preparation of this investment research, has a short position in the shares or derivatives, or has any other financial interest in the relevant issuer, the value of which increases as the value of the underlying equity decreases.
- 10 Those persons identified as the author(s) of this investment research, or any individual involved in the preparation of this investment research, have purchased/received shares in the relevant issuer prior to a public offering of those shares, and such person's name and details are disclosed above.
- 11 A partner, director, officer, employee or agent of Canaccord Genuity and its affiliated companies, or a member of his/her household, is an officer, or director, or serves as an advisor or board member of the relevant issuer and/or one of its subsidiaries, and such person's name is disclosed above.
- 12 As of the month end immediately preceding the date of publication of this investment research, or the prior month end if publication is within 10 days following a month end, Canaccord Genuity or its affiliate companies, in the aggregate, beneficially owned 1% or more of any class of the total issued share capital or other common equity securities of the relevant issuer or held any other financial interests in the relevant issuer which are significant in relation to the investment research (as disclosed above).
- 13 As of the month end immediately preceding the date of publication of this investment research, or the prior month end if publication is within 10 days following a month end, the relevant issuer owned 1% or more of any class of the total issued share capital in Canaccord Genuity or any of its affiliated companies.
- 14 Other specific disclosures as described above.

Canaccord Genuity is the business name used by certain subsidiaries of Canaccord Financial Inc., including Canaccord Genuity Inc., Canaccord Genuity Limited, and Canaccord Genuity Corp.

The authoring analysts who are responsible for the preparation of this investment research are employed by Canaccord Genuity Corp. a Canadian broker-dealer with principal offices located in Vancouver, Calgary, Toronto, Montreal, or Canaccord Genuity Inc., a US broker-dealer with principal offices located in Boston, New York, San Francisco and Houston or Canaccord Genuity Limited., a UK broker-dealer with principal offices located in London and Edinburgh (UK).

In the event that this is compendium investment research (covering six or more relevant issuers), Canaccord Genuity and its affiliated companies may choose to provide specific disclosures of the subject companies by reference, as well as its policies and procedures regarding the dissemination of investment research. To access this material or for more information, please send a request to Canaccord Genuity Research, Attn: Disclosures, P.O. Box 10337 Pacific Centre, 2200-609 Granville Street, Vancouver, BC, Canada V7Y 1H2 or [disclosures@canaccordgenuity.com](mailto:disclosures@canaccordgenuity.com).

The authoring analysts who are responsible for the preparation of this investment research have received (or will receive) compensation based upon (among other factors) the Corporate Finance/Investment Banking

revenues and general profits of Canaccord Genuity. However, such authoring analysts have not received, and will not receive, compensation that is directly based upon or linked to one or more specific Corporate Finance/Investment Banking activities, or to recommendations contained in the investment research. Canaccord Genuity and its affiliated companies may have a Corporate Finance/Investment Banking or other relationship with the company that is the subject of this investment research and may trade in any of the designated investments mentioned herein either for their own account or the accounts of their customers, in good faith or in the normal course of market making. Accordingly, Canaccord Genuity or their affiliated companies, principals or employees (other than the authoring analyst(s) who prepared this investment research) may at any time have a long or short position in any such designated investments, related designated investments or in options, futures or other derivative instruments based thereon.

Some regulators require that a firm must establish, implement and make available a policy for managing conflicts of interest arising as a result of publication or distribution of investment research. This investment research has been prepared in accordance with Canaccord Genuity's policy on managing conflicts of interest, and information barriers or firewalls have been used where appropriate. Canaccord Genuity's policy is available upon request.

The information contained in this investment research has been compiled by Canaccord Genuity from sources believed to be reliable, but (with the exception of the information about Canaccord Genuity) no representation or warranty, express or implied, is made by Canaccord Genuity, its affiliated companies or any other person as to its fairness, accuracy, completeness or correctness. Canaccord Genuity has not independently verified the facts, assumptions, and estimates contained herein. All estimates, opinions and other information contained in this investment research constitute Canaccord Genuity's judgement as of the date of this investment research, are subject to change without notice and are provided in good faith but without legal responsibility or liability.

Canaccord Genuity's salespeople, traders, and other professionals may provide oral or written market commentary or trading strategies to our clients and our proprietary trading desk that reflect opinions that are contrary to the opinions expressed in this investment research. Canaccord Genuity's affiliates, principal trading desk, and investing businesses may make investment decisions that are inconsistent with the recommendations or views expressed in this investment research.

This investment research is provided for information purposes only and does not constitute an offer or solicitation to buy or sell any designated investments discussed herein in any jurisdiction where such offer or solicitation would be prohibited. As a result, the designated investments discussed in this investment research may not be eligible for sale in some jurisdictions. This investment research is not, and under no circumstances should be construed as, a solicitation to act as a securities broker or dealer in any jurisdiction by any person or company that is not legally permitted to carry on the business of a securities broker or dealer in that jurisdiction. This material is prepared for general circulation to clients and does not have regard to the investment objectives, financial situation or particular needs of any particular person. Investors should obtain advice based on their own individual circumstances before making an investment decision. To the fullest extent permitted by law, none of Canaccord Genuity, its affiliated companies or any other person accepts any liability whatsoever for any direct or consequential loss arising from or relating to any use of the information contained in this investment research.

**For Canadian Residents:** This Investment Research has been approved by Canaccord Genuity Corp., which accepts sole responsibility for this Investment Research and its dissemination in Canada. Canadian clients wishing to effect transactions in any Designated Investment discussed should do so through a qualified salesperson of Canaccord Genuity Corp. in their particular jurisdiction.

**For United Kingdom Residents:** This investment research is distributed in the United Kingdom, as third party research by Canaccord Genuity Limited, which is authorized and regulated by the Financial Services Authority. This research is for distribution only to persons who are Eligible Counterparties or Professional Clients only and is exempt from the general restrictions in section 21 of the Financial Services and Markets Act 2000 on the communication of invitations or inducements to engage in investment activity on the grounds that it is being distributed in the United Kingdom only to persons of a kind described in Article 19(5) (Investment Professionals) and 49(2) (High Net Worth companies, unincorporated associations etc) of the Financial Services and Markets Act 2000 (Financial Promotion) Order 2005 (as amended). **SHARE PRICE PERFORMANCE:**

Source: Interactive Data Corporation

**COMPANY DESCRIPTION:**

Fortis Inc. is a diversified, international utility company with assets over \$13.6 billion. Regulated holdings include electric distribution utilities in Alberta, BC, Ontario, Newfoundland, PEI and two Caribbean countries and a natural gas utility in BC. Fortis owns non-regulated generation assets across Canada and in Belize and Upper New York State. It also owns and operates hotels and commercial real estate in Canada.

All amounts in C\$ unless otherwise noted.

**Infrastructure -- Utilities****Q4 RESULTS IN LINE; 2012 GROWTH POTENTIALLY HAMPERED BY COST OF CAPITAL REVIEW IN BC****Investment recommendation**

Fortis Inc. reported fourth quarter earnings per share of \$0.46, in line with the consensus estimate. The company's earnings continue to benefit from a high level of capital spending (about \$1 billion) at its utility operations in 2011, particularly at its Western Canadian utilities. While continued capital spending in 2012 should help improve earnings, the growth profile may be muted in the near term by the dilutive impact of its June 2011 10.3-million-share issuance and the November 2011 debenture conversion for 1.3 million shares. In addition, the British Columbia Utilities Commission (BCUC) is initiating a Generic Cost of Capital review that could potentially negatively impact the allowed return at its natural gas utility. Our \$1.75 EPS estimate for 2012 does not reflect a lower return that could arise from the BCUC's review. With its five-year capital budget of \$5.5 billion (most of which is anticipated to be spent at the company's electric utility operations), we expect to see consistent and stable growth in earnings and dividends over the medium term. The company continues to seek out acquisitions of US-based electric utility assets which could have an impact on future earnings growth. We are maintaining our HOLD rating and C\$33.00 target price.

**Investment highlights**

- HOLD rating and C\$33.00 target price maintained
- No change to 2012 and 2013 earnings estimates of \$1.75 and \$1.80, respectively
  - But possibility of lower returns on BC utilities could reduce 2012 EPS expectation
- Reported Q4/11 EPS of \$0.46 and full-year 2011 of \$1.67

Canaccord Genuity is the global capital markets group of Canaccord Financial Inc. (CF : TSX | CF. : AIM)

The recommendations and opinions expressed in this Investment Research accurately reflect the Investment Analyst's personal, independent and objective views about any and all the Designated Investments and Relevant Issuers discussed herein. For important information, please see the Important Disclosures section in the appendix of this document or visit Canaccord Genuity's [Online Disclosure Database](#).

**Valuation**

Our target price is derived from a combination of valuation metrics that include earnings and dividend yields relative to long-term interest rates, dividend discount models, and earnings and cash flow multiples relative to both historical valuation and Fortis' utility and pipeline peers.

**Outlook**

We are maintaining our 2012 and 2013 earnings estimates of \$1.75 and \$1.80 per share, respectively. A majority of the company's growth over the next few years will likely come from its regulated utility businesses, where the company plans to spend \$3.5 billion towards its electric utilities and \$1.3 billion towards its gas utilities through 2016. The remaining \$0.7 billion of its \$5.5 billion capital program is scheduled to be invested in non-regulated businesses (including the 335 MW, \$900 million Waneta Expansion Project – 51%-owned by Fortis). In addition, the company continues to look for US-based regulated electric acquisition opportunities. Fortis believes that it could manage an acquisition with an enterprise value up to \$5 billion, and would consider financial partners for larger acquisitions. While more recent transactions have occurred at higher valuations, we note that management maintains a disciplined approach, as evidenced by its refusal to enter a bidding war to acquire Central Vermont Public Service. With approximately 90% of its earnings generated from utility operations, Fortis holds a stable asset portfolio with modest earnings and dividend growth.

**Earnings summary**

Fortis reported fourth quarter earnings of \$0.46 per share, versus \$0.49 last year and in line with the consensus estimate. Regulated earnings were \$5 million (\$0.03 per share) higher compared to the same period last year. Most of the regulated earnings improvement was due to rate base additions at FortisBC Energy and Fortis Alberta. The increases were partially offset by unfavourable foreign exchange movements, as well as higher amortization expense at the company's Caribbean operations, which reduced earnings by \$2 million in the quarter. The company's non-regulated operations were lower due to higher taxes in the Properties division. While recurring earnings were slightly better than last year, the impact of a share issue in the second quarter of 2011 had a dilutive impact on the per-share results. For the full year, recurring earnings per share was \$1.67, ahead of \$1.61 recorded for the previous year. For additional details on the fourth quarter and full-year results, please refer to Figures 1 and 2.

**Noteworthy items**

- Capital expenditures
    - \$1.2 billion capex in 2011
    - \$1.3 billion to be spent in 2012
      - ~\$1 billion in regulated operations
    - \$5.5 billion expected from 2012 through 2016
  - Regulatory
    - Fortis Alberta
      - Lower allowed ROE for 2011 – 8.75%, down from 9% in 2010
        - Retroactive adjustment made in Q4/11 for \$2 million
-

- 2012 rate decision expected in first half of 2012
    - “Performance-base regulation” decision expected in 2012
  - Newfoundland Power
    - Suspended use of formula approach to calculate ROE
      - 2012 interim rate of 8.38%; pending review of actual cost of capital and risk profile
      - Could provide modest improvement in returns
  - FortisBC
    - Regulator announced a Generic Cost of Capital proceeding in November 2011
      - Gas and electric utility ROEs maintained pending outcome of the proceeding
      - Process expected to be outlined in the coming months
      - Potential for lower returns
  - Converted US\$40 million of convertible debentures into 1.4 million shares
  - Submitted compensation claim to Belize Government for expropriated Belize Electricity assets.
    - Received appraisal from government that was materially lower than Fortis’ independent valuation
    - No current plans to expropriate BECOL
      - Book value of \$154 million (\$0.82 per share)
-

Result of continued rate base growth and lower than expected tax, financing and amortization expenses.

Unfavourable FX impact and higher amortization expense. No contribution from Belize Electricity - (its contribution in Q4/10 was a loss of \$0.5 M).

Higher corporate income tax partly offset by incremental earnings contribution from Winnipeg hotel acquisition in October 2011.

\$2 M accrual recognized in Q4 related to lower allowed return for 2011 at FortisAlbertra.

In line with 46¢ consensus estimate and slightly below our 49¢ estimate.

**Investment risks**

Some of the specific risk factors that pertain to the projected 6- to 12-month stock price target for Fortis are as follows: (1) price movement in electricity rates and commodities used for electricity generation could impact profitability; (2) international operations have

currency rate exposure and liquidity risks associated with those currencies; (3) credit risk of contract counterparties could improve or deteriorate; (4) debt refinancing at different interest rates could impact the income of the company; (5) equipment failure or extreme weather conditions could adversely affect operating facilities; (6) change in public policy on environmental health and safety risk could impose unexpected costs on Fortis; (7) change in regulatory or political climate could impact profitability and future growth and development of Fortis; (8) the inability to maintain, or to renew, the collective bargaining agreements with unionized workers on acceptable terms could result in increased labour costs or service interruptions arising from labour disputes; (9) economic conditions, which may impact demand for products and services, peer group valuation, access to capital, and share trading liquidity; and (10) Fortis holds investments in commercial real estate and hotel properties which are subject to operating risks associated with the industry.

Speculative Buy	87	10.9%	56	73.6%
Hold	215	26.9%	29	20.9%
Sell	16	2.0%	6	25.0%
	799	100%		

**Canaccord Ratings System:**

**BUY:** The stock is expected to generate risk-adjusted returns of over 10% during the next 12 months.  
**HOLD:** The stock is expected to generate risk-adjusted returns of 0-10% during the next 12 months.  
**SELL:** The stock is expected to generate negative risk-adjusted returns during the next 12 months.  
**NOT RATED:** Canaccord Genuity does not provide research coverage of the relevant issuer.

"Risk-adjusted return" refers to the expected return in relation to the amount of risk associated with the designated investment or the relevant issuer.

**Risk Qualifier:**

**SPECULATIVE:** Stocks bear significantly higher risk that typically cannot be valued by normal fundamental criteria. Investments in the stock may result in material loss.

## Canaccord Research Disclosures as of 9 February 2012

Company	Disclosure
Fortis Inc.	7
1	The relevant issuer currently is, or in the past 12 months was, a client of Canaccord Genuity or its affiliated companies. During this period, Canaccord Genuity or its affiliated companies provided the following services to the relevant issuer: A. investment banking services. B. non-investment banking securities-related services. C. non-securities related services.
2	In the past 12 months, Canaccord Genuity or its affiliated companies have received compensation for Corporate Finance/Investment Banking services from the relevant issuer.
3	In the past 12 months, Canaccord Genuity or any of its affiliated companies have been lead manager, co-lead manager or co-manager of a public offering of securities of the relevant issuer or any publicly disclosed offer of securities of the relevant issuer or in any related derivatives.
4	Canaccord Genuity acts as corporate broker for the relevant issuer and/or Canaccord Genuity or any of its affiliated companies may have an agreement with the relevant issuer relating to the provision of Corporate Finance/Investment Banking services.
5	Canaccord Genuity or any of its affiliated companies is a market maker or liquidity provider in the securities of the relevant issuer or in any related derivatives.
6	In the past 12 months, Canaccord Genuity, its partners, affiliated companies, officers or directors, or any authoring analyst involved in the preparation of this investment research has provided services to the relevant issuer for remuneration, other than normal course investment advisory or trade execution services.
7	Canaccord Genuity intends to seek or expects to receive compensation for Corporate Finance/Investment Banking services from the relevant issuer in the next six months.
8	The authoring analyst, a member of the authoring analyst's household, or any individual directly involved in the preparation of this investment research, has a long position in the shares or derivatives, or has any other financial interest in the relevant issuer, the value of which increases as the value of the underlying equity increases.
9	The authoring analyst, a member of the authoring analyst's household, or any individual directly involved in the preparation of this investment research, has a short position in the shares or derivatives, or has any other financial interest in the relevant issuer, the value of which increases as the value of the underlying equity decreases.
10	Those persons identified as the author(s) of this investment research, or any individual involved in the preparation of this investment research, have purchased/received shares in the relevant issuer prior to a public offering of those shares, and such person's name and details are disclosed above.
11	A partner, director, officer, employee or agent of Canaccord Genuity and its affiliated companies, or a member of his/her household, is an officer, or director, or serves as an advisor or board member of the relevant issuer and/or one of its subsidiaries, and such person's name is disclosed above.
12	As of the month end immediately preceding the date of publication of this investment research, or the prior month end if publication is within 10 days following a month end, Canaccord Genuity or its affiliate companies, in the aggregate, beneficially owned 1% or more of any class of the total issued share capital or other common equity securities of the relevant issuer or held any other financial interests in the relevant issuer which are significant in relation to the investment research (as disclosed above).
13	As of the month end immediately preceding the date of publication of this investment research, or the prior month end if publication is within 10 days following a month end, the relevant issuer owned 1% or more of any class of the total issued share capital in Canaccord Genuity or any of its affiliated companies.
14	Other specific disclosures as described above.

Canaccord Genuity is the business name used by certain subsidiaries of Canaccord Financial Inc., including Canaccord Genuity Inc., Canaccord Genuity Limited, and Canaccord Genuity Corp.

The authoring analysts who are responsible for the preparation of this investment research are employed by Canaccord Genuity Corp. a Canadian broker-dealer with principal offices located in Vancouver, Calgary, Toronto, Montreal, or Canaccord Genuity Inc., a US broker-dealer with principal offices located in Boston, New York, San Francisco and Houston or Canaccord Genuity Limited., a UK broker-dealer with principal offices located in London and Edinburgh (UK).

In the event that this is compendium investment research (covering six or more relevant issuers), Canaccord Genuity and its affiliated companies may choose to provide specific disclosures of the subject companies by reference, as well as its policies and procedures regarding the dissemination of investment research. To access this material or for more information, please send a request to Canaccord Genuity Research, Attn:

**SHARE PRICE PERFORMANCE:**

Source: Interactive Data Corporation

**COMPANY DESCRIPTION:**

Fortis Inc. is a diversified, international utility company with assets over \$13.6 billion. Regulated holdings include electric distribution utilities in Alberta, BC, Ontario, Newfoundland, PEI and two Caribbean countries and a natural gas utility in BC. Fortis owns non-regulated generation assets across Canada and in Belize and Upper New York State. It also owns and operates hotels and commercial real estate in Canada.

All amounts in C\$ unless otherwise noted.

**Infrastructure -- Utilities****SECOND TIME'S A CHARM? TO ACQUIRE NEW YORK-BASED UTILITY****Investment recommendation**

Fortis announced the acquisition of CH Energy Group (CHG : NYSE | Not Rated) for US\$1.5 billion, including the assumption of about US\$500 million of debt. The purchase price of US\$65/share in cash represents a 10.5% premium to the closing price of CH Energy's common shares on Friday, February 17, 2012. We believe that the acquisition could contribute \$0.02 or more per share to full-year earnings, depending on the final financing structure. The acquisition does not come as a major surprise since management has long indicated that it is seeking to expand into the US, where regulatory returns have generally been more attractive. We are maintaining our C\$33.00 target price and EPS estimates of \$1.75 and \$1.80 per share for 2012 and 2013, respectively, until further details are provided on permanent financing. Our HOLD rating is maintained.

**Investment highlights**

- Maintaining HOLD rating and C\$33.00 target price
- Acquiring CH Energy Group for US\$ 1.5 billion
  - Includes US\$500 million of debt
  - Represents ~1.45x regulated rate base; ~2x deemed equity
  - Expected to close in Q1/13
- 2012 and 2013 estimates unchanged
  - Depending on permanent financing, expected to be accretive by \$0.02 or more to annual EPS.

Canaccord Genuity is the global capital markets group of Canaccord Financial Inc. (CF : TSX | CF. : AIM)

The recommendations and opinions expressed in this Investment Research accurately reflect the Investment Analyst's personal, independent and objective views about any and all the Designated Investments and Relevant Issuers discussed herein. For important information, please see the Important Disclosures section in the appendix of this document or visit Canaccord Genuity's [Online Disclosure Database](#).

**Valuation**

Our target price is derived from a combination of valuation metrics that include earnings and dividend yields relative to long-term interest rates, dividend discount models, and earnings and cash flow multiples relative to both historical valuation and its utility and pipeline peers.

**Summary**

CH Energy Group is an electric and gas utility based in New York State with a regulated rate base of approximately \$1 billion, as well as non-regulated assets of approximately \$90 million. The \$1.5 billion consideration paid by Fortis represents a ~45% premium to the 2013 regulated rate base. We note that the premium to rate base, although rich, is in line with recent utility transactions in the United States. In addition, equity returns afforded in the US are relatively higher than those in Canada. CH Energy's current three-year rate plan ending 2013 provides for a 10% return on a 48% equity base. Depending on the permanent financing structure, we believe that the acquisition will be modestly accretive by \$0.02 or more to annual EPS. We note that, with the \$340 million common equity issue in 2011 (which was partly to be used to finance the failed Central Vermont Public Service acquisition), Fortis can take on a bit more leverage to finance the CH Energy purchase. However, we expect that Fortis would need to raise about \$500 million of equity to fund the acquisition, which could overhang the stock in the near term.

CH Energy's regulated utility has planned capital expenditures in excess of US\$100 million on average per year through 2016, although management expects capital expenditures could be modestly higher on average, which would represent an average annual 7.5% growth to rate base. Depending on interest rates used to finance a portion of the acquisition, we estimate that the returns could initially be around 6.5%, rising with rate base growth. The non-regulated assets represent a small portion of the business, and its earnings contributions are expected to be a couple of million dollars annually.

Fortis is very familiar with regulated assets, with almost 90% of its earnings generated from regulated operations in Canada and the Caribbean. The acquisition of CH Energy does not come as a surprise and is in line with the company's stated strategy to enter the US regulated utility arena (recall its interest in acquiring Central Vermont Public Service last year). If successful, this acquisition will be Fortis' first foray into the US, and may be a beachhead for additional US utility purchases in the future. Given the company previously indicated that it could complete US acquisitions with an enterprise value of up to \$5 billion on its own (and larger acquisitions with a financial partner), we do not rule out the possibility that Fortis could make further acquisitions of US-based utilities.

---

**Acquisition details**

- Acquiring CH Energy Group for US\$1.5 billion
    - Includes the assumption of US\$500 million debt
    - Purchasing CH Energy common shares at US\$65/share in cash
      - 10.5% premium to last close
    - ~\$20 million break fee
  - Regulated rate base ~US\$1 billion expected in 2013
    - Three-year rate settlement ending June 2013
      - 48% equity portion
      - 10% ROE through 2013
  - The assets:
    - Central Hudson Gas & Electric Corp.
      - Regulated electric and gas transmission and distribution utility
      - Operates in eight counties in the Mid-Hudson River Valley, NY
      - Regulated by the New York Public Service Commission
      - Debt rating/outlook
        - S&P: A/stable
        - Fitch: A/stable
        - Moody's: A3/stable
      - Electric business
        - 300,000 electric customers
        - 9,600 miles of distribution lines
        - 600 miles of transmission lines
        - 1,225 MW peak demand in 2011
        - 77% of regulated assets
      - Gas business
        - 75,000 natural gas customers
        - 1,900 miles of distribution pipelines
        - 160 miles of transmission pipelines
        - 115,807 Mcf peak demand in 2011
        - 23% of regulated assets
    - Griffith Energy Services
      - Fuel distribution company
      - Operates in 10 Mid-Atlantic states
      - US\$90 million assets
  - Closing subject to:
    - CH Energy shareholder approval
    - Regulatory approval
      - New York Public Service
      - Federal Energy Regulatory Commission
      - Hart-Scott Rodino Act waiting period
    - Customary closing conditions

**Investment risks**

Some of the specific risk factors that pertain to the projected 6- to 12-month stock price target for Fortis are as follows: (1) price movement in electricity rates and commodities used for electricity generation could impact profitability; (2) international operations have currency rate exposure and liquidity risks associated with those currencies; (3) credit risk of contract counterparties could improve or deteriorate; (4) debt refinancing at different interest rates could impact the income of the company; (5) equipment failure or extreme weather conditions could adversely affect operating facilities; (6) change in public policy on environmental health and safety risk could impose unexpected costs on Fortis; (7) change in regulatory or political climate could impact profitability and future growth and development of Fortis; (8) the inability to maintain, or to renew, the collective bargaining agreements with unionized workers on acceptable terms could result in increased labour costs or service interruptions arising from labour disputes; (9) economic conditions, which may impact demand for products and services, peer group valuation, access to capital, and share trading liquidity; and (10) Fortis holds investments in commercial real estate and hotel properties that are subject to operating risks associated with the industry.

Sell	16	2.0%	6	25.0%
	799	100%		

**Canaccord Ratings System:**

**BUY:** The stock is expected to generate risk-adjusted returns of over 10% during the next 12 months.  
**HOLD:** The stock is expected to generate risk-adjusted returns of 0-10% during the next 12 months.  
**SELL:** The stock is expected to generate negative risk-adjusted returns during the next 12 months.  
**NOT RATED:** Canaccord Genuity does not provide research coverage of the relevant issuer.

"Risk-adjusted return" refers to the expected return in relation to the amount of risk associated with the designated investment or the relevant issuer.

**Risk Qualifier:**

**SPECULATIVE:** Stocks bear significantly higher risk that typically cannot be valued by normal fundamental criteria. Investments in the stock may result in material loss.

## Canaccord Research Disclosures as of 21 February 2012

Company	Disclosure
Fortis Inc.	7
1	The relevant issuer currently is, or in the past 12 months was, a client of Canaccord Genuity or its affiliated companies. During this period, Canaccord Genuity or its affiliated companies provided the following services to the relevant issuer: A. investment banking services. B. non-investment banking securities-related services. C. non-securities related services.
2	In the past 12 months, Canaccord Genuity or its affiliated companies have received compensation for Corporate Finance/Investment Banking services from the relevant issuer.
3	In the past 12 months, Canaccord Genuity or any of its affiliated companies have been lead manager, co-lead manager or co-manager of a public offering of securities of the relevant issuer or any publicly disclosed offer of securities of the relevant issuer or in any related derivatives.
4	Canaccord Genuity acts as corporate broker for the relevant issuer and/or Canaccord Genuity or any of its affiliated companies may have an agreement with the relevant issuer relating to the provision of Corporate Finance/Investment Banking services.
5	Canaccord Genuity or any of its affiliated companies is a market maker or liquidity provider in the securities of the relevant issuer or in any related derivatives.
6	In the past 12 months, Canaccord Genuity, its partners, affiliated companies, officers or directors, or any authoring analyst involved in the preparation of this investment research has provided services to the relevant issuer for remuneration, other than normal course investment advisory or trade execution services.
7	Canaccord Genuity intends to seek or expects to receive compensation for Corporate Finance/Investment Banking services from the relevant issuer in the next six months.
8	The authoring analyst, a member of the authoring analyst's household, or any individual directly involved in the preparation of this investment research, has a long position in the shares or derivatives, or has any other financial interest in the relevant issuer, the value of which increases as the value of the underlying equity increases.
9	The authoring analyst, a member of the authoring analyst's household, or any individual directly involved in the preparation of this investment research, has a short position in the shares or derivatives, or has any other financial interest in the relevant issuer, the value of which increases as the value of the underlying equity decreases.
10	Those persons identified as the author(s) of this investment research, or any individual involved in the preparation of this investment research, have purchased/received shares in the relevant issuer prior to a public offering of those shares, and such person's name and details are disclosed above.
11	A partner, director, officer, employee or agent of Canaccord Genuity and its affiliated companies, or a member of his/her household, is an officer, or director, or serves as an advisor or board member of the relevant issuer and/or one of its subsidiaries, and such person's name is disclosed above.
12	As of the month end immediately preceding the date of publication of this investment research, or the prior month end if publication is within 10 days following a month end, Canaccord Genuity or its affiliate companies, in the aggregate, beneficially owned 1% or more of any class of the total issued share capital or other common equity securities of the relevant issuer or held any other financial interests in the relevant issuer which are significant in relation to the investment research (as disclosed above).
13	As of the month end immediately preceding the date of publication of this investment research, or the prior month end if publication is within 10 days following a month end, the relevant issuer owned 1% or more of any class of the total issued share capital in Canaccord Genuity or any of its affiliated companies.
14	Other specific disclosures as described above.

Canaccord Genuity is the business name used by certain subsidiaries of Canaccord Financial Inc., including Canaccord Genuity Inc., Canaccord Genuity Limited, and Canaccord Genuity Corp.

The authoring analysts who are responsible for the preparation of this investment research are employed by Canaccord Genuity Corp. a Canadian broker-dealer with principal offices located in Vancouver, Calgary, Toronto, Montreal, or Canaccord Genuity Inc., a US broker-dealer with principal offices located in Boston, New York, San Francisco and Houston or Canaccord Genuity Limited., a UK broker-dealer with principal offices located in London and Edinburgh (UK).

In the event that this is compendium investment research (covering six or more relevant issuers), Canaccord Genuity and its affiliated companies may choose to provide specific disclosures of the subject companies by reference, as well as its policies and procedures regarding the dissemination of investment research. **COMPANY DESCRIPTION:**

Fortis Inc. is a diversified, international utility company with assets over \$13.6 billion. Regulated holdings include electric distribution utilities in Alberta, BC, Ontario, Newfoundland, PEI and two Caribbean countries and a natural gas utility in BC. Fortis owns non-regulated generation assets across Canada and in Belize and Upper New York State. It also owns and operates hotels and commercial real estate in Canada.

All amounts in C\$ unless otherwise noted.

**Infrastructure -- Utilities****OPERATIONS PERFORMING WELL, BUT SOME EARNINGS UNCERTAINTY EXISTS****Investment recommendation**

We are maintaining our HOLD rating and C\$33.00 target price on the shares of Fortis. The company reported first quarter recurring earnings of \$0.66 per share, in line with our expectations and the consensus estimate. Overall, Fortis's businesses continue to perform well, with minor give and takes within the various operating segments during the quarter. We are lowering our 2012 earnings estimate by \$0.05 per share to \$1.70 to reflect lower expected earnings at FortisBC Electric due to the elimination of incentive earnings from the discontinuation of the performance-based, rate-setting (PBR) mechanism. We note that, although still achievable, EPS of \$1.75 this year would be at the high range of expectations. Our 2013 EPS estimate is unchanged at \$1.80. Beyond 2013, earnings should continue to benefit from the company's planned \$5.5 billion capital expenditure program (2012-2016), primarily in utility operations.

**Valuation**

Our target price is derived from a combination of valuation metrics that include earnings and dividend yields relative to long-term interest rates, dividend discount models, and earnings and cash flow multiples relative to both historical valuation and its utility and pipeline peers.

**Investment highlights**

- Q1 EPS of \$0.66, in line with \$0.67 consensus estimate
  - Higher rate base and strong hydrology at non-regulated Belize assets helped results
  - Absence of incentive earnings at FortisBC Electric and higher shares outstanding weighed on earnings
- Maintain HOLD rating and C\$33.00 target price
  - 2012 EPS estimate lowered to \$1.70 from \$1.75 due to the impact of elimination of PBR at FortisBC
  - 2013 EPS estimate unchanged at \$1.80
- BCUC Generic Cost of Capital Proceeding introduces 2013 EPS risk

**Outlook**

We are lowering our 2012 estimate to \$1.70 from \$1.75 to reflect slightly lower earnings expectations from the discontinuation of the PBR mechanism at FortisBC Electric. The PBR mechanism had allowed Fortis to share with ratepayers any cost savings the company achieved to allow it to earn above its regulated return. Note that we do not include any acquisition-related costs related to the pending \$1.5 billion purchase of CH Energy in our 2012 and 2013 EPS estimates.

Overall, Fortis's operations continue to perform in line with expectations. The company derives the majority of its earnings from regulated operations that can be influenced by changes in deemed returns and capital structure from regulatory decisions. While we are maintaining our 2013 EPS estimate of \$1.80, we note that there remains some uncertainty surrounding the British Columbia Utilities Commission's (BCUC) Generic Cost of Capital Proceeding. A decision from the BCUC is expected late in the year and could result in a lower allowed ROE at Fortis's BC operations beginning in 2013 (not retroactively). We estimate that the impact of a 100 bps decline at Fortis' BC utilities could reduce earnings by up to \$0.10 per share.

Fortis has a \$5.5 billion capital expenditure program through 2016, which should continue to drive earnings and dividend growth. In addition, the acquisition of CH Energy Group Inc. is expected to be immediately (albeit likely modestly) accretive once it closes (expected by the end of Q1/13). Although the company's balance sheet is strong with debt to total capital at ~55% (below its 60% target), the company will need to issue common equity to partially fund the purchase. We expect the company to access the equity market in late 2012 or early 2013, when the close of its acquisition of CH Energy becomes more certain.

**First quarter earnings summary**

Fortis reported first quarter recurring earnings of \$0.66, in line with our estimate and the consensus estimate. Note that our recurring earnings calculation does not include \$4 million of pre-tax costs related to the company's proposed acquisition

---

of CH Energy, or \$1.5 million of non-cash foreign exchange translation losses associated with the company's expropriated Belizean assets. Compared to Q1/11, earnings were flat. Rate-based growth in the western utility operations, and the timing of certain expenses at FortisBC Energy Companies, improved earnings; a return to normal hydrology in Belize also boosted the contribution from Fortis' non-regulated power generation segment. These factors were offset by lower earnings from FortisBC Electric due to the discontinuation of the PBR, the Caribbean utility operations that no longer receive contributions from Belize Electricity, which was expropriated by the Belize government in the second quarter of last year, and the dilutive impact of an 8% increase in the shares outstanding. For additional details on first quarter results, please refer to Figure 1.

**Noteworthy items***Regulatory*

- BCUC Generic Cost of Capital decision expected in late 2012
  - Will not be retroactive
- Applications filed with state and federal regulators seeking approval of CH Energy acquisition
  - Expected close end of Q1/13
- FortisBC Electric – written hearing process to review prudence of ~\$29 million of capex
- Caribbean Utilities - US\$122 million of non-generation capex approved

*Financing*

- \$2 billion of unused credit facilities available for consolidated entity
- Newfoundland Power extended term of \$100 million credit facility by two years to August 2017
- FortisBC Electric extended term of \$150 million credit facility
  - \$100 million maturing in May 2015
  - \$50 million maturing in May 2013
- Requested increase for Corporate credit facility to \$1 billion from \$800 million, as per credit facility agreement
  - Increase expected in May 2012

*Other*

- No new developments in matters related to expropriated Belize assets
-

**Investment risks**

Some of the specific risk factors that pertain to the projected stock price target for Fortis are as follows: (1) price movement in electricity rates and commodities used for electricity generation could impact profitability; (2) international operations have currency rate exposure and liquidity risks associated with those currencies; (3) credit risk of contract counterparties could improve or deteriorate; (4) debt refinancing at different interest rates could impact the income of the company; (5) equipment failure or extreme weather conditions could adversely affect operating facilities; (6) change in public policy on environmental health and safety risk could impose unexpected costs on Fortis; (7) change in regulatory or political climate could impact profitability and future growth and development of Fortis; (8) the inability to maintain, or to renew, the collective bargaining agreements with unionized workers on acceptable terms could result in increased labour costs or service interruptions arising from labour disputes; (9) economic conditions, which may impact demand for products and services, peer group valuation, access to capital, and share trading liquidity; and (10) Fortis holds investments in commercial real estate and hotel properties that are subject to operating risks associated with the industry.

Company	Disclosure
Fortis Inc.	7
1	The relevant issuer currently is, or in the past 12 months was, a client of Canaccord Genuity or its affiliated companies. During this period, Canaccord Genuity or its affiliated companies provided the following services to the relevant issuer: A. investment banking services. B. non-investment banking securities-related services. C. non-securities related services.
2	In the past 12 months, Canaccord Genuity or its affiliated companies have received compensation for Corporate Finance/Investment Banking services from the relevant issuer.
3	In the past 12 months, Canaccord Genuity or any of its affiliated companies have been lead manager, co-lead manager or co-manager of a public offering of securities of the relevant issuer or any publicly disclosed offer of securities of the relevant issuer or in any related derivatives.
4	Canaccord Genuity acts as corporate broker for the relevant issuer and/or Canaccord Genuity or any of its affiliated companies may have an agreement with the relevant issuer relating to the provision of Corporate Finance/Investment Banking services.
5	Canaccord Genuity or any of its affiliated companies is a market maker or liquidity provider in the securities of the relevant issuer or in any related derivatives.
6	In the past 12 months, Canaccord Genuity, its partners, affiliated companies, officers or directors, or any authoring analyst involved in the preparation of this investment research has provided services to the relevant issuer for remuneration, other than normal course investment advisory or trade execution services.
7	Canaccord Genuity intends to seek or expects to receive compensation for Corporate Finance/Investment Banking services from the relevant issuer in the next six months.
8	The authoring analyst, a member of the authoring analyst's household, or any individual directly involved in the preparation of this investment research, has a long position in the shares or derivatives, or has any other financial interest in the relevant issuer, the value of which increases as the value of the underlying equity increases.
9	The authoring analyst, a member of the authoring analyst's household, or any individual directly involved in the preparation of this investment research, has a short position in the shares or derivatives, or has any other financial interest in the relevant issuer, the value of which increases as the value of the underlying equity decreases.
10	Those persons identified as the author(s) of this investment research, or any individual involved in the preparation of this investment research, have purchased/received shares in the relevant issuer prior to a public offering of those shares, and such person's name and details are disclosed above.
11	A partner, director, officer, employee or agent of Canaccord Genuity and its affiliated companies, or a member of his/her household, is an officer, or director, or serves as an advisor or board member of the relevant issuer and/or one of its subsidiaries, and such person's name is disclosed above.
12	As of the month end immediately preceding the date of publication of this investment research, or the prior month end if publication is within 10 days following a month end, Canaccord Genuity or its affiliate companies, in the aggregate, beneficially owned 1% or more of any class of the total issued share capital or other common equity securities of the relevant issuer or held any other financial interests in the relevant issuer which are significant in relation to the investment research (as disclosed above).
13	As of the month end immediately preceding the date of publication of this investment research, or the prior month end if publication is within 10 days following a month end, the relevant issuer owned 1% or more of any class of the total issued share capital in Canaccord Genuity or any of its affiliated companies.
14	Other specific disclosures as described above.

Canaccord Genuity is the business name used by certain subsidiaries of Canaccord Financial Inc., including Canaccord Genuity Inc., Canaccord Genuity Limited, Canaccord Genuity Securities LLC, and Canaccord Genuity Corp.

The authoring analysts who are responsible for the preparation of this investment research are employed by Canaccord Genuity Corp. a Canadian broker-dealer with principal offices located in Vancouver, Calgary, Toronto, Montreal, or Canaccord Genuity Inc., a US broker-dealer with principal offices located in Boston, New York, San Francisco and Houston or Canaccord Genuity Securities LLC, a US broker-dealer with principal offices located in New York or Canaccord Genuity Limited., a UK broker-dealer with principal offices located in London and Edinburgh (UK).

In the event that this is compendium investment research (covering six or more relevant issuers), Canaccord Genuity and its affiliated companies may choose to provide specific disclosures of the subject companies by

reference, as well as its policies and procedures regarding the dissemination of investment research. To access this material or for more information, please send a request to Canaccord Genuity Research, Attn: Disclosures, P.O. Box 10337 Pacific Centre, 2200-609 Granville Street, Vancouver, BC, Canada V7Y 1H2 or [disclosures@canaccordgenuity.com](mailto:disclosures@canaccordgenuity.com).

The authoring analysts who are responsible for the preparation of this investment research have received (or will receive) compensation based upon (among other factors) the Corporate Finance/Investment Banking revenues and general profits of Canaccord Genuity. However, such authoring analysts have not received, and will not receive, compensation that is directly based upon or linked to one or more specific Corporate Finance/Investment Banking activities, or to recommendations contained in the investment research.

Canaccord Genuity and its affiliated companies may have a Corporate Finance/Investment Banking or other relationship with the company that is the subject of this investment research and may trade in any of the designated investments mentioned herein either for their own account or the accounts of their customers, in good faith or in the normal course of market making. Accordingly, Canaccord Genuity or their affiliated companies, principals or employees (other than the authoring analyst(s) who prepared this investment research) may at any time have a long or short position in any such designated investments, related designated investments or in options, futures or other derivative instruments based thereon.

Some regulators require that a firm must establish, implement and make available a policy for managing conflicts of interest arising as a result of publication or distribution of investment research. This investment research has been prepared in accordance with Canaccord Genuity's policy on managing conflicts of interest, and information barriers or firewalls have been used where appropriate. Canaccord Genuity's policy is available upon request.

The information contained in this investment research has been compiled by Canaccord Genuity from sources believed to be reliable, but (with the exception of the information about Canaccord Genuity) no representation or warranty, express or implied, is made by Canaccord Genuity, its affiliated companies or any other person as to its fairness, accuracy, completeness or correctness. Canaccord Genuity has not independently verified the facts, assumptions, and estimates contained herein. All estimates, opinions and other information contained in this investment research constitute Canaccord Genuity's judgement as of the date of this investment research, are subject to change without notice and are provided in good faith but without legal responsibility or liability.

Canaccord Genuity's salespeople, traders, and other professionals may provide oral or written market commentary or trading strategies to our clients and our proprietary trading desk that reflect opinions that are contrary to the opinions expressed in this investment research. Canaccord Genuity's affiliates, principal trading desk, and investing businesses may make investment decisions that are inconsistent with the recommendations or views expressed in this investment research.

This investment research is provided for information purposes only and does not constitute an offer or solicitation to buy or sell any designated investments discussed herein in any jurisdiction where such offer or solicitation would be prohibited. As a result, the designated investments discussed in this investment research may not be eligible for sale in some jurisdictions. This investment research is not, and under no circumstances should be construed as, a solicitation to act as a securities broker or dealer in any jurisdiction by any person or company that is not legally permitted to carry on the business of a securities broker or dealer in that jurisdiction. This material is prepared for general circulation to clients and does not have regard to the investment objectives, financial situation or particular needs of any particular person. Investors should obtain advice based on their own individual circumstances before making an investment decision. To the fullest extent permitted by law, none of Canaccord Genuity, its affiliated companies or any other person accepts any liability whatsoever for any direct or consequential loss arising from or relating to any use of the information contained in this investment research.

**For Canadian Residents:** This Investment Research has been approved by Canaccord Genuity Corp., which accepts sole responsibility for this Investment Research and its dissemination in Canada. Canadian clients wishing to effect transactions in any Designated Investment discussed should do so through a qualified salesperson of Canaccord Genuity Corp. in their particular jurisdiction.

**For United States Residents:** Canaccord Genuity Inc. and Canaccord Genuity Securities LLC, US registered broker-dealers, accept responsibility for this Investment Research and its dissemination in the United States. This Investment Research is intended for distribution in the United States only to certain US institutional investors. US clients wishing to effect transactions in any Designated Investment discussed should do so through a qualified salesperson of Canaccord Genuity Inc. or Canaccord Genuity Securities LLC. Analyst(s) preparing this report that are not employed by Canaccord Genuity Inc. or Canaccord Genuity Securities LLC are resident outside the United States and are not associated persons or employees of any US regulated broker-dealer. Such analyst(s) may not be subject to Rule 2711 restrictions on communications with a subject company, public appearances and trading securities held by a research analyst account.

---

**For United Kingdom and European Residents:**

This investment research is distributed in the United Kingdom and elsewhere Europe, as third party research by Canaccord Genuity Limited, which is authorized and regulated by the Financial Services Authority. This research is for distribution only to persons who are Eligible Counterparties or Professional Clients only and is exempt from the general restrictions in section 21 of the Financial Services and Markets Act 2000 on the communication of invitations or inducements to engage in investment activity on the grounds that it is being distributed in the United Kingdom only to persons of a kind described in Article 19(5) (Investment Professionals) and 49(2) (High Net Worth companies, unincorporated associations etc) of the Financial Services and Markets Act 2000 (Financial Promotion) Order 2005 (as amended). It is not intended to be distributed or passed on, directly or indirectly, to any other class of persons. This material is not for distribution in the United Kingdom or elsewhere in Europe to retail clients, as defined under the rules of the Financial Services Authority.

**For Jersey, Guernsey and Isle of Man Residents:**

This research is sent to you by Collins Stewart (CI) Limited ("CSCI") for information purposes and is not to be construed as a solicitation or an offer to purchase or sell investments or related financial instruments. This research has been produced by a group company for circulation to its institutional clients and also CSCI. Its contents have been approved by CSCI and we are providing it to you on the basis that we believe it to be of interest to you. This statement should be read in conjunction with your client agreement, CSCI's current terms of business and the other disclosures and disclaimers contained within this research. If you are in any doubt, you should consult your financial adviser. CSCI is licensed and regulated by the Guernsey Financial Services Commission, the Jersey Financial Services Commission and the Isle of Man Financial Supervision Commission. CSCI is registered in Guernsey and is a wholly owned subsidiary of Canaccord Financial Inc.

## SHARE PRICE PERFORMANCE:

Source: Interactive Data Corporation

## COMPANY DESCRIPTION:

Fortis Inc. is a diversified, international utility company with assets over \$13.6 billion. Regulated holdings include electric distribution utilities in Alberta, BC, Ontario, Newfoundland, PEI and two Caribbean countries and a natural gas utility in BC. Fortis owns non-regulated generation assets across Canada and in Belize and Upper New York State. It also owns and operates hotels and commercial real estate in Canada.

All amounts in C\$ unless otherwise noted.  
Refer to page 2 for target price valuation methodology.

## Infrastructure -- Utilities

## RAISES EQUITY FOLLOWING CH ENERGY SHAREHOLDER APPROVAL OF ACQUISITION

## Investment recommendation

The shareholders of CH Energy voted 92% in favour of Fortis' acquisition of the New York natural gas and electric transmission and distribution utility at US\$65 per share. Also, Fortis announced a \$601 million bought deal offering of subscription receipts (\$691 million if the over-allotment is exercised) to fund a portion of the acquisition. Both announcements were expected and were previously factored into our financial analysis. The acquisition is expected to close in Q1/13 and is subject to approval by the Federal Energy Regulatory Commission, the Federal Trade Commission, and the Public Service Commission, along with other normal closing conditions. As announced in February, Fortis is paying \$1.5 billion (including the assumption of ~US\$500 million of debt), which we calculate to be about a 45% premium to rate base and 96% premium to equity. While we expect the acquisition to be accretive to annual earnings per share beginning in 2013, given the full price being paid for CH Energy, we estimate the accretion to be only a few cents per share on an annual basis (depending on the cost of permanent debt financing). With planned capital investments of \$100 million annually through 2016 into CH Energy's rate base, we expect the forecast return to improve over time.

## Investment highlights

- Receives CH Energy shareholder approval for acquisition
  - US\$1.5 billion, includes US\$500 million debt assumption
  - Expected to close in Q1/13
- Acquisition expected to be slightly accretive to full year earnings
- \$601 million subscription receipt offering to partially fund the acquisition
- HOLD rating and C\$33.00 target price unchanged

Canaccord Genuity is the global capital markets group of Canaccord Financial Inc. (CF : TSX | CF. : AIM)

The recommendations and opinions expressed in this Investment Research accurately reflect the Investment Analyst's personal, independent and objective views about any and all the Designated Investments and Relevant Issuers discussed herein. For important information, please see the Important Disclosures section in the appendix of this document or visit Canaccord Genuity's [Online Disclosure Database](#).

**Valuation**

Our 12-month target price is derived from a combination of valuation metrics that include earnings and dividend yields relative to long-term interest rates, dividend discount models, and earnings and cash flow multiples relative to both historical valuation and its utility and pipeline peers.

**Investment risks**

Some of the specific risk factors that pertain to our projected 12-month stock price target for Fortis include, but are not limited to: (1) price movements in electricity rates and commodities used for electricity generation could impact profitability; (2) international operations have currency rate exposure and liquidity risks associated with those currencies; (3) credit risk of contract counterparties could improve or deteriorate; (4) debt refinancing at different interest rates could impact the income of the company; (5) equipment failure or extreme weather conditions could adversely affect operating facilities; (6) change in public policy on environmental health and safety risk could impose unexpected costs on Fortis; (7) change in regulatory or political climate could impact profitability and future growth and development of Fortis; (8) the inability to maintain, or to renew, the collective bargaining agreements with unionized workers on acceptable terms could result in increased labour costs or service interruptions arising from labour disputes; (9) economic conditions which may impact demand for products and services, peer group valuation, access to capital and share trading liquidity; (10) Fortis holds investments in commercial real estate and hotel properties which are subject to operating risks associated with the industry.

---

**APPENDIX: IMPORTANT DISCLOSURES****Analyst Certification:**

Each authoring analyst of Canaccord Genuity whose name appears on the front page of this investment research hereby certifies that (i) the recommendations and opinions expressed in this investment research accurately reflect the authoring analyst's personal, independent and objective views about any and all of the designated investments or relevant issuers discussed herein that are within such authoring analyst's coverage universe and (ii) no part of the authoring analyst's compensation was, is, or will be, directly or indirectly, related to the specific recommendations or views expressed by the authoring analyst in the investment research.

**Site Visit:**

An analyst has visited Fortis's material operations in BC. No payment or reimbursement was received from the issuer for related travel costs.

	970	100.0%		

**Canaccord Genuity Ratings System:**

**BUY:** The stock is expected to generate risk-adjusted returns of over 10% during the next 12 months.

**HOLD:** The stock is expected to generate risk-adjusted returns of 0-10% during the next 12 months.

**SELL:** The stock is expected to generate negative risk-adjusted returns during the next 12 months.

**NOT RATED:** Canaccord Genuity does not provide research coverage of the relevant issuer.

"Risk-adjusted return" refers to the expected return in relation to the amount of risk associated with the designated investment or the relevant issuer.

**Risk Qualifier:**

**SPECULATIVE:** Stocks bear significantly higher risk that typically cannot be valued by normal fundamental criteria. Investments in the stock may result in material loss.

**Canaccord Genuity Research Disclosures as of 19 June 2012**

Company	Disclosure
Fortis Inc.	7
1	The relevant issuer currently is, or in the past 12 months was, a client of Canaccord Genuity or its affiliated companies. During this period, Canaccord Genuity or its affiliated companies provided the following services to the relevant issuer: A. investment banking services. B. non-investment banking securities-related services. C. non-securities related services.
2	In the past 12 months, Canaccord Genuity or its affiliated companies have received compensation for Corporate Finance/Investment Banking services from the relevant issuer.
3	In the past 12 months, Canaccord Genuity or any of its affiliated companies have been lead manager, co-lead manager or co-manager of a public offering of securities of the relevant issuer or any publicly disclosed offer of securities of the relevant issuer or in any related derivatives.
4	Canaccord Genuity acts as corporate broker for the relevant issuer and/or Canaccord Genuity or any of its affiliated companies may have an agreement with the relevant issuer relating to the provision of Corporate Finance/Investment Banking services.
5	Canaccord Genuity or any of its affiliated companies is a market maker or liquidity provider in the securities of the relevant issuer or in any related derivatives.
6	In the past 12 months, Canaccord Genuity, its partners, affiliated companies, officers or directors, or any authoring analyst involved in the preparation of this investment research has provided services to the relevant issuer for remuneration, other than normal course investment advisory or trade execution services.
7	Canaccord Genuity intends to seek or expects to receive compensation for Corporate Finance/Investment Banking services from the relevant issuer in the next six months.
8	The authoring analyst, a member of the authoring analyst's household, or any individual directly involved in the preparation of this investment research, has a long position in the shares or derivatives, or has any other financial interest in the relevant issuer, the value of which increases as the value of the underlying equity increases.
9	The authoring analyst, a member of the authoring analyst's household, or any individual directly involved in the preparation of this investment research, has a short position in the shares or derivatives, or has any other financial interest in the relevant issuer, the value of which increases as the value of the underlying equity decreases.
10	Those persons identified as the author(s) of this investment research, or any individual involved in the preparation of this investment research, have purchased/received shares in the relevant issuer prior to a public offering of those shares, and such person's name and details are disclosed above.
11	A partner, director, officer, employee or agent of Canaccord Genuity and its affiliated companies, or a member of his/her household, is an officer, or director, or serves as an advisor or board member of the relevant issuer and/or one of its subsidiaries, and such person's name is disclosed above.
12	As of the month end immediately preceding the date of publication of this investment research, or the prior month end if publication is within 10 days following a month end, Canaccord Genuity or its affiliate companies, in the aggregate, beneficially owned 1% or more of any class of the total issued share capital or other common equity securities of the relevant issuer or held any other financial interests in the relevant issuer which are significant in relation to the investment research (as disclosed above).
13	As of the month end immediately preceding the date of publication of this investment research, or the prior month end if publication is within 10 days following a month end, the relevant issuer owned 1% or more of any class of the total issued share capital in Canaccord Genuity or any of its affiliated companies.
14	Other specific disclosures as described above.

Canaccord Genuity is the business name used by certain subsidiaries of Canaccord Financial Inc., including Canaccord Genuity Inc., Canaccord Genuity Limited, Canaccord Genuity Securities LLC, and Canaccord Genuity Corp.

The authoring analysts who are responsible for the preparation of this investment research are employed by Canaccord Genuity Corp. a Canadian broker-dealer with principal offices located in Vancouver, Calgary, Toronto, Montreal, or Canaccord Genuity Inc., a US broker-dealer with principal offices located in Boston, New York, San Francisco and Houston or Canaccord Genuity Securities LLC, a US broker-dealer with principal offices located in New York or Canaccord Genuity Limited., a UK broker-dealer with principal offices located in London and Edinburgh (UK).

In the event that this is compendium investment research (covering six or more relevant issuers), Canaccord Genuity and its affiliated companies may choose to provide specific disclosures of the subject companies by

reference, as well as its policies and procedures regarding the dissemination of investment research. To access this material or for more information, please send a request to Canaccord Genuity Research, Attn: Disclosures, P.O. Box 10337 Pacific Centre, 2200-609 Granville Street, Vancouver, BC, Canada V7Y 1H2 or [disclosures@canaccordgenuity.com](mailto:disclosures@canaccordgenuity.com).

The authoring analysts who are responsible for the preparation of this investment research have received (or will receive) compensation based upon (among other factors) the Corporate Finance/Investment Banking revenues and general profits of Canaccord Genuity. However, such authoring analysts have not received, and will not receive, compensation that is directly based upon or linked to one or more specific Corporate Finance/Investment Banking activities, or to recommendations contained in the investment research.

Canaccord Genuity and its affiliated companies may have a Corporate Finance/Investment Banking or other relationship with the company that is the subject of this investment research and may trade in any of the designated investments mentioned herein either for their own account or the accounts of their customers, in good faith or in the normal course of market making. Accordingly, Canaccord Genuity or their affiliated companies, principals or employees (other than the authoring analyst(s) who prepared this investment research) may at any time have a long or short position in any such designated investments, related designated investments or in options, futures or other derivative instruments based thereon.

Some regulators require that a firm must establish, implement and make available a policy for managing conflicts of interest arising as a result of publication or distribution of investment research. This investment research has been prepared in accordance with Canaccord Genuity's policy on managing conflicts of interest, and information barriers or firewalls have been used where appropriate. Canaccord Genuity's policy is available upon request.

The information contained in this investment research has been compiled by Canaccord Genuity from sources believed to be reliable, but (with the exception of the information about Canaccord Genuity) no representation or warranty, express or implied, is made by Canaccord Genuity, its affiliated companies or any other person as to its fairness, accuracy, completeness or correctness. Canaccord Genuity has not independently verified the facts, assumptions, and estimates contained herein. All estimates, opinions and other information contained in this investment research constitute Canaccord Genuity's judgement as of the date of this investment research, are subject to change without notice and are provided in good faith but without legal responsibility or liability.

Canaccord Genuity's salespeople, traders, and other professionals may provide oral or written market commentary or trading strategies to our clients and our proprietary trading desk that reflect opinions that are contrary to the opinions expressed in this investment research. Canaccord Genuity's affiliates, principal trading desk, and investing businesses may make investment decisions that are inconsistent with the recommendations or views expressed in this investment research.

This investment research is provided for information purposes only and does not constitute an offer or solicitation to buy or sell any designated investments discussed herein in any jurisdiction where such offer or solicitation would be prohibited. As a result, the designated investments discussed in this investment research may not be eligible for sale in some jurisdictions. This investment research is not, and under no circumstances should be construed as, a solicitation to act as a securities broker or dealer in any jurisdiction by any person or company that is not legally permitted to carry on the business of a securities broker or dealer in that jurisdiction. This material is prepared for general circulation to clients and does not have regard to the investment objectives, financial situation or particular needs of any particular person. Investors should obtain advice based on their own individual circumstances before making an investment decision. To the fullest extent permitted by law, none of Canaccord Genuity, its affiliated companies or any other person accepts any liability whatsoever for any direct or consequential loss arising from or relating to any use of the information contained in this investment research.

**For Canadian Residents:** This Investment Research has been approved by Canaccord Genuity Corp., which accepts sole responsibility for this Investment Research and its dissemination in Canada. Canadian clients wishing to effect transactions in any Designated Investment discussed should do so through a qualified salesperson of Canaccord Genuity Corp. in their particular jurisdiction.

**For United States Residents:** Canaccord Genuity Inc. and Canaccord Genuity Securities LLC, US registered broker-dealers, accept responsibility for this Investment Research and its dissemination in the United States. This Investment Research is intended for distribution in the United States only to certain US institutional investors. US clients wishing to effect transactions in any Designated Investment discussed should do so through a qualified salesperson of Canaccord Genuity Inc. or Canaccord Genuity Securities LLC. Analyst(s) preparing this report that are not employed by Canaccord Genuity Inc. or Canaccord Genuity Securities LLC are resident outside the United States and are not associated persons or employees of any US regulated broker-dealer. Such analyst(s) may not be subject to Rule 2711 restrictions on communications with a subject company, public appearances and trading securities held by a research analyst account.

**COMPANY DESCRIPTION:**

Fortis Inc. is a diversified, international utility company with assets over \$13.6 billion. Regulated holdings include electric distribution utilities in Alberta, BC, Ontario, Newfoundland, PEI and two Caribbean countries and a natural gas utility in BC. Fortis owns non-regulated generation assets across Canada and in Belize and Upper New York State. It also owns and operates hotels and commercial real estate in Canada.

All amounts in C\$ unless otherwise noted.

**Infrastructure -- Utilities****STEADFAST OPERATIONS DELIVER ANOTHER STABLE QUARTER****Investment recommendation**

Fortis reported second quarter recurring earnings of \$0.32 per share, in line with our estimate as well as the consensus estimate of \$0.33. The company's operations are performing in line with no material surprises in the quarter. Approximately 90% of Fortis' earnings are provided by stable utility operations. Currently, the company is in the midst of a regulatory approval process for its acquisition of New York based utility, CH Energy. The \$1.5 billion acquisition is expected to close in the first quarter of 2013 and should be immediately accretive to earnings per share, excluding acquisition-related costs. Going forward, Fortis' earnings are expected to continue to grow through its utility businesses, mainly in western Canada where the bulk of its \$5.5 billion capital expenditure program is to be implemented through 2016. Note that the program increases to \$6 billion with the addition of CH Energy's capital expenditures if the acquisition is approved. We believe the shares are currently fairly valued and are maintaining our C\$34.00 target price and HOLD rating.

**Investment highlights**

- Q2 recurring earnings per share of \$0.32
  - In-line with expectations
- Operations in line
  - No change to 2012 and 2013 EPS estimates
- \$5.5 billion capital expenditure program expected to drive earnings growth through 2016
  - Integration of CH Energy could potentially add another \$500 million
- No change to C\$34.00 target price and HOLD rating

**Valuation**

Our 12-month target price is derived from a combination of valuation metrics that include earnings and dividend yields relative to long-term interest rates, dividend discount models, and earnings and cash flow multiples relative to both historical valuation and the company's utility and pipeline peers.

Canaccord Genuity is the global capital markets group of Canaccord Financial Inc. (CF : TSX | CF. : LSE)

The recommendations and opinions expressed in this research report accurately reflect the Investment Analyst's personal, independent and objective views about any and all the Designated Investments and Relevant Issuers discussed herein. For important information, please see the Important Disclosures section in the appendix of this document or visit Canaccord Genuity's [Online Disclosure Database](#).

**Outlook**

We are making no changes to our 2012 and 2013 earnings estimates of \$1.70 and \$1.80 per share, respectively. The company continues to progress with its \$5.5 billion capital expenditure program (for the 2012-2016 period) with \$511 million spent to date. Note that a majority (~85%) of the capital program will be invested in the company's Canadian utility operations, primarily in western Canada. This large capital spending program is expected to provide the bulk of EPS and dividend growth for the medium term.

On the regulatory front, Fortis currently faces a Generic Cost of Capital hearing at its BC utilities. Although the final outcome is uncertain, we suspect that the company's allowed return on equity may be adjusted downwards beginning in January 2013. A decision from the British Columbia Utilities Commission on the generic cost of capital is expected early next year, but the impact of the decision would likely be retroactive to January 1, 2013. Our estimates do not factor in lower allowed returns at Fortis' BC utilities, but we estimate that a 100 bps decline in the allowed ROE may impact 2013 earnings by up to \$0.07 per share.

The \$1.5 billion acquisition of CH Energy is currently under review by the Federal Energy Regulatory Commission, the Federal Trade Commission and the New York Public Service Commission, and is expected to close in Q1/13. We estimate the acquisition to be accretive by a few cents per share to annual earnings, excluding acquisition-related costs. If approved, the unit could potentially add another \$500 million of growth capex to Fortis' current \$5.5 billion capital expenditure program over the next five years.

**Second quarter earnings summary**

Fortis reported second quarter recurring earnings of \$0.32 per share, in line with both our estimate and the consensus estimate. Our calculation of recurring earnings adjusts for \$3 million of after tax acquisition costs as well as \$4.5 million of earnings from regulatory decisions related to Q1/12, but accrued in the second quarter. EPS in Q2/11 was \$0.31. The improvement was largely due to a \$6 million (\$0.03 per share) increase in earnings at FortisAlberta driven by rate base growth. In addition, the company's non-regulated hydro generation business in Belize benefitted from improved hydrology, increasing the segment's contribution by \$3 million compared to last year (although only modestly above the long term average). These increases were offset by mildly lower contributions from FortisBC energy companies, as well as the dilutive effect of the 10.3 million share issue in June 2011. All other operations were comparable y/y. YTD, the company has reported recurring earnings per share of \$1.00 compared to \$0.97 for the first half of 2011. For additional details on second quarter results, please refer to Figure 1.

---

**Noteworthy items**

- Capital expenditure plan
    - \$5.5 billion of capex from 2012 through 2016
      - Potential for \$500 million more if CH Energy acquisition is closed
    - 65% to be spent at regulated electricity operations
      - Mainly FortisAlberta and FortisBC Electric
    - 21% to be spent at regulated natural gas companies
    - 14% towards non-regulated operations
  - Utility acquisitions
    - In discussions with City of Kelowna to purchase the city's electricity distribution utility for >\$50 million
      - Fortis has been operating and maintaining the assets since 2000 and sells wholesale electricity to the utility already
      - Approximately 15,000 customers
      - Expected to close in Q1/13
      - Close subject to negotiation of definitive agreements and regulatory as well as municipal approvals
    - Exercised its option to acquire City of Port Colborne's electricity distribution assets for \$7 million in April 2012
  - Regulatory
    - FortisAlberta received a positive decision from the AUC denying the Central Alberta Rural Electrification Association's request to be entitled to service customers in overlapping service areas
-

**APPENDIX: IMPORTANT DISCLOSURES**

This Research Report was prepared by the affiliate company in the Canaccord Group named on the cover page.

**Analyst Certification:**

Each authoring analyst of Canaccord Genuity whose name appears on the front page of this research hereby certifies that (i) the recommendations and opinions expressed in this research accurately reflect the authoring analyst's personal, independent and objective views about any and all of the designated investments or relevant issuers discussed herein that are within such authoring analyst's coverage universe and (ii) no part of the authoring analyst's compensation was, is, or will be, directly or indirectly, related to the specific recommendations or views expressed by the authoring analyst in the research.

**Site Visit:**

An analyst has visited Fortis's material operations in BC. No payment or reimbursement was received from the issuer for related travel costs.

**Price Chart:\*****Distribution of Ratings:**

Global Stock Ratings  
(as of 3 July 2012)

Rating	Coverage Universe		IB Clients
	#	%	%
Buy	590	60.9%	30.5%
Speculative Buy	88	9.1%	51.1%
Hold	263	27.1%	11.8%
Sell	28	2.9%	3.6%
	969	100.0%	

**Canaccord Genuity Ratings System:**

**BUY:** The stock is expected to generate risk-adjusted returns of over 10% during the next 12 months.

**HOLD:** The stock is expected to generate risk-adjusted returns of 0-10% during the next 12 months.

**SELL:** The stock is expected to generate negative risk-adjusted returns during the next 12 months.

**NOT RATED:** Canaccord Genuity does not provide research coverage of the relevant issuer.

"Risk-adjusted return" refers to the expected return in relation to the amount of risk associated with the designated investment or the relevant issuer.

**Risk Qualifier:**

**SPECULATIVE:** Stocks bear significantly higher risk that typically cannot be valued by normal fundamental criteria. Investments in the stock may result in material loss.

## Canaccord Genuity Research Disclosures as of 31 July 2012

Company	Disclosure
Fortis Inc.	7
1	The relevant issuer currently is, or in the past 12 months was, a client of Canaccord Genuity or its affiliated companies. During this period, Canaccord Genuity or its affiliated companies provided the following services to the relevant issuer: A. investment banking services. B. non-investment banking securities-related services. C. non-securities related services.
2	In the past 12 months, Canaccord Genuity or its affiliated companies have received compensation for Corporate Finance/Investment Banking services from the relevant issuer.
3	In the past 12 months, Canaccord Genuity or any of its affiliated companies have been lead manager, co-lead manager or co-manager of a public offering of securities of the relevant issuer or any publicly disclosed offer of securities of the relevant issuer or in any related derivatives.
4	Canaccord Genuity acts as corporate broker for the relevant issuer and/or Canaccord Genuity or any of its affiliated companies may have an agreement with the relevant issuer relating to the provision of Corporate Finance/Investment Banking services.
5	Canaccord Genuity or any of its affiliated companies is a market maker or liquidity provider in the securities of the relevant issuer or in any related derivatives.
6	In the past 12 months, Canaccord Genuity, its partners, affiliated companies, officers or directors, or any authoring analyst involved in the preparation of this research has provided services to the relevant issuer for remuneration, other than normal course investment advisory or trade execution services.
7	Canaccord Genuity intends to seek or expects to receive compensation for Corporate Finance/Investment Banking services from the relevant issuer in the next six months.
8	The authoring analyst, a member of the authoring analyst's household, or any individual directly involved in the preparation of this research, has a long position in the shares or derivatives, or has any other financial interest in the relevant issuer, the value of which increases as the value of the underlying equity increases.
9	The authoring analyst, a member of the authoring analyst's household, or any individual directly involved in the preparation of this research, has a short position in the shares or derivatives, or has any other financial interest in the relevant issuer, the value of which increases as the value of the underlying equity decreases.
10	Those persons identified as the author(s) of this research, or any individual involved in the preparation of this research, have purchased/received shares in the relevant issuer prior to a public offering of those shares, and such person's name and details are disclosed above.
11	A partner, director, officer, employee or agent of Canaccord Genuity and its affiliated companies, or a member of his/her household, is an officer, or director, or serves as an advisor or board member of the relevant issuer and/or one of its subsidiaries, and such person's name is disclosed above.
12	As of the month end immediately preceding the date of publication of this research, or the prior month end if publication is within 10 days following a month end, Canaccord Genuity or its affiliate companies, in the aggregate, beneficially owned 1% or more of any class of the total issued share capital or other common equity securities of the relevant issuer or held any other financial interests in the relevant issuer which are significant in relation to the research (as disclosed above).
13	As of the month end immediately preceding the date of publication of this research, or the prior month end if publication is within 10 days following a month end, the relevant issuer owned 1% or more of any class of the total issued share capital in Canaccord Genuity or any of its affiliated companies.
14	Other specific disclosures as described above.

Canaccord Genuity is the business name used by certain subsidiaries of Canaccord Financial Inc., including Canaccord Genuity Inc., Canaccord Genuity Limited, Canaccord Genuity Securities LLC, and Canaccord Genuity Corp.

The authoring analysts who are responsible for the preparation of this research are employed by Canaccord Genuity Corp. a Canadian broker-dealer with principal offices located in Vancouver, Calgary, Toronto, Montreal, or Canaccord Genuity Inc., a US broker-dealer with principal offices located in Boston, New York, San Francisco and Houston or Canaccord Genuity Securities LLC, a US broker-dealer with principal offices located in New York or Canaccord Genuity Limited., a UK broker-dealer with principal offices located in London and Edinburgh (UK).

In the event that this is compendium research (covering six or more relevant issuers), Canaccord Genuity and its affiliated companies may choose to provide specific disclosures of the subject companies by reference, as well as its policies and procedures regarding the dissemination of research. ## Fortis Inc.

### Solid Low-risk Growth, Already Priced In

- Fortis has expanded from its Atlantic Canada roots through a series of acquisitions to now own a strong western Canadian franchise and operations in the Caribbean. Acquired businesses have grown rapidly post-acquisition given ongoing investments and customer growth.
- The pace of growth is unlikely to slow in the short term, as Fortis is in the early stages of a five-year, \$5.5 billion capital program, which is expected to increase the regulated rate base by a CAGR of 6% and includes 51% of the non-regulated \$900 million Waneta expansion project.
- Fortis provides the benefits (stability) of its regulated utility business, but is in a period of solid organic investment and growth. Risks from non-regulated assets (Waneta) and international operations (Belize) appear containable, with little variability expected from overall operations.
- Our main concern is valuation. Despite solid low-risk growth, we believe the stock already reflects this outlook and expect a modest TSR of 8.3% to our price target. We are, therefore, initiating coverage with a Sector Performer rating and \$34.50 price target, as of May 24.

## Investment Thesis

Fortis provides the benefits (stability) of a regulated utility, and is in a period of solid organic investment and growth as the company delivers on its 5 year, \$5.5 billion capital program which is expected to grow the regulated rate base by a CAGR of 6% through 2015. The company is also a 51% owner of the non-regulated \$900 million Waneta Expansion project.

## Investment Summary

Fortis Inc. (FTS-SP) has expanded from its Atlantic Canada roots through a series of acquisitions to now own a strong western Canadian franchise and operations in the Caribbean. Western Canadian operations have continued to grow post-acquisition, with, for instance, FortisAlberta and FortisBC, both acquired in May 2004, growing their combined rate base at a compound average annual growth rate (CAGR) of over 12% since acquisition. Terasen Gas (now FortisBC Energy) has grown its rate base on average by 3.2% annually since its acquisition in May 2007. Fortis' Caribbean operations have grown through a series of acquisitions and development initiatives.

The pace of growth is unlikely to slow in the short term, as Fortis is in the early stages of a five-year, \$5.5 billion capital program expected to grow the overall rate base on average by 6% annually from 2010 through 2015. In addition, the company is a 51% owner in the non-regulated \$900 million Waneta Hydroelectric Expansion Project, currently under construction with a spring 2015 in-service date.

For the most part, Fortis has remained focused on its distribution utility roots, an area in which the company has proficiency: managing its distribution assets, dealing with large numbers of customers, and operating within a highly regulated environment. As such, Fortis offers the benefits of a stable, regulated utility business with the upside provided by significant growth investments (at least, significant growth in context of a regulated utility). While the company already owns a number of non-regulated hydroelectric generation facilities, the Waneta Expansion stands out given its size (\$900 million), but major risks (construction, financing, hydrology) appear well contained. Adverse regulatory rulings in Belize reveal the heightened risks of operating in Central America. However, we expect little variability in overall company results given the heavy weighting to Canadian regulated businesses.

Our main concern is one of valuation: trading at 18.4x estimated 2011 and 17.5x estimated 2012 earnings and with a 3.5% yield, the stock is reflecting both the solid growth outlook as well as the current low interest rate environment. We acknowledge Fortis' solid, low-risk, growth forecast, and believe it justifies Fortis' premium current-year earnings multiple versus the Canadian utilities group average of 16.4x and the broader pipelines and utilities group average of 18.2x. Our fundamental discounted cash flow (DCF) valuation supports a price target of \$34.50/share, for a target multiple of 18.3x estimated 2012 earnings. This represents a 12-month total shareholder return (including dividends) of 8.3%, in line with our group average of 8.5%. As such, we believe the stock fairly represents the company's outlook and we are initiating coverage, as of May 24, with a Sector Performer rating and \$34.50 price target.

## Asset Overview

Fortis owns a number of regulated utilities (eight electric, one gas) with total assets of \$11.9 billion, non-regulated hydro generation facilities (\$0.4 billion) and non-regulated real estate assets (\$0.6 billion) held for tax optimization purposes. The western Canadian operations represent over 70% of rate base assets, including: FortisBC gas (40%) and electric (13%), and FortisAlberta (20%). The remainder of regulated operations are in Ontario, Atlantic Canada, Central America (Belize) and the Caribbean.

### Exhibit 1. Regulated Operations (2010)

Company	Customers	Peak Demand	Rate Base (\$ blns.)	Earnings (\$ mlns.)	Allowed ROE (2011)
FortisBC Energy (Terasen)	949,000	1,421 TJ	\$3.4	\$130	9.50%
FortisAlberta	491,000	2,555 MW	1.7	68	9.00%
FortisBC	161,000	707 MW	1.1	42	9.90%
Newfoundland Power	243,000	1,206 MW	0.9	35	8.38%
Maritime Electric	74,000	207 MW	0.3	12	9.75%
FortisOntario	64,000	273 MW	0.2	7	8.01%–9.85%
Belize Electricity	77,000	81 MW	0.2	2	To be resolved
Caribbean Utilities	26,000	102 MW	0.4	11	7.75%–9.75%
Fortis Turks and Caicos	9,000	31 MW	0.2	10	17.50%

### FortisBC Energy (Formerly Terasen)

FortisBC Energy is the largest distributor of natural gas in British Columbia, serving virtually all the province's gas users. FortisBC Energy also owns a natural gas pipeline from the mainland across the Georgia Strait to service customers on Vancouver Island. Gas is sourced from northeastern BC, and from Alberta via FortisBC Energy's Southern Crossing Pipeline.

FortisBC Energy comprises three separate entities, formerly known as Terasen Gas, Terasen Gas (Vancouver Island) and Terasen Gas (Whistler). In March 2011, FortisBC Energy (and its separate Vancouver Island and Whistler entities) was rebranded from Terasen Gas to share the FortisBC name used by the company's electric utility in the province, although it will remain a separate legal entity from the FortisBC electric utility. The three separate Terasen entities are also proposing an amalgamation into one, with a regulatory application for this expected in 2011.

FortisBC Energy's allowed rate of return on equity is 9.5% [10% for FortisBC Energy (Vancouver Island) and for FortisBC Energy (Whistler)] with a 40% equity component on a total rate base of \$3.4 billion. These rates were increased by roughly 100 basis points (bps) in mid-2009. Commodity costs of natural gas (and propane gas for customers in the Revelstoke area) and mid-stream costs are flowed through to customers without mark-up.

Growth in the gas operations comes from customer additions (currently running around 1% of the installed base), as well as capital improvement projects such as: replacing suspended pipelines over the Columbia and Fraser Rivers with pipelines buried underneath the rivers; constructing a new natural gas storage facility on Vancouver Island; and, converting Whistler from propane to natural gas. FortisBC Energy had capital expenditures of \$253 million in 2010 with a further \$281 million planned for 2011 to be spent on completion of the above-noted projects, ongoing implementation of a new customer information system and related call centers, and normal course capital expenditures.

## Regulated Electric Utilities – Canadian

- **FortisBC:** FortisBC is an integrated electric utility serving 161,000 customers in the southern interior of BC. The company owns ~7,000 km of transmission and distribution lines as well as four hydro projects on the Kootenay River with combined capacity of 223 MW, which generate about 45% of the utility's energy requirements, with the balance met through Power Purchase Agreements (PPAs) with third parties. FortisBC also manages a further 947 MW of hydro generation facilities in the region. Allowed ROE is 9.9% on a rate base of \$1.1 billion. Capital expenditures of \$139 million in 2010 and planned \$99 million in 2011 are directed at various system upgrades and the substantial completion of the major \$106 million Okanagan Transmission Reinforcement Project.
- **FortisAlberta:** FortisAlberta is an electric utility serving about half a million customers in southern Alberta. The company owns 112,000 km of distribution lines, representing 45% of Alberta's low voltage distribution system. Allowed ROE is 9.0% on a rate base of \$1.7 billion, although FortisAlberta is seeking a higher allowed ROE (e.g., more in line with that of FortisBC, which is at 9.9%). Growth stems from new customer additions (about 2% annually) and capital projects, including: a \$126 million project to install automated meters, the connection of multiple renewable power generation projects, and capacity expansions. Total capital expenditures were \$379 million in 2010 and Fortis is forecasting a rise to \$420 million in 2011, directed to the capital programs noted above as well as to payments to the Alberta Electric System Operator (AESO) for major transmission system upgrades.
- **FortisOntario:** FortisOntario is a small electric utility servicing regions in northern, southwestern and eastern Ontario, with a total customer base of 64,000 customers. Allowed ROE ranges from 8.01% (Canadian Niagara Power) to 9.85% (for the Algoma Power assets acquired in 2009), with a 40% equity component on a rate base of \$0.2 billion.
- **Newfoundland Power:** Newfoundland Power is the main electricity distribution utility in Newfoundland with about a quarter of a million customers – about 85% of electricity consumers in the province. The utility purchases over 90% of its electricity from Newfoundland and Labrador Hydro (a division of Nalcor Energy), but generates the remainder from its own (primarily hydro) facilities. The business has 11,000 km of transmission and distribution lines and has installed generating capacity of 139 MW. Allowed ROE is a (comparatively low) 8.38% for 2011, but on a higher-than-average equity component of 45%. Rate base assets total \$0.9 billion. Fortis made capital investments totaling \$78 million in 2010, and expects to invest a further \$73 million in 2011 towards customer additions, and system upgrades and maintenance.
- **Maritime Electric:** Maritime Electric is the main electricity utility on Prince Edward Island, serving about 74,000 customers (90% of electricity consumers). The utility has ~5,300 km of transmission and distribution lines, and has an in-house generating capacity of 150 MW from thermal-powered units although it purchases the majority (86%) of electricity needs from New Brunswick Power. Allowed ROE is 9.75%, with a 40% equity component on rate base assets of \$0.3 billion. Capital spending is being directed to improved system reliability, and connections to new renewable power projects as the business works towards a target of 30% of power sourced from renewable energy by 2013.

## Regulated Electric Utilities – Caribbean

- **Belize Electricity:** Although located in Central America, Belize Electricity (BEL) is grouped in with Fortis' Caribbean businesses. Belize Electricity is the primary distributor of electricity in the country, serving 77,000 customers. Fortis owns 70% of Belize Electricity. Historically, BEL purchased about half its power from CFE, the Mexican state-owned electricity company, but recent investments in non-regulated hydro projects by Belize Electric Company (BECOL), part of Fortis Generation, as well as a new (third-party-owned) cogeneration facility, make the country self-sufficient. Unfortunately for Fortis, Belize is proving an unfriendly regulatory regime. BEL continues to battle the Belize Public Utilities Commission, which, in a reversal of prior rulings, has effectively forced BEL to absorb the cost of high oil prices in 2008 and further ordered BEL to lower electricity rates. In March 2011, BEL's appeal of these rulings to the Supreme Court of Belize was denied, and the company continues to evaluate its options to appeal the ruling.
- **Caribbean Utilities:** Caribbean Utilities serves 26,000 customers on Grand Cayman Island, with ~500 km of transmission and distribution lines and a 24 km subsea cable, and 17 generating units with a combined capacity of ~150 MW, sufficient to satisfy domestic requirements. The division's capital spending decreased 50% in 2010 to \$21 million from \$43 million in 2009, which included \$19 million related to a new 16 MW diesel generating unit.
- **Fortis Turks & Caicos:** Fortis Turks and Caicos serves 9,000 customers, approximately 88% of electricity consumers on the islands, owning and operating 325 km of transmission and distribution lines and 57 MW of diesel generation capacity, sufficient to meet demand.

## Fortis Generation – Non-regulated

Fortis Generation is comprised primarily of a number of small non-regulated power generation projects with combined capacity of 139 MW, 134 MW of which is hydro. Power is sold through a mix of long-term contracts or into the market. The generation facilities are located near, and for the most part are complementary to, Fortis' utility operations in Belize, eastern Ontario, Newfoundland, and BC, although Fortis also owns four small hydro facilities in Upper New York State.

Fortis has also announced a major investment in the Waneta Expansion Hydro Project in south central BC. Fortis own 51% of the project and will also purchase some of the power from the project through its FortisBC subsidiary (more on this below).

## Fortis Properties – Non-regulated

Fortis Properties includes approximately 2.7 million square feet of office and retail space primarily in Atlantic Canada and 21 hotels across the country. These properties have been acquired through a series of property-specific acquisitions through the years. The company's intent in owning these properties is to generate income sufficient to fully offset corporate costs that otherwise would not be utilized (for tax purposes), as profits in the regulated subsidiaries are not transferable. The subsidiary earned \$26 million in 2010 on assets of \$0.6 billion.

## Growth Initiatives

Fortis has a projected five-year average annual growth rate for its rate base of 6% from \$7.7 billion in 2010 to \$10.1 billion by 2015. In addition to the regular course-of-business growth projects noted above, we specifically note the following:

### Waneta Hydroelectric Expansion Project

Fortis announced in August 2010 that it will invest in a major hydro generation project to expand the existing Waneta Dam in south central BC. The existing 493 MW Waneta hydro project is owned by Teck Resources (TCK-SO) (2/3) and BC Hydro (1/3). The \$900 million, 335 MW Waneta Expansion Project will be 51%-owned by Fortis and the remainder by Columbia Power Corporation and Columbia Basin Trust, Crown corporations of the province of BC. Fortis will fund its 51% share of the construction costs, and will operate and maintain the facility once in service, expected by spring 2015. Fortis expects the project ROE to be about 200 bps higher than that on the company's regulated assets (i.e., about 11.5%–12.5% over the life of the project).

This project meets FortisBC's requirement for extra capacity to meet periods of peak demand, although actual energy usage is expected to be relatively modest, with BC Hydro purchasing the bulk of the generated power. As such, the Waneta Expansion will receive fixed energy and capacity payments, with 630 GWh (energy and related capacity) sold to BC Hydro under a long-term (40 year) agreement, and surplus capacity (on an average annual basis of 234 MW) sold to FortisBC (also under a 40-year agreement). Energy and capacity sales to BC Hydro are at prices "comparable" to those under BC Hydro's 2008 Clean Power Call (around \$100/MWh). Capacity payments from FortisBC will be in the range of \$11–\$17.50/kW-month.

While the project is not a regulated asset, Fortis is exposed to limited risk given: the long-term capacity and energy sales agreements, a fixed-price design-build construction contract with SNC-Lavalin (SNC-SO), and well-understood hydrology given that FortisBC already owns and/or operates several hydro facilities in the region. The expansion also falls under the Canal Plant Agreement under which BC Hydro manages the overall water resources (i.e., hydro facilities and related water usage) on the Kootenay, Columbia and Pend d'Oreille Rivers (on which the Waneta Dam and Expansion are located), thereby further reducing hydrology risk to the project.

### Acquisitions

Fortis has built the business over time through a series of acquisitions, with the most significant being those of FortisAlberta and FortisBC in May 2004 for \$1.5 billion and of Terasen Gas in May 2007 for \$3.7 billion. The company has also made numerous tuck-in acquisitions to build out its operations (e.g., the October 2009 purchase of Algoma Power in Ontario for \$75 million) or properties [e.g., acquiring a Holiday Inn (IHG-NYSE) in Windsor, Ontario in April 2009 for \$7 million and a Sheraton Hotel (HOT-NYSE) in Newfoundland for \$22 million in November 2008].

**Exhibit 2. Select Acquisition History**

Company	Date	Vendor	Amount
Algoma Power	October 2009	Great Lakes Power	\$75 million
Terasen	May 2007	Kinder Morgan	\$3.7 billion
Fortis Turks and Caicos	August 2006	T.C. Energy Holdings	\$98 million
FortisAlberta and FortisBC	May 2004	Aquila	\$1.5 billion
Belize Electric Company	May 2004 and January 2001	Duke Energy	US\$65 million
Caribbean Utilities	Various	International Power Holdings	US\$155+ million

Source: Company reports and CIBC World Markets Inc.

Fortis continues to look for acquisitions to build out its platform. However, it does not regard Canada as fertile ground: most of the private sector electric [e.g., Emera (EMA-SO), AltaLink, ATCO (ACO.X-TSX), etc.] and gas [e.g., Enbridge Gas Distribution (ENB-SP), Union Gas (owned by Spectra Energy (SE-NYSE)), PNG (PNG-TSX)] utilities do not appear to be for sale, and the likelihood of government-owned utilities being privatized also appears low.

The company, therefore, is increasingly turning its attention south of the border, looking for regulated transmission and distribution utilities with enterprise values in the low to mid-billions of dollars. Several recent transactions have been announced/completed, with valuations in the range of 1.0x–1.2x rate base. With these valuation metrics, Fortis could acquire similar-sized companies as FortisBC Energy or FortisAlberta/FortisBC, which both currently have rate bases of around \$3 billion.

**Exhibit 3. Recent U.S. Utility Acquisitions**

Acquirer	Target	Date	Purchase Price (EV)	Est. Valuation (Multiple Of Rate Base)
PPL Corp.	E.ON US	Nov. 2010	US\$7.6 billion	1.1x
AGL Resources	Nicor Inc.	Dec. 2010 (announced)	3.1 billion	1.0x
Northeast Utilities	NSTAR	Oct. 2010 (announced)	4.2 billion	1.2x
FirstEnergy	Allegheny Energy	Feb. 2011	8.5 billion	NA

Source: Company reports and CIBC World Markets Inc.

The company would prefer companies in the U.S. northeast or northwest, close to its existing Canadian operations, but would not rule out other regions.

**Risks/Sensitivities**

- Market Risks:** Under regulator-approved mechanisms, Fortis flows through the commodity cost of natural gas, fuel or purchased power to its customers. The company's non-regulated hydro generation assets are sensitive to localized rainfall levels, but are geographically dispersed and individually not meaningful to overall results. The Waneta Expansion will be more material, but hydrology risk is managed as part of the overall regional river system by BC Hydro, effectively reducing the risk to the project. Foreign exchange risk is relatively low: a 5% change in the Canadian/U.S. dollar exchange rate would impact earnings by \$0.01/share.

- Regulatory Issues:** Given that the majority of Fortis' business is regulated (over 90% as measured by revenues and assets), the company's results are highly sensitive to regulatory decisions. In recent years, Fortis has benefited from increasing ROEs for most of its Canadian operations (e.g., Terasen Gas' allowed ROE rising in mid-2009 to 9.50% from 8.47%, FortisAlberta's allowed ROE rising in 2009 to 9.00% from 8.51%, and FortisBC's allowed ROE rising in 2010 to 9.90% from 8.87% in 2009).

#### Exhibit 4. Regulator Approved Allowed ROEs

	2007	2008	2009	2010	2011
Terasen	8.37%	8.62%	9.50% <sup>1</sup>	9.50%	9.50%
FortisAlberta	8.51	8.75	9.00	9.00	9.00 <sup>2</sup>
FortisBC	8.77	9.02	8.87	9.90	9.90
Newfoundland Power	8.60	8.95	8.95	9.00	8.38 <sup>3</sup>

Notes: 1) Effective July 1, 2009; 2) Interim basis; 3) Automatic adjustment formula.

Source: Company reports and CIBC World Markets Inc.

However, the company is also at risk of adverse regulatory decisions, with the potential that allowed ROEs could be reduced over time, as regulators that moved away from automatic ROE adjustment formulas might look to re-examine their generic ROE rates.

Fortis could also be impacted by operation-specific regulatory rulings. For instance, its regulated operation in Belize (i.e., Belize Electricity) has been denied an appeal on a Public Utilities Commission decision, which effectively forced Belize Electricity to absorb \$38 million of "excess costs" resulting from high oil prices in 2008. In Newfoundland, Fortis jointly owned 51% of a hydro facility with AbitibiBowater (ABH-TSX) through the Exploits Partnership. A dispute between AbitibiBowater and the Newfoundland and Labrador government resulted in expropriation of the Partnership's assets in 2009. The government has stated it is not its intent to adversely affect the business interests of AbitibiBowater's business partners, and although Fortis no longer controls the assets, the company continues to receive associated cash flows.

- Construction Risk:** Fortis primarily faces construction risk for its non-regulated generation assets where the company assumes the risk of cost overruns. Clearly, the Waneta Expansion project is the largest construction project that the company is undertaking (with the company funding 51% of the total \$900 million cost). Fortis and its partners have signed a fixed-price design-build contract with SNC-Lavalin in order to mitigate construction risk, but ultimate construction and financing risks lie with the Waneta Expansion consortium (i.e., Fortis and partners).

## Source And Uses Of Cash

Fortis has identified a five-year, \$5.5 billion capital program, including the Waneta Expansion Project, which would increase its rate base from \$7.7 billion in 2010 to \$10.1 billion by 2015, a 6% CAGR. For 2011 the company has broken out spending by operation, as noted in Exhibit 5.

**Exhibit 5. Capital Spending (\$ mlns.)**

	2010	2011E
FortisBC Energy	\$253	\$281
FortisAlberta	379	420
FortisBC	139	99
Newfoundland Power	78	73
Other Canadian Electric Utilities (FortisOntario/Maritime Electric)	48	46
Total Regulated Utilities – Canada	897	919
Regulated Utilities – Caribbean	72	83
Non-regulated (Generation/Properties)	104	210
Total	1,073	1,212

Source: Company reports and CIBC World Markets Inc.

We calculate that this capital spending program will contribute to estimated annual cash needs of up to \$1.9 billion over the next several years (through 2014), a little under half of which is expected to be funded from operating cash flow. Our forecast highlights the need for substantial debt issuances or utilization of credit facilities (\$1.5 billion available on total \$2.1 billion credit facilities) over the next few years to fund the growth program as well as fund scheduled debt repayments. Nevertheless, based on this outlook, we foresee the debt/capitalization ratio remaining stable at around 58% from 2010 through 2014, declining thereafter if funding requirements drop. We have, therefore, modeled only modest equity issuance (\$200 million in 2011), with some further amounts coming from various dividend reinvestment and employee share purchase and option programs.

We expect total dividends to amount to \$249 million in 2011 (up from \$230 million in 2010), with dividends expected to increase commensurately with any further equity and/or preferred share issuances and earnings growth (and based on a mid-point of the targeted 60%–70% payout range). We have also included in our outlook funds received from the company's dividend reinvestment, employee share purchase and options programs, which in 2010 resulted in the issuance of 3.1 million shares and generated a combined \$80 million, almost double the level in 2009.

## Earnings Profile

Our earnings profile captures the following factors:

- Ongoing underlying growth of the rate base across the company's operations due to customer/market growth (especially FortisAlberta) and system improvements.
- Within a framework of a five-year, \$5.5 billion capital spending program, major project activities such as: (for FortisBC Energy) a \$210 million LNG storage facility on Vancouver Island and a \$110 million customer care enhancement program; (for FortisBC) the \$106 million Okanagan Transmission Reinforcement Project; (for FortisAlberta) a \$126 million program to install automated meters and a \$283 million program to replace 80,000 aging utility poles; and, (non regulated) the \$900 million (\$459 million to Fortis) Waneta Expansion Project.
- A generally favorable regulatory environment in Canada, where allowed rates of return on equity have increased over the past couple of years, generally to the 9%+ range. Unfavorable rulings in Belize have impacted, and will likely continue to impact, those operations.

We do not include any potential upside from acquisitions, although note that Fortis has a history of such activity – both for tuck-ins (Caribbean, Ontario, properties) and major build-outs (Terasen, FortisBC/FortisAlberta).

Source: CIBC World Markets Inc.

Our discounted cash flow analysis (Exhibit 8) captures this outlook and the expected returns from the capital spending program. We calculate that FortisBC Energy (Terasen) comprises about 41% of total company value at present, the Canadian electric utilities about 45% and the Caribbean, non-regulated operations and other the remaining 14%. Our analysis suggests a total company value of about \$34.50 per share.

## Recommendation

Fortis presents an appealing investment proposition: stable regulated returns plus solid growth from investments in regulated and non-regulated businesses. In addition, the company has a track record of successful acquisitions, and continues to evaluate tuck-in opportunities and larger step-out targets, likely in the U.S.

Our primary concern at present is one of valuation: the company is trading at 18.4x current-year (2011) and 17.5x next-year (2012) estimated earnings, above the Canadian utility group average of 16.4x current-year earnings and the broader pipelines and utilities group at 18.2x. We view the premium earnings multiple vs. the utilities group as supportable given Fortis' low-risk profile and growth outlook. Our fundamental discounted cash flow valuation analysis suggests a price target of \$34.50, for an implied P/E multiple of 18.3x our 2012 estimate, and representing a 12-month total shareholder return of 8.3% vs. a group average of 8.5%. While acquisitions might provide upside to our forecast, we do not model these given uncertainty as to timing, magnitude and/or financial impact. While we, therefore, view Fortis as a company offering solid, low-risk growth, we believe the stock is at present fairly valued and we initiate coverage with a Sector Performer rating and \$34.50 price target.

## Price Target Calculation

Our price target is based on a discounted cash flow analysis, which captures the expected cash flow growth from Fortis' five-year, \$5.5 billion capital spending program. The price target of \$34.50 equates to a P/E multiple of 18.3x our 2012 estimate, a premium to the group average given, in our view, Fortis' solid, low-risk, growth outlook.

## Key Risks To Price Target

- **Market Risks:** Under regulator-approved mechanisms, Fortis flows through the commodity cost of natural gas, fuel or purchased power to its customers. The company's non-regulated hydro generation assets are sensitive to localized rainfall levels, but are geographically dispersed and individually not meaningful to overall results. The Waneta Expansion will be more material, but hydrology risk is managed as part of the overall regional river system by BC Hydro, effectively reducing the risk to the project. Foreign exchange risk is relatively low: a 5% change in the Canadian/U.S. dollar exchange rate would impact earnings by \$0.01/share.
- **Regulatory Issues:** Given that the majority of Fortis' business is regulated (over 90% as measured by revenues and assets), the company's results are highly sensitive to regulatory decisions – both positive (such as increasing allowed ROEs in Canada over the past few years) and negative (such as an adverse ruling in Belize).
- **Construction Risk:** Fortis primarily faces construction risk for its non-regulated generation assets where the company assumes the risk of cost overruns. Clearly, the Waneta Expansion project is the largest construction project that the company is undertaking (with the company funding 51% of the total \$900 million cost). Fortis and its partners have signed a fixed-price design-build contract with SNC-Lavalin in order to mitigate construction risk, but ultimate construction and financing risks lie with the Waneta Expansion consortium (i.e., Fortis and partners).

## Our EPS estimates are shown below:

## IMPORTANT DISCLOSURES:

**Analyst Certification:** Each CIBC World Markets research analyst named on the front page of this research report, or at the beginning of any subsection hereof, hereby certifies that (i) the recommendations and opinions expressed herein accurately reflect such research analyst's personal views about the company and securities that are the subject of this report and all other companies and securities mentioned in this report that are covered by such research analyst and (ii) no part of the research analyst's compensation was, is, or will be, directly or indirectly, related to the specific recommendations or views expressed by such research analyst in this report.

**Potential Conflicts of Interest:** Equity research analysts employed by CIBC World Markets are compensated from revenues generated by various CIBC World Markets businesses, including the CIBC World Markets Investment Banking Department. Research analysts do not receive compensation based upon revenues from specific investment banking transactions. CIBC World Markets generally prohibits any research analyst and any member of his or her household from executing trades in the securities of a company that such research analyst covers. Additionally, CIBC World Markets generally prohibits any research analyst from serving as an officer, director or advisory board member of a company that such analyst covers.

In addition to 1% ownership positions in covered companies that are required to be specifically disclosed in this report, CIBC World Markets may have a long position of less than 1% or a short position or deal as principal in the securities discussed herein, related securities or in options, futures or other derivative instruments based thereon.

Recipients of this report are advised that any or all of the foregoing arrangements, as well as more specific disclosures set forth below, may at times give rise to potential conflicts of interest.

## Important Disclosure Footnotes for Fortis Inc. (FTS)

- 2g CIBC World Markets Inc. expects to receive or intends to seek compensation for investment banking services from Fortis Inc. in the next 3 months.
- 7 CIBC World Markets Corp., CIBC World Markets Inc., and their affiliates, in the aggregate, beneficially own 1% or more of a class of equity securities issued by Fortis Inc.

## Fortis Inc.

### Acquisition Of New England Utility; Update On Belize

- On May 30, Fortis announced that it has entered into an agreement to acquire Central Vermont Public Service (CVPS) for approximately US\$700 million including assumed debt. CVPS is the largest electric utility in Vermont, and has a stake in the state's transmission system.
- Fortis paid full price for CVPS, although it has a strong growth profile, with its rate base expected to grow from US\$426 million in 2010 to ~US\$650 million in 2015 (9% CAGR) through the acquisition of Vermont Marble, investments in transmission, and capex in its base distribution business.
- Fortis also announced a bought deal, issuing 9.1 million shares at \$33/share, resulting in net proceeds of \$288 million. As a result, our 2011E EPS decreases from \$1.79 to \$1.75. Our 2012E and 2013E EPS increase from \$1.88 and \$2.00 to \$1.89 and \$2.03, reflecting the acquisition impact.
- We view the acquisition as modestly positive, with upside to the extent Fortis can become a consolidator in the region. In Belize, the government is looking to nationalize Fortis' operations, although financial implications are still unclear. Maintain SP rating; PT to \$35.00 vs. prior \$34.50.

## Company Profile

Fortis owns a natural gas utility in British Columbia, electric distribution utilities in five Canadian provinces, Central America and the Caribbean, and non-regulated power generation and real estate assets.

## Investment Thesis

Fortis provides the benefits (stability) of a regulated utility, and is in a period of solid organic investment and growth as the company delivers on its 5 year, \$5.5 billion capital program which is expected to grow the regulated rate base by a CAGR of 6% through 2015. The company is also a 51% owner of the non-regulated \$900 million Waneta Expansion project.

## Assets - Excl Corporate / Eliminations (As At Mar 31, 2011)

## Segmented Earnings (Exc. Corporate)

## Major Sources, Uses Of Cash

Source: Company reports and CIBC World Markets Inc.

## Acquiring New England Utility

On May 30, Fortis (FTS-SP) announced that it has entered into an agreement to acquire all of the outstanding common shares of Central Vermont Public Service (CVPS) (CV-NYSE) for \$35.10/share in cash, representing a 44% premium over the CVPS closing price on the prior trading day. The total purchase price, including the assumption of approximately US\$230 million in debt, amounts to roughly US\$700 million. The closing of the acquisition is subject to a variety of approvals, including CVPS shareholders, the Vermont Public Service Board, and the U.S. Federal Energy Regulatory Commission (FERC). Fortis expects the transaction to close within six to 12 months.

CVPS is the largest electric utility in Vermont, serving nearly 160,000 customers. Its electric system consists of approximately 9,000 miles of distribution lines and more than 600 miles of sub-transmission lines. CVPS also holds a 41% ownership interest in Vermont Transco LLC [managed by Vermont Electric Power Company (Velco)], which owns and operates the high-voltage transmission system in Vermont.

CVPS expects its rate base to grow from US\$426 million in 2010 to approximately US\$650 million by 2015, representing a compound annual growth rate of 9% (Exhibit 1). The rate base growth is expected to be driven by Vermont Marble (a US\$33 million acquisition of primarily transmission and distribution assets), additional investments in transmission (through its equity interest in Velco), and capital expenditures in its base distribution business. The allowed rate of return on common equity for 2011 is set at 9.45%, and equity level is set at 57%.

**Exhibit 1. CVPS Rate Base Projections**

Source: Company reports.

Fortis has been looking for acquisitions for some time, and targeted the U.S. northeast as a potential entry point. At US\$700 million, the CVPS acquisition is smaller than our expectation for a low- to mid-billion-dollar transaction. In addition, at a 1.4x rate base (when factoring in CVPS' proportional ownership in Velco), the acquisition is moderately more expensive than recent U.S. utility acquisitions in the 1.0x–1.2x rate base range. However, CVPS has a strong growth profile, with a 9% CAGR in its rate base expected through 2015.

In addition, while Fortis will operate CVPS in its normal decentralized fashion, there may be further opportunities to add assets in the region. Vermont has a population of roughly 600,000 people, but is home to 20 electric distributors. The second-largest utility in Vermont is Green Mountain Power, which has approximately 90,000 customers covering a territory encompassing approximately 25% of the state's population, and is owned by Gaz Metro Inc.

## Equity Issuance

In conjunction with the acquisition announcement, Fortis announced a bought deal for 9.1 million shares at \$33.00/share. Net proceeds of approximately \$288 million (\$300 million in gross proceeds less underwriting fees) will be used to repay outstanding debt under the company's committed credit facility, finance additional equity injections into Fortis' western Canadian regulated utilities and the Waneta Expansion, and for general corporate purposes. While Fortis is not using the proceeds from the equity issue directly to purchase CVPS, it is using a portion of the proceeds to repay the debt on its committed credit facility, and it will ultimately use that same credit facility to fund its purchase of CVPS. There is also an overallotment option whereby the underwriters will be able to purchase an additional 1.365 million shares, which would bring an additional \$43 million in net proceeds to Fortis if fully exercised. We have not incorporated the over-allotment proceeds in our forecasts. We do not expect Fortis to issue any additional common equity over the forecast horizon, unless it makes further acquisitions.

## Estimate Revisions

Fortis expects the acquisition to be accretive to EPS in its first full year of ownership. In the interim, however, we expect the impact of the equity issue to reduce EPS in 2011 from \$1.79 to \$1.75. We have assumed that the transaction will close at the end of Q1/12. Our 2012 EPS forecast increases from \$1.88 to \$1.89, reflecting the partial-year contribution from CVPS. Our 2013 EPS estimate increases from \$2.00 to \$2.03, reflecting the first full year of CVPS.

## Belize Saga Continues

Fortis' regulated electricity distribution operations in Belize (Belize Electricity Limited, or BEL) have been under pressure since a June 2008 decision by the Belize Public Utilities Commission reversed previous rate-setting agreements, lowered BEL's allowable rates of return, and forced BEL to assume the cost of surging energy prices in 2008. BEL's legal appeals, including to the Belize Supreme Court, have been dismissed. The left-leaning government of Prime Minister Dean Barrow "was always ideologically opposed to the privatization of essential resources" and has resisted allowing any rate increases.

With oil prices again on the rise, and unable to increase rates accordingly, BEL has been facing mounting financial pressures. Furthermore, BEL has been unable to qualify for bank credit given the unsettled regulatory regime. Fortis is understandably unwilling to further invest in the operation. Given BEL's financial distress, the operation is facing mounting debts to Mexico's Comisión Federal de Electricidad (CFE), from which BEL purchases a substantial portion (in 2010, 33%) of its power. Year-end 2010 financial statements show BEL also owed BZ\$9 million (US\$4.5 million) to Fortis and BECOL (a hydro generation facility in Belize which Fortis also owns). BEL has asked the Belize government to prepay its energy bills of roughly \$2 million/month to help cover power purchases.

The government has now announced its intent “in purchasing majority shares in BEL so as to assume control of the company,” although no formal purchase proposal has been received by Fortis. Fortis currently owns 70% of BEL, the Belize government indirectly holds 27% (through the Social Security Board of Belize), and the remainder is held by smaller shareholders in Belize. It is unclear at present:

1. How much of BEL the government intends to buy: The government would need a further 24% to reach a majority position, but Fortis is unwilling to become a minority shareholder and would likely seek to sell its entire stake.
2. What price the government will pay: Prime Minister Barrow has stated “you trade off the fact that there is an asset value against the fact that the company virtually is insolvent” – ignoring the fact that his government’s actions have placed BEL in this situation, and that at the end of 2010 BEL had net PP&E of BZ\$445 million (approximately US\$222 million). The purchase would represent an enormous sum for the government of Belize – the country’s total GDP in 2009 was US\$1.354 billion (World Bank data), and certainly begs the question of how the government could afford to pay anything approaching fair value.
3. Whether the government will expropriate the business: The Belize government has set a precedent with the expropriation in 2009 of the country’s main telephone company, Belize Telemedia, with legal proceedings still ongoing.

The assets of BEL represent less than 2% of Fortis’ total assets; the combined assets of BEL and BECOL represent less than 3% of Fortis’ total assets. Nevertheless, a worst-case scenario could be a partial or total writedown of Fortis’ investment in BEL, with its net book investment in BEL currently at ~US\$125 million (~\$0.70/share). We are making no changes to our financial outlook at present until there is further clarity on the situation.

## Price Target Calculation

We are raising our price target from \$34.50 to \$35.00, reflecting the contribution of the CVPS acquisition to our discounted cash flow (DCF) forecast. The \$35.00 price target equates to a P/E multiple of 18.5x our 2012 estimate, a premium to the group average given Fortis’ solid, and for the most part low-risk, growth outlook.

## Outlook And Investment Summary

Overall, we view the CVPS acquisition as modestly positive to Fortis. As a standalone investment, the acquisition was on the expensive end, although CVPS has a strong growth profile through 2015. Upside may exist to the extent that Fortis can become a consolidator in the region. As noted above, we have not adjusted our financial estimates for Belize given the uncertainty as to the government’s intentions, although a nationalization of the business at a price below Fortis’ net book investment could result in an (at least partial) writedown. We maintain our Sector Performer rating.

## Key Risks To Price Target

- **Market Risks:** Under regulator-approved mechanisms, Fortis flows through the commodity cost of natural gas, fuel or purchased power to its customers. The company's non-regulated hydro generation assets are sensitive to localized rainfall levels, but are geographically dispersed and individually not meaningful to overall results. The Waneta Expansion will be more material, but hydrology risk is managed as part of the overall regional river system by BC Hydro, effectively reducing the risk to the project. Foreign exchange risk is relatively low: a 5% change in the Canadian/U.S. dollar exchange rate would impact earnings by \$0.01/share.
- **Regulatory Issues:** Given that the majority of Fortis' business is regulated (over 90% as measured by revenues and assets), the company's results are highly sensitive to regulatory decisions – both positive (such as increasing allowed ROEs in Canada over the past few years) and negative (such as adverse rulings/actions in Belize).
- **Construction Risk:** Fortis primarily faces construction risk for its non-regulated generation assets where the company assumes the risk of cost overruns. Clearly, the Waneta Expansion project is the largest construction project that the company is undertaking (with the company funding 51% of the total \$900 million cost). Fortis and its partners have signed a fixed-price design-build contract with SNC-Lavalin (SNC-SO) in order to mitigate construction risk, but ultimate construction and financing risks lie with the Waneta Expansion consortium (i.e., Fortis and partners).

## Fortis Inc.

### Not A Good Week: Belize Operations Expropriated, Rival Bid Emerges For CVPS

- On Monday, the government of Belize passed legislation to nationalize Fortis' 70%-owned regulated utility, Belize Electricity Limited (BEL), which is under financial duress due to adverse regulatory rulings, which provide insufficient returns and force BEL to absorb high energy costs.
- Compensation for BEL is unknown and any agreement is likely to take some time. Fortis' net book investment in BEL is ~US\$125 million (~\$0.70/share). Currently, Fortis' unregulated hydro facilities in Belize (BECOL) have not been expropriated.
- On Thursday, Gaz Metro announced a rival bid for CVPS, a Vermont utility that Fortis announced it was acquiring on May 30. Gaz Metro's bid (US\$35.25/share) is at only a US\$0.15/share premium to Fortis' bid (US\$35.10/share); CVPS must determine if this represents a superior bid.
- Given a \$17.5 million break fee + \$2 million in expense reimbursement (totaling ~US\$1.50/CVPS share), it is unclear whether Gaz Metro's bid is "superior." If it is deemed so, Fortis could match the bid, but we foresee little appetite for further increases given its existing bid is already pricey.

## Company Profile

Fortis owns a natural gas utility in British Columbia, electric distribution utilities in five Canadian provinces, Central America and the Caribbean, and non-regulated power generation and real estate assets.

## Investment Thesis

Fortis provides the benefits (stability) of a regulated utility, and is in a period of solid organic investment and growth as the company delivers on its 5 year, \$5.5 billion capital program which is expected to grow the regulated rate base by a CAGR of 6% through 2015. The company is also a 51% owner of the non-regulated \$900 million Waneta Expansion project.

## Assets - Excl Corporate / Eliminations (As At Mar 31, 2011)

## Segmented Earnings (Exc. Corporate)

## Major Sources, Uses Of Cash

Fortis (FTS-SP) has had a rough week.

---

## Belize Operations Expropriated, As Expected

On Monday, the Belize government announced it is expropriating Fortis' 70%-owned regulated utility, Belize Electricity Ltd. (BEL). This is not unexpected given recent government pronouncements. BEL has been under financial duress given adverse regulatory rulings that have not allowed BEL to collect appropriate returns, and, furthermore, have forced BEL to absorb high energy prices (rather than, as is typically the case, pass through energy costs to the consumers). As a result, BEL has amassed debt to major electricity suppliers, including Mexican utility CFE, which has now demanded upfront payment before making further electricity sales to BEL. Rather than rectifying the regulatory issues, the Belize government has chosen to expropriate BEL's operations.

Fortis' net book investment in BEL is ~US\$125 million, or roughly \$0.70/share. The government of Belize has not provided any compensation nor has it announced whether any (or how much) would be forthcoming. Fortis is evaluating its legal options. Fortis' unregulated hydro generation operation, BECOL, has not (yet) been similarly affected, although is at risk given amounts owed by BEL (approximately \$5 million) and its ownership by Fortis. We would not expect a speedy outcome; the Belize government expropriated telephone company Belize Telemedia in 2009 and legal proceedings are still ongoing, with no compensation paid to date.

---

## Rival Bid For CVPS

On Thursday, Gaz Metro announced it was making an unsolicited bid for Central Vermont Public Service (CVPS) (CV-NYSE), the Vermont utility that Fortis announced an agreement to acquire on May 30. Gaz Metro's bid is at US\$35.25 per CVPS share, a slim US\$0.15/share premium to Fortis' own bid of US\$35.10/share. Gaz Metro also notes that it intends to continue making CVPS quarterly dividend payments of US\$0.23/share through closing vs. Fortis' intent to make only two regular quarterly dividend payments (and only \$0.01/share/quarter thereafter, until closing); with Gaz Metro expecting closing to take up to 12 months, this could imply further upside for CVPS shareholders.

Gaz Metro currently owns Green Mountain Power, the second-largest electric utility in Vermont (after CVPS), and believes there are synergies from owning both operations. The Gaz Metro bid also includes provisions for: CVPS employees (no layoffs), customers (cost savings from joint synergies with Green Mountain Power and the creation of a trust to subsidize low income customers), and the state of Vermont (investments in new headquarters and a solar development). The trust for low income customers will be created through the donation of a 30% economic interest in VELCO, the manager and part owner of the Vermont transmission system.

CVPS' board of directors must now determine that Gaz Metro's bid represents a "superior proposal" to the shareholders. Whether it meets this criterion is unclear given that CVPS, if it accepted Gaz Metro's bid, would be required to pay to Fortis a break fee of US\$17.5 million plus up to US\$2 million reimbursement of related fees and expenses. The US\$0.15/share premium amounts to only US\$2 million, and even factoring in additional dividend payments received under the Gaz Metro bid (if the closing takes up to a year), the total premium amounts to less than half the break fee.

If CVPS does decide that Gaz Metro's bid is superior, then Fortis must choose whether to match the relevant terms (e.g., US\$35.25/share + full dividend payments through closing) or to walk away. The small incremental costs might suggest that Fortis should be prepared to match the (initial) Gaz Metro bid, but we would not expect Fortis to get into a prolonged bidding war, as we believe its existing bid already represented full value (around 1.4x rate base). Any meaningful increase in the purchase price would bring the economics of the transaction into question.

Gaz Metro might be able to justify a higher price given the potential synergies to be realized from its existing ownership of Green Mountain Power, the second-largest Vermont electric utility (after CVPS). However, it is unclear whether any such synergies are truly sustainable, as any savings are typically required to be passed on to customers over time.

---

## Downward Bias To Price Target, But No Change For Now

We believe that these two issues – expropriation of BEL and rival bid for CVPS – represent a downward bias on Fortis' value. The loss of BEL (with no compensation) would represent ~\$0.70/share impact; the potential loss of CVPS to Gaz Metro would represent about a further \$0.50/share. Furthermore, if Fortis were not to acquire CVPS, we note that the recent \$300 million (net \$288 million) equity offering would be dilutive until an alternate (and accretive) use of funds were found. We believe Fortis management is sufficiently disciplined to avoid acting precipitously, but nonetheless we note that there will be additional pressure for Fortis to find and close a suitable acquisition.

Despite the downward bias in valuation, we are not updating our price target (\$35) for now given the uncertainty surrounding these issues. We maintain our Sector Performer rating.

---

## Price Target Calculation

Our \$35.00 price target equates to a P/E multiple of 18.5x our 2012 estimate, a premium to the group average given Fortis' solid, and for the most part low-risk, growth outlook. We note, however, that failure to close the CVPS acquisition represents a potential downside of ~\$0.50/share and a total write-off of BEL would represent ~\$0.70/share. We have not yet included either of these impacts to the stock price, given current uncertainties as to outcome.

---

## Key Risks To Price Target

- **Regulatory Issues:** Given that the majority of Fortis' business is regulated (over 90% as measured by revenues and assets), the company's results are highly sensitive to regulatory decisions – both positive (such as increasing allowed ROEs in Canada over the past few years) and negative (such as adverse rulings/actions in Belize).
- **Acquisition Risks:** Fortis has an announced intention to acquire distribution utilities. Acquisition risks include: deal risk (failure to close a transaction), operation and regulatory risks of the acquired organization.

- **Market Risks:** Under regulator-approved mechanisms, Fortis flows through the commodity cost of natural gas, fuel or purchased power to its customers. The company's non-regulated hydro generation assets are sensitive to localized rainfall levels, but are geographically dispersed and individually not meaningful to overall results. The Waneta Expansion will be more material, but hydrology risk is managed as part of the overall regional river system by BC Hydro, effectively reducing the risk to the project. Foreign exchange risk is relatively low: a 5% change in the Canadian/U.S. dollar exchange rate would impact earnings by \$0.01/share.
- **Construction Risk:** Fortis primarily faces construction risk for its non-regulated generation assets where the company assumes the risk of cost overruns. Clearly, the Waneta Expansion project is the largest construction project that the company is undertaking (with the company funding 51% of the total \$900 million cost). Fortis and its partners have signed a fixed-price design-build contract with SNC-Lavalin (SNC–SO) in order to mitigate construction risk, but ultimate construction and financing risks lie with the Waneta Expansion consortium (i.e., Fortis and partners).

Pipelines, Utilities, & Power

## Fortis Inc.

### Q2 Slightly Below Expectations On Lower Gas, Generation Earnings

- Fortis reported Q2/11 EPS of \$0.33 vs. our estimate of \$0.35 (consensus \$0.35). The variance was largely due to lower earnings from FortisBC Energy (higher regulator-approved expenses), Fortis Generation (lower production in Belize), and Fortis Properties (decrease in occupancy).
- Earnings were still up Y/Y (\$0.33 vs. \$0.32 in Q2/10), largely reflecting a higher rate base (especially at company's regulated utilities in Western Canada). Fortis is on track for its \$1.2 bln. capex program in 2011, and has raised its 5-year (2011-2015) capex budget to \$5.7 bln. (up \$0.2 bln.).
- In Q2/11, Fortis suffered setbacks: 70% owned Belize Electricity was expropriated on June 20; BECOL (its Belize hydro generation facility) is owed US\$6.5 mln.; and Fortis walked away from its acquisition of CVPS after a superior bid from Gaz Metro.
- Fortis' capex program is expected to grow rate base at 6% CAGR. Fortis continues to seek a U.S. acquisition, and has a strong financial position. However, given Q2 setbacks, a slightly soft Q2, and high acquisition multiples, we maintain our SP rating. PT revised to \$33.50 (prior \$34).

## Company Profile

Fortis owns a natural gas utility in British Columbia, electric distribution utilities in five Canadian provinces, the Caribbean, and non-regulated power generation and real estate assets.

## Investment Thesis

Fortis provides the benefits (stability) of a regulated utility, and is in a period of solid organic investment and growth as the company delivers on its 5 year, \$5.5 billion capital program which is expected to grow the regulated rate base by a CAGR of 6% through 2015. The company is also a 51% owner of the non-regulated \$900 million Waneta Expansion project.

## Assets - Excl Corporate / Eliminations (As At Mar 31, 2011)

## Segmented Earnings (Exc. Corporate)

## Major Sources, Uses Of Cash

Source: Company reports and CIBC World Markets Inc.

---

## Q2/11 – Slightly Below Consensus

Fortis (FTS-SP) reported Q2/11 results, with EPS of \$0.33, slightly below our estimate of \$0.35 (consensus \$0.35). The main variances to expectations were lower earnings from:

- (1) FortisBC Energy (formerly Terasen Gas), due to timing of regulator approved increases in operating expenses.
- (2) Non-regulated Fortis Generation, given decreased production in Belize due to lower rainfall.
- (3) Non-regulated Fortis Properties, given a 2.2% decrease in hotel occupancy and a 1.4% decrease in occupancy in commercial/retail real estate.

---

## Capital Spending On Track

Earnings were still up Y/Y (\$0.33 versus \$0.32 in Q2/10), largely driven by rate base growth, especially in the Western Canadian regulated utilities. The company is on track for its \$1.2 billion capital program in 2011, with \$519 million spent through H1/11. The company also slightly raised its 5-year (2011-2015) capital plan to \$5.7 billion from \$5.5 billion, reflecting higher planned spending at FortisBC Energy.

The company has substantially completed work on many major projects, including its \$214 million LNG storage facility on Vancouver Island and \$126 million Automated Metering Project in Alberta, and expects to reach substantial completion later in the year on the \$105 million Okanagan Transmission Reinforcement Project. The Waneta Dam Expansion project is on budget/schedule.

---

## Q2/11 Setbacks

As has been previously noted, Fortis suffered setbacks in Q2/11:

- (1) On June 20, the government of Belize expropriated Fortis' 70% interest in Belize Electricity (BEL). Fortis is starting to pursue legal avenues to seek compensation, although this will likely be a lengthy process. The book value of BEL was \$112 million; the company does not anticipate writing this value down until there is further clarity on the situation. The company's BECOL hydro generation facility remains, for now, unaffected (and management does not believe the government has any current intent to expropriate the facility), although it is currently owed US\$6.5 million from BEL (after receiving a US\$0.5 million payment in July). BECOL's book value is \$150 million.
- (2) On May 30, Fortis announced an agreement to acquire CVPS (CV-NYSE) at a total value of US\$700 million, including acquired debt. On June 23, CVPS received an unsolicited offer from Gaz Metro, which was subsequently deemed a superior offer to Fortis. Subsequently, on July 12, Fortis terminated the acquisition agreement, collecting a US\$17.5 million termination fee plus US\$2 million in expenses.

## Maintain Sector Performer

Fortis continues to progress its capital spending program, which is expected to result in 6% rate base CAGR. Furthermore, the company has a strong financial position, with (at quarter end) \$1.5 billion of unused credit facilities and \$298 million in cash due to a \$300 million equity offering in June. The company continues to seek U.S. acquisition targets.

Nevertheless, given the above-noted setbacks in the quarter and the slightly lower-than-expected Q2/11 results, we believe short-term upside is more limited and continue to rate Fortis as Sector Performer, with a \$33.50 price target (down slightly from prior \$34 to reflect Q2/11 results and updated outlook).

## Q2/11 Results

Fortis reported adjusted Q2/11 EPS of \$0.33, up from \$0.32 in Q2/10, and modestly below our \$0.35 expectation (consensus \$0.35). The main variance from our estimates was lower-than-expected earnings from FortisBC Energy, and a lower-than-expected contribution from its non-regulated businesses (Fortis Generation and Fortis Properties).

Source: CIBC World Markets Inc.

### Regulated Utilities:

- **FortisBC Energy:** FortisBC Energy earnings totaled \$15 million in Q2/11, compared to \$17 million in Q2/10 and our estimate of \$19 million. The variance from our estimate is the result of the timing of an increase in regulator-approved operating expenses, driven by labor and benefit costs and consulting expenses. Q2 and Q3 are FortisBC Energy's seasonally weakest quarters, with most of its earnings coming in Q1 and Q4.
- **FortisAlberta:** FortisAlberta contributed \$19 million to earnings in Q2/11, versus \$17 million in Q2/10, and our \$18 million estimate. The Y/Y increase is mainly due to \$2.5 million of accrued revenue recognized in Q2/11 associated with the cumulative return and amortization on the additional capex included in rate base associated with the Automated Metering Project.
- **FortisBC Electric:** FortisBC Electric earnings totaled \$9 million in Q2/11, compared to \$8 million in Q2/10, and our \$9 million estimate. The Y/Y increase reflects rate base growth, as well as lower-than-expected average market-priced purchased power costs.
- **Newfoundland Power:** Newfoundland Power earnings were \$11 million in the quarter, compared to \$11 million in Q2/10 and our \$10 million estimate. Y/Y results were flat as electricity sales growth and lower effective corporate income taxes were offset by lower customer rates due to a lower allowed ROE in 2011.
- **Other Canadian Electric Utilities:** Other Canadian Electric Utilities contributed earnings of \$6 million in the quarter, up from \$4 million in Q2/10 and above our \$4 million estimate. The variance from our estimate was due to lower effective corporate income taxes.
- **Caribbean Utilities:** Caribbean Utilities earnings contribution totaled \$7 million, versus \$7 million in Q2/10 and our \$7 million estimate. The reduction of costs and improving efficiencies and a positive commercial customer billing adjustment at Caribbean Utilities were offset by lower electricity sales on Grand Cayman and removal of Belize Electricity from consolidated results effective June 20, 2011, the day the Government of Belize expropriated Fortis' 70% interest in Belize Electricity.

### Non-Regulated Businesses:

- **Fortis Generation:** Fortis Generation earnings totaled \$2 million, down from \$3 million in Q2/10 and below our \$6 million estimate. Lower-than-expected results reflected lower production in Belize due to lower rainfall and higher finance charges.
- **Fortis Properties:** Fortis Properties earnings came in at \$7 million in Q2/11, compared to \$8 million in Q2/10 and our \$9 million estimate. The variance from our estimate reflects higher operating costs due to inflationary pressures, and the lower performance of hotel operations due to decreased occupancies in western Canada.

---

## Revising Estimates

We have made minor changes to our estimates to reflect slightly lower expected earnings in Fortis' non-regulated operations (Fortis Generation and Fortis Properties). We have also updated our forecasts for the regulated businesses, mainly to reflect recently filed rate applications. As a result of these changes, our 2011 EPS estimate declines from \$1.74 to \$1.72, while our 2012 EPS estimate declines from \$1.83 to \$1.81.

**Price Target Calculation**

We are reducing our price target from \$34.00 to \$33.50 as a result of our reduced estimates. Our \$33.50 price target equates to a P/E multiple of 18.5x our 2012 estimate, a premium to the group average given Fortis' solid, and for the most part low-risk, growth outlook.

**Key Risks To Price Target**

- **Regulatory Issues:** Given that the majority of Fortis' business is regulated (over 90% as measured by revenues and assets), the company's results are highly sensitive to regulatory decisions – both positive (such as increasing allowed ROEs in Canada over the past few years) and negative (such as adverse rulings/actions in Belize).
- **Acquisition Risks:** Fortis has an announced intention to acquire distribution utilities. Acquisition risks include: deal risk (failure to close a transaction), and operation and regulatory risks of the acquired organization.

- **Market Risks:** Under regulator-approved mechanisms, Fortis flows through the commodity cost of natural gas, fuel or purchased power to its customers. The company's non-regulated hydro generation assets are sensitive to localized rainfall levels, but are geographically dispersed and individually not meaningful to overall results. The Waneta Expansion will be more material, but hydrology risk is managed as part of the overall regional river system by BC Hydro, effectively reducing the risk to the project. Foreign exchange risk is relatively low: a 5% change in the Canadian/U.S. dollar exchange rate would impact earnings by \$0.01/share.
- **Construction Risk:** Fortis primarily faces construction risk for its non-regulated generation assets where the company assumes the risk of cost overruns. Clearly, the Waneta Expansion project is the largest construction project that the company is undertaking (with the company funding 51% of the total \$900 million cost). Fortis and its partners have signed a fixed-price design-build contract with SNC-Lavalin (SNC-SO) in order to mitigate construction risk, but ultimate construction and financing risks lie with the Waneta Expansion consortium (i.e., Fortis and partners).

## Our EPS estimates are shown below:

	1 Qtr.	2 Qtr.	3 Qtr.	4 Qtr.	Yearly
2010 Current	\$0.58A	\$0.32A	\$0.26A	\$0.49A	\$1.65A
2011 Prior	\$0.67A	\$0.35E	\$0.25E	\$0.48E	\$1.74E
2011 Current	\$0.67A	\$0.33A	\$0.24E	\$0.49E	\$1.72E
2012 Prior	--	--	--	--	\$1.83E
2012 Current	--	--	--	--	\$1.81E

## IMPORTANT DISCLOSURES:

**Analyst Certification:** Each CIBC World Markets research analyst named on the front page of this research report, or at the beginning of any subsection hereof, hereby certifies that (i) the recommendations and opinions expressed herein accurately reflect such research analyst's personal views about the company and securities that are the subject of this report and all other companies and securities mentioned in this report that are covered by such research analyst and (ii) no part of the research analyst's compensation was, is, or will be, directly or indirectly, related to the specific recommendations or views expressed by such research analyst in this report.

**Potential Conflicts of Interest:** Equity research analysts employed by CIBC World Markets are compensated from revenues generated by various CIBC World Markets businesses, including the CIBC World Markets Investment Banking Department. Research analysts do not receive compensation based upon revenues from specific investment banking transactions. CIBC World Markets generally prohibits any research analyst and any member of his or her household from executing trades in the securities of a company that such research analyst covers. Additionally, CIBC World Markets generally prohibits any research analyst from serving as an officer, director or advisory board member of a company that such analyst covers.

In addition to 1% ownership positions in covered companies that are required to be specifically disclosed in this report, CIBC World Markets may have a long position of less than 1% or a short position or deal as principal in the securities discussed herein, related securities or in options, futures or other derivative instruments based thereon.

Recipients of this report are advised that any or all of the foregoing arrangements, as well as more specific disclosures set forth below, may at times give rise to potential conflicts of interest.

## Important Disclosure Footnotes for Fortis Inc. (FTS)

- 2a Fortis Inc. is a client for which a CIBC World Markets company has performed investment banking services in the past 12 months.
- 2c CIBC World Markets Inc. has managed or co-managed a public offering of securities for Fortis Inc. in the past 12 months.
- 2e CIBC World Markets Inc. has received compensation for investment banking services from Fortis Inc. in the past 12 months.

Pipelines, Utilities, & Power

## Fortis Inc.

### In-line Q3, No Change To Outlook

- Fortis reported Q3/11 adjusted EPS of \$0.25 vs. our \$0.24 estimate (consensus \$0.23). Our adjusted EPS figure excludes the \$11 million after-tax fee (\$0.06/share) paid to Fortis in July 2011 from the termination of the merger agreement between Fortis and Central Vermont Public Service.
- Regulated utility results were in line with expectations, while slightly lower non-regulated results were offset by lower corporate costs. Results declined y/y from \$0.26 in EPS in Q3/10 due to the issuance of 10.3 million shares in June 2011 associated with the unsuccessful attempt to acquire CVPS.
- On November 2, FortisBC filed an application to amalgamate its three natural gas utilities into one legal entity, and implement common rates and services for these customers across the province, starting January 1, 2013. This proposal is revenue neutral to FortisBC.
- There has been no change to Fortis' outlook. The company is still in the early stages of its 5-year, \$5.7 billion capital expenditure program, and continues to evaluate acquisition opportunities. Fortis offers strong, stable growth, and its multiple reflects that. We maintain SP rating and \$33.50 PT.

Fortis owns a natural gas utility in British Columbia, electric distribution utilities in five Canadian provinces, the Caribbean, and non-regulated power generation and real estate assets.

## Investment Thesis

Fortis provides the benefits (stability) of a regulated utility, and is in a period of solid organic investment and growth as the company delivers on its 5 year, \$5.5 billion capital program which is expected to grow the regulated rate base by a CAGR of 6% through 2015. The company is also a 51% owner of the non-regulated \$900 million Waneta Expansion project.

## In-line Q3

Fortis (FTS-SP) reported adjusted Q3/11 EPS of \$0.25 versus consensus of \$0.23, and our \$0.24 estimate. Total reported EPS of \$0.31 included a US\$19.5 million payment (\$11 million after tax, or \$0.06 EPS) related to the break fee and costs payable to Fortis on termination of the acquisition of Central Vermont Public Service (CVPS) due to a superior offer from Gaz Metro.

Regulated utility results were generally in line with expectations across all segments. Results from non-regulated operations were slightly lower-than-expected due to decreased generation resulting from lower rainfall in Belize (Fortis Generation) and higher administrative expenses (Fortis Properties). This was offset by lower corporate costs due to FX gains. Results declined y/y (\$0.26 in Q3/10) as a result of the issuance of 10.3 million shares in June 2011 associated with the unsuccessful attempt to acquire CVPS. Q3 is Fortis' seasonally weakest quarter, with the majority of earnings growth taking place in Q1 and Q4.

---

## Proposal To Merge FortisBC Gas Utilities

FortisBC has filed an application with the British Columbia Utilities Commission (BCUC) to amalgamate its three natural gas utilities into one legal entity, and implement common rates and services for these customers across the province, starting January 1, 2013. This application is revenue neutral to FortisBC, and is expected to provide lower rates to some customers (specifically Vancouver Island, Sunshine Coast, and Whistler customers), along with greater rate stability, consistency in programs and services, and greater reporting and operating efficiencies.

Currently, FortisBC provides natural gas to customers under three separate legal entities [FortisBC Energy Inc., FortisBC Energy (Vancouver Island) Inc., and FortisBC Energy (Whistler) Inc.] with entity-specific rate structures. These separate entities were formed as various natural gas utilities were acquired across the province. Each entity provides different service offerings by region, such as energy efficiency and conservation initiatives or renewable natural gas.

The company's electric operations will remain a separate utility with a separate legal name, Fortis BC Inc., with separate rates and service offerings for electricity customers.

---

## Outlook Unchanged

Fortis' outlook remains unchanged. There have been no significant ROE changes at the various regulated utilities, although Fortis has generally applied for customer rate increases reflecting recent and ongoing investments to grow rate base. The company is still in the early stages of a five-year, \$5.7 billion capital expenditure program (through 2015), expecting to spend \$1.2 billion in 2011 and a comparable amount in 2012. The failed CVPS acquisition leaves Fortis with a strong balance sheet to fund future transactions, with the company continuing to evaluate prospects for acquiring electric and gas utilities in the U.S. and Canada. We are maintaining our Sector Performer rating and \$33.50 price target.

## Q3/11 Results

Fortis reported adjusted Q3/11 EPS of \$0.25, versus \$0.26 in Q3/10, and in line with our \$0.24 expectation (consensus \$0.23). Our \$0.25 adjusted EPS figure excludes the \$11 million after-tax fee (\$0.06/share) paid to Fortis in July 2011 from the termination of the merger agreement between Fortis and Central Vermont Public Service (CVPS).

### Regulated Utilities:

- FortisBC Energy:** FortisBC Energy losses totaled \$3 million in Q3/11, compared to \$5 million in losses in Q3/10 and our estimate of \$4 million in losses. Q3 is FortisBC Energy's seasonally weakest quarter, with most of its earnings coming in Q1 and Q4. The y/y improvement reflects rate base growth and the timing of operating expenses.
- FortisAlberta:** FortisAlberta contributed \$19 million to earnings in Q3/11, versus \$19 million in Q3/10, and our \$19 million estimate. Y/Y results were flat reflecting rate base growth in 2011 offset by the recording of the cumulative impact of a positive revenue requirement regulatory decision in Q3/10.

- **FortisBC Electric:** FortisBC Electric earnings totaled \$10 million in Q3/11, compared to \$11 million in Q3/10, and our \$11 million estimate. The modest y/y decline reflects higher effective corporate income taxes and lower capitalized allowance for funds used during construction (AFUDC) due to fewer assets under construction in 2011, partially offset by rate base growth.
- **Newfoundland Power:** Newfoundland Power earnings were \$8 million in the quarter, compared to \$8 million in Q3/10 and our \$8 million estimate. Y/Y results were flat as electricity sales growth and lower effective corporate income taxes were offset by lower customer rates due to a lower allowed ROE in 2011.
- **Other Canadian Electric Utilities:** Other Canadian Electric Utilities contributed earnings of \$6 million in the quarter, up from \$5 million in Q3/10 and above our \$5 million estimate. The modest outperformance reflects a higher allowed ROE at Algoma Power and lower effective corporate income taxes at FortisOntario.
- **Caribbean Utilities:** Caribbean Utilities earnings contribution totaled \$6 million, versus \$8 million in Q3/10 and our \$7 million estimate. The y/y decline reflects the removal of Belize Electricity from consolidated results (expropriated by the Government of Belize in June 2011) which contributed \$2 million to earnings in Q3/10. An independent valuation is underway in preparation for Fortis to seek compensation from the Government of Belize, and Fortis expects to submit its claim to the government in Q4/11. We do not expect a quick resolution to this situation.

#### Non-Regulated Businesses:

- **Fortis Generation:** Fortis Generation earnings totaled \$8 million, from \$9 million in Q3/10 and below our \$9 million estimate. Results were moderately lower-than-expected due to decreased production in Belize resulting from lower rainfall associated with a longer dry season in 2011.
- **Fortis Properties:** Fortis Properties earnings came in at \$9 million in Q3/11, compared to \$9 million in Q3/10 and our \$10 million estimate. Results were slightly below expectations as a result of higher administrative expenses.
- **Corporate:** Corporate expenses totaled \$16 million in the quarter, down from \$19 million in Q3/10 and below our \$20 million estimate, reflecting foreign exchange gains in Q3/11.

---

## EPS Estimates Unchanged

We have made minor modifications to our estimates (modestly lower non-regulated earnings offset by lower corporate expenses) mainly to reflect year-to-date results. Our 2011 and 2012 EPS estimates remain unchanged at \$1.72 and \$1.81, respectively.

**Exhibit 2. Summary Financial Forecast (\$ mlns., except per share)**

Source: CIBC World Markets Inc.

**Price Target Calculation**

Our price target is based on a discounted cash flow analysis, which captures the expected cash flow growth from Fortis' five-year, \$5.7 billion capital spending program. The price target of \$33.50 equates to a P/E multiple of 18.5x our 2012 estimate, a premium to the group average given, in our view, Fortis' solid, low-risk, growth outlook.

**Key Risks To Price Target**

- **Regulatory Issues:** Given that the majority of Fortis' business is regulated (over 90% as measured by revenues and assets), the company's results are highly sensitive to regulatory decisions – both positive (such as increasing allowed ROEs in Canada over the past few years) and negative (such as adverse rulings/actions in Belize).
- **Acquisition Risks:** Fortis has an announced intention to acquire distribution utilities. Acquisition risks include: deal risk (failure to close a transaction), operation and regulatory risks of the acquired organization.

- **Market Risks:** Under regulator-approved mechanisms, Fortis flows through the commodity cost of natural gas, fuel or purchased power to its customers. The company's non-regulated hydro generation assets are sensitive to localized rainfall levels, but are geographically dispersed and individually not meaningful to overall results. The Waneta Expansion will be more material, but hydrology risk is managed as part of the overall regional river system by BC Hydro, effectively reducing the risk to the project. Foreign exchange risk is relatively low: a 5% change in the Canadian/U.S. dollar exchange rate would impact earnings by \$0.01/share.
- **Construction Risk:** Fortis primarily faces construction risk for its non-regulated generation assets where the company assumes the risk of cost overruns. Clearly, the Waneta Expansion project is the largest construction project that the company is undertaking (with the company funding 51% of the total \$900 million cost). Fortis and its partners have signed a fixed-price design-build contract with SNC-Lavalin (SNC-SO) in order to mitigate construction risk, but ultimate construction and financing risks lie with the Waneta Expansion consortium (i.e., Fortis and partners).

## IMPORTANT DISCLOSURES:

**Analyst Certification:** Each CIBC World Markets research analyst named on the front page of this research report, or at the beginning of any subsection hereof, hereby certifies that (i) the recommendations and opinions expressed herein accurately reflect such research analyst's personal views about the company and securities that are the subject of this report and all other companies and securities mentioned in this report that are covered by such research analyst and (ii) no part of the research analyst's compensation was, is, or will be, directly or indirectly, related to the specific recommendations or views expressed by such research analyst in this report.

**Potential Conflicts of Interest:** Equity research analysts employed by CIBC World Markets are compensated from revenues generated by various CIBC World Markets businesses, including the CIBC World Markets Investment Banking Department. Research analysts do not receive compensation based upon revenues from specific investment banking transactions. CIBC World Markets generally prohibits any research analyst and any member of his or her household from executing trades in the securities of a company that such research analyst covers. Additionally, CIBC World Markets generally prohibits any research analyst from serving as an officer, director or advisory board member of a company that such analyst covers.

In addition to 1% ownership positions in covered companies that are required to be specifically disclosed in this report, CIBC World Markets may have a long position of less than 1% or a short position or deal as principal in the securities discussed herein, related securities or in options, futures or other derivative instruments based thereon.

Recipients of this report are advised that any or all of the foregoing arrangements, as well as more specific disclosures set forth below, may at times give rise to potential conflicts of interest.

## Fortis Inc.

### Q4 In Line. 2012: Strong Capex, Potential Pressure On Rates Of Return

- Fortis reported Q4/11 EPS of \$0.46 versus our estimate of \$0.47 (consensus \$0.47). EPS was down Y/Y versus \$0.49, reflecting the issuance of 10.3 mln. shares and the conversion of 1.4 mln. convertible debentures in 2011. Fortis will increase its dividend to \$0.30/share/quarter in Q1/12.
- Key items of note for Q4: increased earnings for FortisBC Energy due to rate base growth; a decrease in allowed ROE for FortisAlberta; lower Caribbean Utility earnings (expropriation of BEL and higher costs in Turks & Caicos); and lower corporate costs (debt refinancing and repayment).
- The company had capital expenditures of \$1.2 billion in 2011, with planned spending of \$1.3 billion in 2012 (\$5.5 billion through 2016), expected to deliver 7% rate base growth in 2012, and 5% CAGR through 2016.
- Fortis provides a stable distribution utility platform with organic growth driven by a significant capex program, but faces pressures on allowed ROE (recently reduced in Alberta, under review in B.C.). We believe the stock is fairly valued, trading at 18.1x 2013 P/E. Maintain SP rating, \$35 PT.

## In-line Q4

Fortis (FTS-SP) reported Q4/11 EPS of \$0.46, roughly in line with our \$0.47 estimate (consensus \$0.47). Net income of \$86 million was up modestly (1%) compared to \$85 million in Q4/10; however, EPS declined Y/Y versus \$0.49, reflecting the dilution from issuance of 10.3 million shares (gross proceeds of \$341 million) in June and July 2011, and the conversion of 1.4 million convertible debentures into common shares in November 2011.

Q4/11 results generally reflected growth in Fortis' western Canadian operations driven by strong customer and rate base growth in the region. FortisAlberta earnings in Q4 were flat Y/Y as the company recorded a \$2 million rate revenue reduction as a result of the Q4/11 ruling (retroactive for the full-year 2011) of a reduction in allowed ROE from 9.00% to 8.75%.

The company's Caribbean operations reported weaker results both for the quarter (earnings of \$3 million versus \$4 million Y/Y) and the year (\$20 million versus \$23 million) given the mid-year 2011 expropriation of Belize Electricity by the government, and due to higher costs at Fortis Turks and Caicos. The non-regulated Fortis Properties' earnings were down Y/Y due to a benefit in 2010 on the future income tax liability from the reduction in corporate taxes. Corporate and other costs were lower than expected, reflecting lower finance charges due to refinancing maturing debt at lower rates, and the repayment of credit facility borrowings during Q3/11.

---

## 2012: Strong Rate Base Growth, Some Risk To Rates Of Return

Fortis invested \$1.2 billion in capital spending in 2011, with plans for investing \$1.3 billion in 2012. The largest capital projects planned for 2012 include: the ongoing construction of the \$900 million Waneta Expansion Project (\$254 million in 2012); a 12-storey office building in St. John's, Newfoundland (\$32 million); and ongoing replacement of utility poles in Alberta (\$27 million). The remainder of the investment is directed to a large number of sustaining capital or smaller growth capital projects. This capex is expected to drive total rate base by 7% in 2012, and an average of 5% CAGR through to 2016.

A potential offset to this is downward pressure on regulated rates of return. In December 2011, the Alberta Utilities Commission (AUC) reduced FortisAlberta's allowed ROE for 2011 from 9.00% to 8.75% (applied retroactively for the year). In B.C., Fortis' gas and electric utilities are both starting a regulator-initiated cost of capital review, with decisions expected by October 2012. The B.C. utilities are currently at higher allowed ROEs than Alberta – 9.90% for FortisBC Electric, 9.50% for FortisBC Energy – suggesting that there exists downside risk. We are reducing our ROE assumptions for both B.C. utilities by 50 bps for 2012 onward. We note that the B.C. utilities collectively account for forecast 2012 rate base of \$4.7 billion – over half of the company's total forecast rate base of \$8.7 billion – and thus have a meaningful impact on overall company results.

On a positive note, Newfoundland Power has received regulatory approval to suspend use of the automatic ROE adjustment formula which has resulted in ever lower allowed ROEs as interest rates decline (2011 ROE was 8.38%; 2012 was calculated at 7.85% under the formula). We view the 2011 allowed ROE of 8.38% as a floor, and even see the potential for modest upward movement in this rate.

---

## Solid Business, But Fully Valued

Fortis is a well-managed utility, with solid mid-single-digit organic growth driven by a sizable capital spending program. Possible downward revisions in allowed ROE for the B.C. utilities represent a modest short-term headwind. The company continues to evaluate acquisition opportunities which could provide upside mid- to longer term. The company announced in December that it will increase its quarterly dividend to \$0.30/share (up from \$0.29/share), effective for Q1/2012.

Nevertheless, with the stock trading at 18.1x our estimated 2013 earnings, we believe that Fortis' outlook is already fairly reflected in its valuation, and we are maintaining our Sector Performer rating and \$35 price target.

---

## Q4/11 Results

Fortis reported adjusted Q4/11 EPS of \$0.46, versus \$0.49 in Q4/10, and basically in line with our \$0.47 expectation (consensus \$0.47). The Y/Y decline reflects the impact of the issuance of 10.3 million shares in June and July 2011 and the conversion of 1.4 million convertible debentures to common shares in November 2011. The main differences versus our expectations were from modestly lower FortisBC Energy earnings (highly seasonal business which is difficult to accurately pinpoint on a quarterly basis), lower Caribbean Utilities earnings (higher operating costs and amortization than expected in Turks and Caicos), partially offset by lower corporate and other costs (lower finance charges).

In December, Fortis announced that it is increasing its dividend from \$1.16/share annually (\$0.29/share quarterly) to \$1.20/share annually (\$0.30/share quarterly) beginning with the Q1/12 dividend payable on March 1, 2012.

Source: CIBC World Markets Inc.

**Regulated Utilities:**

- **FortisBC Energy:** FortisBC Energy earnings totaled \$51 million in Q4/11, up from \$45 million in Q4/10, but slightly below our estimate of \$53 million. The Y/Y increase reflects rate base growth due to continued investment in energy infrastructure.
- **FortisAlberta:** FortisAlberta contributed \$17 million to earnings in Q4/11, versus \$17 million in Q4/10, and our \$17 million estimate. Rate base growth was offset by the cumulative impact of the AUC's December 2011 decision to set the allowed ROE at 8.75% (versus 9.00% assumed previously) realized in Q4/11.
- **FortisBC Electric:** FortisBC Electric earnings totaled \$11 million in Q4/11, compared to \$10 million in Q4/10, and our \$11 million estimate. Growth in the rate base was partially offset in the quarter by higher-than-expected operating expenses and lower electricity sales due to warmer-than-normal weather.
- **Newfoundland Power:** Newfoundland Power earnings were \$8 million in the quarter, compared to \$9 million in Q4/10 and our \$7 million estimate. The Y/Y decline reflects lower allowed ROE in 2011 and higher operating expenses in Q4/11, partially offset by a reduction in energy supply costs associated with its hydroelectric generating facilities.

- **Other Canadian Electric Utilities:** Other Canadian Electric Utilities contributed earnings of \$4 million in the quarter, versus \$5 million in Q4/10 and our \$3 million estimate. The Y/Y decline reflects lower electricity sales at FortisOntario, a negative rate of return adjustment at Maritime Electric and higher operating expenses.
- **Caribbean Utilities:** Caribbean Utilities earnings contribution totaled \$3 million, versus \$5 million in Q4/10 and our \$8 million estimate. Lower-than-expected earnings reflect higher amortization and operating expenses at Fortis Turks and Caicos.

### Non-Regulated Businesses:

- **Fortis Generation:** Fortis Generation earnings totaled \$5 million, compared to \$5 million in Q4/10 and our \$5 million estimate. Increased production in Belize was offset by lower average energy sale prices in Upper New York State and higher business development costs in Ontario.
- **Fortis Properties:** Fortis Properties earnings came in at \$5 million in Q4/11, compared to \$7 million in Q4/10 and our \$6 million estimate. The Y/Y decline reflects higher corporate income taxes relative to Q4/10, as lower statutory tax rates reduced future income tax liability balances in Q4/10, which in turn, reduced corporate income taxes in Q4/10.
- **Corporate:** Corporate costs totaled \$18 million, unchanged from \$18 million in Q4/10, and below our \$22 million estimate, as a result of refinancing maturing debt at lower interest rates, and the repayment of credit facility borrowings during Q3/11.

---

## Revising Estimates

We have made the following changes to our forecasts:

- **FortisBC Energy:** We are reducing our allowed ROE assumption for FortisBC Energy Inc. from 9.50% to 9.00% for 2012 and beyond as we anticipate that the cost of capital hearings in B.C. will result in lower allowed ROEs. We are maintaining the 50 bps spread between FortisBC Energy Inc. and the other FortisBC Energy utilities [FortisBC Energy (Vancouver Island) Inc., FortisBC Energy (Whistler) Inc., and FortisBC Energy (Fort Nelson) Inc.], implying a reduction in the allowed ROEs for these entities from 10.00% to 9.50%. As a result, our 2012 and 2013 FortisBC earnings estimates decline from \$155 million and \$164 million to \$148 million and \$156 million, respectively.
- **FortisBC Electric:** We are reducing our allowed ROE assumption for FortisBC Electric Inc. from 9.90% to 9.40% for 2012 and beyond, resulting in a decline in our FortisBC Electric earnings estimates for 2012 and 2013 from \$52 million and \$55 million to \$49 million and \$52 million, respectively.
- **Caribbean Utilities:** We are reducing our Caribbean Utilities forecasts from \$25 million to \$21 million for 2012 and 2013, reflecting more modest growth expectations from the segment.
- **Corporate:** We are reducing our 2012 and 2013 corporate costs estimates from \$79 million to \$68 million, reflecting lower financing charges due to the refinancing of debt at lower interest rates, and lower debt levels due to the repayment of credit facility borrowings during Q3/11.

**Price Target Calculation**

We are maintaining our \$35 price target, which is based on a discounted cash flow analysis, which captures the expected cash flow growth from Fortis' five-year, \$5.5 billion capital spending program. The price target of \$35 equates to a P/E multiple of 18.7x our 2013 estimate (versus 18.5x previously), a modest premium to the group average given, in our view, Fortis' solid, low-risk, growth outlook.

**Key Risks To Price Target**

- **Regulatory Issues:** Given that the majority of Fortis' business is regulated (over 90% as measured by revenues and assets), the company's results are highly sensitive to regulatory decisions – both positive (such as increasing allowed ROEs in Canada over the past few years) and negative (such as adverse rulings/actions in Belize).
- **Acquisition Risks:** Fortis has an announced intention to acquire distribution utilities. Acquisition risks include: deal risk (failure to close a transaction), operation and regulatory risks of the acquired organization.

- **Market Risks:** Under regulator-approved mechanisms, Fortis flows through the commodity cost of natural gas, fuel or purchased power to its customers. The company's non-regulated hydro generation assets are sensitive to localized rainfall levels, but are geographically dispersed and individually not meaningful to overall results. The Waneta Expansion will be more material, but hydrology risk is managed as part of the overall regional river system by BC Hydro, effectively reducing the risk to the project. Foreign exchange risk is relatively low: a 5% change in the Canadian/U.S. dollar exchange rate would impact earnings by \$0.01/share.
- **Construction Risk:** Fortis primarily faces construction risk for its non-regulated generation assets where the company assumes the risk of cost overruns. Clearly, the Waneta Expansion project is the largest construction project that the company is undertaking (with the company funding 51% of the total \$900 million cost). Fortis and its partners have signed a fixed-price design-build contract with SNC-Lavalin (SNC-SO) in order to mitigate construction risk, but ultimate construction and financing risks lie with the Waneta Expansion consortium (i.e., Fortis and partners).

## Fortis Inc.

### Announces Agreement To Acquire CH Energy Group

- Fortis announced an agreement to acquire CH Energy Group for ~US\$1.5 billion. CH Energy is the parent of Central Hudson Gas & Electric Corp., a regulated transmission and distribution utility serving 300,000 electric and 75,000 gas customers in New York State's Mid-Hudson River Valley.
- Fortis is purchasing CH Energy for US\$65/share, a 10.5% premium over the prior day's close. The purchase price includes the assumption of US\$500 million in debt, and implies an EV/rate base of 1.5x. The valuation equates to 2011 EPS and EBITDA multiples of 20.6x/10.4x vs. FTS at 19.2x/10.7x.
- Fortis intends to finance the transaction through its lines of credit, and will look to issue permanent financing (equity) once the deal closes (expected in Q1/13). While this acquisition is fully priced, Fortis expects it to be immediately accretive, driven by 6%-7% rate base growth.
- We are assuming the acquisition will be completed at US\$65/share and that Fortis will issue \$400 million in common equity (in Q1/13). While Fortis paid full value for this acquisition, we view it as a positive given CH Energy's significant growth profile. Our PT goes from \$35 to \$35.50. Maintain SP.

**Company Profile**

Fortis owns a natural gas utility in British Columbia, electric distribution utilities in five Canadian provinces, the Caribbean, and non-regulated power generation and real estate assets.

**Investment Thesis**

Fortis provides the benefits (stability) of a regulated utility, and is in a period of solid organic investment and growth as the company delivers on its 5 year, \$5.5 billion capital program which is expected to grow the regulated rate base by a CAGR of 6% through 2015. The company is also a 51% owner of the non-regulated \$900 million Waneta Expansion project.

## Announces Agreement To Acquire CH Energy Group

Fortis (FTS-SP) announced an agreement to acquire CH Energy Group (CHG-NYSE) for approximately US\$1.5 billion. CH Energy is the parent of Central Hudson Gas & Electric Corp. (Central Hudson), a regulated transmission and distribution utility serving approximately 300,000 electric and 75,000 gas customers in eight counties of New York State's Mid-Hudson River Valley (service region from suburbs of metropolitan New York City to Albany). CH Energy Group also owns Central Hudson Enterprises Corp. (CHEC), a non-regulated subsidiary comprised primarily of a fuel delivery business (Griffith Energy Services) serving approximately 56,000 customers in the Mid-Atlantic region. CHEC is a much smaller contributor to earnings relative to the utility, with Central Hudson accounting for approximately 97% of net income in 2011.

### Exhibit 1. CH Energy Service Areas

Source: Company reports.

## Transaction Details

Fortis is purchasing CH Energy for US\$65/share, a 10.5% premium to the closing price on February 17, the last business day before the transaction was announced. The total purchase price of US\$1.5 billion includes the assumption of approximately US\$500 million of debt, and implies a 1.5x EV/rate base multiple (estimated rate base of ~US\$1 billion at closing). The valuation equates to 20.6x 2011 EPS and 10.4x 2011 EV/EBITDA versus 19.2x and 10.7x for Fortis, respectively. The valuation appears 'fully priced', but Fortis expects the deal to

be immediately accretive (we estimate full-year accretion of \$0.03-\$0.05/share, representing ~2% accretion on 2011 EPS totaled \$1.69) once it closes (expected in Q1/13). The accretion mainly reflects strong expected growth over the coming years with Central Hudson expected to invest an average of over US\$100 million in capital expenditures annually through 2016.

Fortis intends to finance the transaction through its lines of credit, with \$1.9 billion of a total of \$2.2 billion currently available. Fortis will look to issue permanent financing (i.e. equity) once the deal is closed, expected within 12 months, pending approvals. CH Energy shareholder vote is expected in June 2012, with FERC and New York State Public Service Commission (PSC) decisions expected to follow in Q3/12 and Q1/13, respectively. As part of the PSC review, Fortis must show how this transaction is a net benefit to customers in the service territory. Fortis will look to maintain its capital structure at ~35% common equity, the remainder debt/preferred shares. Recall that Fortis issued ~\$341 million in equity in mid-2011 to finance the Central Vermont Public Service (CVPS) acquisition which ultimately fell through, so the equity requirement for this acquisition might be partially met through that financing.

CH Energy is up 21% over the past year, as the company has sold off its renewables assets in order to focus on its core transmission and distribution utilities business. Fortis has been looking to expand into the U.S., but has failed to date as it has been outbid. Other companies with utility companies in the region include Consolidated Edison (ED-NYSE), National Grid (NGG-NYSE), and Iberdrola (IBE-MC). While this transaction comes at a steep price, we do not completely rule out the potential for other bidders to join the fray given the other large companies that operate in the region, and Fortis' experience with CVPS. The break fee associated with this transaction is set at US\$19.7 million.

---

## Acquisition Is A Modest Positive To Outlook

While Fortis paid full value for this acquisition, we view it as a positive to the extent that there is significant growth expected at Central Hudson over the next several years (rate base growth of 6%-7% annually), and the allowed ROE and equity thickness (10% ROE and 48% common equity) are strong relative to the rest of its Canadian portfolio of utilities (allowed ROEs of ~9% and equity thickness of ~40%). We are assuming that Fortis completes this acquisition (at US\$65/share) in Q1/13. We are increasing our price target from \$35 to \$35.50, and maintaining our Sector Performer rating.

---

## Revising Estimates

We have built in the CH Energy acquisition, and assumed a closing date at the end of Q1/13. In conjunction with the acquisition, we assume that: a) Fortis issues \$500 million of debt at the corporate level, and b) Fortis issues \$400 million in common equity at the end of Q1/13. As a result of these changes, our 2013 EPS estimate increases from \$1.87 to \$1.89. For 2014, we assume a full-year's contribution from CH Energy, combined with additional rate base growth, resulting in a \$0.04 increase in EPS.

Source: CIBC World Markets Inc.

**Price Target Calculation**

We are raising our price target from \$35 to \$35.50. Our price target is based on a discounted cash flow analysis, which captures the expected cash flow growth from Fortis' five-year, \$5.5 billion capital spending program. Our price target equates to a P/E multiple of 18.8x our 2013 estimate, a modest premium to the group average given, in our view, Fortis' solid, low-risk, growth outlook.

**Key Risks To Price Target**

- **Regulatory Issues:** Given that the majority of Fortis' business is regulated (over 90% as measured by revenues and assets), the company's results are highly sensitive to regulatory decisions – both positive (such as increasing allowed ROEs in Canada over the past few years) and negative (such as adverse rulings/actions in Belize).
- **Acquisition Risks:** Fortis has an announced intention to acquire distribution utilities. Acquisition risks include: deal risk (failure to close a transaction), and operation and regulatory risks of the acquired organization.

- **Market Risks:** Under regulator-approved mechanisms, Fortis flows through the commodity cost of natural gas, fuel or purchased power to its customers. The company's non-regulated hydro generation assets are sensitive to localized rainfall levels, but are geographically dispersed and individually not meaningful to overall results. The Waneta Expansion will be more material, but hydrology risk is managed as part of the overall regional river system by BC Hydro, effectively reducing the risk to the project. Foreign exchange risk is relatively low: a 5% change in the Canadian/U.S. dollar exchange rate would impact earnings by \$0.01/share.
- **Construction Risk:** Fortis primarily faces construction risk for its non-regulated generation assets where the company assumes the risk of cost overruns. Clearly, the Waneta Expansion project is the largest construction project that the company is undertaking (with the company funding 51% of the total \$900 million cost). Fortis and its partners have signed a fixed-price design-build contract with SNC-Lavalin (SNC-SO) in order to mitigate construction risk, but ultimate construction and financing risks lie with the Waneta Expansion consortium (i.e., Fortis and partners).

2013 Current	--	--	--	--	\$1.89E

## IMPORTANT DISCLOSURES:

**Analyst Certification:** Each CIBC World Markets research analyst named on the front page of this research report, or at the beginning of any subsection hereof, hereby certifies that (i) the recommendations and opinions expressed herein accurately reflect such research analyst's personal views about the company and securities that are the subject of this report and all other companies and securities mentioned in this report that are covered by such research analyst and (ii) no part of the research analyst's compensation was, is, or will be, directly or indirectly, related to the specific recommendations or views expressed by such research analyst in this report.

**Potential Conflicts of Interest:** Equity research analysts employed by CIBC World Markets are compensated from revenues generated by various CIBC World Markets businesses, including the CIBC World Markets Investment Banking Department. Research analysts do not receive compensation based upon revenues from specific investment banking transactions. CIBC World Markets generally prohibits any research analyst and any member of his or her household from executing trades in the securities of a company that such research analyst covers. Additionally, CIBC World Markets generally prohibits any research analyst from serving as an officer, director or advisory board member of a company that such analyst covers.

In addition to 1% ownership positions in covered companies that are required to be specifically disclosed in this report, CIBC World Markets may have a long position of less than 1% or a short position or deal as principal in the securities discussed herein, related securities or in options, futures or other derivative instruments based thereon.

Recipients of this report are advised that any or all of the foregoing arrangements, as well as more specific disclosures set forth below, may at times give rise to potential conflicts of interest.

## Important Disclosure Footnotes for Fortis Inc. (FTS)

- 2a Fortis Inc. is a client for which a CIBC World Markets company has performed investment banking services in the past 12 months.
- 2c CIBC World Markets Inc. has managed or co-managed a public offering of securities for Fortis Inc. in the past 12 months.
- 2e CIBC World Markets Inc. has received compensation for investment banking services from Fortis Inc. in the past 12 months.
- 2g CIBC World Markets Inc. expects to receive or intends to seek compensation for investment banking services from Fortis Inc. in the next 3 months.
- 7 CIBC World Markets Corp., CIBC World Markets Inc., and their affiliates, in the aggregate, beneficially own 1% or more of a class of equity securities issued by Fortis Inc.

## Fortis Inc.

### Q1 In Line, Ex-Acquisition Charges

- Fortis reported Q1/12 adjusted EPS of \$0.66 versus our estimate of \$0.66 (consensus \$0.67). Our adjusted EPS excludes ~\$4 million in one-time costs related to the pending CH Energy acquisition which impacted earnings by \$0.02/share.
- Operationally, the quarter benefited from ongoing strong rate base growth in its western Canadian utilities, offset by: warmer than normal weather, a lower allowed ROE for FortisAlberta, and the discontinuance of the PBR mechanism for FortisBC Electric.
- Looking forward, we see the benefits of ongoing rate base growth in the western Canadian utilities and (in 2013) the expected inclusion of the CH Energy acquisition. However, we also see modest downside risk to allowed ROEs in the B.C. utilities.
- We have updated our earnings outlook to reflect these factors, with modest changes to our ROE assumptions resulting in no change to our 2012 forecast and a minor (\$0.02) annual EPS impact thereafter. We maintain our SP rating and \$35.50 price target.

## Q1 In Line, Ex-Acquisition Charges

Fortis (FTS-SP) reported adjusted Q1/12 EPS of \$0.66 versus our estimate of \$0.66 (consensus \$0.67). Our adjusted EPS excludes the impact of one-time expenses of ~\$4 million (a \$0.02 EPS impact) related to the pending acquisition of CH Energy Group, Inc. (CHG-NYSE). EPS was also down versus \$0.67 (CGAAP) last Q1, reflecting the dilutive impact from the issuance of 10.34 million shares in mid-2011.

Operationally, the quarter was roughly in line with expectations. While ongoing rate base and customer growth (especially at FortisAlberta) benefited results, there were a number of minor headwinds in the quarter, including: (1) the impact of a warmer-than-normal winter on energy consumption; (2) a lower allowed ROE at FortisAlberta, stemming from a late 2011 regulatory decision; (3) the discontinuance as of the end of 2011 of the performance-based rate-setting (PBR) mechanism at FortisBC Electric, which allowed for sharing of cost savings between the utility and its rate payers.

---

## No Material Change To Outlook

We continue to view the key drivers to Fortis' outlook as follows:

- **Rate base/customer growth:** Fortis' western Canadian regulated utilities continue to experience strong rate base growth, driven by customer additions and ongoing capex (i.e., forecast 2012 capex of \$774 million for FortisBC Energy, FortisBC Electric and FortisAlberta – roughly 60% of total forecast 2012 capex of \$1.29 billion). This investment contributes to forecast mid-year rate base growth of: ~10% for FortisBC Energy, ~7% for FortisBC Electric, and ~15% for FortisAlberta.
- **Regulatory proceedings:** Partially offsetting this rate base growth, Fortis is seeing modest downward pressure on its allowed ROEs. FortisAlberta received a decision in late 2011 to lower its 2011 and 2012 allowed ROE from 9.00% to 8.75%; FortisBC Energy will face a Generic Cost of Capital proceeding in 2012 to determine an appropriate allowed ROE, and we see downside risk in 2013 to the current 9.50% (10.00% for Vancouver Island/Whistler/Fort Nelson) rates; FortisBC Electric is maintaining a 9.90% allowed ROE in 2012, but the PBR mechanism – which helped generate an overall achieved ROE of ~11.20% for 2011 – has been discontinued for 2012.
- **Acquisitions:** Fortis announced an agreement to acquire CH Energy Group on February 21. Numerous approvals are required, including shareholders, regulators and others. In April, applications were filed with the New York State Public Service Commission (NYPSC) and the U.S. Federal Energy Regulatory Commission (FERC), and the CH Energy shareholder vote is expected in June. If all required approvals are received, closing is expected by the end of Q1/2013.

Overall, we see no material change to our outlook, with adjustments to our ROE assumptions having no impact to our 2012 EPS forecast, and a modest (\$0.02) impact on 2013 and beyond (although we have not built in any potential positives, like the potential reinstatement of a PBR mechanism in B.C.). Accordingly, we maintain our Sector Performer rating and \$35.50 price target.

## Q1/12 Results

Fortis reported adjusted Q1/12 EPS of \$0.66, versus \$0.67 (CGAAP) in Q1/11, and our \$0.66 expectation (consensus \$0.67). Results were in-line with expectations across most segments, with modestly lower-than-expected FortisBC Electric earnings offset by slightly stronger results in FortisBC Energy and Fortis Generation. The \$0.66 in adjusted EPS excludes \$4 million (\$0.02 in EPS) in one-time acquisition-related expenses associated with the CH Energy transaction. The Y/Y decline reflects the impact of the issuance of 10.34 million shares in June and July 2011.

Source: CIBC World Markets Inc.

### Regulated Utilities:

- FortisBC Energy:** FortisBC Energy earnings totaled \$82 million in Q1/12, compared to \$76 million (CGAAP) in Q1/11 and our estimate of \$80 million. The strong performance reflects the seasonality of gas consumption and the timing of certain expenses (revenue recognized on consumption while certain expenses are incurred evenly throughout the year), rate base growth due to continued investment, and higher gas transportation volumes to the forestry and mining sector.

- **FortisAlberta:** FortisAlberta contributed \$21 million to earnings in Q1/12, versus \$21 million (CGAAP) in Q1/11, and our \$22 million estimate. Results were flat Y/Y reflecting rate base growth offset by a \$1 million gain on sale of property during Q1/11, lower-than-expected number of customers and lower energy consumption by residential customers in Q1/12, and a lower allowed ROE (8.75% in Q1/12 versus 9.00% in Q1/11).
- **FortisBC Electric:** FortisBC Electric earnings totaled \$16 million in Q1/12, compared to \$19 million (CGAAP) in Q1/11, and our \$20 million estimate. The underperformance reflects the discontinuance of the performance-based rate-setting (PBR) mechanism (the benefit of lower-than-expected costs were shared equally between FortisBC Electric and customers under PBR in Q1/11), and increased operating expenses in Q1/12.
- **Newfoundland Power:** Newfoundland Power earnings were \$7 million in the quarter, compared to \$7 million (CGAAP) in Q1/11 and our \$7 million estimate. Lower corporate income taxes in the quarter (due to a lower statutory rate), were offset by lower revenue associated with the joint-use poles with Bell Aliant (BA-SP) that were sold in October 2011.
- **Other Canadian Electric Utilities:** Other Canadian Electric Utilities contributed earnings of \$7 million in the quarter, versus \$6 million (CGAAP) in Q1/11 and our \$6 million estimate. Higher earnings reflected lower corporate income taxes and increased electricity sales at Maritime Electric.
- **Caribbean Utilities:** Caribbean Utilities earnings contribution totaled \$3 million, versus \$4 million (CGAAP) in Q1/11 and our \$4 million estimate. Lower earnings reflected higher depreciation and finance charges due to increased investments in capital assets, and increased operating expenses associated with insurance and employee-related costs.

### Non-Regulated Businesses:

- **Fortis Generation:** Fortis Generation earnings totaled \$5 million, compared to \$3 million (CGAAP) in Q1/11 and our \$3 million estimate. Stronger-than expected results reflect increased production in Belize due to higher rainfall.
- **Fortis Properties:** Fortis Properties earnings came in at \$1 million in Q1/12, compared to \$1 million (CGAAP) in Q1/11 and our \$2 million estimate. The contribution from a Winnipeg hotel acquired in October 2011 was offset by the gain on sale of the Viking Mall during Q1/11.
- **Corporate:** Corporate costs totaled \$17 million (excluding \$4 million of one-time acquisition related expenses) in Q1/12, down from \$20 million (CGAAP) in Q1/11, as a result of lower finance charges due to higher capitalized interest (financing Waneta Expansion), and lower borrowings.

---

## Revising Estimates

For 2012, we have increased our allowed ROE assumptions back to the 2011 levels for FortisBC Energy and FortisBC Electric, as the results of cost of capital hearings in the province will impact allowed ROEs beginning in 2013.

- **FortisBC Energy:** The 2012 allowed ROE for FortisBC Energy Inc. is 9.50%, versus our previous assumption of 9.00%, and 10.00% for the other FortisBC Energy utilities (Vancouver Island, Whistler, and Fort Nelson), versus our previous assumption of 9.50%. For 2013, we maintain our 50 bps decline assumption for all of the FortisBC Energy utilities (9.00% for FortisBC Energy Inc., and 9.50% for the other FortisBC Energy utilities).

- FortisBC Electric:** The 2012 allowed ROE for FortisBC Electric is 9.90%, versus our previous assumption of 9.40%. With the discontinuation of the performance-based rate (PBR) mechanism, we expect achieved ROE in 2012 (and beyond) to decline. For 2013, we maintain our 50 bps decline assumption for FortisBC Electric to 9.40%.

In 2012, the impact of higher assumed allowed ROEs in B.C. offsets the discontinuation of the PBR at FortisBC Electric, and as result, our 2012 EPS estimate of \$1.78 remains unchanged. For 2013, we have maintained our assumption of a 50 bps decline in allowed ROEs for Fortis B.C. utilities, and combined with the impact of the PBR discontinuation, results in our 2013 EPS estimate declining from \$1.89 to \$1.87.

## Price Target Calculation

Our \$35.50 price target is based on a discounted cash flow analysis, which captures the expected cash flow growth from Fortis' five-year, \$5.5 billion capital spending program. Our price target equates to a P/E multiple of 19.0x our 2013 estimate, a modest premium to the group average (18.4x) given, in our view, Fortis' solid, low-risk, growth outlook.

---

## Key Risks To Price Target

- **Regulatory Issues:** Given that the majority of Fortis' business is regulated (over 90% as measured by revenues and assets), the company's results are highly sensitive to regulatory decisions – both positive (such as increasing allowed ROEs in Canada over the past few years) and negative (such as adverse rulings/actions in Belize).
- **Acquisition Risks:** Fortis has an announced intention to acquire distribution utilities. Acquisition risks include: deal risk (failure to close a transaction), operation and regulatory risks of the acquired organization.
- **Market Risks:** Under regulator-approved mechanisms, Fortis flows through the commodity cost of natural gas, fuel or purchased power to its customers. The company's non-regulated hydro generation assets are sensitive to localized rainfall levels, but are geographically dispersed and individually not meaningful to overall results. The Waneta Expansion will be more material, but hydrology risk is managed as part of the overall regional river system by BC Hydro, effectively reducing the risk to the project. Foreign exchange risk is relatively low: a 5% change in the Canadian/U.S. dollar exchange rate would impact earnings by \$0.01/share.
- **Construction Risk:** Fortis primarily faces construction risk for its non-regulated generation assets where the company assumes the risk of cost overruns. Clearly, the Waneta Expansion project is the largest construction project that the company is undertaking (with the company funding 51% of the total \$900 million cost). Fortis and its partners have signed a fixed-price design-build contract with SNC-Lavalin (SNC-SO) in order to mitigate construction risk, but ultimate construction and financing risks lie with the Waneta Expansion consortium (i.e., Fortis and partners).

## IMPORTANT DISCLOSURES:

**Analyst Certification:** Each CIBC World Markets research analyst named on the front page of this research report, or at the beginning of any subsection hereof, hereby certifies that (i) the recommendations and opinions expressed herein accurately reflect such research analyst's personal views about the company and securities that are the subject of this report and all other companies and securities mentioned in this report that are covered by such research analyst and (ii) no part of the research analyst's compensation was, is, or will be, directly or indirectly, related to the specific recommendations or views expressed by such research analyst in this report.

**Potential Conflicts of Interest:** Equity research analysts employed by CIBC World Markets are compensated from revenues generated by various CIBC World Markets businesses, including the CIBC World Markets Investment Banking Department. Research analysts do not receive compensation based upon revenues from specific investment banking transactions. CIBC World Markets generally prohibits any research analyst and any member of his or her household from executing trades in the securities of a company that such research analyst covers. Additionally, CIBC World Markets generally prohibits any research analyst from serving as an officer, director or advisory board member of a company that such analyst covers.

In addition to 1% ownership positions in covered companies that are required to be specifically disclosed in this report, CIBC World Markets may have a long position of less than 1% or a short position or deal as principal in the securities discussed herein, related securities or in options, futures or other derivative instruments based thereon.

Recipients of this report are advised that any or all of the foregoing arrangements, as well as more specific disclosures set forth below, may at times give rise to potential conflicts of interest.

## Important Disclosure Footnotes for Fortis Inc. (FTS)

- 2a Fortis Inc. is a client for which a CIBC World Markets company has performed investment banking services in the past 12 months.
- 2c CIBC World Markets Inc. has managed or co-managed a public offering of securities for Fortis Inc. in the past 12 months.
- 2e CIBC World Markets Inc. has received compensation for investment banking services from Fortis Inc. in the past 12 months.

## Fortis Inc.

### CH Energy Shareholder Approval; Closes \$601 Million In Subscription Receipts

- On June 27 Fortis announced the completion of its bought deal for 18.5 million subscription receipts at a purchase price of \$32.50 per subscription receipt. The gross proceeds of \$601 million will be held in an escrow pending the closing of the CH Energy acquisition.
- On June 19 Fortis announced that CH Energy shareholders approved the merger agreement whereby Fortis will acquire CH Energy for an aggregate purchase price of approximately US\$1.5 billion, including the assumption of approximately US\$500 million in debt.
- We had previously assumed that Fortis would issue \$400 million in common equity in conjunction with the closing of the transaction, expected in Q1/13. The larger and earlier equity issue results in our 2012E and 2013E EPS declining from \$1.78 and \$1.87 to \$1.71 and \$1.82, respectively.
- The larger-than-expected equity issue also brings the expected accretion from this transaction in the first full year (2014) to the lower end of our original estimate of \$0.03-\$0.05. We are reducing our price target from \$35.50 to \$34.50. We maintain our SP rating.

## Price Target Calculation

We are reducing our price target from \$35.50 to \$34.50, based on a discounted cash flow analysis, which captures the expected cash flow growth from Fortis' (FTS-SP) five-year, \$5.5 billion capital spending program. Our price target equates to a P/E multiple of 19.0x our 2013 estimate, a premium to the group average (17.7x) given, in our view, Fortis' solid, low-risk, growth outlook.

---

## Key Risks To Price Target

- **Regulatory Issues:** Given that the majority of Fortis' business is regulated (over 90% as measured by revenues and assets), the company's results are highly sensitive to regulatory decisions – both positive (such as increasing allowed ROEs in Canada over the past few years) and negative (such as adverse rulings/actions in Belize).
- **Acquisition Risks:** Fortis has an announced intention to acquire distribution utilities. Acquisition risks include: deal risk (failure to close a transaction), operation and regulatory risks of the acquired organization.
- **Market Risks:** Under regulator-approved mechanisms, Fortis flows through the commodity cost of natural gas, fuel or purchased power to its customers. The company's non-regulated hydro generation assets are sensitive to localized rainfall levels, but are geographically dispersed and individually not meaningful to overall results. The Waneta Expansion will be more material, but hydrology risk is managed as part of the overall regional river system by BC Hydro, effectively reducing the risk to the project. Foreign exchange risk is relatively low: a 5% change in the Canadian/U.S. dollar exchange rate would impact earnings by \$0.01/share.
- **Construction Risk:** Fortis primarily faces construction risk for its non-regulated generation assets where the company assumes the risk of cost overruns. Clearly, the Waneta Expansion project is the largest construction project that the company is undertaking (with the company funding 51% of the total \$900 million cost). Fortis and its partners have signed a fixed-price design-build contract with SNC-Lavalin Group (SNC-SO) in order to mitigate construction risk, but ultimate construction and financing risks lie with the Waneta Expansion consortium (i.e., Fortis and partners).

## Our EPS estimates are shown below:

## IMPORTANT DISCLOSURES:

**Analyst Certification:** Each CIBC World Markets research analyst named on the front page of this research report, or at the beginning of any subsection hereof, hereby certifies that (i) the recommendations and opinions expressed herein accurately reflect such research analyst's personal views about the company and securities that are the subject of this report and all other companies and securities mentioned in this report that are covered by such research analyst and (ii) no part of the research analyst's compensation was, is, or will be, directly or indirectly, related to the specific recommendations or views expressed by such research analyst in this report.

**Potential Conflicts of Interest:** Equity research analysts employed by CIBC World Markets are compensated from revenues generated by various CIBC World Markets businesses, including the CIBC World Markets Investment Banking Department. Research analysts do not receive compensation based upon revenues from specific investment banking transactions. CIBC World Markets generally prohibits any research analyst and any member of his or her household from executing trades in the securities of a company that such research analyst covers. Additionally, CIBC World Markets generally prohibits any research analyst from serving as an officer, director or advisory board member of a company that such analyst covers.

In addition to 1% ownership positions in covered companies that are required to be specifically disclosed in this report, CIBC World Markets may have a long position of less than 1% or a short position or deal as principal in the securities discussed herein, related securities or in options, futures or other derivative instruments based thereon.

Recipients of this report are advised that any or all of the foregoing arrangements, as well as more specific disclosures set forth below, may at times give rise to potential conflicts of interest.

## Fortis Inc.

### Solid Q2 Benefits From Ongoing Growth At FortisAlberta

- Fortis reported headline EPS of \$0.33. Excluding costs related to the pending CH Energy acquisition, EPS were \$0.34 versus our estimate (and consensus) of \$0.33. The company incurred a further \$3 million in one-time costs related to CH Energy (on top of \$4 million in Q1).
- Operationally, Q2 benefited from strength at FortisAlberta (earnings up 37% y/y), driven by ongoing customer additions and rate base growth, and further helped by ~\$4 million (~\$0.02 EPS) in additional revenues/reduced costs related to Q1, but recognized in Q2 due to recent regulatory decisions.
- Fortis continues to work towards closing the US\$1.5 billion CH Energy acquisition by the end of Q1/13. Fortis received CH Energy shareholder approval in June and U.S. FERC/CFIUS regulatory approvals in July. NY State Public Service Commission approvals remain outstanding.
- In Q1/13, we expect the close of the CH Energy acquisition and key regulatory decisions in Alberta and B.C. However, we see little change to the outlook for the balance of 2012 and maintain our Sector Performer rating and \$34.50 price target.

## Solid Q2 Benefits From Ongoing Growth At FortisAlberta

Fortis (FTS-SP) reported Q2/12 EPS of \$0.33, in line with CIBC and consensus estimates of \$0.33. Excluding one-time costs related to the pending acquisition of CH Energy, Fortis recorded adjusted EPS of \$0.34, although one-time benefits in the quarter at FortisAlberta from recent regulatory decisions are the main contributor to this upside versus consensus.

Operationally, FortisAlberta remains the key growth driver, with customer growth continuing at ~2%/year and annual capex (budget of \$419 million in 2012) roughly one-third of the company total (of \$1.29 billion). In Q2/12, earnings of \$26 million were up 37% y/y versus \$19 million. We note that this growth is overstated versus a normalized level, as FortisAlberta benefited from recent regulatory rulings which increased quarterly revenues by ~\$1 million and reduced depreciation expense by ~\$3 million; both these amounts were recorded in Q2/12 but were applied retroactively and were related to Q1/12.

Other segments were roughly in line with expectations, with a couple of exceptions: FortisBC Energy (earnings of \$13 million) was below our expectations (\$17 million) and down y/y (versus \$15 million) in a seasonally slow quarter of the year (gas demand peaks in the winter months); and, Newfoundland Power (earnings of \$12 million) modestly beat our estimate (\$11 million) and increased y/y (versus \$10 million) due to the cumulative year to date benefit (recognized in Q2/12) of a higher allowed ROE (8.80% for 2012 versus 8.38% in 2011).

---

## Investment Summary

Looking forward, we expect little change for the balance of 2012. The company continues to progress on its \$1.3 billion capital program, with no material changes to overall schedule or budget including the major Waneta Expansion.

The company is working towards closing the US\$1.5 billion CH Energy (CHG-NYSE) acquisition, a regulated gas and electric utility serving 375,000 customers in New York State. Fortis received CH Energy shareholder approval for the transaction in June, and U.S. Federal Energy Regulatory Commission (FERC) and Committee on Foreign Investment in the United States (CFIUS) approvals in July. The company also closed a \$601 million equity offering (subscription receipts) on June 27 to finance the transaction. The key (although not the only) outstanding regulatory hurdle is receiving New York State Public Service Commission approval. We expect Fortis to receive all required approvals. Fortis continues to expect the transaction to close by the end of Q1/13, and for the acquisition to be immediately accretive to EPS, excluding acquisition-related expenses.

Also by Q1/13 Fortis expects to receive a couple of regulatory decisions. In Alberta the Alberta Utilities Commission (AUC) intends to introduce a performance-based regulation (PBR) formula for 2013 which provides an incentive mechanism for utilities to introduce cost savings and share resulting increased profits with rate payers. Fortis has submitted its comments as to how it would like PBR to be implemented. A decision from the AUC is expected in late 2012 to be introduced for Q1/13. Fortis sees the potential for PBR to increase returns by up to 100 basis points above the current allowed rate of return (8.75% ROE). In BC, FortisBC Energy is involved in a generic cost of capital proceeding to determine an appropriate rate of return for 2013. The BC Utilities Commission (BCUC) is undertaking a more widespread process to determine an

appropriate rate of return benchmark; up to this point, FortisBC Energy has been the benchmark utility and expects to remain so. Fortis sees the potential for some downside risk to the current 9.50% to 10.00% ROE received at FortisBC Energy (the higher level for Whistler and Vancouver Island), although is seeking to maintain the current levels.

Overall, we see little risk to the short-term outlook. Upside in 2013 is expected to be driven by the CH Energy acquisition, although we expect accretion from the transaction initially to be quite modest given the sizable equity offering (\$601 million) to finance the acquisition and a transaction multiple roughly in line with that of Fortis (~1.5x rate base). The company also continues to execute its five year, \$5.5 billion capex program (to which CH Energy is expected to add a further \$0.5 billion). Overall, we are forecasting mid-single digit EPS growth. With Fortis trading at 19.1x 2012E EPS and 18.1x 2013, we see only modest upside at present, and maintain our Sector Performer rating and \$34.50 price target.

---

## Q2/12 Results

Fortis reported Q2/12 adjusted EPS (excluding CH Energy acquisition costs) of \$0.34, versus \$0.33 (Canadian GAAP) in Q2/11, and our \$0.33 expectation (consensus \$0.33). Slightly higher-than-expected earnings were due to strong results at FortisAlberta and in non-regulated operations partially offset by lower-than-expected results in FortisBC Energy.

FortisAlberta reported earnings of \$26 million, up 37% y/y as it benefited from \$1 million in additional net transmission revenues and \$3 million in reduced depreciation expense related to Q1/12 but included in Q2/12 due to recent regulatory decisions. We estimate these amounts generated ~\$0.02 EPS in Q2.

**Exhibit 1. Q2/12 Results (\$ mlns., except per share)**

**Regulated Utilities:**

- **FortisBC Energy:** FortisBC Energy earnings totaled \$13 million in Q2/12, compared to \$15 million in Q2/11 (CGAAP) and our estimate of \$17 million. The decline in earnings was mainly due to lower-than-expected customer additions and lower capitalized AFUDC due to a lower asset base under construction in 2012.
- **FortisAlberta:** FortisAlberta contributed \$26 million to earnings in Q2/12, versus \$19 million in Q2/11 (CGAAP), and our \$22 million estimate. Stronger-than-expected earnings reflected the cumulative impact of the Alberta Utilities Commission's (AUC) April 2012 distribution revenue requirements decision, which added \$3 million to net transmission revenue (\$1 million related to Q1/12) and reduced depreciation expense (\$3 million related to Q1/12), as well as rate base growth.
- **FortisBC Electric:** FortisBC Electric earnings totaled \$9 million in Q2/12, compared to \$9 million in Q2/11 (CGAAP), and our \$9 million estimate. The impact of rate base growth was offset by lower capitalized AFUDC in 2012, and the discontinuance of the performance-based rate-setting (PBR) mechanism (the benefit of lower-than-expected costs were shared equally between FortisBC Electric and customers under PBR in Q2/11).

- **Newfoundland Power:** Newfoundland Power earnings were \$12 million in the quarter, compared to \$11 million in Q2/11 (CGAAP) and our \$11 million estimate. Increased earnings reflect the cumulative impact of a higher 2012 allowed ROE (8.80% versus 8.38% previously) which was recognized in Q2/12.
- **Other Canadian Electric Utilities:** Other Canadian Electric Utilities contributed earnings of \$5 million in the quarter, versus \$6 million in Q2/11 (CGAAP) and our \$6 million estimate. Slightly lower-than-expected earnings reflects higher operating costs at FortisOntario due to an increase in employee related costs and the timing of expenses.
- **Caribbean Utilities:** Caribbean Utilities earnings contribution totaled \$6 million, versus \$7 million in Q2/11 (CGAAP) and our \$6 million estimate. Lower energy supply costs and higher electricity sales at Fortis Turks and Caicos, were offset by higher depreciation and finance charges (due to increased investment in utility assets) and decreased electricity sales at Caribbean Utilities.

### Non-Regulated Businesses:

- **Fortis Generation:** Fortis Generation earnings totaled \$5 million, compared to \$2 million in Q2/11 (CGAAP) and our \$3 million estimate. Stronger-than-expected results reflect increased production in Belize due to higher rainfall, as well as insurance proceeds related to the loss of earnings during the quarter from repairs to a facility in Upstate New York which sustained electrical damage in May 2011.
- **Fortis Properties:** Fortis Properties earnings came in at \$8 million in Q2/12, compared to \$7 million in Q2/11 (CGAAP) and our \$7 million estimate. The y/y increase reflects the contribution of a Winnipeg hotel acquired in October 2011.
- **Corporate:** Corporate costs totaled \$17 million (excluding \$4 million of one-time acquisition related expenses) in Q1/12, down from \$20 million (CGAAP) in Q1/11, as a result of lower finance charges due to higher capitalized interest (financing Waneta Expansion), and lower borrowings.

---

## Revising Estimates

We have revised our estimates mainly to reflect Q2 results, as well as accounting for the impact to outstanding shares from Fortis' \$601 million issuance of subscription receipts at the end of Q1/13 (when the CH Energy acquisition is expected to close) as opposed to when the subscription receipts were issued (in June 2012), in line with how the company is treating the issuance. As a result of these changes, our 2012 EPS estimate increases from \$1.71 to \$1.76 and our 2013 EPS estimate increases from \$1.82 to \$1.85.

Source: CIBC World Markets Inc.

**Price Target Calculation**

We are maintaining our \$34.50 price target, based on a discounted cash flow analysis, which captures the expected cash flow growth from Fortis' five-year, \$5.5 billion capital spending program. Our price target equates to a P/E multiple of 18.6x our 2013 estimate, in line with the group average (18.5x) given Fortis' modest low-risk growth outlook.

**Key Risks To Price Target**

- **Regulatory Issues:** Given that the majority of Fortis' business is regulated (over 90% as measured by revenues and assets), the company's results are highly sensitive to regulatory decisions – both positive (such as increasing allowed ROEs in Canada over the past few years) and negative (such as adverse rulings/actions in Belize).
- **Acquisition Risks:** Fortis has an announced intention to acquire distribution utilities. Acquisition risks include: deal risk (failure to close a transaction), operation and regulatory risks of the acquired organization.

- **Market Risks:** Under regulator-approved mechanisms, Fortis flows through the commodity cost of natural gas, fuel or purchased power to its customers. The company's non-regulated hydro generation assets are sensitive to localized rainfall levels, but are geographically dispersed and individually not meaningful to overall results. The Waneta Expansion will be more material, but hydrology risk is managed as part of the overall regional river system by BC Hydro, effectively reducing the risk to the project. Foreign exchange risk is relatively low: a 5% change in the Canadian/U.S. dollar exchange rate would impact earnings by \$0.01/share.
- **Construction Risk:** Fortis primarily faces construction risk for its non-regulated generation assets where the company assumes the risk of cost overruns. Clearly, the Waneta Expansion project is the largest construction project that the company is undertaking (with the company funding 51% of the total \$900 million cost). Fortis and its partners have signed a fixed-price design-build contract with SNC-Lavalin (SNC-SO) in order to mitigate construction risk, but ultimate construction and financing risks lie with the Waneta Expansion consortium (i.e., Fortis and partners).

## IMPORTANT DISCLOSURES:

**Analyst Certification:** Each CIBC World Markets research analyst named on the front page of this research report, or at the beginning of any subsection hereof, hereby certifies that (i) the recommendations and opinions expressed herein accurately reflect such research analyst's personal views about the company and securities that are the subject of this report and all other companies and securities mentioned in this report that are covered by such research analyst and (ii) no part of the research analyst's compensation was, is, or will be, directly or indirectly, related to the specific recommendations or views expressed by such research analyst in this report.

**Potential Conflicts of Interest:** Equity research analysts employed by CIBC World Markets are compensated from revenues generated by various CIBC World Markets businesses, including the CIBC World Markets Investment Banking Department. Research analysts do not receive compensation based upon revenues from specific investment banking transactions. CIBC World Markets generally prohibits any research analyst and any member of his or her household from executing trades in the securities of a company that such research analyst covers. Additionally, CIBC World Markets generally prohibits any research analyst from serving as an officer, director or advisory board member of a company that such analyst covers.

In addition to 1% ownership positions in covered companies that are required to be specifically disclosed in this report, CIBC World Markets may have a long position of less than 1% or a short position or deal as principal in the securities discussed herein, related securities or in options, futures or other derivative instruments based thereon.

Recipients of this report are advised that any or all of the foregoing arrangements, as well as more specific disclosures set forth below, may at times give rise to potential conflicts of interest.

## Important Disclosure Footnotes for Fortis Inc. (FTS)

- 2a Fortis Inc. is a client for which a CIBC World Markets company has performed investment banking services in the past 12 months.
- 2c CIBC World Markets Inc. has managed or co-managed a public offering of securities for Fortis Inc. in the past 12 months.
- 2e CIBC World Markets Inc. has received compensation for investment banking services from Fortis Inc. in the past 12 months.
- 2g CIBC World Markets Inc. expects to receive or intends to seek compensation for investment banking services from Fortis Inc. in the next 3 months.
- 7 CIBC World Markets Corp., CIBC World Markets Inc., and their affiliates, in the aggregate, beneficially own 1% or more of a class of equity securities issued by Fortis Inc.

## **Important Disclosure Footnotes for Companies Mentioned in this Report that Are Covered by CIBC World Markets Inc.:**

## Fortis Inc.

### Q3 Slightly Light, But Focus On Capex, Acquisitions And Regulatory Proceedings

- Fortis reported Q3/2012 EPS of \$0.24 versus CIBC and consensus estimate of \$0.26. The \$0.02 shortfall was primarily due to a foreign exchange loss on the carrying value of Fortis' expropriated electric utility in Belize. Operationally, results were roughly in line.
- Fortis' growth is based on the company's capex (on track for \$1.3 billion in 2012) and acquisitions (CH Energy expected to close in Q1/13, pending receipt of New York State Public Service Commission approval). These investments are expected to deliver mid-single-digit annual EPS growth.
- The other driving factor in Fortis' outlook is regulatory rulings: the company is currently facing regulatory decisions in its two main markets - Alberta, where performance-based regulations could impact returns, and B.C., with an upcoming generic cost of capital decision.
- We see little change in the outlook for Fortis, although note that upcoming regulatory decisions bear watching. With the stock trading at 18.3x 2013 EPS, we believe the current growth outlook is fairly reflected, and maintain our Sector Performer rating and \$34.50 price target.

## Q3 Slightly Light Due To Non-Operational Impacts

Fortis (FTS-SP) reported Q3/12 EPS of \$0.24, below CIBC and consensus estimate of \$0.26. The primary reason for the shortfall was \$3 million in foreign exchange losses related to the (US\$ denominated) carrying value of Fortis' investment in Belize Electricity.

Recall that the Government of Belize expropriated Fortis' holding in Belize Electricity in June 2011. Fortis is appealing this decision through the Belize courts. The company is carrying its investment at a value of US\$103 million (~\$0.55/share). Fortis believes this value is not impaired at this time, although notes there is "a reasonable possibility that the outcome of the above-noted litigation may be unfavorable" and it may not be able to recover its full investment in Belize Electricity. We note that Fortis no longer records any earnings from Belize Electricity; any write-down will be a non-cash charge. Fortis' hydro generation business in Belize, BECOL, has not yet been impacted by the government's expropriation of Belize Electricity, but also note that BECOL is owed US\$10 million in overdue payments from Belize Electricity, representing over 40% of annual electrical sales to Belize Electricity.

Other than the items noted above, Fortis' other operations were roughly in line with expectations, although we note FortisBC Energy (timing of revenue recognition and increased expenses) was slightly below forecast (lower gas consumption given warmer temperatures) and FortisAlberta was slightly ahead (strong rate base growth).

---

## Growth Driven By Capex and Acquisitions

Generally, Fortis' growth is driven by strong investment in capex and acquisitions.

2012 capex is forecast to be ~\$1.25 billion versus year-end 2011 total assets of \$13.6 billion and rate base of \$8.7 billion. Capex in FortisAlberta represents about one-third of the total, with investment in the Alberta and B.C. utilities representing about 60% of the total. Management is maintaining a forecast of \$5.5 billion in capex for the five years through 2016, with a further \$0.5 billion in capex from 2013-2016 through the acquisition of CH Energy (CHG-NYSE).

The acquisition of CH Energy has one major remaining regulatory approval outstanding – the New York State Public Service Commission (NYSPSC). Fortis must show a net benefit to the state on the acquisition and is currently in negotiations on this front. The company still expects an end of Q1/13 closing. The acquisition is expected to be modestly accretive to Fortis earnings, net of acquisition-related costs (we expect ~\$0.04 EPS accretion for the full-year 2014).

Based on these investments, we continue to expect mid-single-digit EPS growth for Fortis.

---

## Major Regulatory Decisions Worth Watching

The other major driver of Fortis' earnings is regulatory decisions which impact the company's allowable capex and rates of return. The major upcoming decisions relate to Fortis' main operations in B.C. and Alberta:

- **Alberta PBR And Generic Cost Of Capital:** In September, the Alberta Utility Commission (AUC) issued a decision outlining a performance-based regulation (PBR) framework to come into effect on January 1, 2013. This PBR framework lays out a formula for setting utility rates based on changes to inflation (the "I factor") minus an efficiency adjustment (the "X factor"). Fortis is appealing this mechanism since it believes the PBR does not deliver a suitable return for a utility which is investing significant amounts in growth capital, as the formula does not include an appropriate capital spending adjustment. A decision is expected in early 2013 on Fortis' appeal, although the company must comply with the PBR mechanism as of January 1, 2013 (with any changes to the mechanism applied retroactively).

Separately, Alberta is undertaking a Generic Cost of Capital (GCOC) review to cover a five-year period starting in 2013. Fortis is arguing for a higher ROE than is currently allowed (8.75%) given higher risks associated with using a PBR mechanism (potential inflexibility to fully recover costs) and the five-year timeframe for the GCOC (versus a more typical two- to three-year timeframe, with a longer period not allowing flexibility to cover significant changes in the macroeconomic environment, such as materially higher interest rates). A decision on the GCOC is expected after the final PBR ruling.

- **B.C. Gas Utility Benchmarking And Generic Cost Of Capital:** The B.C. Utility Commission (BCUC) is undertaking a benchmarking study to determine an appropriate capital structure, returns, and adjustment mechanism for a reference "low-risk" utility (and appropriate risk premiums for other utilities versus the reference utility). Historically, Fortis (through FortisBC Energy), as the dominant gas distribution utility in the province, has been that benchmark utility, and the company argues that it should remain so. Once BCUC has completed this benchmarking, the regulator will then undertake a GCOC review. Fortis expects a decision by mid-2013, with the new rates set retroactively to January 1, 2013. The company sees potential downward pressure on allowable returns, given a current allowed ROE of 9.5% (10.0% for the Vancouver Island and Whistler regions) versus, for instance, an allowed 8.75% return for FortisAlberta.

---

## No Substantial Change In Outlook

Overall, we see little change in our outlook for 2012. In 2013, the key issues to watch include: successful and timely closing of the CH Energy acquisition, and the outcomes of major regulatory decisions in Alberta and B.C. In the interim, we believe that Fortis remains fairly valued, trading at 18.3x 2013 earnings, and we maintain our Sector Performer rating and \$34.50 price target.

---

## Q3/12 Results

Fortis reported adjusted Q3/12 results (excluding CH Energy acquisition costs) of \$0.24, versus \$0.25 in Q3/11 and our \$0.26 estimate. Lower-than-expected earnings were the result of \$3 million in foreign exchange losses related to the (US\$ denominated) carrying value of Fortis' investment in Belize Electricity. Beyond that, modestly better-than-expected results for FortisAlberta and FortisBC Electric were offset by lower results from FortisBC Energy non-regulated operations (Fortis Generation and Fortis Properties).

**Exhibit 1. Q3/12 Results (\$ mlns., except per share)**

Source: CIBC World Markets Inc.

**Regulated Utilities:**

- **FortisBC Energy:** FortisBC Energy losses totaled (\$6) million in Q3/12, compared to (\$3) million in Q3/11, and our (\$1) million estimate. Lower-than-expected results reflected the timing of revenue recognition, increased expenses, lower capitalized allowance for funds used during construction (AFUDC), and lower customer additions. Q3 is seasonally the weakest quarter for FortisBC Energy as quarterly earnings follow the seasonal consumption patterns of natural gas, with earnings highest in Q1/Q4.
- **FortisAlberta:** FortisAlberta contributed \$26 million to earnings in Q3/12, up from \$19 million in Q3/11 and above our \$20 million estimate. Earnings were above our expectations reflecting higher transmission revenue, rate base growth, and the timing of operating expenses.
- **FortisBC Electric:** FortisBC Electric contributed \$13 million to earnings in Q3/12, up from \$10 million in Q3/11 and above our \$10 million estimate. Strong results reflected rate base growth, higher pole attachment revenue, and lower-than-expected finance charges.
- **Newfoundland Power:** Newfoundland Power earned \$9 million in the quarter, up from \$8 million in Q3/11 and above our \$8 million estimate. During the quarter, Newfoundland Power recorded a \$2.5 million favorable income tax adjustment.

- **Other Canadian Electric Utilities:** Other Canadian Electric Utilities contributed \$6 million to earnings in the quarter, in line with the \$6 million reported last year and our estimate. Lower operating expenses at FortisOntario in the quarter were offset by higher depreciation and finance charges at Maritime Electric.
- **Caribbean Utilities:** Caribbean Utilities contributed \$7 million to earnings in the quarter, up from \$6 million in Q3/11 and our \$6 million estimate, due to lower finance charges at its Caribbean Utilities subsidiary, and higher electricity sales at Fortis Turks and Caicos. In August 2012, Fortis Turks and Caicos acquired Turks and Caicos Utilities Limited (TCU) for \$13 million. TCU serves more than 2,000 customers on Grand Turk and Salt Cay with a diesel-fired generating capacity of 9 MW.

### Non-Regulated Businesses:

- **Fortis Generation:** Fortis Generation earnings totaled \$5 million in Q3/12, down from \$8 million in Q3/11 and below our \$8 million estimate as a result of lower production in Belize due to lower rainfall.
- **Fortis Properties:** Fortis Properties reported Q3/12 earnings of \$8 million, compared to \$9 million in Q3/11 and our \$10 million estimate. Results were lower-than-expected due to lower occupancy at hotels in Atlantic and central Canada. In October 2012, Fortis Properties acquired the 126-room StationPark All Suite Hotel in London, Ontario for \$13 million.
- **Corporate:** Corporate expenses totaled \$23 million in Q3/12, compared to \$16 million in Q3/11 and our \$18 million estimate. Corporate expenses were higher than expected mainly reflecting FX losses associated with the translation of the US\$-denominated long-term other asset representing the book value of Fortis' expropriated investment in Belize Electricity.

---

## Revising Estimates

We have made minor changes to our model mainly to reflect Q3 results. Our 2012 EPS estimate declines from \$1.76 to \$1.75. Our 2013 EPS estimate remains unchanged at \$1.85.

Source: CIBC World Markets Inc.

**Price Target Calculation**

We are maintaining our \$34.50 price target, based on a discounted cash flow analysis, which captures the expected cash flow growth from Fortis' five-year, \$5.5 billion capital spending program. Our price target equates to a P/E multiple of 18.6x our 2013 estimate, modestly below the group average (19.4x) given Fortis' modest low-risk growth outlook.

**Key Risks To Price Target**

- **Regulatory Issues:** Given that the majority of Fortis' business is regulated (over 90% as measured by revenues and assets), the company's results are highly sensitive to regulatory decisions – both positive (such as increasing allowed ROEs in Canada over the past few years) and negative (such as adverse rulings/actions in Belize).
- **Acquisition Risks:** Fortis has an announced intention to acquire distribution utilities. Acquisition risks include: deal risk (failure to close a transaction), operation, and regulatory risks of the acquired organization.

- **Market Risks:** Under regulator-approved mechanisms, Fortis flows through the commodity cost of natural gas, fuel or purchased power to its customers. The company's non-regulated hydro generation assets are sensitive to localized rainfall levels, but are geographically dispersed and individually not meaningful to overall results. The Waneta Expansion will be more material, but hydrology risk is managed as part of the overall regional river system by BC Hydro, effectively reducing the risk to the project. Foreign exchange risk is relatively low: a 5% change in the Canadian/U.S. dollar exchange rate would impact earnings by \$0.01/share.
- **Construction Risk:** Fortis primarily faces construction risk for its non-regulated generation assets where the company assumes the risk of cost overruns. Clearly, the Waneta Expansion project is the largest construction project that the company is undertaking (with the company funding 51% of the total \$900 million cost). Fortis and its partners have signed a fixed-price design-build contract with SNC-Lavalin (SNC-SP) in order to mitigate construction risk, but ultimate construction and financing risks lie with the Waneta Expansion consortium (i.e., Fortis and partners).

## IMPORTANT DISCLOSURES:

**Analyst Certification:** Each CIBC World Markets research analyst named on the front page of this research report, or at the beginning of any subsection hereof, hereby certifies that (i) the recommendations and opinions expressed herein accurately reflect such research analyst's personal views about the company and securities that are the subject of this report and all other companies and securities mentioned in this report that are covered by such research analyst and (ii) no part of the research analyst's compensation was, is, or will be, directly or indirectly, related to the specific recommendations or views expressed by such research analyst in this report.

**Potential Conflicts of Interest:** Equity research analysts employed by CIBC World Markets are compensated from revenues generated by various CIBC World Markets businesses, including the CIBC World Markets Investment Banking Department. Research analysts do not receive compensation based upon revenues from specific investment banking transactions. CIBC World Markets generally prohibits any research analyst and any member of his or her household from executing trades in the securities of a company that such research analyst covers. Additionally, CIBC World Markets generally prohibits any research analyst from serving as an officer, director or advisory board member of a company that such analyst covers.

In addition to 1% ownership positions in covered companies that are required to be specifically disclosed in this report, CIBC World Markets may have a long position of less than 1% or a short position or deal as principal in the securities discussed herein, related securities or in options, futures or other derivative instruments based thereon.

Recipients of this report are advised that any or all of the foregoing arrangements, as well as more specific disclosures set forth below, may at times give rise to potential conflicts of interest.

## Important Disclosure Footnotes for Fortis Inc. (FTS)

- 2a Fortis Inc. is a client for which a CIBC World Markets company has performed investment banking services in the past 12 months.
- 2c CIBC World Markets Inc. has managed or co-managed a public offering of securities for Fortis Inc. in the past 12 months.
- 2e CIBC World Markets Inc. has received compensation for investment banking services from Fortis Inc. in the past 12 months.
- 2g CIBC World Markets Inc. expects to receive or intends to seek compensation for investment banking services from Fortis Inc. in the next 3 months.
- 7 CIBC World Markets Corp., CIBC World Markets Inc., and their affiliates, in the aggregate, beneficially own 1% or more of a class of equity securities issued by Fortis Inc.

## Fortis Inc.

### Q4 Results Light; Significant Regulatory Decisions Coming In 2013

- Fortis reported Q4/12 EPS of \$0.46 versus our \$0.51 estimate (consensus \$0.50). The variance from our estimate mainly reflected lower-than-expected FortisBC Energy earnings and increased Corporate expenses, partially offset by stronger FortisAlberta earnings.
- Fortis is in the midst of major regulatory decisions in its two main markets. In B.C., we see downside risk to current allowed ROEs from the ongoing GCOC proceeding. In Alberta, a PBR implemented on January 1 poses downside risk in not providing adequate returns on capex spent.
- On January 28, a Settlement Agreement was reached on Fortis' proposed US\$1.5 billion acquisition of CH Energy. The parties of the Settlement Agreement recommended that the NYSPSC approve the transaction. If approved, the acquisition is expected to close at the end of April 2013.
- We have reduced our estimates to reflect lower expected earnings at FortisBC Energy and the later closing date of the CH Energy acquisition. Capex growth remains strong, with a 6% rate base/hydro investment CAGR through 2017. Reducing price target to \$35.50 (from \$36), maintaining SP.

## Stock Price Performance

## Q4 Results Light

Fortis (FTS-SP) reported Q4/12 EPS of \$0.46, below consensus of \$0.50 (CIBC \$0.51), although up slightly over (USGAAP restated) \$0.44 in Q4/11. The shortfall versus expectations was primarily related to the company's FortisBC Energy operations which had higher-than-expected costs in the quarter; the company had delayed certain spending until later in the year after certain regulatory decisions had been received. Other operations were roughly in line with expectations.

Looking forward to 2013, the company is expected to have the benefit of the CH Energy (CHG-NYSE) acquisition, now expected to close in Q2/13 (likely by the end of April) after reaching an agreement with the New York State Public Service Commission – the key remaining regulatory hurdle outstanding. However, 2013 results are likely to be impacted by lower allowed returns in B.C. upon completion of the current cost of capital hearings later in the year.

While the pace of capex spending remains strong at ~6% CAGR through 2017 (including CH Energy), we expect EPS growth to be below this rate in 2013 given the pressure on returns in B.C., and we maintain our Sector Performer rating.

---

## 2013 A Year Of Significant Regulatory Decisions

Fortis is in the middle of major regulatory decisions in both B.C. and Alberta.

- In B.C., the utilities commission is in the middle of a generic cost of capital proceeding to determine appropriate capital structures and allowed ROEs for all provincial utilities. We see downside risk to current allowed ROEs at FortisBC Energy (9.5%) and Electric (9.9%), which are above, for instance, the current allowed ROE at FortisAlberta of 8.75%.
- In Alberta, the utilities commission (AUC) has implemented a new performance-based rate-setting (PBR) mechanism that adjusts customer rates annually based on inflation, productivity, and capital expenditure adjustments. FortisAlberta is concerned that the mechanism does not fully capture and adequately compensate the utility for the strong growth and capital expenditures in the province and is awaiting decisions on applications related to rate increases. Concurrently, the AUC is undergoing a generic cost of capital (GCOC) proceeding to determine appropriate ROEs and capital structures and methodologies of arriving at these. Given the additional risk to the utility from the PBR mechanism (imposing limits on rate increases), FortisAlberta does not expect downside risk to the current 8.75% allowed ROE.

**Exhibit 1. Recent And Upcoming Major Regulatory Decisions**

Entity	Date	Comment
FortisBC Energy	December 2012	BC Utilities Commission (BCUC) held public hearings for the first phase of a Generic Cost of Capital (GCOC) proceeding, and designated FortisBC Energy as the "benchmark" utility for the province.
	Mid-2013	A decision is expected on the appropriate allowed ROE and capital structure for the benchmark utility (i.e., FortisBC Energy).
FortisBC Energy / FortisBC Electric	January 1, 2013	Pending the outcome of the benchmarking exercise, existing capital structures (40% equity) and allowed ROEs (9.5% FortisBC Energy, 9.9% FortisBC Electric) will be maintained and set as interim 2013 rates.
	Q3/2013	The BCUC will set capital structures and allowed ROEs for other B.C. utilities relative to those set for the benchmark utility (i.e., FortisBC Energy).
FortisAlberta	January 1, 2013	A performance-based rate-setting (PBR) mechanism came into effect, following the September 2012 decision from the Alberta Utilities Commission (AUC). The PBR sets annual customer rates based on inflation, productivity, and capital expenditure adjustments. FortisAlberta has sought leave to appeal to the Alberta Court of Appeal the treatment of certain capital expenditures under the PBR mechanism.
	Q3/2013	As per the PBR mechanism, FortisAlberta is requesting a 1.7% increase in customer distribution rates for 2013; while there has been a moratorium on rate increases in Alberta, these have now been lifted as the Government of Alberta responded to a recommendation from the Retail Market Review Committee requesting the AUC remove electricity rate increase limitations in place since February 2012.  FortisAlberta is seeking higher rate increases than allowed by the PBR formula (i.e., 1.7%) and has submitted Review and Variance and Capital Tracker Applications to the AUC to this effect; AUC decisions are expected by Q3/2013.
	October 2012	The AUC initiated a GCOC proceeding to determine the allowed ROE for 2013, whether a formulaic ROE automatic adjustment mechanism is re-established, and what impact the PBR mechanism has on allowed ROE or capital structure. Given the higher risk to the utility as presented by the PBR mechanism (i.e., in limiting rate increases), FortisAlberta does not expect downside risk to allowed returns.

Source: Company reports and CIBC World Markets Inc.

**CH Energy Acquisition Expected To Close By End Of April**

On January 28, Fortis and CH Energy announced that they, along with other signatory parties (the Staff of the New York State Department of Public Service, Multiple Intervenors, and the Utility Intervention Unit of the New York Department of State), have reached a Settlement Agreement. The agreement indicates that the acquisition is in the public interest and, therefore, the parties recommend approval by the New York State Public Service Commission (NYSPSC). As part of the Settlement Agreement, Fortis will moderate future customer rate increases by providing \$35 million to cover expenses related to storms (Superstorm Sandy, the October 2011 snowstorm, and Tropical Storm Irene) that normally would be recovered in customer rates. The Settlement Agreement also requires that customer delivery rates be frozen until July 1, 2014, and that a \$5 million Customer Benefit Fund be established for economic development and low-income assistance programs for communities and residents of the Mid-Hudson Valley. In addition, customers will save \$9.25 million over five years from the elimination of costs the utility now incurs as a public company. Central Hudson, the main subsidiary of CH Energy, is a regulated gas and electric utility serving 375,000 customers in New York State. The US\$1.5 billion acquisition received CH Energy shareholder approval in June 2012, and all other necessary regulatory approvals (except NYSPSC) in 2012. Subject to NYSPSC approval, the acquisition is expected to close in Q2/13 (likely by the end of April) versus the prior expectation of Q1/13.

---

## Capex Growth

Fortis incurred \$1.13 billion in capital expenditures in 2012, \$161 million below expectations due to delayed timing of: (1) payments on the Waneta Expansion project in B.C.; (2) receipt of regulatory approvals at FortisBC Energy and FortisBC Electric; and, (3) construction of Fortis Properties' office building in St. John's, Newfoundland. The company expects some of this deferred spending to be included in 2013, and forecasts 2013 capex of \$1.35 billion, with the Waneta Expansion to represent \$227 million of this. Capex from CH Energy would be incremental to this (~\$75 million for 2013).

Fortis is forecasting five-year (2013-2017) capex of \$6 billion, including expenditures at CH Energy of roughly \$125 million/year. This compares to previous expectations of five-year (2012-2016) capex of \$5.5 billion, excluding CH Energy contributions. The current capex forecast equates to a ~6% CAGR on combined Fortis/CH Energy rate base (and including non-regulated hydro-generation assets). Combined regulated rate base is forecast to be at ~\$10 billion by mid-year.

---

## Reducing 2013 Estimates, Maintaining Sector Performer Rating

Capex growth remains strong (although missed the target in 2012) with a 6% CAGR on rate base and hydro investment through 2017. However, we expect EPS growth in 2013 to be below this level due to the inclusion of CH Energy's results for only an estimated eight months (and missing the seasonally strongest Q1 period) as well as the impact of expected lower allowed returns on the B.C. utilities. We are lowering our 2013 estimates to reflect the latest timing of the later-than-expected close of the CH Energy acquisition, and lower returns on the B.C. utilities. We maintain our Sector Performer rating, with a slightly reduced price target (\$35.50 versus prior \$36.00).

---

## Q4/12 Results

Fortis reported Q4/12 EPS of \$0.46, versus \$0.46 (CGAAP)/\$0.44 (USGAAP) in Q4/11 and below our \$0.51 estimate (consensus \$0.50). The variance from our estimate mainly reflected lower-than-expected FortisBC Energy earnings and increased Corporate expenses, partially offset by stronger FortisAlberta earnings.

**Exhibit 2. Q4/12 Results (\$ mlns., except per share)**

**Regulated Utilities:**

- **FortisBC Energy:** FortisBC Energy earnings totaled \$49 million, compared to \$51 million (CGAAP) in Q4/11 and below our \$58 million estimate. The variance reflects higher-than-expected operating and maintenance expenses as work is now proceeding on projects delayed earlier in the year while awaiting regulatory approval. The y/y decline also reflected lower AFUDC (allowance for funds used during construction) due to lower assets under construction, and lower customer additions.
- **FortisAlberta:** FortisAlberta contributed \$23 million to earnings in the quarter, up from \$17 million (CGAAP) in Q4/11 and above our \$20 million estimate. The strong performance was due to \$2 million on net transmission revenue recognized in the quarter as a result of a decision received in April 2012 and strong rate base growth.
- **FortisBC Electric:** FortisBC Electric earnings totaled \$12 million, versus \$11 million (CGAAP) in Q4/11, and our \$11 million estimate. Strong results reflected rate base growth, higher pole attachment revenue, and lower finance charges.
- **Newfoundland Power:** Newfoundland Power earnings totaled \$9 million, up from \$8 million (CGAAP) in Q4/11, and our \$8 million estimate. The y/y increase reflects the increase in allowed ROE from 8.38% in 2011 to 8.80% in 2012.

- **Other Canadian Electric Utilities:** Other Canadian Electric Utilities contributed \$6 million to earnings in Q4/12, versus \$4 million (CGAAP) in Q4/11 and our \$5 million estimate. The y/y growth was driven by lower income taxes at Maritime Electric and lower operating expenses at both Maritime Electric and FortisOntario.
- **Caribbean Utilities:** Caribbean Utilities earnings totaled \$3 million in the quarter, compared to \$3 million (CGAAP) in Q4/11 and our \$4 million estimate. Increased electricity sales at Fortis Turks & Caicos were offset by higher depreciation expenses.

### Non-regulated Businesses:

- **Fortis Generation:** Fortis Generation earnings totaled \$2 million in Q4/12, versus \$5 million (CGAAP) in Q4/11 and our \$3 million estimate. Weak results were due to lower production in Belize and Upstate New York as a result of lower rainfall.
- **Fortis Properties:** Fortis Properties reported earnings of \$5 million in the quarter, in line with \$5 million (CGAAP) reported in Q4/11 and our \$5 million estimate. Higher hospitality revenue from a recently acquired hotel and from increased average room rates in Western and Central Canada was offset by lower occupancy in Central and Atlantic Canada and increased depreciation due to capital additions and improvements.
- **Corporate:** Corporate expenses totaled \$22 million in the quarter, up from \$18 million (CGAAP) in Q4/11, and above our \$18 million estimate. Higher-than-expected expenses were due to a \$3 million non-recurring write-down recognized in the quarter related to Fortis' 30% ownership in CustomerWorks L.P. (a non-regulated shared-services business providing billing and customer care services to utilities, municipalities, and certain energy companies).

---

## Revising Estimates

We have made a few revisions to our model, including:

- **FortisBC Energy:** We are reducing our estimates reflecting lower assumed earnings above the allowed ROE. Our allowed ROE assumptions for FortisBC Energy reflect a 50 bps decline in 2013 versus 2012 (9.00% in 2013 versus 9.50% in 2012 for FortisBC Energy Inc., and 9.50% in 2013 versus 10.00% in 2012 for the other FortisBC Energy utilities).
- **FortisAlberta:** We are modestly increasing our estimates for FortisAlberta to reflect the continuing strong rate base growth at the utility.
- **CH Energy:** We are reducing our 2013 estimate for CH Energy as a result of the expectation for closing the acquisition in Q2/13 (we are assuming end of April) versus end of Q1/13 previously. In addition, our revised estimate reflects the seasonality of the business, with Fortis missing earnings from Q1, seasonally the strongest quarter for CH Energy.

As a result of these changes, our 2013 and 2014 EPS estimates decline from \$1.85 and \$1.93 to \$1.77 and \$1.89, respectively.

Source: CIBC World Markets Inc.

**Price Target Calculation**

We are reducing our price target from \$36.00 to \$35.50. Our target is based on a discounted cash flow analysis, which captures the expected cash flow growth from Fortis' five-year, \$6 billion capital spending program. Our price target equates to a P/E multiple of 18.8x our 2014 estimate, modestly below the group average (19.3x) given Fortis' modest low-risk growth outlook.

**Key Risks To Price Target**

- **Regulatory Issues:** Given that the majority of Fortis' business is regulated (over 90% as measured by revenues and assets), the company's results are highly sensitive to regulatory decisions – as illustrated by the cost of capital proceedings taking place in Alberta and B.C.
- **Acquisition Risks:** Fortis is in the midst of acquiring CH Energy, and it continues to pursue additional gas and electric distribution utilities in Canada and the United States. Acquisition risks include: deal risk (failure to close a transaction), and operation and regulatory risks of the acquired organization.

- **Market Risks:** Under regulator-approved mechanisms, Fortis flows through the commodity cost of natural gas, fuel or purchased power to its customers. The company's non-regulated hydro generation assets are sensitive to localized rainfall levels, but are geographically dispersed and individually not meaningful to overall results. The Waneta Expansion will be more material, but hydrology risk is managed as part of the overall regional river system by BC Hydro, effectively reducing the risk to the project. Foreign exchange risk is relatively low: a 5% change in the Canadian/U.S. dollar exchange rate would impact earnings by \$0.01/share.
- **Construction Risk:** Fortis primarily faces construction risk for its non-regulated generation assets where the company assumes the risk of cost overruns. Clearly, the Waneta Expansion project is the largest construction project that the company is undertaking (with the company funding 51% of the total \$900 million cost). Fortis and its partners have signed a fixed-price design-build contract with SNC-Lavalin (SNC-SO) in order to mitigate construction risk, but ultimate construction and financing risks lie with the Waneta Expansion consortium (i.e., Fortis and partners).

## IMPORTANT DISCLOSURES:

**Analyst Certification:** Each CIBC World Markets research analyst named on the front page of this research report, or at the beginning of any subsection hereof, hereby certifies that (i) the recommendations and opinions expressed herein accurately reflect such research analyst's personal views about the company and securities that are the subject of this report and all other companies and securities mentioned in this report that are covered by such research analyst and (ii) no part of the research analyst's compensation was, is, or will be, directly or indirectly, related to the specific recommendations or views expressed by such research analyst in this report.

**Potential Conflicts of Interest:** Equity research analysts employed by CIBC World Markets are compensated from revenues generated by various CIBC World Markets businesses, including the CIBC World Markets Investment Banking Department. Research analysts do not receive compensation based upon revenues from specific investment banking transactions. CIBC World Markets generally prohibits any research analyst and any member of his or her household from executing trades in the securities of a company that such research analyst covers. Additionally, CIBC World Markets generally prohibits any research analyst from serving as an officer, director or advisory board member of a company that such analyst covers.

In addition to 1% ownership positions in covered companies that are required to be specifically disclosed in this report, CIBC World Markets may have a long position of less than 1% or a short position or deal as principal in the securities discussed herein, related securities or in options, futures or other derivative instruments based thereon.

Recipients of this report are advised that any or all of the foregoing arrangements, as well as more specific disclosures set forth below, may at times give rise to potential conflicts of interest.

## Important Disclosure Footnotes for Fortis Inc. (FTS)

- 2a Fortis Inc. is a client for which a CIBC World Markets company has performed investment banking services in the past 12 months.
- 2c CIBC World Markets Inc. has managed or co-managed a public offering of securities for Fortis Inc. in the past 12 months.
- 2e CIBC World Markets Inc. has received compensation for investment banking services from Fortis Inc. in the past 12 months.
- 2g CIBC World Markets Inc. expects to receive or intends to seek compensation for investment banking services from Fortis Inc. in the next 3 months.
- 7 CIBC World Markets Corp., CIBC World Markets Inc., and their affiliates, in the aggregate, beneficially own 1% or more of a class of equity securities issued by Fortis Inc.

## Fortis Inc.

### Negative NY Recommendation On CH Energy Acquisition

- On Friday, administrative law judges from the New York State Public Service Commission (NYSPSC) issued a negative written opinion on Fortis' acquisition of CH Energy, concluding that the benefits of the acquisition would be outweighed by detriments.
- The ruling appears to be influenced by public comments opposed to the acquisition expressing unsubstantiated concerns over foreign ownership of the utility and the potential impact that would have on service quality, community involvement and rates.
- Fortis intends to engage in further discussions with NYSPSC, with responses to this opinion due by May 17 and a final decision from the commission in June. One possibility is that Fortis will need to increase the financial incentives for the transaction, currently totaling ~US\$49 million.
- The CH Energy acquisition would be only modestly accretive (~\$0.03 EPS for its first full year in 2014), and has limited ST impact on Fortis' valuation. However, a denial would further bring into question Fortis' ability to acquire in the U.S. Maintain SP and \$35.50 PT, although noting downside risk.

## Company Profile

Fortis owns a natural gas utility in British Columbia, electric distribution utilities in five Canadian provinces, the Caribbean, and non-regulated power generation and real estate assets.

## Investment Thesis

Fortis provides the benefits (stability) of a regulated utility, and is in a period of solid organic investment and growth as the company delivers on its 5 year, \$6 billion capital program which is expected to grow the regulated rate base by a CAGR of 6% through 2017. The capital program is inclusive of the company's 51% interest in the non-regulated \$900 million Waneta Expansion project.

## Negative Recommendation On CH Energy Acquisition

On May 3, the administrative law judges assigned to Fortis' (FTS-SP) proposal to the New York State Public Service Commission (NYSPSC) regarding the acquisition of CH Energy (CHG-NYSE) issued their Recommendation Decision. The Recommendation Decision asserts that without modification of the Settlement Agreement, the benefits of the acquisition are outweighed by the detriments remaining after mitigation. The Recommendation Decision is an advisory opinion that will be considered by NYSPSC in determining whether to approve the acquisition. Fortis stated that it intends to engage in further discussions to obtain NYSPSC approval, "although there can be no assurance that such approval will be granted." Submissions responding to the Recommendation Decision are due by May 17, with responses to such submission due by May 24. Fortis expects the NYSPSC to issue its final decision in June. Note that the Recommendation Decision is just a recommendation. The NYSPSC can choose to ignore, in whole or in part, the recommendations from the administrative law judges.

Central Hudson is a regulated gas and electric utility serving 375,000 customers in New York State. The US\$1.5 billion acquisition received CH Energy shareholder approval in June 2012, and all other necessary regulatory approvals (except NYSPSC) in 2012. A Settlement Agreement, which outlined the benefits Fortis is to provide, was reached in January 2013 (further details below).

### Recommendation Decision Appears To Heavily Weight Public Opinion

In the Recommendation Decision, the administrative law judges stated that it was "*relatively easy*" to conclude that the benefits of the acquisition are outweighed by the detriments remaining after mitigation. Highlights from the Recommendation Decision include:

- The rationale behind the decision is that the proposed transaction has generated "*an extraordinarily intense degree of public opposition to a change of Central Hudson's (the main subsidiary of CH Energy) ownership among customers, their elected officials, and labour representatives and other public organizations in the service territory.*"
- The decision cited a few commentators who made it clear they would rather forego the monetized benefits offered in the proposal than see the Fortis acquisition go forward. The decision went on to say, "*the themes evoked most frequently in the comments derived from the perception that the transaction would replace a well-regarded, highly capable and locally engaged utility with a foreign entity of unproven quality having no inherent ties to the service territory and financial objectives that may conflict with the interest of ratepayers.*"
- The decision also criticized the petitioners (Fortis and CH Energy) for doing little to defuse public opposition, and that this passivity lends credence to public objections that Fortis will not appreciate the importance of maintaining customer satisfaction.

Note that these claims appear unsubstantiated and do not specifically note Fortis has any intention or track record of doing any of these things.

## **Settlement Agreement Reached Back In January 2013**

On January 28, 2013, Fortis and CH Energy announced that they, along with other signatory parties (the Staff of the New York State Department of Public Service, Multiple Intervenors and the Utility Intervention Unit of the New York Department of State), had reached a Settlement Agreement. The agreement indicates that the acquisition is in the public interest and, therefore, the parties recommend approval by the NYSPSC. As part of the Settlement Agreement, Fortis will moderate future customer rate increases by providing US\$35 million to cover expenses related to storms (Superstorm Sandy, the October 2011 snowstorm and Tropical Storm Irene) that normally would be recovered in customer rates. The Settlement Agreement also requires that customer delivery rates be frozen until July 1, 2014, and that a US\$5 million Customer Benefit Fund be established for economic development and low-income assistance programs for communities and residents of the Mid-Hudson Valley. In addition, customers will save US\$9.25 million over five years from the elimination of costs the utility now incurs as a public company.

## **Bigger Picture – Difficulty Closing U.S. Acquisitions Could Hamper Growth Profile**

Fortis expects to spend \$6 billion in capital over the next five years. Included in that estimate is \$1.5 billion for the acquisition of CH Energy and an additional \$125 million/year over the timeframe in CH Energy capex. Therefore, roughly 35% of Fortis' capital plan is tied up in CH Energy. This implies that Fortis' expected 6% CAGR rate base growth would fall to ~4% in the case of a rejection of the CH Energy acquisition.

Furthermore, this situation illustrates the difficulty Fortis may have in growing longer term. This is the second consecutive U.S. acquisition attempt that has run into difficulty for Fortis. In July 2011, Fortis declined to match a rival offer for Central Vermont Public Service (CVPS) after putting in a US\$700 million offer in May 2011. Ultimately, the rival offer was deemed superior, and Fortis declined to match given its original offer already richly valued CVPS (1.4x rate base). Fortis' CH Energy offer is priced at 1.5x rate base, suggesting little room to move higher (CH Energy shareholders have already approved the transaction, but Fortis can increase its benefits package to ratepayers). While Fortis' B.C. and Alberta utilities are growing strongly, acquisition opportunities in Canada are limited. With rich valuations, and regulatory hurdles, the acquisition market in the U.S. is also looking challenging.

## **Risk Weighting Acquisition; Slight Reduction To 2014 EPS Estimate**

Overall, we still believe this acquisition will be completed, although we recognize that the risk of its rejection has increased. As a result, we have decided to risk weight the CH Energy acquisition to 80% (i.e., we assume an 80% probability the acquisition is completed, versus 100% previously). As a result, our 2014 EPS estimate (first full year of CH Energy earnings) declines slightly, from \$1.89 to \$1.88. Ultimately, we expect that Fortis will have to sweeten its benefits package (US\$49.25 million currently represents ~3% of the total purchase price) to complete the transaction, which we believe it will. We maintain our Sector Performer rating and \$35.50 price target.

---

## Price Target Calculation

Our \$35.50 price target is based on a discounted cash flow analysis, which captures the expected cash flow growth from Fortis' five-year, \$6 billion capital spending program. Our price target equates to a P/E multiple of 18.9x our 2014 estimate, below the group average (21.2x) given Fortis' modest, low-risk growth outlook.

---

## Key Risks To Price Target

- **Regulatory Issues:** Given that the majority of Fortis' business is regulated (over 90% as measured by revenues and assets), the company's results are highly sensitive to regulatory decisions – as illustrated by the cost of capital proceedings taking place in Alberta and B.C.
- **Acquisition Risks:** Fortis is in the midst of acquiring CH Energy, and it continues to pursue additional gas and electric distribution utilities in Canada and the U.S. Acquisition risks include: deal risk (failure to close a transaction), operation and regulatory risks of the acquired organization.
- **Market Risks:** Under regulator-approved mechanisms, Fortis flows through the commodity cost of natural gas, fuel or purchased power to its customers. The company's non-regulated hydro generation assets are sensitive to localized rainfall levels, but are geographically dispersed and individually not meaningful to overall results. The Waneta Expansion will be more material, but hydrology risk is managed as part of the overall regional river system by BC Hydro, effectively reducing the risk to the project. Foreign exchange risk is relatively low: a 5% change in the Canadian/U.S. dollar exchange rate would impact earnings by \$0.01/share.
- **Construction Risk:** Fortis primarily faces construction risk for its non-regulated generation assets where the company assumes the risk of cost overruns. Clearly, the Waneta Expansion project is the largest construction project that the company is undertaking (with the company funding 51% of the total \$900 million cost). Fortis and its partners have signed a fixed-price design-build contract with SNC-Lavalin (SNC-SO) in order to mitigate construction risk, but ultimate construction and financing risks lie with the Waneta Expansion consortium (i.e., Fortis and partners).

## IMPORTANT DISCLOSURES:

**Analyst Certification:** Each CIBC World Markets research analyst named on the front page of this research report, or at the beginning of any subsection hereof, hereby certifies that (i) the recommendations and opinions expressed herein accurately reflect such research analyst's personal views about the company and securities that are the subject of this report and all other companies and securities mentioned in this report that are covered by such research analyst and (ii) no part of the research analyst's compensation was, is, or will be, directly or indirectly, related to the specific recommendations or views expressed by such research analyst in this report.

**Potential Conflicts of Interest:** Equity research analysts employed by CIBC World Markets are compensated from revenues generated by various CIBC World Markets businesses, including the CIBC World Markets Investment Banking Department. Research analysts do not receive compensation based upon revenues from specific investment banking transactions. CIBC World Markets generally prohibits any research analyst and any member of his or her household from executing trades in the securities of a company that such research analyst covers. Additionally, CIBC World Markets generally prohibits any research analyst from serving as an officer, director or advisory board member of a company that such analyst covers.

In addition to 1% ownership positions in covered companies that are required to be specifically disclosed in this report, CIBC World Markets may have a long position of less than 1% or a short position or deal as principal in the securities discussed herein, related securities or in options, futures or other derivative instruments based thereon.

Recipients of this report are advised that any or all of the foregoing arrangements, as well as more specific disclosures set forth below, may at times give rise to potential conflicts of interest.

## Important Disclosure Footnotes for Fortis Inc. (FTS)

- 2a Fortis Inc. is a client for which a CIBC World Markets company has performed investment banking services in the past 12 months.
- 2c CIBC World Markets Inc. has managed or co-managed a public offering of securities for Fortis Inc. in the past 12 months.
- 2e CIBC World Markets Inc. has received compensation for investment banking services from Fortis Inc. in the past 12 months.
- 2g CIBC World Markets Inc. expects to receive or intends to seek compensation for investment banking services from Fortis Inc. in the next 3 months.
- 7 CIBC World Markets Corp., CIBC World Markets Inc., and their affiliates, in the aggregate, beneficially own 1% or more of a class of equity securities issued by Fortis Inc.

## Fortis Inc.

### Solid Q1; Focus On CH Energy

- Fortis reported Q1/13 EPS of \$0.79, which included a \$0.12 one-time gain on settlement of claims for a hydroelectric asset in Newfoundland. Excluding this gain, adjusted EPS were \$0.67, roughly in line with consensus (\$0.65) and our (\$0.66) expectations.
- Regulated utilities results were solid in all regions, offset by weak results in non-regulated operations, both generation (low hydro generation in Belize) and properties (hotel occupancy down). Corporate expenses benefited from a \$2MM FX gain/lower costs related to the pending CH Energy acquisition.
- Several major regulatory issues remain outstanding in: 1) BC - generic cost of capital proceedings under way; and, 2) Alberta - ongoing appeals on the recently introduced PBR mechanism, and an upcoming generic cost of capital proceeding. The outcomes of these issues could impact future ROEs.
- The key short-term focus remains the CH Energy acquisition, with a negative recommendation issued Friday to the NY State commission. Fortis continues to work to close the deal (final decision in June), although risks clearly remain. Maintain Sector Performer rating, \$35.50 price target.

## Company Profile

Fortis owns a natural gas utility in British Columbia, electric distribution utilities in five Canadian provinces, the Caribbean, and non-regulated power generation and real estate assets.

## Investment Thesis

Fortis provides the benefits (stability) of a regulated utility, and is in a period of solid organic investment and growth as the company delivers on its 5 year, \$6 billion capital program which is expected to grow the regulated rate base by a CAGR of 6% through 2017. The capital program is inclusive of the company's 51% interest in the non-regulated \$900 million Waneta Expansion project.

---

## Q1 In Line, Ex-Gain

Fortis (FTS-SP) reported Q1 EPS of \$0.79. This included a one-time after-tax gain of \$22 million, or \$0.12 EPS; excluding this gain, adjusted EPS of \$0.67 were roughly in line with consensus (\$0.65) and our (\$0.66) estimates.

The one-time gain resulted from the settlement of claims related to a hydroelectric generation facility and water rights in Newfoundland. These assets were jointly owned with Abitibi (RFP-TSX), and were expropriated by the government of Newfoundland and Labrador after Abitibi abandoned its pulp and paper operations in the province, with Fortis' ownership also being expropriated in the process. The government has now settled with Fortis in regards to these assets.

In terms of the business operations in the quarter, all regulated utilities performed roughly as expected, with the B.C. and Alberta utilities benefiting from customer additions and rate base growth. FortisAlberta also benefited from lower depreciation costs and higher net transmission revenue.

Excluding the one-time gain noted above, the non-regulated businesses were weak in the quarter – generation due to low rainfall in Belize impacting hydro generation, and properties due to lower hotel occupancy rates in Ontario given the weaker economy.

---

## Major Regulatory Issues Still Under Way

There are a number of regulatory processes under way in B.C. and Alberta that could impact Fortis as we move through the balance of 2013 and into 2014:

- **FortisBC Energy – amalgamation of utilities:** In April 2012, Fortis applied to the B.C. Utilities Commission (BCUC) for approval to amalgamate and set common rates across its three separate gas utilities (FortisBC Energy, FortisBC Energy Vancouver Island, and FortisBC Energy Whistler). The BCUC denied this request – which would have the effect of raising rates in the lower Mainland to the benefit of Vancouver Island residents – with Fortis filing a leave to appeal with the B.C. Court of Appeal in March, and an Application for Reconsideration with the BCUC in April. Regardless of the outcome, we see little impact on FortisBC Energy's results.
- **FortisBC Energy – generic cost of capital (GCOC):** The BCUC has a GCOC proceeding under way, with a decision from the first phase to determine the "benchmark" capital structure and ROE (FortisBC Energy is the benchmark utility) expected in June and the second phase (to establish rates and capital structure for all other utilities including FortisBC Electric) to wrap up by the end of the year/early 2014. We continue to see downside risk for FortisBC Energy and FortisBC Electric, which have allowed ROEs of 9.5% (10% for Whistler/Vancouver Island) and 9.9%, respectively, above other comparable utilities (e.g., FortisAlberta at 8.75%).
- **FortisAlberta – Capital Tracker under PBR:** FortisAlberta is seeking clarification on the treatment of capital expenditures under the recently introduced Performance Based Rate-setting (PBR) mechanism, with the company concerned that the PBR formula does not adequately compensate Fortis for its current high level of capex in Alberta. The Alberta Utilities Commission (AUC) has approved, on an interim basis, 60% of the revenue requirement related to 2013 capex, with the outstanding amounts to be determined based on the outcome of a hearing currently under way (decision in Q4/13). The risk to FortisAlberta is that the PBR might not adequately capture high levels of capex spending, which would impact future capex investment and growth for FortisAlberta.

- **FortisAlberta – GCOC:** A GCOC proceeding for Alberta utilities' capital structure and allowed returns will commence before the end of Q2/13, with a hearing scheduled for early 2014. We foresee limited downside risk given FortisAlberta's current 8.75% allowed ROE is in line with, or even below, that of comparable utilities; FortisAlberta would argue that the PBR mechanism has introduced higher regulatory risks than previous, and would suggest that the allowed ROE should move commensurately higher.

---

## Short-term Focus On CH Energy

On May 3, the administrative law judges assigned to Fortis' proposal to the New York State Public Service Commission (NYSPSC) regarding the acquisition of CH Energy (CHG-NYSE) issued their Recommendation Decision. The Recommendation Decision asserts that without modification of the Settlement Agreement the benefits of the acquisition are outweighed by the detriments remaining after mitigation. The Recommendation Decision is an advisory opinion that will be considered by NYSPSC in determining whether to approve the acquisition. Fortis stated that it intends to engage in further discussions to obtain NYSPSC approval, "although there can be no assurance that such approval will be granted." Submissions responding to the Recommendation Decision are due by May 17, with responses to such submissions due by May 24. Fortis expects the NYSPSC to issue its final decision in June. Note that the Recommendation Decision is just a recommendation. The NYSPSC can choose to ignore, in whole or in part, the recommendations from the administrative law judges. For more information on the Recommendation Decision, please see our May 6 report, *Negative NY Recommendation On CH Energy Acquisition*.

Central Hudson is a regulated gas and electric utility serving 375,000 customers in New York State. The US\$1.5 billion acquisition received CH Energy shareholder approval in June 2012, and all other necessary regulatory approvals (except NYSPSC) in 2012. A Settlement Agreement, which outlined the benefits Fortis is to provide, was reached in January 2013.

Overall, we still believe this acquisition will be completed, although we recognize that the risk of its rejection has increased. As a result, we have decided to risk weight the CH Energy acquisition to 80% (i.e., we assume an 80% probability the acquisition is completed, versus 100% previously).

---

## Little Change To Outlook

Overall, we see Q1 results as in line with expectations. There are a number of regulatory proceedings worth watching over the balance of 2013 and into 2014 that could impact Fortis' results, but the key short-term focus remains the pending CH Energy acquisition, with a decision expected in June. In the interim, we maintain our Sector Performer rating and \$35.50 price target.

---

## Q1/13 Results

Fortis reported Q1/13 adjusted EPS of \$0.67 versus our estimate of \$0.66 (consensus \$0.65) and \$0.66 reported in Q1/12. Adjusted EPS exclude \$22 million in after-tax earnings (\$0.12/share) related to a settlement Fortis reached with the Newfoundland and Labrador government regarding the 2008 expropriation of non-regulated hydro generation assets and water rights, then owned by Exploits River Hydro Partnership in which Fortis holds an indirect 51% interest.

**Exhibit 1. Q1/13 Results (\$ mlns., except per share)**

**Regulated Utilities**

Earnings from regulated utilities totaled \$145 million in Q1/13, up from \$136 million in Q1/12 and modestly above our \$141 million estimate. Higher-than-expected earnings at FortisAlberta were the result of lower depreciation expenses and higher net transmission revenue recognized in the quarter associated with the finalization of 2012 transmission volume variances (\$2 million benefit). Rate base growth drove Y/Y earnings increases at Fortis' B.C. utilities (FortisBC Energy and FortisBC Electric).

**Non-regulated Operations**

Non-regulated operations earnings totaled \$2 million in Q1/13, down from \$6 million in Q1/12 and below our \$5 million estimate. The main driver of the shortfall was lower earnings at Fortis Generation due to lower rainfall leading to reduced production in Belize. Fortis Properties' results were slightly below expectations, reflecting lower occupancy levels in hotel operations in Ontario. Corporate expenses were lower than expected due to a foreign exchange gain of \$2 million.

## Revising Estimates

We have made minor adjustments to our 2013 assumptions to reflect higher expected earnings at FortisAlberta and lower Corporate expenses offset by lower expectations for Fortis Generation. These changes offset and, as a result, our 2013 EPS estimate remains at \$1.77. Our 2014 EPS estimate remains unchanged at \$1.88.

## Price Target Calculation

Our \$35.50 price target is based on a discounted cash flow analysis, which captures the expected cash flow growth from Fortis' five-year, \$6 billion capital spending program. Our price target equates to a P/E multiple of 18.9x our 2014 estimate, below the group average (21.2x) given Fortis' modest low-risk growth outlook.

---

## Key Risks To Price Target

- **Regulatory Issues:** Given that the majority of Fortis' business is regulated (over 90% as measured by revenues and assets), the company's results are highly sensitive to regulatory decisions – as illustrated by the cost of capital proceedings taking place in Alberta and B.C.
- **Acquisition Risks:** Fortis is in the midst of acquiring CH Energy, and it continues to pursue additional gas and electric distribution utilities in Canada and the U.S. Acquisition risks include: deal risk (failure to close a transaction), operation and regulatory risks of the acquired organization.
- **Market Risks:** Under regulator-approved mechanisms, Fortis flows through the commodity cost of natural gas, fuel or purchased power to its customers. The company's non-regulated hydro generation assets are sensitive to localized rainfall levels, but are geographically dispersed and individually not meaningful to overall results. The Waneta Expansion will be more material, but hydrology risk is managed as part of the overall regional river system by BC Hydro, effectively reducing the risk to the project. Foreign exchange risk is relatively low: a 5% change in the Canadian/U.S. dollar exchange rate would impact earnings by \$0.01/share.
- **Construction Risk:** Fortis primarily faces construction risk for its non-regulated generation assets where the company assumes the risk of cost overruns. Clearly, the Waneta Expansion project is the largest construction project that the company is undertaking (with the company funding 51% of the total \$900 million cost). Fortis and its partners have signed a fixed-price design-build contract with SNC-Lavalin Group (SNC-SO) in order to mitigate construction risk, but ultimate construction and financing risks lie with the Waneta Expansion consortium (i.e., Fortis and partners).

## Fortis Inc.

### Negative Decision From BCUC

- The BC Utilities Commission (BCUC) released the first phase of its Generic Cost of Capital (GCOC) decision, which sets the ROE and equity thickness for BC's "benchmark" utility, FortisBC Energy Inc. The ruling set an 8.75% ROE/38.5% equity thickness, down from the current 9.5%/40%.
- We had expected a 50 bps reduction in ROE (from 9.5% to 9.0%) and no change to capital structure. The impact of the ruling is to reduce our EPS forecast by ~\$0.04. The decision is effective January 1, 2013, through December 31, 2015.
- The BCUC will now complete phase 2 of its GCOC process, setting returns and capital structure for other BC utilities relative to FortisBC Energy. We have reduced our return and capital structure forecast for FortisBC Electric from current 9.9%/40% to 9.15%/38.5%, another \$0.01 EPS impact.
- We have updated our financial model for these changes and the recent announcement of the redemption of \$125 million in preferred shares (~\$0.01 EPS benefit from reduced pref share dividends costs). We have reduced our price target from \$35.50 to \$35 and maintain our SP rating.

#### Stock Price Performance

## BCUC Issues Decision On Cost Of Capital

On May 10, the British Columbia Utilities Commission (BCUC) issued a decision on phase 1 of its Generic Cost of Capital (GOCC) review for BC utilities. The return on equity (ROE) and common equity ratio for FortisBC Energy Inc. have been set at 8.75% and 38.5%, respectively, effective January 1, 2013, through the end of 2015. The allowed ROE and common equity ratio are down from 9.5% and 40%, respectively, in 2012.

Effective January 2014, the BCUC is also introducing an automatic adjustment mechanism (AAM) to set the ROE on an annual basis for FortisBC Energy Inc., to give consideration to market changes over the period between ROE proceedings (i.e., until the end of 2015). The AAM will be a two-variable model considering changes to utility bond spreads and the long-term (30-year) Government of Canada (GoC) bond yields. The AAM will only take effect, however, when actual long-term GoC bond yields exceed 3.8%. With long-term GoC yields currently hovering around 2.5%, and the expectation of a gradual rise (from our CIBC World Markets Inc. Economics team) to 3.25% by March 2015, we do not anticipate the AAM having an impact on FortisBC Energy's allowed ROE (we expect it to remain at 8.75% through 2015).

The BCUC maintained FortisBC Energy Inc. as the benchmark for calculating ROEs for other BC utilities. The ROEs for the other BC utilities are also impacted by this decision, with their ROEs reflecting the new (lower) benchmark ROE, and the risk premiums associated with the individual utility. The impact to Fortis' utilities allowed ROEs is as follows:

- **FortisBC Energy (Vancouver Island):** Down from 10% in 2012 to 9.25% in 2013–2015.
- **FortisBC Energy (Whistler):** Down from 10% in 2012 to 9.25% in 2013–2015.
- **FortisBC Electric:** Down from 9.9% in 2012 to 9.15% in 2013–2015.

Phase 2 of the BCUC's generic cost of capital review will determine an appropriate individual risk premium and capital structure for FortisBC Electric, FortisBC Energy (Vancouver Island), and FortisBC (Whistler), suggesting the allowed ROEs/capital structures listed above could be altered again. A decision on phase 2 is expected in late 2013/early 2014.

---

## Moderately Worse Decision Than Expected

We had been expecting a decline in allowed ROEs at Fortis' BC utilities as they sat higher than comparable utilities, including FortisAlberta (8.75%). We had built a 50 bps decline across the board with no change in capital structure. The decision to reduce allowed ROEs by 75 bps and the common equity structure from 40% to 38.5% is moderately worse than we had anticipated. We have incorporated this decision, as well as the recent buyback of Series C preferred shares, into our forecast. We are reducing our EPS estimates by \$0.04 for each of 2013 and 2014, and taking our price target from \$35.50 to \$35.00. While the BCUC decision is a modest negative for the stock, we believe the key issue remains closing the US\$1.5 billion CH Energy (CHG-NYSE) acquisition, with New York State's Public Service Commission expected to issue a decision in June 2013. We maintain our Sector Performer rating.

---

## Price Target Calculation

Our \$35 price target (down from \$35.50) is based on a discounted cash flow analysis, which captures the expected cash flow growth from Fortis' five-year, \$6 billion capital spending program. Our price target equates to a P/E multiple of 19.0x our 2014 estimate, below the group average (21.2x) given Fortis' modest low-risk growth outlook.

---

## Key Risks To Price Target

- **Regulatory Issues:** Given that the majority of Fortis' business is regulated (over 90% as measured by revenues and assets), the company's results are highly sensitive to regulatory decisions – as illustrated by the cost of capital proceedings taking place in Alberta and BC.
- **Acquisition Risks:** Fortis is in the midst of acquiring CH Energy, and it continues to pursue additional gas and electric distribution utilities in Canada and the U.S. Acquisition risks include: deal risk (failure to close a transaction), operation and regulatory risks of the acquired organization.
- **Market Risks:** Under regulator-approved mechanisms, Fortis flows through the commodity cost of natural gas, fuel or purchased power to its customers. The company's non-regulated hydro generation assets are sensitive to localized rainfall levels, but are geographically dispersed and individually not meaningful to overall results. The Waneta Expansion will be more material, but hydrology risk is managed as part of the overall regional river system by BC Hydro, effectively reducing the risk to the project. Foreign exchange risk is relatively low: a 5% change in the Canadian/U.S. dollar exchange rate would impact earnings by \$0.01/share.
- **Construction Risk:** Fortis primarily faces construction risk for its non-regulated generation assets where the company assumes the risk of cost overruns. Clearly, the Waneta Expansion project is the largest construction project that the company is undertaking (with the company funding 51% of the total \$900 million cost). Fortis and its partners have signed a fixed-price design-build contract with SNC-Lavalin (SNC-SO) in order to mitigate construction risk, but ultimate construction and financing risks lie with the Waneta Expansion consortium (i.e., Fortis and partners).

## IMPORTANT DISCLOSURES:

**Analyst Certification:** Each CIBC World Markets research analyst named on the front page of this research report, or at the beginning of any subsection hereof, hereby certifies that (i) the recommendations and opinions expressed herein accurately reflect such research analyst's personal views about the company and securities that are the subject of this report and all other companies and securities mentioned in this report that are covered by such research analyst and (ii) no part of the research analyst's compensation was, is, or will be, directly or indirectly, related to the specific recommendations or views expressed by such research analyst in this report.

**Potential Conflicts of Interest:** Equity research analysts employed by CIBC World Markets are compensated from revenues generated by various CIBC World Markets businesses, including the CIBC World Markets Investment Banking Department. Research analysts do not receive compensation based upon revenues from specific investment banking transactions. CIBC World Markets generally prohibits any research analyst and any member of his or her household from executing trades in the securities of a company that such research analyst covers. Additionally, CIBC World Markets generally prohibits any research analyst from serving as an officer, director or advisory board member of a company that such analyst covers.

In addition to 1% ownership positions in covered companies that are required to be specifically disclosed in this report, CIBC World Markets may have a long position of less than 1% or a short position or deal as principal in the securities discussed herein, related securities or in options, futures or other derivative instruments based thereon.

Recipients of this report are advised that any or all of the foregoing arrangements, as well as more specific disclosures set forth below, may at times give rise to potential conflicts of interest.

This report is issued and approved for distribution by (a) in Canada, CIBC World Markets Inc., a member of the Investment Industry Regulatory Organization of Canada ("IIROC"), the Toronto Stock Exchange, the TSX Venture Exchange and a Member of the Canadian Investor Protection Fund, (b) in the United Kingdom, CIBC World Markets plc, which is regulated by the Financial Services Authority ("FSA"), (c) in Australia to wholesale clients only, CIBC Australia Ltd, a company regulated by the ASIC with AFSL license number 240603 and ACN 000 067 256, and (d) in Japan, CIBC World Markets (Japan) Inc., a registered Type 1 Financial product provider with the registration number Director General of Kanto Finance Bureau #218 (collectively, "CIBC World Markets") and (e) in the United States either by (i) CIBC World Markets Inc. for distribution only to U.S. Major Institutional Investors ("MII") (as such term is defined in SEC Rule 15a-6) or (ii) CIBC World Markets Corp., a member of the Financial Industry Regulatory Authority ("FINRA"). U.S. MIIs receiving this report from CIBC World Markets Inc. (the Canadian broker-dealer) are required to effect transactions (other than negotiating their terms) in securities discussed in the report through CIBC World Markets Corp. (the U.S. broker-dealer).

This report is provided, for informational purposes only, to institutional investor and retail clients of CIBC World Markets in Canada, and does not constitute an offer or solicitation to buy or sell any securities discussed herein in any jurisdiction where such offer or solicitation would be prohibited. This document and any of the products and information contained herein are not intended for the use of private investors in the United Kingdom. Such investors will not be able to enter into agreements or purchase products mentioned herein from CIBC World Markets plc. The comments and views expressed in this document are meant for the general interests of wholesale clients of CIBC Australia Ltd.

This report has been prepared by the CIBC group and is issued in Hong Kong by Canadian Imperial Bank of Commerce, Hong Kong Branch, a registered institution under the Securities and Futures Ordinance, Cap 571 (the "SFO"). This report is intended for "professional investors" only (within the meaning of the SFO) and has been prepared for general circulation and does not take into account the objectives, financial situation or needs of any recipient. Any recipient in Hong Kong who has any questions or requires further information on any matter arising from or relating to this report should contact Canadian Imperial Bank of Commerce, Hong Kong Branch at Suite 3602, Cheung Kong Centre, 2 Queen's Road Central, Hong Kong (telephone number: +852 2841 6111). Orders for Hong Kong listed securities will be executed by Canadian Imperial Bank of Commerce, Hong Kong Branch. Canadian Imperial Bank of Commerce, Hong Kong Branch has entered into an arrangement with its broker-dealer affiliates worldwide to execute orders for securities listed outside of Hong Kong for Hong Kong clients.

This report is intended for distribution in Singapore solely to accredited investors, expert investors and institutional investors (each, "eligible recipients"). Eligible recipients should contact Danny Tan at Canadian Imperial Bank of Commerce, Singapore Branch at 16 Collyer Quay #04-02 Singapore 049318 (telephone number + 65-6423 3806) in respect of any matter arising from or in connection with this report.

The securities mentioned in this report may not be suitable for all types of investors. This report does not take into account the investment objectives, financial situation or specific needs of any particular client of CIBC World Markets. Recipients should consider this report as only a single factor in making an investment decision and should not rely solely on investment recommendations contained herein, if any, as a substitution for the exercise of independent judgment of the merits and risks of investments. The analyst writing the report is not a person or company with actual, implied or apparent authority to act on behalf of any issuer mentioned in the report. Before making an investment decision with respect to any security recommended in this report, the recipient should consider whether such recommendation is appropriate given the recipient's particular investment needs, objectives and financial circumstances. CIBC World Markets suggests that, prior to acting on any of the recommendations herein, Canadian retail clients of CIBC World Markets contact one of our client advisers in your jurisdiction to discuss your particular circumstances. Non-client recipients of this report who are not institutional investor clients of CIBC World Markets should consult with an independent financial advisor prior to making any investment decision based on this report or for any necessary explanation of its contents. CIBC World Markets will not treat non-client recipients as its clients solely by virtue of their receiving this report.

Past performance is not a guarantee of future results, and no representation or warranty, express or implied, is made regarding future performance of any security mentioned in this report. The price of the securities mentioned in this report and the income they produce may fluctuate and/or be adversely affected by exchange rates, and investors may realize losses on investments in such securities, including the loss of investment principal. CIBC World Markets accepts no liability for any loss arising from the use of information contained in this report, except to the extent that liability may arise under specific statutes or regulations applicable to CIBC World Markets.

Information, opinions and statistical data contained in this report were obtained or derived from sources believed to be reliable, but CIBC World Markets does not represent that any such information, opinion or statistical data is accurate or complete (with the exception of information contained in the Important Disclosures section of this report provided by CIBC World Markets or individual research analysts), and they should not be relied upon as such. ## Fortis Inc.

### NYSPSC Approves CH Energy Acquisition

- The New York State Public Service Commission (NYSPSC) today approved Fortis' US\$1.5 billion acquisition of CH Energy. NYSPSC approval was the final requirement for the transaction, as CH Energy shareholder approval and all other regulatory approvals were received in 2012.
- CH Energy is the parent of Central Hudson Gas & Electric Corp. (Central Hudson), a regulated transmission and distribution utility serving approximately 300,000 electric and 75,000 gas customers in eight counties of New York State's Mid-Hudson River Valley.
- The US\$1.5 billion purchase price includes the assumption of US\$500 million in CH Energy debt. Fortis issued ~\$600 million in subscription receipts (exchangeable to common shares) that are held in escrow pending the closing of the acquisition (which we expect shortly).
- Following a very lengthy process, NYSPSC approval is a positive development. We have modestly increased our estimates to reflect the increased probability of completing this acquisition, from 80% to 100%. We maintain our SP rating and \$35 price target.

**Company Profile**

Fortis owns a natural gas utility in British Columbia, electric distribution utilities in five Canadian provinces, the Caribbean, and non-regulated power generation and real estate assets.

**Investment Thesis**

Fortis provides the benefits (stability) of a regulated utility, and is in a period of solid organic investment and growth as the company delivers on its 5 year, \$6 billion capital program which is expected to grow the regulated rate base by a CAGR of 6% through 2017. The capital program is inclusive of the company's 51% interest in the non-regulated \$900 million Waneta Expansion project.

**Segmented Earnings (Exc. Corporate)**

**Major Sources, Uses Of Cash**

Source: Company reports and CIBC World Markets Inc.

---

## Price Target Calculation

Our \$35 price target is based on a discounted cash flow analysis, which captures the expected cash flow growth from Fortis' five-year, \$6 billion capital spending program. Our price target equates to a P/E multiple of 18.9x our 2014 estimate, below the group average (20.2x) given Fortis' modest low-risk growth outlook.

---

## Key Risks To Price Target

- **Regulatory Issues:** Given that the majority of Fortis' business is regulated (over 90% as measured by revenues and assets), the company's results are highly sensitive to regulatory decisions – as illustrated by the cost of capital proceedings taking place in Alberta and B.C.
- **Acquisition Risks:** Fortis is in the midst of acquiring CH Energy, and it continues to pursue additional gas and electric distribution utilities in Canada and the United States. Acquisition risks include: deal risk (failure to close a transaction), operation and regulatory risks of the acquired organization.
- **Market Risks:** Under regulator-approved mechanisms, Fortis flows through the commodity cost of natural gas, fuel or purchased power to its customers. The company's non-regulated hydro generation assets are sensitive to localized rainfall levels, but are geographically dispersed and individually not meaningful to overall results. The Waneta Expansion will be more material, but hydrology risk is managed as part of the overall regional river system by BC Hydro, effectively reducing the risk to the project. Foreign exchange risk is relatively low: a 5% change in the Canadian/U.S. dollar exchange rate would impact earnings by \$0.01/share.
- **Construction Risk:** Fortis primarily faces construction risk for its non-regulated generation assets where the company assumes the risk of cost overruns. Clearly, the Waneta Expansion project is the largest construction project that the company is undertaking (with the company funding 51% of the total \$900 million cost). Fortis and its partners have signed a fixed-price design-build contract with SNC-Lavalin (SNC-SO) in order to mitigate construction risk, but ultimate construction and financing risks lie with the Waneta Expansion consortium (i.e., Fortis and partners).

## Our EPS estimates are shown below:

	1 Qtr.	2 Qtr.	3 Qtr.	4 Qtr.	Yearly
2012 Current	\$0.66A	\$0.34A	\$0.24A	\$0.46A	\$1.70A

## IMPORTANT DISCLOSURES:

**Analyst Certification:** Each CIBC World Markets research analyst named on the front page of this research report, or at the beginning of any subsection hereof, hereby certifies that (i) the recommendations and opinions expressed herein accurately reflect such research analyst's personal views about the company and securities that are the subject of this report and all other companies and securities mentioned in this report that are covered by such research analyst and (ii) no part of the research analyst's compensation was, is, or will be, directly or indirectly, related to the specific recommendations or views expressed by such research analyst in this report.

**Potential Conflicts of Interest:** Equity research analysts employed by CIBC World Markets are compensated from revenues generated by various CIBC World Markets businesses, including the CIBC World Markets Investment Banking Department. Research analysts do not receive compensation based upon revenues from specific investment banking transactions. CIBC World Markets generally prohibits any research analyst and any member of his or her household from executing trades in the securities of a company that such research analyst covers. Additionally, CIBC World Markets generally prohibits any research analyst from serving as an officer, director or advisory board member of a company that such analyst covers.

In addition to 1% ownership positions in covered companies that are required to be specifically disclosed in this report, CIBC World Markets may have a long position of less than 1% or a short position or deal as principal in the securities discussed herein, related securities or in options, futures or other derivative instruments based thereon.

Recipients of this report are advised that any or all of the foregoing arrangements, as well as more specific disclosures set forth below, may at times give rise to potential conflicts of interest.

## Fortis Inc.

### In-line Q2, But Headwinds From BCUC Decision, Delayed Accretion From CH Energy

- Fortis reported adjusted EPS of \$0.32, slightly above consensus \$0.31 (CIBC \$0.30). These earnings exclude \$32M (\$0.17 EPS) in expenses related to the CH Energy acquisition and a recovery of \$25M (\$0.13 EPS) from higher deductions related to Part VI.1 tax on pref share dividends.
- Y/Y results (versus \$0.34 EPS) were impacted by a BCUC regulatory decision in the quarter, reducing allowed ROEs for Fortis' B.C. utilities by 75 bps (and for FortisBC Energy, equity thickness by 1.5%). Q2 results included the impact of this decision, applied retroactively to Q1/13.
- The CH Energy acquisition closed on June 27. To obtain NY regulatory approvals, Fortis committed to ~\$50M in benefits to ratepayers, a 3-year rate freeze, the retention of all jobs. The acquisition is now expected to be accretive in 2015 vs. initial expectation of 'immediately' following close.
- Despite a high capital spending program, short-term results for Fortis are expected to be impacted by the recent regulatory rulings in B.C. and the delayed accretion from CH Energy. We have reduced our price target from \$35 to \$34.50 and maintain our Sector Performer rating.

Company Profile

Fortis owns a natural gas utility in British Columbia, electric distribution utilities in five Canadian provinces, the Caribbean, a gas and electric utility in New York State, and non-regulated power generation and real estate assets.

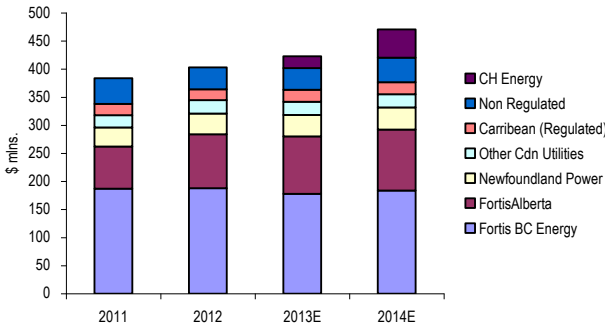

Investment Thesis

Fortis provides the benefits (stability) of a regulated utility, and is in a period of solid organic investment and growth as the company delivers on its 5 year, \$6 billion capital program which is expected to grow the regulated rate base by a CAGR of 6% through 2017. The capital program is inclusive of the company's 51% interest in the non-regulated \$900 million Waneta Expansion project.

---

## Roughly In Line Q2

Fortis (FTS-SP) reported Q2/13 adjusted EPS of \$0.32, slightly ahead of consensus \$0.31 (CIBC \$0.30). These results exclude two items:

- (1) \$32 million (\$0.17/share) after-tax in acquisition related expenses, and customer and community benefits offered to obtain regulatory approval of the CH Energy acquisition. The transaction was completed on June 27.
- (2) \$25 million (\$0.13/share) from an income tax recovery due to higher deductions from implementation of a new tax (Part VI.1) implemented in June 2013 on preferred share dividends. The tax recovery is a result of the enactment of the tax change; future earnings are not expected to be materially impacted by the tax.

---

## Regulatory Headwinds

### Negative BCUC Decision

Earnings were down y/y versus \$0.34 EPS, largely due to a May 2013 decision from the BC Utilities Commission (BCUC) on Generic Cost of Capital (GCOC) for BC utilities. The decision reduces allowed ROE for FortisBC Energy, the benchmark utility in B.C., by 75 bps as well as reducing its equity thickness from 40% to 38.5%. The decision also sets a 75 bps reduction in allowed ROE for all other B.C. utilities on an interim basis (although no change in equity thickness), pending the outcome of the second phase of the GCOC hearings with a decision expected in H1/14, which would finalize both allowed ROE and capital structure for these other utilities.

Fortis recognized the impact of this decision in Q2/13, further exacerbated since the decision was effective as of January 1, 2013 and the Q2 results reflect the retroactive application of the decision to Q1/13. Earnings were down y/y: for FortisBC Energy, \$6 million versus \$14 million; for FortisBC Electric, \$8 million versus \$9 million.

In June and July 2013, Fortis' B.C. utilities filed applications for a multi-year performance-based ratemaking (PBR) plan for 2014-18. The PBR plan determines rate increases through a formula linked to inflation, productivity and operating (and to a lesser extent, capital) costs. The review process for the PBR applications will continue through the year. The PBR reduces uncertainty in the rate-setting process, but we do not expect any major change to Fortis' earnings in B.C. as a result of its implementation.

### Alberta Still A Work In Progress

The Alberta Utilities Commission (AUC) issued a PBR mechanism in September 2012 for all Alberta distribution utilities. As in B.C., the PBR uses a formula incorporating inflation and productivity improvements to determine customer rates, but differently, places greater constraints on the ability to earn on capital expenditures. As such, Fortis has sought further clarification on the treatment of capital expenditures through Review and Variance and Capital Tracker applications. Fortis' Review and Variance application was denied, and a decision on the Capital Tracker application is expected in H2/13. The outcome of this application determines Fortis' ability to earn fully on its capital expenditures.

Separately, the AUC initiated a GCOC proceeding in October 2012; the process was temporarily halted, while other regulatory issues were resolved, but restarted in April. A hearing is now scheduled for early 2014. While the outcome

of this process is unknown, we see limited downside risk given FortisAlberta's allowed ROE of 8.75% is in line with other utilities across the country (with, for instance FortisBC Energy now earning at that level).

---

## CH Energy Transaction Closed, But Gratification Delayed

Fortis closed the CH Energy acquisition on June 27 after a lengthy regulatory review process. Approval by the New York State Public Service Commission (NYSPSC), the final step, required Fortis to commit to further benefits (on top of ~\$50 million in financial benefits previously outlined) for ratepayers (a further 1-year rate freeze to June 30, 2015 versus prior July 1, 2014) and employees (no layoffs for four years to all unionized and non-unionized employees, and the addition of 35 new jobs), and a commitment to \$215 million in capital expenditures through July 1, 2015.

Some of the costs (US\$35 million in expenditures usually recovered in rates, such as storm-restoration expenses, and US\$5 million for establishment of a fund for low-income customers) were recognized in Q2.

On announcement of the transaction in February 2012, Fortis originally expected the transaction to be immediately accretive to earnings on closing (at that time, expected within 12 months). With the benefits Fortis announced to sweeten the deal, the company has now revised its expectations for accretion to commence in 2015.

---

## Lots Of Spending, Limited Short-term Benefit

Fortis is in the midst of a 5-year capital program (2012-16) totaling \$6 billion (including amounts related to CH Energy). This capex drives ~5% annual rate base CAGR over the period. However, in the short-term (2013-14), Fortis faces headwinds from negative regulatory decisions, as well as lack of accretion from CH Energy. We have modestly reduced our estimates to reflect lower earnings from CH Energy (our 2014 EPS estimate declines \$0.03), and reduced our price target accordingly from \$35 to \$34.50. As such, we see little catalyst for the stock, and maintain our Sector Performer rating.

---

## Q2/13 Results

Fortis reported Q2/13 adjusted EPS of \$0.32 versus consensus at \$0.31 (CIBC \$0.30) and \$0.34 in Q2/12. Regulated Utilities earnings were lower than expected, reflecting lower results at FortisBC Energy as a result of the BCUC's May cost of capital decision reducing the allowed ROE (from 9.5% to 8.75%) and equity thickness (from 40% to 38.5%) for 2013-2015 versus 2012. Q2 results also reflected the impact of the decision on Q1 results, as the ruling is retroactive to January 1, 2013. Corporate expenses were below expectations due to a \$5 million income tax recovery associated with the release of income tax provisions and lower finance charges due to higher capitalized interest associated financing the construction of the Waneta Expansion.

Adjusted EPS excludes \$32 million (\$0.17/share) in acquisition-related expenses and customer and community benefits offered to obtain regulatory approval for the CH Energy acquisition, and a \$25 million (\$0.13/share) income tax recovery due to the enactment of higher tax deductions associated with Fortis' preference share dividends.

**Revising Estimates**

We have revised our estimates to reflect Q2 results as well as lower mid-term expectations for CH Energy given the company now only expects the acquisition to be accretive beginning in 2015. These impacts offset in 2013, resulting in our EPS estimate remaining unchanged at \$1.73. Our 2014 EPS estimate declines from \$1.85 to \$1.82.

**Price Target Calculation**

We are reducing our price target from \$35 to \$34.50 reflecting our reduced estimates. Our \$34.50 price target is based on a discounted cash flow analysis, which captures the expected cash flow growth from Fortis' five-year, \$6 billion capital spending program. Our price target equates to a P/E multiple of 19.0x our 2014 estimate, below the pipelines and utilities group average (21.6x) given Fortis' modest low-risk growth outlook.

**Key Risks To Price Target**

- **Regulatory Issues:** Given that the majority of Fortis' business is regulated (over 90% as measured by revenues and assets), the company's results are highly sensitive to regulatory decisions – as illustrated by the cost of capital proceedings taking place in Alberta and B.C.
- **Acquisition Risks:** Fortis is in the midst of acquiring CH Energy, and it continues to pursue additional gas and electric distribution utilities in Canada and the United States. Acquisition risks include: deal risk (failure to close a transaction), operation and regulatory risks of the acquired organization.

- **Market Risks:** Under regulator-approved mechanisms, Fortis flows through the commodity cost of natural gas, fuel or purchased power to its customers. The company's non-regulated hydro generation assets are sensitive to localized rainfall levels, but are geographically dispersed and individually not meaningful to overall results. The Waneta Expansion will be more material, but hydrology risk is managed as part of the overall regional river system by BC Hydro, effectively reducing the risk to the project. Foreign exchange risk is relatively low: a 5% change in the Canadian/U.S. dollar exchange rate would impact earnings by \$0.01/share.
- **Construction Risk:** Fortis primarily faces construction risk for its non-regulated generation assets where the company assumes the risk of cost overruns. Clearly, the Waneta Expansion project is the largest construction project that the company is undertaking (with the company funding 51% of the total \$900 million cost). Fortis and its partners have signed a fixed-price design-build contract with SNC-Lavalin (SNC-SO) in order to mitigate construction risk, but ultimate construction and financing risks lie with the Waneta Expansion consortium (i.e., Fortis and partners).

## Our EPS estimates are shown below:

	1 Qtr.	2 Qtr.	3 Qtr.	4 Qtr.	Yearly
2012 Current	\$0.66A	\$0.34A	\$0.24A	\$0.46A	\$1.70A
2013 Prior	\$0.67A	\$0.30E	\$0.26E	\$0.52E	\$1.73E
2013 Current	\$0.67A	\$0.32A	\$0.26E	\$0.49E	\$1.73E

## IMPORTANT DISCLOSURES:

**Analyst Certification:** Each CIBC World Markets research analyst named on the front page of this research report, or at the beginning of any subsection hereof, hereby certifies that (i) the recommendations and opinions expressed herein accurately reflect such research analyst's personal views about the company and securities that are the subject of this report and all other companies and securities mentioned in this report that are covered by such research analyst and (ii) no part of the research analyst's compensation was, is, or will be, directly or indirectly, related to the specific recommendations or views expressed by such research analyst in this report.

**Potential Conflicts of Interest:** Equity research analysts employed by CIBC World Markets are compensated from revenues generated by various CIBC World Markets businesses, including the CIBC World Markets Investment Banking Department. Research analysts do not receive compensation based upon revenues from specific investment banking transactions. CIBC World Markets generally prohibits any research analyst and any member of his or her household from executing trades in the securities of a company that such research analyst covers. Additionally, CIBC World Markets generally prohibits any research analyst from serving as an officer, director or advisory board member of a company that such analyst covers.

In addition to 1% ownership positions in covered companies that are required to be specifically disclosed in this report, CIBC World Markets may have a long position of less than 1% or a short position or deal as principal in the securities discussed herein, related securities or in options, futures or other derivative instruments based thereon.

Recipients of this report are advised that any or all of the foregoing arrangements, as well as more specific disclosures set forth below, may at times give rise to potential conflicts of interest.

## Important Disclosure Footnotes for Fortis Inc. (FTS)

- 2a Fortis Inc. is a client for which a CIBC World Markets company has performed investment banking services in the past 12 months.
- 2c CIBC World Markets Inc. has managed or co-managed a public offering of securities for Fortis Inc. in the past 12 months.
- 2e CIBC World Markets Inc. has received compensation for investment banking services from Fortis Inc. in the past 12 months.
- 2g CIBC World Markets Inc. expects to receive or intends to seek compensation for investment banking services from Fortis Inc. in the next 3 months.
- 7 CIBC World Markets Corp., CIBC World Markets Inc., and their affiliates, in the aggregate, beneficially own 1% or more of a class of equity securities issued by Fortis Inc.

This report is issued and approved for distribution by (a) in Canada, CIBC World Markets Inc., a member of the Investment Industry Regulatory Organization of Canada ("IIROC"), the Toronto Stock Exchange, the TSX Venture Exchange and a Member of the Canadian Investor Protection Fund, (b) in the United Kingdom, CIBC World Markets plc, which is regulated by the Financial Services Authority ("FSA"), (c) in Australia to wholesale clients only, CIBC Australia Ltd, a company regulated by the ASIC with AFSL license number 240603 and ACN 000 067 256, and (d) in Japan, CIBC World Markets (Japan) Inc., a registered Type 1 Financial product provider with the registration number Director General of Kanto Finance Bureau #218 (collectively, "CIBC World Markets") and (e) in the United States either by (i) CIBC World Markets Inc. for distribution only to U.S. Major Institutional Investors ("MII") (as such term is defined in SEC Rule 15a-6) or (ii) CIBC World Markets Corp., a member of the Financial Industry Regulatory Authority ("FINRA"). U.S. MIIs receiving this report from CIBC World Markets Inc. (the Canadian broker-dealer) are required to effect transactions (other than negotiating their terms) in securities discussed in the report through CIBC World Markets Corp. (the U.S. broker-dealer).

This report is provided, for informational purposes only, to institutional investor and retail clients of CIBC World Markets in Canada, and does not constitute an offer or solicitation to buy or sell any securities discussed herein in any jurisdiction where such offer or solicitation would be prohibited. This document and any of the products and information contained herein are not intended for the use of private investors in the United Kingdom. Such investors will not be able to enter into agreements or purchase products mentioned herein from CIBC World Markets plc. The comments and views expressed in this document are meant for the general interests of wholesale clients of CIBC Australia Ltd.

This report has been prepared by the CIBC group and is issued in Hong Kong by Canadian Imperial Bank of Commerce, Hong Kong Branch, a registered institution under the Securities and Futures Ordinance, Cap 571 (the "SFO"). This report is intended for "professional investors" only (within the meaning of the SFO) and has been prepared for general circulation and does not take into account the objectives, financial situation or needs of any recipient. Any recipient in Hong Kong who has any questions or requires further information on any matter arising from or relating to this report should contact Canadian Imperial Bank of Commerce, Hong Kong Branch at Suite 3602, Cheung Kong Centre, 2 Queen's Road Central, Hong Kong (telephone number: +852 2841 6111). Orders for Hong Kong listed securities will be executed by Canadian Imperial Bank of Commerce, Hong Kong Branch. Canadian Imperial Bank of Commerce, Hong Kong Branch has entered into an arrangement with its broker-dealer affiliates worldwide to execute orders for securities listed outside of Hong Kong for Hong Kong clients.

This report is intended for distribution in Singapore solely to accredited investors, expert investors and institutional investors (each, "eligible recipients"). Eligible recipients should contact Danny Tan at Canadian Imperial Bank of Commerce, Singapore Branch at 16 Collyer Quay #04-02 Singapore 049318 (telephone number + 65-6423 3806) in respect of any matter arising from or in connection with this report.

The securities mentioned in this report may not be suitable for all types of investors. This report does not take into account the investment objectives, financial situation or specific needs of any particular client of CIBC World Markets. Recipients should consider this report as only a single factor in making an investment decision and should not rely solely on investment recommendations contained herein, if any, as a substitution for the exercise of independent judgment of the merits and risks of investments. The analyst writing the report is not a person or company with actual, implied or apparent authority to act on behalf of any issuer mentioned in the report. Before making an investment decision with respect to any security recommended in this report, the recipient should consider whether such recommendation is appropriate given the recipient's particular investment needs, objectives and financial circumstances. CIBC World Markets suggests that, prior to acting on any of the recommendations herein, Canadian retail clients of CIBC World Markets contact one of our client advisers in your jurisdiction to discuss your particular circumstances. Non-client recipients of this report who are not institutional investor clients of CIBC World Markets should consult with an independent financial advisor prior to making any investment decision based on this report or for any necessary explanation of its contents. CIBC World Markets will not treat non-client recipients as its clients solely by virtue of their receiving this report.

Past performance is not a guarantee of future results, and no representation or warranty, express or implied, is made regarding future performance of any security mentioned in this report. The price of the securities mentioned in this report and the income they produce may fluctuate and/or be adversely affected by exchange rates, and investors may realize losses on investments in such securities, including the loss of investment principal. CIBC World Markets accepts no liability for any loss arising from the use of information contained in this report, except to the extent that liability may arise under specific statutes or regulations applicable to CIBC World Markets.

## Fortis Inc.

### Q3 Below Expectations On Seasonal Weakness

- Fortis reported Q3/13 EPS of \$0.23, below CIBC and consensus estimates of \$0.26, with the variance reflecting higher operating and maintenance costs at FortisBC Energy. Q3 is seasonally weak as winter gas demand results in the majority of FortisBC Energy's earnings being recorded in Q1/Q4.
- CH Energy, acquired in late Q2/13, contributed ~\$9.5 million in earnings in the quarter. On a per share basis, however, CH Energy's contribution was negligible given the associated common share offering and financing costs. Meaningful accretion from the acquisition is not expected until mid-2015.
- Fortis is awaiting several regulatory decisions. In Alberta, Fortis has filed a Capital Tracker application with regards to the PBR mechanism issued in September 2012. The outcome of the application determines Fortis' ability to earn fully on its capital expenditures. A decision is expected in Q4/13.
- Our outlook for Fortis remains unchanged. Rate base is expected to grow at a 6% CAGR from 2013-2017. However, short-term results are more challenged given recent negative regulatory decisions and the lack of accretion from CH Energy until mid-2015. Maintain SP and \$34.50 PT.

## Company Profile

Fortis owns a natural gas utility in British Columbia, electric distribution utilities in five Canadian provinces, the Caribbean, a gas and electric utility in New York State, and non-regulated power generation and real estate assets.

## Investment Thesis

Fortis provides the benefits (stability) of a regulated utility, and is in a period of solid organic investment and growth as the company delivers on its 5 year, \$6 billion capital program which is expected to grow the regulated rate base by a CAGR of 6% through 2017. The capital program is inclusive of the company's 51% interest in the non-regulated \$900 million Waneta Expansion project.

## Assets - Excl Corporate / Eliminations (As At Dec 31, 2012)

## Segmented Earnings (Exc. Corporate)

## Major Sources, Uses Of Cash

Source: Company reports and CIBC World Markets Inc.

---

## Q3 Below Expectations

Fortis (FTS-SP) reported Q3/13 EPS of \$0.23, below CIBC and consensus estimates of \$0.26, and down Y/Y versus \$0.24. The variance from our estimate reflected higher operating and maintenance costs at FortisBC Energy. Q3 is FortisBC Energy's seasonally weakest quarter as winter gas demand results in the majority of earnings being recorded in Q1 and Q4. CH Energy, acquired in late Q2/13, contributed ~\$9.5 million in earnings in the quarter. On a per share basis, however, CH Energy's contribution was negligible given the associated common share offering and financing costs. The company does not expect meaningful accretion from the CH Energy acquisition until the customer rate freeze ends in mid-2015.

---

## Waiting On Regulatory Decisions

- **Alberta:** The Alberta Utilities Commission (AUC) issued a performance rate based (PBR) mechanism in September 2012 for all Alberta distribution utilities that uses a formula incorporating inflation and productivity improvements to determine customer rates, but places constraints on the ability to earn on capital expenditures. As such, Fortis has sought further clarification on the treatment of capital expenditures through Review and Variance (ultimately denied) and Capital Tracker applications. An interim decision granting utilities 60% of the applied-for Capital Tracker amount was issued in March 2013. A final decision on the Capital Tracker application is expected in Q4/13. Separately, the AUC initiated a Generic Cost of Capital (GCOC) proceeding in October 2012, to set the allowed ROE for 2013 and 2014, as well as establish an interim ROE for 2015. The process commenced in Q2/13 and a hearing is scheduled for early 2014. We foresee limited downside risk given FortisAlberta's allowed ROE of 8.75% is in line with other utilities across the country.
- **British Columbia:** The BC Utilities Commission (BCUC) issued a decision on GCOC for BC utilities in May 2013, reducing the allowed ROE for FortisBC Energy, the benchmark utility in BC, by 75 bps and reducing its equity thickness from 40% to 38.5%. The decision also set a 75 bps reduction in allowed ROE for all other BC utilities on an interim basis (although no change in equity thickness), pending the outcome of the second phase of the GCOC hearings (decision expected in H1/14), which would finalize both allowed ROE and capital structure for these other utilities. The BCUC decision has reduced earnings in FortisBC Energy and FortisBC Electric by \$12 million year to date. In June and July 2013, Fortis' B.C. utilities filed applications for a multi-year performance-based ratemaking (PBR) plan for 2014-2018. The PBR plan determines rate increases through a formula linked to inflation, productivity and operating (and, to a lesser extent, capital) costs. The review process for the PBR applications will continue through the year with a decision expected mid-2014. The PBR reduces uncertainty in the rate-setting process, but we do not expect any major change to Fortis' earnings in BC as a result of its implementation.

## Outlook Unchanged

While Q3 earnings were below expectations, our overall outlook for Fortis remains unchanged. The company has a 2013–2017 capital program of \$6 billion, which is expected to drive a rate base/generation investment CAGR of 6% over the period. Short-term results (2013–2014) are somewhat more challenged given recent negative regulatory decisions and the lack of accretion from CH Energy until mid-2015. We maintain our Sector Performer rating and \$34.50 price target.

## Q3/13 Results

Fortis reported Q3/13 EPS of \$0.23, below our \$0.26 estimate (consensus \$0.26) and down versus \$0.24 in Q3/12. Results were below expectations mainly due to higher operating and maintenance costs at FortisBC Energy. Note that Q3 is Fortis' seasonally weakest quarter as FortisBC Energy records the majority of its earnings in Q1 and Q4 as a result of strong winter demand for gas (heating season).

Q3 marked the first full quarter of contribution from CH Energy (acquired on June 27). CH Energy's regulated earnings were above our expectations, while its non-regulated petroleum supply operations (Griffith Energy Services) had a \$2.5 million loss in the quarter (Non-Utility segment), reflecting typical seasonal weakness.

## Revising Estimates

We have revised our estimates to reflect Q3 results as well as modestly lower expectations for FortisBC Energy, as well as splitting earnings from CH Energy between the regulated utility and Griffith (included in Non-Utility). As a result, our 2013 and 2014 EPS estimates decline from \$1.73 and \$1.82 to \$1.69 and \$1.80, respectively.

## Price Target Calculation

Our \$34.50 price target is based on a discounted cash flow analysis, which captures the expected cash flow growth from Fortis' five-year, \$6 billion capital spending program. Our price target equates to a P/E multiple of 19.2x our 2014 estimate, below the pipelines and utilities group average (22.3x) given Fortis' modest low-risk growth outlook.

---

## Key Risks To Price Target

- **Regulatory Issues:** Given that the majority of Fortis' business is regulated (over 90% as measured by revenues and assets), the company's results are highly sensitive to regulatory decisions – as illustrated by the cost of capital proceedings taking place in Alberta and BC.
- **Acquisition Risks:** Fortis recently acquired CH Energy, and it continues to pursue additional gas and electric distribution utilities in Canada and the United States. Acquisition risks include: deal risk (failure to close a transaction), operation and regulatory risks of the acquired organization.
- **Market Risks:** Under regulator-approved mechanisms, Fortis flows through the commodity cost of natural gas, fuel or purchased power to its customers. The company's non-regulated hydro generation assets are sensitive to localized rainfall levels, but are geographically dispersed and individually not meaningful to overall results. The Waneta Expansion will be more material, but hydrology risk is managed as part of the overall regional river system by BC Hydro, effectively reducing the risk to the project. Foreign exchange risk is relatively low: a 5% change in the Canadian/U.S. dollar exchange rate would impact earnings by \$0.01/share.
- **Construction Risk:** Fortis primarily faces construction risk for its non-regulated generation assets where the company assumes the risk of cost overruns. Clearly, the Waneta Expansion project is the largest construction project that the company is undertaking (with the company funding 51% of the total \$900 million cost). Fortis and its partners have signed a fixed-price design-build contract with SNC-Lavalin (SNC-SO) in order to mitigate construction risk, but ultimate construction and financing risks lie with the Waneta Expansion consortium (i.e., Fortis and partners).

## IMPORTANT DISCLOSURES:

**Analyst Certification:** Each CIBC World Markets research analyst named on the front page of this research report, or at the beginning of any subsection hereof, hereby certifies that (i) the recommendations and opinions expressed herein accurately reflect such research analyst's personal views about the company and securities that are the subject of this report and all other companies and securities mentioned in this report that are covered by such research analyst and (ii) no part of the research analyst's compensation was, is, or will be, directly or indirectly, related to the specific recommendations or views expressed by such research analyst in this report.

**Potential Conflicts of Interest:** Equity research analysts employed by CIBC World Markets are compensated from revenues generated by various CIBC World Markets businesses, including the CIBC World Markets Investment Banking Department. Research analysts do not receive compensation based upon revenues from specific investment banking transactions. CIBC World Markets generally prohibits any research analyst and any member of his or her household from executing trades in the securities of a company that such research analyst covers. Additionally, CIBC World Markets generally prohibits any research analyst from serving as an officer, director or advisory board member of a company that such analyst covers.

In addition to 1% ownership positions in covered companies that are required to be specifically disclosed in this report, CIBC World Markets may have a long position of less than 1% or a short position or deal as principal in the securities discussed herein, related securities or in options, futures or other derivative instruments based thereon.

Recipients of this report are advised that any or all of the foregoing arrangements, as well as more specific disclosures set forth below, may at times give rise to potential conflicts of interest.

## Fortis Inc.

### Fortis To Acquire UNS Energy

- Fortis announced on December 11 an agreement to acquire UNS Energy, a regulated utility in Arizona with ~650,000 electricity and gas customers. The total purchase price is ~US\$4.3B, including assumption of US\$1.8B of debt (~1.5x rate base on closing, expected late 2014).
- The acquisition will be financed through the issuance of \$1.8B in convertible debentures (\$1.6B to the public, \$0.2B through a private placement), with a conversion price of \$30.72. Payment for the debentures is through installments, with one-third payable up front, the remainder on close.
- UNS provides Fortis a footprint in the US southwest, an area of potential future growth. UNS itself expects ~7% rate base CAGR through 2018 from repowering its generation away from coal into natural gas and renewables.
- Approval of the transaction is required by shareholders (vote in early 2014) and regulators. Transaction is dilutive to 2014 given pre-financing, modestly accretive to 2015, more so over time with rate base growth. Maintain SP rating, price target up modestly to \$35 (prior \$34.50).

## Company Profile

Fortis owns a natural gas utility in British Columbia, electric distribution utilities in five Canadian provinces, the Caribbean, a gas and electric utility in New York State, and non-regulated power generation and real estate assets.

## Investment Thesis

Fortis provides the benefits (stability) of a regulated utility, and is in a period of solid organic investment and growth as the company delivers on its 5 year, \$6 billion capital program which is expected to grow the regulated rate base by a CAGR of 6% through 2017. The capital program is inclusive of the company's 51% interest in the non-regulated \$900 million Waneta Expansion project.

## Assets - Excl Corporate / Eliminations (As At Dec 31, 2012)

## Segmented Earnings (Exc. Corporate)

## Major Sources, Uses Of Cash

Source: Company reports and CIBC World Markets Inc.

On December 11, Fortis (FTS-SP) announced an agreement to acquire UNS Energy (UNS-NYSE), an investor-owned utility in Arizona.

---

## The Transaction

- **Purchase price:** Fortis is offering US\$60.25 per UNS Energy share in an all-cash offer – a 31% premium to the closing price prior to the announcement of the offer. The total purchase price is US\$4.3 billion, including assumption of US\$1.8 billion in debt. Including financing costs, legal and banking fees, the amount payable equates to roughly a 1.5x multiple on the forecast US\$3.0 billion rate base at time of closing, expected in late 2014.
- **Support by UNS:** UNS's board unanimously supports the acquisition. There is a US\$64 million break fee in the event that UNS accepts a superior offer. There are currently no shareholder lock-up agreements.
- **Required approvals:** The acquisition requires typical approvals including: (1) majority shareholder approval; and, (2) regulatory approvals, including from the Arizona Corporation Commission (ACC) and Federal Energy Regulatory Commission (FERC).

We believe approvals should be more straightforward than with Fortis' protracted CH Energy acquisition completed in early 2012. We note UNS Energy shareholders are receiving a 31% premium, Fortis has already arranged financing, and alternate bids, although possible, appear unlikely.

Other regional utilities which theoretically might be interested in regional consolidation opportunities do not appear likely to do so. NV Energy (NVE-NYSE) of Nevada is in the process of being acquired by MidAmerican Energy (at a valuation of ~1.4x EV to rate base). Most other local investor-owned utilities such as Pinnacle West (PNW-NYSE) (owner of the largest Arizona utility, Arizona Public Service), and PNM Resources (PNM-NYSE) of New Mexico, are of comparable size to Fortis or smaller, and could be challenged to present a superior bid.

---

## Financing

Fortis will finance the transaction through:

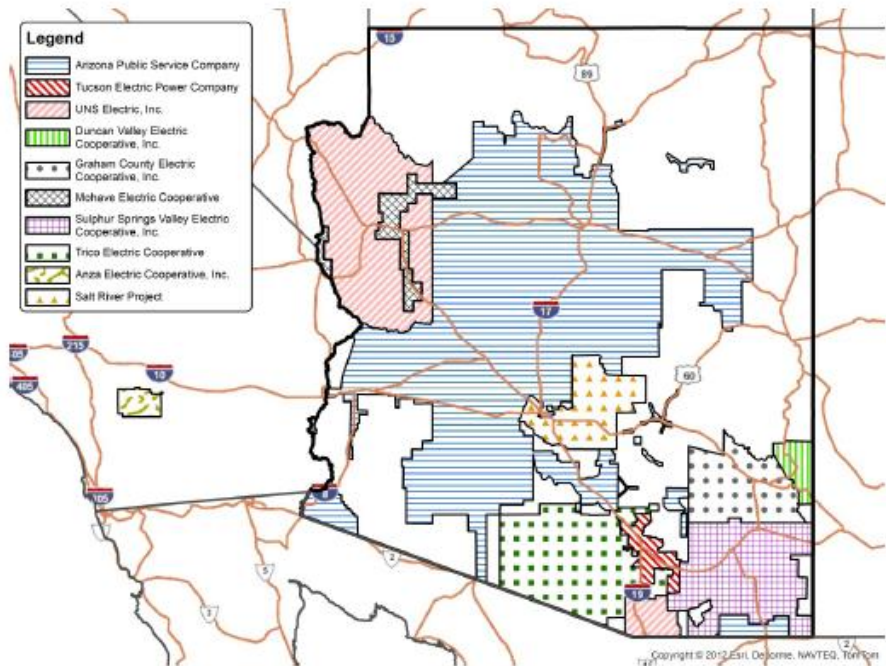

1. Assumption of US\$1.8 billion in debt.
2. Issuance of \$1.8 billion in convertible debentures (\$1.6 billion to the public, and \$0.2 billion in a private placement). The debentures are payable in installments – one-third up front, the remainder on closing of the transaction. The debentures have a coupon of 4% on the face value, but since investors only initially put up one-third of the capital, the effective interest rate is 12%. The conversion price is \$30.72 per Fortis share, a 1.5% discount to the closing price prior to the announcement, but a 2.0% premium to the current price. The debentures were issued in a bought deal to a consortium of Canadian investment banks.
3. The remaining \$0.7 billion will be financed through existing credit facilities.

# UNS Energy

UNS Energy is a vertically integrated Arizona utility, headquartered in Tucson, serving ~505,000 electric and ~149,000 gas customers.

## Exhibit 1. Arizona Utility Landscape

Source: Arizona Corporation Commission (ACC).

Other key utilities in the state include: Arizona Public Service (APS), the largest utility in the state with over 1.1 million customers, and a subsidiary of publicly traded Pinnacle West Capital; and, Salt River Project, a government-owned public utility that provides electricity to 970,000 customers in the Phoenix area.

UNS Energy operates through three subsidiaries: Tucson Electric Power (TEP), UNS Electric and UNS Gas.

## Exhibit 2. UNS Energy – Segments

Subsidiary	Total Assets (as at Sep 30, 2013)		Net Income (9 months to Sep 30, 2013)	
	US\$m.	%	US\$m.	%
TEP	3.6	84	96	85
UNS Electric	0.4	9	11	10
UNS Gas	0.3	7	6	5

Source: Company reports and CIBC World Markets Inc.

UNS owns or leases 2,420 MW of generating capacity, primarily coal (59% of total capacity), with natural gas (34%) accounting for most of the remainder. Renewables (solar) represent only 1% of generation. The utility is slowly repowering this fleet away from coal towards renewables, and targets reducing coal generation by half (to 30%) by 2020, and increasing renewables to 15% by 2025 (as per ACC requirements).

This build-out (along with ongoing maintenance) is expected to contribute to capex spending of US\$2.3 billion from 2013-2018. This capex is expected to drive the rate base at a 7% CAGR over the same time frame. As part of this capex, UNS has already announced the election to purchase currently leased interests in the Springerville coal generating station, as well as an agreement to purchase the 550 MW Gila River Unit 3 gas facility, investments totaling US\$200 million. Fortis intends to fully fund these investments immediately upon closing of the transaction.

### Exhibit 3. UNS Energy Capex Forecast (US\$mIns.)

Source: Company reports.

## Impact On Fortis

Assuming successful completion of the transaction, this acquisition is initially expected to be slightly accretive to Fortis (we forecast by ~\$0.06 EPS in 2015 assuming the transaction is completed by December 31, 2014), benefiting somewhat from the "double dip" financing structure that enables interest deductibility in both Canada and the US.

Over time the transaction should become more accretive (we estimate \$0.09 EPS by 2018) as the acquired UNS operations grow the rate base and earnings. Further upside to this (not in our numbers) is the potential for Fortis to seek a higher equity thickness for TEP, currently set at 43.5%, well below UNS Electric at 52.6% (and Arizona Public Service at 53.9%).

Given that the acquisition is not expected to be completed until late 2014 and Fortis has already pre-financed the transaction (with the associated short-term dilution until the deal closes), we expect earnings to be down significantly in 2014. Our updated financial forecast is shown below. Note that our \$1.55 operating EPS forecast only includes the interest costs associated with the convertible debt (Corporate segment), with all other costs (M&A fees, legal and regulatory costs, etc.) included in Unusual Items.

Source: CIBC World Markets Inc.

We are raising our price target from \$34.50 to \$35 to reflect the modest accretion in 2015 from the acquisition. However, noting the late 2014 time frame for closing the deal and the dilutive impact of financing the transaction in the interim, for now we maintain our Sector Performer rating.

## Price Target Calculation

Our \$35 price target is based on a discounted cash flow analysis, which captures the expected cash flow growth from Fortis' ~\$12 billion capital spending program (including acquisitions) through 2018. Our price target equates to a P/E multiple of 22.6x our 2014 estimate, high for Fortis reflecting the temporary dilution associated with the UNS Energy acquisition, but in line with the pipelines and utilities group average (22.9x).

## Key Risks To Price Target

- **Regulatory Issues:** Given that the majority of Fortis' business is regulated (over 90% as measured by revenues and assets), the company's results are highly sensitive to regulatory decisions – as illustrated by the cost of capital proceedings taking place in Alberta and B.C.

- **Acquisition Risks:** Along with announcing the agreement to acquire UNS Energy, Fortis recently acquired CH Energy, and it continues to pursue additional gas and electric distribution utilities in Canada and the United States. Acquisition risks include: deal risk (failure to close a transaction), operation and regulatory risks of the acquired organization.
- **Market Risks:** Under regulator-approved mechanisms, Fortis flows through the commodity cost of natural gas, fuel or purchased power to its customers. The company's non-regulated hydro generation assets are sensitive to localized rainfall levels, but are geographically dispersed and individually not meaningful to overall results. The Waneta Expansion will be more material, but hydrology risk is managed as part of the overall regional river system by BC Hydro, effectively reducing the risk to the project. Foreign exchange risk is relatively low: a 5% change in the Canadian/U.S. dollar exchange rate would impact earnings by \$0.01/share.
- **Construction Risk:** Fortis primarily faces construction risk for its non-regulated generation assets where the company assumes the risk of cost overruns. Clearly, the Waneta Expansion project is the largest construction project that the company is undertaking (with the company funding 51% of the total \$900 million cost). Fortis and its partners have signed a fixed-price design-build contract with SNC-Lavalin (SNC-SO) in order to mitigate construction risk, but ultimate construction and financing risks lie with the Waneta Expansion consortium (i.e., Fortis and partners).

## Fortis Inc.

### Q4 Roughly In Line; 2014 A Tough Year, 2015 To Benefit From UNS, Waneta, CH

- Fortis reported adjusted Q4/13 EPS of \$0.48, in line with consensus of \$0.48 (CIBC \$0.49). Weaker-than-expected results from FortisAlberta (timing of certain expenses and lower transmission revenues) were offset by stronger results at FortisBC and the Caribbean.
- Subsequent to quarter-end, Fortis announced the sale of Griffith Energy Services, CH Energy's non-regulated energy distributor in the Mid-Atlantic, for US\$70M. Griffith's incurred a loss of \$5M in 2013, including a \$3.5M charge in Q4 associated with tax expenses related to the pending sale.
- Fortis continues to focus on closing the UNS acquisition, with the Arizona regulator setting out a timetable of proceedings, and Fortis targeting a late 2014 close. Fortis issued \$1.8 billion in installment receipts in January to fund the acquisition.
- We see 2014 as a tough year, with earnings drags from UNS (\$1.8B pre-financing), Waneta (no contribution prior to coming into service in early 2015), and CH Energy (rate freeze through mid-2015). These issues should be resolved in 2015, but in the meantime we maintain SP rating/\$35 PT.

## Q4 In Line

Fortis (FTS-SP) reported adjusted Q4/13 EPS of \$0.48, in line with consensus of \$0.48 (CIBC \$0.49) and overall tracking roughly as expected.

We note a couple areas of weakness in the quarter:

- **FortisAlberta:** net earnings of \$18 million versus \$23 million y/y, and below our \$27 million estimate. The company cited timing of depreciation and operating expenses, and lower transmission revenue of \$2 million as key issues.
- **Non-regulated – non-utility:** net earnings of \$1 million versus \$5 million y/y, and below our \$7 million estimate. The company recorded a \$3.5 million charge against CH Energy's Griffith Energy Service's division due to income tax expenses related to the division's pending sale (for US\$70 million, anticipated Q1/14 closing).

Offsetting these issues, the company reported better-than-expected results from FortisBC Energy and FortisBC Electric (lower costs, rate base growth, high gas and electric volumes due to cold weather), and the Caribbean operations, which recorded a \$3 million benefit from capitalization of overhead costs at Fortis Turks and Caicos stemming from a favourable decision in December.

---

## 2014 Faces Headwinds That Reverse In 2015

It looks like 2014 will be a tough year, financially, for Fortis. We see a number of headwinds:

- **Pre-financing of UNS Energy (UNS-NYSE) acquisition:** Fortis issued \$1.8 billion in installment receipts in January to finance the pending acquisition of UNS Energy. With the deal expected to close by late 2014, we see this as a significant drag on earnings in 2014 (~\$0.25 EPS impact).
- **Waneta Dam Expansion:** Approximately \$579 million has been invested in the \$900 million expansion project to date (Fortis owns 51%), and the project is expected to come on line in spring 2015. As a non-regulated investment, Fortis does not earn a return on this project until it enters service.
- **CH Energy:** As part of the CH Energy acquisition, Fortis was required to freeze Central Hudson's rate through June 30, 2015. Over the same period, Central Hudson is required to invest US\$215 million in capex; Fortis will not earn a return on this investment until it is able to adjust rates in mid-2015.

As a result of these issues, we continue to forecast an earnings decline in 2014 (\$1.55 in EPS) versus 2013 (\$1.70). However, these issues should be resolved by (or during) 2015, suggesting a rebound of earnings in that year (\$2.01).

---

## Q4/13 Results

Fortis reported Q4/13 adjusted EPS of \$0.48 (excluding acquisition expenses associated with the UNS Energy transaction), roughly in line with our \$0.49 estimate (consensus \$0.48) and up versus \$0.46 in Q4/12. Although headline numbers were roughly in line with expectations, we note that results varied by individual segments. Results were below expectations at FortisAlberta mainly due to the timing of depreciation and operating expenses and lower net

transmission revenue, as well as in Non Utility operations as CH Energy's Griffith Energy Services (non-regulated petroleum supply operations) has been classified as discontinued operations pending its sale (expected to close in Q1/14). Offsetting the declines were higher-than-expected earnings from FortisBC Energy and FortisBC Electric (both with lower finance charges that offset lower allowed ROEs versus 2012), Caribbean Utilities (capitalization of overhead costs at Fortis Turks and Caicos), and Fortis Generation (higher production in Belize due to greater rainfall).

## Revising Estimates

We have made minor changes to our model, reflecting higher capex than we had previously expected on Fortis' Western Canadian utilities (and as a result higher rate base and earnings) offset by the impact of lost earnings from Griffith Energy Services. Our 2014 and 2015 EPS estimates remain unchanged at \$1.55 and \$2.01, respectively.

Source: CIBC World Markets Inc.

**Price Target Calculation**

Our \$35 price target is based on a discounted cash flow analysis, which captures the expected cash flow growth from Fortis' ~\$12 billion capital spending program (including acquisitions) through 2018. Our price target equates to a P/E multiple of 17.4x our 2015 estimate, below the pipelines and utilities group average of 21.2x.

**Key Risks To Price Target**

- **Regulatory Issues:** Given that the majority of Fortis' business is regulated (over 90% as measured by revenues and assets), the company's results are highly sensitive to regulatory decisions – as illustrated by the performance based regulation (PBR) proceedings taking place in Alberta and B.C.
- **Acquisition Risks:** Along with announcing the agreement to acquire UNS Energy, Fortis recently acquired CH Energy, and it continues to pursue additional gas and electric distribution utilities in Canada and the United States. Acquisition risks include: deal risk (failure to close a transaction), operation and regulatory risks of the acquired organization.

- **Market Risks:** Under regulator-approved mechanisms, Fortis flows through the commodity cost of natural gas, fuel or purchased power to its customers. The company's non-regulated hydro generation assets are sensitive to localized rainfall levels, but are geographically dispersed and individually not meaningful to overall results. The Waneta Expansion will be more material, but hydrology risk is managed as part of the overall regional river system by BC Hydro, effectively reducing the risk to the project. Foreign exchange risk is relatively low: a 5% change in the Canadian/U.S. dollar exchange rate would impact earnings by \$0.01/share.
- **Construction Risk:** Fortis primarily faces construction risk for its non-regulated generation assets where the company assumes the risk of cost overruns. Clearly, the Waneta Expansion project is the largest construction project that the company is undertaking (with the company funding 51% of the total \$900 million cost). Fortis and its partners have signed a fixed-price design-build contract with SNC-Lavalin (SNC-SO) in order to mitigate construction risk, but ultimate construction and financing risks lie with the Waneta Expansion consortium (i.e., Fortis and partners).

## IMPORTANT DISCLOSURES:

**Analyst Certification:** Each CIBC World Markets research analyst named on the front page of this research report, or at the beginning of any subsection hereof, hereby certifies that (i) the recommendations and opinions expressed herein accurately reflect such research analyst's personal views about the company and securities that are the subject of this report and all other companies and securities mentioned in this report that are covered by such research analyst and (ii) no part of the research analyst's compensation was, is, or will be, directly or indirectly, related to the specific recommendations or views expressed by such research analyst in this report.

**Potential Conflicts of Interest:** Equity research analysts employed by CIBC World Markets are compensated from revenues generated by various CIBC World Markets businesses, including the CIBC World Markets Investment Banking Department. Research analysts do not receive compensation based upon revenues from specific investment banking transactions. CIBC World Markets generally prohibits any research analyst and any member of his or her household from executing trades in the securities of a company that such research analyst covers. Additionally, CIBC World Markets generally prohibits any research analyst from serving as an officer, director or advisory board member of a company that such analyst covers.

In addition to 1% ownership positions in covered companies that are required to be specifically disclosed in this report, CIBC World Markets may have a long position of less than 1% or a short position or deal as principal in the securities discussed herein, related securities or in options, futures or other derivative instruments based thereon.

Recipients of this report are advised that any or all of the foregoing arrangements, as well as more specific disclosures set forth below, may at times give rise to potential conflicts of interest.

## Important Disclosure Footnotes for Fortis Inc. (FTS)

- 2a Fortis Inc. is a client for which a CIBC World Markets company has performed investment banking services in the past 12 months.
- 2c CIBC World Markets Inc. has managed or co-managed a public offering of securities for Fortis Inc. in the past 12 months.
- 2e CIBC World Markets Inc. has received compensation for investment banking services from Fortis Inc. in the past 12 months.
- 7 CIBC World Markets Corp., CIBC World Markets Inc., and their affiliates, in the aggregate, beneficially own 1% or more of a class of equity securities issued by Fortis Inc.

This report is issued and approved for distribution by (a) in Canada, CIBC World Markets Inc., a member of the Investment Industry Regulatory Organization of Canada ("IIROC"), the Toronto Stock Exchange, the TSX Venture Exchange and a Member of the Canadian Investor Protection Fund, (b) in the United Kingdom, CIBC World Markets plc, which is regulated by the Financial Services Authority ("FSA"), (c) in Australia to wholesale clients only, CIBC Australia Ltd, a company regulated by the ASIC with AFSL license number 240603 and ACN 000 067 256, and (d) in Japan, CIBC World Markets (Japan) Inc., a registered Type 1 Financial product provider with the registration number Director General of Kanto Finance Bureau #218 (collectively, "CIBC World Markets") and (e) in the United States either by (i) CIBC World Markets Inc. for distribution only to U.S. Major Institutional Investors ("MII") (as such term is defined in SEC Rule 15a-6) or (ii) CIBC World Markets Corp., a member of the Financial Industry Regulatory Authority ("FINRA"). U.S. MIIs receiving this report from CIBC World Markets Inc. (the Canadian broker-dealer) are required to effect transactions (other than negotiating their terms) in securities discussed in the report through CIBC World Markets Corp. (the U.S. broker-dealer).

This report is provided, for informational purposes only, to institutional investor and retail clients of CIBC World Markets in Canada, and does not constitute an offer or solicitation to buy or sell any securities discussed herein in any jurisdiction where such offer or solicitation would be prohibited. This document and any of the products and information contained herein are not intended for the use of private investors in the United Kingdom. Such investors will not be able to enter into agreements or purchase products mentioned herein from CIBC World Markets plc. The comments and views expressed in this document are meant for the general interests of wholesale clients of CIBC Australia Ltd.

This report has been prepared by the CIBC group and is issued in Hong Kong by Canadian Imperial Bank of Commerce, Hong Kong Branch, a registered institution under the Securities and Futures Ordinance, Cap 571 (the "SFO"). This report is intended for "professional investors" only (within the meaning of the SFO) and has been prepared for general circulation and does not take into account the objectives, financial situation or needs of any recipient. Any recipient in Hong Kong who has any questions or requires further information on any matter arising from or relating to this report should contact Canadian Imperial Bank of Commerce, Hong Kong Branch at Suite 3602, Cheung Kong Centre, 2 Queen's Road Central, Hong Kong (telephone number: +852 2841 6111). Orders for Hong Kong listed securities will be executed by Canadian Imperial Bank of Commerce, Hong Kong Branch. Canadian Imperial Bank of Commerce, Hong Kong Branch has entered into an arrangement with its broker-dealer affiliates worldwide to execute orders for securities listed outside of Hong Kong for Hong Kong clients.

This report is intended for distribution in Singapore solely to accredited investors, expert investors and institutional investors (each, "eligible recipients"). Eligible recipients should contact Danny Tan at Canadian Imperial Bank of Commerce, Singapore Branch at One Raffles Place, Tower 2, #12-61, Singapore 048616 (telephone number + 65-6908-0437) in respect of any matter arising from or in connection with this report.

The securities mentioned in this report may not be suitable for all types of investors. This report does not take into account the investment objectives, financial situation or specific needs of any particular client of CIBC World Markets. Recipients should consider this report as only a single factor in making an investment decision and should not rely solely on investment recommendations contained herein, if any, as a substitution for the exercise of independent judgment of the merits and risks of investments. The analyst writing the report is not a person or company with actual, implied or apparent authority to act on behalf of any issuer mentioned in the report. Before making an investment decision with respect to any security recommended in this report, the recipient should consider whether such recommendation is appropriate given the recipient's particular investment needs, objectives and financial circumstances. CIBC World Markets suggests that, prior to acting on any of the recommendations herein, Canadian retail clients of CIBC World Markets contact one of our client advisers in your jurisdiction to discuss your particular circumstances. Non-client recipients of this report who are not institutional investor clients of CIBC World Markets should consult with an independent financial advisor prior to making any investment decision based on this report or for any necessary explanation of its contents. CIBC World Markets will not treat non-client recipients as its clients solely by virtue of their receiving this report.

Past performance is not a guarantee of future results, and no representation or warranty, express or implied, is made regarding future performance of any security mentioned in this report. The price of the securities mentioned in this report and the income they produce may fluctuate and/or be adversely affected by exchange rates, and investors may realize losses on investments in such securities, including the loss of investment principal. CIBC World Markets accepts no liability for any loss arising from the use of information contained in this report, except to the extent that liability may arise under specific statutes or regulations applicable to CIBC World Markets.

## Fortis Inc.

### Corporate Update: UNS Energy Shareholders Approve Acquisition; BC GCOC Decision

- On Wednesday, UNS Energy shareholders approved Fortis' acquisition of the company, with ~97% of shares cast in favour of the acquisition. In December 2013, Fortis announced the agreement to acquire UNS Energy, an Arizona-based regulated utility, for US\$4.3 billion.
- The acquisition is expected to close in late 2014, subject to receipt of certain regulatory and government approvals, including approval by the Arizona Corporation Commission and the FERC. ACC hearings are expected to commence in June.
- Separately, the BCUC issued its decision on the second stage of the generic cost of capital (GCOC) review for B.C. utilities. The first stage decision in May 2013 reduced FortisBC Energy's (the baseline utility) ROE and equity thickness by 75 bps (to 8.75%) and 1.5% (to 38.5%), respectively.
- The decision was in line with our expectations, with FortisBC Inc. (electric utility) and FortisBC (Vancouver Island) both seeing 75 bps declines in allowed ROE (retroactively applied to 2013), with FortisBC (VI) getting a 1.5% increase in equity thickness. No material change to our forecasts.

## Price Target Calculation

Our \$35 price target is based on a discounted cash flow analysis, which captures the expected cash flow growth from Fortis' ~\$12 billion capital spending program (including acquisitions) through 2018. Our price target equates to a P/E multiple of 17.4x our 2015 estimate, below the pipelines and utilities group average of 23.2x.

---

## Key Risks To Price Target

- **Regulatory Issues:** Given that the majority of Fortis' business is regulated (over 90% as measured by revenues and assets), the company's results are highly sensitive to regulatory decisions – as illustrated by the performance based regulation (PBR) proceedings taking place in Alberta and B.C.
- **Acquisition Risks:** Along with announcing the agreement to acquire UNS Energy, Fortis recently acquired CH Energy, and it continues to pursue additional gas and electric distribution utilities in Canada and the United States. Acquisition risks include: deal risk (failure to close a transaction), operation and regulatory risks of the acquired organization.
- **Market Risks:** Under regulator-approved mechanisms, Fortis flows through the commodity cost of natural gas, fuel or purchased power to its customers. The company's non-regulated hydro generation assets are sensitive to localized rainfall levels, but are geographically dispersed and individually not meaningful to overall results. The Waneta Expansion will be more material, but hydrology risk is managed as part of the overall regional river system by BC Hydro, effectively reducing the risk to the project. Foreign exchange risk is relatively low: a 5% change in the Canadian/U.S. dollar exchange rate would impact earnings by \$0.01/share.
- **Construction Risk:** Fortis primarily faces construction risk for its non-regulated generation assets where the company assumes the risk of cost overruns. Clearly, the Waneta Expansion project is the largest construction project that the company is undertaking (with the company funding 51% of the total \$900 million cost). Fortis and its partners have signed a fixed-price design-build contract with SNC-Lavalin (SNC-SO) in order to mitigate construction risk, but ultimate construction and financing risks lie with the Waneta Expansion consortium (i.e., Fortis and partners).

## IMPORTANT DISCLOSURES:

**Analyst Certification:** Each CIBC World Markets research analyst named on the front page of this research report, or at the beginning of any subsection hereof, hereby certifies that (i) the recommendations and opinions expressed herein accurately reflect such research analyst's personal views about the company and securities that are the subject of this report and all other companies and securities mentioned in this report that are covered by such research analyst and (ii) no part of the research analyst's compensation was, is, or will be, directly or indirectly, related to the specific recommendations or views expressed by such research analyst in this report.

**Potential Conflicts of Interest:** Equity research analysts employed by CIBC World Markets are compensated from revenues generated by various CIBC World Markets businesses, including the CIBC World Markets Investment Banking Department. Research analysts do not receive compensation based upon revenues from specific investment banking transactions. CIBC World Markets generally prohibits any research analyst and any member of his or her household from executing trades in the securities of a company that such research analyst covers. Additionally, CIBC World Markets generally prohibits any research analyst from serving as an officer, director or advisory board member of a company that such analyst covers.

In addition to 1% ownership positions in covered companies that are required to be specifically disclosed in this report, CIBC World Markets may have a long position of less than 1% or a short position or deal as principal in the securities discussed herein, related securities or in options, futures or other derivative instruments based thereon.

Recipients of this report are advised that any or all of the foregoing arrangements, as well as more specific disclosures set forth below, may at times give rise to potential conflicts of interest.

## Important Disclosure Footnotes for Fortis Inc. (FTS)

- 2a Fortis Inc. is a client for which a CIBC World Markets company has performed investment banking services in the past 12 months.
- 2c CIBC World Markets Inc. has managed or co-managed a public offering of securities for Fortis Inc. in the past 12 months.
- 2e CIBC World Markets Inc. has received compensation for investment banking services from Fortis Inc. in the past 12 months.
- 2g CIBC World Markets Inc. expects to receive or intends to seek compensation for investment banking services from Fortis Inc. in the next 3 months.
- 7 CIBC World Markets Corp., CIBC World Markets Inc., and their affiliates, in the aggregate, beneficially own 1% or more of a class of equity securities issued by Fortis Inc.

## **Important Disclosure Footnotes for Companies Mentioned in this Report that Are Covered by CIBC World Markets Inc.:**

### **Stock Prices as of 03/26/2014:**

SNC-Lavalin Group Inc. (2g, 7) (SNC-TSX, \$46.87, Sector Outperformer)

## **Companies Mentioned in this Report that Are Not Covered by CIBC World Markets Inc.:**

### **Stock Prices as of 03/26/2014:**

UNS Energy Corp. (UNS-NYSE, US\$60.02, Not Rated)

**Important disclosure footnotes that correspond to the footnotes in this table may be found in the "Key to Important Disclosure Footnotes" section of this report.**

## Fortis Inc.

### Q1 In Line; UNS Energy Acquisition Approval Progressing

- Fortis reported Q1 adjusted EPS of \$0.65 versus consensus of \$0.64 (CIBC \$0.66). Weaker-than-expected results at Fortis' B.C. and Alberta utilities were offset by stronger results at Newfoundland Power, CH Energy and Caribbean Utilities.
- Fortis' US\$4.3B acquisition of UNS Energy was recently approved by the FERC and UNS shareholders. Arizona Corporation Commission (ACC) hearings are scheduled for mid-June, with settlement discussions underway that could result in the transaction closing before the late-2014 target.
- 2014 results are expected to be down Y/Y, given: 1) interest expense on \$1.8 billion in debentures issued for UNS acquisition, 2) customer rate freeze at Central Hudson through June 2015, and 3) no return on the Waneta Dam Expansion project until it enters service (2015).
- We expect 2015 earnings will rebound as these issues are resolved. Beyond that, ~\$12 billion in capital expenditures (including UNS acquisition and associated capex) through 2018 should drive strong earnings growth well into the future. We maintain our SP rating and \$35 price target.

---

## Q1 In Line

Fortis (FTS-SP) reported Q1/14 adjusted EPS of \$0.65, in line with consensus of \$0.64 (CIBC \$0.66). While overall results were in line, segmented earnings varied modestly from our forecasts with weakness at Fortis' B.C. and Alberta utilities offset by stronger-than-expected results at Newfoundland Power, CH Energy and Caribbean Utilities.

Y/Y EPS declined versus \$0.68 in Q1/13 due to higher finance costs associated with the \$1.8 billion in convertible debentures [associated with proposed UNS Energy (UNS-NYSE) acquisition] and a higher share count due to a \$600 million equity issue (in June 2013 associated with the CH Energy acquisition).

---

## UNS Energy Acquisition Approval Progressing

On April 2, the Federal Energy Regulatory Commission (FERC) approved Fortis' acquisition of UNS Energy. This follows the March 26 approval by UNS Energy shareholders, with ~97% of shares cast in favor of the acquisition. In December 2013, Fortis announced the agreement to acquire UNS Energy, an Arizona-based regulated utility with ~650,000 natural gas and electricity customers, for US\$4.3 billion (including the assumption of US\$1.8 billion of debt). The acquisition is subject to receipt of certain regulatory and government approvals, including approval by the Arizona Corporation Commission (ACC). In April, the ACC staff and other intervenors filed their direct testimony in the merger proceeding, indicating that they would support the merger subject to certain conditions, and settlement discussions are underway. The deadline to file a settlement agreement with the ACC is May 16. If an agreement is reached, we would expect an expedited ACC administrative law judge (ALJ) hearing process (which begins June 16), and the potential for the acquisition to close a couple of months before Fortis' current expectation of late 2014.

---

## Outlook Unchanged

We continue to expect 2014 will be a difficult year financially for Fortis, given: 1) interest expense associated with the \$1.8 billion in convertible debentures issued to partially fund the UNS Energy acquisition; 2) a customer rate freeze at Central Hudson through June 2015 (agreed to as a condition of the acquisition), and a US\$215 million capex investment at the utility that Fortis will not be able to earn on until it can adjust customer rates (i.e. July 2015), and 3) the \$900 million Waneta Dam Expansion project (51% owned by Fortis), of which \$603 million has been invested to date (~\$308 million by Fortis), which will not earn a return until it comes into service in the spring of 2015. As a result, we expect EPS to decline from \$1.70 in 2013 to \$1.55 in 2014. However, 2015 expectations are strong (EPS estimate of \$2.01) as these issues get resolved. Beyond that, the growth profile looks fairly strong with \$6.5 billion in projects coming into service in the 2014-2018 timeframe, and an additional \$1.5 billion in capex expected at UNS Energy from 2015 to 2018 (if the acquisition is approved). We maintain our Sector Performer rating and \$35 price target.

---

## Q1/14 Results

Fortis reported Q1/14 adjusted EPS of \$0.65, roughly in line with consensus estimates of \$0.64 (CIBC \$0.66), and down versus \$0.68 in Q1/13. While results were in line overall, several segments were modestly below expectations including FortisBC Energy (higher income taxes and lower allowed ROE Y/Y), FortisAlberta (lower net transmission revenues Y/Y) and FortisBC Electric (lower

ROE Y/Y). Offsetting the above were better-than-expected contributions from Newfoundland Power (higher electricity rates and sales volumes) and Caribbean Utilities (higher sales volumes and a strong US\$), along with a strong contribution from CH Energy which was acquired in June 2013. Y/Y results were negatively impacted by higher finance costs associated with the \$1.8 billion in convertible debentures issued in support of the UNS Energy acquisition, as well as a higher share count related to a \$600 million equity issue in June 2013 associated with the CH Energy acquisition.

---

Source: CIBC World Markets Inc.

**Price Target Calculation**

Our \$35 price target is based on a discounted cash flow analysis, which captures the expected cash flow growth from Fortis' ~\$12 billion capital spending program (including acquisitions) through 2018. Our price target equates to a P/E multiple of 17.4x our 2015 estimate, below the pipelines and utilities group average of 22.8x.

**Key Risks To Price Target**

- **Regulatory Issues:** Given that the majority of Fortis' business is regulated (over 90% as measured by revenues and assets), the company's results are highly sensitive to regulatory decisions – as illustrated by the performance based regulation (PBR) proceedings taking place in Alberta and B.C.
- **Acquisition Risks:** Along with announcing the agreement to acquire UNS Energy, Fortis recently acquired CH Energy, and it continues to pursue additional gas and electric distribution utilities in Canada and the United States. Acquisition risks include: deal risk (failure to close a transaction), operation and regulatory risks of the acquired organization.

- **Market Risks:** Under regulator-approved mechanisms, Fortis flows through the commodity cost of natural gas, fuel or purchased power to its customers. The company's non-regulated hydro generation assets are sensitive to localized rainfall levels, but are geographically dispersed and individually not meaningful to overall results. The Waneta Expansion will be more material, but hydrology risk is managed as part of the overall regional river system by BC Hydro, effectively reducing the risk to the project. Foreign exchange risk is relatively low: a 5% change in the Canadian/U.S. dollar exchange rate would impact earnings by \$0.01/share.
- **Construction Risk:** Fortis primarily faces construction risk for its non-regulated generation assets where the company assumes the risk of cost overruns. Clearly, the Waneta Expansion project is the largest construction project that the company is undertaking (with the company funding 51% of the total \$900 million cost). Fortis and its partners have signed a fixed-price design-build contract with SNC-Lavalin (SNC-SP) in order to mitigate construction risk, but ultimate construction and financing risks lie with the Waneta Expansion consortium (i.e., Fortis and partners).

## Our EPS estimates are shown below:

	1 Qtr.	2 Qtr.	3 Qtr.	4 Qtr.	Yearly

## IMPORTANT DISCLOSURES:

**Analyst Certification:** Each CIBC World Markets research analyst named on the front page of this research report, or at the beginning of any subsection hereof, hereby certifies that (i) the recommendations and opinions expressed herein accurately reflect such research analyst's personal views about the company and securities that are the subject of this report and all other companies and securities mentioned in this report that are covered by such research analyst and (ii) no part of the research analyst's compensation was, is, or will be, directly or indirectly, related to the specific recommendations or views expressed by such research analyst in this report.

**Potential Conflicts of Interest:** Equity research analysts employed by CIBC World Markets are compensated from revenues generated by various CIBC World Markets businesses, including the CIBC World Markets Investment Banking Department. Research analysts do not receive compensation based upon revenues from specific investment banking transactions. CIBC World Markets generally prohibits any research analyst and any member of his or her household from executing trades in the securities of a company that such research analyst covers. Additionally, CIBC World Markets generally prohibits any research analyst from serving as an officer, director or advisory board member of a company that such analyst covers.

In addition to 1% ownership positions in covered companies that are required to be specifically disclosed in this report, CIBC World Markets may have a long position of less than 1% or a short position or deal as principal in the securities discussed herein, related securities or in options, futures or other derivative instruments based thereon.

Recipients of this report are advised that any or all of the foregoing arrangements, as well as more specific disclosures set forth below, may at times give rise to potential conflicts of interest.

## Important Disclosure Footnotes for Fortis Inc. (FTS)

- 2a Fortis Inc. is a client for which a CIBC World Markets company has performed investment banking services in the past 12 months.
- 2c CIBC World Markets Inc. has managed or co-managed a public offering of securities for Fortis Inc. in the past 12 months.
- 2e CIBC World Markets Inc. has received compensation for investment banking services from Fortis Inc. in the past 12 months.
- 2g CIBC World Markets Inc. expects to receive or intends to seek compensation for investment banking services from Fortis Inc. in the next 3 months.
- 7 CIBC World Markets Corp., CIBC World Markets Inc., and their affiliates, in the aggregate, beneficially own 1% or more of a class of equity securities issued by Fortis Inc.

## Fortis Inc.

### Announces Settlement Agreement For UNS Energy

- On May 16, UNS Energy, Fortis, Arizona Corporation Commission (ACC) Staff, the Residential Utility Consumer Office and other parties entered into a settlement agreement whereby the parties agree that the Fortis/UNS merger is in the public interest, and recommend approval by the ACC.
- The recommended approval is subject to certain conditions, including Fortis providing US\$30 million in benefits to utility retail customers over a five-year period and Fortis making an equity infusion totaling US\$220 million into the utilities following closing of the merger.
- We do not view the conditions attached to the merger as surprising or particularly onerous. With \$1.5 billion in capital expenditures at UNS Energy expected in the 2015-2018 timeframe, we anticipated that Fortis would be making a significant equity investment regardless of the merger conditions.
- The settlement agreement for Fortis' US\$4.3 billion UNS Energy acquisition is positive, as it will likely result in an expedited ACC administrative law judge hearing process (beginning June 16) and the potential for the acquisition to close a few months before the late 2014 target. SP; \$35 PT.

## Price Target Calculation

Our \$35 price target is based on a discounted cash flow (DCF) analysis, which captures the expected cash flow growth from Fortis' (FTS-SP) ~\$12 billion capital spending program (including acquisitions) through 2018. Our price target equates to a P/E multiple of 17.4x our 2015 estimate, below the pipelines and utilities group average of 22.8x.

---

## Key Risks To Price Target

- **Regulatory Issues:** Given that the majority of Fortis' business is regulated (over 90% as measured by revenues and assets), the company's results are highly sensitive to regulatory decisions – as illustrated by the performance-based regulation (PBR) proceedings taking place in Alberta and BC.
- **Acquisition Risks:** Along with announcing the agreement to acquire UNS Energy (UNS-NYSE), Fortis recently acquired CH Energy, and it continues to pursue additional gas and electric distribution utilities in Canada and the U.S. Acquisition risks include: deal risk (failure to close a transaction), operation and regulatory risks of the acquired organization.
- **Market Risks:** Under regulator-approved mechanisms, Fortis flows through the commodity cost of natural gas, fuel or purchased power to its customers. The company's non-regulated hydro generation assets are sensitive to localized rainfall levels, but are geographically dispersed and individually not meaningful to overall results. The Waneta Expansion will be more material, but hydrology risk is managed as part of the overall regional river system by BC Hydro, effectively reducing the risk to the project. Foreign exchange risk is relatively low: a 5% change in the Canadian/U.S. dollar exchange rate would impact earnings by \$0.01/share.
- **Construction Risk:** Fortis primarily faces construction risk for its non-regulated generation assets where the company assumes the risk of cost overruns. Clearly, the Waneta Expansion project is the largest construction project that the company is undertaking (with the company funding 51% of the total \$900 million cost). Fortis and its partners have signed a fixed-price design-build contract with SNC-Lavalin (SNC-SP) in order to mitigate construction risk, but ultimate construction and financing risks lie with the Waneta Expansion consortium (i.e., Fortis and partners).

## Our EPS estimates are shown below:

	1 Qtr.	2 Qtr.	3 Qtr.	4 Qtr.	Yearly
2013 Current	\$0.68A	\$0.32A	\$0.23A	\$0.48A	\$1.70A
2014 Current	\$0.65A	\$0.24E	\$0.18E	\$0.49E	\$1.55E
2015 Current	--	--	--	--	\$2.01E

## IMPORTANT DISCLOSURES:

**Analyst Certification:** Each CIBC World Markets research analyst named on the front page of this research report, or at the beginning of any subsection hereof, hereby certifies that (i) the recommendations and opinions expressed herein accurately reflect such research analyst's personal views about the company and securities that are the subject of this report and all other companies and securities mentioned in this report that are covered by such research analyst and (ii) no part of the research analyst's compensation was, is, or will be, directly or indirectly, related to the specific recommendations or views expressed by such research analyst in this report.

**Potential Conflicts of Interest:** Equity research analysts employed by CIBC World Markets are compensated from revenues generated by various CIBC World Markets businesses, including the CIBC World Markets Investment Banking Department. Research analysts do not receive compensation based upon revenues from specific investment banking transactions. CIBC World Markets generally prohibits any research analyst and any member of his or her household from executing trades in the securities of a company that such research analyst covers. Additionally, CIBC World Markets generally prohibits any research analyst from serving as an officer, director or advisory board member of a company that such analyst covers.

In addition to 1% ownership positions in covered companies that are required to be specifically disclosed in this report, CIBC World Markets may have a long position of less than 1% or a short position or deal as principal in the securities discussed herein, related securities or in options, futures or other derivative instruments based thereon.

Recipients of this report are advised that any or all of the foregoing arrangements, as well as more specific disclosures set forth below, may at times give rise to potential conflicts of interest.

## Important Disclosure Footnotes for Fortis Inc. (FTS)

## Fortis Inc.

### Q2 Roughly In-Line, UNS Acquisition Getting Close, Upgrading To SO

- Fortis reported Q2/2014 EPS of \$0.22, slightly below our \$0.24 estimate. Operationally, Q2 was a relatively benign quarter, with only minor variances versus expectations for the various segments and few regulatory issues.
- Fortis announced this week that its acquisition of UNS Energy received a positive recommended opinion from the Arizona Corporation Commission (the state regulator), with a meeting in mid-August to render a final decision. If positive, the acquisition could close by the end of August.
- With the UNS acquisition almost complete, the Waneta Expansion program expected to be finished in spring 2015, the Central Hudson rate freeze ending in mid-2015, and a \$400 million LNG project underway, we see strong earnings growth over the coming year.
- Given the imminent closing of the UNS acquisition, strong expected earnings growth and an in-line or even discounted valuation vs. its peers, we believe Fortis represents an appealing investment, and upgrade the stock, as of August 4, to Sector Outperformer/\$37 PT vs. prior SP/\$35 PT.

## Benign Q2

Fortis (FTS-SO) reported Q2/14 EPS of \$0.22, slightly below our estimate of \$0.24. Earnings were down Y/Y versus \$0.32, reflecting the impact of financing costs of the pending UNS Energy (UNS-NYSE) acquisition (\$0.06 EPS) and the dilution from the conversion of \$601 million in subscription receipts related to the CH Energy acquisition, completed on June 27, 2013.

Although there were minor variances versus our expectations across Fortis' various operations, Q2 results were roughly in line with our estimates. Furthermore, there were few outstanding regulatory issues in the quarter. Overall, we see Q2 as a relatively benign quarter.

---

## UNS Acquisition Getting Close

This week Fortis announced that the UNS acquisition had received a positive recommended opinion and order from the administrative law judge of the Arizona Corporation Commission (ACC), the state utilities regulator. The recommended opinion is that the acquisition is in the public interest, and recommends approval by the ACC. The ACC has convened a meeting for August 12-13 to review this recommendation and make a ruling. If approved, this is the final required step in the process, and Fortis expects it could close the acquisition by the end of August, ahead of our prior end-of-year expectation.

Recall that the purchase price for UNS is US\$4.3 billion, including assumed debt of US\$1.8 billion, which Fortis partially financed through the issuance of \$1.8 billion subscription receipts on January 9, 2014. The subscription receipts convert to common shares on closing of the transaction, although Fortis must pay interest on the subscription receipts for a full year from the date of issuance.

We estimate total UNS rate base at ~\$3 billion on closing, versus Fortis' mid-year 2014 rate base of \$10.7 billion. UNS has a forecast rate base CAGR of ~7% through 2018.

---

## Earnings Set To Accelerate

Fortis has seen EPS growth stall in recent years, despite ongoing high rates of capital expenditures, given lower allowed ROEs in a declining interest rate environment. Indeed, 2013 EPS of \$1.70 was virtually unchanged versus 2010 EPS of \$1.65.

In 2014, EPS are expected to decline to \$1.61 given: (1) \$1.8 billion in subscription receipts issued in advance of the UNS Energy acquisition which bear an interest rate of 4% (but without a commensurate earnings contribution from UNS until closing, expected by the end of August); (2) the impact of a rate freeze at Central Hudson, imposed by the state regulator, from date of acquisition (June 27, 2013) through June 30, 2015, despite a commitment to invest US\$215 million in capex over this period; (3) ongoing construction of the Waneta Expansion hydro project in BC, with \$633 million invested to date (Fortis a 51% owner), but no returns until the project enters operation, expected in spring 2015.

However, we expect earnings to rebound in 2015 to \$2.01 on resolution of these items, as: (1) the UNS Energy is completed and begins to contribute to earnings (end of August 2014), (2) the related subscription receipts convert to common shares, eliminating \$72 million of interest payments; (3) the Waneta Expansion

enters operation; (4) the rate freeze ends at Central Hudson; and, (5) work commences on a \$400 million LNG facility in BC.

### Exhibit 1. Fortis Earnings/Dividends

Source: Company reports and CIBC World Markets Inc.

## Upgrading To Sector Outperformer

We believe Fortis is representing more compelling value given: (1) the expected imminent closing (and de-risking) of the UNS acquisition; (2) the expected earnings growth over the coming year, as outlined above; and, (3) an in-line or even discounted valuation versus its peers [i.e., Fortis trading at an estimated 9.6x 2015 EV/EBITDA versus Canadian Utilities (CU-SO) at 9.6x and Emera (EMA-SP) at 11.7x], despite comparable or better growth. As such, we are upgrading Fortis, effective August 1, to a Sector Outperformer rating/\$37 price target versus prior Sector Performer rating/\$35 price target, representing a 12-month total shareholder return of 16%.

## Q2/14 Results

Fortis reported Q2/14 adjusted EPS of \$0.22, below our estimate of \$0.24, and down Y/Y versus \$0.32 in Q2/13. Regulated utility earnings were modestly above expectations reflecting higher-than-expected earnings at Central Hudson (acquired in June 2013) and Caribbean utilities (increased volumes and a stronger US\$), partially offset by lower-than-expected earnings at FortisAlberta (timing of operating expenses). Non-regulated earnings were in line with higher Fortis Generation earnings (increased hydro volumes in Belize) offset by lower non-utility earnings (lower earnings in the hospitality division of Fortis' real estate operations). Corporate costs were higher than expected due to higher operating and finance expenses, and increased significantly Y/Y due to interest on the convertible debentures issued to finance the UNS acquisition.

**Revising 2014 Estimate To Account For Accelerated Acquisition Closing**

We have revised our forecast to reflect the expectation of the UNS Energy acquisition closing at the end of August, versus the end of 2014 expectation previously. We have made a couple of assumptions related to the closing:

- the \$1.8 billion in convertible debentures associated with the acquisition will be converted to 58.6 million common shares upon closing of the acquisition.
- the remaining interest expense related to the convertible debentures (\$38 million) will be paid in its entirety in Q3/14.

As a result of these changes our 2014 EPS estimate increases from \$1.55 to \$1.61. Our 2015 EPS estimate remains unchanged at \$2.01.

Source: CIBC World Markets Inc.

**Price Target Calculation**

Our \$37 price target (up from \$35 previously) is based on a discounted cash flow analysis, which captures the expected cash flow growth from Fortis' ~\$12 billion capital spending program (including acquisitions) through 2018. Our price target equates to a 2015 EV/EBITDA multiple of 10.1x, conservatively at the lower end of comparable companies Canadian Utilities (9.6x) and Emera (11.7x).

**Key Risks To Price Target**

- **Regulatory Issues:** Given that the majority of Fortis' business is regulated (over 90% as measured by revenues and assets), the company's results are highly sensitive to regulatory decisions – as illustrated by the performance based regulation (PBR) proceedings taking place in Alberta and B.C.
- **Acquisition Risks:** Along with announcing the agreement to acquire UNS Energy, Fortis recently acquired CH Energy, and it continues to pursue additional gas and electric distribution utilities in Canada and the United States. Acquisition risks include: deal risk (failure to close a transaction), operation and regulatory risks of the acquired organization.

- **Market Risks:** Under regulator-approved mechanisms, Fortis flows through the commodity cost of natural gas, fuel or purchased power to its customers. The company's non-regulated hydro generation assets are sensitive to localized rainfall levels, but are geographically dispersed and individually not meaningful to overall results. The Waneta Expansion will be more material, but hydrology risk is managed as part of the overall regional river system by BC Hydro, effectively reducing the risk to the project. Foreign exchange risk is relatively low: a 5% change in the Canadian/U.S. dollar exchange rate would impact earnings by \$0.01/share.
- **Construction Risk:** Fortis primarily faces construction risk for its non-regulated generation assets where the company assumes the risk of cost overruns. Clearly, the Waneta Expansion project is the largest construction project that the company is undertaking (with the company funding 51% of the total \$900 million cost). Fortis and its partners have signed a fixed-price design-build contract with SNC-Lavalin (SNC-SP) in order to mitigate construction risk, but ultimate construction and financing risks lie with the Waneta Expansion consortium (i.e., Fortis and partners).

# Fortis Inc.

## Inaugural Investor Day - Solid Growth Outlook With Upside Potential

### What's The Event

Fortis held its inaugural investor day in Toronto on October 1. The event allowed the company to discuss the recent acquisitions of Central Hudson and UNS Energy, present the new management team, and discuss the growth outlook and upside opportunities available to the company.

### Implications

Fortis remains a highly stable business, with 93% of assets from its regulated utilities. Its current 5-year (2014-2018) \$9.3 billion capex program suggests a rate base CAGR of 7% over the same timeframe. We expect even faster EPS growth in 2015 (25%) given the resolution of a number of headwinds (full-year contribution from UNS, end of rate freeze at Central Hudson, entry into service of the Waneta Expansion), normalizing over time resulting in a 12% EPS CAGR over the 2014-2018 forecast horizon. The company identified a number of areas of upside to this growth outlook, the most likely appearing to be related to LNG facilities in BC.

Overall, we see no material change to our current outlook, financial forecast, price target (\$37) or rating (Sector Outperformer), although note that upside may exist if these prospective projects come to fruition.

**Company Profile**

Fortis owns a natural gas utility in British Columbia, electric distribution utilities in five Canadian provinces, the Caribbean, a gas and electric utility in New York State, and non-regulated power generation and real estate assets.

**Investment Thesis**

Fortis provides the benefits (stability) of a regulated utility, and is in a period of solid organic investment and growth as the company delivers on its 2014-2018, \$6.5 billion capital program. Fortis has an additional \$1.5 billion capex plan for UNS Energy for 2015-2018 once the US\$4.3 billion acquisition closes (expected in late 2014).

## Inaugural Investor Day – Solid Growth Outlook With Upside Potential

Fortis (FTS-SO) held its inaugural investor day in Toronto on October 1. The company clearly has more to discuss than might have been the case in previous years, including:

- two major acquisitions completed in as many years, CH Energy (Central Hudson) and UNS Energy;
- significant management changes, including the appointment of Barry Perry as President and CEO, Karl Smith as his replacement as Executive VP and CFO, and the appointment of former CH and UNS executives to head their acquired operations;
- a recently announced strategic review of its properties business, which we believe could be valued at ~\$850 million;
- and a number of major projects, which could provide upside to the outlook.

Despite all these factors, Fortis remains a very stable distribution business with 93% of its assets from regulated businesses. The company's 5-year \$9.3 billion capital expenditure plan (2014-2018) is expected to drive a rate base CAGR of 7% over this period. We forecast an EPS CAGR over this timeframe of 12%, with a significant increase in 2015 (25%) as recent headwinds are resolved (e.g., upcoming end of rate freeze at Central Hudson, completion of the UNS acquisition, entry into service of Waneta Expansion). We expect dividend per share growth to track similarly, with a 5-year CAGR of 9%.

Furthermore, the company noted a number of areas of potential upside to the base case outlook, including LNG liquefaction projects in BC, gas and electric transmission projects in Central Hudson, and possible opportunities at UNS related to meeting carbon reduction requirements under the EPA's proposed clean power plan. None of these are in our forecast, but could provide upside as early as 2015.

Overall, we see little change to our outlook: a stable regulated utility with underlying mid- to high-single digit rate base growth, but with stronger earnings growth into 2015 given resolution of recent headwinds, and potential upside over the coming years if certain major projects come to fruition. We maintain our Sector Outperformer rating and \$37 price target.

We discuss the major areas of potential upside to our outlook below:

### FortisBC Gas

FortisBC Gas is the largest gas distribution utility in BC, with 961,000 customers and a mid-year 2014 rate base of \$3.7 billion. We estimate the utility has forecast capex of ~\$350 million/year largely related to system upgrades.

However, there is an area of potentially significant upside to this outlook related to LNG liquefaction terminals, with one project already approved by the regulator and under construction and a further two under evaluation/development. If approved, these latter two projects would add a further \$1.1 billion to capex, primarily in 2015/2016. We detail these opportunities below:

## **Tilbury LNG – Phase 1A Under Construction**

FortisBC Gas owns a micro LNG liquefaction facility (5000 GJ/day = ~4 mmcf/d) and storage tank (600,000 GJ = ~500 mmcf) on the Fraser River in Delta, BC, just south of Vancouver. The facility was built in 1971 and is used by FortisBC itself to serve peak winter loads.

There is also a movement in BC to support development of natural gas usage in the transportation sector – for industrial/mining users and remote communities. To this end, Fortis has received approvals (expedited by the BC government which allowed it to circumvent certain regulatory requirements) to expand the Tilbury facility through the construction of a second tank (1,000,000 GJ = ~850 mmcf) with liquefaction capacity of 36,000 GJ/day (~30 mmcf/d). Construction has already started, with an expected in service date of Q4/2016. This expansion ("Phase 1A") is expected to cost \$400 million, and will be included in FortisBC rate base. We have included this project in our forecast.

### **Exhibit 1. Existing Tilbury LNG Facility**

Source: Company reports

## **Tilbury – Future Expansions Under Consideration**

FortisBC is also evaluating further expansions of the Tilbury facility. The site is fully zoned for LNG and can support at a full build-out an estimated 3 million metric tonnes per annum (=450,000 GJ/day = ~385 mmcf/d) of LNG liquefaction capability. The site has gas supply through the Spectra Energy (SE-SP) BC gas transmission system (which connects to the FortisBC Lower Mainland pipeline network), and is located on the Fraser River with readily accessible ocean access.

The next stage of expansion beyond phase 1A noted above is targeted at LNG export opportunities, with a conditional contract with Hawaiian Electric. If a firm contract can be reached (targeting mid-2015), FortisBC would expect construction to commence shortly thereafter with a targeted in service date of late 2017.

The company estimates this expansion project to cost ~\$450 million. Interestingly, although the facility would be targeting international customers, Fortis expects to be able to include the capex in FortisBC Gas rate base. The rationale here is that: (1) fees from liquefaction would cover the increased

revenue requirement; and, (2) the facility will have ancillary benefits to existing FortisBC customers by increasing throughput on underutilized components of the distribution network, potentially reducing the revenue requirement on FortisBC rate payers.

### Exhibit 2. Potential Tilbury Expansions

Source: Company reports

### Woodfibre LNG

Woodfibre LNG (owned by Singapore-based RGE Pte. Ltd.) is a proposed small scale LNG liquefaction facility located on the BC coast ~7 km southwest of Squamish. A pulp mill operated on the site until it was shut down in 2006 [operator Western Forest Products is responsible for clean-up of the site and obtaining a Certificate of Compliance from the BC Ministry of Environment]. The site is zoned for industrial use, has an existing deep water port and electricity interconnection to BC Hydro transmission.

The proposed project was granted an NEB export license in December 2013 for ~2.1 MPTA (~270 mmcf/d) of LNG. The project recently signed a preliminary offtake agreement with Chinese gas distributor Guangzhou Gas Group for 1 MPTA of LNG/year starting in 2017. The project still requires both certain regulatory / government approvals and a final investment decision.

While the site has connection to existing FortisBC Gas pipeline infrastructure, the project would require a major expansion of compression and pipeline capacity, estimated to cost ~\$600 million. Engineering and permitting work is underway. If approved, we would expect work to commence in 2015.

### UNS

Fortis completed the acquisition of UNS Energy on August 15. UNS Energy is an Arizona distribution utility serving ~500,000 electric and 150,000 gas customers, and had a 2014 mid-year rate base of US\$3 billion.

UNS currently has a 5-year capex plan of US\$2.0 billion, somewhat front-end loaded in 2014/15 related to the purchase of generating capacity at the Springerville 1 (coal) and Gila River 3 (natural gas) facilities. This capex drives 4.7% rate base CAGR from 2014-2018.

However we see various factors which could drive earnings upside to this growth outlook:

- **Equity thickness:** UNS' largest subsidiary, Tucson Electric Power (TEP), has an approved equity thickness of 41% in 2014; the company is anticipating regulatory approval to increase equity thickness by 2018 to 49%.
- **New mining customer:** HudBay Minerals (HBM-SP), through its acquisition of Augusta Resource Corp., is the developer of the Rosemont copper project in Arizona. The project has received seven of eight required major permits, with mine construction potentially starting late 2014. The mine would have a potential load of 85 MW once in service in 2017, which would make it the utility's largest single customer.
- **Proposed EPA clean power plan:** The US Environmental Protection Agency (EPA) has proposed a nationwide plan to reduce CO<sub>2</sub> emissions from existing power plants by 30% by 2030 versus 2005 baseline levels. There are state-by-state goals to achieve this target, with Arizona facing a proposed 52% required emissions reduction – the second highest target among all the states. The proposal would see the majority of the cuts in place by 2020. While UNS does not believe this is a viable target to achieve given the relatively short timelines and the major disruption it would cause, nevertheless, the move away from higher polluting coal generation presents opportunities over time. TEP currently generates 80% of its capacity from coal, and targets a reduction to 57% by 2020. More aggressive EPA-imposed targets could require further investment in natural gas or renewables generation, and/or transmission.

Given the uncertainty over some of these issues (especially the EPA emissions targets) we are basing our forecast off the company's base case capex model, although upside could exist to the extent that the company must meet further load (from the Rosemont copper project) or emissions (from the EPA targets) requirements.

## Central Hudson

Central Hudson is a distribution utility in the Central Hudson Valley in southeastern New York State serving 78,000 gas and 300,000 electric customers, and with a mid-year 2014 rate base of US\$1.0 billion. Fortis completed its acquisition of CH Energy (parent company of Central Hudson) in June 2013.

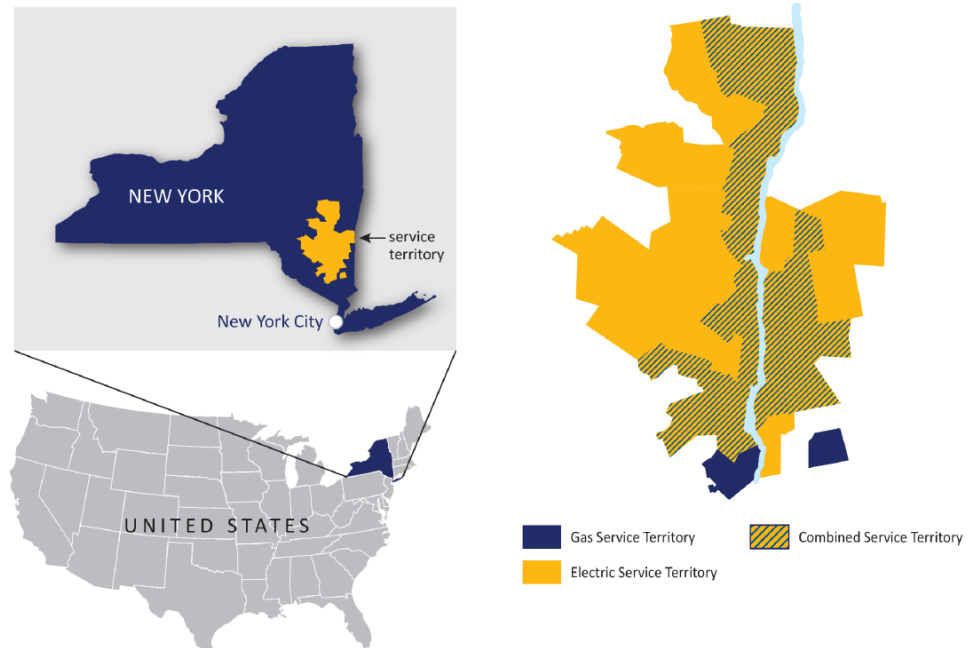

Central Hudson has a 5-year (2014-2018) capex plan totaling US\$0.7 billion, driving a rate base CAGR of 7%. Upside to this forecast could come from transmission opportunities, both gas and electric:

- **New York Transco** (NY Transco), a company formed by New York utilities including Central Hudson, Con Edison (ED-NYSE), and subsidiaries of Iberdrola (IBE-MC) and National Grid (NG-L), is pursuing a number of new electric transmission projects to solve transmission constraints in the state. The New York Energy Highway Task Force issued a request for information (RFI) in April 2012 stating a need to "modernize the transmission system and eliminate the bottlenecks", and inviting parties to submit projects to solve these issues. NY Transco currently has four proposed transmission projects. Central Hudson has a 6% ownership stake in NY Transco, with the projects currently representing a US\$50 million (net) investment to Central Hudson.
- **Gas transmission:** Central Hudson is at an early stage of evaluating the potential to build a gas pipeline from the Marcellus gas basin in Pennsylvania

into southern New York state. The utility is advantageously positioned for this project. However, this is a longer-term, more prospective project which has been tentatively scoped at \$250-\$500 million with a potential in service date of late 2018.

### Exhibit 3. Central Hudson service territory

Source: Company reports

## Strategic Process Underway For Fortis Properties

Fortis announced on September 29 that it will “engage in a review of strategic options” for its property business which owns 23 hotels and 2.8 million square feet of commercial and retail real estate in Canada. In 2013 the segment generated revenues of ~\$250 million and EBITDA of ~\$80 million.

The business is non-regulated, and was operated as a means to generate taxable income against which Fortis’ corporate costs (which could not be allocated to individual regulated utilities) could be offset. We believe this same benefit can now be achieved through the company’s non-regulated generation business, especially with the 2015 start-up of the non-regulated Waneta Expansion hydro facility (which will generate estimated annual EBITDA of \$65 million).

The strategic review process is evaluating all potential options, including sale and/or IPO of the business. According to recent cap rate surveys, current cap rates for retail and office properties in eastern Canada range from ~6%-8%, and for hotel properties from ~8%-10%. Using a blended cap rate in the 8% range implies a valuation of ~\$850 million for the properties – we provide a sensitivity analysis below:

**Exhibit 4. Implied Valuation of Properties Business (\$mlns.)**

EBITDA	80				
Taxes	12				
Net operating income	68				
Cap rate	7.0%	7.5%	8.0%	8.5%	9.0%
<b>Implied value</b>	<b>971</b>	<b>907</b>	<b>850</b>	<b>800</b>	<b>756</b>

Source: CIBC World Markets Inc.

The company noted that the use of proceeds could be used (at least in part) to finance the balance of funding for the UNS acquisition (US\$500 million outstanding, post the company's \$600 million preferred share issuance in September).

**Solid Rate Base Growth Through 2018**

Fortis 2014-2018 capital plan calls for capital expenditures of \$9.3 billion in the five-year timeframe led by investments in western Canadian utilities (\$4.5 billion) and UNS Energy (US\$2.0 billion). These investments are expected to deliver a 7% CAGR in rate base through to 2018 (from \$14.0 billion to \$18.2 billion). We forecast an EPS CAGR of 12% from 2014-2018 as a result of these investments, as well as the resolution of certain headwinds in 2014-2015 (i.e. the end of the rate freeze at Central Hudson, financing charges associated with the convertible debentures related to the UNS acquisition).

**Exhibit 5. Fortis Estimated Rate Base Growth (\$blns.) – Base Case 7% CAGR**

Source: Company reports.

If Fortis is successful in securing the two LNG projects (Tilbury Expansion and Woodfibre Pipeline), that would drive the rate base CAGR to 8.5% through 2018 (2018 rate base of \$19.2 billion).

### Exhibit 6. Fortis Estimated Rate Base Growth, Including LNG Projects (\$blns.) – Upside Case 8.5% CAGR

Source: Company reports.

In terms of financing, the company still has to permanently finance US\$0.5 billion of the UNS acquisition. Fortis currently has \$2.5 billion in unused credit facilities, and we would anticipate that it will use part of the proceeds from the sale of Fortis Properties towards the permanent financing of UNS. Management indicated that it would require additional common equity to finance the LNG projects if they come to fruition. We estimate that the LNG projects will add \$0.02-\$0.07 to annual EPS when fully in service, depending upon how they are financed.

## Price Target Calculation

Our \$37 price target is based on a discounted cash flow analysis, which captures the expected cash flow growth from Fortis' \$9.3 billion capital spending program (including acquisitions) through 2018. Our price target equates to a 2015 EV/EBITDA multiple of 10.3x, conservatively at the lower end of comparable companies Canadian Utilities (9.6x) and Emera (11.9x).

### Exhibit 7. Price Target Calculation Details

Metric	Value	Details
DCF	\$37	Cost of equity: 7%-10% (varies by segment) Cost of debt: 5.9%-6.8% (varies by segment) WACC: 6.2% Terminal growth: 0%
P/E	\$37	Implied from DCF - equates to 18.4x vs. group 25.0x (2015)
EV/EBITDA	\$37	Implied from DCF - equates to 10.3x vs. group 11.5x (2015)

Source: CIBC World Markets Inc.

## Key Risks To Price Target

- Regulatory Issues:** Given that the majority of Fortis' business is regulated (over 90% as measured by revenues and assets), the company's results are highly sensitive to regulatory decisions – as illustrated by the performance based regulation (PBR) proceedings taking place in Alberta and B.C.

- **Market Risks:** Under regulator-approved mechanisms, Fortis flows through the commodity cost of natural gas, fuel or purchased power to its customers. The company's non-regulated hydro generation assets are sensitive to localized rainfall levels, but are geographically dispersed and individually not meaningful to overall results. The Waneta Expansion will be more material, but hydrology risk is managed as part of the overall regional river system by BC Hydro, effectively reducing the risk to the project. Foreign exchange risk is relatively low: a 5% change in the Canadian/U.S. dollar exchange rate would impact earnings by \$0.01/share.
- **Acquisition Risks:** Fortis recently acquired UNS Energy and CH Energy, and it continues to pursue additional gas and electric distribution utilities in Canada and the United States. Acquisition risks include: deal risk (failure to close a transaction), operation and regulatory risks of the acquired organization.
- **Construction Risk:** Fortis primarily faces construction risk for its non-regulated generation assets where the company assumes the risk of cost overruns. Clearly, the Waneta Expansion project is the largest construction project that the company is undertaking (with the company funding 51% of the total \$900 million cost). Fortis and its partners have signed a fixed-price design-build contract with SNC-Lavalin (SNC-SP) in order to mitigate construction risk, but ultimate construction and financing risks lie with the Waneta Expansion consortium (i.e., Fortis and partners).

## Our EPS estimates are shown below:

	1 Qtr.	2 Qtr.	3 Qtr.	4 Qtr.	Yearly
2012 Current	\$0.66A	\$0.34A	\$0.24A	\$0.46A	\$1.70A
2013 Current	\$0.68A	\$0.32A	\$0.23A	\$0.48A	\$1.70A
2014 Current	\$0.65A	\$0.22A	\$0.17E	\$0.57E	\$1.61E
2015 Current	--	--	--	--	\$2.01E

## IMPORTANT DISCLOSURES:

**Analyst Certification:** Each CIBC World Markets research analyst named on the front page of this research report, or at the beginning of any subsection hereof, hereby certifies that (i) the recommendations and opinions expressed herein accurately reflect such research analyst's personal views about the company and securities that are the subject of this report and all other companies and securities mentioned in this report that are covered by such research analyst and (ii) no part of the research analyst's compensation was, is, or will be, directly or indirectly, related to the specific recommendations or views expressed by such research analyst in this report.

**Potential Conflicts of Interest:** Equity research analysts employed by CIBC World Markets are compensated from revenues generated by various CIBC World Markets businesses, including the CIBC World Markets Investment Banking Department. Research analysts do not receive compensation based upon revenues from specific investment banking transactions. CIBC World Markets generally prohibits any research analyst and any member of his or her household from executing trades in the securities of a company that such research analyst covers. Additionally, CIBC World Markets generally prohibits any research analyst from serving as an officer, director or advisory board member of a company that such analyst covers.

In addition to 1% ownership positions in covered companies that are required to be specifically disclosed in this report, CIBC World Markets may have a long position of less than 1% or a short position or deal as principal in the securities discussed herein, related securities or in options, futures or other derivative instruments based thereon.

Recipients of this report are advised that any or all of the foregoing arrangements, as well as more specific disclosures set forth below, may at times give rise to potential conflicts of interest.

## Important Disclosure Footnotes for Fortis Inc. (FTS)

- Fortis Inc. is a client for which a CIBC World Markets company has performed investment banking services in the past 12 months.
- CIBC World Markets Inc. has managed or co-managed a public offering of securities for Fortis Inc. in the past 12 months.
- CIBC World Markets Inc. has received compensation for investment banking services from Fortis Inc. in the past 12 months.
- CIBC World Markets Inc. expects to receive or intends to seek compensation for investment banking services from Fortis Inc. in the next 3 months.
- CIBC World Markets Corp., CIBC World Markets Inc., and their affiliates, in the aggregate, beneficially own 1% or more of a class of equity securities issued by Fortis Inc.
- CIBC World Markets Inc. is the adviser to Fortis Inc. in the review of strategic options for its hotel and commercial real estate business.

**EARNINGS UPDATE**

# Fortis Inc.

## Q3 Slightly Low, Reflecting Seasonality, But Growth Accelerates From Here

### What's The Event

Fortis released Q3/14 EPS of \$0.06; included in this amount was \$0.16 from one-time acquisition-related costs and customer benefits related to UNS. Excluding these, the company reported \$0.22, which compares to our (and consensus) \$0.25 estimate. The quarter also included an \$0.11/share cost related to final interest payments on the convertible debentures issued to pay for UNS (which we had included in our estimate). Excluding this, EPS would have been \$0.33, up significantly versus \$0.23 Y/Y.

Operationally, the quarter included UNS' results from the date of acquisition on August 15. Q3 is UNS' seasonally strongest quarter (summer in Arizona!), and was above our expectations. Fortis' other utilities were generally light of our forecast, with some weaker Y/Y given cooler summer temperatures. In aggregate, the quarter was slightly below our forecast, but we expect the segments to true-up the results in Q4 to achieve their allowed ROEs.

### Implications

We foresee an acceleration of EPS growth over the coming years. 2015 should benefit from a full year's contribution from UNS, the end of a rate freeze at Central Hudson, and the entry into service of the Waneta Expansion. Furthermore, Fortis foresees \$9 billion of capex between 2014-2018, to drive 7% rate base CAGR, possibly higher if proposed LNG facilities or other potential projects were to occur.

A strategic review of the company's Properties business is ongoing, but management is confident of a successful conclusion to this process (likely a sale), with the proceeds to be used to repay the remaining \$500 million of the UNS purchase (currently financed through a bridge loan and line of credit).

### What's Changed

Overall, we see little change to Fortis' outlook. We remain positive on the stock given substantial earnings momentum into 2015 and beyond. We are increasing our dividend growth expectation in 2015 as a result, and maintain our Sector Outperformer rating and \$41 price target.

All figures in Canadian dollars, unless otherwise stated.

CIBC World Markets does and seeks to do business with companies covered in its research reports. As a result, investors should be aware that the firm may have a conflict of interest that could affect the objectivity of this report. Investors should consider this report as only a single factor in making their investment decision.

## Company Profile

Fortis owns a natural gas utility in British Columbia, electric distribution utilities in five Canadian provinces, the Caribbean, a gas and electric utility in New York State, and non-regulated power generation and real estate assets.

## Investment Thesis

Fortis provides the benefits (stability) of a regulated utility, and is in a period of solid organic investment and growth as the company delivers on its 2014-2018, \$6.5 billion capital program. Fortis has an additional \$1.5 billion capex plan for UNS Energy for 2015-2018 once the US\$4.3 billion acquisition closes (expected in late 2014).

## Assets - Excl Corporate / Eliminations (Mid-Year 2014, Total \$14 Billion)

## Segmented Earnings (Exc. Corporate)

## Major Sources, Uses Of Cash

Source: Company reports and CIBC World Markets Inc.

## Q3 Results – Reflect Seasonality And UNS

Fortis (FTS-SO) reported Q3/14 EPS of \$0.06. However, included in this amount were a number of charges related to closing the UNS Energy acquisition, completed on August 15:

- Customer benefits of \$20 million after tax and various acquisition and closing costs of \$15 million. Excluding these one-time items arrives at adjusted EPS for Q3 of \$0.22. This compares to our operating EPS estimate of \$0.25. We exclude these amounts from our operating EPS estimate.
- Finance charges related to interest and the final make-whole payment on the \$1.8 billion of convertible debentures issued to finance the UNS acquisition, totaling \$23 million after tax (\$0.11 EPS). We include these amounts in our operating EPS estimate.

We note that consensus EPS were also \$0.25, but do not have insight into which of the above items were included in the individual estimates and, thus, treat the consensus with some degree of caution.

Operationally, we note that Q3 is a highly seasonal quarter, with the “northern” utilities – especially FortisBC Energy, FortisBC Electric and Central Hudson – seeing a seasonal slowdown versus the winter heating peak but UNS Energy (in Arizona) experiencing a seasonal peak due to air conditioning load. This quarter, we underestimated the seasonal strength at UNS, but this was partially offset by weaker-than-expected results at the northern utilities mentioned above due to cooler-than-average summer temperatures. We note that rate-regulated utilities may experience quarterly fluctuations in results, but generally true-up earnings on an annual basis in order to earn within their allowable ROE.

**Exhibit 1. Q3/14 Results (\$ mlns., except per share)**

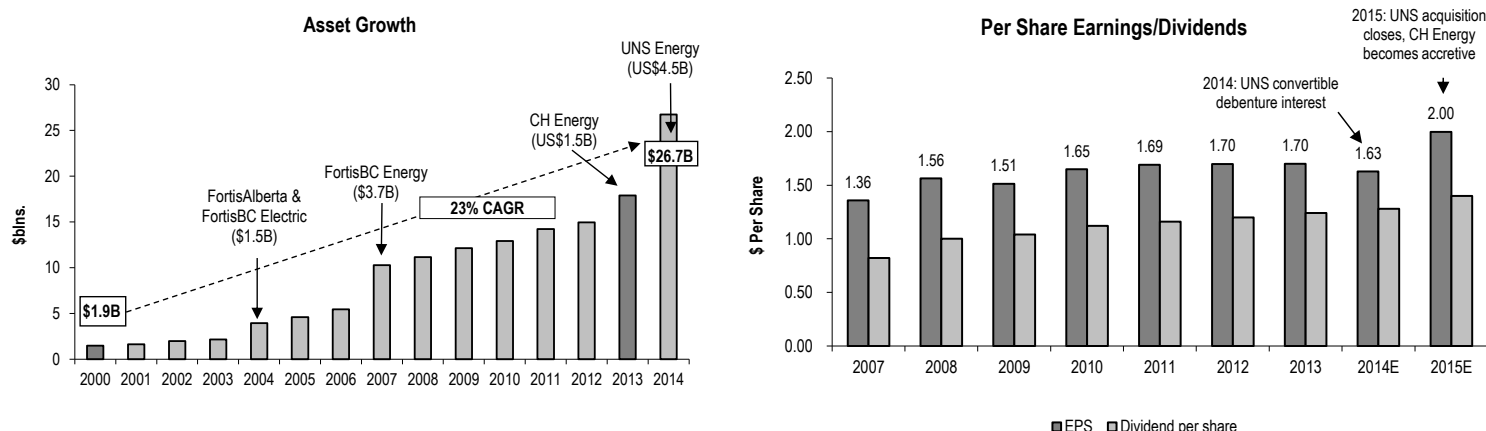

Segmented Earnings	Q3/14A	Q3/14E	Q3/13A	Comments
<b>Regulated Utilities</b>				
FortisBC Energy	(13)	(10)	(14)	Modestly below expectations in seasonally the weakest quarter
FortisAlberta	27	29	25	Y/Y growth due to restoration costs recognized in Q3/13
FortisBC Electric	9	12	11	Higher operating and finance expenses
Newfoundland Power	7	7	8	
Other Canadian Electric Utilities	6	7	7	
Central Hudson	8	11	12	Higher depreciation and operating expenses during the rate-freeze period
UNS Energy	37	13	0	Seasonally stronger than expected
Regulated Electric Utilities – Caribbean	8	6	6	Electricity sales growth and stronger US\$

**Set For Acceleration In EPS Growth**

Despite significant asset growth (Exhibit 2, left) at Fortis over the past few years [i.e., more than doubling between 2008 (\$11.2 billion) and Q3/14 (\$26.7 billion)], earnings per share growth has not kept pace. Indeed, EPS are up a total of only ~4% over that same period (Exhibit 2, right), as allowed returns have declined along with falling interest rates.

## Exhibit 2. EPS Growth To Accelerate Following Significant Asset Growth

Source: Company reports and CIBC World Markets Inc.

At this juncture, we now foresee significant acceleration in EPS growth, especially in 2015 but also in the years beyond. The main elements of this include:

- A full-year contribution in 2015 from UNS. In 2014, UNS will contribute only from the date of acquisition (August 15), although Fortis was carrying significant financing costs through most of the year given the issuance of \$1.8 billion of convertible debentures on January 9.
- The expiry of a two-year rate freeze at Central Hudson, with the utility unable to earn a return on its required capex spend over this period of US\$215 million. The rate freeze expires in mid-2015. Central Hudson has filed a General Rate Application for new rates effective July 1, 2015 in order to recover returns on this spending.
- The entry into service of the Waneta Expansion, a \$900 million hydroelectric project, of which Fortis owns 51%. Total capex invested to date is \$648 million. As a non-regulated facility, Fortis will not earn on this investment until it enters service, expected in spring 2015 (April/May timeframe).
- Ongoing organic capex spend expected to total \$9 billion between 2014–2018, of which \$1.8 billion is expected in 2014. This capex should drive 7% rate base CAGR over this period.
- Fortis is also pursuing a number of major projects that would drive incremental growth to this. In particular, FortisBC Energy is pursuing two micro-LNG export facilities (Tilbury 1B and Woodfibre), which could add an incremental ~\$1 billion to the capex forecast and raise the four-year rate base CAGR to 8.5%.

## Little Change To Forecast

Overall, we see little change to the outlook. We have adjusted our model to reflect Q3 results and quarterly seasonality, and increased our dividend growth expectation in 2015 to reflect the EPS growth outlook. We await updates on the incremental BC LNG facilities and the company's strategic review process for its Properties business (proceeds to be used to repay outstanding \$500 million bridge debt/credit lines used to purchase UNS), although we do not expect conclusions to either until H1/15. We maintain our Sector Outperformer rating and \$41 price target.

Source: CIBC World Markets Inc.

**Price Target Calculation**

Our \$41 price target is based on a discounted cash flow (DCF) analysis, which captures the expected cash flow growth from Fortis' \$9 billion capital spending program (including acquisitions) through 2018. The cost of equity assigned to each segment varies depending on the risk profile of the business (i.e., Canadian utilities – lower risk; Fortis Generation, Caribbean utilities – higher risk). Our price target equates to a 2016E EV/EBITDA multiple of 10.3x (utilizing a 2016 average net debt estimate of \$11.7 billion).

**Key Risks To Price Target**

- **Regulatory Issues:** Given that the majority of Fortis' business is regulated (over 90% as measured by revenues and assets), the company's results are highly sensitive to regulatory decisions – as illustrated by the performance based regulation (PBR) proceedings taking place in Alberta and BC.

- **Market Risks:** Under regulator-approved mechanisms, Fortis flows through the commodity cost of natural gas, fuel or purchased power to its customers. The company's non-regulated hydro generation assets are sensitive to localized rainfall levels, but are geographically dispersed and individually not meaningful to overall results. The Waneta Expansion will be more material, but hydrology risk is managed as part of the overall regional river system by BC Hydro, effectively reducing the risk to the project. Foreign exchange risk is relatively low: a 5% change in the Canadian/U.S. dollar exchange rate would impact earnings by \$0.01/share.
- **Acquisition Risks:** Fortis recently acquired UNS Energy and CH Energy, and it continues to pursue additional gas and electric distribution utilities in Canada and the United States. Acquisition risks include: deal risk (failure to close a transaction) and operation and regulatory risks of the acquired organization.
- **Construction Risk:** Fortis primarily faces construction risk for its non-regulated generation assets where the company assumes the risk of cost overruns. Clearly, the Waneta Expansion project is the largest construction project that the company is undertaking (with the company funding 51% of the total \$900 million cost). Fortis and its partners have signed a fixed-price design-build contract with SNC-Lavalin (SNC-SP) in order to mitigate construction risk, but ultimate construction and financing risks lie with the Waneta Expansion consortium (i.e., Fortis and partners).

## IMPORTANT DISCLOSURES:

**Analyst Certification:** Each CIBC World Markets research analyst named on the front page of this research report, or at the beginning of any subsection hereof, hereby certifies that (i) the recommendations and opinions expressed herein accurately reflect such research analyst's personal views about the company and securities that are the subject of this report and all other companies and securities mentioned in this report that are covered by such research analyst and (ii) no part of the research analyst's compensation was, is, or will be, directly or indirectly, related to the specific recommendations or views expressed by such research analyst in this report.

**Potential Conflicts of Interest:** Equity research analysts employed by CIBC World Markets are compensated from revenues generated by various CIBC World Markets businesses, including the CIBC World Markets Investment Banking Department. Research analysts do not receive compensation based upon revenues from specific investment banking transactions. CIBC World Markets generally prohibits any research analyst and any member of his or her household from executing trades in the securities of a company that such research analyst covers. Additionally, CIBC World Markets generally prohibits any research analyst from serving as an officer, director or advisory board member of a company that such analyst covers.

In addition to 1% ownership positions in covered companies that are required to be specifically disclosed in this report, CIBC World Markets may have a long position of less than 1% or a short position or deal as principal in the securities discussed herein, related securities or in options, futures or other derivative instruments based thereon.

Recipients of this report are advised that any or all of the foregoing arrangements, as well as more specific disclosures set forth below, may at times give rise to potential conflicts of interest.

## Important Disclosure Footnotes for Fortis Inc. (FTS)

- Fortis Inc. is a client for which a CIBC World Markets company has performed investment banking services in the past 12 months.
- CIBC World Markets Inc. has managed or co-managed a public offering of securities for Fortis Inc. in the past 12 months.
- CIBC World Markets Inc. has received compensation for investment banking services from Fortis Inc. in the past 12 months.
- CIBC World Markets Inc. expects to receive or intends to seek compensation for investment banking services from Fortis Inc. in the next 3 months.
- CIBC World Markets Corp., CIBC World Markets Inc., and their affiliates, in the aggregate, beneficially own 1% or more of a class of equity securities issued by Fortis Inc.
- CIBC World Markets Inc. is the adviser to Fortis Inc. in the review of strategic options for its hotel and commercial real estate business.
-

**EARNINGS UPDATE**

# Fortis Inc.

## LNG To The Aloha State

### What's The Event

Fortis has announced potential investment opportunities related to micro-LNG export facilities in BC. While multiple third-party BC LNG mega-projects remain mired in political and commercial uncertainties, these micro LNG projects appear better positioned to proceed, regardless of current depressed oil and gas prices. At present, Fortis is pursuing two opportunities with an aggregate capex spend of ~\$1 billion.

### Implications

We discuss in this report the main drivers of these projects which we expect to be approved by mid-year 2015. If approved, we note that these projects will be included in FortisBC Energy's rate base, and thus pose no commodity risk to the company.

We expect these projects to be partially funded by the sale of the company's Properties division (which the company announced last September to be under a strategic review for potential sale), and we do not anticipate the need for a common equity issuance.

While there is a modest reduction to our EPS estimates in 2015 and 2016 (\$0.02) due to the sale of the Properties division, longer-term, the LNG projects will more than offset lost Properties' earnings once fully in-service (2018).

We are updating our earnings forecast to reflect a 75% probability that Tilbury Phase 1B Expansion and a 50% probability that the Woodfibre LNG project proceed (previously not included in our forecast); we are also hereby increasing our price target by \$1 from \$41 to \$42.

While Fortis' stock is trading near its all-time high, we continue to see a positive, low-risk growth outlook for the company and maintain our Sector Outperformer rating.

## Fortis – Pursuing Micro LNG Opportunities

Much has been made of the multiple third-party LNG liquefaction mega-projects proposed for the BC coast, primarily in the Kitimat and Prince Rupert regions, about 700 km northwest of Vancouver. While these projects are mired in political and commercial uncertainties, a number of smaller micro-scale LNG liquefaction projects are also quietly making their way through early-stage development. These projects do not require the same sizable gas production, pipeline, power and other infrastructure commitments as do the mega-projects, and can be built incrementally at more palatable costs.

### Tilbury LNG Facility Today

Fortis (FTS-SO) is involved with a couple of such micro-LNG proposals, the most promising of which involves its existing Tilbury LNG liquefaction facility on the Fraser River in Delta, BC., just to the south of Vancouver. Currently, the Tilbury facility is used as a storage and peak serving facility supporting FortisBC Energy's gas distribution operations in the Lower Mainland. The facility has been in service since 1971, offering 600,000 GJ (560 MMcf) of storage capacity and 4,500 GJ/d (4.2 MMcf/d) of liquefaction capability.

---

#### Exhibit 1. Tilbury LNG Facility On The Fraser River

Source: Company reports

Fortis has identified opportunities for phased expansion of Tilbury, one of which is underway, and another we expect to be announced soon.

### Phase 1A Expansion

In November 2013, Fortis announced plans for a \$400 million expansion of Tilbury involving an additional storage tank (1.1 million GJ, or 1.0 Bcf) and associated liquefaction equipment with capacity of 34,000 GJ/d (32 MMcf/d). The expansion is to provide LNG to the BC transportation market, remote communities and the marketplace. Fortis announced in July 2014 the selection of Bechtel Canada as the EPC contractor, with ground-breaking on the site in October 2014 and a targeted completion date in late 2016.

The expansion was supported by the Government of BC which exempted the expansion from a certificate of public convenience and necessity review by the

regulator, the BC Utilities Commission (BCUC). The facility expansion will be included in FortisBC Energy's rate base.

### Phase 1B Expansion

The Tilbury LNG site has significant room for further expansion beyond phase 1A – a 35 acre site zoned for LNG for expansion to up to 450,000 GJ/d (420 MMcf/d) liquefaction capability (i.e., over 10x of forecast capacity including phase 1A), with no further site approvals necessary. Furthermore, the site is on the Fraser River with direct ocean access.

---

#### Exhibit 2. Tilbury – Future Phases Of Expansion

Source: Company reports

Accordingly, Fortis has signed a conditional contract with Hawaiian Electric (HE-NYSE) for the next phased expansion of Tilbury, 1B, which would add 140,000 GJ/d (131 MMcf/d) of liquefaction at a cost of \$450 million. We discuss the drivers of this agreement below.

---

### Hawaii Electric – Bringing LNG To The Aloha State

Hawaii represents a good opportunity for Fortis. It is a power market which currently generates 85% of its electricity from fossil fuel (primarily oil) which needs to be imported at high cost. Hawaiian Electric submitted a Power Supply Improvement Plan (PSIP) to the Hawaii Public Utilities Commission (PUC) in August 2014 laying out a plan to rapidly move to replace oil generation with imported LNG, starting in 2017, with the dual benefits of reducing costs and emissions.

### Exhibit 3. Hawaii's Expected Energy Mix Currently Largely Dependent On Oil, But Plans To Switch To LNG

Source: Hawaiian Electric

Hawaiian Electric foresees at first importing LNG through ISO containerized LNG (essentially an LNG tank in the format of a standardized 40' shipping container), switching to bulk LNG via specialized LNG carriers at a later stage (in the 2020-2022 timeframe) which would further reduce costs. The delivered costs for containerized LNG are expected to be US\$15.71/MMBtu in 2017, dropping to US\$12.73/MMBtu in 2022 with bulk shipments.

### Exhibit 4. Hawaiian Electric LNG Itemized Pricing, 2022E

Item	Price
Gas Commodity	US\$4.31
Pipeline Header (Fixed)	0.60
Pipeline Cost Of Fuel	0.11
Marketer Fee (Fixed)	0.01
Liquefaction (Fixed)	1.99
Liquefaction Cost of Power	0.91
Process Fuel Gas	0.04
BC LNG Export Tax	0.00
Marine Terminal	0.33
<b>LNG FOB FortisBC</b>	<b>\$8.30</b>
Shipping	1.89
FSRU + Gas Pipeline	2.54
<b>2022 LNG Forecast with Bulk Terminal</b>	<b>\$12.73</b>

Source: Hawaiian Electric and CIBC World Markets Inc.

While forecast LNG costs initially are only expected to be a modest saving versus the state's current primary fuel, low sulfur fuel oil (LSFO), the savings are expected to rapidly widen over the remainder of the forecast period through

2030, with LNG costs dropping as bulk shipments are phased in, while other fuel alternatives are expected to increase in price. By 2030, LNG costs are forecast to be roughly half other fossil fuel alternatives.

#### Exhibit 5. Hawaiian Electric Delivered Fuel Costs (\$/MMBtu)

Source: Hawaiian Electric and CIBC World Markets Inc.

FortisBC Energy provides a stable fee-based cost structure for LNG export, readily capable of supporting Hawaii's requirements in the proposed timeframe. According to FortisBC Energy's Rate Schedule 46 (latest revision on January 1, 2015), the LNG facility charge is currently \$3.61/GJ, with a surcharge of \$0.90/GJ for electricity used to produce, store and dispense LNG (i.e., a total of \$4.51/GJ), in addition to the cost of gas (currently set at \$4.76/GJ). The facility charge and electricity surcharge escalate annually at the greater of 2% or B.C.'s CPI. Gas costs are passed through without markup.

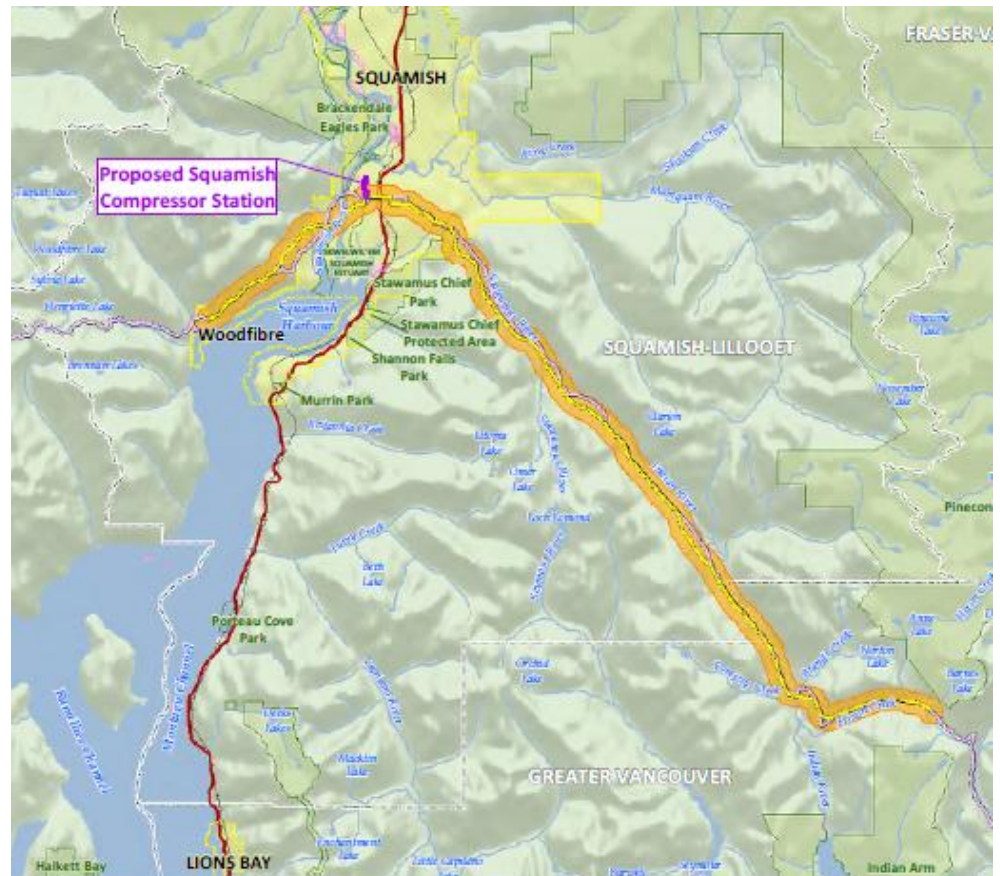

At this point, Hawaiian Electric is awaiting a decision on its plan from the Hawaii PUC, expected by mid-year 2015. If approved, it will enable FortisBC to move forward on phase 1B of the Tilbury expansion, with an expected in-service date of late 2017. We expect this phase to also be included in FortisBC Energy rate base, as the fees paid by Hawaiian Electric not only cover the costs of the expansion and operation of the liquefaction facility itself, but also for usage of the common gas pipeline infrastructure which provides benefits by shouldering some of the costs otherwise borne by other FortisBC Energy rate payers.

### Woodfibre LNG

Fortis is also pursuing projects related to a third party micro-LNG liquefaction facility – the Woodfibre LNG project near Squamish (~60 km north of Vancouver). The proposed project was granted an NEB export license in December 2013 for 270 MMcf/d of LNG, and recently signed a preliminary offtake agreement with Chinese gas distributor Guangzhou Gas Group for ~130 MMcf/d of LNG starting in 2017.

If the project proceeds, FortisBC Energy would need to expand its gas transmission system to serve the facility, including construction of a 52 km pipeline expansion from Coquitlam to Squamish along an existing right of way, as well as expansion of compressor stations in Coquitlam and Port Mellon and construction of a new compressor station near Squamish. Total estimated costs are ~\$600 million.

#### Exhibit 6. Route For Proposed New Gas Pipeline To Serve Woodfibre LNG

Source: Company reports.

The project and FortisBC Energy's proposed pipeline are both making their way through their respective environmental review processes (ending on March 12). The pipeline has already received approvals from BC's Ministry of Forests, Lands and Natural Resource Operations and the Oil and Gas Commission. Woodfibre LNG, meanwhile, is close to finalizing the purchase of the land for the facility from Western Forest Products (WEF-SO) (formerly the site of a pulp mill, and zoned for industrial use), a deal which was contingent on remediation of the site and granting of a certificate of compliance from BC's environment ministry (received in November). Various environmental and local groups (including the Squamish Council) are opposed to the project and pipeline, although the BC provincial government, which has ultimate jurisdiction on approval of the project, has made LNG development in general a top priority. Woodfibre LNG, a subsidiary of Singapore-based Pacific Oil & Gas Ltd. is expected to make a final investment decision by mid-year 2015.

### LNG Provides Upside To Fortis' Outlook

Fortis currently projects a total company-wide 5-year (2014-2018E) capex spend of \$9.3 billion, driving a rate base CAGR over the same period of ~7%. If these two projects are included, the capex spend is expected to rise to \$10.3 billion, driving a rate base CAGR of over 8%.

**Exhibit 7. LNG Drives \$1B Incremental Rate Base**

Source: Company reports and CIBC World Markets Inc.

We are now including a 75% probability that the Tilbury Phase 1B project proceeds, and a 50% probability the Woodfibre LNG project goes ahead (previously not included in our estimates), and are also updating our forecast to reflect the sale of the Properties division by mid-year (a strategic review process for a potential sale initially announced in September 2014). We believe the sale of the division, which generated 2013 EBITDA of \$80 million, could fetch up to \$850 million, which would be partially used to fund construction of the LNG projects and other capex, as well as to repay bridge debt/credit lines used in the UNS acquisition. We do not anticipate the need for a common equity issuance to finance the LNG projects.

We have reduced our 2015 and 2016 EPS estimates modestly, from \$2.02/\$2.23 to \$2.00/\$2.21, respectively to reflect the sale of the Properties division partially offset by higher FortisBC Energy earnings on the capex spent on the two LNG projects (with a full earnings contribution not expected until 2018 when both projects are in-service). Given the long-term positive impact of the LNG projects, we have revised our price target upwards from \$41 to \$42. While the stock is trading near its all-time high, we continue to see a positive, low-risk growth outlook for the company and maintain our Sector Outperformer rating.

## Price Target Calculation

Our \$42 price target (up from \$41 previously) is based on a discounted cash flow analysis, which captures the expected cash flow growth from Fortis' \$10 billion capital spending program (including acquisitions, and risk adjusted capital for LNG projects) through 2018. The cost of equity assigned to each segment varies depending on the risk profile of the business (i.e., Canadian utilities – lower risk; Fortis Generation, Caribbean utilities – higher risk). Our price target equates to a 2016E EV/EBITDA multiple of 9.9x (utilizing a 2016E net debt of \$11.5 billion) and 19.0x 2016E P/E.

## Key Risks To Price Target

- Regulatory Issues:** Given that the majority of Fortis' business is regulated (over 90% as measured by revenues and assets), the company's results are highly sensitive to regulatory decisions – as illustrated by the performance based regulation (PBR) proceedings taking place in Alberta and B.C.

- **Market Risks:** Under regulator-approved mechanisms, Fortis flows through the commodity cost of natural gas, fuel or purchased power to its customers. The company's non-regulated hydro generation assets are sensitive to localized rainfall levels, but are geographically dispersed and individually not meaningful to overall results. The Waneta Expansion will be more material, but hydrology risk is managed as part of the overall regional river system by BC Hydro, effectively reducing the risk to the project. Foreign exchange risk is relatively low: a 5% change in the Canadian/U.S. dollar exchange rate would impact earnings by \$0.01/share.
- **Acquisition Risks:** Fortis recently acquired UNS Energy and CH Energy, and it continues to pursue additional gas and electric distribution utilities in Canada and the United States. Acquisition risks include: deal risk (failure to close a transaction), operation and regulatory risks of the acquired organization.
- **Construction Risk:** Fortis primarily faces construction risk for its non-regulated generation assets where the company assumes the risk of cost overruns. Clearly, the Waneta Expansion project is the largest construction project that the company is undertaking (with the company funding 51% of the total \$900 million cost). Fortis and its partners have signed a fixed-price design-build contract with SNC-Lavalin (SNC-SP) in order to mitigate construction risk, but ultimate construction and financing risks lie with the Waneta Expansion consortium (i.e., Fortis and partners).

## IMPORTANT DISCLOSURES:

**Analyst Certification:** Each CIBC World Markets research analyst named on the front page of this research report, or at the beginning of any subsection hereof, hereby certifies that (i) the recommendations and opinions expressed herein accurately reflect such research analyst's personal views about the company and securities that are the subject of this report and all other companies and securities mentioned in this report that are covered by such research analyst and (ii) no part of the research analyst's compensation was, is, or will be, directly or indirectly, related to the specific recommendations or views expressed by such research analyst in this report.

**Potential Conflicts of Interest:** Equity research analysts employed by CIBC World Markets are compensated from revenues generated by various CIBC World Markets businesses, including the CIBC World Markets Investment Banking Department. Research analysts do not receive compensation based upon revenues from specific investment banking transactions. CIBC World Markets generally prohibits any research analyst and any member of his or her household from executing trades in the securities of a company that such research analyst covers. Additionally, CIBC World Markets generally prohibits any research analyst from serving as an officer, director or advisory board member of a company that such analyst covers.

In addition to 1% ownership positions in covered companies that are required to be specifically disclosed in this report, CIBC World Markets may have a long position of less than 1% or a short position or deal as principal in the securities discussed herein, related securities or in options, futures or other derivative instruments based thereon.

Recipients of this report are advised that any or all of the foregoing arrangements, as well as more specific disclosures set forth below, may at times give rise to potential conflicts of interest.

## Important Disclosure Footnotes for Fortis Inc. (FTS)

- Fortis Inc. is a client for which a CIBC World Markets company has performed investment banking services in the past 12 months.
- CIBC World Markets Inc. has managed or co-managed a public offering of securities for Fortis Inc. in the past 12 months.
- CIBC World Markets Inc. has received compensation for investment banking services from Fortis Inc. in the past 12 months.
- CIBC World Markets Inc. expects to receive or intends to seek compensation for investment banking services from Fortis Inc. in the next 3 months.
- CIBC World Markets Corp., CIBC World Markets Inc., and their affiliates, in the aggregate, beneficially own 1% or more of a class of equity securities issued by Fortis Inc.
- CIBC World Markets Inc. is the adviser to Fortis Inc. in the review of strategic options for its hotel and commercial real estate business.

## EARNINGS UPDATE

## Fortis Inc.

## Weak Q4, But Still Positive Outlook For 2015

## What's The Event

Fortis reported Q4/14 EPS of \$0.44; excluding one-time acquisition related costs for UNS, EPS were \$0.46, below both consensus (\$0.49) and CIBC (\$0.53). The Canadian regulated utilities were generally below expectations from mild weather and limited upside on allowed versus achieved ROEs at western Canadian utilities now operating under PBR (performance based rate setting) mechanisms. Central Hudson results were also weaker than expected due to storm restoration and other expenses.

## Implications

Nevertheless, we continue to view Fortis' outlook positively. We expect 2015 earnings to increase versus 2014 from: (1) a full-year's contribution from UNS Energy (acquired August 2014); (2) the end of the two-year rate freeze at Central Hudson (at mid-year 2015); (3) the completion of the Waneta Expansion project (expected in 'spring' 2015); (4) a forecast capex budget of \$2.2 billion, up ~25% versus 2014.

Additionally, we see other potential catalysts, such as: (1) the completion of the strategic review of the Properties business, expected by mid-year 2015, which could result in the sale of the division; and, (2) successful completion of LNG contracts to support further expansion (phase 1B) of the Tilbury LNG facility (a \$450 million capex opportunity for Fortis) and/or a positive final investment decision for the third party Woodfibre LNG facility (\$600 million).

Fortis provides a well-managed, diversified, low-risk (93% regulated utilities), modest growth (~7%+ rate base CAGR through 2019e) business which is relatively insulated from the current depressed commodity price environment. We maintain our Sector Outperformer rating and \$42 price target.

**Company Profile**

Fortis owns a natural gas utility in British Columbia, electric distribution utilities in five Canadian provinces, the Caribbean, gas and electric utilities in New York State and Arizona, and non-regulated power generation and real estate assets.

**Investment Thesis**

Fortis provides the benefits (stability) of a regulated utility, and is in a period of solid organic investment and growth as the company delivers on its 2015-2019 \$9 billion capital program which is expected to drive a 6.5% CAGR in rate base through 2019. Fortis has an additional ~\$1.1 billion in potential LNG projects in BC which could drive the rate base CAGR to ~7.5%.

## Q4 Weaker Than Expected

Fortis (FTS-SO) reported Q4/2014 EPS of \$0.44; excluding one-time costs related to the UNS acquisition, EPS were \$0.46. These results were below expectations (\$0.49 consensus, \$0.53 CIBC), especially at the western Canadian utilities (which had limited upside on achieved ROE versus the base case under the PBR formulas) and at Central Hudson due to storm restoration and other expenses.

EPS were also lower on a Y/Y basis due to the issuance of 58.2 million shares in October 2014 on completion of the UNS acquisition and conversion of the debentures issued to fund the transaction.

On a full-year basis, EPS were \$1.56 versus \$1.70 in 2013, reflecting the costs of the UNS debentures issued in January 2014 versus the partial-year contribution of the acquisition starting in August.

### Exhibit 1. Q4/14 Results (\$ mlns., except per share)

Segmented Earnings	Q4/14A	Q4/14E	Q4/13A	Comments

## Positive Outlook For 2015

Nevertheless, we view 2014 as the low point for Fortis' EPS, and expect solid growth from here, driven by a number of factors:

- A full-year contribution from UNS Energy, acquired in August 2014. Furthermore, as noted above, 2014 was further impacted by the issuance of \$1.8 billion in convertible debentures in January 2014 to fund the transaction, without a commensurate contribution from UNS until closing.
- The end of the two-year rate freeze at Central Hudson, effective July 1, 2015. Fortis agreed to the rate freeze as part of the regulatory approval required for the acquisition in June 2013. Furthermore, Fortis committed to US\$215 million in capex during this rate freeze period, on which the company is earning no returns until the rate freeze ends. Fortis submitted a regulatory filing in July 2014 seeking to increase rates on expiry of the rate freeze; public hearings are expected in March/April 2015, with a settlement proposal expected to go to the regulator for consideration and approval in June 2015.
- The completion of the Waneta Expansion project, a \$900 million hydro project in BC, expected to be completed in 'spring' 2015. As a non-regulated investment, Fortis earns no returns on the project (in which it holds a 51% interest) until it enters operation.
- A \$2.15 billion capital budget for 2015, up 25% versus \$1.73 billion in 2014. Of this, \$684 million (32%) is expected to be spent at UNS Energy (including \$143 million on an increased interest in the Springerville 1 coal plant and related coal handling facilities and \$92 million on a transmission project), \$417 million (19%) is expected to be spent at FortisAlberta, and \$385 million (18%) is expected to be spent at FortisBC Energy (\$170 million on expansion of the Tilbury LNG plant).

These factors are expected to drive 28% Y/Y EPS growth in 2015 (to \$2.00).

**Further Catalysts**

We also see two major areas of further opportunity:

- **BC LNG:** As discussed in our February 11<sup>th</sup> report “LNG To The Aloha State”, Fortis is pursuing numerous investments related to LNG export facilities in BC. There is one such expansion currently underway, the \$400 million phase 1A expansion of its own Tilbury LNG facility in Delta, BC, to serve internal BC requirements. A subsequent \$450 million phase 1B expansion is in development, to serve offshore needs (currently with a conditional contract with Hawaiian Electric (HE-NYSE), pending a decision from the Hawaiian regulator, expected by mid-year 2015). Fortis is also in development on a \$600 million expansion of its gas pipeline infrastructure to serve a proposed third party LNG facility in Squamish (Woodfibre LNG), with a final investment decision on that project expected by mid-year 2015. The increased gas volumes required for these facilities, if they proceed, would also likely drive investment to expand capacity on Fortis’ gas transmission pipeline infrastructure both on its Coastal Transmission system (~\$200 million) as well as on its Southern Crossing pipeline (~\$500 million).
- **Completion of the strategic review of Fortis Properties,** the company’s non-regulated real-estate division which owns 23 hotels and 2.8 million square feet of commercial real estate. The company announced in September 2014 that it was pursuing a strategic review of these operations including a potential sale; the process is ongoing with the company hopeful of an

outcome in Q2/2015. We believe the sale of the division would be partially used to fund construction of the LNG projects and other capex, as well as to repay bridge debt/credit lines used in the UNS acquisition.

Fortis currently forecasts a 6.5% rate base CAGR through 2019 on its base plan. If the LNG opportunities come to fruition, that would increase the growth rate to a 7.5% CAGR over that period. We have included risk-weighted contributions from the Tilbury 1B and Woodfibre projects in our outlook, but see further upside if these projects, and related gas transmission infrastructure, were to proceed.

Overall, despite the soft Q4 results, we see little change to the outlook, and maintain our Sector Outperformer rating and \$42 price target.

---

## Price Target Calculation

Our \$42 price target is based on a discounted cash flow analysis, which captures the expected cash flow growth from Fortis' ~\$9.5 billion capital spending program (including acquisitions, and risk adjusted capital for LNG projects) through 2019. The cost of equity assigned to each segment varies depending on the risk profile of the business (i.e., Canadian utilities – lower risk; Fortis Generation, Caribbean utilities – higher risk). Our price target equates to a 2016E EV/EBITDA multiple of 10.1x (utilizing a 2016E net debt of \$12.5 billion) and 19.2x 2016E P/E.

---

## Key Risks To Price Target

- **Regulatory Issues:** Given that the majority of Fortis' business is regulated (over 90% as measured by revenues and assets), the company's results are highly sensitive to regulatory decisions – as illustrated by the performance based regulation (PBR) proceedings taking place in Alberta and B.C.
- **Market Risks:** Under regulator-approved mechanisms, Fortis flows through the commodity cost of natural gas, fuel or purchased power to its customers. The company's non-regulated hydro generation assets are sensitive to localized rainfall levels, but are geographically dispersed and individually not meaningful to overall results. The Waneta Expansion will be more material, but hydrology risk is managed as part of the overall regional river system by BC Hydro, effectively reducing the risk to the project. Foreign exchange risk is relatively low: a 5% change in the Canadian/U.S. dollar exchange rate would impact earnings estimates by \$0.01/share.
- **Acquisition Risks:** Fortis recently acquired UNS Energy and CH Energy, and it continues to pursue additional gas and electric distribution utilities in Canada and the United States. Acquisition risks include: deal risk (failure to close a transaction), operation and regulatory risks of the acquired organization.
- **Construction Risk:** Fortis primarily faces construction risk for its non-regulated generation assets where the company assumes the risk of cost overruns. Clearly, the Waneta Expansion project is the largest construction project that the company is undertaking (with the company funding 51% of the total \$900 million cost). Fortis and its partners have signed a fixed-price design-build contract with SNC-Lavalin (SNC-SP) in order to mitigate construction risk, but ultimate construction and financing risks lie with the Waneta Expansion consortium (i.e., Fortis and partners).

## IMPORTANT DISCLOSURES:

**Analyst Certification:** Each CIBC World Markets research analyst named on the front page of this research report, or at the beginning of any subsection hereof, hereby certifies that (i) the recommendations and opinions expressed herein accurately reflect such research analyst's personal views about the company and securities that are the subject of this report and all other companies and securities mentioned in this report that are covered by such research analyst and (ii) no part of the research analyst's compensation was, is, or will be, directly or indirectly, related to the specific recommendations or views expressed by such research analyst in this report.

**Potential Conflicts of Interest:** Equity research analysts employed by CIBC World Markets are compensated from revenues generated by various CIBC World Markets businesses, including the CIBC World Markets Investment Banking Department. Research analysts do not receive compensation based upon revenues from specific investment banking transactions. CIBC World Markets generally prohibits any research analyst and any member of his or her household from executing trades in the securities of a company that such research analyst covers. Additionally, CIBC World Markets generally prohibits any research analyst from serving as an officer, director or advisory board member of a company that such analyst covers.

In addition to 1% ownership positions in covered companies that are required to be specifically disclosed in this report, CIBC World Markets may have a long position of less than 1% or a short position or deal as principal in the securities discussed herein, related securities or in options, futures or other derivative instruments based thereon.

Recipients of this report are advised that any or all of the foregoing arrangements, as well as more specific disclosures set forth below, may at times give rise to potential conflicts of interest.

## Important Disclosure Footnotes for Fortis Inc. (FTS)

- Fortis Inc. is a client for which a CIBC World Markets company has performed investment banking services in the past 12 months.
- CIBC World Markets Inc. has managed or co-managed a public offering of securities for Fortis Inc. in the past 12 months.
- CIBC World Markets Inc. has received compensation for investment banking services from Fortis Inc. in the past 12 months.
- CIBC World Markets Inc. expects to receive or intends to seek compensation for investment banking services from Fortis Inc. in the next 3 months.
- CIBC World Markets Corp., CIBC World Markets Inc., and their affiliates, in the aggregate, beneficially own 1% or more of a class of equity securities issued by Fortis Inc.
- CIBC World Markets Inc. is the adviser to Fortis Inc. in the review of strategic options for its hotel and commercial real estate business.

## COMPANY UPDATE

# Fortis Inc.

## Investor Meetings - Leveraging The Platform

### What's The Event

We recently had the opportunity to attend a number of meetings between Fortis management (Karl Smith, CFO and John Walker, EVP Western Canadian Operations) and institutional investors. The key messages that we took away were:

- (1) With completion of the Central Hudson and UNS Energy acquisitions in the U.S., management's attention has now refocused on internal opportunities.
- (2) The core business is healthy and growing.
- (3) Major regulatory issues are largely resolved.
- (4) There is upside to the base case from a number of regional opportunities, the most immediate of which is in B.C. (LNG related).
- (5) Operations are expected to be funded through internally generated cash flow and debt, with no equity issuances (other than through the DRIP) anticipated; the sale proceeds from the Properties business will be used to repay outstanding debt from the UNS acquisition.

The main events to look out for over the coming months are: regulatory decisions on allowed rates of return in Alberta (Q1), New York (Q2) and B.C. (likely Q4); the completion of the sales process for Fortis Properties (possibly by mid-year); and regulatory and/or commercial decisions on the B.C. LNG projects (possibly by mid-year, although more likely by year end).

### Implications

We see no changes to the outlook as we continue to view Fortis as a well-managed, low-risk, moderate-growth business, with incremental upside if certain regional initiatives come to fruition. We maintain our Sector Outperformer rating and \$42 price target.

We recently had the opportunity to accompany Fortis (FTS-SO) management (CFO Karl Smith, EVP Western Canadian Operations John Walker) to a number of meetings with institutional investors. The key messages that we took away were: (1) following completion of the U.S. acquisitions, management's attention has refocused on internal operations, which are healthy and growing, with major regulatory issues now largely resolved; (2) there is upside to the base business from regional opportunities, the nearest-term one in B.C. (LNG related); and, (3) operations are expected to be funded through internally generated cash flow, the potential sale of the Fortis Properties business and debt, with no equity issuances currently anticipated. We provide further details below.

### **Focus Shifting Back To Organic Growth, For Now**

With the acquisitions of Central Hudson and UNS Energy now complete, the company's short- to mid-term focus has shifted back to organic growth in order to leverage the opportunities within the existing footprint (although acquisitions still remain within the longer-term plan).

The additions of Central Hudson and UNS Energy establish a couple of beachheads in the U.S. market, which is largely populated by investor-owned utilities (although the number of these is shrinking as the market continues to consolidate). By contrast, the majority of utilities in Canada are owned by provincial governments or crown corporations, with few opportunities to acquire. As such, Fortis has expanded into the U.S. to provide future opportunities for organic investment (more on this below), as well as to diversify its business.

For instance, at year-end 2012 (prior to either U.S. acquisition), the company had roughly half its assets (FortisBC gas and electric) in British Columbia, which carried inherent regulatory and political risks given high exposure to a single region. By year-end 2014 (including both U.S. acquisitions), the B.C. utilities represented 29% of total assets, with the U.S. operations comprising 38% of the total.

### **Major Regulatory Issues Largely Settled, For Now**

The company has had a very active regulatory calendar over the last few years. At present, management views the regulatory outlook as more settled. Longer-term agreements are in place in the U.S. operations, and major changes in the regulatory regimes in Alberta and B.C. [following implementation of Performance Base Ratemaking (PBR) mechanisms] have been made, with further changes now "fine-tuning."

- **UNS Energy:** UNS Energy's operating units – Tuscon Electric Power (TEP), UNS Electric and UNS Gas – are operating under rates established in 2013, 2014 and 2012, respectively. The rate orders provide for returns on equity of 10.0%, 9.5% and 9.75% on equity thicknesses of 43.5%, 52.6% and 50.8%, respectively. These rates are expected to remain in place through 2016.
- **Central Hudson:** Central Hudson is currently operating under rates established in July 2014 with a 10.0% ROE on 48% equity. Fortis filed a Joint Settlement Proposal in February 2015 requesting 9.0% ROE on 48% equity for a three-year period commencing July 1, 2015. All parties have agreed to the terms of this settlement, which is expected to go to the regulator in June for consideration and approval.
- **FortisBC Energy and FortisBC Electric:** FortisBC Energy, as the province's "benchmark" utility, off which all other utilities rates are set, is operating under rates established January 1, 2015 with an 8.75% ROE and 38.5% equity. Fortis will file an application for review of these parameters in late 2015 to determine rates for 2016. Given interest rates have declined further

in 2015, there is potential downside risk to FortisBC Energy's allowed ROE, and given it is the benchmark, for all other B.C. utilities, although we expect any reduction to be modest (~25 bps).

- FortisAlberta:** FortisAlberta is operating under interim rates (8.75% ROE on 41% equity) pending the outcome of a Generic Cost of Capital (GCOC) proceeding expected before the end of Q1/15. The GCOC will set the ROE/equity thickness for 2013, 2014 and potentially 2015. Fortis management does not expect significant changes to the interim rates. A decision is also expected in Q1/15 on the Capital Tracker Application which provides a recovery mechanism above those returns allowed under the current PBR mechanism.

### Organic Investment Drives Base Case Mid-to-high Single-digit Growth

As the company has laid out previously, the base-case 2015E-2019E capital plan totals \$9 billion (i.e., an average of \$1.8 billion annually), driving a rate base CAGR (2014-2019E) of 6.4%. If certain LNG-related investments in B.C. come to fruition (a further \$1 billion capex), the rate-base CAGR rises to 7.5%.

**Exhibit 1. Forecast Mid-year Rate Base (\$ blns.)**

Source: Company reports and CIBC World Markets Inc.

The spending profile is skewed more to the early years, with \$2.2 billion of forecast capex in 2015 dropping to \$1.5 billion by 2019. About 70% of capital expenditures are related to maintenance of the existing asset base; the remainder is directed to growth projects. However, of these, there are few major projects, and the investments are reasonably well diversified across segments. We therefore see few risks associated with the base-case outlook.

**Exhibit 2. Major 2015 Projects**

Segment	Project	Amount (\$mlns.)
UNS	Springerville 1	55
	Springerville Coal Handling	88
	Pinal Transmission	92
BC Energy	Tilbury LNG	170
Alberta	Pole Management	41
Caribbean	Generation	58
Non-reg	Waneta Expansion	76

Source: Company reports and CIBC World Markets Inc.

**Exhibit 3. Capex By Segment****F2015 Capex By Segment**

Source: Company reports and CIBC World Markets Inc.

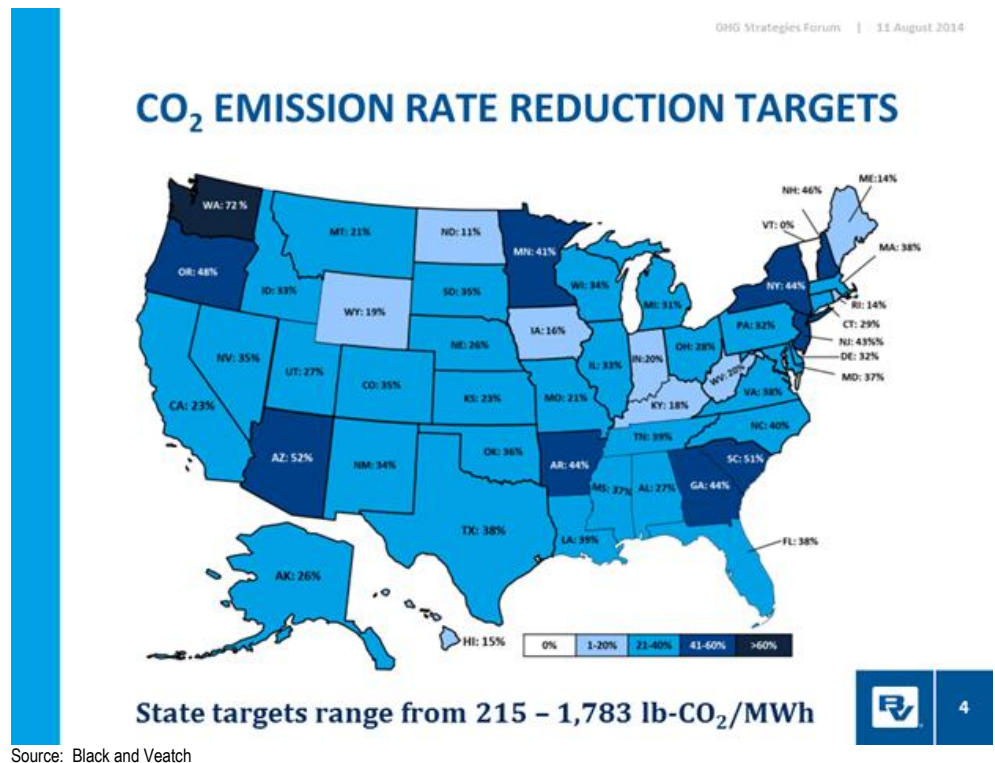

**Potential Upside From Regional Opportunities**

The base-case outlook does not include the potential upside from large-scale regional opportunities. The nearest-term such initiative is in B.C., related to liquefied natural gas (LNG) projects in the province, but Fortis also sees longer-term opportunities in Arizona (UNS Energy) related to retirement and replacement of coal power-generating facilities, and in New York (Central Hudson) related to gas and electric transmission projects. If the B.C. LNG opportunities come to fruition, there will be a further \$1 billion of capex required, contributing to a 7.5% rate base CAGR through 2019, about 1% higher growth than the base-case scenario (Exhibit 1). We discuss a few of these regional opportunities below.

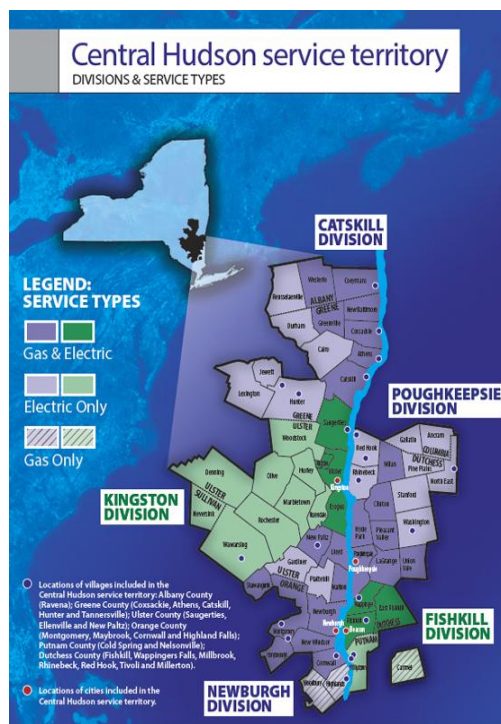

- B.C. LNG:** Management discussed at length the investment opportunities related to B.C. LNG. We published a report on this topic on February 11: "[LNG To The Aloha State.](#)" There are two separate opportunities: (1) expansion of the company's own Tilbury LNG facilities located on the Fraser River in Delta, just south of Vancouver. Phase 1A of this expansion, currently underway and included in the base-case outlook, involves expansion of storage and liquefaction to serve the B.C. transportation industry (trucks, ferries, mining). Phase 1B (approximately ~\$450 million) would be a further expansion of liquefaction capabilities, to serve the export market [a conditional contract has been signed with Hawaiian Electric (HE-NYSE), with approval expected later this year]. (2) Expansion of a gas pipeline and related compression infrastructure (at a cost of ~\$600 million) to serve a proposed third-party LNG export facility (Woodfibre) in Squamish. The Woodfibre project is awaiting final environmental approvals and is expected to reach a final investment decision later this year. Both projects are supported by the B.C. provincial government which views them as key components (and early signs of success) of its initiatives to foster investment in LNG projects in the province.
- Arizona:** UNS Energy generates ~60% of its energy from coal-fired generation facilities, with renewables (solar) comprising only about 1% of the mix (gas and oil making up the remainder). In June 2014, the U.S. Environmental Protection Agency (EPA) announced carbon emission regulations under a proposed Clean Power Plan, targeting a 30% nation-wide reduction in CO<sub>2</sub> emissions by 2030. The plan called for state-by-state targets; with Arizona so heavily dependent on coal-fired generation, the plan called for a 52% reduction in Arizona emissions. The Clean Power Plan was initially expected to be finalized by mid-2015; we believe this is likely to be delayed given the difficulties and costs of implementation. Nevertheless,

regardless of the final requirements of the plan, it is clear that significant investments need to be made to reduce emissions in Arizona. We expect UNS to take part in the long-term investment to replace coal-fired facilities with gas and/or renewables (both utility scale and distributed), although we await finalization of the EPA plan to see of what magnitude and over what timeframe these investments will need to be made.

#### Exhibit 4. Proposed CO<sub>2</sub> Emissions Reduction Targets, By State

- New York:** Fortis' operations in New York state, through the acquired Central Hudson (CH) operations, extend along the Hudson River Valley, from the northern outskirts of New York City to the southern outskirts of Albany. The location is beneficial, located in a region that has transmission constraints, both electric (north to south) and gas (west to east).

**Exhibit 5. CH Service Territory**

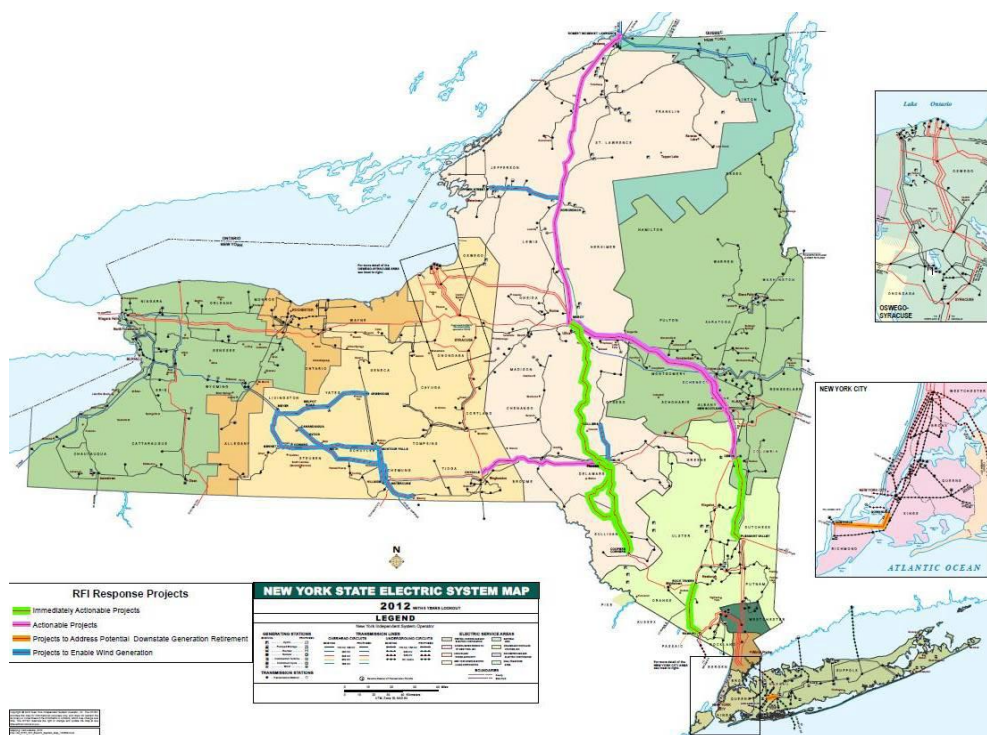

Source: Company reports

Fortis is pursuing electric transmission opportunities through a partnership (New York Transco) with the other major transmission owners in the state, Con Edison (ED-NYSE), New York Power Authority, Long Island Power Authority, New York State Electric and Gas Co., and Niagara Mohawk Power (NMK.C-NYSE). Fortis has a 6% stake in the partnership. The partnership has identified a number of projects aimed at alleviating electric transmission congestion in the state, whereby power generators in the northern and western parts of the state (including renewable generation) are constrained in exporting excess energy to the heavy load in the southeastern region.

The partnership has identified several projects to de-constrain transmission, initially pursuing five of these, representing a total investment of ~US\$0.9 billion (~US\$50 million to Fortis). The broader opportunity set proposed by the partnership totals about US\$3 billion, representing further long-term potential investment.

## Exhibit 6. New York Transco Projects

Additionally, Fortis sees opportunity to utilize its right of ways to build out gas pipeline infrastructure to transport gas from the Marcellus region to the west in Pennsylvania to the population load centers in New England to the east. We view this opportunity as less well developed than the electric transmission initiatives Fortis is pursuing through New York Transco; if it were to proceed, we expect it would do so in partnership with a gas pipeline company with existing infrastructure in the region [e.g., Spectra Energy (SE-SP), Kinder Morgan (KMI-NYSE)].

## Growth Financeable From Cash Flows (And Sale Of Fortis Properties)

With the inclusion of the two acquired U.S. utilities, we expect Fortis to generate strong operating cash flow. We believe this should be roughly sufficient to fund the company's primary cash needs over the forecast horizon, on average, although spending could exceed operating cash flow in certain years. In 2015, we estimate operating cash flow of ~\$1.6 billion, slightly below the \$1.8 billion required to fund dividends (~\$0.4 billion, including DRIP proceeds), debt repayment (\$0.5 billion), and the equity funded portion (at an assumed 40% ratio) of capex (\$0.9 billion). However, over the five-year forecast, we estimate cash flow on average to exceed requirements. In any event, the company does not currently foresee the need for further equity issuance (beyond the DRIP program) to fund its capital program. As such, rate base growth should translate roughly into comparable EPS (and ultimately dividend per share) growth.

**Exhibit 7. Cash Flow Appears Sufficient To Support Major Requirements****Major Cash Sources, Uses**

Source: CIBC World Markets Inc.

The company is also in the process of selling its Properties division, and hopes to conclude the process by mid-year. The company has already received preliminary bids. While management declined to comment on the expected sale price, it noted that the Properties book value is ~\$700 million, and it hopes to exceed this figure. The proceeds are likely to be used to retire outstanding debt of ~\$750 million not yet termed out from the UNS acquisition.

**Summary**

In summary, management's comments were consistent with those laid out at various investor events over the past year: with the completion of the U.S. acquisitions, the company is focused on executing on a sizable base-case program of organic development, with possible upside, likely fully fundable from internally generated cash flow (plus incremental debt). We continue to view Fortis as a well-managed, low-risk, modest-growth business, with good visibility into mid- to high-single-digit rate base, and likely dividend per share, growth over the coming several years. We maintain our Sector Outperformer rating and \$42 price target.

**Price Target Calculation**

Our \$42 price target is based on a discounted cash flow analysis, which captures the expected cash flow growth from Fortis' ~\$9.5 billion capital spending program (including acquisitions, and risk-adjusted capital for LNG projects) through 2019. The cost of equity assigned to each segment varies depending on the risk profile of the business (i.e., Canadian utilities – lower risk; Fortis Generation, Caribbean utilities – higher risk). Our price target equates to a 2016E EV/EBITDA multiple of 10.1x (utilizing a 2016E net debt of \$12.5 billion) and 19.2x 2016E P/E.

**Key Risks To Price Target**

- Regulatory Issues:** Given that the majority of Fortis' business is regulated (over 90% as measured by revenues and assets), the company's results are highly sensitive to regulatory decisions – as illustrated by the performance based regulation (PBR) proceedings taking place in Alberta and B.C.

- **Market Risks:** Under regulator-approved mechanisms, Fortis flows through the commodity cost of natural gas, fuel or purchased power to its customers. The company's non-regulated hydro generation assets are sensitive to localized rainfall levels, but are geographically dispersed and individually not meaningful to overall results. The Waneta Expansion will be more material, but hydrology risk is managed as part of the overall regional river system by BC Hydro, effectively reducing the risk to the project. Foreign exchange risk is relatively low: a 5% change in the Canadian/U.S. dollar exchange rate would impact earnings by \$0.01/share.
- **Acquisition Risks:** Fortis recently acquired UNS Energy and CH Energy, and it continues to pursue additional gas and electric distribution utilities in Canada and the United States. Acquisition risks include: deal risk (failure to close a transaction), operation and regulatory risks of the acquired organization.
- **Construction Risks:** Fortis primarily faces construction risk for its non-regulated generation assets where the company assumes the risk of cost overruns. Clearly, the Waneta Expansion project is the largest construction project that the company is undertaking (with the company funding 51% of the total \$900 million cost). Fortis and its partners have signed a fixed-price design-build contract with SNC-Lavalin (SNC-SP) in order to mitigate construction risk, but ultimate construction and financing risks lie with the Waneta Expansion consortium (i.e., Fortis and partners).

## IMPORTANT DISCLOSURES:

**Analyst Certification:** Each CIBC World Markets research analyst named on the front page of this research report, or at the beginning of any subsection hereof, hereby certifies that (i) the recommendations and opinions expressed herein accurately reflect such research analyst's personal views about the company and securities that are the subject of this report and all other companies and securities mentioned in this report that are covered by such research analyst and (ii) no part of the research analyst's compensation was, is, or will be, directly or indirectly, related to the specific recommendations or views expressed by such research analyst in this report.

**Potential Conflicts of Interest:** Equity research analysts employed by CIBC World Markets are compensated from revenues generated by various CIBC World Markets businesses, including the CIBC World Markets Investment Banking Department. Research analysts do not receive compensation based upon revenues from specific investment banking transactions. CIBC World Markets generally prohibits any research analyst and any member of his or her household from executing trades in the securities of a company that such research analyst covers. Additionally, CIBC World Markets generally prohibits any research analyst from serving as an officer, director or advisory board member of a company that such analyst covers.

In addition to 1% ownership positions in covered companies that are required to be specifically disclosed in this report, CIBC World Markets may have a long position of less than 1% or a short position or deal as principal in the securities discussed herein, related securities or in options, futures or other derivative instruments based thereon.

Recipients of this report are advised that any or all of the foregoing arrangements, as well as more specific disclosures set forth below, may at times give rise to potential conflicts of interest.

## Important Disclosure Footnotes for Fortis Inc. (FTS)

- Fortis Inc. is a client for which a CIBC World Markets company has performed investment banking services in the past 12 months.
- CIBC World Markets Inc. has managed or co-managed a public offering of securities for Fortis Inc. in the past 12 months.
- CIBC World Markets Inc. has received compensation for investment banking services from Fortis Inc. in the past 12 months.
- CIBC World Markets Inc. expects to receive or intends to seek compensation for investment banking services from Fortis Inc. in the next 3 months.
- CIBC World Markets Corp., CIBC World Markets Inc., and their affiliates, in the aggregate, beneficially own 1% or more of a class of equity securities issued by Fortis Inc.
- CIBC World Markets Inc. is the adviser to Fortis Inc. in the review of strategic options for its hotel and commercial real estate business.

## Important Disclosure Footnotes for Companies Mentioned in this Report that Are Covered by CIBC World Markets Inc.:

### Stock Prices as of 03/03/2015:

SNC-Lavalin Group Inc. (2g, 7) (SNC-TSX, \$39.54, Sector Performer)

Spectra Energy Corp (2g) (SE-NYSE, US\$35.32, Sector Performer)

## Companies Mentioned in this Report that Are Not Covered by CIBC World Markets Inc.:

### Stock Prices as of 03/03/2015:

Consolidated Edison (ED-NYSE, US\$62.17, Not Rated)

Hawaiian Electric Industries (HE-NYSE, US\$32.63, Not Rated)

9 commercial real estate business.

## CIBC World Markets Inc. Stock Rating System

Abbreviation	Rating	Description
<b>Stock Ratings</b>		
SO	Sector Outperformer	Stock is expected to outperform the sector during the next 12-18 months.
SP	Sector Performer	Stock is expected to perform in line with the sector during the next 12-18 months.
SU	Sector Underperformer	Stock is expected to underperform the sector during the next 12-18 months.
NR	Not Rated	CIBC World Markets does not maintain an investment recommendation on the stock.
R	Restricted	CIBC World Markets is restricted (due to potential conflict of interest) from rating the stock.
<b>Sector Weightings (note: Broader market averages refer to S&amp;P 500 in the U.S. and S&amp;P/TSX Composite in Canada.)</b>		
O	Overweight	Sector is expected to outperform the broader market averages.
M	Market Weight	Sector is expected to equal the performance of the broader market averages.
U	Underweight	Sector is expected to underperform the broader market averages.
NA	None	Sector rating is not applicable.

"Speculative" indicates that an investment in this security involves a high amount of risk due to volatility and/or liquidity issues.
